> The trustee was obligated to pay a fixed annuity to qualified charitable organizations. Under the principles of section 1.661(a)-2(f)(1) of the regulations and the case law cited, the distribution of appreciated securities causes the trust to realize gain or loss if the distribution satisfies a right to receive a distribution in a specific dollar amount. Although the trustee has authority to pay the annuity to qualified charities of the trustee's choice, the distribution satisfies a right to receive a specified dollar amount. It is not necessary or practical to identify a particular qualified charity with the right to receive a specified dollar amount. In *Kenan*, the court stated that the word "exchange" does not necessarily have the connotation of a bilateral agreement which may be said to attach to the word "sale". Thus, the distribution in this case is an exchange even though the trustee consulted with no one before satisfying the obligation to pay the annuity by using the appreciated securities.

Rev. Rul. 83-75 held:

> The distribution by the trust of corpus consisting of appreciated securities in satisfaction of its obligation to pay a fixed annuity to a qualified charitable organization is a sale or exchange of the securities that results in taxable gain to the trust.

Rev. Proc. 2007-45, § 8.02(2) says:

> *Payment requirements*. CLATs are not subject to any minimum or maximum payout requirements. The governing instrument of a CLAT must provide for the payment to a charitable organization of a fixed dollar amount or a fixed percentage of the initial net fair market value of the assets transferred to the trust. Alternatively, the governing instrument of a CLAT may provide for an annuity amount that is initially stated as a fixed dollar or fixed percentage amount but increases during the annuity period, provided that the value of the annuity amount is ascertainable at the time the trust is funded. The annuity payments may be made in cash or in kind. If the trustee distributes appreciated property in satisfaction of the required annuity payment, the donor will realize capital gain on the assets distributed to satisfy part or all of the annuity payment.

[2789] Rev. Rul. 68-392, which went through the rules that existed at that time regarding including capital gain in DNI and concluded that they did not apply. However, since then, the regulations have changed, so a different result may occur; see part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI).

[2790] See part II.J.8.d.ii Specific Bequest.

reserve for this tax before making distributions to beneficiaries and may have a mismatch for net investment income tax purposes as well.[2792] However, when a charity that was the annuity recipient was bequeathed the remainder, the resulting merger of interests and trust termination were not a taxable event.[2793] Also, if the bequest is satisfied using date-of-death values, presumably no gain or loss would be realized, but to qualify for the marital[2794] or charitable[2795] deduction the assets' value relative to date of death values must be "fairly representative of appreciation or depreciation in the value of all property thus available for distribution in satisfaction of such pecuniary bequest or transfer."

If a trust makes a non-pro rata distribution of residue without either the trust instrument or local law authorizing a non-pro rata distribution, each beneficiary may be treated as having received a pro rata distribution and exchanged it with the other beneficiaries.[2796] Otherwise, generally the trust does not recognize any gain or loss and the beneficiaries receive the same basis as the trust's;[2797] for further analysis of dividing trusts (including on termination), see part II.D.5 Severing Trusts with Multiple Grantors. However, the trust may elect to treat all property distributions during the taxable year as sales,[2798] but losses in transactions with beneficiaries and other related parties are disallowed except to the extent that they are from an

---

[2792] Deductions for regular income tax purposes limit the deduction for distributions to beneficiaries. If those same deductions do not apply for net investment income (NII) tax purposes, the trust's NII may be subjected to NII tax. See part II.I.6 Deductions Against NII within part II.I 3.8% Tax on Excess Net Investment Income (NII).

[2794] Rev. Proc. 64-19.
[2795] Letter Ruling 8339005.
[2796] Rev. Rul. 69-486. See Zaritsky, Lane & Danforth, ¶2.19. Gain on the Division, Termination, or Reformation of a Trust, *Federal Income Taxation of Estates and Trusts* (WG&L).
[2797] Rev. Rul. 69-486. Reg. § 1.1015-2(a) provides:

(1) In the case of property acquired after December 31, 1920, by transfer in trust (other than by a transfer in trust by a gift, bequest, or devise) the basis of property so acquired is the same as it would be in the hands of the grantor increased in the amount of gain or decreased in the amount of loss recognized to the grantor upon such transfer under the law applicable to the year in which the transfer was made. If the taxpayer acquired the property by a transfer in trust, this basis applies whether the property be in the hands of the trustee, or the beneficiary, and whether acquired prior to the termination of the trust and distribution of the property, or thereafter.

(2) The principles stated in paragraph (b) of § 1.1015-1 concerning the uniform basis are applicable in determining the basis of property where more than one person acquires an interest in property by transfer in trust after December 31, 1920.

[2798] Code § 643(e)(3). Letter Ruling 202239006 allowed the taxpayer to revoke its Code § 643(e)(3) election in this situation:

> On the advice of Estate's return preparer, the executors of Estate made an election under § 643(e)(3) for Estate's tax year ending Date 3 to treat the distribution as a sale of property to Y. The intended effect of the election was for Estate to recognize built-in loss in the distributed assets, and for Y, and subsequently X and Y's children, to have a basis in the assets equal to their fair market value. Estate filed its income tax return for its tax year ending Date 3 on this basis.
>
> While preparing Y and Y's children's tax income tax returns, the return preparer realized that the intended effect of the § 643(e)(3) election had not occurred because of the prohibition against deductions in transactions between related taxpayers in § 267 of the Code. The preparer advised the executors of Estate to submit a request for permission to revoke the § 643(e)(3) election. Estate has filed an amended return for its tax year ending Date 3 as though the § 643(e)(3) election is not in effect.

estate (including a revocable trust electing to be taxed as an estate)[2799] satisfying a pecuniary bequest.[2800] The loss disallowance applies even if the distribution, taken as a whole, results in a net gain. Thus, gains are recognized and losses generally are not.

[2799] See part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI)
Although the discussion below generally refers to trusts, generally it applies to estates as well. If a trustee has discretion to make an election regarding that trust, the election does not affect the choices available regarding other trusts the trustee manages.

I.A.1.h. Capital Gain Constitutes DNI Unless Excluded

Taxable income is DNI unless expressly excluded.

Code § 643(a)(3) provides:

> *Capital gains and losses*. Gains from the sale or exchange of capital assets shall be excluded to the extent that such gains are allocated to corpus and are not (A) paid, credited, or required to be distributed to any beneficiary during the taxable year, or (B) paid, permanently set aside, or to be used for the purposes specified in section 642(c).

Thus, to be excluded from the income of a domestic trust, the gains must:

- Arise from the sale or exchange of capital assets,
- Be allocated to corpus, and
- Not be actually or deemed to be distributed.

The rest of this part II.J.8.a Capital Gain Constitutes DNI Unless Excluded focuses on the first two prongs.

I.A.1.h.i. Whether the Capital Gain Is from the Sale or Exchange of a Capital Asset

Only gains from the sale of capital assets are ordinarily excluded from DNI.

For example, “property, used in his trade or business, of a character which is subject to the allowance for depreciation provided in section 167, or real property used in his trade or business” is not a capital asset. Therefore, the sale of such property would constitute DNI, although it would not constitute trust accounting income. Whether other real estate is a capital asset depends on various facts.

However, “any recognized gain on the sale or exchange of property used in the trade or business” often receives capital gain treatment to the extent it does not constitute certain depreciation recapture. Goodwill that has not been amortized is a capital asset, but goodwill that is being amortized is not a capital asset. Thus, because such assets are not capital assets, such capital gains generally would be included in DNI.

I.A.1.h.ii. Whether the Gain from the Sale or Exchange of a Capital Asset Is Allocated to Corpus

I am unaware of any authority defining "allocated to corpus" as used in Code § 643(a)(3). Presumably it means receipts by the trust that are allocated to principal.

Does the statute mean that capital gain are automatically included in DNI unless they are affirmatively allocated to principal and certain other conditions exist? Reg. § 1.643(a)-3(a) might overrule that requirement, providing (highlighting added):

> *In general*. Except as provided in § 1.643(a)-6 and paragraph (b) of this section, gains from the sale or exchange of capital assets are ordinarily excluded from distributable net income and are not ordinarily considered as paid, credited, or required to be distributed to any beneficiary.

This regulation essentially has three parts:

- Reg. § 1.643(a)-6 deals with foreign trusts.

- Reg. § 1.643(a)-3(b) explains when capital gains from the sale or exchange of an asset are included in DNI and does not include a requirement that the capital gain be allocated to principal. In fact, one of the prongs discusses the treatment when capital gains are allocated to income.

- Depending on the meaning one gives to "ordinarily," this regulation might dispense with the statutory requirement that capital gains be allocated to corpus. The regulation does not explain when it says "ordinarily" what the exceptions might be, other than Reg. §§ 1.643(a)-6 and 1.643(a)-3(b). There would appear to be substantial authority for saying that an affirmative allocation of capital gains to principal is or is not required.

This issue seems to be most important for the trust's gross income that does not take the form of receipts of cash or other property. For example, a trust might invest in a partnership, S corporation, or other flow-through entity that does not distribute all of its taxable income. How should one treat capital gain from a flow-through entity's sale of a capital asset, when the entity distributes less than all of its taxable income? Should the undistributed capital gain be included in DNI?

- With respect to the accumulated capital gain, the trust has no receipts and therefore is not allocated to corpus. Arguably, the capital gain is not excluded from DNI and therefore constitutes DNI.

- On the other hand, the accumulated capital gain benefits the trust's corpus. Should it be treated as if it had been allocated to corpus? In that case, should it be trapped inside the trust, given that it was accumulated inside the entity and not distributed to the beneficiary?

- Given this uncertainty, would the trustee have discretion to take a different position each year? In Reg. § 1.643(a)-3(b), the Treasury generally agreed that the trustee would not be required to take a consistent position year-by-year, except for capital gain allocated to corpus and treated consistently by the fiduciary on the trust's books, records, and tax

> returns as part of a distribution to a beneficiary. Given that this gross income was not allocated corpus (because it was never physically received), perhaps the trustee has discretion to vary the treatment from year to year? Another approach might be to say that, because the undistributed capital gain was not allocated to principal, the regulations might presume that the undistributed capital gain is allocated to income and can be included in DNI inconsistently from year to year under Reg. § 1.643(a)-3(b)(1).

If all of a flow-through entity's K-1 items taxable to the trust are included in DNI, then part II.J.8.c Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal might cause ordinary income to be trapped at the trust level if the flow-through entity distributes cash in an amount less than all of these K-1 items; see part II.J.8.f Consequences of Allocating Capital Gain to DNI. In light of the consequences described there, the most taxpayer-favorable reading may be that capital gain is ordinarily excluded from DNI.

I leave it to the reader to decide which approach is "better" or perhaps to make that decision on a trust-by-trust basis.

For more on using flow-through entities, see part II.J.8.e Partnerships and S corporations Carry Out Income and Capital Gain to Beneficiaries.

I.A.1.i. Should Capital Gain Be Allocated to DNI?

Often beneficiaries have income below the thresholds that cause the 3.8% tax and the additional 5% capital gain tax to be incurred, whereas trusts start paying those taxes at relatively modest income levels. Therefore, distributing capital gains to beneficiaries might be beneficial – at least from an income tax viewpoint.

Consider various factors described in part II.J.3 Strategic Fiduciary Income Tax Planning.

I.A.1.j. Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal

Generally, gains from the sale or exchange of capital assets, net of losses, are excluded from distributable net income (DNI). But that statement belies the flexibility we are about to see.

Reg. § 1.643(a)-3(b) provides:

> *Capital gains included in distributable net income*. Gains from the sale or exchange of capital assets are included in distributable net income to the extent they are, pursuant to the terms of the governing instrument and applicable local law, or pursuant to a reasonable and impartial exercise of discretion by the fiduciary (in accordance with a power granted to the fiduciary by applicable local law or by the governing instrument if not prohibited by applicable local law) -
>
> (1) Allocated to income (but if income under the state statute is defined as, or consists of, a unitrust amount, a discretionary power to allocate gains to income must also be exercised consistently and the amount so allocated may not be

greater than the excess of the unitrust amount over the amount of distributable net income determined without regard to this subparagraph § 1.643(a)-3(b));

(2) Allocated to corpus but treated consistently by the fiduciary on the trust's books, records, and tax returns as part of a distribution to a beneficiary; or

(3) Allocated to corpus but actually distributed to the beneficiary or utilized by the fiduciary in determining the amount that is distributed or required to be distributed to a beneficiary.

Note the word "or" after paragraph (2) above. That indicates capital gains are included in DNI if and to the extent that any one or more of paragraph (1) (the "Income Rule"), paragraph (2) (the "Consistent Principal Rule"), or paragraph (3) (the "Discretionary Principal Rule") applies. For more on the:

- Income Rule, see part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law

- Consistent Principal Rule, see part II.J.8.c.ii Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary

- Discretionary Principal Rule, see part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary.

Before its amendment by T.D. 9102 (12/30/2003), Reg. § 1.643(a)-3 made it more difficult to include capital gain in DNI.

I.A.1.j.i. Income Rule: Capital Gain Allocated to Income Under State Law

Most states have adopted the Uniform Principal and Income Act, which will be referred to at UPIA for the rest of this part II.J.8.c.i, or its replacement, which is described in part II.J.5.b Uniform Fiduciary Income & Principal Act (UFIPA).

Generally, any capital gain included as the distributive share of income from a partnership or S corporation and distributed from the entity to the trust will constitute income under the Act, making the rest of this part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI) be moot.

Generally, the Act allocates capital gains to principal. The main exceptions are the power to adjust, unitrust distributions, and exceptions in the governing instrument; the power to adjust and power to convert to a unitrust followed adoption of the prudent investor rule. Following a discussion of each of these is a discussion of the respect fiduciary income tax law gives them.

I.A.1.j.i.(a). Power to Adjust

Capital gains may be reclassified as income if traditional trust accounting income principles cause insufficient receipts to be classified as income. See parts II.J.5.b.ii.(a) Power to Adjust.

I.A.1.j.i.(b). Possible Allocation to Income of Gain on Sale of Interest in Partnership or S corporation

It is not uncommon for partnerships and S corporations to reinvest part of their annual income; indeed, to facilitate growth or simply a stronger capital structure (which lenders might require), many distribute only enough to pay their owners' income taxes (commonly referred to as a "tax distribution") plus a modest bonus (referred to below as a "bonus distribution").

Taxes on this reinvested income are charged against the income of a trust that owns such an entity. This is the only practical solution to the trust's obligation to pay its taxes, because the taxing authorities' claims against the trustee are much more pressing than the beneficiaries' claims. (Note that the income beneficiary of a Qualified Subchapter S Trust pays this tax – part III.A.3.e QSSTs and ESBTs – which has an effect similar to charging the trust's income.)

The Uniform Principal and Income Act includes a remedy for the income beneficiary that had to pay the tax on the entity's accumulated income that has been inherently baked into principal. Section 506(a)(3) authorizes a fiduciary to "make adjustments between principal and income to offset the shifting of economic interests or tax benefits between income beneficiaries and remainder beneficiaries which arise from … the ownership by an estate or trust of an interest in an entity whose taxable income, whether or not distributed, is includable in the taxable income of the estate, trust, or a beneficiary." This specific provision supplements any power to adjust that might generally apply.

Thus, when an interest in a partnership or an S corporation is sold, the trustee should consider whether to allocate some of the sale proceeds to income. However, it's not at all obvious that the trustee should make an adjustment; consider that:

- The entity made distributions specifically to pay this tax, so the trust or income beneficiary was not really "out of pocket" for this tax.

- If the entity had been a C corporation, the entity would have paid the tax itself. Its dividend would have equaled the bonus distribution, and this issue would never have arisen.

- The true issue is whether the bonus distribution was sufficient. Was the decision to accumulate income fair – a sound exercise of the business judgment of those who run the entity? Did those who control the entity promise a make-up distribution at some point because of a special project, or was the accumulation merely part of a solid plan to grow the business, which presumably would result in increased income and increased bonus distributions? Were those who control the entity running it just to benefit themselves (and, if owners, trying to extract more benefits as owners than the inactive owners received)? I have probably left out many other relevant considerations, but hopefully I have communicated why this decision is not easy.

See parts II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the Trust Accounting Rules
and II.J.16 Fiduciary Income Taxation When Selling Interest in a Pass-Through Entity or When the Entity Sells Its Assets.

If the trustee is concerned that the income beneficiary might spend a perceived windfall unwisely, the trustee might consider using the power to adjust to spread distributions over an appropriate period of time. Such a spread over time might be more palatable if, instead of labelling the adjustment to sale proceeds as a tax reimbursement, the trustee labelled it as a make-up for insufficient bonus distributions, taking the position that future distributions to beneficiaries might be loosened because of a prior conservative distribution policy. The bonus distributions might have been sufficient from the viewpoint of what the entity should have distributed but might have been insufficient from the viewpoint of how much income the trustee should have tried to generate. As mentioned in part III.A.4.d.iv Advising Clients about the UPAIA § 505 Change and UFIPA § 506 (discussing conflicts with beneficiaries that might arise when an entity makes tax distributions but little or no bonus distributions), these issues have no easy answer.

See also part II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the Trust Accounting Rules.

I.A.1.j.i.(c). Unitrust

A unitrust is a trust that distributes fixed amounts, redetermined annually as a fixed percentage of the value of the trust's value, which value is redetermined annually but might be based on an average of values, such as the average value of the trust's assets for the past three years. See parts II.J.5.b.ii.(b) Unitrust and II.J.5.b.ii.(c) Comparing Power to Adjust to a Unitrust.

Reg. § 1.643(a)-3(e) provides the following examples regarding unitrusts:

> *Example (11)*. The applicable state statute provides that a trustee may make an election to pay an income beneficiary an amount equal to four percent of the fair market value of the trust assets, as determined at the beginning of each taxable year, in full satisfaction of that beneficiary's right to income. State statute also provides that this unitrust amount shall be considered paid first from ordinary and tax-exempt income, then from net short-term capital gain, then from net long-term capital gain, and finally from return of principal. Trust's governing instrument provides that A is to receive each year income as defined under state statute. Trustee makes the unitrust election under state statute. At the beginning of the taxable year, Trust assets are valued at $500,000. During the year, Trust receives $5,000 of dividend income and realizes $80,000 of net long-term gain from the sale of capital assets. Trustee distributes to A $20,000 (4% of $500,000) in satisfaction of A's right to income. Net long-term capital gain in the amount of $15,000 is allocated to income pursuant to the ordering rule of the state statute and is included in distributable net income for the taxable year.
>
> *Example (12)*. The facts are the same as in Example 11, except that neither state statute nor Trust's governing instrument has an ordering rule for the character of the unitrust amount, but leaves such a decision to the discretion of Trustee. Trustee intends to follow a regular practice of treating principal, other than capital gain, as distributed to the beneficiary to the extent that the unitrust amount exceeds Trust's ordinary and tax-exempt income. Trustee evidences this treatment by not including any capital gains in distributable net income on Trust's Federal income tax return so that the entire $80,000 capital gain is taxed to Trust. This treatment of the capital gains is a reasonable exercise

> of Trustee's discretion. In future years Trustee must consistently follow this treatment of not allocating realized capital gains to income.
>
> *Example (13)*. The facts are the same as in Example 11, except that neither state statutes nor Trust's governing instrument has an ordering rule for the character of the unitrust amount, but leaves such a decision to the discretion of Trustee. Trustee intends to follow a regular practice of treating net capital gains as distributed to the beneficiary to the extent the unitrust amount exceeds Trust's ordinary and tax-exempt income. Trustee evidences this treatment by including $15,000 of the capital gain in distributable net income on Trust's Federal income tax return. This treatment of the capital gains is a reasonable exercise of Trustee's discretion. In future years Trustee must consistently treat realized capital gain, if any, as distributed to the beneficiary to the extent that the unitrust amount exceeds ordinary and tax-exempt income.

A right to income expressed initially solely as a unitrust interest may qualify for the QTIP marital deduction.

I.A.1.j.i.(d). Exceptions in the Governing Instrument

Although the Act provides general rules, it also allows trust agreements to override those rules:

> In allocating receipts and disbursements to or between principal and income, and with respect to any matter within the scope of [Articles] 2 and 3, a fiduciary:
>
> (1) shall administer a trust or estate in accordance with the terms of the trust or the will, even if there is a different provision in this [Act];
>
> (2) may administer a trust or estate by the exercise of a discretionary power of administration given to the fiduciary by the terms of the trust or the will, even if the exercise of the power produces a result different from a result required or permitted by this [Act];
>
> (3) shall administer a trust or estate in accordance with this [Act] if the terms of the trust or the will do not contain a different provision or do not give the fiduciary a discretionary power of administration; and
>
> (4) shall add a receipt or charge a disbursement to principal to the extent that the terms of the trust and this [Act] do not provide a rule for allocating the receipt or disbursement to or between principal and income.

I.A.1.j.i.(e). Fiduciary Income Tax Recognition of the Trust Agreement and State Law

Code § 643(b) generally defers to the trust agreement and applicable state law. The Uniform Principal and Income Act ("UPIA") and the Uniform Fiduciary Principal & Income Act ("UFIPA") authorizes the trust agreement to override the Act.

However, Reg. § 1.643(b)-1 does not recognize trust agreements that depart too far from the usual rules:

> Trust provisions that depart fundamentally from traditional principles of income and principal will generally not be recognized. For example, if a trust instrument directs that all the trust income shall be paid to the income beneficiary but defines ordinary dividends and interest as principal, the trust will not be considered one that under its governing instrument is required to distribute all its income currently for purposes of section 642(b) (relating to the personal exemption) and section 651 (relating to simple trusts). Thus, items such as dividends, interest, and rents are generally allocated to income and proceeds from the sale or exchange of trust assets are generally allocated to principal.

Reg. § 1.643(b)-1 respects variations provided under applicable state law:

> However, an allocation of amounts between income and principal pursuant to applicable local law will be respected if local law provides for a reasonable apportionment between the income and remainder beneficiaries of the total return of the trust for the year, including ordinary and tax-exempt income, capital gains, and appreciation. For example, a state statute providing that income is a unitrust amount of no less than 3% and no more than 5% of the fair market value of the trust assets, whether determined annually or averaged on a multiple year basis, is a reasonable apportionment of the total return of the trust. Similarly, a state statute that permits the trustee to make adjustments between income and principal to fulfill the trustee's duty of impartiality between the income and remainder beneficiaries is generally a reasonable apportionment of the total return of the trust. Generally, these adjustments are permitted by state statutes when the trustee invests and manages the trust assets under the state's prudent investor standard, the trust describes the amount that may or must be distributed to a beneficiary by referring to the trust's income, and the trustee after applying the state statutory rules regarding the allocation of receipts and disbursements to income and principal, is unable to administer the trust impartially. Allocations pursuant to methods prescribed by such state statutes for apportioning the total return of a trust between income and principal will be respected regardless of whether the trust provides that the income must be distributed to one or more beneficiaries or may be accumulated in whole or in part, and regardless of which alternate permitted method is actually used, provided the trust complies with all requirements of the state statute for switching methods.

Circling back to the Act's authorizing trust agreements to depart from traditional principles, Reg. § 1.643(b)-1 concludes with:

> In addition, an allocation to income of all or a part of the gains from the sale or exchange of trust assets will generally be respected if the allocation is made either pursuant to the terms of the governing instrument and applicable local law, or pursuant to a reasonable and impartial exercise of a discretionary power granted to the fiduciary by applicable local law or by the governing instrument, if not prohibited by applicable local law.

For the "reasonable and impartial exercise" requirement in the context of the power to adjust, see part II.J.5.b.ii.(a) Power to Adjust.

I often use a clause providing that the trustee has wide discretion but must reasonably and fairly balance the interests of the income and remainder beneficiaries. That language comes from the marital deduction regulations. Generally, the trustee's authority to allocate between income and principal does not trigger grantor trust status, does not constitute a power of appointment, and does not have generation-skipping transfer tax implications. The trustee might want to consider providing accountings or other notices to the beneficiaries that would start running the statute of limitations for making a claim against the trustee so that the beneficiaries could not add up all of their alleged grievances and then pile this one on top of it, which procedure might help minimize any gift tax consequences to failing to make a claim.

How does one draw the line between what departs "fundamentally from traditional principles of income and principal" and what is "a reasonable and impartial exercise of a discretionary power granted to the fiduciary" under Reg. § 1.643(b)-1?

Presumably, the trustee should be on solid ground in allocating to income capital gains such that the total amount of all receipts allocated to income does not exceed 5%, given that the regulations expressly approve unitrusts in the 3%-5% range. The trusts should also be on solid ground in allocating to income capital gains generated by a partnership that the settlor intended to distribute to the income beneficiary.

Beyond that, it's a matter of facts and circumstances and judgment. However, Reg. § 1.643(a)-3(e), Example (4) respected a mandatory allocation of capital gain to income where a trust had $5,000 of dividends and $10,000 of capital gains, and the trustee distributed $17,000 to the beneficiary.

I.A.1.j.i.(f). Conclusion Regarding Allocating Capital Gain to Income

Reg. § 1.643(a)-3(b)(1) requires a consistent practice for unitrusts. Considering that the unitrust recipient is receiving cash and presumably would have the liquidity to pay tax on any capital gains distributed to the beneficiary, in many cases it would be fair to allocate capital gain to DNI to the extent that the unitrust amount exceeds the income that would apply under the Act's general rules. Given that one provides for a unitrust when tension between the income beneficiary and remaindermen might be high, the tension created by this tax issue would be high to the same degree. Consider providing a firm rule in the trust agreement regarding the allocation of capital gain to DNI. If one is concerned that shifting tax rates might create an unfair tax result, consider providing a clause reimbursing the unitrust beneficiary for taxes paid on the unitrust and on the reimbursement; this requires cooperation between the trustee's income tax preparer and the beneficiary's income tax preparer, but the calculation should be relatively mechanical.

For trusts that are not unitrusts, Reg. § 1.643(a)-3(b)(1) provides significant flexibility, allowing the trustee discretion whether to allocate capital gain to income for fiduciary accounting purposes (if the trust agreement and state law permit) and also whether to include in DNI the capital gain that was allocated to income.

Consider the nuances for a mandatory income trust. Distributions must be made no later than 65 days after yearend to include capital gain in DNI in every other situation. In a mandatory income trust, a power to adjust might be able to retroactively include capital gain in income – perhaps as late as when the tax return is prepared. For how mandatory income trusts work, see part II.J.5 Mandatory Income Trusts. For limits on retroactivity, see part II.J.5.a Issues Arising with Mandatory Income Trusts.

I.A.1.j.ii. Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary

Reg. § 1.643(a)-3(e) helps guide our application of Reg. § 1.643(a)-3(b)(2):

> *Example (1)*. Under the terms of Trust's governing instrument, all income is to be paid to A for life. Trustee is given discretionary powers to invade principal for A's benefit and to deem discretionary distributions to be made from capital gains realized during the year. During Trust's first taxable year, Trust has $5,000 of dividend income and $10,000 of capital gain from the sale of securities. Pursuant to the terms of the governing instrument and applicable local law, Trustee allocates the $10,000 capital gain to principal. During the year, Trustee distributes to A $5,000, representing A's right to trust income. In addition, Trustee distributes to A $12,000, pursuant to the discretionary power to distribute principal. Trustee does not exercise the discretionary power to deem the discretionary distributions of principal as being paid from capital gains realized during the year. Therefore, the capital gains realized during the year are not included in distributable net income and the $10,000 of capital gain is taxed to the trust. In future years, Trustee must treat all discretionary distributions as not being made from any realized capital gains.
>
> *Example (2)*. The facts are the same as in Example 1, except that Trustee intends to follow a regular practice of treating discretionary distributions of principal as being paid first from any net capital gains realized by Trust during the year. Trustee evidences this treatment by including the $10,000 capital gain in distributable net income on Trust's federal income tax return so that it is taxed to A. This treatment of the capital gains is a reasonable exercise of Trustee's discretion. In future years Trustee must treat all discretionary distributions as being made first from any realized capital gains.
>
> *Example (3)*. The facts are the same as in Example 1, except that Trustee intends to follow a regular practice of treating discretionary distributions of principal as being paid from any net capital gains realized by Trust during the year from the sale of certain specified assets or a particular class of investments. This treatment of capital gains is a reasonable exercise of Trustee's discretion.

The all-or-nothing approach taken by Examples (1) and (2) is not very attractive, but we need to deal with it. Let's consider some fact patterns:

1. <u>The beneficiary needs regular annual distributions that cannot be made using a power to adjust</u>. Generally, distributions in excess of what can made using a power to adjust would not be sustainable. A power to adjust typically adjusts to a 3%-5% distribution, and most models suggest that distributions in excess of that will lead to a trust being depleted. Thus, a more likely scenario is that a power to adjust is not available, because state law prevents using the power to adjust in particular situations (unless the trust agreement overrides it). In such a case, the beneficiary's federal and state/local income tax bracket for capital gains needs to be compared to the trust's federal and state/local income tax bracket for capital gains. Note that a nonresident trust would have a zero state/local income tax bracket, to the

extent that the trust does not have income from a business sourced to the state/local jurisdiction.

2. The beneficiary's need for distributions in excess of income is sporadic. It's difficult to predict how the beneficiary's federal and state/local income tax bracket for capital gains compares to the trust's federal and state/local income tax bracket for capital gains, given that rates will change and the trust's and its beneficiaries' circumstances might change over time. In such a case, consider whether the distribution might be phrased as "allocated to corpus but actually distributed to the beneficiary or utilized by the fiduciary in determining the amount that is distributed or required to be distributed to a beneficiary." If that is likely to be the case, then consider not electing to carry out capital gain automatically under (b)(2) but rather deciding to rely on (b)(3), because (b)(3) is flexible whether to allocate capital gain to income, allowing the decision to made separately each year on a case-by-case basis.

Generally, trustees would not be likely to take advantage of the discretion that Example (3) provides to allocate to income only capital gain from the sale of certain specified assets or a particular class of investments, because such an election requires additional recordkeeping.

Some people point to the word "deem" in Example (1) and emphasize the need for such authority in the trust agreement or applicable state law. Uniform Trust Code § 816 generally authorizes trustees to make tax elections, so the authority to "deem" distributions to be capital gains is inherently authorized in UTC states, as well as any other state where a trustee generally has the authority to make tax elections.

I.A.1.j.iii. Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary

Reg. § 1.643(a)-3(b)(3) might seem confusing at first, but it actually has very practical use.

First, let's look at some examples that Reg. § 1.643(a)-3(e) provides:

> Example (5). The facts are the same as in Example 1, except that Trustee decides that discretionary distributions will be made only to the extent Trust has realized capital gains during the year and thus the discretionary distribution to A is $10,000, rather than $12,000. Because Trustee will use the amount of any realized capital gain to determine the amount of the discretionary distribution to the beneficiary, the $10,000 capital gain is included in Trust's distributable net income for the taxable year.
>
> *Example (6)*. Trust's assets consist of Blackacre and other property. Under the terms of Trust's governing instrument, Trustee is directed to hold Blackacre for ten years and then sell it and distribute all the sales proceeds to A. Because Trustee uses the amount of the sales proceeds that includes any realized capital gain to determine the amount required to be distributed to A, any capital gain realized from the sale of Blackacre is included in Trust's distributable net income for the taxable year.

Although Reg. § 1.643(a)-3(b)(3) is viewed generally as discretionary, note that Example (6) is mandatory: if the trustee is required to distribute sale proceeds to a beneficiary, the capital gain from the sale is included in the DNI that the distribution carries out the beneficiary. Example (7) similarly requires all capital gain recognized in the trust's final taxable year to be included in the DNI that the distribution carries out the beneficiary.

The practical application is based on the ability to count as prior year distributions those distributions made in the first 65 days of the current year. For example, any distribution made on or before March 5, 2020 can be treated as a 2019 or 2020 distribution. This election applies to the greater of accounting income under Reg. § 1.643(b)-1 or DNI under Reg. §§ 1.643(a)-1 through 1.643(a)-7. By completing the line on the trust's income tax return, Form 1041, page 2, Part B, showing amounts (other than income required to be distributed currently) paid, credited, or otherwise required to be distributed and checking the Code § 663(b) box in "Other Information" at the bottom of Form 1041, page 2, the trustee decides how much of a current year distribution is allocated to the prior year; the balance would then be credited to the current year.

The practical application based on the 65-day rule would generally occur during February after the year ends and applies only if the trustee has discretion to distribute corpus. The regulations do not specify any particular trust records regarding the election, so do whatever seems best to evidence the intent. Perhaps the income tax return preparer emails the trustee recommending how much of a distribution be made to distribute income and capital gain under the 65-day rule (erring on the side of distributing too much), then the trustee makes the distribution, and the tax return carries through the intent. As long as the distribution is made timely, the tax return can treat none, part, or all of the distribution as a distribution of the taxable year's income. In a manner similar to Example (5), the trustee has referred to the capital gain itself in determining how much to distribute. Unlike Reg. § 1.643(a)-3(b)(2), Reg. § 1.643(a)-3(b)(3) allows one to carry out discretionary distributions of capital gain inconsistently from one year to another.

If the beneficiary does not require monthly or quarterly cash flow, the trustee can simply each February make a big distribution and apply it to the prior or current year for tax return preparation purposes. If the beneficiary does require monthly cash flow but is willing to accept informal constraints, the trustee makes the big distribution into an investment account that the beneficiary owns, and the account makes monthly transfers to the beneficiary's checking account. Obviously this would not work for a beneficiary who cannot exercise discipline, but there is a good segment of beneficiaries for whom it would work.

An alternative approach is to distribute an asset to a beneficiary before the asset is sold. Generally, the beneficiary will receive a carryover basis and then be taxed on the gain.

As with all tax planning, the strategies described in this part II.J.8.c.iii may be unavailable (based on the trust terms), inadvisable (based on sound financial planning), or stupid (giving money to a drug addict just to save taxes).

I.A.1.j.iv. Netting Capital Losses

Reg. § 1.643(a)-3(d), "Capital losses," provides:

> Losses from the sale or exchange of capital assets shall first be netted at the trust level against any gains from the sale or exchange of capital assets, except for a capital gain that is utilized under paragraph (b)(3) of this section in determining the amount that is

distributed or required to be distributed to a particular beneficiary. See § 1.642(h)-1 with respect to capital loss carryovers in the year of final termination of an estate or trust.

Thus, if and to the extent that Reg. § 1.643(a)-3(b)(3) includes capital gains in DNI (see part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary), capital losses are not netted against such gains. The recipient beneficiaries report all such capital gains, and the capital losses remain in the trust.

However, note that Reg. § 1.643(a)-3(b)(3) has two elements: "actually distributed to the beneficiary," which would tend to require tracing except in the case of trust termination, or "utilized by the fiduciary in determining the amount that is distributed or required to be distributed to a beneficiary," in which case the trustee would have needed to consciously decide to refer to the capital gain when making the distribution.

Unless the trustee traces or decides to refer to the gross capital gain (instead of the net capital gain) when making the distribution, the loss would be offset under Reg. § 1.643(a)-3(b)(3). Alternatively, the trustee might not trace and not refer to capital gain but rather exercise the power to adjust, which would invoke Reg. § 1.643(a)-3(b)(1) (see part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law) and include an automatic offset.

I.A.1.j.v. Conclusions Regarding the Basic Framework on Allocating Capital Gains to DNI

Often, one cannot predict whether the combination of federal, state, and local income tax rates will be higher inside or outside of the trust.

Quite frankly, I keep changing my mind regarding the best income tax elections as I encounter new situations. If the document is flexible as to distributions and distributions are appropriate, then I would lean toward:

- Flexible language allowing the trustee to allocate capital gains to income, so long as the trustee must reasonably and fairly balance the interests of the income and remainder beneficiaries.

- Using the 65-day-rule to distribute large capital gains to the beneficiary as DNI.

- Electing <u>not</u> to establish a practice of carrying out capital gain to beneficiaries under Reg. § 1.643(a)-3(b)(2) <u>unless</u> it appears that the above two approaches will not suffice to minimize overall income taxes. However, it is not uncommon for me to decide that the above. two approaches will not suffice to minimize overall income taxes. On the other hand, if the situation involves enough money, the trustee can covert capital gain that would otherwise be trapped inside the trust to trust accounting income, using the tool described in part II.J.8.e Partnerships and S corporations Carry Out Income and Capital Gain to Beneficiaries.

Consider adding a withdrawal right of up to 5% of the trust's value. The beneficiary will be deemed to be the owner of the part that the beneficiary can withdraw and perhaps continue to be deemed the owner with respect to the lapsed portion. However, note that withdrawal rights can increase exposure to creditors to the extent of the withdrawal right and perhaps even after a lapse. For details on all of the ideas mentioned in this paragraph, see part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts. If one is concerned about the withdrawal right itself becoming a bad idea, consider using a provision along the following the lines:

> In addition to the distributions authorized by the preceding sentence, subject to the following sentence the trustee shall distribute to the beneficiary so much of the principal of the trust as the beneficiary, while at least __ years of age, may request once between February 23 and March 5 of every calendar year, on a noncumulative basis, up to five percent (5%) of the aggregate value, as of the time of such request by the beneficiary, of the principal of the trust. The trustee may, by instrument placed in the trust's records, provide that the preceding sentence shall not apply during any period (including the beneficiary's remaining life), which period shall begin no earlier than the January 1 following the date of the instrument.

This allows the trustee to turn off the withdrawal rights for any future year(s) without impeding the beneficiary's absolute right to withdraw during the current year.

I.A.1.j.vi. Fairness of Taxing Capital Gain to Beneficiaries; Need for Tax Distributions Here and Other Areas

Our income tax system taxes income to whoever receives it, subject to certain exceptions not relevant to this part II.J.8.c.vi. Therefore, it is fair to tax the beneficiaries.

However, when a distribution is made for a particular purpose and the money is spent, the beneficiary will get upset when handed a tax bill for which the beneficiary did not plan. Therefore, one might need to make a supplemental distribution to pay tax on the original distribution. The supplemental distribution would also need to be enough to pay tax on the supplemental distribution itself. This supplemental distribution is often referred to as "grossing up the distribution" to pay taxes.

This issue applies to more than just capital gains. Clients who leave residences in trust often wish to have the trust pay expenses that a life tenant would ordinarily pay. Distributions by the trust for those purposes run into the same problem – the money is spent for the intended purpose and not available to pay taxes. These distributions also need to be grossed up to pay taxes.

I.A.1.k. Distribution in Kind; Specific Bequests

I.A.1.k.i. Distribution in Kind - Generally

Except as provided below and except to the extent that it carries out DNI or constitutes a bequest of income, a distribution is a nontaxable gift (unless the recipient assumes liabilities, in which case it is taxed as a bargain sale).

When a trust distributes property to satisfy a pecuniary distribution (even if the amount is expressly authorized to be satisfied in cash or in kind), the trust recognizes gain on the deemed sale, even if the trust's residue is less than the pecuniary obligation. Such a pecuniary obligation includes an equalizing distribution (presumably unless expressed as a fractional share). This rule includes a pecuniary obligation in the form of an annuity payment to a beneficiary, and the gain recognized in paying the annuity is not included in the beneficiary's distributive net income (DNI) unless the rules for including capital gain in DNI are satisfied. If the trust's residue is less than the pecuniary obligation, the fact that all bequests are protected by Code § 663(a)(1) and therefore no residual beneficiary can pick up income under Code § 662 means that the trust will pay the tax, given that the beneficiaries of the protected bequests will not be picking up that income; note that the trustee will need to reserve for this tax before making distributions to beneficiaries and may have a mismatch for net investment income tax purposes as well. However, when a charity that was the annuity recipient was bequeathed the remainder, the resulting merger of interests and trust termination were not a taxable event. Also, if the bequest is satisfied using date-of-death values, presumably no gain or loss would be realized, but to qualify for the marital or charitable deduction the assets' value relative to date of death values must be "fairly representative of appreciation or depreciation in the value of all property thus available for distribution in satisfaction of such pecuniary bequest or transfer."

If a trust makes a non-pro rata distribution of residue without either the trust instrument or local law authorizing a non-pro rata distribution, each beneficiary may be treated as having received a pro rata distribution and exchanged it with the other beneficiaries. Otherwise, generally the trust does not recognize any gain or loss and the beneficiaries receive the same basis as the trust's; for further analysis of dividing trusts (including on termination), see part II.D.5 Severing Trusts with Multiple Grantors. However, the trust may elect to treat all property distributions during the taxable year as sales, but losses in transactions with beneficiaries and other related parties are disallowed except to the extent that they are from an estate (including a revocable trust electing to be taxed as an estate) satisfying a pecuniary bequest. The loss disallowance applies even if the distribution, taken as a whole, results in a net gain. Thus, gains are recognized and losses generally are not.

The amount deemed distributed is the lesser of the property's basis or fair market value, unless gain was recognized, in which case it is the property's value.

Distributing low basis assets will generate a new basis (often a step-up) when the beneficiary dies. However, distributed assets are subject to the beneficiary's creditors, changes in the beneficiary's estate tax posture (including not only changes in the tax law but also changes in financial situation through the beneficiary's own efforts or through marriage and change in residence to a state that imposes its own estate tax), and changes in the beneficiary's dispositive goals. To get a basis step-up, I would rather add (perhaps by decanting) a formula general power of appointment, as described in part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap.

Distributing an unmarketable partnership interest would carry out DNI without giving the beneficiary cash. However, valuation adjustments might depress the amount of the deemed distributions, and the beneficiary would be entitled to a proportionate share of future distributions from the partnership. However, if the trustee controls the partnership, the trustee can also control the distribution spigot.

I.A.1.k.ii. Specific Bequest

A gift or bequest of a specific sum of money or of specific property, which is required by the specific terms of the will or trust instrument and is properly paid or credited to a beneficiary, is not allowed as a deduction to an estate or trust under Code § 661 and is not included in the gross income of a beneficiary under Code § 662, unless under the terms of the will or trust instrument the gift or bequest is to be paid or credited to the recipient in more than three installments.

I.A.1.k.iii. Distributing a Note to the Obligor

Rev. Rul. 75-68 provides:

> The income of a testamentary trust consisting solely of interest from mortgages on the beneficiary's property was required to be distributed periodically. Although the mortgage notes held by the trust required the periodic payment of interest, it was agreed between the beneficiary and the trustees, that the beneficiary would pay no interest on the mortgages and the trustees would distribute no income from the trust.
>
> *Held*, notwithstanding the foregoing agreement, the interest income due on the mortgages held by the trust is includible in the gross income of the trust, and this same amount, as the distributable income of the trust, is includible in the gross income of the beneficiary. Further, the beneficiary is entitled to a deduction for this interest deemed paid on the mortgages.

Below is authority consistent with this conclusion:

Reg. § 1.643(c)-1(a) treats as a beneficiary "any person with respect to an amount used to discharge or satisfy that person's legal obligation as that term is used in § 1.662(a)-4."
Reg. § 1.661(a)-2(d) provides:

> The terms "income required to be distributed currently" and "any other amounts properly paid or credited or required to be distributed" also include any amount used to discharge or satisfy any person's legal obligation as that term is used in § 1.662(a)-4.

Reg. § 1.662(a)-4, "Amounts used in discharge of a legal obligation," provides:

> Any amount which, pursuant to the terms of a will or trust instrument, is used in full or partial discharge or satisfaction of a legal obligation of any person is included in the gross income of such person under section 662(a)(1) or (2), whichever is applicable, as though directly distributed to him as a beneficiary, except in cases to which section 71 (relating to alimony payments) or section 682 (relating to income of a trust in case of divorce, etc.) applies. The term "legal obligation" includes a legal obligation to support another person if, and only if, the obligation is not affected by the adequacy of the dependent's own resources. For example, a parent has a "legal obligation" within the meaning of the preceding sentence to support his minor child if under local law property or income from property owned by the child cannot be used for his support so long as his parent is able to support him. On the other hand, if under local law a mother may use the resources of a child for the child's support in lieu of supporting him herself, no

obligation of support exists within the meaning of this paragraph, whether or not income is actually used for support. Similarly, since under local law a child ordinarily is obligated to support his parent only if the parent's earnings and resources are insufficient for the purpose, no obligation exists whether or not the parent's earnings and resources are sufficient. In any event, the amount of trust income which is included in the gross income of a person obligated to support a dependent is limited by the extent of his legal obligation under local law. In the case of a parent's obligation to support his child, to the extent that the parent's legal obligation of support, including education, is determined under local law by the family's station in life and by the means of the parent, it is to be determined without consideration of the trust income in question.

Reg. § 1.661(a)-2(d) provides:

> The terms "income required to be distributed currently" and "any other amounts properly paid or credited or required to be distributed" also include any amount used to discharge or satisfy any person's legal obligation as that term is used in § 1.662(a)-4.

I.A.1.l. Partnerships and S corporations Carry Out Income and Capital Gain to Beneficiaries

Generally, K-1 income from a passthrough business entity will carry out any income (including capital) distributed to the trust and then to the trust's beneficiaries. This section focuses on nongrantor trusts holding partnerships rather than S corporations, because generally a trust can hold S corporation stock that is not a grantor trust, QSST, or ESBT only during a relatively limited amount of time. (Although the principles in this part II.J.8.e would apply to a net income with make-up charitable remainder unitrust – a NIMCRUT – the IRS has concerns about that application and might shut it down at some point.)

Also, if one elected not to carry out capital gains under Reg. § 1.643(a)-3(b)(2) and later decides that all capital gain should be included in DNI going forward (or does not want to take a risk that the IRS will not respect deviations from general rules of the Uniform Principal and Income Act, consider forming an entity taxed as a partnership. Capital gains earned through a partnership generally constitute trust accounting income.

The Uniform Principal and Income Act provides that, generally, all cash distributions from an entity (including a partnership) are considered trust accounting income. Only the following distributions from an entity are not considered trust accounting income:

- property other than money;
- money received in one distribution or a series of related distributions in exchange for part or all of a trust's interest in the entity;
- money received in total or partial liquidation of the entity; and
- money received from an entity that is a regulated investment company or a real estate investment trust if the money distributed is a capital gain dividend for federal income tax purposes.

Thus, a partnership's capital gains recognized in the ordinary course of managing and re-balancing a portfolio would constitute fiduciary accounting income to the extent distributed from the partnership in cash and therefore would be includible in DNI under (1) above.

To keep control of the partnership, consider having the trust be a 1% general partner and 98% limited partner, and the beneficiary or someone else might contribute 1% as a limited partner. Distributing a limited partnership interest to a beneficiary can carry out income and perhaps capital gain while at the same time not giving the beneficiary cash to spend (but be sure to distribute enough cash so that the beneficiary can pay tax on the distribution). Be careful to avoid the gain on formation that applies when a contributing partner diversifies the partner's holdings by forming the partnership. If the trust holds not only marketable securities but also investments in businesses, consider setting up one partnership for the business investments and another partnership for the marketable securities, which would help facilitate allocating trust assets on termination or any other trust division. Also consider whether a state with jurisdiction over the trust might subject the partnership itself to state income tax.

Complexity might arise if a partnership distributes less than all of its taxable income to a mandatory income trust. It is unclear whether all of the trust's distributive share of capital gain is DNI. Furthermore, interrelated calculations might be required for a mandatory income trust. Generally, we should look to see whether planning under part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law or II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary is sufficient before recommending a partnership solely to address the issues described in part II.J.8.c.ii Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary.

I.A.1.m. Consequences of Allocating Capital Gain to DNI

I.A.1.m.i. General Rules of the Proportion of DNI Constitutes Capital Gain Compared to Other Income (and General Retention of the Character of DNI Distributed to Beneficiaries)

This part II.J.8.f.i first discusses netting deductions against income then discusses allocating that income.

I.A.1.m.i.(a). Allocating Deductions to Various Income Items

Rules for allocating deductions include:

- All deductible items directly attributable to one class of income are allocated to that class. To the extent that any items of deduction which are directly attributable to a class of income exceed that class of income, they may be allocated to any other class of income (including capital gains) included in distributable net income as described above except that any excess deductions attributable to tax-exempt income may not be offset against any other class of income.

- Deductions not directly attributable to a specific class of income may be allocated to any item of income (including capital gains) included in computing DNI, but Code § 265 requires a portion of such indirect expenses to be allocated to non-taxable income. Such indirect expenses include trustee fees, the rental of safe deposit boxes, and state income and personal property taxes. Once one has allocated expenses to tax-exempt income, how does one choose to which items of taxable income to allocate deductions? One would consider allocating to those income items that are most highly taxed, considering federal and state income tax and the 3.8% tax on net investment income. For example, interest income is taxed at the highest rates, whereas qualified dividends are taxed at long-term capital gain rates. Within interest income, consider whether the interest is from U.S. obligations exempt from state income tax. Although distributions from qualified retirement plans and IRAs are taxed at the highest regular tax rate, they are exempt from the 3.8% tax on net investment income. See part II.I.6 Deductions Against NII (especially the text accompanying fns. 2307-2308).

- If a charitable deduction under Code § 642(c) is involved, any allocations of taxable income between the charitable deduction and the beneficiaries must have substantial economic effect.

- Special rules apply to depreciation deductions.

I.A.1.m.i.(b). Allocating Income Items Among Those Receiving It

In allocating income between the trust and the beneficiary (or beneficiaries), the amounts of DNI distributed to the beneficiaries:

> shall be treated as consisting of the same proportion of each class of items entering into the computation of distributable net income of the estate or trust as the total of each class bears to the total distributable net income of the estate or trust in the absence of the allocation of different classes of income under the specific terms of the governing instrument.

However, this proportionate rule is subject to specific provisions in the governing instrument for the allocation of different classes of income or different allocations under local law, subject to tax-exempt income being allocated in a manner that does not allow it to be deducted.

Thus, except for tax-exempt income and allocations between the charitable and noncharitable shares (and any special rules regarding depreciation deductions), it appears that a trust agreement may create ordering provisions between which items of DNI the trust retains and which items of DNI the trust distributes to beneficiaries. However, such a provision might encounter significant resistance from the IRS.

Once one decides which items of DNI the trust distributes to beneficiaries, generally distributions to each beneficiary carry out a pro rata portion of ordinary income and capital gain items allocated to the beneficiaries, and any other characteristic of the income at the trust level retains its status in the beneficiary's hands (which, among other things, is important for net investment income tax purposes). Code § 652(b) provides that amounts included in the beneficiary's income for regular income tax purposes:

> … shall have the same character in the hands of the beneficiary as in the hands of the trust. For this purpose, the amounts shall be treated as consisting of the same proportion

of each class of items entering into the computation of distributable net income of the trust as the total of each class bears to the total distributable net income of the trust, unless the terms of the trust specifically allocate different classes of income to different beneficiaries. In the application of the preceding sentence, the items of deduction entering into the computation of distributable net income shall be allocated among the items of distributable net income in accordance with regulations prescribed by the Secretary.

Code § 662(b) provides that amounts included in the beneficiary's income for regular income tax purposes:

> … shall have the same character in the hands of the beneficiary as in the hands of the estate or trust. For this purpose, the amounts shall be treated as consisting of the same proportion of each class of items entering into the computation of distributable net income as the total of each class bears to the total distributable net income of the estate or trust unless the terms of the governing instrument specifically allocate different classes of income to different beneficiaries. In the application of the preceding sentence, the items of deduction entering into the computation of distributable net income (including the deduction allowed under section 642(c)) shall be allocated among the items of distributable net income in accordance with regulations prescribed by the Secretary. In the application of this subsection to the amount determined under paragraph (1) of subsection (a), distributable net income shall be computed without regard to any portion of the deduction under section 642(c) which is not attributable to income of the taxable year.

Reg. § 1.662(b)-1 provides:

> In determining the amount includible in the gross income of a beneficiary, the amounts which are determined under section 662(a) and §§ 1.662(a)-1 through 1.662(a)-4 shall have the same character in the hands of the beneficiary as in the hands of the estate or trust. The amounts are treated as consisting of the same proportion of each class of items entering into the computation of distributable net income as the total of each class bears to the total distributable net income of the estate or trust unless the terms of the governing instrument specifically allocate different classes of income to different beneficiaries, or unless local law requires such an allocation. For this purpose, the principles contained in § 1.652(b)-1 shall apply.

Reg. § 1.652(b)-1 provides:

> In determining the gross income of a beneficiary, the amounts includible under § 1.652(a)-1 have the same character in the hands of the beneficiary as in the hands of the trust. For example, to the extent that the amounts specified in § 1.652(a)-1 consist of income exempt from tax under section 103, such amounts are not included in the beneficiary's gross income. Similarly, dividends distributed to a beneficiary retain their original character in the beneficiary's hands for purposes of determining the availability to the beneficiary of the dividends received credit under section 34 (for dividends received on or before December 31, 1964) and the dividend exclusion under section 116…. Similarly, to the extent such amounts consist of an amount received as a part of a lump sum distribution from a qualified plan and to which the provisions of

> section 72(n) would apply in the hands of the trust, such amount shall be treated as subject to such section in the hands of the beneficiary except where such amount is deemed under section 666(a) to have been distributed in a preceding taxable year of the trust and the partial tax described in section 668(a)(2) is determined under section 668(b)(1)(B). The tax treatment of amounts determined under § 1.652(a)-1 depends upon the beneficiary's status with respect to them not upon the status of the trust. Thus, if a beneficiary is deemed to have received foreign income of a foreign trust, the includibility of such income in his gross income depends upon his taxable status with respect to that income.

This proportionate requirement applies "unless the terms of the governing instrument specifically allocate different classes of income to different beneficiaries, or unless local law requires such an allocation."

When allocating income among beneficiaries:

> The terms of the trust are considered specifically to allocate different classes of income to different beneficiaries only to the extent that the allocation is required in the trust instrument, and only to the extent that it has an economic effect independent of the income tax consequences of the allocation.

I.A.1.m.ii. How Undistributed Capital Gains Being Allocated to DNI Affects Character of Income Trapped Inside of Trust Compared to Distributed to the Beneficiary

If the amount of DNI is less than the amount distributed to the beneficiary, the issues described in this part II.J.8.f.ii How Undistributed Capital Gains Being Allocated to DNI Affects Character of Income Trapped Inside of Trust Compared to Distributed to the Beneficiary become important.

Some income might be inadvertently trapped in the trust if the allocation rules of part II.J.8.f.i General Rules of the Proportion of DNI Constitutes Capital Gain Compared to Other Income apply without being modified by any special ordering rule in the trust agreement and if all of a pass-through entity's capital gain constitutes DNI under an approach described in part II.J.8.a.ii Whether the Gain from the Sale or Exchange of a Capital Asset Is Allocated to Corpus That's because looking exclusively at those two factors bypasses the analysis of part II.J.5.c.i Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal.

For example, trust has $10,000 of interest income. Trust's distributive share of partnership's income is $20,000 of dividend income and $70,000 of long-term capital gains. If the rules described in the preceding paragraph apply, then 10% of all distributions constitute interest income, 20% constitute dividend income, and 70% constitute long-term capital gains. Trust distributes $50,000 to the beneficiary. Therefore, each of the beneficiary and the trust has $5,000 of interest income, $10,000 of dividend income, and $35,000 of long-term capital gains.

Contrast that to an approach under which the trustee is able to control how much capital gain is included in DNI, under part II.J.5.c.i Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal. On a year-by-year basis, the trustee can selectively include capital gain in DNI to the extent that one or both of part II.J.8.c.ii Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a

The amount deemed distributed is the lesser of the property's basis or fair market value,[2801] unless gain was recognized, in which case it is the property's value.[2802]

Distributing low basis assets will generate a new basis (often a step-up) when the beneficiary dies. However, distributed assets are subject to the beneficiary's creditors, changes in the beneficiary's estate tax posture (including not only changes in the tax law but also changes in financial situation through the beneficiary's own efforts or through marriage and change in residence to a state that imposes its own estate tax), and changes in the beneficiary's dispositive goals. To get a basis step-up, I would rather add (perhaps by decanting)[2803] a formula general power of appointment, as described in part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap.[2804]

Distributing an unmarketable partnership interest would carry out DNI without giving the beneficiary cash. However, valuation adjustments might depress the amount of the deemed distributions, and the beneficiary would be entitled to a proportionate share of future distributions from the partnership. However, if the trustee controls the partnership, the trustee can also control the distribution spigot.

II.J.8.d.ii. Specific Bequest

A gift or bequest of a specific sum of money or of specific property, which is required by the specific terms of the will or trust instrument and is properly paid or credited to a beneficiary, is not allowed as a deduction to an estate or trust under Code § 661 and is not included in the gross income of a beneficiary under Code § 662, unless under the terms of the will or trust instrument the gift or bequest is to be paid or credited to the recipient in more than three installments.[2805]

Beneficiary or part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary is available. By including in DNI just enough capital gain to cause the DNI to match the cash distributed to the beneficiary, the trustee can ensure that all of the ordinary income is distributed to the beneficiary.

I.A.1.n. Effectuating Allocation of Capital Gain to DNI

Form 1041 (Schedule D), Part III, column (1) allocates the beneficiaries' shares. Once one separates that, the rest should flow naturally.

.

[2800] Code § 267, especially subsections (a)(1), (b)(6) and (b)(13).
[2801] Code § 643(e)(2).
[2802] Code § 643(e)(3).
[2803] See part II.J.18.c Decanting.
[2804] Especially the text accompanying fns 2126-2128 for the formula. Part II.H.2.k also mentions that giving a nonadverse the trustee the right to veto any exercise in favor of the beneficiary's creditors generates estate inclusion even though a corporate trustee is likely to exercise that veto due to its fiduciary liability. In most states, creditors cannot reach an unexercised general power of appointment.
[2805] Reg. § 1.663(a)-1(a), which provides further:

> Thus, in order for a gift or bequest to be excludable from the gross income of the recipient, (1) it must qualify as a gift or bequest of a specific sum of money or of specific property (see

II.J.8.d.iii. Distributing a Note to the Obligor

Rev. Rul. 75-68 provides:

> The income of a testamentary trust consisting solely of interest from mortgages on the beneficiary's property was required to be distributed periodically. Although the mortgage notes held by the trust required the periodic payment of interest, it was agreed between the beneficiary and the trustees, that the beneficiary would pay no interest on the mortgages and the trustees would distribute no income from the trust.
>
> *Held*, notwithstanding the foregoing agreement, the interest income due on the mortgages held by the trust is includible in the gross income of the trust, and this same amount, as the distributable income of the trust, is includible in the gross income of the beneficiary. Further, the beneficiary is entitled to a deduction for this interest deemed paid on the mortgages.

Below is authority consistent with this conclusion:

Reg. § 1.643(c)-1(a) treats as a beneficiary "any person with respect to an amount used to discharge or satisfy that person's legal obligation as that term is used in § 1.662(a)-4." Reg. § 1.661(a)-2(d) provides:

> The terms "income required to be distributed currently" and "any other amounts properly paid or credited or required to be distributed" also include any amount used to discharge or satisfy any person's legal obligation as that term is used in § 1.662(a)-4.

Reg. § 1.662(a)-4, "Amounts used in discharge of a legal obligation," provides:

> Any amount which, pursuant to the terms of a will or trust instrument, is used in full or partial discharge or satisfaction of a legal obligation of any person is included in the gross income of such person under section 662(a)(1) or (2), whichever is applicable, as though directly distributed to him as a beneficiary, except in cases to which section 71 (relating to alimony payments) or section 682 (relating to income of a trust in case of divorce, etc.) applies. The term "legal obligation" includes a legal obligation to support another person if, and only if, the obligation is not affected by the adequacy of the dependent's own resources. For example, a parent has a "legal obligation" within the meaning of the preceding sentence to support his minor child if under local law property or income from property owned by the child cannot be used for his support so long as his parent is able to support him. On the other hand, if under local law a mother may use the resources of a child for the child's support in lieu of supporting him herself, no obligation of support exists within the meaning of this paragraph, whether or not income is actually used for support. Similarly, since under local law a child ordinarily is obligated to support his parent only if the parent's earnings and resources are insufficient for the purpose, no obligation exists whether or not the parent's earnings and resources are sufficient. In any event, the amount of trust income which is included in the gross income of a person obligated to support a dependent is limited by the extent of his legal obligation under local law. In the case of a parent's obligation to support his child, to the

---

> paragraph (b) of this section), and (2) the terms of the governing instrument must not provide for its payment in more than three installments (see paragraph (c) of this section). The date when the estate came into existence or the date when the trust was created is immaterial.

> extent that the parent's legal obligation of support, including education, is determined under local law by the family's station in life and by the means of the parent, it is to be determined without consideration of the trust income in question.

Reg. § 1.661(a)-2(d) provides:

> The terms "income required to be distributed currently" and "any other amounts properly paid or credited or required to be distributed" also include any amount used to discharge or satisfy any person's legal obligation as that term is used in § 1.662(a)-4.

II.J.8.e. Partnerships and S corporations Carry Out Income and Capital Gain to Beneficiaries

Generally, K-1 income from a passthrough business entity will carry out any income (including capital) distributed to the trust and then to the trust's beneficiaries. This section focuses on nongrantor trusts holding partnerships rather than S corporations, because generally a trust can hold S corporation stock that is not a grantor trust, QSST, or ESBT only during a relatively limited amount of time.[2806] (Although the principles in this part II.J.8.e would apply to a net income with make-up charitable remainder unitrust – a NIMCRUT – the IRS has concerns about that application and might shut it down at some point.)[2807]

[2806] See part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation.

[2807] Rev. Proc. 2015-3, Section 4.01(36) identifies as an area in which rulings or determination letters will not ordinarily be issued:

> Whether a trust that will calculate the unitrust amount under § 664(d)(3) qualifies as a § 664 charitable remainder trust when a grantor, a trustee, a beneficiary, or a person related or subordinate to a grantor, a trustee, or a beneficiary can control the timing of the trust's receipt of trust income from a partnership or a deferred annuity contract to take advantage of the difference between trust income under § 643(b) and income for Federal income tax purposes for the benefit of the unitrust recipient.

Check the most recent year's Rev. Proc. 20xx-3 [where "xx" represents the last two digits of the year] to see whether this remains on the list. For further discussion, see Fox, ¶ 25.20[5] NIMCRUTs—Where Timing of Trust Income Is Controlled by Grantor, Trustee, or Related or Subordinate Person, *Charitable Giving: Taxation, Planning, and Strategies* (WG&L).

When administering any partnership, be careful to avoid any direct or indirect violation of the prohibition against counting precontribution gain as income found in Reg. § 1.664-3(a)(1)(i)(b)(3):

> For purposes of this paragraph (a)(1)(i)(b), trust income generally means income as defined under section 643(b) and the applicable regulations. However, trust income may not be determined by reference to a fixed percentage of the annual fair market value of the trust property, notwithstanding any contrary provision in applicable state law. Proceeds from the sale or exchange of any assets contributed to the trust by the donor must be allocated to principal and not to trust income at least to the extent of the fair market value of those assets on the date of their contribution to the trust. Proceeds from the sale or exchange of any assets purchased by the trust must be allocated to principal and not to trust income at least to the extent of the trust's purchase price of those assets. Except as provided in the two preceding sentences, proceeds from the sale or exchange of any assets contributed to the trust by the donor or purchased by the trust may be allocated to income, pursuant to the terms of the governing instrument, if not prohibited by applicable local law. A discretionary power to make this allocation may be granted to the trustee under the terms of the governing instrument but only to the extent that the state statute permits the trustee to make adjustments between income and principal to treat beneficiaries impartially.

Also, if one elected not to carry out capital gains under Reg. § 1.643(a)-3(b)(2) and later decides that all capital gain should be included in DNI going forward (or does not want to take a risk that the IRS will not respect deviations from general rules of the Uniform Principal and Income Act, consider forming an entity taxed as a partnership. Capital gains earned through a partnership generally constitute trust accounting income.[2808]

The Uniform Principal and Income Act provides that, generally, all cash distributions from an entity (including a partnership) are considered trust accounting income.[2809] Only the following distributions from an entity are not considered trust accounting income:[2810]

- property other than money;
- money received in one distribution or a series of related distributions in exchange for part or all of a trust's interest in the entity;
- money received in total or partial liquidation of the entity; and
- money received from an entity that is a regulated investment company or a real estate investment trust if the money distributed is a capital gain dividend for federal income tax purposes.

Thus, a partnership's capital gains recognized in the ordinary course of managing and re-balancing a portfolio would constitute fiduciary accounting income to the extent distributed from the partnership in cash and therefore would be includible in DNI under (1) above.

To keep control of the partnership, consider having the trust be a 1% general partner and 98% limited partner, and the beneficiary or someone else might contribute 1% as a limited partner. Distributing a limited partnership interest to a beneficiary can carry out income and perhaps capital gain while at the same time not giving the beneficiary cash to spend (but be sure to distribute enough cash so that the beneficiary can pay tax on the distribution). Be careful to avoid the gain on formation that applies when a contributing partner diversifies the partner's holdings by forming the partnership.[2811] If the trust holds not only marketable securities but also investments in businesses, consider setting up one partnership for the business investments and another partnership for the marketable securities, which would help facilitate allocating trust assets on termination or any other trust division.[2812] Also consider whether a state with jurisdiction over the trust might subject the partnership itself to state income tax.[2813]

Complexity might arise if a partnership distributes less than all of its taxable income to a mandatory income trust. It is unclear whether all of the trust's distributive share of capital gain is DNI.[2814] Furthermore, interrelated calculations might be required for a mandatory income

[2808] In *Crisp v. U.S.*, 76 A.F.T.R.2d 95-6261, 34 Fed. Cl. 112 (1995), the Court of Claims held that capital gain distributed in the ordinary course of a partnership's operations was allocated to income (because the settlor intended to distribute it) and therefore was includible in DNI.

trust.[2815] Generally, we should look to see whether planning under part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law or II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary is sufficient before recommending a partnership solely to address the issues described in part II.J.8.c.ii Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary.

II.J.8.f. Consequences of Allocating Capital Gain to DNI

II.J.8.f.i. General Rules of the Proportion of DNI Constitutes Capital Gain Compared to Other Income (and General Retention of the Character of DNI Distributed to Beneficiaries)

This part II.J.8.f.i first discusses netting deductions against income then discusses allocating that income.

II.J.8.f.i.(a). Allocating Deductions to Various Income Items

Rules for allocating deductions include:

- All deductible items directly attributable to one class of income are allocated to that class.[2816] To the extent that any items of deduction which are directly attributable to a class of income exceed that class of income, they may be allocated to any other class of income (including capital gains) included in distributable net income as described above except that any excess deductions attributable to tax-exempt income may not be offset against any other class of income.[2817]

- Deductions not directly attributable to a specific class of income may be allocated to any item of income (including capital gains) included in computing DNI, but Code § 265 requires a portion of such indirect expenses to be allocated to non-taxable income.[2818] Such indirect

---

[2815] Part III.A.4 Trust Accounting Income Regarding Business Interests describes trust accounting income, income tax, and some tough fiduciary issues that arise when a mandatory income trust owns an business interest. See also part III.F.2 Trust Accounting and Taxation.

[2816] Reg. § 1.652(b)-3(a).

[2817] Reg. § 1.652(b)-3(d).

[2818] Reg. § 1.652(b)-3(b) provides:

> The deductions which are not directly attributable to a specific class of income may be allocated to any item of income (including capital gains) included in computing distributable net income, but a portion must be allocated to non-taxable income (except dividends excluded under section 116) pursuant to section 265 and the regulations thereunder. For example, if the income of a trust is $30,000 (after direct expenses), consisting equally of $10,000 of dividends, tax-exempt interest, and rents, and income commissions amount to $3,000, one-third ($1,000) of such commissions should be allocated to tax-exempt interest, but the balance of $2,000 may be allocated to the rents or dividends in such proportions as the trustee may elect. The fact that the governing instrument or applicable local law treats certain items of deduction as attributable to corpus or to income not included in distributable net income does not affect allocation under this paragraph. For instances, if in the example set forth in this paragraph the trust also had capital gains which are allocable to corpus under the terms of the trust instrument, no part of the deductions would be allocable thereto since the capital gains are excluded from the computation of distributable net income under section 643(a)(3).

expenses include trustee fees, the rental of safe deposit boxes, and state income and personal property taxes.[2819] Once one has allocated expenses to tax-exempt income, how does one choose to which items of taxable income to allocate deductions? One would consider allocating to those income items that are most highly taxed, considering federal and state income tax and the 3.8% tax on net investment income.[2820] For example, interest income is taxed at the highest rates, whereas qualified dividends are taxed at long-term capital gain rates. Within interest income, consider whether the interest is from U.S. obligations exempt from state income tax. Although distributions from qualified retirement plans and IRAs are taxed at the highest regular tax rate, they are exempt from the 3.8% tax on net investment income. See part II.I.6 Deductions Against NII (especially the text accompanying fns. 2307-2308).

- If a charitable deduction under Code § 642(c) is involved, any allocations of taxable income between the charitable deduction and the beneficiaries must have substantial economic effect.[2821]

An expense allocated to tax-exempt income and therefore disallowed for income tax purposes may be deductible for estate tax purposes. Rev. Rul. 59-32, which Rev. Rul. 63-27 clarifies as showing just one among the acceptable methods of such a calculation.

[2819] Reg. § 1.652(b)-3(c).

[2820] See part II.I 3.8% Tax on Excess Net Investment Income (NII).

[2821] Reg. § 1.642(c)-3(b)(2) provides:

Determination of the character of an amount deductible under section 642(c). In determining whether the amounts of income so paid, permanently set aside, or used for a purpose specified in section 642(c)(1), (2), or (3) include particular items of income of an estate or trust, whether or not included in gross income, a provision in the governing instrument or in local law that specifically provides the source out of which amounts are to be paid, permanently set aside, or used for such a purpose controls for Federal tax purposes to the extent such provision has economic effect independent of income tax consequences. See § 1.652(b)-2(b). In the absence of such specific provisions in the governing instrument or in local law, the amount to which section 642(c) applies is deemed to consist of the same proportion of each class of the items of income of the estate or trust as the total of each class bears to the total of all classes. See § 1.643(a)-5(b) for the method of determining the allocable portion of exempt income and foreign income. This paragraph (b)(2) is illustrated by the following examples:

Example (1). A charitable lead annuity trust has the calendar year as its taxable year, and is to pay an annuity of $10,000 annually to an organization described in section 170(c). A provision in the trust governing instrument provides that the $10,000 annuity should be deemed to come first from ordinary income, second from short-term capital gain, third from fifty percent of the unrelated business taxable income, fourth from long-term capital gain, fifth from the balance of unrelated business taxable income, sixth from tax-exempt income, and seventh from principal. This provision in the governing instrument does not have economic effect independent of income tax consequences, because the amount to be paid to the charity is not dependent upon the type of income from which it is to be paid. Accordingly, the amount to which section 642(c) applies is deemed to consist of the same proportion of each class of the items of income of the trust as the total of each class bears to the total of all classes.

Example (2). A trust instrument provides that 100 percent of the trust's ordinary income must be distributed currently to an organization described in section 170(c) and that all remaining items of income must be distributed currently to B, a noncharitable beneficiary. This income ordering provision has economic effect independent of income tax consequences because the amount to be paid to the charitable organization each year is dependent upon the amount of ordinary income the trust earns within that taxable year. Accordingly, for purposes of section 642(c), the full amount distributed to charity is deemed to consist of ordinary income.

- Special rules apply to depreciation deductions.[2822]

II.J.8.f.i.(b). Allocating Income Items Among Those Receiving It

In allocating income between the trust and the beneficiary (or beneficiaries), the amounts of DNI distributed to the beneficiaries:[2823]

> shall be treated as consisting of the same proportion of each class of items entering into the computation of distributable net income of the estate or trust as the total of each class bears to the total distributable net income of the estate or trust in the absence of the allocation of different classes of income under the specific terms of the governing instrument.

However, this proportionate rule is subject to specific provisions in the governing instrument for the allocation of different classes of income or different allocations under local law,[2824] subject to tax-exempt income being allocated in a manner that does not allow it to be deducted.[2825]

Thus, except for tax-exempt income and allocations between the charitable and noncharitable shares (and any special rules regarding depreciation deductions),[2826] it appears that a trust agreement may create ordering provisions between which items of DNI the trust retains and

---

Reg. § 1.643(a)-5(b) provides:

> If the estate or trust is allowed a charitable contributions deduction under section 642(c), the amounts specified in paragraph (a) of this section and § 1.643(a)-6 are reduced by the portion deemed to be included in income paid, permanently set aside, or to be used for the purposes specified in section 642(c). If the governing instrument or local law specifically provides as to the source out of which amounts are paid, permanently set aside, or to be used for such charitable purposes, the specific provision controls for Federal tax purposes to the extent such provision has economic effect independent of income tax consequences. See § 1.652(b)-2(b). In the absence of such specific provisions in the governing instrument or local law, an amount to which section 642(c) applies is deemed to consist of the same proportion of each class of the items of income of the estate or trust as the total of each class bears to the total of all classes. For illustrations showing the determination of the character of an amount deductible under section 642(c), see Examples 1 and 2 of § 1.662(b)-2 and § 1.662(c)-4(e).

[2822] See part II.J.11.a.ii Allocating Depreciation to Beneficiaries (Including Surprising Result Regarding Losses).

[2823] Code § 661(b).

[2824] Reg. § 1.661(b)-1.

[2825] Code § 661(c). Reg. § 1.661(c)-1, which was adopted 12/19/56 and amended 12/15/64, provides:

> An estate or trust is not allowed a deduction under section 661(a) for any amount which is treated under section 661(b) as consisting of any item of distributable net income which is not included in the gross income of the estate or trust. For example, if in 1962, a trust, which reports on the calendar year basis, has distributable net income of $20,000, which is deemed to consist of $10,000 of dividends and $10,000 of tax-exempt interest, and distributes $10,000 to beneficiary A, the deduction allowable under section 661(a) (computed without regard to section 661(c)) would amount to $10,000 consisting of $5,000 of dividends and $5,000 of tax-exempt interest. The deduction actually allowable under section 661(a) as limited by section 661(c) is $4,975, since no deduction is allowable for the $5,000 of tax-exempt interest and the $25 deemed distributed out of the $50 of dividends excluded under section 116, items of distributable net income which are not included in the gross income of the estate or trust.

[2826] See fn. 2821.

which items of DNI the trust distributes to beneficiaries. However, such a provision might encounter significant resistance from the IRS.[2827]

Once one decides which items of DNI the trust distributes to beneficiaries, generally distributions to each beneficiary carry out a pro rata portion of ordinary income and capital gain items allocated to the beneficiaries, and any other characteristic of the income at the trust level retains its status in the beneficiary's hands (which, among other things, is important for net investment income tax purposes).[2828] Code § 652(b) provides that amounts included in the beneficiary's income for regular income tax purposes:

> … shall have the same character in the hands of the beneficiary as in the hands of the trust. For this purpose, the amounts shall be treated as consisting of the same proportion of each class of items entering into the computation of distributable net income of the trust as the total of each class bears to the total distributable net income of the trust, unless the terms of the trust specifically allocate different classes of income to different beneficiaries. In the application of the preceding sentence, the items of deduction entering into the computation of distributable net income shall be allocated among the items of distributable net income in accordance with regulations prescribed by the Secretary.

Code § 662(b) provides that amounts included in the beneficiary's income for regular income tax purposes:

> … shall have the same character in the hands of the beneficiary as in the hands of the estate or trust. For this purpose, the amounts shall be treated as consisting of the same proportion of each class of items entering into the computation of distributable net income as the total of each class bears to the total distributable net income of the estate or trust unless the terms of the governing instrument specifically allocate different classes of income to different beneficiaries. In the application of the preceding sentence, the items of deduction entering into the computation of distributable net income (including the deduction allowed under section 642(c)) shall be allocated among the items of distributable net income in accordance with regulations prescribed by the Secretary. In the application of this subsection to the amount determined under paragraph (1) of subsection (a), distributable net income shall be computed without regard to any portion of the deduction under section 642(c) which is not attributable to income of the taxable year.

Reg. § 1.662(b)-1 provides:

> In determining the amount includible in the gross income of a beneficiary, the amounts which are determined under section 662(a) and §§ 1.662(a)-1 through 1.662(a)-4 shall have the same character in the hands of the beneficiary as in the hands of the estate or trust. The amounts are treated as consisting of the same proportion of each class of items entering into the computation of distributable net income as the total of each class

---

[2827] In adopting Reg. § 1.642(c)-3(b)(2), which is quoted in fn. 2821, T.D. 9582 rebuffed criticism of the regulation, saying:

> Permitting an ordering rule with no economic effect independent of income tax consequences to supersede the pro rata allocation rule generally applicable under Subchapter J would, in effect, permit taxpayers to deviate at will from the general rule imposed throughout Subchapter J in the case of all kinds of complex trusts.

[2828] See fn. 2327, found in part II.I.7 Interaction of NII Tax with Fiduciary Income Tax Principles.

> bears to the total distributable net income of the estate or trust unless the terms of the governing instrument specifically allocate different classes of income to different beneficiaries, or unless local law requires such an allocation. For this purpose, the principles contained in § 1.652(b)-1 shall apply.

Reg. § 1.652(b)-1 provides:

> In determining the gross income of a beneficiary, the amounts includible under § 1.652(a)-1 have the same character in the hands of the beneficiary as in the hands of the trust. For example, to the extent that the amounts specified in § 1.652(a)-1 consist of income exempt from tax under section 103, such amounts are not included in the beneficiary's gross income. Similarly, dividends distributed to a beneficiary retain their original character in the beneficiary's hands for purposes of determining the availability to the beneficiary of the dividends received credit under section 34 (for dividends received on or before December 31, 1964) and the dividend exclusion under section 116…. Similarly, to the extent such amounts consist of an amount received as a part of a lump sum distribution from a qualified plan and to which the provisions of section 72(n) would apply in the hands of the trust, such amount shall be treated as subject to such section in the hands of the beneficiary except where such amount is deemed under section 666(a) to have been distributed in a preceding taxable year of the trust and the partial tax described in section 668(a)(2) is determined under section 668(b)(1)(B). The tax treatment of amounts determined under § 1.652(a)-1 depends upon the beneficiary's status with respect to them not upon the status of the trust. Thus, if a beneficiary is deemed to have received foreign income of a foreign trust, the includibility of such income in his gross income depends upon his taxable status with respect to that income.

This proportionate requirement applies "unless the terms of the governing instrument specifically allocate different classes of income to different beneficiaries, or unless local law requires such an allocation."[2829]

[2829] Reg. § 1.662(b)-1. Furthermore, Reg. § 1.652(b)-2(a) provides:

> The amounts specified in § 1.652(a)-1 which are required to be included in the gross income of a beneficiary are treated as consisting of the same proportion of each class of items entering into distributable net income of the trust (as defined in section 643(a)) as the total of each class bears to such distributable net income, unless the terms of the trust specifically allocate different classes of income to different beneficiaries, or unless local law requires such an allocation. For example: Assume that under the terms of the governing instrument, beneficiary A is to receive currently one-half of the trust income and beneficiaries B and C are each to receive currently one-quarter, and the distributable net income of the trust (after allocation of expenses) consists of dividends of $10,000, taxable interest of $10,000 and tax-exempt interest of $4,000. A will be deemed to have received $5,000 of dividends, $5,000 of taxable interest, and $2,000 of tax-exempt interest; B and C will each be deemed to have received $2,500 of dividends, $2,500 of taxable interest, and $1,000 of tax-exempt interest. However, if the terms of the trust specifically allocate different classes of income to different beneficiaries, entirely or in part, or if local law requires such an allocation, each beneficiary will be deemed to have received those items of income specifically allocated to him.

When allocating income among beneficiaries:[2830]

> The terms of the trust are considered specifically to allocate different classes of income to different beneficiaries only to the extent that the allocation is required in the trust instrument, and only to the extent that it has an economic effect independent of the income tax consequences of the allocation.

II.J.8.f.ii. How Undistributed Capital Gains Being Allocated to DNI Affects Character of Income Trapped Inside of Trust Compared to Distributed to the Beneficiary

If the amount of DNI is less than the amount distributed to the beneficiary, the issues described in this part II.J.8.f.ii How Undistributed Capital Gains Being Allocated to DNI Affects Character of Income Trapped Inside of Trust Compared to Distributed to the Beneficiary become important.

Some income might be inadvertently trapped in the trust if the allocation rules of part II.J.8.f.i General Rules of the Proportion of DNI Constitutes Capital Gain Compared to Other Income apply without being modified by any special ordering rule in the trust agreement and if all of a pass-through entity's capital gain constitutes DNI under an approach described in part II.J.8.a.ii Whether the Gain from the Sale or Exchange of a Capital Asset Is Allocated to Corpus That's because looking exclusively at those two factors bypasses the analysis of part II.J.5.c.i Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal.

For example, trust has $10,000 of interest income. Trust's distributive share of partnership's income is $20,000 of dividend income and $70,000 of long-term capital gains. If the rules described in the preceding paragraph apply, then 10% of all distributions constitute interest income, 20% constitute dividend income, and 70% constitute long-term capital gains. Trust distributes $50,000 to the beneficiary. Therefore, each of the beneficiary and the trust has $5,000 of interest income, $10,000 of dividend income, and $35,000 of long-term capital gains.

Contrast that to an approach under which the trustee is able to control how much capital gain is included in DNI, under part II.J.5.c.i Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal. On a year-by-year basis, the trustee can selectively include capital gain in DNI to the extent that one or both of part II.J.8.c.ii Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary or part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary is available. By including in DNI just enough capital

---

[2830] Reg. § 1.652(b)-2(a). Reg. § 1.652(b)-2(b) provides the following:

(1) Allocation pursuant to a provision in a trust instrument granting the trustee discretion to allocate different classes of income to different beneficiaries is not a specific allocation by the terms of the trust.

(2) Allocation pursuant to a provision directing the trustee to pay all of one income to A, or $10,000 out of the income to A, and the balance of the income to B, but directing the trustee first to allocate a specific class of income to A's share (to the extent there is income of that class and to the extent it does not exceed A's share) is not a specific allocation by the terms of the trust.

(3) Allocation pursuant to a provision directing the trustee to pay half the class of income (whatever it may be) to A, and the balance of the income to B, is a specific allocation by the terms of the trust.

gain to cause the DNI to match the cash distributed to the beneficiary, the trustee can ensure that all of the ordinary income is distributed to the beneficiary.

II.J.8.g. Effectuating Allocation of Capital Gain to DNI

Form 1041 (Schedule D), Part III, column (1) allocates the beneficiaries' shares. Once one separates that, the rest should flow naturally.

II.J.9. Separate Share Rule; Trust Divisions; Multiple Trust Rules for Tax Avoidance

II.J.9.a. Specific Bequests; Separate Share Rule

The extent to which distributions carry out distributive net income is limited by parts II.J.9.a.i Specific Bequests and II.J.9.a.ii Separate Share Rule.

II.J.9.a.i. Specific Bequests under Code § 663(a)

Limiting what counts as distributions carrying out distributive net income ("DNI"), Code § 663(a), "Exclusions," provides:

> There shall not be included as amounts falling within section 661(a) or 662(a) -
>
> (1) *Gifts, bequests, etc.* Any amount which, under the terms of the governing instrument, is properly paid or credited as a gift or bequest of a specific sum of money or of specific property and which is paid or credited all at once or in not more than 3 installments. For this purpose an amount which can be paid or credited only from the income of the estate or trust shall not be considered as a gift or bequest of a specific sum of money.
>
> (2) *Charitable, etc., distributions*. Any amount paid or permanently set aside or otherwise qualifying for the deduction provided in section 642(c) (computed without regard to sections 508(d), 681, and 4948(c)(4)).
>
> (3) *Denial of double deduction*. Any amount paid, credited, or distributed in the taxable year, if section 651 or section 661 applied to such amount for a preceding taxable year of an estate or trust because credited or required to be distributed in such preceding taxable year.

Reg. § 1.663(a)-1, "Special rules applicable to sections 661 and 662; exclusions; gifts, bequests, etc.," provides:

> (a) *In general*. A gift or bequest of a specific sum of money or of specific property, which is required by the specific terms of the will or trust instrument and is properly paid or credited to a beneficiary, is not allowed as a deduction to an estate or trust under section 661 and is not included in the gross income of a beneficiary under section 662, unless under the terms of the will or trust instrument the gift or bequest is to be paid or credited to the recipient in more than three installments. Thus, in order for a gift or bequest to be excludable from the gross income of the recipient, (1) it must qualify as a gift or bequest of a specific sum of money or of specific property (see paragraph (b) of this section), and (2) the terms of the governing instrument must not provide for its payment in more than three installments (see

paragraph (c) of this section). The date when the estate came into existence or the date when the trust was created is immaterial.

(b) *Definition of a gift or bequest of a specific sum of money or of specific property*.

(1) In order to qualify as a gift or bequest of a specific sum of money or of specific property under section 663(a), the amount of money or the identity of the specific property must be ascertainable under the terms of a testator's will as of the date of his death, or under the terms of an inter vivos trust instrument as of the date of the inception of the trust. For example, bequests to a decedent's son of the decedent's interest in a partnership and to his daughter of a sum of money equal to the value of the partnership interest are bequests of specific property and of a specific sum of money, respectively. On the other hand, a bequest to the decedent's spouse of money or property, to be selected by the decedent's executor, equal in value to a fraction of the decedent's "adjusted gross estate" is neither a bequest of a specific sum of money or of specific property. The identity of the property and the amount of money specified in the preceding sentence are dependent both on the exercise of the executor's discretion and on the payment of administration expenses and other charges, neither of which are facts existing on the date of the decedent's death. It is immaterial that the value of the bequest is determinable after the decedent's death before the bequest is satisfied (so that gain or loss may be realized by the estate in the transfer of property in satisfaction of it).

(2) The following amounts are not considered as gifts or bequests of a sum of money or of specific property within the meaning of this paragraph:

(i) An amount which can be paid or credited only from the income of an estate or trust, whether from the income for the year of payment or crediting, or from the income accumulated from a prior year;

(ii) An annuity, or periodic gifts of specific property in lieu of or having the effect of an annuity;

(iii) A residuary estate or the corpus of a trust; or

(iv) A gift or bequest paid in a lump sum or in not more than three installments, if the gift or bequest is required to be paid in more than three installments under the terms of the governing instrument.

(3) The provisions of subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples, in which it is assumed that the gift or bequest is not required to be made in more than three installments (see paragraph (c)):

Example (1). Under the terms of a will, a legacy of $5,000 was left to A, 1,000 shares of X company stock was left to W, and the balance of the estate was to be divided equally between W and B. No provision was made in the will for the disposition of income of the estate during the period of administration. The estate had income of $25,000 during the taxable year 1954, which was accumulated and added to corpus for estate accounting purposes. During the taxable year, the executor paid the legacy of $5,000 in a lump sum to A, transferred the X company stock to W, and made no other distributions to beneficiaries. The distributions to A and W qualify for the exclusion under section 663(a)(1).

Example (2). Under the terms of a will, the testator's estate was to be distributed to A. No provision was made in the will for the distribution of the estate's income during the period of administration. The estate had income of $50,000 for the taxable year. The estate distributed to A stock with a basis of $40,000 and with a fair market value of $40,000 on the date of distribution. No other distributions were made during the year. The distribution does not qualify for the exclusion under section 663(a)(1), because it is not a specific gift to A required by the terms of the will. Accordingly, the fair market value of the property ($40,000) represents a distribution within the meaning of sections 661(a) and 662(a) (see § 1.661(a)-2(c)).

Example (3). Under the terms of a trust instrument, trust income is to be accumulated for a period of 10 years. During the eleventh year, the trustee is to distribute $10,000 to B, payable from income or corpus, and $10,000 to C, payable out of accumulated income. The trustee is to distribute the balance of the accumulated income to A. Thereafter, A is to receive all the current income until the trust terminates. Only the distribution to B would qualify for the exclusion under section 663(a)(1).

(4) A gift or bequest of a specific sum of money or of specific property is not disqualified under this paragraph solely because its payment is subject to a condition. For example, provision for a payment by a trust to beneficiary A of $10,000 when he reaches age 25, and $10,000 when he reaches age 30, with payment over to B of any amount not paid to A because of his death, is a gift to A of a specific sum of money payable in two installments, within the meaning of this paragraph, even though the exact amount payable to A cannot be ascertained with certainty under the terms of the trust instrument.

(c) *Installment payments*.

(1) In determining whether a gift or bequest of a specific sum of money or of specific property, as defined in paragraph (b) of this section, is required to be paid or credited to a particular beneficiary in more than three installments—

(i) Gifts or bequests of articles for personal use (such as personal and household effects, automobiles, and the like) are disregarded.

(ii) Specifically devised real property, the title to which passes directly from the decedent to the devisee under local law, is not taken into account, since it would not constitute an amount paid, credited, or required to be distributed under section 661 (see paragraph (e) of § 1.661(a)-2).

(iii) All gifts and bequests under a decedent's will (which are not disregarded pursuant to subdivisions (i) and (ii) of this subparagraph) for which no time of payment or crediting is specified, and which are to be paid or credited in the ordinary course of administration of the decedent's estate, are considered as required to be paid or credited in a single installment.

(iv) All gifts and bequests (which are not disregarded pursuant to subdivisions (i) and (ii) of this subparagraph) payable at any one specified time under the terms of the governing instrument are taken into account as a single installment.

For purposes of determining the number of installments paid or credited to a particular beneficiary, a decedent's estate and a testamentary trust shall each be treated as a separate entity.

(2) The application of the rules stated in subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1).

(i) Under the terms of a decedent's will, $10,000 in cash, household furniture, a watch, an automobile, 100 shares of X company stock, 1,000 bushels of grain, 500 head of cattle, and a farm (title to which passed directly to A under local law) are bequeathed or devised outright to A. The will also provides for the creation of a trust for the benefit of A, under the terms of which there are required to be distributed to A, $10,000 in cash and 100 shares of Y company stock when he reaches 25 years of age, $25,000 in cash and 200 shares of Y company stock when he reaches 30 years of age, and $50,000 in cash and 300 shares of Y company stock when he reaches 35 years of age.

(ii) The furniture, watch, automobile, and the farm are excluded in determining whether any gift or bequest is required to be paid or credited to A in more than three installments. These items qualify for the exclusion under section 663(a)(1) regardless of the treatment of the other items of property bequeathed to A.

(iii) The $10,000 in cash, the shares of X company stock, the grain, the cattle and the assets required to create the trust, to be paid or credited by the estate to A and the trust are considered as required to be paid or credited in a single installment to each, regardless of the manner of payment or distribution by the executor, since no time of payment or crediting is specified in the will. The $10,000 in cash and shares of Y company stock required to be distributed by the trust to A when he is 25 years old are considered as required to be paid or distributed as one installment under the trust. Likewise, the distributions to be made by the trust to A when he is 30 and 35 years old are each considered as one installment under the trust. Since the total number of installments to be made by the estate does not exceed three, all of the items of money and property distributed by the estate qualify for the exclusion under section 663(a)(1). Similarly, the three distributions by the trust qualify.

Example (2). Assume the same facts as in example (1), except that another distribution of a specified sum of money is required to be made by the trust to A when he becomes 40 years old. This distribution would also qualify as an installment, thus making four installments in all under the trust. None of the gifts to A under the trust would qualify for the exclusion under

> section 663(a)(1). The situation as to the estate, however, would not be changed.
>
> *Example (3)* A trust instrument provides that A and B are each to receive $75,000 in installments of $25,000, to be paid in alternate years. The trustee distributes $25,000 to A in 1954, 1956, and 1958, and to B in 1955, 1957, and 1959. The gifts to A and B qualify for exclusion under section 663(a)(1), although a total of six payments is made. The gifts of $75,000 to each beneficiary are to be separately treated.

When an estate funds a pecuniary bequest to a trust before the estate terminates, the distribution receives Code § 663(a)(1) treatment.[2831]

Although Reg. § 1.663(a)-1 protects a gift or bequest of a specific sum of money or of specific property, it does not protect a combination of those. Rev. Rul. 72-295 had the following facts:

> The decedent in his will directed his executor to distribute to B, an heir, 8x dollars' worth but no more than all of the Y stock owned by the decedent at his death, the valuation to be made on the date of distribution. At the time of his death the decedent owned 300 shares of Y stock. At the time of distribution 64 shares of Y stock were required to satisfy the bequest and the executor distributed that number of the shares to B.

Rev. Rul. 72-295 reasoned and held:

> Generally, in order to qualify as specific property, the property must be identifiable both as to its kind and as to its amount. In the instant case, the bequest to B consisted of property other than money. Since only the kind of property, not the amount thereof, was ascertainable under the terms of the decedent's will as of the date of his death, it did not qualify as a bequest of specific property.
>
> Accordingly, in the instant case, since the 8x dollars' worth of Y stock received by B does not qualify as a bequest of specific property, it is not subject to the provisions of section 663(a) of the Code but is a distribution to B that comes within the meaning of the phrase "any other amounts properly paid or credited," set forth in section 661(a)(2) of the Code.
>
> … since the distribution in kind to B is not in satisfaction of a right to receive a distribution in a specific dollar amount or in specific property other than that distributed, the estate does not realize gain or loss by reason of the distribution of the shares of stock.
>
> If the estate has distributable net income, then in determining the amount deductible by the estate under section 661(a) of the Code, and includible in the gross income of B under section 662(a) of the Code the shares of Y stock will be taken into account at their fair market value at the time of distribution.
>
> In addition, the basis of the shares of Y stock in the hands of B is their fair market value at the time of distribution, to the extent such value is included in his gross income. To

[2831] Rev. Rul. 57-214. Rev. Rul. 64-307 held that Rev. Rul. 57-214 applies only to a pecuniary bequest and not to a bequest of residue and that any distribution deduction relating to the residue applies only when the bequest is actually funded.

> the extent that the value of the Y shares are not includible in B's gross income, they will retain the same basis they had to the estate.

Satisfying a bequest of specific property with other property does not affect the bequest's qualification under Code § 663(a)(1).[2832]

Apparently focusing on Reg. § 1.663(a)-1(b)(1), Letter Ruling 9218076 addressed specific bequests provided to settle a contest of the exercise of a testamentary power of appointment, holding:

> Based on the information submitted, we conclude that the amount of money and the identity of the specific property contained in the 1990 payments were not ascertainable under the terms of Trust as of the date of the inception of Trust. Therefore, the 1990 payments do not qualify as bequests of specific sums of money or property under section 663(a)(1) of the Code. Accordingly, the 1990 payments are included as amounts falling within sections 661(a) and 662(a).

However, if settlement reforms the trust as of the trust's inception as a separate taxpayer, as did Letter Ruling 9218076, I believe that the settlement payments should be eligible for Code § 663(a)(1) treatment. It has been suggested that Code § 663(a)(1) merely overlays

[2832] TAM 8220062.

> In the instant case the bequest by A of his shares in M clearly constituted a bequest of specific property. On the death of A there was no doubt as to the kind of property given. A's will made a bequest of M stock and A was possessed of M stock at the time of his death. On the death of A the amount of M stock which each of A's sons was to get was ascertainable. B was to get b shares and C was to get c shares. Unlike the case presented in Rev. Rul. 72-295 the number of shares in M which B and C were to receive was not tied into the value of the M shares on the date of their distribution. Instead, the amount of M shares which both B and C were to get was known with certainty on the day that A died. The bequest of M stock was identifiable as to its kind and amount under the terms of A's will as of the date of his death. Therefore, the bequest of M stock was a bequest of specific property. See Rev. Rul. 72-295.
>
> Although the bequest of M stock was a bequest of specific property it was satisfied, in part, with shares of N stock and not with shares of M stock. Nevertheless, the character of the property used to satisfy a bequest does not alter the nature of the bequest so satisfied. The use of money and property to satisfy a bequest of a specific sum of money is nevertheless considered a distribution in satisfaction of a bequest of a specific sum of money. Rev. Rul. 66-207. Therefore, the use of one type of property to satisfy a specific bequest of another type of property should be considered a distribution in satisfaction of a bequest of specific property.

Although the TAM did not rule on the issue, presumably the distribution of N stock was a sale or exchange.

Code § 102 principles[2833] over the fiduciary income tax system. Keeping that mind, consider *Vincent v. Commissioner*, T.C. Memo. 1992-21, which discussed Code § 102:[2834]

> Petitioners did not acquire the $390,000 payment by gift, bequest, devise, or inheritance, but instead by the settlement of a lawsuit. Whether a dispute is resolved through litigation or settlement, the nature of the underlying action determines the proper tax consequences. *Getty v. Commissioner*, *supra*; *Tribune Publishing Co. v. United States*, 836 F.2d 1176, 1177 (9th Cir. 1988). The taxability of a settlement is controlled by the

---

[2833] Code § 102, "Gifts and inheritances," starts with:

(a) *General rule*. Gross income does not include the value of property acquired by gift, bequest, devise, or inheritance.

(b) *Income*. Subsection (a) shall not exclude from gross income—

  (1) the income from any property referred to in subsection (a); or

  (2) where the gift, bequest, devise, or inheritance is of income from property, the amount of such income.

  Where, under the terms of the gift, bequest, devise, or inheritance, the payment, crediting, or distribution thereof is to be made at intervals, then, to the extent that it is paid or credited or to be distributed out of income from property, it shall be treated for purposes of paragraph (2) as a gift, bequest, devise, or inheritance of income from property. Any amount included in the gross income of a beneficiary under subchapter J shall be treated for purposes of paragraph (2) as a gift, bequest, devise, or inheritance of income from property.

Reg. § 1.102-1, "Gifts and inheritances," provides:

(a) *General rule*. Property received as a gift, or received under a will or under statutes of descent and distribution, is not includible in gross income, although the income from such property is includible in gross income. An amount of principal paid under a marriage settlement is a gift. However, see section 71 and the regulations thereunder for rules relating to alimony or allowances paid upon divorce or separation. Section 102 does not apply to prizes and awards (see section 74 and § 1.74-1) nor to scholarships and fellowship grants (see section 117 and the regulations thereunder).

(b) *Income from gifts and inheritances*. The income from any property received as a gift, or under a will or statute of descent and distribution shall not be excluded from gross income under paragraph (a) of this section.

(c) *Gifts and inheritances of income*. If the gift, bequest, devise, or inheritance is of income from property, it shall not be excluded from gross income under paragraph (a) of this section. Section 102 provides a special rule for the treatment of certain gifts, bequests, devises, or inheritances which by their terms are to be paid, credited, or distributed at intervals. Except as provided in section 663(a)(1) and paragraph (d) of this section, to the extent any such gift, bequest, devise, or inheritance is paid, credited, or to be distributed out of income from property, it shall be considered a gift, bequest, devise, or inheritance of income from property. Section 102 provides the same treatment for amounts of income from property which is paid, credited, or to be distributed under a gift or bequest whether the gift or bequest is in terms of a right to payments at intervals (regardless of income) or is in terms of a right to income. To the extent the amounts in either case are paid, credited, or to be distributed at intervals out of income, they are not to be excluded under section 102 from the taxpayer's gross income.

(d) *Effect of subchapter J*. Any amount required to be included in the gross income of a beneficiary under sections 652, 662, or 668 shall be treated for purposes of this section as a gift, bequest, devise, or inheritance of income from property. On the other hand, any amount excluded from the gross income of a beneficiary under section 663(a)(1) shall be treated for purposes of this section as property acquired by gift, bequest, devise, or inheritance.

(e) *Income taxed to grantor or assignor*. Section 102 is not intended to tax a donee upon the same income which is taxed to the grantor of a trust or assignor of income under section 61 or sections 671 through 677, inclusive.

[2834] *Vincent* dealt with tax years 1980 and 1983. A cite shortcutted below referred to earlier in the case include *Getty v. Commissioner*, 913 F.2d 1486, 1490 (9th Cir. 1990), *revg*. 91 T.C. 160 (1988).

> nature of the litigation. *Raytheon Production Corp. v. Commissioner*, 144 F.2d 110, 114 (1st Cir. 1944), *affg*. 1 T.C. 952 (1943); *Victor E. Gidwitz Family Trust v. Commissioner*, 61 T.C. 664, 673 (1974). The nature of the litigation is, in turn, controlled by the origin and character of the claim which gave rise to the litigation. *United States v. Gilmore*, 372 U.S. 39 (1963); *Victor E. Gidwitz Family Trust v. Commissioner*, *supra*.
>
> In characterizing the settlement payment for tax purposes, the test to be applied is stated most simply as "In lieu of what were the damages awarded?" *Getty v. Commissioner*, *supra*; *Tribune Publishing Co. v. Commissioner*, *supra* at 1178. In the instant case, petitioner's stepmother filed a complaint to set aside the 1978 Deed to the Modoc property. Petitioner filed a cross-complaint requesting a determination of his interests in the Modoc property. Petitioner also requested that the Santa Barbara Superior Court order a partition of the property or, in the alternative, order the property be sold with the proceeds to be divided according to the parties' respective interests in the Modoc property. After 3 years of legal posturing in the property dispute, and having twice had petitioner's general demurrers sustained against her, petitioner's stepmother agreed to a settlement in the amount of $390,000….
>
> In the instant case, the origin and character of the dispute involved the validity of a gratuitous transfer of real property to petitioner by his father pursuant to the 1978 Deed. The pleadings concerning the Modoc property transfer clearly indicate that the parties disputed the validity of the 1978 Deed. Petitioner's stepmother requested the court to declare the 1978 Deed null and void. Petitioner, in his cross-complaint, requested a judicial determination of his interest in the Modoc property. The Compromise Settlement and Mutual Release stated that the covenants therein and the $390,000 payment was in lieu and instead of any inherited interest in the Modoc property. We therefore reject respondent's contention that the $390,000 payment represented a nuisance settlement based on an unrecognized claim to property. We conclude that the underlying claim arose out of a dispute as to the validity of the gratuitous transfer of the Modoc property to petitioner.
>
> Accordingly, we conclude that the settlement proceeds represented a payment for any interest that petitioner may have acquired from the purported gratuitous transfer by his father pursuant to the 1978 Deed. Therefore, we hold that the settlement payment was properly excludable from petitioners' 1983 gross income under section 102(a).

Although *Vincent* does discuss Code § 663(a)(1), the principle that Code § 102 may protect settlements from taxation undercuts Letter Ruling 9218076's idea that a settlement of rights as of the trust's inception would not be eligible for the Code § 663(a)(1) exclusion of a distribution from carrying out DNI. On the other hand, Reg. § 1.663(a)-1(b)(1), reproduced above, does require that "the amount of money or the identity of the specific property must be ascertainable under the terms of a testator's will as of the date of his death, or under the terms of an inter vivos trust instrument as of the date of the inception of the trust," so uncertainty such as that provided by a formula marital bequest (as pointed out later in the regulation)[2835] can prevent

[2835] *Lemle v. United States*, 419 F.Supp. 68 (S.D.N.Y. 1976), commented:

> The design of Section 662 is clear enough: the section as presently framed effectively eliminates the problem of tracing distributions to their source, a problem that had inevitably attended the former statutory schema. See 1954 Oscoda Cong. & Admin. News at pp. 4086-87, 4621, 4714-15, 4990 (83d Cong., 2d Sess.). It is equally clear that distributions representing an elective

Code § 663(a)(1) protection (even though satisfying with property a formula bequest of a pecuniary amount is treated as a sale of that property).[2836] Ultimately, the limits of Code § 663(a)(1) override Code § 102, which is required so that a bequest of a series of payments will carry out income.[2837] Furthermore, if a beneficiary receives a series of payments that under state law constitute income at the time but in a later taxable year settles with the estate, applying the payments towards the estate's lump-sum obligation (an elective share), that application of payments under the settlement agreement does not prevent the series of payments from being distributions that carry out DNI.[2838]

---

share in the corpus of a deceased spouse's estate may be subject to the conclusive presumption raised by Section 662. See 26 U.S.C. 663 and 26 C.F.R. 1.663(a)-1(b).[5]

[5] A dower interest, in contradistinction to a surviving spouse's elective share, is excepted from Section 662 coverage. The rationale behind this difference in tax treatment is indirectly revealed in 26 C.F.R. 1.663(a)-1(b).

[2836] Rev. Rul. 60-87 provides:

Revenue Ruling 56-270, C. B. 1956-1, 325, stands for the proposition that, if a marital deduction trust comprises a fraction or percentage of the "adjusted gross estate" of a decedent, the marital trust fund is considered to have been provided for in a fixed and definite "dollar amount." Therefore, capital gain or loss is recognized upon the distribution of property to a trust…

Unlike section 1.663(a)-1(b)(1) of the regulations, Revenue Ruling 56-270, *supra*, is not concerned with the ascertainability of a specific amount at the date of death but rather whether the marital trust fund is provided for in a fixed and definite amount at the time of the distribution. Thus, to qualify for the exclusion provided for in section 663(a) of the Code, the above-quoted regulation prescribes an entirely different test from that prescribed in Revenue Ruling 56-270, which has application only for capital gain purposes. Further, the last sentence of the above-quoted regulations recognizes the fact that a different rule applies for capital gain purposes and clearly implies that the regulations are not to be considered inconsistent with that rule.

In the instant case, the marital deduction trust comprises a portion of the residue of the decedent's estate. However, instead of using a residuary formula clause, which leaves a percentage or fraction of the value of the residuary estate to the surviving spouse or trust, the will uses a pecuniary formula clause, as a Revenue Ruling 56-270, *supra*, which leaves a percentage of the "adjusted gross estate" to the surviving spouse or trust. There is a significant distinction between a marital deduction trust of the pecuniary formula type and one of the residuary formula type.

The rationale of Revenue Ruling 56-270, *supra*, is that a marital deduction trust of the pecuniary formula type provides for a trust fund in a fixed and definite amount, once the value of the adjusted gross estate is finally determined, which amount is unaffected by any appreciation or depreciation in value of the assets comprising the estate.

The difference is that under a pecuniary formula clause the trust will receive assets of a fixed and definite amount at the time of distribution, whereas under the residuary formula clause the percentage or fraction will be applied for the purpose of making distribution of the residuary estate as constituted at the time of distribution. Therefore, under a residuary formula clause, the trust will share in appreciation and depreciation of the value of the estate, which is not the case under a pecuniary formula clause. Thus, Revenue Ruling 56-270, *supra*, is not inconsistent with section 1.663(a)-1(b)(1) of the regulations.

The facts in the instant case show that the marital deduction trust comprising a portion of the residue of the estate is measured by a percentage of the value of the adjusted gross estate. Under such circumstances, the marital trust fund is considered as being provided for in a fixed and definite "dollar amount." Accordingly, gain or loss is realized by the estate measured by the difference between the fair market value of the property at the date of distribution and the value of the property determined for Federal estate tax purposes.

[2837] *Mahler v. Commissioner*, T.C. Memo. 1987-64.

[2838] *Lemle v. United States*, 579 F.2d 185 (2nd Cir. 1978).

Using property to satisfy a pecuniary bequest, although not a Code § 663(a)(1) distribution, is a deemed sale from the trust to the beneficiary.[2839] If an estate that is about to distribute specially bequeathed assets sells them at the beneficiaries' request, the executor's compliance with this request is the equivalent of a distribution of the securities to the beneficiaries, accompanied by an immediate return of the securities by the beneficiaries with instructions to the executor to sell on their behalf and is taxed directly to them.[2840] However, if an estate has legal title to property whose income is dedicated to charity, the estate reports the income and then takes a charitable deduction for the charitable set-aside.[2841] However, where the beneficiaries have only equitable rights and no legal rights to property, the income is received in trust and then distributed to the beneficiaries.[2842] On the other hand, if under applicable law a decedent's real estate passes

---

[2839] Consistent with *Kenan v. Commissioner*, 40 B.T.A. 824 (1939) (taxing gain on deemed sale), *aff'd* 114 F.2d 217 (2nd Cir. 1940) (gain received capital gain treatment), Reg. § 1.661(a)-2(f) provides:

> Gain or loss is realized by the trust or estate (or the other beneficiaries) by reason of a distribution of property in kind if the distribution is in satisfaction of a right to receive a distribution of a specific dollar amount, of specific property other than that distributed, or of income as defined under section 643(b) and the applicable regulations, if income is required to be distributed currently. In addition, gain or loss is realized if the trustee or executor makes the election to recognize gain or loss under section 643(e). This paragraph applies for taxable years of trusts and estates ending after January 2, 2004.

[2840] Rev. Rul. 68-666 reads in its entirety:

> A decedent by will made a specific bequest of securities to three charitable organizations exempt from Federal income tax under section 501(c)(3) of the Internal Revenue Code of 1954. After all of the debts of the decedent's estate had been satisfied, and when the executor of the estate was preparing to make distribution of the specific bequest, the beneficiaries thereof requested the executor to sell the securities and to distribute the proceeds in satisfaction of the specific bequest. Held, the executor's compliance with this request is the equivalent of a distribution of the securities to the beneficiaries, accompanied by an immediate return of the securities by the beneficiaries with instructions to the executor to sell on their behalf.
>
> Accordingly, gain realized on the sale of the securities is not includible in the gross income of the decedent's estate. Such gain was not realized and received by the estate. It was realized and received by the beneficiaries as a result of sales made by the executor while acting on their behalf.

This agency argument does not apply to qualified retirement plans that sell stock before distributing it. *Clayton v. U.S.*, 33 Fed. Cl 628 (1995) (distributees argued that they received low basis stock from an ESOP and then sold it for capital gain instead of an ordinary income distribution), *aff'd* 91 F.3d 170 *Fed. Cir. 1996), *cert. denied*, 519 U.S. 1040 (1996).

[2841] Rev. Rul. 57-133.

[2842] Rev. Rul. 75-61 involved the following facts:

> A died testate in 1963. His will provided that after the payment of his just debts and funeral expenses one-third of the estate be "alloted and assigned" to his wife, B, as satisfaction of her dower interest. Real property was transferred by the executor of A's estate to B in 1964 to carry out this provision in the will. Under local law, real property and income therefrom is subject to administration.
>
> A's will further provided that the income from certain property, comprising one-third of the estate, was to be paid to his son, C, for life and at C's death, such property was to be distributed to those of C's children living at the time of his death. In the event any portion of such property should vest in any person before such person attained his or her majority, then such portion would be retained by a trustee under a power in trust to invest and reinvest the principal, to collect the income and apply the net income, or as much thereof as the trustee should in his sole discretion determine, to the support and maintenance of such person during his or her minority.
>
> C died in the year 1971 leaving only a minor child, D. Under the laws of the appropriate jurisdiction legal title to property held under a power in trust is in the beneficiaries, in this case D.

directly to the beneficiaries, the estate does not include income from the real estate, except if and to the extent that the executor takes charge of the property and uses it to pay expenses rather than distributing it to the beneficiaries.[2843]

> The final third of the estate consisted of real estate and under the will was to be held by A's daughter, E, in fee simple, with the limitation that she would have no right to sell, convey, mortgage, incumber or dispose of, in any way, the real estate or rights therein before January 1, 1971, or to control, receive, or collect income from such real estate before January 1, 1967, unless permitted to do so at an earlier date by the action of the trustee. On and after January 1, 1967, however, she could lease the real property and receive the income from it.
>
> The specific issues are whether the income derived from the property held by the executor and ultimately distributed to B is income to B or to the executor; whether the income derived from the property held subject to the power in trust is income of a trust or of C's child; and whether income derived from the property conveyed to A's daughter is her income or income of a trust.

Rev. Rul. 75-61 held:

> The will, in the instant case, passed legal title to one-third of the estate to B, one-third to D, and one-third to E. However, it is manifest that complete control over the realty conveyed to D and E was given to the trustee. D and E could not collect the rental income themselves regardless of where the bare legal title to the real estate might vest. It was A's intent that the income from the real estate held by D should be received by C, until C's death, then controlled by the trustee for the benefit of D until such time as D reached his majority, then to D. Furthermore, it was A's intent that the income from the real estate held by E should be controlled by the trustee until January 1, 1967, and the power to convey the real estate was to be withheld until January 1, 1971.
>
> Thus, the trustee of the properties of D and E is vested with the responsibility for the protection and conservation of property for beneficiaries who cannot share in the discharge of the responsibility.
>
> Accordingly, it is held that the trustee must file U.S. Fiduciary Income Tax Returns (Form 1041) reporting therein the income from the property held under the power in trust for the benefit of D, for the taxable years in which he, as trustee, received such income. It is further held that the trustee must also report the income received from the real property left by A for the benefit of E for the taxable years in which such income was received by the trustee. Furthermore, it is noted that the dower interest of B has been satisfied by the transfer to her of real property of the estate by the executor, since under local law the property and income therefrom was subject to administration during that period. Rev. Rul. 57-133, 1957-1 C.B. 200. The income from such property that was received prior to the transfer to B is held to be income to the estate and reportable by the executor. After the transfer of the real estate to B, the income is held to be the personal income of B.

[2843] Rev. Rul. 59-375 reasoned and held:

> Under North Carolina law, when a person dies intestate, his real property descends directly to his heirs and is not subject to the control of the administrator. See *Alexander v. Galloway, et al.*, 80 S.E.(2d) 369; *Parker, et al., v. Porter, et al.*, 179 S.E. 28. However, under section 28-81 of the General Statutes of North Carolina, if the personal estate of the decedent should prove insufficient to pay the debts and costs of administration, the administrator may apply to the courts to sell the real property. Under section 28-57 of the General Statutes of North Carolina, all proceeds arising from such a sale are deemed personal assets in the hands of the administrator.
>
> Section 28-58 of the General Statutes of North Carolina provides, further as follows:
>
> > Surplus of proceeds of realty sold for debts is real asset.—All proceeds from the sale of real estate, as hereinafter provided, which may not be necessary to pay the debts and charges of administration, shall, notwithstanding, be considered real assets and as such shall be paid by the executor, administrator or collector to such persons as would have been entitled to the land had it not been sold.

II.J.9.a.ii. Separate Share Rule

In addition to its significance for fiduciary income tax purposes, the separate share rule can be critically important for determining a trust's eligibility for QSST treatment[2844] and for certain nonqualified deferred compensation plans.[2845]

"A separate share comes into existence upon the earliest moment that a fiduciary may reasonably determine, based upon the known facts, that a separate economic interest exists,"[2846] which really means that "distributions of the trust are to be made in substantially the

---

> In the present case the income was realized from sales of property made on behalf of both the administrator and the heirs. There was a joint sale of their respective interests in the lands. Such partition of real property by sale, where it appears that the actual partition cannot be made without injury to some or all of the interested parties, is provided for under Chapter 46, Article 2 to the General Statutes of North Carolina. The sales involved here were made according to section 1-339.4 of such General Statutes which authorizes the appointment of a commissioner to hold a sale in any proceeding. In such cases, the commissioner is acting as an agent of the court on behalf of the petitioning parties. See *Ex parte Wilson*, 22 S.E.(2d) 262; and *Harrell v. Blythe*, 53 S.E. 232. Under the orders of the court, the commissioner holds the proceeds for the heirs, subject only to the actual requirements of the administrator. Thus, to the extent that the property was sold for the purpose of providing funds for the administration of the estate, the proceeds are to be considered personalty and are subject to administration. It was only to that extent that the administrator had any interest in the property. See *Linker v. Linker, et al.*, 196 S.E. 329. As only a portion of the lands was sold on behalf of the administrator, only an allocable portion of the gains from the sale is includible in the gross income of the estate.
>
> Accordingly, it is held that only that part of the gain from the sales of an intestate decedent's real estate, which is proportionate to the portion of the proceeds payable to the administrator under state law for the discharge of the debts of the estate, is required to be included in the gross income of the estate. The remainder of the gain, which arises from the partition at the suit of the heirs, does not constitute an amount "received by" the estate within the purview of section 641(a)(3) of the Code.

[2844] See part III.A.3.e.i.(a) QSSTs Generally, especially fns. 5987-5989.

[2845] Reg. § 1.404(a)-12(b)(3).

[2846] Reg. § 1.663(c)-2(a), which applies to trusts other than qualified revocable trusts within the meaning of Code § 645(b)(1). For estates and such qualified trusts:

> The applicability of the separate share rule provided by section 663(c) to estates and qualified revocable trusts within the meaning of section 645(b)(1) will generally depend upon whether the governing instrument and applicable local law create separate economic interests in one beneficiary or class of beneficiaries of such estate or trust. Ordinarily, a separate share exists if the economic interests of the beneficiary or class of beneficiaries neither affect nor are affected by the economic interests accruing to another beneficiary or class of beneficiaries.

Reg. §§ 1.663(c)-3(c) and 1.663(c)-4(c) discuss this economic interest:

> A share may be considered as separate even though more than one beneficiary has an interest in it. For example, two beneficiaries may have equal, disproportionate, or indeterminate interests in one share which is separate and independent from another share in which one or more beneficiaries have an interest. Likewise, the same person may be a beneficiary of more than one separate share.

Reg. § 1.663(c)-3(b) explains how rights to distributions need to be separated:

> Separate share treatment will not be applied to a trust or portion of a trust subject to a power to:
>
> (1) Distribute, apportion, or accumulate income, or
>
> (2) Distribute corpus
>
> to or for one or more beneficiaries within a group or class of beneficiaries, unless payment of income, accumulated income, or corpus of a share of one beneficiary cannot affect the proportionate share of income, accumulated income, or corpus of any shares of the other

same manner as if separate trusts had been created."[2847] If a trust (or estate) has separate and independent shares, that treatment "must prevail in all taxable years of the trust (or estate) unless an event occurs as a result of which the terms of the trust instrument and the requirements of proper administration require different treatment."[2848] This rule applies "even though separate and independent accounts are not maintained and are not required to be maintained for each share on the books of account of the trust (or estate), and even though no physical segregation of assets is made or required."[2849] Special rules apply to specific bequests,[2850] trusts with Code § 645 elections, and elective shares;[2851] also see

---

> beneficiaries, or unless substantially proper adjustment must thereafter be made (under the governing instrument) so that substantially separate and independent shares exist.

Reg. § 1.663(c)-3(d) explains that remote possibilities of distributions outside the separate share's targeted beneficiaries will not ruin separate share treatment:

> Separate share treatment may be given to a trust or portion of a trust otherwise qualifying under this section if the trust or portion of a trust is subject to a power to pay out to a beneficiary of a share (of such trust or portion) an amount of corpus in excess of his proportionate share of the corpus of the trust if the possibility of exercise of the power is remote. For example, if the trust is subject to a power to invade the entire corpus for the health, education, support, or maintenance of A, separate share treatment is applied if exercise of the power requires consideration of A's other income which is so substantial as to make the possibility of exercise of the power remote. If instead it appears that A and B have separate shares in a trust, subject to a power to invade the entire corpus for the comfort, pleasure, desire, or happiness of A, separate share treatment shall not be applied.

However, such remoteness is not permitted for a QSST. See part III.A.3.e.i.(a) QSSTs Generally, fn. 5987.

[2847] Reg. § 1.663(c)-3(a), which explains:

> Thus, if an instrument directs a trustee to divide the testator's residuary estate into separate shares (which under applicable law do not constitute separate trusts) for each of the testator's children and the trustee is given discretion, with respect to each share, to distribute or accumulate income or to distribute principal or accumulated income, or to do both, separate shares will exist under section 663(c). In determining whether separate shares exist, it is immaterial whether the principal and any accumulated income of each share is ultimately distributable to the beneficiary of such share, to his descendants, to his appointees under a general or special power of appointment, or to any other beneficiaries (including a charitable organization) designated to receive his share of the trust and accumulated income upon termination of the beneficiary's interest in the share. Thus, a separate share may exist if the instrument provides that upon the death of the beneficiary of the share, the share will be added to the shares of the other beneficiaries of the trust.

[2848] Reg. § 1.663(c)-1(d).

[2849] Reg. § 1.663(c)-1(c).

[2850] See part II.J.9.a.i Specific Bequests under Code § 663(a). T.D. 8849 (12/28/1999) explained:

> The final regulations provide that bequests described in section 663(a)(1) are not separate shares. The separate share rules are applicable only to determine the distributable net income of each share when applying the distribution provisions of sections 661 and 662 to the trust or estate and its beneficiaries. Bequests described in section 663(a)(1) are not subject to the distribution provisions and therefore are not separate shares.

[2851] Reg. § 1.663(c)-4(a) provides:

> Separate shares include, for example, the income on bequeathed property if the recipient of the specific bequest is entitled to such income and a surviving spouse's elective share that under local law is entitled to income and appreciation or depreciation. Furthermore, a qualified revocable trust for which an election is made under section 645 is always a separate share of the estate and may itself contain two or more separate shares. Conversely, a gift or bequest of a specific sum of money or of property as defined in section 663(a)(1) is not a separate share.

Reg. § 1.663(c)-4(b) provides:

part III.A.3.d Special Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests.

If different beneficiaries have substantially separate and independent shares, their shares are treated as separate trusts for the sole purpose of determining the amount of distributable net income (DNI) allocable to the respective beneficiaries under Code §§ 661 and 662.[2852] Any separate share's DNI is computed as if each share constituted a separate trust or estate:[2853]

- Gross income includible in DNI that is fiduciary accounting income "is allocated among the separate shares in accordance with the amount of income that each share is entitled to under the terms of the governing instrument or applicable local law."[2854]

- Gross income includible in DNI that is income in respect of a decedent under Code § 691(a) and is not fiduciary accounting income "is allocated among the separate shares that could potentially be funded with these amounts irrespective of whether the share is entitled to receive any income under the terms of the governing instrument or applicable local law. The amount of such gross income allocated to each share is based on the relative value of each share that could potentially be funded with such amounts."[2855]

> Notwithstanding the provisions of paragraph (a) of this section, a surviving spouse's elective share that under local law is determined as of the date of the decedent's death and is not entitled to income or any appreciation or depreciation is a separate share. Similarly, notwithstanding the provisions of paragraph (a) of this section, a pecuniary formula bequest that, under the terms of the governing instrument or applicable local law, is not entitled to income or to share in appreciation or depreciation constitutes a separate share if the governing instrument does not provide that it is to be paid or credited in more than three installments.

[2852] Reg. § 1.663(c)-1(a). Rev. Rul. 74-299 (amplified by Rev. Rul. 2007-48) applied Reg. § 1.663(c)-1(a) to a Code § 402(b) nonexempt employees' trust.

Reg. § 1.663(c)-1(b) elaborates on Reg. § 1.663(c)-1(a):

> The separate share rule does not permit the treatment of separate shares as separate trusts (or estates) for any purpose other than the application of distributable net income. It does not, for instance, permit the treatment of separate shares as separate trusts (or estates) for purposes of:
> (1) The filing of returns and payment of tax,
> (2) The deduction of personal exemption under section 642(b), and
> (3) The allowance to beneficiaries succeeding to the trust (or estate) property of excess deductions and unused net operating loss and capital loss carryovers on termination of the trust (or estate) under section 642(h).

[2853] Reg. § 1.663(c)-2(b)(1), which further provides:

> Accordingly, each separate share shall calculate its distributable net income based upon its portion of gross income that is includible in distributable net income and its portion of any applicable deductions or losses.

[2854] Reg. § 1.663(c)-2(b)(2).

[2855] Reg. § 1.663(c)-2(b)(3). Reg. § 1.663(c)-5, Example (9), provides:

> The will of Testator, who dies in 2000, directs the executor to divide the residue of the estate equally between Testator's two children, A and B. The will directs the executor to fund A's share first with the proceeds of Testator's individual retirement account. The date of death value of the estate after the payment of debts, expenses, and estate taxes is $9,000,000. During 2000, the $900,000 balance in Testator's individual retirement account is distributed to the estate. The entire $900,000 is allocated to corpus under applicable local law. This amount is income in respect of a decedent within the meaning of section 691(a). The estate has two separate shares, one for the benefit of A and one for the benefit of B. If any distributions are made to either A or B

- Gross income includible in DNI "that is not attributable to cash received by the estate or trust (for example, original issue discount, a distributive share of partnership tax items, and the pro rata share of an S corporation's tax items) … is allocated among the separate shares in the same proportion as [fiduciary accounting] income from the same source would be allocated under the terms of the governing instrument or applicable local law."[2856]

- "Any deduction or any loss which is applicable solely to one separate share of the trust or estate is not available to any other share of the same trust or estate."[2857] It is unclear whether (a) this merely keeps the deduction within its share to offset its share's income but allows a net loss from a separate share might lower the trust's and therefore the other shares' tax liability, or (b) it completely prevents the loss generated by one share from reducing the amount included in the income of the other shares' beneficiaries.[2858] I believe

---

during the year, then, for purposes of determining the distributable net income for each separate share, the $900,000 of income in respect of a decedent must be allocated to A's share.

The Example is troubling, in that the allocation of the IRA does not have economic effect under the actual facts. However, if the residue is less than $1.8 million, then A gets $900,000 and B gets the balance, which would be less than what A received. The fact that the estate was more than that does not change the possible economic effect, because one never knew how large the IRA or the estate would be.

[2856] Reg. § 1.663(c)-2(b)(4).

[2857] Reg. § 1.663(c)-2(b)(5).

[2858] Although the above allocations govern the allocation of DNI, Code §§ 661 and 662 govern how much income the trust can deduct and consequently include in a beneficiary's income. That amount is the lesser of DNI or the sum of income required to be distributed for a taxable year and any other amounts properly paid or credited or required to be distributed for such taxable year. Code § 661(a). These amounts are allocated to the beneficiaries and included in their income. Code § 662(a).

However, because the only mechanism for a beneficiary to deduct a loss is either depreciation deductions (see part II.J.11.a.ii.(b) Beneficiary's Ability to Deduct Depreciation That Generates Net Loss) or loss on termination (Code § 642(h)), a beneficiary cannot deduct a loss and the trust cannot carry over a loss other than one generated by a business (Code § 642(d)) or a capital loss (Code § 1212). Thus, if a separate share has a net loss, the beneficiary(ies) will not deduct that loss. See part II.J.3.i Planning for Excess Losses.

Consider the following scenario: Trust has $10,000 of taxable interest income, allocated to share A, and $10,000 of state income tax liability, attributable to taxes on the prior year's municipal bond interest earned by share B earned before the bonds were sold at no gain or loss. The trust distributes $10,000 to A and $10,000 to B, each out of her own share. The trust's taxable income, ignoring exemptions, is zero. Applying Reg. § 1.663(c)-2(b)(5) to disallow the state income tax deduction would result in A including $10,000 in income and the trust having a $10,000 loss ($10,000 interest income minus the $20,000 sum of the $10,000 income distribution deduction and the $10,000 state income tax liability). Which is correct: zero taxable income for everyone, or $10,000 taxable income to A and the trust has a $10,000 loss that benefits nobody? In other words, does the trust's overall DNI of zero control, or do A's DNI of $10,000 and B's DNI of negative $10,000 control?

Consider another scenario: share A has $10,000 of dividends and $10,000 of capital gain through a partnership that distributes $20,000 as a distribution of operating income (and not a distribution in partial liquidation), and share B has no dividends and $10,000 of capital loss through a partnership that distributes $20,000 of cash as a distribution of the prior year's operating income. On Form 1041, Schedule D, the capital gain and loss offset. We know that the separate share rule prevents B from reporting any of A's income. However, does the separate share rule tax $20,000 ($10,000 of dividends and $10,000 of capital gain) or $10,000 (dividends only, because capital gains were offset by capital loss) to A? If the former, what mechanism is there for preserving the $10,000 capital loss allocated to B? Nowhere do the Instructions for Schedule D (Form 1041) address this issue; even if one allocated share B's capital loss to the trust instead of to the beneficiaries, neither the tax return nor the Capital Loss Carryover Worksheet in the Instructions provides a mechanism that prevents netting the beneficiaries'

> that the former is the better view,[2859] although when taking that position one might attach IRS Form 8275-R because on its face that position appears to contradict Reg. § 1.663(c)-2(b)(5).[2860] If one or more separate shares benefit from the overall ceiling of tax liability, then the trustee should consider making an equitable adjustment to compensate the share that generated the loss for the benefit that the other share(s) received – especially because that loss is probably reflected in lower tax basis of assets held by the share that generated the loss. If one is doing an interim division of a trust, holding some back in the general residue but opening up a separate account within a trust to represent a separate share for each beneficiary or group of beneficiaries, one might consider raising this issue and clarifying the approach to be taken if one share generates a loss.

A specialized application of the above is in part III.A.3.d.i Various Fiduciary Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests.

In making the above allocations to separate shares, "the fiduciary must use a reasonable and equitable method to make the allocations, calculations, and valuations…."[2861] For example, a principal distribution from one share that is disproportionately larger than a principal distribution from another share should affect the relative allocation of income between those shares.[2862]

---

capital gain against the trust's capital loss in a manner that would generate a capital loss carryover for share B.

2859 Yu, "Deductions in a Proposed Calculation and Allocation of Distributable Net Income to the Separate Shares of a Trust or Estate," 5 Pitt. Tax Rev. 123 (2008) (saved as my document no. 6167169), reviews the two approaches to resolve the issue raised in fn. 2858 and the accompanying text and states that the view I adopted is the better approach. Footnote 93 in Yu's article cited F. Ladson Boyle & Jonathan G. Blattmachr, *Blattmachr on Income Taxation of Estates and Trusts* (15th ed. 2008), as saying on pages 3-104 to 3-105 the following about Reg. § 1.663(c)-2(b)(5):

> Notwithstanding this rule [that any deduction or loss that is applicable solely to one separate share is not available to any other share], when a net loss in one share results in the DNI of an entire trust being less than the potential DNI of a different share (computed as though it was a separate trust), the DNI of the share with net income should not exceed the DNI of the trust. The effect of limiting the DNI of the profitable, second share to the trust's DNI is to give the second share the benefit of the net loss in the first share.

Informal email conversations with Lad and Jonathan in April 2015 confirmed that they had not changed their view on this issue.

Reg. § 1.663(c)-1(a) explains the philosophy of the separate share rules, applying them to an example, and concludes, "In the absence of a separate share rule B would be taxed on income which is accumulated for A. The division of distributable net income into separate shares will limit the tax liability of B." Yu's preferred approach that I adopted does not cause any income to be shifted from one beneficiary to another; it merely limits the estate's deduction consistent with the overall DNI limitation of Code § 661(a).

2860 Such an explanation is saved as my document no. 6149985.

2861 Reg. § 1.663(c)-2(c).

2862 Reg. § 1.663(c)-5, Example (3) provides:

> The facts are the same as in Example 2, except that in 2000 the executor makes the payment to partially fund the children's trust but makes no payment to the surviving spouse. The fiduciary must use a reasonable and equitable method to allocate income and expenses to the trust's share. Therefore, depending on when the distribution is made to the trust, it may no longer be reasonable or equitable to determine the distributable net income for the trust's share by allocating to it 40% of the estate's income and expenses for the year. The computation of the distributable net income for the trust's share should take into consideration that after the partial

However, the amount the trust deducts[2863] and the amount each separate share includes in income[2864] is the lesser of the DNI allocated to[2865] or the amount actually distributed to that separate share.

The charitable deduction may reduce the amount allocable to DNI (and the charity does not receive a K-1);[2866] however, a distribution to a charitable remainder trust (CRT) generates a Code § 661 deduction and K-1 rather than a charitable income tax deduction,[2867] and be sure to use discretion regarding income and deductions to the extent possible (which is not much)[2868] to

---

> distribution the relative size of the trust's separate share is reduced and the relative size of the spouse's separate share is increased.

T.D. 8849 added this example December 27, 1999, presumably superseding the approach taken in Letter Ruling 9644057, which ruling approved disproportionate distributions of principal without changing the distribution of income.

[2863] Code § 661(a).

[2864] Code § 662(a).

[2865] Code § 663(c) allocates DNI and therefore is a factor the determining, rather than the sole determinant of, the amount deducted by the trust or estate and included in the beneficiary's income.

[2866] Code § 663(a)(2) and Reg. § 1.663(a)-2 (reproduced in fn 4943 in part II.Q.7.c.i.(b) Business Income Limiting Trust Income Tax Deduction, as is Notice 2004-35), the former which is incorporated by reference into Reg. § 1.661(a)-1. Additional authority for no K-1 to charity includes Rev. Rul. 2003-123; Rev. Rul. 68-667; *U.S. Trust Company v. Internal Revenue Service*, 803 F.2d 1363 (5th Cir. 1986) (upholding the regulation as valid); *Mott v. United States*, 462 F.2d 512 (Ct. Cl. 1972) (*en banc*), *cert. denied*, 409 U.S. 1108 (1973) (same); *Estate of O'Connor v. Commissioner*, 69 T.C. 165 (1977) (same result) (reviewed); *Pullen v. United States*, 45 A.F.T.R.2d 80-381 (D. Nev. 11/30/1979), *aff'd* No. 80-1034 (8th Cir. 1980) (memo) (same result); CCAs 201651013 (thoroughly reviewing the above authorities and GCMs 33410 (1/10/67) and 33696 (11/29/67), which the CCA said resulted in TAM 6802210560A specifically and Rev. Rul. 68-667 generally, and agreeing with the result) and 201747005 (I believe that the CCAs are greatly flawed on their Code § 642(c) analysis but agree with their analysis of Code § 663(a)(2) and Reg. § 1.663(a)-2). For the charitable fiduciary income tax deduction, see part II.J.4.c Charitable Distributions.

[2867] GCM 39707 (3/14/1988) first ruled that Code § 642(c) does not apply to a distribution to a CRT, citing Reg. §§ 1.664-1(a)(5)(iii) and 1.664- 1(a)(6), Example (5), the latter providing:

> In 1973, H dies testate leaving the net residue of his estate (after payment by the estate of all debts and administration expenses) to a trust which meets the definition of a charitable remainder unitrust. For purposes of section 2055, the trust is deemed created at H's death if the requirement to pay the unitrust amount begins on H's death and is a charitable remainder trust even though the estate is obligated to pay debts and administration expenses.
>
> For purposes of section 664, the trust becomes a charitable remainder trust as soon as it is partially or completely funded. Consequently, unless the trust has unrelated business taxable income, the income of the trust is exempt from all taxes imposed by subtitle A of Code, and any distributions by the trust, even before it is completely funded, are governed by the rules of section 664. Any distributions made by H's estate, including distributions to a recipient in respect of unitrust amounts, are governed by the rules of subchapter J, chapter 1, subtitle A of the Code other than section 664.

The GCM concluded:

> Since we have concluded in our discussion of Issue (1) that no amounts distributed to the charitable remainder trust in this case are considered as set aside for charitable purposes within the meaning of section 642(c)(2) of the Code, the prohibition of Treas. Reg. 1.663(a)-2 on section 661 deductions for amounts paid or set aside for charitable purposes has no application in this case. Thus the estate is entitled to a deduction under section 661 of the Code for its distributions to the trust, up to the amount of the estate's distributable net income.

[2868] Part II.J.8.f.i.(b) Allocating Income Items Among Those Receiving It discusses that special allocations of income are permitted only by specific provisions in the governing instrument that have economic effect.

try to avoid allocating unrelated business income to the CRT.[2869] After separate shares are determined, the charitable deduction reduces the amount of DNI allocated to each separate share.[2870] Furthermore, generally the charitable deduction proportionately reduces the other deductions allocable to each share.[2871]

For the interaction of this part II.J.9.a.ii to the Code § 199A deduction described in part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income, see part II.E.1.f.i.(d) Separate Shares.

If a beneficiary dies, to the extent that this part II.J.9.a.ii does not apply, see part II.J.6 Income Allocation on Death of a Beneficiary.

II.J.9.b. Trust Divisions

See parts II.J.18 Trust Divisions, Mergers, and Commutations; Decanting and II.D.5 Severing Trusts with Multiple Grantors.

II.J.9.c. Multiple Trusts

This part Multiple Trusts includes parts II.J.9.c.i Multiple Trusts Created for Tax Avoidance

II.J.9.c.i. Multiple Trusts Created for Tax Avoidance

For purposes of the fiduciary income tax rules under Code §§ 641-692, under Treasury regulations, two or more trusts are treated as one trust if:[2872]

> (1) such trusts have substantially the same grantor or grantors and substantially the same primary beneficiary or beneficiaries, and
>
> (2) a principal purpose of such trusts is the avoidance of the tax imposed by this chapter.
>
> For purposes of the preceding sentence, a husband and wife shall be treated as 1 person.

Instead, try to allocate deductions to the unrelated business income; see part II.J.8.f.i.(a) Allocating Deductions to Various Income Items.

[2869] See part II.Q.6.c Possible Adverse Consequences When Contributing Partnership Interest to Charitable Remainder Trust, especially the text accompanying fns 4661-4662.

[2870] Reg. § 1.663(c)-5, Example (11) provides:

> The will of Testator, who dies in 2000, provides that after the payment of specific bequests of money, the residue of the estate is to be divided equally among the Testator's three children, A, B, and C. The will also provides that during the period of administration one-half of the income from the residue is to be paid to a designated charitable organization. After the specific bequests of money are paid, the estate initially has three equal separate shares. One share is for the benefit of the charitable organization and A, another share is for the benefit of the charitable organization and B, and the last share is for the benefit of the charitable organization and C. During the period of administration, payments of income to the charitable organization are deductible by the estate to the extent provided in section 642(c) and are not subject to the distribution provisions of sections 661 and 662.

[2871] See part II.J.8.f.i.(a) Allocating Deductions to Various Income Items, especially fn. 2821.

[2872] Code § 643(f).

1984 Committee Reports for HR 98-432, P.L. 98-369, provide:

> For example, the committee expects that the Treasury regulations would treat the trusts in the following example as one trust: A establishes, with the principal purpose for the avoidance of Federal income tax, trust 1 for the benefit of his sister S1, his brother B1, and his brother B2; trust 2 for the benefit of his sister S2, his brother B1, and his brother B2; trust 3 for the benefit of his sister S1, his sister S2, and his brother B1; and trust 4 for the benefit of his sister S1, his sister S2, and his brother B2. Under each trust instrument, the trustee is given discretion to pay any current or accumulated income to any one or more of the beneficiaries.
>
> Where there are substantial independent purposes, and tax purposes are not a principal purpose of the existence of separate trusts, the trusts will not be aggregated. The following is an example where separate trusts will not be aggregated under the committee bill: X establishes two irrevocable trusts for the benefit of X's son and daughter. Son is the income beneficiary of the first trust and the trustee (Bank of P) is required to pay all income currently to son for life. Daughter is the remainder beneficiary. X's daughter is an income beneficiary of the second trust and the trust instrument permits the trustee (Bank of D) to accumulate or to pay income, in its discretion, to daughter for her education, support and maintenance. The trustee also may pay income or corpus to son for his medical expenses. Daughter is the remainder beneficiary and will receive the trust corpus upon son's death.

However, no relevant Treasury regulations existed before 2018, so one wondered whether the provision is effective. Nevertheless, at least one taxpayer was concerned enough to include it in a private letter ruling request that focused on a trust division and received a favorable ruling (which is not surprising, considering that the trusts has different primary beneficiaries).[2873]

Proposed regulations regarding the multiple trust rule were issued in conjunction with proposed regulations interpreting Code § 199A, which has its own multiple trust rule.[2874] The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), explained:

> **VII. Proposed § 1.643(f)-1: Anti-avoidance Rules for Multiple Trusts**
>
> As described in section VI.B of the Explanation of Provisions, under Section 199A, the threshold amount is determined at the trust level without taking into account any distribution deductions. Therefore, taxpayers could circumvent the threshold amount by dividing assets among multiple trusts, each of which would claim its own threshold amount. This result is inappropriate and inconsistent with the purpose of Section 199A and general trust principles.
>
> To address this and other concerns regarding the abusive use of multiple trusts, proposed § 1.643(f)-1 confirms the applicability of section 643(f). As noted in part II of the Background, section 643(f) permits the Secretary to prescribe regulations to prevent taxpayers from establishing multiple non-grantor trusts or contributing additional capital to multiple existing non-grantor trusts in order to avoid Federal income tax. Proposed § 1.643(f)-1 provides that, in the case in which two or more trusts have substantially the

[2873] Letter Ruling 199912034.
[2874] Reg. § 1.199A-6(d)(3)(vii), which is reproduced in part II.E.1.f Trusts/Estates and the Code § 199A Deduction.

> same grantor or grantors and substantially the same primary beneficiary or beneficiaries, and a principal purpose for establishing such trusts or contributing additional cash or other property to such trusts is the avoidance of Federal income tax, then such trusts will be treated as a single trust for Federal income tax purposes. For purposes of applying this rule, spouses are treated as only one person and, accordingly, multiple trusts established for a principal purpose of avoiding Federal income tax may be treated as a single trust even in cases where separate trusts are established or funded independently by each spouse. Proposed § 1.643(f)-1 further provides examples to illustrate specific situations in which multiple trusts will or will not be treated as a single trust under this rule, including a situation where multiple trusts are created with a principal purpose of avoiding the limitations of Section 199A. The application of proposed § 1.643(f)-1, however, is not limited to avoidance of the limitations under Section 199A and proposed §§ 1.199A-1 through 1.199A-6.
>
> The rule in proposed § 1.643(f)-1 would apply to any arrangement involving multiple trusts entered into or modified on or after August 16, 2018. In the case of any arrangement involving multiple trusts entered into or modified before August 16, 2018, the determination of whether an arrangement involving multiple trusts is subject to treatment under section 643(f) will be made on the basis of the statute and the guidance provided regarding that provision in the legislative history of section 643(f). Pending the publication of final regulations, the position of the Treasury Department and the IRS is that the rule in proposed § 1.643(f)-1 generally reflects the intent of Congress regarding the arrangements involving multiple trusts that are appropriately subject to treatment under section 643(f).

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VIII, "Treatment of Multiple Trusts," retreated from this overbroad provision:

> Two commenters requested clarification regarding whether multiple trusts will be aggregated if section 643(f) requirements are met. Specifically, the commenters asked for clarification on what it means to form or fund a trust with a significant purpose of receiving a Section 199A deduction. These commenters state that trusts should not be combined simply because the Section 199A deduction is increased if a legitimate non-tax reason led to the creation of the trusts.
>
> Other commenters objected to the presumption of a tax-avoidance purpose, arguing that it will shift the focus to a requirement that there be a non-tax purpose for creating multiple trusts. The commenters also asked whether the reference to income tax includes state income tax, as the proposed rule refers to the avoidance of more than Federal income tax.
>
> Another commenter agreed with the need for the rule but asked for clarification on the definitions of primary beneficiary, significant tax benefit, principal purpose, and arrangement involving multiple trusts; the application of the substantially the same beneficiary rule; and whether trusts for different children, with other children as default beneficiaries, are the same. Another commenter noted that the use of substantial purpose rather than principal purpose is inconsistent with the statutory language.
>
> Another commenter asked for clarification of the effective date regarding modifications or contributions to pre-effective date trusts, and of the identification of trusts to which the regulation applies. Another commenter requested that final regulations address the

applicability of the rule to the conversion of grantor trusts to non-grantor trusts post enactment of the TCJA.

> One commenter requested that examples be given for each of the three requirements under section 643(f) and requested that § 1.643(f)-1, Example 2, be clarified to describe the trusts as non-grantor trusts.
>
> Based on the comments received, the Treasury Department and the IRS have removed the definition of "principal purpose" and the examples illustrating this rule that had been included in the proposed regulations, and are taking under advisement whether and how these questions should be addressed in future guidance. This includes questions of whether certain terms such as "principal purpose" and "substantially identical grantors and beneficiaries" should be defined or their meaning clarified in regulations or other guidance, along with providing illustrating examples for each of these terms. Nevertheless, the position of the Treasury Department and the IRS remains that the determination of whether an arrangement involving multiple trusts is subject to treatment under section 643(f) may be made on the basis of the statute and the guidance provided regarding that provision in the legislative history of section 643(f), in the case of any arrangement involving multiple trusts entered into or modified before the effective date of these final regulations.

The retreat from the overbroad proposed regulations is encouraging. However, the statute and especially the legislative history create many unanswered questions. And "taking under advisement whether and how these questions should be addressed in future guidance" indicates to me that the Treasury Department and the IRS are not working on providing clarification anytime in the near future.

Reg. § 1.643(f)-1(a), "Treatment of Multiple Trusts," provides:

> (a) *General rule*. For purposes of subchapter J of chapter 1 of subtitle A of Title 26 of the United States Code, two or more trusts will be aggregated and treated as a single trust if such trusts have substantially the same grantor or grantors and substantially the same primary beneficiary or beneficiaries, and if a principal purpose for establishing one or more of such trusts or for contributing additional cash or other property to such trusts is the avoidance of Federal income tax. For purposes of applying this rule, spouses will be treated as one person.
>
> (b) *Effective/ applicability date*. The provisions of this section apply to taxable years ending after August 16, 2018.

The regulation merely mirrors the statute, removing the overreaching language that was in the proposed regulations and leaving uncertain many issues. The statute uses undefined terms, and the Committee Reports introduce uncertainty to how to apply its undefined terms. ACTEC's official comments to the proposed regulations criticized some overreaching terms in the proposed regulations that were removed, but its concern over undefined terms and confusing Committee Reports remains.[2875]

What is the effect of violating the rule? Suppose parents create a separate trust for each of their five children, where each child is the sole beneficiary who may or must receive

[2875] ACTEC comments on proposed regulations under Sections 199A and 643(f) (September 27, 2018).

distributions. Code § 643(f) would not try to combine them. Suppose they create a sixth trust that sprinkles among all five children and that the avoidance of Federal income tax was a principal purpose for establishing the sixth trust. Are all six trusts combined? Are the tax attributes of the sixth trust allocated to the five other trusts? We need better guidance.

Rev. Proc. 2019-3 added section 3.01(85), which continues identically in Rev. Proc. 2020-3, § 3.01(89), among the list of issues on which private letter rulings will not be issued:

> Section 643(f). - Treatment of multiple trusts. - Whether two or more trusts shall be treated as one trust for purposes of subchapter J of chapter 1.

That addition is not surprising, in that Code § 643(f) is based on a taxpayer's motivation, and the IRS ordinarily does not issue rulings in such areas. On the other hand, having "substantially the same primary beneficiary or beneficiaries" is not based on a taxpayer's motivation, and it would be nice to know when trusts are sufficiently different to avoid needing to look into the taxpayer's motivation.

Notwithstanding this prohibition, Letter Ruling 201928004, which was issued 3/21/2019 and released to the public 7/12/2019, provided a favorable Code § 643(f) ruling with respect to a trust that was grandfathered from GST tax. The trust agreement required income to be accumulated for an undisclosed period, then:[2876]

> Upon the conclusion of the x-month period, the trustee divided the principal of the trust into equal shares among the Trustors' living children, including a share to be held for the benefit of Son and his issue ("Trust"). Son has five children, Child 1, Child 2, Child 3, Child 4 and Child 5 (collectively, "Son's Children"). Bank is currently serving as trustee of Trust ("Trustee"). Trust is the subject of this ruling request.
>
> Pursuant to § 3(b)(i) of Trust Agreement, Trustee is to pay so much of the income or principal of Trust to or for the benefit of Son or his issue as Trustee deems advisable for their care, comfort, support and education, or in the case of sickness or other emergency. Upon Son's death, Trust is held in continuing trust for Son's Children until the youngest of Son's Children is age 21, at which point Trust terminates and is distributed to Son's issue, per stirpes. All of Son's Children have reached age 21.
>
> If upon Son's death, Son has no issue living, then distribution will be made to Son's brothers or sisters, per stirpes. Because Son's Children have different investment goals and distribution needs, Trustee proposes to divide Trust into five subtrusts ("Subtrust"; collectively, the "Subtrusts") for the benefit of Son and each of Son's Children and their respective issue ("Proposed Division"). Each Subtrust will be funded with one-fifth of the assets of Trust. The terms of each Subtrust will be identical and unchanged from the terms of Trust Agreement, except that each Subtrust will be held for the benefit of Son and his respective child for whom the Subtrust was created and such child's issue. Any distribution to Son from a Subtrust will be pro rata from each Subtrust.
>
> In accordance with the terms of the Trust Agreement, each Subtrust will terminate on Son's death and remaining Subtrust assets will be distributed to the then living child for whom the Subtrust was created, or, if such child is deceased, to the then living issue of

[2876] The ruling also addressed the lack of income tax consequences on the trust division itself. See text accompanying fn 2956 in part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting.

> the deceased child, per stirpes. If the child dies without living issue, then the Subtrust will be distributed to Son's other living issue, per stirpes.

Letter Ruling 201928004 cited Code § 643(f), then held:[2877]

> Accordingly, based on the facts submitted and representations made, the Proposed Division of Trust will result in each Subtrust having different primary beneficiaries. We conclude that as long as each Subtrust created by the Proposed Division is separately managed and administered, they will be treated as separate trusts for federal income tax purposes.

Code § 643(f) has been the subject of various private letter rulings before 2017 tax reform, when the tax laws did not motivate multiple trusts as strongly as they do after 2017 tax reform. The most recent ruling, Letter Ruling 201722007, held:

> Taxpayer represents that each Successor Trust will have different beneficiaries. Based on the facts submitted and the representations made, we conclude that as long as the Successor Trusts are separately managed and administered, they will be treated as separate trusts for federal income tax purposes.

What an unhelpful ruling! The ruling stated the trusts' terms, so the IRS knew who the beneficiaries would be and did not need a representation that the beneficiaries would be different.

Letter Ruling 201709020 was more helpful. It actually took a position:

> The Article THIRD Trusts will each have different primary beneficiaries. We conclude that as long the Article THIRD Trusts created by the pro-rata transfer of assets from Trust are separately managed and administered, they will be treated as separate trusts for federal income tax purposes.

In the ruling, one trust for the benefit of all of the grantor's descendants was divided into separate trusts for each of the grantor's seven children before the grantor's death instead of after the grantor's death.[2878] Each new trust followed the trust's terms that would have applied after the grantor's death anyway:

[2877] Letter Ruling 202133005, Ruling 3, used similar language.

[2878] The proposed transaction was described as:

> Trust, through its trustee, proposes to create eight separate trusts governed under Article THIRD of the trust agreement for the Family Trust and each of Grantor's seven children and their descendants ("Article THIRD Trusts") and to transfer the Article ONE trust estate, other than the X stock, in equal shares to each of the Article THIRD Trusts. The trustee will allocate a pro rata portion of each and every asset transferred from Trust to the Article THIRD Trusts. Trust will retain the X stock that will continue to be governed by Article ONE of the trust agreement.
> The trustee and beneficiaries filed a petition with Court to: (i) interpret and construe the terms of the trust agreement to provide for the establishment of the Article THIRD Trusts by the trustee pursuant to the powers given under Paragraph 4.1(P) of the trust agreement, (ii) approve the creation of the Article THIRD Trusts for the Family Trust and each of Grantor's seven children and their descendants pursuant the terms of paragraph 4.1(P) of the trust agreement, and (iii) approve the transfer of the Article ONE trust estate other than the X stock in equal shares to the eight Article THIRD Trusts.

> Paragraph 3.1 of Article THIRD of the trust agreement provides that any share or part of a share which is directed to be held in accordance with the terms and conditions of Article THIRD, the trustee shall pay over or apply the net income and principal to such extent and at such time or times as the trustee, in the exercise of absolute discretion, shall determine. Any net income not so paid over or applied shall be accumulated and added to the principal of the trust at least annually and thereafter shall be held, administered and disposed as a part thereof.
>
> Paragraph 3.2 of Article THIRD provides that upon the death of the primary beneficiary, the principal of the trust shall be divided into a sufficient number of equal shares so that there shall be set aside one such share for each child of the deceased primary beneficiary who is then living and one such share for the collective descendants who are then living of any child of the deceased primary beneficiary who is not then living.

Presumably each trust had only one beneficiary to whom distributions could be made during the beneficiary's life.

One resource on Code § 199A pointed to Letter Ruling 200209008. However, it actually did not rule on whether Code § 643(f) applied:

> A primary purpose of establishing Trust A and Trust B is the need to eliminate the dispute that has arisen among the beneficiaries concerning investment strategies. It is represented that avoidance of income tax is not a primary purpose of Trust A and Trust B within the meaning of section 643(f)(2). Determining whether avoidance of income tax is a primary purpose of Trust A and Trust B is a question of fact, the determination of which must be deferred until the federal income returns of the parties involved have been examined by the office having examination jurisdiction over the income tax returns.
>
> Therefore, provided that Trust A and Trust B are separately managed and administered and it is determined that tax avoidance is not a primary purpose of Trust A and Trust B, each will be treated as a separate trust for federal income tax purposes.

That same author also cited Letter Ruling 199923004. However, Field Service Advice 199923004 did not address Code § 643(f); it involved a change in accounting method. The closest ruling in time to that was Letter Ruling 199929021, which was also unhelpful:

> Court granted such petition in a Declaratory Judgment on Date 3.

As to Paragraph 4.1(P):

> Paragraph 4.1(P) of Article FOURTH of the trust agreement gives the trustee the power to: (i) divide any trust created under Article FIRST or Article THIRD of the trust agreement into one or more separate trusts for the benefit of one or more of the beneficiaries of the trust (to the exclusion of the other beneficiaries) so divided, as the trustee, in the exercise of her absolute discretion, shall determine, but in all other respects under the same terms as set forth in Article THIRD; (ii) divide any trust created under Article SECOND hereof into one or more separate trusts for the benefit of the beneficiary but in all respects under the same terms as set forth in Article SECOND hereof; and (iii) to allocate to such divided trust some or all of the assets of the trust estate for any reason including, but not limited to, enabling any such trust or trusts to qualify as an eligible shareholder of an S corporation as described in the Code, or for any other purpose.

Article SECOND provided a QSST whenever S corporation stock was owned. See part III.A.3.e.i.(a) QSSTs Generally.

> A, B, and C represent that the primary purpose of establishing the New Trusts is the need to eliminate the impasse that has arisen among the trustees in choosing the charitable beneficiaries of Trust 1. By dividing Trust 1 into three separate trusts, A, B, and C will act independently of each other, thereby allowing each to act independently of the other in choosing the charitable beneficiaries. They further represent that avoidance of income tax is not a primary purpose of the New Trusts within the meaning of section 643(f)(2). Determining whether avoidance of income tax is a primary purpose of the New Trusts is a question of fact, the determination of which must be deferred until the federal income tax returns of the parties involved have been examined by the office of the District Director having examination jurisdiction over the tax returns. Therefore, provided that each of the Trusts is separately managed and administered and it is not determined that tax avoidance is a primary purpose of the New Trusts, each of the Trusts will be treated as a separate trust for federal income tax purposes.

Similarly, Letter Ruling 200527007 held that dividing a trust into separate trusts for siblings did not trigger Code § 643(f) as long as they are "are separately managed and administered."

I have not reviewed the more than 140 other private rulings that cited Code § 643(f).

II.J.11.a. Depreciation Advantages and Disadvantages

II.J.11.a.i. Code § 179 Disallowance for Estate or Nongrantor Trust

Code § 179 allows businesses to expense depreciable personal property within certain limits, which limits have become much more generous in recent years.[2879] However, a trust cannot deduct this special Code § 179 expense that flows through on its K-1 from a partnership or S corporation.[2880] The business entity does not reduce its basis in, and may depreciate, this depreciable property to the extent that this deduction is disallowed.[2881] Presumably, this complexity would be avoided by using a grantor trust.[2882]

[2879] See Stevens, "Section 179's Special Pass-Through Entity Rules," *Business Entities* (WG&L) (July/August 2010).

[2880] Code § 179(d)(4).

[2881] Reg. § 1.179-1(f)(3). Because the regulation specifically refers to S corporations, presumably this regulation overrides the general rule that all S corporation shareholders are taxed the same; the only way to give effect to this regulation would appear to make a special allocation of depreciation expense (including bonus depreciation – see part II.G.5.b Bonus Depreciation) to the trust or estate. Presumably, an S corporation or partnership would allocate the asset's inside basis, depreciation expense, and other tax attributes to the trust, including not reducing the basis of the trust's interest in the business until depreciation expense is incurred.

[2882] See part III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment, especially fn. 6525, for the proposition that the grantor of a grantor trust is deemed to own directly any asset owned by that trust.

However, don't overlook the possibility of bonus depreciation, which under the 2017 tax reform law allows 100% deduction for most tangible personal property placed in service after September 27, 2017 and before January 1, 2023. See part II.G.5.b Bonus Depreciation.

II.J.11.a.ii. Allocating Depreciation to Beneficiaries (Including Surprising Result Regarding Losses)

II.J.11.a.ii.(a). Separate Reporting of Depreciation Deductions Allocable to Beneficiary

When a depreciation deduction of a trust is allocable to its beneficiaries, and where such deductions if separately taken into account by the trust would result in an income tax liability for the trust different from that which would result if the trust did not take such deductions into account separately, then the partnership's depreciation must be separately reported on the K-1 that the trust receives; a similar rule applies to depreciation allocated between a life tenant and the remaindermen or between an estate and its beneficiaries.[2883]

Code § 642(e) provides:

> An estate or trust shall be allowed the deduction for depreciation and depletion only to the extent not allowable to beneficiaries under sections 167(d) and 611(b).

Code § 167(d) provides:

> In the case of property held by one person for life with remainder to another person, the deduction shall be computed as if the life tenant were the absolute owner of the property and shall be allowed to the life tenant. In the case of property held in trust, the allowable deduction shall be apportioned between the income beneficiaries and the trustee in accordance with the pertinent provisions of the instrument creating the trust, or, in the absence of such provisions, on the basis of the trust income allocable to each. In the case of an estate, the allowable deduction shall be apportioned between the estate and the heirs, legatees, and devisees on the basis of the income of the estate allocable to each.

Code § 167(d) was Code § 167(h) until 1990, when P.L. 101-508, Sec. 11812(a)(1), redesignated it. *Dusek v. Commissioner*, 45 T.C. 355 (1966), *aff'd* 376 F.2d 410 (10th Cir. 1967), explained why Reg. § 1.167(h)-1(b) is valid in allocating depreciation deductions to the trustee when the trustee reserves for depreciation:

[2883] Rev. Rul. 74-71. See 2017 Form 1041, Schedule K-1, line 9, "directly apportioned deductions." Code § 167(d) provides:

> *Life tenants and beneficiaries of trusts and estates*. In the case of property held by one person for life with remainder to another person, the deduction shall be computed as if the life tenant were the absolute owner of the property and shall be allowed to the life tenant. In the case of property held in trust, the allowable deduction shall be apportioned between the income beneficiaries and the trustee in accordance with the pertinent provisions of the instrument creating the trust, or, in the absence of such provisions, on the basis of the trust income allocable to each. In the case of an estate, the allowable deduction shall be apportioned between the estate and the heirs, legatees, and devisees on the basis of the income of the estate allocable to each.

For an elaboration on rules governing estates, see *Estate of Nissen v. Commissioner*, 345 F2d 230 (4th Cir. 1965), *rev'g* 41 T.C. 522 (1964); *Lamkin v. U.S.*, 533 F.2d 303 (5th Cir. 1976).

The above-quoted language of section 167(h) of the 1954 Code appeared for the first time in the Federal income tax statutes, in section 23(k) of the Revenue Act of 1928. And in the Conference Report on the bill for said Act, Congress made abundantly clear its intention as to the meaning which should be attributed to said statute. It said (H. Rept. No. 1882, 70th Cong., 1st Sess., p. 11):

> Amendment No. 30: Under existing law difficulty has been experienced in determining and allowing the deduction for depreciation in cases where property is held by one person for life with remainder to another person; *and the deduction, in the case of property held in trust, is allowable only to the trustee*. The Senate amendment provides that …. In the case of property held in trust, the allowable deduction is to be apportioned between the income beneficiaries and the trustee in accordance with the pertinent provisions of the will, deed, or other instrument creating the trust, or, in the absence of such provisions, on the basis of the trust income which is allocable to the trustee and the beneficiaries, respectively. For example, if the trust instrument provides that the income of the trust computed without regard to depreciation shall be distributed to a named beneficiary, such beneficiary will be entitled to the depreciation allowance to the exclusion of the trustee, *while if the instrument provides that the trustee in determining the distributable income shall first make due allowance for keeping the trust corpus intact by retaining a reasonable amount of the current income for that purpose, the allowable deduction will be granted in full to the trustee*. The bill contains similar provisions as to the deduction for depletion. *The Senate amendment provides for an equitable apportionment of the deduction in these cases; and the House recedes*. [Emphasis supplied.]

Shortly following adoption of the Revenue Act of 1928, Regs. 74 were promulgated; and in article 201 of these regulations there appeared the following statement which reflected views similar to those set forth in the above-quoted congressional report:

> If the [trust] instrument provides that the trustee in determining the distributable income shall first make due allowance for keeping the trust corpus intact by retaining a reasonable amount of the current income for that purpose, *the allowable deduction will be granted in full to the trustee*. [Emphasis supplied.]

This provision has since been carried forward in the various Treasury regulations without substantial change for approximately 36 years; and, as above shown, it also is embodied in substance in the current regulations for the 1954 Code.

In addition, both this Court and others have given recognition to the same principle. See: *John R. Upton*, 32 T.C. 301, 309, affd. 283 F.2d 716 (C.A. 9), certiorari denied 366 U.S. 911; *Newbury v. United States*, 57 F.Supp. 168 (Ct. Cl.), certiorari denied 323 U.S. 802.

Reg. § 1.167(h)-1(b), "Trusts," provides:[2884]

> If property is held in trust, the allowable deduction is to be apportioned between the income beneficiaries and the trustee on the basis of the trust income allocable to each, unless the governing instrument (or local law) requires or permits the trustee to maintain a reserve for depreciation in any amount. In the latter case, the deduction is first allocated to the trustee to the extent that income is set aside for a depreciation reserve, and any part of the deduction in excess of the income set aside for the reserve shall be apportioned between the income beneficiaries and the trustee on the basis of the trust income (in excess of the income set aside for the reserve) allocable to each. For example:
>
> (1) If under the trust instrument or local law the income of a trust computed without regard to depreciation is to be distributed to a named beneficiary, the beneficiary is entitled to the deduction to the exclusion of the trustee.
>
> (2) If under the trust instrument or local law the income of a trust is to be distributed to a named beneficiary, but the trustee is directed to maintain a reserve for depreciation in any amount, the deduction is allowed to the trustee (except to the extent that income set aside for the reserve is less than the allowable deduction). The same result would follow if the trustee sets aside income for a depreciation reserve pursuant to discretionary authority to do so in the governing instrument.
>
> No effect shall be given to any allocation of the depreciation deduction which gives any beneficiary or the trustee a share of such deduction greater than his pro rata share of the trust income, irrespective of any provisions in the trust instrument, except as otherwise provided in this paragraph when the trust instrument or local law requires or permits the trustee to maintain a reserve for depreciation.

Dusek v. Commissioner, 45 T.C. 355 (1966), *aff'd* 376 F.2d 410 (10th Cir. 1967), held:

> Since in the instant case, the trust indenture required the trustee to preserve the trust corpus by establishing a reserve for depreciation, this requirement constituted in effect an allocation of the trust's depreciation deductions to the trustee. The provisions for this requirement are the "pertinent provisions of the instrument" within the meaning of section 167(h) of the 1954 Code. Accordingly, the trustee's attempt to allocate all of such depreciation deductions to the income beneficiary under the broadly worded fiduciary power contained in item (m) of Article V of the indenture, was and is not effective.

In contrast, *Tiefenbrunn v. Commissioner*, 74 T.C. 1566 (1980), held:

> The testator's will requires that a $25,000 reserve be established for "paying any extraordinary expense or capital improvements" prior to the commencement of income distributions to the beneficiaries, and this reserve had been accumulated in full prior to the beginning of the 1967 taxable year. The will does not call for any other reserve, for

[2884] Reg. § 1.167(h)-1(b) is incorporated by reference by Reg. § 1.642(e)-1, the latter of which has not yet amended to reflect changes made by P.L. 101-508, P.L. 97-34, P.L. 94-455. Reg. § 1.167(h)-1(c), "Estates," provides:

> In the case of an estate, the allowable deduction shall be apportioned between the estate and the heirs, legatees, and devisees on the basis of income of the estate which is allocable to each.

depreciation or any other purpose; instead, it mandates the distribution of the "remaining income" after payment of "principal and interest on mortgages, operational expenses, State, City and Federal taxes."

Based upon our examination of the foregoing provisions and the testator's will as a whole, we conclude that the testator did not intend the trust to accumulate any reserve for depreciation or any other purpose beyond those specifically provided in the will. Had he intended the creation of an additional reserve for depreciation, it seems likely that he would have so stated, given the specificity of his directions for the $25,000 reserve for "extraordinary expense or capital improvements." Moreover, since the testator's grandchildren were both the income beneficiaries and remaindermen under the trust, it would not have been unreasonable for the testator not to provide for the establishment of a depreciation reserve by the trust; if the remaindermen wished to accumulate funds to provide for the ultimate replacement of the building owned by the trust, they had discretion to do so because they were receiving the income from the trust. The testator thus might have thought that provision of a reserve for depreciation was best left to the judgment of the beneficiaries.[11]

[11] The record is in confusion as to the trustees' understanding with respect to a depreciation reserve. There is no evidence as to how they kept their books of account in this connection, and their treatment of depreciation in their returns did not follow a consistent pattern. In their 1971 return, they claimed a depreciation deduction of $9,504, the total amount of depreciation allegedly sustained in that year. In 1973 and 1974, allowable depreciation shown on the trust's returns amounted to $40,942. However, the only deduction for depreciation taken by the trust in 1973 was $7,514.11; and in 1974, the trust took no deduction for depreciation. The reasons, if any, for such disparate treatment are unexplained.

Furthermore, even if the testator's will contained no inferences as to his intent with respect to reserves for depreciation and other purposes, it is doubtful that a trustee would be permitted to establish a reserve for depreciation under Connecticut law, at least where the income beneficiaries and remaindermen are the same. The relevant Connecticut statutes provide that trust "income" includes "*All* receipts of money … paid … as rent of realty." (Emphasis added.) Conn. Gen. Stat. Ann. sec. 45-112(1) (West 1960). Although the statutes also provide for the payment of "ordinary expenses incurred in connection with the trust estate" out of income, depreciation is not mentioned as such an expense. Conn. Gen. Stat. Ann. sec. 45-119(1) (West 1960). While statutes in many States now permit trustees to provide an allowance for depreciation in determining trust income,[12] this has not been the practice of most trustees in the absence of statutory provisions,[13] and we think the Connecticut statutes cannot fairly be read to permit such an allowance in the circumstances of this case. We accordingly hold that each individual income beneficiary, and not the trust, is entitled to a deduction for depreciation in respect of the property held by the trust.

[12] See Uniform Principal and Income Act sec. 13 (1962 rev.), which has been adopted in 22 States. See 7A Uniform Laws Ann. 24 (West Supp. 1980).

[13] See 3 A. Scott, *Trusts* sec. 239.4 (3d ed. 1967); C. Dalton, "Buildings Held in Trust," 106 *Trusts & Estates* 1125 (1967); *cf*. *Edgar v. Commissioner*, 56 T.C. 717, 752-753 (1971).

In reaching our conclusion as to this issue, we must emphasize that this is the only issue argued by the parties in respect of the Commissioner's adjustments in the deficiency notices relating to depreciation. However, the deficiency notices are distressingly vague as to the precise effect resolution of this issue will have on petitioners' taxable income. Since the trust is stipulated to be a "simple testamentary trust," any depreciation deducted by the trust serves to reduce petitioners' shares of distributable net income from the trust. If the depreciation deductions are allocated in full to the beneficiaries, their shares of the trust's distributable net income are correspondingly increased, but they themselves will then be entitled to deductions for depreciation (sec. 1.167(h)-1(b), Income Tax Regs.), and those depreciation deductions will offset the increase in their shares of distributable income dollar for dollar. See secs. 651-652, I.R.C. 1954; *Kearney v. United States*, 116 F.Supp. 922, 925 (S.D.N.Y. 1953); M. Knuthe, "Depreciation & Depletion," 114 *Trusts & Estates* 146, 178 (1975). Thus, it would appear that there should not be any deficiency arising from this issue.

The entire matter may well be merely another instance of the familiar tempest in a teapot. However, in view of the confused state of the record in respect of this issue and in view of the fact that the parties have fully briefed and treated the maintenance of a depreciation reserve as the only matter to be decided, we have considered the testator's will and Connecticut law and have concluded that the beneficiaries, and not the trust, are entitled to the entire deduction for depreciation. Unless something has eluded us in this foggy record, the upshot, of course, would appear to be that there should not be any deficiency against petitioners in respect of the depreciation deductions. No issue has been presented to us for decision in respect of any other matter relating to depreciation - *e.g.*, basis, useful life, etc.

The Uniform Principal & Income Act, § 503, "Transfers from Income to Principal for Depreciation," provides:

(a) In this section, "depreciation" means a reduction in value due to wear, tear, decay, corrosion, or gradual obsolescence of a fixed asset having a useful life of more than one year.

(b) A trustee may transfer to principal a reasonable amount of the net cash receipts from a principal asset that is subject to depreciation, but may not transfer any amount for depreciation:

  (1) of that portion of real property used or available for use by a beneficiary as a residence or of tangible personal property held or made available for the personal use or enjoyment of a beneficiary;

  (2) during the administration of a decedent's estate; or

  (3) under this section if the trustee is accounting under Section 403 for the business or activity in which the asset is used.

(c) An amount transferred to principal need not be held as a separate fund.

Official Comments include:

> The power to transfer funds from income to principal that is granted by this section is a discretionary power of administration referred to in Section 103(b), and in exercising the power a trustee must comply with Section 103(b).
>
> One purpose served by transferring cash from income to principal for depreciation is to provide funds to pay the principal of an indebtedness secured by the depreciable property. Section 504(b)(4) permits the trustee to transfer additional cash from income to principal for this purpose to the extent that the amount transferred from income to principal for depreciation is less than the amount of the principal payments.

Official Comments to the Uniform Fiduciary Income & Principal Act (UFIPA) (2018) explain:

> The 2018 Act changes “fixed” to “tangible” in the definition of depreciation in Section 503(a). The references to “a residence” and “tangible personal property” in Section 503(b)(1) are broken up into paragraphs (1) and (2), for ease of reading, and to avoid implying that the two topics are linked so that, for example, the tangible personal property described must be household furnishings. The 2018 Act also adds Section 503(b)(3)(A) to expand the exception from the depreciation rule to assets accounted for separately as liquidating assets under Section 410, as well in a business under Section 403.

Thus, UFIPA subsection (b) provides:

> (b) A fiduciary may transfer to principal a reasonable amount of the net cash receipts from a principal asset that is subject to depreciation, but may not transfer any amount for depreciation:
>
> (1) of the part of real property used or available for use by a beneficiary as a residence;
>
> (2) of tangible personal property held or made available for the personal use or enjoyment of a beneficiary; or
>
> (3) under this section, to the extent the fiduciary accounts:
>
> (A) under Section 410 for the asset; or
>
> (B) under Section 403 for the business or other activity in which the asset is used.

Note that all of the above relate to only depreciable assets held directly by the trustee. Section 401 deals with distributions from an entity; an entity itself is intangible personal property to which § 403 would not apply; however, UFIPA §401(e)(a)(A) does allow the fiduciary to peek behind the curtains, but rarely would it be appropriate to second-guess the entity’s decision regarding reserves to recharacterize a cash distribution as principal intended to serve as a depreciation reserve by owners.

Absent a provision in the trust agreement providing otherwise, depreciation that is allocated to beneficiaries is allocated to them whether they are taxable or charitable beneficiaries.[2885]

If a trust holds mortgaged property and the trustee charges payments of mortgage principal against trust income in determining the amount to be distributed to the trust's beneficiaries, depreciation must be allocated to the trust, by multiplying the total allowable depreciation by a fraction, the numerator of which is the amount of income accumulated and the denominator of which is the total trust income computed under Code § 643(b).[2886]

Note that the apportionment is based on shares of trust accounting income, which is calculated net of deductions.[2887]

Rev. Rul. 74-530 clarifies that the trust calculates deductions and then apportions them [note, however, that Code § 167(h) then is now Code § 167(d)]:

> For purposes of section 167(h) and section 611(b) of the Code the allowable deductions described therein are the depreciation and depletion deductions attributable to properties owned by an estate or a trust. The computation of the allowable deductions is made by the estate or trust in its capacity as a separate taxable person under section 7701.
>
> Accordingly, before apportioning the deduction for depreciation under section 167(h) of the Code and the deduction for depletion under section 611(b), such deductions first must be computed by the estate or trust based on the properties it holds in its capacity as a separate taxable person.
>
> Furthermore, it is possible under section 167(h) and section 611(b) of the Code to allocate depreciation and depletion deductions between an estate and its heirs, legatees, and devisees or between a trust and its beneficiaries in amounts that are greater than their pro rata shares of the income of the estate or income of the trust. This is so because although the depreciation and depletion deductions are apportioned on the basis of the income of the estate or income of the trust allocable to each of the parties (without regard to any depreciation or depletion allocable to them), they are not limited by the amount of such income.

Thus, generally limitations on losses, such as basis and at-risk limitations,[2888] would be applied first at the trust level. However, that does not end the analysis regarding how a beneficiary deducts these directly apportioned deductions; see part II.J.11.a.ii.(b) Beneficiary's Ability to Deduct Depreciation That Generates Net Loss.

For an in-depth discussion of allocating depreciation, see Lawson, "Tax Planning for Rental Real Estate Owned by a Trust," *Estate Planning Journal* (Vol. 40, No. 9, Sept. 2013), and Ransome, "Allocating Partnership Depreciation Between Trusts and Beneficiaries," *The Tax Adviser* (7/1/2007), the latter saved as Thompson Coburn LLP doc. no. 6682178.

[2885] *Lambert Tree Trust Estate v. Commissioner*, 38 T.C. 392 (1962 re tax years 1951-1954), *acq*. 1964-2 C.B. 4, 7.
[2886] Rev. Rul. 90-82.
[2887] See part II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law.
[2888] See part II.G.4 Limitations on Losses and Deductions; Loans Made or Guaranteed by an Owner.

II.J.11.a.ii.(b). Beneficiary's Ability to Deduct Depreciation That Generates Net Loss

Although the depreciation and depletion deductions are apportioned on the basis of the income of the estate or income of the trust allocable to each of the parties (without regard to any depreciation or depletion allocable to them), they are not limited by the amount of such income.[2889]

Therefore, a fiduciary might be able to allocate depreciation and depletion deductions between an estate and its heirs, legatees, and devisees or between a trust and its beneficiaries in amounts that are greater than their pro rata shares of the income of the estate or income of the trust.[2890]

For application of the Code § 469 passive loss rules to depreciation and depletion deductions, see part II.K.2.b.iv Character of Passive Activities Flowing from Nongrantor Trust to a Beneficiary.

II.J.11.a.ii.(c). Trust vs. Separately Recognized Business Entity Holding Depreciable Property

If the trust holds depreciable property through a partnership, the trustee might not be making any decision regarding depreciation reserve, if the trustee is counting on the partnership to make any appropriate reserve.[2891] In that case, presumably the depreciation deduction would be allocated solely to the beneficiaries who do or may receive current distributions. Furthermore, passing the deductions through to any beneficiaries who participate in the business would simplify any passive loss issues (if and to the extent that the passive loss rules do not supersede this part II.J.11.a.ii),[2892] because the rules for determining an individual's participation are more well-defined and easier to apply than determining a trust's participation.[2893]

If a trust holds depreciable property through an S corporation, consider the following:

- If a nongrantor trust is permitted to hold the stock without making an ESBT or a QSST election,[2894] then see the discussion above regarding partnerships.

[2889] Rev. Rul. 74-530, reproduced in part II.J.11.a.ii.(a) Separate Reporting of Depreciation Deductions Allocable to Beneficiary.
[2890] Rev. Rul. 74-530, reproduced in part II.J.11.a.ii.(a) Separate Reporting of Depreciation Deductions Allocable to Beneficiary.
[2891] Query whether the aggregate theory of partnership taxation affects this analysis any.
[2892] See part II.K.2.b.iv Character of Passive Activities Flowing from Nongrantor Trust to a Beneficiary.
[2893] See part II.K.2.b Participation by an Estate or Nongrantor Trust.
[2894] See parts III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation and III.A.3.e QSSTs and ESBTs.

- If and to the extent an ESBT is a nongrantor trust, the depreciation deductions are trapped inside the trust.[2895] (This is a bad result if the trust is included in a person's estate.)[2896]

- If and to the extent the trust is grantor trust deemed owned by the grantor or the beneficiary (the latter including QSSTs), the deemed owner (including the deemed owner of an ESBT)[2897] would be allocated the depreciation deductions, because the grantor trust rules supersede everything.

II.J.11.b. Code § 1244 Treatment Not Available for Trusts

Individuals may deduct as an ordinary a loss incurred on the first $50,000 or $100,000 on the sale of small business corporation stock under Code § 1244.[2898]

Trusts and estates are not entitled to this treatment.[2899]

Note that, for S corporations, trusts can deduct losses as the S corporation incurs them if they have sufficient basis,[2900] so that the S corporation's ordinary losses will provide current annual benefit to the trust, and the trust's basis in the stock would be correspondingly reduced, which reduces the chance of the trust having a capital loss on disposition of the S corporation stock. Therefore, this issue is much more of concern for trusts owning C corporation stock than for trusts owning S corporation stock.

[2895] See part III.A.3.e.ii.(b) ESBT Income Taxation - Overview, which generally traps in a trust all items on an S corporation's K-1. Reg. § 1.641(c)-1 does not expressly discuss the depreciation issue, the only authority being Reg. § 1.641(c)-1(d)(2)(i):

> (i) *In general*. The S portion takes into account the items of income, loss, deduction, or credit that are taken into account by an S corporation shareholder pursuant to section 1366 and the regulations thereunder. Rules otherwise applicable to trusts apply in determining the extent to which any loss, deduction, or credit may be taken into account in determining the taxable income of the S portion. [then discusses ESBT elections for a partial year]

The second sentence tends to suggest applying this part II.J.11.a.ii Allocating Depreciation to Beneficiaries (Including Surprising Result Regarding Losses) would apply to S corporation K-1 items. However, in requiring breaking out separately stated items, Code § 1366(a)(1)(A) cross-references Code § 702(a)(4), (6), but depreciation deductions under this this part II.J.11.a.ii would fall under Code § 702(a)(7) by reason of Reg. § 1.702-1(a)(8)(ii). On the other hand, fiduciary income tax return form instructions refer to items under this part II.J.11.a.ii from a pass-through; by not specifying the type of pass-through, do these instructions suggest that S corporation items would fall under this part II.J.11.a.ii? Ultimately, the issue appears decided in favor of trapping these deductions in the trust by the language at the end of Code § 641(c)(2)(C), "…no item described in this paragraph shall be apportioned to any beneficiary," which per Code § 641(c)(2)(C)(i) includes any item described in Code § 1366.

II.J.12. Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the Trust Accounting Rules

Articles by Dobris (1979)[2901] and Blattmachr (1984)[2902] seem to be the leading authority in this area. In exercising tax elections, trustees may have these duties:[2903]

(1) the duty to minimize the overall tax burden on the estate and its beneficiaries;

(2) the duty of impartiality; and

(3) the duty to abstain from self-dealing.

Harris Trust & Sav. Bank v. MacLean, 542 N.E.2d 943 (1st Dist. Ill. 1989), involved a common situation: Trust recognizes big capital gain and pays federal and state capital gain tax. Both taxes are charged to principal. However, the income beneficiaries benefitted the following year by deducting the state capital gain tax. The court held that the trustee could not reduce the beneficiaries' income account by the tax benefit they received, because a trustee should be able to make an equitable adjustment only for inequities resulting from a trustee's discretionary decisions.[2904] The court viewed the tax benefit from the deduction of state income taxes to be

Earlier the opinion discussed with approval Dobris, "Limits on the Doctrine of Equitable Adjustment in Sophisticated Post-mortem Tax Planning," 66 Iowa L. Rev., 273, 297–8. When administrative expenses are not needed to be deducted on an estate tax return to save estate tax, consider deducting them for income tax purposes. *Matter of Ettinger*, 564 N.Y.S.2d 691 (1990). When fiduciaries have conflicts of interest in exercising tax elections, a court may resolve the issue. *Matter of Estate of Spear*, 553 N.Y.S.2d 985 (1990).

[2904] The court reasoned and held:

> The question of whether a trustee is required to make an equitable adjustment between the trust's income and principal accounts where inequitable consequences result from the mandatory application of tax laws is one of first impression in Illinois. Several courts in other jurisdictions have addressed this issue. Some courts have suggested that an equitable adjustment should only be applied in response to a trustee's election or discretionary decision (*In re Dick's Estate* (1961), 29 Misc.2d 648, 218 N.Y.S.2d 182; *In re Kent's Estate* (1964), 23 Fla. Supp. 133), while one court has approved an adjustment to correct inequities not caused by any discretionary decision of the trustees (*Rice Estate* (1956), 8 Pa. D & C 2d 379) and another has rejected a distinction between discretionary decisions and mandatory applications (*In re Holloway's Estate* (1972), 68 Misc.2d 361, 327 N.Y.S.2d 865).
>
> We believe the better view is that equitable adjustments should be applied only in response to inequities resulting from a trustee's discretionary decisions which favor one beneficiary or class of beneficiaries over another. We agree with the trustees' position that the common law doctrine of equitable adjustments should only be employed in such circumstances because this concept is grounded in the fiduciary duty of a trustee not to be partial in making decisions or elections impacting on successive beneficiaries. (See *In re Warms' Estate* (Surr. Ct. 1955), 140 N.Y.S.2d 169; *In re Bixby's Estate* (1956), 140 Cal.App.2d 326, 295 P.2d 68.) The fiduciary should not be required to cure the inequities resulting from the application of mandatory tax laws; rather, any corrective action is more properly left for the legislature. *In re Dick's Estate*, 29 Misc.2d 648, 218 N.Y.S.2d 182; accord *In re Kent's Estate*, 23 Fla. Supp. 133.

I have been told that a Massachusetts court reached the same result.

very small compared to the sales proceeds that benefitted the principal beneficiaries, even though the benefit was probably hundreds of thousands of dollars. Blattmachr had indicated mixed results on this issue before this case was decided.[2905]

The Uniform Principal & Income Act, which has not been enacted in Illinois,[2906] takes the following approach:[2907]

Section 506. Adjustments Between Principal And Income Because Of Taxes.

(a) A fiduciary may make adjustments between principal and income to offset the shifting of economic interests or tax benefits between income beneficiaries and remainder beneficiaries which arise from:

(1) elections and decisions, other than those described in subsection (b), that the fiduciary makes from time to time regarding tax matters;

(2) an income tax or any other tax that is imposed upon the fiduciary or a beneficiary as a result of a transaction involving or a distribution from the estate or trust; or

(3) the ownership by an estate or trust of an interest in an entity whose taxable income, whether or not distributed, is includable in the taxable income of the estate, trust, or a beneficiary.

(b) If the amount of an estate tax marital deduction or charitable contribution deduction is reduced because a fiduciary deducts an amount paid from principal for income tax purposes instead of deducting it for estate tax purposes, and as a result estate taxes paid from principal are increased and income taxes paid by an estate, trust, or beneficiary are decreased, each estate, trust, or beneficiary that benefits from the decrease in income tax shall reimburse the principal from which the increase in estate tax is paid. The total reimbursement must equal the increase in the estate tax to the extent that the principal used to pay the increase would have qualified for a marital deduction or charitable contribution deduction but for the payment. The proportionate share of the reimbursement for each estate, trust, or beneficiary whose

---

[2905] See fn. 2902, ¶ 1403.3 Corpus Expenses Benefit Income and Not Corpus but Not as a Result of Fiduciary Election, fns. 30-33. A leading case he cited, *In re Holloway's Estate*, 68 Misc.2d 361, 327 N.Y.S.2d 865 (1972), held:

> It is this court's considered opinion, however, that the *Dick* case rationale lacks the requisite equitable approach. As one writer observed: "Sections of the 1954 Code dealing with estate and trusts yield other examples directly contrary to both estate and trust law and common sense. For example, subchapter J, part I, was apparently drawn by tax lawyers not entirely familiar with trust concepts or fiduciary accounting principles. *The fiduciary and the court must be free in such cases to repair the damage by equitable adjustment*" (Browning, Problems of Fiduciary Accounting, 36 N.Y.U.L.Rev. 931, p. 953 [1961]). (Italics supplied.)

[2906] However, 760 ILCS 15/3(b)(2) allows a trustee to reallocate receipts "if the trustee in the trustee's discretion determines that application of the provisions of this Act would result in a substantial inequity to either the income beneficiaries or the remaindermen, in accordance with what is reasonable and equitable in view of the interests of those entitled to income as well as those entitled to principal." The statute enacting the quoted provision was included in 1991 Ill. Legis. Serv. P.A. 87-714 (S.B. 717) (WEST).

[2907] http://www.uniformlaws.org/Act.aspx?title=Principal and Income Amendments (2008).

income taxes are reduced must be the same as its proportionate share of the total decrease in income tax. An estate or trust shall reimburse principal from income.

The official Comments include:

> **Discretionary adjustments**. Section 506(a) permits the fiduciary to make adjustments between income and principal because of tax law provisions. It would permit discretionary adjustments in situations like these: (1) A fiduciary elects to deduct administration expenses that are paid from principal on an income tax return instead of on the estate tax return; (2) a distribution of a principal asset to a trust or other beneficiary causes the taxable income of an estate or trust to be carried out to the distributee and relieves the persons who receive the income of any obligation to pay income tax on the income; or (3) a trustee realizes a capital gain on the sale of a principal asset and pays a large state income tax on the gain, but under applicable federal income tax rules the trustee may not deduct the state income tax payment from the capital gain in calculating the trust's federal capital gain tax, and the income beneficiary receives the benefit of the deduction for state income tax paid on the capital gain. See generally Joel C. Dobris, Limits on the Doctrine of Equitable Adjustment in Sophisticated Postmortem Tax Planning, 66 Iowa L. Rev. 273 (1981).
>
> Section 506(a)(3) applies to a qualified Subchapter S trust (QSST) whose income beneficiary is required to include a pro rata share of the S corporation's taxable income in his return. If the QSST does not receive a cash distribution from the corporation that is large enough to cover the income beneficiary's tax liability, the trustee may distribute additional cash from principal to the income beneficiary. In this case the retention of cash by the corporation benefits the trust principal. This situation could occur if the corporation's taxable income includes capital gain from the sale of a business asset and the sale proceeds are reinvested in the business instead of being distributed to shareholders.

The Uniform Fiduciary Income & Principal Act (2018) ("UFIPA"), which replaces the Uniform Principal & Income Act, renumbered section 506 as follows:

> **Section 507. Adjustment Between Income And Principal Because Of Taxes.**
>
> (a) A fiduciary may make an adjustment between income and principal to offset the shifting of economic interests or tax benefits between current income beneficiaries and successor beneficiaries which arises from:
>
> (1) an election or decision the fiduciary makes regarding a tax matter, other than a decision to claim an income tax deduction to which subsection (b) applies;
>
> (2) an income tax or other tax imposed on the fiduciary or a beneficiary as a result of a transaction involving the fiduciary or a distribution by the fiduciary; or
>
> (3) ownership by the fiduciary of an interest in an entity a part of whose taxable income, whether or not distributed, is includable in the taxable income of the fiduciary or a beneficiary.
>
> (b) If the amount of an estate tax marital or charitable deduction is reduced because a fiduciary deducts an amount paid from principal for income tax purposes instead of

deducting it for estate tax purposes and, as a result, estate taxes paid from principal are increased and income taxes paid by the fiduciary or a beneficiary are decreased, the fiduciary shall charge each beneficiary that benefits from the decrease in income tax to reimburse the principal from which the increase in estate tax is paid. The total reimbursement must equal the increase in the estate tax, to the extent the principal used to pay the increase would have qualified for a marital or charitable deduction but for the payment. The share of the reimbursement for each fiduciary or beneficiary whose income taxes are reduced must be the same as its share of the total decrease in income tax.

(c) A fiduciary that charges a beneficiary under subsection (b) may offset the charge by obtaining payment from the beneficiary, withholding an amount from future distributions to the beneficiary, or adopting another method or combination of methods.

UFIPA's official Comments include:

Mandatory adjustments. The adjustments addressed by Section 507 are derived from the history of "equitable adjustments" largely associated with New York case law. For example, *Matter of Warms*, 140 N.Y.S.2d 169 (1955), involved estate administration expenses chargeable to principal that are allowed as either estate tax deductions or income tax deductions. If the items are claimed as income tax deductions and benefit income, Warms requires income to reimburse principal for any increased estate taxes. The Warms adjustment has been codified in some states, including New York in EPTL § 11-2.1(a).

Subsection (b), which requires reimbursement of principal from income, is derived from New York's EPTL § 11-2.1(a). Unlike the New York statute, however, it limits the mandatory reimbursement to cases in which a marital or charitable deduction is reduced by the payment of additional estate taxes because of the fiduciary's income tax election. It is intended to preserve the result reached in *Estate of Britenstool v. Commissioner*, 46 T.C. 711 (1966), in which the United States Tax Court held that a reimbursement required by the predecessor of EPTL § 11-2.1(a) preserved for the estate the same charitable deduction it would have received if the administration expenses had been deducted for estate tax purposes instead of for income tax purposes. Because a fiduciary will typically elect to deduct administration expenses for income tax purposes only when the income tax reduction exceeds the estate tax reduction, the effect of this adjustment is that principal is placed in the same position it would have occupied if the fiduciary had deducted the expenses for estate tax purposes, but the income beneficiaries still receive the additional benefit of the difference in the benefit of the two deductions. For example, if the income tax benefit from the deduction is $30,000 and the estate tax benefit would have been $20,000, principal will be reimbursed by $20,000 and the net benefit to the income beneficiaries will be $10,000.

Other adjustments. A second occasion for adjustment is a "trapping distribution" – a distribution of principal that carries out income for income tax purposes. *Matter of Holloway*, 68 Misc.2d 361, 327 N.Y.S.2d 865 (1972), held that a trust that made a trapping distribution must reimburse principal for the income taxes resulting from the distribution.

> A third adjustment context arises when a trust's deductible expenses chargeable to principal reduce distributable net income and the taxable income of an income beneficiary, and the trust has taxable gains. Must income reimburse principal for the capital gains taxes that would have been saved if the expenses were used to reduce the gains? A Pennsylvania case, *Rice Estate*, 8 Pa. D&C2d 379 (1956), required an adjustment, but a New York case, *Matter of Dick*, 29 Misc.2d 648, 218 N.Y.S.2d 182 (1961), and a Massachusetts case, *New England Merchants Nat'l Bank v. Converse*, 373 Mass. 639, 369 N.E.2d 982 (1972), rejected an adjustment. A similar New York case, *Matter of Pross*, 90 Misc.2d 895, 396 N.Y.S.2d 309 (1978), required an adjustment from income to principal when a capital gain on a sale of real property resulted from a depreciation deduction that had benefitted the income beneficiary of the trust by reducing distributable net income.
>
> Subsection (a) allows adjustments in cases like these, in the fiduciary's discretion (recognizing that local case law and statutory law, other than this Act, may require the exercise of that discretion under this Act).
>
> **Changes in the 2018 Act**. Section 506(b) of the 1997 Act required that "each estate, trust, or beneficiary that benefits from the decrease in income tax shall reimburse the principal from which the increase in estate tax is paid." The 2018 Act changes this, in Section 507(b), to "the fiduciary shall charge each beneficiary that benefits from the decrease in income tax to reimburse the principal from which the increase in estate tax is paid" and adds subsection (c) to provide the fiduciary with options for accomplishing the "reimbursement" objective. One option in subsection (c) remains "obtaining payment from the beneficiary," but the possibly more practical option of withholding amounts from future distributions is also included.

See also part II.J.8.c.i.(b) Possible Allocation to Income of Gain on Sale of Interest in Partnership or S corporation.

Settlement of an ambiguous provision allocating capital gain tax between income and principal should not carry with it any gift, GST, or income tax consequences (except, of course, to the extent that they modify cash distributions that carry out DNI).[2908] Similarly, when a trust erroneously reported capital gain as taxable to the beneficiary instead of to the trust, reimbursing the beneficiary for tax paid on the capital gain did not have gift, estate, or GST tax consequences.[2909]

[2908] Letter Ruling 201528024, addressing construction of a provision directing the trustee to collect all the income and out of such income pay or provide for "all proper taxes."

[2909] Letter Ruling 201735005, involving a QSST that sold its S corporation stock. For the income tax consequences of such a transaction, see part II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax). In the ruling:

> On or about Date 2, Trustee sold Trust's share of stock in Corporation in a transaction that resulted in capital gain to Trust for federal and state tax purposes. Pursuant to State law, the capital gains should have been allocated to Trust principal and all income taxes due on the capital gains were required to be paid from Trust principal. However, Trustee in connection with Trust's Form 1041, U.S. Fiduciary Income Tax Return, erroneously issued Daughter a K-1, Beneficiary's Share of In-come, Deductions, Credits, Etc., which treated the capital gain as a taxable distribution to Daughter for both federal and state tax purposes. As a result of receiving the K-1 Daughter reported the entire amount of the capital gain on her individual Federal and

When an estate deducted administrative expenses on its income tax return and reimbursed the principal for the income tax saved, the estate was allowed an estate tax deduction for the increased residue passing to charity (even though post-mortem actions normally do not affect the charitable deduction).[2910]

---

state income tax returns which she jointly filed with Spouse. The errors on the Schedules K-1 were in Year 1. Trustee distributed $A to Daughter in Year 2 as a partial reimbursement for the income taxes erroneously paid by Daughter and Spouse. Daughter did not waive the right of recovery with respect to the erroneous payment of income taxes in Year 1.

Trustee prepared a draft of its first accounting as Trustee on Date 3. Upon receipt of the draft accounting, Daughter became aware that she was due an additional reimbursement from Trustee for the income taxes paid by Daughter and Spouse in connection with the sale of S Corporation stock.

On or about Date 4, Trustee filed a Petition for Adjudication with Court seeking judicial approval of its first intermediate accounting (Accounting) from Date 5 to Date 6. On Date 7, Daughter, through her counsel, filed an objection (Objection) to the Accounting alleging that it failed to provide for the additional reimbursement to Daughter from Trust for state income taxes in the amount of $B, together with interest on the unreimbursed taxes at a specified rate, and reimbursement of Daughter's attorney's fees incurred in connection with the Accounting and Objection.

On Date 8, Court entered an order (Order) ruling that the statute of limitations remains open for Daughter to object to any and all matters disclosed in the Accounting; and that the Accounting fails to provide for an additional reimbursement from Trust to Daughter for the unreimbursed taxes, interest and attorney's fees associated with the Accounting and Objection. Trustee intends, in accordance with the Order, to reimburse Daughter for the amount of the unreimbursed taxes, interest, and attorney's fees due for the erroneous payment of income taxes by Daughter and Spouse in Year 1.

The ruling held:

1. The inadvertent payment by Daughter and Spouse of federal, State 1 and State 2 income taxes in connection with taxable income of Trust does not constitute a constructive addition by Daughter and Spouse to Trust under § 26.2601-1(b)(1)(v)(C).
2. The inadvertent payment by Daughter and Spouse of federal, State 1 and State 2 income taxes in connection with taxable income of Trust and the subsequent reimbursement to them of the income taxes paid, together with interest and attorney's fees, does not cause any portion of Trust to become subject to chapter 13.
3. The inadvertent payment by Daughter and Spouse of federal, State 1 and State 2 income taxes in connection with the taxable income of Trust does not constitute a gift to Trust for federal gift tax purposes where Daughter and Spouse have a right of recovery from Trust, they have exercised their rights, and Trustee, in fact, has previously reimbursed Daughter and Spouse a portion of the income taxes, and will further reimburse Daughter and Spouse the balance of income taxes together with, interest and attorney's fees.
4. The inadvertent payment by Daughter and Spouse of federal, State 1 and State 2 income taxes in connection with taxable income of Trust does not cause any portion of Trust to be includible in Daughter's gross estate.

[2910] Rev. Rul. 78-445, reasoning:

In *Estate of Britenstool v. Commissioner*, 46 T.C. 711 (1966), *acq*. and *nonacq.*, page 3, this Bulletin, the decedent bequeathed a remainder interest in the residuary trust to charity. The court, in effect, concluded that a reimbursement paid pursuant to section 11-1.2(A) of the Estates, Powers and Trusts Law (which actually codified the New York case law relied upon by the court) should be included in determining the amount passing to charity for purposes of section 2055(a). The court determined that the purpose of such reimbursement (under section 11-1.2(A)) is to ensure that the amount passing to the residuary legatees in accordance with the decedent's will is not diminished by the additional estate tax payable as a result of the estate's election under

II.J.13. Applying 3.8% Tax to Trusts Owning Businesses Other than S Corporations If the Beneficiary is Active But the Trustee Is Not

A nongrantor trust's NII passes through to beneficiaries as NII.

For a nongrantor trust, the determination of whether business income is passive and therefore constitutes NII is made at the trust level.

If the beneficiary is active but the trustee is not, considering doing the following:

1. The trust contributes its interest in the partnership or sole proprietorship into one or more S corporations.

2. The trust converts into a trust eligible to be subjected to a QSST election.

3. The beneficiary makes a QSST election.

For cautions in applying this strategy, see part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts.

---

section 642(g). To accomplish this, the statute requires a reimbursement, which effectively limits the amount of estate tax charged against the residue to the tax that would have been due had the administration expenses been deducted from the federal gross estate. The reimbursement is not properly characterized as an additional gift to the residuary legatees from the income recipient. Rather, the reimbursement ensures that the residuary legatees receive the amount they are otherwise entitled to receive under the terms of the decedent's will. The Service's acquiescence in Britenstool related to this issue.

Similarly, in the instant case, for purposes of section 2055(a), the value of the charitable deduction should be computed based on a residue of $825x, and not $800x. In accordance with the court's decision in Britenstool, $825x represents the amount passing to the residuary trust from D, under the terms of D's will. The $25x reimbursement, which was paid pursuant to state law, merely ensured that this $825x amount would not be diminished as a result of the executor's section 642(g) election.

Reg. § 20.2055-3(b)(2)-(4) provide:

(2) *Effect of transmission expenses*. For purposes of determining the charitable deduction, the value of the charitable share shall be reduced by the amount of the estate transmission expenses paid from the charitable share.

(3) *Effect of management expenses attributable to the charitable share*. For purposes of determining the charitable deduction, the value of the charitable share shall not be reduced by the amount of the estate management expenses attributable to and paid from the charitable share. Pursuant to section 2056(b)(9), however, the amount of the allowable charitable deduction shall be reduced by the amount of any such management expenses that are deducted under section 2053 on the decedent's federal estate tax return.

(4) Effect of management expenses not attributable to the charitable share. For purposes of determining the charitable deduction, the value of the charitable share shall be reduced by the amount of the estate management expenses paid from the charitable share but attributable to a property interest not included in the charitable share.

II.J.14. Application of 3.8% NII Tax to ESBTs

Electing small business trusts (ESBTs)[2911] are separated into S and non-S portions[2912] and subjected to the NII tax as follows:[2913]

1. The S portion and non-S portion computes each portion's undistributed net investment income as separate trusts[2914] and then combine these amounts to calculate the ESBT's undistributed net investment income.

2. The ESBT calculates the non-S portion's-adjusted gross income,[2915] increased or decreased by the S portion's net income or net loss, after taking into account all the S portion's deductions, carryovers, and loss limitations, as a single item of ordinary income (or ordinary loss).

3. The ESBT will pay tax on the lesser of (a) the ESBT's total undistributed net investment income, or (b) the excess of the ESBT's adjusted gross income[2916] over the dollar amount at which the highest fiduciary income tax bracket begins.

Beyond the 3.8% tax on NII, consider parts II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good, particularly noting the IRS' position on NOLs incurred by an ESBT when the S corporation stock it owns generates losses.[2917]

II.J.15. QSST Issues That Affect the Trust's Treatment Beyond Ordinary K-1 Items

II.J.15.a. QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax)

The preamble to the 2013 proposed regulations for net investment income tax generally explains the regular income tax treatment of sales involving QSSTs when discussing how the proposed regulations would treat the sales for net investment income tax purposes:[2918]

> H. <u>Qualified subchapter S trusts (QSSTs)</u>
>
> The preamble to the 2012 Proposed Regulations requested comments on whether special coordination rules are necessary to address dispositions of stock in an

---

[2911] See part III.A.3.e.ii Electing Small Business Trusts (ESBTs.

[2912] Reg. § 1.1411-3(c)(1) provides:

> The S portion and non-S portion (as defined in § 1.641(c)-1(b)(2) and (3), respectively) of a trust that has made an ESBT election under section 1361(e)(3) and § 1.1361-1(m)(2) are treated as separate trusts for purposes of the computation of undistributed net investment income in the manner described in paragraph (e) of this section, but are treated as a single trust for purposes of determining the amount subject to tax under section 1411. If a grantor or another person is treated as the owner of a portion of the ESBT, the items of income and deduction attributable to the grantor portion (as defined in § 1.641(c)-1(b)(1)) are included in the grantor's calculation of net investment income and are not included in the ESBT's computation of tax described in paragraph (c)(1)(ii) of this section.

[2913] Reg. § 1.1411-3(c)(2). Reg. § 1.1411-3(c)(3) provides an example.

[2914] In the manner described in Reg. § 1.1361-3(e).

[2915] As defined in Reg. § 1.1361-3-(a)(1)(ii)(B)(1).

[2916] As calculated under Reg. § 1.1361-3(c)(2)(ii).

[2917] See part III.A.3.e.ii.(b) ESBT Income Taxation - Overview.

[2918] REG-130843-13.

S corporation held by a QSST. Specifically, the request for comments deals with the application of section 1411(c)(4) to the existing QSST stock disposition mechanics in § 1.1361-1(j)(8).

In general, if an income beneficiary of a trust that meets the QSST requirements under section 1361(d)(3) makes a QSST election, the income beneficiary is treated as the section 678 owner with respect to the S corporation stock held by the trust. Section 1.1361-1(j)(8), however, provides that the trust, rather than the income beneficiary, is treated as the owner of the S corporation stock in determining the income tax consequences of the disposition of the stock by the QSST. Section 1361(d)(1)(C) and the last sentence of § 1.1361-1(j)(8) provide that, solely for purposes of applying sections 465 and 469 to the income beneficiary, a disposition of S corporation stock by a QSST is treated as a disposition by the income beneficiary. However, in this special case, the QSST beneficiary, for chapter 1 purposes, does not have any passive activity gain from the disposition. Therefore, the entire suspended loss (to the extent not allowed by reason of the beneficiary's other passive net income in the disposition year) is a section 469(g)(1) loss, and is considered a loss from a nonpassive activity.

For purposes of section 1411, the inclusion of the operating income or loss of an S corporation in the beneficiary's net investment income is determined in a manner consistent with the treatment of a QSST beneficiary in chapter 1 (as explained in the preceding paragraph), which includes the determination of whether the S corporation is a passive activity of the beneficiary under section 469. However, because gain or loss resulting from the sale of S corporation stock by the QSST will be reported by the QSST and taxed to the trust by reason of § 1.1361-1(j)(8), it is not clear whether the beneficiary's section 469 status with respect to the S corporation is attributed to the trust.

One commentator recommended that the disposition of S corporation stock by a QSST should be treated as a disposition of the stock by the income beneficiary for purposes of determining material participation for purposes of section 1411. In addition, the commentator recommended that the final regulations confirm that the special rule stated in the last sentence of § 1.1361-1(j)(8) applies for purposes of section 1411 as it does for section 469 and 465.

After consideration of the comments, these proposed regulations provide that, in the case of a QSST, the application of section 1411(c)(4) is made at the trust level.

This treatment is consistent with the chapter 1 treatment of the QSST by reason of § 1.1361-1(j)(8). However, these proposed regulations do not provide any special computational rules for QSSTs within the context of section 1411(c)(4) for two reasons.

First, the treatment of the stock sale as passive or nonpassive income is determined under section 469, which involves the issue of whether there is material participation by the trust. As discussed in part 4.F of the preamble to the 2013 Final Regulations, the Treasury Department and the IRS believe that the issue of material participation by estates and trusts, including QSSTs, is more appropriately addressed under section 469.

Additionally, one commentator noted that the IRS has addressed the treatment of certain asset sales as the functional equivalent of stock sales for purposes of § 1.1361-1(j)(8) in a limited number of private letter rulings. In these cases, the private letter rulings held that gain from the sale of assets, which was followed by a liquidation, would be taxed at

> the trust level under § 1.1361-1(j)(8) rather than being taxed at the beneficiary level. The commentator recommended that an asset sale followed by a liquidation, within the context of § 1.1361-1(j)(8), should have a similar result under section 1411(c)(4). Similar to the issue of material participation by QSSTs discussed in the preceding paragraph, the Treasury Department and the IRS believe that the issue of whether an asset sale (deemed or actual) is the equivalent of a stock sale for purpose of the QSST rules should be addressed under the § 1.1361-1(j) QSST regulations, rather than in § 1.1411-7. However, the Treasury Department and the IRS believe that proposed § 1.1411-7(a)(4)(i), which provides that asset sales followed by a liquidation is a disposition of S corporation stock for purposes of section 1411(c)(4), address the commentator's QSST issue.
>
> Second, with respect to the section 1411 treatment of the disposition by the beneficiary by reason of section 1361(d)(1)(C) and the last sentence of § 1.1361-1(j)(8), the Treasury Department and the IRS believe that the general administrative principles enumerated in § 1.1411-1(a), when combined with the general treatment of section 469(g) losses within § 1.1411-4, provide an adequate framework for the treatment of QSSTs beneficiaries without the need for a special computational rule within § 1.1411-7.

Code § 469(g), the rule governing the disposition of a passive activity, is described in part II.K.1.j Complete Disposition of Passive Activity. The idea that the trust is treated as a nongrantor trust starting only at the moment of the sale, how does this instantaneous creation comport with the idea of participating over a particular period of time? I led ACTEC comments discussing this concern: https://www.actec.org/resources/recommendations-for-reg-130843-13.

For more information on the taxation of QSSTs, see parts III.A.3.e.i QSSTs[2919] and III.A.3.e.vi QSST as a Grantor Trust; Sales to QSSTs.

For planning issues relating to the dispositions described in this part II.J.15.a, see part II.J.16 Fiduciary Income Taxation When Selling Interest in a Pass-Through Entity or When the Entity Sells Its Assets.

II.J.15.b. QSSTs and State Income Tax Issues

As a grantor trust with respect to S corporation items, the trust is not subjected to state income tax on those items; instead, the beneficiary is.

A state might even treat the trust as not existing while it is a grantor trust, providing the opportunity to treat the trust as a nonresident trust if the grantor moves to another state (for example, a state with no income tax).[2920] Thus, if a QSST holds only S corporation stock, then

---

[2919] Particularly the text accompanying fns. 5994-5996, dealing with sales of not only S corporation stock but also of an S corporation's business in an asset sale. For additional planning issues, see parts II.G.6 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business and II.J.8.a.i Whether the Capital Gain Is from the Sale or Exchange of a Capital Asset (discussing whether the gain is included in DNI). See also part III.A.3.e.v Converting a Multiple Beneficiary ESBT into One or More QSSTs, especially part III.A.3.e.v.(b) Implementation and, within that, the paragraph that includes a reference to fn. 6096.

[2920] See part II.J.3.e.iii Whether a State Recognizes Grantor Trust Status; Effect of Grantor Trust Status on a Trust's Residence.

the QSST election might allow the trust's residency to be determined at a later, perhaps more favorable date.[2921]

Some trust agreements provide that any S corporation will be held in a separate QSST, leaving the original trust undisturbed as to any provisions that might be consistent with QSST status. This approach would appear to maximize the possibility of the delayed residence determination described above.

Of course, one would also want to consider the other factors mentioned in part II.J.3 Strategic Fiduciary Income Tax Planning rather than focusing exclusively on this issue.

II.J.16. Fiduciary Income Taxation When Selling Interest in a Pass-Through Entity or When the Entity Sells Its Assets

Consider the following:

- The sale of ownership of a business entity is allocated to principal; however, see part II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the Trust Accounting Rules. Assuming the business interest is a capital asset, any capital gain is included in DNI only if certain exceptions are satisfied[2922] and any ordinary income[2923] is automatically included in DNI.[2924]

- A flow-through entity might sell its assets, or a sale of S corporation stock might be taxed to the shareholders as a sale of the entity's assets followed by the corporation liquidating.[2925] Generally, assets used in business activities do not constitute capital assets, so capital gain from their sale is included in DNI without needing to apply the special rules for gain from the sale of a capital asset,[2926] and of course any ordinary income generated by depreciation recapture is included in DNI as well. Goodwill is a capital asset unless it has been subject to any amortization.[2927] Because this gain/income is included in DNI, the allocation of such gains to principal does not cause any particular limits to be placed on shifting them to beneficiaries if they are properly paid, credited, or required to be distributed.[2928] However, if and to the extent that they are not paid or credited during the year or within 65 days

---

[2921] Illinois Schedule K-1-P, which partnerships and S corporations use to report K-1 income includible in their owners' income, has a separate line, line 9b, which was "expanded to allow grantor trusts and other federally disregarded entities to identify the taxpayer that will report the income or loss shown on the Schedule K-1-P…." See Illinois Dept. of Rev. Info. Bulletin, No. FY 2013-09, 01/01/2013. That line was also on 2014 returns.
[2922] See part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI).
[2923] For example, the sale of a partnership interest might generate ordinary income from the sale of "hot assets" – see part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest.
[2924] Code § 643(a).
[2925] See parts II.J.15 QSST Issues That Affect the Trust's Treatment Beyond Ordinary K-1 Items and II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.
[2926] See part II.J.8.a Capital Gain Constitutes DNI Unless Excluded.
[2927] See fns. 4132-4137.
[2928] Code § 661(a)(1), (c).

thereafter[2929] and are not required to distributed, consider whether they can be allocated to income if the trust is a mandatory income trust.[2930]

- State and local income taxes are not deductible in determining alternative minimum tax (AMT).[2931] Often the best way to prevent these items from triggering AMT is to pay them in the year in which the income that generated them is recognized. Given that a state might allow one to use the prior year's income tax as a safe harbor or might not require estimated tax payments at all, one might easily overlook the need to pay state income tax in the year of the sale (or other major income recognition event).

Although items on a K-1 from an S corporation generally are taxed the beneficiary as if the QSST were a grantor trust, gain from sale of the stock and gain from the sale or deemed sale of the corporation's assets (even if reported on a K-1) are taxed to the trust, not as part of the grantor trust portion.[2932] However, if the beneficiary's federal and state/local income taxation (including the 3.8% tax net investment income) are more favorable than the trust's and a distribution form the trust would not frustrate the trust's objectives, consider using the ideas in the bullet points above to shift taxation on any items otherwise taxable to the trust. It is not unusual for an income tax preparer to be unfamiliar with the QSST rules regarding taxation of the sale or deemed sale of the corporation's assets and not to plan for the correct taxation, so be sensitive to this issue up front and also consider reallocating principal to income if the trust is a mandatory income trust.[2933] Although one might initially view the election to tax a stock sale as a sale of the business' assets (followed by liquidation) as merely substituting gain on the sale of assets for gain on the sale of stock, note that state income taxation might also generate surprising results; see part II.H.8.a.ii State Income Tax Disconnect.

For an ESBT, consider allocating administrative expenses and state income taxes to the S portion as much as is reasonable to do.[2934] Allocating administrative expenses to the non-S portion might create a loss that is not deductible unless the trust is terminating,[2935] making an allocation to the S portion even more desirable. In addition to that concern, allocating state

[2929] See part II.J.2 Tactical Planning Shortly After Yearend.
[2930] See parts II.J.8.c.i.(b) Possible Allocation to Income of Gain on Sale of Interest in Partnership or S corporation and II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the .
[2931] Code § 56(b)(1)(A)(ii).
[2932] See part II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax). For more information on the taxation of QSSTs, see parts III.A.3.e.i QSSTs (particularly the text accompanying fns. 5994-5996, dealing with sales of not only S corporation stock but also of an S corporation's business in an asset sale) and III.A.3.e.vi QSST as a Grantor Trust; Sales to QSSTs. If the corporation actually sells its assets without adopting a plan of liquidation, I am unsure of the result.
[2933] See part II.J.8.c.i.(b) Possible Allocation to Income of Gain on Sale of Interest in Partnership or S corporation. In a QSST, one might be able to allocate principal to income to make up for expenses ordinarily allocated to principal that were allocated to income as an adjustment needed due to cash flow issues; see text accompanying fns. 5983-5986 in part III.A.3.e.i.(a) QSSTs Generally. For form language that might facilitate this allocation, see fn. 2765, found in part II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law.
[2934] For ESBT tax issues, see parts II.J.14 Application of 3.8% NII Tax to ESBTs and III.A.3.e.ii.(b) ESBT Income Taxation - Overview, the latter especially including fns. 6050-6051.
[2935] Code § 642(h). See part II.J.3.i Planning for Excess Losses.

income tax to the non-S portion might generate a large alternative minimum tax bill,[2936] which would not be owed if allocated to the S portion and paid in the year of sale.

If the trust is a QSST or if the trust is a grantor trust that would be converted to an ESBT shortly before the sale, consider making the trustee active in the business to maximize opportunities to avoid the 3.8% tax on net investment income and, in the case of a grantor trust, converting it to an ESBT far enough in advance of the sale for the trustee to accumulate sufficient hours of participation. See generally part II.J.17 Planning for Grantor and Nongrantor Trusts Holding Stock in S Corporations in Light of the 3.8% Tax.

If the trustee mistakenly taxes the sale to the beneficiary, reimbursing the beneficiary should not generate any transfer tax consequences.[2937]

II.J.17. Planning for Grantor and Nongrantor Trusts Holding Stock in S Corporations in Light of the 3.8% Tax

This part II.J.17 assumes that avoiding NII characterization is the most important objective. Before making that assumption, see part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good.[2938]

Making income from operations and gain on sale be nonpassive income is the key to avoiding NII characterization:

- Generally, income from a trade or business is exempt from the 3.8% tax if it is nonpassive income.[2939]

- Gain on the sale of assets used in a nonpassive trade or business (or from the part of the sale of a partnership interest or S corporation stock allocable to such assets) is exempt from the 3.8% tax.[2940]

- The taxpayer needs to sufficiently participate in a business to make it nonpassive.[2941]

Consider the following:

- In an ESBT, the trust is the taxpayer.

- In a QSST, for normal operations, the beneficiary, as deemed owner under the grantor trust rules, is the taxpayer.

- In a QSST, when the business is sold, generally the trust will be the taxpayer.[2942]

[2936] Code § 56(b)(1)(A)(ii).
[2937] See part II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the , especially fn. 2909.
[2938] Particularly note the IRS' position on NOLs incurred by an electing small business trust (ESBT) when the S corporation stock it owns generates losses part III.A.3.e.ii.(b) ESBT Income Taxation - Overview.
[2939] See part II.I.8 Application of 3.8% Tax to Business Income.
[2940] See part II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.
[2941] See part II.K.1.a Counting Work as Participation.
[2942] See part II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax).

- In a grantor trust, the deemed owner is the taxpayer, but the deemed owner might turn off the grantor trust powers before selling the business, generally making the trust the taxpayer, whether the trust is an ESBT or a QSST (or the business is taxed as partnership).

Thus, even when a trust is taxable to the grantor or beneficiary under the grantor trust rules, one might consider establishing the trustee's material participation at least a year before the business might be sold;[2943] whether this would count given the trust's being disregarded for income tax purposes has never been addressed, but, with rules regarding trust material participation so uncertain, these extra precautions might be worthwhile if the tax at risk is significant enough. This might require jumping through extra hoops if the entity was formed as a state law corporation, because a traditional corporate structure does not lend itself to the type of participation the IRS seeks.[2944]

For more discussion of QSSTs and ESBTs, see generally part III.A.3.e QSSTs and ESBTs, which compares and contrasts those types of trusts and discusses strategies for switching back and forth.

II.J.18. Trust Divisions, Mergers, and Commutations; Decanting

Although most trust divisions and distributions are not subject to income tax, some changes in a beneficial interest in a trust are. Two separate ideas run through the analysis of this part II.J.18:

- A beneficial interest is itself a capital asset.[2945]

- Distributions that satisfy a beneficiary's rights of something other than what is distributed are taxable events. For example, if a beneficiary has the right to a specific dollar amount (which might be a right to a specific amount of income), distributing property other than cash is considered a sale by the trust of that distributed property.[2946]

Confusion arises when trustee action is not merely a distribution but rather changes a beneficiary's rights.

Trust divisions (part II.J.18.a), mergers (part II.J.18.b), and decanting (part II.J.18.c) may be structured to avoid any income or transfer tax consequences. However, if any beneficial interest is reduced, which is more likely to be the case in a decanting than a straight division or merger (because divisions and mergers generally continue the underlying beneficial interests, and decanting may or may not do so), severe transfer tax consequences may ensue.

If the parties wish to change their beneficial interests without any transfer tax consequences, that change may constitute a commutation (part II.J.18.d), which may generate income tax consequences in that beneficial interests are themselves assets owned by the beneficiaries for income tax purposes, the sale or exchange of which is subjected to income tax.

A nice summary of the above issues is in part II.J.18.e Ed Morrow on Potential Income Tax Disasters for Early Trust Terminations. To me, the income tax question is whether a course of action is more in the nature of a nontaxable continuation of existing beneficial interests – just

[2943] See part II.K.2.b Participation by an Estate or Nongrantor Trust.
[2944] See part II.K.2.b.ii Participation by a Nongrantor Trust: Planning Issues.
[2945] See fn 2976 in part II.J.18.d Trust Commutations.
[2946] See part II.J.8.d Distribution in Kind; Specific Bequests

rearranged somewhat to avoid conflicts in administrative issues resulting from beneficiaries' differing goals or needs – or is a material change in beneficial interests constituting an exchange.

A settlor participating in a trust modification should not implicate Code § 2036 or 2038,[2947] so long as the settlor does not do so often enough to appear to be controlling the trust's terms.

II.J.18.a. Trust Divisions

See part II.D.5 Severing Trusts with Multiple Grantors.

Generally, a partition of jointly owned property is not a sale or other disposition of property when the co-owners of the joint property sever their joint interests.[2948]

Rev. Rul. 69-486 held the following, addressing a trustee making non-pro rata distributions to beneficiaries C and X:[2949]

[2947] See text accompanying fn 7483 in part III.D Code § 2038.

[2948] Rev. Rul. 56-437 provides:

> The conversion, for the purpose of eliminating a survivorship feature, of a joint tenancy in capital stock of a corporation into a tenancy in common is a nontaxable transaction for Federal income tax purposes. Likewise, the severance of a joint tenancy in stock of a corporation, under a partition action instituted under sections 103-1-1 to 10 of Colorado Revised Statutes, 1953, compelling partition and the issuance of two separate stock certificates in the names of each of the joint tenants, is a nontaxable transaction. In each case there was no sale or exchange and the taxpayers neither realized a taxable gain nor sustained a deductible loss. See I.T. 1761, C.B. II-2, 56 (1923), holding that although the transfer of stock from the name of an individual to the name under which the individual does business is subject to tax under the stamp tax law (Schedule A-3, Title XI of the Revenue Act of 1921), it is not a sale within the meaning of the income tax law. See also Rev. Rul. 55-77, C. B. 1955-1, 339, and Rev. Rul. 55-179, C.B. 1955-1, 340.

[2949] Rev. Rul. 69-486 posited the following facts:

> Under terms of the trust instrument, the trustee is required to distribute currently all trust income to B for her life and upon her death distribute one-half of the trust corpus to C, an individual, and one-half to X, a charitable organization exempt from tax under section 501(c)(3) of the Internal Revenue Code of 1954.
>
> B died on July 1, 1967. At the time of her death, the trust had ordinary income of 20x dollars to be reported in its current calendar year period. Subsequent to B's death the trust received no income up to its termination on August 1, 1967. The distributable net income of the trust for 1967 as defined by section 643(a) of the Code was 20x dollars. The trustee properly distributed currently 20x dollars to B's successor in interest.
>
> At the time of B's death, the trust corpus to be distributed to C and X consisted in part of notes that had been purchased by the trust and that had a total adjusted basis of 300x dollars and a total fair market value of an equal amount. The balance of the trust corpus consisted of common stock acquired by purchase with a total adjusted basis of 100x dollars and a total fair market value of 300x dollars.
>
> The trust instrument as well as local law was silent as to the authority of the trustee to make a non-pro rata distribution of property in kind.
>
> By mutual agreement, the two beneficiaries requested that the trustee distribute all of the notes to C and all of the common stock to X. The trustee complied with this request on August 1, 1967.
>
> The first issue to be decided is how the non-pro rata distribution by the trustee to C and X will be treated for Federal income tax purposes.

Since the trustee was not authorized to make a non-pro rata distribution of property in kind but did so as a result of the mutual agreement between C and X, the non-pro rata distribution by the trustee to C and X is equivalent to a distribution to C and X of the notes and common stock pro rata by the trustee, followed by an exchange between C and X of C's pro rata share of common stock for X's pro rata share of notes.

Being aware of this issue and seeking to avoid it, Uniform Trust Code ("UTC") § 816 (promulgated in 2000 and last revised or amended in 2010) provides that "a trustee may":

… (22) on distribution of trust property or the division or termination of a trust, make distributions in divided or undivided interests, allocate particular assets in proportionate or disproportionate shares, value the trust property for those purposes, and adjust for resulting differences in valuation ….

The UTC's official Comments include:

Paragraph (22) authorizes a trustee to make non-pro-rata distributions and allocate particular assets in proportionate or disproportionate shares. This power provides needed flexibility and lessens the risk that a non-pro-rata distribution will be treated as a taxable sale.

Letter Ruling 200527007 held:[2950]

The present case is distinguishable from Rev. Rul. 69-486 because it has been represented that the assets of the two initial trusts will be allocated according to their respective interests evenly among the four intermediary and two resulting, merged trusts. The assets of the original trusts will be divided fractionally and transferred to the intermediary and resulting trusts in accordance with the respective fractional interest of each of the resulting trusts. Each asset may not be transferred strictly pro rata, but the

---

[see text in main body]

The second issue to be decided is the basis of the pro rata share of notes and common stock in the hands of C and X.

Rev. Rul. 69-486 reasoned and concluded:

Inasmuch as the 20x dollars of income required to be distributed currently to the estate of B is equal to the distributable net income of the trust, no amount is includible in the gross income of C and X as a result of the pro rata distribution of notes and common stock by the trustee. See section 662(a) of the Code as implemented by section 1.662(a)-2 of the regulations.

The basis of the pro rata shares of notes and common stock in the hands of C and X is the same as the adjusted basis in the hands of the trust. See section 1.1015-2(b) of the regulations.

Furthermore, C in substance exchanged his pro rata share of common stock with X for X's pro rata share of notes. The amount of recognized gain to C is determined under sections 1001 and 1002 of the Code. Since X is a charitable organization exempt from tax under section 501(c)(3) of the Code, it has no tax consequence as a result of the exchange.

[2950] Letter Ruling 200527007 also held:

In this case, the beneficiaries of the resulting trusts will have the same interests after the proposed division and merger that they had under Trust B-1 and Trust B-2 prior to the division and merger. Because the beneficial interests, rights, and expectancies of the beneficiaries are substantially similar, both before and after the proposed transaction, no transfer of property will be deemed to occur as a result of the division and merger. Accordingly, we conclude that the division of Trusts B-1 and B-2 as proposed, the merger of the resulting trusts and the allocation of assets among the resulting trusts as proposed is not a transfer, direct or indirect, of property that will be subject to the gift tax imposed by § 2501.

assets selected for each trust will be fairly representative of the appreciation, depreciation, and tax bases of the assets available for distribution. Accordingly, the proposed transaction will not be treated as a pro rata distribution followed by an exchange of assets among the beneficiaries of any of the subject trusts.

Cottage Savings Ass'n v. Commissioner, 499 U.S. 554 (1991), concerns the issue of when a sale or exchange has taken place that results in realization of gain or loss under § 1001. In Cottage Savings, a financial institution exchanged its interests in one group of residential mortgage loans for another lender's interests in a different group of residential mortgage loans. The two groups of mortgages were considered "substantially identical" by the agency that regulated the financial institution.

The Supreme Court in *Cottage Savings* concluded that § 1.1001-1 reasonably interprets § 1001(a), and stated than an exchange of property gives rise to a realization event under § 1001 if the properties exchanged are "materially different."

In defining what constitutes a "material difference" for purposes of § 1001(a), the Court stated that properties are "different" in the sense that is "material" so long as their respective possessors enjoy legal entitlements that are different in kind or extent. *Cottage Savings*, at 564-65. In *Cottage Savings*, the Court held that mortgage loans made to different obligors and secured by different homes did embody distinct legal entitlements, and that the taxpayer realized losses when it exchanged interests in the loans.

It is consistent with the Supreme Court's opinion in *Cottage Savings* to find that the interests of the beneficiaries of the four intermediary and two resulting, merged trusts will not differ materially from their interests in the original trusts. The proposed transaction will not change the interests of the beneficiaries. Instead, the beneficiaries will be entitled to the same benefits after the proposed transaction as before. The proposed transaction is similar to the kinds of transactions discussed in Rev. Rul. 56-437, since the original trusts are to be divided, but all other provisions of the trusts will remain substantially identical. Thus, the proposed transaction will not result in a material difference in the kind or extent of the legal entitlements enjoyed by any trust beneficiary.

Based upon the facts submitted and the representations made, and assuming the transaction is effectuated substantially as described, we conclude that the proposed divisions of the assets of the trusts created under the wills of Decedent and Spouse and the subsequent mergers of the resulting trusts will not constitute a distribution under § 661 or § 1.661(a)-2(f) or a sale or other taxable disposition of the assets of any of the trusts under § 1001. Thus, the proposed divisions and mergers will not result in the realization by Trust B-1 and Trust B-2, the four intermediary trusts resulting from the divisions of these trusts, or Trust D and Trust E, or by any beneficiary of any of these described trusts, of any income, gain or loss under §§ 61, 662 or 1001.

Letter Ruling 200552009, involving trust mergers followed by divisions, is discussed in part II.J.18.b Trust Mergers.

In Letter Ruling 200723014, a marital trust divided by retaining closely-held corporate stock and distributing marketable securities and cash to the spun off trust. It held:

The present case is distinguishable from Rev. Rul. 69-486 because the trust instrument allows for non-prorata distributions. Also, the two trusts will have identical terms to those set forth in the Trust Instrument, and the rights of the beneficiaries to trust assets remain unchanged. Accordingly, based on the facts submitted and representations made, we conclude that the proposed division of Marital Trust into Marital Trust A and Marital Trust B on a non-prorata basis will not constitute a distribution under § 661; and the proposed division will not result in the realization by Marital Trust, Marital Trust A, Marital Trust B, or by any beneficiary of any of these trusts, of any income under § 662. In addition, the proposed division of Marital Trust into Marital Trust A and Marital Trust B will not constitute a taxable disposition of trust assets for federal income tax purposes and the trusts and beneficiaries will not realize gain under § 1001 as a result of the division.

Reg. § 1.1001-1(h), "Severances of trusts," which was issued long after Rev. Rul. 69-486 was released, provides:[2951]

(1) *In general*. The severance of a trust (including without limitation a severance that meets the requirements of § 26.2642-6 or of § 26.2654-1(b) of this chapter) is not an exchange of property for other property differing materially either in kind or in extent if -

(i) An applicable state statute or the governing instrument authorizes or directs the trustee to sever the trust; and

(ii) Any non-pro rata funding of the separate trusts resulting from the severance (including non-pro rata funding as described in § 26.2642-6(d)(4) or § 26.2654-1(b)(1)(ii)(C) of this chapter), whether mandatory or in the discretion of the trustee, is authorized by an applicable state statute or the governing instrument.

(2) *Effective/applicability date*. This paragraph (h) applies to severances occurring on or after August 2, 2007. Taxpayers may apply this paragraph (h) to severances occurring on or after August 24, 2004, and before August 2, 2007.

Note that the regulation applies to any severance, not just a qualified severance. Reg. § 26.2642-6(j), Example (3), "Severance based on actuarial value of beneficial interests," recognizes the following as a nonqualified severance:

In 2004, T establishes Trust, an irrevocable trust providing that income is to be paid to T's child C during C's lifetime. Upon C's death, Trust is to terminate and the assets of Trust are to be paid to GC, C's child, if living, or, if GC is not then living, to GC's estate.

[2951] Reg. § 1.1001-1(h) was promulgated as part of project to facilitate severing trusts for GST purposes. T.D. 9348 (8/2/2007) explained:

One commentator noted that § 1.1001-1(h)(1) of the proposed regulations provides favorable income tax treatment only with respect to a qualified severance. The commentator requested that the regulations also address the income tax treatment of all other trust modifications and severances. The commentator noted that the failure to address, for example, the income tax consequences of severances that are not qualified severances for GST tax purposes implies that such severances are taxable events for income tax purposes. In response to these comments, the category of severances to which § 1.1001-1(h)(1) will apply has been broadened. No inference should be drawn with respect to the income tax consequences under section 1001 of any severance that is not described in § 1.1001-1(h)(1).

> T properly elects, under section 2632(c)(5), not to have the automatic allocation rules contained in section 2632(c) apply with respect to T's transfers to Trust, and T does not otherwise allocate GST tax exemption with respect to Trust. Thus, Trust has an inclusion ratio of one. In 2009, the trustee of Trust, pursuant to applicable state law, divides Trust into two separate trusts, Trust 1 for the benefit of C (and on C's death to C's estate), and Trust 2 for the benefit of GC (and on GC's death to GC's estate). The document severing Trust directs that Trust 1 is to be funded with an amount equal to the actuarial value of C's interest in Trust prior to the severance, determined under section 7520 of the Internal Revenue Code. Similarly, Trust 2 is to be funded with an amount equal to the actuarial value of GC's interest in Trust prior to the severance, determined under section 7520. Trust 1 and Trust 2 do not provide for the same succession of interests as provided under the terms of the original trust. Therefore, the severance is not a qualified severance. Furthermore, because the severance results in no non-skip person having an interest in Trust 2, Trust 2 constitutes a skip person under section 2613 and, therefore, the severance results in a taxable termination subject to GST tax.

If a trust is divided so that each trust has the same beneficial interests but different assets and trustees, the division itself will not carry out income from one trust to the other.[2952] If a trust divides but distributes property to satisfy a pecuniary obligation to one of the beneficiaries, the latter distribution is a deemed sale, but the rest of the distribution is nontaxable.[2953] If one trust later distributes to another trust as a conduit to make distributions to the beneficiaries, the distribution will carry out DNI; however, if the distribution is just to shift funds between with the trusts without the shift being related to distributions, the shift does not carry DNI.[2954]

Whether a trust division shifts the grantor does not affect whether the division constitutes a distribution that carries out DNI.[2955]

[2952] Letter Ruling 201642028, which is described in detail in part II.J.18.c.ii Tax Consequences of Decanting. For a similar result for decanting, see part II.J.4.i Modifying Trust to Make More Income Tax Efficient.

[2953] Letter Ruling 201722007 held:

> In accordance with the conclusion that the post-equalization property divisions of Trust 1 and Trust 2 will not result in gain or loss under § 61 or § 1001, we also conclude that, based solely on the facts submitted and representations made, the proposed divisions of the post-equalization property will not result in income, gain or loss to the trusts under § 661, § 662, or § 1.661(a)-2(f). Consistent with Rev. Rul. 82-4, gain will be recognized on funding of Successor Trusts to the extent appreciated assets are used to satisfy the Equalization Distribution in kind.

Rev. Rul. 82-4 is described in fn 2787 in part II.J.8.d.i Distribution in Kind - Generally

[2954] Letter Ruling 201642028, which is described in detail in part II.J.18.c.ii Tax Consequences of Decanting.

[2955] T.D. 8831 (8/6/1999), provides:

> Commenters also questioned a provision in the proposed regulations that treated a distribution from one trust to another trust that is a beneficiary of the first trust as a gratuitous transfer, with the result that the first trust was a grantor of the second trust. Under the temporary regulations, if a trust makes a gratuitous transfer of property to another trust, the grantor of the transferor trust generally is treated as the grantor of the transferee trust. However, if a person with a general power of appointment over the transferor trust exercises that power in favor of another trust, such person is treated as the grantor of the transferee trust, even if the grantor of the transferor trust is treated as the owner of the transferor trust under subpart E of part I, subchapter J, chapter 1 of the Code. (These rules do not affect the determination of whether or not the gratuitous transfer from the transferor trust is a distribution subject to sections 651 or 661.)

Letter Ruling 201928004 held:[2956]

> A partition of jointly owned property is not a sale or other disposition of property where the co-owners of the joint property sever their joint interests, but do not acquire a new or additional interest as a result thereof. Thus, neither gain nor loss is realized on a partition. See Rev. Rul. 56-437, 1956-2 C.B. 507 (conversion of a joint tenancy in stock to a tenancy in common in order to eliminate the survivorship feature and the partition of a joint tenancy in stock are not sales or exchanges).
>
> Similarly, divisions of trusts are also not sales or exchanges of trust interests where each asset is divided pro rata among the new trusts. See Rev. Rul. 69-486, 1969-2 C.B. 159 (pro rata distribution of trust assets not a sale or exchange).
>
> In the present case, the legal entitlements, as well as the rights and powers, of the beneficiaries will remain the same in kind and extent after the Proposed Division of Trust into the Subtrusts. Accordingly, based on the facts submitted and representations made, the Proposed Division of Trust will not result in the realization of gain or loss under § 61 and § 1001.
>
> Moreover, based on the facts submitted and representations made, we conclude that the Proposed Division is not a distribution under § 661 or § 1.661(a)-2(f). We further conclude that the Proposed Division of Trust assets among the Subtrusts will not cause Trust, the Subtrusts, or beneficiaries to recognize any income, gain, or loss under § 662.

Letter Ruling 202133005 included the following facts:

> As Grantors' family has grown in number and has become more diverse, the financial needs and objectives of the Trust 1 beneficiaries have diverged. The current beneficiaries of Trust 1 have agreed that it is in their collective best interest for Trust 1 to be divided into x separate and independent trusts, one for the benefit of each child of Grantors and that child's descendants, prior to the death of Grantor 2 (Early Division). The governing instrument of Trust 1 does not prohibit the Early Division of Trust 1.
>
> On Date 3, the trustees and current beneficiaries of Trust 1, together with other interested parties, entered into an agreement (Settlement Agreement) in which all parties agreed to take all actions necessary to accomplish the Early Division.

The parties then petitioned a court to modify the trust to provide for the Early Division. Also:

> The Partial Judgment will become effective upon entry of a final judgment, and the trustees of Trust 1 represent that Trust 1 will not be divided until Court 2 enters a final judgment. In addition, the trustees represent that Trust 1 currently has an inclusion ratio

---

See parts II.D.3 Trust as Grantor or Deemed Owner of Another Trust and III.B.2.h.i Who Is the Grantor, the latter including fns. 6620-6623.

[2956] For the facts in Letter Ruling 201928004, see text following fn 2876 in part II.J.9.c.i Multiple Trusts Created for Tax Avoidance. The ruling also held:

> Based on the facts submitted and the representations made, we conclude that because § 1001 does not apply to the Proposed Division, under § 1015 the basis of the assets received by Subtrusts will be the same as the respective basis of the assets held by Trust. We further conclude that under § 1223(2) the holding period of the assets received by the Subtrusts will be the same as the holding period of the assets in Trust.

of zero for GST tax purposes, that all previous distributions from Trust 1 have been made on a pro-rata basis to each of the x family lines, and that the assets of Trust 1 are to be allocated to the newly-created trusts on a pro-rata basis. Moreover, the trustees represent that the interests of the beneficiaries of Trust 1 will not be materially altered by the division of Trust 1 into the newly-created trusts, that each newly-created trust will have different primary beneficiaries, and that each newly-created trust will be separately managed and administered.

Letter Ruling 202133005 cited *Cottage Savings*, then ruled:

> Consequently, based on the facts submitted and the representations made, the pro-rata transfer of assets from Trust 1 to the newly-created trusts will not result in a sale or exchange, or other disposition, of any property for purposes of § 1001(a), and thus no gain or loss will be recognized by the beneficiaries or the trusts on the division for purposes of § 61(a)(3) or § 1001(c). We further conclude that the pro-rata transfer of assets from Trust 1 to the newly-created trusts is not a distribution under § 661 or § 1.661(a)-2(f) and therefore not included in the gross income of any newly-created trust beneficiary under § 662. It is consistent with the Supreme Court's opinion in Cottage Savings to find that the interests of the beneficiaries, after a pro-rata distribution, of the newly-created trusts do not materially differ from the interests in Trust 1.

Letter Ruling 202133005 confirmed the natural consequences of no sale or exchange:

> Based on the facts submitted and the representations made, we conclude that because § 1001 does not apply to the pro rata transfer of assets from Trust 1 into the newly-created trusts, under § 1015 the basis of the newly-created trust assets will be the same after pro-rata transfer of assets from Trust 1 as the basis of those assets before the transfer. We further conclude that each asset transferred by Trust 1 to the newly-created trusts will have the same holding period in the hands of the newly-created trusts as it had in Trust 1. Finally, we conclude that on the division of property from Trust 1 to the newly-created trusts, the newly-created trusts will succeed to and take into account, pro-rata, any net operating loss carryforward, net capital loss, and other tax attributes, including passive activity losses, credit carryforwards, and statutory depletion deductions, of Trust 1.

Letter Ruling 202133005 also ruled no change in GST inclusion ratio:

> No guidance has been issued concerning judicial modifications that may affect the status of trusts that are exempt from GST tax because sufficient GST exemption was allocated to the trust to result in an inclusion ratio of zero. At a minimum, a modification that would not affect the GST status of a grandfathered trust should similarly not affect the exempt status of such a trust.
>
> In this case, the division and modifications to sections 4.1, 4.3, and 4.4 are similar to those in Example 5 of § 26.2601-1(b)(4)(i)(E). The Early Division of Trust 1 will result in x newly-created trusts, one for the family line of each child of Grantor 1 and Grantor 2. After the division and modification: (i) section 4.2, which governs distributions during the lifetime of each child and more remote descendant of Grantors, is the same as in the original Trust 1, although limited to a family line; (ii) under section 4.3, each newly-created trust (and trusts created under the terms of each newly-created trust) will terminate no later than Trust 1 terminates under its original terms; and (iii) under

section 4.4, which governs distributions at the death of a child and more remote descendants of Grantors, the distributees of property on termination of each newly-created trust (and trusts created under the terms of each newly-created trust) will be the same as the distributees of property under the original terms of Trust 1. Thus, the Early Division of Trust 1 and pro-rata allocation of Trust 1 assets among the x newly-created trusts will not shift a beneficial interest in Trust 1 to any beneficiary who occupies a lower generation than the person or persons who held the beneficial interest prior to the Early Division. In addition, the Early Division will not extend the time for the vesting of any beneficial interest in the newly-created trusts beyond the period provided for the vesting of that beneficial interest under the original terms of Trust 1.

> The modification to section 7.1 and the addition of section 7.1A resemble those in Example 10 of § 26.2601-1(b)(4)(i)(E). The modification and addition pertain to the administration of Trust 1 and do not shift a beneficial interest in Trust 1 to any beneficiary who occupies a lower generation (as defined in § 2651) than the person or persons who held the beneficial interest prior to the modification and addition. Furthermore, the modification and addition do not extend the time for vesting of any beneficial interest in Trust 1 beyond the period provided for under the original terms of Trust 1.
>
> Accordingly, based on the facts submitted and the representations made, the division of Trust 1 in accordance with Partial Judgment into the x newly-created trusts and the pro-rata allocation of Trust 1 assets will not affect the status of Trust 1 or the newly-created trusts as exempt from the GST tax. Likewise, neither the division nor the pro-rata allocation of assets will cause a distribution from, or termination of any interest in Trust 1 or any of the newly-created trusts to be subject to the GST tax.

II.J.18.b. Trust Mergers

II.J.18.b.i. Authority on Trust Mergers

For trust mergers, followed by divisions, Letter Ruling 200552009 stated:

> We also conclude that because § 1001 does not apply to the proposed division of merged Trust 4, under § 1015, the tax basis that the New Trusts have in the assets of the New Trusts immediately after the division will be the same as the tax basis of the merged Trust 4 in such assets immediately before the division. The tax basis of the historic assets in the New Trusts immediately after the division will be the same as the tax basis that the merged Trust 4 had in those assets immediately before the division. We further conclude that each asset transferred by the merged Trust 4 to the New Trusts will have the same holding period in the hands of the New Trusts immediately after the division that it had in the hands of the merged Trust 4 immediately before the division. Each historic asset of the New Trusts will have the same holding period immediately after the division that it had immediately before the division.
>
> We additionally conclude that in each of the mergers of the Family Trusts into Trust 4, the merged Trust 4 will succeed to and take into account any net operating loss carry forward (NOLCF), net capital loss, and other tax attributes, including passive activity losses and credit carryforwards, of the merging Family Trusts. Each asset transferred by the merging Family Trusts to the merged Trust 4 will have the same tax attributes immediately after the merger that it had immediately before the merger. Each historic asset of the merged Trust 4 will have the same tax attributes immediately after the

> merger that it had immediately before the merger. All NOLCFs, net capital losses, and other tax attributes, including passive activity losses and credit carryforwards, of the merging Family Trusts immediately before the mergers will survive and remain available to the merged Trust 4 after the mergers and no limitation will be imposed as a result of the proposed mergers on the merged Trust 4 's use of such tax attributes.
>
> Finally, we conclude that on the division of the merged Trust 4 into New Trusts, each of the New Trusts will succeed to and take into account c of any net operating loss carry forward (NOLCF), net capital loss, and other tax attributes, including passive activity losses and credit carryforwards, of the divided merged Trust 4. Each asset transferred by the divided merged Trust 4 to the New Trusts will have the same tax attributes immediately after the division that it had immediately before the division. Each historic asset of the New Trusts will have the same tax attributes immediately after the division that it had immediately before the division. All NOLCFs, net capital losses, and other tax attributes, including passive activity losses and credit carryforwards, of the divided merged Trust 4 immediately before the division will survive and remain available to the divided New Trusts after the division and no limitation will be imposed as a result of the proposed division on the New Trusts' use of such tax attributes.

Letter Ruling 200743019 held:

> In this case, State Statute clearly authorizes the consolidation or merger of trusts by the trustees where the merger or consolidation is in the best interests of the beneficiaries. Moreover, the terms of the trust instruments establishing the original trusts authorize the trustees to execute the necessary documents in order to carry out the powers granted the trustees with respect to the transfer of assets from the trusts. By virtue of the trust powers granted to the trustees under the State Statute and the original trust instruments, the trustees of the original trusts are authorized to merge the assets into the new trusts and to transfer trust assets from the original trusts to the new trusts. Consequently, the beneficiaries of the new trusts are acquiring their interests in the new trusts by reason of the exercise of the trustees' existing authority under state law to merge or consolidate the original trusts and to transfer the trust assets in furtherance of this merger. The beneficiaries are not therefore acquiring their interests in the new trusts as a result of the exchange of their interests in the original trusts, or as the result of an exchange of interests between themselves. Accordingly, there does not appear to be any reciprocal exchange involving the legal rights and entitlements of the beneficiaries under the trusts here. Because no "exchange" has occurred for purposes of § 1001, it is unnecessary to analyze whether the "materially different" standard has been satisfied.
>
> We therefore conclude that the proposed mergers of the original trusts into the new trusts, and the transfer of assets from the original trusts to the new trusts, will not cause the original trusts, the new trusts, or any of the income beneficiaries to recognize any gain or loss under § 1001 from a sale or other disposition of property. Because § 1001 does not apply to the division of Trust 1 assets, under § 1015 the basis of the trust assets will be the same after the proposed transaction as the basis of those assets in the original trusts. Furthermore, pursuant to § 1223(2) the holding periods of the assets in the hands of the new trusts will include the holding periods of the assets in the hands of the original trusts.

Letter Ruling 202215015 held that the following trust merger did not change the trusts' GST status:

> In this case, the beneficiaries of each trust are identical and the distribution, dispositive, and trustee power provisions of each trust are substantially similar. The termination provisions of Trust A and Trust B are identical. Under Paragraph 1.07, no trust property shall be construed to remain held in trust beyond the period permitted by applicable State law. The termination provisions of Trust WB would allow the trust to remain in existence in perpetuity. Pursuant to the merger of Trust WB and Trust B into Trust A, Trusts WB and B will terminate and the termination provisions of Trust A will apply to all property transferred from Trust WB and Trust B. Accordingly, the merger will not shift a beneficial interest in the trust to any beneficiary who occupies a lower generation (as defined in § 2651) than the person or persons who held the beneficial interest prior to the modification, and the modification does not extend the time for vesting of any beneficial interest in the trust beyond the period provided for in the original trust.

If a trust merger constitutes a transfer from one taxpayer to another taxpayer, be sure to make a timely ESBT election.[2957]

II.J.18.b.ii. Strategy for Trust Mergers

Merging trusts after the grantor dies may be attractive for administrative simplicity, but one should consider carefully various effects, even though merger itself generally does not generate income or gift tax. If any trust being merged is subject to the rule against perpetuities, then generally the shortest perpetuities period prevails, which may or may not concern the trustee.

In most cases, having multiple trusts maximizes flexibility. I tend to present the possibility and let the client and income tax return preparer run with it from a strategic viewpoint, and sometimes I'll review the projections or counsel the client further on the array of tactics that separate trusts provide.

Separate trusts often allows considering or not considering various resources for distributions for support. For example, if one has 5 trusts, has $100K documented support, and the trusts allow one to consider or ignore other resources, with 5 trusts $500K could be distributed but with only 1 all-in-merged trust only $100K could be distributed. Consider part II.J.3 Strategic Fiduciary Income Tax Planning and various subparts.

Also, generally distributions carry out various elements of income pro rata; see part II.J.8.f.i.(b) Allocating Income Items Among Those Receiving It and its companion, part II.J.8.f.i.(a) Allocating Deductions to Various Income Items. If one trust has one type of income and another has a different type of income, picking one trust for distributions allows one to isolate the type of income being distributed.

In 2023, the run-up in the brackets for each trust is worth $1,855.50 ($14,450*.37 = $5,346.50 minus $3,491) if the trust had only ordinary income.

In 2023, the first $2,900 of a trust's long-term capital gains (if the trust has no other income, which is possible if all income is qualified dividends and long-term capital gains) is free from federal tax, which is a $690 tax savings at 23.8% combined federal capital gain and NII tax.

[2957] See Letter Ruling 201941006, described in the text accompanying fn 6008 in part III.A.3.e.ii.(a) Qualification as an ESBT. See also Letter Rulings 201941003, 201941004, 201941005, and 201941007, which were companion rulings.

If a trust has qualified business income from a partnership or S corporation and 2023 taxable income of a single trust is no more than $182,100, then the full 20% deduction may be available, even if no wages and the business is a specified service trade or business.[2958]

Alternative minimum tax exemptions may also come into play.

A "net operating loss" (NOL) is specifically from a business (generally a partnership or S corporation K-1) and may be carried forward, whereas negative net taxable income not generated by business operations is totally lost if not used; see part II.J.3.i Planning for Excess Losses, but consider the nuances of parts II.J.8.c.iv Netting Capital Losses and II.J.9.a.ii Separate Share Rule. On the other hand, deferring an NOL because it is in a separate trust instead of using it right away can itself be disadvantageous.

If a trust has suspended passive losses, make sure it is the surviving trust, or the carryovers may be lost.[2959]

II.J.18.c. Decanting

II.J.18.c.i. What Is Decanting

Generally, decanting is the trustee distributing assets from one trust to another trust. For over 100 years, it has been a tool to allow a trustee to change a trust's terms in some manner – whether to facilitate administration or to change a beneficial interest.

For what decanting is, see Uniform Trust Decanting Act, found at http://www.uniformlaws.org/Act.aspx?title=Trust Decanting, with the drafting committee's work found at http://www.uniformlaws.org/Committee.aspx?title=Trust%20Decanting; R.S.Mo. § 456.4-419, found at http://www.moga.mo.gov/mostatutes/stathtml/45600404191.html. The Uniform Trust Decanting Act authorizes amending a trust without transferring assets,[2960] a power that makes decanting a QSST much more comfortable, given that a QSST may not distribute principal other than outright to the beneficiary.[2961]

A trustee's authority to make a distribution is in some ways thought of exercising a power of appointment. When a beneficiary exercises a limited power of appointment, generally that exercise relates back to the original trust and includes any of the original trust's not changed by

[2958] See part II.E.1.c.v.(a) Taxable Income "Threshold Amount".
[2959] See part II.K.2.d Effect of Death of an Individual or Termination of Trust on Suspended Passive Losses.
[2960] Uniform Trust Decanting Act § 2(23)(A), authorizes amending a trust without transferring assets. The official Comments state:

> Thus the authorized fiduciary may exercise the decanting power by modifying the first trust, in which case the "second trust" is merely the modified first trust. The decanting instrument can, when appropriate, merely identify the specific provisions in the first trust that are to be modified and set forth the modified provisions, much like an amendment to a revocable trust. If the decanting power is exercised by modifying the terms of the first trust, the trustee could either treat the second trust as a new trust or treat the second trust as a continuation of the first trust. If the second trust is treated as a continuation of the first trust, there should be no need to transfer or retitle the trust property. Further, subject to future tax guidance, if the second trust is a continuation of the first trust, there may be no need to treat the first trust as having terminated for income tax purposes and no need to obtain a new tax identification number.

[2961] See part III.A.3.e.i.(a) QSSTs Generally.

the exercise.[2962] Furthermore, a power of appointment must be a general power for its exercise to change the grantor for income tax purposes.[2963] The exercise of an inter vivos limited power of appointment may have gift tax consequences if the beneficial interest of the person exercising the power is reduced.[2964]

In *Horvitz v. Commissioner*, Tax Court Docker No. 20409-19, the IRS disputed the effectiveness of the decanting when the trust agreement provided for both ascertainable and nonascertainable distribution authority. Here is Judge Gustafson's February 7, 2023 order as it pertains to decanting:

Background

> This case involves a deduction claimed for estate tax purposes by the petitioner, the estate of Lois Horvitz, for its charitable contributions. As we understand the facts (subject to correction by the parties, which we invite), the contributions were made as follows:
>
> I. *Lois's life estate and power of appointment*
>
> Decedent's late husband Harry R. Horvitz executed a revocable living trust, which we refer to as the "HRH Trust Agreement", which was "ratif[ied] and reaffirm[ed]" as late as 1991.[1] The HRH Trust Agreement created four trusts, including two that the parties call the "First QTIP Trusts". Under the terms of the HRH Trust Agreement, each of those QTIP trusts gave to Lois a life estate (Ex. 34 at 14) and a non-general testamentary power to appoint,[2] exercisable by her will, "to and among my [Harry's] issue". Lois's power of appointment as provided in the 1971 Trust Agreement did not authorize her to appoint payments to charity.
>
> > [1] The Trust Agreement was first executed in 1971, so the parties refer to it as the "1971 Agreement" or the "1971 Trust Agreement". However, to avoid possible confusion, we do not title it and it appears that the earliest version in our record is from 1987 (Doc. 34 at 7), and that the latest modification is from 1991 (Doc. 34 at 87). Using the 1987 version and the subsequent modifications, petitioner has created for use in this case "a composite trust instrument of the Harry R. Horvitz Revocable Trust, originally established by Harry R. Horvitz on September 27, 1971, which includes a complete recitation of the terms of the trust as amended through his death." (See Doc. 35 at 3, para. 4, and Exhibit A thereto.) The Commissioner does not dispute petitioner's composite, and it appears that the terms of the various trusts are not in dispute.
> >
> > [2] We understand that Harry's estate made both a QTIP election and a reverse QTIP election, thereby establishing the "LUH QTIP Trust" and the "LUH Reverse QTIP Trust". Consequently, Lois technically had two separate life estates and was also the holder of two separate non-general powers of appointment. Because the parties refer

[2962] Spica, "Conflict of Laws and the Transitivity of the 'Relation Back' of Special Powers of Appointment," 56 *Real Property, Trust and Estate Law Journal* 333 (Fall/Winter 2021).
[2963] See part III.B.2.h.i Who Is the Grantor, especially fn 6620.
[2964] See part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts, especially the text following the text accompanying fn 6354.

to Lois's life estates and powers in the singular as if they were one life estate and one power, however, we also in this order refer to both in the singular.

II. *Trustees' powers*

As to these First QTIP Trusts in particular, Article FIRST B(2)(b) ("Federal Marital Trust") of the HRH Trust Agreement (creating the First QTIP Trusts) gave the Trustee the following power:

> [T]he Trustee may, at any time or from time to time, pay to or apply for the benefit of Lois so much or all of the principal ... as the Trustee, in its sole discretion, deems necessary or desirable for her <u>support, maintenance, health, comfort or general welfare</u>, including, without limitation, for any <u>medical emergency</u>. [Doc. 35 at 10.]

As to all four trusts, Article THIRD B ("Permissible Uses and Applications"; Doc. 35 at 19-20) of the HRH Trust Agreement described the Trustees' powers with language that was similar but that included: (1) "education", (2) an additional parenthetical elaborating on "general welfare", and (3) an authorization to "pay principal to a trust". The powers of the Trustees for all four trusts (including the QTIP trusts) are described as follows:

> Any authorization to the Trustee to pay or apply income or principal of any trust to or for the benefit of any beneficiary shall be deemed an authorization to make payments or applications of income or principal for the support, maintenance, health, <u>education</u>, comfort or general welfare of the beneficiary (including, but not limited to, payments or applications to enable the beneficiary to purchase a residence, invest in a business, make <u>transfers that serve estate or tax planning objectives</u>, or engage in any other activity deemed by the Trustee to be in the <u>best interests of the beneficiary</u>). An authorization to apply principal to or for the benefit of a beneficiary shall include <u>authority to pay principal to a trust</u> for the benefit of that beneficiary.... [Doc. 35 at 19-20.]

When Harry died in 1992, his estate funded the four trusts established under the HRH Trust Agreement, as revised and restated. As we have noted, under each of the two First QTIP Trusts, Lois had a life estate and a power of appointment ("to and among my [Harry's] issue") that did not include charitable organizations as permissible appointees.

III. *Second QTIP Trusts*

In 2013 the trustees of the "First" trusts "decanted" the assets to the "Second QTIP Trusts". The powers of the trustees of the Second QTIP Trusts (see Doc. 34 at 103, 109) were identical to those for the First QTIP Trusts (given in the two blocked quotations in Part II above).

Under the Second QTIP Trusts, Lois had, as under the First, a life estate. But under the Second trusts her power of appointment was not identical to that of the First (i.e., "to and among my [Harry's] issue") but rather was expanded: The Second QTIP Trusts gave her the power to appoint, by her will or similar instrument, the balance "to and among Harry's issue and/or charities that are qualified to receive charitable contributions that are deductible for either federal income or federal estate tax purposes."

IV. *The charitable contributions*

In 2013 Lois exercised her testamentary non-general power and directed that assets be contributed to charitable organizations upon her death. (Doc. 34 at 153-154.)

When Lois died in 2015, that exercise became effective, and the trustees made transfers to the charitable organizations.

On its estate tax return, Lois's estate claimed deductions for the charitable contributions. The IRS disallowed the deductions and issued a notice of deficiency; and the estate filed a petition in the Tax Court.

V. *Tax Court proceedings*

As this case has proceeded, the Commissioner has undertaken discovery of the facts about the decanting. He previously filed a motion (Doc. 23) for leave to take a deposition of the trustee of the QTIP trusts, in which he stated: "At issue in this case is whether the Decanting was permissible under Ohio law. … [The proposed deponent] has the requisite knowledge of and involvement with the Decanting to give testimony and produce documents or electronically stored information that are discoverable within the meaning of Rule 70(b)." We initially observed (see Doc. 25 at 3) that the motion "seems to indicate that the issue about which deposition testimony is sought is legal (i.e., 'whether the Decanting was permissible under Ohio law'). We do not see how testimony on that subject would be proper. It would seem that instead we should examine the documents for their objective import and that subjective testimony about the settlor's intentions would be irrelevant." We therefore denied that motion. (See Doc. 38.)

Petitioner filed a motion (Doc. 32) for partial summary judgment, and the Commissioner filed a motion (Doc. 47) to compel discovery, seeking, first, "all documents respecting the Decanting." Petitioner has produced documents in response to this request, but has withheld certain documents pursuant to claims of irrelevance, attorney-client privilege, and attorney work product. Petitioner produced a "log" giving information about the documents withheld, and asserting that some of the documents accounted for are in fact not responsive to the document request.

In response to the claims of privilege, the Commissioner seeks, second, "the engagement letters evidencing the existence of all claimed attorney-client relationships held by petitioner and the Trustees". That is, he disputes the existence of the attorney-client relationship. He asks us to resolve the objections by viewing in camera the several thousand documents that are in dispute, and the Commissioner expresses no objection to in camera inspection.

Discussion

We are not yet ready to rule on the Commissioner's motion to compel (nor the petitioner's motion for partial summary judgment), and we will benefit from argument by the parties on the following subjects:

VI. *Relevance of documents about the decanting*

A. *Beliefs and legal opinions*

As the parties may have anticipated from our previous orders (Docs. 25, 38), we do not understand the relevance of the documents that show opinion about the effect of the 2013 decanting. As we stated before, it seems that “we should examine the documents [i.e., the 1971 Trust Agreement and its modifications, and the Second QTIP Trusts] for their objective import”. The Commissioner argues that certain circumstances of the decanting show that “the Original Trustees [under the HRH Trust Agreement, i.e., Lois and the children of Lois and Harry] had reason to believe the Modification and Distribution [i.e., the decanting] was not permissible under ‘the trust instrument and applicable law.’” At issue, however, is the actual effect of those documents - not the individuals’ beliefs and legal opinions about the effect of the documents.

The Commissioner is correct in citing Rule 70(b) to assert that “[i]nformation is discoverable if it appears reasonably calculated to lead to discovery of admissible evidence.” (Doc. 47, para. 31.) But even when we consider relevance from this broadened perspective, the discovery still seems misdirected. If under the HRH Trust Agreement and Ohio law the decanting was not permissible, then evidence showing the Trustees’ mistaken belief that it was permissible would not change the outcome; it was simply not permissible. Or if the decanting was permissible, then evidence showing the Trustees’ doubts about its permissibility would not change the outcome; it was simply permissible. We do not see how factual testimony or other documents such as the Commissioner seeks could affect the outcome of this case. Perhaps the Commissioner can show that our tentative conclusion is in error.

B. *Intent other than the settlor’s intent*

Although the Commissioner seeks information about the 2013 decanting, he acknowledges that “the settlor’s intent is relevant to determine whether a trustee has absolute power to distribute principal” (Doc. 55, para. 24). If that is so, then it would appear that, to the extent Harry’s subjective intent is relevant, that intent must be derived from the four corners of the HRH Trust Agreement. Or perhaps, if that document reflects an ambiguity as to which Ohio law might permit parol evidence to be consulted (a legal proposition the parties have not demonstrated), then Harry’s intent would have to be divined from evidence in 1971 to 1991 – but not, it would seem, from documents generated at the time of the decanting in 2013, more than 20 years after his death.

But the Commissioner apparently does not seek documents created during or near the time that the settlor executed the HRH Trust Agreement and its modifications in 1971-1991,[3] nor at any time during his life, but rather “all documents respecting the Decanting” in 2013, i.e., 21 years after the settlor died in 1992. We do not see how this relates to discovering and proving the relevant intent.

[3] The Commissioner quotes Pack v. Osborn, 881 N.E.2d 237, 241 (Ohio 2008), which states: “When determining the settlor’s intent, an inter vivos trust ‘speaks from the date of its creation - not the date upon which the assets are distributed.’ Thus, a trust is construed according to the law in effect at the time it was created.” (Citations omitted).” (Doc. 55, para. 24.) In this case, the trust was first created in 1971, but the settlor

modified, ratified, and affirmed it multiple times through 1991, so we assume arguendo that the settlor's intent over this 20-year period might be relevant.

C. *Lois's intent*

The Commissioner may have made one particular contention about the intention of someone other than Harry that merits particular attention. Not in his motion to compel but in his opposition to the motion for partial summary judgment, the Commissioner asserts (citing and quoting a 2013 email) that there is a factual issue as to "[w]hether the Modification and Distribution was undertaken to facilitate Lois' purported desire to leave additional assets to charity" or instead "was devised to allow Lois' children to retain control over the trust assets." (Doc. 48 at 6.)

It is possible that we misunderstand this contention. There seems to be no dispute that Lois exercised her power of appointment to transfer the trust residues to charities and that, upon her death, the transfers were made, and we do not perceive any contention that Lois lacked competence to exercise the power. Instead, the contention seems to be that a charitable contribution actually made is nonetheless rendered nondeductible if it arose in conjunction with estate-planning motives. Perhaps the Commissioner can clarify this contention and can explain whether discovery is sought on the basis of it.

D. *Deductibility of an improper contribution*

More fundamentally, we do not see how even a demonstrated defect or error in the Trustees' exercise of their powers could be relevant here. For present purposes we assume arguendo (1) that the 2013 decanting was improper because it frustrated Harry's subjective intention, or violated the express terms of the HRH Trust Agreement, or exceeded the trustees' powers under Ohio law, or contradicted the best interests and entitlements of the remote beneficiaries, or all of the above, and (2) that therefore the 2015 charitable contributions should not have been made. Nonetheless, the Commissioner apparently does not dispute that the charitable contributions were made.

As far as our record shows, there was no contest asserted as to the 2013 decanting (accomplished almost 10 years ago) or the 2015 contributions (accomplished almost 8 years ago). Presumably, a disappointed beneficiary whose interest might have been affected by either or both of these acts could have challenged them in the appropriate Ohio court, but as far as we know, none did.[4]

[4] The Commissioner's filings show that Lois and Harry's three children all participated in the decanting for the purpose of facilitating the charitable contributions; and that at least one of those children communicated candidly with his own children (Harry and Lois's grandchildren) about the plan. Neither party has discussed the possibility of a contest, so neither has suggested what the statute of limitations might be for such a contest. Perhaps it is the 2-year period in Ohio Rev. Code § 5810.05 ("Limitations period for action against trustee"). If the Commissioner contends that such a challenge is still possible (or is underway) and that this might affect the allowability of the charitable contribution deduction, then we would benefit from hearing that contention.

We know of no authority for the proposition that, in support of disallowing an estate tax deduction for a charitable contribution, the Commissioner may advance a collateral attack (not made by anyone with standing) against the propriety of the contribution.

Another sort of deduction by an estate - say, for administration expenses - might be disallowed for tax purposes, even if the expense was demonstrably incurred and paid, if the expense was not “allowable by the laws of the jurisdiction”. § 2053. But we know of no such grounds for disallowance of a deduction for a charitable contribution deduction, and we would benefit from further discussion of this issue. The contribution at issue here appears to be plainly described in Section 2055(a)(2). Section 2055(e) does provide for “Disallowance of Deductions in Certain Cases”, but we do not see in that subsection the circumstances of this case.

If impropriety of a contribution is not a ground for disallowing a deduction, then it would seem that discovery undertaken to demonstrate an impropriety would be irrelevant or immaterial. If impropriety is indeed a ground for disallowing a deduction, then we would benefit from learning about this from the parties.

VII. *Privilege claims*

As we have noted, petitioner has withheld certain information from discovery, contending that it is subject to attorney-client privilege and/or attorney work product, and contending that some of the documents in dispute are “nonresponsive” to the requests (so that the information in those documents would be irrelevant). The Commissioner disputes all these contentions. Several thousand documents are at issue. We see two possible resolutions of these disputes:

First, if we persist in our tentative conclusions suggested above in Parts VI.A-D above, then presumably none of the remaining discovery would be proper and we should deny the motion to compel. If the Commissioner disputes that hypothesis (that is, if he argues for relevance even if I.A-D are confirmed), then we will benefit from his explanation of the remaining relevance.

Second, if we conclude that discovery should continue, the daunting prospect of in camera inspection of thousands of documents inclines us to attempt to resolve or narrow the dispute by the parties’ use of a “quick peek” procedure. The procedure is designed and intended to minimize the costs and delays associated with reviewing large volumes of documents that are, or might be, subject to disputed claims of privilege. Such procedure is facilitated by Federal Rule of Evidence 502(d) which provides:

> (d) <u>Controlling Effect of a Court Order</u>. A federal court may order that the privilege or protection is not waived by disclosure connected with the litigation pending before the court - in which event the disclosure is also not a waiver in any other federal or state proceeding.

This procedure might enable the Commissioner to discern many documents that are in fact of little interest to him, and the parties could then focus on the smaller number of documents that really matter. If the parties are unable to come to full agreement, then the remaining documents for the Court to consider would be a more manageable number.

The parties should consult with each other to attempt to agree on terms that they would jointly recommend to the Court. A sample of such an order can be seen online in *Guidant LLC v. Commissioner*, No. 5989-11 (Order, May 24, 2016).

VII. *Summary judgment merits arguments*

In his reply as to his motion to compel, the Commissioner argues (see Doc. 55, ¶ 23) that "Petitioner would have the court ignore the totality of the transaction." This argument concludes with petitioner's assertion (¶ 41) that "respondent's discovery bears upon material factual issues in this case". It appears, however, that these arguments pertain to the merits of petitioner's motion for summary judgment as much as (or perhaps more than) they pertain to the motion to compel. The parties disagree about whether the HRH Trust Agreement confers on the QTIP trustees a power that is subject to an ascertainable standard, as the Commissioner contends, or that instead is non-ascertainable (or "absolute"), as petitioner contends. The Commissioner seemed to reserve to his reply in support of his motion to compel his most pointed discussion on the point.

A. *Ascertainable standard*

As we understand the parties' disagreement, petitioner cites Ohio Rev. Code § 5801.01(B), which defines "ascertainable standard" as "a standard relating to an individual's health, education, support, or maintenance within the meaning of section 2041(b)(1)(A) or 2514(c)(1) of the Internal Revenue Code." Petitioner considers it significant the powers given to the QTIP trustees in the HRH Trust Agreement go beyond this list of four permissible expenditures and argues that, in so doing, the HRH Trust Agreement confers a power that exceeds the "ascertainable standard" and is therefore non-ascertainable.

The Commissioner rejoins (see Doc. 55, ¶¶ 28-31) with the position (as we understand it) that, at the time Harry was creating (and revising) the HRH Trust Agreement, a different statute was in effect: Ohio Rev Code § 1340.22(B)(2) defined (until 2007) a standard that was somewhat broader but was still an "ascertainable standard":

> Any power conferred upon a fiduciary that permits the fiduciary to make discretionary distributions of either principal or income and that is expressed in terms of a beneficiary's health, education, support, comfort, care, comfort and support, support in reasonable comfort, support in accustomed manner of living, maintenance, maintenance in health and reasonable comfort, or any combination of those factors, is a power conferred upon the fiduciary, the exercise of which is reasonably measurable in terms of, and limited by, an ascertainable standard related to the health, education, support, and maintenance of the beneficiary.

That is, if a trust confers power in addition to the conventional "HEMS" standard (health education, maintenance, or support), then under the law as it existed when Harry executed the HRH Trust Agreement, the power may nonetheless remain an "ascertainable standard" even if it adds "comfort", as the HRH Trust Agreement did.

However, "comfort" is not the only difficulty with the Commissioner's position. As we point out in Part II above, the HRH Trust Agreement conferred on the Trustee of the First QTIP Trusts not only the conventional HEMS standard plus "comfort" but also the power to make payments for "general welfare" and "payments or applications to enable the beneficiary to purchase a residence, invest in a business, make transfers that serve estate or tax planning objectives, or engage in any other activity deemed by the Trustee to be in the best interests of the beneficiary)." The addition of "general welfare" as broadly defined to include a catch-all of “best interests” seems to go well beyond the (now repealed) Ohio Rev. Code § 1340.22(B)(2).

The Commissioner also cites case law, but by his description, Finlay v. United States, 752 F.2d 246 (6th Cir. 1985), involved a surviving spouse who, because she was the sole trustee, was deemed under State law to be “limited to her support and maintenance” despite an ostensibly broader standard in the instrument. Likewise, he describes Toledo Trust Co. v. United States, unreported Case No. 86-7160 (N.D. Ohio, 1987), as following Finlay where the surviving spouse was not herself the sole trustee but had “the power to remove and replace the trustee,” which seems to be broadly equivalent to being the trustee. He also cites “see also” cases to the same effect. In each of these cases the court seems to impose an “ascertainable standard” limitation not otherwise present where the court concludes that the situation of the surviving spouse makes her, in effect, both a beneficiary and a trustee. Lois was not in that situation. We do not see, in the Commissioner’s filings, citations to statutory or case law authority that would treat as “ascertainable” the broad grants of authority in the HRH Trust Agreement for the Trustee of the First QTIP Trusts, but we invite the Commissioner’s correction or supplementation.

B. *Plural beneficiaries*

The Commissioner argues (Doc. 55, ¶ 26) that the power of the trustees of the First QTIP Trusts is constrained (not absolute) because the HRH Trust Agreement obliges the trustees to serve the best interests of “beneficiaries”, a class that, in the case of the QTIP trusts, would include not only Lois as the owner of the life interest but also the “issue” who would receive any remainder as appointees or takers in default under her power of appointment. (See Doc. 34 at 18, para. (e)(iii).) Thus, the Commissioner argues, the Trustees’ power to distribute to Lois was not absolute but was constrained by the best interests of Harry’s issue.

However, the specific plural “beneficiaries” provisions to which the Commissioner points in his reply (Doc. 55, para. 26) - i.e., “HRH Trust, Articles THIRD M(2) and FIRST B(2)(a)” - do not pertain to the Trustees’ powers to make payments for Lois’s benefit under the First QTIP Trusts (as authorized either by the QTIP provisions themselves in Article FIRST B(2)(b), or by the powers given to trustees generally in Article THIRD B, both of which are quoted above in Part II). Rather, the “beneficiaries” provisions the Commissioner cites pertain instead to the trustees’ specific power to “terminate”[5] the First QTIP Trusts (THIRD M(2), Doc. 35 at 24) and their powers under the By-Pass Trust (FIRST B(2)(a), Doc. 35 at 8). We tentatively conclude that neither of these provisions restricts the trustees’ powers (in FIRST B(2)(b) and THIRD B) to make transfers for Lois’s benefit under the First QTIP Trusts.

[5] As we understand the Commissioner, he does not argue that the 2013 decanting “terminated” the First QTIP Trusts. (As he seems to indicate, a holding of “termination” would, under § 2519, result not in estate tax liability in 2015 but in gift tax liability in 2013 - a liability for which the IRS did not issue a notice of determination.) Rather, the Commissioner evidently cites this provision simply to show that the Trustees did not have absolute power under the HRH Trust Agreement. We assume it is correct that they did not have absolute power under every aspect of the HRH Trust Agreement; but we think that the issue before us now involves the question whether the Trustees had absolute power to distribute principal to Lois during her life under the

specific provisions of the First QTIP Trusts quoted above, not the different powers in THIRD M(2) or FIRST B(2).

> Rather, the truly relevant provisions do not in fact refer to plural “beneficiaries”. Under the First QTIP Trusts, during Lois’s life the trustees have the power (under FIRST B(2)(b), Doc. 35 at 10) to make payments only “for the benefit of Lois” (i.e., “for her support, maintenance, health, comfort or general welfare”). The grant of power to the trustees includes no reference to other “beneficiaries”.
>
> As we have explained, that Trustee power is defined - under the general provisions of THIRD B (Doc. 35 at 19-20), quoted above in Part II - to include the power “to make payments or applications of income or principal for the support, maintenance, health, education, comfort or general welfare of the [singular] beneficiary (including, but not limited to, payments or applications to enable the [singular] beneficiary to ... make transfers that serve estate or tax planning objectives, or engage in any other activity deemed by the Trustee to be in the best interests of the [singular] beneficiary). An authorization to apply principal to or for the benefit of a [singular] beneficiary shall include authority to pay principal to a trust for the benefit of that [singular] beneficiary”. Lois is the sole potential beneficiary of the payment power given in FIRST B(2)(b); and the explanation of that power in THIRD B includes no reference to plural “beneficiaries” and no other reason to suppose that the trustee, when acting under FIRST B(2)(b), must take account of the interests of hypothetical potential beneficiaries who did not exist under that provision.
>
> If we misunderstand the Commissioner’s argument as to plural “beneficiaries” or if we have overlooked provisions that support it, we would benefit from his further argument.

The rest of the order was procedural. The case was settled, with the IRS dropping its arguments of an improper decanting. For a complete analysis, see the Bessemer Trust discussion reproduced in part II.J.4.c.i Estate or Nongrantor Trust Contribution Deduction Requirements. See also Rev. Rul. 73-142, which is reproduced in part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts after fn 6352 (IRS prospective recognition even though *Bosch* would not give retroactive effect).

II.J.18.c.ii. Tax Consequences of Decanting

Because decanting originally took the form of distributing from one trust to another, it may be the same as or similar to a trust division. See part II.J.18.a Trust Divisions. Similarly, when a trustee decants by creating a new trust and merging the old trust into it, it can be viewed as a merger. See part II.J.18.b Trust Mergers.

Be sure to consider whether a decanting that reduces a beneficiary’s interest in a trust may be valued under Code § 2702 as a gift of the beneficiary’s entire interest in the trust, without any reduction for what the beneficiary retained. For this rule and trying to plan around it, see parts III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts (whether a trust modification may be a gift) and III.B.7.d Code § 2702 Overview (possible disproportionate consequence of beneficiary making a deemed gift in trust).[2965] What I prefer about decanting over a settlement agreement is that, in a decanting, the beneficiary is not affirmatively consenting and therefore might not be making a gift by not objecting. If a trust

[2965] The latter, especially text accompanying fns 7381-7390.

protector can get comfortable modifying a trust without the beneficiaries' consent, that would be ideal (from the viewpoint of protecting a beneficiary against gift tax for agreeing to a trust modification). In a decanting, the trustee could accompany the exercise of the decanting power with a notice of the decanting along the lines of that described in part II.J.4.j Helping the Trustee Provide Annual Notices to Beneficiaries to Reduce Exposure, coupled with the trustee retaining the absolute right to reverse the decanting if a beneficiary objects within the time allotted for making a claim (one year under the Uniform Trust Code, but that time period varies by jurisdiction). Query whether a trust protector can feel comfortable making a modification without doing a settlement agreement, with the theory being that the beneficiaries have no practical ability to sue the trust protector and therefore cannot be making a gift by failing to take action to stop changes in their beneficial interests.

Decanting does not change who is the grantor under the grantor trust rules, even if a beneficiary is deemed to have made a gift.[2966]

ACTEC comments on decanting (http://www.actec.org/resources/comments-on-transfers-by-a-trustee) proposed a revenue ruling saying no new tax ID but do not cite authority for that conclusion. However, they mentioned that Letter Ruling 200607015 treated a decanted trust[2967] as a continuation of the original trust.[2968] On the other hand, they also referred to Letter Ruling 200736002, which involved a trust division and also treated the division as being a continuation and not a distribution,[2969] but the three successor trusts were treated as different

---

[2966] See part III.B.2.h.i Who Is the Grantor, especially fn 6620.

[2967] Letter Ruling 200607015 described decanting as an inter vivos power of appointment held by a trustee:

> State 1 law permits a trustee who has absolute discretion, under the terms of a trust, to invade the principal for the benefit of one or more proper object of the exercise of the power, to exercise such discretion by appointing all or part of the principal of the trust in favor of a trustee of a trust under an instrument other than that under which the power to invade is created or under the same instrument, provided, however that the exercise of such discretion does not reduce any fixed income interest of any income beneficiary of the trust and is in favor of the proper objects of the exercise of the power. The State 1 law provides that the trustee may act without the consent of any interested person and without prior court approval. The Trustees herein represent that they will petition the appropriate court and provide notice to all interested parties.

However, section 2(17) of the Uniform Trust Decanting Act takes a different approach:

> "Power of appointment" means a power that enables a powerholder acting in a nonfiduciary capacity to designate a recipient of an ownership interest in or another power of appointment over the appointive property. The term does not include a power of attorney.

Rather, section 2(10) of the Uniform Trust Decanting Act views decanting as a fiduciary distribution:

> "Decanting power" or "the decanting power" means the power of an authorized fiduciary under this [act] to distribute property of a first trust to one or more second trusts or to modify the terms of the first trust.

[2968] Letter Ruling 200607015 held:

> Based solely on the facts and the representations submitted, we conclude that the trustees' appointment of the four Trusts into four New Trusts will not be viewed as a distribution or termination under § 661 or § 1.661(a)-2(f)(1) and should therefore not result in the realization by the Trusts, the New Trusts, or any beneficiary of any of the Trusts of any of the New Trusts, of any income, gain , or loss under §§ 661 and 662.

[2969] Letter Ruling 200736002 held:

> Based upon the facts submitted and the representations made, we conclude that because the creation of the successor trusts is a modification of Trust for Federal income tax purposes, the successor trusts are treated as a continuation of Trust. Therefore, the transfer of assets from Trust to the successor trusts will not be treated as a distribution or termination under § 661, and

trusts from each other, which means that at least two trusts needed to get new tax IDs. So I don't know how much to read into whether being considered a continuation trust would require a tax ID.

Letter Ruling 201442047 held that decanting an ESBT required a new ESBT election for the second trust.[2970] The facts were:

> Specifically, Trust1 was established as an irrevocable trust under the laws of State by A, as settlor, for the benefit of A's son, B. B was the sole beneficiary of income and principal under the trust instrument for Trust1, and no other current or contingent beneficiaries were provided for under the trust instrument. In addition, no interest in Trust1 was acquired by purchase. On Date4, A established Trust2 , an irrevocable trust under the laws of State for the benefit of B. X represents that Trust2 met all of the requirements under § 1.1361-1(m)(1) to be treated as an ESBT. B was the sole beneficiary of income and principal under the trust instrument for Trust2, and no other current or contingent beneficiaries were provided for under the trust instrument. In addition, no interest in Trust2 was acquired by purchase. X represents that, pursuant to authority provided under the trust instrument for Trust1, the shares in X held by Trust1 were transferred to Trust2 effective Date5. X further represents that each of the then shareholders of X also expressly consented to this transfer.
>
> X represents that Trust2 was established because Trust1 did not provide authority for the original trustees to designate successor trustees. Instead, pursuant to the trust instrument for Trust1, when both of the original trustees were no longer able to serve as trustees, the successor trustee would be C or C's legal successor. Because Trust1 was an irrevocable trust and its terms could not readily be amended, A established Trust2 as a new trust with the same original trustees, but with a new provision in the trust instrument for Trust2 authorizing the trustees to designate their successors as trustees.
>
> However, when the trustees transferred the X stock from Trust1 to Trust2 effective on Date5, the trustees failed to timely make the election under § 1361(c)(2)(A)(v) to treat Trust2 as an ESBT effective on Date5. X represents that X was unaware of the failure of the trustees to make this ESBT election on behalf of Trust2.
>
> X represents that X and X's shareholders have filed tax returns consistent with X being an S corporation since Date2, except for the fact that Trust2 had not filed its fiduciary income tax returns consistent with it being an ESBT. For the tax year beginning on Date5, Trust2's fiduciary income tax return incorrectly indicated that Trust2 was a "Complex Trust" rather than an ESBT. In addition, the items reported on Trust2's fiduciary income tax return were reflected on that return consistent with the treatment of Trust2 as a Complex Trust rather than as an ESBT. The same error was repeated in subsequent tax years for Trust2 until Year. X represents that once this mistake was discovered in Year, Trust2's fiduciary income tax return has been prepared and filed consistent with Trust2's treatment as an ESBT.

---

will not result in the realization by Trust, the successor trusts, or by any beneficiary of Trust or the successor trusts of any income, gain, or loss.

[2970] For what an ESBT is, see part III.A.3.e.ii Electing Small Business Trusts (ESBTs.

Letter Ruling 201442047 held:

> Based solely on the facts submitted and the representations made, we conclude that the termination of X's S corporation election on Date5 was inadvertent within the meaning of § 1362(f). We further hold that, pursuant to the provisions of § 1362(f), X will be treated as continuing to be an S corporation from Date5 and thereafter, provided that X's S corporation election was valid and provided that the election was not otherwise terminated under § 1362(d) for reasons not addressed in this letter.

Combination merger and decanting: When identical trusts merged into a new trust that was identical other than administrative trustee issues, Letter Ruling 200743022 held no change in grandfathered-GST status and:

> In this case, State Statute clearly authorizes the consolidation or merger of trusts by the trustees where the merger or consolidation is in the best interests of the beneficiaries. Moreover, the terms of the trust instruments establishing the original trusts authorize the trustees to execute the necessary documents in order to carry out the powers granted the trustees with respect to the transfer of assets from the trusts. By virtue of the trust powers granted to the trustees under the State Statute and the original trust instruments, the trustees of the original trusts are authorized to merge the assets into the new trusts and to transfer trust assets from the original trusts to the new trusts. Consequently, the beneficiaries of the new trusts are acquiring their interests in the new trusts by reason of the exercise of the trustees' existing authority under state law to merge or consolidate the original trusts and to transfer the trust assets in furtherance of this merger. The beneficiaries are not therefore acquiring their interests in the new trusts as a result of the exchange of their interests in the original trusts, or as the result of an exchange of interests between themselves. Accordingly, there does not appear to be any reciprocal exchange involving the legal rights and entitlements of the beneficiaries under the trusts here. Because no "exchange" has occurred for purposes of § 1001, it is unnecessary to analyze whether the "materially different" standard has been satisfied.
>
> We therefore conclude that the proposed mergers of the original trusts into the new trusts, and the transfer of assets from the original trusts to the new trusts, will not cause the original trusts, the new trusts, or any of the income beneficiaries to recognize any gain or loss under § 1001 from a sale or other disposition of property. Because § 1001 does not apply to the division of Trust 1 assets, under § 1015 the basis of the trust assets will be the same after the proposed transaction as the basis of those assets in the original trusts. Furthermore, pursuant to § 1223(2) the holding periods of the assets in the hands of the new trusts will include the holding periods of the assets in the hands of the original trusts.

Letter Ruling 201642028 involved the following facts:

> On Date 1, a date prior to September 25, 1985, Husband and Wife created five irrevocable trusts with substantively similar terms for different beneficiaries. Trust 1 was created for the primary benefit of Grandchild 1, Trust 2 was created for the primary benefit of Grandchild 2, Trust 3 was created for the primary benefit of Grandchild 3, Trust 4 was created for the primary benefit of Daughter, and Trust 5 was created for the primary benefit of Grandchild 4.

Article I of Trust 1 provides that the trustees are to pay to or for the benefit of Grandchild 1 so much of the net income from Trust 1 as the trustees in their sole discretion shall determine to be necessary and desirable to provide for the health, education, maintenance, and support (HEMS) of said beneficiary. In the event that net income is not sufficient to provide for the health, education, maintenance, and support of said beneficiary, then the trustees may use such part of the principal as, from time to time, in their sole discretion, they may determine to be necessary for such purposes.

Article II of Trust 1 provides that, upon the death of Grandchild 1, the trustees are to pay to or for the benefit of the issue of Grandchild 1 such part of the net income from Trust 1 as the trustees in their sole discretion shall determine to be necessary and desirable to provide for the health, education, maintenance, and support of such issue. In the event that the trustees determine that the net income is not sufficient to provide for the health, education, maintenance, and support of any one or more of such issue, then the trustees may use such part of the principal as, from time to time, in their sole discretion, they may determine to be necessary for such purposes.

Article III of Trust 1 provides that, in the event that Grandchild 1 and all issue of Grandchild 1 shall die prior to the final distribution of Trust 1 properties, the remaining Trust 1 properties, principal, and any accumulated income, shall be paid over and delivered in equal shares among the other trusts (Trust 2, Trust 3, Trust 4, and Trust 5) then in existence.

Article XII of Trust 1 provides that Trust 1 will terminate 21 years after the last to die of Grandchild 1, Grandchild 2, Grandchild 3, Daughter, or Grandchild 4. Upon termination, all of the properties remaining in Trust 1 shall be distributed to the then living beneficiaries of Trust 1, share and share alike.

Trust 1 appoints seven initial individual trustees and Article VIII of Trust 1 identifies seven successor individual trustees of Trust 1. Article VIII of Trust 1 additionally provides that when fewer than four trustees are currently serving, the remaining trustees shall have the power and authority to appoint one or more individuals as trustees, so that at least four and not more than seven individuals may serve as trustees. Further, Article VIII of Trust 1 grants the trustees then serving the power to appoint a bank as successor trustee, to serve thereafter as the sole trustee.

Grandchild 4 died in Year without issue. Pursuant to the terms of Trust 5, the assets remaining after the death of Grandchild 4 were distributed equally among Trust 1, Trust 2, Trust 3, and Trust 4.

Currently, Trust 1, Trust 2, and Trust 3 (the GC Trusts) hold limited partnership interests in LP1 and LP2 and shares of Corporation 1 and Corporation 2. Corporation 1 is a bank holding company and Corporation 2 is a closely-held corporation. Each of the GC Trusts' interests in LP2 and Corporation 2 is a significant percentage (approximately a percent) of the GC Trusts' net value, with the remaining assets consisting of cash and marketable securities.

Currently, Individual 1, Individual 2, Individual 3, Individual 4, Individual 5, and Individual 6 (the current individual trustees) serve as co-trustees of Trust 1, Trust 2, Trust 3, and Trust 4.

On Date 2, Grandchild 1 petitioned State Court, pursuant to State Statute, to modify Trust 1, specifically requesting the appointment of a corporate trustee to replace the current individual trustees. Grandchild 2, Grandchild 3, and Daughter filed similar petitions for modifications to the respective trust of which each is a beneficiary. The petitions allege that the current individual trustees failed to sufficiently communicate with the beneficiaries of the trusts concerning the investment strategies for each of the respective trusts and the respective beneficiary's needs in relation to his or her health, education, support, and maintenance. In addition, the petitions filed by Grandchild 1, Grandchild 2, and Grandchild 3 allege that the current individual trustees failed to sufficiently diversify trust assets and made questionable investments despite the potential for conflicts of interests. The current individual trustees denied the allegations in the petitions and opposed the request to appoint a corporate trustee for each trust.

After an extended period of negotiations, including mediation, Grandchild 1, Grandchild 2, Grandchild 3, Daughter, and the current individual trustees entered into Settlement Agreement, which State Court approved by order dated Date 3. Settlement Agreement is contingent on the receipt of favorable rulings from the Internal Revenue Service.

Settlement Agreement provides for similar modifications to apply to each of Trust 1, Trust 2, and Trust 3. In regard to Trust 1, Settlement Agreement provides as follows: (1) Trust 1 will be divided into Successor Trust and Trust A; (2) Bank will be appointed to serve as the sole corporate trustee of Successor Trust; (3) Individual 1, Individual 2, and Individual 3 will be appointed to serve as co-trustees of Trust A; (4) Successor Trust and Trust A will have the same beneficiaries in the same proportions as Trust 1; (4) Successor Trust will be funded with the balance of Trust 1 assets after the funding of Trust A; (5) Trust A will be funded with Trust 1's partnership interests in LP1 and LP2 and shares of Corporation 1 and Corporation 2, and $b in cash or other liquid assets; (6) Successor Trust and Trust A will be governed by the same terms found in the Trust 1 instrument, except as modified by Settlement Agreement. Trust 4 will not be divided, but Bank will be appointed to serve as the sole corporate trustee of Trust 4.

Settlement Agreement provides that the trustee provision of Trust 1 will be modified in the trust instrument governing Successor Trust to provide the "distributees" of Successor Trust, upon application to and order of State Court at State Court's discretion, the power to remove at any time and without cause any then-serving corporate trustee of Successor Trust by written notice delivered to such trustee, and the power to replace such trustee with another corporate trustee that—(1) has the power to act as a trustee under the laws of the state governing the administration of the trust; (2) has at least $c in assets under management; and (3) is not related or subordinate, within the meaning of § 672(c), to the "distributees" of Successor Trust. Further, the trustee provision of Trust 1 will be modified in the trust instrument governing Successor Trust to provide the "distributees" of Successor Trust, in the event the then-serving corporate trustee resigns or can no longer serve as trustee, the power to appoint a successor corporate trustee, without application to and approval by State Court, that— (1) has the power to act as a trustee under the laws of the state governing the administration of the trust; (2) has at least $c in assets under management; and (3) is not related or subordinate, within the meaning of § 672(c), to the "distributees" of Successor Trust. The term "distributees" refers to a majority of the competent adult beneficiaries who are at the time authorized to receive distributions of principal or income from the trust.

Settlement Agreement provides that the trustee provision of Trust 1 will be modified in the trust instrument governing Trust A so that the number of individuals serving as co-trustees of Trust A shall be three as of the date of the division of Trust 1 into Successor Trust and Trust A. Upon the first of Individual 1, Individual 2, or Individual 3, to die, resign, become incapacitated, or otherwise fail to serve, the distributees of Trust A will be empowered to select one individual to serve as successor trustee of Trust A. The trustee selected by the distributees will be subject to the approval of the other two then-serving trustees. Succession to the office of trustee for the other two trustees shall continue to be determined by the co-trustees.

Under Settlement Agreement, the beneficiaries of Trust A agree to look to, and the trustees of Trust A agree to utilize, the income and principal of Successor Trust first for the beneficiaries' HEMS distributions. Settlement Agreement provides that the governing instrument of Trust A will provide that in making distributions in accordance with the HEMS standard, the trustees are to take into consideration a beneficiary's distributions of income and principal received from Successor Trust and other sources of income.

Settlement Agreement provides that the beneficiaries of Trust A and the beneficiaries of Successor Trust are and will be the same and each beneficiary has an identical interest in Trust A as he or she has in Successor Trust. However, Settlement Agreement provides that the trustees of Trust A will make all transfers and distributions to the trustee of Successor Trust in order to satisfy any transfers or distributions the trustees of Trust A may be required to make to Successor Trust or its beneficiaries under the governing instrument of Trust A, by law, or under Settlement Agreement, so that no distributions will be made directly from Trust A to the beneficiaries.

The termination date of Successor Trust is the termination date of Trust 1, which is 21 years after the last to die of Grandchild 1, Grandchild 2, Grandchild 3, Daughter, or Grandchild 4. Settlement Agreement provides that the governing instrument of Trust A will provide for a termination date d years after the effective date of Settlement Agreement, unless trustee of Successor Trust elects, after consultation with the distributees of Successor Trust, to extend the termination date of Trust A for an additional e years. Since the sum of d years and e years is less than 21 years, and Grandchild 1, Grandchild 2, Grandchild 3, and Daughter were all alive on the effective date of Settlement Agreement, the termination date of Trust A will be before the termination date of Successor Trust. Upon termination of Trust A, the assets of Trust A will be distributed to the trustee of Successor Trust to form part of the corpus of Successor Trust.

After the modification, both Successor Trust and Trust A continue to be subject to the rule in Article III of Trust 1, which provides that in the event that Grandchild 1 and all issue of Grandchild 1 all predecease the required termination date, the remaining trust assets will be distributed equally to the other trusts (Trust 2, Trust 3, Trust 4, and Trust 5) then in existence.

Under Settlement Agreement, attorneys' fees and expenses incurred by the trustees and beneficiaries relating to the litigation and the Settlement Agreement will be paid or reimbursed by Trust 1, Trust 2, Trust 3, and Trust 4. The direct payments and reimbursements shall be made from each of Trust 1, Trust 2, Trust 3, and Trust 4, pro rata, in relation to the total value of each trust.

> Finally, Settlement Agreement includes several provisions that concern the trustees' administration of Successor Trust and Trust A, such as provisions addressing communications with beneficiaries and conflicts of interest.
>
> The current individual trustees of Trust 1 represent that no other additions have been made to Trust 1 since September 25, 1985.
>
> Under the law of State, in administering a distribution standard tied to the needs of a beneficiary, a trustee will consider all income enjoyed by the beneficiaries from any and all sources, so long as it is available for support of the beneficiary. Citation.

As to GST issues, Letter Ruling 201642028 concluded:

> With regard to the proposed modifications of Trust 1, we conclude:
>
> a The division of Trust 1 pursuant to the terms of Settlement Agreement will not shift any beneficial interest in Trust 1 to a beneficiary who occupies a lower generation (as defined in § 2651) than the person or persons who held the beneficial interest prior to the division. In addition, the division will not extend the time for vesting of any beneficial interest in Trust 1 beyond the period provided for in the original trust. Therefore, the two trusts resulting from the division, Successor Trust and Trust A, will not be subject to the provisions of chapter 13.
>
> b The modification of Trust 1 pursuant to the terms of Settlement Agreement to provide for a change in trustee and to modify the trustee succession procedures is viewed as pertaining to the administration of the trust, comparable to the administrative modification in Example 10 of § 26.2601-1(b)(4)(i)(E).
>
> c In addition, all other terms and trust modifications set forth in Settlement Agreement (including the trustee procedures regarding HEMS distributions, the payment of attorneys' fees, trustee communications with beneficiaries, and conflicts of interest) are viewed as administrative in nature and, under § 26.2601-1(b)(4)(i)(D)(2), will not be considered to shift a beneficial interest to a lower generation in the trust or extend the time for vesting of any beneficial interest in the trust beyond the period provided for in Trust 1.
>
> Accordingly, based upon the facts submitted and the representations made, we further conclude that after the division and modification of Trust 1 pursuant to Settlement Agreement, Trust 1, Successor Trust, and Trust A will not be subject to the provisions of chapter 13.

Letter Ruling 201642028 viewed the beneficial interests as not changing, so the modification did not have any gift or estate tax consequences. Because the trustees could make distributions only for ascertainable standards, the right to change trustees also had no estate tax consequences. As to income tax issues:

> … the division of Trust 1 into Successor Trust and Trust A pursuant to the Settlement Agreement will not result in a distribution under § 661 from Trust 1; and accordingly, will not result in gross income to Successor Trust or Trust A under § 662. Additionally, we conclude that a transfer from Trust A to Successor Trust pursuant to the Settlement Agreement that is made for a purpose other than to facilitate a HEMS distribution to a

beneficiary will not result in a distribution under § 661 from Trust A; and accordingly, will not result in gross income to Successor Trust under § 662.

> We further conclude that a transfer from Trust A to Successor Trust for an immediate HEMS distribution to a beneficiary will result in a deduction pursuant to § 661 for Trust A (to the extent of Trust A's distributable net income) and (ii) inclusion of an equivalent amount in the recipient beneficiary's gross income pursuant to § 662.

Letter Ruling 201642028 also allowed the trusts to reimburse the beneficiaries' legal fees and deduct them as Code § 212 expenses:[2971]

> Legal fees relating to the proper investment of trust assets are a function of the management of the trust property and are deductible if they are ordinary and necessary. *Trust of Bingham v. Commissioner*, 325 U.S. 365, 376 (1945). In *Herman A. Moore Trust v. Commissioner*, 49 T.C. 430 (1968), *acq*., 1968-2 C.B. 21, the Service challenged the trustee's deduction of certain attorneys' fees in computing the trust's income. These fees arose from an action brought by the testator's children to accelerate their beneficial interests in the trust. Pursuant to state law, the court ordered that the attorneys' fees for the trust, the beneficiaries and the guardian ad litem be paid from trust income. The court decided that (1) the state court decision aided the trustee in its management of the trust property, and (ii) the trust benefitted by the involvement of the beneficiaries and the guardian ad litem in the litigation. Thus, the court held that all of the litigants' attorneys' fees paid from trust income were deductible under § 212(2).
>
> In the present case, the legal fees paid by beneficiaries seeking to change the trustee of the trust are not payments to acquire, create, or facilitate the acquisition or creation of an intangible. The litigation involved only the proper administration of the trust and not the beneficiaries' ownership interests in the trust. The beneficiaries already had an ownership interest in the trust and were not seeking a redetermination of that ownership interest, but rather, merely a change in the administration of the trust. Therefore the legal fees are not subject to capitalization under § 1.263(a)-4.
>
> Based on the facts submitted and the representations made, we conclude that the purpose of the action brought by the beneficiaries of Trust 1 was to improve the investment of the assets of the trust. Further, Trust 1 benefited by the involvement of the beneficiaries in the proceedings. Thus, subject to allocations under § 1.265-1, we conclude that the attorneys' fees paid by Trust 1, Successor Trust, or Trust A to a beneficiary of Trust 1, Trust 2, Trust 3, Trust 4, or one of the resulting divided trusts pursuant to Settlement Agreement as reimbursement for the beneficiary's prior payment of attorney's fees and expenses will result in a deduction for the reimbursing trust under § 212. Since the attorney's fees and expenses are deductible under § 212, it is implicit that those expenses are not deductible under § 661 or includible by the beneficiaries under § 662.

Letter Ruling 201711002 involved the following facts:

> On Date 1, Settlor established Trust A, an irrevocable trust, for the benefit of Settlor's granddaughter (Granddaughter), Granddaughter's spouse (Spouse), and

---

[2971] For Code § 212, see part II.G.4.l.i.(b) Requirements for Deduction Under Code § 212.

Granddaughter's children, GGC1 and GGC2, and Granddaughter's issue. Date 1 is a date before September 25, 1985. Trust A was governed by the laws of State 1.

Trust A provides that, during Granddaughter's life, the trustees shall distribute one-half of the net income to Granddaughter. The corporate trustee, in its absolute discretion, may direct the trustees to distribute the other one-half of the net income to Granddaughter and any of her children or issue. Further, the corporate trustee, in its absolute discretion, may direct the trustees to distribute principal to Granddaughter, Granddaughter's children or issue, but none to Granddaughter's husband, as the corporate trustee deems necessary for the support, maintenance, and education of such person.

Trust A provides that when Granddaughter dies, if Spouse predeceases her, then the corporate trustee, in its absolute discretion, may direct the trustees to distribute the entire net income to Granddaughter's children or issue.

Trust A provides that the trust will terminate (Termination Date) upon the death of the last survivor of Granddaughter, Spouse, GGC1, and GGC2 (measuring lives). Upon termination, the trust will be divided into equal shares to Granddaughter's children as are living at the death of the last survivor and to the then living issue of each child of Granddaughter who is deceased, the issue of each deceased child of Granddaughter to take per stirpes a share equal to the share which a child of Granddaughter would have taken if alive. If upon the Termination Date, there are no living children or issue of Granddaughter, then the trust estate will pass to Settlor's Grandson, and if he is deceased, to Grandson's issue, per stirpes. If none, the trust estate will pass, in equal shares, one-half to University A and one-half to University B.

After Spouse died, on Date 5, Trust A was divided, pursuant to court order and the statutes of State 1, into three separate trusts, one trust to benefit Granddaughter and her issue (Trust A1), one trust to benefit Granddaughter, GGC1 and GGC1's issue (Trust A2), and one trust to benefit Granddaughter, GGC2 and GGC2's issue (Trust A3). Trust A1 received one-half of the assets of Trust A. Trusts A2 and A3 each received one-half of the remaining assets.

Trust A1 provided that during Granddaughter's life, the trustees must pay Granddaughter all of the net income from the trust and the corporate trustee, in its sole discretion, may direct the trustees to distribute so much of the principal to Granddaughter and her issue, as the corporate trustee deems necessary for the support, maintenance, and education of such person. Upon Granddaughter's death, the remaining assets of Trust A1 would be distributed one-half to Trust A2 and one-half to Trust A3. Trust A1 retained the same Termination Date of Trust A. Upon the Termination Date, Trust A1 assets would be distributed in equal shares to Trust A2 and Trust A3. In the event, Granddaughter died without leaving children or issue, Trust A1 assets would be distributed, per stirpes, to Grandson's issue. If none, to University A and University B, in equal shares.

Trust A2 provided that the corporate trustee, in its sole discretion, may direct the trustee to distribute so much of the entire net income to Granddaughter, GGC1 and any of GGC1's issue. Any net income not distributed would be accumulated. Further, the corporate trustee, in its sole discretion, may direct the trustee to pay or expend for the benefit of Granddaughter, GGC1 and GGC1's issue any portion of the net income and so much of the principal as the corporate trustee deems necessary for the support, maintenance, and education of such person. Trust A3 contained the same provisions, except the beneficiaries included Granddaughter, GGC2 and GGC2's issue. Each trust retained the same Termination Date as Trust A. Upon the Termination Date, Trust A2 assets would be distributed to GGC1's children and to the then living issue of a deceased child, such issue to take per stirpes. Upon the Termination Date, the same provisions applied to Trust A3, except that the trust assets would be distributed to GGC2's children or issue. Trusts A2 and A3 also provided that, upon the Termination Date, in the event GGC1 or GGC2 died without leaving issue, the assets in his trust would be distributed in equal shares to his brothers' children or issue. Further, in the event, upon the Termination Date, GGC1 and GGC2 die without leaving children or issue, then the trust assets would be distributed to Grandson's issue. If none, the trust assets would be distributed, in equal shares, to University A and University B.

After Granddaughter died, on Date 6, pursuant to court order and the statutes of State 1, Trust A2 was divided into six separate trusts. Trust 1 benefits GGC1, GGGC1 and GGGC1's issue. Trust 2 benefits GGC1, GGGC2 and GGGC2's issue. Trust 3 benefits GGC1 and GGC1's children and issue. Three other trusts (Trusts X, Y, and Z) were established to benefit GGC1's other children and that child's issue. This private letter ruling pertains to Trust 1, Trust 2, and Trust 3.

Trust 1 provides that the trustees are authorized to distribute so much of the net income, as the corporate trustee determines, in its absolute discretion, to GGC1, GGGC1 and GGGC1's issue. Further, the trustees are authorized to distribute so much of the principal for the support, maintenance, and education of GGC1, GGGC1 and GGGC1's issue, as the corporate trustee, in its sole discretion, determines appropriate. Trust 2 contains the same provisions, except that the beneficiaries include GGC1, GGGC2 and GGGC2's issue. Trust 3 provides that the trustees are authorized to distribute so much of the net income, as the corporate trustee determines, in its absolute discretion, to GGC1 and GGC1's issue. Further, the trustees are authorized to distribute so much of the principal for the support, maintenance, and education of GGC1 and GGC1's issue as the corporate trustee, in its sole discretion, determines appropriate.

Trusts 1, 2, and 3 retain the same Terminate Date as Trust A. Upon the termination Date, Trust 1 assets will be distributed outright to GGGC1, if living. Trust 2 assets will be distributed outright to GGGC2, if living, and Trust 3 assets will be distributed in equal shares to Trusts 1, 2, X, Y, and Z.

On Date 2, Settlor established Trust B, a revocable trust, for the benefit of Granddaughter, GGC1, and GGC2. Trust B was amended and restated on Date 3. Trust B became irrevocable upon Settlor's death on Date 4. Dates 2, 3 and 4 are all dates prior to September 25, 1985. Trust B contains the same income and principal distribution provisions, Termination Date, and dispositive provisions as Trust A, except that Spouse was not a beneficiary or a measuring life.

On Date 5, pursuant to court order and the statutes of State 1, Trust B was divided into three separate trusts, one trust to benefit Granddaughter and her issue (Trust B1), one trust to benefit Granddaughter, GGC1 and GGC1's issue (Trust B2), and one trust to benefit Granddaughter, GGC2 and GGC2's issue (Trust B3). These trusts contain the same provisions as the three divided trusts under Trust A.

After Granddaughter died, on Date 7, pursuant to court order and the statutes of State 1, Trust B2 was divided into six separate trusts. Trust 4 benefits GGC1, GGGC1 and GGGC1's issue. Trust 5 benefits GGC1, GGGC2 and GGGC2's issue and Trust 6 benefits GGC1 and GGC1's issue. Three other trusts (Trusts L, M, and N) were established, one for each of GGC1's other children and each child's issue. This private letter ruling pertains to Trusts 4, 5, and 6.

Trusts 4 and 5 contain the same income and principal provisions, Termination Date, and dispositive provisions as Trusts 1 and 2, respectively. Trusts 6 contains the same income and principal provisions, Termination Date, and dispositive provisions as Trust 3, except that on termination Trust 6 assets will be distributed equally to Trusts 4, 5, L, M, and N. The current trustee of Trusts 1 through 6 is Trustee.

It is represented that no additions, actual or constructive, have been made to Trust A, Trust B, or Trusts 1 through 6 after September 25, 1985.

GGC1 and Trustee propose to establish six new trusts, Trusts 7 through 12, for the purpose of merging Trusts 1 through 6 into the newly established trusts. Trust 1 and Trust 4 benefit GGC1, GGGC1 and GGGC1's issue. Each of these trusts will merge into Trust 7 and Trust 10, respectively. Trusts 7 and 10 will retain the same income and principal distribution provisions as merged Trusts 1 and 4. Trusts 7 and 10 will not terminate until GGGC1 dies, as opposed to upon the death of the last to die of GGC2 and GGC1. However, Trusts 7 and 10 each grant GGGC1 a testamentary general power of appointment to appoint the trust assets of these trusts to GGGC1's issue and the creditors of GGGC1.

Trust 2 and Trust 5 benefit GGC1, GGGC2 and GGGC2's issue. Each of these trusts will merge into Trust 8 and Trust 11, respectively. Trusts 8 and 11 will retain the same income and principal distributions provisions as merged Trusts 2 and 5. Trusts 8 and 11 will terminate when GGGC2's dies, as opposed to upon the death of the last to die of GGC1 and GGC2. However, Trusts 8 and 11 each grant GGGC2 a testamentary general power of appointment to appoint the trust assets of these trusts to GGGC2's issue and the creditors of GGGC2.

Trust 3 and Trust 6 benefit GGC1 and GGC1's issue. Each of these trusts will merge into Trust 9 and Trust 12, respectively. Trusts 9 and 12 will retain the same income and principal distributions provisions as merged Trusts 3 and 6. Upon the death of the last to die of GGC1 and GGC2, Trust 9 will terminate and distribute in equal shares to Trusts 7, 8, X, Y and Z, and Trust 12 will terminate and distribute in equal shares to Trusts 10, 11, L, M, and N.

In addition, Trusts 7, 8, and 9, if not terminated earlier, will terminate on the date required by the rule against perpetuities in State 1 in effect on the date Trust A was created, and Trusts 10, 11, and 12, if not terminated earlier, will terminate on the date required by the rule against perpetuities in State 1 in effect on the date Trust B became irrevocable.

At the time Trusts 7 and 10 terminate, to the extent GGGC1 has not exercised her testamentary general power of appointment, the trustees shall distribute Trust 7 and 10 to GGGC1's then living issue, per stripes, and if no such issue is then living, then to GGC1's issue, per stirpes. Similarly, at the time Trusts 8 and 11 terminate, to the extent

GGGC2 has not exercised her testamentary general power of appointment, the trustees shall distribute Trusts 8 and 11 to GGGC2's then living issue, per stripes, and if no such issue is then living, then to GGC1's issue, per stirpes.

Trusts 7, 8, 10, and 11 each provide for the same default dispositive provisions as Trusts 1, 2, 4, and 5, respectively. To the extent GGGC1 or GGGC2 dies leaving no children or issue of a deceased child, the trust estates pass in equal shares to the trusts established to GGC1's other children. If the trusts for the other children have terminated and there are no other children or issue of deceased children of GGC1, the trust estates of Trusts 7, 8, 10, and 11 will pass to Grandson's issue, and if none, the trust estates will pass one-half to University A and one-half to University B.

It is represented that the purpose of the merger is to retain the assets of Trusts 1 through 6 in further trust after the death of GGC1 and GGC2 and to appoint successor trustees for Trusts 7 through 12. Currently, Trusts 7 through 12 are not funded and it is represented that these trusts will remain unfunded until the mergers. It is represented that all of the current and remainder beneficiaries of Trusts 1 through 6 have consented to the proposed mergers.

Statute 1 provides that a trustee may declare one or more new trusts for the purpose of merging all, or a portion, of an existing trust or trusts with and into the new trust or trusts, whether or not created by the same trustor and whether or not funded prior to the merger, to be held and administered as a single trust if such a merger would not result in a material change in the beneficial interests of the trust beneficiaries, or any of them in the trust.

Statute 2 provides that a trustee, without authorization by the court, may exercise powers conferred by the terms of the trust; and except as limited by the terms of the trust, any other powers conferred by this chapter.

Statute 3 provides that whenever a trust (a transferor trust) is merged with and into another trust (the transferee trust) the separate existence of the transferor trust shall cease and the transferee trust shall possess all of the rights and privileges, and shall be subject to all of the obligations of, the transferor trust.

Note that Trusts 8 and 11 provided earlier termination than the original trusts but grant a general power to the beneficiary whose death would trigger termination. Thus, also they accelerate distribution to the remaindermen, they make that subject to a general power of appointment, thereby diminishing the remaindermen's beneficial interest.

After reviewing the regulations governing trusts grandfathered from GST, including Reg. § 26.2601-1(b)(4)(i)(E), Example (6), Letter Ruling 201711002 held:

In the instant case, although initially administered in State 1, Trusts 1 through 6 have been administered in State 2 since the appointment of Trustee, who has its principal place of business in State 2. Therefore, State 2 law is applicable. The merger of Trusts 1 through 6 (Transferor Trusts) into Trusts 7 through 12 (Transferee Trusts), respectively, is permitted under State 2 law if such merger would not result in a material change in the beneficial interests of the trust beneficiaries. Statute 1. Statute 2 provides that a trustee may act under Statute 1 without authorization by the court. Statute 3 provides that,

> following the merger, the governing instruments of Transferee Trusts control the disposition of the property of their respective Transferor Trusts.
>
> During the lifetime of GGC1 and GGC2, the dispositive terms of the Transferor Trusts and their respective Transferee Trusts are the same. After the merger, Trusts 9 and 12 will terminate upon the death of the survivor of GGC1 and GGC2, Trusts 7 and 10 will terminate on the date of GGGC1's death, and Trusts 8 and 11 will terminate on the date of GGGC2's death. However, Trusts 7, 8, and 9, if not terminated earlier, will terminate on the date required by the rule against perpetuities in State 1 in effect on the date Trust A was created, and Trusts 10, 11, and 12, if not terminated earlier, will terminate on the date required by the rule against perpetuities in State 1 in effect on the date Trust B became irrevocable. In addition, GGGC1 is granted a general power of appointment over Trusts 7 and 10, which will cause Trusts 7 and 10 to be includible the gross estate of GGGC1 at her death under § 2041(a)(2). Further, GGGC1 will be treated as the transferor of the corpus of Trusts 7 and 10 for GST tax purposes under § 2652(a)(1). Similarly, GGGC2 is granted a general power of appointment over Trusts 8 and 11, which will cause Trusts 8 and Trust 11 to be includible in the gross estate of GGGC2 at her death under § 2041(a)(2). Further, GGGC2 will be treated as the transferor of the corpus of Trusts 8 and 11 for GST tax purposes under § 2652(a)(1).
>
> Accordingly, the terms of Trusts 7 through 12 will not extend the time for vesting of any beneficial interest in a manner that may postpone or suspend the vesting, absolute ownership, or power of alienation of an interest in property beyond the period provided for in the original trusts, Trust A and Trust B. Moreover, Trusts 7 through 12 will not shift a beneficial interest in the trust to any beneficiary who occupies a lower generation (as defined in § 2651) than the person or persons who held the beneficial interest prior to the trustee action.
>
> Therefore, based on the facts submitted and representations made, we conclude that upon the merger of Trust 1 into Trust 7, Trust 2 into Trust 8, Trust 3 into Trust 9, Trust 4 into Trust 10, Trust 5 into Trust 11 and Trust 6 into Trust 12, the Transferee Trusts (i.e. Trusts 7 through 12) will be exempt from GST tax under § 26.2601-1(b).

If a decanting constitutes a transfer from one taxpayer to another taxpayer, be sure to make a timely ESBT election.[2972]

II.J.18.d. Trust Commutations

Reg. § 1.1001-1(a), "General rule," begins with and then concludes with:

> Except as otherwise provided in subtitle A of the Code, the gain or loss realized from the conversion of property into cash, or from the exchange of property for other property differing materially either in kind or in extent, is treated as income or as loss sustained…. The basis may be different depending upon whether gain or loss is being computed. For example, see section 1015(a) and the regulations thereunder. Section 1001(e) and paragraph (f) of this section prescribe the method of computing gain or loss upon the sale or other disposition of a term interest in property the adjusted basis (or a portion) of which is determined pursuant, or by reference, to section 1014 (relating to the basis of

[2972] See Letter Ruling 201941006, described in the text accompanying fn 6008 in part III.A.3.e.ii.(a) Qualification as an ESBT.

property acquired from a decedent), section 1015 (relating to the basis of property acquired by gift or by a transfer in trust), or section 1022 (relating to the basis of property acquired from certain decedents who died in 2010).

Code § 1001(e), "Certain term interests," provides:[2973]

(1) *In general*. In determining gain or loss from the sale or other disposition of a term interest in property, that portion of the adjusted basis of such interest which is determined pursuant to section 1014, 1015, or 1041 (to the extent that such adjusted basis is a portion of the entire adjusted basis of the property) shall be disregarded.

(2) *Term interest in property defined*. For purposes of paragraph (1), the term "term interest in property" means -

(A) a life interest in property,

(B) an interest in property for a term of years, or

(C) an income interest in a trust.

(3) *Exception*. Paragraph (1) shall not apply to a sale or other disposition which is a part of a transaction in which the entire interest in property is transferred to any person or persons.

In other words, under Code § 1001(e)(1), a person who sells a life interest in property, an interest in property for a term of years, or an income interest in a trust receives no basis with respect to the trust's assets and recognizes gain on the entire value. On the other hand, if all of the beneficiaries get together and simultaneously sell their interests in the trust to a third party, under Code § 1001(e)(3) they would be able to use basis. Also note that Code § 1001(e)(1) and regulations implementing it do not prevent basis from being allocated to remaindermen.

The legislative history for when Code § 1001(e) was first enacted in the Tax Reform Act of 1969 (P.L. 91-172), is as follows (excerpted from BNA):

House Committee Report

[Page 156]

6. Sales of life estates, etc. (sec. 516(a) of the bill and sec. 1001 of the code)

Present law.—Under present law, when a life estate and remainder interest in property are acquired by gift, bequest, or inheritance, a so-called "uniform basis" rule is applied with the basis of the property divided between the life estate and the remainder. (As the life estate is used up each year, its basis is reduced, and the basis of the remainder interest is increased in the same amount—hence, the combined basis of the life estate and the remainder interest remains the same from year to year.)

The life tenant is not permitted to amortize his basis over the length of the life estate because this would reduce for tax purposes the

[2973] In this part II.J.18.d, see text accompanying fn 3000 for additional explanation of Code § 1001(e).

amount of income he receives. However, where the life tenant sells his right to receive future income, his basis in the property may be used in reducing the gain he receives on the sale. In addition, such a life estate (or an estate for a term of years) is frequently treated by the courts as a capital asset, and any amount received upon its sale in excess of the adjusted basis of the life estate is treated as a capital gain. The purchaser of the life estate is allowed to amortize his basis (his purchase price) and, therefore, is able to offset it against the income he receives from it.

General reasons for change.—The treatment described above has the effect of allowing a large part, and in some cases, almost all of the income from a life estate or similar interest acquired by gift, bequest, or inheritance, to avoid taxation in those situations where the life tenant sells his interest. The life tenant is not taxed on the income because he is treated as having a basis in the life estate when he sells it and, in addition, the purchaser of the life estate is not taxed on most of the income because he is allowed to reduce that income by amortizing his basis (his purchase price) in the life estate. Your committee does not believe that income should be allowed to completely escape taxation by this means.

Explanation of provision.—Your committee’s bill provides a new rule for determining the amount of gain or loss from the sale or other disposition of a life interest (or an interest for a term of years) in property or an income interest in a trust. In such a case, the bill provides that any portion of a taxpayer’s adjusted basis determined under sections 1014 or 1015 of the code (dealing with the basis of property acquired by gift, from a decedent, or by a transfer in trust) is disregarded to the extent that the adjusted basis is a portion of the entire adjusted basis of the property.

Thus, where there is a sale or other disposition of a life (or term of years) interest in property, or an income interest in a trust—which was acquired by gift, bequest, inheritance, or by a transfer in trust—there is to be no cost or other basis to offset the proceeds received from the disposition. Accordingly, the person disposing of such an interest is to be required to treat as gain the entire amount he receives from the disposition of his interest, rather than only the excess of the amount received over his basis.

The bill, however, does not change present law in the situation where there is a sale or other disposition of a life or term of years interest in property (or an income interest in trust) which is a part of a transaction in which the entire fee interest is transferred to any person or persons. Thus, where a life tenant and remainderman simultaneously sell the entire fee interest in property in a single transaction, it is to be treated in the same manner as under existing law; the gain each receives is to be measured by the excess of the proceeds received on the disposition over the adjusted basis in the life estate. Your committee believes this exception is appropriate, since in this case the purchaser acquires a single entire interest in the property and, therefore, he is not allowed to amortize the separate life interest. Thus, he is taxed on the income from the property.

Supplemental Report

[Page 113]

SECTION 516. OTHER CHANGES IN CAPITAL GAINS TREATMENT

(a) Sales of life estates and term interests.—Subsection (a) of section 516 of the bill adds a new subsection (e) to section 1001 of the

[Page 114]

code (relating to determination of amount of and recognition of gain or loss).

General rule

Paragraph (1) of new section 1001(e) provides that, in determining the gain or loss from the sale or other disposition of a “term interest in property” (as defined in new section 1001(e) (2)), that portion of the adjusted basis of such interest which is determined under section 1014 (relating to the basis of property acquired from a decedent) or section 1015 (relating to the basis of property acquired by gifts and transfers in trust) is to be disregarded to the extent that such adjusted basis is a portion of the entire adjusted basis of the property. Under this provision, a person who sells a term interest in property, such as a life interest, to which new subsection (e) applies and the basis of which is an amount computed by apportioning the basis of such property between the life interest and the remainder interest, may not reduce the amount realized by his adjusted basis in such interest.

Term interest defined

Paragraph (2) of new section 1001(e) defines the term “term interest in property” as an interest which is: (A) a life interest in property, (B) an interest in property for a term of years, or (C) an income interest in a trust.

Exception

Paragraph (3) of new section 1001(e) provides that the rules stated in paragraph (1) of new section 1001(e) do not apply to a sale or other disposition which is a part of a transaction in which a fee interest is transferred to any person or persons. For example, new subsection (e) does not apply to a case in which a life tenant and a remainderman simultaneously sell the entire fee interest in property to a third party in a single transaction.

Example.—A devises Blackacre to B for life, with the remainder to C in fee simple. The fair market value of Blackacre at A’s death is $10,000. B is considered to hold a life interest in property under new section 1001(e) (2) (A). B and C share the $10,000 basis determined pursuant to section 1014. Assume B and C each have a basis under section 1014 of $5,000 for their respective interests. If B sells his life interest in Blackacre to D for $20,000, B is treated as having gain of $20,000 since his $5,000 adjusted basis is disregarded under new section 1001(e)(1).

House Discussion

Congressional Record

(August 7, 1969)

[Page H7132]

Mr. HELSTOSKI * * * * *

23. Capital Gains. —Capital gain and loss treatment is revised in several respects. First, the alternative capital gains tax for individuals was repealed, with the result that in the case of those in the top tax brackets, the rates may rise to as much as 35 percent (or 32½ percent under the new rate structure provided by this bill); second, long-term capital losses of individuals are reduced by 50 percent before being available as an offset against ordinary income; third, the offset against ordinary income in the case of husbands and wives filing separate returns is limited to $500 for each or to the same aggregate amount as if they filed a joint return; fourth, the sale of papers by a person whose efforts created them, or by a person for whom they were produced, is to give rise to ordinary income; fifth, the holding period for capital gains is increased from 6 months to 12 months; sixth, employees' contributions to pension plans, when paid out as a part of a lump-sum distribution, is to be taxed as ordinary income; seventh, life interests are not to be accorded a cost basis when sold; eighth, casualty losses and gains are to be consolidated in determining whether they give rise to ordinary loss or to gain which is consolidated with other section 1231 gains or losses; and ninth, transfers and franchises are not to be treated as giving rise to capital gains if the transferor retains significant rights.

House Action

Summary of H.R. 13270

[Page 87]

6. Sales of Life Estates, Etc.

Present law.—Under present law, when a life estate and remainder interest in property are acquired by gift, by bequest, or through inheritance, the basis of the property is divided between the life estate and the remainder. The owner of the life interest is not permitted to deduct any portion of his basis over the life of his interest and thereby to reduce for tax purposes the amount of income he receives from his interest. However, where the life tenant sells his right to receive future income, his basis in the property may be used to reduce the gain he receives on the sale. The purchaser of the life estate is allowed to amortize his basis (his purchase price) and, therefore, is able to offset it against the income he receives from it.

Problem.—This treatment of life estates has the effect of allowing a large portion, and in some cases, almost all of the income from a life estate or similar interest to avoid taxation in those situations where the life tenant sells his interest. This is because the life tenant is not taxed on his income to the extent of his basis and, in addition, the purchaser of this interest is not taxed on most of the income from it because he is allowed to reduce that income by amortization deductions for the purchase price which he pays for the interest. In addition, in some cases the seller's basis has exceeded the amount he received upon its sale, and he has been permitted to take a deductible loss.

House solution.—The bill provides that the entire amount received on the sale or other disposition of a life (or term-of-years) interest in property, or an income interest in a trust (which was acquired by gift, bequest, inheritance, or by a transfer in trust), is to be-taxable, rather than only the excess of the amount received over the seller's basis for his interest. This provision applies to sales or other dispositions after July 25, 1969.

[Page 88]

The House bill, however, does not change present law where a life interest is disposed of as part of a single transaction in which the entire fee interest is transferred (e.g., where a life tenant and remainderman simultaneously join in a sale of the entire property interest) to any person or persons. In such a case, the gain realized by the life tenant is to be measured by the excess of the proceeds received on the disposition over his adjusted basis in the property.

Argument For.—The present tax law has the effect of allowing a large part, and in some cases almost all, of the income from a life estate to avoid taxation in those situations where the life tenant sells his interest. The life tenant is not taxed on the income he receives from the sale because he will usually have a tax basis equal to, or almost equal to, the sales price. This is regarded as particularly undesirable by those who view such transactions as an anticipatory assignment of income rather than as the sale of a property interest.

Argument Against.—A sale of a property interest is involved and therefore it is appropriate in measuring the amount of gain to reduce the proceeds by the amount of the life tenant's basis.

SENATE Finance Committee

Treasury Statements

Hon. Edwin S. Cohen

[Page 76]

Additional changes made by the bill include a provision that life interests received by gift, bequest or inheritance, are not accorded a tax basis when sold. Under the bill, all casualty gains and losses on capital assets and section 1231 property are consolidated for the purposes of determining whether they give rise to an ordinary loss or to a gain which is consolidated with other section 1231 gains and losses. Finally, the bill provides that transfers of franchises will not give rise to capital gain treatment if the transferor retains any significant rights in connection with the transfer.

[Page 79]

In all other respects, we support the capital gain and loss provisions of the bill.

Committee Decisions—Compilation

[Page 37]

Sales of Life Estates.—The Committee also adopted the provision of the House-passed tax bill which relates to the sales of life estates. In general, this provision provides that the entire amount received on the sale or other disposition of a life (or term of years) interest in property, or income interest in trust (whether acquired by gift, bequest, inheritance, or by a transfer in trust), is to be taxable without any reduction for the taxpayer's basis. Presently, only the excess of the amount received over the seller's basis is taxed. The Committee, however, did change the effective date for the provision. Under the Senate version, this provision would become effective as to sales or other dispositions after October 9, 1969 (the House bill would have applied with respect to sales or other distributions after July 25, 1969).

Summary of Bill as Reported by Committee

[Page 78]

8. Sales of Life Estates, Etc.

Present law.—Under present law, when a life estate and remainder interest in property are acquired by gift, by bequest, or through inheritance, the basis of the property is divided between the life estate and the remainder. The owner of the life interest is not permitted to deduct any portion of his basis over the life of his interest and thereby to reduce for tax purposes the amount of income he receives from his interest. However, where the life tenant sells his right to receive future income, his basis in the property may be used to reduce the gain he receives on the sale. The purchaser of the life estate is allowed to amortize his basis (his purchase price) and, therefore, is able to offset it against the income he receives from it.

[Page 79]

Problem.—This treatment of life estates has the effect of allowing a large portion, and in some cases, almost all of the income from a life estate or similar interest to avoid taxation in those situations where the life tenant sells his interest. This is because the life tenant is not taxed on his income to the extent of his basis and, in addition, the purchaser of this interest is not taxed on most of the income from it because he is allowed to reduce that income by amortization deductions for the purchase price which he pays for the interest. In addition, in some cases the seller's basis has exceeded the amount he received upon its sale, and he has been permitted to take a deductible loss.

Finance Committee decision.—The House bill and the committee amendments provide that the entire amount received on the sale or other disposition of a life (or term of years) interest in property or an income interest in a trust (which was acquired by gift, bequest, inheritance or a transfer in trust), is to be taxable, rather than only the excess of the amount received over the seller's basis for his interest.

Neither version of the bill, however, changes present law where a life interest is disposed of as a part of a single transaction in which the entire fee interest is transferred to any other persons. This occurs, for example, where a life tenant and remainderman join in the sale of the entire property interest. In such a case the gain realized by the life tenant is to be measured by the excess of the proceeds received on the sale over his basis for his interest.

The House bill would apply to sales or other dispositions after July 25, 1969. The committee amendment moves this effective date up to October 9, 1969.

Committee Report

[Page 203]

8. Sales of Life Estates, etc. (sec. 516(a) of the bill and sec. 1001 of the code)

Present law.—Under present law, when a life estate and remainder interest in property are acquired by gift, bequest, or inheritance, a so-called “uniform basis” rule is applied with the basis of the property being divided between the life estate and the remainder. As the life estate is used up each year, its basis is reduced, and the basis of the remainder interest is increased in the same amount—hence, the combined basis of the life estate and the remainder interest remains the same from year to year.

The life tenant is not permitted to amortize his basis over the length of the life estate and thereby reduce for tax purposes the amount of income he receives. However, where the life tenant sells his right to receive future income, his basis in the property may be used to reduce the gain he receives on the sale.

The purchaser of the life estate, however, is allowed to amortize his basis (his purchase price) and, therefore, is able to offset it against the income he receives from it.

General reasons for change.—The treatment described above has the effect of allowing a large part, and in some cases, almost all of income from a life estate or similar interest acquired by gift, bequest, or inheritance, to avoid taxation in those situations where the life tenant sells his interest. The life tenant is not taxed on the income to the extent of the basis which he is treated as having in the life estate when he sells it and, in addition the purchaser of the life estate is not taxed on most of the income because he is allowed to reduce that income by amortizing his basis (his purchase price) in the life estate. In addition, in some cases the seller’s basis has exceeded the amount he received upon its sale, and he has been permitted to take a deductible

[Page 204]

loss. The committee agrees with the House that income should not be allowed to completely escape taxation by this means.

Explanation of provision.—The House bill and the committee amendments, in effect, generally provide that the entire amount received on the sale or other disposition of a life (or term of years) interest in property or an income interest in a trust (which was acquired by gift, bequest, inheritance or a transfer in trust) is to be taxable, rather than only the excess of the amount received over the seller’s basis for his interest.

Specifically, the bill provides that for purposes of determining the amount of gain or loss in such a case, any portion of a taxpayer’s adjusted basis determined under the provisions dealing with the basis of property acquired by gift, from a decedent, or by a transfer in trust (secs. 1014 and 1015) is to be disregarded to the extent that the adjusted basis is a portion of the entire adjusted basis of the property. Thus, there is to be no basis to be offset against the proceeds received on a disposition of this type of interest, and, accordingly, the person disposing of the interest must treat the entire amount he receives from the disposition of his interest as a gain.

Neither version of the bill, however, changes present law in the situation where there is a sale or other disposition of a life (or term of years) interest in property (or an income interest in trust) as a part of a single transaction in which the entire interest in the property is transferred to another person or to two or more other persons jointly. Thus, for example, where a life tenant and remainderman hold all of the interests in property which they simultaneously sell in a single transaction, the transaction is to be treated in the same manner as under existing law; that is, the gain realized by the life tenant is to be measured by the excess of the proceeds received on the sale over his adjusted basis in the life estate. The committee agrees with the House that this exception is appropriate, since in this case the purchaser acquires a single entire interest in the property and, therefore, he is not allowed to amortize the separate life interest. Thus, he is taxed on the income from the property.

Committee Report—Individual Views of Senator Albert Gore

[Page 324]

(3) Sales of life estates.—A fundamental rule of the tax laws is that a person cannot convert ordinary income into capital gain by transferring the right to receive the future income.

An exception to this basic rule has been permitted to develop in the case of a person who has the right to income for life from a trust or other property. Present rules permit such a person to sell his income interest and pay capital gains rates. This result is inconsistent with basic tax rules.

The House bill modified the present rule somewhat by providing that the total amount realized on the sale would be treated as capital gain; that is, there would be no reduction in the gain realized for the taxpayer's basis. This provision merely replaces one inconsistent rule with another.

The proper tax treatment of these transactions is to give the tax-payer the benefit of any basis, but to tax all gain as ordinary income under regular rules dealing with transfer of future rights to receive income. The Senate should adopt the proper rule as a substitute for the House provision.

Senate Action

Summary of Senate Amendments

[Page 109]

8. Sates of Life Estates, Etc.

Present law.—Under present law, when a life estate and remainder interest in property are acquired by gift, by bequest, or through inheritance, the basis of the property is divided between the life estate and the remainder. The owner of the life interest is not permitted to deduct any portion of his basis over the life of his interest and thereby to reduce for tax purposes the amount of income he receives from his interest. However, where the life tenant sells his right to receive future income, his basis in the property may be used to reduce the gain he receives on the sale. The purchaser of the life estate is allowed to amortize his basis (his purchase price) and, therefore, is able to offset it against the income he receives from it.

Problem.—This treatment of life estates has the effect of allowing a large portion, and in some cases, almost all of the income from a life estate or similar interest to avoid taxation in those situations where the life tenant sells his interest. This is because the life tenant is not taxed on his income to the extent of his basis and, in addition, the purchaser of this interest is not taxed on most of the income from it because he is allowed to reduce that income by amortization deductions for the purchase price which he pays for the interest. In addition, in some cases the seller's basis has exceeded the amount he received upon its sale, and he has been permitted to take a deductible loss.

[Page 110]

Senate amendments.—Both versions of the bill, in effect, generally provide that the entire amount received on the sale or other disposition of a life (or term of years) interest in property or an income interest in trust (which was acquired by gift, bequest, inheritance or a transfer in trust) is to be taxable, rather than only the excess of the amount received over the seller's basis for his interest.

Neither version of the bill, however, changes present law in the situation where there is a sale or other disposition of a life (or term of years) interest property (or an income interest in trust) as a part of a single transaction in which the entire interest in the property is transferred to another person or to two or more other persons jointly.

The Finance Committee amendments, make only one change in the House bill. They apply to sales or other dispositions after October 9, 1969. The House bill is effective with respect to sales or other dispositions made after July 25, 1969.

HOUSE-SENATE CONFERENCE

Conference Action

Conference Report

[Page 318]

6. Sales of life estates, etc. (sec. 1001 of the code)

The House bill provides that the entire amount received on the sale or other disposition of a life (or term of years) interest in property or an income interest in trust, if such interest was acquired by gift, bequest, inheritance, or a transfer in trust, is to be taxable, rather than only the excess of the amount received over the seller's basis for his interest.

[Page 319]

The provision does not, however, change present law in the situation where there is a sale or other disposition of a life (or term of years) interest in property or an income interest in trust where such sale is a part of a single transaction in which the entire interest in the property is transferred to another person or to two or more other persons jointly.

The Senate amendment makes the provision applicable to sales or other dispositions after October 9, 1969, rather than with respect to sales or other dispositions made after July 25, 1969, as under the House bill.

The conference substitute (sec. 516(a) of the substitute and sec. 1001 of the code) follows the Senate amendment.

POST-ENACTMENT

Joint Committee General Explanation of The Tax Reform Act

[Page 174]

7. Sales of Life Estates, Etc. (sec. 516(a) of the Act and sec. 101 of the code)

Prior law.—When a life estate and remainder interest in property are acquired by gift, bequest, or inheritance, a so-called "uniform basis" rule is applied with the basis of the property being divided between the life estate and the remainder. As the life estate is used up each year, its basis is reduced, and the basis of the remainder

[Page 175]

interest is increased in the same amount; hence, the combined basis of the life estate and the remainder interest remains the same from year to year.

The life tenant in this case is not permitted to amortize his basis over the period of the life estate and thereby reduce for tax purposes the amount of income he reports. However, under prior law, where the life tenant sold his right to receive future income, his basis in the property at the time of sale was used to reduce the gain he received on the sale. The purchaser of the life estate, however, is allowed to amortize his basis (his purchase price) and, therefore, is able to offset it against the income he receives from it.

General reasons for change.—The treatment described above had the effect of allowing a large part, and in some cases, almost all of the income from a life estate or similar interest acquired by gift, bequest, or inheritance, to avoid taxation in those situations where the life tenant sold his interest. The life tenant was not taxed on the income to the extent of the basis which he was treated as having in the life estate when he sold it. In addition, the purchaser of the life estate was not taxed on most of the income because he was allowed to reduce that income by amortizing his basis (his purchase price) in the life estate. In some cases the seller's basis even exceeded the amount he received upon its sale, and, as a result, he was permitted to take a deductible loss.

Explanation of provision.—In general, the Act provides that the entire amount received on the sale or other disposition of a life (or term of years) interest in property or an income interest in a trust (which was acquired by gift, bequest, inheritance or a transfer in trust) is taxable, rather than only the excess of the amount received over the seller's basis for his interest.

Specifically, the Act provides that for purposes of determining the amount of gain or loss in such a case, any portion of a taxpayer's adjusted basis determined under the provisions dealing with the basis of property acquired by gift, from a decedent, or by a transfer in trust (secs. 1014 and 1015) is to be disregarded to the extent that the adjusted basis is a portion of the entire adjusted basis of the property. Thus, in the type of situations considered here, there is no basis to be offset against the proceeds received on a disposition of this type of interest; and, accordingly, the person disposing of the interest must treat the entire amount he receives from the disposition of his interest as a gain.

The Act does not, however, change present law in the situation where there is a sale or other disposition of a life (or term of years) interest in property (or an income interest in trust) as a part of a single transaction in which the entire interest in the property is transferred to another person or to two or more other persons jointly. Thus, for example, where a life tenant and remainderman hold all of the interests in property which they simultaneously sell in a single transaction, the transaction is to be treated in the same manner as under existing law; that is, the gain realized by the life tenant is to be measured by the excess of the proceeds received on the sale over his adjusted basis in the life estate. This exception appeared appropriate, since in this case the purchaser acquires a single entire interest in the property and, therefore, he is not allowed to amortize the separate life interest. Thus, he is taxed on the income from the property.

Note that Code § 1001(e) refers to basis determined referring to Code § 1014 (property received by reason of death), 1015 (property received as a gift), and 1041 (property received from a spouse or former spouse). Therefore, it does not apply to the retained interest of the person who creates and transfers a split-interest. However, paragraph (c) in Examples (7) and (8) of Reg. § 1.1014-5(d) imply that the grantor was able to use basis only because all interests in the trust were sold; based on the statute's plain terms, I believe that any such an inference would constitute regulatory overreach (plus, Examples are supposed to illustrate principles set forth in the regulation, and no such inference is set forth anywhere).

Implementing this rule, Reg. § 1.1001-1(f), "Sale or other disposition of a term interest in property," which was adopted by T.D. 7142 (9/23/1971) without any explanation,[2974] provides:

(1) *General rule*. Except as otherwise provided in paragraph (f)(3) of this section, for purposes of determining gain or loss from the sale or other disposition after October 9, 1969, of a term interest in property (as defined in paragraph (f)(2) of this section), a taxpayer shall not take into account that portion of the adjusted basis of such interest that is determined pursuant, or by reference, to section 1014 (relating to the basis of property acquired from a decedent), section 1015 (relating to the basis of property acquired by gift or by a transfer in trust), or section 1022 (relating to the basis of property acquired from certain decedents who died in 2010) to the extent that such adjusted basis is a portion of the adjusted uniform basis of the entire property (as defined in § 1.1014-5). Where a term interest in property is transferred to a corporation in connection with a transaction to which section 351 applies and the adjusted basis of the term interest:

(i) Is determined pursuant to sections 1014, 1015, or 1022; and

(ii) Is also a portion of the adjusted uniform basis of the entire property, a subsequent sale or other disposition of such term interest by the corporation will be subject to the provisions of section 1001(e) and this paragraph (f) to the extent that the basis of the term interest so sold or otherwise disposed of is determined by reference to its basis in the hands of the transferor as provided by section 362(a). See paragraph (f)(2) of this section for rules relating to the characterization of stock received by the transferor of a term interest in property in connection with a transaction to which section 351 applies.[2975] That portion of the adjusted uniform basis of the entire property that is assignable to such interest at the time of its sale or other disposition shall be determined under the rules provided in § 1.1014-5. Thus, gain or loss realized from a sale or other disposition of a term interest in property shall be determined by comparing the amount of the proceeds of such sale with that part of the adjusted basis of such interest that is not a portion of the adjusted uniform basis of the entire property.

(2) *Term interest defined*. For purposes of section 1001(e) and this paragraph, a "term interest in property" means -

(i) A life interest in property,

(ii) An interest in property for a term of years, or

(iii) An income interest in a trust.

Generally, subdivisions (i), (ii), and (iii) refer to an interest, present or future, in the income from property or the right to use property which will terminate or fail on the lapse of time, on the occurrence of an event or contingency, or on the failure of an event or

[2974] Proposed regulations were published June 24, 1971 at 36 F.R. 12018-12019. They did not include any explanation, either. Reg. § 1.1001-1(f)(3) does not differ from its proposed form; I have not compared the other provisions.
[2975] [My footnote:] Code § 351 is described in part II.M.2.a Initial Incorporation – Generally, which is the beginning of part II.M.2 Buying into or Forming a Corporation.

contingency to occur. Such divisions do not refer to remainder or reversionary interests in the property itself or other interests in the property which will ripen into ownership of the entire property upon termination or failure of a preceding term interest. A "term interest in property" also includes any property received upon a sale or other disposition of a life interest in property, an interest in property for a term of years, or an income interest in a trust by the original holder of such interest, but only to the extent that the adjusted basis of the property received is determined by reference to the adjusted basis of the term interest so transferred.

(3) *Exception*. Paragraph (1) of section 1001(e) and subparagraph (1) of this paragraph shall not apply to a sale or other disposition of a term interest in property as a part of a single transaction in which the entire interest in the property is transferred to a third person or to two or more other persons, including persons who acquire such entire interest as joint tenants, tenants by the entirety, or tenants in common. See § 1.1014-5 for computation of gain or loss upon such a sale or other disposition where the property has been acquired from a decedent or by gift or transfer in trust.

(4) *Illustrations*. For examples illustrating the application of this paragraph, see paragraph (d) of § 1.1014-5.

Reg. § 1.1001-1(f)(3) requires a transfer "to a third person or to two or more other persons, including persons who acquire such entire interest as joint tenants, tenants by the entirety, or tenants in common." This narrows Code § 1001(e)(3), which requires a transfer "to any person or persons."

Although everything above in this part II.J.18.d treats a beneficial interest as an asset, what kind of asset is it? Rev. Rul. 72-243 held:[2976]

> The Internal Revenue Service will follow the decision of the United States Court of Appeals for the Second Circuit in the case of *Beulah Eaton McAllister v. Commissioner*, 157 F.2d 235 (1946), *certiorari denied*, 330 U.S. 826 (1946), which held that the proceeds received by the life tenant of a testamentary trust in consideration for the transfer of her entire interest in the trust to the remainderman, are to be treated as an amount realized from the sale or exchange of a capital asset under section 1222 of the Internal Revenue Code of 1954.

Letter Ruling 8316135 involved the following facts:

> … a ruling is requested concerning the sale of certain interests in L to M, a foreign charity not subject to United States taxation.
>
> The information provided indicates that prior to his death on January 12, 1978, A, your father, created L. It is represented that L, a foreign organization, would be taxable as a trust if it conducted activities in the United States.
>
> Article 1 of the by-laws of L provides that during his life all rights to L's assets and net income thereof belong to A. Article 3 provides that upon A's death, B, A's wife, and you

[2976] Thus, a beneficial interest itself is a capital asset belonging to the beneficiary, whereas the trust's assets are legally titled in the trustee's name and belong to the trust. See fn 2945 in the overview found in part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting.

are to share L's net income as equal life beneficiaries. Articles 4 and 5 provide that upon the death of A and B, you or your children, if any, shall have all the rights to L's assets and income. Article 6 provides that the net income and assets of L shall be transferred to M in the event of the death of all other designated beneficiaries. Thus, M presently possesses a contingent remainder interest in L.

> You and B propose to sell your interests in L to M. It is represented that subsequent to this proposed sale, M will own the entire fee interest in L. It is also represented that your adjusted basis in your interests in L, and B's adjusted basis in her interest in L are determined pursuant to section 1014 of the Internal Revenue Code.

Letter Ruling 8316135 held:[2977]

> The exception in section 1001(e)(3) for the simultaneous sale of the life interest and the remainder interest in a single transaction is appropriate because "in this case the purchaser acquires a single entire interest in property and, therefore, he is not allowed to amortize the separate life interest". H. Rep. No. 91-413, 91st Cong., 1st Sess. 157 (1969), 1969-3 C.B. 200, 298.
>
> In the instant case subsequent to its purchase of your interest and B's interest in L, M will own the entire fee interest in L and, thus, would not be able to amortize any portion of this fee interest.
>
> Based upon the information submitted and representations made, we conclude as follows:
>
> 1. The amount of gain or loss you will recognize from your proposed sale of your interests in L will be measured by the difference between the amount realized on the sale of your life interest in L and your remainder interest in L and your adjusted basis in your life estate in L and your remainder interest in L.
>
> 2. The amount of gain or loss B will recognize from her proposed sale of her interest in L will be measured by the difference between the amount realized on the sale of her life interest in L and her adjusted basis in her life estate in L.

Letter Ruling 8316135 did not cite Reg. § 1.1001-1(f)(3) (which was adopted in 1971) or compare it to Code § 1001(e)(3). Implicit in its ruling is that a contingent remainderman qualifies as a "third person." Also, only the life tenants were selling their interests; the ruling was silent as to how the contingent remainderman acquired the other remaindermen's interests.

Letter Ruling 8448059 involved the following facts:

> Your late wife died testate on August 6, 1982. At the time of her death, she owned a certain parcel of improved real estate (the "Real Estate"). Pursuant to her will and codicil the Real Estate was devised and bequeathed as follows: a life estate to you (as "Life Tenant") with the remainder in equal shares to each of A, B, C, and D. Presently, you

[2977] In this part II.J.18.d, see text preceding and accompanying fn 2999 to explain the comment in the legislative history referring to amortization.

> and each of A, B, & C propose to sell your respective life estate and remainder interests to D…

Letter Ruling 8448059 reviewed Reg. § 1.1014-5 - especially Reg. § 1.1014-5(c) - Example (5)(b), and held:

> … if you consummate the proposed sale of your life estate to D, your section 1014 basis will be disregarded (you will have a zero basis for purposes of the sale); your taxable gain will be an amount equal to the sale price of the life estate; and D will have allowable amortization deductions against his basis in the life estate, which may be taken over the period of your remaining life expectancy. (Should D ever convert the property to business use, such deductions will be actually allowed.)

Letter Ruling 8948023 involved the following facts regarding charitable remainder unitrusts:

> A, B, C, and D wish to terminate the trusts. It is represented that M and N have agreed to the proposed termination. It is contemplated that one of the apartment buildings used to fund the Trusts will be sold and some of the proceeds therefrom will be distributed to M and N in satisfaction of their rights to the remainder interests in the Trusts. The balance of the cash and the other apartment building will be distributed to A, B, C, and D in satisfaction of their rights to the unitrusts amounts from the Trusts.

Letter Ruling 8948023 reviewed Reg. § 1.1014-5 – especially Reg. § 1.1014-5(c), Example (5), and held:

> In this case, A and B are selling their interests in Trust 1 to the remaindermen, M and N. C and D are selling their interests in Trust 2 and Trust 3, respectively, to the remainderman, N. Provided the cash and the property interests received by A, B, C, and D are distributed to each of them in accordance with their respective interests in the Trusts, the amount each realizes from the sale of his or her interest in the Trusts is the amount of cash and the fair market value of the property received by each.
>
> Pursuant to section 1001(e)(1) of the Code, the portion of the adjusted uniform basis assigned to the respective interests of A, B, C, and D in the Trusts is disregarded. The exception contained in section 1001(e)(3) is not applicable, because the entire interest in the Trusts' assets is not being sold, or otherwise disposed of, to a third party. A, B, C, and D have no basis in their respective interests in the Trusts.

Citing Reg. § 1.01014-5, Letter Ruling 9512002 discussed an S corporation's sale of a less-than-5% remainder interest in a nongrantor charitable lead trust to a related party:

> In the present case, Corporation's sale to S of its entire reversionary interest in Trust will be contemporaneous with its transfer of Parcels to Trust. Thus, for purposes of determining the amount of gain or loss on the sale of the reversionary interest, the basis of the reversion is computed by multiplying the uniform basis by the appropriate factor to be found in the actuarial tables issued under section 7520 of the Code.

Rev. Rul. 98-8, in addressing the gift tax consequences to the surviving spouse of the acquisition by the surviving spouse of the remainder interest in a trust subject to a QTIP election, recited the following facts:

> The decedent, D, died in 1993 survived by S, D's spouse. Under the terms of D's will, a trust (the QTIP Trust) was established under which S was to receive all of the trust income, payable at least annually, for S's life. On S's death, the remainder was to be distributed outright to C, D's adult child.
>
> S was not given a general power of appointment over the trust property.
>
> On the federal estate tax return filed for D's estate, the executor made an election under section 2056(b)(7) to treat the trust property as QTIP, and a marital deduction was allowed to D's estate for the value of the property passing from D to the QTIP Trust.
>
> Subsequently, S, C, and the trustee of the QTIP Trust entered into the following transaction: (1) S acquired C's remainder interest in the QTIP Trust; (2) S gave C a promissory note in the face amount of x dollars (the value of the remainder interest) for the remainder interest; (3) the trustee distributed all of the QTIP Trust assets (having a value of x + y dollars) to S; and (4) S thereupon paid x dollars from those assets to C in satisfaction of the promissory note.
>
> At the conclusion of the transaction, the QTIP Trust was terminated; S held QTIP Trust assets having a value of y dollars (which was equal to the value of S's life interest in the trust); and C held assets having a value of x dollars (which was equal to the value of the remainder interest in the trust). S contended that the transaction was not subject to gift tax because S received full and adequate consideration (the x dollar remainder interest in the QTIP Trust) in exchange for the x dollar promissory note given by S to C.

Inserting Code § 2519[2978] into the mix, Rev. Rul. 98-8 reasoned:

> The estate tax marital deduction provisions are intended to provide a special tax benefit that allows property to pass to the surviving spouse without the decedent's estate paying tax on its value. Tax is deferred on the transfer until the surviving spouse either dies or makes a lifetime disposition of the property. Under either circumstance, a transfer (estate or gift) tax is paid. *United States v. Stapf*, 375 U.S. 118, 128 (1963), 1964-1 (Part 1) C.B. 535, 537; *Estate of Clayton v. Commissioner*, 976 F.2d 1486, 1491 (5th Cir. 1992); *Estate of Letts v. Commissioner*, 109 T.C. 290, ___ (1997) ("It is a basic policy of the marital deduction that property that passes untaxed from a predeceasing spouse to a surviving spouse is included in the estate of the surviving spouse.")
>
> The statutory scheme of the QTIP provisions is consistent with this congressional intent. Thus, a marital deduction is allowed under section 2056(b)(7) for property passing from a decedent to a QTIP trust in which the surviving spouse possesses a lifetime income interest. Sections 2519 and 2044 act to defer the taxable event on the marital deduction

[2978] See part II.H.2.c QTIP Trusts - Code § 2519 Trap, which cites Rev. Rul. 98-8 at fn 2073. It also mentioned that Letter Ruling 199908033 asserted that the remaindermen's consent to terminating a QTIP trust such that the surviving spouse received all of the property without restriction, without receiving consideration for that consent, constitutes a gift of their remainder interest.

property only so long as the surviving spouse continues to hold the lifetime income interest.

Under section 2519, if a surviving spouse disposes of any part of the qualifying income interest, the spouse is treated as making a gift of the remainder interest in the underlying property (*i.e.*, all interests in the property other than the income interest). Correspondingly, under section 2511, the disposition of the income interest by the spouse is treated as a gift, to the extent the income interest is transferred to another for less than adequate consideration.

The term “disposition,” as used in section 2519, applies broadly to circumstances in which the surviving spouse’s right to receive the income is relinquished or otherwise terminated, by whatever means. See H. Rep. No. 201, 97th Cong., 1st Sess. 161 (1981) that states:

The bill provides that property subject to a [QTIP election] will be subject to transfer taxes at the earlier of (1) the date on which the spouse disposes (either by gift, sale, or otherwise) of all or part of the qualifying income interest, or (2) upon the spouse’s death.

A commutation, which is a proportionate division of trust property between the life beneficiary and remainderman based on the respective values of their interests is, in the context of a QTIP trust, a taxable disposition by the spouse of the qualifying income interest, resulting in a gift under section 2519 of the value of the remainder interest. The commutation of the spouse’s income interest in the QTIP trust is essentially a sale of the income interest by the spouse to the trustee (or the remainderman) in exchange for an amount equal to the value of the income interest. Sales and commutations are expressly characterized as dispositions in the applicable legislative history and regulations. section 25.2519-1(g), Example 2 (illustrating that the sale by the spouse of the spouse’s income interest to the trust remaindermen is a disposition of the income interest); section 25.2519-1(f) providing that “[T]he sale of qualified terminable interest property, followed by the payment to the donee-spouse of a portion of the proceeds equal to the value of the donee- spouse’s income interest, is considered a disposition of the qualifying income interest”. See also, *Estate of Novotny v. Commissioner*, 93 T.C. 12 (1989), in which the surviving spouse and remainderman divided the sale proceeds of QTIP property proportionately on the basis of the respective values of their interests; the court indicated that the commutation constituted a disposition by the spouse of the income interest for purposes of section 2519 and was thus subject to gift tax.

There is little distinction between the sale and commutation transactions treated as dispositions in the regulations and the transaction presented here, where S acquired the remainder interest. In both cases, after the transaction the spouse’s income interest in the trust is terminated and the spouse receives outright ownership of property having a net value equal to the value of the spouse’s income interest. Similarly, the remainderman receives ownership of property equal in value to the remainder interest. Thus, the transaction in the instant case essentially effectuates a commutation of S’s income interest in the trust, a transaction that is a disposition of S’s income interest under section 2519. Therefore, under section 2519, S is regarded as making a gift of x dollars, the value of the remainder interest in the QTIP Trust. section 25.2519-1(f).

This conclusion that S has made a gift is also supported by an additional analysis. S acquired an asset (the remainder interest in the QTIP Trust) that is already subject to inclusion in S's transfer tax base under section 2044. In analogous situations, the courts have recognized that the receipt of an asset that does not effectively increase the value of the recipient's gross estate does not constitute adequate consideration for purposes of the gift and estate tax. See *Commissioner v. Wemyss*, 324 U.S. 303, 307 (1945), 1945 C.B. 416, ("The section taxing as gifts transfers that are not made for "adequate and full [money] consideration" aims to reach those transfers which are withdrawn from the donor's estate.")

A companion case to *Commissioner v. Wemyss*, *Merrill v. Fahs*, 324 U.S. 308 (1945), 1945 C.B. 418, and the cases that preceded it, involved situations where A, an individual, transferred property to B, A's spouse (or future spouse), in exchange for B's relinquishment of marital rights in A's property. The Court held that B's relinquishment of the marital rights did not constitute adequate and full consideration for A's transfer because the assets subject to the marital rights were already includible in A's taxable estate. The property subject to dower and marital rights is clearly included in the gross estate of the property owner. Thus, to conclude that the relinquishment of dower and marital rights by the spouse of the property owner constituted adequate and full consideration for a transfer by the property owner for gift tax purposes would effectively subvert the legislative intent and statutory scheme of the gift tax provisions. *Merrill v. Fahs*, at 311-312. See also, *Commissioner v. Bristol*, 121 F.2d 129, 136 (1st Cir. 1941).

Likewise, in the present situation, property subject to the QTIP election was intended to be subject to either gift or estate tax. S's receipt of the remainder interest does not increase the value of S's taxable estate because that property is already subject to inclusion in S's taxable estate under section 2044. Rather, S's issuance of the note results in a depletion of S's taxable estate that is not offset by S's receipt of the remainder interest. Thus, for estate and gift tax purposes, S's receipt of the remainder interest cannot constitute adequate and full consideration under section 2512 for the promissory note transferred by S to C. As was the case in *Merrill v. Fahs*, any other result would subvert the legislative intent and statutory scheme underlying section 2056(b)(7). Therefore, under section 2511, S has made a gift to C equal to the value of the promissory note S gave to C.

In addition, a gift tax would be imposed under the above alternative rationales even if S acquired only a portion of C's remainder interest; *e.g.*, S acquired 60 percent of C's remainder interest. If, under applicable state law, such a transaction results in a partial termination of the trust, S would be treated as disposing of part of S's income interest in the trust, and the commutation analysis would apply. See, *e.g.*, Restatement (Second) of Trusts section 340(2) (1959). See also, section 25.2519-1(g), Example 4, (illustrating the estate and gift tax consequences of the disposition of a portion of the spouse's income interest). If the trust does not terminate, S would nonetheless be treated as making a transfer under sections 2511 and 2512 for less than adequate and full consideration to the extent of the value of the property or cash S transfers in exchange for the partial remainder interest.

Further, the conclusion of this revenue ruling would be the same if S transferred to C property or cash rather than the promissory note. The economic effect of the transaction is identical, regardless whether S uses S's own funds to finance the transaction or gives a promissory note and discharges the note using some of the QTIP Trust assets received in the transaction. Thus, the result is the same for transfer tax purposes.

Rev. Rul. 98-8 held:

> If a surviving spouse acquires the remainder interest in a trust subject to a QTIP election under section 2056(b)(7) in connection with the transfer by the surviving spouse of property or cash to the holder of the remainder interest, the surviving spouse makes a gift both under section 2519 and sections 2511 and 2512. The amount of the gift is equal to the greater of (i) the value of the remainder interest (pursuant to section 2519), or (ii) the value of the property or cash transferred to the holder of the remainder interest (pursuant to sections 2511 and 2512).

Letter Ruling 200723014, which applied Rev. Rul. 98-8 for gift tax purposes and respected a trust division to apply Code § 2519 only to the commuted trust, had a favorable income tax outcome for the commutation:[2979]

> If, under local law, the trustee is authorized to terminate Marital Trust B and distribute its assets to the remainder and life beneficiaries, the proposed termination and distribution will be by operation of law and will not be a sale or other disposition with respect to Marital Trust B. Thus, based upon the facts submitted and the representations made, and assuming the transaction is effectuated substantially as described, we conclude that the termination and distribution will not be an income recognition event for Marital Trust B under § 1001. Further, we conclude that the termination of Marital Trust B and the distribution of its property to Spouse and Child 1 is not a distribution described in § 1.661(a)-2(f) and therefore does not result in the realization of gain or loss by Marital Trust B.

Letter Ruling 200152018 held that the swap of a unitrust interest for an annuity interest was eligible for a charitable income tax deduction to the extent that the present value of the former exceeded the present value of the latter. It also held:

> In the instant case, because Taxpayer's basis in his unitrust interest is in a trust, that basis is determined pursuant to section 1015. Thus, in determining Taxpayer's basis in his unitrust interest upon his transfer of the unitrust interest to the Academy in exchange for an annuity interest from the Academy, the portion of the adjusted uniform basis assigned to Taxpayer's unitrust interest will be disregarded pursuant to section 1001(e)(1). The exception to section 1001(e)(1) in section 1001(e)(3) is not

[2979] This is consistent with the distinction I draw in part II.J.18.f Commutation vs Mere Division between trust terminations in which the trustee merely makes authorized distributions, as contrasted with a trustee changing beneficial interests with the beneficiaries' consent. Letter Ruling 200723014 applied carryover basis to the distributed assets:

> Based upon the facts submitted and the representations made, and assuming the transaction is effectuated substantially as described, we conclude that the termination of Marital Trust B and the non-prorata distribution of its cash and noncash property to Spouse and Child 1 is a distribution described in § 643(e)(1) (unless an election is made under § 643(e)(3)) and therefore the basis of such property received is the adjusted basis of such property in the hands of Marital Trust B immediately before the distribution. Spouse and Child 1 will take into their gross income their respective pro rata shares of Marital Trust B's distribution as provided by §§ 643(e)(2) and 662.

> applicable, because the remainder beneficiary is not receiving the entire interest in Trust in a single transaction.
>
> As stated above, Taxpayer's unitrust interest is a capital asset. The annuity Taxpayer will receive from Academy will be nonassignable or will be assignable only to Academy, and Taxpayer will be the only annuitant. Accordingly, upon the transfer of his unitrust interest in the Trust to the Academy in exchange for an annuity payable by the Academy, Taxpayer will have long-term capital gain in the amount of the value of the annuity, reported as provided in example (8) of section 1.1011-2(c) of the regulations.

Letter Ruling 200314021 held:

> Upon its termination, Trust proposes to distribute to Taxpayer as the income beneficiary and to Foundation as the remainder beneficiary lump sums equal to the present value of their respective interests on the date of termination. Trust represents that the values will be determined using the discount rate in effect under Section 7520 on the date of termination and using the methodology under Section 1.664-4 of the Income Tax Regulations for valuing interests in charitable remainder trusts…
>
> … Taxpayer is selling his interest in Trust to the remainderman. Provided that the money and other property received by Taxpayer are distributed to Taxpayer in accordance with his interest in Trust, the amount Taxpayer will realize from the sale of his interest in Trust is the amount of money and the fair market value of the property received by Taxpayer.
>
> Pursuant to Section 1001(e)(1), the portion of the adjusted uniform basis assigned to Taxpayer's interest in Trust is disregarded. The exception contained in Section 1001(e)(3) is not applicable, because the entire interest in Trust's assets is not being sold, or otherwise disposed of, to a third party. Accordingly, Taxpayer will be treated as though he has no basis in his interest in Trust and, therefore, Taxpayer will realize gain under Section 1001(c) in the amount received from the disposition of his interest in Trust.

Letter Ruling 200127023 was similar to Letter Ruling 200314021.

Letter Ruling 200833012, after acknowledging the rules in Code § 1001(e)(3) and Reg. § 1.1001-1(f)(3), held:

> Although the proposed transaction takes the form of a distribution of the present values of the respective interests of A, B, and the charities, in substance it is a sale of A and B's interest to the charities. The amount received by A and B as a result of the termination of Trust is an amount received from the sale or exchange of a capital asset. Under § 1015(b), A and B's basis in the life estate is a portion of the entire basis of the property, and the disposition of A and B's interest is not part of a transaction in which the entire interest in Trust is transferred to a third party. Therefore, under § 1001(e), A and B's adjusted basis in their interest is disregarded. A and B's holding period in the life interest exceeds one year. Accordingly, under § 1222(3), the entire amount realized by A and B as a result of the early termination of Trust will be long-term capital gain.
>
> This ruling is conditioned on any assets distributed in-kind from Trust being distributed on a pro-rata basis between A, B, and the charities.

Similar holdings were in Letter Rulings 200827009,[2980] 200739004,[2981] 200733014,[2982] 200727013,[2983] 200648017,[2984] 200648016,[2985] 200441024,[2986] and 200403051.[2987]

Reg. § 1.1001-1(f)(4) refers to Reg. § 1.1014-5(d), which also effectuates the rest of Reg. § 1.1014-5. Let's go through that first:

Reg. § 1.1014-5(a), "Sale or other disposition of a life interest, remainder interest, or other interest in property acquired from a decedent," provides:

(1) Except as provided in paragraph (b) or (c) of this section with respect to the sale or other disposition after October 9, 1969, of a term interest in property, gain or loss from a sale or other disposition of a life interest, remainder interest, or other interest in property acquired from a decedent is determined by comparing the amount of the proceeds with the amount of that part of the adjusted uniform basis which is

---

[2980] "A is assigning A's income interest in Trust to Charity in exchange for a distribution equal to the present value of the unitrust income interest. Because the disposition of A's interest is not part of a transaction in which the entire interest in Trust is transferred to a third party, the portion of the uniform adjusted basis assigned to A's income interest is disregarded under § 1001(e)."

[2981] "Accordingly, although the proposed transaction takes the form of a distribution of the present values of the respective interests of each Beneficiary and the Charity, it is in substance a sale of each Beneficiary's unitrust interest to the Charity, the remainder beneficiary. Because the disposition of each Beneficiary's interest is not part of a transaction in which the entire interest in the Trust is transferred to a third party, the adjusted basis in each Beneficiary's interest is disregarded under § 1001(e)(1) in determining gain realized by each Beneficiary."

[2982] "In the present case, although the proposed transaction takes the form of a distribution of the present values of the respective interests of Grantors and Charity, in substance it is a sale of Grantors' interest to Charity, the remainder interest holder. The amount received by Grantors as a result of the termination of Trust is an amount realized from the sale or exchange of a capital asset. Rev. Rul. 72-243. If, as represented by Grantors, Grantors' basis in the unitrust income interest is a portion of the entire basis of the property as determined under §1015(b), Grantors' adjusted basis in their interest is disregarded under § 1001(e) because the disposition is not part of a transaction in which the entire interest in Trust is transferred to a third party. Consequently, if Grantors' adjusted basis is disregarded under § 1001(e), the entire amount realized by Grantors as a result of the early termination of Trust will be gain to Grantors."

[2983] Similar to fn 2982.

[2984] "Although the proposed transaction takes the form of a distribution of the present values of the respective interests of Granddaughter 1, A, B, C, D, and E, in substance it is a sale of Granddaughter 1, D and E's interests to A, B, and C, the remainder interest holders entitled to receive Trust 1 assets at termination under the terms of Trust 1. The amounts received by Granddaughter 1, D and E as a result of the termination of Trust 1 are amounts received from the sale or exchange of a capital asset. Rev. Rul. 72-243. Because Granddaughter 1's basis in the income interest of Trust 1 is a portion of the entire basis of the property under section 1015(b), and because the disposition of Granddaughter 1's term interest is not part of a transaction in which the entire interest in Trust 1 is transferred to a third party, Granddaughter 1's adjusted basis in Granddaughter 1's interest in Trust 1 is disregarded under section 1001(e)."

[2985] Completely or substantially the same as the quote in fn 2984.

[2986] "Although the proposed transaction takes the form of a distribution of the present values of the respective interests of X and Foundation, in substance it is a sale of X's interest to Foundation, the remainder interest holder. The amount received by X as a result of the termination of Trust is an amount received from the sale or exchange of a capital asset. Because X's basis in the unitrust income interest is a portion of the entire basis of the property under § 1015(b), and because the disposition of X's interest is not part of a transaction in which the entire interest in Trust is transferred to a third party, X's adjusted basis in X's interest is disregarded under § 1001(e)."

[2987] Similar to fn 2982.

assignable to the interest sold or otherwise disposed of. The adjusted uniform basis is the uniform basis of the entire property adjusted to the time of sale or other disposition of any such interest as required by sections 1016 and 1017. The uniform basis is the unadjusted basis of the entire property determined immediately after the decedent's death under the applicable sections of part II, subchapter O, chapter 1 of the Code.

(2) Except as provided in paragraph (b) of this section, the proper measure of gain or loss resulting from a sale or other disposition of an interest in property acquired from a decedent is so much of the increase or decrease in the value of the entire property as is reflected in such sale or other disposition. Hence, in ascertaining the basis of a life interest, remainder interest, or other interest which is sold or otherwise disposed of, the uniform basis rule contemplates that proper adjustments will be made to reflect the change in relative value of the interests on account of the passage of time.

(3) The factors set forth in the tables contained in § 20.2031-7 or, for certain prior periods, § 20.2031-7A, of Part 20 of this chapter (Estate Tax Regulations) shall be used in the manner provided therein in determining the basis of the life interest, the remainder interest, or the term certain interest in the property on the date such interest is sold. The basis of the life interest, the remainder interest, or the term certain interest is computed by multiplying the uniform basis (adjusted to the time of the sale) by the appropriate factor. In the case of the sale of a life interest or a remainder interest, the factor used is the factor (adjusted where appropriate) which appears in the life interest or the remainder interest column of the table opposite the age (on the date of the sale) of the person at whose death the life interest will terminate. In the case of the sale of a term certain interest, the factor used is the factor (adjusted where appropriate) which appears in the term certain column of the table opposite the number of years remaining (on the date of sale) before the term certain interest will terminate.

Reg. § 1.1014-5(b), "Sale or other disposition of certain term interests," provides:

(1) *In general*. In determining gain or loss from the sale or other disposition after October 9, 1969, of a term interest in property (as defined in § 1.1001-1(f)(2)) the adjusted basis of which is determined pursuant, or by reference, to section 1014 (relating to the basis of property acquired from a decedent), section 1015 (relating to the basis of property acquired by gift or by a transfer in trust), or section 1022 (relating to the basis of property acquired from certain decedents who died in 2010), that part of the adjusted uniform basis assignable under the rules of paragraph (a) of this section to the interest sold or otherwise disposed of shall be disregarded to the extent and in the manner provided by section 1001(e) and § 1.1001-1(f).

(2) *Effective/applicability date*. The provisions of paragraph (b)(1) of this section relating to section 1022 are effective on and after January 19, 2017. For rules before January 19, 2017, see § 1.1014-5 as contained in 26 CFR part 1 revised as of April 1, 2016.

Explaining Reg. § 1.1014-5(c) below, T.D. 9729 (8/12/2015) said:

These final regulations provide a special rule for determining the basis in certain CRT term interests in transactions to which section 1001(e)(3) applies. Such transactions are those in which the sale or other disposition of the CRT term interest is part of a transaction in which all interests in the CRT are transferred. In these cases, these final regulations provide that the basis of a term interest of a taxable beneficiary is the portion of the adjusted uniform basis assignable to that interest reduced by the portion of the sum of the following amounts assignable to that interest: (1) the amount of undistributed net ordinary income described in section 664(b)(1);and (2) the amount of undistributed net capital gain described in section 664(b)(2). These final regulations do not affect the CRT's basis in its assets but rather are for the purpose of determining a taxable beneficiary's gain arising from a transaction described in section 1001(e)(3). The rules in these final regulations are limited in application to charitable remainder annuity trusts and charitable remainder unitrusts as defined in section 664.

Reg. § 1.1014-5(c), "Sale or other disposition of a term interest in a tax-exempt trust," provides:

(1) *In general*. In the case of any sale or other disposition by a taxable beneficiary of a term interest (as defined in § 1. 1001-1(f)(2)) in a tax-exempt trust (as defined in paragraph (c)(2) of this section) to which section 1001(e)(3) applies, the taxable beneficiary's share of adjusted uniform basis, determined as of (and immediately before) the sale or disposition of that interest, is -

(i) That part of the adjusted uniform basis assignable to the term interest of the taxable beneficiary under the rules of paragraph (a) of this section reduced, but not below zero, by

(ii) An amount determined by applying the same actuarial share applied in paragraph (c)(1)(i) of this section to the sum of -

(A) The trust's undistributed net ordinary income within the meaning of section 664(b)(1) and § 1.664-1(d)(1)(ii)(a)(1) for the current and prior taxable years of the trust, if any; and

(B) The trust's undistributed net capital gains within the meaning of section 664(b)(2) and § 1.664-1(d)(1)(ii)(a)(2) for the current and prior taxable years of the trust, if any.

(2) *Tax-exempt trust defined*. For purposes of this section, the term tax-exempt trust means a charitable remainder annuity trust or a charitable remainder unitrust as defined in section 664.

(3) *Taxable beneficiary defined*. For purposes of this section, the term taxable beneficiary means any person other than an organization described in section 170(c) or exempt from taxation under section 501(a).

(4) *Effective/applicability date*. This paragraph (c) and paragraph (d) Example 7 and Example 8 of this section apply to sales and other dispositions of interests in tax-exempt trusts occurring on or after January 16, 2014, except for sales or dispositions occurring pursuant to a binding commitment entered into before January 16, 2014.

Reg. § 1.1014-5(d) provides examples for Reg. §§ 1.1001-1(f) and 1.1014-5, cross-referencing actuarial tables contained in the estate tax regulations:

Example (1). Securities worth $500,000 at the date of decedent's death on January 1, 1971 are bequeathed to his wife, W, for life, with remainder over to his son, S. W is 48 years of age when the life interest is acquired. The estate does not elect the alternate valuation allowed by section 2032. By reference to § 20.2031-7A(c), the life estate factor for age 48, female, is found to be 0.77488 and the remainder factor for such age is found to be 0.22512. Therefore, the present value of the portion of the uniform basis assigned to W's life interest is $387,440 ($500,000 × 0.77488), and the present value of the portion of the uniform basis assigned to S's remainder interest is $112,560 ($500,000 × 0.22512). W sells her life interest to her nephew, A, on February 1, 1971, for $370,000, at which time W is still 48 years of age. Pursuant to section 1001(e), W realizes no loss; her gain is $370,000, the amount realized from the sale. A has a basis of $370,000 which he can recover by amortization deductions over W's life expectancy.

Example (2). The facts are the same as in example (1) except that W retains the life interest for 12 years, until she is 60 years of age, and then sells it to A on February 1, 1983, when the fair market value of the securities has increased to $650,000. By reference to § 20.2031-7A(c), the life estate factor for age 60, female, is found to be 0.63226 and the remainder factor for such age is found to be 0.36774. Therefore, the present value on February 1, 1983, of the portion of the uniform basis assigned to W's life interest is $316,130 ($500,000 × 0.63226) and the present value on that date of the portion of the uniform basis assigned to S's remainder interest is $183,870 ($500,000 × 0.36774). W sells her life interest for $410,969, that being the commuted value of her remaining life interest in the securities as appreciated ($650,000 × 0.63226). Pursuant to section 1001(e). W's gain is $410,969, the amount realized. A has a basis of $410,969 which he can recover by amortization deductions over W's life expectancy.

Example (3). Unimproved land having a fair market value of $18,800 at the date of the decedent's death on January 1, 1970, is devised to A, a male, for life, with remainder over to B, a female. The estate does not elect the alternate valuation allowed by section 2032. On January 1, 1971, A sells his life interest to S for $12,500. S is not related to A or B. At the time of the sale, A is 39 years of age. By reference to § 20.2031-7A(c), the life estate factor for age 39, male, is found to be 0.79854. Therefore, the present value of the portion of the uniform basis assigned to A's life interest is $15,012.55 ($18,800 × 0.79854). This portion is disregarded under section 1001(e). A realizes no loss; his gain is $12,500, the amount realized. S has a basis of $12,500 which he can recover by amortization deductions over A's life expectancy.

Example (4). The facts are the same as in example (3) except that on January 1, 1971, A and B jointly sell the entire property to S for $25,000 and divide the proceeds equally between them. A and B are not related, and there is no element of gift or compensation in the transaction. By reference to § 20.2031-7A(c), the remainder factor for age 39 male, is found to be 0.20146. Therefore, the present value of the uniform basis assigned to B's remainder interest is $3,787.45 ($18,800 × 0.20146). On the sale A realizes a loss of $2,512.55 ($15,012.55 less $12,500), the portion of the uniform basis assigned to his life interest not being disregarded by reason of section 1001(e)(3). B's gain on the sale is $8,712.55 ($12,500 less $3,787.45). S has a basis in the entire property of $25,000, no part of which, however, can be recovered by amortization deductions over A's life expectancy.

Example (5).

(a) Nondepreciable property having a fair market value of $54,000 at the date of decedent's death on January 1, 1971, is devised to her husband, H, for life and, after his death, to her daughter, D, for life, with remainder over to her grandson, G. The estate does not elect the alternate valuation allowed by section 2032. On January 1, 1973, H sells his life interest to D for $32,000. At the date of the sale, H is 62 years of age, and D is 45 years of age. By reference to § 20.2031-7A(c), the life estate factor for age 62, male, is found to be 0.52321. Therefore, the present value on January 1, 1973, of the portion of the adjusted uniform basis assigned to H's life interest is $28,253 ($54,000 × 0.52321). Pursuant to section 1001(e), H realizes no loss; his gain is $32,000, the amount realized from the sale. D has a basis of $32,000 which she can recover by amortization deductions over H's life expectancy.

(b) On January 1, 1976, D sells both life estates to G for $40,000. During each of the years 1973 through 1975, D is allowed a deduction for the amortization of H's life interest. At the date of the sale H is 65 years of age, and D is 48 years of age. For purposes of determining gain or loss on the sale by D, the portion of the adjusted uniform basis assigned to H's life interest and the portion assigned to D's life interest are not taken into account under section 1001(e). However, pursuant to § 1.1001-1(f)(1), D's cost basis in H's life interest, minus deductions for the amortization of such interest, is taken into account. On the sale, D realizes gain of $40,000 minus an amount which is equal to the $32,000 cost basis (for H's life estate) reduced by amortization deductions. G is entitled to amortize over H's life expectancy that part of the $40,000 cost which is attributable to H's life interest. That part of the $40,000 cost which is attributable to D's life interest is not amortizable by G until H dies.

Example (6). Securities worth $1,000,000 at the date of decedent's death on January 1, 1971, are bequeathed to his wife, W, for life, with remainder over to his son, S. W is 48 years of age when the life interest is acquired. The estate does not elect the alternate valuation allowed by section 2032. By reference to § 20.2031-7A(c), the life estate factor for age 48, female, is found to be 0.77488, and the remainder factor for such age is found to be 0.22512. Therefore, the present value of the portion of the uniform basis assigned to W's life interest is $774,880 ($1,000,000 × 0.77488), and the present value of the portion of the uniform basis assigned to S's remainder interest is $225,120 ($1,000,000 × 0.22512). On February 1, 1971, W transfers her life interest to corporation X in exchange for all of the stock of X pursuant to a transaction in which no gain or loss is recognized by reason of section 351. On February 1, 1972, W sells all of her stock in X to S for $800,000. Pursuant to section 1001(e) and § 1.1001-1(f)(2), W realizes no loss; her gain is $800,000, the amount realized from the sale. On February 1, 1972, X sells to N for $900,000 the life interest transferred to it by W. Pursuant to section 1001(e) and § 1.1001-1(f)(1), X realizes no loss; its gain is $900,000, the amount realized from the sale. N has a basis of $900,000 which he can recover by amortization deductions over W's life expectancy.

Example (7).

(a) Grantor creates a charitable remainder unitrust (CRUT) on Date 1 in which Grantor retains a unitrust interest and irrevocably transfers the remainder interest to Charity. Grantor is an individual taxpayer subject to income tax. CRUT meets the requirements of section 664 and is exempt from income tax.

(b) Grantor's basis in the shares of X stock used to fund CRUT is $10x. On Date 2, CRUT sells the X stock for $100x. The $90x of gain is exempt from income tax under section 664(c)(1). On Date 3, CRUT uses the $100x proceeds from its sale of the X stock to purchase Y stock. On Date 4, CRUT sells the Y stock for $110x. The $10x of gain on the sale of the Y stock is exempt from income tax under section 664(c)(1). On Date 5, CRUT uses the $110x proceeds from its sale of Y stock to buy Z stock. On Date 5, CRUT's basis in its assets is $110x and CRUT's total undistributed net capital gains are $100x.

(c) Later, when the fair market value of CRUT's assets is $150x and CRUT has no undistributed net ordinary income, Grantor and Charity sell all of their interests in CRUT to a third person. Grantor receives $100x for the retained unitrust interest, and Charity receives $50x for its interest. Because the entire interest in CRUT is transferred to the third person, section 1001(e)(3) prevents section 1001(e)(1) from applying to the transaction. Therefore, Grantor's gain on the sale of the retained unitrust interest in CRUT is determined under section 1001(a), which provides that Grantor's gain on the sale of that interest is the excess of the amount realized, $100x, over Grantor's adjusted basis in the interest.

(d) Grantor's adjusted basis in the unitrust interest in CRUT is that portion of CRUT's adjusted uniform basis that is assignable to Grantor's interest under § 1.1014-5, which is Grantor's actuarial share of the adjusted uniform basis. In this case, CRUT's adjusted uniform basis in its sole asset, the Z stock, is $110x. However, paragraph (c) of this section applies to the transaction. Therefore, Grantor's actuarial share of CRUT's adjusted uniform basis (determined by applying the factors set forth in the tables contained in § 20.2031-7 of this chapter) is reduced by an amount determined by applying the same factors to the sum of CRUT's $0 of undistributed net ordinary income and its $100x of undistributed net capital gains.

(e) In determining Charity's share of the adjusted uniform basis, Charity applies the factors set forth in the tables contained in § 20.2031-7 of this chapter to the full $110x of basis.

Example (8).

(a) Grantor creates a charitable remainder annuity trust (CRAT) on Date 1 in which Grantor retains an annuity interest and irrevocably transfers the remainder interest to Charity. Grantor is an individual taxpayer subject to income tax. CRAT meets the requirements of section 664 and is exempt from income tax.

(b) Grantor funds CRAT with shares of X stock having a basis of $50x. On Date 2, CRAT sells the X stock for $150x. The $100x of gain is exempt from income tax under section 664(c)(1). On Date 3, CRAT distributes $10x to Grantor, and uses the remaining $140x of net proceeds from its sale of the X stock to purchase Y stock.

Grantor treats the $10x distribution as capital gain, so that CRAT's remaining undistributed net capital gains amount described in section 664(b)(2) and § 1.664-1(d) is $90x.

(c) On Date 4, when the fair market value of CRAT's assets, which consist entirely of the Y stock, is still $140x, Grantor and Charity sell all of their interests in CRAT to a third person. Grantor receives $126x for the retained annuity interest, and Charity receives $14x for its remainder interest. Because the entire interest in CRAT is transferred to the third person, section 1001(e)(3) prevents section 1001(e)(1) from applying to the transaction. Therefore, Grantor's gain on the sale of the retained annuity interest in CRAT is determined under section 1001(a), which provides that Grantor's gain on the sale of that interest is the excess of the amount realized, $126x, over Grantor's adjusted basis in that interest.

(d) Grantor's adjusted basis in the annuity interest in CRAT is that portion of CRAT's adjusted uniform basis that is assignable to Grantor's interest under § 1.1014-5, which is Grantor's actuarial share of the adjusted uniform basis. In this case, CRAT's adjusted uniform basis in its sole asset, the Y stock, is $140x. However, paragraph (c) of this section applies to the transaction. Therefore, Grantor's actuarial share of CRAT's adjusted uniform basis (determined by applying the factors set forth in the tables contained in § 20.2031-7 of this chapter) is reduced by an amount determined by applying the same factors to the sum of CRAT's $0 of undistributed net ordinary income and its $90x of undistributed net capital gains.

(e) In determining Charity's share of the adjusted uniform basis, Charity applies the factors set forth in the tables contained in § 20.2031-7 of this chapter to determine its actuarial share of the full $140x of basis.

Letter Ruling 200027001 analyzed a settlement involving a QTIP trust. The surviving spouse was entitled to the income, and the "trustee is authorized, in the trustee's discretion, to pay or apply additional funds from the principal of the Marital Trust to provide for Spouse's reasonable maintenance, support, comfort and welfare as the trustee deems necessary or advisable." The remainder would pass to or for the benefit of the decedent's other family members. The surviving spouse argued with the trustee over distributions and investment strategy. A settlement agreement resolved some disputes over which property belonged to the decedent and which to the surviving spouse – and:

> The agreement also directs that the trustee of the QTIP Trust pay the amount of $y to Spouse in exchange for Spouse's release of her rights to any part of the principal of the QTIP Trust. The agreement further provides that Spouse will sell her income interest in the QTIP Trust to [the remaindermen] for cash or other property valued at $z. The consideration will be paid proportionately in accordance with the respective interests of [the remaindermen] in the remainder of the QTIP Trust.
>
> The purchase price of the qualifying income interest in the QTIP Trust, $z, is equal to the actuarial value of Spouse's income interest as of Date 3, determined under section 20.2031-7 of the Estate Tax Regulations, based on the value of the corpus of the QTIP Trust as of Date 3. Until the sale of Spouse's interest in the QTIP Trust is completed, the QTIP Trust will continue to pay the income therefrom to Spouse according to the terms of the trust. However, income earned after Date 3 and paid to Spouse will reduce the purchase price, dollar-for-dollar. The settlement agreement

> recognizes that federal gift taxes will be imposed, as a result of the sale of Spouse's qualifying income interest in the QTIP Trust, under section 2519. The agreement confirms Spouse's right to recover such taxes from the persons who will receive the QTIP property, pursuant to section 2207A of the Internal Revenue Code. The settlement agreement, however, places a ceiling on Spouse's right of recovery. The settlement agreement provides that the QTIP Trust will terminate upon completion of the sale of Spouse's qualifying income interest, and the corpus will be distributed [to the remaindermen]…. The settlement agreement is contingent on court approval, which has been obtained by the parties, and favorable rulings from the Internal Revenue Service.

The surviving spouse asked the IRS to rule that any post-Date 3 income that reduced purchase price would constitute sale proceeds, making it taxable as capital gain rather than ordinary income, but the IRS declined to recharacterize the income:

> When a taxpayer receives a lump sum in exchange for the taxpayer's right to receive future income from property that does not represent a conversion of a capital investment, the taxpayer cannot characterize the transaction as a sale of property. *Commissioner v. P.G. Lake, Inc.*, 356 U.S. 260 (1958). The conversion of income already received by a beneficiary of an estate into principal was not permitted as part of a compromise agreement of a wife's claim against her deceased husband's will. *Lemle v. United States*, 579 F.2d 185 (2d Cir. 1978). This is especially the case in the present situation in which Spouse will already have received the payments from the trust at the time the sale of the income interest is consummated, and Spouse will be entitled to keep the payments whether or not the sale is consummated.
>
> The fact that the amount that will be paid for the income interest will be reduced by the amount of income that is paid by the QTIP Trust to Spouse after Date 3 and before the sale is made final does not change our conclusion.

As to taxing gain on sale, the IRS ruled:

> The sale of Spouse's interest in the principal of the QTIP Trust by Spouse constitutes a taxable sale for income tax purposes. Any gain or loss on the sale of Spouse's interest in the principal of the trust would be recognized under section 1001. The gain would be long-term capital gain, since the Decedent died on Date 1. Since section 1001(e) applies to income interests in trust, but not rights to principal, Spouse's basis in her interest in trust principal would not be disregarded.

As to gift tax consequences, the IRS reasoned and ruled:

> Section 2519 provides that any disposition of all or a part of a qualifying income interest for life in property for which an election had been made under section 2056(b)(7) is treated as the transfer of all interests in the property other than the qualifying income interest.
>
> Section 25.2519-1(c)(1) provides that the amount treated as a transfer under section 2519 upon a disposition of all or part of a qualifying income interest for life in QTIP property is equal to the fair market value of the entire property subject to the qualifying income interest, determined on the date of the disposition (including any accumulated income and not reduced by any amount excluded from total gifts under section 2503(b) with respect to the transfer creating the interest), less the value of the

qualifying income interest in the property on the date of the disposition. (The gift tax consequences of the disposition of the qualifying income interest are determined separately under section 2511 as discussed above in #5). [Ruling 5 said no gift assuming that "the sale is one made in the ordinary course of business, in that it is bona fide, at arm's length, and free from any donative intent."]

Section 25.2511-2(a) provides that the gift tax is a primary and personal liability of the donor, is an excise upon his act of making the transfer, is measured by the value of the property passing from the donor, and attaches regardless of the fact that the identity of the donee may not then be known or ascertainable.

Section 2207A(b) provides that if a gift tax is paid with respect to any person because of a transfer made by that person under section 2519, then that person shall be entitled to recover the tax attributable to the transfer from the person receiving the property.

Rev. Rul. 75-72, 1975-1 C.B. 110, holds that gift tax imposed on a transfer that is paid by the donee may be deducted from the value of the transferred property in determining the amount of the gift, if it is established that the payment of the tax by the donee or from the property is a condition of the transfer. If, at the time of the transfer, the gift is made subject to the condition that the gift tax is to be paid by the donee or out of the transferred property, then the donor receives consideration for the transfer in the amount of the gift tax to be paid by the donee. Thus, under section 2512(b), the value of the gift is measured by the fair market value of the property passing from the donor minus the amount of the gift tax to be paid by the donee.

Rev. Rul. 81-223, 1981-2 C.B. 189, holds that, in determining the amount of the gift, the gift tax liability assumed by the donee may be deducted from the value of the transferred property, if the payment of the tax by the donee is a condition of the transfer. The donor's available unified credit must be used to reduce the tax liability that the donee has assumed to the extent the unified credit is available.

In a case like the present one, where the gift tax will be imposed as a result of a transfer under section 2519, section 2207A(b) statutorily shifts the tax burden, but not the liability, for paying the gift tax to the donee. In reimbursing the donor for the gift tax paid pursuant to the statute, the donee provides consideration for the gift. The donee's payment inures to the benefit of the donor because it reimburses the donor for gift tax that the donor was liable for and would otherwise be required to pay out of the donor's own funds.

Accordingly, we conclude that upon Spouse's disposition of Spouse's qualifying income interest for life, Spouse will be treated as making a gift under section 2519. Under section 2519, the gift tax will be imposed upon on the entire value of the QTIP Trust as of the date that the actual transfer occurs, reduced by: 1) the value of the Spouse's qualifying income interest for life on the transfer date; 2) the amount paid to Spouse for the release of her interest in trust principal under the settlement agreement; and 3) the amount of gift tax that Spouse recovers under section 2207A(b) as limited under the terms of the settlement agreement.

Note that the gift tax liability would be included in the surviving spouse's estate if she died within three years of making the deemed gift.[2988] Ordinarily, that's a wash, in that the cash used to pay the gift tax is out of the estate, so the inclusion and reduction in cash offset each other. With a net gift, however, the tax reimbursement eliminates the reduction in cash, so this type of settlement does increase the surviving spouse's estate if she dies within that three-year period. Of course, given that the remaindermen were not beneficiaries of her estate, she would rather have the cash, minus any estate tax, than not have the cash.

In Letter Ruling 200231011, Grandson was the income beneficiary (subject to floors and caps) and charities were the remaindermen.[2989] When disputes about administration arose (again), the parties entered into the following agreement to convert to a unitrust,[2990] subject to court approval:

> Under the terms of the proposed agreement, corpus of Trust in excess of Z dollars will be distributed immediately to Charity 1, Charity 2, Charity 3, and Charity 4 (or their successors) in the same proportion of their current remainder interests in Trust. Upon distribution, the charities' interest in Trust will terminate. The remaining assets of Trust will continue in trust for the benefit of Grandson. Grandson will receive at least annually an amount equal to seven percent of the net fair market value of the property held in Trust determined on a specified date in each calendar year. In addition, the trustee may distribute income or principal to provide adequately for the reasonable support of Grandson. On Grandson's death, the remaining corpus will be distributed pursuant to Grandson's exercise of a testamentary general power to appoint the remaining corpus to anyone, including his estate or the creditors of his estate. Any portion of the Trust not effectively appointed by the exercise this power will be distributed to Grandson's surviving descendants free of trust.

[2988] Code § 2035(b), "Inclusion of gift tax on gifts made during 3 years before decedent's death," provides:

> The amount of the gross estate (determined without regard to this subsection) shall be increased by the amount of any tax paid under chapter 12 by the decedent or his estate on any gift made by the decedent or his spouse during the 3-year period ending on the date of the decedent's death.

[2989] The background was:

> Decedent died testate on Date 1, prior to 1985. Pursuant to the terms of Decedent's will, a residuary testamentary trust (Trust), was established primarily for the benefit of Decedent's grandson (Grandson). Under the terms of Trust, Grandson was to receive S dollars each year during his life. Upon Grandson's death, the corpus was to be distributed as follows: 1/3 to Charity 1; 1/3 to Charity 2; 1/6 to Charity 3; and 1/6 to Charity 4. The terms of Trust provide that no beneficiary could alienate or encumber his/her interest in the income or principal and no beneficiary's interest was subject to claims of his/her creditors prior to distribution. Trust was funded with stock of Corporation with an approximate value of X dollars.
>
> In Year 1, pursuant to a court order, the investments of Trust were restructured and the dispositive provisions of Trust were modified to provide for annual income distributions to Grandson in accordance with a Performance Chart. The order required distributions to Grandson of an amount equal to the lesser of the maximum income amount set forth in the Performance Chart or the actual net income of Trust. Grandson was guaranteed a minimum income amount even if actual Trust income was less than that minimum income amount. Thus, if earnings of Trust are sufficient, Grandson would receive more than the minimum stated amounts each accounting period. In addition, Charities 1, 2, 3 and 4 received a lump sum payment. Upon Grandson's death, the remaining corpus was to be distributed to the Charity 1, Charity 2, Charity 3, and Charity 4 (or their successors) in the same proportion as set forth in Trust.

[2990] But for the floor and ceiling on income before the conversion, a unitrust conversion usually is not a taxable event. See fn 3014 and the accompanying text in part II.J.18.f Commutation vs Mere Division.

After reviewing *Cottage Savings*, Letter Ruling 200231011 held:

> The application of § 1001(a) to trust interests is illustrated by two cases. In *Evans v. Commissioner*, 30 T.C. 798 (1958), the taxpayer exchanged her income interest in a trust for an annuity, and the court concluded that this was a realization event. Taxpayer's income interest had entitled her to dividends paid by a corporation, the stock of which was owned by the trust. She transferred the income interest to her husband, who agreed in exchange to pay her fixed sums annually until her death.
>
> A contrary result was reached in *Silverstein v. United States*, 419 F.2d 999 (7th Cir. 1969). In that case, the taxpayer exchanged an interest in a trust for a right to specified annual payments from the remainderman of the trust, and the court held that taxpayer did not as a result dispose of her trust interest. After the transaction, taxpayer was to receive the same annual payments from the remainderman as she had been receiving from the trust. The court distinguished the transaction from that found to be a realization event in Evans: "the amount of Mrs. Evans' interest in the trust was not definitive. It varied with the dividend return on the trust stock. She exchanged this 'uncertainty' for definitely ascertained yearly payments from her husband." 419 F.2d. at 1003.
>
> The proposed trust modification in this case more closely resembles the situation in *Evans* than that in *Silverstein* and should be considered a realization event. Grandson currently is entitled to trust income, subject to a floor and a ceiling. Under the proposed order, he would become entitled to annual payments of seven percent of the fair market value of the trust property, with the trustee having some discretion to make additional payments under certain circumstances. Even assuming that the projected payments under the proposed order approximate those that would be made under the current terms of the trust, under the proposed order Grandson would lose the protection of the guaranteed minimum annual payments required by the Performance Chart. He also would not be limited by the Performance Chart's maximum annual payment ceilings. Finally, payments would be determined without regard to trust income. In short, Grandson's interest in the modified trust would entail legal entitlements different from those he currently possesses. This conclusion is reinforced by adding to the Taxpayer's current entitlement the general power of appointment over any trust corpus, even though this was a necessary element in a favorable GST conclusion set forth in issue #3, below.
>
> Pursuant to § 1001(e)(1), the portion of the adjusted uniform basis assigned to Grandson's interest in Trust is disregarded. The exception contained in § 1001(e)(3) is not applicable because the entire interest in Trust's assets is not being sold, or otherwise disposed of, to a third party. Accordingly, for purposes of this transaction, Grandson has no basis in his interest in Trust. Therefore, the amount of gain Grandson realizes under § 1001(c) is the amount Grandson realized from the disposition of his assets in Trust. The gain realized by Grandson from the disposition of his interest will be long term capital gain. See Rev. Rul. 72-243, 1972-1 C.B. 233, providing that a sale of an income interest in a trust is a sale of a capital asset within the meaning of §§ 1221 and 1222.

Note that this ruling was issued before Reg. § 1.1001-1(h) was issued in its current form.[2991]

[2991] Reg. § 1.1001-1(h) is reproduced in fn 2951 in this part II.J.18.

In Letter Ruling 201932001, lifetime distributions were as follows:

> On Date 1, a date prior to September 25, 1985, Settlor created an irrevocable trust, Trust, for the benefit of Son. The material purpose of Trust was to ensure that Son receive an income stream for his support. Under the terms of the Trust agreement, the trustees are required to distribute all of the net income of Trust to Son, and, upon his death, distribute the remainder to his issue, per stirpes. The Trust agreement does not authorize any distributions of principal during Son's life. Son has four living adult children (Current Remaindermen) and eight living grandchildren, four of whom are adults (Successor Remaindermen). None of Son's descendants has a predeceased child with living issue. Son and Bank are currently serving as co-trustees of Trust.

A court-approved agreement authorized the trustees to value the trust's assets, determine the appropriate distributions to be made upon the trust's termination under the agreement and terminate the trust. Upon the termination, the trustees would distribute, on a pro rata or in-kind basis, as the trustees in their sole discretion determine, all of the trust's assets to income beneficiary, immediate remaindermen and successor remaindermen according to their actuarial interests calculated as of the termination date. The ruling held that the termination did not blow the trust's grandfathering from GST tax and did not constitute a gift. However, the income tax rulings were not so innocuous:[2992]

> Although the proposed transaction takes the form of a distribution of the present values of the respective interests of Son, the Current Remaindermen, and the Successor Remaindermen, in substance it is a sale of Son's and the Successor Remaindermen's interests to the Current Remaindermen. Rev. Rul. 69-486.
>
> The amounts received by Son as a result of the termination of Trust are amounts received from the sale or exchange of a capital asset to the Current Remaindermen. Rev. Rul. 72-243. Because Son's basis in the income interest of Trust is a portion of the entire basis of the property under § 1015(b), and because the disposition of Son's term interests is not part of a transaction in which the entire interest in Trust is transferred to a third party, Son's adjusted basis in Son's interest in Trust is disregarded under § 1001(e). Son's holding period in the life interests in Trust exceeds one year. Accordingly, based on the facts submitted and representations made, the entire amount realized by Son as a result of the early termination of Trust will be long-term capital gain under § 1222(3).
>
> Similarly, the amounts received by the Successor Remaindermen as a result of the termination of Trust are amounts received from the sale or exchange of a capital asset to the Current Remaindermen. *Cf. Helvering v. Gambrill*, 313 U.S. 11, 15 (1941), 1941-1 C.B. 364 (The phrase "property held by the taxpayer" under a prior law holding period rule relating to capital gains and losses includes not only full ownership, but also any interest owned whether vested, contingent, or conditional). The Successor Remaindermen's holding period in their interests in Trust also exceeds one year.
>
> Accordingly, under § 1222(3), the gain determined under § 1001(a) by the Successor Remaindermen as a result of the early termination of Trust will be long-term capital gain.

[2992] I have heard that this ruling was procured by David Handler and that the income tax consequences, although adverse, were relatively small in that particular case.

> In addition, to the extent that a Current Remainderman exchanges property, including property deemed received from Trust, for the interests of Son and the Successor Remaindermen, the Current Remainderman will recognize gain or loss on the property exchanged. Accordingly, based on the facts submitted and representations made, for purposes of determining gain or loss, the amount realized by each Current Remainderman on the exchange of property for Trust interests held by Son and the Successor Remaindermen will be equal to amount of cash and fair market value of the trust interests received in exchange for the transferred assets. Section 1.1001-1(a) and Rev. Rul. 69-486.

Letter Ruling 201932001 is further analyzed in part II.J.18.e Ed Morrow on Potential Income Tax Disasters for Early Trust Terminations.

Letter Ruling 202016002 covered everything but some of the income tax on the commutation of an inter vivos and two testamentary QTIP trusts, whose remaindermen were charities.[2993] Nothing was surprising, but notable is no impermissible self-dealing:[2994]

> Section 53.4941(d)-1(a) of the Foundation and Similar Excise Taxes Regulations provides that the term "self-dealing" does not include a transaction between a private foundation and a disqualified person where the disqualified person status arises only as a result of such transaction. For example, the bargain sale of property to a private foundation is not a direct act of self-dealing if the seller becomes a disqualified person only by reason of his becoming a substantial contributor as a result of the bargain element of the sale.
>
> Rev. Rul. 72-243, 1972-1 C.B. 233, provides that the proceeds received by the life tenant of a trust, in consideration for the transfer of the life tenant's entire interest in the trust to the remainder beneficiary, are treated as an amount realized from the sale or exchange of a capital asset under § 1222.
>
> The transaction pursuant to the Settlement Agreement, in which Spouse will receive the present value of her life income interests in Irrevocable Trust and Marital Trust, and Charitable Trust will receive the remaining trust assets, may be regarded in substance as an indirect exchange between Spouse and Charitable Trust similar to the one described in Rev. Rul. 72-243. Charitable Trust was not funded upon Decedent's death by Decedent, and no deduction has been or will be allowed under § 170, 545(b)(2), 642(c), 2055, 2106(a)(2), or 2522 with respect to Charitable Trust prior to the contemplated exchange. Therefore, prior to the exchange, Charitable Trust is not a trust described in § 4947(a)(1).
>
> As discussed above, Spouse will receive a gift tax deduction under § 2522 of more than $5,000 for the property deemed transferred by her to Charitable Trust (which will exceed 2 percent of all contributions to Charitable Trust), causing Charitable Trust to be subject to § 4947(a)(1) at that time. Spouse will be a disqualified person with respect to Charitable Trust when the Settlement Agreement is executed, as a substantial contributor to Charitable Trust and as a family member of the creator of Charitable Trust. Section 53.4941(d)-1(a) provides, however, that the term "self-dealing" does not include

[2993] Companion rulings were Letter Rulings 202016003, 202016004, 202016005, and 202016006.
[2994] For more on self-dealing under Code § 4941, see text following fn 4948 in part II.Q.7.c.ii Private Foundations, Etc.

> a transaction between a private foundation and a disqualified person where the disqualified person status arises only as a result of such transaction. Accordingly, § 4941 will not apply to the indirect exchange between Spouse and Charitable Trust pursuant to the Settlement Agreement in which Spouse will receive the present value of her life income interest in Irrevocable Trust, GST Exempt Marital Trust, and GST Non-Exempt Marital Trust, and Charitable Trust will receive the remaining trust assets.

Letter Ruling 202016002 also ruled no gifts on the exchange of contingent remainder interests:

> Individual 1, Individual 2, and Individual 3 are the life beneficiaries of a trust created for his or her benefit under Revocable Trust. Pursuant to the provisions of Settlement Agreement, Spouse will disclaim under State law her interest in the remote contingent remainder interests in each Individuals' Trusts. The proposed disclaimer provides that any remainder in each Individuals' Trusts will pass directly to Charitable Trust. In exchange for the disclaimer of Spouse's interest in the remote contingent remainder interests in each Individuals' Trust, Spouse received the agreement of Charitable Trust to the terms of the Settlement Agreement. The disclaimer was a bargained for element of Settlement Agreement, which was bona fide, at arm's length and free from any donative intent, and the consideration received by Spouse for her disclaimer was adequate and full consideration in money or money's worth. See § 25.2512-8. Settlement Agreement provides a result that is within a range of reasonable settlements, that is, the interests to be received by the parties (both as to the nature of the interests and their economic value) reflect the enforceable rights of the parties. Therefore, Spouse is not deemed to have made a gift of any interest in the remote contingent remainder interests of Individual 1 Trust, Individual 2 Trust, and Individual 3 Trust because Spouse received full and adequate consideration for Spouse's disclaimer of those interests.
>
> Accordingly, based on the facts submitted and the representations made, the disclaimer by Spouse under State law of her remote contingent remainder interests in Individual 1 Trust, Individual 2 Trust, and Individual 3 Trust will not result in any gifts by Spouse.

Letter Ruling 202047005 held that a gift of an annuity interest in a charitable remainder annuity trust to its private foundation remainderman, terminating the trust and giving its assets to the foundation, was deductible (except that it concluded that the taxpayer had zero basis to deduct) and had zero adverse income or excise tax consequences. Part of the analysis:

> In *Blair v. Commissioner*, 300 U.S. 5 (1937), the United States Supreme Court held that a beneficiary of a life interest in trust income made a valid assignment of a portion of that income with a resulting shift in the tax liability on the income from the beneficiary to the assignee. Even though the beneficiary assigned for life his right to specific dollar amounts of trust income as opposed to a fixed percent of his interest, the United States Supreme Court held that, "[i]f under the law governing the trust the beneficial interest is assignable, and if it has been assigned without reservation, the assignee thus becomes the beneficiary and is entitled to the rights and remedies accordingly."
>
> Rev. Rul. 55-38, 1955-1 C.B. 389, addresses circumstances under which the assignor and assignee will be taxed on amounts paid by a trust after the lifetime income beneficiary of a testamentary trust assigns his right to receive a portion of the trust income. In Rev. Rul. 55-38, the Service determined that where a beneficiary periodically gives his consent to pay a certain portion of the trust income to another individual, the

amounts so paid will be taxable as income to the assignor, as the assignor has not parted with a substantial interest in property other than the specified payments of income. The Service held that an income beneficiary's irrevocable assignment of trust income for a period of not less than ten (10) years would be treated as "a disposition of a substantial interest in the trust property" (immunizing him or her from tax under Blair) if the assignor does not retain the type of control that would subject him or her to tax under the grantor trust rules. The ten (10) year safe harbor in the grantor trust rules existing at that time was subsequently repealed, and applied under current law, the Ruling's approach suggests that no fixed period of years is long enough to prevent taxation of a donor retaining a reversionary interest.

> The Service has ruled that a taxpayer's sale of an annuity interest in a charitable remainder trust to the remainder beneficiary will result in the taxpayer recognizing income with respect to the property received, without regard to the taxpayer's basis in such property. Additionally, a transaction in which the income interest holders and the charitable remainder beneficiary of a charitable remainder trust each receive a distribution of the present values of their respective interests in the charitable remainder trust is, in substance, a sale of the income interest to the charitable remainder beneficiary. Rev. Rul. 72-243, 1972-1 C.B. 233, provides that a sale of an income interest in a trust is a sale of a capital asset (within the meaning of sections 1221 and 1222).
>
> Taxpayer's and Spouse's situation is distinguishable from situations in which a taxpayer sells an annuity interest in a trust to the remainder beneficiary or where the taxpayer receives a distribution of the present value of the taxpayer's income interest in a trust. In this case, Taxpayer and Spouse will receive no money or property as a result of the assignment of their undivided annuity interest in Trust. Therefore, Taxpayer and Spouse are not disposing of their interest in Trust in exchange for money or property in a transaction governed by section 1001. Accordingly, no gain or loss will be recognized by Taxpayer or Spouse in accordance with section 1001.
>
> Additionally, in *Blair*, the United States Supreme Court held that future income generated by a trust subsequent to a valid assignment, without reservation, of an income interest will not be taxable to the assignor. In this case, Taxpayer and Spouse will make a valid assignment of their undivided annuity interest in Trust to Foundation, without reservation.
>
> Finally, Taxpayer's and Spouse's assignment, without reservation, of their undivided annuity interest meets the requirements set forth in Rev. Rul. 55-38. In this case, Taxpayer and Spouse propose to make an assignment of their undivided annuity interest and will not retain any reversionary interest in the annuity interest upon the assignment of their annuity interest in Trust to Foundation. Therefore, in accordance with *Blair* and Rev. Rul. 55-38, Taxpayer and Spouse would prevent income taxation with respect to any future income attributable to the annuity interest assigned to Foundation. Accordingly, no gain or loss will be recognized by Taxpayer or Spouse in accordance with section 1001.

Letter Ruling 202047005 also held that the gift of their annuity interest would be deductible only to the extent of basis and that the basis was zero under Code § 1001 et seq. The ruling did not discuss why the basis was zero under those provisions. It has been suggested that the ruling applied Code § 1001(e) but that application overlooked that the grantor would have basis because Code § 1001(e) does not apply to the donor's retained interest.

CCA 202118008, addressing the commutation of a QTIP trust, involved the following facts:

> This is a request for assistance from SB/SE Examination with regard to the examination of Year Forms 709 (United States Gift (and Generation-Skipping Transfer) Tax Return) of Spouse, Child 1, and Child 2.
>
> On Date 1, Decedent died testate, survived by Spouse and adult children, Child 1 and Child 2 (collectively, Children). Pursuant to Decedent's will, three trusts were created: Trust 1, Trust 2, and Trust 3. The assistance requested pertains to Trust 1 only.
>
> Trust 1 was funded with the residue of Decedent's estate. Trust 1 directs all income to be distributed to Spouse at least annually and authorizes principal distributions for Spouse's health, maintenance, and support in Spouse's accustomed manner of living if the income is insufficient for such purposes. Trust 1 grants Spouse a testamentary limited power of appointment in favor of Decedent's descendants. In the absence of Spouse's exercise of Spouse's testamentary limited power of appointment, Trust 1 directs the remainder to be distributed outright to Children, by right of representation.
>
> Decedent's estate timely filed a Form 706 (United States Estate (and Generation-Skipping Transfer) Tax Return). On Schedule M of Form 706, Spouse, as personal representative, elected to treat the property of Trust 1 as qualified terminable interest property (QTIP) under § 2056(b)(7). As reported on the Form 706, Trust 1 was funded with $ a of property.
>
> On Date 3, Spouse, as the current beneficiary and as the trustee of Trust 1, and Child 1 and Child 2, as remainder beneficiaries and virtual representatives of the contingent and unborn beneficiaries of Trust 1, entered into Agreement. Under the terms of Agreement, Trust 1 was commuted[1] and all of its property was distributed to Spouse. Recital H of Agreement provides that Spouse and Children agree that "Trust assets could be more effectively utilized if [Spouse] held such assets outright and free of trust." In Recital F of Agreement, the parties acknowledge that Spouse's testamentary limited power of appointment is "not operative." Paragraph 3 of Agreement provides:
>
>> By signing this Agreement and by virtue of the QTIP election for the Trust, the commutation of the Trust results in a deemed gift, for federal gift tax purposes, of the remainder interest in the Trust assets from [Spouse] to [Children] under Section 2519 of the Code. By virtue of the distribution of all of the Trust assets to [Spouse], the commutation of the Trust does not result in a deemed gift of [Spouse's] income interest in the Trust under Section 2511 of the Code. Additionally, by signing this Agreement and by virtue of the distribution of all of the Trust asset [sic] to [Spouse], the commutation of the Trust results in a gift, for federal gift tax purposes, of the remainder interest in the Trust from [Children] to [Spouse]. The deemed gift of the remainder interest from [Spouse] to [Children] and the gift from [Children] to [Spouse] results in a reciprocal gift transfer.
>
> [1] A commutation terminates a trust by distributing trust property to trust beneficiaries based on the respective values of their beneficial interests.

> Paragraph 5 of Agreement provides that (i) Agreement will have the same effect as a court decree, as described in State Statute, (ii) Agreement will become legal and effective upon the date of the last signature of the parties (Date 3), (iii) the terms of Agreement are enforceable as a nonjudicial agreement and as a contract, and (iv) Agreement "contains the entire agreement and understanding among the parties hereto with respect to the subject matter hereof."
>
> At the time of the commutation, the combined value of the property held by Trust 1 was $b, consisting of r Class A shares of Corporation, s Class B shares of Corporation, t% interest in LLC 1, u% interest in LLC 2, v% interest in LLC 3, v% interest in LLC 4, Savings Account, and Brokerage Account. After the commutation and Children's gifts of their remainder interests to Spouse, Spouse owned all of trust property outright.
>
> Also on Date 3, and with the property Spouse owned outright pursuant to Agreement, Spouse entered into a series of transactions. Spouse transferred by gift w Class B shares of Corporation (valued at $ c) to irrevocable dynasty trusts that Spouse had established on Date 2 for the collective benefit of Children and their descendants (Children's Trusts). In addition, in exchange for promissory notes with an aggregate face amount of $d, Spouse transferred to Children's Trusts (i) the entire interest in LLC 1, (ii) all of the Class A shares of Corporation, and (iii) x Class B shares of Corporation.[2]
>
> > [2] We do not address the gift and estate tax consequences of the transfers in exchange for the promissory notes.
>
> On Date 4, Spouse, Child 1, and Child 2, each filed a Form 709 for Year. Each Form 709 reported the commutation and distribution of the trust property from Spouse to Child 1 and Child 2 to be "deemed to be the same value as the property transferred from [Child 1 and Child 2] to [Spouse]" and asserted that the amounts of the gifts are zero.

CCA 202118008, "ISSUE 1: Application of § 2519 to Spouse," briefly described Code § 2519(a) and Regs. §§ 25.2519-1(a), 25.2519-1(c)(1), and 25.2519-1(f), then continued:

> In *Estate of Novotny v. Commissioner*, 93 T.C. 12 (1989), the surviving spouse and remainderman divided the sale proceeds of QTIP proportionately on the basis of the respective values of their interests; the court indicated that the commutation constituted a disposition by the spouse of the income interest for purposes of § 2519 and was thus subject to gift tax.
>
> In this case, Spouse, as personal representative of Decedent's estate, made an election under § 2056(b)(7) to treat Trust 1 as QTIP and claimed a marital deduction on Decedent's Form 706 for the value of Trust 1. Years later, on Date 3, Spouse and Children entered into Agreement. By its terms, Agreement effected the commutation of Trust 1.
>
> In a commutation, the trustee makes terminating distributions to the holders of the beneficial interests in the trust equal to the actuarial value of the interests. Each beneficiary gives up his or her respective beneficial interest in exchange for a lumpsum payment, in what is essentially a sale transaction. The commutation terminates any relationship between the beneficiary and the trust, and if all interests are commuted, the trust terminates.

> Based on the above, the commutation of Trust 1 effected by Agreement constitutes a disposition by Spouse of Spouse's qualifying income interest within the meaning of § 2519(a). Section 25.2519-1(a) and (f); *Estate of Novotny*. Accordingly, for gift tax purposes, Spouse is treated as transferring by gift all interests in Trust 1 other than the qualifying income interest.[3]
>
> > [3] Note that the commutation does not constitute a gift of Spouse's qualifying income interest under § 2511 because Spouse received adequate and full consideration for Spouse's qualifying income interest based on the distribution of all trust property to Spouse. See § 25.2519-1(g), Example 2.

CCA 202118008, "ISSUE 2: Gift by Children under § 2511," briefly described Code §§ 2501(a)(1) and 2512(b) and Regs. §§ 25.2511-2(a) and 25.2511-2(b) and reasoned:

> In this case, Child 1, Child 2, and Spouse entered into Agreement, which legally bound all persons interested in Trust 1. The effect of Agreement was to extinguish Spouse's testamentary limited power of appointment, commute Trust 1, and terminate Trust 1. As a result, Agreement vested a valuable property interest (the value of the remainder) in Children, the then remaindermen. Rather than accept a terminating distribution of the value of their beneficial interest, Child 1 and Child 2 agreed that the trust property "could be more effectively utilized" by Spouse holding the property outright. The outright distribution of all trust property to Spouse pursuant to the terms of Agreement constitutes a transfer of the value of Children's remainder interests without receipt of adequate and full consideration.[4] Accordingly, Child 1 and Child 2 each made a gift under § 2511 of the value of their respective remainder interest in Trust 1 to Spouse. Section 2512(b).
>
> > [4] Note that Spouse's transfers on the same date as Agreement to Children's Trusts are independent of Agreement. Paragraph 5 of Agreement acknowledges that Agreement "contains the entire agreement and understanding among the parties hereto with respect to the subject matter hereof."

CCA 202118008, "ISSUE 3: Reciprocal Exchange for Consideration in Commutation of QTIP Trust," explained:

> *Adequate and Full Consideration for Purposes of § 2512(b) and Reciprocal Transfers*
>
> In *Commissioner v. Wemyss*, 324 U.S. 303 (1945) and its companion case *Merrill v. Fahs*, 324 U.S. 308 (1945), the Supreme Court considered the gift tax meaning of the term "adequate and full consideration in money or money's worth" in the context of antenuptial contracts.
>
> In *Wemyss*, the donor transferred assets to his fiancé to compensate her for the loss of an income interest that would terminate upon her marriage to him. There was no dispute that both a promise of marriage and detriment to a contracting party constituted valuable consideration for purposes of the law of contracts. The Tax Court had held that if the promise of marriage was the consideration, it was not one reducible to a money value and, if the fiancé's loss of the income interest was the consideration, it did not constitute consideration in the hands of the donor. The Supreme Court stated:
>
> > If we are to isolate as an independently reviewable question of law the view of the Tax Court that money consideration must benefit the donor to relieve a transfer by

> him from being a gift, we think the Tax Court was correct…. The section taxing as gifts transfers that are not made for “adequate and full (money) consideration” aims to reach those transfers which are withdrawn from the donor’s estate.

Wemyss, 324 U.S. at 307-08. In other words, valuable contractual consideration in the hands of the donor is not sufficient; adequate and full consideration is that which replenishes, or augments, the donor’s taxable estate.

In *Merrill*, the donor transferred property to donor’s then spouse in exchange for spouse’s relinquishment of marital rights in donor’s remaining property. The Court held that spouse’s relinquishment of the marital rights did not constitute adequate and full consideration for donor’s transfer because the assets subject to the marital rights were already includible in donor’s gross estate. *Id*. at 312-13.

Rev. Rul. 69-505, 1969-2 C.B. 179, involves a transfer to a trust of joint-tenancy property that is treated as a reciprocal exchange for consideration in money or money’s worth. A and B owned the property as joint tenants and could each unilaterally sever the joint tenancy, and if not severed, the property would pass to the survivor upon the death of the other joint tenant. A and B transferred the property to a trust, reserving the right to receive one-half of the income therefrom for their joint lives and all to the survivor for life with remainder to C. Citing § 25.2511-1(e) and *U.S. v. Estate of Grace*, 395 U.S. 316 (1969), the revenue ruling holds that the transfers between A and B are treated as a reciprocal exchange for consideration in money or money’s worth. Thus, neither A nor B made a gift to the other to the extent that the transfers were of equal value. The revenue ruling concludes that since the value of the gift by B is less than the value of the gift by A, A is deemed to have made a gift to B of the difference in value of A’s and B’s transfer.

Estate of Grace is the seminal case on the reciprocal trust doctrine. The reciprocal trust doctrine uncrosses transfers of property in trust that were made pursuant to an interrelated scheme and that resulted, to the extent of like values involved, in leaving the settlors in approximately the same economic position they would have otherwise been in had they not engaged in the transaction.

Here, Paragraph 3 of Agreement provides that the “deemed gift of the remainder interest” under § 2519(a) and the gift from Children to Spouse under § 2511 result in a “reciprocal gift transfer.” This statement in Agreement is not supported by the economics of the transaction or the gift tax meaning of what constitutes “adequate and full consideration.”

Agreement characterized the transaction as a commutation of Trust 1 followed by a distribution of all trust property to Spouse. Thus, Spouse agrees to the extinguishment of Spouse’s lifetime interest in Trust 1 and Children agree to the extinguishment of their remainder interest in Trust 1 in exchange for receipt of their respective proportionate share of trust property. Also pursuant to Agreement, Children transfer their proportionate share of trust property received in the commutation to Spouse and receive no consideration from Spouse in exchange for the transfer. Absent entering into Agreement, Spouse had no right to the remainder under the terms of Trust 1 or otherwise. Therefore, from an economic perspective, the transaction resulted in a one-sided gift transfer from Children to Spouse.

It is the deemed gift transfer arising by application of § 2519(a) that is the crux of Spouse and Children's position, as stated in Agreement, that the transfers are reciprocal gift transfers. However, unlike in Rev. Rul. 69-505, Spouse's deemed transfer under § 2519(a) and Children's transfers of their remainder interests under § 2511 do not constitute offsetting exchanges of consideration. Spouse received no consideration for the deemed transfer to Children under § 2519(a). That is, because the entire value of Trust 1 was subject to inclusion in Spouse's gross estate under § 2044, the transfer of the remainder by Children to Spouse does not augment Spouse's estate and, thus, cannot constitute the receipt of adequate and full consideration for gift tax purposes. See *Commissioner v. Wemyss*; *Merrill v. Fahs*.

The fact that Spouse can receive no consideration for the deemed transfer resulting from the application of § 2519(a) does not nullify Children's transfers of their remainder interests in Trust 1. When Trust 1 was commuted, the remainder interest vested outright, equally in Children, the then remaindermen. Children then transferred their valuable property interest to Spouse and received nothing in exchange. Under § 2512(b) and Wemyss, these transfers by Children for no consideration constitute a gift. If Children were to transfer their remainder interests to a third party other than Spouse, the transfers would clearly be a gift. The result is the same if the donee is the surviving spouse beneficiary of a QTIP trust.[5] Thus, the transaction cannot be considered involving offsetting transfers for consideration within the meaning of Rev. Rul. 69-505.

[5] The gift tax consequences to remainder beneficiaries of a QTIP trust in a § 2519(a) disposition where all of the trust property is distributed to the surviving spouse is also discussed in PLR 199908033, which was referenced in *Estate of Kite v. Commissioner*, T.C. Memo. 2013-43. Note that PLRs may not be cited as precedent.

Likewise, the facts here do not support the application of the reciprocal trust doctrine enunciated in *Estate of Grace*, without regard to consideration. After entering into Agreement, Spouse and Children are not in approximately the same economic position they would have otherwise been absent entering into Agreement (*i.e.*, Children no longer have a beneficial interest in Trust 1 and Spouse then holds the trust property outright, including the actuarial value of the remainder interest).

QTIP Statutory Scheme and Legislative History

The foregoing analysis is consistent with the QTIP statutory regime, the legislative history, the rulings and the caselaw analyzing the issue of consideration in the context of deemed dispositions under § 2519(a).

Section 2056(a) provides that the value of the taxable estate shall, except as limited by § 2056(b), be determined by deducting from the value of the gross estate an amount equal to the value of any interest in property that passes or has passed from the decedent to the surviving spouse.

Section 2056(b)(1) provides in relevant part that no deduction shall be allowed for an interest passing to the surviving spouse where the interest will terminate or fail, and on such termination, the property passes to a person other than the surviving spouse or the spouse's estate.

Section 2056(b)(7) provides an exception to the “terminable interest” rule in § 2056(b)(1) and allows a deduction in the case of QTIP. Under § 2056(b)(7)(A), QTIP is treated as passing to the surviving spouse for purposes of § 2056(a), and no part of the property is treated as passing to any person other than the surviving spouse for purposes of § 2056(b)(1).

Under § 2056(b)(7)(B)(i), the term “qualified terminable interest property” generally refers to property in which the spouse receives a qualifying income interest for life, and with respect to which the executor makes an election to treat the property as QTIP.

Section 2044(a) provides that the value of the gross estate includes the value of any property described in § 2044(b) in which the decedent had a qualifying income interest for life. Section 2044(b) provides that § 2044(a) applies to any property if a deduction was allowed with respect to the transfer of the property to the decedent under § 2056(b)(7), and § 2519 did not apply with respect to a disposition by the decedent of part or all of such property.

The QTIP provisions (§§ 2056(b)(7), 2044, and 2519) were enacted in 1981, at the same time as the unlimited marital deduction. See § 403(d) of the Economic Recovery Tax Act of 1981 (ERTA), Pub. Law 97-34, 95 Stat. 172, 302-05 (August 13, 1981). Section 2056(b)(7) was enacted to provide an alternative to an outright transfer of property to the surviving spouse that would qualify for the unlimited marital deduction. See H. REP. NO. 97-201, at 159-60 (1981). Given that an income interest that terminates at death generally is not includible in a decedent’s gross estate, §§ 2044 and 2519 were added to ensure that the transfer tax deferred by § 2056(b)(7) becomes subject to tax, either on the surviving spouse’s death or after a lifetime disposition of spouse’s qualifying income interest. See H. REP. NO. 97-201, at 161-62. Thus, the QTIP statutory scheme is consistent with the policy underlying the marital deduction, that is, to allow property to pass to the surviving spouse without the decedent-spouse’s estate paying tax on its value, but only until such time as the surviving spouse either dies or makes a lifetime disposition of the property. Under either circumstance, the transfer tax is ultimately paid. See, *e.g.*, *U.S. v. Stapf*, 375 U.S. 118, 128 (1963).

In Rev. Rul. 98-8, 1998-1 C.B. 541, the surviving spouse purchased from the trust remainderman the remainder interest in a QTIP trust by issuing a promissory note equal to the actuarial value of the remainder interest to the remainderman. As a result of the purchase, the trust terminated under its terms and the entire corpus was transferred to the surviving spouse. The surviving spouse then used the proceeds to pay the remainderman the value of the remainder interest. The revenue ruling concludes that the purchase of the remainder interest, which is analogous to a commutation of the QTIP trust, is treated as a taxable disposition by the surviving spouse of the qualifying income interest, resulting in a gift of the value of the remainder interest under § 2519. Citing to Wemyss, the revenue ruling explains that the receipt of the remainder interest cannot increase the donor’s taxable estate because it is already subject to inclusion in the surviving spouse’s taxable estate under § 2044. Accordingly, the surviving spouse’s receipt of the remainder interest cannot constitute adequate and full consideration under § 2512 for the promissory note transferred. The revenue ruling notes that any other result would subvert the legislative intent and statutory scheme underlying § 2056(b)(7).

In *Estate of Kite v. Commissioner*, T.C. Memo. 2013-43, the surviving spouse was the beneficiary of two QTIP trusts. According to a prearranged plan, the QTIP trusts were terminated and all assets were distributed to the surviving spouse. Two days later, the surviving spouse sold the assets to her three children in exchange for three deferred private annuity agreements under which payments would commence ten years thereafter. In the event that the surviving spouse died within the ten-year period, her annuity interest would terminate and nothing would be payable to her estate. Based on the facts and circumstances, the court found the sale of the assets of the QTIP trusts to the children in exchange for deferred annuities constituted a bona fide sale for adequate and full consideration and treated the annuity transaction as a single integrated transaction for purposes of § 2519. Moreover, the sale of the assets of the QTIP trusts, followed by the payment to the surviving spouse of the proceeds equal to the value of her income interest, was a disposition of her qualifying income interest for purposes of § 2519. In response to petitioner's post-opinion argument that there was no gift tax deficiency for the § 2519 disposition of the surviving spouse's qualifying income interest based on the receipt of full and adequate consideration, the court stated,

> [S]ection 2519(a) treats the disposition of a qualifying income interest as a deemed transfer of the remainder interest. In other words, "the donee spouse is treated as making a gift under section 2519 of the entire trust less the qualifying income interest" (emphasis added). Sec. 25.2519-1(a), Gift Tax Regs. The term "gift" is not an accident. The remainder interest is a future interest held by the remainderman and not the donee spouse. Accordingly, the donee spouse cannot receive full and adequate consideration, or indeed any consideration, in exchange for the remainder interest. This result is supported by the intent of the marital deduction and the QTIP regime.

Estate of Kite v. Commissioner, No. 6772-08 (T.C. Oct. 25, 2013) (order and decision under Tax Court Rule 155). The court ruled that the decedent owed gift tax on the value of the deemed § 2519 gift. *Id.*

Here, the QTIP statutory scheme and legislative history support the view that Rev. Rul. 69-505 has no application and the separate transfers by Spouse and Children cannot be offset by consideration for gift tax purposes. Decedent's estate received the benefit of deferral of the estate tax liability allocable to the property of Trust 1 as a result of electing QTIP for such property under § 2056(b)(7). Because the commutation effected by Agreement constitutes a taxable disposition by Spouse within the meaning of § 2519(a) (see Issue 1), it marks the end of the deferral of the tax.

Rev. Rul. 98-8 and *Estate of Kite* illustrate that a disposition under § 2519(a) has significant tax consequences, which are appropriate in view of the QTIP statutory scheme and legislative history. Here, because the commutation of Trust 1 results in a disposition of Spouse's qualifying income interest within the meaning of § 2519(a), Spouse is treated as effectively transferring the remainder interest even though under state property law precepts the remainder interest is held by Children, not Spouse. The taxable transfer by Spouse resulting from the application of § 2519 marks the end of the deferral of estate tax on the Trust 1 property that passed untaxed from Decedent's estate, and is no longer subject to inclusion in Spouse's gross estate under § 2044(b)(2). Eliminating the taxable transfer by Spouse based on a deemed reciprocal gift transfer by the remaindermen would allow the value of the remainder of Trust 1 to escape transfer tax under both §§ 2519 and 2044, which would be contrary to the QTIP statutory scheme and legislative history.

> Based on all of the above, we conclude that the commutation of Trust 1 and the distribution of all trust property to Spouse results in separate gift transfers by Children under § 2511 and by Spouse under § 2519(a) that do not offset each other.

CCA 202118008, “ISSUE 4: Value of Spouse’s Gift under § 2519(a),” reasoned:

> Although the deemed gift under § 2519 is often referred to as a gift of the remainder interest, implying that the amount of the gift is the fair market value of the remainder interest, § 2519(a) and § 25.2519-1(a) take a different approach. Section 2519(a) and § 25.2519-1(a) and (c)(1) apply the subtractive method of valuation; the amount treated as a gift by the surviving spouse is the fair market value of all interests in the property less the value of the qualifying income interest.
>
> A qualifying income interest is defined as the right to receive “all of the income from the entire interest.” Section 20.2056(b)-7(d)(2) cross-referencing § 20.2056(b)-5(f).
>
> Section 25.2512-5(a) generally provides that except as otherwise provided in §§ 25.2512-5(b) and 25.7520-3(b) of the Procedure and Administration Regulations, the fair market value of annuities, unitrust interests, life estates, term of years, remainders, and reversions transferred by gift, is the present value of the interests determined under § 25.2512-5(d).
>
> Section 25.2512-5(d)(1) provides that the fair market value of annuities, life estates, terms of years, remainders, and reversions transferred on or after May 1, 2009, is the present value of such interests determined under § 25.2512-5(d)(2) and by use of standard or special § 7520 actuarial factors.
>
> Section 25.2512-5(d)(2)(iii) provides generally that if the interest to be valued is the right of a person to receive the income of certain property, or to use certain non-income-producing property, for the life of one individual, the present value of the interest is computed by multiplying the value of the property by the appropriate life interest actuarial factor (that corresponds to the applicable § 7520 interest rate and life interest period).
>
> Section 25.7520-1(a)(1) provides that except as otherwise provided in §§ 25.7520-1 and 25.7520-3(b), in the case of gifts made after April 30, 1989, the fair market value of annuities, interests for life or for a term of years, remainders, and reversions is their present value determined under § 25.7520-1. Section 25.7520-1(b) provides generally that valuation under § 7520 consists of an interest rate component and a mortality component. For gifts made on or after May 1, 2009, the mortality component table is contained in § 20.2031-7(d)(7).
>
> Section 25.2519-1(c)(4) provides that the amount treated as a transfer under § 25.2519-1(c)(1) is further reduced by the amount the surviving spouse is entitled to recover under § 2207A(b) (relating to the right to recover gift tax attributable to the remainder interest). Under § 25.2519-1(c)(4), if the donee spouse is entitled to recover gift tax under § 2207A(b), the amount of the gift tax recoverable and the value of the interest treated as transferred under § 2519 are determined by using the same interrelated computation applicable for other transfers in which the transferee assumes the gift tax liability. The gift tax consequences of failing to exercise the right of recovery are determined separately under § 25.2207A-1(b).

Under § 2207A(b) and § 25.2207A-1(a), a surviving spouse treated as transferring an interest in property by reason of § 2519 is entitled to recover from the "person receiving the property" the amount of gift tax attributable to that property. The right of recovery arises at the time the gift tax is actually paid by the surviving spouse subject to § 2519.

In this case, the amount of Spouse's gift under § 2519 is determined by subtracting the value of Spouse's qualifying income interest from the fair market value of the trust property as of Date 3, the date of Agreement. Section 2519(a); § 25.2519-1(a). Discretionary principal distributions and the testamentary limited power of appointment are not taken into account. A standard § 7520 income factor can be used to value the qualifying income interest, and thus, the value of Spouse's qualifying income interest is determined by multiplying the value of the trust property by the income factor of 0.09172.[6] Section 25.2512-5(d)(2)(iii); § 25.7520-1. Based on a value of the trust property of $ b, the value of Spouse's qualifying income interest is $ e. The amount of Spouse's gift under § 2519, therefore, is $ f (i.e., $ b – $ e = $ f).

[6] The income factor of 0.09172 is determined as follows: 1.000000 minus 0.90828, the § 20.2031-7(d)(7), Table S remainder factor at age y and z%, the § 7520 rate on Date 3.

To the extent Spouse is entitled to recover gift tax attributable to the remainder interest under § 2207A(b), this amount is reduced, using an interrelated calculation. Note that, under § 25.2207A-1(b), if Spouse waives or otherwise fails to exercise Spouse's right of recovery, Spouse will be treated as making an additional gift in the amount of the unrecovered tax.[7]

[7] The request for advice raises the possibility that Paragraph 5 of Agreement may constitute a written waiver of Spouse's right of recovery under state law. To the extent it does, the gift tax consequences of failing to exercise the right of recovery are determined separately under § 25.2207A-1(b) and do not factor into the computation of the amount of the gift under § 2519.

CCA 202118008, "ISSUE 5: Value of Children's Gifts of Remainder Under § 2511," cites Code § 2512(a) and Regs. §§ 25.2512-5(d)(2)(ii), 25.7520-3(b), 25.7520-3(b)(1)(ii), 25.7520-3(b)(2)(iii), and 25.7520-3(b)(1)(iii), and reasons:

Where a standard § 7520 annuity, income, or remainder factor may not be used, the actual fair market value of the interest has been determined in some instances by an actuarial determination of the present value of the interest adjusted to account for the restriction. In *Estate of Gokey v. Commissioner*, T.C. Memo 1984-665, the Tax Court determined that principal invasion for the care, comfort, support or welfare of the life interest beneficiary was likely and discounted the present value of the remainder interest accordingly, explaining "where an ascertainable standard exists, the [taxpayer] must establish with reasonable certainty the needs of the owner of the life estate for the rest of her life and the extent to which corpus might be invaded under the standard." *Id.* (citing *Lockard v. Commissioner*, 7 T.C. 1151, 1154-55 (1946), *aff'd*, 166 F. 2d 409 (1st Cir. 1948)). See also *Ithaca Trust Co. v. U.S.*, 279 U.S. 151, 154 (1929) (determining that the value of a charitable remainder interest could be derived from IRS mortality tables with no diminution in value to account for principal invasion subject to a standard for the beneficiary of the life interest because income was more than enough to satisfy the standard, making principal invasion highly unlikely).

In this case, the interests to be valued are the Children's respective remainder interests in Trust 1, determined as of Date 3. While Agreement acknowledges a commutation occurred, the terms of Agreement indicate that no computation of the value of the commuted interests in Trust 1 was performed by the trustee since all property was distributed to Spouse. Further, Child 1 and Child 2 each reported the gift of their proportionate share of the remainder interest to Spouse on Forms 709, but each reported the amount of the gift to be $0. In the absence of the trustee's or Children's computations of the actuarial value of Children's respective remainder interests in Trust 1, the Service will make its own determination.

Based on the available facts, it is appropriate to value each of Children's interests as one-half of the actuarial present value of the remainder interest, adjusting as necessary for the restrictions on the beneficial interests. The determination takes into account that the possibility of principal invasion was so remote as to be negligible, given that the combined value of the property held by Trust 1 was $b at the time of commutation and, thus, annual income of Trust 1 would have been substantial and likely sufficient for Spouse's health, maintenance, and support, even if Spouse's accustomed manner of living were extravagant.[8] Further, the determination takes into account, based on all the facts and circumstances, that the testamentary limited power of appointment would be appropriately treated as having no measurable effect on the values of these interests.

[8] This reasoning is bolstered by Spouse's sale of most of the trust property immediately after Spouse received it in exchange for promissory notes that did not provide for the payment of principal until a date after Spouse's probable life expectancy.

Accordingly, based on the available facts, we conclude that the actuarial value of Children's proportionate shares of the remainder interest is properly determined under § 7520, using a standard remainder factor. Thus, the value of each child's remainder interest under § 7520 is determined by multiplying the value of the trust property by the remainder factor of 0.90828[9] then dividing the product by 2. Section 25.2512-5(d)(2)(ii); § 25.7520-1. Based on a value of the trust property of $ b, the fair market value of each child's gift, therefore, is $g (*i.e.*, ($ b x 0.90828) ÷ 2 = $ g).

[9] The remainder factor of 0.90828 is the § 20.2031-7(d)(7) Table S remainder factor at age y and z%, the § 7520 rate on Date 3.

Boyle & Zaritsky, "Chief Counsel Advice 202118008: Tax Consequences of Distributing an Entire QTIP Trust to Spouse," *Probate Practice Reporter* vol. 33, No. 6 (6/2021), explains:

The Service's overall position in the *Chief Counsel Advice* is that the amount paid to the spouse in exchange for the acceleration of the remainder interest cannot reduce the value of the spouse's deemed gift of the remainder interest under section 2519. The gift to the remainder beneficiaries under section 2519 is not a transfer of property by the spouse as the spouse-beneficiary of a QTIP has no interest in the principal of the trust. Thus, when some portion or all of the qualifying income interest is released to trigger section 2519, there is no transfer of qualifying income interest that is transferred to trigger the section 2519 gift. Rather, the accelerated transfer of the remainder interest is a gift of property from the original grantor who created the QTIP trust. Without section 2519 there would be no reason to tax the spouse as the spouse is not transferring his or her own property as required by section 2511 for a taxable gift.

Section 2519 was added to the Code when the QTIP rules of sections 2056(b)(7) and 2523(f) were adopted in 1981. The purpose of section 2519 is to provide inter vivos taxation of property that was not subject to estate or gift tax when the QTIP trust was created. Section 2044 accomplishes the same result when the surviving spouse beneficiary dies. The purpose of all four sections is to permit the first spouse to die a deferral of estate or gift taxes on the transfer of his or her property to a spouse. That estate or gift tax deferral ends when the surviving spouse disposes of some or all of the qualifying income interest or dies, but under section 2207A it is the first spouse's property that is used to pay any gift or estate taxes due.

Reciprocal Transfers

The Service's position that the reciprocal trust doctrine is not applicable also seems valid. The children are not economically in the same position after the trust termination. Before the termination, the children held contingent remainder interests in the QTIP trust. After the termination, they were entitled to nothing.

On the other hand, the spouse owns outright the actuarial value of both the qualified income interest and the value of the remainder after the termination. For a reciprocal transfer, there should be interests in property moving both directions, to equate with the interests of the original transferors. When nothing remains for one of the transferors after the dust has settled, there is nothing that is reciprocal. See Rev. Rul. 74-533, 1974-2 C.B. 293, to calculate the amount of reciprocity.

Furthermore, application of the reciprocal trust doctrine in *Grace* concerned the application of the federal estate tax. The Supreme Court's opinion does not discuss the application of the federal gift tax as the trusts in *Grace* were created shortly before Congress adopted a gift tax. There is no reason to believe that gift tax would not have applied when the trusts in *Grace* were created under current gift tax law. The reciprocal trust doctrine has been applied in the gift tax context when related donors seek to increase the amount of annual exclusion gifts by making gifts to each other's children. See for example, *Sather v. Commissioner*, 251 F.3d 1168 (8th Cir. 2001), *aff'g in part, rev'g in part* T.C. Memo. 1999-309, discussed in the July 2001 issue of the REPORTER.

Income Tax Issues

The Chief Counsel Advice does not consider the possible income tax consequences of the transaction. It seems quite reasonable that the Service could have argued, and might still argue, that the reciprocal gifts were in fact an income taxable exchange of property. The taxpayers argued that the gifts were valued at zero because of the mutual consideration. But this position leaves open the argument that it was a bargained-for exchange - that is, the children paid the spouse to terminate the trust early. The spouse would not seem to have any basis in the remainder interest, and therefore the full amount received would be included in gross income. Treasury Regulation section 1.1015-4 provides rules to calculate gain in a transaction that is a sale in part and a gift in part when the consideration is not full and adequate.

In addition, and more onerous, is the possibility that the agreement to commute or terminate the trust was an income taxable event regardless of the gift tax issues. Howard Zaritsky, Ryan Wallace, and the author of this article published a lengthy law review article discussing the income tax consequences of terminating a trust early. See, Boyle, Zaritsky, and Wallace, *The Uniform Basis Rules and Terminating Trusts Early*, 55 REAL PROP. TR. & EST. L.J. 1 (2020).

The Service has a long-standing letter ruling position that commutation or early termination of a trust, in which the term interest holder(s) and remainder interest holder(s) receive their respective actuarial shares of the underlying assets, is a sale of the life or term interest to the remainder interest holder. As a consequence, it applies the "no-basis recovery" rule of section 1001(e)(1) to the life or term interest because all of the property is not sold to a third party. Therefore, the life or term interest holder realizes gain for the full amount received in exchange for the interest. According to the Service, the remainder interest holder does not realize gain on the exchange of the remainder interest for trust assets but may realize gain to the extent appreciated assets are used to acquire the life or term interests.

The Service applied its ruling position in 2019 in ten related letter rulings concerning the same trust. See Private Letter Rulings. 201932001-010 (Aug. 9, 2019), discussed in the September 2019 issue of the REPORTER. The Service's position is not without precedent. In particular, *McAllister v. Commissioner*, 157 F.2d 235 (2d Cir. 1946), *cert. denied*, 330 U.S. 826 (1947), supports the application of section 1001 to the commutation of a trust, even though this case is not cited in the letter rulings. Thus, the spouse in the Chief Counsel Advice might well have income as a result of the commutation based on *McAllister*, section 1001(e), and other statutes and precedent discussed in the author's co-authored law review article.

A full discussion of the uniform basis rules and the possible application to the termination of a QTIP trust is beyond the scope of this article, but practitioners who advise clients about terminating trusts should carefully consider the potential for an income tax liability.

Conclusion

The Chief Counsel Advice is quite lengthy: nearly 7,000 words. The discussion of the issues above attempts to summarize the Service's position. Of special note is the fact that the Chief Counsel Advice arises in an audit of gift tax returns in which the taxpayers gave notice of the transaction but took the position that the value of the gifts was zero: returns are being audited that report transactions but no taxable gifts. A second interesting facet is that the Chief Counsel Advice would not quantify the value of a discretionary right to trust principal, but instead give it a zero value.

Children are probably better off having lost their argument regarding reciprocal transfers. If their argument had succeeded, then they would have been the true settlors of the Children's Trusts instead of Spouse being the settlor, and Children's Trusts would have been included in their gross estates under Code § 2036.[2995]

I would push back somewhat against the way in which the CCA argued the children's interest was valued. The facts were:

Trust 1 grants Spouse a testamentary limited power of appointment in favor of Decedent's descendants. In the absence of Spouse's exercise of Spouse's testamentary

[2995] See part III.C Code § 2036.

limited power of appointment, Trust 1 directs the remainder to be distributed outright to Children, by right of representation.

Because spouse could have appointed all of the remainder to grandchildren, none of Children was assured of an outright distribution. Therefore, arguably Children's remainder interest was unascertainable.[2996] You might consider advising remaindermen to file gift tax returns in such situations, using adequate disclosure, to get finality on the issue and avoid perhaps penalties and many years of interest if the IRS examines the surviving spouse's return and asks what happened to the marital trust.

One final comment about Boyle & Zaritsky's article: They refer to their article in the *RPTE Journal* on the termination of trusts. Although the latter is a good summary, it does not consider the nuances described in part II.J.18.f Commutation vs Mere Division, so consider their income tax cautions generally but apply some taxpayer-favorable skepticism. However, their warnings are right on target in CCA 202118008, because in CCA 202118008 the spouse's interest in the trust was ascertainable and the trustee did not have the discretion that part II.J.18.f suggests would be quite helpful in avoiding income tax consequences on trust termination. Again, the children are fortunate that CCA 202118008 rejected their swap argument, because otherwise CCA 202118008 may have deemed them to have sold their remainder interest.

Letter Ruling 202339008 included the following facts with a QTIP trust:

> The trust agreement of Trust ("Trust Agreement") provides that upon Decedent's death, the trustee is to divide the trust estate into two separate trusts, Marital Trust and Non-Marital Trust. Trust Agreement provides that Marital Trust is to be funded with property equal in value to that fractional share of Decedent's gross estate, the numerator of which is the marital deduction amount and the denominator of which is the value of Decedent's gross estate at its federal estate tax value after paying expenses and taxes. The marital deduction amount is defined as that amount which equals the lowest marital deduction which results in no federal estate tax being owed by reason of Decedent's death. Pursuant to Trust Agreement, the remaining portion of the trust estate was to fund Non-Marital Trust. Because Decedent had exhausted the entirety of his Basic Exclusion Amount before his death, Non-Marital Trust was not funded, and the entirety of the trust estate passed to Marital Trust.
>
> Trust Agreement requires the trustee to pay Spouse all the net income of Marital Trust for her lifetime. In addition, Trust Agreement provides that the trustee may distribute to Spouse as much principal as the trustee, in its sole discretion, deems necessary or advisable for Spouse's comfort, support, or welfare. Upon Spouse's death, the remaining principal and income of Marital Trust passes to Non-Marital Trust after payment of any taxes attributable to Marital Trust's inclusion in Spouse's estate.
>
> Trust Agreement provides that trustee must distribute all income of Non-Marital Trust between Spouse, Child 1, and Child 2. Trust Agreement further provides that trustee may distribute as much principal of Non-Marital Trust to Spouse, Child 1, or Child 2 as the trustee in its sole discretion deems necessary for their education, support, maintenance, and health. Trust Agreement provides that upon Spouse's death, Non-Marital Trust will split into separate shares for Child 1 and Child 2. The assets of each

[2996] See fn 6350 in part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts.

child's separate share will be distributed outright to him or her at age x. Child 1 and Child 2 have both attained the age of x.

> Trust Agreement provides that Spouse may disclaim her right to receive income and principal from part or all of Marital Trust as Spouse specifies in a writing deposited with the trustee during Spouse's life. Trust Agreement further provides that assets disclaimed by Spouse are to be added to Non-Marital Trust.
>
> Spouse proposes to renounce her interests in Marital Trust and, in accordance with State Statute, her interest in Non-Marital Trust. After the renunciations, because both Child 1 and Child 2 have attained age x, the property of Non-Marital Trust will be distributed to Child 1 and Child 2 under the express provisions of Trust Agreement, in accordance with State Statute. Additionally, as a condition of such renunciation, Spouse, Child 1 and Child 2 intend to enter into a net gift agreement ("Net Gift Agreement") providing that gift tax imposed on Spouse's gift of her qualifying income interest under § 2511 will be paid by Child 1 and Child 2. Finally, Spouse intends to exercise her right under § 2207A to recover from Child 1 and Child 2 the gift tax attributable to Spouse's deemed gift of the remainder of Marital Trust under § 2519.

Letter Ruling 202339008 included the following analysis and ruling:

> Section 25.2519-1(c)(1) provides that the amount treated as a transfer under § 2519 upon a disposition of all or part of a qualifying income interest for life in QTIP is equal to the fair market value of the entire property subject to the qualifying income interest, determined on the date of the disposition (including any accumulated income and not reduced by any amount excluded from total gifts under § 2503(b) with respect to the transfer creating the interest), less the value of the qualifying income interest in the property on the date of the disposition. The gift tax consequences of the disposition of the qualifying income interest are determined separately under § 25.2511-2.
> Section 25.2519-1(c)(4) provides that the amount treated as a transfer under § 25.2519-1(c)(1) is further reduced by the amount the donee spouse is entitled to recover under § 2207A(b). If the donee spouse is entitled to recover gift tax under § 2207A(b), the amount of the gift tax recoverable and the value of the remainder interest treated as transferred under § 2519 are determined by using the same interrelated computation applicable for other transfers in which the transferee assumes the gift tax liability. The gift tax consequences of failing to exercise the right of recovery are determined separately under § 25.2207A-1(b).
>
> Under § 2207A(b) and § 25.2207A-1(a), if an individual is treated as transferring an interest in property by reason of § 2519, the individual is entitled to recover from the "person receiving the property" (as defined in § 25.2207A-1(e)) the amount of gift tax attributable to that property. Under § 25.2207A-1(e), if the property is in trust at the time of the transfer, the "person receiving the property" is the trustee, and any person who has received a distribution of the property prior to the expiration of the right of recovery if the property does not remain in trust. Under § 25.2207A-1(b), the failure of a person to exercise a right of recovery provided by § 2207A(b) is treated as a transfer for federal gift tax purposes of the unrecovered amounts to the persons from whom the recovery could have been obtained.
>
> Rev. Rul. 75-72, 1975-1 C.B. 310, holds that if, at the time of the transfer, a gift is made subject to a condition that the gift tax is to be paid by the donee or out of the transferred

property, then the donor receives consideration for the transfer in the amount of the gift tax to be paid by the donee. Thus, under § 2512(b), the value of the gift is the fair market value of the property passing from the donor less the amount of the gift tax to be paid by the donee or from the property itself.

Rev. Rul. 81-223, 1981-2 C.B. 189, holds that, in determining the amount of the gift tax liability that is to be subtracted from the value of the transferred property, the donor's available unified credit must be used to reduce the gift tax liability that the donee has assumed to the extent unified credit is available.

State Statute provides, in part, that a person may disclaim, in whole or in part, conditionally or unconditionally, any interest in or over property. Under State Statute, a disclaimer becomes irrevocable when any conditions to which the disclaimant has made the disclaimer are satisfied and when the disclaimer is delivered and filed in accordance with State law. Further, State Statute provides that if a donative instrument expressly provides for the distribution of property if there is a disclaimer, the property shall be distributed in accordance with the donative instrument. However, in the absence of express provisions to the contrary in the donative instrument, the property or interest in property disclaimed, and any future interest that is to take effect in possession or enjoyment at or after the termination of the interest disclaimed, shall be distributed as if the disclaimant had predeceased the decedent.

In this case, Spouse's renunciation of her interest in Marital Trust will not constitute a qualified disclaimer under § 2518 and the applicable regulations because it was not made within nine months of the creation of the interest (which in this case is Decedent's death) and Spouse has already accepted benefits from the Marital Trust. Based upon the facts submitted and the representations made, the renunciation of Spouse's interest in Marital Trust is a disposition of Spouse's qualifying income interest for life in property for which a marital deduction was allowed under § 2056(b)(7). Spouse will make a completed gift of her qualifying income interest in Marital Trust under § 2511 and will be deemed to have made a completed gift of all of the other property and other interests in property then owned by Marital Trust, other than Spouse's qualifying income interest in Marital Trust, under § 2519.

Because Spouse's renunciation of her interest in Marital Trust will result in a completed transfer to Non-Marital trust, Spouse will be considered to make an inter vivos transfer to Non-Marital Trust. Consequently, under § 2518 and the applicable regulations, the Non-Marital Trust beneficiaries' interests with respect to the property transferred from Marital Trust will be created as of the date of Spouse's renunciation of her interest in Marital Trust. Accordingly, the beneficiaries of Non-Marital Trust may disclaim their interests in the property transferred by Spouse to Non-Marital Trust within nine months of Spouse's renunciation of her interests in Marital Trust. Therefore, based on the facts submitted and the representations made, Spouse's renunciation of her interest in the property transferred to Non-Marital Trust will constitute a qualified disclaimer under § 2518 and the applicable regulations.

As a condition of the gift resulting from Spouse's renunciations of her interest in Marital Trust and Non-Marital Trust, Spouse, Child 1, and Child 2 intend to enter into Net Gift Agreement providing that gift tax imposed on Spouse's qualifying income interest under § 2511 will be paid by Child 1 and Child 2. Thus, based on the facts submitted and the

> representations made, after the renunciations, the amount of the gift will be reduced by the gift taxes paid by or recovered from Child 1 and Child 2.
>
> Furthermore, based on the facts submitted and the representations made, Spouse's gift under § 2519 will be reduced by Spouse's right under § 2207A to recover from Child 1 and Child 2 the gift tax attributable to such gift.

Letter Ruling 202339008 ruled that the gift tax tax paid by the children through the net gift would nevertheless be included in Spouse's estate if Spouse dies within three years:

> Section 2035(b) provides that the amount of the gross estate shall be increased by the amount of any tax paid under chapter 12 by the decedent or his estate on any gift made by the decedent or his spouse during the 3-year period ending on the date of the decedent's death.
>
> In *Estate of Sachs v. Commissioner*, 856 F.2d 1158 (8th Cir. 1988), donor made a gift to trust, and, pursuant to a net gift agreement, the trustee paid the gift tax associated with the gift. When donor died within three years of making the gift, the court held that the gift tax paid was included in donor's estate even though it was actually paid by the donees. The court stated "[j]ust as the donee's tax payment must be included in the donor's taxable income, a donee's tax payment (on a gift made within three years of the donor's death) is an includable part of the donor's gross estate under [§ 2035(b)]. The fact that the Internal Revenue Service received the payment for the decedent's gift-tax liability via the donee does not make it any less a 'tax paid...by the decedent or his estate' within the meaning of [§ 2035(b)]. " *Id*. at 1164.
>
> In *Estate of Morgens v. Commissioner*, 133 T.C. 402 (2009), *aff'd*, 678 F.3d 769 (9th Cir. 2012), decedent transferred her income interest in a QTIP trust to the remainder beneficiaries and died within three years of making the gift. As a condition of the gift, the remainder beneficiaries agreed to pay the gift tax liability arising under § 2519. The court held that neither the donees' agreement to pay the gift tax nor the decedent's right of recovery under § 2207A(b) prevented the gift tax paid from being included in the decedent's estate under § 2035(b).
>
> The legislative history to § 2035(b) provides that "the gift tax paid on transfers made within 3 years of death should in all cases be included in the decedent's gross estate." H.R. Rep. No. 94-1380 at 3366.
>
> Based on the facts submitted and the representations made, all gift tax imposed on Spouse's gift of the interests in Marital Trust under §§ 2511 and 2519 will be included in Spouse's gross estate under § 2035(b) if she dies within three years of having made the gift.

Letter Ruling 202339008 discussed the income tax consequences of the net gift agreement, by which Spouse was deemed to sell her beneficial interest in exchange for gift tax paid:

> Section 1001(e)(1) provides that in determining gain or loss from the sale or other disposition of a term interest in property, that portion of the adjusted basis of such interest which is determined pursuant to § 1014, § 1015, or § 1041 (to the extent that such adjusted basis is a portion of the entire adjusted basis of the property) shall be

disregarded. Section 1001(e)(2)(C) provides that the term “term interest in property” means an income interest in a trust.

The character of the gain will depend on the nature of the asset sold. Section 1222 provides that long-term capital gain is gain from the sale or exchange of a capital asset held for more than one year. Section 1221 provides that the term “capital asset” means property held by the taxpayer, excluding certain types of property not apparently at issue in this case.

Rev. Rul. 72-243, 1972-1 C.B. 233, holds that the proceeds received by the life tenant of a testamentary trust, in consideration for the transfer of her entire interest in the trust to the remainderman, are to be treated as an amount realized from the sale or exchange of a capital asset under § 1222 and that the life tenant’s basis attributable to his life interest at the time of the sale is considered to be zero, pursuant to § 1001(e). See §§ 1.1001-1(f) and 1014-5(b) and (c) of the Income Tax Regulations.

In *Diedrich v. Commissioner*, 457 U.S. 191 (1982), the Court held that, if a donor makes a gift transfer of appreciated property that is conditioned upon the transferee’s payment of the resulting gift tax, the donor realizes gross income to the extent that the gift tax paid by the donee exceeds the donor’s adjusted basis in the transferred property. The Court reasoned that, when a donor makes a gift to a donee, a debt to the United States for the amount of the gift tax is incurred by the donor. When the donee agrees to discharge an indebtedness in consideration of the gift, the person relieved of the tax liability realizes an economic benefit.

Based on the facts submitted and the representations made, the amount realized by Spouse, under § 1001(b), will be the amount of gift tax paid or reimbursed by Child 1 and Child 2 attributable to Spouse’s gift of her income interest under § 2511 pursuant to the Net Gift Agreement. Gift tax paid or reimbursed by Child 1 and Child 2 attributable to Spouse’s gift under § 2519 of the remainder of Marital Trust is not part of the amount realized by Spouse under § 1001(b).

Because Spouse’s adjusted basis in the property she is transferring is considered to be zero under § 1001(e), the gain from Spouse’s disposition of the property will be equal to the amount realized. Accordingly, under § 1001(c), the entire amount of gain will be recognized.

Under Rev. Rul. 72-243 and *Diedrich*, Spouse’s gain from the transfer of her entire interest in Marital Trust will be treated as an amount realized from the sale or exchange of a capital asset under § 1222.

Accordingly, based on the facts submitted and the representations made, the current federal income tax imposed on Spouse as a result of the proposed transaction will be calculated by treating the amount of gift tax paid or reimbursed by Child 1 and Child 2 attributable to Spouse’s gift of her income interest under § 2511 pursuant to the Net Gift Agreement as gain from the sale of a capital asset.

Reg. § 1.1014-8 governs the basis of a remainder interest, but it has not been updated for various changes in the law.

Code § 167(e), "Certain term interests not depreciable," provides:

(1) *In general*. No depreciation deduction shall be allowed under this section (and no depreciation or amortization deduction shall be allowed under any other provision of this subtitle) to the taxpayer for any term interest in property for any period during which the remainder interest in such property is held (directly or indirectly) by a related person.

(2) *Coordination with other provisions*.

(A) *Section 273*. This subsection shall not apply to any term interest to which section 273 applies.

(B) *Section 305(e)*. This subsection shall not apply to the holder of the dividend rights which were separated from any stripped preferred stock to which section 305(e)(1) applies.

(3) *Basis adjustments*. If, but for this subsection, a depreciation or amortization deduction would be allowable to the taxpayer with respect to any term interest in property—

(A) the taxpayer's basis in such property shall be reduced by any depreciation or amortization deductions disallowed under this subsection, and

(B) the basis of the remainder interest in such property shall be increased by the amount of such disallowed deductions (properly adjusted for any depreciation deductions allowable under subsection (d) to the taxpayer).

(4) *Special rules*.

(A) *Denial of increase in basis of remainderman*. No increase in the basis of the remainder interest shall be made under paragraph (3)(B) for any disallowed deductions attributable to periods during which the term interest was held—

(i) by an organization exempt from tax under this subtitle, or

(ii) by a nonresident alien individual or foreign corporation but only if income from the term interest is not effectively connected with the conduct of a trade or business in the United States.

(B) *Coordination with subsection (d)*. If, but for this subsection, a depreciation or amortization deduction would be allowable to any person with respect to any term interest in property, the principles of subsection (d) shall apply to such person with respect to such term interest.

(5) *Definitions*. For purposes of this subsection—

(A) *Term interest in property*. The term "term interest in property" has the meaning given such term by section 1001(e)(2).

(B) *Related person*. The term "related person" means any person bearing a relationship to the taxpayer described in subsection (b) or (e) of section 267.

(6) *Regulations*. The Secretary shall prescribe such regulations as may be necessary to carry out the purposes of this subsection, including regulations preventing avoidance of this subsection through cross-ownership arrangements or otherwise.

Code § 267 is described in part II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses.

Code § 273, "Holders of life or terminable interest," provides:

> Amounts paid under the laws of a State, the District of Columbia, a possession of the United States, or a foreign country as income to the holder of a life or terminable interest acquired by gift, bequest, or inheritance shall not be reduced or diminished by any deduction for shrinkage (by whatever name called) in the value of such interest due to the lapse of time.

The committee reports for Code § 167(e) (P L. 101-239, 12/19/89) explain:[2997]

House Explanation

Present Law.

The purchaser of a term interest in property is, for income tax purposes, entitled to amortize the cost of the interest over its expected life. The purchaser of a remainder interest in property generally does not include currently in income increases in the value of the interest.

On the other hand, a person who divides an interest in property into two parts cannot create an amortizable asset where none previously existed. Thus, a person who retains a term interest in property while transferring the remainder in that property cannot amortize the cost of the term interest.[1]

[1] See, *e.g.*, *Lomas Santa Fe, Inc. v. Commissioner*, 74 T.C. 662, 682-83 (1980); *United States v. Georgia R.R. & Banking Co.*, 348 F.2d 278, 288-89 (5th Cir. 1965), *cert. denied*, 382 U.S. 973 (1966).

Explanation of Provision.

No depreciation or amortization deduction is allowed for a term interest in property for any period during which the remainder interest in such property is held (directly or indirectly) by a related person. The provision does not affect a depreciation deduction which is not attributable to a term of years of life estate. Thus, the owner of a term interest in a building cannot amortize the term interest but may claim the depreciation deduction with respect to the underlying building allowed under present law.

The taxpayer's basis in a term interest is reduced by the deductions disallowed by the provision, and the remainderman's basis in the remainder is increased by those

[2997] Excerpted from RIA Checkpoint, USTR, "COMREP ¶1671.004 Disallowance of Depreciation for Certain Term Interests."

deductions. In the joint purchase described in the above example, the child's basis in the preferred stock would be increased in each of the six years by $72.61, the amount of the amortization deduction denied to the parent by reason of the provision.

A term interest in property is a life interest in property, an interest in property for a term of years, or an income interest in a trust. A related person is any person bearing a relationship to the taxpayer described in section 267(b) or 267(e). In determining whether persons are related, the constructive ownership rules of section 267(c) apply.

The Secretary of the Treasury shall prescribe such regulations as may be necessary to carry out the purposes of the provision, including regulations preventing avoidance of the provision through cross-ownership arrangements or otherwise. Such regulations shall prevent avoidance of the provision by one family owning a term interest in one property and a remainder interest in a second property, while another family owns a remainder interest in the first property, and a term interest in the second property. Such regulations would also prevent avoidance through the joint purchases of interests in substantially similar property. For example, a parent could not avoid the provision by purchasing a life interest in stock of a corporation while a child purchases a remainder interest in other stock of the same corporation.

The committee does not intend to change the taxation of transactions in which the remainderman is taxed on his accretion in wealth. Thus, for example, the provision does not affect the taxation of a stripped bond under section 1286 or transactions in which the lessor is imputed income under section 467(f).

Effective Date.

The provision applies to life or terminable interests acquired or created after July 27, 1989, in taxable years ending after such date.

Conference Report

Conference Agreement.

The conference agreement follows the House bill, with the following modifications. First, the remainderman's basis in the remainder is not increased for any disallowed deductions attributable to periods during which the term interest was held by (1) an organization exempt from tax under subtitle A of the Code or (2) a nonresident alien individual or foreign corporation (but only if income from the term interest is not effectively connected with the conduct of a trade or business in the United States).

Second, the holder of an interest in property for a term of years whose amortization deduction would be allowed but for the provision is permitted a depreciation deduction computed as if he were absolute owner of the property. Thus, the provision does not allow such a depreciation deduction to a person whose amortization deduction is disallowed under present law.

Third, the increase in the remainderman's basis in his interest is reduced by any depreciation allowable to the term holder with respect to the underlying property.

Fourth, the provision does not apply to any term interest to which section 273 applies.

In addition, the conferees intend that the remainderman's basis in the property is increased only if the term holder's amortization deduction would be allowed but for the provision.

The conferees intend no inference regarding the divisibility of property for tax purposes under present law. Nor do they intend any inference regarding the character of income or gain from property so divided.

Rev. Rul. 62-132 held:

The Internal Revenue Service will follow the decision of the United States Court of Appeals for the Sixth Circuit in *Commissioner v. William N. Fry, Jr., et al.*, 283 Fed.(2d) 869 (1960), and the decision of the United States Court of Appeals for the Seventh Circuit in *Laird Bell v. Harrison, et al.*, 212 Fed.(2d) 253 (1954).

These cases hold that a remainderman of a trust, the corpus of which consists of corporate stock, who purchases the interest of a life beneficiary of the trust, is entitled to recover his cost through amortization over the period of the beneficiary's life expectancy, by ratable annual deductions.

The Service had argued that the purchased life interest became merged with the remainder interest, with the result that the cost of the purchased life interest could be recouped only at the time of the sale or other disposition of the stock.

The Service noted that the transactions in these cases appeared to be bona fide and without a tax avoidance motive. These cases will be followed in the disposition of other cases in which the facts are substantially the same.

[1] Based on Technical Information Release 392, dated July 16, 1962.

Thus:

- Under Code § 273, the holder of a life or terminable interest acquired by gift, bequest, or inheritance cannot amortize its basis. Note that none of these events is a purchase, so Code § 273 does not affect purchases.

- Under Code § 167(e)(1), a taxpayer holding a term interest cannot amortize that interest when the remainder interest is held (directly or indirectly) by a related person.

- Rev. Rul. 62-132 allows the purchaser of a term interest to amortize it if Code § 167(e)(1) does not apply.

- The seller of a term interest cannot apply basis against sale proceeds unless the overly narrow Reg. § Reg. § 1.1001-1(f)(3), which requires a transfer "to a third person or to two or more other persons," applies.

In *Garvey v. U.S.*, 369 F.Supp.2d 1328 (D. Kan. 2005), in 1987 Mr. and Mrs. Garvey bought life interests and 1983 irrevocable trusts they had created bought remainder interests in interests in a newly formed partnership. A 1986 letter from their investment advisor described the plan:

> Although the initial objective was to determine if there is an opportunity by utilization of split purchases of property to transmit it to subsequent generations with no transfer tax costs, an additional objective emerged and that is as a method of extracting corporate [or partnership] assets to others without the imposition of either a dividend or capital gains tax.
>
> "It" is the split purchase of assets from unrelated parties with the older generation buying a life estate or a term of years and the younger generation purchasing the remainder interest with the cost allocated based on the actuarial tables….
>
> Upon the expiration of the term interest, the entire property, including accumulated capital gains or less accumulated capital losses, passes to the remainderman free of income, gift and estate taxes….
>
> The practical limiting factor is the availability of funds by the persons or entities to purchase the remainder interest. Simultaneous gifts of funds for the acquisition of the interest contains an element of risk in collapsing the transaction into one of being a "retained" interest rather than a "purchased" interest, in which case the favorable estate tax results do not occur. Gifts separated by time or gifts by the spouse of the purchaser of the term interest would work.
>
> There is no gift tax imposed in any point in time in the described transaction because there is no gift, *i.e.*, each party is paying the market value of its interest as determined the actuarial tables.
>
> While the term interest is in effect its holder may amortize and deduct for Federal income tax purposes the aliquot portion of the cost of the term interest although the property may otherwise be nondepreciable, *e.g.*, securities or land.
>
> Properly drafted, any capital gains realized during the time of the term interest are subjected to tax but not to either the holder of the term interest or the remainderman, but to an "implied trust" which constitutes a separate taxpayer, presumably at lower rates, with the tax paid from the proceeds of the transaction giving rise to the gain, and with the remainder of the proceeds being retained with the income therefrom, being paid to the holder of the term interest.
>
> Upon expiration of the term interest there is no income tax liability to the remainderman upon receipt of the property, with the only unfavorable factor being the remainderman's tax basis in the entire property is only his cost of the remainder interest.
>
> In a life estate, of course, upon death of the life tenant there would be no estate tax, which is a potentially significant advantage of utilizing a life estate other than a term interest.

From 1987-1996, deductions from amortizing their life estate in the partnership were $1,496,073, and their share of the partnership income was $898,475. When the IRS disallowed the amortization deductions, the taxpayers paid and sued for a refund. The *Garvey* court explained:

> Plaintiffs assert that they are entitled to a refund of the income taxes in issue because during the periods here pertinent, relevant tax law provided that to recover plaintiffs' tax

basis in the assets they contributed to Joy, an amortization deduction was available over the limited life of their interests in the partnership. They contend that the law provided that an asset (in this case a partnership interest) owned for a limited term with other related parties qualified for an amortization deduction. (See, *e.g.*, *Richard Hansen Land, Inc. v. Commissioner*, 65 T.C.M. (CCH) 2869 (1993)). Plaintiffs cite the general rule that a taxpayer who purchases a term interest in property which is used in a trade or business, or held for the production of income, is entitled to deduct ratably the cost of that interest over its expected life.[1] See, *e.g.*, Tres. Reg., 1.1014-5(c), Examples 1, 2 and 3; Rev. Rul. 62-132, 1962-2 CB 73; *Early v Commissioner*, 445 F.2nd, 166, 169 (5th Cir. 969 [sic, 1971]); *Manufacturers Hanover Trust Co., v Commissioner*, 431 F.2nd 664 (2nd Cir. 1970). Plaintiffs contend that the general rule applies to their investment in Joy.

> [1] An exception to the general rule is sec. 167(e) (as amended and in effect currently), which prohibits a taxpayer from amortizing a term interest where a related person holds the remainder interest. This section, however, applies only to term interests acquired or created after July 27, 1989. Since plaintiffs' term interests were created before that date, sec. 167(e) is inapplicable to the present case.

Defendant counters that plaintiffs formed Joy as the result of an integrated plan by which the plaintiffs transferred assets to other partners, who in turn then joined with the plaintiffs in the formation of the partnership. Defendant cites an exception to the general rule which occurs where a taxpayer, without additional investment, divides nondepreciable property into two parts, one of them being a term interest. In such a situation, amortization deductions are not allowable. See, *e.g.*, *Lomas Santa Fe, Inc. v. Commissioner*, 693 F.2nd 71 (9th Cir. 1982); *United States v Georgia R.R. & Banking Co.*, (348 F.2nd 278 (5th Cir. 1965)). Defendant contends that the exception to the general rule applies because the formation of Joy was the culmination of singular steps in an agreed-upon plan, and thus the steps can be amalgamated and treated as part of a single transaction. See, *e.g.*, *Commissioner v. Court Holding Co.*, 324 U.S. 331 (1945); *Kornfeld v. Commissioner*, 137 F.3rd, 1231 (10th Cir. 1998).

After reviewing *Gordon v. Commissioner*, 85 T.C. 309 (1985)[2998] and *CGF Industries, Inc. v. Commissioner*, 77 T.C.M. (CCH) 1405 (1999), the court decided that the trusts were old and

---

[2998] *Gordon* applied a step transaction theory to disallow the amortization, but only after commenting at 322-323:

> It is clear that a taxpayer may deduct ratably his or her cost basis in a purchased term, including a life, interest.[6] *Early v. Commissioner*, 445 F.2d 166, 169 (5th Cir. 1971), *revg.* on another ground 52 T.C. 560 (1969); *Manufacturers Hanover Trust Co. v. Commissioner*, 431 F.2d 664 (2d Cir. 1970), *affg*. a Memorandum Opinion of this Court; *Gist v. United States*, 296 F.Supp. 526, 528 (S.D. Cal. 1968), *affd*. 423 F.2d 1118 (9th Cir. 1970); *Frank MacBoyle Lewis Trust B v. Commissioner*, 83 T.C. 246, 253 n. 10 (1984); *Elrick v. Commissioner*, 56 T.C. 903, 909 (1971), *revd*. on another ground 485 F.2d 1049 (D.C. Cir. 1973); see also secs. 167(h), 62(6).[7] This is true even where the property underlying the purchased term interest is itself nondepreciable. See, *e.g.*, *Early v. Commissioner*, *supra* ; *Manufacturers Hanover Trust Co. v. Commissioner*, *supra*; *Elrick v. Commissioner*, *supra*. However, it is also clear that where a taxpayer, without additional investment, divides nondepreciable property into two parts, one of them being a term interest, amortization deductions are not allowable. *United States v. Georgia Railroad & Banking Co.*, 348 F.2d 278, 286-289 (5th Cir. 1965); *Lomas Santa Fe, Inc. v. Commissioner*, 74 T.C. 662, 681-684 (1980), *affd*. 693 F.2d 71 (9th Cir. 1982).

cold and that the taxpayers were entitled to deduct amortization of their life interests, based on these conclusions of law:

> During the relevant period, taxpayers who acquired a term interest in intangible property were allowed to amortize or depreciate the cost of the interest, even when the underlying property itself was not depreciable. Internal Revenue Code § 167(a) and Tres. Reg. 1.167(a)-3 and the cases cited herein. Thus, it was legal for Mr. and Mrs. Garvey to amortize or depreciate life estate interests in Joy.
>
> On the other hand, a taxpayer was prohibited from amortizing or depreciating the cost of term interest where, without additional investment, the taxpayer divides the nondepreciable asset into two parts, one of which is the term interest. Based upon the facts and the applicable law cited herein, the court concludes that plaintiffs have met their burden to establish that this did not occur.

Thus, on or before July 27, 1989, taxpayers could amortize life interests they purchased, if they did not themselves at the same time create the remainder interest. This rule explains Letter Ruling 8316135,[2999] which allowed the seller of a life estate to deduct basis in the life estate because the buyer was unable to amortize the life estate, given that the purchase there caused all interests in the trust to merge. So, let's take a fresh look at elements of Code § 1001(e):[3000]

- Code § 1001(e)(1), (2) disallow applying basis when selling a term interest.
- Code § 1001(e)(3) provides that this disallowance does "not apply to a sale or other disposition which is a part of a transaction in which the entire interest in property is transferred to any person or persons."

According to Letter Ruling 8316135,[3001] the Code § 1001(e)(3) exception is designed simply to make sure that the buyer cannot amortize the life estate. However, now that Code § 167(e) disallows that amortization when related parties hold the remainder interest, Code § 1001(e)(1) should not apply to those situations. Rather, Code § 1001(e)(1) should apply only when

> [6] There has been considerable controversy as to whether these ratable deductions are allowable as depreciation or amortization under sec. 167 or as amortization under secs. 162 and 212. See *Sohosky v. Commissioner*, 57 T.C. 403, 409 & n. 4 (1971), *affd*. 473 F.2d 810 (8th Cir. 1973); *Early v. Commissioner*, 52 T.C. 560, 568-572 (1969) (Tannenwald, J., dissenting). For purposes of discussion herein, we simply acknowledge that ratable deductions of some nature are allowable to a purchaser of a term interest in property either used in a trade or business or held for the production of income. For convenience, we have used the term "amortization" in discussing the transactions involved herein. In this connection, we note that respondent, in his opening brief, dropped the argument that petitioners' deductions are not allowable due to sec. 265(1), which disallows deductions allocable to tax-exempt income. See *Manufacturers Hanover Trust Co. v. Commissioner*, 431 F.2d 664 (2d Cir. 1970), *affg*. a Memorandum Opinion of this Court.

[3000] Code § 1001(e) is reproduced in this part II.J.18.d in the text accompanying fn 2973.

[3001] In this part II.J.18.d, see text accompanying fn 2977.

unrelated parties hold the remainder interest. Unfortunately, the lack of coordination between Code § 167(e) and Code § 1001(e)(1) is puzzling and may undermine this reasoning.

Suppose the life tenant buys out the remaindermen. The remaindermen can use basis in such a sale. Economically, the parties are in the same position as if the remaindermen had bought out the life tenant, but with different tax results. For example, suppose the life estate is worth $400,000 and the remainder is worth $600,000, for a total of $1 million. The life tenant borrows $600,000 to buy out the remaindermen. The life tenant now has the full $1 million trust, sells enough liquid assets to repay the $600,000 loan, and has $400,000 left. Economically, that doesn't differ from the life tenant being bought out for $400,000. But the tax result is very different, and so are the logistics. If the trust has only marketable securities, the transaction may be very do-able. However, if the trust holds illiquid assets, the logistics may be quite difficult; the life tenant buys out the remaindermen and then turns around and sells the illiquid assets to them, the IRS might argue that the substance was a sale of the life estate.

II.J.18.e. Ed Morrow on Potential Income Tax Disasters for Early Trust Terminations

"Ed Morrow on Potential Income Tax Disasters for Early Trust Terminations," LISI Estate Planning Newsletter #2753 (October 9, 2019) at http://www.leimbergservices.com, reviews this ruling and its companions (201932001 to 201932010), discussing the income tax ruling.[3002] Except as otherwise indicated in footnotes, the rest of this part II.J.18.e is a direct quote, with Ed's permission; my conclusions relating to the ideas in his analysis is in part II.J.18.f Commutation vs Mere Division.

It's the third ruling on the income tax effect that should wake up practitioners, especially when considering how the gain in ruling #3 was ultimately calculated. It is dangerous trap for commutations and potentially other variations of early trust terminations – and potentially avoidable. If the IRS is correct in its rulings, the cure of terminating a trust early will often be much worse than the perceived disease of continuing it….

Therefore, G2 must pay long-term capital gains tax on the entire amount of his interest (importantly, with **no amount of basis permitted to offset gain, discussed below**), whereas G4 pays long-term capital gains tax on the amount they receive minus their share of the trust's basis as determined actuarially under the uniform basis rules. The impact on G3 is a bit confusing in the ruling, but apparently G3 only pays tax to the extent of the unrealized appreciation triggered on amounts going to G2 and G4 for their share.[2] The sole consolation is that G3 does not have to pay any tax on their share of assets received until they are later sold. In total though, this still creates a huge income tax event, *potentially worse than if the trustees had sold all of the appreciated assets*, with G2's estate being dramatically increased by the amount received net of tax even though he didn't need the income! This is a heavy price to pay to get out of a trust, like cutting off an arm to cure the itch from a mosquito bite.

[2] This is basically Kenan gain (*Kenan v. Comm.*, 114 F.2d 217 (2d Cir. 1940)), also addressed in Treas. Reg. 1.661(a)-2(f). If G3 has an obligation to pay G2 $5 million and G4 $1 million, and distributes $6 million of property with a basis of $4 million to them, $2 million of gain is triggered to G3 on transfer, no different than if you owed someone $1000 and gave them appreciated assets in kind to pay the debt. Correspondingly, G2 and G4 would have a new FMV/Cost basis.

[3002] Ed used dashes between the year and week of each PLR. I eliminated them.

There are no dollar amounts in the various PLRs of course, but with a 35+ year old trust, there had to have been substantial appreciation. Let's imagine the trust corpus in these PLRs is $20 million, with $5 million basis and the actuarial value of G2's interest is $8 million and G3's interest is $11 million and G4's interest is $1 million (G4's interest should be relatively small, since they would only receive anything if their parent predeceases their grandparent).[3] The $5 million of basis would be divided under the uniform basis rules as $2 million, $2.75 million and $250,000 respectively. G2 pays long term capital gains tax (20% + 3.8% + potentially state) on $8 million (G2 cannot use his share of $2 million basis)! G4 pays long term capital gains tax on $1 million, but is permitted to use their $250,000 share of uniform basis to offset gain, incurring $750,000 of long-term capital gain.

[3] It is not a dynastic trust and pays outright at G2/Son's death to G3. For examples of such actuarial divisions under the uniform basis rules, see examples under Treas. Reg. § 1.1014-5, with various actuarial tables at Treas. Reg. § 20.2031-7 and IRS Pub. 1457, or your favorite financial planning software.

As a deemed *buyer* rather than a seller, G3 does not pay tax on receiving their share, but this transaction does trigger tax to G3 on the $9 million of assets going to G2 and G4 to "buy out" their share, minus the $2.25 million of basis attributed to those assets ($9 million - $2.25 million = $6.75 million net long-term capital gain, assuming that those assets have been held for more than one year, which may not necessarily be the case for all of them). Thus, the total gain triggered among the family is $11.5 million ($8 million + $750,000 +$6.75 million). If we assume a 30% tax rate including state income tax on this $11.5 million of gain, that's a **$3.45 million price tag to terminate the trusts** that could have largely been avoided by waiting until son's death, or releasing an interest or amending the trust or taking another path that would not cause such a tremendous income taxable event.

By way of quick contrast, let's say there was a market downturn after funding and the basis was $30 million instead of $5 million, but all other facts the same as in our above hypothetical. *G2 would still incur $8 million of long-term capital gains and $12 million of basis would be wiped off the face of the Earth.* G4 and G3 would have a long-term capital loss, but it would probably be denied them under related party rules.[4] Thus, the spectre of a large capital gains event is present even if done immediately after death, even if the trust is entirely funded in cash.

[4] IRC §267.

Effect on Later Estate Inclusion/Basis Step Up at Son (G2)'s Death

The immediate income tax disaster is not the only negative to the commutation. If son (G2) did not otherwise have a taxable estate, he could have been granted a formula testamentary power of appointment to increase some if not all of the basis at his death.

If son *did* have a taxable estate, which is perhaps more likely based on the stipulated fact in the PLRs that son didn't need the income, the effect of the commutation is even worse, since the settlement adds his entire share (minus beaucoup taxes) to his estate to later be taxed at 40% again at his death when it otherwise would have passed to them without any estate or GST tax!

"Now I am Become § 1001(e), the Destroyer of Basis"[5]

As for the unique ruling on the destruction of G2's basis, it is a function of IRC § 1001(e)(1), which deems the sale of a trust income interest to have a *zero basis*.[6] There is an exception to this rule when the sale is part of a transaction in which the entire interest in property is transferred to any person or persons.[7] The Congressional intent of this provision was to prevent basis shifting abuse by letting remainderman continue to gradually increase their basis over time while the purchaser of an income interest still has a cost basis when a trust is not terminated.[8]

[5] A cheap reference to J. Robert Oppenheimer's quote of the Bhagavad Gita after the first successful test of nuclear bomb in New Mexico, "Now I am become Death, the destroyer of worlds.

[6] [quoting Code § 1001(e)(1)]

[7] [quoting Code § 1001(e)(13]

[8] See page 174-175 of the Joint Committee Explanation.

Arguably, since the trust will be completely terminated, this is part of a transaction "in which the entire interest in property is transferred to any person or persons" as required by IRC § 1001(e)(3). The abusive situation and rationale in passing IRC § 1001(e) is simply not present when the trust is terminated as it would be in a commutation.

Unfortunately, commutations do not fit into the wording of the statute well. Beneficiaries in a commutation are not transferring property to another in the traditional sense as much as transmuting it into a different form. Treasury regulations go beyond the code, moreover, and require a sale to a third party.[9] It seems extremely absurd to have completely different income tax treatment when parties transfer their interests to a straw man who will simply give them back the value of their interests in kind exactly as a commutation would (as the regulation appears to require). It's been a maxim for centuries of Anglo-American jurisprudence that the law does not require a futile act.[10]

[9] [quoting Reg. § 1.1001-1(f)(3)]

[10] *Lex non cogit ad inutilia*, for those readers who prefer to speak in Latin. For an example of this maxim quoted in the context of tax law, see this IRS CCM.

That said, in planning mode one should not pick a fight with the IRS armed only with common sense, especially with a regulation seemingly requiring one to abandon it. There are many PLRs ruling that a commutation does not come under the IRC § 1001(e)(3) exception, so it's best to simply play along with the charade.

If the agreement were instead to eliminate the spendthrift clause so that each party could sell all their trust interests to another party (basically allowing the new owner to terminate the trust under merger of interest doctrine), then upon joint sale the application of the IRC § 1001(e)(3) exception and compliance with Treas. Reg. § 1.1001-1(f) would be clear; G2 could use his share of uniform basis to reduce his tax upon sale, just as G3 and G4 do.

Can the Disappearing Basis Be Preserved?

Although it's relatively rare, when taxpayers purchase a trust interest, they are permitted to depreciate the cost of this purchase.[11] By being deemed to have purchased G2 and G4 shares, we'd love to think that G3 is therefore deemed to receive this basis somehow. Normally a buyer receives cost basis for what they paid for an asset.[12] Here, the IRS deems G3 to have "in substance" purchased them. Does G3 get basis for this? Probably not, since G3 did not actually pay anything. The IRS gave no indication of this in the rulings. That said, some believe that the disappearing basis should be preserved for G3 to eventually unlock on later sale of assets. I am skeptical. More likely, it is completely obliterated and G3 will probably only have a pro rata carry over basis in their remaining assets.

> [11] See, *e.g.*, Treas. Reg. § 1.1014-5(d), Examples 1, 2, 3 and 5. To quote the committee reports on why Congress passed IRC § 1001(e): "The purchaser of the life estate, however, is allowed to amortize his basis (his purchase price) and, therefore, is able to offset it against the income he receives from it."

> [12] Treas. Reg. § 1.1012-1(a).

Is a Commutation Always a Sale, Exchange or Other Disposition?

But is a commutation (early termination) even a sale or exchange or "other disposition" at all? Generally, distributions on trust terminations are not sales or exchanges triggering income tax.[13] That an early termination ordered by a court is a sale/exchange subject to IRC § 1001 is not obvious – the parties will only receive their own pro-rata share of the trust.

> [13] *Pierson v. Comm.*, 253 F.2d 928 (3rd Cir. 1958). IRC § 643(e) generally provides that distributions in kind from a trust receive a carryover basis unless gain is triggered otherwise, such as *Kenan* gain to satisfy a pecuniary obligation, or unless a trustee makes an election to trigger gain under (e)(3).[3003]

The IRS in these PLRs assumes that a commutation is a sale by referencing a revenue ruling that concerns non-pro rata distributions: [Ed then quotes the IRS' analysis from above]

The IRS may have a very good argument that a commutation agreed to by the parties is a sale or exchange under § 1001, since all the parties are receiving substantially different property interests as a result of the transaction. But Rev. Rul. 69-486 cited above is very dubious authority for that conclusion. In that Revenue Ruling, the trustee had no authority to make non-pro rata distributions and the two beneficiaries agreed between them as to the distribution and it was deemed to be a sale between them, no different than had they exchanged the different assets between each other.

By contrast, most trusts nowadays have authority under the instrument to make non-pro rata distributions, and if they don't, most state laws, such as UTC §816, now grant such authority,[15] and if state law does not grant such authority, the wide equitable powers granted to state courts under state law probably provide such authority, as has been previously acknowledged by the IRS in prior rulings. This PLR did not involve some rogue non-judicial settlement agreement contrary to state law. A court commuted the trust pursuant to state law and there was no allegation to the contrary. Thus, it's hard to see how Rev. Rul. 69-486 even comes close to applying. In fact, the natural corollary to Rev. Rul. 69-486 should be that a pro rata distribution in kind does ***not*** constitute a sale or exchange.

[3003] [My footnote:] For Code § 643(e)(3), see text accompanying fns 2798-2802 in part II.J.8.d.i Distribution in Kind - Generally.

[15] UTC § 816(22) authorizes the trustee to "on distribution of trust property or the division or termination of a trust, make distributions in divided or undivided interests, allocate particular assets in proportionate or disproportionate shares, value the trust property for those purposes, and adjust for resulting differences in valuation." The UTC's comments to this section include: "Paragraph (22) *authorizes a trustee to make non-pro-rata distributions and allocate particular assets in proportionate or disproportionate shares. This power provides needed flexibility and lessens the risk that a non-pro-rata distribution will be treated as a taxable sale*."

Thus, the paragraph discussing non-pro rata distributions is a *red herring*. There is no indication that the parties proposed anything but a pro rata distribution and if there were pro rata distributions, this would not have changed the IRS conclusions in this PLR one iota. Even if the trust corpus were invested entirely in cash stored under the trustee's mattress, the IRS would have found that the son (G2) incurred a large capital gain equal to the value of his interest.

The more important, and dangerous, paragraph is the second one quoted above. To the IRS, it's a sale or exchange *in substance*, regardless of what authority was granted under the instrument or state law. More intriguing is the equally dubious conclusion that it's only a sale by two of the three parties. Why is this commutation in substance a sale by G2 and G4, and not G3? The IRS offers no rationale or logic for this conclusion (other than Rev. Rul. 69-486 which is inapplicable). Any student of logic could just as easily conclude that G3 and G4 are selling their shares to G2 or that G2 and G3 are selling their shares to G4 (or other permutations). Each group of beneficiaries is getting different property, not just two groups out of three as the IRS summarily concludes.

If a court-ordered commutation is a sale or exchange, it's not hard to imagine many other situations involving trust terminations to be *in substance* an exchange. *E.g.*, an agreed distribution of the trust assets to an income beneficiary followed by a gift to the remaindermen of their commuted value would probably be treated no differently, since that could *in substance* be a sale and exchange, even if the form of the transaction was a lawful distribution of corpus pursuant to the trustee's authority, followed by a gift.

The IRS has approved divisions of trusts in prior PLRs and concluded that to the extent the division was pro rata there was no taxable exchange, but to the extent the division was non-pro rata there would be deemed an exchange.[16]

[16] In PLR 200038014, the IRS acknowledged this when it found that a bifurcation of a trust into separate trusts via court order did not trigger capital gain, except to the extent the funding was non-pro rata:

"Neither the Will nor State law grants the Trustee power to make non-pro rata distributions from Trust 2. However, the court before which the petition seeking permission to divide Trust 2 is pending is a court of general jurisdiction in State with equity jurisdiction, and the court has the power to divide Trust 2 on a non-pro rata basis. ***The present case is distinguishable from Rev. Rul. 69-486 to the extent that assets of Trust 2 are divided on a pro rata basis.*** Thus, the proposed transaction will not result in a material difference in the kind or extent of the legal entitlements enjoyed by the beneficiaries. Further, to the extent that the assets are divided on a pro rata basis the distribution of the assets to the Separate Trusts will not be viewed as a pro rata distribution followed by an exchange of assets and will not give rise to a realization event as described in Rev. Rul. 69-486. As discussed above, to the extent that the assets are divided on a non-pro rata basis, the transaction will be treated in accordance with Rev. Rul. 69-486. Therefore, to the extent that the division of Trust 2 assets among the Separate Trusts is made on a pro rata basis, the division will not be considered a sale, exchange, or other disposition of property and will not cause Trust 2, the Separate Trusts, or any of the Income Beneficiaries to realize gain or loss under § 1001 and the division of Trust 2 into the Separate Trusts will not cause Trust 2, the Separate Trusts, or any of the Income Beneficiaries to realize income under § 61 or gain or loss under § 1001." Page 7 of ruling.

The PLRs did not address whether the commutation may be a tax-free *severance*. Treas. Reg. § 1.1001-1(h) provides that a severance is not an exchange if state statute or the governing instrument authorizes it and any non-pro-rata distributions. The regulation does not define "severance," however. Commutations seem to go beyond the common understanding of a severance, which implies continuation of multiple trusts.

Despite their citation to dubious authority, the IRS probably has the better argument on there being a taxable disposition. The parties bargained for and will receive fundamentally different interests in property (exchanging a trust interest for direct property interest), which is the core of IRC § 1001 as discussed in the seminal Supreme Court case of *Cottage Savings*.[17] The IRS has so ruled many times before (see below).

[17] *Cottage Savings Assn. v. Comm.*, 499 US 554 (1991). In Cottage Savings, the Supreme Court held that mortgage loans made to different obligors and secured by different homes embody distinct legal entitlements, and that the taxpayer realized losses when it exchanged participation interests in different loans. In defining what constitutes a "material difference" for purposes of § 1001(a), the Court stated that properties are "different" in the sense that is material to the Code so long as their respective possessors *enjoy legal entitlements that are different in kind or extent*.

But then, if we are primarily examining whether the parties in these ten PLRs are receiving materially different legal entitlements, which they clearly are, *why is it that G3 did not have to recognize any gain on its share?* There is no logic to this, other than that's the [sic] way the IRS has long construed such commutations in prior PLRs. I could find no citable authority on this artificial sale to G3 idea.

Does Beneficiary Involvement or Procurement Matter?

Many readers will wonder how the IRS or court would rule if, instead of the parties agreeing to divide the trust and handing the court and IRS an agreement to be blessed, the trustees had sought and the court ordered a commutation *without such an explicit agreement among the beneficiaries*. There is no clear answer from the PLR, but this would probably make no difference whatsoever. For gift tax purposes, it should, because gift tax generally requires a voluntary action on behalf of the donor.[18] Dispositions, however, do not – just ask anyone who has ever held stock in a company that went through a taxable merger or acquisition.

[18] For a discussion of gift and estate and income tax ramifications of amendments and settlements and why unilateral trustee actions such as decanting or court petitions may be treated differently for gift tax purposes than non-judicial or court actions involving beneficiary acquiescence, see Morrow, Edwin P., *The Optimal Basis Increase and Income Tax Efficiency Trust: Exploiting Opportunities to Maximize Basis, Lessen Income Taxes and Improve Asset Protection for Married Couples after ATRA (Or: Why You'll Learn to Love the Delaware Tax Trap)*, pages 132-156. Available at SSRN: https://ssrn.com/abstract=2436964, which is an update of the Optimal Basis Increase Trust, LISI Estate Planning Newsletter #2080 (March 20, 2013).

Earlier PLRs Concerning Commutations, Including CRT Commutation PLRs

This isn't the first PLR concerning commutations that found a taxable exchange. PLRs 200209007 and 200209008 also involved a commutation, but only a partial one. The trust beneficiary whose lifetime interest was commuted was deemed to have sold their interest, which would be a capital gain, with zero basis, just as in these recent PLRs. The other beneficiaries got off scot free without the IRS finding any sale or exchange of their interest because their interest in trust essentially continued with only minor modifications.

Similarly, in PLR 200231011, the trustee and the beneficiaries had agreed that the income beneficiary would receive (i) a 7% annual unitrust payment from the trust, (ii) principal from the trust in the discretion of the trustee and (iii) a testamentary general power of appointment over the remaining trust property, while the charitable remaindermen would receive an immediate payment based on the value of their remainder interest and be thereafter removed (*i.e.* commuted). The IRS ruled that the transaction was in effect a sale or disposition under IRC § 1001(a), with the zero-basis rule applying to the sale of the son's interest, similar to the PLRs discussed in this article, even though the son's interest in trust continued in different form.[19]

[19] PLR 200231011.

There are several rulings in which the IRS deemed commutations of charitable remainder trusts (CRTs) to be sales/exchanges (by the income beneficiary to remaindermen) triggering IRC § 1001. There are compelling reasons for the IRS to have applied the zero basis rules in this manner to curb abuse in the tax-exempt context.[20] Treasury eventually issued regulations in this area to prevent such manipulations so that undistributed income and gains inside the CRT reduce the lead income beneficiary's basis even upon sale to a third party.[21]

[20] See IRS Notice 2008-99, Rev. Proc. 2008-3 where the IRS placed these on a "transaction of interest" list before Treasury issued new regulations. See Rev. Proc. 2015-3, § 3.01(68). It's abusive because if not curbed, a taxpayer could contribute a zero basis property worth $10 million, the CRT sells the property tax-free and has a basis of $10 million and if the lead income beneficiary could use their share of uniform basis in selling their interest to a third party utilizing the IRC § 1001(e)(3) exception, it would be completely evading tax on the gain.

[21] See Treas. Reg. § 1.1014-5(c) and (d), Examples 7 and 8. This is a logical way to curb such abuse, because by reducing the basis by the gains never taxed, the taxpayer is denied "free basis". The appreciation is ultimately taxed.

But the legitimate public policy rationale to prevent tax evasion shut down by those CRT sale regulations does not exist for commutations of ordinary irrevocable trusts that are not tax exempt. Arguably, the polar opposite of tax evasion occurs under the zero-basis rule when such a trust is terminated without the § 1001(e)(3) exception applying: basis is destroyed and the IRS receives a windfall.

In PLR 200127023, the IRS treated the commutation of a charitable remainder trust (CRT) as a taxable exchange and sale by the individual lead interest holder, generating capital gain with zero basis attributable under IRC § 1001(e). Regarding the exception, the IRS stated "The exception contained in § 1001(e)(3) is not applicable, because the entire interest in Trust's assets is not being sold, or otherwise disposed of, to a third party."

PLR 200733014 was substantially similar, where the commutation was ruled in substance to be a taxable sale by the income beneficiary. Regarding the commutation, the IRS noted, "In the present case, although the proposed transaction takes the form of a distribution of the present values of the respective interests of Grantors and Charity, *in substance* it is a sale of Grantors' interest to Charity, the remainder interest holder."

Decanting and Reformations as Taxable Dispositions

Reading the description of the first two PLRs from 2002 discussed above combined with these newer PLRs, readers may be nervous that commonplace reformations and decantings could be a taxable sale or disposition under § 1001. I cannot completely reassure readers on this point. While there are many PLRs that have found minor changes not to be a disposition, there is no reason that reformations and decantings cannot trigger § 1001 if the changes are material enough. In defining what constitutes a "material difference" for purposes of § 1001(a), the Supreme Court stated that "properties are 'different' in the sense that is 'material' to the Internal Revenue Code so long as their respective possessors enjoy legal entitlements that are different in kind or extent [echoing language in Treas. Reg. § 1.1001-1(a)]. ***Under our interpretation of § 1001(a), an exchange of property gives rise to a realization event so long as the exchanged properties are "materially different" -- that is, so long as they embody legally distinct entitlements."[22]

[22] *Cottage Savings Assn. v. Comm.*, 499 US 554 (1991).

Most reformations should be safe, but not all. Administrative changes don't give beneficiaries materially different legal entitlements. However, if it's a major change in economic rights, it might. Unitrust conversions have a safe harbor.[23] Mere changes between grantor and non-grantor trust status should be safe, absent extraordinary circumstances.[24] Severances, as discussed above, are also safe, but there is no clear rules as to when a change goes beyond a mere severance. This is a very grey area. For example, if the discretionary income beneficiary gets a new 5/5 withdrawal power and the remaindermen get a restriction on the income beneficiary's testamentary power to appoint to others, that gets closer to a quid pro quo, a material change in legal entitlements, similar to PLR 200231011. Splitting a pot trust in two where the two beneficiaries keep the same rights looks like a severance, but splitting a different trust in two where one beneficiary accelerates from remainderman to current beneficiary and the other gets additional rights may go beyond the severance safe harbor.[3004]

[23] Treas. Reg. § 1.643(b)-1 "***A switch between methods of determining trust income authorized by state statute will not constitute a recognition event for purposes of section 1001 and will not result in a taxable gift from the trust's grantor or any of the trust's beneficiaries."

[24] Rev. Rul. 85-13, CCA 200923024; see Treas. Reg. § 1.1001-2(c), Example 5 and TAM 200011005 and *Madorin v. Comm.*, 84 T.C. 667 (1985) for exceptions when relief of debt in excess of basis triggers gain.

The case law that is citable authority involving commutations and reformations is sparse but leans towards substantial reformations that materially change economic interests being deemed

[3004] [my footnote:] Reg. § 1.1001-2(c), Example (5) is reproduced in fn 6591 in part III.B.2.g Income Tax Concerns When Removing Property from the Estate Tax System.

to be dispositions.[25] In *Evans v. Commissioner*, 30 T.C. 798 (1958), the taxpayer exchanged an income interest in trust for a more certain fixed annuity, and this was found to trigger § 1001.

[25] See the discussion of *Evans v. Commissioner*, 30 T.C. 798 (1958) and *Silverstein v. United States*, 419 F.2d 999 (7th Cir. 1969) in PLR 200231011. In *Evans*, taxpayer exchanged an income interest in trust for a more certain fixed annuity, and was found to trigger § 1001. In *Silverstein*, the trust was terminated, but the income beneficiary was to receive the exact same payments from the remaindermen rather than the trustee and the 7th Circuit found this not to be an exchange. *Silverstein* is not especially helpful, since it seems merely an assignment/change in obligors.

That said, the IRS has approved many reformations in the past that have minor changes in legal entitlements. PLRs 201702005 and 201702006 involved converting pot trusts into separate trusts, yet the IRS ruled that these changes did not trigger § 1001. More far-reaching, in recent PLR 201814005, the IRS ruled that a court reformation that converted a mandatory distribution to a discretionary distribution standard and replaced a beneficiary's rights to withdraw corpus at ages 25 and 30 with testamentary general powers of appointment ("GPOA") at that age did not trigger § 1001: "In this case, the Trust modification will result in increased trustee discretion and will not confer new rights to the beneficiaries or result in any relative shifting of interests between beneficiaries."

The IRS appears to be more sympathetic to cases such as above where the current beneficiary is arguably receiving a decrease rather than an increase in economic rights (as opposed to PLR 200231011 and *Evans*). Would the IRS have granted PL 201814005 had the requested change been reversed, *i.e.* granting a current discretionary beneficiary a mandatory distribution right, perhaps to qualify as a QSST or a BDOT? It's hard to say.

In all the PLRs discussed in this article, the local court approved the commutation or reformation. It's tempting to assume that decanting, which has spread like wildfire in recent years and is rumored to cure cancer, gets around this problem. That is questionable. If a trustee-initiated change approved by a court can be a disposition, there is no reason that an identical trustee-initiated change not approved by a court would not be. Advocates for more dramatic decanting (e.g. SD/NV proponents brag of their statutes permitting removal of mandatory distribution rights and accelerating remainder interests) claim it's completely different because decanting is framed as a distribution to another trust, but there is no clear authority for this distinction when it looks more like a substantial reformation. The IRS has been "studying" this for years and is skeptical where decantings substantially change beneficial interests.[26]

[26] IRS Notice 2011-101: The IRS "will not issue private letter rulings (PLRs) with respect to such transfers [decantings] that result in a change in beneficial interests. See Sections 5.09, 5.16, and 5.17 of Rev. Proc. 2011-3, 2011-1 I.R.B. 111. The IRS generally will continue to issue PLRs with respect to such transfers that do not result in a change to any beneficial interests and do not result in a change in the applicable rule against perpetuities period." Some state statutes, *e.g.*, the Uniform Trust Decanting Act § 19, have excellent language that may protect against decanted trusts being disqualified from various tax benefits, such as the marital deduction, designated beneficiary "see through trust" status or S corporation ownership qualification, but this is unlikely to be helpful in preventing the IRS from arguing a sale or disposition has occurred under *Cottage Savings*.

What about decanting to remove a right to receive the trust corpus at age 40 or otherwise, as in the infamous *Ferri* and *Kaestner* cases?[27] This is a favorite strategy advocated in countless tax and asset protection planning conferences in recent years. If the current beneficiaries keep a discretionary interest as sole current beneficiary coupled with a testamentary GPOA, it more closely resembles PLR 201814005 discussed above (but which, of course, is not citable precedent). Query whether beneficiaries retained a testamentary GPOA in those cases.

[27] These are discussed in prior LISI Newsletters, see *Ferri v. Powell-Ferri: Asset Protection Issues, Perils and Opportunities with Decanting*, *Ed Morrow & Steve Oshins,* LISI Asset Protection Newsletter #240*, Ed Morrow, David Berek, and Raj Malviya on the North Carolina Supreme Court's Affirmation of Kaestner and Its Impact on both North Carolina and Other States' Abilities to Tax Trust Income* LISI Income Tax Planning Newsletter #153 (August 20, 2018).

It could be quite dangerous if the IRS applied IRC § 1001 to such amendments, even if the value of the current beneficiary's interest was dramatically reduced as in cases like *Ferri* and *Kaestner*, due to the zero-basis rule of § 1001(e) and the potential effect on other beneficiaries.[28] No PLRs or cases have gone that far – yet.

[28] The one consolation would be the amount of consideration received in return, if it is merely a discretionary interest in trust with no mandatory distribution, should be valued much lower than prior to the decanting. Some attorneys believe that a discretionary interest in trust has no value whatsoever and that it would not even be considered a property interest under federal tax law, but just because Alaska or some other state says it's not a property interest does not make it so for federal tax purposes. That said, the value of such an interest should be quite low. In PLR 8535020, a lifetime limited power of appointment was exercised in a trust wherein income payments to the powerholder/beneficiary were discretionary, thus requiring the IRS to value that interest to determine the amount of the gift. The IRS cited Rev. Rul. 79-327 and stated:

"The fact that the trustee has discretion regarding distributions of income and principal to you is a factor that must be taken into account in determining the fair market value of your beneficial interest, but, as indicated by Rev. Rul. 67-370, the presence of the possibility of your receiving less than the entire income and principal does not warrant our finding that your transfer of the interest is not subject to the tax imposed by section 2501(a) of the Code."

The IRS had no further guidance on how to value a discretionary interest. The larger taxable ramifications in such decantings/reformations may therefore be to remainder beneficiaries, whose economic interest in the trust may dramatically increase. If deemed a disposition, they could use their share of uniform basis to offset such gain, but this may be phantom income if they can't access cash. In a truly dynastic trust where no one has more than a discretionary interest, many attorneys would argue that no beneficiary has any economic rights worth anything, even if the trust has $1 billion in it. Whether the IRS/courts would agree is questionable. I can cite no authority, but it's even possible that they ultimately apply a zero-sum analysis, *i.e.*, if the trust is worth $1 billion, then the collective equitable interests held by the various beneficiaries must be worth that amount so that as one beneficiary's interest decreases others must increase accordingly. The uniform basis rules have no examples of valuing discretionary interests, but consider a current discretionary interest a term interest. See Treas. Reg. § 1.1014-5(a) and § 1.1001-1(f)(2)(i).

It Could Be Much Worse…

In these PLRs, the trust had been established for over 30 years. What if the trust had been settled less than a year before the commutation? The tax rate would almost double due to short-term capital gains being taxed at ordinary income tax rates (top rate 37% v. 20% for long-term capital gains). Similarly, any assets that the trust had purchased within one year could also trigger short term capital gains as to the portion G3 is deemed to pay for G2 and G4's shares (the PLRs did not indicate whether there were any such assets).

It's unlikely that this trust contained inherited retirement plans, but many trusts do. Which bold reader wants to promise clients what the result of this would be? In compliance mode, we could argue that transferring an inherited IRA in kind from a trust to beneficiaries shouldn't trigger any income, but recall the IRS deems a commutation to be a sale by G2 and G4 to G3, with *Kenan* gain to G3 on paying off G2 and G4. The IRS does not take kindly to such transactions with inherited retirement plans involved.[29]

[29] See IRS Chief Counsel Memorandum (CCM) 200644020 regarding the *Kenan* rule applied to IRA/401(k) income in respect of a decedent funding a pecuniary obligation (which is a somewhat debatable conclusion, as IRC § 691(c)/IRD rules arguably trump this, but it's best in planning to avoid a fight).

Similarly, what if the trust was the party to an installment sale or had § 179 property or loss assets that had to fund those two shares? Related party rules could hold some nasty surprises.

Moreover, the rulings found that G3, the Current Remaindermen, did not incur any taxable sale or disposition despite turning a mere remainder interest into cold hard cash and other assets. This is hardly an inevitable conclusion under IRC § 1001. The more rational interpretation is that all three groups disposed of their shares.

Application of § 1001 to reformations and decantings that do not involve full terminations would involve even worse complications due to phantom income. In these PLRs, the beneficiaries all have liquid funds to pay the income tax, but in a reformation deemed to be a constructive disposition, they may not.

Conclusions and Solutions Around the IRC § 1001(e) Destruction of Basis

In short, these PLRs point out significant income tax dangers to early termination of trusts (and potentially, extensive reformations). Practitioners should consider the pros and cons of less drastic alternatives that may solve the perceived problems of the trust without triggering § 1001 – or worse, the zero-basis apocalypse of § 1001(e). There may be several potential solutions when the parties wish to commute a trust (remember that spendthrift provisions generally prevent transfers of trust interests, but such provisions can be removed by decanting or other reformation):[30]

[30] Some state statutes even permit a beneficiary/trustee to decant and do so, which may have significant estate tax and asset protection ramifications, see *Ed Morrow: Asset Protection Dangers When a Beneficiary Is Sole Trustee and Piercing the Third Party, Beneficiary Controlled, Irrevocable Trust*, LISI Asset Protection Planning Newsletter #339 (March 9, 2017). Simply removing a spendthrift provision should not be a material enough

change by itself to cause a sale or disposition, see, *e.g.* PLR 201136011, PLR 201026014 (both of which involved multiple related sequential PLRs), which so ruled.[3005]

Either the income beneficiary or the remaindermen could gift their interest to the other rather than sell or commute the interest. This may be acceptable in smaller trust scenarios where estate/gift tax is not an issue. In these rulings, the Son's "net worth has grown significantly, such that he does not need income from [the trust] for his support". So why didn't he simply release his interest and unilaterally make a gift? Apparently he did not care about estate/GST tax too much if he was willing to add so much to his estate through a commutation. If that would be too much and cause a gift tax, they could bifurcate the trust via qualified severance and G2 could release only the interest corresponding to the amount of potentially taxable gift desired.[31] While a gift could be construed as a disposition triggering § 1001(e), provided it was not a net gift agreement, bargain sale or trigger debt in excess of basis issues, there would be no consideration to tax as capital gain even if the basis were deemed to be $0.

[31] See Treas. Reg. § 1.1001-1(h) for qualified severances that do not trigger tax.

Similarly, Son (G2) could have gifted a portion or all of his interest to charity, sui generis or prior to a later commutation. Whether it's a zero-basis asset pursuant to § 1001(e) or not would be irrelevant (unless, perhaps if gifting to a CRT), and by longstanding case law, it's considered a capital asset, not an assignment of income.[32] This may be much better than simply gifting the income every year.

[32] *McAllister v. Commissioner*, 157 F.2d 235 (2d Cir. 1946) *cert. denied*, 330 U.S. 826 (1947); the Service acquiesced in Rev. Rul. 72-243.

The parties could structure a sale that more clearly meets the § 1001(e)(3) exception. Neither the statute nor the regulations have a related party rule. Treas. Reg. § 1.1001-1(f)(3) states that the exception in IRC § 1001(e)(3) applies when the entire interest in property is sold or otherwise disposed of as part of a single transaction to a third person or persons. Thus, both sets of parties could sell their interest to any third party, who would then own all trust interests and merge/collapse the trust and be able to pay them each their commuted value.[33] One might fear that the IRS could argue substance over form, but here the transaction would be squarely within the statute and regulation. Congress could have easily added a related party rule as it often does, but chose not to. Who else but a related or subordinate party would want to bother?

[33] Common law doctrine of merger can be found at UTC § 402(a)(5) and *Restatement of Trusts, Third*, § 69. If an LLC is used and then holds all beneficial interests, there may be another hurdle in that state law may prohibit LLCs acting as trustees without qualification as a bank or trust company, so it may be wise to research this issue under state law before so doing or use an individual buyer.

The parties could instead divide the trust via tax-free severance. Treas. Reg. § 1.1001-1(h) provides that a severance is not a taxable exchange if state statute or the governing instrument authorizes it and any non-pro-rata funding. State law may permit such a division and non-pro-rata funding (in fact, judges would be more likely to approve than an outright termination). What if the court order had instead divided the trust into two trusts (or more) with liberal current terms for each group of beneficiaries (G2, G3, G4)? Arguably this is still a severance. However, such

[3005] [My footnote:] Those rulings involved the sale of a remainder interest, which did not implicate Code § 1001(e).

a division between generations is quite different from most traditional severances (such as dividing a pot or separate share trust), so it's still unclear whether *Cottage Savings* analysis or the severance regulation would win the day.

If the driving force was that G3 or G4 needed money for consumption, they could sell all or a portion of their remainder interest. Provided they do not both sell to G2, this would not have terminated the trust or affected G2, yet the zero-basis rule would not apply and they could use their share of uniform basis to reduce gain on sale.

They might contribute their trust share to an LLC taxed as a partnership. The LLC, just like any other purchaser, would then own all interests in the trust and it could be merged/collapsed and the LLC would own the assets and each beneficiary would thereafter own a % of the LLC in proportion to the prior value of their trust interest. For some families, this might be a great result. Investment partnership diversification rules, which are an exception to the general non-recognition rule, should be considered.[34]

> [34] IRC § 721(b), § 351. I did not fully research whether this might somehow be a diversification of the beneficiary's assets which is an exception to the general nonrecognition on contributions to partnerships rule in IRC § 721(a). The capital asset contributed to the LLC/partnership would arguably be the trust interest, not marketable securities that the Code prevents partners from diversifying. When the trust will be immediately merged/collapsed, will the IRS look through to the investments? The trust interests may represent equitable ownership in marketable securities (assuming that is how the trust is invested), but this is not a situation where the partners are diversifying their holdings in marketable securities, since all parties to the trust would be contributing shares in the same securities even if we looked through the trust. There may be other income triggering situations if the partnership/LLC made non-pro-rata distributions in kind within seven years, but it does appear that the contribution itself should be non-taxable.[3006]

If there is wide discretion to make principal distributions to the income beneficiary (not present in these PLRs), the trustees under most state decanting laws could decant to grant the income beneficiary the lifetime limited power to appoint principal to remaindermen. The powerholder could then appoint the desired value to the remaindermen (over time or lump sum) and the trustee could make a distribution of the remaining principal to the income beneficiary. This may involve a small taxable gift due to the value of the income beneficiary's interest foregone, but the annual exclusion would be available to offset such gifts.[35] It does not seem so drastic as to be a material change that would be a disposition.

> [35] Rev. Rul. 79-327, *Estate of Regester*, 83 T.C. 1 (1984), though contrary is *Self v. United States*, 142 F.Supp. 939 (1956). The IRS, in TAM 9419007, has indicated it will follow *Regester* (finding a gift) and not *Self*. The gift would not be the entire amount of the distribution. It does not necessarily affect GST exempt/grandfathered status – see *e.g.*, PLR 200243026.

Since the son (G2) didn't need the money, the parties could have simply amended the trust to grant son the power to withdraw the income instead of automatically receiving it – this is hardly a material change in the parties' rights that would be a sale or disposition, yet this would clearly

[3006] [My footnote:] The most important analysis of this issue (but not of the specific transaction Ed is describing) is in part II.M.3.b Exception: Diversification of Investment Risk. Footnote 3540 in part II.M.2.a Initial Incorporation – Generally cross-references part II.M.3.b.

shift the income taxation of such income to the son without requiring he take any of the money. This would permit the trust to grow income tax free, at least to the extent of any taxable income allocated to fiduciary accounting income, which might in many cases be all of the income (or easily could be, by change in investments or trustee allocation).[36]

> [36] For more on this concept, see *IRC § 678 and the Beneficiary Deemed Owner Trust (BDOT)*, LISI Estate Planning Newsletter #2587 (Sept 5, 2017), updated and reorganized at Morrow, Edwin P., *IRC Section 678 and the Beneficiary Deemed Owner Trust (BDOT)*. Available at SSRN: https://ssrn.com/abstract=3165592. To avoid any contribution for gift/GST purposes, amounts over IRC § 2514's 5/5 lapse protection should be withdrawn or hang. There may be compelling reasons to apply the withdrawal power over all taxable income instead of only over all accounting income, because in the latter case the 5% lapse would be calculated only on the accounting income rather than the entire corpus.[3007]

The trustees could instead petition the court to amend the trust to grant wide discretion to the trustees to distribute principal currently to both the income beneficiary and the remaindermen (a discretionary pot trust) and the trustees could thereafter use their discretion to make distributions of the proceeds to either or both. There would still be some risk here, since there is a chance of substance over form or step transaction attack, and radical modifications to a trust such as this might still be considered a disposition, as discussed previously. Moreover, whenever a party gives up a mandatory income right, there is the potential for a taxable gift to occur, even if only passively acquiesced to. Still, this stands a better chance at avoiding a disposition than a commutation.

If the driving force behind termination were to access capital for closely-held investments, they could have amended the trust to be a directed trust to permit the trust to invest in such assets (and reduce trustee fees from higher fully managed to lesser directed trust fees). This kind of change should not be a taxable event.

Similarly, depending on the driving force for termination, the trust could have been amended to permit loaning money to beneficiaries. Provided it's not a de facto termination, lending should not be a taxable event either.

There are probably many other variations on the above. Trusts with robust trust protector language may have the ability to make some of these changes without going to court or crafting a non-judicial settlement agreement.

Although not present in these PLRs, remember that for any transfer or commutation involving termination of a QTIP trust, IRC § 2519 would apply to trigger a net gift by the spouse of the remaindermen's portion of the trust (IRC § 2514 would apply to a gift involving a marital GPOA trust). This may not be a disaster, and in many cases could work out much better than had the spouse disclaimed and the estate paid estate tax instead of gift tax, but this should certainly be considered in the calculus.

In conclusion, be careful to weigh the potential income tax impact of commutations and early terminations and even dramatic amendments/reformations that materially change the economic interests of the parties (especially if a beneficiary is being removed). There is no bright line test

[3007] [My footnote:] See part III.B.2.i.vii Portion Owned When a Gift Over $5,000 is Made as to when a sale will be deemed to occur and it could be a very expensive proposition if it is later found to be so but not reported as such.

II.J.18.f. Commutation vs Mere Division

I agree with the criticism in part II.J.18.e Ed Morrow on Potential Income Tax Disasters for Early Trust Terminations that Rev. Rul. 69-486 does not support the conclusion of Letter Ruling 201932001 (and its companion rulings) and his comment that Reg. § 1.1001-1(h) prevents gain recognition when the form and substance are a distribution rather than sale of beneficial interest, especially in light of Reg. § 26.2642-6(j), Example (3).[3008]

Furthermore, when the current beneficiaries and remaindermen are related, I do not see any policy reason for Code § 1001(e)(1) to apply.[3009]

Ultimately, however, one needs to reconcile the continued existence of law on commutations in part II.J.18.d, which was not altered when Reg. § 1.1001-1(h) was adopted, with the potentially broad protection of Reg. § 1.1001-1(h) that applies to divisions under part II.J.18.a. In weighing these arguments, consider Reg. § 1.1002-1(b), "Strict construction of exceptions from general rule," which provides:[3010]

> The exceptions from the general rule requiring the recognition of all gains and losses, like other exceptions from a rule of taxation of general and uniform application, are strictly construed and do not extend either beyond the words or the underlying assumptions and purposes of the exception. Nonrecognition is accorded by the Code only if the exchange is one which satisfies both (1) the specific description in the Code of an excepted exchange, and (2) the underlying purpose for which such exchange is excepted from the general rule. The exchange must be germane to, and a necessary incident of, the investment or enterprise in hand. The relationship of the exchange to the venture or enterprise is always material, and the surrounding facts and circumstances must be shown. As elsewhere, the taxpayer claiming the benefit of the exception must show himself within the exception.

Absent Reg. § 1.1002-1(b), Reg. § 1.1001-1(h) could be broadly construed to protect most commutations. Reg. § 1.1002-1(b) informs us that we need to look deeply into the purpose of Reg. § 1.1002-1(b) and make sure it suffices to override the law of exchanges.

Ultimately, we need to see whether a beneficial interest constitutes an entitlement that one can compare to a measurable expectation of financial benefits. Certainly, an income interest or its equivalent (unitrust, annuity, etc.) can be measured. Ascertainable standards tend to constitute a measurable economic interest. For guidance in measuring beneficial interests for gift tax purposes, see part III.B.1.e.ii Valuing a Beneficial Interest in a Trust.

Transferring an entire beneficial interest to a new trust but in a modified form can trigger a Code § 2702 gift of the entire beneficial interest,[3011] so if the entire beneficial interest is transferred and the distribution rules are different then they may need to be in the form of a

---

[3008] Reg. § 1.1001-1(h) and Reg. § 26.2642-6(j), Example (3), are reproduced in the text accompanying and following fn 2951.
[3009] See Code § 167(e) (particularly paragraph (1), which is reproduced in part II.J.18.d Trust Commutations.
[3010] Other parts of Reg. § 1.1002-1 are included in fn 1643 in part II.G.16.b Pre-2018 Code § 1031.
[3011] See part III.B.7.d Code § 2702 Overview.

unitrust or annuity. A trust division, where the original trust continues intact and property is transferred to a new trust, would be limited in gift tax consequence to the amount transferred and therefore less risky than reforming the entire beneficial interest. Furthermore, guidance on trust divisions in part II.J.18.a tends to show that taking a trust with multiple beneficiaries and dividing it into a separate trust for each beneficiary with the same distribution standards does not constitute a gift or an income-taxable exchange.

When is a change of an expected series of distributions material? Given the lack of concrete examples for trusts, one might see whether a change in a right to a series of payments in other areas of the law might help. Consider the rules that apply to debt modifications, which are described in part II.G.31.a Debt Modifications. Although those rules address a change of yield,[3012] consider that a trustee can have significant discretion in determining how much is allocated to income in a mandatory income trust without triggering any transfer tax consequences.[3013]

However, modifying a mandatory income trust to allow the trustees to accumulate income and then require any accumulated income to be paid to the beneficiary's estate did not have any income, gift, or GST tax consequences. See part II.J.5.b.iii Modifying a Mandatory Income Trust to Make It Discretionary Income.

Letter Ruling 200810019 held that a conversion from a straight income interest to a unitrust did not constitute an income taxable event:[3014]

> In the present case, the preliminary question is whether the trustees and beneficiaries of the Trust will have the same property interests and legal entitlements as a result of the proposed conversion. Under State Statute, a conversion to a total return trust may be made upon the court's determination that the conversion will enable the trustee to better carry out the purposes of the trust. In addition, and under the facts presented, there is to be no material change in property interests or legal entitlements for Trust, the trustees or the beneficiaries. If the conversion to a total return trust does not result in a material change in property interest or legal entitlements, there is no occasion for realizing taxable gain or loss under § 1001. Therefore, under the facts presented, the conversion will not trigger realization of gain or loss for the taxpayers for federal income tax purposes.

But a conversion from an income interest with a floor and a ceiling to a unitrust was an income taxable event.[3015]

Considering all of the sources described above, if a trust is purely discretionary (no ascertainable standards) and its remainderman are also current permissible distributees, then arguably nobody has any measurable interest, in which case the trustee may be able to divide the trust among all the beneficiaries without any income or gift tax consequences. How each

[3012] See fn 1966.
[3013] See fns 2765-2769 and accompanying text in part II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law. Also note that ascertainable standards may include significant flexibility; see fn 2538 in part II.J.3.h Drafting for Flexibility in Trust Income Taxation.
[3014] This result is strongly supported by Reg. § 26.2601-1(b)(4)(i)(E), Example (11). See text accompanying fn 6395 in part III.B.1.d.i Effect of "Additions" on Grandfathering from GST Rules.
[3015] Letter Ruling 200231011, described in fn 2989 and the accompanying text in part II.J.18.d Trust Commutations.

situation compares to this ideal and whether any beneficiary is gifting or exchanging an interest in a trust depends on the circumstances.

Letter Ruling 200723014 held that a commutation that the trustee was authorized to effectuate unilaterally had no income tax consequences.[3016]

II.J.19. Trusts Holding Life Insurance, Annuities, or Long-Term Care Policies

Relevant parts regarding life insurance include:

- II.Q.4.b Transfer for Value Rule; Basis (life insurance)
- II.Q.4.c Income Tax Issues in Transferring Life Insurance; Code § 1035
- II.Q.4.d Income Tax on Distributions or Loans from Contract (Including Surrender of Policy)
- II.Q.4.e Income Tax Issues When the Owner Who Is Not the Insured Dies
- II.Q.4.f Split-Dollar Arrangements
- II.Q.4.g Income Tax Trap for Business-Owned Life Insurance
- II.Q.4.i Life Insurance LLC, including part II.Q.4.i.ii Summary of Estate Tax Rules Governing Life Insurance Payable to a Business Entity (especially part II.Q.4.i.ii.(a) Trust Ownership of Policy)
- III.B.2.h.v Life Insurance (within part III.B.2.h How to Make a Trust a Grantor Trust Taxed to a U.S. Citizen or Resident)

Within this part II.J.19 are parts:

- II.J.19.a Trusts Holding Annuities
- II.J.19.b Comparing Annuity to Life Insurance
- II.J.19.c Long-Term Care
- II.J.19.d Hybrid - Long-Term Care with Annuity or Life Insurance

Code § 1035 controls swapping annuity or life insurance contracts tax-free and is discussed in part II.Q.4.c Income Tax Issues in Transferring Life Insurance; Code § 1035.

II.J.19.a. Trusts Holding Annuities

Code § 72(a) defers income tax on an annuity until the owner receives a distribution. Although generally a trust cannot deduct investment management fees, an annuity contract can pay the

[3016] The income tax holding is reproduced in the text accompanying fn 2979 in part II.J.18.d Trust Commutations.

owner's investment advisor fees for advice regarding the annuity without the payment being taxed as a distribution to the owner.[3017]

First, we discuss part II.J.19.a.i Code § 72(u)(1) Requirement of Natural Person (N/A to Most Trusts).

Then the general taxation of distributions from annuity contracts is in part II.J.19.a.ii Taxation of Distributions under an Annuity Contract.

Also consider parts II.J.19.a.iii Code § 72(q) 10% Penalty for Early Distributions from Annuity Contracts and II.J.19.a.iv Code § 72(s) Required Distributions Where Holder Dies Before Entire Interest Is Distributed.

Letter Ruling 202031008 provided guidance when an annuity contract is issued to a trust. It is discussed below in parts II.J.19.a.v Annuity Contract Issued to Grantor Trust and II.J.19.a.vi Annuity Contract Issued to Nongrantor Trust.

Regarding Code § 1035 swaps of annuities for each other, Letter Ruling 201330016 involved the following facts:

> Taxpayer's mother owned Contracts 1, 2, 3, and 4, which are fixed annuity contracts issued by Company 1, and Contract 5, a variable annuity contract issued by Company 2 (collectively "Original Contracts"). Taxpayer is the beneficiary of these Original Contracts. Each Contract provides that upon the death of the owner (*i.e.*, Taxpayer's mother) before the annuity starting date, the death benefit will be paid to the beneficiary (*i.e.*, Taxpayer). The Original Contracts provide payment options consistent with § 72(s). Each Contract specifies the method to determine the amount of its death benefit.
>
> Taxpayer's mother died, and Taxpayer timely elected to receive the death benefit provided by each Contract over her life expectancy, consistent with § 72(s)(2)(B).
>
> Taxpayer perceives that she might be able to increase the amount of this payout if she can replace this payout with a payout offered by Company 3. To take advantage of this opportunity, Taxpayer applied to Company 3 for New Contract and completed both the Election Form and the Distribution Form. The value of the amounts due Taxpayer from Company 1 and Company 2 under the Original Contracts will be remitted directly to Company 3. Company 3 will then credit these amounts to New Contract. Under New Contract Taxpayer will be granted the same rights available to an owner of New Contract, except that (1) she cannot transfer ownership of New Contract and (2) she cannot make any new purchase payments to New Contract other than the assignment of the amounts due her from Company 1 and Company 2 under the Original Contracts. New Contract is nominally a deferred variable annuity contract, but by Election Form and Distribution Form, Company 3 is bound to immediately commence making payments that will continue the payouts being made by Companies 1 and 2 but in an amount determined pursuant to New Contract.

[3017] Letter Rulings 201945001, 201945002, 201945003, 201945004, 201945005, 201945006, 201945007, 201945008, and 201945009.

Letter Ruling 201330016 reasoned and ruled:

> Rev. Rul. 92-95, 1992-2 C.B. 43, cites Rev. Rul. 85-159, 1985-2 C.B. 29, in concluding that a replacement contract received in a tax free exchange of annuity contracts is not treated as an investment in a new contract. Instead, the replacement contract retains the attributes of the exchanged contract for purposes of determining when amounts are considered to have been invested in the replacement contract. The Ruling holds that for purposes of §§ 72(u)(4) and (q)(2)(I), the "date of purchase" of a contract received in a tax free exchange is the date of purchase of the annuity contract exchanged for the new annuity contract.
>
> Rev. Rul. 2003-76, 2003-2 C.B. 355, holds that in a partial exchange of annuity contracts under § 1035(a)(3), the investment in the contract and basis is allocated ratably based on the percentage of the cash value retained and transferred to purchase the new contract.
>
> Rev. Rul. 2005-30, 2005-1 C.B. 1015, holds that if the owner-annuitant of a deferred annuity contract dies before the annuity starting date, and the beneficiary receives a death benefit under the annuity contract, the amount received by the beneficiary in a lump sum in excess of the owner-annuitant's investment in the contract is includible in the beneficiary's gross income as income in respect of a decedent within the meaning of § 691. If the death benefit is instead received in the form of a series of periodic payments in accordance with § 72(s), the amounts received are likewise includible in the beneficiary's gross income (in an amount determined under § 72) as income in respect of a decedent within the meaning of § 691.
>
> Rev. Rul. 2007-24, 2007-1 C.B. 1282, holds that if a taxpayer receives a check from a life insurance company under a non-qualified annuity contract, the endorsement of the check to a second company as consideration for a second annuity contract does not qualify as a tax-free exchange under § 1035(a)(3). In other words, the transmission of funds must be directly between the life insurance companies for the transaction to qualify as a tax-free exchange under § 1035.
>
> ANALYSIS
>
> The Original Contracts provided for the distribution of the owner's (i.e., Taxpayer's mother) entire interest over the life expectancy of the beneficiary as required by § 72(s); this distribution regime is a sine qua non of an annuity contract. Accordingly, in the hands of Taxpayer's mother, the Original Contracts were annuity contracts within the meaning of § 1035(b)(2).
>
> Taxpayer became the owner of the Original Contracts upon her mother's death, subject to the performance of the Original Contracts' obligation to distribute her mother's entire interest consistent with § 72(s). This obligation was performed when Taxpayer timely elected to receive the entire interest in the Original Contracts over her life expectancy consistent with § 72(s)(2)(B).
>
> New Contract is also an annuity contract. Like the "date of purchase" for purposes of §§ 72(u)(4) and (q)(2)(I), and the allocation of investment in the contract and basis as part of a partial exchange, compliance with § 72(s) is an essential attribute of the Original Contracts that is retained by New Contract. The combination of New Contract,

Election Form and Distribution Form obligates Company 3 to pay Taxpayer the entire interest her mother had in the Original Contracts consistent with the distribution regime required of the Contracts by § 72(s)(2): namely, a continuation of the terms of Taxpayer's election to receive the interest over her life expectancy. Accordingly, the essential inherent attribute of the Original Contracts – their compliance with § 72(s) – is retained and Taxpayer will ultimately recognize the income on the Original Contracts.

The value of the Original Contracts will be transmitted directly to Company 3. Assuming Companies 1, 2, and 3 are insurance companies as contemplated by § 1035(b)(2), this transaction is an exchange of annuity contracts within the scope of § 1035(a)(3).

RULING

A direct transfer of the value of the Original Contracts to Company 3 to acquire New Contract is an exchange of annuity contracts within the scope of § 1035(a)(3).

II.J.19.a.i. Code § 72(u)(1) Requirement of Natural Person (N/A to Most Trusts)

Code § 72(u)(1) imposes ordinary income tax annually notwithstanding this rule if the annuity contract is held by "a person who is not a natural person." However, numerous private letter rulings allow nongrantor trusts to hold annuity contracts. For example, Letter Ruling 202118002 explains Code § 72(u) generally:

> Section 72(u) was enacted as part of the Tax Reform Act of 1986, Pub. L. No. 99-514, 100 Stat. 2085, 1986-3 (Vol. 1) C.B. 1. The legislative history contains the following reasons for enacting section 72(u):
>
> > The committee believes that the present-law rules relating to deferred annuity contracts present an opportunity for employers to fund, on a tax- favored basis, significant amounts of deferred compensation for employees. This favorable tax treatment may create a disincentive for employers to provide benefits to employees under qualified pension plans, which are subject to significantly greater restrictions. In addition, because deferred annuity contracts can be provided to a limited class of employees, rather than to employees generally (as is required in the case of a qualified pension plan), the committee is concerned that the present-law treatment of deferred annuity contracts dilutes the effect of the nondiscrimination rules applicable to qualified pension plans.
>
> H.R. Rep. No. 426, 99th Cong., 1st Sess. 703 (1985), 1986-3 (Vol. 2) C.B. 1, 580.
>
> The flush language of section 72(u)(1), however, provides that holding by a trust or other entity as an agent for a natural person is not taken into account. The legislative history contains the following explanation of this flush language:
>
> > In the case of a contract the nominal owner of which is a person who is not a natural person (e.g., a corporation or a trust), but the beneficial owner of which is a natural person, the contract is treated as held by a natural person. Thus, if a group annuity contract is held by a corporation as an agent for natural persons who are the beneficial owners of the contracts, the contract is treated as an annuity contract for Federal income tax purposes. However, the committee intends that, if an employer is the nominal owner of an annuity contract, the beneficial owners of which are

employees, the contract will be treated as held by the employer. The committee intends this rule because it is concerned that the Internal Revenue Service would have difficulty monitoring compliance with the general rule that a deferred annuity is not available on a tax-favored basis, to fund nonqualified deferred compensation.

H.R. Rep. No. 426, 99th Cong., 1st Sess. 704 (1985), 1986-3 (Vol. 2) C.B. 1, 580.

After explaining that the trust was not an agent for its beneficiary, when holding that Code § 72(u)(1) did not apply, Letter Ruling 202118002 reasoned:

> A trustee generally has fiduciary obligations under trust documents and governing law that are inconsistent with it acting as an agent for the beneficiary of a trust. *See*, *e.g.*, *Restatement (Third) of Agency* section 1.01 cmt. g (2018); *Restatement (Third) of Trusts* section 5(e) & cmt. e (2003); *Restatement (Second) of Agency* section 14B (1958). This principle also applies for federal income tax purposes. *See*, *e.g.*, Rev. Rul. 69-300; *United States v. Anderson*, 132 F.2d 98 (6th Cir. 1942). Accordingly, the phrase "as an agent" in the flush language of section 72(u)(1) pertains only to "other entity." It does not pertain to "trust." Thus, for purposes of section 72(u)(1), the holding of an annuity contract by a trust is not taken into account if the contract is held for a natural person.
>
> The Trust would be the "holder" of its annuity contract within the meaning of section 72(u)(1) because the Trust would be designated in its annuity contract as the owner of the contract. The Trust is a not a grantor trust, and A is the sole beneficiary of the Trust. Thus, the Trust would be holding its annuity contract for the benefit of A. A is a natural person. Accordingly, the holding of the annuity contract by the Trust would not be taken into account for purposes of section 72(u)(1).
>
> This determination is consistent with the purpose for adopting section 72(u). Section 72(u) was adopted to encourage employers to offer benefits to employees under qualified pension plans, which are subject to certain restrictions and generally must be made available to a wide class of employees, as opposed to offering deferred compensation to a limited class of employees that is funded by deferred annuity contacts. Because the annuity contract would not be issued in an employment context, the arrangement would not provide the sort of tax-favored benefit that section 72(u) was intended to limit.

Kitces, "Owning Deferred Annuities In Trusts And Preserving Tax-Deferral Treatment" (12/25/2013), explains:

> In the context of trusts, the IRS has generally interpreted the rules in a similar manner, as evidenced by a series of Private Letter Rulings over the years. For instance, PLRs 9120024, 9204014, 9322011, 9639057, 9752035, 199905015, 199933033, and 200449017 all reviewed situations where various types of trusts would own an annuity and all the beneficiaries of the trust were natural persons; as a result, the IRS interpreted the annuities as being held by an agent for a natural person, retaining favorable tax-deferral treatment. In the case of PLR 9316018, the situation was even more straightforward - when a grantor trust owns an annuity, the contract retains tax-deferral status under IRC Section 72(u) by virtue of the grantor trust treatment alone. By contrast, in PLR 9009047, the trust's remainder beneficiary was a charitable organization and not a natural person, so the tax-deferral treatment was lost; similarly, in PLR 199944020 found that a partnership holding an annuity would not be eligible for tax-

deferral treatment, as a partnership is a business entity unto itself and not merely the nominal owner for a natural person beneficiary.

The basic conclusion from the rules - while a formal legal agency status is not required (at least based on the most recent rulings), for a trust to qualify as an “agent for a natural person” all the beneficiaries, both income and remainder, current and future, must be natural persons.

II.J.19.a.ii. Taxation of Distributions under an Annuity Contract

Once an annuity is annuitized, Code § 72(b), “Exclusion ratio,” determines how much of a payment is recovery of “investment in the contract” (which can be, but is not necessarily, the same as basis) that is nontaxable and how much is ordinary income:

(1) *In general*. Gross income does not include that part of any amount received as an annuity under an annuity, endowment, or life insurance contract which bears the same ratio to such amount as the investment in the contract (as of the annuity starting date) bears to the expected return under the contract (as of such date).

(2) *Exclusion limited to investment*. The portion of any amount received as an annuity which is excluded from gross income under paragraph (1) shall not exceed the unrecovered investment in the contract immediately before the receipt of such amount.

(3) *Deduction where annuity payments cease before entire investment recovered*.

(A) *In general*. If -

(i) after the annuity starting date, payments as an annuity under the contract cease by reason of the death of an annuitant, and

(ii) as of the date of such cessation, there is unrecovered investment in the contract,

the amount of such unrecovered investment (in excess of any amount specified in subsection (e)(5) which was not included in gross income) shall be allowed as a deduction to the annuitant for his last taxable year.

(B) Payments to other persons. In the case of any contract which provides for payments meeting the requirements of subparagraphs (B) and (C) of subsection (c)(2) , the deduction under subparagraph (A) shall be allowed to the person entitled to such payments for the taxable year in which such payments are received.

(C) *Net operating loss deductions provided*. For purposes of section 172 , a deduction allowed under this paragraph shall be treated as if it were attributable to a trade or business of the taxpayer.

(4) *Unrecovered investment*. For purposes of this subsection, the unrecovered investment in the contract as of any date is -

(A) the investment in the contract (determined without regard to subsection (c)(2)) as of the annuity starting date, reduced by

(B) the aggregate amount received under the contract on or after such annuity starting date and before the date as of which the determination is being made, to the extent such amount was excludable from gross income under this subtitle.

Code § 72(e) governs taxation when an annuity contract has not been annuitized and also defines "investment in the contract":

(1) *Application of subsection*.

(A) *In general*. This subsection shall apply to any amount which -

(i) is received under an annuity, endowment, or life insurance contract, and

(ii) is not received as an annuity,

if no provision of this subtitle (other than this subsection) applies with respect to such amount.

(B) *Dividends*. For purposes of this section , any amount received which is in the nature of a dividend or similar distribution shall be treated as an amount not received as an annuity.

(2) *General rule*. Any amount to which this subsection applies -

(A) if received on or after the annuity starting date, shall be included in gross income, or

(B) if received before the annuity starting date -

(i) shall be included in gross income to the extent allocable to income on the contract, and

(ii) shall not be included in gross income to the extent allocable to the investment in the contract.

(3) *Allocation of amounts to income and investment*. For purposes of paragraph (2)(B) -

(A) *Allocation to income*. Any amount to which this subsection applies shall be treated as allocable to income on the contract to the extent that such amount does not exceed the excess (if any) of -

(i) the cash value of the contract (determined without regard to any surrender charge) immediately before the amount is received, over

(ii) the investment in the contract at such time.

(B) Allocation to investment. Any amount to which this subsection applies shall be treated as allocable to investment in the contract to the extent that such amount is not allocated to income under subparagraph (A).

(4) *Special rules for application of paragraph (2)(B)*. For purposes of paragraph (2)(B) -

(A) Loans treated as distributions. If, during any taxable year, an individual -

(i) receives (directly or indirectly) any amount as a loan under any contract to which this subsection applies, or

(ii) assigns or pledges (or agrees to assign or pledge) any portion of the value of any such contract,

such amount or portion shall be treated as received under the contract as an amount not received as an annuity. The preceding sentence shall not apply for purposes of determining investment in the contract, except that the investment in the contract shall be increased by any amount included in gross income by reason of the amount treated as received under the preceding sentence.

(B) Treatment of policyholder dividends. Any amount described in paragraph (1)(B) shall not be included in gross income under paragraph (2)(B)(i) to the extent such amount is retained by the insurer as a premium or other consideration paid for the contract.

(C) Treatment of transfers without adequate consideration.

(i) *In general*. If an individual who holds an annuity contract transfers it without full and adequate consideration, such individual shall be treated as receiving an amount equal to the excess of -

(I) the cash surrender value of such contract at the time of transfer, over

(II) the investment in such contract at such time,

under the contract as an amount not received as an annuity.

(ii) Exception for certain transfers between spouses or former spouses. Clause (i) shall not apply to any transfer to which section 1041(a) (relating to transfers of property between spouses or incident to divorce) applies.

(iii) *Adjustment to investment in contract of transferee*. If under clause (i) an amount is included in the gross income of the transferor of an annuity contract, the investment in the contract of the transferee in such contract shall be increased by the amount so included.

(5) *Retention of existing rules in certain cases*.

(A) *In general*. In any case to which this paragraph applies -

(i) paragraphs (2)(B) and (4)(A) shall not apply, and

(ii) if paragraph (2)(A) does not apply,

the amount shall be included in gross income, but only to the extent it exceeds the investment in the contract.

(B) *Existing contracts*. This paragraph shall apply to contracts entered into before August 14, 1982. Any amount allocable to investment in the contract after August 13, 1982, shall be treated as from a contract entered into after such date.

(C) *Certain life insurance and endowment contracts*. Except as provided in paragraph (10) and except to the extent prescribed by the Secretary by regulations, this paragraph shall apply to any amount not received as an annuity which is received under a life insurance or endowment contract.

(D) *Contracts under qualified plans*. Except as provided in paragraph (8), this paragraph shall apply to any amount received -

(i) from a trust described in section 401(a) which is exempt from tax under section 501(a),

(ii) from a contract -

(I) purchased by a trust described in clause (i),

(II) purchased as part of a plan described in section 403(a),

(III) described in section 403(b), or

(IV) provided for employees of a life insurance company under a plan described in section 818(a)(3), or

(iii) from an individual retirement account or an individual retirement annuity.

Any dividend described in section 404(k) which is received by a participant or beneficiary shall, for purposes of this subparagraph, be treated as paid under a separate contract to which clause (ii)(I) applies.

(E) *Full refunds, surrenders, redemptions, and maturities*. This paragraph shall apply to -

(i) any amount received, whether in a single sum or otherwise, under a contract in full discharge of the obligation under the contract which is in the nature of a refund of the consideration paid for the contract, and

(ii) any amount received under a contract on its complete surrender, redemption, or maturity.

In the case of any amount to which the preceding sentence applies, the rule of paragraph (2)(A) shall not apply.

(6) *Investment in the contract*. For purposes of this subsection, the investment in the contract as of any date is -

(A) the aggregate amount of premiums or other consideration paid for the contract before such date, minus

(B) the aggregate amount received under the contract before such date, to the extent that such amount was excludable from gross income under this subtitle or prior income tax laws.

(7) *Repealed*.

(8) *Extension of paragraph (2)(B) to qualified plans*.

(A) *In general*. Notwithstanding any other provision of this subsection , in the case of any amount received before the annuity starting date from a trust or contract described in paragraph (5)(D), paragraph (2)(B) shall apply to such amounts.

(B) *Allocation of amount received*. For purposes of paragraph (2)(B) , the amount allocated to the investment in the contract shall be the portion of the amount described in subparagraph (A) which bears the same ratio to such amount as the investment in the contract bears to the account balance. The determination under the preceding sentence shall be made as of the time of the distribution or at such other time as the Secretary may prescribe.

(C) *Treatment of forfeitable rights*. If an employee does not have a nonforfeitable right to any amount under any trust or contract to which subparagraph (A) applies, such amount shall not be treated as part of the account balance.

(D) *Treatises Investment in the contract before 1987*. In the case of a plan which on May 5, 1986, permitted withdrawal of any employee contributions before separation from service, subparagraph (A) shall apply only to the extent that amounts received before the annuity starting date (when increased by amounts previously received under the contract after December 31, 1986) exceed the investment in the contract as of December 31, 1986.

(9) *Extension of paragraph (2)(B) to qualified tuition programs and Coverdell education savings accounts*. Notwithstanding any other provision of this subsection , paragraph (2)(B) shall apply to amounts received under a qualified tuition program (as defined in section 529(b)) or under a Coverdell education savings account (as defined in section 530(b)). The rule of paragraph (8)(B) shall apply for purposes of this paragraph.

(10) *Treatment of modified endowment contracts*.

(A) *In general*. Notwithstanding paragraph (5)(C) , in the case of any modified endowment contract (as defined in section 7702A) -

(i) paragraphs (2)(B) and (4)(A) shall apply, and

(ii) in applying paragraph (4)(A), “any person” shall be substituted for “an individual”.

(B) *Treatment of certain burial contracts*. Notwithstanding subparagraph (A), paragraph (4)(A) shall not apply to any assignment (or pledge) of a modified endowment contract if such assignment (or pledge) is solely to cover the payment of expenses referred to in section 7702(e)(2)(C)(iii) and if the maximum death benefit under such contract does not exceed $25,000.

(11) *Special rules for certain combination contracts providing long-term care insurance*. Notwithstanding paragraphs (2), (5)(C) , and (10), in the case of any charge against the cash value of an annuity contract or the cash surrender value of a life insurance contract made as payment for coverage under a qualified long-term care insurance contract which is part of or a rider on such annuity or life insurance contract -

(A) the investment in the contract shall be reduced (but not below zero) by such charge, and

(B) such charge shall not be includible in gross income.

(12) *Anti-abuse rules*.

(A) *In general*. For purposes of determining the amount includible in gross income under this subsection -

(i) all modified endowment contracts issued by the same company to the same policyholder during any calendar year shall be treated as 1 modified endowment contract, and

(ii) all annuity contracts issued by the same company to the same policyholder during any calendar year shall be treated as 1 annuity contract.

The preceding sentence shall not apply to any contract described in paragraph (5)(D).

(B) *Regulatory authority*. The Secretary may by regulations prescribe such additional rules as may be necessary or appropriate to prevent avoidance of the purposes of this subsection through serial purchases of contracts or otherwise.

Howard Zaritsky's Estate Planning Update (WG&L), Contingent Deferred Annuity Will Be Treated as Annuity Contract (1/1/2023), explains:

> In PLR 202250010, PLR 202250011, PLR 202250012, and PLR 202250013 (Dec. 16, 2022), the IRS stated that a nonassignable contract issued by a life insurance company to an individual would be treated as an annuity contract under Code Sec. 72, despite several variables that would ultimately determine the amount of annual payments, that certain lifetime distributions would be treated as "amounts received as an annuity," and that an investment account protected by the policy would not cause the contract to have a cash surrender value. The IRS also explained how the taxpayer's investment in the contract would be calculated, that dividends received from the assets in taxpayer's investment account will not fail to be treated as "qualified dividend income" under Code Sec. 1(h)(11)(B) merely because the taxpayer also owns the contract, and that the ownership of the contract and the account assets will not be treated as a straddle under Code Sec. 1092.

Looking just at the first of those, Letter Ruling 202250010 begins:

> Taxpayer has requested several rulings regarding whether and how § 72 of the Internal Revenue Code applies to a contingent deferred annuity contract ("the Contract") Individual plans to purchase from Taxpayer.

Letter Ruling 202250010 addressed the following situation:

> Taxpayer is a life insurance company within the meaning of § 816(a).
>
> Individual will own assets in a taxable investment account ("Account"). Taxpayer will have no legal or equitable interest in any assets owned by Individual in the Account, and Taxpayer will not treat the Account or any of the assets in the Account as Taxpayer's assets for any purpose. Individual will be free to liquidate all or any portion of the assets in the Account at any time without Taxpayer's consent.
>
> Taxpayer intends to issue the Contract to Individual. The Contract will provide certain benefits in the event the value of the Account is depleted before Individual's death. Specifically, if the Account's value reaches zero or some other minimum threshold amount for reasons other than withdrawals in excess of the prescribed limit, Taxpayer will begin making annual payments to Individual under the contract on either a fixed ("Fixed Method") or a fluctuating ("Fluctuating Method") basis (collectively, "Protected Income Payments"). The payments will continue for Individual's life or for the joint lives of Individual and Individual's spouse. Alternatively, prior to the point at which annual payments begin under the Contract, Individual can elect to liquidate the Account and transfer the proceeds to Taxpayer in exchange for fixed payments at minimum purchase rates guaranteed in the Contract ("Annuity Payments").
>
> Individual can make withdrawals from the Account. Once Individual begins making "Protected Income Withdrawals" from the Account, the maximum amount Individual may withdraw from the Account is set each year by reference to the performance of the assets in the Account. "Excess Withdrawals" in excess of the maximum amount reduce maximum withdrawal amounts going forward. Too many Excess Withdrawals can also result in termination of the Contract. The Contract may include a feature whereby unused withdrawal amounts for a given year are carried forward to subsequent years to increase the maximum withdrawal amounts in those years.
>
> Though Taxpayer's exposure to investment risk is limited due to the fluctuating limit placed on maximum withdrawals from the Account, Taxpayer also may, but does not currently plan to, restrict permissible asset holdings in the Account. For instance, certain kinds of "exotic" investments may be restricted. Exotic investments may include private securities, investments that are not priced daily, and investments that are not registered with the Securities and Exchange Commission.
>
> Unless Individual liquidates the Account and transfers the proceeds to Taxpayer in exchange for Annuity Payments, annual payments will begin under the Contract once the Account's value reaches zero or otherwise falls below a minimum threshold amount. Individual can select either fixed payments under the Fixed Method or fluctuating payments under the Fluctuating Method.

Each payment option differs in the following respects. If Individual selects the Fixed Method (which is the default option), the Contract's annual payments will commence when the Account's value is reduced to zero (for reasons other than Excess Withdrawals) and will be equal to the maximum withdrawal amount in effect as of that time. If Individual selects the Fluctuating Option before the Account falls below a minimum threshold amount (for reasons other than Excess Withdrawals), then payments will commence once the Account's value falls below a minimum threshold amount and the Contract's annual payments will initially be equal to the maximum withdrawal amount in effect as of the time that Contract payments commence but will thereafter fluctuate with investment performance.

If Individual selects the Fluctuating Option, then once the value of the Account reaches a minimum threshold amount, the remaining assets in the Account must be liquidated and the proceeds transferred to Taxpayer before payments commence. Individual may then allocate those transferred proceeds among one or more separate sub-accounts. The investment performance of the sub-account(s) that Individual selects is used solely to generate a rate of return. That rate of return is then applied to adjust the annual payouts under the Contract.

Individual will not be able to access the amounts in the sub-account(s) in any way, and the amounts will not give rise to any cash value. Any amounts allocated to the sub-account(s) are, as indicated above, used solely to generate a rate of return to use in determining annual payments under the Contract under the Fluctuating Method.

The Contract may be issued with a feature guaranteeing a payment to Individual at the age of 95 in certain circumstances ("Cumulative Income Minimum"). Specifically, if Individual reaches the age of 95 and has not had the opportunity, either through permissible withdrawals from the Account or through payments under the Contract, to recover Individual's net deposits into the Account at the time of the first Protected Income Withdrawal (proportionally reduced by any Excess Withdrawals taken after the first Protected Income Withdrawal), Taxpayer will make a one-time payment to Individual making up the difference.

Individual will periodically pay consideration for the Contract either out of the Account (on an after-tax basis) or out of other sources of after-tax funds. Additionally, as indicated above, Individual may transfer a final amount of cash proceeds to Taxpayer once the Account reaches a minimum threshold amount, which Taxpayer will treat as additional consideration for the Contract.

Amounts Individual pays for the Contract will not give rise to any cash value, and the Contract will not otherwise have any cash value accessible by Individual. The Contract is not assignable or transferable by Individual. The Contract will not serve as collateral for any loan from Taxpayer or Taxpayer's affiliates.

Individual is X years old. It is anticipated that Individual will be X years old at the time Taxpayer issues the Contract to Individual. In general, Taxpayer anticipates that Individual's age will be typical of other customers. Taxpayer intends to restrict the availability of the Cumulative Income Minimum feature to customers who are Y-Z years old at the time of Contract issuance.

> The Contract will terminate if Individual dies prior to the commencement of Annuity Payments or Protected Income Payments, unless continued by Individual's spouse pursuant to § 72(s).
>
> The Contract will be treated as an annuity contract for state law purposes and will be registered as a security with the Securities and Exchange Commission. Taxpayer will maintain reserves for its liabilities under the Contract. Taxpayer will treat the consideration Individual pays for the Contract (whether the periodic fees or any transfer of proceeds from the Account after liquidation of the Account's assets) as premiums for state premium tax purposes and will account for the consideration as annuity premiums both on its National Association of Insurance Commissioners annual statement and for federal income tax purposes.

Letter Ruling 202250010 concluded:

1. The Contract will constitute an annuity contract for purposes of § 72.

2. The Protected Income Payments that are made using the Fixed Method and the Annuity Payments will be taxable as "amounts received as an annuity" under § 72(b). In addition, a portion of each Protected Income Payment that is made using the Fluctuating Method will be treated as an "amount received as an annuity," as follows:

   (a) The portion of each such Protected Income Payment that will be treated as an amount received as an annuity will be excludable from gross income pursuant to § 72(b)(1) and §§ 1.72-2(b)(3) and 1.72-3, subject to the limitation imposed by § 72(b)(2); and

   (b) The excess (if any) of each such Protected Income Payment over the portion determined in (a) above will be treated as an amount not received as an annuity on or after the annuity starting date and will be includible in gross income as provided in § 72(e)(2)(A) and §§ 1.72-1(d), 1.72-4(a)(3), (d)(3), and 1.72-11(b)(2).

3. The Account will not cause the Contract to have a "cash value" or "cash surrender value" for purposes of § 72, and will not otherwise be part of the Contract for federal income tax purposes.

4. For purposes of § 72(c)(1) and § 72(e)(6) (each defining "investment in the contract"), the "aggregate amount of premiums or other consideration paid" for the Contract will equal the sum of all charges Individual paid under the Contract plus any proceeds Individual paid to Taxpayer upon liquidation of the Account as consideration for Protected Income Payments or Annuity Payments.

Letter Ruling 202341002 held that, when a Code § 816(a) life insurance company paid fees to a person who advised the annuity's owner on investment options, the payment of the fees was internal to the contract and not considered a distribution to the policy owner, reasoning:

> In this case, the Fees are integral to the operation of the Adviser Life Contract. During any period for which the Authorization is in effect, the Owner will receive ongoing investment advice from the Adviser with respect to the Adviser Life Contract so that the Owner may properly utilize the Adviser Life Contract. The Adviser is expected to help the

Owner select Options related to the Adviser Life Contract. Taxpayer has represented that the Fees will not serve as consideration for anything other than investment advice provided by the Adviser in relation to the Adviser Life Contract. Furthermore, Taxpayer has represented that the Fees will not exceed an annual rate of 1.5% of the Adviser Life Contract's cash surrender value based on the period in which the Fees relate. Based on Taxpayer's representations, the Fees will only be used to pay for investment advisory services relating to the Adviser Life Contract. Because the Adviser Life Contracts are designed to work with an Adviser, the Adviser Life Contract is solely liable for the Fees. The Fees do not constitute compensation to the Adviser for services related to any assets of the Owner other than the Adviser Life Contract or any services other than investment advice services with respect to the Adviser Life Contract. Therefore, the Fees are an expense of the Adviser Life Contract, not a distribution to the Owner.

II.J.19.a.iii. Code § 72(q) 10% Penalty for Early Distributions from Annuity Contracts

Code § 72(q) provides:

(1) *Imposition of penalty*. If any taxpayer receives any amount under an annuity contract, the taxpayer's tax under this chapter for the taxable year in which such amount is received shall be increased by an amount equal to 10 percent of the portion of such amount which is includible in gross income.

(2) *Subsection not to apply to certain distributions*. Paragraph (1) shall not apply to any distribution -

(A) made on or after the date on which the taxpayer attains age 59½,

(B) made on or after the death of the holder (or, where the holder is not an individual, the death of the primary annuitant (as defined in subsection (s)(6)(B))),

(C) attributable to the taxpayer's becoming disabled within the meaning of subsection (m)(7),

(D) which is a part of a series of substantially equal periodic payments (not less frequently than annually) made for the life (or life expectancy) of the taxpayer or the joint lives (or joint life expectancies) of such taxpayer and his designated beneficiary,

(E) from a plan, contract, account, trust, or annuity described in subsection (e)(5)(D),[3018]

(F) allocable to investment in the contract before August 14, 1982,

(G) under a qualified funding asset (within the meaning of section 130(d), but without regard to whether there is a qualified assignment),[3019]

(H) to which subsection (t) applies (without regard to paragraph (2) thereof),[3020]

[3018] [my footnote:] Code § 72(e)(5)(D) applies to certain contracts under qualified plans.
[3019] [my footnote:] Code § 130(d) applies to certain annuities under certain personal injury assignments.
[3020] [my footnote:] Code § 72(t) applies to early distributions from qualified retirement plans.

(I) under an immediate annuity contract (within the meaning of section 72(u)(4)), or

(J) which is purchased by an employer upon the termination of a plan described in section 401(a) or 403(a) and which is held by the employer until such time as the employee separates from service.

(3) *Change in substantially equal payments*. If -

(A) paragraph (1) does not apply to a distribution by reason of paragraph (2)(D), and

(B) the series of payments under such paragraph are subsequently modified (other than by reason of death or disability) -

(i) before the close of the 5-year period beginning on the date of the first payment and after the taxpayer attains age 59½, or

(ii) before the taxpayer attains age 59½,

the taxpayer's tax for the 1st taxable year in which such modification occurs shall be increased by an amount, determined under regulations, equal to the tax which (but for paragraph (2)(D)) would have been imposed, plus interest for the deferral period (within the meaning of subsection (t)(4)(B)).

As to the Code § 72(q)(I) exception for an immediate annuity contract, one cannot qualify by engaging in a nontaxable swap of a deferred annuity for an immediate annuity. Rev. Rul. 92-95 held:

> If an annuity contract is acquired in exchange for another annuity contract in a transaction described in section 1035 of the Code, "the date of the purchase of the annuity" for purposes of section 72(u)(4) (which defines the term "immediate annuity") and section 72(q)(2)(I) (which exempts distributions under an immediate annuity from the 10 percent penalty of section 72(q)(1)) is the date of purchase of the annuity contract exchanged for the new annuity contract.

II.J.19.a.iv. Code § 72(s) Required Distributions Where Holder Dies Before Entire Interest Is Distributed

Code § 72(s) provides:

(1) *In general*. A contract shall not be treated as an annuity contract for purposes of this title unless it provides that -

(A) if any holder of such contract dies on or after the annuity starting date and before the entire interest in such contract has been distributed, the remaining portion of such interest will be distributed at least as rapidly as under the method of distributions being used as of the date of his death, and

(B) if any holder of such contract dies before the annuity starting date, the entire interest in such contract will be distributed within 5 years after the death of such holder.

(2) *Exception for certain amounts payable over life of beneficiary*. If -

(A) any portion of the holder’s interest is payable to (or for the benefit of) a designated beneficiary,

(B) such portion will be distributed (in accordance with regulations) over the life of such designated beneficiary (or over a period not extending beyond the life expectancy of such beneficiary), and

(C) such distributions begin not later than 1 year after the date of the holder’s death or such later date as the Secretary may by regulations prescribe,

then for purposes of paragraph (1), the portion referred to in subparagraph (A) shall be treated as distributed on the day on which such distributions begin.

(3) *Special rule where surviving spouse beneficiary*. If the designated beneficiary referred to in paragraph (2)(A) is the surviving spouse of the holder of the contract, paragraphs (1) and (2) shall be applied by treating such spouse as the holder of such contract.

(4) *Designated beneficiary*. For purposes of this subsection , the term “designated beneficiary” means any individual designated a beneficiary by the holder of the contract.

(5) *Exception for certain annuity contracts*. This subsection shall not apply to any annuity contract -

(A) which is provided -

(i) under a plan described in section 401(a) which includes a trust exempt from tax under section 501, or

(ii) under a plan described in section 403(a),

(B) which is described in section 403(b),

(C) which is an individual retirement annuity or provided under an individual retirement account or annuity, or,

(D) which is a qualified funding asset (as defined in section 130(d), but without regard to whether there is a qualified assignment).

(6) *Special rule where holder is corporation or other non-individual*.

(A) *In general*. For purposes of this subsection, if the holder of the contract is not an individual, the primary annuitant shall be treated as the holder of the contract.

(B) *Primary annuitant*. For purposes of subparagraph (A), the term “primary annuitant” means the individual, the events in the life of whom are of primary importance in affecting the timing or amount of the payout under the contract.

(7) *Treatment of changes in primary annuitant where holder of contract is not an individual*. For purposes of this subsection , in the case of a holder of an annuity contract which is not an individual, if there is a change in a primary annuitant (as defined in paragraph (6)(B)), such change shall be treated as the death of the holder.

Code § 72(s)(2) looks a lot like parts of Code § 401(a)(9), but insurance company back offices do not apply the regulations under Code § 401(a)(9). If the beneficiary is not an actual individual, generally forget about stretching the payments (absent litigation against the insurance company to try to create favorable case law), notwithstanding the fact that a trust can be an individual. However, if the annuitant's surviving spouse is the beneficiary of a trust with an unlimited right to withdraw its income and principal, the surviving spouse is considered the beneficiary.[3021]

II.J.19.a.v. Annuity Contract Issued to Grantor Trust

For what is a grantor trust, see part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.

Letter Ruling 202031008 involved the following:[3022]

> The Taxpayer is a life insurance company organized and operated under the laws of State. The Taxpayer is a subsidiary of the Parent and joins in the filing of a consolidated federal income tax return with the Parent on a calendar year basis using an accrual method of accounting.
>
> The Taxpayer issues nonqualified deferred annuity contracts that may be fixed, indexed, or variable contracts, that contain customary, industry standard terms, and that are considered annuity contracts in accordance with the customary practice of life insurance companies (the "Contracts"). The Taxpayer regularly issues Contracts to both grantor trusts and non-grantor trusts in situations similar to those described below. The Taxpayer has information reporting obligations under section 6047(d) with respect to distributions or payments under the Contracts.
>
> In the Grantor Trust Scenario, the Taxpayer issues a Contract to a grantor trust (*i.e.*, a trust described in subpart E of part I of subchapter J (sections 671 through 679)) (the "Grantor Trust") that was established by one individual (the "Grantor"). The beneficiaries of the Grantor Trust (each, a "Grantor Trust Beneficiary") are an individual who is not the Grantor and a charitable organization. There are no contingent beneficiaries under the Grantor Trust. The Grantor Trust is named in the Contract as the owner and beneficiary of the Contract (i.e., the person entitled to receive distributions under the Contract). The individual Grantor Trust Beneficiary is named in the Contract as the sole annuitant, the individual the events in the life of whom are of primary importance in affecting the timing or amount of the payout under the Contract (i.e., the measuring life).

[3021] Letter Ruling 200323012, Issue 1, analyzed in the text accompanying fn 3023 in part II.J.19.a.iv Code § 72(s) Required Distributions Where Holder Dies Before Entire Interest Is Distributed. The grantor trust rules treat the surviving spouse as the deemed owner; see parts III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts and III.B.2.d.i Federal Income Tax and Irrevocable Grantor Trust Treatment.

[3022] The Non-Grantor Trust Scenario is evaluated in part II.J.19.a.vi Annuity Contract Issued to Nongrantor Trust.

In the Non-Grantor Trust Scenario, the Taxpayer issues a Contract to a trust subject to tax under section 641 (the “Non-Grantor Trust”) that was established by one individual (the “Settlor”). The sole beneficiary of the Non-Grantor Trust (the “Non-Grantor Trust Beneficiary”) is an individual who is not the Settlor and who does not have a power exercisable by himself to vest trust income or corpus in himself as described in section 678. There are no contingent beneficiaries under the Non-Grantor Trust. The Non-Grantor Trust is named in the Contract as the owner and beneficiary of the Contract (i.e., the person entitled to receive distributions under the Contract). The Non-Grantor Trust Beneficiary is named in the Contract as the sole annuitant, the individual the events in the life of whom are of primary importance in affecting the timing or amount of the payout under the Contract (*i.e.*, the measuring life).

Letter Ruling 202031008 involved the following representations:

1. In the Grantor Trust Scenario, the Grantor will be considered the owner of the entire Grantor Trust under subpart E of part I of subchapter J.

2. In the Non-Grantor Trust Scenario, neither the Settlor nor any other person will be considered the owner of the Non-Grantor Trust under subpart E of part I of subchapter J, and the Non-Grantor Trust is a trust subject to tax under section 641.

3. Each Contract is an annuity contract under the law of the jurisdiction where issued.

4. Each Contract qualifies for treatment as an annuity contract for federal income tax purposes, including by complying with the requirements of section 72(s) and, where applicable, the requirements of section 817(h) and the “investor control” doctrine.

5. The sole annuitant named in each Contract is the “primary annuitant” within the meaning of section 72(s)(6)(B).

6. No Contract will be issued in a situation where an employer is the nominal owner of the Contract and the employer’s employees are the beneficial owners of the Contract, including as part of any arrangement to provide deferred compensation to such employees.

Letter Ruling 202031008 analyzed the Grantor Trust Scenario:

<u>Sections 72(q)(2)(A), (C), (D)</u>

Section 72(q) generally imposes an additional 10% tax on amounts received under an annuity contract that are includible in income unless certain exceptions apply. Sections 72(q)(2)(A), (C), and (D) respectively provide exceptions to the 10% additional tax if the distribution is made on or after the date the “taxpayer” attains age 59½, if the distribution is attributable to the “taxpayer’s” becoming disabled, or if the distribution is part of a series of substantially equal periodic payments made for the life of the “taxpayer” or the “taxpayer” and his or her designated beneficiary. Section 7701(a)(14) defines “taxpayer” to mean any person subject to any internal revenue tax.

Under the grantor trust rules, section 671 provides that when the grantor is treated as the owner of any portion of a trust, the grantor must include in computing his or her taxable income those items of income, deductions, and credits that are attributable to that portion of the trust. Section 1.671-3(a)(1) provides, in relevant part, that if a grantor is treated as the owner of an entire trust, the grantor takes into account in computing his or her income tax liability all items of income to which the grantor would have been entitled had the trust not been in existence during the period the grantor is treated as owner of the trust.

In the Grantor Trust Scenario, the Grantor is the owner of the Grantor Trust for federal income tax purposes. As a consequence, the Grantor is required to include in income any income arising from the receipt by the Grantor Trust of distributions under the Contract. Accordingly, the Grantor is the “taxpayer” with respect to the Contract, and references to the “taxpayer” in sections 72(q)(2)(A), (C), and (D) are references to the Grantor.

Section 72(q)(2)(B)

Section 72(q)(2)(B) provides an exception to the 10% additional tax if the distribution is made on or after the death of the “holder” or, when the “holder” is not an individual, the death of the primary annuitant (as defined in section 72(s)(6)(B)). Section 72(s)(6)(B) defines the primary annuitant as the individual the events in the life of whom are of primary importance in affecting the timing or amount of the payout under the contract.

In the Grantor Trust Scenario, the Grantor Trust is the “holder” of the Contract because it is designated in the Contract as the owner of the Contract. The Grantor Trust is not an individual, however, so the exception provided in section 72(q)(2)(B) applies if the distribution is made on or after the death of the primary annuitant, as defined in section 72(s)(6)(B). In the Grantor Trust Scenario, the primary annuitant is the individual Grantor Trust Beneficiary. Thus, the exception provided in section 72(q)(2)(B) will apply in the Grantor Trust Scenario to distributions made on or after the death of the individual Grantor Trust Beneficiary.

Section 72(u)(1)

Section 72(u)(1) generally provides that an annuity contract is not treated as such for federal income tax purposes (other than subchapter L) if it is held by a person who is not a natural person. The flush language of section 72(u)(1), however, provides that holding by a trust or other entity as an agent for a natural person is not taken into account for this purpose.

A trustee generally has fiduciary obligations under trust documents and governing law that are inconsistent with it acting as an agent for the beneficiary of a trust. See, *e.g.*, *Restatement (Third) of Agency section* 1.01 cmt. g (2018); *Restatement (Third) of Trusts* section 5(e) & cmt. e (2003); *Restatement (Second) of Agency* section 14B (1958). This principle also applies for federal income tax purposes. See, *e.g.*, Rev. Rul. 69-300; *United States v. Anderson*, 132 F.2d 98 (6th Cir. 1942). Accordingly, the phrase “as an agent” in the flush language of section 72(u)(1) pertains only to “other entity.” It does not pertain to “trust.” Thus, for purposes of section 72(u)(1), the holding of an annuity contract by a trust is not taken into account if the contract is held for a natural person.

In the Grantor Trust Scenario, the Grantor Trust is the “holder” of the Contract within the meaning of section 72(u)(1) because it is designated in the Contract as the owner of the Contract.

> The Grantor is treated as the owner of the entire Grantor Trust, and as a consequence, the Grantor is also treated as the owner of the Contract for federal income tax purposes. See Rev. Rul. 85-13. The Grantor Trust is holding the Contract for the Contract's tax owner, the Grantor, who is a natural person. Accordingly, the holding of the Contract by the Grantor Trust is not taken into account for purposes of section 72(u)(1).
>
> This determination is consistent with the purpose for adopting section 72(u). Section 72(u) was adopted to encourage employers to offer benefits to employees under qualified pension plans, which are subject to certain restrictions and generally must be made available to a wide class of employees, as opposed to offering deferred compensation to a limited class of employees that is funded by deferred annuity contacts. Because the Contract in the Grantor Trust Scenario is not issued in the employment context, the arrangement does not provide the sort of tax-favored benefit that section 72(u) was intended to limit.

Letter Ruling 202031008 ruled on the Grantor Trust Scenario:

> (1) For purposes of section 72(q)(2), (i) the Grantor is the "taxpayer," so the exceptions in sections 72(q)(2)(A), (C), and (D) will apply based on the age, disability, and life or life expectancy, respectively, of the Grantor and (ii) the Grantor Trust is the "holder" of the Contract, so that the exception in section 72(q)(2)(B) will apply based upon the death of the primary annuitant (as defined in section 72(s)(6)(B)), who is the individual Grantor Trust Beneficiary.
>
> (2) For purposes of section 72(u)(1) and pursuant to the flush language of that section, the Contract is held by the Grantor Trust for the Grantor, so that section 72(u)(1) will not apply even though one of the Grantor Trust Beneficiaries is a charitable organization.

When a joint revocable trust owns an annuity that is transferred to the surviving spouse's revocable share on the annuitant's death, the annuity is treated as owned by the surviving spouse and may be swapped in a Code § 1035 exchange. Letter Ruling 200323012 involved the following situation:

> Taxpayers A and B were married. On Date 4, Taxpayers A and B created Trust C, a revocable, inter vivos trust. Taxpayers A and B were the grantors, co-trustees, and beneficiaries of Trust C. The trust agreement provided that the survivor of Taxpayer A and Taxpayer B would be the surviving grantor/trustee and sole beneficiary of Trust C. Subsequently, Taxpayer A transferred ownership of two deferred variable Annuities (Contracts A and B) to Trust C and named Trust C the beneficiary of Contracts A and B. Taxpayer A died on Date 5 before the starting date of the Annuities.
>
> Trust C is an A/B type trust which, upon the first death of a grantor is to be divided into two subtrusts, "Subtrust D", a survivor's trust, and "Subtrust E", a credit shelter trust. Taxpayer B, as surviving grantor/trustee, has the power of allocation between the subtrusts of Trust C and is the trustee and beneficiary of both subtrusts. With respect to Subtrust E, Taxpayer B is entitled to all net income to that trust and can invade the principal on an unascertainable standard. Further, Taxpayer B has the right to withdraw the entire or any amount of income and/or principal from Subtrust D, and this right cannot be limited by trustee discretion.

> Taxpayer B, as surviving spouse, proposes to transfer Contracts A and B from Trust C to Subtrust D and exchange Contracts A and B for a new deferred variable annuity contract (Contract C). Contract C will be issued in favor of Taxpayer B. (Taxpayer B will be both owner and beneficiary.) At no point in the exchange will Subtrust D or Taxpayer B receive any money or property other than Contract C.

Letter Ruling 200323012 concluded that "Taxpayer B is the designated beneficiary of Contracts A and B within the meaning of section 72(s)(4),"[3023] reasoning:

> In this instance, although Trust C is the named holder and beneficiary of Taxpayer A's Annuities, Taxpayer B has the right to allocate funds between Subtrust D and Subtrust E upon the division of Trust C at Taxpayer A's death, and to withdraw all of the principal of Trust C from Subtrust D. Taxpayer B thus has complete control and dominion over Trust C and Subtrusts D and E, and over the disposition of the assets of Trust C and Subtrusts D and E. Taxpayer has represented that Trust C, Subtrust D and Subtrust E are grantor trusts for purposes of the Code and Income Tax Regulations. As a result, Taxpayer B is treated as the owner of the assets of Trust C, Subtrust D, and Subtrust E (including Contracts A and B). Under section 671, Taxpayer B must take into account items of income deductions and credits attributable to the assets of the trusts (including Contracts A and B).

The representation that the surviving spouse was the deemed owner of the credit shelter trust was simply wrong.[3024] However, the credit shelter trust never owned the annuity policy; instead, the surviving spouse as trustee allocated it to the surviving spouse's revocable trust, so that representation was irrelevant (although presumably required by the IRS at that time).

Letter Ruling 200323012 ruled that, when a grantor of a joint revocable trust died, the surviving spouse's revocable trust[3025] could, tax-free under Code § 1035,[3026] exchange both contracts on her life for an annuity contract that she owned:

> Section 1.1035-1(c) of the Income Tax Regulations provides that "section 1035 does not apply to such exchanges if the policies exchanged do not relate to the same insured. The exchange, without recognition of gain or loss of an annuity contract for another annuity contract under section 1035(a)(3), is limited to cases where the same person or

---

[3023] See part II.J.19.a.iv Code § 72(s) Required Distributions Where Holder Dies Before Entire Interest Is Distributed.

[3024] See part III.B.2.i.iii Can a Trust Without a Withdrawal Right Be a Code § 678 Trust?

[3025] The facts included:

> Trust C is an A/B type trust which, upon the first death of a grantor is to be divided into two subtrusts, "Subtrust D", a survivor's trust, and "Subtrust E", a credit shelter trust. Taxpayer B, as surviving grantor/trustee, has the power of allocation between the subtrusts of Trust C and is the trustee and beneficiary of both subtrusts. With respect to Subtrust E, Taxpayer B is entitled to all net income to that trust and can invade the principal on an unascertainable standard. Further, Taxpayer B has the right to withdraw the entire or any amount of income and/or principal from Subtrust D, and this right cannot be limited by trustee discretion.
>
> Taxpayer B, as surviving spouse, proposes to transfer Contracts A and B from Trust C to Subtrust D and exchange Contracts A and B for a new deferred variable annuity contract (Contract C). Contract C will be issued in favor of Taxpayer B. (Taxpayer B will be both owner and beneficiary.) At no point in the exchange will Subtrust D or Taxpayer B receive any money or property other than Contract C.

[3026] See part II.Q.4.c Income Tax Issues in Transferring Life Insurance; Code § 1035.

persons are the obligees under the contract received in the exchange as under the original contract."

In this instance, although Trust C is nominally the obligee under Contracts A and B, as explained above, Taxpayer B is the owner of Contracts A and B for tax purposes and the designated beneficiary under section 72(s)(4). Taxpayer accordingly is the obligee of Contracts A and B within the meaning of section 1.1035-1(c) of the regulations. Because Taxpayer B will also be the obligee under Contract C, the same obligee requirement of section 1.1035-1(c) will be satisfied.

The legislative history indicates that section 1035 was designed to eliminate the taxation of individuals "who merely exchanged one insurance policy for another better suited to their needs but who have actually recognized no gain." H.R. Rep. No. 1337, 83rd Cong., 2d Sess. 81 (1954). Thus, section 1035 operates as the insurance analogue to section 1031, which relates to like-kind exchanges of certain types of property held for productive use in a trade or business or for investment. The similarity of section 1031 and section 1035 is evidenced in section 1035(c)(1), which provides that the recognition of gain or loss on an exchange that is not solely like-kind will be made under the terms of section 1031(b) and (c). In addition, section 1035(c)(2) states that section 1031(d) provides rules relating to the basis of property acquired in an exchange described in section 1035(a). Section 1031(b), (c), and (d) similarly cross-reference section 1035(a).

Section 1031 permits exchanges of one property for more than one property. See 1.1031(j)-1 (relating to exchanges of multiple properties). See also Rev. Rul. 85-135 1985-2 C.B. 181 (exchange of assets of two television stations for the assets of another television station); Rev. Rul. 73-476 1973-2 C.B. 300 (exchange of three undivided interests in three parcels of land for 100 percent ownership in one parcel).

Because section 1035(a)(3) is written in the singular, one might argue that it does not apply to exchanges of one annuity for two annuities or exchanges of two annuities for one annuity contract. However, section 7701(m)(1) cross-references Title I, section 1 of the United States Code, which provides that "in determining the meaning of any Act of Congress, unless the context indicates otherwise, words importing the singular include and apply to several persons, parties, and things." Thus, just as section 1031 applies to exchanges of multiple properties, section 1035(a)(3) applies to exchanges of multiple annuities.

II.J.19.a.vi. Annuity Contract Issued to Nongrantor Trust

Letter Ruling 202031008 involved the following:[3027]

In the Non-Grantor Trust Scenario, the Taxpayer issues a Contract to a trust subject to tax under section 641 (the "Non-Grantor Trust") that was established by one individual (the "Settlor"). The sole beneficiary of the Non-Grantor Trust (the "Non-Grantor Trust Beneficiary") is an individual who is not the Settlor and who does not have a power exercisable by himself to vest trust income or corpus in himself as described in section 678. There are no contingent beneficiaries under the Non-Grantor Trust. The Non-Grantor Trust is named in the Contract as the owner and beneficiary of the Contract

[3027] For essential background, please read fn 3022 (not just the first indented portion but also the numbered representations that follow it) in part II.J.19.a.v Annuity Contract Issued to Grantor Trust.

(*i.e.*, the person entitled to receive distributions under the Contract). The Non-Grantor Trust Beneficiary is named in the Contract as the sole annuitant, the individual the events in the life of whom are of primary importance in affecting the timing or amount of the payout under the Contract (*i.e.*, the measuring life).

Letter Ruling 202031008 analyzed the Non-Grantor Trust Scenario:

Sections 72(q)(2)(A), (C), (D)

As discussed above, sections 72(q)(2)(A), (C), and (D) provide exceptions to the 10% additional tax imposed by section 72(q)(1) if a distribution is made on or after the date the "taxpayer" attains age 59½, if the distribution is attributable to the "taxpayer's" becoming disabled, or if the distribution is part of a series of substantially equal periodic payments made for the life of the "taxpayer" or the "taxpayer" and his or her designated beneficiary.

Unlike grantor trusts, a non-grantor trust is potentially subject to federal income tax. (Although the tax burden may be passed through to a non-grantor trust's beneficiaries, the non-grantor trust is initially subject to the tax and must claim a deduction to eliminate any income tax liability at the trust level.) In the Non-Grantor Trust Scenario, the Non-Grantor Trust is required to include in income any income arising from the receipt by the Non-Grantor Trust of distributions under the Contract. Accordingly, the Non-Grantor Trust is the "taxpayer" with respect to the Contract, and references to the "taxpayer" in sections 72(q)(2)(A), (C), and (D) are references to the Non-Grantor Trust.

The Non-Grantor Trust, however, cannot attain age 59½, become disabled, or have a life expectancy, as contemplated by sections 72(q)(2)(A), (C), and (D), respectively. Thus, the exceptions provided by these provisions are not applicable to distributions under the Contract in the Non-Grantor Trust Scenario.

Section 72(q)(2)(B)

Section 72(q)(2)(B) provides an exception to the 10% additional tax if a distribution is made on or after the death of the "holder" or, when the "holder" is not an individual, the death of the primary annuitant (as defined in section 72(s)(6)(B)). Section 72(s)(6)(B) defines the primary annuitant as the individual the events in the life of whom are of primary importance in affecting the timing or amount of the payout under the Contract.

In the Non-Grantor Trust Scenario, the Non-Grantor Trust is the "holder" of the Contract because it is designated in the Contract as the owner of the Contract. The Non-Grantor Trust is not an individual, however, so the exception provided in section 72(q)(2)(B) applies if the distribution is made on or after the death of the primary annuitant, as defined in section 72(s)(6)(B). In the Non-Grantor Trust Scenario, the primary annuitant is the Non-Grantor Trust Beneficiary. Thus, the exception provided in section 72(q)(2)(B) will apply in the Non-Grantor Trust Scenario to distributions made on or after the death of the Non-Grantor Trust Beneficiary.

Section 72(u)(1)

As discussed above, for purposes of section 72(u)(1), the holding of an annuity contract by a trust is not taken into account if the contract is held for a natural person.

> In the Non-Grantor Trust Scenario, the Non-Grantor Trust is the "holder" of the Contract because it is designated in the Contract as the owner of the Contract.
>
> In the Non-Grantor Trust Scenario, the Non-Grantor Trust Beneficiary is the only beneficiary of the trust and the only person who will benefit from the distributions under the Contract. Thus, the Non-Grantor Trust is holding the Contract for the benefit of the Non-Grantor Trust Beneficiary, a natural person. Accordingly, the holding of the Contract by the Non-Grantor Trust is not taken into account for purposes of section 72(u)(1).
>
> This determination is consistent with the purpose for adopting section 72(u), which was discussed above. Because the Contract in the Non-Grantor Trust Scenario is not issued in the employment context, the arrangement does not provide the sort of tax-favored benefit that section 72(u) was intended to limit.

Letter Ruling 202031008 ruled on the Non-Grantor Trust Scenario:

> (1) For purposes of section 72(q)(2), (i) the Non-Grantor Trust is the "taxpayer," so that the exceptions in sections 72(q)(2)(A), (C), and (D) will not apply to any distribution from the Contract because the Non-Grantor Trust cannot attain age 59½, become disabled, or have a life or life expectancy within the meaning of such sections and (ii) the Non-Grantor Trust is the "holder" of the Contract, so that the exception in section 72(q)(2)(B) will apply based upon the death of the primary annuitant (as defined in section 72(s)(6)(B)), who is the Non-Grantor Trust Beneficiary.
>
> (2) For purposes of section 72(u)(1) and pursuant to the flush language of that section, the Contract is held by the Non-Grantor Trust for the Non-Grantor Trust Beneficiary, so that section 72(u)(1) will not apply.

In other words, in most cases the 10% penalty for early distribution under part II.J.19.a.iii Code § 72(q) 10% Penalty for Early Distributions from Annuity Contracts applies unless the contract is an immediate annuity contract or to the extent that payments are received after the sole beneficiary's death.

For post-mortem trust funding, see Letter Ruling 200323012, described in part II.J.19.a.v Annuity Contract Issued to Grantor Trust.

II.J.19.a.vii. Loss on Sale of Annuity

Rev. Rul. 61-201 addresses "the method of computing the basis of a single premium refund annuity contract for the purpose of determining the amount of loss sustained by the original purchaser upon his surrender of the annuity contract for a cash consideration." In that case:

> The taxpayer purchased a single premium refund annuity policy for 25x dollars. In 1956, he surrendered the policy for a cash consideration of 10x dollars. The annuity payments received during prior years totaled 15x dollars of which 7x dollars were excluded from gross income under the law applicable at the time of receipt.

Citing Reg. § 1.72-11(d)(1), Rev. Rul. 61-201 reasoned and held:

> It is clear that the contract under consideration is one to which section 72 of the Code applies and that the 10x dollars received by the taxpayer, upon surrender of the contract,

> was "an amount not received as an annuity" under section 72(e) of the Code. It is likewise clear that, where the transaction results in a loss, the same treatment should be afforded the taxpayer as is afforded where the transaction results in a gain. Further, the amount of 7x dollars excluded from gross income in the instant case merely represents a recovery of "basis" (investment) for which adjustment is required under section 1016(a)(1) of the Code, which provides, as far as here pertinent, that proper adjustment in respect of property shall in all cases be made for receipts properly chargeable to capital account.
>
> Accordingly, in determining the amount of loss sustained in the instant case by the original purchaser upon his surrender of a single premium refund annuity contract for a cash consideration, the basis of the contract is its cost (25x dollars) less the amounts previously received under the contract which were properly excludable from the gross income of the recipient under the law applicable at the time of receipt (7x dollars). The excess of the basis thus determined (18x dollars) over the amount received upon surrender of the contract (10x dollars) constitutes an ordinary loss (8x dollars).
>
> I.T. 3567, *supra*, is modified to remove therefrom the implication that the entire amounts of the annuity payments received by the annuitant are deducted from his cost of the annuity contract in computing the amount of loss sustained upon its surrender.
>
> Nothing in this ruling should be construed as permitting a loss deduction on the surrender of any contract other than a refund annuity.

However, Code § 72(b)(3), "Deduction where annuity payments cease before entire investment recovered," provides:[3028]

> (A) *In general*. If-
>
> > (i) after the annuity starting date, payments as an annuity under the contract cease by reason of the death of an annuitant, and
> >
> > (ii) as of the date of such cessation, there is unrecovered investment in the contract,
> >
> > the amount of such unrecovered investment (in excess of any amount specified in subsection (e)(5) which was not included in gross income) shall be allowed as a deduction to the annuitant for his last taxable year.
>
> (B) *Payments to other persons*. In the case of any contract which provides for payments meeting the requirements of subparagraphs (B) and (C) of subsection (c)(2) , the deduction under subparagraph (A) shall be allowed to the person entitled to such payments for the taxable year in which such payments are received.
>
> (C) *Net operating loss deductions provided*. For purposes of section 172 , a deduction allowed under this paragraph shall be treated as if it were attributable to a trade or business of the taxpayer.

[3028] This deduction is not a miscellaneous itemized deduction. See fn 1436 in part II.G.4.n Itemized Deductions; Deductions Disallowed for Purposes of the Alternative Minimum Tax.

Both Rev. Rul. 61-201 and Code § 72(b)(3) seem to involve only dealings between the contract holder and the issuer. Presumably an annuity contract would be a capital asset, given that a life insurance contract, which is also taxed under Code § 72, is a capital asset.[3029] An annuity contract is not excluded from the definition of "capital asset" under Code § 1221.

II.J.19.b. Comparing Annuity to Life Insurance

The preceding subparts within this part II.J.19.a Trusts Holding Annuities explain that any income or growth in an annuity contract generally will be taxed at the earliest moment when the contract distributes cash, with the only recovery of basis occurring either when the annuity is annuitized, cashed out, or when all of the income has already been paid. Furthermore, a nongrantor trust will often pay a 10% penalty on distributions before the beneficiary's death; a nongrantor trust might be able to hold an annuity when it has more than one beneficiary, but whether the 10% penalty applies when a distribution is made after one beneficiary's death may be unclear. An annuity does not receive a basis step-up when passing by reason of death.[3030]

Contrast this with a life insurance contract, from which in most cases distributions are not taxable until after basis is applied to prior distributions. See part II.Q.4.d Income Tax on Distributions or Loans from Contract (Including Surrender of Policy). Furthermore, unless certain rules are violated, death benefits are free from income tax. See parts II.Q.4.b Transfer for Value Rule; Basis and II.Q.4.e Income Tax Issues When the Owner Who Is Not the Insured Dies.

Life insurance contracts are the only assets for which generally I'm comfortable not requiring any payments with respect to financing arrangements before maturity. See part II.Q.4.f Split-Dollar Arrangements.

As described in part II.Q.4.c Income Tax Issues in Transferring Life Insurance; Code § 1035, a life insurance contract may be swapped tax-free into another life insurance, endowment, annuity, or qualified long-term care insurance contract, but an annuity contract may be swapped tax-free only into another annuity or qualified long-term care insurance contract.

Based on a variety of rulings found in part II.Q.4.i.ii.(a) Trust Ownership of Policy (which is found within part II.Q.4.i.ii Summary of Estate Tax Rules Governing Life Insurance Payable to a Business Entity):

- If a trust holds insurance on the trustee's life, the life insurance is included in the insured's taxable estate unless the trustee is screened from all incidents of ownership.

- If a trust holds insurance on a beneficiary's life, the IRS might take the position that life insurance is included in the insured's taxable estate.[3031]

- Looking instead to part II.Q.4.i.ii.(c) Partnership Ownership of Policy: If the trust invests in a partnership that owns life insurance, neither of the above concerns should be an

---

[3029] Rev. Rul. 2009-13, described in fn. 4406 in part II.Q.4.c Income Tax Issues in Transferring Life Insurance; Code § 1035.
[3030] Code § 1014(b)(9)(A).
[3031] See text accompanying and preceding fn 4611 in part II.Q.4.i.ii.(a) Trust Ownership of Policy.

issue. In terms of long-term flexibility, transfers of the life insurance contract itself may raise issues,[3032] but transfers of or changes in partnership interests should not.[3033] See part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance for why and how the partnership should obtain the insured's consent to the life insurance policy. Also see part II.Q.4.b.ii The Impact of Reportable Policy Sale on Transfer for Value Rule if the partnership transfers the policy.

Note also that an annuity contract includes an person whose life is insured; if the contract's investments are less than premiums at the insured's death, the contract boosts its value to premiums paid. I have not researched whether this feature may cause estate inclusion.

II.J.19.c. Long-Term Care

Benefits under a qualified long-term care insurance contract are excludible from income.[3034]

Such benefits must be for "necessary diagnostic, preventive, therapeutic, curing, treating, mitigating, and rehabilitative services, and maintenance or personal care services, which are required by a chronically ill individual, and are provided pursuant to a plan of care prescribed by a licensed health care practitioner.[3035]

Code § 7702B(c)(2), "Chronically ill individual," provides:

(A) *In general*. The term "chronically ill individual" means any individual who has been certified by a licensed health care practitioner as -

(i) being unable to perform (without substantial assistance from another individual) at least 2 activities of daily living for a period of at least 90 days due to a loss of functional capacity,

(ii) having a level of disability similar (as determined under regulations prescribed by the Secretary in consultation with the Secretary of Health and Human Services) to the level of disability described in clause (i), or

(iii) requiring substantial supervision to protect such individual from threats to health and safety due to severe cognitive impairment.

Such term shall not include any individual otherwise meeting the requirements of the preceding sentence unless within the preceding 12-month period a licensed health care practitioner has certified that such individual meets such requirements.

(B) *Activities for daily living*. For purposes of subparagraph (A), each of the following is an activity of daily living:

(i) Eating.

(ii) Toileting.

[3032] See part II.Q.4.b Transfer for Value Rule; Basis.
[3033] See part II.Q.4.b.ii.(g) Transfer of Interest in an Entity Holding Life Insurance.
[3034] Code § 7702B(a)(2).
[3035] Code § 7702B(c)(1).

(iii) Transferring.

(iv) Bathing.

(v) Dressing.

(vi) Continence.

A contract shall not be treated as a qualified long-term care insurance contract unless the determination of whether an individual is a chronically ill individual described in subparagraph (A)(i) takes into account at least 5 of such activities.

Code § 7702B(c)(2), "Maintenance or personal care services," provides:

> The term "maintenance or personal care services" means any care the primary purpose of which is the provision of needed assistance with any of the disabilities as a result of which the individual is a chronically ill individual (including the protection from threats to health and safety due to severe cognitive impairment).

Code § 7702B(d) allows a plan to provide a fixed dollar benefit for each day for which qualified services are provided, without regard to the actual expenditure. For 2022, that amount is $390.[3036]

II.J.19.d. Hybrid - Long-Term Care with Annuity or Life Insurance

In JCX-38-06 (8/3/2006), the Joint Committee on Taxation explained the Pension Protection Act:

> **4. Tax treatment of combined annuity or life insurance contracts with a long-term care insurance feature (secs. 72. 1035, and 7702B and new sec. 6050U of the Code)**
>
> *Present Law*
>
> *Annuity contracts*
>
> In general, earnings and gains on amounts invested in a deferred annuity contract held by an individual are not subject to tax during the deferral period in the hands of the holder of the contract. When payout commences under a deferred annuity contract, the tax treatment of amounts distributed depends on whether the amount is received "as an annuity" (generally, as periodic payments under contract terms) or not.
>
> For amounts received as an annuity by an individual, an "exclusion ratio" is provided for determining the taxable portion of each payment (sec. 72(b)). The portion of each payment that is attributable to recovery of the taxpayer's investment in the contract is not taxed. The taxable portion of each payment is ordinary income. The exclusion ratio is the ratio of the taxpayer's investment in the contract to the expected return under the contract, that is, the total of the payments expected to be received under the contract. The ratio is determined as of the taxpayer's annuity starting date. Once the taxpayer has recovered his or her investment in the contract, all further payments are included in

[3036] Rev. Proc. 2021-45, § 3.61.

income. If the taxpayer dies before the full investment in the contract is recovered, a deduction is allowed on the final return for the remaining investment in the contract (sec. 72(b)(3)).

Amounts not received as an annuity generally are included as ordinary income if received on or after the annuity starting date. Amounts not received as an annuity are included in income to the extent allocable to income on the contract if received before the annuity starting date, i.e., as income first (sec. 72(e)(2)). In general, loans under the annuity contract, partial withdrawals and partial surrenders are treated as amounts not received as an annuity and are subject to tax as income first (sec. 72(e)(4)). Exceptions are provided in some circumstances, such as for certain grandfathered contracts, certain life insurance and endowment contracts (other than modified endowment contracts), and contracts under qualified plans (sec. 72(e)(5)). Under these exceptions, the amount received is included in income, but only to the extent it exceeds the investment in the contract, i.e., as basis recovery first.

Long-term care insurance contracts

Tax treatment

Present law provides favorable tax treatment for qualified long-term care insurance contracts meeting the requirements of section 7702B.

A qualified long-term care insurance contract is treated as an accident and health insurance contract (sec. 7702B(a)(1)). Amounts received under the contract generally are excludable from income as amounts received for personal injuries or sickness (sec. 104(a)(3)). The excludable amount is subject to a dollar cap of $250 per day or $91,250 annually (for 2006), as indexed, on per diem contracts only (sec. 7702B(d)). If payments under such contracts exceed the dollar cap, then the excess is excludable only to the extent of costs in excess of the dollar cap that are incurred for long-term care services. Amounts in excess of the dollar cap, with respect to which no actual costs were incurred for long-term care services, are fully includable in income without regard to the rules relating to return of basis under section 72.

A plan of an employer providing coverage under a long-term care insurance contract generally is treated as an accident and health plan (benefits under which generally are excludable from the recipient's income under section 105).

Premiums paid for a qualified long-term care insurance contract are deductible as medical expenses, subject to a dollar cap on the deductible amount of the premium per year based on the insured person's age at the end of the taxable year (sec. 213(d)(10)). Medical expenses generally are allowed as a deduction only to the extent they exceed 7.5 percent of adjusted gross income (sec. 213(a)).

Unreimbursed expenses for qualified long-term care services provided to the taxpayer or the taxpayer's spouse or dependent are treated as medical expenses for purposes of the itemized deduction for medical expenses (subject to the floor of 7.5 percent of adjusted gross income). Amounts received under a qualified long-term care insurance contract (regardless of whether the contract reimburses expenses or pays benefits on a per diem or other periodic basis) are treated as reimbursement for expense actually incurred for medical care (sec. 7702B(a)(2)).

Definitions

A qualified long-term care insurance contract is defined as any insurance contract that provides only coverage of qualified long-term care services, and that meets additional requirements (sec. 7702B(b)). The contract is not permitted to provide for a cash surrender value or other money that can paid, assigned or pledged as collateral for a loan, or borrowed (and premium refunds are to be applied as a reduction in future premiums or to increase future benefits). Per diem-type and reimbursement-type contracts are permitted.

Qualified long-term care services are necessary diagnostic, preventive, therapeutic, curing treating, mitigating, and rehabilitative services, and maintenance or personal care services that are required by a chronically ill individual and that are provided pursuant to a plan of care prescribed by a licensed health care practitioner (sec. 7702B(c)(1)).

A chronically ill individual is generally one who has been certified within the previous 12 months by a licensed health care practitioner as being unable to perform (without substantial assistance) at least 2 activities of daily (ADLs) for at least 90 days due to a loss of functional capacity (or meeting other definitional requirements) (sec. 7702B(c)(2)).

Long-term care riders on life insurance contracts

In the case of long-term care insurance coverage provided by a rider on or as part of a life insurance contract, the requirements applicable to long-term care insurance contracts apply as if the portion of the contract providing such coverage were a separate contract (sec. 7702B(e)). The term "portion" means only the terms and benefits that are in addition to the terms and benefits under the life insurance contract without regard to long-term care coverage. As a result, if the applicable requirements are met by the long-term care portion of the contract, amounts received under the contract as provided by the rider are treated in the same manner as long-term care insurance benefits, whether or not the payment of such amounts causes a reduction in the contract's death benefit or cash surrender value.

The guideline premium limitation applicable under section 7702(c)(2) is increased by the sum of charges (but not premium payments) against the life insurance contract's cash surrender value, the imposition of which reduces premiums paid for the contract (within the meaning of sec. 7702(f)(1)). Thus, a policyholder can pre-fund to a greater degree a life insurance policy with a long-term care rider without causing the policy to lose its tax-favored treatment as life insurance.

No medical expense deduction generally is allowed under section 213 for charges against the life insurance contract's cash surrender value, unless such charges are includible in income because the life insurance contract is treated as a "modified endowment contract" under section 72(e)(10) and 7702A (sec. 7702B(e)((3)).

Tax-free exchanges of insurance contracts

Present law provides for the exchange of certain insurance contracts without recognition of gain or loss (sec. 1035). No gain or loss is recognized on the exchange of: (1) a life insurance contract for another life insurance contract or for an endowment or annuity contract; or (2) an endowment contract for another endowment contract (that provides for regular payments beginning no later than under the exchanged contract) or for an annuity contract; or (3) an annuity contract for an annuity contract. The basis of the contract received in the exchange generally is the same as the basis of the contract exchanged (sec. 1031(d)). Tax-free exchanges of long-term care insurance contracts are not permitted.

Capitalization of certain policy acquisition expenses of insurance companies

In the case of an insurance company, specified policy acquisition expenses for any taxable year are required to be capitalized, and are amortized generally over the 120-month period beginning with the first month in the second half of the taxable year (sec. 848). Specified policy acquisition expenses are determined as that portion of the insurance company's general deductions for the taxable year that does not exceed a specific percentage of the net premiums for the taxable year on each of three categories of insurance contracts. For annuity contracts, the percentage is 1.75; for group life insurance contracts, the percentage is 2.05; and for all other specified insurance contracts, the percentage is 7.7. With certain exceptions, a specified insurance contract is any life insurance, annuity, or noncancellable accident and health insurance contract or combination thereof.

Explanation of Provision

The provision provides tax rules for long-term care insurance that is provided by a rider on or as part of an annuity contract, and modifies the tax rules for long-term care insurance coverage provided by a rider on or as part of a life insurance contract.

Under the provision, any charge against the cash value of an annuity contract or the cash surrender value of a life insurance contract made as payment for coverage under a qualified long-term care insurance contract that is part of or a rider on the annuity or life insurance contract is not includable in income. The investment in the contract is reduced (but not below zero) by the charge.

The provision expands the rules for tax-free exchanges of certain insurance contracts. The provision provides that no gain or loss is recognized on the exchange of a life insurance contract, an endowment contract, an annuity contract, or a qualified long-term care insurance contract for a qualified long-term care insurance contract. The provision provides that a contract does not fail to be treated as an annuity contract, or as a life insurance contract, solely because a qualified long-term care insurance contract is a part of or a rider on such contract, for purposes of the rules for tax-free exchanges of certain insurance contracts.

The provision provides that, except as otherwise provided in regulations, for Federal tax purposes, in the case of a long-term care insurance contract (whether or not qualified) provided by a rider on or as part of a life insurance contract or an annuity contract, the portion of the contract providing long-term care insurance coverage is treated as a separate contract. The term "portion" means only the terms and benefits under a life insurance contract or annuity contract that are in addition to the terms and benefits under the contract without regard to long-term care coverage. As a result, if the applicable requirements are met by the long-term care portion of the contract, amounts received under the contract as provided by the rider are treated in the same manner as long-term care insurance benefits, whether or not the payment of such amounts causes a reduction in the life insurance contract's death benefit or cash surrender value or in the annuity contract's cash value.

No deduction as a medical expense is allowed for any payment made for coverage under a qualified long-term care insurance contract if the payment is made as a charge against the cash value of an annuity contract or the cash surrender value of a life insurance contract.

The provision provides that, for taxable years beginning after December 31, 2009, the guideline premium limitation is not directly increased by charges against a life insurance contract's cash surrender value for coverage under the qualified long-term care insurance portion of the contract. Rather, because such charges are not included in the holder's income by reason of new section 72(e)(11),[196] the charges reduce premiums paid under section 7702(f)(1), for purposes of the guideline premium limitation of section 7702. The amount by which premiums paid (under 7702(f)(1)) are reduced under this rule is intended to be the sum of any charges (but not premium payments) against the life insurance contract's cash surrender value (within the meaning of section 7702(f)(2)(a)) for long-term care coverage made to that date under the contract. For taxable years beginning before January 1, 2010, the present-law rule of section 7702B(e)(2) before amendment by the bill (the so-called "pay-as-you-go" rule) increases the guideline premium limitation by this same amount, reduced by charges the imposition of which reduces the premiums paid under the contract. Thus, the provision of the bill recreates the result of the "pay-as-you-go" rule (which is repealed by the provision) as a reduction in premiums paid rather than as an increase in the guideline premium limitation.

[196] Because such charges are not included in the holder's income under new section 72(e)(11), the effect would be to increase the guideline premium limitation under present-law section 7702B(e)(2)(A) by the amount of the charges and simultaneously to reduce it by the same charges under section 7702B(e)(2)(B). Such charges that are not included in income serve to reduce premiums paid under section 7702(f)(1), and therefore would cancel each other out under 7702B(e)(2)(A) and (B).

The provision provides that certain retirement-related arrangements are not treated as annuity contracts, for purposes of the provision.

The provision requires information reporting by any person who makes a charge against the cash value of an annuity contract, or the cash surrender value of a life insurance contract, that is excludible from gross income under the provision. The information required to be reported includes the amount of the aggregate of such charges against each such contract for the calendar year, the amount of the reduction in the investment in the contract by reason of the charges, and the name, address, and taxpayer identification number of the holder of the contract. A statement is required to be furnished to each individual identified in the information report. Penalties apply for failure to file the information report or furnish the statement required under the provision.

The provision modifies the application of the rules relating to capitalization of policy acquisition expenses of insurance companies. In the case of an annuity or life insurance contract that includes a qualified long-term care insurance contract as a part of or rider on the annuity or life insurance contract, the specified policy acquisition expenses that must be capitalized is determined using 7.7 percent of the net premiums for the taxable year on such contracts.

The provision clarifies that, effective as if included in the Health Insurance Portability and Accountability Act of 1996 (when section 7702B was enacted), except as otherwise provided in regulations, for Federal tax purposes (not just for purposes of section 7702B), in the case of a long-term care insurance contract (whether or not qualified) provided by a rider on or as part of a life insurance contract, the portion of the contract providing long-term care insurance coverage is treated as a separate contract.

Effective Date

The provisions are effective generally for contracts issued after December 31, 1996, but only with respect to taxable years beginning after December 31, 2009. The provisions relating to tax-free exchanges apply with respect to exchanges occurring after December 31, 2009. The provision relating to information reporting applies to charges made after December 31, 2009. The provision relating to policy acquisition expenses applies to specified policy acquisition expenses determined for taxable years beginning after December 31, 2009. The technical amendment relating to long-term care insurance coverage under section 7702B(e) is effective as if included with the underlying provisions of the Health Insurance Portability and Accountability Act of 1996.

As of January 3, 2022, Code § 7702B(e), "Treatment of coverage provided as part of a life insurance or annuity contract," had not been amended and provides in part:

Except as otherwise provided in regulations prescribed by the Secretary, in the case of any long-term care insurance coverage (whether or not qualified) provided by a rider on or as part of a life insurance contract or an annuity contract -

(1) *In general*. This title shall apply as if the portion of the contract providing such coverage is a separate contract.

(2) *Denial of deduction under section 213*. No deduction shall be allowed under section 213(a) for any payment made for coverage under a qualified long-term care insurance contract if such payment is made as a charge against the cash surrender value of a life insurance contract or the cash value of an annuity contract.

(3) *Portion defined*. For purposes of this subsection, the term "portion" means only the terms and benefits under a life insurance contract or annuity contract that are in addition to the terms and benefits under the contract without regard to long term care insurance coverage.

(4) *Annuity contracts to which paragraph (1) does not apply*. For purposes of this subsection, none of the following shall be treated as an annuity contract:

(A) A trust described in section 401(a) which is exempt from tax under section 501(a).(B) FTC A contract -

(i) purchased by a trust described in subparagraph (A)

(ii) purchased as part of a plan described in section 403(a),

(iii) described in section 403(b),

(iv) provided for employees of a life insurance company under a plan described in section 818(a)(3) , or

(v) from an individual retirement account or an individual retirement annuity.

(C) A contract purchased by an employer for the benefit of the employee (or the employee's spouse).

Any dividend described in section 404(k) which is received by a participant or beneficiary shall, for purposes of this paragraph, be treated as paid under a separate contract to which subparagraph (B)(i) applies.

Code § 72(e)(11), "Special rules for certain combination contracts providing long-term care insurance," provides:

Notwithstanding paragraphs (2), (5)(C), and (10), in the case of any charge against the cash value of an annuity contract or the cash surrender value of a life insurance contract made as payment for coverage under a qualified long-term care insurance contract which is part of or a rider on such annuity or life insurance contract -

(A) the investment in the contract shall be reduced (but not below zero) by such charge, and

(B) such charge shall not be includible in gross income.

Thus, although normally distributions from an annuity contract are income before using basis, the portion of an annuity contract used to buy long-term care insurance come from basis first.

However, generally IRAs and qualified retirement plans cannot be rolled into a qualified long-term care policy.[3037]

[3037] Code § 7702B(e)(4), "Annuity contracts to which paragraph (1) does not apply, provides:
For purposes of this subsection, none of the following shall be treated as an annuity contract:
(A) A trust described in section 401(a) which is exempt from tax under section 501(a).
(B) A contract-
(i) purchased by a trust described in subparagraph (A),
(ii) purchased as part of a plan described in section 403(a),
(iii) described in section 403(b),
(iv) provided for employees of a life insurance company under a plan described in section 818(a)(3), or
(v) from an individual retirement account or an individual retirement annuity.
(C) A contract purchased by an employer for the benefit of the employee (or the employee's spouse).
Any dividend described in section 404(k) which is received by a participant or beneficiary shall, for purposes of this paragraph, be treated as paid under a separate contract to which subparagraph (B)(i) applies.

II.J.20. Other Special Purpose Trusts

See part II.D Special Purpose Trusts, which includes parts II.D.1 Trust as a Business Entity, II.D.2 Business Entity as Grantor of Tru, II.D.3 Trust as Grantor or Deemed Owner of Another Trust, II.D.4 Disregarding Multiple Owner Trust for Income Tax Purposes, II.D.5 Severing Trusts with Multiple Grantors, II.D.6 Land Trusts, and II.D.7 Sham Trusts.

II.K. Passive Loss Rules

II.K.1. Passive Loss Rules Generally

Although owners of partnerships and S corporations generally can deduct losses, subject to various basis and at-risk limitations, a passive loss from a trade or business[3038] is deductible only against other passive income[3039] or when the activity that generated the loss is sold[3040] in full.[3041] *Williams v. Commissioner*, T.C. Memo. 2015-76, *aff'd* 637 Fed. Appx. 799 (5th Cir. 2016) ("In conclusion, we AFFIRM the decision of the Tax Court essentially for the reasons set out therein"), rejected a shareholder's argument that S corporation income is not subject to the passive losses because Code § 469 does not directly apply to S corporations, holding:

> Since S corporations and other passthrough entities do not pay tax, section 469 need not identify them as "taxpayers" to whom it applies, because the individual shareholders of an S corporation are the taxpayers to whom section 469 applies. The Court has previously recognized that income and losses from passthrough entities are subject to section 469, even though passthrough entities are not specifically included in the list of "taxpayers" to whom section 469 is applicable. See, *e.g.*, *Harnett v. Commissioner*, T.C. Memo. 2011-191 (applying section 469 to losses attributable to rental properties owned by an S corporation), *aff'd*, 496 Fed. Appx. 963 (11th Cir. 2012); *Dunn v. Commissioner*, T.C. Memo. 2010-198 (analyzing the grouping rules of section 469 with respect to various entities, including an S corporation); *Shaw v. Commissioner*, T.C. Memo. 2002-35 (applying section 469 and section 1.469-2(f)(6), Income Tax Regs., in various contexts, including the context of property leased by an S corporation); *Sidell v. Commissioner*, T.C. Memo. 1999-301 (holding income received via grantor trusts and reported as a passthrough item on taxpayers' Federal income tax returns was subject to section 469). The law is well settled in this area, and in numerous cases the Court has

---

[3038] A mortgage or banking activity is a trade or business subject to the passive loss rules. INFO 2009-0229.

[3039] Code § 469(d)(1)(B).

[3040] Code § 469(g)(1), (3). Worthless stock is considered disposed of for purposes of this rule. See fn. 1182. A foreclosure on real property subject to recourse debt comprising a taxpayer's entire interest in a passive (or former passive) activity qualifies as a fully taxable disposition for purposes of Code § 469(g)(1)(A), even if the foreclosure triggers cancellation of indebtedness (COD) income that is excluded from gross income under Code § 108(a)(1)(B). CCA 201415002. However, if partnership property is foreclosed upon, the partnership lists the property as an asset on its tax returns, and the partnership is pursuing counterclaims, the foreclosure does not constitute a disposition. *Herwig v. Commissioner*, T.C. Memo. 2014-95 (accuracy-related penalties imposed when taxpayer did not introduce evidence of reasonable cause for taking the position).
Although a QSST's disposition of stock is taxable to the trust (see part II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets), the trust's disposition is treated as a disposition by the beneficiary for purposes of Code §§ 465 and 469. Code § 1361(d)(1)(C).

[3041] Code § 469(g)(1)(A) triggers losses only if all gain or loss on the disposition be recognized. Code § 469(g)(3) provides special rules when the entire interest is sold but when Code § 453 defers gain recognition. For more details, see part II.K.1.j Complete Disposition of Passive Activity.

applied the passive loss limitations of section 469 to individuals who receive income from passthrough entities.

Passive income does not include gross income from interest, dividends, annuities, or royalties not derived in the ordinary course of a trade or business.[3042]

The material participation rules are based on the number of hours the taxpayer participates in the activity[3043] and therefore encourage taxpayers to group businesses together as one activity (so that the hours from various activities can be aggregated to meet the necessary threshold).[3044] On the other hand, the complete allowance of a loss on the sale of an activity discourages grouping, since selling only part of the grouped activity will not be a complete disposition.

A passive income generator tends to be viewed favorably, in that it allows passive losses to be deducted. However, given the 3.8% tax on passive investment for high-income taxpayers and trusts,[3045] generating passive income in excess of losses might lead to unfavorable tax results. Thus, taxpayers might seek to transform passive income into nonpassive income, if they can do so without disallowing passive losses or triggering self-employment tax.[3046] Further below is a discussion of when passive income would be recharacterized as nonpassive income, in the IRS' efforts to minimize passive income against which passive losses can be deducted.[3047]

Conversely, although limitations on using net passive losses might not save regular income tax on nonpassive income, an abundance of passive losses can be helpful to the extent that they prevent passive business income from being subjected to the 3.8% tax on net investment income.[3048]

II.K.1.a. Counting Work as Participation in Business under the Passive Loss Rules

II.K.1.a.i. Taxpayer Must Own an Interest in the Business to Count Work in the Business

An individual needs to own an interest in an activity for the individual's work to count as participation.[3049] When counting hours that a taxpayer performs services in real property trades

[3042] Code § 469(e)(1)(A)(i)(I).
[3043] See part II.K.1.a Counting Work as Participation.
[3044] See part II.K.1.b Grouping Activities.
[3045] See part II.I 3.8% Tax on Excess Net Investment Income.
[3046] See part II.L.2.a Types of Income Subject to Self-Employment Tax.
[3047] See part II.K.1.i Recharacterization of Passive Income Generators (PIGs) as Nonpassive Income.
[3048] See generally part II.I 3.8% Tax on Excess Net Investment Income (NII).
[3049] Reg. § 1.469-5(f)(1) provides:

> *In general*. Except as otherwise provided in this paragraph (f), any work done by an individual (without regard to the capacity in which the individual does the work) in connection with an activity in which the individual owns an interest at the time the work is done shall be treated for purposes of this section as participation of the individual in the activity.

Neither the final regulation nor Reg. § 1.469-5T(f) promulgate other paragraphs that qualify this rule. The parentheticals at the end of Reg. § 1.469-5T(a)(2), (3) imply that participation is done only by an owner.
To drive home the ownership requirement, Reg. § 1.469-5T(k), Example (6) provides:

> The facts are the same as in example (5), except that D does not acquire any stock in the S corporation until 1994. Under paragraph (f)(1) of this section, D is not treated as participating in

or businesses during a taxable year, personal services performed as an employee count only if the employee is a 5% owner.[3050] If an individual and a trust of which that person is the deemed owner under the grantor trust rules[3051] are the sole partners of a partnership, the partnership is disregarded[3052] and the individual is the sole taxpayer for purposes of applying Code § 469;[3053] a partnership of grantor trusts is similarly disregarded.[3054]

A taxpayer's activities include those conducted through C corporations that are subject to Code § 469, S corporations, and partnerships.[3055]

The owner in an interest in an organization may materially participate in the activities of a wholly owned subsidiary of the organization.[3056]

> the activity for any taxable year prior to 1994 because D does not own an interest in the activity for any such taxable year. Accordingly, D materially participates in the activity for only one taxable year prior to 1995, and D is not treated under paragraph (a)(5) of this section as materially participating in the activity for 1995 or subsequent taxable years.

Example (5) to which this example refers is Reg. § 1.469-5(k), Example (5):

> In 1993, D, an individual, acquires stock in an S corporation engaged in a trade or business activity (within the meaning of § 1.469-1(e)(2)). For every taxable year from 1993 through 1997, D is treated as materially participating (without regard to § 1.469-5T(a)(5)) in the activity. D retires from the activity at the beginning of 1998, and would not be treated as materially participating in the activity for 1998 and subsequent taxable years if material participation for those years were determined without regard to § 1.469-5T(a)(5). Under § 1.469-5T(a)(5) of this section, however, D is treated as materially participating in the activity for taxable years 1998 through 2003 because D materially participated in the activity (determined without regard to § 1.469-5T(a)(5) for five taxable years during the ten taxable years that immediately precede each of those years. D is not treated under § 1.469-5T(a)(5) as materially participating in the activity for taxable years beginning after 2003 because for those years D has not materially participated in the activity (determined without regard to § 1.469-5T(a)(5) for five of the last ten immediately preceding taxable years.

[3054] Letter Rulings 9515006, 9515008, 9515009, and 9515013.
[3055] Reg. § 1.469-4(a). *Schwalbach v. Commissioner*, 111 T.C. 215 (1998), held that this regulation is valid and applied it to count activity through a C corporation that was subject to Code § 469 even though the regulation was promulgated in the context of grouping activities together. Presumably it reached that result because grouping of activities is mandatory to a certain extent; see Reg. § 1.469-4(d)(5)(i), which provides:

> *In general*. A C corporation subject to section 469, an S corporation, or a partnership (a section 469 entity) must group its activities under the rules of this section....

Williams v. Commissioner, T.C. Memo. 2015-76, *aff'd* 117 A.F.T.R.2d 2016-600 (5th Cir. 2/2/2016), reaffirmed the *Schwalbach* holding that Reg. § 1.469-4(a) is valid.
[3056] Letter Ruling 201029014.

II.K.1.a.ii. Material Participation

An individual shall be treated as materially participating in an activity for the taxable year if and only if:[3057]

(1) The individual participates in the activity for more than 500 hours during such year;[3058]

(2) The individual's participation in the activity for the taxable year constitutes substantially all of the participation in such activity of all individuals (including individuals who are not owners of interests in the activity) for such year, <u>if the owner is not a limited partner</u>;[3059]

(3) The individual participates in the activity for more than 100 hours during the taxable year, and such individual's participation in the activity for the taxable year is not less than the participation in the activity of any other individual (including individuals who are not owners of interests in the activity) for such year,[3060] <u>if the owner is not a limited partner</u>;[3061]

[3057] Reg. § 1.469-5T(a). *Mordkin v. Commissioner*, T.C. Memo. 1996-187, rebuffed a taxpayer's claim that the quantitative tests in the following bullet points are invalid.

[3058] Reg. § 1.469-5T(a)(1).

[3059] Reg. § 1.469-5T(a)(2). *Windham v. Commissioner*, T.C. Memo. 2017-068, found that the taxpayer satisfied this test:

> Petitioner ran her rental real estate activities by herself. She handled all aspects of the business from collecting rent to overseeing the work of repairmen. She also met prospective buyers and handled problems with utility and service companies. While petitioner did not physically perform all of the repairs that were necessary at each of those rental properties, she hired multiple contractors and repairmen to handle those repairs. With the repairs made and the number of different individuals involved in those repairs, no one individual participated in the rental real estate activities to the extent petitioner did. The Court is satisfied by petitioner's testimony and other evidence that her participation in each of those activities constituted substantially all of the participation in each.

However, that taxpayer did not fare quite as well for a vacant lot:

> The Lynn Haven property was a vacant lot in which petitioner had a 50% ownership interest. She spent approximately 12 hours meeting with an attorney and the other owner of the vacant lot discussing whether to develop or sell the vacant lot. There is nothing in the record about the participation hours of the other owner of the vacant lot. Petitioner has failed to prove that her participation constituted substantially all of the participation in the activity.

[3060] Hiring a management company undermines this test if any management company employee works more than the owner, as was the case in *Schumann v. Commissioner*, T.C. Memo. 2014-138. The taxpayer satisfied this test in *Kline v. Commissioner*, T.C. Memo. 2015-144; having a variety of employees (and documenting the hours they worked) helped assure that no employee's work exceeded the work of the taxpayer and spouse (see part II.K.1.a.iii Spousal Participation).

[3061] Reg. § 1.469-5T(a)(3).

(4) The activity is a significant participation activity[3062] for the taxable year, and the individual's aggregate participation in all significant participation activities during such year exceeds 500 hours, if the owner is not a limited partner;[3063]

(5) The individual materially participated in the activity (determined without regard to this bullet point) for any five taxable years (whether or not consecutive) during the ten taxable years that immediately precede the taxable year;[3064]

(6) The activity is a personal service activity, and the individual materially participated in the activity for any three taxable years (whether or not consecutive) preceding the taxable year;[3065] or

(7) Based on all of the facts and circumstances, the individual participates in the activity on a regular, continuous, and substantial basis during such year, if the owner is not a limited partner.[3066]

The facts and circumstances rule of (7) above is governed by Reg. § 1.469-5T(b)(2), does not specify the facts and circumstances but applies the following rules in determining the facts and circumstances: The fact that an individual satisfies the requirements of any participation standard (whether or not referred to as "material participation") under any provision other than the passive loss rules shall not be taken into account in determining whether such individual materially participates for purposes of the passive loss rules. Furthermore, an individual's services performed in the management of an activity shall not be taken into account in determining whether such individual is treated as materially participating in such activity for the taxable year under this "facts and circumstances" rule unless, for such taxable year:

[3062] Reg. § 1.469-5T(c) provides that an activity is a significant participation activity of an individual if and only if such activity is a trade or business activity (within the meaning of Reg. § 1.469-1T(e)(2)) in which the individual participates for more than 100 hours during the taxable year and would be an activity in which the individual does not materially participate for the taxable year if material participation for such year were determined without regard to the significant participation activity rules. This is elaborated on in the text accompanying and following fn 3073.

[3063] Reg. § 1.469-5T(a)(4). To better understand how to apply the significant participation test, consider the following: Assume T, an individual, has $500,000 in taxable income for the taxable year, and is the sole owner of S corporations 1, 2, and 3, which are engaged in trade or business Activities 1, 2, and 3 respectively. Business 1 has at least one full-time employee. T participates 400 hours in Activity 1, 90 hours in Activity 2, and 90 hours in Activity 3, which is the same kind of trade or business as Activity 2, but is a different business. If T does not group Activity 2 with Activity 3, then the material participation test is not satisfied, and the net income from Activity 1 is nonpassive (see part II.K.1.i Recharacterization of Passive Income Generators (PIGs) as Nonpassive Income, particularly fns. 3255-3260) and the net loss from Activity 1 and net income or loss from Activities 2 and 3 are passive. If T groups Activity 2 with Activity 3, then the significant participation activity is satisfied, and all of the income or loss from Activities 1, 2, and 3 is nonpassive.

[3064] Reg. § 1.469-5T(a)(5).

[3065] Reg. § 1.469-5T(a)(6) refers to Reg. § 1.469-5T(d), which provides:

Personal service activity. An activity constitutes a personal service activity for purposes of paragraph (a)(6) of this section if such activity involves the performance of personal services in-

(1) The fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting; or

(2) Any other trade or business in which capital is not a material income-producing factor.

[3066] Reg. § 1.469-5T(a)(7).

- no person (other than such individual) who performs services in connection with the management of the activity receives prohibited compensation (wages, salaries, or professional fees, and other amounts received as compensation for personal services actually rendered) in consideration for such services, and

- no individual performs services in connection with the management of the activity that exceed (by hours) the amount of such services performed by such individual.

Finally, the individual must participate in the activity for more than 100 hours during the taxable year. Grouping may push the taxpayer over this threshold. *Wade v. Commissioner*, T.C. Memo. 2014-169, is a great example of the founder letting others run the business on-site, yet continuing to participate:

> With Ashley [taxpayer's son] there to handle day-to-day management, Mr. Wade became more focused on product and customer development. He did not have to live near business operations to perform these duties, so petitioners moved to Navarre, Florida. After the move he continued to make periodic visits to the facilities in Louisiana and regularly spoke on the phone with plant personnel.
>
> In 2008 TSI and Paragon began struggling financially as prices for their products plummeted and revenues declined significantly. Mr. Wade's involvement in the businesses became crucial during this crisis. To boost employee morale, he made three trips to the companies' industrial facility in DeQuincy, Louisiana, during which he assured the employees that operations would continue. He also redoubled his research and development efforts to help TSI and Paragon recover from the financial downturn. During this time Mr. Wade invented a new technique for fireproofing polyethylene partitions, and he developed a method for treating plastics that would allow them to destroy common viruses and bacteria on contact. In addition to his research efforts, Mr. Wade ensured the companies' financial viability by securing a new line of credit. Without Mr. Wade's involvement in the companies, TSI and Paragon likely would not have survived.

Barbara v. Commissioner, T.C. Memo. 2019-50, accepted a combination of regular in-person participation at the owner's place of business (in Illinois) outside the owner's resident state and regular long-distance participation from the owner's residence (in Florida). The facts were:

> During the years 2009-12 Mr. Barbara split his time between Chicago and Florida. For each year he was in Chicago 40% of his time and in Florida 60% of his time. He worked at least 200 days in a year, proportioned between Chicago and Florida on a 40/60 basis.
>
> When in Chicago, Mr. Barbara lived either in his house in Oak Brook or his condominium on Chicago's North Side. He was in the Chicago office for about 5-3/4 hours each work day. When there he was working on the lending business. He kept a regular schedule. Therefore, he was in the Chicago office at least 460 hours per year working on the lending business, computed as follows:
>
> 200 days x 40% × 5.75 hours = 460 hours per year
>
> When in Florida, Mr. Barbara lived in a house that he had purchased in 1995. He called the Chicago office every day when it opened at 9 a.m. He also communicated with the office at other times, through telephone, fax, and e-mail. He averaged at least two hours

of work per day on the lending business while in Florida. This means that he worked at least 240 hours per year on the lending business while he lived in Florida, computed as follows:

200 days × 60% × 2 hours = 240 hours per year

The court concluded:

> For each year Mr. Barbara's total hours participating in the lending business were (1) 460 hours or more while in Chicago and (2) 240 hours or more while in Florida. Thus his total hours participating in the lending business each year were 700 or more. This exceeds the 100-hour threshold that is part of the seventh regulatory test.
>
> Both while he was in Chicago and in Florida, Mr. Barbara's participation in the lending business was regular, continuous, and substantial.
>
> The seventh regulatory test is therefore met.

Reg. § 1.469-5(j)(1), : In general," provides:

> For purposes of § 1.469-5T(a)(5) and (6), a taxpayer has materially participated in an activity for a preceding taxable year if the activity includes significant section 469 activities that are substantially the same as significant section 469 activities that were included in an activity in which the taxpayer materially participated (determined without regard to § 1.469-5T(a)(5)) for the preceding taxable year.

Referring to Reg. § 1.469-5(j)(1), *Rogerson v. Commissioner*, T.C. Memo. 2022-49, explains:

> In other words, if there is substantial similarity between the current-year activity and activities that the taxpayer materially participated in during a preceding year, then that preceding year counts as one year in applying the five of ten test to the current-year activity. See *id*. If there is substantial similarity between the current-year activity and activities that the taxpayer materially participated in for five of the last ten years, then the five of ten test is satisfied and the taxpayer is treated as materially participating in the current year-activity for the current year. See *id*.; Temp. Treas. Reg. § 1.469-5T(a)(5).
>
> The history of Treasury Regulation § 1.469-5(j)(1) confirms this interpretation. When temporary regulations first established the five of ten test in 1988, they did not initially address how the test should apply to a situation in which an individual's business activities evolve during the ten-year period. See T.D. 8175, 1988-1 C.B. at 203; see also T.D. 8253, 1989-1 C.B. 121, 122 (noting the omission). In 1989, however, the Department of the Treasury (Treasury) and the IRS[18] issued additional temporary regulations under section 469 (1989 amendments). The 1989 amendments added Temporary Treasury Regulation § 1.469-4T to define the concept of an "activity" for purposes of section 469. See T.D. 8253, 1989-1 C.B. at 122–23. The definition included the concept of an "undertaking," which was the smallest unit that could constitute an activity. *Id* at 122.
>
> [18] For simplicity, we refer to both Treasury and the IRS as "Treasury."
>
> As relevant here, the 1989 amendments also made certain changes to Temporary Treasury Regulation § 1.469-5T, including adding paragraph (j)(1), T.D. 8253, 1989-

1 C.B. at 158, the precursor to Treasury Regulation § 1.469-5(j)(1). The preamble to the 1989 amendments explained the new rule as follows:

> Under § 1.469-4T, the business and rental operations that constitute an activity may change from year to year. The existing regulations do not address how the material participation tests that are based on participation in prior years will apply in cases in which such changes occur. Accordingly, this document amends § 1.469-5T to provide that, for purposes of the material participation tests that are based on participation in prior years, a taxpayer is treated as materially participating in an activity for a prior taxable year if the activity includes an undertaking involving substantially the same operations as an undertaking that was included in an activity in which the taxpayer materially participated during such prior taxable year.

T.D. 8253, 1989-1 C.B. at 126. The text of the temporary rule tracked the preamble's explanation:

> For purposes of [the five of ten test], a taxpayer has materially participated in an activity for a preceding taxable year if such activity includes an undertaking that involves substantially the same business and rental operations as an undertaking that was included in an activity in which the taxpayer materially participated...for such preceding taxable year.

Temp. Treas. Reg. § 1.469-5T(j)(1), T.D. 8253, 1989-1 C.B. at 158. Like the current rule, therefore, the rule issued as part of the 1989 amendments required a comparison of the taxpayer's current-year activity to his preceding-year activity. If the activities were sufficiently similar - *i.e.*, if they included undertakings that involved similar business operations - and if the taxpayer materially participated in the preceding-year activity, then the taxpayer would also be treated as materially participating in the current-year activity during the preceding year. See *id*.

By 1992, Treasury determined that the 1989 definition of activity, including the concept of undertaking, was too complicated and mechanical and that a more flexible approach was required. See Limitation on Passive Activity Losses and Credits—Definition of Activity, 57 Fed. Reg. 20,802, 20,803 (proposed May 15, 1992). As a result, Treasury issued Proposed Treasury Regulation § 1.469-4, 57 Fed. Reg. at 20,804, to replace Temporary Treasury Regulation § 1.469-4T.

Simultaneously, Treasury finalized other parts of the 1989 amendments, including the clarification of the five of ten test that previously appeared at Temporary Treasury Regulation § 1.469-5T(j)(1). T.D. 8417, 1992-1 C.B. 173, 186.[19] Treasury did not, however, finalize the original temporary regulations - *i.e.*, rules that were issued in 1988 and not amended in 1989. Those regulations, which include the seven regulatory tests for determining material participation and certain related rules, continued in their temporary form. Thus, today, the five of ten test appears in a temporary regulation, while the rule explaining how the five of ten test should be applied appears in a final regulation.

[19] Treasury finalized the 1989 amendments to avoid potential disputes about whether they would expire under section 7805(e)(2), which provides that all temporary regulations expire three years after the date they are issued. See T.D. 8417, 1992-1 C.B. at 174. Section 7805(e)(2) was enacted in 1988 and applies only to temporary

regulations issued after November 20, 1988. See Technical and Miscellaneous Revenue Act of 1988, Pub. L. No. 100-647, § 6232, 102 Stat. 3342, 3734. Accordingly, section 7805(e)(2) potentially applied to the 1989 amendments, but not to the original temporary regulations. See T.D. 8175, 1988-1 C.B. at 233-34.

When it was finalized in 1992, the rule explaining how the five of ten test should be applied was modified slightly to its current form, essentially replacing the concept of an "undertaking" with that of a "significant section 469 activit[y]." See Treas. Reg. § 1.469-5(j)(1). In describing the change, Treasury stated:

> The final regulations generally adopt the amendments as originally proposed. They only make certain minor technical modifications to the amendments, including changes that conform them to the proposed regulations under § 1.469-4, relating to the definition of activity.

T.D. 8417, 1992-1 C.B. at 174.

Thus, the differences between the explanatory rule as originally proposed at Temporary Treasury Regulation § 1.469-5T(j)(1) and the final rule at Treasury Regulation § 1.469-5(j)(1) were not intended to be significant. And while the final rule's phrasing is somewhat convoluted, the text and regulatory history leave us with no doubt regarding its meaning. Specifically, the rule provides that even if a taxpayer's mix of activity changes over time, the taxpayer is treated as materially participating in a current-year activity if that activity substantially overlaps with activities that the taxpayer materially participated in for five of the last ten years. See Treas. Reg. § 1.469-5(j)(1); Temp. Treas. Reg. §. 1.469-5T(a)(5). As one commentator put it, "any significant overlap between activities for different tax years causes them to be treated as the same activity for purposes of the 5-out-of-10-years test." Libin Zhang, Passive Loss Rules, 549-3rd Tax Mgmt. (BNA), at IV.A.5.

The court reasoned and held:

> Mr. Rogerson's argument is foreclosed by Treasury Regulation § 1.469-5(j)(1). As discussed in detail in Opinion Part II.B.1 above, that rule does not require the taxpayer's precise activity to have existed in prior years for purposes of applying the five of ten test. Indeed, the entire point of the rule is to address situations in which circumstances change over time. The rule applies as long as the taxpayer's current-year activity (here, RAEG) "includes significant section 469 activities" (here, the RAEG product lines or RAEG as a whole) "that are substantially the same as significant section 469 activities there were included in [a preceding-year activity] in which the taxpayer materially participated" (here, the aerospace business as a whole). In other words, all that is required is substantial overlap between the current and preceding-year activities. The record here leaves no doubt that the activity conducted by RAEG in 2014, 2015, and 2016 overlaps substantially with the "single activity" reflected on RAC's prior returns - *i.e.*, the aerospace business as a whole.

Rogerson v. Commissioner, 132 A.F.T.R.2d 2023-6624 (9th Cir. 11/30/2023), affirmed:

> The tax court did not err in finding that Rogerson materially participated in Rogerson Aircraft Equipment Group ("RAEG") in 2014, 2015, and 2016 under I.R.C. § 469(h)(1). "Congress enacted Section 469 of the Internal Revenue Code to prevent taxpayers from

> applying losses from rental properties and other passive business activities to offset and shelter non-passive income, such as wages." *Beecher v. Comm'r*, 481 F.3d 717, 721 (9th Cir. 2007). Generally, "[t]he term `passive activity' means any activity - (A) which involves the conduct of any trade or business, and (B) in which the taxpayer does not materially participate." I.R.C. § 469(c)(1). A taxpayer's participation in an activity is "material" if his involvement in the operations of the activity is regular, continuous, and substantial. *Id*. § 469(h)(1).
>
> The tax court made extensive factual findings regarding Rogerson's activity as Chief Executive Officer of RAEG during the relevant years. Based on the undisputed factual record of Rogerson's involvement in RAEG, the tax court found that Rogerson materially participated in RAEG in 2014, 2015, and 2016 under I.R.C. § 469(h)(1). Rogerson's primary rebuttal to the tax court's finding is that RAEG "did not require much of [Rogerson's] time." However, the tax court rejected this argument in its reasoning:
>
>> Mr. Rogerson's ability to respond to detailed inquiries so quickly shows his detailed knowledge of every aspect of the business. Indeed, many of Mr. Rogerson's communications reflect first-hand experience with RAEG's employees, customers, and products that extends far beyond what could have been acquired by a passive investor.
>
> Moreover, I.R.C. § 469(h) does not impose a minimal-hours requirement to find that a taxpayer's participation is material, only that the participation be regular, continuous, and substantial. "Under the clearly erroneous standard, if the tax court's account of the evidence is plausible in light of the record viewed in its entirety, the court of appeals may not reverse it even though convinced that had it been sitting as the trier of fact, it would have weighed the evidence differently." *Wolf v. Comm'r*, 4 F.3d 709, 712-13 (9th Cir. 1993) (cleaned up). Accordingly, we affirm the tax court's finding that Rogerson materially participated in RAEG for 2014, 2015, and 2016 under I.R.C. § 469(h)(1).[2]
>
> [2] Since we affirm the tax court's finding that Rogerson materially participated in RAEG based on the text of I.R.C. § 469, we do not reach Rogerson's additional arguments regarding the validity, constitutionality, or the tax court's application of the 1988 temporary regulations, Temp. Treas. Reg. § 1.469-5T(a), which were not dispositive to the tax court's ruling. See *Fireman's Fund Ins. Co. v. Int'l Mkt. Place*, 773 F.2d 1068, 1070 (9th Cir. 1985) ("[A]n appellate court typically will address only those arguments that are necessary to reach its result.").

Note that some of the tests above apply only if the owner is not a limited partner.[3067] These differences arise from the statutory prohibition against limited partners being treated as materially participating except as provided in regulations.[3068] A member in an LLC is not

[3067] Reg. § 1.469-5T(e) defines a "limited partnership interest" and allows limited partners to be treated as materially participating if they qualify under Reg. § 1.469-5T(a)(1), (5), or (6).
[3068] Code § 469(h)(2).

inherently a limited partner.[3069] Proposed regulations would treat an interest in an entity as an interest in a limited partnership as a limited partner if:[3070]

- The entity in which such interest is held is classified as a partnership for Federal income tax purposes under the check-the-box regulations; and
- The holder of such interest does not have rights to manage the entity at all times during the entity's taxable year under the law of the jurisdiction in which the entity is organized and under the governing agreement.

Furthermore, an individual is not treated as holding an interest in a limited partnership as a limited partner for the individual's taxable year if that individual also holds an interest in the partnership that is not an interest as a limited partner, such as a state-law general partnership interest, at all times during the entity's taxable year;[3071] thus, being a general partner and a limited partner causes the partner's entire partnership interest to be treated as a general partner for purposes of the passive loss rules but does not *per se* subject the person's interest as a limited partner to self-employment tax.[3072]

Let's spend some time on the significant participation activity test of Reg. § 1.469-5T(c), "Significant participation activity," which provides:[3073]

(1) *In general*. For purposes of paragraph (a)(4) of this section, an activity is a significant participation activity of an individual if and only if such activity -

(i) Is a trade or business activity (within the meaning of § 1.469-1T(e)(2)) in which the individual significantly participates for the taxable year; and

(ii) Would be an activity in which the individual does not materially participate for the taxable year if material participation for such year were determined without regard to paragraph (a)(4) of this section.

(2) *Significant participation*. An individual is treated as significantly participating in an activity for a taxable year if and only if the individual participates in the activity for more than 100 hours during such year.

Reg. § 1.469-5T(a)(4) treats an individual as materially participating if "the activity is a significant participation activity (within the meaning of paragraph (c) of this section) for the taxable year,

---

[3069] A member in an LLC is not treated as a limited partner merely by reason of having limited liability. *Gregg v. U.S.*, 186 F.Supp.2d 1123 (D. Ore. 2000); *Garnett v. Commissioner*, 132 T.C. 368 (2009); *James R. Thompson v. U.S.*, 87 Fed. Cl. 728, 734 (2009), *acq.* in result only, AOD 2010-002; *Hegarty v. Commissioner*, T.C. Summary Opinion 2009-153. *Newell v. Commissioner*, T.C. Memo. 2010-23 reasoned:

> … [T]he parties stipulated that petitioner husband handled the day-to-day operations of Pasadera, including hiring and firing employees, negotiating loan agreements and other contracts, overseeing construction, administering membership programs, and reviewing, approving, and signing all checks. As the managing member of the L.L.C., petitioner husband functioned as the substantial equivalent of a general partner in a limited partnership.

[3070] Prop. Reg. § 1.469-5(e)(3)(i).
[3071] Prop. Reg. § 1.469-5(e)(3)(ii).
[3072] See part II.L.4 Self-Employment Tax Exclusion for Limited Partner, especially fn. 3462.
[3073] For context, see text accompanying fn 3062.

and the individual's aggregate participation in all significant participation activities during such year exceeds 500 hours."

TAM 202229036 asserts:

> Taxpayer's position that the language in § 1.469-5T(c)(1)(ii) provides that material participation for a taxable year is determined by disregarding whether Taxpayer satisfied § 1.469-5T(a)(4) in the tested taxable year and any other relevant year, is unsupported by the language. The language of § 1.469-5T(c)(1)(ii) specifies that the relevant inquiry is whether the taxpayer materially participated for "the taxable year" and that determination is being made "for such year" without taking § 1.469-5T(a)(4) into account. Section 1.469-5T(c)(1)(ii) does not say to disregard § 1.469-5T(a)(4) for every previous year where a taxpayer was treated as having materially participated under that test.
>
> Thus, an activity that met the requirements of § 1.469-5T(a)(4) in any five of the last ten taxable years satisfies the 5/10 test under § 1.469-5T(a)(5) for material participation in the taxable year and no longer satisfies the requirement in § 1.469-5T(c)(1)(ii). Once the activity no longer meets the 5/10 test, the activity may, provided it otherwise meets the requirements of § 1.469-5T(c)(1), again be classified as a SPA.
>
> The Service acknowledges that § 1.469-5T(c)(1)(ii) imposes an additional requirement on SPA activities, one that potentially removes an activity from being treated as a SPA in the current tax year based on participation in prior years, as is the case here. The additional requirement in § 1.469-5T(c)(1)(ii) results in a significant participation activity shifting out of the SPA test and into the 5/10 test because under § 1.469-5T(c)(1)(ii) an activity cannot be both a SPA and satisfy another material participation test. In contrast, for example, an activity that satisfies the 500 hour test also satisfies the 5/10 test in the same year because there is no similar restriction. The difference in treatment is a direct result of the SPA test having a separate qualifying section in § 1.469-5T(c)(1), where there is no such additional qualifying section for (a)(1).

Banoff, Lipton, and Cohen ("Shop Talk" column), "Significant Participation Activities under Section 469 – IRS Applies Rules With No Statutory Foundation, "Significant Participation Activities under Section 469 – IRS Applies Rules With No Statutory Foundation," *Journal of Taxation* (Oct. 2022), introduced their analysis of the TAM:

> A recent IRS National Office Technical Advice Memorandum, TAM 202229036, dated April 19, 2022, caught your editors' attention because it addressed an often-forgotten aspect of the passive loss rules – "significant participation activities" (SPAs). The TAM, issued by the Passthroughs & Special Industries Group, addressed a situation in which an individual worked in many activities, an increasingly common approach for entrepreneurs (i.e., to put their eggs in many baskets, taking a cue, perhaps, from Elon Musk and his time splitting among SpaceX, Tesla, The Boring Company, and other ventures).
>
> The TAM's authors concluded that the IRS' Examination Division ("Exam") could require the affected taxpayer to treat certain activities in which the taxpayer materially participated under the SPA rule as not satisfying that rule any longer because of the 5-out-of-10 years rule's overlap with the SPA rule – in other words, the TAM's authors effectively turned the SPA rule into a "gotcha" in order to disallow losses that were claimed by the taxpayer.

After reviewing the regulations and commenting that the SPA aspect has "absolutely no basis for it in the statute, and the IRS failed to provide notice and comment in connection with the issuance of this rule," the authors continued:

> **TAM 202229036 – illogical regulations lead to absurd results**
>
> The TAM addressed the interaction of these rules. In the TAM, an individual who participated in multiple activities for more than 100 hours but fewer than 500 hours in the taxable year reported the activities as nonpassive on the grounds that the activities were SPAs and his total participation in the SPAs in the taxable year exceeded 500 hours. The taxpayer had been involved in these SPAs for a number of years, so as a result of the application of Reg. 1.469-5T(a)(5) (the 5-out-of-10 years rule), the taxpayer also was deemed to materially participate in these activities in the taxable year. However, the 5-out-of-10-years rule did not apply to every SPA in which the taxpayer participated, and if those SPAs were taken alone, the individual's aggregate hours in those SPAs (and only those SPAs) was less than 500 hours (so the individual would not be deemed to materially participate in those activities under the SPA rules).
>
> Exam determined that the taxpayer was subject to a "gotcha" because the individual, who had been treated as materially participating in various SPAs under Reg. 1.469-5T(a)(4) in prior years only because they were SPAs in the prior years, could no longer treat any activity subject to the 5-out-of-10 years rule as a SPA because the taxpayer otherwise materially participated in such activities. This interpretation was consistent with the literal language of Reg. 1.469-5T(c)(1)(ii), which provides that an activity is a SPA only if the individual did not materially participate in such activity for the taxable year if material participation were determined without regard to Reg. 1.469-5T(a)(4).
>
> The taxpayer argued that this was an absurd result, and it was inconsistent with the intent of the regulations to use another test to prevent a taxpayer from being treated as materially participating under the SPA test. The taxpayer further argued that the purpose of the 5-out-of-10 years rule was to prevent taxpayers from being able to characterize an activity as nonpassive after the taxpayer ceases to materially participate in the activity, and not to recharacterize a SPA that was otherwise treated as nonpassive as a passive activity. The taxpayer also noted that no court decisions supported Exam's interpretation of these regulations.
>
> The National Office rejected the taxpayer's arguments, concluding that the plain language of Reg. 1.469-5T(c)(1)(ii) focuses only on the taxable year in question. If a taxpayer is treated as materially participating in an activity which otherwise would be treated as a SPA, the activity simply cannot be treated as a SPA. Here, the treatment of the individual's various trades or businesses as SPAs in prior taxable years meant that such activities could not be treated as SPAs for the current taxable year because of the 5-out-of-10 years rule, and the taxpayer was required to remove such activities from the calculation (and, therefore, could not materially participate in the remaining SPAs because total participation in such SPAs was less than 500 hours).
>
> The illogic of the IRS' position is self-evident. Assume that for the three years commencing on 1/1/20 and ending 12/31/22, Joe owns and operates ten separate trades or businesses, each of which is treated as a separate activity under Reg. 1.469-4, while on 1/1/23, Joe acquires four more trades or businesses, each of which is (also) treated as a separate activity. Joe participates for exactly 110 hours in each of these trades or businesses in every

year that he owns them. Under the IRS' interpretation of these rules, in 2023 and 2024 all 14 activities are treated as SPAs in which Joe materially participated under the aggregation rule in Reg. 1.469-5T(a)(4) , but beginning in 2025, the four additional activities cannot be treated as SPAs in which Joe materially participated because, commencing in 2025, the 5-out-of-10 years rule would apply to the original ten trades or businesses and, so, those activities would not be SPAs for purposes of applying Reg. 1.469-5T(c)(2). Thus, the four additional activities would be tested as a group under Reg. 1.469-5T(c)(2) and (having Joe's participation for only 440 hours per year) could not be treated as SPAs in which Joe materially participated beginning in 2025. Assuming no changes in Joe's participation, commencing in 2030, Joe would again be treated as materially participating in all 14 activities under the SPA rule, because the 5-out-of-10 years period would have elapsed.

This result is completely inconsistent with the purposes and legislative history of Section 469. Indeed, the entire SPA rule itself appears to conflict with Congress' stated intent in enacting Section 469, which was to treat an activity as nonpassive only if the taxpayer's participation in the activity was regular, continuous, and substantial. In Joe's example, Joe participated in the various activities on the same basis for many years, but under the regulations as applied in the TAM, the participation would not be treated as "material" for several years. This flip/flop treatment of an activity is at odds with the statutory test, which focuses on whether participation was regular, continuous, and substantial.

To add salt to the wound, as mentioned above, Reg. 1.469-2T(f)(2) provides that any income from a SPA is treated as nonpassive even if losses from the same activity would be treated as passive losses (either because the time spent on SPAs do not aggregate to 500 hours or, perhaps, because of the application of the 5-out-of-10-years rule). In other words, in the example above concerning Joe, if the four new activities which were acquired in 2023 generated losses in any year from 2025 to 2029, then under the IRS' approach those losses would be treated as passive losses, whereas any income from those activities would be treated as nonpassive income. This is a "heads we win, tails you lose" IRS-favorable rule that appears to be contrary to both the statutory language and the legislative history of Section 469, meaning that it would appear very susceptible to challenge under the Administrative Procedure Act.

The IRS issued these rules as temporary regulations, and the IRS never converted them into final regulations. By leaving the regulations in temporary form,[6] the IRS was able to ignore the comments that it received which pointed out that the rules concerning SPAs were wholly inconsistent with the statutory framework, which did not contemplate in any matter that an activity could be treated as "active" if it had income but "passive" if it had losses. (One of your editors was the author of those comments on behalf of the ABA Section of Taxation approximately 35 years ago but finding a citation decades later was a task beyond his capability.) Early on, our co-editor went on record identifying the total lack of legal authority or logic to support the SPA rules' position of 'heads the IRS wins, tails the taxpayer loses.'[7] Other treatise authors have observed that the SPA rule "is not only the most controversial, but also the least supported by the legislative history."[8]

[6] The SPA Regulations, like other temporary regulations issued under Section 469, are grandfathered from the "sunset" rules applicable to temporary regulations issued after November 20, 1988. Section 7805(e) provides that any temporary regulation shall expire (sunset) within three years after the date of issuance of such regulation. Section 7805(e) is effective with respect to regulations issued after November 20, 1988. Technical and Miscellaneous Revenue Act of 1988, Pub. L. No. 100-647, Title VI, sec. 6232(b),

102 Stat. 3342, 3735. The SPA temporary regulations were promulgated earlier in 1988. (Football is a game of inches and regulations are a game of effective dates.)

[7] See Lipton, "PALs at Two: What We Know and Don't Know About Passive Activity Losses on Their Second Birthday," 66 Taxes 833 (November 1988) ("Indeed, representatives of the IRS have been able to justify this [SPA] rule only by stating that it reflects the material participation test. In effect, the IRS has established one test for material participation if an activity results in a loss (500 hours) and a different test (100 hours) if the activity results in a profit. Nothing in the Code or the legislative history of Section 469 justifies such alternating tests for material participation. Observers believe that a significant participation activity recharacterization rule is invalid, but a taxpayer takes a contrary position at a peril to his pocketbook.") Also see Lipton, "Tax Court Explores the Boundaries of Material Participation in Passive Activities," 85 JTAX 348 (Dec. 1996) ("Under Treas. Reg. 1.469-5T(f)(2) , income from significant participation activities is 'active,' but losses are 'passive' unless the taxpayer materially participates in the activity under Temp. Reg. 1.469-5T(a)(4) . Because of the differing standards (losses may be passive while income is active for a taxpayer who works the same number of hours), the validity of this rule is open to serious question.")

[8] Sutton & Howell-Smith, Federal Income Taxation of Passive Activities (WG&L), para. 9.04 (visited 8/25/22).

Likewise, as TAM 202229036 illustrates, these rules can lead to absurd situations in which an activity is treated as passive in some years and active in other years, even if the taxpayer's participation in the activity did not change an iota.

Is the taxpayer in TAM 202229036 up to the challenge?

The taxpayer who was the subject of the TAM might consider filing their tax returns inconsistent with the regulations (and file a disclosure on Form 8275R) and stating that the regulation is invalid (which, in some knowledgeable tax advisors' view, it almost certainly is), both as a substantive matter (because Congress never envisioned that a single activity could generate passive losses but active income, or could flip/flop from passive to active even though the individual's level of participation did not change[9]) and also as a result of the IRS' failure to provide taxpayers with an opportunity to provide meaningful comments with respect to these rules.

[9] "(I)t is difficult to justify the reason why a person spending two hours per week on an activity [*i.e.*, 104 hours per year] generates nonpassive income while a person spending one hour per week does not." Sutton & Howell-Smith, note 8 *supra*.

II.K.1.a.iii. Spousal Participation

Any participation by a person's spouse in an activity (without regard to whether the spouse owns an interest in the activity and without regard to whether the spouses file a joint return for the taxable year) is considered participation by that person in that activity.[3074] A taxpayer may

[3074] Reg. § 1.469-5T(f)(3), authorized under Code § 469(h)(5).

spend zero time in the activity and be deemed to participate solely by reason of the spouse's participation.[3075]

However, working to help a spouse's business does not establish the taxpayer as engaging in his own trade or business.[3076] Accordingly, consider documenting and compensating the spouse's services or making the spouse a co-owner.

Finally, although spousal attribution applies with respect to the material participation requirements even if they do not file a joint return,[3077] they do not allow for spousal attribution for purposes of meeting the other requirements to be treated as a "real estate professional" that a taxpayer perform more than one half of his or her personal services and more than 750 hours in real estate trades or businesses if they file separate returns.[3078]

II.K.1.a.iv. Period of Participation

A taxpayer's participation in a partnership or S corporation is determined for the taxable year of the entity (and not the taxpayer's taxable year).[3079]

II.K.1.a.v. What Does Not Count as Participation

However, not all work counts as participation for purposes of the material participation test:

- Work done in connection with an activity is not treated as participation in the activity if not only that work is not of a type that is customarily done by an owner of such an activity but also one of the principal purposes for the performance of such work is to avoid the disallowance, under Code § 469 and its regulations, of any loss or credit from such activity.[3080]

[3075] *Zarrinnegar v. Commissioner*, T.C. Memo. 2017-34, described in fn 3084 of part II.K.1.a.vi Proving Participation and fn. 3208 of part II.K.1.e.iii.(a) Scope and Effect of Real Estate Professional Exception.
[3076] *DeGuzman v. U.S.*, 147 F. Supp. 2d 274 (D. N.J. 2001). The husband attempted to prove that he was a real estate professional and asserted that time he spent cleaning his wife's office should count toward that. Given that neither of them owned the property (she was leasing it form an unrelated third party), his hours could not count as participation generally (see part II.K.1.a.i Taxpayer Must Own an Interest in the Business to Count Work in the Business); furthermore, his not having been hired by the landlord undermined his claim that his work was part of a trade or business of providing real estate services.
[3077] Reg. § 1.469-5T(f)(3), authorized under Code § 469(h)(5).
[3078] *Oderio v. Commissioner*, T.C. Memo. 2014-39. See Reg. § 1.469-9(c)(4) and the flush language at the end of Code § 469(c)(7)(B). See part II.K.1.e.iii.(a) Scope and Effect of Real Estate Professional Exception, especially fn. 3201.
[3079] Reg. § 1.469-2T(e)(1). The same test applied to determine whether a partner is treated as a general partner or a limited partner; see text accompanying fn. 3071.
[3080] Reg. §§ 1.469-5T(f)(2)(i) and 1.469-5T(k), Example (7) (work as an office receptionist did not count because that was not the type of work typically done by the owner of the business, which was a football team). Note that the regulations do not expressly exclude the work from material participation if the performance of such work is to avoid the characterization of the income as net investment income under Code § 1411. Therefore, it appears that work that is not of a type that is customarily done by an owner of such an activity does count towards material participation, even if its principal purpose is to avoid the characterization of the income as net investment income under Code § 1411, so long as no principal purpose is to avoid the passive loss rules. Reg. § 1.1411-5 refers to Reg. § 1.469-5T(a) but does not say that the application of Reg. § 1.469-5T(f)(2)(i) is to be modified.

- Work done by an individual in the individual's capacity as an investor in an activity is not treated as participation in the activity unless the individual is directly involved in the activity's day-to-day management or operations.[3081] "Investor" work includes:[3082]
    - Studying and reviewing financial statements or reports on operations;
    - Preparing or compiling summaries or analyses of the finances or operations for the individual's own use; and
    - Monitoring the finances or operations in a non-managerial capacity.
- Providing legal, tax, or accounting services as an independent contractor (or as an employee thereof), or that the taxpayer commonly provides as an independent contractor, would not ordinarily constitute material participation in an activity other than the activity of providing these services to the public. Thus, for example, a member of a law firm who provides legal services to a client regarding a general partnership engaged in research and development, is not, if he invests in such partnership, treated as materially participating in the research and development activity by reason of such legal services.[3083]

II.K.1.a.vi. Proving Participation

One needs to use reasonable means to establish participation:[3084]

- "Reasonable means" may include but are not limited to the identification of services performed over a period of time and the approximate number of hours spent performing

---

[3081] Reg. § 1.469-5T(f)(2)(ii)(A) provides:

> *In general*. Work done by an individual in the individual's capacity as an investor in an activity shall not be treated as participation in the activity for purposes of this section unless the individual is directly involved in the day-to-day management or operations of the activity.

When an individual is involved in day-to-day management or operations, does investor work done in furtherance of such management/operations count, or does all of the investor work count, without needing to differentiate between work done purely as an investor from investor work done to conduct such management/operations? All the investor work counts, once the court finds that the individual is involved in day-to-day management or operations. *Assaf v. Commissioner*, T.C. Memo. 2005-14; *Tolin v. Commissioner*, T.C. Memo. 2014-65; and *Lamas v. Commissioner*, T.C. Memo. 2015-59.

[3082] Reg. § 1.469-5T(f)(2)(ii)(B). *Lapid v. Commissioner*, T.C. Memo. 2004-222, held:

> While Mrs. Lapid testified that she spent many hours every night studying and tracking her investments, the evidence she submitted shows that she was actually just reviewing financial statements and reports on operations. Because the regulation specifically defines such monitoring as investment activity, we cannot include that time in calculating whether she met the material participation standard in three of the safe harbors she is aiming for. This is true despite our belief that Mrs. Lapid did indeed spend a lot of time tracking her properties….
>
> Unable to count the hours that Mrs. Lapid spent on investment activity, the petitioners' claim to the loss on their hotel condos quickly collapses. Though we believe that the Lapids did at least occasionally visit the condos, the record is devoid of any evidence that they spent anywhere near 500 hours doing so. That the hotels did the routine onsite work of property management undermines the Lapids' ability to show any significant amount of time that would count as "participation" in the activity. And they completely failed to compare the time they spent with the time spent by individuals actually onsite.

[3083] Committee Reports for Senate Bill 99-313, P.L. 99-514.

[3084] Reg. § 1.469-5T(f)(4). Part VIII of T.D. 8175 provides:

such services during such period, based on appointment books, calendars, or narrative summaries.

- Although contemporaneous daily time reports, logs, or similar documents are preferable,[3085] they are not required if the extent of participation may be established by other reasonable

---

H. *No Recordkeeping Requirements*

Notwithstanding the quantitative tests set forth in the regulations, § 1.469-5T(f)(4) expressly provides that taxpayers need not keep contemporaneous records of their hours of participation in each activity. The Service recognizes that, while lawyers and certain other professionals are accustomed to maintaining detailed records of how they spend their work days, most individuals do not customarily maintain such records. Accordingly, under the regulations, taxpayers will be allowed to prove the requisite number of hours by any reasonable means, including, but not limited to, appointment books, calendars, and narrative summaries.

Zarrinnegar v. Commissioner, T.C. Memo. 2017-34, shows an ideal way to prove one's case:

> To establish the hours petitioner husband spent each year on his real estate business, petitioners offered petitioner husband's testimony and logs of hours for 2010, 2011, and 2012; each log showed that petitioner husband spent more than 1,000 hours per year on real estate activities.[11] Petitioner husband testified credibly that the logs had been prepared contemporaneously. He also testified credibly and at great length about the logs' contents; he was able to recall extensive details relating to the entries. Petitioners also offered the testimony of several other witnesses, including petitioner wife. All this testimony was credible and tended to corroborate petitioner husband's logs and testimony. We therefore find that petitioner husband worked more than 1,000 hours per year at the real estate business.
>
> [11] Petitioner husband testified that throughout the years at issue he had high hopes for the brokerage side of the business, despite the financial malaise burdening the housing market. Undaunted despite earning only $8,500 in brokerage fees during the years at issue, petitioner-husband testified that he poured hundreds of hours each year into broker's tours, listing searches, open houses, property viewings, client meetings, and other related activities, likening his efforts to the early labors of Bill Gates and Mark Zuckerberg, who toiled in obscurity and relative poverty before reaping fabulous profits.

The finding of over 1,000 hours per year was important because he was also a dentist and proved that he worked less than 1,000 hours per year, the proportions being important to satisfying the real estate professional test. See part II.K.1.e.iii.(a) Scope and Effect of Real Estate Professional Exception, especially fn 3208.

However, the cases below impose a heavy burden of proof on those who do not keep contemporaneous records and impose penalties if recordkeeping is inadequate.

[3085] *Schumann v. Commissioner*, T.C. Memo. 2014-138, held that, while not necessarily required:

> … we cannot overemphasize the importance of keeping thorough, contemporaneous time records rather than making estimates after the fact.

If one reconstructs time, the reconstruction needs to include details, as that court pointed out:

> Petitioner did not keep a contemporaneous log or an appointment calendar tracking his real estate activities, but he prepared a narrative summary of his activities. The summary, however, provides a broad description of the work performed at each property rather than a detailed description of the work that petitioner performed personally.

means;[3086] however, failure to keep good records can lead to penalties.[3087] Note, however, that reconstructing participation[3088] might lead one to make serious flaws in compiling the

---

[3086] *Montgomery v. Commissioner*, T.C. Memo. 2013-151. In holding for the taxpayer, *Leland v. Commissioner*, T.C. Memo. 2015-240, included the following footnote 3:

> Respondent's main objection to petitioner's reconstructed logs was that they were not prepared contemporaneously with the activity. Sec. 1.469-5T(f)(4), Temporary Income Tax Regs., 53 Fed. Reg. 5727 (Feb. 25, 1988), does not require contemporaneous records, and we are satisfied that petitioner has established material participation through other reasonable means. Respondent did not dispute petitioner's inclusion of travel time in his reconstructed logs. The facts of this case establish that petitioner's travel time was integral to the operation of the farming activity rather than incidental. *See Shaw v. Commissioner*, T.C. Memo. 2002-35. We are also satisfied that petitioner's purpose in traveling long distances to and from Turkey, Texas, was not to avoid the disallowance, under sec. 469 and the regulations thereunder, of any loss or credit from the farming activity. *See* sec. 1.469-5T(f)(2)(i), Temporary Income Tax Regs., *supra*.

Hailstock v. Commissioner, T.C. Memo. 2016-146, approved the full-time efforts of a taxpayer who did not engage in any other work, cautioning that the taxpayer should keep better records for future audits:

> Petitioner satisfies the facts and circumstances test in section 1.469-5T(a)(7), Temporary Income Tax Regs., *supra*, because of her credible testimony and the substantial amount of money and time devoted to each rental property. Petitioner testified credibly and in detail about her duties in operating her real estate rental business. We find petitioner's narrative summary convincing because she owned numerous rental properties and conducted her business as a "one-man operation" without being otherwise employed. As previously discussed, petitioner spent well in excess of 40 hours each week doing work related to numerous rental properties (i.e., researching prospective properties, maintaining properties, supervising work orders, finding tenants, securing leases, and continuing education related to rental real estate). The record before the Court indicates that petitioner received sizable amounts of rental income during the taxable years in issue and used substantial amounts of her own resources to facilitate the rental operation. Petitioner's testimony is further buttressed by respondent's concession that she "rented and incurred expenses in connection with the parcels of real property located at 1515 Ruth Avenue, 1516 Ruth Avenue, 1809-1811 Fairfax Avenue, 1805-1807 Fairfax Avenue, 1112 Race Street, 1619 Fairfax Avenue, 2541 Hemlock Street, 1923 Dana Avenue, 1517 Ruth Avenue, 140 Mulberry Avenue, 1668 California Street, 1729 Kinney Avenue, 1823 Fairfax Avenue and 1407 Race Street." Although we caution petitioner to construct contemporaneous time logs for her future real estate endeavors, we find her detailed and credible testimony to be a "reasonable means" of proof. See sec. 1.469-5T(f)(4), Temporary Income Tax Regs. On the basis of petitioner's testimony and the record as a whole, we conclude that petitioner did materially participate in each rental property reported on her reconstructed Schedule E for the taxable years in issue.[5] Because she has proven that she "materially participated" in operating each of her rental properties from 2005 to 2009, petitioner easily meets the 750-hour requirement of section 469(c)(7)(B)(ii). Accordingly, petitioner qualifies for the real estate professional exception under section 469(c)(7) for each of the taxable years in issue, and therefore her Schedule E losses are not subject to the passive loss limitations imposed by section 469.
>
> [5] As held above, 201 Mulberry Avenue and 9103 Brehm Road do not qualify as rental properties for any of the taxable years in issue and therefore are not aggregated to meet the 750-hour requirement of sec. 469(c)(7)(B)(ii).

[3087] *Williams v. Commissioner*, T.C. Memo. 2014-158 (taxpayer "made no attempt to keep contemporaneous records showing what amount of time he spent on the airplane, nor did he provide any appointment books, calendars, or narrative summaries corroborating such time"). *Schumann v. Commissioner*, T.C. Memo. 2014-138, imposed 20% negligence penalties:

> Petitioner did not call either of his tax return preparers to testify. Petitioner did not keep books and records adequate to substantiate his status as a real estate professional. We think petitioner acted without reasonable cause and did not act in good faith.

documentation.[3089] The court will not respect a "postevent 'ballpark guesstimate.'"[3090] However, reconstructing participation is acceptable when corroborated by phone records, third-party witness testimony, the parties' comprehensive stipulations of fact, and other contemporaneous materials.[3091] Furthermore, any logs should segregate investor activity, which does not count,[3092] from handling the day-to-day operations.[3093]

Hiring a management company tends to undermine one's own participation.[3094]

II.K.1.a.vi.(a). Importance of Contemporaneous Records

Not necessarily to be distinguished from part II.K.1.a.vi.(b) No Respect for a Postevent Ballpark Guesstimate, below are some cases illustrating how important contemporaneous records can be.

[3088] Reconstructing hours spent includes correcting or supplementing a log. *Flores v. Commissioner*, T.C. Memo. 2015-9, found a lack of credibility when the taxpayer admitted that various calendar entries overstated time spent. The taxpayer claimed to have a second calendar but did not produce it early enough in the proceedings to have it admitted into evidence. The court upheld a 20% accuracy-related penalty. *Ballard v. Commissioner*, T.C. Summary Opinion 2018-53, also upheld such a penalty, after finding:

> We conclude that the 2008 time logs are not trustworthy and decline to rely on them to reach the result petitioners desire. As for the documents petitioners produced for 2009 and 2010, they do not establish how many hours petitioners spent with respect to their residential rental activities. Many of the documents show that petitioners had an agent to handle the day-to-day management of their Georgia residential rental properties and that they hired numerous workers to repair and maintain all of their residential rental properties.
>
> Ms. Pu did not appear in Court at trial. And as for Mr. Ballard's testimony, we find much of it to be incredible, uncorroborated, and self-serving. Under the circumstances, "[a]s we have stated many times before, this Court is not bound to accept a taxpayer's self-serving, unverified, and undocumented testimony", *Shea v. Commissioner*, 112 T.C. 183, 189 (1999) (citing *Tokarski v. Commissioner*, 87 T.C. 74, 77 (1986)), and we do not here.

[3089] See part II.K.1.a.vi.(a) Importance of Contemporaneous Records.

[3090] See part II.K.1.a.vi.(b) No Respect for a Postevent Ballpark Guesstimate.

[3091] See part II.K.1.a.vi.(c) Reconstructing Participation Acceptable When Corroborated.

[3092] See fn 3081 in part II.K.1.a.v What Does Not Count as Participation.

[3093] In *Antonyshyn v. Commissioner*, T.C. Memo. 2018-169, *Robison v. Commissioner*, T.C. Memo. 2018-88, and *Hakkak v. Commissioner*, T.C. Memo. 2020-46, the taxpayers did not segregate investor activity from handling day-to-day operations. The court noted that a management company was hired to perform the latter and held that the taxpayer did not prove sufficient work doing the latter.

[3094] *Schumann v. Commissioner*, T.C. Memo. 2014-138 ("In addition, petitioner's use of several rental agencies to help find prospective tenants, show his properties, and market his properties suggests that he did not materially participate in the rental of his properties."). In rejecting a taxpayer's claim of material participation, *Madler v. Commissioner*, T.C. Memo. 1998-112 commented:

> Petitioners have offered no evidence to indicate that they personally approved of tenants, decided rental terms, approved of expenditures for repairs and capital improvements, or in any way participated in the management of the unit in a significant and bona fide sense. It appears that VDS, rather than petitioners, performed all significant management activities. Moreover, we do not consider petitioner's ability to terminate the contract with VDS as active participation per se; the legislative history of section 469 explains that taxpayers must themselves genuinely exercise independent discretion and judgment.

However, continuous, active marketing (including booking reservations) and spending a block of 10 days annually was enough to establish material participation for condominiums in Hawaii, even though a local property manager checked in customers and managed maid service. *Pohoski v. Commissioner*, T.C. Memo. 1998-17.

For example, a taxpayer, who claimed as a contemporaneous record a 2008 calendar printed in 2009, incurred a 20% accuracy-related penalty. *Hassanipour v. Commissioner*, T.C. Memo. 2013-88. Another taxpayer's attempt to reconstruct activity led to contradictions about when he worked where, again incurring a 20% accuracy-related penalty. *Bartlett v. Commissioner*, T.C. Memo. 2013-182, pointing out:

> While the regulations permit some flexibility with respect to the evidence required to prove material participation, we are not required to accept post-event "ballpark guesstimates," nor are we bound to accept the unverified, undocumented testimony of taxpayers. See, e.g., *Lum v. Commissioner*, T.C. Memo. 2012-103; *Estate of Stangeland v. Commissioner*, T.C. Memo. 2010-185.

Similarly, *Adeyemo v. Commissioner*, T.C. Memo. 2014-1, characterized an after-the-fact spreadsheet reconstruction of time spent as an impermissible "ballpark guesstimate":

> The first problem is that the times and activities listed in the spreadsheet are not consistent with either the Adeyemos' testimony or their documentary evidence. Mr. Adeyemo testified that the activities listed in the spreadsheet were derived from his memory as well as from documentary evidence such as receipts, phone bills, the logbook, and newspaper ads. To the extent that the spreadsheet entries are purportedly derived from documentary evidence, the record does not establish a credible link between the spreadsheet and the underlying documents. For example, most entries include a general reference to a batch of receipts or phone bills. However, the references are too vague and the receipts too disorganized for us to trust that the spreadsheet is corroborated by the underlying documents….

Harnett v. Commissioner, T.C. Memo. 2011-191, in which the taxpayer claimed to spend at least 750 hours and more than half of his time managing real estate, illustrates some issues:

> Petitioner did not maintain a contemporaneous log of time spent participating in his real estate activities. In 2008, in preparation for respondent's audit, he attempted to reconstruct the time he spent in his real estate activities. He claims to have spent months going through his records to arrive at these reconstructed estimates, but petitioners have not demonstrated the evidentiary basis or methodology for these reconstructions. At trial petitioner testified that on the basis of these reconstructions he estimated spending 1,270 hours managing his real estate properties in 2003, 1,421 hours in 2004, and 1,648 hours in 2005. As discussed in more detail below, the contemporaneous records that petitioners have offered into evidence do not credibly support these estimates....
>
> Although petitioner spent some time dealing with his various properties during the years at issue and attempting to sell some of them, primarily through agents and brokers, we are not convinced that he performed more than 750 hours of services with respect to these properties during any year at issue. By 2003 petitioner had ceased to rent these properties to any significant extent and was looking to liquidate at least some of them. He was in ill health and had important duties at the bank. The properties were widely dispersed geographically. To a great extent he relied upon various agents, brokers, lawyers, and contractors as well as his wife, Robert Goldie, and Jeana Hopkins to deal with these properties.

> Petitioners suggest that because petitioner owned so much real estate, which they say was worth over $30 million, he necessarily must have spent at least 750 hours each year managing these properties. Yet petitioner also testified that during the years at issue he spent only about 10 hours a month working at the bank. Considering that for most of this period he was both chairman of the board and CEO of the bank, with wide-ranging responsibilities and six-figure compensation, this testimony strains credibility. But if this testimony is to be believed, we see no reason to think that managing his mostly dormant real estate holdings would have required petitioner to spend anywhere near 750 hours each year. And if the testimony is not to be believed, petitioner's lack of credibility on this score further erodes his credibility about the hours he claims to have spent on his real estate activities.

Almquist v. Commissioner, T.C. Memo. 2014-40 rejected calendars allegedly compiled from an original notebook where the taxpayer could not find the original notebook:

> Petitioners contend that this Court should look past the fact that petitioners did not provide any supporting documentation of the hours Mr. Almquist worked, should ignore petitioners' calendar and first log, and should look only to the second log in determining whether Mr. Almquist is a real estate professional. We again emphasize that the Court was not provided any of the purported supporting documentation or email and was provided only petitioners' self-serving testimony.
>
> We are not required to accept such self-serving testimony, and we are not willing to rely on that testimony to establish petitioners' position. See *Tokarski v. Commissioner*, 87 T.C. 74, 76-77 (1986); see also *Chapman Glen Ltd. v. Commissioner*, 140 T.C. __ (slip op. at 45 n.24) (May 28, 2013). Without any supporting documentation, the second log, created by petitioners over a year after the work was completed, is nothing more than "a postevent 'ballpark guesstimate". See *Moss v. Commissioner*, 135 T.C. at 369.

[*Chapman Glen Ltd. v. Commissioner* is found at 140 T.C. 294.]

Makhlouf v. Commissioner, T.C. Summary Opinion 2017-1, held:

> We conclude that the hours shown on the Weston spreadsheet are inflated, duplicative, and implausible on their face. Few if any entries are supported by contemporaneous record-keeping.

Penley v. Commissioner, T.C. Memo. 2017-65, expressed the skepticism usually shown when people with full-time jobs claim that they spent more than half their working time doing real estate work (and concluding later a 20% penalty):

> Petitioners claim Mr. Penley worked 2,520 hours on his real estate activities. To do so he would have had to work a total 4,714 hours (*i.e.*, 2,194 for HHS + 2,520 on his real estate activities) in 2012. That means if he worked every day, he would need to have averaged 12.88 total hours per day (**i.e.**, 4,712 ÷ 366 = 12.88). We conclude the calendar is untrustworthy, and we will not naively accept it to reach the result petitioners seek.
>
> Virtually all of the entries are rounded to the nearest hour or half-hour, do not specify a start or end time for the work, include the time spent driving to and from the property, and do not separate out any time for meals or other breaks. See *Merino v.*

> *Commissioner*, T.C. Memo. 2013-167, at *8-*12; *Rapp v. Commissioner*, 78 T.C.M. (CCH) at 177-178 (discounting testimony that lacked specifics about time work was performed); *Pohoski v. Commissioner*, T.C. Memo. 1998-17, 75 T.C.M. (CCH) 1574, 1579 (1998) (noting that the large number of hours claimed seemed implausible, especially given that the calendar did not contain breaks for meals or leisure time with family).
>
> Corroborating evidence, such as credit card statements, phone bills, and emails relating to the purchase of Evergreen Park, demonstrates meaningful real estate activity by petitioners during 2012. However, petitioners have not provided the Court with a sufficient explanation to reconcile this documentary evidence of their activities such as a brief email, a phone call, or a hardware store purchase with the large blocks of time (often 4 hours to 14 hours) shown on the calendar. See *Hill v. Commissioner*, T.C. Memo. 2010-200, 100 T.C.M. (CCH) 220, 223 (2010) (finding that the excessive hours claimed by the taxpayer, relative to the tasks performed, diminished the credibility of the taxpayer's estimates), *aff'd*, 436 F.App'x 410 (5th Cir. 2011). We find that petitioners' calendar does not fall within the regulation's "any reasonable means". See sec. 1.469-5T(f)(4), Temporary Income Tax Regs., *supra*.

II.K.1.a.vi.(b). No Respect for a Postevent Ballpark Guesstimate

Not necessarily to be distinguished from part II.K.1.a.vi.(a) Importance of Contemporaneous Records, the following cases criticized a postevent ballpark guesstimate:

Hudzik v. Commissioner, T.C. Summary Opinion 2013-4, which also imposed penalties:

> Petitioner's counsel contended that petitioner acted with reasonable cause and in good faith by listing both properties on Schedules E, following the instructions on TurboTax, and reading and attempting to follow IRS publications. While section 469 and its regulations cover a highly complex area of the tax code, petitioner's recordkeeping seems to have greatly inflated the number of hours spent in the activity in order to satisfy the statute and the regulations. We conclude that petitioner did not act with reasonable cause and in good faith and that petitioner is liable for accuracy-related penalties under section 6662(a) for taxable years 2006, 2007, and 2008.

Calvanico v. Commissioner, T.C. Summary Opinion 2015-64 (sloppy contemporaneous notes led to reconstruction efforts that were not credible and more like ballpark estimates; penalty imposed).

Finding a ballpark estimate (and imposing penalties), *Syed v. Commissioner*, T.C. Memo. 2017-226, ruled:

> Petitioners created this list during the IRS examination or before trial with an end result in mind: to show a certain number of hours of time devoted to rental properties. We have previously found such lists unpersuasive, and our conclusion is the same here. See, *e.g.*, *Mowafi v. Commissioner*, T.C. Memo. 2001-111; *Goshorn*, T.C. Memo. 1993-578.

II.K.1.a.vi.(c). Reconstructing Participation Acceptable When Corroborated

Tolin v. Commissioner, T.C. Memo. 2014-65. In setting the stage for its ultimate conclusion that the taxpayer materially participated, the court described the taxpayer's efforts and IRS' response:

> At trial petitioner introduced a narrative summary in which he describes the work he performed in connection with the thoroughbred activity and estimates the time he spent performing such work for each of the years at issue. He prepared the summary with the assistance of his attorney in preparation for trial, using telephone records, credit card invoices, and other contemporaneous materials. For each year petitioner claims time for the following work done in connection with the thoroughbred activity: preparing and distributing promotional materials; telephone conversations with his associates, advisors, and potential customers; business trips to Louisiana; registering his horses for State and national awards; reviewing and placing mortality insurance on [the horse]; reviewing and paying bills; recordkeeping; and continuing education. [footnote omitted] Cumulatively, petitioner contends that he participated in the thoroughbred activity for 891 hours in 2002, 862 hours in 2003, and 937.5 hours in 2004.
>
> While the narrative summary is a postevent review of petitioner's claimed participation in the thoroughbred activity, the parties stipulated his performance of many of the activities described therein, and a significant amount of credible third-party witness testimony and objective evidence indicates that it is an accurate depiction of his thoroughbred activity during the years at issue. [citations omitted] Respondent primarily disputes the time petitioner claims he spent performing the activities described in his narrative summary, arguing that his estimates are unreliable because the summary was prepared solely for purposes of litigation and is based in large part on petitioner's "unreliable memory". Respondent further argues that a substantial amount of petitioner's work was undertaken in his capacity as an investor in the thoroughbred activity and thus does not qualify as participation. See sec. 1.469-5T(f)(2)(ii), Temporary Income Tax Regs., *supra*.
>
> …we conclude that petitioner participated in the thoroughbred activity for more than 500 hours in each year….
>
> The remaining hours of participation petitioner needs to satisfy the "more than 500 hours" test … are easily accounted for by his preparation and mailing of the promotional breeding packages (the voluminous contents of which were stipulated by the parties) and the miscellaneous administrative tasks he completed. See *Harrison v. Commissioner*, T.C. Memo. 1996-509.
>
> Respondent nevertheless argues that a great deal of the work upon which petitioner relies to satisfy the "more than 500 hours" test should not qualify as participation because petitioner performed it in his capacity as an investor in the thoroughbred activity. See sec. 1.469-5T(f)(2)(ii), Temporary Income Tax Regs., *supra*. We reject this argument. Petitioner was directly involved in the day-to-day management and operations of the thoroughbred activity; therefore, any investor work he completed qualifies as participation for purposes of section 469. See sec. 1.469-5T(f)(2)(ii), Temporary Income Tax Regs., *supra*; see also *Assaf v. Commissioner*, T.C. Memo. 2005-14. On the basis of his satisfaction of the more-than-500-hours test of section 1.469-5T(a)(1), Temporary Income Tax Regs., *supra*, we conclude that petitioner was a material participant in the thoroughbred activity in 2002.

Note that the tax and penalties at stake were under $60,000; it seems that the taxpayer needed to go to a lot of effort to fight that. However, the taxpayer was a practicing lawyer (1,000-1,200 hours per year) and might have needed the win to protect his credibility.

After filing the petition, the taxpayer provided additional records to the IRS that proved the taxpayer's case. T.C. Memo. 2018-29 held that the IRS had to pay the taxpayer's attorney fees for continuing to litigate after the IRS had a reasonable amount of time to review the records.

II.K.1.a.vii. State Income Tax

David Hoyal, as Trustee of Crater Lake Trust v. Department of Revenue, 2021 WL 6024316 (Or. Tax Magistrate Div.), declined to count a beneficiary's work towards a trust's material participation, applying federal standards to an Oregon state income tax case. The court looked only to work attributed to the trustee as the sole legal holder of title.

In re Cobert v. Iowa Department of Revenue, 2017 WL 6501978 (Iowa Dept. Insp. App.), state law looked to the beneficiary's participation for special tax attributes passing through to the beneficiary.

II.K.1.b. Grouping Activities

For more insight, see Hamill, "Group Passive Activities to Achieve Best Tax Treatment," *Estate Planning Journal* (Dec. 2016).

Grouping under Code § 469 is very different than the Code § 199A rules for aggregating activities.[3095]

II.K.1.b.i. What Constitutes an Activity

The undertaking is generally the smallest unit that can constitute an activity, and it may include diverse business and rental operations.[3096] Note that:

- Business and rental operations conducted at the same location and owned by the same person are generally treated as part of the same undertaking; conversely, business and rental operations generally constitute separate undertakings to the extent that they are conducted at different locations or are not owned by the same person.[3097]

- However, operations that are not conducted at any fixed place of business or that are conducted at the customer's place of business are treated as part of the undertaking with which the operations are most closely associated; and operations, that are conducted at a

[3095] See part II.E.1.c.iii.(d) Aggregating Activities for Code § 199A in part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.
[3096] Reg. § 1.469-4T(a)(3)(i). Reg. § 1.469-4T(b)(2)(ii)(A) defines "business and rental operations" as all endeavors that are engaged in for profit or the production of income and satisfy one or more of the following conditions for the taxable year:
- Such endeavors involve the conduct of a trade or business (within the meaning of Code § 162) or are conducted in anticipation of such endeavors becoming a trade or business;
- Such endeavors involve making tangible property available for use by customers; or
- Research or experimental expenditures paid or incurred with respect to such endeavors are deductible research or experimental expenditures.

[3097] Reg. § 1.469-4T(a)(3)(ii).

location but do not relate to the production of property at that location or to the transaction of business with customers at that location, are treated as part of the undertaking or undertakings that the operations support.[3098]

- Furthermore, if the undertaking includes both rental and nonrental operations, the rental operations and the nonrental (including short-term rentals of real property, such as hotel-room rentals) operations generally must be treated as separate undertakings, unless more than 80% of the income of the undertaking determined under the usual rule is attributable to one class of operations (i.e., rental or nonrental) or if the rental operations would not be treated as part of a rental activity because of certain exceptions.[3099]

- Also, oil and gas wells that are subject to a certain working-interest exception as separate undertakings.[3100]

- The IRS would likely treat a portfolio of mortgages as a single trade or business activity which includes making, holding, or servicing the portfolio of mortgages, so that fact that one or more of the mortgages go into foreclosure likely will not allow the company to deduct its passive losses.[3101]

When separate entities are involved:[3102]

- A C corporation subject to Code § 469, an S corporation, or a partnership (a "section 469 entity") decides how to group its activities.

- Once the section 469 entity groups its activities, a shareholder or partner may group those activities with each other, with activities conducted directly by the shareholder or partner, and with activities conducted through other section 469 entities. For example, an owner may group an activity conducted through one entity with an activity conducted through another entity. Reg. § 1.469-4(c)(3), Example (2), provides:

  > Taxpayer B, an individual, is a partner in a business that sells non-food items to grocery stores (partnership L). B also is a partner in a partnership that owns and operates a trucking business (partnership Q). The two partnerships are under common control. The predominant portion of Q's business is transporting goods for L, and Q is the only trucking business in which B is involved. Under this section, B appropriately treats L's wholesale activity and Q's trucking activity as a single activity.

- A shareholder or partner may not treat activities grouped together by a section 469 entity as separate activities.

Although generally each undertaking in which a taxpayer owns an interest is treated as a separate activity of the taxpayer, additional rules may either require or permit the aggregation of

[3098] Reg. § 1.469-4T(a)(3)(iii).
[3099] Reg. § 1.469-4T(a)(3)(iv).
[3100] Reg. § 1.469-4T(a)(3)(v).
[3101] INFO 2009-0229.
[3102] Reg. § 1.469-4(d)(5)(i).

two or more undertakings into a single activity, if the activity is a trade or business, professional service, or rental real estate undertaking:[3103]

- Trade or business undertakings include all nonrental undertakings other than certain oil and gas undertakings and certain professional service.[3104]

- An aggregation rule treats trade or business undertakings that are both similar and controlled by the same interests as part of the same activity. However, this rule does not apply generally to small interests held by passive investors in such undertakings, unless such interests are held through the same pass-through entity.[3105] A taxpayer's interests in two or more trade or business undertakings that are similar[3106] and controlled by the same interests[3107] are treated as part of the same activity of the taxpayer for any taxable year in which the taxpayer (i) owns interests in each such undertaking through the same passthrough entity, (ii) owns a direct or substantial indirect interest[3108] in each such undertaking, or (iii) materially or significantly participates[3109] in the activity that would result if such undertakings were treated as part of the same activity.[3110]

- Undertakings are similar for purposes of this rule if more than half (by value) of their operations are in the same line of business or if the undertakings are vertically integrated.[3111]

- All the facts and circumstances are taken into account in determining whether undertakings are controlled by the same interests for purposes of the aggregation rule; however, if each member of a group of five or fewer persons owns a substantial interest in each of the undertakings, the undertakings may be rebuttably presumed to be controlled by the same interests.[3112]

- Professional service undertakings (nonrental undertakings that predominantly involve the provision of services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting) must be treated as part of the same activity if they are similar, related, or controlled by the same interests.[3113] "The rules for determining whether trade or business undertakings are controlled by the same interests also apply with respect to professional service undertakings."[3114] Professional service undertakings are similar if more than 20% (by value) of their operations are in the same field.[3115] Two

professional service undertakings are related if one of the undertakings derives more than 20% of its gross income from persons who are customers of the other undertaking.[3116]

- Also, the rules for aggregating rental real estate undertakings are generally elective, permitting taxpayers to treat any combination of rental real estate undertakings as a single activity or to divide their rental real estate undertakings and then treat portions of the undertakings as separate activities or recombine the portions into activities that include parts of different undertakings.[3117]

- Taxpayers may also elect to treat a nonrental undertaking as a separate activity even if the undertaking would be treated as part of a larger activity under the aggregation rules applicable to the undertaking, subject to certain consistency requirements; moreover, if a taxpayer elects to treat a nonrental undertaking as a separate activity, the taxpayer's level of participation (i.e., material, significant, or otherwise) in the separate activity is the same as the taxpayer's level of participation in the larger activity in which the undertaking would be included but for the election.[3118]

Reg. § 1.469-4T(f)(4), "Similar undertakings," which is key to the text accompanying fn 3106, provides:

> (i) *In general*. Except as provided in paragraph (f)(4)(iii) of this section, two undertakings are similar for purposes of this paragraph (f) if and only if -
>
> > (A) There are predominant operations in each such undertaking; and
> >
> > (B) The predominant operations of both undertakings are in the same line of business.
>
> (ii) *Predominant operations*. For purposes of paragraph (f)(4)(i)(A) of this section, there are predominant operations in an undertaking if more than 50 percent of the undertaking's gross income is attributable to operations in a single line of business.
>
> (iii) *Vertically-integrated undertakings*. If an undertaking (the "supplier undertaking") provides property or services to other undertakings (the "recipient undertakings"), the following rules apply for purposes of this paragraph (f):
>
> > (A) *Supplier undertaking similar to recipient undertaking*. If the supplier undertaking predominantly involves the provision of property and services to a recipient undertaking that is controlled by the same interests (within the meaning of paragraph (j) of this section), the supplier undertaking shall be treated as similar to the recipient undertaking. For purposes of applying the preceding sentence -
> >
> > > (1) If a supplier undertaking and two or more recipient undertakings that are similar (within the meaning of paragraph (f)(4)(i) of this section) are controlled by the same interests, such recipient undertakings shall be treated as a single undertaking; and

[3116] Reg. § 1.469-4T(a)(4)(iii).
[3117] Reg. § 1.469-4T(a)(4)(iv).
[3118] Reg. § 1.469-4T(a)(4)(v).

(2) A supplier undertaking predominantly involves the provision of property and services to a recipient undertaking for any taxable year in which such recipient undertaking obtains more than 50 percent (by value) of all property and services provided by the supplier undertaking.

(B) *Recipient undertaking similar to supplier undertaking*. If the supplier undertaking is the predominant provider of property and services to a recipient undertaking that is controlled by the same interests (within the meaning of paragraph (j) of this section), the recipient undertaking shall be treated, except as otherwise provided in paragraph (f)(4)(iii)(C) of this section, as similar to the supplier undertaking. For purposes of the preceding sentence, a supplier undertaking is the predominant provider of property and services to a recipient undertaking for any taxable year in which the supplier undertaking provides more than 50 percent (by value) of all property and services obtained by the recipient undertaking.

(C) *Coordination rules*.

(1) Paragraph (f)(4)(iii)(B) of this section does not apply if, under paragraph (f)(4)(iii)(A) of this section-

(i) The supplier undertaking is treated as an undertaking that is similar to any recipient undertaking;

(ii) The recipient undertaking is treated as a supplier undertaking that is similar to another recipient undertaking; or

(iii) Another supplier undertaking is treated as an undertaking that is similar to the recipient undertaking.

(2) If paragraph (f)(4)(iii)(A) of this section applies to a supplier undertaking, the supplier undertaking shall be treated as similar to undertakings that are similar to the recipient undertaking and shall not otherwise be treated as similar to undertakings to which the supplier undertaking would be similar without regard to paragraph (f)(4)(iii) of this section.

(3) If paragraph (f)(4)(iii)(B) of this section applies to a recipient undertaking, the recipient undertaking shall be treated as similar to undertakings that are similar to the supplier undertaking and shall not otherwise be treated as similar to undertakings to which the recipient undertaking would be similar without regard to paragraph (f)(4)(iii) of this section.

(iv) *Lines of business*. The Commissioner shall establish, by revenue procedure, lines of business for purposes of this paragraph (f)(4). Business and rental operations that are not included in the lines of business established by the Commissioner shall nonetheless be included in a line of business for purposes of this paragraph (f)(4). Such operations shall be included in a single line of business or in multiple lines of business on a basis that reasonably reflects -

(A) Similarities and differences in the property or services provided pursuant to such operations and in the markets to which such property or services are offered; and

(B) The treatment within the lines of business established by the Commissioner of operations that are comparable in their similarities and differences.

Reg. § 1.469-4T(f)(3), "Substantial indirect interest," which is key to the text accompanying fn 3108, provides:

(i) *In general*. For purposes of this paragraph (f), a taxpayer owns a substantial indirect interest in an undertaking for a taxable year if at any time during such taxable year the taxpayer's ownership percentage (determined in accordance with paragraph (j)(3) of this section) in a passthrough entity that directly owns such undertaking exceeds ten percent.

(ii) *Coordination rule*. A taxpayer shall be treated for purposes of this paragraph (f) as owning a substantial indirect interest in each of two or more undertakings for any taxable year in which –

(A) Such undertakings are treated as part of the same activity of the taxpayer under paragraph (f)(2)(i) of this section; and

(B) The taxpayer owns a substantial indirect interest (within the meaning of paragraph (f)(3)(i) of this section) in any such undertaking.

Reg. § 1.469-4T(f)(5) (in each example that does not state otherwise, the taxpayer is an individual and the facts, analysis, and conclusions relate to a single taxable year), Example (4) provides:

(i) The taxpayer owns a 5-percent interest in partnership A. Partnership A owns interests in partnerships B and C, each of which owns a single undertaking (undertakings B and C). In addition, the taxpayer is a partner in partnerships C and D and directly owns a 15-percent interest in each partnership. Partnership D also owns a single undertaking (undertaking D). Undertakings B, C, and D are trade or business undertakings (within the meaning of paragraph (f)(1)(ii) of this section) that are similar (within the meaning of paragraph (f)(4) of this section) and controlled by the same interests (within the meaning of paragraph (j) of this section). The taxpayer does not participate in undertaking B, C, or D.

(ii) Paragraph (f)(2)(i) of this section provides that trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity of the taxpayer if the taxpayer owns interests in the undertakings through the same passthrough entity. In this case, the taxpayer owns interests in undertakings B and C through partnership A. Thus, the taxpayer's interests in undertakings B and C are treated as part of the same activity.

(iii) Paragraph (f)(2)(ii) of this section provides that trade or business undertakings that are similar and controlled by the same interests are treated as part of the same activity of the taxpayer if the taxpayer owns a direct or substantial indirect interest in each such undertaking. In this case, the taxpayer owns more than ten percent of partnerships C and D, and these partnerships directly own undertakings C and D. Thus, the taxpayer owns a substantial indirect interest in undertakings C and D (see paragraph (f)(3)(i) of this section).

(iv) The coordination rule in paragraph (f)(3)(ii) of this section applies to undertakings B and C because they are treated as part of the same activity under paragraph (f)(2)(i) of this section, and the taxpayer owns a substantial indirect interest in undertaking C. Under the coordination rule, the taxpayer is treated as owning a substantial indirect interest in undertaking B as well as undertaking C. Accordingly, the taxpayer's interests in undertakings B, C, and D are treated as part of the same activity.

For business and rental operations of consolidated groups of corporations and publicly traded partnerships, a consolidated group is treated as one taxpayer in determining its activities and those of its members, and business and rental operations owned through a publicly traded partnership cannot be aggregated with operations that are not owned through the partnership.[3119]

Subject to certain exceptions,[3120] business and rental operations that constitute a separate source of income production are required to be treated as a single undertaking that is separate from other undertakings.[3121] For this purpose, business and rental operations shall be treated as a separate source of income production if and only if such operations are conducted at the same location[3122] and are owned by the same person[3123] and income-producing operations[3124] owned by such person are conducted at such location.[3125] If the rule described in this paragraph would require treatment as a single undertaking that is separate from other undertakings, generally its rental operations[3126] and its operations other than rental operations

---

[3119] Reg. § 1.469-4T(a)(5).

[3120] Notwithstanding that a taxpayer's interest in leased property would be treated as used in a single rental real estate undertaking under this rule, the taxpayer may, in certain circumstances, treat a portion of the leased property as a rental real estate undertaking that is separate from the undertaking or undertakings in which the remaining portion of the property is treated as used. Reg. § 1.469-4T(k)(2)(iii). Also, special rules apply to an oil or gas well. Reg. § 1.469-4T(e).

[3121] Reg. § 1.469-4T(c)(1).

[3122] For this purpose, Reg. § 1.469-4T(c)(2)(iii) is reproduced below.

[3123] For this purpose, Reg. § 1.469-4T(c)(2)(v) provides that business and rental operations are owned by the same person if and only if one person is the direct owner of such operations. "Person" means and includes an individual, a trust, estate, partnership, association, company or corporation.
Code § 7701(a)(1). In applying this rule, two partnerships owned by the same individuals are considered separate persons. Reg. § 1.469-4T(d)(4), Example (5)(ii).

[3124] For this purpose, Reg. § 1.469-4T(c)(2)(iv) provides that "income-producing operations" means business and rental operations that are conducted at a location and relate to (or are conducted in reasonable anticipation of):

(A) The production of property at such location;
(B) The sale of property to customers at such location;
(C) The performance of services for customers at such location;
(D) Transactions in which customers take physical possession at such location of property that is made available for their use; or
(E) Any other transactions that involve the presence of customers at such location.

[3125] Reg. § 1.469-4T(c)(2)(i).

[3126] Generally, such an undertaking's rental operations are all of the undertaking's business and rental operations that involve making tangible property available for use by customers and the provision of property and services in connection therewith. However, the undertaking's operations that involve making short-term real property available for use by customers and the provision of property and services in connection therewith are not treated as rental operations if such operations, considered as a separate activity, would not constitute a rental activity. Also, such an undertaking's operations that involve making tangible property available during defined business hours for nonexclusive use by various customers are not treated as rental operations. Reg. § 1.469-4T(d)(3).

are treated as two separate undertakings,[3127] the income and expenses that are reasonably allocable to an undertaking is taken into account in determining the income or loss from the activity or activities that include such undertaking,[3128] and an undertaking is treated as a rental undertaking if and only if such undertaking, considered as a separate activity, would constitute a rental activity.[3129]

For purposes of fn 3122, Reg. § 1.469-4T(c)(2)(iii) provides:

(A) The term "location" means, with respect to any business and rental operations, a fixed place of business at which such operations are regularly conducted;

(B) Business and rental operations are conducted at the same location if they are conducted in the same physical structure or within close proximity of one another;

(C) Business and rental operations that are not conducted at a fixed place of business or that are conducted on the customer's premises shall be treated as operations that are conducted at the location (other than the customer's premises) with which they are most closely associated;

(D) All the facts and circumstances (including, in particular, the factors listed in paragraph (c)(3) of this section) are taken into account in determining the location with which business and rental operations are most closely associated; and

(E) Oil and gas operations that are conducted for the development of a common reservoir are conducted within close proximity of one another.

In determining whether a location is the location with which business and rental operations are most closely associated for purposes of (D) above, Reg. § 1.469-4T(c)(3) provides the following relationships between operations that are conducted at such location and other operations are generally the most significant:

(i) The extent to which other persons conduct similar operations at one location;

(ii) Whether such operations are treated as a unit in the primary accounting records reflecting the results of such operations;

(iii) The extent to which other persons treat similar operations as a unit in the primary accounting records reflecting the results of such similar operations;

(iv) The extent to which such operations involve products or services that are commonly provided together;

(v) The extent to which such operations serve the same customers;

[3127] Reg. § 1.469-4T(d)(1)(i). However, this rule requiring treatment as separate undertaking does not apply for any taxable year in which the rental operations, considered as a separate activity, would not constitute a rental activity, less than 20% of the gross income of the overall undertaking is attributable to rental operations, or less than 20% of the gross income of the overall undertaking is attributable to operations other than rental operations. Reg. § 1.469-4T(d)(2).
[3128] Reg. § 1.469-4T(d)(1)(ii), which is applied after considering the text accompanying fn. 3127.
[3129] Reg. § 1.469-4T(d)(1)(iii), which is applied after considering the text accompanying fn. 3127.

(vi) The extent to which the same personnel, facilities, or equipment are used to conduct such operations;

(vii) The extent to which such operations are conducted in coordination with or reliance upon each other;

(viii) The extent to which the conduct of any such operations is incidental to the conduct of the remainder of such operations;

(ix) The extent to which such operations depend on each other for their economic success; and

(x) Whether such operations are conducted under the same trade name.

II.K.1.b.ii. Grouping Activities – General Rules

When grouping a taxpayer's trade or business activities and rental activities for purposes of applying the passive activity loss and credit limitation rules of Code § 469, a taxpayer's activities include those conducted through C corporations that are subject to Code § 469, S corporations, and partnerships.[3130]

To meet these participation rules, one or more trade or business activities[3131] or rental activities[3132] may be treated as a single activity if the activities constitute an appropriate

[3130] Reg. § 1.469-4(a). *Schwalbach v. Commissioner*, 111 T.C. 215 (1998), held that this regulation is valid.

[3131] Reg. § 1.469-4(b)(1) provides that, for purposes of the grouping rules, "trade or business activities" are activities, other than rental activities or activities that are treated as incidental to an activity of holding property for investment, that:

(i) Involve the conduct of a trade or business (within the meaning of section 162);
(ii) Are conducted in anticipation of the commencement of a trade or business; or
(iii) Involve research or experimental expenditures that are deductible under section 174 (or would be deductible if the taxpayer adopted the method described in section 174(a)).

For purposes of the 3.8% tax on net investment income, the IRS takes the position that grouping cannot transform an investment activity into a trade or business. See text accompanying fn. 2400.

[3132] Reg. § 1.469-4(b)(2) provides that, for purposes of the grouping rules, one refers to the definition of rental activities under Reg. § 1.469-1T(e)(3). Reg. § 1.469-1T(e)(3)(i) provides that, generally, an activity is a rental activity for a taxable year if:

(A) During such taxable year, tangible property held in connection with the activity is used by customers or held for use by customers; and
(B) The gross income attributable to the conduct of the activity during such taxable year represents (or, in the case of an activity in which property is held for use by customers, the expected gross income from the conduct of the activity will represent) amounts paid or to be paid principally for the use of such tangible property (without regard to whether the use of the property by customers is pursuant to a lease or pursuant to a service contract or other arrangement that is not denominated a lease).

However, Reg. § 1.469-1T(e)(3)(ii) provides that an activity involving the use of tangible property is not a rental activity for a taxable year if, for such taxable year:

(A) The average period of customer use for such property is seven days or less;
(B) The average period of customer use for such property is 30 days or less, and significant personal services (within the meaning of paragraph (e)(3)(iv) of this section) are provided by or on behalf of the owner of the property in connection with making the property available for use by customers;

economic unit for the measurement of gain or loss for purposes of the passive loss rules.[3133] A taxpayer may use any reasonable method of applying the relevant facts and circumstances in grouping activities.[3134] The factors listed below, not all of which are necessary to treat more than one activity as a single activity, are given the greatest weight in determining whether activities constitute an appropriate economic unit for the measurement of gain or loss for purposes of the passive loss rules:[3135]

- Similarities and differences in types of trades or businesses;
- The extent of common control;
- The extent of common ownership;
- Geographical location; and
- Interdependencies between or among the activities (for example, the extent to which the activities purchase or sell goods between or among themselves, involve products or

---

(C) Extraordinary personal services (within the meaning of paragraph (e)(3)(v) of this section) are provided by or on behalf of the owner of the property in connection with making such property available for use by customers (without regard to the average period of customer use);

(D) The rental of such property is treated as incidental to a nonrental activity of the taxpayer under paragraph (e)(3)(vi) of this section;

(E) The taxpayer customarily makes the property available during defined business hours for nonexclusive use by various customers; or

(F) The provision of the property for use in an activity conducted by a partnership, S corporation, or joint venture in which the taxpayer owns an interest is not a rental activity under paragraph (e)(3)(vii) of this section.

[3133] Reg. § 1.469-4(c)(1). The IRS' checklist for grouping entities is at http://www.irs.gov/Businesses/Small-Businesses-&-Self-Employed/Passive-Activity-Loss-ATG-Exhibit-8-1-Activities-Grouping-Entities. Its Audit Techniques Guide explains the grouping rules at http://www.irs.gov/Businesses/Small-Businesses-&-Self-Employed/Passive-Activity-Loss-ATG-Chapter-8-Activities-Grouping-Rules.

[3134] Reg. § 1.469-4(c)(2). In TAM 201634022, a surgeon did not group with his medical practice his interest in a surgical center. The TAM permitted the non-grouping:

> We conclude that the facts and circumstances of this case, as presented and analyzed under the five-factor test of § 1.469-4(c), suggest that there may be more than one reasonable method for grouping the taxpayers' activities into appropriate economic units. We also conclude that the facts and circumstances, as presented, do not support a determination that the taxpayers' grouping of the interests in X, Y, and P as separate activities is clearly inappropriate for purposes of either § 1.469-4(e)(2) or § 1.469-4(f). We further conclude that the facts as presented do not support a determination that H acquired his interest in P and treated it as a separate activity apart from X and Y with a principal purpose of circumventing the underlying purpose of § 469, for purposes of § 1.469-4(f). Therefore, we conclude that the Commissioner does not have authority to regroup the taxpayers' interests in X, Y, and P as a single activity under § 1.469-4(f) to prevent tax avoidance.

Hardy v. Commissioner, T.C. Memo. 2017-16, refused to allow the IRS to regroup the taxpayer's reasonable decision not to group; the IRS had argued that Reg. § 1.469-4(f)(2) applied. Reg. § 1.469-4(f)(2) provides that the IRS may regroup a partnership's activity leasing equipment to the partners' medical practices where the partners had passive losses. The taxpayer also successfully analogized his situation to the TAM in showing that his decision not to group was reasonable.

[3135] Reg. § 1.469-4(c)(2). *Lamas v. Commissioner*, T.C. Memo. 2015-59, held that all five factors were satisfied when two businesses with similar ownership operated from the same office.

services that are normally provided together, have the same customers, have the same employees, or are accounted for with a single set of books and records).

Total lack of interdependence precludes grouping.[3136]

In determining groupings, generally all the facts and circumstances are taken into account in determining whether undertakings are controlled by the same interests; the reality of control, not its form or mode of exercise, is determinative.[3137] In applying this rule:

- Two or more undertakings of a taxpayer are part of the same common-ownership group for purposes of this rule if and only if the sum of the common-ownership percentages of any five or fewer persons (not including pass-through entities) with respect to such undertakings exceeds 50%; the common-ownership percentage of a person with respect to such undertakings is the person's smallest ownership percentage in any such undertaking.[3138]

- If, without regard to this sentence, an undertaking of a taxpayer is part of two or more common-ownership groups, any undertakings of the taxpayer that are part of any such common-ownership group shall be treated for purposes of this test as part of a single common-ownership group in determining the activities of such taxpayer.[3139]

- A person's ownership percentage in an undertaking or in a pass-through entity shall include any interest in such undertaking or pass-through entity that the person holds directly and the person's share of any interest in such undertaking or pass-through entity that is held through one or more pass-through entities (but a beneficiary does not get included by reason of a trust's ownership).[3140]

- A person's ownership percentage in a pass-through entity or in an undertaking shall be determined by treating such person as the owner of any interest that a person related person (applying Code § 267(b)[3141] or 707(b)(1))[3142] owns (determined without regard to this sentence) in such pass-through entity or in such undertaking;[3143] however, the common-ownership percentage of five or fewer persons with respect to two or more undertakings shall be determined, in any case in which, after the application of the preceding sentence,

[3136] *Williams v. Commissioner*, T.C. Memo. 2014-158.
[3137] Reg. § 1.469-4T(j)(1).
[3138] Reg. § 1.469-4T(j)(2)(ii).
[3139] Reg. § 1.469-4T(j)(2)(iii).
[3140] Reg. § 1.469-4T(j)(3)(i). In applying this pass-through test, Reg. § 1.469-4T(j)(3)(ii) provides that:
- A partner's interest in a partnership and share of any interest in a pass-through entity or undertaking held through a partnership shall be determined on the basis of the greater of such partner's percentage interest in the capital (by value) of such partnership or such partner's largest distributive share of any item of income or gain (disregarding Code § 707(c) guaranteed payments) of such partnership.
- A shareholder's interest in an S corporation and share of any interest in a pass-through entity or undertaking held through an S corporation shall be determined on the basis of such shareholder's stock ownership.
- A beneficiary's interest in a trust or estate and share of any interest in a pass-through entity or undertaking held through a trust or estate shall not be taken into account.

[3141] Code § 267(b) is reproduced in part II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses.
[3142] For a description of Code § 707(b), see part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.
[3143] Reg. § 1.469-4T(j)(3)(iii)(A), (C).

two or more such persons own the same interest in any such undertaking (the "related-party owners") by treating as the only owner of such interest (or portion thereof) the related-party owner whose ownership of such interest (or a portion thereof) would result in the highest common-ownership percentage.[3144]

Grouping is subject to the following limitations:[3145]

- A rental activity may not be grouped with a trade or business activity unless the activities being grouped together constitute an appropriate economic unit and:[3146]
  - The rental activity is insubstantial in relation to the trade or business activity;
  - The trade or business activity is insubstantial in relation to the rental activity;[3147] or
  - Each owner of the trade or business activity has the same proportionate ownership interest in the rental activity, in which case the portion of the rental activity that involves the rental of items of property for use in the trade or business activity may be grouped with the trade or business activity.[3148]
- An activity involving the rental of real property and an activity involving the rental of personal property (other than personal property provided in connection with the real property or real property provided in connection with the personal property) may not be treated as a single activity.[3149]
- Generally, a taxpayer that owns an interest as a limited partner or a limited entrepreneur,[3150] in certain activities described in the at-risk rules,[3151] may not group that activity with any

---

[3144] Reg. § 1.469-4T(j)(3)(iii)(B).
[3145] Reg. § 1.469-4(d).
[3146] Reg. § 1.469-4(d)(1).
[3147] *Stanley v. U.S.*, 116 A.F.T.R.2d 2015-5419 (D. Ark. 11/12/2015), held that running golf courses provided as an amenity to apartment complexes, but open to the public for a fee, constituted an insubstantial activity, even though golf revenue might have approached 20% of revenue from operations. The golf courses facilitated apartment rentals and sometimes helped overcome neighborhood opposition to the apartments being built; see fn. 3204 for IRS' nonacquiescence to *Stanley*.
[3148] If this proportionality cannot be achieved, consider using the structure provided in part II.E Recommended Structure for Entities, especially part II.E.9 Real Estate Drop Down into Preferred Limited Partnership, assigning disproportionate preferred profits interest related to the disproportionate ownership of the real estate.
[3149] Reg. § 1.469-4(d)(2)
[3150] As used here, a limited entrepreneur is a person does not actively participate in the management of a farm. Code § 464(e)(2).
[3151] Code § 465(c)(2)(A) treats as a separate activity under the at-risk rules: film or video tape, Code § 1245 property which is leased or held for leasing, a farm, oil and gas property (as defined under Code § 614), or geothermal property (as defined under Code § 614). However, Code § 465(c)(2)(B)(i) treats as a single activity all of a partnership's or S corporation's activities with respect to Code § 1245 (generally depreciable personal property) properties that are leased or held for lease and are placed in service in any taxable year of the partnership or S corporation. Also, Code § 465(c)(2)(B)(ii) treats as a single activity a trade or business (i) in which the taxpayer actively participates, or (ii) that is carried on by a partnership or an S corporation if 65% or more of the entity's losses for the taxable year are allocable to persons who actively participate in the management of the trade or business. This is a general overview, and one needs to look to the regulations under Code § 465 for a more accurate description. See part II.G.6.b Code § 1245 Property to explain above references to Code § 1245.

other activity. A taxpayer that owns an interest as a limited partner or a limited entrepreneur in an activity described in the preceding sentence may group that activity with another activity in the same type of business if the activities constitute an appropriate economic unit for the measurement of gain or loss for purposes of the passive loss rules.[3152]

- The IRS may issue additional guidance prohibiting grouping.[3153]

Finally, grouping does not help with the real estate professional test under part II.K.1.e.iii Real Estate Professional Converts Rental to Nonpassive Activity, although those rules do provide a separate aggregation election.[3154]

II.K.1.b.iii. How to Report Grouping

Generally, a taxpayer must file a written statement with its original income tax return for the first taxable year in which two or more trade or business activities or rental activities are originally grouped as a single activity.[3155] Even before the rule became effective, merely reporting an activity is nonpassive when the taxpayer has another activity that is nonpassive does not support an inference of grouping.[3156]

Rogerson v. Commissioner, T.C. Memo. 2022-49, which was primarily a case about the 5-out of-10 rule for material participation,[3157] discussed rules before and after 2014:

> The regulations Mr. Rogerson cites required RAC to perform a grouping analysis for the years before 2014. See Treas. Reg. § 1.469-4(d)(5)(i) ("[A]n S corporation...must group its activities under the rules of this section."). Mr. Rogerson concedes that, before 2014, RAC reported the consolidated results of the entire aerospace business without differentiation.[29] This approach indicates that RAC treated the aerospace business as a single activity (or as multiple activities grouped into a single activity) for purposes of section 469. Mr. Rogerson concedes as much, stating: "No position was taken on any RAC return before 2014 reflecting anything other than a single activity." Pet'r's Simultaneous Suppl. Br. 25. And Mr. Rogerson was not free to distinguish between his various aerospace activities for purposes of section 469 for any year in which RAC combined them. See Treas. Reg. § 1.469-4(d)(5)(i) (providing that a shareholder of an S corporation may not treat activities grouped together by his corporation as separate

---

[3152] Reg. § 1.469-4(d)(3). The IRS audit guide at http://www.irs.gov/Businesses/Small-Businesses-&-Self-Employed/Passive-Activity-Loss-ATG-Chapter-8-Activities-Grouping-Rules described the rule as follows (emphasis in original):

> Limited partners involved in motion pictures, videotapes, farming, exploring or exploiting oil and gas, and exploring or exploiting geothermal deposits may group with another activity **only if it is in the same line of business**.

[3153] Reg. § 1.469-4(d)(4). Rev. Proc. 2007-65, Sec. 4.09, treats certain wind farms as separate activities. The last time I checked, treatises had not mentioned any other guidance issued under this regulation.

[3154] See fns. 3203-3204.

[3155] Rev. Proc. 2010-13, Section 4.02, which further provides:

> This statement must identify the names, addresses, and employer identification numbers, if applicable, for the trade or business activities or rental activities that are being grouped as a single activity. In addition, any statement reporting a new grouping of two or more trade or business activities or rental activities as a single activity must contain a declaration that the grouped activities constitute an appropriate economic unit for the measurement of gain or loss for purposes of section 469.

[3156] *Hardy v. Commissioner*, T.C. Memo. 2017-16.

[3157] Part II.K.1.a.ii Material Participation.

activities). Accordingly, RAC's treatment of the aerospace business as a single activity before 2014 required Mr. Rogerson to take the same approach. He did so and determined that his involvement in the overall business was active. The five of ten test requires nothing more.

> [29] Mr. Rogerson cites *Hardy v. Commissioner*, T.C. Memo. 2017-16, in which our Court concluded that taxpayers who merely report an S corporation's activity as nonpassive do not thereby group that activity with their other nonpassive activity. But that case considered whether activity reported on a Schedule K-1 had been grouped with other activity not reported on the Schedule K-1; it did not consider whether undifferentiated amounts reported on a single Schedule K-1 had been grouped together. *Id*. at *15–16. Additionally, Hardy analyzed only the grouping regulations under Treasury Regulation § 1.469-4 and did not consider the five of ten test.

If a taxpayer adds a new trade or business activity or a rental activity to an existing grouping for a taxable year, the taxpayer shall file a written statement with the taxpayer's original income tax return for that taxable year.[3158] If it is determined that the taxpayer's original grouping was clearly inappropriate or a material change in the facts and circumstances has occurred that makes the original grouping clearly inappropriate, the taxpayer must regroup the activities.[3159] Until the taxpayer makes a change to the grouping as described in the preceding sentences of this paragraph, a taxpayer is not required to file a written statement reporting the grouping of the trade or business activities and rental activities that have been made before taxable years beginning on or after January 25, 2010.[3160]

If a taxpayer is engaged in two or more trade or business activities or rental activities and fails to report whether the activities have been grouped as a single activity as described in any of the above paragraphs, then each trade or business activity or rental activity will be treated as a separate activity.[3161] However, a timely disclosure is deemed made by a taxpayer who has filed all affected income tax returns consistent with the claimed grouping of activities and makes the required disclosure on the income tax return for the year in which the failure to disclose is first discovered by the taxpayer.[3162]

[3158] Rev. Proc. 2010-13, Section 4.03, which provides reporting requirements similar to those of Section 4.02.

[3159] Rev. Proc. 2010-13, Section 4.04, which provides reporting requirements similar to those of Section 4.02, but also provides:

> If two or more activities are regrouped into a single activity, the statement reporting a regrouping must also contain a declaration that the regrouped activities constitute an appropriate economic unit for the measurement of gain or loss for purposes of section 469. Furthermore, the statement reporting a regrouping must contain an explanation of why the taxpayer's original grouping was determined to be clearly inappropriate or the nature of the material change in the facts and circumstances that makes the original grouping clearly inappropriate.

[3160] Rev. Proc. 2010-13, Sections 4.06 and 5.

[3161] Rev. Proc. 2010-13, Section 4.07.

[3162] Rev. Proc. 2010-13, Section 4.07. Furthermore:

> If the failure to disclose is first discovered by the Service, however, the taxpayer must also have reasonable cause for not making the disclosures required by this revenue procedure. Although the default rule established by this section 4.07 will generally result in unreported activities being treated as separate activities, the Commissioner may still regroup a taxpayer's activities to prevent tax avoidance pursuant to § 1.469-4(f). This revenue procedure provides alternative relief for untimely filing of the disclosures required by this revenue procedure; therefore, relief for

Partnerships and S corporations are not subject to the above requirements:[3163]

> Instead, partnerships and S corporations must comply with the disclosure instructions for grouping activities provided for on Form 1065, U.S. Return of Partnership Income and Form 1120S, U.S. Income Tax Return for an S corporation, respectively. Generally, compliance with the applicable form requires disclosing the entity's groupings to the partner or shareholder by separately stating the amounts of income and loss for each grouping conducted by the entity on attachments to the entity's annual Schedule K-1. The partner or shareholder is not required to make a separate disclosure of the groupings disclosed by the entity under §§ 4.02, 4.03, and 4.04 of this revenue procedure unless the partner or shareholder (1) groups together any of the activities that the entity does not group together, (2) groups the entity's activities with activities conducted directly by the partner or shareholder, or (3) groups the entity's activities with activities conducted through other section 469 entities. Pursuant to § 1.469-4(d)(5)(i), a shareholder or partner may not treat activities grouped together by a section 469 entity as separate activities.

Instructions to 2022 Form 1065 provide under "Grouping Activities":

> If you group your activities under these rules for section 469 purposes, check the appropriate box in item K below the name and address block on page 1 of Form 1065.

Under "Passive Activity Reporting Requirements," those Instructions provide:

> 1. If the partnership carries on more than one activity, provide an attached statement for each activity conducted through the partnership that identifies the type of activity conducted (trade or business, rental real estate, or rental activity other than rental real estate). See Grouping Activities, earlier.
>
> 2. On the attached statement for each activity, provide a statement, using the same box numbers as shown on Schedule K-1, detailing the net income (loss), credits, and all items required to be separately stated under section 702(a) from each trade or business activity, from each rental real estate activity, from each rental activity other than a rental real estate activity, and from investments. If the partnership grouped separate activities, the attachments must identify each group. The attached group activity description must be sufficient for a partner to determine if its other activities qualify to be grouped with any groups provided by the partnership.

Instructions to 2022 Form 1120S provide under "Grouping Activities":

> If you group your activities under these rules for section 469 purposes, check the appropriate box in item J.

Under "Passive Activity Reporting Requirements," those Instructions provide:

> 1. If the corporation carries on more than one activity, provide an attached statement for each activity conducted through the corporation that identifies the type of activity

---

untimely disclosures under § 301.9100 of the Procedure and Administration Regulations is not available pursuant to § 301.9100-1(d)(2).

[3163] Rev. Proc. 2010-13, Section 4.05.

conducted (trade or business, rental real estate, or rental activity other than rental real estate). See Grouping Activities, earlier.

2. The attachment(s) must identify each group. The attached group activity description must be sufficient for the shareholders to determine if their other activities qualify to be added to any groups provided by the corporation.

3. On the attached statement for each activity, provide a statement using the same box numbers as shown on Schedule K-1 and detailing the net income (loss), credits, and all items required to be separately stated under section 1366(a)(1) from each trade or business activity, from each rental real estate activity, from each rental activity other than a rental real estate activity, and from investments….

The instructions do not address the consequences of the corporation's failing to attach such a statement. Has the S corporation implicitly elected to group if it fails to attach such a statement? Or has it failed to comply with the instructions and deemed not to have grouped?[3164] An S corporation that discovers that it has not addressed this issue should be able to cure it, if it makes the required disclosure on the income tax return for the year in which the S corporation first discovers the failure to disclose.[3165]

Publication 925 (2022), "Passive Activity and At-Risk Rules," provides:

> **Disclosure Requirement**
>
> For tax years beginning after January 24, 2010, the following disclosure requirements for groupings apply. You're required to report certain changes to your groupings that occur during the tax year to the IRS. If you fail to report these changes, each trade or business activity or rental activity will be treated as a separate activity. You will be considered to have made a timely disclosure if you filed all affected income tax returns consistent with the claimed grouping and make the required disclosure on the income tax return for the year in which you first discovered the failure to disclose. If the IRS discovered the failure to disclose, you must have reasonable cause for not making the required disclosure.
>
> **New grouping**. You must file a written statement with your original income tax return for the first tax year in which two or more activities are originally grouped into a single activity. The statement must provide the names, addresses, and employer identification numbers (EINs), if applicable, for the activities being grouped as a single activity. In addition, the statement must contain a declaration that the grouped activities make up an

[3164] Rev. Proc. 2010-13, Section 4.07 provides:

> Except as provided in § 4.05, if a taxpayer is engaged in two or more trade or business activities or rental activities and fails to report whether the activities have been grouped as a single activity in accordance with this revenue procedure, then each trade or business activity or rental activity will be treated as a separate activity for purposes of applying the passive activity loss and credit limitation rules of section 469.

Section 4.05 is what provides that partnerships and S corporations must comply with the disclosure instructions for grouping activities provided for on Form 1065 or 1120S. If the partnership or S corporation does not comply with the instructions, does that kick the entity out of the safe harbor and require treatment as separate activities?

[3165] See fn. 3162.

appropriate economic unit for the measurement of gain or loss under the passive activity rules.

Addition to an existing grouping. You must file a written statement with your original income tax return for the tax year in which you add a new activity to an existing group. The statement must provide the name, address, and EIN, if applicable, for the activity that's being added and for the activities in the existing group. In addition, the statement must contain a declaration that the activities make up an appropriate economic unit for the measurement of gain or loss under the passive activity rules.

Regrouping. You must file a written statement with your original income tax return for the tax year in which you regroup the activities. The statement must provide the names, addresses, and EINs, if applicable, for the activities that are being regrouped. If two or more activities are being regrouped into a single activity, the statement must contain a declaration that the regrouped activities make up an appropriate economic unit for the measurement of gain or loss under the passive activity rules. In addition, the statement must contain an explanation of the material change in the facts and circumstances that made the original grouping clearly inappropriate.

Groupings by partnerships and S corporations. Partnerships and S corporations aren't subject to the rules for new grouping, addition to an existing grouping, or regrouping. Instead, they must comply with the disclosure instructions for grouping activities provided in their Form 1065, U.S. Return of Partnership Income, or Form 1120-S, U.S. Income Tax Return for an S Corporation, whichever is applicable.

The partner or shareholder isn't required to make a separate disclosure of the groupings disclosed by the entity unless the partner or shareholder:

- Groups together any of the activities that the entity doesn't group together,
- Groups the entity's activities with activities conducted directly by the partner or shareholder, or
- Groups an entity's activities with activities conducted through another entity.

A partner or shareholder may not treat activities grouped together by the entity as separate activities.

II.K.1.b.iv. Regrouping Activities Transitioning into 3.8% Tax on Net Investment Income

The enactment of the 3.8% tax on net investment income provides an opportunity for taxpayers to revisit their groupings. The preamble to the proposed regulations under Code § 1411 provides:[3166]

> Section 1.469-4(e)(1) provides that, except as provided in §§ 1.469-4(e)(2) and 1.469-11, once a taxpayer has grouped activities, the taxpayer may not regroup those activities in subsequent taxable years. The Treasury Department and the IRS have determined on prior occasions that taxpayers should be given a "fresh start" to redetermine their groupings. The enactment of section 1411 may cause taxpayers to reconsider their

[3166] Part 6.B.1.(b)(4) of the preamble.

> previous grouping determinations, and therefore the Treasury Department and the IRS have determined that taxpayers should be given the opportunity to regroup. Thus, the proposed regulations provide that taxpayers may regroup their activities in the first taxable year beginning after December 31, 2013, in which the taxpayer meets the applicable income threshold in proposed § 1.1411-2(d) and has net investment income (as defined in proposed § 1.1411-4). The determination in the preceding sentence is made without regard to the effect of the regrouping. Taxpayers may regroup their activities in reliance on this proposed regulation for any taxable year that begins during 2013 if section 1411 would apply to such taxpayer in such taxable year. A taxpayer may only regroup activities once pursuant to § 1.469-11(b)(3)(iv)(A), and any such regrouping will apply to the taxable year for which the regrouping is done and all subsequent years.
>
> The regrouping must comply with the existing requirements under § 1.469-4. For example, § 1.469-4(e) provides that taxpayers must comply with disclosure requirements that the Commissioner may prescribe with respect to both their original groupings and the addition and disposition of specific activities within those chosen groupings in subsequent taxable years. On January 25, 2010, the Treasury Department and the IRS published Revenue Procedure 2010-13 (2010-4 IRB 329), which requires taxpayers to report to the IRS their groupings and regroupings of activities and the addition of specific activities within their existing groupings of activities for purposes of section 469 and § 1.469-4. Thus, the disclosure requirements of § 1.469-4(e) and Revenue Procedure 2010-13 require taxpayers who regroup their activities pursuant to proposed § 1.469-11(b)(3)(iv) to report their regroupings to the IRS. See § 601.601(d)(2).

The final regulations[3167] allow an individual, estate, or trust to regroup in the first taxable year beginning after December 31, 2013, in which Code § 1411 would apply to such taxpayer, if the taxpayer has net investment income[3168] and such taxpayer's income exceeds the applicable thresholds.[3169]

The preamble to the final regulations explains:[3170]

> The final regulations retain the requirement that regrouping under § 1.469-11(b)(3)(iv) may occur only during the first taxable year beginning after December 31, 2012, in which (1) the taxpayer meets the applicable income threshold under section 1411, and (2) has net investment income. The Treasury Department and the IRS believe that the interaction between section 1411 and section 469 justifies the section 1411 regrouping rule, and that, if a taxpayer does not have a section 1411 tax liability, the reason for allowing the regrouping does not apply. The Treasury Department and the IRS acknowledge that, in the case of regrouping elections by partnerships and S corporations, one commentator's implied assertion is correct that imposition of section 1411 on a passthrough entity's owner(s) is the same change in law that

[3167] Reg. § 1.469-11(b)(3)(iv).
[3168] As defined in Reg. § 1.1411-4.
[3169] Reg. § 1.469-1(b)(3)(iv)(B) refers to the modified adjusted gross income (as defined in Reg. § 1.1411-2(c)) of an individual (as defined in Reg. § 1.1411-2(a)) exceeding the applicable threshold in Reg. § 1.1411-2(d) or the adjusted gross income of an estate or trust (as defined in Reg. § 1.1411-3(a)(1)(i)) exceeding the amount described in Reg. § 1.1411-3(a)(1)(ii)(B)(2).
[3170] T.D. 9644. The first sentence quoted here appears to be erroneous, in that, as fn. 3167 notes, the final regulations allow regrouping in the first taxable year beginning after December 31, 2013, rather than the first taxable year beginning after December 31, 2012. The mention of December 31, 2012 might have been in light of taxpayers being able to rely on the proposed regulations to regroup in their 2013 returns.

precipitated the proposed regulation's allowance of regrouping in the first instance. However, if the Treasury Department and the IRS were to expand the scope of the regulations to allow regrouping by partnerships and S corporations, then taxpayers with no tax liability under section 1411 indirectly would be allowed to regroup. Accordingly, the final regulations do not adopt this suggestion.

However, after considering the comments, the Treasury Department and the IRS agree with the commentators' concerns regarding the potential unfairness to taxpayers who become subject to section 1411 after adjustments to, for example, income or deduction items after an original return has been filed. Therefore, the final regulations allow a taxpayer to regroup under § 1.469-11(b)(3)(iv) on an amended return, but only if the taxpayer was not subject to section 1411 on his or her original return (or previously amended return), and if, because of a change to the original return, the taxpayer owed tax under section 1411 for that taxable year. This rule applies equally to changes to modified adjusted gross income or net investment income upon an IRS examination.

However, if a taxpayer regroups on an original return (or previously amended return) under these rules, and then subsequently determines that the taxpayer is not subject to section 1411 in that year, such regrouping is void in that year and all subsequent years until a valid regrouping is done. The voiding of the regrouping may cause additional changes to the taxpayer's current year return and may warrant corrections to future year returns to restore the taxpayer's original groupings. The final regulations contain two exceptions to such voided elections. First, the final regulations allow a taxpayer to adopt the voided grouping in a subsequent year without filing an amended return if the taxpayer is subject to section 1411 in such year. Second, if the taxpayer is subject to Section 1411 in a subsequent year, the taxpayer may file an amended return to regroup in a manner that differs from the previous year's voided regrouping. The final regulations provide four new examples on the amended return regrouping rules. Furthermore, § 1.1411-2(a)(2)(iii) of the final section 1411 regulations also contains a similar rule applicable to section 6013(g) elections.

The preamble quoted above acknowledges that, if a passive activity is held through a partnership or an S corporation, any grouping is done first at the entity level, and those entities are not described above.

Practice Tips:

- If a partnership has a bunch of long-term leases, consider converting the partnership into an investment trust,[3171] such as a Delaware statutory trust,[3172] so that each owner can separately engage in regrouping.

- If it is later determined that a regrouping was invalid because the NII tax would not otherwise have applied, a new election would need to be made on a subsequent return. As noted above, a taxpayer can amend such a subsequent return to make the regrouping election.[3173] Consider whether a regrouping election might be reaffirmed each year in case the initial regrouping was invalid; this would be worthwhile only if reaffirming the regrouping does not take much work.

For more about regrouping, see Kirk and Satchit, "Peeling The Onion: Passive Loss Regrouping in Light of Section 1411," *Business Entities (WG&L)* (March/April 2015).

II.K.1.b.v. Is Grouping Advisable?

Grouping undertakings together as a single activity means that an undertaking is not treated as disposed of, thereby freeing suspended losses, until all undertakings in that grouped activity are disposed of.[3174]

Also, grouping might dilute the personal service aspects of an undertaking, throwing it out of the favorable rules for material participation that apply to personal services activities.[3175]

Grouping does not help with the real estate professional test under part II.K.1.e.iii Real Estate Professional Converts Rental to Nonpassive Activity.[3176]

II.K.1.c. Attributing Material Participation from Business Entities to Their Employees and Vice Versa (Including Limited Partnership with Corporate General Partner)

When the same individual owns the corporate general partner, is the sole limited partner, and works in the partnership's business as an individual, this work can cause not only the individual but also the corporation to materially participate.[3177] Note that a special provision applying the

---

[3171] See part II.D.4.a Investment Trusts. For example, all of the partners might contribute their partnership interests into an investment trust, and the partnership would dissolve as a matter of state law (if it is a general partnership) or by the entity that was a partnership filing the appropriate termination documentation. The trust itself would be a limited liability entity. However, it would have to be carefully structured so that the trust's activity does not rise to the level of a partnership. The partners would need to group that activity with other activities in which the partners engaged to satisfy the appropriate tests. When done to avoid the 3.8% tax on net investment income, this would require threading a very fine needle, in that the trust would be taking the position that it is not engaged in a trade or business (to satisfy the requirements described in part II.D.4.a Investment Trusts) and its owners would argue that their interest in the trust, when combined with their other activities, rises to the level of a trade or business (to satisfy the requirements described in part II.I.8.c Application of 3.8% Tax to Rental Income).
[3172] See fn. 688.
[3173] Reg. § 1.469-11(b)(3)(iv)(C)(2).
[3174] For more information on dispositions, see fn. 3040.
[3175] See text accompanying fn. 3065.
[3176] See fn. 3203. Real estate professionals have a separate aggregation election available.
[3177] Reg. § 1.469-5T(k), Example (1).

passive loss rules to certain C corporation owners mandates the result regarding the corporation's participation.[3178]

When an individual owns the corporate general partner, is the sole limited partner, and works in the partnership's business as an employee of the corporate general partner, this work can cause not only the corporation but also the individual to materially participate.[3179]

When an individual is the sole limited partner and works in the partnership's business as an employee of the corporate general partner, but that individual does not own the corporate general partner, this work can cause the individual to materially participate but will not affect the corporation's material participation.[3180]

These examples are consistent with the idea that an individual receives credit for participation in any capacity.[3181]

II.K.1.d. Applying Passive Loss Rules to a Retiring Partner under Code § 736

Except as described below, any Code § 707(c) payment to a partner for services or the use of capital, including any Code § 736(a)(2) payment (relating to guaranteed payments made in liquidation of the interest of a retiring or deceased partner), constitutes a payment for services or as the payment of interest, respectively, under the passive loss rules and not as a distributive share of partnership income.[3182]

If any gain or loss is taken into account by a retiring partner or a deceased partner's successor in interest as a result of a Code 736(b) payment,[3183] the gain or loss constitutes passive activity gross income or deduction only to the extent that the gain or loss would have been passive activity gross income or deduction of the retiring or deceased partner if it had been recognized at the time the liquidation of the partner's interest began.[3184]

If a Code § 736(a) payment is made in liquidation of a retiring or deceased partner's interest and that person takes into account any income as a result of the payment that is attributable to the portion (if any) of the payment that is allocable to the partnership's unrealized receivables[3185] and goodwill, the percentage of the income treated as passive shall not exceed the percentage of passive income that would be included in the income that person would have recognized if

the unrealized receivables and goodwill had been sold at the time that the liquidation of the partner's interest began.[3186]

For some background, see part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.

II.K.1.e. Rental Activities

Generally, "passive activity" also includes any rental activity.[3187]

II.K.1.e.i. What Is Rental?

Generally, an activity is a rental activity for a taxable year if:[3188]

- During that taxable year, tangible property is used by customers or held for use by customers, and
- The gross income attributable to the activity during such taxable year represents (or, in the case of an activity in which property is held for use by customers, the expected gross income from the conduct of the activity will represent) amounts paid or to be paid principally for the use of such tangible property (without regard to whether the use of the property by customers is pursuant to a lease or pursuant to a service contract or other arrangement that is not denominated a lease).

However, regulations exclude from treatment as rental the use of tangible property for a taxable year if, for that taxable year:[3189]

- The average period of customer use for such property is seven days or less;[3190]

[3186] Reg. § 1.469-2(e)(2)(iii)(B)(1). For purposes of this test, calculate the portion (if any) of a Code § 736(a) payment allocable to a partnership's unrealized receivables and goodwill using the principles of Reg. § 1.736-1(b) for determining the portion of a payment made under Code § 736 treated as a distribution under Code § 736(b). Reg. § 1.469-2(e)(2)(iii)(B)(2). Reg. § 1.736-1(b)(3) provides:

> To the extent that the partnership agreement provides for a reasonable payment with respect to good will, such payments shall be treated under section 736(b) and this paragraph. Generally, the valuation placed upon good will by an arm's length agreement of the partners, whether specific in amount or determined by a formula, shall be regarded as correct.

Recognizing this exception, the Preamble to Prop. Reg. § 1.1411-7 (net investment income tax) (12/02/2013), Fed. Reg. Vol. 78, No. 231, pp. 72451 et seq., provides:

> Section 736(a) payments also include payments to retiring general partners of service partnerships in exchange for unrealized receivables (other than receivables described in the flush language of section 751(c)) or for goodwill (other than payments for goodwill provided for in the partnership agreement) (collectively, "Section 736(a) Property").

[3187] Code § 469(c)(2). An excellent article discussing how the passive loss rules apply to real estate investors and real estate professionals is Panitz and Lubin, "Higher Stakes for Tax Treatment of Rental Real Estate," *Journal of Accountancy*, at 56-62 (Dec. 2013).

[3188] Reg. § 1.469-1T(e)(3)(i).

[3189] Reg. § 1.469-1T(e)(3)(ii).

[3190] To facilitate finding a short rental period, instead of having the lease begin the date of signature or deposit, provide that lease begins with delivery and concludes with the return of the property, the latter which was successfully done in *Moreno v. U.S.*, 113 A.F.T.R.2d 2014-2149 (D. La 5/19/2014).

- The average period of customer use for such property is 30 days or less, and significant personal services are provided by or on behalf of the owner of the property in connection with making the property available for use by customers;

- Extraordinary personal services are provided by or on behalf of the owner of the property in connection with making such property available for use by customers (without regard to the average period of customer use);[3191]

- The rental of such property is treated as incidental to a nonrental activity of the taxpayer;

- The taxpayer customarily makes the property available during defined business hours for nonexclusive use by various customers; or

- The provision of the property for use in an activity conducted by a partnership, S corporation, or joint venture in which the taxpayer owns an interest is not a rental activity under the following exception:[3192]

    - If the taxpayer owns an interest in a partnership, S corporation, or joint venture conducting an activity other than a rental activity, and the taxpayer provides property for use in the activity in the taxpayer's capacity as an owner of an interest in such

---

Conversely, one cannot say than an average period of customer use for such property is more than seven days to avoid this exception (if being a real estate rental is desirable, which it may be for a real estate professional) by saying that a management company was continuously involved and was somehow the true customer when the taxpayer reserved use during that purported continuous rental to the management company. *Eger v. U.S.*, 405 F. Supp.3d 850 (N.D. Cal. 8/30/2019) (interpreting Reg. § 1.469-1(e)(3)(iii)(D), which determines the period of customer use).

[3191] Reg. § 1.469-1T(e)(3)(ii)(C), referring to extraordinary personal services under Reg. § 1.469-1T(e)(3)(ii)(C), which provides:

> *Extraordinary personal services*. For purposes of paragraph (e)(3)(ii)(C) of this section, extraordinary personal services are provided in connection with making property available for use by customers only if the services provided in connection with the use of the property are performed by individuals, and the use by customers of the property is incidental to their receipt of such services. For example, the use by patients of a hospital's boarding facilities generally is incidental to their receipt of the personal services provided by the hospital's medical and nursing staff. Similarly, the use by students of a boarding school's dormitories generally is incidental to their receipt of the personal services provided by the school's teaching staff.

In rejecting taxpayers' claim that they provided "extraordinary personal services" under the regulation, *Johnson v. U.S.*, 116 A.F.T.R.2d 2015-5486 (D. N.C. 2015), 117 A.F.T.R.2d 2016-947 (4th Cir. 2016), *cert. den*. 10/3/2016:

> None of the unsubstantiated evidence proffered by plaintiffs would support a finding that their rental homes in either Illinois or South Carolina offered services that were "akin to those services offered by a hospital or school, where the prime concern of the tenants is the receipt of services, whether medical, teaching, or, [this] case, legal[, financial, and psychological]." *Assaf*, 2005 WL 209726 4. The only statement provided by someone other than plaintiffs merely reveals that the "services" promised were provided; such "services" included the provision of continental breakfast items, furniture, and laundry facilities, which, as discussed above, do not constitute extraordinary personal services. The only "services" which would differentiate plaintiffs' rental homes from typical rental properties were the counseling services allegedly provided, and plaintiffs have simply failed to proffer anything more than their own conclusory statements to support a finding that the occupants' use of their property was incidental to their receipt of counseling services provided by Johnson.

[3192] Reg. § 1.469-1T(e)(3)(vii).

partnership, S corporation, or joint venture, the provision of such property is not a rental activity.

- Thus, if a partner contributes the use of property to a partnership, none of the partner's distributive share of partnership income is income from a rental activity unless the partnership is engaged in a rental activity. In addition, a partner's gross income attributable to a guaranteed payment under Code § 707(c)[3193] is not income from a rental activity under any circumstances.

- The determination of whether property used in an activity is provided by the taxpayer in the taxpayer's capacity as an owner of an interest in a partnership, S corporation, or joint venture shall be made on the basis of all of the facts and circumstances.

Rogerson v. Commissioner, T.C. Memo. 2022-49, explains:

> **a. Seven Days or Less Exception**
>
> As to the first exception, Mr. Rogerson has not requested any findings of fact or provided any evidence to allow us to conclude that his yacht activities involved charters of seven days or less during the years at issue or any other year. Mr. Rogerson claims that "[n]either TOTO nor Falcon Lair was available to be 'rented' for weeks at a time" and that "the Yacht Charter Activity was intended to provide short-term use for day trips and other short-term excursions." Pet'r's Simultaneous Opening Br. 78. But regardless of these plans, no customers chartered the yachts during 2014, 2015, or 2016. And unlike the affirmative rule for defining a rental activity, which considers a taxpayer's intended or expected use of property, the exceptions to that rule turn on what actually happened during the taxable year. *Compare* Temp. Treas. Reg. § 1.469-1T(e)(3)(i) (allowing consideration of potential customer use and expected income in identifying a rental activity), *with id*. subdiv. (ii)(A) and (B) (establishing exceptions based on the "average period of customer use"), *and* Treas. Reg. § 1.469-1(e)(3)(iii)(C) and (D) (calculating the average period of customer use based on actual customer activity). Without any customer use, it is impossible to establish (as required by the regulations) the average period of customer use for the yachts. Accordingly, Mr. Rogerson fails to qualify for the first exception.[33]
>
> [33] We express no view as to the outcome of a case in which the evidence demonstrates that one or more of the exceptions under Temporary Treasury Regulation § 1.469-1T(e)(3)(ii) had been met in prior years, but not during the years at issue. This case does not present such a scenario.
>
> **b. 30-day Exception**
>
> Mr. Rogerson's argument for the second exception falls short for the same reason. A claim in Mr. Rogerson's brief that "[n]o charter would have been for more than 30 days," Pet'r's Simultaneous Opening Br. 79, is not evidence, and again, the absence of any actual customer use of the yachts precludes us from determining that the average period of customer use was 30 days or less. Similarly, the fact that the TOTO and the Falcon Lair each had crews that conceivably could have provided services does not establish

[3193] For details on Code § 707(c), see part II.C.8.a Code § 707 - Compensating a Partner for Services Performed.

that significant personal services were in fact provided to customers. See Temp. Treas. Reg. § 1.469-1T(e)(3)(ii). Mr. Rogerson has requested no findings of fact nor produced any evidence about the kinds of services that crew members could or would provide to customers. And, more to the point, we know that no services were provided during the years at issue because the yachts were not chartered.

Mr. Rogerson has failed to establish that his yacht activities qualify under the exceptions provided in the temporary regulations. The activities therefore constituted rental activities and were per se passive during the years at issue.[34] See I.R.C. § 469(c)(2), (4), (j)(8); Temp. Treas. Reg. § 1.469-1T(e)(3)(i).[35]

[34] Mr. Rogerson's argument that he materially participated in the yacht activity would not change this conclusion, because rental activities are considered passive without regard to the taxpayer's level of participation. I.R.C. § 469(c)(2), (4). We therefore need not address it further.

[35] On January 12, 2021, just over two months before the trial of this case was scheduled to begin in March, the Commissioner filed a Motion for Leave to File an Amendment to Answer to further allege under section 183 that Mr. Rogerson did not engage in his yacht activities with an objective of realizing a profit. Mr. Rogerson objected on the ground that permitting the amendment would prejudice his preparation for trial. He further argued that the amendment came too late and essentially was designed to permit the Commissioner a "do-over" after the period for discovery had already run. After holding a status conference with the parties, the Court advised them that it intended to deny the Motion. The Court observed that permitting amendment would not be in the interest of justice in light of the procedural posture of the case, the timing of the request after the close of discovery, and the prejudice to Mr. Rogerson in preparing for trial on the existing issues, while at the same time being required to prepare for trial a different issue that turned on much different evidence. The Court also noted that the notice of deficiency specifically highlighted the issue sought to be challenged in the proposed amendment, while observing that the Commissioner had decided not to raise the issue in light of a prior resolution by IRS Appeals. The Court also advised the parties that the Motion would be formally addressed in any opinion issued in the case. Trial of this case was later postponed from March to May at the parties' request. Upon further consideration, for the reasons noted above, we will deny the Commissioner's Motion. See *Waterman v. Commissioner*, 91 T.C. 344, 349-51 (1988) (leave to amend may be denied upon a showing of prejudice to the petitioner); *Law v. Commissioner*, 84 T.C. 985, 990 (1985) (whether leave will be granted is a question falling within the discretion of the Court).

Rogerson v. Commissioner, 132 A.F.T.R.2d 2023-6624 (9th Cir. 11/30/2023), affirmed:

The tax court did not err in concluding that Rogerson's activity related to his two yachts was a rental activity under I.R.C. § 469 and Temp. Treas. Reg. § 1.469-1T(e)(3)(i). I.R.C. § 469(c)(2) provides that "the term `passive activity' includes any rental activity."[3] In turn, "[t]he term `rental activity' means any activity where payments are principally for the use of tangible property." I.R.C. § 469(j)(8).

[3] Section 469(c)(2) references an exception for real estate rental activity not at issue here. See I.R.C. § 469(c)(7).

The temporary regulations have added that an activity is generally a "rental activity" when "tangible property held in connection with the activity is used by customers or held for use by customers" and the gross income (or expected gross income) attributable to the activity represents "amounts paid or to be paid principally for the use of such tangible property." Temp. Treas. Reg. § 1.469-1T(e)(3)(i). The subsequent provision outlines several exceptions related to short-term rentals. *Id*. § 1.469-1T(e)(3)(ii).

The tax court found Rogerson's challenge to the validity of Temp. Treas. Reg. §1.469-1T untimely because he raised it for the first time in his motion for reconsideration. Similarly, we hold that Rogerson waived his challenge to the validity of Temp. Treas. Reg. § 1.469-1T by failing to raise it until after trial and an opinion on the merits. See *Ramona Equip. Rental, Inc. ex rel. U.S. v. Carolina Cas. Ins. Co.*, 755 F.3d 1063, 1070 (9th Cir. 2014) (holding an argument first raised in a post-judgment motion waived); *Beech Aircraft Corp. v. United States*, 51 F.3d 834, 841 (9th Cir. 1995) (per curiam) (same). Furthermore, as the tax court acknowledged in its denial of the motion for reconsideration, "without the temporary regulations in the picture, Mr. Rogerson's yacht activity would be covered by the general rule of the statute [I.R.C. § 469(j)(8)] and not be subject to any exception."

Rogerson next argues that the tax court applied the temporary regulation's general provision, Temp. Treas. Reg. § 1.469-1T(e)(3)(i), and the short-term rental exceptions, *id.* § 1.469-1T(e)(3)(ii), inconsistently. Specifically, Rogerson contends that the tax court erred in determining that the yachts were a rental activity under the general provision based on Rogerson's plan to charter them but considered actual charter activity (or lack thereof) to determine that neither short-term rental exception applied.

The tax court's application of the temporary regulation tracks the regulation's language. The general provision's definition of rental activity includes the holding of tangible property for future use by customers but, as the exceptions are written, actual activity, not intention, is relevant to their applicability. Compare Temp. Treas. Reg. § 1.469-1T(e)(3)(i)(A)–(B) ("[A]n activity is a rental activity...if...tangible property held in connection with the activity is...held for use by customers...[and] expected gross income from the conduct of the activity will represent[] amounts paid or to be paid principally for the use of such tangible property[.]" (emphasis added)) with id. § 1.469-1T(e)(3)(ii)(A)–(B) ("[A]n activity involving the use of tangible property is not a rental activity...if...(A) The average period of customer use for such property is seven days or less; (B) The average period of customer use for such property is 30 days or less, and significant personal services...are provided by or on behalf of the owner of the property in connection with making the property available for use by customers[.]"). As the tax court held, "[w]ithout any customer use, it is impossible to establish (as required by the regulations) the average period of customer use for the yachts."

We hold that Rogerson's argument that the yacht activity was not a rental activity as defined by I.R.C. § 469(j)(8) because it was not "principally" for the use of tangible property waived. See *Cold Mountain v. Garber*, 375 F.3d 884, 891 (9th Cir. 2004), as amended (Aug. 9, 2004) ("In general, we do not consider an issue raised for the first time on appeal.").[4] Furthermore, the record on this issue is undeveloped as Rogerson requested no findings of facts or produced any evidence about the kinds of services that crew members could or would provide to customers. *Greisen v. Hanken*, 925 F.3d 1097, 1115 (9th Cir. 2019) (holding that an argument was "inappropriate to review" where "the record is undeveloped").

> [4] Although we have discretion to hear previously unconsidered arguments under three recognized exceptions, none are applicable here. See *Cold Mountain*, 375 F.3d at 891 (recognizing three exceptions: (1) review is necessary to prevent a miscarriage of justice or to preserve the integrity of the judicial process; (2) when a new issue arises while appeal is pending because of a change in the law; or (3) the issue presented is purely one of law and either does not depend on the factual record developed below, or the pertinent record has been fully developed).

II.K.1.e.ii. Self-Rental Converts Rental to Nonpassive Activity

A taxpayer's gross rental activity income for the taxable year from an item of property equal to the net rental activity income for the year from that item of property is treated as nonpassive if the property is rented for use in a trade or business activity in which the taxpayer[3194] materially participates[3195] for the taxable year.[3196] The rule applies to "net rental activity income" and therefore does not cause a loss to be treated as nonpassive income.[3197]

[3194] *Williams v. Commissioner*, T.C. Memo. 2015-76, *aff'd* 117 A.F.T.R.2d 2016-600 (5th Cir. 2/2/2016), held that, if a passthrough entity holds real estate, the passthrough entity's owners, not the passthrough entity itself, must materially participate.

[3195] See parts II.K.1.a.i Taxpayer Must Own an Interest in the Business to Count Work in the Business and II.K.1.a Counting Work as Participation, as well as the rest of part II.K.1.a Counting Work as Participation in Business under the Passive Loss Rules. In *Schumann v. Commissioner*, T.C. Memo. 2014-138, a taxpayer who took substantial salary from his operating business could not prove that he did not materially participate in the business (because he wanted his rent to be passive income), despite his testimony that "his income tax reporting for both years was 'tax provisioning' and that he did not actively provide services to either company in exchange for the wages and payments reported on his tax returns."

[3196] Reg. § 1.469-2(f)(6) provides:

> *Property rented to a nonpassive activity*. An amount of the taxpayer's gross rental activity income for the taxable year from an item of property equal to the net rental activity income for the year from that item of property is treated as not from a passive activity if the property-
>
> (i) Is rented for use in a trade or business activity (within the meaning of paragraph (e)(2) of this section) in which the taxpayer materially participates (within the meaning of § 1.469-5T) for the taxable year; and
>
> (ii) Is not described in § 1.469-2T(f)(5).

The cross-reference to Reg. § 1.469-2(e)(2) is puzzling, because Reg. § 1.469-2(e)(2)(i) is reserved and Reg. § 1.469-2(e)(2)(ii) related to partnership redemptions. *Schwalbach v. Commissioner*, 111 T.C. 215 (1998), ignored this cross-reference when holding that Reg. § 1.469-2(f)(6) is valid and applying it in to treat rental to a professional service corporation as nonrental. *Williams v. Commissioner*, T.C. Memo. 2015-76, *aff'd* 117 A.F.T.R.2d 2016-600 (5th Cir. 2/2/2016), followed *Schwalbach* in holding that Reg. § 1.469-2(f)(6) is valid.

Reg. § 1.469-2T(f)(5) is discussed in part II.K.1.e.v Rental Income Property a Taxpayer Improves, Rents Briefly, and Then Sells Is Nonpassive.

See fns. 2359 and 2400 regarding the interaction of Reg. § 1.469-2(f)(6) with the 3.8% tax on net investment income.

[3197] Reg. § 1.469-2(f)(9)(iv) provides:

> The net rental activity income from an item of property for the taxable year is the excess, if any, of-
>
> (A) The gross rental activity income from the item of property for the taxable year; over
>
> (B) Any passive activity deductions for the taxable year (including any deduction treated as a deduction for the year under § 1.469-1(f)(4)) that are reasonably allocable to the income.

This test applies to the item of property, ignoring any grouping elections that might apply to that item of property.[3198]

"Rented for use in a trade or business activity" does not include rental to an activity that is itself rental.[3199]

II.K.1.e.iii. Real Estate Professional Converts Rental to Nonpassive Activity

Below is a discussion of the real estate professional exception, followed by certain rules in aggregating real estate activities.

II.K.1.e.iii.(a). Scope and Effect of Real Estate Professional Exception

A real estate activity is not *per se* a passive activity if the taxpayer[3200] is a real estate professional described as follows:[3201]

- more than one-half of the personal services performed in trades or businesses by the taxpayer during such taxable year are performed in real property trades or businesses in which the taxpayer materially participates,[3202] <u>and</u>

[3198] *Carlos v. Commissioner*, 123 T.C. 275 (2004); *Veriha v. Commissioner*, 139 T.C. 45 (2012) (defining "item of property" for purposes of this rule); *Dirico v. Commissioner*, 139 T.C. 396 (2012); see also *Samarasinghe v. Commissioner*, T.C. Memo. 2012-23 (same result, but I'm not sure whether the taxpayer grouped the item with other rental properties or merely tried to use passive loss to offset this income).
[3199] *Dirico v. Commissioner*, 139 T.C. 396 (2012). In approving the deduction of rental losses against rental income, the Tax Court did not hold against the taxpayer the taxpayer's misreporting of rental income as ordinary business income.
[3200] Including a trust, per *Frank Aragona Trust v. Commissioner*, 142 T.C. 165 (2014) (rejecting the IRS' contention that only individuals - not trusts - could be real estate professionals). The petition, reply, and briefs are at http://tcinstitute.com/rv/ff0012e61ef3812cbb3202812343b05e2fbe2da8/p=3879220. CCA 201244017 had taken the position that a trust cannot be a real estate professional.
[3201] Each bullet point below requires a finding of material participation in those real property trades or businesses before adding up hours. *Windham v. Commissioner*, T.C. Memo. 2017-068. The taxpayer may use spousal participation to establish material participation in a real property trade or business so that the taxpayer can count hours in that activity, but the taxpayer does not to count spousal hours in the real estate professional test. See part II.K.1.a.iii Spousal Participation, especially fn. 3078. See also Kalfayan and Patterson, "Classifying Taxpayer Business Hours to Determine Qualification as a 'Real Estate Professional' Under the Passive Activity Loss Rules," *Journal of Taxation* (WG&L) 5/2017, saved as Thompson Coburn LLP doc. no. 6561377.
[3202] *Hakkak v. Commissioner*, T.C. Memo. 2020-46, is but one example of the difficulty in a person with a full-time job other than real estate proving that more than one-half of his time was spent in real estate.

- the taxpayer performs more than 750 hours of services during the taxable year in real property trades or businesses[3203] in which the taxpayer materially participates (and personal services do not count unless the person is a 5% owner).[3204]

CCA 201504010 held as follows, with the first holding intended to be totally positive:

1. A real estate agent who brings together buyers and sellers of real property may be engaged in a real property brokerage trade or business under § 469(c)(7)(C) [even though the licensed agent was not licensed as a broker].

2. A mortgage broker who is a broker of financial instruments is not in a real property brokerage trade or business within the meaning of § 469(c)(7)(C).

Hickam v. Commissioner, T.C. Summary Opinion 2017-66 held that neither mortgage brokerage services nor loan origination services were performed in a real property trade or business within the meaning of Code § 469(c)(7)(C).[3205]

[3203] "Real property trade or business" means any real property development, redevelopment, construction, reconstruction, acquisition, conversion, rental, operation, management, leasing, or brokerage trade or business. Code § 469(c)(7)(C). A holding company that raised capital to invest in real estate projects (owned by other entities) but neither owned any rental real property nor performed any management or operations functions is not considered a Code § 469(c)(7)(C) real property trade or business. *Coastal Heart Medical Group v. Commissioner*, T.C. Memo. 2015-84, cited with approval by (but not an issue in) *Conner v. Commissioner*, T.C. Memo. 2018-6.

[3204] Code § 469(c)(7)(B). For purposes of this test, personal services performed as an employee shall not be treated as performed in real property trades or businesses unless (and when) the employee is a 5-percent owner in the employer. Code § 469(c)(7)(D)(ii); Reg. § 1.469-9(c)(5). Both of these provisions refer to Code § 416(i)(1)(B)(i), which defines 5-percent owner to mean:

(I) if the employer is a corporation, any person who owns (or is considered as owning within the meaning of section 318) more than 5 percent of the outstanding stock of the corporation or stock possessing more than 5 percent of the total combined voting power of all stock of the corporation, or

(II) if the employer is not a corporation, any person who owns more than 5 percent of the capital or profits interest in the employer.

Stanley v. U.S., 116 A.F.T.R.2d 2015-5419 (D. Ark. 11/12/2015), held:

> The Court has already set out the evidence of record substantiating Roy's ownership of the stock, and the Court does not find that the word "outstanding" imposes some additional requirement that the stock be readily transferable or not at risk of forfeiture that would operate to prevent Roy from claiming ownership for purposes of 26 U.S.C. § 469(c)(7)(D)(ii).

The IRS nonacquiesced, 2017–42 I.R.B. 311 (10/16/2017), stating in fn. 1:

> Nonacquiescence relating to the holdings that: 1) mere possession of a stock certificate, disregarding other conditions, restrictions or limitations on the possessor's rights regarding the stock, constitutes ownership for purposes of § 469(c)(7)(D)(ii); and 2) work performed by the taxpayer in a rental real estate activity for purposes of § 469(c)(7)(A) may also constitute work performed by the taxpayer in non-rental business activities of the taxpayer for other purposes of § 469.

An excellent article discussing how the passive loss rules apply to real estate investors and real estate professionals is Panitz and Lubin, "Higher Stakes for Tax Treatment of Rental Real Estate," *Journal of Accountancy*, at 56-62 (Dec. 2013). See generally Reg. § 1.469-9.

[3205] The court reasoned:

> Mr. Hickam's argument that his mortgage brokerage services and his loan origination services are performed in trades or businesses in "real property operation" because the underlying assets

Reg. § 1.469-9(b)(2) provides definitions for determining whether a trade or business is a real property trade or business for purposes of Code § 469(c)(7)(C).

Note that being a real estate professional merely treats the activity as not *per se* passive; the taxpayer's rental activity still must satisfy the usual nonrental rules for being a nonpassive activity.[3206]

The IRS often succeeds when attacking those who hold full-time jobs (a job is considered a "trade or business")[3207] who claim that they were also real estate professionals, collecting not only tax but also a 20% accuracy-related penalty.[3208] However, a taxpayer who spent her mornings on real estate and her afternoons on her investment advisory business (the latter being her more steady source of income) was able to prove being a real estate professional.[3209]

For more insight into what is a real estate trade or business, see part II.I.8.c.iii Rental as a Trade or Business, in the context of the tax on net investment income (NII), including a detailed excerpt from the preamble to the final NII regulations. Also, a 250-hour safe harbor applies to allow rental real estate to qualify as a business for the Code § 199A deduction for pass-through business entities. See part II.E.1.e.i.(a) Whether Real Estate Activity Constitutes A Trade Or Business within part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.

See also parts II.G.26.b Real Estate as a Trade or Business and II.G.26 Real Estate Special Issues.

> are real property is too attenuated. His argument ignores the words "real property" that precede the specific activities listed in the statute; those words modify each of those activities, including "operation". Although the loans he brokered and originated were secured by real property, Mr. Hickam's mortgage brokerage services and his loan origination services did not involve operating the real properties that secured those loans.
>
> Further, while Mr. Hickam's mortgage brokerage services constitute a "brokerage" trade or business, they does not constitute a "real property brokerage" trade or business. Mr. Hickam did not broker real estate during either year at issue. Rather, he brokered loans between buyers and financial institutions.
>
> The legislative history of the statute supports the consequence of this distinction. Congress considered including "finance operations" in the activities listed in section 469(c)(7)(C) but specifically did not do so. See H.R. 2264, 103d Cong., sec. 13143 (1993); H.R. 1414, 102d Cong. (1991); S. 1257, 102d Cong. (1991); H.R. 3732, 101st Cong. (1989); S. 2384, 101st Cong. (1989).

[3206] *Gragg v. U.S.*, 118 A.F.T.R.2d 2016-5364 (9th Cir. 8/4/2016), citing *Perez v. Commissioner*, T.C. Memo. 2010-232, as confirming its interpretation of Reg. § 1.469-9(e)(1), which provides:

> Section 469(c)(2) does not apply to any rental real estate activity of a taxpayer for a taxable year in which the taxpayer is a qualifying taxpayer under paragraph (c) of this section. Instead, a rental real estate activity of a qualifying taxpayer is a passive activity under section 469 for the taxable year unless the taxpayer materially participates in the activity.

[3207] Reg. § 1.469-9(c)(5).

[3208] See part II.K.1.a.vi Proving Participation. *Zarrinnegar v. Commissioner*, T.C. Memo. 2017-34, was an unusual case described in fn 3084 of that part. The wife and husband shared the dental practice and real estate investments. The wife worked full-time and the husband part-time (less than 1,000 hours) in the dental practice. The wife worked none and the husband worked more than 1,000 hours in the real estate business. The wife was attributed the husband's status as a real estate professional under part II.K.1.a.iii Spousal Participation.

[3209] *Windham v. Commissioner*, T.C. Memo. 2017-068.

II.K.1.e.iii.(b). Aggregating Real Estate Activities for a Real Estate Professional

A qualifying taxpayer may elect to treat all of the taxpayer's interests in rental real estate as a single rental real estate activity, which election may be made in any year and is binding for the taxable year in which it is made and for all future years[3210] in which the taxpayer is a qualifying taxpayer, but which does not have effect in years in which the taxpayer is not a qualifying taxpayer.[3211] Absent such an election, each building would constitute a separate activity,[3212] and it might be impossible to prove sufficient participation for each building.[3213]

To be a qualifying taxpayer, a taxpayer must own at least one interest in rental real estate and meet these requirements:[3214]

- The taxpayer must meet the requirements of section 469(c)(7)(B):[3215]
  - more than one-half of the personal services performed in trades or businesses by the taxpayer during such taxable year are performed in real property trades or businesses in which the taxpayer materially participates, and
  - the taxpayer performs more than 750 hours of services during the taxable year in real property trades or businesses in which the taxpayer materially participates (and personal services do not count unless the person is a 5% owner).
- A taxpayer must materially participate in a real property trade or business for the personal services provided by the taxpayer in that real property trade or business to count towards meeting the above requirements.[3216]

3210 See fn. 3227.

3211 Reg. § 1.469-9(g)(1) provides:

> *In general*. A qualifying taxpayer may make an election to treat all of the taxpayer's interests in rental real estate as a single rental real estate activity. This election is binding for the taxable year in which it is made and for all future years in which the taxpayer is a qualifying taxpayer under paragraph (c) of this section, even if there are intervening years in which the taxpayer is not a qualifying taxpayer. The election may be made in any year in which the taxpayer is a qualifying taxpayer, and the failure to make the election in one year does not preclude the taxpayer from making the election in a subsequent year. In years in which the taxpayer is not a qualifying taxpayer, the election will not have effect and the taxpayer's activities will be those determined under § 1.469-4. If there is a material change in the taxpayer's facts and circumstances, the taxpayer may revoke the election using the procedure described in paragraph (g)(3) of this section.

3212 Reg. § 1.469-9(e)(4), subparagraph (i), reproduced further below.

3213 *Syed v. Commissioner*, T.C. Memo. 2017-226, fn. 5.

3214 Reg. § 1.469-9(b)(6), (c).

3215 Reg. § 1.469-9(c)(1), referring to Code § 469(c)(7)(B), which is described (more than what is in the bullet points above) in fn. 3204 in part II.K.1.e.iii.(a) Scope and Effect of Real Estate Professional Exception. Reg. § 1.469-9(c)(2) applies special rules for taxpayers that are closely held C corporations. This requirement seems like a chicken-and-egg question – how can one prove the participation necessary to aggregate without first combining activities in some way? See fn. 3231 and the accompanying text for an answer.

3216 Reg. § 1.469-9(c)(3).

- Spouses filing a joint return are qualifying taxpayers only if one spouse separately satisfies both requirements of Code § 469(c)(7)(B).[3217]

- Work "as an employee" counts only of the taxpayer owns more than 5% of the business.[3218] Presumably (no authority on point of which I am aware), work as a partner, whether compensated directly through Code § 707(c) guaranteed payments or merely through the taxpayer's distributive share, would not be subject to this rule, but work under Code § 707(a)(2) other than as a partner may be subject to this rule.[3219] Therefore, if a partner is compensated for services, consider including the right to payment in the partnership agreement and specify that it will be reported on the partner's K-1 as a Code § 707(c) guaranteed payment; this reporting means that the income will be reported in the year for which the partnership deducts it, rather than the year in which the partner receives the payment.[3220]

A taxpayer may use any reasonable method of applying the facts and circumstances in determining the real property trades or businesses in which the taxpayer provides personal services, and a real property trade or business might consist either of one or more than one such trade or business; a taxpayer's grouping of activities under Reg. § 1.469-4 does not control the determination of the taxpayer's real property trades or businesses for purposes of this test.[3221] Once a taxpayer determines the real property trades or businesses in which personal services are provided for purposes of this test, the taxpayer may not redetermine those real property trades or businesses in subsequent taxable years unless the original determination was clearly inappropriate or there has been a material change in the facts and circumstances that makes the original determination clearly inappropriate.[3222] If a business includes significant activities not defined as real property trades or businesses, the taxpayer will need to segregate

---

[3217] Reg. § 1.469-9(c)(4), which further provides:

> In determining the real property trades or businesses in which a married taxpayer materially participates (but not for any other purpose under this paragraph (c)), work performed by the taxpayer's spouse in a trade or business is treated as work performed by the taxpayer under § 1.469-5T(f)(3), regardless of whether the spouses file a joint return for the year.

See part II.K.1.a.iii Spousal Participation, fn. 3074.

[3218] Reg. § 1.469-9(c)(5), "Employees in real property trades or businesses," provides:

> For purposes of paragraph (c)(1) of this section, personal services performed during a taxable year as an employee generally will be treated as performed in a trade or business but will not be treated as performed in a real property trade or business, unless the taxpayer is a five-percent owner (within the meaning of section 416(i)(1)(B)) in the employer. If an employee is not a five-percent owner in the employer at all times during the taxable year, only the personal services performed by the employee during the period the employee is a five-percent owner in the employer will be treated as performed in a real property trade or business.

Code § 416(i)(1)(B)(i) is reproduced in fn 3204 in part II.K.1.e.iii.(a) Scope and Effect of Real Estate Professional Exception.

[3219] See part II.C.8.a Code § 707 - Compensating a Partner for Services Performed.

[3220] See fn. 550, found in part III.B.7.c.viii Creative Bonus Arrangements.

[3221] Reg. § 1.469-9(d)(1). Failure to group under the passive loss general grouping rules constitutes an election not to group - see fns. 3161 (effect failure to group) and 3162 (possible relief) in part II.K.1.b.iii How to Report Grouping - whereas failure to aggregate real estate does not preclude a later aggregation election – see fn. 3211 in this part II.K.1.e.iii.(b).

[3222] Reg. § 1.469-9(d)(2).

the time spent on real property trades or businesses from other activities to determine whether the taxpayer satisfies this test.[3223]

This election applies to rental real estate interests held through passthrough entities.[3224] Explaining how to make the election, *Shiekh v. Commissioner*, T.C. Memo. 2010-126, pointed out:[3225]

> To make an election, a taxpayer must clearly notify the Commissioner of the taxpayer's intent to do so. See *Knight- Ridder Newspapers, Inc. v. United States*, 743 F.2d 781, 795 (11th Cir. 1984). "[T]he taxpayer must exhibit in some manner … his unequivocal agreement to accept both the benefits and burdens of the tax treatment afforded" by the law. *Young v. Commissioner*, 83 T.C. 831, 839 (1984), *affd.* 783 F.2d 1201 (5th Cir. 1986). A taxpayer makes the election to treat all interests in rental real estate as a single rental real estate activity by filing a statement with the taxpayer's original income tax return declaring that the election is under section 469(c)(7)(A). *Trask v. Commissioner*, T.C. Memo. 2010-78; sec. 1.469-9(g)(3), Income Tax Regs. A taxpayer has not made an election if it is not clear from the return that an election has been made. See *Young v. Commissioner*, 783 F.2d at 1206.
>
> We have held that aggregating losses from Schedule E on line 17 of Form 1040, U.S. Individual Income Tax Return, is insufficient notice to the Commissioner that the taxpayer intended to elect to treat all his rental properties as a single activity under section 469(c)(7). *Kosonen v. Commissioner*, T.C. Memo. 2000-107. Similarly, a taxpayer's intent to elect, without exhibiting an unequivocal agreement to accept both the benefits and the burdens of such an election, is irrelevant to making a determination of whether he or she has made an election. See *Young v. Commissioner*, 783 F.2d at 1206; *Kosonen v. Commissioner*, *supra.*

3223 Failure to segregate led to the taxpayer losing *Cantor v. Commissioner*, T.C. Summary Opinion 2014-103 (company installed glass in vehicles and residences, and residential work was not necessarily part of constructing, reconstructing, etc. a home); see also *Langille v. Commissioner*, 108 A.F.T.R.2d 2011-7254 (11th Cir. 2011) (law practice does not count as real estate professional work, and taxpayer failed to even introduce evidence that work done at law firm was real estate work rather than legal work), *aff'g* T.C. Memo. 2010-49.
3224 Reg. § 1.469-9(h)(1).
3225 See also *Schumann v. Commissioner*, T.C. Memo. 2014-138, and *Windham v. Commissioner*, T.C. Memo. 2017-68.

The deadline for making the aggregation election may be extended.[3226] An election to treat all of a taxpayer's interests in rental real estate as a single activity is binding for subsequent tax years, absent changed circumstances.[3227]

For purposes of the real estate professional rule described above, if a taxpayer elects to treat all interests in rental real estate as a single rental real estate activity and at least one interest in rental real estate is held by the taxpayer as a limited partnership interest,[3228] the combined rental real estate activity will be treated as a limited partnership interest of the taxpayer for purposes of determining material participation.[3229] However, the preceding sentence does not apply if the taxpayer's share of gross rental income from all of the taxpayer's limited partnership interests in rental real estate is less than 10% of the taxpayer's share of gross rental income from all of the taxpayer's interests in rental real estate for the taxable year.[3230]

Except for the limited partnership rule provided above, the IRS explained aggregation under the real estate professional rules as follows:[3231]

> [T]he first step here is to determine whether TP is a qualifying taxpayer under section 469(c)(7)(B). Pursuant to § 1.469-9(d), TP has reasonably determined under the particular facts and circumstances that TP has a combined real property trade or business for purposes of Treas. Reg. § 1.469-9(d) that includes Property 1, Property 2, and the real property development trade or business. Under Treas. Reg. § 1.469-5T(a)(1), because TP spends more than 500 qualifying hours on this real property trade

---

[3226] Rev. Proc. 2011-34, § 4.01 may provide relief if the taxpayer meets all of the following requirements:
(1) the taxpayer failed to make an election under § 1.469-9(g) solely because the taxpayer failed to timely meet the requirements in § 1.469-9(g);
(2) the taxpayer filed consistently with having made an election under § 1.469-9(g) on any return that would have been affected if the taxpayer had timely made the election. The taxpayer must have filed all required federal income tax returns consistent with the requested aggregation for all of the years including and following the year the taxpayer intends the requested aggregation to be effective and no tax returns containing positions inconsistent with the requested aggregation may have been filed by or with respect to the taxpayer during any of the taxable years;
(3) the taxpayer timely filed each return that would have been affected by the election if it had been timely made. The taxpayer will be treated as having timely filed a required tax or information return if the return is filed within 6 months after its due date, excluding extensions;
(4) the taxpayer has reasonable cause for its failure to meet the requirements in § 1.469-9(g).

Letter Ruling 202309003 gave an extension of time to file the election because the taxpayers relied on a qualified tax professional who did not advise them that the Code § 469(c)(7) election was available to them.

[3227] *Frank Aragona Trust v. Commissioner*, 142 T.C. 165, 181 n. 17 (2014).

[3228] Referring to a limited partnership interest within the meaning of Reg. § 1.469-5T(e)(3).

[3229] Reg. § 1.469-9(f)(1), which continues the thought:

> Accordingly, the taxpayer will not be treated under this section as materially participating in the combined rental real estate activity unless the taxpayer materially participates in the activity under the tests listed in § 1.469-5T(e)(2) (dealing with the tests for determining the material participation of a limited partner).

See part II.K.1.a.ii Material Participation for a list of material participation tests, including describing which ones do not apply to limited partners.

[3230] Reg. § 1.469-9(f)(2).

[3231] CCA 201427016. For a summary of the CCA, see Miles, "Interplay of the Rental Real Estate Grouping Election and Real Estate Professional Exception," *Journal of Accountancy*, p. 62 12/1/2014. *Stanley v. U.S.*, 116 A.F.T.R.2d 2015-5419 (D. Ark. 11/12/2015), involved successful rental grouping; see fn. 3204 for IRS' nonacquiescence to *Stanley*.

or business, TP materially participates in this real property trade or business. Therefore, time spent on Property 1, Property 2, and the real property development trade or business may count towards meeting the qualifications of section 469(c)(7)(B). Because TP owns an interest in rental real estate and more than one-half of the personal services performed in trades or businesses by TP during the taxable year are performed in real property trades or businesses in which TP materially participates, and TP performs more than 750 hours of services during the taxable year in real property trades or businesses in which TP materially participates, TP is a qualifying taxpayer within the meaning of Treas. Reg. § 1.469-9(b)(6). Thus, section 469(c)(2) does not apply to any rental real estate activity of TP. Instead, a rental real estate activity of TP is not a passive activity for the taxable year if TP materially participates in the activity.

Next, once it is determined that TP is a qualifying taxpayer, we must determine whether TP materially participates in TP's rental real estate activities to determine whether these are passive activities. In accordance with section 469(c)(7)(A)(ii), because TP has not made an election under Treas. Reg. § 1.469-9(g), Property 1 and Property 2 are treated as separate rental real estate activities. Thus, TP must demonstrate material participation in Property 1 and Property 2 separately. In other words, TP must separately meet one of the tests in Treas. Reg. § 1.469-5T(a) for each of Property 1 and Property 2. Further, pursuant to Treas. Reg. § 1.469-9(e)(3), TP's participation in the real property development trade or business is disregarded in determining whether TP materially participates in Property 1 and Property 2.[3232] If, for example, TP meets one of the tests in § 1.469-5T(a) for Property 1, but not for Property 2, Property 1 will be a nonpassive activity for the taxable year, and Property 2 will be a passive activity for the taxable year.

Reg. § 1.469-9(e)(4) provides an example before and after applying Reg. § 1.469-9(e):

(i) Taxpayer B owns interests in three rental buildings, U, V and W. In 1995, B has $30,000 of disallowed passive losses allocable to Building U and $10,000 of disallowed passive losses allocable to Building V under § 1.469-1(f)(4). In 1996, B has $5,000 of net income from building U, $5,000 of net losses from building V, and $10,000 of net income from building W. Also in 1996, B is a qualifying taxpayer within the meaning of paragraph (c) of this section. Each building is treated as a separate activity of B under paragraph (e)(1) of this section, unless B makes the

[3232] [This footnote is not in the CCA.] Reg. § 1.469-9(e)(3), "Grouping rental real estate activities with other activities, provides:

(i) *In general*. For purposes of this section, a qualifying taxpayer may not group a rental real estate activity with any other activity of the taxpayer. For example, if a qualifying taxpayer develops real property, constructs buildings, and owns an interest in rental real estate, the taxpayer's interest in rental real estate may not be grouped with the taxpayer's development activity or construction activity. Thus, only the participation of the taxpayer with respect to the rental real estate may be used to determine if the taxpayer materially participates in the rental real estate activity under § 1.469-5T.

(ii) *Special rule for certain management activities*. A qualifying taxpayer may participate in a rental real estate activity through participation, within the meaning of §§ 1.469-5(f) and 5T(f), in an activity involving the management of rental real estate (even if this management activity is conducted through a separate entity). In determining whether the taxpayer materially participates in the rental real estate activity, however, work the taxpayer performs in the management activity is taken into account only to the extent it is performed in managing the taxpayer's own rental real estate interests.

election under paragraph (g) to treat the three buildings as a single rental real estate activity. If the buildings are treated as separate activities, material participation is determined separately with respect to each building. If B makes the election under paragraph (g) to treat the buildings as a single activity, all participation relating to the buildings is aggregated in determining whether B materially participates in the combined activity.

(ii) Effective beginning in 1996, B makes the election under paragraph (g) to treat the three buildings as a single rental real estate activity. B works full-time managing the three buildings and thus materially participates in the combined activity in 1996 (even if B conducts this management function through a separate entity, including a closely held C corporation). Accordingly, the combined activity is not a passive activity of B in 1996. Moreover, as a result of the election under paragraph (g), disallowed passive losses of $40,000 ($30,000 + $10,000) are allocated to the combined activity. B's net income from the activity for 1996 is $10,000 ($5,000 − $5,000 + $10,000). This net income is nonpassive income for purposes of section 469. However, under section 469(f), the net income from a former passive activity may be offset with the disallowed passive losses from the same activity. Because Buildings U, V and W are treated as one activity for all purposes of section 469 due to the election under paragraph (g), and this activity is a former passive activity under section 469(f), B may offset the $10,000 of net income from the buildings with an equal amount of disallowed passive losses allocable to the buildings, regardless of which buildings produced the income or losses. As a result, B has $30,000 ($40,000 − $10,000) of disallowed passive losses remaining from the buildings after 1996.

For more insight, see Hamill, "Group Passive Activities to Achieve Best Tax Treatment," *Estate Planning Journal* (Dec. 2016).

Aggregating real estate under Code § 469 is very different than the Code § 199A rules for aggregating activities.[3233]

II.K.1.e.iv. Active Rental Subject to AGI Limits

A natural person, with adjusted gross income within certain limits,[3234] is not subject to the passive loss rules with respect to that portion of the passive activity loss (or the deduction equivalent of the passive activity credit) for any taxable year, up to $25,000,[3235] which is attributable to all rental real estate activities with respect to which such individual actively participated in such taxable year (and if any portion of such loss or credit arose in another taxable year, in such other taxable year).[3236]

[3233] See part II.E.1.e.i.(a) Whether Real Estate Activity Constitutes A Trade Or Business, as well as parts II.E.1.c.iii.(d) Aggregating Activities for Code § 199A and II.E.1.e.i.(b) Aggregating Real Estate Businesses in part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.
[3234] Code § 469(i)(3) includes the limits and which credits are not subject to them.
[3235] Code § 469(i)(2), subject to potential reduction under Code § 469(i)(4) for certain married taxpayers filing separately.
[3236] Code § 469(i)(1) , subject to potential reduction under Code § 469(i)(4) for certain married taxpayers filing separately.

An estate may receive this benefit for its taxable years ending less than two years after the date of the decedent's death,[3237] if the decedent actively participated in the year of death.[3238]

II.K.1.e.v. Rental Income Property a Taxpayer Improves, Rents Briefly, and Then Sells Is Nonpassive

A taxpayer's net rental income for the year from an item of property shall be treated as nonpassive if:[3239]

- Any gain from the sale, exchange, or other disposition of the item of property is included in the taxpayer's income for the taxable year;

- The taxpayer's use of the item of property in an activity involving the rental of the property began less than 12 months before the date of the disposition of such property;[3240] and

- The taxpayer materially participated or significantly participated for any taxable year in an activity that involved for such year the performance of services for the purpose of enhancing the value[3241] of such item of property (or any other item of property if the basis of the item of property that is sold, exchanged, or otherwise disposed of is determined in whole or in part by reference to the basis of such other item of property).

[3237] Code § 469(i)(4); Reg. § 1.645-1(e)(2)(i), (3)(i) (see part II.J.7 Code § 645 Election to Treat a Revocable Trust as an Estate).

[3238] The legislative history provides:

> The conference agreement provides that in the case of an estate of a taxpayer who, in the taxable year in which he died, owned an interest in a rental real estate activity in which he actively participated, the estate is deemed to actively participate for the two years following the death of the taxpayer. Thus, the taxpayer's estate may continue to receive the same tax treatment with respect to the rental real estate activity as did the taxpayer in the taxable year of his death. This treatment applies to the taxpayer's estate during the two taxable years of the estate following his death, to facilitate the administration of the estate without requiring the executor or fiduciary to reach decisions with respect to the appropriate disposition of the rental real property within a short period following the taxpayer's death.

[3239] Reg. § 1.469-2(f)(5), the heading to which reads, "Net income from certain property rented incidental to development activity."

[3240] Reg. § 1.469-2(f)(5)(ii) provides:

> (A) *In general*. For purposes of paragraph (f)(5)(i)(B) of this section, a taxpayer's use of an item of property in an activity involving the rental of the property commences on the first date on which-
> (1) The taxpayer owns an interest in the property;
> (2) Substantially all of the property is rented (or is held out for rent and is in a state of readiness for rental); and
> (3) No significant value-enhancing services (within the meaning of paragraph (f)(5)(ii)(B) of this section) remain to be performed.

[3241] Reg. § 1.469-2(f)(5)(iii) provides:

> *Services performed for the purpose of enhancing the value of property*. For purposes of paragraph (f)(5)(i)(C) of this section, services that are treated as performed for the purpose of enhancing the value of an item of property include but are not limited to-
> (A) Construction;
> (B) Renovation; and
> (C) Lease-up (unless more than 50 percent of the property is leased on the date that the taxpayer acquires an interest in the property).

II.K.1.f. Royalty as a Trade or Business

Royalties received by any person with respect to a license or other transfer of any rights in intangible property are considered to be derived in the ordinary course of the trade or business of licensing such property only if that person created such property or performed substantial services or incurred substantial costs with respect to the development or marketing of such property.[3242]

Generally, the determination of whether a person has performed substantial services or incurred substantial costs with respect to the development or marketing of an item of intangible property shall be made on the basis of all the facts and circumstances.[3243] However, a person has performed substantial services or incurred substantial costs for a taxable year with respect to the development or marketing of an item of intangible property if:[3244]

- The expenditures reasonably incurred by that person in that taxable year with respect to the development or marketing of the property exceed 50% of the gross royalties from licensing such property that are includible in that person's gross income for the taxable year; or

- The expenditures reasonably incurred by that person in that taxable year and all prior taxable years with respect to the development or marketing of the property exceed 25% of the aggregate capital expenditures (without any adjustment for amortization) made by such person with respect to the property in all such taxable years.

The consequence of failing this test is that the royalty income constitutes portfolio income.[3245]

If a taxpayer acquires an interest in an entity after the entity has created an item of intangible property or performed substantial services or incurred substantial costs with respect to the development or marketing of an item of intangible property, the taxpayer's gross royalty income for the taxable year from such item of property equal to the taxpayer's net royalty income (but not net royalty loss) for the year from that item of property is nonpassive.[3246]

II.K.1.g. Not Passive If Gain from Sale of Self-Created Intangible

Reg. § 1.469-2T(c)(7)(i) provides:

> Notwithstanding any other provision of the regulations under section 469, passive activity gross income does not include … gross income of an individual from intangible property, such as a patent, copyright, or literary, musical, or artistic composition, if the taxpayer's personal efforts significantly contributed to the creation of such property ….

[3242] Reg. § 1.469-2T(c)(3)(iii)(B)(1).
[3243] Reg. § 1.469-2T(c)(3)(iii)(B)(2)(i).
[3244] Reg. § 1.469-2T(c)(3)(iii)(B)(2)(ii). In applying this test, expenditures in a taxable year include amounts chargeable to capital account for such year without regard to the year or years (if any) in which any deduction for such expenditure is allowed. Reg. § 1.469-2T(c)(3)(iii)(B)(2)(ii). Also, in the case of any intangible property held by a partnership, S corporation, estate, or trust, the determination of whether royalties from such property are derived in the ordinary course of a trade or business shall be made by applying these rules to such entity and not to any holder of an interest in such entity. Reg. § 1.469-2T(c)(3)(iii)(B)(3)
[3245] Reg. § 1.469-2T(c)(3)(iv), Example (5)(ii).
[3246] Reg. § 1.469-2T(f)(7)(i).

I am unaware of rules governing whether “the taxpayer’s personal efforts significantly contributed to the creation of” intangible property. However, Reg. § 1.469-2T(c)(3)(iii)(B)(2)(ii) determines whether a taxpayer has performed substantial services for a taxable year with respect to the development of an item of intangible property,[3247] so looking there may provide a clue.

Reg. § 1.469-2T(c)(7)(i) applies to gain on sale of the intangible. For income from licensing the intangible, see part II.K.1.f Royalty as a Trade or Business.

II.K.1.h. Working Interest in Oil and Gas Property

“Passive activity” does not include any working interest in any oil or gas property which the taxpayer holds directly or through an entity[3248] which does not limit the liability of the taxpayer with respect to such interest.[3249]

If any taxpayer has any loss for any taxable year from a working interest in any oil or gas property which is treated as a nonpassive loss, then any net income from such property (or certain replacement property) for any succeeding taxable year shall be treated as nonpassive income.[3250]

The rules described above apply without regard to whether the taxpayer materially participated in the activity.[3251] On the other hand, if a taxpayer holds the working interest through a limited liability entity, then the exception does not apply, but the working interest might nevertheless be a trade or business in which the taxpayer materially participates or for some other reason is nonpassive.

“Working interest” means a working or operating mineral interest in any tract or parcel of land.[3252]

[3247] See fn 3244 and accompanying text in part II.K.1.f Royalty as a Trade or Business.

[3248] Reg. § 1.469-1T(e)(4)(v)(A) precludes holding a working interest in a limited partnership in which the taxpayer is not a general partner, a corporation, or any other entity “that, under applicable State law, limits the potential liability of a holder of such an interest for all obligations of the entity to a determinable fixed amount (for example, the sum of the taxpayer’s capital contributions),” which presumably would encompass LLCs and LLPs. Indemnification agreements inside partnership agreements don’t count; see Reg. § 1.469-1T(e)(4)(v)(C), Example (1). Being liable for a fractional portion of all liabilities suffices to provide liability, even without joint and several liability; see Reg. § 1.469-1T(e)(4)(v)(C), Example (2). A limited partner who is also a general partner is considered to have liability with respect to the interest as a limited partner as well; see Reg. § 1.469-1T(e)(4)(v)(C), Example (3).
Note that an indemnification agreement, a stop loss arrangement, insurance, or any other combination of contractual rights does not constitute a prohibited entity. Reg. § 1.469-1T(e)(4)(v)(B).

[3249] Code § 469(c)(3)(A); see Reg. § 1.469-1T(e)(4) for more details.

[3250] Code § 469(c)(3)(B); see Reg. §§ 1.469-2(c)(6) and 1.469-2T(c)(6)(iv), Example (3).

[3251] Code § 469(c)(4).

[3252] Reg. § 1.469-1(e)(4)(iv), referring to Reg. § 1.612-4(a), which addresses intangible drilling and development costs incurred by an operator but does not provide a quick explanation of what a working interest is. CCA 200952054 reasons:

> Section 1.469-1(e)(4)(iv) of the Income Tax Regulations provides that for purposes of § 469 and the regulations thereunder, the term “working interest” means a working or operating mineral interest in any tract or parcel of land (within the meaning of § 1.612-4(a)). Thus, the regulations

II.K.1.i. Recharacterization of Passive Income Generators (PIGs) as Nonpassive Income

II.K.1.i.i.(a). Overview of Rules Recharacterizing PIGs as Nonpassive Income

Originally, passive income generators (PIGs) had the favorable characteristic of being able to be sheltered by passive losses without having any unfavorable characteristics. Now, the 3.8% tax makes PIGs unfavorable to the extent that their income exceeds passive losses.[3253] Those seeking to avoid passive income will be happy to learn that the IRS adopted rules limiting PIGs, as described below.

Although significant participation activities can be considered nonpassive, a taxpayer might not meet all of the requirements to make them nonpassive.[3254] If that's the case, but all significant participation passive activities net to become a PIG, a special rule converts the net passive income into nonpassive income for purposes of the passive loss rules[3255] and for purposes of the 3.8% tax on net investment income.[3256] "Significant participation passive activity" means any trade or business activity[3257] in which the taxpayer significantly participates[3258] for the taxable year but in which the taxpayer does not materially participate[3259] for such year.[3260]

Land rentals generally are treated as nonpassive: If less than 30% of the unadjusted basis of the property used or held for use by customers in a rental activity during the taxable year is

under § 469 define working interest in oil or gas property, for purposes of § 469(c)(3), by reference to the depletion rules set forth in §§ 611-614 and the regulations thereunder.

In general, § 611 provides for a reasonable allowance for depletion in the case of mines, oil and gas wells, and other natural deposits. Section 614 defines the term "property," for purposes of computing the allowance for depletion, as "each separate interest owned by the taxpayer in each mineral deposit in each separate tract or parcel of land." Section 1.614-1(a)(2) provides that the term "interest" means an economic interest in a mineral deposit. Mineral deposit is defined in § 1.611-1(d)(4) as referring to minerals in place. Section 1.611-1(d)(5) defines minerals to include ores of metals, coal, oil, gas, and all other natural metallic and nonmetallic deposits. That section further states that "minerals" includes all of the minerals and other natural deposits subject to depletion.

Thus, the exception provided by § 469(c)(3) for any working interest in any oil or gas property is limited to a working interest in natural deposits of oil and gas.

[3254] See fns. 3062-3063 and accompanying text, found in part II.K.1.a.ii Material Participation.

[3255] Reg. § 1.469-2T(f)(2)(i). The Example at the end of Reg. § 1.469-2T(f)(2) clarifies its application.

[3256] Reg. § 1.1411-5(2)(i).

[3257] Within the meaning of Reg. § 1.469-1T(e)(2), which cross-references to Reg. § 1.469-1(e)(2), which in turn cross-references to Reg. § 1.469-4(b)(1), which is reproduced in fn. 3131 within part II.K.1.b.ii Grouping Activities – General Rules. It all boils down to engaging or preparing to engage in a Code § 162 "trade or business" or incurring Code § 174 research or experimental expenditures, but does not include "rental activities or activities that are treated as incidental to an activity of holding property for investment."

[3258] Within the meaning of Reg. § 1.469-5T(c)(2), which defines significant participation as more than 100 hours during the taxable year.

[3259] Within the meaning of Reg. § 1.469-5T, which is described in part II.K.1.a Counting Work as Participation.

[3260] Reg. § 1.469-2T(f)(2)(ii). Reg. § 1.469-2T(f)(2)(iii) provides an example.

depreciable, an amount of the taxpayer's gross income from the activity equal to the taxpayer's net passive income from the activity shall be treated as nonpassive.[3261]

An amount of the taxpayer's gross income for the taxable year from any equity-financed lending activity shall be considered as nonpassive to the extent of the lesser of the taxpayer's equity-financed interest income[3262] from the activity for such year and the taxpayer's net passive income from the activity for such year.[3263] An activity is an equity-financed lending activity for a taxable year if the activity involves a trade or business of lending money and the average outstanding balance[3264] of the liabilities incurred in the activity[3265] for the taxable year does not exceed 80% of the average outstanding balance of the interest-bearing assets[3266] held in the activity for such year.[3267]

The amount of gross income from an activity that is treated as not from a passive activity for the taxable year under the above bullet points shall not exceed the greatest amount of gross income treated as not from a passive activity under any one of these bullet points.[3268]

Also, generally, if a taxpayer acquires an interest in a development entity after the development entity has created an item of intangible property or performed substantial services or incurred substantial costs with respect to the development or marketing of an item of intangible property, an amount of the taxpayer's gross royalty income for the taxable year from such item of property equal to the taxpayer's net royalty income for the year from such item of property shall be treated as nonpassive income.[3269]

[3261] Reg. § 1.469-2T(f)(3).

[3262] The taxpayer's equity-financed interest income from an activity for a taxable year is the amount of the taxpayer's net interest income from the activity for such year multiplied by the fraction obtained by dividing (a) the excess of the average outstanding balance for such year of the interest-bearing assets held in the activity over the average outstanding balance for such year of the liabilities incurred in the activity, by (b) the average outstanding balance for such year of the interest-bearing assets held in the activity. Reg. § 1.469-2T(f)(4)(iii). The net interest income from an activity for a taxable year is (a) the gross interest income from the activity for such year, reduced by (b) expenses from the activity (other than interest on liabilities used in this test) for such year that are reasonably allocable to such gross interest income. Reg. § 1.469-2T(f)(4)(iv).

[3263] Reg. § 1.469-2T(f)(4)(i).

[3264] The average outstanding balance of liabilities incurred in an activity or of the interest-bearing assets held in an activity may be computed on a daily, monthly, or quarterly basis at the option of the taxpayer. Reg. § 1.469-2T(f)(4)(vii).

[3265] Liabilities incurred in an activity include all fixed and determinable liabilities incurred in the activity that bear interest or are issued with original issue discount other than debts secured by tangible property used in the activity. Reg. § 1.469-2T(f)(4)(vi). In the case of an activity conducted by an entity in which the taxpayer owns an interest, liabilities incurred in an activity include only liabilities with respect to which the entity is the borrower. Reg. § 1.469-2T(f)(4)(vi).

[3266] Interest-bearing assets held in an activity include all assets that produce interest income, including loans to customers. Reg. § 1.469-2T(f)(4)(v).

[3267] Reg. § 1.469-2T(f)(4)(ii)(A). Liabilities incurred principally for the purpose of increasing the percentage of the average outstanding balance of the interest-bearing assets shall not be taken into account in computing such percentage. Reg. § 1.469-2T(f)(4)(ii)(B).

[3268] Reg. § 1.469-2T(f)(8).

[3269] Reg. § 1.469-2T(f)(7).

II.K.1.i.i.(b). Tax Trap from Recharacterizing PIGs as Nonpassive Income

The government appears to have whipsawed business owners whose income is recharacterized as nonpassive when the activity itself remains classified as passive. Tax credits that are subject to the passive loss rules do not appear to be creditable against such income. Below is a discussion of which credits are subject to this rule, how these rule works, and planning tips.

A credit is suspended if it "arises in connection with the conduct of an activity that is a passive activity for such taxable year"[3270] and is described in subpart D of part IV of subchapter A or in subpart B (other than Code § 27(a)) of such part IV.[3271] The regulation describing the credits omits credits enacted after the regulations were promulgated, so be careful to focus on the statutory provisions.[3272] Subpart D includes any Code section numbered 38 (general business credit) and higher but is less than 46. Subpart B includes any Code section numbered 27 and higher but is less than 31. At the time I wrote this sentence, Code § 38(b) enumerated 36 credits, so always check Code § 38 in addition to making sure the credit does not fall within Subpart B or D.

Note that the regulation refers to arising "in connection with a passive activity" and does not refer to whether the activity's income is passive. "Passive activity means "a trade or business activity … in which the taxpayer does not materially participate for such taxable year" or certain rental activities.[3273]

An enumerated credit is suspended except to the extent that it is allocable to "regular tax liability"[3274] generated "by the excess (if any) of the taxpayer's passive activity gross income for such year over the taxpayer's passive activity deductions…."[3275]

Reg. § 1.469-2T(f):

> sets forth rules that require income from certain passive activities to be treated as income that is not from a passive activity (regardless of whether such income is treated as passive activity gross income under section 469 or any other provision of the regulations thereunder).

Note that the income is recharacterized, but the classification as a "passive activity" is not altered. Thus, an enumerated credit appears to remain passive, even if its income is recharacterized as nonpassive.

[3270] Reg. § 1.469-3T(b)(1)(i)(A).
[3271] Code § 469(d)(2)(A).
[3272] Sutton & Howell-Smith, ¶ 3.01[1] Credits Subject to Limitation, *Federal Income Taxation of Passive Activities* (WG&L) (detailed commentary). For a list of credits subject to this rule, see CCH's *Tax Research Consultant*, BUSEXP: 33,252, Credits Subject to Passive Activity Limitation (simple list).
[3273] Reg. § 1.469-1T(e)(1)(i).
[3274] Reg. § 1.469-3T(d)(2) refers the definition of "regular tax liability" in Code § 26(b), which in turn refers to tax determined under Chapter 1, subject to some exceptions from Chapter 1. Chapter 1 include Code sections numbered at least 1 and less than 1401.
[3275] Reg. § 1.469-3T(d)(1)(ii). Reg. § 1.469-2T(c)(1) provides:

> Except as otherwise provided in the regulations under section 469, passive activity gross income for a taxable year includes an item of gross income if and only if such income is from a passive activity.

This observation holds true for significant participation activities (highlighting added):[3276]

> An amount of the taxpayer's gross income from each significant participation passive activity for the taxable year equal to a ratable portion of the taxpayer's net passive income from such activity for the taxable year shall be treated as not from a passive activity if the taxpayer's passive activity gross income from all significant participation passive activities for the taxable year … exceeds the taxpayer's passive activity deductions from all such activities for such year.

Thus, any enumerated credit that arises from a purely[3277] significant participation activity would appear to be a passive credit that cannot be used to offset tax on that activity's income that year.

The analysis above appears to be confirmed by reading IRS Form 8582-CR, in which one calculates allowable passive credits, allowing them only against tax on passive income shown on IRS Form 8582. The instructions to IRS Form 8582 say not to report income from significant participation activities on IRS Form 8582.

I have not found any article, treatise, or government pronouncement directly addressing this issue. Until then, I assume the analysis above is correct.

Note, however, that passive credits are suspended, not lost. If a passive credit is not allowable one year, it is suspended and carried to the next year.[3278] Consider a taxpayer with income and credits from a significant participation activity. If sufficient amounts of suspended passive credits accumulate, the taxpayer might consider intentionally flunking the significant participation test one year and paying net investment income tax but generating passive income against which current and suspended credits may be taken. Whether such a strategy would work depends on the characteristics of the particular credit and taxpayer's tax posture for that year, factors that would need to be analyzed if the situation arises. In other words, I would not suggest counting on using this strategy but would suggest exploring it when planning to obtain credits that are such to the passive activity rules.

Some credits are in lieu of a deduction. When considering the use of credits, those who run businesses subject to these rules might consider the tax characteristics of each owner to decide whether the owners can actually use the credits.

[3276] Reg. § 1.469-2T(f)(2)(i).

[3277] Note, however, that significant participation activities may be aggregated to constitute material participation. See fns. 3062-3063 and accompanying text, found in part II.K.1.a.ii Material Participation.

[3278] Code § 469(b). The suspended credit is then re-tested each year. Reg. § 1.469-3T(b)(1)(ii), referring to Reg. § 1.469-1T(f)(4), which refers to Reg. § 1.469-1(f)(4). Reg. § 1.469-1(f)(4)(i) provides:

- (i) ***In general***. In the case of an activity of a taxpayer with respect to which any deductions or credits are disallowed for a taxable year under § 1.469-1T(f)(2) or (f)(3) (the loss activity)—
  - (A) The disallowed deductions or credits is [sic] allocated among the taxpayer's activities for the succeeding taxable year in a manner that reasonably reflects the extent to which each activity continues the loss activity; and
  - (B) The disallowed deductions or credits allocated to an activity under paragraph (f)(4)(i)(A) of this section shall be treated as deductions or credits from the activity for the succeeding taxable year.

Note that materially participating would prevent these issues from arising, as well as providing other benefits.[3279] Furthermore, one who significantly participates but cannot work more than 500 hours can avoid this trap by not hiring anyone else who works for more than that person.[3280]

II.K.1.j. Complete Disposition of Passive Activity

Code § 469(g) provides:

> *Dispositions of entire interest in passive activity*. If during the taxable year a taxpayer disposes of his entire interest in any passive activity (or former passive activity), the following rules shall apply:
>
> (1) *Fully taxable transaction*.
>
> (A) *In general*. If all gain or loss realized on such disposition is recognized, the excess of—
>
> (i) any loss from such activity for such taxable year (determined after the application of subsection (b)), over
>
> (ii) any net income or gain for such taxable year from all other passive activities (determined after the application of subsection (b)),
>
> shall be treated as a loss which is not from a passive activity.
>
> (B) *Subparagraph (A) not to apply to disposition involving related party*. If the taxpayer and the person acquiring the interest bear a relationship to each other described in section 267(b) or section 707(b)(1), then subparagraph (A) shall not apply to any loss of the taxpayer until the taxable year in which such interest is acquired (in a transaction described in subparagraph (A)) by another person who does not bear such a relationship to the taxpayer.
>
> (C) *Income from prior years*. To the extent provided in regulations, income or gain from the activity for preceding taxable years shall be taken into account under subparagraph (A)(ii) for the taxable year to the extent necessary to prevent the avoidance of this section.
>
> (2) *Disposition by death*. If an interest in the activity is transferred by reason of the death of the taxpayer—
>
> (A) paragraph (1)(A) shall apply to losses described in paragraph (1)(A) to the extent such losses are greater than the excess (if any) of—
>
> (i) the basis of such property in the hands of the transferee, over

[3279] Such as allowing losses in a down year or satisfying the rule that treats as materially participating any taxpayer who participating for more than 500 hours in 5 of the most recent 10 years. See parts II.K.1.a.ii Material Participation and II.I.8.f Summary of Business Activity Not Subject to 3.8% Tax.
[3280] See part II.K.1.a.ii Material Participation, particularly fns. 3060-3061.

(ii) the adjusted basis of such property immediately before the death of the taxpayer, and

(B) any losses to the extent of the excess described in subparagraph (A) shall not be allowed as a deduction for any taxable year.

(3) *Installment sale of entire interest*. In the case of an installment sale of an entire interest in an activity to which section 453 applies, paragraph (1) shall apply to the portion of such losses for each taxable year which bears the same ratio to all such losses as the gain recognized on such sale during such taxable year bears to the gross profit from such sale (realized or to be realized when payment is completed).

For Code § 469(g)(2), see part II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses and part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships, the latter being Code § 707(b). The IRS' Passive Activity Loss Audit Technique Guide (2/2005)[3281] says:

> **Verify that disposition is not to a *related party***. See IRC § 469(g)(1)(B), § 267, § 707(b). If passive activity was sold or otherwise transferred to a related party, losses stay with the taxpayer. There is not a triggering disposition. The following are related parties: Spouse, brothers, sisters, sons, daughters, grandchildren; an individual and a corporation owned more than 50 percent by the same person; a partnership and a partner who owns more than 50 percent. The IRC § 267(a) disallows losses for sales or exchanges to related parties under IRC 267(b).
>
> Be sure to look at the ownership percent on the Schedule K-1. Under IRC § 707(b)(1)(A), if a person, directly or indirectly, owns more than 50 percent of the capital interest or the profits interest of a partnership, he is a related party.

When a taxpayer disposes of a passive activity with current and suspended passive losses that exceed the gain on disposition, the net passive income and net passive losses from all of the taxpayer's other passive activities should be netted before any excess passive income is applied against the current and suspended passive losses from the disposed of activities, and any excess losses from the disposed of activity are treated as nonpassive under Code § 469(g)(1)(A).[3282] The Conference Committee Report for the Tax Reform Act of 1986 explained a disposition under Code § 469(g)(1)(A):

[3281] Downloaded from https://www.irs.gov/pub/irs-mssp/pal.pdf.

[3282] TAM 9742002, which continued:

> Please note, however, that it has been represented that the taxpayer in this case did not realize any gain on disposition of the passive activities in b. To the extent that the taxpayer may have realized any gain on disposition, however, this disposition gain must first be applied against the current and suspended losses from the disposed of activities, before section 469(g)(1)(A) is applied.

For the impact of Code § 469 on the 3.8% net investment income tax, see part II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation, particularly the text accompanying fn. 2448.

Dispositions.

In general.

The conference agreement generally follows the Senate amendment with respect to dispositions of interests in passive activities which trigger the allowance of suspended losses. The conference agreement clarifies, however, that a transaction constituting a sale (or other taxable disposition) in form, to the extent not treated as a taxable disposition under general tax rules, does not give rise to the allowance of suspended deductions. For example, sham transactions, wash sales, and transfers not properly treated as sales due to the existence of a put, call, or similar right relating to repurchase, do not give rise to the allowance of suspended losses.

Related party transactions.

The conference agreement provides that the taxpayer is not treated as having disposed of an interest in a passive activity, for purposes of triggering suspended losses, if he disposes of it in an otherwise fully taxable transaction to a related party (within the meaning of section 267(b) or 707(b)(1), including applicable attribution rules). In the event of such a related party transaction, because it is not treated as a disposition for purposes of the passive loss rule, suspended losses are not triggered, but rather remain with the taxpayer. Such suspended losses may be offset by income from passive activities of the taxpayer.

When the entire interest owned by the taxpayer and the interest transferred to the related transferee in the passive activity are transferred to a party who is not related to the taxpayer (within the meaning of section 267(b) or 707(b)(1), including applicable attribution rules) in a fully taxable disposition, then to the extent the transfer would otherwise qualify as a disposition triggering suspended losses, the taxpayer may deduct the suspended losses attributable to his interest in the passive activity.

Certain insurance transactions.

Clarification is provided with respect to certain transactions involving dispositions of interests in syndicates that insure U.S. risks. Generally, when an owner of an interest in such a syndicate that is treated as a passive activity enters into a transaction whereby he disposes of his interest in the syndicate in a fully taxable closing transaction, he is treated as having made a disposition of his interest in the passive activity.

Abandonment.

The scope of a disposition triggering suspended losses under the passive loss rule includes an abandonment, constituting a fully taxable event under present law, of the taxpayer’s entire interest in a passive activity. Thus, for example, if the taxpayer owns rental property which he abandons in a taxable event which would give rise to a deduction under section 165(a) of present law, the abandonment constitutes a taxable disposition that triggers the recognition of suspended losses under the passive loss rule.

Similarly, to the extent that the event of the worthlessness of a security is treated under section 165(g) of the Code as a sale or exchange of the security, and the event otherwise represents the disposition of an entire interest in a passive activity, it is treated as a disposition. No inference is intended with respect to whether a security includes an interest in any entity other than a corporation.

Interaction with capital loss limitation.

Upon a fully taxable disposition of a taxpayer's entire interest in a passive activity, the passive loss rule provides that any deductions previously suspended with respect to that activity are allowed in full. However, to the extent that any loss recognized upon such a disposition is a loss from the sale or exchange of a capital asset, it is limited to the amount of gains from the sale or exchange of capital assets plus $3,000 (in the case of individuals). The limitation on the deductibility of capital losses is applied before the determination of the amount of losses allowable upon the disposition under the passive loss rule.

Thus, for example, if a taxpayer has a capital loss of $10,000 upon the disposition of a passive activity, and is also allowed to deduct $5,000 of previously suspended ordinary losses as a result of the disposition, the $5,000 of ordinary losses are allowed, but the capital loss deduction is limited to $3,000 for the year (assuming the taxpayer has no other gains or losses from the sale of capital assets for the year). The remainder of the capital loss from the disposition is carried forward and allowed in accordance with the provisions determining the allowance of such capital losses.

Basis adjustment for credits.

Under the conference agreement, an election is provided in the case of a fully taxable disposition of an interest in an activity in connection with which a basis adjustment was made as a result of placing in service property for which a credit was taken. Upon such a disposition, the taxpayer may elect to increase the basis of the credit property (by an amount no greater than the amount of the original basis reduction of the property) to the extent that the credit has not theretofore been allowed by reason of the passive loss rule. At the time of the basis adjustment election, the amount of the suspended credit which may thereafter be applied against tax liability is reduced by the amount of the basis adjustment. The purpose for providing this election is to permit the taxpayer to recognize economic gain or loss, taking account of the full cost of property for which no credit was allowed.

This rule may be illustrated as follows. A taxpayer places in service rehabilitation credit property generating an allowable credit of $50, and reduces the basis of the property by $50 as required by the provisions governing the rehabilitation credit, but is prevented under the passive loss rule from taking any portion of the credit. In a later year, having been allowed no portion of the credit by virtue of the passive loss rule, the taxpayer disposes of his entire interest in the activity, including the property whose basis was reduced. Immediately prior to the disposition, the taxpayer may elect to increase basis of the credit property by the amount of the original basis adjustment (to the extent of the amount of the unused credit) with respect to the property.

If the property is disposed of in a transaction that, under the passive loss rule, does not constitute a fully taxable disposition of the taxpayer's entire interest in the passive activity, then no basis adjustment may be elected at any time. To the extent the credit has been suspended by virtue of the passive loss rule, however, it may remain available to offset tax liability attributable to passive income.

Disposition of activity of limited partnership.

In general, under the passive loss rule, suspended deductions are allowed upon a taxable disposition of the taxpayer's entire interest in an activity, because it becomes possible at that time to measure the taxpayer's actual gain or loss from the activity. Under the Senate amendment, a special rule would apply to dispositions with respect to limited partnership interests. The special rule requires the taxpayer to dispose of his entire interest in the limited partnership (along with all other interests that are part of the passive activity) in order to trigger suspended deductions with respect to any activities conducted by the limited partnership.

The conferees believe that it is not appropriate to disallow a true economic loss realized upon the disposition of the taxpayer's entire interest in an activity by reason of the taxpayer's form of ownership. Therefore, the conference agreement eliminates this special rule for dispositions of limited partnership activities, and provides instead that a disposition of the taxpayer's entire interest in an activity conducted by a limited partnership, like a disposition of an activity conducted in any other form, may constitute a disposition giving rise to the allowance of suspended deductions from the activity.

The conferees do not, however, intend to change the rule that a limited partnership interest in an activity is (except as provided in Treasury regulations) treated as an interest in a passive activity. Because a limited partner generally is precluded from materially participating in the partnership's activities, losses and credits attributable to the limited partnership's activities are generally treated as from passive activities, except that items properly treated as portfolio income and personal service income are not treated as passive.

Changes in nature of activity.

The fact that the nature of an activity changes in the course of its development does not give rise to a disposition for purposes of the passive loss provision. For example, when a real estate construction activity becomes a rental activity upon the completion of construction and the commencement of renting the constructed building, the change is not treated as a disposition.

Losses disallowed by the passive loss rules are suspended and carried into future years.[3283]

The IRS' Passive Activity Loss Audit Technique Guide (2/2005)[3284] says:

FORM 8582: Dispositions with Net Gain

As indicated above, gain on the sale or other disposition generally is passive income. Gain on Form 4797 and Schedule D should first offset losses from the same activity. If any gain remains, it offsets losses from other unrelated passive activities.

On dispositions with an overall net gain, the net gain, current losses, and suspended losses are all reflected on Form 8582. Entering the gain, but not the losses, on the

[3283] IRS Publication 925 explains the passive loss and at-risk rules generally. The IRS' "Passive Activity Loss Audit Technique Guide (2/2005) is at http://www.irs.gov/pub/irs-mssp/pal.pdf.
[3284] Downloaded from https://www.irs.gov/pub/irs-mssp/pal.pdf.

Form 8582 results in unrelated passive losses being allowed in error. Any gain must first offset losses from the same activity.

The purpose of Form 8582 is purely computational. The examiner should verify that all income shown on Form 8582 line 1a or 3a is reflected elsewhere on the return, most commonly on Schedule E or Schedule D. The Form 8582 does not report income. If income shown on Form 8582 is not reflected on the return, it is unreported income!

Summary

- For current and suspended losses to be deductible, the taxpayer must sell or otherwise dispose of his entire interest in a passive activity.

- The disposition must be a fully taxable transaction. Transfers to other entities and likekind exchanges are non-qualifying dispositions. Losses remain on Form 8582.

- When a taxpayer dies, only losses in excess of the step-up in basis are allowed. Stated differently, the decedent's losses are allowed only to the extent they exceed the amount by which the beneficiary's basis in the passive activity has been increased. [citing Code § 469(g)(2)]

- On an installment sale, losses are triggered in ratio to gain reported.

- When gain and current and suspended losses are netted, if there is an overall loss, nothing should be entered on Form 8582.

- If there is an overall gain on disposition, all gains and losses should be entered on Form 8582. Any excess gain, generally is passive income which may trigger deductibility of unrelated passive losses.

The IRS' Passive Activity Loss Audit Technique Guide (2/2005)[3285] continues with some other sources:

- IRC § 469(j)(6): When a passive loss is gifted to a person or charity, losses are added to the donee's basis. They are not deductible by the taxpayer/donor.

- IRC § 469(j)(12): When an estate or trust distributes a passive activity, losses are not deductible by the estate or trust. They are added to the beneficiary's basis.[3286]

- IRC § 1398(f)(1), Reg. § 1.1398-1(d)(1): A transfer of an interest in a passive activity between an individual and a bankruptcy estate is not a qualifying disposition, which triggers deductibility of losses.

- Reg. § 1.469-2T(c)(2)(i)(A)(2): Gain on disposition generally is passive income if the activity was a passive activity in the year of disposition.

[3285] Downloaded from https://www.irs.gov/pub/irs-mssp/pal.pdf.
[3286] [My footnote:] See part II.K.2.d Effect of Death of an Individual or Termination of Trust on Suspended Passive Losses.

- Reg. § 1.469-2T(c)(2)(i)(A)(3): Gain on disposition is not passive income if the activity is not a passive activity in the taxable year of disposition.

- Reg. § 1.469-2T(f)(3): If less than 30 percent of the unadjusted basis of leased property is depreciable, gain is non-passive.

- Reg. § 1.469-2(f)(6): Gain on the sale (or rental income) of property leased to a business in which the taxpayer materially participates (i.e. where he regularly works) is non-passive.

- Reg. § 1.469-4(g): If substantially all of an activity is sold, that portion may be treated as a separate activity.

- Reg. § 1.469-6 on dispositions has not yet been written. Thus, we have no regulations on dispositions other than those mentioned above.

Code § 469(j)(6), "Special rule for gifts" (referred to above), provides:

> In the case of a disposition of any interest in a passive activity by gift—
>
> (A) the basis of such interest immediately before the transfer shall be increased by the amount of any passive activity losses allocable to such interest with respect to which a deduction has not been allowed by reason of subsection (a), and
>
> (B) such losses shall not be allowable as a deduction for any taxable year.

If the taxpayer gives less than the taxpayer's entire interest in the property, the allocable portion of his unused losses are added to the donee's basis.[3287]

Reg. § 1.469-2T(c)(2), "Treatment of gain from disposition of an interest in an activity or an interest in property used in an activity," provides the following rules generally in Reg. § 1.469-2T(c)(2)(i), "In general":

> (A) *Treatment of gain*. Except as otherwise provided in the regulations under section 469, any gain recognized upon the sale, exchange, or other disposition (a "disposition") of an interest in property used in an activity at the time of the disposition or of an interest in an activity held through a partnership or S corporation is treated in the following manner:
>
> (1) The gain is treated as gross income from such activity for the taxable year or years in which it is recognized;
>
> (2) If the activity is a passive activity of the taxpayer for the taxable year of the disposition, the gain is treated as passive activity gross income for the taxable year or years in which it is recognized; and

[3287] ¶ M-5705, "Basis adjustments under passive activity rules for dispositions by gift," *Federal Tax Coordinator*, citing S. Rept. No. 99-313 (P.L. 99-514). p. 726.

(3) If the activity is not a passive activity of the taxpayer for the taxable year of the disposition, the gain is treated as not from a passive activity.

(B) *Dispositions of partnership interests and S corporation stock*. A partnership interest or S corporation stock is not property used in an activity for purposes of this paragraph (c)(2). See paragraph (e)(3) of this section for rules treating the gain recognized upon the disposition of a partnership interest or S corporation stock as gain from the disposition of interests in the activities in which the partnership or S corporation has an interest.

(C) *Interest in property*. For purposes of applying this paragraph (c)(2) to a disposition of property—

(1) Any material portion of the property that was used, at any time before the disposition, in any activity at a time when the remainder of the property was not used in such activity shall be treated as a separate interest in property; and

(2) The amount realized from the disposition and the adjusted basis of the property must be allocated among the separate interests in a reasonable manner.

(D) *Examples*. The following examples illustrate the application of this paragraph (c)(2)(i):

Example (1). A owns an interest in a trade or business activity in which A has never materially participated. In 1987, A sells equipment that was used exclusively in the activity and realizes a gain on the sale. Under paragraph (c)(2)(i)(A)(2) of this section, the gain is passive activity gross income.

Example (2). B owns an interest in a trade or business activity in which B materially participates for 1987. In 1987, B sells a building used in the activity in an installment sale and realizes a gain on the sale. B does not materially participate in the activity for 1988 or any subsequent year. Under paragraph (c)(2)(i)(A)(3) of this section, none of B’s gain from the sale (including gain taken into account after 1987) is passive activity gross income.

Example (3). C enters into a contract to acquire property used by the seller in a rental activity. Before acquiring the property pursuant to the contract, C sells all rights under the contract and realizes a gain on the sale. Since C’s rights under the contract are not property used in a rental activity, the gain is not income from a rental activity. The result would be the same if C owned an option to acquire the property and sold the option.

Example (4). D sells a ten-floor office building. D owned the building for three years preceding the sale and at all times during that period used seven floors of the building in a trade or business activity and three floors in a rental activity. The fair market value per square foot is substantially the same throughout the building, and D not maintain a separate adjusted basis for any part of the building. Under paragraph (c)(2)(i)(C)(1) of this section, the seven floors used in the trade or business activity and the three floors used in the rental activity are treated as separate interests in property. Under paragraph (c)(2)(i)(C)(2) of this section, the amount realized and the adjusted basis of the building must be allocated between the separate interests in a reasonable manner. Under these facts, an allocation based on the square footage of the parts of the building used in each activity would be reasonable.

Example (5). The facts are the same as in example (4), except that two of the seven floors used in the trade or business activity were used in the rental activity until five months before the sale. Under paragraph (c)(2)(i)(C)(1) of this section, the five floors used exclusively in the trade or business activity and the two floors used first in the rental activity and then in the trade or business activity are treated as separate interests in property. See paragraph (c)(2)(ii) of this section for rules for allocating amount realized and adjusted basis upon a disposition of an interest in property used in more than one activity during the 12-month period ending on the date of the disposition.

Reg. § 1.469-2T(c)(2)(ii), "Disposition of property used in more than one activity in 12-month period preceding disposition," provides:

In the case of a disposition of an interest in property that is used in more than one activity during the 12-month period ending on the date of the disposition, the amount realized from the disposition and the adjusted basis of such interest must be allocated among such activities on a basis that reasonably reflects the use of such interest in property during such 12-month period. For purposes of this paragraph (c)(2)(ii), an allocation of the amount realized and adjusted basis solely to the activity in which an interest in property is predominantly used during the 12-month period ending on the date of the disposition reasonably reflects the use of such interest in property if the fair market value of such interest does not exceed the lesser of—

(A) $10,000; and

(B) 10 percent of the sum of the fair market value of such interest and the fair market value of all other property used in such activity immediately before the disposition.

The following examples illustrate the application of this paragraph (c)(2)(ii):

Example (1). The facts are the same as in example (5) of paragraph (c)(2)(i)(D) of this section. Under paragraph (c)(2)(i)(C)(2) of this section, D allocates the amount realized and adjusted basis of the building 30 percent to the three floors used exclusively in the rental activity, 50 percent to the five floors used exclusively in the trade or business activity, and 20 percent to the two floors used first in the rental activity and then in the trade or business activity. Under this paragraph (c)(2)(ii), the amount realized and adjusted basis allocated to the two floors that were used in both activities during the 12-month period ending on the date of the disposition must also be allocated between such activities. Under these facts, an allocation of 7/12 of such amounts to the rental activity and 5/12 of such amounts to the trade or business activity would reasonably reflect the use of the two floors during the 12-month period ending on the date of the disposition.

Example (2). B is a limited partner in a partnership that sells a tractor-trailer. During the 12-month period ending on the date of the sale, the tractor-trailer was used in several activities, and the partnership allocates the amount realized from the disposition and the adjusted basis of the tractor-trailer among the activities based on the number of days during the 12-month period that the partnership used the tractor-trailer in each activity. Under these facts, the partnership's allocation reasonably reflects the use of the tractor-trailer during the 12-month period ending on the date of the sale.

Example (3). C sells a personal computer for 8,000. During the 12-month period ending on the date of the sale, 70 percent of C's use of the computer was in a passive activity. Immediately before the sale, the fair market value of all property used in the passive activity (including the personal computer) was $200,000. Under these facts, the computer was predominantly used in the passive activity during the 12-month period ending on the date of the sale, and the value of the computer, as measured by its sale price ($8,000), does not exceed the lesser of (a) $10,000, and (b) 10 percent of the value of all property used in the activity immediately before the sale ($20,000). C allocates the amount realized and the adjusted basis solely to the passive activity. Under this paragraph (c)(2)(ii), C's allocation reasonably reflects the use of the computer during the 12-month period ending on the date of the sale.

Reg. § 1.469-2T(c)(2)(iii), "Disposition of substantially appreciated property formerly used in nonpassive activity," provides:

[Reserved] See § 1.469-4(c)(2)(iii) for rules relating to this paragraph.

Reg. § 1.469-2T(c)(2)(iv), "Taxable acquisitions," provides:

[Reserved] See § 1.469-2(c)(iv) for rules relating to this paragraph.

Reg. § 1.469-2T(c)(2)(v), "Property held for sale to customers, provides:

[Reserved] See § 1.469-2(c)(v) for rules relating to this paragraph.

For disposition by death, see part II.K.2.d Effect of Death of an Individual or Termination of Trust on Suspended Passive Losses.

For how this rule works in conjunction with the Code § 1411 net investment income tax, see part II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.

See also part II.G.4.j At Risk Rules (Including Some Related Discussion of Code § 752 Allocation of Liabilities), relating to rules that prevent certain debt-financed debts from being deducted before considering the Code § 469 passive loss rules.

II.K.1.k. Former Passive Activities

The preamble to the final regulations governing the 3.8% tax on net investment income[3288] describes the following regarding former passive activities:[3289]

Losses disallowed by section 469 stem from (1) expenses incurred in the passive activity or (2) a sale of a portion of the passive activity or property used in the activity, in excess of passive income from any source. Section 1.469-1T(f)(2)(i) and (ii) require taxpayers to trace disallowed losses back to the activities giving effect to the deductions from the

[3288] See part II.I 3.8% Tax on Excess Net Investment Income (NII).
[3289] T.D. 9644.

> activity giving rise to the net loss. When a taxpayer disposes of a partial interest in a passive activity or disposes of assets used within a passive activity, any losses realized from the disposition are treated as arising from the passive activity and are allocated to that activity. Sections 469(b), (g), and § 1.469-1(f)(4) provide that, generally, passive losses that are disallowed in the current year carry forward to the succeeding tax year and remain suspended until the taxpayer has sufficient passive income to offset those losses or otherwise disposes of the entire activity in a fully taxable transaction with an unrelated party.
>
> In cases where a taxpayer materially participates in an activity that was formerly a passive activity, the deductions produced by the activity in the current year are not subject to section 469. However, the carryover (or "suspended") passive losses incurred in prior years when the activity was a passive activity remain disallowed passive losses subject to carryover. Section 469(f)(1)(A) allows the suspended passive losses when the former passive activity produces current-year net income (even though that income is technically from a nonpassive activity). To the extent the taxpayer has passive losses allocable to a former passive activity in excess of the current year nonpassive income from that activity (the section 469(f)(1)(A) amount), section 469(f)(1)(C) allows excess passive losses to offset net passive income from other passive activities of the taxpayer. Any suspended passive losses not allowed by section 469(f)(1)(A) or (C) remain suspended and are carried over to the following year.
>
> Section 469 does not alter the character or nature of the items that make up the suspended passive loss. If the suspended losses are attributable to operating deductions in excess of operating income, such suspended losses retain that character as deductions described in section 62(a)(1) or 62(a)(4) when ultimately allowed by section 469. To the extent the suspended losses are comprised of losses originating from the disposition of property (such as ordinary section 1231 losses or capital losses), those losses also retain their character as section 165 losses when they are ultimately allowed by section 469.

For special rules that the 3.8% tax on net investment income applies to former passive activities,[3290] see fn. 2379.

II.K.1.l. Publicly Traded Partnerships

The passive loss rules apply separately with respect to items attributable to each publicly traded partnership.[3291]

II.K.1.m. Conclusion Regarding General Rules Relating to Passive Activities

The above discussion is by no means comprehensive. These rules developed for some 20 years before part II.I 3.8% Tax on Excess Net Investment Income (NII) was enacted, and there is no substitute for consulting with a CPA who has worked with these rules in preparing tax returns. Even experts had to adjust to a paradigm shift, from PIGs being only good to now looking for a way to avoid PIG status to the extent that income from PIGs exceeds passive

[3290] See part II.I.8.a.vii Former Passive Activities.
[3291] Code § 469(k).

losses. The author would welcome comments clarifying the analysis in this part II.K.1 or suggesting any additional points.

II.K.2. Passive Loss Rules Applied to Trusts or Estates Owning Trade or Business

II.K.2.a. Overview of Passive Loss Rules Applied to Trusts or Estates

A trust or estate participating might be important not only to prevent the passive loss rules from suspending a loss but also to prevent the 3.8% tax on net investment income from applying to the trust's business income. For details on the net investment income tax, see part II.I 3.8% Tax on Excess Net Investment Income (NII), especially part II.I.8 Application of 3.8% Tax to Business Income. See also parts II.J.13 Applying 3.8% Tax to Trusts Owning Businesses Other than S Corporations If the Beneficiary is Active But the Trustee Is Not, II.J.14 Application of 3.8% NII Tax to ESBTs, and II.J.17 Planning for Grantor and Nongrantor Trusts Holding Stock in S Corporations in Light of the 3.8% Tax.

Grantor trusts are taxed to their deemed owners and generally are not cover further in this part II.K.2. Further below are discussions of current law and how to plan for estates and nongrantor trusts in light of it.[3292] Here is an overview of regulatory developments:

From when the Code § 469 passive loss rules were enacted until when the Code § 1411 tax on net investment income (NII) was enacted, the application of the passive loss rules to estates and nongrantor trusts generally was ignored. This idea was ignored because the issues were those of timing of deductions, estates and nongrantor trusts with excess deductions could not use them, and the suspending passive losses until sales occurred generally was favorable. However, the NII tax changed the paradigm, causing taxpayers to ask the government for guidance, to which the government responded by asked for comments on what those rules should look like.

Before discussing the comments, one needs to provide context to the government's general approach. The proposed regulations under Code § 1411 initially addressed the general application of the passive loss rules (not yet focusing on trusts) in a manner biased in favor of the government: the proposed regulations would have left taxpayers with income that was nonpassive for Code § 469 but passive for Code § 1411. This approach was inconsistent with the scant legislative history of Code § 1411, and pressure was applied (in a process in which I was not involved) that caused the final regulations to back away from that approach and simply apply Code § 469 (with certain pro-taxpayer exceptions) and let the Code § 1411 consequences fall where they may.

My understanding is that the government will be looking at comments on trust participation as purely Code § 469 issues and let the Code § 1411 consequences fall where they may. It has been suggested that Code § 469 comments that tend to favor characterizing income as nonpassive in the hands of an estate, nongrantor trust, or beneficiary would be an unwarranted boon for taxpayers. However, my understanding is that the government is concerned about what might if it adopts regulations with Code § 1411 in mind, Code § 1411 later gets repealed, and the government has shot itself in the foot under Code § 469 by making it difficult to characterize income as nonpassive. Thus, regulations under Code § 1411, not Code § 469,

[3292] Part II.K.2.b Participation by an Estate or Nongrantor Trust.

would be the appropriate place to address any concerns the government might have about the impact of Code § 469 regulations on Code § 1411.

Making fair rules for how trusts can materially participate will be a complex task. Fiduciary arrangements can be grantor trusts (in which case the trust is disregarded and the deemed owner is taxed), estates, or nongrantor trusts. Trustees can be individuals or entities. A trust might have one trustee or multiple trustees. Each trustee might have different skills or knowledge of the beneficiaries' needs, leading to slicing and dicing of trustees' authority and duties. Furthermore, the level of fiduciary duties varies according to state law and the document that created the trust.

Here is a description of comments by certain major groups, all of which I participated in varying degrees:

- AICPA comments were first.[3293] They pointed to taxpayer-friendly case law.

- The ABA's Section on Taxation submitted highly technical comments, which, among other matters, explored the relationship between the passive loss and the fiduciary income tax system.[3294]

- The American College of Trust & Estate Counsel (ACTEC), whose task force I chaired, focused on the fiduciary nature of a trust and explored how the government might handle the evolving roles of trustees.[3295]

ACTEC proposed that work in a business activity be considered work attributable to a trust in determining its material participation if performed by a person who is a qualifying fiduciary. To qualify under ACTEC's proposal, the person must hold a substantial related fiduciary power and personally owe fiduciary duties to the beneficiaries with respect to the power.

One set of comments (not mentioned above) suggested varying the rules depending on who serves (and perhaps how many people serve) as trustee. Considering those factors would punish trusts that do not conform to those comments' ideas of how trusts should be administered. In contrast, ACTEC's comments treat all trustees and trust arrangements the same, focusing on whether fiduciary duties are owed with respect to the work that is performed.

ACTEC's comments mention what little law there is and recommend changes to the law. When one needs a logical framework for trusts that have more than one trustee, when distributions are made to a beneficiary, or when my planning suggestions do not work out or were not followed,

ACTEC's comments would form the basis for a well-reasoned argument about how the passive loss rules should be applied.

II.K.2.b. Participation by an Estate or Nongrantor Trust

II.K.2.b.i. Participation by a Nongrantor Trust: Authority

Regulations do not address participation by a nongrantor trust.[3296] The legislative history provides:[3297]

> An estate or trust is treated as materially participating in an activity (or as actively participating in a rental real estate activity) if an executor or fiduciary, in his capacity as such, is so participating.

The legislative history does not state that this is the exclusive test for how fiduciaries may participate. For planning purposes, one should consider assuming that is the exclusive test, because the IRS takes that position. For reporting purposes, however, "fiduciary" means a "guardian, trustee, executor, administrator, receiver, conservator, or any person acting in any fiduciary capacity for any person."[3298] The term "applies to persons who occupy positions of peculiar confidence toward others, such as trustees, executors, and administrators. A fiduciary is a person who holds in trust an estate to which another has a beneficial interest, or receives and controls income of another" and also includes a "committee or guardian of the property of an incompetent person."[3299] A mere agent is not a fiduciary; for example, an "agent having entire charge of property, with authority to effect and execute leases with tenants entirely on his own responsibility and without consulting his principal, merely turning over the net profits from the property periodically to his principal by virtue of authority conferred upon him by a power of attorney, is not a fiduciary" under this definition.[3300]

The IRS has litigated whether one should test based only on actions directly by the trustee or whether actions by others, such as an agent, should be considered.

In *Mattie K. Carter Trust v. United States*,[3301] the IRS argued that "material participation" should be based on the trustee's actions alone. However, the court agreed with the taxpayer that it should be tested by whoever participates on behalf of the trust, which in this case included two people to whom the trustee delegated functions: (1) a full-time ranch manager whose actions were subject to the trustee's approval, and (2) a beneficiary who supervised the manager and general ranch operations.

[3296] Note that participation of the activity of the deemed owner of a grantor trust would be a matter if that individual's personal participation. Thus, for example, this discussion in this section would not apply to a revocable trust. The rules for the Code § 1411 tax on passive business income expressly recognize this treatment of grantor trusts; see fn. 2318.

[3297] Committee Reports for Senate Bill 99-313, P.L. 99-514. A footnote in the legislative history provides that one looks to the participation of the deemed owner of a grantor trust rather than to the trust's participation.

[3298] Code § 7701(a)(6), which applies to Code § 469 where not otherwise distinctly expressed or manifestly incompatible with that section's intent.

[3299] Reg. § 301.7701-6(b)(1).

[3300] Reg. § 301.7701-6(b)(2).

[3301] 256 F.Supp.2d 536 (N.D. Tex. 2003).

TAM 200733023 rejected the taxpayer's reliance on *Mattie Carter* and asserted:

> What is apparent from the line of authority in this area is that a fiduciary must be vested with some degree of discretionary power to act on behalf of the trust. Although Trust represents that Special Trustees were heavily involved in the operational and management decisions of Business, Special Trustees — like the banks in Revenue Ruling 82-177 and *Anderson* — were ultimately powerless to commit Trust to any course of action or control Trust property without the express consent of Trustees. The contract between Trust and Special Trustees is explicit on this point, and Trust itself has acknowledged that Trustees retained final decision-making authority with regard to all facets of Business. The services performed by Special Trustees appear to be indistinguishable from those that would be expected of other non-fiduciary business personnel. If advisors, consultants, or general employees can be classified as fiduciaries simply by attaching different labels to them, the material participation requirement of § 469 as applied to trusts would be meaningless.

Letter Ruling 201029014 involved a trust that owned a partnership interest. The partnership interest was the sole owner of another entity, which in turn was the sole owner of the ultimate subsidiary. The ruling held that the trust may materially participate in the subsidiary's activities if the trustee is involved in the operations of the subsidiary's activities on a regular, continuous, and substantial basis. The ruling failed to mention the *Mattie K. Carter Trust* case or to address whether any formalities were needed to establish participation as the trustee rather than participation as an individual.

The IRS' Audit Technique Guide discusses the topic as follows:[3302]

> **Trusts Material Participation**
>
> If a business activity is owned by a trust, the examiner will need to determine if the material participation standard is met in order for losses to be fully deductible. Businesses may be conducted via Schedules C or Form, partnerships, S corporations or LLCs.
>
> The IRC § 469(h) requires regular, continuous and substantial participation in the operations of the business to meet material participation and for losses to be fully deductible. There is no guidance in the regulations at this time for material participation of trusts and estates.[3303]
>
> As an administrative proxy, we look to the seven tests in Reg. § 1.469-5T(a) for material participation, and generally will not raise an issue if the trustee meets one of the tests. However, as a technical matter the tests apply to individuals, not to a trust or trustee. Thus, as a legal matter, the trustee must prove he works on a regular basis in operations, on a continuous basis, and on a substantial basis in operations, i.e. rise to the requirements of IRC § 469(h).

[3302]Chapter 6, found by starting with http://www.irs.gov/pub/irs-mssp/pal.pdf or http://www.irs.gov/Businesses/Small-Businesses-&-Self-Employed/Passive-Activity-Loss-ATG-Chapter-6-Entity-Issues. The footnotes in the excerpt below are direct copies from the IRS' audit guide, although the footnote numbers have been changed from footnote numbers 15-19 to those used below.
[3303] Note that Reg. § 1.469-5T(g) is "Reserved".

Grantor Trusts: Since tax law does not recognize a grantor trust as a separate taxable entity, the examiner should ignore the trust entirely and look to the grantor (individual taxpayer) to determine material participation.

Qualified Subchapter S Trust[3304] **(QSST):** The QSSTs are generally grantor trusts in which the grantor is frequently a parent and the beneficiary is a child. The examiner should look to the beneficiary (child) to determine material participation.

Exceptions: There are two major exceptions to the passive loss rules:

1. Partnerships which are traders in stocks and bonds;[3305] and,

2. Working interests in oil and gas activities.[3306] Losses or income from these activities are excepted from the passive loss limitations and are not entered on Form 8582.

Issue Identification: Does the trustee materially participate in the following:

- Schedule C or F activities with losses.
- Partnership or S corporation with losses.
- Entity with an EIN and address a long distance from the trust or trustee.
- Entity in which the trust is a limited partner or the ownership percentage is low.

Examination Techniques:

- Secure the trust instrument or will and read it.
- Determine who the trustee is and what his other responsibilities are. If the trustee is a busy bank officer or attorney, material participation may be questionable in businesses or entities in which the trust owns an interest.

Documents to Request:

- Trust instrument or will including any amendments and codicils.
- Copies of Schedule K-1s from related entities.
- Detailed description of business activities conducted on Schedule C or F or by any partnerships, or S corporations.
- Explanation of the duties and responsibilities of the trustee for each business, whether conducted as a Schedule C, partnership or S corporation.

[3304] See IRC § 1361(d) where the beneficiary elects to be treated as the owner of the trust for purposes of IRC § 678.
[3305] Reg. § 1.469-1T(e)(6).
[3306] IRC § 469(c)(3), Reg. § 1.469-1T(e)(4)(v).

- Completion of the log at the end of Chapter 4 for any activity in which material participation is questioned.

Supporting Law:

- The **Senate Report**[3307] clearly provides that an estate or trust would be treated as materially participating if the executor or fiduciary/trustee materially participates.

- **Reg. § 1.469-1T(b)(2)** Passive loss rules apply to trusts other than trusts described in IRC § 671 (grantor trusts). Also see Rev. Rul. 85-13, 1986-1 CB 184.

- **QSSTs:** The General Explanation of the Tax Reform Act of 1986 by the Staff of the Joint Committee on Taxation, Note 33, page 242, explains, "Similarly, in the case of a qualified electing Subchapter S trust (§ 1361(d)(1)(B)) that is treated as a grantor trust (i.e., the beneficiary is treated as the owner for tax purposes), the material participation of the beneficiary is relevant to the determination of whether the S corporation's activity is a passive activity with respect to the beneficiary."

In its April 5, 2013 comments to the proposed regulations under Code § 1411, the American Bar Association's Section on Taxation said:[3308]

> Because of the uncertainty of current law under chapter 1, we recommend that the Service issue guidance regarding material participation for a trust or estate for purposes of section 1411. We recommend that this guidance be issued as a new proposed regulation package rather than including these rules in these final Regulations.
>
> In this regard, we recommend that the new proposed regulation package would provide that material participation by a trust or estate can be accomplished through meeting at least one of three tests:
>
>> (a) The fiduciary materially participates under the standards that apply to individuals under previously promulgated Regulations.[3309]
>>
>> (b) The fiduciary, based on all of the facts and circumstances, participates in the activity on a regular, continuous and substantial basis during the year.[3310]
>>
>> (c) The fiduciary participates in the activity on a regular, continuous, and substantial basis, either directly or through employees or contractors whose services are directly related to the conduct of the activity.[3311]

[3307] S. Rep. No. 313, 99th Cong., 2d Sess., Reprinted in 1986-3 C.B. (Vol. 3) 1, at 735.
[3308] The footnotes below use my numbering rather than the numbering used in the report. The report is at http://www.regulations.gov/contentStreamer?objectId=090000648127f7c2&disposition=attachment&contentType=pdf.
[3309] See Temp. Reg. § 1.469-5T(a)(1)-(5).
[3310] See Temp. Reg. § 1.469-5T(a)(7).
[3311] Based upon Temp. Reg. § 1.469-1T(g) (rules for C corporations). This regulation was in turn based on I.R.C. § 469(c)(7)(C).

It explained its recommendations as follows:

> The recommended alternative tests for material participation by a trust take into account the hybrid nature of a trust by allowing it to qualify based on the actions of the fiduciary (individual tests) and also those employed by the fiduciary in certain circumstances (similar to a closely held C corporation). When considering the efforts of the fiduciary, any time spent working on the activity should be considered towards meeting the material participation requirements regardless of whether the fiduciary is working on the activity as a fiduciary or in another role, for instance as an officer or an individual investor. If there are multiple fiduciaries, time spent by the fiduciaries could be aggregated for purposes of determining material participation.
>
> Applying only the standards for an individual to be a material participant in an activity would ignore the obvious differences between individuals and trusts. In what is apparently the only court case to address the issue to date, the court in *Mattie K. Carter Trust*[3312] found the trust to be analogous to a closely held C corporation and concluded that "the material participation of the Carter Trust in the ranch operations should be determined by reference to the persons who conducted the business of the ranch on Carter Trust's behalf, including [the trustee]." The Service took the position that when determining active and passive activities under section 469, only the activities of the fiduciary are to be considered when meeting the standard of regular, continuous, and substantial participation. The taxpayer argued that the participation of the trust's other employees and agents also should be included since the trust could only participate in an activity through its fiduciaries, agents and employees much like a corporation.
>
> The court held for the taxpayer, finding that a trust was most analogous to a corporation and that the acts of its agents would be deemed acts of the taxpayer. Based on the activities of the trust through its trustee, fiduciaries, employees, and agents, the material participation requirement was satisfied. The Court noted that it had studied the "snippet" of legislative history purporting to provide insight on how Congress intended section 469 to apply to a trust's participation in a business, including the Senate Finance Committee Report and the footnote in the Joint Committee on Taxation's Explanation, but did not find it helpful.
>
> In private rulings, the Service has taken the position that it is appropriate in the trust context to look only to the activities of the fiduciary to determine material participation.[3313] The IRS Audit Technique Guide for Passive Activity Loss (the "ATG"), addresses

---

[3312] *Mattie K. Carter Trust v. U.S.*, 256 F. Supp. 2d 536 (N.D. Tex. 2003).

[3313] In TAM 200733023 (Aug. 17, 2007), the Service took the position that a trust satisfies the material participation test only if the fiduciaries (i.e., the trustee or trustees) are involved in the operations of the trust's business activities on a regular, continuous, and substantial basis. See also PLR 201029014 (July 23, 2010). A person "required to hold and conserve the property, or the proceeds of the sale thereof, for future distribution" to others is a trustee. Rev. Rul. 61-102; see also Rev. Rul. 74-273. So is a person with "certain discretionary powers of administration and management with regard to the property ….[who] could vote at any stockholders' meeting; approve or oppose any reorganization or refinancing proposal; invest earnings in government obligations; retain counsel; exercise or sell conversion or subscription rights; hold the property in its own name or in a street name; and petition the court with respect to any other disposition concerning the property it considered to be in the best interest of the unknown owner." Rev. Rul. 69-300. A bank was not a fiduciary when it held an estate's money during litigation over the estate, paid interest, but performed no administrative duties for the estate. Rev. Rul. 82-177.

> material participation by trusts. The ATG states that the Service will generally not raise an issue if the trustee meets one of the material participation tests included in Regulation section 1.469-5T(a). We view this position as too restrictive given the hybrid nature of trusts and estates.[3314]
>
> The approach outlined above would maintain the approach outlined in private rulings requiring material participation by the fiduciary, but would also allow certain trusts which meet the requirements to be treated analogous to a closely held C corporation and apply similar standards to qualify for active treatment.

Although neither the Audit Technique Guide nor the above comments focus on whether the trustee's participation is in the trustee's fiduciary capacity, TAM 201317010 did focus on that issue, finding no material participation:

> Notwithstanding the decision in *Mattie K. Carter*, the Service believes that the standard annunciated in the legislative history is the proper standard to apply to trusts for purposes of § 469(h). Thus, the sole means for Trust A and Trust B to establish material participation in the relevant activities of Company X and Company Y is if the fiduciaries, in their capacities as fiduciaries, are involved in the operations of the relevant activities of Company X and Company Y on a regular, continuous, and substantial basis.
>
> A fiduciary must be vested with some degree of discretionary power to act on behalf of the trust. *United States v. Anderson*, 132 F.2d 98 (9th Cir. 1942). Although the Trusts represent that A was involved in the day-to-day operations and management decisions of Company X and Company Y, A's powers as Special Trustee were restricted by Article XI of the trust agreements. As Special Trustee, A lacked the power to commit Trust A and Trust B to any course of action or control trust property beyond selling or voting the stock of Company X or Company Y. The work performed by A was as an employee of Company Y and not in A's role as a fiduciary of Trust A or Trust B and, therefore, does not count for purposes of determining whether Trust A and Trust B materially participated in the trade or business activities of Company X and Company Y under § 469(h). A's time spent serving as Special Trustee voting the stock of Company X or Company Y or considering sales of stock in either company would count for purposes of determining the Trusts' material participation. However, in this case, A's time spent performing those specific functions does not rise to the level of being "regular, continuous, and substantial" within the meaning of § 469(h)(1). Trust A and Trust B represent that B, acting as Trustee, did not participate in the day-to-day operations of the relevant activities of Company X or Company Y. Accordingly, we conclude that Trust A and Trust B did not materially participate in the relevant activities of Company X or Company Y within the meaning of § 469(h) for purposes of § 56(b)(2)(D) for the tax years at issue.

Because this issue has a big impact on the 3.8% tax on net investment income,[3315] the Treasury Department and IRS are considering whether issue formal guidance at some point, even though

[3314] TAM 200733023 (Aug. 17, 2007).
[3315] See part II.I 3.8% Tax on Excess Net Investment Income (NII), particularly part II.I.8 Application of 3.8% Tax to Business Income.

they did not issue guidance when they finalized the regulations they issued in December 2012.[3316]

Meanwhile, the Tax Court held that, when a nongrantor trust created its own LLC to manage a business and the trustees themselves were paid by the LLC for managing the business, the trust was able to count the trustees' participation.[3317] However, rather than simply disregarding the LLC (which was a disregarded entity for income tax purposes) and holding that the trustees were working for the trust (for income tax purposes), instead the court focused on the trustee's duty to the trust when working for the LLC.[3318] That focus might open the door for an attack on

---

[3316] The preamble to the final regulations issued in T.D. 9644 stated:

F. Material participation of estates & trusts

Several commentators noted that the enactment of section 1411 has created an additional and compelling reason for the need to determine how an estate or a trust materially participates in an activity. An estate's or a trust's income or gain from a trade or business activity in which the entity materially participates does not constitute income from a passive activity under section 469 or section 1411. One commentator noted that, in the case of estates or trusts that have not incurred losses from a passive activity, those estates and trusts previously have not had to characterize either losses or income under section 469.

Commentators stated that the legislative history of section 469 suggests that only a fiduciary's participation should control in determining whether an estate or a trust materially participates in a trade or business activity. In certain situations, case law has concluded that the participation of beneficiaries and employees also should be considered. One commentator noted that case law and IRS guidance conflict, leaving taxpayers with uncertainty in determining the material participation of a trust.

A number of commentators requested that the Treasury Department and the IRS provide guidance on material participation of estates and trusts. However, the commentators acknowledged that guidance on material participation would apply under both sections 469 and 1411, and consequently suggested the initiation of a guidance project to propose the rules for which § 1.469-5T(g) has been reserved.

The Treasury Department and the IRS believe that the commentators have raised valid concerns. The Treasury Department and the IRS considered whether the scope of these regulations should be broadened to include guidance on material participation of estates and trusts. The Treasury Department and the IRS, however, believe that this guidance would be addressed more appropriately in the section 469 regulations. Further, because the issues inherent in drafting administrable rules under section 469 regarding the material participation of estates and trusts are very complex, the Treasury Department and the IRS believe that addressing material participation of trusts and estates at this time would significantly delay the finalization of these regulations. However, the issue of material participation of estates and trusts is currently under study by the Treasury Department and the IRS and may be addressed in a separate guidance project issued under section 469 at a later date. The Treasury Department and the IRS welcome any comments concerning this issue, including recommendations on the scope of any such guidance and on specific approaches to the issue.

[3317] *Frank Aragona Trust v. Commissioner*, 142 T.C. 165 (2014). The petition, reply, and briefs are at http://tcinstitute.com/rv/ff0012e61ef3812cbb3202812343b05e2fbe2da8/p=3879220. CCA 201244017 had taken the position that a trust cannot be a real estate professional.

[3318] The court said:

Even if the activities of the trust's non-trustee employees should be disregarded,[15] the activities of the trustees--including their activities as employees of Holiday Enterprises, LLC--should be considered in determining whether the trust materially participated in its real-estate operations. The trustees were required by Michigan statutory law to administer the trust solely in the interests of the trust beneficiaries, because trustees have a duty to act as a prudent person would in dealing with the property of another, i.e., a beneficiary. Mich. Comp. Laws sec. 700.7302 (2001) (before amendment by 2009 Mich. Pub. Acts No. 46); see also *In re Estate of Butterfield*, the premise of TAM 201317010 that a trustee who acts as an individual is not also serving as a trustee.

Since then, the AICPA,[3319] ABA Section on Taxation,[3320] and ACTEC[3321] have made formal comments to the government.

II.K.2.b.ii. Participation by a Nongrantor Trust: Planning Issues

Some have suggested that the trustee's participation in the business will cause the trust to be taxed as a business entity. For trusts created for traditional estate planning purposes, that concern is not justified. See part II.K.2.b.iii Participating in Business Activities Does Not Convert a Trust Created by Only One Grantor into a Business Entity.[3322]

Consider giving a beneficiary who participates in the activity a role as a trustee, whose authority is limited to acting on behalf of the trust with respect to investments that need to be tested under the passive activity rules. Depending on the state, one might be able to use a nonjudicial settlement agreement to not only add a special trustee for this purpose but also protect the

---

341 N.W.2d 453, 459 (Mich. 1983) (construing Mich. Comp. Laws sec. 700.813 (1979), a statute in effect from 1979 to 2000 that was a similarly-worded predecessor to Mich. Comp. Laws sec. 700.7302). Trustees are not relieved of their duties of loyalty to beneficiaries by conducting activities through a corporation wholly owned by the trust. *Cf. In re Estate of Butterfield*, 341 N.W.2d at 457 ("Trustees who also happen to be directors of the corporation which is owned or controlled by the trust cannot insulate themselves from probate scrutiny [i.e., duties imposed on trustees by Michigan courts] under the guise of calling themselves corporate directors who are exercising their business judgment concerning matters of corporate policy."). Therefore their activities as employees of Holiday Enterprises, LLC, should be considered in determining whether the trust materially participated in its real-estate operations.[16]

[15]We need not and do not decide whether the activities of the trust's non-trustee employees should be disregarded.

[16]We need not consider the effect of sec. 469(c)(7)(D)(ii), which provides that for purposes of sec. 469(c)(7)(B) personal services performed as an employee are generally not treated as performed in real-property trades or businesses. This rule has no application to the resolution of this case because, as we explain *infra*, the IRS has confined its challenges to the trust's qualification for sec. 469(c)(7) treatment to two challenges: (1) that trusts are categorically barred from sec. 469(c)(7) treatment, and (2) the trust did not materially participate in real-property trades or businesses. Thus, we need not, and do not, determine how many hours of personal services were performed by the trust in real-property trades or businesses. We also note that the IRS does not cite sec. 469(c)(7)(D)(ii) in its brief.

[3322] Particularly fn. 3340.

trustee from liability.[3323] Note that the legislative history refers to ***an*** executor or fiduciary, not ***the*** executor or fiduciary, implying that material participation by any one co-trustee will cause a trust to be treated as materially participating in an activity.

At first glance, it might seem an easy matter simply to designate as a special trustee an employee of the business. Note, however, that the special trustee must be participating on behalf of the trust and not merely on his or her own behalf. The trustee's work on behalf of the trust as an investor in an activity is not treated as participation in the activity unless the trustee is directly involved – on behalf of the trust - in the day-to-day management or operations of the activity.[3324] Consider these issues:

- What activities would an owner of that entity typically perform?

- Does the company want the individual to be protecting the trust's interests rather than the company's?[3325]

- As an active participant in running the business, the trust might have fiduciary duties to the other owners that it might not have as a passive owner. The trust might already have duties to other owners if the trust has a controlling interest, but being active in the business would tend to strengthen these duties to others. If the business entity is an LLC, these duties to other owners might be more easily reduced than perhaps for other types of entities, depending on applicable state law.

- Because the trustee is participating on behalf of the trust rather than for his or her own benefit, should the trust be compensated for the trustee's services and then pay the trustee itself, rather than the trustee receiving compensation directly from the company? If so, then the trustee needs to consider whether the trustee is an employee or independent contractor (generally the latter) and the related employment taxes and insurance.

- Because the trust itself is participating in a trade or business, it might subject itself to Form 1099 filing requirements for payments it makes.

- A very significant purpose of using a business entity is to protect its owners from liability. However, to the extent that the trust is directly involved in the business activity, it would subject itself to liability for the trustee's actions or omissions as the trust's agent. The trust may form an LLC that it wholly owns to provide those services and have the trustees provide those services through the LLC;[3326] if run in a financially responsible manner, the LLC might shield the trust from liability for managing the business.

[3323] Section 111 of the Uniform Trust Code, found at www.uniformlaws.org/shared/docs/trust_code/utc_final_rev2010.pdf; RSMo § 456.1-111. Subsection 4 authorizes a nonjudicial settlement agreement to interpret the terms of the trust, approve a trustee's report/accounting, direct a trustee to refrain from performing a particular act, grant a trustee any necessary or desirable power, accept a trustee's resignation, appoint a trustee, determine a trustee's compensation, transfer a trust's principal place of administration, and resolve the liability of a trustee for an action relating to the trust.

[3324] See part II.K.1.a.v What Does Not Count as Participation.

[3325] See part III.A.4.d.iv Advising Clients about the UPAIA § 505 Change and UFIPA § 506 regarding the trustee's fiduciary duties to beneficiaries when the trustee is active in the business.

[3326] *Frank Aragona Trust v. Commissioner*, 142 T.C. 165 (2014).

Additionally, consider the trust's legal rights as an owner. If the entity is a corporation, to what course of action could a trustee commit a trust with respect to stock the trust owns other than voting it and selling it? Note that the trustee's actions as an investor do not count in determining material participation.[3327]

Generally, under corporate law a shareholder cannot act on behalf of a corporation. All the shareholders can do is elect directors. Directors then make strategic decisions (often not more than 100 or 500 hours' worth) and delegate the daily running to the officers (who are by definition employees). So generally a trust as a shareholder in a corporation has no authority to participate in the business' affairs. TAM 201317010 does not seem to understand this inherent limitation and appears geared toward businesses that are wholly owned by trusts.

Given that the IRS is reading the legislative history in a manner that makes it difficult for a trust to materially participate in its role as a shareholder, one might consider the following if the entity is an S corporation:

- Many states have "close corporation" statutes or other statutes that allow shareholders to directly run a corporation, much like an LLC is run by its members.[3328] They also have built-in buy-sell provisions, some of which might protect a corporation's S election (once in place).

- Consider an LLC or limited partnership taxed as an S corporation,[3329] with an operating agreement or partnership agreement that has distributions following S corporation single-class-of-stock rules rather than capital accounts, and either a limited liability partnership registration in place to protect the general partner (making the partnership an LLLP)[3330] or having the limited partnership do business through an LLC subsidiary. Generally, for an existing corporation, a merger into the new entity (LLLP or the LP's LLC subsidiary) would be required.[3331]

In either case, if all the S corporation stock the trust has is old-and-cold nonvoting stock, do a Code § 1036 tax-free swap for voting stock, giving enough voting stock to constitute adequate and full consideration (using a formula transfer). The holder of the voting stock would file a gift tax return adequately disclosing the transaction as a non-gift.

[3327] See part II.K.1.a.v What Does Not Count as Participation.
[3328] See fn 1138 and accompanying text regarding close corporation statutes as providing protection against creditors. Such statutes are in the minority. Of the states that do not have close corporation statutes, almost all of them have buried in their corporate law provisions allowing the shareholders to bypass the board of directors and directly run part or all of the business. A chart of states in an article co-authored with Richard Barnes was published March/April 2015 in *Probate & Property*, which is reproduced at http://www.thompsoncoburn.com/Images/Newsletters/6131013_1.pdf; links supporting this chart were prepared by a summer associate in 2014 and are found in my firm's internal document number 5977514, which is reproduced at http://www.thompsoncoburn.com/Images/Newsletters/5977514_7.pdf.
[3329] As described in part II.L.5.b Self-Employment Tax Caution Regarding Unincorporated Business That Makes S Election, certain regulations might lead one to believe that an S election does not shield LLC owners from self-employment tax; however, those regulations appear to be obsolete. For those who are concerned about those regulations, a limited partnership would be the preferred state law entity, to obtain the self-employment tax exclusion available to limited partners, which is described in part II.L.4 Self-Employment Tax Exclusion for Limited Partner.
[3330] See parts II.C.12 Limited Partnership and II.C.13 Limited Liability Partnership Registration.
[3331] See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

Also, consider having the entity pay the trust for services rendered managing the business, issuing IRS Form 1099-MISC to the trust.[3332] The trust would report the management income and expense on Schedule C or C-EZ.[3333] Trusts do not pay self-employment tax. After taking a reasonable profit on the payment, the trust would compensate the trustee for services rendered. Unlike most trusts, because the trust is now engaging in a trade or business, the trust would issue IRS Form 1099-MISC to the trustee for those services, and the trustee would report the income in his/her Form 1040, Schedule C, and pay self-employment tax;[3334] however, the IRS did not object when a trust formed its own LLC (disregarded for income tax purposes) to manage the business, which LLC reported on Forms W-2 (instead of Form 1099-MISC) compensation that the LLC paid the trustees.[3335]

Does changing the individual's participation from being a direct employee to serving as a trustee affect that person's material participation as an individual? No – although the IRS takes the

---

[3332] For Thompson Coburn LLP personnel – see document number 5879530.

[3333] For an ESBT, management fee income is not part of the S portion, because it is not a K-1 item. Reg. § 1.641(c)-1(d)(1), (2). The same answer applies to QSSTs. Reg. § 1.1361-1(j)(7), (8).

[3334] Generally, nonprofessional trustees do not pay self-employment tax. Rev. Rul. 58-5, reproduced in large part in fn. 2328, found in part II.I.7 Interaction of NII Tax with Fiduciary Income Tax Principles. However, the Rev. Rul. modifies that position when the trustees carry on a trade or business:

> *Example (1). Executor who receives a flat fee for administering the estate*. A, a nonprofessional fiduciary, receives a flat $10,000 for administering the estate of B. B's gross estate is valued at $150,000 and includes a trade or business which A manages for the period of time required to distribute the assets of the estate. Under the laws of the State in which B's estate is probated, an executor is entitled to a five percent commission based upon the value of the assets distributed. Since A distributed the entire estate worth $150,000 he would have been entitled to $7,500 executor's commissions, based upon the statutory five percent allowance. Inasmuch as A, pursuant to court order, actually received $10,000 instead of $7,500 in commissions, the excess, or $2,500, is regarded as being attributable to the operation of the trade or business of the estate. A must therefore treat this $2,500 as earnings from self-employment. The remaining $7,500 is regarded as being attributable to the normal fiduciary duties of marshalling the assets of the estate and should not be treated as trade or business income. On the other hand, if A's total fee for administering the estate was equal to or less than $7,500 (the statutory executor's allowance in this case), and if nothing was said in the court order with respect to allocation of the fee, the entire fee would be regarded as being attributable to A's fiduciary activities and no part of the fee would be treated as trade or business income to A.
>
> *Example (2). Executrix who receives a special fee for handling the estate's business*. C, the sole executrix of the estate of her husband, operates a drugstore belonging to the estate, pending dissolution of the estate. As her commission for handling the estate, C receives, pursuant to court order, $5,125 (based upon a percentage of the value of the assets distributed) and $500, in addition, for the operation of the drugstore. Under these circumstances, only the $500 commission for the operation of the drugstore constitutes earnings from self-employment. The $5,125 commission, based upon the value of the assets distributed is not related to the operation of the trade or business, and, accordingly, does not constitute earnings from self-employment.
>
> *Example (3). Coexecutor who does not participate in the operation of the estate's business*. D and E are coexecutors of an estate which includes a trade or business. D is totally unfamiliar with the operation of the business and leaves the entire management of the business to E. Under these circumstances, D, who does not participate in the operation of the business, cannot be treated as being in a trade or business. The fees received by D do not constitute net earnings from self-employment. E, however, actively participates in the operation of the business and the compensation received by him for the management of the estate's trade or business constitutes net earnings from self-employment.

[3335] *Frank Aragona Trust v. Commissioner*, 142 T.C. No. 9 (2014). The court did not mention this nuance, but the facts described somewhere in the petition, reply, and briefs mentioned that Forms W-2 were issued; see http://tcinstitute.com/rv/ff0012e61ef3812cbb3202812343b05e2fbe2da8/p=3879220.

position that work a trustee's work as an individual does not count as participation by the trust, work done as a trustee apparently counts towards the trustee's participation as an individual.[3336] Consider, however, any impact on employee benefits.

Finally, to avoid the 3.8% tax on net investment income, consider converting an ESBT into one or more QSSTs[3337] if the beneficiary works for the business (or could do so in any capacity for more than 100 hours per year)[3338] and a QSST's mandatory income requirement does not do violence to the estate planning goals. However, the trustee's participation will become important again if the stock or business assets are sold.[3339] See part III.A.3.e.iv Flexible Trust Design When Holding S Corporation Stock.

II.K.2.b.iii. Participating in Business Activities Does Not Convert a Trust Created by Only One Grantor into a Business Entity, But Be Wary If Multiple Grantors

If the beneficiaries are associates in a joint enterprise for the conduct of business for profit, then the trust might be characterized as a business entity. See part II.D.1 Trust as a Business Entity.

However, if the beneficiaries did not create the trust, the trust will not be considered a business entity merely because the trustee engages in business operations.[3340]

II.K.2.b.iv. Character of Passive Activities Flowing from Nongrantor Trust to a Beneficiary; Interaction with Special Depreciation Rules

Generally, income retains its character when flowing from a nongrantor trust to a beneficiary.[3341] Therefore, income's character as passive or nonpassive at the trust level also controls at the beneficiary's level.

[3336] See fn. 3049 in part II.K.1.a.ii Material Participation.
[3337] See part III.A.3.e.v Converting a Multiple Beneficiary ESBT into One or More QSST.
[3338] Because a QSST is a grantor trust deemed owned by the beneficiary, the beneficiary's participation, not the trustee's, is what counts. See text accompanying fns. 2318-2319. Although normally participating in owner-type activities is required to avoid the passive loss rules, regulations governing the 3.8% tax do not mention this issue and therefore do not appear to impose that requirement for avoiding the 3.8% tax. See part II.K.1.a.v What Does Not Count as Participation. For more planning tips involving how to meet the participation requirements and qualify for an exclusion from the 3.8% tax, see part II.I.8.f Summary of Business Activity Not Subject to 3.8% Tax.
[3339] See part II.J.17 Planning for Grantor and Nongrantor Trusts Holding Stock in S Corporations in Light of the 3.8% Tax. This is important only for net investment income tax purposes, as a complete disposition of a passive activity removes the passive loss restrictions for that activity. Code § 469(g).
[3340] I am unaware of any case addressing this issue directly interpreting the check-the-box regulations after the adoption of Reg. § 301.7701-4(a). The regulation's preamble, T.D. 8697, provides:

> The regulations provide that trusts generally do not have associates or an objective to carry on business for profit. The distinctions between trusts and business entities, although restated, are not changed by these regulations.

See part II.D.1 Trust as a Business Entity
[3341] See fn. 2327, found in part II.I.7 Interaction of NII Tax with Fiduciary Income Tax Principles, and the discussion preceding and including fn. 2828, found in part II.J.8.f.i.(b) Allocating Income Items Among Those Receiving It.

In support of this, note that private letter rulings have held that passive rental income earned by a pooled income fund was passive income in the hands of its beneficiaries.[3342]

In grouping passive activities, a beneficiary's beneficial interest in a trust's ownership of an activity cannot be grouped; all grouping is done at the trust level.[3343]

Regarding applying the passive loss rules to the beneficiary's share of directly apportionable deductions (such as depreciation, depletion, and amortization), the IRS instructs taxpayers (italics are the IRS'):[3344]

> *The limitations on passive activity losses and credits under section 469 apply to estates and trusts. Estates and trusts that distribute income to beneficiaries are allowed to apportion depreciation, depletion, and amortization deductions to the beneficiaries. These deductions are referred to as "directly apportionable deductions."*
>
> *Rules for treating a beneficiary's income and directly apportionable deductions from an estate or trust and other rules for applying the passive loss and credit limitations to beneficiaries of estates and trusts haven't yet been issued.*
>
> Any directly apportionable deduction, such as depreciation, is treated by the beneficiary as having been incurred in the same activity as incurred by the estate or trust. However, the character of such deduction may be determined as if the beneficiary incurred the deduction directly.
>
> To assist the beneficiary in figuring any applicable passive activity loss limitations, also attach a separate schedule showing the beneficiary's share of directly apportionable deductions derived from each trade or business, rental real estate, and other rental activity.

However, some commentators suggest that depreciation deductions flow through to the beneficiaries separately only to the extent allowed after applying the passive loss rules at the trust level.[3345] The best reconciliation I can come up with is the following example: Suppose the

---

[3342] Letter Rulings 200608002 and 200608003 held:

> … the rental of land and buildings by the Fund to X will be a passive activity under § 469(c). Because the excess of aggregate income from all passive activities over the aggregate losses from all passive activities will enter into the computation of DNI, then the characterization rule of § 662(b) will apply. Thus, if the Fund's gross income in any year from rental of the land and buildings exceeds its losses (including a ratable portion of the Fund's indirect expenses) in that year from rental of the land and buildings, amounts distributed from the Fund that are includible in the gross income of an income beneficiary for that year will be income to that beneficiary from a passive activity, within the meaning of § 469, in the same proportion as the Fund's net income from that rental that enters into the computation of the Fund's DNI for that year bears to the Fund's entire DNI for that year.

Letter Ruling 8806065 took a similar position.

[3343] See fn. 3140.

[3344] 2019 Form 1041 Instructions, page 41, explaining how to prepare line 9 of Schedule K-1 issued to the beneficiaries. The instructions also refer to depletion and amortization. See part II.J.11.a.ii Allocating Depreciation to Beneficiaries (Including Surprising Result Regarding Losses).

[3345] Sutton & Howell-Smith, ¶ 15.03 Application of Passive Loss Limitations at the Entity Level, *Federal Income Taxation of Passive Activities* (WG&L) (referring to the position the AICPA took in the late 1980s); Schmolka, "Passive Activity Losses, Trusts, and Estates: The Regulations (If I Were King)," *N.Y.U. Tax Law Review*, vol. 58, p. 191 (2005).

trust has $100 rental income before depreciation and $60 depreciation, for $40 net income; therefore, the depreciation is fully deductible under the passive loss rules applied at the trust level. The rental income and depreciation deductions are separately stated on the trust's K-1s to beneficiaries.

On the other hand, a source that CPAs often use for tax preparation states:[3346]

> When net passive income less depreciation results in a net passive loss, a PAL limitation applies at either the trust or beneficiary level, or both. If the depreciation is required to be distributed to the beneficiary, the PAL limitation occurs at the beneficiary level. If a depreciation reserve is required and maintained by the fiduciary and the depreciation allocated to the trust exceeds the passive income, the PAL limitation occurs at the trust level. If a depreciation reserve is not required and the fiduciary does not distribute all fiduciary accounting income, the PAL limitations occur at both the trust and beneficiary level if the allocated depreciation exceeds the income at both the trust and beneficiary levels.

It appears that more than one approach might be defensible. Consider the strategic consequences:

- If the beneficiary can deduct the depreciation currently, then separately applying the passive loss rules based on the beneficiary's participation seems beneficial. However, if the deduction does not offset net investment income, query whether it would have been better to deferred the deduction until it can be deducted against NII.

- If the beneficiary cannot deduct the depreciation currently, consider the effect of suspending the passive losses. When can one credit the beneficiary for a disposition of the passive activity, freeing that activity's losses from suspension?[3347] If the trust sells the asset, incurs gain because depreciation reduced the trust's basis in the property, and the gain is trapped inside the trust, then the depreciation deductions (suspended or not) do not offset the gain.[3348]

II.K.2.b.v. Electing Small Business Trusts (ESBTs) and the Passive Loss Rules

Electing small business trusts have a special tax regime that divides the trust into a grantor trust portion, a nongrantor trust S corporation portion, and a nongrantor trust non-S corporation portion.[3349]

I am unaware of any guidance directly addressing how the passive loss rules interact with these separate portions.

[3346] Key Issue 7E: Reporting Passive Activity Information to a Beneficiary, *1041 Deskbook* (PPC) (2015). See also Key Issue 7D: Passive Loss Limitations Generally Determined at the Entity Level, *1041 Deskbook* (PPC) (2015).
[3347] Code § 469(g). For more about Code § 469(g), see fn. 3040.
[3348] For further discussion of mismatches along these lines, see Abbin (WTAS), § 811 Real Estate Investment Passive Activity Concerns, *Income Taxation of Fiduciaries and Beneficiaries* (2013), arguing that passive loss rules limit the extent to which a trust passes depreciation deductions to the beneficiaries.
[3349] See part III.A.3.e.ii.(b) ESBT Income Taxation.

I believe that all portions should be combined in determining whether income or loss is active or passive. The grouping rules[3350] allow an individual and a C corporation that the individual owns to combine their participation even though they are separate taxpayers.[3351]

Because the nongrantor S corporation portion and the nongrantor non-S corporation portion are taxed as separate trusts for all income tax purpose other than administratively,[3352] they would not aggregate their income and loss in determining allowable passive losses and then disaggregate their income and loss in determining taxable income.

II.K.2.c. Participation When Grantor Trusts Are Involved; Effect of Toggling

Because grantor trusts are ignored for income tax purposes,[3353] the deemed owner's work is what counts. Complications arise with Qualified Subchapter S Trusts.[3354]

A grantor can count her work in a business for only that part of the year in which she is treated as owning an interest in the business.[3355] If, when grantor trust status terminates, she has not yet worked sufficient hours in the current year (and does not qualify for participation based on participation in prior years),[3356] then consider making sure she keeps at least some ownership in the business after turning off grantor trust status, so that she can count the hours she works later that year. If necessary, the trustee might divide the trust and leave a small portion of the trust as a grantor trust.

II.K.2.d. Effect of Death of an Individual or Termination of Trust on Suspended Passive Losses

If an interest in the activity is transferred by reason of the death of the taxpayer, losses generally are allowed to the extent such losses are greater than the excess (if any) of the basis of such property in the hands of the transferee, over the adjusted basis of such property immediately before the death of the taxpayer, but any losses to the extent of that excess are not allowed as a deduction for any taxable year.[3357] Let's turn this recitation of the Code's rule into common sense: Suspended losses reduce basis, but without the person incurring the losses receiving a benefit from that lost basis. If the owner disposes of the interest during life in a taxable disposition, the suspended losses are allowed, and the tax system has broken even. If the owner dies holding the interest, then the question is what it takes to get the basis restored on account of the suspended losses. To the extent that there is a basis step-up, the suspended losses have not caused a tax detriment, so those losses do not need to be taken to make up for lost basis; therefore, the losses are disallowed to that extent. However, if the suspended losses exceed the basis step-up, then the excess losses should be allowed.

The corollary is that losses are allowed on the decedent's final income tax return to the extent that the transferee does not receive a basis step-up at death, which would make beneficiary

[3354] See part II.J.15 QSST Issues That Affect the Trust's Treatment Beyond Ordinary K-1 Items.
[3355] See part II.K.1.a.i Taxpayer Must Own an Interest in the Business to Count Work in the Business.
[3356] See part II.K.1.a Counting Work as Participation in Business under the Passive Loss Rules, especially part II.K.1.a.ii Material Participation.
[3357] Code § 469(g)(2), reproduced in part II.K.1.j Complete Disposition of Passive Activity.

deemed-owned trusts[3358] (including QSSTs),[3359] particularly attractive; in fact, substantial triggered losses can generate a net operating loss carryback, generating income tax refunds.[3360] That also might apply to irrevocable grantor trusts taxed to the settlor[3361] - "might" because the statute requires that the interest be "transferred by reason of the death of the taxpayer;" arguably the grantor's death would qualify, but for trust deemed owned by settlor legally the transfer to the trust preceded the deemed owner's death. So, in the latter case, the trust might consider selling the interest to an otherwise identical nongrantor trust – triggering the losses and increasing the basis – to make sure that the benefits of the losses offset their detriment (in that the losses reduced basis).

Code § 469(j)(12) provides that, when an estate or trust terminates, any passive losses suspended under Code § 469 will be permanently disallowed, but, to inject some fairness, added to the basis of the interest in the relevant passive activity.

Suppose an estate is terminating, using fractional pick-and-choose funding. At first, a Code § 469(j)(12) basis increase in the partnership interest might not appear to generate a Code § 743 basis step-up because, lacking a pecuniary aspect, there is no sale or exchange, and therefore the transfer is not "by sale or exchange or upon the death of a partner." Perhaps the termination of the estate might be attributed to the partner's death? This seems uncertain, however, because the suspended passive losses generating the Code § 469(j)(12) basis increase necessarily occurred post-mortem. On the other hand, a trust's or estate's distribution of a partnership interest probably does trigger Code § 743 basis adjustments, so a Code § 743 adjustment seems to be available after all.[3362] For more thoughts on planning for Code § 469(j)(12) and evaluating its impact, see Sutton & Howell-Smith, ¶15.07. Treatment of Suspended Passive Losses Upon Distribution of Activity by an Estate or Trust, *Federal Income Taxation of Passive Activities* (WG&L).

II.K.3. NOL vs. Suspended Passive Loss - Being Passive Can Be Good

II.K.3.a. Why Being Passive Can Be Good

Particularly when significant business interests are passed to the next generation, being passive can have good results, if the business has a significant net loss.

Suppose the taxpayer has a relatively modest income, other than what the business generates. Deducting a net loss will offset income in the lower tax brackets. This is especially true if the loss is so large that it generates a net operating loss (NOL) carryover under Code § 172.[3363] Another concern is the IRS' position on NOLs incurred by an electing small business trust (ESBT) when the S corporation stock it owns generates losses.[3364]

However, in profitable years, the business income might be taxed in the highest tax bracket. The owner might save more taxes by offsetting the income in a later, high-tax-bracket year, than by deducting the loss in the lower tax brackets.

[3358] See part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts.
[3359] See part III.A.3.e QSSTs and ESBTs.
[3360] FSA 200106018.
[3361] See part III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment.
[3362] See part II.Q.8.e.ii.(b) Distribution of Partnership Interests.
[3363] See part II.G.4.l.ii Net Operating Loss Deduction.
[3364] See part III.A.3.e.ii.(b) ESBT Income Taxation - Overview

If and to the extent that the loss is passive and the taxpayer does not have passive income against which to offset it, the loss is suspended and carried forward.[3365] Thus, instead of offsetting income in lower brackets in the year in which the loss is generated, it offsets income in a later year that would otherwise push the taxpayer into a higher bracket.

Furthermore, after 2017 tax reform, NOLs may offset only up to 80% of post-2020 taxable income,[3366] whereas suspended passive losses can offset 100% of any income from that activity or passive income from any other activity.

However, contrasting part II.K.2.d Effect of Death of an Individual or Termination of Trust on Suspended Passive Losses with part II.J.3.i Planning for Excess Losses,[3367] one should convert suspended losses to net operating losses before a nongrantor trust terminates.

Being passive does cause income to constitute net investment income (NII)[3368] subject to the 3.8% tax on net investment income.[3369] However, for taxpayers who have income below the NII thresholds,[3370] that impact might be small or none. If the NII tax impact is significant, compare (a) the possible income tax savings if income and loss years tend to fluctuate significantly, to (b) the extra cost of NII tax; I am not suggesting that being passive will usually be better – merely that one might consider it when planning. Furthermore, suspended passive losses that offset passive income will also offset income that generally would otherwise be subject to the NII tax.

Finally, an NOL deduction does not reduce self-employment ("SE") income subject to SE tax, whereas a freed-up suspended loss does.[3371]

II.K.3.b. Maximizing Flexibility to Avoid NOLs and Use Losses in the Best Year

One might increase planning flexibility in the planning described in part II.K.3.a Why Being Passive Can Be Good by engaging in significant participation (more than 100 hours)[3372] rather than material participation (more than 500 hours).[3373] If suspending the loss becomes important and one sees the loss coming (or perhaps is experiencing losses and expects them next year), one might cut back one's work.

Material participation might be difficult to impossible to turn off:

- One might have worked too many hours in the year before one realizes that being passive is desirable.

[3365] See the introduction to part II.K.1 Passive Loss Rules Generally.
[3366] See part II.G.4.l.ii Net Operating Loss Deduction.
[3367] Especially text accompanying fn 2551.
[3368] See part II.I.8 Application of 3.8% Tax to Business Income.
[3369] See part II.I 3.8% Tax on Excess Net Investment Income (NII).
[3370] See part II.I.3 Tax Based on NII in Excess of Thresholds.
[3371] See part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax, especially the text accompanying fn 3400 and the preceding discussion of CCA 202009024.
[3372] See part II.K.1.i Recharacterization of Passive Income Generators (PIGs) as Nonpassive Income, especially fns. 3257-3260.
[3373] See part II.K.1.a.ii Material Participation. Although more than 500 hours (see fn. 3058) is usually what people consider, it is not the only way to materially participate.

- One might have worked too many hours in a prior year to turn it off.
    - An individual is deemed to materially participate if the individual materially participated in the activity (determined without regard to this sentence) for any five taxable years (whether or not consecutive) during the ten taxable years that immediately precede the taxable year.[3374]
    - An individual is deemed to materially participate if the activity is a personal service activity, and the individual materially participated in the activity for any three taxable years (whether or not consecutive) preceding the taxable year.[3375]

Suppose an activity is passive when it generates losses and active when it generates income. The suspended passive losses offset active income from the same activity,[3376] and the active income avoids the 3.8% NII tax.[3377]

Furthermore:

- After 2017 tax reform, net operating losses (NOLs) offset only 80% of post-2020 taxable income,[3378] whereas suspended passive losses can offset 100% of taxable income when released.
- Also see part II.E.1.c.vii Effect of Losses from Qualified Trades or Businesses on the Code § 199A Deduction.

If one is leaning toward using significant participation instead of material participation, consider:

- If the taxpayer stops working in the business and continues to generate business income, material participation may keep the income nonpassive for as long as five years (longer for some businesses) after the taxpayer stops working, whereas significant participation does not carry over like that. For material participation, see part II.K.1.a.ii Material Participation.[3379]
- Part II.K.1.i.i.(b) Tax Trap from Recharacterizing PIGs as Nonpassive Income.

II.L. Self-Employment Tax (FICA)

II.L.1. FICA: Corporation

For corporations, compensation, including any distributions re-characterized as salaries, is subject to income tax and FICA tax.[3380] Income retained by the corporation and not paid as

[3374] See part II.K.1.a.ii Material Participation, especially fn. 3064.
[3375] See part II.K.1.a.ii Material Participation, especially fn. 3065.
[3376] See part II.K.1.k Former Passive Activities.
[3377] See part II.I.8 Application of 3.8% Tax to Business Income.
[3378] See part II.G.4.l.ii Net Operating Loss Deduction.
[3379] Especially fns 3064 (five years) and 3065 (three years in a personal service activity leads to permanent nonpassive status).
[3380] IRS Fact Sheet 2008-25 (http://www.irs.gov/uac/Wage-Compensation-for-S-Corporation-Officers) discusses recharacterizing distributions from S corporations as compensation for this purpose.

compensation is not subject to FICA tax.[3381] For combined employer and employee rates, see the paragraph of text accompanying fns 3391-3393 in part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax.

If all of the remuneration to an individual from related corporations[3382] is disbursed through the common paymaster,[3383] the total amount of FICA imposed on the employer and employee is

---

[3381] Rev. Rul. 59-221, which was cited with approval by *Ding v. Commissioner*, T.C. Memo. 1997-435, *aff'd* 200 F.3d 587 (9th Cir. 1999), and by *U.S. v. Asiru*, 222 Fed. Appx. 584 (9th Cir. 2007). *Ding* held that a distributive share of S corporation income was not subject to SE tax. For an excerpt from *Ding* that included an excerpt from Rev. Rul. 59-221, see fn. 3498.

[3382] Reg. § 31.3121(s)-1(b)(1) provides the following before providing examples in flush language following it:

> *Related corporations*. Corporations shall be considered related corporations for an entire calendar quarter (as defined in § 31.0-2(a)(9)) if they satisfy any one of the following four tests at any time during that calendar quarter:
>
> (i) The corporations are members of a controlled group of corporations, as defined in section 1563 of the Code, or would be members if section 1563(a)(4) and (b) did not apply and if the phrase more than 50 percent were substituted for the phrase at least 80 percent wherever it appears in section 1563(a).
>
> (ii) In the case of a corporation that does not issue stock, either fifty percent or more of the members of one corporation's board of directors (or other governing body) are members of the other corporation's board of directors (or other governing body), or the holders of fifty percent or more of the voting power to select such members are concurrently the holders of fifty percent or more of that power with respect to the other corporation.
>
> (iii) Fifty percent or more of one corporation's officers are concurrently officers of the other corporation.
>
> (iv) Thirty percent or more of one corporation's employees are concurrently employees of the other corporation.

[3383] Reg. § 31.3121(s)-1(b)(2) provides the following:

> (i) *In general*. A common paymaster of a group of related corporations is any member thereof that disburses remuneration to employees of two or more of those corporations on their behalf and that is responsible for keeping books and records for the payroll with respect to those employees. The common paymaster is not required to disburse remuneration to all the employees of those two or more related corporations, but the provisions of this section do not apply to any remuneration to an employee that is not disbursed through a common paymaster. The common paymaster may pay concurrently employed individuals under this section by one combined paycheck, drawn on a single bank account, or by separate paychecks, drawn by the common paymaster on the accounts of one or more employing corporations.
>
> (ii) *Multiple common paymasters*. A group of related corporations may have more than one common paymaster. Some of the related corporations may use one common paymaster and others of the related corporations use another common paymaster with respect to a certain class of employees. A corporation that uses a common paymaster to disburse remuneration to certain of its employees may use a different common paymaster to disburse remuneration to other employees.
>
> (iii) *Examples*. The rules of this subparagraph are illustrated by the following examples:
> *Example (1)*. S, T, U, and V are related corporations with 2,000 employees collectively. Forty of these employees are concurrently employed by two or more of the corporations, during a calendar quarter. The four corporations arrange for S to disburse remuneration to thirty of these forty employees for their services. Under these facts, S is the common paymaster of S, T, U, and V with respect to the thirty employees. S is not a common paymaster with respect to the remaining employees.
> *Example (2)*.

(a) W, X, Y, and Z are related corporations. The corporations collectively have 20,000 employees. Two hundred of the employees are top-level executives and managers, sixty of whom are concurrently employed by two or more of the corporations during a calendar quarter. Six thousand of the employees are skilled artisans, all of whom are concurrently employed by two or more of the corporations during the calendar year. The four corporations arrange for Z to disburse remuneration to the sixty executives who are concurrently employed by two or more of the corporations. W and X arrange for X to disburse remuneration to the artisans who are concurrently employed by W and X.

(b) A is an executive who is concurrently employed only by W, Y, and Z during the calendar year. Under these facts, Z is a common paymaster for W, Y, and Z with respect to A. Assuming that the other requirements of this section are met, the amount of the tax liability under sections 3102 and 3111 is determined as if Z were A's only employer for the calendar quarter.

(c) B is a skilled artisan who is concurrently employed only by W and X during the calendar year. Under these facts, X is a common paymaster for S and X with respect to B. Assuming that the other requirements of this section are met, the amount of the tax liability under sections 3102 and 3111 is determined as if X were B's only employer for the calendar quarter.

Reg. § 31.3121(s)-1(b)(3) provides the following before providing examples following it:

> *Concurrent employment*. For purposes of this section, the term concurrent employment means the contemporaneous existence of an employment relationship (within the meaning of section 3121(b)) between an individual and two or more corporations. Such a relationship contemplates the performance of services by the employee for the benefit of the employing corporation (not merely for the benefit of the group of corporations), in exchange for remuneration which, if deductible for the purposes of Federal income tax, would be deductible by the employing corporation. The contemporaneous existence of an employment relationship with each corporation is the decisive factor; if it exists, the fact that a particular employee is on leave or otherwise temporarily inactive is immaterial. However, employment is not concurrent with respect to one of the related corporations if the employee's employment relationship with that corporation is completely nonexistent during periods when the employee is not performing services for that corporation. An employment relationship is completely nonexistent if all rights and obligations of the employer and employee with respect to employment have terminated, other than those that customarily exist after employment relationships terminate. Examples of rights and obligations that customarily exist after employment relationships terminate include those with respect to remuneration not yet paid, employer's property used the employee not yet returned to the employer, severance pay, and lump-sum termination payments from a deferred compensation plan. Circumstances that suggest that an employment relationship has become completely nonexistent include unconditional termination of participation in deferred compensation plans of the employer, forfeiture of seniority claims, and forfeiture of unused fringe benefits such as vacation or sick pay. Of course, the continued existence of an employment relationship between an individual and a corporation is not necessarily established by the individual's continued participation in a deferred compensation plan, retention of seniority rights, etc., since continuation of those benefits may be attributable to employment with a second corporation related to the first corporation if the corporations have common benefits plans or if the benefits are continued as a matter of corporate reciprocity. An individual who does not perform substantial services in exchange for remuneration from a corporation is presumed not employed by that corporation. Concurrent employment need not exist for any particular length of time to meet the requirements of this section, but this section only applies to remuneration disbursed by a common paymaster to an individual who is concurrently employed by the common paymaster and at least one other related corporation at the time the individual performs the services for which the remuneration is paid. If the employment relationship is nonexistent during a quarter, that employee may not be counted towards the 30-percent test set forth in paragraph (b)(1)(iv) of this section; however, even if the employment relationship is nonexistent, section 3121(s) of the Code applies to remuneration paid to the former employee for services rendered while the employee was a common employee.

determined as though the individual has only one employer (the common paymaster).[3384] The common paymaster is responsible for filing information and tax returns and issuing Forms W-2 with respect to wages it is considered to have paid under this rule.[3385]

For S corporations, shareholders' health insurance is deductible to the S corporation and considered compensation to owners.[3386] However, it is subject to FICA only if offered in a plan that discriminates in favor of owners. The owners may deduct health insurance subject to the same rules as partners and sole proprietors.[3387]

II.L.2. Income Subject to Self-Employment Tax

II.L.2.a. Types of Income Subject to Self-Employment Tax

II.L.2.a.i. General Rules for Income Subject to Self-Employment Tax

FICA is paid one-half by the employee and one-half by the employer. If an individual is self-employed, the individual pays both halves, which combined are called self-employment (SE) tax.

Generally, all of a partnership's[3388] or sole proprietorship's[3389] income from business operations is subject to income tax and SE tax.[3390] SE tax is 15.3%[3391] (on income up to the taxable wage base (TWB) and 2.9%[3392] on all (RRA 1993 repealed the cap) income above the TWB until $200,000 (single) or $250,000 (married filing jointly), above which the tax is 3.8%.[3393] See http://www.ssa.gov/OACT/COLA/cbb.html for the current amount ($160,200 in 2023 and $168,600 in 2024). For timing, see part II.Q.1.d.iii Timeline for FICA and Income Taxation of Deferred Compensation.

Half of the SE tax is deductible for income tax purposes (which makes it less burdensome than the 3.8% tax on net investment income (NII), none of which is deducible), except that the 0.9% additional tax (that increases the 2.9% rate to 3.8%) is not considered in calculating that deduction.[3394] SE income is not subject to the 3.8% NII tax,[3395] which means that taxpayers who

exceed the TWB each year would generally prefer to pay SE tax on the excess instead of NII tax, if they cannot qualify for exclusions from NII tax.

Specifically, Code § 1402(a) begins:

> The term "net earnings from self-employment" means the gross income derived by an individual from any trade or business carried on by such individual, less the deductions allowed by this subtitle which are attributable to such trade or business, plus his distributive share (whether or not distributed) of income or loss described in section 702(a)(8) from any trade or business carried on by a partnership of which he is a member….

Note that depreciation deductions reduce net earnings from self-employment (NESE), but generally the gain generated from recapturing depreciation on the sale of an asset does not constitute NESE; see part II.L.2.a.iii Whether Gain from Sale of Property is Subject to SE Tax.

By applying for regular income tax purposes, passive loss,[3396] at-risk,[3397] and basis[3398] limitations also apply in determining SE income. CCA 202009024 explains:

> Section 1402(a) of the Code defines the term "net earnings from self-employment" as the gross income derived by an individual from any trade or business carried on by such individual, less the deductions allowed by subtitle A[1] which are attributable to such trade or business, plus the individual's distributive share (whether or not distributed) of income or loss described in section 702(a)(8) from any trade or business carried on by a partnership of which he is a member, with certain enumerated exceptions.
>
> > [1] Subtitle A of the Internal Revenue Code encapsulates §§ 1 through 1564. Section 1.1402(a)-1(a)(1) of the Income Tax Regulations more specifically references deductions allowed by chapter 1 of the Code, which includes §§ 1 through 1400Z-2.
>
> Section 1.1402(a)-2(d) of the Income Tax Regulations provides that the net earnings from self-employment of an individual include, in addition to the earnings from a trade or business carried on by him, his distributive share of the income or loss, described in section 702(a)(8), from any trade or business carried on by each partnership of which he is a member. An individual's distributive share of such income or loss of a partnership shall be determined as provided in section 704, subject to the special rules set forth in section 1402(a) and in §§ 1.1402(a)-1 to 1.1402(a)-17, inclusive, and to the exclusions provided in section 1402(c) and §§ 1.1402(c)-2 to 1.1402(c)-7, inclusive.
>
> Section 1.1402(a)-3 of the Income Tax Regulations provides that for the purpose of computing net earnings from self-employment, the gross income derived by an individual from a trade or business carried on by him, the allowable deductions attributable to such trade or business, and the individual's distributive share of the income or loss, described in section 702(a)(8), from any trade or business carried on by a partnership of which he is a member shall be computed in accordance with the special rules set forth in §§ 1.1402(a)-4 to 1.1402(a)-17, inclusive.

[3396] See part II.K Passive Loss Rules, which describes Code § 469.
[3397] See part II.G.4.j At Risk Rules (Including Some Related Discussion of Code § 752 Allocation of Liabilities).
[3398] See part II.G.4.e Basis Limitations for Partners in a Partnership.

Section 465(a) of the Code allows any loss from an activity for the taxable year only to the extent of the aggregate amount with respect to which the taxpayer is at risk (within the meaning of subsection (b)) for such activity at the close of the taxable year for individuals and C corporations that meet the stock ownership requirement under section 542(a)(2) [*i.e.*, five or less individuals owning more than 50 percent in value] engaged in an activity to which this section applies.

Section 469 of the Code disallows passive activity losses and passive activity credits for the taxable year for individuals, estates, trusts, closely-held C Corporations, and personal service corporations.

Section 1.469-1T(d)(3) of the Income Tax Regulations provides that, except as otherwise provided in regulations, a deduction that is disallowed for a taxable year under section 469 and the regulations thereunder is not taken into account as a deduction that is allowed for the taxable year in computing the amount subject to any tax imposed by subtitle A of the Internal Revenue Code.

The following example in the regulations illustrates the application of § 1.469-1T(d)(3):

> *Example*. An individual has a $5,000 passive activity loss for a taxable year, all of which is disallowed under § 1.469-1T(a)(1). All of the disallowed loss is allocated under § 1.469-1T(f) to activities that are trades or businesses (within the meaning of section 1402(c)). Such loss is not taken into account for the taxable year in computing the taxpayer's taxable income subject to tax under section 1. *In addition, such loss is not taken into account for the taxable year in computing the taxpayer's net earnings from self-employment subject to tax under section 1401.* (Emphasis added).

Section 704(d) of the Code provides that a partner's distributive share of partnership loss (including capital loss) shall be allowed only to the extent of the adjusted basis of such partner's interest in the partnership at the end of the partnership year in which such loss occurred. Any excess of such loss over such basis shall be allowed as a deduction at the end of the partnership year in which such excess is repaid to the partnership.

Section 707(c) of the Code provides a rule with respect to guaranteed payments made by a partnership to a member of the partnership. It provides that to the extent determined without regard to the income of the partnership, payments to a partner for services or the use of capital shall be considered as made to one who is not a member of the partnership, but only for the purposes of section 61(a) (relating to gross income) and, subject to section 263, for purposes of section 162(a) (relating to trade or business expenses).

Section 1.707-1(c) of the Income Tax Regulations provides that guaranteed payments do not constitute an interest in partnership profits for purposes of sections 706(b)(3), 707(b) and 708(b). In addition, § 1.707-1(c) states that for purposes of other provisions of the internal revenue laws, guaranteed payments are regarded as a partner's distributive share of ordinary income. Section 1.1402(a)-1(b) of the Income Tax Regulations provides that guaranteed payments are treated as gross income subject to self-employment tax.

A general partner in a partnership is subject to SECA tax on his or her self-employment income as defined in § 1402(b). The Code defines "self-employment income" as the NESE derived by an individual with certain adjustments. NESE as defined in § 1402(a) takes into account deductions that are allowed by subtitle A with regard to any trade or business carried on by the individual and includes the partner's distributive share of the income or loss from any trade or business carried on by the partnership, subject to the special rules under § 1402. If a partner incurs losses from partnership activities, there are rules or code provisions that limit the amount of losses a partner is allowed to take for general income tax purposes on the individual partner's tax return. These provisions include, in the order that applies: first, basis loss limitation under § 704(d); second, at-risk loss limitation under §465; and third, passive activity loss limitation under § 469. Since the calculation of NESE specifically incorporates the effect of subtitle A income tax provisions in determining deductions from trades or businesses carried on by the taxpayer and the partnership provisions in determining the distributive share of any loss, any loss limitation rule that applies for determining a partner's general income tax liability should also apply for determining a partner's SECA tax liability, unless a particular Code provision or regulation provides otherwise.[2]

[2] Some taxpayers have erroneously cited to Revenue Ruling 56-675, 1956-2 C.B. 459, as authority that NESE is not affected by the loss limitations under §§ 704(d), 465, and 469. It is our position that this ruling is not an authority on the application of the various loss limitations for SECA tax purposes. Rev. Rul. 56-675 stated that under § 1.1402(a)-1(a)(2) of the regulations, guaranteed payments are treated as gross income subject to SECA tax. However, where a partner's distributive share includes a loss resulting from the operation of the partnership business, including the deduction for guaranteed payments treated as a business expense under section 162, the self-employment income is the net amount computed by applying to the guaranteed payment received by that partner the distributive share of loss. Rev. Rul. 56-675 did not address the application of loss limitations for SECA tax purposes. Since basis cannot be negative, the facts implied taxpayer had sufficient basis, so the loss limitation of § 704(d) would not apply. Also, loss limitations under §§ 465 and 469 did not exist in 1956. Consequently, Rev. Rul. 56-675 is not applicable to whether and how the loss limitation rules apply in determining NESE under § 1402.

Specific guidance indicates that the basis loss limitation under § 704(d) and the passive activity loss limitation under § 469 apply to determine a general partner's NESE under § 1402 for SECA tax purposes. Stating, in part, that "[a]n individual's distributive share of such income or loss of a partnership shall be determined as provided in section 704," Treas. Reg. § 1.1402(a)-2(d) pulls in the basis loss limitation under § 704(d) into the computation of NESE.

Also, Treas. Reg. § 1.469-1T(d)(3) provides that a deduction under § 469 or the regulation is not taken into account for any subtitle A tax, which includes SECA tax imposed under §§ 1401 through 1403. Furthermore, the example under that regulation specifically articulates that "[passive activity] loss is not taken into account for the taxable year in computing the taxpayer's net earnings from self-employment subject to tax under section 1401" when the loss is not taken into account in computing a taxpayer's taxable income subject to tax under section 1. Although the example does not expressly involve a passive activity loss from a partnership, the regulation provision it illustrates makes no distinction between individuals conducting the trade or business directly and partners in a partnership conducting the trade or business.[3]

[3] TAM 9750001 (August 15, 1997) relied on § 1.469-1T(d)(3) and the example in concluding that the losses allocable to the partnership's activity in which he did not materially participate are taken into account for purposes of the calculation of NESE under § 1402, but only to the extent they are allowable for income tax purposes and are not otherwise of a character to be specifically excluded from the calculation of NESE.

Furthermore, § 465 applies in determining NESE of individuals carrying on a trade or business because § 1402(a) expressly takes into account deductions that are allowed by subtitle A (which is inclusive of the loss limitation rule of § 465) with regard to any trade or business carried on by the individual. While there is no similar guidance under § 1402 or § 465 that expressly states that the at-risk loss limitation under § 465 also applies for purposes of calculating NESE of general partners for SECA tax purposes, applying this loss limitation rule in determining a general partner's NESE under § 1402 for SECA tax purposes is consistent with considering the basis loss limitation under § 704(d) and the passive activity loss limitation under § 469 in computing NESE for a general partner. Like the application of § 469, § 465 determines the extent to which the partner's distributive share of the losses from the partnership carrying on the trade or business is taken into account in determining the partner's taxable income for the taxable year, and its effect is not limited to chapter 1 of the Code. Section 465 generally applies for purposes of the Code, including chapter 2.

Thus, if the individual share of loss from the partnership is disallowed to a partner under §§ 704(d) or 465 for the taxable year, the loss is also not taken into account in computing the partner's NESE for that taxable year for SECA tax purposes, assuming there is no SECA provision or regulation that provides otherwise (such as with excluded rental income).

Similarly, *Duffy v. Commissioner*, T.C. Memo. 2020-108, held that, if losses from one SE activity offset income (guaranteed payments) from another SE activity for regular tax purposes, they also offset it for SE tax purposes:[3399]

[3399] Fn. 16 in the opinion held:

If Mr. Duffy could be viewed as a limited partner of Impact Medical, his ordinary losses from the partnership would be excluded from his net earnings from self-employment regardless of whether those losses were deductible under sec. 704(d). See sec. 1402(a)(13). In that case, the guaranteed payments he received would be included in his net earnings from self-employment without any offsetting deduction if those payments were for services Mr. Duffy rendered to the partnership. See *id*. Because Impact Medical was a limited liability company, however, Mr. Duffy was a member and not a limited partner. Even so, he could be treated as a limited partner if his relationship to the entity was akin to that of a limited partner in a limited partnership. See generally *Renkemeyer, Campbell & Weaver, LLP v. Commissioner*, 136 T.C. 137 (2011). In *Renkemeyer*, *Campbell & Weaver, LLP v. Commissioner*, 136 T.C. at 147, however, we concluded that an owner's protection from claims against an entity is not enough to qualify the owner as a limited partner for purposes of sec. 1402(a)(13). Instead, we concluded that an interest other than a limited partner interest could be treated as such for purposes of that section only if the holder is merely a passive investor in the entity who does not actively participate in the entity's business operations. *Id*.at 150. But Mr. Duffy served as Impact Medical's manager and, as such, was obliged to run the company's day-to-day operations. Therefore, we see no grounds for treating him as a limited partner of Impact Medical within the meaning of sec. 1402(a)(13).

> The text of section 1402(a) gives no indication that the individual's distributive share of a loss from a business conducted by a partnership reduces the individual's net earnings from self-employment only to the extent that the individual's outside basis in the partnership is sufficient to allow him to deduct the loss in computing his regular income tax liability.
>
> Moreover, the regulations interpreting section 1402(a) provide no apparent grounds for distinguishing between deductible partnership losses and those limited by section 704(d). Section 1.1402(a)-1(a)(2), Income Tax Regs., defines "net earnings from self-employment" to include two components, the second of which is an individual's "distributive share (whether or not distributed), as determined under section 704, of the income (or minus the loss), described in section [702(a)(8)] [8]) and as computed under section 703, from any trade or business carried on by any partnership of which is he a member." The mandate that the individual's distributive share of a partnership loss be "determined under section 704" requires consideration of section 704(d). But section 704(d) does not reduce a partner's distributive share of a partnership loss; it reduces only the portion of that loss that is allowed as a deduction in computing the partner's regular taxable income. Losses not allowed as a deduction by reason of the section 704(d) limitation remain part of the partner's distributive share of the loss (and can be deducted in future years if the partner has a sufficient outside basis).
>
> …. Because the deductible loss exceeds Mr. Duffy's guaranteed payments of $218,182 for the year, we conclude that Mr. Duffy had no net earnings from self-employment for 2013 regardless of whether his distributive share of the partnership's loss can be taken into account only to the extent that it is deductible under chapter 1….

CCA 202009024 denied SE losses suspended in the then-current year by basis or at-risk limitations from being used against SE income earned that year. The corollary from *Duffy* is that, when the restriction no longer applies, the loss would be able to be used against SE income. So, if a taxpayer has only one business generating SE income, this rule is very helpful, because the prior year loss reduces SE income, when otherwise the loss might have generated no SE tax benefit. A net operating loss (NOL) is not deductible from SE income.[3400] For similar issues regarding regular income tax, see part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good.

When applied to an individual, "To be taxable as self-employment income, an individual's income must be (1) derived, (2) from a trade or business, (3) carried on by that individual."[3401]

[3400] Code § 1402(a)(4).

[3401] *Milligan v. Commissioner*, 38 F.3d 1094 (9th Cir. 1994), which continued:

> Milligan agrees with the tax court that the trade or business and carried on requirements have been satisfied. In other words, he agrees that the Termination Payments are subject to self-employment tax if they were derived from the carrying on of his previous work as an insurance agent. *Simpson v. Commissioner*, 64 T.C. 974, 989 (1975) (self-employment tax on insurance agent's trade or business earnings, e.g., commissions, as an independent contractor); *Erickson v. Commissioner*, 64 T.C.M. (CCH) 963, 966 (1992), *aff'd without op.*, 1 F.3d 1231 (1st Cir. 1993) (self-employment tax on deferred payments of unpaid commissions and renewal commissions to former insurance agent). It is immaterial that Milligan was no longer self-employed in 1987 when he received the Termination Payments. Treas. Reg. section 1.402(a)-1(c) (as amended in 1974) (Gross income derived from a trade or business includes gross income received ... in the taxable

Applying the "derived" test, the income must arise from the taxpayer's trade or business income producing activity.[3402] "To be taxable as self-employment income, earnings must be tied to the quantity or quality of the taxpayer's prior labor, rather than the mere fact that the taxpayer worked or works for the payor."[3403] When the taxpayer was fully compensated for prior work and the payments at issue were based on others' retention of the business, termination payments did not constitute SE income.[3404] Because such trailing commissions depend on others' maintaining the business, they are not SE income, regardless of their other income tax characteristics.[3405] In a reviewed decision with a lone dissent, the Tax Court has agreed with

year even though such income may be attributable in whole or in part to services rendered or other acts performed in a prior taxable year ....); *Shumaker v. Commissioner*, 648 F.2d 1198, 1200 (9th Cir. 1981) (affirming self-employment tax on sale proceeds from wheat taxpayer grew in the past: [S]elf-employment income is determined by the source of the income, not the taxpayer's *status* at the time the income is realized.) (Emphasis added.)

[3402] *Milligan v. Commissioner*, 38 F.3d 1094 (9th Cir. 1994), reasoned:

The term "derive" requires "a nexus between the income received and a trade or business that is, or was, actually carried on." *Newberry v. Commissioner*, 76 T.C. 441, 444 (1981). By nexus, we mean that the "trade or business activity by the taxpayer *gives rise to* the income...." *Id.* (emphasis added). The income is sufficiently related to the taxpayer's trade or business activity when the business activity is its source. *Id.* at 446 ("Any income must arise from some actual ... income-producing activity of the taxpayer before such income becomes subject to ... self-employment taxes...."). See, *e.g.*, *Shumaker*, 648 F.2d at 1200 (income derived from selling wheat from prior farming activity).

[3403] *Milligan v. Commissioner*, 38 F.3d 1094 (9th Cir. 1994).

[3404] *Milligan v. Commissioner*, 38 F.3d 1094 (9th Cir. 1994), reasoned:

Because Milligan already had been fully compensated for his services, none of his business activity was the "source" of the Termination Payments. The payments did not represent deferred compensation of previously-earned commissions, *cf. Erickson*, *supra*, because none of Milligan's earnings were deferred, *i.e.*, he had no vested right to payment of an identifiable money amount. Nor were they renewal commissions on previously-generated policies, *cf. id.*; *Becker v. Tomlinson*, 9 A.F.T.R.2d 1408, 1409-10 (S.D. Fla. 1962), or retirement income tied to Milligan's years of service and overall earnings.

At most, the *amount* of the Termination Payments, not the payments themselves, actually arose from Milligan's business activity. Milligan had a contingent right to receive an uncertain amount of money or nothing, depending upon the level of his prior business activity leading to compensation in his final year as an agent. The payment amount depended upon the level of his commissions (and service compensation from State Farm-Auto) on personally-produced policies, *i.e.*, his previous value as a State Farm insurance agent.

However, in part, even the payment *amount* did not depend upon the level of Milligan's prior business activity because the Termination Payments were subject to two adjustments *unrelated* to any business activity on Milligan's part for State Farm. The State Farm companies adjusted the Termination Payments to reflect the amount of income received on Milligan's book of business during the first post-termination year, and the number of his personally-produced policies cancelled during that year. If all of Milligan's customers had cancelled their State Farm non-life policies during the first post-termination year, then Milligan would have received nothing. The adjusted payment amount depended not upon Milligan's past business activity, but upon the successor agent's future business efforts to retain Milligan's customers and to generate service compensation for State Farm. In this way too, the disputed Termination Payments did not "derive" from Milligan's prior services.

[3405] *Gump v. U.S.*, 86 F3d 1126 (Fed. Cir. 1996), commenting:

Because the payments are not "derived" from his insurance business, we need not determine the precise nature of the payments or specifically characterize them as a particular type of income. That is, we need not determine whether they represent consideration for an agreement not to compete or the purchase of his insurance franchise, including its assets and goodwill. It suffices the above analysis.[3406] However, payments tied to the quantity and quality of prior services are "derived from" those services.[3407] Congress codified this test with respect to insurance

---

to hold, as we do, that they are not derived from a trade or business carried on by Gump and thus they are not taxable as self-employment income.

[3406] *Jackson v. Commissioner*, 108 T.C. 130 (1997), holding:

> In the interest of promoting uniformity, consistency, and fairness in the disposition of this issue with respect to former insurance agents who receive termination payments under similar contractual agreements, we follow the decision of the Court of Appeals for the Ninth Circuit in *Milligan v. Commissioner*, *supra*. Accordingly, upon further reflection and analysis, we hold that the termination payments petitioner received in 1990 and 1991 are not subject to self-employment tax. Because we conclude that the termination payments were not "derived" from the carrying on of petitioner's insurance business,[4] we need not decide the precise nature of the payments or specifically characterize them as a particular type of income. In other words, we need not decide in this case whether the termination payments are consideration for an agreement not to compete or the purchase of petitioner's agency, including its assets and goodwill. *Milligan v. Commissioner*, 38 F.3d at 1100.
>
> [4] See, *e.g.*, *Ohio Farm Bureau Federation, Inc. v. Commissioner*, 106 T.C. 222, 236 (1996), an analogous case, in which we pointed out that the statutory language defining "unrelated business income" in sec. 512(a) is similar to that contained in sec. 1402(a). There it was held that a lump-sum payment made by Landmark, Inc., to the taxpayer, pursuant to the terms of a nonsponsorship and noncompetition clause contained in their termination agreement, did not constitute unrelated business taxable income under sec. 511(a). We applied the rationale of *Newberry v. Commissioner*, 76 T.C. at 444. The Government did not appeal our decision, and the IRS has since revoked GCM 39865, TR-45-1437-90 (Dec. 12, 1991), which reached a contrary conclusion.

Three judges would have reached the same result, viewing the payments as either for the goodwill of petitioner's former insurance business (his books of customer accounts) or for a covenant not to compete. Here are some excerpts:

> Goodwill is acquired by the purchaser of a going concern where the transfer enables the purchaser to step into the shoes of the seller. See *Decker v. Commissioner*, 864 F.2d 51, 54 (7th Cir. 1988), *affg.* T.C. Memo. 1987-388; *Winn-Dixie Montgomery, Inc. v. United States*, 444 F.2d 677, 681 (5th Cir. 1971). Here the terms of the Agreement between petitioner and State Farm allowed petitioner's successor agent to step into his shoes. The successor agent continued the same business and sold insurance to the same customers….
>
> Payments attributable to a covenant not to compete are not "earned" income, *Furman v. United States*, 602 F.Supp. 444, 451 (D.S.C. 1984), *affd.* without published opinion 767 F.2d 911 (4th Cir. 1985), and they are not subject to self-employment tax. *Barrett v. Commissioner*, 58 T.C. 284 (1972); see also *Ohio Farm Bureau Federation, Inc. v. Commissioner*, 106 T.C. 222, 236 n.8 (1996).

[3407] *Schelble v. Commissioner*, 130 F.3d 1388 (10th Cir. 1997) reasoned:

> In contrast to Milligan, Mr. Schelble's payments are tied to the quantity and quality of his prior services performed for the Companies. Although the payments in *Milligan* and Mr. Schelble's payments have similar eligibility requirements such as (1) a minimum service requirement; (2) relinquishment of company records and policies; and (3) a covenant not to compete, Mr. Schelble's payments have distinguishing features related to Mr. Schelble's prior services. For example, unlike the plan in Milligan, Mr. Schelble must have 400 outstanding policies at his termination to be eligible for extended earnings payments. In addition, in contrast to Milligan, the amount of Mr. Schelble's payments was computed based on Mr. Schelble's length of service for the Companies. As an agent for the Companies for over fifteen years, Mr. Schelble's extended earnings payments were calculated using a higher percentage than if he had only been an agent for five or ten years. Furthermore, unlike the payments in Milligan, Mr. Schelble's extended earnings payments were calculated solely on the percentage applied to service fees paid to him during the twelve months preceding the Agreement's termination. No adjustments unrelated to

salesmen (see part II.L.8 Retirement Payments to Insurance Salesmen), and one court has stated, over a strong (and correct, in my view) dissent, that the line of cases described above is limited to insurance salesmen[3408] and held that payments labelled as deferred compensation in an agreement with a beauty products salesman were subject to FICA,[3409] notwithstanding one

---

> Mr. Schelble's prior services were made in calculating these payments. Based on these distinguishing factors, we conclude Mr. Schelble's payments are sufficiently derived from his prior insurance business to constitute self-employment income subject to self-employment tax under 26 U.S.C. section 1401.

[3408] *Peterson v. Commissioner*, 827 F.3d 968 (11th Cir. 2016), at fn. 42, commented:

> In 1997, Congress amended 26 U.S.C. § 1402 by adding subsection (k) for the specific purpose of "codif[ying] the standard established in *Milligan* with respect to termination payments made ... to an insurance salesman." *Farnsworth v. Comm'r*, 83 T.C.M. (CCH) 1153, 1159 & n.5 (2002) (citing H.R. Rep. No. 105-220, at 458 (1997) (Conf. Rep.)). As codified in § 1402(k), the *Milligan* standard holds that self-employment tax does not apply to post-termination payments from an insurance company to its former insurance salesman, provided four requirements inapplicable to this case are satisfied. See 26 U.S.C. § 1402(k)(2), § 1402(k)(3), 1402(k)(4)(A), § 1402(k)(4)(B). The Petersons concede § 1402(k) was intended to codify the *Milligan* standard, which unambiguously applies only to contractual termination payments to former insurance agents. Appellants Br. at 19-20. By urging the application of *Milligan* in this case, the Petersons and amici invite this court to expand § 1402(k) beyond the confines of its text. Appellants Br. At 20; Amicus Curiae Br. at 9. If Congress had intended the *Milligan* standard to be applied outside the context of termination payments to insurance salesmen, it would have so stated. Instead, it unambiguously limited the standard to the context of termination payments to former insurance agents.
>
> In addition, the legislative history of § 1402(k) states "[n]o inference is intended with respect to the [self-employment] tax treatment of payments that are not described in [§ 1402(k)]." H.R. Rep. No. 105-220, at 458 (1997) (Conf. Rep.), reprinted in 1997-4 (Vol. 2) C.B. 1457, 1928; see *Ruckelshaus v. Sierra Club*, 463 U.S. 680, 686 n. 8, 103 S.Ct. 3274, 3278 n.8 (1983) ("If Congress had intended the far-reaching result urged by respondents, it plainly would have said so, as is demonstrated by Congress careful statement that a less sweeping invitation was adopted."). Moreover, if *Milligan* accurately reflected the generally applicable "derived from" standard under § 1402(a), then § 1402(k) would be superfluous. See, *e.g.*, *Nunnally v. Equifax Info. Servs., LLC*, 451 F.3d 768, 773 (11th Cir. 2006) ("It is a cardinal principle of statutory construction that a statute ought, upon the whole, to be so construed that, if it can be prevented, no clause, sentence, or word shall be superfluous, void, or insignificant." (citation omitted)). We decline to expand § 1402(k) beyond its text, as the Petersons and amici urge. The dissent, however, ignores this legislative history and case law clearly limiting *Milligan* to insurance salesmen.

For Code § 1402(k), see part II.L.8 Retirement Payments to Insurance Salesmen.

[3409] *Peterson v. Commissioner*, 827 F.3d 968 (11th Cir. 2016), at fn. 42, reasoned:

> The Tax Court concluded the Petersons do not dispute the 2008 Amendments to the Family Program and the Futures Program expressly characterize them as "deferred compensation (i.e., related to Mrs. Peterson's prior labor)." *Peterson*, 106 T.C.M. (CCH) 619, *3. Under the "*Danielson* rule," that characterization is controlling for tax purposes. *Comm'r v. Danielson*, 378 F.2d 771, 775 (3d Cir. 1967) (en banc); *Spector v. Comm'r*, 641 F.2d 376, 384-86 (5th Cir. Unit A Apr. 1981) (adopting the *Danielson* rule). Our court has explained the *Danielson* rule:
>
> > When a taxpayer characterizes a transaction in a certain form, the Commissioner may bind the taxpayer to that form for tax purposes. This is the rule: "a party can challenge the tax consequences of his agreement as construed by the Commissioner only by adducing proof which in an action between the parties [to the agreement] would be admissible to alter that construction or to show its unenforceability because of mistake, undue influence, fraud, duress, et cetera."

of the two payment plans appearing to fall within the protection of case law. Information Letter 2016-0081 argued that certain undescribed post-retirement payments were SE income. *Potter v. Commissioner*, T.C. Memo. 2018-153, held:

> … For income to be taxable as self-employment income, "there must be a nexus between the income received and a trade or business that is, or was, actually carried on." *Newberry v. Commissioner*, 76 T.C. 441, 444 (1981). For there to be a "nexus" and the income to be subject to self-employment tax, the income must arise from some actual - past, present, or future - income-producing activity of the taxpayer. *Id*. at 446. Additionally, gross income derived from a taxpayer's trade or business may be subject to self-employment tax even when it is attributable in whole or in part to services rendered in a prior taxable year. Sec. 1.1402(a)-1(c), Income Tax Regs. "[S]elf-employment income is determined by the source of the income, not the taxpayer's status at the time the income is realized." *Schelble v. Commissioner*, 130 F.3d at 1392 (alteration in original) (quoting *Shumaker v. Commissioner*, 648 F.2d 1198, 1200 (9th Cir. 1981), *aff'g in part*, *rev'g in part* T.C. Memo. 1979-71.
>
> Green Country and Mr. Potter agreed that he was an independent contractor. Additionally, petitioners and respondent stipulated that the termination payment was Mr. Potter's money, not Potter Sales'. The termination payment was calculated by

---

> *Plante v. Comm'r*, 168 F.3d 1279, 1280-81 (11th Cir. 1999) (quoting *Danielson*, 378 F.2d at 775) (citation and alteration omitted). Because Peterson had signed the retirement Program Agreements respectively in 1992 and 2005 permitting Mary Kay to amend them prospectively, she necessarily had consented to the 2008 Amendments that expressly characterized the Family Program and Futures Program payments as "deferred compensation" under a nonqualified compensation plan pursuant to Section 409A of the Internal Revenue Code,[29] which makes the *Danielson* rule applicable.[30] See *Comm'r v. Nat'l Alfafa Dehydrating & Milling Co.*, 417 U.S. 134, 149, 94 S.Ct. 2129, 2137 (1974) ("This Court has observed repeatedly that, while a taxpayer is free to organize his affairs as he chooses, nevertheless, once having done so, he must accept the tax consequences of his choice, whether contemplated or not, and may not enjoy the benefit of some other route he might have chosen to follow but did not." (citations omitted)).[31]
> The Tax Court applied the Danielson rule and determined Peterson's 2009 distributions from the Family Program and Futures Program were "subject to self-employment tax pursuant to section 1401," because the Petersons had "failed to adduce proof sufficient to alter the construction of these unambiguous agreements or show that they were unenforceable." *Peterson*, 106 T.C.M. (CCH) 619, *3 (citing *Plante*, 168 F.3d at 1280-81; *Danielson*, 378 F.2d at 775). The Petersons do not dispute the Amendments to the Program Agreements unambiguously characterize Peterson s post-retirement payments as deferred compensation. The undisputed lack of ambiguity in the terms of the Program Agreements necessarily precludes the Petersons from "adducing proof which in an action between the parties would be admissible to alter that construction." *Plante*, 168 F.3d at 1280-81. When a contract is unambiguous, Texas law holds the parties intent must be determined from the contract terms alone. *Friendswood Dev. Co. v. McDade & Co.*, 926 S.W.2d 280, 283 (Tex. 1996); see also *Valence Operating Co. v. Dorsett*, 164 S.W.3d 656, 662 (Tex. 2005) (recognizing, under Texas law, a written contract must be construed in accordance with "the true intentions of the parties as expressed in the instrument").[32] Therefore, the *Danielson* rule requires that the Petersons are bound by the characterization of her 2009 Mary Kay, post-retirement Program payments as deferred compensation, making them subject to self-employment tax.
> [footnotes omitted]

Sherman v. Commissioner, T.C. Summary Opinion 2018-15, and *Dunlap v. Commissioner*, T.C. Summary Opinion 2020-10, reiterated the Tax Court's belief that *Peterson v. Commissioner*, T.C. Memo. 2013-271, was correct, notwithstanding the dissent in the Eleventh Circuit's opinion.
See part II.G.33 Taxpayer Disavowing Form.

> multiplying Mr. Potter's previous year's commissions by 1-1/2. Thus if Mr. Potter had earned no commissions in the previous year, the termination payment would have been zero. The termination payment was tied to the quantity and quality of Mr. Potter's work by being based on his previous year's commissions; no adjustments unrelated to his prior services were made in calculating the payment. See *Schelble v. Commissioner*, 130 F.3d at 1393. Therefore, the termination payment is subject to self-employment tax.[11]
>
> > [11] The Court notes that this decision follows the U.S. Court of Appeals for the Tenth Circuit - the Circuit in which, absent an agreement between the parties otherwise, these cases are appealable, see sec. 7482(b) - and does not rely on *Jackson v. Commissioner*, 108 T.C. 130, 140 (1997), which held that "[i]n the interest of promoting uniformity, consistency, and fairness in the disposition of this issue with respect to former insurance agents who receive termination payments under similar contractual agreements, we follow the decision" in *Milligan v. Commissioner*, 38 F.3d 1094 (9th Cir. 1994), *rev'g* T.C. Memo. 1992-655. The U.S. Court of Appeals for the Ninth Circuit had reversed the Tax Court, holding that the termination payment due an insurance salesman did not derive from the quality and quantity of his work and was therefore not subject to self-employment tax. Both *Jackson* and *Milligan* were about termination payments made to insurance salesmen - and had fact patterns similar to those of many other cases concerning termination payments to insurance salesmen - and the holding in *Jackson* sought to bring uniformity to that subset of termination payment cases. That "uniformity, consistency, and fairness" does not mean that every case about termination payments must be decided under the holding in *Jackson*. See *Kennedy v. Commissioner*, T.C. Memo. 2010-206 (finding that payments received in connection with the sale of an employee benefits consulting business were not capital gain but ordinary income subject to self-employment tax). The U.S. Court of Appeals for the Tenth Circuit has also contrasted other termination payment cases from *Milligan*. See *Schelble v. Commissioner*, 130 F.3d 1388 (10th Cir. 1997), *aff'g* T.C. Memo. 1996-269; *Golsen v. Commissioner*, 54 T.C. 742, 757 (1970), *aff'd*, 445 F.2d 985 (10th Cir. 1971).

The taxpayer's work can determine whether an activity is a trade or business.[3410] An author's work can bring into the ambit of SE income not only royalties from book sales but also other income from promoting her brand; *Slaughter v. Commissioner*, T.C. Memo. 2019-65, held:

> We conclude that petitioner's brand is part of her trade or business. We construe "trade or business" broadly, and, examining all of the facts, find that petitioner was engaged in developing her brand with continuity and regularity for the primary purpose of income and profit. See *Jones v. Commissioner*, T.C. Memo. 1998-354; *Dacey v. Commissioner*, T.C. Memo. 1992-187; *Hittleman v. Commissioner*, T.C. Memo. 1990-325. Petitioner set

---

[3410] *Chai v. Commissioner*, T.C. Memo. 2015-42, stated:

> The term trade or business has the same meaning under section 1402(a) as under section 162. Sec. 1402(c); see *Bot v. Commissioner*, 118 T.C. 138, 146 (2002), *aff'd*, 353 F.3d 595 (8th Cir. 2003). In *Commissioner v. Groetzinger*, 480 U.S. 23, 35 (1987), the Supreme Court determined that to be engaged in a trade or business under section 162 (and, in this case, section 1402(a)), the taxpayer must be involved in an activity with continuity and regularity and with the primary purpose of receiving income or profit.

In addition to citing *Groetzinger* in applying the above test, *Slaughter v. Commissioner*, T.C. Memo. 2019-65, *aff'd* 128 A.F.T.R.2d 2021-5399 (11th Cir. 8/3/2021), also cited *Hornaday v. Commissioner*, 81 T.C. 830, 834, 836-837 (1983).

out in a businesslike fashion to obtain stationery, a reputable agent, and a publishing contract. Petitioner worked with a media coach and publishers to develop a successful brand. She has spent time, including during 2010 and 2011, meeting with publishers, agents, media contacts, and others to protect and further her status as a brand author. She attended interviews and promotional events and works to develop and maintain good relationships with booksellers and librarians. Petitioner also uses social media, websites, and a newsletter to maintain her brand with her readership. Further, it is common in the publishing industry for writers to build brands and promote their work. We have held that an author's TV and radio appearances, for example, are evidence that a taxpayer is in the trade or business of writing rather than writing as a hobby. See, *e.g.*, *Dacey v. Commissioner*, T.C. Memo. 1992-187.

Petitioner contends that her brand could never be part of a trade or business because she is "not in the trade or business of being herself". Furthermore, her brand is not "tied to the quantity or quality" of her writing, and therefore it has an insufficient nexus with her trade or business as an author. We do not agree. The fact that petitioner's brand involves personal traits such as her name and likeness does not mean that it cannot form part of her trade or business. If petitioner's brand has commercial value, it can form part of her trade or business.

Petitioner also misapplies the nexus test. To satisfy the nexus test, the earnings must be tied to the quantity or quality of the taxpayer's labor. *Milligan v. Commissioner*, 38 F.3d at 1098. The question is not whether petitioner's brand is tied to the quantity or quality of her writing, but rather whether the payments for her brand are tied to the quantity or quality of her efforts in developing her brand. Petitioner herself admits she has worked to develop a brand. Royalties earned from her brand are not solely a result of her publishers' actions. Although the publishers fund the marketing plan for petitioner's books, petitioner's agent retains the authority over its development. Petitioner's and her agent's promotional activities and monitoring of sales information contribute to the sale of her books. Such sales-focused work is sufficiently routine that we consider it part of petitioner's trade or business. Petitioner's books, in turn, sell in part on the basis of her brand strength. Petitioner's brand signals to readers what content they can expect from her books. The loyalty of her readership base translates into higher sales, and her high sales then enhance her brand. Petitioner's brand and her writing combined are monetized, first, by the selling of books, and second, by providing petitioner with the leverage to negotiate for higher advances and royalty rates.

We note petitioner's treatment of her expenses as further evidence that payments for her brand derive from a trade or business…. Petitioner deducted the rent paid for the NYC apartment on her Schedule C, even though most of her writing was done in Georgia. The apartment's main purpose was to facilitate petitioner's attendance at meetings and conferences and to make connections with agents, publishers, and booksellers. Petitioner may have met with a screenwriter in the NYC apartment to collaborate on a script, but the fundamental benefit of having a presence in New York City was to develop her brand, not to write. Petitioner also deducted advertising costs, the cost of a car used, in part, to attend promotional activities around Atlanta, and gifts sent to her contacts in the publishing world. Such expenses demonstrate that petitioner's trade or business extends beyond writing to its promotion. If such promotion and brand-related expenditures are Schedule C trade or business expenses, then the income derived from the brand to which those expenses relate is also trade or business income. See sec. 1402(c).

> We turn finally to the remaining non-trade-or-business elements petitioner contends can be found in her contracts. Such elements include payments for the publisher's right to advertise in books published from petitioner's writing; access to her readership; the right to continue an existing series; the right to use characters from prior books published from her writing; and noncompete clauses. Some of the elements she identified fall squarely within her trade or business. The elements involving written series and characters are directly related to her writing activities. See *Newberry v. Commissioner*, 76 T.C. at 444. Petitioner's readership is made up of those who enjoy petitioner's writing, therefore providing a sufficient nexus. Without her writing there can be no books whose pages may be used for advertising. Further, the contracts include provisions that petitioner is, upon request, entitled to proceeds from the advertising in her books. If the contracts provide for additional and separate payment for that revenue, it follows that none of petitioner's advances or royalties are allocable to it.
>
> The remaining element petitioner explicitly identified is the amount paid for the noncompete clauses in the contracts. Income earned for not working is not subject to self-employment tax. See, *e.g.*, *Milligan v. Commissioner*, 38 F.3d 1094; *Newberry v. Commissioner*, 76 T.C. at 443. Petitioner contends that any amount allocable to noncompete clauses should similarly not be subject to self-employment tax. Upon review of petitioner's so-called noncompete clauses, however, we conclude that for the most part they do not prevent petitioner from contracting with others; they merely require that the contracted work be completed first.[8] Consequently, we hold that petitioner may not exclude any amount from her trade or business income that she alleges is from noncompete clauses.
>
> [8] Petitioner also has provided no way to value the payments made for these clauses. The contracts are silent as to any allocation or cost of a breach; petitioner's expert witness testified almost exclusively as to the premium paid for a brand author and not as to any other right; and applying the calendar method used by petitioner's return preparers would be nonsensical for a noncompete provision.
>
> In sum, we conclude that all of the payments to petitioner pursuant to the publishing contracts are income derived from her trade or business as an author, and such income is subject to self-employment tax.

In affirming the Tax Court, *Slaughter v. Commissioner*, 128 A.F.T.R.2d 2021-5399 (11th Cir. 8/3/2021), rejected the taxpayer's further arguments:

> Slaughter also argues that the tax court erred in finding that all of her publishing income in 2010 and 2011 was derived from her trade or business. This argument differs from her first argument: the fact that Slaughter's promotional activities were a part of her trade or business does not automatically mean that all of her publishing income was derived from her trade or business. We have held that for self-employment income to be derived from a trade or business, "there must be a nexus between the income received and a trade or business that is, or was, actually carried on." *Peterson*, 827 F.3d at 986 (cleaned up). Additionally, "the income must arise from some actual (whether present, past, or future) income-producing activity of the taxpayer before such income becomes subject to self-employment taxes." *Id*. (cleaned up). Nonetheless, "[t]he self-employment tax provisions are broadly construed to favor treatment of income as earnings from self-employment." *Id*. (quoting *Bot v. Comm'r*, 353 F.3d 595, 599 (8th Cir. 2003)).

Here, Slaughter argues that income from her intangible assets - specifically the rights to her name and likeness, access to her readership, the right to use characters from her previous books, and noncompetition agreements—is not subject to self-employment tax because there is no nexus between that income and her trade or business. In support of this argument, she cites a Ninth Circuit decision stating that the nexus test is satisfied only if the “earnings [are] tied to the quantity or quality of the taxpayer’s prior labor, rather than the mere fact that the taxpayer worked or works for the payor.” *Milligan v. Comm’r*, 38 F.3d 1094, 1098 (9th Cir. 1994).

Slaughter’s position finds no purchase in the Ninth Circuit’s test. We have declined to apply the Ninth Circuit’s quantity-or-quality test beyond the context of post-termination payments to insurance agents. See *Peterson*, 827 F.3d at 992–93 (describing Milligan as “nonbinding,” “distinguish[ing] [that] insurance case[] on at least four bases,” and concluding that “the after-termination payments of insurance salesmen” in that case were not “comparable” outside its facts). And even if the Ninth Circuit’s test did apply here, we think that all of Slaughter’s publishing income—including the portions from her intangible assets—readily satisfies it. If Slaughter ceased to write or promote her books, then her brand and success as an author would be affected. If she were not writing books, publishers would pay less—or even nothing—for her name and likeness, access to her readership, the right to use her characters, and her agreements not to compete.

Slaughter’s objections to this conclusion focus primarily on her name and likeness and her noncompetition agreements. Regarding her name and likeness, she avers that their licensing “can[not] be reasonably described as used predominantly for profit rather than as a personal right.” She then concludes that income from that licensing cannot be derived from her trade or business because trade or business activity must have the primary purpose of profit. Although she is correct that trade or business activity must be primarily profit-motivated, there is no reason to believe that Slaughter - a longtime bestselling author who has earned millions of dollars from her books - licensed her name and likeness for use on books and related materials for any purpose other than increasing her profit.

As for her noncompetition agreements, Slaughter avers that income from an agreement not to compete does not derive from a trade or business. But the supporting caselaw that Slaughter cites in fact undermines her assertion. As she correctly notes, the tax court has previously addressed “whether noncompetition under a covenant not to compete constitutes a trade or business[.]” *Ohio Farm Fed’n, Inc. v. Comm’r*, 106 T.C. 222, 234 (1996). But contrary to her suggestion, the tax court did not categorically exclude such noncompetition from being a trade or business. Instead, it held that the standard continuity-and-regularity test applied and concluded that in the case before it, “a one-time agreement not to engage in certain activities” did not constitute “the kind of continuous and regular activity characteristic of a trade or business.” *Id*. But Slaughter’s noncompetition agreements were not one-time events - noncompetition clauses appeared in every American contract that she signed. Moreover, the clauses for the most part did not prevent Slaughter from writing for other publishers - they merely required her to complete the contracted books first. Consequently, we cannot say that the tax court erred in determining that Slaughter’s income from her noncompetition agreements was derived from her trade or business.

However, if a taxpayer owns an interest in a trade or business, the taxpayer's share of business earnings is SE income, even if the taxpayer is inactive,[3411] unless the taxpayer is a limited partner.[3412]

Conversely, income from any activity that is not a trade or business, within the meaning of Code § 162,[3413] is not subject to SE tax:[3414]

- Trustee and executor fees are exempt from self-employment tax except to the extent that (a) they are attributable to the conduct of a trade or business by the trust or estate, or (b) an executor manages an estate that requires extensive management activities on the executor's part over a long period of time, in which latter case the activities might be sufficient in scope and duration to constitute the carrying on of a trade or business.[3415]

- An individual's distributive share of income from an investment club partnership does not constitute SE income.[3416]

Beware that, starting January 1, 2013, generally investment income and income from any passive activity[3417] that is not subject to SE tax would be subject to the 3.8% tax on net investment income if the taxpayer's income exceeds the relevant threshold.[3418]

[3411] See part II.L.3 Self-Employment Tax: General Partner or Sole Proprietor.

[3412] See part II.L.4 Self-Employment Tax Exclusion for Limited Partner.

[3413] Reg. § 1.1402(c)-1 provides:

> In order for an individual to have net earnings from self-employment, he must carry on a trade or business, either as an individual or as a member of a partnership. Except for the exclusions discussed in §§ 1.1402(c)-2 to 1.1402(c)-7, inclusive, the term "trade or business", for the purpose of the tax on self-employment income, shall have the same meaning as when used in section 162. An individual engaged in one of the excluded activities specified in such sections of the regulations may also be engaged in carrying on activities which constitute a trade or business for purposes of the tax on self-employment income. Whether or not he is also engaged in carrying on a trade or business will be dependent upon all of the facts and circumstances in the particular case.

See part II.G.4.l.i.(a) "Trade or Business" Under Code § 162.

[3414] Reg. § 1.1402(a)-1(b).

[3415] Rev. Rul. 58-5; see also Letter Ruling 8238055.

[3416] Rev. Rul. 75-525 held:

> In *Higgins v. Commissioner*, 312 U.S. 212 (1941), 1941-1 C.B. 339, the Supreme Court of the United States held that the conduct of investment management activities with respect to one's own account was not a trade or business within the meaning of section 23(a) of the Revenue Act of 1932, predecessor of section 162.
>
> Therefore, a partnership whose activities are limited to investment in savings certificates and collection of interest thereon with respect to its membership accounts is not engaged in a trade or business as defined in section 162 of the Code.

Higgins is quoted in the text accompanying fn. 1298 in part II.G.4.l.i.(a) "Trade or Business" Under Code § 162.

[3417] As defined in Code § 469, which generally includes rental as well as any trade or business in which the owner does not materially participate.

[3418] See part II.I 3.8% Tax on Excess Net Investment Income, particularly part II.I.8.c Application of 3.8% Tax to Rental Income.

Although interest income generally is not SE income, "other interest received in the course of any trade or business (such as interest received by a pawnbroker on his loans or interest received by a merchant on his accounts or notes receivable) is not excluded."[3419]

II.L.2.a.ii. Rental Exception to SE Tax

Income from real estate and from personal property leased with the real estate generally is not subject to SE tax, unless such rentals constitute certain types of farm activities[3420] or are received in the course of a trade or business as a real estate dealer.[3421]

Farm activities generate significant controversy as to what is rent and what constitutes payment for services[3422] or income from growing crops, raising livestock, etc. Payments under USDA's

---

3419 Reg. § 1.1402(a)-5(b). See *Eddie Cordes, Inc. v. Commissioner*, T.C. Memo. 2002-125, subjecting to SE tax interest income on 584 notes purchased over a two-year period.

3420 Code § 1402(a)(1) provides that the rental exception:

> shall not apply to any income derived by the owner or tenant of land if (A) such income is derived under an arrangement, between the owner or tenant and another individual, which provides that such other individual shall produce agricultural or horticultural commodities (including livestock, bees, poultry, and fur-bearing animals and wildlife) on such land, and that there shall be material participation by the owner or tenant (as determined without regard to any activities of an agent of such owner or tenant) in the production or the management of the production of such agricultural or horticultural commodities, and (B) there is material participation by the owner or tenant (as determined without regard to any activities of an agent of such owner or tenant) with respect to any such agricultural or horticultural commodity.

See Reg. § 1.1402(a)-4(b) and *Mizell v. Commissioner*, T.C. Memo. 1995-571 (broadly construing arrangement).

3421 Code § 1402(a)(1); Reg § 1.1402(a)-4. See Chief Counsel Advice 200816030 (Code § 761(f) active participation does not override exclusion of rental income from self-employment tax).

3422 In reversing the Tax Court, *McNamara v. Commissioner*, 236 F.3d 410 (8th Cir. 2000), *non-acq.* AOD CC-2003-003 (10/22/2003). said:

> What is missing from both the Commissioner's and the Tax Court's analyses is any mention of a nexus between the rents received by Taxpayers and the arrangement that requires the landlords' material participation. We believe this omission overlooks section 1402(a)(1)'s requirement that rents be derived under such an arrangement. That is to say, the mere existence of an arrangement requiring and resulting in material participation in agricultural production does not automatically transform rents received by the landowner into self-employment income. It is only where the payment of those rents comprise part of such an arrangement that such rents can be said to derive from the arrangement.
>
> Rents that are consistent with market rates very strongly suggest that the rental arrangement stands on its own as an independent transaction and cannot be said to be part of an arrangement for participation in agricultural production. Although the Commissioner is correct that, unlike other provisions in the Code, section 1402(a)(1) contains no explicit safe-harbor provision for fair

Conservation Reserve Program are subject to self-employment tax according to the Tax Court and IRS, but not according to the Eighth Circuit.[3423] Instead of conducting operations on one's farms and paying SE tax on all of the income, one may lease the farm to one's own S corporation for fair rental without paying SE tax on that rental, have the S corporation run

---

> market value transactions, we conclude that this is the practical effect of the derived under language.
>
> At this point, the only evidence in the record is that the rents in question were at or below market rates. However, we believe the Commissioner is entitled to an opportunity to show a connection between those rents and the production arrangement it identified.

[3423] Payments under USDA's Conservation Reserve Program are subject to self-employment tax according to the Tax Court, *Morehouse v. Commissioner*, 140 T.C. 350 (unanimous reviewed decision), but not according to the Eighth Circuit, 114 A.F.T.R.2d 2014-6287 (2014); the IRS agrees with the Tax Court, A.O.D. 2015-002, IRB No. 2015-41. The *Morehouse* Tax Court opinion relied on *Timber Co. v. Commissioner*, 64 T.C. 700, 709-711 (1975), *aff'd without published opinion*, 552 F.2d 368 (5th Cir. 1977); *Webster Corp. v. Commissioner*, 25 T.C. 55, 61 (1955), *aff'd*, 240 F.2d 164 (2nd Cir. 1957); *Harding v. Commissioner*, T.C. Memo. 1970-179; and Rev. Rul. 60-32. The *Morehouse* Tax Court opinion cited *Johnson v. Commissioner*, 60 T.C. 829, 833 as holding that exception for rentals from real estate must be narrowly construed. Rev. Rul. 65-149, cited with approval in the *Morehouse* Eighth Circuit opinion, held that grain storage fees for delaying in selling grain one produced constitute income from farming and therefore net earnings from self-employment, but grain storage fees paid for the storage of a landlord's share of a crop paid to the landlord as rental income are excluded from net earnings from self-employment as rental income.

In a split opinion, the Eighth Circuit held [footnotes omitted]:

> [T]he record discloses that the government, whether by contractual right or otherwise, physically inspected the CRP properties nearly as often as Morehouse did. These entries, coupled with the significant tilling, seeding, fertilizing, and weed control work required by the CRP contracts reveal the government likely had more physical possession for its own land conservation uses than Morehouse did. Accordingly, we hold the 2006 and 2007 CRP payments were consideration paid [by the government] for use [and occupancy] of [Morehouse's] property and thus constituted rentals from real estate fully within the meaning of § 1402(a)(1).

Both the majority and dissent cited *Wuebker v. Commissioner*, 205 F.3d 897, 903-904 (6th Cir. 2000) and mentioned Notice 2006-108, without paying deference to the latter because the IRS never issued the promised Revenue Ruling (perhaps concluding that its position was not necessarily a consensus view). For a discussion of such payments generally and a brief overview of cases, see Malloy, Langstraat, and Wilkinson, "Conservation Reserve Program Payments and Self-Employment Tax: Farmers vs. Non-Farmers," *TAXES - The Tax Magazine* (8/2015).

A.O.D. 2015-002, IRB No. 2015-41, nonacquiesced to the Eighth Circuit's opinion, stating:

> We disagree with the Eighth Circuit's characterization of the revenue rulings as establishing a line of demarcation on the self-employment tax treatment of conservation reserve payments paid to farmers and nonfarmers. We also disagree with the Eighth Circuit's holding that the CRP payments were consideration paid by the government for use and occupancy of Morehouse's property and thus constituted rentals from real estate excluded from self-employment tax under section 1402(a)(1).
>
> The Eighth Circuit misinterprets Rev. Rul. 60-32 and Rev. Rul. 65-149 when it states that the rulings establish the position that CRP payments made to non-farmers constitute rentals from real estate and are excluded from the self-employment tax. *Morehouse*, 769 F.3d at 621….
>
> We recognize the precedential effect of the decision in *Morehouse* to cases appealable to the Eighth Circuit. Accordingly, we will follow *Morehouse* within the Eighth Circuit only with respect to cases in which the CRP payments at issue were both (1) paid to an individual who was not engaged in farming prior to or during the period of enrollment of his or her land in CRP and (2) paid prior to January 1, 2008 (i.e., the effective date of the 2008 amendment to section 1402(a)(1)). We will continue to litigate the IRS position in the Eighth Circuit in cases not having these specific facts. We will also continue to litigate the IRS position in all cases in other circuits.

operations and not pay SE tax on the operations, and simply take reasonable compensations for one's services to the S corporation – an arrangement that the Tax Court approved in a 2017 reviewed case.[3424] Citing an Eighth Circuit case[3425] that it decided to find persuasive in any jurisdiction, the Tax Court[3426] held:

> Regardless of a taxpayer's material participation, if the rental income is shown to be less than or equal to market value for rent, the income is presumed to be unrelated to any employment agreement. *Id*. At that point, the burden of production shifts to the Commissioner to show a nexus between the rent and the taxpayer's obligation to materially participate. Such a showing would render the lease and employment agreements part and parcel of a larger "arrangement". *Id*.

However, the Tax Court cautioned that rent payments tied to production may be recharacterized as SE income,[3427] so one should consider avoiding such an arrangement when renting to one's own S corporation.

Regulations clarify the distinction between a real estate investor and dealer:[3428]

[3424] *Martin v. Commissioner*, 149 T.C. No. 12 (9/27/2017). The Official Tax Court Syllabus (which syllabus is not precedential, but of course the text of the case is) summarized the case:

> Ps owned a farm, renting a portion of the land to wholly owned S corporation C. C contracted with unrelated entity S to raise chickens according to S' exacting specifications. Ps followed S' specific instructions to build structures designed only to raise S' chickens. C paid Ps wages for their labor and rent for the use of the farm and structures. R asserts that the rent is subject to self-employment tax pursuant to sec. 1402(a)(1).
>
> *Held*: The facts of the instant case are not materially distinguishable from the facts of *McNamara v. Commissioner*, T.C. Memo. 1999-333, *rev'd*, 236 F.3d 410 (8th Cir. 2000). The U.S. Court of Appeals for the Eighth Circuit in *McNamara* also reversed *Hennen v. Commissioner*, T.C. Memo. 1999-306, and *Bot v. Commissioner*, T.C. Memo. 1999-256. In the light of the reversals by the Court of Appeals for the Eighth Circuit, the Court reconsiders its holdings.
>
> *Held*, further, Ps established that the rent received was at or below fair market value. R failed to show a sufficient nexus between the rental income and petitioners' obligations to participate in the production or management of the production of agricultural commodities. Therefore, the rent Ps received pursuant to the lease is not includible in their net self-employment income. To the extent *McNamara v. Commissioner*, T.C. Memo. 1999-333, *Hennen v. Commissioner*, T.C. Memo. 1999-306, and *Bot v. Commissioner*, T.C. Memo. 1999-256, are inconsistent with this holding, they are not followed.

[3425] See *McNamara* in fn. 3422.

[3426] *Martin*, fn. 3424.

[3427] *Martin*, fn. 3424, noted:

> This Court has previously evaluated the nexus between the rental income and the taxpayer's production arrangement. See, *e.g.*, *Bot v. Commissioner*, 118 T.C. 138 (finding value-added payments reported as rental income includible in net self-employment income where the payments were directly related to the volume of corn acquired and delivered by taxpayers); *Solvie v. Commissioner*, T.C. Memo. 2004-55 (same when rent payments were tied directly to the number of pigs raised). But see *Johnson v. Commissioner*, T.C. Memo. 2004-56 (finding an insufficient nexus). But despite petitioners' presentation and the Court's previous application of the well-reasoned nexus requirement in *Solvie* and *Johnson*, respondent did not brief this issue.

[3428] Reg. § 1.1402(a)-4(a). *Pool v. Commissioner*, T.C. Memo. 2014-3, set forth factors deciding whether the taxpayer is a real estate dealer and held that the taxpayer had the burden of proof of disproving the IRS findings in this area. When real estate is used in a business, see part II.G.6 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business; within that part, if property is bought for use in a trade or business but never placed in service, see text accompanying fns. 1484-1485.

In general, an individual who is engaged in the business of selling real estate to customers with a view to the gains and profits that may be derived from such sales is a real-estate dealer. On the other hand, an individual who merely holds real estate for investment or speculation and receives rentals therefrom is not considered a real-estate dealer. Where a real-estate dealer holds real estate for investment or speculation in addition to real estate held for sale to customers in the ordinary course of his trade or business as a real-estate dealer, only the rentals from the real estate held for sale to customers in the ordinary course of his trade or business as a real-estate dealer, and the deductions attributable thereto, are included in determining net earnings from self-employment; the rentals from the real estate held for investment or speculation, and the deductions attributable thereto, are excluded.

See also part II.G.26 Real Estate Special Issues.

Apartments that include the furnishing of heat and light, the cleaning of public entrances, exits, stairways and lobbies, the collection of trash, etc. fall within the rental real estate exception.[3429] However, payments for the use or occupancy of rooms or other space where services are also rendered to the occupant, such as for the use or occupancy of rooms or other quarters in hotels, boarding houses, or apartment houses furnishing hotel services, or in tourist camps or tourist homes, or payments for the use or occupancy of space in parking lots, warehouses, or storage garages, do not qualify for this exception;[3430] neither does a university providing athletic facilities to third parties when not being used for university purposes.[3431] The real estate rental exception is narrowly construed.[3432]

CCA 202151005 involved the following scenarios:

1) The taxpayer is an individual who directly and solely owns and rents, in the course of a trade or business,[1] a fully furnished vacation property via an online rental marketplace.[2] The taxpayer is not a real estate dealer within the meaning of Treas. Reg. § 1.1402(a)-4(a).[3] The taxpayer provides linens, kitchen utensils, and all other items to make the vacation property fully habitable for each occupant. In addition, the taxpayer provides daily maid services, including delivery of individual use toiletries and other sundries, access to dedicated Wi-Fi service for the rental property, access to beach and other recreational equipment for use during the stay, and prepaid vouchers for ride-share services between the rental property and the nearest

[3429] Reg. § 1.1402(a)-4(c)(2). This regulation is similar to Reg. § 1.512(b)-1(c)(5); interpreting the latter regulation, Letter Ruling 201422027 ruled that, when local law required apartments to provide parking for tenants, extra charges for a carport constituted rental income (excluded from UBTI) because the carports were characteristic of the real property, pointing out that no services, such as a security guard, were provided and covered spots were charged only a minimal monthly amount in the set rental rate. However, the ruling held that the apartment complex providing coin-operated washers and dryers on-site for use of tenants without in-home laundry was an extra service not within the rental exclusion, because tenants could use commercial laundry and cleaning establishments off-site; the ruling did not mention whether the apartment provided any services in connection with the washers and dryers.
[3430] Reg. § 1.1402(a)-4(c)(2); Rev. Ruls. 57-108 (vacation rentals involved too many services to be excluded from SE income) and 83-139 (discussing when trailer park rentals do or do not qualify for the exclusion form SE income).
[3431] See fn. 4684 in part II.Q.6.d.i UBTI Related to a Partnership or Sole Proprietorship, which applies by analogy to SE income, as described in fns. 3435-3437 in this part II.L.2.a.ii.
[3432] *Johnson v. Commissioner*, 60 T.C. 829 (1973), denying the rental exclusion for boat sheds as part of a marina business in which the taxpayer provided many services included in the rental of the boat sheds.

business district. For the year at issue, the average period of customer use of the vacation property is seven days, and therefore the activity is not considered a rental activity for purposes of § 469 pursuant to Treas. Reg. § 1.469-1T(e)(3)(ii)(A) In addition, the taxpayer materially participates in the activity within the meaning of § 469(h)(1) and Treas. Reg. § 1.469-5T and, therefore, the activity is not a passive activity within the meaning of § 469(c).

[1] Assume, in both examples #1 and #2, sufficient other facts exist so that each example rises to the level of a § 162 trade or business. See Treas. Reg. § 1.1402(c)-1. The facts provided are not intended to be used for purposes of analysis of whether the taxpayer is engaged in a trade or business under § 162 or any other provision of the Code.

[2] Assume, in both examples #1 and #2, that the taxpayer does not use the property for "personal" purposes, as defined in § 280A(d)(2).

[3] Treas. Reg. § 1.1402-4(a) states that an individual who is engaged in the business of selling real estate to customers with a view to the gains and profits that may be derived from such sales is generally a real-estate dealer.

2) The taxpayer is an individual who directly and solely owns and rents, in the course of a trade or business, a fully furnished room and bathroom in a dwelling via an online rental marketplace. The taxpayer is not a real estate dealer. Occupants only have access to the common areas of the home to enter and exit the room and bathroom and have no access to other common areas such as the kitchen and laundry room. The taxpayer cleans the room and bathroom in between each occupant's stay. For the year at issue, the average period of customer use of the vacation property is seven days, and therefore the activity is not considered a rental activity for purposes of § 469 pursuant to Treas. Reg. § 1.469-1T(e)(3)(ii)(A). In addition, the taxpayer materially participates in the activity within the meaning of § 469(h)(1) and Treas. Reg. § 1.469-5T, and, therefore, the activity is not a passive activity within the meaning of § 469(c).

CCA 202151005 reasoned:

Section 1401 imposes tax on the self-employment income of individuals. Section 1402(b) defines self-employment income by reference to net earnings from self-employment, with certain modifications. Section 1402(a) provides that the term "net earnings from self-employment" ("NESE") means the gross income derived by individuals from any trade or business they carry on, less the deductions that are attributable to such trade or business. However, under § 1402(a)(1), rentals from real estate, together with deductions properly deductible and attributable to the rentals from real estate (collectively, "net rental income"), are excluded from NESE, unless these amounts are received in the course of a trade or business as a real estate dealer.[4]

[4] This memorandum does not address nor is intended to address arrangements between an owner or tenant and another individual which provides that the individual shall produce agricultural or horticultural commodities on the land covered, or the agricultural and horticultural exception contained in section 1402(a)(1)

Treas. Reg. § 1.1402(a)-4(c)(1) provides that rentals from living quarters, where no services are rendered for the occupants, are generally considered rentals from real estate under § 1402(a)(1), except in the case of real estate dealers. However, Treas. Reg. § 1.1402(a)-4(c)(2) provides,

> Payments for the use or occupancy of rooms or other space where services are also rendered to the occupant … are included in determining net earnings from self-employment. Generally, services are considered rendered to the occupant if they are primarily for his convenience and are other than those usually or customarily rendered in connection with the rental of rooms or other space for occupancy only.

Treas. Reg. § 1.1402(a)-4(c)(2) lists examples of situations where services are rendered for the convenience of occupants, such as hotels, boarding homes, warehouses, and storage garages.

In Rev. Rul. 57-108, 1957-1 C.B. 273, the IRS ruled that a landlord who rented furnished vacation beach dwellings and rendered services "for the comfort and convenience of his guests in connection with their recreational activities"—including maid services, swimming and fishing instruction, mail delivery, furnishing of bus schedules, and information about local churches—rendered services primarily for the occupants' convenience. Consequently, the net rental income from the vacation beach dwellings was included in the landlord's NESE because the § 1402(a)(1) exclusion did not apply.

In *Bobo v. Commissioner*, 70 T.C. 706 (1978), *acq.* 1983-2 C.B. 4, the Tax Court considered a mobile home park that provided leased trailer park units with utility hookups, sewage facilities, and laundry facilities. The Tax Court held that the net rental income from the rental of the trailer park units was excluded from the owners' NESE under § 1402(a)(1). The court relied on *Delno*, *infra*, in setting the standard for when services are considered not rendered for the occupant,

> [Section 1402(a)(1)] should be applied to exclude only payments for use of space, and, by implication, such services as are required to maintain the space in condition for occupancy. If the owner performs additional services of such substantial nature that compensation for them can be said to constitute a material part of the payment made by the tenant, the "rent" received then consists in part of income attributable to the performance of labor which is not incidental to the realization of return from passive investment.

Bobo at 709 (citing *Delno v. Celebrezze*, 347 F.2d 159, 166 (9th Cir. 1965) (relating to parallel Social Security eligibility provisions). Again relying on *Delno*, the Tax Court first determined that the phrase, "'usually or customarily rendered' … must be read with emphasis upon the closing phrase 'for occupancy only.'" *Bobo* at 710. The court reasoned that an analysis of whether services are rendered solely for the convenience of the occupants pursuant to Treas. Reg. § 1.1402(a)-4(c))(2) is a question of fact based on "whether [the services rendered] are required to maintain the space in condition for occupancy and, if not, whether [the services rendered] are substantial." *Id*. at 710-11; see also *Johnson v. Commissioner*, 60 T.C. 829, 832-33 (1973) (stating, "any service not clearly required to maintain the property in condition for occupancy be considered work performed for the tenant, and not for the conservation of invested capital," in support of a narrow construction of the exclusion from NESE for rental real estate).

Ultimately, the court determined that, even though the trailer park furnished laundry services that were "clearly rendered for the convenience of the tenant and not to maintain the property in condition for occupancy," the tenants' payments for the laundry services were not "substantial enough to classify all the tenants' [rental] payments as received for 'services to the occupants.'" *Id*. at 711 (citing Treas. Reg. § 1.1402(a)-4(c)(2)). Accordingly, the court held the payments at issue were rental from real estate excluded from NESE.

In Rev. Rul. 83-139, 1983-2 C.B. 150, the Service relied on the Tax Court's analysis in *Bobo* (as it applied the holding in *Delno*) in distinguishing between two factual situations. Situation (1) involved a trailer park owner and operator who operated a trailer park that provided similar services to those provided in Bobo. Situation (2) involved a trailer park owner and operator who provided a trailer park that provided all the services as the trailer park in Bobo, but also operated "a recreation hall, consisting of a card area, pool room, kitchen, auditorium, stage, and library." The Service determined, citing to Delno and Johnson, supra, that only situation (2) gave rise to substantial services for the convenience of the occupant, stating:

> The Service agrees with the court in *Bobo* that each case turns upon the facts presented and whether the services provided by the trailer park owner are services rendered for the convenience of the tenants as opposed to services required to maintain the space rented to tenants in condition for occupancy. When determining whether service is for the maintenance of property, the courts have emphasized that the rental exclusion must be read narrowly and that any service not clearly required to maintain the property in condition for occupancy is considered work performed for the tenant.

Rev. Rul. 83-139, 1983-2 C.B. 150. Finding that the services were of such substantial nature that the compensation for them could clearly be said to constitute a material part of the payments made by the tenants, the Service ruled that the § 1402(a)(1) exclusion for rental real estate did not apply in situation (2), and the income received was includible in computing NESE.[5]

[5] This memorandum does not address nor is intended to address arrangements between an owner or tenant and another individual which provides that the individual shall produce agricultural or horticultural commodities on the land covered, or the agricultural and horticultural exception contained in section 1402(a)(1)

In *Hopper v Commissioner*, 94 T.C. 542, 548 (1990), the Tax Court held that net rental income from storage units where the landlord also provided a soft drink machine and sold locks, packaging materials, pallets, and insurance, was excluded from the owners' NESE under § 1402(a)(1) because the services provided for the convenience of the occupants of the storage units were not substantial. Even though Treas. Reg. § 1.1402(a)-4(c)(2) uses warehouses and storage garages as examples of activities that are not rentals from real estate, the "nomenclature of the examples used" in Treas. Reg. § 1.1402(a)-4(c)(2) does not impact the analysis. *Id*. At 547. Rather, the § 1402(a)(1) analysis depends on the facts and circumstances of each specific case. See *id*. Specifically,

> Whether services are considered as rendered to the occupant within the meaning of section 1.1402(a)-4(c)(2), Income Tax Regs., raises a question of fact. This question

> can be resolved by determining whether such services are required to maintain the space in condition for occupancy. If the answer is yes, then the services are not considered as rendered to the occupant. In this regard, the services listed in section 1.1402(a)-4(c)(2), Income Tax Regs., as those which are required to maintain the space in condition for occupancy are only illustrative.

Id. at 547 (relying on *Delno*, 347 F.2d at 163, and *Bobo*, 70 T.C. at 710).

Fact Situation 1

The net rental income in Fact Situation 1 is not excluded from NESE under § 1402(a)(1) because the taxpayer provides substantial services beyond those required to maintain the space in a condition suitable for occupancy. See *Bobo*, 70 T.C. at 710; Rev. Rul. 83-139. Whether services are considered rendered for the occupant is based on the particular facts and circumstances in each case. See *Hopper*, 94 T.C. at 548 (1990). Here, the payments made to the taxpayer for these services are for the convenience of the property's occupants. The services go beyond those clearly required to maintain the space in a condition for occupancy and are of such a substantial nature that the compensation for these services can be said to constitute a material portion of the rent. Thus, the payments are not excluded under § 1402(a)(1) but rather are included in NESE.[6] The characterization of this activity as not a passive activity within the meaning of § 469(c) does not affect whether the activity is excluded from NESE under § 1402(a)(1).[7]

[6] Rev. Rul. 57-108 suggests that, in the case of vacation property, the services for the convenience of the occupants must be substantial, such as maid services, swimming and fishing instructions, and furnishing local transportation schedules. Here, similar services are provided for the convenience of the occupants. Thus, the exclusion under § 1402(a)(1) does not apply, and the net rental income is included in NESE.

[7] If the activity were a rental activity under Treas. Reg. § 1.469-1T(e)(3) and, therefore, a passive activity under § 469(c), a loss generated by this activity would still be limited for purposes of computing NESE under § 1.469-1T(d)(3).

Fact Situation 2

The net rental income from Fact Situation 2 is excluded from NESE under § 1402(a)(1) because the taxpayer does not provide substantial services beyond those required to maintain the space in a condition suitable for occupancy. See *Bobo*, 70 T.C. 706 at 710; Rev. Rul. 83-139. Services the taxpayer provides to clean and maintain the property to bring it to a suitable condition for occupancy are not relevant in applying Treas. Reg. § 1.1402(a)-4(c)(2) because such services are not furnished primarily for the convenience of the property's occupants. See *Hopper*, 94 T.C. at 547. Further, services provided for the convenience of occupants must be substantial, and whether provided services are substantial depends on the facts and circumstances of each case. See *id*. At 548. Specifically, the services provided for the convenience of the occupants must be of such a substantial nature that compensation for them can be said to constitute a material part of the payments made by the occupants. See *id*. At 546 (citing *Delno*, 347 F.2d at 166). No such services are provided in Fact Situation 2. The characterization of this activity as not a passive activity within the meaning of § 469(c) does not affect whether the activity is excluded from NESE under § 1402(a)(1).

CCA 202151005 concluded:

1) No, whether an activity is a "rental activity" under § 469(c)(2) is not determinative of whether the exclusion in § 1402(a)(1) applies.

2) In situations not involving a real estate dealer, net rental income from the rental of living quarters is considered "rentals from real estate" excluded from NESE when no services are rendered for the occupants. However, if services are rendered for the occupants and the services rendered (1) are not clearly required to maintain the space in a condition for occupancy, and (2) are of such a substantial nature that the compensation for these services can be said to constitute a material portion of the rent, then the net rental income received is not excluded under § 1402(a)(1) and is included in NESE.

How about leasing equipment or other tangible personal property not connected with real estate? Renting personal property on a short-term basis is self-employment income.[3433] Although I am unaware of any cases subjecting to self-employment tax the long-term rental of personal property, cases interpreting the tax on unrelated business income in the tax-exempt area clearly view long-term rental as a trade or business;[3434] and the rental exception for the unrelated business income tax is similar to that for SE tax,[3435] and the Tax Court has noted

[3433] *Stevenson v. Commissioner*, T.C. Memo. 1989-357, pointing out, "His work in buying, assembling, storing, renting, selling, repairing and maintaining the portable signs required him to devote a substantial amount of time on a regular and continuous basis."

[3434] Rev. Rul. 69-278 (owner of buildings also leased trucks to tenants, but the truck leases were not tied in any way to the real estate leases; truck leases did not qualify for rental exception even though the lessees were responsible for fueling, maintaining, and insuring the trucks); Rev. Rul. 60-206 (rent from long-term leases of railroad tank cars was a trade or business, even though the lessee was fully responsible for the cars' operation and maintenance of their cars, as well as replacement in case of destruction or loss); Rev. Rul. 78-144 (long-term lease of heavy machinery was a trade or business even though the lessee must provide insurance, pay any taxes, and make and pay for all repairs except those involving defects in the machine parts or workmanship; the taxpayer's only work was to find a lessee, arrange for the lease, and receive, record, and deposit the rents; did not qualify for the exception to unrelated business income tax for all work being done by volunteers because labor was not a material income-producing factor in the business); *Cooper Tire & Rubber Co. Employees' Retirement Fund v. Commissioner*, 36 T.C. 96, *aff'd* 306 F.2d 20 (6th Cir. 1962) (retirement plan's one-time purchase of twenty tire manufacturing machines and one press and long-term lease of them to the plan's employer was a business even though the plan's only activity was to lease the machinery, collect the rentals and make monthly payments on the bank note and the transaction appeared to have been done merely to avoid restriction against loans from the plan to the company). See also part II.Q.6.d Unrelated Business Taxable Income.

[3435] Compare Code § 1402(a)(1) (there shall be excluded rentals from real estate and from personal property leased with the real estate… unless such rentals are received in the course of a trade or business as a real estate dealer) with Code § 512(b)(3) (there shall be excluded all rents from real property … and all rents from personal property ... leased with such real property, if the rents attributable to such personal property are an incidental amount of the total rents received or accrued under the lease, determined at the time the personal property is placed in service). Neither statute exempts rents from personal property that is not leased with real estate.

similarities between income subject to SE tax and unrelated business income tax.[3436] The 2013 Instructions to Form 1040, Schedule E generally take that position as well.[3437]

II.L.2.a.iii. Whether Gain from Sale of Property is Subject to SE Tax

Code § 1402(a)(3) excludes from SE income any gain or loss:

(A) which is considered as gain or loss from the sale or exchange of a capital asset,

(B) from the cutting of timber, or the disposal of timber, coal, or iron ore, if section 631 applies to such gain or loss, or

(C) from the sale, exchange, involuntary conversion, or other disposition of property if such property is neither-

(i) stock in trade or other property of a kind which would properly be includible in inventory if on hand at the close of the taxable year, nor

---

[3436] *Cokes v. Commissioner*, 91 T.C. 222, 234, in subjecting passive business income to SE tax, noted:

We note that the concept that the character of trade or business income is retained in the partner's hands is not unique to the self-employment taxes area. The unrelated business income tax provisions (sec. 511 et seq.) generally provide that a tax-exempt organization's distributive share of a partnership's unrelated trade or business income is subject to the unrelated trade or business income tax. Sec. 512(c). The report of the House Ways and Means Committee on the bill enacting the unrelated business income tax, reads as follows (H. Rept. 2319, 81st Cong., 2d Sess. 111-112 (1950), 1950-2 C.B. 460):

> In the event an organization to which Supplement U [the predecessor of sec. 511 et seq.] applies is a member of a partnership which is regularly engaged in a trade or business which is unrelated to the functions and purposes of the organization, the organization would include, in computing its unrelated business net income, so much of its share (whether or not distributed) of the partnership gross income as is derived from that unrelated business and its share of the deductions attributable thereto, and make the necessary adjustments for the exceptions and limitations which have been discussed above. For example, if an exempt educational institution is a silent partner in a partnership which runs a barrel factory and such institution also holds stock in a pottery manufacturing corporation, it would include in its unrelated business income its share of the barrel factory income, but not its proportionate share of any dividends received by the partnership from the pottery corporation. If the taxable year of the organization is different from that of the partnership, the amounts to be so included or deducted in computing the unrelated business net income are to be based upon the income and deductions of the partnership for any taxable year of the partnership ending within or with the taxable year of the organization.

The example in the committee report explains that the unrelated business income tax provisions draw essentially the same line as that drawn in the self-employment tax provisions. Interestingly, both statutes were enacted by the 81st Congress.

[3437] From page E-4 of the Instructions:

Personal property. Do not use Schedule E to report income and expenses from the rental of personal property, such as equipment or vehicles. Instead, use Schedule C or C-EZ if you are in the business of renting personal property. You are in the business of renting personal property if the primary purpose for renting the property is income or profit and you are involved in the rental activity with continuity and regularity.

If your rental of personal property is not a business, see the instructions for Form 1040, lines 21 and 36, to find out how to report the income and expenses.

(ii) property held primarily for sale to customers in the ordinary course of the trade or business…

In testing whether a person is a dealer in real property, courts consider numerous factors when deciding the taxpayer's primary purpose for holding property, including:[3438]

(1) the frequency and regularity of sales of real properties;

(2) the substantiality of the sales and the relative amounts of income taxpayers derived from their regular business and the sales of real properties;

(3) the length of time the taxpayers held the real properties;

(4) the nature and extent of the taxpayers' business and the relationship of the real properties to that business;

(5) the purpose for which the taxpayers acquired and held the real properties before sale;

(6) the extent of the taxpayers' efforts to sell the property by advertising or otherwise; and

(7) any improvements the taxpayers made to the real properties.

See also part II.G.26 Real Estate Special Issues.

[3438] *SI Boo, LLC v. Commissioner*, T.C. Memo. 2015-19. In that case, the court easily concluded dealer status as follows (footnote omitted):

> In 2007 and 2008 S. I. Securities sold 29 and 14 parcels of real estate, respectively, by quitclaim deed. In 2008 Sabre sold 86 parcels of real estate by quitclaim deed, of which 53 were sold to third parties and 33 were assigned to SI Boo or S. I. Securities. In 2007 and 2008 SI Boo sold 52 and 20 parcels of real estate, respectively, by quitclaim deed. The entities' own accounting records, as well as the testimony presented at trial, showed that the entities desired to dispose of the real properties quickly and frequently and with the intent to make a profit and were successful. In fact, petitioners effectively concede on brief that most of the properties S. I. Securities, Sabre, and SI Boo sold by quitclaim deed during the years at issue were sold within one year of their acquisition. On this record, we give little weight to the fact that the entities acquired more certificates of purchase of tax lien than tax deeds. In sum, the entities' sales of real properties were frequent and regular during the years at issue.

The court held:

> On the basis of our findings that the entities earned income from the proceeds of sales of real properties, which was an integral part of their respective trades or businesses, we hold that the entities should have included the income in their reported net earnings from self-employment.

It also held that the sales were not eligible for installment sale reporting. See fn. 4299, found in part II.Q.3 Installment Sales - Deferring Tax on Lump Sum Payout Expected More than Two Years in the Future.

In deciding whether sales of personal property are of property “held primarily for sale to customers in the ordinary course of a trade or business” (and therefore SE income) or if they are of property held as an investment the Tax Court looks to:[3439]

- frequency and regularity of sales;
- substantiality of sales;
- length of time the property was held;
- segregation of property from business property;
- purpose of acquisition;
- sales and advertising effort;
- time and effort spent on sales; and
- how the proceeds of the sales were used.

II.L.2.b. S corporation Subjecting to FICA Payments for Managing Real Estate, When Net Rental Income Itself Is Exempt from SE Tax

Part II.L.2.a Types of Income Subject to Self-Employment Tax explains that real estate rental income generally is not subject to self-employment (SE) tax.[3440]

However, compensating a partner for services rendered subjects a partner to SE tax.[3441] So, the key to avoiding SE tax when working in real estate is to provide some sort of interest in profits rather than expressly compensating the person.

If an S corporation holds or manages the real estate, the IRS will assert that any distributions to its owners constitute compensation to the extent of the value of the services they provide the business and that FICA is owed.[3442] In a partnership, however, a very well-drafted allocation of profits does not constitute a guaranteed payment[3443] for services that would be classified as compensation income.

Note that converting real estate rental income to SE income or FICA wages might not be a bad result. SE income and FICA wages are not subject to the 3.8% tax on net investment income,[3444] whereas real estate rental income often is. For a discussion of the latter, see

---

[3439] *Ryther v. Commissioner*, T.C. Memo. 2016-56, citing *Williford v. Commissioner*, T.C. Memo. 1992-450. *Ryther* held that a taxpayer who held scrap metal left over from his dissolved business was not subject to SE tax when he surprisingly discovered it had a market where he could easily sell it whenever he needed money.
[3440] See fns. 3421-3432, noting exceptions for dealers, certain short-term rentals, etc.
[3441] See fns. 3455-3456.
[3442] See fn. 79.
[3443] See fns. 528-526, which requires the allocation to be of net profits rather than being some percentage of gross rents or other formula measurement or fixed payment.
[3444] See fn. 2290.

part II.I.8.c Application of 3.8% Tax to Rental Income. Furthermore, up to one-half of SE tax is deductible,[3445] whereas none of the 3.8% tax on NII is deductible.

II.L.3. Self-Employment Tax: General Partner or Sole Proprietor

Generally, all of a partnership's or sole proprietorship's operating income is subject to income tax and FICA (self-employment) tax.[3446] An entity that is disregarded for income tax purposes is also disregarded for self-employment tax purposes,[3447] notwithstanding that it is treated as a separate entity for payroll tax purposes;[3448] therefore, a partner in a partnership that owns a

---

[3445] See text accompanying fn. 2459.

[3446] See part II.L.2 Income Subject to Self-Employment Tax.

[3447] Reg. § 301.7701-2T(c)(2)(iv)(C)(2) provides:

> Section 301.7701-2(c)(2)(i) applies to taxes imposed under subtitle A, including Chapter 2—Tax on Self-Employment Income. Thus, an entity that is treated in the same manner as a sole proprietorship under § 301.7701-2(a) is not treated as a corporation for purposes of employing its owner; instead, the entity is disregarded as an entity separate from its owner for this purpose and is not the employer of its owner. The owner will be subject to self-employment tax on self-employment income with respect to the entity's activities. Also, if a partnership is the owner of an entity that is disregarded as an entity separate from its owner for any purpose under § 301.7701-2, the entity is not treated as a corporation for purposes of employing a partner of the partnership that owns the entity; instead, the entity is disregarded as an entity separate from the partnership for this purpose and is not the employer of any partner of the partnership that owns the entity. A partner of a partnership that owns an entity that is disregarded as an entity separate from its owner for any purpose under § 301.7701-2 is subject to the same self-employment tax rules as a partner of a partnership that does not own an entity that is disregarded as an entity separate from its owner for any purpose under § 301.7701-2.

In adopting this final regulation, T.D. 9869 (7/2/2019) commented:

> As noted in the preamble to TD 9766, these regulations do not address the application of Rev. Rul. 69-184 in tiered partnership situations, but rather clarify that a disregarded entity owned by a partnership is not treated as a corporation for purposes of employing any partner of the partnership…. However, the Treasury Department and the IRS will continue to consider the application of Rev. Rul. 69-184, including the specific issue noted by the commenter [regarding publicly traded partnerships], and welcome further comments.

See text accompanying and flowchart following fn 556 in part II.C.8.a Code § 707 - Compensating a Partner for Services Performed.

[3448] Reg. § 301.7701-2(c)(2)(iv), "Special rule for employment tax purposes," provides:

> (A) *In general*. Except as provided in paragraph (c)(2)(iv)(C) of this section, paragraph (c)(2)(i) of this section (relating to certain wholly owned entities) does not apply to taxes imposed under Subtitle C—Employment Taxes and Collection of Income Tax (Chapters 21, 22, 23, 23A, 24, and 25 of the Internal Revenue Code).
>
> (B) *Treatment of entity*. Except as provided in paragraph (c)(2)(iv)(C) of this section, an entity that is disregarded as an entity separate from its owner for any purpose under this section is treated as a corporation with respect to taxes imposed under Subtitle C—Employment Taxes and Collection of Income Tax (Chapters 21, 22, 23, 23A, 24, and 25 of the Internal Revenue Code). For special rules regarding the application of certain employment tax exceptions, see §§ 31.3121(b)(3)-1(d), 31.3127-1(b), and 31.3306(c)(5)-1(d) of this chapter.
>
> (C) *Special rules*.
>
> (1) Paragraphs (c)(2)(iv)(A) and (B) of this section do not apply to withholding requirements imposed by section 3406 (backup withholding). Thus, in the case of an entity that is disregarded as an entity separate from its owner for any purpose under this section, the owner is subject to the withholding requirements imposed by section 3406 (backup withholding).
>
> (2) [see fn 3447].

disregarded entity is also treated as a partner with respect to the disregarded entity and cannot receive a Form W-2. On the other hand, a partnership that elects out of applying subchapter K remains subject to self-employment tax.[3449]

(D) *Example*. The following example illustrates the application of paragraph (c)(2)(iv) of this section:

Example.

(i) LLCA is an eligible entity owned by individual A and is generally disregarded as an entity separate from its owner for Federal tax purposes. However, LLCA is treated as an entity separate from its owner for purposes of subtitle C of the Internal Revenue Code. LLCA has employees and pays wages as defined in sections 3121(a), 3306(b), and 3401(a).

(ii) LLCA is subject to the provisions of subtitle C of the Internal Revenue Code and related provisions under 26 CFR subchapter C, Employment Taxes and Collection of Income Tax at Source, parts 31 through 39. Accordingly, LLCA is required to perform such acts as are required of an employer under those provisions of the Internal Revenue Code and regulations thereunder that apply. All provisions of law (including penalties) and the regulations prescribed in pursuance of law applicable to employers in respect of such acts are applicable to LLCA. Thus, for example, LLCA is liable for income tax withholding, Federal Insurance Contributions Act (FICA) taxes, and Federal Unemployment Tax Act (FUTA) taxes. See sections 3402 and 3403 (relating to income tax withholding); 3102(b) and 3111 (relating to FICA taxes), and 3301 (relating to FUTA taxes). In addition, LLCA must file under its name and EIN the applicable Forms in the 94X series, for example, Form 941, “Employer’s Quarterly Employment Tax Return,” Form 940, “Employer’s Annual Federal Unemployment Tax Return;” file with the Social Security Administration and furnish to LLCA’s employees statements on Forms W-2, “Wage and Tax Statement;” and make timely employment tax deposits. See §§ 31.6011(a)-1, 31.6011(a)-3, 31.6051-1, 31.6051-2, and 31.6302-1 of this chapter.

(iii) A is self-employed for purposes of subtitle A, chapter 2, Tax on Self-Employment Income, of the Internal Revenue Code. Thus, A is subject to tax under section 1401 on A’s net earnings from self-employment with respect to LLCA’s activities. A is not an employee of LLCA for purposes of subtitle C of the Internal Revenue Code. Because LLCA is treated as a sole proprietorship of A for income tax purposes, A is entitled to deduct trade or business expenses paid or incurred with respect to activities carried on through LLCA, including the employer’s share of employment taxes imposed under sections 3111 and 3301, on A’s Form 1040, Schedule C, “Profit or Loss for Business (Sole Proprietorship).”

[3449] *Cokes v. Commissioner*, 91 T.C. 222, 230-231 (1988), held:

Article XVII of the unit operating agreement, set forth in our findings, *supra*, provides that each working interest owner elects under these regulations to be excluded from subchapter K. However, in our unanimous Court-reviewed opinion in *Bryant v. Commissioner*, 46 T.C. 848 (1966), *affd.* 399 F.2d 800 (5th Cir. 1968), we concluded as follows (46 T.C. at 864):

> When Congress has subtitlized, subchapterized, and sectionized its treatment of a many threaded statutory pattern like the complex Internal Revenue Code, its clear words seem to us a safe guide to meaning. The election under section 761(a) does not operate to change the nature of the entity. A partnership remains a partnership; the exclusion simply prevents the application of subchapter K. The partnership remains intact and other sections of the Code are applicable as if no exclusion existed.

Although *Bryant* involved application of the investment credit to partnerships which had elected out of subchapter K, this Court’s above-quoted analysis (which was specifically adopted by the Court of Appeals (399 F.2d at 806-807)) is equally applicable to the self-employment taxes of chapter 2.[9]

[9] The discussion of this matter in *Madison Gas & Electric Co. v. Commissioner*, 72 T.C. 521, 559 n. 9 (1979), *affd.* 633 F.2d 512 (7th Cir. 1980), sets aside for the future how the Bryant analysis

A partner who is inactive nevertheless receives income from a trade or business subject to self-employment tax.[3450] Even very small interests that contractually are unable to participate generate SE income[3451] unless the taxpayer can qualify as a limited partner (or perhaps passive

---

is to be applied where the controlling statute outside of subch. K does not specifically refer to partnerships. In the instant case, sec. 1402(a) specifically refers to partnerships; thus the instant case falls within the *Bryant* analysis and we have no need to weigh the considerations discussed in the *Madison Gas* footnote.

Accordingly, article XVII of the unit operating agreement (1) does not serve to prevent us from agreeing with respondent that the unitization agreement and the unit operating agreement created a partnership for purposes of section 1402(a), and (2) does not serve to insulate petitioner from the self-employment taxes.

[3450] *Cokes v. Commissioner*, 91 T.C. 222, 233-234 (1988), held:

Petitioner stresses her lack of control of the working interest operations because of the close relationships among the other owners and the operator. The question before us is whether petitioner was a member of a partnership or of a joint venture treated as a partnership, and petitioner's lack of control does not affect that question.[11]

[11] The report of the Committee on Ways and Means on the Social Security Act Amendments of 1949 (H. R. 6000) explained the provision as follows (H. Rept. 1300, 81st Cong., 1st Sess. 136-137 (1949), 1950-2 C.B. 294):

"The net earnings from self-employment of an individual include, in addition to the earnings from a trade or business carried on by him, his distributive share of the net income or loss from any trade or business carried on by each partnership of which he is a member. *** [A] partnership which constitutes an association taxable as a corporation *** is not recognized as a partnership for such purposes. Moreover, only the net income or loss derived by the partnership from carrying on a trade or business is taken into account. Any net income or loss of the partnership derived from sources clearly unrelated to the trade or business carried on by it is excluded in determining the net earnings from self-employment of the partners. The net earnings from self-employment of a partner include his distributive share of the net income or loss of a partnership of which he is a member, irrespective of the nature of his membership, as for example, as a limited or inactive member."

In 1977, the Congress amended sec. 1402(a) to add thereto par. (12), which excludes "the distributive share of any item of income or loss of a limited partner, as such" (sec. 313(b)(3) of the Social Security Amendments of 1977, Pub. L. 95-216, 91 Stat. 1509, 1536). (Sec. 124(c)(2) of the Social Security Amendments of 1983, Pub. L. 98-21, 97 Stat. 65, 90, redesignated par. (12) for taxable years beginning after Dec. 31, 1989.) Petitioner does not contend that the owners of the working interests constituted a limited partnership, nor that she is a limited partner . It appears that, in the words of the 1949 committee report, petitioner may fairly be described as an "inactive member", rather than a limited partner.

Petitioner contends that "The situation is analogous to a minority interest in a close-held corporation."

The problem is that petitioner (and Cokes) did not put their working interest in a corporation, and, for purposes of the self-employment taxes, the relevant statute makes receipt of distributive share of trade or business income from a partnership (defined expansively in section 7701(a)(2)) generally equivalent to the partner's engagement in a trade or business.

[3451] *Methvin v. Commissioner*, T.C. Memo. 2015-81, *aff'd* 653 Fed. Appx. 616 (10th Cir. 6/24/2016), imposed self-employment tax on the owner of working interests in several oil and gas ventures. The working interests were no more than 2%-3% in ventures that "were not part of a business organization (such as a partnership, a limited partnership, a limited liability company, or a corporation) that is registered under the laws of any State." Furthermore, "Petitioner had no right of involvement in the management or operation of the ventures." Nevertheless, the Tax Court held:

In support of his contention petitioner emphasizes his lack of active involvement in the operation of the wells, his lack of knowledge and expertise in the oil industry, and the fact that his working interests were small, minority interests in each well. The record supports petitioner's contention member of an LLC) under part II.L.4 Self-Employment Tax Exclusion for Limited Partner, which occurred in *Hardy v. Commissioner*, T.C. Memo. 2017-16, a case involving an LLC member who had management rights as an equal 1/8 owner but acted as a mere investor.[3452]

Guaranteed payments for services rendered generally are subject to SE tax.[3453] However, they are not subject to SE tax if and to the extent that the activity for which the services are rendered does not constitute a trade or business.[3454] On the other hand, an activity that is excluded from self-employment tax might constitute a trade or business for purposes of applying SE tax to guaranteed payments for services rendered.[3455]

II.L.4. Self-Employment Tax Exclusion for Limited Partners' Distributive Shares

A limited partner's income is not subject to SE tax,[3456] except for guaranteed payments for services rendered to a partnership that engages in a trade or business.[3457] Being passive in an entity is insufficient; the entity must actually be a state law limited partnership;[3458] later this

---

> that his personal involvement in the day-to-day operation of the wells was minimal. However, a taxpayer who is not personally active in the management or operation of a trade or business may be liable for self-employment tax if the trade or business is carried out on his behalf through his agents or employees or constitutes his distributive share of income from a partnership in which he was a member. Sec. 1402(a); *Cokes v. Commissioner*, 91 T.C. 222 (1988); *Perry v. Commissioner*, T.C. Memo. 1994-215; *Moorhead v. Commissioner*, T.C. Memo. 1993-314; secs. 1.1402(a)-2(b), 1.1402(c)-1, Income Tax Regs.

[3452] See text accompanying fns. 3475–3482.

[3453] Rev. Rul. 55-30. Furthermore, if the IRS asserts that guaranteed payments were for services and not for capital, the IRS will succeed unless the taxpayer proves that they were for capital. *Seismic Support Services, LLC v. Commissioner*, T.C. Memo. 2014-78 (accuracy-related penalties imposed) and 2015-151 (rejecting various additional arguments by the taxpayer).

[3454] Reg. § 1.1402(a)-1(b). Guaranteed payments are not W-2 wages. See fn. 551.

[3455] Reg. § 1.1402(c)-1.

[3456] Code § 1402(a)(13). See *Hough v. Commissioner*, T.C. Memo. 1997-361 (loss from limited partnership could not offset self-employment earnings from law practice), *aff'd* 162 F.3d 1151 (3rd Cir. 1998).

[3457] Code § 1402(a)(13). See *Howell v. Commissioner*, T.C. Memo. 2012-303 (guaranteed payments from LLC were subjected to self-employment tax), initially discussed in the Shop Talk column by Banoff and Lipton, "Does *Renkemeyer*'s Legacy of Confusion Live On?" *Journal of Taxation* (February 2013).

[3458] *Perry v. Commissioner*, T.C. Memo. 1994-215, held:

> The evidence does not support petitioner's contention that he is a limited partner. State law requires that certain formalities be observed to create a limited partnership (partnership in commendam in Louisiana). Tex. Rev. Civ. Stat. Ann. art. 6132a-1 (West Supp. 1994); La. Civ. Code Ann. arts. 2836-2848 (West Supp. 1994); *Johnson v. Commissioner*, *supra*. There is no evidence of such formalities having been observed by the owners of interests in the wells.

Norwood v. Commissioner, T.C. Memo. 2000-84, followed this:

> It is undisputed that petitioner's interest in Gallant was a general partnership interest. Accordingly, his distributive share of the partnership's trade or business income is, subject to the limitations of section 1402(b), subject to the taxes imposed by section 1401 on self-employment income. *Cokes v. Commissioner*, 91 T.C. 222, 229-230 (1988); *Anderson v. Commissioner*, T.C. Memo. 1992-130. That petitioner spent a minimal amount of time engaged in the operations of Gallant is irrelevant to this determination. *Cokes v. Commissioner*, *supra* at 233; *Anderson v. Commissioner*, *supra*. The passive activity rules under section 469 have no application in this case. Petitioner's lack of participation in or control over the operations of Gallant does not turn his general partnership interest into a limited partnership interest. A limited partnership must be created in the form prescribed by State law. *Perry v. Commissioner*, T.C. Memo. 1994-215; *Johnson v. Commissioner*, T.C. Memo. 1990-461.

part II.L.4 discusses when this exception has been expanded for LLCs. One case, involving a general partnership that elect limited liability protection for its general partners, has led some commentators to suggest that the Tax Court might consider a limited partner's distributive share of income to be subject to SE tax if the limited partner performs services;[3459] I agree that the language is troublesome but disagreed with this suggestion, because that case did not involve a limited partnership and the legislative history cited in the text accompanying fn. 3462 clearly contemplates that a partner can be a general partner and a limited partner and benefit from the limited partner exclusion.

In August 2022 the Tax Court denied summary judgment on the limited partner exclusion in a state law limited partnership:[3460]

> Currently before the Court is a motion for summary judgment filed by petitioner Sirius Solutions, L.L.L.P., Sirius Solutions GP, L.L.C., Tax Matters Partner (Sirius). [Doc. 13.] Sirius contends that, as a matter of law, its limited partners' distributive shares of partnership income are excluded from self-employment tax under I.R.C. § 1402(a)(13). Both parties agree that this question turns on the ordinary meaning of the term "limited partner" as used in I.R.C. § 1402(a)(13) and whether Sirius's limited partners qualified as such during the year at issue.
>
> We will deny Sirius's motion. Genuine disputes of material fact remain regarding Sirius's operations as well as the nature of the limited partners' involvement in the business. The resolution of these factual issues likely bears on our determination whether Sirius's limited partners qualify as "limited partners" as that term is used in I.R.C. § 1402(a)(13). Given this posture, summary judgment is not appropriate.

For details on Code § 707(c), see part II.C.8.a Code § 707 - Compensating a Partner for Services Performed.

Unfortunately, *Soroban Capital Partners LP v. Commissioner*, 161 T.C. No. 12 (2023), denied a motion for summary judgment that Code § 1402(a)(13) protects a state law limited partner from SE tax. The Syllabus summarizes:

> PS, a limited partnership subject to the TEFRA audit and litigation procedures, made guaranteed payments and distributed ordinary income to its limited partners. It excluded distributions of ordinary income to its limited partners from its computation of net earnings from self-employment. R determined that the distributions of ordinary income should have been included in PS's computation of net earnings from self-employment.
>
> P, the tax matters partner of PS, filed a Motion for Summary Judgment asking the Court to hold that a limited partner's distributive share of partnership income is excluded from net earnings from self-employment. The parties cross-moved as to whether we have jurisdiction in these partnership-level proceedings to inquire into the functions and roles of PS's limited partners.

[3459] See language highlighted in fn. 3472.
[3460] *Sirius Solutions, L.L.L.P. v. Commissioner*, Docket No. 11587-20, Order dated August 8, 2022 in response to a motion filed June 4, 2021.

Held: I.R.C. § 1402(a)(13) contains a limited partner exception that excludes from net earnings from self-employment “the distributive share of any item of income or loss of a limited partner, as such.”

Held, further, the limited partner exception of I.R.C. § 1402(a)(13) does not apply to a partner who is limited in name only.

Held, further, determining whether a partner is a limited partner in name only requires an inquiry into the functions and roles of the limited partner.

Held, further, because net earnings from self-employment is a partnership item, an inquiry into the functions and roles of a limited partner is a factual determination that underlies a partnership item that is properly determined in a TEFRA proceeding. Treas. Reg. § 301.6231(a)(3)-1(b).

Held, further, P’s Motion for Summary Judgment will be denied; R’s Motion for Partial Summary Judgment will be granted.

The court reasoned in its section, “Limited Partner, As Such”:

Section 1402(a)(13) does not define the phrase “limited partner, as such.” However, legislative history and caselaw provide us with insight on Congress’s intended meaning. The limited partner exception under section 1402(a)(13) was enacted in 1977[5] to “exclude from social security coverage, the distributive share of income or loss received by a limited partner from the trade or business of a limited partnership.”[6] Social Security Amendments of 1977, § 313(b), 91 Stat. at 1536; H.R. Rep. No. 95-702, pt. 1, at 11, as reprinted in 1977 U.S.C.C.A.N. at 4168. Essentially, it was enacted to exclude earnings that are of an investment nature. H.R. Rep. No. 95-702, pt. 1, at 11, as reprinted in 1977 U.S.C.C.A.N. at 4168.

In 1997 Treasury issued a proposed regulation seeking to define the scope of the limited partner exception. See Prop. Treas. Reg. § 1.1402(a)-2, 62 Fed. Reg. 1702 (Jan. 13, 1997). The proposed regulation provided that an individual would not be treated as a limited partner if the individual had personal liability for partnership debts, had authority to contract on behalf of the partnership, or participated in the partnership’s trade or business for more than 500 hours during the partnership’s taxable year. *Id*. para. (h)(2), 62 Fed. Reg. at 1704.

This proposal received much criticism. That criticism led Congress to issue a moratorium prohibiting Treasury from issuing any temporary or final regulation with respect to the definition of a limited partner under section 1402(a)(13) until July 1, 1998. Taxpayer Relief Act of 1997, Pub. L. No. 105-34, § 935, 111 Stat. 788, 882. Congress’s reasoning behind the moratorium was that “the Senate [was] concerned that the proposed change in the treatment of individuals who are limited partners under applicable State law exceeds the regulatory authority of the Treasury Department and would effectively change the law administratively without congressional action.” Revenue Reconciliation Act of 1997, H.R. 2014, 105th Cong., 143 Cong. Rec. S6694, S6774, S6819 (1997).[7]

Since the moratorium, Congress has briefly discussed the definition of limited partner but has not defined it. See, e.g., Staff of J. Comm. on Tax’n, 110th Cong., Present Law and Analysis Relating to Tax Treatment of Partnership Carried Interests and Related Issues, Part I, JCX-62-07, at 35 n.64 (J. Comm. Print 2007) ("[L]imited partner status is determined under State law. Issues have arisen under present law as to the proper [self-employment] tax treatment of individuals who may be limited partners under State law but who participate in the management and operation of the partnership.").[8] Furthermore, Treasury has yet to issue any final or temporary regulation defining "limited partner" under section 1402(a)(13).

[8] Joint Committee on Taxation reports are not considered legislative history and carry persuasive weight similar to law review articles. See *Gregory v. Commissioner*, 149 T.C. 43, 55 (2017) (noting that the Joint Committee on Taxation's commentary on tax laws after Congress enacts them does "not inform the decisions of the members of Congress who vot[e] in favor of the [law]" and "[t]he Supreme Court has told us such `[p]ost-enactment legislative history...is not a legitimate tool of statutory interpretation,'" but instead is as persuasive as law review articles (alterations in original) (first quoting *United States v. Woods*, 571 U.S. 31, 48 (2013); and then quoting *Bruesewitz v. Wyeth LLC*, 562 U.S. 223, 242 (2011))).

In 2011 we were called upon to determine the scope of the limited partner exception. We applied statutory construction principles to determine whether partners in an LLP should be considered limited partners under section 1402(a)(13). See *Renkemeyer*, 136 T.C. 137. In *Renkemeyer*, 136 T.C. at 150, we analyzed the legislative history of section 1402(a)(13) and concluded that its intent "was to ensure that individuals who merely invested in a partnership and who were not actively participating in the partnership's business operations...would not receive credits towards Social Security coverage." We further found that "[t]he legislative history...does not support a holding that Congress contemplated excluding partners who performed services for a partnership in their capacity as partners (i.e., acting in the manner of self-employed persons), from liability for self-employment taxes." *Renkemeyer*, 136 T.C. at 150. Lastly, we held that the partners in that case were not limited partners for purposes of section 1402(a)(13) because their "distributive shares arose from legal services...performed on behalf of the law firm" and not "as a return on the partners' investments." *Renkemeyer*, 136 T.C. at 150.

In *Renkemeyer* we specifically applied a functional analysis test to determine whether the limited partner exception applied. But that case specifically dealt with an LLP and not a limited partnership as present here. While there have been subsequent opinions applying *Renkemeyer* to determine whether taxpayers in passthrough entities are limited partners under section 1402(a)(13), we have not addressed whether a limited partner in a state law limited partnership must satisfy a functional analysis test to be entitled to the limited partner exception.[9] See, *e.g.*, *Castigliola v. Commissioner*, T.C. Memo. 2017-62, at *7-14 finding professional LLC members not limited partners for purposes of section 1402(a)(13)).

[9] In *Joseph v. Commissioner*, T.C. Memo. 2020-65, at *60 n.9, we declined to answer whether a de jure limited partner must satisfy *Renkemeyer*'s functional analysis test to be entitled to the limited partner exclusion.

The court reasoned in its section, "Whether Soroban's Partners are Limited Partners for Purposes of Section 1402(a)(13)" (highlighting is mine):

Section 1402(a)(13) excludes from net earnings from self-employment "the distributive share of any item of income or loss of *a limited partner, as such*." (Emphasis added.) Neither section 1402(a)(13) nor applicable regulations define the phrase "limited partner, as such." Therefore, we use principles of statutory construction to ascertain Congress's intent.

For statutory interpretation, we begin with the text of the statute. See *Ross v. Blake*, 578 U.S. 632, 638 (2016). It is a well-established rule of construction that if a statute does not define a term, the term is to be given its ordinary meaning at the time of enactment. *Perrin v. United States*, 444 U.S. 37, 42 (1979); *Gates v. Commissioner*, 135 T.C. 1, 6 (2010). And the canon against surplusage helps us determine that meaning.

Under the canon against surplusage, we give effect to every clause and word of a statute. *United States v. Menasche*, 348 U.S. 528, 538-39 (1955). "When construing a statute, the Court must interpret it `so as to avoid rendering any part of the statute meaningless surplusage.'" *Growmark, Inc. & Subs. v. Commissioner*, No. 23797-14, 160 T.C., slip op. at 11 (May 16, 2023) (citing *15 W. 17th St. LLC v. Commissioner*, 147 T.C. 557, 586 (2016)); see also *Tucker v. Commissioner*, 135 T.C. 114, 154 (2010) ("[W]e decline to read words out of the statute; rather, we attempt to give meaning to every word that Congress enacted...."), *aff'd*, 676 F.3d 1129 (D.C. Cir. 2012).

Turning to the statute in question, we find that the limited partner exception does not apply to a partner who is limited in name only. If Congress had intended that limited partners be automatically excluded, it could have simply said "limited partner." By adding "as such," Congress made clear that the limited partner exception applies only to a limited partner who is functioning as a limited partner.

Petitioner's reliance on legislative history to overcome the plain meaning of the statute is unavailing. To the extent legislative history might be used to shed light on the meaning of the phrase "limited partner, as such," it confirms our conclusion. Congress enacted section 1402(a)(13) to exclude earnings from a mere investment. It intended for the phrase "limited partners, as such" used in section 1402(a)(13) to refer to passive investors.

Petitioner points to H.R. Rep. No. 95-702, pt. 1, at 11, as reprinted in 1977 U.S.C.C.A.N. at 4168, as support, noting that it states that section 1402(a)(13) was intended "to exclude for coverage purposes certain earnings which are basically of an investment nature." But Congress's express text makes clear that it was looking to the nature of the earnings. Congress intended section 1402(a)(13) to apply to partners that are passive investors.

Next petitioner cites the Sense of the Senate Resolution for support. Through that resolution, the Senate expressed its view that Treasury's attempt to define limited partner exceeded its authority. But Treasury's proposed regulation had several criteria that might have led to a limited partner's earnings' being subject to self-employment tax, even if the person was a passive investor. One such example is merely being personally liable for partnership debts. Prop. Treas. Reg. § 1.1402(a)-2(h)(2)(i), 62 Fed. Reg. at 1704. The Senate's concern was "that an individual meeting any one of these three criteria will be treated as a general partner." H.R. 2014, 105th Cong., 143 Cong. Rec.

S6694, S6774, S6819. The Senate's concern about the criteria set forth in Treasury's proposed regulation does not override the plain text of the statute.

Lastly, petitioner relies on a Joint Committee on Taxation report that states: "A special rule applies for limited partners of a partnership." Staff of J. Comm. on Tax'n, 110th Cong., Present Law and Analysis Relating to Tax Treatment of Partnership Carried Interests and Related Issues, Part I, JCX-62-07, at 35. In a footnote from that sentence, that report explains that "limited partner status is determined under State law." *Id*. at 35 n.64. We find this unpersuasive. The report addresses only the meaning of the words "limited partner" and not the phrase "limited partner, as such." It is those latter words that narrow the scope of the limited partner exception, which the Joint Committee Report does not address. To the extent one might read the Joint Committee on Taxation Report more broadly, it does not constitute legislative history and carries no more weight than a law review article. *Gregory*, 149 T.C. at 55.

Petitioner puts forth myriad other arguments to support its definition of limited partner, but none is persuasive. Petitioner cites section 469 and compares its rules and regulations with section 1402(a)(13), but we do not find the sections analogous. Petitioner cites dicta out of context.10 Lastly, petitioner points to the 2016 Instructions for Form 1065 at 2 and 2017 Instructions for Form 1065 at 3 as support for its definition. The instructions state: "A limited partner is a partner in a partnership formed under a state limited partnership law, whose personal liability for partnership debts is limited to the amount of money or other property that the partner contributed or is required to contribute to the partnership." But this definition is provided as part of the "General Instructions" and "Definitions." This is not, and does not purport to be, a definition for purposes of self-employment tax. In discussion of self-employment tax, the instructions state: "Generally, a limited partner's share of partnership income (loss) isn't included in net earnings (loss) from self-employment." 2016 Instructions for Form 1065 at 34; 2017 Instructions for Form 1065 at 36. Use of the qualifier "generally" makes clear that it is not always true that a limited partner's share of partnership income is excluded from net earnings from self-employment.

The phrase I highlighted above suggests that it may be impossible to avoid both SE tax and, by significantly participating, NII tax.[3461] But see soon below.

If a person is both a general partner and a limited partner, income attributable to that person's interest as a general partner is subject to SE tax, as described in the legislative history of the statute that excludes a limited partner's self-employment income:[3462]

[3461] See part II.I.8 Application of 3.8% Tax to Business Income, especially parts II.I.8.a.i Passive Activity Recharacterization Rules and II.I.8.c Application of 3.8% Tax to Rental Income.

[3462] House Report No. 95-702, Part 1 (to accompany H.R. 7346, which became PL 95-216), October 12, 1977, p. 40, which further explained its reasons on pp. 40-41:

> Your committee has become increasingly concerned about situations in which certain business organizations solicit investments in limited partnerships as a means for an investor to become insured for social security benefits. In these situations the investor in the limited partnership performs no services for the partnership and the social security coverage which results is, in fact, based on income from an investment. This situation is of course inconsistent with the basic principle of the social security program that benefits are designed to partially replace lost earnings from work.

Under present law each partner's share of partnership income is includable in his net earnings from self-employment for social security purposes, irrespective of the nature of his membership in the partnership. Under the bill the distributive share of income or loss received by a limited partner from the trade or business of a limited partnership would be excluded from social security coverage. However, the exclusion from coverage would not extend to guaranteed payments (as described in section 707(c) of the Internal Revenue Code), such as salary and professional fees, received for services actually performed by the limited partner for the partnership. Distributive shares received as a general partner would continue to be covered. Also, if a person is both a limited partner and a general partner in the same partnership, the distributive share received as a general partner would continue to be covered under present law.

To me, this legislative history clarifies what "limited partner, as such" means: It means that a person who is both a general partner and a limited partner excludes from SE income the income earned as a limited partner, as distinguished from the income earned as a general partner. *Soroban* should have granted summary judgement regarding the limited partners' exclusion from SE income. On the other hand, the structure described in parts II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and II.E.6 Recommended Partnership Structure – Flowchart can avoid NII tax,[3463] as described in part II.E.5.d Net Investment Income Tax and Passive Loss Rules Under Recommended Structure.

Assigning one's income as an independent contractor to a limited partnership does not avoid SE tax if the payor does not recognize the assignment.[3464]

These advertisements and solicitations are directed mainly toward public employees whose employment is covered by public retirement systems and not by social security. Also, these advertisements frequently emphasize the point that those who invest an amount sufficient to realize an annual net income of $400 or more (the minimum amount needed to receive social security credit in a year) will eventually gain a high return on their social security contributions. Many of those who invest in limited partnerships will qualify for minimum benefits, which are heavily weighted for the purpose of giving added protection for people who have worked under social security for many years with low earnings. The cost of paying these heavily weighted benefits to limited partners must, of course, be borne by all persons covered by the social security program. The advertising injures the social security program in the public view and causes resentment on the part of the vast majority of workers whose employment is compulsorily covered under social security, as well as those people without work income who would like to be able to become insured under the social security program but cannot afford to invest in limited partnerships.

[3463] See part II.I 3.8% Tax on Excess Net Investment Income (NII).

[3464] *Peterson v. Commissioner*, 827 F.3d 968 (11th Cir. 5/24/2016), affirming T.C. Memo. 2013-271. For as similar holding regarding an S corporation, see part II.G.24 Taxing Entity or Individual Performing Services, especially fn. 1894. Similarly, a person who controlled a partnership and was paid directly for services lost his argument that the payments really were for a distributive share of a limited partnership and therefore were excluded under Code § 1402(a)(13), because he actually did not own an interest in the partnership. *Plotkin v. Commissioner*, T.C. Memo. 2011-260. When the taxpayer established an entity as a mere shell, *Robucci v. Commissioner*, T.C. Memo. 2011-19, disregarded the entity, and in fn. 11 declined to address the IRS' other argument:

Although it is apparently respondent's position that profit distributions to service-providing members of a multimember, professional service LLC (which is what Robucci LLC was designed to be) are never excepted from net earnings from self-employment by sec. 1402(a)(13), which so excepts distributions to a limited partner other than sec. 707(c) guaranteed payments for services

Although originally a limited partner lost liability protection by participating in the partnership's activities, that has not been the case for quite some time.[3465] In the passive loss area, being a general partner has a different effect – it converts an interest as a limited partner into an interest as a general partner when determining material participation.[3466]

> rendered, the Secretary has yet to issue definitive guidance with respect to that issue, and the law remains in a state of uncertainty. See, *e.g.*, Kalinka, 9A La. Civ. L. Treatise, Limited Liability Companies and Partnerships: A Guide to Business and Tax Planning, sec. 6.2, at 423 (3d ed. 2001); Chase, Self-Employment Tax and Choice of Entity, 34 Colo. Law. 109, 112 (Dec. 2005).

[3465] Footnotes to Bishop & Kleinberger, ¶ 11.03[1][c][ii] Distinguishing limited partnership cases, *Limited Liability Companies: Tax and Business Law* (WG&L) (viewed 9/3/2016), comment:

> The 1976 version of the RULPA provided that a limited partner risked personal liability if the partner takes part in the control of the business. See, *e.g.*, *Mursor Builders, Inc. v. Crown Mountain Apartment Assocs.*, 467 F. Supp. 1316, 1331–1332 (DC Virgin Islands 1978) (limited partners liable only for debts of the partnership incurred prior to filing certificate of limited partnership); *Antonic Rigging & Erecting of Mo., Inc. v. Foundry E. Ltd. Partnership*, 773 F.Supp. 420, 430 (SD Ga. 1991) (court held that limited partner was not liable to contractor for partnership debts on the ground that limited partner participated in management). The 1985 amendments significantly changed this provision, lengthening substantially a list of safe harbors. The newest version of the Uniform Limited Partnership Act eliminates the control rule entirely. ULPA (2001), § 303.
>
> ….
>
> As for ULPA (2001), the most modern uniform limited partnership act, in § 303, eliminates the control rule entirely: A limited partner is not personally liable, directly or indirectly, by way of contribution or otherwise, for an obligation of the limited partnership solely by reason of being a limited partner, even if the limited partner participates in the management and control of the limited partnership.

A prior version of Willis & Postlewaite, *Partnership Taxation*, ¶2.02. Requirements of Section 704(e), stated:

> As originally written, the Uniform Limited Partnership Act provided that [a] limited partner shall not become liable as a general partner unless…he takes part in the control of the business. ULPA, § 7 (1916). The versions of the Revised Uniform Limited Partnership Act approved in 1976 and 1985 relaxed the control requirement by providing a safe harbor in the form of a lengthy list of activities deemed not to constitute participation in the control of the partnership and a limitation on a limited partner's liability for participation in activities not within the safe harbor to only those persons who transacted business with the limited partnership reasonably believing, based upon the limited partner's conduct, that the limited partner is a general partner. RULPA, § 303 (1985). Section 303 of the Uniform Limited Partnership Act approved in 2001 has eliminated the control requirement and provides that:
>
> > A limited partner is not personally liable, directly or indirectly, by way of contribution or otherwise, for an obligation of the limited partnership solely by reason of being a limited partner, even if the limited partner participates in the management and control of the limited partnership.
>
> RULPA, § 303 (2001). According to the commentary accompanying the act, this provision is intended to provide a full, status-based liability shield for each limited partner even when the limited partner participates in the management and control of the limited partnership. The purpose is to bring limited partners into parity with the members of a limited liability company, partners in a limited liability partnership, and corporate shareholders. It is unclear how this change in state partnership law might affect the application of federal tax law in the context of family partnerships. Nevertheless, if the limited partners are to have no role in the management of the partnership, the partnership agreement should expressly provide that the limited partners have no management power.

[3466] See part II.K.1.a.ii Material Participation, especially fn. 3071.

A limited partnership[3467] may register as a limited liability limited partnership (LLLP) to limit its general partner's liability.[3468] However, rather than using an LLLP registration or perhaps to supplement the protection provided by LLLP registration,[3469] doing business through one or more LLC subsidiaries might simplify signature lines, with individuals signing as managers of each LLC rather than officers of the S corporation general partner[3470] signing on behalf of the partnership. For a comparison, see part II.E.8 Alternative Partnership Structure – LLLP Alone or LP with LLC Subsidiary.

It is uncertain how this exclusion for limited partners applies to limited liability entities, with more than one member, that are not state law limited partnerships.[3471] Reasoning that "partners who performed services for a partnership in their capacity as partners (*i.e.*, acting in the manner of self-employed persons)" were not intended to be "limited partners," *Renkemeyer, Campbell and Weaver, LLP v. Commissioner*, 136 T.C. 137 (2011), held that partners in a limited liability partnership (a general partnership that registers with the secretary of state to obtain limited liability for all partners) were subject to self-employment tax.[3472] The court pointed out that substantially:

[3467] See part II.C.12 Limited Partnership.

[3468] See part II.C.13 Limited Liability Partnership Registration.

[3469] In Missouri, failure to timely renew LLLP status creates a lapse in the general partner's protection, which lapse cannot be cured, in contrast to the many other states that allow retroactive reinstatement.

[3470] See part II.L.5 Self-Employment Tax: Partnership with S Corporation Blocker.

[3471] See RIA's *Fed. Tax Coord.2d* ¶A-6158. Letter Ruling 9432018 held that a member's interest generally is subject to self-employment tax. Note that the fact of limited liability is not sufficient to treat a member's interest as a limited partner interest for purposes of the Code § 469 passive loss rules. See fn 3057. Courts have ruled against the IRS when it argued that an LLC member was a limited partner for purposes of the passive loss rules (see fn. 3069); query whether they would treat an LLC member as a limited partner for SE tax purposes, especially when they have ruled that exceptions from SE tax are to be narrowly construed (see *Morehouse* and *Johnson* cases cited in fn 3421).

[3472] The court cited the following legislative history:

> Under present law each partner's share of partnership income is includable in his net earnings from self-employment for social security purposes, irrespective of the nature of his membership in the partnership. The bill would exclude from social security coverage, the distributive share of income or loss received by a limited partner from the trade or business of a limited partnership. This is to exclude for coverage purposes certain earnings which are basically of an investment nature . However, the exclusion from coverage would not extend to guaranteed payments (as described in 707(c) of the Internal Revenue Code), such as salary and professional fees, received for services actually performed by the limited partner for the partnership.

It then stated:

> The insight provided reveals that the intent of section 1402(a)(13) was to ensure that individuals who merely invested in a partnership and who were not actively participating in the partnership's business operations (which was the archetype of limited partners at the time) would not receive credits toward Social Security coverage. The legislative history of section 1402(a)(13) does not support a holding that Congress contemplated excluding partners who performed services for a partnership in their capacity as partners (i.e., acting in the manner of self-employed persons), from liability for self-employment taxes.

These comments were made in the context of a partner who argued that limited liability made him the equivalent of a limited partner; the court was not addressing the status of a limited partner in a limited partnership. For an in-depth discussion, see Banoff, *Renkemeyer* Compounds the Confusion in Characterizing Limited and General Partners—Part 2, *Journal of Taxation*, June 2012. Part 1 was in the December 2011 issue of the Journal. See also Banoff and Lipton, "Does *Renkemeyer*'s Legacy of Confusion Live On?" *Journal of Taxation* (February 2013). In their Shop Talk column, Who's a 'Limited

> all of the law firm's revenues were derived from legal services performed by [the partners] in their capacities as partners. [The partners] each contributed a nominal amount ($110) for their respective partnership units. Thus it is clear that the partners' distributive shares of the law firm's income did not arise as a return on the partners' investment and were not 'earnings which are basically of an investment nature.' Instead, the attorney partners' distributive shares arose from legal services they performed on behalf of the law firm.

Similarly, CCA 201436049 refused to apply the limited partner exception to an LLC, reasoning:[3473]

> Like the situation in *Renkemeyer*, Partners' earnings are not in the nature of a return on a capital investment, even though Partners paid more than a nominal amount for their Units. Rather, the earnings of each Partner from Management Company are a direct result of the services rendered on behalf of Management Company by its Partners. Similar to *Reither [*sic – *Riether]*, Management Company cannot change the character of its Partners' distributive shares by paying portions of each Partners' distributive share as amounts mislabeled as so-called "wages." Management Company is not a corporation and the "reasonable compensation" rules applicable to corporations do not apply.

However, CCA 201640014 treated an inactive member of an LLC as a limited partner, presumably consistent with the IRS' informal administrative practice of following subsections (g) through (i) of Prop. Reg. § 1.1402(a)-2:

> Franchisee owns the majority of Partnership (D percent). During the years at issue, the remaining interests in Partnership were owned by Franchisee's wife (E percent) and her irrevocable trust (F percent). Partnership's operating agreement provides for only one class of unit of ownership. Neither Franchisee's wife nor her trust are involved with

---

Partner'? More Confusion Courtesy of *Renkemeyer* and *Howell*, *Journal of Taxation* (April 2013), Banoff and Lipton discussed comments, by Ronald M. Weiner, that in *Howell* (fn. 3457) the IRS merely attacked the taxpayer's characterization of guaranteed payments as not being self-employment income. They suggested that the IRS missed the boat in failing to attack as self-employment income the taxpayer's distributive share of partnership income. *Renkemeyer* involved an LLP, whereas *Howell* involved an LLC. The authors pointed out that, in *Renkemeyer*, the partners were general partners as a matter of state law, even though they had limited liability, so the *Renkemeyer* court's analysis was much more complicated than it needed to be.

[3473] *Riether* in the quote below is cited in fn. 551, found in part III.B.7.c.viii Creative Bonus Arrangements. In that case, a married couple jointly owned an LLC that operated a business. They paid themselves salary on Forms W-2 and said that the remaining income came from their employees' work, which made that income akin to being a limited partner because they did not participate in the work. The court pointed out that Rev. Rul. 69-184 required them to report compensatory payments as guaranteed payments subject to SE tax instead of on Forms W-2, said that their incorrect reporting on Forms W-2 did not somehow excuse the failure to report their distributive share of the LLC's income as SE income given that they had not proven themselves to be limited partners, and imposed an accuracy-related penalty (the latter because they had not shown that they had relied on their income tax return preparer's advice in reporting the income as not subject to SE tax.

For using a tiered partnership structure to enable a partner's salary-type compensation to be reported on Form W-2, see text accompanying and flowchart following fn 556 in part II.C.8.a Code § 707 - Compensating a Partner for Services Performed.

CCA 201436049 might very well be the same case the IRS won that is discussed further below, *Castigliola v. Commissioner*, T.C Memo. 2017-62.

> Partnership 's business operations and their status as limited partners for purposes of § 1402(a)(13) is not in dispute.

On the other hand, the CCA subjected to SE tax the entire distributive share of the majority owner of the LLC, who was active in the business, rejecting his argument that the portion of his distributive share that was not attributable to his work should be excluded from SE income:[3474]

> As discussed above, the *Renkemeyer* Court reviewed the legislative history and concluded that § 1402(a)(13) was intended to apply to those who "merely invested" rather than those who "actively participated" and "performed services for a partnership in their capacity as partners (i.e., acting in the manner of self-employed persons)." *Renkemeyer*, 136 TC at 150 Although the *Renkemeyer* Court noted the partners' small capital contributions and service-generated income as factors influencing its decision that the partners in that case were not limited partners, *Renkemeyer* does not stand for the proposition that a capital-intensive partnership should be treated like a corporation for employment tax purposes. Instead, as the Tax Court has repeatedly held, partners who are not limited partners are subject to self-employment tax, even in cases involving capital-intensive oil and gas joint ventures where all of the work was performed by other parties. See *Cokes*, *Methvin*, and *Perry*. Under the *Renkemeyer* Court's interpretation

[3474] Preceding this conclusion, the CCA said (emphasis added):

> Partnership concedes that under the legislative history quoted above and the *Renkemeyer* opinion, service partners in a service partnership acting in the manner of self-employed persons are not limited partners. However, Partnership argues that a different analysis should apply to limited liability members which: (1) derive their income from the sale of products, (2) have made substantial capital investments, and (3) have delegated significant management responsibilities to executive-level employees. Partnership asserts that in these cases the IRS should apply substance over form principles to exclude from self-employment tax a reasonable return on capital invested.
>
> Partnership interprets the legislative history quoted above to mean that § 1402(a)(13) applies to exclude a partner's reasonable return on capital-investment in a capital-intensive LLC partnership, regardless of the extent of the partner's involvement with the partnership's business. In effect, Partnership interprets the sentence from the legislative history This is to exclude for coverage purposes certain earnings which are basically of an investment nature as instead meaning This is to exclude for coverage purposes all earnings which constitute a reasonable return on capital invested in a capital-intensive business. Essentially, Partnership argues that the self-employment tax rules for capital intensive businesses carried on by LLC partnerships are identical to the employment tax rules for corporate shareholder employees: only reasonable compensation is subject to employment tax. Under this analysis, Partnership argues that (1) Partnership's guaranteed payments to Franchisee are reasonable compensation for Franchisee's services, and (2) Franchisee's distributive share represents a reasonable return on capital investments in Partnership's business, and therefore Franchisee is not subject to self-employment tax on his distributive share. Partnership argues that it would be inconsistent with the IRS's position in the Brinks case for the IRS to assert that Franchisee is subject to self-employment tax on his distributive share from Partnership.
>
> Partnership's arguments inappropriately conflate the separate statutory self-employment tax rules for partners and the statutory employment tax rules for corporate shareholder employees. ***Section 1402(a)(13) provides an exclusion for limited partners, not for a reasonable return on capital***, and does not indicate that a partner's status as a limited partner depends on the presence of a guaranteed payment or the capital-intensive nature of the partnership's business. Following the Court's analysis in *Riether*, Partnership cannot change the character of Franchisee's distributive shares by paying Franchisee guaranteed payments. Partnership is not a corporation and the wage and reasonable compensation rules which are applicable to corporations and were at issue in the Brinks case do not apply.

> of the legislative history, and consistent with the Court's holding in *Riether*, Franchisee is not a limited partner in Partnership within the meaning of § 1402(a)(13) and is subject to self-employment tax on his full distributive shares of Partnership's income described in § 702(a)(8).

Hardy v. Commissioner, T.C. Memo. 2017-16, treated as a limited partner eligible for the exclusion from SE tax a doctor who owned a 12.5% interest in an LLC, owned together with seven other doctors, that operated a professionally managed[3475] surgery center:[3476]

> Dr. Hardy has never managed MBJ, and he has no day-to-day responsibilities there. Although he meets with the other members quarterly, he does not have any input into management decisions. He generally is not involved in hiring or firing decisions. His role and participation in MBJ have not changed since he became a member.

Contrasting Dr. Hardy's work with the lawyers practicing law in *Renkemeyer*[3477] and receiving distributive shares based on those fees from practicing law, the court pointed out:

> Dr. Hardy is receiving a distribution based on the fees that patients pay to use the facility. The patients separately pay Dr. Hardy his fees as a surgeon, and they separately pay the surgical center for use of the facility in the same manner as with a hospital. Accordingly, Dr. Hardy's distributive shares are not subject to self-employment tax because he received the income in his capacity as an investor.

This last comment, about viewing Dr. Hardy as an investor, ties into other aspects of the case. Dr. Hardy claimed that the income from the surgery center was passive, so that he could deduct passive losses against it.[3478] To avoid recharacterizing the income as nonpassive, he had to prove that he spent no more than 100 hours per year on it.[3479] The Tax Court seemed to view his quarterly meetings with other members as investor time, rather than time spent as a working owner.[3480]

When I read the case, I had expected to see this set up as a manager-managed LLC, with the non-owner CEO being the manager under the operating agreement. I was very surprised to see the most recent annual report (viewed 3/1/2017), which said that each owner is a member-manager. Other documents from the secretary of state indicate that three doctors (not Dr. Hardy) were the initial managers in 2004; the annual reports for the years involved in the case, 2008-2010 do not clarify whether Dr. Hardy was a member or a member-manager, but they also

---

[3475] The court pointed out:

> MBJ hires its own employees and does not share any employees with Northwest Plastic Surgery. Like hospitals, MBJ directly bills patients for facility fees. MBJ then distributes to each of its members his or her share of the earnings based on the facility fees less expenses. MBJ uses a third-party accounting firm to prepare the Schedules K-1, Partner's Share of Income, Deductions, Credits, etc., for the members. MBJ does not pay physicians for their procedures.

[3476] The IRS' post-trial brief pointed out that the members approved an employee termination at the CEO's request, but the transcript indicated that was an unusual situation and that the CEO usually took care of employment issues without consulting the members as an ownership group.

[3477] See the extensive quotes from *Renkemeyer* in fn. 3472, found in this part II.L.4.

[3478] The IRS tried to require Dr. Hardy to group his activity in his medical practice with his activity in the surgery center, but the Tax Court held that his decision not to group the two activities was reasonable. See part II.K.1.b Grouping Activities, especially fns. 3134 and 3156.

[3479] See part II.K.1.i Recharacterization of Passive Income Generators (PIGs) as Nonpassive Income.

[3480] See part II.K.1.a.v What Does Not Count as Participation.

do not list as a manager a person other than the members. Taken as a whole, the court's opinion and related documentation suggest that, in this LLC, the members together had exclusive legal authority to run the business. No member had more rights to run the business than any other. Their legal rights were not akin to the legal rights of a limited partner. Collectively, their legal rights were equal and were those of general partners.

Clearly, they delegated daily management to a non-owner and chose to oversee the business as mere investors, but that does not change the fact that the owners collectively had plenary legal rights to run the business on a daily basis. This looks to me like a general partnership in which the general partners agreed not to run the business themselves but rather agreed to hire staff to run the business. They are simply passive general partners. (Having limited liability does not cause one to be a limited partner, according to *Renkemeyer*,[3481] so the LLC's liability protection is of no consequence.) Neither the trial transcript nor the judge's opinion demonstrates any awareness of what Dr. Hardy's rights really were; they simply looked to his lack of activity. This approach appears to contradict *Methvin v. Commissioner*, T.C. Memo. 2015-81, involving an unincorporated venture in which the taxpayer had no management rights but nevertheless was subjected to self-employment tax.[3482]

Castigliola v. Commissioner, T.C Memo. 2017-62, held that three lawyers who were the only members in a law firm organized as a member-managed LLC were subject to SE tax on not only their guaranteed payments, which were comparable to salaries at other law firms, but also on their distributive share of the LLC's income. As was the case in *Hardy*, each member had an equal right to manage the LLC, and no member had a controlling interest. Unlike *Hardy* (where the members were passive investors), working for the LLC constituted the members' full-time jobs. Also unlike *Hardy*, the judge rigorously analyzed Code § 1402(a)(13) to determine what it means to be a limited partner.

Following *Renkemeyer*,[3483] *Castigliola* noted that "no statutory or regulatory authority defines 'limited partner' for the purposes of section 1402(a)(13)," and therefore "the term is to be given its ordinary meaning at the time of enactment."[3484] Because "*Renkemeyer* indicated that the meaning of 'limited partner' is not necessarily confined solely to the limited partnership context," the court first looked to "whether the person claiming the section 1402(a)(13) exemption held a position in an entity treated as a partnership for Federal tax purposes that is functionally equivalent to that of a limited partner in a limited partnership," asking whether a member of the LLC (a "professional limited liability company" or "PLLC") "is functionally equivalent to a limited partner in a limited partnership." The court pointed out:

> A limited partnership has two classes of partners, general and limited. *E.g.*, *Garnett v. Commissioner*, 132 T.C. at 375. General partners typically have management power and unlimited personal liability. 1 Bromberg & Ribstein, *Partnership*, sec. 1.01(B)(3) (2015-3 Supp.). On the other hand, limited partners typically lack management power but enjoy immunity from liability for debts of the partnership. *Id.*

[3481] See the extensive quotes from *Renkemeyer* in fn. 3472, found in this part II.L.4.
[3482] See fn. 3451, found in part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax.
[3483] See the extensive quotes from *Renkemeyer* in fn. 3472, found in this part II.L.4.
[3484] Citing *Gates v. Commissioner*, 135 T.C. 1, 6 (2010), and *Perrin v. United States*, 444 U.S. 37, 42 (1979).

The court noted limited partnership law when Code 1402(a)(13) was enacted in 1977 and how it has evolved since then.[3485] Applying that summary to the case at hand:

> Common to each of the definitions of "limited partner" discussed above are the primary characteristics of limited liability and lack of control of the business. In this case, the respective interests in the PLLC held by Mr. Castigliola, Mr. Banahan, and Mr. Mullen made each a member of the PLLC, which was member-managed.[9] Therefore management power over the business of the PLLC was vested in each of them through the interest each held. *See id.* sec. 79-29-302 (effective after July 1, 1994). The PLLC had no written operating agreement, nor is there any evidence to show that any member's management power was limited in any way. Furthermore, all members participated in control of the PLLC: For example, they all participated in collectively making decisions regarding their distributive shares, borrowing money, hiring, firing, and rate of pay for employees. They each supervised associate attorneys and signed checks for the PLLC. On the basis of the foregoing facts, the respective interests held by Mr. Castigliola, Mr. Banahan, and Mr. Mullen could not have been limited partnership interests under any of the limited partnership acts. Therefore, they were not limited partners under section 1402(a)(13).
>
> [9] There is no evidence to suggest that any member held a different type of interest in the PLLC or held more than one type of interest in the PLLC.

[3485] The court stated:

> More specifically, the exact meaning of "limited partner" may vary slightly from State to State. The Uniform Law Commission drafted the Uniform Limited Partnership Act in 1916 (ULPA (1916)), and the Revised Uniform Limited Partnership Act in 1976 (RULPA (1976)). Amendments were added to RULPA (1976) in 1985 (RULPA (1985)). Versions of these uniform acts have been adopted in most States, sometimes with modifications.
>
> Section 7 of ULPA (1916) states: "A limited partner shall not become liable as a general partner unless, in addition to the exercise of his rights and powers as a limited partner, he takes part in the control of the business." ULPA (1916) allowed limited partners a narrow set of rights but did not specifically define which activities a limited partner could perform without losing limited partner status. See *id.* sec. 10 (allowing limited partners the rights to inspect books, demand an accounting of partnership affairs, and receive a share of the profits and return of capital, and also allowing limited partners the same right as general partners to request dissolution and winding up of the partnership).
>
> Section 303(a) of RULPA (1976) provides—in terms almost identical to those of ULPA (1916)—that a "limited partner" would lose limited liability protection if "in addition to the exercise of his rights and powers as a limited partner, he takes part in the control of the business." With regard to the meaning of "limited partner", the essential difference between ULPA (1916) and RULPA (1976) is that RULPA (1976) enumerates certain activities that a limited partner may perform without taking part in control of the business; for example, section 303(b)(5)(i) and (ii) of RULPA (1976) explicitly permits limited partners to vote on the dissolution of the partnership or the sale of substantially all of the partnership's assets.
>
> In 1987 Mississippi adopted RULPA (1985) with some modifications. See 1987 Miss. Laws, ch. 488, sec. 303 (effective from Jan. 1, 1988); Miss. Code Ann. sec. 79-14-303 (2009). In terms almost identical to those of ULPA (1916) and RULPA (1976), the version of the limited partnership act that Mississippi adopted in 1987—and which was effective throughout the years at issue—provided that a "limited partner" would lose limited liability protection if "in addition to the exercise of his rights and powers as a limited partner, he participates in the control of the business." Miss. Code Ann. sec. 79-14-303. Like RULPA (1976), Mississippi's version provides safe harbors for various activities a limited partner may perform without losing limited liability protection. *Id.*

The court recognized that "a limited partnership must have at least one general partner"[3486] and, in reinforcing its conclusion that the members were not limited partners, reasoned:

> This is logical, because limited partners, as discussed above, cannot participate in control of the business and maintain their limited liability. Because there must be at least one partner who is in control of the business, there must be at least one general partner. The members testified that all members participated equally in all decisions and had substantially identical relationships with the PLLC. There was no PLLC operating agreement or other evidence to suggest otherwise. But since by necessity at least one of the members must have occupied a role analogous to that of a general partner in a limited partnership, and because all of the members had the same rights and responsibilities, they must all have had positions analogous to those of general partners in a limited partnership. This conclusion is affirmed by the history of the PLLC: Before the members organized the PLLC, they operated as a general partnership; and there is no evidence that organizing as a PLLC was accompanied by any change in the way they managed the business.

Thus, the court would not accept a headless entity,[3487] whereas *Hardy* implicitly accepted that idea because the members were mere investors who delegated daily running of the business to a skilled managerial employee. *Hardy* did not analyze either what it means to be a limited partner or what were the members' rights to run the LLC; it focused only on the fact that they did not run the LLC on a daily basis.

Before claiming limited partner status, the taxpayer needs to prove the type of entity involved and the taxpayer's ownership rights.[3488]

Moving on to other authority in this area: In light of the ascendancy of LLCs, subsections (g) through (i) of Prop. Reg. § 1.1402(a)-2 would define a limited partner, if ever finalized:

> **(g) Distributive share of limited partner.** An individual's net earnings from self-employment do not include the individual's distributive share of income or loss as a limited partner described in paragraph (h) of this section. However, guaranteed payments described in section 707(c) made to the individual for services actually rendered to or on behalf of the partnership engaged in a trade or business are included in the individual's net earnings from self-employment.

[3486] Citing:

> *See*, *e.g.*, Miss. Code Ann. sec. 79-14-801 (2009) ("A limited partnership is dissolved and its affairs must be wound up upon the first of the following to occur: * * * (4) An event of withdrawal of a general partner unless at the time there is at least one other general partner[.]").

[3487] *Riether*, discussed in fn. 3473, implicitly made a similar assumption when it held that a married couple that jointly owned an LLC could not claim the limited partner exclusion without proving that status.

[3488] *Joseph v. Commissioner*, T.C. Memo. 2020-65, rejected the taxpayer's claim of qualifying:

> Contrary to petitioner's assertion, we find no evidence in the record concerning GASP's nontax legal status or the nature of petitioner's interest in the entity. Petitioner made no proposed findings of fact on those points. (Indeed, contrary to the mandate of Rule 151(e)(3), his opening brief made no proposed findings of fact at all.) The parties stipulated that GASP "was a partnership for federal income tax purposes during the tax years at issue" and that petitioner "personally owned a 99% interest in GASP" during those years. But we find nothing in the stipulation of facts that identifies GASP's status under State law or the specific nature of petitioner's interest in the entity (other than its proportion in relation to other interests).

(h) Definition of limited partner.

(1) In general. Solely for purposes of section 1402(a)(13) and paragraph (g) of this section, an individual is considered to be a limited partner to the extent provided in paragraphs (h)(2), (h)(3), (h)(4), and (h)(5) of this section.

(2) Limited partner. An individual is treated as a limited partner under this paragraph (h)(2) unless the individual—

(i) Has personal liability (as defined in § 301.7701-3(b)(2)(ii) of this chapter) for the debts of or claims against the partnership by reason of being a partner;[3489]

(ii) Has authority (under the law of the jurisdiction in which the partnership is formed) to contract on behalf of the partnership;[3490] or

(iii) Participates in the partnership's trade or business for more than 500 hours during the partnership's taxable year.

(3) Exception for holders of more than one class of interest. An individual holding more than one class of *interest* in the partnership who is not treated as a limited partner under paragraph (h)(2) of this section is treated as a limited partner under this paragraph (h)(3) with respect to a specific class of partnership interest held by such individual if, immediately after the individual acquires that class of interest—

(i) Limited partners within the meaning of paragraph (h)(2) of this section own a substantial, continuing interest in that specific class of partnership interest; and,

(ii) The individual's rights and obligations with respect to that specific class of interest are identical to the rights and obligations of that specific class of partnership interest held by the limited partners described in paragraph (h)(3)(i) of this section.

(4) Exception for holders of only one class of interest. An individual who is not treated as a limited partner under paragraph (h)(2) of this section solely because that individual participates in the partnership's trade or business for more than 500 hours during the partnership's taxable year is treated as a limited partner under this paragraph (h)(4) with respect to the individual's partnership interest if, immediately after the individual acquires that interest—

(i) Limited partners within the meaning of paragraph (h)(2) of this section own a substantial, continuing interest in that specific class of partnership interest; and

(ii) The individual's rights and obligations with respect to the specific class of interest are identical to the rights and obligations of the specific class of partnership interest held by the limited partners described in paragraph (h)(4)(i) of this section.

[3489] Does this mean personal liability as an inherent state law attribute of being an owner, or personal liability because lenders require all owners to guarantee loans?
[3490] Does this mean a manager-managed LLC and the limited partner is not a manager, or member-managed with voting and nonvoting interests?

(5) Exception for service partners in service partnerships. An individual who is a service partner in a service partnership may not be a limited partner under paragraphs (h)(2), (h)(3), or (h)(4) of this section.

(6) Additional definitions. Solely for purposes of this paragraph (h)—

(i) A *class of interest* is an interest that grants the holder specific rights and obligations. If a holder's rights and obligations from an interest are different from another holder's rights and obligations, each holder's interest belongs to a separate class of interest. An individual may hold more than one class of interest in the same partnership provided that each class grants the individual different rights or obligations. The existence of a guaranteed payment described in section 707(c) made to an individual for services rendered to or on behalf of a partnership, however, is not a factor in determining the rights and obligations of a class of interest.

(ii) A *service partner* is a partner who provides services to or on behalf of the service partnership's trade or business. A partner is not considered to be a service partner if that partner only provides a de minimis amount of services to or on behalf of the partnership.

(iii) A *service partnership* is a partnership substantially all the activities of which involve the performance of services in the fields of health, law, engineering, architecture, accounting, actuarial science, or consulting.

(iv) A *substantial interest in a class of interest* is determined based on all of the relevant facts and circumstances. In all cases, however, ownership of 20 percent or more of a specific class of interest is considered substantial.

(i) Example. The following example illustrates the principles of paragraphs (g) and (h) of this section:

Example. (i) A, B, and C form LLC, a limited liability company, under the laws of State to engage in a business that is not a service partnership described in paragraph (h)(6)(iii) of this section. LLC, classified as a partnership for federal tax purposes, allocates all items of income, deduction, and credit of LLC to A, B, and C in proportion to their ownership of LLC. A and C each contribute $1x for one LLC unit. B contributes $2x for two LLC units. Each LLC unit entitles its holder to receive 25 percent of LLC's tax items, including profits. A does not perform services for LLC; however, each year B receives a guaranteed payment of $6x for 600 hours of services rendered to LLC and C receives a guaranteed payment of $10x for 1000 hours of services rendered to LLC. C also is elected LLC's manager. Under State's law, C has the authority to contract on behalf of LLC.

(ii) *Application of general rule of paragraph (h)(2) of this section*. A is treated as a limited partner in LLC under paragraph (h)(2) of this section because A is not liable personally for debts of or claims against LLC, A does not have authority to contract for LLC under State's law, and A does not participate in LLC's trade or business for more than 500 hours during the taxable year. Therefore, A's distributive share attributable to A's LLC unit is excluded from A's net earnings from self-employment under section 1402(a)(13).

(iii) *Distributive share not included in net earnings from self-employment under paragraph (h)(4) of this section*. B's guaranteed payment of $6x is included in B's net earnings from self-employment under section 1402(a)(13). B is not treated as a limited partner under paragraph (h)(2) of this section because, although B is not liable for debts of or claims against LLC and B does not have authority to contract for LLC under State's law, B does participates in LLC's trade or business for more than 500 hours during the taxable year. Further, B is not treated as a limited partner under paragraph (h)(3) of this section because B does not hold more than one class of interest in LLC. However, B is treated as a limited partner under paragraph (h)(4) of this section because B is not treated as a limited partner under paragraph (h)(2) of this section solely because B participated in LLC's business for more than 500 hours and because A is a limited partner under paragraph (h)(2) of this section who owns a substantial interest with rights and obligations that are identical to B's rights and obligations. In this example, B's distributive share is deemed to be a return on B's investment in LLC and not remuneration for B's service to LLC. Thus, B's distributive share attributable to B's two LLC units is not net earnings from self-employment under section 1402(a)(13).

(iv) *Distributive share included in net earnings from self-employment*. C's guaranteed payment of $10x is included in C's net earnings from self-employment under section 1402(a). In addition, C's distributive share attributable to C's LLC unit also is net earnings from self-employment under section 1402(a) because C is not a limited partner under paragraphs (h)(2), (h)(3), or (h)(4) of this section. C is not treated as a limited partner under paragraph (h)(2) of this section because C has the authority under State's law to enter into a binding contract on behalf of LLC and because C participates in LLC's trade or business for more than 500 hours during the taxable year. Further, C is not treated as a limited partner under paragraph (h)(3) of this section because C does not hold more than one class of interest in LLC. Finally, C is not treated as a limited partner under paragraph (h)(4) of this section because C has the power to bind LLC. Thus, C's guaranteed payment and distributive share both are included in C's net earnings from self-employment under section 1402(a).

Because these regulations are merely proposed, however, taxpayers may either argue that they provide a reasonable position or ignore them as not yet being effective. In using them, consider the following:

- The material participation component of these proposed regulations generally would prevent a limited partner in a trade or business from reaching the sweet spot of avoiding both SE tax and the 3.8% tax on net investment income, unless one participates for more than 100 hours and no more than 500 hours.[3491]

- Suppose one wants to argue that one's interest in an LLC has a general partner and a limited partner component:

  - (h)(3)(ii) requires that the individual's rights and obligations with respect to that specific class of interest are identical to the rights and obligations of that specific class of partnership interest held by the limited partners described in (h)(3)(i).

[3491] See part II.I 3.8% Tax on Excess Net Investment Income, especially part II.I.8 Application of 3.8% Tax to Business Income, summarized at part II.I.8.f Summary of Business Activity Not Subject to 3.8% Tax.

- Limited partners described in (h)(3)(i) must hold an aggregate 20% and be described in (h)(2).

- To be described in (h)(2), a member cannot:

  - Have personal liability for the debts of or claims against the LLC by reason of being a member;

  - Have authority to contract on behalf of the LLC; or

  - Participate in the partnership's trade or business for more than 500 hours during the partnership's taxable year.

Considering that owners of operating businesses frequently make loan guarantees, making sure that 20% of the owners are never on loan guarantees, never have authority to represent the LLC in any manner, and are active in the business only within the 101-500 hour sweet spot[3492] is a tall order. And *Renkemeyer* includes very strong language against granting an exclusion from self-employment tax for an active owner in an entity that is not a limited partnership, and some are concerned that *Renkemeyer* might be extended one day to prevent limited partners in a limited partnership from excluding from SE income their distributive share as limited partners.[3493] Those who are extremely concerned about the latter might advise each partner to form his or her own S corporation to hold all of his or her interest in the business, which might simply be a straight LLC, as described in parts II.L.5 Self-Employment Tax: Partnership with S Corporation Blocker (idea that S corporations block SE income), II.L.5.c Examples of S Corporation Blockers (narrative description of alternatives), and II.L.5.e Flowchart: LLC with S Corporation as Blocker (diagram).

In many cases, using a traditional limited partnership to govern ownership, which partnership holds one or more LLC subsidiaries that are disregarded for tax purposes, would provide more long-term flexibility regarding the conduct of future business without falling out of the protection that the proposed regulations seem to provide. If a client finds a limited partnership cumbersome to operate on a daily basis, the limited partnership could do business through one or more wholly owned LLCs that are disregarded for income tax purposes.[3494]

Although administratively the IRS appears to be informally following this proposed regulation, CCA 201640014, particularly fn. 3474 and the accompanying text, makes clear that taxpayers need to use limited partnerships to maximize the possibility of refuting an IRS argument in this area. I prefer the structure described in parts II.E.5 Recommended Long-Term Structure for

[3492] See text accompanying fn. 3491 in this part II.L.4.
[3493] See highlighted language fn. 3472 in this part II.L.4. At least one tax expert whom I highly regard has expressed concern that *Renkemeyer* signals trouble for a limited partner in a state law limited partnership who is active. However, that expert concedes the language highlighted in fn. 3462 very strongly supports the exclusion for an active limited partner (but not the point that it eliminates his concern). Although I strongly disagree with that concern and feel quite confident in the structure described in part II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and illustrated in part II.E.6 Recommended Partnership Structure – Flowchart, I leave it up to the reader to consider this expert's views.
[3494] See part II.B Limited Liability Company (LLC), especially the comments accompanying fns. 330-344, discussing when a single-member LLC is or is not disregarded.

Pass-Throughs – Description and Reasons and II.E.6 Recommended Partnership Structure – Flowchart.

On the other hand, if the 3.8% net investment income (NII) tax is repealed and income from active businesses does not receive favorable tax treatment relative to passive businesses, investing in an LLC as a passive business owner, as in *Hardy*,[3495] may be a model that works. In that case, consider making sure that one's time spent qualifies as investor time, rather than time spent as a working owner.[3496] I would also recommend making the person who manages the LLC be the manager. However, I remain uneasy about *Hardy*, because *Methvin* involved facts that in most ways were more sympathetic to the taxpayer than *Hardy*, yet found the taxpayer subject to SE tax. Furthermore, if NII tax is not repealed and the owner is active enough to avoid NII tax, the owner might have moved away from being a mere investor and moved closer to *Renkemeyer* and *Castigliola*. So, I am not yet convinced that one should rely on *Hardy*, and I remain firmly in favor of using limited partnerships to save SE tax.

IRS LB&I Concept Unit, "Self-Employment Tax and Partners," last updated 2/13/2019,[3497] observed on page 11:

> S corporation shareholders are subject to "reasonable compensation" rules. In contrast, partnerships generally are not required to pay partners guaranteed payments. The concept of "reasonable compensation" does not exist for partnerships and partners in the same way that it does for S corporations and shareholders.

On page 19, the Concept Unit discussed Prop. Reg. § 1.1402(a)-2(h):

> The 1997 Proposed Regulations are not final. They may not be enforced on taxpayers. Instead, the applicable analysis is the statutory language, legislative history, and case law. Taxpayers, however, may rely on the 1997 proposed regulations. In other words, the IRS will respect a partner's status as a limited partner if the partner qualifies as a limited partner under the 1997 proposed regulations.

II.L.5. Self-Employment Tax: Partnership with S Corporation Blocker

II.L.5.a. S Corporation Blocker Generally

Because corporate income is not subject to self-employment (SE) tax, doing business through an S corporation avoids SE tax on the distributive share of income if and to the extent that distributions do not constitute disguised compensation payments.[3498] The corporation needs to

---

[3495] In this part II.L.4, the text surrounding fn. 3475 discusses *Hardy*.

[3496] See part II.K.1.a.v What Does Not Count as Participation.

[3497] Knowledge Base – Partnerships, Book 366, Document Control Number (DCN) PST/C/366_01_01-01, found at https://www.irs.gov/pub/irs-utl/pst_c_366_01_01_01.pdf.

[3498] For corporate income not being subject to SE tax, see part II.L.1 FICA: Corporation, especially fn. 3381, citing Rev. Rul. 59-221, which was cited with approval by *Ding v. Commissioner*, T.C. Memo. 1997-435, *aff'd* 200 F.3d 587 (9th Cir. 1999). In rejecting a taxpayer's attempt to offset S corporation losses against SE income, the Tax Court in *Ding* held:

> We find the absence of any reference to S corporation pass-through items in section 1402 to be significant, and not merely a consequence of timing. The statute has been amended 34 times since the enactment of the S corporation provisions. None of the amendments address pass-through items from S corporations. We note that respondent's position on the issue here under

contract with those with whom business is conducted; the owner cannot merely transfer to the corporation income the owner receives and characterize it as income that the S corporation owned.[3499] Before deciding to do business as an S corporation, please see part II.E Recommended Structure for Entities.

If an owner wants the income tax benefits of the partnership structure but needs to avoid FICA on the business' earnings from the efforts of others or from earnings on capital, the owner might consider forming an S corporation to hold the owner's interest in the partnership, resulting in the structure depicted in part II.L.5.d Straight-Up Limited Partnership or II.L.5.e Flowchart: LLC with S Corporation as Blocker. The corporation would treat the owner as an employee with respect to reasonable compensation for services rendered.[3500] Because S corporation earnings are not

---

consideration was published 38 years ago in Rev. Rul. 59-221, 1959-1 C.B. 225, which states, in part:

> it is apparent that income not resulting from the conduct of a trade or business by an individual or by a partnership of which he is a member is not includible in computing the individual's net earnings from self-employment. Amounts which must be taken into account in computing a shareholder's income tax by reason of the provisions of *** [a predecessor of section 1366] of the Code, are not derived from a trade or business carried on by such shareholder. Neither the election by a corporation as to the manner in which it will be taxed for Federal income tax purpose nor the consent thereto by the persons who are shareholders results in the consenting shareholder's being engaged in carrying on the corporation's trade or business. Accordingly, amounts which a shareholder is required to include in his gross income by reason of the provisions of *** [a predecessor of section 1366] of the Code should not be included in computing his net earnings from self-employment *** .

The revenue ruling concludes that S corporation pass-through items do not constitute net earnings from self-employment to the corporation's shareholder because such items are not derived from a trade or business carried on by the shareholder. We understand that we are not bound by the revenue ruling, *Stark v. Commissioner*, 86 T.C. 243, 250-251 (1986); however, the fact that the revenue ruling has remained in effect, unmodified, for 38 years provides a strong commentary on the validity of respondent's position. During the period the revenue ruling has been in effect, Congress has amended section 1402 approximately 30 times. If Congress had intended pass-through items from S corporations to be included in the definition of net earnings from self-employment, which would obviously be contrary to the conclusion of the revenue ruling, we expect that one of the many amendments made to the statute since its enactment would have so indicated. See generally *Helvering v. R.J. Reynolds Tobacco Co.*, 306 U.S. 110 (1939).

Furthermore, respondent's position that the pass-through items were not derived from a trade or business carried on by petitioner is supported by two firmly established principles of Federal income taxation, namely: (1) A corporation formed for legitimate business purposes and its shareholders are separate entities, *Moline Properties, Inc. v. Commissioner*, 319 U.S. 436 (1943); and (2) the business of a corporation is separate and distinct from the business of its shareholders, *id.*; *Deputy v. du Pont*, 308 U.S. 488, 494 (1940); *Crook v. Commissioner*, 80 T.C. 27, 33 (1983), *affd.* without published opinion 747 F.2d 1463 (5th Cir. 1984).

For distributions constituting compensation subject to FICA instead of merely a disbursement of a distributive share of income not subject to SE tax, see Rev. Rul. 74-44 and part II.A.2.c Avoiding Double Taxation and Self-Employment Tax, especially fns. 79-80 (the latter discussing sanctions against a CPA for preparing a return that resulted in penalties for failure to declare reasonable compensation).

[3499] See part II.G.24 Taxing Entity or Individual Performing Services.

[3500] Rev. Rul. 73-361 (shareholder officer compensation is subject to FICA, federal income tax withholding, and FUTA). See part II.A.2.c Avoiding Double Taxation and Self-Employment Tax, which cites cases where the IRS attacked as compensation subject to FICA (and often asserted penalties regarding) payments that taxpayers characterized as distributions to shareholder-employees.

subject to FICA,[3501] no self-employment tax would be imposed on the distributive share of partnership self-employment income when it passes to the S corporation owner.[3502]

Sometimes an employee who issued a profits interest[3503] wants to remain an employee and might ask for the profits interest to be issued to an S corporation blocker. However, the IRS may assert that distributions from the S corporation to the shareholder are compensation for services rendered (after all, the profits interest was issued as incentive compensation), causing the employer share of FICA to be paid by both the partnership and the S corporation.[3504] An employee who uses such an S corporation blocker should consider reinvesting distributions from the partnership until after retirement to try to attenuate the cash flows to the shareholder from the services that the shareholder provides. However, distributions from the partnership tend to be to pay tax on the distributive share of income, and the employee-shareholders needs the distributions to pay tax. Given that such an employee would tend to earn more than the taxable wage base from the partnership, this attempt to avoid SE tax and FICA often does so only with respect to earnings over the taxable wage base, at the cost of doubling up income subject to FICA below the taxable wage base.

If these are new corporations, be sure that each corporation exercises any ownership rights it has, complying with corporate formalities in acting as a member of the LLC; having a service contract with the LLC and paying compensation to its officers or other employees would also help.[3505]

[3501] The trade or business must be carried on by the individual, either personally or through agents or employees, or by a partnership. Reg. § 1.1402(a)(2)(b), (d). The S corporation's existence as a separate taxpayer is respected for SE tax purposes, and a shareholder's K-1 income does not constitute self-employment income. See fn. 3381. However, if the S corporation is not a state law corporation, see part II.L.5.b Self-Employment Tax Caution Regarding Unincorporated Business That Makes S Election.

[3502] The effectiveness of such a blocker, when the K-1 earnings from the partnership were ultimately paid to each owner, was litigated in *Watson, P.C, v. U.S.,* 105 AFTR.2d 2010-2624 (denying the taxpayer's motion for summary judgment) and 107 AFTR.2d 2011-311 (S.D. Iowa) (finding in favor of the IRS), *aff'd* 109 AFTR.2d 2012-1059 (8th Cir.), cert. den. 10/1/2012. In 2002, the sole owner of the S corporation partner received $24K salary, $118K dividend payments, and $84K other payments. In 2003, the owner received $24K salary and $222K in dividend payments. Originally, the IRS contended that $131K of the dividend payments for 2002 and that $175K of the dividend payments for 2003 should be recharacterized as wages subject to employment taxes, assessing $49K in taxes, penalties, and interest against the corporation. Eventually, the IRS' trial position evolved to recharacterizing only $67K as compensation for each year, for a total of $91K compensation per year. Thus, the taxpayer received substantial savings from dividends that were not recharacterized by the IRS.

[3503] See part II.M.4.f Issuing a Profits Interest to a Service Provider.

[3504] See fns 732-734 in part II.E.1.b Taxes Imposed on S Corporations, Partnerships, and Sole Proprietorships.

[3505] See *Robucci v. Commissioner*, T.C. Memo. 2011-19 (psychiatrist's C corporations disregarded for self-employment tax purposes; penalty imposed; excellent example of client not understanding what the tax professional was trying to accomplish). I noticed one commentator express concern about Code § 269, acquiring control of a corporation with the principal purpose being evasion or avoidance of Federal income tax. That same commentator suggested considering the economic substance rules, which would apply to an improper avoidance of Federal income tax, and saving self-employment tax would not be a proper motive under that rule; see part II.G.17 Economic Substance. Would statutes designed to prevent Federal income tax avoidance cause a strategy designed to save self-employment tax to fail? I am unaware of any cases applying these statutes to strategies designed to save self-employment tax.

Furthermore, for business succession purposes, the owner can then transfer interests in the S corporation to family members without breaking up the single block of partnership voting rights.

On the other hand, when the owner of the S corporation blocker dies, the partnership's assets do not get an inside basis step-up.[3506] If the S corporation sells the partnership interest to an unrelated party and then liquidates in the year of sale, the deceased owner's beneficiaries might be able to replicate the inside basis step-up, although this strategy works better for federal income tax than state income tax purposes.[3507] For this reason and due to certain estate planning considerations,[3508] it might be best to have the partnership interest be the S corporation's only asset.

II.L.5.b. Self-Employment Tax Caution Regarding Unincorporated Business That Makes S Election

When an unincorporated business makes an S election (using great caution to strip any partnership tax and accounting provisions from any operating agreement or partnership agreement forms),[3509] does the S election block self-employment tax?

Reg. § 1.1402(a)-2(g) appears to provide that electing to treat a partnership as an S corporation does not preclude self-employment tax:

> *Nature of partnership interest*. In the case of a partner who is a member of a partnership with respect to which an election has been made pursuant to section 1361 and the regulations thereunder to be taxed as a domestic corporation, net earnings from self-employment include his distributive share of the income or loss, described in section 702(a)(9), from the trade or business carried on by the partnership computed without regard to the fact that the partnership has elected to be taxed as a domestic corporation.

Similarly, Reg. § 1.1402(a)-2(h) appears to provide that a sole proprietor may not avoid self-employment tax by electing to treat his or her business as an S corporation:

> *Proprietorship taxed as domestic corporation*. A proprietor of an unincorporated business enterprise with respect to which an election has been made pursuant to section 1361 and the regulations thereunder to be taxed as a domestic corporation shall compute his net earnings from self-employment without regard to the fact that such election has been made.

Thus, the above regulations appear to provide that a single member LLC that elects taxation as an S corporation will be subjected to self-employment tax as if the S election has not been made.

[3506] See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.
[3507] See part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation.
[3508] See part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts, which includes a discussion of splitting assets when a trust terminates and the beneficiaries go their separate ways.
[3509] See part II.A.2.i Single Class of Stock Rule and especially fn. 361 in part II.B Limited Liability Company (LLC).

However, those regulations were promulgated before the current subchapter S was created, and subsections (g) and (h) of Reg. § 1.1402(a)-2 appear to be obsolete.[3510]

If one remains concerned about whether subsections (g) and (h) of Reg. § 1.1402(a)-2 are valid and wants the state law benefits of an unincorporated entity and the SE tax blocking benefit of an S corporation, one should consider using a limited partnership that has limited liability protection, which is commonly known as a limited liability limited partnership (LLLP).[3511] The general partner will have limited liability and be subject to SE tax, and generally the limited partners will avoid SE tax on their distributive share of income.

II.L.5.c. Examples of S Corporation Blockers

Consider the structures described below, which seek to thread the needle between avoiding the 3.8 tax on net investment income[3512] and avoiding self-employment tax. The "Real Estate Drop Down into Preferred Limited Partnership" scenario is more complex and would tend to be more appropriate in converting existing structures. The "Straight-Up Limited Partnership" scenario has an elegant simplicity if no real estate (or other rental property) is ever held and no LLCs are required; more details are discussed earlier in this document.[3513] The "Flowchart: LLC with S Corporation as Blocker" is an excellent defense in case the IRS ever succeeds in taxing limited partners in a state law limited partnership on their distributive share of income:

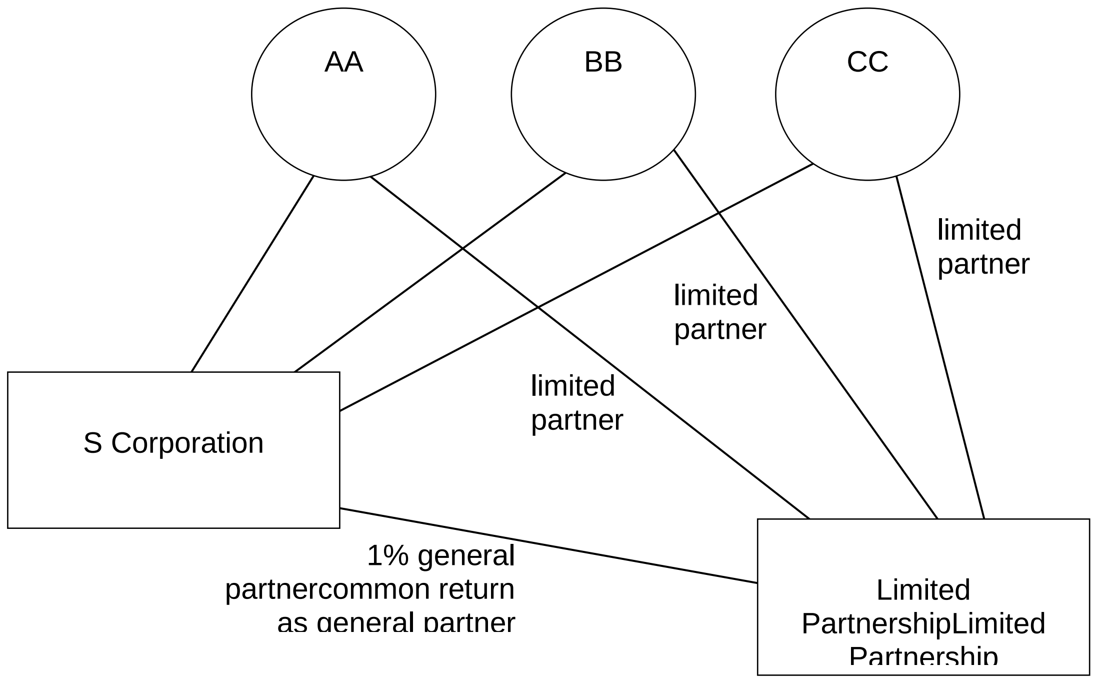
- The exit strategies in part II.Q Exiting from or Dividing a Business remain viable in that structure, although they can become more complicated.

- Basis step-up on the company's assets upon an owner's death becomes more complex and might or might not be attained.[3514] One would need to thoroughly explore the nuances of parts II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation and II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill).

Note that these structures would tend to defeat a possible goal of allowing the family members who do not participate in the business to receive income from long-term leases of property used in the business, which strategy is used to provide income to the outsiders without their needing a voice in how the business is run. One might need to give up on avoiding the 3.8% tax on net investment income regarding the use of valuable property if separating outsiders from insiders is too significant an issue. See part II.E.5.d Net Investment Income Tax and Passive Loss Rules Under Recommended Structure regarding the benefits of keeping real estate under the same umbrella as the operating business.

[3510] See Banoff's and Lipton's *Shop Talk* column, Does an S Election Block Self-Employment Tax When Made By an Unincorporated Business? *Journal of Taxation* (Sep. 2014).
[3511] See parts II.C.12 Limited Partnership and II.C.13 Limited Liability Partnership Registration.
[3512] See part II.I 3.8% Tax on Excess Net Investment Income, especially part II.I.8 Application of 3.8% Tax to Business Income.
[3513] See part II.E Recommended Structure for Entities.
[3514] See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.

**II.L.5.d.	Straight-Up Limited Partnership**

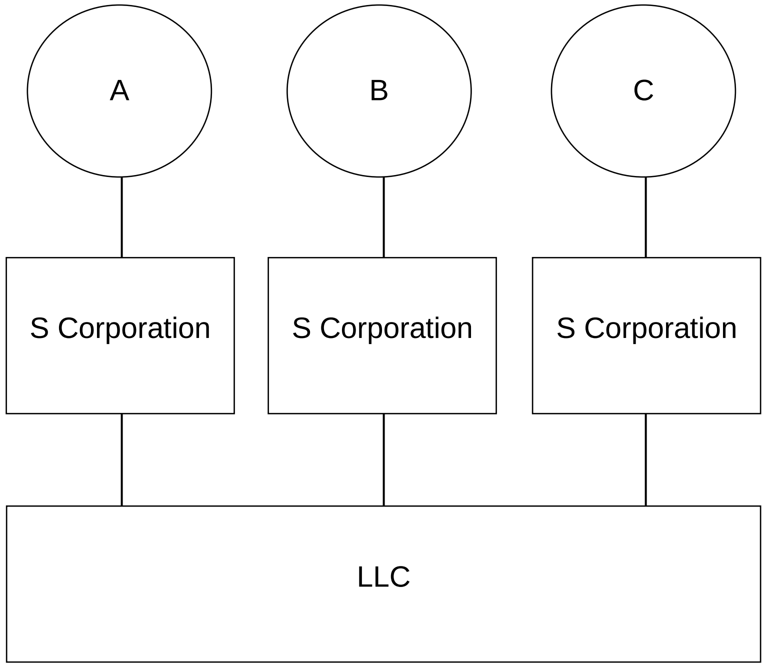


Notes:

- Assume A, B, and C are active in business (500+ hours) and receive reasonable compensation from the general partner for services rendered to the corporation as general partner of the limited partnership.
- This would not avoid self-employment tax on the limited partners if the long-ago proposed regulations defining limited partner for purposes of the self-employment tax were finalized.

Ideally, the limited partnership would hold the operating business(es) in a separate LLC (or LLCs) and any real estate in a separate LLC or LLCs. This is described more fully in part II.E Recommended Structure for Entities.

II.L.5.e. Flowchart: LLC with S Corporation as Blocker



Notes:

- Assume A, B, and C are active in business (500+ hours) and receive reasonable compensation from their respective S corporations for services rendered to the corporation as a member and manager of the LLC.
- Significant disadvantages apply to the holding real estate in this structure.

II.L.5.f. Blocker May Blow Important Tax Benefits

Unlike a partnership, an S corporation does not get a basis step-up in its underlying assets when an owner dies. See parts II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations and II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation; Possible Way to Attain Basis Step-Up.

A partner who is allocated liabilities in excess of the partner's basis faces a potential income tax disaster when the loan is repaid. However, the slate is wiped clean when the partner dies and the partnership interest is included in the partner's estate. See fn 2091 in part II.H.2.g Partnership Basis Adjustments. But, if the partnership is inside an S corporation, this slate is not wiped clean.

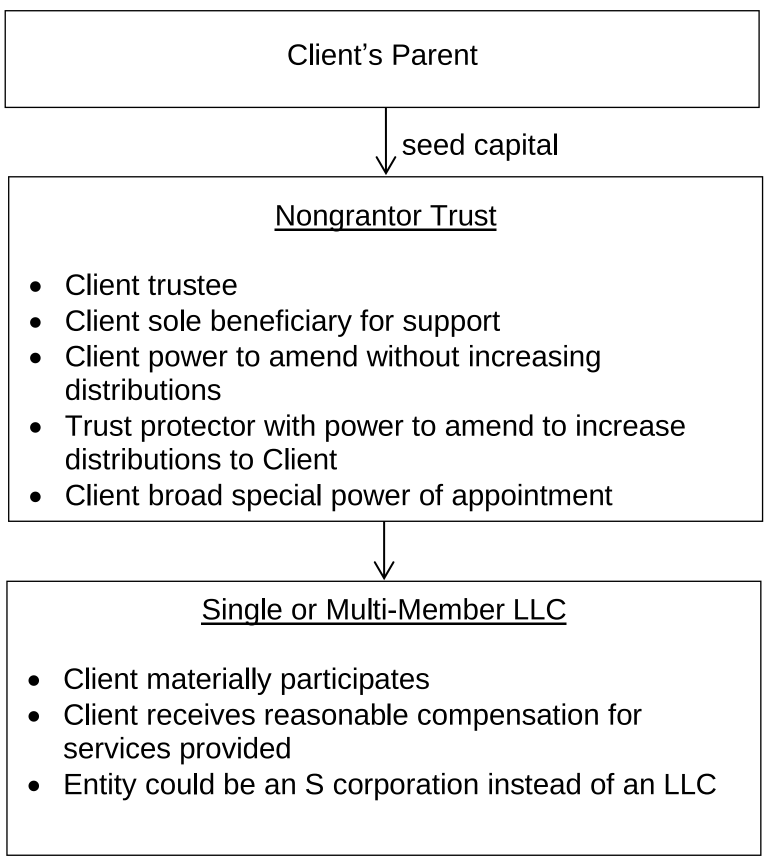
For example, a personal injury law firm is taxed as a partnership, and a partner interposes a wholly owned S corporation as a purported[3515] SE tax blocker. The partnership distributes its net winnings as soon as it receives them and borrows money to finance the costs it incurs between wins. The now-indirect partner dies between wins. His estate gets a basis step-up in the S corporation stock, but the S corporation's partnership interest does not get a basis step-

[3515] See text accompanying fn 3504 in part II.L.5.a S Corporation Blocker Generally.

up, so the problem of debt in excess of basis in the partnership's assets does not get wiped out when the now-indirect partner dies, whereas it would have been wiped out if the blocker has not used. Perhaps liquidating the S corporation immediately upon death would have replicated the basis step-up, but one has spot the issue in a timely manner, and even then the liquidation might not have the hoped-for tax results; see part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation; Possible Way to Attain Basis Step-Up.

II.L.6. SE Tax N/A to Nongrantor Trust

Self-employment tax does not apply to income earned by an estate or trust, at the trust level or at the beneficiary level.[3516] Just as the IRS will review whether distributions from an S corporation are disguised compensation,[3517] it might also consider whether individuals who are trustees and beneficiaries received reasonable and sufficient compensation for services performed for the business.[3518] If the trust is the sole member of the LLC, the trust's purpose must be to vest in trustees responsibility for the protection and conservation of property for beneficiaries who cannot share in the discharge of this responsibility and, therefore, are not associates in a joint enterprise for the conduct of business for profit.[3519]



[3516] Reg. § 1.1402(a)-2(b); *Huval v. Commissioner*, T.C. Memo. 1985-568.
[3517] See fn. 79 and accompanying text.
[3518] TAMs 200305001, 200305002.
[3519] See part II.D.1. Trust as a Business Entity.

II.L.7. SE Tax N/A to Qualified Retiring or Deceased Partner

Self-employment tax does not apply to amounts received by a partner pursuant to a written plan of the partnership, which satisfies IRS requirements and provides for payments on account of retirement, on a periodic basis,[3520] to partners generally or to a class or classes of partners, such payments to continue at least until such partner's death,[3521] if:[3522]

(A) such partner rendered no services with respect to any trade or business carried on by such partnership during the taxable year of such partnership, ending within or with such partner's taxable year, in which such amounts were received,[3523] and

(B) no obligation exists (as of the close of the partnership's taxable year described above) from the other partners to such partner except with respect to retirement payments under such plan, and

(C) such partner's share, if any, of the capital of the partnership has been paid to such partner in full before the close of the partnership's taxable year referred to above.

Note that such payments would likely be characterized as Code § 736(a) payments.[3524] And, although Code § 736 payments are generally excluded from the draconian Code § 409A nonqualified deferred compensation rules,[3525] payments under this provision are not excluded from Code § 409A.[3526]

3520 Payments made by a partnership retirement plan to a retired partner from current partnership earnings excepted from the term net earnings from self-employment for purposes of Code § 1402(a) even if receipt of part of the payments is deferred until shortly after the beginning of the following year. Rev. Rul. 79-34.

3521 Terminating payments before the partner's death disqualifies the payments from this exclusion. Letter Ruling 8052117.

3522 Code § 1402(a)(10); Reg. § 1.1402(a)-17.

3523 A lawyer who retired from practicing law but continued to perform arbitration services through the same law firm did not fall within this exclusion from self-employment tax. *Brandschain v. Commissioner*, 80 T.C. 746 (1983).

3524 Letter Ruling 7905032. For a general discussion of Code § 736, see part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.

3525 For a general discussion of Code § 409A, see part II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules. For general application (or lack thereof) of Code § 409A to partnerships, see text accompanying footnote 3736.

3526 Notice 2005-1, A-7 provides:

> The application of § 409A is not limited to arrangements between an employer and employee. Accordingly, § 409A may apply to arrangements between a partner and a partnership which provides for the deferral of compensation under a nonqualified deferred compensation plan…. [U]ntil further guidance is issued, taxpayers may treat arrangements providing for payments subject to § 736 as not being subject to § 409A, except that an arrangement providing for payments which qualify as payments to a partner under § 1402(a)(10) are subject to § 409A. Finally, § 409A may apply to payments covered by § 707(a)(1) (partner not acting in capacity as partner), if such payments otherwise would constitute a deferral of compensation under a nonqualified deferred compensation plan.

This rule continues to apply under the final regulations issued under Code § 409A. Section 4 of Notice 2007-86.

In (G.) Arrangements Between Partnerships and Partners, T.D. 9321, which promulgated final regulations under Code § 409A, provides:

If the partner has moved from the state in which the partner has provided the services, the retirement payments might escape income taxation by that state. See part II.Q.8.b.ii.(g) Code § 736 Payments as Retirement Income – Possible FICA and State Income Tax Benefits (referring back to this part II.L.7 and then discussing the state income tax exclusion under federal law).

When a partner dies during the partnership's taxable year, the portion of the partner's distributive share earned during life is subject to self-employment tax (presumably to the extent not shielded by the rule for a retired partner).[3527]

II.L.8. Retirement Payments to Insurance Salesmen

Code § 1402(k) excludes from SE income any amount received during the taxable year from an insurance company on account of services performed by such individual as an insurance salesman for such company if -

(1) such amount is received after termination of such individual's agreement to perform such services for such company,

---

Commentators raised issues concerning the application of the provision in Notice 2005-1, Q&A-7 stating that until further guidance is issued, taxpayers may treat arrangements providing for payments subject to section 736 (payments to a retiring partner or a deceased partner's successor in interest) as not being subject to section 409A, except that an arrangement providing for payments that qualify as payments to a partner under section 1402(a)(10) is subject to section 409A. Section 1402(a)(10) provides for an exception from the Self-Employment Contributions Act (SECA) tax for payments to a retired partner, provided that certain conditions are met…

Commentators questioned the appropriateness of the inclusion of such arrangements under section 409A, because neither the statute nor the legislative history refers to section 1402(a)(10). However, the Treasury Department and the IRS believe it is appropriate for such arrangements to be subject to section 409A because such arrangements are purposefully created to provide deferred compensation, and do not raise issues regarding the coordination of the provisions of section 409A with the provisions of section 736, specifically the rules governing the classification of payments to a retired partner under section 736(a) (payments considered as distributive share or guaranteed payments) and section 736(b) (payments for interest in partnership).

However, further clarification and relief is provided concerning the application of the deferral election timing rules to these payments. Until further guidance is issued, for purposes of section 409A, taxpayers may treat the legally binding right to the payments excludible from SECA tax under section 1402(a)(10) as arising on the last day of the partner's taxable year before the partner's first taxable year in which such payments are excludible from SECA tax under section 1402(a)(10), and the services for which the payments are compensation as performed in the partner's first taxable year in which such payments are excludible from SECA tax under section 1402(a)(10). Accordingly, for purposes of section 409A, the time and form of payment of such amounts generally may be established, including through an election to defer by the partner, on or before the final day of the partner's taxable year immediately preceding the partner's first taxable year in which such payments are excludible from SECA tax under section 1402(a)(10). However, this interim relief does not apply a second time where an amount paid under an arrangement in one year has been excluded from SECA tax under section 1402(a)(10), and an amount paid in a subsequent year has not been excluded from SECA tax under section 1402(a)(10) because, for example, the partner performed services in that subsequent year.

[3527] Code § 1402(f); Reg. § 1.1402(f)-1; Rev. Rul. 58-607.

(2) such individual performs no services for such company after such termination and before the close of such taxable year,

(3) such individual enters into a covenant not to compete against such company which applies to at least the 1-year period beginning on the date of such termination, and

(4) the amount of such payment-

(A) depends primarily on policies sold by or credited to the account of such individual during the last year of such agreement or the extent to which such policies remain in force for some period after such termination, or both, and

(B) does not depend to any extent on length of service or overall earnings from services performed for such company (without regard to whether eligibility for payment depends on length of service).

The taxpayer must prove that all of these elements applies.[3528]

Generally, an insurance agent receiving payments from the insurance company cannot characterize them as the sale of a capital asset.[3529]

II.M. Buying into a Business

Buying into a business includes starting a business from scratch and buying into an existing business. Each of those two issues is discussed as applied to corporations, as applied to partnerships, and as compared between the two.

II.M.1. Taxation on Formation of Entity: Comparison between Partnership and Corporation

Avoiding non-recognition of gain is much easier for a partnership than for a corporation. Assumption of liabilities generally does not cause problems with partnerships, because the partner who contributes the liability generally receives a special allocation of that liability under the partnership rules if the liability exceeds the contributing partner's basis.[3530] Neither the 80% control test nor any business purpose rule applies.

II.M.2. Buying into or Forming a Corporation

II.M.2.a. Initial Incorporation – Generally

No gain or loss shall be recognized if property is transferred to a corporation by one or more persons solely in exchange for stock in such corporation and immediately after the exchange such person or persons are in control of the corporation.[3531] Furthermore, regardless of the

[3528] *Geneser v. Commissioner*, T.C. Memo. 2017-110, held that the exclusion did not apply, noting: "Petitioner's commission payments credited toward his account in 2010 were dependent on his length of service at AIL." See also *Peterson v. Commissioner*, fn 3408 in part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax.

[3529] See fn 4152 in part II.Q.1.c.ii Consulting Agreement in Lieu of Covenant Not to Compete and fn 4155 in part II.Q.1.c.iii Does Goodwill Belong to the Business or to Its Owners or Employees?

[3530] However, a shifting of liabilities might constitute a disguised sale.

[3531] Code § 351(a).

control issue, generally a contribution to capital is not income to the corporation,[3532] and the contributing shareholders get basis in their stock.[3533] Generally, when a shareholder contributes to a corporation a debt the corporation owes to that shareholder, the corporation does not recognize income.[3534] Reg. § 1.118-1 provides:

> In the case of a corporation, section 118 provides an exclusion from gross income with respect to any contribution of money or property to the capital of the taxpayer. Thus, if a corporation requires additional funds for conducting its business and obtains such funds through voluntary pro rata payments by its shareholders, the amounts so received being credited to its surplus account or to a special account, such amounts do not constitute income, although there is no increase in the outstanding shares of stock of the corporation. In such a case the payments are in the nature of assessments upon, and represent an additional price paid for, the shares of stock held by the individual shareholders, and will be treated as an addition to and as a part of the operating capital of the company. Section 118 also applies to contributions to capital made by persons other than shareholders. For example, the exclusion applies to the value of land or other property contributed to a corporation by a governmental unit or by a civic group for the purpose of inducing the corporation to locate its business in a particular community, or for the purpose of enabling the corporation to expand its operating facilities. However, the exclusion does not apply to any money or property transferred to the corporation in consideration for goods or services rendered, or to subsidies paid for the purpose of inducing the taxpayer to limit production. See section 362 for the basis of property acquired by a corporation through a contribution to its capital by its stockholders or by nonstockholders.

When a non-shareholder (a state) made payments to the taxpayer's affiliates, *Brokertec Holdings, Inc. v. Commissioner*, T.C. Memo. 2019-32, held:

[3532] Code § 118.

[3533] *Commissioner v. Fink*, 483 U.S. 89 (1987), explained:

> It is settled that a shareholder's voluntary contribution to the capital of the corporation has no immediate tax consequences. 26 U.S.C. § 263; 26 CFR § 1.263(a)-2(f) (1986). Instead, the shareholder is entitled to increase the basis of his shares by the amount of his basis in the property transferred to the corporation. See 26 U.S.C. § 1016(a)(1). When the shareholder later disposes of his shares, his contribution is reflected as a smaller taxable gain or a larger deductible loss. This rule applies not only to transfers of cash or tangible property, but also to a shareholder's forgiveness of a debt owed to him by the corporation. 26 CFR § 1.61-12(a) (1986). Such transfers are treated as contributions to capital even if the other shareholders make proportionately smaller contributions, or no contribution at all. See, *e.g.*, *Sackstein v. Commissioner*, 14 T.C. 566, 569 (1950).

See also Reg. § 1.118-1, which provides in part:

> In the case of a corporation, section 118 provides an exclusion from gross income with respect to any contribution of money or property to the capital of the taxpayer. Thus, if a corporation requires additional funds for conducting its business and obtains such funds through voluntary pro rata payments by its shareholders, the amounts so received being credited to its surplus account or to a special account, such amounts do not constitute income, although there is no increase in the outstanding shares of stock of the corporation. In such a case the payments are in the nature of assessments upon, and represent an additional price paid for, the shares of stock held by the individual shareholders, and will be treated as an addition to and as a part of the operating capital of the company.

[3534] See fn 1223 in part II.G.4.d.ii.(b) Consequences of Using Shareholder Debt to Deduct S Corporation Losses.

> We now apply the aforementioned judicial principles to resolve the dispute before us. The evidence presented at trial shows the intent or motive of the State of New Jersey in making the payments to petitioner's affiliates. And the key to determining whether payments from a nonshareholder (here the State of New Jersey) are taxable to the recipient (here petitioner's affiliates) or nontaxable as a contribution to capital is the intent or motive of the nonshareholder donor.
>
> It is undisputed that the EDA's purpose in making the BEIP grant to petitioner's affiliates was to induce them to establish their offices in a targeted area, *i.e.*, an urban-aid municipality, not only to bring in new jobs, but also to revitalize the area. In the instant case we have clear evidence of the donor's intent, and we find that the EDA's intent and motivation for the BEIP grant was to provide a nontaxable contribution to capital. The statute enacting the BEIP stated that the purpose of the program was to develop New Jersey's economy and revitalize its cities by providing financial and technical assistance to, amongst other entities, businesses. Both witnesses from the EDA, Ms. Hassett and Ms. Butterfield, stated that their only interest in making such grants was to bring new jobs to the State. The facts in this case fall squarely within the four corners of section 1.118-1, Income Tax Regs., and are strikingly similar to those of *Brown Shoe Co.* and *McKay Prods. Corp.*, wherein the donor entities sought to induce the businesses in question to move to facilities within the donors' localities.

The Third Circuit reversed, 967 F.3d 317 (2020). First, it analyzed *Edwards v. Cuba Railroad Company*, 268 U.S. 628 (1925) and *Texas & Pacific Railway Company v. United States*, 286 U.S. 285 (1932):

> Read together, *Texas & Pacific Railway* and *Edwards* suggest that unrestricted government payments to a company reveal an intent to provide the company additional income rather than a contribution to the company's capital. Plus, calculating payments based on the company's income, rather than on the amount of some capital investment made by the company, further indicates an intent to provide income rather than a contribution to capital.

Next, the Third Circuit analyzed *Detroit Edison Co. v. Comm'r*, 319 U.S. 98, 99–103 (1943); *Commissioner v. McKay Products Corp.*, 178 F.2d 639 (3d Cir. 1949); and *Brown Shoe Co. v. Commissioner*, 339 U.S. 583 (1950). It then commented:

> In our case, the Tax Court concluded - and BrokerTec argues - that *McKay Products* and *Brown Shoe* support the position that the Incentive Program grants were contributions to BrokerTec's capital because they were relocation inducements. See *BrokerTec Holdings, Inc.*, 2019 WL 1545724, at *13–14 (concluding that the facts of *McKay Products* and *Brown Shoe* are "strikingly similar" in that in both "the localities sought to induce the taxpayers in question to move to their respective localities"); BrokerTec Br. 25-26 ("*Brown Shoe* teaches ... [that] location inducement grants like these are contributions to capital."). But, importantly, neither *McKay Products* nor *Brown Shoe* involved cash grants that were entirely unrestricted in use and calculated on the basis of wages paid rather than on the basis of the amount spent to relocate. *McKay Products* involved the contribution of a factory, rather than cash, and thus the contribution was of a capital asset. See 178 F.2d at 642. And while *Brown Shoe* involved the contribution of both land and cash without any explicit restriction on its use, the Court specifically noted that "[i]n every instance the cash received by [the company] from a community group was less than the amount expended by it for the acquisition or construction of the local

> factory building and equipment." 339 U.S. at 587. We agree with the Commissioner that this was an implicit restriction: the company in *Brown Shoe* "was effectively required to invest the funds (or a like amount) in its permanent working capital structure." Comm'r's Br. 31.
>
> In sum, the cases from which the first CB&Q characteristic was distilled - *Edwards*, *Texas & Pacific Railway*, *McKay Products*, and *Brown Shoe* - support the Commissioner's position that unrestricted cash grants, calculated on the basis of the recipient's payment of wages, are not contributions to capital but rather are supplements to the company's income.

The Third Circuit then pointed to cases in other circuits that it said were consistent with its holding here: "*AT&T, Inc. v. United States*, 629 F.3d 505 (5th Cir. 2011); *United States v. Coastal Utils.*, *Inc.*, 483 F.Supp.2d 1232 (S.D. Ga. 2007), *aff'd*, 514 F.3d 1184 (11th Cir. 2008) (per curiam adopting the district court's opinion in full). Th court then concluded:

> When viewed in light of the law as set out above, the record here permits only one resolution: New Jersey's Incentive Program grants to BrokerTec were intended as a supplement to its income rather than as a contribution to its capital. It is undisputed that New Jersey placed no restriction on how the Incentive Program grants could be used: they could be used to make capital improvements, but they could also be used for operational expenses such as paying wages, or even paying dividends to shareholders. And it also undisputed that the amount of the grants was not tied to the amount of capital improvements BrokerTec would make. Indeed, while BrokerTec indicated in its Incentive Program applications that it would make $72 million in capital investments (in the form of improvements to office space, and the acquisition of technology and furniture), the total amount of Incentive Program grants was based on a percentage of income tax withholdings generated by BrokerTec's employees and totaled approximately $170 million. In light of these facts, BrokerTec cannot show that New Jersey intended the Incentive Program payments to "become a permanent part of [BrokerTec's] working capital structure." *CB&Q*, 412 U.S. at 413.

To qualify for non-recognition of gain, the transferor(s) must control at least 80% of the shares' votes and at least 80% of each class of nonvoting stock.[3535] AM 2020-005 (issued 5/22/2020 and released 5/29/2020) confirms that, if the transferor already owns stock, the transferor does not need to be issued stock, citing:

> *Lessinger v. Commissioner*, 872 F.2d 519, 522 (2d Cir. 1989) ("[T]he exchange requirements of section 351 are met where a sole stockholder transfers property to a wholly-owned corporation even though no stock or securities are issued therefor. Issuance of new stock in this situation would be a meaningless gesture."); see Rev. Rul. 64-155, 1964-1 C.B. 138 (treating contribution of appreciated property to wholly owned corporation as exchange described in section 351 even though transferor did not receive additional stock); see also *Jackson v. Commissioner*, 708 F.2d 1402, 1405 (9th Cir. 1983) ("We assume section 351 applies [to transfer of a joint venture interest to a controlled corporation] even though no exchange of stock occurred because the transfer was to a wholly owned corporation"); *Rosen v. Commissioner*, 62 T.C. 11, 19

[3535] Code § 368(c), incorporated by reference by Code § 351(a).

(1974) (applying section 351 without discussing the fact that no stock appears to have been issued).

However, Code § 351 does not protect stock issued for services, indebtedness of the transferee corporation which is not evidenced by a security, or interest on indebtedness of the transferee corporation which accrued on or after the beginning of the transferor's holding period for the debt.[3536]

No counterpart to the above rules restrict tax-free formation of partnerships. See part II.M.3 Buying into or Forming a Partnership.

AM 2020-005 expresses concern when shareholders contribute short-term capital property to an existing corporation (which might be a shell) and then sell the corporation for a long-term capital gain. It posits the following facts:

> In each of the following situations, on January 1, Year 1, an individual ("Shareholder") contributes property with negligible value to a newly formed domestic corporation ("Corporation"), in exchange for all of Corporation's stock (the "initial transfer"). Assume that all shares of stock issued to Shareholder are capital assets in Shareholder's hands; that no transfer to Corporation is subject to section 351(d) or (e); and that section 351(g) does not apply to any stock of Corporation.
>
> After the initial transfer, each situation continues as follows.
>
> Situation 1
>
> On August 1, Year 1, Shareholder transfers a substantial amount of money to Corporation for no consideration, and Corporation invests the money in property that appreciates in value. On February 1, Year 2, Shareholder sells all of the stock in Corporation for a price that reflects the unrealized appreciation in the property, so that gain is recognized to Shareholder. Shareholder claims that all of the stock has a holding period exceeding one year (from January 1, Year 1).
>
> Situation 2
>
> On March 1, Year 1, Shareholder invests a substantial amount of money in property that appreciates in value. On August 1, Year 1, Shareholder transfers the appreciated property to Corporation for no consideration. On February 1, Year 2, Shareholder sells all of the stock in Corporation for a price that reflects the unrealized appreciation in the property, so that gain is recognized to Shareholder. Shareholder claims that all the stock has a holding period exceeding one year (from January 1, Year 1).

After reciting the analysis further above that the each subsequent contribution is a Code § 351(a) nonrecognition transaction, the IRS reasons:

> After the subsequent transfer in each Situation, Shareholder's stock in Corporation has a split basis and a split holding period to reflect the initial transfer and the subsequent transfer. Cf. Rev. Rul. 85-164, 1985-2 C.B. 117 (shares of stock received in an exchange to which section 351 applies, for property with different bases and holding

[3536] Code § 351(d).

periods, have split bases and split holding periods for purposes of determining long-term or short-term capital gain or loss); Rev. Rul. 62-140, 1962-2 C.B. 181 (shareholder has split basis and split holding period after transferring money to exercise conversion right in convertible debenture, with the portion attributable to the money having holding period dating from the transfer).

In both Situation 1 and Situation 2, the split basis and split holding period of Shareholder's stock reflect the economics of the transactions. After the subsequent transfer in each of the situations, a portion of the value of each share is attributable to the value added by the subsequent transfer, and the basis of Shareholder's stock includes the transferred money or the basis of the transferred property. Splitting the basis of each share of stock is consistent with the treatment of a section 351 exchange in which a transferor transfers several assets to a corporation, in exchange for stock and securities of the transferee corporation and other property. See Rev. Rul. 68-55, 1968-1 C.B. 140 (each asset considered transferred separately in exchange for a portion of each category of consideration received; fair market value of each category of consideration received allocated among transferred assets in proportion to their relative fair market values).[1]

[1] The same issue may arise in an acquisitive reorganization if a single shareholder owns all the stock in both the acquiring corporation and the target corporation. If no acquiring corporation stock is issued, the shareholder may designate which pre-existing shares in the acquiring corporation take their basis and holding period from the surrendered target stock and which from the pre-existing acquiring stock, so long as that designation is consistent with the terms of the reorganization. Treas. Reg. § 1.358-2(a)(2)(iii)(A), (a)(2)(vii), (c) Example (11). This designation of shares applies only to reorganizations, not to section 351 exchanges. For treatment of transactions that qualify as both reorganizations and section 351 exchanges, see Treas. Reg. § 1.358-2(a)(2)(viii).

Including the amount of the money or the basis of the transferred property in the stock's basis without a corresponding adjustment to the stock's holding period would be inconsistent with the principle that the holding period of property tracks the sources of the property's basis. See, *e.g.*, section 1223(1).

Accordingly, in Situation 1, the portion of each share attributable to the money transferred in the subsequent transfer has basis equal to the amount of the money and a holding period dating from the subsequent transfer. In Situation 2, the basis and holding period of the portion of each share attributable to the property transferred in the subsequent transfer are determined by referring to that property. Thus, in both Situation 1 and Situation 2, to the extent attributable to the subsequent transfer, Shareholder's stock has a holding period less than one year at the time of the sale of the stock on February 1, Year 2. The gain attributable to the sale of this portion of the Corporation stock is short-term capital gain.

Situations 1 and 2 illustrate two common forms of transactions that, as the Service understands it, are being recommended to taxpayers as a means of artificially extending holding periods. Depending on the facts and circumstances, the same analysis could apply to similar situations, such as transactions in which (i) Shareholder is not an individual; (ii) Shareholder initially acquires Corporation's stock in a taxable transaction; (iii) Corporation is not a domestic corporation; (iv) the relative values of the initial transfer and the subsequent transfer are different from those described in Situations 1 and 2; (v) stock of Corporation is issued in the subsequent transfer, but the value of such stock does not reflect the value of the money or property transferred to it in the subsequent transfer; (vi) Shareholder is not the sole shareholder of Corporation, but the relationship between Shareholder and other shareholders is such that the subsequent transfer for no consideration represents compensation, a gift, or another transfer of value from Shareholder to the other shareholders; or (vii) Shareholder does not dispose of all of Corporation's stock in a single transaction.

RECOMMENDATION

We recommend that the Service challenge transactions in which a shareholder's purported holding period in stock of a wholly owned corporation ignores the effect of meaningless gesture transactions. Depending on the facts and circumstances, the Service may challenge the transaction on other grounds as well, including that the transaction lacks economic substance; that the form of the transaction does not correspond to its substance; or that a purportedly tax-free transfer to a corporation lacks business purpose or constitutes an ineffective assignment of income or conduit transaction. In appropriate cases, the Service also may impose accuracy-related penalties.

Various other restrictions on favorable tax treatment may apply, depending on the situation. Among them are:

- If the shareholder in a Code § 351 transaction receives not only stock but also other property or money, then gain (if any) to such recipient is recognized, but not in excess of the amount of money received, plus the fair market value of such other property received; and no loss to such recipient shall be recognized.[3537] The cash and other property that triggers gains is commonly referred to as "boot," which is described in parts II.M.2.b Initial Incorporation: Effect of Assumption of Liabilities, II.M.2.c Contribution of Partnership Interest to Corporation, II.M.2.d Contributing Installment Obligations, and II.M.2.e Contributing Existing Business to a Corporation. Reg. § 1.351-2, "Receipt of property," provides:

  (a) If an exchange would be within the provisions of section 351(a) if it were not for the fact that the property received in exchange consists not only of property permitted by such subsection to be received without the recognition of gain, but also of other property or money, then the gain, if any, to the recipient shall be recognized, but in an amount not in excess of the sum of such money and the fair market value of such other property. No loss to the recipient shall be recognized.

  (b) See section 357 and the regulations pertaining to that section for applicable rules as to the treatment of liabilities as "other property" in cases subject to section 351, where another party to the exchange assumes a liability, or acquires property subject to a liability.

  (c) See sections 358 and 362 and the regulations pertaining to those sections for applicable rules with respect to the determination of the basis of stock, securities, or other property received in exchanges subject to section 351.

[3537] Code § 351(b).

(d) See part I (section 301 and following), subchapter C, chapter 1 of the Code, and the regulations thereunder for applicable rules with respect to the taxation of dividends where a distribution by a corporation of its stock or securities in connection with an exchange subject to section 351(a) has the effect of the distribution of a taxable dividend.

(e) See § 1.356-7(a) for the applicability of the definition of nonqualified preferred stock in section 351(g)(2) for stock issued prior to June 9, 1997, and for stock issued in transactions occurring after June 8, 1997, that are described in section 1014(f)(2) of the Taxpayer Relief Act of 1997, Public Law 105-34 (111 Stat. 788, 921). See § 1.356-7(c) for the treatment of preferred stock received in certain exchanges for common or preferred stock described in section 351(g)(2)(C)(i)(II).

- The IRS asserts, sometime successfully and sometimes not, that a business purpose is required, but Code § 351 and the regulations do not expressly require a business purpose.[3538] Forming a corporation merely to swap the new stock for stock in another corporation prevented the stock swap from being a tax-free reorganization and instead was taxed as an exchange of the contributed assets for the other corporation's stock;[3539] note that this result was required to prevent taxpayers from avoiding the 80%-control requirement described in fn 3535.

- If shareholders contribute financial assets that are not diversified so that they can have an interest in a diversified portfolio held by the corporation, they may recognize gain.[3540]

- One who wishes to transfer assets to an unrelated corporation cannot simply form a new corporation under Code § 351 and immediately merge the new corporation into the buying corporation.[3541]

[3538] ¶ F-1002 Business purpose requirement for tax-free transfer to controlled corporation, *Fed. Tax Coord.2d*; Bittker & Eustice, ¶ 3.17[6] Business Purpose, Step Transactions, and Other Principles, *Federal Income Taxation of Corporations & Shareholders* (WG&L).

[3539] *West Coast Marketing Corporation v. Commissioner*, 46 T.C. 32, 41 (1966), noting that the corporation that was so formed "engaged in no business and served no purpose other than to hold title pending the contemplated transfer to Universal."

[3540] Code § 351(e)(1); see part II.M.3.b Exception: Diversification of Investment Risk, applying this rule to partnerships, which are much more likely to be formed by pooling financial assets than are corporations.

[3541] Rev. Rul. 70-140 involved the following facts:

> All the outstanding stock of X corporation was owned by A, an individual. A also operated a similar business in the form of a sole proprietorship on the accrual basis of reporting income. Pursuant to an agreement between A and Y, an unrelated corporation, A transferred all the assets of the sole proprietorship to X in exchange for additional shares of X stock. A then transferred all his X stock to Y solely in exchange for voting common stock of Y, which was widely held.

The ruling held:

> The two steps of the transaction described above were part of a prearranged integrated plan and may not be considered independently of each other for Federal income tax purposes. The receipt by A of the additional stock of X in exchange for the sole proprietorship assets is transitory and without substance for tax purposes since it is apparent that the assets of the sole proprietorship were transferred to X for the purpose of enabling Y to acquire such assets without the recognition of gain to A.

Also, see part II.M.3.h Reporting Real Estate Contributed to a Partnership or Corporation in a Nontaxable Transaction.

II.M.2.b. Initial Incorporation: Effect of Assumption of Liabilities

When property is contributed subject to liabilities, the contributing shareholder recognizes gain to the extent that liabilities by the corporation exceed the adjusted basis of assets contributed to the corporation.[3542] The contributing shareholder guaranteeing the loan does not prevent an assumption of liabilities;[3543] instead, the loan should be refinanced so that the shareholder is personally liable on the loan.[3544] However, at least in the Second[3545] and Ninth[3546] Circuits, a

---

> Section 351 of the Code is not applicable to the transfer of the sole proprietorship assets to Y inasmuch as A was not in control of Y immediately after the transfer. The sole proprietorship cannot be a party to a reorganization within the meaning of section 368(b) of the Code. Thus, the transfer of the sole proprietorship assets to X is treated as a sale by A of the assets to Y followed by a transfer of these assets by Y to the capital of X.
>
> Accordingly, that portion of the stock of Y received by A equal to the fair market value of the sole proprietorship assets is treated as an amount received from the sale of those assets. Gain or loss is recognized to A as provided in sections 1001 and 1002 of the Code. The exchange by A of all the outstanding stock of X, solely for voting common stock of Y, other than the Y stock received in payment for the sole proprietorship assets, is a reorganization within the meaning of section 368(a)(1)(B) of the Code.

Oddly, the Revenue Ruling did not think to cite *West Coast Marketing Corporation v. Commissioner*, 46 T.C. 32 (1966), the Official Tax Court Syllabus to which says"

> T corp. owned an undivided one-fourth interest in a tract of land and C, its sole stockholder, owned an undivided one-fourth interest in two adjacent tracts. At a time when a taxable exchange of all those lands for stock in a publicly held corporation (U) was imminent, M corp. was organized by C, and both C and T transferred their interests in the land to M in exchange for stock of M. The stock of M was subsequently transferred to U in exchange for stock of U, and shortly thereafter M was dissolved. Held, M was not organized or used for any bona fide business purpose, and the exchange with U did not constitute a tax-free reorganization. The substance of the transaction was a taxable exchange of interest in land for stock of U. *Gregory v. Helvering*, 293 U.S. 465 [1935].

[3542] Code § 357(c)(1). Code § 357(c)(1) does not apply to transactions that qualify as certain types of reorganizations under Code § 368 to which Code § 351 also applies. Rev. Rul. 2007-8. See also Determining the Character of Section 357(c) Gain, *Tax Lawyer*, Vol. 62, No. 1 (Fall 2008).

[3543] *Seggerman Farms, Inc. v. Commissioner*, 308 F.3d 803 (7th Cir. 2002), *aff'g* T.C. Memo. 2001-99.

[3544] For similar issues determining whether shareholders were the true borrowers, see part II.G.4.d.ii.(a) Limitations on Using Debt to Deduct S Corporation Losses.

[3545] *Lessinger v. Commissioner*, 872 F.2d 519 (2nd Cir. 1989), *rev'g* 85 T.C. 824 (1985).

[3546] *Peracchi v. Commissioner*, 143 F.3d 487 (9th Cir. 1998), *rev'g* T.C. Memo. 1996-191, reasoning:

> The key to solving this puzzle, then, is to ask whether bankruptcy is significant enough a contingency to confer substantial economic effect on this transaction. If the risk of bankruptcy is important enough to be recognized, Peracchi should get basis in the note: He will have increased his exposure to the risks of the business—and thus his economic investment in NAC – by $1,060,000. If bankruptcy is so remote that there is no realistic possibility it will ever occur, we can ignore the potential economic effect of the note as speculative and treat it as merely an unenforceable promise to contribute capital in the future.
>
> When the question is posed this way, the answer is clear. Peracchi's obligation on the note was not conditioned on NAC's remaining solvent. It represents a new and substantial increase in Peracchi's investment in the corporation.[14] The Code seems to recognize that economic exposure of the shareholder is the ultimate measuring rod of a shareholder's investment. *Cf.* I.R.C. section 465 (at-risk rules for partnership investments). Peracchi therefore is entitled to a step-up in basis to the extent he will be subjected to economic loss if the underlying investment

turns unprofitable. *Cf. HGA Cinema Trust v. Commissioner*, 950 F.2d 1357, 1363 (7th Cir. 1991) (examining effect of bankruptcy to determine whether long-term note contributed by partner could be included in basis). See also Treas. Reg. section 1.704-1(b)(2)(ii)(c)(1) (recognizing economic effect of promissory note contributed by partner for purposes of partner's obligation to restore deficit capital account). [My note: Reg. § 1.704-1(b)(2)(ii)(c) was revised 10/9/2019.]

[14] We confine our holding to a case such as this where the note is contributed to an operating business which is subject to a non-trivial risk of bankruptcy or receivership. NAC is not, for example, a shell corporation or a passive investment company; Peracchi got into this mess in the first place because NAC was in financial trouble and needed more assets to meet Nevada's minimum premium-to-asset ratio for insurance companies.

The economics of the transaction also support Peracchi's view of the matter. The transaction here does not differ substantively from others that would certainly give Peracchi a boost in basis. For example, Peracchi could have borrowed $1 million from a bank and contributed the cash to NAC along with the properties. Because cash has a basis equal to face value, Peracchi would not have faced any section 357(c) gain. NAC could then have purchased the note from the bank for $1 million which, assuming the bank's original assessment of Peracchi's creditworthiness was accurate, would be the fair market value of the note. In the end the corporation would hold a million dollar note from Peracchi - just like it does now - and Peracchi would face no section 357(c) gain.[15] The only economic difference between the transaction just described and the transaction Peracchi actually engaged in is the additional costs that would accompany getting a loan from the bank. Peracchi incurs a "cost" of $1 million when he promises to pay the note to the bank; the cost is not diminished here by the fact that the transferor controls the initial transferee. The experts seem to agree: "Section 357(c) can be avoided by a transfer of enough cash to eliminate any excess of liabilities over basis; and since a note given by a solvent obligor in purchasing property is routinely treated as the equivalent of cash in determining the basis of the property, it seems reasonable to give it the same treatment in determining the basis of the property transferred in a section 351 exchange." Bittker & Eustice paragraph 3.06[4][b].

[15] In a similar vein, Peracchi could have first swapped promissory notes with a third party. Assuming the bona fides of each note, Peracchi would take a cost basis in the third party note equal to the face value of the note he gave up. Peracchi could then contribute the third party note to NAC, and (thanks to the added basis) avoid any section 357(c) gain. NAC could then close the circle by giving the third party note back to the third party in exchange for Peracchi's note, leaving Peracchi and NAC in exactly the same position they occupy now.

The IRS might attack these maneuvers as step transactions, but that would beg the question: Does the contribution of a shareholder's note to his wholly-owned corporation have any real economic effect, or is it just so much window dressing? If the debt has real economic effect, it shouldn't matter how the shareholder structures the transaction.

The only substantive difference between the avoidance techniques just discussed - swapping notes or borrowing from a third party—and the case here is the valuation role implicitly performed by the third party. A bank would not give Peracchi the face value of the note unless his credit warranted it, while we have no assurance that NAC wouldn't do so. We readily acknowledge that our assumptions fall apart if the shareholder isn't creditworthy. Here, the government has stipulated that Peracchi's net worth far exceeds the value of the note, so creditworthiness is not at issue. But we limit our holding to cases where the note is in fact worth approximately its face value.

We are aware of the mischief that can result when taxpayers are permitted to calculate basis in excess of their true economic investment. See *Commissioner v. Tufts*, 461 U.S. 300 (1983). For two reasons, however, we do not believe our holding will have such pernicious effects. First, and most significantly, by increasing the taxpayer's personal exposure, the contribution of a valid, unconditional promissory note has substantial economic effects which reflect his true economic investment in the enterprise. The main problem with attributing basis to nonrecourse debt financing is that the tax benefits enjoyed as a result of increased basis do not reflect the true economic risk. Here Peracchi will have to pay the full amount of the note with after-tax dollars if NAC's economic situation heads south. Second, the tax treatment of nonrecourse debt primarily shareholder can get basis for contributing a bona fide note[3547] indebting the shareholder to a C corporation, thereby offsetting the effect of the corporation assuming the corporation's liabilities. Rev. Rul. 68-629 takes the opposite approach – not giving the shareholder basis for such a loan: "Since the taxpayer incurred no cost in making the note, its basis to him was zero" – a position the Tax Court has followed.[3548]

---

creates problems in the partnership context, where the entity's loss deductions (resulting from depreciation based on basis inflated above and beyond the taxpayer's true economic investment) can be passed through to the taxpayer. It is the pass-through of losses that makes artificial increases in equity interests of particular concern. See, *e.g.*, *Levy v. Commissioner*, 732 F.2d 1435, 1437 (9th Cir. 1984). We don't have to tread quite so lightly in the C Corp context, since a C Corp doesn't funnel losses to the shareholder.[16]

[16] Our holding therefore does not extend to the partnership or S Corp context.

We find further support for Peracchi's view by looking at the alternative: What would happen if the note had a zero basis? The IRS points out that the basis of the note in the hands of the corporation is the same as it was in the hands of the taxpayer. Accordingly, if the note has a zero basis for Peracchi, so too for NAC. See I.R.C. section 362(a).[17] But what happens if NAC - perhaps facing the threat of an involuntary petition for bankruptcy - turns around and sells Peracchi's note to a third party for its fair market value? According to the IRS's theory, NAC would take a carryover basis of zero in the note and would have to recognize $1,060,000 in phantom gain on the subsequent exchange, even though the note did not appreciate in value one bit. That can't be the right result.

[17] But see *Lessinger v. Commissioner*, 872 F.2d 519 (2d Cir. 1989). In *Lessinger*, the Second Circuit analyzed a similar transaction. It agreed with the IRS's (faulty) premise that the note had a zero basis in the taxpayer's hands. But then, brushing aside the language of section 362(a), the court concluded that the note had a basis in the Corporation's hands equal to its face value. The court held that this was enough to dispel any section 357(c) gain to the taxpayer, proving that two wrongs sometimes do add up to a right.

We agree with the IRS that *Lessinger*'s approach is untenable. Section 357(c) contemplates measuring basis of the property contributed in the hands of the taxpayer, not the corporation. Section 357 appears in the midst of the Code sections dealing with the effect of capital contributions on the shareholder; sections 361 et seq., on the other hand, deal with the effect on a corporation, and section 362 defines the basis of property contributed in the hands of the corporation. Because we hold that the note has a face value basis to the shareholder for purposes of section 357(c), however, we reach the same result as *Lessinger*.

Accordingly, we hold that Peracchi has a basis of $1,060,000 in the note he wrote to NAC. The aggregate basis exceeds the liabilities of the properties transferred to NAC under section 351, and Peracchi need not recognize any section 357(c) gain.

[3547] If the note is not bona fide, it will not create basis in the issuing taxpayer. See, *e.g.*, *Owen v. U.S.*, 34 F.Supp.2d 1071 (D. Tenn. 1998) (cash basis taxpayer did not receive basis in land improvements until note repaid; court expressed concern of cash basis taxpayer getting deductions before paying cash but court expressed skepticism about whether notes would be paid).

[3548] *Alderman v. Commissioner*, 55 T.C. 662 (1971), and later Tax Court decisions cited in fns 3545 and 3546 (but reversed on appeal) followed Rev. Rul. 68-629. *Ernest S. Ryder & Associates, Inc. v. Commissioner*, T.C. Memo. 2021-88, commented;

Ryder relies on *Peracchi v. Commissioner*, 143 F.3d 487 (9th Cir. 1998), for his argument that he had sufficient basis in RLC. Peracchi did hold that a C corporation's shareholder can get basis in his shares with the contribution of a note, but it also made clear that this holding does not apply to S corporations. *Id.* at 494 n.16. We ourselves have made completely clear that a shareholder doesn't get basis in his S corporation's stock by giving it a note until and unless he advances funds on the note. See *Perry v. Commissioner*, 54 T.C. 1293, 1295-96 (1970), *aff'd without published opinion*, 27 A.F.T.R.2d 71-1464 (8th Cir. 1971); see also *Underwood v. Commissioner*, 63 T.C. 468, 477 (1975), *aff'd*, 535 F.2d 309 (5th Cir. 1976); *Oren*, T.C. Memo. 2002-172.

Liabilities that would give rise to a deduction when paid are ignored.[3549] Thus, if a partnership interest is contributed to a corporation, accrued expenses allocated to the corporation would be ignored as liabilities, but only if the partnership uses the cash receipts and disbursements for income tax accounting. However, gain is fully recognized if the transaction's principal purpose is to avoid federal income tax.

II.M.2.c. Contribution of Partnership Interest to Corporation

Partnerships often incur liabilities, whether from money that the partnership borrows or liabilities the partnership incurs, such as accounts payable and accrued expenses. Contributing a partnership interest to a corporation often results in the corporation being allocated these liabilities[3550] and triggering gain to the extent that liabilities exceed basis.[3551]

Also, if the person contributing the partnership interest has losses suspended due to lack of basis[3552] or due to the passive loss[3553] or at-risk[3554] rules, consider whether the contribution might cause the suspended losses to be extinguished.[3555]

II.M.2.d. Contributing Installment Obligations

To the extent that a shareholder receives valuable stock for an installment obligation, gain is triggered.[3556]

II.M.2.e. Contributing Existing Business to a Corporation

The Official Tax Court Syllabus of *Complex Media, Inc. v. Commissioner*, T.C. Memo. 2021-14, describes the case:

> P, a corporation, acquired the assets of a business previously conducted by partnership PS. In exchange for the transferred assets, P issued 4,999,000 shares of its common stock. Immediately thereafter, in accordance with a prior obligation, P redeemed 1,875,000 of the common shares held by PS in exchange for $2.7 million in cash and P's obligation to make an additional payment of $300,000 a little over a year later. PS paid the cash and assigned its right to the additional payment to SG, one of its partners, in redemption of SG's interest in PS. P claimed an increased basis of $3 million in intangible assets it acquired from PS and amortized that additional basis under I.R.C. sec. 197(a). R disallowed P's claimed amortization deductions.

> entitle the taxpayer to the desired tax treatment. *Commissioner v. Nat'l Alfalfa Dehydrating & Milling Co.*, 417 U.S. 134 (1974).
>
> *Held*, further, because any tax planning involved in structuring the transactions in issue was focused on insulating PS' continuing partners from the consequences of the redemption of SG's interest and not on the achievement of a tax benefit inconsistent with allowing P increased bases in the assets it acquired from PS, P is not precluded from seeking to disavow the form of its transactions.
>
> *Held*, further, P's issuance and immediate redemption of 1,875,000 common shares had no economic substance and thus are disregarded under the step transaction doctrine, with the cash and deferred payment right treated as additional consideration for the assets P acquired from PS.
>
> *Held*, further, accepting the parties' agreement that I.R.C. sec. 351 applied to PS' transfer of assets to P, PS recognized gain in the transaction, as recharacterized, to the extent of the $2.7 million cash it received and the fair market value of its right to the additional $300,000 payment. See I.R.C. sec. 351(b). PS' recognized gain increases P's bases in the transferred assets. See I.R.C. sec. 362(a).
>
> *Held*, further, when assets transferred in an I.R.C. sec. 351 exchange with taxable "boot" constitute a trade or business, the residual method of allocation prescribed by I.R.C. sec. 1060 can appropriately be used to allocate the boot among the transferred assets. Consequently, PS' gain in amortizable section 197 intangibles, and the corresponding increase in asset bases allowed to P, is determined by subtracting from the agreed total asset value the estimated values of those assets other than amortizable section 197 intangibles.

As described in part II.G.33 Taxpayer Disavowing Form, *Complex Media* discussed the conditions under which the taxpayer can apply substance over form. The court then applied the test and concluded:

> To sum up, in considering whether to allow petitioner to disavow the form of its transactions and treat the cash and deferred payment right as boot in the section 351 exchange, we ask why the parties did not adopt that transactional form to begin with. And the parties had an obvious nontax reason for structuring the transactions as they did: Petitioner could not have paid CMH $2.7 million in cash in exchange for the assets it received from CMH because it did not have any cash until after the exchange. When petitioner acquired the assets of the transferred business, it simultaneously acquired all of the stock of OnNetworks and thus gained access to OnNetworks' remaining cash. Only then did petitioner have the wherewithal to pay CMH the cash Mr. Gerszberg apparently demanded for the redemption of his partnership interest.
>
> Achievement of the parties' business objective did not require forgoing a corporate-level step-up in basis. Petitioner could have acquired the assets of the transferred business in exchange for 3,124,000 shares of its common stock and a $3 million note. The terms of the note could have called for repayment of $2.7 million before the close of business on November 25, 2009, and payment of the remaining balance of $300,000 on January 3, 2011. Immediately after the closing of the CM & JV Agreement, petitioner could have obtained $2.7 million in cash from OnNetworks (as it, in fact, did) and used the cash to make the initial payment on the note. In that event, CMH would have

recognized its realized gain to the extent of the value of the nonstock consideration (*i.e.*, $2.7 million plus the present value of the $300,000 deferred payment), and petitioner would have been entitled to a corresponding step-up in the bases of the transferred assets.

The parties' failure to pursue a structure along those lines suggests that the prospect of a step-up in corporate asset basis was an afterthought - perhaps arising only when petitioner's accountants began preparing its 2010 return. To the extent the structuring of the transactions involved tax planning, that planning seems to have been focused on insulating CMH's continuing partners from any adverse tax consequences from the redemption of Mr. Gerszberg's interest. The circumstances give us no reason to think that the goals of the tax planning encompassed achievement of a tax benefit to any party that would be inconsistent with allowing petitioner a step-up in the bases of the assets it acquired from CMH. We therefore conclude that petitioner should be allowed to invoke the substance-over-form doctrine. Having determined that petitioner is not foreclosed from invoking that doctrine, we next consider whether its application justifies the recharacterization of the transaction that petitioner seeks.

III. Application of Step Transaction Doctrine

The question of the consequences of applying the step transaction doctrine is more easily answered than that of petitioner's right to invoke the doctrine. We have no doubt that, when applied, the doctrine requires us to disregard the issuance and immediate redemption of 1,875,000 shares of petitioner's common stock. The issuance of stock subject to an obligation that it be immediately redeemed has no economic substance. If CMH or any other party had sought a tax benefit from respecting the separate steps of the issuance and immediate redemption of those shares, we have no doubt that respondent would promptly invoke the step transaction doctrine to collapse those steps, and we would likely have upheld respondent's position. Because petitioner has met the burden it must meet for applying the doctrine in its favor, the same result should obtain. Much ink has been spilled on the question of how proximate various steps must be, in time or intention, for them to be combined under the step transaction doctrine. See, *e.g.*, *Andantech L.L.C. v. Commissioner*, T.C. Memo. 2002-97, 2002 WL 531143, at *26-*29 (describing "three alternative tests" courts have applied "in deciding whether the step transaction doctrine should be invoked in a particular situation"), *aff'd in part and remanded*, 331 F.3d 972 (D.C. Cir. 2003). But the present cases do not require us to limit the doctrine's ultimate bounds. If the step transaction doctrine has any potency, it necessarily applies to combine a first step that occurs when a preexisting obligation requires the immediate execution of a second step that undoes the first. In *Glacier State Elec. Supply Co. v. Commissioner*, 80 T.C. at 1057-1058, we rejected the taxpayer's step transaction argument because, as we explained: "[The taxpayer] is not asking us to skip, collapse, or rearrange the steps … [it] employed. … [It] is instead asking that we accept an entirely new series of steps or events that did not take place. The step transaction doctrine cannot be stretched so far."[22] In the present cases, by contrast, petitioner asks only that we collapse two offsetting steps. It is not asking that we invent new steps, or "synthesize" a transaction that did not, in fact, occur. *Cf*. *Estate of Durkin v. Commissioner*, 99 T.C. at 577. It is not even asking to rearrange steps actually taken. The step transaction doctrine has more than enough elasticity to disregard the issuance and immediate redemption of 1,875,000 shares of petitioner's common stock. Therefore, by application of that doctrine, we conclude that petitioner should be treated as having acquired the assets of the transferred business in exchange for 3,124,000 shares of its common stock, $2.7 million in cash, and an obligation to make an additional payment of $300,000 on January 3, 2011.

[22] The transactions at issue in Glacier State Elec. Supply involved two corporations that were owned by three individuals: Parsons, Reardon, and Pyle. All three individuals owned stock of the taxpayer corporation. The taxpayer owned two-thirds of the stock of a subsidiary, GSB. One of its shareholders (Pyle) owned the remaining one-third of GSB directly. Upon Parsons' death, the taxpayer was obligated to redeem the stock held by his estate. To raise the necessary funds, the taxpayer caused GSB to redeem some of the stock the taxpayer held. The Commissioner claimed that the redemption of the taxpayer's GSB stock resulted in capital gain. The taxpayer argued that it should be treated as if it had distributed the redeemed GSB stock to Parsons' estate, with GSB then treated as having redeemed the stock from the estate. (Under that recast, the taxpayer's distribution of GSB stock would have been entitled to nonrecognition treatment under the law then in effect.)

The court then reviewed the principles for allocating basis to the boot that triggered gain recognition:

IV. Petitioner's Bases in the Amortizable Section 197 Intangibles Acquired From CMH

A. Introduction

In the transaction, as recharacterized, CMH was required to recognize any gain it realized from the exchange of the transferred business assets for common stock in petitioner, cash, and the deferred payment right. See sec. 351(b)(1). CMH's recognized gain, however, was limited to the $2.7 million cash it received at closing and the fair market value of its right to receive an additional $300,000 a little over a year later. See *id*. Any gain recognized to CMH increased petitioner's bases in the assets above the carryover bases with which the corporation would otherwise have received those assets. See sec. 362(a).

Respondent claims that "[s]ection 362(a) … requires that petitioner's basis in the property received is the same as that in the hands of the transferor" because "neither CMI nor … [CMH] reported any gain in the transaction." CMH's failure to report the gain, however, did not affect petitioner's bases in the assets. By its plain terms, section 362(a) allows the transferee corporation in a section 351 exchange to increase its bases in transferred assets by "the amount of gain recognized to the transferor", without regard to whether the transferor reports that recognized gain.[23]

[23] Conversely, when the transferor in a tax-free sec. 351 exchange erroneously reports gain, the transferee corporation is not entitled to increase its bases in the transferred assets beyond their bases in the hands of the transferor. See *Truck Terminals, Inc. v. Commissioner*, 33 T.C. 876, 888 (1960), *aff'd in part, rev'd in part and remanded*, 314 F.2d 449 (9th Cir. 1963); *Gooding Amusement Co. v. Commissioner*, 23 T.C. 408, 423-424 (1954), *aff'd*, 236 F.2d 159 (6th Cir. 1956).

Because the character of any gain recognized in a section 351 exchange may differ depending on the nature of the transferred assets, a transferor who receives taxable boot in addition to stock of the transferee corporation must determine gain on an asset-by-asset basis. See *Easson v. Commissioner*, 33 T.C. 963, 975 (1960), *rev'd*, 294 F.2d 653 (9th Cir. 1961); *see also* Rev. Rul. 68-55, 1968-1 C.B. 140. The transferee corporation's basis in each asset equals the transferor's basis in the asset increased by the gain recognized by the transferor in the exchange of that asset for stock and boot. *Easson v. Commissioner*, 33 T.C. at 975. In determining the amount of recognized gain from the exchange of each asset, the Service held in Rev. Rul. 68-55, *supra*, that cash or other taxable boot should be allocated among the various assets in proportion to their relative fair market values. The transferor then must recognize gain in respect of each asset equal to the lesser of that asset's realized gain or the value of the boot allocable to the asset.

Petitioner seems to accept that, in computing the step-up in the bases of the assets of the transferred business, the value of the cash and the deferred payment right treated as boot under the step transaction recast should be allocated among those assets in proportion to their relative fair market values as prescribed by Rev. Rul. 68-55, *supra*. Respondent disputes application of that ruling not because he believes we should use a different method of allocating boot but instead because he insists that, given that "no party recognized any 'boot' or gain on the merger/reorganization transaction at issue[,] petitioner is not entitled to a step-up in basis under the provisions of section[] 351 or 362 of the Internal Revenue Code." In any event, we would look with disfavor on any effort by respondent to take a position contrary to one of his own revenue rulings. See, *e.g.*, *Rauenhorst v. Commissioner*, 119 T.C. 157, 171 (2002) (rejecting the proposition "that the Commissioner is not bound to follow his revenue rulings in Tax Court proceedings").

In *Easson*, we employed an approach to the allocation of gain recognized in a section 351 exchange that differed from that later adopted by Rev. Rul. 68-55, *supra*. *Easson* involved a taxpayer's transfer to a corporation of land and a building subject to a mortgage the exceeded the property's basis. The transaction occurred in a year governed by the Internal Revenue Code of 1939 and thus was not subject to section 357(c) of the 1954 Code, which (like the corresponding provision in the 1986 Code) required a transferor shareholder in a section 351 exchange to recognize gain to the extent that liabilities encumbering the transferred property exceed that property's basis. We viewed Congress' enactment of section 357(c) as "clarify[ing] existing law rather than … amend[ing] it", *Easson v. Commissioner*, 33 T.C. at 971, and required the shareholder to recognize gain equal to the excess of the liabilities that encumbered the transferred property over its basis. Because gain attributable to the building would have been ordinary income while gain attributable to the land would have been capital gain, we had to apportion the shareholder's recognized gain between those two assets. We did so not on the basis of their proportionate values but instead in proportion to the shareholder's realized gain in each asset. *Id*. at 975. After our decision in *Easson*, the Department of the Treasury issued regulations under section 357(c) that require gain recognized under that section to be apportioned among transferred assets in proportion to their relative values, as Rev. Rul. 68-55, *supra*, requires for the apportionment of gain attributable to taxable boot. See sec. 1.357-2(b), Income Tax Regs. Therefore, even leaving aside the reversal of our decision in Easson by the Court of Appeals for the Ninth Circuit, our Opinion in that case has little or no precedential value concerning the determination of gain attributable to specific transferred assets as a result of a shareholder's receipt of boot in a section 351 exchange.

Regardless of how we allocate boot among the transferred assets, petitioner is not entitled to the full $3 million step-up in the bases of amortizable section 197 intangibles that it claimed as a result of the exchange in which it acquired those assets. To begin with, the gain CMH was required to recognize under section 351(b) was necessarily less than $3 million: Given the time value of money, the partnership's right to receive $300,000 in a little over a year was not worth the full $300,000 future payment. See sec. 351(b)(1) (limiting amount of gain recognized to "(A) the amount of money received, plus (B) the fair market value of … other property received"). In addition, the allocation of part of the cash and the value of the deferred payment right to assets other than amortizable section 197 intangibles would reduce the gain recognized from CMH's transfer of amortizable section 197 intangibles and thus the resulting step-up in the bases of those assets.

B. Petitioner's Invocation of the Cohan Rule

Petitioner conceded (only after our request for supplemental briefs) that its accountants' "post-closing reporting of the step-up in the basis of the intangibles contributed to CMI in the CMJVA for the 'boot' left much to be desired". Petitioner now acknowledges that the accountants "did not allocate the … step up among the CMH contributed assets as required by Rev. Rul. 68-55 nor did … [they] take into consideration the potential decrease in the value of the $300,000 note" to reflect the time value of money. Petitioner also admits that "an appraisal of the transferred assets was not obtained at the time of the transaction", hindering our ability to allocate boot among the assets of the transferred business on the basis of their relative fair market values. Nonetheless, petitioner urges us to apply the "principle" established in *Cohan v. Commissioner*, 39 F.2d 540, 543-544 (2d Cir. 1930), and "make an estimate of the proper amortizable step-up in basis for the contributed assets resulting from the 'boot' payment".

The *Cohan* rule "allows us to estimate the amounts of allowable deductions when there is evidence that the taxpayer incurred deductible expenditures." *Ashkouri v. Commissioner*, T.C. Memo. 2019-95, at *31. "To do so, however, we must have some basis on which to make an estimate." *Id*. (citing *Vanicek v. Commissioner*, 85 T.C. 731, 742-743 (1985)).

Although *Cohan* itself involved a Broadway producer's claimed deductions for travel and entertainment expenses, we have applied the principle of that case in other contexts. In particular, we have relied on Cohan to estimate a taxpayer's basis in property. See, *e.g.*, *Huzella v. Commissioner*, T.C. Memo. 2017-210, at *7-*9.

In directing our predecessor, the Board of Tax Appeals, to estimate the deductible expenses incurred by the taxpayer in *Cohan v. Commissioner*, 39 F.2d at 544, the Court of Appeals for the Second Circuit allowed the Board to "bear[] heavily … upon the taxpayer whose inexactitude is of his own making." Petitioner, however, disclaims responsibility for the inadequacy of the record in the present cases. On the premise that it "was in no way at fault for the absence of a complete record", petitioner contends that the estimated allocation of basis it seeks "should not in any way be reduced or limited". Petitioner claims that, before we raised the question of the value of the deferred payment right and the allocation of any step-up in basis between amortizable and nonamortizable assets in a conference call held after the parties had submitted two rounds of briefs, "Respondent never disputed or raised any question regarding the numerical reporting by … [petitioner's accountants] either at the audit level or thereafter". In petitioner's characterization, "[t]he only position advanced by the Respondent was that there was no 'boot' received by party [sic] to the IRC § 351 transaction because the

CMJVA and the Stock Repurchase Agreement between CMI and CMH … were separate transactions.” Petitioner’s understanding of respondent’s position influenced its decisions regarding the evidence it sought to present. As petitioner explains:

> Because no question had been raised about whether the assets received were qualified intangibles or how any step up in basis should be allocated among the assets contributed by CMH, the Petitioner’s trial presentation (and the Stipulation of Facts prepared in anticipation of the trial) did not address these questions and only focused on showing that the buyout of Gerszberg was an integral and essential step in closing the CMJVA and thus establishing that the $3,000,000 paid by CMI to enable CMH to redeem Gerszberg’s interest was “boot” because it was paid by CMI to CMH as part of the consideration for CMH’s contributed assets.

Petitioner contends that “the correct amortizable step up is $2,913,652.34 rather than the $3,000,000 … [its accountants] reported.” Petitioner determined the present value of the deferred payment right by applying the applicable Federal rate (AFR) in effect for November 2009 of 0.71%, see Rev. Rul. 2009-35, 2009-44 I.R.B. 568, 569, to arrive at a present value of $297,656. Petitioner reasons that, because “the note was due, … only 13 months after the closing,” and on the premise that it was “actually paid” (as Mr. Gerszberg’s tax reporting indicates), “the note should not be subject to any valuation discount for the creditworthiness of the debtor”. Petitioner thus values the taxable boot that CMH received in the section 351 exchange at $2,997,656 ($2,700,000 + $297,656). On the premise that the shares it issued in exchange for the transferred assets and did not immediately redeem had a value of $5 million, petitioner assigns a total value to the assets of $7,997,656 ($5,000,000 + $2,997,656).[24] Next, petitioner assigns values to those assets that it acquired from CMH that it accepts were not amortizable section 197 intangibles—prepaid expenses and fixed assets. In each case, petitioner values those assets at their book values of $224,119 and $803, respectively. Petitioner thus concludes that the amortizable section 197 intangibles it received from CMH were worth $7,772,734 ($7,997,656 total value less the $224,119 value assigned to prepaid expenses and the $803 value assigned to fixed assets). Consequently, petitioner allocates $2,913,351 of the boot to amortizable section 197 intangibles ($2,997,656 × ($7,772,734 ÷ $7,997,656)). (We are unable to identify the approximately $300 discrepancy between the $2,913,652 amortizable step-up that petitioner claims and the $2,913,351 figure resulting from its detailed calculations.)

[24] Petitioner’s analysis seems to rest on the premise that CMH was entitled to receive 5 million of its common shares in exchange for the assets of the transferred business. If that were correct, and those assets had an aggregate value of $8 million, each common share would have been worth $1.60 ($8,000,000 ÷ 5,000,000), and the 3,125,000 shares that CMH retained after the redemption would have been worth $5 million (3,125,000 × $1.60). But CMH received only 4,999,000 of petitioner’s common shares in exchange for the transferred assets. In pricing the transactions in issue, the parties seem to have disregarded the 1,000 shares of petitioner’s common stock outstanding before execution of the CM & JV Agreement, as well as the prospect that the $300,000 deferred payment included imputed interest. Consequently, the per-share prices implied by the asset transfer and the redemption that immediately followed were different—the first being slightly above $1.60 and the second slightly below that amount.

The court then reviewed the taxpayer's use of the residual method of allocating basis:

> Petitioner's basic approach of assigning to section 197 intangibles any portion of the total asset value not attributable to identifiable other assets is consistent with the "residual method" of valuation that section 1060 mandates in allocating the purchase price paid in a taxable purchase and sale of a business. See sec. 1.1060-1(a)(1), Income Tax Regs. Under that approach, the assets in each of seven classes are assigned, in succession, a portion of the purchase price equal to their fair market value. See id.; sec. 1.338-6(b), Income Tax Regs. Any value not attributable to assets in the first five classes is assigned to section 197 intangibles. Sec. 1.338-6(b), Income Tax Regs. (providing that Class VII consists of goodwill and going-concern value; all other section 197 intangibles make up Class VI).
>
> By its terms, section 1060 applies to "applicable asset acquisitions[s]." Section 1060(c) defines "applicable asset acquisition" to mean "any transfer … (1) of assets which constitute a trade or business, and (2) with respect to which the transferee's basis in such assets is determined wholly by reference to the consideration paid for such assets." Despite that statutory definition, section 1.1060-1(b)(8), Income Tax Regs., provides: "A transfer may constitute an applicable asset acquisition notwithstanding the fact that no gain or loss is recognized with respect to a portion of the group of assets transferred."
>
> Regardless of whether the residual method of allocation directly applies to the transaction in which petitioner acquired the assets of the transferred business, we find the principles underlying that method useful at least by analogy. The rules serve to prevent the purchaser of a business from assigning to assets eligible for shorter cost recovery periods values that are economically attributable to goodwill or going-concern value.[26] See S. Rept. No. 99-313, at 253-254 (1986), 1986-3 C.B. (Vol. 3) 253-254. Although petitioner did not attempt to allocate any portion of its claimed step-up in asset basis to the fixed assets it acquired from CMH, other taxpayers who acquire the assets of a business in a section 351 exchange with boot might attempt to overstate the portion of the step-up in basis allowed to assets with recovery periods shorter than 15 years. Therefore, when the assets transferred in a partially taxable section 351 exchange constitute a trade or business, the allocation of the basis step-up allowed by section 362(a) implicates the concerns that led Congress to mandate the residual method of allocation in section 1060.[27] Consequently, in allocating the boot petitioner paid in the section 351 exchange among the assets it received in that exchange, we will assign to goodwill and other section 197 intangibles any excess of the $8 million agreed total value of the transferred assets over the estimated value of specifically identifiable assets that do not qualify as section 197 intangibles.[28]
>
> [26] When Congress mandated the use of the residual method in purchase price allocations with its enactment of sec. 1060 in 1986, it had not yet enacted sec. 197. Therefore, goodwill, going-concern value, and similar intangible assets were not then amortizable. It remains the case, however, that the recovery periods allowed for the costs of many tangible assets used in a business are shorter than the 15-year amortization period allowed for sec. 197 intangibles. See sec. 168(c).
>
> [27] The principles of the residual method do not conflict with the holding of Rev. Rul. 68-55, 1968-1 C.B. 140. That ruling concludes that gain recognized in a sec. 351 exchange with boot must be computed on an asset-by-asset basis and that, in making that calculation, "the fair market value of each category of consideration received must

be separately allocated to the transferred assets in proportion to the[ir] relative fair market values". *Id*., 1968-1 C.B. at 141. The ruling does not prescribe the specific mechanics to be employed in determining the relative fair market values of the transferred assets. When those assets constitute an entire trade or business, the residual method can appropriately be applied in making that determination.

[27] The circumstances of the present cases do not require us to distinguish between goodwill and going-concern value and other section 197 intangibles. That distinction can be relevant when the character of the seller's gain is at issue. Any gain attributable to goodwill and going-concern value would be capital gain. See sec. 1221(a). By contrast, value attributable to a covenant not to compete would be ordinary income. See *Ullman v. Commissioner*, 264 F.2d 305, 307 (2d Cir. 1959) ("It is well established that an amount a purchaser pays to a seller for a covenant not to compete in connection with a sale of a business is ordinary income to the covenantor[.]"),*aff'g* 29 T.C. 129 (1957). From a purchaser's perspective, however, any basis attributable to goodwill and going-concern value would be treated in the same manner as basis attributable to other amortizable section 197 intangibles. Sec. 197 allows the purchaser to amortize the basis of each of those assets over 15 years. Therefore, for purposes of the cases before us, in which the character of CMH's gain is not in issue, we can treat all section 197 intangibles as a single residual class.

When valuing a deferred payment right, the court rejected the AFR and adopted the IRS underpayment rate:

> We believe it more appropriate, under the circumstances, to value the deferred payment right by discounting it at the underpayment rate established under section 6621(a)(2) - that is, the Federal short-term rate plus 3 percentage points. Congress adopted that rate to avoid giving taxpayers an incentive "to delay paying taxes as long as possible". S. Rept. No. 99-313, at 184 (1986), 1986-3 C.B. (Vol. 3) 184. The underpayment rate is thus intended to be no less than the rate at which taxpayers could borrow money from other sources.

Subject to the caveat that the taxpayer's recordkeeping caused the court to assume the worst, the court allocated basis to prepaid expenses, furniture and fixtures, and software:

> We see no basis in the record for valuing the prepaid expenses that petitioner acquired from CMH at other than their book value of $224,119, but we disagree with petitioner that it was "logical[]" to "assume[] … that the book value of CMH's contributed furniture and fixtures … was, at best, its fair market value on the date of contribution". That assumption would treat as worthless most of the fixed assets that petitioner claims to have received from CMH…
>
> We find it implausible that most of the items of furniture and fixtures, machinery and equipment, and computer equipment that petitioner professes to have received from CMH had no value whatsoever. If those assets were worth the bother of transferring, and petitioner continued to use them in the conduct of the transferred business, they must have had some value. Bearing against petitioner, we will assume that those assets were worth their original cost of $132,993.
>
> As we understand petitioner, its position in regard to the items of computer software included among the 17 items referred to above is not that the software was worthless

when CMH transferred it to petitioner but instead that the items of software qualified as amortizable section 197 intangibles. Therefore, whatever value that software had was, in petitioner's view, appropriately included in the residual value it assigned to amortizable intangibles.

Section 197(e)(3)(A) excludes from the definition of "section 197 intangible" "[a]ny - (i) computer software which is readily available for purchase by the general public, is subject to a nonexclusive license, and has not been substantially modified, and (ii) other computer software which is not acquired in a transaction (or series of related transactions) involving the acquisition of assets constituting a trade or business or substantial portion thereof." The cost of software that is not covered by section 197 can be amortized over three years if the software has an ascertainable useful life. Sec. 167(f)(1)(A); secs. 1.167(a)-3, 1.167(a)-14(b)(1), Income Tax Regs.

Petitioner would apparently explain CMH's amortization over three years of the cost of the commonly reported software on the ground that the partnership did not acquire the software as part of its acquisition of a trade or business. Because petitioner did acquire the items of software as part of its acquisition of the transferred business, those items would be covered by section 197 if they were custom-developed for CMH and had not been available "off the shelf". Petitioner suggests that "the original cost of $26,036 for those three items acquired more than seven years before the instant transaction makes it unlikely that they are the type of off-the-shelf software which would be excluded from being an amortizable section 197 intangible." It is not obvious, however, how the software's age has any bearing on whether it was custom developed or whether, instead, CMH purchased it off the shelf. It might be that, the higher the cost of software, the more likely that software would be to have been custom developed. Therefore, petitioner may be suggesting that off-the-shelf software is unlikely to cost $26,036. But that amount is the aggregate cost of three items whose separate costs ranged from $7,784 to $9,690. We are unwilling to infer from the costs of those items alone that they were custom developed and thus not excluded by section 197(e)(3)(A) from the definition of section 197 intangibles. Therefore, bearing against petitioner, we will treat the items of software as covered by the section 197(e)(3)(A) exclusion so that any step-up in the bases of those assets is not eligible for amortization under section 197(a). That CMH had apparently amortized in full its cost of the software does not establish that it had no value. As with the furniture and fixtures, machinery and equipment, and computer equipment, we will assume that the three items of computer software that petitioner professes to have acquired from CMH had a value, on November 25, 2009, equal to their original cost of $26,036.

6. Additional Amortization Attributable to Increased Bases in Amortizable Section 197 Intangibles

Relying on the principles of the residual method, we will assign to section 197 intangibles the excess of the $8 million agreed value of the assets of the transferred business over the value we have assigned to prepaid expenses, furniture and fixtures, machinery and equipment, and computer equipment and software. Moreover, for the reasons explained below, we will treat all of the section 197 intangibles as amortizable section 197 intangibles.

Under section 197(c), a section 197 intangible qualifies as an amortizable section 197 intangible if the taxpayer acquired it after Congress' enactment of section 197, holds the asset in connection with a trade or business or other income-producing activity, and (in the case of assets other than governmental permits, covenants not to compete, franchises, trademarks, or trade names) did not create the asset. Petitioner acquired the assets of the transferred business in November 2009 - well after the 1993 enactment of section 197. It follows from respondent's allowance of petitioner's amortization of its carryover bases in section 197 intangibles that petitioner used those assets during the years in issue in a trade or business or other income-producing activity. Finally, even if CMH created some of the section 197 intangibles it transferred to petitioner, those assets were not self-created intangibles in petitioner's hands.

We find no evidence in the record that any of the intangible assets that petitioner acquired from CMH were ineligible for amortization under section 197. Our request for supplemental briefs gave respondent the opportunity to identify any such assets, and he declined to avail himself of that opportunity. Rather than provide us with his own estimate of the portion of any allowed step-up in basis allocable to amortizable section 197 intangibles, respondent simply maintained his puzzling insistence that CMH did not transfer any intangible assets to petitioner and his contention - contrary to the premise of our questions - that petitioner is not entitled to any step-up in basis because the cash and deferred payment right could not be treated as taxable boot in the section 351 exchange.

Treating amortizable section 197 intangibles as a single "catchall" asset category under the principles of the residual method, we value those assets at $7,616,852 ($8,000,000 agreed total asset value less the $224,119 value assigned to prepaid expenses, the $132,993 value assigned to fixed assets, and the $26,036 value assigned to computer software). Because the amortizable section 197 intangibles were worth 95.21% of the total asset value ($7,616,852 ÷ $8,000,000), we will assign to those assets the same percentage of the boot CMH received in the recharacterized section 351 exchange. Therefore, we treat $2,845,063 of the boot as allocable to amortizable section 197 intangibles ($2,988,198 total value of boot × .9521).

Under the approach adopted in Rev. Rul. 68-55, supra, CMH is treated as transferring each asset of the transferred business for the same mix of consideration, 37.4% boot ($2,988,198 ÷ $8,000,000) and 62.6% stock (1 − .374). [*102] CMH's recognized gain in each asset was the lesser of realized gain or allocable boot. Thus, the boot allocable to an asset would not be treated as a return of capital unless its basis exceeded 62.6% of its value. We will leave aside the possibility of basis recovery, even though doing so favors petitioner. We view as quite unlikely the prospect that CMH's basis in any section 197 intangible included among the transferred business assets exceeded 62.6% of the asset's value. Moreover, the carryover basis in section 197 intangibles is small enough that, even if we were to assume maximum basis recovery, it would have an immaterial effect on the amount of amortization allowed to petitioner. Therefore, we will treat CMH as having recognized gain in amortizable section 197 intangibles equal to the full $2,845,063 of boot allocable to those assets and allow petitioner a corresponding increase to the bases of those assets. We thus conclude that petitioner is allowed amortization deductions for each of the years in issue in respect of amortizable section 197 intangibles acquired from CMH of $194,479 ($4,808 + ($2,845,063 ÷ 15)).

concerns articulated in *Danielson* will not be present.

AOD 2023-2, 2023-11 I.R.B. 529, nonacquiesced in the decision:

> Issue 2:
>
> Nonacquiescence to the court's determination that the fair market value of a "Deferred Payment Right" (as described therein) for purposes of section 351(b)(1) is not equal to its issue price.

As to Issue 2, AOD 2023-2, 2023-11 I.R.B. 529, explained the IRS' view:[3557]

> Because the court ruled that Taxpayer could recast the transaction, Taxpayer is deemed to have received assets from Partnership in exchange for stock, $2.7 million of cash, and the Deferred Payment Right in a section 351 transaction.
>
> Section 1001(a) provides that gain from the sale or disposition of property shall be the excess of the amount realized over the adjusted basis. Section 1001(b) provides that the "amount realized from the sale or other disposition of property shall be the sum of any money received plus the fair market value of the property (other than money) received." Treas. Reg. § 1.1001-1(g) provides that "[i]f a debt instrument is issued in exchange for property, the amount realized attributable to the debt instrument is the issue price of the debt instrument as determined under § 1.1273-2 or § 1.1274-2." The regulations thus intend to treat the fair market value ("FMV") of a debt instrument as being the same as its issue price, at least in the context of a section 1001 sale or exchange. Furthermore, under Treas. Reg. § 1.1012-1(g), the issue price of a debt instrument issued in exchange for property is used to determine the buyer's basis in the property.
>
> If section 351(a) would apply to an exchange but for the fact that there is received, in addition to the property permitted to be received without recognition of gain, other property or money, then under section 351(b), gain (if any) to the recipient will be recognized, but in an amount not in excess of the sum of such money and the FMV of such other property received, and no loss to the recipient will be recognized. Section 362(a) provides that the transferee corporation's basis in the property acquired in a section 351 transaction is "the same as it would be in the hands of the transferor, increased in the amount of gain recognized to the transferor on such transfer." The amount of a transferor's realized gain on a section 351 transaction is determined under section 1001; however, the amount of gain that a transferor recognizes on a section 351 transaction is determined under section 351(b). There is no direct authority on how to determine the FMV of a debt instrument for purposes of section 351(b)(1).
>
> Based on Taxpayer's credit risk, the court determined that the FMV of the Deferred Payment Right was $288,198 (i.e., $300,000 discounted by the Federal short-term rate plus 3 percentage points (3.71%) over 13 months). Thus, the court determined that Partnership had recognized gain of $2,988,198 on the transaction under section 351(b)(1), and Taxpayer was entitled to increase its basis in the acquired assets by $2,988,198 under section 362(a). Furthermore, the court ruled that Taxpayer would be entitled to section 197 amortization deductions to the extent that the recognized gain was allocated to section 197 intangibles. The court, however, did not address how Taxpayer should account for the $11,802 difference between the $288,198 FMV of the

[3557] For Issue 1 and more details on how the AOD described the case, see text accompanying fn 1972 in part II.G.33 Taxpayer Disavowing Form.

> Deferred Payment Right (as determined by the court) and the $300,000 payment due in 13 months.
>
> The Service's position is that the FMV of the Deferred Payment Right for purposes of section 351(b)(1) is equal to the issue price of the Deferred Payment Right. Because the Deferred Payment Right was not publicly traded and was deemed under the court's opinion to be issued in exchange for non-publicly traded property and because the Deferred Payment Right did not have adequate stated interest, the issue price of the Deferred Payment Right is $297,656 (i.e., the present value of $300,000 discounted over 13 months by the Federal short-term rate for November 2009 of 0.71%). See sections 1274(a)(2), (b), (c)(1) and (2). Had the court determined that the FMV of the Deferred Payment Right was equal to $297,656 (as argued by Taxpayer on supplemental brief with no objection by the Service), the results are clear. First, Partnership would have taken $297,656 into account in computing its recognized gain under section 351(b)(1). In addition, Taxpayer would have taken $297,656 into account when increasing its basis in the acquired assets under section 362(a). Finally, the $2,344 difference between the $300,000 due in 13 months and the $297,656 issue price is original issue discount ("OID"), which generally would be taken into account by the holder of the Deferred Payment Right as interest income and by Taxpayer as interest expense over the 13-month term of the Deferred Payment Right. See sections 163(e)(1), 1272(a)(1), and 1273(a)(1) and (2); Treas. Reg. §§ 1.163-7(a) and 1.1272-1. Treating the issue price of the Deferred Payment Right as its FMV for purposes of section 351(b)(1) allows the parties to properly account for the full $300,000 Deferred Payment Right (in the case of Taxpayer, either as an increase to the basis of the acquired assets or as an OID deduction).
>
> The court's determination that the FMV of the Deferred Payment Right is $288,198, which is less than its issue price of $297,656, leaves a gap in accounting for the $9,458 difference between the FMV of the debt instrument and its issue price, the treatment of which is unclear under current law. Treating the issue price of a debt instrument as its FMV for purposes of section 351(b)(1) allows the tax treatment of the parties to the section 351 transaction to mirror a seller's amount realized and a purchaser's basis in a fully taxable exchange involving a debt instrument, each of which is determined by reference to the debt instrument's issue price. See Treas. Reg. §§ 1.1001-1(g) and 1.1012-1(g).
>
> Accordingly, the Service will not follow *Complex Media* in determining the FMV of a debt instrument for purposes of section 351(b)(1).

Above the IRS asserts that it would have easily won on appeal, but it does not explain why it failed to appeal – how disingenuous!

II.M.3. Buying into or Forming a Partnership

Reporting requirements include parts II.M.3.h Reporting Real Estate Contributed to a Partnership or Corporation in a Nontaxable Transaction and II.M.3.i All Partners (Members) Should Sign Form W-9, etc. on Formation or Later Admission.

See also part II.P.3.f Conversions from Partnership to Sole Proprietorships and Vice Versa.

The rules in this part II.M.3 make tax-free formation much more available than the tax-free formation of a corporation under part II.M.2 Buying into or Forming a Corporation. However, that flexibility comes at the cost of complexity regarding allocation of built-in gain or loss (and depreciation or amortization) with respect to assets contributed to the partnership or built-in gain or loss on partnership assets when new partners join the partnership; see part II.P.1.a.i Allocations of Income in Partnerships.

II.M.3.a. General Rule: No Gain Or Loss on Contribution to Partnership

Subject to exceptions,[3558] when a partner contributes property (other than items constituting income in respect of a decedent)[3559] to a partnership,[3560] the partner does not recognize any gain or loss inherent in the property at the time of contribution.[3561] The prior sentence generally holds true even if the contributed property is subject to debt,[3562] because debt is allocated to built-in gain, subject to anti-abuse rules.[3563] However, the transaction still needs to be reported; see part II.M.3.h Reporting Real Estate Contributed to a Partnership or Corporation in a Nontaxable Transaction. Reg. § 1.721-1(a) provides:

> No gain or loss shall be recognized either to the partnership or to any of its partners upon a contribution of property, including installment obligations, to the partnership in exchange for a partnership interest. This rule applies whether the contribution is made to a partnership in the process of formation or to a partnership which is already formed and operating. Section 721 shall not apply to a transaction between a partnership and a partner not acting in his capacity as a partner since such a transaction is governed by section 707. Rather than contributing property to a partnership, a partner may sell property to the partnership or may retain the ownership of property and allow the partnership to use it. In all cases, the substance of the transaction will govern, rather than its form. See paragraph (c)(3) of § 1.731-1, Thus, if the transfer of property by the partner to the partnership results in the receipt by the partner of money or other consideration, including a promissory obligation fixed in amount and time for payment, the transaction will be treated as a sale or exchange under section 707 rather than as a contribution under section 721. For the rules governing the treatment of liabilities to which contributed property is subject, see section 752 and § 1.752-1.

Even if an initial transfer qualifies as a Code § 721 contribution, later contributions might be characterized as something else, such as a sale when the partner does not intend to retain an economic interest in the contributed property over the long run. *Russian Recovery Fund, Ltd. v. U.S.*, 116 A.F.T.R.2d 2015-5582 (Ct. Fed. Cl. 2015). The court focused on strong evidence of

[3558] Various exceptions are included in the subsequent subparts of this part II.M.3 Buying into or Forming a Partnership. See also Willis & Postlewaite, ¶ 4.02[2] Exceptions to General Rule of Non-Recognition of Gain or Loss, *Partnership Taxation*.
[3559] See part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up, especially fns. 2088-2089.
[3560] See part II.C Partnership, especially part II.C.10 Whether Tenancy-in-Common or other Arrangement Constitutes a Partnership.
[3561] Code § 721(a). For the general lack of income recognition when a noncompensatory option to acquire a partnership interest is exercised, see Reg. § 1.721-2, adopted by T.D. 9612 (effective 2/5/2013). See also Abrams and Crnkovich, The Non-Tax Implications of The Taxation of Partnership Options, *TM Real Estate Journal* (BNA) (1/7/2015).
[3562] See fn 439 in part II.C.3.c.iii Allocating Nonrecourse (Remaining) Liabilities.
[3563] See part II.M.3.e Exception: Disguised Sale Rules.

actual intent rather than looking to the rules described in part II.M.3.e Exception: Disguised Sale. Instead, it relied on the economic substance test:

> The Court of Appeals for the Federal Circuit in *Coltec Industries, Inc. v. United States*, explained the rationale behind the economic substance test:
>
> > The economic substance doctrine represents a judicial effort to enforce the statutory purpose of the tax code. From its inception, the economic substance doctrine has been used to prevent taxpayers from subverting the legislative purpose of the tax code by engaging in transactions that are fictitious or lack economic reality simply to reap a tax benefit. In this regard, the economic substance doctrine is not unlike other canons of construction that are employed in circumstances where the literal terms of a statute can undermine the ultimate purpose of the statute….
> >
> > The Supreme Court, various courts of appeals, and our predecessor court, have identified a number of different factors pertinent to the determination of whether a transaction lacks economic substance and thus should be disregarded for tax purposes. We understand the economic substance doctrine to incorporate the following principles.
> >
> > First, although the taxpayer has an unquestioned right to decrease or avoid his taxes by means which the law permits, the law does not permit the taxpayer to reap tax benefits from a transaction that lacks economic reality. This principle emerged early on in *Gregory*, where the Supreme Court disregarded intermediate transfers of stocks as falling outside the tax code because the transfers had no business or corporate purpose and performed no function other than to reduce taxes. 293 U.S. at 469....
> >
> > While the doctrine may well also apply if the taxpayer's sole subjective motivation is tax avoidance even if the transaction has economic substance, a lack of economic substance is sufficient to disqualify the transaction without proof that the taxpayer's sole motive is tax avoidance.
> >
> > Second, when the taxpayer claims a deduction, it is the taxpayer who bears the burden of proving that the transaction has economic substance. In describing the history of the economic substance doctrine, our predecessor court in *Rothschild* stated, *Gregory v. Helvering* requires that a taxpayer carry an unusually heavy burden when he attempts to demonstrate that Congress intended to give favorable tax treatment to the kind of transaction that would never occur absent the motive of tax avoidance. 407 F.2d at 411 (quoting *Diggs v. Comm'r of Internal Revenue*, 281 F.2d 326, 330 (2d Cir. 1960))....
> >
> > Third, the economic substance of a transaction must be viewed objectively rather than subjectively. The Supreme Court cases and our predecessor court's cases have repeatedly looked to the objective economic reality of the transaction in applying the economic substance doctrine. While the taxpayer's subjective motivation may be pertinent to the existence of a tax avoidance purpose, all courts have looked to the objective reality of the transaction [in] assessing its economic substance....

Fourth, the transaction to be analyzed is the one that gave rise to the alleged tax benefit.... [I]n economic substance cases, the focus is on the specific transaction whose tax consequences are in dispute, and the Second Circuit has stated that [t]he relevant inquiry is whether the transaction that generated the claimed deductions ... had economic substance, *Nicole Rose Corp. v. Comm'r of Internal Revenue*, 320 F.3d 282, 284 (2d Cir. 2003)....

Finally, arrangements with subsidiaries that do not affect the economic interest of independent third parties deserve particularly close scrutiny.

454 F.3d 1340, 1353-57 (Fed. Cir. 2006) (select citations omitted).

For more on the economic substance doctrine, see part II.G.17 Economic Substance Penalty and Doctrines, particularly the cases (including *Coltec*) cited at fn. 1651.

The *Russian Recovery* court also rebuffed the taxpayer's attempted reliance on Code § 704(e) [modified and partially renumbered as Code § 761(b) starting in 2016]:[3564]

Plaintiff makes no real effort to address the large body of case law which requires a look beyond these formalities. Instead, it relies heavily on IRC § 704(e)(1):

e) *Family partnerships*.—

(1) *Recognition of interest created by purchase or gift*.--A person shall be recognized as a partner for purposes of this subtitle if he owns a capital interest in a partnership in which capital is a material income-producing factor, whether or not such interest was derived by purchase or gift from any other person.

Plaintiff views this statutory provision as supporting an inquiry independent of the judicially created challenges to over-reliance on formalism. We disagree for two reasons. First, although admittedly there is some debate on the question, we believe that the provision, as its name suggests, is directed at preventing the IRS from undoing intra-familiar partnership transactions, something far afield from the Tiger-RRF transaction.[25] Second, even if the provision is of broader application, there is no reason to think Congress intended to insulate taxpayers from decades of judicial scrutiny into abusive reliance on formalism.

[25] In that respect it was a reaction to Culbertson, which did involve a family partnership. See S. Rep. 82-781, at 38-40 (1951) (noting that IRC § 704(e)(1) was intended to harmonize the rules regarding family partnerships, particularly in light of the confusion caused by *Culbertson* and its progeny).

As defendant correctly points out, the IRS has adopted regulations interpreting section 704(e)(1) that preserve the traditional inquiries into whether the creation of a partnership interest was a sham transaction. Treas. Reg. § 1.704-1(e)(1)(iii) (A ... purchaser of a capital interest in a partnership is not recognized as a partner under the principles of section 704(e)(1) unless such interest is acquired in a bona fide transaction,

[3564] The Code § 704(e) analysis might have changed since then. See part III.B.1.a.iv.(b) Income Tax Aspects of Family Partnerships.

not a mere sham for tax avoidance or evasion purposes ....). Section 704(e)(1) plainly does not insulate plaintiff from the assertions made in the FPAA.

Although gain is not recognized, any accrued interest on a note contributed to the partnership would be recognized.[3565]

When no gain or loss is recognized, the partnership's adjusted basis in the contributed property is the same as it was in the hands of the contributing partner.[3566] The partner's basis in the partnership is also equal to the partner's basis in the partner's contributed property.[3567] A partner does not get basis for contributing the partner's own promissory note to a partnership. *VisionMonitor Software, LLC v. Commissioner*, T.C. Memo. 2014-182, holding:

> The value of what a partner contributes to his partnership can be tricky when he contributes something other than cash - like the notes at issue here. VisionMonitor argues that the contribution of the promissory notes increased Mantor's and Smith's outside bases in amounts equivalent to their face value. But a partnership's basis in property contributed by a partner is the adjusted basis of that property in the hands of the contributing partner at the time of the contribution. Sec. 723. The Commissioner argues that the company's basis in the notes is zero because Mantor's and Smith's bases in them were each zero. We have to agree with the Commissioner. We have long held that the contribution of a partner's own note to his partnership isn't the equivalent of a contribution of cash, and without more, it will not increase his basis in his partnership interest. *See Dakotah Hills Offices Ltd. P'ship v. Commissioner*, T.C. Memo. 1998-134, 75 T.C.M. (CCH) 2122 (no increased basis because not cash equivalent and not property in which partner has basis); *Gemini Twin Fund III v. Commissioner*, T.C. Memo. 1991-315, 62 T.C.M (CCH) 104 (partner's outside basis not increased by contribution of promissory note), *aff'd without published opinion*, 8 F.3d 26 (9th Cir. 1993); *Oden v. Commissioner*, T.C. Memo. 1981-184, 41 T.C.M. (CCH) 1285 (partner has zero basis in own promissory note), *aff'd without published opinion*, 679 F.2d 885 (4th Cir. 1982).[5]
>
> [5] Revenue Ruling 80-235, 1980-2 C.B. 229, summarizes this corner of partnership-tax law. It states that the contribution of a note by itself does not increase a partner's outside basis because he has a zero basis in the note. His outside basis will, however, increase if and when he actually makes payments on the note. *Id.; cf.* sec. 1.704-1(b)(2)(iv)(d)(2), Income Tax Regs. (providing that a partner's capital account is not increased with respect to a note written by that partner until there is either a taxable

[3565] See Reg. §§ 1.721-1(d) and 1.721-2(e).

[3566] Code § 723. Reg. § 1.723-1 provides:

> The basis to the partnership of property contributed to it by a partner is the adjusted basis of such property to the contributing partner at the time of the contribution. Since such property has the same basis in the hands of the partnership as it had in the hands of the contributing partner, the holding period of such property for the partnership includes the period during which it was held by the partner. See section 1223(2). For elective adjustments to the basis of partnership property arising from distributions or transfers of partnership interests, see section 732(d), 734(b), and 743(b). See § 1.460-4(k)(3)(iv)(B)(2) for rules relating to adjustments to the basis of contracts accounted for using a long-term contract method of accounting that are acquired in certain contributions to which section 721(a) applies.

[3567] Code § 722.

> disposition of the note by the partnership, or the partner makes principal payments on the note).

Bussing v. Commissioner, 88 T.C. 449 (1987), held:

> A taxpayer has zero basis in an executed obligation as no cost is incurred in making the note. See *Alderman v. Commissioner*, 55 T.C. 662 (1971). For a cash-basis taxpayer, giving a note is not equivalent to giving cash. *Helvering v. Price*, 309 U.S. 409 (1940); *Menz v. Commissioner*, 80 T.C. 1174 (1983). Therefore, payments by a partner on his written obligation, representing the partner's contribution to the partnership, are added to the partner's basis in the partnership only as the payments are made.[16]

[16] See *Oden v. Commissioner*, T.C. Memo. 1981-184, affd. without published opinion 679 F.2d 885 (4th Cir. 1982).

If the partnership is mainly to hold marketable securities, using only cash to form it has certain advantages.[3568]

The substituted basis portion continues the contributing partner's depreciation schedule.[3569]

However, a contributing partner must recognize gain on the occasions described below.

II.M.3.b. Exception: Diversification of Investment Risk

Code § 721(b) requires a contributing partner to recognize built-in gain on contributed property if the partnership is equivalent to an "investment company," as defined in Code § 351. Thus, when a partner contributes property with a fair market value that is greater than its adjusted basis to an "investment company" partnership, the partner recognizes the appropriate gain.[3570] The gain recognized by the contributing partner increases the basis of not only the contributor's partnership interest,[3571] but also the partnership's basis in the property.[3572]

Below are parts II.M.3.b.i When Diversification Occurs and II.M.3.b.ii How Much Gain Triggered by Code § 721(b).

II.M.3.b.i. When Diversification Occurs

Reg. § 1.351-1(c)(1) provides that a post-6/30/1967 transfer is considered to be a transfer to an investment company if:

(i) The transfer results, directly or indirectly, in diversification of the transferors' interests, and

(ii) The transferee is (a) a regulated investment company, (b) a real estate investment trust, or (c) a corporation more than 80 percent of the value of whose assets (excluding cash and non-convertible debt obligations from consideration) are held for

[3568] See footnotes 5712-5713 and the accompanying text.
[3569] Code § 168(i)(7).
[3570] Code § 721(b).
[3571] Code § 722.
[3572] Code § 723.

> investment and are readily marketable stocks or securities, or interests in regulated investment companies or real estate investment trusts.

Reg. § 1.351-1(c)(2) provides:

> The determination of whether a corporation is an investment company shall ordinarily be made by reference to the circumstances in existence immediately after the transfer in question. However, where circumstances change thereafter pursuant to a plan in existence at the time of the transfer, this determination shall be made by reference to the later circumstances.

Reg. § 1.351-1(c)(3) provides:

> Stocks and securities will be considered readily marketable if (and only if) they are part of a class of stock or securities which is traded on a securities exchange or traded or quoted regularly in the over-the-counter market. For purposes of subparagraph (1)(ii)(c) of this paragraph, the term “readily marketable stocks or securities” includes convertible debentures, convertible preferred stock, warrants, and other stock rights if the stock for which they may be converted or exchanged is readily marketable. Stocks and securities will be considered to be held for investment unless they are (i) held primarily for sale to customers in the ordinary course of business, or (ii) used in the trade or business of banking, insurance, brokerage, or a similar trade or business.

However, Code § 351(e)(1)(A) requires that, in determining whether a company is an investment company, one must take into account all stock and securities held by the company. In applying this test, Code § 351(e)(1)(B) treats as stocks and securities:

(i) money,

(ii) stocks and other equity interests in a corporation, evidences of indebtedness, options, forward or futures contracts, notional principal contracts and derivatives,

(iii) any foreign currency,

(iv) any interest in a real estate investment trust, a common trust fund, a regulated investment company, a publicly-traded partnership (as defined in section 7704(b)) or any other equity interest (other than in a corporation) which pursuant to its terms or any other arrangement is readily convertible into, or exchangeable for, any asset described in any preceding clause, this clause or clause (v) or (viii),

(v) except to the extent provided in regulations prescribed by the Secretary, any interest in a precious metal, unless such metal is used or held in the active conduct of a trade or business after the contribution,

(vi) except as otherwise provided in regulations prescribed by the Secretary, interests in any entity if substantially all of the assets of such entity consist (directly or indirectly) of any assets described in any preceding clause or clause (viii),

(vii) to the extent provided in regulations prescribed by the Secretary, any interest in any entity not described in clause (vi), but only to the extent of the value of such interest that is attributable to assets listed in clauses (i) through (v) or clause (viii), or

(viii) any other asset specified in regulations prescribed by the Secretary.

> The Secretary may prescribe regulations that, under appropriate circumstances, treat any asset described in clauses (i) through (v)as not so listed.

Regulations have not been amended to reflect Code § 351(e), and the treatment of money as stocks and securities supersedes the regulations. Senate Report to P.L. 105-34, 8/5/97, provides:

> Other assets that count toward the 80-percent test are an interest in an entity substantially all of the assets of which are assets listed, and to the extent provided in Treasury regulations, interests in other entities, but only to the extent of the value of the interest that is attributable to assets listed.[69]
>
> [69] Until such regulations are issued, it is intended that the Treasury regulations promulgated under the similar provisions of section 731(c)(2) generally will apply. Specifically, it is intended that an entity will meet the substantially all requirement if 90 percent or more of its assets are listed assets (Treas. reg. sec. 1.731-2(c)(3)(i)). Similarly, with respect to partnerships and the non-corporate entities, it is intended that, where 20 percent or more (but less than 90 percent) of the entity's assets consist of listed assets, a *pro rata* portion of the interest in the entity will be treated as a listed asset. (Treas. reg. sec. 1.731-2(c)(3)(ii)).

Reg. § 1.731-2(c)(3)(i), (ii) are reproduced in fns. 5379-5380, respectively, which are in part II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them).

Reg. § 1.351-1(c)(5) provides:

> A transfer ordinarily results in the diversification of the transferors' interests if two or more persons transfer nonidentical assets to a corporation in the exchange. For this purpose, if any transaction involves one or more transfers of nonidentical assets which, taken in the aggregate, constitute an insignificant portion of the total value of assets transferred, such transfers shall be disregarded in determining whether diversification has occurred. If there is only one transferor (or two or more transferors of identical assets) to a newly organized corporation, the transfer will generally be treated as not resulting in diversification. If a transfer is part of a plan to achieve diversification without recognition of gain, such as a plan which contemplates a subsequent transfer, however delayed, of the corporate assets (or of the stock or securities received in the earlier exchange) to an investment company in a transaction purporting to qualify for nonrecognition treatment, the original transfer will be treated as resulting in diversification.

Pre-contribution transfers between spouses may be an excellent solution.[3573]

Finally, the transferor will not attain diversification (and will not recognize gain) if the contributions of other partners are de minimis. Reg. § 1.351-1(c)(7) provides some guidelines:

[3573] Letter Rulings 9811022 and 200317011.

Example (1). Individuals A, B, and C organize a corporation with 101 shares of common stock. A and B each transfers to it $10,000 worth of the only class of stock of corporation X, listed on the New York Stock Exchange, in exchange for 50 shares of stock. C transfers $200 worth of readily marketable securities in corporation Y for one share of stock. In determining whether or not diversification has occurred, C's participation in the transaction will be disregarded. There is, therefore, no diversification, and gain or loss will not be recognized.

Example (2). A, together with 50 other transferors, organizes a corporation with 100 shares of stock. A transfers $10,000 worth of stock in corporation X, listed on the New York Stock Exchange, in exchange for 50 shares of stock. Each of the other 50 transferors transfers $200 worth of readily marketable securities in corporations other than X in exchange for one share of stock. In determining whether or not diversification has occurred, all transfers will be taken into account. Therefore, diversification is present, and gain or loss will be recognized.

Letter Ruling 200006008 applied the de minimis rule to the following facts:

X, Y, and Trust seek to contribute portfolios of stock to a newly formed limited liability company (LLC) that will be taxed as a partnership under section 301.7701-3 of the Administrative and Procedure Regulations.

Trust will contribute a portfolio of stocks to LLC with an aggregate value of $n, consisting of interests in p different stocks, v of which are stocks in regulated investment companies. X will contribute a portfolio consisting of r stocks with an aggregate value of $q, s of which are stocks in real estate investment trusts. Y will contribute a portfolio of u stocks with an aggregate value of $t, v of which are stocks in real estate investments trusts.

The taxpayer makes the following representations:

1. The sum total of all increases in value of X's, Y's and Trust's interests in each individual asset transferred to LLC does not exceed 5% of the aggregate value of LLC's assets immediately after the transfers. For purposes of this representation, the increase in value of a transferor's interest in any asset transferred to LLC is equal to the value of the transferor's indirect interest in the asset after the transfer less the value of the transferor's direct interest in the asset prior to the transfer. The value of the transferor's indirect interest in an asset is equal to the transferor's percentage ownership interest in LLC immediately after the transfer multiplied by the fair market value of the asset immediately after the transfer. The value of the transferor's direct interest in the asset it transferred is its fair market value at the time of transfer.

2. There is no plan or intention by any transferor to make any additional transfers to LLC.

3. Any other transferor who will contribute assets to LLC will not contribute assets in an amount or kind that would cause the total nonidentical assets transferred to LLC to be more than 5% of the aggregate amount of LLC's portfolio immediately after the transfer.

Letter Ruling 200006008 held:

Provided LLC is treated as a partnership for purposes of section 721, we conclude as follows:

1. The transfers of property by Trust together with the transfers of property by X and Y will not result in diversification. The transfers of nonidentical assets by the transferors, which amount to less than 5% of the total value of the assets transferred to LLC, are insignificant and therefore disregarded for purposes of determining whether diversification exists pursuant to section 1.351-1(c)(5).

2. The transfers by Trust, X, and Y to LLC are not transfers of property to a partnership that would be treated as an investment company (within the meaning of section 351) if LLC were incorporated, provided that these are the only transfers to LLC (except for transfers that would not increase the percentage of nonidentical assets contributed over 5%).

Another way to avoid investment company status would be to have each transferor contribute a portfolio of stock and securities that is already diversified.[3574] Reg. § 1.351-1(c)(6)(i) provides:

> For purposes of paragraph (c)(5) of this section, a transfer of stocks and securities will not be treated as resulting in a diversification of the transferors' interests if each transferor transfers a diversified portfolio of stocks and securities. For purposes of this paragraph (c)(6), a portfolio of stocks and securities is diversified if it satisfies the 25 and 50-percent tests of section 368(a)(2)(F)(ii), applying the relevant provisions of section 368(a)(2)(F). However, Government securities are included in total assets for purposes of the denominator of the 25 and 50-percent tests (unless the Government securities are acquired to meet the 25 and 50-percent tests), but are not treated as securities of an issuer for purposes of the numerator of the 25 and 50-percent tests.

Code § 368(a)(2)(F)(ii) provides:

> A corporation meets the requirements of this clause if not more than 25 percent of the value of its total assets is invested in the stock and securities of any one issuer and not more than 50 percent of the value of its total assets is invested in the stock and securities of 5 or fewer issuers. For purposes of this clause, all members of a controlled group of corporations (within the meaning of section 1563(a)) shall be treated as one issuer. For purposes of this clause, a person holding stock in a regulated investment company, a real estate investment trust, or an investment company which meets the requirements of this clause shall, except as provided in regulations, be treated as holding its proportionate share of the assets held by such company or trust.

"Mutual fund" is a common name for a "a regulated investment company." Code § 851(b)(3) includes among the requirements to be "a regulated investment company" that, at the close of each quarter of the taxable year:

> (A) at least 50 percent of the value of its total assets is represented by -
>
> > (i) cash and cash items (including receivables), Government securities and securities of other regulated investment companies, and
> >
> > (ii) other securities for purposes of this calculation limited, except and to the extent provided in subsection (e), in respect of any one issuer to an amount not greater in

[3574] Letter Rulings 199909045 and 199925017-199925020.

value than 5 percent of the value of the total assets of the taxpayer and to not more than 10 percent of the outstanding voting securities of such issuer, and

(B) not more than 25 percent of the value of its total assets is invested in -

(i) the securities (other than Government securities or the securities of other regulated investment companies) of any one issuer,

(ii) the securities (other than the securities of other regulated investment companies) of two or more issuers which the taxpayer controls and which are determined, under regulations prescribed by the Secretary, to be engaged in the same or similar trades or businesses or related trades or businesses, or

(iii) the securities of one or more qualified publicly traded partnerships (as defined in subsection (h)).

Another approach might be to manage the situation the way one would an "exchange fund." The whole point of the rules is to avoid economic diversification – meaning shifting risk of investment results from the contributing partners to the other partners. If the partnership agreement provided for the investment results to be specifically allocated to the contributing partners, then they will not have diversified their risk. "Exchange funds" provide such an allocation for seven years (to comply with Code § 704(c)(1)(B) and 737),[3575] then they allow the partners to withdraw a diversified portfolio. I don't have any citations for private letter rulings approving this approach, but I would think that some are out there.

Reg. § 1.351-1(c)(4) provides:

In making the determination required under subparagraph (1)(ii)(c) of this paragraph, stock and securities in subsidiary corporations shall be disregarded and the parent corporation shall be deemed to own its ratable share of its subsidiaries' assets. A corporation shall be considered a subsidiary if the parent owns 50 percent or more of (i) the combined voting power of all classes of stock entitled to vote, or (ii) the total value of shares of all classes of stock outstanding.

Consistent with this rule but not citing it, Letter Ruling 201547003 involved the following facts, representations, and ruling:

Summary of Facts

X is a State A publicly-traded limited partnership. GP1, a State A limited liability company, is X's general partner. X owns the general partner interest, incentive distribution rights ("IDRs"), and a portion of the publicly traded limited partner interests in LP1. Additionally, X owns a special class of LP1 partnership interests that track a percent of the economic attributes of the general partner interest and IDRs of LP2, a State A limited partnership.

In addition to its ownership interests in LP2, LP1 also owns the general partner interest, IDRs, and limited partner interests in LP3, a publicly traded limited partnership. LP1, LP2

[3575] See part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

and LP3 are publicly traded partnerships within the meaning of §7704, and are directly involved in Business B.

Proposed Transaction

X has been engaged in acquisition discussions with GP2, the corporate general partner of Target MLP, an unrelated publicly traded limited partnership engaged in Business B. X proposes, in part, to undertake the following transaction:

(i) The members of GP1 will form a new limited liability company ("New LLC"), which will elect to be taxed as a corporation for federal income tax purposes.

(ii) GP2, the corporate general partner of Target MLP, will merge into New LLC under State A law with New LLC surviving the merger.

(iii) New LLC will contribute its newly acquired interests in Target MLP to X in exchange for limited partner interests of X (the "Exchange").

Representations

X makes the following representations:

(a) Immediately after the Exchange, the total value of X's direct ownership interests in LP1 will be more than 50 percent of the total value of all equity interests outstanding in LP1.

(b) At the time of the Exchange, there will be no plan in existence pursuant to which the total value of X's direct ownership interests in LP1 will become less than 50 percent of the total value of all equity interests outstanding in LP1.

Ruling

Based solely on the information submitted and representations set forth above, we rule as follows:

Provided that immediately after the Exchange, X's direct ownership interests in LP1 will represent 50 percent or more of the total value of all LP1 equity interests, X's LP1 equity interests will be disregarded and X will be deemed to own its ratable share of LP1's assets for purposes of determining whether X is an investment company under § 351(e).

Caveats

Except as expressly provided herein, no opinion is expressed or implied concerning the tax treatment of the Proposed Transaction under other provisions of the Code or regulations or the tax treatment of any condition existing at the time of, or effects resulting from, the Proposed Transaction that is not specifically covered by the above ruling. In particular, no opinion is expressed on (i) the merger described in step (ii) above, (ii) whether X's ownership interests in LP1 will represent 50 percent or more of the total value of all LP1 equity interests immediately after the Exchange, and (iii) whether a plan exists at the time of the Exchange pursuant to which X's direct ownership interests in LP1 will represent less than 50 percent of the total value of all of LP1's equity interests.

Letter Ruling 201633028 is very similar to Letter Ruling 201547003.

Applying the look-through rule again, C involved the following facts, representations, and rulings:

Summary of Facts

X is a publicly-traded partnership within the meaning of section 7704(b) of the Internal Revenue Code (Code) that is classified as a partnership for federal income tax purposes. GP, a limited liability company, that is classified as a partnership for federal income tax purposes, is X's general partner. As the general partner of X and owner of X common units, GP has an M% interest in X. Two individuals own all the interests in GP.

X owns the general partner interest and a portion of the limited partner interests in MLP. MLP is a publicly-traded partnership within the meaning of section 7704(b) that is classified as a partnership for federal income tax purposes. MLP is engaged directly and indirectly through various operating subsidiaries and disregarded entities, in Business A.

X has been engaged in acquisition discussions and has entered into an agreement with Target, an unrelated publicly-traded corporation engaged in Business B. Target's Business B assets, which are similar to those in one or more of MLP's existing lines of business, will expand or complement X's existing business and operations. The Proposed Transaction will result in Target becoming a wholly-owned subsidiary of X. Immediately prior to X's public announcement of this acquisition, X's equity market capitalization was approximately $N and Target's equity market capitalization was approximately $0. Also as a result of the Proposed Transaction, (1) Target is expected to own between P% and Q% of MLP common units, and (2) Target's assets are expected to make up between approximately P% and R% of MLP's assets by fair market value.

Transaction

X proposes, in part, to undertake the following transactions ("Transactions"):

(i) X will form a new limited liability company ("New LLC"), which will be disregarded as an entity separate from its owner, X, for federal income tax purposes.

(ii) New LLC will merge into Target with Target surviving the merger. In the merger, each outstanding share of Target's stock will be exchanged for common units in X and cash (with respect to the common units received in X).

(iii) Target will contribute all of its assets to MLP in exchange for units of MLP.

Representations

X makes the following representations:

(a) Immediately following the Transactions, X's direct ownership interests in MLP will represent more than 50 percent of the value (based on section 704(b) capital accounts) of all equity interests in MLP.

(b) At the time of the Transactions, there would be no plan in existence pursuant to which the total value of X's direct ownership interests in MLP will become less than 50 percent of the total value of all equity interests in MLP.

(c) Immediately after the Transactions after applying the look-through rule of Treas. Reg. § 1.351-1(c)(4), not more than 80% of (1) the fair market value of X's assets (excluding its direct interests in MLP) plus (2) X's ratable share (determined by reference to section 704(b) capital accounts) of the fair market value of MLP's assets will be attributable to assets described in section 351(e).

Ruling

Based solely on the information submitted and representations set forth above, we rule as follows:

(1) Provided that immediately after the Transactions, X's direct equity ownership interests in MLP will represent 50 percent or more of the value of all interests in MLP, X's direct equity interests in MLP will be disregarded and X will be deemed to own its ratable share (determined by reference to section 704(b) capital accounts) of MLP's assets for purposes of determining whether X would be an investment company under section 351(e) if X were incorporated.

(2) Provided that immediately after the Transactions after applying the look-through rule of Treas. Reg. § 1.351-1(c)(4), not more than 80% of (1) the fair market value of X's assets (excluding its direct interests in MLP) plus (2) X's ratable share (determined by reference to section 704(b) capital accounts) of the fair market value of MLP's assets is attributable to assets described in section 351(e), X will not be treated as an investment company (within the meaning of section 351(e)) for purposes of applying section 721(b).

Caveats

Except as expressly provided herein, no opinion is expressed or implied concerning the federal tax consequences of any aspect of any transaction or item discussed or referenced in this letter. Further, no opinion is expressed with respect to any transaction other than the transfers described herein. For example, no opinion is expressed with respect to the federal tax consequences of any other transfer of property to X, including whether the control requirement in section 351(a) would be satisfied, or whether any further transfer to a lower-tier entity of X would be integrated with the transfer to X.

Letter Ruling 202016013 provides:

Summary of Facts

X is a publicly-traded partnership within the meaning of section 7704(b) of the Internal Revenue Code (Code) that is classified as a partnership for federal income tax purposes. GP, a limited liability company, that is classified as a partnership for federal income tax purposes, is X’s general partner. As the general partner of X and owner of X common units, GP has an M% interest in X. Two individuals own all the interests in GP.

X owns the general partner interest and a portion of the limited partner interests in MLP. MLP is a publicly-traded partnership within the meaning of section 7704(b) that is classified as a partnership for federal income tax purposes. MLP is engaged directly and indirectly through various operating subsidiaries and disregarded entities, in Business A.

X has been engaged in acquisition discussions and has entered into an agreement with Target, an unrelated publicly-traded corporation engaged in Business B. Target’s Business B assets, which are similar to those in one or more of MLP’s existing lines of business, will expand or complement X’s existing business and operations. The Proposed Transaction will result in Target becoming a wholly-owned subsidiary of X. Immediately prior to X’s public announcement of this acquisition, X’s equity market capitalization was approximately $N and Target’s equity market capitalization was approximately $O. Also as a result of the Proposed Transaction, (1) Target is expected to own between P% and Q% of MLP common units, and (2) Target’s assets are expected to make up between approximately P% and R% of MLP’s assets by fair market value.

Transaction

X proposes, in part, to undertake the following transactions (“Transactions”):

(i) X will form a new limited liability company (“New LLC”), which will be disregarded as an entity separate from its owner, X, for federal income tax purposes.

(ii) New LLC will merge into Target with Target surviving the merger. In the merger, each outstanding share of Target’s stock will be exchanged for common units in X and cash (with respect to the common units received in X).

(iii) Target will contribute all of its assets to MLP in exchange for units of MLP.

Representations

X makes the following representations:

(a) Immediately following the Transactions, X’s direct ownership interests in MLP will represent more than 50 percent of the value (based on section 704(b) capital accounts) of all equity interests in MLP.

(b) At the time of the Transactions, there would be no plan in existence pursuant to which the total value of X’s direct ownership interests in MLP will become less than 50 percent of the total value of all equity interests in MLP.

(c) Immediately after the Transactions after applying the look-through rule of Treas. Reg.§ 1.351-1(c)(4), not more than 80% of (1) the fair market value of X’s assets (excluding its direct interests in MLP) plus (2) X’s ratable share (determined by reference to section 704(b) capital accounts) of the fair market value of MLP’s assets will be attributable to assets described in section 351(e).

Ruling

Based solely on the information submitted and representations set forth above, we rule as follows:

(1) Provided that immediately after the Transactions, X's direct equity ownership interests in MLP will represent 50 percent or more of the value of all interests in MLP, X's direct equity interests in MLP will be disregarded and X will be deemed to own its ratable share (determined by reference to section 704(b) capital accounts) of MLP's assets for purposes of determining whether X would be an investment company under section 351(e) if X were incorporated.

(2) Provided that immediately after the Transactions after applying the look-through rule of Treas. Reg. § 1.351-1(c)(4), not more than 80% of (1) the fair market value of X's assets (excluding its direct interests in MLP) plus (2) X's ratable share (determined by reference to section 704(b) capital accounts) of the fair market value of MLP's assets is attributable to assets described in section 351(e), X will not be treated as an investment company (within the meaning of section 351(e)) for purposes of applying section 721(b).

Caveats

Except as expressly provided herein, no opinion is expressed or implied concerning the federal tax consequences of any aspect of any transaction or item discussed or referenced in this letter. Further, no opinion is expressed with respect to any transaction other than the transfers described herein. For example, no opinion is expressed with respect to the federal tax consequences of any other transfer of property to X, including whether the control requirement in section 351(a) would be satisfied, or whether any further transfer to a lower-tier entity of X would be integrated with the transfer to X.

Banoff and Cohen discuss Letter Ruling 202016013:[3576]

The transaction at hand almost surely is the acquisition of SemGroup Corporation by Energy Transfer LP (see Energy Transfer LP Form S-4, filed with U.S. Securities and Exchange Commission on 10/03/2019 and amended 10/28/2019 (the S-4)) and, as such, we will discuss the transaction on that assumption.

Energy Transfer LP (ET) has limited partner common units traded on the New York Stock Exchange (NYSE). ET describes itself as being engaged in natural gas operations, including natural gas midstream and intrastate transportation and storage, interstate natural gas transportation and storage, and crude oil, natural gas liquids (NGL) and refined products transportation, terminalling services and acquisition and marketing activities, as well as NGL storage and fractionation services. ET directly owns interests in other entities through which some of these activities are conducted. Specifically, ET owns Energy Transfer Operating, L.P. (ETO), which itself has limited partner preferred units traded on the NYSE. ETO in turn owns various operating subsidiaries and interests in two other partnerships that have units traded on public exchanges (Sunoco LP and

[3576] Shop Talk column, "Section 721(b)-A Partnership Issue, a Corporate Issue, or Just a Jumble?" *Journal of Taxation* (7/2020).

USA Compression Partners, LP). ET, ETO, and the other two partnerships claim to be partnerships for U.S. federal tax purposes.

In the S-4, ET announced that it had entered into an Agreement and Plan of Merger with its wholly owned subsidiary, Nautilus Merger Sub LLC (in the ruling, New LLC) and SemGroup Corporation (SEMG; and in the ruling, Target), whose common stock traded on the NYSE (prior to SEMG's being acquired by ET on 12/05/2019). The proposed transaction, under this agreement, would merge New LLC into SEMG with SEMG surviving and with SEMG's outstanding stock being converted into cash and common units in ET, followed by the contribution by SEMG of all of its assets to ETO in exchange for ETO units.

For federal income tax purposes, the merger is characterized differently. Because New LLC is wholly owned by ET and apparently has not made a check-the-box election to be taxed as a corporation, it is disregarded as separate from ET for federal income tax purposes. Thus, the merger is treated as a contribution to ET of SEMG's stock by SEMG's shareholders in exchange for the cash and ET's units. Whether that contribution will trigger recognition of gain or loss depends entirely on Section 721. (As part of the transaction, SEMG transferred all its business assets to ETO for ETO units. That seemingly is a tax-free transfer under Section 721.)

Section 721 has its general rule of non-recognition, *i.e.*, no gain or loss is recognized by the transferor, the partnership, or any of its other partners when property is contributed to the partnership in exchange for an interest in the partnership. That general rule, however, is subject to three exceptions. Two of them, regarding transfers of intangibles and transfers by non-United States persons, are not relevant here. The third, Section 721(b), provides that the general rule does not apply "to gain realized on a transfer of property to a partnership which would be treated as an investment company (within the meaning of Section 351) if the partnership were incorporated." The scope of Section 721(b) is elusive and potentially far-reaching; it may even apply when holders of options to acquire partnership interests exercise their options and when interests in a partnership investment company are converted (*e.g.*, general partner into limited partner interests, general or limited partnership interests into LLC interests, or vice versa). See TD 9612 , 02/05/2013; Carman and Banoff, "Final Regulations on Noncompensatory Options: Worth the Wait?," 118 *JTAX* 164 (April 2013); Banoff, "Partnership Ownership Realignments in Partnership Reallocations, Legal Status Changes, Recapitalizations and Conversions: What Are the Tax Consequences?," 83 *Taxes*, No. 3 (March 2005) 105, 122.

Thus, ET was faced with the question of whether, if ET was a corporation, the transfer of SEMG's stock to ET would be a transfer to an investment company under Section 351. ET indicated in the S-4 that it was seeking a private letter ruling to determine the answer to this question. (And Ltr. Rul. 202016013, dated 01/08/2020 and released 04/17/2020, undoubtedly is that ruling.)

After reviewing the Code § 351 investment company rules, Banoff and Cohen continue discussing Letter Ruling 202016013:[3577]

> Now, let's return to the ruling at hand. The transaction in Ltr. Rul. 202016013 is a transfer of corporate stock to a partnership that owns other partnerships. In the ruling, ET represented that immediately following the proposed transaction ET's direct ownership interest in ETO represented more than 50 percent of the value (based on capital accounts) of all equity interests in ETO and that at the time of the transaction there would be no plan to have ET's direct ownership interest in ETO reduced to less than 50 percent of the total value of all equity interests in ETO. ET also represented that, immediately after the proposed transactions, "after applying the look-through rule of Treas. Reg. § 1.351-1(c)(4)," not more than 80 percent of (1) the FMV of ET's assets (excluding its direct interests in ETO) plus (2) ET's ratable share (determined by reference to Section 704(b) capital accounts) of the FMV of ETO's assets, would be assets described in Section 351(e).
>
> Thus, the ruling turns on the application of the look-through rule of Reg. 1.351-1(c)(4). Section 721(b) says to treat partnership ET as a corporation, but it does not go further (*i.e.*, it does not say to treat any entity owned by ET as a corporation). Reg. 1.351-1(c)(4) only applies to corporations. After the transaction, for purposes of the investment company rules, SEMG is a corporate subsidiary of ET and Reg. 1.351-1(c)(4) clearly applies to SEMG, but SEMG's sole asset, at that point, will be interests in ETO. The regulatory look-through rule does not appear to apply to ETO, a partnership for federal income tax purposes, or to any tax partnership owned by ETO.
>
> ET might turn to the statutory look-through rules. However, those only give you "bad" assets. The statutory provisions of Section 351(e)(1)(B)(vi) and (vii) only tell you when to treat interests in an entity as "stock and securities." They do not allow a taxpayer to truly look through interests in an entity to the assets of the entity.
>
> This raises the significant issue of whether you take at face value the reference in a statute or regulation to the classification of an entity. When a statute or regulation refers to a "corporation," does that mean only entities treated as corporations for federal income tax purposes? Or, can you apply those rules to entities treated as partnerships for federal income tax purposes, at least in a situation where the operative statute (Section 721(b)) imposes corporate tests and standards (under Section 351(e)) on partnerships?
>
> Interestingly, as noted above, Ltr. Rul. 202016013 was issued by the Corporate side of Chief Counsel's office. The ruling starts by stating that it is issued pursuant to section 6.03(2) of Rev. Proc. 2019-1, 2019-1 IRB 1, regarding one or more significant issues under Section 351 (among other provisions). Section 6.03(2) says that the IRS will not rule on the qualification of any transaction under Section 351 (among other Code sections), regardless of whether the transaction is part of an integrated transaction, but will only issue rulings on significant issues "presented in a transaction described in § 351 ...." But, looking at the entities involved, this is really a ruling on a transaction described in Section 721 that involves the application of the "investment company" rules in Section 351; it is not a "transaction described in Section 351," and therefore it is not a

[3577] Shop Talk column, "Section 721(b)-A Partnership Issue, a Corporate Issue, or Just a Jumble?" *Journal of Taxation* (7/2020).

"no ruling" transaction. We note that the application of Section 721(b) occurs if the transfer "would be" a transfer to an investment company if the transferee partnership were incorporated (and therefore subject to indirect application of Section 351(e)).

So, it may be that, only in this bizzaro world of "would be" transfers that the federal income tax classification of an entity as a corporation or a partnership is conflated. One might also think that the addition of the statutory rules that look through an entity (rather than specify a corporation or partnership), which came 30 years after the regulations were issued, should mean that the regulatory rule should be read to refer to entities generically and not solely to corporations, as Reg. 1.351-1(c)(4) says on its face. However, the 1997 Blue Book (*i.e.*, the *General Explanation of Tax Legislation Enacted in 1997* (JCS-23-97) prepared by the Joint Committee on Taxation staff (12/17/1997) that accompanied the statutory change to Section 351(e) made by The Taxpayer Relief Act of 1997) at page 184 specifically states, "the Act did not override the rule that, for purposes of determining whether a corporation or partnership is an investment company, the assets of a corporation are treated as owned proportionally by any shareholder (whether a corporation or other entity) owning 50 percent or more of its stock (Treas. Reg. sec. 1.351-1(c)(4))." This sentence itself refers to "corporation or partnership" in one place but solely "corporation" in another, implicitly indicating a conscious differentiation. (On the other hand, as your editors have previously noted over the past 30 years, the legal effect of Blue Books was, is, and perhaps always will be, unclear. See, *e.g.*, Shop Talk, "What Will the TCJA Blue Book's Legal Effect Be?," 131 *JTAX* 32 (September 2019).)

This might leave one to wonder how the IRS was able to conclude that the look-through rule in the regulations could be applied to a partnership (ETO) when testing a transaction under Section 721(b). Other respected commentators indeed have been discussing this quandary. For example, Monte Jackel, while praising the policy rationale for Ltr. Rul. 202016013, called the issuance of this ruling "lawless behavior." Jackel, "Letter Ruling on PTP Look-Through Is Illegal," 2020 *TNTF* 77-12 (04/21/2020), Tax Notes Federal, 04/27/2020, p. 647. Robert Willens responded, indicating that he believed the "would be" language of Section 721(b) should also be applied to treat partnerships owned by the partnership receiving the contribution as also being corporations. Willens, "Willens Offers Possible Explanation for PTP Look-Through Ruling," 2020 *TNTF* 81-19 (04/27/2020), Tax Notes Federal, 04/27/2020, p. 649. Benjamin Willis added that he believed that the treatment of interests in a publicly traded partnership as "stock and securities" under Section 351(e)(1)(B)(iv) means that the partnership issuing those interests itself should be considered a corporation for the regulatory look-through rule. Willis, "Taking Stock of PTP Interests," 2020 *TNTF* 86-2, *Tax Notes Federal*, 05/04/2020, p. 825. Note that the three above-named commentators and others (including us) agree that the Service has reached the correct policy answer in applying the look-through rule to subsidiary partnerships. See, *e.g.*, Willis (Arthur, not Benjamin), Postlewaite & Alexander, *Partnership Taxation* Sec. 4.02 fn. 248; Lay and Scaramella, "IRS Ruling Looking Through Lower-Tier Publicly Traded Partnership for Purposes of Determining Investment Company Status," *J. Passthrough Entities*, Vol. 19, Issue 3 (May-June 2016), pg. 7. The crux of the debate (and this article) is, how do you get there?

While we would not go so far as to call the issuance of the ruling "lawless," the statutory language relied upon by Willens and Willis does not go so far as they would hope. Section 721(b) only directs the recipient partnership to be treated as incorporated, not any subsidiary of that partnership. Section 351(e)(1)(B)(iv) only directs the interests in a publicly traded partnership to be treated as stock and securities, which does not imply the issuing partnership is a corporation for purposes of the regulations, as supported by the above-discussed sentence in the 1997 Blue Book.

Willens and Willis reference Ltr. Rul. 201547003, which Willis supplements by citing to the nearly identical Ltr. Rul. 201633028. Ltr. Rul. 201547003, which reportedly appears to be the ruling obtained in connection with the proposed acquisition of Williams by ET, involved the potential contribution of interests in a publicly traded partnership (i.e., Williams) to another partnership (**i.e.**, ET) when the recipient partnership represented that it owned 50 percent or more of the total value of a subsidiary partnership (*i.e.*, ETO) and that it had no plan whereby the recipient partnership's direct ownership interest in the subsidiary partnership would become less than 50 percent of the total value of the equity interests outstanding in the subsidiary partnership. As in Ltr. Rul. 202016013, the IRS Chief Counsel's Corporate group ruled in both Ltr. Ruls. 201547003 and 201633028 that the recipient partnership's equity interest in the subsidiary partnership would be disregarded and the recipient partnership would be deemed to own its ratable share of the subsidiary partnership's assets for determining whether the recipient partnership is an investment company under Section 351(e). Neither Ltr. Rul. 201547003 nor Ltr. Rul. 201633028 reference Reg. 1.351-1(c)(4), which is explicitly relied upon in Ltr. Rul. 202016013.

II.M.3.b.ii. How Much Gain Triggered by Code § 721(b)

The Senate Explanation to P.L. 94-455 (10/4/1976) reproduced in RUA Checkpoint ¶ 7211.10, "Exchange funds," provides:

Partnership exchange funds.

The...amendment changes the rule...relating to nonrecognition of gain or loss on a contribution of property to a partnership in exchange for an interest in the partnership (sec. 721) by making an exception where a partner transfers property to a partnership which is an "investment company." If the partnership is an investment company after the exchange, the contributing partner must recognize gain (if any) which he realizes on the exchange. The...amendment thus requires the current taxation of gains realized by investors who transfer appreciated stocks or securities (or other property) to an exchange fund operated as a partnership.

The...amendment does not change present law with regard to losses, so that a loss realized on a contribution of stock or securities (or other property) to a partnership cannot be recognized at that time.

A partnership will be treated as an "investment company," for purposes of this provision, if it satisfies the definition of an investment company under the present rules relating to corporate exchange funds (sec. 351). The latter rules are set forth in detail in the regulations under section 351. Under these regulations, a partnership will be treated as an investment company if, after the exchange, over 80 percent of the value of its assets (excluding cash and nonconvertible debt obligations) are held for investment and are readily marketable stocks or securities (or interests in regulated investment companies or real estate investment trusts). The determination of whether a partnership is an investment company under this test will ordinarily be made immediately after the transfers of property under the same plan or as part of the same transaction.

In addition, for nonrecognition treatment to be denied, the transfers of property to the partnership must be found to result, directly or indirectly, in diversification of the transferors' interests. The amount and character of the gain which a partner must recognize under the bill are to be determined under...present law.

These rules are to apply both to limited partnerships and general partnerships, regardless whether the partnership is privately formed or publicly syndicated. They also require recognition of gain by a person who transfers nonpublicly-traded stocks or securities to a partnership which, after the transfer, meets the tests of an investment company.

As under the corporate rule, the property on which gain will be recognized is not limited to appreciated stocks or securities, but includes other types of property (such as real estate or other assets) if the partnership which receives the property is an investment company after the exchange.

Under the amendment, and except as provided below, a partnership may still be an investment company despite the existence of a special allocation among the partners as to income, gain, loss, or deduction items (sec. 704). In some situations, however, it might be proper to find that no diversification has occurred if the partnership agreement allocates income and gains (or losses) from specific property to the contributing partner and requires that a withdrawing partner be returned the property which he contributed originally.

The amendment will not affect the tax treatment of an investment partnership as a partnership for tax purposes; that is, whether it will be taxable as a partnership or as a corporate-type entity. That classification question will continue to be determined under section 7701...An exchange fund which is held to be taxable as a partnership will, however, be subject to the restriction imposed by this bill under section 721 (namely, that transfers of appreciated property to the fund will require recognition of gain if the partnership is otherwise an "investment company").

Rev. Rul. 68-55 involved the following facts:[3578]

Corporation Y was organized by X and A, an individual who owned no stock in X. A transferred 20x dollars to Y in exchange for stock of Y having a fair market value of 20x dollars and X transferred to Y three separate assets and received in exchange stock of Y having a fair market value of 100x dollars plus cash of 10x dollars.

Rev. Rul. 68-55 explains:

The first question presented is how to determine the amount of gain to be recognized under section 351(b) of the Code. The general rule is that each asset transferred must be considered to have been separately exchanged. See the authorities cited in Revenue Ruling 67-192 , C.B. 1967-2, 140, and in Revenue Ruling 68-23 , page 144, this Bulletin,

[3578] Rev. Rul. 85-164 amplified Rev. Rul. 68-55 by explaining the resulting basis and holding period of the assets involved.

> which hold that there is no netting of gains and losses for purposes of applying sections 367 and 356(c) of the Code. Thus, for purposes of making computations under section 351(b) of the Code, it is not proper to total the bases of the various assets transferred and to subtract this total from the fair market value of the total consideration received in the exchange. Moreover, any treatment other than an asset-by-asset approach would have the effect of allowing losses that are specifically disallowed by section 351(b)(2) of the Code.
>
> The second question presented is how, for purposes of making computations under section 351(b) of the Code, to allocate the cash and stock received to the amount realized as to each asset transferred in the exchange. The asset-by-asset approach for computing the amount of gain realized in the exchange requires that for this purpose the fair market value of each category of consideration received must be separately allocated to the transferred assets in proportion to the relative fair market values of the transferred assets. See section 1.1245-4(c)(1) of the Income Tax Regulations which, for the same reasons, requires that for purposes of computing the amount of gain to which section 1245 of the Code applies each category of consideration received must be allocated to the properties transferred in proportion to their relative fair market values….
>
> Under section 351(b)(2) of the Code the loss of 18x dollars realized on the exchange of Asset Number I is not recognized. Such loss may not be used to offset the gains realized on the exchanges of the other assets. Under section 351(b)(1) of the Code, the gain of 13x dollars realized on the exchange of Asset Number II will be recognized as short-term capital gain in the amount of 3x dollars, the amount of cash received. Under sections 351(b)(1) and 1245(b)(3) of the Code, the gain of 30x dollars realized on the exchange of Asset Number III will be recognized as ordinary income in the amount of 5x dollars, the amount of cash received.

Thus, only the assets deemed received in exchange for the undiversified contribution trigger gain. So, a large undiversified contribution that is deemed exchanged for a small amount of other assets will trigger gain proportionate to that small amount of other assets rather than triggering gain on all of the large undiversified contribution.

This approach is consistent with the Letter Ruling 200317011, which ruled that a pre-contribution exchange to make each partner's holdings proportionate to the other partner's holdings avoided diversification. The facts of Letter Ruling 200317011 were:

> Husband individually owns assets consisting of cash, shares of the Family Partnership, residential real estate, and certain stocks and bonds (collectively, "Husband's Individually Owned Assets"). Wife individually owns assets consisting of residential real estate and certain stocks and bonds (collectively, "Wife's Individually Owned Assets").
>
> Husband and Wife also own certain residential real estate as tenants-in-common (the "Jointly Owned Property"). There are more than two partners in Family Partnership.
>
> The following transaction has been proposed regarding Husband's Individually Owned Assets, Wife's Individually Owned Assets, and the Jointly Owned Property (collectively, the "Assets"):
>
> (i) Husband will transfer part of Husband's Individually Owned Assets and part of his interest in the Jointly Owned Property to Wife, and Wife will transfer part of Wife's

Individually Owned Assets and part of her interest in the Jointly Owned Property to Husband. Following this exchange (the Exchange), Husband will own an undivided r% interest in each of the Assets, and Wife will own an undivided s% interest in each of the Assets.

(ii) After the Exchange in step (i) above, Husband and Wife will contribute their respective interests in the Assets to Partnership, a limited partnership newly-formed under the laws of State (together, the "Contributions"). Under the terms of the agreement governing Partnership, Husband and Wife will be the general partners. Initially, the limited partners will be Husband and Wife. Husband and Wife will be Partnership's only partners.

(iii) Following the Contributions described in step (ii) above, Husband and Wife will each transfer his or her limited partner interest in Partnership to their respective revocable grantor trust(s).

(iv) Husband and Wife may, in the future, make gifts of some of their interests in Partnership to their children and grandchildren.

Letter Ruling 200317011 ruled:

> Here, Husband will transfer an interest in Husband's Individually Owned Assets and part of his interest in the Jointly Owned Property to Wife, and Wife will transfer an interest in Wife's Individually Owned Assets and part of her interest in the Jointly Owned Property to Husband. Following this exchange, Husband and Wife will each own a certain undivided interest in each of the Assets. Husband and Wife will then contribute their respective interests in each of the Assets to Partnership. Husband and Wife (and later revocable trusts of which Husband and Wife will be the sole owners) will be the only partners in Partnership.
>
> Based on the foregoing, we conclude, pursuant to § 1041(a) of the Code that no gain or loss shall be recognized on the Exchange of property between Husband and Wife.
>
> Based solely on the information submitted and on the authority set forth above, and provided that Husband and Wife are co-owners of each of the Assets immediately before the Contributions, we conclude that the Contributions are not transfers of property to a partnership that would be treated as an investment company (within the meaning of § 351) if Partnership were incorporated.
>
> Based on the foregoing, we conclude that § 721(b) does not apply to the proposed transaction and, pursuant to § 721(a), no gain or loss will be recognized by Husband or Wife if the transaction is consummated.

II.M.3.c. Exception: Triggering IRD

The sale or exchange of an item of income in respect of a decedent[3579] triggers income recognition.[3580]

[3579] See part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.
[3580] See part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up, especially fns. 2088-2089.

Triggering income may convert the item to a capital asset.[3581]

II.M.3.d. Exception: Liability Shifts

Another exception to the general nonrecognition rule of Code § 721(a) can occur when a partner's share of liability in the partnership shifts. If a partner's share of liabilities increases, that increase is treated as hypothetical cash contribution and the partner's partnership interest basis is increased by that amount, but no immediate tax consequences occur.[3582] However, if the partner's share of liability decreases, then the decrease is treated as a hypothetical cash distribution, the partner's partnership interest's basis is decreased, and the partner must recognize gain to the extent the hypothetical distribution is greater than the partner's basis in such partner's partnership interest immediately before the deemed distribution.[3583] One situation that could lead to an increase or decrease in partnership liabilities is when a partner contributes to the partnership property subject to a liability. In such a case, the partner's partnership interest basis is increased to the extent of the partner's allocated share of liabilities, but is also decreased by the amount of the liability that is allocated to the other partners. The net result could be a decrease in the partner's share of partnership liabilities, which could lead to gain recognition.[3584]

August, "The Debt Cancellation Culture of Section 108: Tax Hurdles for Partnerships Engaged in Debt Workouts," *Corporate Taxation* (WG&L), Sep/Oct 2023, explains "Contribution of Encumbered Property by a Partner or Newly Admitted Partner":

> It is possible for a partnership workout to result in a partner or newly admitted partner's contribution of appreciated real property encumbered by a mortgage. Section 721 will generally protect the contributing partner from gain (or loss) and provide for a carryover of basis under Section 722 . Exception is provided for the net reduction in the transferor's liabilities as a result of applying Section 752 , resulting in the contributing partner's recognizing gain.[81] Who knows, perhaps the disguised sale rules will be applied by the Service where the transferred debt is "non-qualified."[82] Indeed, where a partnership assumes or takes property subject to a liability of the partner other than a

---

[3581] See part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up, fn. 2089, cross-referencing part II.G.8 Code § 165(a) Loss for Worthlessness; Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A Limitation on that Strategy.

[3582] Code § 752(a); Code § 722.

[3583] Code § 752(b); Code § 731(a).

[3584] Reg. § 1.752–1(f). Generally, the allocation rules for nonrecourse liabilities will prevent the hypothetical distribution amount to the contributing partner from exceeding the basis of the contributing partner's partnership interest. Reg. § 1.752-3(a). Often, the contributing partner's Code § 704(c) responsibility will cause the contributing partner to be allocated nonrecourse debt sufficient to take care of this issue. Reg. § 1.752-3(a)(2). Additionally, if the partner contributes property subject to a recourse liability and the property remains recourse only to him, there will be no hypothetical distribution and no related recognition. Reg. § 1.752-1(g), Ex. 1. If the debt is part recourse and part nonrecourse, it is bifurcated. Reg. § 1.752-1(i). See also T.D. 9207 (5/23/2005), promulgating Reg. §§ 1.752-6 and 1.752-7 regarding certain assumptions of liability. See also Rubin, Whiteway, and Finkelstein, Recourse or Nonrecourse, That Is the Question, *TM Memorandum* (BNA) (Vol. 51, No. 17, 8/16/2010). See also Harris, I Am Not My Brother's Keeper and Other Lessons From the Related-Party Rules of Section 752, *Journal of Taxation* (Jan. 2011). For a scathing critique of proposed regulations under Code § 752, see Lipton, Proposed Regulations on Debt Allocations: Controversial, and Deservedly So, *Journal of Taxation* (WG&L), Vol. 120, No. 4 (April 2014); the proposed regulations were converted into final and temporary regulations in October 2016 (see part II.C.3 Allocating Liabilities (Including Debt)), but I have not analyzed how the changes responded to the criticism.

qualified liability, the partnership is treated as transferring consideration to the partner to the extent that the amount of the liability exceeds the partner's share of that liability immediately after the partnership assumes or takes subject to the liability as provided in the disguised sale regulations to Section 707.

[81] Compare Section 351 in general, as well as Sections 357(c) and (d) for contributions of encumbered property to a corporation. It is also possible that Section 357(b) may be an issue.

[82] Reg. 1.707-5(a)(1). The assumption by the partnership of a "qualified liability," in contrast with non-qualified debt, will not be treated as a distribution unless the transfer is otherwise a disguised sale. See Regs. 1.707-3(b)(2), 1.707-5(a)(5) . There is also the prospect to structure the transaction as a debt-financed distribution in accordance with Reg. 1.707-5(b)(1). See *Tribune Media Co.*, TC Memo 2021-122 ; Commentary, Parillo, "Tax Pros Speculate on IRS's Appeal of Tribune Media," Tax Notes Federal, 2/6/2023, p. 905; Parillo, "DOJ's Anti-Abuse Argument in Tribune Media Is Off Base, Say Critics," Tax Notes Federal, 6/5/2023, p. 1738.

See parts II.M.2 Buying into or Forming a Corporation (including subparts discussing Code §§ 351 and 357) and II.M.3.e Exception: Disguised Sale Rules.

II.M.3.e. Exception: Disguised Sale Rules

Reg § 1.731-1(c)(3) provides:

> If there is a contribution of property to a partnership and within a short period:
>
> (i) Before or after such contribution other property is distributed to the contributing partner and the contributed property is retained by the partnership, or
>
> (ii) After such contribution the contributed property is distributed to another partner,
>
> such distribution may not fall within the scope of section 731. Section 731 does not apply to a distribution of property, if, in fact, the distribution was made in order to effect an exchange of property between two or more of the partners or between the partnership and a partner. Such a transaction shall be treated as an exchange of property.

Code § 707(a)(2) provides:

> Under regulations prescribed by the Secretary—
>
> (B) *Treatment of certain property transfers*. If-
>
> (i) there is a direct or indirect transfer of money or other property by a partner to a partnership,
>
> (ii) there is a related direct or indirect transfer of money or other property by the partnership to such partner (or another partner), and

(iii) the transfers described in clauses (i) and (ii), when viewed together, are properly characterized as a sale or exchange of property,

such transfers shall be treated either as a transaction described in paragraph (1) or as a transaction between 2 or more partners acting other than in their capacity as members of the partnership.

Together with cases and other authority, these statutes set the stage for parts:

- II.M.3.e.i Disguised Sale When Partner Who Contributes Property Receives a Distribution,
- II.M.3.e.ii Disguised Sale When One Partner Contributes Property and Another Receives a Distribution, and
- II.Q.8.b.i.(c) Disguised Sale from Partnership to Partner.

II.M.3.e.i. Disguised Sale When Partner Who Contributes Property Receives a Distribution

Another case in which a partnership contribution can lead to tax consequences is when a partner transfers property to the partnership and there is a related transfer back to the partner, which falls outside the scope of part II.Q.8.b.i.(a) Code § 731: General Rule for Distributions. When a partner receives a direct or indirect transfer of money or other property related to a transfer that partner made to the partnership, the transfer can be treated as a sale or exchange of property between partner and the partnership;[3585] furthermore, if a partner contributes cash in connection with a distribution of property, the partnership may be treated as making a disguised

[3585] Code § 707(a)(2) and Reg. § 1.707-3(b). Reg. § 1.707-3(f), Example (1) describes the consequences of a transfer that is partly a sale and partly a transfer for a partnership interest.
For more on whether a transfer is a disguised sale, see A Tale of Two Cases: G-I Holdings and Virginia Historic Tax Credit Fund—Can They Both Be Right?, *Journal of Taxation* (Mar. 2010), discussing *In re: G-I Holdings, Inc.*, 105 AFTR.2d 2010-697 (D. N.J. 2009) and *Virginia Historic Tax Credit Fund 2001 LP v. Commissioner*, T.C. Memo. 2009-295, in which the authors conclude, Taxpayers should be heartened by the court's rulings in these cases because they illustrate that partnership transactions structured with undeniable elements of risk sharing and recourse financing should be respected by the courts and the Service, but then caution that, If a taxpayer wishes to structure certain types of leveraged partnership transactions to minimize the risk of an economic substance challenge by the Service, care should be taken that any such arrangement involves the bearing of both risks and benefits—including having the loan structured as a recourse obligation of a creditworthy party. However, *Virginia Historic Tax* was reversed, 639 F.3d 129 (4th Cir. 2011); the Fourth Circuit's holding was followed in *Route 231, LLC v. Commissioner*, T.C. Memo. 2014-30, *aff'd* 810 F.3d 247 (4th Cir. 2016), and *SWF Real Estate LLC v. Commissioner*, T.C. Memo. 2015-63. See *Canal Corporation v. Commissioner*, 135 T.C. 199 (2010), characterizing a transaction as a disguised sale (transfer to partnership of assets worth $775 million, simultaneously receiving a $755 million cash distribution from the partnership) and imposing a substantial understatement penalty when the taxpayer relied on a tax opinion for which the taxpayer paid an $800,000 contingent fee, the sole contingency being the issuance of a should opinion; the court cited several cases preventing a taxpayer from relying on opinions given by promoters of various transactions. See also the anti-abuse regulations, Reg. § 1.701-2, under which transactions could be recharacterized to the extent not expressly addressed by exceptions to the disguised sale rules. For a critical analysis of *Canal Corporation v. Commissioner*, see Rubin, Whiteway, and Finkelstein, Partnership Tax Planning: Navigating the Canal, *Practical Tax Strategies*, Vol. 90, No. 5 (5/2013) (although the IRS won that case, a carefully structured leveraged partnership transaction should survive judicial scrutiny).

sale of the property to the partner.[3586] Also, TAM 9510002 asserts that, if a taxpayer merely receives consideration for agreeing to enter into a partnership and transfer property to it and that transaction is found to be separate and distinct from the subsequent transfer of property to the partnership and a later partnership distribution, the entire amount received for agreeing to enter the partnership is taxable as ordinary income in the year received.

Reg. § 1.707-3(b), "Transfers treated as a sale," provides:

(1) *In general*. A transfer of property (excluding money or an obligation to contribute money) by a partner to a partnership and a transfer of money or other consideration (including the assumption of or the taking subject to a liability) by the partnership to the partner constitute a sale of property, in whole or in part, by the partner to the partnership only if based on all the facts and circumstances -

(i) The transfer of money or other consideration would not have been made but for the transfer of property; and

(ii) In cases in which the transfers are not made simultaneously, the subsequent transfer is not dependent on the entrepreneurial risks of partnership operations.

(2) *Facts and circumstances*. The determination of whether a transfer of property by a partner to the partnership and a transfer of money or other consideration by the partnership to the partner constitute a sale, in whole or in part, under paragraph (b)(1) of this section is made based on all the facts and circumstances in each case. The weight to be given each of the facts and circumstances will depend on the particular case. Generally, the facts and circumstances existing on the date of the earliest of such transfers are the ones considered in determining whether a sale exists under paragraph (b)(1) of this section. Among the facts and circumstances that may tend to prove the existence of a sale under paragraph (b)(1) of this section are the following:

(i) That the timing and amount of a subsequent transfer are determinable with reasonable certainty at the time of an earlier transfer;

(ii) That the transferor has a legally enforceable right to the subsequent transfer;

(iii) That the partner's right to receive the transfer of money or other consideration is secured in any manner, taking into account the period during which it is secured;

(iv) That any person has made or is legally obligated to make contributions to the partnership in order to permit the partnership to make the transfer of money or other consideration;

(v) That any person has loaned or has agreed to loan the partnership the money or other consideration required to enable the partnership to make the transfer, taking into account whether any such lending obligation is subject to contingencies related to the results of partnership operations;

[3586] See part II.Q.8.b.i.(c) Disguised Sale from Partnership to Partner.

(vi) That the partnership has incurred or is obligated to incur debt to acquire the money or other consideration necessary to permit it to make the transfer, taking into account the likelihood that the partnership will be able to incur that debt (considering such factors as whether any person has agreed to guarantee or otherwise assume personal liability for that debt);

(vii) That the partnership holds money or other liquid assets, beyond the reasonable needs of the business, that are expected to be available to make the transfer (taking into account the income that will be earned from those assets);

(viii) That partnership distributions, allocations or control of partnership operations is designed to effect an exchange of the burdens and benefits of ownership of property;

(ix) That the transfer of money or other consideration by the partnership to the partner is disproportionately large in relationship to the partner's general and continuing interest in partnership profits; and

(x) That the partner has no obligation to return or repay the money or other consideration to the partnership, or has such an obligation but it is likely to become due at such a distant point in the future that the present value of that obligation is small in relation to the amount of money or other consideration transferred by the partnership to the partner.

II.M.3.e.i.(a). Distributions Presumed to Be Disguised Sales

Transfers to the contributing partner are presumed to be a sale or exchange if made within two years of one another, unless the facts and circumstances clearly establish the transfers were not a sale or exchange;[3587] however, the presumption of no disguised sale can be rebutted, particularly by step transaction principles.[3588] Among the facts and circumstances that may tend to prove the existence of a disguised sale are the following:[3589]

[3587] Reg. § 1.707-3(c)(1).

[3588] In Reg. § 1.701-2(d), Example (8), a three-year wait did not prevent a pre-arranged transaction from constituting a disguised sale.

[3589] Reg. § 1.707-3(b)(2). *Gateway Hotel Partners, LLC v. Commissioner*, T.C. Memo. 2014-5, applied this test, giving greatest weight to the first two factors under those particular circumstance, to find that no disguised sale had occurred. See Lipton, *Gateway Hotel Partners*: Decision Illustrates the Disguised Sale Quandary, *Journal of Taxation* (7/2014), offering tips in addition to analyzing the law:

> It was also interesting to observe the manner in which the court and the IRS reviewed all of the documents involved in the transaction. The IRS was essentially looking for a gotcha document to support its argument that the transaction should be subject to different tax consequences, while the taxpayer had to defend each of the relevant documents and explain some apparent inconsistencies. It probably would have been better for the taxpayer if it had entered into some type of master agreement explaining the manner in which the transaction documents should be interpreted, thereby assuring that any minor inconsistencies (such as language in resolutions) could not be used as a basis to completely alter the tax consequences of the transaction. When a transaction has numerous complex steps (as these transactions did), the language of the transaction may appear to have a plain meaning to the drafter of the transaction but ambiguities will almost certainly appear with hindsight. The court appeared to address the various ambiguities so as to reach the right result, but the taxpayer would likely have saved substantial

(i) That the timing and amount of a subsequent transfer are determinable with reasonable certainty at the time of an earlier transfer;

(ii) That the transferor has a legally enforceable right to the subsequent transfer;

(iii) That the partner's right to receive the transfer of money or other consideration is secured in any manner, taking into account the period during which it is secured;

(iv) That any person has made or is legally obligated to make contributions to the partnership in order to permit the partnership to make the transfer of money or other consideration;

(v) That any person has loaned or has agreed to loan the partnership the money or other consideration required to enable the partnership to make the transfer, taking into account whether any such lending obligation is subject to contingencies related to the results of partnership operations;

(vi) That the partnership has incurred or is obligated to incur debt to acquire the money or other consideration necessary to permit it to make the transfer, taking into account the likelihood that the partnership will be able to incur that debt (considering such factors as whether any person has agreed to guarantee or otherwise assume personal liability for that debt);

(vii) That the partnership holds money or other liquid assets, beyond the reasonable needs of the business, that are expected to be available to make the transfer (taking into account the income that will be earned from those assets);

(viii) That partnership distributions, allocations or control of partnership operations is designed to effect an exchange of the burdens and benefits of ownership of property;

(ix) That the transfer of money or other consideration by the partnership to the partner is disproportionately large in relationship to the partner's general and continuing interest in partnership profits; and

(x) That the partner has no obligation to return or repay the money or other consideration to the partnership, or has such an obligation but it is likely to become due at such a distant point in the future that the present value of that obligation is small in relation to the amount of money or other consideration transferred by the partnership to the partner.

This rule can be especially important when a partner contributes to the partnership property subject to a liability. If the partnership assumes or takes subject to the liability, the transfer may be considered a sale and some or all of the liability amount may be treated as consideration received by the contributing partner.[3590] If the liability assumed or taken subject to is considered

money (in legal fees) and have had much less heartburn if there had been an overriding document that explained how all of the various transaction documents should have been interpreted.

[3590] Reg. § 1.707-5.

a "qualified liability"[3591] (and refinancing a qualified liability - or the transfer of a liability in conjunction with the transfer of a business it historically financed - does not appear to change its character),[3592] then the liability is not treated as consideration for a sale unless some other reason exists for the transfer to be treated as such.[3593] If the liability is not a qualified liability, then the partner is treated as having received consideration for his transfer to the extent the amount of the liability exceeds the partner's share of that liability immediately after the partnership assumes or takes subject to the liability.[3594] My understanding is that liabilities that are not qualified liabilities can surprisingly change the calculations that would apply relative to involving only qualified liabilities.[3595] Generally,[3596] a partner steps in the shoes of a person for

---

3591 Reg. § 1.707-5(a)(6)(i) describes qualified liabilities as:

(A) A liability that was incurred by the partner more than two years before the earlier of the date the partner agrees in writing to transfer the property or the date the partner transfers the property to the partnership and that has encumbered the transferred property throughout that two-year period;

(B) A liability that was not incurred in anticipation of the transfer of the property to a partnership, but that was incurred by the partner within the two-year period before the earlier of the date the partner agrees in writing to transfer the property or the date the partner transfers the property to the partnership and that has encumbered the transferred property since it was incurred (additional rules apply to a liability incurred within two years of a property transfer or of a written agreement to transfer);

(C) A liability that is allocable under the rules of Reg. § 1.163-8T to capital expenditures (as described under Reg. § 1.707-4(d)(5)) with respect to the property;

(D) A liability that was incurred in the ordinary course of the trade or business in which property transferred to the partnership was used or held, but only if all the assets related to that trade or business are transferred other than assets that are not material to a continuation of the trade or business; or

(E) A liability that was not incurred in anticipation of the transfer of the property to a partnership, but that was incurred in connection with a trade or business in which property transferred to the partnership was used or held, but only if all the assets related to that trade or business are transferred other than assets that are not material to a continuation of the trade or business (additional rules apply to a liability incurred within two years of a transfer presumed to be in anticipation of the transfer)….

If the liability is a recourse liability, the amount of the liability cannot exceed the fair market value of the transferred property (less the amount of any other liabilities that are senior in priority and that either encumber such property or are certain other liabilities) at the time of the transfer. Reg. § 1.707-5(a)(6)(ii).

3592 Qualified liabilities do not lose their character as such by being transferred, along with related business assets, to a disregarded entity that is then contributed to the partnership. Letter Ruling 201714028, which (subject to various representations) held the following to constitute qualified liabilities under Reg. § 1.707-5(a)(6)(i)(E) (highlighting added):

> All of the Liabilities were incurred more than f years before the proposed Transfer. Some of the Liabilities were originally incurred to make distributions in connection with Company's formation on D1 and have been subsequently refinanced. The remaining balance of the Liabilities have been used to acquire assets, make improvements, pay expenses, and otherwise operate Company's business and that of its subsidiaries, including to refinance other liabilities incurred for the same purposes. Company has also regularly distributed cash to its members in proportion to their ownership interests. Those cash distributions, however, have been less than Company's earnings. The Liabilities (and the liabilities they refinanced) are an integral part of Company's existing and historical capital structure.

3593 Reg. § 1.707-5(a)(5)(i).

3594 Reg. § 1.707-5(a)(1).

3595 Recorded discussion of these rules at the American Bar Association Section on Taxation's Midyear (January) 2017 meeting.

3596 The exception is Reg. § 1.707-5(e)(2), which provides:

> If an interest in a partnership that has one or more liabilities (the lower-tier partnership) is transferred to another partnership (the upper-tier partnership), the upper-tier partnership's share

purposes of Reg. § 1.707-5(a) with respect to a liability the person incurred or assumed to the extent the partner assumed or took property subject to the liability from the person in a nonrecognition transaction described in Code § 351,[3597] 381(a), 721,[3598] or 731.[3599]

Reg. § 1.707-5(a)(2), "Partner's share of liability," provides that a partner's share of any liability of the partnership is determined under the following rules:

(i) *Recourse liability*. A partner's share of a recourse liability of the partnership equals the partner's share of the liability under the rules of section 752 and the regulations in this part under section 752. A partnership liability is a recourse liability to the extent that the obligation is a recourse liability under § 1.752-1(a)(1) or would be treated as a recourse liability under that section if it were treated as a partnership liability for purposes of that section.

(ii) *Nonrecourse liability*. A partner's share of a nonrecourse liability of the partnership is determined by applying the same percentage used to determine the partner's share of the excess nonrecourse liability under § 1.752-3(a)(3). A partnership liability is a nonrecourse liability of the partnership to the extent that the obligation is a nonrecourse liability under § 1.752-1(a)(2) or would be a nonrecourse liability of the partnership under § 1.752-1(a)(2) if it were treated as a partnership liability for purposes of that section.

For Code § 752 and the regulations thereunder, see part II.C.3.c Allocations of Recourse and Nonrecourse Liabilities.

When revising Reg. § 1.707-5(a)(2) to provide as above, T.D. 9876, "Removal of Temporary Regulations on a Partner's Share of a Partnership Liability for Disguised Sale Purposes," RIN 1545-BO05 (10/9/2019), also revised the following provisions of Reg. § 1.707-5(f):

(2) *Example (2)*. *Partnership's assumption of recourse liability encumbering transferred property*.

(i) C transfers property Y to a partnership. At the time of its transfer to the partnership, property Y has a fair market value of $10,000,000 and is subject to an $8,000,000 liability that C incurred, immediately before transferring property Y to the partnership, in order to finance other expenditures. Upon the transfer of property Y to the partnership, the partnership assumed the liability encumbering

of any liability of the lower-tier partnership that is treated as a liability of the upper-tier partnership under § 1.752-4(a) is treated as a qualified liability under paragraph (a)(6)(i) of this section to the extent the liability would be a qualified liability under paragraph (a)(6)(i) of this section had the liability been assumed or taken subject to by the upper-tier partnership in connection with a transfer of all of the lower-tier partnership's property to the upper-tier partnership by the lower-tier partnership. For purposes of determining whether the liability constitutes a qualified liability under paragraphs (a)(6)(i)(B) and (E) of this section, a determination that the liability was not incurred in anticipation of the transfer of property to the upper-tier partnership is based on whether the partner in the lower-tier partnership anticipated transferring its interest in the lower-tier partnership to the upper-tier partnership at the time the liability was incurred by the lower-tier partnership.

[3597] See part II.M.2 Buying into or Forming a Corporation.

[3598] See part II.M.3 Buying into or Forming a Partnership.

[3599] Reg. § 1.707-5(a)(8). For Code § 731, see part II.Q.8.b.i Distribution of Property by a Partnership.

that property. The partnership assumed this liability solely to acquire property Y. Under section 752 and the regulations in this part under section 752, immediately after the partnership's assumption of the liability encumbering property Y, the liability is a recourse liability of the partnership and C's share of that liability is $7,000,000.

(ii) Under the facts of paragraph (f)(2)(i) of this section (Example 2), the liability encumbering property Y is not a qualified liability. Accordingly, the partnership's assumption of the liability results in a transfer of consideration to C in connection with C's transfer of property Y to the partnership in the amount of $1,000,000 (the excess of the liability assumed by the partnership ($8,000,000) over C's share of the liability immediately after the assumption ($7,000,000)). See paragraphs (a)(1) and (2) of this section.

(3) *Example (3)*. *Subsequent reduction of transferring partner's share of liability*.

(i) The facts are the same as in paragraph (f)(2) of this section (Example 2). In addition, property Y is a fully leased office building, the rental income from property Y is sufficient to meet debt service, and the remaining term of the liability is ten years. It is anticipated that, three years after the partnership's assumption of the liability, C's share of the liability under section 752 will be reduced to zero because of a shift in the allocation of partnership losses pursuant to the terms of the partnership agreement. Under the partnership agreement, this shift in the allocation of partnership losses is dependent solely on the passage of time.

(ii) Under paragraph (a)(3) of this section, if the reduction in C's share of the liability was anticipated at the time of C's transfer, was not subject to the entrepreneurial risks of partnership operations, and was part of a plan that has as one of its principal purposes minimizing the extent of sale treatment under § 1.707-3 (that is, a principal purpose of allocating a large percentage of losses to C in the first three years when losses were not likely to be realized was to minimize the extent to which C's transfer would be treated as part of a sale), C's share of the liability immediately after the assumption is treated as equal to C's reduced share.

(7) *Example (7)*. *Partnership's assumptions of liabilities encumbering properties transferred pursuant to a plan*.

(i) Pursuant to a plan, G and H transfer property 1 and property 2, respectively, to an existing partnership in exchange for interests in the partnership. At the time the properties are transferred to the partnership, property 1 has a fair market value of $10,000 and an adjusted tax basis of $6,000, and property 2 has a fair market value of $10,000 and an adjusted tax basis of $4,000. At the time properties 1 and 2 are transferred to the partnership, a $6,000 nonrecourse liability (liability 1) is secured by property 1 and a $7,000 recourse liability of F (liability 2) is secured by property 2. Properties 1 and 2 are transferred to the partnership, and the partnership takes subject to liability 1 and assumes liability 2. G and H incurred liabilities 1 and 2 immediately prior to transferring properties 1 and 2 to the partnership and used the proceeds for personal expenditures. The liabilities are not qualified liabilities. Assume that G and H are each allocated $2,000 of liability 1 in accordance with paragraph (a)(2)(ii) of this section (which determines a partner's share of a nonrecourse liability). Assume further that G's share of liability 2 is $3,500 and H's share is $0 in accordance with paragraph (a)(2)(i) of this section (which determines a partner's share of a recourse liability).

(ii) G and H transferred properties 1 and 2 to the partnership pursuant to a plan. Accordingly, the partnership's taking subject to liability 1 is treated as a transfer of only $500 of consideration to G (the amount by which liability 1 ($6,000) exceeds G's share of liabilities 1 and 2 ($5,500)), and the partnership's assumption of liability 2 is treated as a transfer of only $5,000 of consideration to H (the amount by which liability 2 ($7,000) exceeds H's share of liabilities 1 and 2 ($2,000)). G is treated under the rule in § 1.707-3 as having sold $500 of the fair market value of property 1 in exchange for the partnership's taking subject to liability 1 and H is treated as having sold $5,000 of the fair market value of property 2 in exchange for the assumption of liability 2.

(8) *Example (8*). *Partnership's assumption of liability pursuant to a plan to avoid sale treatment of partnership assumption of another liability*.

(i) The facts are the same as in paragraph (f)(7) of this section (Example 7), except that—

(A) H transferred the proceeds of liability 2 to the partnership; and

(B) H incurred liability 2 in an attempt to reduce the extent to which the partnership's taking subject to liability 1 would be treated as a transfer of consideration to G (and thereby reduce the portion of G's transfer of property 1 to the partnership that would be treated as part of a sale).

(ii) Because the partnership assumed liability 2 with a principal purpose of reducing the extent to which the partnership's taking subject to liability 1 would be treated as a transfer of consideration to G, liability 2 is ignored in applying paragraph (a)(3) of this section. Accordingly, the partnership's taking subject to liability 1 is treated as a transfer of $4,000 of consideration to G (the amount by which liability 1 ($6,000) exceeds G's share of liability 1 ($2,000)). On the other hand, the partnership's assumption of liability 2 is not treated as a transfer of any consideration to H because H's share of that liability equals $7,000 as a result of H's transfer of $7,000 in money to the partnership.

Reg. § 1.707-9(a)(4) provides effective dates for Reg § 1.707-5(a)(2) and (f)(2), (3), (7), and (8).

If within a two-year period a partner incurs certain types of liability and transfers property to a partnership or agrees in writing to transfer the property, and in connection with the transfer the partnership assumes or takes the property subject to the liability, the liability is presumed to be incurred in anticipation of the transfer unless the facts and circumstances clearly establish that the liability was not incurred in anticipation of the transfer.[3600] Liabilities to fund various preformation expenditures may be excluded from liabilities deemed to have been relieved under

[3600] Reg. § 1.707-5(a)(7)(i).

the disguised sale rules.[3601] If a partner treats a liability assumed or taken subject to by a partnership in connection with a transfer of property as a certain type of qualified liability and the partner incurred the liability within the two-year period before the earlier of the date the partner agrees in writing to transfer the property or the date the partner transfers the property to the partnership, see part II.M.3.e.i.(c) Disclosure Requirements.

If a partner contributes property and the partnership incurs indebtedness, seeking to allocate that debt to the contributing partner to support a distribution to that partner, the IRS might argue that the debt should not have been allocated to that partner.[3602] Also, some of the rules for allocating nonrecourse debt do not apply for purposes of the disguised sale rules, leading to surprisingly unfavorable results.[3603] T.D. 9788 (10/5/2016) explained:

> … for disguised sale purposes only, it is appropriate for partners to determine their share of any partnership liability, whether recourse or nonrecourse under section 752, in the manner in which excess nonrecourse liabilities are allocated under Sec. 1.752-3(a)(3),

---

[3601] Reg. § 1.707-4(d)(1) provides:

(1) *In general*. A transfer of money or other consideration by the partnership to a partner is not treated as part of a sale of property by the partner to the partnership under § 1.707-3(a) (relating to treatment of transfers as a sale) to the extent that the transfer to the partner by the partnership is made to reimburse the partner for, and does not exceed the amount of, capital expenditures that—

- (i) Are incurred during the two-year period preceding the transfer by the partner to the partnership; and
- (ii) Are incurred by the partner with respect to—
  - (A) Partnership organization and syndication costs described in section 709; or
  - (B) Property transferred to the partnership by the partner, but only to the extent the reimbursed capital expenditures do not exceed 20 percent of the fair market value of such property at the time of the transfer (the 20-percent limitation). However, the 20-percent limitation of this paragraph (d)(1)(ii)(B) does not apply if the fair market value of the transferred property does not exceed 120 percent of the partner's adjusted basis in the transferred property at the time of the transfer (the 120-percent test). This paragraph (d)(1)(ii)(B) shall be applied on a property-by-property basis, except that a partner may aggregate any of the transferred property under this paragraph (d)(1) to the extent—
    - (1) The total fair market value of such aggregated property (of which no single property's fair market value exceeds 1 percent of the total fair market value of such aggregated property) is not greater than the lesser of 10 percent of the total fair market value of all property, excluding money and marketable securities (as defined under section 731(c)), transferred by the partner to the partnership, or $1,000,000;
    - (2) The partner uses a reasonable aggregation method that is consistently applied; and
    - (3) Such aggregation of property is not part of a plan a principal purpose of which is to avoid §§ 1.707-3 through 1.707-5.
  - (C) [Reserved].

For a discussion of how this rule works, listen to recordings (primarily Part 2) of "New Partnership Regulations under Sections 707 and 752," a discussion at the January 2017 meeting of the ABA's Section on Taxation that included those who write the regulations, and see slides 15-22 in "New Partnership Regulations under Sections 707 and 752," the latter saved as Thompson Coburn LLP doc. no. 6591807. That discussion also covers the remaining paragraphs of Reg. § 1.707-4(d).

[3602] CCA 201324013.

[3603] See part II.C.3.c.iii Allocating Nonrecourse (Remaining) Liabilities, especially fn. 441 and the accompanying text.

> as limited for disguised sale purposes in the 752 Final Regulations. For purposes of the disguised sale rules, this allocation method reflects the overall economic arrangement of the partners more accurately than the current regulations or the 2014 Proposed Regulations. In most cases, a partnership will satisfy its liabilities with partnership profits, the partnership's assets do not become worthless, and the payment obligations of partners or related persons are not called upon. This is true whether: (1) A partner's liability is assumed by a partnership in connection with a transfer of property to the partnership or by a partner in connection with a transfer of property by the partnership to the partner; (2) a partnership takes property subject to a liability in connection with a transfer of property to the partnership or a partner takes property subject to a liability in connection with a transfer of property by the partnership to the partner; or (3) a liability is incurred by the partnership to make a distribution to a partner under the debt-financed distribution exception in Sec. 1.707-5(b). Accordingly, under the 707 Temporary Regulations, a partner's share of any partnership liability for disguised sale purposes is the same percentage used to determine the partner's share of the partnership's excess nonrecourse liabilities under Sec. 1.752-3(a)(3), as limited for disguised sale purposes under the 752 Final Regulations.
>
> … the 707 Temporary Regulations provide that a partner's share of a partnership liability for disguised sale purposes does not include any amount of the liability for which another partner bears the [economic risk of loss] for the partnership liability under Sec. 1.752-2.
>
> The liability allocation approach for disguised sale purposes in the 707 Temporary Regulations does not conflict with Congress's directive relating to section 752, which had been raised as a potential concern by some commenters with respect to the 2014 Proposed Regulations. Section 79 of the Deficit Reduction Act of 1984 (Pub. L. 98-369) overruled the decision in *Raphan v. United States*, 3 Cl. Ct. 457 (1983) (holding that a guarantee by a general partner of an otherwise nonrecourse liability of the partnership did not require the partner to be treated as personally liable for that liability) and directed the Secretary of the Treasury to amend the regulations under section 752 to reflect the overruling of the *Raphan* decision. At issue in the *Raphan* case was debt allocation under section 752; accordingly, Congress's directive related to regulations under section 752 only. As noted, the 707 Temporary Regulations treat all partnership liabilities, whether recourse or nonrecourse, as nonrecourse liabilities solely for purposes of section 707. Thus, the approach adopted in the 707 Temporary Regulations does not conflict with the approach directed by Congress after the *Raphan* case.

For an explanation of unfair and surprising consequences of applying this rule to nonrecourse debt guaranteed by a partner and a criticism of this rule, see Smith, "Temporary disguised-sale regulations raise concerns," *The Tax Adviser* (7/2017), saved as Thompson Coburn LLP doc. no. 6599934.

Tribune Media Company v. Commissioner, T.C. Memo. 2021-122, held that purported debt intended to reduce gain on an admitted disguised sale (as permitted by Reg. § 1.707-5(b)(1)) was really equity, applying *Dixie Dairies Corp. v. Commissioner*, 74 T.C. 476, 493 (1980).[3604]

For more general rules, see part II.C.3 Allocating Liabilities (Including Debt). "New Partnership Regulations under Sections 707 and 752," a discussion at the January 2017 meeting of the

[3604] See part II.G.20.b When Debt Is Recharacterized as Equity.

ABA's Section on Taxation that included those who write the regulations, discussed 2016 changes to regulations and included slides with charts explaining some key changes.[3605]

II.M.3.e.i.(b). Distributions Presumed Not to Be Disguised Sales

Certain distributions are *presumed* not to constitute disguised sales, subject to certain limitations described further below:

- 150% of AFR.[3606] If the written partnership agreement characterizes a cash distribution as a preferred return[3607] or a guaranteed payment for capital and this distribution is a payment for the use of capital in a reasonable amount,[3608] it is presumed not to be part of a sale of property to the partnership unless the facts and circumstances[3609] clearly establish that the transfer is part of a sale.[3610] A preferred return or guaranteed payment for capital is reasonable in amount if the sum of any such distributions payable for that year do not exceed the amount determined by multiplying either the partner's capital[3611] by 150% of the AFR.[3612]

  - Operating Cash Flow Distributions. An operating cash flow distribution is presumed not to be part of a sale of property to the partnership unless the facts and circumstances clearly establish that the transfer is part of a sale.[3613] If the partnership agreement characterizes a payment as a distribution to a partner, then the payment is an operating cash flow distribution to the extent it does not exceed the partnership's net cash flow from operations for the year multiplied by the lesser of (a) the partner's percentage

[3605] The text above references a two-part panel discussion chaired by Eric Sloan. The slides, "New Partnership Regulations under Sections 707 and 752," are saved as Thompson Coburn LLP doc. no. 6591807.
[3606] AFR refers to the applicable federal rate as defined under Code § 1274, which applies for Code § 7872 as well as in other contexts.
[3607] As used here, preferred return means a preferential distribution of partnership cash flow to a partner with respect to capital contributed to the partnership by the partner that will be matched, to the extent available, by an allocation of income or gain.
[3608] Reg. § 1.707-4(a)(3)(i).
[3609] Including the likelihood and expected timing of the subsequent allocation of income or gain to support the preferred return. Reg. § 1.707-4(a)(2).
[3610] Reg. § 1.707-4(a)(2).
[3611] Based on the partner's unreturned capital at the beginning of the year or, at the partner's option, the partner's weighted average capital balance for the year (with either amount appropriately adjusted, taking into account the relevant compounding periods, to reflect any unpaid preferred return or guaranteed payment for capital that is payable to the partner). A partner's unreturned capital equals the excess of the aggregate amount of money and the fair market value of other consideration (net of liabilities) contributed by the partner to the partnership over the aggregate amount of money and the fair market value of other consideration (net of liabilities) distributed by the partnership to the partner other than transfers of money that are presumed to be reasonable guaranteed payments for capital under Reg. § 1.707-4(a)(1)(ii), transfers of money that are reasonable preferred returns within the meaning of Reg. § 1.707-4(a)(3), and operating cash flow distributions within the meaning of Reg. § 1.707-4(b)(2) (described below). Reg. § 1.707-4(a)(3)(ii).
[3612] Reg. § 1.707-4(a)(3)(ii). The regulation refers to a safe harbor interest rate, which for a partnership's taxable year equals 150% of the highest AFR, at the appropriate compounding period or periods, in effect at any time from the time that the right to the preferred return or guaranteed payment for capital is first established pursuant to a binding, written agreement among the partners through the end of the taxable year.
[3613] Reg. § 1.707-4(b)(1). This exception is especially helpful in preferred partnerships, as described in part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

interest in overall partnership profits for that year, or (b) the partner's percentage interest in overall partnership profits for the partnership's life.[3614] The partnership's net cash flow from operations for a taxable year is an amount equal to the partnership's taxable income or loss arising in the ordinary course of the partnership's business and investment activities:[3615]

- Increased by tax exempt interest, depreciation, amortization, cost recovery allowances and other noncash charges deducted in determining such taxable income, and
- Decreased by:
  - Principal payments made on any partnership indebtedness,
  - Property replacement or contingency reserves actually established by the partnership,
  - Capital expenditures when made other than from reserves or from borrowings the proceeds of which are not included in operating cash flow, and
  - Any other cash expenditures (including preferred returns) not deducted in determining such taxable income or loss.

I tend to suggest preferred returns of operating cash flow over guaranteed payments.[3616] Unfortunately, Reg. § 1.707-4(b)(2)(i) views operating cash flow distributions as protected only "to the extent they do not exceed the product of the net cash flow of the partnership from operations for the year multiplied by the lesser of the partner's percentage interest in overall partnership profits for that year or the partner's percentage interest in overall partnership profits for the life of the partnership."[3617] Presumably, needing to look at the partner's percentage

[3614] Reg. § 1.707-4(b)(2)(i). Without limiting the choices a partner may make in applying this rule, in determining a partner's operating cash flow distributions for a taxable year the partner may use the partner's smallest percentage interest under the terms of the partnership agreement in any material item of partnership income or gain that may be realized by the partnership in the three-year period beginning with that taxable year. Reg. § 1.707-4(b)(2)(ii). In the case of tiered partnerships, the upper-tier partnership must take into account its share of the net cash flow from operations of the lower-tier partnership applying principles similar to those described in Reg. § 1.707-4(b)(2)(i), so that the amount of the upper-tier partnership's operating cash flow distributions is neither overstated nor understated. Reg. § 1.707-4(b)(2)(iii).

[3615] Reg. § 1.707-4(b)(2)(i).

[3616] See fn. 2216. See part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

[3617] Reg. § 1.707-4(b)(2)(i) continues:

> For purposes of the preceding sentence, the net cash flow of the partnership from operations for a taxable year is an amount equal to the taxable income or loss of the partnership arising in the ordinary course of the partnership's business and investment activities, increased by tax exempt interest, depreciation, amortization, cost recovery allowances and other noncash charges deducted in determining such taxable income and decreased by -
> (A) Principal payments made on any partnership indebtedness;
> (B) Property replacement or contingency reserves actually established by the partnership;
> (C) Capital expenditures when made other than from reserves or from borrowings the proceeds of which are not included in operating cash flow; and
> (D) Any other cash expenditures (including preferred returns) not deducted in determining such taxable income or loss.

interest in overall partnership profits for the life of the partnership means that, when the partnership interest is issued, there should be no intent to redeem the partnership interest or waterfalls that cap cumulative payments (the latter meaning that the percentage interest would decrease in later years).

Reg. § 1.707-4(b)(2)(i), "Operating cash flow safe harbor," explains:

> For any taxable year, in determining a partner's operating cash flow distributions for the year, the partner may use the partner's smallest percentage interest under the terms of the partnership agreement in any material item of partnership income or gain that may be realized by the partnership in the three-year period beginning with such taxable year. This provision is merely intended to provide taxpayers with a safe harbor and is not intended to preclude a taxpayer from using a different percentage under the rules of paragraph (b)(2)(i) of this section.

The partnership anti-abuse rules[3618] should not apply when one of the above safe harbors is satisfied. If the transaction is contemplated by a particular regulation, then the situation is not considered an abuse of entity treatment.[3619] However, to minimize any risk that the anti-abuse rules would apply, the seller should not be protected from loss. Looking at the larger picture, the anti-abuse rule applies only if the transaction is inconsistent with Subchapter K's intent. For this purpose, Subchapter K's intent has three prongs:[3620]

- The partnership must be bona fide, and each transaction must have a "substantial business purpose."
- The form of each transaction must be respected under substance over form principles.
- Clear reflection of income: All distributions the old owner receives is being taxed. The new owner is not being taxed on income the new owner does not receive.

II.M.3.e.i.(c). Disclosure Requirements

Certain transactions must be disclosed on Form 8275 or an appropriate statement.[3621]

The transactions requiring disclosure are referred to in:

> § 1.707-3(c)(2) (regarding certain transfers made within two years of each other),

[3618] Reg. § 1.701-2(c)(3).

[3619] Reg. § 1.701-2(e)(2)(i).

[3620] Reg. § 1.701-2(a).

[3621] Reg. § 1.707-8(b), which provides:

> *Method of providing disclosure*. Disclosure is to be made on a completed Form 8275 or on a statement attached to the return of the transferor of property for the taxable year of the transfer that includes the following:
> (1) A caption identifying the statement as disclosure under section 707;
> (2) An identification of the item (or group of items) with respect to which disclosure is made;
> (3) The amount of each item; and
> (4) The facts affecting the potential tax treatment of the item (or items) under section 707.

§ 1.707-5(a)(7)(ii) (regarding a liability incurred within two years prior to a transfer of property), and

§ 1.707-6(c) (relating to transfers of property from a partnership to a partner in situations analogous to those listed above)….

If more than one partner transfers property to a partnership pursuant to a plan, this disclosure may be made by the partnership on behalf of all the transferors rather than by each transferor separately.[3622]

II.M.3.e.ii. Disguised Sale When One Partner Contributes Property and Another Receives a Distribution

This part II.M.3.e.ii discusses whether a contribution to a partnership, followed by a distribution to another partner, constitutes a purchase by the contributing partner of the distributee partner's partnership interest.

Part II.M.3.e Exception: Disguised Sale Rules quotes Reg § 1.731-1(c)(3) and Code § 707(a)(2) as regulatory and statutory authority under the disguised sale rules, which are supplemented by case law and other authority.

Code § 707(a)(2)(B), "Treatment of certain property transfers," provides:

> If -
>
> (i) there is a direct or indirect transfer of money or other property by a partner to a partnership,
>
> (ii) there is a related direct or indirect transfer of money or other property by the partnership to such partner (or another partner), and
>
> (iii) the transfers described in clauses (i) and (ii), when viewed together, are properly characterized as a sale or exchange of property,
>
> such transfers shall be treated either as a transaction described in paragraph (1) or as a transaction between 2 or more partners acting other than in their capacity as members of the partnership.

The Senate report provides the following reason for change:

> In the case of disguised sales, the committee is concerned that taxpayers have deferred or avoided tax on sales of property (including partnership interests) by characterizing sales as contributions of property (including money) followed (or preceded) by a related partnership distribution. Although Treasury regulations provide that the substance of the transaction should govern, court decisions have allowed tax-free treatment in cases which are economically indistinguishable from sales of property to a partnership or another partner. The committee believes that these transactions should be treated for tax purposes in a manner consistent with their underlying economic substance.

[3622] Reg. § 1.707-8(c).

The Senate report explains the change disguised sale provision:

> The bill provides that when a partner transfers money or other property to a partnership which when viewed in connection with a related direct or indirect transfer of money or other property to that partner or another partner is properly characterized as a sale of property, the transaction is to [be] treated (as appropriate) as a sale between the partners of property (including partnership interests) or as a partial sale and partial contribution of the property to the partnership. The selling partner will be required to recognize gain (or loss) on the amount of the sales proceeds treated as received in the transaction. This rule is intended to prevent the parties from characterizing a sale or exchange of property as a contribution to the partnership followed by a distribution from the partnership to defer or avoid tax on the transaction.
>
> To accomplish this, the bill authorizes the Treasury Department to prescribe such regulations as may be necessary or appropriate to carry out the purposes of this provision. In prescribing these regulations, the Treasury should be mindful that the committee is concerned with transactions that attempt to disguise a sale of property and not with non-abusive transactions that reflect the various economic contributions of the partnerships. Similarly, the committee does not intend to change the general rules concerning the tax treatment of the partners under sections 721, 731, and 752 to the extent (1) contributed property is encumbered by liabilities not incurred in anticipation of the contribution, or (2) contributions to a partnership which, because of liabilities of the partnership incurred other than in anticipation of the contribution result in a deemed distribution under sec. 752(b).
>
> It is anticipated that the regulations will apply the provision when the transfer of money or property from the partnership to the partner is related to the transfer of money or other property to the partnership in such manner that, taking into account all the facts and circumstances, the transaction substantially resembles a sale or exchange of all part of the property (including an interest in the partnership). For example, when a partner contributes appreciated property to a partnership and receives a distribution of money or property within a reasonable period before or after such contribution, that is approximately equal in value to the portion of contributed property that is in effect given up to the other partner(s) the transaction will be subject to this provision. However, the distribution would not be so subject if there is a corresponding partnership allocation of income or gain, but that arrangement may instead be subject to the new provision relating to partnership payments for property or services described above. The disguised sale provision also will apply to the extent (1) the transferor partner receives the proceeds of a loan related to the property to the extent responsibility for the repayment of the loan rests, directly or indirectly, with the partnership (or its assets) or the partners, or (2) the partner has received a loan related to the property in anticipation of the transaction and responsibility for repayment of the loan is transferred, directly or indirectly, to the partnership (or its assets) or the other partners.
>
> Although the rule applies to sales of property to the partnership, the committee does not intend to prohibit a partner from receiving a partnership interest in return for contributing property which entitles him to priorities or preferences as to distributions, but is not in substance a disguised sale. Similarly, the committee generally does not intend this provision to adversely affect distributions that create deficit capital accounts (maintained in a manner consistent with Treasury regulations under section 704(b)) for which the distributee is liable, regardless of the timing of the distribution, unless such deficit capital

account is improperly understated or not expected to be made up until such a distant point in the future that its present value is small. However, if this deficit creating distribution is coupled with an allocation of income or gain, the distribution/allocation arrangement may be subject to the new provision relating to partnership payments for services or property. Similarly, the contribution of encumbered property to a partnership would not suggest a disguised sale to the extent responsibility for the debt is not shifted, directly or indirectly, to the partnership (or its assets) or to the non-contributing partners. The committee anticipates that the Treasury regulations will treat transactions to which the provision applies as a sale or property or partnership interests among the partners or as a partial sale and partial contribution of the property to the partnership, with attendant tax consequences, depending upon the underlying economic substance of the transaction. These regulations may provide for a period, such as three years, during which contributions by and distributions to the same or another partner normally will be presumed related. Finally, it is anticipated that the regulations will take into account the effect of liabilities which may accompany effective sales of property to a partnership or another partner.

> No inference regarding the tax treatment of contribution arrangements or any similar transactions under existing law should be drawn from the committee's action.

The conference agreement provides:

> The conference agreement follows the Senate amendment.
>
> The conferees wish to note that when a partner of a partnership contributes property to the partnership and that property is borrowed against, pledged as collateral for a loan, or otherwise refinanced, and the proceeds of the loan are distributed to the contributing partner, there will be no disguised sale under the provision to the extent the contributing partner, in substance, retains liability for repayment of the borrowed amounts (*i.e.*, to the extent the other partners have no direct or indirect risk of loss with respect to such amounts) since, in effect, the partner has simply borrowed through the partnership. However, to the extent the other partners directly or indirectly bear the risk of loss with respect to the borrowed amounts, this may constitute a payment to the contributing partner.

Not until 2004 were proposed regulations issued, which are discussed after reviewing cases leading up to them.

TAM 200037005 asserts that Code § 707(a)(2)(B) applies even if regulations have not been adopted.[3623]

[3623] Looking to cases in other areas, the TAM asserted:

> Although the Service has not promulgated regulations for disguised sales of partnership interests under section 707(a)(2)(B) (Income Tax Regulation Section 1.707-7 is reserved), it may enforce section 707(a)(2)(B) in the context of a disguised sale of a partnership interest in the absence of regulations. See *Pittway Corp. v. United States*, 102 F.3d 932 (7th Cir. 1996) (although the statute provided "to the extent provided in regulations" the plain language of the statue [sic] directs a single conclusion); *Estate of Neuman*, 106 T.C. 216 (1996) (regulations contemplated under section 2663(2) is not a necessary precondition to the imposition of the generation-skipping transfer tax on transfers involved in the case); Rev. Rul. 91-47 (Service enforced

Communications Satellite Corp. v. U.S., 625 F.2d 997 (Ct. Cl. 1980), held that admission of a partner followed by a related distribution to the other partners being diluted was not a disguised sale by the distributees. In that case, the distributee partners, instead of receiving full fair market value, received a proportionate share of their initial capital contribution, adjusted by income and distributions. The court held:

> The effect of the arrangements for admitting new partners was to eliminate the possibility that gains from the reduction of the existing partner's interests resulting from the admission of new partners would influence decisions on admitting new partners. Moreover, these arrangements exhibited in several important respects characteristics not commonly associated with sale transactions.
>
> There were no financial negotiations with the incoming partners by either INTELSAT or the existing partners, and there were no contracts of sale between old and new partners. Neither the partnership nor the existing partners had any control over who joined INTELSAT (other than the restriction in the agreements to members of the International Telecommunications Union) or over the terms under which the new partners joined. The entry fees—the price paid for the partnership interests—had no relationship to the actual value of the new partners' percentage interests in the partnership; there was no attempt at appraising the value of partnership interests at any time. The entry fees were determined mechanically, based not on the fair market value of the partnership or its assets but on the original capitalization of the partnership. Although the Committee had an opportunity to affect the entry fees through its role in setting the incoming quotas, this power was restricted by the requirement that the quotas reflect only the anticipated use of the system and not the business or investment goals of any partner or the partnership.
>
> Although none of these characteristics individually may establish that the transactions were not sales, their combined effect, viewed in the context of the unique and special nature and purpose of this partnership, is inconsistent with the view that the transactions by which new partners were admitted were sales by the existing partners of part of their interests. To the contrary, the receipt by the existing partners of their pro rata share of the amounts paid by new partners to the partnership were distributions of partnership property on which, under section 731, no gain is recognized.

In giving context to Reg § 1.731-1(c)(3), in fn. 6 the court noted:

> An example of the type of transaction that the regulation covers is given in Rev. Rul. 57-200, 1957-1 Cum. Bull. 205. The ruling deals with a situation in which two people each owned half of a partnership and each owned half of two corporations. Each of the partners contributed his half-interest in the two corporations to the partnership, and the partnership thereafter distributed one of the two corporations to each of the partners along with a liquidating distribution of half of the partnership itself. These transfers "constituted steps in an integral transaction entered into for the purpose of effecting an exchange of the corporate stock interests between the partners without the recognition of gain to the partners or the partnership. Accordingly, to such extent, section 731 of the

---

section 108(e)(4), which applies "to the extent provided in regulations" before the regulations were issued). The plain language of the statute, as confirmed by the legislative history, imposes liability on the taxpayer in this case.

Code does not apply ... ." *Id.* At 206. See also 1 A. Willis, *Partnership Taxation* § 33.07 (2d ed. 1976).

Jupiter Corp. v. U.S.[3624] held that, when the contributing partner receives a partnership interest that is very different in nature from that of the distributee partner and both partners stay in the partnership, a disguised sale cannot have occurred.[3625]

TAM 200301004 asserts that Congress adopted Code § 707(a)(2)(B) to overturn *Jupiter Corp.* and *Communications Satellite Corp*.[3626] This assertion originated in Notice 2001-64, which also

---

[3624] 2 Cl. Ct. 58 (Ct. Cl. 1983).

[3625] Describing the interests of the contributing partner, Wilkow Group, and the distributee partners, plaintiff and Empire, the court found no disguised sale:

> The uncontradicted evidence in the record establishes that plaintiff would not have considered a sale, and the Wilkow Group would not have considered a purchase, of a portion of plaintiff's general partnership interest. The economic and legal pre-requisites of plaintiff and the Wilkow Group mandated that the partnership be reorganized to admit the Wilkow Group as new limited partners.
>
> The Wilkow Group's limited partnership interest did not exist prior to the reorganization of the Venture. This newly-created limited partnership interest gave the Wilkow Group cumulative rights to monthly distributions of income which had priority over all distributions to plaintiff and Empire. Neither plaintiff nor Empire owned such a cumulative priority right to the Venture's income prior to the reorganization. The Wilkow Group's limited partnership interest created by the reorganization carried no obligation to advance money needed by the Venture beyond the initial capital contribution and loan. Plaintiff's and Empire's partnership interests imposed such an obligation, to varying extents, both before and after the reorganization. Since the Wilkow Group's limited partnership interest was unique from the partnership interests owned by plaintiff and Empire, the Wilkow Group could not have purchased this interest directly from either partner.
>
> Although plaintiff's general partnership interest was decreased from 77.5 percent to 57.5 percent after the reorganization, plaintiff remained in a more favorable position after the reorganization than it would have if it had directly sold a 20 percent general partnership interest to the Wilkow Group. Both before and after the reorganization, plaintiff remained the sole general partner with 100 percent control of the management of the Venture. Plaintiff did not want to share its management responsibilities with any other partner. Furthermore, the Wilkow Group was not interested in acquiring a share of the management responsibilities. The parties could not have accomplished these goals by a direct purchase and sale of a portion of plaintiff's general partnership interest.
>
> A further indication that this transaction was intended, and could only have been accomplished, as a reorganization of the Venture is found in a change which the amended partnership agreement made in the rights and obligations of plaintiff and Empire vis-a-vis each other. Prior to the reorganization, plaintiff and Empire were both obligated to advance all amounts which the Venture required. After the reorganization, the amended partnership agreement expressly removed Empire's obligation to advance amounts which the Venture needed to make the monthly payments to the Wilkow Group. Of course, no change in the rights between plaintiff and Empire could have been accomplished solely by a direct sale of a portion of plaintiff's general partnership interest to the Wilkow Group.

[3626] The TAM asserted:

> The legislative history of § 707(a)(2)(B) indicates that the provision was adopted as a result of Congress' concern that taxpayers were deferring or avoiding tax on sales of partnership property, including sales of partnership interests, by characterizing sales as contributions of property, including money, followed or preceded by a related partnership distribution. See S. Prt. No. 169, (Vol. I), 98th Cong., 2d Sess. 225 (1984) (hereinafter "S. Prt."); H.R. Rep. No. 432, (Pt. 2) 98th Cong., 2d Sess. 1218 (1984) (hereinafter "H.R. Rep."). Specifically, Congress was concerned about court decisions that allowed tax-free treatment in cases which were economically

announced, "Prior to the issuance of regulations, the determination of whether a transaction is a disguised sale of a partnership interest under section 707(a)(2)(B) is to be made on the basis of the statute and its legislative history."

Expressly assuming another partner's liabilities tends to make the transactions look more like a sale.[3627]

The IRS has asserted that elements of a sale from the distributee partner to the contributing partner include the contribution being the same amount as the redemption[3628] and that the continuing partners' interest did not increase proportionately upon the withdrawal of the partner.[3629]

> indistinguishable from sales of property to a partnership or another partner. See S. Prt. at 225; H.R. Rep. at 1218 (discussing *Jupiter Corp. v. United States*, No. 83-842 (Ct. Cl. 1983) and *Communications Satellite Corp. V. United States*, 223 Ct. Cl 253 (1980) both of which involved the disguised sale of a partnership interest). Congress believed that these transactions should be treated for tax purposes in a manner consistent with their underlying economic substance. See S. Prt. at 225; H.R. Rep. at 1218.

[3627] Distinguishing *Communications Satellite*, *Colonnade Condominium, Inc., v. Commissioner*, 91 T.C. 793 (1988), found a disguised sale, noting:

> The fact that the three shareholders of Colonnade expressly assumed Colonnade's liabilities, in return for partnership interests which are capital assets under section 741, is especially significant. In determining whether an actual or constructive sale or exchange took place, we note that the touchstone for sale or exchange treatment is consideration. In *LaRue v. Commissioner*, 90 T.C. 465, 483-484 (1988), we noted that where liabilities are assumed as consideration for a partnership interest a sale or exchange exists:
>
> > If, in return for assets, any consideration is received, even if nominal in amount, the transaction will be classified as a sale or exchange. *Blum v. Commissioner*, 133 F.2d 447 (2d Cir. 1943). *** When the transferee of property assumes liabilities of the transferor encumbering the property, the liability is an amount realized by the transferor. *Crane v. Commissioner*, [331 U.S. 1 (1947)]; *Commissioner v. Tufts*, [461 U.S. 300 (1983)]. Assumption of liabilities by the transferee constitutes consideration making the transaction a sale or exchange. *Wilkinson v. United States*, 177 F. Supp. 101 (S.D. Ala. 1959).
> > *** Where assets are transferred to third parties, assumption of liabilities constitutes consideration. ***
> > *** the assumption of liabilities by a third party transferee constitutes an amount realized, and this is consideration to the transferor. *Crane v. Commissioner*, [supra]; *Tufts v. Commissioner*, [supra].
>
> I am unsure why the court did not simply invoke Code § 311 to tax a distribution from the corporation to its shareholders.

[3628] FSA 200024001, citing *Jacobson v. Commissioner*, 96 T.C. 577, 587-88 (1991), *aff'd*, 963 F.2d 218 (8th Cir. 1992), asserted:

> The court, however, will look behind the chosen form of a transaction where "elements of artificiality" are present. The presence of such elements can be ascertained by looking at the business purpose for the transaction. *Jacobson*, 96 T.C. at 590. One element of artificiality is that the funds used to terminate Q's interest were derived from U, and not from P. *Jacobson*, 96 T.C. at 592. Pursuant to the Redemption Agreement, Q's entire interest in P would be redeemed for $s and certain contingent payments. Ten days before the redemption date, R and U entered into an agreement wherein U would contribute $s to fund the payment to be made to Q. The agreement also provided that U was required to make a contribution to P in an amount equal to each of the contingent payments to be made to Q.

[3629] FSA 200024001 asserted:

Proposed regulations under Code § 707(a)(2)(B) on the topic of a disguised sale from one partner to another were issued November 26, 2004 (the "Prior Prop. Regs.") and withdrawn January 21, 2009,[3630] and as of 12/16/2017 I am unaware of any having been promulgated after that. The preamble to the Prior Prop. Regs. expressed antipathy to *Communications Satellite* and *Jupiter Corp.*[3631] Although the proposed regulations have been withdrawn, one may want to consider what factors the government viewed as relevant when it issued them:[3632]

(i) That the timing and amount of all or any portion of a subsequent transfer are determinable with reasonable certainty at the time of an earlier transfer;

(ii) That the person receiving the subsequent transfer has a legally enforceable right to the transfer or that the right to receive the transfer is secured in any manner, taking into account the period for which it is secured;

> Another element of artificiality is that the continuing partners' interest did not increase proportionately upon the withdrawal of the partner. Specifically, to the extent the interests of the continuing partners' interest does not increase proportionately upon the withdrawal of a partner, the economic substance of the transaction is generally considered a sale. *Colonnade Condominium, Inc.*, *supra* (where new general partners were admitted to a limited partnership, the interests of one pre-admission general partner decreased, and the interests of all pre-admission limited partners remain unchanged, holding that the general partner whose interest decreased sold a portion of its partnership interest to the new general partners); *Coven v. Commissioner*, 66 T.C. 295 (1976) (holding that the termination of a partner's interest was a sale of the interest to a partner rather than a liquidation because, among other things, the majority partner contributed the cash for the terminating payments and its interest increased while the minority partner's interests did not). After U's contribution of $s to P, the continuing partners' (R and U's) interest did not increase proportionately upon the withdrawal of Q. Rather, U's interest increased to z percent and R's interest remained w percent.
>
> Based on the above facts and circumstances, we conclude that a reasonable inference can be drawn that the overarching business purpose for the transaction was to sell Q's partnership interest in P to U. The substance of the transaction was a transfer of money by a partner, Q, to a partnership, P, followed by a related direct transfer of money by the partnership, P, to another partner, U. The transfers, when viewed together, are properly characterized as a sale or exchange of Q's partnership interest. Accordingly, the transfers must be treated as a transaction between two or more partners acting other than in their capacity as members of the partnership, specifically, as a sale. See I.R.C. section 707(a)(2)(B).

Colonnade is discussed in fn. 3627, and *Coven* is discussed in fn. 5491, the latter being found in part II.Q.8.b.ii.(a) Introduction to Code § 736.

[3630] FR Doc. 2009-1101, withdrawing REG-149519-03 (11/26/2004).

[3631] [REG-149519-03] stated:

> Congressional concern that taxpayers were deferring or avoiding tax on sales of partnership property, including sales of partnership interests, by characterizing sales as contributions of property, including money, followed or preceded by related partnership distributions. See H.R. Rep. No. 861, 98th Cong. 2nd Sess. 861 (1984), 1984-3 (Vol. 2) C.B. 115. Specifically, Congress was concerned about court decisions that allowed tax-free treatment in cases that were economically indistinguishable from sales of property to a partnership or another partner, and believed that these transactions should be treated for tax purposes in a manner consistent with their underlying economic substance. See H.R. Rep. No. 432, 98th Cong. 2nd Sess. 1218 (1984) (H.R. Rep.), and S. Prt. No. 169 (Vol. I), 98th Cong. 2nd Sess. 225 (1984) (S. Prt.) (discussing *Communications Satellite Corp. v. United States*, 625 F.2d 997 (Ct. Cl. 1980), and *Jupiter Corp. v. United States*, 2 Cl. Ct. 58 (1983), both of which involved disguised sales of a partnership interest).

[3632] Former Prop. Reg. § 1.707-7(b)(2).

(iii) That the same property (other than money, including marketable securities that are treated as money under section 731(c)(1)) that is transferred to the partnership by the purchasing partner is transferred to the selling partner;

(iv) That partnership distributions, allocations or control of operations are designed to effect an exchange of the benefits and burdens of ownership of transferred property (other than money, including marketable securities that are treated as money under section 731(c)(1)), including a partnership interest;

(v) That the partnership holds transferred property (other than money, including marketable securities that are treated as money under section 731(c)(1)) for a limited period of time, or during the period of time the partnership holds transferred property (other than money, including marketable securities that are treated as money under section 731(c)(1)), the risk of gain or loss associated with the property is not significant;

(vi) That the transfer of consideration by the partnership to the selling partner is disproportionately large in relationship to the selling partner's general and continuing interest in partnership profits;

(vii) That the selling partner has no obligation to return or repay the consideration to the partnership, or has an obligation to return or repay the consideration due at such a distant point in the future that the present value of that obligation is small in relation to the amount of consideration transferred by the partnership to the selling partner;

(viii) That the transfer of consideration by the purchasing partner or the transfer of consideration to the selling partner is not made pro rata;

(ix) That there were negotiations between the purchasing partner and the selling partner (or between the partnership and each of the purchasing and selling partners with each partner being aware of the negotiations with the other partner) concerning any transfer of consideration; and

(x) That the selling partner and purchasing partner enter into one or more agreements, including an amendment to the partnership agreement (other than for admitting the purchasing partner) relating to the transfers.

(Code § 731(c) is discussed in part II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them).)

Prior Prop. Reg. § 1.707-7(c) provided that, "if within a two-year period a purchasing partner transfers consideration to a partnership and the partnership transfers consideration to a selling partner (without regard to the order of the transfers), the transfers are presumed to be a sale, in whole or in part, of the selling partner's interest in the partnership to the purchasing partner unless the facts and circumstances clearly establish that the transfers do not constitute a sale."

However, Prior Prop. Reg. § 1.707-7(d) presumed that distributions liquidating a partnership interest were not disguised sale to the recipient.[3633] Reg. § 1.761-1(d), "Liquidation of partner's interest," provides:[3634]

> The term "liquidation of a partner's interest" means the termination of a partner's entire interest in a partnership by means of a distribution, or a series of distributions, to the partner by the partnership. A series of distributions will come within the meaning of this term whether they are made in one year or in more than one year. Where a partner's interest is to be liquidated by a series of distributions, the interest will not be considered as liquidated until the final distribution has been made.

Furthermore, Prior Prop. Reg. § 1.707-7 would not have applied to the deemed termination of a partnership.[3635] See part II.Q.8.e.iv Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform).

Also, Prior Prop. Reg. § 1.707-7 would not have applied to service partnerships,[3636] referring to the rules described in part II.G.11 Personal Service Corporations. Furthermore, operating cash

---

[3633] Prior Prop. Reg. § 1.707-7(d) provided:

> *Transfers of money in liquidation of a partner's interest presumed not to be a sale*. Notwithstanding the presumption set forth in paragraph (c) of this section, for purposes of this section, if a partnership transfers money, including marketable securities that are treated as money under section 731(c)(1), to a selling partner, or is treated as transferring consideration to the selling partner under paragraph (j)(2) of this section, in liquidation of the selling partner's interest in the partnership, the transfer is presumed not to be a sale, in whole or in part, of the selling partner's interest in the partnership to the purchasing partner unless the facts and circumstances clearly establish that the transfer is part of a sale. See § 1.761-1(d) for the definition of the term liquidation of a partner's interest.

The preamble to the above explained:

> The IRS and the Treasury Department believe that the abuse that section 707(a)(2)(B) was intended to address typically is not present in situations involving complete liquidations of partners' partnership interests for money. Accordingly, the proposed regulations provide that, notwithstanding the presumption relating to transfers within two years, a transfer of money, including marketable securities that are treated as money under section 731(c)(1), to a selling partner in liquidation of that partner's entire interest in the partnership is presumed not to be part of a disguised sale of that interest. However, the IRS and the Treasury Department recognize that there are instances in which a liquidating distribution may properly be characterized as part of a disguised sale of a partnership interest, particularly when the tax consequences of a liquidating distribution are significantly different from those of a sale of a partnership interest. Accordingly, the presumption against sale treatment may be rebutted in those cases.

[3634] After the quoted language, Reg. § 1.761-1(d) continues:

> For the basis of property distributed in one liquidating distribution, or in a series of distributions in liquidation, see section 732(b). A distribution which is not in liquidation of a partner's entire interest, as defined in this paragraph, is a current distribution. Current distributions, therefore, include distributions in partial liquidation of a partner's interest, interest, and distributions of the partner's distributive share. See paragraph (a)(1)(ii) of § 1.731-1.

[3635] Prior Prop. Reg. § 1.707-7(a)(8) provided:

> *Certain transfers disregarded*. Section 707(a)(2)(B) and the rules of this section do not apply to deemed transfers resulting from a termination of a partnership under section 708(b)(1)(B) and transfers incident to the formation of a partnership. However, transfers incident to the formation of a partnership may be transfers to which § 1.707-3(a) applies.

[3636] Prior Prop. Reg. § 1.707-7(g) provided:

flow distributions and similar safe harbors, under the rules governing disguised sales from a partner to a partnership,[3637] would also have been safe harbors.[3638]

In withdrawing Prop. Reg. § 1.707-7, Ann. 2009-4 stated:

> The Treasury Department and the IRS will continue to study this area and may issue guidance in the future. Until new guidance is issued, any determination of whether transfers between a partner or partners and a partnership is a transfer of a partnership interest will be based on the statutory language, guidance provided in legislative history, and case law.

I am unaware of cases discussing the disguised sale of a partnership interest form one partner to another after the Prior Prop. Regs. were issued. One might consider looking to them as guidelines in planning to try to develop a comfort level in light of the lack of guidance beyond the cases we have toward which the IRS has expressed antipathy.

II.M.3.f. Exception: Corporate Partners

Corporate stock can be transferred to affiliated corporations or their owners in a variety of ways, some of which are tax-free. Some of this involves partnerships of corporations, which partnerships might at first glance appear to allow corporations to shift or increase basis, based on the interaction of Subchapter C and partnership rules. Although these materials touch upon various elements of Subchapter C, one should review materials that focus intensively on Subchapter C when restructuring any structure involving the interaction between more than one C or S corporation.

See part II.Q.7.j Prohibition Against Using Partnership to Circumvent Tax on Gain in Property Used to Redeem Stock.

II.M.3.g. Exception: Foreign Partner

Regulations may provide that Code § 721(a) nonrecognition shall not apply to gain realized on the transfer of property to a partnership if such gain, when recognized, will be includible in the gross income of a foreign person.[3639]

> Exception for certain transfers to and by service partnerships. Section 707(a)(2)(B) and the rules of this section do not apply to transfers of money, including marketable securities that are treated as money under section 731(c)(1), to and by a partnership that would be described in section 448(d)(2) if the partnership were a corporation. Solely for purposes of applying section 448(d)(2) to partnerships under this paragraph (g), partners are treated as employees of the partnership and "partnership interest" is substituted for "stock" in testing for ownership by the employees performing services.

[3637] See part II.M.3.e.i.(b) Distributions Presumed Not to Be Disguised Sales.

[3638] Prior Prop. Reg. § 1.707-7(f) provided:

> *Application of §1.707-4 (special rules applicable to guaranteed payments, preferred returns, operating cash flow distributions, and reimbursements of preformation expenditures)*. Notwithstanding the presumption set forth in paragraph (c) of this section, rules similar to those provided in § 1.707-4 apply to determine the extent to which a transfer to a selling partner is treated as part of a sale of the selling partner's interest in the partnership to the purchasing partner.

[3639] Code § 721(c).

Notice 2015-54 announced detailed rules that will be integrated into regulations effective as to transfers occurring on or after August 6, 2015, as well as transfers occurring before that date that result from entity classification elections that are filed on or after that date, and that are effective on or before that date. T.D. 9814 issued temporary regulations, effective January 18, 2017. The May 2017 meeting of the American Bar Association Section of Taxation included a session with the person who worked on the regulation project. Remarks made by panelists mentioned that one needed to be concerned with foreign taxpayers who were direct or indirect owners of partnership interests and that surprising results could happen even with what seemed to be a simple situation.

II.M.3.h. Reporting Real Estate Contributed to a Partnership or Corporation in a Nontaxable Transaction

The "real estate reporting person" must file an information return (Form 1099) and provide a copy to the grantor.[3640] The person (including any attorney or title company) responsible for closing the transaction has primary responsibility for filing information returns.[3641] The person responsible for closing the transaction is:[3642]

1. If a Uniform Settlement Statement is used under RESPA, the person listed as settlement agent on the statement.

2. If no settlement agent is listed or a closing statement is used that is not a Uniform Settlement Statement, the person who prepared the closing statement.

3. If no closing statement is used or if multiple closing statements are used, then either the transferee's attorney who is present at delivery of the consideration or the transferee's attorney who prepares or reviews the deed, or if no such attorney is present then either the transferor's attorney who is present at delivery of the consideration or the transferor's attorney who prepares or reviews the deed.

The real estate reporting person may not separately charge a customer for reporting the transaction but may take the reporting requirement into account in charging a fee for the overall transaction.[3643]

Except as otherwise provided, all "sales" effected by a broker in the ordinary course of business shall be reported.[3644] Distributions from partnerships do not need to be reported if properly reported on IRS Form 1065 and Schedule(s) K-1.[3645] However, Code § 721 contributions to a partnership and Code § 351 contributions to a corporation were intentionally not excluded from reporting.[3646]

[3640] Code § 6045(e)(1). All references to the Code are to the Internal Revenue Code of 1986, as amended.
[3641] Code § 6045(e)(2)(A).
[3642] Reg. § 1.6045-4(e)(3). Reg. means a United States Treasury Regulation under the Code. Although Code § 6045(a) refers to a broker, Reg. § 1.6045-1(a)(1) defines a broker to include any person who stands ready to effect sales to be made by others.
[3643] Code § 6045(e)(3).
[3644] Reg. § 1.6045-1(c)(2).
[3645] Reg. § 1.6045-1(c)(3)(v).
[3646] Preamble to Reg. § 1.6045-1 under Treasury Decision 8323.

II.M.3.i. All Partners (Members) Should Sign Form W-9, etc. on Formation or Later Admission

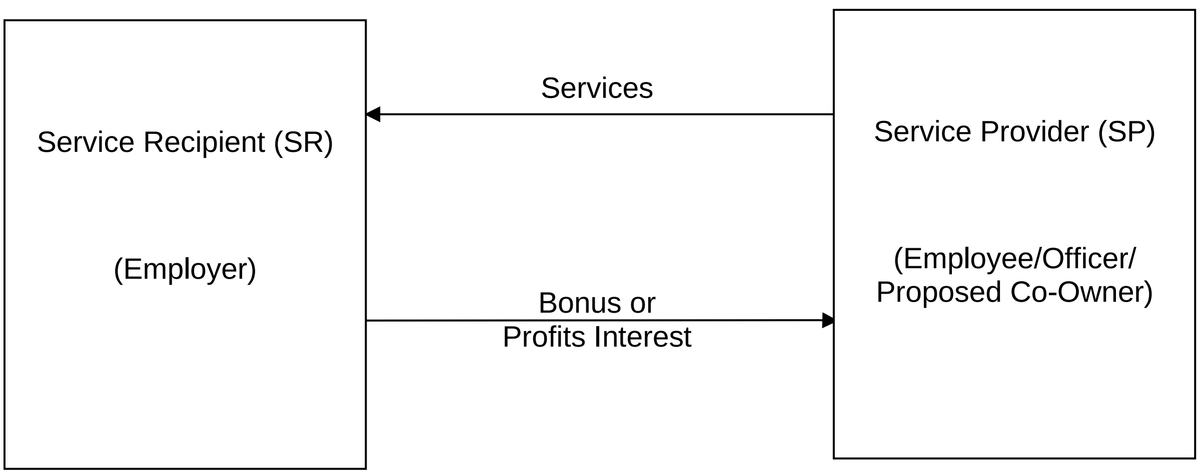
If a partnership has effectively connected taxable income (ECI)[3647] for any taxable year, and any portion of such income is allocable under Code § 704 to a foreign partner, the partnership must pay a withholding tax equal to the applicable percentage of the ECI which is so allocable.[3648]

For purposes of this rule, "foreign partner" means any partner who is not a U.S. person.[3649]

To prove that a partner is a U.S. person and therefore is not a foreign partner subject to withholding, the partner should provide the partnership with a signed Form W-9. If the partner is not a U.S. person, the partnership needs to know that, too, via the appropriate form. See Reg. § 1.1446-1(c)(1).

II.M.4. Providing Equity to Key Employees and an Introduction to Code § 409A Nonqualified Deferred Compensation Rules

II.M.4.a. Overview



Before working in this area, consider reading part II.Q.1.d.i IRS Audit Guide for Nonqualified Deferred Compensation.

In addition to what is described in this part II.M.4, consider part II.P.3.i Common Equity for Preferred Equity and Vice Versa.

II.M.4.a.i. Bonus vs. Equity

Advantages of Bonus

- Service provider (SP) has no rights to information about the business beyond what is necessary to enforce rights to bonus.

[3647] Although Code § 1446(c) modifies the definition of ECI as used in this sentence, the base definition is in part II.E.1.c.ix QBI and Effectively Connected Income.
[3648] Code § 1446(a), (b).
[3649] Code § 1446(e).

- Don't need to worry about buying out SP upon divorce, SP's financial hardship (creditors), disability, death, or other separation from service.

Disadvantages of Bonus

- Code § 409A complicates timing of payment for performance after year-end; however, easy to get around if recognize the issue.

- Code § 409A complicates payments deferred into future as "golden handcuffs."

Advantages of Equity

- Immediate issuance of profits interest or stock often avoids all Code § 409A issues.

- SP feels like an owner and might be more motivated.

- Courts tend to accept more restrictive covenants not to compete, etc. when SP is an owner.

Disadvantages of Equity

- Complicates capital structure. Need to worry about buy-sell-related issues.

- SP might be able to demand more on separation from service, in addition to any employment issues.

- Creditors might very well require loan guarantees of SP, which might make ownership unattractive to SP. This might be more of an advantage, however, in that SP will be much less likely to abandon a sinking ship - because SP might go down with it!

- A transfer of part of the business' current value might be deemed to occur in a family business setting.[3650]

II.M.4.a.ii. Equity vs. Synthetic Equity.

What is synthetic equity?

- Bonus payments that mirror distributions to owners have the same Code § 409A issues as other bonus payments.

- Options to acquire stock or partnership interests are not subject to Code § 409A if a sufficient exercise price that makes them equivalent to profits interest.

[3650] See part III.B.7.b Code § 2701 Overview for when an entity needs to consider gift tax valuation rules when using profits interests and part III.B.7.c Code § 2701 Interaction with Income Tax Planning for planning for equity awards to those in the same family.

Profits Interest vs. Pro Rata Share of Entire Entity

- "Profits interest" means an interest in the partnership's future income, gains, deductions, and losses, with a zero beginning capital account so that, if entity dissolved at the time of transfer, the holder would receive nothing.[3651]

- "Pro rata share of entire entity" means that the owner receives not only a profits interest but also a proportionate share of the proceeds if the entity liquidates.

- Issuance of a profits interest generally is not taxable, but issuance of a pro rata share of entire entity is. Need to gross-up SP for taxes on issuance of a pro rata share of entire entity; however, SR receives an equivalent deduction and tax benefit, so long as timing is not messed up.

- Issuance of a profits interest is forward-looking, whereas issuance of a pro rata share of entire entity often has a large backward-looking component.

- Issuance of a profits interest is more conducive to golden handcuffs. SR distributes enough to pay taxes but holds the rest of the cash until agreed-upon event occurs. Undistributed cash is reflected in SP's capital account (which originally started at zero). Generally, when SP has a pro rata share of entire entity, SP receives distributions at the same time as though who provide investment capital. See S corporation example below.

II.M.4.b. When is an Award or Transfer to an Employee Includible in the Employee's Income

II.M.4.b.i. Overview of Compensatory Options

II.M.4.b.i.(a). Comparison between Qualified and Nonqualified Stock Options

This chart is copied from RIA Checkpoint's *Catalyst*, paragraph 653:101 (6/8/2019):

	Nonqualified stock option (NQSO)	**Incentive stock option (ISO)**	**Employee stock purchase plan (ESPP) option**
Type of entity issuing option	Any type of corporation.	Same.	Same.
Basic requirements to be a compensatory option	(1) Right to acquire stock, (2) at a predetermined price, (3) awarded to the service provider, (4) in	Same.	Same.

[3651] This is done by valuing the partnership's assets at the time the profits interest is issued and booking up the partners' capital accounts under Reg. § 1.704-1(b)(2)(iv)(f)(5)(iii). The partners' capital accounts are adjusted as if the partnership had sold all of its assets for their fair market value, but no gain or loss is recognized and tax basis does not change as a result of that hypothetical sale and actual capital account adjustment. Reg. § 1.704-1(b)(2)(iv)(s) describes capital account rules triggered by noncompensatory options, which options are described in Reg. § 1.721-2(f).

	Nonqualified stock option (NQSO)	Incentive stock option (ISO)	Employee stock purchase plan (ESPP) option
	exchange for services, by the service recipient.		
Qualification as NQSO, ISO, or ESPP option	Any option that is not a qualified option (*e.g.*, not an ISO or ESPP option) is an NQSO.	Must meet the requirements for an ISO at IRC § 422. The key requirements are: (1) only awarded to employees; (2) exercise price must at least equal grant-date stock value; (3) for each employee, the value of stock subject to exercise is limited to $100,000 worth of stock in the first year ISO can be exercised; (4) maximum 10-year term; and (5) nontransferable, except on death.	Must meet the requirements for an ESPP option at IRC § 423. The key requirements are: (1) only awarded to employees (or employees of a related company); (2) cannot be granted to employees owning more than 5% of company stock after grant of options; (3) most employees must be covered by the ESPP plan, and all options must have the same rights and privileges; (4) the exercise price must be at least 85% of the grant-date stock value or 85% of the exercise-date stock value; (5) if the exercise price is based on the exercise-date stock value, then the option term cannot be more than five years (otherwise the term cannot be more than 27 months); (6) an employee cannot purchase stock worth more than $25,000 per year in grant-date value; and (7) nontransferable, except on death.
Taxability on option	Taxable if the NQSO has an ascertainable	Not taxable.	Not taxable.

	Nonqualified stock option (NQSO)	Incentive stock option (ISO)	Employee stock purchase plan (ESPP) option
grant	fair market value or does not meet the requirements for nontaxability in IRC § 409A.		
Taxability of stock receipt on option exercise if stock is substantially vested	Taxable as compensation income based on the value of stock received.	Not taxable.	Not taxable.
Taxability of stock receipt on option exercise if stock is substantially nonvested	Not taxable on exercise if substantially nonvested. Taxable when the stock becomes substantially vested, which is when the stock is either (1) transferable or (2) no longer subject to a substantial risk of forfeiture; however, optionee can elect under IRC § 83(b) to treat stock as substantially vested.	Not taxable.	Not taxable.
Election to defer income for up to five years under IRC § 83(i)	Applies to NQSOs.	Applies to nonqualified ISOs, converting them to NQSOs.	Applies to nonqualified ESPP options, converting them to NQSOs.
Holding period requirements for stock acquired on exercise	None.	Two years from option grant date and one year after stock received on exercise of option.	Two years from option grant date and one year after stock received on exercise of option.
Sale of stock acquired on exercise of NQSO	Capital gain or loss results from sale of stock.	N/A	N/A

	Nonqualified stock option (NQSO)	Incentive stock option (ISO)	Employee stock purchase plan (ESPP) option
Sale of stock acquired on exercise of ISO or ESPP option if a qualifying disposition (*i.e.*, holding period requirements met)	N/A	Long-term capital gain or loss.	Compensation equal to the lesser of (1) the excess of the grant-date stock value over the grant-date exercise price, or (2) the excess of the stock value on disposition over the exercise price. Remaining gain is long-term capital gain.
Sale of stock acquired on exercise of ISO or ESPP option if a disqualifying disposition (*i.e.*, holding period requirements not met)	N/A	Compensation income recognized on sale date equal to the lesser of (1) total gain recognized on sale or (2) unrecognized income on the exercise date. Any additional gain is capital gain.	Compensation income recognized on sale date equal to the unrecognized income on exercise date. Capital gain is then recognized equal to the excess of the sale price over the exercise-date value; capital loss is recognized equal to the excess of the exercise-date value over the sale price.
Effect of modification	A modification requires retesting of the option for taxability, as if it were a new option.	A modification requires retesting of the option as an ISO. In addition, a modification restarts the holding period.	A modification requires retesting of the option as an ESPP option. In addition, a modification restarts the holding period.
Employer tax accounting	An employer recognizes compensation cost in an amount equal to the compensation income recognized by the service provider. The employer recognizes cost in the same period the service provider recognizes the	Same.	Same, except that compensation income recognized by the service provider in an amount equal to the excess of the grant-date value over the grant-date exercise price is not recognized as compensation cost by the employer.

	Nonqualified stock option (NQSO)	Incentive stock option (ISO)	Employee stock purchase plan (ESPP) option
	income. The employer does not account for capital gain recognized by the service provider on sale of stock.		
Transfers of options	Transferor taxed as if option exercised on transfer date. Exceptions: • Gift transfer: no income on transfer, but transferor taxed when transferee exercises the option. • Transfer incident to divorce: no income on transfer and transferee (former spouse) recognizes ordinary income on exercise. • Transfer at death: no income on transfer by decedent, and estate or heirs have ordinary income on exercise.	An ISO can only be transferred at death. A transfer at death results in the recipient being treated the same as the decedent, except that the holding period rules do not apply.	An ESPP option can only be transferred at death. A transfer at death results in the recipient being treated the same as the decedent, except that the holding period rules do not apply.
Special rules under alternative minimum tax	None.	An ISO is treated as an NQSO for AMT purposes.	None.

II.M.4.b.i.(b). Comparison between Stock and Partnership Options

This chart is copied from RIA Checkpoint's *Catalyst*, paragraph 653:102 (6/8/2019):

	Nonqualified stock option (NQSO)	Nonqualified partnership option (NQPO)
Type of entity issuing option	Any type of corporation.	Partnership.
Basic requirements to be a compensatory option	(1) Right to acquire stock, (2) at a predetermined price, (3) awarded to the service	(1) Right to acquire partnership interest, (2) at a predetermined price,

	Nonqualified stock option (NQSO)	Nonqualified partnership option (NQPO)
	provider, (4) in exchange for services, by the service recipient.	(3) awarded to the service provider, (4) in exchange for services, by the service recipient.
Qualification as NQSO or partnership option	Any option that is not a qualified option (*e.g.*, not an ISO or ESPP option) is an NQSO.	Any option to acquire a partnership interest.
Taxability on grant	Taxable if the NQSO has a readily ascertainable fair market value or does not meet the requirements for nontaxability in IRC § 409A.	If the partnership interest is treated as stock, such as when interests in publicly traded partnerships are traded on stock exchanges, the interest would likely be taxable if the option has a readily ascertainable fair market value. Taxable if the option does not meet the requirements for nontaxability in IRC § 409A.
Taxability on exercise of option and receipt of stock or partnership interest that is substantially vested	Taxable as compensation income based on the value of stock received.	Taxable as compensation income based on the value of partnership capital interest received. May not be taxable if a partnership profits interest is received.
Taxability on exercise of option and receipt of stock or partnership interest that is not transferable and is substantially nonvested	Not taxable on exercise if substantially nonvested. Taxable when the stock becomes substantially vested, which is when the stock is either transferable or no longer subject to a substantial risk of forfeiture; however, optionee can elect under IRC § 83(b) to treat stock as substantially vested.	Capital interest not taxable on exercise. Taxable when transferable or the risk of forfeiture lapses; however, the optionee can elect under IRC § 83(b) to treat partnership capital interest as vested. Profits interest may be treated as vested or not vested.
Election to defer income for up to five years under IRC § 83(i)	Applies to NQSOs.	Does not apply.
Holding period requirements	None.	Profits interest may be taxed as capital interest if profits

	Nonqualified stock option (NQSO)	Nonqualified partnership option (NQPO)
for stock or partnership interest acquired on exercise		interest disposed of within two years.
Sale of substantially vested stock or partnership interest acquired on exercise of NQSO or partnership option	Capital gain or loss results from sale of stock.	Capital gain or loss on sale of capital interest or profits interest. However, if profits interest sold within two years of receipt, may trigger compensation (ordinary income).
Effect of modification	A modification requires retesting of the option for taxability, as if it were a new option.	Same.
Employer tax accounting	An employer recognizes compensation cost in an amount equal to the compensation income recognized by the service provider. The employer recognizes cost in the same period the service provider recognizes the income. The employer does not account for capital gain recognized by the service provider on sale of stock.	Same.
Transfers	Transferor taxed as if option exercised on date of transfer. Exceptions: • Gift transfer: no income on transfer, but transferor taxed when transferee exercises the option. • Transfer incident to divorce: no income on transfer and transferee (former spouse) recognizes ordinary income on exercise. • Transfer at death: no income on transfer by decedent, and estate or heirs have ordinary income on exercise.	No special rules.

	Nonqualified stock option (NQSO)	Nonqualified partnership option (NQPO)
Special rules under alternative minimum tax	None.	None.

II.M.4.b.ii. Income Tax Recognition Timing Rules re Equity Incentives

Property[3652] is not taxable under Code § 83(a) until it has been transferred to such person and become substantially vested in such person.[3653] For Code § 83 to apply to defer a deduction to a later date when the property was more valuable, the service recipient must show that: (1) the property was transferred in connection with the performance of services and (2) the property was subject to a substantial risk of forfeiture until that later date.[3654]

In determining whether property was transferred in connection with the performance of services, the following factors apply:[3655]

(1) whether the property right is granted at the time the employee or independent contractor signs his employment contract;

(2) whether the property restrictions are linked explicitly to the employee's or independent contractor's tenure with the employing company;

(3) whether the consideration furnished by the employee or independent contractor in exchange for the transferred property is services; and

(4) the employer's intent in transferring the property.

A transfer of property occurs when a person acquires a beneficial ownership interest in such property (disregarding certain lapse restrictions).[3656] Imposing restrictions on substantially

---

[3652] Reg. § 1.83-3(e) provides:

> … the term property includes real and personal property other than either money or an unfunded and unsecured promise to pay money or property in the future. The term also includes a beneficial interest in assets (including money) which are transferred or set aside from the claims of creditors of the transferor, for example, in a trust or escrow account...

[3653] Reg. § 1.83-1(a)(1). *Qinetiq U.S. Holdings, Inc. and Subsidiaries v. Commissioner*, T.C. Memo. 2015-123, *aff'd* 119 A.F.T.R.2d 2017-330 (4th Cir. 1/6/2017), disallowed a C corporation's assertion that stock issued several years before had not vested until right before the corporation was sold. The disputed deduction was almost $118 million.

[3654] *Qinetiq U.S. Holdings, Inc. and Subsidiaries v. Commissioner*, T.C. Memo. 2015-123, *aff'd* 119 A.F.T.R.2d 2017-330 (4th Cir. 1/6/2017), the Fourth Circuit also referring to *Strom v. United States*, 641 F.3d 1051, 1055-56 (9th Cir. 2011); *United States v. Bergbauer*, 602 F.3d 569, 580 (4th Cir. 2010).

[3655] *Qinetiq U.S. Holdings, Inc. and Subsidiaries v. Commissioner*, T.C. Memo. 2015-123 (finding that the taxpayer failed to prove transfer in connection with the performance of services), *aff'd* 119 A.F.T.R.2d 2017-330 (4th Cir. 1/6/2017), the Tax Court citing as follows:

> See *Bagley v. Commissioner*, 806 F.2d at 170-171; *Alves v. Commissioner*, 734 F.2d 478, 481-482 (9th Cir. 1984), *aff'g* 79 T.C. 864 (1982); *Montelepre Systemed, Inc. v. Commissioner*, T.C. Memo. 1991-46 (citing *Centel Commc'ns Co. v. Commissioner*, 92 T.C. 612), *aff'd*, 956 F.2d 496 (5th Cir. 1992).

[3656] Reg. § 1.83-3(a)(1).

vested stock that cause the substantially vested stock to become substantially nonvested does not constitute a transfer of substantially nonvested stock subject to Code § 83.[3657]

Property is substantially vested when it is either transferable or not subject to a substantial risk of forfeiture.[3658]

Based on the facts and circumstances, a substantial risk of forfeiture exists where rights in property that are transferred are conditioned, directly or indirectly, upon the future performance (or refraining from performance) of substantial services by any person, or the occurrence of a condition related to a purpose of the transfer, and the possibility of forfeiture is substantial if such condition is not satisfied.[3659] The regularity of the performance of services and the time spent in performing such services tend to indicate whether services required by a condition are

[3657] Rev. Rul. 2007-49, which also held that there is a transfer of substantially nonvested stock subject to Code § 83 where (a) a service provider exchanges substantially vested stock for substantially nonvested stock in a reorganization described in Code § 368(a), or (b) a service provider exchanges substantially vested stock for substantially nonvested stock in a taxable stock acquisition.

[3658] Reg. § 1.83-3(b). *Gluckman v. Commissioner*, T.C. Memo. 2012-329, *aff'd*, 545 F. App'x 59 (2d Cir. 2013), held:

> Therefore, consistent with the Advantage Plan's provisions and the plan withdrawal procedures communicated to participating employers, at that point it appears that the underlying policies were substantially certain to be distributed to petitioners or placed within their control. Even if transfers to other welfare benefit plans were still being permitted by BISYS at that time, subsequent events demonstrate that the policies were placed within petitioners' control no later than early November 2003. After receiving the resolution, BISYS sent endorsed, partially completed change of ownership forms that lacked only the new owner information and sent blank change of beneficiary designation forms, as well as duplicate copies of the policies, to petitioner's attention. The forms and the original insurance policies also were provided to petitioners' insurance agent. These actions placed petitioners' underlying policies squarely within their control because petitioners were then free to name the policies' new owner and beneficiary, which could have been themselves or another welfare benefit plan. When a taxpayer has dominion and control over property, the value of such property generally will be included in his or her gross income. See *Cadwell v. Commissioner*, 136 T.C. 38, 52-56 (2011), *aff'd* without published opinion, 109 A.F.T.R.2d 2012-2693 (4th Cir. 2012); *Chambers v. Commissioner*, T.C. Memo. 2011-114.

O'Connor v. Commissioner, T.C. Memo. 2015-244, reaffirmed *Gluckman* and imposed penalties when the taxpayer did not give the tax advisor complete information.

[3659] Reg. § 1.83-3(c)(1), which further provides:

> Property is not transferred subject to a substantial risk of forfeiture to the extent that the employer is required to pay the fair market value of a portion of such property to the employee upon the return of such property. The risk that the value of property will decline during a certain period of time does not constitute a substantial risk of forfeiture. A nonlapse restriction, standing by itself, will not result in a substantial risk of forfeiture.

substantial.[3660] Special rules apply where the employee is a significant owner[3661] or where securities laws impose certain restrictions.[3662] When those whose stock is subject to the risk of

[3660] Reg. § 1.83-3(c)(2), which further provides:

> The fact that the person performing services has the right to decline to perform such services without forfeiture may tend to establish that services are insubstantial. Where stock is transferred to an underwriter prior to a public offering and the full enjoyment of such stock is expressly or impliedly conditioned upon the successful completion of the underwriting, the stock is subject to a substantial risk of forfeiture. Where an employee receives property from an employer subject to a requirement that it be returned if the total earnings of the employer do not increase, such property is subject to a substantial risk of forfeiture. On the other hand, requirements that the property be returned to the employer if the employee is discharged for cause or for committing a crime will not be considered to result in a substantial risk of forfeiture. An enforceable requirement that the property be returned to the employer if the employee accepts a job with a competing firm will not ordinarily be considered to result in a substantial risk of forfeiture unless the particular facts and circumstances indicate to the contrary. Factors which may be taken into account in determining whether a covenant not to compete constitutes a substantial risk of forfeiture are the age of the employee, the availability of alternative employment opportunities, the likelihood of the employee's obtaining such other employment, the degree of skill possessed by the employee, the employee's health, and the practice (if any) of the employer to enforce such covenants. Similarly, rights in property transferred to a retiring employee subject to the sole requirement that it be returned unless he renders consulting services upon the request of his former employer will not be considered subject to a substantial risk of forfeiture unless he is in fact expected to perform substantial services.

Austin v. Commissioner, 141 T.C. 551 (2013), held that the following facts might or might not support a finding of substantial risk of forfeiture based on the following definition of cause:

> A. Dishonesty, fraud, embezzlement, alcohol or substance abuse, gross negligence or other similar conduct on the part of the Employee. Upon termination of this Agreement, Employee shall be entitled to receive compensation through the date of termination.
>
> B. Failure or refusal by Employee, after 15 days written notice to Employee, to cure by faithfully and diligently performing the usual and customary duties of his employment and adhere to the provisions of this Agreement.
>
> C. Failure or refusal by Employee, after 15 days written notice to Employee, to cure by complying with the reasonable policies, standards and regulations applicable to employees which * * * [UMLIC S-Corp.] may establish from time to time.

The court looked carefully at the circumstances behind that regulation's promulgation and reasoned:

> This history of section 1.83-3(c)(2), Income Tax Regs., strongly suggests that discharge for cause, like discharge for committing a crime, refers to a narrow and serious form of employee misconduct that is very unlikely to occur and is thus properly regarded as too remote - as a matter of law - to create a substantial risk of forfeiture.

After trial, T.C. Memo. 2017-69, the court held:

> In sum, we conclude that petitioners' stock was subject to a substantial risk of forfeiture when issued to them in 1998 and remained subject to that risk until the restrictions lapsed on January 1, 2004. Neither petitioner held a controlling position in UMLIC S-Corp. If either failed to perform his duties or left the company before the earnout restriction ended, the other would have had every incentive to insist on enforcement of the forfeiture provision according to its terms. The ESOP had (if anything) even stronger economic incentives to do this. Because "the possibility of forfeiture … [was] substantial," sec. 1.83-3(c)(3), Income Tax Regs., the stock held by petitioners and their grantor trusts did not become "substantially vested" until petitioners completed their promised service through the five-year earnout period.

Austin was affirmed under the name *Estate of Kechijian v. Commissioner*, 962 F.3d 800 (4th Cir. 6/23/2020), *reh'g den.* 8/21/2020. The Fourth Circuit also recognized that basis from purchase of one block of stock cannot be applied as, basis of another block of stock that the same owner held in the same S corporation.

In *Qinetiq U.S. Holdings, Inc. and Subsidiaries v. Commissioner*, T.C. Memo. 2015-123, *aff'd* 119 A.F.T.R.2d 2017-330 (4th Cir. 1/6/2017), the Tax Court cited *Austin* (2013) when determining that a corporation failed to prove that the possibility of forfeiture was substantial.

[3661] Reg. § 1.83-3(c)(3) provides:

> In determining whether the possibility of forfeiture is substantial in the case of rights in property transferred to an employee of a corporation who owns a significant amount of the total combined voting power or value of all classes of stock of the employer corporation or of its parent corporation, there will be taken into account (i) the employee's relationship to other stockholders and the extent of their control, potential control and possible loss of control of the corporation, (ii) the position of the employee in the corporation and the extent to which he is subordinate to other employees, (iii) the employee's relationship to the officers and directors of the corporation, (iv) the person or persons who must approve the employee's discharge, and (v) past actions of the employer in enforcing the provisions of the restrictions. For example, if an employee would be considered as having received rights in property subject to a substantial risk of forfeiture, but for the fact that the employee owns 20 percent of the single class of stock in the transferor corporation, and if the remaining 80 percent of the class of stock is owned by an unrelated individual (or members of such an individual's family) so that the possibility of the corporation enforcing a restriction on such rights is substantial, then such rights are subject to a substantial risk of forfeiture. On the other hand, if 4 percent of the voting power of all the stock of a corporation is owned by the president of such corporation and the remaining stock is so diversely held by the public that the president, in effect, controls the corporation, then the possibility of the corporation enforcing a restriction on rights in property transferred to the president is not substantial, and such rights are not subject to a substantial risk of forfeiture.

In *Qinetiq U.S. Holdings, Inc. and Subsidiaries v. Commissioner*, T.C. Memo. 2015-123, *aff'd* 119 A.F.T.R.2d 2017-330 (4th Cir. 1/6/2017), the Tax Court applied these factors to determine that a corporation failed to prove that the possibility of forfeiture was substantial.

[3662] *Strom v. U.S.*, 641 F.3d 1051 (9th Cir. 2011), summarized:

> Ordinarily, when an employee is compensated with nonstatutory stock options that do not have a readily ascertainable fair market value at the time of the grant, the employee realizes income for tax purposes upon exercising the options. [Here, footnote 1 provides, Statutory stock options are compensatory options meeting criteria entitling them to special treatment under the Internal Revenue Code. See 26 U.S.C. § 422. Compensatory options that do not meet these requirements are referred to as nonstatutory. See *United States v. Tuff*, 469 F.3d 1249, 1251 n.2 (9th Cir. 2006) (citing *Cramer v. Comm'r*, 64 F.3d 1406, 1408–09 (9th Cir. 1995)).] See 26 U.S.C. § 83(e)(3)-(e)(4); 26 C.F.R. § 1.83-7(a). The taxpayer is taxed on an amount equal to the fair market value of the stock on the date of exercise minus the option price paid for the stock. See 26 C.F.R. § 1.83-1(a)(1); *id.* § 1.83-7(a). Internal Revenue Code § 83(c)(3), however, allows taxpayers to defer recognition and valuation of income so long as a profitable sale of the stock acquired through the exercise of the options could subject a person to suit under section 16(b) of the Securities Exchange Act of 1934. 26 U.S.C. § 83(c)(3). Section 16(b), in turn, forbids a corporate insider from profiting on a purchase made within six months of a sale (or a sale made within six months of a purchase) of the corporation's stock. See 15 U.S.C. § 78p(b). If a taxpayer is permitted to defer tax consequences under IRC § 83(c)(3), the taxpayer will be later taxed on an amount equal to the fair market value of the stock on the date that § 83(c)(3) no longer applies minus the option price paid for the stock. See 26 U.S.C. § 83(a); 26 C.F.R. § 1.83-1(a)(1).
>
> In this opinion, we first interpret the phrase could subject a person to suit under section 16(b) and determine what that phrase requires a taxpayer to demonstrate before she can postpone tax consequences under § 83(c)(3). We then hold that the taxpayer here has not demonstrated an entitlement to deferral of tax consequences under § 83(c)(3), and after addressing a distinct legal issue pertinent to the ultimate resolution of this case, reverse and remand for further proceedings.

forfeiture acted together to remove the restrictions without honoring their fiduciary duties in any way, *Larson v. Commissioner*, T.C. Memo. 2022-3 disregarded the restrictions.[3663]

The rights of a person in property are transferable if such person can transfer any interest in the property to any person other than the transferor of the property, but only if the rights in such property of such transferee are not subject to a substantial risk of forfeiture.[3664]

Consider planning for the contingency that a distributive share of income is allocated to a person whose interest was assumed to be vested but turned out not to be vested.[3665]

Furthermore, Code § 83(e) provides that Code § 83 does not apply to:

(1) a transaction to which section 421 applies,

(2) a transfer to or from a trust described in section 401(a) or a transfer under an annuity plan which meets the requirements of section 404(a)(2),

(3) the transfer of an option without a readily ascertainable fair market value,

(4) the transfer of property pursuant to the exercise of an option with a readily ascertainable fair market value at the date of grant, or

(5) group-term life insurance to which section 79 applies.

[3663] The first paragraph of the case presaged the result:

> Petitioner, John M. Larson, along with two other individuals, Robert A. Pfaff and David Amir Makov, promoted a fraudulent tax shelter transaction known as Bond Linked Issue Premium Structure (BLIPS). Mr. Larson was convicted of tax evasion for his involvement in BLIPS, but the central issue in this case concerns the use of a restricted stock agreement to defer recognition of income earned from these transactions.

Here’s another indication how the case would turn out:

> On September 5, 2000, the Internal Revenue Service (IRS or respondent) issued I.R.S. Notice 2000-44, 2000-2 C.B. 255, which advised that tax shelters such as BLIPS were not bona fide and that penalties might be imposed on the promoters of these transactions. On January 2, 2001, Mr. Larson, Mr. Pfaff, and Mr. Makov voted to terminate the restrictions on the Morley stock. They did not inform the members of the Morley ESOP, allow the Morley ESOP to consent to the removal of the restrictions, or resign as Morley ESOP trustees before voting to remove the restrictions.

[3664] Reg. § 1.83-3(d), which further provides:

> Accordingly, property is transferable if the person performing the services or receiving the property can sell, assign, or pledge (as collateral for a loan, or as security for the performance of an obligation, or for any other purpose) his interest in the property to any person other than the transferor of such property and if the transferee is not required to give up the property or its value in the event the substantial risk of forfeiture materializes. On the other hand, property is not considered to be transferable merely because the person performing the services or receiving the property may designate a beneficiary to receive the property in the event of his death.

[3665] See part II.M.4.f.iii What Happens If a Nonvested Partnership Interest Does Not Qualify As a Profits Interest for a similar situation.

If an employee uses existing stock to settle the exercise of a stock option, Code § 1036 may reduce the amount of gain recognized. Rev. Rul. 80-244 involved the following facts:

> A corporation, whose outstanding stock consists of a single class of common stock, has a qualified stock option plan described in section 422 of the Internal Revenue Code and a nonqualified stock option plan. An optionee who exercises an option granted under the nonqualified plan may pay for the shares (1) in cash, (2) with previously acquired shares having a fair market value equal to the option price, or (3) with cash and previously acquired shares having a fair market value less than the option price.
>
> On May 1, 1977, an employee of the corporation exercised a qualified stock option and acquired 1,000 shares of stock for 2x dollars. The fair market value of the stock steadily increased, and on July 1, 1979, when the employee exercised a nonqualified option (which was granted after April 21, 1969, and did not have a readily ascertainable fair market value when granted) for 2,000 shares of stock, the 1,000 shares of stock acquired pursuant to the qualified option had a fair market value of 6x dollars. The employee paid for the 2,000 shares of stock received pursuant to the nonqualified option with the 1,000 shares of identical stock acquired in 1977 when the employee exercised the qualified option. The nonqualified option price for the 2,000 shares of stock was 6x dollars; however, the fair market value was 12x dollars. Thus, the employee exchanged 1,000 shares of stock with a basis of 2x dollars and a fair market value of 6x dollars for 2,000 shares of stock with a fair market value of 12x dollars.

Rev. Rul. 80-244 held:

> The exercise of the nonqualified stock option caused the realization of 6x dollars of income under section 83(a) of the Code.
>
> (1) The exchange of 6x dollars in value of common stock (1,000 shares) for 6x dollars in value of common stock (1,000 shares) qualifies for nonrecognition of gain under section 1036 of the Code. Pursuant to section 1031(d), the employee-shareholder's basis in this 1,000 shares of stock received pursuant to the exercise of the nonqualified option is the same as the employee-shareholder's basis in the 1,000 shares of stock exchanged therefor (2x dollars). Therefore, a disposition within the meaning of section 425(c) did not occur because section 1036 applies to the exchange of the 1,000 shares of stock that were acquired in 1977 pursuant to the exercise of the qualified option, and the employee-shareholder did not receive income pursuant to section 1.421-8(b) of the regulations.
>
> (2) The additional 1,000 shares of common stock received by the employee-shareholder are compensation for services under section 83(a) of the Code. Accordingly, the employee-shareholder must include in gross income the fair market value (6x dollars) of the additional 1,000 shares of stock received pursuant to the exercise of the nonqualified stock option. The employee-shareholder's basis in the additional 1,000 shares of stock is the same as the amount included in gross income (6x dollars).

Rev. Rul. 80-244 is further analyzed in 383-5th T.M. III.B., "Options with Employer Stock, and IRS Position in Rev. Rul. 80-244."

Beyond the issue of forfeiture, if an employee or independent contractor (or beneficiary thereof) is granted, in connection with the performance of services, an option to which Code § 421 (relating generally to certain qualified and other options) does not apply, Code § 83(a) applies to such grant if the option has a readily ascertainable fair market value at the time the option is granted.[3666] Options have a value at the time they are granted, but that value is ordinarily not readily ascertainable unless the option is actively traded on an established market.[3667] If Code § 83(a) does not apply to the grant of an option because the option does not have a readily ascertainable fair market value at the time of grant, Code §§ 83(a) and (b) apply at the time the option is exercised or otherwise disposed of, even though the fair market value of such option may have become readily ascertainable before such time.[3668] If the option is exercised, Code §§ 83(a) and (b) apply to the transfer of property under the exercise, and the employee or independent contractor realizes compensation upon such transfer at the time and in the amount determined under Code §§ 83(a) and (b).[3669] Thus, when the service provider exercises such an option and the option is vested, the service recipient deducts the excess of value over exercise price and the service provider reports that as income.[3670]

A Generic Legal Advice Memorandum (GLAM), AM 2020-004 (5/2020), from Victoria Judson, Associate Chief Counsel (Employee Benefits, Exempt Organizations and Employment Taxes), explains in its Background:

> When a service provider exercises a stock award (such as a stock option or a stock-settled SAR) or the service recipient initiates payment under a stock award (such as a stock-settled RSU), the service recipient or a securities broker (broker) makes a request to the service recipient's transfer agent to transfer shares held in the service recipient's account with the transfer agent to the broker's account with the transfer agent. The broker then holds the shares on behalf of the service provider until the service provider decides to sell the shares. If, at the time of exercise, the service provider elects to sell shares to pay the exercise price or satisfy the tax withholding obligations, then the broker instructs the transfer agent to sell those shares.
>
> Due to Securities and Exchange Commission (SEC) regulations that apply to transfer agents and securities brokers, there is generally a short delay (settlement cycle) between the exercise of the option and settlement of the option exercise (delivery of the shares to the service provider's brokerage account or sale of the shares to cover the exercise price/withholding taxes). This same settlement cycle applies to the exercise of a stock-settled SAR as well as the payment under a stock-settled RSU. With respect to a stock-settled RSU, the short delay occurs between initiation of payment by the service recipient and delivery of the shares to the service provider's brokerage account…. A stock-settled RSU is an unsecured and unfunded promise by the service recipient to pay one or more shares of stock to the service provider at a future date following a specified vesting condition. The terms of a RSU typically provide that the payment of the stock will occur upon or within a short period of time following the satisfaction of the vesting condition. If payment occurs no later than two and a half months after the end of the taxable year in which the vesting condition was satisfied, then the payment is not

[3666] Reg. § 1.83-7(a).
[3667] Reg. § 1.83-7(b)(1).
[3668] Reg. § 1.83-7(a).
[3669] Reg. § 1.83-7(a).
[3670] Letter Ruling 201610006, dealing with warrants issued to an independent contractor that was an entity.

considered deferred compensation. See Treas. Reg. § 1.409A-1(b)(4). If the payment occurs more than two and a half months after the end of the taxable year in which the vesting condition was satisfied, then the RSU provides for a deferral compensation and is subject to the requirements of I.R.C. § 409A. See Treas. Reg. § 1.409A-1(b)(1). These facts do not contemplate or address the situation in which the RSU is settled only in cash. Not all service recipients use a transfer agent. A service recipient may act as its own transfer agent. If the stock of the service recipient is not publicly traded, then the service recipient would not typically have a transfer agent.

September 5, 2017, the settlement cycle could not exceed three days. On March 22, 2017, the SEC amended the settlement cycle regulations to provide that the settlement cycle could not exceed two days effective September 5, 2017. 17 C.F.R. § 240.15c6-1(a).

The GLAM's background then discusses various procedures regarding employment tax responsibilities upon such events. Then the GLAM discusses the tax law:

Overview of I.R.C. § 83

For purposes of I.R.C. § 83 , property includes real and personal property other than either money or an unfunded and unsecured promise to pay money or property in the future. Treas. Reg. § 1.83-3(e). An option without a readily ascertainable fair market value is not considered property for purposes of I.R.C. § 83. Specifically, I.R.C. § 83(e)(3) provides that I.R.C. § 83 does not apply to an option without a readily ascertainable fair market value. Instead, I.R.C. § 83 applies to the transfer of property pursuant to the exercise of such an option. With respect to such options, in relevant part, Treas. Reg. § 1.83-7(a) provides that I.R.C. § 83(a) applies to the transfer of property pursuant to the exercise of the option and the service provider realizes compensation upon the transfer at the time and in the amount determined under I.R.C. § 83(a).[9]

[9] As described above, the grant of an option to purchase certain property generally does not constitute a transfer of such property. Treas. Reg. § 1.83-3(a)(2). In *Theophilos v. Comr.*, 85 F.3d 440, 445 (9th Cir. 1996), however, the Ninth Circuit held that a contractual obligation to acquire stock is property for purposes of I.R.C. § 83 and the subsequent purchase of the stock is not. In 2000, relying on *Theophilos*, CC:IT&A issued a FSA concluding that a contract to purchase shares was property for purposes of I.R.C. § 83. See FSA 200029013.

Commentators have criticized *Theophilos* . For example, "[W]e do not believe the Ninth Circuit's Theophilos decision is a correct interpretation of I.R.C. § 83." Mergers, Acquisitions, and Buyouts (Ginsburg, Levin, et al. 2016); "Where the Ninth Circuit departed from the conventional understanding of Section 83 was in its holding that an executory contract constitutes 'property.'" Paul J. Sax & Gary A. Herrmann, Ninth Circuit's Section 83 Decision May Reopen Planning Opportunities for Stock Compensation, 85 J. Tax'n 87, 88 (1996).

In a subsequent decision involving beneficial ownership outside the context of I.R.C.§ 83, the Ninth Circuit described the *Theophilos* decision as a case in which the service provider "acquired a beneficial interest in the stock not when he paid for the shares, but when the parties executed a shareholder agreement, two employee agreements, and other documents." *Pahl v. Commissioner*, 150 F.3d 1124, 1130 (9th Cir. 1998). According to the Ninth Circuit in *Pahl*, the property in *Theophilos* was the stock instead of the contractual obligation to acquire it. Regardless of the Ninth Circuit decision in *Theophilos*, prior to the actual exercise of the stock option, the terms of typical employee stock option awards do not contractually obligate service providers to purchase the underlying shares. Consequently, the facts in *Theophilos* are distinguishable from the facts covered by this GLAM.

Definition of Property for Purposes of I.R.C. § 83

Treas. Reg. § 1.83-3(a)(1) provides that, for purposes of I.R.C. § 83 , a transfer of property occurs when the service provider acquires a beneficial ownership interest in such property. A "beneficial owner" is someone who does not have legal title to property but has rights in the property which are the normal incidents of owning property. *Miller v. United States*, 345 F. Supp. 2d 1046, 1050 (N.D. Cal. 2004). Such rights include the right to receive dividends on and vote the shares, the right to dispose of the shares as the beneficial owner sees fit, and the right to use the shares as collateral. *See United States v. Tuff*, 359 F. Supp. 2d 1129, 1133 (W.D. Wash. 2005); *Miller v. United States*, *supra* at 1050. Pursuant to Treas. Reg. § 1.83-3(a)(6) , an indication that a transfer has occurred is the extent to which the service provider incurs the risk that the value of the property will decline. See also *Walter v. Commissioner*, T.C. Memo 2007-2, at 7. A service provider incurs the risk that the value of the stock will decline when the number of shares and fair market value of the stock that the service provider will receive are fixed and determinable (regardless of actual receipt of the shares),which occurs on the earliest of the service provider exercising the stock award (for example, the stock option or stock-settled SAR) or the service recipient initiating payment under the stock award (for example, the stock-settled RSU).

Overview of FICA taxes and Federal Income Tax Withholding

FICA Taxes

FICA taxes consist of the old-age, survivors, and disability insurance (social security) taxes imposed under I.R.C. §§ 3101(a) and 3111(a), the hospital insurance (Medicare) taxes imposed under I.R.C. §§ 3101(b)(1) and 3111(b), and the Additional Medicare Tax (AdMT) imposed under I.R.C. § 3101(b)(2).

FICA taxes are computed as a percentage of "wages" paid by the employer and received by the employee with respect to "employment." In general, all payments of remuneration by an employer for services performed by an employee are subject to FICA taxes, unless the payments are specifically excepted from the term "wages" or the services are specifically excepted from the term "employment."

I.R.C. § 3121(a) defines "wages," for FICA tax purposes, as all remuneration for services, with certain exceptions not applicable here. I.R.C. § 3121(a)(1) provides that the social security portion of FICA tax is only imposed on wages up to the contribution and benefit base for social security each year (social security wage base). There is no wage base for the Medicare portion of FICA tax. Effective for tax years beginning after December 31, 2012, employees are also subject to AdMT (0.9 percent) on wages paid by an employer in excess of enumerated dollar thresholds that are dependent upon each employee's filing status in a calendar year. See I.R.C.§ 3101(b)(2).

In general, the employer is required to withhold and pay to the IRS the employee share of FICA taxes from wages when paid to the employee and to pay to the IRS the employer share of FICA taxes with respect to wages when paid to the employee. In the case of AdMT, which is only imposed on the employee, an employer must withhold and pay to the IRS AdMT with respect to wages for employment performed for the employer by the employee only to the extent the employer pays wages to the employee in excess of $200,000 in a calendar year. This rule applies regardless of the employee's filing status or other income. See Treas. Reg. § 31.3102-4(a).

Treas. Reg. § 31.3121(a)-2(a) provides that wages are generally subject to FICA tax when actually or constructively received. Treas. Reg. § 31.3121(a)-2(b) provides that wages are constructively paid when they are credited to the account of or set apart for an employee so that they may be drawn upon by him at any time although not then actually reduced to possession. To constitute payment in such a case, the wages must be credited to or set apart for the employee without any substantial limitation or restriction as to the time or manner of payment or condition upon which payment is to be made, and must be made available to him so that they may be drawn upon at any time, and their payment brought within his own control and disposition. Remuneration for employment that constitutes wages at the time the remuneration is actually or constructively paid is referred to as the general timing rule. See Treas. Reg. § 31.3121(a)-2(a) and Treas. Reg. § 31.3121(v)(2)-1.

I.R.C. § 3121(v)(2) provides for the FICA tax treatment of nonqualified deferred compensation (NQDC) plans.[10] Under I.R.C. § 3121(v)(2)(A) , any amount deferred under a NQDC plan must be taken into account as wages for FICA tax purposes as of the later of (1) when the services are performed, or (2) when there is no substantial risk of forfeiture of the rights to such amount. This is referred to as the special timing rule.

[10] The income tax treatment of NQDC is governed by the rules in I.R.C. §§ 451, 409A, 457(f) and 457A, as applicable. These rules are not determinative of the employment tax treatment.

Treas. Reg. § 31.3121(v)(2)-1(b)(3)(i) states that a plan provides for the deferral of compensation with respect to an employee only if, under the terms of the plan and the relevant facts and circumstances, the employee has a legally binding right during the calendar year to compensation that has not been actually or constructively received and that, pursuant to the terms of the plan, is payable to (or on behalf of) the employee in a later year.

Treas. Reg. § 31.3121(v)(2)-1(b)(4)(i) defines plans, arrangements, and benefits that do not provide for the deferral of compensation and thus are subject to the general timing rule rather than the special timing rule. Under Treas. Reg. § 31.3121(v)(2)-1(b)(4)(ii) , the grant of a stock option, stock appreciation right, or other stock value right does not constitute the deferral of compensation for purposes of I.R.C. § 3121(v)(2). In addition, amounts received as a result of the exercise of such items do not result from the deferral of compensation for purposes of I.R.C. § 3121(v)(2) if such amounts are actually or constructively received in the calendar year of exercise.

Because the grant of a stock option or a SAR does not constitute the deferral of compensation for purposes of I.R.C. § 3121(v)(2), the general timing rule under Treas.

Reg. § 31.3121(a)-2(a) applies, that is, wages generally are subject to FICA tax when actually or constructively received.

Treas. Reg. § 31.3121(v)(2)-1(b)(4)(ii) defines a stock value right as a right granted to an employee with respect to one or more shares of an employer stock that, to the extent exercised, entitles the employee to a payment for each share of stock equal to the excess, or a percentage of the excess, of the value of a share of the employer's stock on the date of exercise over a specified price (greater than zero). The term stock value right does not include a phantom stock or other arrangement under which an employee is awarded the right to receive a fixed payment equal to the value of a specific number of shares of employer stock.

An RSU award is not a stock value right and therefore provides for the deferral of compensation for purposes of I.R.C. § 3121(v). Amounts paid pursuant to the settlement of an RSU award are NQDC for FICA purposes and are subject to FICA taxes as of the later of (1) the date on which the services creating the right to the amount are performed, or (2) the date on which the right to the amount is no longer subject to a substantial risk of forfeiture.

Federal Income Tax Withholding

I.R.C. § 3401(a) generally provides, with certain enumerated exceptions, that the term "wages" for federal income tax withholding purposes means all remuneration for services performed by an employee for his employer, including the cash value of all remuneration (including benefits) paid in any medium other than cash.

I.R.C. § 3402(a) provides that every employer making a payment of wages shall deduct and withhold upon such wages a tax determined in accordance with tables or computational procedures prescribed by the Secretary of the Treasury.

Treas. Reg. § 31.3402(a)-1(b) generally provides that the employer is required to collect income tax by deducting and withholding the amount thereof from the employee's wages as and when paid, either actually or constructively. Further, wages are constructively paid when they are credited to the account of or set apart for an employee so that they may be drawn upon by him at any time although not then actually reduced to possession. To constitute payment in such a case, the wages must be credited to or set apart for the employee without any substantial limitation or restriction as to the time or manner of payment or condition upon which payment is to be made, and must be made available to him so that they may be drawn upon at any time, and their payment brought within his own control and disposition.

Treas. Reg. § 31.3402(a)-1(c) provides, in part, that an employer is required to deduct and withhold the tax notwithstanding the wages are paid in something other than money (for example, wages paid in stocks or bonds) and to pay over the tax in money. If wages are paid in property other than money, the employer should make the necessary arrangements to insure that the amount of the tax required to be withheld is available for payment in money.

Revenue Rulings

Rev. Rul. 67-257, 1967-2 C.B. 359, addresses whether liability is incurred by a company for the withholding of income tax under I.R.C. § 3402(a) with respect to the compensation amount in certain nonstatutory stock options allotted to its key employees. Under the plan, the company grants options to the employees to purchase shares to encourage an increase to their proprietary interest in the company. The options do not have a readily ascertainable value at time of grant. When the options allotted to the employees to buy shares of the stock are exercised, the employees have an unconditional right to receive the stock subject to the options upon payment of the option price.

The ruling holds that since the employees have an unconditional right to receive such stock upon payment of the option price, the excess of the fair market value of the stock on the date of exercise over the option price is compensation includible in the employee's gross income at the time the option is exercised. It concludes that such compensation is remuneration for services performed in the company's employ and, therefore, constitute wages subject to the withholding of income tax under I.R.C.§ 3402(a). While the ruling does not explicitly address the timing of the income tax withholding, it implies that the compensatory amount is both includible in the employee's gross income and is wages subject to income tax withholding at the time the option is exercised, since it uses fair market value on the date of exercise to measure the compensation and wage amounts.

Although the ruling does not address the timing of FICA tax treatment of the compensatory amounts as wages under I.R.C. § 3121, the timing should be the same as for the income tax withholding of wages under I.R.C.§ 3402; that is, the fair market value of the property received as wages should be determined with reference to the fair market value at the time the option is exercised. This results because both Treas. Reg. § 31.3121(a)-2(a) and Treas. Reg. § 31.3402(a)-1(b) provide the same general timing rules. Treas. Reg. § 31.3121(a)-2(a) provides that wages are generally subject to FICA tax when actually or constructively received. Treas. Reg. § 31.3402(a)-1(b) generally provides that the employer is required to collect income tax by deducting and withholding the amount thereof from the employee's wages as and when paid, either actually or constructively.

Rev. Rul. 79-305, 1979-2 C.B. 350, addresses the timing of when a transfer of stock to an employee is wages for FICA tax (I.R.C. § 3121(a)) and federal income tax withholding purposes (I.R.C. § 3401(a)), and when it is includible in gross income under I.R.C. § 83. It concludes that the fair market value of the transferred stock at the time the risk of forfeiture lapsed is includible in the employee's gross income for the year in which the risk lapses and is wages at the time the risk lapsed.[11]

[11] See also Rev. Rul. 78-185, 1978-1 C.B. 304. The Ruling discusses a company with a stock purchase plan not qualifying under I.R.C.§§ 401 or 423. At the end of each month, the company makes contributions to the plan on behalf of each participant in an amount equal to a percentage of the dollar amount of the participant's contributions into the plan for that month. On the same day, the employer then credits the employee's account with the number of whole and fractional shares of the employer's common stock that the sum of the employer's and the employee's contributions for that month would purchase based upon the average of the closing prices of that stock on

the New York Stock Exchange for each trading day of the month. There is no forfeiture provision for either the employee or employer contributions to the plan. The Ruling holds that the excess of the fair market value of the stock credited to an employee's account, on the date of the crediting of such stock to the employee's account, over the amount of the employee's contributions to the account is "wages" for purposes of FICA, FUTA, and income tax withholding.

The ruling does not address the three specific situations of this memo, but is useful for its general analysis on the timing of a payment as wages for FICA tax and federal income tax withholding purposes. In the ruling, a corporation transferred stock, subject to a substantial risk of forfeiture, to one of its employees. Prior to the lapse of the substantial risk of forfeiture, the stock was not transferable. The employee made no election pursuant to I.R.C. § 83(b) to include the fair market value of the stock in gross income in the year of transfer. The substantial risk of forfeiture lapsed in a later year, and the stock had appreciated in value from the time of the transfer to the time of the lapse of the substantial risk of forfeiture.

The ruling cites to Treas. Reg. § 31.3121(a)-(2) that, "wages are paid by an employer at the time they are actually or constructively paid…[t]o be a constructive payment, the wages must be credited to or set apart for the employee without any substantial limitation or restriction as to the time or manner of payment or condition upon which payment is to be made, and must be made available to him so that they may be drawn upon at any time, and their payment brought within his own control and disposition." The ruling also cites to a similar provision Treas. Reg. § 31.3402(a)-1(b) for federal income tax withholding purposes.

Additionally, the ruling cites to Treas. Reg. § 31.3401(a)-1(a)(4) that if a corporation transfers to its employees its own stock as remuneration for services rendered, the amount of such remuneration is the fair market value of the stock at the time of transfer. The transfer of stock mentioned in Treas. Reg. § 31.3401(a)-1(a)(4) refers to the transfer of an item of noncash remuneration not subject to substantial limitations or restrictions.

The ruling holds that when the substantial risk of forfeiture lapsed, the stock was made available to the employee without any substantial limitation or restriction and was available to be used by the employee at any time. Therefore, the fair market value of the stock at the time when the substantial risk of forfeiture lapsed is wages for purposes of FICA tax and federal income tax withholding. At the time the risk of forfeiture lapsed, the fair market value of the transferred stock is also includible in the employee's gross income under I.R.C. § 83(a).

The GLAM's section titled "Law" then has explanations of "Deposit Rules for FICA Taxes and Federal Income Tax Withholding" and "Overview of the I.R.C. § 6656 FTD Penalty."

The GLAM's section titled "Analysis" explains:

Situation 1: Stock Option

An employee acquires a beneficial interest in the underlying shares of stock upon exercising a stock option. For example, in *Walter*, the Tax Court ruled that, upon the exercise of a stock option, the employee became the beneficial owner of the underlying stock because, upon exercise, the employee incurred the risk that the value of the stock would decline.[13] *Walter*, TC Memo 2007-2, at 7. Rev. Rul. 70-335, 1970-1 C.B. 111, holds that stock is considered transferred on the date the employee delivers to the grantor corporation written notice of the stock option exercise with full payment even though the plan provides that the employee has no interest in the stock until issuance of the stock certificates. In both *Walter* and Rev. Rul. 70-335, the employee incurred the risk that the value of the stock would decline and thus acquired beneficial ownership of the stock upon exercise of the stock option. When the employee exercises a stock option (thus initiating the process pursuant to which the employer transfers the stock), the number of shares and fair market value of the stock received by the employee are fixed and determinable, even though the value of the stock may decrease or increase prior to actual delivery of the shares (for example, during the period of delay between exercise and delivery of the shares to the employee's brokerage account). The employee's ability to (1) pledge the stock as collateral for a loan to exercise the option, and (2) direct the sale of shares to repay the loan or to satisfy the tax withholding obligation upon exercising the stock award are also indications of beneficial ownership. Accordingly, for purposes of I.R.C. § 83 , the transfer of shares of stock occurs on December 29, 2021, the date on which Employee exercises the stock option.

[13] In concluding that an employee acquired a beneficial ownership of shares of stock on the date of exercising the stock options, the court in *Walter* also explained that the employee's exercise of the stock options constituted an "unconditional acceptance of [the employer's] offer under the stock option grants and created a contract between [the employer] and petitioner for the sale of the exercised shares of stock." *Walter*, TC Memo 2007-2, at 6. In other words, an employee acquires a beneficial ownership in stock under a stock option when the employee is contractually obligated to purchase the underlying shares. This is consistent with the definition of transfer in Treas. Reg. § 1.83-3(a) and the Ninth Circuit's description of *Theophilos* in *Pahl*.

When an employee exercises a stock option, I.R.C. § 83 applies to the transfer of stock pursuant to the exercise and compensation is realized upon such transfer at the time and in the amount determined under I.R.C. § 83(a). See Treas. Reg. § 1.83-7(a). To determine the amount of compensation realized, I.R.C. § 83(a) provides, in relevant part, that the excess of the fair market value of the transferred property over the amount (if any) paid for such property shall be included in the gross income of the person who performed such services. In other words, the amount of compensation realized is the excess of the fair market value of the stock on the date of exercise over the exercise price. In accordance with Treas. Reg. § 1.83-7(a), such compensation is included in gross income upon exercise of the option because that is when the transfer of the underlying stock occurs for purposes of I.R.C. § 83.[14] Accordingly, on December 29, 2021, $50 [10 shares x ($15 FMV on date of exercise- $10 exercise price)] is includible in Employee's gross income.

[14] See also Rev. Rul. 67-257, 1967-2 C.B. 359, which holds that because the employees have an unconditional right to receive stock upon payment of the exercise price, the excess of the fair market value of the stock on the date of exercise over the option price is compensation includible in the employee's gross income at the time the option is exercised.

Even though the fair market value of each share is $14 on December 31, 2021 when the shares are delivered to Employee's brokerage account, the value of the shares on the delivery date is not taken into account in determining the amount of compensation income includible under I.R.C. § 83 nor the wage amount subject to FICA taxes or federal income tax withholding. At the time Employee exercised the stock option on December 29, 2021, when the fair market value of the stock was $15 per share, Employee incurred the risk that the value of the stock would decline.

On December 29, 2021, when Employee exercises the option to purchase the shares, Employee has beneficial ownership of the stock. Furthermore, when Employee exercises the option, the stock was made available to the Employee without any substantial limitation or restriction and was available to be used by the Employee at any time.[15] Therefore, on December 29, 2021, the $50 stock payment constitutes wages that have actually or constructively been received by the Employee and is subject to FICA taxes and federal income tax withholding at that time.

[15] See Rev. Rul. 67-257. *Cf*. Rev. Rul. 78-185; Rev. Rul. 79-305.

If, in conjunction with other wage payments, Employer has accumulated $100,000 or more in employment taxes upon the $50 stock payment date of December 29, 2021, then pursuant to the One-Day rule, Employer has an obligation to deposit such employment taxes by the close of the next day, December 30, 2021. If the Employer does not deposit such employment taxes by December 30, 2021, then under the Code the IRS may impose an FTD penalty upon the Employer unless it is shown that such failure is due to reasonable cause and not due to willful neglect.

Situation 2: Stock-Settled Stock Appreciation Rights (SAR's)

A stock-settled SAR is, in substance, a stock option without an exercise price. Upon exercising the stock-settled SAR, an employee acquires a beneficial ownership in the underlying shares of stock because the employee incurs the risk that the value of the stock would decline. Accordingly, the transfer of shares of stock occurs on December 29, 2021, the date on which Employee exercises the stock-settled SAR. Therefore, on December 29, 2021, $150 [10 SAR's x ($25 FMV per share on date of exercise - $10 FMV per share on date of grant)], which is the fair market value of 6 shares on the date of exercise ($150 total FMV/$25 FMV per share on date of exercise = 6 shares), is includible in Employee's gross income.

Even though the fair market value of each share is $24 on December 31, 2021 when the shares are delivered to Employee's brokerage account, the value of the shares on the delivery date is not taken into account in determining the amount of compensation income includible under I.R.C. § 83 nor the wage amount subject to FICA taxes or federal income tax withholding. At the time Employee exercised the stock option on December 29, 2021, when the fair market value of the stock was $25 per share, Employee incurred the risk that the value of the stock would decline.

On December 29, 2021, when Employee exercises the stock settled SAR, Employee has beneficial ownership of the stock. Furthermore, when Employee exercises the option, the stock was made available to the Employee without any substantial limitation or restriction and was available to be used by the Employee at any time.[16] Therefore, on December 29, 2021, the $150 stock payment constitutes wages that have been actually or constructively received by the Employee and is subject to FICA taxes and federal income tax withholding at that time.

[16] *Cf*. Rev. Rul. 67-257; Rev. Rul. 78-185; Rev. Rul. 79-305.

If, in conjunction with other wage payments, Employer has accumulated $100,000 or more in employment taxes upon the $150 stock payment date of December 29, 2021, then pursuant to the One-Day rule, Employer has an obligation to deposit such employment taxes by the close of the next day, December 30, 2021. If the Employer does not deposit such employment taxes by December 30, 2021, then under the Code the IRS may impose an FTD penalty upon the Employer unless it is shown that such failure is due to reasonable cause and not due to willful neglect.

Situation 3: Stock-Settled Restricted Stock Unit (RSU)

When the employer initiates payment under the RSU, the employee acquires a beneficial ownership in the underlying stock. When the employer initiates payment, the number of shares of stock to be transferred and the fair market value of the stock become fixed and determinable. At this time, the employee incurs the risk that the stock's fair market value may decrease or increase prior to actual delivery of the shares (for example, during the period of delay between the time the employer initiates payment and delivery of the shares to the employee's brokerage account). The employee's ability to direct the sale of stock to satisfy the tax withholding obligation is another indication of beneficial ownership. Thus, upon initiation of the payment, the employee is considered a beneficial owner of the stock and the stock is considered transferred for purposes of I.R.C. § 83. Accordingly, the transfer of shares of stock occurs on December 29, 2021, the date on which Employer initiates payment of the 10 shares of stock.[17]

[17] This analysis would also apply to a stock-settled SAR whose terms provide that the stock will be paid on a specified date and do not require the service provider to exercise the SAR.

I.R.C. § 83(a) determines the amount of compensation realized upon the transfer and provides, in relevant part, that the excess of the fair market value of the transferred property over the amount (if any) paid for such property shall be included in the gross income of the person who performed such services. If the employee did not pay for the stock issued under the RSU, then the amount of compensation included in the employee's gross income is the fair market value of the stock on the date that the employer or broker initiates the payment. Accordingly, because Employee paid nothing for the shares, on December 29, 2021, $250 (10 shares x $25 FMV on date of transfer) is includible in Employee's gross income.

Even though the fair market value of each share is $24 on December 31, 2021, when the shares are delivered to Employee's brokerage account, the value of the shares on the delivery date is not taken into account in determining the amount of compensation income includible under I.R.C. § 83. At the time Employer initiated payment on December 29, 2021, when the fair market value of the stock was $25 per share, Employee incurred the risk that the value of the stock would decline.

I.R.C. § 3121(v)(2) determines the FICA tax treatment of NQDC plans. A RSU award is not a stock value right and therefore provides for the deferral of compensation. Amounts paid pursuant to the settlement of an RSU award are NQDC for FICA purposes and are subject to FICA taxes as of the later of (1) the date on which the services creating the right to the amount are performed, or (2) the date on which the right to the amount is no longer subject to a substantial risk of forfeiture. On December 29, 2021, when Employer initiates payment, the Employee's right to the shares of stock transferred is no longer subject to a substantial risk of forfeiture. Thus, the fair market value of the shares of stock transferred in the amount of $250 is an amount paid subject to FICA taxes at that time.[18]

[18] *Cf*. Rev. Rul. 67-257; Rev. Rul. 78-185; Rev. Rul. 79-305.

As stated above, on December 29, 2021, when Employer initiates payment, Employee has beneficial ownership of the stock. Furthermore, when Employer initiates payment, the stock is made available to the Employee without any substantial limitation or restriction and was available to be used by the Employee at any time. Therefore, on December 29, 2021, the $250 stock payment constitutes wages that have been actually or constructively received by the Employee and is subject to federal income tax withholding at that time.[19]

[19] *Id.*

If, in conjunction with other wage payments, Employer has accumulated $100,000 or more in employment taxes upon the $250 stock payment date of December 29, 2021, then pursuant to the One-Day rule, Employer has an obligation to deposit such employment taxes by the close of the next day, December 30, 2021. If the Employer does not deposit such employment taxes by December 30, 2021, then under the Code the IRS may impose an FTD penalty upon the Employer unless it is shown that such failure is due to reasonable cause and not due to willful neglect.

Conclusion

In summary, the fair market value of the underlying stock is includible in the Employee's gross income as compensation when the stock is considered transferred for purposes of I.R.C. § 83 , which occurs on the earliest of (1) when the Employee exercises a stock award (such as a stock option or a stock-settled SAR) or (2) the Employer initiates payment under the stock award (such as a stock-settled RSU).

For FICA and federal income tax withholding purposes, the stock payments in the above situations are considered wages of the Employee when actually or constructively received, except that for FICA purposes in Situation 3, the settlement of an RSU award is subject to FICA taxes the later of (1) the date on which the services creating the right to the amount are performed, or (2) the date on which the right to the amount is no longer subject to a substantial risk of forfeiture.

On the date the stock payments in the above situations are considered wages for FICA and federal income tax withholding purposes, if the Employer has accumulated $100,000 or more in employment taxes, then the Employer must deposit the employment taxes by the close of the next day pursuant to the One-Day rule. If the Employer does not deposit such employment taxes by the close of the next day, an FTD penalty may be assessed.

Situation 1: Stock Option

On December 29, 2021, when Employee exercises the stock option, the transfer of shares of stock occurs for purposes of I.R.C. § 83 and $50 is includible in Employee's gross income on this date. This amount also constitutes wages subject to FICA taxes and federal income tax withholding on this date. If, in conjunction with other wage payments, the Employer accumulates $100,000 or more in employment taxes on this date, then the Employer must deposit any accumulated FICA taxes and federal income tax withholding by the close of the next day, December 30,2021.

Situation 2: Stock-Settled Stock Appreciation Rights (SAR's)

On December 29, 2021, when Employee exercises the stock-settled SAR, the transfer of shares of stock occurs for purposes of I.R.C. § 83 and $150 is includible in Employee's gross income on this date . This amount also constitutes wages subject to FICA taxes and federal income tax withholding on this date. If, in conjunction with other wage payments, the Employer accumulates $100,000 or more in employment taxes on this date, then the Employer must deposit any accumulated FICA taxes and federal income tax withholding by the close of the next day, December 30, 2021.

Situation 3: Stock-Settled Restricted Stock Unit (RSU)

On December 29, 2021, when Employer initiates the payment of shares of stock, the transfer of shares of stock occurs for purposes of I.R.C. § 83 and $250 is includible in Employee's gross income on this date. This amount also constitutes wages subject to FICA taxes and federal income tax withholding on this date. If, in conjunction with other wage payments, the Employer accumulates $100,000 or more in employment taxes on this date, then the Employer must deposit any accumulated FICA taxes and federal income tax withholding by the close of the next day, December 30, 2021.

For more details on how Code § 83 applies and the impact of a Code § 83(b) election in accelerating income, see part II.M.4.e.i Issuing Stock to an Employee - Generally; with part II.M.4.e.i, for possible deferral of income tax (but not employment tax) inclusion, see part II.M.4.e.ii Code § 83(i) Election Deferring Income Tax Inclusion.

II.M.4.b.iii. Strategic Issues re Income Tax Timing of Equity Incentives

If the employer can deduct the compensation expense at the same or a higher rate than that of the employee, then the incentive payment is tax-efficient. This can be especially important when paying key employees bonuses in connection with the sale of a company. The bonuses might even be grossed up to pay the employees' taxes – see the example in part II.M.4.e.i Issuing Stock to an Employee - Generally.

Sometime a mismatch might occur. For example, suppose a partnership or S corporation sells its assets, recognizing long-term capitals taxable at favorable rates, but has little ordinary income. In that case, the deduction benefits the employer to the extent of capital gain rates, while the income is taxed to the employee at ordinary income rates. Also, if the employer has insufficient income against which to deduct the compensation, then the compensation award is even less efficient. These mismatches might make grossing up employees for taxes be untenable.

II.M.4.c. Gifts to Employees

part II.M.4.c.i When a Gift to a Service Provider Is Compensation and Not a Gift explains that any material payment to an employee is compensation and not a gift. sometimes business owners or other business associates will make transfers to service providers, and tax litigation ensues.

Part II.M.4.c.ii Is Compensation to an Employee Better or Worse Than a Gift? explains that the service provider's income inclusion, when netted against the compensation deduction, may have little or no detriment, especially considering the gift tax consequences of making a gift.

In advising business owners on this issue, consider how any tax detriment of affirmatively declaring compensation income described in part M.4.c.ii compares to the tax risk described in part II.M.4.c.i.

Also consider whether shifting equity to employees before a sale, using various ideas described in part II.M.4 Providing Equity to Key Employees and an Introduction to Code § 409A Nonqualified Deferred Compensation Rules, might avoid the dilemma described in this part II.M.4.c.

In *Pratte v. Bardwell*, 128 A.F.T.R.2d 2021-5429 (D. Ariz. 08/04/2021), the plaintiff ("P") transferred property to the defendants (collectively, "D"), allegedly in consideration for D agreeing to provide services to P. Instead of giving D a Form 1099, P reporting the transfer as a gift on a gift tax return. When D did not perform the allegedly agreed-upon services, P sued D, seeking, among other remedies, recovery of gift tax P paid. The court held that gift tax would not be due if the transfer was not gratuitous, and any gift tax is the donor's responsibility. If P had intended to agree to pay gift tax and not impose employment tax on the parties:

> Plaintiff is not permitted to assert damages from an agreement to improperly file his taxes. See *White v. Mattox*, 127 Ariz. 181, 184, 619 P.2d 9, 12 (1980) ("Recovery will be denied if the acts to be performed under the contract are themselves illegal or contrary to public policy."); *cf. Gutierrez v. Carter Bros. Sec. Servs., LLC*, 63 F. Supp. 3d 1206, 1215 (E.D. Cal. 2014) (refusing to enforce an agreement where its apparent purpose was to avoid paying employment taxes and other benefits).

II.M.4.c.i. When a Gift to a Service Provider Is Compensation and Not a Gift

Code § 274(b), enacted in 1962, limits to $25 the deduction for business gifts.

A gift to an employee generally is considered to be compensation and not a true gift. Code § 102(c), "Employee gifts," added by the Tax Reform Act of 1986, provides:

> (1) *In general*. Subsection (a) shall not exclude from gross income any amount transferred by or for an employer to, or for the benefit of, an employee.
>
> (2) *Cross references*.
>
> For provisions excluding certain employee achievement awards from gross income, see section 74(c).

> For provisions excluding certain de minimis fringes from gross income, see section 132(e).

Absent regulations on Code § 102(c), let's look at the Senate Report that the Conference Committee followed:

> Except to the extent that the new section 74(c) exclusion or section 132(e) applies, the fair market value of an employee award (whether or not satisfying the definition of an employee achievement award) is includible in the employee's gross income under section 61, and is not excludable under section 74 (as amended by the bill) or section 102 (gifts). The fair market value of an employee award (or any portion thereof) that is not excludable from income must be included by the employer on the employee's Form W-2, as is required under present law.

Note that Code § 102(c) applies to gifts made by an employer to an employee. Below we explore whether payments made by persons other than employers constituted gifts.

When a majority stockholder of a corporation transferred some of his stock in the corporation to the employees of that corporation, the number of shares transferred to each employee being dependent on the number of years of service to the corporation, the IRS viewed the majority stockholder as benefitting economically through increased initiative in the employees resulting from their ownership of stock in their employer corporation, so Rev. Rul. 69-140 held that the transferor's intent was recognizing past services rather than "detached and disinterested generosity."

If a shareholder of a corporation transfers property to an employee of such corporation or to an independent contractor (or to a beneficiary thereof), in consideration of services performed for the corporation, the transaction is considered to be a contribution of such property to the capital of such corporation by the shareholder, and immediately thereafter a transfer of such property as compensation paid by the corporation to the employee or independent contractor.[3671] Note that this rule applies only if the payment is "in consideration of services performed for the corporation," so this rule would not apply to a gift.

Runyon v. Commissioner, T.C. Memo. 1984-623, recognized as gifts payments made by shareholders to a former employee, following the result in *Abdella v. Commissioner*, T.C. Memo. 1983-616, which held:

> Section 61(a) provides that gross income includes all income from whatever source derived unless excluded by a specific provision of the Code. Section 102(a) excludes from gross income the value of property acquired by gift. Whether a payment is a gift under section 102(a) or gross income under section 61(a) is a factual question, and the criteria have evolved from numerous judicial determinations. In *Commissioner v. Duberstein*, 363 U.S. 278, 285-286 (1960), the Supreme Court stated the governing principles in this area:
>
>> [T]he mere absence of a legal or moral obligation to make such a payment does not establish that it is a gift.... And, importantly, if the payment proceeds primarily from "the constraining force of any moral or legal duty," or from "the incentive of

[3671] Reg. § 1.83-6(d)(1), adopted by T.D. 7554 (7/21/1978), generally effective for the transfer of property after June 30, 1969.

> anticipated benefit" of an economic nature, … it is not a gift. And, conversely, "[w]here the payment is in return for services rendered, it is irrelevant that the donor derives no economic benefit from it." … A gift in the statutory sense, on the other hand, proceeds from a "detached and disinterested generosity," … "out of affection, respect, admiration, charity or like impulses." … And in this regard, the most critical consideration, as the Court was agreed in the leading case here, is the transferor's "intention." … "What controls is the intention with which payment, however voluntary, has been made." [Footnotes and citations omitted.]

The intention of the transferor or donor is primarily a determination of fact "based ultimately on the application of the fact-finding tribunal's experience with the mainsprings of human conduct to the totality of the facts of each case." *Commissioner v. Duberstein*, *supra* at 289. We must make an objective inquiry into the circumstances surrounding the transfer rather than relying on the transferor's subjective characterization of the transfer. *Commissioner v. Duberstein*, *supra* at 285; *Bogardus v. Commissioner*, 302 U.S. 34, 43 (1937).

Applying the principles set forth in the case law to the facts of this case, we conclude that the payments petitioner received from Lucas and Burford were gifts within the meaning of section 102(a). We have found that Lucas and Burford were under no legal obligation to make these payments to petitioner from the stock sale proceeds.[6] Nor was there any understanding or expectation that petitioner would share in the proceeds of the sale of stock. And although Burford and Lucas testified that they felt "morally obligated" to make these payments, we find no moral obligation or duty to do so. As we read the case law, the "moral obligation" or "moral duty" contemplated by the Supreme Court in *Duberstein* involves an unenforceable promissory obligation where the recipients expect payment, or the payor expects to receive future benefits, or both. See *Pearson v. United States*, 519 F.2d 1279 (4th Cir. 1975) (payment of special death benefits to widow of deceased employee-stockholder); *Jensen v. United States*, 511 F.2d 265, 272 (5th Cir. 1975) (payment of special death benefits to widow of deceased employee-stockholder);[7] *Simpson v. United States*, 261 F.2d 497, 501 (7th Cir. 1958) (payment to widow of deceased executive); *Placko v. Commissioner*, 74 T.C. 452, 456-457 (1980) (strike benefit payments from union); *Brown v. Commissioner*, 47 T.C. 399, 408 (1967), *affd. per curiam* 398 F.2d 832 (6th Cir. 1968) (strike benefit payments from union); *Hagar v. Commissioner*, 43 T.C. 468, 484 (1965) (strike benefit payments from union).[8]

[6] The contractual nature of the payments to Little and Washburn does not diminish the significance of the noncontractual nature of the payments to petitioner, Runyon, and Phillips. This is especially true where it is likely that these contractual obligations to pay Little and Washburn were those of the corporation rather than of its shareholders, Lucas and Burford.

[7] Compare *Harper v. United States*, 454 F.2d 222 (9th Cir. 1971), involving a payment to a widow of an employee-stockholder of the Graybar Electric Company of the same type as in the *Pearson* and *Jensen* cases cited in the test, where the Ninth Circuit held that such payments were nontaxable gifts. The conflict in these cases involving the payments under the same Graybar payment plan demonstrates the differing results that may sometimes occur in analyzing the intent of the transferor, which the Supreme Court teaches us is "the most critical consideration" for the fact-finder to address in determining whether a payment constitutes a gift. *Commissioner v. Duberstein*, 363 U.S. 278, 285-286 (1960).

[8] We also note that in a different factual setting even a strike benefit paid by a union may be a nontaxable gift. *United States v. Kaiser*, 363 U.S. 299 (1960).

Although it is commendable and appropriate for investors like Lucas and Burford to share their bounty with corporate employees like petitioner, whose efforts on behalf of the corporation enhanced the value of and ultimate profit on their corporate investment, this hardly rises to the level of a moral obligation or duty. Petitioner did not expect to receive these payments, and Lucas and Burford did not expect to receive any future benefits from the payments to petitioner.[9] To find that corporate investors like Lucas and Burford were morally obligated to share their profits with corporate employees like petitioner is to impose a standard of business morality wholly alien to our economic system of free enterprise.

[9] Respondent has not argued that the payments to petitioner were compensation to induce him to greater productivity and efficiency with Burford, Inc., in order to enhance the value of the former shareholders' contingent royalty rights. See footnote 2. We do not consider this in our determination, although we note that the inclusion of former employees as recipients and the failure of McDavid and Carson, the minority shareholders, to make any such payments substantially undercut the force of any such argument.

Lucas and Burford deducted the payments to petitioner and the other employees on their individual income tax returns as compensation paid to them. Petitioner was an employee of the corporation, not of Lucas and Burford individually Some cases have viewed deduction by the payor as a factor indicating the payment was not a gift. See *Poorman v. Commissioner*, 131 F.2d 946, 949 (9th Cir. 1942), *affg*. 45 B.T.A. 73 (1941); *Willkie v. Commissioner*, 127 F.2d 953, 956 (6th Cir. 1942), *affg*. an unpublished Memorandum Opinion of this Court dated Feb. 21, 1941. Although relevant, this factor is not conclusive. See *Greentree v. United States*, 13 AFTR 2d 979, 64-1 USTC par. 9284 (E.D. Va. 1964), *affd*. 338 F.2d 946 (4th Cir. 1964). The fact that the payors improperly claimed deductions should not preclude exclusion of the payment from the recipient's income as a gift if the payment was in fact a gift. As the Supreme Court stated in *Commissioner v. Duberstein*, *supra*, 363 U.S. at 287-288:

> [I]t is doubtless relevant … that the transferor treats a payment as a business deduction... But [this inference] cannot be stated in absolute terms… The taxing statute does not make nondeductibility by the transferor a condition on the "gift" exclusion…. The conclusion whether a transfer amounts to a "gift" is one that must be reached on consideration of all the factors.

Respondent's argument that the payments represent additional compensation to petitioner because of past undercompensation is not borne out by the facts. Petitioner considered himself adequately compensated, both within his company and in comparison to persons doing comparable work for other coal companies. Although both Lucas and Burford suggested in their testimony that petitioner was undercompensated, petitioner's testimony to the contrary is supported by the objective facts. Indeed, it is notable that after Valley Industries took over Burford, Inc., it did not increase petitioner's salary. Likewise, Rehobeth Coal, owned principally by Lucas, did not increase petitioner's salary when he later left Burford, Inc., to go to work for Rehobeth Coal. Respondent's argument is also undermined by the fact that Lucas and Burford never consulted nor sought payments from the minority shareholders, Carson and McDavid, who shared proportionately the “benefits” of petitioner’s allegedly undercompensated past services. We are satisfied that petitioner was not undercompensated, and this factor militates against respondent’s argument that the payments were additional compensation. See *Bogardus v. Commissioner*, *supra*, 302 U.S. at 42.

As we see it, Lucas and Burford, after selling their Spruce Coal stock at an enormous profit on a minimal investment, chose to share some of those profits with certain employees and former employees of the corporation they, indirectly, had previously owned. The fact that the recipient (petitioner) previously performed services for a corporation (Burford, Inc.) indirectly owned and controlled by the payors (Lucas and Burford) does not necessarily make the payments compensation for past services. See and compare *Wright v. Commissioner*, 30 T.C. 392, 394-395 (1958); *Estate of McAdow v. Commissioner*, 12 T.C. 311, 318-319 (1949). See also *Bogardus v. Commissioner*, *supra*, 302 U.S. at 44.[10] And although Burford and Lucas were intensely interested in the corporation’s affairs, both as officers and as indirect shareholders, the fact remains that the business of the corporation is not the business of the shareholders. See *Whipple v. Commissioner*, 373 U.S. 193, 202 (1963). That Burford and Lucas were no longer shareholders at the time of the payments and that they also made payments to persons whose employment with the corporation had ceased five years earlier substantially undermine any compensatory element that might have been found had there been a payment from the corporation and had there been a payment to petitioner alone. Indeed, Lucas’ letter to Rosa Runyon, who had left Burford, Inc.’s employment five years before the payments, clearly expresses the payors’ intent – “to show our appreciation to you by saying ‘thanks’.” Moreover, the tone and format of the letter (“Dear Rosa” “Sincerely Edsel”) also indicated personal rather than business motivation.

[10] The world of nontaxable gifts did not, as respondent suggests, begin anew with *Commissioner v. Duberstein*, 363 U.S. 278 (1960). To the extent that pre-*Duberstein* cases seek to determine the transferor’s intention, they retain vitality. See *Jensen v. United States*, 511 F.2d 265, 269-70 (5th Cir. 1975); *Estate of Carter v. Commissioner*, 453 F.2d 61, 64-65 (2d Cir. 1971); *Poyner v. Commissioner*, 301 F.2d 287, 292 (4th Cir. 1962).

Also probative are the contemporaneous statements of Lucas and Burford (the payors) to petitioner (the recipient) that the payments were “gifts” that petitioner did not have to pay any taxes upon. We believed petitioner’s testimony as to those contemporaneous statements and found it consistent with the objective evidence in the record.[11]

[11] Conversely, we did not believe the belated attempts of Lucas and Burford at the trial to change the characterization of what had been in 1976 a nice and generous action on their part. Lucas, unversed in tax matters, relied upon Burford’s expertise. On direct examination, Burford testified as follows:

Q Did Mr. Abdella ever question you regarding the tax consequences of this $30,000 to him?

A Yes, he did.

Q And what did you tell him?

> A I told him that my state of mind and the circumstances surrounding me determined the tax consequences to me and that they had no influence on the tax consequences to him and that the circumstances surrounding him and his state of mind when he received them would determine his tax consequences.
>
> He asked me what I thought that was, and I told him in my opinion it was gift to him, but compensation by me….

> Any such legal advice by Burford would have been an astonishing error on the part of a tax lawyer. Since the Supreme Court's decision in 1960 in *Commissioner v. Duberstein*, 363 U.S. 278 (1960), if not since its decision in 1937 in *Bogardus v. Commissioner*, 302 U.S. 34 (1937), the law has been clear that the predominant factor in determining whether a payment is a gift is the intent of the payor. It is utterly incredible that Burford, a man who had attended New York University's tax school, who had practiced tax law for over 10 years, and who had taught tax law at Emory University's School of Law for three years, would advise petitioner, or direct Lucas to advise petitioner, that it was his (petitioner's) state of mind and surrounding circumstances as recipient that determined the tax consequences of the payments to him. The testimony of Burford and Lucas on this point is simply unworthy of belief, except perhaps as an expression of their rather cynical hopes that the parties to the transaction could somehow succeed in taking opposite positions for tax purposes, with only the public fisc as the loser. In any event, as the Supreme Court stated in *Commissioner v. Duberstein*, *supra*, 363 U.S. at 286: "It scarcely needs adding that the parties' expectations or hopes as to the tax treatment of their conduct in themselves have nothing to do with the matter." Thus, we disregard the subjective hopes or expectations of Lucas and Burford, and decide the case on the objective factors in the record. We are satisfied that at the time they gave the checks to petitioner, Lucas and Burford were acting from the same type of generous impulse that impelled the shareholders in Bogardus to make their gifts. It would seem that their generous impulse to make a gift was transformed by the time of the trial into a new economic impulse to save on their personal taxes. Regrettably, what was conceived and born in generosity was later debauched and disowned in avarice.

We conclude that the payments to petitioner by Lucas and Burford resulted from their generous decision to share the bounty of their enormous windfall with petitioner and other persons who, to some extent, may have helped enhance their profit on this stock sale. Such payments were motivated by "detached and disinterested generosity," "out of affection, respect, admiration or like impulses." *Commissioner v. Duberstein*, *supra*. Accordingly, such payments are gifts excludable from petitioner's gross income under section 102(a).

Kroner v. Commissioner, T.C. Memo. 2020-73, addressed payments made to a business colleague:

Gross income is income from whatever source derived unless otherwise excluded. Sec. 61(a). Gross income, however, does not include the value of property acquired by gift. Sec. 102(a). The United States Supreme Court has defined a gift under section 102 as a transfer that proceeds from a detached and disinterested generosity, out of affection, respect, admiration, charity or like impulses. *Commissioner v. Duberstein*, 363 U.S. 278, 285 (1960). In so doing, the Supreme Court stated that the most important consideration in ascertaining whether a gift has been made is the

> intention of the donor. *Id.* The donor's characterization of his action is not determinative, however, and a court must make an objective inquiry into whether what is characterized as a gift in fact meets the Duberstein definition of a gift under section 102. *Id.* at 286.
>
> The Supreme Court in *Duberstein* was careful to distinguish a common law gift from a section 102 gift. A common law gift requires only a voluntarily executed transfer without consideration. *Id.* at 285. So long as the donor had no legal obligation to pay, a transfer is a gift at common law. A section 102 gift, on the other hand, is more narrowly defined and requires more - it requires detached and disinterested generosity. *Id.* A transfer that proceeds from a moral duty or other expectation does not proceed from detached and disinterested generosity and is not a section 102 gift. *Id.* When a donee has rendered services to a donor, a payment for the services is not a gift even if the transferor had no legal compulsion to pay the remuneration. *Id.*
>
> Viewing the *Duberstein* standard through the prism of the relevant burdens of proof in this case, the ultimate issue for decision is whether petitioner has persuaded this Court that transfers totaling $24,775,000 constituted gifts from Mr. Haring within the meaning of section 102. See *id.* at 289. If petitioner cannot, he will have failed to meet his burden with regard to the determinations in the notice of deficiency and, conversely, respondent will have met his burden of proof as to the amounts asserted in his amended answer because there is no dispute as to the receipt of those amounts, only whether they are nontaxable gifts. The intention with which Mr. Haring made the transfers is the most critical factor. See *id*. at 285. Although the Court granted petitioner's motion in limine to preclude the drawing of any adverse inference from Mr. Haring's absence at trial, the Court also warned the parties on multiple occasions of the importance of hearing Mr. Haring's testimony. The Court's ruling on the motion in no way relieved petitioner of his burden of proving Mr. Haring's intention by a preponderance of credible evidence.

Part IV.B. of *Kroner*, titled, "Petitioner Has Failed To Prove That the Transfers Were Made With Disinterested Generosity," explains:

> Petitioner's story confirms that he and Mr. Haring had a business relationship starting in the early nineties and ending in 2007 with the repayment of the Avenger loan. As a result of this business relationship, petitioner would have us believe that he and Mr. Haring developed such a close personal relationship that Mr. Haring decided to give petitioner gifts of $24.775 million. We do not find petitioner's and the witnesses' testimony credible with respect to this close personal relationship. Petitioner's story is simply insufficient to prove that he and Mr. Haring had anything more than a business relationship where occasionally personal matters were discussed.
>
> Even if we were willing to find that petitioner and Mr. Haring had a close personal relationship, the record is devoid of any credible evidence to prove that Mr. Haring transferred the funds to petitioner with detached and disinterested generosity. See *Commissioner v. Duberstein*, 363 U.S. at 285-286. Additionally, when we consider our "experience with the mainsprings of human conduct" and the unconvincing record in this case, we cannot find facts that establish that Mr. Haring and petitioner had the type of relationship that would result in gifts this substantial. See *id.* at 289.

The timing of the transfers, especially the strong correlation with liquidity events experienced by Mr. Haring as a Peachtree investor, raises a question as to whether Mr. Haring acted as a nominee for an investment by petitioner in Peachtree. On Monday, February 7, 2005, the first liquidity event was reported in a Philadelphia banking and financial services publication. Just a few days earlier, on Friday, February 4, 2005, petitioner received the first transfer of $2.6 million from Mr. Haring. In March 2006 Peachtree went public and in April 2006 petitioner received a $6 million transfer from Mr. Haring. Finally, in November 2006 Credit Suisse acquired Peachtree and in December 2006 petitioner received an $8.75 million transfer from Mr. Haring.

The question of whether Mr. Haring acted as a nominee for petitioner becomes even more compelling when certain aspects of petitioner's story are considered. At the time of the Peachtree investment petitioner was barred by a noncompete agreement from participating or investing directly in Peachtree. Moreover, at the time of Mr. Haring's investment in Peachtree, petitioner held assets belonging to Mr. Haring in a nominee account and a nominee trust, suggesting a willingness on their parts to participate in nominee arrangements. We need not answer the question, however; suffice it to say that petitioner failed to meet his burden of proving that the transfers were gifts under section 102.[11] Accordingly, he has failed to meet his burden regarding the determinations in the notice, and respondent has met his burden regarding the increases asserted in his amended answer.

[11] Additionally, even if we believed parts of petitioner's story, we would view the series of transfers and their abrupt end as odd. Many transfers were made within days of each other. Petitioner repaid a loan from Mr. Haring with the proceeds of the "gifts". If Mr. Haring had truly wished to provide financially for petitioner, why did he not begin by forgiving the outstanding Avenger loan rather than making transfers far exceeding the loan balance and then expecting repayment of the loan? While this may be consistent with Mr. Haring's past behavior, the record is simply devoid of credible evidence for us to draw any conclusions.

Petitioner cites *Bogardus v. Commissioner*, 302 U.S. 34 (1937), *Runyon v. Commissioner*, T.C. Memo. 1984-623, *Abdella v. Commissioner*, T.C. Memo. 1983-616, and *Brimm v. Commissioner*, T.C. Memo. 1968-231, to support his position that the transfers from Mr. Haring should be excluded as gifts under section 102. Although the Court in those cases concluded that payments the taxpayer received were gifts, those cases are distinguishable.

In *Bogardus v. Commissioner*, 302 U.S. at 38, the parties stipulated that funds the taxpayer received were not intended to be payment or compensation for any services rendered or to be rendered. No such stipulation is present here. In two of the other cases petitioner cites, the donors appeared before the Court and provided credible testimony evincing their donative intent. It was on the basis of the donors' testimony, not present in this case, that the Court found that the transfers in those cases were gifts.[12] In contrast, we did not hear from Mr. Haring, which is surprising given his alleged close relationship with petitioner, and we cannot find other credible evidence in the record to determine his intentions.[13]

[12] In *Brimm v. Commissioner*, T.C. Memo. 1968-231, the donor was a school, and a member of the board of trustees executive committee credibly testified regarding the school's intention. In *Abdella v. Commissioner*, T.C. Memo. 1983-616, the donors

were shareholders of a corporation that employed the taxpayer. The donors told the taxpayer that the payment was a gift to him, but then later claimed a deduction for the payment as compensation. Nonetheless, the donors testified at trial that it was their intent to give the taxpayer a gift because they had sold the corporation, and the Court concluded that the objective facts indicated that the transfer was a gift when made. *Id.* The donors in *Runyon v. Commissioner*, T.C. Memo. 1984-623, were the same donors involved in *Abdella*. While the opinion in *Runyon* is not clear as to whether the donors testified, the Court relied on its opinion in *Abdella* in reaching its conclusion.

> [13] The Court granted petitioner's motion in limine, see *supra* p. 9, to preclude the drawing of any adverse inference from Mr. Haring's absence at trial, see *Wichita Terminal Elevator Co. v. Commissioner*, 6 T.C. 1158 (1946), *aff'd*, 162 F.2d 513 (10th Cir. 1947). In reaching our conclusion, we draw no adverse inference against petitioner as a result of Mr. Haring's absence. We conclude, however, that the evidence petitioner presented is insufficient for us to find that Mr. Haring's transfers during the years at issue were gifts. While petitioner could have proved Mr. Haring's intent with indirect, inferential evidence of intent if the evidence was convincing and credible, see *Alhadi v. Commissioner*, T.C. Memo. 2016-74, the record does not contain sufficient credible evidence for us to conclude that Mr. Haring's transfers were the result of detached and disinterested generosity, see *Commissioner v. Duberstein*, 363 U.S. at 285.

The record consists largely of unsubstantiated and self-serving testimony that we do not find credible. The record suffers from factual gaps and a noteworthy lack of documentation regarding the story told by petitioner and his witnesses. Because petitioner bears the burden of persuading this Court that the transfers were gifts and not income, and has failed to carry that burden, the deficiencies determined in the notice of deficiency are sustained. Moreover, because petitioner does not dispute the receipt or amount of the 2006 transfer and has failed to prove that it was a gift, respondent has met his burden of proof as to as the increases asserted in his amended answer,[14] which are sustained.

> [14] Petitioner does not dispute the increased December 20, 2006, transfer amount that resulted in the increased deficiency and penalty in respondent's amended answer. See *supra* p. 7.

On the other hand, when a parent transferred stock to a grantor retained income trust that passed to children if the parent lived ten years, past work from time to time was considered incidental to donative intent: the children were full-time students when the trust was created, no mention was made of future work for the company, and the survivorship requirement persuaded the IRS that the transfer was purely a gift.[3672]

Larsen v. Commissioner, T.C. Memo. 2008-73, held:

> PCI's issuance of a Form 1099-MISC reporting the $160,000 payment indicates that PCI did not intend this payment to be a gift.[6] Petitioner reported the $160,000 payment as income under the category "Services & Other Activities" on her State tax return and paid

---

[3672] Letter Ruling 9109027, which is further described in fn. 6532 in part III.B.2.d.i.(a) General Concepts of the Effect of Irrevocable Grantor Trust Treatment on Federal Income Taxation.

the State tax on the additional income. Mr. Skone, the same accountant who purportedly advised Mr. Pettegrove that the payment was a gift, prepared that return.

Petitioner has failed to establish that the $160,000 payment was a gift.[7] Accordingly, we hold that respondent's determination that the $160,000 payment to petitioner was includable in income was not in error.

[6] While petitioner and respondent had approximately 2 years from the time that the petition was filed to the start of trial, both failed to produce relevant information about PCI's tax returns that would have been helpful to the Court. Although the parties stipulated that PCI did not deduct the payment in 2001, the parties did not present evidence regarding which accounting method PCI used. A donor's characterization of his action, however, is not determinative of its tax treatment in the hands of the recipient. *Duberstein v. Commissioner*, 363 U.S. 278, 286-288 (1960).

[7] Petitioner also inaptly argued that the duty of consistency doctrine precludes respondent from asserting that the $160,000 payment is income to petitioner. Petitioner's argument is premised upon respondent's stipulation that the income to petitioner is either wage income or a gift and that it was not self-employment income. Petitioner's counsel suggests that this is inconsistent with PCI's treatment of the payment because PCI did not pay employment taxes on that payment. The duty of consistency doctrine estops a taxpayer from adopting a position in an open year that is inconsistent with a position that the taxpayer took during a different year after the period of limitations has expired for the earlier year. *Estate of Ashman v. Commissioner*, 231 F.3d 541, 543 (9th Cir. 2000), *affg*. T.C. Memo. 1998-145. Estoppel and the duty of consistency are to be applied against the Commissioner with the utmost caution and restraint, if at all, and only in compelling situations where the result otherwise would be unwarrantable or unconscionable. *Estate of Emerson v. Commissioner*, 67 T.C. 612, 617 (1977). Petitioner's argument must fail as there is no inconsistent treatment or position asserted or taken by respondent.

IRS Fact Sheet 2022-20 (3/2022) includes:

Tax Treatment of Money Raised Through Crowdfunding

Under federal tax law, gross income includes all income from whatever source derived unless it is specifically excluded from gross income by law. In most cases, property received as a gift is not includible in the gross income of the person receiving the gift.

If a crowdfunding organizer solicits contributions on behalf of others, distributions of the money raised to the organizer may not be includible in the organizer's gross income if the organizer further distributes the money raised to those for whom the crowdfunding campaign was organized.

If crowdfunding contributions are made as a result of the contributors' detached and disinterested generosity, and without the contributors receiving or expecting to receive anything in return, the amounts may be gifts and therefore may not be includible in the gross income of those for whom the campaign was organized. Contributions to crowdfunding campaigns are not necessarily a result of detached and disinterested generosity, and therefore may not be gifts. Additionally, contributions to crowdfunding

> campaigns by an employer to, or for the benefit of, an employee are generally includible in the employee's gross income.

In *Fields v. Commissioner*, T.C. Summary Opinion 2022-22, when the taxpayer separated from service, her employer forgave her loans and issued her Form 1099-MISC. The taxpayer asserted that the amount was nontaxable because it was a gift – an argument that the court rejected. After citing *Duberstein*, the court reasoned:

> There is a strong presumption that payments made beyond an employee's salary are compensation for services and not gifts. See *Van Dusen v. Commissioner*, 166 F.2d 647 (9th Cir. 1948), *aff'g* 8 T.C. 388 (1947). A payment between an employer and an employee may be a gift when the relationship between the employer and the employee is personal and unrelated to work. *Caglia v. Commissioner*, T.C. Memo. 1989-143; *Harrington v. Commissioner*, T.C. Memo. 1958-194.Petitioner offered testimony as to her personal relationship with Mr. Menke. In support of her assertion of a personal relationship and Mr. Menke's intent to make a gift, petitioner produced emails, text messages, and an unsigned draft severance agreement that removed the text pertaining to the $79,581 being written off as an employee advance.
>
> The communications presented consist of an email with Mr. Menke's administrator scheduling dinner in 2017, a meeting scheduling email with Paragon stakeholders in 2019, and unverified text messages from petitioner to Mr. Menke. While petitioner and Mr. Menke[6] corresponded after her separation from Paragon, their communications do not demonstrate that the payments were intended to be a gift. While petitioner and Mr. Menke reached an oral compromise regarding the terms of separation, the second, revised draft severance agreement was not signed. Even considering the revised agreement and a relevant provision, it is ambiguous at best. The text of the revised draft severance agreement does not necessarily support petitioner's position that the employer intended a gift to petitioner. At best, it reflects petitioner's attempt to recharacterize the payments as a gift, which apparently neither Mr. Menke nor Paragon agreed to. There is no evidence in the record from which the Court could conclude that Mr. Menke or Paragon intended to make a gift to petitioner. The payments were made from Paragon to petitioner and recorded as accounts receivables in Paragon's accounting records. Paragon's inclusion of the disputed amount in the signed and executed severance agreement and the subsequent issuance of a Form 1099-MISC indicates that the payments were not intended to be a gift.
>
> We find petitioner's testimony that she had a personal relationship with Mr. Menke is insufficient to support her contention that the payments were a gift.

The court upheld penalties:

> While they were assisted in preparing their tax return and timely filed their return, petitioners were aware of the provisions of the Paragon Severance agreement and the subsequently issued Form 1099-MISC. Also, they conceded that the taxable wages of $6,413 attributable to LTF were required to be included in their income for the year in issue and did not provide any further explanation as to why that amount was not reported in their return. Petitioners have not established they acted in good faith to properly report their tax liability and accordingly have not established that they had reasonable cause for the underpayment.

II.M.4.c.ii. Is Compensation to an Employee Better or Worse Than a Gift?

An employer may deduct reasonable compensation for services rendered in carrying out the employer's activity for profit.[3673]

The employer's deduction might offset the detriment of the employee's inclusion in income. For example, suppose each of the employer and employee have a 40% marginal tax rate and the employer wanted to get $100 to the employee, net of tax. The employer could award $167 of compensation, consisting of $100 cash to the employee and $67 (40% of $167) withholding to the government. The employer's $167 deduction generates a $67 tax saving (40% of $167), effectively reimbursing the employer for the $67 withholding paid to the government.

The actual math is not quite so tidy as illustrated above. For example, the employer and employee need to pay FICA tax on the compensation.[3674] The employer and employee might not be in the same bracket, which might cause a windfall or detriment to one party. If the payment is very large, the deduction might very well push the employer into a lower bracket and the employee into a higher bracket. When sharing with employees proceeds from the sale of a business, consider whether the employer might be taxed at capital gain rates, whereas employee compensation is taxed as ordinary income (plus FICA).

From a gift tax perspective, a gift is preferable if the donor has much more estate/gift tax exemption than assets. On the other hand, if the donor has a taxable estate, a 40% federal estate tax, without any corresponding tax savings, might represent a much larger net tax to the parties than a compensation scenario.

Often the buyer of the business will retain employees so that their relationships and know-how stay in the business. The new owner may seek to reduce its purchase price to devote funds to incentivize key employees to assure success after the purchase. To the extent that these key employees are participating in the sale directly, see part II.Q.1.c Personal Goodwill and Covenants Not to Compete. Another way to shift sale proceeds is to award equity more than one year before the sale; see parts II.M.4.e Issuing Stock to an Employee and II.M.4.f Issuing a Profits Interest to a Service Provider, as well as part II.M.4.b When is an Award or Transfer to an Employee Includible in the Employee's Income. However, owners of private businesses are often less comfortable with these awards, in that they may be reluctant to be accountable to their employees as fellow owners and may feel uncertain that the purchase price might not be enough that they can afford to share it. As to the latter, consider the following:

- Based on risk factors associated with private businesses, a $1 million business may earn $200,000-$300,000 in annual profit, which might be distributed to its owners every year.

- However, after paying capital gain tax, those owners might have $700,000 to reinvest, earning perhaps $14,000-$21,000 (2%-3%) in dividends from the stock market.

- Facing such a precipitous decline in income, the owners may resist selling the business and might not feel like sharing any of the sale proceeds, either.

[3673] Code § 162(a)(1). Code § 162(m) is among the authority for not deducting excessive compensation.
[3674] See part II.L.1 FICA: Corporation.

So, while setting up various plans before a sale may be a good idea in some cases, in others it gets delayed until a business sale is on the table.

II.M.4.c.iii. FICA On Amounts Paid After Death, Including Death Benefits

Any taxable payment made by an employer to a survivor or the estate of a former employee after the calendar year in which such employee died is not subject to FICA.[3675] This includes amounts that would have been payable even if the employee had lived.[3676]

Payments made in the calendar year of death are exempted from FICA by reason of the employee's death only if they:[3677]

- Are made under a plan established by the employer which makes provision for employees generally or a class or classes of his employees (or for such employees or class or classes of employees and their dependents), and

- Would not have been paid if the employee had not died.

For more information, see Zaritsky & Leimberg, ¶ 6.06[2][a][ii] Income tax treatment of the beneficiaries, *Tax Planning with Life Insurance: Analysis With Forms* (WG&L).

II.M.4.d. Introduction to Code § 409A Nonqualified Deferred Compensation Rules

Before working in this area, consider reading part II.Q.1.d.i IRS Audit Guide for Nonqualified Deferred Compensation. Also consider part II.P.3.i Common Equity for Preferred Equity and Vice Versa, where a retiring owner/employee might have their equity rearranged.

Enacted by the American Jobs Creation Act of 2004,[3678] Code § 409A imprints a layer of rules that supplements previously existing rules on taxing deferred compensation.[3679] It punishes service providers (employees and independent contractors) who receive deferred compensation without complying with its terms; it is so broad that even public school teachers need to be careful![3680]

The service provider must pay a penalty of 20% of the deferred compensation when it is includible in gross income.[3681] At the same time, the service provider must also pay interest to the IRS on the deferred tax, measured from the taxable year that is the later of when compensation was earned or when it was not subject to a substantial risk of forfeiture.[3682]

[3675] Code §3121(a)(14).
[3676] Letter Ruling 8321051.
[3677] Code §3121(a)(13).
[3678] Although the statute became effective January 1, 2005, existing plans did not need to be modified until December 31, 2008. Notice 2007-86.
[3679] Constructive receipt, Code § 83, Code § 457(f), etc.
[3680] Notice 2008-62.
[3681] Code § 409A(a)(1)(B)(i)(I); Prop. Reg. § 1.409A-4.
[3682] Code § 409A(a)(1)(B)(i)(II); Prop. Reg. § 1.409A-4.

However, these rules do not apply to compensation payments that are taxed when earned but paid in a later year.[3683]

Permissible triggering events for payments under Code § 409A include separation from service, disability, death, a specified time or fixed schedule, a change in control of the service recipient, or an unforeseeable emergency.[3684] Special rules apply to split-dollar life insurance arrangements that were entered into before 2005.[3685] These materials are not intended to provide a thorough knowledge of Code § 409A. The discussion below focuses on satisfying exceptions to Code § 409A with respect to equity and substitutes for equity.[3686]

Note, however, that the present value of a deferred compensation obligation is an expense on the business's income statement and a liability on its balance sheet. See part II.Q.1.d.ii.(b) Balance Sheet Effects of Deferred Compensation. Deferred compensation may help with a stock sale that but can backfire in an asset sale.[3687]

Also note that, to be exempt from ERISA, a plan needs to be a "top hat" plan for the benefit of a person or select group of persons with bargaining power.[3688] The employer must notify the Department of Labor that such a plan exists.[3689]

In *Keels v. Commissioner*, T.C. Memo. 2020-25, the IRS raised Code § 409A for the first time in a post-trial brief, causing the IRS to have the burden of proof. The Tax Court reasoned and held:

> To prevail under section 409A, a taxpayer must show all three of the following: first, that distributions from the plan may not occur before the taxpayer's separation from service, disability, death, an unforeseen emergency, or a change in ownership of the corporation, sec. 409A(a)(2)(A)(i)-(vi); second, that the plan does not permit acceleration of benefits except to the extent provided by regulations, sec. 409A(a)(3); and third, that the election to deferred compensation must be timely made, sec. 409A(a)(4)(B)(i). These requirements do not apply if the benefits are subject to substantial risk of forfeiture or were previously taxable. Sec. 409A(a)(1)(A)(i).
>
> For respondent to meet the burden of proof respondent must show that the plan fails to include any one of the three requirements above, that petitioner does not have a substantial risk of forfeiture, and that petitioner was not previously taxed on the deferred

---

[3683] See Rev. Rul. 2007-48 (treatment of amounts vested 1/1/2009 in the scenario that is used in the ruling), stating, Under § 1.409A-1(b)(6)(i), a right to compensation income that will be required to be included in income under § 402(b)(4) is not a deferral of compensation for purposes of § 409A.

[3684] The regulations and various IRS pronouncements provide very detailed rules on how to apply these concepts. The author always works with employee benefits practitioners in his firm who know these rules better than he does.

[3685] Notice 2007-34. See part II.Q.4.f Split-Dollar Arrangements.

[3686] For benefits of using profits interests, see part II.M.4.f.i Overview of Profits Interest; Contrast with Code § 409A.

[3687] See fn 5771 in part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold. See also part II.Q.1.d Nonqualified Deferred Compensation.

[3688] 'Top-Hat' Plans, part XI.C. of Deferred Compensation Arrangements, T.M. 385.

[3689] The simplest way might be a letter under 29 C.F.R. § 2520.104-23. For some relief for failure to send the letter, see https://www.irs.gov/retirement-plans/irs-penalty-relief-for-dol-dfvc-filers-of-late-annual-reports and https://www.dol.gov/agencies/ebsa/employers-and-advisers/plan-administration-and-compliance/correction-programs/dfvcp.

> compensation. The record does not show whether petitioner's plan with State Farm meets the requirements of section 409A. The plan document probably provides these details, but it is not in the record; neither is any Form 1099-MISC sent to petitioner by State Farm. The State Farm letter does not include those details. Thus, respondent has not shown that the plan fails to meet at least one of the requirements of section 409A or whether there is a substantial risk of forfeiture. Therefore, respondent did not meet the burden of proving that section 409A applies, and on this record petitioner is not taxable on the yearend balances of his termination and extended termination accounts for the years at issue.

For a tax trap regarding to deferred compensation when a business is sold, see fn 5771 in part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

II.M.4.d.i. Performance Bonuses

Performance bonuses that are due March 15 after a calendar year-end can have excellent motivational effects. Because the date is fixed no later than 2.5 months after yearend, paying compensation after that fixed date would not cause the payment to violate Code § 409A if the payment is made during the calendar year including the fixed date.[3690] One glitch is that it is possible that the information needed to determine the bonus might not be available until after March 15. To avoid this, require the employee to work at least one day in the next year. For example, suppose a bonus relates to 2010 performance. Require the employee to work at least one day in 2011. Imposing this requirement means that the payment is not vested until 2011, so the payment date could be fixed at a date on or before March 15, 2012. Of course, for motivational reasons, the payment should be made in 2011 as soon as the information is available to ensure that the employee does not have to wait too long, but the important point is that the deadline for the bonus relating to 2010 work can be after March 15, 2011, to take into account practical business exigencies.

Be sure that, when a performance bonus is added to other compensation, the service provider's total compensation remains reasonable.

Performance bonuses based on profits should not constitute an equity interest under Code § 2701 if the service provider does not have any other equity interest, the service provider is not identified to the IRS or third parties as being an owner, and the service provider does not share in any losses.

II.M.4.d.ii. Pushing Back a Scheduled Retirement Date

After a plan has been set up, the employee cannot elect to postpone a scheduled payment unless the election is at least 12 months before the scheduled payment date and the payment is deferred at least 5 years.[3691] (Postponing previously deferred payments is often referred to as re-deferral.)

However, that rule might not be as big an obstacle as it seems. Suppose an employee makes $150K per year and is scheduled to receive $100K annual retirement payments from 2020-

[3690] Reg. §§ 1.409A-1(b)(4)(i), 1.409A-3(b), (d).
[3691] Code § 409A(a)(4)(C).

2029. Suppose that 2019 comes along, and the parties agree that employee should continue working. In that case:

- In 2019, the employee agrees to receive his $150K in compensation for 2020 over two periods: $50K in 2020 and $100K in 2030.

- The employee receives $150K in 2020, of which $100K is the originally scheduled deferred compensation and $50K that is earned for 2020 work.

- Thus, the employee receives $150K in 2020 and earns an additional payment of $100K to be paid in 2030, the year after the $100K retirement payments were scheduled to end.

The employee has effectively pushed back retirement by one year. However, the original payment stream of $100K per year from 2020-2029 remains intact. Thus, the Code § 409A rules on postponing a stream of payments have not been violated. The above plan not only offers flexibility but also avoids the strict deadlines that apply to re-deferral.

Setting a fixed payment upon attaining a particular age would satisfy Code § 409A without causing Code § 2701 or other income or estate tax problems, and that could be coupled with disability and death benefits to provide financial security.[3692]

II.M.4.d.iii. Change in Control as a Permitted Triggering Event under Code § 409A

Change in the entity's control is an event that can trigger payment of deferred compensation without the harsh consequences of Code § 409A.[3693] Generally, such a change in control in a corporation occurs when any one person, or more than one person acting as a group, acquires ownership of stock of the corporation that, together with stock held by such person or group, constitutes more than 50% of the total fair market value or total voting power of the stock of such corporation.[3694] Similar rules apply to partnerships.[3695] Using principles that apply to other forms of performance-based compensation, Code § 2701 should not apply to compensation awarded upon change of control.

[3692] See part III.B.7.c.vi, Code § 2701 Interaction with Income Tax Planning.
[3693] In order to cover earn-out provisions where the acquirer in a change of control contracts to make an immediate payment at the closing of the transaction with additional amounts payable at a later date, delayed payments may meet the requirements for a payment at a specified time or pursuant to a fixed schedule if they are paid on the same schedule and under the same terms and conditions as payments to shareholders generally pursuant to the change in control event to the extent paid not later than five years after the change in control event. Reg. § 1.409A-3(i)(5)(iv).
[3694] Reg. § 1.409A-3(i)(5)(v)(A). This applies to a change in the ownership of the corporation, a change in effective control of the corporation, or a change in the ownership of a substantial portion of the assets of the corporation. Reg. § 1.409A-3(i)(5)(i).
[3695] Third paragraph of Part VI.E. to the Preamble to the Prop. Regs., allowing taxpayers to rely on similar rules until further guidance is issued for a partnership setting. This continues to apply under section III.G. of the preamble to the final regulations.

II.M.4.e. Issuing Stock to an Employee

II.M.4.e.i. Issuing Stock to an Employee - Generally

For the fundamental rules underlying this part II.M.4.e.i, see part II.M.4.b.ii Income Tax Recognition Timing Rules re Equity Incentives.

An employee who receives stock as compensation for services must pay tax on that stock.[3696] For possible deferral of income tax (but not employment tax) inclusion, see part II.M.4.e.ii Code § 83(i) Election Deferring Income Tax Inclusion.

Rev. Proc. 2012-29 explains the consequences of nonvested or nontransferable stock:[3697]

> Section 83(a) provides generally that if, in connection with the performance of services, property is transferred to any person other than the person for whom such services are performed, the excess of the fair market value of the property (determined without regard to any restriction other than a restriction which by its terms will never lapse) as of the first time that the transferee's rights in the property are transferable or are not subject to a substantial risk of forfeiture, whichever occurs earlier, over the amount (if any) paid for the property is included in the service provider's gross income for the taxable year which includes such time.[3698]
>
> Under § 1.83-3(f) of the Income Tax Regulations, property is transferred in connection with the performance of services if it is transferred to an employee or independent contractor (or beneficiary thereof) in recognition of the performance of services, or refraining from performance of services. The existence of other persons entitled to buy stock on the same terms and conditions as an employee, whether pursuant to a public or private offering may, however, indicate that in such circumstance a transfer to the employee is not in recognition of the performance of, or refraining from performance of, services. The transfer of property is subject to § 83 whether such transfer is in respect of past, present, or future services.[3699]
>
> Section 83(b) and § 1.83-2(a) permit the service provider to elect to include in gross income the excess (if any) of the fair market value of the property at the time of transfer over the amount (if any) paid for the property, as compensation for services.[3700]
>
> Under § 83(e)(3) and § 1.83-7(b), § 83 does not apply to the transfer of an option without a readily ascertainable fair market value at the time the option is granted. As a result, a § 83(b) election may only be made with respect to the transfer of an option that has a readily ascertainable fair market value (as defined in § 1.83-7(b)), at the time the option is granted and that is substantially nonvested (as defined in § 1.83-3(b)). If substantially nonvested property is received upon exercise of an option without a readily ascertainable fair market value at grant, a service provider is permitted to make a

[3696] Code § 83. Letter Ruling 201405005 is a good example of a simultaneous exit of two owners and entrance of key employees with restricted stock in an S corporation.
[3697] Footnotes below are mine and are not in the Rev Proc.
[3698] Rev. Proc. 2012-29, § 2.01.
[3699] Rev. Proc. 2012-29, § 2.02.
[3700] Rev. Proc. 2012-29, § 2.03.

§ 83(b) election with respect to the transfer of such property upon the exercise of the option.[3701]

Under § 1.83-2(a), if property is transferred in connection with the performance of services, the person performing such services may elect to include in gross income under § 83(b) the excess (if any) of the fair market value of the property at the time of transfer (determined without regard to any lapse restriction, as defined in § 1.83-3(i)) over the amount (if any) paid for such property, as compensation for services. If this election is made, the substantial vesting rules of § 83(a) and the regulations thereunder do not apply with respect to such property, and except as otherwise provided in § 83(d)(2) and the regulations thereunder (relating to the cancellation of a nonlapse restriction), any subsequent appreciation in the value of the property is not taxable as compensation to the person who performed the services. Thus, the value of property with respect to which this election is made is included in gross income as of the time of transfer, even though such property is substantially nonvested (as defined in § 1.83-3(b)) at the time of transfer, and no compensation will be includible in gross income when such property becomes substantially vested.[3702]

In computing the gain or loss from a subsequent sale or exchange of property for which a § 83(b) election was filed, § 1.83-2(a) provides that the basis of such property shall be the amount paid for the property (if any) increased by the amount included in gross income under § 83(b).[3703]

If property for which a § 83(b) election was filed is forfeited while substantially nonvested, § 83(b)(1) provides that no deduction shall be allowed with respect to such forfeiture. Section 1.83-2(a) further provides that such forfeiture shall be treated as a sale or exchange upon which there is realized a loss equal to the excess (if any) of (1) the amount paid (if any) for such property, over (2) the amount realized (if any) upon such forfeiture. If such property is a capital asset in the hands of the taxpayer, such loss shall be a capital loss.[3704]

The Rev. Proc. provided a sample form for making a Code § 83(b) election.[3705]

When stock is transferred to the employee that is subject to a substantial risk of forfeiture[3706] and is not transferable,[3707] the employee recognizes income and treated as owning the stock if the employee makes a Code § 83(b) election.[3708] Conversely, if the corporation awards nonvested stock, then the employee does not recognize compensation until the stock vests, unless the employee makes a Code § 83(b) election no later than 30 days after the award.[3709]

[3707] Within the meaning of Code § 83(c)(2).
[3708] Rev. Rul. 83-22.
[3709] Code § 83(b)(2). Letter Rulings 201405008 and 201528001 excused failure to file with the taxpayer's individual tax return a copy of a timely Code § 83(b) election; T.D. 9779 finalized without changes REG-

Similarly, in determining who is a shareholder of an S corporation: Stock that is issued in connection with the performance of services[3710] and that is substantially nonvested[3711] is not treated as outstanding stock of the corporation, and the holder of that stock is not treated as a shareholder solely by reason of holding the stock, unless the holder makes a Code § 83(b) election with respect to the stock.[3712] In the event of such an election, the stock is treated as outstanding stock of the corporation, and the holder of the stock is treated as a shareholder for purposes of subchapter S.[3713] Substantially nonvested stock with respect to which a Code § 83(b) election has been made is taken into account in determining whether a corporation has a second class of stock, and such stock is not treated as a second class of stock if the stock confers rights to distribution and liquidation proceeds that are identical,[3714] to the rights conferred by the other outstanding shares of stock.[3715] See part II.A.2.i Single Class of Stock Rule, especially part II.A.2.i.iv Providing Equity-Type Incentives without Violating the Single Class of Stock Rules.

135524-14, Property Transferred in Connection with the Performance of Services, 7/16/2015, amending Reg. § 1.83-2(c) to remove this requirement, effective for property transferred on or after January 1, 2016, the latter per Reg. § 1.83-2(g). T.D. 9779 also revoked Rev. Proc. 2012-29, in part, to the extent it requires, inconsistent with the final regulations, a taxpayer to submit a copy of a Code § 83(b) election with his or her income tax return. Note that Code § 83(b)(2) requires only the initial filing to make the election; the requirement to file the election with one's individual return appeared to be merely an administrative requirement for preparing a complete return – a requirement that the IRS appears to have abandoned as of January 1, 2015, although this apparent abandonment for 2015 was done in a peculiar way.

[3710] Within the meaning of Reg. § 1.83-3(f).

[3711] Within the meaning of Reg. § 1.83-3(b).

[3712] Reg. § 1.1361-1(b)(3), "Treatment of restricted stock," provides:

> For purposes of subchapter S, stock that is issued in connection with the performance of services (within the meaning of § 1.83-3(f)) and that is substantially nonvested (within the meaning of § 1.83-3(b)) is not treated as outstanding stock of the corporation, and the holder of that stock is not treated as a shareholder solely by reason of holding the stock, unless the holder makes an election with respect to the stock under section 83(b). In the event of such an election, the stock is treated as outstanding stock of the corporation, and the holder of the stock is treated as a shareholder for purposes of subchapter S. See paragraphs (*l*)(1) and (3) of this section for rules for determining whether substantially nonvested stock with respect to which an election under section 83(b) has been made is treated as a second class of stock.

[3713] Reg. § 1.1361-1(b)(3), which is reproduced in fn 3712.

[3714] Within the meaning of Reg. § 1.1361-1(*l*)(1), which is reproduced in fn 226 in part II.A.2.i.i.(a) Nonvoting Stock Permitted for S Corporations.

[3715] Reg. § 1.1361-1(*l*)(3), "Stock taken into account," which provides:

> Except as provided in paragraphs (b)(3), (4), and (5) of this section (relating to restricted stock, deferred compensation plans, and straight debt), in determining whether all outstanding shares of stock confer identical rights to distribution and liquidation proceeds, all outstanding shares of stock of a corporation are taken into account. For example, substantially nonvested stock with respect to which an election under section 83(b) has been made is taken into account in determining whether a corporation has a second class of stock, and such stock is not treated as a second class of stock if the stock confers rights to distribution and liquidation proceeds that are identical, within the meaning of paragraph (*l*)(1) of this section, to the rights conferred by the other outstanding shares of stock.

Reg. § 1.1361-1(b)(3) is reproduced in fn 3712 in part II.M.4.e.i Issuing Stock to an Employee - Generally.
Reg. § 1.1361-1(b)(4) is reproduced in the text accompanying fn 265 in part II.A.2.i.iv Providing Equity-Type Incentives without Violating the Single Class of Stock Rules.
Reg. § 1.1361-1(b)(5) is reproduced in fn 290 in part II.A.2.i.x Straight Debt.

Rev Proc. 2012-29, Section 5, provides various examples, the tax results of which “do not depend on whether or not the stock transferred to the employee is traded on an established securities market”:

> *Example 1*. Company A is a privately held corporation and no stock in Company A is traded on an established securities market. On April 1, 2012, in connection with the performance of services, Company A transfers to E, its employee, 25,000 shares of substantially nonvested stock in Company A. In exchange for the stock, E pays Company A $25,000, representing the fair market value of the shares at the time of the transfer. The restricted stock agreement provides that if E ceases to provide services to Company A as an employee prior to April 1, 2014, Company A will repurchase the stock from E for the lesser of the then current fair market value or the original purchase price of $25,000. E’s ownership of the 25,000 shares of stock will not be treated as substantially vested until April 1, 2014 and will only be treated as substantially vested if E continues to provide services to Company A as an employee until April 1, 2014. On April 1, 2012, E makes a valid election under § 83(b) with respect to the 25,000 shares of Company A stock. Because the excess of the fair market value of the property ($25,000) over the amount E paid for the property ($25,000) is $0, E includes $0 in gross income for 2012 as a result of the stock transfer and related § 83(b) election. The 25,000 shares of stock become substantially vested on April 1, 2014 when the fair market value of the shares is $40,000. No compensation is includible in E’s gross income when the shares become substantially vested on April 1, 2014. In 2015, E sells the stock for $60,000. As a result of the sale, E realizes $35,000 ($60,000 sale price - $25,000 basis) of gain, which is a capital gain.
>
> *Example 2*. The facts are the same as in Example 1 above, except that E does not make an election under § 83(b). Under § 83(a), E includes $0 in gross income in 2012 as a result of the transfer of stock from Company A because the stock is not substantially vested. When the shares become substantially vested on April 1, 2014, E includes $15,000 ($40,000 fair market value less $25,000 purchase price) of compensation in gross income. E’s basis in the stock as of April 1, 2014 is $40,000 ($25,000 paid for the stock and $15,000 included in income under § 83(a)). As a result of the 2015 sale of the stock for $60,000, E realizes $20,000 ($60,000 sale price - $40,000 basis) of gain, which is a capital gain.
>
> *Example 3*. The facts are the same as in Example 1 above, except that E terminates employment with Company A on August 1, 2013 before the shares become substantially vested. Because the excess of the fair market value of the property ($25,000) over the amount E paid for the property ($25,000) is $0, E includes $0 in gross income for 2012 as a result of the stock transfer and related § 83(b) election. When E terminates employment on August 1, 2013, the fair market value of the stock is $30,000 but Company A purchases the stock from E for $25,000 pursuant to the terms of the restricted stock agreement. As a result of the 2013 sale of the stock for $25,000, E realizes $0 in gain ($25,000 sale price - $25,000 basis).
>
> *Example 4*. Company B is a publicly held corporation and Company B stock is traded on an established securities market. On April 1, 2012, in connection with the performance of services, Company B transfers to F, its employee, 25,000 shares of substantially nonvested stock in Company B. At the time of the transfer, the shares have an aggregate fair market value of $25,000. F is not required to pay Company B any consideration in exchange for the stock. The restricted stock agreement provides that if

F ceases to provide services to Company B as an employee prior to April 1, 2014, F will forfeit the stock back to Company B. F's ownership of the 25,000 shares of stock will not be treated as substantially vested until April 1, 2014 and will only be treated as substantially vested if F continues to provide services to Company B as an employee until April 1, 2014. On April 1, 2012, F makes a valid election under § 83(b) with respect to the 25,000 shares of Company B stock. Because the excess of the fair market value of the property ($25,000) over the amount F paid for the property ($0) is $25,000, F includes $25,000 of compensation in gross income for 2012 as a result of the stock transfer and related § 83(b) election. The 25,000 shares of stock become substantially vested on April 1, 2014 when the fair market value of the shares is $40,000. No compensation is includible in F's gross income when the shares become substantially vested on April 1, 2014. In 2015, F sells the stock for $60,000. As a result of the sale, F realizes $35,000 ($60,000 sale price - $25,000 basis) in gain, which is a capital gain.

Example 5. The facts are the same as in Example 4 above, except that F does not make an election under § 83(b). Under § 83(a), F includes $0 in gross income in 2012 as a result of the transfer of stock from Company B because the stock is not substantially vested. When the shares become substantially vested on April 1, 2014, F includes $40,000 ($40,000 fair market value less $0 purchase price) of compensation in gross income. F's basis in the stock as of April 1, 2014 is $40,000 ($0 paid for the stock and $40,000 included in income under § 83(a)). As a result of the 2015 sale of the stock for $60,000, F realizes $20,000 ($60,000 sale price - $40,000 basis) of gain, which is a capital gain.

Example 6. The facts are the same as in Example 4 above, except that F terminates employment with Company B on August 1, 2013 and forfeits the shares before the shares become substantially vested. Because the excess of the fair market value of the property ($25,000) over the amount F paid for the property ($0) is $25,000, F includes $25,000 of compensation in gross income for 2012 as a result of the stock transfer and related § 83(b) election. In the year F terminates employment, F forfeits the 25,000 shares back to Company B and such forfeiture is treated as a sale of the shares in exchange for no consideration. Pursuant to § 1.83-2(a), F realizes no loss as the result of such sale. F is not entitled to a deduction or credit for taxes paid as the result of filing the § 83(b) election or the subsequent forfeiture of the property.

Note the unfairness in Example 6: F included an amount in income for stock F received but got no deduction – not even a capital loss – when F forfeited the stock with respect to that amount included (but would have received a deduction for any out-of-pocket purchase price)[3716]. Presumably, if F does not receive a deduction, Company B will not recognize income on account of F forfeiting the shares. Note that the result would have been different if Company B had separately bonused $25,000 cash and F had paid $25,000 cash for the stock, so long as the bonus and the payment were not tied together.

Often the corporation will "gross-up" the employee's pay by paying the employee's taxes on that compensation. If the corporation and employee are in the same income tax bracket, this arrangement will not cost anyone any income tax. For example, suppose everyone is in a 40% income tax bracket (federal and state) and $100 of stock is issued:

[3716] Although the Example cited a regulation, Code § 83(b)(1) mandates the position the regulation takes.

- The corporation receives $167 compensation deduction, consisting of $100 stock and $67 income tax withholding.

- The corporation saves $67 income tax (40% of $167). That $67 income tax savings offsets the $67 cash out-of-pocket for the withholding. Therefore, the corporation has no net cash expenditure.

- The employee incurs $67 of income tax liability (40% of the $167 compensation income). However, the $67 income tax withholding offsets that liability.

- Note that the above analysis ignores FICA.

- Note that lower corporate rates and the Code § 199A qualified business income deduction[3717] may make the employer's deduction worth less than the income tax that the service provider.

- For an S corporation, the compensation deduction benefits the shareholders, not the corporation, although the corporation indirectly benefits by reducing the need to make distributions to pay the shareholders' income tax. Note the new shareholder will benefit from this deduction, because all items are allocated pro rata, per share per day owned regardless of the timing of ownership, except to the extent that an election is made to close the books as of the date of the transfer.[3718] The election to close the books can be made only if issuance is at least 25% of the previously outstanding stock to one or more new shareholders.[3719]

Consider timing the issuance to coincide with taxable years in which the employer has sufficient ordinary income to absorb the deduction and provide a tax benefit at a sufficiently high income tax rate. Note also that, if an S corporation issues stock to its key employees in the year of the sale of the business, the deduction (if high enough) might wind up offsetting capital gain income, which is taxed at a lower rate – often too low to take advantage of the income tax dynamics described above.

Compare these concepts to the income tax dynamics of part II.Q.1.a, Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis, and more fully explored in part II.Q.1.d, Nonqualified Deferred Compensation.

Nonvested stock options provide the least complication when the exercise price is no less than the amount of the underlying stock's value. This approach avoids the forfeiture described above. It also avoids the need to comply with the restrictions that Code § 409A imposes on nonqualified deferred compensation.[3720]

[3717] See part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.
[3718] See part III.B.2.j Tax Allocations upon Change of Interest, particularly III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.
[3719] Reg. § 1.1361-1(g)(2)(i)(C).
[3720] See footnote 3762.

If an employee is upset about stock being diluted when other investors enter and the buyer pays the employee the amount necessary to make up for the dilution, the payments in excess of a pro-rata purchase price that the buyer designates as being compensation is taxed as such.[3721]

Also, a corporation cannot treat a person as a shareholder with the same rights as the other shareholder and then claim that the stock was not yet vested to try to obtain a deduction at a later time when the stock was more valuable.[3722]

II.M.4.e.ii. Code § 83(i) Election Deferring Income Tax Inclusion

Notice 2018-97 explains this provision of the 2017 tax law changes:

> Section 83 generally provides for the federal income tax treatment of property transferred in connection with the performance of services. Section 13603 of the Act amended section 83 by adding section 83(i) to allow certain employees to defer recognition of income attributable to the receipt or vesting of qualified stock.

Notice 2018-97, part III.B, "Employment Taxes (including Income Tax Withholding)," explains in subpart 1, "General,":

> Employment taxes under Subtitle C of the Code include Federal Insurance Contributions Act (FICA) taxes, Federal Unemployment Tax Act (FUTA) tax, and federal income tax withholding. The Act made no amendments to FICA and FUTA taxation with respect to deferral stock. Thus, the FICA and FUTA taxation of deferral stock is unaffected by the Act. See H.R. Rep. No. 115-466, at 501 (2017).[1]
>
> [1] See H.R. Rep. No. 115-466, pages 496-497 for a discussion of FICA and FUTA taxation.
>
> The Act did amend the income tax withholding provisions in the Code with respect to deferral stock. Specifically, section 13603(b) of the Act amended the income tax withholding provisions, as described below, to conform the income tax withholding provisions in section 3401 and section 3402 to the income taxation of deferral stock. The remainder of the discussion of employment taxes concerns only federal income tax withholding.
>
> Section 3402(a) provides that, except as otherwise provided in section 3402, every employer making payment of wages shall deduct and withhold upon such wages a tax determined in accordance with tables or computational procedures prescribed by the Secretary. The term "wages" is defined in section 3401(a) for income tax withholding purposes as including all remuneration for services performed by an employee for his or her employer including the cash value of all remuneration (including benefits) paid in any medium other than cash, with certain specific exceptions.

[3721] *Brinkley v. Commissioner*, T.C. Memo. 2014-227, *aff'd* 808 F.3d 657 (5th Cir. 2015) (penalties assessed for the manner in which the taxpayer engaged in self-help merely through tax return positions rather than by negotiating a better deal with the company).

[3722] *Qinetiq U.S. Holdings, Inc. and Subsidiaries v. Commissioner*, T.C. Memo. 2015-123, *aff'd* 119 A.F.T.R.2d 2017-330 (4th Cir. 1/6/2017). See part II.M.4.b When is an Award or Transfer to an Employee Includible in the Employee's Income.

Section 3401(i), as added by section 13603(b)(1) of the Act, provides that for purposes of section 3401(a), qualified stock (as defined in section 83(i)) with respect to which an election is made under section 83(i) is treated as wages (1) received on the earliest date described in section 83(i)(1)(B), and (2) in an amount equal to the amount included in income under section 83 for the taxable year which includes such date. Thus, under section 3401(i), the amount of the deferral stock included in gross income is treated as wages subject to federal income tax withholding on the earliest date described in section 83(i)(1)(B), which sets forth the end date of the applicable deferral period.

Section 3402(t), which was added by section 13603(b)(2) of the Act, provides that, in the case of any qualified stock with respect to which an election is made under section 83(i), (1) the rate of tax under section 3402(a) must not be less than the maximum rate in effect under section 1 (37% in 2018), and (2) such stock is treated for purposes of section 3501(b) in the same manner as a noncash fringe benefit. Section 3501(b) provides that the taxes imposed by Subtitle C with respect to noncash fringe benefits must be collected (or paid) by the employer at the time and in the manner prescribed by the Secretary by regulations. Questions and Answers 5 and 6 of § 31.3501(a)-1T provide that the employer is liable for the payment of the tax with respect to a noncash fringe benefit regardless of whether the benefit is paid by another entity.

Noncash fringe benefits that fall within section 3501(b) generally are subject to the provisions of Announcement 85-113, 1985-31 I.R.B. 31, which provides guidelines for withholding, paying, and reporting employment tax on taxable noncash fringe benefits. Announcement 85-113 provides generally that taxpayers may rely on the guidelines in the announcement until the issuance of regulations that supersede the temporary and proposed regulations under section 3501(b). No regulations have been issued under section 3501(b) that supersede the announcement. Thus, Announcement 85-113 generally is applicable to current payments of noncash fringe benefits, and until further regulatory guidance is issued, it applies to deferral stock, except as limited by the specific rules of section 3401(i) and the terms of the announcement itself, as discussed further below.

Section 2 of Announcement 85-113 sets out the general income tax and accounting rule, which provides, in relevant part, that employers must withhold the applicable income tax on the date the benefits are paid and must deposit the withheld taxes under the regular rules for tax deposits. The employer may make a reasonable estimate of the value of the fringe benefit on the date the fringe benefit is paid for purposes of meeting the timely deposit requirements. The actual value of the fringe benefit must be determined by January 31 of the following year and reported on Form W-2, Wage and Tax Statement, and Form 941, Employer's Quarterly Federal Tax Return (or Form 944, Employer's Annual Federal Tax Return, if applicable instead of Form 941).

Announcement 85-113 states that if the employer underestimates the value of the fringe benefit and as a result deposits less than the amount required to be deposited (that is, the amount the employer would be required to deposit if the employer had correctly withheld the applicable taxes), the employer may be subject to the failure to deposit penalty under section 6656. Under Announcement 85-113, if the employer overestimates the value and deposits more than the amount required, the employer may claim a refund or elect to have the overpayment applied to the employer's next Form 941 (or other employment tax return).

Generally, under § 31.6205-1(d)(2), if an employer collects less than the correct amount of income tax required to be withheld from wages during a calendar year, the employer must collect the amount of the undercollection on or before the last day of the year by deducting the amount from remuneration of the employee. Under § 31.6205-1(d)(2),[2] if such a deduction is not made, the obligation of the employee to the employer with respect to the undercollection is a matter for settlement between the employee and the employer within the calendar year. However, in the case of noncash fringe benefits, Announcement 85-113 permits the employer to recover the undercollection of income tax withholding from the employee after the end of the calendar year during which the wage payment is made, as long as the recovery occurs prior to April 1 of the year following the year in which the benefits are paid. This rule in Announcement 85-113 applies to the amount included in wages under section 3401(i). Thus, with regard to any income tax withholding that the employer deposits for deferral stock included in wages under section 3401(i) that has not been collected from the employee, the employer may recover the income tax from the employee prior to April 1 of the year following the year in which the inclusion in wages under section 3401(i) occurs.

[2] The reference in Announcement 85-113 is to the section of the regulations (§ 31.6205-1(c)(4)) setting forth the same principle in the section 6205 regulations before amendments to the regulations after 1985. See T.D. 9405, 72 FR 37376 (July 1, 2008).

Section 3401(i) provides the specific date on which deferral stock must be treated as wages for income tax withholding purposes and the special rules for timing of inclusion in income under Announcement 85-113 available with respect to certain noncash fringe benefits do not apply.[3] The withholding rates described in section 2 of Announcement 85-113 also do not apply to deferral stock because, under section 3402(t)(1), the income tax withholding rate under section 3402(a) “shall not be less than the maximum rate of tax in effect under section 1.” The Treasury Department and the IRS expect that proposed regulations providing further guidance on section 83(i) will provide that the rate of withholding under section 3402(t)(1) on deferral stock is the maximum rate of tax in effect under section 1 and will provide that withholding is applied (1) without reference to any payment of regular wages, (2) without allowance for the number of allowances or other dollar amounts claimed by the employee on Form W-4, Employee’s Withholding Allowance Certificate, (3) without regard to whether the employee has requested additional withholding, and (4) without regard to the withholding method used by the employer. Thus, under the anticipated proposed regulations, only one rate, the maximum rate of tax under section 1, would be used in withholding on deferral stock under section 3402(t), and employers would not be able to increase or decrease the rate at the request of the employee. Under Code section 3402(t) and this notice and unless and until superseding guidance is issued, with respect to wages resulting from deferral stock under section 3402(t), employers must withhold taxes at the maximum rate of income tax under section 1 without regard to whether the employee has requested additional withholding and without regard to any withholding allowances or dollar amounts entered on the employee’s Form W-4.

[3] Announcement 85-113 provides two rules applicable to the date of payment of some noncash fringe benefits that do not apply to deferral stock. The first rule allows payors of certain noncash fringe benefits to treat the benefits as paid on any day(s) during the year so long as they treat benefits provided in a calendar year as paid not later than December 31 of the calendar year. The second rule allows employers to treat certain

benefits paid during the last two months of the year (or any shorter period) as paid during the subsequent calendar year. However, Announcement 85-113 provides that neither of these two rules applies when the fringe benefit is the transfer of personal property (either tangible or intangible) of a kind normally held for investment or the transfer of real property. Because deferral stock is personal property of a kind normally held for investment, neither of these rules may be used with respect to deferral stock.

In summary, deferral stock constitutes wages under section 3401(i) and is treated as received on the earliest date described in section 83(i)(1)(B) in an amount equal to the amount included in income under section 83 for the taxable year that includes such date. When the wages are treated as paid under section 3401(i), the employer must make a reasonable estimate of the value of the stock and make deposits of the amount of income tax withholding liability based on that estimate. The wages included under section 3401(i) are subject to withholding at the maximum rate of tax in effect under section 1, and withholding is determined without regard to the employee's Form W-4. By January 31 of the following year, the employer must determine the actual value of the deferral stock on the date it is includible in the employee's income and report that amount and the withholding on Form W-2 and Form 941. With respect to income tax withholding for the deferral stock that the employer pays from its own funds, the employer may recover that income tax withholding from the employee until April 1 of the year following the calendar year in which the wages were paid.

An employer that fails to deduct and withhold federal income tax under section 3402 is liable for the payment of the tax whether or not the employer collects it from the employee, unless section 3402(d) applies.[4] Section 3402(d) provides that if the employer fails to deduct and withhold the correct amount of income tax withholding, and thereafter the income tax against which the tax under section 3402 may be credited is paid, the tax imposed under section 3402(a) shall not be collected from the employer. Section 3402(d) does not relieve the employer from liability for any penalties in respect of the failure to deduct and withhold.

[4] Section 3403, Section 31.3403-1.

Code § 83(i)(1) provides:[3723]

In general. For purposes of this subtitle—

(A) *Timing of inclusion*. If qualified stock is transferred to a qualified employee who makes an election with respect to such stock under this subsection, subsection (a) shall be applied by including the amount determined under such subsection with respect to such stock in income of the employee in the taxable year determined under subparagraph (B) in lieu of the taxable year described in subsection (a).

(B) *Taxable year determined*. The taxable year determined under this subparagraph is the taxable year of the employee which includes the earliest of—

(i) the first date such qualified stock becomes transferable (including, solely for purposes of this clause, becoming transferable to the employer),

[3723] Subtitle A consists of Code §§ 1-1563.

(ii) the date the employee first becomes an excluded employee,

(iii) the first date on which any stock of the corporation which issued the qualified stock becomes readily tradable on an established securities market (as determined by the Secretary, but not including any market unless such market is recognized as an established securities market by the Secretary for purposes of a provision of this title other than this subsection),

(iv) the date that is 5 years after the first date the rights of the employee in such stock are transferable or are not subject to a substantial risk of forfeiture, whichever occurs earlier, or

(v) the date on which the employee revokes (at such time and in such manner as the Secretary provides) the election under this subsection with respect to such stock.

The Conference Agreement to P.L. 115-97 (12/22/2017) provides:

> … it is intended that the limited circumstances outlined in section 83(c)(3) and applicable regulations apply with respect to the determination of when stock first becomes transferrable or is no longer subject to a substantial risk of forfeiture. For example, income inclusion cannot be delayed due to a lock-up period as a result of an initial public offering. Finally, it is intended that the transition rule provided with respect to compliance with the 80-percent and employer notice requirements not be expanded beyond these specific items.

The principles of Code § 83(c)(3) are in part II.M.4.b.ii Income Tax Recognition Timing Rules re Equity Incentives.

Note that the amount of income inclusion is determined (and realized) under the normal rules of Code § 83(a); all Code § 83(i) does is defer taxation (recognition) of that income – perhaps to a taxable year in which the stock's value is less than that on which the Code § 83(a) taxation is based. The employee is treated as the owner for purposes of any activity relating to that stock, including allocating S corporation income if applicable.[3724]

Code § 83(i)(2), "Qualified stock," provides:

(A) *In general*. For purposes of this subsection, the term "qualified stock" means, with respect to any qualified employee, any stock in a corporation which is the employer of such employee, if—

(i) such stock is received—

(I) in connection with the exercise of an option, or

(II) in settlement of a restricted stock unit, and

(ii) such option or restricted stock unit was granted by the corporation—

[3724] See Eustice, Kuntz & Bogdanski, *Federal Income Taxation of S Corporations* (WG&L), particularly ¶¶ 3.03[21][c] Deferral Election, 11.03[2] Stock Options.

(I) in connection with the performance of services as an employee, and

(II) during a calendar year in which such corporation was an eligible corporation.

(B) *Limitation*. The term "qualified stock" shall not include any stock if the employee may sell such stock to, or otherwise receive cash in lieu of stock from, the corporation at the time that the rights of the employee in such stock first become transferable or not subject to a substantial risk of forfeiture.

(C) *Eligible corporation*. For purposes of subparagraph (A)(ii)(II)—

(i) *In general*. The term "eligible corporation" means, with respect to any calendar year, any corporation if—

(I) no stock of such corporation (or any predecessor of such corporation) is readily tradable on an established securities market (as determined under paragraph (1)(B)(iii)) during any preceding calendar year, and

(II) such corporation has a written plan under which, in such calendar year, not less than 80 percent of all employees who provide services to such corporation in the United States (or any possession of the United States) are granted stock options, or are granted restricted stock units, with the same rights and privileges to receive qualified stock.

(ii) *Same rights and privileges*. For purposes of clause (i)(II)—

(I) except as provided in subclauses (II) and (III), the determination of rights and privileges with respect to stock shall be made in a similar manner as under section 423(b)(5),

(II) employees shall not fail to be treated as having the same rights and privileges to receive qualified stock solely because the number of shares available to all employees is not equal in amount, so long as the number of shares available to each employee is more than a de minimis amount, and

(III) rights and privileges with respect to the exercise of an option shall not be treated as the same as rights and privileges with respect to the settlement of a restricted stock unit.

(iii) *Employee*. For purposes of clause (i)(II), the term "employee" shall not include any employee described in section 4980E(d)(4) or any excluded employee.

(iv) *Special rule for calendar years before 2018*. In the case of any calendar year beginning before January 1, 2018, clause (i)(II) shall be applied without regard to whether the rights and privileges with respect to the qualified stock are the same.

"Restricted stock unit" is explained below.[3725]

[3725] See text accompanying fn 3727.

Notice 2018-97, part III.A, “Application of the 80% Requirement,” provides:

> As described above, section 83(i)(2)(C) defines an “eligible corporation,” in relevant part, as, with respect to any calendar year, any corporation that has a written plan under which, in such calendar year, not less than 80% of all employees who provide services to the corporation in the United States (or any possession of the United States) are granted stock options, or are granted RSUs, with the same rights and privileges to receive qualified stock. Stakeholders have asked whether the 80% requirement of section 83(i)(2)(C)(i)(II) with respect to a calendar year is applied on a cumulative basis that takes into account stock options or RSUs granted in prior calendar years.
>
> The determination of whether a corporation qualifies as an eligible corporation is made “with respect to any calendar year.” Furthermore, to meet the 80% requirement, the corporation must have granted “in such calendar year” stock options to 80% of its employees or RSUs to 80% of its employees. Therefore, the determination that the corporation is an eligible corporation must be made on a calendar year basis, and whether the corporation has satisfied the 80% requirement is based solely on the stock options or the RSUs granted in that calendar year to employees who provide services to the corporation in the United States (or any possession of the United States). In calculating whether the 80% requirement is satisfied, the corporation must take into account the total number of individuals employed at any time during the year in question as well as the total number of employees receiving grants during the year (in each case, without regard to excluded employees or part-time employees described in section 4980E(d)(4)), regardless of whether the employees were employed by the corporation at the beginning of the calendar year or the end of the calendar year.
>
> The Treasury Department and the IRS have determined that interpreting the 80% requirement of section 83(i)(2)(C)(i)(II) with respect to a calendar year on a cumulative basis that takes into account stock options or RSUs granted in prior calendar years is contrary to the language of the statute and is not a reasonable good faith interpretation of the 80% requirement. Accordingly, the transition rule in section 13603(g) of the Act does not apply to such an interpretation.

Code § 83(i)(3) provides:

> *Qualified employee; excluded employee*. For purposes of this subsection—
>
> (A) *In general*. The term “qualified employee” means any individual who—
>
> > (i) is not an excluded employee, and
> >
> > (ii) agrees in the election made under this subsection to meet such requirements as are determined by the Secretary to be necessary to ensure that the withholding requirements of the corporation under chapter 24 with respect to the qualified stock are met.
>
> (B) *Excluded employee*. The term “excluded employee” means, with respect to any corporation, any individual—

(i) who is a 1-percent owner (within the meaning of section 416(i)(1)(B)(ii))[3726] at any time during the calendar year or who was such a 1 percent owner at any time during the 10 preceding calendar years,

(ii) who is or has been at any prior time—

(I) the chief executive officer of such corporation or an individual acting in such a capacity, or

(II) the chief financial officer of such corporation or an individual acting in such a capacity,

(iii) who bears a relationship described in section 318(a)(1) to any individual described in subclause (I) or (II) of clause (ii), or

(iv) who is one of the 4 highest compensated officers of such corporation for the taxable year, or was one of the 4 highest compensated officers of such corporation for any of the 10 preceding taxable years, determined with respect to each such taxable year on the basis of the shareholder disclosure rules for compensation under the Securities Exchange Act of 1934 (as if such rules applied to such corporation).

For Code § 318(a), see part II.Q.7.a.viii Code § 318 Family Attribution under Subchapter C.

The Conference Agreement to P.L. 115-97 (12/22/2017) provides:

> It is intended that the requirement that 80 percent of all applicable employees be granted stock options or be granted restricted stock units apply consistently to eligible employees, whether they are new hires or existing employees.

Notice 2018-97, part III.B, "Employment Taxes (including Income Tax Withholding)," explains in subpart 2, "Escrow Arrangement,":

> Section 83(i)(3)(A)(ii) provides the Secretary with authority to impose any requirements as the Secretary determines to be necessary to ensure that the withholding requirements of the corporation under chapter 24 with respect to the qualified stock are met. In order to be a qualified employee, an employee making an election under section 83(i) must agree in the election to these requirements.
>
> Pursuant to the authority provided to the Secretary under section 83(i)(3)(A)(ii), in order to be a qualified employee an employee making a section 83(i) election with respect to qualified stock must agree in the election that all deferral stock will be held in an escrow arrangement, the terms of which are consistent with the following requirements:

[3726] [footnote not in statute]: Code § 416(i)(1)(B)(ii), "1-Percent Owner," provides:

> For purposes of this paragraph, the term "1-percent owner" means any person who would be described in clause (i) if "1 percent" were substituted for "5 percent" each place it appears in clause (i).

Code § 416(i)(1)(B)(i) is reproduced in fn 3204 in part II.K.1.e.iii.(a) Scope and Effect of Real Estate Professional Exception.

(i) The deferral stock must be deposited into escrow before the end of the calendar year during which the section 83(i) election is made and must remain in escrow until removed in accordance with clause (ii) or the corporation has otherwise recovered from the employee an amount equal to the corresponding income tax withholding obligation under section 3401(i) for the taxable year determined in accordance with section 83(i)(1)(B).

(ii) At any time between the date of income inclusion under section 83(i)(1)(B) and March 31 of the following calendar year, the corporation may remove from escrow and retain the number of shares of deferral stock with a fair market value equal to the income tax withholding obligation that has not been recovered from the employee by other means. The fair market value of the shares must be determined pursuant to the rules in § 1.409A-1(b)(5)(iv). The fair market value used for purposes of this calculation is the fair market value of the shares at the time the corporation retains shares held in escrow to satisfy the income tax withholding obligation.

(iii) Any remaining shares held in escrow after the corporation's income tax withholding obligation has been met, whether by retention of shares in accordance with clause (ii) or otherwise, must be delivered to the employee as soon as reasonably practicable thereafter.

The Treasury Department and the IRS have concluded that the escrow arrangement described above adequately ensures the statutory income tax withholding requirements of the corporation will be met and that this approach is less burdensome than alternatives that would require a cash outlay by the corporation or the employee before the due date for the relevant withholding, and thus allow less flexibility with respect to resource allocation. If the corporation and the employee do not agree to deposit the deferral stock into an escrow arrangement consistent with the terms outlined above, the employee is not a "qualified employee" within the meaning of section 83(i)(3). The Treasury Department and the IRS are aware that this has the effect of allowing a corporation to preclude its employees from making section 83(i) elections by declining to establish an escrow arrangement consistent with the terms outlined above.

Future guidance on section 83(i)(3)(A)(ii) may establish alternative or substitute mechanisms to ensure a corporation's income tax withholding requirements are satisfied. Such mechanisms may be more restrictive than the above described escrow arrangement.

Code § 83(i)(4), "Election," provides:

(A) *Time for making election*. An election with respect to qualified stock shall be made under this subsection no later than 30 days after the first date the rights of the employee in such stock are transferable or are not subject to a substantial risk of forfeiture, whichever occurs earlier, and shall be made in a manner similar to the manner in which an election is made under subsection (b).

(B) *Limitations*. No election may be made under this section with respect to any qualified stock if—

(i) the qualified employee has made an election under subsection (b) with respect to such qualified stock,

(ii) any stock of the corporation which issued the qualified stock is readily tradable on an established securities market (as determined under paragraph (1)(B)(iii)) at any time before the election is made, or

(iii) such corporation purchased any of its outstanding stock in the calendar year preceding the calendar year which includes the first date the rights of the employee in such stock are transferable or are not subject to a substantial risk of forfeiture, unless—

(I) not less than 25 percent of the total dollar amount of the stock so purchased is deferral stock, and

(II) the determination of which individuals from whom deferral stock is purchased is made on a reasonable basis.

(C) *Definitions and special rules related to limitation on stock redemptions*.

(i) *Deferral stock*. For purposes of this paragraph, the term "deferral stock" means stock with respect to which an election is in effect under this subsection.

(ii) *Deferral stock with respect to any individual not taken into account if individual holds deferral stock with longer deferral period*. Stock purchased by a corporation from any individual shall not be treated as deferral stock for purposes of subparagraph (B)(iii) if such individual (immediately after such purchase) holds any deferral stock with respect to which an election has been in effect under this subsection for a longer period than the election with respect to the stock so purchased.

(iii) *Purchase of all outstanding deferral stock*. The requirements of subclauses (I) and (II) of subparagraph (B)(iii) shall be treated as met if the stock so purchased includes all of the corporation's outstanding deferral stock.

(iv) *Reporting*. Any corporation which has outstanding deferral stock as of the beginning of any calendar year and which purchases any of its outstanding stock during such calendar year shall include on its return of tax for the taxable year in which, or with which, such calendar year ends the total dollar amount of its outstanding stock so purchased during such calendar year and such other information as the Secretary requires for purposes of administering this paragraph.

Code § 83(i)(5), "Controlled groups," provides:

For purposes of this subsection, all persons treated as a single employer under section 414(b) shall be treated as 1 corporation.

Code § 83(i)(6) provides:

Notice requirement. Any corporation which transfers qualified stock to a qualified employee shall, at the time that (or a reasonable period before) an amount attributable to such stock would (but for this subsection) first be includible in the gross income of such employee—

(A) certify to such employee that such stock is qualified stock, and

(B) notify such employee—

(i) that the employee may be eligible to elect to defer income on such stock under this subsection, and

(ii) that, if the employee makes such an election—

(I) the amount of income recognized at the end of the deferral period will be based on the value of the stock at the time at which the rights of the employee in such stock first become transferable or not subject to substantial risk of forfeiture, notwithstanding whether the value of the stock has declined during the deferral period,

(II) the amount of such income recognized at the end of the deferral period will be subject to withholding under section 3401(i) at the rate determined under section 3402(t), and

(III) the responsibilities of the employee (as determined by the Secretary under paragraph (3)(A)(ii)) with respect to such withholding.

Notice 2018-97, part III.C, “Designation of Stock as Not Eligible for Section 83(i) Election,” provides:

As described above, section 83(i) imposes a number of requirements and limitations that must be met for a section 83(i) election to be allowed. Although the election, if allowed, may be made by an employee, the corporation is responsible for creating the conditions that would allow an employee to make the election. Stakeholders have indicated that a corporation may wish to compensate its employees with equity-based compensation for which no section 83(i) election may be made. As noted above, a corporation can preclude its employees from making section 83(i) elections by declining to establish an escrow arrangement as described in Section III.B.2 of this notice. As a result, a corporation need not be concerned that it would inadvertently create the requisite conditions for its employees to make section 83(i) elections or be required to comply with the notice requirement of section 83(i)(6). If a corporation does not intend to deposit qualified stock into an escrow arrangement (as described in Section III.B.2 of this notice) or otherwise create the conditions that would allow an employee to make the section 83(i) election, the terms of a stock option or RSU may provide that no election under section 83(i) will be available with respect to stock received upon the exercise of the stock option or settlement of the RSU. This designation would inform employees that no section 83(i) election may be made with respect to stock received upon exercise of the option or settlement of the RSU even if the stock is qualified stock.

Code § 83(i)(7), “Restricted stock units,” provides:

This section (other than this subsection), including any election under subsection (b), shall not apply to restricted stock units.

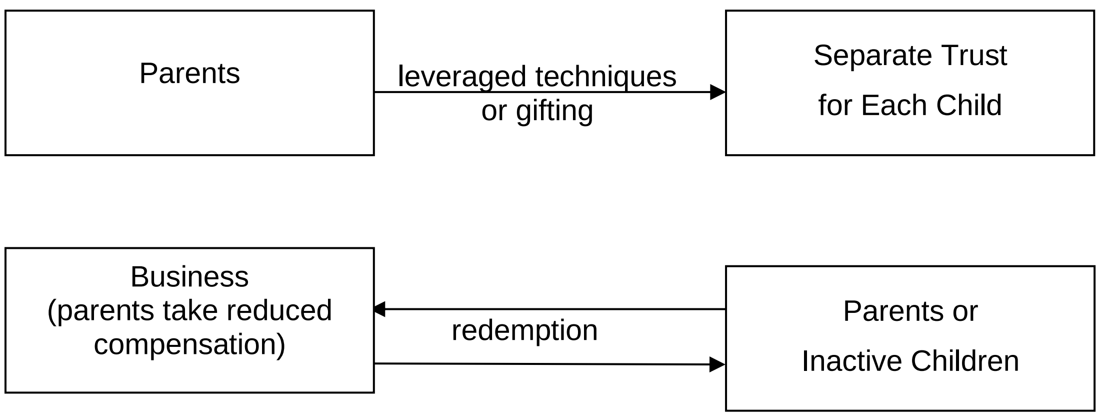
The Conference Agreement to P.L. 115-97 (12/22/2017) describes restricted stock units:[3727]

> A restricted stock unit (“RSU”) is a term used for an arrangement under which an employee has the right to receive at a specified time in the future an amount determined by reference to the value of one or more shares of employer stock. An employee’s right to receive the future amount may be subject to a condition, such as continued employment for a certain period or the attainment of certain performance goals. The payment to the employee of the amount due under the arrangement is referred to as settlement of the RSU . The arrangement may provide for the settlement amount to be paid in cash or as a transfer of employer stock (or either). An arrangement providing RSUs is generally considered a nonqualified deferred compensation plan and is subject to the rules, including the limits, of section 409A.

The Conference Agreement explains why Code § 83(i) does not apply to RSUs:

> The provision does not apply to income with respect to nonvested stock that is includible as a result of a section 83(b) election. The provision clarifies that Section 83 (other than the provision), including subsection (b), shall not apply to RSUs. Therefore, RSUs are not eligible for a section 83(b) election. This is the case because, absent this provision, RSUs are nonqualified deferred compensation and therefore subject to the rules that apply to nonqualified deferred compensation.

II.M.4.e.iii. Succession Planning Using Redemptions When Parent is Living



Leveraged Techniques of Gifting

The first chart represents the concept that leveraged techniques, such as GRATs and sales to irrevocable grantor trusts, result in all of the next generation having an equal interest in the business. See part III.B.1, Transfers During Life.

This might be through one trust that later splits through the trustee’s power to divide or a family agreement or through separate trusts created from inception.

[3727] “Restricted stock unit” is also important to understand for Code § 83(i)(2), defining “Qualified stock.” See text preceding fn 3725.

Reducing or Eliminating Parents or Inactive Owners

Inactive owners generally wish to maximize their return through distributions and by keeping compensation down.

Active owners typically wish to reinvest earnings to grow the business and wish to have incentive compensation.

The business entity might redeem the inactive owners to minimize future conflict.

If the older generation is still working in the business, then the older generation might agree to take less compensation. This might have income tax consequences to partnerships[3728] or S corporations,[3729] but it would not have gift tax consequences.

If the entity is an S corporation, then a partial redemption that the tax law treats as a distribution rather than a redemption might actually be favorable if it can be made out of AAA. See part II.Q.7.b Redemptions or Distributions Involving S Corporations.

The corporation might use a promissory note to redeem a parent's interest in a corporation.[3730]

[3728] Code § 704(e).

[3729] Code § 1366(e).

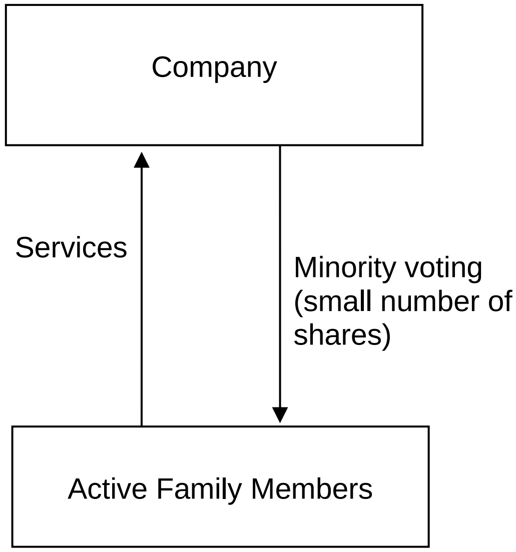
[3730] Letter Ruling 9408018, which held:

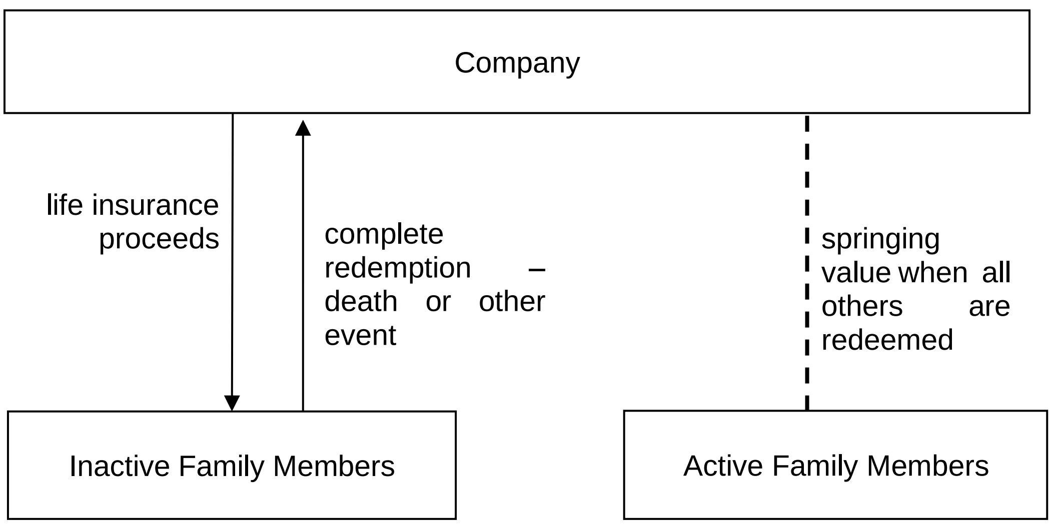
> The execution, as described above, of Notes A and B by Company with a stated annual interest rate that is the greater of either (i) 120 percent of the applicable federal mid-term rate on the date the redemption agreement is executed or (ii) the rate that is sufficient to provide the promissory note with "adequate stated interest" within the meaning of section 1274(c)(2) of the Code, will not result in a gift subject to gift tax. The interest rate that will be stated in the notes will be at least equal to the applicable federal long-term rate under section 1274(d)(1)(A) for the month during which the notes are executed. Therefore, for federal gift tax purposes, the fair market value of Note A and Note B will be the principal amount stated in each note. This ruling (number (11)) is conditioned on both of the following assumptions being met (i) there is no indication that the notes will not be paid according to their terms and (ii) the corporation's ability to pay the notes is not otherwise in doubt.

See also fn 7067 in part III.B.5.b Promissory Notes.

II.M.4.e.iv. Succession Planning Using Redemptions Funded by Life Insurance

Consider the following business succession strategy:





From a tax perspective, this structure can help solve the problem of inactive owners want to maintain their equity position, but key employees need entrepreneurial incentive to run and grow the business.

Below are some issues:

1. If a C corporation, make an S election. This will enable the profits to be distributed to the inactive owners using only one level of tax.

2. Grant incentive compensation to key employees based on formula.

3. Recapitalize into voting and nonvoting, for example, by issuing 19 shares of nonvoting for every share of voting stock; a similar idea would apply to an LLC or other entity taxed as a partnership.

4. Issue voting stock to key employees as compensation for services so that:

    - Key employees and inactive owners have an appropriate balance of voting power.

    - Key employees receive compensation increases or bonuses only if part of the agreements made when restructuring or if approved by inactive owners. Similarly, key employee compensation decreases only if part of the agreements made when restructuring or if approved by key employees.

    - Distributions are made according to a set formula and can be increased only if approved by key employees. Similarly, distributions decrease only if part of the agreements made when restructuring or if approved by inactive owners.

5. Life insurance funds a buy-sell agreement.

    - When all of the inactive owners' interests are redeemed, the only ownership remaining is held by the key employees. Thus, their small ownership suddenly blossoms into sole ownership.

    - If a cross-purchase (each owner holds insurance on the lives of the other owners and uses the proceeds to buy stock at death) is used rather than a redemption, then the key employees' ownership might increase more quickly, depending on how the cross-purchase is structured.

    - A cross-purchase is generally better from a tax perspective.

        - It is less risky from an estate tax perspective. Redemption agreements typically exclude the life insurance from the calculated purchase price. The IRS might be able to persuade a court to disregard that exclusion and count the life insurance as part of the business' value for estate tax purposes. See II.Q.4.h Establishing Estate Tax Values.

        - C corporations might be subjected to alternative minimum tax on the death benefit.

        - If a redemption is used, S corporations and partnerships might experience income tax basis distortions,[3731] and S corporations that have significant accumulated E&P from when they were C corporations would lose AAA.[3732]

[3731] See part II.Q.7.b.iii S Corporation Receipt of Life Insurance Proceeds, which discusses the impact on S corporations, but the same principles would seem to apply to partnerships.

[3732] Part II.Q.7.b.iv S Corporation Distributions of, or Redemptions Using, Life Insurance Proceeds. Although life insurance adds to each shareholder's stock basis, it adds to the other adjustments account rather than to AAA.

- However, if one owner leaves the business and a policy (or interest in a policy) is transferred to another owner, beware of the transfer-for-value rules, which might subject the death benefit to income tax.[3733]

- Cross-purchases and redemptions entail various nontax risks. Neither is perfect. Probably the safest method, which is a little complicated, is the life insurance LLC:

  - The owners of the main company are also members of the LLC. Each owner is specially allocated the responsibility for paying premiums on the other owners and the benefit of the associated life insurance death benefit.

  - A corporate trustee (or other independent deep pocket) serves as the manager and may be removed only by consent of all the members.

  - The manager's only job is to hold policies, collect premiums, and hold proceeds until all parties agree on implementation of the buy-sell agreement.

  - This avoids various business and tax risks, including the transfer for value rule that might apply when owners come and go.[3734]

  - For details, see part II.Q.4.i Life Insurance LLC.

If one expects to sell a business interest for all cash in a few years and would like to defer capital gain on the sale of a business interest, consider selling the business interest in an installment sale to a nongrantor trust. The note might be interest-only for a few years, with principal payments beginning sometime after the business interest is expected to be sold. The trust receives basis for the full amount of the promissory and can sell the business interest tax-free to the extent of that basis.

Similar principles apply to the sale of land or other property that is not depreciable or amortizable.

Potential pitfalls include the following:

- If the trust is a related person (which usually is the case) and it re-sells the business interest within two years, the original seller's deferred gain is accelerated.

- The original seller's death will not generate a basis step-up in the note. If the original seller had simply held the business interest until death, part or all of the gain would be eliminated by basis step-up. Consider buying term insurance against the risk of loss of the financial benefit of the basis step-up.

- Be sensitive to possible acceleration of the deferred gain if the original seller later transfers the installment note, including by gift (or transfer to or from a nongrantor trust), or pledges the note.

[3733] Code § 101(a)(2).
[3734] See part II.Q.4.b Transfer for Value Rule; Basis.

- Beware of the possible need to pay interest on the deferred tax liability if the sale exceeds $5 million.[3735]

- The part of the gain on the sale of a partnership interest attributable to "hot assets" is not eligible for installment sale treatment.

- The direct or indirect sale of depreciable or amortizable assets to a related party (the nongrantor trust) might trigger ordinary income tax.

II.M.4.f. Issuing a Profits Interest to a Service Provider

II.M.4.f.i. Overview of Profits Interest; Contrast with Code § 409A

Issuing a profits interest usually makes more sense than issuing stock to the employee, in that a service provider usually is interested more in sharing the fruits of the business' future success than in buying its existing assets. Awarding a profits interest is also less expensive, because it does not require buying any of the business' current value.

Code § 409A does not apply to the issuance of a profits interest.[3736] The profits interest could turn into golden handcuffs that avoid the strict rules on timing that Code § 409A imposes. For

---

[3735] Code § 453A(b)(2).

[3736] Notice 2005-1, Q&A 7 (third sentence). For a general discussion of the broader topic, see, The Proper Tax Treatment of the Transfer of a Compensatory Partnership Interest and also Finding the Right Balance: A Critical Analysis of the Major Proposals to Reform the Taxation of Carried Interests in Private Equity, both in *Tax Lawyer*, Vol. 62, No. 1 (Fall 2008). This Notice continued to apply under section III.G of the preamble to the final regulations under Code § 409A and still applies under the final regulations pursuant to Section 4 of Notice 2007-86. Reg. § 1.409A-1(b)(7) has the following text: Arrangements between partnerships and partners. [Reserved.] The preamble to the final regulations, T.D. 9321, provides:

> (G.) Arrangements Between Partnerships and Partners
>
> The proposed regulations did not address the application of section 409A to arrangements between partnerships and partners, and these final regulations also do not address such arrangements. The statute and the legislative history of section 409A do not specifically address arrangements between partnerships and partners providing services to a partnership and do not explicitly exclude such arrangements from the application of section 409A. Commentators raised a number of issues, relating both to the scope of the arrangements subject to section 409A and the coordination of the provisions of subchapter K and section 409A with respect to those arrangements that are subject to section 409A. The Treasury Department and the IRS are continuing to analyze the issues raised in this area. Notice 2005-1, Q&A-7 provides interim guidance regarding the application of section 409A to arrangements between partnerships and partners. Until further guidance is issued, taxpayers may continue to rely on Notice 2005-1, Q&A-7 and sections II.E. and VI.E. of the preamble to the proposed regulations.
>
> Notice 2005-1, Q&A-7 provided that until further guidance is issued for purposes of section 409A, taxpayers may treat the issuance of a partnership interest (including a profits interest) or an option to purchase a partnership interest, granted in connection with the performance of services under the same principles that govern the issuance of stock. For this purpose, taxpayers may apply the principles applicable to stock options or stock appreciation rights under these final regulations, as effective and applicable, to equivalent rights with respect to partnership interests.
>
> Taxpayers also may continue to rely upon the explanation in the preamble to the proposed regulations regarding the application of section 409A to guaranteed payments for services

example, a partnership distributes enough of the service partner's share of profits to pay the service partner's income taxes. The rest of the service partner's share of profits is accumulated in the service partner's capital account and may be subject to any timing rules the parties choose. Because the service partner has already paid income tax on this accumulated income, this deferral does not offend the principles of Code § 409A, which are concerned about the timing of taxation. For more on Code § 409A, see part II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules.

Profits interests have Code § 2701 consequences for family-controlled businesses, so the transferor either prepares to be treated as making a gift of the capital account that would ordinarily be associated with the profits interest or retains preferred payments that help reduce the impact of Code § 2701. For a discussion of how Code § 2701 might apply, see part III.B.7.c Code § 2701 Interaction with Income Tax Planning.

Also, receiving a profits interest causes the service provider to be taxed as a partner for all of that person's compensation, because bona fide members of a partnership are not employees for tax purposes.[3737]

II.M.4.f.ii. Tax Effects of Profits Interests

Below we discuss that issuing a profits interest generally does not have an <u>income</u> tax consequence.

As mentioned above, profits interests have gift/estate tax effects even though they don't have an income tax effect; see part III.B.7.c Code § 2701 Interaction with Income Tax Planning. I don't believe that the IRS is conceding for even a nanosecond that a profits interest is worth zero for income tax purposes. Rather, the issue is a matter of income tax accounting. If for income tax accounting purposes one recognizes the value of a profits interest, the partner would need to be awarded a capital account equal to that value. That capital account would not reflect a share of the partnership's assets, because reflecting such a share would be contrary to the very definition of a profits interest. Rather, that capital account would be a right to future profits that should be amortized over the period for which the profits were assumed in the valuation. This would generate amortization deduction based on the valuation assumptions, which of course are subject to dispute. Thus, initially the other partners get a compensation deduction (and reduced capital accounts) and the profits interest partner would recognize income, and then the profits interest partner would have an amortization deduction to offset future profits. This alternative paradigm would be quite messy and generate significant valuation disputes along the way. To avoid this partnership income tax accounting mess, the IRS decided to make administrability of the partnership income tax system supersede the theory behind Code § 83. The simplifying assumption of zero value for the income tax accounting treatment of profits interests makes the system more practical to use and avoids valuation fights.

---

described in section 707(c). As stated in that preamble, until further guidance is issued, section 409A will apply to guaranteed payments described in section 707(c) (and rights to receive such guaranteed payments in the future), only in cases where the guaranteed payment is for services and the partner providing services does not include the payment in income by the 15th day of the third month following the end of the taxable year of the partner in which the partner obtained a legally binding right to the guaranteed payment or, if later, the taxable year in which the right to the guaranteed payment is first no longer subject to a substantial risk of forfeiture.

[3737] See note 551. For self-employment tax on guaranteed payments, see text accompanying notes 3454-3455.

After discussing income taxation of issuing profits interests, we discuss that certain sales of compensatory partnership interests are recharacterized from long-term to short-term capital gains.

II.M.4.f.ii.(a). Tax Effects of Issuing a Profits Interest

The issuance of a profits interest to a new partner, discussed in this part II.M.4.f.ii.(a), tends to be distinguished from shifting interests in profits among existing partners, the latter which is discussed in part II.C.6 Shifting Rights to Future Profits.

Reg. § 1.721-1(b)(1) provides (highlighting added):

> Normally, under local law, each partner is entitled to be repaid his contributions of money or other property to the partnership (at the value placed upon such property by the partnership at the time of the contribution) whether made at the formation of the partnership or subsequent thereto. To the extent that any of the partners gives up any part of his right to be repaid his contributions (as distinguished from a share in partnership profits) in favor of another partner as compensation for services (or in satisfaction of an obligation), section 721 does not apply. The value of an interest in such partnership capital so transferred to a partner as compensation for services constitutes income to the partner under section 61. The amount of such income is the fair market value of the interest in capital so transferred, either at the time the transfer is made for past services, or at the time the services have been rendered where the transfer is conditioned on the completion of the transferee's future services. The time when such income is realized depends on all the facts and circumstances, including any substantial restrictions or conditions on the compensated partner's right to withdraw or otherwise dispose of such interest. To the extent that an interest in capital representing compensation for services rendered by the decedent prior to his death is transferred after his death to the decedent's successor in interest, the fair market value of such interest is income in respect of a decedent under section 691.

Under Rev. Proc. 93-27, if a person receives a profits interest[3738] for the provision of services to or for the benefit of a partnership in a partner capacity or in anticipation of being a partner,

[3738] Under the Rev. Proc., a profits interest is a partnership interest other than a capital interest. A capital interest is an interest that would give the holder a share of the proceeds if the partnership's assets were sold at fair market value and then the proceeds were distributed in a complete liquidation of the partnership. This determination generally is made at the time of receipt of the partnership interest. For the rules on revaluing partnership assets and adjusting capital accounts when that occurs, see part II.C.7 Maintaining Capital Accounts, especially fn. 507.
See *Mark IV Pictures, Inc. v. Commissioner*, T.C. Memo. 1990-571, which held:

> Deciding whether a partner's interest in a partnership is a capital interest, rather than a mere profits interest, turns on whether that partner has the right to receive a share of the partnership's assets upon a hypothetical winding up and liquidation immediately following acquisition of the interest, rather than the mere right to share in future partnership earnings or profits. Here, a fair reading of paragraphs 2.4 and 9.2 of the Articles indicates that the general partners had the *right to receive* a specified share of the partnerships' liquidation proceeds (assets). Thus, even if no partnership proceeds remained to be distributed to the general partners after distributing the liquidating proceeds in accordance with section 545.42, they nevertheless had the *right to receive* a share of the partnerships' assets.
>
> Based on the foregoing, we conclude that the general partners received a capital interest in their respective limited partnerships. See sec. 1.721-1(b)(1), Income Tax Regs.

generally the IRS will not treat the receipt of such an interest as a taxable event for the partner or the partnership. However, that safe harbor does not apply:

(1) If the profits interest relates to a substantially certain and predictable stream of income from partnership assets, such as income from high-quality debt securities or a high-quality net lease;

(2) If within two years of receipt, the partner disposes of the profits interest; or

(3) If the profits interest is a limited partnership interest in a "publicly traded partnership" within the meaning of Code § 7704(b).

If Rev. Proc. 93-27 applies, the profits interest is treated as a capital asset when the service provider sells it.

Rev. Proc. 2001-43 applies Rev. Proc. 93-27 to the grant of a partnership profits interest that is substantially nonvested for the provision of services to or for the benefit of the partnership. Under Section 4 of Rev. Proc. 2001-43, the service provider will be treated as receiving the interest on the date of its grant, and a Code § 83(b) election will not be required, if:

> .01 The partnership and the service provider treat the service provider as the owner of the partnership interest from the date of its grant and the service provider takes into account the distributive share of partnership income, gain, loss, deduction, and credit associated with that interest in computing the service provider's income tax liability for the entire period during which the service provider has the interest;
>
> .02 Upon the grant of the interest or at the time that the interest becomes substantially vested, neither the partnership nor any of the partners deducts any amount (as wages, compensation, or otherwise) for the fair market value of the interest; and
>
> .03 All other conditions of Rev. Proc. 93-27 are satisfied.

If Rev. Proc. 2001-43 does not apply to the grant of a substantially nonvested partnership profits interest and if case law[3739] does not provide otherwise, then the service provider recognizes ordinary income (and the partnership is deemed to have paid compensation) when the profits interest vests. The holding period for a later sale of the profits interest would be based on the date of vesting, rather than the date of grant.

A similar result was *Hensel Phelps Construction Co. v. Commissioner*, 74 T.C. 939 (1980), *aff'd* 703 F2d 485 (10th Cir. 1983).

[3739] *Diamond v. Commissioner*, 56 T.C. 530 (1971 reviewed decision) (taxing service partner on issuance of profits interest), *aff'd* 492 F.2d 286 (7th Cir. 1974); *Campbell v. Commissioner*, T.C. Memo. 1990-162 (finding taxation on issuance), *rev'd* 943 F.2d 815 (8th Cir. 1991) (finding no taxation on issuance); *St. John v. U.S.*, 53 A.F.T.R.2d 84-718 (C.D. Ill. 1983) (no taxation because partnership's success was undetermined and speculative); *Kenroy, Inc. v. Commissioner,* T.C. Memo. 1984-232 (no taxation because partnership's liabilities exceeded assets); *United States v. Frazell*, 339 F.2d 885 (5th Cir. 1964), *cert. denied*, 380 U.S. 961 (1965) (taxation on capital shift even though original partners held a preferred profits interest). The Eighth Circuit in *Campbell* cited an earlier version (that has since been updated) of McKee, Nelson & Whitmire, ¶5.02 Distinguishing Taxable From Nontaxable Service-Connected Transfers of Partnership Interests: Is There a Difference Between Capital and Profits Interests? *Federal Taxation of Partnerships & Partners* (WG&L), and of Willis & Postlewaite, ¶4.06 Partnership Profits Interest Received in Exchange for Services, *Partnership Taxation*.

The IRS has proposed regulations[3740] that would change these rules for profits interests, effective only when the regulations are finalized. Under the proposed regulations, a service provider would be required to recognize income upon receipt of a vested profits interest. A Code § 83(b) election would be required to treat a substantially nonvested profits interest as if it were vested. At any rate, determining the value of the profits interest generally would require an appraisal and complicate future accounting on many levels. IRS Notice 2005-43 proposes a Rev. Proc. to allow taxpayers to elect to determine the value based on the awarded partnership interest's liquidation value determined immediately after the grant of the partnership interest. If the partnership interest is merely a profits interest, the liquidation value would be zero. The proposed Rev. Proc. would supersede Rev. Proc. 93-27 and Rev. Proc. 2001-43; however, until the proposed Rev. Proc. is finalized, taxpayers may continue to rely on Rev. Proc. 93-27 and Rev. Proc. 2001-43.

Furthermore, the preamble to subsequent proposed regulations[3741] announced:

> The Treasury Department and the IRS are aware of transactions in which one party provides services and another party receives a seemingly associated allocation and distribution of partnership income or gain. For example, a management company that provides services to a fund in exchange for a fee may waive that fee, while a party related to the management company receives an interest in future partnership profits the value of which approximates the amount of the waived fee. The Treasury Department and the IRS have determined that Rev. Proc. 93-27 does not apply to such transactions because they would not satisfy the requirement that receipt of an interest in partnership profits be for the provision of services to or for the benefit of the partnership in a partner capacity or in anticipation of being a partner, and because the service provider would effectively have disposed of the partnership interest (through a constructive transfer to the related party) within two years of receipt.

Returning to the law when this portion was written, should one file a Code § 83(b) election, to preserve future capital gain treatment on the profits interest holder's future sale of the profits

[3740] REG-105346-03, proposing changes to Reg. §§1.83-3, 1.83-6, 1.704-1, 1.706-3, 1.707-1, 1.721-1, and 1.761-1. Over the past several years, various proposals to tax hedge fund managers on the sale of their profits interests have had a chilling effect on the progress of these proposed regulations, particularly since the safeguards needed to make those proposals effective would cause radical changes in this area of tax law, well beyond the scope of taxing hedge fund managers.

[3741] REG-115452-14 (7/22/2015), which continued:

> Further, the Treasury Department and the IRS plan to issue a revenue procedure providing an additional exception to the safe harbor in Rev. Proc. 93-27 in conjunction with the publication of these regulations in final form. The additional exception will apply to a profits interest issued in conjunction with a partner forgoing payment of an amount that is substantially fixed (including a substantially fixed amount determined by formula, such as a fee based on a percentage of partner capital commitments) for the performance of services, including a guaranteed payment under section 707(c) or a payment in a non-partner capacity under section 707(a).
> In conjunction with the issuance of proposed regulations (REG-105346-03; 70 FR 29675-01; 2005-1 C.B. 1244) relating to the tax treatment of certain transfers of partnership equity in connection with the performance of services, the Treasury Department and the IRS issued Notice 2005-43, 2005-24 I.R.B. 1221. Notice 2005-43 includes a proposed revenue procedure regarding partnership interests transferred in connection with the performance of services. In the event that the proposed revenue procedure provided for in Notice 2005-43 is finalized, it will include the additional exception referenced.

For an in-depth discussion of proposed regulations under REG-115452-14, see part II.C.8.a Code § 707 - Compensating a Partner for Services Performed.

interest due to any noncompliance with the Revenue Procedures, either by the structure or by subsequent events within two years after the grant? If the profits interest's issuance is determined to be like the issuance a capital interest (for example, if it is determined that the book-up[3742] on issuance of the profits interest undervalued the partnership's assets), then filing a Code § 83(b) election would trigger income on issuance. Consider, however, that the tax economics if capital gain treatment were disallowed are not necessarily so bad, if certain tax indemnification agreements are in place:

Example

Suppose the basis at the time of the subsequent sale is zero (all profits have been paid out), the fair market value is $100x, the federal and state capital rate is 20%, and the federal and state income tax rate is 40%.

If the profits interest is given capital gain treatment, the holder of the profits interest pays $20x tax on the sale.

If the profits interest is deemed not to have been property until the sale (due to lack of vesting, etc.), then the following should occur:

- The holder receives $100x from the sale, which is deemed compensation income.
- The partners pay $67x withholding to the federal and state taxing authorities, covering the tax on the $100x and the $67x (40% of $167x is $67x). This is also deemed income to the holder of the profits interest.
- The partners deduct $167x compensation, saving $67x of tax, assuming they have basis for this deduction.
- The $67x tax savings to the partners pays for $67x withholding they paid.
- Except as described below, nobody pays anything out-of-pocket on the holder's receipt of the $100x sale proceeds.
- The partners pay capital gain tax on the sale proceeds they are deemed to have received.
- An appropriate adjustment needs to be made to the allocations set forth above so that the holder reimburses the partners for their capital gain tax paid on the sale, which capital gain tax the parties had originally assumed the holder would have paid.

Articles explain some of the nuances and practical implications of profits interests[3743] and some prominent authors' reconsideration of their position that a taxable issuance of a profits interest might not be a big deal.[3744]

[3742] See footnote 3651.

In *ES NPA Holding, LLC v. Commissioner*, T.C. Memo. 2023-55, the following occurred:

> Before October 14, 2011, Joshus[3] Landy owned 100% of the outstanding shares or membership units in NPA, Inc., Community Credit Services, Inc. (CCS), National Opportunities Unlimited, Inc. (NOU), and American Consumer Credit, LLC (ACC). Those entities conducted consumer loan businesses. Mr. Landy desired to dispose of a portion of his consumer loan businesses (NPA, Inc., CCS, NOU, and ACC) in 2011. Monu Joseph and Amit Raizada, who would later become ES NPA's principals, became aware of an opportunity to acquire an interest in an existing online consumer finance business that was fully licensed in Delaware. Messrs. Joseph and Raizada contacted Mr. Landy with regard to his desire to dispose of a portion of his consumer loan businesses.
>
> [3] Joshus Landy is referenced throughout the record with various spellings of his first name (e.g., Joshus, Joshua, and Josh). We do not find any indication that these spellings represent separate individuals.
>
> Messrs. Landy, Joseph, and Raizada discussed a potential sale for several weeks; and on June 25, 2011, one of Mr. Joseph's businesses, Emerald Crest Capital (ECC), sent a letter (term sheet) to Mr. Landy in which ECC offered to purchase 70% of Mr. Landy's consumer loan businesses for $20.59 million, which was based on a 2.3× multiple of earnings before interest, taxes, depreciation, and amortization (EBITDA) for the most recent 12-month period.
>
> The term sheet specified contingencies such as that a new entity would be formed by the principals of ECC, its affiliates, or its investors to acquire the 70% interest in Mr. Landy's consumer loan businesses and stated that ECC did not "currently have sufficient information to determine the most efficient structure for the [a]cquisition." The term sheet also stated that ECC might bring in various parties as part of its purchase group to fund the purchase of an interest in Mr. Landy's businesses. Mr. Landy signed the term sheet on July 5, 2011.
>
> Thereafter Mr. Landy retained the law firm Bryan Cave LLP to represent him with respect to the preparation of the transaction documents that would effect the sale of his businesses. Meanwhile, ECC provided a 60-page acquisition due diligence memorandum to prospective investors to facilitate the purchase of a controlling interest in Mr. Landy's businesses. The memorandum discussed a "contemplated transaction" that involved "a purchase of 39.2% of" Mr. Landy's businesses.
>
> Article 6.2 of the NPA, LLC operating agreement provides that "[e]ach Member has made an initial Capital Contribution to the Company in such amounts and under such terms as were agreed by the Member and approved by the Company as a condition to the issuance of Units to the Member. The initial Capital Contribution with respect to each Member and Class of Units is set forth in Exhibit B."
>
> NPA, LLC operating agreement § 13.3 provides that, after the payment of liabilities, the liquidation proceeds of NPA, LLC are to be distributed 30% to class B unit holders, 40% to class A unit holders, and
>
>> 30 percent to the Members who hold Class C Units; provided however, that, if the sum of all distributions made to the Members who hold Class A Units pursuant to [§] 9.2 and this [§] 13.3(c) is less than the total Capital Contributions of such

> Members, the distributions to the Members who hold Class C Units shall be reduced and the distribution to the Members who hold Class A Units shall be increased, by an amount equal to the lesser of (i) the distribution to the Members who hold Class C Units pursuant to this [§] 13.3(c)(ii), and (ii) the difference between the total Capital Contributions of the Members who hold Class A Units and the sum of all distributions previously made to the Members who hold Class A Units pursuant to [§] 9.2 and the distribution that would be made to the Class A Members pursuant to [§] 13.3(c)(iii).

The sale of Mr. Landy's businesses was arranged through the following transactions, which took place on September 27, October 13, and October 14, 2011. On September 27, 2011, NPA, Inc. formed two LLCs: IDS and NPA, LLC. IDS had two classes of membership units: class B and class C. NPA, LLC had three classes of units: class A, class B, and class C. Per Articles 9.2 and 13.3 of the IDS first amended and restated limited liability company agreement, the class B and class C units in IDS track the class B and class C units in NPA, LLC, respectively, in that the owner of IDS class B units was entitled to 100% of the payments received by IDS because of its ownership of NPA, LLC class B units and the owner of IDS class C units was entitled to 100% of the payments received by IDS because of its ownership of NPA, LLC class C units.

On October 13, 2011, NPA, Inc. contributed substantially all of its business assets to NPA, LLC in exchange for all three classes of units (classes A, B, and C) in NPA, LLC. NPA, Inc. then contributed all three classes of units (classes A, B, and C) in NPA, LLC to IDS as a capital contribution to IDS. At the end of the day on October 13, 2011, the relevant aspects of the entity ownership structure were as follows:

[chart showing Mr. Landy owning NPA, Inc., which owned IDS, which in turn owned NPA, LLC]

On October 14, 2011, NPA, LLC entered into revenue-sharing agreements with the other consumer loan businesses, CCS, NOU, and ACC, respectively. An entity named NPA Investors, LP (NPA Investors), purchased all of NPA, LLC's class [pg. 441] A units from IDS in exchange for $14,502,436. Also on October 14, 2011, ES NPA exercised a call option granted by NPA, Inc., and pursuant thereto acquired all of the IDS class C units in exchange for ES NPA's payment to NPA, Inc. of $100,000 and services provided or to be provided.

The "Whereas" clause of the call option agreement states that ES NPA agreed to provide the following services to NPA, Inc. in exchange for the option to pay $100,000 to NPA, Inc. to acquire all of the class C units in IDS (which reflected an indirect interest in the class C units of NPA, LLC): "strategic advice for the purpose of enhancing the performance of [NPA Inc.'s] business and to assemble an investor group that would purchase 40 [sic] percent of [NPA Inc.'s] business for approximately $21 million." The call option agreement also provides that ES NPA is hereby given "an option...to purchase all of the Class C Units...from [IDS]" and is dated October 14, 2011….

At the end of the day on October 14, 2011, (i) the class A units held by NPA Investors had a capital contribution of $20,985,509, (ii) the class B units held by IDS had a capital contribution of $8,993,790, and (iii) the class C units held by IDS had a capital contribution of zero.

Part II.C of the court's opinion, "Receipt of a Partnership Interest in Exchange for Services," explains:

> Section 721(a) provides that "[n]o gain or loss shall be recognized to a...partner[] in the case of a contribution of property to the partnership in exchange for an interest in the partnership." However, where a person receives a partnership interest in exchange for a contribution of services, nonrecognition is not always guaranteed. See Treas. Reg. § 1.721-1(b)(1). Under that regulation the "receipt of a partnership capital interest in exchange for services is taxable to the service provider." *Crescent Holdings, LLC*, 141 T.C. at 488; see I.R.C. § 83(a) (generally dictating the recipient's tax treatment of property received in connection with services performed); Treas. Reg. § 1.61-2(d) (stating property received as compensation must be included in income). Under longstanding principles services are not "property" for purposes of section 721; therefore, the receipt of a partnership capital interest in exchange for services does not receive section 721 treatment.
>
> Treasury Regulation § 1.721-1(b)(1) states in part:
>
>> To the extent that any of the partners gives up any part of his right to be repaid his contributions (as distinguished from a share in partnership profits) in favor of another partner as compensation for services (or in satisfaction of an obligation), section 721 does not apply. The value of an interest in such partnership capital so transferred to a partner as compensation for services constitutes income to the partner under section 61.
>
> The foregoing parenthetical reference to a profits interest in the above regulation has been read as intending to exempt the receipt of a profits interest for services from taxation. *See* Charles H. Egerton, *Rev. Proc. 93-27 Provides Limited Relief on Receipt of Profits Interest for Services*, 79 J. Tax'n 132, 132 (1993). This view was also acknowledged by this Court. *See Hale v. Commissioner*, T.C. Memo. 1965-274, 1965 WL 1045, n.3.
>
> We previously held that the receipt of a profits interest in a partnership in exchange for the performance of services was a taxable event. *Diamond v. Commissioner*, 56 T.C. 530 (1971), *aff'd*, 492 F.2d 286 (7th Cir. 1974). Then in *Campbell v. Commissioner*, T.C. Memo. 1990-162, *aff'd* in part, *rev'd* in part, 943 F.2d 815 (8th Cir. 1991), we again determined the receipt to be a taxable event regardless of whether the transferee partner would receive anything upon a theoretical liquidation. The U.S. Court of Appeals for the Eighth Circuit, however, reversed our decision in Campbell, finding that the receipt of a profits interest was not taxable since the value received was speculative. *Campbell v. Commissioner*, 943 F.2d 815.[5]
>
>> [5] Absent stipulation to the contrary this case is appealable to the Eighth Circuit, and we thus follow its precedent. See *Golsen v. Commissioner*, 54 T.C. 742, 756-57 (1970), *aff'd*, 445 F.2d 985 (10th Cir. 1971); see also I.R.C. § 7482(b)(1)(E).
>
> Ultimately the IRS addressed the issue when it promulgated Revenue Procedure 93-27, publishing guidance on the treatment of the receipt of a profits interest for services provided to or for the benefit of the partnership.[6] *Id*. § 1, 1993-2 C.B. at 343. In this revenue procedure the IRS cites Treasury Regulation § 1.721-1(b)(1) and acknowledges that the receipt of a capital interest for services is taxable as compensation, Rev.

Proc. 93-27, § 3, 1993-2 C.B. at 343, while on the other hand, it will not treat the receipt of a profits interest as a taxable event, *id*. § 4.01, 1993-2 C.B. at 344.[7]

[6] The IRS addressed the receipt of a partnership interest in exchange for services in a proposed ruling attached to a General Counsel Memorandum (GCM). I.R.S. G.C.M. 36,346 (July 23, 1975). In the GCM, the IRS acknowledged a conflict between our holding in Diamond and Treasury Regulation § 1.721-1(b). In the GCM, the IRS declined to follow our holding in Diamond "to the extent that it holds that the receipt by a partner of an interest in future partnership profits as compensation for services results in taxable income." The GCM also recognized that because "the receipt of a 'profits['] interest is not taxable, the proposed revenue ruling is limited to interests that give the holder no rights to existing partnership assets upon the liquidation of his interest."

[7] Followed by clarification in Revenue Procedure 2001-43, 2001-2 C.B. 191, intended to ensure that the receipt of a profits interest will achieve the recipient's goal of not having an immediate recognition of tax upon his or her joining of the partnership, the IRS seems to view the receipt of a profits interest as a type of deferred compensation arrangement.

Part III.A of the court's opinion, "Definition of a Profits Interest," explains:

Revenue Procedure 93-27[8] defines a profits interest as a partnership interest "other than a capital interest," *id*. § 2.02, 1993-2 C.B. at 343, and a capital interest is, in turn, an interest that would "give the holder a share of the proceeds if the partnership's assets were sold at fair market value and then the proceeds were distributed in a complete liquidation of the partnership," *id*. § 2.01. This theoretical liquidation is to occur "at the time of receipt of the partnership interest," *id*., which the parties referred to throughout the case as "immediately" after the transaction. Under Revenue Procedure 93-27 such a profits interest is not treated as income upon its acquisition if a person receives it "for the provision of services to or for the benefit of a partnership in a partner capacity or in anticipation of being a partner." *Id*. § 4.01.[9]

[8] Revenue Procedure 93-27 is amplified by Revenue Procedure 2001-43, which acknowledges the time and valuation rules of section 83.

[9] In Revenue Procedure 2001-43, § 2, 2001-2 C.B. at 191, the IRS further clarified Revenue Procedure 93-27 by providing that the determination of whether the interest granted is a profits interest is tested at the time of grant.

Part III.B.1 of the court's opinion, "Is Revenue Procedure 93-27 Applicable?" explains:

As a threshold matter, it is uncontroverted that ES NPA provided services to NPA, Inc. in exchange for the class C units in IDS. It is also undisputed that ES NPA's interests in the class C units in IDS are identical in all respects to the interests in class C units in NPA, LLC. Respondent contends Revenue Procedure 93-27 has no application since it applies only when "a partnership profits interest for services provided to or for the benefit of the partnership," *id*. § 1, and in this case ES NPA received an interest in IDS in exchange for services it provided to NPA, Inc.-not NPA, LLC.[10] We disagree with respondent and find his reading of this revenue procedure and views of the transaction at issue to be unreasonably narrow.

> [10] Proposed Treasury regulations under section 83 reject the concept that the receipt of a partnership interest in connection with services is not a realization event. In conjunction with the issuance of these proposed regulations, the IRS issued I.R.S. Notice 2005-43, 2005-1 C.B. 1221, which explains that Revenue Procedures 93-27 and 2001-43 will become obsolete upon the finalization of these proposed regulations, but that until then taxpayers are permitted to rely upon Revenue Procedure 93-27.

> While respondent has accurately stated the introductory purpose set out in Revenue Procedure 93-27, § 1,[11] the revenue procedure later states and further explains that "if a person receives a profits interest for the provision of services to or for the benefit of a partnership in a partner capacity or in anticipation of being a partner, the [IRS] will not treat the receipt of such an interest as a taxable event for the partner or the partnership." See *id*. at § 4.01. We find Revenue Procedure 93-27 § 4, entitled "Application," to set the intended parameters of the revenue procedure's application.

> [11] Revenue Procedure 93-27 does not apply: (1) if the profits interest relates to a substantially certain and predictable stream of income from partnership assets, such as income from high-quality debt securities or a high-quality net lease; (2) if within two years of receipt, the partner disposes of the profits interest; or (3) if the profits interest is a limited partnership interest in a "publicly traded partnership" within the meaning of section 7704(b). See Rev. Proc. 93-27, § 4.02, 1993-2 C.B. at 344. Respondent does not assert that ES NPA triggered any of these three elements. Therefore, we will not consider this issue and deem it to be waived.

> On brief, respondent implies that Revenue Procedure 93-27 is a "safe harbor" with limited application. We do not view Revenue Procedure 93-27 in such a restricted manner, but rather view it as administrative guidance on the treatment of the receipt of a partnership profits interest for services. See William S. McKee et al., *Federal Taxation of Partnerships and Partners* ¶ 5.02[2] (2022) (referring to Revenue Procedure 93-27 as a "broad, taxpayer-friendly safe harbor" subject only to tightly defined exceptions).

> Considering the text of Revenue Procedure 93-27 § 4, the evidence supports a finding that ES NPA directly (or through its principals), before and after formation, provided services to or for the benefit of the partnership in a partner capacity or in anticipation of being a partner. It is undisputed that the material assets of this partnership are held in NPA, LLC, and the activities ES NPA performed were to and for the benefit of the future partnership. It is of no material consequence that ES NPA's interest in NPA, LLC is held indirectly through IDS, which is a mere conduit since the liquidation rights in the class C units in both IDS and NPA, LLC are identical. This partnership came about only through ES NPA and NPA, Inc.'s joint ownership of IDS and their ownership interest in NPA, LLC. Other relevant elements here evidencing that the application of Revenue Procedure 93-27 is proper are the presence of entrepreneurial risk and the receipt of a profits interest in the capacity as a partner. Thus, it is entirely reasonable to conclude that ES NPA's receipt of the class C units meets the intended parameters of Revenue Procedure 93-27 § 4.

Part III.B.2 of the court's opinion, "Has ES NPA Satisfied the Requirements of Revenue Procedure 93-27?" reasons:

> Since we conclude ES NPA's receipt of the class C units qualifies under Revenue Procedure 93-27, the question now becomes whether ES NPA has satisfied the

underlying requirements of the revenue procedure; namely, whether the received class C units are a profits interest. To answer this question Revenue Procedure 93-27 § 2 directs us to determine whether ES NPA would receive a distribution upon a hypothetical liquidation at the time of receipt.

On October 14, 2011, the class A units held by NPA Investors had a capital account of $20,985,509, the class B units held by IDS had a capital account of $8,993,790, and the class C units held by IDS had a capital account of zero. NPA, LLC operating agreement § 13.3 provides that after the payment of liabilities, the NPA, LLC liquidation proceeds are to be distributed 30% to class B unit holders and 40% to class A unit holders, with the remaining 30% to the members who hold class C units, provided, however, that the sum of all distributions made to the members who hold class A units had first been satisfied. In other words, the class A and B unit holders have a preferred return on their capital, and the class C units would receive anything in a hypothetical liquidation only after all capital accounts were first satisfied in full. The parties, and their respective experts, agree, under the terms of the operating agreement, that if the fair market value of NPA, LLC was $29,979,299 as reflected in NPA, LLC's capital account, then there would be no distribution to the class C unit holders upon a hypothetical liquidation.[12]

[12] This $29 million figure would be the book value of NPA, LLC at its formation. See Treas. Reg. § 1.704-3(a)(3). Respondent essentially disputes the book value assigned to the partnership assets and partners' capital accounts and contends that the market value of the newly formed partnership is substantially greater, upon a hypothetical liquidation the class C units would be worth in excess of $12 million, and therefore the receipt of these units was in fact a capital interest in NPA, LLC (rather than a future profits interest as petitioner contends).

To answer the question regarding hypothetical liquidation of the partnership, we must decide the largely subjective question of fair market value. Fair market value is defined as the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or to sell and both having reasonable knowledge of relevant facts. *United States v. Cartwright*, 411 U.S. 546, 550-51 (1973); see also Treas. Reg. § 20.2031-1(b); Rev. Rul. 59-60, § 2.2, 1959-1 CB 237, 237.

Respondent contends that in the opinion of his retained expert witness the fair market value of NPA, LLC as of the transaction date was $52,463,722. Respondent disputes the testimony of petitioner's expert and further avers that Mr. Landy lacked knowledge of the value of his business, performed minimal due diligence, and did not understand the terms of the transaction. Essentially, respondent disputes that the transaction was an arm's-length transaction and contends that it should not be relied upon to determine the fair market value of NPA, LLC.

Petitioner contends that the actual terms of the sale, namely the acquisition of the class A units by NPA Investors for $20,985,509, is the best evidence of the overall fair market value of $29,979,299. Petitioner further avers-on the basis of the testimony of Messrs. Landy and Joseph-that the sale was a bona fide arm's-length transaction reflecting the sale of a 70% interest in NPA, LLC. In the alternative, petitioner argues, on the basis of its expert witness testimony, that the fair market value of $29,979,299 is supported by a market analysis approach using a direct capitalization of earnings. Finally, petitioner, on the basis of its expert rebuttal report, disputes respondent's expert witness valuation since it erroneously assumes Mr. Landy sold 40% of his interest in NPA, LLC for approximately $21 million.

The parties agree that the best evidence of fair market value is actual arm's-length sales involving that property. Indeed, this Court has repeatedly affirmed that actual arm's-length sales occurring sufficiently close to the valuation date are the best evidence of value, and typically dispositive, over other valuation methods. See, *e.g.*, *Rubber Rsch., Inc. v. Commissioner*, 422 F.2d 1402, 1405-06 (8th Cir. 1970), *aff'g* T.C. Memo. 1969-24; *Estate of Fitts v. Commissioner*, 237 F.2d 729, 731 (8th Cir. 1956), *aff'g* T.C. Memo. 1955-269; *Wortmann v. Commissioner*, T.C. Memo. 2005-227, 2005 WL 2387487, at *5 (collecting cases and noting that "evidence of what property sold for within a reasonable time before the valuation date generally is competent, substantial, and persuasive evidence of its fair market value" and that "[a]ctual sales between a willing buyer and a willing seller are generally more reliable than estimates and approximations and indicate what a hypothetical buyer and seller may agree on"). Here, there was an actual sale of the subject property-that is, Mr. Landy's internet-based consumer lending businesses-immediately before the hypothetical liquidation of NPA, LLC. That sale of a 70% interest implies an overall fair market value of $29,979,299.

In deciding valuation issues courts often receive into evidence and consider the opinions of expert witnesses. *Helvering v. Nat'l Grocery Co.*, 304 U.S. 282, 295 (1938). Where experts offer competing estimates of fair market value, we determine how to weigh those estimates by, inter alia, examining the factors they considered in reaching their conclusions. *See Casey v. Commissioner*, 38 T.C. 357, 381 (1962). Contrary to the Commissioner's current position that a "formal" appraisal is required, this Court and others have frequently adopted the proposition that an actual sale is more persuasive evidence of fair market value than an appraisal, so the proposition that an appraisal is necessary to validate a sale clearly cannot be correct. See, *e.g.*, *Gaggero v. Commissioner*, T.C. Memo. 2012-331, at *34 (giving "considerably more weight" to the "actual sales price" than an appraisal), *aff'd*, 795 F. App'x 1005 (9th Cir. 2020); *Hollis v. Commissioner*, B.T.A.M. (P-H) P 37,133 (1937) ("The best evidence of value is a sale made between willing parties under no compulsion, and where, in valuing property at a given date, we must choose between opinion evidence based on appraisals and an actual sale or sales between willing parties, the established rule is that the selling price is the better evidence of value.").

In his reply brief respondent argues that the transaction was not for fair market value and should be disregarded since Mr. Landy was pressured to sell, failed to obtain a formal appraisal, and lacked sophistication and education. There is nothing in the record that indicates that Mr. Landy was under any duress or compulsion to sell, and in fact his trial testimony reflects the contrary. At trial Mr. Landy testified how he wanted a "liquidity event" and he understood that he would retain 30% of his businesses. He also testified that he was under no financial compulsion or other need to sell, as his businesses were in fact profitable. The parties to the transaction entered into a letter of intent whereby Mr. Landy agreed to effect the sale of 70% of his consumer loan businesses for a 2.3× multiple of EBITDA. Mr. Landy was represented by legal counsel, and after months of due diligence, the sale occurred with investors paying $14,502,436 for "good will" and $6,483,073 for the existing book of loans for a total price of $20,985,509.[13]

[13] Mr. Landy (through NPA, Inc.) contributed substantially all of his interests in his consumer loan businesses to NPA, LLC before the sale; so to say Mr. Landy sold 70% of his consumer loan businesses, compared to what third-party investors paid to acquire class A units in NPA, LLC, is referring to the same transaction.

Respondent retained an expert witness to provide a retrospective opinion of NPA, LLC's fair market value. This expert was also retained to provide his opinion as to the proceeds ES NPA would receive upon a hypothetical liquidation of NPA, LLC. Respondent's expert performed a market approach analysis through examining comparable businesses and determined an overall fair market value of $52,463,772. It was respondent's expert's opinion that ES NPA would receive $12,269,000 upon a hypothetical liquidation.

Respondent's expert, however, was not aware when he prepared his original report that Mr. Landy had sold 70% of his consumer loan businesses for approximately $21 million. Therefore, respondent's expert performed no analysis with respect to the transaction in his original report. On rebuttal, respondent's expert acknowledged that the transaction provides the best indicator of NPA, LLC's value; however, he conducted additional analysis using an income approach to test the reasonableness of the transaction. In his rebuttal report respondent's expert opined, using an income approach and a 4.7× multiple of EBITDA, that NPA, LLC had an overall fair market value of $48,480,500, resulting in ES NPA's receiving a distribution upon a hypothetical liquidation.

Determining credibility is the province of the Court, and we find the testimony of Mr. Landy, a neutral third-party regarding the nature of the transaction at issue, to be credible and unbiased. We find nothing in the record to dispute a finding that the transaction was arm's-length and bona fide. We decline to adopt respondent's expert's opinion of value. See *Parker v. Commissioner*, 86 T.C. 547, 561 (1986). Rather, we rely upon the arm's-length and bona fide transaction in which Mr. Landy sold a 70% interest in his consumer loan businesses for approximately $21 million, resulting in an overall fair market value in NPA, LLC of $29,979,299.

Therefore, we determine ES NPA's class C units are a profits interest as defined under Revenue Procedure 93-27 since, applying a fair market value of $29,979,299 to NPA, LLC at the time of receipt, ES NPA would not receive a share of the proceeds upon a hypothetical liquidation of the partnership.[14] Further, on the basis of the conflicting expert witness testimony, we determine any fair market value in excess of $29,979,299 to be speculative. See *Campbell v. Commissioner*, 943 F.2d at 823.

[14] The foregoing facts are distinguishable from those in *Crescent Holdings, LLC*, 141 T.C. at 493, where, unlike here, we found that upon a hypothetical liquidation the taxpayer would have received a share of the proceeds.

Lipton and Gruen, "*ES NPA Holding, LLC*: Tax Court Upholds Properly Structured Profits Interest under Rev. Proc. 93-27," *Journal of Taxation* (WG&L) (8/2023), comments:

Analysis

As noted by the Tax Court, Revenue Procedure 93-27 is not a "safe harbor with limited application." The IRS issued the revenue procedure in response to its loss in *Campbell*.[26] If a taxpayer falls outside of the scope of Revenue Procedure 93-27 , there is still favorable case law to treat the receipt of a profits interest for services as a nontaxable event.[27] In other words, *Campbell* is broader than Revenue Procedure 93-27, in that it does not require black-and-white qualifications (e.g., no dispositions within two years of receipt). Your authors believe the Tax Court correctly viewed the revenue procedure as “administrative guidance” on the treatment of the receipt of a partnership profits interest for services.

[26] *See* Mincey, Sloan and Banoff, *Rev. Proc. 2001-43, Section 83 (b), and Unvested Profits Interests - the Final Facet of Diamond?*, 95 JTAX 4 (Oct. 2001) (“The Eighth Circuit’s opinion in Campbell left substantial uncertainty as to the taxation of compensatory profits interests. In response, the IRS issued Rev. Proc. 93-27, which carefully recited the litany of relevant statutes and judicial authority but pledged its allegiance to none. Nonetheless, the Procedure has been a practical success and remains the basis of most tax planning involving vested profits interests.” (citations omitted)).

[27] *Cf.* 857(b)(6)(C) (safe harbor for REIT prohibited transactions).

The Tax Court also correctly ignores any speculative value associated with the class C units at the time of issuance. The relevant determination for purposes of applying Revenue Procedure 93-27 is whether the holder of the profits interest is entitled to a share of the proceeds if the partnership’s assets were sold at fair market value and then the proceeds were distributed in a complete liquidation of the partnership. The fact that a profits interest may be worth something to a willing buyer on day one is irrelevant - most profits interests are; hence, their issuance in the first place.

The IRS agreed in ES NPA that if the fair market value of NPA, LLC was $29,979,299 as reflected in NPA, LLC’s capital account, then there would be no distribution to the class C unit holders upon a hypothetical liquidation. The IRS steered off course when it tried to assert a $52,463,722 valuation for NPA, LLC - a figure determined by its retained expert witness - rather than using the actual sales price from the arm’s-length and bona fide transaction entered into immediately before such hypothetical liquidation. In other words, the IRS was trying to use an appraisal to supplant an actual sale price, which the court appropriately rejected. Even if Mr. Landy was not completely aware of all of the relevant facts, an actual sale between unrelated parties must be given significant weight. The IRS’ attempt to use an appraisal seems like the IRS was grasping at straws to support its position.

Often times, however, a profits interest is not granted in connection with a recent sale of the underlying partnership. In that situation, it is important for the partnership to book up its partners’ capital accounts to reflect the fair market value of partnership property immediately prior to the issuance of the profits interest.[28] This is clearly contemplated under Treasury Regulations section 1.704-1(b)(2)(iv)(f)(5)(iii), which provides that a revaluation is permitted if made principally for a substantial non-tax business purpose “[i]n connection with the grant of an interest in the partnership (other than a de minimis interest) on or after May 6, 2004, as consideration for the provision of services to or for the benefit of the partnership by an existing partner acting in a partner capacity, or by a new partner acting in a partner capacity or in anticipation of being a partner.”[29]

[28] Parillo, *Tax Court Decision on Profits Interest Isn’t Full Story*, 179 TAX NOTES FEDERAL 1216 (May 15, 2023). (“‘There is a lesson from [the *ES NPA*] case -

something we've been saying for years - that if you're going to be granting a partnership profits interest, you really ought to do a proper book-up,' [Clifford Warren of the IRS Office of Associate Chief Counsel (Passthroughs and Special Industries)] said"); Sheppard, *Defining Partnership Profits Interest*, 179 TAX NOTES FEDERAL 1103 (May 15, 2023) ("Make sure you're valuing the assets as of the date the person comes in. How do we know that the person is not getting a piece of already-established profits if we don't book-up and put everything at fair market value?" quoting Warren).

[29] Prior to the promulgation of this regulatory provision, one of your authors raised this issue in Shop Talk, *"Booking Up" for Partnership Profits Interests*, 84 JTAX 1 (Jan. 1996) ("Thus, in light of [prior] Reg. 1.704-1(b)(2)(iv) (f), it is not clear how the partnership can book up the partners' capital accounts under the Regulations on the issuance of a profits interest...On the other hand, if the partnership does not book up when the service provider receives a partnership interest, the transfer will likely not be subject to Rev. Proc. 93-27 because the service provider would have an interest in the capital of the partnership...Thus, a book-up is required as a practical matter when a profits interest is granted, but it is questionable whether the book-up is permitted under the Regulations.").

In determining whether Revenue Procedure 93-27 applied in *ES NPA*, the Tax Court considered the entirety of the double-tiered structure of ES NPA's profits interest holding, rather than looking at the upper-tier partnership in isolation. The Tax Court correctly found it to be of no material consequence that ES NPA's interest in NPA, LLC was held indirectly through IDS, which was a mere conduit since the liquidation rights in the class C units in both IDS and NPA, LLC were identical. Often times, profits interests are issued through a tiered structure (*e.g.*, in the case of an aggregator vehicle for profits interests issued to key employees of a company). This does not take away from the fact that the profits interests are granted for the provision of services to or for the benefit of the issuing partnership. As pointed out by the Tax Court, such a reading of the revenue procedure would be "unreasonably narrow."

The Tax Court was comfortable reaching this conclusion because ES NPA's interests in the class C units in IDS were "identical in all respects" to the interests in class C units in NPA, LLC. However, even if that were not the case, the services provided by ES NPA to NPA, LLC also benefited IDS (given its sole holding was an interest in NPA, LLC) even if not performed directly to IDS. The Tax Court failed to highlight that Revenue Procedure 93-27 applies if services are provided "to *or for the benefit of*" a partnership. Thus, in your authors' view, identical tracking is not required, as long as the services provided at the lower level benefit the upper-tier partnership issuing the profits interest.

The Tax Court's decision in *ES NPA* does not discuss the specific services performed in exchange for the profits interest, other than a statement in the facts that the "Whereas" clause of the call option agreement stated that ES NPA agreed to provide the following services to NPA, Inc. in exchange for the option to pay $100,000 to NPA, Inc. to acquire all of the class C units in IDS: "strategic advice for the purpose of enhancing the performance of [NPA Inc.'s] business and to assemble an investor group that would purchase 40 [sic] percent of [NPA Inc.'s] business for approximately $21 million." In your authors' view, it would have been prudent to set forth these services in the partnership agreement or a standalone agreement with the service provider, given their importance in satisfying Revenue Procedure 93-27.

Conclusion

The Tax Court's decision in *ES NPA* was rightly decided. The profits interest at issue complied with all of the requirements of Revenue Procedure 93-27, administrative guidance on which taxpayers and practitioners have been relying for the past thirty years. This decision gives added comfort that services do not need to be provided directly to the partnership issuing the profits interest, as long as the issuing partnership benefits from the services being provided by the profits interest holder. ES NPA also affirms the long-standing principle that fair market value is best determined by an actual arm's-length sale occurring sufficiently close to the valuation date, if available, and that in all situations, partnerships should book up capital accounts prior to issuing profits interests to avoid running afoul of the hypothetical liquidation test.

II.M.4.f.ii.(b). Code § 1061 - Certain Sales of Compensatory Partnership Interests Recharacterized from Long-Term to Short-Term Gains

Effective for taxable years beginning after December 31, 2017, special rules apply when a taxpayer transfers certain compensatory partnership interests, with surprising results when transferring to a related party.

Subject to exceptions, Code § 1061 targets an "applicable partnership interest," which is:[3745]

> any interest in a partnership which, directly or indirectly, is transferred to (or is held by) the taxpayer in connection with the performance of substantial services by the taxpayer, or any other related person, in any applicable trade or business.

The House report, which was accepted by the Conference Committee, elaborated:

> It is intended that partnership interests shall not fail to be treated as transferred or held in connection with the performance of services merely because the taxpayer also made contributions to the partnership, and the Treasury Department is directed to provide guidance implementing this intent.

However, an "applicable partnership interest," does not include "an interest held by a person who is employed by another entity that is conducting a trade or business (other than an applicable trade or business) and only provides services to such other entity."[3746]

Before getting into which businesses are being targeted, let's focus on the type of equity interest being targeted. Code § 1061(c)(4) provides:

> *Exceptions*. The term "applicable partnership interest" shall not include-
>
> (A) any interest in a partnership directly or indirectly held by a corporation, or
>
> (B) any capital interest in the partnership which provides the taxpayer with a right to share in partnership capital commensurate with-

[3745] Code § 1061(c)(1).
[3746] Code § 1061(c)(1).

(i) the amount of capital contributed (determined at the time of receipt of such partnership interest), or

(ii) the value of such interest subject to tax under section 83 upon the receipt or vesting of such interest.

Thus, if a corporation provides services and receives a partnership interest of any kind, Code § 1061 does not apply. The House report, which was accepted by the Conference Committee, elaborated:

> For example, if two corporations form a partnership to conduct a joint venture for developing and marketing a pharmaceutical product, the partnership interests held by the two corporations are not applicable partnership interests.

However, Notice 2018-18 announced that regulations would provide retroactively that this exception applies to C corporations, not S corporations, which rule is now in Reg. §§ 1.1061-3(b)(2) and 1.1061-3(f)(2).

The other exception above is the right to share in partnership capital commensurate with the partner's capital contribution or the actually taxed value of services provided.[3747] The House report, which was accepted by the Conference Committee, elaborated:

> An applicable partnership interest does not include any capital interest in a partnership giving the taxpayer a right to share in partnership capital commensurate with the amount of capital contributed (as of the time the partnership interest was received), or commensurate with the value of the partnership interest that is taxed under section 83 on receipt or vesting of the partnership interest. For example, in the case of a partner who holds a capital interest in the partnership with respect to capital he or she contributed to the partnership, if the partnership agreement provides that the partner's share of partnership capital is commensurate with the amount of capital he or she contributed (as of the time the partnership interest was received) compared to total partnership capital, the partnership interest is not an applicable partnership interest to that extent.

Thus the provision is directly targeting nontaxable issuances of profits interests described in part II.M.4.f.ii.(a) Tax Effects of Issuing a Profits Interest. Consider, however, what happens if the partnership is not a straight pro-rata deal. What if the partnership involves preferred returns? How about multiple tiers of preferred returns – commonly referred to as waterfalls? What does it mean for the right to share in partnership capital to be commensurate with the partner's capital contribution?

Now, on to the targeted businesses:

Code § 1061(c)(1) provides:

> *Applicable trade or business*. The term "applicable trade or business" means any activity conducted on a regular, continuous, and substantial basis which, regardless of whether the activity is conducted in one or more entities, consists, in whole or in part, of-

[3747] Code § 1061(c)(4)(B).

(A) raising or returning capital, and

(B) either-

(i) investing in (or disposing of) specified assets (or identifying specified assets for such investing or disposition), or

(ii) developing specified assets.

"Specified asset" means securities,[3748] commodities,[3749] real estate held for rental or investment, cash or cash equivalents, options or derivative contracts with respect to any of the foregoing, and an interest in a partnership to the extent of the partnership's proportionate interest in any of the foregoing.[3750] The House report, which was accepted by the Conference Committee, elaborated:

> Developing specified assets takes place, for example, if it is represented to investors, lenders, regulators, or others that the value, price, or yield of a portfolio business may be enhanced or increased in connection with choices or actions of a service provider or of others acting in concert with or at the direction of a service provider. Services performed as an employee of an applicable trade or business are treated as performed in an applicable trade or business for purposes of this rule. Merely voting shares owned does not amount to development; for example, a mutual fund that merely votes proxies received with respect to shares of stock it holds is not engaged in development.
>
> *Specified assets*
>
> Under the provision, specified assets means securities (generally as defined under rules for mark-to-market accounting for securities dealers), commodities (as defined under rules for mark-to-market accounting for commodities dealers), real estate held for rental or investment, cash or cash equivalents, options or derivative contracts with respect to such securities, commodities, real estate, cash or cash equivalents, as well as an interest in a partnership to the extent of the partnership's proportionate interest in the foregoing. A security for this purpose means any (1) share of corporate stock, (2) partnership interest or beneficial ownership interest in a widely held or publicly traded partnership or trust, (3) note, bond, debenture, or other evidence of indebtedness, (4) interest rate, currency, or equity notional principal contract, (5) interest in, or derivative financial instrument in, any such security or any currency (regardless of whether section 1256 applies to the contract), and (6) position that is not such a security and is a hedge with respect to such a security and is clearly identified. A commodity for this purpose means any (1) commodity that is actively traded, (2) notional principal contract with respect to such a commodity, (3) interest in, or derivative financial instrument in, such a commodity or notional principal contract, or (4) position that is not such a commodity and is a hedge with respect to such a commodity and is clearly

[3748] As defined in Code § 475(c)(2) without regard to its last sentence. Reg. § 1.1061-1(a) includes "interests in partnerships qualifying as securities (as defined in section 475(c)(2) without regard to the last sentence thereof)."
[3749] As defined in Code § 475(e)(2).
[3750] Code § 1061(c)(3). Reg. § 1.1061-1(a) includes in the definition of "Specified Assets" looking through partnerships to the extent described in Reg. § 1.1061-2(b)(1)(iii) and also includes "options or derivative contracts with respect to any of" the items described above as "Specified Assets."

identified. For purposes of the provision, real estate held for rental or investment does not include, for example, real estate on which the holder operates an active farm.

> A partnership interest, for purposes of determining the proportionate interest of a partnership in any specified asset, includes any partnership interest that is not otherwise treated as a security for purposes of the provision (for example, an interest in a partnership that is not widely held or publicly traded). For example, assume that a hedge fund acquires an interest in an operating business conducted in the form of a non-publicly traded partnership that is not widely held; the partnership interest is a specified asset for purposes of the provision.

Suppose we have a compensatory partnership interest, that shares in capital disproportionately to the contribution, and a targeted business, all as described above, so that the taxpayer has an "applicable partnership interest." What are the consequences?

Code § 1061(a) treats as a short-term capital gain the excess, if any, of the taxpayer's (A) net long-term capital gain with respect to applicable partnership interests for a taxable year, over (B) the taxpayer's net long-term capital gain with respect to such interests for such taxable year computed by using a more-than-three-year holding period in determining whether a gain or loss is long-term.[3751] Thus, if the taxpayer's applicable partnership interests held for more than one year but not more than three years are sold at a net loss, Code § 1061(a) does not recharacterize the character of the loss. Here's how Code § 83 interacts with the holding period rule, according to the Conference Committee report:

> The conferees wish to clarify the interaction of section 83 with the provision's three-year holding requirement, which applies notwithstanding the rules of section 83 or any election in effect under section 83(b). Under the provision, the fact that an individual may have included an amount in income upon acquisition of the applicable partnership interest, or that an individual may have made a section 83(b) election with respect to an applicable partnership interest, does not change the three-year holding period requirement for long-term capital gain treatment with respect to the applicable partnership interest.

[3751] Code § 1061(a) provides:

> *In general*. If one or more applicable partnership interests are held by a taxpayer at any time during the taxable year, the excess (if any) of-
>
> (1) the taxpayer's net long-term capital gain with respect to such interests for such taxable year, over
>
> (2) the taxpayer's net long-term capital gain with respect to such interests for such taxable year computed by applying paragraphs (3) and (4) of sections 1222 by substituting "3 years" for "1 year",
>
> shall be treated as short-term capital gain, notwithstanding section 83 or any election in effect under section 83(b).

The Conference Committee report concludes:

> Thus, the provision treats as short-term capital gain taxed at ordinary income rates the amount of the taxpayer's net long-term capital gain with respect to an applicable partnership interest for the taxable year that exceeds the amount of such gain calculated as if a three-year (not one-year) holding period applies. In making this calculation, the provision takes account of long-term capital losses calculated as if a three-year holding period applies.

Explaining the exception to this rule in Code §§ 1061(b)[3752] and (c)(5),[3753] the House report, which was followed by the Conference Committee on this issue, said:

> A special rule provides that, as provided in regulations or other guidance issued by the Secretary, this rule does not apply to income or gain attributable to any asset that is not held for portfolio investment on behalf of third party investors. Third party investor means a person (1) who holds an interest in the partnership that is not property held in connection with an applicable trade or business (defined below) with respect to that person, and (2) who is not and has not been actively engaged in directly or indirectly providing substantial services for the partnership or any applicable trade or business (and is (or was) not related to a person so engaged). A related person for this purpose is a family member (within the meaning of attribution rules[833]) or colleague, that is a person who performed a service within the current calendar year or the preceding three calendar years in any applicable trade or business in which or for which the taxpayer performed a service.
> [833] Sec. 318(a)(1).

In addition to related party transfers not qualifying for this exception, they also do not qualify for the netting of gains and losses that Code § 1061(a) allows regarding the sale of applicable partnership interests held for more than one year but not more than three years. The House Report explains Code § 1061(d):[3754]

> *Transfer of applicable partnership interest to related person*
>
> If a taxpayer transfers any applicable partnership interest, directly or indirectly, to a person related to the taxpayer, then the taxpayer includes in gross income as short-term

[3752] Which provides:

> *Special rule*. To the extent provided by the Secretary, subsection (a) shall not apply to income or gain attributable to any asset not held for portfolio investment on behalf of third party investors.

[3753] Which provides:

> *Third party investor*. The term "third party investor" means a person who-
> (A) holds an interest in the partnership which does not constitute property held in connection with an applicable trade or business; and
> (B) is not (and has not been) actively engaged, and is (and was) not related to a person so engaged, in (directly or indirectly) providing substantial services described in paragraph (1) for such partnership or any applicable trade or business.

[3754] Code § 1061(d), "Transfer of applicable partnership interest to related person," provides:

> (1) *In general*. If a taxpayer transfers any applicable partnership interest, directly or indirectly, to a person related to the taxpayer, the taxpayer shall include in gross income (as short term capital gain) the excess (if any) of-
> (A) so much of the taxpayer's long-term capital gains with respect to such interest for such taxable year attributable to the sale or exchange of any asset held for not more than 3 years as is allocable to such interest, over
> (B) any amount treated as short term capital gain under subsection (a) with respect to the transfer of such interest.
> (2) *Related person*. For purposes of this paragraph, a person is related to the taxpayer if-
> (A) the person is a member of the taxpayer's family within the meaning of section 318(a)(1), or
> (B) the person performed a service within the current calendar year or the preceding three calendar years in any applicable trade or business in which or for which the taxpayer performed a service.

For Code § 318(a)(1), see part II.Q.7.a.viii Code § 318 Family Attribution under Subchapter C.

> capital gain so much of the taxpayer's net long-term capital gain attributable to the sale or exchange of an asset held for not more than three years as is allocable to the interest. The amount included as short-term capital gain on the transfer is reduced by the amount treated as short-term capital gain on the transfer for the taxable year under the general rule of the provision (that is, amounts are not double-counted). A related person for this purpose is a family member (within the meaning of attribution rules[834]) or colleague, that is a person who performed a service within the current calendar year or the preceding three calendar years in any applicable trade or business in which or for which the taxpayer performed a service.
> [834] Sec. 318(a)(1).

For Code § 318(a)(1), see part II.Q.7.a.viii Code § 318 Family Attribution under Subchapter C.

The government must require appropriate reporting[3755] and issue regulations or other guidance as is necessary or appropriate to carry out the purposes of Code § 1061.[3756]

T.D. 9945 (1/13/2021) provides final regulations explaining Code § 1061. Schreiber, "Carried interests regulations are finalized," *The Tax Adviser* (1/8/2021), explains:

> Because the application of the Sec. 1061 carried interest rules requires a clear determination of the holding period of a partnership interest that is, in whole or in part, an [applicable partnership interest], the final regulations also provide clarifying amendments to Regs. Sec. 1.1223-3, which governs partnership-interest holding periods. The regulations also make clarifying amendments to Regs. Sec. 1.702-1(a)(2), regarding partners' distributive shares of partnership capital gains and losses, and Regs. Sec. 1.704-3(e), providing that a method for aggregating gains and losses by a securities partnership will not be considered reasonable unless it takes into account the application of Sec. 1061.
>
> The regulations generally apply to tax years of owner-taxpayers and passthrough entities beginning on or after the date they are published in the Federal Register. (The regulations have been submitted to the Office of the Federal Register, but a publication date has not yet been scheduled.) Regs. Sec. 1.1061-3(b)(2)(i) (regarding an S corporation for which an election under Sec. 1362(a) is in effect) applies to tax years beginning after Dec. 31, 2017.
>
> Regs. Sec. 1.1061-3(b)(2)(ii) (regarding a passive foreign investment company with a qualifying electing fund election in effect) applies to tax years beginning after Aug. 14, 2020.
>
> Owner-taxpayers or passthrough entities may choose to apply the final regulations in their entirety to a tax year beginning after Dec. 31, 2017, if they consistently and entirely apply the final regulations to that year and all later years.

IRS provided additional guidance through News Release IR-2021-215 and https://www.irs.gov/businesses/partnerships/section-1061-reporting-guidance-faqs.

[3755] Code § 1061(e).
[3756] Code § 1061(f).

II.M.4.f.iii. What Happens If a Nonvested Partnership Interest Does Not Qualify As a Profits Interest

Crescent Holdings, LLC v. Commissioner[3757] determined the tax consequences of an unvested interest in partnership capital and profits:

- The taxpayer's partnership interest was conditioned upon his future performance of substantial services. In other words, it wasn't vested.

- If the partnership had liquidated immediately after the unvested partnership interest was awarded, the agreement would have allocated liquidation proceeds to the taxpayer. Therefore, the unvested partnership interest was not a pure profits interest and was subject to Code § 83 income taxation.

- The Tax Court held that, under Code § 83, the taxpayer did not own the partnership interest for tax purposes and was taxed on only the cash that was distributed to him. Instead, the unvested, undistributed profits were taxable to those who would have received them if he had terminated employment.

- Furthermore, if the taxpayer were to become vested (no requirement to perform future substantial services), he would be taxable on the fair market value of the partnership interest at the time of vesting.

This case illustrates the big swing that can occur when awarding a partnership interest without making sure it is a pure profits interest. Until this case, most tax lawyers assumed that the only tax consequence to not having a pure profits interest was possible inclusion of the fair market value of the profits interest in the recipient's income. The remaining partners would get a corresponding deduction, and presumably they could use the taxes saved from the deduction to pay the recipient's taxes. Now the stakes are higher: if the recipient has a falling out with the partnership and challenges the income tax treatment, the income allocated to the recipient might instead be taxed to the other partners; however, the tax distribution was made to the recipient and might not be available to the remaining partners.

In light of this case, consider the following measures:

- When including in the partnership agreement a reference to the parties' intent that the partnership interest be a profits interest described in Rev. Procs. 93-27 and 2001-43, add language along the lines of: "Without limiting the generality of the foregoing, if the [partnership] were to liquidate immediately after granting [the profits interest], holders of [the profits interest]would receive no payment in respect of [the profits interest]."

- Include a savings clause that, if the IRS does find that we didn't have a good profits interest and this reallocation occurs, the recipient shall refund any tax distributions. That would remove a terminated employee's incentive to challenge the K-1 and hopefully provide cash to pay the partners' taxes.

[3757] 141 T.C. 477 (2013). For an exhaustive analysis, see Carman and Banoff, "*Crescent Holdings*: Unvested Capital Partner Avoids Income Allocations, But Many Questions Remain," *Journal of Taxation* (WG&L), Vol. 120, No. 4 (April 2014).

II.M.4.f.iv. Alternative If a Prospective Partner Wants a Capital Interest Instead of a Profits Interest

Profits interests are great because they are forward-looking. Sometimes, however, the prospective partner insists on having a share of the existing business. The easiest, most certain way to do that is to give the new partner a share of capital and report granting the partnership interest as compensation, much as when one would issue corporate stock.[3758]

An alternative approach might work - if the insistent partner is willing to take some risk. The partnership agreement could allocate net income to the new partner until the new partner's capital account increases to the desired level. That approach would not generate the desired results if the partnership does not earn enough income to increase the partner's capital account sufficiently. Also, if the income allocated to the partner is ordinary income, the partner risks having this ordinary income generate a capital loss if the partner is unable to sell the partnership interest for enough in the future (plus the fact that the basis acquired by this ordinary income would tend to offset future capital gain).

Some partnerships allocate gross income to generate this result, leading to more certainty of the partner's capital account attaining the desired level. However, if the IRS views the allocation of gross income as being certain, the IRS might assert that the agreement to allocate gross income generates compensation immediately, so one might want to take that possibility into account when considering the effect of the agreement.

II.M.4.g. Options to Acquire Equity (Stock Options, etc.)

Options to acquire equity do not constitute an equity interest in a corporate setting and, if the service provider is not a partner, do not constitute an equity interest in a partnership interest.[3759] Thus, they should not be subject to Code § 2701. However, they are subject to Code § 2703 in a family-controlled business, so they must be binding during life and after death and must satisfy the comparability test. The rest of these materials focus on the requirements to exclude stock options from Code § 409A; satisfying these tests is likely to bring a taxpayer into compliance (or least close to compliance) under the Code § 2703(b) comparability test under the *Amlie* case.[3760]

The Treasury and IRS have not issued guidance on options to acquire partnership interests, other than to provide that such options are subject to rules similar to those governing corporate stock options.[3761] If the stock option's exercise price is never less than the underlying stock's fair market value on the date the option is granted, then generally the stock option does not constitute deferred compensation.[3762] Thus, the key to a successful stock option is determining the value on the date that the option is granted.

[3758] See part II.M.4.e.i Issuing Stock to an Employee - Generally.
[3759] A partner's option to acquire a partnership interest might or might not constitute an equity interest. See part III.B.7.c.vii Stock Options.
[3760] The *Amlie* case is described in the text accompanying footnote 4591.
[3761] Notice 2005-1, Q&A-7. This continues to be the case under section III.G. of the preamble to the final regulations. Reg. § 1.409A-1(b)(7) is a placeholder for future regulations on arrangements between partnerships and partners.
[3762] Reg. § 1.409A-1(b)(5)(i)(A).

For stock options issued on or after January 1, 2005 and before the effective date of final regulations, taxpayers have the following ways to determine fair market value:[3763]

- Notice 2005-1, Q&A-4(d)(ii) provides that for purposes of determining the value of the underlying stock upon the grant of a nonstatutory stock option, "any reasonable valuation method may be used." This includes estate tax valuation under Reg. § 20.2031-2. Taxpayers may rely on Notice 2005-1 for stock rights issued on or after January 1, 2005 but before January 1, 2008.[3764]

- Prop. Reg. § 1.409A-1(b)(5)(iv)(B) provided additional details in response to commentators' assertions that the above Notice is too vague. Taxpayers may rely on either the proposed regulations or the final regulations for stock rights issued any date before January 1, 2008.[3765]

- Reg. § 1.409A-1(b)(5)(iv)(B) provides the following for stock that is not readily tradable on an established securities market:[3766]

[3763] Notice 2006-4. Final regulations were effective generally January 1, 2008. Notice 2006-79.
[3764] Section XII.C. of the Preamble to the final regulations.
[3765] Section XII.C. of the Preamble to the final regulations.
[3766] CCA 201521013 provides:

> Section 1.409A-1(k) provides that, for purposes of section 409A, the term established securities market means an established securities market as defined under § 1.897-1(m).
> Section 1.409A-1(b)(5)(vi)(G) provides that, for purposes of section 409A, stock is treated as readily tradable if it is regularly quoted by brokers or dealers making a market in the stock. In explaining § 1.409A-1(b)(5)(vi)(G), the preamble to the final section 409A regulations (72 Fed. Reg. 19,234, 19,240 (April 17, 2007)) states that the rule was intended to adopt the same standard as that set forth under § 1.280G-1, Q&A-6(e). Section 1.280G-1, Q&A-6(e) provides that, for purposes of section 280G, stock is treated as readily tradable if it is regularly quoted by brokers or dealers making a market in the stock. Section 1.280G-1, Q&A-6(f) provides that, for purposes of section 280G, the term established securities market means an established securities market as defined under § 1.897-1(m).
> Section 1.897-1(m) provides that the term established securities market means (1) a national securities exchange which is registered under section 6 of the Securities Exchange Act of 1934 (15 U.S.C. 78f), (2) a foreign national securities exchange which is officially recognized, sanctioned, or supervised by governmental authority, and (3) any over-the-counter market. An over-the-counter market is any market reflected by the existence of an interdealer quotation system. An interdealer quotation system is any system of general circulation to brokers and dealers which regularly disseminates quotations of stocks and securities by identified brokers or dealers, other than by quotation sheets which are prepared and distributed by a broker or dealer in the regular course of business and which contain only quotations of such broker or dealer.
> It is a common practice for new issues of publicly traded stocks and bonds to be traded on a when, as and if issued (commonly called a when issued) basis days prior to when the issuer actually issues and distributes the security to holders. A when-issued trade is made between a seller and a buyer contingent on actual issuance of the security, after which settlement of the trade is made.
> A when-issued market for a security yet to be issued may occur on an over-the-counter market or any other established securities market as defined under § 1.897-1(m). Section 703.02 (part 1) of the New York Stock Exchange's Listed Company Manual provides guidelines applicable to when-issued trading on the Exchange of a security expected to be issued as a stock dividend:
> Normally, the Exchange will initiate when issued trading when the percentage of additional stock distributed is 25% or more of the outstanding. There is no fixed date for the commencement of

(B) Stock not readily tradable on an established securities market.

(1) In general. For purposes of paragraph (b)(5)(i) of this section, in the case of service recipient stock that is not readily tradable on an established securities market, the fair market value of the stock as of a valuation date means a value determined by the reasonable application of a reasonable valuation method. The determination of whether a valuation method is reasonable, or whether an application of a valuation method is reasonable, is made based on the facts and circumstances as of the valuation date. Factors to be considered under a reasonable valuation method include, as applicable, the value of tangible and intangible assets of the corporation, the present value of anticipated future cash-flows of the corporation, the market value of stock or equity interests in similar corporations and other entities engaged in trades or businesses substantially similar to those engaged in by the corporation the stock of which is to be valued, the value of which can be readily determined through nondiscretionary, objective means (such as through trading prices on an established securities market or an amount paid in an arm's length private transaction), recent arm's length transactions involving the sale or transfer of such stock or equity

---

when issued trading, but the Exchange will usually wait until such time as all corporate and official action requisite to the issuance of shares has been taken.

The Tax Court held that a when-issued trading price on an over-the-counter market indicates the fair market value of a security prior to its issuance. *Frizzelle Farms, Inc. v. Comm.*, 61 T.C. 737 (1974), *aff'd* 511 F.2d 1009 (4 Cir., 1975).

CCA 201603025, the IRS' response to the taxpayer's assertion that the stock was not readily tradable so that the taxpayer's valuation should be used, included the following:

Under § 1.409A-1(b)(5)(vi)(G), stock is treated as readily tradable if it is regularly quoted by brokers or dealers making a market in such stock. Therefore, a stock is readily tradable if brokers or dealers make the stock available to trade by listing it on an established securities market. The readily tradable standard therefore requires only the ability to buy and sell the stock through a third party….

Taxpayers argue that there were therefore no actual transactions in the Common Stock as reported by the over-the-counter market for purposes of determining the fair market value of the Common Stock under § 1.409A- 1(b)(5)(iv)(A) on the Grant Date.[2] However, the rule does not require that the Common Stock must actually exchange hands on the trading date, but rather only that there are actual transactions in such stock on the trading date. Transactions in stock generally mean either the sale or transfer of stock. Even assuming that only contracts to purchase the Common Stock were actually purchased on the Grant Date, the contracts provided for the transfer of the Common Stock. The buyers were contractually obligated to complete their when-issued purchases of the Common Stock if [a certain condition] occurred. The [condition] had already occurred… on the Grant Date before the over-the-counter market opened for that trading date. Moreover, the buyers were contractually obligated to pay the auction price that applied at the time that they purchased the Common Stock on the Grant Date regardless of the auction prices of the Common Stock on the settlement date. Thus, there is no basis for treating the when-issued purchases of the Common Stock as anything other than actual transactions in such stock reported by the established securities market.

[2] The cases cited by Taxpayers do not support Taxpayers' position. The *Stavisky* court assumed that contracts to purchase stock when issued reflect the fair market value of the stock on the date the contract is entered into: In the case at bar the performance of the original contract—that is, the purchase of the shares—at the price fixed— remained what it had been. *Stavisky v. Comm'r*, 291 F.2d 48, 49 (2d Cir. 1961). Furthermore, the *Stavisky* holding applied to a transaction that occurred before the enactment of section 1233. Section 1233(e)(2)(A) treats stock traded on a when-issued basis the same as the stock. Under Example 6 of § 1.1233-1(c)(6), the price contracted to sell stock when issued applies for purposes of determining the applicable gain or loss when the stock is actually issued.

interests, and other relevant factors such as control premiums or discounts for lack of marketability and whether the valuation method is used for other purposes that have a material economic effect on the service recipient, its stockholders or its creditors. The use of a valuation method is not reasonable if such valuation method does not take into consideration in applying its methodology, all available information material to the value of the corporation. Similarly, the use of a value previously calculated under a valuation method is not reasonable as of a later date if such calculation fails to reflect information available after the date of the calculation that may materially affect the value of the corporation (for example, the resolution of material litigation or the issuance of a patent) or the value was calculated with respect to a date that is more than 12 months earlier than the date for which the valuation is being used. The service recipient's consistent use of a valuation method to determine the value of its stock or assets for other purposes, including for purposes unrelated to compensation of service providers, is also a factor supporting the reasonableness of such valuation method.

(2) Presumption of reasonableness. For purposes of this paragraph (b)(5)(iv)(B), the use of any of the following methods of valuation is presumed to result in a reasonable valuation, provided that the Commissioner may rebut such a presumption upon a showing that either the valuation method or the application of such method was grossly unreasonable:

(i) A valuation of a class of stock determined by an independent appraisal that meets the requirements of section 401(a)(28)(C) and the regulations as of a date that is no more than 12 months before the relevant transaction to which the valuation is applied (for example, the date of grant of a stock option).

(ii) A valuation based upon a formula that, if used as part of a nonlapse restriction (as defined in § 1.83-3(h)) with respect to the stock, would be considered to be the fair market value of the stock pursuant to § 1.83-5, provided that such stock is valued in the same manner for purposes of any nonlapse restriction applicable to the transfer of any shares of such class of stock (or any substantially similar class of stock) to the issuer or any person that owns stock possessing more than 10 percent of the total combined voting power of all classes of stock of the issuer (applying the stock attribution rules of § 1.424-1(d)), other than an arm's length transaction involving the sale of all or substantially all of the outstanding stock of the issuer, and such valuation method is used consistently for all such purposes, and provided further that this paragraph (b)(5)(iv)(B)(2)(ii) does not apply with respect to stock subject to a stock right payable in stock, where the stock acquired pursuant to the exercise of the stock right is transferable other than through the operation of a nonlapse restriction.

(iii) A valuation, made reasonably and in good faith and evidenced by a written report that takes into account the relevant factors described in paragraph (b)(5)(iv)(B)(1) of this section, of illiquid stock of a start-up corporation. For this purpose, illiquid stock of a start-up corporation means service recipient stock of a corporation that has no material trade or business that it or any predecessor to it has conducted for a period of 10 years or more and has no class of equity securities that are traded on an established securities market (as defined in paragraph (k) of this section), where such stock is not subject to any put, call, or other right or obligation of the service recipient or other person to purchase such stock (other than a right of first refusal upon an offer to purchase by a third party that is unrelated to the service recipient or service provider and other than a right or obligation that constitutes a lapse restriction as defined in § 1.83-3(i)), and provided that this paragraph (b)(5)(iv)(B)(2)(iii) does not apply to the valuation of any stock if the service recipient or service provider may reasonably anticipate, as of the time the valuation is applied, that the service recipient will undergo a change in control event as described in § 1.409A-3(i)(5)(v) or § 1.409A-3(i)(5)(vii) within the 90 days following the action to which the valuation is applied, or make a public offering of securities within the 180 days following the action to which the valuation is applied. For purposes of this paragraph (b)(5)(iv)(B)(2)(iii), a valuation will not be treated as made reasonably and in good faith unless the valuation is performed by a person or persons that the corporation reasonably determines is qualified to perform such a valuation based on the person's or persons' significant knowledge, experience, education, or training. Generally, a person will be qualified to perform such a valuation if a reasonable individual, upon being apprised of such knowledge, experience, education, and training, would reasonably rely on the advice of such person with respect to valuation in deciding whether to accept an offer to purchase or sell the stock being valued. For this purpose, significant experience generally means at least five years of relevant experience in business valuation or appraisal, financial accounting, investment banking, private equity, secured lending, or other comparable experience in the line of business or industry in which the service recipient operates.

(3) Use of alternative methods. For purposes of this paragraph (b)(5), a different valuation method may be used for each separate action for which a valuation is relevant, provided that a single valuation method is used for each separate action and, once used, may not retroactively be altered. For example, one valuation method may be used to establish the exercise price of a stock option, and a different valuation method may be used to determine the value at the date of the repurchase of stock pursuant to a put or call right. However, once an exercise price or amount to be paid has been established, the exercise price or amount to be paid may not be changed through the retroactive use of another valuation method. In addition, notwithstanding the foregoing, where after the date of grant, but before the date of exercise or transfer, of the stock right, the service recipient stock to which the stock right relates becomes readily tradable on an established securities market, the service recipient must use the valuation method set forth in paragraph (b)(5)(iv)(A) of this section for purposes of determining the payment at the date of exercise or the purchase of the stock, as applicable.

If value is off, consider whether relief provisions might be available.[3767]

For gift, estate, and generation-skipping transfer tax purposes, Rev. Proc. 98-34 provides a safe harbor for valuing nonpublicly traded stock options that are granted in connection with the performance of services (including stock options that are subject to the provisions of Code § 421), which options are granted on stock that is publicly traded on an established securities market.

[3767] Notice 2008-113, as modified by Notice 2010-6 and Notice 2010-80.

A form of compensation similar to stock options is a stock appreciation right (SAR). An SAR is like a stock option, except that the employee never buys the stock. In many cases involving stock options, an employee borrows to exercise the stock option, repays the exercise price by selling the shares, and then keeps the remaining stock. An SAR gives the employee the same cash the employee would have received if the employee had borrowed to exercise the option, sold all of the stock immediately, and repaid the loan, without making the employee go through all of those steps and without the employee ever owning any of the underlying stock. If properly structured, an SAR would receive Code § 409A treatment similar to an option.[3768] An SAR is likely have few, if any, Chapter 14 implications because the employee never receives any equity in the company.

Finally, awards of restricted stock could work well. Code § 409A does not apply merely because property is not includable income in the year of receipt by reason of the property being nontransferable and subject to a substantial risk of forfeiture under Code § 83 or is includable in income solely due to a valid election under Code § 83(b).[3769] The service provider should receive actual shares of stock subject to forfeiture; a promise to transfer stock in the future may be subject to Code § 409A,[3770] although it could be excluded from Code § 409A for other reasons. However, the IRS takes the position that a gift of a stock option that is not exercisable until after the performance of services is an incomplete gift until exercise of the option is no longer conditioned on the performance of services by the transferor;[3771] presumably, this attitude would also apply to restricted stock. The author disagrees with the IRS' position regarding incomplete gifts but cautions planners to consider whatever litigation risks the IRS' position might entail when making transfers of property conditioned on the performance of services by the transferor.

[3768] Reg. § 1.409A-1(b)(5)(i)(B). An SAR that complies with this regulation is also exempt from Code § 457A (which taxes deferred compensation from certain types of foreign entities when vested). Rev. Rul. 2014-18. In AM 2016-003, the IRS was asked:

> May a service provider making an overall accounting method change under section 446(e) of the Code —from the cash receipts and disbursements method of accounting to an accrual method of accounting —include in its adjustment under section 481(a) (section 481(a) adjustment) vested deferred compensation under a plan of a nonqualified entity that would have been includible under section 457A had the services not been performed before January 1, 2009, resulting in some of the vested deferred compensation being included in income later than the service provider's last taxable year beginning before 2018?

Reasoning that the statute regarding deferral overrode otherwise applicable principles, it asserted:

> To the extent the section 481(a) adjustment relates to vested deferred compensation that is attributable to services performed before January 1, 2009, under a plan of a nonqualified entity, the service provider may not take the adjustment into account later than the service provider's last taxable year beginning before 2018.

[3769] Reg. §§ 1.409A-1(b)(6)(i), 1.83-3(b). If an important goal is to convert nonvested restricted stock to deductible compensation upon the transfer of an interest in the business to the holder, a Code § 83(b) election should not be made.

[3770] Reg. § 1.409A-1(b)(6)(ii).

[3771] Rev. Rul. 98-21, reversing the IRS' prior Letter Ruling position. Rev. Rul. 98-21 is wrong; see text accompanying fn 6331 in part III.B.1.a.v Sending Business or Performing Services.

II.N. Shareholder Agreements and Operating Agreements

II.N.1. Comparison of Ability to Specify Future Actions

In a corporation, generally each member of a board of directors has certain fiduciary duties that cannot be waived on a blanket basis by the organizational documents,[3772] and the way to enforce actions promised in shareholder agreements is to remove a noncompliant board and replace it with directors who will carry out the shareholders' wishes. However, depending on state law, a corporation can be organized as a statutory close corporation that functions more like a limited liability company.[3773]

A limited liability company's operating agreement can dictate specific actions. The drafting lawyer might consider whether to relieve managers and members of various fiduciary duties. Some states, such as Illinois, do not allow fiduciary duties to be negated by contract; other states, such as Missouri, allow any arrangement to which the parties agree. The absence of fiduciary duties generally is not recommended for estate planning purposes. If one wants (and is permitted) to negate fiduciary duties, consider including the duties of good faith that generally apply to commercial contracts. Some cases have held lawyers liable to the injured party (who is not the lawyers' client) for advising clients to breach fiduciary duties, whereas lawyers generally are not liable for advising clients to breach contract duties.

II.N.2. Retroactivity of Amendment to Partnership Agreement (Including Operating Agreement)

For purposes of the partnership income tax rules, a partnership agreement includes any modifications of the partnership agreement made before, or at, the time prescribed by law for the filing of the partnership return for the taxable year (not including extensions) which are agreed to by all the partners, or which are adopted in such other manner as may be provided by the partnership agreement.[3774] A partnership agreement or modifications can be oral or written; as to any matter on which the partnership agreement, or any modification thereof, is silent, the provisions of local law are part of the agreement.[3775]

When a partnership agreement did not have a fixed method to determine the current and future allocations of profits or losses and instead allocates them based on the determinations of an executive committee, an agreement to determine the allocation of then-currently unrealized profits and losses arising from many years of operations did not give rise to an analysis of how much profit and loss might have been allocated to the partners before the amendment.[3776]

II.O. Buy-Sell Agreements

II.O.1. General Buy-Sell Concepts

A buy sell agreement is a contract between owners and/or the entity that provides for the sale of an owner's interest upon the occurrence of a triggering event such as disability, retirement, or death. The three types of buy-sell agreements are: (1) redemption agreements; (2) cross-

[3772] See How Many Masters Can a Director Serve? A Look at the Tensions Facing Constituency Directors, *The Business Lawyer*, Vol. 63, No. 3, May 2008.
[3773] See fn. 1138.
[3774] Code § 761(c); Reg. § 1.761-1(c).
[3775] Reg. § 1.761-1(c).
[3776] Letter Ruling 9821051, described in part II.C.6 Shifting Rights to Future Profits.

purchase agreements; and (3) a combination of redemption and cross-purchase. Deciding which type to use requires consideration of a number of factors including the number and ages of the shareholders involved and the weighing of tax consequences for each type of agreement.

These agreements determine the price and payment terms and restrict who can own an interest in the business. In a limited liability company (LLC), the buy-sell agreement is integrated into the operating agreement. In a partnership, the buy-sell agreement is integrated into the partnership agreement. In a corporation, whether a C corporation or an S corporation, the buy-sell agreement is integrated into a shareholders' agreement.

Key circumstances triggering a buy-sell agreement include the owner's divorce, bankruptcy, incapacity, or death. Special considerations may apply to an owner who works in the business, especially if the ownership interest was granted as an employment incentive. Also, owners like to choose their partners, so frequently the buy-sell provisions restrict transfers to outsiders.

In LLCs and partnerships, voting and management rights are not transferred automatically when ownership is transferred. An owner without voting and management rights is called an assignee. LLC and partnership buy-sell provisions specify whether a transferee is an assignee or has voting and management rights.[3777]

An S corporation may revert to a C corporation if too many shareholders own stock or if stock is transferred to an ineligible shareholder. Special buy-sell provisions are required to preserve the S election.

Reg. § 20.2031-3, "Valuation of interests in businesses" (last amended 1/28/1992), provides:

> The fair market value of any interest of a decedent in a business, whether a partnership or a proprietorship, is the net amount which a willing purchaser, whether an individual or a corporation, would pay for the interest to a willing seller, neither being under any compulsion to buy or to sell and both having reasonable knowledge of relevant facts. The net value is determined on the basis of all relevant factors including -
>
> (a) A fair appraisal as of the applicable valuation date of all the assets of the business, tangible and intangible, including good will;
>
> (b) The demonstrated earning capacity of the business; and
>
> (c) The other factors set forth in paragraphs (f) and (h) of §20.2031-2 relating to the valuation of corporate stock, to the extent applicable.
>
> Special attention should be given to determining an adequate value of the good will of the business in all cases in which the decedent has not agreed, for an adequate and full consideration in money or money's worth, that his interest passes at his death to, for example, his surviving partner or partners. Complete financial and other data upon which the valuation is based should be submitted with the return, including copies of reports of examinations of the business made by accountants, engineers, or any technical experts as of or near the applicable valuation date. See section 2701 and the regulations at

[3777] A Delaware Court of Chancery held that an assignee's admission as a member must be done formally and that an assignee who is not a creditor could assert rights in equity without being admitted as a member. *In re Carlisle Etcetera LLC*, C.A. No. 10280-VCL (4/30/2015), found at https://casetext.com/case/in-re-carlisle-etcetera-llc.

The Business Planning Committee of the American College of Trust & Estate Counsel has put together a model shareholder agreement and related outline of technical issues.

II.O.2. Spousal Issues in Buy-Sell Agreements and Related Tax Implications

Generally speaking, it is usually best to have a spouse hold a business interest through a trust, rather than through outright ownership. The trust can protect the property from creditors and from new spouses if the surviving spouse remarries. A trust also allows the decedent to choose to have a third party involved in the management and investment of the property, if desirable. Additionally, a trust allows the decedent to designate who the remainder interest in the property passes to upon the spouse's death and might enable the decedent to devise property to successive generations without incurring estate tax. Finally, the trust form will allow the donor to structure the estate plan to take advantage of any potential minority discounts or control premiums that may apply.

II.O.2.a. Spouses and Buy-Sell Agreements – State Law Issues

A number of issues can arise related to spouses holding interests in closely-held businesses. If these issues are not addressed, closely-held business owners could end up in losing a portion of their business to an ex-spouse, or an owner's estate could lose part or all of the marital deduction.

Some courts have held a business owner's buy-sell agreement not binding on the spouse, so spousal consent should be considered necessary to ensure enforcement of buy-sell agreements. First, such consent can prevent a divorce proceeding or elective share from causing an ex-spouse to be involved in the business. It also prevents a spouse from leaving her community property interest in the business to a third party. Finally, it protects the spouse from claiming a community property interest in the business upon the business owner's death.

However, even if the spouse consents by signing the buy-sell agreement, a court might rule that the spouse did not truly consent to the agreement because the spouse did not fully understand the agreement.[3778] Preferably, the spouse would be represented by his or her own counsel. Be sure to update spousal consent when amending the buy-sell agreement.

II.O.2.b. Divorce – Income Tax Issues Relating to Buy-Sell Agreements

In order to accomplish its objectives, a buy-sell agreement needs to specifically address transfers incident to divorce. If an agreement focuses on voluntary transfers, it is possible a court would not apply the restriction in the case of an involuntary transfer, such as a divorce transfer.

[3778] See, e.g. *Suther v. Suther*, 627 P.2d 110 (Wash. App. 1981).

When a business interest is transferred to a spouse pursuant to a divorce agreement and the stock is then redeemed by the business for cash pursuant to the buy-sell agreement, the non-recognition rules for spousal transfers and the stock redemption rules collide. Before tax regulations addressed this situation, there was some question as to whether the transferring spouse should be taxed on the redemption or the spouse receiving the interest should be taxed. Reg. § 1.1041-2(c) addresses this question and states that the spouses may chose who will be taxed on the redemption.[3779]

In another setting indirectly involving a transfer of a business interest, Letter Ruling 201024005 held that the transfer of qualified replacement property (QRP) to a divorcing spouse is not subject to income tax. Under Code § 1042, QRP is certain stock purchased with the proceeds of a sale of stock to an employee stock ownership plan (ESOP); this purchase allows the seller to defer gain on the sale, which deferred gain reduces the QRP's basis. Code § 1042(e) requires the deferred gain to be recognized if the seller later disposes of the QRP. Code § 1042(e)(3)(C) provides that a gift does not count as a Code § 1042(e) disposition. Code § 1041(b)(1) and its legislative history provide that a transfer in a divorce counts as a gift for income tax purposes, so the ruling held that a transfer of QRP by divorce was not subject to Code § 1042(e) recapture. Letter Ruling 202206009 held that a transfer to a grantor trust deemed owned by the transferor will not constitute a disposition of the QRP under Code § 1042(e), nor will transfers of QRP that occur pursuant to the terms of that trust after the grantor's death.

For more details on Code § 1041 nonrecognition, see part III.B.6.d Divorce as an Opportunity to Transfer.

II.O.2.c. Effect of Buy-Sell Agreement on Marital Deduction

The buy-sell agreement price can have a significant effect on the estate tax marital deduction. If stock held in a marital trust is subject to a bargain buy-sell agreement, the marital deduction might be totally disallowed.[3780] Such a provision might run afoul of Code § 2056(b)(5), which allows a marital deduction only if no other person has the power to appoint any portion of the interest to anyone except the surviving spouse, and Code § 2056(b)(7), which requires that the spouse be the only beneficiary. TAM 9147065 reasoned:

3779

3780 See *Estate of Rinaldi v. U.S.*, 38 Fed. Cl. 341 (1997); *Estate of McCabe v. U.S.*, 475 F.2d 1142 (Ct. Cl. 1973); TAM 9147065. See also TAM 8843004. The IRS took a similar position (without citing these cases) and lost in *Alan Baer Revocable Trust v. U.S.*, 105 A.F.T.R.2d 2010-1544 (D.C. Neb.), when the court disregarded a contingent distribution to beneficiaries because the possibility that the transfer to the contingent beneficiaries would ever come to fruition was so remote that it is negligible. The IRS acquiesced in result only in AOD 2012-001, arguing that any possibility whatsoever of others receiving the trust's possibility violated the Code § 2056(b)(7)(B)(ii)(II) prohibition against any person having the power to appoint any part of the property to any person other than the surviving spouse. The IRS claimed that Reg. § 20.2056(b)-7(d)(6) supports its position. That regulation provides that, if the surviving spouse is legally bound to transfer the distributed property to another person without full and adequate consideration in money or money's worth, the requirement of section 2056(b)(7)(B)(ii)(II) is not satisfied. Although generally I would want to avoid arguing with the IRS over this issue in a buy-sell agreement, perhaps some sort of formula adjustment clause (see part III.B.3 Defined Value Clauses in Sale or Gift Agreements or in Disclaimers) might work if one can find no other way to plan around this issue?

In the present case, no marital deduction can be allowed with respect to the portion of the spouse's trust that is required to be funded with the Company stock.

First, by giving his sons an option to purchase the Company stock at $1,000 a share, the decedent effectively divided the value of the stock between his sons and the spouse's trust. At the decedent's death, the fair market value of the stock was $11,000 per share. This was nearly 11 times the option price. The fair market value during the 24 months after the decedent's death could be expected to change due to a variety of factors. There was almost no possibility as of the date of decedent's death that the fair market value of the stock would equal the option price when the option was exercised. (Indeed, there must be presumed to be a greater likelihood of exercise where the fair market value exceeds the option price.) Thus, VIEWED AS OF THE DECEDENT'S DEATH, each son held a right, exercisable during the spouse's life, to make a bargain purchase of the Company stock. The effect of the bargain purchase would be to substantially deplete the value of the trust corpus.[1]

[1] As discussed below, even if the option had specified a strike price that happened to equal fair market value on the date of death, the marital deduction would still be disallowed, since the option price does not constitute a "specific portion" of the trust corpus.

Each son's option right is, effectively, a right to appoint to himself the excess of the fair market value of a share on the option exercise date over the option price. The sons' rights to purchase Company stock confers upon them a power to withdraw property with a substantial value from the spouse's trust for less than adequate and full consideration. This right is a "power in any other person to appoint any part of the interest, or such specific portion, to any person other than the surviving spouse" as that phrase is used in section 2056(b)(5) of the Code. Because of this power, the amount of the marital deduction for the property passing to the spouse's trust must be reduced by the value of the stock passing to the trust.

In this regard, at the decedent's death, it was not certain that the spouse's trust would receive even $1,000 upon the exercise of an option. The will entitled a son to pay the option price with a note bearing annual interest of nine percent. At decedent's death, the date that an option might be exercised certainly could not be predicted nor could the applicable interest rates for most of the 24- month period. If the rate of interest prescribed under section 7872 of the Code on the date of exercise is below nine percent, the trust would actually receive value GREATER THAN the $1,000 face amount of the nine percent note. (But a son would presumably not borrow from the trust at a rate that was higher than otherwise available from other sources.) Conversely, if the section 7872 rate exceeds nine percent, the trust would receive LESS THAN the equivalent of $1,000 on the nine percent note. In view of this financing arrangement prescribed by the will, at the decedent's death no minimum value that the trust would receive upon a son's exercise of his option can be determined. Therefore, for purposes of the marital deduction, we cannot attach even a $1,000 per share minimum value to the stock.

Further, the sons' powers cannot be construed as conferring upon the spouse the right to income from, and a power of appointment over, "a specific portion" of the stock under section 2056(b)(5) of the Code. In the present case, the amount (attributable to the Company stock) remaining in the trust after the purchase of the Company stock by the sons -- that interest in the trust corpus in which the spouse would continue having a right to income and over which she would continue having a power of appointment -- was not an ascertainable part of the trust corpus or the stock at the decedent's death. As discussed above, there was no way to predict the value of any note paid in purchase of the stock under an option, or what relationship the option price paid would bear to the fair market value of the stock in the trust at that time. Therefore, the spouse's right to the income from the option purchase price and power to appoint the option price are not rights over a specific portion of the stock or trust corpus, determinable at the decedent's death. Consequently, the marital deduction must be disallowed for the total value of the Company stock in the trust and any proceeds in the trust from the exercise of the options on the 29.746 shares.

Even if the sons did not have the power to appoint the value of the Company stock to themselves, the marital deduction would nevertheless be disallowed due to the nature of the spouse's income interest in the stock. As noted above, section 2056(b)(5) of the Code requires that the spouse be "entitled for life to all the income" from an interest in property or a specific portion of the interest. Under the will, the spouse is to be paid the trust income at least quarterly and may receive principal payments, in the trustee's discretion. However, the Company stock has been unproductive property for at least five consecutive years, including the year of the decedent's death and the two following years and is not certain to become productive property.

In addition, even if the Company had paid a level of dividends commensurate with the standards for a productive trust under local law, there would have been no assurance at decedent's death that the son authorized as voting manager of the Company would continue a practice of paying dividends. The managing son's exclusive voting right gives him, alone, the power to accumulate Company profits and withhold payment of dividends. If this son planned to exercise his option to purchase Company stock near the end of the 24-month option period, he would have a personal incentive to withhold all dividends during the life of the spouse and prior to the exercise of the purchase option. Doing so would tend to increase the fair market value of the Company stock subject to his fixed price option during the 24-month option period. Thus, under section 20.2056(b)-5(f)(4), the spouse's income interest in the Company stock is disqualified unless the rules for administering the trust require the trustee to convert the Company stock to income producing property, or permit the spouse to compel this conversion.

Under the will, unproductive property generally cannot be held for more than a reasonable time during the spouse's life without her written consent. However, the will expressly prohibits the trustee from selling the Company stock, unless so directed by the son authorized to sell it (except if a son exercises his option). Thus, effectively, neither the spouse nor the trustee have any legal right to establish an adequate income flow for the spouse from the Company stock. Consequently, under section 20.2056(b)-5(f)(4) of the regulations, the spouse is not entitled to "all the income for life" from the stock.

The spouse has a qualifying power of appointment over and income interest in a specific portion of the spouse's trust, the portion funded with miscellaneous assets of about $1 million in value, and this portion qualifies for a marital deduction under section 2056(b)(5) of the Code. However, we cannot conclude that she has a qualifying income interest in the trust viewed as a whole, because of the relatively large value of the nonproductive portion of the trust funded with the Company stock. Although the productive assets may be used to purchase a wasting asset that would produce a sufficient level of income for the entire trust on a TEMPORARY basis, these assets would eventually erode and, so, would no longer sustain the entire trust.[2]

> [2] Finally, even if the spouse's interest in the trust otherwise qualified under section 2056(b)(5) of the Code, the marital deduction allowable for the stock passing to the trust would nonetheless have to be reduced to reflect the fact the decedent bifurcated the value of the stock by passing only a truncated interest in the stock to the trust, and passing the voting rights in the stock directly to his son. See *Ahmanson Foundation v. U.S.*, 674 F.2d 761 (9th Cir. 1981), in which the decedent's revocable trust owned 100 percent of the stock of a closely-held corporation consisting of one voting share and 99 nonvoting shares. Under the terms of the trust, the voting share remained in the trust and the nonvoting shares passed to a charitable foundation. The court held that, for purposes of determining the value of the stock includible in the gross estate, the voting and nonvoting stock must be valued as one single controlling block. However, in determining the amount of the charitable deduction, the value of the 99 nonvoting shares passing to charity must be discounted to reflect their reduced value when severed from the voting share. Thus, in the present case, the value of the Company stock distributed to the spouse's trust would have had to have been limited to reflect its nonvoting characteristic if any deduction had been allowable for the value of the Company stock.

Consider the following:

- Provide that, if the property passes to a marital deduction trust, the agreement provide that the sale price shall be adjusted up as necessary to be no less than the fair market value, as finally determined for estate tax purposes. Alternatively, consider providing that, if the IRS determines that a fixed price redemption as of date of death is below fair market value as of date of death, the estate can rescind the sale.[3781]

- Bequeath the business interest to a marital deduction trust that is separate from other marital deduction trust assets, so that the marital deduction for those other assets is not jeopardized.[3782]

- Suppose one of the client's children receiving the benefit of a bargain is too important not to make allowances for, and a bequest to that child at the client's death is not practical. Consider requiring that any excess of fair market value over the agreed-upon price will be

---

[3781] *Estate of Dickinson v. Commissioner*, 63 T.C. 771 (1975), rejecting the IRS' reliance on *Procter*, prevented the IRS from nailing the taxpayer with circular marital and charitable deduction disallowances. See fn 7044 and accompanying and following text in part III.B.3.o *Procter* and Other Cases.

[3782] The trustee might divide the marital trust on the estate tax return if the trust agreement does not so provide. Although I believe that the suggestion in this bullet point is prudent, a reasonable person could argue that it is overkill, in that TAM 9147065 held:

> That portion of the spouse's trust that is funded with the Company stock (and the proceeds of Company stock sold pursuant to the exercise of the option) does not qualify for the marital deduction under section 2056(b)(5) of the Code. Viewed as of the date of the decedent's death, a person other than the spouse has power to appoint trust corpus, the spouse has no right to income from or a power of appointment over that portion of the trust represented by the value of the Company stock. Further, the spouse's income interest attributable to the value of the Company stock fails to satisfy the requisite standard under section 2056(b)(5). Therefore, the marital deduction is allowable only with respect to the specific portion of the spouse's trust that is represented by the trust assets other than the Company stock.

> held in a separate QTIP trust, with the surviving spouse getting only the income and the principal passing to that child on the spouse's death. One might even require the other QTIP trusts to pay any estate tax on this separate QTIP trust's assets on the surviving spouse's death.

On the other hand, FSA 200018020[3783] stated that directing stock to be sold for a bargain price before funding the QTIP Trust did not disqualify the QTIP trust; it simply affected the amount available for the marital deduction. The FSA distinguished the *Rinaldi* case cited in fn. 3780. If a bargain sale before funding the marital trust is not directed by the estate plan but rather is done as part of estate administration, then the marital deduction should be allowed in full and the surviving spouse is treated as making a gift.[3784]

Also, generally, giving the surviving spouse a choice between various bequests does not violate the terminable interest rule.[3785] In determining the deadline for an election, one might consider the 9 month disclaimer deadline under Code § 2518 or the 6 month survival requirement that may be imposed under Code § 2056(b)(3) without making the interest terminable. Rev. Rul. 82-184 approved a six-month simple election procedure but rejected an election that was conditioned on the surviving spouse's "performance of significant acts and upon events beyond mere procedural requirements." Rev. Rul. 82-184 included the following facts:

> D died on February 2, 1982. Under the terms of D's will, a trust was established in which D's surviving spouse, A, received a life income interest. However, under the will A could elect to take an outright bequest of $50,000 in lieu of the life income interest. The election was to be made by the spouse by filing written notice to the executor within six months of D's death. The will also provided that if A was at any time to buy a new house, A could receive on demand from the trustee the amount needed to buy a house, up to $200,000. A timely elected the cash bequest and sometime later demanded $200,000 for the purchase of a new home. D's executor deducted both the $50,000 cash bequest and the $200,000 distribution as bequests qualifying for the marital deduction under section 2056 of the Code.

Rev. Rul. 82-184 held:

> A cash bequest in lieu of a life estate, payable unconditionally at the election of the surviving spouse within a reasonable time after the decedent's death qualifies for the estate tax marital deduction under section 2056 of the Code.

[3783] FSA 200018020 was approved by Melissa Liquerman, who has had a long and successful career with the IRS and I believe is very well-regarded.

[3784] See Rev. Rul. 84-105, which is found in part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts.

[3785] See, *e.g.*, *Mackie v. Commissioner*, 64 T.C. 308 (1975), *aff'd per curiam* 545 F.2d 883 (4th Cir. 1976), which approved the following clause:

> My said wife shall have, however, the right to elect whether to accept this devise, bequest and appointment, or to reject it, or to accept it in part and reject it in part, which election she shall make by a statement in writing to that effect delivered to my executrix within four months from the date of my death. The failure of my said wife to deliver such statement to my executrix within such time shall be deemed an election by her to reject this devise, bequest and appointment in full.

See also Reg. § 20-2056(c)-2(c), regarding elective shares.

Rev. Rul. 82-184 reasoned:

> Section 2056(b)(1) provides that the marital deduction is not allowed for certain interests passing to the surviving spouse that will terminate or fail on the occurrence or nonoccurrence of an event or contingency where an interest in the property also passes to another person, who may enjoy the property after the surviving spouse's interest has terminated.
>
> In *Estate of Tompkins v. Commissioner*, 68 T.C. 912 (1977), *acq.*, 1982-1 C.B. 1, the spouse was given alternative bequests of a life income interest in a trust or an option to take $40,000 in cash outright. The election to take the $40,000 in lieu of the income interest was to be made within 60 days after the qualification of the executor. The decedent's spouse timely elected the cash bequest. The court held that for purposes of section 2056 of the Code, the surviving spouse had not received a terminable interest, but received, at the decedent's date of death, an absolute right to take outright a specific portion of the decedent's estate. The court considered the requirement that the spouse must make a timely election of the alternative bequest a mere procedural requirement, and thus not a contingency within the meaning of section 2056(b)(1), as long as the interest was otherwise nonterminable. The court noted that there is no substantial difference between an elective testamentary bequest of a non- terminable interest and a spouse's election against a will under state law. See section 20.2056(e)-2 of the Estate Tax Regulations. See also *Estate of Neugass v. Commissioner*, 555 F.2d 322 (2d Cir. 1977), *rev'g*, 65 T.C. 188 (1975).
>
> Similarly, in *Mackie v. Commissioner*, 64 T.C. 308 (1975), *acq.*, 1982-1 C.B. 1, *aff'd per curiam*, 545 F.2d 883 (4th Cir. 1976), it was held that a spouse's right to select any property out of the estate in an amount equal to the maximum marital deduction, was an absolute right to take outright a specified portion of the estate.

Rev. Rul. 82-184 also held:

> However, a cash bequest payable on the condition that the spouse purchase a new home is a nondeductible terminable interest for purposes of section 2056.

Rev. Rul. 82-184 continued:

> In *Estate of Edmonds v. Commissioner*, 72 T.C. 970 (1979), the decedent's spouse was bequeathed a life estate in the decedent's house and, in addition, if the decedent's spouse purchased another residence, the spouse was entitled to receive the amount necessary to do so, up to $100,000. The $100,000 was payable to the spouse upon notice to the executor and demand of the trustee. Approximately three years subsequent to the decedent's death, the spouse demanded and received $100,000 for a new residence. The court held that the estate could not deduct the distribution because, unlike the situations in Mackie and Tompkins, the spouse was not given an absolute right to take outright a specified portion of the decedent's estate. The requirement that the distribution be made only if the spouse relinquished the life tenancy and purchased a new house was considered a significant condition precedent to the spouse's enjoyment of the property. There was no way of ascertaining at the time of the decedent's death whether the surviving spouse would purchase a new home, or how much of the $100,000 would be needed to effect the purchase. Consequently, the bequest was a

> terminable interest for purposes of section 2056 of the Code. See also *Allen v. United States*, 359 F.2d 151 (2nd Cir. 1966), *cert. denied*, 385 U.S. 832 (1966).

In the present case, the optional bequest of $50,000 A received at the time of D's death was an absolute right to a specific portion of D's estate, and A made the election within a reasonable time for purposes of section 2056 of the Code. Since A timely elected to take the alternate bequest, D's estate can deduct the $50,000 bequest under section 2056. However, the bequest of the $200,000 is a terminable interest under section 2056(b) because it was conditioned upon A's performance of significant acts and upon events beyond mere procedural requirements. As is the case in *Edmonds*, there is no way of knowing at the time of D's death whether A would exercise the demand right or how much of the funds will be paid over. Because the residuary trust beneficiaries would benefit upon the failure of A to purchase a new home, D's bequest of the $200,000 is a nondeductible terminable interest under section 2056(b).

Letter Ruling 201410011 approved a 180-day election procedure in conjunction with a prenuptial agreement, with the QTIP trust funded with preferred partnership interest.[3786] Letter Ruling 201410011 approved a revocable trust while the grantor was living. Part of its provisions resulted from a prenuptial agreement. Key terms included:

> Section 3A(7) of Revocable Trust provides that, if Spouse survives Taxpayer and if Taxpayer and Spouse are married and living together at the time of Taxpayer's death, the trustee will allocate and make distributions to Spouse as provided in Section 3A(7)(a). However, if Spouse makes a timely election as provided in Section 3A(7)(b), then the trustee will allocate and make distributions to Spouse as provided in that section (Elective Marital Portion).
>
> Section 3A(7)(a) provides that Spouse will take under the terms of Antenuptial Agreement, and that the trustee will make any distributions to Marital Trust, to be added to the principal of Marital Trust, and to be held and distributed as may be required by the Antenuptial Agreement. The terms of Revocable Trust specify that the trustee has the discretion to satisfy any distribution to Marital Trust under the Antenuptial Agreement with LLC preferred units (Preferred Units).
>
> Section 3A(7)(b) provides that if, within 180 days following Taxpayer's death, Spouse elects pursuant to Section 3A(7)(b) to receive the Elective Marital Portion in lieu and instead of any distributions under Antenuptial Agreement, the trustee will distribute to Spouse outright the sum of $w and will distribute those property interests specified in Section 3(A)(7)(b), to be added to the principal of Marital Trust, and to be held and distributed as may be required by the Marital Trust agreement. If Spouse elects to receive the Elective Marital Portion Marital Trust will still be funded in part with Preferred Units.

Letter Ruling 201410011 started its reasoning:

> In Rev. Rul. 54-446, 1954-2 C.B. 303, a decedent and his wife were parties to an antenuptial agreement in which the wife relinquished any marital rights she might acquire in the decedent's property or estate by reason of their marriage. The decedent's will bequeathed property to his wife that was different from and of a greater value than the amount due to her under the antenuptial agreement. The will specifically provided

[3786] See text accompanying fn. 3789.

> that the bequests to wife were in lieu of any rights she might have under the antenuptial agreement. The revenue ruling determined that the amount bequeathed to the wife under the will "passed from the decedent to his surviving spouse" and therefore qualified for the estate tax marital deduction.
>
> In Rev. Rul. 68-271, 1968-1 C.B. 409, a decedent and his wife entered into an antenuptial agreement pursuant to which wife renounced and relinquished any marital rights she might acquire in his property or estate by reason of their marriage, in return for a stated sum from his estate, provided she survived him. Following the decedent's death, the estate paid the required sum to the widow pursuant to a claim filed by her. Decedent's will did not mention wife, and there was no will contest. The revenue ruling determined that the value of the interest transferred to the surviving spouse pursuant to the antenuptial agreement "passed from the decedent to his surviving spouse" and therefore qualified for the estate tax marital deduction.

Then Letter Ruling 201410011 cited *Tompkins* and Rev. Rul. 82-184. After that, it said:

> In the instant case, Spouse will receive certain property interests under the terms of the Antenuptial Agreement pursuant to Section 3A(7)(a) of Revocable Trust unless, within 180 days following Taxpayer's death, Spouse elects pursuant to Section 3A(7)(b) of Revocable Trust to receive certain other property interests (Elective Marital Portion). In each event, Spouse will have an absolute right to any property passing outright to her as well as an absolute right to the income from any property passing to Marital Trust. Therefore, the property interest passing outright to Spouse will be a nonterminable interest and the property interest passing to Marital Trust will be treated as a nonterminable interest if it otherwise satisfies the requirements of § 2056(b)(7). The requirement that Spouse make a timely election is "a mere procedural formality" *Tompkins*, 68 T.C. at 917, and is not a contingency within the meaning of § 2056(b)(1).
>
> Consequently, based on the facts submitted and the representations made, we conclude that Spouse's right to elect under section 3A(7) of Revocable Trust is not a "contingency" within the meaning of § 2056(b)(1). The Revocable Trust property actually distributed outright to Spouse and to Marital Trust (if it otherwise satisfies the requirements of § 2056(b)(7)) will be "property which passes from the decedent to his surviving spouse," for purposes of § 2056(a).

Letter Ruling 8735003 held that a no-contest clause did not preclude the marital deduction. Letter Ruling 8735003 involved the following provision:

> I hereby direct and expressly provide that it shall be a condition precedent to the taking, vesting, receiving or enjoyment of any property, benefit, or thing whatsoever under and by virtue of this Will, that no such devisee or legatee shall in any manner contest the probate thereof, or question or contest the same, or any part or clause thereof, in any judicial proceeding, and I further will and provide that, should any such devisee or legatee so contest or question, or in any manner aid in such contesting or questioning, such devisee or legatee shall thereupon lose and forfeit all right to any benefit and all right or title to any property or thing herein directly or indirectly devised or bequeathed to said devisee and legatee, and same shall thereupon vest in such of my devisees or legatees herein as do not so question or contest, or give aid in such questioning or contesting of, this Will or the probate or any clause or provision thereof, in the same proportion as to value in which they otherwise take in value of my estate under this Will.

Letter Ruling 8735003 cited Reg. § 20.2056(e)-2(c), *Tompkins*, Rev. Rul. 82-184, and *Mackie*. After that, it said:

> Under local law, forfeiture provisions in a will are strictly construed and a forfeiture of property interests will be avoided by the Texas courts unless the acts of the parties come strictly within the express terms of the forfeiture clause. Accordingly, the local courts have generally held that an action or proceeding for the construction of a will in which a beneficiary participates does not bring the beneficiary within the provision of a forfeiture provision. See, for example, the following cases where a state court held that a forfeiture clause was not applicable (1) where the decedent's granddaughter sued to obtain a fee simple title to property devised by will and the court held that the suit was brought to construe the decedent's will [*Roberts v. Chisum*, 238 S.W.2d 822 (Tex. Civ. App., 1951)]; and (2) where beneficiaries under a will sued to have provisions of the decedent's will devising real estate among four persons construed to ascertain the decedent's intent [*Reed v. Reed*, 569 S.W.2d 645 (Tex. Civ. App., 1978)].
>
> In the present case, C could either (1) accept the terms of B's will, or (2) contest the provisions of B's will. C chose the former course of action. Although under Texas law a will contest by C might result in a forfeiture of the assets C would otherwise receive under B's will, the existence of this option does not convert what are otherwise fee property interests into nondeductible terminable interests. The court in *Tompkins*, *supra*, found no substantial difference between an elective testamentary bequest of a nonterminable interest which relates back to the testator's date of death and a spouse's election against a will under state law. Similarly, we see no reason to distinguish a situation where a surviving spouse has a choice between accepting a testamentary bequest or challenging the provision of her husband's will in order to obtain her statutory share. In each situation, the beneficiary has a choice between two groups of assets. Furthermore, all interests that C received under B's will were in all respects nonterminable interests, that is, they were fee interests in property that C could transfer by gift or by will. Accordingly, the principles described in *Tompkins*, *Mackie*, section 20.2056(e)-2(c) of the regulations, and Rev. Rul. 82-184 are applicable to this case. Thus the value of the assets that C received under Articles III and VI of B's will are deductible under section 2056(a) of the Code.

A right of first refusal to buy at fair market value stock that a QTIP Trust sells upon the surviving spouse's demand did not disqualify a QTIP trust.[3787] A thirty day period in which to exercise a right of first refusal is not an unreasonable burden on a spouse's right to make a QTIP trust productive.[3788]

[3787] Letter Ruling 199951029 held:

> If Spouse requests the trustee to convert the stock into income producing property, Grantor's children have the right of first refusal to purchase the stock at its fair market value as determined by an independent appraisal and under such terms and conditions as would be agreed upon by parties dealing at arm's length. This restriction does not prevent the trust from receiving full value for the stock if the stock is sold to the children, nor does it restrict the trustees' ability to sell the stock.

[3788] Letter Ruling 8931005 held:

> Given the fact that Corporation is a closely-held entity and the Children's Trust (owner of the controlling interest) is one of the most likely purchasers of the minority interest held by the Marital Trust, we do not consider the thirty day right of first refusal to place an undue burden on the ability of Spouse to require that the trust corpus be made productive.

Here is an example of another business interest that qualified:[3789]

> The surrounding circumstances also manifest Taxpayer's intention that, after his death, Marital Trust should produce for Spouse during her life that degree of beneficial enjoyment of the LLC Preferred Units which the principles of the law of trusts accord to a person who is unqualifiedly designated as the life beneficiary of a trust. Under the terms of Operating Agreement, as the owner of LLC Preferred Units, Marital Trust will be entitled to an eight percent return on the aggregate face value of its LLC Preferred Units, payable no less often than annually. LLC cannot redeem Marital Trust's LLC Preferred Units for less than the greater of their face value or fair market value. In addition, without the affirmative vote or consent of all of the Preferred Members, LLC's Voting Common Members cannot amend, restate, alter or repeal Operating Agreement whether by merger, consolidation or otherwise so as to directly materially and adversely affect any right or preference of the Preferred Units or Preferred Unit holders.
>
> Moreover, the sale of LLC Preferred Units is not unreasonably restricted. At the written request of Spouse, the trustee of Marital Trust may sell the LLC Preferred Units to permitted purchasers without the consent of other LLC Members. Subject only to reasonable administrative restrictions, these purchasers will become substitute Preferred Members. The permitted purchases are other Members of LLC, Taxpayer's children, and Qualified Institutional Investors (as defined by Operating Agreement). Taxpayer has demonstrated that a substantial number of Qualified Institutional Investors currently own interests in B and that they are common purchasers of REITs. With respect to the actual receipt of income from an investment in B, an indirect owner of interests in B who owns LLC Preferred Units is in a similar position as a direct owner of interests in B because LLC is required to distribute an eight percent preferred return annually to owners of LLC Preferred Units.

In contrast to concerns about a buy-sell agreement reducing the marital deduction, an agreement benefitting the surviving spouse may qualify for the marital deduction. In *Estate of Lauder v. Commissioner*, T.C. Memo. 1994-527, the court largely disregarded a buy-sell agreement in valuing stock for purposes of estate inclusion and significantly increased the value. The court held:

> We agree with respondent that, in light of our holding in *Estate of Lauder v. Commissioner*, T.C. Memo. 1992-736, it would be anomalous if particular portions of the shareholder agreement are now deemed relevant to the question of the fair market value of decedent's stock. At the risk of belaboring the point, our responsibility is to determine the fair market value of decedent's stock on the date of his death. In our prior opinion, we resolved that the formula price was intended to serve a testamentary purpose, and thus would not be respected for Federal estate tax purposes. It is worth noting at this point that we have not had the opportunity to address the validity of each and every aspect of the shareholder agreement. Nonetheless, we repeat the observation made earlier in these proceedings that there is no evidence in the record that the Lauders engaged in arm's-length negotiations with respect to any aspect of the shareholder agreement. Absent proof on the point, we presume that all aspects of the agreement, particularly those tending to depress the value of the stock, are tainted with the same testamentary objectives rendering the formula price invalid.[24]

[3789] Letter Ruling 201410011.

[24] We note with interest Lehman Brothers' conclusion that neither EJL nor the Lauders would qualify for the "Aa" credit rating used under article 6.3 of the shareholder agreement to set the interest rate to be paid on the 20-year debentures described therein. See *supra* note 19. While the Lauders certainly were free to adopt any rate of their choosing, the fact remains that the record is devoid of any evidence that the Lauders negotiated with respect to this aspect of the shareholder agreement. Shutzer testified that he did not inquire how the Lauders arrived at that credit rating. Given the state of the record, and consistent with our holdings in *Estate of Lauder v. Commissioner*, 1992-736, we will not permit petitioner to cite that aspect of the agreement as a factor depressing the value of decedent's stock.

In light of our holding in *Estate of Lauder v. Commissioner*, T.C. Memo. 1992-736, we hold that the specific provisions of the shareholder agreement are not relevant to the question of the fair market value of decedent's stock on the valuation date. Simply put, the willing buyer/willing seller analysis that we undertake in this case would be distorted if elements of such testamentary origin are injected into the determination.

Petitioner attempts to breathe new life into the shareholder agreement by pointing out that we declined to declare the agreement invalid per se in our most recent Memorandum Opinion. Petitioner's reliance on this aspect of our prior opinion is misplaced. Simply put, whether a particular shareholder agreement constitutes a binding contract between the parties to the agreement begs the purely legal question of whether the agreement, or any of its provisions, will be respected in determining the fair market value of the affected stock for purposes of the Federal estate tax. See, *e.g.*, *St. Louis County Bank v. United States*, 674 F.2d 1207, 1210 (8th Cir. 1982). As indicated above, we cannot agree that particular aspects of such an agreement can be employed to depress the fair market value of the subject stock (and thereby avoid Federal estate tax) where it is evident that the agreement was adopted primarily as a testamentary device. Further, it is on this basis that we distinguish *Estate of Hall v. Commissioner*, 92 T.C. 312, 335 (1989), the case relied upon by petitioner to support its contention that the shareholder agreement is relevant to the question of fair market value.

This is not to say, however, that the existence of the 1976 shareholder agreement can be completely ignored or written out of the record. our perspective, the shareholder agreement affirmatively demonstrates the Lauders' commitment to maintain family control over EJL. This element is properly accounted for below as a component of the discount applied to reflect the lack of a public market for EJL stock.

The court also held that, because the surviving spouse was entitled to the benefit of this increased value under the buy-sell agreement, the estate received a marital deduction for it (highlighting toward the end added to support a comment following the quote):

We likewise must consider petitioner's second alternative contention that the estate is entitled to a marital deduction under section 2056(a).[28] Petitioner argues that a marital deduction is warranted on the theory that decedent indirectly passed a valuable property interest to his wife, Estee, by virtue of the transfer of his stock to EJL at a price below fair market value. Estee owned 10,230 shares of EJL common stock on the date of decedent's death. Focusing on the enhanced value of Estee's stock following the transfer of decedent's stock to EJL, petitioner asserts that the estate is entitled to a marital deduction equal to 39.26 percent of $21,443,544 — the difference between

$50,494,344 (the fair market value of decedent's stock as determined by this Court) and $29,050,800 (the value of the stock as reported on the estate tax return.[29]

[28] Sec. 2056(a) and (c) provides in pertinent part:

(a) Allowance of Marital Deduction. — For purposes of the tax imposed by section 2001, the value of the taxable estate shall, except as limited by subsection (b) [relating to terminable interests], be determined by deducting from the value of the gross estate an amount equal to the value of any interest in property which passes or has passed from the decedent to his surviving spouse, but only to the extent that such interest is included in determining the value of the gross estate. ***

(c) Definition. — For purposes of this section, an interest in property shall be considered as passing from the decedent to any person if and only if —

(1) such interest is bequeathed or devised to such person by the decedent;

(2) such interest is inherited by such person from the decedent; ***

(4) such interest has been transferred to such person by the decedent at any time;

[29] The 39.26 percent figure that petitioner uses in this computation represents Estee's share of all outstanding EJL common stock (both voting and nonvoting) following decedent's death.

Petitioner is unable to cite any authority directly supporting its marital deduction argument. Rather, petitioner relies on Federal gift tax cases analyzing the impact of an inter vivos transfer of assets to a corporation for less than an adequate and full consideration. See *Kincaid v. United States*, 682 F.2d 1220 (5th Cir. 1982); *Ketteman Trust v. Commissioner*, 86 T.C. 91 (1986); see also sec. 25.2511-1(h), Gift Tax Regs; Rev. Rul. 71-443, 1971-2 C.B. 338 (where the Commissioner determined that a *section 2523*(a) gift tax marital deduction would be available under somewhat analogous circumstances). Citing the rule of statutory construction that the Federal estate and gift tax provisions are interpreted in pari materia, see *Estate of Sanford v. Commissioner*, 308 U.S. 39, 44 (1939), petitioner concludes that an interest in property passed to Estee such that the estate is entitled to a marital deduction under section 2056(a).[30]

[30] Petitioner also argues that a marital deduction is warranted to avoid the possibility of double taxation to the extent the amount in question will be included in both decedent's Federal gross estate and in Estee's gross estate upon her death.

Respondent maintains that petitioner is attempting to extend the marital deduction provision beyond its intended scope. Respondent reasons that petitioner's argument should be denied on the theory that, because Estee will eventually be required to offer her stock to EJL at the formula price, any property interest purportedly passing to her is illusory. In conjunction with the foregoing, respondent concludes that the interest in question is a terminable interest under section 2056(b).

> Section 2056(a) provides that the taxable estate shall be determined by deducting from the value of the gross estate an amount equal to the value of any interest in property which passes or has passed from the decedent to his surviving spouse, but only to the extent that such interest is included in determining the value of the gross estate and excepting any terminable interest as described in section 2056(b). While we recognize that the marital deduction is strictly construed, see *Commissioner v. Estate of Bosch*, 387 U.S. 456, 464 (1967), we nevertheless agree with petitioner that the estate is entitled to a marital deduction under the circumstances presented.
>
> To briefly recapitulate, we determined that the fair market value of decedent's EJL stock exceeded the value assigned to the stock by petitioner on its Federal estate tax return. Because the difference, $21,443,544, will be included in decedent's gross estate, it follows that the first element required for the deduction under section 2056(a) is satisfied.
>
> Additionally, we are persuaded by petitioner's argument that an interest in property passed (albeit indirectly) from decedent to his surviving spouse, Estee, as a result of the transfer of decedent's stock to EJL at the formula price. We first note that there is no requirement in section 2056 that an interest must pass directly to the surviving spouse in order to qualify for the marital deduction. See sec. 2056(c); *Harter v. Commissioner*, 39 T.C. 511 (1962); Stephens et al., *Federal Estate and Gift Taxation*, para. 5.06[3][a], at 5-71 (6th ed. 1991). Further, we agree with petitioner that Federal gift tax cases such as *Ketteman Trust v. Commissioner*, *supra*, are sufficiently analogous to lend support to their argument that an interest in property passed to Estee and the remaining shareholders. Respondent has not convinced us otherwise. We likewise find it significant that respondent has permitted a marital deduction for purposes of the Federal gift tax under comparable circumstances. See *Estate of Higgins v. Commissioner*, T.C. Memo. 1991-47; Rev. Rul. 71-443, supra.
>
> Thus, we are left with respondent's argument that the estate should be denied the marital deduction on the ground that any property interest deemed to have passed to Estee constitutes a terminable interest under section 2056(b). Although Estee agreed to offer her EJL stock to the company under the shareholder agreement, the fact remains that Estee generally will be subject to a Federal transfer tax should she or her estate transfer the stock for less than an adequate and full consideration. We cannot agree that such an interest is a terminable interest.
>
> In sum, we are convinced that the technical requirements of section 2056(a) are satisfied. We are also persuaded that allowing a marital deduction under the circumstances presented is compatible with the policies underlying the provision.

In the text highlighted above, note the court's view that, if a shareholder agreement is testamentary in nature, a bargain sale required under the agreement would constitute a gift.[3790]

An earlier case also successfully sought to protect the marital deduction. In *Dickinson v. Commissioner*, 63 T.C. 771 (1975), the Official Tax Court Syllabus summarized the case:

> D, who owned most of the stock of C, entered into an agreement providing that his estate would sell such stock to C and that C would purchase it at its book value.

[3790] See fn 4585 in part II.Q.4.h Establishing Estate Tax Values.

> Subsequently, D entered into a second agreement with the other shareholders of C providing that if the Commissioner of Internal Revenue disregarded the book value of the stock for estate tax valuation purposes, they would release the estate from the first agreement, if requested to do so. The Commissioner has taken the position, and the estate agrees, that the stock of C should be includable in the estate at its fair market value, and not its book value. *Held*, the second agreement is to be given effect in administering the estate, and the parties are released from the obligations under the first agreement.

Dickinson is quoted more fully in the text following fn 7044 part III.B.3.o *Procter* and Other Cases.

II.O.2.d. Marital Trusts - S Corporations

When a business passes to a surviving spouse in a trust, a QSST or an ESBT election must be made.

Testamentary QTIP trusts generally qualify as QSSTs, and QSSTs often have more favorable income tax effects than ESBTs.

See parts III.A.3.c.iii Deadlines for QSST and ESBT Elections and III.A.3.e QSSTs and ESBTs (including part III.A.3.e.i.(b) QSST Issues When Beneficiary Dies).

II.O.2.e. Marital Deduction Trusts - Discount Planning

Much of the discussion below assumes that valuation reduction is good. That is not necessarily the case; see part II.H Income Tax vs. Estate and Gift Tax (Particularly for Depreciable Property), including part II.H.3 Valuation Discounts – Friend or Enemy. Accordingly, consider whether to plan to avoid valuation discounts, as needed.

Minority and fractional discounts for closely-held businesses and marital trusts need to be considered in estate planning as well. When spouses together own a majority in a business under community property laws, they will be considered to own one-half of that interest, and thus will be entitled to discounts for lack of control in determining their estate value.[3791] Additionally, fractional interest discounts may come into play when property interests are divided between a QTIP trust and a spouse. For example, if the surviving spouse owns 60% of a business and the remaining 40% is held in a QTIP trust, one might assume discounts for lack of control will not come into play when the second spouse dies. However, courts have held that the spouse's estate will be entitled to a discount for lack of control by disaggregating the QTIP trust from the spouse's other assets (in this example, providing a discount for lack of control for the QTIP stock).[3792] However, this disaggregation would not apply to a general power of appointment marital trust (Code § 2056(b)(5)).[3793]

Another issue arises when a business owner has a controlling interest in the company and bequeaths some portion of that interest to his spouse. Upon the owner's death, the full controlling interest value must be included in determining the owner's gross estate, and the estate will be entitled to some marital deduction for the portion passing to the spouse. However,

[3791] See *Estate of Bright v. U.S.*, 658 F.2d 999 (5th Cir. 1981).
[3792] See *Estate of Bonner v. U.S.*, 84 F.3d 196 (5th Cir. 1996); *Estate of Mellinger v. Commissioner*, 112 T.C. 26 (1999); *Nowell v. Commissioner*, T.C. Memo. 1999-15.
[3793] *Estate of Fontana v. Commissioner*, 118 T.C. 318, 322 (2002).

that deduction is based on what passes to the spouse, not what is included in the estate. In *Estate of Chenoweth v. Commissioner*,[3794] the decedent owned 100% of a business and left his spouse a 51% interest. The IRS claimed the highest marital deduction the estate could take was 51% of the full value of the business included in the gross estate, but the estate claimed it should be entitled to increase the deduction by some control premium. The court ruled that the estate should be entitled to attempt to prove the increased value and that no rule required that the marital deduction amount equal the value the property was assigned when included in the gross estate. While this holding can lead to a potential tax advantage for an estate, it also has a potentially negative effect. What if the decedent owned a controlling interest but passed a minority interest to the spouse? In this case, the marital deduction will be based on the value of the minority interest, even though the full value of the interest will be used in calculating the gross estate.[3795] This same result can occur in the charitable contribution deduction context, when a decedent leaves a minority interest in stock to a charity.[3796] Thus, estate planners need to be aware of this whipsaw effect when determining how the estate will be divided.[3797] For

---

[3794] 88 T.C. 1577 (1987).

[3795] TAM 9403005. In *Estate of Frank M. DiSanto v. Commissioner*, T.C. Memo 1999-421, the decedent had a controlling interest and a non-controlling interest passed to the surviving spouse, creating a mismatch between inclusion and deduction.

[3796] See generally *Estate of Schwan v. Commissioner*, T.C. Memo 2001-174 (taking into account post-mortem transformations occurring in funding a charitable bequest).

[3797] Steve Akers of Bessemer Trust has a post-mortem outline that, as of 2/8/2014, included the following as possible solutions:

> * Have the executor to fund the marital bequest with a note. The residuary estate would then be burdened with the note as a liability that would be distributed along with the residuary assets to the residuary beneficiaries.
>
> A strategy that may have worked previously: Have someone purchase a minority interest from the estate within the first six months, and elect the alternate valuation date. If the remaining interest is a minority interest, the alternate valuation date values would reflect minority interest values in the estate. Alternatively, consider merely distributing minority block of stock, and value the block distributed (minority interest) and the remaining block of stock in the estate at the end of the six month period (which might also be a minority interest). See Treas. Reg. § 20.2032-1(c)(1)(phrase distributed, sold, exchanged or otherwise disposed of includes surrender of stock in complete or partial liquidation of a corporation but not mere changes in form such as a transfer of assets to a corporation in a manner that no gain or loss is recognizable under § 351); *Kohler v. Comm'r*, T.C. Memo 2006-152, nonacq. AOD 2008-001 (tax-free reorganization is not a disposition that accelerates alternate valuation date). Proposed regulations prohibit this strategy, with an effective date of when the regulation is finalized. Prop. Treas. Reg. § 20.2032-1(h).
>
> * For fractional interests in real estate, use a co-ownership agreement at the first spouse's death that will eliminate the discount, by providing that either co-tenant can sell the property and distribute the proceeds pro rata.
>
> * For stock, use a pro rata funding but have a shareholder agreement that will eliminate the discount (by giving the marital legatee the right to liquidate the company or otherwise have control).
>
> * Sell the majority interest to a Family Trust for a note, then fund the Marital Trust with a part of the note, and fund the Family Trust with the balance of the note (which the Family Trust would then owe to itself).
>
> * Distribute a majority interest in an asset (that exceeds the marital bequest amount) to the Marital Trust, and have the Marital Trust give the estate back a note for the excess value. (For example, assume there is a $2MM Family Trust and a $8MM Marital Trust and the only asset is a 51% interest in a closely held company that is worth $10MM. If the Marital Trust is funded with 8/10 of the 51% interest, it will not be worth $8MM. Fund the Marital Trust with the entire 51% controlling interest, and have the Marital Trust give a note back to the estate for $2MM. The

example, if a controlling interest is to be divided among charities, with each receiving a minority interest, the IRS might argue that the bequest to each receives a minority discount; instead, consider (a) bequeathing the controlling interest to a private foundation for the benefit of those charities, or (b) including a direction to sell the business interest and distribute the proceeds, perhaps giving the charities an option to take in kind.

II.O.3. Effect of Buy-Sell on Charitable Estate Tax Deduction

If a decedent owns voting and nonvoting shares, the shares are valued together as a single block; however, if the charitable bequest is a specific bequest of stock that is less than the combined block, the charitable deduction is based on the block it actually received. *Ahmanson Foundation v. United States*, 674 F.2d 761 (9th Cir. 1981). In that case, the sole share of voting stock was specifically bequeathed to a noncharitable beneficiary, and ninety-nine shares of nonvoting stock were specifically bequeathed to charity. The court reasoned:

> The Foundation argues that it makes no difference if we conclude, as we did in section II, that the gross estate should include the value of the 600 HFA shares in the hands of Ahmanson, because the 99 nonvoting shares must have the same value for the charitable deduction as they have in the gross estate. The Foundation argues that inconsistent valuations, for these two purposes, would be incompatible with the orderly administration and application of the estate tax law. There is, certainly, an initial plausibility to the suggestion that fairness dictates that the same method of valuation be used in computing the gross estate and the charitable deduction. This initial plausibility, however, does not survive a close second look.
>
> The statute does not ordain equal valuation as between an item in the gross estate and the same item under the charitable deduction. Instead, it states that the value of the charitable deduction shall not exceed the value of the transferred property required to be included in the gross estate. 26 U.S.C. § 2055(d). Moreover, the statutory scheme specifically requires a lower valuation for the charitable deduction than for the same item within the gross estate under certain circumstances. If the alternate valuation date is used and the property becomes more valuable by virtue of a contingency occurring between the date of death and the alternate valuation date, the higher value is included in the gross estate, but the lower value is used in computing the charitable deduction. 26 U.S.C. § 2032(b).
>
> In light of the purpose of the charitable deduction to encourage gifts to charity, it seems doubtful that Congress intended to give as great a charitable deduction when the testamentary plan diminishes the value of the charitable property as it would when the testamentary plan conveys the full value of the property to the charity intact. That is, the intent of encouraging charitable gifts suggests the further policy of encouraging greater rather than lesser charitable gifts. By severing the voting power of the stock from its economic entitlement, and giving only the economic entitlement to charity, Ahmanson

---

Marital Trust might later end up paying off the $2MM note with an interest in the company (which would be valued at a discount, thus requiring more shares than if there were no discount).

* Fund the bequest using a defined value formula conveyance. For example, a pecuniary bypass trust bequest could be funded by a conveyance having a defined value—reduced only by the amount necessary that will not result in an increased estate tax.

* To avoid the valuation problem on funding marital bequests, make the marital gifts during lifetime. In that event, there would not be a mismatch between the amount of the gift and the allowed marital deduction. (But lifetime gifts would lose the benefit of a basis step-up at death.)

> reduced the value of the stock to the charity. In the present case, the district judge found that the reduction in value was relatively small. Under other circumstances, however, the reduction in value might be substantial. The proper administration of the charitable deduction cannot ignore such differences in the value actually received by the charity.
>
> Thus there are compelling considerations in conflict with the initially plausible suggestion that valuation for purposes of the gross estate must always be the same as valuation for purposes of the charitable deduction. When the valuation would be different depending on whether an asset is held in conjunction with other assets, the gross estate must be computed considering the assets in the estate as a block. Otherwise, as discussed above, the testator would be able to produce an artificially low valuation by manipulatively disbursing complimentary assets into the hands of different beneficiaries—only to have those beneficiaries recombine the assets in their more valuable arrangements at some later time. The valuation of these same sorts of assets for the purpose of the charitable deduction, however, is subject to the principle that the testator may only be allowed a deduction for estate tax purposes for what is actually received by the charity—a principle required by the purpose of the charitable deduction.
>
> Therefore the district judge erred in concluding that the valuation of the 99 nonvoting shares of Ahmanco stock would be the same for the purpose of the charitable deduction and for purpose of the gross estate. The district judge should recompute the taxable estate, beginning with a value in the gross estate equal to the 100 shares of Ahmanco undiminished by the 3 percent reduction for the nonvoting status of the 99 shares. The charitable deduction should then be computed on the basis of that 3 percent decrease in value that resulted from the severance of the voting rights from these 99 shares.

Similarly, in *Estate of Warne v. Commissioner*, T.C. Memo. 2021-17:

> Upon her death, Miriam Warne's estate donated 75% of Royal Gardens to the Foundation and 25% to the Church. The Commissioner asserts that we should apply discounts for lack of control and marketability to the charitable contribution deductions attributable to the estate's donations to the Church and the Foundation. The Commissioner argues that the value of the deduction should reflect the benefit received by the respective donees.
>
> The estate insists that discounts are inappropriate and would subvert the public policy of motivating charitable donations. It claims that because 100% of Royal Gardens was included in the estate and the estate donated 100% of Royal Gardens to charities, the estate is entitled to a deduction of 100% of Royal Gardens' value. We disagree.
>
> Both parties cite *Ahmanson Foundation v. United States* for support.[39] In *Ahmanson*, the decedent owned (through a revocable trust) a corporation that had 100 shares. Only one of those shares was a voting share; the remaining 99 shares were nonvoting. The decedent bequeathed the one voting share to his son and the 99 nonvoting shares to a charitable foundation.[40] The Court of Appeals for the Ninth Circuit in *Ahmanson* stated that "[t]here is nothing in the statutes or in the case law that suggests that valuation of the gross estate should take into account that the assets will come to rest in several hands rather than one."[41] In other words, when valuing an asset as part of an estate, we value the entire interest held by the estate, without regard to the later disposition of that asset.

[39] *Ahmanson Found. v. United States*, 674 F.2d 761 (9th Cir. 1981). Because these cases are appealable to the Court of Appeals for the Ninth Circuit, we follow its approach. *Golsen v. Commissioner*, 54 T.C. 742, 756 (1970), *aff'd*, 445 F.2d 985 (10th Cir. 1971).

[40] *Ahmanson Found.*, 674 F.2d at 765-766.

[41] *Ahmanson Found.*, 674 F.2d at 768.

But when property is split as part of a charitable contribution, a different principle applies. "The valuation of these same sorts of assets for the purpose of the charitable deduction, however, is subject to the principle that the testator may only be allowed a deduction for estate tax purposes for what is actually received by the charity—a principle required by the purpose of the charitable deduction."[42] In short, when valuing charitable contributions, we do not value what an estate contributed; we value what the charitable organizations received.

[42] *Ahmanson Found.*, 674 F.2d at 772.

Taking these two principles together, the estate must include 100% of the value of Royal Gardens in the value of the estate, but the estate may deduct only the 25% and 75% interests received by the respective charities.

In its opinion, the Court of Appeals in *Ahmanson* cited section 2055(d), which provides that an estate's charitable contribution deduction for transferred property may not exceed that property's value in the gross estate.[43] It concluded that the estate's deduction attributable to the donation of the 99 nonvoting shares necessitated a 3% discount to account for the foundation's lack of voting rights.[44]

[43] *Ahmanson Found.*, 674 F.2d at 772.

[44] *Ahmanson Found.*, 674 F.2d at 772.

The estate asks us to distinguish its donation from the one in *Ahmanson*. It emphasizes that the voting share in Ahmanson went to the decedent's son and not a charitable organization. It claims that because Miriam Warne donated 100% of Royal Gardens' value to charitable organizations, a discount should not apply. However, whether a charitable organization or an individual received the 75% interest in Royal Gardens does not affect the value of the Church's interest, and it is the value of the property received by the donee that determines the amount of the deduction available to the donor.

A discount applies to the charitable contribution deduction for the estate's donation of Royal Gardens. The parties stipulated that a 27.385% discount is appropriate for the 25% interest. Likewise, the parties stipulated that a 4% discount also applies to the estate's 75% donation to the Foundation.

The decedent should have bequeathed all of her interest these LLCs to a donor-advised fund or other charity that directed distribution to her desired charities.

When the trustee caused controlling stock bequeathed to charity to be redeemed for a value based on discounts for lack of control, the charitable deduction was correspondingly reduced, and the estate was assessed penalties.[3798]

Also, consider providing that, if the IRS determines that a fixed price redemption as of date of death is below fair market value as of date of death, the estate can rescind the sale.[3799]

II.O.4. Effect of Buy-Sell on Reasonable Compensation Arguments

In recharacterizing deductible compensation as nondeductible dividends, the Tax Court in 2016 held that an independent investor[3800] would have demanded a return on investment as a shareholder.[3801]

In that particular case, the net book value, determined on a cash basis, was sufficient to justify the IRS' conclusion that a particular portion of distributions constituted dividends. Consider, however, that a buy-sell agreement might constitute evidence of a company's value that might support an IRS attack asserting that the corporation's value is higher and that therefore distributions taxable as nondeductible dividends should be higher:

- Generally, a business is worth the present value of its future profits, as they are distributed annually or upon liquidation.[3802]

[3798] *Estate of Dieringer v. Commissioner*, 146 T.C. No. 8 (2016), reasoning:

> We do not believe that Congress intended to allow as great a charitable contribution deduction where persons divert a decedent's charitable contribution, ultimately reducing the value of property transferred to a charitable organization. This conclusion comports with the principle that if a trustee is empowered to divert the property … to a use or purpose which would have rendered it, to the extent that it is subject to such power, not deductible had it been directly so bequeathed … the deduction will be limited to that portion, if any, of the property, or fund which is exempt from an exercise of the power. Sec. 20.2055-2(b)(1), Estate Tax Regs. Eugene and his brothers thwarted decedent's testamentary plan by altering the date-of-death value of decedent's intended donation through the redemption of a majority interest as a minority interest.
>
> The trust did not transfer decedent's bequeathed shares nor the value of the bequeathed shares to the foundation. Accordingly, we hold that the estate is not entitled to the full amount of its claimed charitable contribution deduction.

In sustaining the penalty, the court reasoned:

> DPI's lawyer's advice regarding the charitable contribution deduction was based on an errant appraisal. The date-of-death appraisal and the redemption appraisal--performed only seven months apart--differed substantially in value. The estate knew that a significant percentage of the value of decedent's bequeathed shares was not passing to the foundation and that Eugene and his brothers were acquiring a majority interest in DPI at a discount.

[3799] *Estate of Dickinson v. Commissioner*, 63 T.C. 771 (1975), rejecting the IRS' reliance on *Procter*, prevented the IRS from nailing the taxpayer with circular marital and charitable deduction disallowances. See fn 7044 and accompanying and following text in part III.B.3.o *Procter* and Other Cases.

[3800] Many cases have looked to the independent investor test in determining reasonable compensation. See fn. 31.

[3802] See part III.E Fairness Within Families; Valuation.

- Therefore, if a company has no profits, it has no value. Conversely, if a company has value but does not report profits, then presumably either the value is based on expected future profits based on efforts that have not yet generated results or the expenses are overstated.

- Appraisals of controlling interests in business often adjust compensation to what the appraisers believe is reasonable. These appraisals might be dangerous to a C corporation, that does not want its compensation deductions to be denied.

C corporation owners often assert that compensation to zero out income is reasonable, yet the business has value to an investor. The IRS might asset that the latter is an admission of value on which dividends should be paid. An advisor might consider addressing this issue very directly with the client and revisiting choice of entity in light of a possible intellectual inconsistency that might come back to bite the taxpayer in the long run.

A seller-financed buyout is best done using a partnership,[3803] so consider converting to a partnership to avoid these issues,[3804] which does not necessarily mean paying otherwise avoidable self-employment tax.[3805] If converting to a partnership is not acceptable, consider making an S election.[3806]

II.P. Operations

Taxation of operations focuses on whether income from operations is taxed to the entity or to its owner(s), effect of contributed property on taxation of operations, to what extent are FICA taxes imposed, and miscellaneous issues.

II.P.1. Income Taxation of Operations

II.P.1.a. Allocations of Income in Partnerships and S Corporations

Partnership income taxation of owners is more complex but more flexible than S corporation income taxation of owners. Defining the ownership in a partnership can be challenging.[3807] Although receiving K-1s after the original due date of a return is aggravating, a taxpayer who uses estimates rather than actual K-1 amounts can be penalized.[3808]

II.P.1.a.i. Allocations of Income in Partnerships

II.P.1.a.i.(a). General Rules for Allocations of Income in Partnerships

Allocation of income, gain, loss, deductions and credits among partners are governed by Code § 704(b) and Reg. § 1.704-1. These provisions set up a rule that requires the allocation of such income, gain, loss, deduction, or credit to have substantial economic effect or to be in accordance with the partner's interest in the partnership. These rules are set up to ensure that, when a partner is allocated income, the partner is able to enjoy the economic benefit associated with that income, or that when he is allocated economic loss, the partner suffers the burden of that loss. This allocation is usually achieved through the use of partner capital accounts, that, in most basic terms, are increased by a partner's contributions or share of income and are decreased by distributions or the partner's share of a loss.[3809] The goal of the capital account is to track the distribution amount a partner would receive if the partnership sold all of its assets at book value, paid off all liabilities, and then distributed any remaining cash to the partners in liquidation of the partnership.

Allocations of gross income in preferred partnerships would tend to be based on the ratio of a partnership's overall distributive share of profit for the year, divided by all partners' distributive share of profit for the year, unless special allocations with substantial economic effect provide otherwise.[3810]

Losses that generate or exacerbate a negative capital account complicate the issue. If a partner has a deficit balance in the partner's capital account following the liquidation of the partner's interest in the partnership, as determined after taking into account all capital account adjustments for the partnership taxable year during which the liquidation occurs (other than those made pursuant to this sentence and the following sentence), the partner is unconditionally obligated to restore the amount of the deficit balance to the partnership by the end of such taxable year (or, if later, within 90 days after the date of such liquidation), which amount shall, upon liquidation of the partnership, be paid to creditors of the partnership or distributed to other partners in accordance with their positive capital account balances (in accordance with

---

[3809] Reg. § 1.704-1(b)(2)(iv). A partner's capital account is increased by the fair market value, not basis, of assets that partner contributes. Reg. § 1.704-1(b)(2)(iv)(d). The fair market value assigned to property contributed to a partnership, property distributed by a partnership, or property otherwise revalued by a partnership, will be regarded as correct, provided that (1) such value is reasonably agreed to among the partners in arm's-length negotiations, and (2) the partners have sufficiently adverse interests. Reg. § 1.704-1(b)(2)(iv)(h)(1). In calculating book-tax differences under Code § 704(c), A partnership may use different methods with respect to different items of contributed property, provided that the partnership and the partners consistently apply a single reasonable method for each item of contributed property and that the overall method or combination of methods are reasonable based on the facts and circumstances and consistent with the purpose of Code § 704(c). Reg. § 1.704-3(a)(2). For events causing accounts to be revalued, see part II.C.7 Maintaining Capital Accounts, especially fn. 507.

[3810] See Banoff, FAQ-Filled Guidance on Computing a Partner's Interest in Profits, Losses, and Capital, *Journal of Taxation*, April 2009 (part one of two-part article) (see discussion of IRS FAQ1); see also Banoff, Identifying Partners' Interests in Profits and Capital: Uncertainties, Opportunities and Traps, *TAXES - The Tax Magazine* (3/1/2007).

Reg. § 1.704-1(b)(2)(ii)(b)(2)[3811]).[3812] Notwithstanding the partnership agreement, an obligation to restore a deficit balance in a partner's capital account, including an obligation described in Reg. § 1.704-1(b)(2)(ii)(c)(1),[3813] will not be respected for purposes of Reg. § 1.704-1 to the extent the obligation is disregarded under Reg. § 1.704-1(b)(2)(ii)(c)(4).[3814]

Reg. § 1.704-1(b)(2)(ii)(b)(4) provides:

> For purposes of paragraphs (b)(2)(ii)(b)(1) through (3) of this section, a partnership taxable year shall be determined without regard to section 706(c)(2)(A).

Reg. § 1.704-1(b)(2)(ii)(b)(5) provides:[3815]

> The requirements in paragraphs (b)(2)(ii)(b)(2) and (3) of this section are not violated if all or part of the partnership interest of one or more partners is purchased (other than in connection with the liquidation of the partnership) by the partnership or by one or more partners (or one or more persons related, within the meaning of section 267(b) (without modification by section 267(e)(1)) or section 707(b)(1), to a partner) pursuant to an agreement negotiated at arm's length by persons who at the time such agreement is entered into have materially adverse interests and if a principal purpose of such purchase and sale is not to avoid the principles of the second sentence of paragraph (b)(2)(ii)(a) of this section.

Reg. § 1.704-1(b)(2)(ii)(b)(6) provides:

> The requirement in paragraph (b)(2)(ii)(b)(2) of this section is not violated if, upon the liquidation of the partnership, the capital accounts of the partners are increased or decreased pursuant to paragraph (b)(2)(iv)(f) of this section as of the date of such liquidation and the partnership makes liquidating distributions within the time set out in the requirement in paragraph (b)(2)(ii)(b)(2) of this section in the ratios of the partners' positive capital accounts, except that it does not distribute reserves reasonably required

---

[3811] Reg. § 1.704-1(b)(2)(ii)(b)(2) provides:

> Upon liquidation of the partnership (or any partner's interest in the partnership), liquidating distributions are required in all cases to be made in accordance with the positive capital account balances of the partners, as determined after taking into account all capital account adjustments for the partnership taxable year during which such liquidation occurs (other than those made pursuant to this requirement (2) and requirement (3) of this paragraph (b)(2)(ii)(b)), by the end of such taxable year (or, if later, within 90 days after the date of such liquidation).

[3812] Reg. § 1.704-1(b)(2)(ii)(b)(3).

[3813] Reg. § 1.704-1(b)(2)(ii)(c)(1), "Other arrangements treated as obligations to restore deficits," provides:

> If a partner is not expressly obligated to restore the deficit balance in such partner's capital account, such partner nevertheless will be treated as obligated to restore the deficit balance in his capital account (in accordance with the requirement in paragraph (b)(2)(ii)(b)(3) of this section and subject to paragraph (b)(2)(ii)(c)(2) of this section) to the extent of—
>
> (A) The outstanding principal balance of any promissory note (of which such partner is the maker) contributed to the partnership by such partner (other than a promissory note that is readily tradable on an established securities market), and
>
> (B) The amount of any unconditional obligation of such partner (whether imposed by the partnership agreement or by state or local law) to make subsequent contributions to the partnership (other than pursuant to a promissory note of which such partner is the maker).

[3814] Reg. § 1.704-1(b)(2)(ii)(b)(3)

[3815] Code § 267(b), referred to below, is described in part II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses.

to provide for liabilities (contingent or otherwise) of the partnership and installment obligations owed to the partnership, so long as such withheld amounts are distributed as soon as practicable and in the ratios of the partners' positive capital account balances.

Reg. § 1.704-1(b)(2)(ii)(b)(7) provides:

See Examples 1.(i) and (ii), 4.(i), 8.(i), and 16.(i) of paragraph (b)(5) of this section for issues concerning paragraph (b)(2)(ii)(b) of this section.

Reg. § 1.704-1(b)(2)(ii)(c), "Obligation to restore deficit," provides:

(1) *Other arrangements treated as obligations to restore deficits*. If a partner is not expressly obligated to restore the deficit balance in such partner's capital account, such partner nevertheless will be treated as obligated to restore the deficit balance in his capital account (in accordance with the requirement in paragraph (b)(2)(ii)(b)(3) of this section and subject to paragraph (b)(2)(ii)(c)(2) of this section) to the extent of—

(A) The outstanding principal balance of any promissory note (of which such partner is the maker) contributed to the partnership by such partner (other than a promissory note that is readily tradable on an established securities market), and

(B) The amount of any unconditional obligation of such partner (whether imposed by the partnership agreement or by state or local law) to make subsequent contributions to the partnership (other than pursuant to a promissory note of which such partner is the maker).

(2) *Satisfaction requirement*. For purposes of paragraph (b)(2)(ii)(c)(1) of this section, a promissory note or unconditional obligation is taken into account only if it is required to be satisfied at a time no later than the end of the partnership taxable year in which such partner's interest is liquidated (or, if later, within 90 days after the date of such liquidation). If a promissory note referred to in paragraph (b)(2)(ii)(c)(1) of this section is negotiable, a partner will be considered required to satisfy such note within the time period specified in this paragraph (b)(2)(ii)(c)(2) if the partnership agreement provides that, in lieu of actual satisfaction, the partnership will retain such note and such partner will contribute to the partnership the excess, if any, of the outstanding principal balance of such note over its fair market value at the time of liquidation. See paragraph (b)(2)(iv)(d)(2) of this section. See Examples 1.(ix) and (x) of paragraph (b)(5) of this section.

(3) *Related party notes*. For purposes of paragraph (b)(2) of this section, if a partner contributes a promissory note to the partnership during a partnership taxable year beginning after December 29, 1988, and the maker of such note is a person related to such partner (within the meaning of § 1.752-4(b)(1)), then such promissory note shall be treated as a promissory note of which such partner is the maker.

(4) *Obligations disregarded*.

(A) *General rule*. A partner in no event will be considered obligated to restore the deficit balance in his capital account to the partnership (in accordance with the requirement in paragraph (b)(2)(ii)(b)(3) of this section) to the extent such partner's obligation is a bottom dollar payment obligation that is not recognized under § 1.752-2(b)(3) or is not legally enforceable, or the facts and circumstances otherwise indicate a plan to circumvent or avoid such obligation. See paragraphs (b)(2)(ii)(f), (b)(2)(ii)(h), and (b)(4)(vi) of this section for other rules regarding such obligation. To the extent a partner is not considered obligated to restore the deficit balance in the partner's capital account to the partnership (in accordance with the requirement in paragraph (b)(2)(ii)(b)(3) of this section), the obligation is disregarded and paragraph (b)(2) of this section and § 1.752-2 are applied as if the obligation did not exist.

(B) *Factors indicating plan to circumvent or avoid obligation*. In the case of an obligation to restore a deficit balance in a partner's capital account upon liquidation of a partnership, paragraphs (b)(2)(ii)(c)(4)(B)(i) through (iv) of this section provide a non-exclusive list of factors that may indicate a plan to circumvent or avoid the obligation. For purposes of making determinations under this paragraph (b)(2)(ii)(c)(4), the weight to be given to any particular factor depends on the particular case and the presence or absence of any particular factor is not, in itself, necessarily indicative of whether or not the obligation is respected. The following factors are taken into consideration for purposes of this paragraph (b)(2):

(i) The partner is not subject to commercially reasonable provisions for enforcement and collection of the obligation.

(ii) The partner is not required to provide (either at the time the obligation is made or periodically) commercially reasonable documentation regarding the partner's financial condition to the partnership.

(iii) The obligation ends or could, by its terms, be terminated before the liquidation of the partner's interest in the partnership or when the partner's capital account as provided in § 1.704-1(b)(2)(iv) is negative other than when a transferee partner assumes the obligation.

(iv) The terms of the obligation are not provided to all the partners in the partnership in a timely manner.

The rules about losses that generate or exacerbate a negative capital account are coordinated with those described in part II.C.3.c.ii.(a) Permanent Rules Allocating Economic Risk of Loss to Recourse Liabilities.

In most cases, however, those wanting partnership income taxation use a limited liability company or other entity that blocks personal liability and do not wish to have such a deficit restoration obligation (DRO). Instead of a DRO, a partnership agreement may contain a "qualified income offset."[3816] A "qualified income offset" is a provision that a partner who unexpectedly receives an adjustment, allocation, or distribution described in Reg. § 1.704-

[3816] Reg. § 1.704-1(b)(2)(ii)(d)(3).

1(b)(2)(ii)(d)(4),[3817] (5),[3818] or (6)[3819] will be allocated items of income and gain (consisting of a pro rata portion of each item of partnership income, including gross income, and gain for such year) in an amount and manner sufficient to eliminate such deficit balance as quickly as possible.[3820] (However, I am unsure that there is a consensus about what it means to unexpectedly receive such an adjustment, allocation, or distribution.) Allocations of items of income and gain made pursuant to the qualified income offset are deemed to be made in accordance with the partners' interests in the partnership if the partnership determines and maintains capital accounts under Reg. § 1.704-1(b)(2)(iv)[3821] and liquidating distributions are made in accordance with the positive capital account balances of the partners, as determined after taking into account various capital account adjustments[3822] for the partnership taxable year during which such liquidation occurs.[3823] (Once a loss is allocated, the partner also needs to satisfy various other rules to deduct the loss.[3824])

Special allocation rules govern contributions of property and the income, gain, loss, and deductions associated with contributed property. Under Code § 704(c), a contributed property's income, gain, loss, and deductions[3825] are allocated to all partners to account for differences between the partnership's basis in the property and the fair market value of the property at the

---

[3817] Reg. § 1.704-1(b)(2)(ii)(d)(4) provides for:

> Adjustments that, as of the end of such year, reasonably are expected to be made to such partner's capital account under paragraph (b)(2)(iv)(k) of this section for depletion allowances with respect to oil and gas properties of the partnership.

[3818] Reg. § 1.704-1(b)(2)(ii)(d)(5) provides for:

> Allocations of loss and deduction that, as of the end of such year, reasonably are expected to be made to such partner pursuant to section 704(e)(2), section 706(d), and paragraph (b)(2)(ii) of § 1.751-1.

[3819] Reg. § 1.704-1(b)(2)(ii)(d)(6) provides for:

> Distributions that, as of the end of such year, reasonably are expected to be made to such partner to the extent they exceed offsetting increases to such partner's capital account that reasonably are expected to occur during (or prior to) the partnership taxable years in which such distributions reasonably are expected to be made (other than increases pursuant to a minimum gain chargeback under paragraph (b)(4)(iv)(e) of this section or under § 1.704-2(f); however, increases to a partner's capital account pursuant to a minimum gain chargeback requirement are taken into account as an offset to distributions of nonrecourse liability proceeds that are reasonably expected to be made and that are allocable to an increase in partnership minimum gain.

[3820] Reg. § 1.704-1(b)(2)(ii)(d)(6).

[3821] Reg. § 1.704-1(b)(2)(ii)(b)(1).

[3822] Reg. § 1.704-1(b)(2)(ii)(b)(2).

[3823] Reg. § 1.704-1(b)(2)(ii)(d)(6).

[3824] See generally part II.G.4 Limitations on Losses and Deductions; Loans Made or Guaranteed by an Owner.

[3825] Regarding book-tax depreciation differences, see Reg. §§ 1.704-1(b)(2)(iv)(g)(3) (book depreciation) and 1.704-3 (accounting for book-tax differences). Amoni and Schmalz, Section 704(c): The Disparity Offset Method Provides Answers to Difficult Questions, *Journal of Taxation* (WG&L), Vol. 114, No. 4 (Apr. 2011), suggests a way to apply the mechanics of existing regulations in this area. For the impact on allocating depreciation deductions and a basic overview of some tax planning flexibility on that issue, see Lawson, Using Curative and Remedial Allocations to Enhance the Tax Benefits of FLPs, 36 *Estate Planning*, No. 8, 12 (August 2009); however, note that remedial allocations might be attacked under Reg. § 1.701-2(b) or under Reg § 1.704-3(a)(1), the latter added by T.D. 9485 (6/8/2010). Note also that special allocations for book purposes might raise Code § 2701 issues, an issue that is not discussed in that article, which focuses on allocations for income tax purposes. See III.B.7.b Code § 2701 Overview, and III.B.7.c, Code § 2701 Interaction with Income Tax Planning, for a discussion of Code § 2701.

time of its contribution.[3826] This allocation ensures that the right person, the contributing partner, will realize any net pre-contribution gain or loss.[3827]

Except for personal property included in the same general asset account of the contributing partner and the partnership under Code § 168,[3828] personal property with a basis equal to zero,[3829] certain inventory,[3830] and a securities partnership making certain reverse-Code § 704(c) allocations[3831] to gains and losses from qualified financial assets,[3832] Code § 704(c) and Reg. § 1.704-3 apply on a property-by-property basis.[3833] A partnership may use different methods with respect to different items of contributed property, provided that the partnership and the partners consistently apply a single reasonable method for each item of contributed property and that the overall method or combination of methods are reasonable based on the facts and circumstances and consistent with the purpose of Code § 704(c).[3834] Using one method for appreciated property and another method for depreciated property may

---

[3826] Code § 704(c)(1)(A).

[3827] The purpose of Code § 704(c) is to prevent the shifting of tax consequences among partners with respect to precontribution gain or loss. Reg. § 1.704-3(a)(1), which further provides:

> Under section 704(c), a partnership must allocate income, gain, loss, and deduction with respect to property contributed by a partner to the partnership so as to take into account any variation between the adjusted tax basis of the property and its fair market value at the time of contribution. Notwithstanding any other provision of this section, the allocations must be made using a reasonable method that is consistent with the purpose of section 704(c). For this purpose, an allocation method includes the application of all of the rules of this section (*e.g.*, aggregation rules). An allocation method is not necessarily unreasonable merely because another allocation method would result in a higher aggregate tax liability. Paragraphs (b), (c), and (d) of this section describe allocation methods that are generally reasonable. Other methods may be reasonable in appropriate circumstances. Nevertheless, in the absence of specific published guidance, it is not reasonable to use an allocation method in which the basis of property contributed to the partnership is increased (or decreased) to reflect built-in gain (or loss), or a method under which the partnership creates tax allocations of income, gain, loss, or deduction independent of allocations affecting book capital accounts. See § 1.704-3(d). Paragraph (e) of this section contains special rules and exceptions. The principles of this paragraph (a)(1), together with the methods described in paragraphs (b), (c) and (d) of this section, apply only to contributions of property that are otherwise respected. See for example § 1.701-2. Accordingly, even though a partnership's allocation method may be described in the literal language of paragraphs (b), (c) or (d) of this section, based on the particular facts and circumstances, the Commissioner can recast the contribution as appropriate to avoid tax results inconsistent with the intent of subchapter K. One factor that may be considered by the Commissioner is the use of the remedial allocation method by related partners in which allocations of remedial items of income, gain, loss or deduction are made to one partner and the allocations of offsetting remedial items are made to a related partner.

[3828] Reg. § 1.704-3(e)(2)(i).

[3829] Reg. § 1.704-3(e)(2)(ii).

[3830] Reg. § 1.704-3(e)(2)(iii) excludes:

> For partnerships that do not use a specific identification method of accounting, each item of inventory, other than qualified financial assets (as defined in paragraph (e)(3)(ii) of this section.).

[3831] For a description of reverse-Code § 704(c) allocations of gain on sale, see part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, especially fns. 5444-5447.

[3832] See part II.P.1.a.i.(b) Special Rules for Allocations of Income in Securities Partnerships.

[3833] Reg. § 1.704-3(a)(2).

[3834] Reg. § 1.704-3(a)(2).

be unreasonable.[3835] A new partnership formed as the result of the termination of a partnership under Code § 708(b)(1)(B) is not required to use the same method as the terminated partnership with respect to Code § 704(c) property deemed contributed to the new partnership by the terminated partnership under Reg. § 1.708-1(b)(1)(iv).[3836]

Code § 704(c)(1)(B) prevents a partner from avoiding Code § 704(c) gain or loss by contributing property and having the partnership turn around and distribute it to another partner.[3837]

A partner cannot erase the Code § 704(c) taint by transferring the partner's interest to a third party. When a partnership interest is transferred, any tax attributes associated with the interest travel from the old partner to the new partner, and the new partner becomes the "contributing partner."[3838]

In addition to allocating gain or loss, Code § 704(c) also requires allocations of depreciation and amortization related to contributed property.

Partnerships may revalue assets for book purposes when certain events occur, so that partners' capital accounts better reflect the partners' economic interests at the time of those events. The events may include: [3839]

- a contribution of money or other property (other than a de minimis amount) to the partnership by a new or existing partner as consideration for an interest in the partnership,
- the liquidation of the partnership,
- a distribution of money or other property (other than a de minimis amount) by the partnership to a retiring or continuing partner as consideration for an interest in the partnership, or
- the grant of an interest in the partnership (other than a de minimis interest), as consideration for the provision of services to or for the benefit of the partnership by an existing partner acting in a partner capacity, or by a new partner acting in a partner capacity or in anticipation of being a partner.[3840]

When the partnership adjusts capital accounts to reflect such an event:[3841]

- The adjustments must be based on the fair market value of partnership property on the date of adjustment.
- The adjustments must reflect the manner in which the unrealized income, gain, loss, or deduction inherent in such property (that has not been reflected in the capital accounts

[3835] Reg. § 1.704-3(a)(2).
[3836] Reg. § 1.704-3(a)(2).
[3837] See part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.
[3838] Reg. § 1.704-4(d)(2).
[3839] Reg. § 1.704-1(b)(2)(iv)(f)(5). See part II.C.7 Maintaining Capital Accounts, especially fn. 507.
[3840] This last bullet point generally refers to the issuance of a profits interest, as discussed in II.M.1 Taxation on Formation of Entity: Comparison between Partnership and Corporation.
[3841] Reg. § 1.704-1(b)(2)(iv)(f), which is reproduced in fn. 507 in part II.C.7 Maintaining Capital Accounts.

previously) would be allocated among the partners if there were a taxable disposition of such property for such fair market value on that date.

- The partnership agreement must require that the partners' capital accounts be adjusted (as provided in regulations) for allocations to them of depreciation, depletion, amortization, and gain or loss, as computed for book purposes, with respect to such property.

- The partnership agreement must require that the partners' distributive shares of depreciation, depletion, amortization, and gain or loss, as computed for tax purposes, with respect to such property be determined so as to take account of the variation between the adjusted tax basis and book value of such property in the same manner as under Code § 704(c).

- The adjustments must be made principally for a substantial non-tax business purpose on account of one of the events described above.

When this revaluation occurs, book-tax differences arise, not necessarily because of the contribution of property, but rather because the book value of the partnership's property has changed. Allocating the responsibility for these new book-tax differences is called a reverse-Code § 704(c) allocation.[3842] Partnerships are not required to use the same allocation method for reverse-Code § 704(c) allocations as for contributed property, even if at the time of revaluation the property is already subject to Code § 704(c) and Reg. § 1.704-3(a).[3843] In addition, partnerships are not required to use the same allocation method for reverse-Code § 704(c) allocations each time the partnership revalues its property.[3844] A partnership that makes allocations with respect to revalued property must use a reasonable method that is consistent with the purposes of Code § 704(b), (c).[3845] A partnership making adjustments under Reg. § 1.743-1(b) or 1.751-1(a)(2) must use Reg. § 1.704-3 to account for built-in gain or loss under Code § 704(c).[3846] Special rules apply to such allocations when goodwill or similar assets

---

[3842] Reg. § 1.704-3(a)(6)(i) provides:

> The principles of this section apply to allocations with respect to property for which differences between book value and adjusted tax basis are created when a partnership revalues partnership property pursuant to § 1.704-1(b)(2)(iv)(f) or 1.704-1(b)(2)(iv)(s) (reverse section 704(c) allocations).

For a description of reverse-Code § 704(c) allocations of gain on sale, see part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, especially fns. 5444-5447.

[3843] Reg. § 1.704-3(a)(6)(i).

[3844] Reg. § 1.704-3(a)(6)(i).

[3845] Reg. § 1.704-3(a)(6)(i).

[3846] Reg. § 1.704-3(a)(6)(ii).

are being amortized.[3847] Beware that a book-up resulting from a revaluation may shift nonrecourse liabilities,[3848] which can generate income tax.[3849]

Reg. § 1.704-1(b)(1)(vii), "Bottom line allocations," provides:

> Section 704(b) and this paragraph are applicable to allocations of income, gain, loss, deduction, and credit, allocations of specific items of income, gain, loss, deduction, and credit, and allocations of partnership net or "bottom line" taxable income and loss. An allocation to a partner of a share of partnership net or "bottom line" taxable income or loss shall be treated as an allocation to such partner of the same share of each item of income, gain, loss, and deduction that is taken into account in computing such net or "bottom line" taxable income or loss. See example (15)(i) of paragraph (b)(5) of this section.

Reg. § 1.704-1(b)(5), Example (15)(i), provides:

> JB and DK form a limited partnership for the purpose of purchasing residential real estate to lease. JB, the limited partner, contributes $13,500, and DK, the general partner, contributes $1,500. The partnership, which uses the cash receipts and disbursements method of accounting, purchases a building for $100,000 (on leased land), incurring a recourse mortgage of $85,000 that requires the payment of interest only for a period of 3 years. The partnership agreement provides that partnership net taxable income and loss will be allocated 90 percent to JB and 10 percent to DK, the partners' capital accounts will be determined and maintained in accordance with paragraph (b)(2)(iv) of this section, distributions in liquidation of the partnership (or any partner's interest) will be made in accordance with the partners' positive capital account balances (as set forth in paragraph (b)(2)(ii)(b)(2) of this section), and JB is not required to restore any deficit balance in his capital account, but DK is so required. The partnership agreement contains a qualified income offset (as defined in paragraph (b)(2)(ii)(d) of this section). As of the end of each of the partnership's first 3 taxable years, the items described in paragraphs (b)(2)(ii)(d)(4), (5), and (6) of this section are not reasonably expected to cause or increase a deficit balance in JB's capital account: In the partnership's first taxable year, it has rental income of $10,000, operating expenses of $2,000, interest expense of $8,000, and cost recovery deductions of $12,000. Under the partnership agreement JB and DK are allocated $10,800 and $1,200, respectively, of the $12,000 net taxable loss incurred in the partnership's first taxable year.

[3847] Rev. Rul. 2004-49 held:

> If, pursuant to § 1.704-1(b)(2)(iv)(f), a partnership revalues a section 197 intangible that was amortizable in the hands of the partnership, then the § 197 anti-churning rules do not apply and the partnership may make reverse § 704(c) allocations (including curative and remedial allocations) of amortization to take into account the built-in gain or loss from the revaluation of the intangible. If the revalued section 197 intangible was not amortizable in the hands of the partnership, then the partnership may make remedial, but not traditional or curative, allocations of amortization to take into account the built-in gain or loss from the revaluation of the intangible, provided that such allocations are not limited by § 1.197-2(h)(12)(vii)(B).

[3848] See text preceding and accompanying fn 398 in part II.C.3.c Allocations of Recourse and Nonrecourse Liabilities.

[3849] See part II.C.3.a Basic Consequences of Changes in Liability Allocations.

	JB	DK
Capital account upon formation	$13,500	$1,500
Less year 1 net loss	(10,800)	(1,200)
Capital account at end of year 1	$ 2,700	$ 300

The alternate economic effect test contained in paragraph (b)(2)(ii)(d) of this section is satisfied as of the end of the partnership's first taxable year. Thus, the allocation made in the partnership's first taxable year has economic effect.

If one partner transfers a partnership interest to another person, the transferee receives the transferor's capital account. Also see part III.B.2.j.iii Allocations upon Change of Interest in a Partnership.

Because of very complicated estate and gift tax rules governing family businesses,[3850] generally family partnerships should be set up with one class of partnership interests. In other words, each partner's capital account is proportionate to that partner's percentage in interest in profits and losses.[3851] However, businesses not involving family members can be more flexible, allocating different tiers of income as rewards for each partner's relative contributions of capital or services. In any event, the tax allocations need to be consistent with the economic arrangements; the tax jargon is that tax allocations must have a "substantial economic effect."

Whether the partnership has one or multiple classes of equity, issues arise when a partner contributes property whose value exceeds its basis. This excess value is known as Code § 704(c) responsibility. When contributed property is subjected to depreciation or amortization or is later sold, the contributing partner receives a special allocation to properly take into account that partner's Code § 704(c) responsibility. Beware if the contribution and corresponding allocation of tax items with respect to the property are made with a view to shifting the tax consequences of built-in gain or loss among the partners in a manner that substantially reduces the present value of the direct and indirect partners' aggregate tax liability.[3852]

Hedge funds are complicated partnership tax structures.[3853]

II.P.1.a.i.(b). Special Rules for Allocations of Income in Securities Partnerships

Below is a discussion about allocating income in securities partnerships. This discussion focuses on a subset of allocations described in part II.P.1.a.i.(a) General Rules for Allocations of Income in Partnerships, which upon any distribution from a partnership may have the tax consequences described in part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not

[3851] See part III.B.7.b.ii Certain Exclusions from Code § 2701, fns. 7315-7316.
[3852] Reg. § 1.704-3(a)(10), added by T.D. 9485 (6/8/2010). For the regulation's text, see fn. 3860 in part II.P.1.a.i.(b) Special Rules for Allocations of Income in Securities Partnerships.
[3853] Miller and Bertrand, "Federal Income Tax Treatment of Hedge Funds, Their Investors, and Their Managers," *Tax Lawyer*, pp. 309-397, Vol. 65, No. 2 (Winter 2002).

Equal to Fair Market Value. If securities partnerships have money flowing and out, they should consider not only those rules but also the rules described in parts II.M.3.e Exception: Disguised Sale (exception to the general idea that the formation of a partnership is not a taxable event) and II.Q.8.b.i.(c) Disguised Sale from Partnership to Partner, as well concerns that distributions of securities from a partnership to a partner may be treated as cash distributions, as described in part II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them). The disguised sale rules generally look to entrepreneurial risk, and the risk of disguised sales from a partnership with many investors may be smaller than that with many investors; however, in any event, a contribution of cash or property and a distribution of cash or property that occur within two years tends to trigger a disguised sale reporting requirement, even if the transaction does not constitute a disguised sale.[3854]

Reverse-Code § 704(c) responsibility means tracking the built-in gain or loss of the partnership's property when partnership interests change (which is common when a new partner is admitted to an existing partnership).[3855]

Tracking Code § 704(c) and reverse-Code § 704(c) responsibility often is administratively cumbersome. Rev. Proc. 2007-59, § 2 points out:

> .01. To prevent the shifting of tax consequences among partners with respect to precontribution gain or loss, section 704(c) requires partnerships to allocate income, gain, loss, and deductions with respect to property contributed by a partner so as to take into account any variation between the adjusted tax basis of the property and its fair market value at the time of the contribution. These allocations must be made using a reasonable method that is consistent with the purpose of section 704(c). Section 1.704-3(a)(6) provides that similar rules apply to differences between book value and tax basis that are created by a revaluation of partnership assets pursuant to § 1.704-1(b)(2)(iv)(f) (reverse section 704(c) allocations).
>
> .02. Section 1.704-3(a)(2) provides that section 704(c) allocations are generally made on a property-by-property basis. Therefore, built-in gains and losses from different items of contributed or revalued property generally cannot be aggregated.

See part II.C.7 Maintaining Capital Accounts, especially fn. 507 (quoting the regulation governing revaluations).

For purposes of making reverse-Code § 704(c) allocations, a securities partnership may aggregate gains and losses from qualified financial assets using any reasonable approach that is consistent with the purpose of Code § 704(c).[3856] Once a partnership adopts an aggregate approach, that partnership must apply the same aggregate approach to all of its qualified financial assets for all taxable years in which the partnership qualifies as a securities partnership.[3857] Further below are approaches for aggregating reverse-Code § 704(c) gains and

[3854] See part II.M.3.e.i.(c) Disclosure Requirements, incorporated by reference by parts II.M.3.e Exception: Disguised Sale and II.Q.8.b.i.(c) Disguised Sale from Partnership to Partner.
[3855] For a description of reverse-Code § 704(c) allocations of gain on sale, see part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, especially fns. 5444-5447.
[3856] Reg. § 1.704-3(e)(3)(i).
[3857] Reg. § 1.704-3(e)(3)(i), expressly overriding Reg. § 1.704-3(a)(2) and (a)(6)(i).

losses that are generally reasonable.[3858] Other approaches may be reasonable in appropriate circumstances.[3859] In some circumstances, various Code § 704(c) methods, including the aggregate approaches described further below, are not reasonable.[3860] A partnership using an aggregate approach must separately account for any built-in gain or loss from contributed property.[3861]

When getting into details on the two aggregate approaches below, one finds that they limit the assets that can be aggregated and require one to go to an asset-by-asset approach if one later fails to qualify. Consider using one of the approaches without formally adopting it. For example, one might use an aggregate approach in practice for marketable securities and an asset-by-asset approach for unmarketable assets. Given that Reg. § 1.704-3(e)(3)(i) permits using any reasonable approach and given that the IRS views an aggregate approach as reasonable for marketable securities (or it would not have provided it), such a hybrid approach would seem to allow one to comply with the regulations without hamstringing one with the artificial rules that are imposed on using an aggregate method as a safe harbor. As a practical matter, given that using an aggregate method is intended as a reasonable shortcut to avoid laborious asset-by-asset tracking, an IRS examiner might need to do laborious asset-by-asset tracking to show that this method is unreasonable, going into such an ordeal with no reason to believe it would be productive.

A "qualified financial asset" is any personal property (including stock) that is actively traded.[3862] For a management company, it includes various additional assets, even if not actively
