Although the rules under former proposed § 301.6226-3(e) were largely consistent with the rules under section 6226(b)(4), some changes were needed to conform the two sets of rules. First, proposed § 301.6226-3(a)(1) now provides that the rules under proposed § 301.6226-3(a)(1) apply to a reviewed year partner except to the extent otherwise provided in proposed § 301.6226-3. Second, proposed § 301.6226-3(e) now includes a requirement that the pass-through partner must file a partnership adjustment tracking report. Third, proposed § 301.6226-3(e) provides a default rule that a pass-through partner must furnish statements to its own partners in accordance with proposed § 301.6226-3(e)(3). If a pass-through partner fails to furnish statements in accordance with proposed § 301.6226-3(e)(3), the pass-through partner must compute and pay an imputed underpayment. Additionally, language referring to a pass-through partner "taking into account" the adjustments under former proposed § 301.6226-3(e) was removed to more closely align with the statutory language in section 6226(b)(4). Fourth, proposed § 301.6226-3(e) defines and refers to the term "audited partnership," which proposed § 301.6226-3(e)(1) defines as the partnership that made the election under § 301.6226-1. See section 6226(b)(4)(D). Lastly, proposed § 301.6226-3(e)(4) provides that the amount a pass-through partner must compute and pay, if it does not furnish statements to its partners, is an "imputed underpayment." See section 6226(b)(4)(A)(ii)(II).

Because under proposed § 301.6226-3(e), pass-through partners compute and pay an "imputed underpayment," rather than calculating correction amounts under proposed § 301.6226-3(b), references in former proposed § 301.6226-3(b) to amended returns filed by indirect partners as part of modification have been deleted. Passthrough partners computing an imputed underpayment under proposed § 301.6226-3(e) may account for modifications submitted by their indirect partners, but non-pass-through partners calculating correction amounts under proposed § 301.6226-3(b) cannot. Accordingly, the references in former proposed § 301.6226-3(b) to amended returns filed by indirect partners were removed.

To reflect the change to the definition of "tax attribute" under proposed § 301.6241-1(a)(10) (see section 11.A. of this preamble), proposed §§ 301.6226-2 and 301.6226-3 now only refer to the tax attributes of the partner. For example, proposed §§ 301.6226-2(e) and 301.6226-3(e)(3)(iii) no longer require that the audited partnership report any changes to partnership tax attributes on the statements furnished to its partners under section 6226(a)(2). Therefore, when a partner computes the partner's correction amount for any intervening year, the partner calculates the amount by which the partner's chapter 1 tax for any intervening year would increase or decrease if any tax attribute of that partner (for example, a net operating loss carryover or capital loss carryover) has been adjusted after taking into account the partner's share of the adjustments in the first affected year.

Finally, references to "items" or "items of income, gain, loss, deduction, or credit" throughout former §§ 301.6226-1, 6226-2, and 6226-3 have been replaced with references to "partnership-related items."

B. Revisions to the Regulations Under Section 6226 Unrelated to the TTCA Amendments

In addition to the changes needed to conform to the amendments by the TTCA, some additional changes have been made to former proposed §§ 301.6226-1, 6226-2, and 6226-3. First, proposed § 301.6226-1(b)(2) now provides that only those adjustments that do not result in an imputed underpayment which are associated with an imputed underpayment for which an election under section 6226 is made are included in the reviewed year partner's share of the partnership adjustments reported to the partner. Any adjustments that do not result in an imputed underpayment which are not associated with an imputed underpayment for which an election under section 6226 is made are taken into account under section 6225. This change was necessary to clarify which partnership adjustments are pushed out in the case of multiple imputed underpayments where the push out election is not made with respect to all imputed underpayments. See proposed § 301.6225-1(g) for rules regarding the treatment of adjustments that do not result in an imputed underpayment in the context of specific imputed underpayments.

Second, under proposed § 301.6226-1(c)(1), an election under section 6226 is only valid if all the provisions under proposed § 301.6226-1 (regarding making the election) and § 301.6226-2 (regarding the furnishing of statements) are satisfied, and an election made under section 6226 is valid until the IRS determines that the election is invalid. The rule that an election is valid until the IRS determines it is invalid was moved from former proposed § 301.6226-1(c)(2) to proposed § 301.6226-1(c)(1) to clarify that an election that does not fully satisfy the requirements of proposed §§ 301.6226-1 and 301.6226-2 is valid unless the IRS determines that the purported election is invalid. For example, if a partnership makes an election in accordance with proposed § 301.6226-1 but fails to furnish statements to its partners, that election is valid until the IRS determines otherwise.

In addition, the word “final” was removed from before the word “determination” in proposed § 301.6226-1(c)(2) when referring to a determination made by the IRS that a purported election under section 6226 is invalid. The removal of the word “final” clarifies that the IRS may determine that an election is invalid and assess and collect the imputed underpayment to which the purported election related without first being required to make a proposed or initial determination of invalidity. Although nothing in the regulations precludes the IRS from first notifying the partnership of a potential problem with an election before determining the election is invalid, proposed § 301.6226-1(c)(2) provides that the IRS may determine that an election is invalid even if the partnership has corrected the statements required to be filed and furnished in accordance with proposed § 301.6226-2(d)(3) and also provides that the IRS is not obligated to require the correction of any errors prior to determining an election is invalid.

Third, several changes were made to clarify that the partnership must provide correct information in order to make a valid election under section 6226 and in order for statements to be properly furnished either under proposed § 301.6226-2 or proposed § 301.6226-3(e) (3). Proposed § 301.6226-1(c)(4)(ii) requires the partnership to provide correct information in its election, and proposed § 301.6226-2(e) and proposed § 301.6226-3(e)(3)(iii) require that the statements filed and furnished with the IRS include correct information. Additionally, proposed § 301.6226-2(d)(3) provides that if the IRS cannot determine whether the statements filed and furnished by the partnership are correct because of a failure by the partnership to comply with any requirements (such as filing a partnership adjustment tracking report), the IRS may, but is not obligated to, require the partnership to provide additional information to substantiate the statements. Proposed § 301.6226-2(d)(2) extends the rules governing corrections of errors in statements to statements furnished by pass-through partners under proposed § 301.6226-3(e)(3) and to provide that, if consent of the IRS is required for a correction, that corrected statements may not be furnished until the IRS provides consent.

Fourth, duplicative language regarding the definition of the extended due date for the adjustment year of the audited partnership was removed from former proposed § 301.6226-3(e)(3)(ii) and (e)(4)(ii).

Fifth, in proposed § 301.6226-3(g), the word “grantor” has been added between the words “wholly-owned” and “trusts” to clarify that “wholly-owned trusts” means “wholly-owned grantor trusts.”

Sixth, the phrase “an entity described in § 301.7701-2(c)(2)(i)” in former proposed § 301.6226-3(j) was changed to “a wholly-owned entity disregarded as separate from its owner for Federal tax purposes in the reviewed year” to conform to the definition of disregarded entity under proposed § 301.6241-1(a)(4).

Seventh, proposed § 301.6226-3(c)(2) now provides that interest on any penalties, additions to tax, or additional amounts is calculated from each applicable taxable year until the penalty, addition to tax, or additional amount is paid. Former proposed § 301.6226-3(c)(2) provided that interest was calculated from the first affected year. Under proposed § 301.6226-3(d)(2), partners calculate any penalties, additions to tax, or additional amounts that relate to the partnership adjustments at the partner level. Because the adjustments could create tax effects in more than just the first affected year (for example, as a result of changes to tax attributes in an intervening year), a penalty, addition to tax, or additional amount might likewise result in more than just the first affected year. Accordingly, proposed § 301.6226-3(c)(2) provides that interest on penalties, additions to tax, and additional amounts runs from the applicable taxable year (that is, the particular tax year to which the penalty, addition to tax, or additional amount relates).

Finally, certain errors were corrected in the examples under proposed § 301.6226-3(h). Examples 2 through 4 and 6 through 9 under former proposed § 301.6226-3(h) incorrectly listed the last day to file a petition under section 6234 as the date the adjustments became final, and examples 6 through 9 incorrectly referred to former proposed § 301.6226-1(b) as support for this rule. Under proposed § 301.6226-2(b), partnership adjustments become finally determined on the later of the expiration of the time to file a petition under section 6234 or, if a petition is filed under section 6234, the date when the court’s decision becomes final. The examples under proposed § 301.6226-3(h) now reflect that the adjustments become final on the day after the last day to file a petition under section 6234 to be consistent with the rule under § 301.6226-2(b), and incorrect references to § 301.6226-1(b) in Examples 6 through 9 under former proposed § 301.6226-3(h) have been replaced with correct references to § 301.6226-2(b).

Proposed § 301.6226-4

Proposed rules under §§ 301.6226-4 were previously published in the Federal Register in the February 2018 NPRM (83 FR 4868) (former proposed § 301.6226-4). For an explanation of the rules under former proposed § 301.6226-4, see 83 FR 4874.

Proposed § 301.6226-4 sets forth rules for adjusting reviewed year partners’ tax attributes to take into account partnership adjustments when a partnership makes an election under section 6226. To reflect the addition of section 6226(b)(4), proposed § 301.6226-3(e)(4) now provides that a reviewed year partner that is a pass-through partner must pay an imputed underpayment if the pass-through partner does not furnish statements. In addition, changes have been made throughout former proposed § 301.6226-4 to conform to the change to the definition of "tax attribute" under proposed § 301.6241-1(a)(10). See section 11.A of this preamble. These changes reflect that the adjustments to tax attributes taken into account by a partner should be consistent, regardless of whether the partner files an amended return during modification, participates in the alternative procedure to filing an amended return, or receives a statement under section 6226. Accordingly, the proposed regulations under section 6226 have been revised to refer only to the tax attributes of the partner in the intervening years. Additionally, clarifying changes were made in proposed § 301.6226-4(b) to conform to the terminology used in proposed § 301.6226-3. Lastly, an incorrect cross-reference in former proposed § 301.6226-4(c)(4)(iii) has been replaced with the correct cross-reference.

II.G.19.c.v. Electing Out of Post-TEFRA Rules on Partnership Return

For who may elect out of the centralized partnership audit regime and how to make the election, see parts II.G.19.c.v.(a) Who Can Elect Out of Post-TEFRA Rules on Partnership Return; What Is the Effect of Electing Out and II.G.19.c.v.(b) How to Elect Out of Post-TEFRA Rules on Partnership Audits; Issues to Address in a Partnership Agreement.

However, contrary to my initial impression before certain changes were made in March 2018, I am not a big fan of electing out. The only significant disadvantage to the new regime is complexity when amending partnership returns.[1769] Under the pre-TEFRA rules that apply to partnerships that opt out of the centralized partnership audit regime, the partners' returns must be amended, exposing them to scrutiny. Although that is an option under the centralized partnership audit regime, it is not the only choice:

- For amending prior returns to take advantage of the reviewed year partners' respective tax attributes, see part II.G.19.c.iii Amended Partner Returns for Reviewed Year in Lieu of Partnership Paying Tax. A nice feature is that some partners can amend, using their tax attributes and removing their share of items from the mix, while others might not do so and rely on the other options to pay the tax. Of course, the partnership would need to give those partners who amend the benefit of their actions by making the other partners bear the burden of the remaining items.

- The partnership can simply pay the tax. See part II.G.19.c.ii Partnership's Liability for Underpayment under Code § 6225.

- The reviewed year partners can apply the audit changes to their current returns, allowing them to use current tax attributes rather than amending prior year returns, but with an enhanced interest rate on the increase in tax. See part II.G.19.c.iv Pushing Out Adjustments in Year of Audit in Lieu of Partnership Paying Tax.

[1769] See text accompanying fn 1731 in part II.G.19.c.i Overview of Rules Before and After TEFRA Repeal.

II.G.19.c.v.(a). Who Can Elect Out of Post-TEFRA Rules on Partnership Return; What Is the Effect of Electing Out

The partnership may elect out of the rules on its tax return.[1770] Electing out causes the pre-TEFRA rule of Reg. § 301.6223-1(b)(3)(i) to apply.[1771] For how to elect out, see part II.G.19.c.v.(b) How to Elect Out of Post-TEFRA Rules on Partnership Audits; Issues to Address in a Partnership Agreement.

The centralized partnership audit regime does not apply with respect to any partnership for any taxable year if:[1772]

(A) the partnership elects the application of this subsection for such taxable year,

(B) for such taxable year the partnership is required to furnish 100 or fewer statements under section 6031(b) with respect to its partners,

(C) each of the partners of such partnership is an individual, a C corporation, any foreign entity that would be treated as a C corporation were it domestic,[1773] an S corporation, or an estate of a deceased partner,

(D) the election—

- (i) is made with a timely filed return for such taxable year, and
- (ii) includes (in the manner prescribed by the Secretary) a disclosure of the name and taxpayer identification number of each partner of such partnership, and

(E) the partnership notifies each such partner of such election in the manner prescribed by the Secretary.

A "C corporation" in (C) above appears to include a tax-exempt entity organized as a corporation.[1774]

[1770] Reg. § 301.6221(b)-1(a), "In general," provides:

> The provisions of subchapter C of chapter 63 of the Internal Revenue Code (subchapter C of chapter 63) do not apply for any partnership taxable year for which an eligible partnership under paragraph (b) of this section makes a valid election in accordance with paragraph (c) of this section. For rules regarding deficiency procedures, see subchapter B of chapter 63 of the Internal Revenue Code and §§ 301.6211-1 through 301.6215-1.

[1771] See part II.G.19.c.i Overview of Rules Before and After TEFRA Repeal.

[1772] Code § 6221(b)(1). Any footnotes in the quoted material below are not from the statute itself.

[1773] [my footnote – not in the statute:] Reg. § 301.6221(b)-1(b)(3)(iii) provides:

> *Eligible foreign entity*. For purposes of this paragraph (b)(3), a foreign entity is an eligible partner if the foreign entity would be treated as a C corporation if it were a domestic entity. For purposes of the preceding sentence, a foreign entity would be treated as a C corporation if it were a domestic entity if the entity is classified as a per se corporation under § 301.7701-2(b)(1), (3), (4), (5), (6), (7), or (8), is classified by default as an association taxable as a corporation under § 301.7701-3(b)(2)(i)(B), or is classified as an association taxable as a corporation in accordance with an election under § 301.7701-3(c).

[1774] See fn 1785 for a comment in the preamble suggesting this result. Reg §301.6221(b)-1(b)(3)(i) provides:

As to S corporations, a QSub[1775] would also not be an eligible partner.[1776] On a different note, if both spouses in a married couple own S corporation stock, then they count as two separate shareholder for purposes of the 100-statement limitation.[1777] However, if only one spouse holds title and the other spouse has a community property interest, then only the spouse who holds title counts.[1778]

A taxpayer counts toward the 100-statement limitation even if the taxpayer holds the partnership interest for part of the year, and a decedent and the decedent's estate count as separate taxpayers.[1779] The beneficiaries of an estate do not count toward the 100-statement limitation,

---

> For purposes of paragraph (b)(1)(ii) of this section, the term eligible partner means a partner that is an individual, a C corporation (as defined by section 1361(a)(2)), an eligible foreign entity described in paragraph (b)(3)(iii) of this section, an S corporation, or an estate of a deceased partner. An S corporation is an eligible partner regardless of whether one or more shareholders of the S corporation are not an eligible partner.

Code § 1361(a)(2) provides, "For purposes of this title, the term "C corporation" means, with respect to any taxable year, a corporation which is not an S corporation for such year." This appears to include a tax-exempt corporation, consistent with the preamble.

[1775] See part II.A.2.g Qualified Subchapter S Subsidiary (QSub).

[1776] REG-123652-18 (11/24/2020), which is RIN 1545-BP01, provides:

> Although Notice 2019-06 states that the proposed regulations would have applied a rule similar to the rules for S corporations under section 6221(b)(2)(A) to partnerships with a QSub as a partner, the Treasury Department and the IRS have reconsidered that approach. Under § 301.6221(b)-1(b)(3)(ii), partnerships that have disregarded entities as partners may not elect out of the centralized partnership audit regime. QSubs are treated similarly to disregarded entities for most purposes under the Code in that both QSubs and disregarded entities do not file income tax returns but instead report their items of income and loss on the returns of the person who wholly owns the entity. Thus, as described earlier in this part and in Notice 2019-06, the Treasury Department and the IRS have determined that partnership structures with QSubs as partners present special enforcement concerns because allowing a partnership with a QSub partner to elect out of the centralized partnership audit regime would enable a partnership to elect out in situations where there are over 100 ultimate taxpayers, thereby frustrating the efficiencies the regime was intended to create. To make clear to taxpayers that a QSub cannot be used to facilitate the election out of the centralized partnership audit regime by a partnership with greater than 100 ultimate taxpayers, the Treasury Department and the IRS have determined it is necessary for the proposed regulations to address such a special enforcement concern by treating QSubs as ineligible partners for purposes of section 6221. Accordingly, proposed § 301.6221(b)-1(b)(3)(ii)(G) provides that a QSub is not an eligible partner for purposes of making an election out of the centralized partnership audit regime under section 6221(b). Therefore, if a QSub is a partner in a partnership and required to be furnished a statement by the partnership under section 6031(b), that partnership will not be eligible to make an election under section 6221(b) to elect out of the centralized partnership audit regime.

[1777] Reg. § 301.6221(b)-1(b)(2)(iii), Example (1).

[1778] Reg. § 301.6221(b)-1(b)(2)(iii), Example (2) provides:

> The facts are the same as in Example 1 of this paragraph (b)(2)(iii), except Spouse 2 does not separately own an interest in Partnership during 2020 and Spouse 1 and Spouse 2 live in a community property state, State A. Spouse 1 acquired the partnership interest in such a manner that by operation of State A law, Spouse 2 has a community property interest in Spouse 1's partnership interest. Because Spouse 2's community property interest in Spouse 1's partnership interest is not taken into account for purposes of determining the number of statements Partnership is required to furnish under section 6031(b), Partnership is required to furnish a statement to Spouse 1, but not to Spouse 2….

[1779] Reg. § 301.6221(b)-1(b)(2)(iii), Example (3) provides:

even if the estate issues them K-1s.[1780] The IRS will be watching for partnerships with more than 100 partners that purport to be separate less-than-100 partner partnerships.[1781]

The government may by regulation or other guidance identify other types of partners to whom rules similar to the special rules in the case of a partner that is an S corporation can apply.[1782]

At the beginning of 2020, Partnership, which has a taxable year ending December 31, 2020, has three partners – individuals A, B, and C. Each individual owns an interest in Partnership. On June 30, 2020, Individual A dies, and A's interest in Partnership becomes an asset of A's estate. A's estate owns the interest for the remainder of 2020. On September 1, 2020, B sells his interest in Partnership to Individual D, who holds the interest for the remainder of the year. Under section 6031(b), Partnership is required to furnish five statements for its 2020 taxable year - one each to Individual A, the estate of Individual A, Individual B, Individual C, and Individual D. Therefore, for purposes of this paragraph (b)(2), Partnership has five partners during its 2020 taxable year.

[1780] Reg. § 301.6221(b)-1(b)(2)(iii), Example (5) provides:

During its 2020 taxable year, Partnership has two partners, A, an individual, and E, an estate of a deceased partner. E has 10 beneficiaries. Under section 6031(b), Partnership is required to furnish two statements, one to A and one to E. Any statements that E may be required to furnish to its beneficiaries are not taken into account for purposes of this paragraph (b)(2). Therefore, for purposes of this paragraph (b)(2), Partnership has two partners.

[1781] The preamble to the proposed regulations, [REG-136118-15], warned:

… the IRS intends to carefully scrutinize whether two or more partnerships that have elected out should be recast under existing judicial doctrines and general federal tax principles as having formed one or more constructive or de facto partnerships for federal income tax purposes. The types of arrangements that the IRS will carefully review include those where the profits or losses of partners are determined in whole or in part by the profits or losses of partners in another partnership, and those that purport to be something other than a partnership, such as the co-ownership of property. If it is determined that two or more partnerships that have elected out of the centralized partnership audit regime have formed a constructive or de facto partnership for a particular partnership taxable year and are recast as such by the IRS, that constructive or de facto partnership will be subject to the centralized partnership audit regime because that constructive or de facto partnership will not have filed a partnership return and, therefore, will not have made a timely election out as required under section 6221(b)(1)(D)(i) and these proposed regulations. The constructive or de facto partnership may also have more than 100 partners or an ineligible partner, making it ineligible to elect out.

[1782] Code § 6221(b)(2)(C).

Although Congress expected the Treasury and IRS to make revocable trusts and various other disregarded entities eligible,[1783] the Treasury and IRS responded:[1784]

> The Treasury Department and the IRS have carefully considered all of the comments suggesting an expansion of the definition of eligible partner, but have decided not to adopt these comments at this time. In making this determination, the Treasury Department and the IRS considered the burdens of the centralized partnership audit regime on taxpayers and have concluded that the interests of efficient tax administration outweigh those potential burdens. Accordingly, the final regulations do not expand the definition of eligible partner to include entities other than those entities expressly provided in section 6221(b)(1)(C). After gaining experience with the centralized partnership audit regime, the Treasury Department and the IRS will be in a better position to reconsider any expansion of partnerships eligible to elect out of the regime…..
>
> As the Treasury Department and the IRS gain experience with the centralized partnership audit regime, the definition of eligible partner may be revisited. Section 6221(b)(2)(C) allows the Treasury Department and the IRS to expand the types of eligible partners through ''other guidance,'' which includes sub-regulatory guidance that can be more easily tailored and adapted as the Treasury Department and the IRS gain experience with the new regime. Until that time, however, the list of eligible partners will remain the list specifically set forth by Congress in section 6221(b)(1)(C).

The Treasury Department and the IRS noted the following comments but declined to act on them:[1785]

> Comments suggested that partnerships, disregarded entities, trusts (including tax-exempt trusts, revocable trusts, charitable remainder trusts, grantor trusts, and nongrantor trusts), individual retirement accounts, nominees, qualified pension plans, profit-sharing plans, and stock bonus plans should be considered eligible partners for purposes of making an election under section 6221(b). Comments specifically suggested that because certain types of entities, such as trusts, are similarly situated to

---

[1783] T.D. 9829 (12/29/2017) noted:

> In addition, multiple comments suggested that the authority granted in section 6221(b)(2)(C) signified a congressional expectation that the Treasury Department and the IRS would expand the list of eligible partners under section 6221(b)(1)(C). Multiple comments also suggested that the General Explanations of Tax Legislation Enacted in 2015 prepared by the Joint Committee on Taxation supported an expansion of the section 6221(b)(1)(C) list. *See* Joint Comm. on Taxation, JCS-1-16, *General Explanation of Tax Legislation Enacted in 2015*, 59-60 (2016). Other comments observed that the differences between the election out rules under section 6221(b) and the small partnership exception under the Tax Equity and Fiscal Responsibility Act of 1982, Public Law 97-248 (TEFRA) - the increase from 10 to 100 partners and the inclusion of S corporation partners - reflected an awareness that the IRS would face additional administrative burdens as a result of the election out rules.
>
> Comments suggested that in some situations there would be minimal or no additional burdens imposed on the IRS resulting from an expansion of the definition of eligible partner. For example, comments suggested that, because there is only one additional layer of ownership beyond an entity that is disregarded as an entity separate from its owner for Federal tax purposes, adding those types of entities to the definition of eligible partner would not increase audit complexity or administrative burden for the IRS.

[1784] T.D. 9829 (12/29/2017).

[1785] T.D. 9829 (12/29/2017). See fn 1774 to see how the final sentence of this quote is implemented.

certain eligible partners, such as S corporations because those entities are audited and report items to their owners similarly, they should be included within the definition of eligible partner, and that excluding them could lead to treating similarly situated taxpayers differently. For example, one comment noted that a tax-exempt organization organized as a C corporation is an eligible partner while a tax-exempt organization organized as a trust is not an eligible partner, even though both organizations are taxed the same way.

To remove any doubt whatsoever, Reg. § 301.6221(b)-1(b)(3)(ii) provides that the following are not eligible partners:

(A) A partnership,

(B) A trust,

(C) A foreign entity that is not an eligible foreign entity described in paragraph (b)(3)(iii) of this section,

(D) A disregarded entity described in § 301.7701-2(c)(2)(i),

(E) An estate of an individual other than a deceased partner, or

(F) Any person that holds an interest in the partnership on behalf of another person.

If any person listed above as an ineligible partner holds a partnership interest during the year, the partnership may not elect out for that year.[1786]

Given that revocable trusts are not eligible partners, consider whether applicable law will allow an individual's interest to pass free from probate to that person's revocable trust:

- Some states have laws that allow one to designate a beneficiary upon death -- for example, the Missouri Nonprobate Transfers Law.[1787]

- Other states may allow such a beneficiary designation to be provided by agreement among the owners; however, one must carefully check to make sure that such an agreement does not violate the applicable state's probate laws.

Another option is to transfer the partnership interest to an S corporation:

[1786] Reg. § 301.6221(b)-1(b)(3)(iv), Example (1) (partnership ineligible to elect out because a partner was a partnership) and Example (3) (partnership ineligible to elect out because a partner was a disregarded entity, even though the disregarded entity was owned by an individual).
[1787] http://revisor.mo.gov/main/OneChapter.aspx?chapter=461.

- Although each shareholder is counted in determining the number of statements toward the 100-statement limit,[1788] a shareholder being an ineligible partner does not disqualify the S corporation as an eligible partner.[1789]

- An S corporation is an eligible partner above only if the partnership includes (in the manner prescribed by the IRS) a disclosure of the name and taxpayer identification number of each person receiving a K-1 from the S corporation.[1790]

- When a nongrantor trust holds a partnership, often <u>all</u> of the trust's distributive share of partnership income is taxed at the highest marginal income tax rate, even if the trust is a mandatory income trust. See part III.A.4 Trust Accounting Income Regarding Business Interests. However, if the trust places the partnership in an S corporation and the beneficiary makes a QSST election, all of the partnership income will be taxed at the beneficiary's rate. See parts II.J.4.g Making the Trust a Complete Grantor Trust as to the Beneficiary, III.A.3.e.i QSSTs and III.A.3.e.vi.(e) Converting Existing Trust to a QSST to Obtain Beneficiary Deemed-Owned Trust Status. If the trust has more than one current beneficiary, see part III.A.3.e.v Converting a Multiple Beneficiary ESBT into One or More QSSTs. Conversely, if trapping all of the distributive income in the trust notwithstanding distributions is desirable, see parts II.J.4.h.i Trapping Income in Trust Notwithstanding Distributions – ESBT and III.A.3.e.ii Electing Small Business Trusts (ESBTs. If in the

---

[1788] Code § 6221(b)(2)(A)(ii). Reg. § 301.6221(b)-1(b)(2)(ii) provides:

> *Special rule for S corporations*. For purposes of this paragraph (b)(2), a partnership with a partner that is an S corporation (as defined in section 1361(a)(1)) must take into account each statement required to be furnished by the S corporation to its shareholders under section 6037(b) for the taxable year of the S corporation ending with or within the partnership's taxable year.

Reg. § 301.6221(b)-1(b)(2)(ii) provides:

> *Example (4)*. During its 2020 taxable year, Partnership has 51 partners – 50 partners who are individuals and S, an S corporation. S and Partnership are both calendar year taxpayers. S has 50 shareholders during the 2020 taxable year. Under section 6031(b), Partnership is required to furnish 51 statements for the 2020 taxable year - one to S and one to each of Partnership's 50 partners who are individuals. Under section 6037(b), S is required to furnish a statement (that is, Schedule K-1 (Form 1120-S), Shareholder's Share of Income, Deductions, Credits, etc.) to each of its 50 shareholders. Under paragraph (b)(2)(ii) of this section, the number of statements required to be furnished by S under section 6037(b), which is 50, is taken into account to determine whether partnership has 100 or fewer partners. Accordingly, for purposes of this paragraph (b)(2), Partnership has a total of 101 partners (51 statements furnished by Partnership to its partners plus 50 statements furnished by S to its shareholders) and is therefore not an eligible partnership under paragraph (b)(1) of this section. Because Partnership is not an eligible partnership, it cannot make the election under paragraph (a) of this section.

[1789] Reg. § 301.6221(b)-1(b)(3)(i) includes:

> An S corporation is an eligible partner regardless of whether one or more shareholders of the S corporation are not an eligible partner.

Reg. § 301.6221(b)-1(b)(3)(iv) includes:

> *Example (2)*. During its 2020 taxable year, Partnership has four equal partners. Two partners are individuals. One partner is a C corporation. The fourth partner, S, is an S corporation. S has ten shareholders. One of S's shareholders is a disregarded entity, and one is a qualified small business trust. S is an eligible partner under paragraph (b)(3)(i) of this section even though S's shareholders would not be considered eligible partners if those shareholders held direct interests in Partnership . See paragraph (b)(3)(i) of this section. Accordingly, Partnership meets the requirements under this paragraph (b)(3) for its 2020 taxable year.

[1790] Code § 6221(b)(2)(A)(i).

planning stages for a trust to hold a partnership interest and these strategies seem of interest, see part III.A.3.e.iv Flexible Trust Design When Holding S Corporation Stock.

- An S corporation that merely holds one partnership interest is not going to be able to do a tax-free division. If one considers bequests or trust terminations in favor of beneficiaries who have different objectives and keeping a single voting block is not an overriding goal, note the discussion in part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts (Whether or Not a Sale Is Made).

- When S corporation stock is sold or transferred by death, etc., the partnership interest itself would not receive a basis step-up, although careful planning may reduce or eliminate that disadvantage. See part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation; Possible Way to Attain Basis Step-Up.

Some partnerships might prohibit transfers to persons who would blow the eligibility to opt out, but that may be too prohibitive.

Thus, tenancies in common that are later found to be partnerships would not have elected out of these new rules on their returns, because the election out is required on an annual basis.

A partnership's election out does not affect its relationship to any partnership in which it is a partner.[1791]

[1791] Reg. § 301.6221(b)-1(d), "Election made by a partnership that is a partner," provides:

(1) *In general*. The fact that a partnership has made an election under this section does not affect whether the provisions of subchapter C of chapter 63 apply to any other partnership, including a partnership in which the partnership making the election is a partner. Accordingly, the provisions of subchapter C of chapter 63 that apply to partners in a partnership that has not made an election under this section apply, to the extent provided in the regulations under subchapter C of chapter 63, to partners (that are themselves partnerships that have made an election under this section) in their capacity as partners in the other partnership.

(2) *Examples*.. The following examples illustrate the rules of paragraph (d)(1) of this section. For purposes of these examples, each partnership is required to file a return under section 6031(a):

Example (1). During its 2020 taxable year, Partnership, a calendar year taxpayer, has two partners. One partner, A, is also a calendar year partnership. A files a valid election under this section with its timely filed partnership return for its 2020 taxable year. Partnership does not file an election under this section. Notwithstanding A's valid election under this section, with respect to A's interest in Partnership, A is subject to the rules applicable to partners in a partnership subject to the rules under subchapter C of chapter 63, including the consistency requirements of section 6222 and the regulations thereunder.

Example (2). The facts are the same as Example 1 of this paragraph (d)(2). The IRS mails to Partnership a notice of final partnership adjustment under section 6231 with respect to Partnership's 2020 taxable year. Partnership timely elects the alternative to payment of imputed underpayment under section 6226 and the regulations thereunder. Partnership must provide A with a statement under section 6226 reflecting A's share of the adjustments for Partnership's 2020 taxable year. A is subject to the rules applicable to partners in a partnership subject to the rules under subchapter C of chapter 63 with respect to A's interest in Partnership.

The partnership and all partners are bound by an election out unless the IRS determines that the election is invalid.[1792] If the IRS determines that an election out for a partnership taxable year is invalid, the IRS will notify the partnership in writing and the provisions of subchapter C of chapter 63 will apply to that partnership taxable year.[1793]

Any proposed or final regulations described above that were promulgated before March 23, 2018 need to be read in light of any changes made by the Consolidated Appropriations Act, 2018.

II.G.19.c.v.(b).How to Elect Out of Post-TEFRA Rules on Partnership Audits; Issues to Address in a Partnership Agreement

An election out of the new rules must be made on the eligible partnership's timely filed return, including extensions, for the taxable year to which the election applies and include all information required by the IRS in forms, instructions, or other guidance.[1794] An election is not valid unless the partnership discloses to the IRS all of the required information and, in the case of a partner that is an S corporation, the shareholders of such S corporation.[1795] An election once made may not be revoked without the IRS' consent.[1796]

An electing partnership must disclose to the IRS information about each person that was a partner at any time during the taxable year of the partnership to which the election applies, including:[1797]

- Each partner's name and correct U.S. taxpayer identification number (TIN) (or alternative form of identification required by forms, instructions, or other guidance),
- Each partner's Federal tax classification,
- An affirmative statement that the partner is an eligible partner under Reg. § 301.6221(b)-1(b)(3)(i), and
- Any other information required by the IRS in forms, instructions, or other guidance.

If a partner is an S corporation, the partnership must also disclose to the IRS information about each shareholder of the S corporation that was a shareholder at any time during the taxable year of the S corporation ending with or within the partnership's taxable year, including:[1798]

[1792] Reg. § 301.6221(b)-1(e)(1), "In general," provides:

> An election made under this section is an action taken under subchapter C of chapter 63 by the partnership for purposes of section 6223. Accordingly, the partnership and all partners are bound by an election of the partnership under this section unless the IRS determines that the election is invalid. See § 301.6223-2 for the binding nature of actions taken by a partnership under subchapter C of chapter 63.

[1793] Reg. § 301.6221(b)-1(e)(2).
[1794] Reg. § 301.6221(b)-1(c)(1).
[1795] Reg. § 301.6221(b)-1(c)(1).
[1796] Reg. § 301.6221(b)-1(c)(1).
[1797] Reg. § 301.6221(b)-1(c)(2).
[1798] Reg. § 301.6221(b)-1(c)(2).

- Each shareholder's name and correct TIN (or alternative form of identification as prescribed by forms, instructions, or other guidance),
- Each shareholder's Federal tax classification, and
- Any other information required by the IRS in forms, instructions, or other guidance.

A partnership that elects out must notify each of its partners of the election within 30 days of making the election in the form and manner determined by the partnership.[1799]

Some issues that the partnership agreement may address include:[1800]

- Provisions for the partnership to make the election to elect out for a partnership taxable year (including what vote is required).
- Provision for cooperation between the partner and the partnership.
- A requirement for the partnership to cooperate with the partner by providing access to partnership financial information, partnership records, and transactional documentation.
- A requirement for inter-partner cooperation in the audit.
- Possibly a requirement for some inter-partner information sharing in the audit.
- Possibly some arrangement between the partner and the partnership concerning audit cost sharing.
- A possible requirement for the partner to defend in audit the return positions taken by the partnership.
- An agreement by the partnership to make partnership personnel available regarding the partner audit.
- A requirement that the partner keep the partnership informed concerning the institution of the audit and the progress of the audit (including any tax litigation that may result from the audit).
- In some cases, a requirement for the partner to use advisors designated by the partnership to defend partnership issues in audit (presumably at the expense of the partnership).
- Agreement of the partner to inform the partnership of the settlement of the audit and of the general terms of the settlement as concerns partnership items.
- Notice to the partnership of filing of a petition in either Tax Court, District Court, or Court of Federal Claims.

[1799] Reg. § 301.6221(b)-1(c)(3).
[1800] These bullet points are quoted directly from "Partnership Audit Rules," by Jerald David August and Terence Floyd Cuff (8/2016).

- Agreement of the partner to inform the partnership of court resolution of partnership items.

The decision to elect out of the new audit rules is not one that should be lightly made. On one hand, electing out may very well drastically reduce the chance of the IRS examining the partnership's return (although it will probably have a program to audit whether elections out are correct). On the other hand, an audit could expose other items on a partner's return that the partner would rather not be exposed. I once saw where a partner's audit adjustment of the magnitude of $25,000 in disallowed deductions resulted in the IRS examining the individual's return, finding that an S election was not place, and disallowed approximately $800,000 in S corporation losses reported on the partner's individual return.

Any proposed or final regulations described above that were promulgated before March 23, 2018 need to be read in light of any changes made by the Consolidated Appropriations Act, 2018.

II.G.19.c.vi. Drafting Partnership Agreements to Take Into Account Post-TEFRA Rules

All references below to a partnership agreement include an LLC's operating agreement, which for federal income tax purposes is referred to as a partnership agreement.

Issues to consider include:

- See checklist in part II.G.19.c.v.(b) How to Elect Out of Post-TEFRA Rules on Partnership Audits; Issues to Address in a Partnership Agreement, text accompanying fn 1800.

- Requirement that the partnership representative notify the partners within a reasonable amount of time after received a notice of proposed partnership adjustment. The notification would explain the adjustments that each reviewed year partner would need to make to the partner's tax return reporting the reviewed year's items to avoid the partnership paying tax on the adjustments.

- Often partners are happy to let the person running the partnership handle an IRS audit when everyone's economic interests relating to the effect of an audit are substantially the same. For example, I tend to make the manager of an LLC be the partnership representative. However, if the partners want to have significant input into the audit, the partnership itself can be the partnership representative and would appoint a "designated individual" to communicate partnership decisions to the IRS.[1801]

- Procedure requiring partners to communicate intent to amend (or not amend) their returns after receiving the notice. See part II.G.19.c.iii Amended Partner Returns for Reviewed Year in Lieu of Partnership Paying Tax. Partners should have the option to take the steps below instead of it being required, so that partners do not open other parts of their returns to the IRS' scrutiny.

  - If they do not amend, the partnership may still need information from them regarding their tax attributes to minimize the tax attributable to their share of partnership items.[1802]

[1801] See Reg. § 301.6223-1(b)(3)(i), reproduced in fn 1736 in part II.G.19.c.i Overview of Rules Before and After TEFRA Repeal.
[1802] See part II.G.19.c.ii Partnership's Liability for Underpayment under Code § 6225, especially fns 1752-1759.

The partnership's procedures should provide that failure to provide the information would prevent them from complaining about their individual tax attributes not being taken into account.

- If they do amend, the partnership will need enough time to know that it will not need to work on minimizing tax due to partners' tax attributes. The partnership will also need proof of the amendment so that the partnership will not need to account for their partnership items.

- If the issue involves reallocating income from one partner to another, all of the partners affected by that reallocation need to amend their returns, to avoid the whipsaw of paying tax on the increase in income without the benefit of a reduction for the decrease in income.

- Generally, all of this must be concluded within 270 days after the IRS sends its notice of proposed adjustments.[1803]

- If not all partners amend, so that a final adjustment allocates items to the partnership, the partnership can do a push-out election or pay tax. See part II.G.19.c.iv Pushing Out Adjustments in Year of Audit in Lieu of Partnership Paying Tax. The partnership agreement might include:

  - How to make the decision whether to push-out or just have the partnership pay the tax. As far as the IRS is concerned, only the partnership representative (PR) may act, and the PR may act unilaterally. However, the partnership agreement may impose contractual or fiduciary duties on the PR.

  - Adjustments to capital accounts of those whose items required the partnership to pay tax, etc. The partnership agreement might require capital contributions to fund these payments.

Also consider requirements for partners who transfer their partnership interests. The partnership needs to know how to contact former partners to implement the above procedures. The partnership may want recourse against the transferee partner, which generally is more convenient than tracking down the former partner, and the transferee partner may want to hold part of the purchase price in escrow until the statute of limitations has run for prior years' returns. Similarly, the transferor partner may want input into how the PR handles the audit; if the issues relate to timing deductions or losses, the PR would tend to be aligned with the current partners and therefore may favor deferring deductions so that the more recent partners benefit from them.

Large partnerships require detailed procedures to protect various partners' rights, including relationships with the partnership representative, paying for audit defense, and paying any tax due at the partnership level.[1804] The partnership's management should control the partnership representative's action in whatever manner is appropriate. If the partnership representative is the same person who filed the return, the representative might have a conflict of interest. If the

[1803] See part II.G.19.c.ii Partnership's Liability for Underpayment under Code § 6225, fn 1749.
[1804] See August and Cuff, "The TEFRA Partnership Audit Rules Repeal: Partnership and Partner Impacts," ALI CLE Webcast 6/7/2016, my internal document no. 6409516. The CLE and its materials expressed concerns about fairness to taxpayers that regulations have since addressed, so the reader should focus on their comments regarding relationships between partes.

representative acts in that role for many partnerships (and perhaps is a partnership promoter) and has no skin in the game for this partnership, query whether the representative might compromise your case to settle other cases.

Below is a sample clause appointing the LLC (taxed as a partnership) as the Partnership Representative, so that the LLC's procedures are responsible for any decisions and the person dealing with the IRS – the Designated Individual – is merely effectuating the LLC's decisions. Typically, the manager will make these decisions for the LLC and serve as Designated Individual, but of course the operating agreement may provide for members to vote on any issues that the members believe important enough to address in the operating agreement. As with any sample language in this document, this is intended merely to help the reader spot issues, and the reader is responsible for exercising the reader's own professional judgment.

<u>SECTION 7.9</u> <u>TAX MATTERS</u>.

(a) <u>Appointment</u>. The Members hereby appoint (1) the Company as the "partnership representative" (as defined in Code section 6223(a)) and in any similar capacity under state or local law (the "Partnership Representative"), and (2) the Manager as "designated individual" (as defined in Treasury Regulation section 301.6223-1(b)(3)(ii)) and in any similar capacity under state or local law (the "Designated Individual"). The Designated Individual shall take such actions as directed by the Partnership Representative. The designation of the Partnership Representative and Designated Individual shall be properly made on the Company's federal income tax return (and on any similar tax return under state or local law).

(b) <u>Resignation or Removal</u>. The Partnership Representative and Designated Individual may resign at any time. The Partnership Representative or Designated Individual may be removed at any time by the Manager (or, if no Manager is serving or the Manager is also the Partnership Representative or Designated Individual, as applicable, by a vote of the Members under Section 6.5). In the event of the resignation or removal of the Partnership Representative or Designated Individual, the Manager (or, if no Manager is serving or the Manager is also the Partnership Representative or Designated Individual, as applicable, a vote of the Members under Section 6.5) shall select a replacement Partnership Representative or Designated Individual, as applicable. If the resignation or removal of the Partnership Representative or Designated Individual, as applicable, occurs before the effectiveness of the resignation or removal under applicable Treasury Regulations or other administrative guidance, (1) the resignation or removal of the Partnership Representative or Designated Individual, as applicable, shall be effective upon the earliest date provided for in such Treasury Regulations or administrative guidance, (2) the Partnership Representative that has resigned or been removed shall not take any actions in its capacity as the Partnership Representative except as directed by the Manager, and (3) the Designated Individual that has resigned or been removed shall not take any actions in its capacity as the Designated Individual except as directed by the Partnership Representative.

(c) <u>Tax Examinations and Audits</u>. The Partnership Representative is authorized and required to represent the Company (at the Company's expense) in connection with all audits, inquiries, examinations, demands or other proceedings in respect of any tax returns or taxes of the Company by any federal, state, local or foreign taxing authority, including resulting administrative and judicial proceedings (each a "Tax Contest"), and to expend Company funds for professional services and costs associated therewith. The Partnership Representative shall have sole authority to act on behalf of the Company in any such Tax Contest, and shall have exclusive right to control all proceedings and make all decisions in connection with any Tax Contest, including all decisions to (1) grant or deny any waiver or extension or (2) whether the Company (either on its own behalf or on behalf of the Members) will contest or continue to contest any Tax Contest. Each Member agrees that such Member will not independently act with respect to any Tax Contest, unless previously authorized to do so in writing by the Partnership Representative (which authorization may be withheld by the Partnership Representative in its sole and absolute discretion), and each Member consents to and agrees to become bound by all actions of the Partnership Representative, including any contest, settlement or other action or position with respect to a Tax Contest which the Partnership Representative may deem proper under the circumstances.

(d) Audit Tax Elections. The Partnership Representative may, but shall not be obligated to, cause the Company to make any available elections under the provisions of the Code related to any Tax Contest, as such provisions may be amended from time to time. The Partnership Representative may set deadlines for the Members to comply with one or more procedures intended to reduce the tax imposed on the Company or the Members, including providing information on the tax attributes of such Member, making elections, and/or filing amended tax returns. Each Member must take all actions that the Partnership Representative informs it are reasonably necessary to effect a decision of the Partnership Representative with respect to the Code, including (1) providing any information reasonably requested in connection with any Tax Contest (which information may be freely disclosed to the Internal Revenue Service or other relevant taxing authorities), (2) paying any deficiency for taxes imposed on any Member (including penalties, additions to tax or interest imposed with respect to such tax and any tax or interest imposed with respect to such tax imposed on such Member as a result of an election under Code section 6221(b) or 6226), (3) filing any amended returns that the Partnership Representative determines to be necessary or appropriate to reduce an imputed underpayment under Code section 6225(c), and/or (4) paying all liabilities associated with such an amended return; provided, however, filing an amended return shall not be subject to specific enforcement and shall not constitute a fiduciary duty but rather shall be merely subject to the following sentence. Each Member who does not comply timely and fully with the provisions of this subsection shall be responsible for the consequences of such failure. The costs and expenses incurred by a Member in connection with the preceding sentence (other than the Partnership Representative in its capacity as such) will not be treated as Company expenses and will not be reimbursed by the Company.

(e) Tax Deficiencies on the Company. The Members (and former Members) agree that, if the Company incurs any expenses or pays any deficiency for taxes, interest, and penalties (including those under Code section 6225) as a result of any Tax Contest, the Partnership Representative shall seek payment from the Members (and former Members) for the amount of such expense and such deficiency for taxes, interest, and penalties attributable to that Member (or former Member), and each such Member (or former Member) agrees to pay such amount to the Company promptly upon the request of the Company if and to the extent that the Partnership Representative, in the Partnership Representative's sole and absolute discretion, does not decide to merely debit the Member's Capital Account or reduce any obligation the Company has to the Member (or former Member), which debit or reduction the Partnership Representative shall communicate in writing to the Member (or former Member). Any such payment made by a Member (or former Member) shall not be treated as a Contribution.

(f) Survival. Notwithstanding any other provision of this Agreement to the contrary, a Member's obligation to comply with this Section 7.9 shall survive any transfer of its Company Interest or the dissolution, liquidation, winding up and termination of the Company, and, to the maximum extent not prohibited by applicable Law, for purposes of this Section 7.9, the Company shall be treated as continuing in existence. Accordingly, each Person that ceases to be a Member will, notwithstanding such transfer, dissolution, liquidation, winding up, or termination, reimburse, indemnify, and hold harmless the Company, the Managers, and their respective Affiliates from and against any liability that would be allocated to such Person under Section 7.9 if the Person were a Member at the time of determination.

(g) Liability of Partnership Representative. The Members specifically acknowledge that the Partnership Representative shall not be liable, responsible or accountable in damages or otherwise to the Company or any Member with respect to any action taken by it in its capacity as the Partnership Representative, except for gross negligence or willful misconduct. All reasonable costs and expenses incurred by the Partnership Representative in connection with an audit of a Company income tax return by any taxing authority shall be borne by the Company.

II.G.19.c.vii. Missouri Partnership Audit Procedures

RSMo § 143.425 coordinates Missouri audits with the post-TEFRA federal rules.

RIA Checkpoint Explanation ¶ 90,080 Taxation of Corporate Partners says (1/9/2021):

> Action taken by the IRS: Applicable to any adjustments to a taxpayer's federal taxable income or federal adjusted gross income with a final determination date occurring on or after January 1, 2021, taxpayers in a partnership are required to report and pay any Missouri tax due with respect to final federal adjustments arising from an audit or other action by the IRS or reported by the taxpayer on a timely filed amended federal income tax return by filing a federal adjustments report with the Missouri Department of Revenue for the reviewed year and, if applicable, paying the additional Missouri tax owed by the taxpayer no later than 180 days after the final determination date. [Mo. Rev. Stat. § 143.425(2).]
>
> Partnerships and partners also will report final federal adjustments arising from a partnership level audit or administrative adjustment request and make required payments. Partnerships will be represented in such actions by the partnership's state partnership representative, which will be the partnership's federal partnership representative unless otherwise designated in writing. Partners are prohibited from applying any deduction or credit on any amount determined to be owed under the legislation. [Mo. Rev. Stat. § 143.425(3) ; Mo. Rev. Stat. § 143.425(4) ; Mo. Rev. Stat. § 143.425(8).]
>
> The Department will assess additional tax, interest, additions to tax, and penalties due as a result of final federal adjustments arising from an audit by the IRS no later than three years after the return was filed, as provided in current law, or one year following the filing of the federal adjustments report. For taxpayers who fail to timely file the federal adjustments report, the Department will assess additional taxes, interest, additions to tax, and penalties either by three years after the return was filed, one year following the filing of the federal adjustments report, or six years after the final determination date, whichever is later. [Mo. Rev. Stat. § 143.425(10).]

> Taxpayers may make estimated payments of the Missouri tax expected to result from a pending IRS audit. Such payments will be credited against any tax liability ultimately found to be due to Missouri and limit the accrual of further interest on such amount. If the estimated payments exceed the final tax liability and interest ultimately determined to be due, the taxpayer will be entitled to a refund or credit for the excess amount, provided the taxpayer files a federal adjustments report or claim for refund or credit of tax no later than one year following the final determination date. [Mo. Rev. Stat. § 143.425(11).]

II.G.19.d. Electronic Signatures

At https://www.irs.gov/pub/foia/ig/spder/nhq-10-1121-0005.pdf is a November 18, 2021 "MEMORANDUM FOR ALL SERVICES AND ENFORCEMENT EMPLOYEES" with a subject line of "Temporary Deviation from Handwritten Signature Requirement for Limited List of Tax Forms," control number NHQ-10-1121-0005, and expiration date of 10/31/2023:

> This memorandum revises the memorandum issued on April 15, 2021 (Control Number NHQ-10-0421-0002).
>
> As part of our response to the COVID-19 situation, we have taken steps to protect employees, taxpayers and their representatives by minimizing the need for in-person contact. Taxpayer representatives have expressed concerns with securing handwritten signatures during these times for forms that are required to be filed or maintained on paper. To alleviate these concerns while promoting timely filing, we are implementing a deviation with this memorandum that allows taxpayers and representatives to use electronic or digital signatures[1] when signing certain forms that currently require a handwritten signature. The forms to which this flexibility applies can be found in the attachment to this memo. Such forms must be signed and postmarked on August 28, 2020 or later. The attachment may be updated from time to time to either add or remove applicable forms as appropriate.
>
> > [1] Electronic and digital signatures appear in many forms when printed and may be created by many different technologies. No specific technology is required for this purpose during this temporary deviation.

The Attachment was updated at https://www.irs.gov/newsroom/details-on-using-e-signatures-for-certain-forms to include the following (last reviewed or updated 3/31/3023; updated here 10/1/2023):

> Form 11-C, Occupational Tax and Registration Return for Wagering;
>
> Form 637, Application for Registration (For Certain Excise Tax Activities);
>
> Form 706, U.S. Estate (and Generation-Skipping Transfer) Tax Return;
>
> Form 706-A, U.S. Additional Estate Tax Return;
>
> Form 706-GS(D), Generation-Skipping Transfer Tax Return for Distributions;
>
> Form 706-GS(D-1), Notification of Distribution from a Generation-Skipping Trust;
>
> Form 706-GS(T), Generation-Skipping Transfer Tax Return for Terminations;

Form 706-QDT, U.S. Estate Tax Return for Qualified Domestic Trusts;

Form 706 Schedule R-1, Generation Skipping Transfer Tax;

Form 706-NA, U.S. Estate (and Generation-Skipping Transfer) Tax Return;

Types of acceptable electronic signatures

The IRS will accept a wide range of electronic signatures. An electronic signature is a way to get approval on electronic documents. It can be in many forms and created by many technologies. Acceptable electronic signature methods include:

1. A typed name typed on a signature block
2. A scanned or digitized image of a handwritten signature that's attached to an electronic record
3. A handwritten signature input onto an electronic signature pad
4. A handwritten signature, mark or command input on a display screen with a stylus device
5. A signature created by a third-party software

The IRS doesn't specify what technology a taxpayer must use to capture an electronic signature. The IRS will accept images of signatures (scanned or photographed) including common file types supported by Microsoft 365 such as tiff, jpg, jpeg, pdf, Microsoft Office suite or Zip.

Electronic execution of documents is important beyond IRS concerns. See ACTEC submits Request to the National Association of Secretaries of State (NASS) for State Issuance of Electronic Apostilles (e-App) by Secretaries of State. (August 10, 2021).

Sign and Send Documents Electronically discusses how to electronically sign documents and email documents to IRS during an audit or collection interaction.

II.G.19.e. Superseding Returns

A "superseding return" is a return filed after the original return was filed and before the due date of the original return. Generally, a superseding return replaces the original return, including changing any elections that are required to made on a timely filed original return. If the superseding return is filed after the original due date but before the extended due date, it is not a superseding return with respect to any elections that must be filed with the original return and that cannot be made on an extended return. In the Internal Revenue Manual, see part 21.6.7.4.10 (03-18-2022).

CCA 202026002 concluded that the original return, not the superseding return, is "the return" that starts the statutory period under Code § 6501 for assessment of three years and under Code § 6511 for filing a claim for refund of three years. The CCA reviewed *Zellerbach Paper Co. v. Helvering*, 293 U.S. 172 (1934); *National Paper Products Co. v. Helvering*, 293 U.S. 183 (1934); and *Haggar Co. v. Helvering*, 308 U.S. 389 (1940):

> **II. Statute of Limitations for Assessments under Section 6501**
>
> Under *Zellerbach* and *National Paper*, the original return, not the superseding return, starts the period of limitations for assessment under section 6501. In these two related cases, the issue before the Supreme Court was substantially the same, but the facts were slightly different. In both cases, new statutes were enacted after two companies had already timely filed their tax returns. Each statute affected income tax and was effective retroactively. In response to the new law, "[National Paper] filed an additional return, supplementing the original one by a statement of the additional taxes due." *Nat'l Paper*, 293 U.S. at 186. *Zellerbach Paper*, on the other hand, "did not make a new or supplemental return correcting the computation in the one on file." *Zellerbach*, 293 U.S. at 175. In both cases, the Commissioner issued a notice of deficiency after the limitation period for assessment had run from the original returns' filing date.
>
> The taxpayers argued that the notices of deficiency were untimely. The government's position was that, since the original returns did not incorporate the changes under the statute, the original return in both cases was a nullity, so the statute of limitations on assessment had not begun to run with the filing of the original returns. The Court disagreed. Discussing what is now known as the Beard test, the Court found the original returns filed by both *Zellerbach Paper Company* and *National Paper* met that test and started the statute of limitations for assessment. Thus, the notices of deficiency were untimely.
>
> The court disagreed with the government's argument that starting the period of limitation for assessment with the original return unfairly curtails the government's time for audit and assessment:

> [A] second return, reporting an additional tax, is an amendment or supplement to a return already upon the files, and being effective by relation does not toll a limitation which has once begun to run.... Supplement and correction in such circumstances will not take from a taxpayer, free from personal fault, the protection of a term of limitation already running for his benefit.

Id. at 180.[2] In coming to this conclusion, the *Zellerbach* Court deemed a loss of four months for audit insignificant, *Id*. at 181, and it apparently did not find a loss of ten months alone to be a factor that would change its decision in *National Paper*. *Nat'l Paper*, 293 U.S. at 185.

> [2] *Zellerbach* is cited for the proposition that a second return does not restart the limitations period, despite the fact that the taxpayer in *Zellerbach* did not file a second return. This is because the Court explained its reasoning on this issue in its *Zellerbach* opinion and then just referred back to that reasoning in its *National Paper* opinion. See *Nat'l Paper*, 293 U.S. at 186 (" *For reasons stated in our opinion in* [*Zellerbach*], the period of limitation began to run on the filing of the first return, and a return for additional taxes, even if filed afterwards, was an amendment or supplement which did not toll the statute.") (emphasis added).

The Court found the idea of tolling the statute due to a supervening change in the law particularly unfair to the taxpayer. Its reasoning, however, applies more broadly to all situations where an amended return is filed. For example, in *Badaracco v. Commissioner*, 464 U.S. 386 (1984),[1805] the Supreme Court held that the later filing of a non-fraudulent amended return, after the filing of a fraudulent return, cannot reinstate the general three-year limitations period and terminate the indefinite limitations period under section 6501(c)(1). *Badaracco*, 464 U.S. at 393-94 ("Thus, when Congress provided for assessment at any time in the case of a false or fraudulent 'return,' it plainly included by this language a false or fraudulent original return.... It is established that a taxpayer who submits a fraudulent return does not purge the fraud by subsequent voluntary disclosure; the fraud was committed, and the offense completed, when the original return was prepared and filed.")

In reaching its conclusion, the Court rejected the taxpayers' argument that, under *Zellerbach*, a "repentant" return terminated the indefinite limitations period, stating, "The [*Zellerbach*] Court held that an original return, despite its inaccuracy, was a 'return' for limitations purposes, so that the filing of an amended return did not start a new period of limitations running." *Badaracco*, 464 U.S. at 397. And it further noted, relying on *Zellerbach* and other cases, that "[i]t thus has been consistently held that the filing of an *amended return* in a nonfraudulent situation does not serve to extend the period within which the Commissioner may assess a deficiency." *Id*. at 393 n. 8 (emphasis added).[3]

> [3] The *Badaracco* opinion referred to, and was consistent with, an extensive body of law cited for the general proposition that an amended return is a nullity for most purposes (apart from refund claims). See, *e.g.*, *J.E. Riley Investment Co. v. Comm'r*, 311 U.S. 55 (1940) (an election required to be made on a "return" generally cannot be made or modified on an amended return); *Koch v. Alexander*, 561 F.2d 1115 (4th Cir. 1977) (A taxpayer cannot create Tax Court jurisdiction by filing an amended

---

[1805] [my footnote:] For more on *Badaracco*, see part III.B.2.f Triggering the Statute of Limitations for Grantor Trusts.

return reflecting a decrease in tax); *Plunkett v. Comm'r*, 41 B.T.A. 700, (1940), *aff'd*, 118 F.2d 644 (1st Cir. 1941) (The filing of a correct amended return does not cure an earlier defective filing so as to avoid the penalty for failure to file). Because this line of cases involves amended returns, it is distinguishable from cases that involve superseding returns, like the cases at hand, and should not apply to them.

Badaracco recognized that *Zellerbach* applies to any case involving amended returns. Thus it is a natural extension that *Zellerbach* apply to superseding returns filed during an extension period as well. Nothing in the *Zellerbach* opinion limits its holding to amended returns, nor does it differentiate between second returns filed before or after the deadline for filing. Rather, the Court refers to "a second return, reporting an additional tax," that is, "an amendment or supplement to a return already upon the files," a definition that would encompass both amended returns and superseding returns.

The reasoning of *Zellerbach* also applies with equal force to superseding returns filed on extension. In both superseding- and amended-return situations, if the second return were to restart the limitations period, the taxpayer would lose the protection of the assessment statute for the period between the dates the two returns were filed. This is unfair to the taxpayer and thwarts the purpose of the statute of limitations, 4 which, in the tax context, is "to cut off rights that might otherwise be asserted ...." See *Kavanagh v. Noble*, 332 U.S. 535, 539 (1947) (citing *Rosenman v. United States*, 323 U.S. 658, 661 (1945)), *reh'g denied*, 333 U.S. 850 (1948). This purpose is served best when the original return starts the period of limitations.

The loss of time to audit the superseding return, even if the superseding return were filed at the end of a six-month automatic extension period, does not influence our conclusion that an original return, despite its inaccuracy, is the return for purposes of the statute of limitations on assessment, and the filing of a superseding return during an extension period does not restart the period of limitations. See *Zellerbach* and *National Paper* (Court was unmoved by losses of four and ten months, respectively).

Haggar Co. v. Helvering, 308 U.S. 389, (1940), does not require a different conclusion. In *Haggar*, for purposes of a new capital stock tax, the taxpayer was required to declare the value of its stock on what the statute referred to as the "first return." The taxpayer could declare any value of capital stock for its first taxable year, but the declared value for the first year was a controlling factor for the computation of excess profits tax for later years. The statute provided that the declaration once made could not be amended.

On a timely filed return, Haggar mistakenly reported the par value, as distinguished from actual value, of its issued capital stock. Before the due date, it filed a superseding return declaring the actual value. The Commissioner, refusing to accept the value of the capital stock declared in the superseding return, gave notice of a deficiency in excess profits tax calculated upon what was declared in the first return. Noting that the government was not prejudiced, that the purpose of the statute was not thwarted, and that there was a longstanding administrative practice of accepting superseding returns in other contexts, the Court observed:

> "First return" thus means a return for the first year in which the taxpayer exercises the privilege of fixing its capital stock value for tax purposes, and includes a timely amended return for that year. A timely amended return is as much a "first return" for

> the purpose of fixing the capital stock value in contradistinction to returns for subsequent years, as is a single return filed by the taxpayer for the first tax year.

Haggar, 308 U.S. at 395-96.

Over the years, *Haggar* has come to stand for the proposition that a superseding return, whether filed on extension or not, is effective for most purposes. For example, courts have held that many elections required to be made on a timely return can be made or changed on a superseding return. See, *e.g.*, *National Lead Co. v. Commissioner*, 336 F.2d 134 (2d Cir. 1964) (inventory accounting relief provision); *Charles Leich & Co. v. United States*, 329 F.2d 649 (Ct. Cl. 1964) (excess profits tax election); *Wilson v. United States*, 267 F.Supp. 89 (E.D. Mo. 1967) (partnership tax year); *Cf. J.E. Riley Investment Co. v. Comm'r*, 311 U.S. 55 (1940) ("[*Haggar*] would compel the conclusion that had the amended return been filed within the period allowed for filing the original return, it would have been a first return [for purposes of determining percentage depletion election] ....") (citations omitted).

In addition, the Service has applied *Haggar* in the penalty context. *See*, *e.g.*, Rev. Rul. 78-256, 1978-1 C.B. 438 (holding that the "tax shown on the return" refers to the amount shown on a superseding return, not the original return, for purposes of calculating the estimated tax underpayment penalty in section 6655); Rev. Rul. 83-36, 1983-1 C.B. 358 (applying *Haggar* to the estimated tax underpayment penalty for individual taxpayers in section 6654).

Nonetheless, *Haggar* does not compel a conclusion that a superseding return is "the return" for purposes of the statute of limitations. It has never been applied in that context; nor should it be because the purpose of the statute of limitations is distinct from the purpose of the statute in *Haggar* and from the purposes of the statutes covering elections and penalties to which *Haggar* has been applied. While *Haggar* has been applied to statutes aimed at determining what substantively is included in the return, the statute of limitations is a mechanical rule with the purpose of cutting off rights, as discussed above. Furthermore, *Haggar* does not conflict with *Zellerbach*. A superseding return modifies or supersedes an original return under *Haggar* and still relates back to the date of the original return for timing purposes under *Zellerbach*. *Zellerbach* recognizes that a second return, although it does not restart the limitation period, is still "an amendment or supplement to a return already upon the files, and ... [is] effective by relation." *Zellerbach*, 293 U.S. at 180; see also Wilson, 267 F. Supp. at 91 (suggesting that the question *Haggar* addresses is "whether or not an amendment is part of a first return") (emphasis added); *Barber v. Comm'r*, 64 T.C. 314, 317 (1975) (noting that if the amended return had been timely filed, then under *Haggar*, "[the amended] return might then be treated as part of the original return").

III. Statute of Limitations for Claims for Refund under Section 6511

Zellerbach and *National Paper* also support the conclusion that the original return, not the superseding return, starts the period of limitations for claims for refund under section 6511. For example, *Zellerbach* has been applied to cases involving issues of whether amended returns restart the period of limitations for claims for refunds. *See, e.g., Kaltreider Construction, Inc. v. United States*, 303 F.2d 366, 368 (3d Cir.), *cert. den.*, 371 U.S. 877 (1962) (rejecting taxpayer's argument that the statute in section 6511 began at the time the "amended return" was filed because "[t]he language of the Supreme Court

> in [*Zellerbach*] is directly in point."); Rev. Rul. 72-311, 1972-1 C.B. 398 (citing *Kaltreider* in holding that the "return" referred to in section 6511 is the original return and not an amended return); see also *Adams v. I.R.S.*, No. 2:13-CV-04525-CAS, 2014 WL 457915, at *3 (C.D. Cal. 2014); *Chaney v. United States*, 45 Fed. Cl. 309, 314-15 (1999); *Muertens v. United States*, 12 Cl. Ct. 678, 679 (1987); *but see Greene v. United States*, 191 F.3d 1341, 1343-44 (Fed. Cir. 1999) (holding the statute of limitations for seeking refund began to run upon filing of an amended return; distinguishable because the tax liability at issue was not required to be shown on the original return and could not be known until at least two years after the taxable year ended)
>
> Similar to the 6501 context, *Zellerbach* also applies when the second return filed is a superseding return filed on extension. The opinions that apply *Zellerbach* as support for holding that an amended return does not restart the limitations period under 6511 discuss the general principle that all statutes of limitations involve hardship and it is not the court's role to alleviate that hardship. See *Kaltreider*, 303 F.2d at 368-69 ("Statutes of limitation frequently involve some hardship, but alleviation of that hardship is matter of policy for Congress."); *Chaney*, 45 Fed. Cl. at 317 ("Statutes of limitations are established to cut off rights, justifiable or not, that might otherwise be asserted and they must be strictly adhered to by the judiciary.") (citations omitted).
>
> The hardship faced by taxpayers in the section 6511 refund limitation period context is the same regardless of whether the second return is an amended return or a superseding return. In both instances, the statute begins running with the original return. The Service faces the same hardship, as discussed above, in the context of the assessment statute of limitations under 6501. Enacting these sections at the same time, Congress created time periods that run concurrently, and treating superseding returns differently under each section would thwart these concurrent periods by starting the periods at different times. Thus, a court considering this issue under section 6511 would likely find that *Zellerbach* requires the statute of limitations for claims for refund to start when the original return is filed, not when the superseding return is filed.
>
> *Haggar* can again be distinguished in the same ways discussed above in the context of section 6501. A superseding return can be effective in modifying the original return by relating back to and becoming part of the original return, under *Haggar*, without tolling the period of limitations for claims for refund, in line with *Zellerbach*. Moreover, the purpose of the statute of limitations supports interpreting the ambiguous term, "the return," in section 6511 to mean the original return.

Reg 26.2632-1(b)(4)(iii), Example 1, "Modification of allocation of GST exemption," clearly allows a superseding return to change the original GST allocation:

> On December 1, 2003, T transfers $100,000 to an irrevocable GST trust described in section 2632(c)(3)(B). The transfer to the trust is not a direct skip. The date prescribed for filing the gift tax return reporting the taxable gift is April 15, 2004. On February 10, 2004, T files a Form 709 on which T properly elects out of the automatic allocation rules contained in section 2632(c)(1) with respect to the transfer in accordance with paragraph (b)(2)(iii) of this section, and allocates $50,000 of GST exemption to the trust. On April 13th of the same year, T files an additional Form 709 on which T confirms the election out of the automatic allocation rules contained in section 2632(c)(1) and allocates $100,000 of GST exemption to the trust in a manner that clearly indicates the intention to modify and supersede the prior allocation with respect to the 2003 transfer.

The allocation made on the April 13 return supersedes the prior allocation because it is made on a timely-filed Form 709 that clearly identifies the trust and the nature and extent of the modification of GST exemption allocation. The allocation of $100,000 of GST exemption to the trust is effective as of December 1, 2003. The result would be the same if the amended Form 709 decreased the amount of the GST exemption allocated to the trust.

II.G.19.f. Reliance on FAQs Issued by IRS

IR-2021-202 (10/15/2021) provides:[1806]

> WASHINGTON — Today, the Internal Revenue Service is updating its process for certain frequently asked questions (FAQs) on newly enacted tax legislation. The IRS is updating this process to address concerns regarding transparency and the potential impact on taxpayers when these FAQs are updated or revised. At the same time, the IRS is also addressing concerns regarding the potential application of penalties to taxpayers who rely on FAQs by providing clarity to taxpayers as to their ability to rely on FAQs for penalty protection.
>
> Significant FAQs on newly enacted tax legislation, as well as any later updates or revisions to these FAQs, will now be announced in a news release and posted on IRS.gov in a separate Fact Sheet. These Fact Sheet FAQs will be dated to enable taxpayers to confirm the date on which any changes to the FAQs were made. Additionally, prior versions of Fact Sheet FAQs will be maintained on IRS.gov to ensure that, if a Fact Sheet FAQ is later changed, taxpayers can locate the version they relied on if they later need to do so. In addition to significant FAQs on new legislation, the IRS may apply this updated process in other contexts, such as when FAQs address emerging issues.
>
> To address concerns about the potential application of penalties to taxpayers who rely on an FAQ, the IRS is today releasing a statement clarifying that if a taxpayer relies on any FAQ (including FAQs released before today) in good faith and that reliance is reasonable, the taxpayer will have a "reasonable cause" defense against any negligence penalty or other accuracy-related penalty if it turns out the FAQ is not a correct statement of the law as applied to the taxpayer's particular facts. For more information on taxpayer reliance, see the General Overview of Taxpayer Reliance on Guidance Published in the Internal Revenue Bulletin and FAQs.
>
> As part of today's revision of the FAQ process, the following legend will be added to Fact Sheet FAQs:
>
> *These FAQs are being issued to provide general information to taxpayers and tax professionals as expeditiously as possible. Accordingly, these FAQs may not address any particular taxpayer's specific facts and circumstances, and they may be updated or modified upon further review. Because these FAQs have not been published in the Internal Revenue Bulletin, they will not be relied on or used by the IRS to resolve a case. Similarly, if an FAQ turns out to be an inaccurate statement of the law as applied to a particular taxpayer's case, the law will control the taxpayer's tax liability. Nonetheless, a taxpayer who reasonably and in good faith relies on these FAQs will not be subject to a*

[1806] The web page from which I copied said, "Page Last Reviewed or Updated: 22-Nov-2021."

penalty that provides a reasonable cause standard for relief, including a negligence penalty or other accuracy-related penalty, to the extent that reliance results in an underpayment of tax. Any later updates or modifications to these FAQs will be dated to enable taxpayers to confirm the date on which any changes to the FAQs were made. Additionally, prior versions of these FAQs will be maintained on IRS.gov to ensure that taxpayers, who may have relied on a prior version, can locate that version if they later need to do so.

General Overview of Taxpayer Reliance on Guidance Published in the Internal Revenue Bulletin and FAQs

Guidance Published in the Internal Revenue Bulletin

The Internal Revenue Bulletin (Bulletin) is the authoritative instrument of the Commissioner of Internal Revenue for announcing official rulings and procedures of the Internal Revenue Service and for publishing Treasury Decisions, Executive Orders, Tax Conventions, legislation, court decisions, and other items of general interest.

It is the policy of the Service to publish in the Bulletin all substantive rulings necessary to promote a uniform application of the tax laws, including all rulings that supersede, revoke, modify, or amend any of those previously published in the Bulletin. All published rulings apply retroactively unless otherwise indicated. Procedures relating solely to matters of internal management are not published; however, statements of internal practices and procedures that affect the rights and duties of taxpayers are published.

Revenue rulings represent the conclusions of the Service on the application of the law to the pivotal facts stated in the revenue ruling. In those based on positions taken in rulings to taxpayers or technical advice to Service field offices, identifying details and information of a confidential nature are deleted to prevent unwarranted invasions of privacy and to comply with statutory requirements.

Rulings and procedures reported in the Bulletin do not have the force and effect of Treasury Department Regulations, but they may be used as precedents. Rulings not published in the Bulletin will not be relied on, used, or cited as precedents by Service personnel in the disposition of other cases. In applying published rulings and procedures, the effect of subsequent legislation, regulations, court decisions, rulings and procedures must be considered, and Service personnel and others concerned are cautioned against reaching the same conclusions in other cases unless the facts and circumstances are substantially the same.

FAQs

FAQs are a valuable alternative to guidance published in the Bulletin because they allow the IRS to more quickly communicate information to the public on topics of frequent inquiry and general applicability. FAQs typically provide responses to general inquiries rather than applying the law to taxpayer-specific facts and may not reflect various special rules or exceptions that could apply in any particular case. FAQs that have not been published in the Bulletin will not be relied on, used or cited as precedents by Service personnel in the disposition of cases. Similarly, if an FAQ turns out to be an inaccurate statement of the law as applied to a particular taxpayer's case, the law will control the taxpayer's tax liability. Only guidance that is published in the Bulletin has precedential value.

Notwithstanding the non-precedential nature of FAQs, a taxpayer's reasonable reliance on an FAQ (even one that is subsequently updated or modified) is relevant and will be considered in determining whether certain penalties apply. Taxpayers who show that they relied in good faith on an FAQ and that their reliance was reasonable based on all the facts and circumstances will have a valid reasonable cause defense and will not be subject to a negligence penalty or other accuracy-related penalty to the extent that reliance results in an underpayment of tax. See Treas. Reg. § 1.6664-4(b) for more information. In addition, FAQs that are published in a Fact Sheet that is linked to an IRS news release are considered authority for purposes of the exception to accuracy-related penalties that applies when there is substantial authority for the treatment of an item on a return. See Treas. Reg. § 1.6662-4(d) for more information.

Banoff, Lipton & Cohen, "What Happens to Old FAQs Under IRS's New FAQ Process?" *Journal of Taxation* (1/2022), includes the following:

Question 1: What is the legal effect of an FAQ?

We have previously visited the question of what is the legal effect of the IRS's answers to FAQs that are posted on the IRS website. See, *e.g.*, Shop Talk, "No News is Good News and Bad News: No New FAQs for Partnership Return Preparers," 111 JTAX 62 (July 2009) and "FAQs on Partnership Capital and Profits Interests: Are They (and Were They Ever) Reliable?," 127 JTAX 44 (July 2017). Others have wrestled with the question, also. See, e.g., Coder, "News Analysis: How Do FAQs Fit Into the Guidance Puzzle?," 2011 TNT 64-1 (April 4, 2011). Also see *Tom Reed*, TC Memo 2014-41, in which the taxpayer cited supporting FAQs, and the Tax Court simply responded that "informal guidance, such as the FAQs posted to the IRS's Web site, is not an authoritative source of Federal tax law."

The question as to whether reliance on FAQs can be used to sustain tax return reporting positions and avert penalties under Section 6662 for taxpayers is covered in the IR and the accompanying "General Overview of Taxpayer Reliance on Guidance Published in the Internal Revenue Bulletin and FAQs" (the "IRS FAQs Statement"). The IRS's view: FAQs are not given precedential effect in sustaining tax return reporting positions, but they may help taxpayers avert negligence and certain other tax penalties. (As discussed below, the IR and the IRS FAQs Statement are inconsistent as to exactly which penalties can be averted.)

With respect to sustaining tax return reporting positions, the IRS FAQs Statement provides: "FAQs that have not been published in the [Internal Revenue] Bulletin will not be relied on, used, or cited as precedents by Service personnel in the disposition of cases. Similarly, if an FAQ turns out to be an inaccurate statement of the law as applied to a taxpayer's case, the law will control the taxpayer's tax liability. Only guidance that is published in the Bulletin has precedential value." With respect to averting certain penalties (of the kind that arise under Section 6662), the IR states: "To address concerns about the potential application of penalties to taxpayers who rely on an FAQ, the IRS is today releasing a statement clarifying that if a taxpayer relies on an FAQ (including FAQs released before today) in good faith and that reliance is reasonable, the taxpayer will have a 'reasonable cause' defense against any negligence penalty or other accuracy-related penalty if it turns out the FAQ is not a correct statement of the law as applied to the taxpayer's particular facts."

The IRS FAQs Statement makes an important distinction (not contained in the IR) with respect to FAQs that are published in a Fact Sheet (on IRS.gov) that is linked to an IRS news release. The IRS FAQs Statement provides: "Notwithstanding the non-precedential nature of FAQs, a taxpayer's reasonable reliance on an FAQ (even one that is subsequently updated or modified) is relevant and will be considered in determining whether certain penalties apply. Taxpayers who show that they relied in good faith on an FAQ and that their reliance was reasonable based on all the facts and circumstances will have a valid reasonable cause defense and will not be subject to a negligence penalty or other accuracy-related penalty to the extent that reliance results in an underpayment of tax. See Treas. Reg. Sec. 1.6664-4(b) for more information. In addition, FAQs that are published in a Fact Sheet that is linked to an IRS news release are considered authority for purposes of the exception to accuracy-related penalties that applies when there is substantial authority for the treatment of an item on a return. See Treas. Reg. Sec. 1.6662-4(d) for more information." (emphasis added.)

Let's first analyze the new guidance with respect to the 'reasonable reliance' defense theoretically available for all FAQs (including FAQs released prior to October 15, 2021). What exactly is "reasonable reliance" on an FAQ? Does it include a taxpayer's reliance on an FAQ if the IRS withdraws the FAQ from IRS.gov after the relevant tax year ends but before the taxpayer files that year's tax return? If the answer is "no," should taxpayers who rely on FAQs file their tax returns as soon as possible, to avoid losing their 'reasonable reliance' shield to avert penalties in the event the FAQ is withdrawn or modified after the tax return filing season begins but before the taxpayer's filing deadline (including extensions)?

In a similar vein, what if the IRS deletes the FAQ from IRS.gov after a calendar year taxpayer relies on the FAQ in good faith in connection with the taxpayer's disposition on (say) February 1, 2022 of its property but the FAQ is withdrawn on December 1, 2022 (i.e., before the end of the taxpayer's relevant tax year)? Does the taxpayer lose their penalty defense under the IR because they relied on it too soon? There may be existing guidance on what constitutes "reasonable reliance" upon other types of authorities to avert penalties, albeit arising in different contexts; would that guidance prove to be relevant in answering these questions? Alternatively, in determining whether substantial authority is present for purposes of averting penalties arising under Section 6662, there is substantial authority for the tax treatment "at the time the return is filed or there was substantial authority on the last day of the taxable year to which the return relates," Reg. 1.6662-4(d)(3)(iv)(C). If that standard were applicable in determining whether there was "reasonable reliance" by our taxpayer on the FAQ, their reliance would not have been reasonable because the FAQ was withdrawn on December 1, 2022, i.e., before the end of the taxpayer's relevant tax year (which occurs on December 31, 2022). If instead the FAQ had been withdrawn (say) February 1, 2023, the taxpayer's reliance on the FAQ would not have been unreasonable solely because of the FAQ's withdrawal (coming after the end of the taxpayer's relevant tax year) even if the taxpayer did not timely file their 2022 income tax return until after February 1, 2023.

And exactly what penalty relief is provided if a taxpayer establishes the 'reasonable reliance' on FAQs' defense? Pursuant to the IR the relief is broad, as it applies to negligence penalties or other accuracy-related penalties. However, the legend that will be attached to Fact Sheet FAQs limits the relief to situations where there is an "underpayment of tax." It has been observed that the 'legendary' language would appear to prohibit reliance on FAQs to avoid information penalties, underreporting penalties, failure to file penalties, or other penalties not tied to underpayment of tax. See Jones, Monahan, and Sambur, "IRS updates process for FAQs on new tax legislation and addresses taxpayer reliance concerns," posted 11/11/21, https://www.jdsupra.com/legalnews/irs-upgrades-process-for-faqs-on-new-tax-3533917/, last visited 12/3/21.

Let's next focus on those FAQs that are published in a Fact Sheet that is linked at an IRS news release. The Service has described "IRS Fact Sheets" as being "topical information issued to the media by IRS Media Relations," see Internal Revenue Manual (IRM) 11.53.2.3.5(5)b (04-15-2015). (An archival list of Fact Sheets is maintained on the IRS's website at www.irs.gov/newsroom/news-release-and-fact-sheet-archive.) The IRS FAQs Statement, while referencing Reg. 1.6662-4(d), says those FAQs are considered "authority" for purposes of the exception to the accuracy-related penalties that applies (i.e., under Section 6662) when there is "substantial authority" for the treatment of an item on a return. Having your FAQ constitute "authority" is like a get-out-of-jail card in Monopoly; it means you don't have to prove you actually relied on the FAQ, you don't have to prove your reliance on the FAQ was reasonable (based on all of the facts and circumstances), and you don't have to prove you relied in good faith on the FAQ with respect to your return for the tax year in question.

Lastly (and importantly), neither the IR nor the IRS FAQs Statement addresses whether tax return preparers can avert potential return preparer penalties under Section 6694 if they have reasonably relied in good faith upon an FAQ in preparing a tax return. Will preparers be allowed to consider all, some, or no FAQs as being "substantial authority" under Section 6694(a)(2) without disclosure on the tax return? That question is not explicitly answered in the IR or the IRS FAQs Statement.

An analysis of issues that FAQs face under the Administrative Procedures Act ("APA") arising from the lack of notice and comment with respect to their issuance was beyond the scope of our 2021 Shop Talk article. However, we did a deep dive last August with the assistance of Joseph B. (Jud) Judkins of Baker McKenzie on that issue. See Shop Talk, "Q: Does the Administrative Procedure Act Apply to IRS FAQs? A: Now More Than Ever!," 135 JTAX 35 (August 2021). Not unexpectedly, neither the IR nor the IRS FAQs Statement addresses or provides guidance with respect to the potential application of the APA to the IRS's FAQ process.

Question 2: What is the legal effect of an FAQ after the FAQ has been withdrawn?

This was and remains a trick question. A Withdrawn FAQ has no legal effect because the FAQ while alive and well (i.e., outstanding and on point) had no legal effect, at least in the IRS's eyes, for purposes of sustaining tax return reporting positions. However, now that taxpayers seem to be able to rely upon an FAQ for certain penalty protection purposes, it would likewise seem that the Withdrawn FAQ would still be available for penalty-aversion reliance purposes for past positions (with the timing issues raised above) but would not for positions taken after the FAQ's withdrawal.

Question 3: Can a Withdrawn FAQ take on a life of its own, and if so, how?

A Withdrawn FAQ cannot easily take on a life of its own unless it is memorialized and remains relevant. One way to memorialize informal or unofficial IRS guidance is to weave it into the fabric of a contemporaneous article, as described in our 2021 Shop Talk article. Another way is for the FAQ to remain listed for all time (as a Withdrawn FAQ) on the IRS's new FAQs Fact Sheet list. Will Withdrawn FAQs be so listed or rather be expunged? We address that in Question 4, which follows.

Question 4: Are Withdrawn FAQs maintained somewhere by the IRS, so that field agents, ruling specialists, chief counsel's office, taxpayers and their tax counsel and return preparers, and the courts (if need be) can find them later on?

As described herein, there is no accessible IRS site that maintains Withdrawn FAQs, but as stated in the IR, the IRS intends to do something about that, at least on a going forward basis. As mentioned in our 2021 Shop Talk article and still true as of the day we submitted this article for publication, we can find and search *existing* FAQs in their current versions at the IRS website www.irs.gov/FAQs. But what of those FAQs that no longer grace the Service's website? We remain unaware of any official database that contains only Withdrawn FAQs. Specifically, once the IRS retires (withdraws? revokes? rescinds? terminates? liquidates? vaporizes?) an FAQ, where does it go? Do old, retired FAQs go to the Old FAQs' Home? Does Scotty beam them down in the transporter to a barren planet populated solely with Withdrawn FAQs? Are they instead laid to rest in alphabetical, chronological, and numerical order by geriatric, Dewey-decimal spouting, cross-indexing librarians in the (until now, top-secret) National FAQs Repository located outside Baltimore? We have tried to gain access to Withdrawn FAQs in all those places, without success.

In our search last year for Withdrawn FAQs, we contacted a well-respected colleague who in turn identified an IRS official with broad institutional knowledge. The official professed to not knowing any general method for finding old FAQs on government intranet sites or what the rules would be for sharing them with us non-government types. That official thought there might be a huge amount of material on those sites, albeit not organized in any useful way. The lack of a publicly available archive of FAQs has been described as "appalling." (Statement attributed to Bob Probasco, Director of the Tax Resolution Clinic, Texas A&M University School of Law, in van den Berg, "IRS Faces Pushback for Relying on FAQs for Guidance", Law360 Tax Authority (July 21, 2020).) (No disagreement from us.) We pointed out in our 2021 Shop Talk article that if one is successful at reconstructing the timeline of IRS guidance, it is possible to use the Wayback Machine (available at web.archive.org) to go to the IRS website and find withdrawn FAQs. For example, FAQ #1 of the "2008 Changes to Form 1065 - Frequently Asked Questions" (which has long been withdrawn) can be found at http://web.archive.org/web/20090201022647/http://irs.gov/businesses/partnerships/article/0,,id=186863,00.html. However, independent digital archives such as the Wayback Machine, as well as tax news services, are not maintained by the IRS or any other governmental organization (the Wayback Machine is an initiative of a 501(c)(3) non-profit known as the Internet Archive) and it is uncertain whether one could prove the authenticity of any such independent archives or tax services.

The IR professes to address these concerns regarding transparency and the potential impact on taxpayers when FAQs *on newly enacted tax legislation* are updated or revised. The IR states “significant FAQs” (an undefined term) on newly enacted tax legislation, as well as any later updates or revisions to those FAQs, will be announced in a news release and posted on IRS.gov in a separate Fact Sheet. These Fact Sheet FAQs will be dated to enable taxpayers to confirm the date on which “any changes to the FAQs” were made. Additionally, prior versions of Fact Sheet FAQs will be maintained on IRS.gov to ensure that “if a Fact Sheet FAQ is later changed,” taxpayers can locate the version they relied on if they later need to do so. Will the IRS maintain or archive the information for Withdrawn FAQs, or only those that are “changed”? Neither the IR nor the IRS FAQs Statement addresses or answers that question. The common meaning of “changed” does not seem to encumber “withdrawn”, “revoked”, “rescinded”, “retired”, “vaporized”, or any other synonym that means the FAQ has gone poof! Indeed, elsewhere in the IR, in describing the legend that will be added to Fact Sheet FAQs, the language states, “Any later updates or modifications to these FAQs will be dated” as described above, and “prior versions of these FAQs will be maintained on IRS.gov to ensure that taxpayers, who may have relied on a prior version, can locate that version if they later need to do so.”

Should a Withdrawn FAQ be expunged from the Fact Sheet FAQs? Not if transparency and the ability of taxpayers to avert penalties is to be preserved. Indeed, the IRS FAQs Statement, in discussing guidance published in the Bulletin, states, “It is the policy of the Service to publish in the Bulletin all substantive rulings necessary to promote a uniform application of the tax laws, including all rulings that supersede, *revoke*, modify, or amend any of those previously published in the Bulletin.” (emphasis added.) The same policy should apply to FAQs, although it is not so stated in the “FAQs” portion of the IRS FAQs Statement. Hopefully, the IRS will clarify the IR to confirm that Withdrawn FAQs (and not merely those that have been changed, updated, or revised) that have been listed at IRS.gov under the new process also will be preserved at IRS.gov, unlike the IRS’s practice preceding the IR.

Will the transparency and archiving of FAQs be extended to those FAQs (future and past) that are not “significant FAQs on newly enacted legislation”? The IRS clearly thought about it and the IR leaves that open – no guarantees that it will, but no prohibition, either. The IR simply states, “In addition to significant FAQs on new legislation, the IRS may apply this updated process in other contexts, such as when FAQs address emerging issues.” The IR does not reference the significant number of historic FAQs that are designed to clarify existing law or guidance. That category also is ripe for application of the updated process. In summary: if the IRS is truly aiming to be FAQ-user friendly and helpful, it should so extend the transparency and archiving of FAQs beyond those it deems to be “significant FAQs on new legislation.” If the IRS does not now have (and does not in the future dedicate) manpower sufficient to undertake the appropriate extended application of the new FAQ process, it is unlikely to voluntarily so extend.

Will FAQs on new tax legislation that were issued prior to October 15, 2021 (the date of IR-2021-202) also be covered by this new process? Again, there is no express answer. The IR refers to FAQs released prior to October 15, 2021 only in the context of confirming that taxpayers who reasonably rely “on any FAQ (including FAQs released before today) in good faith” may have a “reasonable cause” defense against the specified penalties. However, there is no statement that the IRS intends to go back and cover the one thousand plus FAQs that have been previously issued and create an archival trail (regardless of whether those FAQs were subsequently withdrawn). If anything, the IR's discussion of Fact Sheet FAQs indicates the new process will be a prospective exercise: "Significant FAQs on newly enacted tax legislation, as well as any later updates or revisions to these FAQs, will *now* be announced in a news release and posted on IRS.gov in a separate fact sheet" (emphasis added).

Question 5: If you can no longer find them maintained online by the IRS, can you nonetheless still rely on them?

If the FAQ has been withdrawn and is no longer online, a taxpayer can expect an IRS auditor to ignore the ghost FAQ unless at a minimum as an evidentiary matter the taxpayer can produce a true and correct copy of the original FAQ. For this reason it is always prudent (and has long been suggested by commentators) for the taxpayer and its representative / return preparer / tax counsel to retain a copy of the FAQ with the date stamp that it has been downloaded or obtained from the IRS site, as back-up support for any position taken in reliance on the FAQ, should the FAQ be withdrawn or the content later be changed from the version of the FAQ that has been withdrawn. Accord: Coder, supra. The retention copy might be a hard copy reproduction or a computer-stored copy (e.g., a scan attached as a pdf/email to the firm). And even after furnishing the IRS representative with a true copy, there can be no assurance that they will "accept" or acknowledge the copy, much less give it effect, and much, much less treat it as precedential with respect to supporting a tax return position or averting a penalty.

Taxpayers and their representatives should recognize that (as described in the IR and IRS FAQs Statement) those publications' reference to FAQs (other than Fact Sheet FAQs that are linked to an IRS news release) as a defense against specified penalties will only be permitted where the taxpayer relies on the FAQ in good faith and that reliance is reasonable. There are three elements that the taxpayer must satisfy: that the taxpayer actually relied on the FAQ in question, the taxpayer so relied in good faith, and the taxpayer's reliance was "reasonable". This will necessitate creating and retaining sufficient, contemporaneous documentation that each of these requirements is met. Merely finding an FAQ to have been "on point" and outstanding at the time of the filing of the taxpayer's return with respect to the relevant event is not enough.

One last point: the IR, the IRS FAQs Statement and the new IRS FAQs Fact Sheets can themselves be withdrawn or revoked. Not being published in the Bulletin, they do not constitute authoritative guidance for purposes of reliance by taxpayers and their advisors and return preparers. Will the IRS issue guidance that will be published in the Bulletin (be it via regulation, revenue ruling, revenue procedure, or otherwise), thereby memorializing and legitimizing the IRS's new FAQ process? For example, will the regulations under Section 6662 or 6664 be revised? Or will the new program be like the airlines' award of lifetime elite status to their selected million-mile frequent flyer customers, which in the fine print effectively says, "you have lifetime elite status until we revoke it.... which we may do at any time during your lifetime, at our whim"?

In conclusion, your Shop Talk editors recognize that the IRS has long used FAQs to pre-date or augment other forms of IRS guidance, and we think the IRS is trying to get FAQ-based guidance out quickly and efficiently. Further, and more practically, without an accessible and authoritative archive of Withdrawn FAQs (including old FAQ versions), taxpayers and practitioners are at risk of relying on an IRS position which later evolves or is withdrawn without explanation, if they were ever not at risk in relying on an FAQ in the first place. The new process as announced in the IR is a step in the right direction, at least with respect to those FAQs the IRS deigns to be "significant FAQs on newly enacted tax legislation". The IRS should apply the updated process as broadly and quickly as practicable in other contexts, including FAQs that address emerging issues. That clearly will take quite some time and effort. And how will the Service educate its thousands of employees who need to know of this new penalty protection that is being provided with respect to positions taken under certain FAQs? Will the IRS add the new FAQ procedures to its Internal Revenue Manual?

II.G.19.g. Avoid Penalty by Disclosing on Original Return or Amending Return

Rev. Proc. 2022-41, § 1, "Purpose," explains generally disclosures made on returns to avoid penalties:

> This revenue procedure updates Rev. Proc. 2021-52, 2021-51 I.R.B. 883, and identifies circumstances under which the disclosure on a taxpayer's income tax return with respect to an item or position is adequate for the purpose of reducing the understatement of income tax under section 6662(d) of the Internal Revenue Code (relating to the substantial understatement aspect of the accuracy-related penalty), and for the purpose of avoiding the tax return preparer penalty under section 6694(a) (relating to understatements due to unreasonable positions) with respect to income tax returns. This revenue procedure does not apply with respect to any other penalty provisions (including but not limited to the disregard provisions of the section 6662(b)(1) accuracy-related penalty, the section 6662(i) increased accuracy-related penalty in the case of nondisclosed noneconomic substance transactions, and the section 6662(b)(7) and (j) increased accuracy-related penalty in the case of undisclosed foreign financial asset understatements). If this revenue procedure does not include an item or position, disclosure is adequate with respect to that item or position only if made on a properly completed Form 8275 or 8275-R, as appropriate, attached to the return for the year or to a qualified amended return. See Treas. Reg. § 1.6664-2(c) for information about qualified amended returns. This revenue procedure applies to any income tax return filed on 2022 tax forms for a taxable year beginning in 2022, and to any income tax return filed in 2023 on 2022 tax forms for short taxable years beginning in 2023.

The above procedure is updated annually, and the reader should review the most recent version for guidance.

As to amended returns, Rev. Proc. 2022-39, § 1, "Purpose," provides:

> The purpose of this revenue procedure is to obsolete Rev. Proc. 94-69, 1994-2C.B. 804, and prescribe special procedures for eligible taxpayers to file a qualified amended return in accordance with § 1.6664-2(c)(4)(ii) of the Income Tax Regulations. This revenue procedure also sets forth special procedures for eligible taxpayers to show additional tax due or make adequate disclosure with respect to an item or a position on a previously filed return to avoid imposition of the accuracy-related penalties described in §§ 6662(b)(1) and 6662(b)(2) of the Internal Revenue Code (Code).

Section 3, "Scope," discusses how Rev. Proc. 2022-39 applies to taxpayers under the Coordinated Industry Case Program (CIC), the Large Corporate Compliance Program (LCC), or the Large Partnership Compliance Program (LPC) or to other taxpayers:

.01. *Eligible taxpayers*. The special procedures set forth in this revenue procedure are available to eligible taxpayers. An "eligible taxpayer" means any taxpayer selected for examination under the LCC (or successor program) if, on the date on which the IRS first contacts the taxpayer concerning an examination of an income tax return, at least four of the taxpayer's income tax returns for the five taxable years preceding the taxable year at issue are (or were) under examination under the LCC, the CIC, or a successor program. An eligible taxpayer also means any partnership selected for examination under the LPC (or successor program) if, on the date on which the IRS first contacts the partnership concerning an examination of a return of partnership income, at least four of the partnership's returns for the five taxable years preceding the taxable year at issue are (or were) under examination under the LPC (or successor program). Taxpayers selected for examination under the LCC or the LPC will be notified by the IRS if they are eligible taxpayers under this revenue procedure.

.02. *Procedures for ineligible taxpayers*. Taxpayers not eligible for, or making disclosures beyond the scope of, the special procedures set forth in this revenue procedure have the opportunity to utilize existing methods to avoid the imposition of penalties, including by filing a qualified amended return as described in and satisfying the requirements of § 1.6664-2(c)(3), or by adequately disclosing the position on a properly completed Form 8275, Form 8275-R, or Schedule UTP, Uncertain Tax Position Statement, filed with a return and satisfying the requirements of § 1.6662-3(c).

Rev. Proc. 2022-39, § 4.01 provides, among other requirements:

For purposes of avoiding the imposition of the penalty under § 6662(b)(1) for negligence or disregard of rules or regulations, and the substantial understatement penalty under § 6662(b)(2), a properly completed Form 15307, Post-Filing Disclosure for Specified Large Business Taxpayers (or successor form), is treated as a qualified amended return with respect to a particular taxable year of an eligible taxpayer if an eligible taxpayer furnished it to the IRS personnel conducting the examination after the tax return with respect to the particular taxable year has been filed but no later than 30 days (or a later date agreed to in writing by the IRS with respect to a particular taxable year) from the date of a written request to the taxpayer that Form 15307 be furnished with respect to that taxable year.

Reg. § 1.6664-2(c)(3), "Qualified amended return defined," provides:

(i) *General rule*. A qualified amended return is an amended return, or a timely request for an administrative adjustment under section' 6227, filed after the due date of the return for the taxable year (determined with regard to extensions of time to file) and before the earliest of -

(A) The date the taxpayer is first contacted by the Internal Revenue Service (IRS) concerning any examination (including a criminal investigation) with respect to the return;

(B) The date any person is first contacted by the IRS concerning an examination of that person under section 6700 (relating to the penalty for promoting abusive tax shelters) for an activity with respect to which the taxpayer claimed any tax benefit on the return directly or indirectly through the entity, plan or arrangement described in section 6700(a)(1)(A);

(C) In the case of a pass-through item (as defined in § 1.6662-4(f)(5)), the date the pass-through entity (as defined in § 1.6662-4(f)(5)) is first contacted by the IRS in connection with an examination of the return to which the pass-through item relates;

(D)

(1) The date on which the IRS serves a summons described in section 7609(f) relating to the tax liability of a person, group, or class that includes the taxpayer (or pass-through entity of which the taxpayer is a partner, shareholder, beneficiary, or holder of a residual interest in a REMIC) with respect to an activity for which the taxpayer claimed any tax benefit on the return directly or indirectly.

(2) The rule in paragraph (c)(3)(i)(D)(1) of this section applies to any return on which the taxpayer claimed a direct or indirect tax benefit from the type of activity that is the subject of the summons, regardless of whether the summons seeks the production of information for the taxable period covered by such return; and

(E) The date on which the Commissioner announces by revenue ruling, revenue procedure, notice, or announcement, to be published in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter), a settlement initiative to compromise or waive penalties, in whole or in part, with respect to a listed transaction. This rule applies only to a taxpayer who participated in the listed transaction and for the taxable year(s) in which the taxpayer claimed any direct or indirect tax benefits from the listed transaction. The Commissioner may waive the requirements of this paragraph or identify a later date by which a taxpayer who participated in the listed transaction must file a qualified amended return in the published guidance announcing the listed transaction settlement initiative.

(ii) *Undisclosed listed transactions*. An undisclosed listed transaction is a transaction that is the same as, or substantially similar to, a listed transaction within the meaning of § 1.6011-4(b)(2) (regardless of whether § 1.6011-4 requires the taxpayer to disclose the transaction) and was neither previously disclosed by the taxpayer within the meaning of § 1.6011-4 or § 1.6011-4T, nor disclosed under Announcement 2002-2 (2002-1 C.B. 304), (see § 601.601(d)(2)(ii) of this chapter) by the deadline therein. In the case of an undisclosed listed transaction for which a taxpayer claims any direct or indirect tax benefits on its return (regardless of whether the transaction was a listed transaction at the time the return was filed), an amended return or request for administrative adjustment under section 6227 will not be a qualified amended return if filed on or after the earliest of -

(A) The dates described in paragraph (c)(3)(i) of this section;

(B) The date on which the IRS first contacts any person regarding an examination of that person's liability under section 6707(a) with respect to the undisclosed listed transaction of the taxpayer; or

(C) The date on which the IRS requests, from any person who made a tax statement to or for the benefit of the taxpayer or from any person who gave the taxpayer material aid, assistance, or advice as described in section 6111(b)(1)(A)(i) with respect to the taxpayer, the information required to be included on a list under section 6112 relating to a transaction that was the same as, or substantially similar to, the undisclosed listed transaction, regardless of whether the taxpayer's information is required to be included on that list.

Reg. § 1.6664-2(c)(4), "Special rules," provides:

(i) A qualified amended return includes an amended return that is filed to disclose information pursuant to § 1.6662-3(c) or § 1.6662-4(e) and (f) even though it does not report any additional tax liability. See § 1.6662-3(c), § 1.6662-4(f), and § 1.6664-4(c) for rules relating to adequate disclosure.

(ii) The Commissioner may by revenue procedure prescribe the manner in which the rules of paragraph (c) of this section regarding qualified amended returns apply to particular classes of taxpayers.

II.G.19.h. Expedited Private Letter Rulings

Rev. Proc. 2023-26 provides for a 12-week turnaround instead of a 6-month turnaround if the letter ruling request is solely under the jurisdiction of the Associate Chief Counsel (Corporate), and the requirements described in section 5 of the revenue procedure are met. Section 5.06(1) allows a taxpayer to request a ruling more urgently than that, but the business exigency must be outside the taxpayer's control, and the timing of a deal that is within the parties' control is not such an exigency.

II.G.20. Debt vs. Equity; Potential Denial of Deduction for Business Interest Expense

II.G.20.a. Code § 163(j) Limitation on Deducting Business Interest Expense

II.G.20.a.i. Generally

Although Code § 163(a) authorizes deducting "all interest paid or accrued within the taxable year on indebtedness," other parts of Code § 163 deviate from that general rule. Furthermore, loss limitations elsewhere in the Code may apply.[1807] See also part II.G.26.b Real Estate as a Trade or Business.

Among the many limitations within Code § 163 are:

- Deductions for investment interest cannot exceed the taxpayer's net investment income, all as described in Code § 163(d); "net investment income" here is very different in scope than the idea in part II.I 3.8% Tax on Excess Net Investment Income (NII).

- Personal interest is not deductible, except for qualified residence interest. Code § 163(h).

[1807] For example, see parts II.G.4.c Basis Limitations for Deducting Partnership and S Corporation Losses, II.G.4.i Passive Loss Limitations (referring to part II.K Passive Loss Rules), and II.G.4.j At Risk Rules (Including Some Related Discussion of Code § 752 Allocation of Liabilities).

- Business interest deduction limitations under Code § 163(j) were greatly expanded to need to be considered by all taxpayers incurring interest expense.

One must look to why the taxpayer incurred debt to determine in which category the debt falls. See part II.C.3.d Deducting Interest Expense on Debt Incurred by a Partnership, which generally also applies to S corporations.[1808]

IRS training on the discussion below, "Limitation on Business Interest Expense Under Section 163(j)," is at https://www.irs.gov/pub/newsroom/tcja-training-business-interest-expense-limitation-163j.pdf.

For taxable years beginning after December 31, 2017, Code § 163(j)(1) provides:

> *In general*. The amount allowed as a deduction under this chapter for any taxable year for business interest shall not exceed the sum of-
>
> (A) the business interest income of such taxpayer for such taxable year,
>
> (B) 30 percent of the adjusted taxable income of such taxpayer for such taxable year, plus
>
> (C) the floor plan financing interest of such taxpayer for such taxable year.
>
> The amount determined under subparagraph (b) shall not be less than zero.

"Business interest" means "any interest paid or accrued on indebtedness properly allocable to a trade or business;" it does not include any investment interest under Code § 163(d).[1809] Reg. § 1.163(j)-1(b)(44) looks to the Code § 162 definition of a "trade or business;" see part II.G.4.l.i.(a) "Trade or Business" Under Code § 162.

After looking at carve-outs from what is a "trade or business," we will look at each element of the items that add up to the overall limitation that applies to those businesses that are not carved out, treatment accorded partnerships.

First, small businesses are not subject to this rule.[1810] The business' average annual gross receipts of such entity for the 3-taxable-year period ending with the taxable year which precedes the taxable year cannot exceed $25 million, indexed for inflation, with related businesses aggregated and various other qualifications.[1811] Businesses that generate losses might not be

[1808] See fn 456.
[1809] Code § 163(j)(5).
[1810] Code § 163(j)(3) provides:

> *Exemption for certain small businesses*. In the case of any taxpayer (other than a tax shelter prohibited from using the cash receipts and disbursements method of accounting under section 448(a)(3)) which meets the gross receipts test of section 448(c) for any taxable year, paragraph (1) shall not apply to such taxpayer for such taxable year. In the case of any taxpayer which is not a corporation or a partnership, the gross receipts test of section 448(c) shall be applied in the same manner as if such taxpayer were a corporation or partnership.

[1811] Code § 448(c). For taxable years beginning in 2019 or 2020, the limitation is $26 million. Rev. Procs. 2018-57, § 3.31 and 2019-44, § 3.31.

eligible for this exception;[1812] this is a disadvantage of the structure I recommend in parts II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and II.E.6 Recommended Partnership Structure – Flowchart.

In applying this rule, "trade or business" does not include:[1813]

(i) the trade or business of performing services as an employee,

(ii) any electing real property trade or business,

(iii) any electing farming business, or

(iv) the trade or business of the furnishing or sale of-

(I) electrical energy, water, or sewage disposal services,

(II) gas or steam through a local distribution system, or

[1812] Code § 163(j)(3), reproduced in fn 1810, excludes from the small business exception "a tax shelter prohibited from using the cash receipts and disbursements method of accounting under section 448(a)(3)." Code § 448(d)(3), "Tax shelter defined," provides:

> The term "tax shelter" has the meaning given such term by section 461(i)(3) (determined after application of paragraph (4) thereof). An S corporation shall not be treated as a tax shelter for purposes of this section merely by reason of being required to file a notice of exemption from registration with a State agency described in section 461(i)(3)(A), but only if there is a requirement applicable to all corporations offering securities for sale in the State that to be exempt from such registration the corporation must file such a notice.

Code § 461(i)(3), "Tax shelter defined," provides:

> For purposes of this subsection, the term "tax shelter" means -
> (A) any enterprise (other than a C corporation) if at any time interests in such enterprise have been offered for sale in any offering required to be registered with any Federal or State agency having the authority to regulate the offering of securities for sale,
> (B) any syndicate (within the meaning of section 1256(e)(3)(B)), and
> (C) any tax shelter (as defined in section 6662(d)(2)(C)(ii)).

Code § 461(i)(4), "Special rules for farming," provides:

> In the case of the trade or business of farming (as defined in section 464(e)), in determining whether an entity is a tax shelter, the definition of farming syndicate in subsection (k) shall be substituted for subparagraphs (A) and (B) of paragraph (3).

Code § 1256(e)(3)(B), "Syndicate defined," provides:

> For purposes of subparagraph (A), the term "syndicate" means any partnership or other entity (other than a corporation which is not an S corporation) if more than 35 percent of the losses of such entity during the taxable year are allocable to limited partners or limited entrepreneurs (within the meaning of section 461(k)(4)).

Code § 6662(d)(2)(C)(ii), "Reduction [in certain accuracy-related penalties] not to apply to tax shelters," provides:

> (i) *In general*. Subparagraph (B) shall not apply to any item attributable to a tax shelter.
> (ii) *Tax shelter*. For purposes of clause (i), the term "tax shelter" means -
> (I) a partnership or other entity,
> (II) any investment plan or arrangement, or
> (III) any other plan or arrangement,
> if a significant purpose of such partnership, entity, plan, or arrangement is the avoidance or evasion of Federal income tax.

[1813] Code § 163(j)(7)(A).

(III) transportation of gas or steam by pipeline,

if the rates for such furnishing or sale, as the case may be, have been established or approved by a State or political subdivision thereof, by any agency or instrumentality of the United States, by a public service or public utility commission or other similar body of any State or political subdivision thereof, or by the governing or ratemaking body of an electric cooperative.

As used above, an "electing real property trade or business" is any real property development, redevelopment, construction, reconstruction, acquisition, conversion, rental, operation, management, leasing, or brokerage trade or business that elects treatment as such:[1814]

- Any election needs to follow IRS rules regarding timing and manner and is irrevocable.[1815] An electing real property trade or business must use slower depreciation.[1816] Also, the items mentioned in clause (iv) are not eligible for bonus depreciation.[1817]

- Presumably, real estate rental could avoid the need to make an election by not qualifying as a trade or business. Such planning should consider the relationship between that reporting position and parts II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income (especially parts II.E.1.c.iii "Trade or Business" for Code § 199A and II.E.1.e Whether Real Estate Qualifies as a Trade or Business) and II.I.8 Application of 3.8% Tax to Business Income (especially part II.I.8.c Application of 3.8% Tax to Rental Income).

[1814] Code § 163(j)(7)(B). The list of businesses is from a cross-reference to Code § 469(c)(7)(C), which is further described in part II.K.1.e.iii.(a) Scope and Effect of Real Estate Professional Exception, especially fns 3203-3205 and the accompanying text. Rev. Proc. 2021-9 provides a safe harbor for a trade or business that manages or operates a qualified residential living facility, as defined in section 3.01 of the proposed revenue procedure, to be treated as a real property trade or business solely for purposes of qualifying as an electing real property trade or business under section 163(j)(7)(B).

[1815] Code § 163(j)(7)(B). Footnote 697 of the Senate report explains:

> It is intended that any such real property trade or business, including such a trade or business conducted by a corporation or real estate investment trust, be included. Because this description of a real property trade or business refers only to the section 469(c)(7)(C) description, and not to other rules of section 469 (such as the rule of section 469(c)(2) that passive activities include rental activities or the rule of section 469(a) that a passive activity loss is limited under section 469), the other rules of section 469 are not made applicable by this reference. It is further intended that a real property operation or a real property management trade or business includes the operation or management of a lodging facility.

[1816] Code § 163(j)(10)(A), referring to Code § 168(g)(1)(F), which requires certain property to use the Code § 168(g) alternative depreciation system, that property being described in Code § 168(g)(8), which described that property as:

> *Electing real property trade or business*. The property described in this paragraph shall consist of any nonresidential real property, residential rental property, and qualified improvement property held by an electing real property trade or business (as defined in 163(j)(7)(B)).

See Rev. Proc. 2019-8, sections 2.02 and 4.02.

[1817] See fn. 1467 in part II.G.5.b Bonus Depreciation.

As used above, "electing farming business" means:[1818]

(i) a farming business (as defined in section 263A(e)(4)) which makes an election under this subparagraph, or

(ii) any trade or business of a specified agricultural or horticultural cooperative (as defined in Section 199A(g)(2)) with respect to which the cooperative makes an election under this subparagraph.

Again, any election needs to follow IRS rules regarding timing and manner and is irrevocable.[1819] Rev. Proc. 2020-22 provides:

> This revenue procedure provides guidance regarding the election under section 163(j)(7)(B) of the Internal Revenue Code (Code) to be an electing real property trade or business and the election under section 163(j)(7)(C) to be an electing farming business for purposes of the business interest expense deduction limitation under section 163(j) of the Code. This revenue procedure allows certain taxpayers to make a late election, or to withdraw an election, under section 163(j)(7)(B) or 163(j)(7)(C), as applicable, on an amended Federal income tax return, an amended Form 1065, or an administrative adjustment request under section 6227 of the Code (AAR).

Letter Ruling 202348002 gave an extension to file a late Code § 163(j)(7)(B) election:

> To receive an extension of time to file a regulatory election, a taxpayer must provide evidence sufficient to establish that it acted reasonably and in good faith. Taxpayer's operating agreement indicates that Taxpayer was required to make the 163(j)(7)(B) election for the taxable year that ends Date 3. The affidavits submitted by Taxpayer indicate that Taxpayer and its Accounting Firm intended to make the election. Additionally, Taxpayer's U.S. federal income tax return for the taxable year that ends on Date 3, and the income tax returns for Year 2 and Year 3 were filed consistently with the requirements of the real property trade or business election given that Taxpayer elected the ADS depreciation method.
>
> Taxpayer has also requested relief prior to the discovery of the failure to make the election was discovered by the IRS during an examination. After exercising reasonable

---

[1818] Code § 163(j)(7)(C). Footnote 698 of the Senate report provides:

> As defined in section 263A(e)(4) (*i.e.*, farming business means the trade or business of farming and includes the trade or business of operating a nursery or sod farm, or the raising or harvesting of trees bearing fruit, nuts, or other crops, or ornamental trees (other than evergreen trees that are more than six years old at the time they are severed from their roots)). Treas. Reg. sec. 1.263A-4(a)(4) further defines a farming business as a trade or business involving the cultivation of land or the raising or harvesting of any agricultural or horticultural commodity. Examples of a farming business include the trade or business of operating a nursery or sod farm; the raising or harvesting of trees bearing fruit, nuts, or other crops; the raising of ornamental trees (other than evergreen trees that are more than six years old at the time they are severed from their roots); and the raising, shearing, feeding, caring for, training, and management of animals. A farming business also includes processing activities that are normally incident to the growing, raising, or harvesting of agricultural or horticultural products. See Treas. Reg. sec. 1.263A-4(a)(4)(i) and (ii). A farming business does not include contract harvesting of an agricultural or horticultural commodity grown or raised by another taxpayer, or merely buying and reselling plants or animals grown or raised by another taxpayer. See Treas. Reg. sec. 1.263A-4(a)(4)(i).

[1819] Code § 163(j)(7)(C).

> diligence (as discussed immediately above) Taxpayer relied on Accounting Firm, which is a qualified tax professional to prepare its tax return.
>
> There is nothing to indicate that Taxpayer did not act reasonably or in good faith, or is using hindsight. Based on Taxpayer's representations, the government is not prejudiced as a result of granting this ruling because granting relief will not result in Taxpayer having a lower tax liability in the aggregate for the tax years at issue than Taxpayer would have had if the election would have been made timely. Additionally, Taxpayer's tax return for the taxable year ending Date 3 was filed on Date 4, therefore, the taxable year is not closed by the period of assessment.

Also, electing farming business must use slower depreciation.[1820]

Now that we have seen which businesses are carved out, let's review the components of the limitation.

In applying the Code § 163(j)(1)(A) limitation of business interest income: "Business interest income" means "the amount of interest includible in the gross income of the taxpayer for the taxable year which is properly allocable to a trade or business."[1821] It does not include any investment income under Code § 163(d).[1822]

In applying the Code § 163(j)(1)(B) limitation of 30% of the taxpayer's adjusted taxable income: Code § 163(j)(8) provides that "adjusted taxable income" is the taxpayer's taxable income:

> (A) computed without regard to-
>
> > (i) any item of income, gain, deduction, or loss which is not properly allocable to a trade or business,
> >
> > (ii) any business interest or business interest income,
> >
> > (iii) the amount of any net operating loss deduction under section 172,
> >
> > (iv) the amount of any deduction allowed under Section 199A, and
> >
> > (v) in the case of taxable years beginning before January 1, 2022, any deduction allowable for depreciation, amortization, or depletion, and
>
> (B) computed with such other adjustments as provided by the Secretary.

In applying the Code § 163(j)(1)(C) limitation the taxpayer's floor plan financing interest: "Floor plan financing interest" means "interest paid or accrued on floor plan financing indebtedness."[1823] "Floor plan financing indebtedness" means indebtedness used to finance the

---

[1820] Code § 163(j)(10)(B), referring to Code § 168(g)(1)(G), which requires certain property to use the Code § 168(g) alternative depreciation system, that property being:

> any property with a recovery period of 10 years or more which is held by an electing farming business (as defined in section 163(j)(7)(C)).

See Rev. Proc. 2019-8, sections 2.02 and 4.02.

[1821] Code § 163(j)(6).

[1822] Code § 163(j)(6).

[1823] Code § 163(j)(9)(A).

acquisition of motor vehicles[1824] held for sale or lease, and secured by the inventory so acquired.[1825]

If business interest exceeds the sum of the items described in Code § 163(j)(1), it is treated as business interest paid or accrued in the succeeding taxable year.[1826]

Notice 2018-28, "Initial Guidance Under Section 163(j) as Applicable to Taxable Years Beginning After December 31, 2017," includes the following:

- Notice § 4 provides that regulations will clarify that that, solely for purposes of Code § 163(j), as amended by the Act,[1827] all interest paid or accrued by a C corporation on indebtedness of that corporation will be business interest within the meaning of Code § 163(j)(5), and all interest on indebtedness held by the corporation that is includible in that corporation's gross income will be business interest income within the meaning of Code § 163(j)(6).
    - This protection will not apply to S corporations.
    - Regulations also will address whether and to what extent interest paid, accrued, or includible in gross income by a non-corporate entity such as a partnership in which a C corporation holds an interest is properly characterized, to that corporation, as business interest within the meaning of Code § 163(j)(5) or business interest income within the meaning of Code § 163(j)(6).
- Regulations will clarify that the disallowance and carryforward of a deduction for a C corporation's business interest expense under Code § 163(j), as amended by the Act, will not affect whether or when such business interest expense reduces that corporation's earnings and profits. Notice § 6.

For partnerships:[1828]

(i) this subsection shall be applied at the partnership level and any deduction for business interest shall be taken into account in determining the non-separately stated taxable income or loss of the partnership, and

---

[1824] Code § 163(j)(9)(C) provides:

Motor vehicle. The term "motor vehicle" means a motor vehicle that is any of the following:

(i) Any self-propelled vehicle designed for transporting persons or property on a public street, highway, or road.

(ii) A boat.

(iii) Farm machinery or equipment.

[1825] Code § 163(j)(9)(B).

[1826] Code § 163(j)(2).

[1827] Referring to:

section 163(j) of the Internal Revenue Code (Code), as amended on December 22, 2017, by "An Act to provide for reconciliation pursuant to titles II and V of the concurrent resolution on the budget for fiscal year 2018," P.L. 115-97 (the Act).

[1828] Code § 163(j)(4)(A). To explain a term used here, Code § 163(j)(C) provides:

Excess taxable income. The term "excess taxable income" means, with respect to any partnership, the amount which bears the same ratio to the partnership's adjusted taxable income as-

(i) the excess (if any) of—

(ii) the adjusted taxable income of each partner of such partnership -

(I) shall be determined without regard to such partner's distributive share of any items of income, gain, deduction, or loss of such partnership, and

(II) shall be increased by such partner's distributive share of such partnership's excess taxable income.

For purposes of clause (ii)(II), a partner's distributive share of partnership excess taxable income shall be determined in the same manner as the partner's distributive share of nonseparately stated taxable income or loss of the partnership.

S corporations apply similar rules.[1829] Reg.§ 1.163(j)-6, "Application of the section 163(j) limitation to partnerships and subchapter S corporations," explains in subsection (a), "Overview,":

> If a deduction for business interest expense of a partnership or an S corporation is subject to the section 163(j) limitation, section 163(j)(4) provides that the section 163(j) limitation applies at the partnership or S corporation level and any deduction for business interest expense is taken into account in determining the nonseparately stated taxable income or loss of the partnership or S corporation. Once a partnership or an S corporation determines its business interest expense, business interest income, ATI, and floor plan financing interest expense, the partnership or S corporation calculates its section 163(j) limitation by applying the rules of § 1.163(j)-2(b) and this section. Paragraph (b) of this section provides definitions used in this section. Paragraph (c) of this section provides rules regarding the character of a partnership's deductible business interest expense and excess business interest expense. Paragraph (d) of this section provides rules regarding the calculation of a partnership's ATI and floor plan financing interest expense. Paragraph (e) of this section provides rules regarding a partner's ATI and business interest income. Paragraph (f) of this section provides an eleven-step computation necessary for properly allocating a partnership's deductible business interest expense and section 163(j) excess items to its partners. Paragraph (g) of this section applies carryforward rules at the partner level if a partnership has excess

---

(I) the amount determined for the partnership under paragraph (1)(B), over
(II) the amount (if any) by which the business interest of the partnership, reduced by the floor plan financing interest, exceeds the business interest income of the partnership, bears to
(ii) the amount determined for the partnership under paragraph (1)(B).

The Senate report explained:

> … the limit on the amount allowed as a deduction for business interest is increased by a partner's distributive share of the partnership's excess taxable income. The excess taxable income with respect to any partnership is the amount which bears the same ratio to the partnership's adjusted taxable income as the excess (if any) of 30 percent of the adjusted taxable income of the partnership over the amount (if any) by which the business interest of the partnership, reduced by floor plan financing interest, exceeds the business interest income of the partnership bears to 30 percent of the adjusted taxable income of the partnership. This allows a partner of a partnership to deduct additional interest expense the partner may have paid or incurred to the extent the partnership could have deducted more business interest. The Senate amendment requires that excess taxable income be allocated in the same manner as nonseparately stated income and loss.

[1829] Code § 163(j)(4)(D) provides:

> *Application to S corporations*. Rules similar to the rules of subparagraphs (A) and (C) shall apply with respect to any S corporation and its shareholders.

business interest expense. Paragraph (h) of this section provides basis adjustment rules, and paragraph (k) of this section provides rules regarding investment items of a partnership. Paragraph (l) of this section provides rules regarding S corporations. Paragraph (m) of this section provides rules for partnerships and S corporations not subject to section 163(j). Paragraph (o) of this section provides examples illustrating the rules of this section.

Special rules apply for business interest from a partnership disallowed and carried forward.[1830] Code § 163(j)(4)(B), "Special rules for carryforwards," provides:

(i) *In general*. The amount of any business interest not allowed as a deduction to a partnership for any taxable year by reason of paragraph (1) for any taxable year-

(I) shall not be treated under paragraph (2) as business interest paid or accrued by the partnership in the succeeding taxable year, and

(II) shall, subject to clause (ii), be treated as excess business interest which is allocated to each partner in the same manner as the non-separately stated taxable income or loss of the partnership.

(ii) *Treatment of excess business interest allocated to partners*. If a partner is allocated any excess business interest from a partnership under clause (i) for any taxable year-

(I) such excess business interest shall be treated as business interest paid or accrued by the partner in the next succeeding taxable year in which the partner is allocated excess taxable income from such partnership, but only to the extent of such excess taxable income, and

(II) any portion of such excess business interest remaining after the application of subclause (I) shall, subject to the limitations of subclause (I), be treated as business interest paid or accrued in succeeding taxable years.

For purposes of applying this paragraph, excess taxable income allocated to a partner from a partnership for any taxable year shall not be taken into account under

[1830] The Senate report explained:

… any business interest that is not allowed as a deduction to the partnership for the taxable year is allocated to each partner in the same manner as nonseparately stated taxable income or loss of the partnership. The partner may deduct its share of the partnership's excess business interest in any future year, but only against excess taxable income attributed to the partner by the partnership the activities of which gave rise to the excess business interest carryforward. Any such deduction requires a corresponding reduction in excess taxable income. Additionally, when excess business interest is allocated to a partner, the partner's basis in its partnership interest is reduced (but not below zero) by the amount of such allocation, even though the carryforward does not give rise to a partner deduction in the year of the basis reduction. However, the partner's deduction in a future year for interest carried forward does not reduce the partner's basis in the partnership interest. In the event the partner disposes of a partnership interest the basis of which has been so reduced, the partner's basis in such interest shall be increased, immediately before such disposition, by the amount that any such basis reductions exceed any amount of excess interest expense that has been treated as paid by the partner (*i.e.*, excess interest expense that has been deducted by the partner against excess taxable income of the same partnership). This special rule does not apply to S corporations and their shareholders.

paragraph (1)(A) with respect to any business interest other than excess business interest from the partnership until all such excess business interest for such taxable year and all preceding taxable years has been treated as paid or accrued under clause (ii).

(iii) *Basis adjustments*.

(I) *In general*. The adjusted basis of a partner in a partnership interest shall be reduced (but not below zero) by the amount of excess business interest allocated to the partner under clause (i)(II).

(II) *Special rule for dispositions*. If a partner disposes of a partnership interest, the adjusted basis of the partner in the partnership interest shall be increased immediately before the disposition by the amount of the excess (if any) of the amount of the basis reduction under subclause (I) over the portion of any excess business interest allocated to the partner under clause (i)(II) which has previously been treated under clause (ii) as business interest paid or accrued by the partner. The preceding sentence shall also apply to transfers of the partnership interest (including by reason of death) in a transaction in which gain is not recognized in whole or in part. No deduction shall be allowed to the transferor or transferee under this chapter for any excess business interest resulting in a basis increase under this subclause.

If a business owner lends to a business, the owner receives investment interest income and the business might not be able to deduct the interest. Reg. § 1.163(j)-6(n), "Treatment of self-charged lending transactions between partnerships and partners," provides some relief:

> In the case of a lending transaction between a partner (lending partner) and partnership (borrowing partnership) in which the lending partner owns a direct interest (self-charged lending transaction), any business interest expense of the borrowing partnership attributable to the self-charged lending transaction is business interest expense of the borrowing partnership for purposes of this section. If in a given taxable year the lending partner is allocated excess business interest expense from the borrowing partnership and has interest income attributable to the self-charged lending transaction (interest income), the lending partner is deemed to receive an allocation of excess business interest income from the borrowing partnership in such taxable year. The amount of the lending partner's deemed allocation of excess business interest income is the lesser of such lending partner's allocation of excess business interest expense from the borrowing partnership in such taxable year or the interest income attributable to the self-charged lending transaction in such taxable year. To prevent the double counting of business interest income, the lending partner includes interest income that was treated as excess business interest income pursuant to this paragraph (n) only once when calculating its own section 163(j) limitation. To the extent an amount of interest income received by a lending partner is attributable to a self-charged lending transaction, and is deemed to be an allocation of excess business interest income from the borrowing partnership pursuant to this paragraph (n), such an amount of interest income will not be treated as investment income for purposes of section 163(d). In cases where the lending partner is not a C corporation, to the extent that any interest income exceeds the lending partner's allocation of excess business interest expense from the borrowing partnership for the taxable year, and such interest income otherwise would be properly treated as investment income of the lending partner for purposes of section 163(d) for that year, such excess amount of interest income will continue to be treated as investment income of the lending partner for

> that year for purposes of section 163(d). See Example 26 in paragraph (o)(26) of this section.

Note that relief does not extend to S corporation owners – yet another reason to prefer partnerships to S corporations.[1831]

Notice 2018-28, § 7, "Business Interest Income and Floor Plan Financing of Partnerships, Partners, S corporations, and S corporation Shareholders," provides [all one paragraph, but I broke up for ease of reading]:

> Section 163(j)(4) requires that the annual limitation on the deduction for business interest expense be applied at the partnership level and that any deduction for business interest be taken into account in determining the non-separately stated taxable income or loss of the partnership.
>
> Although section 163(j)(4) is applied at the partnership level with respect to the partnership's indebtedness, section 163(j) may also be applied at the partner level in certain circumstances.
>
> The Treasury Department and the IRS intend to issue regulations providing that, for purposes of calculating a partner's annual deduction for business interest under section 163(j)(1), a partner cannot include the partner's share of the partnership's business interest income for the taxable year except to the extent of the partner's share of the excess of (i) the partnership's business interest income over (ii) the partnership's business interest expense (not including floor plan financing).
>
> Additionally, the Treasury Department and the IRS intend to issue regulations providing that a partner cannot include such partner's share of the partnership's floor plan financing interest in determining the partner's annual business interest expense deduction limitation under section 163(j).
>
> Such regulations are intended to prevent the double counting of business interest income and floor plan financing interest for purposes of the deduction afforded by section 163(j) and are consistent with general principles of Chapter 1 of the Code.
>
> Similar rules will apply to any S corporation and its shareholders.

II.G.20.a.ii. 2019-2020 Relief

The 2020 CARES Act provided some relief from the percent-of-adjusted-taxable-income limitation. The Senate Finance Committee explained:

> **Section 2306. Modification of limitation on business interest**
>
> The provision temporarily increases the amount of interest expense businesses are allowed to deduct on their tax returns, by increasing the 30-percent limitation to 50 percent of taxable income (with adjustments) for 2019 and 2020. As businesses look to weather the storm of the current crisis, this provision will allow them to increase

[1831] See part II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons.

liquidity with a reduced cost of capital, so that they are able to continue operations and keep employees on payroll.

Accordingly, Code § 163(j)(10), "Special rule for taxable years beginning in 2019 and 2020," provides:

(A) *In general*.

(i) *In general*. Except as provided in clause (ii) or (iii), in the case of any taxable year beginning in 2019 or 2020, paragraph (1)(B) shall be applied by substituting "50 percent" for "30 percent".

(ii) *Special rule for partnerships*. In the case of a partnership -

(I) clause (i) shall not apply to any taxable year beginning in 2019, but

(II) unless a partner elects not to have this subclause apply, in the case of any excess business interest of the partnership for any taxable year beginning in 2019 which is allocated to the partner under paragraph (4)(B)(i)(II) -

(aa) 50 percent of such excess business interest shall be treated as business interest which, notwithstanding paragraph (4)(B)(ii), is paid or accrued by the partner in the partner's first taxable year beginning in 2020 and which is not subject to the limits of paragraph (1), and

(bb) 50 percent of such excess business interest shall be subject to the limitations of paragraph (4)(B)(ii) in the same manner as any other excess business interest so allocated.

(iii) *Election out*. A taxpayer may elect, at such time and in such manner as the Secretary may prescribe, not to have clause (i) apply to any taxable year. Such an election, once made, may be revoked only with the consent of the Secretary. In the case of a partnership, any such election shall be made by the partnership and may be made only for taxable years beginning in 2020.

(B) *Election to use 2019 adjusted taxable income for taxable years beginning in 2020*.

(i) *In general*. Subject to clause (ii), in the case of any taxable year beginning in 2020, the taxpayer may elect to apply this subsection by substituting the adjusted taxable income of the taxpayer for the last taxable year beginning in 2019 for the adjusted taxable income for such taxable year. In the case of a partnership, any such election shall be made by the partnership.

(ii) *Special rule for short taxable years*. If an election is made under clause (i) for a taxable year which is a short taxable year, the adjusted taxable income for the taxpayer's last taxable year beginning in 2019 which is substituted under clause (i) shall be equal to the amount which bears the same ratio to such adjusted taxable income determined without regard to this clause as the number of months in the short taxable year bears to 12.

Rev. Proc. 2020-22 "describes the time and manner in which certain taxpayers can elect (1) out of the 50% adjusted taxable income (ATI) limitation for taxable years beginning in 2019 and 2020, (2) to use the taxpayer's ATI for the last taxable year beginning in 2019 to calculate the taxpayer's section 163(j) limitation for taxable year 2020, and (3) out of deducting 50 percent of excess business interest expense (EBIE) for taxable years beginning in 2020 without limitation."

II.G.20.b. When Debt Is Recharacterized as Equity

Sometimes difficulty arises in determining whether payment obligations constitute debt or equity. For example:

- Once a C corporation becomes profitable, its owners cannot extract their original investment without paying tax.[1832]

- Perhaps one owner contributes capital and the other labor, and they want their entity to be taxed as an S corporation. Because an S corporation cannot have two classes of stock,[1833] they need to characterize as the debt the disproportionate contribution of the owner who contributes the capital.[1834]

- Sometimes a family member will loan to another to start a business without wanting to receive an equity interest.[1835]

Congress authorized the promulgation of regulations to distinguish debt from equity generally,[1836] but the effort proved unsuccessful until 2016,[1837] and what was issued in 2016 focused on foreign entities.[1838] Accordingly, one needs to look to court cases. *Pepsico Puerto Rico, Inc. v. Commissioner*, T.C. Memo. 2012-269, described the law as follows:[1839]

[1832] Code § 316.
[1833] See part II.A.2.i Single Class of Stock Rule.
[1834] Safe harbors for debt issued by an S corporation are provided by Code § 1361(c)(5) and Reg. § 1.1361-1(l)(5).
[1835] For complexity that might arise when families invest in businesses with ownership interests other than straight pro rata ownership, see parts III.B.7.b Code § 2701 Overview and III.B.7.c Code § 2701 Interaction with Income Tax Planning.
[1836] Code § 385.
[1837] T.D. 7920 (1983).
[1838] See text accompanying fn. 1854.
[1839] The quote from the case does not include footnotes. *Rutter v. Commissioner*, T.C. Memo. 2017-174, which was also quoted in fns. 1158 and 1161 in part II.G.4.a.ii Bad Debt Loss – Must be Bona Fide Debt, summarized the Ninth Circuit's position:

> That court has identified 11 nonexclusive factors to determine whether an advance of funds gives rise to bona fide debt as opposed to an equity investment. See *Hardman*, 827 F.2d at 1411-1412 (citing *Bauer*, 748 F.2d at 1368); *Bell v. Commissioner*, __ F. App'x __, 2017 WL 2963547 (9th Cir. July 12, 2017) (reaffirming 11-factor test), *aff'g* T.C. Memo. 2015-111. Those factors are: (1) the labels on the documents evidencing the alleged indebtedness; (2) the presence or absence of a maturity date; (3) the source of payment; (4) the right of the alleged lender to enforce payment; (5) whether the alleged lender participates in management of the alleged borrower; (6) whether the alleged lender's status is equal to or inferior to that of regular corporate creditors; (7) the intent of the parties; (8) the adequacy of the alleged borrower's capitalization; (9) if the advances are made by shareholders, whether the advances are made ratably to their

A "singular defined set of standards" capable of being uniformly applied in debt-versus-equity inquiries remains elusive. See *Segel v. Commissioner*, 89 T.C. 816, 826-828 (1987). In differentiating between loans and capital investments, "It is not always easy to tell which are which, for securities can take many forms, and it is hazardous to try to find moulds into which all arrangements can certainly be poured." *Jewel Tea Co., Inc. v. United States*, 90 F.2d 451, 453 (2d Cir. 1937).

Notwithstanding the difficulty in distinguishing between debt instruments and equity instruments, the focus of a debt-versus-equity inquiry generally narrows to whether there was an intent to create a debt with a reasonable expectation of repayment and, if so, whether that intent comports with the economic reality of creating a debtor-creditor relationship. *Fin Hay Realty Co. v. United States*, 398 F.2d 694, 697 (3d Cir. 1968); *Litton Bus. Sys., Inc. v. Commissioner*, 61 T.C. 367, 377 (1973). The key to this determination is primarily the taxpayer's actual intent, evinced by the particular circumstances of the transfer. *A. R. Lantz Co. v. United States*, 424 F.2d 1330, 1333 (9th Cir. 1970); see also *United States v. Uneco, Inc. (In re Uneco, Inc.)*, 532 F.2d at 1209 (in resolving debt-equity questions, both objective and subjective evidence of a taxpayer's intent are considered and given weight in the light of the particular circumstances of a case).

Various Courts of Appeals have identified and considered certain factors in *re Uneco, Inc.)*, 532 F.2d at 1208 (10 factors); *Estate of Mixon v. United States*, 464 F.2d 394, 402 (5th Cir. 1972) (13 factors);[1840] *Fin Hay Realty Co. v. United States*, 398 F.2d at 697 (16 factors). This Court has articulated a list of 13 factors germane to such an analysis: (1) names or labels given to the instruments; (2) presence or absence of a fixed maturity date; (3) source of payments; (4) right to enforce payments; (5) participation in management as a result of the advances; (6) status of the advances in relation to regular corporate creditors; (7) intent of the parties; (8) identity of interest between creditor and stockholder; (9) "thinness" of capital structure in relation to debt; (10) ability of the corporation to obtain credit from outside sources; (11) use to which advances were put; (12) failure of debtor to repay; and (13) risk involved in making advances. *Dixie Dairies Corp. v. Commissioner*, 74 T.C. 476, 493 (1980).

> shareholdings; (10) whether interest is paid out of "dividend money"; and (11) the alleged borrower's ability to obtain loans from outside lenders. *Hardman*, 827 F.2d at 1411-1412.

As mentioned in fn 1161, *Povolny Group, Inc. v. Commissioner*, T.C. Memo. 2018-37, had a similar result to *Rutter*, only the lender was a related corporation, so the payment to the related corporation was a dividend from the payor to the shareholder, followed by a contribution to capital from the shareholder to the recipient. For dividend treatment, see part II.Q.7.a.iv Dividends; Avoiding Dividend Treatment Using Redemptions under Code §§ 302 and 303.

[1840] [this footnote not part of quote above] After this case was decided, in affirming a Tax Court decision, *DF Systems, Inc. v. Commissioner*, 112 A.F.T.R.2d 2013-7331 (5th Cir. 12/10/2013), in an unpublished *per curiam* opinion, quoted the *Mixon* factors as follows in finding a lack of bona fide debt:

> (1) the names given to the certificates evidencing the indebtedness; (2) the presence or absence of a fixed maturity date; (3) the source of payments; (4) the right to enforce payment of principal and interest; (5) participation in management flowing as a result; (6) the status of the contribution in relation to regular corporate creditors; (7) the intent of the parties; (8) "thin" or adequate capitalization; (9) identity of interest between creditor and stockholder; (10) source of interest payments; (11) the ability of the corporation to obtain loans from outside lending institutions; (12) the extent to which the advance was used to acquire capital assets; and (13) the failure of the debtor to repay on the due date or to seek a postponement.

Regarding "thinness" of capital structure in relation to debt, the court reasoned:

> The purpose of examining the debt-to-equity ratio in characterizing an advance is to determine whether a corporation is so thinly capitalized that repayment would be unlikely. *CMA Consol., Inc. v. Commissioner*, T.C. Memo. 2005-16. In such a circumstance, the advance would be indicative of venture capital rather than a loan. *Bauer v. Commissioner*, 748 F.2d 1365, 1369 (9th Cir. 1984); see also *Hubert Enters., Inc. v. Commissioner*, 125 T.C. 72, 96-97 (2005), *aff'd in part*, *vacated in part* and *remanded on other grounds* 230 Fed. Appx. 526 (6th Cir. 2007).[1841]

The court then noted how the taxpayer's debt-to-equity ratio compared to the industry's debt-to-equity ratio,[1842] accepting the taxpayer's expert's conclusion that the instrument was equity for U.S. income tax purposes. It also said the law focuses on the willingness of unrelated lenders to make a loan on the same terms or similar terms.[1843]

In *Sensenig v. Commissioner*, T.C. Memo. 2017-1, "The absence of an unconditional right to demand payment is practically conclusive that an advance is an equity investment rather than a loan for which an advancing taxpayer might be entitled to claim a deduction for a bad debt loss." "The salient fact of this case is the lack of written evidence demonstrating that there was a valid and enforceable obligation to repay on the part of any of the companies at issue that received advances from Mr. Sensenig through CLCL."[1844] "The three companies at issue were objectively risky debtors, and an unrelated prospective lender would probably have concluded that they would likely be unable to repay any proposed loan."[1845] Although an advance may be

---

[1841] The court's footnote 75 here stated:

> Respondent relies on Fifth Circuit precedent which recognizes that thin capitalization is "very strong evidence" of a capital investment where: (1) the debt-to-equity ratio was initially high; (2) the parties understood that it would likely go higher; and (3) substantial portions of these funds were used for the purchase of capital assets and for meeting expenses needed to commence operations. See *Estate of Mixon*, 464 F.2d at 408 (citing *United States v. Henderson*, 375 F.2d 36, 40 (5th Cir. 1967)). Respondent contends that petitioners cannot satisfy this standard; he submits that, in particular, petitioners have not conclusively demonstrated that PGI used advances to purchase capital assets or to meet expenses needed to commence operations. However, neither this Court nor the Court of Appeals for the Second Circuit has embraced this more nuanced test for thin capitalization in a debt-versus-equity analysis. See, *e.g.*, *Nassau Lens Co. v. Commissioner*, 308 F.2d 39, 47 (2d Cir. 1962), remanding 35 T.C. 268 (1960); *Kraft Foods Co. v. Commissioner*, 232 F.2d at 127; *Hubert Enters., Inc. v. Commissioner*, 125 T.C. 72, 96 (2005); *Anchor Nat'l Life Ins. Co. v. Commissioner*, 93 T.C. 382, 401 n.16 (1989); *Recklitis v. Commissioner*, 91 T.C. 874, 903-905 (1988). Indeed, the Second Circuit has stated that the isolated debt-to-equity ratio is of "great importance in determining whether an ambiguous instrument is a debt or an equity interest." *Kraft Foods Co. v. Commissioner*, 232 F.2d at 127. Moreover, the other elements in the Fifth Circuit standard are subsumed within our larger inquiry. Accordingly, we approach the "thin capitalization" factor without addressing the additional Fifth Circuit elements.

[1842] Citing *Recklitis v. Commissioner*, 91 T.C. 874, 904 (1988).

[1843] Citing *Segel v. Commissioner*, 89 T.C. at 832, which in turn was citing *Scriptomatic, Inc. v. United States*, 555 F.2d 364, 368 (3d Cir. 1977), and *Fin Hay Realty Co. v. United States*, 398 F.2d at 697).

[1844] *Sensenig v. Commissioner*, T.C. Memo. 2017-1, supporting its statement as follows:

> (*Fin Hay* factor 11.) There is no written evidence of an enforceable obligation between CLCL and any of the companies at issue, much less a provision for a fixed maturity date or a fixed rate of interest. (*Fin Hay* factors 10 and 13.)

[1845] *Sensenig v. Commissioner*, T.C. Memo. 2017-1, further stated:

properly characterized as a loan, the substance needs to support that conclusion.[1846] The Third Circuit affirmed, rebuking the taxpayers' arguments that loans can be documented other than promissory notes: "The Tax Court noted that the purported loans were not evidenced by promissory notes, but it went on to conclude that, the handful of journal entries aside, the purported loans bore no other objective indicia of loans and the economic realities of the transactions suggested that they were intended as equity investments instead."[1847]

Keeton v. Commissioner, T.C. Memo. 2023-35, reasoned and held:

> ***A. Governing Legal Principles***
>
> Section 166(a)(1) allows as an ordinary loss deduction any bona fide debt that becomes worthless within the taxable year, except in the case of certain nonbusiness debts defined in section 166(d). A bona fide debt is a debt that arises from "a debtor-creditor relationship based upon a valid and enforceable obligation to pay a fixed or determinable sum of money." *Zimmerman v. United States*, 318 F.2d 611, 612 (9th Cir. 1963) (quoting Treas. Reg. § 1.166-1(c)); *Kean v. Commissioner*, 91 T.C. 575, 594 (1988); Treas. Reg. § 1.166-1(c). A contribution to capital is not considered a "debt" for purposes of section 166. *Kean*, 91 T.C. at 594.

> Mr. Sensenig emphasized that, with respect to the advances at issue here, he generated no formal written financial projections and that he did not know what those projections would be. He was satisfied to go with the "gut feel of everybody involved". He considered business plans a waste of time and emphasized the importance of being able to "turn on a dime" on the basis of the facts of the moment, unconstrained by any formal plan. We think an unrelated lender would have considered this approach too cavalier.

[1846] *Sensenig v. Commissioner*, T.C. Memo. 2017-1, further stated:

> To the same effect, an advance may have the economic substance of a loan where the funds are advanced with a reasonable expectation of repayment regardless of the success of the venture or are placed at the risk of the business. *Steiner v. Commissioner*, T.C. Memo. 1981-212. Mr. Sensenig's expectation of repayment to CLCL, however, was completely dependent on the future financial success of the companies (which were not successful). See *Scriptomatic, Inc.*, 397 F.Supp. at 764 (holding advances were not debt where repayment "can only be reasonably assured by the chance of profits or from the liquidation of the business"). Repayment of any amount advanced by CLCL to one of the companies was not anticipated until the project had been "completed". Moreover, as to WSC, any expectation of repayment was even more remote, given that CLCL's interest was necessarily subordinate to the interest of WSC's prior mortgage lender. (*Fin Hay* factor 8.)
>
> Also at odds with a conclusion that this was a genuine loan transaction is Mr. Sensenig's not charging any loan origination fees for the advances and his lack of interest in obtaining third-party audits, financial statements, or credit reports for the companies he had chosen to invest in. CLCL's advances simply do not have the appearance of loans. We believe that no reasonable third-party lender would have extended money to these companies when none of the objective attributes which denote a bona fide loan are present, including a written promise of repayment, a repayment schedule, and security for the loan.
>
> The transfers simply did not give rise to a reasonable expectation or enforceable obligation of repayment. For these reasons, we find that the relationship between Mr. Sensenig and CLCL on the one hand and the three companies on the other was not that of creditor and debtor, and we conclude that Mr. Sensenig's advances of CLCL funds were in substance equity and that the IRS properly disallowed the deduction for tax year 2005.

[1847] *Sensenig v. Commissioner*, 121 A.F.T.R.2d 2018-505 (1/23/2018), citing *Geftman v. Commissioner*, 154 F.3d 61, 68 (3d Cir. 1998). The Supreme Court denied cert. to *Sensenig* 6/4/2018.

Whether an advance of funds is treated as genuine debt "must be considered in the context of the overall transaction." *Hardman v. United States*, 827 F.2d 1409, 1411 (9th Cir. 1987). Our inquiry typically focuses on whether the taxpayer intended to create a debt with a reasonable expectation of repayment and (if so) whether that intent comports in substance with the creation of a debtor-creditor relationship. *Litton Bus. Sys., Inc. v. Commissioner*, 61 T.C. 367, 377 (1973); *Ill. Tool Works Inc. & Subs. v. Commissioner*, T.C. Memo. 2018-121, 116 T.C.M. (CCH) 124, 130–31. "The outward form of the transaction is not controlling; rather, characterization depends on the taxpayer's actual intent, as evidenced by the circumstances and conditions of the advance." *Bauer v. Commissioner*, 748 F.2d 1365, 1367–68 (9th Cir. 1984), *rev'g* T.C. Memo. 1983-120.

Absent stipulation to the contrary, appeal of this case would lie to the U.S. Court of Appeals for the Ninth Circuit. See § 7482(b)(1)(A). That court has identified 11 factors that may be relevant in determining whether a transfer to a corporation by a shareholder is a debt or a contribution to capital. No one factor is controlling or decisive, and the Ninth Circuit directs us to look to the particular circumstances of each case. *Hardman*, 827 F.2d at 1412. "The object of the inquiry is not to count factors, but to evaluate them." *Id*. (quoting *Bauer v. Commissioner*, 748 F.2d at 1368)). "The burden of establishing that the advances were loans rather than capital contributions rests with the taxpayer." *Bauer v. Commissioner*, 748 F.2d at 1368 (citing *O.H. Kruse Grain & Milling v. Commissioner*, 279 F.2d 123, 125 (9th Cir. 1960), *aff'g* T.C. Memo. 1959-110).

The Ninth Circuit in *Hardman* identified the following factors as potentially relevant to the debt-vs.-equity inquiry: (1) the names given to the certificates evidencing purported debt; (2) the presence or absence of a maturity date; (3) the source of the payments, and in particular whether they are dependent upon earnings; (4) the right to enforce payment of principal and interest; (5) whether the advances increase participation in management; (6) whether the "lender" has a status equal or inferior to that of regular creditors; (7) objective indicators of the parties' intent; (8) whether the capital structure of the "borrower" is thin or adequate; (9) the extent to which the funds advanced are proportional to the shareholder's capital interest; (10) the extent to which interest payments come from "dividend" money; and (11) the ability of the "borrower" to obtain loans from outside lending institutions. See *Hardman*, 827 F.2d at 1411–12.

B. Analysis

Our examination of the bad debt issue is greatly simplified in this case by the January 1, 2012, Unanimous Consent resolution executed by the shareholders of IWS. By that resolution all shareholder loans in existence on that date were canceled and converted to paid-in capital, *i.e.*, equity. Petitioners do not contend that they or the Riemenschneiders advanced any funds to IWS, directly or through KRLLC, after January 1, 2012. As of 2017, therefore, there existed no debt from IWS that could have gone bad….

The loans thus canceled clearly included the loans that petitioners and the Riemenschneiders extended through KRLLC….

Consistently with this analysis, IWS's balance sheet for yearend 2012 shows no notes payable to shareholders and no note payable to KRLLC. Rather, it shows $2,606,001 - the total amount of "Notes Payable to Stockholders" that appeared on the 2011 balance sheet - as having been converted to “paid in capital.” Petitioners do not contend that they or the Riemenschneiders advanced any funds to IWS, directly or through KRLLC, after January 1, 2012. As of 2017, therefore, there existed no debt from IWS for which a bad debt deduction could be claimed.

This conclusion by itself supplies a sufficient basis on which to sustain respondent’s disallowance of the $2,095,757 bad debt deduction that KRLLC claimed for 2017. For purposes of completeness, however, we will also consider whether a bona fide debt existed between IWS and KRLLC as of December 31, 2011, immediately before the debt-to-equity conversion. In so doing we consider the factors identified by the Ninth Circuit in *Hardman*. The factors with greatest salience here clearly point to characterization of KRLLC’s advances as capital contributions rather than debt.[4]

[4] Besides disputing the existence of a bona fide debt, respondent contends that petitioners have failed to prove (1) that any debt owed by KRLLC became worthless during 2017, the year for which the deduction was claimed; (2) that $2,095,757 was the correct dollar amount of any debt that became worthless; or (3) that any debt held by KRLLC was a business debt, as opposed to a nonbusiness debt qualifying for only limited deductibility under section 166(d). Given our disposition we need not consider these additional arguments.

1. Terminology Used by the Parties

Genuine indebtedness is typically indicated by the issuance of a bond, debenture, or promissory note. See *Hardman*, 827 F.2d at 1412; *Am. Offshore, Inc. v. Commissioner*, 97 T.C. 579, 602 (1991). However, where a corporate “debtor” is closely held and is related to its putative creditor, the form of the transaction and the labels the parties used may have less significance. That is because related parties are free to mold the transaction using whatever labels they wish. See *Fin Hay Realty Co. v. United States*, 398 F.2d 694, 697 (3d Cir. 1968); *Anchor Nat’l Life Ins. Co. v. Commissioner*, 93 T.C. 382, 406-07 (1989).

KRLLC advanced funds to IWS from the mid-1990s through August 2007. During the decade in which these advances were made, there were no promissory notes, debentures, or other “certificates evidencing the indebtedness.” *Hardman*, 827 F.2d at 1412. Rather, the advances were made on open account, tracked in a QuickBooks register maintained by petitioner wife. This register was a product of KRLLC’s internal bookkeeping. It was not promissory note or other binding instrument that KRLLC could take to court to establish an enforceable promise to pay.

The terminology used in recording these advances, moreover, is hostile to the notion that they created a genuine debt. The first entry in the QuickBooks register, made on December 31, 1999, shows a credit of $3,331,093 in KRLLC’s favor. This entry was apparently designed to capture advances KRLLC had made to IWS since the latter’s inception in 1994, and it is captioned “Investment-Idaho Waste.” An entry for December 31, 2000, showing a credit of $264,372, is likewise captioned “Investment-Idaho Waste.” These entries suggest capital contributions.

Other credit entries for 1999-2001 - captioned “capital,” “capital gains,” “equipment,” and “equipment lease income” - are difficult to reconcile with debt characterization.[5] A pair of entries for 1999 and 2001, totaling $1,893,437, are captioned “loan from Wells Fargo.”

These entries do not evidence loans from KRLLC to IWS. Rather, they denote bank loans extended to KRLLC or its partners, the proceeds of which the partners contributed to IWS.

[5] Some of these entries are rather cryptic. All were yearend entries made by Mr. Holland, KRLLC's outside accountant at the time. He did not testify at trial.

The only "certificate[] evidencing the indebtedness," *Hardman*, 827 F.2d at 1412, is the October 31, 2008, document captioned "Idaho Waste Systems, Inc." In this document IWS promises to pay KRLLC "on demand" the sum of $3,222,076.89. Robert Riemenschneider signed this document in his capacity as president of IWS; there are no other signatories.

For several reasons we accord this document little weight. IWS received no funds from KRLLC in consideration of executing this document. Quite the contrary: KRLLC had ceased advancing funds to IWS in August 2007, 14 months previously. The purported promissory note thus represents an apparent effort to convert into debt, retroactively, the open-account advances that KRLLC had made to IWS on dozens of occasions during the prior decade. As explained above, there is little or no evidence that these advances constituted debt.

There are other problems with the October 31, 2008, document. The amount shown as due, $3,222,076.89, bears no discernible relationship to the "Due from IWS" QuickBooks register in which KRLLC recorded its advances. That register has no entries whatever for calendar year 2008, and the last entry for 2007 shows an alleged balance due from IWS of $7,424,926. At trial petitioner husband did not recognize the purported promissory note. He stated that he had no "knowledge or involvement about that note at the time" and "wasn't involved in it[s] being written or anything else."

Finally, the October 31, 2008, document clearly reflected a related-party transaction. Robert Riemenschneider, who signed the note for the putative obligor, owned with his wife 50% of KRLLC, the putative obligee. The labels he assigned are thus far from dispositive. See *Fin Hay Realty Co.*, 398 F.2d at 697; *Anchor Nat'l Life Ins. Co.*, 93 T.C. at 406-07. For all these reasons, we give little weight to the purported promissory note and find that the first Hardman factor strongly favors respondent.

2. Presence or Absence of Maturity Date

"[A] definite maturity date on which the principal falls due for payment, without reservation or condition, ...is a fundamental characteristic of a debt." *Monon R.R. v. Commissioner*, 55 T.C. 345, 359 (1970). On the other hand, "[t]he absence of a fixed maturity date indicates that repayment is tied to the fortunes of the business" and thus tends to support equity characterization. *Hardman*, 827 F.2d at 1413; Am. Offshore, Inc., 97 T.C. at 602.

KRLLC's advances to IWS between 1994 and 2007 were reflected in no promissory note or other debt instrument and thus necessarily lacked a fixed maturity date. The purported 2008 promissory note likewise has no fixed maturity date. It states only that IWS will repay the principal "on demand" and that interest will accrue at 9% "until paid." The document imposes no repayment schedule, stating only that "[a]ny part [of the principal] may be paid at any time." The implication of this demand note is that KRLLC would be repaid only if and when IWS was sufficiently profitable to make repayment.

Petitioners seek to explain the absence of a maturity date by characterizing KRLLC's advances as a "working line of credit." We do not find this characterization apt. A line of credit necessarily has a limit; when the limit is reached, no further borrowing is possible. There was no set limit (and no apparent limit) to KRLLC's cash advances, which continued inexorably for a decade, topping out with an alleged balance due of $7,424,926 at yearend 2007. In any event, a line of credit must be repaid at some point, and neither the pre-2008 advances nor the purported 2008 promissory note contains the remotest suggestion of a repayment date. We find that this second *Hardman* factor likewise favors equity treatment.

3. Source of Payments

A true lender is concerned with a reliable return on his investment in the form of interest and repayment of principal. *Curry v. United States*, 396 F.2d 630, 634 (5th Cir. 1968); Dev. *Corp. of Am. v. Commissioner*, T.C. Memo. 1988-127, 55 T.C.M. (CCH) 455, 483. If timely payments to the alleged lender are not made, or if they can plausibly be made only out of future earnings, an inference arises that the advances were contributions to capital. *Hardman*, 827 F.2d at 1413; *Am. Offshore, Inc.*, 97 T.C. at 602.

IWS did not make consistent payments of interest to KRLLC at any time. The QuickBooks register shows only three interest payments between 1999 and 2007: two payments totaling $18,411 at yearend 2005 and a payment of $8,390 at yearend 2007. On those dates the register showed the alleged balances due from IWS as $6,109,521 and $7,424,926, respectively. If the interest reported as paid was recorded on the alleged balance due, it would have been paid at a rate of 0.3% and 0.1%, respectively. That is a far cry from the 9% rate specified in the 2008 purported promissory note. And there is no evidence, in the QuickBooks register or elsewhere, that IWS after October 31, 2008, ever made a single interest payment on that purported note, at a rate of 9% or otherwise.

Petitioner husband testified at trial that all cash advances made by KRLLC to IWS included unstated interest at a rate of 9%. But virtually all these advances were in round numbers ($10,000, $45,000, $190,000, $460,000, etc.). Mathematically speaking, it is hard to imagine how such amounts could have included an interest charge. In any event, interest on the advances could not have been calculated ab initio because the term of the "loan" was unknowable.

Petitioners did not introduce into the record any IWS financial statements for years before 2008. But for 2008 IWS reported retained earnings of negative $5,460,671, indicating that it had suffered substantial losses in prior years. Petitioner husband admitted at trial that, during the 2007–2010 timeframe, IWS was not "in any kind of position to pay back [KRLLC] anything." Given this track record, no reasonable third-party lender could have viewed IWS as financially sound enough to make regular interest payments at a 9% rate. We thus view the third *Hardman* factor as strongly favoring equity treatment.

4. Right to Enforce Payment

The existence of a right to enforce payment of principal and interest is a further indicator of bona fide debt. Hardman, 827 F.2d at 1413; Gokey Props., Inc. v Commissioner, 34 T.C. 829, 835 (1960), aff'd, 290 F.2d 870 [7 AFTR 2d 1514] (2d Cir. 1961). KRLLC lacked any meaningful enforcement rights. The purported promissory note had no repayment schedule and no fixed maturity date. IWS's true creditors, including Premier West and Mr. Yarbrough, demanded a security interest in the landfill [*18] property, IWS's most valuable asset. KRLLC demanded from IWS no security interest of any kind. And unlike the financial institutions from which IWS sought financing in 2015 and 2016, which required guaranties from all 20% shareholders, KRLLC foreswore that enforcement mechanism as well. This factor strongly favors respondent.

5. Participation in Management

If a taxpayer's advances to a corporation entitle him to greater participation in its management, the advances are more likely to be treated as equity. *Hardman*, 827 F.2d at 1413; *Am. Offshore, Inc.*, 97 T.C. at 603. Petitioners and the Riemenschneiders, who jointly owned 100% of KRLLC, jointly owned 69% of IWS. But KRLLC's advances did not explicitly entitle them to any greater role in IWS's management. We regard this factor as neutral.

6. Status Compared to Regular Creditors

If a shareholder's rights to repayment of principal and interest are subordinated to the rights of regular creditors, then such advances are likelier to merit equity treatment. *Hardman*, 827 F.2d at 1413. Even absent an explicit subordination clause, the failure to demand timely repayment or to take collateral effectively subordinates the alleged debt to the rights of other creditors, who may receive payment or foreclose on their security in the interim. *Am. Offshore, Inc.*, 97 T.C. at 603.

According to its QuickBooks register, KRLLC advanced more than $7 million to IWS, on an unsecured basis, between 1999 and 2007. All of those advances were subordinated to the claims of IWS's later creditors. In 2007 IWS put up its landfill property as collateral for a $5 million loan from Premier West. When IWS could not repay that loan, the landfill property became security for a $4.2 million loan from Mr. Yarbrough, who ultimately foreclosed on the collateral when IWS defaulted. At no point did KRLLC secure collateral from IWS, make demand for the payment of interest or principal, or otherwise take steps to collect its alleged debt. Such behavior is wholly inconsistent with a typical debtor-creditor relationship, and this factor thus favors respondent.

7. Objective Indicators of the Parties' Intent

The parties' words and actions may supply evidence as to whether they intended cash advances to be debt or equity. *Hardman*, 827 F.2d at 1413. Because petitioners did not submit into evidence IWS's pre-2008 financial statements, the principal evidence of their intent regarding advances through August 2007 appears in the "Due from IWS" QuickBooks register. As noted *supra* pp. 14-15, several million dollars' worth of entries on that register are described as items such as "Investment-Idaho Waste," "capital," "capital gains," "equipment," and "equipment lease income." None of these descriptions favors debt treatment.

8. "Thin" or Adequate Capitalization

The purpose of examining the alleged borrower's debt-to-equity ratio is to determine whether it is so thinly capitalized that it would be unable to repay the debt if its financial condition worsened. *Bauer v. Commissioner*, 748 F.2d at 1369. A true creditor desires robust capitalization to guard against this risk. Thin capitalization thus suggests that shareholder advances to a corporation are capital contributions. *Hardman*, 827 F.2d at 1414; *Hubert Enters., Inc. v. Commissioner*, 125 T.C. 72, 96-97 (2005), aff'd in part, vacated in part, and remanded on other grounds, 230 F. App'x 526 (6th Cir. 2007).

IWS was severely undercapitalized at all times. In the absence of financial statements for years before 2008, it is impossible to calculate debt-to-equity ratios for that period. But at yearend 2008, after executing the purported promissory note to KRLLC, IWS reported liabilities of $12,615,390 and shareholder equity of negative $4,433,981. Th is computes to a debt-to-equity ratio nearing infinity. See, *e.g., Dunmire v. Commissioner*, T.C. Memo. 1981-372, 79 T.C.M. (CCH) 1769, 1774 n.24 (noting that, where shareholder equity is a negative number, the debt-to-equity ratio approaches infinity). This factor strongly favors respondent.

9. Identity of Interest

Where a stockholder owns "debt" in the same proportion to which he holds stock in the corporation, the characterization of his advances as "debt" may be suspect. *Bauer v. Commissioner*, 748 F.2d at 1370. Petitioners and the Riemenschneiders owned 100% of KRLLC, the alleged obligee. Petitioners and the Riemenschneiders owned 69% of IWS, the alleged obligor, and the Riemenschneiders' children owned another 11% of IWS. Petitioners and the Riemenschneiders thus had complete control over both entities at all times. *Cf*. § 318(a)(1) (providing that an individual is deemed to own the shares of any spouse and children for purposes of determining corporate control). While the record does not reveal an identity of interest, it reveals a strong overlapping of interest, and this factor thus offers little help to petitioners.

10. Relatedness of Payments to Profits

A true lender is concerned with reliable payment of interest. A lack of interest payments—and the alleged debtor's lack of current ability to make them—suggests that the party advancing funds is looking to the corporation's future earnings to achieve a return on his investment. *Hardman*, 827 F.2d at 1414; *Am. Offshore, Inc.*, 97 T.C. at 605. This factor, like the third *Hardman* factor, thus favors respondent. See *supra* pp. 16-17.

11. Ability to Borrow from Other Sources

If the corporation is able to borrow funds from third-party lenders on substantially the same terms as those imposed by the payor of the advance, an inference arises that the advance may be debt. *Hardman*, 827 F.2d at 1414; *Segel v. Commissioner*, 89 T.C. 816, 828 (1987); *Ill. Tool Works Inc.*, 116 T.C.M. (CCH) at 135. IWS allegedly borrowed more than $7 million from KRLLC, for a period of more than a decade, at an effective interest rate of zero, offering no collateral and no guaranties from its shareholders.

It is obvious that IWS could not have secured such terms from an unrelated third party. Although IWS sought credit from many financial institutions during this period, most

> turned it down. The two third-party lenders that did extend credit, Premier West and Mr. Yarbrough, demanded a security interest in the landfill property, which represented more than 70% of IWS's assets. And when IWS approached outside financial institutions (unsuccessfully) during 2015 and 2016, they demanded guaranties from all shareholders owning 20% or more of the company. The final Hardman factor thus favors respondent.
>
> In sum, we conclude that KRLLC's advances to IWS from inception through August 2007 did not give rise to bona fide debt, but rather constituted capital contributions on behalf of petitioners and the Riemenschneiders. Assuming arguendo that some portion of these advances constituted debt, that debt was extinguished by the Unanimous Consent resolution in January 2012, when all loans from shareholders were converted to paid-in capital. For both of these reasons, there remained no debt from IWS to KRLLC that could have become worthless in 2017, the year for which the bad debt deduction was claimed. We thus sustain the IRS's disallowance of that deduction and of the pass-through loss deduction and carryover NOL deduction claimed on petitioners' 2017 and 2018 returns, respectively.

The court upheld penalties:

> Petitioners contend that they relied in good faith on advice from their return preparer, Jennifer Werner. As a preliminary matter, we do not know what advice petitioners actually received from Ms. Werner. She did not communicate with petitioners directly; rather, she communicated with petitioners' daughter, Ms. Gilmore, in connection with preparation of the 2017 and 2018 tax returns. Petitioners did not make Ms. Gilmore available to testify about the advice she received from Ms. Werner or about the advice (if any) that she relayed to petitioners. Nor did petitioners testify about the second-hand advice (if any) that they got from Ms. Gilmore. Petitioners have thus failed to establish that they actually received and relied on professional advice.
>
> In order for reliance on professional advice to be reasonable, the professional must have "arrive[d] at that advice independently." *Neonatology Assocs., P.A.*, 115 T.C. at 98. Ms. Werner testified that she essentially transposed the $2,095,757 "bad debt" number from KRLLC's QuickBooks register to line 11 of KRLLC's 2017 tax return, without investigating the propriety of either the amount or the nature of the loss it purported to represent. Because the claimed bad debt was the product of petitioners' own bookkeeping, any advice Ms. Werner may have rendered was not "independent."
>
> To establish reasonable cause, a taxpayer must also have provided the adviser with all necessary and accurate information. Id. at 99. Petitioners did not inform Ms. Werner, at the time she prepared the 2017 tax returns, that they had executed in 2012 a Unanimous Consent resolution that converted all shareholder loans to equity. At trial Ms. Werner admitted that knowledge of this resolution would have been relevant to her analysis of whether KRLLC could properly claim a bad debt loss deduction for 2017.
>
> For these reasons, we are unable to conclude that petitioners had reasonable cause for their substantial understatements of income tax. We accordingly sustain respondent's determination of accuracy-related penalties for both years.

The Second and Fifth Circuits have spoken in a high-profile debt vs. equity case involving partnerships in the foreign arena.[1848]

If a debt instrument with a term of more than five years from issuance has original issue discount that exceeds the AFR by more than 5%, the excess may be reclassified as a dividend.[1849] Straight debt the term of which was an unknown length between 3 and 9 years was not equity even though its length might be extended to up to 15 years after issuance.[1850] Interest on indebtedness of a corporation which is payable in equity of the issuer or a related party or equity held by the issuer (or any related party) in any other person may also be nondeductible.[1851]

Although payments made within two years of a partner investing in a partnership generally are presumed to be disguised sales, payments of not more than 150% of the AFR are not presumed to be disguised sales.[1852]

See Schneider, "Is Debt vs. Equity Different in a Partnership?" *Taxes* (CCH (3/2015).[1853]

See also part II.G.4.a.ii Bad Debt Loss – Must be Bona Fide Debt, II.G.4.d.ii Using Debt to Deduct S Corporation Losses (discussing deducting S corporation losses against loans from shareholders to the corporation and the consequences of doing so), and III.B.1.a.i.(a) Loans Must be Bona Fide.

On April 8, 2016, the government issued proposed regulations under Code § 385, providing certain guidelines for recharacterizing debt as equity.[1854] Final regulations were issued October 21, 2016 as T.D. 9790. The final regulations and their preamble are lengthy. In response to comments, the final regulations narrowed the entities to which they apply, as part III of the preamble explains:

> Changes to the overall scope of the regulations:
>
> - *Exclusion of foreign issuers*. The final regulations reserve on all aspects of their application to foreign issuers; as a result, the final regulations do not apply to foreign issuers.
>
> - *Exclusion of S corporations and non-controlled RICs and REITs*. S corporations and non-controlled regulated investment companies (RICs) and real estate investment trusts (REITs) are exempt from all aspects of the final regulations.

[1850] Letter Ruling 201405005. This ruling involved a stock redemption followed by stock being issued to key employees and included number of representations.
[1851] Code § 163(*l*).
[1852] Reg. § 1.707-4(a)(3)(ii).
[1853] Saved as Thompson Coburn LLP doc. no. 6544618.
[1854] REG-108060-15, Fed. Reg. Vol. 81, No. 68, p. 20911.

- *Removal of general bifurcation rule*. The final regulations do not include a general bifurcation rule. The Treasury Department and the IRS will continue to study this issue.

Significant changes to the documentation requirements in § 1.385-2:

- *Extension of period required for timely preparation*. The final regulations eliminate the proposed regulations' 30-day timely preparation requirement, and instead treat documentation and financial analysis as timely prepared if it is prepared by the time that the issuer's federal income tax return is filed (taking into account all applicable extensions).

- *Rebuttable presumption based on compliance with documentation requirements*. The final regulations provide that, if an expanded group is otherwise generally compliant with the documentation requirements, then a rebuttable presumption, rather than per se recharacterization as stock, applies in the event of a documentation failure with respect to a purported debt instrument.

- *Delayed implementation*. The final regulations apply only to debt instruments issued on or after January 1, 2018.

Significant changes to the rules regarding distributions of debt instruments and similar transactions under § 1.385-3:

- *Exclusion of debt instruments issued by regulated financial groups and insurance entities*. The final and temporary regulations do not apply to debt instruments issued by certain specified financial entities, financial groups, and insurance companies that are subject to a specified degree of regulatory oversight regarding their capital structure.

- Treatment of cash management arrangements and other short-term debt instruments. The final and temporary regulations generally exclude from the scope of § 1.385-3 deposits pursuant to a cash management arrangement as well as certain advances that finance short-term liquidity needs.

- *Limiting certain "*cascading*" recharacterizations*. The final and temporary regulations narrow the application of the funding rule by preventing, in certain circumstances, the so-called "cascading" consequence of recharacterizing a debt instrument as stock.

- *Expanded earnings and profits exception*. The final and temporary regulations expand the earnings and profits exception to include all the earnings and profits of a corporation that were accumulated while it was a member of the same expanded group and after the day that the proposed regulations were issued.

- *Expanded access to $50 million exception*. The final and temporary regulations remove the "cliff effect" of the threshold exception under the proposed regulations, so that all taxpayers can exclude the first $50 million of indebtedness that otherwise would be recharacterized.

- *Credit for certain capital contributions*. The final and temporary regulations provide an exception pursuant to which certain contributions of property are "netted" against distributions and transactions with similar economic effect.

- *Exception for equity compensation*. The final and temporary regulations provide an exception for the acquisition of stock delivered to employees, directors, and independent contractors as consideration for the provision of services.

- *Expansion of 90-day delay for recharacterization*. The 90-day delay provided in the proposed regulations for debt instruments issued on or after April 4, 2016, but prior to the publication of final regulations, is expanded so that any debt instrument that is subject to recharacterization but that is issued on or before October 21, 2016, will not be recharacterized until immediately after October 21, 2016.

Key to much of this is multinational entities documenting loans properly.[1855] Also, transfers between related companies 36 months before or after a loan generally are deemed to be a repayment of debt rather transactions affecting equity.[1856]

Notice 2017-36, part II, described the documentation requirements and postponed their applicability until 2019:

> The Documentation Regulations in § 1.385-2 have two principal purposes. The first is to provide guidance regarding the documentation and other information that must be prepared, maintained, and provided to be used in the determination of whether an instrument subject to the Documentation Regulations will be treated as indebtedness for federal tax purposes. The second is to establish certain operating rules, presumptions, and factors to be taken into account in the making of any such determination. The Documentation Regulations, once applicable, implement these purposes by generally requiring taxpayers to prepare and maintain documentation that evidences specified "indebtedness factors" with respect to purported debt instruments subject to the regulations. Thus, compliance with the Documentation Regulations does not establish that an interest is indebtedness; it serves only to satisfy the minimum documentation for the determination to be made under general federal tax principles….
>
> In response to the concern that taxpayers have continued to raise with the application of the Documentation Regulations to interests issued on or after January 1, 2018, and in light of further actions concerning the final and temporary regulations under section 385 in connection with the review of those regulations, the Treasury Department and the IRS have determined that these concerns warrant a delay in the application of the Documentation Regulations by 12 months. Accordingly, the Treasury Department and the IRS intend to amend the Documentation Regulations to apply only to interests issued or deemed issued on or after January 1, 2019. Pending the issuance of those regulations, taxpayers may rely on the delay in application of the Documentation Regulations set forth in this notice.

[1855] See Connors, de Marigny, and Rodgers, "The Final § 385 Regulations," *TM Memorandum* (BNA) 2/20/2017, saved as Thompson Coburn doc. no. 6515888.
[1856] Reg. § 1.385-3(b)(3)(iii)(A).

T.D. 9880 (11/04/2019) repealed Reg. § 1.385-2, which it referred to as “the Documentation Regulations,” commenting:

> The Treasury Department and the IRS, however, continue to consider the issues addressed by the Documentation Regulations.
>
> After this further review, the Treasury Department and the IRS may propose a modified version of the Documentation Regulations. In any modified version, the Treasury Department and the IRS would substantially simplify and streamline the proposal to minimize taxpayer burdens, while ensuring the collection of sufficient documentation and other information necessary for tax administration purposes. The Treasury Department and the IRS welcome comments regarding approaches that would most effectively achieve that balance. Any modified version of the Documentation Regulations would be proposed with a prospective effective date to allow sufficient lead-time for taxpayers to design and implement systems to comply with those regulations.

When issuing T.D. 9880, REG-123112-19 (RIN 1545-BP51) announced:

> **Explanation of Contemplated Regulations**
>
> Pursuant to E.O. 13789, the Treasury Department and the IRS intend to issue proposed regulations modifying the Distribution Regulations. To make the Distribution Regulations more streamlined and targeted, the Treasury Department and the IRS intend to issue proposed regulations substantially modifying the funding rule, including by withdrawing the per se rule. The Treasury Department and the IRS intend that the proposed regulations would not treat a debt instrument as funding a distribution or economically similar transaction solely because of their temporal proximity; rather, the proposed regulations would apply the funding rule to a debt instrument only if its issuance has a sufficient factual connection to a distribution to a member of the taxpayer’s expanded group or an economically similar transaction (for example, when the funding transaction and distribution or economically similar transaction are pursuant to an integrated plan). Thus, under the proposed regulations, a debt instrument issued without such a connection to a distribution or similar transaction would not be treated as stock. As a result, the proposed distribution regulations would be more streamlined and targeted while continuing to deter tax-motivated uneconomic activity. As part of the intended revisions of the funding rule, the Treasury Department and the IRS also are considering substantial revisions to, or removal of, certain exceptions in the regulations, consistent with the revised standard. The proposed distribution regulations would not alter materially the definition of a covered member (defined in § 1.385-1(c)(2) as a member of an expanded group that is a domestic corporation).
>
> **Proposed Applicability Date**
>
> The Treasury Department and the IRS intend to provide that the proposed regulations would apply to taxable years beginning on or after the date of publication of the Treasury decision adopting those rules as final regulations in the Federal Register.
>
> **Reliance on the 2016 Proposed Regulations**
>
> For periods after October 13, 2019 (the expiration date of the Temporary Regulations), a taxpayer may rely on the 2016 Proposed Regulations until further notice is given,

provided that the taxpayer consistently applies the rules in the 2016 Proposed Regulations in their entirety.

Certain temporary regulations promulgated October 21, 2016 expired October 13, 2019.[1857] A taxpayer may rely on proposed regulations published October 21, 2016, if the taxpayer consistently applies the rules in the 2016 Proposed Regulations in their entirety.[1858]

The final regulations under Code § 385 do not recharacterize debt issued by a partnership as equity; instead, they treat a partnership as an aggregate and test as if the partners had made the loan or investment.[1859]

Deitch v. Commissioner, T.C. Memo. 2022-86, found that an arrangement was debt rather than equity. The court's syllabus describes the case:

> Ps were partners in the partnership WTS. In 2006 WTS purchased a commercial rental property in Georgia by financing the property with the proceeds of a loan from PLI. The integrated loan documents included an "Additional Interest Agreement" that entitled PLI to additional interest of two types - "NCF Interest" (*i.e.*, 50% of the net cashflow from the property) and "Appreciation Interest" (*i.e.*, 50% of the appreciation in the value of the property if it was ever sold or the loan was terminated). WTS owned no other real property.
>
> During the years WTS owned the commercial rental property, it made regular loan payments to PLI, which consisted of repayment of principal, stated interest at a fixed rate, and 50% of the net income from the property, all of which it characterized as interest. WTS sold the property in 2014 and, in accordance with the loan documents, paid to PLI the appreciation interest.
>
> On its partnership tax return for 2014, WTS claimed an I.R.C. § 163(a) deduction for its payment of the appreciation interest to PLI and reported a net loss in excess of $1 million on the commercial rental property. WTS reported net I.R.C. § 1231 gain of $2.6 million. Ps reported their distributive shares of income and loss of WTS on their individual income tax returns for 2014.
>
> R sent statutory notices of deficiency to Ps, determining that Ps' incomes should each be increased by $517,841, resulting from R's disallowance of the appreciation interest WTS claimed as a deductible interest expense.
>
> *Held*: Notwithstanding I.R.C. § 6221(a) and Tax Court Rule 240(c), we have jurisdiction to determine whether WTS and PLI were engaged in a joint venture constituting a partnership for federal income tax purposes, and we hold that they were not so engaged.
>
> *Held*, further, PLI did not have a "single equity interest" in its dealings with WTS that transformed WTS's loan payments on genuine indebtedness to PLI into guaranteed payments made to a partner pursuant to I.R.C. § 707(c).

[1857] Notice 2019-58.
[1858] Notice 2019-58.
[1859] See part 3, "Aggregate Treatment of Partnerships," of section Part V, "Comments and Changes to § 1.385-3—Certain Distributions of Debt Instruments and Similar Transactions," of the preamble to T.D. 9790 (10/21/2016).

> *Held*, further, in light of the facts stipulated by the parties, the appreciation interest that WTS paid to PLI was interest deductible under I.R.C. § 163, not a payment in respect of any equity interest held by PLI.

In the court's analysis, "Formation of a partnership for tax purposes," the court reasons:

> Section 761(a) defines a partnership as "includ[ing] a syndicate, group, pool, joint venture, or other unincorporated organization through or by means of which any business, financial operation, or venture is carried on, and which is not...a corporation or a trust or estate." See also § 7701(a)(2). "Partnership" for tax purposes is generally a more inclusive term than "partnership" at common law, and for tax purposes it may include entities not traditionally considered partnerships. *Dickerson v. Commissioner*, T.C. Memo. 2012-60. "A partnership is generally said to be created when persons join together their money, goods, labor, or skill for the purpose of carrying on a trade, profession, or business and when there is community of interest in the profits and losses." *Commissioner v. Tower*, 327 U.S. 280, 286 (1946). "A partnership is, in other words, an organization for the production of income to which each partner contributes one or both of the ingredients of income-capital or services." *Commissioner v. Culbertson*, 337 U.S. 733, 740 (1949). To decide whether a partnership exists, a court must also analyze the relevant facts to determine whether "the parties in good faith and acting with a business purpose intended to join together in the present conduct of the enterprise". *Id*. at 742.
>
> Here the Commissioner contends that WTS and PLI formed a "joint venture" that constituted a partnership under section 761(a), and we evaluate that "joint venture" contention "by reference to the same principles that govern the question of whether persons have formed a partnership which is to be accorded recognition for tax purposes". *Luna v. Commissioner*, 42 T.C. 1067, 1077 (1964) (first citing *Estate of Smith v. Commissioner*, 313 F.2d 724 (8th Cir. 1963), aff'g in part, rev'g in part and remanding 33 T.C. 465 (1959); and then citing *Beck Chem. Equip. Corp. v. Commissioner*, 27 T.C. 840, 848-49 (1957)). These principles require us to consult
>
>> [t]he following factors, none of which is conclusive...: [1] The agreement of the parties and their conduct in executing its terms; [2] the contributions, if any, which each party has made to the venture; [3] the parties' control over income and capital and the right of each to make withdrawals; [4] whether each party was a principal and coproprietor, sharing a mutual proprietary interest in the net profits and having an obligation to share losses, or whether one party was the agent or employee of the other, receiving for his services contingent compensation in the form of a percentage of income; [5] whether business was conducted in the joint names of the parties; [6] whether the parties filed Federal partnership returns or otherwise represented to respondent or to persons with whom they dealt that they were joint venturers; [7] whether separate books of account were maintained for the venture; and [8] whether the parties exercised mutual control over and assumed mutual responsibilities for the enterprise.
>
> *Id*. at 1077-78 (citations omitted).

The court pointed out that all of the documents were consistent with a secured loan with fixed stated interest and that the IRS' only complaint was that the bonus interest was based on sales proceeds:

> The Commissioner accepts that three of the agreements at issue here-the original note, the modifications, and the security agreement-constitute “genuine indebtedness” by WTS to PLI. But the fourth agreement-the Additional Interest Agreement that gave rise to WTS’s obligation to pay appreciation interest-cannot be separated from these other three agreements. Indeed, the four agreements were inextricably integrated with each other. They were simultaneously bargained for, and they cross-reference each other.
>
> WTS’s obligation to pay appreciation interest arose from the same advances, totaling $4.4 million, that gave rise to WTS’s obligation to pay the other interest components (which are concededly deductible even-the NCF interest that, like appreciation interest, was provided for in the Additional Interest Agreement). There are no other advances that PLI made that could be characterized as giving rise to the obligation to pay appreciation interest.
>
> One might still consider arguing for an allocation of the appreciation interest to a portion of the $4.4 million of advances that should be characterized as equity, but the Commissioner has affirmatively disclaimed that argument, as we now explain.

The court then explained that the IRS was essentially requiring it to determine whether the entire arrangement was debt or equity instead of being able to look at it as part debt and part equity:

> Adhering to the position of a General Counsel Memorandum (“G.C.M.”), the Commissioner here acknowledges that PLI’s “right to share in the partnership’s profits” cannot be said to be “separable from its right to repayment of its advance with interest thereon”, and acknowledges that it cannot be held “that only the right to share in profits is an equity interest”. I.R.S. G.C.M. 36,702 (Apr. 12, 1976), 1976 WL 38976, at *5. This G.C.M. was issued in response to (and in criticism of) the opinion of the Court of Appeals for the Second Circuit in the case of *Farley Realty Corp. v. Commissioner*, 279 F.2d 701 (2d Cir. 1960), aff’g T.C. Memo. 1959-93. Even though this is an argument that the Commissioner disclaims in these cases, we discuss it to explain the reason for the issues that we must decide.
>
> In *Farley* two individuals (A and B) organized a corporation (C) to purchase a building for $380,000. The seller took a first mortgage on the building for $280,000; A and B financed the remaining $100,000 with $30,000 cash and the proceeds of a $70,000 loan from another individual (Z). *Id*. at 703. Z explicitly desired to participate in the venture solely as a creditor. Id. The terms of C’s second mortgage to Z provided that Z would advance $70,000 to C for ten years in exchange for payments consisting of 15% interest for the first two years and 13% interest thereafter, as well as “50 per cent of the appreciation in the value of the property if it appreciated in value”, which was determined at such time that either C or Z extended an offer to sell or to purchase the other’s interest in the property; the $70,000 “principal” was not due until the end of the ten-year term, and repayment of the principal was expressed as “seventy per cent of the first $100,000 of the amount by which the purchase price exceeded the amount outstanding on the first mortgage”. *Id*. C made payments in accordance with the agreement. Shortly before the principal was due, and when only $583 of interest remained to be paid, Z died and his administrators sought to collect the amounts due under the agreement. *Id*. In a state court suit, C challenged the enforceability of Z’s entitlement to a 50% share in the appreciation, and the parties settled for $120,583, which represented $70,000 in principal, $583 in interest, and $50,000 for Z’s share of the appreciation. When C filed its

tax return, it claimed interest deductions totaling $50,583, and the Commissioner disallowed the $50,000 portion of the interest deduction that corresponded to Z's $50,000 appreciation payment.

The court sustained the disallowance of $50,000 of the interest deductions and held that Z's "right to share in the appreciation of petitioner's property is separable from his right to repayment of his $70,000 loan with interest thereon, and that the right to share in the property's appreciation constituted an equity interest in the property." *Id*. at 704. The court reasoned that Z's entitlement to the appreciation payment, taken separately and apart from the interest of $583, exposed Z to downside risk, was of an indefinite amount, and lacked a fixed maturity date, *id*. at 704-05, and therefore was not "interest on an indebtedness". (The court explicitly did not reach the question of whether Z's "equity interest in the property had the features of a 'joint venture'" under relevant state law, *id*. at 706, which is what the Commissioner contends occurred in these cases.)

The position that the IRS has taken on Farley-and the position that the Commissioner expressly takes in these cases-is that Farley was wrongly decided insofar as it "suggests that the taxpayer's right to share in the partnership's profits is separable from its right to repayment of its advance with interest thereon and that only the right to share in profits is an equity interest". G.C.M. 36,702, 1976 WL 38976, at *5. As the G.C.M. observes, "serious computational problems" would arise with determining that Z held an equity interest in C, if in fact all of Z's $70,000 contribution constituted a loan. *Id*. at *6. If his entire contribution was a loan, then Z "contributed neither capital nor services in his capacity as a 'partner.'...In short the Farley decision appears unsound to the extent that it holds that Z held an equity interest for which he contributed neither capital nor services". Id. at *5. Fixing this anomaly by separating the loan from the equity interest "might require computing the amount [of the advance] allocable to the loan as a portion of the contribution sufficient to establish the fixed interest as a true, arm's length return and then allocating the remaining portion to equity", *id*. at *6, an exercise that would involve "difficulty", "mak[ing] this type of allocation undesirable", *id*. at n.3.

We do not attempt here any such allocation between debt and equity because the Commissioner has not argued for it, has disclaimed it,[13] and has not put on any evidence to enable the necessary computations to make the allocation. Therefore, we cannot allocate PLI's $4.4 million advance between a loan and an equity interest.[14] This leaves the Commissioner backed into a corner: If the transaction is entirely debt, then the appreciation interest is deductible interest; but he cannot argue that only a portion of it is equity; so he argues instead that PLI's interest is all equity-to wit, its equity share of a WTS-PLI joint venture. Adjudicating that argument would require us to have jurisdiction over partnership issues of such an entity, and we must determine whether such an entity exists.

[13] For example, the Commissioner's Post-trial Answering Brief asserts "that PLI's advance to WTS was...not part equity, part debt".

[14] In the absence of stipulations to the contrary and the Commissioner's disclaimer, one might note PLI's practice of advancing 75% of the stabilized value for a conventional loan, versus PLI's practice of increasing the amount to 85% of a projected stabilized value for a participating loan (as is at issue here), and might entertain the possibility that the additional 10% was not bona fide indebtedness but was in fact capital contributed not as part of a loan advance but for a participating

> profits interest. But this we cannot do, *see* Rule 90(e) and (f), and the Commissioner does not ask us to do so.

In the next portion of the opinion, "Whether WTS established a joint venture with PLI," the court explains that the arrangement had all of the indicia of lender/borrower and was not a partnership. When reading the analysis, consider that the indicia of a partnership would have subjected the lender to joint and several liability (see part II.C.10 Whether Tenancy-in-Common or other Arrangement Constitutes a Partnership), so a lender would do its best to avoid becoming involved in a borrower's operations in a manner that would be characterized as a partnership; part II.C.10 discusses *Luna* and other fundamental case law regarding whether an arrangement constitutes a partnership. With that background, here is the court's analysis:

> The Commissioner contends, notwithstanding the ostensible loan agreement between WTS and PLI-embodied in the four documents that we find to be integrated-that the two entities in fact entered into a joint venture. He now argues that the parties' entire agreement created a "relationship between WTS and PLI...of joint venturers, not lender and borrower, and that PLI's advance was more in the nature of a capital contribution than a loan." We think that this argument must be rejected if we take at face value the parties' binding stipulation that the original note, the modifications, and the security agreement "constitute genuine indebtedness by West Town Square to Protective Life" and the Commissioner's acknowledgement that "the agreement between WTS and PLI, despite consisting of multiple documents, must be considered as a whole". Whatever else PLI might have been in this arrangement, we know it was a creditor. As we have noted, PLI advanced its entire $4.4 million as proceeds pursuant to those documents. There was no separate or additional advance that did not "constitute genuine indebtedness" and that could be characterized as giving rise to WTS's obligation to pay the appreciation interest.
>
> The Commissioner's stipulation of the existence of "genuine indebtedness", and his acceptance that the four loan documents "must be considered as a whole" and that they gave PLI a single interest, contradict the argument he now seeks to advance. Paragraph 35 of the stipulation reflects the parties' agreement that PLI held debt in WTS, and the Commissioner now accepts that PLI's advance created a single interest that must be characterized as either wholly debt or wholly equity. Consequently, the Commissioner's contention that PLI has a single interest properly characterized as equity must fail. The documents created "genuine indebtedness", and this fact precludes a finding that they created no debt but rather a single equity interest in a supposed joint venture.
>
> With the same result, we turn now to a more detailed analysis of the eight "*Luna* factors", which analysis shows that WTS and PLI did not form a joint venture that was a partnership for tax purposes.
>
> **1. The agreement of the parties and their conduct in executing its terms**
>
> The loan documents executed by WTS and PLI could hardly have been more explicit in naming their relationship. Affirmatively, the documents stated that WTS and PLI were borrower and lender. Negatively, the documents expressly stated that WTS and PLI did not form a joint venture. WTS and PLI conducted themselves in accordance with the terms of the loan documents (including the Additional Interest Agreement), and the

Commissioner does not contend that any terms of the agreement were not followed. This weighs against the existence of a joint venture.

The Commissioner asserts otherwise, stating (with record citations omitted):

> As to the first factor the agreement between PLI and WTS contemplated the purchase, operation, and eventual sale of a shopping center.... A key piece of that agreement was that PLI would share in the potential upside of the investment, both by receiving half of the operating profits but also half of the net proceeds from a sale of the shopping center.

This assertion reflects a misunderstanding of the first factor. It is true that the substance rather than the ostensible form of the transaction controls a determination of the existence of a joint venture, see *WB Acquisition, Inc. & Sub. v. Commissioner*, T.C. Memo. 2011-36, 101 T.C.M. (CCH) 1157, 1164, *aff'd sub nom. DJB Holding Corp. v. Commissioner*, 803 F.3d 1014 (9th Cir. 2015), and that the characterization reflected in a written agreement is not necessarily determinative of whether the parties entered into a joint venture. It may also sometimes be true that a "shar[ing] in the potential upside" is an indication of a possible joint venture, and there is no denying that PLI acquired-apart from its right to receive conventional interest-the right to share in the appreciated value of the shopping center. But that analysis concerns the fourth factor, discussed below. The first factor considers whether the form of the purported agreement is a joint venture and whether the parties departed from the ostensible form. In *W.B. Acquisition* we held, in examining the first factor, that an ostensible joint venture agreement was contradicted by the actual conduct of the parties, so we held that a joint venture had not been created, despite its ostensible form. Here the ostensible form-a series of integrated documents that expressly deny joint venture status and do create "genuine indebtedness"-is debt and not a joint venture, and the parties have operated according to the terms of their agreement. Therefore, the first factor continues to weigh against the existence of a joint venture. (We will proceed to address whether the other factors disclose contrary substance.)

2. The contributions, if any, which each party has made to the venture

There is no dispute that WTS contributed the services that made the operation of the Rome property a successful venture, including rehabilitating and maintaining the property and securing the tenants that produced the rental income on the property. The Commissioner argues that PLI's contribution was the capital, indicating that both were members of a joint venture.

However, the advanced funds of a lender are a loan and not a contribution to capital, so it is insufficient for the Commissioner to note the undisputed fact that PLI was the source of money for the project. One must ask in what capacity PLI provided that money; and it is fair for the Commissioner to insist that one must look past PLI's ostensible loan to ask whether perhaps the advances were not really true debt. But the answers to these questions come easily from the Commissioner's stipulation that the indebtedness evidenced by the original note and its modifications - *i.e.*, the entire $4.4 million amount of the funds advanced by PLI to WTS-was "genuine indebtedness". (As we explain below in part II.C, treatment of that amount as genuine indebtedness precludes a finding that PLI had a "single equity interest" that transformed the payments on the indebtedness into guaranteed payments made to a partner of the partnership.)

PLI contributed little of value outside of its capacity as an arm's-length lender of the entire advance to WTS. This factor weighs against finding a joint venture between WTS and PLI. See *DJB Holding Corp. v. Commissioner*, 803 F.3d at 1026 (citing *Luna*, 42 T.C. at 1077-79, and *Culbertson*, 337 U.S. at 742, for the proposition that a purported partner who contributes no value to a joint venture is not a bonafide partner in the venture).

3. The parties' control over income and capital and the right of each to make withdrawals

Other than the payments that WTS was contractually obligated to make to PLI under the loan documents, WTS controlled the income from the Rome property. PLI was contractually entitled to approximately half of the net income of the Rome property, modified by defining exclusions from "expenses" for purposes of calculating the NCF payment on terms favorable to PLI, whereas WTS was entitled to whatever net income remained after the payments to PLI (which in some years resulted in an overall loss). WTS and PLI did not have equivalent interests in the income stream from the Rome property. PLI was always guaranteed to receive what amounted to more than half of the income from the property, provided that the property was profitable. PLI was likewise not liable for any operating losses, except to the extent that they offset the quarterly amounts due to PLI under the NCF calculation at the end of the year.

PLI also exerted control over the primary capital that was the source of the income at issue, under the terms of the interest agreement and otherwise. For instance, if PLI had not repeatedly agreed to extend the term of the original note (which it was permitted, but by no means obligated, to undertake under the terms of the loan documents), PLI could have effectively forced a sale of the property, because all of the principal remaining on the loan would have been due and WTS had few other assets of value beyond the Rome property itself and its income stream, all of which were pledged to PLI as security for the loan. Moreover, the interest agreement became effective before PLI funded the loan; it was a binding contract that governed the parties' conduct "whether or not the Loan is funded and whether or not the Project is sold". Therefore, if WTS had sought junior financing or a full refinance with a different lender during the life of the loan from PLI, or even if WTS had prepaid the full amount of the principal, it would have nonetheless continued to owe PLI appreciation interest, pursuant to Article 4 of the interest agreement, based on the fair market value of the Rome property at the time that WTS exited the deal (and in certain of those instances, would have continued to owe the NCF payments). Any such actions were subject to approval by PLI or were subject to penalty of default, which likewise would not have relieved WTS of its obligation to make the additional interest payments. PLI therefore had significant control over the capital that WTS employed in its business.

PLI's economic interest under the terms of the Additional Interest Agreement, and as demonstrated by the conduct of the parties, resembles that of a holder of a preferred equity interest in the business. See *Estate of Mixon v. United States*, 464 F.2d 394, 410-11 (5th Cir. 1972)[15] (hampering ability to borrow from other creditors at the time the advance is made, using of funds to acquire capital assets, and the corporation's failure to repay on the due date weigh in favor of finding equity, not debt). Accordingly, this factor weighs in favor of finding that the parties engaged in a joint venture.

[15] Because petitioners resided in Georgia, venue for any appeal of these cases would, under section 7482(b)(1)(A), be the U.S. Court of Appeals for the Eleventh Circuit. That court has adopted as precedent decisions of the former U.S. Court of Appeals for the Fifth Circuit rendered before October 1, 1981. *Bonner v. City of Prichard*, 661 F.2d 1206, 1209 (11th Cir. 1981) (en banc). The Fifth and Eleventh Circuits evaluate 13 factors in a debt versus equity analysis, of which no single factor is controlling, nor are all factors entitled to equivalent significance. *Estate of Mixon*, 464 F.2d at 402. The Commissioner argues that an analysis of these 13 factors results in the conclusion that PLI's advance was made in respect of an equity interest and not debt, and petitioners urge the opposite. We find that analysis of the Luna factors is determinative of the issues in these cases, which require first that we find the existence of the relationship between WTS and PLI that could potentially give rise to an equity interest before we have occasion to characterize that interest.

4. Whether each party was a principal and coproprietor, sharing a mutual proprietary interest in the net profits and having an obligation to share losses, or whether one party was the agent or employee of the other, receiving for his services contingent compensation in the form of a percentage of income

As we observed with respect to the third Luna factor, WTS and PLI each had an interest in the net profits of the business, but PLI was somewhat shielded from operating losses during the operation of the Rome property. The Commissioner asserts-and we agree-that the entitlement to a share of net profits is generally indicative of an equity interest in the enterprise generating those profits. See *Estate of Mixon*, 464 F.2d at 405; see also *Stevens Bros. & Miller-Hutchinson Co. v. Commissioner*, 24 T.C. 953, 956-57 (1955) (finding advance of capital from one corporation to another in exchange for a one-half share of the profits of the project was a bonafide agreement resulting in half the profits' being taxed as income to each corporation).

However, PLI did not have an obligation to share pro rata in the operating losses from the Rome property. With respect to overall loss on a final disposition of the Rome property, the Commissioner correctly observes that the operation of the Rome property was capitalized almost exclusively with debt and that the assets of WTS that were not pledged as collateral on the loan to PLI were of minimal value; and he plausibly argues that PLI was exposed to a risk of loss. If the Rome property were to decline in value, then PLI would risk losing, to the extent of that decline, the proceeds it had advanced. "Thin capitalization" of an entity is generally a factor favoring a finding that the advance that funds the venture should be viewed as an equity interest (subject to downside risk). See *Estate of Mixon*, 464 F.2d at 408 (observing that "thin capitalization is very strong evidence of a capital contribution where (1) the debt-to-equity ratio was initially high, (2) the parties realized the likelihood that it would go higher, and (3) substantial portions of these funds were used for the purchase of capital assets and for meeting expenses needed to commence operations"). But while it is true that the operation of the Rome property was capitalized almost exclusively with debt, we cannot view this factor in a vacuum. The parties stipulated that the loan from PLI to WTS was genuine indebtedness, and we do not disregard that stipulation to consider whether inadequate capitalization might be a sign of equity rather than debt.

Setting aside the Commissioner's contention with respect to the Rome property's thin capitalization, this factor weighs against finding a joint venture between WTS and PLI, because PLI did not have an obligation to share pro rata in the operating losses from the Rome property. See *WB Acquisition, Inc. & Sub.*, 101 T.C.M. (CCH) at 1167.

5. Whether business was conducted in the joint names of the parties

The Commissioner concedes that business was conducted in the name of WTS, not PLI or any other entity; and we find that this factor weighs against finding a joint venture.

6. Whether the parties filed federal partnership returns or otherwise represented to the Commissioner or to persons with whom they dealt that they were joint venturers

The Commissioner concedes that the parties did not file tax returns indicating that they were partners, and that WTS and PLI did not otherwise represent to the IRS or any other persons that they were engaged in a joint venture. Rather, WTS and PLI held themselves out as distinct entities whose relationship was solely that of borrower and lender. This factor weighs against finding that WTS and PLI engaged in a joint venture.

7. Whether separate books of account were maintained for the venture

No books of account were maintained for the Rome property other than by WTS. The Commissioner argues that “the parties agreed to the manner in which the books and records of their joint activity would be kept”, but this was solely for purposes of calculating the payments due under the interest agreement. WTS and PLI did not jointly maintain books of account that would normally be expected in the operation of a business. See *WB Acquisition, Inc. & Sub.*, 101 T.C.M. (CCH) at 1167. This factor weighs against finding a joint venture.

8. Whether the parties exercised mutual control over and assumed mutual responsibilities for the enterprise

While it is clear that PLI exercised control over the capital that it lent to WTS, most of the terms set forth in the security agreement and elsewhere are standard terms present in an arm’s-length secured commercial loan, which is consistent with the undisputed evidence that PLI used the same agreements (other than the Additional Interest Agreement) for its conventional loans. WTS exercised primary responsibility and control over the rental operations of the Rome property; and the only involvement PLI had with respect to those operations was its pre-approval of Spectrum Cauble to serve as the commercial property manager. In light of Mr. Barry’s involvement with Spectrum Cauble, this pre-approval looks much *more* like the product of an arm’s-length negotiation rather than PLI’s exerting responsibility or control over operations. We conclude that this factor weighs against finding that PLI held an equity interest in a joint venture with WTS. See *Luna*, 42 T.C. at 1078-79; see also *Estate of Mixon*, 464 F.2d at 406.

Seven of the eight *Luna* factors weigh against a finding of a joint venture, while one *Luna* factor weighs in favor. We find particularly significant the absence of any contribution by PLI to the purported joint venture, where the parties have stipulated that all of the funds it advanced to WTS were genuine indebtedness. Under the holding of *Culbertson*, 337 U.S. at 740, to the extent a partner must contribute “one or both of the ingredients of income-capital or services”, we find no basis to conclude that PLI made a contribution to an organization with WTS for the production of income. Viewing the transaction as a

> whole, and in light of our findings on all of the *Luna* factors, with no one factor being conclusive, we hold that there was no joint venture between WTS and PLI.

The court then rejected the IRS' argument that the appreciation payment was some sort of Code § 707(c) guaranteed payment, which argument was absurd in light of the lender not being a partner. Finally, the court rejected the IRS' attempt to disallow a deduction for the appreciation interest, reasoning and concluding:

> Section 163(a) provides the "general rule" that "[t]here shall be allowed as a deduction all interest paid or accrued within the taxable year on indebtedness". This general rule is subject to a number of limitations imposed by the remaining paragraphs of section 163, including a general prohibition against deductions for "personal interest", see § 163(h), but neither party contends that any of these limitations apply here. Rather, the Commissioner contends that the appreciation interest payment was not interest, as petitioners have asserted.
>
> The Supreme Court has defined "interest on indebtedness" as "compensation for the use or forbearance of money". *Deputy v. du Pont*, 308 U.S. 488, 498 (1940); see also *Old Colony R.R. Co. v. Commissioner*, 284 U.S. 552, 560 (1932) ("the usual import of the term [i.e., ''interest"] is the amount which one has contracted to pay for the use of borrowed money"). We therefore must decide whether, in light of the other holdings in this Opinion, WTS's payment of the appreciation interest to PLI was compensation for the use of the funds that PLI advanced to WTS.
>
> Petitioners cite a number of precedents in support of their argument that the appreciation interest was "interest" within the meaning of section 163. In the case of *Kena, Inc. v. Commissioner*, 44 B.T.A. 217, 218 (1941), the Board of Tax Appeals (predecessor to the Tax Court) held that a payment of "money in lieu of interest" calculated as 80% of the net profits of the borrowing corporation for the duration of the loan, was in fact interest. So holding, it stated that "[i]t is not essential that interest be computed at a stated rate, but only that a sum definitely ascertainable shall be paid for the use of borrowed money, pursuant to the agreement of the lender and borrower." *Id*. at 221. Since that decision, the IRS has issued guidance concluding that sums calculated at other than a fixed rate may also constitute interest, including such sums calculated in addition to a fixed rate of interest. See Rev. Rul. 83-51, 1983-1 C.B. 48, 48-49 (concluding that home mortgage interest composed of 12% fixed interest plus 40% of the appreciation of the home during the period of the loan was "interest" under section 163); Rev. Rul. 76-413, 1976-2 C.B. 213, 213-14 (concluding that a real estate loan that charged fixed interest at 11% plus contingent interest calculated as "the greater of 1.75 percent of the gross receipts or $300 per acre from the sale of portions of the property" qualified as mortgage interest).
>
> The parties have stipulated that the full amount of the funds advanced by PLI was advanced pursuant to documents that "constituted genuine indebtedness", and we have concluded above that WTS and PLI were not engaged in a joint venture or another arrangement that could give rise to an equity interest entitling PLI to any portion of the payments at issue. Rather, WTS was obligated to pay the additional interest because WTS entered into the loan transaction structured by a series of interdependent contracts governing the terms of its indebtedness to PLI. We therefore conclude that WTS paid the appreciation interest as compensation to PLI for the use of the funds advanced, and that the appreciation interest was "interest" within the meaning of section 163.

Conclusion

> WTS's payment to PLI of the appreciation interest was a deductible payment of interest and not a payment in respect of equity.

Does this case upholding the deductibility of appreciation interest mean that this tool is a good way to structure such a financial arrangement? Consider:

- Business interest expense might not be fully deductible. See part II.G.20.a Code § 163(j) Limitation on Deducting Business Interest Expense.

- In a taxable intrafamily loan, note that interest received is ordinary income, but a large interest deduction based on a capital gain event may have the practical effect of offsetting capital gain.

- If a partnership interest is used instead of a capital appreciation loan, note the issues the IRS was trying to raise in *Deitch* regarding Code § 707© guaranteed payments. See also parts II.C.8.a Code § 707 - Compensating a Partner for Services Performed, II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A, II.H.11.c Payment of Preferred Return, II.I.2 Regulatory Framework, II.I.8.d Partnership Structuring in Light of the 3.8% Tax on Net Investment Income, II.L.2.a.i General Rules for Income Subject to Self-Employment Tax, II.L.4 Self-Employment Tax Exclusion for Limited Partners' Distributive Shares, III.B.7.b.i Code § 2701 Definitions, and III.B.7.c.i.(b) CCA 201442053 Discusses Profits Interest in a Partnership That Was a Straight-Up Partnership before the Transfer.

- I have not analyzed whether one might need to consider parts III.B.7.b Code § 2701 Overview and III.B.7.c Code § 2701 Interaction with Income Tax Planning.

Banoff, Lipton, and Cohen, "Is *Deitch* the Tax Court's Most Interesting 21 Century Partnership Case?" *Journal of Taxation* (.Oct 2023), discusses hot issues in *Deitch*:

> (1) whether a loan with distinct cash-based profit sharing components will be treated for tax purposes as a unitary loan, a unitary partnership interest, or a bifurcated (part loan, part equity) instrument; (2) if bifurcation were appropriate, how a court might bifurcate the debt; (3) how large can a lender's contingent interest (the so-called "equity kicker") be, while still respecting the lender's status as a creditor rather than a partner for tax purposes; (4) what constitutes a guaranteed payment to a partner under Section 707(c) , and (5) will the IRS in litigation follow its Chief Counsel's position in a decades-old general counsel memorandum (GCM), absent any subsequent IRS or Treasury pronouncements on point. To date, the scope and potential impact of Deitch has not attracted widespread attention, but the opinion bears careful reading and analysis.

Discussing "Is the loan to the partnership a debt, an equity interest, or part debt, part equity for tax purposes?," the authors comment:

> If the borrower partnership and the lender (or the partnership's partners and the lender) are treated as tax partners, bad things could happen. There would be an allocation of a (possibly major) share of taxable income or loss to the putative lender (rather than interest expense) and, for the partnership borrower, an inability of its non-lender partners to include any part of the "loan" in the basis of their partnership interests. The granting of

the equity kicker may raise difficult questions under the original issue discount (OID) rules.[3] The payment of the equity kicker would not be deductible under Section 163.

[3] See, e.g., Banoff, "Tax Aspects of Real Estate Refinancing and Debt Restructuring: The Best and Worst of Times," 64 Taxes 926, 953 (Dec. 1986).

There are very few cases or rulings in which a loan to a partnership was tested for whether it was equity in substance. It is not clear that the same factors have been applied and given the same weights as in the corporate context.[4] In *Farley Realty*,[5] the lender received fixed interest on a loan plus the right to 50% of the appreciation in certain property (including appreciation both before and after the maturity of the loan principal). The Second Circuit Court of Appeals held the instrument to be part debt and part equity interest in the property. The Farley court apparently viewed the bifurcated equity interest as an equity interest in the borrower corporation.[6] However, it left uncertain whether the lender had an additional status as a shareholder in the borrower.

Your editors are unaware of any authorities that cited Farley for the proposition that a supposed debt instrument issued by a partnership can be bifurcated into debt and equity components.[7] Would *Deitch* be the first?

[4] See, e.g., Hambuechen, 43 TC 90 (1964). Compare Garlock, *Federal Income Taxation of Debt Instruments*, Para. 104.01[A] (VitalLaw, last viewed 8/11/23) with Schneider, "Is Debt vs. Equity Different in a Partnership?," 92 Taxes 111 (March 2015).

[5] *Farley Realty Corp. v. Commissioner*, 279 F.2d 701 (CA-2, 1960), *aff'g* TC Memo 1959-93.

[6] Garlock, note 4 supra, at para. 203.6.7.

[7] Accord: Rubinger, "Foreign Investors in U.S. Real Estate Should Consider Shared Appreciation Mortgages," 104 JTAX 235, 242 (October 2005).

In *Deitch*, the IRS chose not to follow *Farley*. Consistent with its position in GCM 36702[8] that a loan arrangement could not be bifurcated into an equity interest and a separate debt instrument, the IRS conceded in *Deitch* that PLI's advance to WTS was not part equity, part debt. As a result, the Service was forced to argue that the entire arrangement (relating to PLI's funding) constituted equity. The Tax Court, being constrained by the IRS's stipulations (concession), rejected the existence of a WTS-PLI venture and PLI having a direct equity interest in WTS. The Tax Court concluded that the loan and its interest components were (solely) debt, rather than equity, for tax purposes.

[8] GCM 36702 (Apr. 12, 1976).

Deitch is significant because the IRS there reiterated its long-standing position that a loan to a business entity (be it a corporation, as in *Farley*, or a partnership, as in GCM 36702 and *Deitch*) should not be bifurcated into part equity, part debt. Non-bifurcation, in your editors' experience, is the better position and is the one taken by taxpayers and their partnership advisors and return preparers when equity kickers are present.

Discussing “If bifurcation were under consideration, would there be an administrable, ‘correct’ approach that would be uniformly applicable?,” the authors comment:

> Bifurcation has long been rejected by the Commissioner in large part due to the administrative complexities it would create. Judge Gustafson’s dictum in Deitch reflects a bifurcation methodology that differs from that identified by the IRS in GCM 36702 . There are several other approaches that can be envisioned. Deitch provides further evidence that with no single, “correct” method of computing the bifurcation of loans to partnerships, it is administratively infeasible to put the burden on partnerships and their return preparers (both being subject to potential penalties under Sections 6662 and 6694, respectively) to speculatively attempt to compute the respective amounts attributable to a part debt, part equity bifurcation of the partnership loan. In other words, Deitch further supports the widely-held view that bifurcation of a single instrument into debt and equity components is inappropriate.

Discussing “How large can a lender’s equity kicker be, while still respecting the lender’s status as a creditor, rather than a partner, for tax purposes?” the authors comment:

> If a purported equity kicker is not treated as additional interest but, instead, is deemed to cause part or all of the debt to be treated as an equity contribution for tax purposes, the result would be that the lender and borrower would be treated as partners, thereby creating “tax pandemonium.”11
>
> The IRS and courts have provided scant guidance under the 1954 Code 12 as to the line of demarcation between bona fide contingent interest on a loan (deductible by the payor partnership, and reportable as interest income by the recipient lender) and characterization as a return on (guaranteed payment for the use of) capital. In Farley, the lender received fixed interest on a loan plus the right to 50% of the appreciation in certain property (including appreciation before and after the maturity of the principal). In Rev. Rul. 83-51, 1983-1 CB 48 , the IRS ruled a borrower could deduct under Section 163 interest payments made to a mortgage lender equal to 40% of the appreciation in value of a personal residence made under a shared appreciation mortgage (SAM). The IRS has long stated it will not issue advance rulings on the tax consequences of SAM loans where (as in Deitch) “the loan proceeds are used for commercial or business activities, or to finance a personal residence, if the facts are not similar to those described in Rev. Rul. 83-51 .” 13 The IRS has recognized that “the method of computation does not control a payment’s characterization as interest, so long as the amount in question is an ascertainable sum contracted for the use of money.” 14 Nonetheless, it seems quite likely that a court would strictly scrutinize a large loan as being disguised equity if the contingent interest were equal to say, 99% or even 95% of the partnership’s profits, or of net cash flow and net proceeds (after payment of regular interest on the loan). But what percentage of an equity kicker provides tax advisors with a level of comfort that the loan will not be recharacterized in whole or part as a partnership (equity) interest? 80%? 50%? 40%?
>
> The Tax Court held in Deitch that the Additional Interest payable to PLI is interest for federal income tax purposes. The Additional Interest was not classified for tax purposes as a return on PLI’s deemed capital contribution. It follows that Deitch illustrates a loan

can have an equity kicker of 50% of the partnership's net cash flow and 50% of the net sale and financing proceeds, while still characterized as debt for tax purposes.

Deitch may be the first tax case under the 1954 Code to recognize that such a significant equity kicker need not cause a loan to be characterized as an equity investment.

II.G.20.c. Changing from LIBOR or Other Interbank Offered Rates

T.D. 9961 (1/4/2022), "Guidance on the Transition From Interbank Offered Rates to Other Reference Rates," is generally effective March 7, 2022. Selected excerpts follow:

SUMMARY:

This document contains final regulations that provide guidance on the tax consequences of the transition away from the use of certain interbank offered rates in debt instruments, derivative contracts, and other contracts. The final regulations are necessary to address the possibility that a modification of the terms of a contract to replace such an interbank offered rate with a new reference rate could result in the realization of income, deduction, gain, or loss for Federal income tax purposes or could have other tax consequences. The final regulations will affect parties to contracts that reference certain interbank offered rates…

SUPPLEMENTARY INFORMATION:

Background

This document contains amendments to the Income Tax Regulations (26 CFR part 1) under sections 860A, 860G, 1001, 1271, 1275, and 7701(l) of the Internal Revenue Code (Code) and to the Procedure and Administration Regulations (26 CFR part 301) under section 7701 of the Code.

1. Discontinuation of LIBOR and Tax Implications

On July 27, 2017, the Financial Conduct Authority, the United Kingdom regulator tasked with overseeing the London Interbank Offered Rate (LIBOR), announced that publication of all currency and term variants of LIBOR, including U.S.-dollar LIBOR (USD LIBOR), may cease after the end of 2021. The administrator of LIBOR, the ICE Benchmark Administration, announced on March 5, 2021, that publication of overnight, one-month, three-month, six-month, and 12-month USD LIBOR will cease immediately following the LIBOR publication on June 30, 2023, and that publication of all other currency and tenor variants of LIBOR will cease immediately following the LIBOR publication on December 31, 2021.

On September 29, 2021, the Financial Conduct Authority announced that it will compel the ICE Benchmark Administration to continue to publish one-month, three-month, and six-month sterling LIBOR and Japanese yen LIBOR after December 31, 2021, using a "synthetic" methodology that is not based on panel bank contributions (synthetic GBP

LIBORs and synthetic JPY LIBORs, respectively). The Financial Conduct Authority has indicated that it may also require the ICE Benchmark Administration to publish one-month, three-month, and six-month USD LIBOR after June 30, 2023, using a similar synthetic methodology (synthetic USD LIBORs). However, these synthetic GBP LIBORs, synthetic JPY LIBORs, and synthetic USD LIBORs are expected to be published for a limited period of time.

Various tax issues may arise when taxpayers modify contracts in anticipation of the discontinuation of LIBOR or another interbank offered rate (IBOR). For example, such a modification may be treated as an exchange of property for other property differing materially in kind or extent for purposes of § 1.1001-1(a), giving rise to gain or loss. Such a modification may also have consequences under the rules for integrated transactions and hedging transactions, withholding under chapter 4 of the Code, fast-pay stock, investment trusts, original issue discount, and real estate mortgage investment conduits (REMICs). To minimize potential market disruption and to facilitate an orderly transition in connection with the discontinuation of LIBOR and other IBORs, the Treasury Department and the IRS published proposed regulations (REG-118784-18) in the Federal Register (84 FR 54068) on October 9, 2019 (Proposed Regulations). The Proposed Regulations generally provide that modifying a debt instrument, derivative, or other contract in anticipation of an elimination of an IBOR is not treated as an exchange of property for other property differing materially in kind or extent for purposes of § 1.1001-1(a). The Proposed Regulations also adjust other tax rules to minimize the collateral consequences of the transition away from IBORs.

2. Rev. Proc. 2020-44

The Alternative Reference Rates Committee (ARRC), whose ex officio members include the Treasury Department, was convened by the Board of Governors of the Federal Reserve System and the Federal Reserve Bank of New York in 2014. To support the transition away from USD LIBOR, the ARRC has published recommended fallback language for inclusion in the terms of certain cash products, such as syndicated loans and securitizations. The ARRC has also been actively engaged in work led by the International Swaps and Derivatives Association (ISDA) to ensure that the contractual fallback provisions in derivative contracts are sufficiently robust to prevent serious market disruptions when LIBOR is discontinued or becomes unreliable. To that end, ISDA developed the ISDA 2020 IBOR Fallbacks Protocol by which the parties to certain derivative contracts can incorporate certain improved fallback provisions into the terms of those contracts.

On October 9, 2020, the Treasury Department and the IRS released Rev. Proc. 2020-44, 2020-45 I.R.B. 991, in advance of finalizing the Proposed Regulations to support the adoption of the ARRC's recommended fallback provisions and the ISDA 2020 IBOR Fallbacks Protocol. Rev. Proc. 2020-44 provides that a modification within the scope of the revenue procedure is not treated as an exchange of property for Start Printed Page 167 other property differing materially in kind or extent for purposes of § 1.1001-1(a). In addition, Rev. Proc. 2020-44 generally provides that a modification within the scope of the revenue procedure will not result in legging out of an integrated transaction or terminating either leg of a hedging transaction.

Within T.D. 9961, “Summary of Comments and Explanation of Revisions” includes:

> The Final Regulations also make use of defined terms, located in § 1.1001-6(h), to streamline references to concepts that are frequently used in the operative rules in § 1.1001-6(b) through (g). In particular, the defined term “covered modification” is the cornerstone of these rules and serves to restructure several of the fundamental rules set forth in the Proposed Regulations. For example, § 1.1001-6 of the Proposed Regulations generally provides certain beneficial tax consequences when the parties to a contract modify the contract to replace an IBOR-based rate with a “qualified rate” and make certain “associated modifications,” which may include a “one-time payment.” The Final Regulations unite these various elements of the Proposed Regulations (that is, modification of a contract, an IBOR-based rate, a qualified rate, associated modifications, and a one-time payment) in the single defined term “covered modification.” ….
>
> **1. Treatment Under Section 1001**
>
> Section 1.1001-6(a) of the Proposed Regulations generally provides rules for applying section 1001 to a contract that is modified to replace an IBOR-based rate or IBOR-based fallback provisions or to add or amend fallback provisions that would replace an IBOR-based rate. Section 1.1001-6(a) of the Proposed Regulations generally provides that such a modification is not treated as an exchange of property under section 1001 and extends this treatment to any reasonably necessary conforming modifications. When modifications that qualify for this special treatment under proposed § 1.1001-6(a) occur contemporaneously with modifications that do not qualify, the non-qualifying modifications are subject to the ordinary rules under § 1.1001-1(a) or § 1.1001-3 and the modifications that qualify for special treatment under proposed § 1.1001-6(a) are treated as part of the existing terms of the contract. Section 1.1001-6(b) of the Final Regulations provides similar rules but makes use of the defined terms “covered modification” and “noncovered modification.”

Within T.D. 9961, “BACKGROUND, NEED FOR THE FINAL REGULATIONS, AND ECONOMIC ANALYSIS OF FINAL REGULATIONS” explains:

> A very large volume of U.S. financial products and contracts include terms or conditions that reference LIBOR or, more generally, IBORs. Concern about manipulation and a decline in the volume of the funding from which LIBOR is calculated led to recommendations for the development of alternatives to LIBOR that would be based on transactions in a more robust underlying market. In addition, on July 27, 2017, the U.K. Financial Conduct Authority, the U.K. regulator tasked with overseeing LIBOR, announced that all currency and term variants of LIBOR, including USD LIBOR, may be phased out after 2021 and not be published after that timeframe. The administrator of LIBOR, the ICE Benchmark Administration, announced on March 5, 2021, that publication of overnight, one-month, three-month, six-month, and 12-month USD LIBOR will cease immediately following the LIBOR publication on June 30, 2023, and that publication of all other currency and tenor variants of LIBOR will cease immediately following the LIBOR publication on December 31, 2021.
>
> The ARRC, a group of stakeholders affected by the cessation of the publication of USD LIBOR, was convened to identify an alternative rate and to facilitate voluntary adoption of that alternative rate. The ARRC recommended SOFR as a potential replacement for

USD LIBOR. Essentially all financial products and contracts that currently contain conditions or legal provisions that rely on LIBOR and other IBORs are expected to transition to SOFR or similar alternatives in the next few years. This transition will involve changes in debt, derivatives, and other financial contracts to adopt SOFR or other alternative reference rates. The ARRC has estimated that the total exposure to USD LIBOR was close to $200 trillion in 2016, of which approximately 95 percent were in over-the-counter derivatives. ARRC further notes that USD LIBOR is also referenced in several trillion dollars of corporate loans, floating-rate mortgages, and similar financial products. In the absence of further tax guidance, the vast majority of expected changes in such contracts could lead to the recognition of gains (or losses) in these contracts for U.S. income tax purposes and to correspondingly potentially large tax liabilities for their holders. To address this issue, the final regulations provide that changes in debt instruments, derivative contracts, and other affected contracts to replace reference rates based on discontinued IBORs in a covered modification (both as defined in the final regulations) will not result in tax realization events under section 1001 and relevant regulations thereunder. For this purpose, a covered modification is generally the replacement of a discontinued IBOR with a qualified rate, provided that the replacement is not excluded under § 1.1001-6(j)(1) through (5) of these final regulations (the excluded modifications). The excluded modifications ensure that a covered modification includes only modifications to the cash flows of an IBOR-referencing contract intended to address the replacement of the IBOR-based rate in the contract and that modifications of contracts in a manner that is intended to change the amount or timing of contractual cash flows for other reasons or purposes remain subject to the general rules in section 1001 and the regulations thereunder. The final regulations also provide corresponding guidance on hedging transactions and derivatives to the effect that taxpayers may modify the components of hedged or integrated transactions to replace discontinued IBORs in a covered modification without affecting the tax treatment of the hedges or underlying transactions.

In the absence of these final regulations, parties to contracts affected by the cessation of the publication of LIBOR would either suffer tax consequences to the extent that a change to the contract results in a tax realization event under section 1001 or attempt to find alternative contracts that avoid such a tax realization event, which may be difficult as a commercial matter. Both such options would be both costly and highly disruptive to U.S. financial markets. A large number of contracts may end up being breached, which may lead to bankruptcies or other legal proceedings. The types of actions that contract holders might take in the absence of these final regulations are difficult to predict because such an event is outside recent experience in U.S. financial markets. This financial disruption would be particularly unproductive because the economic characteristics of the financial products and contracts under the new rates would be essentially unchanged. Thus, there is no underlying economic rationale for a tax realization event.

The Treasury Department and the IRS project that these final regulations would avoid this costly and unproductive disruption. The Treasury Department and the IRS further project that these final regulations, by implementing the regulatory provisions requested by ARRC and taxpayers, will help facilitate the economy’s adaptation to the cessation of LIBOR in a least-cost manner.

Changes that T.D. 9961 makes include adding Reg. § 1.1001.1-6, "Transition from certain interbank offered rates," and Reg. § 1.1275-2(m), "Transition from certain interbank offered rates."

The former is particularly relevant to part II.G.31.a Debt Modifications.

T.D. 9976, "Additional Guidance on the Transition From Interbank Offer Rates to Other Reference Rates With Respect to the Interest Rates of a Foreign Bank" (6/30/2023), summarizes its purpose:

> This document contains additional final regulations that provide guidance on the transition away from the use of interbank offer rates ("IBORs") to other reference rates. Specifically, this regulation provides the replacement rate for the IBOR presently used in the published rate election, which may be used by taxpayers to determine the amount of interest expense attributable to their excess U.S.-connected liabilities and allocable to income that is effectively connected with the conduct of a trade or business within the United States ("ECI"). The final regulations will affect foreign banks that have income that is ECI.

T.D. 9976 further explained in "Summary of Comments and Explanation of Revisions":

> **I. Appropriate Replacement Rate for 30-Day LIBOR**
>
> In response to the request for additional comments in TD 9961, one comment was received relating to the 30-day USD LIBOR replacement in § 1.882–5(d)(5)(ii)(B). The comment made three recommendations for the final regulations under § 1.882–5(d)(5)(ii)(B).
>
> **A. One-Month Term SOFR Plus a Static Spread Adjustment**
>
> First, the comment recommended finalizing the regulation using the one-month term SOFR plus static spread adjustment of 0.11448% as recommended by the ARRC (which endorsed Term SOFR rates in June of 2021 and spread adjustments in October of 2021) and codified in the LIBOR Act (enacted in December of 2021). The comment noted that the one-month term SOFR plus a fixed spread adjustment accounts for some of the differences between SOFR and LIBOR rates and implied that one-month term SOFR plus static spread adjustment of 0.11448% is a more appropriate replacement than yearly average SOFR. The published rate election provides eligible taxpayers with administrative relief from the burden of calculating their actual borrowing rate, which is based on data maintained outside the United States.
>
> The final regulations adopt this recommendation. The ARRC, whose ex officio members include the Treasury Department, has generally recommended that contracts referencing USD LIBOR adopt fallback provisions that reference the term SOFR of the same tenor, plus a static spread adjustment. The Treasury Department has supported the recommendations of the ARRC in prior guidance issued in Revenue Procedure 2020–44, 2020–45 I.R.B. 991 and the 2022 Final Regulations. In addition, contracts governed by U.S. law that have not voluntarily adopted such fallback provisions are generally required by the LIBOR Act to use the SOFR of the same tenor, plus the ARRC-recommended static spread adjustment, as a matter of law. Public Law 117–103, div. U. Accordingly, both the Treasury Department and the U.S. Congress

have endorsed, or required, the use of a term SOFR of the same tenor, plus the ARRC-recommended static spread adjustment, as a replacement for term USD LIBORs. Because the published rate election available under § 1.882–5(d)(5)(ii)(B) references 30-day LIBOR, the one-month term SOFR (plus static spread adjustment) is the most appropriate replacement rate.

B. Alternative Method Approximating Actual Rate

The comment also recommended that the final regulations allow taxpayers to use a rate that reasonably approximates the bank's actual rate and that is consistently applied from year to year. This recommendation is based on the approach taken in regulations that were in effect from 1981 through 1996. TD 7749, 46 FR 1681 (Jan. 7, 1981) (codified at former § 1.882–5(b)(3)(i)(B)). This historical regulation provided that, if information needed to calculate the taxpayer's actual interest rate could not be reasonably obtained, then the taxpayer could determine its interest rate by applying any method that reasonably approximated its actual interest rate and that was consistently applied year over year, including, for example, approximating its interest rate by reference to 30-day LIBOR. *Id.* at 1684–85. The comment expressed concern that the one-month term SOFR plus static spread adjustment may be less than the actual cost of borrowing; however, for some taxpayers it may not be worthwhile or possible for the corporation to calculate its actual borrowing rate.

The final regulations do not adopt this recommendation. An approach based on a reasonable approximation of a taxpayer's actual interest would establish a different method for determining a taxpayer's borrowing rate that does not provide the certainty, accuracy, and simplicity of a published rate election. Additionally, the IRS would face significant challenges in administering such a rule. For example, the comment did not suggest any standard by which the IRS might determine whether a taxpayer's method is a reasonable approximation of its actual borrowing rate.

Finally, data from recent filing years indicates that the actual rate calculation is not a significant burden to taxpayers. For taxable years 2020 and 2021 (the most recent years for which data is available), a majority of foreign banks with excess U.S.-connected liabilities chose to calculate their actual rate rather than use the published rate election. In both years, approximately 80% of such taxpayers opted to calculate their actual rate, while less than 20% chose to use the published rate election available under § 1.882–5(d)(5)(ii)(B).

C. Mechanism for Endorsing Additional Replacement Rates

Finally, the comment recommended that the final regulations include a mechanism for identifying additional qualified alternative reference rates via Internal Revenue Bulletin, Revenue Procedure, or another similar notice. The final regulations do not adopt this recommendation. The Treasury Department and the IRS do not anticipate a need to name additional alternative reference rates, and, if the need does arise in the future, the Treasury Department and the IRS may prefer to propose any new alternative reference rate through the regulatory process.

II. Application of the Published Rate Election by the IRS in an Examination

If a taxpayer failed to file a timely return or incorrectly determined that it did not have excess U.S.-connected liabilities, § 1.882–5(d)(5)(ii)(B) allowed the Director of Field Operations to calculate the taxpayer's interest expense with respect to excess U.S.-connected liabilities using either the taxpayer's actual rate or the published rate provided by § 1.882–5(d)(5)(ii)(B). The final regulations amend this rule to require the Director of Field Operations to use the published rate in order to reduce the administrative burden of calculating the actual rate for both the IRS and taxpayers.

III. Transitional Rule for Taxable Years Including the Date of LIBOR Cessation

For a taxable year that begins before and ends after the USD LIBOR cessation date of June 30, 2023, a taxpayer that makes the published rate election available under § 1.882–5(d)(5)(ii)(B) must calculate a blended published rate average for the taxable year which uses the 30-day USD LIBOR for the portion of its taxable year ending on June 30, 2023, and the one-month Term SOFR, plus static spread adjustment, for the portion of its taxable year beginning on July 1, 2023.

IV. Applicability Date

These final regulations apply to taxable years ending after June 30, 2023.

II.G.21. Employee Stock Ownership Plans (ESOPs) and Other Code § 401(a) Qualified Retirement Plans Investing in Businesses

Although qualified retirement plans can invest in the employer's business (with incentives to use ESOPs), the IRS has long been wary of doing so for a start-up business.[1860] Part II.G.22 IRA as Business Owner describes special issues that apply to IRAs.

Any qualified retirement plan that holds an interest in a partnership will be required to pay unrelated business income tax on its distributive share of any business income, debt-financed income, or other unrelated business income.[1861]

Any qualified retirement plan that holds an interest in an S corporation will be required to pay unrelated business income tax on its distributive share of <u>all</u> of the S corporation's income,[1862] unless the qualified retirement plan is an Employee Stock Ownership Plan (ESOP).[1863] An ESOP is a plan that invests primarily in qualifying employer securities.[1864] "Employer securities" means "common stock issued by the employer."[1865] An entity that is a partnership for tax purposes does not have "stock" and therefore does not have "qualifying employer securities;" therefore, it fails to operate as an ESOP.[1866] Thus, if the goal is to have the business owned by

---

[1860] The IRS calls the latter, "Rollovers as Business Start-Ups." See Compliance Project (irs.gov).
[1861] Code §§ 511(a)(2)(A) (referring to Code § 401(a), which describes qualified retirement plans), 512. See part II.Q.7.c.i.(b) Business Income Limiting Trust Income Tax Deduction.
[1862] Code §§ 511(a)(2)(A) (referring to Code § 401(a), which describes qualified retirement plans), 512(e)(1).
[1863] Code § 512(e)(3).
[1864] Code § 4975(e)(7)(A).
[1865] Code § 409(*l*).
[1866] *K.H. Company, LLC v. Commissioner*, T.C. Memo. 2014-31.

an ESOP, then an S corporation would be ideal. See also part II.A.2.i.viii Special Price Protection for Leveraged ESOP Approved.

To avoid all of the complexity above, a qualified plan might own its business through a C corporation. Even if it can get past various ERISA hurdles, consider that a C corporation does not have favorable capital gain tax rates, which means that the sale of its business assets (including goodwill) can be much more expensive than if a partnership or S corporation sold its assets. Also, various tools used to make C corporation business sales less tax-inefficient[1867] might be unavailable or might face ERISA regulatory hurdles. Furthermore, the C corporation stock does not receive a basis step-up at death; and, whenever the C corporation sale proceeds are distributed, they are distributed as ordinary income.

Any accrued compensation payable to an employee who participates in the ESOP is not deductible until paid.[1868] If the ESOP owns 100% of an S corporation, presumably it would not pay tax and therefore this rule would not be a concern.

Many other ESOP rules are beyond the scope of my materials.

II.G.22. IRA as Business Owner

An IRA would be subject to unrelated business income tax and other tax advantages and disadvantages, as described in part II.G.21 Employee Stock Ownership Plans (ESOPs) and Other Code § 401(a) Qualified Retirement Plans Investing in Businesses.

The IRS attacks the mechanics of the rollover, and taxpayers should do their best to roll over successfully. *McGaugh v. Commissioner*, T.C. Memo. 2016-28, *aff'd* 119 A.F.T.R.2d 2017-2359 (7th Cir. 6/26/2017), finding in favor of the taxpayer, reviewed prior cases for and against taxpayers and discussed how to make the rollover work:

> If we analyze the situation for possible "constructive receipt" of the funds from Merrill Lynch by Mr. McGaugh (and constructive transfer of the funds by him to FPFC), the outcome still does not change. "It is well established that the mere receipt and possession of money does not by itself constitute gross income." *Liddy v. Commissioner*, T.C. Memo. 1985-107, *aff'd*, 808 F.2d 312 (4th Cir. 1986). "We accept as sound law the rule that a taxpayer need not treat as income moneys which he did not receive under a claim of right, which were not his to keep, and which he was required to transmit to someone else as a mere conduit." *Diamond v. Commissioner*, 56 T.C. 530, 541 (1971), *aff'd*, 492 F.2d 286 (7th Cir. 1974).
>
> Thus, money received as a mere agent or conduit is not includible in gross income. *Liddy v. Commissioner*, 808 F.2d at 314; *Diamond v. Commissioner*, 56 T.C. at 541. We have held that this principle may apply in the case of a taxpayer and an IRA, see *Ancira v. Commissioner*, 119 T.C. 135, 138 (2002); and the IRS so acknowledges.[5] The question at issue here is whether, in the wire transfer and subsequent stock purchase,

---

[1867] See parts II.Q.1.b Leasing, II.Q.1.c Personal Goodwill and Covenants Not to Compete, and II.Q.1.d Nonqualified Deferred Compensation.

[1868] *Petersen v. Commissioner*, 148 T.C. 463 (2017), *aff'd* 123 A.F.T.R.2d 2019-XXXX (10th Cir. 5/15/2019), holding that participants were beneficiaries of a trust under Code § 267(c) and therefore deduction deferral under Code § 267(a)(2) applied.

Mr. McGaugh acted as a conduit to or an agent of the IRA fiduciary and custodian, Merrill Lynch.

[5] As the Commissioner states in his supplemental opposition (at 7-8) to the motion for summary judgment, "if Merrill Lynch, as custodian of petitioner's IRA, purchased the shares with funds from petitioner's IRA, either through petitioner as an agent/conduit or otherwise, then there may not have been a distribution. See *Ancira v. Commissioner*, 119 T.C. 135, 137-40 (2002) (the withdrawal of funds from an IRA did not give rise to a distribution, where the withdrawal was in the form of a check that could not be negotiated by the account owner, and the funds were used by the IRA custodian to acquire stock)."

Neither the Code nor the applicable regulations provide specific guidance on whether or when an amount is considered to have been "paid or distributed out of an individual retirement plan" through the use of the beneficiary as a conduit from the custodian to the investment. This Court has, however, addressed a case involving facts similar to Mr. McGaugh's: In *Ancira v. Commissioner*, 119 T.C. at 136, the taxpayer maintained a self-directed IRA, and during the year at issue he requested that his IRA custodian purchase a particular company's stock for his IRA. While the issuing company's stock was a permissible asset that could be held by the IRA, company policy of the custodian of the account did not permit it to directly purchase stock that was not publicly traded. *Id.* The taxpayer therefore requested a check made payable to the non-public issuing company, and the custodian sent the taxpayer the requested check. *Id.* The taxpayer forwarded the check to the issuing company, and the issuing company issued the stock certificate. *Id.* at 136-137. The certificate stated that the taxpayer's IRA was the owner of the shares of the stock, and the taxpayer presumed that the issuing company had sent the stock certificate to the IRA custodian as instructed. *Id.* At 137. However, for unspecified reasons the certificate was not delivered to the custodian, and the taxpayer did not discover the mistake until after receiving a notice of deficiency from the IRS. *Id.* After learning of the error, the taxpayer directed the issuing company to send the stock certificate to him, and he then delivered it directly to the custodian. *Id.*

In *Ancira* we held that no distribution from the IRA to the taxpayer occurred when the custodian delivered the check to him. *Id.* at 139. We observed that no distribution would have occurred if the custodian had either purchased stock directly from the issuing company or sent a check to a broker who then purchased the stock for the IRA. *Id.* At 137-138. We held that the taxpayer acted as an agent or conduit for the custodian because the taxpayer arranged the purchase but was not in constructive receipt of the check and the ownership of the stock was directly assumed by the IRA. *Id.* at 138. Moreover, we determined that the delay of the delivery of the stock certificate to the custodian was a bookkeeping error, which "did not alter the ownership of the stock by the IRA and certainly did not transfer the ownership to *** [the taxpayer]." *Id.* at 140.

Like the taxpayer in *Ancira*, Mr. McGaugh wished to acquire for his IRA stock that apparently could not be purchased directly by the custodian, Merrill Lynch. Mr. McGaugh therefore arranged the purchase of FPFC stock, instructed Merrill Lynch to make the wire transfer to FPFC, and instructed FPFC to deliver the certificate directly to Merrill Lynch. Moreover, unlike the taxpayer in *Ancira*, who received a check from the IRA and delivered it to the issuing company, Mr. McGaugh never personally handled any check by which the IRA funds were transmitted to FPFC. Instead, he requested that Merrill Lynch transfer the funds via wire transfer directly to the issuing company, and that transfer was duly made without Mr. McGaugh's interposition. And unlike the stock in *Ancira*, the FPFC stock certificate was sent directly to the custodian.

The Commissioner emphasizes that "[i]t appears that petitioner is in possession of the purported stock certificate." Even if Mr. McGaugh had physical possession of the stock certificate, he was not in constructive receipt of the asset. The "essence [of constructive receipt] is that funds which are subject to a taxpayer's unfettered command and which he is free to enjoy at his option are constructively received by him whether he sees fit to enjoy them or not." *Ancira v. Commissioner*, 119 T.C. at 138 (quoting *Estate of Brooks v. Commissioner*, 50 T.C. 585, 592 (1968)). Here, the stock was issued not in Mr. McGaugh's name but in the name "Raymond McGaugh IRA FBO Raymond McGaugh". Even with physical possession of the stock certificate, Mr. McGaugh could not have realized any practical utility or benefit from the certificate in the name of the IRA. (And if Merrill Lynch's attempts to mail the IRA's stock certificates to Mr. McGaugh in "early 2012" (contrary to his instructions and intention) gave him ownership of the shares, then that was a distinct 2012 transaction that would not affect his 2011 income tax liability.)

We are not persuaded by the Commissioner's argument that Mr. McGaugh's circumstances are similar to that of the taxpayer in *Dabney v. Commissioner*, T.C. Memo. 2014-108. In *Dabney* this Court found a taxable distribution from the taxpayer's IRA when the taxpayer explicitly requested an IRA distribution (to himself) with the goal of purchasing land for his IRA but failed to return the distribution (or any other property) to the account within the 60-day rollover period of section 408(d)(3). *Id.* at *5. The policies of the custodian, Charles Schwab, did not permit real property to be an asset of its IRAs, *id.* at *4, *11, so in March 2009 Mr. Dabney requested a distribution of his IRA funds and a transfer of those funds to the title company handling the property sale. Contrary to Schwab's policies, Mr. Dabney directed the company to issue title in the name of the IRA, but it failed to do so and put the property in his name. He tried to sell the property and finally succeeded in January 2011 and wired the proceeds to Schwab as a purported "rollover contribution". We held that the transfer of the funds from the IRA to Mr. Dabney constituted a taxable distribution.

Here, by contrast, Merrill Lynch previously permitted FPFC stock as an asset to be held in Mr. McGaugh's IRA, and its subsequent correspondence seems to indicate that if the stock at issue had been received within the 60-day period, it would have been accepted. And here the stock certificate bears the name of the IRA as its owner; and it is therefore not like the real property in *Dabney* that, for more than a year, was titled in the name of the individual taxpayer. Mr. Dabney requested a distribution in order to conduct a real estate transaction not permitted by the IRA, whereas Mr. McGaugh directed the IRA to make a permissible investment. This case is not like *Dabney*.

Rather, this case resembles *Ancira*. We hold that Mr. McGaugh did not receive a distribution when Merrill Lynch made the wire transfer to FPFC; and to the extent that he had control over the wired funds, he at most acted as a conduit for the IRA custodian. Consequently, the 60-day limitation on a rollover under section 408(d)(3) does not really come into play in this case. The timing of the mailing of the shares (i.e., more than 60 days after the wire transfer) does not alter our conclusion that there was no distribution from the IRA to Mr. McGaugh. We will therefore grant Mr. McGaugh's motion for summary judgment.

In *Vandenbosch v. Commissioner*, T.C. Memo. 2016-29, the taxpayer moved money from his IRA to a joint account, moved it from the joint account into his personal account, and wired it to a borrower, in exchange for a note from the borrower payable to the taxpayer (not to his IRA). Not surprisingly, the taxpayer's claim that he was a conduit for his IRA in the same manner as in *McGaugh* got him nowhere, although he was able to avoid penalties because he had discussed the situation with his CPA income tax return preparer.

The Summary of *Estate of Caan v. Commissioner*, 161 T.C. No. 6 (2023), described the case:

> Decedent (D) held two IRAs with UBS. Both IRAs were governed by a custodial agreement between D and UBS. One of the IRAs held a partnership interest (P&A Interest) in the P&A Fund, a hedge fund. The custodial agreement between D and UBS stated that it was D's responsibility to provide UBS with the P&A Interest's yearend fair market value (FMV) every year. When D did not satisfy this responsibility for tax year 2015, UBS notified D that it had distributed the P&A Interest to him pursuant to the relevant terms of the custodial agreement. P claims such a distribution did not occur.
>
> UBS issued Form 1099-R to D, reporting a distribution. UBS valued the P&A Interest at $1,910,903, which was its 2013 FMV and the last FMV known to UBS. (R admitted in his posttrial briefs that UBS misvalued the P&A Interest.) More than a year after the notification from UBS, D's financial advisor, acting on D's behalf, liquidated the P&A Interest and contributed the cash proceeds to D's IRA at ML, an investment manager.
>
> On his 2015 income tax return, D reported an IRA distribution but claimed that it was nontaxable as a rollover contribution under I.R.C. § 408(d)(3). R disagreed and issued a notice of deficiency, determining that there was a taxable distribution. D then requested that R issue a private letter ruling to waive the 60-day period for rollover contributions. See I.R.C. § 408(d)(3)(A)(i), (I). D also filed a Petition with this Court for redetermination of his 2015 income tax deficiency. See I.R.C. § 6213(a). During the pendency of this case, R declined to issue the private letter ruling, stating that the 60-day period could not be waived because D was required to contribute the P&A Interest (not cash) to ML in order for the distribution to be nontaxable as a rollover contribution. See I.R.C. § 408(d)(3)(A)(i); *Lemishow v. Commissioner*, 110 T.C. 110, 113 (1998), supplemented by 110 T.C. 346 (1998); Treas. Reg. § 1.408-4(b)(1).
>
> *Held*: The P&A Interest was distributed to D in tax year 2015 within the meaning of I.R.C. § 408(d)(1).
>
> *Held, further*, the P&A Interest was not contributed to ML in a manner that would qualify as a rollover contribution under I.R.C. § 408(d)(3).
>
> *Held, further*, under I.R.C. § 408(d)(1), D is taxable for 2015 on the P&A Interest's value at the time of the distribution.
>
> *Held, further*, the value of the P&A Interest at the time of the distribution was $1,548,010.
>
> *Held, further*, we have jurisdiction under I.R.C. § 6213(a) to review R's denial of D's I.R.C. § 408(d)(3)(I) request for a waiver of the 60-day period for rollover contributions.
>
> *Held, further*, we review a denial of a request for a waiver under I.R.C. § 408(d)(3)(I) for abuse of discretion.

> *Held, further*, R did not abuse his discretion in denying P a waiver under I.R.C. § 408(d)(3)(I).

The IRS tends to audit Roth IRA ownership of a business, requiring certain situations to be reported as "listed transactions" on special disclosure forms.[1869] The IRS unsuccessfully tried to expand its Roth IRA attacks when a father's business was discontinued and his son's Roth IRAs started a new corporation engaging in what the IRS viewed to be a continuation of the old business.[1870]

However, the Tax Court has held that an IRA that invests in a business engages in a prohibited transaction when the business compensates the IRA's owner (even when the compensation is modest).[1871] If the business does not compensate the IRA's owner, the IRA's owner might be deemed to have received compensation and then made a contribution to the IRA. Furthermore, when an IRA's owner guarantees the IRA'S corporation's seller-financed purchase of business assets from an unrelated third party, the guarantee is a prohibited transaction that disqualifies the IRA.[1872] Thus, activities very common for start-up businesses – the owner or the owner's family working in the business and the owner guaranteeing loans – are forbidden to businesses owned by IRAs.

[1869] Notice 2004-8. *Polowniak v. Commissioner*, T.C. Memo. 2016-31, imposed a 30% penalty under Code § 6662A for 2004 on the original amount reflected in the notice of deficiency. See also *Yari v. Commissioner*, 143 T.C. 157 (2014) *aff'd* in an unpublished opinion, 118 A.F.T.R.2d 2016-6096 (9th Cir. 2016) (penalty based on original return, not amended return).

[1870] See part II.Q.7.h.v Taxpayer Win in *Bross Trucking* When IRS Asserted Corporation Distribution of Goodwill to Shareholder Followed by Gift to Shareholder of New Corporation (2014), particularly fn. 5124.

[1871] *Ellis v. Commissioner*, T.C. Memo. 2013-245:

> In essence, Mr. Ellis formulated a plan in which he would use his retirement savings as startup capital for a used car business. Mr. Ellis would operate this business and use it as his primary source of income by paying himself compensation for his role in its day-to-day operation. Mr. Ellis effected this plan by establishing the used car business as an investment of his IRA, attempting to preserve the integrity of the IRA as a qualified retirement plan. However, this is precisely the kind of self-dealing that section 4975 was enacted to prevent. For the foregoing reasons, the Court sustains respondent's determination that Mr. Ellis engaged in prohibited transactions under section 4975(c)(1)(D) and (E) when he caused CST to pay him compensation of $9,754 in tax year 2005.

The court also upheld an accuracy-related penalty. The Eighth Circuit affirmed, 787 F.3d 1213 (2015), and also rebuffed the taxpayers' argument that Code § 4975(d)(10) excluded fees for their services from being a prohibited transaction, holding that the exclusion applies only to services for the IRA and not to services performed for businesses owned by the IRA. The formation of the LLC itself did not constitute a *per se* prohibited transaction, and the court declined to address the IRS' assertion that the initial intent to engage in prohibited transactions tainted the formation, because the payment of wages that was definitely a prohibited transaction occurred in the same taxable year as the LLC's formation.

See also *Repetto v. Commissioner*, T.C. Memo. 2012-168, in which the court recharacterized service payments made to purported service corporations that were owned by Roth IRAs, holding that the agreements were designed to permit, and did permit, the taxpayer to make excessive contributions to the Roth IRAs through the disguised service payments. *Polowniak v. Commissioner*, T.C. Memo. 2016-31, had a similar result.

[1872] *Thiessen v. Commissioner*, 146 T.C. No. 7 (2016) (6-year statute of limitations applied because the issue of prohibited transaction was not disclosed anywhere), following *Peek v. Commissioner*, 140 T.C. 216 (2013).

An IRA's purchase of real estate that would tend to benefit adjoining real estate owned by the IRA's owner was a prohibited transaction.[1873]

After two false starts,[1874] the IRS successfully attacked IRAs' formation of a DISC in Tax Court, before being rebuked by the Sixth Circuit. A DISC is a statutory scheme designed to give a tax break to exporters by allowing them to deduct commissions paid to companies (even shell companies).[1875] The Tax Court held that the IRS properly recharacterized commissions as dividends to the exporter's shareholders followed by excess contributions to their Roth IRAs when the taxpayers' "sole reason for entering into the transaction at issue was to transfer money into the … Roth IRAs so that income on assets could accumulate and be distributed tax free. Petitioners had no nontax business purpose for the transactions, nor did they receive any economic benefit from the transactions."[1876] However, the Sixth Circuit pointed out, "By congressional design, DISCs are all form and no substance, making it inappropriate to tag Summa Holdings with a substance-over-form complaint with respect to its use of DISCs," further explaining, "No court has used this power to override statutory provisions whose only function is

---

[1873] *Kellerman v. Rice*, 116 A.F.T.R.2d 2015-6133 (D. Ark. 2015), holding that this prohibited transaction disqualified the IRA and caused the IRA's assets to be subject to the IRA's owner's bankruptcy creditors.
[1874] *Swanson v. Commissioner*, 106 T.C. 76 (1996) (formation of DISC by traditional IRA was not a prohibited transaction; taxpayer awarded legal fees because IRS' position wasn't substantially justified); *Hellweg v. Commissioner*, T.C. Memo. 2011-58 (IRS could not challenge the substance of the transaction for income tax purposes in the absence of fraud or an illegal purpose behind the DISC transaction).
[1875] *Summa Holdings, Inc. v. Commissioner*, T.C. Memo. 2015-119, explained:

> A DISC provides a mechanism for deferral of a portion of the Federal income tax on income from exports. The DISC itself is not taxed, but instead the DISC's shareholders are currently taxed on a portion of the DISC's earnings in the form of a deemed distribution. Secs. 991, 995(b)(1). This allows for deferral of taxation on the remainder of the DISC's earnings until those earnings are actually distributed, the shareholders dispose of their DISC stock in a taxable transaction, or the corporation ceases to qualify as a DISC, Secs. 995(b)(2), 996(a)(1).
>
> A DISC sometimes does not generate the income it reports on its returns and might otherwise not be recognized as a corporate entity for tax purposes if it were not a DISC. *Addison Int'l, Inc. v. Commissioner*, 90 T.C. 1207 (1988), *aff'd*, 887 F.2d 660 (6th Cir. 1989); *Jet Research, Inc. v. Commissioner*, T.C. Memo. 1990-463; see also sec. 1.992-1(a), Income Tax Regs. "The DISC may be no more than a shell corporation, which performs no functions other than to receive commissions on foreign sales made by its parent." *Thomas Int'l Ltd. v. United States*, 773 F.2d 300, 301 (Fed. Cir. 1985); *Foley Mach. Co. v. Commissioner*, 91 T.C. 434, 438 (1988); see also *Jet Research, Inc. v. Commissioner*, T.C. Memo. 1990-463.

Polowniak v. Commissioner, T.C. Memo. 2016-31, also reallocated income, not under Code § 482 but rather allocating the income to the taxpayer who truly earned it.
[1876] *Summa Holdings, Inc. v. Commissioner*, T.C. Memo. 2015-119, also addressed arguments regarding DISCs being statutorily favored, rejecting taxpayers' arguments that *Hellweg v. Commissioner*, T.C. Memo. 2011-58, protected them:

> Petitioners argue that since Congress could have prohibited transactions involving DISCs owned by IRAs but chose not to do so, Congress was comfortable with IRAs' holding DISC stock. We rejected this argument in *Hellweg*. As we stated in *Hellweg*, this argument is logically erroneous. See *Hellweg v. Commissioner*, slip op. at 13. Congress' choice to prevent one particular abusive transaction involving DISCs and IRAs does not indicate that Congress approves of all other abusive transactions involving DISCs and IRAs. See *id*. at 13-14.
>
> Section 995(g) was enacted in 1988, almost 10 years before the enactment of the Roth IRA provisions, which were enacted as part of the Taxpayer Relief Act of 1997, sec. 302. They became effective for tax years beginning after December 31, 1997. *Id.* sec. 302(f), 111 Stat. at 829. Congress could not have been aware of the type of abusive transaction involving Roth IRAs at issue here at the time of enactment of section 995(g).

to enable tax savings, as the Commissioner seeks to do in this instance."[1877] Furthermore, "the Code authorizes investors to avoid significant taxes on capital gains and dividends by using their Roth IRAs in all manner of tax-avoiding ways, including by buying shares in promising new companies whose share prices may rise considerably over time or which may pay out large dividends over time."[1878] The Sixth Circuit pointed out that any deemed or actual dividend received from a DISC and any gain on the disposition of DISC shares received by an IRA are subject to unrelated business income tax,[1879] so Congress has addressed tax-exempt entities owning DISCs, and courts should not let the IRS override the statutory scheme.[1880] The Sixth Circuit's reversal provided the exporter with deductions for DISC commissions paid; the shareholders (the Benensons and a trust for their children) appealed to the First and Second Circuits, and the First Circuit applied logic similar to that of the Sixth Circuit in reversing the Tax Court[1881] and the Second Circuit reversed the Tax Court as well.[1882]

However, taxpayers were hit with an excise tax for excess contributions on similar deal involving a different export tax break. The official tax court syllabus of *Mazzei v. Commissioner*, 150 T.C. No. 7 (2018), summarizes:

> Ps entered into a prepackaged plan to save taxes by routing funds from their family business through a Bermuda-based foreign sales corporation (FSC) and then into Roth IRAs created for this purpose. Pursuant to this plan, in 1998 each P directly contributed $2,000, the applicable contribution limit, to his or her newly created Roth IRA, which then paid a nominal amount for stock in the FSC. From 1998 to 2002 Ps routed payments totaling $533,057 from their family business, through the FSC, and into their Roth IRAs.
>
> Ps contend that we should respect the form of these transactions as payments from Ps' business to the FSC, followed by payments of dividends by the FSC to the Roth IRAs. R contends that the payments from the FSC to Ps' Roth IRAs represented, in substance, contributions from Ps to their Roth IRAs. R contends that because these payments exceeded Ps' contribution limits for their Roth IRAs, Ps are liable for excise taxes under I.R.C. sec. 4973.
>
> *Held*: On the facts presented, Ps and not their Roth IRAs were the owners, for Federal tax purposes, of the FSC stock; in substance the FSC dividends were income to Ps, who

---

[1877] *Summa Holdings, Inc. v. Commissioner*, 848 F.3d 779 (6th Cir. 2017). The taxpayer had deducted the DISC commissions, and the Tax Court had held that the taxpayer could not deduct the payments. The Sixth Circuit case applies only to this taxpayer. The other taxpayers involved - the Roth IRA owners and a trust that owned the DISC – have appealed the Tax Court's findings to the First and Second Circuits.
[1878] *Summa Holdings, Inc. v. Commissioner*, 848 F.3d 779 (6th Cir. 2017).
[1879] Code § 995(g); see ¶ D-6834 DISC dividends as unrelated trade or business income, *Federal Tax Coordinator Analysis* (RIA).
[1880] *Summa Holdings, Inc. v. Commissioner*, 848 F.3d 779 (6th Cir. 2017), concluding:

> If Congress sees DISC-Roth IRA transactions of this sort as unwise or as creating an improper loophole, it should fix the problem. Until then, the DISC will continue to provide tax savings to the owners of U.S. export companies, just as Congress intended—even if subsequent changes to the Code have increased the scale of the savings beyond Congress's original estimation. The last thing the federal courts should be doing is rewarding Congress's creation of an intricate and complicated Internal Revenue Code by closing gaps in taxation whenever that complexity creates them.

[1881] *Benenson v. Commissioner*, 121 A.F.T.R.2d ¶2018-634 (1st Cir. 4/6/2018) (IRS never argued that the shares were subscribed at too low a price).
[1882] *Benenson v. Commissioner*, 122 A.F.T.R.2d ¶2018-6897 (2nd Cir. 12/14/2018) (DISC commissions did not constitute constructive dividend to the exporter's shareholders).

contributed the funds to their Roth IRAs. *Summa Holdings, Inc. v. Commissioner*, 848 F.3d 779 (6th Cir. 2017), *rev'g* T.C. Memo. 2015-119, distinguished.

Held, further, pursuant to I.R.C. sec. 4973 Ps are liable for excise taxes on excess contributions *to* their Roth IRAs.

Held, further, R's imposition of additions to tax under I.R.C. sec. 6651(a)(1) and (2) is not sustained.

Mazzei, a reviewed decision with a spirited dissent, concluded:

> In form, petitioners' Roth IRAs purchased FSC stock for $1 and the FSC simultaneously entered into a series of contracts with Injector Co., which were executed as part of the plan of purchase. As described, the Roth IRAs effectively paid nothing for the FSC stock, put nothing at risk, and from an objective perspective, could not have expected any benefits. From that nominal initial investment, petitioners claim that their Roth IRAs earned dividends totaling $533,057 over four years.
>
> Considering all the facts in the record, however, it is evident that the Roth IRAs' formal purchase of the FSC stock for $1 did not reflect the underlying reality; *i.e.*, petitioners' capacity (through Injector Co.)[39] and clear intention to direct Injector Co. to make large commission payments to the FSC. The form of the transactions the Roth IRAs entered into does not reflect the underlying related-party expectations and intentions. Petitioners' transactions attempt to utilize this mismatch between substance and form to defeat the contribution limits. We have not found any textual support in the Code or the regulations that would allow such a mismatch between the form and substance of a purchase by these Roth IRAs. We therefore disregard the purchase.
>
> [39] Petitioners' export receipts had fluctuated to some degree over the years, but they had reliable and established export receipts when they entered these transactions.
>
> Furthermore, because petitioners (through various passthrough entities) controlled every aspect of the transactions in question, we conclude that they, and not their Roth IRAs, were the owners of the FSC stock for Federal tax purposes at all relevant times.[40] The dividends from the FSC are therefore properly recharacterized as dividends from the FSC to petitioners, followed by petitioners' contributions of these amounts to their respective Roth IRAs. All of these payments exceeded the applicable contribution limits and were therefore excess contributions. We therefore uphold respondent's determination of excise taxes under section 4973.
>
> [40] We note that, because no income tax issues are presented in these cases, we need not and do not consider whether the FSC was owned by and through one of petitioners' passthrough entities rather than directly by petitioners.

The majority noted that the case is appealable to a different court of appeals than the one that reversed the Tax Court in *Summa Holdings* and made various arguments why the cases were different; I agree with the dissent that the majority was just making excuses for not accepting the Sixth Circuit's rebuke. At any rate, DISCs replaced FSCs, so the case's true significance is in two areas: first, the majority of the Tax Court has not accepted the Sixth Circuit's rebuke; second, the majority of the Tax Court has signaled a clear warning against nominally funded entities that make profits disproportionate to the underlying investment in related party transactions.[1883] Citing contract terms that gave the exporting company complete control over how much the FSC received,[1884] the court concluded, "On these facts, no independent holder of the FSC stock could realistically have expected to receive any benefits (before or after tax) due

---

[1883] The Tax Court stated:

> A "de minimis risk does not necessarily give substance to a transaction that is otherwise without risk." *John Hancock Life Ins. Co. (U.S.A.) v. Commissioner*, 141 T.C. 1, 94 (2013) (citing *ASA Investerings P'ship v. Commissioner*, 201 F.3d 505, 514-515 (D.C. Cir. 2000), *aff'g* T.C. Memo. 1998-305).

In footnote 37, the majority stated:

> The dissent asserts that under our reasoning petitioners "couldn't have owned the FSC either", because petitioners also put nothing at risk. See dissenting op. p. 91. This is incorrect; petitioners were exposed at all times to the underlying business risk, *i.e.*, that their investment in their export business would decline. The Roth IRAs were not exposed to that risk because they never made an investment (they paid only a nominal amount for the FSC stock and never capitalized the FSC) and because no fixed right to receive commission payments was ever transferred to the FSC (*i.e.*, if a fixed right to receive a portion of the export income had been transferred to the FSC, the value of the FSC stock would have varied with the export market and the Roth IRAs would have been exposed to the risk that the right to receive income held by the FSC would decline with the export market).
>
> In any event, in these cases we are examining whether the purchase transaction was sufficient to transfer substantive ownership to the Roth IRAs; risk is just one factor to be considered. Even if petitioners bore little risk with respect to the FSC, they owned the FSC because they controlled every aspect of its existence through the contractual powers retained by Injector Co. (discussed in the next section); the Roth IRAs (unlike, for example, the taxpayer in *Frank Lyon*) put nothing at risk to alter this ownership equation.

[1884] The court found:

> Injector Co. retained complete control over whether any of its export receipts would flow to the FSC in any year. The commission agreement between petitioners' business and the FSC states: "At all times … [petitioners' business] shall have the discretion as to when and how much it wishes to pay FSC and no account receivable shall ever exist between FSC and … [petitioners' business]." Consequently, no independent holder of the FSC stock would have been entitled to, or would have expected, any upside; Injector Co. retained complete control over whether any payments would ever be made.
>
> Furthermore, Injector Co.'s control over upside profits extended beyond the discretion to direct commission payments to the FSC. The commission agreement also allowed Injector Co. to reach into the FSC and take back any payments that had already been made—i.e., under the commission agreement, petitioners' business controlled any profits even after those profits had been paid to the FSC.[38]
>
> [38] More specifically, the commission agreement provided that any amount paid to the FSC by petitioners' business
>
>> shall be agreed upon by the parties and may vary from time to time by mutual agreement, so as to provide the maximum [F]ederal income tax benefits to … [petitioners' business] and [the] FSC …. [Petitioners' business] shall have the final decision as to whether [the] FSC is considered to have solicited or promoted a transaction with a customer and may prospectively or retroactively add or delete transactions entitling [the] FSC to a commission. [Emphasis added.]
>
> (Similar provisions also existed for sale, license, and lease commissions.) The duration of the power to retroactively delete transactions is not specified, but nothing in the record rules out the possibility that petitioners' business could have deleted a transaction even after the associated commission had been paid to the FSC. In other words, Injector Co. retained the power to decide—after the commissions were paid - that the FSC was not entitled to a commission with respect to a particular export transaction. Deletion of the export transaction would have had the effect of converting the associated commission payment into a loan from Injector Co. to the FSC under a section of the commission agreement detailing the treatment of overpayments.

to its formal ownership of the FSC stock; Injector Co. retained control over any benefits at all relevant times." That is what set the stage for the conclusion that the exporter was essentially distributing money to its owners, who made excess contributions to their Roth IRAs that owned the FSCs. For further discussion of this case, including the Ninth Circuit's rebuke of the Tax Court's smell test in *Mazzei*, see part II.G.17.c Economic Substance, Sham Transaction, Business Purpose, and Substance Over Form Doctrines.

If a business entity owned at least in part by a Roth IRA transacts with related parties and if somehow self-dealing issues can be avoided, be careful to document the agreements, enforce the agreements, and include staffing sufficient to operate the entity.[1885] However, none of the IRA's owner, family, or friends should be involved, because compensating them may constitute self-dealing, and not compensating them may be recharacterized as (if a family member or friend, first a gift to the owner then) an excess contribution by the owner.

For more about IRAs, consult me or check out www.ataxplan.com, the web page of IRA guru Natalie Choate, whose book I commend to all estate planning professionals and the latest version of which is available at https://www.retirementbenefitsplanning.com for $9 per month, cancelable at any time. For more on self-dealing issues that are especially risky with IRAs but can also cause problems with qualified plans, check out the web page of Texas attorney Noel Ice.[1886]

Natalie recommends that every IRA owner file Form 5329 annually to run the statute of limitations on excess contributions and other penalties involving IRAs; consider following that

---

[1885] *Block Developers, LLC v. Commissioner*, T.C. Memo. 2017-142, treated as excess contributions to the LLC's Roth IRA owners distributions derived from the licensing of patents acquired in a purported sale-leaseback. Comparing the case to *Polowniak v. Commissioner*, T.C. Memo. 2016-31, the court reasoned:

> The similarities between *Polowniak* and these cases are undeniable. SR Products' sale of the Verdura Block patents to Block Developers had no substantive effect on how Jansson operated his businesses. Jansson's companies continued to produce the blocks, test the blocks, and make sure the blocks were certified. The Jansson family continued to attend trade shows and take on clients without any mention of Block Developers. And the expense of performing these tasks remained on Jansson - he was never reimbursed by Block Developers.
>
> As in *Polowniak*, there were major holes in the business dealings between the old company and the new. Block Developers did not keep consistent records, and billing statements to SR Products did not match up with payments. There is little evidence in the record detailing what services Block Developers actually performed for SR Products—not that it seems it could have without a single employee. Nor did the parties adhere to written agreements - if SR Products did not have the funds to make a royalty payment, it simply did not pay, and Block Developers did nothing about it. Block Developers' administration was no different: It did not employ anyone to perform even menial administrative tasks, and other than Maxam's testimony—which we don't believe on this point—there is no evidence to suggest that Block Developers itself ever tried to market the Verdura Block patents.
>
> Jansson's claim that Block Developers had a legitimate business purpose falls apart rather quickly after even a cursory view of the record. He says that he sold the Verdura Block patents to generate cash. This is illogical - the money Block Developers paid to SR Products in exchange for the Verdura Block patents came from SR Products, which means the sale did not actually raise new capital for SR Products. Jansson's claim that Block Developers would protect his assets is unfounded - Maxam did not take steps to protect Block Developers' interests in the patents, and there is no additional evidence or testimony to lead us to conclude that Block Developers' formation somehow protected the Janssons' assets. And, as we've already found, the record is void of any credible evidence that Block Developers tried to license the Verdura Block patents.

[1886] http://trustsandestates.net/retirement-planning.html.

advice if the IRA owns a business, otherwise engages in any activity that might possibly generate an excise tax, or is or might be required to make minimum distributions that year. The Tax Court has upheld penalties for failure to file Forms 5329 incidental to upholding the 6% excise tax on excess contributions to Roth IRAs on some of the cases described above.[1887]

However, note that disqualification of an IRA can cause it to lose its protection from creditors, so tax and penalties are not the only concern here.[1888]

II.G.23. Employee vs. Independent Contractor

Whether a service provider is an independent contractor or an employee is important for FICA (Social Security),[1889] FUTA (unemployment),[1890] and income tax withholding.[1891]

The IRS looks at 20 factors as part of a facts-and-circumstances test.[1892] The Tax Court focuses on the ones that seem to be the most relevant to the situation.[1893]

On January 10, 2024, the Department of Labor amended 29 C.F.R. Chapter 795, effective March 11, 2024, in a document titled, "Employee or Independent Contractor Classification Under the Fair Labor Standards Act."

29 C.F.R. § 795.100, "Introductory statement," provides:

> This part contains the Department of Labor's (the Department) general interpretations for determining whether workers are employees or independent contractors under the Fair Labor Standards Act (FLSA or Act). See 29 U.S.C. 201-19. These interpretations are intended to serve as a "practical guide to employers and employees" as to how the Department will seek to apply the Act. *Skidmore v. Swift & Co.*, 323 U.S. 134, 138 (1944). The Administrator of the Department's Wage and Hour Division will use these interpretations to guide the performance of their duties under the Act, unless and until the Administrator is otherwise directed by authoritative decisions of the courts or the Administrator concludes upon reexamination of an interpretation that it is incorrect. To the extent that prior administrative rulings, interpretations, practices, or enforcement policies relating to determining who is an employee or independent contractor under the Act are inconsistent or in conflict with the interpretations stated in this part, they are hereby rescinded. The interpretations stated in this part may be relied upon in accordance with section 10 of the Portal-to-Portal Act, 29 U.S.C. 251-262, notwithstanding that after any act or omission in the course of such reliance, the interpretation is modified or rescinded or is determined by judicial authority to be invalid or of no legal effect. 29 U.S.C. 259.

29 C.F.R. § 795.100, "Determining employee or independent contractor classification under the FLSA," provides:

[1887] *Mazzei v. Commissioner*, T.C. Memo. 2014-55 (passage of statute of limitations on the income tax compensation issue did not preclude IRS from assessing an excise tax for excess contribution to an IRA).
[1888] See fn. 1873.
[1889] Reg. § 31.3121(d)-1(c).
[1890] Reg. § 31.3306(i)-1.
[1891] Reg. § 31.3401(c)-1.
[1892] Rev. Rul. 87-41.
[1893] *Rahman v. Commissioner*, T.C. Summary Opinion 2014-35.

(a) *Relevance of independent contractor or employee status under the Act*. The Act's minimum wage, overtime pay, and recordkeeping obligations apply only to workers who are covered employees. Workers who are independent contractors are not covered by these protections. Labeling employees as "independent contractors" does not make these protections inapplicable. A determination of whether a worker is an employee or independent contractor under the Act focuses on the economic realities of the worker's relationship with the worker's potential employer and whether the worker is either economically dependent on the potential employer for work or in business for themself.

(b) *Economic dependence as the ultimate inquiry*. An "employee" under the Act is an individual whom an employer suffers, permits, or otherwise employs to work. 29 U.S.C. 203(e)(1), (g). "Employer" is defined to "include[ ] any person acting directly or indirectly in the interest of an employer in relation to an employee." 29 U.S.C. 203(d). The Act's definitions are meant to encompass as employees all workers who, as a matter of economic reality, are economically dependent on an employer for work. A worker is an independent contractor, as distinguished from an "employee" under the Act, if the worker is, as a matter of economic reality, in business for themself. Economic dependence does not focus on the amount of income the worker earns, or whether the worker has other sources of income.

29 C.F.R. § 795.110, "Economic reality test to determine economic dependence," provides:

(a) *Economic reality test*.

(1) In order to determine economic dependence, multiple factors assessing the economic realities of the working relationship are used. These factors are tools or guides to conduct a totality-of-the-circumstances analysis. This means that the outcome of the analysis does not depend on isolated factors but rather upon the circumstances of the whole activity to answer the question of whether the worker is economically dependent on the potential employer for work or is in business for themself.

(2) The six factors described in paragraphs (b)(1) through (6) of this section should guide an assessment of the economic realities of the working relationship and the question of economic dependence. Consistent with a totality-of-the-circumstances analysis, no one factor or subset of factors is necessarily dispositive, and the weight to give each factor may depend on the facts and circumstances of the particular relationship. Moreover, these six factors are not exhaustive. As explained in paragraph (b)(7) of this section, additional factors may be considered.

(b) *Economic reality factors*

(1) *Opportunity for profit or loss depending on managerial skill*. This factor considers whether the worker has opportunities for profit or loss based on managerial skill (including initiative or business acumen or judgment) that affect the worker's economic success or failure in performing the work. The following facts, among others, can be relevant: whether the worker determines or can meaningfully negotiate the charge or pay for the work provided; whether the worker accepts or declines jobs or chooses the order and/or time in which the jobs are performed;

whether the worker engages in marketing, advertising, or other efforts to expand their business or secure more work; and whether the worker makes decisions to hire others, purchase materials and equipment, and/or rent space. If a worker has no opportunity for a profit or loss, then this factor suggests that the worker is an employee. Some decisions by a worker that can affect the amount of pay that a worker receives, such as the decision to work more hours or take more jobs when paid a fixed rate per hour or per job, generally do not reflect the exercise of managerial skill indicating independent contractor status under this factor.

(2) *Investments by the worker and the potential employer*. This factor considers whether any investments by a worker are capital or entrepreneurial in nature. Costs to a worker of tools and equipment to perform a specific job, costs of workers' labor, and costs that the potential employer imposes unilaterally on the worker, for example, are not evidence of capital or entrepreneurial investment and indicate employee status. Investments that are capital or entrepreneurial in nature and thus indicate independent contractor status generally support an independent business and serve a business-like function, such as increasing the worker's ability to do different types of or more work, reducing costs, or extending market reach. Additionally, the worker's investments should be considered on a relative basis with the potential employer's investments in its overall business. The worker's investments need not be equal to the potential employer's investments and should not be compared only in terms of the dollar values of investments or the sizes of the worker and the potential employer. Instead, the focus should be on comparing the investments to determine whether the worker is making similar types of investments as the potential employer (even if on a smaller scale) to suggest that the worker is operating independently, which would indicate independent contractor status.

(3) *Degree of permanence of the work relationship*. This factor weighs in favor of the worker being an employee when the work relationship is indefinite in duration, continuous, or exclusive of work for other employers. This factor weighs in favor of the worker being an independent contractor when the work relationship is definite in duration, non-exclusive, project-based, or sporadic based on the worker being in business for themself and marketing their services or labor to multiple entities. This may include regularly occurring fixed periods of work, although the seasonal or temporary nature of work by itself would not necessarily indicate independent contractor classification. Where a lack of permanence is due to operational characteristics that are unique or intrinsic to particular businesses or industries and the workers they employ, this factor is not necessarily indicative of independent contractor status unless the worker is exercising their own independent business initiative.

(4) *Nature and degree of control*. This factor considers the potential employer's control, including reserved control, over the performance of the work and the economic aspects of the working relationship. Facts relevant to the potential employer's control over the worker include whether the potential employer sets the worker's schedule, supervises the performance of the work, or explicitly limits the worker's ability to work for others. Additionally, facts relevant to the potential employer's control over the worker include whether the potential employer uses technological means to supervise the performance of the work (such as by means of a device or electronically), reserves the right to supervise or discipline

workers, or places demands or restrictions on workers that do not allow them to work for others or work when they choose. Whether the potential employer controls economic aspects of the working relationship should also be considered, including control over prices or rates for services and the marketing of the services or products provided by the worker. Actions taken by the potential employer for the sole purpose of complying with a specific, applicable Federal, State, Tribal, or local law or regulation are not indicative of control. Actions taken by the potential employer that go beyond compliance with a specific, applicable Federal, State, Tribal, or local law or regulation and instead serve the potential employer's own compliance methods, safety, quality control, or contractual or customer service standards may be indicative of control. More indicia of control by the potential employer favors employee status; more indicia of control by the worker favors independent contractor status.

(5) *Extent to which the work performed is an integral part of the potential employer's business*. This factor considers whether the work performed is an integral part of the potential employer's business. This factor does not depend on whether any individual worker in particular is an integral part of the business, but rather whether the function they perform is an integral part of the business. This factor weighs in favor of the worker being an employee when the work they perform is critical, necessary, or central to the potential employer's principal business. This factor weighs in favor of the worker being an independent contractor when the work they perform is not critical, necessary, or central to the potential employer's principal business.

(6) *Skill and initiative*. This factor considers whether the worker uses specialized skills to perform the work and whether those skills contribute to business-like initiative. This factor indicates employee status where the worker does not use specialized skills in performing the work or where the worker is dependent on training from the potential employer to perform the work. Where the worker brings specialized skills to the work relationship, this fact is not itself indicative of independent contractor status because both employees and independent contractors may be skilled workers. It is the worker's use of those specialized skills in connection with business-like initiative that indicates that the worker is an independent contractor.

(7) *Additional factors*. Additional factors may be relevant in determining whether the worker is an employee or independent contractor for purposes of the FLSA, if the factors in some way indicate whether the worker is in business for themself, as opposed to being economically dependent on the potential employer for work.

29 C.F.R. § 795.115, “Severability,” provides:

> If any provision of this part is held to be invalid or unenforceable by its terms, or as applied to any person or circumstance, or stayed pending further agency action, the provision shall be construed so as to continue to give the maximum effect to the provision permitted by law, unless such holding shall be one of utter invalidity or unenforceability, in which event the provision shall be severable from this part and shall not affect the remainder thereof.

The preamble to the above discusses tax issues:

2. Tax Liabilities

As self-employed workers, independent contractors are legally obligated to pay both the employee and employer shares of the Federal Insurance Contributions Act (FICA) taxes. Thus, if workers' classifications change from independent contractors to employees, there could be a transfer in federal tax liabilities from workers to employers.[637] Although this rule only addresses whether a worker is an employee or an independent contractor under the FLSA, the Department assumes in this analysis that employers are likely to keep the status of most workers the same across all benefits and requirements, including for tax purposes.[638] These payroll taxes include the 6.2 percent employer component of the Social Security tax and the 1.45 percent employer component of the Medicare tax.[639] In sum, independent contractors are legally responsible for an additional 7.65 percent of their earnings in FICA taxes (less the applicable tax deduction for this additional payment). Some of this increased tax liability may be partially or wholly paid for by the individuals and companies that engage independent contractors, to the extent that the compensation paid to independent contractors accounts for this added tax liability. However, changes in compensation are discussed separately below. Changes in benefits, tax liability, and earnings must be considered in tandem to identify how the standard of living may change.

[637] See 86 FR 1218.

[638] Courts have noted that the FLSA has the broadest conception of employment under federal law. See, *e.g., Darden*, 503 U.S. at 326. To the extent that businesses making employment status determinations base their decisions on the most demanding federal standard, a rulemaking addressing the standard for determining classification of worker as an employee or an independent contractor under the FLSA may affect the businesses' classification decisions for purposes of benefits and legal requirements under other federal laws.

[639] Internal Revenue Service, "Publication 15, (Circular E), Employer's Tax Guide" (2023 https://www.irs.gov/publications/p15. The social security tax has a wage base limit of $160,200 in 2023. There is no wage base limit for Medicare Tax.

The Coalition to Promote Independent Entrepreneurs contended that the Department's analysis of transfers is problematic and that the claim that employers are likely to keep the status of most workers the same across all benefits and requirements is legally incorrect. In the Department's enforcement experience, employers generally classify workers as employees or independent contractors for all purposes. The Department is not making any statement regarding employers' compliance with other laws that use different standards for employee classification than the FLSA.

In addition to affecting tax liabilities for workers, this rule could have an impact on state tax revenue and budgets. Misclassification results in lost revenue and increased costs for states because states receive less tax revenue than they otherwise would from payroll taxes, and they have reduced funds to unemployment insurance, workers' compensation, and paid leave programs.[640]

[640] See, *e.g.*, Lisa Xu and Mark Erlich, Economic Consequence of Misclassification in the State of Washington, Harvard Labor and Worklife Program, 2 (2019), https://lwp.law.harvard.edu/files/lwp/files/wa_study_dec_2019_final.pdf; Karl A. Racine, Issue Brief and Economic Report, Illegal Worker Misclassification: Payroll Fraud in the District's Construction Industry, 13 (September 2019), https://oag.dc.gov/sites/default/files/2019-09/OAG-Illegal-Worker-Misclassification-Report.pdf.

Although it has not been updated more recently, the IRS conducted a comprehensive worker misclassification estimate in 1984 using data collected by auditors. At the time, the IRS found misclassification resulted in an estimated total tax loss of $1.6 billion in Social Security taxes, Medicare taxes, Federal unemployment taxes, and Federal income taxes (for Tax Year 1984).[641] [642] To the extent workers were incorrectly classified due to misapplication of the 2021 IC Rule, that could have led to reduced tax revenues.

[641] Treasury Inspector General for Tax Inspection 2013, Employers Do Not Always Follow Internal Revenue Service Worker Determination Rulings, https://www.oversight.gov/sites/default/files/oig-reports/TIGTA/201330058fr_0.pdf.

[642] Adjusted for inflation using the CPI-U, the current value of this tax loss would be $4.5 billion.

Generally, employer requirements pertaining to unemployment insurance, disability insurance, or worker's compensation are on behalf of employees, therefore independent contractors do not have access to those benefits. Reduced unemployment insurance, disability insurance, and worker's compensation contributions result in reduced disbursement capabilities. Misclassification of employees as independent contractors thus impacts the funds paid into such state programs. Even if the misclassified worker is unaffected because they need no assistance, the employer has not paid into the programs as required. As a result, the state has diminished funds for those who require the benefits.

II.G.24. Taxing Entity or Individual Performing Services

An individual performing services cannot say that payments from a third party for those services belong to an entity employing the service provider unless:[1894]

[1894] *Fleischer v. Commissioner*, T.C. Memo. 2016-238. The court mentioned that this test is consistent with the FICA test under Reg. § 31.3121(d)-1(c)(2), which provides:

> Generally such relationship exists when the person for whom services are performed has the right to control and direct the individual who performs the services, not only as to the result to be accomplished by the work but also as to the details and means by which that result is accomplished.

For a similar ruling involving an attempted assignment of earnings to a limited partnership, see *Peterson v. Commissioner*, 827 F.3d 968 (11th Cir. 5/24/2016), affirming T.C. Memo. 2013-271, described in fn. 3464 in part II.L.4 Self-Employment Tax Exclusion for Limited Partner. See also *Frey v. Commissioner*, T.C. Memo. 2019-62:

> Respondent cites longstanding authorities for the rule that income is taxable to the person who earns it. *Lucas v. Earl*, 281 U.S. 111, 114-115 (1930). This rule has been applied consistently in various contexts in which taxpayers have attempted to shift the incidence of taxation to a person or entity having less or no tax liability. See, *e.g.*, *Cole v. Commissioner*, 637 F.3d 767, 777

(1) The individual providing the services is an employee of the corporation whom the corporation can direct and control in a meaningful sense; and

(2) The entity and the person using the services have a contract or similar indicium recognizing the entity's controlling position.

In *Smith v. Commissioner*, T.C. Memo. 2018-170, a married couple provided handyman services. They caused their S corporation to send invoice to third parties for services rendered. However, the corporation never had a back account; instead they deposited in their personal checking accounts checks made payable to the corporation. The corporation never entered into an employment agreement with them and never issued Forms W-2 for services performed. The court commented on services performed for one third party, Hillcrest:

> With respect to the personal services that Ms. Smith performed for Hillcrest, petitioners rely on the Hillcrest invoices that it received during 2011 and 2012 as a factor weighing in their favor in determining whether Smith Solutions in fact earned the income that it reported in its 2011 Form 1120S, its 2012 Form 1120S, and its 2013 Form 1120S. Those invoices contained the same caption. That caption showed the name "Smith Solutions, Inc." However, the name "Sheila Smith" also appeared immediately above the name "Smith Solutions, Inc." We are unable to find on the basis of the Hillcrest invoices that Hillcrest received during 2011 and 2012 that Hillcrest recognized or understood that it was contracting with Smith Solutions for certain personal services of Ms. Smith, and not with Ms. Smith in her individual capacity. Nor are we able to find from those invoices that Hillcrest recognized or understood that Smith Solutions was exercising control over Ms. Smith with respect to the personal services that she performed for it.
>
> Petitioners also rely on the Hillcrest checks that were payable to "Smith Solutions, Inc." as a factor weighing in their favor in determining whether Smith Solutions in fact earned the income that it reported in its 2011 Form 1120S, its 2012 Form 1120S, and its 2013 Form 1120S. Although those checks establish that Hillcrest was aware of the existence of Smith Solutions, they do not establish that Hillcrest recognized or understood that it was contracting with Smith Solutions for the performance of certain personal services by Ms. Smith. We are not persuaded that Hillcrest made the Hillcrest checks payable to Smith Solutions because it considered Smith Solutions as (1) the contracting party for the personal services that Ms. Smith performed for it, (2) the entity that exercised control over Ms. Smith with respect to the performance of those services, and (3) the entity that

---

(7th Cir. 2011) (lawyer's attempt to assign earnings to an entity), *aff'g* T.C. Memo. 2010-31; *Parker v. Routzahn*, 56 F.2d 730 (6th Cir. 1932) (attempt to assign income to spouse); *Walker v. Commissioner*, T.C. Memo. 2012-5 (attempt to assign income to earner's children). The determination of the proper taxpayer depends upon which person or entity in fact controls the earning of the income rather than who ultimately receives the income. See *Vnuk v. Commissioner*, 621 F.2d 1318, 1320 (8th Cir. 1980), *aff'g* T.C. Memo. 1979-164.
Petitioners … claim that petitioner, in his capacity as the owner of Queen City, made a deal with himself as a sole proprietor to provide management or accounting services to the sole proprietorship equal in amount to what petitioner earned as a stockbroker. (He also suggested during his testimony that the payment was a contribution of capital to Queen City, which would not be deductible as a business expense.) Petitioners presented no evidence of the actual management or accounting services performed. There is no evidence that funds were actually transferred to Queen City. Petitioner at all times controlled the earning of the income. Petitioner's testimony is implausible and unreliable, and we give it no weight. The assignment of income in the guise of deductions for services was invalid, and no deductions are allowed.

> was entitled to compensation for those services. We believe that Hillcrest made the Hillcrest checks payable to Smith Solutions because Ms. Smith asked it to do so.

The court made similar comments about other third party service recipients and concluded:

> Based upon our examination of the entire record before us, we find that petitioners have failed to carry their burden of establishing that they did not earn the income that Smith Solutions reported as "[t]otal income" in each of its 2011 Form 1120S, 2012 Form 1120S, and 2013 Form 1120S.

In *Morowitz v. U.S.*, 123 A.F.T.R.2d 2019-1001 (D. R.I. 2019), a lawyer with an S corporation brought in a new shareholder and sought to account for pre-existing cases separately, even though the S corporation received all of the income and paid all of the expense. He tried this using Schedule C, which the court properly 'rejected. Instead, I would probably have advised the lawyers to just make compensation arrangements, so that any appropriate disparities were reflected on Forms W-2 issued the corporation, given the personal services nature of the work. If any long-term disparities are required, consider part II.A.2.j.i Using a Partnership to Avoid S Corporation Limitations on Identity or Number of Owners or to Permit Non-Pro Rata Equity Interests.

Furthermore, the Tax Court will look through a structure designed to deflect income to a tax-exempt entity, such an ESOP for the service provider, when the service provider is running the show and the arrangements were merely designed to deflect income in that manner.[1895]

[1895] *Pacific Management Group v. Commissioner*, T.C. Memo. 2018-131, holding:

> A longstanding principle of tax law is that income is taxed to the person who earns it. *United States v. Basye*, 410 U.S. 441, 450 (1973) ("[H]e who earns income may not avoid taxation through anticipatory arrangements no matter how clever or subtle[.]" (citing *Lucas v. Earl*, 281 U.S. 111, 115 (1930))). A person who earns income "cannot avoid taxation by entering into a contractual arrangement whereby that income is diverted to some other person or entity." *Id*. at 449.
>
> Under Mr. Ryder's tax-minimization scheme, Mr. Boultinghouse remained the CFO of all four Water Companies, and he continued to provide them with exactly the same financial and accounting services he had supplied previously. But now he supplied those services as an "employee" of his S corporation, which allegedly supplied his services to PMG, which allegedly supplied his services as an "independent contractor" to the Water Companies. He signed a purported "agreement of employment" with his S corporation, but that document did not specify what position he was to hold or what duties he was to perform. , it simply recited that he would "render and perform services under the direction and designation of" his S corporation. Because his S corporation was a paper entity and functionally his alter ego, that recitation was meaningless. In reality, he performed services for the Water Companies "under the direction and designation" of himself.
>
> The "agreement of employment," like PMG's purported agreement to provide Mr. Boultinghouse's services as an "independent contractor" to the Water Companies, did not in any meaningful way change the employer-employee relationship he had with those corporations. Mr. Ryder's tax-minimization plan was a classic "assignment of income" scheme whereby Mr. Boultinghouse used a series of contractual arrangements to divert salary income that would otherwise have flowed directly to him. See *Basye*, 410 U.S. at 450. But no anticipatory arrangement can hide the fact that his share of the management fees was in substance earned by and owed to him.
>
> We recognize the principle that a corporation (including an S corporation) is a separate taxable entity. See *Moline Props., Inc. v. Commissioner*, 319 U.S. 436, 439 (1943). But the relevant question is not simply "who earned the income" but rather "who controls the earning of the

A person who performs services is taxed on the services, even if the person assigns the earnings to another person.[1896]

Also consider parts II.A.1.b C Corporation Tactic of Using Shareholder Compensation to Avoid Dividend Treatment and II.A.2.c Avoiding Double Taxation and Self-Employment Tax.

II.G.25. Code § 199 Deduction for Domestic Production Activities (repealed)

Code § 199 has been repealed, effective taxable years beginning after December 31, 2017, so this part II.G.25 would not apply after then.

Code § 199 provides a deduction for domestic production activities. The deduction is equal to 9% of the lesser of (1) the qualified production activities income of the taxpayer for the taxable year, or (2) taxable income (determined without regard to this section) for the taxable year.[1897] However, it cannot exceed 50% of the W-2 wages paid by the taxpayer for the taxable year.[1898] Compensation paid a partner is reported as guaranteed payments on Schedule K-1 instead of on Form W-2,[1899] so generally the Code § 199 deduction would be higher for an S corporation or a C corporation than it would be for a comparable partnership.

---

income." See *Johnson v. Commissioner*, 78 T.C. 882, 891 (1982) (citing *Vercio v. Commissioner*, 73 T.C. 1246, 1254-1255 (1980)), *aff'd* without published opinion, 734 F.2d 20 (9th Cir. 1984); *Fleischer v. Commissioner*, T.C. Memo. 2016-238, 112 T.C.M. (CCH) 723, 725.

In a setting such as this, two elements are generally required before the corporation will be regarded as the party that controls the earning of the income: (1) the corporation must be able to direct and control the employee in a meaningful way and (2) "there must exist between the corporation and the person or entity using the services a contract or similar indicium recognizing the corporation's controlling position." *Johnson*, 78 T.C. at 891; see *Idaho Ambucare Ctr., Inc. v. United States*, 57 F.3d 752, 754-755 (9th Cir. 1995) (same).

We find that the first requirement is not satisfied here because Boultinghouse Inc., the S corporation, was not able to (and did not in fact) "direct and control" Mr. Boultinghouse in any meaningful way. The S corporation was a paper entity. His purported "agreement of employment" with it did not specify what position he was to hold or what duties he was to perform. And far from rendering his services under the "direction and designation of" his S corporation, he in fact supervised his own employment by directing the day-to-day activities of the Water Companies. The documents Mr. Ryder drafted were not worth the paper they were printed on. They were designed to create, and they had the effect of producing, an anticipatory assignment of Mr. Boultinghouse's income to a tax-exempt entity Mr. Ryder had created for that purpose. See *Vnuk v. Commissioner*, 621 F.2d 1318, 1320-1321 (8th Cir. 1980), *aff'g* T.C. Memo. 1979-164.

In sum, we conclude that the assignment-of-income principle is fully applicable here because Mr. Boultinghouse's S corporation was not able to (and did not in fact) "direct or control in some meaningful sense the activities of the service provider." *Idaho Ambucare Ctr., Inc.*, 57 F.3d at 754-755; *Johnson*, 78 T.C. at 891 (same).[25] Once again, we must apportion to Mr. Boultinghouse his ratable share of the $564,109 additional compensation that we have allowed the Water Companies to deduct for 2005.

[25] In view of our disposition, we need not address whether the second requirement of the Johnson test is met, viz, whether there existed a bona fide "contract or similar indicium recognizing the corporation's controlling position." *Johnson*, 78 T.C. at 891.

[1896] *Lucas v. Earl*, 281 U.S. 111 (1930).

[1897] Code § 199(a).

[1898] Code § 199(b)(1).

II.G.26. Real Estate Special Issues

II.G.26.a. Real Estate Dealer vs. Investor

A real estate dealer – someone who sells real estate much more frequently than an investor – must treat real estate as inventory.

A taxpayer's amount or type of real estate activity affects many aspects of tax law, including:

- Whether gain or loss from the sale of real estate is ordinary income or loss (always the case for inventory) or capital gain or loss.[1900]
- Whether ordinary income is recharacterized as capital gain and whether capital loss is recharacterized as ordinary loss under Code § 1231.[1901] Generally, this special treatment applies (a) if the taxpayer has a non-real estate trade or business and uses the real estate in that business, or (b) if the taxpayer holds the property for rental.
- Whether installment sale deferral is available for none, part, or all of the sale (inventory is not eligible).[1902]
- Whether gain is subject to self-employment tax (applies to the sale of inventory only).[1903]
- Whether the taxpayer is a real estate professional for purposes of deducting losses that might otherwise be passive losses (that might be suspended)[1904] and for purposes of avoiding treatment as passive income triggering the 3.8% tax on net investment income.[1905]
- Whether the deduction for a charitable contribution of real estate is limited to basis.[1906]

The U.S. Supreme Court held that "the definition of a capital asset must be narrowly applied and its exclusions interpreted broadly."[1907] Whether an asset is inventory depends on:[1908]

[1900] Discussing how to obtain capital gain on pre-development appreciation and whether the taxpayer already has enough activity that investments are considered to be inventory, see part II.G.26.c Future Development of Real Estate.
[1901] See part II.G.6 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business.
[1902] See part II.Q.3 Installment Sales - Deferring Tax on Lump Sum Payout Expected More than Two Years in the Future, especially the text accompanying fn. 4298.
[1903] Real estate rental income is not subject to self-employment tax. See parts II.L.2.a.ii Rental Exception to SE Tax, especially the detailed rules accompanying fn. 3428, and II.L.2.a.iii Whether Gain from Sale of Property is Subject to SE Tax, especially fn. 3438.
[1904] See part II.K.1.e.iii Real Estate Professional Converts Rental to Nonpassive Activity.
[1905] See parts II.I.8.c.ii Real Estate Classified as Nonpassive for Real Estate Professionals, II.I.8.c.iii Rental as a Trade or Business and II.I.8.f Summary of Business Activity Not Subject to 3.8% Tax.

> *United States v. Winthrop*, 417 F.2d 905, 909-10 (5th Cir. 1969); *see Sanders v. United States*, 740 F.2d 886, 889 (11th Cir. 1984) (applying the *Winthrop* factors). No factor or combination of factors is controlling. *Biedenharn Realty Co. v. United States*, 526 F.2d 409, 415 (5th Cir. 1976) (en banc). Rather, each case must be decided on its particular facts. *Id.* Still, the "frequency

(1) the nature and purpose of the acquisition of the property and the duration of the ownership;

(2) the extent and nature of the taxpayer's efforts to sell the property;

(3) the number, extent, continuity and substantiality of the sales;

(4) the extent of subdividing, developing, and advertising to increase sales;

(5) the use of a business office for the sale of the property;

(6) the character and degree of supervision or control exercised by the taxpayer over any representative selling the property; and

(7) the time and effort the taxpayer habitually devoted to the sales.

Glade Creek Partners, LLC v. Commissioner, T.C. Memo. 2023-82, included:

> On its 2012 return Hawks Bluff reported that it was in business as a real estate dealer, reported the easement property as inventory, and decreased the amount of its inventory on the transfer of the easement property to Glade Creek. Statements on tax returns may generally be treated as admissions by that taxpayer. *Mendes v. Commissioner*, 121 T.C. 308, 312 (2003).

Further above in the opinion, the court had described Code § 724(b), "Contributions of inventory items," which provides:

> In the case of any property which -
>
> (1) was contributed by a partner to the partnership, and
>
> (2) was a capital asset in the hands of such partner immediately before such contribution,
>
> any loss recognized by the partnership on the disposition of such property during the 5-year period beginning on the date of such contribution shall be treated as a loss from the sale of a capital asset to the extent that, immediately before such contribution, the adjusted basis of such property in the hands of the partner exceeded the fair market value of such property.

The court commented:

> Petitioner argues that Glade Creek should not be bound by Hawks Bluff's reporting.[11] It argues that Hawks Bluff's reporting is irrelevant. But section 724(b) tells us otherwise. It is the very purpose of section 724(b) to make relevant the character of the property in

---

and substantiality" of sales is the "most important" of these factors. *Id*. at 416. This is because "the presence of frequent sales ordinarily belies the contention that property is being held `for investment' rather than 'for sale.'" *Suburban Realty Co.*, 615 F.2d at 178.

When *Sugar Land Ranch Development, LLC v. Commissioner*, T.C. Memo. 2018-21, reviewed the Fifth Circuit's precedent, it cited factors similar to the list, but concluded that "frequency and substantiality of sales is the most important factor."

Hawks Bluff's hands. Congress enacted section 724 to prevent taxpayers from attempting to recharacterize ordinary income property as a capital asset by contributing the property to a newly organized partnership before the property is sold for a gain. H.R. Rep. No. 98-432, pt. 2, at 1222 (1984), as reprinted in 1984 U.S.C.C.A.N. 697, 888. While Hawks Bluff's reporting may not bind Glade Creek, petitioner has not provided a satisfactory explanation with reference to the statute as to why Hawks Bluff's reporting should not be given significant weight especially in the light of the legislative purpose of section 724. It is true, as petitioner argues, that Glade Creek did not control Hawks Bluff when Hawks Bluff filed its 2012 return, but that is the fact that is irrelevant. Nothing in section 724(b) requires that the partnership have control of the contributing partner when the contributing partner files its return.

[11] Petitioner cites only one case, *King's Court Mobile Home Park, Inc. v. Commissioner*, 98 T.C. 511 (1992), for the proposition that one taxpayer's characterization of property does not bind another taxpayer. That case does not support petitioner's argument. It involved a corporation's attempt to characterize payments to its controlling shareholder as deductible wages. The Court held that the corporation's payments were nondeductible dividends but noted that their characterization as wages or dividends had the same tax consequences to the recipient. *Id*. at 515. Thus, there was no issue relating to whether the corporation's characterization bound the recipient.

The Code gives taxpayers flexibility in how they arrange their business affairs to achieve desired tax consequences. See *Estate of Durkin v. Commissioner*, 99 T.C. 561, 571 (1992). While a taxpayer is free to organize its affairs as it chooses, once it has done so, the Commissioner may bind the taxpayer to its decision. *Bradley v. United States*, 730 F.2d 718, 720 (11th Cir. 1984);[12] see *Commissioner v. Nat'l Alfalfa Dehydrating & Milling Co.*, 417 U.S. 134, 149 (1974). Glade Creek and Hawks Bluff could have set out in the operating agreement that Hawks Bluff was contributing investment property or that Hawks Bluff was to report the easement property as a capital asset. See *Wray v. Commissioner*, T.C. Memo. 1978-488 (stating that partnership agreement stated that real property was held for investment). Glade Creek knew the significance of the characterization of the easement property for federal tax purposes and was aware that the easement deduction would be limited to Hawks Bluff's adjusted basis if the property was inventory in Hawks Bluff's hands immediately before the contribution. The characterization of the easement property as inventory was discussed in the PPM, and Glade Creek's tax attorney, Mr. Pollock, discussed the issue at a meeting before the easement transaction took place. Glade Creek could have negotiated with Hawks Bluff to have it report the easement property as investment property. While a taxpayer's labels are not determinative for tax purposes, because the parties failed to attach labels in the organizational documents the only evidence in the record that objectively establishes how Hawks Bluff characterized the easement property is its 2012 return.

[12] The Eleventh Circuit recognizes an exception to this principle that allows taxpayers to challenge the tax consequences of the chosen form only if they prove the existence of mistake, undue influence, fraud, duress, etc. *Bradley*, 730 F.2d at 720 (citing *Spector v. Commissioner*, 641 F.2d 376, 382 (5th Cir. Unit A Apr. 1981), *rev'g* 71 T.C. 1017 (1979)).

[my comment: see part II.G.33 Taxpayer Disavowing Form, which uses language that is not as stingy to the taxpayer as that shown above; however, the authority shown there would not have helped this taxpayer.\

Petitioner has failed to present any evidence that ILC or Hawks Bluff treated the easement property as investment property in its books and records.[13] It produced Mr. Vincent as a witness but failed to elicit testimony that ILC or Hawks Bluff held the easement property for investment purposes. In the light of section 724(b) and its purpose, we place great weight on Hawks Bluff's reporting of the easement property as inventory. Statements on a return are not conclusive, however, and we examine whether the facts otherwise support a finding that the easement property was a capital asset. *Suburban Realty*, 615 F.2d at 181.

[13] Petitioner has not requested that we reopen the record. Both parties addressed the section 170(e) issue in their posttrial briefs, and petitioner had the opportunity to present evidence at trial. Accordingly, we see no need to reopen the record. Whether to reopen the record on remand is "left to the sound discretion of the trial court." *Cambridge Univ. Press v. Albert*, 906 F.3d 1290, 1302 (11th Cir. 2018) (quoting *Jones & Laughlin Steel Corp. v. Pfeifer*, 462 U.S. 523, 551 (1983)).

III. Factor Test

A. Purpose for Holding Property

The Eleventh Circuit recognizes that a taxpayer's purpose for holding property can change over time and has indicated that the purpose at the time of sale is not determinative. *Boree v. Commissioner*, 837 F.3d at 1101 ("[T]he Fifth Circuit rejected the notion that `the decisive question is the purpose for which (the property) "primarily" was held when sold.'" (quoting *Suburban Realty*, 615 F.2d at 182)).[14] It has instructed that "a proper analysis of a taxpayer's primary purpose in holding property should take into account a reasonable period of time prior to the sale." *Id*.; see *Sanders*, 740 F.2d at 889 (considering years leading up to the sale and holding that the sale profit was ordinary income);[15] *Suburban Realty*, 615 F.2d at 183-84 (stating that the inquiry may consider "purpose over the entire course of his ownership...[and] should start at the time the property is acquired").

[14] We have stated that generally the purpose at the time of sale is determinative, but we consider earlier events to decide the purpose at the time of sale. *Cottle v. Commissioner*, 89 T.C. 467, 487 (1987).

[15] In *Boree v. Commissioner*, 837 F.3d at 1101, the Eleventh Circuit found that consistent with *Suburban Realty* "[t]he *Sanders* court also analyzed the taxpayer's activities over multiple years" leading up to the sale.

Petitioner argues that Hawks Bluff was organized to hold the easement property as an investment. It further argues that we should also consider ILC's purpose for holding the easement property while respondent focuses primarily on Hawks Bluff's holding purpose. Petitioner argues that ILC treated the easement property as investment property from the time of its acquisition or, alternatively, the easement property converted to investment property in 2009 when ILC abandoned the development project.

The first inquiry according to the Eleventh Circuit in Boree is whether Hawks Bluff was in a trade or business as a real estate dealer. Hawks Bluff reported that its business was real estate dealer on its 2012 return even though its sales had been minimal since its organization. It continued its efforts to sell lots on tract I after the easement transaction. “The taxpayer’s claim to capital gain treatment is likely to be weaker if he can point to no other business activities....” *Suburban Realty*, 615 F.2d at 179 n.24; see *Boree v. Commissioner*, 837 F.3d at 1105 (finding that taxpayer engaged in no other income-producing activity although it had no sales during years at issue). Petitioner argues that Hawks Bluff was organized to hold the ILC property for investment purposes but failed to address Hawks Bluff’s reporting that it was a dealer. Mr. Vincent did not testify that Hawks Bluff held the easement property for investment. Nor did he contest Hawks Bluff’s reporting that it was in the real estate business. He blamed the lack of sales on the economy and lack of marketing, likely because it served petitioner’s argument that residential development of the easement property was economically feasible on the easement date. As explained further below, Hawks Bluff was not organized to hold the ILC property as an investment. Accordingly, we find that it was a real estate dealer.

Petitioner argues that a real estate dealer may hold real estate for investment purposes. See *Pritchett*, 63 T.C. at 163. We find that Hawks Bluff was a real estate dealer. See *Sugar Land Ranch Dev., LLC v. Commissioner*, T.C. Memo. 2018-21 (finding that tax return statements on business activity were not conclusive because they may have been inadvertently carried over from earlier returns). When a real estate dealer holds both inventory and investment property, it must segregate investment property from its inventory. *Pritchett*, 63 T.C. at 163. The Eleventh Circuit places the burden on the taxpayer to establish that it segregated the real estate purportedly held as an investment from its inventory. *Boree v. Commissioner*, 837 F.3d at 1104. The Court of Appeals has stated that “[t]he mere lack of development activity with respect to parts of a large property does not sufficiently separate those parts from the whole to meet the taxpayer’s burden.” *Id*. (quoting *Suburban Realty*, 615 F.2d at 185). Our caselaw considers whether the taxpayer treated the property at issue differently from its other property, made improvements or subdivided the property, held the property out for sale or advertised it, and solicited the offer that led to the sale at issue. *Pritchett*, 63 T.C. at 16468; *Wray*, T.C. Memo. 1978-488. We have stated that holding title to real property in a different name or entity does not conclusively establish segregation but is a factor to consider. *Pritchett*, 63 T.C. at 164; *Paullus v. Commissioner*, T.C. Memo. 1996-419.

1. Hawks Bluff’s Purpose

On remand, petitioner argues that Hawks Bluff was organized as part of a plan to cease development, marketing, and sale activities and to develop a plan for long-term investment of all three tracts. It states that Hawks Bluff was organized in April 2010 after Mr. Vincent, Mr. Tague, and Mr. Toscano “devise[d] a new plan [for] developing a long-term investment plan for the property” and “solidified the ILC’s members’ intent in holding the property as investment property.”

Petitioner has not offered any evidence that Hawks Bluff was organized for the purpose of holding real estate for investment purposes. Its argument is speculative, not supported by the record, and contradicts Mr. Vincent’s testimony. Its argument on remand contradicts its proposed findings of fact in its posttrial briefs where it stated:

> The property was transferred to Hawks Bluff because Mr. Vincent and Mr. Teague [sic] had invested vast sums of money to fund the utilities, roads, water and infrastructure for the property. Transferring the property to Hawks Bluff provided Mr. Teague [sic] and Mr. Vincent a controlling interest over the ILC Property. This was also done to help reassure the bank, which had significant money invested in the property through loans to Mr. Vincent.

(Citations omitted.)

Mr. Vincent testified that Hawks Bluff was organized and the ILC property was transferred to it to “help reassure the bank” that funded the infrastructure loans. We do not understand this testimony to mean that Hawks Bluff was formed to hold the property for investment purposes. By petitioner’s own admission, a fundamental part of the plan was to give Mr. Vincent an ownership interest in the ILC property.

Significantly, Mr. Vincent did not testify that Hawks Bluff was organized with the intent to hold the ILC property for long-term investment. Notably, petitioner has failed to produce any evidence relating to the infrastructure loans and how ILC or Hawks Bluff represented that it held the ILC property to secure financing. We find that Hawks Bluff was organized to take over a failing real estate development with Mr. Vincent as a part owner, find a solution for the ongoing financial problems, and continue to sell the lots to customers in the ordinary course of business.

Furthermore, the evidence shows that Mr. Vincent and Mr. Tague did not want to relinquish ownership of any part of the ILC property or to do anything that might negatively affect the master-planned community for the ILC property after Hawks Bluff acquired it from ILC. They wanted to protect their ownership and the development potential. After Hawks Bluff was organized, Mr. Vincent and Mr. Tague transferred unrelated real estate as partial payment of the unpaid mortgage. Notably, they did not surrender the easement property. The primary reason Mr. Vincent chose the easement transaction was that it solved the debt problems while protecting ILC’s original vision of the vacation home community. After Hawks Bluff found the solution to its debt in the form of the easement donation, it continued its real estate business activities. Hawks Bluff did not passively hold the easement property in the hopes that it could sell it for the highest price to a third party. Under such circumstances it is difficult for us to conclude that Hawks Bluff was organized to hold the ILC property or the easement property for investment.

Petitioner produced Mr. Vincent as a witness and could have elicited testimony from him that Hawks Bluff was organized to acquire and hold the easement property as an investment but failed to do so, perhaps because it was concerned that such testimony would have adversely affected its argument that residential development was economically feasible and the highest and best use of the land. After we had agreed with petitioner that development was feasible, it conveniently changed its position on remand and argues for the first time that residential development was not feasible in 2009 to advance its argument that the easement property was investment property without having presented any evidence at trial to support the infeasibility of development in 2009.

Instead, petitioner cites Mr. Vincent’s testimony that he did not want to develop the easement property alone and did not have the finances to do so after Mr. Toscano and

Mr. Tague stopped making debt payments. However, neither statement means that Hawks Bluff was organized to hold the property for investment or requires a finding that its purpose for holding the property changed to investment As *Suburban Realty*, 615 F.2d at 182, instructs, the fact that the taxpayer is not still actively engaged in the trade or business is not determinative under the statute. “The statutory language does not demand that property actually be sold while a taxpayer is still actively engaged in its trade or business for ordinary income treatment to be required. Rather, it demands that the property have been held primarily for sale in that business.” *Id*. Hawks Bluff was organized as a real estate dealer and held itself out as such. It used the easement transaction to eliminate debt so that it could continue its business. It was actively engaged in that business after the easement transaction.

Petitioner’s argument that Hawks Bluff was organized for investment purposes is speculative and unsupported by the evidence in the record. Objective factors carry more weight than the taxpayer’s subjective statements of intent. See *Guardian Indus. Corp. v. Commissioner*, 97 T.C. 308, 316 (1991), *aff’d*, 21 F.3d 427 (6th Cir. 1994) (unpublished table decision). Accordingly, we place significant weight on Hawks Bluff’s reporting that it was a real estate dealer and held the easement property as inventory. Hawks Bluff’s organizational documents are not in the record. There is no evidence in the record that Hawks Bluff was organized because its members decided to hold the property as investment property or that it treated the ILC property as an investment. It was organized to take over a failing real estate developer to reassure a major lender and continue the residential development business albeit unsuccessfully.

2. ILC’s Purpose

Petitioner argues that ILC acquired and held the easement property as an investment. It argues the three tracts were separate assets and that ILC took specific steps to segregate the easement property from tract I to preserve the investment character of the easement property. It cites the decision not to record the platted lots and the lack of physical improvements on the easement property. To the extent that ILC’s holding purpose is relevant, we find that ILC held the easement property as inventory.

ILC was in the real estate business and acquired the land because it was suitable for development. We find petitioner’s argument that ILC purchased all three tracts for investment to be disingenuous considering the quick turnaround in development. ILC purchased all three tracts in one purchase in January 2006 after engaging Mr. Vincent to evaluate the property for a residential development. In its posttrial brief, petitioner stated:

> The purchase was made after an extensive and thorough investigation of its development potential. Specifically, ILC spent significant time and money to verify the property contained the topography and attributes suitable for a high-end, second-home development. The $9 Million was not spent on a whim. It was spent after an investigation by sophisticated land investors.

Shortly thereafter ILC engaged a licensed engineer to design a concept plan for the development of the three tracts into one master-planned community. The concept plan was completed in April 2006. Then in July 2006 ILC placed restrictive covenants on all three tracts in accordance with the concept plan. These actions are inconsistent with petitioner’s claim that ILC purchased any part of the ILC property to hold as an investment for future appreciation. See *Wray*, T.C. Memo. 1978-488 (finding that taxpayer had not made development decision at time of purchase).

By petitioner's own admission in its proposed findings of fact, ILC expanded substantial amounts of time and money to develop all three tracts. "ILC...expended millions of dollars...preparing Tracts I, II, and III for development as a master-planned community." "By March of 2007, the infrastructure (roads, underground water, electricity, utilities, soil testing, storm water plans) was in place to service all 806 lots depicted in the Concept Plan." "ILC negotiated and entered into a 25-year contract...that provided the ILC property with...enough water to cover all potential development....ILC had to build a pump station [and]...construct a mile of water mains (pipes) to service the pump station....After this process, the ILC property had the infrastructure in place to service all of the proposed 806 lots...." ILC "enjoyed huge success" with tract I sales. To support its valuation, petitioner argued that "ILC invested over $6 Million into the property obtaining approvals for the property, accessing water, utilities, roads and obtaining platted approvals for the Easement Property." On the basis of petitioner's own admissions through its proposed findings of fact, we find that ILC developed the easement property and did not segregate the easement property from tract I as investment property.

Petitioner also proposed a finding of fact that "Tracts II and III were specifically held out as `investment' property for potential future development or sale to a third-party." However, it failed to provide a reference to the record as required by Rule 151, and we have found no support for this proposed finding in the record.[16] ILC's decision to delay infrastructure improvements directly on the easement property was not based on a decision to hold it as investment property. Rather, it made a business decision to develop the ILC property in phases because of financial constraints. Mr. Vincent testified that ILC planned to develop the land in phases because it did not make business sense to develop all 806 lots and place them on the market at one time. Such a business plan does not establish that ILC segregated the easement property and held it for investment purposes especially in the light of the substantial amounts of time and money ILC expended to develop all three tracts.

[16] Rule 151(e)(3) requires that the parties' posttrial briefs contain proposed findings of fact based on the evidence and include references to the pages of the transcript, exhibits, or other sources relied on to support the findings.

Petitioner argues that ILC did not record the platted lots on the easement property because it intended to segregate the easement property and hold it as investment property. Such a position is not supported by the record. Mr. Vincent testified that ILC did not record the lots to avoid a property tax increase. He testified that normally developers would not record lots until roads and amenities were completed because recording can increase property tax. He stated that if lots were recorded the property would be appraised per lot so it is a "terrible mistake" to record the lots too early before the developer is ready to sell them. We do not understand Mr. Vincent's testimony to mean that ILC decided to hold the easement property for investment purposes. We relied on Mr. Vincent's explanation for not recording the platted lots in our decision that residential development was the highest and best use for the easement property. Respondent argued that the lack of recording weighed against that use. We stated that "ILC's decision not to record the platted lots in tracts II and III until it was ready to develop those tracts is irrelevant to their development potential. It did not record the lots to avoid a potential property tax increase." *Glade Creek*, T.C. Memo. 2020-148, at *34.

There is no testimony or other evidence that ILC decided not to record the platted lots because it planned to hold the easement property for investment. Petitioner has not presented any evidence that ILC evaluated the investment potential of the easement property including the expectation of an appreciation in value and the costs of holding the property for investment purposes. Instead, petitioner stated in its posttrial brief that "[t]he property was specifically identified and investigated by ILC in 2006 for its development potential." No witness testified that ILC treated any part of the ILC property as an investment in its books and records when it acquired it or at any time thereafter. Without more, ILC's decision not to record the lots on the easement property does not establish that ILC segregated it from tract I or held it for investment purposes.

Nor has petitioner established that ILC treated any part of the ILC property as an investment in 2009 when petitioner argues ILC abandoned its intent to develop the property because of economic conditions and lack of funding. In 2009 ILC stopped marketing the ILC property and sales decreased sharply. On remand, petitioner argues that residential development was not economically feasible in 2009. However, the character of the property does not change simply because of a change in market conditions. When a company is going out of business, it is still in that business while it winds down. See *Suburban Realty*, 615 F.2d at 182. ILC was a failed real estate developer that held the entire ILC property out for sale to customers in the ordinary course of its business as a master-planned community. ILC continued to hold the ILC property in that business when it transferred its unsold inventory to Hawks Bluff although it may not have been actively engaged in that business.

B. Sales Activities

The Eleventh Circuit has stated that frequency and substantiality of sales is the "most important" factor in determining the character of property. *Boree v. Commissioner*, 837 F.3d at 1100 (quoting *Biedenharn Realty*, 526 F.2d at 416). This is because sales are "highly relevant" to each of the three statutory inquiries for the characterization of property as a capital asset or inventory including whether the taxpayer is engaged in a trade or business and whether it held the property for sale in that business. *Suburban Realty*, 615 F.2d at 178. "[T]he presence of frequent sales ordinarily belies the contention that property is being held `for investment' rather than `for sale.'" *Id*.

As we stated above, most of the seven factors relate to sales activities. There were no lot sales on the easement property. However, the lack of sales on the easement property does not require a finding that the easement property was investment property where other facts establish otherwise. No one factor or combination thereof is controlling. *Biedenharn Realty*, 526 F.2d at 415. ILC's original plan was to develop the property in three phases and to use the cashflow from tract I sales to fund development on the easement property. In view of this plan, we place little weight on the lack of sales on the easement property. ILC did not plan to hold the easement property for investment until lots on tract I were sold out and then make a decision about whether to develop the easement property. It had a concept plan designed for a single master-planned community of the three tracts and completed significant infrastructure to enable development of all three tracts. ILC's intent was to hold the easement property as inventory for development. In the light of Hawks Bluff's reporting, ILC's development activities, and the lack of credible evidence to support petitioner's argument, we find that the lack of sales on the easement property does not require a finding that ILC or Hawks Bluff segregated the easement property and held it for investment.

C. Development Activities

Development activities are relevant to whether a taxpayer is in a real estate business and also to its purpose for holding land. *Suburban Realty*, 615 F.2d at 178-79. Lack of improvements can indicate that the property is not held primarily for sale. *Adam v. Commissioner*, 60 T.C. 996, 1000 (1973); see also *Brown v. Commissioner*, 143 F.2d 468 (5th Cir. 1944) (finding that taxpayer was a real estate dealer as it subdivided the land, installed utilities, built streets and storm sewers, and sold 20 to 30 lots a year); *Gates v. Commissioner*, 52 T.C. 898 (1969) (finding that property was dealer property where taxpayer subdivided lots, installed improvements, and sold home construction building materials); *Conner v. Commissioner*, T.C. Memo. 2018-6 (citing lack of development, finding that the taxpayer was not in the real estate business and was not entitled to business deductions), *aff'd*, 770 F. App'x 1016 (11th Cir. 2019).

On remand petitioner argues that the easement property was never improved or developed although it acknowledges that the easement property "economically benefited from the development" on tract I and that ILC's development activities "increased the likelihood of developing, subdividing, and selling lots" on the easement property. Petitioner relied on ILC's infrastructure and development activities to support its valuation of the easement property. In its posttrial briefs petitioner repeatedly stated that ILC made improvements that benefited all three tracts and added value to the easement property. It asserted that ILC spent $6 million on infrastructure related to the development of all three tracts. It criticized respondent's expert's valuation for failing to take into account the $6 million in improvements made for all 806 lots. It stated that "[a]ll three tracts...had ready-access to water, electricity, utilities, and septic tank capacity. All three tracts had paved road access. Moreover, all three tracts had obtained the required TDEC approvals, and lots were platted on all three tracts." It argued that the paved roads extending to the borders of the easement property provided the easement property with a "valuable amenity." It stated that "ILC successfully completed the steps necessary to transform the ILC Property into a fully-approved and shovel-ready 806-Lot development."

We agreed with petitioner that the highest and best use of the easement property was residential development. We relied on the fact that the easement property had platted lots, a concept plan designed by a licensed engineer, and significant infrastructure work had been completed including upgraded utility and water capacity, soil testing, approvals for septic tanks, sewage, and storm water plans. *Glade Creek*, T.C. Memo. 2020-148, at *34. We found that the easement property had been improved for development and, in this respect, agreed with petitioner. Mr. Vincent testified that ILC's development activities increased the value of the easement property, and we relied on his testimony to support our valuation. We found that Mr. Broome erred by failing to take into account "extensive development work ILC performed on the property," which contributed to the easement property's suitability for residential development. *Id*. at *32. We concluded that "[i]n the light of the improved real estate market and the significant infrastructure work and approvals previously granted, a hypothetical buyer would have reasonably purchased the property for the development of a vacation or residential community." *Id*. at *34.

We also agreed with petitioner that ILC's infrastructure and other development activities increased the fair market value of the easement property. *Id*. at *53. In our decision on the valuation, we stated:

> Mr. Vincent and ILC invested vast amounts of time and money on the development of all three tracts, spending over $6 million. Most infrastructure work took place on tract I. However, ILC had successfully completed numerous steps toward the development of all three tracts. ILC constructed a pumping station and installed upgraded pipelines to service all three tracts, upgraded electrical lines that could service residential developments on all three tracts, paved access roads leading up to tracts II and III, platted lots on the basis of a design by a licensed engineer, completed soil testing, and obtained development approvals for all three tracts. Tracts II and III clearly benefited from ILC's work even though ILC had not yet extended utilities to those tracts. Mr. Broome [respondent's valuation expert] erred by disregarding the value added to the easement property from ILC's infrastructure and approvals.

Id. at *39.

We held that the unencumbered easement property had a fair market value of approximately $9.3 million using a discounted cashflow method and found that value was supported by ILC's purchase price for the easement property and the value added by ILC's infrastructure improvements and development activities. *Id*. at *52; see *Boree v. Commissioner*, 837 F.3d at 1105 (finding that taxpayer's activities "increase[d] the value of lots in future sales"). We stated:

> We also consider ILC's $6 million investment in infrastructure and its work to obtain approvals which benefited all three tracts, including ensuring a water supply, upgrading water and electrical capacity, soil testing, Government approvals, and access roads leading to the easement property. Mr. Vincent credibly testified that ILC performed soil testing on tracts II and III. ILC's infrastructure and approval work clearly increased the fair market value of the easement property....We find it reasonable that the unencumbered easement property would have increased by $2 and $2.5 million on the basis of appreciation and ILC's infrastructure work.

Glade Creek, T.C. Memo. 2020-148, at *53.

The development activities weigh against a finding that ILC segregated the easement property from tract I to hold it for investment purposes. ILC did not treat the easement property as a passive investment. Notably, Hawks Bluff did not undertake any additional development. But we place little weight on this fact because Hawks Bluff was organized to take over ILC's failing real estate business, to give Mr. Vincent an ownership interest, and to appease the bank that financed the infrastructure. Furthermore, ILC had completed the necessary infrastructure to sell the lots on tract I, making further development by Hawks Bluff with respect to those lots unnecessary.

ILC's infrastructure improvements and development activities significantly contributed to the increase in the unencumbered easement property's value over the course of ILC's and Hawks Bluff's ownership. "[C]apital gain treatment will be proper only if the gain emanates from appreciation in value." *Boree v. Commissioner*, 837 F.3d at 1104 (quoting *Suburban R*ealty, 615 F.2d at 186); see *Commissioner v. Gillette Motor Transp., Inc.*, 364 U.S. 130, 134 (1960) (stating that courts should construe capital asset narrowly "in accordance with the purpose of Congress to afford capital-gains treatment only in situations typically involving the realization of appreciation in value accrued over a substantial period of time"); *Jersey Land & Dev. Corp. v. United States*, 539 F.2d 311, 315 (3d Cir. 1976) (holding property to be dealer property where the gain resulted from substantial improvements made to the property by the taxpayer as opposed to long-term market appreciation). But even an increase in land value attributable more to market appreciation than to improvements does not automatically mean that the land is a capital asset, and profit from appreciation may be treated as ordinary income. *Boree v. Commissioner*, 837 F.3d at 1104.

Petitioner did not provide any expert testimony or other evidence as to the appreciation of the land over the six years of ILC's and Hawks Bluff's ownership from 2006 through 2012 in the absence of the infrastructure improvements. Instead, it argued the opposite. It argued that the real estate market was distressed beginning in 2008 but began to recover by December 2012.[17] *Glade Creek*, T.C. Memo. 2020-148, at *6, *38. It repeatedly faulted Mr. Broome's comparable sales analysis for using sales that occurred on average four years before the easement date during what petitioner called the "trough" of the recession. Petitioner has not established that the amount of the increased value of the easement property was from appreciation in the absence of the infrastructure improvements.

[17] Mr. Clark testified that a hypothetical residential development would have a seven-year absorption period for lot sales beginning in 2012 and that unsold lots would appreciate 3% to 4% annually.

IV. Conclusion

On the basis of the totality of the facts and circumstances, we find that ILC and Hawks Bluff did not segregate the easement property from tract I in a manner sufficient to meet petitioner's burden to show that the easement property was investment property. Petitioner has not presented any evidence to substantiate its argument that Hawks Bluff was organized to hold the easement property or to dispute Hawks Bluff's reporting that it held the property as inventory. ILC held the easement property as inventory and did not segregate it from tract I Petitioner's. position on remand that ILC did not develop the easement property is inconsistent with our findings of fact and petitioner's own posttrial brief. Petitioner relies on speculation that is unsupported by the record. We place significant weight on the only evidence in the record of how Hawks Bluff or ILC characterized the easement property, Hawks Bluff's 2012 return. Accordingly, Glade Creek's easement deduction is limited to the adjusted basis pursuant to sections 724(b) and 170(e).

The Syllabus of *Mill Rd. 36 Henry, LLC v. Commissioner*, T.C. Memo. 2023-129 summarized:

MRP, an LLC organized by real estate professionals and investors to buy and sell land, acquired 117 acres of undeveloped suburban land along a county road for $1.25 million (about $10,700 per acre) in December 2014. BI, an entity owned by another real estate professional, thereafter acquired from MRP a 25% undivided interest in these parcels for $315,000. MRP and BI then partitioned 40 acres of the eastern tract to create a new tract ("Tract"). MRP and BI then contributed Tract to MR36, a TEFRA partnership. MR36's only asset was Tract. MRP then sold the remainder of the 117 acres to two other entities.

In September 2016 an investment fund, IF, acquired a 97% ownership interest in MR36 for $1 million (equivalent to about $25,800 per acre). Under the control of IF, MR36

> donated by deed in December 2016 a perpetual conservation easement (constituting a "qualified real property interest" under I.R.C. § 170(h)(1)(A)) on 33 acres of Tract to SCT (a "qualified organization" under I.R.C. § 170(h)(1)(B)) for "conservation purposes" under I.R.C. § 170(h)(1)(C). Relying on a professional appraisal, MR36 claimed a charitable contribution deduction of $8,935,000 (about $270,800 for each of the 33 acres) for a "qualified conservation contribution" under I.R.C. § 170(h) on its tax return.
>
> R examined MR36's return and issued a Notice of Final Partnership Administrative Adjustment ("FPAA") determining to disallow the charitable contribution deduction. MR36's TMP filed a petition in this Court challenging the FPAA.
>
> *Held*: MR36 made a qualified conservation contribution under I.R.C. § 170(h) and attached to its return a qualified appraisal by a qualified appraiser under I.R.C. § 170(f)(11) and Treas. Reg. § 1.170A-13(c)(3).
>
> *Held, further*, the value of the easement granted on Tract is $900,000 (about $27,300 per acre) - the amount conceded by R.
>
> *Held, further*, because Tract had been inventory held for sale to customers in the ordinary course of business by MRP and BI—the partners who contributed it to MR36—the amount of MR36's deduction is limited under I.R.C. § 170(e)(1)(A) to its adjusted basis in Tract, $416,563.
>
> *Held, further*, the I.R.C. § 6663 fraud penalty is not applicable to MR36, but the I.R.C. § 6662(h) gross valuation misstatement penalty is applicable. To the extent the deduction is disallowed not because of valuation but because of the basis limitation of I.R.C. § 170(e)(1)(A), the penalty for a substantial understatement of income tax under I.R.C. § 6662(b)(2) applies, or, in the alternative, the penalty for negligence under I.R.C. § 6662(b)(1) applies.

In the part titled, "B. The Mill Road Tract as inventory," the court reasoned and held:

> The Eleventh Circuit - the appellate venue in *Glade Creek* and presumptively in this case as well - uses the following inquiries to determine whether a taxpayer holds property for sale in the ordinary course of business or as an investment: (1) whether the taxpayer was engaged in a trade or business, and if so, what business; (2) whether the taxpayer was holding the property primarily for sale in that business; and (3) whether the sales contemplated by the taxpayer were "ordinary" in the course of that business.[34] *Sanders v. United States*, 740 F.2d 886, 888-89 (11th Cir. 1984) (citing *Suburban Realty Co. v. United States*, 615 F.2d 171, 178 (5th Cir. 1980)). Mill Road Partners and Benwood Investments were the two partners who contributed the Mill Road Tract to Mill Road 36. Both entities were previously and subsequently engaged in the business of buying and selling real estate; they acquired the 117-acre parent tract that included the Mill Road Tract pursuant to their real estate business; and they contributed 40 acres of it - the Mill Road Tract - to Mill Road 36 in furtherance of their real estate business. And as we found above at page 10, after Mill Road Partners contributed 40 of the 117 acres to Mill Road 36, Mill Road Partners used the remaining acres in the ordinary course of their real estate business by selling the other parcels to Evergreen Management Group and 49 Mill Road Henry, LLC.

[34] To resolve these three inquiries, the Eleventh Circuit consults seven relevant factors:

> (1) the nature and purpose of the acquisition of the property and the duration of the ownership; (2) the extent and nature of the taxpayer's efforts to sell the property; (3) the number, extent, continuity, and substantiality of the sales; (4) the extent of subdividing, developing, and advertising to increase sales; (5) the use of a business office for the sale of the property; (6) the character and degree of supervision or control exercised by the taxpayer over any representative selling the property; and (7) the time and effort the taxpayer habitually devoted to the sales.

United States v. Winthrop, 417 F.2d 905, 910 (5th Cir. 1969). We need not analyze in detail each of these factors here because it is evident from the testimony of Mr. Grant that he himself, Benwood Investments, Ms. Meng, and Mr. Wang all worked together in the business of buying and selling land, and that the Mill Road Tract was both acquired and sold within the ordinary course of their real estate business operated through Mill Road 36.

The fact that 97% ownership of Mill Road 36 was then sold to MR36 Investments (after the Mill Road Tract was contributed to Mill Road 36 and before Mill Road 36 made the easement donation) does not change the fact that the Mill Road Tract was contributed to Mill Road 36 by partners (Mill Road Partners and Benwood Investments) who were real estate professionals within five years of donating the conservation easement and claiming the charitable contribution deduction.

Accordingly, pursuant to section 724(b), any proceeds from the sale of the Mill Road Tract would have been ordinary income to Mill Road 36 at the time the conservation easement was donated; and the amount of the deduction that was generated by the charitable contribution that was made (instead of a sale) is limited, by operation of section 170(e)(1)(A), to Mill Road 36's basis in the Mill Road Tract. It is undisputed that Mill Road 36's basis in the Mill Road Tract at the time of the conservation easement donation was $416,563, as it reported on its Form 8283. Mill Road 36 is therefore entitled to a charitable contribution deduction not of the almost $9 million amount it claimed on its return, nor the $6.7 million value for which it contended at trial, nor even the $900,000 value we find for the easement, but its basis of $416,563.

Tucker and Langlieb, "Tax Planning for Real Estate Ownership (With a Focus on Choice of Entity)," *TM Real Estate Journal*, January 5, 2011, Vol. 27 No. 01., point out:

> The "dealer" in real estate will encounter difficulties in segregating investment real estate from real estate held for sale. *See, e.g., Tibbals v. U.S.*, 362 F.2d 266 (Ct. Cl. 1966), and *Black v. Comr.*, 45 B.T.A. 204 (1941). *But see Cary v. Comr.*, 32 T.C.M. 913 (1973), *Adam v. Comr.*, 60 T.C. 996 (1973), and *Ridgewood Land Co. Inc. v. Comr.*, 31 T.C.M. 39 (1972), *aff'd* 477 F.2d 135 (5th Cir. 1973).

However, *Gardner v. Commissioner*, T.C. Memo. 2011-137, allowed a dealer to obtain capital gain treatment when he persuaded the Tax Court judge that he intended to hold the property and rent it. The property had been subdivided, but he had to build a road on it to give interior properties access to the nearby street. Note, however, that the taxpayer had to litigate the issue. *Pool v. Commissioner*, T.C. Memo. 2014-3, held:

> This Court and the Court of Appeals for the Ninth Circuit have identified several relevant factors for evaluating whether a taxpayer held certain properties primarily for sale to customers in the ordinary course of business. Such factors include: (1) the nature of the acquisition of the property; (2) the frequency and continuity of sales over an extended period; (3) the nature and the extent of the taxpayer's business, (4) the activity of the seller about the property; and (5) the extent and substantiality of the transactions. *Id.* at 462; *see Pritchett v. Commissioner*, 63 T.C. 149, 162-163 (1974). We must decide each case upon its particular facts, and the presence of any one or more of these factors may or may not be determinative of a particular case. *Austin v. Commissioner*, 263 F.2d at 462.

Fargo v. Commissioner, T.C. Memo. 2015-96 held:

> Whether a taxpayer held specified property primarily for sale to customers in the ordinary course of business is a question of fact. *Rockwell v. Commissioner*, 512 F.2d 882, 884 (9th Cir. 1975), *aff'g* T.C. Memo. 1972-133. The term "primarily" for purposes of section 1221(a)(1) means "of first importance" or "principally". See *Malat v. Riddell*, 383 U.S. 569, 572 (1966). This Court has identified several factors for evaluating whether a taxpayer held certain properties primarily for sale to customers in the ordinary course of business, including: (1) the purpose for which the property was initially acquired; (2) the purpose for which the property was subsequently held; (3) the extent to which improvements, if any, were made to the property by the taxpayer; (4) the frequency, number, and continuity of sales; (5) the extent and nature of the transactions involved; (6) the ordinary business of the taxpayer; (7) the extent of advertising, promotion, or other active efforts used in soliciting buyers for the sale of the property; (8) the listing of property with brokers; and (9) the purpose for which the property was held at the time of sale. *Maddux Constr. Co. v. Commissioner*, 54 T.C. 1278, 1284 (1970). We must decide each case upon its particular facts, and the presence of any one or more of these factors may or may not be determinative of a particular case. *Redwood Empire Sav. & Loan Ass'n v. Commissioner*, 628 F.2d 516, 517 (9th Cir. 1980), *aff'g* 68 T.C. 960 (1977).

Musselwhite v. Commissioner, T.C. Memo. 2022-57, looking to 4th Circuit cases, mentioned similar standards and discussed their weight:

> However, no one factor or group of factors is determinative, *id*., and not all factors may be relevant in a particular case or factors may have varying degrees of relevance depending on the facts of a particular case, *S&H, Inc. v. Commissioner*, 78 T.C. 234, 243–44 (1982). Additionally, objective factors carry more weight than the taxpayer's subjective statements of intent. See *Guardian Indus. Corp. v. Commissioner*, 97 T.C. 308, 316 (1991), *aff'd without published opinion*, 21 F.3d 427 (6th Cir. 1994).

For more cases, see ¶ I-6313, Income from real estate sales relative to other income as a factor in determining whether a taxpayer is a dealer in real estate, *Federal Tax Coordinator 2d*. See also Bittker, ¶ 31.04[6] Special Rules Relating to Real Estate, *McMahon & Zelenak: Federal Income Taxation of Individuals* (WG&L), describing when sales of real estate generate capital gain or ordinary income, including references to Code §§ 1221(a)(2), 1231, 1237 (certain activities not considered development that converts property to inventory), 1239, and 1250.

When real estate is used in a business, see part II.G.6 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business; within that part, if property is bought for use in a trade or business but in never placed in service, see text accompanying fns. 1484-1485.

Although a "taxpayer may hold some property for sale in the ordinary course of business and some for investment," "the burden is on the taxpayer to establish that the parcels held primarily for investment were segregated from other properties held primarily for sale. The mere lack of development activity with respect to parts of a large property does not sufficiently separate those parts from the whole to meet the taxpayer's burden."[1909] Thus, when a taxpayer starts developing a tract of real estate and sells some property in a different manner than originally intended, the taxpayer must prove that the portion sold is not held for development the way that the rest of the real estate is.[1910] However, if the taxpayer can show why the taxpayer for several years had stopped developing the property and then sold it to another developer, which other developer engaged in its own efforts to develop and sell the property, the taxpayer was not a developer with respect to that property.[1911] In the latter case, the court was so convinced by the

---

[1909] *Boree v. Commissioner*, 118 A.F.T.R.2d 2016-5742 (11th Cir. 9/12/2016), citing:

> *Suburban Realty Co.,* 615 F.2d at 185. Whether a taxpayer segregated property for investment as opposed to inventory purposes would appear to be a question of fact, just as is the taxpayer's overall primary purpose for holding the property. *See id.* at *180-81* ("[T]he question of taxpayer's purpose or purposes for holding the property is primarily factual, as is the question of which purpose predominates.").

[1910] *Boree v. Commissioner*, 118 A.F.T.R.2d 2016-5742 (11th Cir. 9/12/2016). However, in *Sugar Land Ranch Development, LLC v. Commissioner*, T.C. Memo. 2018-21, the taxpayer did prove different conduct:

> Respondent seems to suggest that we should impute to SLRD development activity which he says was performed on the eastern parcels by related parties. Respondent has not pointed us to legal authority or any evidence in support of this position. The caselaw appears to be to the contrary. See *Bramblett v. Commissioner*, 960 F.2d at 533-534 (rejecting argument that activities of corporation in selling and developing land should be attributed to partnership whose partners held ownership interests in the corporation); *Phelan v. Commissioner*, T.C. Memo. 2004-206 (similar). But even if we were to assume for the sake of argument that SLRD had substantial development activity on, or active and continuous sales from, the eastern parcels (by imputation or otherwise), nevertheless - in the absence of a connection between the eastern parcels and the TM parcels - we are not persuaded that the bulk sale of the TM parcels would have been in the ordinary course of SLRD's alleged development business, considering that all development activity had been halted on the TM parcels at least three years before the sales at issue and that the TM parcels were never developed into a subdivision by SLRD. As the Court of Appeals for the Fifth Circuit noted in *Suburban Realty*, 615 F.2d at 179 n.24, "if a taxpayer who engaged in a high volume subdivision business sold one clearly segregated tract in bulk, he might well prevail in his claim to capital gain treatment on the segregated tract." That is precisely what happened here. The TM parcels were clearly segregated from the other parcels by the levee and HLP easement and were sold in bulk to a single buyer.

[1911] *Sugar Land Ranch Development, LLC v. Commissioner*, T.C. Memo. 2018-21, held:

> The parties agree that SLRD was formed to engage in real estate development - specifically, to acquire the property and develop it into single-family residential building lots and commercial tracts. The record supports this conclusion: SLRD's tax returns, the development agreement, SLRD's formation documents, and the testimony of Messrs. Johnson and Wong all clearly show that SLRD originally intended to be in the business of selling residential and commercial lots to customers.
>
> But the evidence also clearly shows that in 2008 SLRD ceased to hold its property primarily for sale in that business and began to hold it only for investment. SLRD's partners decided not to develop the property any further, and they decided not to sell lots from those parcels. This

taxpayer's actual conduct that it decided to ignore the taxpayer's admission on its tax return that it was a developer.[1912]

Part II.I.8.c.iii Rental as a Trade or Business includes a detailed excerpt from the preamble promulgating the regulations governing net investment income tax.

II.G.26.b. Real Estate as a Trade or Business

This part II.G.26.b was inspired by Werlhof, "Significance of Trade or Business Status for Rental Real Estate," *Journal of Taxation* (9/2019), saved as Thompson Coburn LLP doc. no. 7394778.

Whether a real activity is a trade or business is important in parts:

- II.E.1.e Whether Real Estate Qualifies as a Trade or Business, which generally explores the issue of whether real estate constitutes a business for purposes of the Code § 199A deduction based on qualified business income. See generally part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.

- II.G.20.a Code § 163(j) Limitation on Deducting Business Interest Expense, limiting interest deductions allocable to a trade or business but also providing special rules for real estate businesses, although those special rules have exceptions that may make the protection difficult to procure.

- II.K.1.e Rental Activities, describing how whether real estate is a trade or business can determine whether one can avoid the Code § 469 passive loss limitations, which are also

---

conclusion is supported by the highly credible testimony of Messrs. Johnson and Wong and by the 2008 unanimous consent and the 2009 member resolution. In fact, from 2008 on SLRD did not develop or sell lots from those parcels (and the evidence does not suggest that SLRD ever sold even a single residential or commercial lot to a customer at any point in its existence). Respondent concedes that SLRD never subdivided the property.

More particularly, when the TM parcels were sold, they were not sold in the ordinary course of SLRD's business: SLRD did not market the parcels by advertising or other promotional activities . SLRD did not solicit purchasers for the TM parcels, nor does any evidence suggest that SLRD's managers or members devoted any time or effort to selling the property; Taylor Morrison approached SLRD. Most importantly, sale of the TM parcels was essentially a bulk sale of a single, large, and contiguous tract of land (which was clearly separated from any other properties by the HLP easement and the levee) to a single seller - clearly not a frequent occurrence in SLRD's ordinary business.

Because the Taylor Morrison parcels were held for investment and were not sold as part of the ordinary course of SLRD's business, we hold that net gains from the sales of TM-2 and TM-3 were capital in character.

[1912] *Sugar Land Ranch Development, LLC v. Commissioner*, T.C. Memo. 2018-21, held

Next, respondent points out that on its 2012 Form 1065 SLRD listed its principal business activity as "Development" and its principal product or service as "Real Estate". Although this circumstance may count against petitioners to some limited degree, we believe that these statements "are by no means conclusive of the issue." See *Suburban Realty*, 615 F.2d at 181. Considering the record as a whole, we are inclined to believe that these stock descriptions were inadvertently carried over from earlier returns.

Note also that one can be a developer with respect to some property but not with respect to other property. In *Sugar Land*, the IRS pointed out that the taxpayer appeared to have been developing other land, which the court said did not seem to be the case, but the court said was irrelevant with respect to the sold property.

important in trying to avoid the 3.8% tax on net investment income, for which real estate special rules are in part II.I.8.c Application of 3.8% Tax to Rental Income. See generally parts II.K Passive Loss Rules and II.I 3.8% Tax on Excess Net Investment Income (NII).

- III.B.5.e.ii.(a) What is a Business?, describing what is a business that can qualify for a deferral of estate taxes under Code § 6166. See generally part III.B.5.e.ii Code § 6166 Deferral.

- II.G.6.a Code § 1231 Property, which provides ordinary losses or capital gain on the sale of property used in a trade or business. However, if ordinary losses have been deducted under Code § 1231, future gains are ordinary income until the ordinary losses are recaptured. Thus, real estate being a trade or business is good for loss purposes but might be bad for gain purposes. Contrast the above to the sale of real estate that is not a trade or business, which is always a capital gain or loss. But that's not the whole story. When depreciation recapture is taxed at capital gain rates, it is taxed at 25%.[1913] When any gain is taxed as ordinary income as Code § 1231 loss recapture, it may constitute qualified business income that may generate a 20% Code § 199A deduction.[1914]

- II.G.4.l.ii Net Operating Loss Deduction (Code § 172) provides a benefit for business losses.[1915]

- II.P.3.b.iii Excess Passive Investment Income, explaining whether real estate is considered passive for purposes of determining whether an S corporation has so much passive investment income as to be hit with a supplemental tax or even lose its S election. (However, real estate does not necessarily have to be a trade or business to avoid being "passive" for that test.)

Whether real estate qualifies as a trade or business is described in parts:

- II.I.8.c.iii Rental as a Trade or Business, which is the main place where various cases are discussed.

- II.E.1.e.i.(a) Whether Real Estate Activity Constitutes A Trade Or Business, which describes the issue in the context of the Code § 199A deduction based on qualifies business income. Although that part focuses on Code § 199A, it seems to be the best source for trying to understand the IRS' views, because tax advisors complained a lot about uncertainty in this area, and the IRS promulgated a safe harbor (which isn't very helpful).

Whether any other activity qualifies as a trade or business is described in part II.G.4.l.i Trade or Business; Limitations on Deductions Attributable to Activities Not Engaged in for Profit.

Interest expense from rental real estate activity has special status. If rental is a trade or business, the interest is fully deductible, subject to the limitations described in parts II.G.20.a Code § 163(j) Limitation on Deducting Business Interest Expense, II.K Passive Loss Rules, II.G.4.c Basis Limitations for Deducting Partnership and S Corporation Losses, and II.G.4.j At Risk Rules. If rental is not from a trade or business, the same limits apply (other

[1913] Code §§ 1(h)(1)(E), 1(h)(6).
[1914] See discussion in preambles reproduced in part II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A.
[1915] See fn 1405 in part II.G.4.l.ii Net Operating Loss Deduction (Code § 172).

than part II.G.20.a), and the interest expense is deducted directly against the rental income,[1916] on Schedule E, part I (if conducted directly by an individual or married couple) or Form 8825 (if conducted by a partnership or an S corporation). If one borrows to buy an interest in a partnership or an S corporation, the debt is allocated among the entity's assets and interest expense treated according to how those assets are deployed.[1917]

II.G.26.c. Future Development of Real Estate

Gain[1918] on the sale of real estate is taxed as:

- Capital gain, to the extent it is held for investment,
- Ordinary income, if the seller is a dealer or subdivided the property, or
- Capital gain, to the extent it was used in the business and is not described above.

A taxpayer who holds real estate for investment (and is not a dealer) but then decides to develop it should, before preparing development plans,[1919] consider selling it to the taxpayer's wholly-owned S corporation to lock in capital gain treatment on the pre-development appreciation;[1920] however, any S corporation that holds real estate should have that (together with any ancillary cash) as its only property.[1921] A sale to a controlled partnership would be taxed as ordinary income, because the partnership's plan to act as a developer would taint the transaction.[1922] Although generally a corporation (whether S or C) is a poor choice to hold real

---

[1916] See Code §§ 469(c)(2) (rental is a passive activity except for certain taxpayers carrying on a real; estate business), 163(d)(3)(B)(ii) (Code § 469 interest is not subject to the investment interest limitations of Code § 163(d)) (Code § 163(d)(3) is reproduced in fn 2295 in part II.I.6 Deductions Against NII), 163(h)(2)(C) (Code § 469 interest is not nondeductible personal interest under Code § 163(h)), 212(1) (deduction for expenses incurred "for the production or collection of income"), and 62(a)(4) (Code § 212 expenses, which are attributable to property held for the production of rents or royalties, are deductible above-the-line instead of being itemized deductions).

[1917] See fn 6112 in part III.A.3.e.vi.(a) Grantor Trust Issues Involved in a Sale of S Stock to a QSST.

[1918] For an excellent overview of expenditures that affect the adjusted basis of real estate, see Tucker and Langlieb, "Tax Planning for Real Estate Ownership (With a Focus on Choice of Entity)," *TM Real Estate Journal*, January 5, 2011, Vol. 27 No. 01.

[1919] Once the taxpayer makes plans to develop, the taxpayer might face an uphill battle in proving otherwise. See *Fargo v. Commissioner*, T.C. Memo. 2015-96.

[1920] Eustice & Kuntz, ¶2.04. Situations in Which Subchapter S Is (or Is Not) Useful - ¶ 2.04[8] Real Estate Developed for Sale, *Federal Income Taxation of S corporations* (WG&L). However, they point out that, in *Little v. Commissioner*, T.C. Memo. 1993-281, *aff'd* 106 F.3d 1445 (9th Cir. 1997), the taxpayer argued unsuccessfully that he held investment property while his S corporation held dealer property. The *Little* case involved a taxpayer who already was a dealer in real estate, so a taxpayer who clearly is not already a dealer should be able to distinguish the case. That case would tend to cause more problems when a taxpayer holds a number of real estate properties and sells to a thinly capitalized S corporation.

[1921] To maximize basis step-up possibilities, each separate real estate property should be held in its own S corporation. See part II.H.8.a Depreciable Real Estate in an S Corporation. Dividing on a tax-free basis corporations that hold real estate can be challenging. See part II.Q.7.f Corporate Division.

[1922] McKee, Nelson & Whitmire, ¶14.04. Special Rules for Transactions Between Partnerships and Partners or Related Persons, *Federal Taxation of Partnerships & Partners* (WG&L), interpreting Code § 707(b)(2)(A). For a description of Code § 707(b), see part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

estate, this property is intended to be developed and sold quickly, so it really will just turn into an corporation holding cash, which can then be liquidated if an S corporation.[1923]

The sale of the investment property might be using an installment note to defer capital gain until the real estate is sold.[1924]

II.G.27. Importance of Keeping Depreciable or Amortizable Property Outside of a Corporation; Strategy for Related Party Sales

See part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation.

Also, when an S corporation sells depreciable property to a related party, which sale may include a liquidating distribution, the sale may trigger ordinary income tax for the entire gain – not just depreciation recapture.[1925] However, if it sells a partnership interest, the ordinary income portion is limited to depreciation recapture.[1926] The partnership should not be formed too close to the sale.[1927] For strategies to place corporate assets into a partnership, see part II.Q.7.h Distributing Assets; Drop-Down into Partnership.

Partnerships are subject to similar rules when selling to a related party; see part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships. However, often distributions from partnerships will not constitute a sale; see part II.Q.8.b Partnership Redemption or Other Distribution.

Whether a corporation or a partnership, an entity that wants to sell to a related party might instead consider forming a preferred partnership with that related party; see part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion. After waiting long enough (perhaps two but more likely seven years),[1928] the parties may decide to redeem the original transferor's retained interest; see part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.

[1923] For the recommendation to liquidate, see part II.F.2 Asset Protection Benefits of Dissolving the Business Entity After Asset Sale.

[1924] The gain would be accelerated when the real estate is sold. Code § 453(e).

[1925] See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill).

[1926] See part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

[1927] See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), especially text accompanying fns. 5087-5094.

[1928] The parties should wait at least two years to avoid the disguised sale rules; see part II.M.3.e Exception: Disguised Sale. However, seven years is probably needed; see part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

II.G.28. Avoid Securing Loans with an Account Holding Muni Bonds

Code § 265(a)(2) disallows deductions for interest "on indebtedness incurred or continued to purchase or carry obligations the interest on which is wholly exempt from the taxes imposed by this subtitle."[1929]

"Direct evidence of a purpose to *purchase* tax-exempt obligations exists where the proceeds of indebtedness are used for, and are directly traceable to, the purchase of tax-exempt obligations."[1930]

"Direct evidence of a purpose to *carry* tax-exempt obligations exists where tax-exempt obligations are used as collateral for indebtedness."[1931] Even where tax-exempt obligations are not used as collateral for indebtedness, they might taint loans for other purposes[1932] except where the loans are fully secured by other property.[1933]

[1929] Reg. § 1.265-1(a)(1) provides:

> No amount shall be allowed as a deduction under any provision of the Code for any expense or amount which is otherwise allowable as a deduction and which is allocable to a class or classes of exempt income other than a class or classes of exempt interest income.

Reg. § 1.265-2(a) elaborates:

> No amount shall be allowed as a deduction for interest on any indebtedness incurred or continued to purchase or carry obligations, the interest on which is wholly exempt from tax under subtitle A of the Code, such as municipal bonds….

[1930] Rev. Proc. 72-18, § 3.02 (emphasis in original), which cited and then elaborated:

> *Wynn v. United States*, 411 F.2d 614 (1969), certiorari denied 396 U.S. 1008 (1970). Section 265(2) does not apply, however, where proceeds of a bona fide business indebtedness are temporarily invested in tax-exempt obligations under circumstances similar to those set forth in Revenue Ruling 55-389, C.B. 1955-1, 276.

[1931] Rev. Proc. 72-18, § 3.03 (emphasis in original), which cited and then elaborated:

> "[O]ne who borrows to buy tax-exempts and one who borrows against tax-exempts already owned are in virtually the same economic position. Section 265(2) makes no distinction between them." *Wisconsin Cheeseman v. United States*, 338 F.2d 420, at 422 (1968).

[1932] Rev. Proc. 72-18, § 4.04 provides this example:

> Taxpayer *A*, an individual, owns common stock listed on a national securities exchange, having an adjusted basis of $200,000; he owns rental property having an adjusted basis of $200,000; he has cash of $10,000; and he owns readily marketable municipal bonds having an adjusted basis of $41,000. *A* borrows $100,000 to invest in a limited partnership interest in a real estate syndicate and pays $8,000 interest on the loan which he claims as an interest deduction for the taxable year. Under these facts and circumstances, there is a presumption that the $100,000 indebtedness which is incurred to finance A's portfolio investment is also incurred to carry A's existing investment in tax-exempt bonds since there are no additional facts or circumstances to rebut the presumption. Accordingly, a portion of the $8,000 interest payment will be disallowed under section 265(2) of the Code.

[1933] Rev. Proc. 72-18, § 4.02 provides:

> An individual taxpayer may incur a variety of indebtedness of a personal nature, ranging from short-term credit for purchases of goods and services for personal consumption to a mortgage incurred to purchase or improve a residence or other real property which is held for personal use. Generally, section 265(2) of the Code will not apply to indebtedness of this type, because the purpose to purchase or carry tax-exempt obligations cannot reasonably be inferred where a personal purpose unrelated to the tax-exempt obligations ordinarily dominates the transaction. For example, section 265(2) of the Code generally will not apply to an individual who holds salable municipal bonds and takes out a mortgage to buy a residence instead of selling his

When direct evidence establishes a purpose to purchase or carry tax-exempt obligations (either because tax-exempt obligations were used as collateral for indebtedness or the proceeds of indebtedness were directly traceable to the holding of particular tax-exempt obligations), Rev. Proc. 72-18 assets that no part of the interest paid or incurred on such indebtedness may be deducted.[1934] However, if only a fractional part of the indebtedness is directly traceable to the holding of particular tax- exempt obligations, Rev. Proc. 72-18 assets that the same fractional part of the interest paid or incurred on such indebtedness would be disallowed.[1935] In any other case where interest is disallowed under Rev. Proc. 72-18, an allocable portion of the interest on such indebtedness will be disallowed.[1936]

Investing up to 2% of one's assets in tax-exempt investments might be disregarded.[1937]

II.G.29. Missouri Income Tax Cut for Pass-Through Entities and Sole Proprietorships

RSMo. § 143.022 allows individuals to subtract from their federal adjusted gross income[1938] a portion of the income they earn as sole proprietors[1939] or as owners of partnerships or

---

municipal bonds to finance the purchase price. Under such circumstances the purpose of incurring the indebtedness is so directly related to the personal purpose of acquiring a residence that no sufficiently direct relationship between the borrowing and the investment in tax-exempt obligations may reasonably be inferred.

[1934] Section 7.01.

[1935] Section 7.01, which continues:

> For example, if *A* borrows $100,000 from a bank and invests $75,000 of the proceeds in tax-exempt obligations, 75 percent of the interest paid on the bank borrowing would be disallowed as a deduction.

[1936] Section 7.02, which continues:

> The amount of interest on such indebtedness to be disallowed shall be determined by multiplying the total interest on such indebtedness by a fraction, the numerator of which is the average amount during the taxable year of the taxpayer's tax-exempt obligations (valued at their adjusted basis) and the denominator of which is the average amount during the taxable year of the taxpayer's total assets (valued at their adjusted basis) minus the amount of any indebtedness the interest on which is not subject to disallowance to any extent under this Revenue Procedure.

[1937] Rev. Proc. 72-18, § 3.05, which provides:

> Generally, where a taxpayer's investment in tax-exempt obligations is insubstantial, the purpose to purchase or carry tax-exempt obligations will not ordinarily be inferred in the absence of direct evidence as set forth in sections 3.02 and 3.03. In the case of an individual, investment in tax-exempt obligations shall be presumed insubstantial only where during the taxable year the average amount of the tax-exempt obligations (valued at their adjusted basis) does not exceed 2 percent of the average adjusted basis of his portfolio investments (as defined in section 4.04) and any assets held in the active conduct of a trade or business. In the case of a corporation, an investment in tax-exempt obligations shall be presumed insubstantial only where during the taxable year the average amount of the tax-exempt obligations (valued at their adjusted basis) does not exceed 2 percent of the average total assets (valued at their adjusted basis) held in the active conduct of the trade or business. This paragraph shall not apply to a dealer in tax-exempt obligations.

[1938] RSMo. § 143.022.2.

[1939] RSMo. § 143.022.1(1) refers to the "total combined profit as properly reported to the Internal Revenue Service on each Schedule C, or its successor form, filed."

S corporations.[1940] The portion is expected to start at 5% in calendar year 2018[1941] and increase in 5% increments until it reaches 25% in calendar year 2022,[1942] if Missouri's revenue increases sufficiently.

The deduction applies to income reported on Form 1040, Schedule C or Schedule E, Part II. Interest and dividends from pass-through entities are reported on Schedule B and therefore do not qualify for this break. Same with gain on the sale of assets, which are reported on Schedule D (gain from the sale of capital assets and the long-term capital gain component of gain from the sale of business assets) or Form 1040, line 14 (depreciation recapture from the sale of business assets). Because gain from the sale of business assets is not eligible for this deduction, but income that is not offset by depreciation is eligible, this provision encourages business owners to consider Code § 1031 nontaxable like-kind exchanges of business assets (to the extent such a small tax cut is capable of motivating any actions).

An individual owning a single member LLC that is a disregarded entity who reports rental income on Schedule E, Part I will not get this break. By adding a member to the LLC (for example, a spouse), the LLC reports its rental income on a partnership return and the owners report their K-1 income on Schedule E, Part II, making the rental income eligible for this tax break. Note that, unless the income is large enough, this tax break does not justify the expense of filing a partnership tax return.

The subtraction is "apportioned in proportion to their share of ownership of the business as reported on the taxpayer's Schedule K-1, or its successor form, for the tax period for which such deduction is being claimed when determining the Missouri adjusted gross income" of owners of partnerships or S corporations.[1943]

II.G.30. Disclosing Owners to Financial Institutions and Governments

II.G.30.a. Rules for Disclosing Owners to Covered Financial Institutions

In addition to regulations cited below, see FIN-2018-G001, "Frequently Asked Questions Regarding Customer Due Diligence Requirements for Financial Institutions," (4/3/2018), referred to below as the FAQ.[1944] Only those aspects of the FAQ relating to ownership issues are covered below.

Covered financial institutions[1945] are required to establish and maintain written procedures that are reasonably designed to identify and verify beneficial owners of legal entity customers and to

---

[1940] RSMo. § 143.022.1(2) refers to the "total partnership and S corporation income or loss properly reported to the Internal Revenue Service on Part II of Schedule E, or its successor form."

[1941] It would have started in 2017 if Missouri's revenue had increased enough for the fiscal year that ended in 2016, RSMo. § 143.022.6, but the target described in RSMo. § 143.022.5 was not reached until the fiscal year that ended in 2017.

[1942] RSMo. § 143.022.4.

[1944] Saved as Thompson Coburn LLP doc. no. 6734758.

[1945] 31 C.F.R. § 1010.230(f) provides:

> *Covered financial institution*. For the purposes of this section, covered financial institution has the meaning set forth in § 1010.605(e)(1) of this chapter.

31 C.F.R. § 1010.605(e)(1) provides that "covered financial institution" means, for purposes of § 1010.610 and 1010.620:

include such procedures in their anti-money laundering compliance program. 31 C.F.R. § 1010.230(f) provides:

> *Covered financial institution*. For the purposes of this section, covered financial institution has the meaning set forth in § 1010.605(e)(1) of this chapter.

31 C.F.R. § 1010.605(e)(1) provides that "covered financial institution" means, for purposes of § 1010.610 and 1010.620:

(i) An insured bank (as defined in section 3(h) of the Federal Deposit Insurance Act (12 U.S.C. 1813(h)));

(ii) A commercial bank;

(iii) An agency or branch of a foreign bank in the United States;

(iv) A federally insured credit union;

(v) A savings association;

(vi) A corporation acting under section 25A of the Federal Reserve Act (12 U.S.C. 611 et seq.);

(vii) A trust bank or trust company that is federally regulated and is subject to an anti-money laundering program requirement;

(viii) A broker or dealer in securities registered, or required to be registered, with the Securities and Exchange Commission under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.), except persons who register pursuant to section 15(b)(11) of the Securities Exchange Act of 1934;

(ix) A futures commission merchant or an introducing broker registered, or required to be registered, with the Commodity Futures Trading Commission under the

(x) A mutual fund….

Other than entities excluded under 31 C.F.R. § 1010.230(e)(2),[1946] "legal entity customer" means:[1947]

> a corporation, limited liability company, or other entity that is created by the filing of a public document with a Secretary of State or similar office, a general partnership, and any similar entity formed under the laws of a foreign jurisdiction that opens an account.

[1946] 31 C.F.R. § 1010.230(e)(2) provides:

Legal entity customer does not include:

(i) A financial institution regulated by a Federal functional regulator or a bank regulated by a State bank regulator;
(ii) A person described in § 1020.315(b)(2) through (5) of this chapter;
(iii) An issuer of a class of securities registered under section 12 of the Securities Exchange Act of 934 or that is required to file reports under section 15(d) of that Act;
(iv) An investment company, as defined in section 3 of the Investment Company Act of 1940, that is registered with the Securities and Exchange Commission under that Act;
(v) An investment adviser, as defined in section 202(a)(11) of the Investment Advisers Act of 1940, that is registered with the Securities and Exchange Commission under that Act;
(vi) An exchange or clearing agency, as defined in section 3 of the Securities Exchange Act of 1934, that is registered under section 6 or 17A of that Act;
(vii) Any other entity registered with the Securities and Exchange Commission under the Securities Exchange Act of 1934;
(viii) A registered entity, commodity pool operator, commodity trading advisor, retail foreign exchange dealer, swap dealer, or major swap participant, each as defined in section 1a of the Commodity Exchange Act, that is registered with the Commodity Futures Trading Commission;
(ix) A public accounting firm registered under section 102 of the Sarbanes-Oxley Act;
(x) A bank holding company, as defined in section 2 of the Bank Holding Company Act of 1956 (12 U.S.C. 1841) or savings and loan holding company, as defined in section 10(n) of the Home Owners' Loan Act (12 U.S.C 1467a(n));
(xi) A pooled investment vehicle that is operated or advised by a financial institution excluded under paragraph (e)(2) of this section;
(xii) An insurance company that is regulated by a State;
(xiii) A financial market utility designated by the Financial Stability Oversight Council under Title VIII of the Dodd–Frank Wall Street Reform and Consumer Protection Act of 2010;
(xiv) A foreign financial institution established in a jurisdiction where the regulator of such institution maintains beneficial ownership information regarding such institution;
(xv) A non-U.S. governmental department, agency or political subdivision that engages only in governmental rather than commercial activities; and
(xvi) Any legal entity only to the extent that it opens a private banking account subject to § 1010.620 of this chapter.

[1947] 31 C.F.R. § 1010.230(e)(1). However, 31 C.F.R. § 1010.230(e)(2) requires the following to disclose only the control prong of the beneficial ownership requirement:

(i) A pooled investment vehicle that is operated or advised by a financial institution not excluded under paragraph (e)(2) of this section; and
(ii) Any legal entity that is established as a nonprofit corporation or similar entity and has filed its organizational documents with the appropriate State authority as necessary.

Elaborating on what is a "legal entity customer," page 29412 of the Preamble[1948] explains:

> … a legal entity customer means a corporation, limited liability company, or other entity that is created by the filing of a public document with a Secretary of State or similar office, a general partnership, and any similar entity formed under the laws of a foreign jurisdiction, that opens an account. This means that ''legal entity customer'' would include, in addition to corporations and limited liability companies, limited partnerships, business trusts that are created by a filing with a state office, any other entity created in this manner, and general partnerships. (It would also include similar entities formed under the laws of other countries.) It would not include, for example, sole proprietorships or unincorporated associations even though such businesses may file with the Secretary of State in order to, for example, register a trade name or establish a tax account. This is because neither a sole proprietorship nor an unincorporated association is an entity with legal existence separate from the associated individual or individuals that in effect creates a shield permitting an individual to obscure his or her identity.[54] The definition of ''legal entity customer'' also does not include natural persons opening accounts on their own behalf. In the final rule, we remove the reference to a ''new'' account to eliminate redundancies with other paragraphs of this provision, and because this account status is not a relevant characteristic for defining a legal entity customer.
>
> [54] FinCEN notes that this is consistent with the CIP rules, which include as a customer ''an individual who opens a new account for ... (B) an entity that is not a legal person, such as a civic club.'' In such a case, the individual opening the account, rather than the civic club, is the customer. *See, e.g.*, 31 CFR 1020.100(c)(1)(ii)(B).

FAQ Question 22 explains this exclusion:

> **Are sole proprietorships formed by spouses or other unincorporated associations considered legal entity customers under the Rule?**
>
> A. No. Sole proprietorships - individual or spousal - and unincorporated associations are not legal entity customers as defined by the Rule, even though such businesses may file with the Secretary of State in order to register a trade name or establish a tax account. This is because neither a sole proprietorship nor an unincorporated association is a separate legal entity from the associated individual(s), and therefore beneficial ownership is not inherently obscured.[21]
>
> [21] See 81 FR, 29398, 29412 (May 11, 2016).

As to the exclusion for charities, non-profits or similar entities, FAQ Question 23 says:

> **Are covered financial institutions limited to the Internal Revenue Code (IRC) definitions of charities, non-profits, or similar entities when assessing their eligibility for exclusion from the definition of legal entity customer?**

[1948] These regulations were promulgated by RIN 1506-AB25, *Federal Register*, vol. 81, No. 91, pages 29398-29458, the explanatory portions being referred to in this part II.G.30 Disclosing Owners to Financial Institutions as the "Preamble."

A. No. The exclusion from the definition of legal entity customer for charities and non-profit entities is not limited to those entities that meet the definition or description of charitable, nonprofit, or similar entities under the IRC. The Rule does not rely on the tax-exempt status of an entity as described in the IRC. All nonprofit entities—whether or not tax-exempt—that are established as a nonprofit, or nonstock corporation, or similar entity that has been validly organized with the proper State authority are excluded from the ownership/equity prong of the requirement because nonprofit entities generally do not have ownership interests.[22] Financial institutions, however, are required to collect beneficial ownership information under the control prong from any such entity.[23]

[22] See 81 FR at 29412.

[23] *Id.*

A trust is not a "legal entity customer." Page 29412 of the Preamble explains:

The definition would also not include trusts (other than statutory trusts created by a filing with a Secretary of State or similar office). This is because, unlike the legal entities that are subject to the final rule, a trust is a contractual arrangement between the person who provides the funds or other assets and specifies the terms (*i.e.*, the grantor or settlor) and the person with control over the assets (*i.e.*, the trustee), for the benefit of those named in the trust deed (*i.e.*, the beneficiaries). Formation of a trust does not generally require any action by the state. As FinCEN noted in the NPRM, identifying a ''beneficial owner'' from among these parties, based on the definition in the proposed or final rule, would not be possible.

FinCEN emphasizes that this does not and should not supersede existing obligations and practices regarding trusts generally. The preamble to each of the CIP rules notes that, while financial institutions are not required to look through a trust to its beneficiaries, they "may need to take additional steps to verify the identity of a customer that is not an individual, such as obtaining information about persons with control over the account."[55] Moreover, as FinCEN noted in the proposal, it is our understanding that where trusts are direct customers of financial institutions, financial institutions generally also identify and verify the identity of trustees, because trustees will necessarily be signatories on trust accounts (which in turn provides a ready source of information for law enforcement in the event of an investigation). Furthermore, under supervisory guidance for banks, "in certain circumstances involving revocable trusts, the bank may need to gather information about the settlor, grantor, trustee, or other persons with the authority to direct the trustee, and who thus have authority or control over the account, in order to establish the true identity of the customer."[56] We reiterate our understanding that, consistent with existing obligations, financial institutions are already taking a risk-based approach to collecting information with respect to various persons associated with trusts in order to know their customer,[57] and that we expect financial institutions to continue these practices as part of their overall efforts to safeguard against money laundering and terrorist financing.[58]

[55] See, *e.g.*, "Customer Identification Programs for Broker-Dealers," 68 FR at 25116 n.32. (May 9, 2003).

[56] Federal Financial Institutions Examination Council, Bank Secrecy Act/Anti-Money Laundering Examination Manual 281 (2014) (FFIEC Manual).

[57] FinCEN also understands that in order to engage in the business of acting as a trustee, it is necessary for a trust company to be Federally- or State-chartered. Such entities are subject to BSA obligations, which reduces the AML risk of such trusts.

[58] Also not covered by the final rule are accounts in the name of a deceased individual opened by a court-appointed representative of the deceased's estate.

As to trusts with multiple trustees owning a legal entity customer, FAQ Question 19 provides:

> **When 25 percent or more of the equity interests of a legal entity customer are owned by a trust that is overseen by co-trustees (multiple trustees), are covered financial institutions required to identify and verify the identity of all co-trustees?**
>
> No. If a trust owns directly or indirectly, through any contract, arrangement, understanding, relationship or otherwise, 25 percent or more of the equity interests of a legal entity customer, the beneficial owner under the ownership/ equity prong is the trustee. Where there are multiple trustees or co-trustees, financial institutions are expected to collect and verify the identity of, at a minimum, one co-trustee of a multi-trustee trust who owns 25 percent or more of the equity interests of a legal entity customer that is not subject to an exclusion. A covered financial institution may choose to identify additional co-trustees as part of its customer due diligence, based on its risk assessment and the customer risk profile and in accordance with the institution's account opening procedures.

As to a trusts with an entity as trustee, FAQ Question 20 provides:

> **If a legal entity is the trustee (*e.g.*, law firm, bank trust department, etc.) of a trust that owns 25 percent or more of the equity interests of a legal entity customer, can that entity be identified as a beneficial owner under the ownership/equity prong or does a natural person need to be so identified?**
>
> A. If a trust owns directly or indirectly, through any contract, arrangement, understanding, relationship, or otherwise, 25 percent or more of the equity interests of a legal entity customer, the beneficial owner for purposes of the ownership/equity prong is the trustee, regardless of whether the trustee is a natural person or a legal entity.[19] In circumstances where a natural person does not exist for purposes of the ownership/equity prong, a natural person would not be identified. However, a covered institution should collect identification information on the legal entity trustee as part of its CIP, consistent with the covered institution's risk assessment and the customer risk profile. In addition to the ownership/equity prong, covered financial institutions are also required to identify and verify a natural person as the beneficial owner of the legal entity customer under the control prong to comply with the Rule.[20]
>
> The ownership/equity and control prongs, although related, are independent requirements. Thus, satisfaction of, or exclusion from, regulatory obligations under one prong does not mean a covered financial institution's obligations under the other prong are also satisfied or excluded.
>
> [19] See 31 CFR 1010.230(d)(3).
>
> [20] See 31 CFR 1010.230(d)(2).

Under 31 C.F.R. § 1010.230(d), a covered financial institution's customer due diligence procedures must enable the institution to:[1949]

(1) "Identify the beneficial owner(s) of each legal entity customer at the time a new account is opened," unless the customer is otherwise specially excluded[1950] or the account is exempted.[1951] A covered financial institution may accomplish this either by obtaining a certification in the form of part II.G.30.b from the individual opening the account on behalf of the legal entity customer, or by obtaining from the individual the information required by the form by another means, provided the individual certifies, to the best of the individual's knowledge, the accuracy of the information.

(2) "Verify the identity of each beneficial owner identified to the covered financial institution, according to risk-based procedures to the extent reasonable and practicable." These procedures must contain the elements required for verifying the identity of customers under the general rules for identifying individuals for that type of financial institution. "A covered financial institution may rely on the information supplied by the legal entity customer regarding the identity of its beneficial owner or owners, provided that it has no knowledge of facts that would reasonably call into question the reliability of such information."

Under 31 C.F.R. § 1010.230(d), "beneficial owner" means each of the following:

(1) Each individual, if any, who, directly or indirectly, through any contract, arrangement, understanding, relationship or otherwise, owns 25 percent or more of the equity interests of a legal entity customer; and

(2) A single individual with significant responsibility to control, manage, or direct a legal entity customer, including:

[1949] 31 C.F.R. § 1010.230(b).

[1950] See fn 1946.

[1951] 31 C.F.R. § 1010.230(h), "Exemptions," provides:

(1) Covered financial institutions are exempt from the requirements to identify and verify the identity of the beneficial owner(s) set forth in paragraphs (a) and (b)(1) and (2) of this section only to the extent the financial institution opens an account for a legal entity customer that is:
  (i) At the point-of-sale to provide credit products, including commercial private label credit cards, solely for the purchase of retail goods and/or services at these retailers, up to a limit of $50,000;
  (ii) To finance the purchase of postage and for which payments are remitted directly by the financial institution to the provider of the postage products;
  (iii) To finance insurance premiums and for which payments are remitted directly by the financial institution to the insurance provider or broker;
  (iv) To finance the purchase or leasing of equipment and for which payments are remitted directly by the financial institution to the vendor or lessor of this equipment.

(2) Limitations on Exemptions.
  (i) The exemptions identified in paragraphs (h)(1)(ii) through (iv) of this section do not apply to transaction accounts through which a legal entity customer can make payments to, or receive payments from, third parties.
  (ii) If there is the possibility of a cash refund on the account activity identified in paragraphs (h)(1)(ii) through (iv) of this section, then beneficial ownership of the legal entity customer must be identified and verified by the financial institution as required by this section, either at the time of initial remittance, or at the time such refund occurs.

(i) An executive officer or senior manager (e.g., a Chief Executive Officer, Chief Financial Officer, Chief Operating Officer, Managing Member, General Partner, President, Vice President, or Treasurer); or

(ii) Any other individual who regularly performs similar functions.

(3) If a trust owns directly or indirectly, through any contract, arrangement, understanding, relationship or otherwise, 25 percent or more of the equity interests of a legal entity customer, the beneficial owner for purposes of paragraph (d)(1) of this section shall mean the trustee. If an entity listed in paragraph (e)(2) of this section owns directly or indirectly, through any contract, arrangement, understanding, relationship or otherwise, 25 percent or more of the equity interests of a legal entity customer, no individual need be identified for purposes of paragraph (d)(1) of this section with respect to that entity's interests.

31 C.F.R. § 1010.230(d) concludes with the following note:

> The number of individuals that satisfy the definition of "beneficial owner," and therefore must be identified and verified pursuant to this section, may vary. Under paragraph (d)(1) of this section, depending on the factual circumstances, up to four individuals may need to be identified. Under paragraph (d)(2) of this section, only one individual must be identified. It is possible that in some circumstances the same person or persons might be identified pursuant to paragraphs (d)(1) and (2) of this section. A covered financial institution may also identify additional individuals as part of its customer due diligence if it deems appropriate on the basis of risk.

The final rules were effective July 11, 2016, and the "applicability date," when covered financial institutions must comply, is May 11, 2018.[1952]

Pages 29409-29410 of the Preamble explain the rules regarding beneficial owners:

> *Section 1010.230(d) Beneficial Owner*. In the NPRM, we proposed two prongs for the definition of beneficial owner: Each individual, if any, who directly or indirectly owned 25 percent of the equity interests of a legal entity customer (the ownership prong); and a single individual with significant responsibility to control, manage, or direct a legal entity customer, including an executive officer or senior manager or any other individual who regularly performs similar functions (the control prong). We noted that the number of beneficial owners identified would vary from legal entity customer to legal entity customer due to the ownership prong - there could be as few as zero and as many as four individuals who satisfy this prong. All legal entities, however, would be required to identify one beneficial owner under the control prong. We further noted that financial institutions had the discretion to identify additional beneficial owners as appropriate based on risk.
>
> Thus, in practice, the number of beneficial owners identified will vary based on the circumstances. For example:
>
> - Mr. and Mrs. Smith each hold a 50 percent equity interest in ''Mom & Pop, LLC.'' Mrs. Smith is President of Mom & Pop, LLC and Mr. Smith is its Vice President.

[1952] Preamble, p. 29398.

Mom & Pop, LLC is required to provide the personal information of both Mr. & Mrs. Smith under the ownership prong. Under the control prong, Mom & Pop, LLC is also required to provide the personal information of one individual with significant responsibility to control Mom & Pop, LLC; this individual could be either Mr. or Mrs. Smith, or a third person who otherwise satisfies the definition. Thus, in this scenario, Mom & Pop, LLC would be required to identify at least two, but up to three distinct individuals – both Mr. & Mrs. Smith under the ownership prong, and either Mr. or Mrs. Smith under the control prong, or both Mr. & Mrs. Smith under the ownership prong, and a third person with significant responsibility under the control prong.

- Acme, Inc. is a closely-held private corporation. John Roe holds a 35 percent equity stake; no other person holds a 25 percent or higher equity stake. Jane Doe is the President and Chief Executive Officer. Acme, Inc. would be required to provide John Roe's beneficial ownership information under the ownership prong, as well as Jane Doe's (or that of another control person) under the control prong.

- Quentin, Inc. is owned by the five Quentin siblings, each of whom holds a 20 percent equity stake. Its President is Benton Quentin, the eldest sibling, who is the only individual at Quentin, Inc. with significant management responsibility. Quentin, Inc. would be required to provide Benton Quentin's beneficial ownership information under the control prong, but no other beneficial ownership information under the ownership prong, because no sibling has a 25 percent stake or greater.

In section 1010.230(d), the phrase ''directly or indirectly'' intends that the financial institution's customer identify its ultimate beneficial owner or owners as defined in the rule and not their nominees or ''straw men.''[1953] A covered financial institution is not required to do a "deep dive":[1954]

> FinCEN expects that financial institutions will generally be able to rely upon information about equity ownership provided by the person opening the account, and not to affirmatively investigate whether equity holders are attempting to avoid the reporting threshold. However, financial institution staff who know, suspect, or have reason to suspect that such behavior is occurring may, depending on the circumstances, be required to file a SAR.

However, FAQ Question 3 explains:

> **When a legal entity is identified as owning 25 percent or more of a legal entity customer that is opening an account, is it necessary for a covered financial institution to request beneficial ownership information on the legal entity identified as an owner?**
>
> A. Under the Rule's beneficial ownership identification requirement, a covered institution must collect, from its legal entity customers, information about any individual(s) that are the beneficial owner(s) (unless the entity is excluded or the account is exempted). Therefore, covered financial institutions must obtain from their legal entity customers the

[1953] Page 29410 of the Preamble.
[1954] Page 29410 of the Preamble.

identities of individuals who satisfy the definition, either directly or indirectly through multiple corporate structures, as illustrated in the following example.

> For purposes of the Rule, Allan is a beneficial owner of Customer because he owns indirectly 30 percent of its equity interests through his direct ownership of Company A. Betty is also a beneficial owner of Customer because she owns indirectly 20 percent of its equity interests through her direct ownership of Company A plus $16^{2/3}$ percent through Company B for a total of indirect ownership interest of $36^{2/3}$ percent. Neither Carl nor Diane is a beneficial owner because each owns indirectly only $16^{2/3}$ percent of Customer's equity interests through their direct ownership of Company B.
>
> [A diagram shows Company A owning 50% of Customer, with Allan owning 60% and Betty owning 40% of Company A. The diagram also shows Company B owning 50% of Customer, with each of Betty, Carl and Diane owning 1/3 of Company B.]
>
> A covered financial [institution] need not independently investigate the legal entity customer's ownership structure and may accept and reasonably rely on the information regarding the status of beneficial owners presented to the financial institution by the legal entity customer's representative, provided that the institution has no knowledge of facts that would reasonably call into question the reliability of the information.

A covered financial institution may be more strict:[1955]

> We reiterate that the 25 percent threshold is the baseline regulatory benchmark, but that covered financial institutions may establish a lower percentage threshold for beneficial ownership (*i.e.*, one that regards owners of less than 25 percent of equity interests as beneficial owners) based on their own assessment of risk in appropriate circumstances. As a general matter, FinCEN does not expect covered financial institutions' compliance with this regulatory requirement to be assessed against a lower threshold. Nevertheless, consistent with the risk-based approach, FinCEN anticipates that some financial institutions may determine that they should identify and verify beneficial owners at a lower threshold in some circumstances; we believe that making this clear in the note accompanying the regulatory text will aid them in doing so with respect to their customers.

Elaborating on the last sentence above, FAQ Question 1 says:

> A covered financial institution may choose, however, to collect such information on natural persons who own a lower percentage of the equity interests of a legal entity customer as well as information on more than one individual with managerial control.

Regarding using an equity threshold lower than 25%, FAQ Question 2 advises:

> There may be circumstances where a financial institution may determine that collection and verification of beneficial ownership information at a lower threshold may be warranted, based on the financial institution's own assessment of its risk relating to its customer.

[1955] Page 29410 of the Preamble.

> Transparency in beneficial ownership, however, is only one aspect of a covered financial institution's customer due diligence obligations. A financial institution may reasonably conclude that collecting beneficial ownership information at a lower equity interest than 25 percent would not help mitigate the specific risk posed by the customer or provide information useful to the financial institution in analyzing the risk. Rather, any additional heightened risk could be mitigated by other reasonable means, such as enhanced monitoring or collecting other information, including expected account activity, in connection with the particular legal entity customer.
>
> In all cases, however, it is important that covered financial institutions establish and maintain written procedures that are reasonably designed to identify and verify the identity of beneficial owners of legal entity customers and to include such procedures in their AML compliance program.[1]
>
> [1] *See* 31 U.S.C. § 5318(h); 31 CFR 1010.230(a).

The Preamble declined to define "equity interest":[1956]

> … we deliberately avoided the use of more technical terms of art associated with the exercise of control through ownership; we did so in part based on the preferences expressed by many members of industry…. Beyond the general examples provided in the proposal, however, we are reluctant to provide additional narrower examples that could be construed to limit a definition that we intend to be broadly applicable, particularly in light of the diversity of types of legal entities formed within the United States and abroad. By the same token, we also decline to provide a formal guidance document listing the types of documents that front-line employees should rely upon to demonstrate the existence of an equity interest over the triggering threshold. We reiterate that it is generally the responsibility of the legal entity customer (and its personnel) to make this determination and to identify the beneficial owners, and not front-line employees at the financial institution, unless the employees have reason to question the accuracy of the information presented.

The Preamble focuses on each financial institution using its usual documentation and risk-based measures to comply with this rule. FAQ Question 4 elaborates:

> **What means of identity verification are sufficient to reliably confirm beneficial ownership under the CDD Rule?**
>
> A. Covered financial institutions must verify the identity of each beneficial owner according to risk-based procedures that contain, at a minimum, the same elements financial institutions are required to use to verify the identity of individual customers under applicable Customer Identification Program ("CIP") requirements. This includes the requirement to address situations in which the financial institution cannot form a reasonable belief that it knows the true identity of the legal entity customer's beneficial owners.[2] Although the CDD Rule's beneficial ownership verification procedures must contain the same elements as existing CIP procedures, they are not required to be identical to them.[3] For example, a covered financial institution's policies and procedures may state that the institution will accept photocopies of a driver's license from the legal

[1956] Page 29411 of the Preamble.

entity customer to verify the beneficial owner(s)' identity if the beneficial owner is not present, which is not permissible in the CIP rules. (See Question 6.)

A financial institution's CIP must contain procedures for verifying customer identification, including describing when the institution will use documentary, non-documentary, or a combination of both methods for identity verification.[4] Covered financial institutions may use the same methods to verify the identity of the beneficial owner of a legal entity customer. In addition, in contrast to the CIP rule, the CDD Rule expressly authorizes covered financial institutions to use photocopies or other reproduction documents for documentary verification.[5]

Documentary verification may include unexpired government-issued identification evidencing nationality or residence and bearing a photograph or similar safeguard, such as a driver's license or passport.[6] Non-documentary methods of verification may include contacting a beneficial owner; independently verifying the beneficial owner's identity through the comparison of information provided by the legal entity customer (or the beneficial owner, as appropriate) with information obtained from other sources; checking references with other financial institutions; and obtaining a financial statement.[7]

Financial institutions should conduct their own risk-based analysis to determine the appropriate method(s) of verification and the appropriate documents or types of photocopies or reproductions to accept in order to comply with the beneficial owner verification requirement.

[2] Under the CIP rules, a financial institution's CIP must include procedures for responding to circumstances in which the financial institution cannot form a reasonable belief that it knows the true identity of a customer. These procedures should describe: (1) when the institution should not open an account; (2) the terms under which a customer may use an account while the institution attempts to verify the customer's identity; (3) when it should close an account, after attempts to verify a customer's identity have failed; and (4) when it should file a Suspicious Activity Report in accordance with applicable laws and regulations. *See, e.g.*, 31 CFR 1020.220(a)(2)(iii).

[3] See 31 CFR 1020.220(a)(2); 31 CFR 1023.220(a)(2); 31 CFR 1024.220(a)(2); or 31 CFR 1026.220(a)(2).

[4] See 31 CFR 1020.220 (a)(2)(ii).

[5] See 31 CFR 1010.230(b)(2).

[6] See 31 CFR 1020.220 (a)(2)(ii)(A).

[7] See 31 CFR 1020.220 (a)(2)(ii)(B).

Various questions in the FAQ require certification of beneficial ownership for each account being opened or renewed or when the financial institution becomes aware that information has changed. However, Question 14 clarifies:

Covered financial institutions do not have an obligation to solicit or update beneficial ownership information as a matter of course during regular or periodic reviews, absent specific risk-based concerns. Financial institutions are required to develop and implement risk-based procedures for conducting ongoing customer due diligence, including regular monitoring to identify and report suspicious activity and, on a risk basis, to maintain and update customer information. Thus, periodic reviews are not by themselves a trigger to obtain or update beneficial ownership information. As stated in response to Questions 13 and 16, the obligation to obtain or update information is triggered when, in the course of normal monitoring, a financial institution becomes aware of information about a customer or an account, including a possible change of beneficial ownership information, relevant to assessing or reassessing the customer's overall risk profile. Absent such a risk-related trigger or event, collecting or updating of beneficial ownership information is at the discretion of the covered financial institution. Financial institutions may exercise this discretion to collect or update beneficial ownership information on customers as often as they deem appropriate.

II.G.30.b. Sample Form for Disclosing Owners to Covered Financial Institutions

Pages 29454-29457 of the Preamble provide the following form, which is reproduced verbatim (and which may be found online at https://www.fincen.gov/resources/filing-information):

APPENDIX A to § 1010.230 -- CERTIFICATION REGARDING BENEFICIAL OWNERS OF LEGAL ENTITY CUSTOMERS

I. GENERAL INSTRUCTIONS

<u>What is this form?</u>

To help the government fight financial crime, Federal regulation requires certain financial institutions to obtain, verify, and record information about the beneficial owners of legal entity customers. Legal entities can be abused to disguise involvement in terrorist financing, money laundering, tax evasion, corruption, fraud, and other financial crimes. Requiring the disclosure of key individuals who own or control a legal entity (i.e., the beneficial owners) helps law enforcement investigate and prosecute these crimes.

<u>Who has to complete this form?</u>

This form must be completed by the person opening a new account on behalf of a legal entity with any of the following U.S. financial institutions: (i) a bank or credit union; (ii) a broker or dealer in securities; (iii) a mutual fund; (iv) a futures commission merchant; or (v) an introducing broker in commodities.

For the purposes of this form, a **legal entity** includes a corporation, limited liability company, or other entity that is created by a filing of a public document with a Secretary of State or similar office, a general partnership, and any similar business entity formed in the United States or a foreign country. **Legal entity** does not include sole proprietorships, unincorporated associations, or natural persons opening accounts on their own behalf.

<u>What information do I have to provide?</u>

This form requires you to provide the name, address, date of birth and Social Security number (or passport number or other similar information, in the case of foreign persons) for the following individuals (*i.e.*, the **beneficial owners**):

(i) Each individual, if any, who owns, directly or indirectly, 25 percent or more of the equity interests of the legal entity customer (*e.g.*, each natural person that owns 25 percent or more of the shares of a corporation); **and**

(ii) An individual with significant responsibility for managing the legal entity customer (*e.g.*, a Chief Executive Officer, Chief Financial Officer, Chief Operating Officer, Managing Member, General Partner, President, Vice President, or Treasurer).

The number of individuals that satisfy this definition of "beneficial owner" may vary. Under section (i), depending on the factual circumstances, up to four individuals (but as few as zero) may need to be identified. Regardless of the number of individuals identified under section (i), you must provide the identifying information of one individual under section (ii). It is possible that in some circumstances the same individual might be identified under both sections (*e.g.*, the President of Acme, Inc. who also holds a 30% equity interest). Thus, a completed form will contain the identifying information of at least one individual (under section (ii)), and up to five individuals (*i.e.*, one individual under section (ii) and four 25 percent equity holders under section (i)).

The financial institution may also ask to see a copy of a driver's license or other identifying document for each beneficial owner listed on this form.

II. CERTIFICATION OF BENEFICIAL OWNER(S)

Persons opening an account on behalf of a legal entity must provide the following information:

a. *Name and Title of Natural Person Opening Account:*

____

b. *Name and Address of Legal Entity for Which the Account is Being Opened:*

____

c. *The following information for <u>each</u> individual, if any, who, directly or indirectly, through any contract, arrangement, understanding, relationship or otherwise, owns 25 percent or more of the equity interests of the legal entity listed above:*

Name	Date of Birth	Address (Residential or Business Street Address)	*For U.S. Persons:* Social Security Number	*For Foreign Persons:* Passport Number and Country of Issuance, or other similar identification number[1]

(If no individual meets this definition, please write "Not Applicable.")

d. *The following information for one individual with significant responsibility for managing the legal entity listed above, such as:*

☐ *An executive officer or senior manager (e.g., Chief Executive Officer, Chief Financial Officer, Chief Operating Officer, Managing Member, General Partner, President, Vice President, Treasurer); or*

☐ *Any other individual who regularly performs similar functions.*

(If appropriate, an individual listed under section (c) above may also be listed in this section (d)).

Name/ Title	Date of Birth	Address (Residential or Business Street Address)	*For U.S. Persons:* Social Security Number	*For Foreign Persons:* Passport Number and Country of Issuance, or other similar identification number[1]

I, ________________________ (*name of natural person opening account*), hereby certify, to the best of my knowledge, that the information provided above is complete and correct.

Signature: _________________________ Date ______________

[1] In lieu of a passport number, foreign persons may also provide an alien identification card number, or number and country of issuance of any other government-issued document evidencing nationality or residence and bearing a photograph or similar safeguard.

Legal Entity Identifier ____________________ (Optional)

II.G.30.c. Corporate Transparency Act: Disclosure to Governments

The Corporate Transparency Act, Sections 6401-6403 of the National Defense Authorization Act for Fiscal Year 2021, requires disclosure to the federal government and, in certain circumstances, other governmental entities.

See FinCEN's web page: Beneficial Ownership Information Reporting. FinCEN has prepared Frequently Asked Questions (FAQs) intended as unofficial summary of the rules. A list of exemptions that you can pass along to clients is here.

An official web page for the law, H.R. 6395 - the National Defense Authorization Act for Fiscal Year 2021, is at https://www.congress.gov/bill/116th-congress/house-bill/6395. Unofficial ACTEC resources published 1/24/2021 include Summary of Corporate Transparency Act (summarizing the law) and Future Studies Under Corporate Transparency Act and NDAA (explaining the extent to which the law remains a work in progress), as well as a podcast based on those summaries: New Corporate Transparency Act | National Defense Authorization Act (actecfoundation.org). See also Steve Leimberg's Business Entities Email Newsletter Archive Message #218, written by Jack Terrill and Michael Breslow (1/21/2021). ACTEC commentary on late 2021 developments includes:

- ACTEC submits comments pursuant to Notice of Proposed Rulemaking (NPRM), Docket Number FINCEN-2021-0005 and RIN1506-AB49 the Corporate Transparency Act FinCEN Notice of Proposed Rulemaking of Regulations for Beneficial Ownership Information Reporting Requirements Questions 15, 16, 17, 20, & 21 (February 4, 2022)

- ACTEC submits comments in response to an ANPRM RIN 1506-AB-54, by FinCEN regarding potential requirements under the Bank Secrecy Act ("BSA") regarding, broadly, the reporting of certain information by certain persons regarding certain non-financed real estate transactions (February 4, 2022)

- FATF's review of R.25 of the FATF Recommendations in relation to beneficial ownership of legal arrangements (December 2021)

Many clients with operating businesses may be exempted by 31 CFR § 1010.380(c)(2)(xxi):

Large operating company. Any Entity that:

(A) Employs more than 20 full time employees in the United States, with ''full time employee in the United States'' having the meaning provided in 26 CFR 54.4980H–1(a) and 54.4980H–3, except that the term ''United States'' as used in 26 CFR 54.4980H–1(a) and 54.4980H–3 has the meaning provided in § 1010.100(hhh);

(B) Has an operating presence at a physical office within the United States; and

(C) Filed a Federal income tax or information return in the United States for the previous year demonstrating more than $5,000,000 in gross receipts or sales, as reported as gross receipts or sales (net of returns and allowances) on the entity's IRS Form 1120, consolidated IRS Form 1120, IRS Form 1120-S, IRS Form 1065, or other applicable IRS form, excluding gross receipts or sales from sources outside the United States, as determined under Federal income tax principles. For an entity that is part of an affiliated group of corporations within the meaning of 26 U.S.C. 1504 that filed a consolidated return, the applicable amount shall be the amount reported on the consolidated return for such group.

However, this provision would not protect their separately-owned real estate LLCs.

On December 21, 2023, FinCEN issued final regulations on Beneficial Ownership Information Access and Safeguards, which it summarized in a Fact Sheet: Beneficial Ownership Information Access and Safeguards Final Rule.

My inclination would be to get a FinCEN identifier for each owner so that any change of information regarding someone who owns more than one business entity can be reported with only one filing. Given that a change of address or expiration or renewal of an individual's driver's license or other identifying document (if the unique identifying number on that document changes)[1957] needs to be reported and it may be difficult for a reporting company to monitor these changes, placing the burden on the individual seems only fair. If a reader has identified any disadvantage to this approach, please let me know.

II.G.30.c.i. Trusts and the Corporate Transparency Act

As discussed further below, the following are beneficial owners:

- Trustee
- Any other individual (if any) with the authority to dispose of trust assets, which perhaps would include a trust director/adviser of a directed trust or the holder of an inter vivos power of appointment
- The grantor of a revocable trust or any beneficiary who has the right to demand a distribution of or withdraw substantially all of the assets from the trust
- A beneficiary who is the sole permissible recipient of income and principal from the trust. This implies that being a beneficiary of a sprinkle trust does not create beneficial ownership. If a trust has separate shares (see part II.J.9.a.ii Separate Share Rule), where a separate share has a sole current permissible distributee, I would tend to err in favor of treating that distributee as a beneficial owner.

[1957] Per the Beneficial Ownership Information Reporting Filing Instructions (January 2024 - Version 1.0), identifying documents are only: "a non-expired State-issued driver's license, a non-expired State/local/Tribe-issued identification document issued for the purpose of identifying the individual, a non-expired U.S. passport, or, only if the company applicant does not have one of these identifying documents, a non-expired foreign passport."

In applying the above, if the beneficiary is a minor child, the child's parent or legal guardian is substituted for the child.

Also, merely being a remainderman would not count, given that a mere remainderman is not a permissible recipient of income or principal. This is reinforced by the exclusion for "an individual whose only interest in a reporting company is a future interest through a right of inheritance."

What if a trust divides authority, so that one trustee has authority over the trust's interest in the reporting company, and another has authority over everything else? The regulation mentioned "authority to dispose of trust assets," which captures more roles than something along the lines of authority over the trust's interest in the reporting company. So, in this example, I would treat both trustees as beneficial owners. If the client would like to avoid reporting the other trustee, consider dividing the trust and giving the trustee who has authority over the trust's interest in the reporting company plenary authority as the trustee. Although the trust that does not hold the interest in the reporting company could be a permissible distributee, it cannot be the sole distributee, because then as a beneficiary it would be a beneficial owner and the other trustee would be bootstrapped in.

"An individual whose only interest in a reporting company is a future interest through a right of inheritance" is not a beneficial owner. Part II.G.30.c.iv ACTEC/ALI-CLE Webinar January 26, 2023 speculates on when a "future interest" matures into a present interest. Consider that beneficiaries of sprinkle trusts are not considered beneficial owners. Until an interest in a reporting company can be associated with a particular beneficiary, my preliminary view is that only the fiduciary needs to be disclosed:

- Mere creditors are not beneficial owners.

- Note that a change in beneficial ownership occurs when a probate estate is "settled," which the preamble discusses: "The precise moment at which an individual acquires an ownership interest in an entity through inheritance may be subject to a variety of existing legal authorities, such as the terms of a will, the terms of a trust, applicable state laws, and other valid instruments and rules."[1958] In an estate or post-mortem revocable trust (the latter not expressly covered by the preceding sentence), my preliminary view is that one disregards creditors and those whose beneficial interest could not possibly include an interest in the reporting company. If that is correct:

    - One would ignore those beneficiaries who are entitled only to tangible personal property or a cash gift.

    - If, other than those beneficiaries, all assets go to one trust (or a trust that divides into other trusts with the same rights to current distributions), given that indirect interests count towards beneficial ownership I would be concerned that the trustee and any beneficiary described in the first paragraph of this part II.G.30.c.i may need to report. Thus, in a probate estate that pours all of interests in a reporting company to a post-mortem revocable trust, I might view the earlier of probating the will or appointing the executor/personal representative of the estate as triggering reporting the trustee of the revocable trust. In most of the documents I draft, the trustee of the revocable trust is also designated as the trustee of any downstream trusts until the primary beneficiary

[1958] For when a person's death becomes a reporting event that changes beneficial ownership, see part II.G.30.c.ii Updated Reports: Estate Planning Issues, which includes the full relevant preamble.

changes the trustee;[1959] in those documents, I would tend to look only for whether the downstream trusts have sole permissible distributees.

- What if an estate or post-mortem revocable trust has multiple downstream trusts? I would tend not to report any downstream trust that might not receive an interest in a reporting company. That view is consistent with ignoring the beneficiaries of a sprinkle trust. However, because we have no clear guidance regarding when a "future interest" has become a separate interest, I would tend to report any downstream trust that the fiduciary has determined will receive an interest in a reporting company.

- Is an estate within the scope of a "trust or similar arrangement," and is the personal representative/executor of an estate within the scope of "a trustee of the trust or other individual (if any) with the authority to dispose of trust assets" in the context of "similar arrangement" being substituted for "trust"? When Treasury made the probate exception, was that in terms of an intestate proceeding, where more than one beneficiary may have an interest and identifying who should be reporting may be problematic, or was it also thinking about orderly probate administration, where the personal representative/executor may have as much authority/control/discretion as a trustee would? When 31 CFR § 1010.380(a)(2)(iii) mentions settling estates, it refers to both intestate and testate estates, so Treasury must have realized that a personal representative/executor may be appointed but did not suggest that appointment as being a reporting trigger. The preamble said that, when the estate is settled, "the reporting company is required to file an updated report at that time, removing the deceased former beneficial owner and, to the extent appropriate, identifying any new beneficial owners."

- Arguably, for a business interest passing through probate, one could dispense with all of the analysis above until the business interest is distributed to one or more beneficiaries, because the estate is not yet "settled." However, until we get guidance from FinCEN expressly addressing these examples, one might err on the side of reporting sooner rather than later.

- Note that the estate settlement exception is an exception to reporting that the decedent is not longer an owner, rather than saying that an estate doesn't count as a beneficial owner. If an estate invests in a reporting company, the estate settlement exception does not apply, and the estate needs to be listed as a beneficial owner.

Now let's get down to the technical details:

31 CFR § 1010.380(d), "Beneficial owner," provides:

> For purposes of this section, the term ''beneficial owner,'' with respect to a reporting company, means any individual who, directly or indirectly, either exercises substantial control over such reporting company or owns or controls at least 25 percent of the ownership interests of such reporting company.

[1959] Instead of an adult child of sufficient age automatically be trustee of his or her own trust, the document requires that the child appoint himself or herself as trustee. That way, we have a chance to ask the child about coordinating trustee succession with his or her own estate plan. If (s)he can't be bothered with those questions, query whether (s)he is truly ready to be a fiduciary.

31 CFR § 1010.380(d)(2)(ii), "Ownership or control of ownership interest," provides:

> An individual may directly or indirectly own or control an ownership interest of a reporting company through any contract, arrangement, understanding, relationship, or otherwise.

31 CFR § 1010.380(d)(2)(ii)(C) discusses trust ownership or control:

> With regard to a trust or similar arrangement that holds such ownership interest:
>
> (1) As a trustee of the trust or other individual (if any) with the authority to dispose of trust assets;
>
> (2) As a beneficiary who:
>
> (i) Is the sole permissible recipient of income and principal from the trust; or
>
> (ii) Has the right to demand a distribution of or withdraw substantially all of the assets from the trust; or
>
> (3) As a grantor or settlor who has the right to revoke the trust or otherwise withdraw the assets of the trust….

ACTEC's comments on the proposed form of the above regulations explained trusts:

> The first trust structure is a "revocable trust" (also called a "living trust"). This is a trust created by an individual (called the "grantor" or "settlor") which normally also names the grantor as the initial trustee. The grantor further retains unfettered access to the assets of the trust during the grantor's lifetime, and retains the right to revoke or amend the trust in any manner during his or her lifetime. This trust is described in Prop. Reg. § 1010.380(d)(3)(ii)(C).
>
> Revocable trusts have become widely used over the last twenty or so years as the preferred instrument to provide for the distribution of assets at death (as opposed to under a Will) for the following primary reasons: (i) a revocable trust can serve as an effective vehicle for the management of assets in the event the grantor becomes incapacitated, (ii) transferring assets to a revocable trust before death allows those assets to pass outside of a court-supervised probate proceeding at death which can be time-consuming and expensive, (iii) a revocable trust may avoid the need to commence a probate court proceeding for the appointment of a successor trustee, and (iv) a revocable trust is not made public upon death whereas a Will filed in a probate court is a matter of public record.
>
> The second trust structure is a "discretionary trust". This is a trust created by an individual (called the "grantor" or "settlor") which names one or more individuals, excluding the grantor, or a corporation (such as a bank or trust company) as trustee(s). The trust is irrevocable and often intended to continue for multiple generations. The grantor designates a class of individuals (sometimes including charities) who can receive distributions from the trust at the discretion of the trustees. A common distribution clause might read, "My trustees may distribute to one or more of my descendants as much of the net income and principal of the trust as the trustees may at any time and from time to time determine in such amounts or proportions as the trustees may from time to time

> select for any purpose." It is also very common for discretionary trusts to last for the lifetime of the beneficiaries, with no specific age or milestone event triggering a binding requirement on the trustees to make a distribution or to terminate the trust. Particularly when substantial family wealth is involved, these trusts have become a prevalent since they allow for changing circumstances and provide a level of creditor protection since a trust with these terms is an unattractive target for claims by a divorcing spouse or other creditor of a descendant.
>
> It is obvious from this description of a discretionary trust that the trustee has very substantial powers over the assets held in the trust. This has led to many states enacting laws that allow for the grantor to limit the trustees' powers by dividing the powers among multiple parties (called "investment advisors", "distribution advisors" or "trust directors" among other names) and by providing for another individual (called a "trust protector") to have the power to remove and replace the trustee.
>
> Under traditional common law trust principles, trustees retained full responsibility (and liability) over how trust assets were managed, invested and distributed. More modern trust laws (enacted over the last twenty to thirty years) allow a trustee's duties, and liability for the performance or non-performance of those duties, to be allocated among the trustee and other individuals who may be more familiar with the family or better able to carry out certain trust objectives. For example, under Delaware law, a grantor can appoint a "distribution advisor" who is not the trustee but rather a trusted family member to oversee distributions from the trust, and can appoint an "investment advisor" who is not the trustee but perhaps the family financial advisor to make investment decisions. This division of the traditional roles of the trustee is very useful in situations where trusts hold concentrated investments or assets, such as a closely-held business or significant amounts of real estate. Professional trustees typically resist accepting investment responsibility for those trusts due to the specialised skills required and the potential liability associated with managing a closely held business and holding concentrated positions. Notably, trust "advisors" or "directors" are usually deemed to have the same fiduciary duties to the trust beneficiaries and exposure to liability for their actions or inactions as similarly situated trustees.

ACTEC further commented on burdens:

> As applied to situations in which a trust holds an ownership interest in a reporting company, the Proposed Regulations do not (and likely cannot) adequately address all situations in which an individual has a direct ownership or control interest, as explained in more depth in the response to Question 17(ii), below. The difficulty in complying with the Proposed Regulations when a reporting company is owned by an irrevocable discretionary trust is a function of the unique and multi-faceted nature of irrevocable discretionary trusts in the American legal system, beginning with the traditional bifurcation of beneficial enjoyment (which can take a variety of forms and structures) and control rights over trust property (which can further be divided among various parties to the trust including individual and corporate trustees, trust protectors, distribution advisors, and investment advisors, as set forth in our opening comments.
>
> Given the lack of a clear, objective rule applicable to irrevocable discretionary trusts, and the fact that reporting companies are potentially subject to sanctions, it is likely that a reporting company will assume a very significant burden to "over-comply" with the Proposed Regulations by gathering more information than is necessary or useful with

> regard to trusts which have an ownership interest in a reporting company. If there were more certainty that reporting companies are required to identify only those entities and individuals listed in Prop. Reg. § 1010.380(d)(3)(ii)(C), then the potential burden on reporting companies would be mitigated. In addition, as explained in more depth below, the potential for penalties for not reporting changes in the identities of beneficial owners within the relatively short timeframes adds to the burden on reporting companies….
>
> Prop. Reg. § 1010.380(d)(3)(ii)(C)(2) provides two clear provisions for determining which, if any, beneficiary would be considered to own or control an ownership interest of a reporting company.
>
> - Prop. Reg. § 1010.380(d)(3)(ii)(C)(2)(i) would include as a beneficial owner "a beneficiary who … [i]s the sole permissible recipient of income and principal from the trust…." As written, this provision would be easily interpreted – but we believe that the number of common law trusts that have only one beneficiary who is the sole permissible recipient of income and principal is limited. As described below, common law trusts are more likely to include multiple beneficiaries.
>
> - Prop. Reg. § 1010.380(d)(3)(ii)(C)(2)(ii) would include as a beneficial owner "a beneficiary who … [h]as the right to demand a distribution of or withdraw substantially all of the assets from the trust…." We think there are two complications with this provision.
>
>   - First, it is not clear what "substantially all" means. Would this be based upon a percentage of the assets, and if so, would a beneficiary's rights to withdraw assets over a period of years be considered on a cumulative basis?
>
>   - Second, and similar to the prior point, we believe that there are not many common law trusts that would fall into this category, other than revocable trusts and irrevocable trusts which grant a beneficiary the right to withdraw trust assets upon the occurrence of certain events, such as the beneficiary reaching a designated age, after achieving some external life milestone or after the death of other beneficiaries or individuals (which would probably be within the definition of Prop. Reg. § 1010.380(d)(3)(ii)(C)(3)(ii)).

Thus, omitting sprinkle trusts and disregarding contingent beneficiaries from being beneficial owners under these rules was done not from a lack of understanding that they exist but rather with an intent to simplify the rules.

31 CFR § 1010.380(d)(3), "Exceptions," provides:

> Notwithstanding any other provision of this paragraph (d), the term ''beneficial owner'' does not include:
>
> (i) A minor child, as defined under the law of the State or Indian tribe in which a domestic reporting company is created or a foreign reporting company is first registered, provided the reporting company reports the required information of a parent or legal guardian of the minor child as specified in paragraph (b)(2)(ii) of this section;

(ii) An individual acting as a nominee, intermediary, custodian, or agent on behalf of another individual;

(iii) An employee of a reporting company, acting solely as an employee, whose substantial control over or economic benefits from such entity are derived solely from the employment status of the employee, provided that such person is not a senior officer as defined in paragraph (f)(8) of this section;

(iv) An individual whose only interest in a reporting company is a future interest through a right of inheritance;

(v) A creditor of a reporting company. For purposes of this paragraph (d)(3)(v), a creditor is an individual who meets the requirements of paragraph (d) of this section solely through rights or interests for the payment of a predetermined sum of money, such as a debt incurred by the reporting company, or a loan covenant or other similar right associated with such right to receive payment that is intended to secure the right to receive payment or enhance the likelihood of repayment.

The exclusion for a minor children requires updating when the child attains majority as discussed in part II.G.30.c.ii Updated Reports: Estate Planning Issues.

The clause excluding agents, etc. helps advisors who are filling roles that are not discretionary. At first glance, it may seem to apply to a custodian under the Uniform Transfers to Minors Act or a similar statute, but I am less than certain that the title of "custodian" overrides the substance of that role being that of "a trustee of the trust or other individual (if any) with the authority to dispose of trust assets." Considering that a child's parent or legal guardian is substituted for the child in determining beneficial ownership, my preliminary view that a custodian of an UTMA account is more akin to the child's legal guardian. I tend to view the custodian exception as applying to the custodian of an IRA, brokerage account, or other asset that is merely being held for the true owner, as suggested by the preamble [footnote omitted]:

B. Nominees, Intermediaries, Custodians, and Agents

Proposed Rule. Proposed 31 CFR 1010.380(d)(4)(ii) reflected the exception provided in the CTA for an individual acting as a nominee, intermediary, custodian, or agent on behalf of another individual. Under this exception, reporting companies must report real parties in interest who exercise control indirectly, but not those who merely act on another individual's behalf in one of the specified capacities.

Comments Received. Multiple commenters expressed support for the proposed rule, and commenters generally did not oppose or seek clarification of this provision. However, under the rubric of proposed 31 CFR 1010.380(d)(1) (concerning what it means to exercise "substantial control" such that an individual qualifies as a beneficial owner), some commenters inquired about the treatment of certain retained professionals with an agency relationship, such as tax and legal professionals who have been designated as an agent under IRS Form 2848 (Power of Attorney and Declaration of Representative), whom these commenters viewed as exercising substantial influence in practical terms when they perform services within the scope of their duties.

Final Rule. FinCEN is adopting 31 CFR 1010.380(d)(4)(ii) as proposed but renumbered as 31 CFR 1010.380(d)(3)(ii). FinCEN emphasizes the obligation of a reporting company

> to report identifying information of the individual on whose behalf a nominee, intermediary, custodian, or agent is acting. However, as explained in Section III.C.i regarding the treatment of tax professionals and other similarly situated professionals, such a professional would not need to be reported if the individual is acting as a nominee, intermediary, custodian, or agent of an individual who is reported. Moreover, as explained in Section III.C.i regarding the application of final 31 CFR 1010.380(d)(1)(i)(C), FinCEN does not envision that the performance of ordinary, arms-length advisory or other contractual services to a reporting company would provide an individual with the power to direct or determine, or have substantial influence over, important decisions of a reporting company.

How about a corporate trustee? ACTEC expressed concern about their employees needing to report. Do they meet the "employee of a reporting company" exception?
31 CFR § 1010.380(c)(2) has many exclusions that will probably apply to a corporate trustee, so I am unsure of the answer.

As to a definition in the proposed regulation that was retained in the final regulations: "a trustee of the trust or other individual (if any) with the authority to dispose of trust assets," ACTEC expressed concern:

> Prop. Reg. § 1010.380(d)(3)(ii)(C)(1) would include as a beneficial owner "a trustee of the trust or other individual (if any) with the authority to dispose of trust assets". In many cases, the application of this provision would be straight forward, such as when one or more individuals is serving as trustee, and even in the less common situation in which an individual not serving as trustee has the authority to dispose of trust assets, such as, for example, a trust in which a beneficiary has an inter vivos power of appointment to direct the distribution of trust assets to or for a class of potential appointees. But how is this provision to be applied when an entity is serving as trustee? Would the reporting company be required to determine what individuals (such as employees) within that entity might fit within this provision? If so, what if no single individual has the authority to act on behalf of the entity serving as trustee (such as when, as an example, material distributions are only made by a committee)? How is this provision to be applied in a situation in which the ordinary roles of a trustee are divided among multiple parties, who may or may not be called "trustees," such as distribution advisors, investment direction advisors, trust protectors, etc.? In those circumstances, what does it mean to "otherwise dispose of trust assets?"

The preamble to the final regulations explains:

> The final rule also renumbers 31 CFR 1010.380(d)(2), "Direct or Indirect Exercise of Substantial Control," as 31 CFR 1010.380(d)(1)(ii) and makes certain modifications to the paragraph. First, the final rule inserts the clause "including as a trustee of a trust or similar arrangement" into the introductory text in paragraph (d)(1)(ii). This addition underscores that the trustee of a trust or similar arrangement can exercise substantial control over a reporting company through the types of relationships outlined in the paragraph. Depending on the particular facts and circumstances, trusts may serve as a mechanism for the exercise of substantial control. Furthermore, "trusts or similar arrangements" can take a wide range of forms. Accordingly, FinCEN finds it appropriate - and directly responsive to comments that requested clarification on this point - to specify that a trustee of a trust can, in fact, exercise substantial control over a reporting

> company through the exercise of his or her powers as a trustee over the corpus of the trust, for example, by exercising control rights associated with shares held in trust.

It later continues:

> After considering these comments, however, FinCEN adopts the proposed rule without change. Assets, such as the ownership interests of a reporting company, can be held in trust. The final rule identifies the trustee as an individual who will be deemed to control trust assets for the purpose of determining which individuals own or control 25 percent of the ownership interests of the reporting company. In addition to trustees, the final rule specifies that other individuals with authority to control or dispose of trust assets are considered to own or control the ownership interests in a reporting company that are held in trust. The final rule identifies circumstances in which ownership interests held in trust will be considered as owned or controlled by a beneficiary: if the beneficiary is the sole permissible recipient of income and principal from the trust, or if the beneficiary has the right to demand a distribution of, or withdraw substantially all, of the assets in the trust. In addition, trust assets will be considered as owned or controlled by a grantor or settlor who has the right to revoke the trust or withdraw its assets. One consequence of this - to confirm the reading that one comment suggested was possible and requested clarification on - is that, depending on the specifics of the trust arrangement, the ownership interests held in trust could be considered simultaneously as owned or controlled by multiple parties in a trust arrangement.[170]
>
> > [170] Such an outcome is not unique to the circumstance of trusts. For example, joint ownership of an undivided interest in ownership interests of a reporting company can result in the same assets being attributed to all of the joint owners. See 31 CFR 1010.380(d)(2)(ii)(A).

II.G.30.c.ii. Updated Reports: Estate Planning Issues

31 CFR § 1010.380(a)(2) requires updates that include:

> (iii) If an individual is a beneficial owner of a reporting company by virtue of property interests or other rights subject to transfer upon death, and such individual dies, a change with respect to required information will be deemed to occur when the estate of the deceased beneficial owner is settled, either through the operation of the intestacy laws of a jurisdiction within the United States or through a testamentary deposition. The updated report shall, to the extent appropriate, identify any new beneficial owners.
>
> (iv) If a reporting company has reported information with respect to a parent or legal guardian of a minor child pursuant to paragraphs (b)(2)(ii) and (d)(3)(i) of this section, a change with respect to required information will be deemed to occur when the minor child attains the age of majority.

The preamble addressed change in ownership by reason of death:

> Proposed 31 CFR 1010.380(a)(2)(ii) provided that if an individual is a beneficial owner of a reporting company because the individual owns at least 25 percent of the ownership interests of the reporting company, and such beneficial owner dies, a change with respect to the required information will be deemed to occur when the estate of the

deceased beneficial owner is settled. This proposed rule sought to clarify that a reporting company is not required to immediately file an updated report to notify FinCEN of the death of a beneficial owner. However, when the estate of a deceased beneficial owner is settled either through the operation of the intestacy laws of a jurisdiction within the United States or through a testamentary disposition, the reporting company is required to file an updated report at that time, removing the deceased former beneficial owner and, to the extent appropriate, identifying any new beneficial owners.

The preamble further discusses the probate delay:

D. Inheritance

Proposed Rule. Proposed 31 CFR 1010.380(d)(4)(iv) clarified that the inheritor exception in the CTA refers to a “future” interest associated with a right of inheritance, not a present interest that a person may acquire as a result of exercising such a right. The CTA's definition of “beneficial owner” excludes “an individual whose only interest” in the entity “is through a right of inheritance.”[181] In proposing this clarification to the inheritor exception, FinCEN sought to clarify that individuals who may in the future come to own ownership interests in an entity through a right of inheritance do not have ownership until the inheritance occurs. But once an ownership interest is inherited and comes to be owned by an individual, that individual has the same relationship to an entity as any other individual who has acquired an ownership interest through another means.

[181] 31 U.S.C. 5336(a)(3)(B)(iv).

Comments Received. Commenters asked that FinCEN provide more clarity with respect to the application of the inheritor exception. One commenter suggested providing a specific definition of a “right of inheritance,” which could, for example, describe situations in which the inheritor exception would apply in the probate process. Another commenter suggested outlining the mechanisms that would constitute “inheritance” under this exception.

Final Rule. The final rule adopts the proposed 31 CFR 1010.380(d)(4)(iv) without change, other than renumbering as 31 CFR 1010.380(d)(3)(iv). As stated in the proposed rule, FinCEN emphasizes that once an individual has acquired an ownership interest in an entity through inheritance, that individual owns that ownership interest and is potentially subject to the beneficial-owner reporting requirements. Individuals who may in the future come to own ownership interests in an entity through a right of inheritance do not have ownership interests until the inheritance occurs. Such a future or contingent interest may exist through wills or other probate mechanisms that solely provide a future interest in an entity. But once an ownership interest is inherited and comes to be owned by an individual, that individual has the same relationship to an entity as any other individual who acquires an ownership interest through another means.

The precise moment at which an individual acquires an ownership interest in an entity through inheritance may be subject to a variety of existing legal authorities, such as the terms of a will, the terms of a trust, applicable state laws, and other valid instruments and rules. FinCEN intends the application of the inheritor exception, and the meaning of a “right of inheritance” in this paragraph (d)(3)(iv), to conform to the governing legal

> authorities. Should those authorities not provide sufficient direction for purposes of this inheritor exception, FinCEN is prepared to consider supplemental guidance or FAQs.

When is the estate of the deceased beneficial owner "settled, either through the operation of the intestacy laws of a jurisdiction within the United States or through a testamentary deposition"? Does that mean when every single action has been taken to terminate the estate? Or does it mean when the business interest is allocated or distributed? These ideas are explored more in the text accompanying fn 1958 in part II.G.30.c.i Trusts and the Corporate Transparency Act.

ACTEC's comments on the proposed regulations expressed concern about how a reporting company could keep track of beneficiaries:

> Finally, we believe the penalties associated with the failure to report complete or updated beneficial ownership information should be revised as it pertains to information a reporting company receives from a trustee. Without the trustee providing the reporting company information, the reporting company will unlikely be able to fulfill its reporting obligations. This is similar to how a CPA receives information from a taxpayer to prepare income tax returns. For example, even if the reporting company has a copy of the trust agreement, it is often the case that beneficiaries are referred to not by name, but as a class, *e.g.*, the "settlor's descendants," to address the settlor's desire to include as beneficiaries descendants born after settlement of the trust. The reporting company will not necessarily know this information. If a reporting company receives information from a trustee as to who the beneficial owners are, and the reporting company reasonably relies on that information and submits the report based on that information that later turns out to be inaccurate or incomplete, the reporting company should not be liable or penalized as it relied on the information provided to it. Moreover, if a reporting company does not include ownership information in an initial or updated report due to its inability to obtain the necessary information from the trustee or other owners after reasonable efforts to do so, it should not be liable or penalized. The regulations should clearly state that no penalties, not even penalties for non-wilful situations, should apply in such situations. In particular, unless final regulations provide clear guidance on who must be included in the CTA report, particularly as to who is deemed to own 25% of the ownership interests in a reporting company held by a trust with multiple beneficiaries and under which the trustee has full discretion to distribute (or not) net income and principal, no penalties should be assessed, provided the reporting company acts in good faith and takes all reasonable steps to identify trust individuals who must be reported.
>
> The Proposed Regulations also include penalties for the failure to provide an updated beneficial ownership report to FinCEN within 30 days of learning of the change. In the context of a trust, this timeframe is too short to identify and report on a change at the trust level by a reporting company that may have no visibility on what is happening, at least with respect to the beneficiaries.[1] There are numerous situations that may give rise to a change in beneficial ownership, *i.e.*, a minor turns 18, a beneficiary who was a beneficial owner dies, a power under the trust is exercised to add or remove a beneficiary, etc. If any type of change must be reported within 30 days, the reporting company would need to follow up with the trustee at least every few weeks to determine if there had been any changes. In the notice of proposed rulemaking, there is a comment that to allow the reporting companies to report on an annual basis could cause significant degradation and accuracy and usefulness of the beneficial ownership information. However, if the requirement to provide updated information within 30 days is limited to changes in the trustee, FinCEN will always have a means to collect additional

information on the trust beneficiaries by simply contacting the trustee if questions arise prior to the annual report being filed. Perhaps with the exception of changes to the trustee, the reporting company should be required to report any changes through an annual filing, which would only be required if changes occurred during the prior year.

[1] We do not dispute that a change of trustee should be reported within 30 days.

We therefore suggest four modifications to the Proposed Regulations. First, if a trust owns an ownership interest in a reporting company, we believe the reporting company should be permitted to list (i) the trustee and other individual(s), if any, described in Prop. Reg. § 1010.380(d)(3)(ii)(C)(1)) as the only individual(s) who might exercise direct or indirect substantial control, (ii) beneficiaries described in Prop. Reg. § 1010.380(d)(3)(ii)(C)(2), and (iii) a grantor or settlor described in of Prop. Reg. § 1010.380(d)(3)(ii)(C)(3). In other words, the regulation should be clarified to state that the individuals identified in subparagraph (C) are exhaustive.

Second, we suggest that a reporting company that reasonably relies on information provided by a trustee as to whether any beneficiary or other individual should be included in the report shall not be subject to penalties if that information is later determined to be inaccurate or incomplete.

Third, we suggest that FinCEN lengthen the timeframe for a reporting company to report on beneficial ownership changes with respect to beneficiaries of trusts from the 30 days as currently proposed to one year for changes other than a change to the trustee.

Fourth, we suggest that if a bank or trust company is serving as trustee of a trust and has the authority to dispose of trust assets, the trustee itself and not any of its employees should be reported by the reporting company as a beneficial owner.

II.G.30.c.iii. Information about Trusts & Estates to be Gathered

Documentation of title needs to be gathered:

- For a partnership or LLC, look to the partnership or operating agreement and any documentation of transfers, such as an assignment. On rare occasions such interests are evidenced by a certificate of ownership, but the partnership or operating agreement determines what that certificate really means.

- For a corporation, look for stock certificates and stock powers transferring stock. Look for any restrictions on transfer evidenced by the stock certificate or in articles of incorporation, a shareholder agreement, or other arrangement restricting transfer.

If an individual holding a business interest dies, consider whether it might pass automatically to:

- A surviving joint owner, through joint tenancy with right of survivorship or tenancy-by-the-entirety. If held by a married couple without being specifically referring to either of the above, applicable state law might nevertheless imply such an arrangement. if none of the above, then co-ownership may be tenancy in common, in which case the decedent's business interest is a probate asset.

- A beneficiary of a nonprobate transfer, through a transfer on death (TOD) or payable on death (POD) arrangement.

If none of the above applies, then the business interest may be a probate asset. In that case, obtain a copy of:

- The decedent's will.
- A court order approving the will.
- Letters testamentary or letters of administration appointing a personal representative, executor, or administrator.
- Inventory, listing the probate estate's assets, including the business interest.
- Documentation of distributing the business interest, which may be a statement of account, agreement of or with beneficiaries, or court order.

Wills frequently direct that the residue of the estate pass to a (formerly) revocable trust.

While the grantor of a revocable trust is living, the grantor is the beneficial owner, and so is any co-trustee. When the grantor dies, one or more persons other than the grantor serve as trustee. Sometimes others have control over a trust's assets that may constitute authority to dispose of the trust's assets, and these persons are also beneficial owners. A thorough review of the instrument creating the trust – a trust agreement or declaration (or a will if the trust is created under the will) – is required to determine who is the beneficial owner. A complete copy of one or more of the following documents that may exist are required to determine the beneficial owners:

- The trust agreement/declaration, including any amendments (or will, if the trust was created under a will).
- Trustee resignation, death certificate, or other evidence of ceasing to serve
- Appointment of trustee, trust adviser, trust director, or trust protector
- Exercise of power to change trustee
- Exercise of power of appointment
- Nonjudicial settlement agreement or other agreement by or with the beneficiary(ies)

It may be advisable to obtain a trustee certification verifying who is the trustee and who else may have "authority to dispose of trust assets" under 31 CFR § 1010.380(d)(2)(ii)(C)(1). The certification could also list any beneficiary who is a beneficial owner under 31 CFR § 1010.380(d)(2)(ii)(C)(2). Most states have statutes providing formalities regarding reliance on a trustee's certification; an example is RSMo § 456.10-1013 or 760 ILCS 3/1013. Although those formalities generally do not impose a duty to update, one may ask a trustee to undertake such a duty. Consider including that as a condition of approving the transfer of a business interest to a trust.

If the business entity is taxed as an S corporation, important tax elections may be required or advisable as soon as two months and 15 days after a trust's primary beneficiary's death (although often they might not be required until 2+ years after death). See parts III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, III.A.3.c Deadlines for Trust Qualifying as S Corporation Shareholder, and III.A.3.e.i.(b) QSST Issues When Beneficiary Dies.

II.G.30.c.iv. ACTEC/ALI-CLE Webinar January 26, 2023

For Reporting Companies formed before January 1, 2024, deadline is January 1, 2025. For all other Reporting Companies, within 30 calendar days after formation. Same deadline for updating changes. Here is a link to: *Content, form, and manner of reports*.

From slides prepared by G. Fletcher, G. Fox, and R. Malviya from an ACTEC/ALI-CLE webinar January 26, 2023:

Beneficial Owner exceptions under 31 USC §5336(a)(3)(B) and 31 CFR § 1010.380(d)(3):

- Minor Children, provided the Reporting Company reports the required information of a parent or legal guardian of the minor child

- Nominee, intermediary, custodian, or agent on behalf of another individual

- Employee of Reporting Company, provided that such person is not a senior officer

- Creditors

- Right of Inheritance:

    - CTA provides that Beneficial Owner excludes "an individual whose only interest ... is through a right of inheritance."

    - Final Regulations repeat this phrase with an added clarification, stating that this exception applies to a "future" interest associated with a right of inheritance.

Right of Inheritance (Cont'd.) - FinCEN emphasizes in preamble to Final Regulations that:

- Once an individual has acquired an ownership interest in an entity through inheritance, that individual owns that ownership interest and is potentially subject to the beneficial-owner reporting requirements.

- Individuals who may in the future come to own ownership interests in an entity through a right of inheritance do not have ownership interests until the inheritance occurs. Such a future or contingent interest may exist through wills or other probate mechanisms that solely provide a future interest in an entity.

- Once an ownership interest is inherited and comes to be owned by an individual, that individual has the same relationship to an entity as any other individual who acquires an ownership interest through another means.

- The precise moment at which an individual acquires an ownership interest in an entity through inheritance may be subject to a variety of existing legal authorities, such as the terms of a will, the terms of a trust, applicable state laws, and other valid instruments and rules.

- FinCEN intends the application of the inheritor exception, and the meaning of a “right of inheritance” in 31 CFR § 1010.380(d)(3), to conform to the governing legal authorities. Should those authorities not provide sufficient direction for purposes of this inheritor exception, FinCEN is prepared to consider supplemental guidance or FAQs.

A “Company Applicant” under 31 USC §5336(a)(2) and 31 CFR § 1010.380(e) is anyone who directly files the document that:

- Creates a domestic Reporting Company;

- First registers a foreign Reporting Company; and

- Individual who is “primarily responsible” for directing or controlling such filing if more than one individual is involved in the filing of the document.

The initial report of a Reporting Company formed on or after January 1, 2024, must include the required information under the CTA for the Company Applicant (as well as for the Reporting Company itself and all Beneficial Owners) under 31 CFR § 1010.380(b)(1).

II.G.30.c.v. Beneficial Ownership Information Reporting Rule Fact Sheet

On September 29, 2022, final regulations were explained by a “Beneficial Ownership Information Reporting Rule Fact Sheet”:

> Today, the Financial Crimes Enforcement Network (FinCEN) issued a final rule implementing the bipartisan Corporate Transparency Act’s (CTA) beneficial ownership information (BOI) reporting provisions. The rule will enhance the ability of FinCEN and other agencies to protect U.S. national security and the U.S. financial system from illicit use and provide essential information to national security, intelligence, and law enforcement agencies; state, local, and Tribal officials; and financial institutions to help prevent drug traffickers, fraudsters, corrupt actors such as oligarchs, and proliferators from laundering or hiding money and other assets in the United States.
>
> The rule describes who must file a BOI report, what information must be reported, and when a report is due. Specifically, the rule requires reporting companies to file reports with FinCEN that identify two categories of individuals: (1) the beneficial owners of the entity; and (2) the company applicants of the entity….
>
> **Reporting Companies**
>
> - The rule identifies two types of **reporting companies**: domestic and foreign. A domestic reporting company is a corporation, limited liability company (LLC), or any entity created by the filing of a document with a secretary of state or any similar office under the law of a state or Indian tribe. A foreign reporting company is a corporation, LLC, or other entity formed under the law of a foreign country that is registered to do business in any state or tribal jurisdiction by the filing of a document with a secretary of state or any similar office.

Under the rule, and in keeping with the CTA, twenty-three types of entities are exempt from the definition of "reporting company."

- FinCEN expects that these definitions mean that reporting companies will include (subject to the applicability of specific exemptions) limited liability partnerships, limited liability limited partnerships, business trusts, and most limited partnerships, in addition to corporations and LLCs, because such entities are generally created by a filing with a secretary of state or similar office.

- Other types of legal entities, including certain trusts, are excluded from the definitions to the extent that they are not created by the filing of a document with a secretary of state or similar office. FinCEN recognizes that in many states the creation of most trusts typically does not involve the filing of such a formation document.

Beneficial Owners

- Under the rule, a **beneficial owner** includes any individual who, directly or indirectly, either (1) exercises substantial control over a reporting company, or (2) owns or controls at least 25 percent of the ownership interests of a reporting company. The rule defines the terms "substantial control" and "ownership interest." In keeping with the CTA, the rule exempts five types of individuals from the definition of "beneficial owner."

- In defining the contours of who has **substantial control**, the rule sets forth a range of activities that could constitute substantial control of a reporting company. This list captures anyone who is able to make important decisions on behalf of the entity. FinCEN's approach is designed to close loopholes that allow corporate structuring that obscures owners or decision-makers. This is crucial to unmasking anonymous shell companies.

- The rule provides standards and mechanisms for determining whether an individual owns or controls 25 percent of the **ownership interests** of a reporting company. Among other things, these standards and mechanisms address how a reporting company should handle a situation in which ownership interests are held in trust.

- These definitions have been drafted to account for the various ownership or control structures reporting companies may adopt. However, for reporting companies that have simple organizational structures it should be a straightforward process to identify and report their beneficial owners. FinCEN expects the majority of reporting companies will have simple ownership structures.

Company Applicants

- The rule defines a company applicant to be only two persons:
    - the individual who directly files the document that creates the entity, or in the case of a foreign reporting company, the document that first registers the entity to do business in the United States.
    - the individual who is primarily responsible for directing or controlling the filing of the relevant document by another.

- The rule, however, does not require reporting companies existing or registered at the time of the effective date of the rule to identify and report on their company applicants. In addition, reporting companies formed or registered after the effective date of the rule also do not need to update company applicant information.

Beneficial Ownership Information Reports

- When filing BOI reports with FinCEN, the rule requires a reporting company to identify itself and report four pieces of information about each of its beneficial owners: name, birthdate, address, and a unique identifying number and issuing jurisdiction from an acceptable identification document (and the image of such document). Additionally, the rule requires that reporting companies created after January 1, 2024, provide the four pieces of information and document image for company applicants.

- If an individual provides their four pieces of information to FinCEN directly, the individual may obtain a "FinCEN identifier," which can then be provided to FinCEN on a BOI report in lieu of the required information about the individual.

Timing

- The effective date for the rule is January 1, 2024.

- Reporting companies created or registered before January 1, 2024 will have one year (until January 1, 2025) to file their initial reports, while reporting companies created or registered after January 1, 2024, will have 30 days after receiving notice of their creation or registration to file their initial reports.

- Reporting companies have 30 days to report changes to the information in their previously filed reports and must correct inaccurate information in previously filed reports within 30 days of when the reporting company becomes aware or has reason to know of the inaccuracy of information in earlier reports.

Next Steps

- The BOI reporting rule is one of three rulemakings planned to implement the CTA. FinCEN will engage in additional rulemakings to (1) establish rules for who may access BOI, for what purposes, and what safeguards will be required to ensure that the information is secured and protected; and (2) revise FinCEN's customer due diligence rule following the promulgation of the BOI reporting final rule.

- In addition, FinCEN continues to develop the infrastructure to administer these requirements in accordance with the strict security and confidentiality requirements of the CTA, including the information technology system that will be used to store beneficial ownership information: the Beneficial Ownership Secure System (BOSS).

- Consistent with its obligations under the Paperwork Reduction Act, FinCEN will publish in the Federal Register for public comment the reporting forms that persons will use to comply with their obligations under the BOI reporting rule. FinCEN will publish these forms well in advance of the effective date of the BOI reporting rule.

- FinCEN will develop compliance and guidance documents to assist reporting companies in complying with this rule. Some of these materials will be aimed directly at, and made available to, reporting companies themselves. FinCEN will issue a Small Entity Compliance Guide, pursuant to section 212 of the Small Business Regulatory Enforcement Fairness Act of 1996, in order to inform small entities about their responsibilities under the rule. Other materials will be aimed at a wide range of stakeholders that are likely to receive questions about the rule, such as secretaries of state and similar offices. FinCEN also intends to conduct extensive outreach to all stakeholders, including industry associations as well as secretaries of state and similar offices to ensure the effective implementation of the rule.

II.G.30.c.vi. Statute

Section 6401 provides the Act's short title. Section 6405, "Sense of Congress," provides:

It is the sense of Congress that -

(1) more than 2,000,000 corporations and limited liability companies are being formed under the laws of the States each year;

(2) most or all States do not require information about the beneficial owners of the corporations, limited liability companies, or other similar entities formed under the laws of the State;

(3) malign actors seek to conceal their ownership of corporations, limited liability companies, or other similar entities in the United States to facilitate illicit activity, including money laundering, the financing of terrorism, proliferation financing, serious tax fraud, human and drug trafficking, counterfeiting, piracy, securities fraud, financial fraud, and acts of foreign corruption, harming the national security interests of the United States and allies of the United States;

(4) money launderers and others involved in commercial activity intentionally conduct transactions through corporate structures in order to evade detection, and may layer such structures, much like Russian nesting "Matryoshka" dolls, across various secretive jurisdictions such that each time an investigator obtains ownership records for a domestic or foreign entity, the newly identified entity is yet another corporate entity, necessitating a repeat of the same process;

(5) Federal legislation providing for the collection of beneficial ownership information for corporations, limited liability companies, or other similar entities formed under the laws of the States is needed to—

(A) set a clear, Federal standard for incorporation practices;

(B) protect vital Unites States national security interests;

(C) protect interstate and foreign commerce;

(D) better enable critical national security, intelligence, and law enforcement efforts to counter money laundering, the financing of terrorism, and other illicit activity; and

(E) bring the United States into compliance with international anti-money laundering and countering the financing of terrorism standards;

(6) beneficial ownership information collected under the amendments made by this title is sensitive information and will be directly available only to authorized government authorities, subject to effective safeguards and controls, to -

(A) facilitate important national security, intelligence, and law enforcement activities; and

(B) confirm beneficial ownership information provided to financial institutions to facilitate the compliance of the financial institutions with anti-money laundering, countering the financing of terrorism, and customer due diligence requirements under applicable law;

(7) consistent with applicable law, the Secretary of the Treasury shall -

(A) maintain the information described in paragraph (1) in a secure, nonpublic database, using information security methods and techniques that are appropriate to protect nonclassified information systems at the highest security level; and

(B) take all steps, including regular auditing, to ensure that government authorities accessing beneficial ownership information do so only for authorized purposes consistent with this title; and

(8) in prescribing regulations to provide for the reporting of beneficial ownership information, the Secretary shall, to the greatest extent practicable consistent with the purposes of this title -

(A) seek to minimize burdens on reporting companies associated with the collection of beneficial ownership information;

(B) provide clarity to reporting companies concerning the identification of their beneficial owners; and

(C) collect information in a form and manner that is reasonably designed to generate a database that is highly useful to national security, intelligence, and law enforcement agencies and Federal functional regulators.

Section 6403 of the Act, “Beneficial Ownership Information Reporting Requirements,” provides in subsection (a), “In General:”

Subchapter II of chapter 53 of title 31, United States Code, as amended by sections 6306(a)(1), 6307(a), and 6313(a) of this division, is amended by adding at the end the following:

§ 5336. Beneficial ownership information reporting requirements

(a) DEFINITIONS.—In this section:

(1) ACCEPTABLE IDENTIFICATION DOCUMENT.—The term ‘acceptable identification document’ means, with respect to an individual -

(A) a nonexpired passport issued by the United States;

(B) a nonexpired identification document issued by a State, local government, or Indian Tribe to the individual acting for the purpose of identification of that individual;

(C) a nonexpired driver's license issued by a State; or

(D) if the individual does not have a document described in subparagraph (A), (B), or (C), a nonexpired passport issued by a foreign government.

(2) APPLICANT. The term 'applicant' means any individual who -

"(A) files an application to form a corporation, limited liability company, or other similar entity under the laws of a State or Indian Tribe; or

"(B) registers or files an application to register a corporation, limited liability company, or other similar entity formed under the laws of a foreign country to do business in the United States by filing a document with the secretary of state or similar office under the laws of a State or Indian Tribe.

(3) BENEFICIAL OWNER. The term "beneficial owner" -

(A) means, with respect to an entity, an individual who, directly or indirectly, through any contract, arrangement, understanding, relationship, or otherwise -

(i) exercises substantial control over the entity; or

(ii) owns or controls not less than 25 percent of the ownership interests of the entity; and

(B) does not include -

(i) a minor child, as defined in the State in which the entity is formed, if the information of the parent or guardian of the minor child is reported in accordance with this section;

(ii) an individual acting as a nominee, intermediary, custodian, or agent on behalf of another individual;

(iii) an individual acting solely as an employee of a corporation, limited liability company, or other similar entity and whose control over or economic benefits from such entity is derived solely from the employment status of the person;

(iv) an individual whose only interest in a corporation, limited liability company, or other similar entity is through a right of inheritance; or

(v) a creditor of a corporation, limited liability company, or other similar entity, unless the creditor meets the requirements of subparagraph (A).

(4) DIRECTOR. The term “Director” means the Director of FinCEN.

(5) FINCEN. The term “FinCEN” means the Financial Crimes Enforcement Network of the Department of the Treasury.

(6) FINCEN IDENTIFIER. The term “FinCEN identifier” means the unique identifying number assigned by FinCEN to a person under this section.

(7) FOREIGN PERSON. The term “foreign person” means a person who is not a United States person, as defined in section 7701(a) of the Internal Revenue Code of 1986.

(8) INDIAN TRIBE. The term “Indian Tribe” has the meaning given the term “Indian tribe” in section 102 of the Federally Recognized Indian Tribe List Act of 1994 (25 U.S.C. 5130).

(9) LAWFULLY ADMITTED FOR PERMANENT RESIDENCE. The term “lawfully admitted for permanent residence” has the meaning given the term in section 101(a) of the Immigration and Nationality Act (8 U.S.C. 1101(a)).

(10) POOLED INVESTMENT VEHICLE. The term “pooled investment vehicle” means -

(A) any investment company, as defined in section 3(a) of the Investment Company Act of 1940 (15 U.S.C. 80a-3(a)); or

(B) any company that -

(i) would be an investment company under that section but for the exclusion provided from that definition by paragraph (1) or (7) of section 3(c) of that Act (15 U.S.C. 80a-3(c)); and

(ii) is identified by its legal name by the applicable investment adviser in its Form ADV (or successor form) filed with the Securities and Exchange Commission.

(11) REPORTING COMPANY. The term “reporting company” -

(A) means a corporation, limited liability company, or other similar entity that is -

(i) created by the filing of a document with a secretary of state or a similar office under the law of a State or Indian Tribe; or

(ii) formed under the law of a foreign country and registered to do business in the United States by the filing of a document with a secretary of state or a similar office under the laws of a State or Indian Tribe; and

(B) does not include -

(i) an issuer -

(I) of a class of securities registered under section 12 of the Securities Exchange Act of 1934 (15 U.S.C. 781); or

(II) that is required to file supplementary and periodic information under section 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 780(d));

(ii) an entity -

(I) established under the laws of the United States, an Indian Tribe, a State, or a political subdivision of a State, or under an interstate compact between 2 or more States; and

(II) that exercises governmental authority on behalf of the United States or any such Indian Tribe, State, or political subdivision;

(iii) a bank, as defined in -

(I) section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813);

(II) section 2(a) of the Investment Company Act of 1940 (15 U.S.C. 80a-2(a)); or

(III) section 202(a) of the Investment Advisers Act of 1940 (15 U.S.C. 80b-2(a));

(iv) a Federal credit union or a State credit union (as those terms are defined in section 101 of the Federal Credit Union Act (12 U.S.C. 1752));

(v) a bank holding company (as defined in section 2 of the Bank Holding Company Act of 1956 (12 U.S.C. 1841)) or a savings and loan holding company (as defined in section 10(a) of the Home Owners" Loan Act (12 U.S.C. 1467a(a)));

(vi) a money transmitting business registered with the Secretary of the Treasury under section 5330;

(vii) a broker or dealer (as those terms are defined in section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c)) that is registered under section 15 of that Act (15 U.S.C. 78o);

(viii) an exchange or clearing agency (as those terms are defined in section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c)) that is registered under section 6 or 17A of that Act (15 U.S.C. 78f, 78q-1);

(ix) any other entity not described in clause (i), (vii), or (viii) that is registered with the Securities and Exchange Commission under the Securities Exchange Act of 1934 (15 U.S.C. 78a et seq.);

(x) an entity that -

(I) is an investment company (as defined in section 3 of the Investment Company Act of 1940 (15 U.S.C. 80a-3)) or an investment adviser (as defined in section 202 of the Investment Advisers Act of 1940 (15 U.S.C. 80b-2)); and

(II) is registered with the Securities and Exchange Commission under the Investment Company Act of 1940 (15 U.S.C. 80a-1 et seq.) or the Investment Advisers Act of 1940 (15 U.S.C. 80b-1 et seq.);

(xi) an investment adviser -

(I) described in section 203(l) of the Investment Advisers Act of 1940 (15 U.S.C. 80b-3(l)); and

(II) that has filed Item 10, Schedule A, and Schedule B of Part IA of Form ADV, or any successor thereto, with the Securities and Exchange Commission;

(xii) an insurance company (as defined in section 2 of the Investment Company Act of 1940 (15 U.S.C. 80a-2));

(xiii) an entity that -

(I) is an insurance producer that is authorized by a State and subject to supervision by the insurance commissioner or a similar official or agency of a State; and

(II) has an operating presence at a physical office within the United States;

(xiv) (I) a registered entity (as defined in section la of the Commodity Exchange Act (7 U.S.C. la)); or

(II) an entity that is -

(aa)(AA) a futures commission merchant, introducing broker, swap dealer, major swap participant, commodity pool operator, or commodity trading advisor (as those terms are defined in section la of the Commodity Exchange Act (7 U.S.C. la)); or

(BB) a retail foreign exchange dealer, as described in section 2(c)(2)(B) of that Act (7 U.S.C. 2(c)(2)(B)); and

(bb) registered with the Commodity Futures Trading Commission under the Commodity Exchange Act (7 U.S.C. 1 et seq.);

(xv) a public accounting firm registered in accordance with section 102 of the Sarbanes-Oxley Act of 2002 (15 U.S.C. 7212);

(xvi) a public utility that provides telecommunications services, electrical power, natural gas, or water and sewer services within the United States;

(xvii) a financial market utility designated by the Financial Stability Oversight Council under section 804 of the Payment, Clearing, and Settlement Supervision Act of 2010 (12 U.S.C. 5463);

(xviii) any pooled investment vehicle that is operated or advised by a person described in clause (iii), (iv), (vii), (x), or (xi);

(xix) any -

(I) organization that is described in section 501(c) of the Internal Revenue Code of 1986 (determined without regard to section 508(a) of such Code) and exempt from tax under section 501(a) of such Code, except that in the case of any such organization that loses an exemption from tax, such organization shall be considered to be continued to be described in this subclause for the 180-day period beginning on the date of the loss of such tax-exempt status;

(II) political organization (as defined in section 527(e)(1) of such Code) that is exempt from tax under section 527(a) of such Code; or

(III) trust described in paragraph (1) or (2) of section 4947(a) of such Code;

(xx) any corporation, limited liability company, or other similar entity that -

(I) operates exclusively to provide financial assistance to, or hold governance rights over, any entity described in clause (xix);

(II) is a United States person;

(III) is beneficially owned or controlled exclusively by 1 or more United States persons that are United States citizens or lawfully admitted for permanent residence; and

(IV) derives at least a majority of its funding or revenue from 1 or more United States persons that are United States citizens or lawfully admitted for permanent residence;

(xxi) any entity that -

(I) employs more than 20 employees on a full-time basis in the United States;

(II) filed in the previous year Federal income tax returns in the United States demonstrating more than $5,000,000 in gross receipts or sales in the aggregate, including the receipts or sales of -

(aa) other entities owned by the entity; and

(bb) other entities through which the entity operates; and

(III) has an operating presence at a physical office within the United States;

(xxii) any corporation, limited liability company, or other similar entity of which the ownership interests are owned or controlled, directly or indirectly, by 1 or more entities described in clause (i), (ii), (iii), (iv), (v), (vii), (viii), (ix), (x), (xi), (xii), (xiii), (xiv), (xv), (xvi), (xvii) (xix), or (xxi);

(xxiii) any corporation, limited liability company, or other similar entity -

(I) in existence for over 1 year;

(II) that is not engaged in active business;

(III) that is not owned, directly or indirectly, by a foreign person;

(IV) that has not, in the preceding 12-month period, experienced a change in ownership or sent or received funds in an amount greater than $1,000 (including all funds sent to or received from any source through a financial account or accounts in which the entity, or an affiliate of the entity, maintains an interest); and

(V) that does not otherwise hold any kind or type of assets, including an ownership interest in any corporation, limited liability company, or other similar entity;

(xxiv) any entity or class of entities that the Secretary of the Treasury, with the written concurrence of the Attorney General and the Secretary of Homeland Security, has, by regulation, determined should be exempt from the requirements of subsection (b) because requiring beneficial ownership information from the entity or class of entities -

(I) would not serve the public interest; and

(II) would not be highly useful in national security, intelligence, and law enforcement agency efforts to detect, prevent, or prosecute money laundering, the financing of terrorism, proliferation finance, serious tax fraud, or other crimes.

(12) STATE. The term “State” means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, American Samoa, Guam, the United States Virgin Islands, and any other commonwealth, territory, or possession of the United States.

(13) UNIQUE IDENTIFYING NUMBER. The term “unique identifying number” means, with respect to an individual or an entity with a sole member, the unique identifying number from an acceptable identification document.

(14) UNITED STATES PERSON. The term “United States person” has the meaning given the term in section 7701(a) of the Internal Revenue Code of 1986.

(b) BENEFICIAL OWNERSHIP INFORMATION REPORTING.

(1) REPORTING.

(A) IN GENERAL. In accordance with regulations prescribed by the Secretary of the Treasury, each reporting company shall submit to FinCEN a report that contains the information described in paragraph (2).

(B) REPORTING OF EXISTING ENTITIES. In accordance with regulations prescribed by the Secretary of the Treasury, any reporting company that has been formed or registered before the effective date of the regulations prescribed under this subsection shall, in a timely manner, and not later than 2 years after the effective date of the regulations prescribed under this subsection, submit to FinCEN a report that contains the information described in paragraph (2).

(C) REPORTING AT TIME OF FORMATION OR REGISTRATION. In accordance with regulations prescribed by the Secretary of the Treasury, any reporting company that has been formed or registered after the effective date of the regulations promulgated under this subsection shall, at the time of formation or registration, submit to FinCEN a report that contains the information described in paragraph (2).

(D) UPDATED REPORTING FOR CHANGES IN BENEFICIAL OWNERSHIP. In accordance with regulations prescribed by the Secretary of the Treasury, a reporting company shall, in a timely manner, and not later than 1 year after the date on which there is a change with respect to any information described in paragraph (2), submit to FinCEN a report that updates the information relating to the change.

(E) TREASURY REVIEW OF UPDATED REPORTING FOR CHANGES IN BENEFICIAL OWNERSHIP. The Secretary of the Treasury, in consultation with the Attorney General and the Secretary of Homeland Security, shall conduct a review to evaluate—

(i) the necessity of a requirement for corporations, limited liability companies, or other similar entities to update the report on beneficial ownership information in paragraph (2), related to a change in ownership, within a shorter period of time than required under subparagraph (D), taking into account the updating requirements under subparagraph (D) and the information contained in the reports;

(ii) the benefit to law enforcement and national security officials that might be derived from, and the burden that a requirement to update the list of beneficial owners within a shorter period of time after a change in the list of beneficial owners would impose on corporations, limited liability companies, or other similar entities; and

(iii) not later than 2 years after the date of enactment of this section, incorporate into the regulations, as appropriate, any changes necessary to implement the findings and determinations based on the review required under this subparagraph.

(F) REGULATION REQUIREMENTS.—In promulgating the regulations required under subparagraphs (A) through (D), the Secretary of the Treasury shall, to the greatest extent practicable -

(i) establish partnerships with State, local, and Tribal governmental agencies;

(ii) collect information described in paragraph (2) through existing Federal, State, and local processes and procedures;

(iii) minimize burdens on reporting companies associated with the collection of the information described in paragraph (2), in light of the private compliance costs placed on legitimate businesses, including by identifying any steps taken to mitigate the costs relating to compliance with the collection of information; and

(iv) collect information described in paragraph (2) in a form and manner that ensures the information is highly useful in -

(I) facilitating important national security, intelligence, and law enforcement activities; and

(II) confirming beneficial ownership information provided to financial institutions to facilitate the compliance of the financial institutions with anti-money laundering, countering the financing of terrorism, and customer due diligence requirements under applicable law.

(G) REGULATORY SIMPLIFICATION. To simplify compliance with this section for reporting companies and financial institutions, the Secretary of the Treasury shall ensure that the regulations prescribed by the Secretary under this subsection are added to part 1010 of title 31, Code of Federal Regulations, or any successor thereto.

(2) REQUIRED INFORMATION.

(A) IN GENERAL. In accordance with regulations prescribed by the Secretary of the Treasury, a report delivered under paragraph (1) shall, except as provided in subparagraph (B), identify each beneficial owner of the applicable reporting company and each applicant with respect to that reporting company by -

(i) full legal name;

(ii) date of birth;

(iii) current, as of the date on which the report is delivered, residential or business street address; and

(iv) (I) unique identifying number from an acceptable identification document; or

(II) FinCEN identifier in accordance with requirements in paragraph (3).

(B) REPORTING REQUIREMENT FOR EXEMPT ENTITIES HAVING AN OWNERSHIP INTEREST. If an exempt entity described in subsection (a)(11)(B) has or will have a direct or indirect ownership interest in a reporting company, the reporting company or the applicant -

(i) shall, with respect to the exempt entity, only list the name of the exempt entity; and

(ii) shall not be required to report the information with respect to the exempt entity otherwise required under subparagraph (A).

(C) REPORTING REQUIREMENT FOR CERTAIN POOLED INVESTMENT VEHICLES. Any corporation, limited liability company, or other similar entity that is an exempt entity described in subsection (a)(11)(B)(xviii) and is formed under the laws of a foreign country shall file with FinCEN a written certification that provides identification information of an individual that exercises substantial control over the pooled investment vehicle in the same manner as required under this subsection.

(D) REPORTING REQUIREMENT FOR EXEMPT SUBSIDIARIES. In accordance with the regulations promulgated by the Secretary, any corporation, limited liability company, or other similar entity that is an exempt entity described in subsection (a)(11)(B)(xxii), shall, at the time such entity no longer meets the criteria described in subsection (a)(11)(B)(xxii), submit to FinCEN a report containing the information required under subparagraph (A).

(E) REPORTING REQUIREMENT FOR EXEMPT GRANDFATHERED ENTITIES. In accordance with the regulations promulgated by the Secretary, any corporation, limited liability company, or other similar entity that is an exempt entity described in subsection (a)(11)(B)(xxiii), shall, at the time such entity no longer meets the criteria described in subsection (a)(11)(B)(xxiii), submit to FinCEN a report containing the information required under subparagraph (A).

(3) FINCEN IDENTIFIER.

(A) ISSUANCE OF FINCEN IDENTIFIER.

(i) IN GENERAL. Upon request by an individual who has provided FinCEN with the information described in paragraph (2)(A) pertaining to the individual, or by an entity that has reported its beneficial ownership information to FinCEN in accordance with this section, FinCEN shall issue a FinCEN identifier to such individual or entity.

(ii) UPDATING OF INFORMATION. An individual or entity with a FinCEN identifier shall submit filings with FinCEN pursuant to paragraph (1) updating any information described in paragraph (2) in a timely manner consistent with paragraph (1)(D).

(iii) EXCLUSIVE IDENTIFIER. FinCEN shall not issue more than 1 FinCEN identifier to the same individual or to the same entity (including any successor entity).

(B) USE OF FINCEN IDENTIFIER FOR INDIVIDUALS. Any person required to report the information described in paragraph (2) with respect to an individual may instead report the FinCEN identifier of the individual.

(C) USE OF FINCEN IDENTIFIER FOR ENTITIES. If an individual is or may be a beneficial owner of a reporting company by an interest held by the individual in an entity that, directly or indirectly, holds an interest in the reporting company, the reporting company may report the FinCEN identifier of the entity in lieu of providing the information required by paragraph (2)(A) with respect to the individual.

(4) REGULATIONS. The Secretary of the Treasury shall -

(A) by regulation prescribe procedures and standards governing any report under paragraph (2) and any FinCEN identifier under paragraph (3); and

(B) in promulgating the regulations under subparagraph (A) to the extent practicable, consistent with the purposes of this section -

(i) minimize burdens on reporting companies associated with the collection of beneficial ownership information, including by eliminating duplicative requirements; and

(ii) ensure the beneficial ownership information reported to FinCEN is accurate, complete, and highly useful.

(5) EFFECTIVE DATE. The requirements of this subsection shall take effect on the effective date of the regulations prescribed by the Secretary of the Treasury under this subsection, which shall be promulgated not later than 1 year after the date of enactment of this section.

(6) REPORT. Not later than 1 year after the effective date described in paragraph (5), and annually thereafter for 2 years, the Secretary of the Treasury shall submit to Congress a report describing the procedures and standards prescribed to carry out paragraph (2), which shall include an assessment of—

(A) the effectiveness of those procedures and standards in minimizing reporting burdens (including through the elimination of duplicative requirements) and strengthening the accuracy of reports submitted under paragraph (2); and

(B) any alternative procedures and standards prescribed to carry out paragraph (2).

(c) RETENTION AND DISCLOSURE OF BENEFICIAL OWNERSHIP INFORMATION BY FINCEN.

(1) RETENTION OF INFORMATION. Beneficial ownership information required under subsection (b) relating to each reporting company shall be maintained by FinCEN for not fewer than 5 years after the date on which the reporting company terminates.

(2) DISCLOSURE.

(A) PROHIBITION.—Except as authorized by this subsection and the protocols promulgated under this subsection, beneficial ownership information reported under this section shall be confidential and may not be disclosed by -

(i) an officer or employee of the United States;

(ii) an officer or employee of any State, local, or Tribal agency; or

(iii) an officer or employee of any financial institution or regulatory agency receiving information under this subsection.

(B) SCOPE OF DISCLOSURE BY FINCEN. FinCEN may disclose beneficial ownership information reported pursuant to this section only upon receipt of -

(i) a request, through appropriate protocols -

(I) from a Federal agency engaged in national security, intelligence, or law enforcement activity, for use in furtherance of such activity; or

(II) from a State, local, or Tribal law enforcement agency, if a court of competent jurisdiction, including any officer of such a court, has authorized the law enforcement agency to seek the information in a criminal or civil investigation;

(ii) a request from a Federal agency on behalf of a law enforcement agency, prosecutor, or judge of another country, including a foreign central authority or competent authority (or like designation), under an international treaty, agreement, convention, or official request made by law enforcement, judicial, or prosecutorial authorities in trusted foreign countries when no treaty, agreement, or convention is available -

(I) issued in response to a request for assistance in an investigation or prosecution by such foreign country; and

(II) that -

(aa) requires compliance with the disclosure and use provisions of the treaty, agreement, or convention, publicly disclosing any beneficial ownership information received; or

(bb) limits the use of the information for any purpose other than the authorized investigation or national security or intelligence activity;

(iii) a request made by a financial institution subject to customer due diligence requirements, with the consent of the reporting company, to facilitate the compliance of the financial institution with customer due diligence requirements under applicable law; or

(iv) a request made by a Federal functional regulator or other appropriate regulatory agency consistent with the requirements of subparagraph (C).

(C) FORM AND MANNER OF DISCLOSURE TO FINANCIAL INSTITUTIONS AND REGULATORY AGENCIES. The Secretary of the Treasury shall, by regulation, prescribe the form and manner in which information shall be provided to a financial institution under subparagraph (B)(iii), which regulation shall include that the information shall also be available to a Federal functional regulator or other appropriate regulatory agency, as determined by the Secretary, if the agency -

(i) is authorized by law to assess, supervise, enforce, or otherwise determine the compliance of the financial institution with the requirements described in that subparagraph;

(ii) uses the information solely for the purpose of conducting the assessment, supervision, or authorized investigation or activity described in clause (i); and

(iii) enters into an agreement with the Secretary providing for appropriate protocols governing the safekeeping of the information.

(3) APPROPRIATE PROTOCOLS. The Secretary of the Treasury shall establish by regulation protocols described in paragraph (2)(A) that -

(A) protect the security and confidentiality of any beneficial ownership information provided directly by the Secretary;

(B) require the head of any requesting agency, on a nondelegable basis, to approve the standards and procedures utilized by the requesting agency and certify to the Secretary semiannually that such standards and procedures are in compliance with the requirements of this paragraph;

(C) require the requesting agency to establish and maintain, to the satisfaction of the Secretary, a secure system in which such beneficial ownership information provided directly by the Secretary shall be stored;

(D) require the requesting agency to furnish a report to the Secretary, at such time and containing such information as the Secretary may prescribe, that describes the procedures established and utilized by such agency to ensure the confidentiality of the beneficial ownership information provided directly by the Secretary;

(E) require a written certification for each authorized investigation or other activity described in paragraph (2) from the head of an agency described in paragraph (2)(B)(i)(I), or their designees, that -

(i) states that applicable requirements have been met, in such form and manner as the Secretary may prescribe; and

(ii) at a minimum, sets forth the specific reason or reasons why the beneficial ownership information is relevant to an authorized investigation or other activity described in paragraph (2);

(F) require the requesting agency to limit, to the greatest extent practicable, the scope of information sought, consistent with the purposes for seeking beneficial ownership information;

(G) restrict, to the satisfaction of the Secretary, access to beneficial ownership information to whom disclosure may be made under the provisions of this Section to only users at the requesting agency -

(i) who are directly engaged in the authorized investigation or activity described in paragraph (2);

(ii) whose duties or responsibilities require such access;

(iii) who -

(I) have undergone appropriate training; or

(II) use staff to access the database who have undergone appropriate training;

(iv) who use appropriate identity verification mechanisms to obtain access to the information; and

(v) who are authorized by agreement with the Secretary to access the information;

(H) require the requesting agency to establish and maintain, to the satisfaction of the Secretary, a permanent system of standardized records with respect to an auditable trail of each request for beneficial ownership information submitted to the Secretary by the agency, including the reason for the request, the name of the individual who made the request, the date of the request, any disclosure of beneficial ownership information made by or to the agency, and any other information the Secretary of the Treasury determines is appropriate;

(I) require that the requesting agency receiving beneficial ownership information from the Secretary conduct an annual audit to verify that the beneficial ownership information received from the Secretary has been accessed and used appropriately, and in a manner consistent with this paragraph and provide the results of that audit to the Secretary upon request;

(J) require the Secretary to conduct an annual audit of the adherence of the agencies to the protocols established under this paragraph to ensure that agencies are requesting and using beneficial ownership information appropriately; and

(K) provide such other safeguards which the Secretary determines (and which the Secretary prescribes in regulations) to be necessary or appropriate to protect the confidentiality of the beneficial ownership information.

(4) VIOLATION OF PROTOCOLS. Any employee or officer of a requesting agency under paragraph (2)(B) that violates the protocols described in paragraph (3), including unauthorized disclosure or use, shall be subject to criminal and civil penalties under subsection (h)(3)(B).

(5) DEPARTMENT OF THE TREASURY ACCESS.

(A) IN GENERAL.—Beneficial ownership information shall be accessible for inspection or disclosure to officers and employees of the Department of the Treasury whose official duties require such inspection or disclosure subject to procedures and safeguards prescribed by the Secretary of the Treasury.

(B) TAX ADMINISTRATION PURPOSES.—Officers and employees of the Department of the Treasury may obtain access to beneficial ownership information for tax administration purposes in accordance with this subsection.

(6) REJECTION OF REQUEST. The Secretary of the Treasury -

(A) shall reject a request not submitted in the form and manner prescribed by the Secretary under paragraph (2)(C); and

(B) may decline to provide information requested under this subsection upon finding that -

(i) the requesting agency has failed to meet any other requirement of this subsection;

(ii) the information is being requested for an unlawful purpose; or

(iii) other good cause exists to deny the request.

(7) SUSPENSION. The Secretary of the Treasury may suspend or debar a requesting agency from access for any of the grounds set forth in paragraph (6), including for repeated or serious violations of any requirement under paragraph (2).

(8) SECURITY PROTECTIONS. The Secretary of the Treasury shall maintain information security protections, including encryption, for information reported to FinCEN under subsection (b) and ensure that the protections—

(A) are consistent with standards and guidelines developed under subchapter II of chapter 35 of title 44; and

(B) incorporate Federal information system security controls for high-impact systems, excluding national security systems, consistent with applicable law to prevent the loss of confidentiality, integrity, or availability of information that may have a severe or catastrophic adverse effect.

(9) REPORT BY THE SECRETARY. Not later than 1 year after the effective date of the regulations prescribed under this subsection, and annually thereafter for 5 years, the Secretary of the Treasury shall submit to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Financial Services of the House of Representatives a report, which -

(A) may include a classified annex; and

(B) shall, with respect to each request submitted under paragraph (2)(B)(i)(II) during the period covered by the report, and consistent with protocols established by the Secretary that are necessary to protect law enforcement sensitive, tax-related, or classified information, include -

(i) the date on which the request was submitted;

(ii) the source of the request;

(iii) whether the request was accepted or rejected or is pending; and

(iv) a general description of the basis for rejecting the such request, if applicable.

(10) AUDIT BY THE COMPTROLLER GENERAL. Not later than 1 year after the effective date of the regulations prescribed under this subsection, and annually thereafter for 6 years, the Comptroller General of the United States shall -

(A) audit the procedures and safeguards established by the Secretary of the Treasury under those regulations, including duties for verification of requesting agencies systems and adherence to the protocols established under this subsection, to determine whether such safeguards and procedures meet the requirements of this subsection and that the Department of the Treasury is using beneficial ownership information appropriately in a manner consistent with this subsection; and

(B) submit to the Secretary of the Treasury, the Committee on Banking, Housing, and Urban Affairs of the Senate, and the Committee on Financial Services of the House of Representatives a report that contains the findings and determinations with respect to any audit conducted under this paragraph.

(11) DEPARTMENT OF THE TREASURY TESTIMONY.

(A) IN GENERAL. Not later than March 31 of each year for 5 years beginning in 2022, the Director shall be made available to testify before the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Financial Services of the House of Representatives, or an appropriate subcommittee thereof, regarding FinCEN issues, including, specifically, issues relating to—

(i) anticipated plans, goals, and resources necessary for operations of FinCEN in implementing the requirements of the Anti-Money Laundering Act of 2020 and the amendments made by that Act;

(ii) the adequacy of appropriations for FinCEN in the current and the previous fiscal year to -

(I) ensure that the requirements and obligations imposed upon FinCEN by the Anti-Money Laundering Act of 2020 and the amendments made by that Act are completed as efficiently, effectively, and expeditiously as possible; and

(II) provide for robust and effective implementation and enforcement of the provisions of the Anti-Money Laundering Act of 2020 and the amendments made by that Act;

(iii) strengthen FinCEN management efforts, as necessary and as identified by the Director, to meet the requirements of the Anti-Money Laundering Act of 2020 and the amendments made by that Act;

(iv) provide for the necessary public outreach to ensure the broad dissemination of information regarding any new program requirements provided for in the Anti-Money Laundering Act of 2020 and the amendments made by that Act, including -

(I) educating the business community on the goals and operations of the new beneficial ownership database; and

(II) disseminating to the governments of countries that are allies or partners of the United States information on best practices developed by FinCEN related to beneficial ownership information retention and use;

(v) any policy recommendations that could facilitate and improve communication and coordination between the private sector, FinCEN, and the Federal, State, and local agencies and entities involved in implementing innovative approaches to meet their obligations under the Anti-Money Laundering Act of 2020 and the amendments made by that Act, the Bank Secrecy Act (as defined in section 6003 of the Anti-Money Laundering Act of 2020), and other anti-money laundering compliance laws; and

(vi) any other matter that the Director determines is appropriate.

(B) TESTIMONY CLASSIFICATION. The testimony required under subparagraph (A) -

(i) shall be submitted in unclassified form; and

(ii) may include a classified portion.

(d) AGENCY COORDINATION.

(1) IN GENERAL. The Secretary of the Treasury shall, to the greatest extent practicable, update the information described in subsection (b) by working collaboratively with other relevant Federal, State, and Tribal agencies.

(2) INFORMATION FROM RELEVANT FEDERAL, STATE, AND TRIBAL AGENCIES. Relevant Federal, State, and Tribal agencies, as determined by the Secretary of the Treasury, shall, to the extent practicable, and consistent with applicable legal protections, cooperate with and provide information requested by FinCEN for purposes of maintaining an accurate, complete, and highly useful database for beneficial ownership information.

(3) REGULATIONS. The Secretary of the Treasury, in consultation with the heads of other relevant Federal agencies, may promulgate regulations as necessary to carry out this subsection.

(e) NOTIFICATION OF FEDERAL OBLIGATIONS.

(1) FEDERAL. The Secretary of the Treasury shall take reasonable steps to provide notice to persons of their obligations to report beneficial ownership information under this section, including by causing appropriate informational materials describing such obligations to be included in 1 or more forms or other informational materials regularly distributed by the Internal Revenue Service and FinCEN.

(2) STATES AND INDIAN TRIBES.

(A) IN GENERAL. As a condition of the funds made available under this section, each State and Indian Tribe shall, not later than 2 years after the effective date of the regulations promulgated under subsection (b)(4), take the following actions:

(i) The secretary of a State or a similar office in each State or Indian Tribe responsible for the formation or registration of entities created by the filing of a public document with the office under the law of the State or Indian Tribe shall periodically, including at the time of any initial formation or registration of an entity, assessment of an annual fee, or renewal of any license to do business in the United States and in connection with State or Indian Tribe corporate tax assessments or renewals -

(I) notify filers of their requirements as reporting companies under this section, including the requirements to file and update reports under paragraphs (1) and (2) of subsection (b); and

(II) provide the filers with a copy of the reporting company form created by the Secretary of the Treasury under this subsection or an internet link to that form.

(ii) The secretary of a State or a similar office in each State or Indian Tribe responsible for the formation or registration of entities created by the filing of a public document with the office under the law of the State or Indian Tribes shall update the websites, forms relating to incorporation, and physical premises of the office to notify filers of their requirements as reporting companies under this section, including providing an internet link to the reporting company form created by the Secretary of the Treasury under this section.

(B) NOTIFICATION FROM THE DEPARTMENT OF THE TREASURY.
A notification under clause (i) or (ii) of subparagraph (A) shall explicitly state that the notification is on behalf of the Department of the Treasury for the purpose of preventing money laundering, the financing of terrorism, proliferation financing, serious tax fraud, and other financial crime by requiring nonpublic registration of business entities formed or registered to do business in the United States.

(f) No BEARER SHARE CORPORATIONS OR LIMITED LIABILITY COMPANIES.
A corporation, limited liability company, or other similar entity formed under the laws of a State or Indian Tribe may not issue a certificate in bearer form evidencing either a whole or fractional interest in the entity.

(g) REGULATIONS. In promulgating regulations carrying out this section, the Director shall reach out to members of the small business community and other appropriate parties to ensure efficiency and effectiveness of the process for the entities subject to the requirements of this section.

(h) PENALTIES.

(1) REPORTING VIOLATIONS. It shall be unlawful for any person to -

(A) willfully provide, or attempt to provide, false or fraudulent beneficial ownership information, including a false or fraudulent identifying photograph or document, to FinCEN in accordance with subsection (b); or

(B) willfully fail to report complete or updated beneficial ownership information to FinCEN in accordance with subsection (b).

(2) UNAUTHORIZED DISCLOSURE OR USE. Except as authorized by this section, it shall be unlawful for any person to knowingly disclose or knowingly use the beneficial ownership information obtained by the person through -

(A) a report submitted to FinCEN under subsection (b); or

(B) a disclosure made by FinCEN under subsection (c).

(3) CRIMINAL AND CIVIL PENALTIES.

(A) REPORTING VIOLATIONS.—Any person that violates subparagraph (A) or (B) of paragraph (1) -

(i) shall be liable to the United States for a civil penalty of not more than $500 for each day that the violation continues or has not been remedied; and

(ii) may be fined not more than $10,000, imprisoned for not more than 2 years, or both.

(B) UNAUTHORIZED DISCLOSURE OR USE VIOLATIONS. Any person that violates paragraph (2) -

(i) shall be liable to the United States for a civil penalty of not more than $500 for each day that the violation continues or has not been remedied; and

(ii) (I) shall be fined not more than $250,000, or imprisoned for not more than 5 years, or both; or

(II) while violating another law of the United States or as part of a pattern of any illegal activity involving more than $100,000 in a 12-month period, shall be fined not more than $500,000, imprisoned for not more than 10 years, or both.

(C) SAFE HARBOR.

(i) SAFE HARBOR.—

(I) IN GENERAL. Except as provided in sub-clause (II), a person shall not be subject to civil or criminal penalty under subparagraph (A) if the person -

(aa) has reason to believe that any report submitted by the person in accordance with subsection (b) contains inaccurate information; and

(bb) in accordance with regulations issued by the Secretary, voluntarily and promptly, and in no case later than 90 days after the date on which the person submitted the report, submits a report containing corrected information.

(II) EXCEPTIONS. A person shall not be exempt from penalty under clause (i) if at the time the person submits the report required by subsection (b), the person -

(aa) acts for the purpose of evading the reporting requirements under subsection (b); and

(bb) has actual knowledge that any information contained in the report is inaccurate.

(ii) ASSISTANCE. FinCEN shall provide assistance to any person seeking to submit a corrected report in accordance with clause (i)(I).

(4) USER COMPLAINT PROCESS.

(A) IN GENERAL. The Inspector General of the Department of the Treasury, in coordination with the Secretary of the Treasury, shall provide public contact information to receive external comments or complaints regarding the beneficial ownership information notification and collection process or regarding the accuracy, completeness, or timeliness of such information.

(B) REPORT. The Inspector General of the Department of the Treasury shall submit to Congress a periodic report that -

(i) summarizes external comments or complaints and related investigations conducted by the Inspector General related to the collection of beneficial ownership information; and

(ii) includes recommendations, in coordination with FinCEN, to improve the form and manner of the notification, collection and updating processes of the beneficial ownership information reporting requirements to ensure the beneficial ownership information reported to FinCEN is accurate, complete, and highly useful.

(5) TREASURY OFFICE OF INSPECTOR GENERAL INVESTIGATION IN THE EVENT OF A CYBERSECURITY BREACH.

(A) IN GENERAL. In the event of a cybersecurity breach that results in substantial unauthorized access and disclosure of sensitive beneficial ownership information, the Inspector General of the Department of the Treasury shall conduct an investigation into FinCEN cybersecurity practices that, to the extent possible, determines any vulnerabilities within FinCEN information security and confidentiality protocols and provides recommendations for fixing those deficiencies.

(B) REPORT. The Inspector General of the Department of the Treasury shall submit to the Secretary of the Treasury a report on each investigation conducted under subparagraph (A).

(C) ACTIONS OF THE SECRETARY. Upon receiving a report submitted under subparagraph (B), the Secretary of the Treasury shall -

(i) determine whether the Director had any responsibility for the cybersecurity breach or whether policies, practices, or procedures implemented at the direction of the Director led to the cybersecurity breach; and

(ii) submit to Congress a written report outlining the findings of the Secretary, including a determination by the Secretary on whether to retain or dismiss the individual serving as the Director.

(6) DEFINITION. In this subsection, the term “willfully” means the voluntary, intentional violation of a known legal duty.

(i) CONTINUOUS REVIEW OF EXEMPT ENTITIES.

(1) IN GENERAL—On and after the effective date of the regulations promulgated under subsection (b)(4), if the Secretary of the Treasury makes a determination, which may be based on information contained in the report required under section 6502(c) of the Anti-Money Laundering Act of 2020 or on any other information available to the Secretary, that an entity or class of entities described in subsection (a)(11)(B) has been involved in significant abuse relating to money laundering, the financing of terrorism, proliferation finance, serious tax fraud, or any other financial crime, not later than 90 days after the date on which the Secretary makes the determination, the Secretary shall submit to the Committee on Banking, Housing, and Urban Affairs of the Senate and the Committee on Financial Services of the House of Representatives a report that explains the reasons for the determination and any administrative or legislative recommendations to prevent such abuse.

(2) CLASSIFIED ANNEX. The report required by paragraph (1) -

(A) shall be submitted in unclassified form; and

(B) may include a classified annex.

Section 6403 of the Act, “Beneficial Ownership Information Reporting Requirements,” provides in subsection (b), “Conforming Amendments”:

Title 31, United States Code, is amended -

(1) in section 5321(a) -

(A) in paragraph (1), by striking “sections 5314 and 5315” each place that term appears and inserting “sections 5314, 5315, and 5336”; and

(B) in paragraph (6), by inserting “(except section 5336)” after “subchapter” each place that term appears;

(2) in section 5322, by striking “section 5315 or 5324” each place that term appears and inserting “section 5315, 5324, or 5336”; and

(3) in the table of sections for chapter 53, as amended by sections 6306(b)(1), 6307(b), and 6313(b) of this division, by adding at the end the following:

5336. Beneficial ownership information reporting requirements

(c) REPORTING REQUIREMENTS FOR FEDERAL CONTRACTORS.

(1) IN GENERAL. Not later than 2 years after the date of enactment of this Act, the Administrator for Federal Procurement Policy shall revise the Federal Acquisition Regulation maintained under section 1303(a)(1) of title 41, United States Code, to require any contractor or subcontractor that is subject to the requirement to disclose beneficial ownership information under section 5336 of title 31, United States Code, as added by subsection (a) of this section, to provide the information required to be disclosed under such section to the Federal Government as part of any bid or proposal for a contract with a value threshold in excess of the simplified acquisition threshold under section 134 of title 41, United States Code.

(2) APPLICABILITY. The revision required under paragraph (1) shall not apply to a covered contractor or subcontractor, as defined in section 847 of the National Defense Authorization Act for Fiscal Year 2020 (Public Law 116-92), that is subject to the beneficial ownership disclosure and review requirements under that section.

(d) REVISED DUE DILIGENCE RULEMAKING.

(1) IN GENERAL. Not later than 1 year after the effective date of the regulations promulgated under section 5336(b)(4) of title 31, United States Code, as added by subsection (a) of this section, the Secretary of the Treasury shall revise the final rule entitled “Customer Due Diligence Requirements for Financial Institutions” (81 Fed. Reg. 29397 (May 11, 2016)) to -

(A) bring the rule into conformance with this division and the amendments made by this division;

(B) account for the access of financial institutions to beneficial ownership information filed by reporting companies under section 5336, and provided in the form and manner prescribed by the Secretary, in order to confirm the beneficial ownership information provided directly to the financial institutions to facilitate the compliance of those financial institutions with anti-money laundering, countering the financing of terrorism, and customer due diligence requirements under applicable law; and

(C) reduce any burdens on financial institutions and legal entity customers that are, in light of the enactment of this division and the amendments made by this division, unnecessary or duplicative.

(2) CONFORMANCE.

(A) IN GENERAL. In carrying out paragraph (1), the Secretary of the Treasury shall rescind paragraphs (b) through (j) of section 1010.230 of title 31, Code of Federal Regulations upon the effective date of the revised rule promulgated under this subsection.

(B) RULE OF CONSTRUCTION. Nothing in this section may be construed to authorize the Secretary of the Treasury to repeal the requirement that financial institutions identify and verify beneficial owners of legal entity customers under section 1010.230(a) of title 31, Code of Federal Regulations.

(3) CONSIDERATIONS. In fulfilling the requirements under this subsection, the Secretary of the Treasury shall consider—

(A) the use of risk-based principles for requiring reports of beneficial ownership information;

(B) the degree of reliance by financial institutions on information provided by FinCEN for purposes of obtaining and updating beneficial ownership information;

(C) strategies to improve the accuracy, completeness, and timeliness of the beneficial ownership information reported to the Secretary; and

(D) any other matter that the Secretary determines is appropriate.

II.G.30.c.vii. Legislative History

H.R. Report 116-617, the Conference Report To Accompany H.R. 6395 (12/3/2020), includes:

DIVISION F—ANTI-MONEY LAUNDERING

Anti-Money Laundering Act of 2020 (secs. 6001-6511)

The House bill contained multiple provisions (sections 6001 through 7306 contained in Divisions F and G of the House bill) that would strengthen, modernize, and improve the communication, oversight, and processes of the U.S. Department of the Treasury's financial intelligence, anti-money laundering, and countering the financing of terrorism programs, and would establish beneficial ownership information reporting requirements. Division F is substantially similar to H.R. 2513, the Corporate Transparency Act of 2019, introduced by Representative Maloney of New York, and Division G is substantially similar to H.R. 2514, the Coordinating Oversight, Upgrading and Innovating Technology, and Examiner Reform Act of 2019 (COUNTER Act), introduced by Representative Cleaver of Missouri.

The Senate amendment contained no similar provision.

The Senate recedes with an amendment in the form of a single division that makes a number of additional changes to the provisions in the House bill to strengthen the provisions relating to anti-money laundering and countering the financing of terrorism programs and to establish an improved reporting system relating to beneficial ownership information, including building in further protections to ensure that sensitive information is properly used and protected. The Senate amendment builds on Divisions F & G in the House bill and draws from related bills pending in the Senate, including S. 2563, the Improving Laundering Laws and Increasing Comprehensive Information Tracking of Criminal Activity in Shell Holdings Act (ILLICIT CASH Act), introduced by Senator Warner of Virginia and Senator Cotton of Arkansas; S. 1889, the True Incorporation Transparency for Law Enforcement Act (TITLE Act), introduced by Senator Whitehouse of Rhode Island; S. 1978, the Corporate Transparency Act, introduced by Senator

Wyden of Oregon; and S. 1883, Combating Money Laundering, Terrorist Financing, and Counterfeiting Act of 2019, introduced by Senator Graham of South Carolina.

The conference agreement also includes Division L, the STIFLE Act of 2020, included in H.R. 6395 the National Defense Authorization Act for Fiscal Year 2020, as passed by the House of Representatives. This division is substantially similar to H.R. 7592, the Stopping Trafficking, Illicit Flows, Laundering, and Exploitation Act of 2020 (STIFLE Act), introduced by Representative McAdams of Utah and Representative Gonzalez of Ohio, and integrates it into the conference agreement.

The conferees note that the current Anti-Money Laundering/ Countering the Financing of Terrorism (AML/CFT) regulatory framework is an amalgamation of statutes and regulations that are grounded in the Bank Secrecy Act (BSA) (21 U.S.C. 5311 et seq.), which the Congress enacted in 1970. This decades-old regime, which has not seen comprehensive reform and modernization since its inception, is generally built on individual reporting mechanisms (i.e., currency transaction reports (CTRs) and suspicious activity reports (SARs)) and contemplates aging, decades-old technology, rather than the current, sophisticated AML compliance systems now managed by most financial institutions. The provisions of the House bill, as modified by the Senate amendment, comprehensively update the BSA for the first time in decades and provide for the establishment of a coherent set of risk-based priorities.

One overarching improvement now included in the conference agreement is to broaden the mission of the BSA to specifically safeguard national security as well as the more traditional investigatory pursuits of law enforcement. This change is reflected throughout the conference agreement, including in the priorities that will be established by the Secretary of the Treasury, in consultation with key Federal national security, law enforcement, and regulatory officials.

In particular, the conference agreement requires more routine and systemic coordination, communication, and feedback among financial institutions, regulators, and law enforcement to identify suspicious financial activities, better focusing bank resources to the AML task, which will increase the likelihood for better law enforcement outcomes.

Currently, there is no clear statutory mandate for BSA stake-holders - law enforcement, financial regulators, and financial institutions - to provide routine, standardized feedback to one another for the purpose of improving the effectiveness of BSA anti-money laundering programs. The conference agreement establishes a critical feedback loop and improved routine reporting requirements, to ensure that resources are directed effectively and that law enforcement, regulators, and financial institutions better communicate and coordinate on BSA-AML priorities, collection methods, and outcomes. Because this coordination is essential to identifying those who abuse our financial system, the conferees also examined other domestic and international models for these regulation-guided feedback loops to identify additional lessons-learned that could be adapted for this essential sector.

The conference agreement also opens avenues for more data sharing among financial institutions and within financial institutions and their affiliates, while retaining key security safeguards, so that patterns of suspicious activities will be more easily identified, tracked, and shared appropriately.

The conference agreement also provides a clear mandate for innovation, while providing for regulatory processes for financial institutions to effectively innovate, test, and adopt leading technologies, such as artificial intelligence, to track, identify, and report suspicious financial activity. It also provides for dedicated staff and multiple fora to support public-private collaboration and advancement of this issue.

This includes two new Bank Secrecy Act Advisory Group (BSAAG) subcommittees. The first focuses on confidentiality and informational security and the second on innovation and technology. A new "tech symposium" is also established whereby the U.S. Department of the Treasury is urged to convene international and domestic regulators, financial institutions, law enforcement, and technology companies to periodically demonstrate and test related innovations, all of which will introduce AML participants to the latest technology and mandate its effective incorporation into comprehensive BSA AML-CFT compliance programs.

The conference agreement further requires that the Secretary of the Treasury must consider, when imposing SAR reporting requirements, the benefits and burdens of specific requirements and whether the reporting is likely to be "highly useful" to law enforcement and national security efforts. It also calls for the potential streamlining of reporting requirements, including automated processes. The Secretary must further report to the Congress on whether to permit financial institutions to provide certain "bulk reporting" to law enforcement of low-level risks, such as Suspicious Activity Reports related to structured transactions, which could allow financial institutions to focus more time and effort on identifying and reporting higher-priority, sophisticated suspicious activity.

The conference agreement provides new whistleblower protections for those reporting BSA violations and establishes an "Anti-Money Laundering and Counter-Terrorism Financing Fund" to pay such rewards. It also establishes tough new penalties on those convicted of serious BSA violations, including additional penalties for repeat BSA violators and a prohibition against financial institution board service for individuals convicted of egregious BSA-related crimes.

The conference agreement closes significant AML-CFT gaps, including by adding the trade in antiquities to coverage under the BSA. In addition, Treasury and its law enforcement partners will further study the risks posed by the facilitation of money laundering through the trade in art.

In addition, the laundering of money through real estate transactions continues to be an issue of concern, and the conferees encourage Treasury to examine whether reporting on certain commercial, as well as certain residential, real estate transactions would be a source of highly useful information to law enforcement and the national security community. The conference agreement also requires U.S. Government-wide strategies to combat trade-based money laundering, trafficking, and Chinese money laundering activities.

The conference agreement mandates a study and strategy on de-risking to ensure that legitimate customers—whether individuals, entities, or geographic areas—are not unintentionally and unfairly excluded from access to the financial system.

The conference agreement authorizes additional support to the U.S. Department of the Treasury to accomplish these goals, and the conferees expect the Department to insist on strong accountability for results and responsiveness to congressional oversight during implementation of this measure. Recognizing the important role of the Financial Crimes Enforcement Network (FinCEN) and the need to strengthen the Bureau's management and operations, the agreement adds $10.0 million to the Bureau's authorization. The agreement also allows for special hiring authority for the Office of Terrorism and Financial Intelligence and its component parts. It further establishes a FinCEN Office of Domestic Liaison, FinCEN Foreign Financial Intelligence Unit Liaisons, and expands the number of U.S. Treasury Attaches to allow the Department a broader reach for its AML-CFT activities.

The conference agreement also addresses the critical issue of beneficial ownership. Targeting bad actors who own or control businesses that act as "fronts" or shell companies on behalf of those conducting illicit activities is essential to combating crime and safeguarding our national security.

The conference agreement requires corporations, limited liability companies, and other similar entities formed in the U.S. - or foreign entities registered to do business in the U.S. - to report their beneficial owners to the U.S. Department of the Treasury, as a means to combat the abuse of anonymous companies, which can be used to facilitate money laundering, the financing of terrorism, proliferation finance, tax evasion, human and drug trafficking, sanctions evasion, and other financial crimes.

The conference agreement requires companies to disclose their beneficial owners to the U.S. Department of the Treasury at the time the company is formed and when ownership changes. This beneficial ownership information will be kept confidential and treated as sensitive information, protected under the highest information security standards. It will be made directly available only to: (1) Authorized Government authorities upon request as set out in the measure, subject to effective safeguards, to facilitate relevant national security, intelligence, and law enforcement activities; and (2) Financial institutions, for purposes of complying with their customer due diligence requirements under applicable law and regulation.

For requests made by Federal agencies, the conference agreement requires that only the head of an agency or a designee may certify access to the beneficial ownership database for an investigation, or other authorized national security, intelligence, or law enforcement activity. The conferees expect that the process of delegating authority for designees to make a written certification under section 5403(c)(3)(E) will be consistent with the existing processes to delegate authority to designees to carry out 26 U.S.C. 6103 requests, while taking into account the unique organizational structures of each requesting agency.

Similarly, requests made by State, local, or Tribal law enforcement must be approved by a court of competent jurisdiction. "Court of competent jurisdiction," for purposes of this measure, includes an officer of such a court such as a judge, magistrate, or a Clerk of Courts. This does not include attorneys who are party to a proceeding.

The conferees note that nothing in this conference agreement is designed to undermine the requirement that financial institutions identify and verify the beneficial owners of their legal entity customers pursuant to 31 C.F.R. § 1010.230(a). The conference agreement provides that not later than 1 year after the regulations promulgated to implement the Corporate Transparency Act become effective, the Secretary of the Treasury shall revise the final rule entitled “Customer Due Diligence Requirements for Financial Institutions” (81 Fed. Reg. 29397 (May 11, 2016)) (the “CDD Rule”) to, inter alia, bring the CDD rule into conformance with the statute and reduce any burdens on financial institutions and legal entity customers that are unnecessary or duplicative.

The conference agreement further provides that paragraphs (b)-(j) of 31 C.F.R. § 1010.230 will be rescinded upon the effective date of the revised rule promulgated under this subsection. The conferees intend for the revised CDD rule, including those provisions added pursuant to section 5403(a) of this amendment, to replace appropriate provisions of the current 31 C.F.R. § 1010.230.

II.G.30.c.viii. Regulations

§ 1010.380 Reports of beneficial ownership information

(a) *Reports required; timing of reports* –

(1) *Initial report*. Each reporting company shall file an initial report in the form and manner specified in paragraph (b) of this section as follows:

(i) Any domestic reporting company created on or after January 1, 2024 shall file a report within 30 calendar days of the earlier of the date on which it receives actual notice that its creation has become effective or the date on which a secretary of state or similar office first provides public notice, such as through a publicly accessible registry, that the domestic reporting company has been created.

(ii) Any entity that becomes a foreign reporting company on or after January 1, 2024 shall file a report within 30 calendar days of the earlier of the date on which it receives actual notice that it has been registered to do business or the date on which a secretary of state or similar office first provides public notice, such as through a publicly accessible registry, that the foreign reporting company has been registered to do business.

(iii) Any domestic reporting company created before January 1, 2024 and any entity that became a foreign reporting company before January 1, 2024 shall file a report not later than January 1, 2025.

(iv) Any entity that no longer meets the criteria for any exemption under paragraph (c)(2) of this section shall file a report within 30 calendar days after the date that it no longer meets the criteria for any exemption.

(2) *Updated report*.

(i) If there is any change with respect to required information previously submitted to FinCEN concerning a reporting company or its beneficial owners, including any change with respect to who is a beneficial owner or information reported for any particular beneficial owner, the reporting company shall file an updated report in the form and manner specified in paragraph (b)(3) of this section within 30 calendar days after the date on which such change occurs.

(ii) If a reporting company meets the criteria for any exemption under paragraph (c)(2) of this section subsequent to the filing of an initial report, this change will be deemed a change with respect to information previously submitted to FinCEN, and the entity shall file an updated report.

(iii) If an individual is a beneficial owner of a reporting company by virtue of property interests or other rights subject to transfer upon death, and such individual dies, a change with respect to required information will be deemed to occur when the estate of the deceased beneficial owner is settled, either through the operation of the intestacy laws of a jurisdiction within the United States or through a testamentary deposition. The updated report shall, to the extent appropriate, identify any new beneficial owners.

(iv) If a reporting company has reported information with respect to a parent or legal guardian of a minor child pursuant to paragraphs (b)(2)(ii) and (d)(3)(i) of this section, a change with respect to required information will be deemed to occur when the minor child attains the age of majority.

(v) With respect to an image of an identifying document required to be reported pursuant to paragraph (b)(1)(ii)(E) of this section, a change with respect to required information will be deemed to occur when the name, date of birth, address, or unique identifying number on such document changes.

(3) *Corrected report*. If any report under this section was inaccurate when filed and remains inaccurate, the reporting company shall file a corrected report in the form and manner specified in paragraph (b) of this section within 30 calendar days after the date on which such reporting company becomes aware or has reason to know of the inaccuracy. A corrected report filed under this paragraph (a)(3) within this 30-day period shall be deemed to satisfy 31 U.S.C. 5336(h)(3)(C)(i)(I)(bb) if filed within 90 calendar days after the date on which the inaccurate report was filed.

(b) *Content, form, and manner of reports*. Each report or application submitted under this section shall be filed with FinCEN in the form and manner that FinCEN shall prescribe in the forms and instructions for such report or application, and each person filing such report or application shall certify that the report or application is true, correct, and complete.

(1) *Initial report*. An initial report of a reporting company shall include the following information:

(i) For the reporting company:

(A) The full legal name of the reporting company;

(B) Any trade name or ‘‘doing business as’’ name of the reporting company;

(C) A complete current address consisting of:

(1) In the case of a reporting company with a principal place of business in the United States, the street address of such principal place of business; and

(2) In all other cases, the street address of the primary location in the United States where the reporting company conducts business;

(D) The State, Tribal, or foreign jurisdiction of formation of the reporting company;

(E) For a foreign reporting company, the State or Tribal jurisdiction where such company first registers; and

(F) The Internal Revenue Service (IRS) Taxpayer Identification Number (TIN) (including an Employer Identification Number (EIN)) of the reporting company, or where a foreign reporting company has not been issued a TIN, a tax identification number issued by a foreign jurisdiction and the name of such jurisdiction;

(ii) For every individual who is a beneficial owner of such reporting company, and every individual who is a company applicant with respect to such reporting company:

(A) The full legal name of the individual;

(B) The date of birth of the individual;

(C) A complete current address consisting of:

(1) In the case of a company applicant who forms or registers an entity in the course of such company applicant's business, the street address of such business; or

(2) In any other case, the individual's residential street address;

(D) A unique identifying number and the issuing jurisdiction from one of the following documents:

(1) A non-expired passport issued to the individual by the United States government;

(2) A non-expired identification document issued to the individual by a State, local government, or Indian tribe for the purpose of identifying the individual;

(3) A non-expired driver's license issued to the individual by a State; or

(4) A non-expired passport issued by a foreign government to the individual, if the individual does not possess any of the documents

described in paragraph (b)(1)(ii)(D)(1), (b)(1)(ii)(D)(2), or (b)(1)(ii)(D)(3) of this section; and

(E) An image of the document from which the unique identifying number in paragraph (b)(1)(ii)(D) of this section was obtained.

(2) *Special rules* –

(i) *Reporting company owned by exempt entity*. If one or more exempt entities under paragraph (c)(2) of this section has or will have a direct or indirect ownership interest in a reporting company and an individual is a beneficial owner of the reporting company exclusively by virtue of the individual's ownership interest in such exempt entities, the report may include the names of the exempt entities in lieu of the information required under paragraph (b)(1) of this section with respect to such beneficial owner.

(ii) *Minor child*. If a reporting company reports the information required under paragraph (b)(1) of this section with respect to a parent or legal guardian of a minor child consistent with paragraph (d)(3)(i) of this section, then the report shall indicate that such information relates to a parent or legal guardian.

(iii) *Foreign pooled investment vehicle*. If an entity would be a reporting company but for paragraph (c)(2)(xviii) of this section, and is formed under the laws of a foreign country, such entity shall be deemed a reporting company for purposes of paragraphs (a) and (b) of this section, except the report shall include the information required under paragraph (b)(1) of this section solely with respect to an individual who exercises substantial control over the entity. If more than one individual exercises substantial control over the entity, the entity shall report information with respect to the individual who has the greatest authority over the strategic management of the entity.

(iv) *Company applicant for existing companies*. Notwithstanding paragraph (b)(1)(ii) of this section, if a reporting company was created or registered before January 1, 2024, the reporting company shall report that fact, but is not required to report information with respect to any company applicant.

(3) *Contents of updated or corrected reports* –

(i) *Updated reports—in general*. An updated report required to be filed pursuant to paragraph (a)(2) of this section shall reflect any change with respect to required information previously submitted to FinCEN concerning a reporting company or its beneficial owners.

(ii) *Updated reports—newly exempt entities*. An updated report required to be filed pursuant to paragraph (a)(2)(ii) of this section shall indicate that the filing entity is no longer a reporting company.

(iii) *Corrected reports*. A corrected report required to be filed pursuant to paragraph (a)(3) of this section shall correct all inaccuracies in the information previously reported to FinCEN.

(4) *FinCEN identifier -*

(i) *Application*.

(A) An individual may obtain a FinCEN identifier by submitting to FinCEN an application containing the information about the individual described in paragraph (b)(1) of this section.

(B) A reporting company may obtain a FinCEN identifier by submitting to FinCEN an application at or after the time that the entity submits an initial report required under paragraph (b)(1) of this section.

(C) Each FinCEN identifier shall be specific to each such individual or reporting company, and each such individual or reporting company (including any successor reporting company) may obtain only one FinCEN identifier.

(ii) *Use of the FinCEN identifier*.

(A) If an individual has obtained a FinCEN identifier and provided such FinCEN identifier to a reporting company, the reporting company may include such FinCEN identifier in its report in lieu of the information required under paragraph (b)(1) of this section with respect to such individual.

(B) A reporting company may report another entity's FinCEN identifier and full legal name in lieu of the information required under paragraph (b)(1)(ii) of this section with respect to the beneficial owners of the reporting company only if:

(1) The other entity has obtained a FinCEN identifier and provided that FinCEN identifier to the reporting company;

(2) An individual is or may be a beneficial owner of the reporting company by virtue of an interest in the reporting company that the individual holds through an ownership interest in the other entity; and

(3) The beneficial owners of the other entity and of the reporting company are the same individuals.

(iii) *Updates and corrections*.

(A) Any individual that has obtained a FinCEN identifier shall update or correct any information previously submitted to FinCEN in an application for such FinCEN identifier.

(1) If there is any change with respect to required information previously submitted to FinCEN in such application, the individual shall file an updated application reflecting such change within 30 calendar days after the date on which such change occurs.

(2) If any such application was inaccurate when filed and remains inaccurate, the individual shall file a corrected application correcting all inaccuracies within 30 calendar days after the date on which the individual becomes aware or has reason to know of the inaccuracy. A corrected application filed under this paragraph within this 30-day period will be deemed to satisfy 31 U.S.C. 5336(h)(3)(C)(i)(I)(bb) if filed within 90 calendar days after the date on which the inaccurate application was submitted.

(B) Any reporting company that has obtained a FinCEN identifier shall file an updated or corrected report to update or correct any information previously submitted to FinCEN. Such updated or corrected report shall be filed at the same time and in the same manner as updated or corrected reports filed under paragraph (a) of this section.

(c) *Reporting company* –

(1) *Definition of reporting company*. For purposes of this section, the term ''reporting company'' means either a domestic reporting company or a foreign reporting company.

(i) The term ''domestic reporting company'' means any entity that is:

(A) A corporation;

(B) A limited liability company; or

(C) Created by the filing of a document with a secretary of state or any similar office under the law of a State or Indian tribe.

(ii) The term ''foreign reporting company'' means any entity that is:

(A) A corporation, limited liability company, or other entity;

(B) Formed under the law of a foreign country; and

(C) Registered to do business in any State or tribal jurisdiction by the filing of a document with a secretary of state or any similar office under the law of a State or Indian tribe.

(2) *Exemptions*. Notwithstanding paragraph (c)(1) of this section, the term ''reporting company'' does not include:

(i) *Securities reporting issuer*. Any issuer of securities that is:

(A) An issuer of a class of securities registered under section 12 of the Securities Exchange Act of 1934 (15 U.S.C. 78l); or

(B) Required to file supplementary and periodic information under section 15(d) of the Securities Exchange Act of 1934 (15 U.S.C. 78o(d)).

(ii) *Governmental authority*. Any entity that:

(A) Is established under the laws of the United States, an Indian tribe, a State, or a political subdivision of a State, or under an interstate compact between two or more States; and

(B) Exercises governmental authority on behalf of the United States or any such Indian tribe, State, or political subdivision.

(iii) *Bank*. Any bank, as defined in:

(A) Section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813);

(B) Section 2(a) of the Investment Company Act of 1940 (15 U.S.C. 80a-2(a)); or

(C) Section 202(a) of the Investment Advisers Act of 1940 (15 U.S.C. 80b-2(a)).

(iv) *Credit union*. Any Federal credit union or State credit union, as those terms are defined in section 101 of the Federal Credit Union Act (12 U.S.C. 1752).

(v) *Depository institution holding company*. Any bank holding company as defined in section 2 of the Bank Holding Company Act of 1956 (12 U.S.C. 1841), or any savings and loan holding company as defined in section 10(a) of the Home Owners' Loan Act (12 U.S.C. 1467a(a)).

(vi) *Money services business*. Any money transmitting business registered with FinCEN under 31 U.S.C. 5330, and any money services business registered with FinCEN under 31 CFR 1022.380.

(vii) *Broker or dealer in securities*. Any broker or dealer, as those terms are defined in section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c), that is registered under section 15 of that Act (15 U.S.C. 78o).

(viii) *Securities exchange or clearing agency*. Any exchange or clearing agency, as those terms are defined in section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c), that is registered under sections 6 or 17A of that Act (15 U.S.C. 78f, 78q-1).

(ix) *Other Exchange Act registered entity*. Any other entity not described in paragraph (c)(2)(i), (vii), or (viii) of this section that is registered with the

Securities and Exchange Commission under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

(x) *Investment company or investment adviser*. Any entity that is:

(A) An investment company as defined in section 3 of the Investment Company Act of 1940 (15 U.S.C. 80a-3), or is an investment adviser as defined in section 202 of the Investment Advisers Act of 1940 (15 U.S.C. 80b-2); and

(B) Registered with the Securities and Exchange Commission under the Investment Company Act of 1940 (15 U.S.C. 80a-1 *et seq.*) or the Investment Advisers Act of 1940 (15 U.S.C. 80b-1 *et seq.*).

(xi) *Venture capital fund adviser*. Any investment adviser that:

(A) Is described in section 203(l) of the Investment Advisers Act of 1940 (15 U.S.C. 80b-3(l)); and

(B) Has filed Item 10, Schedule A, and Schedule B of Part 1A of Form ADV, or any successor thereto, with the Securities and Exchange Commission.

(xii) *Insurance company*. Any insurance company as defined in section 2 of the Investment Company Act of 1940 (15 U.S.C. 80a-2).

(xiii) *State-licensed insurance producer*. Any entity that:

(A) Is an insurance producer that is authorized by a State and subject to supervision by the insurance commissioner or a similar official or agency of a State; and

(B) Has an operating presence at a physical office within the United States.

(xiv) *Commodity Exchange Act registered entity*. Any entity that:

(A) Is a registered entity as defined in section 1a of the Commodity Exchange Act (7 U.S.C. 1a); or

(B) Is:

(1) A futures commission merchant, introducing broker, swap dealer, major swap participant, commodity pool operator, or commodity trading advisor, each as defined in section 1a of the Commodity Exchange Act (7 U.S.C. 1a), or a retail foreign exchange dealer as described in section 2(c)(2)(B) of the Commodity Exchange Act (7 U.S.C. 2(c)(2)(B); and

(2) Registered with the Commodity Futures Trading Commission under the Commodity Exchange Act.

(xv) *Accounting firm*. Any public accounting firm registered in accordance with section 102 of the Sarbanes-Oxley Act of 2002 (15 U.S.C. 7212).

(xvi) *Public utility*. Any entity that is a regulated public utility as defined in 26 U.S.C. 7701(a)(33)(A) that provides telecommunications services, electrical power, natural gas, or water and sewer services within the United States.

(xvii) *Financial market utility*. Any financial market utility designated by the Financial Stability Oversight Council under section 804 of the Payment, Clearing, and Settlement Supervision Act of 2010 (12 U.S.C. 5463).

(xviii) *Pooled investment vehicle*. Any pooled investment vehicle that is operated or advised by a person described in paragraph (c)(2)(iii), (iv), (vii), (x), or (xi) of this section.

(xix) *Tax-exempt entity*. Any entity that is:

(A) An organization that is described in section 501(c) of the Internal Revenue Code of 1986 (Code) (determined without regard to section 508(a) of the Code) and exempt from tax under section 501(a) of the Code, except that in the case of any such organization that ceases to be described in section 501(c) and exempt from tax under section 501(a), such organization shall be considered to continue to be described in this paragraph (c)(1)(xix)(A) for the 180-day period beginning on the date of the loss of such tax-exempt status;

(B) A political organization, as defined in section 527(e)(1) of the Code, that is exempt from tax under section 527(a) of the Code; or

(C) A trust described in paragraph (1) or (2) of section 4947(a) of the Code.

(xx) *Entity assisting a tax-exempt entity*. Any entity that:

(A) Operates exclusively to provide financial assistance to, or hold governance rights over, any entity described in paragraph (c)(2)(xix) of this section;

(B) Is a United States person;

(C) Is beneficially owned or controlled exclusively by one or more United States persons that are United States citizens or lawfully admitted for permanent residence; and

(D) Derives at least a majority of its funding or revenue from one or more United States persons that are United States citizens or lawfully admitted for permanent residence.

(xxi) *Large operating company*. Any entity that:

(A) Employs more than 20 full time employees in the United States, with ‘‘full time employee in the United States’’ having the meaning provided in 26 CFR 54.4980H-1(a) and 54.4980H-3, except that the term ‘‘United

States'' as used in 26 CFR 54.4980H-1(a) and 54.4980H–3 has the meaning provided in § 1010.100(hhh);

(B) Has an operating presence at a physical office within the United States; and

(C) Filed a Federal income tax or information return in the United States for the previous year demonstrating more than $5,000,000 in gross receipts or sales, as reported as gross receipts or sales (net of returns and allowances) on the entity's IRS Form 1120, consolidated IRS Form 1120, IRS Form 1120–S, IRS Form 1065, or other applicable IRS form, excluding gross receipts or sales from sources outside the United States, as determined under Federal income tax principles. For an entity that is part of an affiliated group of corporations within the meaning of 26 U.S.C. 1504 that filed a consolidated return, the applicable amount shall be the amount reported on the consolidated return for such group.

(xxii) *Subsidiary of certain exempt entities*. Any entity whose ownership interests are controlled or wholly owned, directly or indirectly, by one or more entities described in paragraphs (c)(2)(i), (ii), (iii), (iv), (v), (vii), (viii), (ix), (x), (xi), (xii), (xiii), (xiv), (xv), (xvi), (xvii), (xix), or (xxi) of this section.

(xxiii) *Inactive entity*. Any entity that:

(A) Was in existence on or before January 1, 2020;

(B) Is not engaged in active business;

(C) Is not owned by a foreign person, whether directly or indirectly, wholly or partially;

(D) Has not experienced any change in ownership in the preceding twelve month period;

(E) Has not sent or received any funds in an amount greater than $1,000, either directly or through any financial account in which the entity or any affiliate of the entity had an interest, in the preceding twelve month period; and

(F) Does not otherwise hold any kind or type of assets, whether in the United States or abroad, including any ownership interest in any corporation, limited liability company, or other similar entity.

(d) *Beneficial owner*. For purposes of this section, the term ''beneficial owner,'' with respect to a reporting company, means any individual who, directly or indirectly, either exercises substantial control over such reporting company or owns or controls at least 25 percent of the ownership interests of such reporting company.

(1) *Substantial control* -

(i) *Definition of substantial control*. An individual exercises substantial control over a reporting company if the individual:

(A) Serves as a senior officer of the reporting company;

(B) Has authority over the appointment or removal of any senior officer or a majority of the board of directors (or similar body);

(C) Directs, determines, or has substantial influence over important decisions made by the reporting company, including decisions regarding:

(1) The nature, scope, and attributes of the business of the reporting company, including the sale, lease, mortgage, or other transfer of any principal assets of the reporting company;

(2) The reorganization, dissolution, or merger of the reporting company;

(3) Major expenditures or investments, issuances of any equity, incurrence of any significant debt, or approval of the operating budget of the reporting company;

(4) The selection or termination of business lines or ventures, or geographic focus, of the reporting company;

(5) Compensation schemes and incentive programs for senior officers;

(6) The entry into or termination, or the fulfillment or non-fulfillment, of significant contracts;

(7) Amendments of any substantial governance documents of the reporting company, including the articles of incorporation or similar formation documents, bylaws, and significant policies or procedures; or

(D) Has any other form of substantial control over the reporting company.

(ii) *Direct or indirect exercise of substantial control*. An individual may directly or indirectly, including as a trustee of a trust or similar arrangement, exercise substantial control over a reporting company through:

(A) Board representation;

(B) Ownership or control of a majority of the voting power or voting rights of the reporting company;

(C) Rights associated with any financing arrangement or interest in a company;

(D) Control over one or more intermediary entities that separately or collectively exercise substantial control over a reporting company;

(E) Arrangements or financial or business relationships, whether formal or informal, with other individuals or entities acting as nominees; or

(F) Any other contract, arrangement, understanding, relationship, or otherwise.

(2) *Ownership Interests* -

(i) *Definition of ownership interest*. The term ‘‘ownership interest’’ means:

(A) Any equity, stock, or similar instrument; preorganization certificate or subscription; or transferable share of, or voting trust certificate or certificate of deposit for, an equity security, interest in a joint venture, or certificate of interest in a business trust; in each such case, without regard to whether any such instrument is transferable, is classified as stock or anything similar, or confers voting power or voting rights;

(B) Any capital or profit interest in an entity;

(C) Any instrument convertible, with or without consideration, into any share or instrument described in paragraph (d)(2)(i)(A), or (B) of this section, any future on any such instrument, or any warrant or right to purchase, sell, or subscribe to a share or interest described in paragraph (d)(2)(i)(A), or (B) of this section, regardless of whether characterized as debt;

(D) Any put, call, straddle, or other option or privilege of buying or selling any of the items described in paragraph (d)(2)(i)(A), (B), or (C) of this section without being bound to do so, except to the extent that such option or privilege is created and held by a third party or third parties without the knowledge or involvement of the reporting company; or

(E) Any other instrument, contract, arrangement, understanding, relationship, or mechanism used to establish ownership.

(ii) *Ownership or control of ownership interest*. An individual may directly or indirectly own or control an ownership interest of a reporting company through any contract, arrangement, understanding, relationship, or otherwise, including:

(A) Joint ownership with one or more other persons of an undivided interest in such ownership interest;

(B) Through another individual acting as a nominee, intermediary, custodian, or agent on behalf of such individual;

(C) With regard to a trust or similar arrangement that holds such ownership interest:

(1) As a trustee of the trust or other individual (if any) with the authority to dispose of trust assets;

(2) As a beneficiary who:

(i) Is the sole permissible recipient of income and principal from the trust; or

(ii) Has the right to demand a distribution of or withdraw substantially all of the assets from the trust; or

(3) As a grantor or settlor who has the right to revoke the trust or otherwise withdraw the assets of the trust; or

(D) Through ownership or control of one or more intermediary entities, or ownership or control of the ownership interests of any such entities, that separately or collectively own or control ownership interests of the reporting company.

(iii) *Calculation of the total ownership interests of a reporting company*. In determining whether an individual owns or controls at least 25 percent of the ownership interests of a reporting company, the total ownership interests that an individual owns or controls, directly or indirectly, shall be calculated as a percentage of the total outstanding ownership interests of the reporting company as follows:

(A) Ownership interests of the individual shall be calculated at the present time, and any options or similar interests of the individual shall be treated as exercised;

(B) For reporting companies that issue capital or profit interests (including entities treated as partnerships for federal income tax purposes), the individual's ownership interests are the individual's capital and profit interests in the entity, calculated as a percentage of the total outstanding capital and profit interests of the entity;

(C) For corporations, entities treated as corporations for federal income tax purposes, and other reporting companies that issue shares of stock, the applicable percentage shall be the greater of:

(1) the total combined voting power of all classes of ownership interests of the individual as a percentage of total outstanding voting power of all classes of ownership interests entitled to vote, or

(2) the total combined value of the ownership interests of the individual as a percentage of the total outstanding value of all classes of ownership interests; and

(D) If the facts and circumstances do not permit the calculations described in either paragraph (d)(2)(iii)(B) or (C) to be performed with reasonable certainty, any individual who owns or controls 25 percent or more of any class or type of ownership interest of a reporting company shall be deemed to own or control 25 percent or more of the ownership interests of the reporting company.

(3) *Exceptions*. Notwithstanding any other provision of this paragraph (d), the term ‘‘beneficial owner’’ does not include:

(i) A minor child, as defined under the law of the State or Indian tribe in which a domestic reporting company is created or a foreign reporting company is first registered, provided the reporting company reports the required information of a parent or legal guardian of the minor child as specified in paragraph (b)(2)(ii) of this section;

(ii) An individual acting as a nominee, intermediary, custodian, or agent on behalf of another individual;

(iii) An employee of a reporting company, acting solely as an employee, whose substantial control over or economic benefits from such entity are derived solely from the employment status of the employee, provided that such person is not a senior officer as defined in paragraph (f)(8) of this section;

(iv) An individual whose only interest in a reporting company is a future interest through a right of inheritance;

(v) A creditor of a reporting company. For purposes of this paragraph (d)(3)(v), a creditor is an individual who meets the requirements of paragraph (d) of this section solely through rights or interests for the payment of a predetermined sum of money, such as a debt incurred by the reporting company, or a loan covenant or other similar right associated with such right to receive payment that is intended to secure the right to receive payment or enhance the likelihood of repayment.

(e) *Company applicant*. For purposes of this section, the term ‘‘company applicant’’ means:

(1) For a domestic reporting company, the individual who directly files the document that creates the domestic reporting company as described in paragraph (c)(1)(i) of this section;

(2) For a foreign reporting company, the individual who directly files the document that first registers the foreign reporting company as described in paragraph (c)(1)(ii) of this section; and

(3) Whether for a domestic or a foreign reporting company, the individual who is primarily responsible for directing or controlling such filing if more than one individual is involved in the filing of the document.

(f) *Definitions*. For purposes of this section, the following terms have the following meanings.

(1) *Employee*. The term ‘‘employee’’ has the meaning given the term in 26 CFR 54.4980H-1(a)(15).

(2) *FinCEN identifier*. The term ''FinCEN identifier'' means the unique identifying number assigned by FinCEN to an individual or reporting company under this section.

(3) *Foreign person*. The term ''foreign person'' means a person who is not a United States person.

(4) *Indian tribe*. The term ''Indian tribe'' has the meaning given the term ''Indian tribe'' in section 102 of the Federally Recognized Indian Tribe List Act of 1994 (25 U.S.C. 5130).

(5) *Lawfully admitted for permanent residence*. The term ''lawfully admitted for permanent residence'' has the meaning given the term in section 101(a) of the Immigration and Nationality Act (8 U.S.C. 1101(a)).

(6) *Operating presence at a physical office within the United States*. The term ''has an operating presence at a physical office within the United States'' means that an entity regularly conducts its business at a physical location in the United States that the entity owns or leases and that is physically distinct from the place of business of any other unaffiliated entity.

(7) *Pooled investment vehicle*. The term ''pooled investment vehicle'' means:

(i) Any investment company, as defined in section 3(a) of the Investment Company Act of 1940 (15 U.S.C. 80a-3(a)); or

(ii) Any company that:

(A) Would be an investment company under that section but for the exclusion provided from that definition by paragraph (1) or (7) of section 3(c) of that Act (15 U.S.C. 80a-3(c)); and

(B) Is identified by its legal name by the applicable investment adviser in its Form ADV (or successor form) filed with the Securities and Exchange Commission or will be so identified in the next annual updating amendment to Form ADV required to be filed by the applicable investment adviser pursuant to rule 204-1 under the Investment Advisers Act of 1940 (17 CFR 275.204-1).

(8) *Senior officer*. The term ''senior officer'' means any individual holding the position or exercising the authority of a president, chief financial officer, general counsel, chief executive officer, chief operating officer, or any other officer, regardless of official title, who performs a similar function.

(9) *State*. The term ''State'' means any state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Commonwealth of the Northern Mariana Islands, American Samoa, Guam, the United States Virgin Islands, and any other commonwealth, territory, or possession of the United States.

(10) *United States person*. The term ''United States person'' has the meaning given the term in section 7701(a)(30) of the Internal Revenue Code of 1986.

(g) *Reporting violations*. It shall be unlawful for any person to willfully provide, or attempt to provide, false or fraudulent beneficial ownership information, including a false or fraudulent identifying photograph or document, to FinCEN in accordance with this section, or to willfully fail to report complete or updated beneficial ownership information to FinCEN in accordance with this section. For purposes of this paragraph (g):

(1) The term ''person'' includes any individual, reporting company, or other entity.

(2) The term ''beneficial ownership information'' includes any information provided to FinCEN under this section.

(3) A person provides or attempts to provide beneficial ownership information to FinCEN if such person does so directly or indirectly, including by providing such information to another person for purposes of a report or application under this section.

(4) A person fails to report complete or updated beneficial ownership information to FinCEN if, with respect to an entity:

(i) such entity is required, pursuant to title 31, United States Code, section 5336, or its implementing regulations, to report information to FinCEN;

(ii) the reporting company fails to report such information to FinCEN; and

(iii) such person either causes the failure, or is a senior officer of the entity at the time of the failure.

II.G.31. Debt Modification or Forgiveness

II.G.31.a. Debt Modifications

Reg. § 1.1001-3, "Modifications of debt instruments," provides rules for determining whether a modification of the terms of a debt instrument results in an exchange for purposes of Reg. § 1.1001-1(a).[1960] also relevant is part II.G.20.c Changing from LIBOR or Other Interbank Offered Rates.

For that purpose, a significant modification of a debt instrument results in an exchange of the original debt instrument for a modified instrument that differs materially either in kind or in extent.[1961]

[1960] Reg. § 1.1001-3(a), which continues:

> This section applies to any modification of a debt instrument, regardless of the form of the modification. For example, this section applies to an exchange of a new instrument for an existing debt instrument, or to an amendment of an existing debt instrument. This section also applies to a modification of a debt instrument that the issuer and holder accomplish indirectly through one or more transactions with third parties. This section, however, does not apply to exchanges of debt instruments between holders.

[1961] Reg. § 1.1001-3(b), which continues:

Generally, a modification of a debt instrument is any alteration of the payor's or payee's legal rights or obligations,[1962] unless that change occurs by operation of the terms of a debt instrument[1963] and is not within the list of changes that constitute a modification.[1964] Letter Ruling 202337007 involved the following facts:

> LLC 1 is a State A limited liability company that, through its subsidiaries and joint-ventures, is engaged in Business A. LLC 1 is wholly owned by LLC 2, a State A limited liability company. LLC 2 is wholly owned by LLC 3, a State A limited liability company. LLC 3 is s percent owned by LLC 4, a State A limited liability company, with the remaining interest held by a third party ("LLC 3 Investor"). For federal income tax purposes, LLC 3 is treated as a partnership, and LLC 1 and LLC 2 are entities that are disregarded as separate from LLC 3.

> A modification that is not a significant modification is not an exchange for purposes of § 1.1001-1(a). Paragraphs (c) and (d) of this section define the term modification and contain examples illustrating the application of the rule. Paragraphs (e) and (f) of this section provide rules for determining when a modification is a significant modification. Paragraph (f) of this section also provides rules for determining whether the modified instrument received in an exchange will be classified as an instrument or property right that is not debt for federal income tax purposes. Paragraph (g) of this section contains examples illustrating the application of the rules in paragraphs (e) and (f) of this section.

[1962] Reg. § 1.1001-3(c)(1)(i), "Alteration of terms," provides:

> A modification means any alteration, including any deletion or addition, in whole or in part, of a legal right or obligation of the issuer or a holder of a debt instrument, whether the alteration is evidenced by an express agreement (oral or written), conduct of the parties, or otherwise.

[1963] Reg. § 1.1001-3(c)(1)(ii), "Alterations occurring by operation of the terms of a debt instrument," provides:

> Except as provided in paragraph (c)(2) of this section, an alteration of a legal right or obligation that occurs by operation of the terms of a debt instrument is not a modification. An alteration that occurs by operation of the terms may occur automatically (for example, an annual resetting of the interest rate based on the value of an index or a specified increase in the interest rate if the value of the collateral declines from a specified level) or may occur as a result of the exercise of an option provided to an issuer or a holder to change a term of a debt instrument.

[1964] Reg. § 1.1001-3(c)(2), "Exceptions," provides:

> The alterations described in this paragraph (c)(2) are modifications, even if the alterations occur by operation of the terms of a debt instrument.
>
> (i) *Change in obligor or nature of instrument*. An alteration that results in the substitution of a new obligor, the addition or deletion of a co-obligor, or a change (in whole or in part) in the recourse nature of the instrument (from recourse to nonrecourse or from nonrecourse to recourse) is a modification.
>
> (ii) *Property that is not debt*. An alteration that results in an instrument or property right that is not debt for Federal income tax purposes is a modification unless the alteration occurs pursuant to a holder's option under the terms of the instrument to convert the instrument into equity of the issuer (notwithstanding paragraph (c)(2)(iii) of this section). The rules of paragraph (f)(7) of this section apply to determine whether an alteration or modification results in an instrument or property right that is not debt.
>
> (iii) *Certain alterations resulting from the exercise of an option*. An alteration that results from the exercise of an option provided to an issuer or a holder to change a term of a debt instrument is a modification unless—
>
> (A) The option is unilateral (as defined in paragraph (c)(3) of this section); and
>
> (B) In the case of an option exercisable by a holder, the exercise of the option does not result in (or, in the case of a variable or contingent payment, is not reasonably expected to result in) a deferral of, or a reduction in, any scheduled payment of interest or principal.

All of the common limited liability interests of LLC 4 are owned by Subsidiary 1, a State A limited liability company that has elected, effective as of Date 1, to be taxed as a corporation. LLC 4 also has preferred limited liability company interests outstanding, all of which are owned by a third party ("LLC 4 Investor"). For federal income tax purposes, LLC 4 is treated as a partnership.

Subsidiary 1 is owned by Parent, a State B corporation that is the common parent of an affiliated group of corporations filing a consolidated federal income tax return. As of Date 1, Subsidiary 1 is a member of Parent's consolidated group.

As of Date 2, LLC 1 had outstanding, publicly-traded debt consisting of senior secured notes, three term loans (hereinafter, "Term Loan A," "Term Loan B," and "Term Loan C"), and unsecured notes (collectively referred to as the "Debt"). The Debt is held by third-parties that are not related (as determined under section 108(e)(4) of the Code) to LLC 1, LLC 2, LLC 3, LLC 4, Subsidiary 1, Parent, or any other member of Parent's consolidated group.

The senior secured notes have an aggregate principal amount of approximately $t, pay interest semi-annually at a rate of y percent, and mature on Date 3. Term Loan A has an aggregate principal amount of approximately $u, pays a variable rate of interest quarterly, and matures on Date 4. Term Loan B has an aggregate principal amount of approximately $v, pays a variable rate of interest quarterly, and matures on Date 5. Term Loan C has an aggregate principal amount of approximately $w, pays a variable rate of interest quarterly, and matures on Date 5. The unsecured notes have an aggregate principal amount of approximately $x, pay interest semi-annually at a rate of z percent, and mature on Date 6.

The Debt is recourse to LLC 1. The senior secured notes, Term Loan A, Term Loan B, and Term Loan C are (i) guaranteed by LLC 2 and by the domestic subsidiaries of LLC 1 and (ii) secured by substantially all of the assets of LLC 1 and the guarantors. None of Parent, Subsidiary 1, LLC 4, or LLC 3 is an obligor or guarantor with respect to, or has pledged any assets to support, any of the Debt.

Proposed Transaction

Parent and the entities described above intend to effect the following transaction steps (each step (1)-(3) below a "Step", and the Steps 1-3, collectively, the "Proposed Transaction").

1. LLC 3 will redeem the limited liability company interest of LLC 3 Investor for cash, as a result of which LLC 3 will become wholly-owned by LLC 4.

2. LLC 4 will redeem the preferred limited liability company interest of LLC 4 Investor for cash, as a result of which LLC 4 will become wholly-owned by Subsidiary 1.

3. LLC 1 will convert to a corporation ("Subsidiary 2") under the Act.

As a result of Step 1, for federal income tax purposes, LLC 3, LLC 2, and LLC 1 will become entities disregarded as separate from LLC 4. As a result of Step 2, for federal income tax purposes, LLC 4, LLC 3, LLC 2, and LLC 1 will become entities disregarded

> as separate from Subsidiary 1. As a result of Step 3, for federal income tax purposes, Subsidiary 2 will become a member of the Parent consolidated group.
>
> Immediately after the closing date of the Proposed Transaction, the assets and liabilities of Subsidiary 2 will be the same as the assets and liabilities of LLC 1 immediately prior to the Proposed Transaction.
>
> The Proposed Transaction, whether by operation of the terms of the Debt or otherwise, will not (i) change the yield on the Debt (as computed under section 1.1001-3(e)(2)(iii) of the Income Tax Regulations); (ii) change the specific timing of payments on the Debt; (iii) for State A law purposes, result in the addition or subtraction of co-obligors or guarantors to the Debt; (iv) change the priority of any of the Debt relative to other Debt; (v) change the collateral or security of the Debt; or (vi) otherwise alter the legal rights or obligations with respect to the Debt.
>
> Pursuant to the Act, Subsidiary 2 will remain the same legal entity as LLC 1. None of the Debt holders' rights against LLC 1, including with respect to payments and remedies, and none of LLC 1's obligations and covenants to the Debt holders will be altered in any manner by the Proposed Transaction. Following the Proposed Transaction, the Debt holders will continue to have exactly the same legal relationship with Subsidiary 2 that they previously had with LLC 1. Additionally, under State A law, the Proposed Transaction will not result in the creation of any new legal rights or obligations between the Debt holders and Subsidiary 2. There are no provisions in the original terms of the Debt that require the consent or approval of any holder of the Debt in order for LLC 4, LLC 3, and LLC 1 to effectuate the Proposed Transaction.

Letter Ruling 202337007 reviewed Code § 1001 and Reg. §§ 1.1001-1(a), 1.1001-3(b), 1.1001-3(c) and 1.1001-3(e) and ruled that the Proposed Transaction will not result in a modification of the Debt under section 1.1001-3, reasoning:

> Section 18-265(e) of the Act provides that for State A law purposes, the conversion of any entity into a domestic corporation shall not be deemed to affect any obligations or liabilities of the other entity incurred prior to its conversion to a domestic corporation or the personal liability of any person incurred prior to such conversion. Moreover, section 18-265(f) of the Act provides, inter alia, that for purposes of State A law, the domestic corporation shall be deemed to be the same entity as the converted other entity, all rights of creditors and liens upon any property of the other entity that has converted shall be preserved unimpaired, and all debts, liabilities and duties of the other entity that has converted shall remain attached to the domestic corporation and may be enforced against it to the same extent as if said debts, liabilities and duties had been incurred or contracted by it.
>
> Generally, Federal tax law looks to State law to determine the legal entitlements to property. *Aquilino v. United States*, 363 U.S. 509, 513 (1930); *Morgan v. Commissioner*, 309 U.S. 78, 82 (1940). The legal rights or obligations referred to in section 1.1001-3(c) are rights and obligations that are determined under State law. Pursuant to the Act, the conversion of LLC 1 into Subsidiary 2 will not affect the legal rights or obligations between Debt holders and LLC 1 because, as a matter of State A law, Subsidiary 2 will remain the same legal entity as LLC 1. Debt holders will continue to have exactly the same legal relationship with Subsidiary 2 that they previously had with LLC 1.

> Pursuant to the Act, Debt holders' legal rights against Subsidiary 2 with respect to payments and remedies will be the same legal rights that Debt holders had against LLC 1. The obligations and covenants from Subsidiary 2 to Debt holders will be the same as the obligations and covenants from LLC 1 to Debt holders. In these circumstances, the Proposed Transaction will not effect an alteration that results in either a change of obligor or a change in the recourse nature of the Debt for purposes of section 1.1001-3(c)(2)(i).

Generally, a modification is significant only if, based on all facts and circumstances, the legal rights or obligations that are altered and the degree to which they are altered are economically significant.[1965]

Rules for when a change of yield are provided.[1966]

[1965] Reg. § 1.1001-3(e), "Significant modifications," provides:

> Whether the modification of a debt instrument is a significant modification is determined under the rules of this paragraph (e). Paragraph (e)(1) of this section provides a general rule for determining the significance of modifications not otherwise addressed in this paragraph (e). Paragraphs (e)(2) through (6) of this section provide specific rules for determining the significance of certain types of modifications. Paragraph (f) of this section provides rules of application, including rules for modifications that are effective on a deferred basis or upon the occurrence of a contingency.

Reg. § 1.1001-3(e)(1), "General rule," provides:

> Except as otherwise provided in paragraphs (e)(2) through (e)(6) of this section, a modification is a significant modification only if, based on all facts and circumstances, the legal rights or obligations that are altered and the degree to which they are altered are economically significant. In making a determination under this paragraph (e)(1), all modifications to the debt instrument (other than modifications subject to paragraphs (e)(2) through (6) of this section) are considered collectively, so that a series of such modifications may be significant when considered together although each modification, if considered alone, would not be significant.

[1966] Reg. § 1.1001-3(e)(2), "Change in yield," provides:

> (i) *Scope of rule*. This paragraph (e)(2) applies to debt instruments that provide for only fixed payments, debt instruments with alternative payment schedules subject to § 1.1272-1(c), debt instruments that provide for a fixed yield subject to § 1.1272-1(d) (such as certain demand loans), and variable rate debt instruments. Whether a change in the yield of other debt instruments (for example, a contingent payment debt instrument) is a significant modification is determined under paragraph (e)(1) of this section.
>
> (ii) *In general*. A change in the yield of a debt instrument is a significant modification if the yield computed under paragraph (e)(2)(iii) of this section varies from the annual yield on the unmodified instrument (determined as of the date of the modification) by more than the greater of—
>
> (A) ¼ of one percent (25 basis points); or
>
> (B) 5 percent of the annual yield of the unmodified instrument (.05 × annual yield).
>
> (iii) *Yield of the modified instrument*.
>
> (A) *In general*. The yield computed under this paragraph (e)(2)(iii) is the annual yield of a debt instrument with—
>
> (1) an issue price equal to the adjusted issue price of the unmodified instrument on the date of the modification (increased by any accrued but unpaid interest and decreased by any accrued bond issuance premium not yet taken into account, and increased or decreased, respectively, to reflect payments made to the issuer or to the holder as consideration for the modification); and

A material deferral of scheduled payments[1967] is a significant modification unless it falls within a safe harbor.[1968]

Other rules relate to a change in obligor (which might be relevant in the context of a trust division) or security,[1969] changes in the nature of a debt instrument,[1970] and accounting or financial covenants.[1971]

II.G.31.b. Debt Forgiveness

Code § 61(a)(11) includes in income "income from discharge of indebtedness."

---

(2) payments equal to the payments on the modified debt instrument from the date of the modification.

(B) *Prepayment penalty*. For purposes of this paragraph (e)(2)(iii), a commercially reasonable prepayment penalty for a pro rata prepayment (as defined in § 1.1275-2(f)) is not consideration for a modification of a debt instrument and is not taken into account in determining the yield of the modified instrument.

(iv) *Variable rate debt instruments*. For purposes of this paragraph (e)(2), the annual yield of a variable rate debt instrument is the annual yield of the equivalent fixed rate debt instrument (as defined in § 1.1275-5(e)) which is constructed based on the terms of the instrument (either modified or unmodified, whichever is applicable) as of the date of the modification.

[1967] Reg. § 1.1001-3(e)(3), "Changes in timing of payments," begins with (i), "In general," which provides:

A modification that changes the timing of payments (including any resulting change in the amount of payments) due under a debt instrument is a significant modification if it results in the material deferral of scheduled payments. The deferral may occur either through an extension of the final maturity date of an instrument or through a deferral of payments due prior to maturity. The materiality of the deferral depends on all the facts and circumstances, including the length of the deferral, the original term of the instrument, the amounts of the payments that are deferred, and the time period between the modification and the actual deferral of payments.

[1968] Reg. § 1.1001-3(e)(3)(ii), "Safe-harbor period," which provides:

The deferral of one or more scheduled payments within the safe-harbor period is not a material deferral if the deferred payments are unconditionally payable no later than at the end of the safe-harbor period. The safe-harbor period begins on the original due date of the first scheduled payment that is deferred and extends for a period equal to the lesser of five years or 50 percent of the original term of the instrument. For purposes of this paragraph (e)(3)(ii), the term of an instrument is determined without regard to any option to extend the original maturity and deferrals of de minimis payments are ignored. If the period during which payments are deferred is less than the full safe-harbor period, the unused portion of the period remains a safe-harbor period for any subsequent deferral of payments on the instrument.

[1969] Reg. § 1.1001-3(e)(4). Generally, Reg. § 1.1001-3(e)(4)(vi)(A)(1) provides that "a change in payment expectations occurs if, as a result of a transaction":

(1) There is a substantial enhancement of the obligor's capacity to meet the payment obligations under a debt instrument and that capacity was primarily speculative prior to the modification and is adequate after the modification; or

(2) There is a substantial impairment of the obligor's capacity to meet the payment obligations under a debt instrument and that capacity was adequate prior to the modification and is primarily speculative after the modification.

Query whether a similar analysis might apply as to whether a trust division leaves each trust with the ability to make the distributions that were expected before the distribution.

[1970] Reg. § 1.1001-3(e)(5).

[1971] Reg. § 1.1001-3(e)(6).

Reg. § 1.61-12(a), "In general," provides:

> The discharge of indebtedness, in whole or in part, may result in the realization of income. If, for example, an individual performs services for a creditor, who in consideration thereof cancels the debt, the debtor realizes income in the amount of the debt as compensation for his services. A taxpayer may realize income by the payment or purchase of his obligations at less than their face value. In general, if a shareholder in a corporation which is indebted to him gratuitously forgives the debt, the transaction amounts to a contribution to the capital of the corporation to the extent of the principal of the debt.

Jacobowitz v. Commissioner, T.C. Memo. 2023-107, described timing the discharge:

> The question as to the year in which a debtor's obligation is canceled (thus giving rise to COD income) is one of fact to be determined on the basis of the evidence. *Miller Tr. v. Commissioner*, 76 T.C. 191, 195 (1981). A debt is deemed discharged (and COD income is generated) the moment it becomes clear that the debt will never have to be paid. *Cozzi v. Commissioner*, 88 T.C. 435, 445 (1987). Determining when that moment occurs requires a practical assessment of the facts and circumstances relating to the likelihood of payment. **Id**. (and cases cited thereat). "Any `identifiable event' which fixes the loss with certainty may be taken into consideration." *Id*. (citing *United States v. S.S. White Dental Mfg. Co.*, 274 U.S. 398 (1927)).
>
> Treasury Regulation § 1.6050P-1(b)(2) provides an exclusive list of seven "identifiable events" which constitute a discharge of debt for canceled debt information reporting purposes under section 6050P. The occurrence of one or more of these events triggers a creditor's obligation to send a Form 1099–C to the IRS and the debtor reporting the COD income. Treas. Reg. § 1.6050P-1(a). As relevant here, the third of the seven "identifiable events" giving rise to COD income (and thus the reporting requirement), provided in Treasury Regulation § 1.6050P-1(b)(2)(i)(C), is "[a] cancellation or extinguishment of an indebtedness upon the expiration of the statute of limitations for collection of an indebtedness, subject to the limitations described in paragraph (b)(2)(ii) of this section, or *upon the expiration of a statutory period for filing a claim or commencing a deficiency judgment proceeding*." (Emphasis added.)

Note that the statute includes in income "income from discharge of indebtedness" – not stating that the discharge of indebtedness necessarily generates income, but rather including it in income when it does generate income. The regulation says that discharge of indebtedness *may* generate income.

Code § 108 provides various exclusions from this rule, which also exclusions often translate into reductions in the basis of the debtor's assets. Before describing Code § 108 exclusions, let's dive into the consequences of debt being reduced or discharged. *Parker v. Commissioner*, T.C. Memo. 2023-104, reasoned and held in its discussion of "Tax Treatment of Debt Cancellation":

> Section 61(a) broadly defines gross income as "all income from whatever source derived." Section 61(a)(3) specifies that gross income includes "[g]ains derived from dealings in property," while section 61(a)(12) does the same for "[i]ncome from discharge of indebtedness."[5] See *Gehl v. Commissioner*, 102 T.C. 784, 789 (1994) ("[P]aragraphs (3) and (12) of section 61(a) are separate, independent, and not overlapping provisions in respect of the includability of a particular item in income."),

aff'd, 50 F.3d 12 (8th Cir. 1995). The distinction between these two subcategories of gross income - gain from property and COD income - can have significant tax consequences.

[5] After 2012, the year at issue, section 61(a)(12) was renumbered as section 61(a)(11).

When a taxpayer sells or disposes of property, the amount realized is equal to the amount of money plus the fair market value of any property received. § 1001(b). When a taxpayer sells or otherwise disposes of property encumbered by nonrecourse debt,[6] the amount of the outstanding debt is typically included in the amount realized.[7] See *Commissioner v. Tufts*, 461 U.S. 300, 317 (1983); *Crane v. Commissioner*, 331 U.S. 1, 14 (1947); *Milkovich v. United States*, 28 F.4th 1, 8 (9th Cir. 2022); Treas. Reg. § 1.1001-2(a)(1). To the extent that the amount realized exceeds the taxpayer's basis in the property, the taxpayer has gain. See § 1001(a).

[6] "Indebtedness is generally characterized as `nonrecourse' if the creditor's remedies are limited to particular collateral for the debt and as `recourse' if the creditor's remedies extend to all the debtor's assets." *Simonsen v. Commissioner*, 150 T.C. 201, 205 (2018) (quoting *Great Plains Gasification Assocs. v. Commissioner*, T.C. Memo. 2006-276, 92 T.C.M. (CCH) 534, 550).

[7] If the sold or disposed-of property instead secures recourse debt, the amount realized does not include amounts that would otherwise be COD income (i.e., debt relief in excess of the fair market value of the underlying property). *See Frazier v. Commissioner*, 111 T.C. 243, 245 (1998); Treas. Reg. § 1.1001-2(a)(2).

In contrast, a COD that is not part of a sale or exchange of property generally results in COD income, which may then be subject to certain statutory exclusions. See § 108(a)(1); see also *Estate of Delman v. Commissioner*, 73 T.C. 15, 31–32 (1979). Relevantly, section 108(a)(1)(B) allows a taxpayer who is insolvent at the time of a debt cancellation to exclude COD income from gross income. The amount of this exclusion is limited to the amount of the taxpayer's insolvency, *i.e.*, the amount by which the taxpayer's liabilities exceed the fair market value of their assets. § 108(a)(3); see *White v. Commissioner*, T.C. Memo. 2023-77, at *3.

In deciding whether debt relief results in gain or COD income, we focus on the facts and circumstances surrounding how the taxpayer debtor satisfied or extinguished the underlying debt. See *Danenberg v. Commissioner*, 73 T.C. 370, 381 (1979); *Peninsula Props. Co. v. Commissioner*, 47 B.T.A. 84, 91–92 (1942). If nonrecourse debt relief is conditioned upon a sale or exchange of property or is otherwise a part of that underlying sale or exchange, the amount of debt relief is properly included in the amount realized and is not COD income. *See Simonsen*, 150 T.C. at 211 (focusing on fact that lender's willingness to cancel mortgage debt was completely dependent on debtor's willingness to convey proceeds from sale of residence); *Sands v. Commissioner*, T.C. Memo. 1997-146, 73 T.C.M. (CCH) 2398, 2403 (rejecting taxpayer's contention that COD was "separate and distinct" from transfer of ownership in property), *aff'd without published opinion sub nom. Murphy v. Commissioner*, 164 F.3d 618 (2d Cir. 1998); Treas. Reg. § 1.1001-2(a)(1) ("[T]he amount realized from a sale or other disposition of property includes the amount of liabilities from which the transferor is discharged *as a result* of the sale or disposition." (Emphasis added.)); *see also 2925 Briarpark, Ltd. v.*

Commissioner, 163 F.3d 313, 319 (5th Cir. 1999) (concluding that debt relief "was closely intertwined" with underlying sale of property and thus included in amount realized on sale), *aff'g* T.C. Memo. 1997-298. In such an instance, it is immaterial whether debt relief takes the form of an assumption of debt by a purchaser or a cancellation by a lender. See *2925 Briarpark, Ltd. v. Commissioner*, 163 F.3d at 319; *Simonsen*, 150 T.C. at 212-13.

Respondent contends that the $2,741,399 relating to the cancellation of Loans N712A and N712B is taxable to Exterra as gain derived from the sale of the Livermore property. See § 61(a)(3). Respondent emphasizes that Loans N712A and N712B were nonrecourse to Exterra and were canceled as part of the sale of the Livermore property.

Petitioners take a rather different approach. In their briefing petitioners sidestep the threshold inquiry - whether the debt cancellation was part of the sale of the Livermore property and thus gave rise to gain - and focus on their contentions that either Exterra or petitioners themselves were insolvent at the time the debt was discharged. *Cf. Gehl*, 102 T.C. at 789 ("Only after it is determined that [section 61(a)(12)] applies does one reach the question of the impact of insolvency and therefore the applicability of section 108."); *Danenberg*, 73 T.C. at 384 (rejecting taxpayers' argument that their insolvency precluded inclusion of debt relief in amount realized). As best we can tell, much of petitioners' briefing is premised on a misconception that facts relating to Mr. Parker in his personal capacity are relevant to the question of whether there was income to Exterra in 2012 (and only then, flowthrough income to Mr. Parker as its 100% S corporation shareholder). In determining whether to sustain respondent's upward adjustment to Exterra's gross receipts (and thus the corresponding deficiency with respect to petitioners), we respect Exterra's separate corporate existence. See *Durando v. United States*, 70 F.3d 548, 552 (9th Cir. 1995) ("[I]t [is] improper to treat income earned by [an S] corporation through its trade or business as though it were earned directly by its shareholders...."); *Crook v. Commissioner*, 80 T.C. 27, 33 (1983) ("The separate existence of corporations is firmly established under the tax law, and this Court has recognized that the business of a subchapter S corporation is separate and distinct from that of its shareholders." (internal citation omitted)), *aff'd*, 747 F.2d 1463 (5th Cir. 1984). Accordingly, petitioners' observation, for instance, that Loans N712A and N712B were recourse as to Mr. Parker personally, is simply irrelevant to the issue before us.

We agree with respondent that the issue in this case is the threshold question of whether the cancellation of Loans N712A and N712B gave rise to gain or COD income for Exterra. We ultimately resolve that question in respondent's favor.

The parties have stipulated that Loans N712A and N712B were nonrecourse as to the PLF entities and Exterra. While the original loan agreements for Loans N712A and N712B are not part of the stipulated record, the parties further stipulated that Loans N712 and N712B A were each mezzanine loans. The record establishes that Loan N712A and N712B were each secured by the PLF entities' pledge of their respective membership interests in the Montevina entities. Because the PLF entities and the Montevina entities were disregarded entities for federal income tax purposes, we treat Exterra as owning the underlying assets (i.e., the Livermore property), subject to the nonrecourse mezzanine Loans N712A and N712B, before the sale.[8] See Treas. Reg. § 301.7701-2(a) ("[I]f the entity is disregarded, its activities are treated in the same manner as a sole proprietorship, branch, or division of the owner."); see also *Pierre v.*

> *Commissioner*, 133 T.C. 24, 42 (2009) (Halpern, J., dissenting) ("A sole proprietorship is generally understood to have no legal identity apart from the proprietor."), supplemented by T.C. Memo. 2010-106. In turn the sale of the PLF entities' membership interests in the Montevina entities is characterized for federal income tax purposes as a sale of the encumbered Livermore property by Exterra. See *DAF Charters, LLC v. Commissioner*, 152 T.C. 250, 260 (2019) ("[A]ny items of income and loss generated by the [disregarded] entity are directly attributable to and reported by the entity's owner for Federal tax purposes...."); see also Carter G. Bishop & Daniel S. Kleinberger, *Limited Liability Companies* § 2:83 Westlaw (database updated June 2023) ("The transfer of the interest in a disregarded entity is not treated as a transfer of the interest for federal tax purposes, but rather as a transfer of the assets of the disregarded entity.").
>
> [8] For federal income tax purposes, we characterize the mezzanine Loans N712A and N712B, which were secured by pledges of equity in the disregarded Montevina entities, as nonrecourse debt encumbering the underlying Livermore property in the hands of Exterra, the regarded entity; we note that the Commissioner has previously adopted a similar view in subregulatory guidance in a related context. *See* Rev. Proc. 2014-20, 2014-9 I.R.B. 614; I.R.S. Priv. Ltr. Rul. 09-53-005 (Dec. 31, 2009).
>
> The record is further clear that the cancellation of Loans N712A and N712B was part of the sale by Exterra (through the disregarded entities) of the Livermore property to the Buyers. As the relevant loan termination agreements between the PLF entities and NRFC WA Holdings II represented, the loan cancellation was made "[i]n connection with the proposed sale." Further, the loan termination agreements were executed on October 4, 2012 - the same date that the various other agreements effecting the sale of the Livermore property, including the consent and release agreement to which NRFC WA Holdings II was a party, were executed. The COD was part and parcel of the global agreement to convey the Livermore property, with NRFC WA Holdings II accepting new personal guaranties, a partial payment by the Buyers, and the escrowed deed to the Iowa property in consideration of that cancellation.
>
> We conclude that NRFC WA Holdings II's cancellation of Loans N712A and N712B was dependent on Exterra's sale of the Livermore property to the Buyers and was a part of the same sale transaction. *See Simonsen*, 150 T.C. at 211. Accordingly, given that Loans N712A and N712B were nonrecourse as to Exterra, the amount of debt relief was properly includible in Exterra's amount realized on the sale of the Livermore property and gave rise to gain to the extent in excess of Exterra's basis in the property. See Treas. Reg. § 1.1001-2(a)(1). In turn, that gain flowed through to petitioners' personal income tax returns via Mr. Parker's 100% shareholder interest in Exterra.

Jacobowitz v. Commissioner, T.C. Memo. 2023-107, described the discharge's character:

> Petitioner further contends that any COD income that may be attributable to him should be characterized as capital gain. In support of his contention, he relies on *L&C Springs Assocs. v. Commissioner*, 188 F.3d 866 (7th Cir. 1999), *aff'g* T.C. Memo. 1997-469, and *2925 Briarpark, Ltd. v. Commissioner*, 163 F.3d 313 (5th Cir. 1999), *aff'g* T.C. Memo. 1997-298.[8] Petitioner's contention is without merit.
>
> [8] In a footnote in his opening brief petitioner also attempts to draw support from I.R.S. Priv. Ltr. Rul. 202050014 (Dec. 12, 2020) (which he refers to as "PLR-117300-20"). A "written determination" of the IRS may not be used or cited as precedent, § 6110(k)(3),

> and written determinations are defined to include IRS private letter rulings, § 6110(b)(1)(A); see also *Plano Holding LLC v. Commissioner*, T.C. Memo. 2019-140, at *17 n.6 ("Private letter rulings have no precedential value and merely represent the Commissioner's position as to a particular set of facts.") (and cases cited thereat). In any event, I.R.S. Priv. Ltr. Rul. 202050014 is not helpful to petitioner. Like *L&C Springs Assocs.* and *2925 Briarpark, Ltd.*, as discussed above, I.R.S. Priv. Ltr. Rul. 202050014 addresses a situation factually distinct from the instant case.

> In L*&C Springs Assocs.*, the U.S. Court of Appeals for the Seventh Circuit did not opine on the nature of the income, which is the focus of the dispute here; rather, at issue in *L&C Springs Assocs.* was at what time the taxpayer abandoned certain property, thereby triggering gain from cancellation of indebtedness for purposes of section 1001. *L&C Springs Assocs.*, 188 F.3d at 868. In *2925 Briarpark, Ltd.*, the issue was whether the taxpayer-partner and the limited partnership realized gain from dealings in property under section 61(a)(3), rather than cancellation of indebtedness income under section 61(a)(12); the U.S. Court of Appeals for the Fifth Circuit did not opine on whether the gain was capital. Sagasolutions and Newtown never agreed that Sagasolutions would surrender or abandon the property that secured the line of credit in exchange for Newtown's canceling the debt, and petitioner has taken no steps to show that the resulting COD income was from the exchange of a capital asset as defined in section 1221. The COD income is ordinary income under section 61(a)(12).

Before discussing exclusions, let's briefly review partnerships. Part II.C.3.a Basic Consequences of Changes in Liability Allocations explains that partnership borrowing allocated to a partner generate tax basis as if they were cash contributions to the partnership, and reductions in liabilities allocated to a partner are treated as cash distributions to the partner. Borrowing and distributing the loan proceeds to a partner are not "found" money – when the liability allocated to the partner decreases, the partner may be taxed if the partner has insufficient basis (because the cash distributions already used the partner's basis). Part II.C.7 Maintaining Capital Accounts includes a discussion of how the IRS is tracking when such an event occurs; the income tax consequences of this deemed distribution are described in part II.Q.8.b.i Distribution of Property by a Partnership, especially parts II.Q.8.b.i.(a) Code § 731: General Rule for Distributions and II.Q.8.b.i.(c) Disguised Sale from Partnership to Partner. This reduction in allocating liabilities can arise from debt repayments, from changes in the partners' economic arrangements, or if the partner no longer owns any partnership interest. If a partnership interest is transferred, often the transferring partner should retain a partnership interest sufficient to continue to have the same liabilities allocated to himself/herself. See part II.C.3 Allocating Liabilities (Including Debt), especially part II.C.3.c Allocations of Recourse and Nonrecourse Liabilities. Then, when the partner dies and the retained partnership interest and its related liabilities are included in the partner's gross estate, a basis step-up can eliminate this issue; see part II.H.2.g Partnership Basis Adjustments. If the partner might not be able to retain this debt allocation for the rest of his/her life and most of the partnership interest was transferred to an irrevocable grantor trust, consider part III.B.2.j.iv.(a) Grantor Trust Reimbursing for Tax Paid by the Deemed Owner.

Reg. § 1.108-8, "Indebtedness satisfied by partnership interest," discusses cancellation of debt ("COD"):

(a) *In general*. For purposes of determining income of a debtor from discharge of indebtedness (COD income), if a debtor partnership transfers a capital or profits interest in the partnership to a creditor in satisfaction of its recourse or nonrecourse indebtedness (a debt-for-equity exchange), the partnership is treated as having satisfied the indebtedness with an amount of money equal to the fair market value of the partnership interest.

(b) *Determination of fair market value*.

(1) *In general*. All the facts and circumstances are considered in determining the fair market value of a partnership interest transferred by a debtor partnership to a creditor in satisfaction of the debtor partnership's indebtedness (debt-for-equity interest) for purposes of paragraph (a) of this section. If the fair market value of the debt-for-equity interest does not equal the fair market value of the indebtedness exchanged, then general tax law principles shall apply to account for the difference.

(2) *Safe harbor*.

(i) *General rule*. For purposes of paragraph (a) of this section, the fair market value of a debt-for-equity interest is deemed to be equal to the liquidation value of the debt-for-equity interest, as defined in paragraph (b)(2)(iii) of this section, if the following requirements are satisfied -

(A) The creditor, debtor partnership, and its partners treat the fair market value of the indebtedness as being equal to the liquidation value of the debt-for-equity interest for purposes of determining the tax consequences of the debt-for-equity exchange;

(B) If, as part of the same overall transaction, the debtor partnership transfers more than one debt-for-equity interest to one or more creditors, then each creditor, debtor partnership, and its partners treat the fair market value of each debt-for-equity interest transferred by the debtor partnership to such creditors as equal to its liquidation value;

(C) The debt-for-equity exchange is a transaction that has terms that are comparable to terms that would be agreed to by unrelated parties negotiating with adverse interests; and

(D) Subsequent to the debt-for-equity exchange, the debtor partnership does not redeem the debt-for-equity interest, and no person bearing a relationship to the debtor partnership or its partners that is specified in section 267(b) or section 707(b) purchases the debt-for-equity interest, as part of a plan at the time of the debt-for-equity exchange that has as a principal purpose the avoidance of COD income by the debtor partnership.

(ii) *Tiered-partnership rule*. For purposes of this paragraph (b)(2), the liquidation value of a debt-for-equity interest in a partnership (upper-tier partnership) that directly or indirectly owns an interest in one or more partnerships (lower-tier partnership(s)) is determined by taking into account the liquidation value of such lower-tier partnership interests.

(iii) *Definition of liquidation value*. For purposes of this paragraph (b)(2), the liquidation value of a debt-for-equity interest equals the amount of cash that the creditor would receive with respect to the debt-for-equity interest if, immediately after the debt-for-equity exchange, the partnership sold all of its assets (including goodwill, going concern value, and any other intangibles) for cash equal to the fair market value of those assets and then liquidated.

(c) *Example*. The following example illustrates the provisions of this section:

Example.

(i) AB partnership has $1,000 of outstanding indebtedness owed to C. C agrees to transfer to AB partnership the $1,000 indebtedness in a debt-for-equity exchange for a debt-for-equity interest in AB partnership. The liquidation value of C's debt-for-equity interest is $700, which is the amount of cash that C would receive with respect to that interest if, immediately after the debt-for-equity exchange, AB partnership sold all of its assets for cash equal to the fair market value of those assets and then liquidated. Each of the requirements of the liquidation value safe harbor described in paragraph (b)(2) of this section is satisfied.

(ii) Because the requirements in paragraph (b)(2) of this section are satisfied, the fair market value of C's debt-for-equity interest in AB partnership for purposes of determining AB partnership's COD income is the liquidation value of C's debt-for-equity interest, or $700. Accordingly, AB partnership is treated as satisfying the $1,000 indebtedness for $700 under section 108(e)(8).

(d) *Effective/applicability date*. This section applies to debt-for-equity exchanges occurring on or after November 17, 2011.

August, "The Debt Cancellation Culture of Section 108: Tax Hurdles for Partnerships Engaged in Debt Workouts," *Corporate Taxation* (WG&L), Sep/Oct 2023 (also discussed in part II.Q.8.b.i.(a) Code § 731: General Rule for Distributions), explains some of the Code § 108 exclusions:

> There are special provisions contained in the rule of exclusion, Section 108, which identify instances where COD income is produced as a result of a debt reduction or restructuring. Under Section 108(e)(10), where a debtor issues new debt in exchange to retire or replace old debt, COD income results to the extent that the adjusted issue price of the old instrument exceeds the issue proceeds of the new debt obligation. Where a corporation issues stock or a partnership issues a capital or profits interest in retirement of recourse or nonrecourse debt, Section 108(e)(8) provides that the borrower is treated as having satisfied the debt by a cash payment equal to the fair market value of the stock or partnership interest or stock. The entity realizes debt discharge income equal to any excess of the indebtedness satisfied over the amount of this deemed cash payment. Where other property is transferred by the debtor in repayment or in the cancellation of the debt, the transfer is a taxable sale or disposition and the amount realized will include the amount of the unpaid balance of the obligation. COD income will result where the property transferred has a FMV less than the face amount of the debt.[11] Debt-discharge

income also results where a debt is purchased by a person related to the debtor provided the previous holder of the obligation is not related as set forth in Section 108(e)(4).[12] This list of "important" portals into Section 108 should not omit reference to Section 108(e)(2), which excludes from COD income discharge of indebtedness to the extent payment of the liability would give rise to a deduction provided the debtor had not previously claimed a deduction for the cancelled obligation.[13] While this "lost deduction" exception in Section 108(e)(2) may be heavily relied upon in practice, especially with respect to cancelled interest which has not been previously expensed, its limitations have not been adequately identified.

[11] Rev. Rul. 90-16, 1990-1 CB 12 (transfer to mortgagee by insolvent taxpayer where recourse debt results in sale or exchange gain to the extent FMV of property greater than basis, and COD income for excess of liability over FMV of property; recourse debt discharge of insolvent taxpayer excludable under Section 108(a)(1)(B)); *Gehl*, 102 TC 784 (1994) (Reg. 1.1001-2 followed), *aff'd by order*, 50 F3d 12 (8th Cir.), *cert. denied,* 516 US 899 (1995); *Connell*, TC Memo 2018-213, *aff'd w/o opin.* (3d Cir. 2020). Compare *Spartan Petroleum Co.*, 437 F. Supp. 733 (DSC 1977) with *Bialock*, 35 TC 649, 661 (1961).

[12] Regs. 1.108-2(a), 1.108-2(f). The related party definitions are set forth in Sections 267(b) and 707(b) . The regulations exempt an acquisition of a related person's debt instrument from Section 108(e)(4), whether the acquisition is direct or indirect, if the instrument's stated maturity date is no more than one year after the acquisition and the instrument is actually retired no later than the maturity date. Reg. 1.108-2(e)(1) . An acquisition is also exempted if (1) the acquiring person is a securities dealer; (2) the instrument is acquired in the ordinary course of the dealer's business; (3) the instrument is accounted for as a security held for sale to customers in the ordinary course of business; (4) the instrument is held no longer than is consistent with the holding of the instrument for sale in the ordinary course of business; and (5) the instrument is not sold or transferred to a person related to the debtor (other than another dealer who meets all of the foregoing requirements). Reg. 1.108-2(e)(2) . See Rev. Rul. 91-47, 1991-2 CB 16 (corporate debtor realized discharge of indebtedness income when unrelated person formed a new corporation that acquired debtor's outstanding obligations at less than their principal amount and then sold the stock of the newly formed corporation to the debtor). See New York State Bar Ass'n Tax Section Comm. on Bankruptcy, "Acquisitions of Discount Debt by Related Parties Under the New IRC Section 108(e)(4) Regulations," 52 *Tax Notes* 211 (1991).

[13] Presumably Section 108(e)(2) overrides application of the at-risk and passive activity loss rules.

With respect to distressed real property, the compromise or release of nonrecourse mortgage indebtedness will frequently present a trap for the unwary. This is because the amount realized includes the face amount of outstanding nonrecourse debt.[14] Where the subject note's principal is reduced by compromise or negotiation, or through a significant modification of the mortgage terms, COD income may result. Where there is no accompanying foreclosure, voluntary conveyance of a deed in lieu of such foreclosure or abandonment, the mortgagor will recognize debt-discharge income taxable as ordinary income.[15] This rule also applies to the cancellation of recourse debt on a note and mortgage.

[14] Section 7701(g) (amount realized for nonrecourse indebtedness); *Tufts*, 461 US 300 (1983); *Great Plains Gasification Assocs.*, TC Memo 2006-276 (fact-finding made by trial court that partnership liability was nonrecourse and that amount realized on foreclosure therefore included entire amount of liability, regardless of property's value); Rubin, Whiteway, & Finkelstein, "Recourse or Nonrecourse: Liability Treatment for COD, Other Plans," 128 Tax Notes 1133 (9/13/2010).

[15] See, e.g., *Republic Supply Co.*, 66 TC 446 (1976).

Where mortgaged property is foreclosed, the amount of COD income depends on the type of the debt. With respect to recourse debt, where the FMV of the property exceeds basis, but less than the amount of the balance of the recourse obligation, the foreclosure results in bifurcated gain.[16] Sale or exchange treatment occurs to the extent of the FMV of the property and the taxpayer-debtor's adjusted basis, and COD income arises to the extent the called debt exceeds the FMV of the property.[17] For nonrecourse debt the entire debt cancelled must be included in the amount realized in determining gain or loss.[18]

[16] See Regs. 1.1001-2(a), -2(b) (nonrecourse debt); *Helvering v. Hamel*, 311 US 504 (1941); Rev. Rul. 90-16, 1990-1 CB 265 ; Rev. Rul. 78-164, 1978-1 CB 264 . Where the foreclosure of encumbered real property is described within Section 1038, in general no gain or loss will result to the seller on such reacquisition for the difference between the FMV of the property and the balance of the seller's debt. Section 1038 is mandatory. Section 1038 applies only where a sale of real property is secured by a note and mortgage and the seller later reacquires such real property in partial or full satisfaction of the debt. See discussion of Section 1038 in Witt and Lyons, "An Examination of the Tax Consequences of Discharge of Indebtedness," 10 Va. Tax Rev. 1 (1990); *Held*, 36 AFTR2d 75-5731 (DC Ala. 1975); *Lohman*, TC Memo 1989-141.

[17] See, e.g., *Gehl*, 102 T.C. 784 (1994), *aff'd* 50 F.3d 12 (8th Cir. 1995), *cert. den.* 516 U.S. 899 (1995).

[18] Reg. 1.1001-2; *Yarboro*, 737 F.2d 479 (1984).

With respect to the abandonment of the encumbered property by the debtor of property, a realization event does not, in general, occur until a subsequent foreclosure eliminates the debtor-taxpayer's interest in the property. Where the debtor's abandonment of the property ripens into a realization event, the taxpayer may be allowed to report a loss, and because an abandonment is not a sale or exchange of property for purposes of Sections 1222 or 1231(a), i.e., the loss is not a capital loss.[19] The abandonment loss of a partner's interest in a partnership will be realized in the year the partner evidences an intent to abandon the interest and the consummation of an overt act consistent with such intent.[20] However, with respect to the abandonment of a partnership interest which, indirectly, has a share of the liabilities of the partnership, sale or exchange treatment results. A partner who abandons a partnership interest with partnership level debt will be deemed to have a deemed distribution in cash to the extent of the liabilities the partner is deemed to be relieved.[21] However, the Eleventh Circuit, in *Weiss*, 956 F2d 242 (11th Cir. 1992), held that a partner forfeiting his partnership interest does not realize his share of partnership liabilities where he remains personally liable on the partnership debt. The Tax Court and the Fifth Circuit have held that a partner may claim an ordinary loss on the worthlessness of a partnership interest without requiring recognition of a deemed distribution under Section 752(b).[22] Still, where an act of abandonment or claim loss from the worthlessness of a partnership interest may avoid a deemed distribution by application of Section 752(b) in the year the loss is claimed and deducted, the partner is still exposed to deemed gain when the debt is ultimately cancelled.[23]

[19] See, e.g., *Green*, 126 F.2d 70 (3d Cir. 1942) (subsequent foreclosure sale after abandonment of real property encumbered by a mortgage created loss event). As to the debtor's remedy of "rescission" to unwind a prior sale, the IRS has ruled that such negate the original sale. Ltr. Rul. 7802033 ; Rev. Rul. 80-58, 1980-1 CB 181 . But see *Branum v. Campbell*, 211 F2d 147 (5th Cir. 1954).

See August, "Assessments and Collection of Income Tax from Partnerships, Partners, and Former Partners under the BBA Partnership Audit Rules, Part Two: Take a Close Look at the Cease to Exist Rule!!, Corporate Taxation (WG&L) (Jul/Aug 2022).

Where seller financing is provided in the purchase of an asset and the parties subsequently agree to a reduction in the purchase price and therefore the amount owed by the purchaser, and further provided the reduction does not occur in bankruptcy or where the purchaser is insolvent, the reduction in the purchase price is not debt discharge income. This rule is set forth in Section 108(e)(5). The Service and the Tenth Circuit[24] view Section 108(e)(5) as the exclusive purchase price adjustment exception to Section 61(a)(11) . In other words, the judicial created exceptions for accord and satisfaction of debt evidenced in case law, e.g., *Hirsch*[25] and Sherman,[26] are essentially overruled where Section 108(e)(5) applies, i.e., where the purchase price reduction is between the purchaser and seller.[27]

[27] *Preslar*, supra, note 13.

That article later discusses "Application of Cancellation of Indebtedness Rules to Partnerships":

> Where a partnership realizes cancellation of indebtedness income, such amount is allocated among the partners in accordance with the sharing of profits in the partnership agreement as a separate item of income.[54] Any mandatory or special allocations under Section 704(b) for minimum gain and qualified income offset are taken into account. Section 108(d)(6) instructs that each partner determines whether his share of debt-discharge income qualifies under an exception for insolvency or bankruptcy under Section 108 even though the partnership is a title 11 debtor, and the partners are not.[55] The bankruptcy exclusion therefore is only available where the partner is insolvent or is under the jurisdiction of the court in a title 11 case.[56]

>
> [58] See prior discussion, supra.
>
> Each partner allocated COD income increases his basis in his partnership interest and then decreases basis for such person's reduction in partnership liabilities under Section 752(b).[59] Where recourse debt is cancelled, the corresponding deemed distribution resulting under Section 752(b) is charged to the partner or partners allocated the liability under the economic risk of loss regulations ("EROL").[60] As noted, the bankruptcy or insolvency of the partnership does not allow a partner which is both solvent and outside a title 11 bankruptcy proceeding to exclude its pro rata share of the partnership's discharge of indebtedness income. [highlighting is mine]
>
> [59] Sections 705(a)(1)(A) , 705(a)(2), 752(b), 733(1), 731(a)(1). See Reg. 1.731-1(a)(1)(ii) . See Rev. Rul. 94-4 (deemed distribution of money from Section 752(b)/ Section 733(1) may qualify for advance or draw treatment). But the same does not apply to shareholders in S corporations allocated COD income of the S corporation. See Section 108(d)(7) , which "turns off" Section 1367 for the pass-through of COD income which, in 2002, reversed the holding of the Supreme Court's favorable decision on this issue in *Gitlitz*, 531 US 206 (2001).
>
> [60] Reg. 1.752-2; *Babin*, 23 F3d 1032 (6th Cir. 1994), aff'g TC Memo 1992-673 . See Pollack, "Does Section 108(a) Allow `Windfall' Basis Adjustments?," Tax Notes, p. 487 (7/24/1995); Lipton, "Insolvent Partner Taxed on Partnership's COD Income Despite Code Provision," 81 J Tax'n 248 (1994).

The discontinuity between the allocation of COD income based on profits ratios and the deemed distribution arising under Section 752(b) under the EROL platform seems awkward. Does the allocation of COD income have substantial economic effect?[61] This issue was the subject of Rev. Rul. 92-97, 1992-2 CB 124 . The Service held that where COD income allocations vary from the deemed distribution impacts, the allocation has substantial economic effect where: (1) the deficit restoration obligations covering any negative capital account balances resulting from the COD income allocations can be invoked to satisfy other partners' positive capital account balances, (2) the requirements of the economic effect test are otherwise met, and (3) substantiality is independently established. Where the deficit restoration obligation is not unconditional, a pro rata allocation of COD income cannot have economic effect, but the partnership may use a qualified income offset under the alternate economic effect test.[62]

[61] Regs. 1.704-1(b)(2)(ii) , 1.704-2(b)(2)(iv) . Under the "safe harbor" rule of substantial economic effect, partners must agree to maintain capital accounts in accordance with -1(b)(2)(iv) of the regulations and liquidate in accordance with positive capital account balances. Any partner with a deficit capital account must accept the obligation to restore the deficit per Reg. 1.704-1(b)(2)(ii)(b)(3) (Situation 2) or meet the requirements for the alternate economic effect test in Reg. 1.704-1(b)(2)(ii)(d).

[62] See FSA 200131013 (partnership debt discharge income should be allocated in manner consistent with allocation of all items of income, gain, loss, deduction, and credit); Rev. Rul. 92-92, 1992-2 CB 103 (for passive activity loss purposes it is appropriate to allocate COD income in the same manner at date of discharge to the allocation required under Temp. Reg. 1.163-8T).

Consider a special allocation of COD income to the partners allocated recourse debt to make the income allocation consistent with the deemed distribution under Section 733(1). A special allocation of COD income could be made, for example, to an insolvent partner with an offsetting special allocation of book loss, i.e., a "shifting allocation." In Rev. Rul. 99-43, 1999-2 CB 506 the Service held that a partnership's special allocation of debt-discharge income to an insolvent partner and a corresponding special allocation of Section 704(b) book loss were "shifting allocations" that lacked substantiality. Under the facts set forth in the ruling, book loss was produced by a revaluation of partnership assets and the special allocation of COD income reduced each partner's capital accounts to zero. The Service concluded reliance could not be made for these offsetting allocations on the "value equals basis" rule to satisfy the "substantiality" test.[63] The amendments were made after the events generating the special allocations had occurred.[64]

[63] *Ibid*. See Rev. Rul. 92-97, supra; FSA 200131013. Reg. 1.704-1(b)(5), Ex. 6 . See *Gershkowitz*, 88 T.C. 984 (1987) (amendment to partnership agreement made immediately before liquidation and specially allocating gain to partners with negative capital accounts, so-called "fill up" allocations, did not have substantial economic effect). Allocations without substantial economic effect are allocated in accordance with the partners' interests in the partnership.

[64] However, the Service stated in Rev. Rul. 99-43 , supra, that "[c]lose scrutiny would be required if the changes were made at a time when the events had not yet occurred but were likely to occur or if, under the original allocation provisions of a partnership agreement, there was a strong likelihood that a disproportionate amount of COD

income earned in the future would be allocated to any partner who is insolvent at the time of the allocation and would be offset by an increased allocation of loss or a reduced allocation of income to such partner or partners."

Minimum gain is the amount of gain that a partnership would realize upon a taxable disposition of property encumbered by a nonrecourse debt in satisfaction of the debt.[65] Accordingly, minimum gain represents each partner's share of nonrecourse deductions allocated to such partner (plus certain distributions of proceeds sourced from nonrecourse debt), less such partner's aggregate share of the net decreases in partnership minimum gain at that time.[66]

[65] Reg. 1.704-2(f)(1). See T.D. 9557, 76 Fed. Reg. 71,255 (11/17/2011).

[66] Reg. 1.704-2(g)(1).

Under the regulations, a minimum-gain chargeback requirement is based solely on the existence of a net decrease in partnership minimum gain for a partnership taxable year. Where this occurs, each partner must be allocated items of partnership income and gain for that year equal to that partner's share of the net decrease in partnership minimum gain. Chargeback is not required with respect to a partner if the net decrease is caused by a guarantee, refinancing, or other change in the debt causing it to become partially or wholly recourse or nonrecourse debt, and the partner bears the economic risk of loss under Reg. 1.752-2 for the newly guaranteed, refinanced, or otherwise changed liability.[67]

[67] See Regs. 1.704-2(f) , 1.704-2(d)(4) (capital account revaluations and minimum gain).

Treatment of nonrecourse debt of a partnership in testing for a partner's "insolvency" under Section 108(d)(3) was the subject of several rulings. Section 108(d)(3) defines "insolvent" as the excess of liabilities over the fair market value of assets. Whether a taxpayer is insolvent, and the amount by which the taxpayer is insolvent, is determined based on the taxpayer's assets and liabilities immediately before the discharge. Section 108(d)(6) provides that in the case of cancelled partnership debt, as defined in Section 108(d)(1) , the insolvency exception of Section 108(a)(1)(B) applies at the partner level. In Rev. Rul. 92-53, 1992-2 C.B. 48, the Service held that the amount that a nonrecourse debt exceeds the fair market value of the property securing the debt, i.e., excess nonrecourse debt, is treated as a liability in determining insolvency for purposes of Section 108(d)(3) to the extent that the excess nonrecourse debt is discharged. In Rev. Rul. 2012-14, 2012-24 IRB 1012 , the Service amplified Rev. Rul. 92-53 in providing that each partner is allocated excess nonrecourse debt, and that discharged excess nonrecourse debt which results in COD income must be allocated to each partner to the extent of his portion of such excess nonrecourse debt.[68]

[68] See Rev. Rul. 99-43, 1999-2 C.B. 506, and Rev. Rul. 92-97, 1992-2 C.B. 124 , regarding the application of Section 704(b) to allocations of COD income.

In the partnership area, it is quite important to identify the parties directly involved in the borrowing that is being cancelled or modified. Is the partnership the true "borrower"? Is the debt of the partnership "recourse" or "non-recourse" for purposes of Section 752 and the economic risk of loss standard contained in the regulations ("EROL")? Does an exception to the EROL rules apply?[69] In *Slavin*, TC Memo 1989-221, the issue before the Tax Court was whether the taxpayer's disposition of his 50% interest in three real estate partnerships in exchange for the assumption by the other 50% partner of the taxpayer's and his wife's liabilities on certain bank debts constituted a sale or exchange of his partnership interest, as argued by the Service, or instead, was a forgiveness of debt by the lender as the taxpayer reported. The taxpayer received no other consideration in the transaction. The transfers were made in 1978. The taxpayer claimed he was insolvent before and after the alleged forgiveness and therefore had no COD income. The government argued that neither the partnerships nor the lender regarded the petitioner as the true borrower.[70] Instead, the Service issued a notice of deficiency claiming that the petitioner sold his partnership interests under Sections 741(a), 751, and 752 and must recognize ordinary income of approximately $312,000 and long-term capital gain of $533,000 from the dispositions.[71]

II.G.32. Postponed Deadlines Due to Disaster or Military Service

Rev. Proc. 2018-58, Section 2, "Background," provides:

.01. Section 7508(a)(1) of the Code permits a postponement of certain time-sensitive acts for individuals serving in the Armed Forces of the United States, or serving in support of such Armed Forces, in an area designated by the President as a combat zone under section 112(c)(2), or serving with respect to a contingency operation (as defined in 10 U.S.C. § 101(a)(13)). Among these acts are the filing of certain returns, the payment of certain taxes, the filing of a United States Tax Court petition for redetermination of a deficiency, and the filing of a refund claim. In the event of service in a combat zone or service with respect to a contingency operation, the acts specified in section 7508(a)(1) are automatically postponed. This revenue procedure sets forth a list of such other acts that are also automatically postponed as contemplated by section 7508(a)(1)(K). In addition, the IRS may include acts not listed in this revenue procedure in any other published guidance (including an IRS News Release) related to the combat zone or contingency operation.

.02. Section 7508A provides that certain acts performed by taxpayers and the government may be postponed if the taxpayer is affected by a federally declared disaster or a terroristic or military action. Prior to 2008, section 7508A(a) referred to a "Presidentially declared disaster," defined in section 1033(h)(3). The Tax Extenders and Alternative Minimum Tax Relief Act of 2008 (2008 Act), P.L. 110-343, Division C, § 706(a)(2)(D)(vii), amended section 7508A(a) to refer to a "federally declared disaster," defined in section 165(h)(3)(C)(i). Section 706(a)(1) of the 2008 Act amended section 165(h) to provide the definition of a "federally declared disaster." Effective December 19, 2014, the Tax Technical Corrections Act of 2014 (2014 Act), P.L. 113-295, § 221(a)(27), removed the definition of "federally declared disaster" from section 165(h)(3) and placed it in section

> 165(i)(5). However, the 2014 Act did not amend section 7508A(a) with the new cross-reference for the definition of a "federally declared disaster." Effective March 23, 2018, the Consolidated Appropriations Act, 2018, P.L. 115-141, § 401(b)(10) amended section 7508A(a) to reflect the cross-reference for the definition of a "federally declared disaster" in section 165(i)(5)(A) . However, the regulations under section 7508A have yet to be revised to change the reference to the definition of a federally declared disaster. A "terroristic or military action" is defined in section 692(c)(2). Section 301.7508A-1(d)(1) defines seven types of affected taxpayers, including any individual whose principal residence (for purposes of section 1033(h)(4)) is located in a "covered disaster area" and any business entity or sole proprietor whose principal place of business is located in a "covered disaster area." Postponements under section 7508A are not available simply because a disaster or a terroristic or military action has occurred. Generally, the IRS will publish a notice or issue other guidance (including an IRS News Release) authorizing the postponement. See section 4.01 of this revenue procedure.

Section 9.3, "Sec. 663(b) and Sec. 1.663(b)-2," refers to the time for filing the Code § 663(b) election described in part II.J.4.a Distributions after Yearend to Carry Out Income to Beneficiaries but does not seem to me to extend the 65-day deadline:

> The fiduciary of a trust or estate may elect to treat any amount properly paid or credited to a beneficiary within the first 65 days following the close of the taxable year as an amount that was properly paid or credited on the last day of such taxable year. If a return is required to be filed for the taxable year for which the election is made, the election shall be made on such return no later than the time for making such return (including extensions). If no return is required to be filed, the election shall be made in a separate statement filed with the internal revenue office with which a return would have been filed, no later than the time for making a return (including extensions).

I am unaware of any authority confirming or contradicting my reading of Rev. Proc. 2018-58, § 9.3.

Although Rev. Proc. 2018-58 lists many types of relief, the IRS is authorized to do more. See Reg. § 301.7508A-1 for additional relief one might ask the IRS to publicly declare; T.D. 9950 (6/11/2021) amended that regulation "relating to the new mandatory 60-day postponement of certain time-sensitive tax-related deadlines by reason of a federally declared disaster," and the changes "affect individuals who reside in or were killed or injured in a disaster area, businesses that have a principal place of business in a disaster area, relief workers who provide assistance in a disaster area, or any taxpayer whose tax records necessary to meet a tax deadline are located in a disaster area."

Notice 2020-23 and Notice 2021-21 extend this relief (and more) to the 2020 coronavirus pandemic, and Notice 2023-21 provides:

> *Relief for Determining the Lookback Period for Claims for Credit or Refund*. For an Affected Taxpayer with a due date postponed by Notice 2020-23, the period beginning on April 15, 2020, and ending on July 15, 2020, will be disregarded in determining the beginning of the lookback period for the purpose of determining the amount of a credit or refund under § 6511(b)(2)(A) relating to the tax for which the return filing or payment due date was postponed. In addition, for an Affected Taxpayer with a due date postponed by Notice 2021-21, the period beginning on April 15, 2021, and ending on May 17, 2021,

will be disregarded in determining the beginning of the lookback period for the purpose of determining the amount of a credit or refund under § 6511(b)(2)(A) relating to the tax for which the return filing or payment due date was postponed.

II.G.33. Taxpayer Disavowing Form

Complex Media, Inc. v. Commissioner, T.C. Memo. 2021-14, explained (highlighting added):

> At one time, this Court and its predecessor were less willing than appellate courts to allow a taxpayer, having chosen the form of a transaction, to disavow that form and argue that the tax consequences of the transaction should be determined on some other basis. For example, in *Swiss Oil Corp. v. Commissioner*, 32 B.T.A. 777, 785 (1935), *rev'd sub nom. Commissioner v. Ashland Oil & Refining Co.*, 99 F.2d 588 (6th Cir. 1938), the Board of Tax Appeals wrote: "Although courts have a tendency at times to 'look through form to substance', they nevertheless have laid down the rule that tax liability must be determined by considering what the taxpayer did, not what it intended to do, or what it might have done." And in J.*M. Turner & Co. v. Commissioner*, 26 T.C. 795 (1956), *rev'd*, 247 F.2d 370 (4th Cir. 1957), this Court, while acknowledging that the taxpayer could have achieved the tax benefit sought had it structured the transaction in issue differently, nonetheless held the taxpayer to the form of its transaction. "[I]n deciding the present controversy," we wrote, "it is necessary for us to deal with the facts and transactions as they actually existed." *Id*. at 804. In *Television Indus., Inc. v. Commissioner*, 32 T.C. 1297, 1302 (1959), *aff'd*, 284 F.2d 322 (2d Cir. 1960), we again recognized that the taxpayer could have avoided tax liability had the transaction in issue been cast in a different form. But the transaction "was not done in that [tax-favorable] way," we concluded, "and the form that the transaction took must prevail." Id. We felt ourselves bound to render our decision "upon the basis of what was actually done rather than upon what might have been done." *Id.*
>
> By contrast, in our own Opinion in *Danielson v. Commissioner*, 44 T.C. at 555, we wrote: "We are unwilling to abdicate our judicial responsibility of examining the substance of a transaction. We are not bound by its form." And in *Schmitz v. Commissioner*, 51 T.C. 306 (1968), aff'd sub nom. *Throndson v. Commissioner*, 457 F.2d 1022 (9th Cir. 1972), in addition to declining to adopt the Third Circuit's *Danielson* rule, we suggested that the substance-over-form doctrine is equally available to taxpayers and the Commissioner. We acknowledged that, in many of the cases in which the doctrine had been applied, "the Commissioner was attacking the form of the transaction". *Id*. at 317. But we also saw "no reason why we should make a distinction on this point." *Id*.; see also *Shaw v. Commissioner*, 59 T.C. 375, 383-384 (1972) ("Th[e] preference for substance over form in tax matters extends to claims of petitioner and respondent alike.").
>
> In *Estate of Rogers v. Commissioner*, T.C. Memo. 1970-192, 1970 Tax Ct. Memo LEXIS 166, *aff'd*, 445 F.2d 1020 (2d Cir. 1971), we again had occasion (as in *Danielson*) to apply Ullman's "strong proof" rule. We accepted that "a taxpayer may go beyond what appears on the face of an agreement, just as the Commissioner may do so." *Id.*, 1970 Tax Ct. Memo LEXIS 166, at *13. But, we observed, "the so-called 'two-way street' seems to run downhill for the Commissioner and uphill for the taxpayer." *Id*. at *14. "The Commissioner must be permitted to go beyond mere form to substance in order to protect the revenue", we explained, "but taxpayers have the opportunity at the outset to choose the most advantageous arrangement." *Id*.

In *Glacier State Elec. Supply Co. v. Commissioner*, 80 T.C. 1047 (1983), we suggested that the higher burden faced by a taxpayer seeking to disavow the form of its transaction might be an evidentiary one. We agreed with the taxpayer, who sought to recharacterize the transaction in issue, that "it is the substance of a transaction rather than mere form which should determine the resultant tax consequences when the form does not coincide with economic reality." *Id*. at 1053. We also accepted that "[t]he taxpayer, as well as the Commissioner, is entitled to assert the substance-over-form argument" but added that, "in such situations the taxpayer may face a higher than usual burden of proof." *Id*.

In *Glacier State Elec. Supply*, however, we did not clearly articulate just what the taxpayer should have to prove by more than a preponderance of the evidence. We ultimately rejected the taxpayer's substance-over-form argument on the grounds that "the substance of the transaction coincides with the form employed." *Id*. at 1058. We did not identify any factual questions whose resolution would have compelled a different result if the taxpayer had met a heightened standard of proof.

In *Coleman v. Commissioner*, 87 T.C. 178, we suggested that a taxpayer faces a particularly high threshold in seeking to disavow the form of a transaction chosen to allow another party tax benefits (even under foreign tax law) that are inconsistent with the treatment the taxpayer seeks before us. Coleman involved an equipment lease originally structured between counterparties in the United Kingdom with the intent that the lessor be respected as the equipment's owner and thus entitled to generous first-year depreciation allowed under U.K. tax law. The taxpayer before us was a U.S. partner in a partnership that had acquired the lessee's interest in the lease. The taxpayer argued that, under U.S. tax principles, the partnership should be treated as the owner of the equipment and thus entitled to allocate among its partners depreciation deductions in respect of the equipment. We repeated the observation we had made in *Bolger v. Commissioner*, 59 T.C. 760, 767 n.4 (1973), that "the taxpayer may have less freedom than the Commissioner to ignore the transactional form … adopted." *Coleman v. Commissioner*, 87 T.C. at 202. We then opined that "this is particularly true where … the form of the transaction was adopted … in order to achieve a bona fide, permissible tax purpose." *Id*. And the relevant analysis apparently does not turn on whether the tax purpose motivating the choice of transaction structure involves U.S. or foreign taxes. As we explained:

> The fact that the purpose underlying the form of the transactions between *** [the original lessee and lessor] was to take advantage of U.K. rather than U.S. tax laws does not, in our opinion, provide a sufficient foundation for permitting petitioners to disavow that form in order to obtain the benefits of U.S. tax laws. Similarly, we consider it irrelevant that … [the original counterparties] were apparently not subject to U.S. tax laws. Rather, we think our decision herein should be based upon the situation which would have existed had both … [of the original counterparties] been subject to U.S. tax laws … and sought to claim depreciation in respect of the Equipment.

Id. at 202-203.

In *Estate of Durkin v. Commissioner*, 99 T.C. 561 (1992), we identified other factors that tend to weigh against a taxpayer who seeks to disavow a transaction's form. The taxpayers in *Estate of Durkin* took a position contrary to their own tax reporting of the transactions in issue after the Commissioner had challenged their reporting. The taxpayers' "disavow[al] [of] their own tax return treatment", their failure to "show 'an honest and consistent respect for the substance of … [the] transaction", and their "unilateral[] attempt[]" to recast the transaction only "after it has been challenged" all weighed against our acceptance of their proposed step transaction recast. *Id*. at 574-575 (quoting *Estate of Weinert v. Commissioner*, 294 F.2d 750, 755 (5th Cir. 1961), rev'g and remanding 31 T.C. 918 (1959)). We also invoked in *Estate of Durkin* two of the three policy considerations underlying the Danielson rule:[17] "A party disavowing the form of a transaction may be unjustly enriched, particularly where the party was acting on tax advice, because the price may be influenced by tax considerations. If a party disavows the form of a transaction, the Commissioner may be whipsawed between one party claiming taxation based on the form, and the opposite party claiming taxation based on the substance." *Id*. at 575 (citation omitted).

[17] Although *Estate of Durkin v. Commissioner*, 99 T.C. 561 (1992), was appealable to the Court of Appeals for the Third Circuit, we found it unnecessary in that case to choose between that court's *Danielson* rule and the "strong proof" rule we had ourselves posited in *Glacier State Elec. Supply Co. v. Commissioner*, 80 T.C. 1047 (1983). Under either standard, we reasoned in *Estate of Durkin v. Commissioner*, 99 T.C. at 574, the taxpayers before us would not have been allowed to disavow the form of the transaction in issue.

Dyess v. Commissioner, T.C. Memo. 1993-219, 1993 WL 170147, at *10, *aff'd without published opinion*, 26 F.3d 1119 (5th Cir. 1994), similarly involved the rejection of a step transaction argument made by a taxpayer who, we concluded, had "met neither the strong proof test nor the *Danielson* test". Our conclusion rested in part on the taxpayer's failure to explain why the transaction structure employed was chosen over a considered-and-rejected alternative that would have achieved the tax results the taxpayer sought. *Dyess* involved a sale of real property between two partnerships. At issue was whether section 707(b)(2)(B) applied to recharacterize the seller's gain as ordinary income. As then in effect, the recharacterization rule would have applied if the same persons owned more than 80% of the capital and profits of both partnerships. When the sale occurred, the taxpayer and another individual (Nace) owned all of the interests in the selling partnership (Equity) and 92.5% of the interests in the buyer (Foxfire). Nonetheless, the taxpayer argued that section 707(b)(2)(B) did not apply because the sale occurred in anticipation of Foxfire's issuance of limited partner interests to new investors that reduced his and Nace's ownership of Foxfire below 80%. The whole purpose of forming a new limited partnership to acquire the property, according to the taxpayer, was to raise money from new investors in an effort to rehabilitate a failing development.

An earlier draft of Foxfire's limited partnership agreement had contemplated the issuance of 75% of the interests in the partnership to limited partners before Foxfire's acquisition of the property in question from Equity. We found no "satisfactory explanation" in the record "as to why that draft version was not used." *Dyess v. Commissioner*, 1993 WL 170147, at *10. The taxpayer, we concluded, "cannot now disavow the route he in fact followed for a different route he might have but did not take." *Id*. The taxpayer had "met neither the strong proof test nor the Danielson test".[18] *Id*. Therefore, the taxpayer could not "successfully invoke the substance over form doctrine to disavow the manner in which the Foxfire partnership was structured and the limited partnership interests sold." *Id*.

> [18] We accepted in *Dyess v. Commissioner*, T.C. Memo. 1993-219, 1993 WL 170147, at *8, *aff'd without published opinion*, 26 F.3d 1119 (5th Cir. 1994), the possibility that the Danielson rule might apply in that case because the Court of Appeals for the Fifth Circuit, to which the case was appealable, had chosen the Danielson rule over the strong proof rule in "certain situations".

> In sum, as our caselaw has evolved, it has become more hospitable to taxpayers seeking to disavow the form of their transactions. While we no longer reject those arguments out of hand, as we did in *Swiss Oil Corp., J.M. Turner & Co.*, and *Television Indus.*, we have repeatedly indicated that taxpayers may face a higher burden than the Commissioner does in challenging transactional form. On occasion, as in *Glacier State Elec. Supply*, we have suggested that the taxpayer's higher burden might be an evidentiary one. But we have not identified specific factual questions that should be subject to a higher burden than that imposed by Rule 142(a) or articulated the quantum of evidence necessary to meet that burden. Nor have we offered a clear justification for imposing on the taxpayer a higher burden to prove facts relevant to the disavowal of form than the generally applicable preponderance of the evidence standard.

> Therefore, we now conclude that the additional burden the taxpayer has to meet in disavowing transactional form relates not to the quantum of evidence but instead to its content—not how much evidence but what that evidence must show by the usual preponderance. The Commissioner can succeed in disregarding the form of a transaction by showing that the form in which the taxpayer cast the transaction does not reflect its economic substance. For the taxpayer to disavow the form it chose (or at least acquiesced to), it must make that showing and more. In particular, the taxpayer must establish that the form of the transaction was not chosen for the purpose of obtaining tax benefits (to either the taxpayer itself, as in *Estate of Durkin*, or to a counterparty, as in *Coleman*) that are inconsistent with those the taxpayer seeks through disregarding that form. When the form that the taxpayer seeks to disavow was chosen for reasons other than providing tax benefits inconsistent with those the taxpayer seeks, the policy concerns articulated in *Danielson* will not be present.

AOD 2023-2, 2023-11 I.R.B. 529, nonacquiesced in the decision:

> Issue 1:

> Nonacquiescence to the court's conclusion that the parties' failure to report the transactions fully or consistently should not be a major factor in a decision whether to allow a taxpayer to disavow the form of its transactions and also to the standard the court applied to allow petitioner to disavow its form in this case.

As to Issue 1, AOD 2023-2, 2023-11 I.R.B. 529, explained the IRS' view:[1972]

> a. *The Transactions*

> Taxpayer was incorporated by a partnership ("Partnership") to engage in a series of transactions in November 2009. The transactions were memorialized in the Agreements

[1972] For Issue 2 from the AOD, see text accompanying fn 3557 in part II.M.2.e Contributing Existing Business to a Corporation.

and were implemented consistently with the terms thereof. Based on the Agreements and as implemented, the transactions consisted of the following steps:

i. Partnership transferred the tangible and intangible assets of its publishing business ("Transferred Assets") to Taxpayer in exchange for Taxpayer common stock ("Exchange").

ii. A newly formed subsidiary of Taxpayer was merged ("Merger") into an unrelated corporation ("Target") the principal asset of which was cash. Target survived the Merger as a wholly owned subsidiary of Taxpayer; holders of Target preferred stock received Taxpayer convertible preferred stock in exchange for their Target stock; and the common stock of Target was cancelled for no consideration.

iii. Taxpayer redeemed from Partnership some of the common stock Taxpayer had issued in the Exchange ("Redemption"). The price Taxpayer paid for the redeemed stock ("Redemption Proceeds") was $2.7 million cash and a right to a $300,000 deferred payment ("Deferred Payment Right").

iv. Partnership distributed the Redemption Proceeds to one of its partners ("Liquidated Partner") in complete liquidation of his interest in Partnership.

v. Taxpayer made the deferred payment when due, 13 months after the redemption.

b. *Federal Income Tax Treatment of the Exchange, the Merger, and the Redemption*

The Service, the parties, and the court all agreed that the Exchange and the Merger should be treated, not as separate transactions, but as a single transaction in which Partnership transferred the Transferred Assets, and the holders transferred the Target preferred stock, to Taxpayer in exchange for all the stock of Taxpayer. This transaction was subject to section 351 (" Section 351 Transaction"). Thus, the transferors (Partnership and the former Target shareholders) would recognize gain only to the extent of any money or property, other than Taxpayer stock, that they received (referred to as "boot"). Under section 362(a), the basis of the transferee (Taxpayer) in the Transferred Assets was the same as Partnership's basis, increased by the amount of any gain the transferors recognized.1

The Service and the parties disagreed, however, as to the proper treatment of the Redemption. The Service's position was that, in accordance with the form of the transactions, the Redemption was a transaction separate from the Section 351 Exchange, and therefore Taxpayer's basis in the Transferred Assets was the same as Partnership's basis with no increase. Taxpayer's position was that Partnership received the Redemption Proceeds as boot in the Section 351 Transaction, so that Taxpayer was entitled to increase its basis in the Transferred Assets by the amount of the Redemption Proceeds. The court agreed with Taxpayer.

c. *Reporting of the Transactions on 2009 Federal Income Tax Returns*

i. Taxpayer

With its 2009 Form 1120, Taxpayer filed the Information Reporting Statement required by Treas. Reg. § 1.351-3 ("Taxpayer Statement"), with respect to the Section 351 Transaction. On the Taxpayer Statement, Taxpayer reported its receipt of the Transferred Assets in exchange for only Taxpayer stock, with no boot. Consistent with its reporting of the Section 351 Transaction, on its 2009 return Taxpayer reported deductions for amortization of the Transferred Assets based on carryover basis with no increase. Taxpayer did not submit any information relating to the Redemption.

ii. Partnership

With its 2009 Form 1065, Partnership filed a Statement ("Partnership Statement") reporting the Exchange. Like the Taxpayer Statement, the Partnership Statement reported its transfer of the Transferred Assets to Taxpayer as in exchange for only Taxpayer stock. Partnership did not submit any information relating to its receipt of the Redemption Proceeds. That is, Partnership did not report gain on a receipt of boot in the Section 351 Transaction, as would be required under section 351(b). Nor did it report gain or loss on the Redemption or file a statement required by § 1.302-2(b)(2) with respect to the Redemption.

iii. Liquidated Partner

On his 2009 Form 1040, Liquidated Partner reported long-term capital gain from the receipt of $2.7 million cash in liquidation of his interest in Partnership. On his 2011 Form 1040, Liquidated Partner reported the payment pursuant to the Deferred Payment Right as $300,000 of "other income" received from Taxpayer.

d. *Taxpayer's Recast and Reporting on 2010-2013 Forms 1120*

On its Forms 1120 for 2010 through 2013, Taxpayer claimed amortization deductions based on an increased basis of the Transferred Assets. In so doing, Taxpayer took a position inconsistent with its 2009 return (including the Taxpayer Statement), the Partnership Statement, and the form of the transactions as provided in the Agreements and as implemented. Neither Taxpayer nor Partnership filed an amended 2009 return or disclosed the change in position on any return or in any other manner, except Taxpayer's claimed increase in amortization deductions.

Taxpayer's post-hoc justification for the increased amortization deductions was that Partnership's transfer of the Transferred Assets to Taxpayer was in exchange for both Taxpayer stock and boot, i.e., the Redemption Proceeds, as reported by the Liquidated Partner but never by Taxpayer or Partnership. According to Taxpayer, this recast increased its basis in the Transferred Assets by $3 million (Taxpayer's understanding of the value of the purported boot) and thus increased its amortization deductions.

e. *Issue*

The main issue before the court was whether Taxpayer could disavow the transactional form it chose and reported and treat the transactions as resulting in increased basis for the Transferred Assets. The court held that Taxpayer could do so.

f. *Service Concerns*

The Service is concerned about two related aspects of the court's holding and opinion: (1) the conclusion that the parties' failure to report the transactions fully and consistently was not a major factor in determining whether Taxpayer could disavow the form of its transactions, and (2) the overall legal standard the court applied to allow this disavowal of transactional form.

i. Parties' Failure to Report the Transactions Fully and Consistently

The Service's first concern relates to the court's conclusion that the parties' failure to report the transactions fully and consistently was not a major factor in the case.

The court found that Taxpayer did not report the transactions in a manner that was inconsistent with its claimed increase in asset basis. The court concluded that the only meaningful difference between the actual form (separate Section 351 Transaction and Redemption) and Taxpayer's recast form (Section 351 Transaction with Redemption Proceeds as boot) is the increase in the basis of the Transferred Assets. The court also found that there was no whipsaw potential to the government and no conflicting interests among the parties to the transactions.

The Service continues to believe that Taxpayer's failure to report the Redemption Proceeds at all (except as a later distribution by Partnership) should have barred the recast, or at least should have been a major factor in deciding whether a recast should be allowed. Reporting requirements exist to provide the Service with the opportunity to analyze the form and substance of transactions, and the Service necessarily relies on the reported information. Consequently, compliance with reporting requirements is an essential part of tax administration.

Here, Taxpayer and Partnership were related parties, and neither of them reported the payment and receipt of the Redemption Proceeds - neither its actual form (a separate Redemption) nor Taxpayer's recast form (boot in the Section 351 Transaction) on any return. This failure to report the Redemption put the Service in the difficult position of having to discover discrepancies by comparing amortization deductions claimed on Taxpayer's 2009 return with the larger deductions claimed on its later returns. Treas. Reg. § 1.351-3 requires the parties to a section 351 transaction to attach statements describing the transaction, including identification of any property with respect to which gain was recognized. The Taxpayer Statement and the Partnership Statement both described Taxpayer's receipt of the Transferred Assets as being in exchange only for Taxpayer stock. Neither statement identified any gain recognition property. However, Taxpayer claimed amortization deductions based on an increased basis in the Transferred Assets. This claim was inconsistent with the failure to report any boot gain in the Section 351 Transaction. Allowing taxpayers to withhold vital information from the Service but still disavow the form of their transactions and reap the resulting tax benefits, as occurred in this case, is highly detrimental to administration of the revenue laws.

ii. Standard to Allow a Taxpayer to Disavow Form of Transactions

A second concern is the legal standard the court applied to allow Taxpayer to disavow the form of its transactions and recast them for tax purposes.

In *Commissioner v. National Alfalfa Dehydrating & Milling Co.*, 417 U.S. 134, 149 (1974), the Supreme Court adopted what is sometimes referred to as the "non-disavowal principle":

> [W]hile a taxpayer is free to organize his affairs as he chooses, nevertheless, once having done so, he must accept the tax consequences of his choice, *whether contemplated or not*, . . . and may *not enjoy the benefit* of some other route he might have chosen to follow but did not.

[Emphasis added.] The Service continues to believe that the facts of this case do not support an exception to the non-disavowal principle.

The court acknowledged that, in seeking to disavow the form of its transactions, a taxpayer faces a greater burden than the Service does when it challenges the form of a transaction. But the court interpreted the non-disavowal principle as applying only in limited situations:

> [R]ead in the context of the Court's entire opinion [in *National Alfalfa*], the familiar quotation should be interpreted to mean only that a taxpayer's ability to identify an alternative path to a given end result that provides more favorable tax consequences than the path actually taken is not enough to entitle the taxpayer to the desired tax treatment.

T.C. Memo. 2021-14 (slip op.) at 48.

The court went on to state that the case law has evolved to become more hospitable to taxpayers seeking to disavow the form of their transactions. The court described the standard it applied in this case as follows:

> The Commissioner can succeed in disregarding the form of a transaction by showing that the form in which the taxpayer cast the transaction does not reflect its economic substance. For the taxpayer to disavow the form it chose (or at least acquiesced to), it must make that showing and more. In particular, the taxpayer must establish that the form of the transaction was not chosen for the purpose of obtaining tax benefits (to either the taxpayer itself, as in Estate of Durkin [99 T.C. 561 (1992)], or to a counterparty, as in Coleman [87 T.C. 178 (1986)]) that are inconsistent with those the taxpayer seeks through disregarding that form. When the form that the taxpayer seeks to disavow was chosen for reasons other than providing tax benefits inconsistent with those the taxpayer seeks, the policy concerns articulated in Danielson [378 F.2d 771 [19 AFTR 2d 1356] (3d Cir. 1967)] will not be present.

T.C. Memo. 2021-14 (slip op.) at 64.

The court found that Taxpayer's failure to adopt the recast transaction, with an increase in asset basis, resulted from an oversight - perhaps occurring to Taxpayer's accountants only when they prepared Taxpayer's 2010 return (in which Taxpayer still did not disclose a recast). Thus, under the standard described by the court, Taxpayer was allowed to recast its transactions.

This case would be appealable to the Second Circuit, which has supported strict application of the non-disavowal principle when a taxpayer changes its position on the form of its transaction. *Nestlé Holdings, Inc. v. Commissioner*, 152 F.3d 83 (2d Cir. 1998); *Consolidated Edison of New York, Inc. v. United States*, 10 F.3d 68 (2d Cir. 1993). Applying this standard here, the taxpayer would be prevented from disavowing the form of its transaction.

In the Service's view, the standard applied by the court in this case would limit the non-disavowal principle to such an extent as to produce a significant blow to tax administration. In practical terms, the Service could prevent taxpayers from disavowing the form of their transactions only if it could show purposefully conflicting tax benefits, even when, as in this case, the taxpayer withholds vital information.

g. *Conclusion*

The Service disagrees with the court's conclusion that the parties' failure to report the transactions fully or consistently should not be a major factor in a decision whether to allow a taxpayer to disavow the form of its transactions and also with the standard the court applied to allow Taxpayer to disavow its form in this case.

The Service will continue to challenge an assertion by a taxpayer that the form of a transaction, as chosen by that taxpayer, memorialized in relevant agreements, and implemented, does not bind the taxpayer for Federal tax purposes, especially if the taxpayer does not fully, properly, and consistently report the transaction.

Areas in which substance over form are discussed include:

- Part II.G.18.b Sale or Exchange of Intellectual Property - Capital Gain vs. Ordinary Income, fn 1685.

- Part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax, fn 3409, in which taxpayers argue whether payments relating to the transfer of a book of business are compensation or the sale of goodwill.

- Part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss), fn 5699, and II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest, fn 4245.

- See fn 5699 in part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss) and fn 230, in part II.A.2.i.i.(b) Why Nonvoting Shares Are Needed for Estate Planning, discussing a taxpayer unsuccessfully invoking Code § 2036 to get a basis step-up.

II.H. Income Tax vs. Estate and Gift Tax (Particularly for Depreciable Property)

With the estate and gift tax rate at only 40%, one might consider whether ordinary income assets are better candidates for retention and basis step-up than assets that would generate capital gain. When one considers ordinary income rates, present and future, not only federal but also state and local income tax, one might determine that obtaining a basis step-up might be more important than saving estate tax on an ordinary income asset.[1973]

Also consider that perhaps estates might use assets not protected by GST exemption to pay the estate tax, and the assets with the stepped-up basis go to GST-exempt trusts.

Paul S. Lee of Northern Trust (formerly Bernstein), in various presentations with "Venn Diagrams" in the title, discusses the continuum of assets (regarding tax rates when various assets are sold) and approaches to obtaining basis increases.

At the 2015 Heckerling Institute, John Bergner's presentation, "Oh, What a Relief It Is: Curing Estate Plans That No Longer Make Sense in Light of the American Taxpayer Relief Act of 2012," mentioned basis step-up ideas. Another good source is Yuhas & Radom, "The New Estate Planning Frontier: Increasing Basis," *Journal of Taxation* (1/2015).[1974]

II.H.1. Ordinary Income Assets

Ordinary income assets include the following depreciable property:[1975]

- Equipment, furniture, and other tangible personal property, which is even more of a concern with recently expanded opportunities for Code § 179 write-offs and bonus depreciation[1976]

- Components of buildings that have been segregated into Code § 1245 assets as a result of a cost-segregation study geared toward having faster depreciation on those components than is permitted for buildings[1977]

- Amortizable goodwill, going concern value, and other intangibles[1978]

- Real property held for one year or less

[1973] Jerome M. Hesch suggested that estates of 2010 decedents might consider paying estate tax rather than electing out of estate tax and into basis carryover. "A 2010 Estate that Holds Depreciable Property Might Benefit from Paying Estate Tax," Steve Leimberg's Estate Planning Email Newsletter (Archive Message #1771).

[1974] Saved as document number 6108884 in my system.

[1975] PPC's *1040 Deskbook*, Table T801: Depreciation Recapture. I have not verified all of this.

[1976] See part II.G.6.b Code § 1245 Property.

[1977] See part II.G.6.b Code § 1245 Property. Code § 1245(a)(3)(C) treats as Code § 1245 ordinary income recapture property "so much of any real property (other than any property described in subparagraph (B)) which has an adjusted basis in which there are reflected adjustments for amortization under section 169, 179, 179A, 179B, 179C, 179D, 179E, 185, 188 (as in effect before its repeal by the Revenue Reconciliation Act of 1990), 190, 193, or 194…." For allocations involving such real property, see Notice 2013-59.

[1978] Code § 197. Amortizable goodwill is a not a capital asset, but other goodwill is. Letter Ruling 200243002. However, amortizable goodwill may be eligible for capital gain treatment as described in part II.G.6 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business, especially fn. 1490.

- Real property held for more than one year described below (dates approximate):
  - Residential real property acquired 1981-1986, to the extent depreciated faster than straight-line would have allowed
  - Nonresidential real property held more than one year, with accelerated depreciation method used under ACRS (acquired 1981-1986)[1979]
  - Certain real property bought before 1981

See part II.G.18 Intellectual Property and Other Intangible Assets.

II.H.2. Basis Step-Up Issues

Assets includible in the decedent's gross estate for estate tax purposes are subject to a Code § 1014 basis adjustment.[1980] So is property "acquired by bequest, devise, or inheritance, or by the decedent's estate from the decedent."[1981] It has been suggested that the latter applies to property held in an irrevocable trust, that is outside of the decedent's gross estate but was deemed owned by the decedent until death, because for income tax purposes the decedent is deemed to have held the assets.[1982] The IRS would argue that the basis adjustment provisions apply to transfers made for transfer tax purposes, not based on transfers made for income tax purposes.[1983]

For a 2010 decedent whose estate elected not to pay estate tax, only part receives a basis step-up. In granting an extension of time to select which assets received a basis step-up, Letter Ruling 202340016 explained:

> Section 1022(a) provides that property acquired from a decedent who died after December 31, 2009, is treated as transferred by gift, and the basis of the person acquiring the property from such a decedent is the lesser of the adjusted basis of the decedent or the fair market value of the property at the date of the decedent's death.
>
> Section 1022(b)(1) provides, in general, that the basis of property under § 1022(a) is increased by basis increase that is allocated to the property.
>
> Section 1022(b)(2)(A) provides, in general, that basis increase is the portion of the aggregate basis increase that is allocated to the property.

[1979] Code § 1245(a)(5), repealed by the Tax Reform Act of 1986 but is said to apply to future dispositions of the property for which certain depreciation methods apply.
[1980] Code § 1014(b)(9).
[1981] Code § 1014(b)(1).
[1982] Rev. Proc. 2015-37 added to the list of areas with respect to which the IRS will not rule (which will show up in the annual revenue procedure regarding issuing private letter rulings):

> *Section 1014. Basis of Property Acquired from a Decedent*. Whether the assets in a grantor trust receive a section 1014 basis adjustment at the death of the deemed owner of the trust for income tax purposes when those assets are not includible in the gross estate of that owner under chapter 11 of subtitle B of the Internal Revenue Code.

[1983] See fn. 6591, citing CCA 200937028 for the proposition that Code § 1014(b)(1) would not apply; see also fn. 6532, citing a letter ruling providing that assets in a GRIT received a Code § 1015(d) basis increase for gifts tax paid.

Section 1022(b)(2)(B) and (C) provide that the aggregate basis increase is $1,300,000; and that the aggregate basis increase is increased by - (i) the sum of the amount of any capital loss carryover under § 1212(b), and the amount of any net operating loss carryover under § 172 that would (but for the decedent's death) be carried from the decedent's last taxable year to a later taxable year of the decedent, plus (ii) the sum of the amount of any losses that would have been allowable under § 165 if the property acquired from the decedent had been sold at fair market value immediately before the decedent's death.

Section 1022(c)(1) provides that in the case of property that is qualified spousal property, the basis of such property under § 1022(a) (as increased under § 1022(b)) is increased by spousal property basis increase allocated to the property.

Section 1022(c)(2)(A) provides, in general, that spousal property basis increase is the portion of the aggregate spousal property basis increase which is allocated to the property. Section 1022(c)(2)(B) provides that the aggregate spousal property basis increase is $3,000,000.

Section 1022(d)(1)(A) provides, in general, that the basis of property acquired from a decedent may be increased under § 1022(b) or (c) only if the property was owned by the decedent at the time of death. Section 1022(d)(1)(B) describes property that is considered to be owned by the decedent at the time of death.

Section 1022(d)(2) provides that the basis adjustments under §§ 1022(b) and (c) shall not increase the basis of any interest in property above its fair market value in the hands of the decedent as of the date of the decedent's death.

Section 1022(d)(3) provides, in general, that the executor is to allocate the basis adjustments under §§ 1022(b) and (c) on the return required by § 6018 and that any allocation made may be changed only as provided by the Secretary.

Section 1022(e) describes property that is considered to be acquired from the decedent for purposes of § 1022.

Subtitle A of title V of the Economic Growth and Tax Relief Reconciliation Act of 2001, P.L. 107-16 (115 Stat. 76-81), enacted § 2210, which made chapter 11 (the estate tax) inapplicable to the estate of any decedent who died in 2010 and chapter 13 (the generation skipping transfer (GST) tax) inapplicable to generation-skipping transfers made in 2010. On December 17, 2010, Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 (TRUIRJCA), P.L. 111-312 (124 Stat. 3296), became law, and § 301(a) of TRUIRJCA retroactively reinstated the estate and GST taxes. However, § 301(c) of TRUIRJCA allows the executor of the estate of a decedent who died in 2010 to elect to apply the Code as though § 301(a) of TRUIRJCA did not apply with respect to chapter 11 and for property acquired or passing from a decedent (within the meaning of § 1014(b)). Thus, § 301(c) of TRUIRJCA allows the executor of the estate of a decedent who died in 2010 to elect not to have the provisions of chapter 11 apply to the decedent's estate, but rather, to have the provisions of § 1022 apply (the Section 1022 Election).

Notice 2011-66, 2011-35 I.R.B. 184, section I.A. provides that the executor of the estate of a decedent who died in 2010 makes the Section 1022 Election by filing a Form 8939

> on or before November 15, 2011. Notice 2011-76, 2011-40 I.R.B. 479, extended the due date of the Form 8939 and thus, the election, from November 15, 2011 to January 17, 2012.
>
> Notice 2011-66, section I.D.1, provides that the Internal Revenue Service will not grant extensions of time to file a Form 8939 and will not accept a Form 8939 filed after the due date except in four limited circumstances provided in section I.D.2. Under this section of Notice 2011-66, an executor may apply for relief under § 301.9100-3.
>
> Section 301.9100-3 provides the standards used to determine whether to grant an extension of time to make an election whose date is prescribed by a regulation (and not expressly provided by statute).
>
> Requests for relief under § 301.9100-3 will be granted when the taxpayer provides the evidence to establish to the satisfaction of the Commissioner that the taxpayer acted reasonably and in good faith, and that granting relief will not prejudice the interests of the government.
>
> Section 301.9100-3(b)(1)(v) provides that a taxpayer is deemed to have acted reasonably and in good faith if the taxpayer reasonably relied on a qualified tax professional, including a tax professional employed by the taxpayer, and the tax professional failed to make, or advise the taxpayer to make, the election.
>
> Based on the facts submitted and the representations made, we conclude that the requirements of § 301.9100-3 have been satisfied. Therefore, the personal representatives of Decedent's estate are granted an extension of time of 120 days from the date of this letter to make the Section 1022 Election on a Form 8939 and allocate additional basis to eligible property as provided by § 1022. A copy of this letter should be attached to the Form 8939.

Relying in part on the rule that foreign real property that is inherited by a United States citizen from a nonresident alien will receive a step-up in basis under Code § 1014(b)(1),[1984] Letter Ruling 201245006 held that Code § 1014(b)(1) applied on the termination of an irrevocable trust created by a nonresident alien who had retained the right to all of the trust's income and could receive principal distributions in the trustees' absolute discretion (the trustees being the grantor and an unrelated party). The facts were:

> Taxpayer, a citizen and resident of Country, proposes to transfer assets to Trust, an irrevocable trust subject to the laws of Country. The assets of Trust include cash and stock in Company 1 and Company 2 that are publicly traded in Country and on the New York Stock Exchange. Taxpayer and X, an unrelated party, are Trustees.
>
> Under the terms of Trust, Trustees are to pay all of the income of Trust to Taxpayer during his lifetime and may, in Trustees' absolute discretion, pay principal of Trust to Taxpayer. Article IV. Upon the death of Taxpayer, any income of Trust and any corpus remaining in Trust are to be paid or transferred to or in trust for one or more of Taxpayer's issue in such proportions as Taxpayer may appoint by deed or will. In default of appointment, corpus and accumulated income will be held in further trust for the benefit of Taxpayer's issue. Article V. Trust further provides that during Taxpayer's

---

[1984] Rev. Rul. 84-139.

> lifetime no adverse party within the meaning of § 672(a) is eligible to serve as Trustee. Article XI.

The ruling reasoned:

> In this case, Taxpayer's issue will acquire, by bequest, devise, or inheritance, assets from Trust at Taxpayer's death. The assets acquired from Trust are within the description of property acquired from a decedent under § 1014(b)(1). Therefore, Trust will receive a step-up in basis in Trust assets under § 1014(a) determined by the fair market value of the property on the date of Taxpayer's death. See Rev. Rul. 84-139, 1984-2 C.B. 168 (holding that foreign real property that is inherited by a U.S. citizen from a nonresident alien will receive a step-up in basis under § 1014(a)(1) and 1014(b)(1)). This rule applies to property located outside the United States, as well as to property located inside the United States.
>
> Accordingly, based solely upon the information submitted and the representations made, we conclude that following the death of Taxpayer, the basis of the property held in Trust will be the fair market value of the property at the date of Taxpayer's death under § 1014(a).

Letter Ruling 201544002 ruled that Code § 1014 provided a basis step-up when one of the nonresident alien grantors of a joint revocable trust died:

> In this case, Trust provides that during the joint lifetimes of both Settlors the trustee is to distribute to the Deceased Spouse as much income or principal from the community property or from the Deceased Spouse's separate property as the Deceased Spouse directs. The Deceased Spouse has also reserved the right to revoke Trust with respect to community property and with respect to the Deceased Spouse's separate property at any time prior to the death of the Deceased Spouse. The Deceased Spouse's separate property and the community property are within the description of property acquired from a decedent under § 1014(b)(2). Accordingly, based solely upon the information submitted and the representations made, we conclude that upon the death of the Deceased Spouse, the Surviving Spouse will be considered as acquiring the Deceased Spouse's separate property under § 1014(b)(2) and will receive a step-up (or step-down) in basis of the Deceased Spouse's separate property equal to the fair market value of the assets as of the date of death of the Deceased Spouse. We also conclude that upon the death of the Deceased Spouse, the Surviving Spouse will be considered as acquiring the Deceased Spouse's one-half share of all community property that is part of Trust assets under § 1014(b)(2) and will receive a step-up (or step-down) in basis of the Deceased Spouse's one-half share of all community property that is part of Trust assets equal to the fair market value of the assets as of the date of death of the Deceased Spouse.

That was based on the below, which "by joint lifetimes" in Section 3.1 presumably meant while both were alive, given that Section 3.3 provided constraints on the surviving spouse:

> Section 3.1 provides, in relevant part, that during the joint lifetimes of Settlors, either Husband or Wife may revoke Trust in whole or in part with respect to community property and with respect to separate property, if any, contributed by the revoking Settlor. Revocation is to be made by written instrument delivered to the trustee and the other settlor.

> Section 3.3 provides, in relevant part, that after the death of the Deceased Spouse, the Surviving Spouse, while competent, may amend or revoke the Survivor's Trust in part or in whole, but only with the written consent of any two Individuals who are then living and competent as well as a Subordinate Party as defined in § 672(c). Any amendment or revocation pursuant to this section is to be effected by a written instrument signed by Surviving Spouse and the Subordinate Party and delivered to the trustee. Individuals are related to Husband and Wife.

However, when the surviving spouse dies:

> In this case, under section 2.4.2.1 of Trust, Surviving Spouse has a general power of appointment over the property in Survivor's Trust, exercisable by will. Accordingly, based upon the information submitted and the representations made, we conclude that the property in the Survivor's Trust fits within the description of property acquired from a decedent under § 1014(b)(4 Thus, to the extent that Surviving Spouse exercises the general power of appointment by will, upon the death of the Surviving Spouse, all of the assets owned by the Survivor's Trust will receive a step-up (or step-down) in basis pursuant to § 1014(b)(4) equal to the fair market value of the assets as of the date of death of the Surviving Spouse.

The Survivor's Trust was described as:

> Section 2.4.1.1 provides that during the lifetime of the Surviving Spouse, upon request from the Surviving Spouse, the trustee is to distribute to the Surviving Spouse an amount up to the entire net income of the Survivor's Trust.
>
> Section 2.4.2 provides, in relevant part, that on the death of the Surviving Spouse, the trustee is to consider selling any interest held directly or indirectly in any yachts, planes, boats, or real property (excluding real property described in Section 2.4.2.4 if applicable). The trustee is to distribute the Survivor's Trust as follows:
>
> Section 2.4.2.1 provides that the Surviving Spouse is to have the power to appoint the balance of the Survivor's Trust to any one or more of the creditors of the Surviving Spouse's estate (excluding any taxing authority) by a will specifically exercising this power of appointment. The trustee is to distribute the balance of the Survivor's Trust as appointed by the Surviving Spouse, to the extent this power of appointment is exercised. In addition, the trustee is to distribute the balance of the Survivor's Trust not effectively appointed pursuant to this section.

On the other hand, CCA 200937028 held:

> We strongly disagree with taxpayer's contention. In this case, the taxpayer transferred assets into a trust and reserved the power to substitute assets.
>
> Section 1014(b)(1)-(10) describes the circumstances under which property is treated as having been acquired from the decedent for purposes of the section 1014 step-up basis rule. Since the decedent transferred the property into trust, section 1014(b)(1) does not apply. Sections 1014(b)(2) and (b)(3) apply to transfers in trust, but do not apply here, because the decedent did not reserve the right to revoke or amend the trust. None of the other provisions appear to apply at all in this case.

> Quoting from section 1.1014-1(a) of the Regulations: "The purpose of section 1014 is, in general, to provide a basis for property acquired from a decedent which is equal to the value placed upon such property for purposes of the Federal estate tax Accordingly, the general rule is that the basis of property acquired from a decedent is the fair market value of such property at the date of the decedent's death.... Property acquired from the decedent includes, principally,... property required to be included in determining the value of the decedent's gross estate under any provision of the [Internal Revenue Code.]"
>
> Based on my reading of the statute and the regulations, it would seem that the general rule is that property transferred prior to death, even to a grantor trust, would not be subject to section 1014, unless the property is included in the gross estate for federal estate tax purposes as per section 1014(b)(9).

A generation-skipping transfer (GST) might generate a new basis as well. If property is transferred in a taxable termination[1985] which occurs at the same time as and as a result of the death of an individual, the basis of property not protected by the allocation of GST exemption is adjusted in a manner similar to the manner provided under Code § 1014(a).[1986] For any other GST, the transferred property's basis is increased (but not above the fair market value of such property) by an amount equal to that portion of the GST tax imposed with respect to the transfer which is attributable to the excess of the fair market value of such property over its adjusted basis immediately before the transfer.[1987] This basis adjustment is applied after any Code § 1015 basis adjustment with respect to the transfer.[1988]

A taxable termination providing a basis step-up creates some powerful estate planning possibilities when the beneficiary's estate, outside of the trust, is significantly above the estate tax exemption. Not granting the beneficiary a (perhaps contingent) general power of appointment might save state estate tax (if any) and opens the door for "generation jumping." For an example of generation jumping, suppose Mom leaves a trust for Daughter that is not protected by Mom's GST exemption, Daughter has a large estate of her own, and Daughter has a nongeneral power of appointment. Daughter might choose to leave part or all of the trust to her own grandchildren or more remote descendants at Daughter's death. To the extent Daughter does that, the property incurs only one level of transfer tax even though it passed two or more generations below Daughter. Although the property is not included in Daughter's estate, it receives a new basis by reason of Daughter's death. Daughter would also have the option to direct property to her siblings or other nonskip persons, free from transfer tax but without a new basis. The main disadvantage to exposing property to GST tax instead of estate tax is that, although Code § 6166 allows deferral of estate tax on certain business interests,[1989] that deferral does not apply to GST tax. Also, the Code § 2013 credit for tax on prior transfers does not provide relief from GST tax.[1990] Giving a married beneficiary a general power of

---

[1985] "Taxable termination" means the termination (by death, lapse of time, release of power, or otherwise) of an interest in property held in a trust unless immediately after such termination, a non-skip person has an interest in such property, or at no time after such termination may a distribution (including distributions on termination) be made from such trust to a skip person. Code § 2612.
[1986] Code § 2654(a)(2).
[1987] Code § 2654(a)(1).
[1988] Code § 2654(a)(1).
[1989] See part III.B.5.e.ii Code § 6166 Deferral.

appointment permits a free basis step-up, but using a nongeneral power of appointment provides other benefits that one would carefully weigh.[1991]

A property's value used to determine federal estate tax when its owner dies is presumed to be the basis under Code § 1014, which presumption may be rebutted by clear and convincing evidence.[1992] However, Code § 1014 basis may not exceed the final value that has been determined for estate tax purposes,[1993] or, if not finally determined, the value shown on a statement has been furnished under Code § 6035(a) identifying the value of such property.[1994] This limitation applies only to property whose inclusion in the decedent's estate increased estate tax liability.[1995]

The cleansing effect of a basis step-up at death is a powerful planning tool. See Rev. Rul. 73-183 (no gain or loss is recognized on the decedent's final income tax return as a result of the transfer of stock – that received a basis adjustment on Code § 1014 upon death - to the executor of the decedent's estate), reasoning:

> The explanation for section 641 of the Code, relating to the imposition of tax with respect to the income of estates and trusts, as shown in Senate Report No. 1622, Eighty-third Congress, Second Session, at page 340, contains the following statement:
>
>> The mere passing of property to an executor or administrator on the death of the decedent does not constitute a taxable realization of income even though the property may have appreciated in value since the decedent acquired it.
>>
>> The transfer of the stock of the deceased taxpayer to the executor of his estate did not result in a sale or other disposition of such stock within the meaning of section 1001(a) of the Code.
>
> Accordingly, it is held in the instant case that no loss is recognized on the decedent's final income tax return as a result of the transfer of the stock to the executor of the

[1991] If the beneficiary has a general power of appointment, then estate tax is avoided at the beneficiary's death (when keeping the property in the family) only when the spouse receives a marital deduction bequest, which at a minimum entails giving the surviving spouse all of the income. If the beneficiary has a nongeneral power of appointment that includes the child's surviving spouse as an eligible appointee, the child can make the surviving spouse's interest in trust income discretionary, shift income to children and grandchildren at their presumably lower rates, make medical and tuition payments for grandchildren and other skip persons that are excluded from GST tax, and include various flexibility and protections, while still deferring GST tax on the trust property until the child's surviving spouse's death.
[1992] Rev. Rul. 54-97. This ruling has been followed, distinguished, or questioned in a variety of cases. For a discussion of any duty of consistency, see *Van Alen v. Commissioner*, T.C. Memo. 2013-235.
[1993] Code § 1014(f)(1)(A). Code § 1014(f)(3) provides that basis of property has been determined for estate tax purposes if:

(A) the value of such property is shown on a return under section 6018 and such value is not contested by the Secretary before the expiration of the time for assessing a tax under chapter 11,

(B) in a case not described in subparagraph (A), the value is specified by the Secretary and such value is not timely contested by the executor of the estate, or

(C) the value is determined by a court or pursuant to a settlement agreement with the Secretary.

[1994] Code § 1014(f)(1)(B). Code § 6035(a) requires a statement by the executor (or, under Code § 6018(b), a beneficiary, if the executor if unable to make a complete return) of an estate required to file an estate tax return.
[1995] Code § 1014(f)(2).

decedent's estate when such stock has an adjusted basis in excess of its fair market value at the date of the decedent's death. It is held further that if the fair market value of the stock at the date of the decedent's death was in excess of the adjusted basis of the stock, no gain is recognized on the decedent's final income tax return as a result of the transfer of such stock to the executor of the decedent's estate. For the treatment of a dealer in securities who regularly inventories such securities, see section 471 of the Code and the regulations thereunder.

For a discussion of the basis an owner has in an entity (outside basis) contrasted with the basis the entity has in the assets the entity owns (inside basis),[1996] see parts II.Q.8.e.iii.(a) Illustration of Inside Basis Issue and II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss), the latter including a discussion on whether a basis increase by reason of gift tax paid generates a basis step-up.[1997]

For estate planning and income tax considerations when drafting bequests of a partnership or S corporation, see parts II.O.2 Spousal Issues in Buy-Sell Agreements and Related Tax Implications, III.A.3.c.iii Deadlines for QSST and ESBT Elections, and III.A.3.e.i.(b) QSST Issues When Beneficiary Dies.

For a variety of strategies relating to basis step-up, see Bramwell & Madden, "Toggling Gross Estate Inclusion On and Off: A Powerful Strategy," *Estate Planning Journal* (3/2017), which describes strategies relevant to parts:

- II.H.2.c QTIP Trusts - Code § 2519 Trap
- III.C Code § 2036
- III.D Code § 2038.

II.H.2.a. Free Basis Step-Up When First Spouse Dies

When the first spouse dies, assets included in the first spouse's estate for estate tax purposes generate a new tax basis,[1998] but the marital deduction can be used to avoid any estate tax at that time.[1999] Using a QTIP trust (a special type of marital deduction trust)[2000] allows the

---

[1996] A discussion suitable for clients is in my blog, "Tax basis: The key to reducing gain on sale or deducting asset purchases," at http://www.thompsoncoburn.com/insights/blogs/business-succession-solutions/post/2017-01-10/tax-basis-the-key-to-reducing-gain-on-sale-or-deducting-asset-purchases.

[1997] This discussion is in fn. 5669.

[1998] Code § 1014(b)(9).

[1999] Code § 2056.

[2000] Code § 2056(b)(7)(B) provides:

Qualified terminable interest property defined. For purposes of this paragraph-

(i) *In general*. The term "qualified terminable interest property" means property-
  (I) which passes from the decedent,
  (II) in which the surviving spouse has a qualifying income interest for life, and
  (III) to which an election under this paragraph applies.

(ii) *Qualifying income interest for life*. The surviving spouse has a qualifying income interest for life if-
  (I) the surviving spouse is entitled to all the income from the property, payable annually or at more frequent intervals, or has a usufruct interest for life in the property, and

executor[2001] to choose to keep all of the trust outside of the surviving spouse's estate for estate tax purposes, include all of the trust inside the estate tax system at the surviving spouse's death, or a combination.[2002] The executor makes the election on "the last estate tax return filed by the executor on or before the due date of the return, including extensions or, if a timely return is not filed, the first estate tax return filed by the executor after the due date,"[2003] the latter suggesting that a surviving spouse might want to avoid filing an estate tax return until the surviving spouse has a better idea of whether estate tax inclusion or basis step-up would be more beneficial – even to the point of filing a late return many years after the first spouse's death. (This ability to make a late-filed QTIP election applies for estate tax purposes but not for gift tax purposes.)[2004] Some people had expressed concern that the IRS might use Rev.

> (II) no person has a power to appoint any part of the property to any person other than the surviving spouse.
>
> Subclause (II) shall not apply to a power exercisable only at or after the death of the surviving spouse. To the extent provided in regulations, an annuity shall be treated in a manner similar to an income interest in property (regardless of whether the property from which the annuity is payable can be separately identified).

Letter Ruling 8943005 approves of giving the surviving spouse an inter vivos power of appointment that the surviving spouse can exercise in favor of others, notwithstanding Code § 2056(b)(7)(B)(ii)(II).

[2001] Reg. § 20.2056(b)-7(b)(3).

[2002] Reg. § 20.2056(b)-7(b)(2) provides:

> Property for which an election may be made.
>
> (i) *In general*. The election may relate to all or any part of property that meets the requirements of section 2056(b)(7)(B)(i), provided that any partial election must be made with respect to a fractional or percentage share of the property so that the elective portion reflects its proportionate share of the increase or decrease in value of the entire property for purposes of applying sections 2044 or 2519. The fraction or percentage may be defined by formula.
>
> (ii) *Division of trusts*.
>
> (A) *In general*. A trust may be divided into separate trusts to reflect a partial election that has been made, or is to be made, if authorized under the governing instrument or otherwise permissible under local law. Any such division must be accomplished no later than the end of the period of estate administration. If, at the time of the filing of the estate tax return, the trust has not yet been divided, the intent to divide the trust must be unequivocally signified on the estate tax return.
>
> (B) *Manner of dividing and funding trust*. The division of the trust must be done on a fractional or percentage basis to reflect the partial election. However, the separate trusts do not have to be funded with a pro rata portion of each asset held by the undivided trust.
>
> (C) *Local law*. A trust may be divided only if the fiduciary is required, either by applicable local law or by the express or implied provisions of the governing instrument, to divide the trust on the basis of the fair market value of the assets of the trust at the time of the division.

[2003] Reg. § 20.2056(b)-7(b)(4)(i). However, if the estate tax return preparer put the QTIP trust on the wrong part of Schedule M, classifying it as marital deduction property not subject to a QTIP election, then the IRS might allow a supplemental estate tax return to correct that mistake. Letter Rulings 201714020, 202001012, 202229028, and 202337002 (accountant incorrectly reported property as passing outright). Letter Ruling 201943010 provided an extension of time to file a QTIP election on the first spouse's late-filed estate tax return after the surviving spouse had died and appeared to be filed solely to get a basis step-up upon the surviving spouse's death; for more details, see fn 2005.

[2004] Letter Ruling 201109012, retroactively revoking Letter Ruling 201025021:

> The time for filing the inter vivos QTIP election is expressly prescribed by § 2523(f)(4). Because § 301.9100-3 is applicable only to requests for extensions of time fixed by regulations or other published guidance, the Service does not have the discretion to grant an extension of time under § 301.9100-3 to make the QTIP election under § 2523(f)(4) for the Year 1 transfer to Trust.

Proc. 2001-38, which had allowed taxpayers to undo certain unnecessary QTIP elections made by mistake, to undo a QTIP election that the taxpayer did not need to save estate tax but is using to achieve a basis step-up. However, Rev. Proc. 2016-49 revoked Rev. Proc. 2001-38 and provided a new procedure that clearly avoids this concern. Letter Ruling 201943010 provided an extension of time to file a QTIP election on the first spouse's late-filed estate tax return after the surviving spouse had died and appeared to be filed solely to get a basis step-up upon the surviving spouse's death.[2005] Reg. § 20.2056(b)-7(c)(1) expressly allows a protective election, but it is only if you are unsure whether the property qualifies. Reg. § 20.2056(b)-7(b)(2)(i) expressly allows using a formula, which is what we use all the time if we want to use exemption on the first return but want to protect against the value being higher than we think or protect against assets we might not know about.

"Portability" allows the surviving spouse to use the first spouse's estate/gift tax exemption ("DSUE")[2006] but not the first spouse's GST exemption; to use the latter, use a QTIP marital deduction trust with a Code § 2652(a)(3) "reverse QTIP" election. Reverse QTIP planning is not an option if the surviving spouse has a general power of appointment; consider post-mortem tactics if the spouse has such a power.[2007] The executor of the estate of the first spouse to die might elect to take a marital deduction beyond that needed for estate tax purposes, so that the property will get a basis step-up at the surviving spouse's death without any estate tax being due, if the surviving spouse's taxable estate does not exceed the sum of the DSUE (if and to the extent not used) and the surviving spouse's estate tax exemption. A disadvantage of portability is keeping open until the surviving spouse's death the statute of limitations for determining the value of assets in the first spouse's estate to the extent that they determine the first spouse's unused exemption.[2008] Also, the surviving spouse would lose the DSUE if and to the extent the surviving spouse remarries, does not use the DSUE, and the new spouse predeceases the

---

[2005] The facts were:

> In Year 1, Spouse received $x from the estate accounts. Spouse died on Date 3, in Year 2. Following Spouse's death, Executrix settled the administration of Decedent's estate and distributed the balance of the funds pursuant to the terms of Trust.
>
> Decedent's estate engaged legal counsel for the administration of Decedent's estate and Accountant for tax filings. Accountant recommended that Decedent's estate not file a Form 706, Federal Estate (and Generation-Skipping Transfer Tax) Return, because the estate did not exceed the filing threshold for Year 1 and did not wish to make a portability election under § 2010.
>
> Executrix requests an extension of time under § 301.9100-1 and § 301.9100-3 to make the QTIP election under § 2056(b)(7) to treat Marital Trust as QTIP property.

[2006] Code § 2010(c)(2)(B).

[2007] Letter Ruling 202152006 approved a reformation to insert the Rev. Rul. 95-58 safe harbor to allow a reverse-QTIP election to be made. For applying that safe harbor to avoid a general power of appointment, see fn. 6713 in part III.B.2.i.i Designing Trust Wholly Owned by Beneficiary from Inception. The safe harbor language in Letter Ruling 202152006 was requiring that:

> any person appointed to succeed any trustee that has been removed must be a corporation or financial institution; or an individual experienced in business, finance, or investments or who is an attorney experienced in the trust or tax fields and is "neither a 'related or subordinate to' such beneficiary" as those terms are defined in § 672(c).

[2008] Reg. § 20.2010-2(d) provides:

> *Authority to examine returns of decedent*. The IRS may examine returns of a decedent in determining the decedent's DSUE amount, regardless of whether the period of limitations on assessment has expired for that return. See § 20.2010-3(d) for additional rules relating to the IRS's authority to examine returns. See also section 7602 for the IRS's authority, when ascertaining the correctness of any return, to examine any returns that may be relevant or material to such inquiry.

surviving spouse;[2009] for strategy that may avoid that loss, see the end of part II.H.12.a Taxable Gifts of Property Included in the Donor's Estate.[2010] Later reductions in the estate tax exemption reduce the surviving spouse's estate tax exemption but do not affect the DSUE.[2011] Another possible disadvantage of portability might be loss of the state estate tax exemption of the first spouse to die, if and to the extent that the estate plan fails to use all of the first spouse's state estate tax exemption.[2012] Also, generally state death taxes do not apply portability.

Portability requires filing a timely estate tax return.[2013] However, this election is one for which the IRS may grant administrative relief.[2014] One might be able to filing an untimely request for an extension and get retroactive relief within 15 months after death, without obtaining a private letter ruling; however, for a period of time after the spring of 2016, relief without a private letter ruling was unlikely.[2015] Fortunately, Rev. Proc. 2017-34 provided an automatic extension for

---

[2009] Code § 2010(c)(4)(B)(i).

[2010] Text accompanying fn 2256.

[2011] Reg. § 20.2010-1(c)(2), Examples (3) and (4).

[2012] A state death tax chart is at http://www.actec.org/resources/state-death-tax-chart. The executor files the estate tax return. Reg. § 20.2010-2(a)(6).

[2013] Code § 2010(c)(5)(A) provides, "No election may be made under this subparagraph if such return is filed after the time prescribed by law (including extensions) for filing such return."

[2014] Reg. § 20.2010-2(a)(1) provides:

> *Timely filing required*. An estate that elects portability will be considered, for purposes of subtitle B and subtitle F of the Internal Revenue Code (Code), to be required to file a return under section 6018(a). Accordingly, the due date of an estate tax return required to elect portability is nine months after the decedent's date of death or the last day of the period covered by an extension (if an extension of time for filing has been obtained). See §§ 20.6075-1 and 20.6081-1 for additional rules relating to the time for filing estate tax returns. An extension of time to elect portability under this paragraph (a) will not be granted under § 301.9100-3 of this chapter to an estate that is required to file an estate tax return under section 6018(a), as determined without regard to this paragraph (a). Such an extension, however, may be available under the procedures applicable under §§ 301.9100-1 and 301.9100-3 of this chapter to an estate that is not required to file a return under section 6018(a), as determined without regard to this paragraph (a).

Letter Ruling 201532002 allowed an extension where the sum of the gross estate and taxable gifts was less than the basic exclusion amount. No explanation for reasonable cause was listed – the ruling stated only, "The estate discovered its failure to elect portability after the due date for making the election." The ruling granted an extension until 120 days after the date of the ruling. The taxpayer sought the ruling in 2015. The IRS conditioned the relief, "If it is later determined that, based on the value of the gross estate and taking into account any taxable gifts, Decedent's estate is required to file an estate tax return pursuant to § 6018(a), the Commissioner is without authority under § 301.9100-3 to grant to Decedent's estate an extension of time to elect portability and the grant of the extension referred to in this letter is deemed null and void." Similar relief was granted in Letter Rulings 201535004 (same), 201626008 (same), 201706003 (same), 201706016 (same), and 201536002 (attorney who prepared timely filed estate tax return failed to make QTIP election; no condition based on size of estate).

[2015] Given that Reg. § 20.2010-2(a)(1) refers to Reg. § 20.6081-1, let's look at Reg. § 20.6081-1(c):

> *Extension for good cause shown*. In its discretion, the Internal Revenue Service may, upon the showing of good and sufficient cause, grant an extension of time to file the return required by section 6018 in certain situations. Such an extension may be granted to an estate that did not request an automatic extension of time to file Form 706 prior to the due date under paragraph (b) of this section, to an estate or person that is required to file forms other than Form 706, or to an executor who is abroad and is requesting an additional extension of time to file Form 706 beyond the 6-month automatic extension. Unless the executor is abroad, the extension of time may not be for more than 6 months beyond the filing date prescribed in section 6075(a). To obtain such an extension, Form 4768 must be filed in accordance with the procedures under paragraph (a) of

estates that were not required to file and did not file timely;[2016] the extension was until the later of January 2, 2018 or the second annual anniversary of the decedent's date of death.[2017] Rev. Proc. 2022-32 supersedes Rev. Proc. 2017-34. Rev. Proc. 2022-32, Section 3.01, "In General," provides:

> this section and must contain a detailed explanation of why it is impossible or impractical to file a reasonably complete return by the due date. Form 4768 should be filed sufficiently early to permit the Internal Revenue Service time to consider the matter and reply before what otherwise would be the due date of the return. Failure to file Form 4768 before that due date may indicate negligence and constitute sufficient cause for denial of the extension. If an estate did not request an automatic extension of time to file Form 706 under paragraph (b) of this section, Form 4768 must also contain an explanation showing good cause for not requesting the automatic extension.

Instructions for Form 4768 (Rev. August 2012), which have a spirit that seems more generous to the taxpayer than the tone of the regulation authorizing the extension, provide:

> **Extension for cause**. If you have not filed an application for an automatic extension for Form 706, and the time for filing such an application has passed, an extension of time to file may still be granted if good cause is shown. File Form 4768, along with explanations of why the automatic extension was not requested and why a complete return was not filed by the due date, as soon as possible.

They also say the following:

> We will contact you only if your request for extension of time to file is denied. Keep a copy of the form for your records.

Consider obtaining a transcript or other verification that the extension was approved.

An attorney reported to me filing a late Form 4768 on March 31, 2016 and on April 19, 2016 receiving a denial of the extension, with the explanation, "An error made by the office of your attorney in determining and meeting the due date of Form 4768 is not exercising ordinary business care and prudence standards." When called, the IRS responded that the denial could be appealed or they should obtain a private letter ruling. The attorney opted for the latter and received one in early October 2016, and the estate qualified for a reduced filing fee ($6,500).

[2016] Section 3.02 denies relief to timely filed returns. A governmental official pointed out that any untimely filed return needs to be re-filed with an original signature to comply with this procedure; presumably this is required by Section 4.01(1).

[2017] Section 3.01 imposes the following requirements:

> (1) The decedent:
>   (a) was survived by a spouse;
>   (b) died after December 31, 2010; and
>   (c) was a citizen or resident of the United States on the date of death.
>
> (2) The executor is not required to file an estate tax return under § 6018(a) as determined based on the value of the gross estate and adjusted taxable gifts and without regard to the need to file for portability purposes;
>
> (3) The executor did not file an estate tax return within the time required by § 20.2010-2(a)(1) for filing an estate tax return; and
>
> (4) The executor satisfies all requirements of section 4.01 of this revenue procedure.

Section 4.01 imposes the following requirements:

> (1) A person permitted to make the election on behalf of the estate of a decedent—that is, an executor described in § 20.2010-2(a)(6)—must file a complete and properly prepared Form 706, United States Estate (and Generation-Skipping Transfer) Tax Return, on or before the later of January 2, 2018, or the second annual anniversary of the decedent's date of death. The Form 706 will be considered complete and properly prepared if it is prepared in accordance with § 20.2010-2(a)(7).
>
> (2) The executor filing the Form 706 on behalf of the decedent's estate must state at the top of the Form 706 that the return is "FILED PURSUANT TO REV. PROC. 2017-34 TO ELECT PORTABILITY UNDER § 2010(c)(5)(A)."

The simplified method of this revenue procedure is available to the executor (either an appointed executor or, if none, a non-appointed executor, as provided in § 20.2010-2(a)(6)) of the estate of a decedent if:

(1) The decedent:

(a) was survived by a spouse;

(b) died after December 31, 2010; and

(c) was a citizen or resident of the United States on the date of death.

(2) The executor is not required to file an estate tax return under § 6018(a) as determined based on the value of the gross estate and adjusted taxable gifts and without regard to the need to file for portability purposes;

(3) The executor did not file an estate tax return within the time required by § 20.2010-2(a)(1) for filing an estate tax return; and

(4) The executor satisfies all requirements of section 4.01 of this revenue procedure.

Rev. Proc. 2022-32, Section 4.01, "Requirements for Relief," provides:

The requirements for relief under this revenue procedure are as follows:

(1) A person permitted to make the election on behalf of the estate of a decedent - that is, an executor described in § 20.2010-2(a)(6)--must file a complete and properly prepared Form 706, United States Estate (and Generation-Skipping Transfer) Tax Return, on or before the fifth annual anniversary of the decedent's date of death. The Form 706 will be considered complete and properly prepared if it is prepared in accordance with § 20.2010-2(a)(7).

(2) The executor filing the Form 706 on behalf of the decedent's estate must state at the top of the Form 706 that the return is "FILED PURSUANT TO REV. PROC. 2022-32 TO ELECT PORTABILITY UNDER § 2010(c)(5)(A)."

Rev. Proc. 2022-32 "is not available to the estate of a decedent whose executor filed an estate tax return within the time prescribed by § 20.2010-2(a)(1)."[2018] It also "is not available to an estate that is required to file an estate tax return under § 6018(a) (as determined based on the value of the gross estate and adjusted taxable gifts);"[2019] if, after receiving relief, it is later determined that the estate was ineligible "based on the value of the gross estate and taking into account any taxable gifts, … the grant of an extension as provided in section 4.02 of this revenue procedure is deemed null and void *ab initio*."[2020] If the estate is not disqualified for either of these reasons but simply does not qualify for Rev. Proc. 2022-32 relief, the estate

[2018] Section 3.02, which explains:

Such an executor either will have elected portability of the DSUE amount by timely filing that estate tax return or will have affirmatively opted out of portability in accordance with § 20.2010-2(a)(3)(i).

[2019] Section 3.03 explains, "As set forth in § 20.2010-2(a)(1), an extension of time to elect portability under § 301.9100-3, including through the simplified method of this revenue procedure, is not available … because, in that case, the due date of the election is prescribed by statute and not by regulation."

[2020] Section 4.03.

nevertheless "may request an extension of time to make the portability election under § 2010(c)(5)(A) by requesting a letter ruling under the provisions of § 301.9100-3."[2021]

Rev. Proc. 2022-32, Section 5 describes the impact of relief on surviving spouse.

One might also be able to obtain automatic administrative relief within six months after the original due date if one discovers that one inadvertently opted out of portability.[2022]

An estate that is not required to file an estate tax return has reduced reporting requirements regarding marital or charitable deduction property.[2023] For such property, the return is "required to report only the description, ownership, and/or beneficiary of such property, along with all other information necessary to establish the right of the estate to the" marital or charitable deduction,[2024] so long as the "the executor exercises due diligence to estimate the fair market value of the gross estate, including the property" subject to the reduced reporting requirements.[2025] The executor should include evidence that either that particular property[2026] or

---

[2021] Section 3.04 directs the executor to Rev. Proc. 2022-1 or any successor revenue procedure. Letter Ruling 202351010 granted relief for an estate below the filing threshold without the ruling explaining why the estate was late, with the usual caveat:

> If it is later determined that, based on the value of the gross estate and taking into account any taxable gifts, Decedent's estate is required to file an estate tax return pursuant to § 6018(a), the Commissioner is without authority under § 301.9100-3 to grant an extension of time to elect portability and the grant of the extension referred to in this letter is deemed null and void. *See* § 20.2010-2(a)(1).

[2022] Reg. § 301.9100-2(b).

[2023] Reg. § 20.2010-2(a)(7)(ii)(A), referring to property the value of which is deductible under Code § 2056, 2056A, or 2055(a).

[2024] Reg. § 20.2010-2(a)(7)(ii)(A), referring to "§§ 20.2056(a)-1(b)(i) through (iii) and 20.2055-1(c), as applicable."

[2025] Reg. § 20.2010-2(a)(7)(ii)(B) provides:

> *Return requirements when reporting of value not required for certain property*.
> Paragraph (a)(7)(ii)(A) of this section applies only if the executor exercises due diligence to estimate the fair market value of the gross estate, including the property described in paragraph (a)(7)(ii)(A) of this section. Using the executor's best estimate of the value of properties to which paragraph (a)(7)(ii)(A) of this section applies, the executor must report on the estate tax return, under penalties of perjury, the amount corresponding to the particular range within which falls the executor's best estimate of the total gross estate, in accordance with the Instructions for Form 706.

[2026] Reg. § 20.2010-2(a)(7)(ii)(C), Example (1), provides:

> (i) *Facts*. The assets includible in H's gross estate consist of a parcel of real property and bank accounts held jointly with W with rights of survivorship, a life insurance policy payable to W, and a survivor annuity payable to W for her life. H made no taxable gifts during his lifetime.
>
> (ii) *Application*. E files an estate tax return on which these assets are identified on the proper schedule, but E provides no information on the return with regard to the date of death value of these assets in accordance with paragraph (a)(7)(ii)(A) of this section. To establish the estate's entitlement to the marital deduction in accordance with § 20.2056(a)-1(b) (except with regard to establishing the value of the property) and the instructions for the estate tax return, E includes with the estate tax return evidence to verify the title of each jointly held asset, to confirm that W is the sole beneficiary of both the life insurance policy and the survivor annuity, and to verify that the annuity is exclusively for W's life. Finally, E reports on the estate return E's best estimate, determined by exercising due diligence, of the fair market value of the gross estate in accordance with paragraph (a)(7)(ii)(B) of this section. The estate tax return is considered complete and properly prepared and E has elected portability.

the entire residue[2027] passes to the surviving spouse. However, that reduced reporting rule does not apply to marital or charitable deduction property if:[2028]

(1) The value of such property relates to, affects, or is needed to determine, the value passing from the decedent to a recipient other than the recipient of the marital or charitable deduction property;

(2) The value of such property is needed to determine the estate's eligibility for the provisions of sections 2032, 2032A, or another estate or generation-skipping transfer tax provision of the Code for which the value of such property or the value of the gross estate or adjusted gross estate must be known (not including section 1014 of the Code);

(3) Less than the entire value of an interest in property includible in the decedent's gross estate is marital deduction property or charitable deduction property; or

(4) A partial disclaimer or partial qualified terminable interest property (QTIP) election is made with respect to a bequest, devise, or transfer of property includible in the gross estate, part of which is marital deduction property or charitable deduction property.

For example, if half of the residue passes to marital deduction trust and half passes to a nonmarital trust, the residue is not eligible for the reduced reporting requirements.[2029] Thus, a formula bequest to marital deduction and nonmarital trusts would not qualify for portability. However, a one-lung plan – described below – would be eligible.

I quite often draft estate plans where the entire residue goes into a trust for the surviving spouse that is eligible for the QTIP election – sometimes called a one-lung plan. For a number of reasons, this type of plan provides significant flexibility. Extra caution is required, however, when a surviving spouse who has estate planning goals that might not necessarily be consistent

---

[2027] Reg. § 20.2010-2(a)(7)(ii)(C), Example (2), provides:

(i) *Facts*. H's will, duly admitted to probate and not subject to any proceeding to challenge its validity, provides that H's entire estate is to be distributed outright to W. The non-probate assets includible in H's gross estate consist of a life insurance policy payable to H's children from a prior marriage, and H's individual retirement account (IRA) payable to W. H made no taxable gifts during his lifetime.

(ii) *Application*. E files an estate tax return on which all of the assets includible in the gross estate are identified on the proper schedule. In the case of the probate assets and the IRA, no information is provided with regard to date of death value in accordance with paragraph (a)(7)(ii)(A) of this section. However, E attaches a copy of H's will and describes each such asset and its ownership to establish the estate's entitlement to the marital deduction in accordance with the instructions for the estate tax return and § 20.2056(a)-1(b) (except with regard to establishing the value of the property). In the case of the life insurance policy payable to H's children, all of the regular return requirements, including reporting and establishing the fair market value of such asset, apply. Finally, E reports on the estate return E's best estimate, determined by exercising due diligence, of the fair market value of the gross estate in accordance with paragraph (a)(7)(ii)(B) of this section. The estate tax return is considered complete and properly prepared and E has elected portability.

[2028] Reg. § 20.2010-2(a)(7)(ii)(A).

[2029] Reg. § 20.2010-2(a)(7)(ii)(C), Example (3), reasoning:

The amount passing to the non-marital trust cannot be verified without knowledge of the full value of the property passing under the will. Therefore, the value of the property of the marital trust relates to or affects the value passing to the trust for W and the descendants of H and W.

with the first spouse's goals (for example, the surviving spouse is not a parent of the decedent's children). A trust for which a QTIP election is made is included in the surviving spouse's estate for estate tax purposes,[2030] and generally it pays estate tax equal to the excess of the amount due with inclusion over the amount due if the trust were not included in the surviving spouse's taxable estate.[2031] No law requires the surviving spouse to use the deceased spouse's estate/gift tax exemption to protect the QTIP trust's assets from estate tax. Sometimes, the first spouse to die might consider making any trust for the surviving spouse ineligible for the QTIP election to the extent that doing so will exhaust the first spouse's remaining estate/gift tax exemption; although these issues might be contractually addressed, contractual obligations might be impractical or impossible to enforce, even with excellent drafting. Situations of concern include:

- <u>Benign Neglect</u>. The surviving spouse has an estate – beyond the QTIP trust - that exceeds the surviving spouse's estate own gift/tax exemption. The first spouse's estate tax exemption will be used against the surviving spouse's bequest, leaving the QTIP with the requirement to pay estate tax.

- <u>Potentially Unfair Actions</u>. The surviving spouse uses all the first spouse's estate/gift tax exemption and the surviving spouse's estate tax exemption to make gifts to those the surviving spouse wishes to benefit. No estate/gift tax exemption remains to shelter the QTIP trust from estate tax.

Suppose, to protect against this situation, the executor decides not to make a QTIP election, but the estate has unused exemption. Is the executor required to file a return to elect portability? The Oklahoma Supreme Court affirmed a trial court's order compelling the executor to file a federal estate tax return and elect portability, notwithstanding a prenuptial agreement waiving inheritance rights (but not referring to portability).[2032]

II.H.2.b. Basis Step-Up for All Property When First Spouse Dies

Consider using community property or a marital estate trust.

II.H.2.b.i. Community Property

Community property receives a new basis for both spouse's halves when the first spouse dies.[2033] This rule applies whether the property is held as an individual or through a joint revocable trust that constitutes community property under applicable state law.[2034] Beware,

---

[2030] Code § 2044.
[2031] Code § 2207A.
[2032] *Estate of Vose*, 2017 WL 167587, --- P.3d ---- (1/17/2017).
[2033] Code § 1014(b)(6).
[2034] Rev. Rul. 66-283, involving the following facts:

> H and W are husband and wife and domiciliaries of the State of California. Under California community property law a husband and wife may by agreement characterize their property as community or separate. Section 158 of the California Civil Code; *Mears v. Mears* (1960) 4 Cal. Rptr. 618; *Tomaier v. Tomaier* (1944) 146 P.2d 905. Under California law, community property may also be held by a trustee without losing its character as such. *Berniker v. Berniker* (1947) 182 P.2d 557. In 1958 H and W executed a revocable trust and transferred to it certain property held by them as community property under the laws of California. The trust instrument provides that the property transferred to the trust shall retain its character as community property. Under

however, that converting property to community property may subject it to both spouses' creditors.[2035]

If each spouse is treated as owning one-half of each asset held as community property, valuation discounts would reduce the new basis, relative to what it would have been had the property not been fractionalized.[2036] It has been suggested that, if state law or the trust

---

> the terms of the trust, H and W, as long as both are alive, may at any time alter, amend or revoke the trust in whole or in part, provided that any part of the trust estate so withdrawn shall be transferred to H and W as community property. The net income from the trust is community property, and is to be paid to or applied for the benefit of the grantors.
>
> Upon the death of either H or W, the trust estate is to be divided into two equal shares, each to be held and administered as a separate trust. One share is to consist of the community interest of H, and the other of the community interest of W. During the lifetime of the survivor, the trustee is to pay to the survivor all of the net income from his or her share, and to pay to the survivor and another designated beneficiary the net income from the decedent's share. The trust consisting of the community interest of the decedent is to be irrevocable, but the trust consisting of the survivor's community interest may be altered, amended, or revoked by the survivor at any time.

It held:

> In this case, one-half of the value of the community interest in the property held in the revocable trust is includible under sections 2033, 2036(a)(1), and 2038(a)(1) of the Code in determining the value of the gross estate of the first spouse to die, because both spouses had retained for their lives the right to the income from the community property held in the trust and possessed at the date of the decedent spouse's death a power to alter, amend or revoke the trust. The property which represents the surviving spouse's one-half interest in the community property held in the revocable trust is considered under section 1014(b)(6) of the Code to have been acquired from or to have passed from the decedent and, accordingly, its basis is determined under the provisions of section 1014(a) of the Code.

[2035] See part III.B.5.e.iv.(a) Imposition of the Estate Tax Lien.

[2036] *Propstra v. U.S.*, 680 F.2d 1248 (9th Cir. 1982) (15% discount under California law; valuing separately was the issue – amount of discount was not challenged). In upholding the taxpayer's legal arguments that valuation discounts applied to each half, *Estate of Bright v. U.S.,* 658 F.2d 999 (5th Cir. 1981), held:

> First, the government argues that the property to be valued for estate tax purposes is an undivided one-half interest in the control block of 55% of the stock, and that the proper method of valuation would be to value the 55% control block, including a control premium, and then take one-half thereof. Both parties agree that the estate tax is an excise tax on the transfer of property at death, and that the property to be valued is the property which is actually transferred, as contrasted with the interest held by the decedent before death or the interest held by the legatee after death. *United States v. Land*, 303 F.2d 170 (5th Cir. 1962). See also *Ithaca Trust Co. v. United States*, 279 U.S. 151, 49 S.Ct. 291, 73 L.Ed. 647 (1929); *Edwards v. Slocum*, 264 U.S. 61, 44 S.Ct. 293, 68 L.Ed. 564 (1924); *Connecticut Bank and Trust Company v. United States*, 439 F.2d 931 (2nd Cir. 1971); *Walter v. United States*, 341 F.2d 182 (6th Cir. 1965); *Commissioner v. Chase Manhattan Bank*, 259 F.2d 231 (5th Cir. 1958). Both also agree that state law, Texas in this case, determines precisely what property is transferred. *Morgan v. Commissioner*, 309 U.S. 78, 60 S.Ct. 424, 84 L.Ed. 585 (1940); *Duncan v. United States*, 247 F.2d 845 (5th Cir. 1957). Both parties agree that, under Texas law, the stock at issue was the community property of Mr. and Mrs. Bright during her life, that Mrs. Bright's death dissolved the community, that upon death the community is divided equally, that each spouse can exercise testamentary disposition over only his or her own half of the community, and that "only the decedent's half is includable in his gross estate for federal tax purposes." *Commissioner v. Chase Manhattan Bank*, 259 F.2d at 239. Under Texas law, upon the division of the community at death, each spouse owns an undivided one-half interest in each item of community property. *Caddell v. Lufkin Land & Lumber Co.*, 255 S.W. 397 (Tex. Com. App., 1923).

agreement has adopted the aggregate theory of community property, one can argue that a partial interest discount does not apply.[2037] One might consider using a community property agreement to govern the rights of all community property, whether or not in trust, which property may include IRAs.[2038]

If residents of a community property state buy real property in that state using common law titling and under that state's law the property retains the community property character of the funds used to buy the property, the real property receives a new basis as to both halves; in that case, the property was titled as joint tenants with right of survivorship and received a basis equal to the property's full value (undiscounted for community property fractional interest).[2039] To avoid proof issues when that occurs,[2040] consider titling using a community property trust.

> In its brief the government argued that, because the interest to be valued was an undivided one-half interest in the full 55% control block, the proper method would be to value the whole, including its control premium, and then take one-half thereof to establish the value of the estate's undivided one-half interest. The estate points out that the government's argument overlooks the fact that the block of stock is subject to the right of partition under Texas law at the instance of either the surviving spouse or the estate of the deceased's spouse. Tex. Prob. Code Ann. § 385 (Vernon 1980). The government has not argued that partition would not be freely granted in a case involving fungible shares, such as this case. Thus, the estate has no means to prevent the conversion of its interest into shares representing a 27½% block, and we conclude that the estate's interest is the equivalent of a 27½% block of the stock. Accordingly, we reject the government's approach of valuing the 55% control block, with its control premium, and then taking one-half thereof. Accord *Estate of Lee v. Commissioner*, 69 T.C. 860 (1978).

The *Bright* dissent was troubled that the legal and not the factual valuation issues were addressed. The dissent portrayed the valuation discount as 50% for illiquidity and unmarketability of minority interest and 23% to take into account term loan agreements, guarantees and pledges that affect the stock's value, for a cumulative 73% discount.

[2037] It has been suggested that Alaska (Sec. 34.77.155), Arizona (ARS §§ 14-3916, 14-10816(22)), and Nevada have adopted the aggregate theory. It has been suggested that one read "The Modified Item Theory: An Alternative Method of Dividing Community Property Upon the Death of a Spouse," 28 Idaho L. Rev. 1047 (1991-1992), for an explanation of the item theory and aggregate theory. I invite readers to email me with citations or any other further information.

One California lawyer commented about California law:

> Technically is an item theory state, based on older case law. It was believed that two living spouses could affirmatively enter into a marital agreement opting out of item theory treatment and establishing different rules governing the division of community property at the first death.
>
> Probate Code § 100 was enacted in 1990 to confirm that this is allowed.
>
> Probate Code § 104.5 was enacted in 1999, which provides that a transfer of community property to revocable trust is presumed to be an agreement pursuant to § 100. The legislative history suggests that the agreement so presumed is that the aggregate theory applies to division, rather than the item theory; but the language in the statute is a little dodgy, stating, "an agreement, for purposes of § 100 …, that those assets retain their character in the aggregate for purposes of any division under the trust." If ability to divide using aggregate theory approach is desired (and who wouldn't want this), the best practice is to explicitly provide in trusts and Wills and not rely on § 104.5.

[2038] See Letter Ruling 199925033.

[2039] Rev. Rul. 87-98; *Estate of Wayne-Chi Young v. Commissioner*, 110 T.C. 297 (1998) (taxpayers failed in their attempt to characterize jointly held property as community property to obtain a discount for property passing to a noncitizen spouse).

[2040] Rev. Rul. 87-98, which ruled in favor of community property status, illustrated this issue:

If spouses owning community property move to a common law state, the property does not lose its community character; similarly, merely moving from a common law state to a community property state does not cause separate property to become community property.[2041]

> D and D's spouse S, residents of community property state X, purchased real property in X with community funds and took title as joint tenants with rights of survivorship. However, D and S later executed joint wills in which they declared the property to be a community asset.
>
> Although X is a community property state, under the laws of X, spouses may hold property in joint tenancy or other common law estate. Because the laws of X do not make specific provision for the coexistence of a common law estate and a community property interest, taking title in a common law estate raises the presumption that the spouses intended to terminate the community interest, effectively transmuting the property's character from community to separate. This presumption is overcome by evidence that the spouses intended for the property not to be transmuted to separate property, in such a case, the community nature of the property is preserved. Under the law of X, an express statement of such intent in joint wills precludes transmutation by reason of taking title in joint tenancy.

Rev. Rul. 87-98 deferred to the state law characterization.

[2041] *Quintana v. Ordono*, 195 So.2d 577 (Fla. App. 3rd D. 1967); Restatement (First) of Conflict of Laws § 290 (1934) ("Interests of one spouse in movables acquired by the other during the marriage are determined by the law of the domicil of the parties when the movables are acquired."); Restatement (Second) of Conflict of Laws § 259 Removal of Movables of Spouses to Another State (A marital property interest in a chattel, or right embodied in a document, which has been acquired by either or both of the spouses, is not affected by the mere removal of the chattel or document to a second state, whether or not this removal is accompanied by a change of domicil to the other state on the part of one or both of the spouses. The interest, however, may be affected by dealings with the chattel or document in the second state.") and Comments a and b thereto:

> a. *Rationale*. Considerations of fairness and convenience require that the spouses' marital property interests in a chattel or right embodied in a document should not be affected by the mere removal of the chattel or document to another state. Likewise these interests are not affected by a change of domicil to another state by one or both of the spouses. Similarly, an interest in a right not embodied in a document that was acquired by either or both of the spouses during the marriage is not affected by a subsequent change of domicil to another state by one or both of the spouses. The rule of this Section is an application of that of § 247.
>
> b. *Dealings with movable upon interests of spouses*. When a chattel or document is taken into a second state and is there exchanged for some other movable or immovable, the spouses acquire the same interests therein as they had in the original chattel or document. Thus, when a husband takes an automobile, which is his alone, from a separate property state to a community property state and then, having sold the automobile, uses the proceeds to purchase a truck, the truck will be the husband's separate property. On the other hand, if the husband had originally held the automobile in community with his wife and had exchanged it for a truck in a separate property state, the wife's interests in the truck would be the same as those she had previously had in the automobile.

Kingma, "Property Division at Divorce or Death for Married Couples Migrating Between Common Law and Community Property States," 35 ACTEC J. 74, 80 (Summer 2009), states:

> With respect to personal property acquired during marriage or coverture, courts held that the law of the marital domicile at the time the property was acquired governs the character of such property and related property rights.[56] Moving from a common law state to a community property state, or vice versa, does not change the character or interests in that property.[57] The Supreme Court of Ohio summarized this rule in Estate of Kessler:[58]
>
> > "It is generally recognized that the character of community property, even though it is personalty, does not change as to the nature of the holding, where the married couple remove themselves from a community-property state to a common-law state. The converse is

Generally, absent an agreement controlling their rights,[2042] whether property is separate property or community property depends on not where the couple was married but rather where they lived when the property was acquired.[2043] In a federal tax case, courts will look to what the governing property law says under local law without speculating whether a court might change its approach, absent a compelling showing that a court would change its approach.[2044]

Letter Ruling 202006002 held that property transferred to an incomplete gift nongrantor trust (ING) retained its community property status. Facts include:

---

also true, that is, the character of property acquired in a common-law state is not altered merely by the removal of the couple to a community-property state."

[56] RESTATEMENT (SECOND) CONFLICT OF LAWS § 258 (1971); 15A Am. Jur. 2d *Community Property* §§ 16-18 (2008); A.M. Swarthout, ANNOTATION, CHANGE OF DOMICILE AS AFFECTING CHARACTER OF PROPERTY PREVIOUSLY ACQUIRED AS SEPARATE OR COMMUNITY PROPERTY, 14 A.L.R.3d 404 (2008). *See also* Estate of Crichton, 49 Misc.2d 405, 408-09 and 412-13, 267 N.Y.S.2d 706 (1966) (providing that when spouses have separate domiciles, conflict-of-law rules provide that the law of the state of domicile of the spouse who acquired the personal property controls as to the ownership of the property).

[57] RESTATEMENT (SECOND) CONFLICT OF LAWS § 259 (1971). However, marital property interests may be affected by subsequent dealings with such property in the second state. *Id.*

[58] Estate of Kessler, 177 Ohio St. 136, 138, 203 N.E.2d 221 (1964). For additional authorities regarding spouses migrating to a common law state from a community property state, *see* the treatises and case law cited in Rev. Rul. 72-443, 1972-2 C.B. 531.

[2042] *Estate of Charania v. Commissioner*, 133 T.C. 122 (2009), stated:

Although they resided in Belgium for 30 years, decedent and Mrs. Dhanani did not take the steps available under Belgian law to change their marital property regime, and there is no other evidence of their intention, before the date of death, to change the character of their property. The parties have not cited, and we have not found, any authorities that determine the nature of property without regard to intent, expressed or implied, according to the law applicable at the time of the marriage.

We conclude that under English law, applied pursuant to Belgian conflict of laws principles, all of the shares of Citigroup stock were property of decedent taxable in his estate.

[2043] *Estate of Charania v. Commissioner*, 608 F.3d 67 (1st Cir. 2010), stated:

The question of which jurisdiction's marital property regime should prevail after spouses have changed their domicile is a recurring one in conflict of laws analysis. In the United States, courts have tended to favor the doctrine of mutability. See, *e.g.*, *United States v. ITT Consumer Fin. Corp.*, 816 F.2d 487, 490 (9th Cir. 1987); *Saul v. His Creditors*, 5 Mart. (n.s.) 569 (La. 1827). The primary rationale undergirding this approach is that the jurisdiction in which a couple was domiciled at the time of the acquisition of property has the most significant interest in both the spouses and the property. See *Restatement (Second) of Conflict of Laws* § 258. In continental European countries, the doctrine of immutability is favored. See Dicey, Morris & Collins, *The Conflict of Laws* 1295 (14th ed. 2006); Friedrich K. Juenger, *Marital Property and the Conflict of Laws*, 81 Colum. L. Rev. 1061, 1061–62 (1981). Champions of the immutability doctrine tout its ease of administration and the desirability of applying a single marital property regime to the entire inventory of a couple's personal property. See, *e.g.*, Ernest G. Lorenzen, The French Rules of the Conflict of Laws, 38 Yale L.J. 165, 177 (1928); J. Thomas Oldham, What if the Beckhams Move to L.A. and Divorce?, 42 Fam. L.Q. 263, 264–65 (2008).

[2044] *Estate of Charania v. Commissioner*, 608 F.3d 67 (1st Cir. 2010), stated:

We do not presume to decide that England's highest court, if asked either to reexamine *De Nicols* or to apply it to somewhat different facts, would necessarily hold firm to the rule of immutability. That sort of prediction is beyond our proper purview. We are, however, bound to adhere to the rule of *De Nicols* absent a compelling showing that the English courts would scuttle that rule. No such showing has been made here.

> Grantors are married and reside in State 2, a community property state. Trust provides that all property transferred to Trust is community property. Moreover, any and all property transferred to Trust prior to the death of the first Grantor to die (the Predeceased Grantor) is and shall retain its character as community property…
>
> Any distribution from Trust to either Grantor prior to the death of the Predeceased Grantor will be a distribution of community property. Any distribution of income or principal from Trust to a beneficiary prior to the death of the Predeceased Grantor, whether made by the Power of Appointment Committee, the Trustee, or a Grantor's exercise of the powers retained by Grantors will be a distribution of community property.
>
> With respect to the lifetime powers of appointment retained by Grantors, prior to the death of the Predeceased Grantor, any such appointment by Grantor of the principal of Trust will be funded equally from each Grantor's share of community property. Each Grantor consents to all distributions by the other Grantor.

Letter Ruling 202006002 ruled:

> Accordingly, based on the facts submitted and the representations made, we conclude that the contribution of property to Trust by either Grantor is not a completed gift subject to federal gift tax. Any distribution from Trust to either Grantor prior to the death of the Predeceased Grantor is a distribution of community property. Any distribution from Trust to either Grantor is merely a return of each Grantor's property. Therefore, we conclude that any distribution of property from Trust by the Power of Appointment Committee to either Grantor will not be a completed gift subject to federal gift tax, by any member of the Power of Appointment Committee. Further, upon the Predeceased Grantor's death, the fair market value of the Predeceased Grantor's interest in Trust is includible in the Predeceased Grantor's gross estate for federal estate tax purposes. Moreover, upon the Surviving Grantor's death, the fair market value of the balance in Trust is includible in the Surviving Grantor's gross estate for federal estate tax purposes….
>
> Based upon the facts submitted and representations made, we conclude that any distribution of property by the Power of Appointment Committee from Trust to any beneficiary of Trust, other than Grantors, will not be a completed gift subject to federal gift tax, by any member of the Power of Appointment Committee. Further, we conclude that any distribution of property from Trust to a beneficiary other than Grantors will be a completed gift by Grantors. Trust provides that all distributions of the net income or principal prior to the death of the Predeceased Grantor, whether made by the Power of Appointment Committee, the Trustee or a Grantor's exercise of the powers retained by such Grantor, to a beneficiary is and shall be a distribution out of community property. Accordingly, distributions to beneficiaries, other than Grantors, will be gifts made one-half by each Grantor. Finally, we conclude that the powers held by the Power of Appointment Committee members are not general powers of appointment for purposes of § 2041(a)(2) and, accordingly, the possession of these powers by the Power of Appointment Committee members will not cause Trust property to be includible in any Committee member's gross estate under § 2041(a)(2)….
>
> Grantors are married and reside in State 2, a community property state. Trust provides that all transferred property to Trust is community property. Moreover, any and all property transferred to Trust prior to the death of the Predeceased Grantor shall be a distribution of community property. As concluded above, upon the death of each

> Grantor, his or her respective interest in Trust as either the Predeceased Grantor or the Surviving Grantor will be includible in his or her respective gross estate for federal estate tax purposes.
>
> Accordingly, based upon the facts submitted and representations made, we conclude that the basis of all community property in Trust on the date of death of the Predeceased Grantor will receive an adjustment in basis to the fair market value of such property at the date of death of the Predeceased Grantor.

II.H.2.b.ii. Marital Estate Trust

In a common law state, consider a marital estate trust.[2045] H creates a trust for W, with discretionary distributions to W. On W's death, the trust passes to W's estate. If H terminates the trust before W's death, the trust goes outright to W. The trust qualifies for the marital deduction because it cannot pass to anyone other than W.[2046] The gift is completed because the beneficiary is known with certainty.[2047] The trust is includible in H's estate under Code § 2038[2048] and in W's estate as an asset. Thus, it gets a new basis at the death of the first to go of H or W.[2049] Note, however, that a reverse-QTIP election[2050] would not be available to preserve H's GST exemption with respect to this trust.

To avoid probate delays, consider putting all of the trust's assets into one or more single-member, manager-managed LLCs. That way, the successor manager can step up and manage assets regardless of the timing of an executor/personal representative being appointed.

II.H.2.c. QTIP Trusts - Code § 2519 Trap

If the spouse makes a disposition of all or part of a qualifying income interest for life in a QTIP trust, he or she is treated gift and estate tax purposes as transferring all interests in property other than the qualifying income interest.[2051] Thus, the spouse is treated as making a gift under Code § 2519 of the entire trust less the qualifying income interest, and is treated for purposes of Code § 2036 "as having transferred the entire trust corpus, including that portion of the trust

[2046] Reg. §§ 25.2523(b)-1(a)(2) (gift tax), 20.2056(b)-1(c)(1) (estate tax).
[2047] Reg. § 25.2511-2(d).
[2048] Reg. § 20.2038-1(a), which includes the following statement:

> For example, section 2038 is applicable to a power reserved by the grantor of a trust to accumulate income or distribute it to A, and to distribute corpus to A, even though the remainder is vested in A or his estate, and no other person has any beneficial interest in the trust.

Note that, because the income and principal are discretionary, the Code § 2038 power extends to both income and principal and the basis change is plenary. For more on Code § 2038, see part III.D Code § 2038.
Make the grantor's exercise of the power exercisable alone, to avoid the protection from Code § 2038 described in fn 7483 and the accompanying text in part III.D Code § 2038.
[2049] Reg. § 1.015-1(c) provides, "The date that the donee acquires an interest in property by gift is when the donor relinquishes dominion over the property and not necessarily when title to the property is acquired by the donee." Query whether the IRS might argue that H's authority to terminate the trust means that H continues to have dominion over the property, thereby triggering Code § 1014(e) on W's death, even though for gift tax purposes H has relinquished dominion and control.
Code § 1014(b)(3) is among the grounds for including it in H's estate.
[2050] Code § 2652(a)(3).
[2051] Code § 2519; Reg. § 25.2519-1(a).

corpus from which the retained income interest is payable."[2052] Bramwell and Madden, "Toggling Gross Estate Inclusion On and Off: A Powerful Strategy," *Estate Planning Journal* (3/2017),[2053] point out:

> To be sure, the surviving spouse is deemed to be the transferor of the QTIP property for estate tax purposes. Thus, if the surviving spouse is deemed to have retained (or, in the case of Section 2038, to have possessed at his or her death) any of the rights or powers described in Sections 2036 or 2038, the trust principal could be included in the surviving spouse's gross estate at death. With proper planning, however, it should be possible to avoid that result, if desired.
>
> To begin, it is well-established that a decedent's mere eligibility to receive distributions from an independent trustee, and nothing more, does not cause property transferred during lifetime to be included in the gross estate under Section 2036(a)(1) or 2038.[74] If the transferred property was subject to claims of the decedent's creditors, then the decedent is considered to have retained powers over the transferred property described in Sections 2036(a) and 2038.[75] But a transfer under Section 2519 is a deemed transfer purely for tax purposes; it is not a transfer at all for state law purposes, or a transfer in trust that might otherwise be void as against creditors. On the contrary, after a beneficiary of a QTIP trust assigns the right to income but retains a discretionary interest in principal, the spouse who created the trust remains the settlor of the trust for state law purposes.
>
> > [74] *Uhl*, 241 F.2d 867 50 A.F.T.R. 1746 (CA-7, 1957); *German*, 7 Ct. Cl. 341 55 A.F.T.R.2d 85-1577 (1985); Rev. Rul. 76-103, 1976-1 CB 293; Rev. Rul. 2004-64, 2004-2 CB 7; Ltr. Rul. 200944002.[2054]
> >
> > [75] Rev. Rul. 76-103, supra note 74; Ltr. Rul. 200944002.[2055]
>
> In other words, for tax purposes, although the surviving spouse is deemed to have transferred principal for his or her own benefit, the trust is not a self-settled trust for state law purposes and, therefore, cannot be void as against the creditors of the beneficiary spouse. Consequently, the beneficiary spouse may trigger a deemed transfer of principal under Section 2519, continue to hold a discretionary interest in principal, and have the principal protected against claims of the beneficiary's creditors under standard spendthrift provisions. Creditors' rights doctrine, therefore, does not cause the principal of the trust to be included in the spouse's gross estate under Section 2036(a)(1).
>
> Section 2036(a)(1) can also apply where there was an agreement, express or implied, that the decedent would retain the right to income or the beneficial enjoyment from the transferred property.[76] Thus, courts have found an implied understanding to exist and pulled transferred property back into a decedent's gross estate at death, where the decedent, although he or she did not retain any legal right to the property, was in actual

Rul. 2004-64 is discussed in fns. 6961-6980, found in part III.B.2.j.iv.(a) Grantor Trust Reimbursing for Tax Paid by the Deemed Owner. Letter Ruling 200944002 is also discussed in part III.B.2.h.iii Swap Power.
[2055] See part III.B.2.c.i Completed Gift to Self-Settled Trust.

possession of, or was actually enjoying, the transferred property.[77] For a number of reasons, however, it seems that, in the case of a deemed transfer under Section 2519, it would be difficult for the IRS to establish that there was an implied understanding that the trustee would thereafter make discretionary principal distributions.

[76] Reg. 20.2036-1(c)(1)(i); see also Rev. Rul. 2004-64, supra note 74; Ltr. Rul. 200944002.[2056]

[77] *Linderme*, supra note 23;[2057] *Guynn*, 437 F.2d 1148 27 A.F.T.R.2d 71-1653b (CA-4, 1971);[2058] *Estate of Maxwell*, 3 F.3d 591 72 A.F.T.R.2d 93-6733 (CA-2, 1993);[2059] *Reichardt*, 114 TC 144 (2000);[2060] *Estate of Kerdolff*, 57 TC 643 (1972); *Paxton*, supra note 23.[2061]

For one thing, the transfer of principal under Section 2519 is purely notional. There is no actual transfer of property with respect to which an understanding, express or implied, regarding distributions could even arise. Indeed, the spouse may trigger a deemed transfer under Section 2519 without even communicating with the trustee. The deemed transfer could even occur at a time when no trustee authorized to make principal distributions is even serving. Thus, with proper planning, the risk of gross estate inclusion under Section 2036(a)(1), following a deemed transfer under Section 2519, seems to be minimal. Possibly, the spouse could receive even liberal distributions of principal without causing the QTIP trust property to be included in the spouse's gross estate at death.

In short, by incorporating toggling provisions, the couple can make it possible for the surviving spouse to be deemed to have made a taxable gift of QTIP property that, similar to the credit shelter trust, uses up the first decedent's exclusion. Just as with a credit shelter trust, the QTIP property, including appreciation after the date of the gift, should pass outside of the surviving spouse's gross estate at death. Meanwhile, the surviving spouse continues to be eligible to receive distributions of principal. The QTIP trust, after the deemed transfer under Section 2519 occurs, essentially functions like a credit shelter trust.

Toggling gross estate inclusion back on. Now suppose that, having triggered Section 2519 in order to cause QTIP trust property to pass outside of his or her gross estate, the surviving spouse decides that the trust property should be pulled back into his or her gross estate after all. For example, it may be that the combined value of the QTIP trust plus the surviving spouse's other assets is less than the surviving spouse's applicable exclusion amount (including the exclusion amount inherited from the first decedent). In that case, the surviving spouse's family may be better off obtaining a step-

up in basis under Section 1014(a). Another possible reason for preferring gross estate inclusion may be that, following the deemed gift under Section 2519, the value of the QTIP trust principal has declined in value. In that situation, it would be preferable, as discussed at the outset of this article, for the deemed gift to be purged from the estate tax base and for trust principal to be included in the surviving spouse's gross estate at its reduced value.[78]

> [78] It would seem that only the deemed gift of principal is purged from the estate tax base under Section 2001(b), but not the gift of income. The value of the gift of an income interest, however, may be discounted to reflect its possible divestment or curtailment, by virtue of the trustee's power to pay out principal. *Cf*. Rev. Rul. 75-550, supra note 70 (valuing an income interest at a discount to reflect all possible invasions of principal); see also Rev. Rul. 67-370, 1967-2 CB 324.[2062]

Thanks to the toggling provisions of the QTIP trust, it should be possible to turn gross estate inclusion back on. Specifically, the independent trustee can exercise a power to confer on the surviving spouse a special testamentary power of appointment. Such a power, once conferred, will cause the QTIP property to be pulled back into the surviving spouse's gross estate under Section 2038(a), as the surviving spouse is the deemed transferor of principal for estate tax purposes under Section 2519. As a result, the QTIP trust principal should be included in the surviving spouse's gross estate, the deemed Section 2519 gift should be eliminated from the transfer tax base under Section 2001(b), and the QTIP trust principal should qualify for a change in basis under Section 1014.[79]

> [79] There is some uncertainty as to whether a deemed transfer under Section 2519, followed by gross estate inclusion under one of the "string" sections of the Code, will successfully cause the property included in the gross estate to qualify for a change in basis under Section 1014(b)(9). For further discussion of this issue, see Bramwell and Socash, "Preserving Inherited Exemption: The New Planning Frontier," 50 *Real Property, Trust and Estate Law J.* 1 (Spring 2015).

Unique advantages of QTIP toggling. As discussed previously, there is some risk, with Section 2038 toggling planning, that the grantor will be deemed to hold Section 2038 powers de facto, in which case, gross estate inclusion would not be possible to avoid. But with a deemed Section 2519 transfer, the risk of the surviving spouse being treated as holding the trustee's powers is minimal, and perhaps even nonexistent. The reason, once again, is that a deemed Section 2519 transfer is purely notional. As noted above, the surviving spouse could trigger Section 2519, conceivably, without any prior communication with the independent trustee. Thus, there is little chance that the IRS would be able to infer some kind of prearrangement or informal understanding between the surviving spouse and the independent trustee.

Indeed, if anything, the opposite problem arises, namely, that the IRS will not respect the conferred special power of appointment as a valid gross estate inclusion trigger under Section 2038(a). As support for denying gross estate inclusion, the IRS could look to the decisions in cases holding that Section 2038 does not apply if the grantor made a complete disposition of his or her interest in property, and an otherwise taxable power later returned to the grantor in an unrelated transfer. In *Estate of Reed*,[80] for example,

[2062] [my footnote] Rev. Rul. 67-370 is excerpted in the text accompanying fn 6366 in part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts.

the decedent had made a gift of shares to his daughter through a Uniform Gifts to Minors Act account; after the custodianship terminated, the daughter then reconveyed the property to the decedent as trustee for her benefit. The court held that Section 2038 did not apply, because the decedent made a complete disposition of property and the decedent happened to possess control over the property at death only "by a totally unrelated and fortuitous conveyance."[81]

[80] Note 40, *supra*.

[81] See also *Estate of Skifter*, 468 F.2d 699, 30 A.F.T.R.2d 72-5920 (CA-2, 1972); Rev. Rul. 84-179, 1984-2 CB 195.[2063]

Conceivably, on the strength of *Reed* and related cases, the IRS could argue that the independent trustee's decision to confer a special power of appointment on the surviving spouse is an "unrelated and fortuitous conveyance" that does not cause Section 2038 to apply, and so gross estate inclusion is not successfully toggled on. After all, the independent trustee's ability to confer a special power of appointment on the surviving spouse was not created by the surviving spouse herself but existed under the terms of a trust created by the first decedent. In this view, although the surviving spouse is deemed to be the transferor of the trust property for estate tax purposes under Section 2519, that is not enough for him or her to have set in motion the machinery that later caused the surviving spouse to have a special power of appointment at death.

As yet, it is unclear whether this argument will prevail. That said, it does seem to be contrary to the logic and intent of Section 2519. Following a disposition of a qualifying income interest for life in a QTIP trust, that section deems the spouse beneficiary to have made a transfer for all estate and gift tax purposes. Thus, if the surviving spouse retains the right to a portion of the income from the trust property, the property will be included in his or her gross estate under Section 2036(a)(1).[82] By the same logic, with QTIP toggling provisions, the surviving spouse should be deemed to have made a transfer, the terms of which make it possible for a special power to be conferred on him or her, thereby triggering Section 2038 should the special power in fact then be granted to the surviving spouse.

[82] Reg. 25.2519-2(g), Example 4.[2064]

QTIP toggling with GST tax planning. Another advantage of toggling planning with QTIP trusts is that it is compatible with GST tax planning. Specifically, the first decedent's executors may make a "reverse" QTIP election under Section 2652(a)(3) and allocate the first decedent's GST exemption to the trust. Even if the surviving spouse later toggles gross estate inclusion off by assigning the income interest, the first decedent will continue to be treated as the transferor of the QTIP principal for GST tax purposes.[83] Thus, the surviving spouse will not need to allocate any of his or her own GST exemption in order for the QTIP property to preserve its exemption from GST tax.

[2063] [my footnote] Both authorities are discussed in part II.Q.4.i.ii.(a) Trust Ownership of Policy.
[2064] [my footnote] The citation appears to be to Reg. § 25.2519-1(g), Example (4), which is reproduced below.

> [83] Reg. 26.2652-1(a)(3).[2065]
>
> In addition, although it is not certain, it seems that the first decedent rather than the surviving spouse should be considered the transferor for GST tax purposes of the income paid over to the donees of the income interest.[84] Thus, if the income interest is assigned to skip persons or to a trust for the benefit of skip persons, the income should be protected from GST tax by the first decedent's GST exemption. Even if the surviving spouse is considered the transferor of trust income for GST tax purposes, it seems that the value of the gift of the income interest would be small compared to the value of the QTIP trust as a whole. Consequently, very little of the surviving spouse's GST exemption should need to be allocated to the gift in order to protect it from GST tax.

See parts III.C Code § 2036 and III.D Code § 2038.

Reg. § 25.2519-1(g), Example (3), "Transfer of income interest in trust subject to partial election," provides:

> D's will established a trust valued for estate tax purposes at $500,000, all of the income of which is payable annually to S for life. After S's death, the principal of the trust is to be distributed to D's children. Assume that only 50 percent of the trust was treated as qualified terminable interest property. During 1995, S makes a gift of all of S's interest in the trust to D's children at which time the fair market value of the trust is $400,000 and the fair market value of S's life income interest in the trust is $100,000. Pursuant to section 2519, S makes a gift of $150,000 (the fair market value of the qualified terminable interest property, 50 percent of $400,000, less the $50,000 income interest in the qualified terminable interest property). S also makes a gift pursuant to section 2511 of $100,000 (*i.e.*, the fair market value of S's life income interest).

Reg. § 25.2519-1(g), Example (4), "Transfer of a portion of income interest in trust subject to a partial election," provides:

> The facts are the same as in Example 3 except that S makes a gift of only 40 percent of S's interest in the trust. Pursuant to section 2519, S makes a gift of $150,000 (i.e., the fair market value of the qualified terminable interest property, 50 percent of $400,000, less the $50,000 value of S's qualified income interest in the qualified terminable interest property). S also makes a gift pursuant to section 2511 of $40,000 (i.e., the fair market value of 40 percent of S's life income interest). See also section 2702 for additional rules that may affect the value of the total amount of S's gift under section 2519 to take into account the fact that S's 30 percent retained income interest attributable to the qualifying income interest is valued at zero under that section, thereby increasing the value of S's section 2519 gift to $180,000. In addition, under §25.2519-1(d), S's disposition of 40 percent of the income interest is deemed to be a transfer of a pro rata portion of the qualified terminable interest property. Thus, assuming no further lifetime dispositions by S, 30 percent (60 percent of 50 percent) of the trust property is included in S's gross estate under section 2036 and an adjustment is made to S's adjusted taxable gifts under section 2001(b)(1)(B). If S later disposes of all or a portion of the retained income interest, see § 25.2702-6.

[2065] [my footnote] Reg. § 26.2652-1(a)(3) is reproduced in the text accompanying fn 6405 in part III.B.1.d.iii Who Is the Transferor.

Code § 2702 applies in valuing the gift made by the spouse under Code § 2519.[2066] However, litigation might cause the transfer not to be a gift.[2067]

However, if a reverse QTIP election is made, the application of Code § 2519 would not change the trust's GST attributes.[2068]

Unless the spouse establishes to the contrary, Code § 2519 applies to the entire trust at the time of the disposition.[2069] One can avoid this result by dividing the trust, so that Code § 2519 applies only to the trust that was severed and is subject to that gift.[2070] To understand *Estate of Virginia V. Kite v. Commissioner*, T.C. Memo. 2013-43, a Code § 2519 case involving trust termination, one should read Steve Akers' summary.

A renunciation may be appropriate to preserve DSUE if the surviving spouse remarries or to preserve the surviving spouse's lifetime gift/estate tax exemption if it is scheduled to decrease. For advantages and disadvantages of these ideas, see part II.H.12.a Taxable Gifts of Property Included in the Donor's Estate.[2071]

The exercise by any person of a power to appoint property to the spouse is not treated as a disposition under Code § 2519, even though the spouse subsequently disposes of the appointed property.[2072] Thus, distributing the property to the spouse, free from trust, might be the only way to remove the future possible application of Code § 2519.

Rev. Rul. 98-8 held that, if a surviving spouse acquires the remainder interest in a QTIP trust by transferring property or cash to the holder of the remainder interest, the surviving spouse makes a gift equal to the greater of (i) the value of the remainder interest under Code § 2519), or (ii) the value of the property or cash transferred to the holder of the remainder interest under

---

[2066] Reg. § 25.2519-1(a). Code § 2036 scenarios are discussed in Example (4) and Example (5) of Reg. § 25.2519-1(g).

[2067] FSA 199916025 described what happened when H, the surviving spouse, quarreled with S, the son of marriage to the deceased grantor:

> Although the inter vivos disposition of the qualifying income interest under section 2511 may be characterized as a transfer of property made in the ordinary course of business under Treas. Reg. § 25.2512-8, that does not affect the application of section 2519.
>
> The facts and documents provided indicate that there was animosity between H and S. Litigation was pending, pleadings were filed, temporary restraining orders were obtained, and negotiations ensued. Based on the facts presented, it appears that the transfers were free from donative intent, and the transfers may have been at arm's length and bona fide due to the acrimonious relationship. Without further factual development, we do not believe H made a gift of the qualifying income interest under section 2511 and express no opinion whether the terms of the marital trust satisfied the requirements of section 2056(b)(7)(B).

[2068] See text accompanying and following fn 6405 in part III.B.1.d.iii Who Is the Transferor.

[2069] Reg. § 25.2519-1(b).

[2070] See Letter Ruling 202116001 and 202146001 (divisions followed promptly by complete termination of spouse's interest; the latter was more thorough); see also Letter Ruling 201426016 and various others cited in Zaritsky, ¶ 6.03[3][g] Making Gifts from QTIP Funds, *Tax Planning for Family Wealth Transfers During Life: Analysis With Forms* (WG&L). See also Letter Ruling 201946009, in which a QTIP trust with a one inclusion ratio was divided and the spouse made a nonqualified disclaimer that accelerated the remaindermen. In Letter Ruling 201536010, the marital trust was divided, and the surviving spouse made a nonqualified disclaimer as a net gift that accelerated the remaindermen.

[2071] See text accompanying and following fn 2255.

[2072] Reg. § 25.2519-1(e).

Code §§ 2511 and 2512.[2073] Letter Ruling 199908033 asserted that the remaindermen's consent to terminating a QTIP trust such that the surviving spouse received all of the property without restriction, without receiving consideration for that consent, constitutes a gift of their remainder interest.

In a second marriage situation, note that any inter vivos gift by the surviving spouse would be detrimental to the surviving spouse, if the surviving spouse has a taxable estate. For example, suppose the estate and lifetime gift tax exemption is $5M, estate tax is 40%, the surviving spouse has a $5M estate of her own and a QTIP life estate in a $1M asset. Suppose the spouse considers buying the remaindermen's interest for its $400K actuarial value. If the surviving spouse had not done anything, the surviving spouse's taxable estate would have been $6M ($5M own assets pays $1M QTIP asset), generating a $400K estate tax (40% multiplied by the $1M excess of $6M estate over $5M exemption), all of which is payable out of the QTIP assets under Code § 2207A(a). If the surviving spouse buys the remaindermen's interest, then she is deemed to have made a $400K taxable gift (paying no gift tax because of her lifetime gift tax exemption)[2074] and has $5.6M assets remaining ($6M own assets plus $1M former QTIP assets minus $400K paid to remaindermen and her estate will have to pay the $400K estate tax (based on a $4.6M exemption after using up $400K of her exemption on the deemed gift, leaving her estate of $5.6M being $1M over her $4.6M exemption, which $1M excess is taxed at 40%). Thus, by buying the remainder, she has shifted $400K estate tax from the remaindermen to the beneficiaries of her estate. For income tax consequences, see part II.J.18.d Trust Commutations.

If avoiding Code § 2519 is important, one might also consider applying for relief under Rev. Proc. 2016-49 if the QTIP election was unnecessary.

II.H.2.d. Caution re: Depreciable Property Held in a Nongrantor Trust That Is Included in the Grantor's, Surviving Spouse's, or Other Beneficiary's Estate

Suppose property receives a basis adjustment because it is "acquired from the decedent by reason of death, form of ownership, or other conditions (including property acquired through the exercise or non-exercise of a power of appointment), if by reason thereof the property is required to be included in determining the value of the decedent's gross estate."[2075] If the property is acquired before the death of the decedent, that basis adjustment is reduced by the amount allowed to the taxpayer as deductions in computing taxable income for depreciation, amortization, depletion, etc. on such property before the decedent's death.[2076] Note that, if and to the extent that the trust is a grantor trust with respect to those deductions, the trust is not the taxpayer to whom the deductions are allocated, so this basis adjustment would not apply regarding those deductions.

I am uncertain how this rule might apply to marital deduction trusts when the surviving spouse dies. The property is eligible for a new basis.[2077] Presumably only the depreciation allocated to

---

[2073] Rev. Rul. 98-8 is reproduced in the text accompanying fn 2978 in part II.J.18.d Trust Commutations.
[2074] If she had used up her gift tax exemption before the transaction, the remaindermen would have had to pay the gift tax. Code § 2207A(b).
[2075] Code § 1014(b)(9).
[2076] Code § 1014(b)(9). See Reg. § 1.1014-6.
[2077] Code § 1014(b)(10).

the remaindermen would be subject to this rule; that allocation occurs only if the trustee maintained a reserve for depreciation and the trust is not a grantor trust.[2078]

Reg. § 1.014-6(a)(1) provides (highlighting added):

> The basis of property described in section 1014(b)(9) which is acquired from a decedent prior to his death shall be adjusted for depreciation, obsolescence, amortization, and depletion allowed the taxpayer on such property for the period prior to the decedent's death.

Reg. § 1.014-6(c) provides (highlighting added):

> As stated in paragraph (a) of this section, section 1014(b)(9) requires a reduction in the uniform basis of property acquired from a decedent before his death for certain deductions allowed in respect of such property during the decedent's lifetime. In general, the amount of the reduction in basis required by section 1014(b)(9) shall be the aggregate of the deductions allowed in respect of the property, but shall not include deductions allowed in respect of the property to the decedent himself. In cases where, owing to the operation of the estate tax, only a part of the value of the entire property is included in the decedent's gross estate, the amount of the reduction required by section 1014(b)(9) shall be an amount which bears the same relation to the total of all deductions (described in paragraph (a) of this section) allowed in respect of the property as the value of the property included in the decedent's gross estate bears to the value of the entire property.

Reading both regulations together, if someone other than the decedent who death triggers the basis step-up is the deemed owner of a grantor trust, any reduction in basis from depreciation deductions allowed to the deemed owner would not be preserved by this rule (in other words, basis step-up eliminates the related accumulated depreciation).

II.H.2.e. IRD Assets Not Eligible for a Basis Step-Up

Property which constitutes a right to receive an item of income in respect of a decedent (IRD) under Code § 691 does not receive a basis step-up.[2079]

For whether property constitutes IRD, see part II.Q.4.e.i Life Insurance Basis Adjustment on the Death of an Owner Who Is Not the Insured, fns. 4434-4442.

Before Code § 691 was enacted,[2080] *Estate of Enright v. Helvering*, 312 U.S. 636 (1941), held that, when a partnership agreement provides for "the termination of the partnership on the death

[2079] Code § 1014(c).

[2080] Bittker & Lokken, *Federal Taxation of Income, Estates, and Gifts* (WG&L), ¶ 84.1.1 Introductory (part of ¶ 84.1 Income in Respect of Decedents (IRD)), comments:

> … Congress intervened in 1934 to require a decedent's final tax return to include "amounts accrued up to the date of his death if not otherwise properly includible in respect of such period or a prior period."[4] Congress did not define the term "amounts accrued up to the date of…death," but it did not intend to change the status of appreciated assets, which continued to get a stepped-up basis equal to their date of death values. Thus, the 1934 legislation equated cash and accrual basis

of any partner and that his estate should have his partnership percentage in the 'net monies then in the treasury of the firm, plus his like percentage in the outstanding accounts and the earned proportion of the estimated receipts from unfinished business,'" the deceased partner's final individual income tax return had to include those earnings. Presumably, any such earnings not appearing on the K-1 taxable to decedent under current law would be IRD taxable on the estate's fiduciary income tax return that reports K-1 income representing such earnings.

Willging v. United States, 474 F.2d 12 (9th Cir. 1973), which did not cite Code § 691 but addresses similar principles, is short enough to reproduce almost in full:

> Mrs. Willging and her husband were wheat farmers, owning community property, and reporting their income on the accrual basis. To determine their income for each year, they would add to the sales price of products sold during the year the value of their closing inventory and would subtract from this figure the value of their opening inventory. Treas. Reg. § 1-61-4. Inventories were valued under the "farm price" method (market price less direct costs of disposition), Treas. Reg. § 1.471-6; expenses were deducted in the year in which they were incurred. Treas. Reg. § 1.162-12.
>
> The value of the Willging's opening grain inventory for 1966 was $1,195. On November 15, 1966, Mr. Willging died. At that time the value of the grain inventory was $37,953.98. The grain had the same value at the end of the year.
>
> Mrs. Willging contends that the entire increase in the value of the 1966 crop inventories between the first of the year and November 15 escapes taxation because Int. Rev. Code of 1954, § 1014, stepped up the basis of the grain to its market value on the death of her husband. In the alternative, she argues that the half of the crop which vested in her on November 15 by virtue of the community-property laws escapes taxation.
>
> The basic thrust of Mrs. Willging's first argument is that accrual-basis farmers should be treated the same as cash-basis farmers. A cash-basis farmer who dies owning an appreciated inventory is not taxable on the unrealized appreciation. Nor does his spouse take over a potential tax liability, for she receives upon his death a stepped-up basis under § 1014(b)(1). Rev. Rul. 58-436, 1958-2 Cum. Bull. 366. If the property is owned by the community (in a community-property state) there is still no realization upon the death of one spouse. The surviving spouse is entitled to a stepped-up basis under

---

taxpayers with respect to "amounts accrued" but created a fundamental disparity between items encompassed by this amorphous term and other types of property inherited from the decedent….

[4] Revenue Act of 1934, Pub. L. No. 216, § 42, 48 Stat. 680, 694.

Before the impact of *Enright's Estate* could be fully digested, Congress abandoned the accrual approach of the 1934 legislation because "hardship results in many cases from including in the income from the decedent's last taxable period amounts which ordinarily would be receivable over a period of several years."[7] Instead of restoring the status quo ante, Congress, in 1942, enacted the statutory predecessor of § 691, requiring "income in respect of decedents" - a new but undefined statutory term - to be reported by a decedent's estate or other successor in interest on collecting the claim and permitting estate tax allocable to the collected item to be deducted.[8]

[7] S. Rep. No. 1631, 77th Cong., 2d Sess., reprinted in 1942-2 CB 504, 580.

[8] Revenue Act of 1942, Pub. L. No. 753, § 134, 56 Stat. 798, 830–831. See *Richardson v. US*, 294 F2d 593 (6th Cir. 1961), *cert. denied*, 369 US 802 (1962) (rejecting claim that statutory predecessor of § 691 was unconstitutional "direct" tax on amounts that became "principal" of decedent's estate on his death).

§ 1014(b)(6) if at least one half of the whole of the community interest in such property was includable in determining the value of the decedent's gross estate.

However, because Mr. Willging elected to be taxed under the accrual method of accounting, the value of the grain was "realized" when it increased his inventory value. No sale was necessary for realization. Mr. Willging's death did not have the effect of accruing items which would not otherwise have been accrued, § 451(b), but it did serve as an occasion (the closing of his tax year) for taxing the income he had received during his last taxable year. Section 1014 does not affect the imposition of this tax. The distinction between the taxation of cash and accrual-basis farmers on death is not fortuitous, but follows directly from the method of accounting used by the respective taxpayers. We see no reason to force the Commissioner to permit all accrual-basis farmers effectively to switch to the cash basis in the year of death*. Cf. United States v. Catto*, 384 U.S. 102, 113-117 (1966).

Only half of the accrued increase in value of the inventories was taxed on the death of Mr. Willging because the other half vested in Mrs. Willging by virtue of the community property laws. Mrs. Willging contends that, even if her husband was properly taxable on his half on the inventory, she is not taxable on her half because the stepped-up basis provided by § 1014(b)(6) for community property is substituted for the beginning-of-the-year inventory value which she would normally use. Mrs. Willging points out that § 1014 applies "except as otherwise provided in this section," § 1014(a), and that the Commissioner makes no contention that the crops represent "income in respect of a decedent," which is excepted from the application of § 1014. §§ 691, 1014(c). She contends that § 1014(b)(6) entitles her to the benefit of a stepped-up basis without the disadvantage of current taxation on the increase in value, although for a noncommunity spouse of an accrual taxpayer this would be impossible. (For § 1014 to apply to a noncommunity spouse, the property is required to have been held by the decedent, and the decedent would have been taxable on the accrued increase.)

Mrs. Willging claims more for § 1014 than Congress intended. We do not rely on the failure of the regulations under which the taxpayer computed her income to refer to the "basis" of the crops involved. "Basis" is a general tax accounting term whose use cannot be so tightly circumscribed. See 85 Harv. L. Rev. 880, 884 (1972). Moreover, the Code recognizes that "basis" is a concept relevant to the computation of inventories, § 1013, and the Commissioner allows cash-basis farmers the step-up denied here although the regulations under which they compute their income make no use of the term "basis." Treas. Reg. § 1.61-4(a).

The real issue in this case is one of realization. Section 1014 operates to exempt unrealized property income from tax on the death of the owner of the property; it does not reach back to income realized before death. Income is realized under an accrual method of accounting "when all the events have occurred which fix the right to receive such income and the amount thereof can be determined with reasonable accuracy." Treas. Reg. § 1.451-1(a). Because of the nature of the market for farm produce, the Commissioner allows farmers to use the increase in inventories as a realizing event. This was the method of accounting chosen by the taxpayer. It follows that § 1014 does not help Mrs. Willging, for, although it may increase her basis, it does so after the income from her crops has been realized. The time of the mechanical computation of income, at the end of the year, is irrelevant. To hold otherwise would be to make the sale of crops the determining event although the taxpayer had adopted a system of accounting which did not distinguish between sale and increase in inventory value. This would constitute a change of accounting method without the consent of the Secretary, proscribed by § 446(e).

We are reinforced in our conclusion by a consideration of the purpose of § 1014(b)(6). Given our holding that tax was due on the income accrued by Mr. Willging in the year of his death, the benefit for which Mrs. Willging contends would be peculiar to community-property taxpayers. Section 1014(b)(6) was designed to equalize the incidence of taxation between community-property and common-law states, not to provide a special benefit to community-property taxpayers. *Stanley v. C.I.R.*, 338 F.2d 434 (9th Cir. 1964); *Bath v. United States*, 211 F.Supp. 368, 370 (S.D. Tex. 1962), *aff'd per curiam*, 323 F.2d 980 (5th Cir. 1963).

The Official Tax Court Syllabus to *Rollert Residuary Trust v. Commissioner*, 80 T.C. 619 (1983), summarized at 619-620:

1. Prior to his death on Nov. 27, 1969, decedent was an executive vice president of GM. Shortly before the date of death, GM had tentatively determined to issue bonuses for 1969 to a group of employees, including decedent. However, it was not until Mar. 2, 1970 - more than 3 months after the date of death - that the bonus was formally awarded to decedent. The bonuses were paid under an established deferred compensation plan, with bonuses never having been denied to executive vice presidents and decedent's having received over $300,000 annually in bonuses during the years 1964 through 1968. *Held*, amounts paid pursuant to this postmortem bonus are income in respect of a decedent, because, under the facts of this case, decedent had a right or entitlement to the bonus payments as of the date of his death.

2. GM also awarded decedent bonuses in each of the years 1964 through 1968. These lifetime bonus awards, as well as the postmortem bonus award for 1969, were payable in annual installments, most of which became payable during years subsequent to 1969. Under decedent's will, rights to receive the bonus installments became part of the residue of the estate. The estate distributed to P, the residuary legatee, the rights to receive certain of these installments when paid in years subsequent to the year of distribution. Both the estate and P treated the distribution of the rights as a distribution of the estate's distributable net income, even though the bonus installments would constitute income in respect of a decedent when paid. In the year the rights were distributed, P reported as income under sec. 662(a), I.R.C. 1954, the date-of-distribution fair market values of the rights, and the estate took a corresponding deduction under sec. 661(a), I.R.C. 1954. Under sec. 1.661(a)-2(f), Income Tax Regs., P took the date-of-distribution values as its basis in the rights, and in the subsequent years when the bonus installments were paid to it, P reported as income only the difference between such basis and the amount received. *Held*: Sec. 691, I.R.C. 1954, requires P to report the entire amount of bonus installments paid to it as income in the year when received. P had no basis in the rights to receive income in respect of a decedent because the estate's distribution of these rights to petitioner was not a distribution subject to secs. 661 and 662, I.R.C. 1954.

The court reasoned at 636-638:

> In resolving this case, we must analyze the relationship between the rules of section 691 for the taxation of income in respect of a decedent and those of subchapter J, part I, governing the income taxation of estates. In general, the provisions of subchapter J, part I, are designed to allocate between the estate and its beneficiaries taxable income received by the estate, so that income will be taxed at only one level. For an estate that may accumulate income, such as Mr. Rollert's estate, this general allocation scheme is accomplished through the distribution rules of sections 661 through 663. Section 691 serves a totally different purpose. It is designed to deal with the problem of how to tax income that has been earned but not received by an individual as of the date of his or her death. Under section 691, income that has accrued to a decedent prior to death but has not yet been received is not included in the decedent's final income tax return, even though the right to such income may be included on the estate's estate tax return. Instead, the income is reported when received by the person who actually receives the income. See *Estate of Sidles v. Commissioner*, 65 T.C. 873, 879 (1976), affd. without published opinion 553 F.2d 102 (8th Cir. 1977).
>
> Here, petitioner used the distribution rules of section 662 in an attempt to reduce the income taxed to it under section 691. In effect, what petitioner did here was to report part of the payments of income in respect of a decedent as income under section 662, even before the payments were made by General Motors. When the payments were actually made in subsequent years, petitioner excluded the previously reported amounts from its section 691 income. Because the treatment of payments of income in respect of a decedent in this manner would completely undermine the mandate of section 691 that the recipient of such income report it for the year when received, we agree with respondent that petitioner had no right to reduce its income in respect of a decedent in the year it received the bonus payments by the amounts it had previously reported as income under section 662.
>
> Section 691(a)(1)[9] provides that the amount of all items of income in respect of a decedent shall be included in gross income, for the taxable year when received. This rule applies to income in respect of a decedent received by (A) the decedent's estate if it has acquired from the decedent the right to receive such income; (B) a person who has acquired, by reason of the decedent's death, the right to receive such income if the right to receive such income was not acquired by the decedent's estate from decedent; and (C) a person who has acquired the right to receive the amount by bequest, devise, or inheritance from the decedent, after a distribution by the decedent's estate of such right. See also sec. 1.691(a)-2(a), Income Tax Regs. In this case, subparagraph (A) required Mr. Rollert's estate to include in income amounts received with respect to those rights to bonus installments that it did not distribute to petitioner, and subparagraph (C) required petitioner to include those bonus installments that it received with respect to rights the estate had distributed to it.[10]
>
> [9] Sec. 691(a)(1) provides:
>
> (a) *Inclusion in Gross Income*.
>
> (1) *General Rule*. The amount of all items of gross income in respect of a decedent which are not properly includible in respect of the taxable period in which falls the date of his death or a prior period (including the amount of all

items of gross income in respect of a prior decedent, if the right to receive such amount was acquired by reason of the death of the prior decedent or by bequest, devise, or inheritance from the prior decedent) shall be included in the gross income, for the taxable year when received, of:

(A) the estate of the decedent, if the right to receive the amount is acquired by the decedent's estate from the decedent;

(B) the person who, by reason of the death of the decedent, acquires the right to receive the amount, if the right to receive the amount is not acquired by the decedent's estate from the decedent; or

(C) the person who acquires from the decedent the right to receive the amount by bequest, devise, or inheritance, if the amount is received after a distribution by the decedent's estate of such right.

[10] Sec. 691(a)(2), which requires income to be recognized upon the "transfer" of a right to receive income in respect of a decedent, does not apply to this case since "transfer" is defined specifically to exclude transfers, such as those involved in this case, to a person entitled to receive the right to income in respect of the decedent by reason of the death of the decedent or by bequest, devise, or inheritance from the decedent.

Under section 661(a), an estate deducts in computing its taxable income (1) any amount of income required to be distributed currently and (2) "any other amounts properly paid or credited or required to be distributed for such taxable year." However, the total amount of these deductions may not exceed the estate's distributable net income.[11] Under section 662, the beneficiary to whom these distributions are made must include in gross income a corresponding amount.[12] Sections 661(b) and 662(b) are designed to assure that the character of the amounts deducted by the estate and taken into income by the beneficiary is proportionate to the character of items entering into the computation of distributable net income.

[11] Distributable net income is computed under sec. 643 by making specified adjustments to the estate's taxable income. Respondent does not challenge the correctness of the particular amounts of distributable net income reported by the estate in 1970, 1971, 1972, and 1973, the years in which rights to bonus installments were distributed.

[12] Sec. 663 lists various types of distributions that are not considered distributions subject to secs. 661 and 662, but none of the sec. 663 exclusions apply here.

Further below (at 644-645), the court reasoned:

Although the legislative history of section 691 and the regulations under that section do not specifically address the issue presented in this case, they do tend to support our conclusion that sections 661 and 662 should not be applied to an estate's distribution of rights to income in respect of a decedent. Example 1 of section 1.691(a)-2(b), Income Tax Regs., which illustrates the application of the general principle of taxing income in respect of decedent, when received, involves a fact situation quite similar to that now before us. A decedent was entitled to salary payments in five annual installments after

> his death. The estate collected the first two payments and then distributed to the residuary legatee the right to the remaining three installments. The example states that the estate must include the first two installments in its gross income and the legatee must include the subsequent three installments in his gross income. This example does not even refer to the possibility of the right to the final three installments being treated as a distribution governed by sections 661 and 662. If the distribution rules were meant to apply to distributions of rights to income in respect of a decedent, the absence of any reference to this effect in the regulation is incomprehensible.

Should assets sold after death on the date of death get a basis step-up? An ACTEC committee explored this issue, and some of its thoughts are included in Randolph, "What Is the Basis of Assets Solid on the Date of A Decedent's Death," *Probate Practice Reporter*, Vol. 29, No. 8 (8/2017). Relevant authority the article cited includes:

- Code § 1014(a)(1) provides a new basis for property passing from a decedent to a person "if not sold, exchanged, or otherwise disposed of before the decedent's death by such person."

- Code § 691(a)(1) provides who is taxed on "all items of gross income in respect of a decedent which are not properly includible in respect of the taxable period in which falls the date of his death or a prior period."

- Reg. § 1.6012-3(b)(1), discussing the decedent's final income tax return, provides: "For the decedent's taxable year which ends with the date of his death, the return shall cover the period during which he was alive."

- Reg. § 1.443-1(a)(2), "Taxpayer not in existence for entire taxable year," opens, "If a taxpayer is not in existence for the entire taxable year, a return is required for the short period during which the taxpayer was in existence." After discussing mechanics of preparing a short period return, it ends with, "Although the return of a decedent is a return for the short period beginning with the first day of his last taxable year and ending with the date of his death, the filing of a return and the payment of tax for a decedent may be made as though the decedent had lived throughout his last taxable year."

- TAM 6003114710A argues, "Based upon the provision of such regulation, the provision of the first sentence of section 1.443-1(a)(2) of the income tax regulations, and the reasoning set out in I.T. 1578, C.B. II-1, 150, only the income and deductions up to the moment of a decedent's death are included in his final return since that moment terminates his taxable year. Therefore, the day of death is the last day of the period cover by a decedent's last return and the first day of the period covered by his estate's first return." The TAM concluded that, because the exact moment of death was not determinable when the decedents died from a fire, "it may, however, be administratively feasible and advisable to determine, as a fact, that the fire ended and the deaths occurred at the same moment."

- GCM 38960 (1983) took the position that the estate's taxable year begins on the date of death, without addressing how to treat activity that occurred before death on the date of death.

Publication 559, "Survivors, Executors, and Administrators," for use in preparing 2022 returns, found at About Publication 559, Survivors, Executors and Administrators (irs.gov), asserts that:

- "Form(s) 1099 reporting interest and dividends earned by the decedent before death should be received and the amounts included on the decedent's final return. A separate Form 1099 should show the interest and dividends earned after the date of the decedent's death and paid to the estate or other recipient that must include those amounts on its return."

- K-1 income from a partnership or S corporation on the date of death is included on the decedent's final income tax return.

Representatives of ACTEC discussed with the AICPA formally advocating for clarification about timing issues on the date of death. Representatives of the AICPA suggested that ACTEC not seek clarification, so as to preserve taxpayer flexibility regarding events occurring on the date of death.

See also parts III.B.2.d.i.(b) Portions of Irrevocable Grantor Trust Deemed Owned for Federal Income Taxation and III.B.2.j Tax Allocations upon Change of Interest in a Business.

The basis step-up for a partnership interest is affected by the partnership's IRD items.[2081] The basis step-up for S corporation stock is affected by the corporation's IRD items.[2082] Note that not only will the beneficiaries receiving the partnership interest or S corporation stock have a long-term capital gain of at least the amount of IRD if bought out for at least the date-of-death value, but also the remaining owners of an S corporation would pay income tax when the IRD is collected, the latter income tax which the owners of a partnership may avoid. Exploring these ideas:

- If and to the extent that the beneficiaries of the S corporation stock are shareholders when the IRD is collected, they will report ordinary income of their share of the IRD instead of the remaining shareholders reporting that income. This income increases their basis and correspondingly reduces the capital gain on the sale of the S corporation stock.[2083] Thus, the taxation of the IRD will result in additional basis to either or both of the selling or buying shareholders, the latter possibly needing to wait a long time before enjoying the benefit of that additional basis. For more on S corporation stock basis, see https://www.irs.gov/pub/int_practice_units/sco_c_53_04_01_02_02.pdf.

- For partnerships, however, the remaining owners may never be taxed on the IRD. In a cross-purchase, the remaining partners will receive inside basis for the IRD they are deemed to have bought if the partnership has a Code § 754 election in place; see parts II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000 and II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.[2084] Also, the remaining partners will receive inside basis for the IRD they are deemed to have bought in a redemption, without considering whether the partnership has a Code § 754 election in place.[2085]

[2081] See part II.H.2.g Partnership Basis Adjustments, especially the text accompanying fn. 2096.
[2082] Code § 1367(b)(4); Reg. § 1.1367-1(j). Code § 1367 is reproduced in part II.G.4.d.i Basis Limitation Generally.
[2083] See fn 4874 in part II.Q.7.b.i Redemptions or Distributions Involving S corporations - Generally.
[2084] Especially Reg. § 1.755-1(a)(1), discussed in the text following fn 4242 in part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.
[2085] See fn 5529 in part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale.

Farm inputs deducted on the decedent's final returns receive a basis step-up at death and can be deducted by the surviving spouse on her return. *Estate of Backemeyer v. Commissioner*, 147 T.C. 526 (2016), holding that the tax benefit rule factors of the companion cases of *Hillsboro Nat'l Bank v. Commissioner* and *Bliss Dairy, Inc. v. United States*, 460 U.S. 370 (1983), did not cause the tax benefit rule to apply here. The court viewed Code § 1014 as so fundamental that, when applying the *Bliss Dairy* considerations, the basis step-up controlled. The Tax Court quoted *Bliss Dairy*, 460 U.S. at 386 n. 20:

> An unreserved endorsement of the Government's formulation might dictate the results in a broad range of cases not before us. For instance, the Government's position implies that an individual proprietor who makes a gift of an expensed asset must recognize the amount of the expense as income, *but cf. Campbell v. Prothro*, 209 F.2d 331, 335 (CA5 1954). Similarly, the Government's view suggests the conclusion that one who dies and leaves an expensed asset to his heirs would, in his last return, recognize income in the amount of the earlier deduction. Our decision in the cases before us now, however, will not determine the outcome in these other situations; it will only demonstrate the proper analysis. Those cases will require consideration of the treatment of gifts and legacies as well as §§ 1245(b)(1), (2), and 250(d)(1), (2), which are a partial codification of the tax benefit rule, and which exempt dispositions by gift and transfers at death from the operation of the general depreciation recapture rules. Although there may be an inconsistent event in the personal use of an expensed asset, that event occurs in the context of a nonrecognition rule, and resolution of these cases would require a determination whether the nonrecognition rule or the tax benefit rule prevails. [Some citations omitted.]

The Tax Court concluded:[2086]

> It is telling that the depreciation recapture rules, which, we are reminded, are "a partial codification of the tax benefit rule," *Bliss Dairy*, 460 U.S. at 386 n. 20, do not extend to transfers at death. The regulations bespeak this by omitting from the list of nonrecognition Code sections overridden by the depreciation recapture provisions of sections 1245 and 1250 those sections governing the treatment of a decedent's property. See secs. 1.1245-6(b), 1.1250-1(c)(2), Income Tax Regs. In *Bliss Dairy*, 460 U.S. at 398, the Supreme Court observed that depreciation recapture under sections 1245 and 1250 was an important exception to the nonrecognition statute at issue there. This is not the case with transfers at death, to which the depreciation recapture rules do not apply. Since sections 1245 and 1250 codify the tax benefit rule as it relates to depreciated property and expressly exclude transfers at death from the rule's scope, see *id.* at 386 n. 20 ("[Sections] 1245(b)(1), (2), and 1250(d)(1), (2) … are a partial codification of the tax benefit rule … [and] exempt dispositions by gift and transfers at death from the operation of the general depreciation recapture rules."), it follows that the uncodified remainder of the common law tax benefit rule, with which we are concerned in this case, operates in a similar fashion….

Reg. § 1.691(a)-2(b), Example (5) provides:

> (i) A owned and operated an apple orchard. During his lifetime, A sold and delivered 1,000 bushels of apples to X, a canning factory, but did not receive payment before

---

[2086] Regarding Code § 1245 assets receiving a basis step-up, see part II.Q.4.e.i Life Insurance Basis Adjustment on the Death of an Owner Who Is Not the Insured, fn. 4442.

his death. A also entered into negotiations to sell 3,000 bushels of apples to Y, a canning factory, but did not complete the sale before his death. After A's death, the executor received payment from X. He also completed the sale to Y and transferred to Y 1,200 bushels of apples on hand at A's death and harvested and transferred an additional 1,800 bushels. The gain from the sale of apples by A to X constitutes income in respect of a decedent when received. On the other hand, the gain from the sale of apples by the executor to Y does not.

(ii) Assume that, instead of the transaction entered into with Y, A had disposed of the 1,200 bushels of harvested apples by delivering them to Z, a cooperative association, for processing and sale. Each year the association commingles the fruit received from all of its members into a pool and assigns to each member a percentage interest in the pool based on the fruit delivered by him. After the fruit is processed and the products are sold, the association distributes the net proceeds from the pool to its members in proportion to their interests in the pool. After A's death, the association made distributions to the executor with respect to A's share of the proceeds from the pool in which A had an interest. Under such circumstances, the proceeds from the disposition of the 1,200 bushels of apples constitute income in respect of a decedent.

Whether a sale is so far along at death to constitute IRD instead of the asset to be sold getting a basis step-up is the subject of several cases.[2087]

Rul. 200012076 (profit derived from unexercised nonqualified stock options is IRD, but receipt of IRD by charitable beneficiary prevents imposition of income tax); *Dorsey v. Comm'r*, 49 T.C. 606 (1968) (liquidated corporation); Young, *Farmer's Inventory Problem at Death, Confused by* Linde *Decision, Clarified*, 9 J. Tax'n 355 (1958). But see Rev. Rul. 73-524, 1973-2 C.B. 307 (proceeds received on sale of securities pledged in pre-death short sale are not IRD); Priv. Ltr. Rul. 9319005 (same); *Levin v. United States*, 373 F.2d 434 (1st Cir. 1967) (does not include lender's unearned portion of note discount).

If an IRD asset is likely to appreciate after death, consider triggering income recognition under Code § 691(a)(2),[2088] so that future increases in growth may receive capital gain treatment.[2089]

II.H.2.f. Partnership Basis Shifting Opportunities

Part II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property how to shift basis from a low basis asset to a higher basis asset.

Part II.Q.8 Exiting From or Dividing a Partnership describes partnership tax rules and explains why a person with multiple business assets outside of a corporate structure might want to form a master partnership to facilitate future basis shifting opportunities.

Part II.Q.7.h Distributing Assets; Drop-Down into Partnership discusses how to move corporate assets into a partnership structure.

II.H.2.g. Partnership Basis Adjustments

A Code § 754 election provides a basis adjustment when a partner dies.[2090] Also see parts II.Q.8.e.i Distribution of Partnership Interests and II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform), to which part III.A.6 Post-Mortem Trust and Estate Administration briefly refers.

The basis adjustment wipes out so-called "negative basis" (a technically inaccurate term describing a situation where partners would recognize what they view as "phantom income" when a partnership interest is sold).[2091]

[2088] Code § 691(a)(2) provides:

> If a right, described in paragraph (1), to receive an amount is transferred by the estate of the decedent or a person who received such right by reason of the death of the decedent or by bequest, devise, or inheritance from the decedent, there shall be included in the gross income of the estate or such person, as the case may be, for the taxable period in which the transfer occurs, the fair market value of such right at the time of such transfer plus the amount by which any consideration for the transfer exceeds such fair market value. For purposes of this paragraph, the term "transfer" includes sale, exchange, or other disposition, or the satisfaction of an installment obligation at other than face value, but does not include transmission at death to the estate of the decedent or a transfer to a person pursuant to the right of such person to receive such amount by reason of the death of the decedent or by bequest, devise, or inheritance from the decedent.

[2089] *Hurford Investments No 2, Ltd. v. Commissioner*, cited in fn. 1574 in part II.G.8 Code § 165(a) Loss for Worthlessness; Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A Limitation on that Strategy, holding that a contribution to a partnership attained this result, without mentioning that Code § 721(a) ordinarily blocks income recognition.

[2090] For more on Code § 754 elections (and similar rules that apply without an election when the partnership has a substantial built-in loss), see part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets.

[2091] See Rev. Rul. 73-183 (no gain or loss is recognized on the decedent's final income tax return as a result of the transfer of stock – that received a basis adjustment on Code § 1014 upon death - to the executor of the decedent's estate) (reproduced in part II.H.2 Basis Step-Up Issues) and Reg. § 1.742-1 (basis of a partnership interest acquired from a decedent is the fair market value of the interest at the date of death, increased by the estate's share of partnership liabilities, and reduced to the extent that such

A "negative basis" situation arises as follows:

- A partnership borrows money, increasing the partners' adjusted basis.[2092] They then distribute the loan proceeds, which simply reduces the tax basis rather than triggering income.[2093] Now the partnership has liabilities without retaining the assets that triggered the liabilities. A discharge of liabilities is a deemed distribution to the partners,[2094] who already used their basis against prior distributions, so the discharge of liability can trigger income to the extent that the deemed cash distribution exceeds their remaining basis. Partners view this as an unfair result, but it really isn't, because if they simply put back the money that they had taken out then they would have enough basis to avoid the tax.[2095] As described in parts II.H.10 Extracting Equity to Fund Large Gift and II.Q.8.a.iii Examples of Using Partnership to Shift Basis, this equity stripping can be very beneficial. However, when one engages in such an approach, one needs to consider ways to trigger estate inclusion to purge possible negative income tax effects.

- Alternatively, a partnership borrows money to fund losses.

For reporting of "negative basis," see text accompanying and preceding fn 502 in part II.C.7 Maintaining Capital Accounts.

For more details on when partnership distributions trigger gain recognition and when they don't, see part II.Q.8.b.i Distribution of Property by a Partnership.

Note that partnership interests do not receive a basis step-up to the extent the underlying property constitutes income in respect of a decedent (IRD),[2096] consistent with part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

---

value is attributable to IRD). Any increase in the basis of the partnership interest generates an increase in the basis of the partnership's assets other than IRD only to the extent the basis of the partnership interest is not attributable to partnership liabilities. Reg. § 1.755-1(a)(4)(i)(A), incorporated by reference by Code § 743(c) and Reg. § 1.755-1(e). For more details on Reg. § 1.742-1, see fn 5682 in part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss). As to IRD, see part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

[2092] Code § 752(a).

[2093] Code § 731(a)(1).

[2094] Code § 752(b).

[2095] Code § 722

[2096] See fns. 5683, 4249, and 4277.

II.H.2.h. Basis Step-Up for Property Held Outside an Entity; Moving Liabilities Outside of an Entity to Maximize Deductions for Estate Tax Purposes

When property is held outside an entity,[2097] assets and associated liabilities are reported on an estate tax return as follows:[2098]

- If the debt is recourse, then the asset and its associated liability are reported on separate asset and liability schedule.

- If the debt is nonrecourse, the asset and liability are netted and reported as a net asset. For income tax purposes,[2099] in determining the amount of gain or loss (or deemed gain or loss) with respect to any property, the fair market value of such property cannot be less than the amount of any nonrecourse indebtedness to which such property is subject.

The distinction between recourse and non-recourse debt can also be significant for nonresident aliens, when the deduction for recourse debt gets pro-rated and diluted as any other debt, making nonrecourse debt important for any U.S. real estate.

A 2006 article suggested that recourse debt provides a better fractional interest discount than nonrecourse debt, because the discount is calculated on the gross value for recourse debt but only on the net value for nonrecourse debt.[2100] For example, one's proportionate value of the underlying real estate is $1M and of the liability is $400K, for a $600K net equity. Under this theory, if a 20% discount were applied, the discount for recourse property would be $200K (20% of $1M) and for nonrecourse property would be $120K (20% of $600K). Therefore, when property is held as tenants-in-common, discounting works better for recourse than nonrecourse property.

[2097] "Entity" includes a single member LLC, which exists as a separate entity for transfer tax purposes. See fn. 4041, found in part II.P.3.f Conversions from Partnership to Sole Proprietorships and Vice Versa. Once a single-member LLC is valued, its value is allocated among its assets and liabilities to determine basis. See fns. 332-333 in part II.B Limited Liability Company (LLC).

[2098] See Reg. §§ 20.2031-1(b), 20.2053-7; *Estate of Stevens v. Commissioner*, T.C. Memo. 2000-53, *Propstra v. U.S.*, 680 F.2d 1248 (9th Cir. 1982); *Estate of Fung v. Commissioner*, 117 T.C. 21 (2001); Letter Ruling 8423007. Reg. § 20.2053-7 provides:

> A deduction is allowed from a decedent's gross estate of the full unpaid amount of a mortgage upon, or of any other indebtedness in respect of, any property of the gross estate, including interest which had accrued thereon to the date of death, provided the value of the property, undiminished by the amount of the mortgage or indebtedness, is included in the value of the gross estate. If the decedent's estate is liable for the amount of the mortgage or indebtedness, the full value of the property subject to the mortgage or indebtedness must be included as part of the value of the gross estate; the amount of the mortgage or indebtedness being in such case allowed as a deduction. But if the decedent's estate is not so liable, only the value of the equity of redemption (or the value of the property, less the mortgage or indebtedness) need be returned as part of the value of the gross estate.

[2099] Code § 7701(g).

[2100] See Schiller, "Leveraged Tenancies in Common - The Next Great Great Planning Tool?" (subtitled "Valuation Benefits with Leveraged Co-Ownerships May Exceed Benefits of Entity-Related Valuation Adjustments for Minority Interests"), *Steve Leimberg's Estate Planning Email Newsletter* (Archive Message #1057), available at http://www.leimbergservices.com. I agreed with the article when it was written.

Note that the netting that the article suggests applies to nonrecourse liabilities applies to assets and (recourse and nonrecourse) liabilities held inside an entity. Thus, if one would like a larger deduction for liabilities, one should take the liabilities out of the entity and be subject to them directly. Of course, business issues might very well make such a suggestion a bad idea; however, if all parties are on the hook for loan guarantees, the suggestion might be more realistic.

However, the article appears wrong regarding any effect on basis that netting nonrecourse liabilities may have when the property is owned directly instead of inside a separate entity. *Crane v. Commissioner* provides that nonrecourse debt does not affect the basis of property included in the decedent's estate, even though the debt is netted for estate tax reporting purposes.[2101] Although the Code § 1014(f)(1)(A) basis consistency rule provides that basis cannot exceed the finally determined estate tax value, which might seem to conflict with *Crane* to the extent that only the net value is reported for property subject to nonrecourse debt, Prop. Reg. § 1.1014-10(a)(2) provides, "The existence of recourse or non-recourse debt secured by property at the time of the decedent's death does not affect the property's basis, whether the gross value of the property and the outstanding debt are reported separately on the estate tax return or the net value of the property is reported." Furthermore, if the property is sold, the buyer is going to buy it free and clear of the debt, so that fractional interest should not be affected by the debt's existence. Thus, valuation discounts should be the same, without regard to the recourse or nonrecourse nature of the debt.

II.H.2.i. Avoiding a Basis Step-Down

Suppose property has basis in excess of value. That property would get a reduced basis at death.

Once solution is to sell the property for a loss and obtain current income tax benefits (to the extent available). That applies not only to property held directly but also property held in a partnership. If a partnership has a built-in loss exceeding $250,000, then a partner's death (or post-mortem trust funding)[2102] generally would trigger an inside basis reduction,[2103] even if a Code § 754 election is not in place.[2104] Therefore, a partnership with a substantial built-in loss might consider selling its loss assets to avoid this unfortunate result.

Another way to avoid a basis step-down is to transfer that property by gift or sale to an irrevocable grantor trust. The donee or trust would be unable use the built-in loss if the property if the property is sold for less than its basis, but it would be able to use the full basis for purposes of determining gain on sale.[2105] However, if the donee is the donor's spouse (or perhaps former spouse), then the donee would be able to use the built-in loss.[2106]

2101 331 U.S. 1 (1947).
2102 See part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).
2103 See part II.Q.8.e.iii.(a) Illustration of Inside Basis Issue.
2104 See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000.
2105 Code § 1015(a); Reg. § 1.1015-1(a)(1).
2106 Code § 1015(e).

II.H.2.j. Effect of Chapter 14 on Basis Step-Up

Chapter 14 increases the value of business entities and other arrangements for the following purposes:

- *Code § 2701 Anti-Freeze*: Any increases in value provided under part III.B.7.b Code § 2701 Overview[2107] apply solely for gift tax purposes (including whether a sale includes a gift element).[2108]

- *Code § 2703 Buy-Sell Provisions*: Any increases in value provided under part III.B.7.e Code § 2703 Overview apply solely for estate, gift, and generation-skipping transfer tax purposes.[2109]

- *Code § 2704 Restrictions on Cashing Out*: Any increases in value provided under part III.B.7.f Code § 2704 Overview apply solely for estate, gift, and generation-skipping transfer tax purposes.[2110]

Code § 1014 determines basis by referring to property's "fair market value." As noted above, Chapter 14 applies for transfer tax purposes, not for income tax purposes.

However:

- If an estate tax return is required to be filed because the gross estate exceeds the relevant threshold, the basis of certain property is determined with reference to its estate tax value.[2111]

- For other property, the value shown on an estate tax return controls.[2112]

[2107] See also part III.B.7.c Code § 2701 Interaction with Income Tax Planning.

[2108] Code § 2701(a)(1) ("Solely for purposes of determining whether a transfer … is a gift (and the value of such transfer)"); Reg. §§ 25.2701-1(a)(1), 25.2701-1(b)(1), the latter providing:

> *Completed transfers*. Section 2701 applies to determine the existence and amount of any gift, whether or not the transfer would otherwise be a taxable gift under chapter 12 of the Internal Revenue Code. For example, section 2701 applies to a transfer that would not otherwise be a gift under chapter 12 because it was a transfer for full and adequate consideration.

Note that Code §§ 2703(a)(1) and 2704(a)(1) provide "for purposes of this subtitle," so query whether Code § 2701(a)(1) not referring specifically to Chapter 12 has any significance. However, note that Reg. § 25.2701-2(a) refers to Chapter 12:

> *In general*. In determining the amount of a gift under § 25.2701-3, the value of any applicable retained interest (as defined in paragraph (b)(1) of this section) held by the transferor or by an applicable family member is determined using the rules of chapter 12, with the modifications prescribed by this section. See § 25.2701-6 regarding the indirect holding of interests.

Reg. § 25.2701-5 provides estate tax mitigation rules relating to Code § 2701 gifts.

[2109] Code § 2703(a)(1); Reg. § 25.2703-1(a)(1). See part II.Q.4.h Establishing Estate Tax Values, including a discussion that Code § 2703(b) might not apply to inter vivos transfers.

[2110] Code § 2704(a)(1).

[2111] Code § 1014(f).

[2112] Reg. § 1.1014-3(a) provides:

> *Fair market value*. For purposes of this section and § 1.1014-1, the value of property as of the date of the decedent's death as appraised for the purpose of the Federal estate tax or the alternate value as appraised for such purpose, whichever is applicable, shall be deemed to be its

Thus, to tax advantage of estate tax values inflated by Chapter 14, the subject property seems to need to be reported on an estate tax return.

II.H.2.k. Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap

Property included in one's estate for estate tax purposes receives a new basis, even if a power of appointment is the only trigger for estate inclusion. Code § 1014(b)(9) refers to "property acquired from the decedent by reason of death, form of ownership, or other conditions (including property acquired through the exercise or non-exercise of a power of appointment), if by reason thereof the property is required to be included in determining the value of the decedent's gross estate under chapter 11 of subtitle B or under the Internal Revenue Code of 1939." Reg. § 1.1014-2(b)(1), "In general" (meaning it is subject to subparagraphs below it), explains:[2113]

> In addition to the property described in paragraph (a) of this section, and except as otherwise provided in subparagraph (3) of this paragraph, in the case of a decedent dying after December 31, 1953, property shall also be considered to have been acquired from the decedent to the extent that both of the following conditions are met: (i) the property was acquired from the decedent by reason of death, form of ownership, or other conditions (including property acquired through the exercise or nonexercise of a power of appointment), and (ii) the property is includible in the decedent's gross estate under the provisions of the Internal Revenue Code of 1954, or the Internal Revenue Code of 1939, because of such acquisition. The basis of such property in the hands of the person who acquired it from the decedent shall be determined in accordance with the general rule in § 1.1014-1. See, however, § 1.1014-6 for special adjustments if such property is acquired before the death of the decedent. See also subparagraph (3) of this paragraph for a description of property not within the scope of this paragraph.

To the extent of its inclusion ratio (and therefore subject to GST tax), property subject to a taxable termination[2114] also receives a new basis based on fair market value.[2115]

> fair market value. If no estate tax return is required to be filed under section 6018 (or under section 821 or 864 of the Internal Revenue Code of 1939), the value of the property appraised as of the date of the decedent's death for the purpose of State inheritance or transmission taxes shall be deemed to be its fair market value and no alternate valuation date shall be applicable.

[2113] For more about Reg. § 1.1014-6, see part II.H.2.d Caution re: Depreciable Property Held in a Nongrantor Trust That Is Included in the Grantor's, Surviving Spouse's, or Other Beneficiary's Estate.

[2114] Code § 2612(a) provides:

(1) *General rule*. For purposes of this chapter, the term "taxable termination" means the termination (by death, lapse of time, release of power, or otherwise) of an interest in property held in a trust unless—
   (A) immediately after such termination, a non-skip person has an interest in such property, or
   (B) at no time after such termination may a distribution (including distributions on termination) be made from such trust to a skip person.

(2) *Certain partial terminations treated as taxable*. If, upon the termination of an interest in property held in trust by reason of the death of a lineal descendant of the transferor, a specified portion of the trust's assets are distributed to 1 or more skip persons (or 1 or more trusts for the exclusive benefit of such persons), such termination shall constitute a taxable termination with respect to such portion of the trust property.

[2115] Code § 2654(a)(2).

If estate tax and GST tax are repealed and Code § 1014 is not changed, presumably the above provisions would not generate a basis step-up. However, other parts of Code § 1014 may generate a basis step-up, including:

- "Property acquired by bequest, devise, or inheritance, or by the decedent's estate from the decedent;"[2116]
- "Property transferred by the decedent during his lifetime in trust to pay the income for life to or on the order or direction of the decedent, with the right reserved to the decedent at all times before his death to revoke the trust;"[2117]
- "In the case of decedents dying after December 31, 1951, property transferred by the decedent during his lifetime in trust to pay the income for life to or on the order or direction of the decedent with the right reserved to the decedent at all times before his death to make any change in the enjoyment thereof through the exercise of a power to alter, amend, or terminate the trust;"[2118] and
- "Property passing without full and adequate consideration under a general power of appointment exercised by the decedent by will."[2119]

Note that, if the estate tax is repealed, the basis step-up for a general power of appointment may apply only if the decedent actually exercised the power.[2120] Similarly, for federal income tax purposes, a general power of appointment shifts the grantor, from the settlor to the person holding the power, only if exercised.[2121] If shifting the grantor for federal purposes also shifts it for state income tax purposes, consider whether shifting the grantor for state income tax purposes is desirable or undesirable.[2122] If that shift is undesirable and the estate tax is in effect, consider:

- Using the Delaware Tax Trap to trigger estate inclusion, as the Delaware Tax Trap is the exercise of a limited power of appointment in a way that triggers estate inclusion under the general power of appointment rules, or
- Planning for a taxable termination instead of using a general power of appointment. Using a taxable termination allows the decedent to exercise a power of appointment without shifting the grantor.

[2116] Code § 1014(b)(1).
[2117] Code § 1014(b)(2).
[2118] Code § 1014(b)(3).
[2119] Code § 1014(b)(4).
[2120] Code § 1014(b)(9) provides:

> In the case of decedents dying after December 31, 1953, property acquired from the decedent by reason of death, form of ownership, or other conditions (including property acquired through the exercise or non-exercise of a power of appointment), if by reason thereof the property is required to be included in determining the value of the decedent's gross estate under chapter 11 of subtitle B or under the Internal Revenue Code of 1939.

[2121] Reg. § 1.671-2(e)(5), which is reproduced in fn 6620 in part III.B.2.h.i Who Is the Grantor. See also part II.H.5.d Using Grantor's Parent's Exemption for Basis Step-Up.
[2122] See part II.J.3.e State and Local Income Tax.

Code § 2041(a)(3), the Delaware Tax Trap, generates estate inclusion by changing the time for vesting.[2123] The leading case is *Murphy v. Commissioner*, 71 T.C. 671 (1979), *acq. recommended* A.O.D. 1979-87, *acq.* 1979-2 C.B. 1. I find the case unhelpful and prefer to follow the statute.

If the estate tax exists, then a general power of appointment is an easy way to obtain a new basis at death. Code § 2041(b)(1), "General power of appointment," provides:

> The term "general power of appointment" means a power which is exercisable in favor of the decedent, his estate, his creditors, or the creditors of his estate; except that -
>
> (A) A power to consume, invade, or appropriate property for the benefit of the decedent which is limited by an ascertainable standard relating to the health, education, support, or maintenance of the decedent shall not be deemed a general power of appointment.
>
> (B) A power of appointment created on or before October 21, 1942, which is exercisable by the decedent only in conjunction with another person shall not be deemed a general power of appointment.
>
> (C) In the case of a power of appointment created after October 21, 1942, which is exercisable by the decedent only in conjunction with another person -
>
> (i) If the power is not exercisable by the decedent except in conjunction with the creator of the power - such power shall not be deemed a general power of appointment.
>
> (ii) If the power is not exercisable by the decedent except in conjunction with a person having a substantial interest in the property, subject to the power, which is adverse to exercise of the power in favor of the decedent - such power shall not be deemed a general power of appointment. For the purposes of this clause a person who, after the death of the decedent, may be possessed of a power of appointment (with respect to the property subject to the decedent's power) which he may exercise in his own favor shall be deemed as having an interest in the property and such interest shall be deemed adverse to such exercise of the decedent's power.
>
> (iii) If (after the application of clauses (i) and (ii)) the power is a general power of appointment and is exercisable in favor of such other person—such power shall be deemed a general power of appointment only in respect of a fractional part of the property subject to such power, such part to be determined by dividing the value of such property by the number of such persons (including the decedent) in favor of whom such power is exercisable.

[2123] Code § 2041(a)(3). For how to exercise the Delaware Tax Trap, see Trytten, Blattmachr, Davis, and Gorin, "Yes, I'll Order That Trust 'Fully Loaded,'" pages II-B-(1)-98 (100th page of PDF) through II-B-(1)-100, Special Session II-B, 51st Annual Heckerling Institute on Estate Planning (2017), which is also saved as Thompson Coburn LLP document no. 6456656.

> For purposes of clauses (ii) and (iii), a power shall be deemed to be exercisable in favor of a person if it is exercisable in favor of such person, his estate, his creditors, or the creditors of his estate.

For what is an ascertainable standard under Code § 2041(b)(1)(A), see Reg. § 20.2041-1(c)(2), "Powers limited by an ascertainable standard," which provides:[2124]

> A power to consume, invade, or appropriate income or corpus, or both, for the benefit of the decedent which is limited by an ascertainable standard relating to the health, education, support, or maintenance of the decedent is, by reason of section 2041(b)(1)(A), not a general power of appointment. A power is limited by such a standard if the extent of the holder's duty to exercise and not to exercise the power is reasonably measurable in terms of his needs for health, education, or support (or any combination of them). As used in this subparagraph, the words "support" and "maintenance" are synonymous and their meaning is not limited to the bare necessities of life. A power to use property for the comfort, welfare, or happiness of the holder of the power is not limited by the requisite standard. Examples of powers which are limited by the requisite standard are powers exercisable for the holder's "support," "support in reasonable comfort," "maintenance in health and reasonable comfort," "support in his accustomed manner of living," "education, including college and professional education," "health," and "medical, dental, hospital and nursing expenses and expenses of invalidism." In determining whether a power is limited by an ascertainable standard, it is immaterial whether the beneficiary is required to exhaust his other income before the power can be exercised.

The right to designate one of the power holder's creditors or one of the creditors of the power holder's estate constitutes a general power of appointment.[2125]

If a formula general power of appointment is vested and is based on factors within the power-holder's control, then consider whether the power-holder's actions may constitute the release of a general power of appointment. In *Estate of Kurz v. Commissioner*, 101 T.C. 44 (1993), the decedent had a 5% withdrawal right in a bypass trust, exercisable only if the marital trust had been exhausted, and the decedent also had an unlimited right to withdraw the marital trust. Thus, the decedent controlled whether the 5% withdrawal right applied. The court concluded:[2126]

[2124] For ascertainable standards in other contexts, see Reg. §§ 1.674(b)-1(b)(5)(i) (grantor trust income tax rules - see text accompanying fn 6670 in part III.B.2.h.vii.(a) Distribution Provisions Resulting from Control Causing Grantor Trust Treatment), and 25.2511-1(g)(2) (gift tax ascertainable standard – see text accompanying fn 2485 in part II.J.2.b **Trust** Provisions Authorizing Distributions).

[2125] Letter Ruling 200335015, which held that the reduction in scope of a general power did not constitute a gift when the holder still retained the right described in the text above.

[2126] The court reasoned at 58-60:

> Neither the statute (last sentence of section 2041(a)(2)) nor the pertinent regulation (section 20.2041-3(b), Estate Tax Regs.) expressly requires that the event or contingency be "beyond the decedent's control". We are not persuaded by respondent's efforts to construct such a requirement from bits and pieces of other regulations either defining a type of power of appointment[4] or governing retained powers (section 2038) rather than powers of appointment (section 2041). Since respondent added such a requirement to the retained-powers regulation (section 20.2038-1(b), Estate Tax Regs.) and at the same time failed to include that language in

the powers-of-appointment regulation (section 20.2041-3(b), Estate Tax Regs.), we decline to engraft this language into the regulation.

[4] Respondent also argues that her position is supported by section 20.2041-1(b)(1), Estate Tax Regs., which provides in part:

> A power in a donee to remove or discharge a trustee and appoint himself may be a power of appointment. For example, if under the terms of a trust instrument, the trustee or his successor has the power to appoint the principal of the trust for the benefit of individuals including himself, and the decedent has the unrestricted power to remove or discharge the trustee at any time and appoint any other person including himself, the decedent is considered as having a power of appointment….

Respondent argues that the regulation attributes a general power to a decedent, even though the decedent would have been required to remove the trustee and substitute himself before he could exercise his power. Respondent thus concludes that the "regulations make clear, however, that a decedent possesses, for purposes of I.R.C. section 2041, a power of appointment notwithstanding the failure by a decedent to perform an act necessary to exercise the power if the decedent had the power to perform that act."

However, the above-quoted regulation language merely defines a particular type of general power of appointment. The particular type of general power of appointment involved in this case is the power to consume principal. There is no question that that is a general power of appointment. The only question in this case is whether that power was in existence at the time of decedent's death.

Petitioner argues that, pursuant to section 20.2041-3(b), Estate Tax Regs., because decedent's power to withdraw 5 percent of the principal from the Family Trust Fund was exercisable only upon the occurrence during decedent's lifetime of an event or a contingency (complete exhaustion of the entire principal of the Marital Trust Fund), which did not in fact occur during decedent's lifetime, the power did not exist on the date of decedent's death. Petitioner argues that the regulation requires that a condition precedent cannot be deemed to have occurred but must have in fact occurred. Petitioner concludes, therefore, that at the time of her death, decedent did not have a general power of appointment over any portion of the principal of the Family Trust Fund that would be includable in her gross estate.

Respondent counters that petitioner's interpretation of the regulation is overly broad and "does violence to the intent of the statute". We agree, but we do not accept respondent's own overbroad view that whether the event or contingency is beyond the control of the decedent is the determinative factor.

However, although we decline to read into the statute a requirement that the event or contingency must necessarily be beyond a decedent's control, the event or contingency must not be illusory and must have some significant non-tax consequence independent of the decedent's ability to exercise the power. The legislative history, however, clearly indicates that all property of which the decedent on the date of his death had practical, if not technical, ownership is to be included in his estate. We think any illusory or sham restriction placed on a power of appointment should be ignored. An event or condition that has no significant non-tax consequence independent of a decedent's power to appoint the property for his own benefit is illusory. For example, for purposes of section 2038, a power is disregarded if it becomes operational as a mere by-product of an event, the non-tax consequences of which greatly overshadow its significance for tax purposes. See Bittker & Lokken, *Federal Taxation of Income, Estates and Gifts*, par. 126.5.4, at 126-64 (2d ed. 1984). If the power involves acts of "independent significance", whose effect on the trust is "incidental and collateral", such acts are also deemed to be beyond the decedent's control. See Rev. Rul. 80-255, 1980-2 C.B. 272 (power to bear or adopt children involves act of "independent significance", whose effect on a trust that included after-born and after-adopted children was "incidental and collateral"); see also *Estate of Tully v. United States*, 208 Ct. Cl. 596, 528 F.2d 1401, 1406 (1976) ("In reality, a man might divorce his wife, but to assume that he would fight through an entire divorce process merely to alter employee death benefits approaches the absurd."). Thus, if a power is contingent upon an event of substantial independent consequence that the decedent could, but did not, bring about, the event is deemed to be beyond the decedent's control for purposes of section 2038.

> We do not think that, where the general power of appointment is the right to withdraw principal from a trust, Congress intended that application of section 2041(a)(2) could be avoided by stacking or ordering the withdrawal powers; *i.e.*, exercising the power to withdraw a certain number of dollars before the power to withdraw the next portion comes into operation. A condition that has no significant non-tax consequence independent of a decedent's power to appoint the property for her own benefit does not prevent practical ownership; it is illusory and should be ignored. We conclude that for purposes of section 2041, although the condition does not have to be beyond the decedent's control, it must have some significant non-tax consequence independent of the decedent's power to appoint the property. Petitioner has not demonstrated that withdrawing principal from the Marital Trust Fund has any significant non-tax consequence independent of decedent's power to withdraw principal from the Family Trust Fund. Such condition is illusory and, thus, is not an event or a contingency contemplated by the section 20.2041-3(b), Estate Tax Regs.
>
> We hold that, if by its terms a general power of appointment is exercisable only upon the occurrence during the decedent's lifetime of an event or contingency that has no significant non-tax consequence independent of the decedent's ability to exercise the power, the power exists on the date of decedent's death, regardless of whether the event or contingency did in fact occur during such time. Because petitioner has failed to demonstrate any significant non-tax consequence independent of decedent's right to withdraw principal from the Family Trust Fund, we hold that, on the date of her death, decedent had a general power of appointment over 5 percent of the Family Trust Fund that causes that portion to be includable in her estate under section 2041.
>
> Decedent's power of appointment over 5 percent of the Family Trust Fund was in existence on the date of her death regardless of the fact that the principal of the Marital Trust Fund had not been completely exhausted by that date. Hence, 5 percent of the Family Trust Fund was includable in her gross estate.

In other words, if the decedent could have unilaterally determined the scope of the general power of appointment, the power existed to the extent of the maximum amount over which the power could have been exercised.[2127] Because of this issue, consider allowing a nonadverse party to revoke the power-holder's power, so that the power does not vest until death. That approach would eliminate any gift tax issues regarding whether a general power was released during life. With this idea in mind, for clients keenly interested in basis step-up planning, I may use a clause along the following lines:

> Any time a reference is made to a "Formula Power to Appoint," the primary beneficiary may Appoint (as described in subsection (a)) the Included Assets (as described in subsection (b)) to the creditors of the primary beneficiary's estate, under the following terms:
>
> (a) *Mechanism for Exercising Formula Power to Appoint*. Any exercise of the Formula Power to Appoint must specifically refer to the power, shall be effected only by a written instrument with the prior or contemporaneous written consent of the Appointment Trustee (defined below) and delivered to the trustee and shall be revocable by either the primary beneficiary or the Appointment Trustee. The

[2127] For a possible exception to this idea, see part III.B.1.i Transfers with Contingencies Based on Acts of Independent Significance.

Appointment Trustee's decision to consent to, withhold consent from, or revoke (or otherwise limit) the exercise of the primary beneficiary's power to Appoint shall be in the Appointment Trustee's sole and absolute discretion. The Appointment Trustee may, in the Appointment Trustee's sole and absolute discretion, by written instrument delivered to the trustee, reduce or eliminate the primary beneficiary's power to exercise the Formula Power to Appoint, even without an attempted exercise of such power. The trustee shall serve as the Appointment Trustee if the trustee is not the primary beneficiary and otherwise is not a Nonadverse Person. A "Nonadverse Person" is a person who is not adverse to the exercise of the power in favor of the creditors of the primary beneficiary's estate under Code section 2041(b)(1)(C)(ii) and the regulations thereunder. If the trustee is not the primary beneficiary and otherwise is not a Nonadverse Person, upon the primary beneficiary's written request the trustee shall appoint as the Appointment Trustee a Nonadverse Party who is not the primary beneficiary and is not a related or subordinate party (as described in Code section 672(c)) with respect to the primary beneficiary (an "Independent Person"). If the Appointment Trustee shall cease to serve, by resignation delivered to the trustee or for any other reason, the trustee shall appoint as the Appointment Trustee another Nonadverse Party who is an Independent Person if the primary beneficiary so requests or if the primary beneficiary has exercised the primary beneficiary's power to Appoint.

(b) *"Included Assets" Subject to Formula Power to Appoint*. This subsection is subject to subsection (c). The primary beneficiary's power to Appoint does not apply to the following assets held by the trust: (1) cash or cash equivalent accounts (such as savings accounts, certificates of deposit, money market accounts or cash on hand in any brokerage or equivalent accounts); (2) any interest in any Benefit Plan or other property that constitutes income in respect of a decedent as described in Code section 1014(c); and (3) any interest in any property that has an adjusted basis for federal income tax purposes that is greater than or equal to the fair market value of the property at the time of the primary beneficiary's death (the "Excluded Assets"). If, after eliminating from consideration the Excluded Assets, the inclusion of the value of the other assets in the trust in the primary beneficiary's taxable estate for federal estate tax purposes would not increase the federal estate tax and state death taxes payable from all sources by reason of the primary beneficiary's death, this power of appointment shall apply to all remaining assets of the trust other than the Excluded Assets (the "Included Assets"). However, if including the value of the Included Assets in the trust in the primary beneficiary's taxable estate for federal estate tax and state death tax purposes would increase the taxes so payable, the assets of the trust appointed by this Section shall be further limited as follows: The trustee shall for each of the Included Assets evaluate the ratio of the fair market value at the time of the primary beneficiary's death to the adjusted basis immediately prior to the primary beneficiary's death first (the "Gain Ratio"). The trustee shall thereafter rank the Included Assets in order of their respective Gain Ratio. The appointment shall apply first to the Included Asset with the largest Gain Ratio, and thereafter in declining order of Gain Ratio to each of the subsequent Included Assets; however, as such point that inclusion of the next in order of the Included Assets would otherwise cause an increase in the primary beneficiary's estate's federal estate tax and state death tax liability as described above, the primary beneficiary's exercise of the Formula Power to Appoint shall be limited to that fraction or percentage of that Included Asset that will not cause any federal estate tax and state death tax liability, and all lower ranked Included Assets shall be excluded from the primary beneficiary's exercise of the Formula Power to Appoint.

(c) *Appointment Trustee's Change of Included Assets*. The Appointment Trustee may, in the Appointment Trustee's sole and absolute discretion, by written instrument delivered to the trustee change the scope of Excluded Assets and Included Assets and vary the order in which assets are allocated to either category.

(d) *Terms of Appointment Trustee's Service*. The Appointment Trustee may resign in the same manner as any other trustee and shall be protected from and indemnified against liability at least as much as any individual trustee would be protected or indemnified, whether the Appointment Trustee is an individual or an entity. The Appointment Trustee shall have no duty to monitor the trust or consider any actions under this Section except to the extent requested by a trustee or the primary beneficiary. The trustee (1) shall provide the Appointment Trustee with such information as the Appointment Trustee deems necessary in making decisions about whether or how to act under this Section, (2) shall cooperate with delivering to the beneficiaries any notices or other documentation relating to this Section as the Appointment Trustee deems necessary, and (3) shall take such other actions as the Appointment Trustee deems necessary to facilitate the Appointment Trustee effectuating the Appointment Trustee's powers under this Section. The Appointment Trustee shall be entitled to reasonable compensation and expense reimbursement. The Appointment Trustee shall have no authority or duties except as provided in this Section.

I believe that it addresses the concerns some have expressed regarding *Kurz*[2128] - that a formula general power may not be capped in the way that its drafter intends - but this is still sufficiently in its developmental stages that I use it only for clients with a keen interest in basis step-up. Note that the clause can be amended even after the grantor's death to cure any defects that it may have. In contrast, one might use a simple power when the client is certain that the beneficiary will never be subject to estate tax, but that does risk a basis step-down, so it's a trade-off between (1) simplicity, client understanding, and less expensive future trust administration, and (2) trying to obtain perfect tax results. My second quarter 2019 newsletter discussed this formula in more detail, and it is verbally presented in the webinar (TCLE that is available on demand without educational credit) State Fiduciary Income Tax (Kaestner); S Corp. Ownership; Basis Step-Up Strategies.

Letter Ruling 202206008 held that adding a general power of appointment somewhat along these lines caused estate inclusion only to the extent the general power was exercised and otherwise did not blow the trust's status as grandfathered from GST tax. The trustee "has the authority in the exercise of its sole and absolute discretion to withdraw from the corpus of the trust, such sum or sums as it may deem necessary for the maintenance, education, welfare and comfort of any beneficiary or beneficiaries, and such exercise of discretion by Trustee shall be final and not subject to question by any person or persons." Then:

> A controversy arose regarding the administration of Trust B and Trustee's desire to exercise its discretion to provide Child with a power of appointment over certain assets of Trust B. Trustee asserts that the exercise of this discretionary authority is to carry out the intent of Grantor to keep trust assets in the hands of Grantor's descendants upon

[2128] See fn 2126 and accompanying text.

> Child's death and to minimize transfer taxation upon Trust B assets. However, according to Trustee, due to family dynamics, including separation and divorce, as well as changing tax laws, Grantor's intent may not be carried out.
>
> Child and the other beneficiaries of Trust B have been in negotiations regarding Trustee's proposed exercise of its discretionary authority for approximately several months. During this time, Beneficiary 1 and Beneficiary 2 (individually and as representative of his minor children) opposed the proposed exercise of Trustee's discretionary authority. Litigation was commenced, but after further negotiations, the parties were able to reach a settlement agreement. Court has approved, after a hearing on the matter, the settlement agreement in an order, dated Date 3 (Settlement Agreement), subject to a favorable private letter ruling by the Internal Revenue Service.
>
> Settlement Agreement provides that Trust B, Clause 5., Paragraph (2) is modified to grant Child a testamentary general power of appointment to appoint a "Defined Portion" of Trust B principal to Child's estate. The term "Defined Portion" means the largest portion of Trust B that could be included in Child's federal estate without increasing the total amount of the "Transfer Taxes" actually payable at Child's death over and above the amount that would have been actually payable in the absence of this provision. The term "Transfer Taxes" means all inheritance, estate, and other death taxes, plus all federal and state GST taxes, actually payable by reason of Child's death. In the event Child fails to exercise this power, and to the extent the trust property is not subject to this power, upon Child's death, Trustee shall distribute such property, per stirpes, to Child's then living descendants, if any, and if none, to the heirs at law of Spouse.

Letter Ruling 202206008 concluded that the modification qualified for the Reg. § 26.2601-1(b)(4)(i)(D) protection from blowing GST-grandfathered status provided when the modification does not shift a beneficial interest in the trust to any beneficiary who occupies a lower generation. It also held:

> In this case, the modification of Trust B to grant Child a testamentary general power of appointment pursuant to the Court-approved Settlement Agreement will not cause Trust B property to be includible in Child's gross estate. However, the exercise by Child of Child's testamentary general power of appointment will result in the appointed property being includible in Child's gross estate under § 2041(a)(2). Accordingly, based on the facts submitted and the representations made, we conclude that the exercise by Trustee of its discretionary authority over Trust B principal upon the terms of the Settlement Agreement will result in only the trust property subject to Child's testamentary general power of appointment to be included in Child's gross estate under § 2041(a)(2).

Letter Ruling 202206008 did not address whether Child could manipulate Child's taxable estate and therefore control the scope of her general power of appointment. Therefore, I am less than enthusiastic about the formula that was described in that ruling. However, I do appreciate the ruling's tacit approval of the idea that a trustee who can distribute for a beneficiary's welfare may use that authority to grant the beneficiary a general power of appointment.[2129]

"Ed Morrow on PLR 202206008: Judicial Settlement Modification & Formula Testamentary General Powers of Appointment," Steve Leimberg's Estate Planning Email Newsletter - Archive

[2129] Letter Ruling 202206008 is briefly referred to in the text accompanying fn 6370 in part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts.

Message #2946 (3/17/2022), discussed this ruling and advocated for taxpayers to use a formula to generate a basis increase. However, privately Ed agreed with me that this is a tricky area into which one should not dive without considerable thought. Ed explored these issues more seriously than he did in that article when he wrote, "The Optimal Basis Increase and Income Tax Efficiency Trust: Exploiting Opportunities to Maximize Basis, Lessen Income Taxes and Improve Asset Protection for Married Couples after ATRA (Or: Why You'll Learn to Love the Delaware Tax Trap)" (1/1/2016, lasted revised 4/28/2018), which is available at https://papers.ssrn.com/sol3/papers.cfm?abstract_id=2436964. Although I differ with some of Ed's conclusions, his 2016/2018 paper is worthy of serious study and debate.

Without in any way focusing on the Wife's ability to manipulate her taxable estate and therefore to control the scope of her general power of appointment, Letter Ruling 200403094 held:

> Under article 4.5 of Trust, if Wife predeceases Husband, at her death Wife will possess a testamentary general power to appoint to Wife's estate or to or for the benefit of one or more persons or entities, Trust assets equal in value to Wife's remaining applicable exclusion amount less the value of Wife's taxable estate determined as if she did not possess this power. Accordingly, we conclude that, if Wife predeceases Husband, the value of Trust assets over which Wife holds a power of appointment under article 4.5 of Trust will be included in Wife's gross estate.

Similarly, also failing to consider *Kurz*, Letter Ruling 200604028 held:[2130]

> Under the terms of Trust 1, as amended, if Husband predeceases Wife, Husband will possess a testamentary general power of appointment over assets equal in value to Husband's remaining applicable exclusion amount less the value of Husband's taxable estate determined as if he did not possess this power. Accordingly, we conclude that, if Husband predeceases Wife, the value of Trust 1 assets over which Husband holds a testamentary general power of appointment will be included in Husband's gross estate.

Also, our form for how to exercise a power of appointment provides that even testamentary-type powers can be exercised by will or by other document delivered to the trustee and that the latter can specify whether it is revocable or irrevocable. I have some state-law-specific reasons for preferring that approach, but it also came in handy when we needed to have approvals by beneficiaries of certain actions and a beneficiary had fallen out of favor. The primary beneficiary was able to irrevocably exercise the power of appointment to remove that family member from being a remainderman, so that family member did not need to be involved.

If consent is required to exercise the power but no person is serving in the capacity to consent, does the lack of a person holding that position prevent the holder from having a general power? Generally, the answer is that incapacity does not prevent the general power from existing.[2131] In

---

[2130] The facts described this power using slightly different language:

> Trust 1 provides that if Wife is living at the time of Husband's death, Husband shall have a testamentary general power of appointment equal to the amount of Husband's remaining applicable exclusion amount set forth in § 2010 of the Internal Revenue Code ("Code") minus the value of Husband's taxable estate (determined by excluding the amount of those assets subject to this power).

[2131] Zaritsky and Law, "Finding Basis – It's Not Always Where You Thought It Was" (5/18/2020), includes:

> **Decedent Need Not be Competent to Exercise the Power**

Crummey, a withdrawal right constituted a presently exercisable general power of appointment even though the holder was a minor and a conservator would have needed to be appointed to exercise the withdrawal right.[2132] The relevant clause in *Crummey* provided:

> If a child is a minor at the time of such gift of that donor for that year, or fails in legal capacity for any reason, the child's guardian may make such demand on behalf of the child. The property received pursuant to the demand shall be held by the guardian for the benefit and use of the child.

Crummey reasoned:

> As we visualize the hypothetical situation, the child would inform the trustee that he demanded his share of the additions up to $4,000. The trustee would petition the court for the appointment of a legal guardian and then turn the funds over to the guardian. It would also seem possible for the parent to make the demand as natural guardian. This would involve the acquisition of property for the child rather than the management of the property. It would then be necessary for a legal guardian to be appointed to take charge of the funds. The only time when the disability to sue would come into play, would be if the trustee disregarded the demand and committed a breach of trust. That would not, however, vitiate the demand.
>
> All this is admittedly speculative since it is highly unlikely that a demand will ever be made or that if one is made, it would be made in this fashion. However, as a technical matter, we think a minor could make the demand.

A testamentary power to appoint the subject property to one's estate or its creditors is taxed as a general power of appointment, even if the individual is, on the date of death and at all times when he or she held the power, legally incompetent to exercise it. The law taxes a powerholder on the property subject to a general power if he or she "possessed" the power on or before the date of death, not whether he or she could legally exercise it. *Fish v. United States*, 432 F.2d. 1278 (9th Cir 1970); *Estate of Alperstein v. Comm'r*, 613 F.2d 1213 (2nd Cir 1979), *cert. denied sub nom. Greenberg v. Comm'r*, 446 U.S. 918 (1980); *Williams v. United States*, 634 F.2d. 894 (5th Cir. 1981); *Boeving v. United States*, 650 F.2d. 493 (8th Cir. 1981), *rev'g* 493 F.Supp. 665 (E.D. Mo. 1980); *Estate of Gilchrist v. Comm'r*, 630 F.2d 340 (5th Cir. 1980), *rev'g* 69 T.C. 5 (1977), *acq.* 1978-2 C.B. 1 (adjudication of incompetency of holder of a general power of appointment is irrelevant to estate tax treatment, unless all exercise of the power on holder's behalf, by any person or in any capacity, is barred by the adjudication under state law); *Doyle v. United States*, 358 F.Supp. 300 (E.D. Pa 1973); *Pennsylvania Bank & Trust Co. v. United States*, 451 F.Supp. 1296 (W.D. Pa. 1978), *aff'd* 597 F.2d 382 (3rd Cir. 1979); Rev. Rul. 75-350, 1975-2 C.B. 366 (marital deduction allowed for power of appointment marital trust, even though surviving spouse was mentally ill from the time of first spouse's death until time of surviving spouse's death, and under applicable state law, incapable of exercising the power); Rev. Rul. 75-351, 1975-2 C.B. 368 (minor had a general testamentary power of appointment even though, under applicable state law, minor was legally incompetent to execute a will at the time of death). But, see also *Finley v. United States*, 404 F.Supp. 200 (S.D. Fla., 1975) vacated on jurisdictional grounds, 612 F.2d 166 (5th Cir. 1980) (decedent, from time of devise of general power of appointment until her death lacked legal capacity to exercise general testamentary power of appointment, and so did not "possess" a general power of appointment for estate tax purposes).

[2132] Citation is found in fn 5852 in part III.A.2 Liability Issues.

Crummey concluded:[2133]

> All exclusions should be allowed under the *Perkins* test or the "right to enjoy" test in *Gilmore*. Under *Perkins*, all that is necessary is to find that the demand could not be resisted. We interpret that to mean legally resisted and, going on that basis, we do not think the trustee would have any choice but to have a guardian appointed to take the property demanded.

Requiring the consent of a nonadverse party does not prevent recognition of the general power of appointment.[2134] Reg. § 20.2041-3(c)(2) provides:

> Such power is not considered a general power of appointment if it is not exercisable by the decedent except with the consent or joinder of a person having a substantial interest in the property subject to the power which is adverse to the exercise of the power in favor of the decedent, his estate, his creditors, or the creditors of his estate. An interest adverse to the exercise of a power is considered as substantial if its value in relation to the total value of the property subject to the power is not insignificant. For this purpose, the interest is to be valued in accordance with the actuarial principles set forth in § 20.2031-7 or, if it is not susceptible to valuation under those provisions, in accordance with the general principles set forth in § 20.2031-1. A taker in default of appointment

---

[2133] Below the court referred to *Perkins v. Commissioner*, 27 T.C. 601 (1956), which at 604-605 held:

> The issue as to whether a gift is of a present or future interest is not one of the time of vesting, but rather whether there is any substantial barrier to the present use, possession, or enjoyment by the donee. *Commissioner v. Disston*, 325 U.S. 442; *Fondren v. Commissioner*, 324 U.S. 18; *Ryerson v. United States*, 312 U.S. 405; *United States v. Pelzer*, 312 U.S. 399; *Commissioner v. Sharp*, 153 F.2d 163 (C.A. 9). There is infinite variety in the possible terminology of trust instruments and the circumstances surrounding their creation, and each case must be decided in the light of its own trust instrument and surrounding circumstances. *Commissioner v. Kempner*, 126 F.2d 853 (C.A. 5).
>
> The trust instruments by themselves appear to have given a present interest to the beneficiaries. Each provides that notwithstanding all other provisions the beneficiary, his duly appointed guardian, or his parent may at any time demand and receive all of the income and principal. To be sure, the beneficiaries were minors and unable effectively to exercise that right, and only with respect to two gifts in 1953 to one of the seven beneficiaries was there a duly appointed guardian at the time of the making thereof. Had the power to demand income or principal been limited to the beneficiaries or their duly appointed guardians, respondent's position, at least as to all gifts other than the two aforementioned, might well be tenable; there would have been at the time such gifts were made no person who could make an effective demand for immediate use, possession, and enjoyment by the beneficiaries. *Stifel v. Commissioner*, 197 F.2d 107 (C.A. 2), affirming 17 T.C. 647. *But cf. United States v. Baker*, 236 F.2d 317 (C.A. 4); *Gilmore v. Commissioner*, 213 F.2d 520 (C.A. 6), *reversing* 20 T.C. 579; *Kieckhefer v. Commissioner*, 189 F.2d 118 (C.A. 7), *reversing* 15 T.C. 111.
>
> In the instant proceeding, however, this right was also given to the adult parents of the beneficiaries, none of whom appears to have been incompetent to exercise the power thus bestowed. Therefore, with respect to each of the gifts in question there was at all times someone who could have made an effective, binding demand for principal and income. By the terms of the trusts alone, there was no substantial bar to present use, possession, and enjoyment by the donees.
>
> Petitioners expected the trusts to continue for a substantial period and did not anticipate actual exercise by any of the parents of that power. But we do not agree with respondent that such expectation is more than precatory, or that it vitiates the clear right unmistakably given.

[2134] *Maytag v. United States*, 493 F.2d 995 (10th Cir. 1974), *aff'g* 1972 WL 3201, 31 A.F.T.R.2d 73-1357 (D. Colo. 1972).

> under a power has an interest which is adverse to an exercise of the power. A coholder of the power has no adverse interest merely because of his joint possession of the power nor merely because he is a permissible appointee under a power. However, a coholder of a power is considered as having an adverse interest where he may possess the power after the decedent's death and may exercise it at that time in favor of himself, his estate, his creditors, or the creditors of his estate. Thus, for example, if X, Y, and Z held a power jointly to appoint among a group of persons which includes themselves and if on the death of X the power will pass to Y and Z jointly, then Y and Z are considered to have interests adverse to the exercise of the power in favor of X. Similarly, if on Y's death the power will pass to Z, Z is considered to have an interest adverse to the exercise of the power in favor of Y. The application of this subparagraph may be further illustrated by the following additional examples in each of which it is assumed that the value of the interest in question is substantial:
>
> *Example (1)*. The decedent and R were trustees of a trust under the terms of which the income was to be paid to the decedent for life and then to M for life, and the remainder was to be paid to R. The trustees had power to distribute corpus to the decedent. Since R's interest was substantially adverse to an exercise of the power in favor of the decedent the latter did not have a general power of appointment. If M and the decedent were the trustees, M's interest would likewise have been adverse.
>
> *Example (2)*. The decedent and L were trustees of a trust under the terms of which the income was to be paid to L for life and then to M for life, and the remainder was to be paid to the decedent. The trustees had power to distribute corpus to the decedent during L's life. Since L's interest was adverse to an exercise of the power in favor of the decedent, the decedent did not have a general power of appointment. If the decedent and M were the trustees, M's interest would likewise have been adverse.
>
> *Example (3)*. The decedent and L were trustees of a trust under the terms of which the income was to be paid to L for life. The trustees could designate whether corpus was to be distributed to the decedent or to A after L's death. L's interest was not adverse to an exercise of the power in favor of the decedent, and the decedent therefore had a general power of appointment.

Estate of Towle v. Commissioner, 54 T.C. 368, 370 (1970), held:[2135]

[2135] At 370-371, the court cited supporting cases then listed further support:

> *Reinecke v. Smith*, 289 U.S. 172 (1933), so holds with respect to the income tax and its principles are fully applicable to the estate tax. *Northern Trust Co. v. United States*,389 F.2d 731 (C.A. 7, 1968); *New England Merchants Nat. Bank of Boston v. United States*, 384 F.2d 176 (C.A. 1, 1967); *Welch v. Terhune*, 126 F.2d 695 (C.A. 1, 1942); *William R. Steward*, 28 B.T.A. 256 (1933), vacating 27 B.T.A. 593 (1933), affirmed *sub nom. Witherbee v. Commissioner*, 70 F.2d 696 (C.A. 2, 1934). This conclusion is further supported by the following statement in the committee reports which accompanied the original enactment of the pertinent portion of section 2041, as an amendment to section 811(f) of the 1939 Code, by the Powers of Appointment Act of 1951, 65 Stat. 91:
>
> > a future joint power is totally exempt if it is not exercisable by the decedent except with the consent or joinder of a person having a substantial interest, in the property subject to the power, which is adverse to the exercise of the power in favor of the decedent, his estate, his creditors, or the creditors of his estate. A taker in default of appointment has an interest which

> As a general rule, the interest of a nonbeneficiary trustee is neither substantial nor adverse. *Reinecke v. Smith*, 289 U.S. 172 (1933), so holds with respect to the income tax and its principles are fully applicable to the estate tax.

After citing Reg. § 20.2041-3(c) and *Estate of Towle v. Commissioner*, Rev. Rul. 79-63 held:

> Under the terms of the trust in the present case the decedent could cause the trust principal to be distributed during lifetime only with the consent of A. However, in this case, the interest held by A does not amount to a substantial interest in the property subject to the power, that is adverse to exercise of the power in favor of the decedent, for purposes of section 2041(b)(1)(c)(ii).
>
> In this case, A is a taker in default not of the lifetime power in which A has a power of consent but rather of the testamentary power exercisable solely by the decedent. In such a situation A would not have necessarily been in a better economic position after the decedent's death by refusing to exercise the power in favor of the decedent during the decedent's lifetime. Thus, the fact that A might survive the decedent and receive an

---

> is adverse to such an exercise. Principles developed under the income and gift taxes will be applicable in determining whether an interest is substantial and the amount of property in which the adversity exists. A coholder of the power has no adverse interest merely because of his joint possession of the power nor merely because he is a permissible appointee under a power, since neither the power nor the expectancy as appointee is an "interest" in the property.

[See H. Rept. No. 327, to accompany H.R. 2084 (Pub. L. 58), 82d Cong., 1st Sess., pp. 5-6 (1951); S. Rept. No. 382 to accompany H.R. 2084 (Pub. L. 591), 82d Cong., 1st Sess., p. 5 (1951).]

In *Reinecke v. Smith*, *supra*, the Supreme Court stated:

> In approaching the decision of the question before us it is to be borne in mind that the trustee is not a trustee of the power of revocation and owes no duty to the beneficiary to resist alteration or revocation of the trust. Of course he owes a duty to the beneficiary to protect the trust res, faithfully to administer it, and to distribute the income; but the very fact that he participates in the right of alteration or revocation negatives any fiduciary duty to the beneficiary to refrain from exercising the power.

[See 289 U.S. at 176-177.]

We think that the phrase "substantial interest in the property, subject to the power, which is adverse to exercise of the power in favor of the decedent," as used in section 2041(b)(1)(C)(ii), was intended at the very least to require that the third person have a present or future chance to obtain a personal benefit[5] from the property itself. *Cf. Latta v. Commissioner*, 212 F.2d 164, 167 (C.A. 3, 1954); *Commissioner v. Prouty*, 115 F.2d 331, 335-336 (C.A. 1, 1940), affirming in part and reversing and remanding in part 41 B.T.A. 274 (1940).[6] Compare also the provisions of section 2041(b)(1)(C)(iii), which exclude, on an allocable basis, a portion of property subject to a power which would otherwise be a general power of appointment, but which is exercisable "in favor of" a person whose consent is required.

[5] Whether such benefit includes, not only the possibility of direct realization, but also the possibility of indirect realization through a power affirmatively to dispose of an interest in the property to others is a question we are not now required to decide. See 5 Mertens, Law of Federal Gift & Estate Taxation, sec. 34.68, p. 302.

[6] The rationale of the Prouty case as to what constitutes an adverse interest has been accepted by this Court. See *Estate of Leon N. Gillette*, 7 T.C. 219, 222 (1946). See also *Strite v. McGinnes*, 330 F.2d 234, 240 (C.A. 3, 1964), affirming 215 F.Supp. 513 (E.D. Pa. 1963), where the court accepted without discussion the proposition that a corporate trustee, who was a coholder of a power of appointment, was a nonadverse party where the remaindermen were the decedent's nieces and nephews.

> interest in the property, if the decedent failed to exercise the testamentary power in favor of persons other than A, does not elevate A's interest as a consenting party of the lifetime power to a substantial adverse interest.
>
> Consequently, the decedent's power falls within the definition of a "general power of appointment" because A did not have a substantial interest in the property that was adverse to the exercise of the power in favor of the decedent. If, however, A had been the decedent's only child, A would have had a vested interest in the trust remainder that would have been substantially adverse to the exercise of the decedent's lifetime power of appointment. See *Commissioner v. Prouty*, 115 F.2d 331 (1st Cir. 1940); *Newman v. Commissioner*, 1 T.C. 921 (1943).
>
> Under section 20.2041-3(c)(3) of the regulations, quoted above, the amount includible in the decedent's gross estate is the value of property subject to the general power of appointment divided by the number of holders of the power who are also permissible appointees. In the present case A was a permissible appointee but not a coholder of the decedent's general power of appointment. The requirement that A consent to the exercise of the power held by the decedent does not raise A to the status of a coholder or joint holder of such power. Compare Rev. Rul. 76-503, 1976-2 C.B. 275 where one-third of the value of trust property was includible in the gross estate of the decedent where the decedent, along with two other coholders, had a general power of appointment. Unlike Rev. Rul. 76-503, in this case A did not have a power but could only consent to the decedent's exercise of a power, and therefore, was not a coholder of a power.
>
> Accordingly, in the present case, the total value of the trust property (as of the date of death of the decedent or appropriate alternate valuation date) is includible in the gross estate of the decedent under section 2041 of the Code as property subject to a general power of appointment.

Reading together Reg. § 20.2041-3(c), *Estate of Towle v. Commissioner*, and Rev. Rul. 79-63, a person who is not a taker in default of a power of appointment is not an adverse party, and a person who is a taker in default of a testamentary power of appointment is not, solely by reason of that status, adverse with respect to the exercise of an inter vivos power of appointment. A logical extension of Rev. Rul. 79-63 would seem to support the position that a taker in default of a testamentary power of appointment does not, solely by being a taker in default, have an adverse party with respect to distributions that are made before the death of the holder of the testamentary power of appointment.[2136]

A claim against property subject to a general power of appointment may affect its value but not a power of appointment's status as a general power.[2137]

[2136] Thus, a person who is a remainderman and not a current permissible distributee would seem not to have an adverse interest to what occurs during trust administration before the death of the holder of a power of appointment that could divest the remainderman's interest. This would seem to prevent gift tax consequences from resulting from a trust modification that affects administration before that death, perhaps curing concerns raised by part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts.

[2137] *Witkowski v. United States*, 451 F2d 1249 (5th Cir. 1971), *cert. denied*, 409 U.S. 891 (1972), reasoned:

Actually two distinct variants on the same theme are being played here. The first is the contention that Mrs. Witkowski was legally barred from conveying the property without the joinder of the sons because under State law they held what was in effect a constructive trust secured by the farm.[4] The second amounts to the theory that practically speaking the decedent could not have exercised her power alone because the sons' alleged equitable claim eliminated any realistic probability of her finding a prospective purchaser or mortgagee who would have accepted her clouded title.[5]

[4] [distinguished this case from *Faville v. Robinson*, 227 S.W. 938 (1921)]

[5] To support this contention Taxpayer introduced the expert testimony of a title attorney to the effect that the property could not have been conveyed or mortgaged without the joinder of the sons. Of course, this testimony is not conclusive on the legal issue of whether under Texas law Leo and Vernon actually held a substantial adverse interest in the farm.

Neither of these positions is tenable. Like the District Court we have serious doubts as to whether the "substantial adverse interest" contemplated by § 2041(b)(1)(C)(ii) can arise other than by the simultaneous creation of such an interest and the power in the same instrument, obviously the paradigmatic case foreseen by Congress when it carved out this exception to the definition.[6] Even assuming, however, that the holder of a general power of appointment may by his own acts estop himself from exercising it, the evidence here clearly establishes that Mrs. Witkowski's authority under Texas law was not restrained by any legally enforceable restriction.

[6] The language of § 2041(b)(1)(C) strongly suggests that the definitional exception extends only to adverse interests created concurrently with what would otherwise be a general power, rather than to those arising after its creation, but since there is apparently little authority one way or another on the subject we need not and do not decide the question here.

In the first place, neither the 1964 oral agreement between Mrs. Witkowski and her sons nor the quitclaim deed from Winifred and her husband created any present interest in the property in either Leo or Vernon. Texas courts have frequently recognized and applied the principle that oral agreements to devise or convey real property are not enforceable. "A contract to make a will to dispose of property to certain beneficiaries is a contract to convey and must conform to the Statute of Frauds." [various Texas state court citations] Since the purported agreement between the decedent and her sons was never reduced to writing, no legally enforceable interest ever arose, much less the "substantial adverse interest" required to exempt Mrs. Witkowski's authority from the statutory definition of a general power of appointment.

Nor can the appellant prevail on the alternative theory that the practical exercise of Mrs. Witkowski's power was thwarted by the sons' asserted equitable claim and its purported adverse effect on the marketability of her title. If the decedent in fact possessed the authority under the provisions of her husband's will and applicable Texas law to convey or mortgage the property without the joinder of her sons—and it is apparent that she did—the possibility that as a practical matter few if any prospective purchasers or mortgagees would be willing to take a deed or mortgage signed by her alone is totally irrelevant. The decedent's title may have been questionable for any number of reasons, apart from the putative interests of Leo and Vernon, yet such defects could not have exempted from the burden of Federal estate taxation an otherwise incontestable general power of appointment.[7] The power is taxable if it exists, even though other claimants to the property may have hindered its exercise.

[7] Of course, on these facts the appellant might have made a quite different argument—that is, that the value of the property subject to the decedent's power was something less than what otherwise would have been its fair market value because the substantial possibility of future claims by the sons might have necessitated a lower return from a sale or mortgage had Mrs. Witkowski proceeded on her own. This would go, not to taxability, but to the amount of it. However, the Commissioner's valuation of the property was never contested by Taxpayer, either in his claim for refund or in his pleading in the District Court, and we assume that he chose to stand or fall on his theory that the sons held a substantial interest adverse to the exercise of the decedent's power.

In short, the District Court correctly refused to submit the estoppel theory to the jury because the uncontested facts clearly revealed that under Texas law neither son held the necessary

When three trustees may distribute all of the trust's property, to anyone, even themselves (with no ascertainable standard), each trustee has a general power of appointment over one third of the trust, whether the trustees act unanimously[2138] or by majority vote.[2139]

Rev. Rul. 82-156 held that notice to adverse parties, who may trigger a veto power in a nonadverse party, did not prevent the power from being a general power. The facts were:

> D, the decedent, provided by will that one-half of D's adjusted gross estate be placed in a trust in which S, D's spouse, was entitled to all the income annually for life. In addition, S was granted the power, commencing at D's death and at any time during S's lifetime, to appoint trust corpus in such amounts and at such times as S chose in favor of S or S's creditors. D's will provided further that any corpus remaining in trust at S's death should pass to A and B in equal shares.
>
> The will provided that any proposed exercise of the power of appointment by S must be preceded by notice to A and B, and if either objected to a proposed exercise of the power of appointment, the matter was to be submitted for resolution to the trustee of the testamentary trust, a bank, whose decision was binding.
>
> D died in 1982. D's executor did not make an election under section 2056(b)(7) of the Code with respect to the property passing to the testamentary trust. S subsequently died in 1982.

Rev. Rul. 82-156 reasoned:[2140]

> Under the facts of the ruling, S was granted a life estate in all the trust's income coupled with a power to appoint trust corpus in favor of S or S's creditors. S's power was exercisable, in effect, either with the joint consent of A and B, or with the consent of the trustee. The consent of A and B made the consent of the trustee unnecessary, and conversely, the consent of the trustee made the consent of A and B unnecessary. Since the trustee had no adverse interest for purposes of section 2041, and since S could freely exercise the power of appointment as long as the trustee consented, S had a general power of appointment within the meaning of section 2041. S's power was not, however, exercisable "alone and in all events" for purposes of section 2056.

When a trust authorized the trustee to grant or eliminate a general power of appointment[2141] but the person serving as trustee was prohibited from exercising that power, amending the trust to

---

> substantial interest in the property adverse to the exercise of the power of appointment created by the will.

[2138] Rev. Rul. 76-503.

[2139] Rev. Rul. 77-158.

[2140] Its ultimate conclusion was a double-whammy:

> Because S could not exercise the power of appointment alone and in all events, the exception to the terminable interest rule under section 2056(b)(5) of the Code does not apply and the marital deduction is not allowable. Further, because S possessed a general power within the meaning of section 2041 of the Code over the trust assets, those assets are includible in S's gross estate, on S's subsequent death.

[2141] Letter Ruling 201845006 involved a trust with the following powers that a trustee could exercise only if the trustee was not a beneficiary:

appoint a special trustee authorized to exercise that power did not have any GST[2142] or gift/estate tax[2143] consequences. However, if the power is actually turned off (or the power never existed, someone could have granted the power, but that never happened), the mere possibility of a person holding a general power should not itself constitute a general power.[2144]

Section 3.091 to create in a lineal descendant of the Grantor a testamentary general power of appointment within the meaning of IRC § 2041 [including the power the exercise of which requires the consent of the Trustee (other than any beneficiary)];

Section 3.092 to limit a general power of appointment of a lineal descendant of the Grantor, as to all or part of such principal at any time prior to the death of such lineal descendant by narrowing the class to whom the powerholder may appoint the property subject to such appointment, so as to convert such power into a special power of appointment;

Section 3.093 to eliminate such power for all or any part of such principal as to which such power was previously created

[2142] Letter Ruling 201845006 concluded as to the trust's GST status:

Pursuant to the Court's Order, under new Section 8.06, Bank 2 is named as special trustee for the limited purpose of exercising the powers given to a non-beneficiary trustee, including, but not limited to, powers set forth in Section 3.09 of Trust. The proposed modification of Trust will not result in a shift of any beneficial interest in the trust to any beneficiary who occupies a generation lower than the persons holding the beneficial interests. Further, the proposed modification of Trust will not extend the time for vesting of any beneficial interest in the modified Trust beyond the period provided for in Trust. Accordingly, based on the facts submitted and the representations made, we conclude that the proposed modification of Trust will not adversely affect Trust's GST inclusion ratio.

[2143] Letter Ruling 201845006 reasoned and concluded as to the effect for gift and estate tax purposes:

In this case, Son and Child 1 have beneficial interests in Trust and are the current Co-Trustees. Section 3.09 grants to a non-beneficiary trustee certain trustee powers, including the power to limit or eliminate Son's testamentary general power of appointment under Section 2.013. Prior to the modification, the terms of Trust did not provide a method for appointing a non-beneficiary trustee who may exercise the powers in Section 3.09 granted to only non-beneficiary trustees. The modification of Trust to add Section 8.06 to provide a method for appointing an independent special trustee who may exercise the powers set forth in Section 3.09, and to appoint Bank 2 as an independent special trustee with the authority to exercise the powers set forth in Section 3.09 of Trust, does not change or transfer the interests of Son during his lifetime, nor does it confer any new rights to any beneficiaries. Rather, the modification provides a process for the powers set forth in Section 3.09 to be administered by a non-beneficiary trustee (*i.e.*, Special Trustee). The testamentary power of appointment granted to Son in Section 2.013 occurs upon the death of Son, and is not currently exercisable by Son. Son retains the same interest in Trust, both before and after the modification.

Accordingly, based on the facts submitted and the representations made, we conclude that Bank 2's acceptance and appointment to the office of Special Trustee of Trust pursuant to the Order will not constitute the exercise or release of a general power of appointment under § 2514 so as to constitute a gift by Son for federal gift tax purposes. Further, we conclude that the exercise of trustee powers, including those delineated in Sections 3.092 and 3.093 of Trust by Bank 2, or a successor Special Trustee, to limit or eliminate Son's testamentary general power of appointment granted under Section 2.013 of Trust will not constitute the exercise or release of a general power of appointment under § 2041(a)(2), and, as a result, the Trust assets will not be included in Son's gross estate under § 2041(a)(2).

[2144] By negative implication, *Johnstone v. Commissioner*, 76 F.2d 55 (9th Cir. 1935), *cert. denied*, 296 U.S. 578 (1935), *aff'g* 29 B.T.A. 957 (1934), supports this proposition:

The contingency which would have prevented his exercise of the power did not happen, and decedent was entitled to exercise the general power of appointment given him in the several trust agreements.

Modifying a trust to add a general power of appointment may have gift/estate/GST tax consequences. For that and related issues, see part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts.

If an exercise of a power of appointment would extend the time for vesting beyond the rule against perpetuities set forth in the trust agreement and therefore be impermissible, consider clarifying the exercise to cut it back to the permitted period. Letter Ruling 202108001 held that such a clarification prevented the exercise of a general power and preventing triggering Code § 2041(a)(3) and did not affect GST grandfathering.

Now that we have discussed sophisticated provisions and various consequences, consider simplicity in the scope. If the holder's estate will never be big enough to generate estate tax, then consider making the general power plenary. However, consider whether the holder might move to a state that imposes estate tax.

One may want to require the consent of a nonadverse party if one has any concerns about the holder. The holder may be totally fine now, but anyone could lose capacity due to physical illness or may become frail and dependent on a person who is or becomes a predator. Consider requiring the consent of a corporate trustee or any substitute nonadverse party approved by family members (or appointed by the holder and not vetoed by family members after notice). Consent might be required only for the "general" aspects of the power, not for an exercise that keeps assets within the family. Also, consent would not be required to the extent exercised to pay estate tax resulting from the general power.

II.H.3. Valuation Discounts – Friend or Enemy

Adjustments for lack of control and lack of marketability are not really some magical artificial value reduction – they merely reflect proper valuation. Nevertheless, the fact that the value of an interest in an entity often is smaller than a pro rata share of the entity's underlying assets is popularly referred to as a discount, so we will reluctantly use that term here.

Although a discount might save estate taxes, it also causes a reduced basis. If the discount does not save estate tax, then it reduces the basis of a discounted asset included in one's estate. If this is unfavorable and the taxpayer wants to engage in an uphill battle to argue that Code § 2036 causes estate tax inclusion,[2145] see fn 5699 in part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss) and also see part III.C Code § 2036.

Same with *Keeter v. United States*, 461 F.2d 714 (5th Cir. 1972), *rev'g* 323 F.Supp. 1093 (N.D. Fl. 1971):

> A revocable power of appointment that is not revoked by the settlor becomes, upon his death, a full-fledged power of appointment. What the settlor might have done with the power that he granted is of no relevance to this case.

[2145] For when an entity is disregarded and Code § 2036 (an issue into which this document does not delve), see fn 91 in part II.A.2.d.i Benefits of Estate Planning Strategies Available Only for S Corporation Shareholders.

Although partnerships work better than other entities on a few levels,[2146] having a discounted partnership interest included in one's estate can cause an unfavorable basis change in assets held in the partnership (an "inside basis"):[2147]

- if the partnership has a Code § 754 election in place, or
- if the partnership's assets (in the aggregate) have a basis that exceeds their value by more than $250,000.

This effect on inside basis depends on whether the asset has unrealized gain or loss:[2148]

- If the asset has an unrealized gain, the valuation discount can reduce or eliminate a basis increase but cannot generate a basis reduction.
- If the asset has an unrealized loss, the valuation discount can generate a basis reduction, but not below the asset's value.

Also see part III.E Fairness Within Families; Valuation.

II.H.4. How the Presence or Absence of Goodwill Affects the Desirability of Basis Step-Up in a Partnership or S corporation

Self-created goodwill (goodwill created through business entity operations rather than purchased from the seller of a business) generally has a zero tax basis yet very substantial value. A partnership structure is important to secure the basis step-up or to facilitate a tax-efficient seller-financed sale.[2149]

Some entities do not have any significant goodwill. Goodwill generally is measure by an entity's rate of return in excess of what an owner could earn investing capital in other places. An entity that is not an operating business generally would not have goodwill. Also, some businesses do not generate a high enough rate of return on their capital to have significant goodwill; they earn just enough to pay their owners and employees reasonable compensation for services provided and perhaps a very modest profit on invested capital. See parts II.Q.1.c.iii Does Goodwill Belong to the Business or to Its Owners or Employees? and II.Q.7.h.v Taxpayer Win in *Bross Trucking* When IRS Asserted Corporation Distribution of Goodwill to Shareholder Followed by Gift to Shareholder of New Corporation (2014).

If a partnership or an S corporation has no significant goodwill and its other assets have values close to basis, then the basis of owner's interest in the company might be relatively close to a proportionate share of the basis and fair market value of the assets that the company owns. In that case, including the owner's interest in the company in the owner's estate might produce no

[2146] See part II.E Recommended Structure for Entities.
[2147] See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.
[2148] See part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest, especially fn. 4241.
[2149] See part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis. See also parts II.E Recommended Structure for Entities and II.Q.7.h Distributing Assets; Drop-Down into Partnership.

significant basis increase or might even produce a basis decrease when the owner dies; see part II.H.2.i Avoiding a Basis Step-Down.

Note that goodwill that is not being amortized and is held by a partnership would be eligible for a basis step if a Code § 754 election is in place.[2150]

Whether or not goodwill is being amortized, a controlled corporation's sale or distribution of goodwill might generate ordinary income.[2151] Using a partnership that essentially allows one to deduct the goodwill's value in a manner that avoids capital gain on the sale of goodwill prevents this result.[2152]

II.H.5. Irrevocable Trust Planning and Basis Issues

II.H.5.a. Irrevocable Trust Planning and Basis Issues - Generally

For various strategies involving grantor trusts, see part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.[2153] One of the problems with those techniques is that the estate tax saved might not make up for the lack of basis step-up on death, if the techniques use low-basis assets. If that is a concern, see part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

Consider the following from fn 191 on page I-A-61 of Bramwell, Eastland, McCaffrey, and Morrow, "Creative Planning Techniques with Grantor and Non-Grantor Trusts," 2020 Heckerling Institute on Estate Planning:

> The following formula may be used to determine X, the amount of total investment return a transferred appreciated asset must generate to offset the potential income tax cost of the loss of basis step up under Section 1014 at the death of the transferor:
>
> $X = ((E)(V) - (I)(B)) \div (E-I)$
>
> In this formula, the letter E means the highest combined federal and state estate tax rate applicable in the year of the transferor's death to the estates of decedents who die domiciled in the transferor's state of domicile. The letter I means the highest combined federal and state income tax rate applicable to the transferee's long-term capital gains. The letter V means the value of the transferred asset as finally determined for federal gift tax purposes. The letter B means the basis of the transferred asset for federal income tax purposes. See Carlyn McCaffrey, "Tax Tuning the Estate Plan by Formula," 33rd Annual Heckerling Institute on Estate Planning ¶ 402.2 (1999).

2150 See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000, fn. 5684.

2151 See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), especially fns. 5081-5085.

2152 See parts II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis and II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.

2153 Especially parts III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment, III.B.2.g Income Tax Concerns When Removing Property from the Estate Tax System, and III.B.2.j Tax Allocations upon Change of Interest in a Business, especially part III.B.2.j.i Changing Grantor Trust Status.

That formula does not consider the estate savings of income tax paid by the deemed owner of an irrevocable grantor trust.[2154] Nor does it consider the effect of using lifetime gift tax exemption before a possible decrease.[2155]

If the grantor trust has high basis assets (including businesses whose assets have values that are not in excess of basis; see parts II.H.2.i Avoiding a Basis Step-Down and II.H.4 How the Presence or Absence of Goodwill Affects the Desirability of Basis Step-Up in a Partnership or S corporation), keeping them outside the estate tax system might make a lot of sense, in that the grantor is paying the income tax on each year's earnings (which earnings add to the basis in the trust's assets).

It has been suggested that one should not use one's estate tax exemption to give away assets to avoid estate tax on their appreciation. Generally, a leveraged transaction, such as a GRAT or a sale to an irrevocable grantor trust, would be better. However, if the asset has a high basis and will continue to have a high basis and the client does not want to mess with a sale, then a gift to an irrevocable grantor trust might be appropriate.

The death of the deemed owner of an irrevocable trust does not, in and of itself, trigger a new basis.[2156] To get an irrevocable grantor trust's assets included in the primary beneficiary's estate, consider giving the beneficiary a formula general power of appointment; see part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap. Because the consent of a trustee who is a nonadverse party can be required, this tool can cause estate inclusion without jeopardizing the remaindermen's interests in any practical way. In contrast, a distribution to the beneficiary exposes the assets to risks (although that may be handy to permit annual exclusion gifting if careful to avoid step transactions). In any event, be sure that whatever one does is authorized, so that it cannot be undone.[2157]

II.H.5.b. Moving Real Estate or Other Low-Basis Property from Irrevocable Trust to Grantor

This part II.H.5.b assumes one has an irrevocable grantor trust (IGT) with assets with value in excess of basis (low-basis assets) that need to be transferred to the grantor in exchange for assets with values close to basis (high-basis assets). For an explanation of IGTs, see part III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment.

If an irrevocable trust is not a grantor trust, consider establishing an identical trust that is a grantor trust (perhaps using a swap power) and merging the nongrantor trust into the grantor trust, so that the above sale can be done.[2158] However, if the existing trust has liabilities in excess of basis, consider any income tax consequences that might result from such a merger.

If the grantor is buying the assets using debt, not everyone is comfortable using a promissory note that the grantor owes the trust, out of concern over the note's basis; if the note has a basis

2155 See part II.H.12 Large Taxable Gifts to Lock in Lifetime Gift/Estate Tax Exemption.
2156 Rev. Rul. 2023-2, which is quoted extensively in part III.B.2.a Tax Basis Issues When Using Irrevocable Grantor Trusts.
2157 See fn 6346 in part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts.
2158 See part III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment, especially part III.B.2.d.i Federal Income Tax and Irrevocable Grantor Trust Treatment, fn. 6533.

less than its face value, the market discount rules may treat any difference as ordinary income[2159] to any holder other than the original holder.[2160] To avoid this concern, consider having someone other than the trust loan the money to the grantor. A bank would be willing to loan 100%, if it keeps a security interest in the loan proceeds. For a full description of this strategy, see part II.H.10 Extracting Equity to Fund Large Gift; however, where part II.H.10 suggests the donor paying a guarantee fee to the donee, in this case the grantor would pay a guarantee fee to the trust.

II.H.5.c. Preferred Partnership In Conjunction with GRAT or Sale to Irrevocable Grantor Trust of an S corporation

Suppose the client has determined that an S corporation needs to be moved outside of the estate tax system using, for example, part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.

Generally, the S corporation's assets do not receive an inside basis step-up on the client's death or even on the trust's sale of its stock in the S corporation. See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.

Although an S corporation might in certain limited circumstances replicate an inside basis step-up upon death, that strategy does not necessarily work well. See part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation.

[2159] The IRS might argue that the note has basis equal to the basis of the common interest. Before the grantor dies, for income tax purposes the trust didn't exist. For income tax purposes, the grantor – not the trust – owned whatever property was in the trust until the grantor died. So, the grantor's death should be taken as the event that first created the trust for income tax purposes. For income tax purposes, there was no sale – simply a gift or bequest by the grantor of a note to the trust. Therefore, such an IRS argument would appear not to work. However, given that no authority directly addresses this issue, let's consider it: If the IRS were to win that argument and the Code § 1276 market discount rules were to apply, any principal payments in excess of basis would have a character similar to that of interest income.

[2160] Code § 1278(a)(1)(D) provides:

- (i) *In general*. Except as otherwise provided in this subparagraph or in regulations, the term "market discount bond" shall not include any bond acquired by the taxpayer at its original issue.
- (ii) *Treatment of bonds acquired for less than issue price*. Clause (i) shall not apply to any bond if—
  - (I) the basis of the taxpayer in such bond is determined under section 1012, and
  - (II) such basis is less than the issue price of such bond determined under subpart A of this part.
- (iii) *Bonds acquired in certain reorganizations*. Clause (i) shall not apply to any bond issued pursuant to a plan of reorganization (within the meaning of section 368(a)(1)) in exchange for another bond having market discount. Solely for purposes of section 1276, the preceding sentence shall not apply if such other bond was issued on or before July 18, 1984 (the date of the enactment [7/18/84] of section 1276) and if the bond issued pursuant to such plan of reorganization has the same term and the same interest rate as such other bond had.
- (iv) *Treatment of certain transferred basis property*. For purposes of clause (i), if the adjusted basis of any bond in the hands of the taxpayer is determined by reference to the adjusted basis of such bond in the hands of a person who acquired such bond at its original issue, such bond shall be treated as acquired by the taxpayer at its original issue.

Although the debtor changes when the grantor dies, the trust would be the original holder and presumably would receive capital gain treatment, as would any residual beneficiary of the trust who does not receive the note in a pecuniary bequest.

Therefore, in conjunction with the sale, the S corporation might form a preferred partnership.[2161] For a general explanation of preferred partnerships, see part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion. For migrating into a preferred partnership, see part II.E.7.c Flowcharts: Migrating Existing Corporation into Preferred Structure, as well as part II.Q.7.h Distributing Assets; Drop-Down into Partnership, especially part II.Q.7.h.viii Value Freeze as Conservative Alternative.

The irrevocable grantor trust would need to be funded with or borrow from a bank or a related party enough cash to contribute to invest in the 99% common interest in the partnership (the S corporation would retain a 1% common interest, perhaps as a general partner, in the partnership). See also part II.M.3 Buying into or Forming a Partnership.

Eventually, the grantor might buy the common interest from the irrevocable grantor trust, preferably borrowing from a bank in a manner similar to that described in part II.H.10 Extracting Equity to Fund Large Gift, not only to fund the grantor's purchase but also to strip the increase in equity that might occur if the property increases in value. This strategy would provide for a basis step-up at little or no estate tax cost.

II.H.5.d. Using Grantor's Parent's Exemption for Basis Step-Up

If the grantor's parent is living and does not already have a taxable estate, consider including the parent as a beneficiary of an irrevocable grantor trust that would not otherwise get a basis step-up and granting the parent a general power of appointment in favor of the parent's creditors that is effective upon death. The power would be exercisable only with the consent of an independent person and would apply only to the extent of assets that would generate a basis step-up without incurring estate tax. For how to write such a power, see text accompanying fns 2127-2128 in part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap.

However, if the parent is receiving means-test government benefits, such as Medicaid or SSI, consult an expert in the area whether such a trust might jeopardize these benefits.

Inclusion in the parent's estate does not change the donor's status as the grantor for purposes of the grantor trust rules except to the estate the parent actually exercises the power.[2162]

ACTEC Fellow Mickey Davis coined this idea the ""Accidentally Perfect Grantor Trust," when describing this is more detail at http://daviswillms.com/yahoo_site_admin/assets/docs/Planning_for_New_Basis_at_Death2015.68160224.pdf and elsewhere.

II.H.6. Basis Shifting Opportunities Other Than Grantor Trusts

One could simply distribute low-basis property to a partner in redemption of the low basis partnership interest of a partner with a short life expectancy, to better focus basis step-up at the partner's death or avoid the need to make a Code § 754 election.

[2161] Formation of the preferred partnership when the sale occurs is not required, but doing so would provide more efficiency in appraisal fees incurred.

[2162] Reg. § 1.671-2(e)(5), which is reproduced in fn 6620 in part III.B.2.h.i Who Is the Grantor.

See parts II.Q.8.a Partnership as a Master Entity and II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property, which also discusses like-exchanges, for opportunities to:

- Shift basis from assets that are intended to be held for a while to assets that likely to sold in the near future, or
- Strip basis from high basis property to property that is then distributed to a partner with a short life expectancy, so that basis step-up at death is focused on targeted assets.

A gift to a person with a short life expectancy would be eligible for a basis step-up, so long as the donee does not die within one year of the gift or the gifted property does not pass back to the donor.[2163]

II.H.7. Passive Losses – When Basis Step-Up Might Not Be Favorable

A decedent's suspended passive losses are lost to the extent that the asset generating the passive losses received a basis step-up at the decedent's death.[2164]

In planning for basis step-up, consider which is more valuable - the suspended passive losses or the basis step-up.

If the former, consider using a beneficiary deemed-owned trust to hold the passive asset.[2165]

II.H.8. Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation; Possible Way to Attain Basis Step-Up

As described in part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations, S corporation assets do not receive a new basis when a shareholder dies or sells stock.

However, S corporations can sometimes replicate the equivalent of a basis step-up when the sole owner dies. For how to get property out of a corporation to enable it to receive a basis step-up without going through this analysis, see part II.Q.7.h Distributing Assets; Drop-Down into Partnership.

II.H.8.a. Depreciable Real Estate in an S Corporation – Possible Way to Replicate Effect of Basis Step-Up If the Stars Align Correctly

---

[2163] Code § 1014(e). The legislative history says that a bargain sale is subject to the provision to the extent of the gift element.

[2164] See part II.K.2.d Effect of Death of an Individual or Termination of Trust on Suspended Passive Losses.

[2165] See text accompanying fn. 3360 for an explanation; see also parts III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts and III.A.3.e QSSTs and ESBTs (a QSST is a type of beneficiary grantor trust).

II.H.8.a.i. Solution That Works for Federal Income Tax Purposes (To an Extent)

II.H.8.a.i.(a). Model for Attempting to Replicate an Inside Basis Step-Up

Although a partner's share of partnership assets can obtain a basis step-up at that partner's death,[2166] no such relief is available with respect to the assets of a corporation (whether C or S).

Generally, an S corporation can replicate the basis step-up if it holds nondepreciable property in a separate entity, by liquidating after death. That is because the capital gain on the shareholder's K-1 is offset by a capital loss when the corporation is liquidated.[2167]

Sale of Depreciable Property to Third Party
or
Liquidation of Real Property
(Zero basis, $1M value)

Proceeds from sale	$ 1M
Basis of real estate	0
Gain on K-1	$ 1M
Stock basis after death	$ 1M
Gain on K-1	$ 1M
Stock basis after sale of real estate	$ 2M
Liquidation proceeds	$ 1M
Stock basis	($ 2M)
Loss on liquidation	($ 1M)
Long-term capital gain on K-1	$ 1M
Long-term capital loss on liquidation	($ 1M)
Net long-term capital gain (loss)	$ 0

II.H.8.a.i.(b). Challenging Issues When S Corporation Liquidates Holding Depreciable Property or Other Ordinary Income Property

If the property is depreciable and the corporation liquidates, then Code § 1239 might apply to convert the K-1 income to ordinary income.[2168] Being a related party transaction might also preclude capital gain treatment given patents in certain situations.[2169] Furthermore, if the taxpayer previously sold depreciable property and took an ordinary loss under Code § 1231, gains on the sale of depreciable property will be taxed as ordinary income to the extent of those prior ordinary losses (referred to as Code § 1231 recapture). Finally, the recapture of depreciation deductions taken on personal property constitutes ordinary income under Code § 1245 (see part II.H.8.b Depreciable Personal Property in an S Corporation).

[2166] For more on Code § 754 elections (and similar rules that apply without an election when the partnership has a substantial built-in loss), see part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets.
[2167] Letter Rulings 9218019, 9622012.
[2168] Code § 1239 is discussed at part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property.
[2169] See part II.G.18.c Patents, especially fn. 1691.

Depreciable property is not the only concern. Consider an S corporation that holds marketable securities. Depending on the nature of a security, its sale might generate ordinary income. For example, if and to the extent that gain on sale of a bond (whether or not the interest is exempt from income tax) results from basis below the bond's face amount, the gain might be taxed as ordinary income under the market discount rules.[2170]

In these cases, the K-1 would include ordinary income, which cannot be offset in any significant measure by the long-term capital loss on liquidation.

With multiple depreciable real properties in an S corporation, one might not be able to sell all the property to a third party in one year, and liquidation would cause this mismatch for the remaining properties. Thus, depreciable real estate should be spun off into a separate S corporation for each property; it's best to do the spin-off at least five years before death;[2171] even then, establishing the required business purpose for a spin-off in real estate might be challenging when

To avoid these complications for an S corporation, and to try to get some benefits for real estate currently held in a C corporation, consider getting the real estate or other assets out of the corporation into an entity taxed as a partnership, as described in part II.Q.7.h Distributing Assets; Drop-Down into Partnership.

II.H.8.a.ii. State Income Tax Disconnect

Suppose the owner of the S corporation lives in a state (the "owner's state") that is not the same as the state where the S corporation is domiciled and the property is sold (the "business state").

Generally, the business state will tax the gain on the sale of the real estate.

However, the owner's disposition of the S corporation's stock will not be considered activity in the business state, because generally only the owner's state can tax the sale of intangible personal property (and stock is intangible personal property).

In the planning stages, taxpayers might try two approaches to avoid this problem, which might or might not work:

- Change the Owner's Residence. If the owner resides in the business state, the loss will be allowed. This might not be easily solved if the owner indirectly holds real estate in many states. On the other hand, suppose the owner is a trust. The trustee could divide the trust, moving to the business state the part of the trust attributable to the property located in that state. Whether this strategy works depends on whether the business state allows a trust to be a resident trust when its grantor was not domiciled in the state when the trust was created.[2172]

- Change the Corporation's Domicile. Some states do not tax the sale of a business, even though they tax the business' operations, because the sale of the business itself is not considered in the ordinary course of business. If the corporation is not domiciled in the state

[2170] See Code § 1276.
[2171] See part II.Q.7.f Corporate Division.
[2172] See "State Income Taxation of Trustees: Some Updates," TM Memorandum (BNA), Vol. 54, No. 11 (6/3/2013) and "2013 Trust Nexus Survey," Tax Management Weekly State Tax Report (Vol. 2013, No. 34, 8/23/2013).

in which the property is located, the gain on sale of the real estate might not be taxable to the state in which the real estate is located.

Unless one wants to research all of the above issues, one might consider planning with the following assumptions:

- If one is forming a business entity to hold property in another state, one should consider forming the entity in the owner's state of residence or in a state that does not impose income tax. Depending on state law, creating domicile in the other state might give it grounds for taxation of certain transactions that might not otherwise exist.

- If the trustee of a nongrantor trust is aware of the need for the planning described in part II.H.8.a Depreciable Real Estate in an S Corporation, consider researching splitting the trust if the trust is in a different state than the business state and the real estate is in one of the states listed above. Note that splitting the trust in this manner would work best if each S corporation owns property in only one state. As mentioned above, depreciable real estate should be spun off into a separate S corporation for each property; it's best to do the spin-off at least five years before the grantor's death,[2173] even if the trust division does not occur until the sale is contemplated and before any contract is signed.

- If the S corporation formed a new partnership to hold the real estate, then the S corporation might sell its partnership interest and avoid state income tax on the sale of real estate. The partnership would probably not be formed well in advance of the transaction, because the buyer probably would not want to assume the liabilities of an ongoing entity. This in turn might cause step transaction issues at the state level.

II.H.8.b. Depreciable Personal Property in an S Corporation

The disposition of most depreciable personal property, including certain building components depreciated as personal property, will be taxed as ordinary income, whether or not sold to a related party.[2174] Thus, all the problems in part II.H.8.a, Depreciable Real Estate in an S Corporation, apply and cannot be avoided for personal property inside an S corporation.

This issue is even more of a concern with current tax laws that allow very quick write-offs on purchases of tangible personal property. Heavy equipment creates a larger concern in that it tends to retain its value for longer.

A solution might be to form an LLC taxed as a partnership that is the original purchaser and leases the equipment to the business. The LLC might even borrow from the S corporation at the AFR. When an owner dies, his or her share will receive a new basis if a Code § 754 election is in place.[2175] A disadvantage of this strategy for higher-income taxpayers is that rental might be classified as a passive activity,[2176] which means that the rental income would be

---

[2173] See part II.Q.7.f Corporate Division.
[2174] See part II.G.6.b Code § 1245 Property.
[2175] For more on Code § 754 elections (and similar rules that apply without an election when the partnership has a substantial built-in loss), see part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets.
[2176] Code § 469(c)(2). An exception applies to active rental of real estate, not personal property. See Code § 469(c)(7).

subject to the 3.8% supplemental tax[2177] unless an exception is satisfied.[2178] This tax would not apply if the property were merely held inside the S corporation in which the taxpayer actively operates the business.

II.H.8.c. Basis Step-Up for Publicly-Traded Stock and Other Nondepreciable Property

Generally, liquidating an S corporation that holds publicly-traded stock and other nondepreciable property will provide a new basis to its assets by reason of a deemed sale (but perhaps with no taxable income generated), as described in part II.H.8.a.i.(a) Model for Attempting to Replicate an Inside Basis Step-Up, subject to the concerns described in part II.H.8.a.ii State Income Tax Disconnect, but perhaps without the concerns described in part II.H.8.a.i.(b) Challenging Issues When S Corporation Liquidates Holding Depreciable Property or Other Ordinary Income Property.

The corporation could do a formless conversion or merger into an LLC taxed as a disregarded entity or partnership, as described in part II.P.3.a From Corporations to Partnerships and Sole Proprietorships. If the entity is an LLC taxed as a corporation, it might effectuate this change retroactively for two months and 15 days by filing IRS Form 8832.

II.H.9. Basis Step-Up In S Corporations That Had Been C Corporations

An S corporation that used to be a C corporation generate dividend income to its shareholders to the extent that distributions exceed its accumulated adjustments account (AAA). See part II.P.3.b.iv Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds.

A basis step-up does not change this result, even if it results from the S corporation receiving life insurance proceeds. See part II.Q.7.b.iv S Corporation Distributions of, or Redemptions Using, Life Insurance Proceeds.

Furthermore, some redemptions are taxed as distributions, resulting in similar dividend issues.[2179]

However, if the S corporation has never been a C corporation or otherwise does not have any C corporation earnings and profits (E&P), these concerns do not arise.[2180]

II.H.10. Extracting Equity to Fund Large Gift

II.H.10.a. General Concept of Extracting Equity to Fund Large Gift

Consider extracting the fair market value equity from depreciated property, take steps to get the extracted equity out of the estate tax system, and exposing the small net value property to the estate tax system to get a very low cost basis stepped-up. This is done in three steps:

[2177] See II.I 3.8% Tax on Excess Net Investment Income.

[2178] For whether rental constitutes a passive activity, see II.K.1.e Rental Activities. For other exceptions, see II.K.1.i Recharacterization of Passive Income Generators (PIGs) as Nonpassive Income.

[2179] See part II.Q.7.b.i Redemptions or Distributions Involving S corporations - Generally, especially fns. 4874-4876.

[2180] See part II.Q.7.b.i Redemptions or Distributions Involving S corporations - Generally, especially the paragraph of text accompanying fn. 4884, the latter explaining how to eliminate E&P.

(1) Borrow against the property and distribute the cash to the owner(s). The debt reduces the impact of including the property in the taxpayer's gross estate, either as a debt deduction (recourse debt)[2181] or by reason of being netted against the property's value (nonrecourse),[2182] with the secured property receiving a full basis step-up in either case.[2183] A bank might very well require loan guarantees from other entities that would post collateral. See part II.H.10.c Consider Use of Guarantee Fee. Alternatively, a related party might make the loan at the AFR.

(2) Each owner invests the proceeds in taxable income-producing property. This is important for income tax purposes. If the owner simply gives away the cash, the debt would be incurred for personal purposes and the interest would be nondeductible personal interest. The owner needs to invest first in taxable investments;[2184] tax-free investments, such as municipal bonds, would also make the interest expense nondeductible.

(3) Each owner then makes annual exclusion gifts or otherwise engages in leveraged estate planning techniques. If the plan will take some time to accomplish and the owner has an irrevocable grantor trust with low basis assets, consider using the cash to buy those low basis assets so that those assets can get a basis step-up as well.

If the real estate is in an entity taxed as a partnership and the partnership is distributing cash from the loan to a partner, beware of the disguised sale rules. Absent an exception, if the partner contributed property to the partnership within 2 years of receiving the distribution or if a partner borrows against the property within two years, a disguised sale of the contributed property is presumed to have taken place.[2185]

This strategy may also work with low basis marketable securities, which might be monetized without generating capital gain tax.[2186]

[2181] Code § 2053(a)(4).

[2182] Reg. § 20.2053-7 provides:

> A deduction is allowed from a decedent's gross estate of the full unpaid amount of a mortgage upon, or of any other indebtedness in respect of, any property of the gross estate, including interest which had accrued thereon to the date of death, provided the value of the property, undiminished by the amount of the mortgage or indebtedness, is included in the value of the gross estate . If the decedent's estate is liable for the amount of the mortgage or indebtedness, the full value of the property subject to the mortgage or indebtedness must be included as part of the value of the gross estate; the amount of the mortgage or indebtedness being in such case allowed as a deduction. But if the decedent's estate is not so liable, only the value of the equity of redemption (or the value of the property, less the mortgage or indebtedness) need be returned as part of the value of the gross estate. In no case may the deduction on account of the mortgage or indebtedness exceed the liability therefor contracted bona fide and for an adequate and full consideration in money or money's worth. See § 20.2043-1. Only interest accrued to the date of the decedent's death is allowable even though the alternate valuation method under section 2032 is selected. In any case where real property situated outside the United States does not form a part of the gross estate, no deduction may be taken of any mortgage thereon or any other indebtedness in respect thereof.

[2183] *Crane v. Commissioner*, 331 U.S. 1 (1947).

[2184] Code § 163(d)(3), which is reproduced in fn. 2295, which is found in part II.I.6 Deductions Against NII.

[2185] Reg. § 1.707-3(c). See part II.M.3.e Exception: Disguised Sale.

[2186] See part II.A.1.d.ii Monetizing Founder's Remaining Shares After Going Public.

II.H.10.b. Example: Leveraging Property to Extract Equity to Fund Large Gift

Suppose property with a $10M fair market value was fully depreciated as to the value of the building, with $2M of land value remaining:

1. Borrow $9M against the building and transfer the $9M using leveraged estate planning techniques as described above (after first having invested the borrowed money in taxable investments).

2. Keep the $1M ($10M value minus $9M liabilities) until death, and pay estate tax on the $1M.

3. The $8M of building ($10M total value minus $2M land value) receives a basis step-up from zero to $8M:[2187]

   - At a 40% income rate, this basis step-up secures tax deductions worth $3.2M (40% of $8M).

   - Even if the property were later sold, the capital gain tax savings would likely be $2.4M (30%[2188] of $8M) or more.

4. Possible estate tax on $1M is a small price to pay for that income tax savings.

II.H.10.c. Consider Use of Guarantee Fee

A loan guarantee is not a gift. For gift and income tax issues related to guarantees, see part III.B.1.a.ii Loan Guarantees.

However, if the loan guarantee is from a donee, the IRS might claim that the donor has retained an interest in the gifted property and asset Code § 2036 inclusion.

Therefore, consider paying a market-rate guarantee fee so that the grantor pays adequate and full consideration for the use of the credit instead of possibly appearing to have retained the use of the gifted property. Consider the following commercial models:

- Home equity lines of credit charge no maintenance fees. They are well-secured, simple loans.

- Commercial lines of credit might involve maintenance fees. They are well-secured, complex loans.

- If the borrower has little equity or income outside of an asset that is being purchased, then the lender's or guarantor's risk increases dramatically when the loan-to-value ratio is high. If the asset being purchased is being appraised, consider asking the appraiser to also determine a reasonable guarantee fee.

[2187] If held in a partnership, a Code § 754 election would need to be made. See II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets.

[2188] This example assumes that state and local income tax increases a 25% capital gain rate by 5%. Capital gain that represents the recapture of straight line depreciation is taxed at a maximum rate of 25% instead of 20%. Code § 1(h)(1)(D).

II.H.10.d. Maintaining the Security Interest in the Loan Proceeds If Using a Donee Guarantee

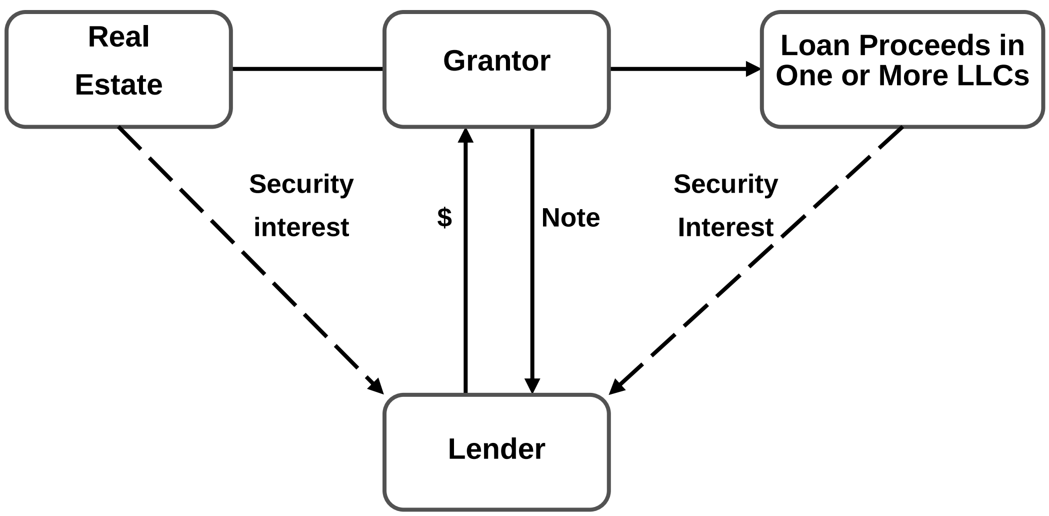
If the loan proceeds are transferred using leveraged estate planning techniques, tracking the lender's security interest might become tricky.

For example, suppose one uses a series of 2-year GRATs to transfer marketable securities, establishing a separate GRAT each year for each asset class.[2189] The number of accounts could quickly multiply. One might consider establishing an LLC to hold each asset class, so that the security interest is imposed on the LLC's account and interests in the LLC can be freely transferred among trusts to implement the strategy.[2190] Also note that an account with multiple owners might be deemed a partnership in certain situations.[2191]

II.H.10.e. Illustration of Equity Strip and Gift

See parts II.H.10.e.i Flowchart of Equity Strip, II.H.10.e.ii Flowchart of Placing Loan Proceeds into Entity, and II.H.10.e.iii Flowchart of Transfer of Loan Proceeds.

II.H.10.e.i. Flowchart of Equity Strip



[2189] This is called a rolling, asset-splitting GRAT strategy and is described in part III.B.2.b General Description of GRAT vs. Sale to Irrevocable Grantor Trust, especially the text accompanying fn. 6504.
[2190] See part II.Q.8.a Partnership as a Master Entity, especially fns. 5342-5344 and the accompanying text.
[2191] See part II.C.10 Whether Tenancy-in-Common or other Arrangement .

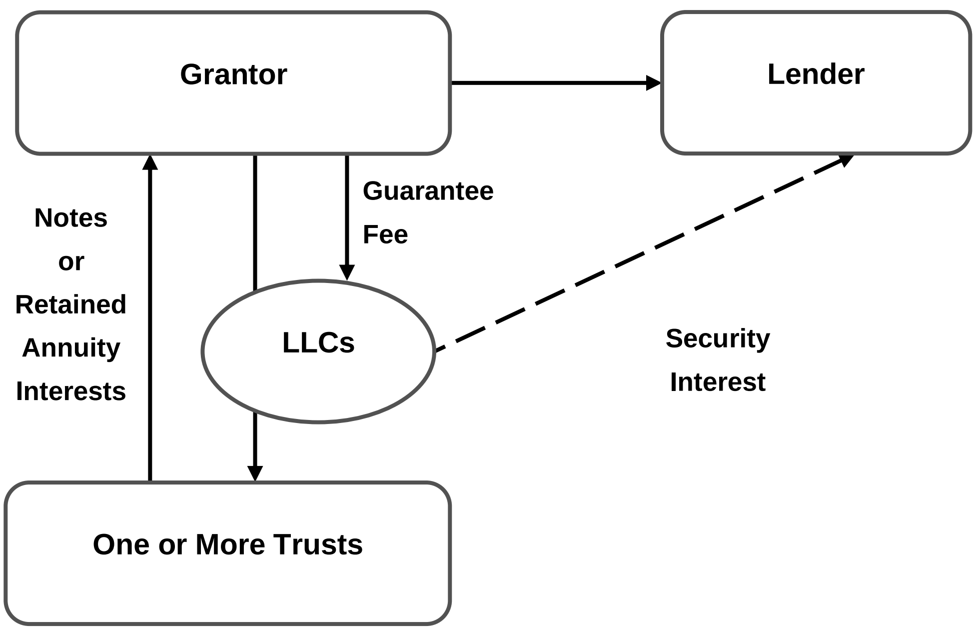
II.H.10.e.iii. Flowchart of Transfer of Loan Proceeds



II.H.11. Preferred Partnership to Obtain Basis Step-Up on Retained Portion

If all of the equity has been extracted, the future growth is still an estate planning issue. Furthermore, the client might not be comfortable with extracting the equity. In either case, consider contributing the real estate to a preferred partnership, in which the client receives a preferred distribution of profits as a fixed percentage of the fair market value of the contributed property, as well as receiving a capital account equal to the fair market value of the contributed property, plus perhaps a straight 1% of the residual profits; the client then transfers the remaining residual profits – the so-called “common interest.”

If the partnership has a Code § 754 election in place, a partner's allocable share of the partnership's non-IRD assets will receive a new basis when the partner dies.[2192] Thus, a preferred partnership can be an excellent vehicle for transferring future growth while obtaining a basis step-up on the portion retained. This is particularly useful for a person whose taxable estate and adjusted taxable gifts would be less than the estate tax exemption with the current value included but would exceed the estate tax exemption if the property grows in value or generates income in excess of the preferred return.

II.H.11.a. Basics of Preferred Partnerships

In a preferred partnership, one or more partners has a preferred interest and one or more partners has a common interest. The preferred interest includes a capital account that receives a percentage return on that capital account, which preferred return is paid generally before making distributions to the partners owning the common interest. A common interest is a capital account plus a flat percentage of the profits distributed after the preferred interest receives its distributions. As described further below, the goal is to maximize the initial value of the preferred partnership interest and to minimize the initial value of the common interest.

If a partnership is recapitalized and the transferee receives common, the transferor's capital account that is attributable to the common carries over to the transferee partner;[2193] however, given that the common is entitled to only increases in value after the date of the recapitalization, the preferred stock should keep its original capital account and be allocated the first tier of book gain up to the value on the date of the transfer. Not revaluing the capital accounts and keeping the allocation of book gain is important is making sure that any nonrecourse liabilities remain allocated to the holder of the preferred interest,[2194] given that usually the senior family member usually retains the preferred interest and wants a basis step-up relating to the liabilities.[2195] However, the transferor's basis (ignoring basis relating to liabilities) is allocated between the transferor and transferee according to their respective value;[2196] allocating basis to the transferee (generally the donee) at the expense of reducing the transferor's basis (generally the donor senior family member) generates more of a basis step-up upon the senior family member's death.

The preferred interests receive operating distributions before the common interests and receive a return of their capital accounts before the common interests receive their capital accounts. The preferred returns are not guaranteed; rather they are preferred distributions of cash from operations. Because they are contingent on cash flow, they are more risky than mere loans and therefore require a higher return. See part II.H.11.c Payment of Preferred Return.

Minimizing the value of the preferred interests reduces the payment required on the capital account, reducing the pressure on the partnership to generate operating cash and leaving more cash available for the common interests:[2197]

[2192] For more on Code § 754 elections (and similar rules that apply without an election when the partnership has a substantial built-in loss), see part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets.
[2193] See fn 515 in part II.C.7 Maintaining Capital Accounts.
[2194] See text preceding and accompanying fn 398 in part II.C.3.c Allocations of Recourse and Nonrecourse Liabilities.
[2195] See fn 2091 in part II.H.2.g Partnership Basis Adjustments.
[2196] See fn 5633 in part II.Q.8.e.ii.(a) Unitary Basis.
[2197] See part II.H.11.d Valuing Preferred Partnership Interests.

- Usually the partnership is a limited partnership, and the preferred interest is accompanied by a 1% common interest as the controlling general partner;[2198] providing the preferred interest owner with this controlling common interest increases the likelihood of actually receiving the preferred distributions and therefore reduces risk and the required return.

- The remaining 99% common interest generally is comprised of interests as limited partners, although it might include interests as general partners that aggregate to less than 1%.

- Below is a brief discussion about how to avoid the disguised sale rule taxing the contribution of appreciated property in exchange for the preferred payments.[2199] However, the IRS can rebut the presumptions found in that discussion, and we tend to suggest that the contributing partner receive common with a value of at least 10% of the total contribution that partner made.[2200] To make the cash flows and valuations work, it is not uncommon for the contributing partner to retain 15%-20% of the common.

- If and to the extent that operating cash flow beyond the preferred return is used to repay the preferred partner's capital account, beware of tax issues. This excess operating cash flow is taxed to the common interests, because the income is allocated to them, becomes capital and only then is used to pay the preferred partner; this is an inherent part of partnership accounting. In many cases, the partnership agreement should require distributions to the common interests to pay these taxes before the excess operating cash flow is used to pay the preferred partners' capital accounts.

Forming the partnership usually does not trigger income tax.[2201] Because the right to receive preferred payments depends on cash flow and is not guaranteed, forming the partnership is presumed not to constitute a disguised sale;[2202] however, to rely on this exception, one should avoid having an intent to redeem the preferred partnership interest or cap cumulative payments under the preferred return.[2203] Although a guaranteed payment within certain limits is also presumed not be a disguised sale,[2204] using property to satisfy the obligation (because cash flow is inadequate) would probably constitute a sale and trigger income tax.[2205] The tax laws strongly encourage the preferred payment to be cumulative, meaning that make-up distributions are made in future years if current cash flow is insufficient;[2206] these rules strongly encourage payments no later than four years after the due date,[2207] and payments using property should constitute tax-free distributions.[2208]

When one creates an entity with preferred distributions and receives preferred distributions equal to the value of what one contributed, generally Code § 2036 does not include in one's

[2198] There is nothing wrong with stapling a common interest as a general partner that exceeds 1%, aside from the desire to allocate growth (the common interest) to the next generation.

estate the right to the common interest.[2209] *Hutchens Non-Marital Trust v. Commissioner*, T.C. Memo. 1993-600 (preferred stock) (Missouri case). Also, preferential liquidation rights and the right to distributions that were greatly disproportionate to that enjoyed by another class of equity, the other class of which the decedent had transferred, did not constitute a retention of rights to the transferred shares. *Boykin v. Commissioner*, T.C. Memo. 1987-134. Presumably the IRS wanted to include the transferred shares because they were voting, whereas the retained shares were nonvoting. After *Boykin* and before *Hutchens*, Congress repealed Code § 2036(c) and enacted Chapter 14 in its place. The legislative history says:

> The committee believes that an across-the-board inclusion rule is an inappropriate and unnecessary approach to the valuation problems associated with estate freezes. The committee believes that the amount of any tax on a gift should be determined at the time of the transfer and not upon the death of the transferor.

Although merely retaining a Code § 2701 preferred partnership interest should not itself cause Code § 2036 inclusion, these cases preceded *Strangi* and *Bongard*.[2210] Thus, if one does everything wrong, Code § 2036 will apply to a preferred partnership.[2211]

II.H.11.b. Preferred Partnership Compared to Sale to Irrevocable Grantor Trust

The disadvantages of a preferred partnership relative to a sale for a note are the higher required return (preferred stock generally pays dividends much higher than the AFR) and the higher equity investment required by the other owners (although Code § 2701 generally requires the common interest to be worth at least 10%, in practice appraisers require it to be 15%-20% or more).

However, the preferred partnership interest has an advantage of basis step-up. If one sells low basis assets to an irrevocable grantor trust and dies shortly thereafter, there is no growth on which estate taxes are paid, the note is included at roughly the same value as the sold asset, and the sold property does not receive a basis step-up. On the other hand, if one uses a preferred partnership, the underlying assets attributable to the preferred partnership will receive a new basis when the preferred partner dies.[2212]

[2209]

see fn 2211 for context.

[2210] See part III.C.1 Whether Code § 2036 Applies.

[2211] *Estate of Liljestrand v. Commissioner*, T.C. Memo. 2011-259, applying *Bongard* (see fn 91 in part II.A.2.d.i Benefits of Estate Planning Strategies Available Only for S Corporation Shareholders):

> As part of the partnership agreement, Dr. Liljestrand was guaranteed a preferred return of 14 percent of the value of his class A limited partnership interest. Dr. Liljestrand's class A limited partnership interest was valued at $310,000, thus Dr. Liljestrand was guaranteed annual payments equal to $43,400. Moss-Adam's appraisal estimated the partnership's annual income would equal $43,000. We find this guaranteed return indicative of an agreement to retain an interest or right in the contributed property....
>
> Dr. Liljestrand received a disproportionate share of the partnership distributions, engineered a guaranteed payment equal to the partnership expected annual income and benefited from the sale of partnership assets. The objective evidence points to the fact that Dr. Liljestrand continued to enjoy the economic benefits associated with the transferred property during his lifetime.

[2212] For more on Code § 754 elections (and similar rules that apply without an election when the partnership has a substantial built-in loss), see part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets.

One might consider pairing the two concepts: retain the preferred interest and have an irrevocable grantor trust hold the common interest. (Consider a gift to the trust; with a preferred partnership, the common might not have enough cash flow to repay the note.) If the senior family member gets ill, (s)he buys the common interest from the trust,[2213] so that the common interest can receive a basis step-up at death.

II.H.11.c. Payment of Preferred Return

Generally, the preferred return should be paid out of operating cash flow.[2214]

Although guaranteed payments might seem attractive from a gift tax viewpoint,[2215] they are undesirable from an income tax viewpoint.[2216]

As mentioned in part II.H.11.a Basics of Preferred Partnerships, if one needs to avoid income tax on the contribution of appreciated property for the partnership interest, then avoid any plans to redeem the preferred partnership interest.[2217]

II.H.11.d. Valuing Preferred Partnership Interests

Rev. Rul. 83-120 explains how to value preferred and common stock. Presumably its concepts would apply to partnerships. Key ideas include:

- To support valuing the preferred interest at face value, the preferred distributions should exceed the interest paid to the entity's lenders.[2218] Because AFRs are based on

[2213] See fn. 2159, found in part II.H.5.b Moving Real Estate or Other Low-Basis Property from Irrevocable Trust to Grantor.
[2214] See part II.M.3.e.i.(b) Distributions Presumed Not to Be Disguised Sales.
[2215] Guaranteed payments do not trigger the special rules for family partnerships described in part III.B.7.b Code § 2701 Overview. See Code § 2701(c)(1)(B)(iii).
[2216] Guaranteed payments would generally be limited to 150% of AFR (which is much lower than market now). See part II.M.3.e.i.(b) Distributions Presumed Not to Be Disguised Sales. Also, because a guaranteed payment under Code § 707(c) is not a regular partnership distribution under Code § 731, gain or loss would be triggered on the distribution of assets in kind to satisfy that pecuniary obligation. Contrast that with a partnership distribution, which generally does not trigger gain or loss, as described in part II.Q.8.b.i Distribution of Property by a Partnership. Although it might seem common sense that a distribution out of operating cash flow would be satisfied out of cash from operations so that assets do not need to be sold, the situation for family partnerships is not so simple. Family partnerships need to make their preferred payments no later than four years after they accrue. Code § 2701(d)(2)(C). This four-year requirement should not cause problems with the disguised sale rules, which are mainly concerned about payments within two years after the preferred partner has contributed assets to the partnership. See part II.M.3.e Exception: Disguised Sale. Thus, using a preferred payment out of operating cash flow instead of a guaranteed payments not only adds helpful flexibility for partnerships generally but also is very important for family partnerships.
[2217] See fn 2203.
[2218] Rev. Rul. 83-120, § 4.02 provides:

> Whether the yield of the preferred stock supports a valuation of the stock at par value depends in part on the adequacy of the dividend rate. The adequacy of the dividend rate should be determined by comparing its dividend rate with the dividend rate of high-grade publicly traded preferred stock. A lower yield than that of high-grade preferred stock indicates a preferred stock value of less than par. If the rate of interest charged by independent creditors to the corporation on loans is higher than the rate such independent creditors charge their most credit worthy borrowers, then the yield on the preferred stock should be correspondingly higher than the yield

government bonds that are viewed as having no credit risk, the rates charged by lenders to businesses generally exceed the AFR. In other words, preferred rates exceed lenders' rate which exceed the AFR. Thus, preferred distribution rates that reflect market rates are significantly greater than the AFR. However, if a liquidation right is respected for tax purposes,[2219] that right may support valuing the preferred at face value.[2220]

- Preferred distribution rates also require sufficient coverage, which means the entity's ability to pay the preferred return. The entity needs plenty of income-generating assets to assure payment.[2221] Appraisers prefer to see the preferred interest holder have enough control over distributions to maximize the chance that distributions will actually be made. Although control tends to generate Code § 2036 concerns, the fact that a largely undiscounted preferred interest is included in the holder's estate should prevent Code § 2036 from causing problems.[2222]

- The entity needs to have ample equity to be able to pay the equity's stated liquidation right.[2223]

> on high quality preferred stock. A yield which is not correspondingly higher reduces the value of the preferred stock. In addition, whether the preferred stock has a fixed dividend rate and is nonparticipating influences the value of the preferred stock. A publicly traded preferred stock for a company having a similar business and similar assets with similar liquidation preferences, voting rights and other similar terms would be the ideal comparable for determining yield required in arm's length transactions for closely held stock. Such ideal comparables will frequently not exist. In such circumstances, the most comparable publicly-traded issues should be selected for comparison and appropriate adjustments made for differing factors.

[2219] Code § 2701 may affect valuation of a liquidation right for gift tax purposes (and also valuation of the preferred returns). See parts III.B.7.b Code § 2701 Overview and III.B.7.c Code § 2701 Interaction with Income Tax Planning.

[2220] Rev. Rul. 83-120, § 4.07 provides:

> Whether the preferred stock contains a redemption privilege is another factor to be considered in determining the value of the preferred stock. The value of a redemption privilege triggered by death of the preferred shareholder will not exceed the present value of the redemption premium payable at the preferred shareholder's death (*i.e.*, the present value of the excess of the redemption price over the fair market value of the preferred stock upon its issuance). The value of the redemption privilege should be reduced to reflect any risk that the corporation may not possess sufficient assets to redeem its preferred stock at the stated redemption price. See.03 above.

[2221] Rev. Rul. 83-120, § 4.03 includes the following explanation:

> Coverage of the dividend is measured by the ratio of the sum of pre-tax and pre-interest earnings to the sum of the total interest to be paid and the pre-tax earnings needed to pay the after-tax dividends. *Standard & Poor's Ratings Guide*, 58 (1979). Inadequate coverage exists where a decline in corporate profits would be likely to jeopardize the corporation's ability to pay dividends on the preferred stock. The ratio for the preferred stock in question should be compared with the ratios for high quality preferred stock to determine whether the preferred stock has adequate coverage.

[2222] See fns 2209-2211 in part II.H.11.a Basics of Preferred Partnerships.

[2223] Rev. Rul. 83-120, § 4.04 provides:

> Whether the issuing corporation will be able to pay the full liquidation preference at liquidation must be taken into account in determining fair market value. This risk can be measured by the protection afforded by the corporation's net assets. Such protection can be measured by the ratio of the excess of the current market value of the corporation's assets over its liabilities to the aggregate liquidation preference. The protection ratio should be compared with the ratios for high

The above bullet points raise the issue of "coverage." If preferred interests are large compared to the rest of the equity, then the likelihood of making the preferred payments decreases. A decreased likelihood of payment means that a risk premium is required; in other words, the preferred distribution rate increases. Ironically, any increased preferred distribution rate increases risk, causing rates to need to be higher. To avoid this problem, capitalize the entity with more value in the common ownership.

If the partnership is a family entity, watch out for the complexities and uncertainty in valuation described in Code § 2701 later in these materials.[2224] Although the rules governing family entities generally require that the common interest have a value of at least 10% of the deal,[2225] typically it's at least 20% of the deal, so that the preferred profits distribution is kept at a reasonable rate. In a marketable securities partnership, the common is a much higher proportion, because the equity rates paid on the preferred stock often will significantly exceed the annual expected investment income on the marketable securities. Thus, practical coverage requirements tend to make the 10% minimum common value a moot issue.

A recapitalization can constitute a gift, whether under general principles[2226] or under these special rules for family partnerships.

II.H.11.e. Using Preferred Partnership that Intentionally Violates Code § 2701

Consider making placing $5M into a preferred partnership that is a family entity, retaining a $4M preferred interest with noncumulative preferred distributions redeemable at par in the holder's discretion, and giving $1M in common to the next generation.

The preferred return is a nice income stream. If the preferred holder needs more cash for unexpected spending needs, the preferred holder can require a partial redemption of the preferred's par value.

The gift and estate tax consequences are as follows:

- If the partnership violates Code § 2701, the gift of common generates a $5M taxable gift, because the preferred is valued at zero.

- If a Code § 2701 interest in existence on the date of the initial transferor's death is held by an applicable family member and therefore is not included in the gross estate of the initial transferor, the Code § 2701 interest is deemed to be transferred at the death of the initial transferor to or for the benefit of an individual other than the initial transferor or an applicable family member of the initial transferor. In such case, the transfer tax value of the interest is the value that the executor can demonstrate would be determined for gift tax purposes if the interest were transferred immediately before the initial transferor's death.[2227]

quality preferred stock to determine adequacy of coverage. Inadequate asset protection exists where any unforeseen business reverses would be likely to jeopardize the corporation's ability to pay the full liquidation preference to the holders of the preferred stock.

[2224] See part III.B.7.b Code § 2701 Overview.

[2225] See part II.M.3.e.i.(b) Distributions Presumed Not to Be Disguised Sales.

[2226] Rev. Rul. 86-39, reproduced in part II.J.4.f Making Trust a Partial Grantor Trust as to a Beneficiary.

[2227] Reg. § 25.2701-5(c)(3)(ii).

Code § 2701 applies "[s]olely for purposes of determining whether a transfer of an interest in a corporation or partnership to (or for the benefit of) a member of the transferor's family is a gift." Thus, it does not apply for GST purposes, as described in this example from a treatise:[2228]

> Grandfather gives common stock of Family Corporation to Granddaughter, while retaining preferred stock. The gift tax under Chapter 12 will be calculated by valuing the common stock under Section 2701. The GST tax under Chapter 13 will be determined by valuing the common stock without regard to Section 2701.

So, even though the noncompliant partnership freeze can use the entire gift tax exemption, it will not use a corresponding amount of GST exemption. On the other hand, failure to take the noncumulative preferred payment may constitute a gift,[2229] which is offset by the mitigation provisions for Code § 2701(e)(6) for gift tax purposes but would not be offset for GST purposes, possibly requiring more GST exemption to be allocated. Code § 2701(e)(6) authorizes relief for gift, estate, and GST tax purposes:

> *Adjustments*. Under regulations prescribed by the Secretary, if there is any subsequent transfer, or inclusion in the gross estate, of any applicable retained interest which was valued under the rules of subsection (a), appropriate adjustments shall be made for purposes of chapter 11, 12, or 13 to reflect the increase in the amount of any prior taxable gift made by the transferor or decedent by reason of such valuation or to reflect the application of subsection (d).

Reg. § 25.2701-5, "Adjustments to mitigate double taxation," implements this authority.

Reg. § 25.2701-5(a), "Reduction of transfer tax base," provides:

> (1) *In general*. This section provides rules under which an individual (the initial transferor) making a transfer subject to section 2701 (the initial transfer) is entitled to reduce his or her taxable gifts or adjusted taxable gifts (the reduction). The amount of the reduction is determined under paragraph (b) of this section. See paragraph (e) of this section if section 2513 (split gifts) applied to the initial transfer.
>
> (2) *Federal gift tax modification*. If, during the lifetime of the initial transferor, the holder of a section 2701 interest (as defined in paragraph (a)(4) of this section) transfers the interest to or for the benefit of an individual other than the initial transferor or an applicable family member of the initial transferor in a transfer subject to Federal estate or gift tax, the initial transferor may reduce the amount on which the initial transferor's tentative tax is computed under section 2502(a). The reduction is first applied on any gift tax return required to be filed for the calendar year in which the section 2701 interest is transferred; any excess reduction is carried forward and applied in each succeeding calendar year until the reduction is exhausted. The amount of the reduction that is used in a calendar year is the amount of the initial transferor's taxable gifts for that year. Any excess reduction remaining at the death of the initial transferor may be applied by the executor of the initial transferor's estate as provided under paragraph (a)(3) of this section. See paragraph (a)(4) of this section

[2228] Zaritsky & Aucutt, ¶ 2.03[4] Scope of Section 2701, ¶ 2.03[4][a] Generation-Skipping Transfer Tax, *Structuring Estate Freezes: Analysis With Forms* (WG&L), citing the preamble to the proposed regulations, 56 Fed. Reg. § 14322 (1991).
[2229] *Snyder v. Commissioner*, 93 T.C. 529 (1989).

for the definition of a section 2701 interest. See § 25.2701-6 for rules relating to indirect ownership of equity interests transferred to trusts and other entities.

(3) *Federal estate tax modification*. Except as otherwise provided in this paragraph (a)(3), in determining the Federal estate tax with respect to an initial transferor, the executor of the initial transferor's estate may reduce the amount on which the decedent's tentative tax is computed under section 2001(b) (or section 2101(b)) by the amount of the reduction (including any excess reduction carried forward under paragraph (a)(2) of this section). The amount of the reduction under this paragraph (a)(3) is limited to the amount that results in zero Federal estate tax with respect to the estate of the initial transferor.

(4) *Section 2701 interest*. A section 2701 interest is an applicable retained interest that was valued using the special valuation rules of section 2701 at the time of the initial transfer. However, an interest is a section 2701 interest only to the extent the transfer of that interest effectively reduces the aggregate ownership of such class of interest by the initial transferor and applicable family members of the initial transferor below that held by such persons at the time of the initial transfer (or the remaining portion thereof).

Reg. § 25.2701-5(b), "Amount of reduction," provides:

Except as otherwise provided in paragraphs (c)(3)(iv) (pertaining to transfers of partial interests) and (e) (pertaining to initial split gifts) of this section, the amount of the reduction is the lesser of -

(1) The amount by which the initial transferor's taxable gifts were increased as a result of the application of section 2701 to the initial transfer; or

(2) The amount (determined under paragraph (c) of this section) duplicated in the transfer tax base at the time of the transfer of the section 2701 interest (the duplicated amount).

Reg. § 25.2701-5(c), "Duplicated amount," provides:

(1) *In general*. The duplicated amount is the amount by which the transfer tax value of the section 2701 interest at the time of the subsequent transfer exceeds the value of that interest determined under section 2701 at the time of the initial transfer. If, at the time of the initial transfer, the amount allocated to the transferred interest under § 25.2701-3(b)(3) (Step 3 of the valuation methodology) is less than the entire amount available for allocation at that time, the duplicated amount is a fraction of the amount described in the preceding sentence. The numerator of the fraction is the amount allocated to the transferred interest at the time of the initial transfer (pursuant to §2701-3(b)(3)) and the denominator of the fraction is the amount available for allocation at the time of the initial transfer (determined after application of § 25.2701-3(b)(2)).

(2) *Transfer tax value - In general*. Except as provided in paragraph (c)(3) of this section, for purposes of paragraph (c)(1) of this section the transfer tax value of a section 2701 interest is the value of that interest as finally determined for Federal transfer tax purposes under chapter 11 or chapter 12, as the case may be (including the right to

receive any distributions thereon (other than qualified payments)), reduced by the amount of any deduction allowed with respect to the section 2701 interest to the extent that the deduction would not have been allowed if the section 2701 interest were not included in the transferor's total amount of gifts for the calendar year or the transferor's gross estate, as the case may be. Rules similar to the rules of section 691(c)(2)(C) are applicable to determine the extent that a deduction would not be allowed if the section 2701 interest were not so included.

(3) *Special transfer tax value rules*.

(i) *Transfers for consideration*. Except as provided in paragraph (c)(3)(iii) of this section, if, during the life of the initial transferor, a section 2701 interest is transferred to or for the benefit of an individual other than the initial transferor or an applicable family member of the initial transferor for consideration in money or money's worth, or in a transfer that is treated as a transfer for consideration in money or money's worth, the transfer of the section 2701 interest is deemed to occur at the death of the initial transferor. In this case, the estate of the initial transferor is entitled to a reduction in the same manner as if the initial transferor's gross estate included a section 2701 interest having a chapter 11 value equal to the amount of consideration in money or money's worth received in the exchange (determined as of the time of the exchange).

(ii) *Interests held by applicable family members at date of initial transferor's death*. If a section 2701 interest in existence on the date of the initial transferor's death is held by an applicable family member and, therefore, is not included in the gross estate of the initial transferor, the section 2701 interest is deemed to be transferred at the death of the initial transferor to or for the benefit of an individual other than the initial transferor or an applicable family member of the initial transferor. In this case, the transfer tax value of that interest is the value that the executor of the initial transferor's estate can demonstrate would be determined under chapter 12 if the interest were transferred immediately prior to the death of the initial transferor.

(iii) *Nonrecognition transactions*. If an individual exchanges a section 2701 interest in a nonrecognition transaction (within the meaning of section 7701(a)(45)), the exchange is not treated as a transfer of a section 2701 interest and the transfer tax value of that interest is determined as if the interest received in exchange is the section 2701 interest.

(iv) *Transfer of less than the entire section 2701 interest*. If a transfer is a transfer of less than the entire section 2701 interest, the amount of the reduction under paragraph (a)(2) or (a)(3) of this section is reduced proportionately.

(v) *Multiple classes of section 2701 interest*. For purposes of paragraph (b) of this section, if more than one class of section 2701 interest exists, the amount of the reduction is determined separately with respect to each such class.

(vi) *Multiple initial transfers*. If an initial transferor has made more than one initial transfer, the amount of the reduction with respect to any section 2701 interest is the sum of the reductions computed under paragraph (b) of this section with respect to each such initial transfer.

However, certain anti-abuse regulations may cause these rules to change, as described in part II.H.12.a Taxable Gifts of Property Included in the Donor's Estate. Those regulations may make this strategy counterproductive if the client is trying to lock in bonus estate tax exemption.

If the donor splits gifts with the spouse, the order and manner in which the mitigation occurs depends on who dies first.[2230] Consider leaving the preferred interest in a trust for the surviving spouse and electing a QTIP marital deduction[2231] only to the extent that the mitigation provisions do not wipe out the estate inclusion.

Finally, the overall scheme of Code § 2701 requires each generation that makes a transfer to add the senior generation's interests to its own when looking at the ownership before and after making the transfer. That complexity makes me want to avoid using noncompliant partnerships in most cases.

II.H.11.f. Practical Uses of Estate Freezes

Many of the ideas discussed below are illustrated in materials put together by Stacy Eastland for 2015 Heckerling, ideas on which he has worked for many years and continues to improve.[2232] Stacy's materials contain many creative ideas not listed below, including combining leverage with preferred partnerships and GRATs; however, I am very reluctant to combine leverage with GRATs.

II.H.11.f.i. Increasing Investment Yield to Enable Owner to Transfer More Outside of Estate Tax System

The example below is for a bypass trust and the surviving spouse, but it could just as easily apply to:

- An irrevocable grantor trust created by the spouse instead of the bypass trust, or
- A partnership between a GST-exempt trust and either its beneficiary or a non-GST-exempt trust for the benefit of the GST-exempt trust's beneficiary.

A surviving spouse might engage in an estate freeze with a bypass trust created by the deceased spouse. The surviving spouse contributes assets and receives a preferred interest (with enhancements described in part II.H.11.a Basics of Preferred Partnerships), and the bypass trust contributes assets and receives a common interest. The surviving spouse receives a nice annual income flow, and the preferred interest will receive a new basis at the surviving spouse's death.

Furthermore, if the surviving spouse has some DSUE and is at risk of losing it because of remarriage, the surviving spouse might consider electing to treat the preferred interest as gifted to the bypass trust, even though the surviving spouse has not in fact gifted the interest.[2233] presumably the gifted interest would be included in the surviving spouse's estate because of

[2230] See Reg. § 25.2701-5(e).
[2231] See fn. 2000, found in part II.H.2.a Free Basis Step-Up When First Spouse Dies.
[2232] Discussions with Ellen Harrison and Stacy when preparing for our 2015 Heckerling panel have sharpened my thinking in this area. ACTEC Fellows can see some of Ellen's thoughts by looking at the Business Planning Committee materials for the 2015 Annual Meeting.
[2233] Code § 2701(c)(3)(C)(i).

actual ownership, but the amount of inclusion should be washed out, as described in part II.H.11.e Using Preferred Partnership that Intentionally Violates Code § 2701.

Although a QTIP trust could engage in a freeze transaction, Code § 2519 poses risks if the valuation is wrong. A QTIP trust might make distributions or loans to the surviving spouse so that the surviving spouse can later engage in the preferred partnership planning. Therefore, one might consider entering into the preferred partnership before the QTIP trust is funded, being wary, however, that Code § 2701 views transactions by a trust as transactions by its beneficiaries.[2234]

A portfolio of marketable securities might be a good candidate for such planning. Because the preferred return is significantly higher than general interest and dividend rates, the surviving spouse can boost the surviving spouse's annual cash return on the assets contributed. Essentially, the partnership would use the income from the bypass trust's contributed assets to make preferred payments to the surviving spouse in exchange for the growth of the surviving spouse's contributed assets. In the example below, the surviving spouse's contributed assets would need to comprise approximately 30% of the partnership to attain this result.

Suppose, for example, the surviving spouse contributed $3 million of marketable securities and the bypass trust contributed $7 million of marketable securities, each portfolio generating 2.5% cash distributions. Thus, the partnership's $10 million generates $250,000 annual cash yield. Dividing the $250,000 annual cash yield by the surviving spouse's $3 million contribution constitutes an 8.3% yield, which might be comparable to an annual cash preferred dividend. Note that the surviving spouse's income has increased from $75,000 per year to $250,000 per year. Now the surviving spouse can afford to used leveraged transfers to shift other assets outside the estate tax system. Or the surviving spouse could, in a separate transaction that was not planned until after the preferred partnership formation had seasoned sufficiently, simply sell to an irrevocable grantor trust $2 million of preferred partnership interest yielding 8.3% in exchange for a note bearing the AFR (much lower than 8.3% when this analysis was written) and retain $1 million of preferred partnership interest, earning $83,000 per year income (up from $75,000) but decreasing the amount subject to estate tax from $3 million down to $1 million (if the sale price simply goes to pay taxes on the irrevocable grantor trust). Furthermore, the $2 million capital account preferred interest would be worth less than $2 million if the surviving spouse retained the general partner interest, the control feature of which supported the value of the preferred in the surviving spouse's hands but which is not available to support the value of the $2 million preferred interest that is sold to the trust. Thus, the irrevocable grantor trust would pay less than $2 million for its preferred interest. Or, instead of doing a sale to an irrevocable grantor trust, the surviving spouse could use a GRAT, which will be guaranteed to succeed to the extent that the preferred return exceeds the Code § 7520 rate. (This example illustrates an extreme, in that the yield would likely be set at an amount lower than the partnership's annual income, to ensure coverage.)[2235]

The above strategy could be supercharged if the bypass trust contributed its partnership interest to an S corporation and the surviving spouse made a QSST election. That would cause the surviving spouse to pay the income tax on the common interest's capital gains (and other income allocable to it). If one were to use this strategy, the partnership agreement should not require distributions to pay tax on the common interests' income (contrary to the general recommendation of part II.H.11.a. Basics of Preferred Partnerships). Furthermore, one should

[2234] Reg. § 25.2701-6(a)(4).
[2235] See part II.H.11.d Valuing Preferred Partnership Interests.

consider how this approach affects the exit strategy – what happens to the bypass trust after the surviving spouse dies – described in part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts.

A simpler alternative with more modest results might be available. Consider dividing the trust, converting one portion to a unitrust and giving away another portion.[2236] The unitrust might be a higher rate of distribution than interest and dividends, allowing the surviving spouse to feel comfortable giving away that other portion.

Commercial real estate might not be a great candidate for directly engaging in increasing one's rate of cash flow return using the preferred partnership planning described above. First, the cash yield for privately managed commercial real estate tends to be close to preferred rates, making the type of leverage described in the example above difficult to achieve. (That doesn't mean that a preferred partnership is a bad idea; it simply does not create as much opportunity to enhance the surviving spouse's rate of return on retained assets.) Second, losing the basis step-up on the real estate would be quite painful. However, the leveraged planning described above could work <u>indirectly</u> for commercial real estate. Strip the real estate's equity, as described in part II.H.10 Extracting Equity to Fund Large Gift, then engage in this type of planning for the loan proceeds.

If one has an operating business in an S corporation, a preferred partnership is not available[2237] to replicate this result unless the transferor is the sole owner or the other owners have similar objective. The S corporation itself could contribute its assets to a preferred partnership in lieu of its shareholder(s) directly forming the preferred partnership.

Also note that preferred partnerships can be an excellent tool for getting future growth out of corporate solution, whether or not the corporation has an S election in place.[2238]

Also note that any freeze could be undone by switching from preferred/common to being all common, although the unrealized appreciation would need to be accounted for and the IRS might argue that the recapitalization constituted a gift. Accounting for unrealized appreciation would be a matter of determining the gain that would have been recognized if all assets had been sold for fair market value at the time of the change and specially allocating it to each partner; usually this is done by restating capital accounts to take these calculations into account – a process called booking up.[2239]

[2236] See Letter Ruling 201426016.

[2237] A partnership is not an eligible owner of a S stock. Code § 1361(b)(1)(B); see part II.A.2.e.v Relief for Late S Corporation and Entity Classification Elections for the Same Entity.

[2238] See part II.Q.7.h Distributing Assets; Drop-Down into Partnership, especially II.Q.7.h.viii Value Freeze as Conservative Alternative.

[2239] For the rules on revaluing partnership assets and adjusting capital accounts when that occurs, see part II.C.7 Maintaining Capital Accounts, especially fn. 507. The related gain allocation is called a "reverse-Code § 704(c) allocation" and is provided by fn. 5444 of part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

II.H.11.f.ii. Reverse Freeze to Guarantee Successful Sale to Irrevocable Grantor Trust

Normally one would have the transferor retain preferred and transfer common – to get the growth outside of the estate tax system. Consider doing the reverse, as described below.

Preferred partnership returns significantly exceed the AFR.[2240] The principal amount generally remains stable, because the entity needs to start with ample cushion to make sure that the stated liquidation amount will be paid.[2241] The main risk of decline in value is if interest rates increase, causing the present value of payments to decrease. However, if the holder of the preferred equity has the right to redeem for its stated value at any time, the preferred equity should hold its value.

Thus, a grantor could sell a preferred partnership interest to an irrevocable grantor trust for a note at the AFR, and the transaction would have a very high likelihood of succeeding.

I have seen this idea promoted for life insurance policies, where the preferred return is sufficient to pay not only the interest on the note to the grantor but also the life insurance premiums.

II.H.11.f.iii. Getting Business Value Out of Corporate Solution

Holding a business in an entity taxed as a partnership has several income tax advantages over holding the business in a C or S corporation; see part II.E Recommended Structure for Entities.

For how to migrate to that structure, see part II.Q.7.h Distributing Assets; Drop-Down into Partnership, especially part II.Q.7.h.viii Value Freeze as Conservative Alternative.

See also part II.H.5.c Preferred Partnership In Conjunction with GRAT or Sale to Irrevocable Grantor Trust of an S corporation.

II.H.11.f.iv. Shifting Income or Growth from High Tax State

Suppose grantor previously created an irrevocable trust while in a high tax jurisdiction and later creates (or the grantor's spouse later creates) another one in a low- or no-income tax state.

If the trust in the high tax state has low basis assets, a preferred partnership might be a way to shift growth to the other state – perhaps even after seven years[2242] getting the low basis assets outside of the high tax state altogether.

Conversely, if the trust in the high tax state has high income but expects little or no capital gain, perhaps a preferred partnership can shift the income to the other state and leave the never-to-be-taxed unrealized appreciation in the high tax state.

However, if the trust in the high tax state has high basis assets, selling the assets and lending the money to the other trust in exchange for a long-term AFR note might do the trick more simply than engaging in a preferred partnership. If the trust in the higher tax state is a credit

[2241] See part II.H.11.d Valuing Preferred Partnership Interests, especially fn. 2223.
[2242] See part II.Q.8.b.i Distribution of Property by a Partnership, especially part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

shelter trust and the surviving spouse does not need the income, the trustee could contribute the note to an S corporation and have the spouse make a QSST election so that all of the income is taxable to the surviving spouse, whether or not it is distributed; the S corporation then distributes only enough to pay the surviving spouse's income tax and invests the rest of the note payments.[2243]

II.H.11.f.v. Better Than a Charitable Lead Trust

Suppose client contributes highly appreciated property to a preferred partnership, receiving a preferred partnership interest and some significant common interest as well.[2244] The donor might then give the common to an irrevocable trust to which the donor allocates GST exemption, to get growth and future increases in income out of the estate tax system.

If, much later,[2245] the client decides to give the preferred partnership interest to a public charity, the income tax results are superior to those of a charitable lead trust. Results of giving the preferred partnership interest to a public charity:

- Income tax deduction for the fair market value of the gift.
- To the extent of the preferred return, the partnership's income is allocated to the charity,[2246] making it not taxable to the donor or the donor's family.
- The built-in gain attributable to the preferred interest is taxable to the charity when the property contributed for the preferred interest is sold.[2247]

Contrast that with a gift to an inter vivos charitable lead trust (without a partnership), in which:

- For the grantor to get an up-front charitable income tax deduction, the trust must be a grantor trust, in which case the grantor is taxed on all of the trust's income and capital gain, including amounts paid to the charity.
- Otherwise, the donor receives no charitable income tax deduction, and trust receives a charitable deduction to the extent that gross income is distributed to charity. When the underlying property is sold, the trust pays tax on all of the gain, to the extent not distributed to charity.
- The only way to assure that the remainder will have a zero inclusion ratio is to give the charity a unitrust. Assuming the property's value grows, payments to charity grow, in

[2243] See part III.A.3.e QSSTs and ESBTs, especially part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts (Whether or Not a Sale Is Made).
[2244] See text accompanying fn 2200 in part II.H.11.a Basics of Preferred Partnerships.
[2245] The preferred interest cannot have been created with an intent (at the time of creation) to give it to charity. See part II.Q.6.f.iii Charitable Partial Interest Prohibition, especially the text accompanying fns 4752-4753.
[2246] If and to the extent that the partnership generates unrelated business income, the charity will pay tax on that income. See part II.Q.6.d.i UBTI Related to a Partnership or Sole Proprietorship. If that tax is a concern, make sure the charity is a community foundation, donor advised fund, or other intermediary that distributes the income to the ultimate charitable recipient. See part II.Q.6.d.iii Charitable Deduction Against UBTI.
[2247] See part II.P.1.a.i.(a) General Rules for Allocations of Income in Partnerships, especially fns 3825-3827, 3838.

contrast to the gift to charity of a preferred partnership interest, in which payments to charity are frozen.

II.H.11.g. Need for Tax Distributions

When a partnership has any preferential distributions of operating cash flow, consider prioritizing distributions to pay taxes.

For example, suppose partnership AB provides that A is allocated and receives the first $100K of annual income, then receives the next $1M of operating cash flow to reduce A's capital account, then after that A is allocated 20% and B is allocated 80% of the profits. In the first year, AB earns $150K. A is allocated $110K of income, consisting of the first $100K plus 20% of the $50K excess; and B is allocated the remaining $40K of income ($80% of $50K). However, all distributions of operating cash flow go to A, leaving B without any cash from AB to pay B's taxes on the $40K.

Ray and Simpson, "Negotiating Partnership Preferred Equity," Tax Notes (10/30/2023),[2248] explores some nuances when some partners contribute cash and others contribute property with value in excess of basis (Code § 704(c) responsibility)[2249] or when a partnership contributes cash to a partnership holding property with value in excess of basis (reverse-Code § 704(c) responsibility).[2250]

Consider this from a form I use:

> <u>Section 4.3</u> <u>Distributions To Pay Taxes</u>. This Section is in consideration of the Members not causing the Company to be taxed as a C corporation. No later than a week before the due date of any estimated income tax payments, the Company shall distribute Cash to each Member as the Manager deems sufficient to pay the Member's share of the estimated tax due on the Company's income. To determine the estimated tax due, the Company shall apply a tax rate which is the sum of the highest rate of tax that could apply to the Company's type of income for federal income tax purposes combined with the highest rate of tax that could apply to that type of income for applicable state income tax purposes. The Manager may make this calculation using the Company's income through the end of the preceding month and annualizing as provided in Code section 6654(d)(2). Alternatively, the Manager may use the Company's income for the prior year, multiply it by the federal and state tax rate (determined above) for the prior year, and divide the product by four (4) for each quarter. In either event, no later than three (3) months after the end of the taxable year, the Manager shall calculate the distribution under this Section for such taxable year using the Company's income for the taxable year and distribute the amount calculated, less any prior distributions (whether or not under this Section) with respect to such taxable year. Without limiting the generality of the foregoing, federal income tax includes any tax

[2248] Thompson Coburn LLP doc. No. 31320322.

[2249] See parts II.P.1.a.i Allocations of Income in Partnerships (concept introduced in fn 3128) and II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

[2250] For a description of reverse-Code § 704(c) allocations of gain on sale, see part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, especially fns. 5444-5447.

imposed under Subtitle A of the Code. The amount of distributions pursuant to this Section received by a Member shall be treated as an advance on amounts otherwise distributable under Section 4.1.] [Note: Subtitle A includes self-employment tax and the tax on net investment income.]

The introductory sentence recites consideration to argue that tax distributions are an arm's-length contractual obligation rather than a mere return on investment.

II.H.12. Large Taxable Gifts to Lock in Lifetime Gift/Estate Tax Exemption

If one is concerned about a possible reduction in the lifetime gift/estate tax exemption, one may make a large taxable gift.

Part II.H.12.a Taxable Gifts of Property Included in the Donor's Estate covers the effect of:

- Taxable gifts on calculating estate tax, whether or not the gifted property is includible in the donor's gross estate.
- Using lifetime gift/estate tax exemption that exceeds the estate tax exemption otherwise allowable when the donor dies.
- Possible anti-abuse regulations attacking taxable gifts of gifted property includible in the donor's gross estate.

When reading part II.H.12.a, note that splitting large taxable gifts that are included in the grantor's estate prevents the wash effect of taxable gifts, in that:

- The consenting spouse makes taxable gifts but does not have estate inclusion.
- The grantor spouse has estate inclusion that is only offset by half of the taxable gifts.

The possibility of anti-abuse regulations may make one steer away from strategies that may be targeted. Strategies not called out for such an attack and cautions regarding using one's entire lifetime gift tax exemption (whether or not subject to the possible attack) are described in part II.H.12.b Using Lifetime Gift Tax Exemption without Estate Inclusion.

II.H.12.a. Taxable Gifts of Property Included in the Donor's Estate

The regulations governing bonus exemption may make a strategy of taxable gifts of property included in the donor's estate be counterproductive if the client is trying to lock in bonus estate tax exemption.

The preamble to proposed regulations on this topic explains in the "Background" section of the SUPPLEMENTARY INFORMATION portion:[2251]

I. Overview

In computing the amount of Federal gift tax to be paid on a gift or the amount of Federal estate tax to be paid at death, the gift and estate tax provisions of the Internal Revenue Code (Code) apply a unified rate schedule to the taxpayer's cumulative taxable gifts and taxable estate on death to arrive at a net tentative tax. The net tentative tax then is reduced by a credit based on the applicable exclusion amount (AEA), which is the sum of the basic exclusion amount (BEA) within the meaning of section 2010(c)(3) of the Code and, if applicable, the deceased spousal unused exclusion (DSUE) amount within the meaning of section 2010(c)(4). In certain cases, the AEA also includes a restored exclusion amount pursuant to Notice 2017-15, 2017-6 I.R.B. 783. Prior to January 1, 2018, for estates of decedents dying and gifts made beginning in 2011, section 2010(c)(3) provided a BEA of $5 million, indexed for inflation after 2011. The credit is applied first against the gift tax, on a cumulative basis, as taxable gifts are made. To the extent that any credit remains at death, it is applied against the estate tax.

This document contains proposed regulations to amend the Estate Tax Regulations (26 CFR part 20) under section 2010(c)(3) of the Code. The proposed regulations would update § 20.2010-1 to conform to statutory changes to the determination of the BEA enacted on December 22, 2017, by sections 11002 and 11061 of the Tax Cuts and Jobs Act, Public Law 115-97, 131 Stat. 2504 (2017) (TCJA).

II. Federal Gift Tax Computation Generally

The Federal gift tax is imposed by section 2501 of the Code on an individual's transfers by gift during each calendar year. The gift tax is determined under a seven-step computation required under sections 2502 and 2505 using the rate schedule set forth in section 2001(c) as in effect for the calendar year in which the gifts are made.

First, section 2502(a)(1) requires the determination of a tentative tax (that is, a tax unreduced by a credit amount) on the sum of all taxable gifts, whether made in the current year or in one or more prior periods (Step 1).

Second, section 2502(a)(2) requires the determination of a tentative tax on the sum of the taxable gifts made in all prior periods (Step 2).

Third, section 2502(a) requires the tentative tax determined in Step 2 to be subtracted from the tentative tax determined in Step 1 to arrive at the net tentative gift tax on the gifts made in the current year (Step 3).

Fourth, section 2505(a)(1) requires the determination of a credit equal to the applicable credit amount within the meaning of section 2010(c). The applicable credit amount is the tentative tax on the AEA determined as if the donor had died on the last day of the current calendar year. The AEA is the sum of the BEA as in effect for the year in which

[2251] REG-106706-18, RIN 1545-B072, 83 FR 59343 (11/30/2018), available at https://www.federalregister.gov/d/2018-25538 or https://www.federalregister.gov/documents/2018/11/23/2018-25538/estate-and-gift-taxes-difference-in-the-basic-exclusion-amount.

the gift was made, any DSUE amount as of the date of the gift as computed pursuant to § 25.2505-2, and any restored exclusion amount as of the date of the gift as computed pursuant to Notice 2017-15 (Step 4).

Fifth, section 2505(a)(2) and the flush language at the end of section 2505(a) require the determination of the sum of the amounts allowable as a credit to offset the gift tax on gifts made by the donor in all preceding calendar periods. For purposes of this determination, the allowable credit for each preceding calendar period is the tentative tax, computed at the tax rates in effect for the current period, on the AEA for such prior period, but not exceeding the tentative tax on the gifts actually made during such prior period. Section 2505(c). (Step 5).

Sixth, section 2505(a) requires that the total credit allowable for prior periods determined in Step 5 be subtracted from the credit for the current period determined in Step 4. (Step 6).

Finally, section 2505(a) requires that the credit amount determined in Step 6 be subtracted from the net tentative gift tax determined in Step 3 (Step 7).

III. Federal Estate Tax Computation Generally

The Federal estate tax is imposed by section 2001(a) on the transfer of a decedent's taxable estate at death. The estate tax is determined under a five-step computation required under sections 2001 and 2010 using the same rate schedule used for gift tax purposes (thus referred to as the unified rate schedule) as in effect at the decedent's death.

First, section 2001(b)(1) requires the determination of a tentative tax (again, a tax unreduced by a credit amount) on the sum of the taxable estate and the adjusted taxable gifts, defined as all taxable gifts made after 1976 other than those included in the gross estate (Step 1).

Second, section 2001(b)(2) and (g) require the determination of a hypothetical gift tax (a gift tax reduced, but not to below zero, by the credit amounts allowable in the years of the gifts) on all post-1976 taxable gifts, whether or not included in the gross estate. The credit amount allowable for each year during which a gift was made is the tentative tax, computed using the tax rates in effect at the decedent's death, on the AEA for that year, but not exceeding the tentative tax on the gifts made during that year. Section 2505(c). The AEA is the sum of the BEA as in effect for the year in which the gift was made, any DSUE amount as of the date of the gift as computed pursuant to § 25.2505-2, and any restored exclusion amount as of the date of the gift as computed pursuant to Notice 2017-15. This hypothetical gift tax is referred to as the gift tax payable (Step 2).

Third, section 2001(b) requires the gift tax payable determined in Step 2 to be subtracted from the tentative tax determined in Step 1 to arrive at the net tentative estate tax (Step 3).

Fourth, section 2010(a) and (c) require the determination of a credit equal to the tentative tax on the AEA as in effect on the date of the decedent's death. This credit may not exceed the net tentative estate tax. Section 2010(d). (Step 4).

Finally, section 2010(a) requires that the credit amount determined in Step 4 be subtracted from the net tentative estate tax determined in Step 3. (Step 5).

IV. TCJA Amendments

Section 11061 of the TCJA amended section 2010(c)(3) to provide that, for decedents dying and gifts made after December 31, 2017, and before January 1, 2026, the BEA is increased by $5 million to $10 million as adjusted for inflation (increased BEA). On January 1, 2026, the BEA will revert to $5 million. Thus, an individual or the individual's estate may utilize the increased BEA to shelter from gift and estate taxes an additional $5 million of transfers made during the eight-year period beginning on January 1, 2018, and ending on December 31, 2025 (increased BEA period).

In addition, section 11002 of the TCJA amended section 1(f)(3) of the Code to base the determination of annual cost-of-living adjustments, including those for gift and estate tax purposes, on the Chained Consumer Price Index for All Urban Consumers for all taxable years beginning after December 31, 2017. Section 11002 of the TCJA also made conforming changes in sections 2010(c)(3)(B)(ii), 2032A(a)(3)(B), and 2503(b)(2)(B).

Section 11061 of the TCJA also added section 2001(g)(2) to the Code, which, in addition to the necessary or appropriate regulatory authority granted in section 2010(c)(6) for purposes of section 2010(c), directs the Secretary to prescribe such regulations as may be necessary or appropriate to carry out section 2001 with respect to any difference between the BEA applicable at the time of the decedent's death and the BEA applicable with respect to any gifts made by the decedent.

V. Summary of Concerns Raised by Changes in BEA

1. IN GENERAL

Given the cumulative nature of the gift and estate tax computations and the differing manner in which the credit is applied against these two taxes, commenters have raised two questions regarding a potential for inconsistent tax treatment or double taxation of transfers resulting from the temporary nature of the increased BEA. First, in cases in which a taxpayer exhausted his or her BEA and paid gift tax on a pre-2018 gift, and then either makes an additional gift or dies during the increased BEA period, will the increased BEA be absorbed by the pre-2018 gift on which gift tax was paid so as to deny the taxpayer the full benefit of the increased BEA during the increased BEA period? Second, in cases in which a taxpayer made a gift during the increased BEA period that was fully sheltered from gift tax by the increased BEA but makes a gift or dies after the increased BEA period has ended, will the gift that was exempt from gift tax when made during the increased BEA period have the effect of increasing the gift or estate tax on the later transfer (in effect, subjecting the earlier gift to tax even though it was exempt from gift tax when made)?

As discussed in the remainder of this Background section, the Treasury Department and the IRS have analyzed the statutorily required steps for determining Federal gift and estate taxes in the context of several different situations that could occur either during the increased BEA period as a result of an increase in the BEA, or thereafter as a result of a decrease in the BEA. Only in the last situation discussed below was a potential problem identified, and a change intended to correct that problem is proposed in this notice of proposed rulemaking. This preamble, however, also includes a brief explanation of the reason why no potential problem is believed to exist in any of the first three situations discussed below. For the sake of simplicity, the following discussion assumes that, as may be the more usual case, the AEA includes no DSUE or restored exclusion amount and thus, refers only to the BEA.

2. EFFECT OF INCREASE IN BEA ON GIFT TAX

The first situation considered is whether, for gift tax purposes, the increased BEA available during the increased BEA period is reduced by pre-2018 gifts on which gift tax actually was paid. This issue arises for donors, who made both pre-2018 gifts exceeding the then-applicable BEA, thus making gifts that incurred a gift tax liability, and additional gifts during the increased BEA period. The concern raised is whether the gift tax computation will apply the increased BEA to the pre-2018 gifts, thus reducing the BEA otherwise available to shelter gifts made during the increased BEA period and, in effect, allocating credit to a gift on which gift tax in fact was paid.

Step 3 of the gift tax determination requires the tentative tax on all gifts from prior periods to be subtracted from the tentative tax on the donor's cumulative gifts (including the current gift). The gifts from prior periods include the pre-2018 gifts on which gift tax was paid. In this way, the full amount of the gift tax liability on the pre-2018 gifts is removed from the current year gift tax computation, regardless of whether that liability was sheltered from gift tax by the BEA and/or was satisfied by a gift tax payment. Steps 4 through 6 of the gift tax determination then require, in effect, that the BEA for the current year be reduced by the BEA allowable in prior periods against the gifts that were made by the donor in those prior periods. The increased BEA was not available in the years when the pre-2018 gifts were made and thus, was not allowable against those gifts. Accordingly, the gift tax determination appropriately reduces the increased BEA only by the amount of BEA allowable against prior period gifts, thereby ensuring that the increased BEA is not reduced by a prior gift on which gift tax in fact was paid.

3. EFFECT OF INCREASE IN BEA ON ESTATE TAX

The second situation considered is whether, for estate tax purposes, the increased BEA available during the increased BEA period is reduced by pre-2018 gifts on which gift tax actually was paid. This issue arises in the context of estates of decedents who both made pre-2018 gifts exceeding the then allowable BEA, thus making gifts that incurred a gift tax liability, and die during the increased BEA period. The concern raised is whether the estate tax computation will apply the increased BEA to the pre-2018 gifts, thus reducing the BEA otherwise available against the estate tax during the increased BEA period and, in effect, allocating credit to a gift on which gift tax in fact was paid.

Step 3 of the estate tax determination requires that the hypothetical gift tax on the decedent's post-1976 taxable gifts be subtracted from the tentative tax on the sum of the taxable estate and adjusted taxable gifts. The post-1976 taxable gifts include the pre-2018 gifts on which gift tax was paid. In this way, the full amount of the gift tax liability on the pre-2018 gifts is removed from the estate tax computation, regardless of whether that liability was sheltered from gift tax by the BEA and/or was satisfied by a gift tax payment. Step 4 of the estate tax determination then requires that a credit on the amount of the BEA for the year of the decedent's death be subtracted from the net tentative estate tax. As a result, the only time that the increased BEA enters into the computation of the estate tax is when the credit on the amount of BEA allowable in the year of the decedent's death is netted against the tentative estate tax, which in turn already has been reduced by the hypothetical gift tax on the full amount of all post-1976 taxable gifts (whether or not gift tax was paid). Thus, the increased BEA is not reduced by the portion of any prior gift on which gift tax was paid, and the full amount of the increased BEA is available to compute the credit against the estate tax.

4. EFFECT OF DECREASE IN BEA ON GIFT TAX

The third situation considered is whether the gift tax on a gift made after the increased BEA period is inflated by a theoretical gift tax on a gift made during the increased BEA period that was sheltered from gift tax when made. If so, this would effectively reverse the benefit of the increased BEA available for gifts made during the increased BEA period. This issue arises in the case of donors who both made one or more gifts during the increased BEA period that were sheltered from gift tax by the increased BEA in effect during those years, and made a post-2025 gift. The concern raised is whether the gift tax determination on the post-2025 gift will treat the gifts made during the increased BEA period as gifts not sheltered from gift tax by the credit on the BEA, given that the post-2025 gift tax determination is based on the BEA then in effect, rather than on the increased BEA.

Just as in the first situation considered in part V(2) of this Background section, Step 3 of the gift tax determination directs that the tentative tax on gifts from prior periods be subtracted from the tentative tax on the donor's cumulative gifts (including the current gift). The gift tax from prior periods includes the gift tax attributable to the gifts made during the increased BEA period. In this way, the full amount of the gift tax liability on the increased BEA period gifts is removed from the computation, regardless of whether that liability was sheltered from gift tax by the BEA or was satisfied by a gift tax payment. All that remains is the tentative gift tax on the donor's current gift. Steps 4 through 6 of the gift tax determination then require that the credit based on the BEA for the current year be reduced by such credits allowable in prior periods. Even if the sum of the credits allowable for prior periods exceeds the credit based on the BEA in the current (post-2025) year, the tax on the current gift cannot exceed the tentative tax on that gift and thus will not be improperly inflated. The gift tax determination anticipates and avoids this situation, but no credit will be available against the tentative tax on the post-2025 gift.

5. EFFECT OF DECREASE IN BEA ON ESTATE TAX

The fourth situation considered is whether, for estate tax purposes, a gift made during the increased BEA period that was sheltered from gift tax by the increased BEA inflates a post-2025 estate tax liability. This will be the case if the estate tax computation fails to treat such gifts as sheltered from gift tax, in effect reversing the benefit of the increased BEA available for those gifts. This issue arises in the case of estates of decedents who both made gifts during the increased BEA period that were sheltered from gift tax by the increased BEA in effect during those years, and die after 2025. The concern raised is whether the estate tax computation treats the gifts made during the increased BEA period as post-1976 taxable gifts not sheltered from gift tax by the credit on the BEA, given that the post-2025 estate tax computation is based on the BEA in effect at the decedent's death rather than the BEA in effect on the date of the gifts.

In this case, the statutory requirements for the computation of the estate tax, in effect, retroactively eliminate the benefit of the increased BEA that was available for gifts made during the increased BEA period. This can be illustrated by the following examples.

Example 1.

Individual A made a gift of $11 million in 2018, when the BEA was $10 million. A dies in 2026, when the BEA is $5 million, with a taxable estate of $4 million. Based on a literal application of section 2001(b), the estate tax would be approximately $3,600,000, which is equal to a 40 percent estate tax on $9 million (specifically, the $9 million being the sum of the $4 million taxable estate and $5 million of the 2018 gift sheltered from gift tax by the increased BEA). This in effect would impose estate tax on the portion of the 2018 gift that was sheltered from gift tax by the increased BEA allowable at that time.

Example 2.

The facts are the same as in Example 1, but A dies in 2026 with no taxable estate. Based on a literal application of section 2001(b), A’s estate tax is approximately $2 million, which is equal to a 40 percent tax on $5 million. Five million dollars is the amount by which, after taking into account the $1 million portion of the 2018 gift on which gift tax was paid, the 2018 gift exceeded the BEA at death. This, in effect, would impose estate tax on the portion of the 2018 gift that was sheltered from the gift tax by the excess of the 2018 BEA over the 2026 BEA.

This problem occurs as a result of the interplay between Steps 2 and 4 of the estate tax determination, and the differing amounts of BEA taken into account in those steps. Step 2 determines the credit against gift taxes payable on all post-1976 taxable gifts, whether or not included in the gross estate, using the BEA amounts allowable on the dates of the gifts but determined using date of death tax rates. Step 3 subtracts gift tax payable from the tentative tax on the sum of the taxable estate and the adjusted taxable gifts. The result is the net tentative estate tax. Step 4 determines a credit based on the BEA as in effect on the date of the decedent’s death. Step 5 then reduces the net tentative estate tax by the credit determined in Step 4. If the credit amount applied at Step 5 is less than that allowable for the decedent’s post-1976 taxable gifts at Step 2, the effect is to increase the estate tax by the difference between those two credit amounts. In this circumstance, the statutory requirements have the effect of imposing an estate tax on gifts made during the increased BEA period that were sheltered from gift tax by the increased BEA in effect when the gifts were made.

Code § 2001(g)(2), “Modifications to estate tax payable to reflect different basic exclusion amounts,” provides:

The Secretary shall prescribe such regulations as may be necessary or appropriate to carry out this section with respect to any difference between -

(A) the basic exclusion amount under section 2010(c)(3) applicable at the time of the decedent’s death, and

(B) the basic exclusion amount under such section applicable with respect to any gifts made by the decedent.

The Senate amendment, which the conference agreement followed, explained the above provision:

> As a conforming amendment to section 2010(g) (regarding computation of estate tax), the provision provides that the Secretary shall prescribe regulations as may be necessary or appropriate to carry out the purposes of the section with respect to differences between the basic exclusion amount in effect: (1) at the time of the decedent's death; and (2) at the time of any gifts made by the decedent.

The preamble to the final regulations, T.D. 9884 (11/26/2019), [2252] provides:

> **SUPPLEMENTARY INFORMATION:**
>
> **Background**
>
> Section 11061 of the Tax Cuts and Jobs Act, Public Law 115-97, 131 Stat. 2504 (2017) (TCJA) amended section 2010(c)(3) of the Internal Revenue Code (Code) to provide that, for decedents dying and gifts made after December 31, 2017, and before January 1, 2026, the basic exclusion amount (BEA) is increased by $5 million to $10 million as adjusted for inflation (increased BEA). On January 1, 2026, the BEA will revert to $5 million as adjusted for inflation.
>
> This document contains amendments to the Estate Tax Regulations (26 CFR part 20) relating to the BEA described in section 2010(c)(3) of the Code. On November 23, 2018, a notice of proposed rulemaking (proposed regulations) under section 2010 (REG-106706-18) was published in the Federal Register (83 FR 59343). No public hearing was requested or held. Written or electronic comments responding to the proposed regulations were received. After consideration of all the comments, this Treasury decision adopts the proposed regulations with certain revisions. Comments and revisions to the proposed regulations are discussed in the Summary of Comments and Explanation of Revisions.
>
> The final regulations adopt the special rule provided in the proposed regulations in cases where the portion of the credit against the estate tax that is based on the BEA is less than the sum of the credit amounts attributable to the BEA allowable in computing gift tax payable within the meaning of section 2001(b)(2). In that case, the rule provides that the portion of the credit against the net tentative estate tax that is attributable to the BEA is based upon the greater of those two credit amounts. The rule thus would ensure that the estate of a decedent is not inappropriately taxed with respect to gifts that were sheltered from gift tax by the increased BEA when made.
>
> **Summary of Comments and Explanation of Revisions**
>
> **1. Overview**
>
> Most commenters agreed that the special rule would avoid an unfair situation that otherwise could effectively vitiate the statutory increase in the BEA during the period January 1, 2018, through December 31, 2025 (increased BEA period). These

[2252] https://www.federalregister.gov/documents/2019/11/26/2019-25601/estate-and-gift-taxes-difference-in-the-basic-exclusion-amount#footnote-1-p64997 or https://www.federalregister.gov/d/2019-25601.

commenters also acknowledged that the special rule would provide important clarification for taxpayers. However, one commenter suggested an alternate approach and two others disputed the regulatory authority to adopt the special rule. Some commenters suggested technical changes. All of the other comments were requests for clarification of the interaction of the special rule with the inflation adjustments to the BEA, the deceased spousal unused exclusion (DSUE) amount, and the generation-skipping transfer (GST) tax, and requests for additional examples. These comments are discussed in this preamble.

2. Inflation Adjustments

Several commenters noted that the example in the proposed regulations does not reflect the annual inflation adjustments to the BEA, and requested clarification of the effect of those adjustments on the application of the special rule. The inflation adjustments were not included in that example for purposes of more simply illustrating the special rule. However, by definition, the term BEA refers to the amount of that exclusion as adjusted for inflation, so the Department of the Treasury (Treasury Department) and the IRS agree that examples including inflation adjustments would be appropriate. Accordingly, the examples in the final regulations reflect hypothetical inflation-adjusted BEA amounts.

One commenter requested confirmation that under the special rule a decedent does not benefit from the increased BEA, including inflation adjustments, to the extent it is in excess of the amount of gifts the decedent actually made, and agreed that this is the appropriate interpretation of the statute. Specifically, the increased BEA as adjusted for inflation is a “use or lose” benefit and is available to a decedent who survives the increased BEA period only to the extent the decedent “used” it by making gifts during the increased BEA period. The final regulations include Example 2 in § 20.2010-1(c)(2)(ii) to demonstrate that the application of the special rule is based on gifts actually made, and thus is inapplicable to a decedent who did not make gifts in excess of the date of death BEA as adjusted for inflation.

Commenters also sought confirmation that under the special rule a decedent dying after 2025 will not benefit from post-2025 inflation adjustments to the BEA to the extent the decedent made gifts in an amount sufficient to cause the total BEA allowable in the computation of gift tax payable to exceed the date of death BEA as adjusted for inflation. This is confirmed in Example 1 of § 20.2010-1(c)(2)(i) of these final regulations. In computing the estate tax, the BEA, in effect, is applied first against the decedent’s gifts as taxable gifts were made. To the extent any BEA remains at death, it is applied against the decedent’s estate. Therefore, in the case of a decedent who had made gifts in an amount sufficient to cause the total BEA allowable in the computation of gift tax payable to equal or exceed the date of death BEA as adjusted for inflation, there is no remaining BEA available to be applied to reduce the estate tax. The special rule does not change the five-step estate tax computation required under sections 2001 and 2010 of the Code or the fact that, under that computation, only the credit that remains after computing gift tax payable may be applied against the estate tax.

One commenter recommended that, where the BEA allowable in computing gift tax payable exceeds the date of death BEA including inflation adjustments, the special rule should permit the use of a BEA equal to the sum of the BEA allowable in computing gift tax payable and the post-2025 inflation adjustments. For the reasons discussed in the preceding paragraphs, this recommendation is inconsistent with the unified gift and estate tax statutes. If the BEA allowable in computing gift tax payable exceeds the date of death BEA as adjusted for inflation, under the special rule, the inflation adjustments already have been allowable against taxable gifts and it would be inconsistent with the estate tax statute to allow them again against the estate tax.

3. DSUE

Several commenters asked for confirmation that, even if the amount of BEA that is allowable under section 2010(c)(3) of the Code decreases after 2025, a DSUE amount elected during the increased BEA period will not be reduced as a result of the sunset of the increased BEA. Section 2010(c)(4) defines the DSUE amount as the lesser of the BEA or the unused portion of the deceased spouse's applicable exclusion amount (AEA) at death. The regulations in §§ 20.2010-1(d)(4) and 20.2010-2(c)(1) confirm that the reference to BEA is to the BEA in effect at the time of the deceased spouse's death, rather than the BEA in effect at the death of the surviving spouse. A DSUE election made on the deceased spouse's estate tax return allows the surviving spouse to take into account the deceased spouse's DSUE amount as part of the surviving spouse's AEA. Section 2010(c)(5); § 20.2010-2(a). AEA is the sum of the DSUE amount and the BEA. Section 2010(c)(2). A decrease in the BEA after 2025 will reduce the surviving spouse's AEA only to the extent that it is based upon the BEA, but not to the extent that it is based on the DSUE amount. Therefore, the sunset of (or any other decrease in) the increased BEA has no impact on the existing DSUE rules and the existing regulations governing DSUE continue to apply. Examples 3 and 4 of § 20.2010-1(c)(2)(iii) and (iv), respectively, of these final regulations address this situation. The examples demonstrate that, if a spouse dies during the increased BEA period, and the deceased spouse's executor makes the portability election, the surviving spouse's AEA includes the full amount of the DSUE that is based on the deceased spouse's increased BEA. This DSUE amount is available to offset the surviving spouse's transfer tax liability regardless of when the transfers are made, whether during or after the increased BEA period.

4. BEA Computations

Several commenters raised questions concerning the calculation of the credit amount solely attributable to the BEA in computing gift tax payable where the AEA upon which the credits are based consists of amounts other than the BEA. In response to these comments, the final regulations clarify how to determine the extent to which a credit allowable in computing gift tax payable is based solely on the BEA. First, the credit may not exceed that amount necessary to reduce the gift tax for that calendar period to zero. Second, any DSUE amount available to the decedent for that calendar period is deemed to be applied to the decedent's gifts before any of the decedent's BEA is applied to those gifts. This is consistent with the existing ordering rule concerning the application of DSUE to a given transfer. See §§ 20.2010-3(b) and 25.2505-2(b). Third, in a calendar period in which the AEA allowable with regard to gifts made during that period includes both DSUE and BEA, the allowable BEA may not exceed that necessary to reduce the tentative gift tax to zero after the application of the DSUE amount. Fourth, in a calendar period in which the AEA allowable with regard to gifts made during that period includes both DSUE and BEA, the portion of the credit based solely on the BEA for that period is that which corresponds to the result of dividing the BEA allocable to those gifts by the AEA allocable to those gifts. Example 4 of § 20.2010-1(c)(2)(iv) of these final regulations addresses the application of the DSUE ordering rule as well as the computation of the credit based solely on the BEA in a calendar period in which the transfer exhausts the remaining DSUE amount with the result that the BEA is also allowable.

A commenter requested an example involving a taxable estate that exceeds the available exclusion amount. Each of Examples 2, 3, and 4 of § 20.2010-1(c)(2)(ii), (iii) and (iv), respectively, of these final regulations contemplates that the decedent's estate potentially is taxable, and identifies the exclusion amounts upon which the credit against the tentative estate tax is based.

A commenter suggested that examples be provided regarding the computation of the gift tax on gifts made during the increased BEA period and after the sunset of that period. The computation of the gift tax in both situations was discussed in detail in the preamble to the proposed regulations. See part V.2., Effect of Increase in BEA on the Gift Tax, and part V.4., Effect of Decrease in BEA on the Gift Tax, in the Background section of the proposed regulations. That discussion concludes that the existing seven-step gift tax computation required under sections 2502 and 2505 of the Code appropriately applies in the case of both increases and decreases in the BEA. Accordingly, there is nothing that needs to be changed in the gift tax computation and thus, no need for gift tax examples.

Some commenters suggested a BEA ordering rule, similar to that for DSUE, under which the increase in the BEA during the increased BEA period over the BEA in effect in 2017 (base BEA) is deemed to be allowable against gifts before the base BEA. They posited that this would allow donors to utilize the increase in the BEA without being deemed to have utilized the base BEA, so that the base BEA would remain available for transfers made after 2025. Specifically, a $5 million gift made during the increased BEA period would use the temporary increase in the BEA and preserve or "bank" the base BEA of $5 million so as to be available after 2025 for either gift or estate tax purposes. This suggestion was not adopted for several reasons. First, it is inconsistent with the sunset of the increased BEA in that it, in effect, would extend the availability of the increased BEA beyond 2025. As discussed in section 2 of this Summary of Comments and Explanation of Revisions, Inflation Adjustments, the increased BEA is a "use or lose" benefit that is available only during the increased BEA period. Second, it is inconsistent with the cumulative structure of the unified transfer tax regime. Under that regime, the BEA in effect for a particular year is the exclusion allowable for cumulative purposes—that is, for all prior taxable gifts and the current gift or taxable estate. In the case of a donor or decedent who made prior gifts in an amount at least equal to the post-2025 exclusion amount in effect in the year of the current gift or death, there is no remaining BEA available to be applied. Finally, as is explained in the preamble to the proposed regulations, the existing seven-step gift tax computation required under sections 2502 and 2505 of the Code appropriately adjusts for gifts made in an earlier period during which the BEA differed from the BEA in effect for a current gift. The suggested BEA ordering rule would create the same sort of problem these final regulations are designed to correct.

5. GST Tax

Several commenters asked for confirmation that, during the increased BEA period, donors may make late allocations of the increase in GST exemption to inter vivos trusts created prior to 2018.[1] An increase in the BEA correspondingly increases the GST tax exemption, which is defined by reference to the BEA. Section 2631(c). The effect of the increased BEA on the GST tax is beyond the scope of this rulemaking.

[1] See Joint Comm. on Taxation, JCS-1-18, “General Explanation of Public Law 115-97,” 89 (2018), indicating that a late allocation of GST exemption (increased by the increase in the BEA) may be made during the increased BEA period.

A commenter requested confirmation and examples showing that allocations of the increased GST exemption made during the increased BEA period (whether to transfers made before or during that period) will not be reduced as a result of the sunset of the increased BEA. There is nothing in the statute that would indicate that the sunset of the increased BEA would have any impact on allocations of the GST exemption available during the increased BEA period. However, this request is beyond the scope of this project.

6. Anti-Abuse Rule

[reproduced further below]

7. Regulatory Authority

Two commenters suggested that the special rule would exceed the scope of the authority granted by Congress. They stated that the impact of the rule is on the estates of decedents dying after the sunset of the increased BEA period. They suggested that the rule would violate the reconciliation rules under which the TCJA was passed because it would increase the impact on the deficit beyond 2025, and therefore could not have been what Congress intended in the grant of regulatory authority. They also suggested that the avoidance of an estate tax that recaptures gift tax on sheltered gifts could not have been what Congress intended because they interpret the TCJA revenue estimates as showing that the recapture of that gift tax was contemplated. In short, these commenters suggested that Congress was concerned with the treatment of transfers made before January 1, 2026, but not with those made after December 31, 2025.

As explained in the following paragraphs, these suggestions are inconsistent with section 2001(g), which addresses the effect of changes in tax rates and exclusion amounts on the computation of the estate tax. Moreover, they are also inconsistent with the plain language of section 2001(g)(2), which addresses circumstances that can occur only after December 31, 2025.

What is now section 2001(g)(1) of the Code was added by the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010, Public Law 111-312, 124 Stat. 3296 (2010) (TRUIRJCA). Section 302(a) of TRUIRJCA raised the exclusion amount to $5 million, as adjusted for inflation, and reduced the maximum tax rate from 45 to 35 percent. Section 302(d)(1)(B) of TRUIRJCA, “Modifications of Estate and Gift Taxes to Reflect Differences in Credit Resulting From Different Tax Rates,” added section 2001(g) to the Code. The effect of section 2001(g) is to treat the post-1976 taxable gifts and the taxable estate consistently by applying the same tax rate, regardless of whether the transfer occurred during life or at death. This consistency is achieved by using one tax rate to determine not only the gift and estate tax liabilities, but also the credit against the estate tax and against all prior gift taxes. This is the case regardless of whether rates have increased or decreased.

Section 2001(g)(2) of the Code was added by the TCJA. Section 11061 of the TCJA raised the BEA to $10 million, as adjusted for inflation, for transfers after December 31, 2017, and before January 1, 2026. The TCJA then provided that the BEA reverts to $5 million, as adjusted for inflation, for transfers after December 31, 2025. The addition of section 2001(g)(2) was a conforming amendment to the estate tax. H. Conf. Rept. 115-466, 115th Cong., 1st sess. 316 (Dec. 15, 2017). Under current law, the first change in the BEA to which section 2001(g)(2) could be applicable is the decrease to $5 million, as adjusted for inflation, on January 1, 2026.

As explained in the preamble to the proposed regulations, a decrease in the BEA has the potential to cause the imposition of estate tax on gifts that were sheltered from gift tax by the higher BEA in effect when the gifts were made. Again, under current law, this can occur only after December 31, 2025, when the BEA reverts to $5 million, as adjusted for inflation, as a result of the sunset of the increased BEA.

The impact of the sunset of the increased BEA as of January 1, 2026, was precisely the situation Congress wished to have addressed when it made the explicit grant of regulatory authority under section 2001(g)(2) and, further, the purpose of that grant was to authorize a regulatory rule to ensure that there will be no imposition of estate tax on inter vivos gifts that were sheltered from gift tax by the increased BEA in effect when the gifts were made. Indeed, prior legislative efforts to address the effect of anticipated reductions in the exclusion amount have proposed various approaches to produce the same result. See the Sensible Estate Tax Act of 2011, H.R. 3467, 112th Cong., 1st sess. section 2(c) (2011) (amending section 2001(g) to address a proposed reduction in the exclusion amount from $5 million to $1 million); and the Middle Class Tax Cut Act, S. 3393, 112th Cong., 2nd sess. section 201(b) (2012) (adding section 2001(h) to address a proposed reduction in the exclusion amount from $5 million to $3.5 million). As explained in "General Explanation of Public Law 115-97" (TCJA Bluebook),

> Because the increase in the basic exclusion amount does not apply for estates of decedents dying after December 31, 2025, it is expected that this guidance will prevent the estate tax computation under section 2001(g) from recapturing, or "clawing back," all or a portion of the benefit of the increased basic exclusion amount used to offset gift tax for certain decedents who make taxable gifts between January 1, 2018, and December 31, 2025, and die after December 31, 2025.

Joint Comm. on Taxation, JCS-1-18, "General Explanation of Public Law 115-97," 89 (2018). One commenter disputes the TCJA Bluebook explanation as an indication that the grant of regulatory authority was to prevent this "clawback" on the basis of the fact that the Bluebook was not published until almost one year after the enactment of the TCJA. The Treasury Department and the IRS consider the TCJA Bluebook's explanation of the grant of regulatory authority to be an accurate reflection of Congressional intent.

Finally, one commenter said that the special rule is based on the "flawed assumption" that such "clawback" would constitute double taxation. The commenter said that the gift and estate taxes are two different taxes, even though cumulative, and thus subjecting the same inter vivos transfer to both taxes would not be double taxation. The Treasury Department and the IRS disagree with this proposition. The gift and estate taxes are subject to a unified structure that ensures that a transfer is taxed only once, regardless of whether that transfer ultimately is treated as an inter vivos transfer or as a testamentary transfer. Indeed, the way in which the estate tax statute addresses prior gifts included in the gross estate makes it clear that a single transfer is to be taxed only once.

> In sum, section 2001(g) is directed to the consequences of changing tax rates and decreasing exclusion amounts on the computation of the estate tax. In the absence of section 2001(g)(1), a change in tax rates could subject post-1976 taxable gifts and the taxable estate to different rates, which could adversely impact the amount of credit available against the estate tax. In the absence of the special rule implementing the directions in section 2001(g)(2), a decrease in the exclusion amount could have the effect of understating the gift tax payable on post-1976 gifts, with the result that estate tax would be imposed on gifts that were sheltered from tax when made by the increased BEA. Under current law, a decrease in the exclusion amount cannot occur until after December 31, 2025. This is the period to which section 2001(g)(2) is directed. Accordingly, the special rule is well within the scope of the regulatory authority and accurately reflects the purpose of that authority.

The final regulations included Reg.§ 20.2010-1(c), "Special rule in the case of a difference between the basic exclusion amount applicable to gifts and that applicable at the donor's date of death," which provides:

> Changes in the basic exclusion amount that occur between the date of a donor's gift and the date of the donor's death may cause the basic exclusion amount allowable on the date of a gift to exceed that allowable on the date of death. If the total of the amounts allowable as a credit in computing the gift tax payable on the decedent's post-1976 gifts, within the meaning of section 2001(b)(2), to the extent such credits are based solely on the basic exclusion amount as defined and adjusted in section 2010(c)(3), exceeds the credit allowable within the meaning of section 2010(a) in computing the estate tax, again only to the extent such credit is based solely on such basic exclusion amount, in each case by applying the tax rates in effect at the decedent's death, then the portion of the credit allowable in computing the estate tax on the decedent's taxable estate that is attributable to the basic exclusion amount is the sum of the amounts attributable to the basic exclusion amount allowable as a credit in computing the gift tax payable on the decedent's post-1976 gifts.
>
> (1) *Computational rules*. For purposes of this paragraph (c):
>
> (i) In determining the amounts allowable as a credit:
>
> (A) The amount allowable as a credit in computing gift tax payable for any calendar period may not exceed the tentative tax on the gifts made during that period (section 2505(c)); and
>
> (B) The amount allowable as a credit in computing the estate tax may not exceed the net tentative tax on the taxable estate (section 2010(d)).
>
> (ii) In determining the extent to which an amount allowable as a credit in computing gift tax payable is based solely on the basic exclusion amount:
>
> (A) Any deceased spousal unused exclusion (DSUE) amount available to the decedent is deemed to be applied to gifts made by the decedent before the decedent's basic exclusion amount is applied to those gifts (see §§ 20.2010-3(b) and 25.2505-2(b));

(B) In a calendar period in which the applicable exclusion amount allowable with regard to gifts made during that period includes amounts other than the basic exclusion amount, the allowable basic exclusion amount may not exceed that necessary to reduce the tentative gift tax to zero; and

(C) In a calendar period in which the applicable exclusion amount allowable with regard to gifts made during that period includes amounts other than the basic exclusion amount, the portion of the credit based solely on the basic exclusion amount is that which corresponds to the result of dividing the basic exclusion amount allocable to those gifts by the applicable exclusion amount allocable to those gifts.

(iii) In determining the extent to which an amount allowable as a credit in computing the estate tax is based solely on the basic exclusion amount, the credit is computed as if the applicable exclusion amount were limited to the basic exclusion amount.

(2) *Examples*. All basic exclusion amounts include hypothetical inflation adjustments. Unless otherwise stated, in each example the decedent's date of death is after 2025.

(i) *Example 1*. Individual A (never married) made cumulative post-1976 taxable gifts of $9 million, all of which were sheltered from gift tax by the cumulative total of $11.4 million in basic exclusion amount allowable on the dates of the gifts. The basic exclusion amount on A's date of death is $6.8 million. A was not eligible for any restored exclusion amount pursuant to Notice 2017-15. Because the total of the amounts allowable as a credit in computing the gift tax payable on A's post-1976 gifts (based on the $9 million of basic exclusion amount used to determine those credits) exceeds the credit based on the $6.8 million basic exclusion amount allowable on A's date of death, this paragraph (c) applies, and the credit for purposes of computing A's estate tax is based on a basic exclusion amount of $9 million, the amount used to determine the credits allowable in computing the gift tax payable on A's post-1976 gifts.

(ii) *Example 2*. Assume that the facts are the same as in Example 1 of paragraph (c)(2)(i) of this section except that A made cumulative post-1976 taxable gifts of $4 million. Because the total of the amounts allowable as a credit in computing the gift tax payable on A's post-1976 gifts is less than the credit based on the $6.8 million basic exclusion amount allowable on A's date of death, this paragraph (c) does not apply. The credit to be applied for purposes of computing A's estate tax is based on the $6.8 million basic exclusion amount as of A's date of death, subject to the limitation of section 2010(d).

(iii) *Example 3*. Individual B's predeceased spouse, C, died before 2026, at a time when the basic exclusion amount was $11.4 million. C had made no taxable gifts and had no taxable estate. C's executor elected, pursuant to § 20.2010-2, to allow B to take into account C's $11.4 million DSUE amount. B made no taxable gifts and did not remarry. The basic exclusion amount on B's date of death is $6.8 million. Because the total of the amounts allowable as a credit in computing the gift tax payable on B's post-1976 gifts attributable to the basic exclusion amount (zero) is less than the credit based on the basic exclusion amount allowable on B's date of death, this paragraph (c) does not apply. The credit to be applied for purposes of computing B's estate tax is based on B's $18.2 million applicable exclusion amount, consisting of the $6.8 million basic exclusion amount on B's date of death plus the $11.4 million DSUE amount, subject to the limitation of section 2010(d).

(iv) *Example 4*. Assume the facts are the same as in Example 3 of paragraph (c)(2)(iii) of this section except that, after C's death and before 2026, B makes taxable gifts of $14 million in a year when the basic exclusion amount is $12 million. B is considered to apply the DSUE amount to the gifts before applying B's basic exclusion amount. The amount allowable as a credit in computing the gift tax payable on B's post-1976 gifts for that year ($5,545,800) is the tax on $14 million, consisting of $11.4 million in DSUE amount and $2.6 million in basic exclusion amount. This basic exclusion amount is 18.6 percent of the $14 million exclusion amount allocable to those gifts, with the result that $1,031,519 (0.186 × $5,545,800) of the amount allowable as a credit for that year in computing gift tax payable is based solely on the basic exclusion amount. The amount allowable as a credit based solely on the basic exclusion amount for purposes of computing B's estate tax ($2,665,800) is the tax on the $6.8 million basic exclusion amount on B's date of death. Because the portion of the credit allowable in computing the gift tax payable on B's post-1976 gifts based solely on the basic exclusion amount ($1,031,519) is less than the credit based solely on the basic exclusion amount ($2,665,800) allowable on B's date of death, this paragraph (c) does not apply. The credit to be applied for purposes of computing B's estate tax is based on B's $18.2 million applicable exclusion amount, consisting of the $6.8 million basic exclusion amount on B's date of death plus the $11.4 million DSUE amount, subject to the limitation of section 2010(d).

Reg.§ 20.2010-1(c)(3) simply says "[Reserved]," as the preamble further below described in the anti-abuse rules.

Reg.§ 20.2010-1(e)(3), "Basic exclusion amount," provides:

Except to the extent provided in paragraph (e)(3)(iii) of this section, the basic exclusion amount is the sum of the amounts described in paragraphs (e)(3)(i) and (ii) of this section.

(i) For any decedent dying in calendar year 2011 or thereafter, $5,000,000; and

(ii) For any decedent dying after calendar year 2011 and before calendar year 2018, $5,000,000 multiplied by the cost-of-living adjustment determined under section 1(f)(3) for the calendar year of the decedent's death by substituting "calendar year 2010" for "calendar year 1992" in section 1(f)(3)(B) and by rounding to the nearest multiple of $10,000. For any decedent dying after calendar year 2017, $5,000,000 multiplied by the cost-of-living adjustment determined under section 1(f)(3) for the calendar year of the decedent's death by substituting "calendar year 2010" for "calendar year 2016" in section 1(f)(3)(A)(ii) and rounded to the nearest multiple of $10,000.

(iii) For any decedent dying after calendar year 2017, and before calendar year 2026, paragraphs (e)(3)(i) and (ii) of this section will be applied by substituting "$10,000,000" for "$5,000,000."

In its “Report No. 1410 – Report on the Proposed Section 2010 Regulations,” the Tax Section of the New York State Bar Association commented on the proposed regulations.[2253] The report recommended an anti-abuse rule in part III.F, “Preservation of Basic Exclusion Amount for Gifts Pulled Back into Estate,”

> The estate and gift tax system makes it possible for a completed gift to have occurred during lifetime even though the property transferred is pulled back into the transferor’s gross estate at death. For example, an individual may make a gift of a remainder interest in property while retaining a life estate.[29] Despite the completed gift of the remainder, under Section 2036(a)(1), the entire value of the property will be included in the individual’s gross estate at death as a result of the retained right to income and enjoyment of the property.[30]
>
> > [29] See Treas. Reg. 25.2511-1(e). If the gift of the remainder is made to a member of the transferor’s family within the meaning of Section 2704(c)(2), the retained value of the life estate will be ignored for gift tax valuation purposes. I.R.C. § 2702(a).
> >
> > [30] So that the property does not count twice against applicable exclusion amount (and is not double taxed), the lifetime gift of the remainder is purged from the estate tax computation base under the Section 2001(b) estate tax computation procedures and the exclusion amount used up by the gift is effectively restored.
>
> The Proposed Regulations, in allowing a higher basic exclusion amount to a decedent whose taxable gifts used up the temporarily increased exclusion amount available before 2026, do not distinguish between gifts that pass outside of the gross estate and those that do not. On the contrary, under the Proposed Regulations, the only condition that must be satisfied in order to lock in the temporarily increased exclusion amount is that gifts use up an amount of basic exclusion that is greater than the amount available at death. Whether those gifts are included in the gross estate at death is irrelevant, under the Proposed Regulations.
>
> This result may well have been intentional. Nevertheless, we wish to bring to the Treasury’s and the Service’s attention that it would permit individuals to make relatively painless taxable gifts that lock in the increased exclusion amount, even though they retain beneficial access to the transferred property. A gift of a remainder, subject to a retained life estate, is a good example. By making a gift of a remainder interest, an individual can use up the temporarily increased exclusion amount while retaining the income and enjoyment of the property. That Section 2036(a)(1) will cause the property to be included in the gross estate does not, under the Proposed Regulations, prevent the gift from locking in the increased exclusion amount.
>
> Moreover, special valuation rules under chapter 14 of the Code, originally enacted to curb valuation abuses, can be used to increase the amount of a taxable gift artificially, thereby making it easier to lock in the increased exclusion amount. Suppose, for example, that a father makes a gift to his daughter of a remainder interest in a $10 million residence, while retaining a life estate. Under Section 2702(a), the retained life estate is valued at zero and the value of the gift is equal to the entire $10 million value of

---

[2253] See https://nysba.org/NYSBA/Sections/Tax/Tax%20Section%20Reports/Tax%20Section%20Reports%202019/1410%20Report.pdf.

the residence. Thus, the gift of the remainder, though in economic terms less valuable than the undivided residence, successfully uses up $10 million of exclusion available before 2026. The father thereafter may continue to use and enjoy the residence for his lifetime, yet still, under the Proposed Regulations, cause $10 million of wealth to be shielded by the increased exclusion amount under the Act.

We recommend that Treasury and the Service consider proposing rules that would create exceptions to the favorable rule of the Proposed Regulations in the case of gifts that are included in the gross estate. Under this approach, if a decedent made a gift of property before 2026 and the gift is included in the gross estate, any increased basic exclusion amount used up by the gift is not preserved at death. As the gift would be purged from the estate tax computation base under Section 2001(b), there is no concern about claw back of tax. Further, the property would be subject to the estate tax lien[31] and the decedent's executor would normally have a right to recover the share of estate taxes attributable to the property.[32]

[31] I.R.C. § 6324(a)(1).

[32] *See*, *e.g.*, New York's Estates, Powers, and Trusts Law 2-1.8(e); *see also* I.R.C. § 2207B.

That said, Treasury and the Service may not have sufficient tools to prevent all possible planning to lock in the increased exclusion amount artificially. Deathbed planning, for example, might successfully eliminate, just before death, any rights or powers that would otherwise trigger gross estate inclusion.[33] An artificial taxable gift also could be made by making a gift of common interests in a partnership or corporation, while retaining preferred interests that intentionally run afoul of the valuation rules of Section 2701 and thereby trigger a larger taxable gift. The common interests would not be pulled back into the gross estate, yet the donor still would have the right to earnings and income of the entity through the retention of preferred interests.[34]

[33] Section 2035(a) provides that if a decedent, within three years of death, relinquished certain rights or powers over transferred property that otherwise would have caused gross estate inclusion, then the property is pulled back into the gross estate. The requirement of affirmative relinquishment, however, could be avoided by giving a third party the power to eliminate the donor's gross estate inclusion strings just before death.

[34] Treas. Reg. § 25.2701-5 provides rules to mitigate double taxation if a transfer had previously run afoul of Section 2701's valuation rules, and the holder of the Section-2701-triggering retained interest makes a subsequent transfer of that interest. In general, under these rules, the initial transferor or his or her estate may, for gift or estate tax computation purposes, reduce the value of the prior Section 2701 transfer so that it is not counted twice in the tax base. If an individual makes a Section 2701 transfer before 2026, however, the effect of the mitigation rules would be to free up, as a shield against tax on future wealth transfers, an amount of exclusion equal to the amount of any temporarily increased exclusion used up by the Section 2701 transfer. In other words, any increased basic exclusion amount used up by a Section 2701 transfer would be effectively preserved after 2025. To prevent the mitigation rules from having this effect, Treasury and the Service could propose an amendment to Treas. Reg. § 25.2701-5(b). The amendment would provide that the amount of reduction in

the value of any prior Section 2701 transfer would not include the difference between the amount of basic exclusion amount used up by the initial Section 2701 transfer and the amount of basic exclusion amount available at the time of the subsequent transfer of the Section 2701 interest. That is, the amount of the temporarily increased exclusion used up by the initial Section 2701 transfer would be subtracted from the reduction amount.

Given the difficulties of the problem, if Treasury and the Service wish to limit the benefits of locking in temporarily increased exclusion amount, we recommend that the Treasury and Service study the problem further. Final regulations could reserve space for future regulations and seek comments on this issue.

The preamble to the final regulations, T.D. 9884 (11/26/2019), [2254] responded to this comment:

6. Anti-Abuse Rule

A commenter recommended consideration of an anti-abuse provision to prevent the application of the special rule to transfers made during the increased BEA period that are not true inter vivos transfers, but rather are treated as testamentary transfers for transfer tax purposes. Examples include transfers subject to a retained life estate or other retained powers or interests, and certain transfers within the purview of chapter 14 of subtitle B of the Code. The purpose of the special rule is to ensure that bona fide inter vivos transfers are not subject to inconsistent treatment for estate tax purposes. Arguably, the possibility of inconsistent treatment does not arise with regard to transfers that are treated as part of the gross estate for estate tax purposes, rather than as adjusted taxable gifts. An anti-abuse provision could except from the application of the special rule transfers where value is included in the donor's gross estate at death. Although the Treasury Department and the IRS agree that such a provision is within the scope of the regulatory authority granted in section 2001(g)(2), such an anti-abuse provision would benefit from prior notice and comment. Accordingly, this issue will be reserved to allow further consideration of this comment.

As to the preamble's reference to "certain transfers within the purview of chapter 14 of subtitle B of the Code," see part II.H.11.e Using Preferred Partnership that Intentionally Violates Code § 2701.

As to the preamble's reference to "transfers subject to a retained life estate or other retained powers or interests," see part III.B.2.c Grantor Retained Income Trust (GRIT), which includes:

- Strategic use of a GRIT using up the grantor's remaining exemptions and a possible exit strategy if the anti-abuse regulations are issued and apply.

- How to trigger a large taxable gift whether or not Code § 2702, including arguments over power of appointment.

Another way to trigger use of lifetime gift tax exemption while retaining an interest in the property is for the income beneficiary of a QTIP trust to renounce a small part of the income. That renunciation would trigger a Code § 2519 taxable gift and may trigger Code § 2036

[2254] https://www.federalregister.gov/documents/2019/11/26/2019-25601/estate-and-gift-taxes-difference-in-the-basic-exclusion-amount#footnote-1-p64997 or https://www.federalregister.gov/d/2019-25601.

inclusion. See part II.H.2.c QTIP Trusts - Code § 2519 Trap; see fn 2052 and the text following it re Code § 2036 inclusion. If a reverse QTIP election is made, the application of Code § 2519 would not change the trust's GST attributes.[2255] Reasons to trigger a Code § 2519 taxable gift may include locking in one's lifetime gift/estate tax exemption or avoiding loss of the deceased spouse's unused exemption (DSUE). As to the latter, if the surviving spouse remarries and the new spouse predeceases the surviving spouse, the surviving spouse loses the first spouse's DSUE and instead has the new spouse's DSUE; see part II.H.2.a Free Basis Step-Up When First Spouse Dies.[2256] To avoid this risk, a surviving spouse who remarries ought to consider using DSUE as soon as possible. Because DSUE is used before the surviving spouse's own lifetime gift/estate tax exemption,[2257] triggering use of DSUE may have little downside. Query whether the anti-abuse rule would also undermine this tactic.

For more detailed discussion of the possible anti-abuse rule that preceding the proposed regulations being issued, see Lynagh, "Potential Anti-Abuse Rules May Limit Use of the Temporarily Increased Gift Tax Exclusion," *Tax Management Estates, Gifts, and Trusts Journal*, 45 EGTJ 03 (5/7/2020).

ACTEC submitted comments on the proposed regulations.

II.H.12.b. Using Lifetime Gift Tax Exemption without Estate Inclusion

One spouse might give property to a trust for the other spouse and their family members. This would give one spouse access without implicating the anti-abuse rules. Such a trust is often called a spousal limited access trust (SLAT). For transactions involving SLATs, see part III.B.2.i.xv Sale to Trust Created by Spouse: An Alternative Way to Have a Trust Benefitting Client. A donor who wants to hedge against emergencies might grant an independent party a power to appoint part or all of the trust to a trust for the benefit of the donor the if law of the state in which the trust is created does not make such a trust subject to the donor's creditors;[2258] ideally:

- To try to minimize the effectiveness of any Code § 2036 issues, the independent party would not have fiduciary duties and would not even be aware of this power until long after the donor finished making taxable gifts.
- The independent party might not be appointed at all but rather might be appointed only when the donor becomes needy; see the comment below about a power to amend possibly having grantor trust implications.
- The new trust would be governed by the law of (and administered in) a state that respects spendthrift clauses when the settlor is a beneficiary.

2255 See text accompanying and following fn 6405 in part III.B.1.d.iii Who Is the Transferor.
2256 See fn 2009.
2257 Reg. § 25.2505-2(b), "Manner in which DSUE amount is applied," provides:

> If a donor who is a surviving spouse makes a taxable gift and a DSUE amount is included in determining the surviving spouse's applicable exclusion amount under section 2010(c)(2), such surviving spouse will be considered to apply such DSUE amount to the taxable gift before the surviving spouse's own basic exclusion amount.

2258 Subjecting the trust's assets to the donor's creditors may cause the gift to be wholly incomplete. See part III.B.2.i.xi My Suggestion for Distribution Trustee – A Variation of Letter Ruling 201039010.

Consider the impact of using all of one's lifetime gift/estate exemption and GST exemption. If the donor would like to create a new irrevocable trust with different terms, the donor would not be able to use these tax attributes. Furthermore, if the donor makes outright taxable gifts because family members need funds, the donor would be required to pay gift tax. Consider the following ideas:

- Use part of that remaining lifetime exemption to create an irrevocable trust that can provide funds for family members when the need arises. If the donor is married to the other parent of the donor's children, the nondonor spouse might have a power to amend the trust; otherwise, consider granting an independent person the right to amend the trust. When drafting a power to amend, consider whether that power might interfere with the donor's ability to turn off grantor trust status; see part III.B.2.h How to Make a Trust a Grantor Trust Taxed to a U.S. Citizen or Resident, especially part III.B.2.h.vii Distribution Provisions Might Prevent Turning Off Grantor Trust Status.

- After the exemption is used, if that trust for the family's needs has not been created then perhaps use GRATs to shift assets to a trust for nonskip persons that after the grantor's death can also use the tuition/medical GST exclusion for grandchildren and other descendants while at least one child is alive. When the last child dies, include in that child's estate, pay GST tax, or distribute the remainder to a family donor-advised fund or private foundation. If the donor is married, the nondonor spouse might have a power to amend the trust.

- If the client has a living parent on good terms, ask the parent to create a beneficiary deemed-owned trust with up to $5,000 funding. See parts III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts and III.B.2.i.ii Building Up Trust. Then ask the client's parent to provide an identical trust for any bequest that the parent wishes to leave the client. The bequeathed trust could then guarantee any loans the client makes to the smaller trust needs to buy assets from the client. See parts III.B.2.i.v Sale to a Beneficiary Deemed-Owned Trust – When a Traditional Sale to an Irrevocable Grantor Trust Does Not Meet the Client's Objectives and III.B.2.i.vi.(a) General Concept of Funding with Small Gifts.

- Have one spouse use all of the exemption and have the other leave exemption in reserve for future use.

Beware that getting assets outside of the estate tax system also prevents a basis step-up. See part II.H.5 Irrevocable Trust Planning and Basis Issues; to better explore basis step-up issues, I strongly recommend reading the subpart headings within part II.H Income Tax vs. Estate and Gift Tax (Particularly for Depreciable Property) of the FULL TABLE OF CONTENTS. A formula comparing the estate tax savings of growth to the income tax savings of basis step-up is in the text preceding fn 2155 in part II.H.5.a Irrevocable Trust Planning and Basis Issues - Generally; however, that formula does not consider estate tax savings of using the lifetime gift tax exemption before a permanent reduction.

Basis step-up issues may encourage one to use strategies that result in the gifted assets being included in the donor's estate merely as a guard against a decrease in estate tax exemption and not as a way to remove growth from the estate tax system, if the benefit of removing growth from the estate tax system does not exceed the value of the lost basis step-up. Strategies that allow one to get the best of both worlds are in parts III.B.2.c Grantor Retained Income Trust (GRIT) and II.H.5.d Using Grantor's Parent's Exemption for Basis Step-Up.

II.I. 3.8% Tax on Excess Net Investment Income (NII)

For the IRS' basic overview, see http://www.irs.gov/uac/Newsroom/Net-Investment-Income-Tax-FAQs.

II.I.1. Taxpayers and Years Affected

For taxable years beginning after December 31, 2012,[2259] net investment income ("NII") in excess of certain thresholds is subject to a 3.8% tax.[2260] The preamble to the final regulations explains:[2261]

> Section 1402(a)(1) of the HCERA added section 1411 to a new chapter 2A of subtitle A (Income Taxes) of the Code effective for taxable years beginning after December 31, 2012. Section 1411 imposes a 3.8 percent tax on certain individuals, estates, and trusts. See section 1411(a)(1) and (a)(2). The tax does not apply to a nonresident alien or to a trust all of the unexpired interests in which are devoted to one or more of the purposes described in section 170(c)(2)(B). See section 1411(e).

In calculating foreign tax credit, NII tax is ignored when calculating U.S. income tax allocable to foreign income. *Toulouse v. Commissioner*, 157 T.C. 49 (2021).

II.I.2. Regulatory Framework

The preamble to the final regulations described the regulatory framework:[2262]

> On December 5, 2012, the Treasury Department and the IRS published a notice of proposed rulemaking in the Federal Register (REG-130507-11; 77 FR 72612) relating to the Net Investment Income Tax. On January 31, 2013, corrections to the proposed regulations were published in the Federal Register (78 FR 6781). The Treasury Department and the IRS received numerous comments in response to the proposed regulations. All comments are available at www.regulations.gov[2263] or upon request. The Treasury Department and the IRS held a public hearing on the proposed regulations on April 2, 2013.
>
> In addition to these final regulations, the Treasury Department and the IRS are contemporaneously publishing a notice of proposed rulemaking in the Federal Register (REG-130843-13) relating to the Net Investment Income Tax.

The preamble to the final regulations explained taxpayer reliance on proposed and final regulations:[2264]

> These regulations are effective for taxable years beginning after December 31, 2013, except that § 1.1411-3(d) applies to taxable years beginning after December 31, 2012.

[2259] P.L. 111-152, section 1402(b)(3).
[2260] Code § 1411(a).
[2261] T.D. 9644.
[2262] T.D. 9644.
[2263] A more direct link is http://www.regulations.gov/#!docketBrowser;rpp=25;po=0;dct=PS;D=IRS-2012-0049.
[2264] T.D. 9644.

> Taxpayers are reminded that section 1411 is effective for taxable years beginning after December 31, 2012.
>
> Part 12 of the preamble to the proposed regulations stated that taxpayers may rely on the proposed regulations for purposes of compliance with section 1411 until the effective date of the final regulations. Furthermore, the preamble stated that any election made in reliance on the proposed regulations will be in effect for the year of the election, and will remain in effect for subsequent taxable years. In addition, taxpayers who opt not to make an election in reliance on the proposed regulations are not precluded from making that election pursuant to these final regulations.
>
> For taxable years beginning before January 1, 2014, taxpayers may rely on either the proposed regulations or these final regulations for purposes of compliance with section 1411. See § 1.1411-1(f). However, to the extent that taxpayers take a position in a taxable year beginning before January 1, 2014 that is inconsistent with these final regulations, and such position affects the treatment of one or more items in a taxable year beginning after December 31, 2013, then such taxpayer must make reasonable adjustments to ensure that their section 1411 tax liability in the taxable years beginning after December 31, 2013, is not inappropriately distorted. For example, reasonable adjustments may be required to ensure that no item of income or deduction is taken into account in computing net investment income more than once, and that carryforwards, basis adjustments, and other similar items are adjusted appropriately.

Effective/Applicability Date

> These final regulations apply to taxable years beginning after December 31, 2013, except that § 1.1411-3(d) applies to taxable years beginning after December 31, 2012.

The final regulations were issued with additional proposed regulations, the preamble to which explained the regulatory background:[2265]

> The Treasury Department and the IRS received comments on the 2012 Proposed Regulations requesting that they address the treatment of section 707(c) guaranteed payments for capital, section 736 payments to retiring or deceased partners for section 1411 purposes, and certain capital loss carryovers. After consideration of all comments received, the Treasury Department and the IRS believe that it is appropriate to address the treatment of these items in regulations. Because such guidance had not been proposed in the 2012 Proposed Regulations, it is being issued for notice and comment in these new proposed regulations.
>
> The Treasury Department and the IRS also received comments on the simplified method for applying section 1411 to income recipients of charitable remainder trusts (CRTs) that was proposed in the 2012 Proposed Regulations. The comments recommended that the section 1411 classification incorporate the existing category and class system under section 664. These proposed regulations provide special rules for the application of the section 664 system to CRTs that derive income from controlled foreign corporations (CFCs) or passive foreign investment companies (PFICs) with respect to which an election under § 1.1411-10(g) is not in place. Specifically, these proposed regulations coordinate the application of the rules applicable to shareholders of CFCs and PFICs in

[2265] REG-130843-13.

§ 1.1411-10 with the section 664 category and class system adopted in § 1.1411-3(d)(2) of the 2013 Final Regulations.

Furthermore, these proposed regulations allow CRTs to elect to apply the section 664 system adopted in the 2013 Final Regulations or the simplified method set forth in the 2012 Proposed Regulations. Some comments responding to the 2012 Proposed Regulations requested that we provide an election. The Treasury Department and the IRS request comments with regard to whether or not taxpayers believe this election is preferable to the section 664 system adopted in the 2013 Final Regulations. If it appears that there is no significant interest in having the election, the Treasury Department and the IRS may omit it from the regulations when finalized, and the simplified method contained in the 2012 Proposed Regulations would no longer be an option.

These proposed regulations also address the net investment income tax characterization of income and deductions attributable to common trust funds (CTFs), residual interests in real estate mortgage investment conduits (REMICs), and certain notional principal contracts.

The Treasury Department and the IRS also received comments on the 2012 Proposed Regulations questioning the proposed regulation's methodology for adjusting a transferor's gain or loss on the disposition of its partnership interest or S corporation stock. In view of these comments, the 2013 Final Regulations removed § 1.1411-7 of the 2012 Proposed Regulations and reserved § 1.1411-7 in the 2013 Final Regulations.

This notice of proposed rulemaking proposes revised rules regarding the calculation of net gain from the disposition of a partnership interest or S corporation stock (each a "Passthrough Entity") to which section 1411(c)(4) may apply.

The preamble to the 2013 proposed regulations explained effective dates:[2266]

These regulations are proposed to apply for taxable years beginning after December 31, 2013, except that § 1.1411-3(d)(3) is proposed to apply to taxable years beginning after December 31, 2012.

II.I.3. Tax Based on NII in Excess of Thresholds

The preamble describes how to calculate the tax:[2267]

In the case of an individual, section 1411(a)(1) imposes a tax (in addition to any other tax imposed by subtitle A) for each taxable year equal to 3.8 percent of the lesser of: (A) the individual's net investment income for such taxable year, or (B) the excess (if any) of: (i) the individual's modified adjusted gross income for such taxable year, over (ii) the threshold amount. Section 1411(b) provides that the threshold amount is: (1) in the case of a taxpayer making a joint return under section 6013 or a surviving spouse (as defined in section 2(a)), $250,000; (2) in the case of a married taxpayer (as defined in section 7703) filing a separate return, $125,000; and (3) in the case of any other individual, $200,000. Section 1411(d) defines modified adjusted gross income as adjusted gross income increased by the excess of: (1) the amount excluded from gross

[2266] REG-130843-13.
[2267] T.D. 9644.

income under section 911(a)(1), over (2) the amount of any deductions (taken into account in computing adjusted gross income) or exclusions disallowed under section 911(d)(6) with respect to the amount excluded from gross income under section 911(a)(1). Section 1.1411-2 of the final regulations provides guidance on the computation of the net investment income tax for individuals.

> In the case of an estate or trust, section 1411(a)(2) imposes a tax (in addition to any other tax imposed by subtitle A) for each taxable year equal to 3.8 percent of the lesser of: (A) the estate's or trust's undistributed net investment income, or (B) the excess (if any) of: (i) the estate's or trust's adjusted gross income (as defined in section 67(e)) for such taxable year, over (ii) the dollar amount at which the highest tax bracket in section 1(e) begins for such taxable year. Section 1.1411-3 of the final regulations provides guidance on the computation of the net investment income tax for estates and trusts.

Thus, the threshold amount is not indexed for inflation for individuals but is for trusts.[2268]

Short taxable years use the full threshold,[2269] without proration,[2270] unless the short year results from a change in the annual accounting period.[2271]

II.I.4. Calculating NII - General Overview Provided by Preambles

The preamble describes how to calculate net investment income:[2272]

> Section 1411(c)(1) provides that net investment income means the excess (if any) of: (A) the sum of (i) gross income from interest, dividends, annuities, royalties, and rents, other than such income derived in the ordinary course of a trade or business to which the tax does not apply, (ii) other gross income derived from a trade or business to which the tax applies, and (iii) net gain (to the extent taken into account in computing taxable income) attributable to the disposition of property other than property held in a trade or business to which the tax does not apply; over (B) the deductions allowed by subtitle A that are properly allocable to such gross income or net gain. Sections 1.1411-4 and 1.1411-10 of the final regulations provide guidance on the calculation of net investment income under section 1411(c)(1).

> Section 1411(c)(1)(A) defines net investment income, in part, by reference to trades or businesses described in section 1411(c)(2). A trade or business is described in section 1411(c)(2) if such trade or business is: (A) a passive activity (within the meaning of section 469) with respect to the taxpayer, or (B) a trade or business of trading in financial instruments or commodities (as defined in section 475(e)(2)).

> Section 1.1411-5 of the final regulations provides guidance on the trades or businesses described in section 1411(c)(2).

[2268] Compare Code §§ 1411(a)(1)(B)(ii) and 1411(b) (fixed dollar amounts for individuals) with Code § 1411(a)(2)(B)(ii) (referring to the annually indexed top bracket for trusts and estates).
[2269] Reg. § 1.1411-1(d)(1) sets forth the thresholds.
[2270] Reg. § 1.1411-1(d)(2).
[2271] Reg. § 1.1411-1(d)(3).
[2272] T.D. 9644.

> Section 1411(c)(3) provides that income on the investment of working capital is not treated as derived from a trade or business for purposes of section 1411(c)(1) and is subject to tax under section 1411. Section 1.1411-6 of the final regulations provides guidance on working capital under section 1411(c)(3).
>
> In the case of the disposition of an interest in a partnership or an S corporation, section 1411(c)(4) provides that gain or loss from such disposition is taken into account for purposes of section 1411(c)(1)(A)(iii) only to the extent of the net gain or net loss that would be so taken into account by the transferor if all property of the partnership or S corporation were sold at fair market value immediately before the disposition of such interest. Section 1.1411-7 of the final regulations is reserved for guidance under section 1411(c)(4). However, regulations are being proposed contemporaneously with these final regulations that address the application of section 1411(c)(4) to dispositions of interests in partnerships or S corporations.
>
> Section 1411(c)(5) provides that net investment income does not include distributions from a plan or arrangement described in section 401(a), 403(a), 403(b), 408, 408A, or 457(b). Section 1.1411-8 of the final regulations provides guidance on distributions from qualified plans under section 1411(c)(5).
>
> Section 1411(c)(6) provides that net investment income also does not include any item taken into account in determining self-employment income for a taxable year on which a tax is imposed by section 1401(b). Section 1.1411-9 of the final regulations provides guidance regarding self-employment income under section 1411(c)(6).

Regarding properly allocable deductions in excess of investment income, the preamble to the final regulations provides:[2273]

> Proposed § 1.1411-4(f)(1)(ii) provided that any deductions described in § 1.1411- 4(f) in excess of gross income and net gain are not taken into account in determining net investment income in any other taxable year, except as allowed under chapter 1. Many commentators recommended that the final regulations provide that negative net investment income (when section 1411(c)(1)(B) deductions exceed section 1411(c)(1)(A) income) be carried over and become a section 1411(c)(1)(B) deduction in the subsequent year.
>
> The final regulations do not adopt this recommendation. Section 1411(c)(1)(B) provides that, in order for a deduction to be allowed, it must be: (1) allowed by subtitle A, and (2) be properly allocable to section 1411(c)(1)(A) income. Section 1411(c)(1)(B) only allows deductions allowed by other Code sections; it does not establish a basis for a deduction that does not exist elsewhere in the Code. However, as discussed in the following part of this preamble, the final regulations do permit deductions of net operating losses otherwise allowed by subtitle A that are properly allocable to section 1411(c)(1)(A) income.

[2273] T.D. 9644.

Regarding net operating losses (NOLs), the preamble to the final regulations provides:[2274]

> Proposed § 1.1411-4(f)(1)(ii) provided that, in no event, will a net operating loss (NOL) deduction allowed under section 172 be taken into account in determining net investment income for any taxable year. The proposed regulations requested comments on whether a deduction should be allowed for an NOL in determining net investment income. Several commentators argued that, for purposes of section 1411(c)(1)(B), at least some portion of an NOL deduction should be a deduction properly allocable to gross income included in net investment income and therefore allowed in determining net investment income. Three commentators recommended that taxpayers be allowed to keep track of the portions of an NOL attributable to investment income for the loss year. One commentator recommended that the IRS adopt a simple rule for determining a portion of an NOL that is attributable to a "net investment loss" for a loss year (for example, using a ratio of the portion of the loss attributable to "net investment loss" to the NOL) and allow taxpayers to take a prorated portion of the NOL deduction into account in determining net investment income for a taxable year to which the NOL is carried.
>
> The final regulations adopt a modified version of the commentator's approach in § 1.1411-4(f)(2)(iv) and (h). Because NOLs are computed and carried over year-by year, a separate ratio must be determined for each year. Thus, the final regulations provide that taxpayers may deduct a portion of an NOL deduction in determining their net investment income. The portion of an NOL deduction for a taxable year that may be deducted for section 1411 purposes is calculated by first determining the applicable portion of the NOL for each loss year. The applicable portion of the NOL is the lesser of: (1) the amount of the NOL for the loss year that the taxpayer would have incurred if only items of gross income that are used to determine net investment income and only properly allocable deductions were taken into account in determining the NOL in accordance with section 172(c) and (d), or (2) the amount of the taxpayer's NOL for the loss year. Next, the amount of the NOL carried from each loss year and deducted in the taxable year is multiplied by a fraction. The numerator of this fraction is the applicable portion of the NOL for the loss year as determined above. The denominator of the fraction is the total NOL for the loss year. A separate fraction is determined for each loss year. The result of this multiplication is the amount of the NOL deduction from the loss year that is allowed as a section 1411(c)(1)(B) deduction in the taxable year, referred to as the section 1411 NOL amount. The sum of the section 1411 NOL amounts for each NOL carried to and deducted in the taxable year, referred to as the total section 1411 NOL amount, is the amount of the NOL deduction for the taxable year that is properly allocable to net investment income.

Reg. § 1.1411-4(h) describes Code § 1411 NOLs.

See also part II.J.14 Application of 3.8% NII Tax to ESBTs.

[2274] T.D. 9644.

II.I.5. What is Net Investment Income Generally

Except as otherwise provided, all provisions that apply for Chapter 1 of the Code purposes in determining taxable income[2275] also apply in determining net investment income ("NII").[2276]

[2275] As defined in Code § 63(a)

[2276] Reg. § 1.1411-1(a). However, Code § 1411 treatment does not affect treatment under any provision of the Code other than Code § 1411. Reg. § 1.1411-1(c). Also, credits generally allowable against income tax or other taxes are not creditable against the tax on NII. Reg. § 1.1411-1(e).
To add some levity to your day, note that approximately 30 years ago NII was suggested to be a very bad word. If you don't believe me, see https://www.youtube.com/watch?v=zIV4poUZAQo (short version) or https://www.youtube.com/watch?v=QTQfGd3G6dg (long version) from *Monty Python and the Holy Grail*.

NII[2277] is the excess (if any) of:[2278]

1. The sum of:

   a. Gross income from interest,[2279] dividends,[2280] annuities,[2281] royalties,[2282] and rents,[2283] except to the extent excluded by the ordinary course of a trade or business exception;[2284]

[2277] Reg. § 1.1411-1(d)(8) provides:
The term net investment income (NII) means net investment income as defined in section 1411(c) and § 1.1411-4, as adjusted pursuant to the rules described in § 1.1411-10(c).

[2278] Reg. § 1.1411-4(a).

[2279] Reg. § 1.1411-1(d)(6) provides:
The term gross income from interest includes any item treated as interest income for purposes of chapter 1 and substitute interest that represents payments made to the transferor of a security in a securities lending transaction or a sale-repurchase transaction.

[2280] Reg. § 1.1411-1(d)(3) provides:
The term gross income from dividends includes any item treated as a dividend for purposes of chapter 1. See also § 1.1411-10 for additional amounts that constitute gross income from dividends. The term gross income from dividends includes, but is not limited to, amounts treated as dividends--
(i) Pursuant to subchapter C that are included in gross income (including constructive dividends);
(ii) Pursuant to section 1248(a), other than as provided in § 1.1411-10;
(iii) Pursuant to § 1.367(b)-2(e)(2);
(iv) Pursuant to section 1368(c)(2); and
(v) Substitute dividends that represent payments made to the transferor of a security in a securities lending transaction or a sale-repurchase transaction.

CCA 202118009 correctly asserted:
1) Dividend income received by an individual shareholder from a C corporation in which the shareholder is an employee is subject to tax under § 1411.
2) This conclusion is the same even if the C corporation is a closely-held corporation within the meaning of § 469(h)(1) as described in § 465(a)(1)(B).

[2281] Reg. § 1.1411-1(d)(1) provides:
The term gross income from annuities under section 1411(c)(1)(A) includes the amount received as an annuity under an annuity, endowment, or life insurance contract that is includible in gross income as a result of the application of section 72(a) and section 72(b), and an amount not received as an annuity under an annuity contract that is includible in gross income under section 72(e). In the case of a sale of an annuity, to the extent the sales price of the annuity does not exceed its surrender value, the gain recognized would be treated as gross income from an annuity within the meaning of section 1411(c)(1)(A)(i) and § 1.1411-4(a)(1)(i). However, if the sales price of the annuity exceeds its surrender value, the seller would treat the gain equal to the difference between the basis in the annuity and the surrender value as gross income from an annuity described in section 1411(c)(1)(A)(i) and § 1.1411-4(a)(1)(i) and the excess of the sales price over the surrender value as gain from the disposition of property included in section 1411(c)(1)(A)(iii) and § 1.1411-4(a)(1)(iii). The term gross income from annuities does not include amounts paid in consideration for services rendered. For example, distributions from a foreign retirement plan that are paid in the form of an annuity and include investment income that was earned by the retirement plan does not constitute income from an annuity within the meaning of section 1411(c)(1)(A)(i).

b. Other gross income derived from a passive trade or business;[2285] and

c. Net gain from the disposition of property,[2286] except to the extent attributable to property held in an active trade or business[2287] or otherwise provided,[2288]

over

2. Deductions allowable for income tax purposes that are properly allocable to such gross income or net gain.[2289]

The corollary to self-employment income being excluded from NII is that items excluded from SE income might constitute NII.[2290] Note also that wages are not among the type of income constituting NII.

[2282] Reg. § 1.1411-1(d)(11) provides:

> The term gross income from royalties includes amounts received from mineral, oil, and gas royalties, and amounts received for the privilege of using patents, copyrights, secret processes and formulas, goodwill, trademarks, tradebrands, franchises, and other like property.

[2283] Reg. § 1.1411-1(d)(10) provides:

> The term gross income from rents includes amounts paid or to be paid principally for the use of (or the right to use) tangible property.

[2284] See generally part II.I.8 Application of 3.8% Tax to Business Income.

[2285] See generally part II.I.8 Application of 3.8% Tax to Business Income.

[2286] Reg. § 1.1411-4(d)(1) provides:

> Definition of disposition. For purposes of section 1411 and the regulations thereunder, the term disposition means a sale, exchange, transfer, conversion, cash settlement, cancellation, termination, lapse, expiration, or other disposition (including a deemed disposition, for example, under section 877A).

Reg. § 1.1411-4(d)(2) provides:

> Limitation. The calculation of net gain may not be less than zero. Losses allowable under section 1211(b) are permitted to offset gain from the disposition of assets other than capital assets that are subject to section 1411.

Reg. § 1.1411-4(d)(3)(i) provides:

> General rule. Net gain attributable to the disposition of property is the gain described in section 61(a)(3) recognized from the disposition of property reduced, but not below zero, by losses deductible under section 165, including losses attributable to casualty, theft, and abandonment or other worthlessness. The rules in subchapter O of chapter 1 and the regulations thereunder apply. See, for example, § 1.61-6(b). For purposes of this paragraph, net gain includes, but is not limited to, gain or loss attributable to the disposition of property from the investment of working capital (as defined in § 1.1411-6); gain or loss attributable to the disposition of a life insurance contract; and gain attributable to the disposition of an annuity contract to the extent the sales price of the annuity exceeds the annuity's surrender value.

[2287] See generally part II.I.8.b 3.8% Tax Does Not Apply to Gain on Sale of Active Business Assets and also part II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.

[2288] Reg. § 1.1411-4(d)(4)(ii) provides:

> Other gains and losses excluded from net investment income. Net gain, as determined under paragraph (d) of this section, does not include gains and losses excluded from net investment income by any other provision in §§ 1.1411-1 through 1.1411-10. For example, see § 1.1411-7 (certain gain or loss attributable to the disposition of certain interests in partnerships and S corporations) and § 1.1411-8(b)(4)(ii) (net unrealized appreciation attributable to employer securities realized on a disposition of those employer securities).

[2289] Reg. § 1.1411-4(f). See part II.I.6 Deductions Against NII.

[2290] Reg. § 1.1411-9(a) provides:

II.I.6. Deductions Against NII

The following deductions in determining regular adjusted gross income also apply to NII:

- Deductions allocable to gross income from rents and royalties included in NII.[2291]
- Deductions allocable to gross income from trades or businesses included in NII, to the extent the deductions have not been taken into account in determining self-employment income.[2292]
- Penalty on early withdrawal of savings.[2293]
- Net operating loss arising from NII items.[2294]

The following itemized deductions also apply to NII:

- Investment interest expense.[2295]

General rule. Except as provided in paragraph (b) of this section [income derived from a trade or business of trading in financial instruments or commodities], net investment income does not include any item taken into account in determining self-employment income that is subject to tax under section 1401(b) for such taxable year. For purposes of section 1411(c)(6) and this section, taken into account means income included and deductions allowed in determining net earnings from self-employment. However, amounts excepted in determining net earnings from self-employment under section 1402(a)(1)-(17), and thus excluded from self-employment income under section 1402(b), are not taken into account in determining self-employment income and thus may be included in net investment income if such amounts are described in § 1.1411-4. Except as provided in paragraph (b) of this section, if net earnings from self-employment consist of income or loss from more than one trade or business, all items taken into account in determining the net earnings from self-employment with respect to these trades or businesses (see § 1.1402(a)-2(c)) are considered taken into account in determining the amount of self-employment income that is subject to tax under section 1401(b) and therefore not included in net investment income.

[2291] Reg. § 1.1411-4(f)(2)(i).
[2292] Reg. § 1.1411-4(f)(2)(ii).
[2293] Reg. § 1.1411-4(f)(2)(iii).
[2294] Reg. § 1.1411-4(f)(2)(iv), cross-referencing Reg. § 1.1411-4(h).
[2295] Reg. § 1.1411-4(f)(3)(i) , cross-referencing Code § 163(d)(3), which provides:

Investment interest. For purposes of this subsection—

(A) *In general*. The term "investment interest" means any interest allowable as a deduction under this chapter (determined without regard to paragraph (1)) which is paid or accrued on indebtedness properly allocable to property held for investment.

(B) *Exceptions*. The term "investment interest" shall not include—

(i) any qualified residence interest (as defined in subsection (h)(3)), or

(ii) any interest which is taken into account under section 469 in computing income or loss from a passive activity of the taxpayer.

(C) *Personal property used in short sale*. For purposes of this paragraph, the term "interest" includes any amount allowable as a deduction in connection with personal property used in a short sale.

Reg. § 1.163-8T provides interest tracing rules, which provide taxpayer with significant latitude to trace loan proceeds as they wish. Notice 88-74 provides guidance on various issues relating to the home mortgage interest deduction under Code § 163(h)(3).

- Investment expenses.[2296]

- State, local, and foreign income, war profits, and excess profit taxes that are allocable to net investment income.[2297]

- Deduction for unrecovered investment in an annuity in the decedent's final income tax return if the annuity was NII.[2298]

- Deductions for estate GST tax allocable to income in respect of a decedent that is NII.[2299]

- Deductions in connection with the determination, collection, or refund of any tax arising from NII.[2300]

- Amortizable bond premium on a taxable bond.[2301]

- Fiduciary expenses.[2302]

Other deductions include:

- Loss deductions.[2303]

[2296] Reg. § 1.1411-4(f)(3)(ii), cross-referencing Code § 163(d)(4)(C).
[2297] Reg. § 1.1411-4(f)(3)(iii), cross-referencing Code § 164(a)(3). For the effect of refunds of those taxes, see Reg. § 1.1411-4(g)(2).
[2298] Reg. § 1.1411-4(f)(3)(iv).
[2299] Reg. § 1.1411-4(f)(3)(v).
[2300] Reg. § 1.1411-4(f)(3)(vi) provides:

> Amounts described in section 212(3) and § 1.212-1(*l*) to the extent they are allocable to net investment income pursuant to paragraph (g)(1) of this section.

Reg. § 1.212-1(*l*) provides:

> Expenses paid or incurred by an individual in connection with the determination, collection, or refund of any tax, whether the taxing authority be Federal, State, or municipal, and whether the tax be income, estate, gift, property, or any other tax, are deductible. Thus, expenses paid or incurred by a taxpayer for tax counsel or expenses paid or incurred in connection with the preparation of his tax returns or in connection with any proceedings involved in determining the extent of his tax liability or in contesting his tax liability are deductible.

[2301] Reg. § 1.1411-4(f)(3)(vii).
[2302] Reg. § 1.1411-4(f)(3)(viii) provides:

> In the case of an estate or trust, amounts described in § 1.212-1(i) to the extent they are allocable to net investment income pursuant to paragraph (g)(1) of this section.

Reg. § 1.212-1(i) provides:

> Reasonable amounts paid or incurred by the fiduciary of an estate or trust on account of administration expenses, including fiduciaries' fees and expenses of litigation, which are ordinary and necessary in connection with the performance of the duties of administration are deductible under section 212, notwithstanding that the estate or trust is not engaged in a trade or business, except to the extent that such expenses are allocable to the production or collection of tax-exempt income. But see section 642(g) and the regulations thereunder for disallowance of such deductions to an estate where such items are allowed as a deduction under section 2053 or 2054 in computing the net estate subject to the estate tax.

Such fees include the trust's reimbursement of legal fees paid by the beneficiaries to change the trustee and improve the investment of the trust's assets. Letter Rulings 201642027, 201642028.
[2303] Reg. § 1.1411-4(f)(4)(i) provides:

- Ordinary loss deductions for certain debt instruments.[2304]

- Other deductions not yet announced.[2305]

Generally, deductions limited for regular income tax purposes are also limited for NII purposes.[2306]

If a properly allocable deduction is allocable to both NII and taxable items of income that are not NII, the portion of the deduction that is properly allocable to net investment income may be determined by taxpayers using any reasonable method.[2307] See part II.J.8.f.i.(a) Allocating Deductions to Various Income Items. When using expenses to offset taxable items of income, consider which items of income constitute NII,[2308] as well as the overall federal and state income tax rates that apply to those items.

If a taxpayer is refunded, reimbursed, or otherwise recovers any portion of an amount deducted as a deduction against NII in a prior year, and such amount is not otherwise included in NII in the year of recovery, the amount of the recovery will reduce the taxpayer's total deductions against NII in the year of recovery (but not below zero).[2309]

General rule. Losses described in section 165, whether described in section 62 or section 63(d), are allowed as properly allocable deductions to the extent such losses exceed the amount of gain described in section 61(a)(3) and are not taken into account in computing net gain by reason of paragraph (d) of this section.

[2304] Reg. § 1.1411-4(f)(5) provides:

An amount treated as an ordinary loss by a holder of a contingent payment debt instrument under § 1.1275-4(b) or an inflation-indexed debt instrument under § 1.1275-7(f)(1).

[2305] Reg. § 1.1411-4(f)(6) provides:

Any other deduction allowed by subtitle A that is identified in published guidance in the Federal Register or in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter) as properly allocable to gross income or net gain under this section.

[2306] Reg. § 1.1411-4(f)(7) provides:

Application of limitations under sections 67 and 68. Any deductions described in this paragraph (f) that are subject to section 67 (the 2-percent floor on miscellaneous itemized deductions) or section 68 (the overall limitation on itemized deductions) are allowed in determining net investment income only to the extent the items are deductible for chapter 1 purposes after the application of sections 67 and 68. For this purpose, section 67 applies before section 68. The amount of deductions subject to sections 67 and 68 that may be deducted in determining net investment income after the application of sections 67 and 68 is determined as described in paragraph (f)(7)(i) and (f)(7)(ii) of this section.

[2307] Reg. § 1.1411-4(g)(1) provides:

Deductions allocable to both net investment income and excluded income. In the case of a properly allocable deduction described in section 1411(c)(1)(B) and paragraph (f) of this section that is allocable to both net investment income and excluded income, the portion of the deduction that is properly allocable to net investment income may be determined by taxpayers using any reasonable method. Examples of reasonable methods of allocation include, but are not limited to, an allocation of the deduction based on the ratio of the amount of a taxpayer's gross income (including net gain) described in § 1.1411-4(a)(1) to the amount of the taxpayer's adjusted gross income (as defined under section 62 (or section 67(e) in the case of an estate or trust)). In the case of an estate or trust, an allocation of a deduction pursuant to rules described in § 1.652(b)-3(b) (and § 1.641(c)-1(h) in the case of an ESBT) is also a reasonable method.

[2308] See part II.I.5 What is Net Investment Income Generally.

[2309] Reg. § 1.1411-4(g)(2) provides additional details how this works.

Deductions in respect of a decedent also count against NII if they are described in any of the preceding paragraphs.[2310]

Deductions on termination of a trust or estate generally receive NII treatment consistent with their character.[2311]

Special rules apply to losses allowed in computing taxable income by reason of the rules governing former passive activities[2312] or losses allowed when a passive activity is disposed of.[2313]

[2310] Reg. § 1.1411-4(g)(3) provides:

> *Deductions described in section 691(b)*. For purposes of paragraph (f) of this section, properly allocable deductions include items of deduction described in section 691(b), provided that the item otherwise would have been deductible to the decedent under § 1.1411-4(f). For example, an estate may deduct the decedent's unpaid investment interest expense in computing its net investment income because section 691(b) specifically allows the deduction under section 163, and § 1.1411-4(f)(3)(i) allows those deductions as well. However, an estate or trust may not deduct a payment of real estate taxes on the decedent's principal residence that were unpaid at death in computing its net investment income because, although real estate taxes are deductible under section 164 and specifically are allowed by section 691(b), the real estate taxes would not have been a properly allocable deduction of the decedent under § 1.1411-4(f).

[2311] Reg. § 1.1411-4(g)(4), referring to Code § 642(h) items. See part II.J.3.i Planning for Excess Losses.

[2312] Reg. § 1.1411-4(g)(8), referring to losses under Code § 469(f)(1).

[2313] Reg. § 1.1411-4(g)(9), referring to losses under Code § 469(g)(1). Code § 469(g), the rule governing the disposition of a passive activity, is described in part II.K.1.j Complete Disposition of Passive Activity

II.I.7. Interaction of NII Tax with Fiduciary Income Tax Principles

Generally,[2314] a trust or estate is taxed on the lesser of its undistributed net investment income (UNII) or the excess (if any) of its adjusted gross income[2315] over the taxable income threshold[2316] for its highest marginal income tax bracket.[2317]

Regarding grantor trusts, the tax is imposed on the deemed owner rather than the trust:[2318]

- Thus, the beneficiary of a qualified subchapter S trust (QSST)[2319] would include the S corporation's income in the beneficiary's income and determine the applicability of the tax based on the beneficiary's tax attributes and participation in the S corporation's activity. Consider switching from an ESBT to one or more QSSTs in light of not only issues relating to the 3.8% tax but also increases in the top income tax bracket (to which all ESBT S corporation income is subject) relative to the beneficiaries' income tax rates.[2320] For more about ESBTs and QSSTs, see parts II.J.14 Application of 3.8% NII Tax to ESBTs and II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets.

- See generally part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts regarding other trusts that are deemed owned by beneficiaries rather than grantors, including

---

2314 Reg. § 1.1411-3(a)(1)(i). Reg. § 1.1411-3(b)(1) exempts the following trusts from the tax:
(i) A trust or decedent's estate all of the unexpired interests in which are devoted to one or more of the purposes described in section 170(c)(2)(B).
(ii) A trust exempt from tax under section 501.
(iii) A charitable remainder trust described in section 664. However, see paragraph (d) of this section for special rules regarding the treatment of annuity or unitrust distributions from such a trust to persons subject to tax under section 1411.
(iv) Any other trust, fund, or account that is statutorily exempt from taxes imposed in subtitle A. For example, see sections 220(e)(1), 223(e)(1), 529(a), and 530(a).
(v) A trust, or a portion thereof, that is treated as a grantor trust under subpart E of part I of subchapter J of chapter 1. However, in the case of any such trust or portion thereof, each item of income or deduction that is included in computing taxable income of a grantor or another person under section 671 is treated as if it had been received by, or paid directly to, the grantor or other person for purposes of calculating such person's net investment income.
(vi) Electing Alaska Native Settlement Trusts subject to taxation under section 646.
(vii) Cemetery Perpetual Care Funds to which section 642(i) applies.
(viii) Foreign trusts (as defined in section 7701(a)(31)(B) and § 301.7701-7(a)(2)) (but see §§ 1.1411-3(e)(3)(ii) and 1.1411-4(e)(1)(ii) for rules related to distributions from foreign trusts to United States beneficiaries).
(ix) Foreign estates (as defined in section 7701(a)(31)(A)) (but see § 1.1411-3(e)(3)(ii) for rules related to distributions from foreign estates to United States beneficiaries).

A charitable remainder trust's beneficiaries are taxed when the CRT distributes to them NII the CRT received for all taxable years that begin after December 31, 2012. Reg. § 1.1411-3(d)(iii). Although in the past a CRT that had a huge capital gain tier would have been neutral to whether to harvest losses (because accumulated capital gain would exceed distributions whether or not the losses were taken), now one should consider the 3.8% tier as well. Thus, consider recognizing losses to offset post-12/31/2012 gains.

2315 As defined in Code § 67(e) and as adjusted under Reg. § 1.1411-10(e)(2), if applicable.

2316 Code § 1(e).

2317 Reg. § 1.1411-3(a)(1)(ii).

2318 Reg. § 1.1411-3(b)(1)(v).

2319 See part III.A.3.e.i QSSTs.

2320 See part III.A.3.e QSSTs and ESBTs, especially part III.A.3.e.v Converting a Multiple Beneficiary ESBT into One or More QSST.

part III.B.2.i.vii Portion Owned When a Gift (discussing how to compute the portion deemed owned by the beneficiary during and after the lapse of a withdrawal right). A minor beneficiary of a trust is treated as the owner of any portion of the trust with respect to which the minor has a power to vest the corpus or income in the minor, notwithstanding that no guardian has been appointed for the minor.[2321]

- See part III.B.2.h How to Make a Trust a Grantor Trust, regarding how to make the settlor the deemed owner.

[2321] Rev. Rul. 81-6.

UNII[2322] is the estate's or trust's NII reduced by distributions of net investment income to beneficiaries[2323] and by charitable deductions[2324] (but note that the charitable deduction does not reduce DNI allocated to mandatory income beneficiaries).[2325]

To the extent that the rules governing the allocation of deductions for regular income tax purposes conflict with their NII counterparts, the regular income tax rules control.[2326] See

---

[2322] Reg. § 1.1411-3(e)(2). Generally, an estate's or trust's net investment income is calculated in the same manner as that of an individual. Reg. § 1.1411-3(e)(1). Reg. § 1.1411-3(e)(5) provides examples.

[2323] Reg. § 1.1411-3(e)(3) provides:

(i) In computing the estate's or trust's undistributed net investment income, net investment income is reduced by distributions of net investment income made to beneficiaries. The deduction allowed under this paragraph (e)(3) is limited to the lesser of the amount deductible to the estate or trust under section 651 or section 661, as applicable, or the net investment income of the estate or trust. In the case of a deduction under section 651 or section 661 that consists of both net investment income and excluded income (as defined in § 1.1411-1(d)(4)), the distribution must be allocated between net investment income and excluded income in a manner similar to § 1.661(b)-1 as if net investment income constituted gross income and excluded income constituted amounts not includible in gross income. See § 1.661(c)-1 and Example 1 in paragraph (e)(5) of this section.

(ii) If one or more items of net investment income comprise all or part of a distribution for which a deduction is allowed under paragraph (e)(3)(i) of this section, such items retain their character as net investment income under section 652(b) or section 662(b), as applicable, for purposes of computing net investment income of the recipient of the distribution who is subject to tax under section 1411. The provisions of this paragraph (e)(3)(ii) also apply to distributions to United States beneficiaries of current year income described in section 652 or section 662, as applicable, from foreign estates and foreign nongrantor trusts.

[2324] Reg. § 1.1411-3(e)(4) provides:

> Deduction for amounts paid or permanently set aside for a charitable purpose. In computing the estate's or trust's undistributed net investment income, the estate or trust is allowed a deduction for amounts of net investment income that are allocated to amounts allowable under section 642(c). In the case of an estate or trust that has items of income consisting of both net investment income and excluded income, the allowable deduction under this paragraph (e)(4) must be allocated between net investment income and excluded income in accordance with § 1.642(c)-2(b) as if net investment income constituted gross income and excluded income constituted amounts not includible in gross income. For an estate or trust with deductions under both sections 642(c) and 661, see § 1.662(b)-2 and Example 2 in paragraph (e)(5) of this section.

If the trust does not sufficiently authorize distributions to charity, consider forming a partnership (which also might have benefits under part II.J.8.e Partnerships and S corporations Carry Out Income and Capital Gain to Beneficiaries) that makes gifts deductible to the charity under Rev. Rul. 2004-5, which is discussed in fn. 4914, which is found in part II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction. Query whether the trustee would be violating fiduciary duties in allowing the partnership to make donations to charity and whether a beneficiary who fails to object is deemed to be the donor for income tax purposes. A safer approach in planning mode would be granting the noncharitable beneficiaries an inter vivos power to appoint gross income to charity; if the trust is already in place, consider decanting to grant the beneficiary such an inter vivos power (see part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting). Letter Ruling 200906008. However, under 2017 tax reform, which was adopted after the NII regulations were finalized, Code § 642(c) does not apply to an ESBT; see fn 6055 in part III.A.3.e.ii.(b) ESBT Income Taxation - Overview and also note that fn 6054 allows an ESBT to deduct charitable contributions against its S corporation income only to the extent they are on the K-1 from the S corporation.

[2325] See fns. 2567 and 2568 in part II.J.4.c Charitable Distributions.

[2326] Reg. §§ 1.1411-1(c) (NII rules do not affect regular income rules), 1.1411-3(e)(3) (if any NII comprises all or part of a distribution for which an NII distribution deduction is allowed, such items retain their parts II.I.6 Deductions Against NII (especially the text accompanying fns. 2307-2308) and II.J.8.f.i.(a) Allocating Deductions to Various Income Items.

The beneficiary's NII includes the beneficiary's share of distributable net income (DNI) distributed to the beneficiary, as described in the rules governing inclusion in the beneficiary's income under the regular income tax rules, to the extent that the character of such income constitutes NII.[2327] The trustee may also declare a distribution and give the beneficiary the right to withdraw the declared distribution – a process known as crediting that is described, along with a planning opportunity, at part II.J.4.f Making Trust a Partial Grantor Trust as to a Beneficiary.

Trustee fees are not NII to the recipient and do not constitute self-employment income unless the trustee is engaging in a trade or business.[2328] Paying reasonable trustee fees[2329] to a

---

character as NII for purposes of computing the recipient's NII). Reg. § 1.652(b)-3(b), reproduced in fn. 2818, controls the allocation of deductions to items comprising DNI for regular income tax purposes.

[2327] Reg. § 1.1411-4(e)(1)(i) provides:

> Net investment income includes a beneficiary's share of distributable net income, as described in sections 652(a) and 662(a), to the extent that, under sections 652(b) and 662(b), the character of such income constitutes gross income from items described in paragraphs (a)(1)(i) and (ii) of this section or net gain attributable to items described in paragraph (a)(1)(iii) of this section, with further computations consistent with the principles of this section, as provided in § 1.1411-3(e).

For how the rules of Code §§ 652 and 662 work, see the discussion in part II.J.8.f.i General Rules of the Proportion of DNI Constitutes Capital Gain Compared to Other Income (and General Retention of the Character of DNI Distributed to Beneficiaries).

[2328] Rev. Rul. 58-5 held:

> In order for an individual to have net earnings from self-employment, he must carry on a trade or business, either as an individual or as a member of a partnership. Whether or not a person is engaged in a trade or business is dependent upon all of the facts and circumstances in the particular case. However, the following will serve as guides in determining this question in the case of fiduciaries of decedents' estates:
>
> (1) Professional fiduciaries will always be treated as being engaged in the trade or business of being fiduciaries, regardless of the assets contained in the estate.
>
> (2) Generally, nonprofessional fiduciaries (that is, for example, persons who serve as executor or administrator in isolated instances, and then as personal representative for the estate of a deceased friend or relative) will not be treated as receiving income from a trade or business unless all of the following conditions are met:
>
> (a) There is a trade or business among the assets of the estate,
>
> (b) The executor actively participates in the operation of this trade or business,
>
> (c) The fees of the executor are related to the operation of the trade or business.

After citing some examples, including imposing self-employment tax on a trustee who manages a trade or business (see fn. 3334, found in part II.K.2.b.ii Participation by a Nongrantor Trust: Planning Issues), the ruling concluded with a caveat:

> In some cases the activities of the executor of a single estate may constitute the conduct of a trade or business even though the assets of the estate do not include a trade or business as such. If, for example, an executor manages an estate which requires extensive management activities on his part over a long period of time, an examination of the facts may show that such activities are sufficient in scope and duration to constitute the carrying on of a trade or business. If doubt exists concerning the status of a fiduciary believed to be in this category, the complete facts should be transmitted to the National Office for consideration. See Rev. Rul. 54-172, C.B. 1954-1, 394.

[2329] For authority on constructive receipt of trustee fees, see Rev. Ruls. 56-472 (waiver by executor did not constitute gift or assignment of income), 64-225 (waiver after serving for many years not respected trustee who is a beneficiary would reduce NII while maintaining the same aggregate taxable income between the trust and beneficiary, subject to the following caveats:

- If the trust has tax-exempt income, some of the trustee fees will be disallowed as a deduction.[2330]

- If and to the extent that trustee fees reduce qualified dividend income or other income taxed at lower rates, the tax rate on the trustee might exceed the tax benefit of the deduction.

---

when, under the circumstances, the services performed by the trustees were not intended to be rendered gratuitously), and 66-167 (waiver made six months after beginning to serve given retroactive effect); see *Breidert v. Commissioner*, 50 T.C. 844 (1968), which held:

> Not only did petitioner waive his right to executor's fees, he did not even have sufficient cash on hand in the estate after paying the claims of creditors and the expenses of administration to pay himself such fees had he desired them. In fact, the cash on hand was insufficient to cover the fees of the attorney and the accountants who rendered substantial services to the estate. There was never any point at which executor's fees in the amount of $9,100.20, or any other sum, were credited to petitioner's account, set apart for him, or otherwise made available to him either by the estate or by the legatees and devisees of the estate. See sec. 1.451-2, Income Tax Regs. Thus, there is no factual basis here for application of the doctrine of constructive receipt. See *Mott v. Commissioner*, 85 F.2d 315, 317-318 (C.A. 6), *affirming on this issue* 30 B.T.A. 1040, 1044-1045; *Estate of W. H. Kiser*, 12 T.C. 178, 180; *S.A. Wood*, 22 B.T.A. 535, 537, *Cf. Weil v. Commissioner*, 173 F.2d 805 (C.A. 2).
>
> Although the Government's principal contention is based upon "constructive receipt," a doctrine that we have found inapplicable on the facts of this case, it also suggests that petitioner must be charged with the executor's fees because he "earned" them. It does not go so far as to argue that an executor may never waive his fees so as to prevent them from being included in his gross income, but it relies upon certain revenue rulings (Rev. Rul. 66-167, 1966-1 C.B. 20; *cf.* Rev. Rul. 64-225, 1964-2 C.B. 15; Rev. Rul. 56-472, 1956-2 C.B. 21) to support its position that petitioner must in any event be accountable for the executor's fees. The precise theory of these rulings is not clear. Rev. Rul. 66-167, *supra*, appears to indicate that an executor may waive his right to compensation without incurring income tax liability, and the test is whether the waiver "will at least primarily constitute evidence of an intent to render a gratuitous service" (p. 21). Accordingly, if a waiver is made "within a reasonable time" after commencing to serve, it is regarded as "consistent with an intention to render gratuitous service" (headnote), but "if the timing, purpose, and effect of the waiver make it serve any other important objective, it may then be proper to conclude that the fiduciary has thereby enjoyed a realization of income by means of controlling the disposition thereof" (p. 21). We need not consider whether this represents sound theory, because from our appraisal of the evidence we think petitioner never had any intention to receive compensation for his services, and that the factual foundation for applying the ruling against him is absent.
>
> To be sure, the record before us contains material that is confusing and contradictory in respect of petitioner's intentions. Much of the confusion is attributable to the bungling manner in which petitioner's counsel handled the matter. But we are satisfied from the evidence as a whole, with particular reliance upon our impression of petitioner himself on the witness stand, notwithstanding contradictions in his testimony, that petitioner never in fact intended to receive any executor's fees, and that the subsequent written waiver merely formalized that intention.
>
> We hold that petitioner could render gratuitous services without subjecting himself to income tax liability therefor and that the factual basis does not exist on this unusual record to charge him with having realized income on the theory of the revenue rulings, whatever that may be.

[2330] See part II.J.8.f.i.(a) Allocating Deductions to Various Income Items, especially fn. 2817.

See also part II.J.3.a Who Is Best Taxed on Gross Income, for some strategic considerations regarding whether income is best trapped inside the trust or allocated to the beneficiaries to the extent influence by overall income tax, whether federal income tax, NII tax, or state income tax.

For a description of special NII rules governing charitable remainder trusts, see the text accompanying fn. 2265 in part II.I.2 Regulatory Framework.

II.I.8. Application of 3.8% Tax to Business Income

II.I.8.a. General Application of 3.8% Tax to Business Income

Gross income from interest,[2331] dividends, annuities, royalties,[2332] and rents is excluded from NII if it is derived in the ordinary course of a trade or business that is not a passive activity;[2333] however, any item of gross income from the investment of working capital will be treated as not derived in the ordinary course of a trade or business.[2334] Gain from the sale of an asset is

---

[2331] Self-charged interest is treated as business income. Reg. § 1.1411-4(g)(5) provides:

> Gross income from interest (within the meaning of section 1411(c)(1)(A)(i) and paragraph (a)(1)(i) of this section) that is received by the taxpayer from a nonpassive activity of such taxpayer, solely for purposes of section 1411, is treated as derived in the ordinary course of a trade or business not described in § 1.1411-5. The amount of interest income that is treated as derived in the ordinary course of a trade or business not described in § 1.1411-5, and thus excluded from the calculation of net investment income, under this paragraph (g)(5) is limited to the amount that would have been considered passive activity gross income under the rules of § 1.469-7 if the payor was a passive activity of the taxpayer. For purposes of this rule, the term nonpassive activity does not include a trade or business described in § 1.1411-5(a)(2). However, this rule does not apply to the extent the corresponding deduction is taken into account in determining self-employment income that is subject to tax under section 1401(b).

As described in fn. 2334, other than self-charged interest described above, interest income generally will constitute NII, even if it is fully business-related, unless the business is in the nature of a bank, etc.

[2332] See part II.K.1.f Royalty as a Trade or Business. If licensing royalties does not rise to the level of a trade or business, consider obtaining a preferred profits interest in lieu of royalty income (if the owner of the property being provided is active in the business) or a structure such as described in part II.E Recommended Structure for Entities (with some extra share of profits allocated to the person who contributed the property).

[2333] Reg. § 1.1411-4(b), which provides:

> Gross income described in paragraph (a)(1)(i) of this section is excluded from net investment income if it is derived in the ordinary course of a trade or business not described in § 1.1411-5….

CCA 202118009 correctly asserted:

> As discussed above, § 1.1411-4(b) does not provide any rules for determining whether gross income derived by a shareholder of a C corporation (including a closely held C corporation) may be properly treated as derived in the ordinary course of a trade or business. C corporations, including closely held C corporations, are not passthrough entities. This analysis and conclusion do not change simply because a shareholder may be treated as materially participating, for purposes of § 469, in a trade or business activity conducted through a closely held C corporation. Accordingly, any dividend income received by a shareholder from a C corporation will be subject to tax under § 1411, irrespective of whether the C corporation is a closely held C corporation within the meaning of § 469(h)(1) or whether the shareholder is treated as materially participating in the trade or business activity of the C corporation.

[2334] Reg. § 1.1411-6(a), which also provides:

> In determining whether any item is gross income from or net gain attributable to an investment of working capital, principles similar to those described in § 1.469-2T(c)(3)(ii) apply. See § 1.1411-

excluded from NII if it is derived in the ordinary course of a trade or business that is not a passive activity;[2335] however, any net gain that is attributable to the investment of working capital will be treated as not derived in the ordinary course of a trade or business.[2336] Other gross income from a trade or business is NII if it a passive activity.[2337]

Passive income is subject to the NII tax, and Code § 469 and the regulations thereunder determine whether a trade or business is passive.[2338]

4(f) for rules regarding properly allocable deductions with respect to an investment of working capital…

Reg. § 1.469-2T(c)(3)(ii) treats only the following as gross income derived in the ordinary course of a trade or business:

(A) Interest income on loans and investments made in the ordinary course of a trade or business of lending money;
(B) Interest on accounts receivable arising from the performance of services or the sale of property in the ordinary course of a trade or business of performing such services or selling such property, but only if credit is customarily offered to customers of the business;
(C) Income from investments made in the ordinary course of a trade or business of furnishing insurance or annuity contracts or reinsuring risks underwritten by insurance companies;
(D) Income or gain derived in the ordinary course of an activity of trading or dealing in any property if such activity constitutes a trade or business (but see paragraph (c)(3)(iii)(A) of this section);
(E) Royalties derived by the taxpayer in the ordinary course of a trade or business of licensing intangible property (within the meaning of paragraph (c)(3)(iii)(B) of this section);
(F) Amounts included in the gross income of a patron of a cooperative (within the meaning of section 1381(a), without regard to paragraph (2)(A) or (C) thereof) by reason of any payment or allocation to the patron based on patronage occurring with respect to a trade or business of the patron; and
(G) Other income identified by the Commissioner as income derived by the taxpayer in the ordinary course of a trade or business.

[2335] Reg. § 1.1411-4(a)(1)(iii).

[2336] Reg. § 1.1411-6(a), which also provides:

> In determining whether any item is gross income from or net gain attributable to an investment of working capital, principles similar to those described in § 1.469-2T(c)(3)(ii) apply. See ... § 1.1411-7 for rules relating to the adjustment to net gain on the disposition of interests in a partnership or S corporation.

It also provides an example showing how strict this rule is: The taxpayer uses an interest-bearing checking account at a local bank to make daily deposits of the restaurant's cash receipts and to pay the restaurant's recurring ordinary and necessary business expenses. The account's average daily balance is approximately $2,500, but at any given time the balance may be significantly more or less than this amount, depending on the business' short-term cash flow needs. Any interest the account generates constitutes NII.

[2337] Reg. § 1.1411-4(c).

[2338] Reg. § 1.1411-5(b)(1)(ii).

Income from a trade or business of trading in financial instruments[2339] or commodities[2340] is also subject to NII tax.[2341] This rule applies to traders – not to dealers or investors.[2342]

This tax favors (by excluding) trade or business income from partnerships and S corporations in which the taxpayer significantly or materially participates, which for many taxpayers simply means work for more than 100 hours in a year.[2343] Although a partnership's income from a

---

[2339] Reg. § 1.1411-5(c)(1) provides:

> *Definition of financial instruments*. For purposes of section 1411 and the regulations thereunder, the term financial instruments includes stocks and other equity interests, evidences of indebtedness, options, forward or futures contracts, notional principal contracts, any other derivatives, or any evidence of an interest in any of the items described in this paragraph (c)(1). An evidence of an interest in any of the items described in this paragraph (c)(1) includes, but is not limited to, short positions or partial units in any of the items described in this paragraph (c)(1).

[2340] Reg. § 1.1411-5(c)(2) provides:

> *Definition of commodities*. For purposes of section 1411 and the regulations thereunder, the term commodities refers to items described in section 475(e)(2).

[2341] Code § 1411(c)(2)(B); Reg. § 1.1411-5(a)(2).

[2342] The final regulations adopted the proposed regulations. The preamble to the latter, REG-130507-11, provides:

> **C. Trading in Financial Instruments or Commodities**
>
> **i. Distinguishing Between Dealers, Traders, and Investors**
>
> Determining whether trading in financial instruments or commodities rises to the level of a section 162 trade or business is a question of fact. *Higgins v. Comm'r*, 312 U.S. 212, 217 (1941); *Estate of Yaeger v. Comm'r*, 889 F.2d 29, 33 (2d Cir. 1989). In general, section 475(c)(1) provides that the term dealer in securities means a taxpayer who (A) regularly purchases securities from or sells securities to customers in the ordinary course of a trade or business, or (B) regularly offers to enter into, assume, offset, assign, or otherwise terminate positions in securities with customers in the ordinary course of a trade or business. In contrast, a trader seeks profit from short-term market swings and receives income principally from selling on an exchange rather than from dividends, interest, or long-term appreciation. *Groetzinger v. Comm'r*, 771 F.2d 269, 274-275 (7th Cir. 1985), *aff'd* 480 U.S. 23 (1987); *Moller v. United States*, 721 F.2d 810, 813 (Fed. Cir. 1983). A person will be a trader, and therefore engaged in a section 162 trade or business, if his or her trading is frequent and substantial, which has been rephrased as "frequent, regular, and continuous." *Boatner v. Comm'r*, T.C. Memo. 1997-379, *aff'd* in unpublished opinion 164 F.3d 629 (9th Cir. 1998).
>
> An investor is a person who purchases and sells securities with the principal purpose of realizing investment income in the form of interest, dividends, and gains from appreciation in value over a relatively long period of time (that is, long-term appreciation). The management of one's own investments is not considered a section 162 trade or business no matter how extensive or substantial the investments might be. See *Higgins v. Comm'r*, 312 U.S. 212, 217 (1941); *King v. Comm'r*, 89 T.C. 445 (1987). Therefore, an investor is not considered to be engaged in a section 162 trade or business of investing.
>
> For purposes of section 1411(c)(2)(B), in order to determine whether gross income is derived from a section 162 trade or business of trading in financial instruments or commodities, the gross income must be derived from an activity that would constitute trading for purposes of chapter 1. Therefore, a person that is a trader in commodities or a trader in financial instruments is engaged in a trade or business for purposes of section 1411(c)(2)(B). The Treasury Department and the IRS emphasize that the proposed regulations do not change the state of the law with respect to classification of traders, dealers, or investors for purposes of chapter 1.

[2343] See part II.K.1.a Counting Work as Participation, being careful to consider part II.K.1.a.v What Does Not Count as Participation. Other than work as a mere investor, almost any type of work appears to qualify towards material participation for purposes of the Code § 1411. For the more-than-100 hours rule, see fn. 2348.

trade or business generally would be subject to self-employment tax, whereas an S corporation income from a trade or business is not,[2344] one should consider that exit strategies[2345] and basis step-up issues[2346] tend to favor partnerships over S corporations. One might consider combining a partnership for the business operations themselves with an S corporation to block self-employment income from passing through to the ultimate owners.[2347]

II.I.8.a.i. Passive Activity Recharacterization Rules

Various passive activity recharacterization rules also provide NII exclusions for trade or business activity:

- Significant participation activities (more than 100 hours of participation).[2348]

- Certain rental activities.[2349]

- To the extent that any gain from a trade or business is recharacterized as "not from a passive activity" by reason of certain rules relating to the disposition of substantially appreciated property formerly used in nonpassive activity[2350] and is not from the disposition of an interest in property that was held for investment for more than 50% of the period during which the taxpayer held that interest in property in nonpassive activities,[2351] such trade or business is a nonpassive activity solely with respect to such recharacterized gain.[2352]

- To the extent that any income or gain from a trade or business is recharacterized as a nonpassive activity and is further characterized as portfolio income under certain provisions, then such trade or business constitutes a passive activity solely with respect to such recharacterized income or gain.[2353] The relevant portfolio income provision is either:

[2344] See part II.L.1 FICA: Corporation.
[2345] See part II.Q Exiting from or Dividing a Business. However, when considering a Code § 736 redemption, see part II.I.8.d.iv Treatment of Code § 736 Redemption Payments under Code § 1411. Also see part II.G.15 Limitations on the Use of Installment Sales, but note that the suggestion in that part about forming a partnership to hold property that is to be sold would not work with an S corporation, because a partnership is not eligible to hold stock in an S corporation.
[2346] See part II.H.2 Basis Step-Up Issues.
[2347] See part II.L.5 Self-Employment Tax: Partnership with S Corporation Blocker.
[2348] Reg. § 1.1411-5(b)(2)(i), referring to Reg. § 1.469-2T(f)(2), which is described in fn. 3255 of part II.K.1.i Recharacterization of Passive Income Generators (PIGs) as Nonpassive Income.
[2349] Reg. § 1.1411-5(b)(2)(i), referring to Reg. § 1.469-2(f)(5) or 1.469-2(f)(6), which are described in fns. 3239 and 3196, respectively, within part II.K.1.e Rental Activities.
[2350] Reg. § 1.469-2(c)(2)(iii), which provides, generally:

> If an interest in property used in an activity is substantially appreciated at the time of its disposition, any gain from the disposition shall be treated as not from a passive activity unless the interest in property was used in a passive activity for either:
>
> (1) 20 percent of the period during which the taxpayer held the interest in property; or
>
> (2) The entire 24-month period ending on the date of the disposition.

An interest in property is substantially appreciated if the fair market value of the interest in property exceeds 120% of the adjusted basis of the interest. Reg. § 1.469-2(c)(2)(iii)(C).
[2351] Reg. § 1.469-2(c)(2)(iii)(F).
[2352] Reg. § 1.1411-5(b)(2)(i).
[2353] Reg. § 1.1411-5(b)(2)(iii).

- the rental of nondepreciable property, equity-financed lending activities, and royalty income from passthrough entities,[2354] or

- the disposition of an interest in property that was held for investment for more than 50% of the period during which the taxpayer held that interest in property in nonpassive activities.[2355]

II.I.8.a.ii. Passive Activity Grouping Rules

Regarding how the Code § 469 grouping rules interact with classifying income under Code § 469, the preamble explains:[2356]

> Section 1.469-4 provides rules for defining an activity for purposes of applying the passive activity loss rules of section 469 (grouping rules). The grouping rules will apply in determining the scope of a taxpayer's trade or business in order to determine whether such trade or business is a passive activity for purposes of section 1411(c)(2)(A). However, a proper grouping under § 1.469-4(d)(1) (grouping rental activities with other trade or business activities) will not convert gross income from rents into other gross income derived from a trade or business described in proposed § 1.1411-5(a)(1).

For example, if a partner in a partnership participates in one trade or business for more than 500 hours and another trade or business for only 50 hours and the individual groups both activities as one activity in a way that qualifies both trades or businesses as nonpassive, business income from both trades or businesses is excluded from NII.[2357]

For more information about the Code § 469 grouping rules, including regrouping as a result of the NII tax, see part II.K.1.b Grouping Activities.

2354 Reg. § 1.1411-5(b)(2)(iii) refers to Reg. § 1.469-2T(f)(10), which refers to Reg. § 1.469-2(f)(10). Sutton & Howell-Smith, *Federal Income Taxation of Passive Activities* (WG&L), ¶ 7.01[2][b] Recharacterized Items, refers to Reg. § 1.469-2(f)(10) as the rental of nondepreciable property (¶ 10.05 of the treatise), equity-financed lending activities (¶ 7.03 of the treatise), and royalty income from passthrough entities (¶ 13.05 of the treatise).
2355 Reg. § 1.469-2(c)(2)(iii)(F).
2356 Part 6.B.1.(b)(4) of the preamble.
2357 Reg. § 1.1411-5(b)(3), Example (2).

II.I.8.a.iii. Qualifying Self-Charged Interest or Rent Is Not NII

Certain self-charged interest[2358] or rent[2359] received from a business are automatically deemed nonpassive trade or business income if the borrower/tenant is a nonpassive trade or business; however, self-charged interest is excluded only to the extent it is self-charged.[2360]

Note that the taxpayer must materially participate, satisfying the more-than-500-hours or similar rules,[2361] to satisfy the self-rental exception of footnote 2359:

- Although significant participation (more than 100 hours) suffices for other business income,[2362] it does not for the self-rental exception. If this contrast in treatment (between material participation and significant participation) is significant (particularly if the property is about be sold)[2363] and avoiding the NII tax on the rental income becomes important, consider using the structure depicted in part II.E.6 Recommended Partnership Structure –

[2358] Reg. § 1.1411-4(g)(5) provides:

> Treatment of self-charged interest income. Gross income from interest (within the meaning of section 1411(c)(1)(A)(i) and paragraph (a)(1)(i) of this section) that is received by the taxpayer from a nonpassive activity of such taxpayer, solely for purposes of section 1411, is treated as derived in the ordinary course of a trade or business not described in § 1.1411-5. The amount of interest income that is treated as derived in the ordinary course of a trade or business not described in § 1.1411-5, and thus excluded from the calculation of net investment income, under this paragraph (g)(5) is limited to the amount that would have been considered passive activity gross income under the rules of § 1.469-7 if the payor was a passive activity of the taxpayer. For purposes of this rule, the term nonpassive activity does not include a trade or business described in § 1.1411-5(a)(2). However, this rule does not apply to the extent the corresponding deduction is taken into account in determining self-employment income that is subject to tax under section 1401(b).

[2359] Reg. § 1.1411-4(f)(6)(i) provides:

> Gross income from rents. To the extent that gross rental income described in paragraph (a)(1)(i) of this section is treated as not derived from a passive activity by reason of § 1.469-2(f)(6) or as a consequence of a taxpayer grouping a rental activity with a trade or business activity under § 1.469-4(d)(1), such gross rental income is deemed to be derived in the ordinary course of a trade or business within the meaning of paragraph (b) of this section.

See fn. 2400 regarding the interaction of Reg. § 1.469-2(f)(6) with the 3.8% tax on net investment income. See part II.K.1.e.ii Self-Rental Converts Rental to Nonpassive Activity for an explanation of Reg. § 1.469-2(f)(6).
See fn. 3196 for the text of Reg. § 1.469-2(f)(6).

[2360] Reg. § 1.469-7 (treatment of self-charged items of interest income and deduction), which applies "in the case of a lending transaction (including guaranteed payments for the use of capital under section 707(c)) between a taxpayer and a passthrough entity in which the taxpayer owns a direct or indirect interest, or between certain passthrough entities." Reg. § 1.469-7(a)(1). See parts II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation, II.I.8.d Partnership Structuring in Light of the 3.8% Tax on Net Investment Income, and II.K.1.d Applying Passive Loss Rules to a Retiring Partner under Code § 736 regarding the interaction of partnership tax rules with the passive loss rules and rules governing NII.

[2361] See part II.K.1.a.ii Material Participation.

[2362] See part II.I.8.a.i Passive Activity Recharacterization Rules. If at all practical, an owner should materially participate instead of significantly participate. See part II.I.8.f Summary of Business Activity Not Subject to 3.8% Tax.

[2363] See fn. 2366

Flowchart,[2364] perhaps migrating as depicted in part II.E.9 Real Estate Drop Down into Preferred Limited Partnership.

- Material participation requires ownership.[2365]

If self-charged rental is excluded from NII, gain on the sale of the rental property is also excluded.[2366]

II.I.8.a.iv. Determination of Trade or Business Status, Passive Activity Status, or Trading Status of Pass-Through Entities

If an individual, estate, or trust owns or engages in a trade or business,[2367] the determination of whether such gross income is derived in a trade or business is made at the owner's level.[2368]

If an individual, estate, or trust owns an interest in a trade or business through a partnership or S corporation:[2369]

- whether gross income is a passive trade or business activity is determined at the owner level; and

- whether gross income is derived in trade or business of a trader trading in financial instruments or commodities[2370] is determined at the entity level.

[2364] This structure often is ideal; see part II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons. However, it might need to be unwound by subjecting the real estate to a long-term business lease and distributing the real estate to the client's beneficiaries not active in the business, to try to disentangle the active from the inactive beneficiaries. Note, however, that splitting up an entity taxed as a partnership generally can be done on a tax-free basis; see part II.Q.8 Exiting From or Dividing a Partnership, especially part II.Q.8.b.i Distribution of Property by a Partnership.

[2365] See fn. 3195 and part II.K.1.a.i Taxpayer Must Own an Interest in the Business to Count Work in the Business.

[2366] Reg. § 1.1411-4(f)(6)(ii) provides:

> Gain or loss from the disposition of property. To the extent that gain or loss resulting from the disposition of property is treated as nonpassive gain or loss by reason of § 1.469-2(f)(6) or as a consequence of a taxpayer grouping a rental activity with a trade or business activity under § 1.469-4(d)(1), then such gain or loss is deemed to be derived from property used in the ordinary course of a trade or business within the meaning of paragraph (d)(4)(i) of this section.

See fns. 2400 and 3198 regarding Reg. § 1.469-2(f)(6).

[2367] Directly or indirectly through ownership of an interest in an entity that is disregarded as an entity separate from its owner under the check-the-box rules of Reg. § 301.7701-3.

[2368] Reg. § 1.1411-4(b)(1).

[2369] Reg. § 1.1411-4(b)(2).

[2370] Reg. § 1.1411-5(c) discusses financial instruments and commodities.

II.I.8.a.v. Working Capital Is NII

II.I.8.a.v.(a). Policy of Working Capital as NII

The tax applies to interest, dividends, etc. whether inside or outside an entity, and arguments that such income was derived from working capital used to generate active business income will not help any.[2371] The preamble to the proposed regulations explains:[2372]

> Section 1411(c)(3) provides that a rule similar to the rule of section 469(e)(1)(B) applies for purposes of section 1411 (the working capital rule). Section 469(e)(1)(B) provides that, for purposes of determining whether income is treated as from a passive activity, any income or gain attributable to an investment of working capital shall be treated as not derived in the ordinary course of a trade or business.
>
> The term working capital is not defined in either section 469 or section 1411, but it generally refers to capital set aside for use in and the future needs of a trade or business. Because the capital may not be necessary for the immediate conduct of the trade or business, the amounts are often invested by businesses in income-producing liquid assets such as savings accounts, certificates of deposit, money market accounts, short-term government and commercial bonds, and other similar investments. These investment assets will usually produce portfolio-type income, such as interest. Under section 469(e)(1)(B), portfolio-type income generated by working capital is not derived in the ordinary course of a trade or business, and therefore, it is not treated as passive income. Under section 1411(c)(3), gross income from and net gain attributable to the investment of working capital is not derived in the ordinary course of a trade or business, and therefore such gross income and net gain is subject to section 1411.
>
> A taxpayer may take into account the properly allocable deductions (related to losses or deductions properly allocable to the investment of such working capital) in determining net investment income. See part 5.E of this preamble regarding properly allocable deductions.

The preamble to the final regulations simply mentions:[2373]

> Section 1411(c)(3) provides that income on the investment of working capital is not treated as derived from a trade or business for purposes of section 1411(c)(1) and is subject to tax under section 1411. Section 1.1411-6 of the final regulations provides guidance on working capital under section 1411(c)(3).

Of course, if the taxpayer does not materially participate in the business, generally all of the business' income will be NII, so the working capital exception would be moot.[2374]

[2371] Code § 1411(c)(3) provides that any income, gain, or loss which is attributable to an investment of working capital is deemed not to be derived in the ordinary course of a trade or business in applying this rule.
[2372] Part 7 of the preamble.
[2373] T.D. 9644.
[2374] Reg. § 1.1411-5(b)(3), Example (5).

II.I.8.a.v.(b). What Is Working Capital

Reg. § 1.1411-6(a) provides:[2375]

> *General rule*. For purposes of section 1411, any item of gross income from the investment of working capital will be treated as not derived in the ordinary course of a trade or business, and any net gain that is attributable to the investment of working capital will be treated as not derived in the ordinary course of a trade or business. In determining whether any item is gross income from or net gain attributable to an investment of working capital, principles similar to those described in § 1.469-2T(c)(3)(ii) apply. See § 1.1411- 4(f) for rules regarding properly allocable deductions with respect to an investment of working capital and § 1.1411-7 for rules relating to the adjustment to net gain on the disposition of interests in a partnership or S corporation.

Reg. § 1.1411-6(b) provides an example holding that cash used in daily operations constitute

> working capital under § 1.469-2T(c)(3)(ii) and, pursuant to paragraph (a) of this section, the interest generated by this working capital will not be treated as derived in the ordinary course of S's restaurant business. Accordingly, the interest income derived by S from its checking and savings accounts … constitutes gross income from interest under § 1.1411-4(a)(1)(i).

To place context on this reference to Reg. § 1.469-2T(c)(3)(ii), Reg. § 1.469-2T(c)(3)(i) excludes from passive activity gross income items of portfolio income and further provides:

> For purposes of the preceding sentence, portfolio income includes all gross income, other than income derived in the ordinary course of a trade or business (within the meaning of paragraph (c)(3)(ii) of this section), that is attributable to—
>
> (A) Interest (including amounts treated as interest under paragraph (e)(2)(ii) of this section, relating to certain payments to partners for the use of capital); annuities; royalties (including fees and other payments for the use of intangible property); dividends on C corporation stock; and income (including dividends) from a real estate investment trust (within the meaning of section 856), regulated investment company (within the meaning of section 851), real estate mortgage investment conduit (within the meaning of section 860D), common trust fund (within the meaning of section 584), controlled foreign corporation (within the meaning of section 957), qualified electing fund (within the meaning of section 1295(a)), or cooperative (within the meaning of section 1381(a));
>
> (B) Dividends on S corporation stock (within the meaning of section 1368(c)(2));
>
> (C) The disposition of property that produces income of a type described in paragraph (c)(3)(i)(A) of this section; and

[2375] Reg. § 1.1411-6(b) provides an example holding that cash used in daily operations constitute working capital under § 1.469-2T(c)(3)(ii) and, pursuant to paragraph (a) of this section, the interest generated by this working capital will not be treated as derived in the ordinary course of S's restaurant business. Accordingly, the interest income derived by S from its checking and savings accounts … constitutes gross income from interest under § 1.1411-4(a)(1)(i).

(D) The disposition of property held for investment (within the meaning of section 163(d)).

Reg. § 1.469-2T(c)(3)(ii) provides:

> *Gross income derived in the ordinary course of a trade or business*. Solely for purposes of paragraph (c)(3)(i) of this section, gross income derived in the ordinary course of a trade or business includes only—

(A) Interest income on loans and investments made in the ordinary course of a trade or business of lending money;

(B) Interest on accounts receivable arising from the performance of services or the sale of property in the ordinary course of a trade or business of performing such services or selling such property, but only if credit is customarily offered to customers of the business;

(C) Income from investments made in the ordinary course of a trade or business of furnishing insurance or annuity contracts or reinsuring risks underwritten by insurance companies;

(D) Income or gain derived in the ordinary course of an activity of trading or dealing in any property if such activity constitutes a trade or business (but see paragraph (c)(3)(iii)(A) of this section);

(E) Royalties derived by the taxpayer in the ordinary course of a trade or business of licensing intangible property (within the meaning of paragraph (c)(3)(iii)(B) of this section);

(F) Amounts included in the gross income of a patron of a cooperative (within the meaning of section 1381(a), without regard to paragraph (2)(A) or (C) thereof) by reason of any payment or allocation to the patron based on patronage occurring with respect to a trade or business of the patron; and

(G) Other income identified by the Commissioner as income derived by the taxpayer in the ordinary course of a trade or business.

As to (G) above, it has been suggested that the IRS has informally indicated its intention to broaden the definition of mineral royalty income derived in a trade or business, but taxpayers should request a ruling to receive a proper determination.[2376] The same author said that several private letter rulings held that "float revenue, as a substitute for service fees, is derived in the ordinary course of a trade or business."[2377]

[2376] Sutton & Howell-Smith, ¶ 12.03[3][a] Royalties, *Federal Income Taxation of Passive Activities* (WG&L).

[2377] Sutton & Howell-Smith, ¶ 2.02[1][f][vii] Other income identified by the Commissioner, *Federal Income Taxation of Passive Activities* (WG&L), pointing to Letter Rulings 199924020, 199924022, and 199924023.

II.I.8.a.vi. What is a "Trade or Business"?

The preamble to the final regulations discuss what is a "trade or business" for purposes of the 3.8% tax:[2378]

> Several commentators requested guidance concerning the meaning of "trade or business." Commentators suggested that the regulations include references to relevant case law and administrative guidance. A commentator requested that the regulations expand upon existing guidance by including bright-line examples of what constitutes a trade or business to aid taxpayers in determining if income is derived in the ordinary course of a trade or business and thus is excluded from net investment income.
>
> As noted in part 6.A. of the preamble to the proposed regulations, the rules under section 162 have long existed as guidance for determining the existence of a trade or business and are applied in many circumstances. Whether an activity constitutes a trade or business for purposes of section 162 is generally a factual question. For example, in Higgins v. Commissioner, 312 U.S. 212 (1941), the Supreme Court stated that the determination of "whether the activities of a taxpayer are 'carrying on a trade or business' requires an examination of the facts in each case." 312 U.S. at 217. Except for certain clarifications made in response to the proposed regulations, further guidance concerning the definition of trade or business is beyond the scope of these regulations.
>
> In response to these commentators, § 1.1411-1(d) of the final regulations provides that the term trade or business, when used in section 1411 and the final regulations, describes a trade or business within the meaning of section 162. The section 162 reference incorporates case law and administrative guidance applicable to section 162.
>
> One commentator noted that determining whether income is earned in a section 162 trade or business under a separate entity approach, as reflected in proposed § 1.1411-4(b), will yield unexpected results that are inconsistent with section 162. For purposes of determining whether income is earned under section 162, the commentator noted that § 1.183-1(d) provides that activities are determined and their section 162 trade or business status is evaluated by aggregating undertakings in any reasonable manner determined by the taxpayer.
>
> The Treasury Department and the IRS do not believe that the determination of a trade or business under section 162 mandates the use of the definition of "activity" within the meaning of § 1.183-1(d). Section 183 disallows expenses in excess of income attributable to activities not engaged in for profit. Section 1.183-1(a) provides that section 162 and section 212 activities are not subject to section 183 limitations. The definition of activity within § 1.183-1(d) allows taxpayers latitude to combine different activities into a single activity to establish that the taxpayer is engaged in an activity for profit, and thus is not subject to the section 183 limitation. However, once the taxpayer determines that section 183 is not applicable, the taxpayer then must determine whether the activity is a section 162 trade or business or a section 212 for-profit activity. Furthermore, different definitions of "activity" can be found in sections 465 and 469. Therefore, the Treasury Department and the IRS do not believe that determining

[2378] T.D. 9644.

whether a trade or business exists using the activity determinations of Code provisions unrelated to section 162 is appropriate.

For further analysis, see part II.G.4.l.i.(a) “Trade or Business” Under Code § 162.

II.I.8.a.vii. Former Passive Activities – NII Implications

The preamble to the final regulations addressed former passive activities:[2379]

> The final regulations clarify, for section 1411 purposes, the treatment of income, deductions, gains, losses, and the use of suspended losses from former passive activities. The Treasury Department and the IRS considered three alternatives. One approach is the complete disallowance of all suspended losses once the activity is no longer a passive activity (in other words, becomes a former passive activity or a nonpassive activity). The rationale behind this approach is that the income from the activity would not be includable in net investment income, thus the suspended losses become irrelevant. Another approach is the unrestricted allowance of all suspended losses in the year in which they are allowed by section 469(f), regardless of whether the nonpassive income is included in net investment income. The rationale behind this approach is that the losses were generated during a period when the activity was a passive activity, and if such losses were allowed in full, they would have potentially reduced net investment income, and therefore the losses should continue to retain their character as net investment income deductions. The third approach is a hybrid approach that allows suspended losses from former passive activities in calculation of net investment income (as properly allocable deductions under section 1411(c)(1)(B) or in section 1411(c)(1)(A)(iii) in the case of losses) but only to the extent of the nonpassive income from such former passive activity that is included in net investment income in that year. The final regulations adopt this hybrid approach.
>
> For example, in the case of a former passive trade or business activity with suspended losses of $10,000 that generates $3,000 of net nonpassive income, section 469(c)(1)(A) allows $3,000 of the $10,000 suspended loss to offset the nonpassive income in the current year. Since the gross nonpassive income is not included in

---

[2379] T.D. 9644. For general issues regarding former passive activities, see part II.K.1.k Former Passive Activities. The preamble describes the interaction of these rules with Code § 1411:

> If a taxpayer materially participates in a former passive trade or business activity, the gross income produced by that activity (and associated section 1411(c)(1)(B) properly allocable deductions) in the current year generally would not be net investment income because the activity is no longer a trade or business that is a passive activity within the meaning of section 469. However, in the case of rental income not derived in the ordinary course of a trade or business, a classification of the rental income as nonpassive for purposes of section 469 will not result automatically in the exclusion of such rental income and associated deductions from net investment income. Furthermore, it is possible that a section 469 former passive activity may still generate net investment income on its disposition to the extent the gain is included in section 1411(c)(1)(A)(iii) and not entirely excluded by, for example, section 1411(c)(4). Suspended losses that are allowed by reason of section 469(f)(1)(A) or (C) may constitute properly allocable deductions under section 1411(c)(1)(B) and § 1.1411-4(f)(2) (to the extent those losses would be described in section 62(a)(1) or 62(a)(4)) or may be included within the calculation of net gain in section 1411(c)(1)(A)(iii) and § 1.1411-4(d) (to the extent those losses would be described in section 62(a)(3) in the year they are allowed, depending on the underlying character and origin of such losses). The treatment of excess suspended losses of a former passive activity upon a fully taxable disposition is discussed in the next section of this preamble.

> section 1411(c)(1)(A)(ii) (or in section 1411(c)(1)(A)(iii) in the case of gains from the disposition of property in such trade or business), none of the deductions and losses associated with such income are properly allocable deductions under section 1411(c)(1)(B) (or in section 1411(c)(1)(A)(iii) in the case of losses from the disposition of property in such trade or business). Thus, under the facts of this example, the final regulations provide that the $3,000 is not a properly allocable deduction (or a loss included in section 1411(c)(1)(A)(iii)). However, to the extent that the remaining suspended passive loss deduction of $7,000 is allowed by section 469(f)(1)(C) to offset other net passive activity income (which is included in net investment income by reason of section 1411(c)(1)(A) less deductions allowed by section 1411(c)(1)(B)), such amounts are considered properly allocable deductions under section 1411(c)(1)(B), or as a loss included in section 1411(c)(1)(A)(iii), as appropriate.

Reg. § 1.1411-4(g)(8) provides the details described above. For more information on former passive activities, see part II.K.1.k Former Passive Activities.

II.I.8.b. 3.8% Tax Does Not Apply to Gain on Sale of Active Business Assets

Net gain from the disposition of property does not include gain or loss attributable to property held in a nonpassive[2380] trade or business.[2381]

However, this exception does not apply to the gain or loss attributable to the disposition of investments of working capital.[2382]

Although a partnership interest or S corporation stock generally is not property held in a trade or business qualifying for the exclusion,[2383] the portion of the sale proceeds attributable to business assets does qualify.[2384]

If an individual, estate, or trust owns or engages in a trade or business directly (or indirectly through a disregarded entity), the determination of whether net gain is attributable to property held in a trade or business is made at the individual, estate, or trust level.[2385] If an individual, estate, or trust that owns an interest in a passthrough entity such as a partnership or S corporation and that entity is engaged in a trade or business, the determination of whether net gain is attributable to (i) a passive activity is made at the owner level; and (ii) the trade or business of a trader trading in financial instruments or commodities is made at the entity level.[2386]

[2380] By "nonpassive" I mean not described in Reg. § 1.1411-5. See part II.I.8 Application of 3.8% Tax to Business Income, especially fn. 2338.
[2381] Reg. §§ 1.1411-4(a)(1)(iii), 1.1411-4(d)(4)(i)(A).
[2382] Reg. § 1.1411-4(d)(4)(i)(A). See Reg. § 1.1411-6 regarding working capital, which is described in part II.I.8.a.v Working Capital Is NII.
[2383] Reg. § 1.1411-4(d)(4)(i)(B)(1).
[2384] See part II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.
[2385] Reg. § 1.1411-4(d)(4)(i)(B)(2).
[2386] Reg. § 1.1411-4(d)(4)(i)(B)(3).

II.I.8.c. Application of 3.8% Tax to Rental Income

As mentioned above, rental income is NII unless it is self-rental[2387] or not only is from a trade or business but also nonpassive.[2388]

Because the self-rental exception is relatively straightforward, this part II.I.8.c focuses on whether the rental not only is from a trade or business but also is nonpassive.

II.I.8.c.i. If Not Self-Rental, Most Rental Income Is *Per Se* Passive Income and Therefore NII

Generally, rental constitutes passive income, even if it constitutes a trade or business in which the taxpayer materially participates.[2389] The NII rules elaborate on exceptions to this general rule. For example, short-term equipment leasing income is not NII,[2390] if the taxpayer materially participates.[2391]

[2387] See fn. 2359.

[2388] See fn. 2333. Note that *Erbs v. Commissioner*, T.C. Summary Opinion 2001-85, held that the material participation rules "govern whether a trade or business is passive and do not address the more fundamental question of whether an activity constitutes a trade or business." See generally "¶L-1103, Regular activity in business is required for being engaged in a trade or business—trade or business expenses," Fed. Tax. Coord.2d. See also Bittker & Lokken, "¶47.3, Property Used in a Trade or Business," *Federal Taxation of Income, Estates, and Gifts*; "¶L-1115, Renting and/or managing rental real estate as a trade or business," *Fed. Tax. Coord.2d*.

[2389] See part II.K.1.e Rental Activities.

[2390] Reg. § 1.1411-5(b)(3), Example (3) provides:

> *Application of the rental activity exceptions*. B, an unmarried individual, is a partner in PRS, which is engaged in an equipment leasing activity. The average period of customer use of the equipment is seven days or less (and therefore meets the exception in § 1.469-1T(e)(3)(ii)(A)). B materially participates in the equipment leasing activity (within the meaning of § 1.469-5T(a)). The equipment leasing activity constitutes a trade or business. In Year 1, B has modified adjusted gross income (as defined in § 1.1411-2(c)) of $300,000, all of which is derived from PRS. All of the income from PRS is derived in the ordinary course of the equipment leasing activity, and all of PRS's property is held in the equipment leasing activity. Of B's allocable share of income from PRS, $275,000 constitutes gross income from rents (within the meaning of § 1.1411-4(a)(1)(i)). While $275,000 of the gross income from the equipment leasing activity meets the definition of rents in § 1.1411-4(a)(1)(i), the activity meets one of the exceptions to rental activity in § 1.469-1T(e)(3)(ii) and B materially participates in the activity. Therefore, the trade or business is not a passive activity with respect to B for purposes of paragraph (b)(1)(ii) of this section. Because the rents are derived in the ordinary course of a trade or business not described in paragraph (a) of this section, the ordinary course of a trade or business exception in § 1.1411-4(b) applies, and the rents are not described in § 1.1411-4(a)(1)(i). Furthermore, because the equipment leasing trade or business is not a trade or business described in paragraph (a)(1) or (a)(2) of this section, the $25,000 of other gross income is not net investment income under § 1.1411-4(a)(1)(ii). However, the $25,000 of other gross income may be net investment income by reason of section 1411(c)(3) and § 1.1411-6 if it is attributable to PRS's working capital. Finally, gain or loss from the sale of the property held in the equipment leasing activity will not be subject to § 1.1411-4(a)(1)(iii) because, although it is attributable to a trade or business, it is not a trade or business to which the section 1411 tax applies.

[2391] Reg. § 1.1411-5(b)(3), Example (4) provides:

> Application of section 469 and other gross income under § 1.1411-4(a)(1)(ii). Same facts as Example 3, except B does not materially participate in the equipment leasing trade or business

II.I.8.c.ii. Real Estate Classified as Nonpassive for Real Estate Professionals

The general rule that rental is per se passive does not apply to certain real estate professionals.[2392] Therefore, if a real estate professional who meets this exceptions engages in a real estate trade or business, the rental income would not constitute NII.

Although the final regulations declined to provide broad relief for real estate professionals, the preamble informs us:[2393]

> The final regulations do, however, provide a safe harbor test for certain real estate professionals in § 1.1411-4(g)(7). The safe harbor test provides that, if a real estate professional (within the meaning of section 469(c)(7)) participates in a rental real estate activity for more than 500 hours per year, the rental income associated with that activity will be deemed to be derived in the ordinary course of a trade or business. Alternatively, if the taxpayer has participated in a rental real estate activity for more than 500 hours per year in five of the last ten taxable years (one or more of which may be taxable years prior to the effective date of section 1411), then the rental income associated with that activity will be deemed to be derived in the ordinary course of a trade or business. The safe harbor test also provides that, if the hour requirements are met, the real property is considered as used in a trade or business for purposes of calculating net gain under section 1411(c)(1)(A)(iii). The Treasury Department and the IRS recognize that some real estate professionals with substantial rental activities may derive such rental income in the ordinary course of a trade or business, even though they fail to satisfy the 500 hour requirement in the safe harbor test. As a result, the final regulations specifically provide that such failure will not preclude a taxpayer from establishing that such gross rental income and gain or loss from the disposition of real property, as applicable, is not included in net investment income.

Thus, the annual threshold is reduced from more than 750 hours under the passive loss rules to more than 500 hours.[2394]

> and therefore the trade or business is a passive activity with respect to B for purposes of paragraph (b)(1)(ii) of this section. Accordingly, the $275,000 of gross income from rents is described in § 1.1411-4(a)(1)(i) because the rents are derived from a trade or business that is a passive activity with respect to B. Furthermore, the $25,000 of other gross income from the equipment leasing trade or business is described in § 1.1411-4(a)(1)(ii) because the gross income is derived from a trade or business described in paragraph (a)(1) of this section. Finally, gain or loss from the sale of the property used in the equipment leasing trade or business is subject to § 1.1411-4(a)(1)(iii) because the trade or business is a passive activity with respect to B, as described in paragraph (b)(1)(ii) of this section.

[2392] See fns. 3187-3204.

[2393] T.D. 9655.

[2394] Reg. § 1.1411-4(g)(7) provides:

> (7) *Treatment of certain real estate professionals*
>
> > (i) *Safe Harbor*. In the case of a real estate professional (as defined in section 469(c)(7)(B)) that participates in a rental real estate activity for more than 500 hours during such year, or has participated in such real estate activities for more than 500 hours in any five taxable years (whether or not consecutive) during the ten taxable years that immediately precede the taxable year, then—

Also, Reg. § 1.1411-4(g)(7)(ii)(B) does not require that each rental activity owned by the real estate professional be a trade or business. On June 16, 2014, I informally confirmed with a drafter of the regulation that, if a real estate professional groups activities so that real estate trade or business undertakings are grouped with real estate undertakings that are not trade or business undertakings, the latter nevertheless receive treatment as not constituting NII. For example, suppose a real estate professional actively manages several real estate properties that are trade or business undertakings and also owns several properties rented using triple-net leases. If the professional groups all of those undertakings as a single activity, income from the triple-net leases does not constitute NII.

See also part II.G.26 Real Estate Special Issues.

II.I.8.c.iii. Rental as a Trade or Business

If rental activity is nonpassive under special exceptions or by reason of the taxpayer being a real estate professional, the taxpayer would apply the concepts below in conjunction with the rules of part II.I.8.a General Application of 3.8% Tax to Business Income.

Grouping passive activities will not convert gross income from rents into other gross income derived from a trade or business.[2395]

Before exploring further the issue of real estate as a trade or business, note what the characterization of real estate as such does <u>not</u> do: although generally income from a trade or business is subject to self-employment (SE) tax,[2396] see part II.L.2.a.ii Rental Exception to SE Tax.

(A) Such gross rental income from that rental activity is deemed to be derived in the ordinary course of a trade or business within the meaning of paragraph (b) of this section; and

(B) Gain or loss resulting from the disposition of property used in such rental real estate activity is deemed to be derived from property used in the ordinary course of a trade or business within the meaning of paragraph (d)(4)(i) of this section.

(ii) *Definitions*—

(A) *Participation*. For purposes of establishing participation under this paragraph (g)(7), any participation in the activity that would count towards establishing material participation under section 469 shall be considered.

(B) *Rental real estate activity*. The term rental real estate activity used in this paragraph (g)(7) is a rental activity within the meaning of § 1.469-1T(e)(3). An election to treat all rental real estate as a single rental activity under §1.469-9(g) also applies for purposes of this paragraph (g)(7). However, any rental real estate that the taxpayer grouped with a trade or business activity under § 1.469-4(d)(1)(i)(A) or (d)(1)(i)(C) is not a rental real estate activity.

(iii) *Effect of safe harbor*. The inability of a real estate professional to satisfy the safe harbor in this paragraph (g)(7) does not preclude such taxpayer from establishing that such gross rental income and gain or loss from the disposition of property, as applicable, is not included in net investment income under any other provision of section 1411.

[2395] Part 6.B.1.(b)(4) of the preamble explains:

> … a proper grouping under § 1.469-4(d)(1) (grouping rental activities with other trade or business activities) will not convert gross income from rents into other gross income derived from a trade or business described in proposed § 1.1411-5(a)(1).

[2396] See part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax.

The preamble to the final regulations re NII tax explains how the IRS views rental as a trade or business (emphasis added):[2397]

> The Treasury Department and the IRS received multiple comments regarding the determination of a trade or business within the context of rental real estate. Specifically, commentators stated that Example 1 of proposed § 1.1411-5(b)(2) is inconsistent with existing case law regarding the definition of a trade or business of rental real estate. Commentators cited cases such as Fackler v. Commissioner, 45 BTA 708 (1941), *aff'd*, 133 F.2d 509 (6th Cir. 1943); Hazard v. Commissioner, 7 T.C. 372 (1946); and Lagreide v. Commissioner, 23 T.C. 508 (1954), for the proposition that the activities of a single property can rise to the level of a trade or business.
>
> The Treasury Department and the IRS agree with commentators that, in certain circumstances, the rental of a single property may require regular and continuous involvement such that the rental activity is a trade or business within the meaning of Section 162. However, the Treasury Department and the IRS do not believe that the rental of a single piece of property rises to the level of a trade or business in every case as a matter of law. For example, § 1.212-1(h) provides that the rental of real property is an example of a for-profit activity under section 212 and not a trade or business.[2398]
>
> Within the scope of a section 162 determination regarding a rental activity, key factual elements that may be relevant include, but are not limited to, the type of property (commercial real property versus a residential condominium versus personal property), the number of properties rented, the day-to-day involvement of the owner or its agent, and the type of rental (for example, a net lease versus a traditional lease, short-term versus long-term lease). Therefore, due to the large number of factual combinations that exist in determining whether a rental activity rises to the level of a section 162 trade or business, bright-line definitions are impractical and would be imprecise. The same is true wherever the section 162 trade or business standard is used and is not unique to section 1411. The Treasury Department and the IRS decline to provide guidance on the meaning of trade or business solely within the context of section 1411. However, the Treasury Department and the IRS have modified Example 1 in § 1.1411-5(b)(3) to explicitly state that the rental property in question is not a trade or business under applicable section 162 standards.
>
> In cases where other Code provisions use a trade or business standard that is the same or substantially similar to the section 162 standard adopted in these final regulations, the IRS will closely scrutinize situations where taxpayers take the position that an activity is a trade or business for purposes of section 1411, but not a trade or business for such other provisions. For example, if a taxpayer takes the position that a certain rental activity is a trade or business for purposes of section 1411, the IRS will take into account

---

[2397] T.D. 9655.

[2398] This comment in the preamble seems to take out of context Reg. § 1.212-1(h), the full text of which is:

> Ordinary and necessary expenses paid or incurred in connection with the management, conservation, or maintenance of property held for use as a residence by the taxpayer are not deductible. However, ordinary and necessary expenses paid or incurred in connection with the management, conservation, or maintenance of property held by the taxpayer as rental property are deductible even though such property was formerly held by the taxpayer for use as a home.

That regulation does not say that rental is not a trade or business (although it appears in a regulation designed for activities that do not constitute trades or businesses. Rather, that regulation points out that property formerly held for personal use can later be used for the production or collection of income.

> the facts and circumstances surrounding the taxpayer's determination of a trade or business for other purposes, such as whether the taxpayer complies with any information reporting requirements for the rental activity imposed by section 6041.

The example cited above is as follows (emphasis added):[2399]

> Rental activity. A, an unmarried individual, rents a commercial building to B for $50,000 in Year 1. A is not involved in the activity of the commercial building on a regular and continuous basis, therefore, A's rental activity does not involve the conduct of a trade or business, and under section 469(c)(2), A's rental activity is a passive activity. Because paragraph (b)(1)(i) of this section is not satisfied, A's rental income of $50,000 is not derived from a trade or business described in paragraph (b)(1) of this section. However, A's rental income of $50,000 still constitutes gross income from rents within the meaning of § 1.1411-4(a)(1)(i) because rents are included in the determination of net investment income under § 1.1411-4(a)(1)(i) whether or not derived from a trade or business described in paragraph (b)(1) of this section.

The preamble explains how the final regulations relaxed the rules for nonpassive rental to one's business:[2400]

> With regard to grouping and recharacterizations, commentators recommended that the final regulations clarify that determining whether income is net investment income should be based solely on its recharacterized or grouped status as nonpassive under section 469 and the regulations thereunder. Although the Treasury Department and the IRS recognize the administrative simplicity of this rule, the Treasury Department and the IRS believe that this rule is too broad as it would 'deem' certain items to be derived in a trade or business when it is unlikely that a section 162 trade or business is present. For example, see §§ 1.469-1T(e)(3)(ii)(D) (rental of property incidental to an investment activity) and 1.469-2T(f)(3) (rental of nondepreciable property). Therefore, the final regulations do not adopt this broad approach.
>
> Another option advanced by some commentators is a special rule for self-charged rents similar to § 1.469-7 pertaining to self-charged interest. However, a proposed rule for self-charged rents would be more complex than the rule for self-charged interest because the amount of the net investment income exclusion must take into account the deductions allowed (depreciation, taxes, interest, etc.) that are not present in self-charged interest. A self-charged rent rule would have to exclude from gross income rents in the same way as self-charged interest, and would also exclude a share of the deductions attributable to earning the income. In addition, a rule based on § 1.469-7 would cover only rents within the context of section 1411(c)(1)(A)(i) and would not

---

[2399] Reg. § 1.1411-5(b)(3), Example 1.

[2400] T.D. 9655. Reg. § 1.1411-4(g)(6)(i):

> To the extent that gross rental income described in paragraph (a)(1)(i) of this section is treated as not derived from a passive activity by reason of § 1.469-2(f)(6) or as a consequence of a taxpayer grouping a rental activity with a trade or business activity under § 1.469-4(d)(1), such gross rental income is deemed to be derived in the ordinary course of a trade or business within the meaning of paragraph (b) of this section.

For what is a rental activity under Reg. § 1.469-2(f)(6), see part II.K.1.e.ii Self-Rental Converts Rental to Nonpassive Activity. No relief is provided for self-charged royalties. Consider the structure described in part II.E Recommended Structure for Entities.

> provide relief from the inclusion of the gain upon the sale of the property from net investment income. Accordingly, the final regulations do not adopt this recommendation.
>
> However, the Treasury Department and the IRS appreciate the concerns raised by the commentators. Therefore, the final regulations provide special rules for self-charged rental income. The final regulations provide that, in the case of rental income that is treated as nonpassive by reason of § 1.469-2(f)(6) (which generally recharacterizes what otherwise would be passive rental income from a taxpayer's property as nonpassive when the taxpayer rents the property for use in an activity in which the taxpayer materially participates) or because the rental activity is properly grouped with a trade or business activity under § 1.469-4(d)(1) and the grouped activity is a nonpassive activity, the gross rental income is deemed to be derived in the ordinary course of a trade or business. Furthermore, in both of these instances, the final regulations provide that any gain or loss from the assets associated with that rental activity that are treated as nonpassive gain or loss will also be treated as gain or loss attributable to the disposition of property held in a nonpassive trade or business.

It has been suggested that multiple rental properties in which the taxpayer invests considerable and regular effort should meet the standard of trade or business, even when an agent is engaged to carry out some of the responsibility to manage and maintain the properties.[2401] *Alvary v. U.S.*, 302 F.2d 790 (2nd Cir. 1962), discussed using agents:

> The rental of real estate is a trade or business if the taxpayer-lessor engages in regular and continuous activity in relation to the property, *Pinchot v. Commissioner*, 113 F.2d 718, 719 (2 Cir. 1940); *Gilford v. Commissioner*, 201 F.2d 735, 736 (2 Cir. 1953); *Grier v. United States*, 120 F. Supp. 395 (D. Conn. 1954), *aff'd per curiam*, 218 F.2d 603 (2 Cir. 1955), even if the taxpayer rents only a single piece of real estate. *Lagreide v. Commissioner*, 23 T.C. 508, 512 (1954); *Reiner v. United States*, 222 F.2d 770 (7 Cir. 1955); *Elek v. Commissioner*, 30 T.C. 731 (1958); *Schwarcz v. Commissioner*, 24 T.C. 733, 739 (1955). Of course the owner may carry on these activities through an agent as well as personally. *Pinchot v. Commissioner*, *supra*; *Gilford v. Commissioner*, *supra*; *Elek v. Commissioner*, *supra*; *Schwarcz v. Commissioner*, *supra*, at 739; *Lajtha v. Commissioner*, 20 T.C. M. 1961-273 (1961); 5 Mertens, *Federal Income Taxation*, 1961 Cum. Supp. § 29.06, at 112-13. If the taxpayer, personally or through his agent continuously operates the rental property without deviation from the planned use, the trade or business is sufficiently regular to satisfy the § 122(d)(5) requirement that it be "regularly carried on by the taxpayer." *Lagreide v. Commissioner*, *supra*, at 512; *Elek v. Commissioner*, *supra*; *Schwarcz v. Commissioner*, *supra*, at 739-40; *Daniel v. Commissioner*, 19 T.C.M. 1960-274 (1960). The taxpayer's rental activities in this case clearly satisfy these requirements.[4]

[2401] Holthouse and Ritchie, "Inoculating Real Estate Against the Obamacare Tax," *TM Memorandum* (BNA) (March 11, 2013), also appearing in the *TM Real Estate Journal* (April 3, 2013). Footnote 76 of that articles asserts:

> The fact that services were performed by agents was not detrimental in attaining trade or business status in the following cases: *Reiner v. U.S.*, 222 F.2d 770 (7th Cir. 1955); *Gilford v. Commissioner*, 201 F.2d 735 (2d Cir. 1953); *Post v. Commissioner*, 26 T.C. 1055 (1956). See, however, *Chicago Title & Trust Co. v. U.S.*, 209 F.2d 773 (7th Cir. 1954), where the operation of 25 rental properties managed by real estate firms was considered an investment, rather than a trade or business, of the taxpayer as he was not sufficiently engaged in the operation.

[4] *Elek v. Commissioner*, 30 T. C. 731 (1958); *Daniel v. Commissioner*, 19 T.C.M. 1960-274 (1960); *Lajtha v. Commissioner*, 20 T. C. M. 1961-273 (1961), are other cases in which a net operating loss carryover has been allowed for the 1952 Hungarian nationalization of rental property.

However, one of three inherited properties leased to chain stores on triple-net-leases did not constitute a trade or business. *Union National Bank of Troy v. U.S.*, 195 F.Supp. 382 (N.D. NY 1961), held:

> The record discloses that Louis Gross, the deceased taxpayer, was the distinguished Bank President of the Union National Bank in that city since 1939. It was there he gave his full energy and talent every business day from that time until his death. His one-third interest in 316 River Street came to him under his father's will upon the termination of a trust for his mother, May 29, 1946. This property was a substantial one in the business section of Troy. Like two others he similarly acquired by inheritance, it was subject to net lease of the entire property to chain stores. The lease on 316 River Street was dated March 15, 1930 and executed by his father for twenty years, to expire April 30, 1952, the lessee being F. W. Woolworth Company. The lease was a net lease, and there was no obligation at all on Gross and his family to maintain or repair. Taxes, water rents, ordinary assessments, were all the obligations of the lessee. It is undisputed in the record that Gross did not to any extent, directly or indirectly through agents, have anything at all to do with the management and operation of the property. His passive contact was to receive his share of the rents as paid. The extension of the lease was arranged by his cousin through a broker, and I am content to find that the taxpayer played no active part in the arrangement of such extension. A most significant factor in the record is that the income of Gross for all rented properties in 1953 was $7,887.49; in 1954 $3,594.06, as compared to his declared net income for those years of $80,213.92 and $81,264.06. It would crush reason to conclude in view of these facts that the rental of property was his trade or business. The government concedes in its brief that the taxpayer was not heavily involved in real estate in Troy outside of the inherited properties.

The result was the same with an inherited residential property in which the tenant was also inherited. *Grier v. U.S.*, 120 F.Supp. 395 (D. Conn. 1954), *aff'd* per curiam, 218 F.2d 603 (2d Cir. 1955), in which the trial court held:

> In this case the activities with relation to this single dwelling, although of long duration, were minimal in nature. Activity to rent and re-rent was not required. No employees were regularly engaged for maintenance or repair.
>
> Lacking the broader activity stressed in *Rogers v. U. S.*, D.C. Conn. 1946, 69 F.Supp. 8, and *Pinchot v. C.I. R.*, *Gilford v. C. I. R.* and *Fackler v. C. I. R.*, *supra*, the real estate in this case appears to partake more of the nature of property held for investment than property used in a trade or business. The property in this case, although used for the production of income should not be considered as used in the taxpayer's trade or business.

It has been further suggested that the Board of Tax Appeals and Tax Court have found the mere rental of real property sufficient to constitute a trade or business but that contrary decisions in various appeals courts would suggest that jurisdiction may be an important factor.[2402] The article that made these comments offers excellent planning tips.[2403] Additional clues regarding when rental is a trade or business might be found in the rules governing tax-free split-ups/spin-offs.[2404]

[2402] Holthouse and Ritchie, "Inoculating Real Estate Against the Obamacare Tax," *TM Memorandum* (BNA) (March 11, 2013), also appearing in the *TM Real Estate Journal* (April 3, 2013). Footnotes 77-79 cited *Fackler v. Commissioner*, 45 B.T.A. 708, 714 (1941); *Hazard v. Commissioner*, 7 T.C. 372 (1946) (former residence rented for three years prior to sale) (real estate, even a single property in appropriate circumstances, devoted to rental purposes constitutes property used in a trade or business); *Fegan v. Commissioner*, 71 T.C. 791 (1979); *Lagriede v. Commissioner*, 23 T.C. 508 (1954); *Curphey v. Commissioner*, 73 T.C. 766 (1980) (noting that the ownership and management of such properties would not necessarily, as a matter of law, constitute a trade or business, referring to *Grier v. U.S.*, 218 F.2d 603 (2d Cir. 1955), *aff'g* 120 F. Supp. 395 (D. Conn. 1954)); 561 T.M., "Capital Assets," V.D. The latter included a reference to FSA 200120036 (for purposes of the earned income credit, rental was a trade or business when the taxpayer leased the building to the corporation with continuity and regularity, and the taxpayer's primary purpose for engaging in the rental activity was for profit). Also cited by the "Capital Assets" treatise as favoring trade or business treatment when the taxpayer only holds a single parcel of real property for rent were *Post v. Commissioner*, 26 T.C. 1055 (1956), *acq.*, 1958-1 C.B. 5 (rental of a building managed by an agent was a trade or business); *Campbell v. Commissioner*, 5 T.C. 272 (1945), *acq*., 1947-1 C.B. 1 (inherited property was placed for sale or rent immediately upon being inherited); *Ohio County & Ind. Agr. Soc., Del. County Fair v. Commissioner*, 43 T.C.M. 1126 (1982) (rental property held to constitute a trade or business for Code § 513 purposes); *Crawford v. Commissioner*, 16 T.C. 678, 680-681 (1951), *acq.*, 1951-2 C.B. 2. The "Capital Assets" treatise also mentioned that the standard tends to higher for inherited property that is sold before being operated as a business. All parentheticals above in this footnote describing cases are based on these secondary sources' summaries and not the result of my reading the cases themselves. *Central States, Southeast and Southwest Areas Pension Fund v. Messina Products, LLC*, 2013 WL 466196 (7th Cir. 2013), held that rental to one's own trade or business itself constituted a trade or business for pension withdrawal liability purposes (not a tax case); the court stated that its determination was based on general "trade or business" principles as required by *Commissioner v. Groetzinger*, 480 U.S. 23 (1987). "Simply upgrading his homes with the desire to make a profit on a sale at some time in the future is not sufficient to meet the regular-and-continuous-activity test for a trade or business." *Ohana v. Commissioner*, T.C. Memo. 2014-83, which also rejected an alleged conversion from personal to business use:

> We use five factors to determine whether an individual has converted his personal residence into property held for the production of income:
>
> - the length of time the house was occupied by the individual as his home before placing it on the market for sale;
> - whether the individual permanently abandoned all further personal use of the house;
> - the character of the property;
> - offers to rent; and
> - offers to sell.
>

— *GO Zone bonus depreciation*. Notice 2006-77, 2006-2 C.B. 590.

Although the authorities arise in a number of different contexts, courts and the IRS seem to cite the cases interchangeably in determining whether a rental real estate activity rises to the level of a trade or business for purposes of the specific context

— All seem to agree that the activities of a taxpayer's agent will be taken into account in determining whether a taxpayer is engaged in a trade or business. *See, e.g., Gilford*, 201 F.2d 735 (2nd Cir. 1953); Rev. Rul. 2006-34, 2006-1 C.B. 1172.

[2405] Slides had the name of panelists Peter Genz of King & Spalding, LLP, David Leavitt of PwC, Jim Sowell of KPMG LLP, and Tom West of the U.S. Treasury Dept. Who drafted the slides is unclear, but government officials never draft slides for bar association presentations. The slides used KPMG's logo. Peter Genz wrote a separate paper to support the slides.

[2406] [my footnote:] See part II.G.6.a Code § 1231 Property.

A helpful excerpt from Rev. Rul. 2006-34 accompanies fns 7095-7096 in part III.B.5.e.ii.(a) What is a Business?, which construes "trade or business" in the context of an automatic extension of time to pay estate tax on qualifying business interests.

Equipment rental appears to have much easier standards in qualifying as a trade or business.[2407]

Combining all of the ideas above:

- The IRS considers:
  - The type of property (commercial real property versus a residential condominium versus personal property),
  - The number of properties rented, the day-to-day involvement of the owner or its agent, and
  - The type of rental (for example, a net lease versus a traditional lease, short-term versus long-term lease).
- The IRS believes that rental of a single property may require regular and continuous involvement to constitute a trade or business, and an example in its regulations requires such participation when an individual leases a commercial property to another person. The fairest view is that, for a single property, it depends.[2408]

[2407] See fns. 3433-3434 in part II.L.2.a.ii Rental Exception to SE Tax, discussing cases in the unrelated business income area (regarding qualified retirement plans, etc.) that apply a very low threshold of activity for treating leasing tangible personal property as a trade or business, using statutory language similar to that used in determining whether income is subject to self-employment tax. I am unaware of any authority addressing the issue of leasing tangible personal property as a trade or business outside of this arena.

[2408] In analyzing the existence of a trade or business under Code § 108, Letter Ruling 9840026 reasoned:

> The rental of even a single property may constitute a trade or business under various provisions of the Code. See, *e.g.*, *Hazard v. Commissioner*, 7 T.C. 372 (1946), *acq.*, 1946-2 C.B. 3 (section 117 of the 1939 Code); *Post v. Commissioner*, 26 T.C. 1055 (1956), *acq.*, 1958-2 C.B. 7 (same); *Gilford v. Commissioner*, 201 F.2d 735 (2d Cir. 1953) (same); *Schwarcz v. Commissioner*, 24 T.C. 733 (1955), *acq.*, 1956-1 C.B. 5 (section 122 of the 1939 Code); *Elek v. Commissioner*, 30 T.C. 731 (1958), *acq.*, 1958-2 C.B. 5 (same); *Fegan v. Commissioner*, 71 T.C. 791 (1979), *aff'd*, 81-1 USTC ¶ 9436 (10th Cir. 1981) (section 482); *Pinchot v. Commissioner*, 113 F.2d 718 (2d Cir. 1940) (section 302 of 1926 Act); *Flint v. Stone Tracy Co.*, 220 U.S. 107, 171 (1911) (Corporation Tax). However, the ownership and rental of property does not always constitute a trade or business. See *Neill v. Commissioner*, 46 B.T.A. 197 (1942); Rev. Rul. 73-522, 1973-2 C.B. 226. The issue of whether the rental of property is a trade or business of a taxpayer is ultimately one of fact in which the scope of a taxpayer's activities, either personally or through agents, in connection with the property, are so extensive as to rise to the stature of a trade or business. *Bauer v. United States*, 168 F.Supp. 539, 541 (Ct. C1. 1958); *Schwarcz v. Commissioner*, 24 T.C. 733 (1955); See *Higgins v. Commissioner*, 312 U.S. 212 (1941) (management of taxpayer's own investment portfolio not a business).
>
> In Rev. Rul. 73-522, 1973-2 C.B. 226, the Service held that rental of real property under a "net lease" does not render the lessor engaged in a trade or business with respect to such property for purposes of section 871 of the Code. Section 871 provides special rules for taxation of a

Thus, in planning rental activities:

1. First consider the extent to which the rental income qualifies as self-charged rental that is excluded from NII.

2. If the self-charged rental rules do not provide sufficient protection (or if the rental is not self-charged), consider moving away from leases in which the landlord does nothing and moving towards leases in which the landlord provides significant services, such as inside and outside maintenance, repairs, etc., even if the tenant ultimately bears the burden of the expenses. However, as noted in the discussion of Reg. § 1.1411-4(g)(7)(ii)(B) in part II.I.8.c.ii Real Estate Classified as Nonpassive for Real Estate Professionals, a real estate professional might not need to take this step if the professional has enough activity that does constitute a trade or business.

3. Consider that the self-charged rules might not always apply in the same way in the future as they do today. Even if the law does not change, owner, consider that ownership of the business or ownership of the rental property might change in a way that makes the self-charged rental rules no longer apply. Because grouping elections are difficult to change, consider making grouping elections with these possible ownership changes in mind. Also, grouping elections can affect whether rental is considered self-charged.

4. Finally, consider contributing the property to the partnership and receiving a preferred profit return in lieu of rent, as well as a special allocation of any gain on the sale of the property. See part II.E Recommended Structure for Entities.

If the tax savings are significant enough, one might want to avoid the uncertainty of the rental issue and instead place the business operations and the rented property in the same umbrella.[2409]

See also part II.G.26 Real Estate Special Issues.

II.I.8.d. Partnership Structuring in Light of the 3.8% Tax on Net Investment Income

II.I.8.d.i. Interest for Use of Capital Compared with Distributive Share

Based on the principles described in this part II.I.8.d:

For operating businesses, a distributive share provides better tax treatment than a guaranteed payment of interest, if the partner is a limited partner in a partnership and materially participates.

Note, however, that, for taxpayers with modest incomes, NII tax does not apply, and self-employment (SE) tax looms large, because SE tax is at a high rate all the way up to the taxable

---

nonresident alien engaged in a trade or business in the United States. Under the facts of the ruling, the taxpayer owned rental property situated in the United States that was subject to long-term leases providing for monthly payments by the lessee of real estate taxes, operating expenses, ground rent, repairs, interest and principal on existing mortgages, and insurance in connection with the leased property. See also *Neill v. Commissioner*, 46 B.T.A. 197 (1942).

For more on Rev. Rul. 73-522 and related cases regarding whether nonresident aliens holding U.S. real estate are engaging in a trade or business, see part II.E.1.e.ii Real Estate As a Trade or Business under the Effectively Connected Income (ECI) Rules.

[2409] See part II.E.9 Real Estate Drop Down into Preferred Limited Partnership.

wage base and applies to SE earnings regardless of the taxpayer's overall adjusted gross income.[2410]

For high income taxpayers, SE tax might be better than NII tax, because they can deduct 1.45% of the 2.9% or 3.8% Medicare tax.

II.I.8.d.ii. Overview of Interaction between Code § 1411 and Code §§ 707(c) and 736

The preamble to 2013 proposed regulations explain their concerns regarding certain compensation and exit strategies:[2411]

> Section 731(a) treats gain from distributions as gain from the sale or exchange of a partnership interest. In general, the section 1411 treatment of gain to a partner under section 731 is governed by the rules of section 1411(c)(1)(A)(iii). Such gain is thus generally treated as net investment income for purposes of section 1411 (other than as determined under section 1411(c)(4)). However, certain partnership payments to partners are treated as not from the sale or exchange of a partnership interest. These payments include section 707(c) guaranteed payments for services or the use of capital and certain section 736 distributions to a partner in liquidation of that partner's partnership interest. Because these payments are not treated as from the sale or exchange of a partnership interest, their treatment under section 1411 may differ from the general rule of section 1411(c)(1)(A)(iii). The proposed regulations therefore provide rules for the section 1411 treatment of these payments.

For details on Code § 707(c), see part II.C.8.a Code § 707 - Compensating a Partner for Services Performed.

II.I.8.d.iii. Treatment of Code § 707(c) Guaranteed Payments under Code § 1411

Regarding guaranteed payments, the preamble to the 2013 proposed regulations explains:[2412]

> Section 707(c) provides that a partnership payment to a partner is a "guaranteed payment" if the payment is made for services or the use of the capital, and the payment amount does not depend on partnership income. Section 1.707-1(c) provides that guaranteed payments to a partner for services are considered as made to a person who is not a partner, but only for the purposes of section 61(a) (relating to gross income) and, subject to section 263, section 162(a) (relating to trade or business expenses). Section 1.704-1(b)(2)(iv)(o) provides that guaranteed payments are not part of a partner's distributive share for purposes of section 704(b).
>
> The proposed regulations' treatment of section 707(c) guaranteed payments under section 1411 depends on whether the partner receives the payment for services or the use of capital. The proposed regulations exclude all section 707(c) payments received

[2410] For self-employment tax rates and strategies, see part II.L Self-Employment Tax (FICA), especially part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax, as well as part II.Q.1.d.iii Timeline for FICA and Income Taxation of Deferred Compensation, especially fn. 4193, the latter for rates.

[2411] REG-130843-13, which would apply "to taxable years beginning after December 31, 2013. However, taxpayers may apply this section to taxable years beginning after December 31, 2012 in accordance with § 1.1411-1(f).

[2412] REG-130843-13.

> for services from net investment income, regardless of whether these payments are subject to self-employment tax, because payments for services are not included in net investment income.
>
> The Treasury Department and the IRS believe that guaranteed payments for the use of capital share many of the characteristics of substitute interest, and therefore should be included as net investment income. This treatment is consistent with existing guidance under section 707(c) and other sections of the Code in which guaranteed payments for the use of capital are treated as interest. See, for example, §§ 1.263A-9(c)(2)(iii) and 1.469-2(e)(2)(ii).

Prop. Reg. § 1.1411-4(g)(10) provides the above rules.[2413]

For details on Code § 707(c), see part II.C.8.a Code § 707 - Compensating a Partner for Services Performed.

For the self-employment consequences of guaranteed payments for services, see parts II.L.3 Self-Employment Tax: General Partner or Sole Proprietor and II.L.4 Self-Employment Tax Exclusion for Limited Partner.

II.I.8.d.iv. Treatment of Code § 736 Redemption Payments under Code § 1411

Regarding payments to a retiring partner,[2414] the preamble to the 2013 proposed regulations explains certain general ideas:[2415]

> Section 736 applies to payments made by a partnership to a retiring partner or to a deceased partner's successor in interest in liquidation of the partner's entire interest in the partnership. Section 736 does not apply to distributions made to a continuing

---

[2413] The proposed regulation provides:

> Treatment of section 707(c) guaranteed payments. Net investment income does not include section 707(c) payments received for services. Except to the extent provided in paragraph (g)(11)(iii)(A) of this section, section 707(c) payments received for the use of capital are net investment income within the meaning of section 1411(c)(1)(A)(i) and paragraph (a)(1)(i) of this section.

However, I do not believe that the last sentence of the quote above ends the story; I believe that it merely suggests under what category payments for the use of capital would be tested. Prop. Reg. § 1.1411-4(g)(11)(iii)(A), described further below, applies to Code § 736(a)(2) payments for Code § 751(c) unrealized receivables and for goodwill and states that those payments are included in NII under the sale-of-business category. Prop. Reg. § 1.1411-4(g)(11)(iii)(B) coordinates with (A) and characterizes payments other than for unrealized receivables and goodwill as for services or interest. To me, this reference to treatment as NII under these buckets means merely that one tests these items under those buckets – not that they will automatically be NII; otherwise, the sale of an active business under Code § 736 would be treated less favorably than the sale of a partnership interest other than to the partnership or the sale of an interest in a sole proprietorship or S corporation, and the spirit of the preamble to the proposed regulations is to provide parity to partnership redemptions – not to place them at a disadvantage. Fn. 2418 clarifies that the Code § 1411(c)(4) exclusion from NII on the sale of a partnership interest would apply.

The self-charged interest rules apply to Code § 707(c) payments. Reg. § 1.469-7(a)(1). I believe that the "better" reading is that they apply to treat Code § 707(c) guaranteed payments for the use of capital as interest subject to the self-charged interest exclusion from NII . See fn. 2360.

[2414] See part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.

[2415] REG-130843-13.

> partner, distributions made in the course of liquidating a partnership entirely, or to payments received from persons other than the partnership in exchange for the partner's interest. Section 736 categorizes liquidating distributions based on the nature of the payment as in consideration for either the partner's share of partnership property or the partner's share of partnership income. Section 736(b) generally treats a payment in exchange for the retiring partner's share of partnership property as a distribution governed by section 731. Section 736(a) treats payments in exchange for past services or use of capital as either distributive share or a guaranteed payment. Section 736(a) payments also include payments to retiring general partners of service partnerships in exchange for unrealized receivables (other than receivables described in the flush language of section 751(c)) or for goodwill (other than payments for goodwill provided for in the partnership agreement) (collectively, "Section 736(a) Property").
>
> Because the application of section 1411 depends on the underlying nature of the payment received, the section 736 categorization controls whether a liquidating distribution is treated as net investment income for purposes of section 1411. Thus, the treatment of the payment for purposes of section 1411 differs depending on whether the distribution is a section 736(b) distribution in exchange for partnership property or a section 736(a) distribution in exchange for past services, use of capital, or Section 736(a) Property. Among section 736(a) payments, the proposed regulations further differentiate the treatment of payments depending on: (i) whether or not the payment amounts are determined with regard to the income of the partnership and (ii) whether the payment relates to Section 736(a) Property or relates to services or use of capital.
>
> Section 1.469-2(e)(2)(iii) contains rules pertaining to whether section 736 liquidating distributions paid to a partner will be treated as income or loss from a passive activity. Where payments to a retiring partner are made over a period of years, the composition of the assets and the status of the partner as passive or nonpassive may change. Section 1.469-2(e)(2)(iii) contains rules on the extent to which those payments are classified as passive or nonpassive for purposes of section 469. The proposed regulations generally align the section 1411 characterization of section 736 payments with the treatment of the payments as passive or nonpassive under § 1.469-2(e)(2)(iii).

These rules regarding Code § 736 payments do not apply to distributions from qualified retirement plans or self-employment earnings.[2416]

Regarding Code § 736(b) payments for partnership property, the preamble to the 2013 proposed regulations explains certain general ideas:[2417]

> Section 736(b) payments to retiring partners in exchange for partnership property (other than payments to retiring general partners of service partnerships in exchange for

[2416] Prop. Reg. § 1.1411-4(g)(11)(i) provides:

> In general. The treatment of payments received by a retiring partner or a deceased partner's successor in interest described in section 736 is determined under the rules of this paragraph (g)(11). Section 736 payments are not distributions from a plan or arrangement described in section 1411(c)(5) and § 1.1411-8 [qualified retirement plans, etc.]. To the extent that any portion of a section 736 payment is taken into account in computing a taxpayer's net earnings from self-employment (within the meaning of § 1.1411-9), then such amount is not taken into account in computing net investment income by reason of section 1411(c)(6) and § 1.1411-9.

[2417] REG-130843-13.

> Section 736(a) Property) are governed by the rules generally applicable to partnership distributions. Thus, gain or loss recognized on these distributions is treated as gain or loss from the sale or exchange of the distributee partner's partnership interest under section 731(a).
>
> The proposed regulations provide that section 736(b) payments will be taken into account as net investment income for section 1411 purposes under section 1411(c)(1)(A)(iii) as net gain or loss from the disposition of property. If the retiring partner materially participates in a partnership trade or business, then the retiring partner must also apply § 1.1411-7 of these proposed regulations to reduce appropriately the net investment income under section 1411(c)(4).[2418] Gain or loss relating to section 736(b) payments is included in net investment income under section 1411(c)(1)(A)(iii) regardless of whether the payments are classified as capital gain or ordinary income (for example, by reason of section 751).
>
> In the case of section 736(b) payments that are paid over multiple years, the proposed regulations provide that the characterization of gain or loss as passive or nonpassive is determined for all payments as though all payments were made at the time that the liquidation of the exiting partner's interest commenced and is not retested annually. The proposed regulations thus adopt for section 1411 purposes the section 469 treatment of section 736(b) payments paid over multiple years as set forth in § 1.469-2(e)(2)(iii)(A).

Thus, Code § 736(b) payments are treated as sales of partnership interests,[2419] and Code § 736(b) payments are treated as an installment sale in the year of disposition for Code § 1411 purposes[2420] even though for income tax purposes each year's payment stands alone.[2421]

Regarding Code § 736(a) payments for partnership goodwill, etc., the preamble to the 2013 proposed regulations explains certain general ideas:[2422]

> As described in part 2.B.i., section 736 provides for several different categories of liquidating distributions under section 736(a). Payments received under section 736(a) may be an amount determined with regard to the income of the partnership taxable as distributive share under section 736(a)(1) or a fixed amount taxable as a guaranteed payment under section 736(a)(2). The categorization of the payment as distributive

[2418] This sentence is key to interpreting Prop. Reg. § 1.1411-4(g)(11)(iii). One might construe Prop. Reg. § 1.1411-4(g)(11)(iii)(A) as making certain payments per se NII; this sentence instead provides the correct context – Prop. Reg. § 1.1411-4(g)(11)(iii)(A) merely described under which bucket to categorize the payment if it is NII, and then apply the Code § 1411(c)(4) exclusion from gain on sale after placing the item in the bucket.

[2419] Prop. Reg. § 1.1411-4(g)(ii)(iv) provides:

> Gain or loss attributable to section 736(b) payments is included in net investment income under section 1411(c)(1)(A)(iii) and paragraphs (a)(1)(iii) and (d) of this section as gain or loss from the disposition of a partnership interest.

[2420] Prop. Reg. § 1.1411-4(g)(ii)(iv) provides:

> A taxpayer who elects under § 1.736-1(b)(6) must apply the principles that are applied to installment sales in § 1.1411-7(d).

[2421] See part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736, especially fns. 5495 and 5522 and the accompanying text.

[2422] REG-130843-13.

share or guaranteed payment will govern the treatment of the payment for purposes of section 1411.

> The determination of whether section 736(a) payments received over multiple years are characterized as passive or nonpassive depends on whether the payments are received in exchange for Section 736(a) Property. With respect to section 736(a)(1) payments in exchange for Section 736(a) Property, § 1.469-2(e)(2)(iii)(B) provides a special rule that computes a percentage of passive income that would result if the partnership sold the retiring partner's entire share of Section 736(a) Property at the time that the liquidation of the partner's interest commenced. The percentage of passive income is then applied to each payment received. See § 1.469-2(e)(2)(iii)(B)(1). These rules apply to section 736(a)(1) and section 736(a)(2) payments for Section 736(a) Property. The proposed regulations adopt this treatment as set forth in section 469 for purposes of section 1411.

When Code § 736(a) payments for partnership goodwill, etc. are taxable as a distributive share, the preamble to the 2013 proposed regulations explains:[2423]

> Section 736(a)(1) provides that if the amount of a liquidating distribution (other than a payment for partnership property described in section 736(b)) is determined with regard to the partnership's income, then the payment is treated as a distributive share of income to the retiring partner. For purposes of section 1411, the items of income, gain, loss, and deduction attributable to the distributive share are taken into account in computing net investment income under section 1411(c)(1) in a manner consistent with the item's chapter 1 character and treatment. For example, if the partner's distributive share includes income from a trade or business not described in section 1411(c)(2), that income will be excluded from net investment income. However, if the distributive share includes, for example, interest income from working capital, then that income is net investment income.
>
> The proposed regulations treat section 736(a)(1) payments unrelated to Section 736(a) Property as characterized annually as passive or nonpassive by applying the general rules of section 469 to each payment in the year received. To the extent that any payment under section 736(a)(1) is characterized as passive income under the principles of section 469, that payment also will be characterized as passive income for purposes of section 1411.

Thus, the 2013 proposed regulations treat Code § 736(a)(1) payments consistent with their character for regular income tax purposes, including their character under the passive loss rules.[2424] If a retiring partner receives a distributive share of the partnership's income in exchange for that partner's shares of the partnership's unrealized receivables and the partner materially participated in the partnership's trade or business before retiring, the distributive

[2423] REG-130843-13.

[2424] Prop. Reg. § 1.1411-4(g)(11)(ii)(A) provides:

> General rule. In the case of a payment described in section 736(a)(1) as a distributive share of partnership income, the items of income, gain, loss, and deduction attributable to such distributive share are taken into account in computing net investment income in section 1411(c) in a manner consistent with the item's character and treatment for chapter 1 purposes. See § 1.469-2(e)(2)(iii) for rules concerning the item's character and treatment for chapter 1.

See part II.K.1.d Applying Passive Loss Rules to a Retiring Partner under Code § 736. Fn. 2418 points out that the Code § 1411(c)(4) exclusion from NII on the sale of a partnership interest would apply.

share is not NII.[2425] However, payments that exceeded the partner's shares of the partnership's unrealized receivables needed to be tested annually to determine whether the distributive share of operating income and deductions would be NII, presumably because the payments (described as an incentive to retire early) were not for the partnership's underlying assets;[2426] note that a retired partner generally would not be materially participating, although it is possible that the retired partner might still have some time remaining under the rule that looks to participation in 5 of the past 10 years[2427] or if the activity were a personal service activity in which the taxpayer materially participated for any 3 years.[2428]

When Code § 736(a) payments for partnership goodwill, etc. are taxable as guaranteed payments, the preamble to the 2013 proposed regulations explains:[2429]

> Section 736(a)(2) provides that if the amount of a liquidating distribution (other than a payment for partnership property described in section 736(b)) is determined without regard to the partnership's income, then the payment is treated as a guaranteed payment as described in section 707(c). Payments under section 736(a)(2) might be in exchange for services, use of capital, or Section 736(a) Property. The section 1411 treatment of guaranteed payments for services or the use of capital follows the general rules for guaranteed payments set forth in part 2.A of this preamble. Thus, section 736(a)(2) payments for services are not included as net investment income, and section 736(a)(2) payments for the use of capital are included as net investment income.
>
> Section 736(a)(2) payments in exchange for Section 736 Property are treated as gain or loss from the disposition of a partnership interest, which is generally included in net investment income under section 1411(c)(1)(A)(iii). If the retiring partner materially participates in a partnership trade or business, then the retiring partner must also apply § 1.1411-7 of these proposed regulations to reduce appropriately the net investment income under section 1411(c)(4). To the extent that section 736(a)(2) payments exceed the fair market value of Section 736(a) Property, the proposed regulations provide that the excess will be treated as either interest income or as income in exchange for services, in a manner consistent with the treatment under § 1.469-2(e)(2)(iii).

For details on Code § 707(c), see part II.C.8.a Code § 707 - Compensating a Partner for Services Performed.

When Code § 736 payments are taxable as guaranteed payments or considered attributable to the sale of the partnership's underlying assets, the preamble to the 2013 proposed regulations explains:[2430]

> The proposed regulations provide that section 1411(c)(4) applies to section 736(a)(2) and section 736(b) payments. Thus, the inclusion of these payments as net investment

---

[2425] Prop. Reg. § 1.1411-4(g)(11)(ii)(B), Example (1). However, the example did not exclude the income if it was from financial instruments and commodities.
[2426] Prop. Reg. § 1.1411-4(g)(11)(ii)(B), Example (2).
[2427] See part II.K.1.a.ii Material Participation.
[2428] See part II.K.1.a.ii Material Participation, including fn. 3065, referring to activity that involves the performance of personal services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting, or is a trade or business in which capital is not a material income-producing factor.
[2429] REG-130843-13.
[2430] REG-130843-13.

income may be limited if the retiring partner materially participated in all or a portion of the partnership's trade or business. The extent of any limitation is determined under the rules of § 1.1411-7.

The proposed regulations provide that, when section 736 payments are made over multiple years, the characterization of gain or loss as passive or nonpassive and the values of the partnership assets are computed for all payments as though all payments were made at the time that the liquidation of the exiting partner's interest commenced, similar to the treatment in § 1.469-2(e)(2)(iii)(A).

If a partner's net investment income is reduced pursuant to section 1411(c)(4), then the difference between the amount of gain recognized for chapter 1 and the amount includable in net investment income after the application of section 1411(c)(4) is treated as an addition to basis, in a manner similar to an installment sale for purposes of calculating the partner's net investment income attributable to these payments.

To the extent that a guaranteed payment redeeming a partner's interest is allocable to the partnership's unrealized receivables[2431] and goodwill,[2432] for NII purposes it is treated as gain from the disposition of a partnership interest.[2433] To the extent that a guaranteed payment redeeming a partner's interest is not allocable to the partnership's unrealized receivables and goodwill, for NII purposes it is treated as payment for services[2434] or the payment of interest consistent with its characterization under the passive loss rules.[2435]

To summarize testing regarding the passive or nonpassive character of income from trade or business activities:

- Code § 736(a)(2) guaranteed payments and Code § 736(b) payments are tested at the time of the disposition, even though for regular income tax purposes they are treated as separate payments each year.

- Code § 736((a)(1) payments are tested annually, which might be a disadvantage to a partner who no longer participates in the business, subject to certain favorable rules regarding prior participation.[2436]

[2431] Within the meaning of Code § 751(c).
[2432] As described and calculated in Reg. § 1.469-2(e)(2)(iii)(B). See part II.K.1.d Applying Passive Loss Rules to a Retiring Partner under Code § 736, especially fn. 3186.
[2433] Prop. Reg. § 1.1411-4(g)(11)(iii)(A).
[2434] Because this characterization is only for NII purposes (see fn. 2276), presumably it has no effect on the favorable treatment for self-employment tax of payments described in part II.L.7 SE Tax N/A to Qualified Retiring or Deceased Partner.
[2435] Prop. Reg. § 1.1411-4(g)(11)(iii)(B), referring to Reg. § 1.469-2(e)(2)(ii); see part II.K.1.d Applying Passive Loss Rules to a Retiring Partner under Code § 736. The provision cross-references Reg. § 1.1411-4(g)(9), which provides that losses allowed in computing taxable income by reason of Code § 469(g) (disposition of an entire interest in a passive activity) are taken into account in computing net gain under Reg. § 1.1411-4 (d) or as properly allocable deductions under Reg. § 1.1411-4(f), as applicable, in the same manner as such losses are taken into account in computing taxable income under Code § 63. Code § 469(g), the rule governing the disposition of a passive activity, is described in part II.K.1.j Complete Disposition of Passive Activity. Note that part or all of a self-charged interest component may be excluded from NII. See fn. 2360.
[2436] For the favorable rules regarding prior participation, see text accompanying fns. 2427-2428.

II.I.8.e. NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation

Part 8 of the preamble to the 2012 proposed regulations describes how Code § 1411 approaches the sale of an interest in a partnership or S corporation:

> In most cases, an interest in a partnership or S corporation is not property held in a trade or business. Therefore, gain or loss from the sale of a partnership interest or S corporation stock will be subject to section 1411(c)(1)(A)(iii). See also section 731(a) and section 1368(b)(2) (providing that the gain recognized when cash is distributed in excess of the adjusted basis of, as applicable, a partner's interest in a partnership or a shareholder's stock in an S corporation is treated as gain from the sale or exchange of such partnership interest or S corporation stock).
>
> Section 1411(c)(4)(A) provides that, in the case of a disposition of an interest in a partnership or S corporation, gain from such disposition shall be taken into account under section 1411(c)(1)(A)(iii) only to the extent of the net gain which would be so taken into account by the transferor under section 1411(c)(1)(A)(iii) if all property of the partnership or S corporation were sold for fair market value immediately before the disposition of such interest. Section 1411(c)(4)(B) applies a similar rule to a loss from a disposition.
>
> For purposes of section 1411, Congress intended section 1411(c)(4) to put a transferor of an interest in a partnership or S corporation in a similar position as if the partnership or S corporation had disposed of all of its properties and the accompanying gain or loss from the disposition of such properties passed through to its owners (including the transferor). However, the gain or loss upon the sale of an interest in the entity and a sale of the entity's underlying properties will not always match. First, there may be disparities between the transferor's adjusted basis in the partnership interest or S corporation stock and the transferor's share of the entity's adjusted basis in the underlying properties. See Example 2 of proposed § 1.1411-7(e). Second, the sales price of the interest may not reflect the proportionate share of the underlying properties' fair market value with respect to the interest sold.
>
> In order to achieve parity between an interest sale and an asset sale, section 1411(c)(4) must be applied on a property-by-property basis, which requires a determination of how the property was held in order to determine whether the gain or loss to the transferor from the hypothetical disposition of such property would have been gain or loss subject to section 1411(c)(1)(A)(iii). As described in proposed § 1.1411-4(a)(1)(iii) and proposed § 1.1411-4(d), section 1411(c)(1)(A)(iii) applies if the property disposed of is either not held in a trade or business, or held in a trade or business described in proposed § 1.1411-5. In other words, under the proposed regulations, the exception in section 1411(c)(4) is only applicable where the property is held in a trade or business not described in section 1411(c)(2). See JCT 2011 Explanation, at 364, fn. 976 (and accompanying text); Joint Committee on Taxation, Technical Explanation of the Revenue Provisions of the "Reconciliation Act of 2010," as amended, in combination with the "Patient Protection and Affordable Care Act" (JCX-18-10) (Mar. 21, 2010), at 135 fn. 286 (and accompanying text) (JCT 2010 Explanation). This means that the exception in section 1411(c)(4) does not apply where (1) there is no trade or business, (2) the trade or business is a passive activity (within the meaning of proposed § 1.1411-5(a)(1)) with respect to the transferor, or (3) where the partnership or the S corporation is

> in the trade or business of trading in financial instruments or commodities (within the meaning of proposed § 1.1411-5(a)(2)), because in these cases there would be no change in the amount of net gain determined under proposed § 1.1411-4(a)(1)(iii) upon an asset sale under section 1411(c)(4). For example, if the transferor is passive with respect to the entity's trade or business, the application of the deemed asset sale rule under section 1411(c)(4), as described in part 8.A of this preamble, would not adjust the transferor's section 1411(c)(1)(A)(iii) gain on the disposition of the interest….

Getting into the details, Reg. § 1.1411-4(a)(1)(iii) taxes as net investment income:

> Net gain (to the extent taken into account in computing taxable income) attributable to the disposition of property, except to the extent excluded by the exception described in paragraph (d)(4)(i)(A) of this section for gain or loss attributable to property held in a trade or business not described in § 1.1411-5.

Reg. § 1.1411-4(d)(4)(i)(A) provides:

> Net gain does not include gain or loss attributable to property (other than property from the investment of working capital (as described in § 1.1411-6)) held in a trade or business not described in § 1.1411-5.

Reg. § 1.1411-4(d)(4)(i)(B)(1) provides:

> A partnership interest or S corporation stock generally is not property held in a trade or business. Therefore, gain from the sale of a partnership interest or S corporation stock is generally gain described in paragraph (a)(1)(iii) of this section. However, net gain does not include certain gain or loss attributable to the disposition of certain interests in partnerships and S corporations as provided in § 1.1411-7.

Reg. § 1.1411-5(a) provides:

> *In general*. A trade or business is described in this section if such trade or business involves the conduct of a trade or business, and such trade or business is either--
>
> (1) A passive activity (within the meaning of paragraph (b) of this section) with respect to the taxpayer; or
>
> (2) The trade or business of a trader trading in financial instruments (as defined in paragraph (c)(1) of this section) or commodities (as defined in paragraph (c)(2) of this section).

For whether assets are used in a business, see part II.I.8.a.v Working Capital Is NII (as describing Reg. § 1.1411-6). However, ultimately part II.I.8.a.v.(b) What Is Working Capital provides an additional exclusion under Reg. § 1.1411-7, which needs to be addressed anyway, as described in Reg. § 1.1411-4(d)(4)(i)(B)(1) above.

Note that qualified self-created intangible assets used in a business are never passive; see part II.K.1.g Not Passive If Gain from Sale of Self-Created Intangible. (Goodwill is within the definition but is not specifically mentioned. For taxation of the sale of goodwill, see part II.Q.1.c Personal Goodwill and Covenants Not to Compete.[2437] Arguably, personal goodwill in connection with an individual's work in a C corporation is also excluded from NII.[2438]) Thus, such assets are not described in Reg. § 1.1411-5(a) and do qualify for the exception from NII under Reg. § 1.1411-4(a)(1)(iii). I do not view this as the exclusive way to protect gain from the sale of intangible assets from NII tax; I just wanted to point out this provision.

The preamble to the final regulations explains:[2439]

> In the case of the disposition of an interest in a partnership or an S corporation, section 1411(c)(4) provides that gain or loss from such disposition is taken into account for purposes of section 1411(c)(1)(A)(iii) only to the extent of the net gain or net loss that would be so taken into account by the transferor if all property of the partnership or S corporation were sold at fair market value immediately before the disposition of such interest. Section 1.1411-7 of the final regulations is reserved for guidance under section 1411(c)(4). However, regulations are being proposed contemporaneously with these final regulations that address the application of section 1411(c)(4) to dispositions of interests in partnerships or S corporations.

The preamble to the 2013 proposed regulations summarized these rules:[2440]

> 9. Calculation of Gain or Loss Attributable to the Disposition of Certain Interests in Partnerships and S corporations
>
> Section 1411(c)(4)(A) provides that, in the case of a disposition of an interest in a partnership or of stock in an S corporation (either, a "Passthrough Entity"), gain from the disposition shall be taken into account under section 1411(c)(1)(A)(iii) only to the extent of the net gain which would be taken into account by the transferor if the Passthrough Entity sold all of its property for fair market value immediately before the disposition of the interest. Section 1411(c)(4)(B) provides a similar rule for losses from dispositions.
>
> The 2012 Proposed Regulations required that a transferor of a partnership interest or S corporation stock first compute its gain (or loss) from the disposition of the interest in the Passthrough Entity to which section 1411(c)(4) may apply, and then reduce that gain (or loss) by the amount of non-passive gain (or loss) that would have been allocated to the transferor upon a hypothetical sale of all of the Passthrough Entity's assets for fair market value immediately before the transfer. The Treasury Department and the IRS received several comments questioning this approach based on the commentators' reading of section 1411(c)(4) to include gain/loss from the disposition of a partnership interest or S corporation stock only to the extent of the transferor's share of gain/loss from the Passthrough Entity's passive assets.
>
> The 2013 Final Regulations do not provide rules regarding the calculation of net gain from the disposition of an interest in a Passthrough Entity to which section 1411(c)(4) may apply. After considering the comments received, the Treasury Department and the IRS have withdrawn the 2012 Proposed Regulations implementing section 1411(c)(4) and are issuing this notice of proposed rulemaking to propose revised rules for the

---

[2437] Self-created goodwill is taxed differently than purchased goodwill. See part II.Q.1.c.i Taxation When a Business Sells Goodwill; Contrast with Nonqualified Deferred Compensation.

[2438] See Hesse, "Personal Goodwill and the Net Investment Income Tax," *The Tax Adviser* 5/1/2016.

[2439] T.D. 9655.

[2440] REG-130843-13.

implementation of section 1411(c)(4) adopting the commentators' suggestion. Accordingly, the 2013 Final Regulations reserve on this issue.

Proposed § 1.1411-7(b) provides a calculation to determine how much of the gain or loss that is recognized for chapter 1 purposes is attributable to property owned, directly or indirectly, by the Passthrough Entity that, if sold, would give rise to net gain within the meaning of section 1411(c)(1)(A)(iii) ("Section 1411 Property"). Section 1411 Property is any property owned by, or held through, the Passthrough Entity that, if sold, would result in net gain or loss allocable to the partner or shareholder that is includable in determining the partner or shareholder's net investment income under § 1.1411-4(a)(1)(iii). This definition recognizes that the items of property inside the Passthrough Entity that constitute Section 1411 Property might vary among transferors because a transferor may or may not be "passive" with respect to the property.

Proposed § 1.1411-7(c) provides an optional simplified reporting method that qualified transferors may use in lieu of the calculation described in proposed § 1.1411-7(b). Proposed § 1.1411-7(d) contains additional rules that apply when a transferor disposes of its interest in the Passthrough Entity in a deferred recognition transaction to which section 1411 applies. Proposed § 1.1411-7(f) provides rules for adjusting the amount of gain or loss computed under this paragraph for transferors subject to basis adjustments required by § 1.1411-10(d). Proposed § 1.1411-7(g) provides rules for information disclosures by a Passthrough Entity to transferors and for information reporting by individuals, trusts, and estates.

Net gain constituting NII does not include gain or loss attributable to property (other than property from the investment of working capital)[2441] held in a nonpassive trade or business.[2442]

Thus, to determine whether net gain is from property held in a trade or business:[2443]

1. A partnership interest or S corporation stock generally is not property held in a trade or business. Therefore, gain from the sale of a partnership interest or S corporation stock is generally NII. However, net gain constituting NII does not include certain gain or loss attributable to the disposition of certain interests in partnerships and S corporations that is attributable to their business assets, to the extent provided in Reg. § 1.1411-7.

2. In the case of an individual, estate, or trust that owns or engages in a trade or business,[2444] the determination of whether net gain that is ordinarily NII is attributable to property held in a trade or business is made at the individual, estate, or trust level.[2445]

3. In the case of an individual, estate, or trust that owns an interest in a partnership or an S corporation, and that entity is engaged in a trade or business, the determination of whether net gain that is ordinarily NII from such entity is:[2446]

[2441] As described in Reg. § 1.1411-6.
[2442] Reg. § 1.1411-4(d)(4)(i)(A).
[2443] Reg. § 1.1411-4(d)(4)(i)(B).
[2444] Whether directly or indirectly through ownership of an interest in an entity that is disregarded under the check-the-box rules under Reg. § 301.7701-3.
[2445] Reg. § 1.1411-4(d)(4)(i)(B)(3).
[2446] Reg. § 1.1411-4(d)(4)(i)(B)(3).

- from a passive trade or business activity is determined at the owner level; and
- derived in trade or business of a trader trading in financial instruments or commodities[2447] is determined at the entity level.

See also part II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets.

The preamble to the final regulations explains how Code § 469(g) (the rule governing the disposition of a passive activity, which is described in part II.K.1.j Complete Disposition of Passive Activity) interacts with the 3.8% tax:[2448]

> Section 469(g)(1) provides, in relevant part, that if all gain or loss realized on a disposition is recognized, the excess of any loss from that activity for such taxable year (determined after the application of section 469(b)), over any net income or gain for that taxable year from all other passive activities (determined after the application of section 469(b)), shall be treated as a loss which is not from a passive activity. The preamble to the proposed regulations requested comments on "whether the losses triggered under section 469(g)(1) upon the disposition should be taken into account in determining the taxpayer's net gain on the disposition of the activity under section 1411(c)(1)(A)(iii) or whether the losses should be considered properly allocable deductions to gross income and net gain described in section 1411(c)(1)(A)(i) through (iii)." Because section 469(g)(1) provides that the allowed loss is treated as a loss "which is not from a passive activity," there is a question whether this language prevents the allowed losses from being treated as "properly allocable deductions" from passive activities for purposes of section 1411.
>
> Commentators recommended that losses allowed under section 469(g) be taken into account in computing net gain under section 1411(c)(1)(A)(iii), and that any net loss in section 1411(c)(1)(A)(iii) resulting from the use of such losses should be treated as a properly allocable deduction under section 1411(c)(1)(B). One commentator suggested that, to the extent a taxpayer has a net loss under section 1411(c)(1)(A)(iii) that is attributable to the allowed loss under section 469(g), the excess section 469(g) loss should continue to be suspended and carried forward to offset future gain resulting from the disposition of other passive assets subject to inclusion in section 1411(c)(1)(A)(iii).
>
> The final regulations provide that section 469(g) losses, which are treated as losses from a nonpassive activity, are taken into account for net investment income purposes in the same manner in which they are taken into account for chapter 1 purposes. As discussed in the context of section 469(f), section 469 does not alter the character or nature of the suspended passive loss. If the suspended losses allowed as a current year deduction by reason of section 469(g)(1) are attributable to operating deductions in excess of operating income, such suspended losses retain that character as, in most

[2447] Reg. § 1.1411-5(c) discusses financial instruments and commodities.

[2448] T.D. 9655. Reg. § 1.1411-4(g)(9) provides:

> *Treatment of section 469(g)(1) losses*. Losses allowed in computing taxable income by reason of section 469(g) are taken into account in computing net gain under paragraph (d) of this section or as properly allocable deductions under paragraph (f) of this section, as applicable, in the same manner as such losses are taken into account in computing taxable income (as defined in section 63).

See Reg. § 1.1411-4(g)(8)(iii), Example (2).

> cases, deductions described in section 62(a)(1) or 62(a)(4). However, to the extent the suspended losses are comprised of losses originating from the disposition of property (such as ordinary section 1231 losses or capital losses), those losses also retain their character when they are ultimately allowed by section 469. Therefore, losses that are allowed by reason of section 469(g) may constitute properly allocable deductions under section 1411(c)(1)(B) or may be included within the calculation of net gain in section 1411(c)(1)(A)(iii) in the year they are allowed, depending on the underlying character and origin of such losses. The recommendations proposed by the commentators depart from the general operating principles in chapter 1 and add additional complexity. Therefore, the final regulations do not adopt the positions advanced by commentators that section 469(g)(1) suspended losses should offset the gain first, then be allowed as a properly allocable deduction or that it should continue to be suspended and carried forward.
>
> Furthermore, section 469(g)(1) losses that are allowed by reason of a fully taxable disposition of a former passive activity are also fully taken into account for net investment income. As a result of the ordering rules in sections 469(f)(1) and (g)(1), any nonpassive gain realized on the disposition that causes passive losses to be allowed would be excluded from net investment income under the general former passive activity rules discussed in part 5.E.iv of this preamble. However, to the extent that any of the nonpassive gain is included in net investment income (for example, a portion of the gain remaining after the application of section 1411(c)(4)), the final regulations allow the same amount of suspended losses described in section 469(f)(1)(A) to be included in net investment income to offset the gain. The section 469(g)(1) losses allowed by reason of the disposition of the former passive activity are allowed in full because they relate to a period of time when the activity was a passive activity and represent true economic losses from a passive activity that do not materially differ from other section 469(g)(1) losses from non-former passive activities.

Losses allowed in computing taxable income by reason of Code § 469(g) are taken into account in computing net gain or as properly allocable deductions in the same manner as such losses are taken into account in computing Code § 63 taxable income.[2449]

I do not plan to analyze here the methods of calculating gain excluded from NII under the 2013 proposed regulations. If any reader would like to alert me to planning opportunities, I would be happy to review those ideas.

II.I.8.f. Summary of Business Activity Not Subject to 3.8% Tax

This part II.I.8.f Summary of Business Activity Not Subject to 3.8% Tax hits some of the highlights of part II.I.8 Application of 3.8% Tax to Business Income but is not intended to be comprehensive. Also consider part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good, especially part II.K.3.b Maximizing Flexibility to Avoid NOLs and Use Losses in the Best Year.

[2449] Reg. § 1.1411-4(f)(9).

If a trade or business is not a long-term rental activity, then the activity is not NII if:

- During the taxable year, the owner spends more than 100 hours in the business' daily operations (a significant participation activity),[2450]
- The activity is a personal service activity, and the individual materially participated in the activity for any 3 taxable years (whether or not consecutive) preceding the taxable year,[2451] or
- For either the current year or any five out of the past ten years, the owner spent more than 500 hours in the business' daily operations (a material participation activity).[2452]

Note, however, that significant participation activities may be aggregated to constitute material participation, moving one from a significant participation paradigm to a material participation paradigm, so be sure you know which paradigm applies.[2453]

The significant participation activity exception covers many situations but is not a panacea:

- Various credits arising from significant participation activities might be suspended.[2454]
- From an income tax perspective, consider that losses from a significant participation activity offset regular income only in certain situations.[2455]
- The self-charged rental and interest exception described below apply only if the recipient materially participates in the payer activity. For example, if a taxpayer rents real estate to an S corporation in which the taxpayer materially participates, then the rental meets the self-charged rental exception. If the taxpayer's participation in the S corporation is "significant" but not "material" (see text accompanying fn. 2453 above), then the S corporation's income is nonpassive but the rental activity is passive investment income (subject to exclusions for real estate professionals).
- If a taxpayer works for more than 500 hours for five years, the activity continues to be nonpassive under the 5-out-of-the-last-10-years rule. Working for more than 100 hours but not more than 500 hours does not trigger the 5-out-of-the-last-10-years rule. The same idea also applies to the 3-year personal service activity rule.

Also, a 250-hour safe harbor applies to allow rental real estate to qualify as a business for the Code § 199A deduction for pass-through business entities. See part II.E.1.e.i.(a) Whether Real

[2450] See parts II.I.8.a.i Passive Activity Recharacterization Rules, II.K.1.i Recharacterization of Passive Income Generators (PIGs) as Nonpassive Income, II.K.1.a.vi Proving Participation, and II.K.1.a.v What Does Not Count as Participation.

[2451] See part II.K.1.a.ii Material Participation, including fn. 3065, referring to activity that involves the performance of personal services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting, or is a trade or business in which capital is not a material income-producing factor.

[2452] See parts II.I.8.a General Application of 3.8% Tax to Business Income and II.K.1.a Counting Work as Participation.

[2453] See fns. 3062-3063 and accompanying text, found in part II.K.1.a.ii Material Participation.

[2454] See part II.K.1.i.i.(b) Tax Trap from Recharacterizing PIGs as Nonpassive Income.

[2455] See part II.K.1.a Counting Work as Participation.

Estate Activity Constitutes A Trade Or Business within part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.

Rental income and part or all of interest income paid to an owner of a business in which the landlord or lender, respectively, materially participate is not NII.[2456]

Rental not protected by the self-rental exception is not NII under either of the following situations:

- The taxpayer is a real estate professional and the rental activity rises to the level of being a trade or business or is not a trade or business but is grouped with a rental trade business.[2457]

- Any gain from the property's sale is included in the taxpayer's income for the taxable year, the property's rental began less than 12 months before the property was sold, and the taxpayer materially participated or significantly participated for any taxable year in an activity that involved for such year the performance of services for the purpose of enhancing the property's value.[2458]

See also part II.G.26 Real Estate Special Issues.

II.I.8.g. Structuring Businesses in Response to 3.8% Tax

What might be an ideal structure for a new business entity is described in part II.E Recommended Structure for Entities.

When structuring to avoid this 3.8% tax, be careful to avoid triggering another 3.8% tax: FICA (self-employment tax). Part II.L Self-Employment Tax (FICA) describes these rules, with specific structures illustrated in parts II.L.5 Self-Employment Tax: Partnership with S Corporation Blocker and II.L.6 SE Tax N/A to Nongrantor Trust; see also part II.E Recommended Structure for Entities. If one has to choose between the 3.8% tax on net investment income and self-employment tax, consider not only the thresholds for applying them but also the fact that the employer's 1.45% share is deductible against business income,[2459] whereas none of the 3.8% tax on net investment income is deductible.

Structuring a trust to characterize its income as nonpassive income might not be quite as easy as one might think. See part II.K.2.b Participation by an Estate or Nongrantor Trust. For other considerations regarding trusts and net investment income tax, see part II.J.3.a Who Is Best Taxed on Gross Income, especially the text accompanying fns. 2495-2499.

Note that participation by an ESBT is based on its trustee's actions, whereas participation by a QSST is based on its beneficiary's actions:

- Although switching to a QSST might facilitate participation regarding the S corporation's income, it might complicate qualifying for the self-rental exception that avoids the 3.8% tax on rental income. The self-rental exception requires the landlord to materially participate in

---

[2456] See part II.I.8.a.iii Qualifying Self-Charged Interest or Rent.
[2457] See parts II.I.8.c.ii Real Estate Classified as Nonpassive for Real Estate Professionals and II.I.8.c.iii Rental as a Trade or Business.
[2458] For details and nuances, see fn. 3239 in part II.K.1.e Rental Activities.
[2459] Code § 164(f)(1).

the tenant's business.[2460] Material participation in the tenant's business includes owning an interest in the tenant's business.[2461] Suppose a nongrantor trust owns the real estate and the S corporation stock. If and to the extent that the QSST election is made, the beneficiary, not the trust, is deemed to own the stock. A solution might be to place most of the stock into a QSST, keeping some in an ESBT. The portion that is in the ESBT would qualify that trust for the self-rental exception. The governing regulations[2462] do not impose a minimum ownership requirement, so it appears that any ownership of stock by the ESBT would suffice; I leave it to the reader to decide whether leaving more than a peppercorn is advisable.

- A trust that has only one current beneficiary might be able to switch back and forth every 36 months. See part III.A.3.e.iv Flexible Trust Design.

See also part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good, discussing a trade-off between NII tax and regular income if the business has enough potential for ups and downs in its taxable income that planning for a potential significant loss becomes important.

Also, one might consider selling S corporation stock to a QSST that a third party (perhaps the client's parent) creates for the client. For a discussion of how this avoids income tax on the sale but also might require the equivalent of paying for the stock twice, see part III.A.3.e.vi QSST as a Grantor Trust; Sales to QSSTs. After the note is repaid (or 36 months, whichever occurs last), perhaps part or all of the trust would be switched to an ESBT, as discussed in part III.A.3.e.iv Flexible Trust Design.

II.I.9. Elections or Timing Strategies to Consider to Minimize the 3.8% Tax on NII

Elections to consider to minimize the tax apply to:[2463]

- Regrouping passive activities.[2464]

- Pre-2013 installment sales that might generate net investment income in 2013 and later years.

- Controlled foreign corporation and qualified electing fund stock.

- Married taxpayers, in which one spouse is a nonresident alien. Nonresident aliens are not subject to the tax.[2465]

[2460] See part II.I.8.a.iii Qualifying Self-Charged Interest or Rent Is Not NII, especially fn. 2365, and part II.K.1.e.ii Self-Rental Converts Rental to Nonpassive Activity, especially fn. 3195-3196.
[2461] See part II.K.1.a.i Taxpayer Must Own an Interest in the Business to Count Work in the Business.
[2462] See part II.K.1.a.i Taxpayer Must Own an Interest in the Business to Count Work in the Business.
[2463] Nadeau and Ellis, "The Net Investment Income Tax: Elections to Start Thinking About Now," *T.M. Memorandum* (BNA), Vol. 54, No. 07 (4/8/2013). This article's Appendix contains a handy chart.
[2464] See parts II.K.1.b.ii Grouping Activities – General Rules and II.K.1.b.iv Regrouping Activities Transitioning into 3.8% Tax on Net Investment Income.
[2465] Code § 1411(e)(1).

Because the tax applies only if modified adjusted gross income (MAGI) exceeds various thresholds, consider accelerating next year's income or deferring the current year's income so that either this year or next year has MAGI below the threshold. For example:

- Accelerate or defer retirement plan distributions or change the mix between Roth and traditional IRA distributions, to the extent permitted without violating the rules requiring minimum distributions to be taken.[2466] Even though retirement plan distributions are not NII, income from distributions increases MAGI.

- Time capital gains and losses which might include, if spreading out the gain will keep MAGI below the threshold, engaging in installment sales.[2467]

II.J. Fiduciary Income Taxation

Generally, a "trust" is:[2468]

> an arrangement created either by a will or by an inter vivos declaration whereby trustees take title to property for the purpose of protecting or conserving it for the beneficiaries under the ordinary rules applied in chancery or probate courts.

[2466] Code §§ 401(a)(9), 403(b)(10), 408(a)(6), 408(b)(3).

[2467] Code § 453, which is subject to Code §§ 453A and 453B.

[2468] Reg. § 301.7701-4(a), which further provides:

> Usually the beneficiaries of such a trust do no more than accept the benefits thereof and are not the voluntary planners or creators of the trust arrangement. However, the beneficiaries of such a trust may be the persons who create it and it will be recognized as a trust under the Internal Revenue Code if it was created for the purpose of protecting or conserving the trust property for beneficiaries who stand in the same relation to the trust as they would if the trust had been created by others for them. Generally speaking, an arrangement will be treated as a trust under the Internal Revenue Code if it can be shown that the purpose of the arrangement is to vest in trustees responsibility for the protection and conservation of property for beneficiaries who cannot share in the discharge of this responsibility and, therefore, are not associates in a joint enterprise for the conduct of business for profit.

That a beneficiary provided consideration for the trust's establishment does not prevent the trust from being classified as such. *Hanover Bank v. Commissioner*, 40 T.C. 532 (1963), *acq.* 1964-2 C.B. 5, which further held:

> There does not appear to be any ambiguity in the agreement concerning the creation of the trust and, in fact, all the parties to that agreement, including Frances, have long treated the agreement as creating a valid trust. Petitioners Strong reported as trust income in 1953 and 1954 most of the amounts paid to them by the trustee. Long-standing interpretations should be given consideration and will not lightly be set aside even when there is ambiguity in the instrument, *Babette B. Israel*, 11 T.C. 1064 (1948). Furthermore, the Supreme Court of New York previously construed the agreement as creating a valid trust and the material parts of that judgment are set forth in our Findings of Fact. Judicial constructions by State courts are conclusive as to the legal extent and character of the interests created under such an agreement, *Louise Savage Knapp Trust A*, 46 B.T.A. 846 (1942).
>
> The situation here is distinguishable from cases such as *Lyeth v. Hoey*, 305 U.S. 188, and *Chase National Bank et al., Executors*, 40 B.T.A. 44 (1939). In each of those cases the taxpayer threatened to take contrary to a will and in each case compromised his claims. The Courts determined that the property received in compromise was the substitute for an inheritance. In the instant case, Frances did not contest the disposition and the amounts she received were not in compromise of any claim she may have had.

A life estate might create a relationship that rises to the level of a trust.[2469]

However, a mere agency agreement does not constitute a trust.[2470] Nor does a court-supervised guardianship or conservatorship for a minor or other incapacitated person.[2471]

See also part II.D Special Purpose Trusts.

This part II.J tends to focus on estates and nongrantor trusts and often refers to such entities when referring to trust. In many ways, estates are taxed as nongrantor trusts that are not required to distributed all of their income, so a reference to such a trust tends to apply to an estate as well; however, as with anything in these materials, a tax professional should apply independent judgment to any such inference.

For a focus on grantor trusts, see part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust, especially parts III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment and III.B.2.h How to Make a Trust a Grantor Trust.

II.J.1. Trust's Income Less Deductions and Exemptions Is Split Between Trust and Beneficiaries

II.J.1.a. Generally

Our fiduciary income tax system, generally computes taxable income as if the trust were an entity, then allocates taxable income between the trust and its beneficiaries.[2472]

[2469] Taxpayers sought that conclusion in fn. 5968 (found in part III.A.3.e.i QSSTs) to confirm treatment as a QSST.

[2470] Rev. Rul. 76-265 held:

> In the instant case, the bank trustee will not take title to the property for the purpose of protecting or conserving it for beneficiaries, but will be acting as an agent of the United States and in that capacity will receive moneys, hold assets, and make payments on behalf of the United States for the purposes of constructing public buildings and satisfying the obligation of the United States to holders of the participating certificates.
>
> Accordingly, the arrangement is not a trust for Federal income tax purposes, but is a security arrangement with the bank trustee acting as an agent on behalf of the United States.

Letter Ruling 200227012 followed Rev. Rul. 76-265.

[2471] Reg. § 1.6012-3(b)(3).

[2472] Technically, the trust allocates distributable net income to the trust and beneficiaries, then takes into account other items in computing the trust's taxable income. The text in the body is a convenient way to describe the system to clients.

A trust, all of the accounting income of which is required to be distributed currently to one or more noncharitable beneficiaries, deducts the lesser of its accounting income or distributable net income (DNI).[2473] It also deducts any other amounts of DNI that are "properly paid or credited or required to be distributed" for the taxable year.[2474] Thus, a mandatory income feature is simply a proxy for other distributions, without the requirement that the distribution be made during the year or within 65 days thereafter.[2475] The beneficiary includes in income the amount of the trust's deduction for DNI;[2476] CCA 201016073 requires the beneficiary to include the deductible amount in income even if the trustee chooses not to deduct that amount:

> You have requested our guidance regarding practitioner inquiries as to whether a trustee is required to take an income distribution deduction under § 661 of the Internal Revenue Code. These inquiries were based on an assumption that if the trustee chooses not to take the deduction, the result would be to shift the tax liability for distributions made to beneficiaries to the trust. Our response is that the amount potentially reportable in the gross income of the beneficiary under § 662 is unchanged by the amount of the allowable distribution deduction under § 661, even if the fiduciary chooses not to claim the § 661 deduction on the Form 1041, U.S. Income Tax Return for Estates and Trusts. Any distribution to a beneficiary described in § 661 that is properly paid, credited, or required to be distributed is considered a distribution of the trust or estate's current income to the extent of that trust or estate's distributable net income ("DNI"), as described in § 643(a), that is allocable to such beneficiary in the taxable year. Therefore, the effect of a trustee not claiming the distribution deduction would be to subject the same income to taxation at both the trust and beneficiary levels, not to shift the incidence of taxation. The legislative history surrounding the enactment of § 662 states that the effect of limiting the taxation of a beneficiary to his proportionate share of the DNI serves to avoid to the necessity for tracing of income. The House report states that "[i]nstead of determining whether a particular distribution represents amounts of current or accumulated trust income, this revision, broadly speaking, provides that any distribution is considered a distribution of the trust or estate's current income to the extent of its taxable income for the year." Committee on Ways and Means, Report on H.R. 8300 (1954) at 199.

[2473] Code § 651 and Code § 661(a)(1), (c). Code § 643(a) defines DNI, and Code § 643(b) defines accounting income. For more on accounting income, see part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law, which generally covers the area of accounting income, with extra attention paid to capital gains.

[2474] Code § 661(a)(2), (c).

[2475] Part II.J.2 Tactical Planning Shortly After Yearend describes the 65-day rule.

A beneficiary who did not actually receive the mandatory payments cannot avoid tax on them, especially when he has not disclaimed, renounced, or assigned his rights in the trust. *Seligson v. Commissioner*, T.C. Memo. 1992-320, which primarily relied on Code §§ 651 and 652 but also used constructive receipt under Reg. § 1.451-2(a) (see fns 4205-4206 in part II.Q.1.e Trying to Avoid Possible Ordinary Income on the Sale of a Partnership or S Corporation), supporting the latter:

> Thus, when income is available to a taxpayer so that he may draw upon it, so that it is his for the asking, the taxpayer is taxable on the income "constructively" received. A taxpayer recognizes taxable income when he or she has an unqualified, vested right to receive immediate payment. *Ross v. Commissioner*, 169 F.2d 483, 490 (1st Cir. 1948), *revg. on another issue* a Memorandum Opinion of this Court dated Feb. 10, 1947. This principle was applied to trust income in *Letts v. Commissioner*, 84 F.2d 760, 762 (9th Cir. 1936), *affg.* 30 B.T.A. 800 (1934) (trust income currently distributable is taxable to the beneficiary whether or not actually distributed to him).

[2476] Code §§ 651, 652.

The above framework is a simplistic explanation. Among omissions are the treatment of tax-exempt income, the separate share rule,[2477] and charitable deductions.[2478]

Some promoters market a trust structure that mistakenly interprets Code § 643 to remove certain trust income from current taxation. AM 2023-006 (8/18/2023) explains:

> ANALYSIS:
>
> Contrary to the claims of the promotors, the trust will recognize income on its capital gains and dividends, except to the extent those amounts are distributed or deemed to be distributed to its beneficiaries.
>
> The promotional materials support their claims about the tax benefits of their structure by reading subsections of § 643 out of context. The materials do not address § 641 which provides the basic rule that the trust's taxable income is computed as it is for individuals, with certain modifications. Instead, the materials look to § 643(a) for guidance as to the definition of "taxable income". In so doing, the materials fail to consider the beginning of that section, which expressly states that the section defines "distributable net income" rather than "taxable income."
>
> A non-grantor trust is considered a separate taxable entity for income tax purposes. A non-grantor trust computes its gross income in much the same manner as an individual. Most deductions and credits allowed to individuals are also allowed to estates and trusts. However, there is one primary distinction. A trust is allowed an income distribution deduction for distributions to beneficiaries. See §§ 651 and 661. A trust's deduction for distributions to beneficiaries is limited to the lesser of (1) amounts that the trust properly pays or credits to beneficiaries during the taxable year (or amounts that are required to be paid or credited to the beneficiaries during the taxable year under the trust instrument if not actually distributed) or (2) the "distributable net income" of the trust.
>
> Section 643 defines the concept of the "distributable net income" (or "DNI") of the trust. DNI not only limits the amount that the trust can deduct for distributions to beneficiaries, but it also determines the amount on which the beneficiaries can be taxed as a result of those distributions. See §§ 652 and 662. The income distribution deduction of the trust coupled with the gross income inclusion to beneficiaries ensures the income of the trust is taxed either to the entity or to the beneficiaries, but not to both.
>
> Under § 643(a), DNI is calculated by making certain modifications to the trust's taxable income. Some of these modifications include subtracting certain items of gross income from DNI that may not be distributable to beneficiaries who are entitled to receive trust "income". This, in turn, depends on the economic rights of trust beneficiaries determined under the trust instrument and applicable local law for the taxable year at issue. As background, a trustee apportions items of gross income or tax-exempt receipts of the trust between two different classes of beneficiaries, a class that is entitled to trust "income" as defined under the trust instrument and applicable local law (*i.e.*, the "accounting income" of the trust), and a class of beneficiaries (sometimes referred to as

[2477] See part II.J.9.a.ii Separate Share Rule.

[2478] As described in part II.J.4.c Charitable Distributions, Code § 642(c) generally governs charitable deductions. Among other issues, see part II.Q.7.c S Corporation Owned by a Trust Benefitting Charity, which also covers how a trust's income from business or certain other activities affects the charitable deduction.

“remainder beneficiaries”) entitled to certain amounts of gross income allocated to trust “corpus” or “principal”. Gross income that is allocated to trust principal can be accumulated by the trust for distribution in subsequent taxable years or at the time of the trust’s termination. Gross income that is allocated to trust income is either distributed to beneficiaries in the current taxable year or, depending on the terms of the trust instrument, can be accumulated by the trust for distribution in subsequent taxable years.

If a trust excludes all capital gains and extraordinary dividends from income within the meaning of § 643(b), that simply means that the trust will subtract those capital gains and extraordinary dividends from DNI under § 643(a), so long as those amounts are not actually distributed to the beneficiaries. In turn, subtracting those amounts from DNI simply means that trust has a lower threshold for the deduction that it can take for distributions to beneficiaries authorized by § 651 (for simple trusts) or § 661 (for complex trusts). If a non-grantor trust does not make (and is not required to make) any distributions to its beneficiaries, then it is not entitled to any “income distribution deduction”. Therefore, all of the income attributable to capital gains and extraordinary dividends must be reported by the non-grantor trust as income on Form 1041.

The promoters of this structure mistakenly assume that income in § 643(b) refers to the taxable income of the trust. However, the first sentence of § 643(b) provides that, within the parts of the Code encompassing §§ 641 through 668, any references to “income” without preface refers to the accounting income of the trust rather than another concept of income such as “taxable income”. References to other types of income will be denoted by their full name, such as “distributable net income” or “taxable income”. See *e.g.*, § 641 describing rules related to the computation of “taxable income”.

RECOMMENDATION:

In each case using this structure, as a threshold matter, the trust’s income tax returns should be examined to ensure that (a) the trust is reporting all of its taxable income, including capital gains and any income that is described as an extraordinary dividend, and (b) ensure that the trust is disallowed any deduction claimed with respect to such income solely because the trustee, acting in good faith, has allocated such income to the corpus of the trust.[4]

[4] Certain promotional materials include a description of tax reporting used in this structure as shown on the Form 1041. This sample From 1041 reflects that capital gains and other amounts of gross income characterized as extraordinary dividends are included as part of the trust’s “total income”, however, the sample Form 1041 shows that the trust claims a deduction on line 15a (other deductions not subject to 2% floor) in an amount that corresponds to the amount included in income. These promotional materials suggest that, in some variations, a statement is included with the return to explain this deduction.

See also part II.J.8.d Distribution in Kind; Specific Bequests, which includes subparts:

- II.J.8.d.i Distribution in Kind - Generally
- II.J.8.d.ii Specific Bequest
- II.J.8.d.iii Distributing a Note to the Obligor

A beneficiary's use of a residence generally should not constitute a deemed distribution unless the trust is a foreign trust and the beneficiary is a US person. For the latter rule, see Code § 643(i). For various cases analyzing the former issue, see *DuPont Testamentary Trust v. Commissioner*, 66 T.C. 761 (1976), *aff'd* 574 F.2d 1332 (5th Cir. 1978); *Carson v. U.S.*, 317 F.2d 370 (Ct. Cl. 1963); *Commissioner v. Plant*, 76 F.2d 8 (2nd Cir. 1935); TAM 8341005 (following *Plant* - real property taxes and the cost of the caretaker were carrying costs allocable to corpus, and income used to pay those expenses were not deemed distributed to the beneficiary who used the house; the beneficiary paid for electricity, heating and personal expenses); *Commissioner v. Lewis*, 141 F.2d 221 (3rd Cir. 1944) (carrying charges and depreciation were chargeable to trust accounting income under local law and deductible in computing amounts taxable to the mandatory income beneficiaries). *Moreell v. U.S.*, 221 F.Supp. 864 (W.D. Pa. 1963), is a sloppy, confusing, unreasoned opinion involving a mandatory income trust that was partly a grantor trust. I have not read but have seen cited *Fuller v. Commissioner*, 9 T.C. 1069 (1947), *aff'd* 171 F.2d 704 (3rd Cir. 1948); *Prince v. Commissioner*, 35 T.C. 974, 978 (1961). Also, in *Estate of Wineman v. Commissioner*, T.C. Memo. 2000-193, below-market rent constituted a taxable gift.

II.J.1.b. Foreign Trusts

I do not undertake to be an expert on the issues described in this part II.J.1.b. Rather, this part II.J.1.b consists almost entirely of quotes from the IRS LB&I International Practice Service Transaction Unit, "Defining the Entity - Foreign Trusts," DCN FEN/9434.02_01(2013)(b) (5/21/2015) (the "Process Unit").[2479]

In the Process Unit, "Issue and Transaction Overview" says:

> **What is the proper entity classification?**
>
> You are auditing a taxpayer who has been linked to a foreign entity which appears to be a trust. What audit steps should be taken? The first step is to gather information about the entity in order to determine what type of entity is involved. By correctly classifying the entity, the appropriate tax and reporting responsibilities for the entity under the United States (U.S.) tax law can be determined.
>
> This International Practice Service (IPS) Unit will focus on the classification of entities for U.S. tax purposes. It will outline information necessary to classify the entity, and the process for determining whether the entity qualifies as a trust under U.S. tax law or whether it is a business entity. For those arrangements classified as a trust, a determination must be made as to whether the trust is a domestic trust or foreign trust for U.S. tax purposes. This IPS Unit will outline the tests utilized in making those determinations.
>
> Generally speaking, an arrangement will be treated as a trust under the Internal Revenue Code (IRC), if it can be shown that the purpose of the arrangement is to vest in trustees responsibility for the protection and conservation of property for beneficiaries who cannot share in the discharge of this responsibility and, therefore, are not

[2479] IRS Note:
This document is not an official pronouncement of law, and cannot be used, cited or relied upon as such. Further, this document may not contain a comprehensive discussion of all pertinent issues or law or the IRS's interpretation of current law.

associates in a joint enterprise for the conduct of business for profit. Foreign trusts have been used by U.S taxpayers to hide assets and income, therefore, Congress has imposed special reporting obligations for those U.S. taxpayers holding interests in foreign trusts or receiving distributions from foreign trusts.

Once it is determined the entity is a foreign trust, the next step is to determine if it is a foreign grantor trust or a foreign non-grantor trust. The type of trust is important in determining the taxability of the trust and its distributions as well as related reporting obligations. Whether a trust is a grantor trust is determined under IRC §§ 671-679, with IRC § 679 applying specifically to foreign trusts. Any trust determined not to be a grantor trust will be treated as a non-grantor trust. Practice Unit "Foreign Grantor Trust Determinations – Part I – Section 679" DCN: FEN/9434.02_02(2013) will be useful in determining if the entity is a foreign grantor trust or non-grantor trust. Practice Unit "Foreign Grantor Trusts Determinations – Part II – Sections 671-678" DCN: FEN/9434.02_07(2013) will focus on the grantor trust rules of IRC §§ 671-678. There are additional IPS units that cover other aspects of trusts, such as the taxability of trust income and distributions, and information reporting requirements. If the entity at issue is determined to be a business entity, other IPS units will assist you in determining the proper classification of such entity, such as a corporation, partnership or disregarded entity.

In the Process Unit, "Defining the Entity – Foreign Trusts" says:

What information is needed to determine the proper classification of an entity for U.S. tax purposes? If it is classified as a trust, is it a domestic trust or a foreign trust for U.S. tax purposes? This IPS unit will outline the tests utilized in making those determinations.

Fact Element	**Resources**
• The first step is to determine if the entity should be treated as a trust for U.S. tax purposes. • Background information must be gathered to determine whether the entity constitutes a trust. • Organizational documents and actual operations will control the critical determinations.	• Form 3520 • Form 3520 Instructions • Form 3520-A • Form 3520-A Instructions • Treas. Reg. §301.7701-4 • IRS AM 2009012 – Entity Classification of Lichtenstein Anstalts and Stiftungs
Items to Request: • Trust Instrument (other titles include: Declaration of Trust, Trust Deed, Trust Agreement, etc.) -- This document names the parties to the trust, establishes the duties and powers of the trustee, and establishes the rights of the beneficiaries.	• Form 3520 • Form 3520 Instructions • Form 3520-A • Form 3520-A Instructions • Treas. Reg. §301.7701-4 • IRS AM 2009012 – Entity Classification of Lichtenstein Anstalts and Stiftungs

Fact Element	Resources
-- If parties to the trust are not contained within the trust instrument, seek separate documentation to identify the settlors, trustees and beneficiaries. -- The settlor is the person who establishes the trust, also known as the grantor or creator.	
Items to Request: • Letter of Wishes -- The settlor of an offshore trust commonly provides the trustee with a non-binding "letter of wishes" or memorandum of wishes" It expresses the settlor's true intentions as to the trustee's discretionary exercise of powers such as the types of investments or the disposition of property. A letter of wishes is a separate document and not a part of the trust instrument.	• Treas. Reg. §1.679-2(a)(4)
Items to Request: • Identification of all assets held by entity – Information on how the trust assets are titled, controlled, and used, will assist in defining the entity. • Any additional agreements with respect to the trust – Question Taxpayer whether additional agreements, either written or oral, exist.	• Form 3520 • Form 3520 Instructions • Form 3520-A • Form 3520-A Instructions • Treas. Reg. §301.7701-4 • IRS AM 2009012 – Entity Classification of Lichtenstein Anstalts and Stiftungs

Issue 1

Is the entity a trust for U.S. tax purposes?

Fact Element	Resources
What is a trust? • The Regulations define a "trust" as an arrangement created either by a will or by an inter vivos declaration whereby trustees take title to property for the purpose of	• Treas. Reg. §301.7701-4

Fact Element	Resources
protecting or conserving it for the beneficiaries. • In a legitimate trust, the grantor transfers property to a trustee to hold and protect for the benefit of the trust beneficiaries, often pursuant to the terms of a written trust agreement. • A trust is a separate legal entity or arrangement typically used for family and estate planning purposes. Trusts allow assets to be held by an entity, other than a natural person, with an indeterminate life. Accordingly, trusts are often used to hold property and facilitate a transfer of such property to beneficiaries without the need for probate proceedings. • An arrangement will be treated as a trust if it can be shown that its purpose is to vest in trustees responsibility for the protection and conservation of property for beneficiaries who cannot share in the discharge of this responsibility and, therefore, are not associates in a joint enterprise for the conduct of business for profit.	
What is <u>Not</u> a Trust? • An entity created to operate a business rather than to protect or conserve assets is not recognized as a trust for U.S. tax purposes. Instead, entities conducting business activities are more properly classified as business entities. If it is a business entity, other IPS Units are available to assist you in determining the proper classification, such as a corporation, partnership or disregarded entity.	• Treas. Reg. §301.7701-4(b) • Treas. Reg. §301.7701-2
ABUSIVE TRUST ARRANGEMENTS OR SHAMS: • Where a trust exists solely for tax avoidance purposes, it is an "abusive trust arrangement" or "sham" whereby the IRS may ignore the purported form for U.S. tax purposes.	• Notice 97-24 • Rev Rul 80-74 • Rev Rul 90-106 • <u>Markosian v. Commissioner</u>, 73 T.C. 1235 (1980)

Fact Element	Resources
• Factors you should consider in a sham analysis (not an exclusive list): -- Lack of Change: The relationship between the grantor and property conveyed to the trust does not materially change after conveyance to the trust. -- Retained Control: A grantor continues to use and/or exercise dominion and control over trust property as if it was his/her own. -- Retained Benefit: Property and/or income of the trust are used to benefit the Grantor -- Lack of Independent Trustee: Trustee's failure to exercise fiduciary responsibilities. The trustee merely approves actions directed by grantor, and is trustee "in name only", often due to family relationships or grantor's position of control over trustee.	• Zmuda v. Commissioner, 79 T.C. 714 (1982), aff'd 731 F. 2d 1417 (9th Cir. 1984) • Alan v. Commissioner, 767 F.2d 618 (9th Cir 1985), aff'g TC Memo 1983-249 • Able Co. v. Commissioner, TC Memo 1990-500
SHAM INDICATORS: • The identities of the parties (grantor, trustee, beneficiaries) are concealed • The sole beneficiary of the trust is another trust--particularly if the beneficiary is a foreign trust. • Beneficiaries are "discretionary" (selected by the trustee). • Beneficial interest is evidenced by "trust certificates" or "units", often transferable. • Trust instruments are vague or ambiguous. • Trust assets are commingled with those of the trustee, the grantor, or a beneficiary -- Such as a common checking account	• *Zmuda v. Commissioner*, 79 T.C. 714, 720 (1982), affd. 731 F.2d 1417 (9th Cir. 1984) • Rendel v. Commissioner, TC Memo 1995-593, aff'd 129 F.3d 127 (9th Cir 1997) • Waegemann v. Commissioner, TC Memo 1993-632 (1993) • Dahlstrom v. Commissioner, TC Memo 1991-265, aff'd w/o pub.opin. 999 F2d 1579 (5th Cir. 1993)
• If it is determined that the trust was set up for tax avoidance purposes, the facts and circumstances of your case will dictate how the trust transactions should be treated for U.S. tax purposes.	
DECISION POINT: Based on the evidence, determine if the entity should be treated as a	• Treas. Reg. §301.7701-4(a)

Fact Element	Resources
trust, a business entity or sham for U.S. tax purposes. • **Trust**: If the entity is a trust for U.S. tax purposes, then continue to Issue 2 to determine whether it is a foreign trust or a domestic trust. • **Business Entity**: Determine what type of business entity. If entity conducts a business, other IPS Units will assist in determining the proper classification (corporation, partnership or disregarded entity), taxation and filing requirements for those entities. • **Sham**: If the entity is a sham, ignore the entity for U.S. tax purposes and treat the transactions as if having occurred directly by the individual as though the entity never existed.	• Treas. II.J.1.c. Taxation of Beneficiary of a Foreign Non-Grantor Trust

I do not undertake to be an expert on the issues described in this part II.J.1.c. Rather, this part II.J.1.c consists almost entirely of quotes from the IRS LB&I Process Unit, "Taxation of Beneficiary of a Foreign Non-Grantor Trust," DCN INT-9-253 (10/11/2023) (the "Process Unit").[2480]

In the Process Unit, "Process Overview" says:

> A trust classified as a foreign trust will be treated as either a "foreign grantor trust" or a "foreign non-grantor trust" for United States (U.S.) tax purposes. This distinction is important because it affects who is taxed on the trust income and when they are taxed. The rules administering foreign trust income taxation encompass both the domestic trust income taxation rules and the nonresident alien individual's income taxation rules. If a foreign trust is characterized as a grantor trust under Internal Revenue Code (IRC) 671–679, the grantor or another person is treated as the owner of the trust. If a U.S. person is treated as the owner of a trust for U.S. federal income tax purposes under the grantor trust rules, then generally a distribution to a beneficiary is a non-taxable transaction to the beneficiary. Any foreign trust not determined to be a grantor trust under IRC 671-679 will be treated as a foreign non-grantor trust for U.S. tax purposes. A beneficiary of a foreign non-grantor trust may be liable for U.S. tax on distributions of income (current and accumulated) from the trust. Foreign non-grantor trust corpus distributions are not taxable to a beneficiary. Therefore, the examiner must determine whether the beneficiary's distribution is income or principal (corpus). Further, the examiner must determine whether the trust is a simple trust or a complex trust in order to determine the extent and type of income distribution. This determination helps the examiner generate the beneficiary's income distribution calculation for U.S. income tax purposes which will provide the amount and type of income taxable to the beneficiary. Finally, the U.S. income tax consequences of an income distribution to the beneficiaries of a foreign non-grantor trust depend upon whether the distribution represents current income, Distributable Net Income (DNI) or accumulated income, Undistributed Net Income (UNI); whether the beneficiary is a U.S. person or a foreign person; and whether the trust's income is U.S. source or foreign source. This process unit will provide an overview of the steps needed to determine how to tax a beneficiary of a foreign non-grantor trust on distributions received from the trust. Examples of circumstances under which this process applies include:
>
> - A U.S. beneficiary receives a distribution of income from a foreign non-grantor trust. The U.S. beneficiary will generally be taxed on his or her share of DNI of the trust. The U.S. beneficiary receiving distributions from the foreign non-grantor trust is taxed similarly to a U.S. beneficiary receiving distributions from a domestic non-grantor trust, although the calculation of DNI is slightly different for a foreign trust.

[2480] IRS Note:
This document is not an official pronouncement of law, and cannot be used, cited or relied upon as such. Further, this document may not contain a comprehensive discussion of all pertinent issues or law or the IRS's interpretation of current law.

- A foreign beneficiary receives a distribution of income from a foreign non-grantor trust. The foreign beneficiary may be subject to U.S. tax on trust income from U.S. sources. The tax is based on the beneficiary's share of U.S. source DNI.

Prior to using this Practice Unit, the examiner should refer to the Practice Unit "Defining the Entity - Foreign Trusts" to determine that a foreign trust exists. Then determine whether a foreign trust is treated as a foreign grantor trust for U.S. tax purposes by referring to Practice Unit "Foreign Trust Determination -Part I -Section 679". Even if the foreign trust is not a foreign grantor trust for U.S. income tax purposes under IRC 679, in rare circumstances, the foreign trust may still be treated as a foreign grantor trust under IRC 673-678 as discussed in the Practice Unit "Foreign Grantor Trust Determination - Part II -Sections 671-678". Once these Practice Units have been reviewed and a determination is made that a foreign non-grantor trust exists, use this Practice Unit to determine the taxation of beneficiaries of a foreign non-grantor trust.

Process Steps

Determining whether a trust is a grantor or non-grantor trust is important because it affects who is taxed on the trust income and when they are taxed. Any foreign trust not determined to be a grantor trust under IRC 671-679 will be treated as a foreign non-grantor trust for U.S. tax purposes. If a trust is a foreign non-grantor trust, the trust itself is a taxable entity, and a U.S. or foreign beneficiary may be liable for U.S. tax on a distribution from the trust. The process to determine taxable income of a beneficiary of a foreign non-grantor trust is captured in the steps below.

Step 1

Determine if a foreign non-grantor trust made a distribution of trust income to a beneficiary.

Considerations	Resources
Income not distributed by a foreign non-grantor trust is taxed to the trust while income distributed to the beneficiary is taxed to the beneficiary. A foreign non-grantor trust may distribute the following income and non-income items to its beneficiary(s): • Trust income, which includes: -- Foreign sourced income, -- U.S. or foreign source income effectively connected with the conduct of a U.S. trade or business (ECI), -- Other U.S. sourced income, -- Gains from sale of U.S. real property. • Gift or bequest not paid from trust income, which includes:	• IRC 661-663 • IRC 663(a)

Considerations	Resources
-- Specific sum of money, -- Specific property. • Trust corpus -- Corpus is defined as the principal sum or capital of a trust.	• IRC 872(a) • IRC 651(b) • IRC 661(a)
• A U.S. beneficiary's share of the trust's DNI must be included in the beneficiary's income for U.S. tax purposes in the year of a distribution from the trust. In addition, if the U.S. beneficiary receives a distribution of a portion of the trust's UNI, it is taxable to the beneficiary in the year of receipt, accounting for the accumulation under the throwback tax regime. • A foreign beneficiary receiving an income distribution must include the beneficiary's share of the trust's U.S. sourced DNI. • Generally, distributions of trust corpus and gifts or bequests of specific property as specified in the trust instrument are generally not taxable to a beneficiary. However, when a foreign non-grantor trust distributes trust income, the distribution may be taxable to the beneficiary. U.S. source income and ECI not distributed by a foreign non-grantor trust is taxed to the trust. Items to review and request to aid in determining if a distribution was made from trust income include: • Form 3520: A U.S. person is required to file a Form 3520 if the person receives a distribution from a foreign trust. A distribution includes cash, non-cash property, certain loans, or the uncompensated use of trust assets credited for the beneficiary's benefit.	• IRC 667(a) • IRM 3.13.2-7 -Definition of Entities • IRM 21.7.13.5.8.1 - Definition: Trusts • IRC 662(a) • Treas. Reg. 1.679-2(a)(4)(i) • IRC 6048(c)
Net losses and capital losses of a trust cannot be distributed to a beneficiary unless it is in the termination year of a trust and even then, only certain types of unused carryover losses can be distributed according to IRC 642(h).	• IRC 643(a) • Treas. Reg. 1.643(a)-3 • IRC 642(h)

Considerations	Resources
CAUTION: Disallow losses to a beneficiary from a foreign non-grantor trust from Schedule K-1 in a non-termination year.	

Step 2

Determine if a beneficiary must use the default calculation for trust distributions.

Considerations	Resources
Trust distributions to a beneficiary can be comprised of current income and accumulated income. This information is needed to determine how the beneficiary will be taxed. A beneficiary is allowed to complete Form 3520, Part III, Schedule B, Actual Calculation of Trust Distributions, when the beneficiary has sufficient information to complete the Schedule or they can still choose to use Schedule A, Default Calculation of Trust Distributions. If completing Schedule B, the beneficiary should have marked “yes” to Form 3520, Part III, line 30 and attached a Foreign Non-grantor Trust Beneficiary Statement to the Form 3520. Many beneficiaries do not have sufficient information to complete Schedule B. Beneficiaries that do not receive a Foreign Non-grantor Trust Beneficiary Statement from the foreign trust with respect to a distribution or that do not have sufficient information to complete Form 3520, Part III, Schedule B, about the trust’s income and distributions, must use the default calculation of trust distributions to determine their ordinary and accumulation distribution income from the foreign non-grantor trust. The default calculation of trust distributions is reported on Form 3520, Part III, Schedule A. **CAUTION**: Generally, once the beneficiary uses the default calculation, they should continue to use it for all future years, with an exception in a trust termination year.	• IRC 665-668 • Form 3520 • Form 3520 Instructions

[still working on the above – you'll see more next quarter]

II.J.2. Tactical Planning Shortly After Yearend to Save Income Tax for Year That Ended

II.J.2.a. Tax Laws Supporting Tactical Planning

Code § 663(b) allows distributions in the first 65 days of the taxable year to count as distributions in the current or prior year's tax return.

Thus, the trustee can count distributions from January 1, 2020 through and including March 5, 2020 as 2019 or 2020 distributions or a combination thereof.[2481]

When in doubt, distribute more rather than less (if distributions are appropriate).[2482] The tax return, including extensions, will determine how much of the distribution counts as a distribution for the year just ended or for the year in which the distribution is made, but the distribution needs to be made within the 65-day period.

This tactic can carry out capital gains, without regard to any prior year election regarding distributing capital gains.[2483]

Code § 643(g) authorizes the trustee to use Form 1041-T to elect to treat any portion of a payment of estimated tax made by the trust for any taxable year of the trust as a payment made by a beneficiary on the last day of that taxable year. However, Form 1041-T instructions for 2020 provide:

[2481] Reg. § 1.663(b)-2(a), "Manner and time of election; irrevocability," provides:

(1) *When return is required to be filed*. If a trust return is required to be filed for the taxable year of the trust for which the election is made, the election shall be made in the appropriate place on such return. The election under this subparagraph shall be made not later than the time prescribed by law for filing such return (including extensions thereof). Such election shall become irrevocable after the last day prescribed for making it.

(2) *When no return is required to be filed*. If no return is required to be filed for the taxable year of the trust for which the election is made, the election shall be made in a statement filed with the internal revenue office with which a return by such trust would be filed if such trust were required to file a return for such taxable year. See section 6091 and the regulations thereunder for place for filing returns. The election under this subparagraph shall be made not later than the time prescribed by law for filing a return if such time prescribed by law for filing a return if such trust were required to file a return for such taxable year. Such election shall become irrevocable after the last day prescribed for making it.

In granting an extension of time to make a Code § 663(b) election, Letter Ruling 9215033 held:

> The time for filing an election under section 663(b) of the Code is fixed by section 1.663(b)-2(a)(1) of the regulations. Accordingly, the Commissioner has discretionary authority pursuant to section 301.9100-1(a) of the regulations to grant an extension of time for making the section 663(b) election provided good cause is shown and the other requirements of section 301.9100-1(a) are met.

[2482] See part II.J.3 Strategic Fiduciary Income Tax Planning for tax and nontax issues to consider in deciding whether to make distributions.

[2483] See part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary.

> You can't allocate to a beneficiary tax withheld from income, such as withholding from lottery or other gambling winnings, or from salary or pension payments reported on Form 1041. You must report this withholding on Form 1041, Schedule G, Part II, line 14.

II.J.2.b. Trust Provisions Authorizing Distributions

Drafting irrevocable trusts administered while the grantor is living is more challenging than those administered post-mortem. Distribution provisions can cause unwanted grantor trust status; see part III.B.2.h.vii Distribution Provisions Might Prevent Turning Off Grantor Trust Status, within part III.B.2.h How to Make a Trust a Grantor Trust Taxed to a U.S. Citizen or Resident.

Even when grantor trust is desirable, at some point the grantor should be able to turn off grantor trust status. I prefer to make a trust a grantor trust solely by either or both powers described in part III.B.2.h.iii Swap Power or III.B.2.h.iv Borrow Power, which the grantor can later release. If the grantor's release of those powers triggers other changes in the trust, such as changes in distribution provisions, the grantor's ability to release those powers might constitute a retained power to shift beneficial enjoyment that causes Code § 2036 estate inclusion. To avoid that concern, I draft the trust in a manner that makes it a nongrantor trust but for the swap and borrow powers. A sample savings clause for such an irrevocable trust is:

> Notwithstanding any contrary provision in this Agreement, all provisions of this Agreement shall be construed and applied so that no part of the assets composing any trust created in this Agreement shall be included in my estate for federal estate tax purposes or to cause me to be taxed as the grantor of a trust for income tax purposes, the latter determined as if I had released my powers under [swap and borrow clauses]; any provision incapable of being so construed or applied shall be inapplicable to such trust; in no event shall I, the trustee, the holder of a power to Appoint, or any other person take any action or have any power that will cause any such assets to be included in my gross estate for federal estate tax purposes or to cause me to be taxed as the grantor of a trust for income tax purposes, the latter determined as if I had released my powers under [swap and borrow clauses]; and all provisions regarding such trust shall be interpreted to conform to this directive.

Furthermore, if the trustee is a beneficiary, be careful not to trigger gift tax consequences when the trustee makes a distribution. Gift tax consequences may occur if a distribution to a beneficiary other than the trustee may reduce future distributions to a trustee who is a beneficiary.[2484] However, Reg. § 25.2511-1(g)(2) provides a safe harbor:[2485]

> If a trustee has a beneficial interest in trust property, a transfer of the property by the trustee is not a taxable transfer if it is made pursuant to a fiduciary power the exercise or nonexercise of which is limited by a reasonably fixed or ascertainable standard which is set forth in the trust instrument. A clearly measurable standard under which the holder of a power is legally accountable is such a standard for this purpose. For instance, a power to distribute corpus for the education, support, maintenance, or health of the beneficiary; for his reasonable support and comfort; to enable him to maintain his

---

[2484] See part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts.

[2485] For what constitutes an ascertainable standard for grantor trust purposes, see text accompanying fn 6670 in part III.B.2.h.vii.(a) Distribution Provisions Resulting from Control Causing Grantor Trust Treatment.

accustomed standard of living; or to meet an emergency, would be such a standard. However, a power to distribute corpus for the pleasure, desire, or happiness of a beneficiary is not such a standard. The entire context of a provision of a trust instrument granting a power must be considered in determining whether the power is limited by a reasonably definite standard. For example, if a trust instrument provides that the determination of the trustee shall be conclusive with respect to the exercise or nonexercise of a power, the power is not limited by a reasonably definite standard. However, the fact that the governing instrument is phrased in discretionary terms is not in itself an indication that no such standard exists.

Also, the authority to distribute to oneself constitutes a general power of appointment, causing estate inclusion, if it is not limited by ascertainable standards.[2486] The lapse of such a power may constitute a gift[2487] or generate estate inclusion.[2488]

For all the reasons above, ideally, if and to the extent that a distribution standard is not ascertainable, the trustee with that authority would be not the grantor, a beneficiary, or a person controlled by either of them. If the grantor has the power to change who is such a trustee or if the beneficiary appoints the trustee, consider making sure the changed trustee is independent.[2489]

Sample clauses are below. As is the case with any sample clause in this document, they should be used only by a lawyer exercising his or her independent legal judgment. A group that tries to do a better job of humanizing such drafting is https://purposefulplanninginstitute.com.

First, let's look at a clause providing an ascertainable standard:

SECTION 12.18 **SUPPORT.** Distributions for a person's "support" means distributions for a person's support and maintenance in reasonable comfort, medical care and education (including a course of instruction at an elementary school, secondary school, vocational school, art school, college, university, and graduate school, as well as private tutoring, internships and apprentice work). Distributions for the support of a beneficiary shall be based upon the standard of living to which such beneficiary shall have become accustomed. If and to the extent the power to distribute for support can be exercised to distribute assets to a new trust, the person holding this power may exercise it by modifying the existing trust rather than being required to distribute assets to a new trust.

Many variations of the above are possible and perhaps even better. For example, the grantor's goals for the beneficiary's standard of living may differ from the trustee's or beneficiary's views. However, very important is not to give the trustee "conclusive" or "sole and absolute" discretion in the clause above; an example of this caution is the next-to-the-last sentence of Reg. § 25.2511-1(g)(2) above.

With the limits of that standard lies considerable flexibility. Unless the client suggests otherwise, I include this clause:

[2486] See part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap.
[2487] Which gift may be controlled by making the lapse be within the limits of Code § 2514(e), as described in part II.J.4.f Making Trust a Partial Grantor Trust as to a Beneficiary.
[2488] See part III.B.7.f.i Code § 2704 – Current Law.
[2489] See fn 6713 in part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts.

SECTION 11.4 CONSIDERATION OF OTHER RESOURCES. In the exercise of the trustee's discretionary power to distribute income or principal of a trust for the support or welfare of any beneficiary, the trustee may consider the other income and financial resources known by the trustee to be reasonably available to such beneficiary, including the legal obligation of any other person to provide for such beneficiary's support. If the beneficiary fails to provide the information requested by the trustee, the trustee shall make such assumptions as the trustee deems appropriate. Except as specifically provided in this Agreement to the contrary, the trustee may either ignore the existence of such other income and financial resources in making the distribution or require the beneficiary to use all or any portion of such other income and financial resources as a condition to the distribution.

Thus, even if one can determine a "correct" amount of support, the trustee can determine a range of distributions by considering or ignoring the beneficiary's other resources.

An example of a clause that is the opposite of an ascertainable standard is:

SECTION 12.21 WELFARE. Distributions for a person's "welfare" means distributions for such person's comfort, welfare and best interests, all as determined in the trustee's absolute discretion. Pursuant to this standard, the trustee is authorized, in the trustee's absolute discretion, to determine that such person's welfare is enhanced by making a distribution to or for the benefit of such person of none, part or all of the trust. If and to the extent the power to distribute for welfare can be exercised to distribute assets to a new trust, the person holding this power may exercise it by modifying the existing trust rather than being required to distribute assets to a new trust.

Our Chicago office uses "best interests" instead of "welfare." "To or for the benefit of" is intended to authorize decanting; see part II.J.18.c Decanting.

Finally, to avoid the general power of appointment and related issues, consider the following clause I use for revocable trusts (which needs to be modified for irrevocable trusts to protect against inclusion in the grantor's estate), which opts out of state law protections relating to those issues and instead provides more flexibility but within established safeguards:

SECTION 11.5 NO DISCHARGE OF SUPPORT OBLIGATIONS AND OTHER LIMITATIONS. Subsections 2 through 4, inclusive, of RSMo section 456.8-814 shall not apply to any trust created in this Agreement. Notwithstanding that other provisions of this Agreement empower the trustee, in the trustee's discretion, to make distributions of income, principal or both from a trust, except as provided in the last sentence of this Section, the following provisions are limitations of the powers of the trustee (other than me) and shall not be construed as granting the trustee additional powers:

[Delete highlighted language here and at the end unless we are certain we want to force estate tax inclusion]

(a) No individual trustee shall have any voice or vote in considering whether to make any discretionary distribution of income or principal for such trustee's own benefit unless such distribution pertains to such trustee's support. No trustee who is appointed by a beneficiary may make any discretionary distribution of income or principal for such beneficiary unless either such distribution pertains to such beneficiary's support or the trustee is not a related or subordinate party (as defined in Code section 672(c)) with respect to such beneficiary.

(b) No such discretionary power, whether or not subject to standards, ascertainable or otherwise, may be exercised to effect a distribution that would discharge (in whole or in part) any legal obligation (including a support obligation) of any of the following described persons in their individual capacity, specifically excluding me: (1) any person who is then a trustee of the trust that would make the distribution; and (2) any person who is deemed to have the power of a trustee of the trust that would make the distribution (and without limiting the generality of the foregoing, an example of such a person would be a person who holds a power, then exercisable with respect to the trust that would make the distribution, to remove the trustee then serving and appoint the holder of such power as the trustee).

(c) A power the exercise of which is limited or prohibited by subsection (a) or subsection (b) may be exercised by a majority of the remaining trustee(s) whose exercise of the power is not so limited or prohibited. If the power of all trustees is so limited or prohibited, the trustees(s) may appoint a special trustee (who is otherwise not limited or prohibited from exercising the power under subsection (a) or subsection (b)) to exercise the power.

This Section shall not apply to limit distributions that any trustee of a nonexempt Life Trust (even if the beneficiary) makes for the beneficiary's welfare.

Are distributions to cover income taxes covered under the amounts allowed under the ascertainable standards, or are they the discharge of a legal obligation prohibited under Section 11.5? One way to view this question:

- First, taxes are a legal obligation, and authorizing a beneficiary-trustee to discharge his own legal obligations constitutes a general power of appointment and would move one outside of the safety of an ascertainable standard.

- However, that response is too literal. It applies more in the context a beneficiary-trustee who takes distributions to pay taxes on her income not generated by that particular trust.

- Suppose the trustee-beneficiary has $100,000 annual needs for living expenses. Suppose the trust makes a $100,000 distribution, which generates a $100,000 K-1 to the beneficiary, and the beneficiary has to pay $30,000 taxes as a result of that distribution. That means that the beneficiary has only $70,000 remaining from that distribution with which to pay living expenses. In that case, I would gross up the distribution for taxes, so that the beneficiary has enough money to fund living expenses and pay tax on the distribution. That beneficiary may need a $150,000 distribution to fund $100,000 of living expenses and $50,000 taxes on the $150,000 distribution.

- I would not hesitate to advise that trustee-beneficiary to effectuate a $150,000 distribution.

- If that same beneficiary had $200,000 in earnings outside of the trust, I would advise the beneficiary that covering the taxes on that $200,000 is not permitted.

- I would be comfortable calculating the taxes on the trust distribution by calculating their tax liability with and without the trust distribution.

- Of course, the trustee's lawyer needs to decide whether the above analysis is correct, based on the trust agreement and applicable state law. If the trustee has not consulted with a lawyer, you should insist on having a team approach, which is where your Estate Planning Council connections come in. The lawyer does not need to be involved in every decision, but receiving general guidelines for administering the trust will help keep everyone out of trouble. See also part II.J.4.j Helping the Trustee Provide Annual Notices to Beneficiaries to Reduce Exposure.

When considering making distributions, consider the beneficiary's characteristics in relation to the trust's purposes:

- Was the trust created to save estate tax, at a time of lower exemptions? With higher exemptions, might estate inclusion and basis step-up be more helpful? See part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap. Might a distribution of assets in kind generate a future basis step-up?

- What will the beneficiary do with any extra distributions?

    - Will the beneficiary reinvest them, so that the distribution merely moves assets around while keeping them in the family?

    - Will the beneficiary's creditors yank them away, or might the beneficiary blow them on gambling, drugs, or an indolent lifestyle?

    - Will the beneficiary spend them, but in a meaningful way that enhances the family's life? Distributions to beneficiaries raising children might allow them to provide more enriching life experiences or perhaps less stressful lives than the hand-to-mouth living experience that so many people face.

Ultimately, saving income tax may be worthwhile, but not at the cost of poor use of the distributions. Income tax preparers should engage with trustees, trustee's lawyers, and trustees' investment advisors to develop a holistic approach that informs which tactics are appropriate.

This document does not delve into fiduciary duties. Here a list of suggestions by Kanyuk, "Trustee Discretion: The Better Part of Valor or Vulnerability?" *Estate Planning Journal* (WG&L), vol. 46, no. 12 (12/2019):

- Read the trust agreement, and any amendments, letters of wishes, or affidavits from the grantor regarding the grantor's intent. Prepare a concise but accurate abstract of the agreement for reference by the trust administrator and staff.

- Determine and document the standard, if any, for making discretionary distributions, including any precatory language in the trust agreement intended to guide the trustee in exercising its discretion.

- For trusts with multiple current beneficiaries, determine whether any beneficiary is the “primary beneficiary,” and, if so, determine the circumstances under which discretion might be exercised in favor of the non-primary beneficiaries.

- Keep complete, accurate, and current records of the trust assets.

- Determine whether and which resources of the beneficiary must be considered when exercising discretion, and document the procedure for requesting or otherwise obtaining information about the resources.

- Document all beneficiary requests for distributions, as well as the trustee’s response to them (*i.e.*, decision to distribute or not distribute, and the basis for the decision).

- Document whether any conditions must be satisfied in order for a distribution to be made (e.g., beneficiary must be a certain age, have attained a certain level of education, etc.).

- Coordinate the trust’s investment policy with required or anticipated distributions.

These ideas might help not only from a fiduciary duty viewpoint but also to demonstrate to the IRS that the fiduciary duties were “real” and that therefore the IRS should respect them.

II.J.3. Strategic Fiduciary Income Tax Planning

Planning for fiduciary income tax is a matter of comparing taxation at the trust level, beneficiary level, or deemed owner level, including the following issues:

- Who is best taxed on gross income?[2490]

- Who benefits most from deductions?[2491]

- Consider not only the effect of federal tax but also state and local income tax.[2492]

- Does the method of shifting the incidence of taxation undermine any material purpose of the trust?

- Do decisions made for the current taxable year affect taxation in future years?

- How much flexibility does a trustee have for currently irrevocable trusts, and can this flexibility be enhanced?

- How should one draft to provide more flexibility?

For distributing capital gain, see part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI).

[2490] See parts II.J.3.a Who Is Best Taxed on Gross Income and II.J.3.b Effect of Kiddie Tax on Rates.
[2491] See part II.J.3.d Who Benefits Most from Deductions.
[2492] See part II.J.3.e State and Local Income Tax.

Also note that beneficiaries who are trustees can reduce income subject to the net investment income tax by taking reasonable trustee fees; however, this strategy is not a good idea if the trust has any significant tax-exempt income (because the deduction would be disallowed to the extent allocable to tax-exempt income,[2493] but the entire fee income would still be recognized) or if and to the extent the deduction would offset income (such as qualified dividends or long-term capital gain) taxable at a lower rate. For other aspects of the NII tax, see parts II.I.7 Interaction of NII Tax with Fiduciary Income Tax Principles and II.I.9 Elections or Timing Strategies to Consider to Minimize the 3.8% Tax on NII.

Rev. Proc. 2023-34, § 3.01 provides that the 37% top noncorporate income rate on ordinary income applies to the following taxpayers at the following 2024 taxable incomes:

• Married Individuals Filing Joint Returns and Surviving Spouses	$731,200
• Heads of Households	$609,350
• Unmarried Individuals (other than Surviving Spouses and Heads of Households)	$609,350
• Married Individuals Filing Separate Returns	$365,600
• Estates and Trusts	$ 15,200

Rev. Proc. 2023-34, § 3.02, "Unearned Income of Minor Children (the "Kiddie Tax")," provides:

> For taxable years beginning in 2024, the amount in § 1(g)(4)(A)(ii)(I), which is used to reduce the net unearned income reported on the child's return that is subject to the "kiddie tax," is $1,300. This $1,300 amount is the same as the amount provided in § 63(c)(5)(A), as adjusted for inflation. The same $1,300 amount is used for purposes of § 1(g)(7) to determine whether a parent may elect to include a child's gross income in the parent's gross income and to calculate the "kiddie tax." For example, one of the requirements for the parental election is that a child's gross income is more than the amount referenced in § 1(g)(4)(A)(ii)(I) but less than 10 times that amount; thus, a child's gross income for 2024 must be more than $1,300 but less than $13,000.

Rev. Proc. 2023-34, § 3.03, "Maximum Capital Gains Rate," provides:

> For taxable years beginning in 2024, the maximum zero rate amounts and maximum 15 percent rate amounts under § 1(j)(5)(B), as adjusted for inflation, are as follows:

Filing Status	Maximum Zero Rate Amount	Maximum 15% Rate Amount
Married Individuals Filing Joint Returns and Surviving Spouse	$94,050	$583,750
Married Individuals Filing Separate Returns	$47,025	$291,850

[2493] See part II.J.8.f.i.(a) Allocating Deductions to Various Income Items, especially fn. 2817.

Filing Status	Maximum Zero Rate Amount	Maximum 15% Rate Amount
Heads of Household	$63,000	$551,350
All Other Individuals	$47,025	$518,900
Estates and Trusts	$ 3,150	$ 15,450

Rev. Proc. 2023-34, § 3.27, "Qualified Business Income," provides that for taxable years beginning in 2024, the threshold amount under Code § 199A(e)(2) is $383,900 for married filing joint returns, $191,950 for married filing separate returns, and $191,950 for all other returns.

II.J.3.a. Who Is Best Taxed on Gross Income

Increased adjusted gross income (AGI) might cause a beneficiary to lose tax benefits, effectively increasing the beneficiary's marginal income tax rate. Therefore, even if the trust and beneficiary have the same nominal rate, the beneficiary might have a higher effective tax rate. Increased beneficiary AGI can cause the following tax detriments:

- Reduction in Particular Itemized Deductions. Itemized deductions such as medical expenses and casualty losses are reduced as AGI increases.

- Phase Out of AMT Exemption. The alternative minimum tax exemption is phased out and eventually eliminated once income exceeds certain limits.

- Net Investment Income (NII) Tax.

    - Once an individual's income exceeds certain thresholds, NII tax applies.[2494] Although a trust's income quickly becomes subject to the NII tax, the threshold for an individual is much higher.

    - NII tax applies to passive income.[2495] The trustee of a nongrantor trust might not be a suitable person to participate sufficiently to avoid the income being characterized as passive, and the rules governing whether a trustee's work constitutes participation are challenging to apply.[2496] If the trust is a grantor trust, the deemed owner's work is what counts while that person is the deemed owner,[2497] although the trustee's work might be important to set the stage for future nonpassive treatment.[2498] For a nongrantor trust,

---

[2494] See part II.I.3 Tax Based on NII in Excess of Thresholds.
[2495] See part II.I.8 Application of 3.8% Tax to Business Income.
[2496] See part II.K.2.b Participation by an Estate or Nongrantor Trust.
[2497] See part II.I.7 Interaction of NII Tax with Fiduciary Income Tax Principles, especially fn. 2318.
[2498] The trust will cease to be a grantor trust when the deemed owner dies, if the grantor trust powers are not turned off before then. If a QSST sells its S corporation stock, the sale is taxed to the trust rather than to the beneficiary. Consider having the trustee work in the business to try to establish participation, looking toward those events. See parts II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax), II.J.16 Fiduciary Income Taxation When Selling Interest in a Pass-Through Entity or When the Entity Sells Its Assets, and II.J.17 Planning for Grantor and Nongrantor Trusts Holding Stock in S Corporations in Light of the 3.8% Tax.

beneficiary's participation should count for depreciation but does not count for other items of business income.[2499]

- If the beneficiary is charitably inclined, the trust and beneficiary can avoid NII tax by the trust instead of the beneficiary making charitable contributions.[2500]

If the trust has business income, consider planning opportunities described in part II.E.1.f Trusts/Estates and the Code § 199A Deduction.

Also, consider whether the trust or the beneficiary has capital loss (or, less likely but still possible, net operating loss) carryovers against which to offset trust income.

II.J.3.b. Effect of Kiddie Tax on Rates

Code § 1(g) requires the tax of certain children, including certain students who have not attained age 24 as of the close of such calendar year, to compute their income tax based on their parents' rates.

However, no comparable rule applies to computing children's 3.8% net investment income tax.[2501]

Thus, shifting income to children subject to the kiddie tax can still result in tax savings.

II.J.3.c. Who Is Benefits the Most from Losses

See also part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good, discussing a trade-off between NII tax and regular income if the business has enough potential for ups and downs in its taxable income that planning for a potential significant loss becomes important.

II.J.3.d. Who Benefits Most from Deductions

Consider that generally the fiduciary income tax system allows nongrantor trusts[2502] to net deductions against income before allocating income to beneficiaries. Thus, incurring expenses at the trust level provides benefits similar to trapping income inside trusts described in part II.J.3.a Who Is Best Taxed on Gross Income. However, depreciation deductions may pass through directly to beneficiaries, and trusts cannot use Code § 179 to expense assets but instead need to rely on bonus depreciation.[2503]

[2499] See part II.K.2.b.iv Character of Passive Activities Flowing from Nongrantor Trust to a Beneficiary; Interaction with Special Depreciation Rules.
[2500] Individuals cannot deduct charitable contributions against NII (the charitable deduction is not listed in part II.I.6 Deductions Against NII), but trusts can. See part II.I.7 Interaction of NII Tax with Fiduciary Income Tax Principles, especially fn. 2324.
[2501] For thresholds, see part II.I.3 Tax Based on NII in Excess of Thresholds.
[2502] Reg. § 1.67-2T(g)(1) prevents grantor trusts from netting deductions.
[2503] Depreciation and similar deductions are an exception to this rule. See part II.J.11.a Depreciation Advantages and Disadvantages.

Note that miscellaneous itemized deductions are disallowed for any taxable year beginning after December 31, 2017 and before January 1, 2026.[2504] Reg. § 1.67-4(b)(4), "Investment advisory fees," provides that most investment advisory fees are miscellaneous itemized deductions:[2505]

> Fees for investment advice (including any related services that would be provided to any individual investor as part of an investment advisory fee) are incurred commonly or customarily by a hypothetical individual investor and therefore are subject to the 2-percent floor. However, certain incremental costs of investment advice beyond the amount that normally would be charged to an individual investor are not subject to the 2-percent floor. For this purpose, such an incremental cost is a special, additional charge that is added solely because the investment advice is rendered to a trust or estate rather than to an individual or attributable to an unusual investment objective or the need for a specialized balancing of the interests of various parties (beyond the usual balancing of the varying interests of current beneficiaries and remaindermen) such that a reasonable comparison with individual investors would be improper. The portion of the investment advisory fees not subject to the 2-percent floor by reason of the preceding sentence is limited to the amount of those fees, if any, that exceeds the fees normally charged to an individual investor.

However, favorable treatment is provided deductions for costs which are paid or incurred in connection with the administration of the estate or trust and which would not have been incurred if the property were not held in such trust or estate.[2506] Reg. § 1.67-4, "Costs paid or incurred by estates or non-grantor trusts," provides in subsection (a), "Deductions":[2507]

[2504] See part II.G.4.n Itemized Deductions; Deductions Disallowed for Purposes of the Alternative Minimum Tax.

[2505] To try to get much more tax benefit from such fees, see part II.G.4.l.i.(e) Family Office as a Trade or Business

[2506] Code § 67(e)(1), which regulations narrow the definition more than one might have otherwise thought.

[2507] The preamble to T.D. 9918 (10/19/2020), explains:

> Section 67(g) was added to the Code on December 22, 2017, by section 11045(a) of Public Law 115-97, 131 Stat. 2054, 2088 (2017), commonly referred to as the Tax Cuts and Jobs Act (TCJA). Section 67(g) prohibits individual taxpayers from claiming miscellaneous itemized deductions for any taxable year beginning after December 31, 2017, and before January 1, 2026. Prior to the TCJA, miscellaneous itemized deductions were allowable for any taxable year only to the extent that the sum of such deductions exceeded two percent of adjusted gross income. See section 67(a). Section 67(b) defines miscellaneous itemized deductions as itemized deductions other than those listed in section 67(b)(1) through (12).
>
> Section 67(e) provides that, for purposes of section 67, an estate or trust computes its adjusted gross income in the same manner as that of an individual, except that the following additional deductions are treated as allowable in arriving at adjusted gross income: (1) The deductions for costs which are paid or incurred in connection with the administration of the estate or trust and which would not have been incurred if the property were not held in such estate or trust, and (2) deductions allowable under section 642(b) (concerning the personal exemption of an estate or non-grantor trust), section 651 (concerning the deduction for trusts distributing current income), and section 661 (concerning the deduction for estates and trusts accumulating income). Accordingly, section 67(e) removes the deductions described in section 67(e)(1) and (2) from the definition of itemized deductions under section 63(d), and thus from the definition of miscellaneous itemized deductions under section 67(b), and treats them as deductions allowable in arriving at adjusted gross income under section 62(a). Section 67(e) further provides regulatory

(1) *Section 67(e) deductions.*

(i) *In general*. An estate or trust (including the S portion of an electing small business trust) not described in § 1.67-2T(g)(1)(i) (a non-grantor trust) must compute its adjusted gross income in the same manner as an individual, except that the following deductions (section 67(e) deductions) are allowed in arriving at adjusted gross income:

(A) Costs that are paid or incurred in connection with the administration of the estate or trust that would not have been incurred if the property were not held in such estate or trust; and

(B) Deductions allowable under section 642(b) (relating to the personal exemption) and sections 651 and 661 (relating to distributions).

(ii) *Not disallowed under section 67(g)*. Section 67(e) deductions are not itemized deductions under section 63(d) and are not miscellaneous itemized deductions under section 67(b). Therefore, section 67(e) deductions are not disallowed under section 67(g).

(2) *Deductions subject to 2-percent floor.* A cost is not a section 67(e) deduction and thus is subject to both the 2-percent floor in section 67(a) and section 67(g) to the extent that it is included in the definition of miscellaneous itemized deductions under section 67(b), is incurred by an estate or non-grantor trust (including the S portion of an electing small business trust), and commonly or customarily would be incurred by a hypothetical individual holding the same property.

---

authority to make appropriate adjustments in the application of part I of subchapter J of chapter 1 of the Code to take into account the provisions of section 67.

The proposed regulations under § 1.67-4 clarify that expenses described in section 67(e) remain deductible in determining the adjusted gross income of an estate or non-grantor trust during the taxable years in which section 67(g) applies. Accordingly, section 67(g) does not deny an estate or non-grantor trust (including the S portion of an electing small business trust) a deduction for expenses described in section 67(e)(1) and (2) because such deductions are allowable in arriving at adjusted gross income and are not miscellaneous itemized deductions under section 67(b). Commenters agreed with the proposed amendments. These regulations adopt the proposed regulations under § 1.67-4 without modification.

Two commenters requested that the regulations address the treatment of deductions described in section 67(e)(1) and (2) in determining an estate or non-grantor trust's income for alternative minimum tax (AMT) purposes. The commenters suggested that such deductions are allowable as deductible in computing the AMT. The treatment of deductions described in section 67(e) for purposes of determining the AMT is outside the scope of these regulations concerning the effects of section 67(g); therefore, these regulations do not address the AMT. Further, no conclusions should be drawn from the absence of a discussion of the AMT in these regulations regarding the treatment of deductions described in section 67(e) for purposes of determining the AMT.

One commenter suggested that the Treasury Department and the IRS exercise their regulatory authority under section 67(e) to exempt cemetery trusts under section 642(i) and qualified funeral trusts (QFTs) under section 685 from the application of section 67(g)….

The Treasury Department and the IRS continue to consider these comments but providing an exemption for cemetery and funeral trusts under section 67(g) is outside the scope of these regulations.

For further explanation, T.D. 9918 (10/19/2020), the preamble to Reg. § 1.67-4(a), said:

A. Section 67

Section 67(g) was added to the Code on December 22, 2017, by section 11045(a) of Public Law 115-97, 131 Stat. 2054, 2088 (2017), commonly referred to as the Tax Cuts and Jobs Act (TCJA). Section 67(g) prohibits individual taxpayers from claiming miscellaneous itemized deductions for any taxable year beginning after December 31, 2017, and before January 1, 2026. Prior to the TCJA, miscellaneous itemized deductions were allowable for any taxable year only to the extent that the sum of such deductions exceeded two percent of adjusted gross income. See section 67(a). Section 67(b) defines miscellaneous itemized deductions as itemized deductions other than those listed in section 67(b)(1) through (12).

Section 67(e) provides that, for purposes of section 67, an estate or trust computes its adjusted gross income in the same manner as that of an individual, except that the following additional deductions are treated as allowable in arriving at adjusted gross income: (1) The deductions for costs which are paid or incurred in connection with the administration of the estate or trust and which would not have been incurred if the property were not held in such estate or trust, and (2) deductions allowable under section 642(b) (concerning the personal exemption of an estate or non-grantor trust), section 651 (concerning the deduction for trusts distributing current income), and section 661 (concerning the deduction for estates and trusts accumulating income). Accordingly, section 67(e) removes the deductions described in section 67(e)(1) and (2) from the definition of itemized deductions under section 63(d), and thus from the definition of miscellaneous itemized deductions under section 67(b), and treats them as deductions allowable in arriving at adjusted gross income under section 62(a). Section 67(e) further provides regulatory authority to make appropriate adjustments in the application of part I of subchapter J of chapter 1 of the Code to take into account the provisions of section 67.

The proposed regulations under § 1.67-4 clarify that expenses described in section 67(e) remain deductible in determining the adjusted gross income of an estate or non-grantor trust during the taxable years in which section 67(g) applies. Accordingly, section 67(g) does not deny an estate or non-grantor trust (including the S portion of an electing small business trust) a deduction for expenses described in section 67(e)(1) and (2) because such deductions are allowable in arriving at adjusted gross income and are not miscellaneous itemized deductions under section 67(b). Commenters agreed with the proposed amendments. These regulations adopt the proposed regulations under § 1.67-4 without modification.

Two commenters requested that the regulations address the treatment of deductions described in section 67(e)(1) and (2) in determining an estate or non-grantor trust's income for alternative minimum tax (AMT) purposes. The commenters suggested that such deductions are allowable as deductible in computing the AMT. The treatment of deductions described in section 67(e) for purposes of determining the AMT is outside the scope of these regulations concerning the effects of section 67(g); therefore, these regulations do not address the AMT. Further, no conclusions should be drawn from the absence of a discussion of the AMT in these regulations regarding the treatment of deductions described in section 67(e) for purposes of determining the AMT.

One commenter suggested that the Treasury Department and the IRS exercise their regulatory authority under section 67(e) to exempt cemetery trusts under section 642(i) and qualified funeral trusts (QFTs) under section 685 from the application of section 67(g). The commenter stated that the primary type of expense incurred by these trusts is investment advisory expenses, the tax treatment of which differs under the Code from management expense. That is, trust management expenses generally are allowable in computing adjusted gross income under section 67(e)(1), while trust investment advisory expenses are miscellaneous itemized deductions. See § 1.67-4(b)(4). The commenter asserted that it was not the intent of Congress to disallow investment advisory expenses incurred by cemetery and funeral trusts when Congress enacted section 67(g).

The commenter suggested that exercising the regulatory authority under section 67(e) in this manner would be consistent with the exercise of regulatory authority under section 1411 to exempt section 642(i) cemetery perpetual care funds and QFTs. See § 1.1411-3(b)(1) (providing that certain types of trusts, including section 642(i) cemetery perpetual care funds, are excepted from the net investment income tax) and § 1.1411-3(b)(2) (providing a special rule for QFTs that, for purposes of calculating any tax under section 1411, section 1411 and the regulations thereunder are applied to each QFT by treating each beneficiary's interest in the trust as a separate trust). As stated in the preamble to TD 9644 (78 FR 72393), the Treasury Department and the IRS exercised their regulatory authority under section 1411 to exclude cemetery trusts from the net investment income tax because, by benefiting an operating company, such trusts are considered similar to the business trusts that are excluded from the operation of section 1411. The preamble also states that QFTs are not excluded from the application of the net income investment tax, but that the section 1411 tax is calculated consistent with the taxation of QFTs under chapter 1. The commenter noted that they advocated the treatment of each beneficiary's interest in the QFT as a separate trust because such treatment reduces the likelihood of the QFT beneficiaries being subject to the net investment income tax. The Treasury Department and the IRS continue to consider these comments but providing an exemption for cemetery and funeral trusts under section 67(g) is outside the scope of these regulations.

Unfortunately, this favorable treatment does not apply to grantor trusts.[2508]

For any taxable year beginning after December 31, 2017 and before January 1, 2026, Code § 164(b)(6) limits an individual's (and a trust's, which are the same as an individual's except as provided otherwise) deductions for state taxes to $10,000 ($5,000 for individuals who are married filing separately), but it does not apply this limit to property taxes attributable to a Code § 212 trade or business (which generally would be rental real estate, if it is a trade or business).[2509] Suppose an individual is the beneficiary of a nongrantor trust that pays $10,000 in state taxes, and the individual pays $10,000 in state taxes. The individual and trust would deduct a total of $20,000 of state taxes. However, if the trust were a grantor trust, then only one $10,000 amount – the individual's – would apply. Splitting income among multiple trusts may generate more entities with up to $10,000 state income tax deductions, but beware part II.J.9.c.i Multiple Trusts Created for Tax Avoidance.

[2508] Code § 67(c)(1), which Reg. § 1.67-2T(e)(3) applies to grantor trusts.
[2509] Income taxes attributable to a trade or business remain subject to the $10,000 limit. For more details about my comment on real estate as a trade or business, see part II.E.1.e Whether Real Estate Qualifies as a Trade or Business.

Charitable deductions often produce more benefit to a trust than to an individual.[2510]

Certain losses from the sale of small business stock[2511] are not available to nongrantor trusts,[2512] so grantor trust planning might be considered for that asset. Similarly, depreciation deductions allocated to the remaindermen of a nongrantor trust that is included in the grantor's or beneficiary's estate reduce the basis step-up; presumably this rule would not apply to a grantor trust.[2513]

II.J.3.e. State and Local Income Tax

II.J.3.e.i. Strategic State & Local Tax Issues re: Residence

Consider whether income trapped inside a trust might be taxed at a lower state and local income tax rate (or entirely exempt from such tax) than income reported on a beneficiary's income tax return.

Generally, states do not tax nonbusiness income earned by a nonresident trust. Some high income-tax states fail to tax income earned by trusts set up by their residents that are administered in other jurisdictions, which has led to the creation of incomplete gift nongrantor (ING) trusts to cause capital gain from investments to avoid state income tax.[2514] An ING trust typically uses a distribution committee that is an "adverse party" for income tax purposes, avoiding application of the Code § 674 grantor trust rules,[2515] yet for transfer tax purposes is not "adverse," causing the gift to be incomplete.[2516] Rev. Proc. 2020-3 imposes requirements on the distribution committee before the IRS will issue a private letter ruling.[2517] If a married couple

---

2510 See part II.J.4.c Charitable Distributions, text accompanying fn 2572.

2511 See part II.Q.7.l Special Provisions for Loss on the Sale of Stock in a Corporation under Code § 1244.

2512 See part II.J.11.b Code § 1244 Treatment Not Available for Trusts.

2513 See part II.H.2.d Caution re: Depreciable Property Held in a Nongrantor Trust That Is Included in the Grantor's, Surviving Spouse's, or Other Beneficiary's Estate.

2514 "Incomplete nongrantor" is abbreviated ING, so one often hears of DING (Delaware ING) or NING (Nevada ING) trusts, even though the strategy is available for trusts established in other states (including Missouri). Private letter rulings approving such trusts treat certain trustees as adverse for income tax but not gift tax purposes without explaining how those conditions can coexist.

Now I have some silly comments to add spice to your day:

- Suppose your DING also has some asset protection features. It might be a bankruptcy avoidance trust (BAT). Being a DING-BAT, it was referred to frequently in the TV series, "All in the Family."
- Suppose you have a Missouri ING, and to the extent the grantor allocates GST exemption at death it terminates in favor of a perpetual trust. This MING Dynasty Trust might be appropriate to hold 13th century Chinese artifacts.

2515 See part III.B.2.h.vii.(a) Distribution Provisions Resulting from Control Causing Grantor Trust Treatment.

2516 *Income Taxation of Fiduciaries & Beneficiaries by Abbin*, CCH, § 1407.1.7 No Grantor Trust Status Even Though Transfer Was Incomplete Gift, citing Letter Rulings 201310002-201310006, 201410001-201410010, 201430003-201430007, 201550005-201550012, 201636027, 201650005, 201653001-201653009, 201718003-201718010, 201729009, 201742006, 201744006-201744008, and 201751001-201751003, as well as earlier rulings.

2517 Rev. Proc. 2020-3, § 3.01(93), "Section 671.—Trust Income, Deductions, and Credits Attributable to Grantors and Others as Substantial Owners," says that the IRS will not rule on the following:

> Whether any portion of the items of income, deduction, and credit against tax of the trust will be included in computing under § 671 the taxable income, deductions and credits of grantors when distributions of income or corpus are made – (A) at the direction of a committee, with or without

transfers community property to an ING and that property retains its character as community property, then that community property will receive a new basis for both halves.[2518]

Consider whether:

- The trustee could have minimized tax by moving the trust.

- By changing residence, the trustee has subjected the trust to income tax. Sometimes a trustee moves, doesn't realize that the move subjects the trust to fiduciary income tax, fails to file, then makes the trust liable for not only tax but also interest and penalties.

Consider preparing and updating a contacts list for the trust to see what contacts the trust has with which states and whether that can generate state income tax liability or whether contacts can be changed to reduce or eliminate state income tax.

Before making a Code § 645 election to treat a revocable trust as an estate, consider whether that will subject the trust (and trusts created upon its funding) to state income tax.[2519]

> the participation of the grantor, and (1) a majority or unanimous agreement of the committee over trust distributions is not required, (2) the committee consists of fewer than two persons other than a grantor and a grantor's spouse; or (3) all of the committee members are not beneficiaries (or guardians of beneficiaries) to whom all or a portion of the income and principal can be distributed at the direction of the committee or (B) at the direction of, or with the consent of, an adverse party or parties, whether named or unnamed under the trust document (unless distributions are at the direction of a committee that is not described in paragraph (A) of this section).

[2518] Letter Ruling 201850001 concluded:

> Grantors are married and reside in State 2, a community property state. Trust provides that all transferred property to Trust is community property. Moreover, any and all property transferred to Trust prior to the death of the Predeceased Grantor is and shall retain its character as community property. As concluded above, upon the death of each of Grantor, his or her respective interest in Trust as either the Predeceased Grantor or the Surviving Grantor will be includible in his or her respective gross estate for federal estate tax purposes.
>
> Accordingly, based upon the facts submitted and representations made, we conclude that the basis of all community property in Trust on the date of death of the Predeceased Grantor will receive an adjustment in basis to the fair market value of such property at the date of death of the Predeceased Grantor.

Companion rulings concluding to the same effect are Letter Rulings 201850002-201850006.

[2519]See fn. 2724, found in part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI)

Although the discussion below generally refers to trusts, generally it applies to estates as well. If a trustee has discretion to make an election regarding that trust, the election does not affect the choices available regarding other trusts the trustee manages.

I.A.1.a. Capital Gain Constitutes DNI Unless Excluded

Taxable income is DNI unless expressly excluded.

Code § 643(a)(3) provides:

> *Capital gains and losses*. Gains from the sale or exchange of capital assets shall be excluded to the extent that such gains are allocated to corpus and are not (A) paid, credited, or required to be distributed to any beneficiary during the taxable year, or

(B) paid, permanently set aside, or to be used for the purposes specified in section 642(c).

Thus, to be excluded from the income of a domestic trust, the gains must:

- Arise from the sale or exchange of capital assets,
- Be allocated to corpus, and
- Not be actually or deemed to be distributed.

The rest of this part II.J.8.a Capital Gain Constitutes DNI Unless Excluded focuses on the first two prongs.

I.A.1.a.i. Whether the Capital Gain Is from the Sale or Exchange of a Capital Asset

Only gains from the sale of capital assets are ordinarily excluded from DNI.

For example, "property, used in his trade or business, of a character which is subject to the allowance for depreciation provided in section 167, or real property used in his trade or business" is not a capital asset. Therefore, the sale of such property would constitute DNI, although it would not constitute trust accounting income. Whether other real estate is a capital asset depends on various facts.

However, "any recognized gain on the sale or exchange of property used in the trade or business" often receives capital gain treatment to the extent it does not constitute certain depreciation recapture. Goodwill that has not been amortized is a capital asset, but goodwill that is being amortized is not a capital asset. Thus, because such assets are not capital assets, such capital gains generally would be included in DNI.

I.A.1.a.ii. Whether the Gain from the Sale or Exchange of a Capital Asset Is Allocated to Corpus

I am unaware of any authority defining "allocated to corpus" as used in Code § 643(a)(3). Presumably it means receipts by the trust that are allocated to principal.

Does the statute mean that capital gain are automatically included in DNI unless they are affirmatively allocated to principal and certain other conditions exist? Reg. § 1.643(a)-3(a) might overrule that requirement, providing (highlighting added):

> *In general*. Except as provided in § 1.643(a)-6 and paragraph (b) of this section, gains from the sale or exchange of capital assets are ordinarily excluded from distributable net income and are not ordinarily considered as paid, credited, or required to be distributed to any beneficiary.

This regulation essentially has three parts:

- Reg. § 1.643(a)-6 deals with foreign trusts.

- Reg. § 1.643(a)-3(b) explains when capital gains from the sale or exchange of an asset are included in DNI and does not include a requirement that the capital gain be allocated to principal. In fact, one of the prongs discusses the treatment when capital gains are allocated to income.

- Depending on the meaning one gives to "ordinarily," this regulation might dispense with the statutory requirement that capital gains be allocated to corpus. The regulation does not explain when it says "ordinarily" what the exceptions might be, other than Reg. §§ 1.643(a)-6 and 1.643(a)-3(b). There would appear to be substantial authority for saying that an affirmative allocation of capital gains to principal is or is not required.

This issue seems to be most important for the trust's gross income that does not take the form of receipts of cash or other property. For example, a trust might invest in a partnership, S corporation, or other flow-through entity that does not distribute all of its taxable income. How should one treat capital gain from a flow-through entity's sale of a capital asset, when the entity distributes less than all of its taxable income? Should the undistributed capital gain be included in DNI?

- With respect to the accumulated capital gain, the trust has no receipts and therefore is not allocated to corpus. Arguably, the capital gain is not excluded from DNI and therefore constitutes DNI.

- On the other hand, the accumulated capital gain benefits the trust's corpus. Should it be treated as if it had been allocated to corpus? In that case, should it be trapped inside the trust, given that it was accumulated inside the entity and not distributed to the beneficiary?

- Given this uncertainty, would the trustee have discretion to take a different position each year? In Reg. § 1.643(a)-3(b), the Treasury generally agreed that the trustee would not be required to take a consistent position year-by-year, except for capital gain allocated to corpus and treated consistently by the fiduciary on the trust's books, records, and tax returns as part of a distribution to a beneficiary. Given that this gross income was not allocated corpus (because it was never physically received), perhaps the trustee has discretion to vary the treatment from year to year? Another approach might be to say that, because the undistributed capital gain was not allocated to principal, the regulations might presume that the undistributed capital gain is allocated to income and can be included in DNI inconsistently from year to year under Reg. § 1.643(a)-3(b)(1).

If all of a flow-through entity's K-1 items taxable to the trust are included in DNI, then part II.J.8.c Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal might cause ordinary income to be trapped at the trust level if the flow-through entity distributes cash in an amount less than all of these K-1 items; see part II.J.8.f Consequences of Allocating Capital Gain to DNI. In light of the consequences described there, the most taxpayer-favorable reading may be that capital gain is ordinarily excluded from DNI.

I leave it to the reader to decide which approach is "better" or perhaps to make that decision on a trust-by-trust basis.

For more on using flow-through entities, see part II.J.8.e Partnerships and S corporations Carry Out Income and Capital Gain to Beneficiaries.

I.A.1.b. Should Capital Gain Be Allocated to DNI?

Often beneficiaries have income below the thresholds that cause the 3.8% tax and the additional 5% capital gain tax to be incurred, whereas trusts start paying those taxes at relatively modest income levels. Therefore, distributing capital gains to beneficiaries might be beneficial – at least from an income tax viewpoint.

Consider various factors described in part II.J.3 Strategic Fiduciary Income Tax Planning.

I.A.1.c. Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal

Generally, gains from the sale or exchange of capital assets, net of losses, are excluded from distributable net income (DNI). But that statement belies the flexibility we are about to see.

Reg. § 1.643(a)-3(b) provides:

> *Capital gains included in distributable net income*. Gains from the sale or exchange of capital assets are included in distributable net income to the extent they are, pursuant to the terms of the governing instrument and applicable local law, or pursuant to a reasonable and impartial exercise of discretion by the fiduciary (in accordance with a power granted to the fiduciary by applicable local law or by the governing instrument if not prohibited by applicable local law) -
>
> (1) Allocated to income (but if income under the state statute is defined as, or consists of, a unitrust amount, a discretionary power to allocate gains to income must also be exercised consistently and the amount so allocated may not be greater than the excess of the unitrust amount over the amount of distributable net income determined without regard to this subparagraph § 1.643(a)-3(b));
>
> (2) Allocated to corpus but treated consistently by the fiduciary on the trust's books, records, and tax returns as part of a distribution to a beneficiary; or
>
> (3) Allocated to corpus but actually distributed to the beneficiary or utilized by the fiduciary in determining the amount that is distributed or required to be distributed to a beneficiary.

Note the word "or" after paragraph (2) above. That indicates capital gains are included in DNI if and to the extent that any one or more of paragraph (1) (the "Income Rule"), paragraph (2) (the "Consistent Principal Rule"), or paragraph (3) (the "Discretionary Principal Rule") applies. For more on the:

- Income Rule, see part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law

- Consistent Principal Rule, see part II.J.8.c.ii Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary

- Discretionary Principal Rule, see part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary.

Before its amendment by T.D. 9102 (12/30/2003), Reg. § 1.643(a)-3 made it more difficult to include capital gain in DNI.

I.A.1.c.i. Income Rule: Capital Gain Allocated to Income Under State Law

Most states have adopted the Uniform Principal and Income Act, which will be referred to at UPIA for the rest of this part II.J.8.c.i, or its replacement, which is described in part II.J.5.b Uniform Fiduciary Income & Principal Act (UFIPA).

Generally, any capital gain included as the distributive share of income from a partnership or S corporation and distributed from the entity to the trust will constitute income under the Act, making the rest of this part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI) be moot.

Generally, the Act allocates capital gains to principal. The main exceptions are the power to adjust, unitrust distributions, and exceptions in the governing instrument; the power to adjust and power to convert to a unitrust followed adoption of the prudent investor rule. Following a discussion of each of these is a discussion of the respect fiduciary income tax law gives them.

I.A.1.c.i.(a). Power to Adjust

Capital gains may be reclassified as income if traditional trust accounting income principles cause insufficient receipts to be classified as income. See parts II.J.5.b.ii.(a) Power to Adjust.

I.A.1.c.i.(b). Possible Allocation to Income of Gain on Sale of Interest in Partnership or S corporation

It is not uncommon for partnerships and S corporations to reinvest part of their annual income; indeed, to facilitate growth or simply a stronger capital structure (which lenders might require), many distribute only enough to pay their owners' income taxes (commonly referred to as a "tax distribution") plus a modest bonus (referred to below as a "bonus distribution").

Taxes on this reinvested income are charged against the income of a trust that owns such an entity. This is the only practical solution to the trust's obligation to pay its taxes, because the taxing authorities' claims against the trustee are much more pressing than the beneficiaries' claims. (Note that the income beneficiary of a Qualified Subchapter S Trust pays this tax – part III.A.3.e QSSTs and ESBTs – which has an effect similar to charging the trust's income.)

The Uniform Principal and Income Act includes a remedy for the income beneficiary that had to pay the tax on the entity's accumulated income that has been inherently baked into principal. Section 506(a)(3) authorizes a fiduciary to "make adjustments between principal and income to offset the shifting of economic interests or tax benefits between income beneficiaries and remainder beneficiaries which arise from … the ownership by an estate or trust of an interest in an entity whose taxable income, whether or not distributed, is includable in the taxable income of the estate, trust, or a beneficiary." This specific provision supplements any power to adjust that might generally apply.

Thus, when an interest in a partnership or an S corporation is sold, the trustee should consider whether to allocate some of the sale proceeds to income. However, it's not at all obvious that the trustee should make an adjustment; consider that:

- The entity made distributions specifically to pay this tax, so the trust or income beneficiary was not really "out of pocket" for this tax.

- If the entity had been a C corporation, the entity would have paid the tax itself. Its dividend would have equaled the bonus distribution, and this issue would never have arisen.

- The true issue is whether the bonus distribution was sufficient. Was the decision to accumulate income fair – a sound exercise of the business judgment of those who run the entity? Did those who control the entity promise a make-up distribution at some point because of a special project, or was the accumulation merely part of a solid plan to grow the business, which presumably would result in increased income and increased bonus distributions? Were those who control the entity running it just to benefit themselves (and, if owners, trying to extract more benefits as owners than the inactive owners received)? I have probably left out many other relevant considerations, but hopefully I have communicated why this decision is not easy.

See parts II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the Trust Accounting Rules and II.J.16 Fiduciary Income Taxation When Selling Interest in a Pass-Through Entity or When the Entity Sells Its Assets.

If the trustee is concerned that the income beneficiary might spend a perceived windfall unwisely, the trustee might consider using the power to adjust to spread distributions over an appropriate period of time. Such a spread over time might be more palatable if, instead of labelling the adjustment to sale proceeds as a tax reimbursement, the trustee labelled it as a make-up for insufficient bonus distributions, taking the position that future distributions to beneficiaries might be loosened because of a prior conservative distribution policy. The bonus distributions might have been sufficient from the viewpoint of what the entity should have distributed but might have been insufficient from the viewpoint of how much income the trustee should have tried to generate. As mentioned in part III.A.4.d.iv Advising Clients about the UPAIA § 505 Change and UFIPA § 506 (discussing conflicts with beneficiaries that might arise when an entity makes tax distributions but little or no bonus distributions), these issues have no easy answer.

See also part II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the Trust Accounting Rules.

I.A.1.c.i.(c). Unitrust

A unitrust is a trust that distributes fixed amounts, redetermined annually as a fixed percentage of the value of the trust's value, which value is redetermined annually but might be based on an average of values, such as the average value of the trust's assets for the past three years. See parts II.J.5.b.ii.(b) Unitrust and II.J.5.b.ii.(c) Comparing Power to Adjust to a Unitrust.

Reg. § 1.643(a)-3(e) provides the following examples regarding unitrusts:

> *Example (11)*. The applicable state statute provides that a trustee may make an election to pay an income beneficiary an amount equal to four percent of the fair market value of the trust assets, as determined at the beginning of each taxable year, in full satisfaction of that beneficiary's right to income. State statute also provides that this unitrust amount shall be considered paid first from ordinary and tax-exempt income, then from net short-term capital gain, then from net long-term capital gain, and finally from return of principal. Trust's governing instrument provides that A is to receive each year income as defined under state statute. Trustee makes the unitrust election under state statute. At the beginning of the taxable year, Trust assets are valued at $500,000. During the year, Trust receives $5,000 of dividend income and realizes $80,000 of net long-term gain from the sale of capital assets. Trustee distributes to A $20,000 (4% of $500,000) in satisfaction of A's right to income. Net long-term capital gain in the amount of $15,000 is allocated to income pursuant to the ordering rule of the state statute and is included in distributable net income for the taxable year.
>
> *Example (12)*. The facts are the same as in Example 11, except that neither state statute nor Trust's governing instrument has an ordering rule for the character of the unitrust amount, but leaves such a decision to the discretion of Trustee. Trustee intends to follow a regular practice of treating principal, other than capital gain, as distributed to the beneficiary to the extent that the unitrust amount exceeds Trust's ordinary and tax-exempt income. Trustee evidences this treatment by not including any capital gains in distributable net income on Trust's Federal income tax return so that the entire $80,000 capital gain is taxed to Trust. This treatment of the capital gains is a reasonable exercise of Trustee's discretion. In future years Trustee must consistently follow this treatment of not allocating realized capital gains to income.
>
> *Example (13)*. The facts are the same as in Example 11, except that neither state statutes nor Trust's governing instrument has an ordering rule for the character of the unitrust amount, but leaves such a decision to the discretion of Trustee. Trustee intends to follow a regular practice of treating net capital gains as distributed to the beneficiary to the extent the unitrust amount exceeds Trust's ordinary and tax-exempt income. Trustee evidences this treatment by including $15,000 of the capital gain in distributable net income on Trust's Federal income tax return. This treatment of the capital gains is a reasonable exercise of Trustee's discretion. In future years Trustee must consistently treat realized capital gain, if any, as distributed to the beneficiary to the extent that the unitrust amount exceeds ordinary and tax-exempt income.

A right to income expressed initially solely as a unitrust interest may qualify for the QTIP marital deduction.

I.A.1.c.i.(d). Exceptions in the Governing Instrument

Although the Act provides general rules, it also allows trust agreements to override those rules:

> In allocating receipts and disbursements to or between principal and income, and with respect to any matter within the scope of [Articles] 2 and 3, a fiduciary:
>
> (1) shall administer a trust or estate in accordance with the terms of the trust or the will, even if there is a different provision in this [Act];
>
> (2) may administer a trust or estate by the exercise of a discretionary power of administration given to the fiduciary by the terms of the trust or the will, even if the exercise of the power produces a result different from a result required or permitted by this [Act];
>
> (3) shall administer a trust or estate in accordance with this [Act] if the terms of the trust or the will do not contain a different provision or do not give the fiduciary a discretionary power of administration; and
>
> (4) shall add a receipt or charge a disbursement to principal to the extent that the terms of the trust and this [Act] do not provide a rule for allocating the receipt or disbursement to or between principal and income.

I.A.1.c.i.(e). Fiduciary Income Tax Recognition of the Trust Agreement and State Law

Code § 643(b) generally defers to the trust agreement and applicable state law. The Uniform Principal and Income Act ("UPIA") and the Uniform Fiduciary Principal & Income Act ("UFIPA") authorizes the trust agreement to override the Act.

However, Reg. § 1.643(b)-1 does not recognize trust agreements that depart too far from the usual rules:

> Trust provisions that depart fundamentally from traditional principles of income and principal will generally not be recognized. For example, if a trust instrument directs that all the trust income shall be paid to the income beneficiary but defines ordinary dividends and interest as principal, the trust will not be considered one that under its governing instrument is required to distribute all its income currently for purposes of section 642(b) (relating to the personal exemption) and section 651 (relating to simple trusts). Thus, items such as dividends, interest, and rents are generally allocated to income and proceeds from the sale or exchange of trust assets are generally allocated to principal.

Reg. § 1.643(b)-1 respects variations provided under applicable state law:

> However, an allocation of amounts between income and principal pursuant to applicable local law will be respected if local law provides for a reasonable apportionment between the income and remainder beneficiaries of the total return of the trust for the year, including ordinary and tax-exempt income, capital gains, and appreciation. For example, a state statute providing that income is a unitrust amount of no less than 3% and no more than 5% of the fair market value of the trust assets, whether determined annually

> or averaged on a multiple year basis, is a reasonable apportionment of the total return of the trust. Similarly, a state statute that permits the trustee to make adjustments between income and principal to fulfill the trustee's duty of impartiality between the income and remainder beneficiaries is generally a reasonable apportionment of the total return of the trust. Generally, these adjustments are permitted by state statutes when the trustee invests and manages the trust assets under the state's prudent investor standard, the trust describes the amount that may or must be distributed to a beneficiary by referring to the trust's income, and the trustee after applying the state statutory rules regarding the allocation of receipts and disbursements to income and principal, is unable to administer the trust impartially. Allocations pursuant to methods prescribed by such state statutes for apportioning the total return of a trust between income and principal will be respected regardless of whether the trust provides that the income must be distributed to one or more beneficiaries or may be accumulated in whole or in part, and regardless of which alternate permitted method is actually used, provided the trust complies with all requirements of the state statute for switching methods.

Circling back to the Act's authorizing trust agreements to depart from traditional principles, Reg. § 1.643(b)-1 concludes with:

> In addition, an allocation to income of all or a part of the gains from the sale or exchange of trust assets will generally be respected if the allocation is made either pursuant to the terms of the governing instrument and applicable local law, or pursuant to a reasonable and impartial exercise of a discretionary power granted to the fiduciary by applicable local law or by the governing instrument, if not prohibited by applicable local law.

For the "reasonable and impartial exercise" requirement in the context of the power to adjust, see part II.J.5.b.ii.(a) Power to Adjust.

I often use a clause providing that the trustee has wide discretion but must reasonably and fairly balance the interests of the income and remainder beneficiaries. That language comes from the marital deduction regulations. Generally, the trustee's authority to allocate between income and principal does not trigger grantor trust status, does not constitute a power of appointment, and does not have generation-skipping transfer tax implications. The trustee might want to consider providing accountings or other notices to the beneficiaries that would start running the statute of limitations for making a claim against the trustee so that the beneficiaries could not add up all of their alleged grievances and then pile this one on top of it, which procedure might help minimize any gift tax consequences to failing to make a claim.

How does one draw the line between what departs "fundamentally from traditional principles of income and principal" and what is "a reasonable and impartial exercise of a discretionary power granted to the fiduciary" under Reg. § 1.643(b)-1?

Presumably, the trustee should be on solid ground in allocating to income capital gains such that the total amount of all receipts allocated to income does not exceed 5%, given that the regulations expressly approve unitrusts in the 3%-5% range. The trusts should also be on solid ground in allocating to income capital gains generated by a partnership that the settlor intended to distribute to the income beneficiary.

Beyond that, it's a matter of facts and circumstances and judgment. However, Reg. § 1.643(a)-3(e), Example (4) respected a mandatory allocation of capital gain to income where a trust had $5,000 of dividends and $10,000 of capital gains, and the trustee distributed $17,000 to the beneficiary.

I.A.1.c.i.(f). Conclusion Regarding Allocating Capital Gain to Income

Reg. § 1.643(a)-3(b)(1) requires a consistent practice for unitrusts. Considering that the unitrust recipient is receiving cash and presumably would have the liquidity to pay tax on any capital gains distributed to the beneficiary, in many cases it would be fair to allocate capital gain to DNI to the extent that the unitrust amount exceeds the income that would apply under the Act's general rules. Given that one provides for a unitrust when tension between the income beneficiary and remaindermen might be high, the tension created by this tax issue would be high to the same degree. Consider providing a firm rule in the trust agreement regarding the allocation of capital gain to DNI. If one is concerned that shifting tax rates might create an unfair tax result, consider providing a clause reimbursing the unitrust beneficiary for taxes paid on the unitrust and on the reimbursement; this requires cooperation between the trustee's income tax preparer and the beneficiary's income tax preparer, but the calculation should be relatively mechanical.

For trusts that are not unitrusts, Reg. § 1.643(a)-3(b)(1) provides significant flexibility, allowing the trustee discretion whether to allocate capital gain to income for fiduciary accounting purposes (if the trust agreement and state law permit) and also whether to include in DNI the capital gain that was allocated to income.

Consider the nuances for a mandatory income trust. Distributions must be made no later than 65 days after yearend to include capital gain in DNI in every other situation. In a mandatory income trust, a power to adjust might be able to retroactively include capital gain in income – perhaps as late as when the tax return is prepared. For how mandatory income trusts work, see part II.J.5 Mandatory Income Trusts. For limits on retroactivity, see part II.J.5.a Issues Arising with Mandatory Income Trusts.

I.A.1.c.ii. Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary

Reg. § 1.643(a)-3(e) helps guide our application of Reg. § 1.643(a)-3(b)(2):

> *Example (1)*. Under the terms of Trust's governing instrument, all income is to be paid to A for life. Trustee is given discretionary powers to invade principal for A's benefit and to deem discretionary distributions to be made from capital gains realized during the year. During Trust's first taxable year, Trust has $5,000 of dividend income and $10,000 of capital gain from the sale of securities. Pursuant to the terms of the governing instrument and applicable local law, Trustee allocates the $10,000 capital gain to principal. During the year, Trustee distributes to A $5,000, representing A's right to trust income. In addition, Trustee distributes to A $12,000, pursuant to the discretionary power to distribute principal. Trustee does not exercise the discretionary power to deem the discretionary distributions of principal as being paid from capital gains realized during the year. Therefore, the capital gains realized during the year are not included in distributable net income and the $10,000 of capital gain is taxed to the trust. In future

years, Trustee must treat all discretionary distributions as not being made from any realized capital gains.

Example (2). The facts are the same as in Example 1, except that Trustee intends to follow a regular practice of treating discretionary distributions of principal as being paid first from any net capital gains realized by Trust during the year. Trustee evidences this treatment by including the $10,000 capital gain in distributable net income on Trust's federal income tax return so that it is taxed to A. This treatment of the capital gains is a reasonable exercise of Trustee's discretion. In future years Trustee must treat all discretionary distributions as being made first from any realized capital gains.

Example (3). The facts are the same as in Example 1, except that Trustee intends to follow a regular practice of treating discretionary distributions of principal as being paid from any net capital gains realized by Trust during the year from the sale of certain specified assets or a particular class of investments. This treatment of capital gains is a reasonable exercise of Trustee's discretion.

The all-or-nothing approach taken by Examples (1) and (2) is not very attractive, but we need to deal with it. Let's consider some fact patterns:

1. <u>The beneficiary needs regular annual distributions that cannot be made using a power to adjust</u>. Generally, distributions in excess of what can made using a power to adjust would not be sustainable. A power to adjust typically adjusts to a 3%-5% distribution, and most models suggest that distributions in excess of that will lead to a trust being depleted. Thus, a more likely scenario is that a power to adjust is not available, because state law prevents using the power to adjust in particular situations (unless the trust agreement overrides it). In such a case, the beneficiary's federal and state/local income tax bracket for capital gains needs to be compared to the trust's federal and state/local income tax bracket for capital gains. Note that a nonresident trust would have a zero state/local income tax bracket, to the extent that the trust does not have income from a business sourced to the state/local jurisdiction.

2. <u>The beneficiary's need for distributions in excess of income is sporadic</u>. It's difficult to predict how the beneficiary's federal and state/local income tax bracket for capital gains compares to the trust's federal and state/local income tax bracket for capital gains, given that rates will change and the trust's and its beneficiaries' circumstances might change over time. In such a case, consider whether the distribution might be phrased as "allocated to corpus but actually distributed to the beneficiary or utilized by the fiduciary in determining the amount that is distributed or required to be distributed to a beneficiary." If that is likely to be the case, then consider not electing to carry out capital gain automatically under (b)(2) but rather deciding to rely on (b)(3), because (b)(3) is flexible whether to allocate capital gain to income, allowing the decision to made separately each year on a case-by-case basis.

Generally, trustees would not be likely to take advantage of the discretion that Example (3) provides to allocate to income only capital gain from the sale of certain specified assets or a particular class of investments, because such an election requires additional recordkeeping.

Some people point to the word "deem" in Example (1) and emphasize the need for such authority in the trust agreement or applicable state law. Uniform Trust Code § 816 generally authorizes trustees to make tax elections, so the authority to "deem" distributions to be capital gains is inherently authorized in UTC states, as well as any other state where a trustee generally has the authority to make tax elections.

I.A.1.c.iii. Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary

Reg. § 1.643(a)-3(b)(3) might seem confusing at first, but it actually has very practical use.

First, let's look at some examples that Reg. § 1.643(a)-3(e) provides:

> Example (5). The facts are the same as in Example 1, except that Trustee decides that discretionary distributions will be made only to the extent Trust has realized capital gains during the year and thus the discretionary distribution to A is $10,000, rather than $12,000. Because Trustee will use the amount of any realized capital gain to determine the amount of the discretionary distribution to the beneficiary, the $10,000 capital gain is included in Trust's distributable net income for the taxable year.
>
> *Example (6)*. Trust's assets consist of Blackacre and other property. Under the terms of Trust's governing instrument, Trustee is directed to hold Blackacre for ten years and then sell it and distribute all the sales proceeds to A. Because Trustee uses the amount of the sales proceeds that includes any realized capital gain to determine the amount required to be distributed to A, any capital gain realized from the sale of Blackacre is included in Trust's distributable net income for the taxable year.

Although Reg. § 1.643(a)-3(b)(3) is viewed generally as discretionary, note that Example (6) is mandatory: if the trustee is required to distribute sale proceeds to a beneficiary, the capital gain from the sale is included in the DNI that the distribution carries out the beneficiary. Example (7) similarly requires all capital gain recognized in the trust's final taxable year to be included in the DNI that the distribution carries out the beneficiary.

The practical application is based on the ability to count as prior year distributions those distributions made in the first 65 days of the current year. For example, any distribution made on or before March 5, 2020 can be treated as a 2019 or 2020 distribution. This election applies to the greater of accounting income under Reg. § 1.643(b)-1 or DNI under Reg. §§ 1.643(a)-1 through 1.643(a)-7. By completing the line on the trust's income tax return, Form 1041, page 2, Part B, showing amounts (other than income required to be distributed currently) paid, credited, or otherwise required to be distributed and checking the Code § 663(b) box in "Other Information" at the bottom of Form 1041, page 2, the trustee decides how much of a current year distribution is allocated to the prior year; the balance would then be credited to the current year.

The practical application based on the 65-day rule would generally occur during February after the year ends and applies only if the trustee has discretion to distribute corpus. The regulations do not specify any particular trust records regarding the election, so do whatever seems best to evidence the intent. Perhaps the income tax return preparer emails the trustee recommending how much of a distribution be made to distribute income and capital gain under the 65-day rule (erring on the side of distributing too much), then the trustee makes the distribution, and the tax return carries through the intent. As long as the distribution is made timely, the tax return can treat none, part, or all of the distribution as a distribution of the taxable year's income. In a manner similar to Example (5), the trustee has referred to the capital gain itself in determining how much to distribute. Unlike Reg. § 1.643(a)-3(b)(2), Reg. § 1.643(a)-3(b)(3) allows one to carry out discretionary distributions of capital gain inconsistently from one year to another.

If the beneficiary does not require monthly or quarterly cash flow, the trustee can simply each February make a big distribution and apply it to the prior or current year for tax return preparation purposes. If the beneficiary does require monthly cash flow but is willing to accept informal constraints, the trustee makes the big distribution into an investment account that the beneficiary owns, and the account makes monthly transfers to the beneficiary's checking account. Obviously this would not work for a beneficiary who cannot exercise discipline, but there is a good segment of beneficiaries for whom it would work.

An alternative approach is to distribute an asset to a beneficiary before the asset is sold. Generally, the beneficiary will receive a carryover basis and then be taxed on the gain.

As with all tax planning, the strategies described in this part II.J.8.c.iii may be unavailable (based on the trust terms), inadvisable (based on sound financial planning), or stupid (giving money to a drug addict just to save taxes).

I.A.1.c.iv. Netting Capital Losses

Reg. § 1.643(a)-3(d), "Capital losses," provides:

> Losses from the sale or exchange of capital assets shall first be netted at the trust level against any gains from the sale or exchange of capital assets, except for a capital gain that is utilized under paragraph (b)(3) of this section in determining the amount that is distributed or required to be distributed to a particular beneficiary. See § 1.642(h)-1 with respect to capital loss carryovers in the year of final termination of an estate or trust.

Thus, if and to the extent that Reg. § 1.643(a)-3(b)(3) includes capital gains in DNI (see part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary), capital losses are not netted against such gains. The recipient beneficiaries report all such capital gains, and the capital losses remain in the trust.

However, note that Reg. § 1.643(a)-3(b)(3) has two elements: "actually distributed to the beneficiary," which would tend to require tracing except in the case of trust termination, or "utilized by the fiduciary in determining the amount that is distributed or required to be distributed to a beneficiary," in which case the trustee would have needed to consciously decide to refer to the capital gain when making the distribution.

Unless the trustee traces or decides to refer to the gross capital gain (instead of the net capital gain) when making the distribution, the loss would be offset under Reg. § 1.643(a)-3(b)(3). Alternatively, the trustee might not trace and not refer to capital gain but rather exercise the power to adjust, which would invoke Reg. § 1.643(a)-3(b)(1) (see part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law) and include an automatic offset.

I.A.1.c.v. Conclusions Regarding the Basic Framework on Allocating Capital Gains to DNI

Often, one cannot predict whether the combination of federal, state, and local income tax rates will be higher inside or outside of the trust.

Quite frankly, I keep changing my mind regarding the best income tax elections as I encounter new situations. If the document is flexible as to distributions and distributions are appropriate, then I would lean toward:

- Flexible language allowing the trustee to allocate capital gains to income, so long as the trustee must reasonably and fairly balance the interests of the income and remainder beneficiaries.

- Using the 65-day-rule to distribute large capital gains to the beneficiary as DNI.

- Electing <u>not</u> to establish a practice of carrying out capital gain to beneficiaries under Reg. § 1.643(a)-3(b)(2) <u>unless</u> it appears that the above two approaches will not suffice to minimize overall income taxes. However, it is not uncommon for me to decide that the above. two approaches will not suffice to minimize overall income taxes. On the other hand, if the situation involves enough money, the trustee can covert capital gain that would otherwise be trapped inside the trust to trust accounting income, using the tool described in part II.J.8.e Partnerships and S corporations Carry Out Income and Capital Gain to Beneficiaries.

Consider adding a withdrawal right of up to 5% of the trust's value. The beneficiary will be deemed to be the owner of the part that the beneficiary can withdraw and perhaps continue to be deemed the owner with respect to the lapsed portion. However, note that withdrawal rights can increase exposure to creditors to the extent of the withdrawal right and perhaps even after a lapse. For details on all of the ideas mentioned in this paragraph, see part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts. If one is concerned about the withdrawal right itself becoming a bad idea, consider using a provision along the following the lines:

> In addition to the distributions authorized by the preceding sentence, subject to the following sentence the trustee shall distribute to the beneficiary so much of the principal of the trust as the beneficiary, while at least __ years of age, may request once between February 23 and March 5 of every calendar year, on a noncumulative basis, up to five percent (5%) of the aggregate value, as of the time of such request by the beneficiary, of the principal of the trust. The trustee may, by instrument placed in the trust's records, provide that the preceding sentence shall not apply during any period (including the beneficiary's remaining life), which period shall begin no earlier than the January 1 following the date of the instrument.

This allows the trustee to turn off the withdrawal rights for any future year(s) without impeding the beneficiary's absolute right to withdraw during the current year.

I.A.1.c.vi. Fairness of Taxing Capital Gain to Beneficiaries; Need for Tax Distributions Here and Other Areas

Our income tax system taxes income to whoever receives it, subject to certain exceptions not relevant to this part II.J.8.c.vi. Therefore, it is fair to tax the beneficiaries.

However, when a distribution is made for a particular purpose and the money is spent, the beneficiary will get upset when handed a tax bill for which the beneficiary did not plan. Therefore, one might need to make a supplemental distribution to pay tax on the original distribution. The supplemental distribution would also need to be enough to pay tax on the supplemental distribution itself. This supplemental distribution is often referred to as "grossing up the distribution" to pay taxes.

This issue applies to more than just capital gains. Clients who leave residences in trust often wish to have the trust pay expenses that a life tenant would ordinarily pay. Distributions by the trust for those purposes run into the same problem – the money is spent for the intended purpose and not available to pay taxes. These distributions also need to be grossed up to pay taxes.

I.A.1.d. Distribution in Kind; Specific Bequests

I.A.1.d.i. Distribution in Kind - Generally

Except as provided below and except to the extent that it carries out DNI or constitutes a bequest of income, a distribution is a nontaxable gift (unless the recipient assumes liabilities, in which case it is taxed as a bargain sale).

When a trust distributes property to satisfy a pecuniary distribution (even if the amount is expressly authorized to be satisfied in cash or in kind), the trust recognizes gain on the deemed sale, even if the trust's residue is less than the pecuniary obligation. Such a pecuniary obligation includes an equalizing distribution (presumably unless expressed as a fractional share). This rule includes a pecuniary obligation in the form of an annuity payment to a beneficiary, and the gain recognized in paying the annuity is not included in the beneficiary's distributive net income (DNI) unless the rules for including capital gain in DNI are satisfied. If the trust's residue is less than the pecuniary obligation, the fact that all bequests are protected by Code § 663(a)(1) and therefore no residual beneficiary can pick up income under Code § 662 means that the trust will pay the tax, given that the beneficiaries of the protected bequests will not be picking up that income; note that the trustee will need to reserve for this tax before making distributions to beneficiaries and may have a mismatch for net investment income tax purposes as well. However, when a charity that was the annuity recipient was bequeathed the remainder, the resulting merger of interests and trust termination were not a taxable event. Also, if the bequest is satisfied using date-of-death values, presumably no gain or loss would be realized, but to qualify for the marital or charitable deduction the assets' value relative to date of death values must be "fairly representative of appreciation or depreciation in the value of all property thus available for distribution in satisfaction of such pecuniary bequest or transfer."

If a trust makes a non-pro rata distribution of residue without either the trust instrument or local law authorizing a non-pro rata distribution, each beneficiary may be treated as having received a pro rata distribution and exchanged it with the other beneficiaries. Otherwise, generally the trust does not recognize any gain or loss and the beneficiaries receive the same basis as the trust's; for further analysis of dividing trusts (including on termination), see part II.D.5 Severing Trusts with Multiple Grantors. However, the trust may elect to treat all property distributions during the taxable year as sales, but losses in transactions with beneficiaries and other related parties are disallowed except to the extent that they are from an estate (including a revocable trust electing to be taxed as an estate) satisfying a pecuniary bequest. The loss disallowance applies even if the distribution, taken as a whole, results in a net gain. Thus, gains are recognized and losses generally are not.

The amount deemed distributed is the lesser of the property's basis or fair market value, unless gain was recognized, in which case it is the property's value.

Distributing low basis assets will generate a new basis (often a step-up) when the beneficiary dies. However, distributed assets are subject to the beneficiary's creditors, changes in the beneficiary's estate tax posture (including not only changes in the tax law but also changes in financial situation through the beneficiary's own efforts or through marriage and change in residence to a state that imposes its own estate tax), and changes in the beneficiary's dispositive goals. To get a basis step-up, I would rather add (perhaps by decanting) a formula general power of appointment, as described in part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap.

Distributing an unmarketable partnership interest would carry out DNI without giving the beneficiary cash. However, valuation adjustments might depress the amount of the deemed distributions, and the beneficiary would be entitled to a proportionate share of future distributions from the partnership. However, if the trustee controls the partnership, the trustee can also control the distribution spigot.

I.A.1.d.ii. Specific Bequest

A gift or bequest of a specific sum of money or of specific property, which is required by the specific terms of the will or trust instrument and is properly paid or credited to a beneficiary, is not allowed as a deduction to an estate or trust under Code § 661 and is not included in the gross income of a beneficiary under Code § 662, unless under the terms of the will or trust instrument the gift or bequest is to be paid or credited to the recipient in more than three installments.

I.A.1.d.iii. Distributing a Note to the Obligor

Rev. Rul. 75-68 provides:

> The income of a testamentary trust consisting solely of interest from mortgages on the beneficiary's property was required to be distributed periodically. Although the mortgage notes held by the trust required the periodic payment of interest, it was agreed between the beneficiary and the trustees, that the beneficiary would pay no interest on the mortgages and the trustees would distribute no income from the trust.
>
> *Held*, notwithstanding the foregoing agreement, the interest income due on the mortgages held by the trust is includible in the gross income of the trust, and this same

amount, as the distributable income of the trust, is includible in the gross income of the beneficiary. Further, the beneficiary is entitled to a deduction for this interest deemed paid on the mortgages.

Below is authority consistent with this conclusion:

Reg. § 1.643(c)-1(a) treats as a beneficiary "any person with respect to an amount used to discharge or satisfy that person's legal obligation as that term is used in § 1.662(a)-4." Reg. § 1.661(a)-2(d) provides:

> The terms "income required to be distributed currently" and "any other amounts properly paid or credited or required to be distributed" also include any amount used to discharge or satisfy any person's legal obligation as that term is used in § 1.662(a)-4.

Reg. § 1.662(a)-4, "Amounts used in discharge of a legal obligation," provides:

> Any amount which, pursuant to the terms of a will or trust instrument, is used in full or partial discharge or satisfaction of a legal obligation of any person is included in the gross income of such person under section 662(a)(1) or (2), whichever is applicable, as though directly distributed to him as a beneficiary, except in cases to which section 71 (relating to alimony payments) or section 682 (relating to income of a trust in case of divorce, etc.) applies. The term "legal obligation" includes a legal obligation to support another person if, and only if, the obligation is not affected by the adequacy of the dependent's own resources. For example, a parent has a "legal obligation" within the meaning of the preceding sentence to support his minor child if under local law property or income from property owned by the child cannot be used for his support so long as his parent is able to support him. On the other hand, if under local law a mother may use the resources of a child for the child's support in lieu of supporting him herself, no obligation of support exists within the meaning of this paragraph, whether or not income is actually used for support. Similarly, since under local law a child ordinarily is obligated to support his parent only if the parent's earnings and resources are insufficient for the purpose, no obligation exists whether or not the parent's earnings and resources are sufficient. In any event, the amount of trust income which is included in the gross income of a person obligated to support a dependent is limited by the extent of his legal obligation under local law. In the case of a parent's obligation to support his child, to the extent that the parent's legal obligation of support, including education, is determined under local law by the family's station in life and by the means of the parent, it is to be determined without consideration of the trust income in question.

Reg. § 1.661(a)-2(d) provides:

> The terms "income required to be distributed currently" and "any other amounts properly paid or credited or required to be distributed" also include any amount used to discharge or satisfy any person's legal obligation as that term is used in § 1.662(a)-4.

I.A.1.e. Partnerships and S corporations Carry Out Income and Capital Gain to Beneficiaries

Generally, K-1 income from a passthrough business entity will carry out any income (including capital) distributed to the trust and then to the trust's beneficiaries. This section focuses on nongrantor trusts holding partnerships rather than S corporations, because generally a trust can hold S corporation stock that is not a grantor trust, QSST, or ESBT only during a relatively limited amount of time. (Although the principles in this part II.J.8.e would apply to a net income with make-up charitable remainder unitrust – a NIMCRUT – the IRS has concerns about that application and might shut it down at some point.)

Also, if one elected not to carry out capital gains under Reg. § 1.643(a)-3(b)(2) and later decides that all capital gain should be included in DNI going forward (or does not want to take a risk that the IRS will not respect deviations from general rules of the Uniform Principal and Income Act, consider forming an entity taxed as a partnership. Capital gains earned through a partnership generally constitute trust accounting income.

The Uniform Principal and Income Act provides that, generally, all cash distributions from an entity (including a partnership) are considered trust accounting income. Only the following distributions from an entity are not considered trust accounting income:

- property other than money;
- money received in one distribution or a series of related distributions in exchange for part or all of a trust's interest in the entity;
- money received in total or partial liquidation of the entity; and
- money received from an entity that is a regulated investment company or a real estate investment trust if the money distributed is a capital gain dividend for federal income tax purposes.

Thus, a partnership's capital gains recognized in the ordinary course of managing and re-balancing a portfolio would constitute fiduciary accounting income to the extent distributed from the partnership in cash and therefore would be includible in DNI under (1) above.

To keep control of the partnership, consider having the trust be a 1% general partner and 98% limited partner, and the beneficiary or someone else might contribute 1% as a limited partner. Distributing a limited partnership interest to a beneficiary can carry out income and perhaps capital gain while at the same time not giving the beneficiary cash to spend (but be sure to distribute enough cash so that the beneficiary can pay tax on the distribution). Be careful to avoid the gain on formation that applies when a contributing partner diversifies the partner's holdings by forming the partnership. If the trust holds not only marketable securities but also investments in businesses, consider setting up one partnership for the business investments and another partnership for the marketable securities, which would help facilitate allocating trust assets on termination or any other trust division. Also consider whether a state with jurisdiction over the trust might subject the partnership itself to state income tax.

Complexity might arise if a partnership distributes less than all of its taxable income to a mandatory income trust. It is unclear whether all of the trust's distributive share of capital gain is DNI. Furthermore, interrelated calculations might be required for a mandatory income trust. Generally, we should look to see whether planning under part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law or II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary is sufficient before recommending a partnership solely to address the issues described in part II.J.8.c.ii Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary.

I.A.1.f. Consequences of Allocating Capital Gain to DNI

I.A.1.f.i. General Rules of the Proportion of DNI Constitutes Capital Gain Compared to Other Income (and General Retention of the Character of DNI Distributed to Beneficiaries)

This part II.J.8.f.i first discusses netting deductions against income then discusses allocating that income.

I.A.1.f.i.(a). Allocating Deductions to Various Income Items

Rules for allocating deductions include:

- All deductible items directly attributable to one class of income are allocated to that class. To the extent that any items of deduction which are directly attributable to a class of income exceed that class of income, they may be allocated to any other class of income (including capital gains) included in distributable net income as described above except that any excess deductions attributable to tax-exempt income may not be offset against any other class of income.

- Deductions not directly attributable to a specific class of income may be allocated to any item of income (including capital gains) included in computing DNI, but Code § 265 requires a portion of such indirect expenses to be allocated to non-taxable income. Such indirect expenses include trustee fees, the rental of safe deposit boxes, and state income and personal property taxes. Once one has allocated expenses to tax-exempt income, how does one choose to which items of taxable income to allocate deductions? One would consider allocating to those income items that are most highly taxed, considering federal and state income tax and the 3.8% tax on net investment income. For example, interest income is taxed at the highest rates, whereas qualified dividends are taxed at long-term capital gain rates. Within interest income, consider whether the interest is from U.S. obligations exempt from state income tax. Although distributions from qualified retirement plans and IRAs are taxed at the highest regular tax rate, they are exempt from the 3.8% tax on net investment income. See part II.I.6 Deductions Against NII (especially the text accompanying fns. 2307-2308).

- If a charitable deduction under Code § 642(c) is involved, any allocations of taxable income between the charitable deduction and the beneficiaries must have substantial economic effect.

- Special rules apply to depreciation deductions.

I.A.1.f.i.(b). Allocating Income Items Among Those Receiving It

In allocating income between the trust and the beneficiary (or beneficiaries), the amounts of DNI distributed to the beneficiaries:

> shall be treated as consisting of the same proportion of each class of items entering into the computation of distributable net income of the estate or trust as the total of each class bears to the total distributable net income of the estate or trust in the absence of the allocation of different classes of income under the specific terms of the governing instrument.

However, this proportionate rule is subject to specific provisions in the governing instrument for the allocation of different classes of income or different allocations under local law, subject to tax-exempt income being allocated in a manner that does not allow it to be deducted.

Thus, except for tax-exempt income and allocations between the charitable and noncharitable shares (and any special rules regarding depreciation deductions), it appears that a trust agreement may create ordering provisions between which items of DNI the trust retains and which items of DNI the trust distributes to beneficiaries. However, such a provision might encounter significant resistance from the IRS.

Once one decides which items of DNI the trust distributes to beneficiaries, generally distributions to each beneficiary carry out a pro rata portion of ordinary income and capital gain items allocated to the beneficiaries, and any other characteristic of the income at the trust level retains its status in the beneficiary's hands (which, among other things, is important for net investment income tax purposes). Code § 652(b) provides that amounts included in the beneficiary's income for regular income tax purposes:

> … shall have the same character in the hands of the beneficiary as in the hands of the trust. For this purpose, the amounts shall be treated as consisting of the same proportion of each class of items entering into the computation of distributable net income of the trust as the total of each class bears to the total distributable net income of the trust, unless the terms of the trust specifically allocate different classes of income to different beneficiaries. In the application of the preceding sentence, the items of deduction entering into the computation of distributable net income shall be allocated among the items of distributable net income in accordance with regulations prescribed by the Secretary.

Code § 662(b) provides that amounts included in the beneficiary's income for regular income tax purposes:

> … shall have the same character in the hands of the beneficiary as in the hands of the estate or trust. For this purpose, the amounts shall be treated as consisting of the same

> proportion of each class of items entering into the computation of distributable net income as the total of each class bears to the total distributable net income of the estate or trust unless the terms of the governing instrument specifically allocate different classes of income to different beneficiaries. In the application of the preceding sentence, the items of deduction entering into the computation of distributable net income (including the deduction allowed under section 642(c)) shall be allocated among the items of distributable net income in accordance with regulations prescribed by the Secretary. In the application of this subsection to the amount determined under paragraph (1) of subsection (a), distributable net income shall be computed without regard to any portion of the deduction under section 642(c) which is not attributable to income of the taxable year.

Reg. § 1.662(b)-1 provides:

> In determining the amount includible in the gross income of a beneficiary, the amounts which are determined under section 662(a) and §§ 1.662(a)-1 through 1.662(a)-4 shall have the same character in the hands of the beneficiary as in the hands of the estate or trust. The amounts are treated as consisting of the same proportion of each class of items entering into the computation of distributable net income as the total of each class bears to the total distributable net income of the estate or trust unless the terms of the governing instrument specifically allocate different classes of income to different beneficiaries, or unless local law requires such an allocation. For this purpose, the principles contained in § 1.652(b)-1 shall apply.

Reg. § 1.652(b)-1 provides:

> In determining the gross income of a beneficiary, the amounts includible under § 1.652(a)-1 have the same character in the hands of the beneficiary as in the hands of the trust. For example, to the extent that the amounts specified in § 1.652(a)-1 consist of income exempt from tax under section 103, such amounts are not included in the beneficiary's gross income. Similarly, dividends distributed to a beneficiary retain their original character in the beneficiary's hands for purposes of determining the availability to the beneficiary of the dividends received credit under section 34 (for dividends received on or before December 31, 1964) and the dividend exclusion under section 116…. Similarly, to the extent such amounts consist of an amount received as a part of a lump sum distribution from a qualified plan and to which the provisions of section 72(n) would apply in the hands of the trust, such amount shall be treated as subject to such section in the hands of the beneficiary except where such amount is deemed under section 666(a) to have been distributed in a preceding taxable year of the trust and the partial tax described in section 668(a)(2) is determined under section 668(b)(1)(B). The tax treatment of amounts determined under § 1.652(a)-1 depends upon the beneficiary's status with respect to them not upon the status of the trust. Thus, if a beneficiary is deemed to have received foreign income of a foreign trust, the includibility of such income in his gross income depends upon his taxable status with respect to that income.

This proportionate requirement applies "unless the terms of the governing instrument specifically allocate different classes of income to different beneficiaries, or unless local law requires such an allocation."

When allocating income among beneficiaries:

> The terms of the trust are considered specifically to allocate different classes of income to different beneficiaries only to the extent that the allocation is required in the trust instrument, and only to the extent that it has an economic effect independent of the income tax consequences of the allocation.

I.A.1.f.ii. How Undistributed Capital Gains Being Allocated to DNI Affects Character of Income Trapped Inside of Trust Compared to Distributed to the Beneficiary

If the amount of DNI is less than the amount distributed to the beneficiary, the issues described in this part II.J.8.f.ii How Undistributed Capital Gains Being Allocated to DNI Affects Character of Income Trapped Inside of Trust Compared to Distributed to the Beneficiary become important.

Some income might be inadvertently trapped in the trust if the allocation rules of part II.J.8.f.i General Rules of the Proportion of DNI Constitutes Capital Gain Compared to Other Income apply without being modified by any special ordering rule in the trust agreement and if all of a pass-through entity's capital gain constitutes DNI under an approach described in part II.J.8.a.ii Whether the Gain from the Sale or Exchange of a Capital Asset Is Allocated to Corpus That's because looking exclusively at those two factors bypasses the analysis of part II.J.5.c.i Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal.

For example, trust has $10,000 of interest income. Trust's distributive share of partnership's income is $20,000 of dividend income and $70,000 of long-term capital gains. If the rules described in the preceding paragraph apply, then 10% of all distributions constitute interest income, 20% constitute dividend income, and 70% constitute long-term capital gains. Trust distributes $50,000 to the beneficiary. Therefore, each of the beneficiary and the trust has $5,000 of interest income, $10,000 of dividend income, and $35,000 of long-term capital gains.

Contrast that to an approach under which the trustee is able to control how much capital gain is included in DNI, under part II.J.5.c.i Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal. On a year-by-year basis, the trustee can selectively include capital gain in DNI to the extent that one or both of part II.J.8.c.ii Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary or part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary is available. By including in DNI just enough capital gain to cause the DNI to match the cash distributed to the beneficiary, the trustee can ensure that all of the ordinary income is distributed to the beneficiary.

If a state that imposes income tax follows the federal rules, exercising a general power of appointment might shift the grantor.[2520] If such a shift is undesirable, see part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap.

II.J.3.e.ii. When a State Can or Does Tax a Trust's Income

I do not maintain a chart of when a state asserts the right to tax a trust's income. I suggest the reader check the research service of his or her choice. You can get a quick summary created by Dick Nenno, author of the BNA Tax Management Portfolio that thoroughly covers the topic, by checking out the footnote associated with this sentence.[2521]

If and to the extent a trust's income is carried out to a beneficiary on a K-1, that beneficiary's home state taxes the income at the beneficiary level and generally the issue of the trust's residency is moot.

II.J.3.e.ii.(a). *McNeil* (Pennsylvania)

McNeil Trust v. Commonwealth of Pennsylvania, 67 A.3d 185 (Commonwealth Court of Pa. 2013), held that the Department of Revenue violated the Commerce Clause of the U.S. Constitution when it "assessed Pennsylvania Income Tax (PIT) and interest on all of the income of two inter vivos trusts, which are located in, administered in, and governed by the laws of Delaware and which had no Pennsylvania income or assets in 2007. The Department imposed the PIT because the trusts' settlor, Robert L. McNeil, Jr. (Settlor), resided in Pennsylvania when he established the trusts in 1959 and the trusts' discretionary beneficiaries are Pennsylvania residents." The facts were (citations to stipulations omitted):

> .... On January 2, 1959, Settlor, a Pennsylvania resident, executed the Trusts' Agreements and, by January 3, 1959, all of the Trusts' trustees had executed those Agreements. The Trusts' Agreements provide that the Trusts are Delaware trusts that are to be governed, administered, and construed under the laws of Delaware, and named the Wilmington Trust Company (WTC), located in Wilmington, Delaware, as the sole administrative trustee; WTC was the administrative trustee in 2007. WTC had no offices, conducted no trust affairs, and did not act as administrative trustee for the Trusts in Pennsylvania in 2007. All of the Trusts' books and records are maintained in WTC's Wilmington, Delaware office. In 2007, the Trusts' three general trustees resided outside

I.A.1.g. Effectuating Allocation of Capital Gain to DNI

Form 1041 (Schedule D), Part III, column (1) allocates the beneficiaries' shares. Once one separates that, the rest should flow naturally.

.
[2520] Reg. § 1.671-2(e)(5), which is reproduced in fn 6620 in part III.B.2.h.i Who Is the Grantor.. For Connecticut income tax purposes, Connecticut Legal Ruling 2005-2 held:

> The residency status of an appointive trust created by the exercise of a power of appointment that is not a general power of appointment is to be determined by the residency of the donor of the power of appointment. The residency status of an appointive trust created by the exercise of a general power of appointment is to be determined by the residency of the donee of the power of appointment.

By "donor," the ruling was referring to the settlor. The ruling is my doc. no. 6517233.
[2521] The link is https://thompsoncoburn.box.com/s/m1g6r233h2sczd30r06oo3wiuxtd3g33, and the password is ZdwgPKXZ. Please be sure to note that chart's date.

of Pennsylvania and did not conduct trust affairs or act as general trustees for the Trusts in Pennsylvania.

> None of the Trusts' assets or interests in 2007 were located in Pennsylvania, and the Trusts had no income from Pennsylvania sources. All of the Trust's discretionary beneficiaries were residents of Pennsylvania in 2007. NMM Trust made no distributions to the discretionary beneficiaries in 2007. The trustees of the MVM Trust were not required to make any distributions of income or principal during 2007, but did make a distribution of $1,400,000.00 to one of its discretionary beneficiaries.
>
> As fiduciary of the NMM Trust, WTC reported that the NMM Trust had no taxable income from Pennsylvania sources and had a net Pennsylvania taxable income of zero. As fiduciary of the MVM Trust, WTC reported that the MVM Trust had taxable income from Pennsylvania sources in the amount of $1,349,817.00; however, no portion of that $1,349,817.00 was, in fact, derived from Pennsylvania sources. The MVM Trust reported the taxable income because the tax preparation software required it to report taxable income from Pennsylvania sources in order to report the distribution of $1,400,000.00. The MVM Trust claimed a deduction in the amount of $1,349,817.00 with respect to the distribution and reported its net Pennsylvania taxable income of zero.

The court held that the trusts did not have "substantial nexus" with Pennsylvania:[2522]

> … neither Settlor's residency nor the residency of the beneficiaries provides the Trusts with the requisite presence in Pennsylvania to establish a substantial nexus and, therefore, the first prong of *Complete Auto* is not met and the imposition of the PIT here violates the Commerce Clause of the U.S. Constitution. *Complete Auto*, 430 U.S. at 279 (requiring all four prongs to be satisfied for a statute to withstand constitutional scrutiny). Although we conclude that the substantial nexus prong of the *Complete Auto* test has not been met and, therefore, the imposition of the PIT on all of the Trusts' income violates the Commerce Clause, *id*., we will nevertheless address the remaining *Complete Auto* prongs the Trusts challenge.

The court also held that taxing the trusts did not constitute "fair apportionment" (citation omitted):

> Thus, the imposition of the PIT on the Trusts' income, when all of that income was derived from sources outside of Pennsylvania, is "inherently arbitrary and ha[s] no rational relationship to the [Trusts'] business activity that occurred in [Pennsylvania]." Accordingly, the imposition of the PIT here does not satisfy the fair apportionment prong of C*omplete Auto.*

The court also held that taxing the trusts was not "fairly related to the services a state provides where the taxpayer benefits directly or indirectly from the state's protections, opportunities, and services" (citations to stipulations omitted):

> In 2007, the Trusts had no physical presence in Pennsylvania, none of their income was derived from Pennsylvania sources, none of their assets or interests were located in Pennsylvania, and they were established under and were governed by Delaware law. Hence, unlike the taxpayers in Erieview Cartage and Quality Markets, the Trusts do not

[2522] Citing *Complete Auto Transit, Inc. v. Brady*, 430 U.S. 274 (1977).

> benefit from Pennsylvania's roadways, bridges, police, fire protection, economic markets, access to its trained workforce, courts, and laws. We recognize that the Trusts' discretionary beneficiaries almost certainly benefit from Pennsylvania's societal and legal framework because they reside in Pennsylvania; however, they are not the taxpayer in this matter and, importantly, as discretionary beneficiaries, they have no present or future right to distributions from the Trusts. Moreover, pursuant to Sections 302 and 305 [of] the Tax Code, 72 P.S. §§ 7302 and 7305, the beneficiaries will pay PIT on any distributions they do receive from the Trusts, which are fairly related to the benefits they receive from residing in Pennsylvania. Similarly, Settlor, who was deceased in TY 2007, is not the taxpayer in this matter.
>
> Thus, the Department's imposition of the PIT on the Trusts' entire income is not reasonably related to the benefits Pennsylvania provides the Trusts. Therefore, the Commonwealth's imposition of the PIT here does not satisfy the fairly related prong of *Complete Auto*.

II.J.3.e.ii.(b). *Linn* (Illinois) (Decanting)

Another important case limits Illinois' income taxation of trusts, *Linn v. Department of Revenue*.[2523] In *Linn*, the trustees of an Illinois trust exercised their limited power of appointment to create a trust that eventually came to be governed purely by Texas law and administered in Texas by Texas trustee, holding no assets in Illinois, but with concededly an Illinois grantor. The court summarized the parties' arguments:

> Plaintiff asserts the Autonomy Trust 3 has no connections to Illinois. He notes the Autonomy Trust 3 is a Texas trust that is governed by the laws of and administered in Texas. Moreover, in 2006, the Autonomy Trust 3's trustee, beneficiary, and protector were all not residents of Illinois. Without any connections to Illinois, the imposition of Illinois income tax on the Autonomy Trust 3 would be unconstitutional under the due process clause. Plaintiffs have shown no connections appear to exist with the trust in this case. However, defendants contend connections do exist because (1) the Autonomy Trust 3 owes its existence to Illinois, and (2) Illinois provides the Autonomy Trust 3's trustee and beneficiary with a panoply of legal benefits and opportunities. We note that, on appeal, defendants do not argue that, in 2006, the Autonomy Trust 3 still contained terms to be interpreted under Illinois law and that the Illinois choice of law provision in the March 1961 agreement applies to the Autonomy Trust 3.

Focusing on contacts during the tax year in question, the court dismissed Illinois' arguments that the trust "exists only because of Illinois law" and that Illinois continues to provide the trustee and beneficiary with benefits. Citing *Chase Manhattan Bank v. Gavin*, 249 Conn. 172, 733 A.2d 782 (1999), *Linn* reasoned (highlighting added):

> Defendants further argue the Autonomy Trust 3 exists only because of Illinois law. However, Autonomy Trust 3 resulted from a January 2002 exercise of the limited power of appointment by the trustee of the P.G. Linda Trust, which was provided for in the March 1961 trust agreement. Assuming arguendo, an Illinois court ruling validated a provision of the March 1961 agreement that allowed for the limited power of appointment that was later invoked to create the Autonomy Trust 3, the Autonomy Trust 3 was created by the provisions of the March 1961 agreement allowing for powers of

[2523] 2 N.E.3d 1203 (App. Ct. Ill. 4th D. 2013).

appointment and not Illinois law. Further, with income taxation, the focus of the due process analysis is on the tax year in question, which would be 2006 in this case. See *Gavin*, 733 A.2d at 802 (noting the connection for the inter vivos trust was the fact a noncontingent beneficiary was an in-state resident during the tax year in question); see also *In re Swift*, 727 S.W.2d 880, 882 (Mo. 1987) (addressing income taxation on a testamentary trust and stating, "An income tax is justified only when contemporary benefits and protections are provided the subject property or entity during the relevant taxing period"). Thus, what happened historically with the trust in Illinois courts and under Illinois law has no bearing on the 2006 tax year.

Citing *District of Columbia v. Chase Manhattan Bank*, 689 A.2d 539, 547 n. 11 (D.C. 1997), *Linn* reasoned:

> Additionally, defendants argue the State of Illinois provides the trustee and beneficiary of the Autonomy Trust 3 with a panoply of legal benefits and opportunities. In support of its assertion, it again cites case law addressing testamentary trusts. See *Gavin*, 733 A.2d at 799; District of Columbia, 689 A.2d at 544. As we have stated, this case involves an inter vivos trust, not a testamentary trust. The Autonomy Trust 3 was not in existence when A.N. Pritzker died and thus was not part of his probate case. Accordingly, no Illinois probate court has jurisdiction over the Autonomy Trust 3, unlike in the testamentary trust cases.
>
> Defendants also cite several Illinois statutory provisions and claim the Autonomy Trust 3, plaintiff, Linda, or a contingent beneficiary can seek those statutory provisions at any time. However, the parties agree that, after the November 2005 Texas reformation order, the Autonomy Trust 3 choice of law provision provided for only the application of Texas law. Further, as stated earlier, the 1977 Cook County case has no application at all to the Autonomy Trust 3 because it dealt with beneficiary powers of appointment, not trustee powers of appointment in the March 1961 trust agreement. Accordingly, we find the Autonomy Trust 3 receives the benefits and protections of Texas law, not Illinois law.

Instead, "in 2006, the Autonomy Trust 3 had nothing in and sought nothing from Illinois."[2524] *Linn* held:[2525]

> Accordingly, we find insufficient contacts exist between Illinois and the to satisfy the due process clause, and thus the income tax imposed on the Autonomy Trust 3 for the tax year 2006 was unconstitutional.

[2524] The court elaborated:

> As plaintiff notes, all of the trust's business was conducted in Texas; the trustee, protector, and the noncontingent beneficiary resided outside Illinois; and none of the trust's property was in Illinois. Moreover, the Autonomy Trust 3 meets none of the following factors that would give Illinois personal jurisdiction over the trust in a litigation: "the provisions of the trust instrument, the residence of the trustees, the residence of its beneficiaries, the location of the trust assets, and the location where the business of the trust is to be conducted." *Sullivan v. Kodsi*, 359 Ill.App.3d 1005, 1011, 296 Ill. Dec. 710, 836 N.E.2d 125, 131 (2005) (citing *People v. First National Bank of Chicago*, 364 Ill. 262, 268, 4 N.E.2d 378, 380 (1936)).

[2525] The court continued:

> Since we have found the income taxation of the Autonomy Trust 3 in 2006 violates the due process clause, we do not address plaintiff's commerce clause argument.

Thus, decanting[2526] to another jurisdiction may allow an Illinois trust to flee Illinois income taxation.

II.J.3.e.ii.(c). *Kaestner* (U.S. Supreme Court re North Carolina)

For income a trust retains, in a unanimous opinion, *North Carolina Department of Revenue v. Kimberley Rice Kaestner 1992 Family Trust*, 588 U.S. __ (2019), held that North Carolina could not tax a trust whose only ties consisted of a beneficiary who may at some point receive distributions in the trustee's "absolute discretion." The Syllabus prepared by the court reporter, which has no precedential value, summarized:

> Joseph Lee Rice III formed a trust for the benefit of his children in his home State of New York and appointed a fellow New York resident as the trustee. The trust agreement granted the trustee "absolute discretion" to distribute the trust's assets to the beneficiaries. In 1997, Rice's daughter, Kimberley Rice Kaestner, moved to North Carolina. The trustee later divided Rice's initial trust into three separate subtrusts, and North Carolina sought to tax the Kimberley Rice Kaestner 1992 Family Trust (Trust) - formed for the benefit of Kaestner and her three children - under a law authorizing the State to tax any trust income that "is for the benefit of" a state resident, N.C. Gen. Stat. Ann. § 105–160.2. The State assessed a tax of more than $1.3 million for tax years 2005 through 2008. During that period, Kaestner had no right to, and did not receive, any distributions. Nor did the Trust have a physical presence, make any direct investments, or hold any real property in the State. The trustee paid the tax under protest and then sued the taxing authority in state court, arguing that the tax as applied to the Trust violates the Fourteenth Amendment's Due Process Clause. The state courts agreed, holding that the Kaestners' in-state residence was too tenuous a link between the State and the Trust to support the tax.
>
> *Held*: The presence of in-state beneficiaries alone does not empower a State to tax trust income that has not been distributed to the beneficiaries where the beneficiaries have no right to demand that income and are uncertain to receive it. Pp. 5–16.
>
> (a) The Due Process Clause limits States to imposing only taxes that "bea[r] fiscal relation to protection, opportunities and benefits given by the state." *Wisconsin v. J. C. Penney Co.*, 311 U. S. 435, 444. Compliance with the Clause's demands "requires some definite link, some minimum connection, between a state and the person, property or transaction it seeks to tax," and that "the 'income attributed to the State for tax purposes . . . be rationally related to "values connected with the taxing State," ' " *Quill Corp. v. North Dakota*, 504 U. S. 298, 306. That "minimum connection" inquiry is "flexible" and focuses on the reasonableness of the government's action. *Id.*, at 307. Pp. 5–6.
>
> (b) In the trust beneficiary context, the Court's due process analysis of state trust taxes focuses on the extent of the in-state beneficiary's right to control, possess, enjoy, or receive trust assets. Cases such as *Safe Deposit & Trust Co. of Baltimore v. Virginia*, 280 U.S. 83; *Brooke v. Norfolk*, 277 U.S. 27; and *Maguire v. Trefry*, 253 U. S. 12, reflect a common principle: When a State seeks to base its tax on the in-state residence of a trust beneficiary, the Due Process Clause demands a pragmatic inquiry into what exactly the beneficiary controls or possesses and how that interest relates to the object of the

[2526] See part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting.

State's tax. *Safe Deposit*, 280 U. S., at 91. Similar analysis also appears in the context of taxes premised on the in-state residency of settlors and trustees. See, *e.g.*, *Curry v. McCanless*, 307 U.S. 357. Pp. 6–10.

(c) Applying these principles here, the residence of the Trust beneficiaries in North Carolina alone does not supply the minimum connection necessary to sustain the State's tax. First, the beneficiaries did not receive any income from the Trust during the years in question. Second, they had no right to demand Trust income or otherwise control, possess, or enjoy the Trust assets in the tax years at issue. Third, they also could not count on necessarily receiving any specific amount of income from the Trust in the future. Pp. 10–13.

(d) The State's counterarguments are unconvincing. First the State argues that "a trust and its constituents" are always "inextricably intertwined," and thus, because trustee residence supports state taxation, so too must beneficiary residence. The State emphasizes that beneficiaries are essential to a trust and have an equitable interest in its assets. Although a beneficiary is central to the trust relationship, the wide variation in beneficiaries' interests counsels against adopting such a categorical rule. Second, the State argues that ruling in favor of the Trust will undermine numerous state taxation regimes. But only a small handful of States rely on beneficiary residency as a sole basis for trust taxation, and an even smaller number rely on the residency of beneficiaries regardless of whether the beneficiary is certain to receive trust assets. Finally, the State urges that adopting the Trust's position will lead to opportunistic gaming of state tax systems. There is no certainty, however, that such behavior will regularly come to pass, and in any event, mere speculation about negative consequences cannot conjure the "minimum connection" missing between the State and the object of its tax. Pp. 13–16.

371 N.C. 133, 814 S.E.2d 43, affirmed.

SOTOMAYOR, J., delivered the opinion for a unanimous Court. ALITO, J., filed a concurring opinion, in which ROBERTS, C. J., and GORSUCH, J., joined.

After reviewing case law on Due Process, the Court held:

Applying these principles here, we conclude that the residence of the Kaestner Trust beneficiaries in North Carolina alone does not supply the minimum connection necessary to sustain the State's tax.

First, the beneficiaries did not receive any income from the trust during the years in question. If they had, such income would have been taxable. See *Maguire*, 253 U.S., at 17; *Guaranty Trust Co.*, 305 U. S., at 23.

Second, the beneficiaries had no right to demand trust income or otherwise control, possess, or enjoy the trust assets in the tax years at issue. The decision of when, whether, and to whom the trustee would distribute the trust's assets was left to the trustee's "absolute discretion." Art. I, § 1.2(a), App 46–47. In fact, the Trust agreement explicitly authorized the trustee to distribute funds to one beneficiary to "the exclusion of other[s]," with the effect of cutting one or more beneficiaries out of the Trust. Art. I, § 1.4, *id.*, at 50. The agreement also authorized the trustee, not the beneficiaries, to make investment decisions regarding Trust property. Art. V, § 5.2, *id.*, at 55–60. The Trust agreement prohibited the beneficiaries from assigning to another person any right they might have to the Trust property, Art. XII, *id.*, at 70–71, thus making the beneficiaries' interest less like "a potential source of wealth [that] was property in [their] hands." *Curry*, 307 U.S., at\ 370–371.[9]

[9] We do not address whether a beneficiary's ability to assign a potential interest in income from a trust would afford that beneficiary sufficient control or possession over, or enjoyment of, the property to justify taxation based solely on his or her in-state residence.

To be sure, the Kaestner Trust agreement also instructed the trustee to view the trust "as a family asset and to be liberal in the exercise of the discretion conferred," suggesting that the trustee was to make distributions generously with the goal of "meet[ing] the needs of the Beneficiaries" in various respects. Art. I, § 1.4(c), App. 51. And the trustee of a discretionary trust has a fiduciary duty not to "act in bad faith or for some purpose or motive other than to accomplish the purposes of the discretionary power." 2 Restatement (Third) of Trusts § 50, Comment c, p. 262 (2003). But by reserving sole discretion to the trustee, the Trust agreement still deprived Kaestner and her children of any entitlement to demand distributions or to direct the use of the Trust assets in their favor in the years in question.

Third, not only were Kaestner and her children unable to demand distributions in the tax years at issue, but they also could not count on necessarily receiving any specific amount of income from the Trust in the future. Although the Trust agreement provided for the Trust to terminate in 2009 (on Kaestner's 40th birthday) and to distribute assets to Kaestner, Art. I, § 1.2(c)(1), App. 47, New York law allowed the trustee to roll over the trust assets into a new trust rather than terminating it. N.Y. Est., Powers & Trusts § 10–6.6(b). Here, the trustee did just that. 371 N. C., at 135, 814 S.E.2d, at 45.[10]

[10] In light of these features, one might characterize the interests of the beneficiaries as "contingent" on the exercise of the trustee's discretion. See *Fondren v. Commissioner*, 324 U.S. 18, 21 (1945) (describing "the exercise of the trustee's discretion" as an example of a contingency); see also *United States v. O'Malley*, 383 U.S. 627, 631 (1966) (describing a grantor's power to add income to the trust principal instead of distributing it and "thereby den[y] to the beneficiaries the privilege of immediate enjoyment and conditio[n] their eventual enjoyment upon surviving the termination of the trust"); *Commissioner v. Estate of Holmes*, 326 U.S. 480, 487 (1946) (the termination of a contingency changes "the mere prospect or possibility, even the probability, that one may have [enjoyment of property] at some uncertain future time or perhaps not at all" into a "present substantial benefit"). We have no occasion to address, and thus reserve for another day, whether a different result would follow if the beneficiaries were certain to receive funds in the future. See, *e.g.*, Cal. Rev. & Tax. Code Ann. § 17742(a) (West 2019); *Commonwealth v. Stewart*, 338 Pa. 9, 16–19, 12 A.2d 444, 448–449 (1940) (upholding a tax on the equitable interest of a beneficiary who had "a right to the income from [a] trust for life"), *aff'd*, 312 U.S. 649 (1941).

Like the beneficiaries in *Safe Deposit*, then, Kaestner and her children had no right to "control or posses[s]" the trust assets "or to receive income therefrom." 280 U.S., at 91. The beneficiaries received no income from the Trust, had no right to demand income from the Trust, and had no assurance that they would eventually receive a specific share of Trust income. Given these features of the Trust, the beneficiaries' residence cannot, consistent with due process, serve as the sole basis for North Carolina's tax on trust income.[11]

> [11] Because the reasoning above resolves this case in the Trust's favor, it is unnecessary to reach the Trust's broader argument that the trustee's contacts alone determine the State's power over the Trust. Brief for Respondent 23–30. The Trust relies for this proposition on *Hanson v. Denckla*, 357 U.S. 235 (1958), which held that a Florida court lacked jurisdiction to adjudicate the validity of a trust agreement even though the trust settlor and most of the trust beneficiaries were domiciled in Florida. *Id.*, at 254. The problem was that Florida law made the trustee "an indispensable party over whom the court [had to] acquire jurisdiction" before resolving a trust's validity, and the trustee was a nonresident. *Ibid.* In deciding that the Florida courts lacked jurisdiction over the proceeding, the Court rejected the relevance of the trust beneficiaries' residence and focused instead on the "acts of the trustee" himself, which the Court found insufficient to support jurisdiction. *Ibid.* The State counters that Hanson is inapposite because the State's tax applies to the trust rather than to the trustee and because Hanson arose in the context of adjudicative jurisdiction rather than tax jurisdiction. Brief for Petitioner 21, n. 9; Reply Brief 16–17. There is no need to resolve the parties' dueling interpretations of *Hanson*. Even if beneficiary contacts - such as residence - could be sufficient in some circumstances to support North Carolina's power to impose this tax, the residence alone of the Kaestner Trust beneficiaries cannot do so for the reasons given above.

When rebuffing North Carolina's arguments, the Court discussed other states' laws:

> Second, the State argues that ruling in favor of the Trust will undermine numerous state taxation regimes. Tr. of Oral Arg. 8, 68; Brief for Petitioner 6, and n. 1. Today's ruling will have no such sweeping effect. North Carolina is one of a small handful of States that rely on beneficiary residency as a sole basis for trust taxation, and one of an even smaller number that will rely on the residency of beneficiaries regardless of whether the beneficiary is certain to receive trust assets.[12] Today's decision does not address state laws that consider the in-state residency of a beneficiary as one of a combination of factors, that turn on the residency of a settlor, or that rely only on the residency of noncontingent beneficiaries, see, *e.g.*, Cal. Rev. & Tax. Code Ann. § 17742(a).[13] We express no opinion on the validity of such taxes.
>
> [12] The State directs the Court's attention to 10 other state trust taxation statutes that also look to trust beneficiaries' in-state residency, see Brief for Petitioner 6, and n. 1, but 5 are unlike North Carolina's because they consider beneficiary residence only in combination with other factors, see Ala. Code § 40–18–1(33) (2011); Conn. Gen. Stat. § 12–701(a)(4) (2019 Cum. Supp.); Mo. Rev. Stat. §§ 143.331(2), (3) (2016); Ohio Rev. Code Ann. §5747.01(I)(3) (Lexis Supp. 2019); R.I. Gen. Laws § 44–30–5(c) (2010). Of the remaining five statutes, it is not clear that the flexible tests employed in Montana and North Dakota permit reliance on beneficiary residence alone. See Mont. Admin. Rule 42.30.101(16) (2016); N.D. Admin. Code § 81–03–02.1–04(2) (2018). Similarly, Georgia's imposition of a tax on the sole basis of beneficiary residency is disputed. See Ga. Code Ann. § 48–7–22(a)(1)(C) (2017); Brief for Respondent 52, n. 20. Tennessee will be phasing out its income tax entirely by 2021. H.B. 534, 110th Gen. Assem., Reg. Sess. (2017) (enacted); see Tenn. Code Ann. § 67–2–110(a) (2013). That leaves California, which (unlike North Carolina) applies its tax on

the basis of beneficiary residency only where the beneficiary is not contingent. Cal. Rev. & Tax. Code Ann. § 17742(a); see also n. 10, *supra*.

> [13] The Trust also raises no challenge to the practice known as throwback taxation, by which a State taxes accumulated income at the time it is actually distributed. See, *e.g.*, Cal. Rev. & Tax. Code Ann. § 17745(b).

The Court rebuffed North Carolina's concern that "adopting the Trust's position will lead to opportunistic gaming of state tax systems" (highlighting is mine):

> Though this possibility is understandably troubling to the State, it is by no means certain that it will regularly come to pass. First, the power to make distributions to Kaestner or her children resides with the trustee. When and whether to make distributions is not for Kaestner to decide, and in fact the trustee may distribute funds to Kaestner while she resides in North Carolina (or deny her distributions entirely). Second, we address only the circumstances in which a beneficiary receives no trust income, has no right to demand that income, and is uncertain necessarily to receive a specific share of that income. Settlors who create trusts in the future will have to weigh the potential tax benefits of such an arrangement against the costs to the trust beneficiaries of lesser control over trust assets. In any event, mere speculation about negative consequences cannot conjure the "minimum connection" missing between North Carolina and the object of its tax.

The highlighted text above suggests that the case protects only trusts where any future distribution to any beneficiary in the state is speculative. The Court noted in passing that the trust was to terminate when the beneficiary reached age 40, but the trustee decanted into a new trust (in a year after the taxable year being litigated), with no objection from the primary beneficiary.[2527]

At a meeting of fiduciary income tax experts at the end of June 2019, I heard the following:

- The North Carolina bar has in the past proposed a statute that would pass muster, and the legislature declined to address the issue.

- At least 400 protective claims for refunds have been filed.

- *Kaestner* has no bearing on most other states. North Carolina, Georgia, and Tennessee are the only directly affected states, and Tennessee will get rid of its income tax.

- Counsel for the state struggled to explain how state and federal income taxation are connected. He later publicly admitted that he got raked over the coals by the Supreme Court justices.

- Attendees were disappointed that the case did not grant guidance that applies to other states and that this case did not even rule on NC law outside of a purely discretionary trust where the beneficiary has not received a distribution. They speculated that the court had hoped to issue useful guidance but then found that fiduciary income tax was more complex than they realized. They speculated that, rather than admitting poor judgment in tackling an

[2527] See part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting.

> issue on which it didn't have sufficient depth of understanding to set forth helpful rules, the Court decided the case narrowly then shortly thereafter declined to review *Fielding* below.

II.J.3.e.ii.(d). Contingent Beneficiary in California

Steuer v. Franchise Tax Board, 265 Cal. Rptr. 3d 216, 2020 WL 3496779 (Cal. Ct. App. 2020), reasoned and held in part II, "Contingent Beneficiary":

> Under section 17742, trust income may also be taxed based on residency, without regard to source, if there is a noncontingent California beneficiary. (§ 17742.) Where a trustee has absolute discretion to allocate net trust income to the beneficiary, the beneficiary has a contingent interest in the distribution. (*Estate of Canfield* (1947) 80 Cal.App.2d 443, 451-452, 181 P.2d 732; Cal. Franchise Tax Bd., Technical Advice Mem. 2006-0002 (Feb. 17, 2006) p. 2 ["A resident beneficiary whose interest in a trust is subject to the sole and absolute discretion of the trustee holds a contingent interest in the trust"].) "The intention of the settlor as shown by the document creating the trust is the most important single element in the determination of the rights of the trustee." *(Estate of Miller* (1964) 230 Cal.App.2d 888, 908-909, 41 Cal. Rptr. 410 (*In re Miller*).) Accordingly, we review the trust document to determine whether there are any limitations on a trustee's discretion to distribute income to a beneficiary. (See Cal. Franchise Tax Bd., Technical Advice Mem. 2006-0002 (Feb. 17, 2006) pp. 3-4 ["[t]he extent of the interest of the beneficiary of a trust depends upon the manifestation of intention of the settlor"].)
>
> Here, the Paula Trust document grants "sole absolute discretion" to the cotrustees to make distributions of trust income and principal, but that authority "shall not *require* the Trustee to make any distribution to any person." (Italics added.) Instead, the document simply authorized, rather than mandated, the trustees to distribute as much net income or principal of the trust as the trustee deemed to be in the beneficiary's best interests, but the determination of the amount to distribute was also in the trustee's sole absolute discretion.
>
> This "best interests" language does not, as FTB asserts and relying on *In re Miller*, limit the trustee's discretion. In that case, the settlor intended the trust to support one of the beneficiaries, and the trustee owed a duty "to make allowances for [the beneficiary's] support and maintenance ...." (*In re Miller*, *supra*, 230 Cal.App.2d at p. 909, 41 Cal. Rptr. 410.) The court determined the trustee abused his discretion by failing to make any distributions "sufficient to keep [the beneficiary] alive, let alone to maintain her in the condition and situation to which she was accustomed." (*Id*. at pp. 909-910, 41 Cal. Rptr. 410.)
>
> The trust's provisions here are quite distinguishable. The trustees are not required to make distributions to support Medeiros. Although the trust included various examples of distributions that would be in the best interest of the beneficiary - including permitting the beneficiary to travel for education or pleasure, purchasing a residence or investing in business - the trust expressly stated these examples were "intended solely as a precatory guide to the Trustee and shall in no way be construed to alter, limit or enlarge the discretions and powers conferred upon the Trustee by any other provision hereof nor to require the Trustee to make any distribution to any beneficiary." If anything, the decision in *In re Miller* is only relevant here for the limited and uncontroversial premise that "[e]ven where the trustee has discretion ..., the court will not permit him to abuse the

discretion." (*In re Miller*, *supra*, 230 Cal.App.2d at p. 907, 41 Cal. Rptr. 410.) Like the trial court, we find the trust instrument's plain and unambiguous terms provided the trustees with sole and absolute discretion to make distributions to Medeiros.

FTB further asserts aside from reviewing the trust instrument, there must be a factual inquiry to determine the specific nature of a beneficiary. In FTB's opinion, the facts demonstrate Medeiros's interest in the trust income is noncontingent since the trustees notified her of future distributions, she relied on those distributions in making certain financial choices, and she directed how the trustees would pay the distributions.[4]

[4] The unique circumstances presented in *Flato v. Commissioner of Internal Revenue* (5th Cir. 1952) 195 F.2d 580 - a trust in which two brothers were both trustees and beneficiaries for themselves, and a third brother beneficiary - do not help FTB's argument. (*Id.* at p. 581.) The beneficiaries in that case requested and received whatever amounts of trust income they desired, and the Fifth Circuit determined the trial court properly reviewed the " 'whole nexus of relations between the settlor, the trustee and the beneficiary' ...." (*Id.* at pp. 582-583.) However, the court limited the ruling to that particular case, noting "the beneficiaries possessed such command over the distribution of the income of the trusts, such income, whether distributed or not, is taxable to them." (Id. at p. 583 & fn. 3.)

Those actions do not change that the distributions are conditioned upon the trustee's discretion to approve or make them. (See *N.C. Dept. of Rev. v. Kimberley Rice Kaestner 1992 Family Trust* (2019) 588 U.S. ----, ----, 139 S.Ct. 2213, 2223, 204 L.Ed.2d 621 ["by reserving sole discretion to the trustee, the Trust agreement still deprived [beneficiaries] of any entitlement to demand distributions or to direct the use of the Trust assets in their favor"].) As FTB's own technical memorandum notes, a contingent beneficiary "cannot compel the trustee to give him any portion of the income where the trust gives the trustee absolute discretion as to the amounts of income to distribute." (Cal. Franchise Tax Bd., Technical Advice Mem. 2006-0002 (Feb. 17, 2006) p. 3, fn. 3.) While Medeiros could certainly request distributions or assign distributions once she received them to other trusts or various financial arrangements, she "cannot be certain that [s]he will ever enjoy any of [the] proceeds of the trust. Consequently, where the extent of the interest of the beneficiary is dependent upon the exercise of discretion by the trustee, that interest is contingent." (*Ibid*.)

The settlor intended the trustees to have absolute discretion, and we affirm the trial court's finding Medeiros is a contingent beneficiary.

II.J.3.e.ii.(e). Corporate Trustee Presence

Bank of America, N.A., trustee [of 34 trusts], v. Commissioner Of Revenue, 54 N.E.3d 13, 474 Mass. 702 (Ma. Supreme Court 2016), reasoned:

We do not share the bank's view that for the purpose of assessing the inhabitance of a corporate trustee, the board has created a formal "presence and activities" test that focuses on the corporation's general business presence in the Commonwealth. Rather, we understand the board to have evaluated the specific, agreed-upon facts presented and to have reached its conclusion that the bank qualified as an inhabitant of the Commonwealth based on those facts — facts that included that, in terms of Massachusetts-based activities, the bank both conducted general banking transactions, maintaining over 200 branch offices staffed by bank employees, and performed work as a corporate trustee of the particular trusts at issue here. With respect to the latter, the board found that the bank:

> "operated and staffed offices to fulfill some of their obligations as trustees of the [subject] Trusts; maintained relationships with the beneficiaries of the [subject] Trusts and ... decided when to make distributions of trust assets to beneficiaries; administered the assets of the [subject] Trusts; consulted with clients and prospective clients [of other trusts] about [the bank's] trust services; ... provided places for execution of [other] trusts which named [the bank or U.S. Trust] as fiduciary; and researched and discussed issues involving the [subject] Trusts and discussed such issues with grantors, beneficiaries and/or their representatives."

The bank points to the language of § 14 providing that a corporate trustee will "be subject to [the fiduciary income tax provisions of G. L. c. 62] in the same manner and under the same conditions as individual inhabitants of the commonwealth acting in similar capacities " (emphasis added). We agree with the bank that the quoted language from § 14 requires a focus on the actions within the Commonwealth of a corporation acting as a corporate trustee, including specifically acting as trustee of the trust or trusts potentially subject to fiduciary income tax liability, and not just on the corporation's general business activities. Put more generally, we interpret the three interrelated statutes that apply in this case, §§ 1 (f) (2), 10, and 14, to mean that a corporate trustee will qualify as an "inhabitant" of the Commonwealth within the meaning and for the purposes of these statutes if it: (1) maintains an established place of business in the Commonwealth at which it abides, i.e., where it conducts its business in the aggregate for more than 183 days of a taxable year; and (2) conducts trust administration activities within the Commonwealth that include, in particular, material trust activities relating specifically to the trust or trusts whose tax liability is at issue.

We conclude that the board's decision in the present case is consistent with this interpretation of statutory requirements. It concluded in effect that for a corporate trustee such as the bank to be deemed an inhabitant under § 1 (f) (2), there must be proof that the corporation has an established presence in the Commonwealth through, e.g., maintaining a permanent office or offices in Massachusetts and engaging in regular business activities here, for more than one-half of the tax year at issue. Such a presence corresponds to the presence of an individual inhabitant at a permanent place of abode for more than 183 days in a year. Certainly the agreed-upon facts establish that the bank met this requirement. But as the portion of the board's decision quoted supra shows, the board did not stop with the bank's general corporate activities within the Commonwealth. Rather, the board considered the Commonwealth-centered activities conducted by the bank in its capacity as corporate trustee, including activities that were centered on the subject trusts. And we agree with the board that the bank's activities relating to administration of the subject trusts demonstrate the bank's material and specific trust-related nexus to Massachusetts for more than 183 days of the tax year at issue.

The court declined to address constitutional issues because the bank failed to raise the issue to the Appellate Tax Board.

II.J.3.e.ii.(f). Business Income; *Fielding* (MN 2018); *Metropoulos* (CA 2022)

None of this discussion is concerned with business income. When a business operates in a state, the state taxes that business income. Generally, a trust that owns an interest in a pass-through entity such as an S corporation or partnership (including an LLC) will report income taxable to the states in which the entity does business, or the entity will pay tax on the income taxable to one or more of its owners instead of its owners reporting that income. See part II.G.3 State Income Taxation.

On June 28, 2019, the U.S. Supreme Court declined to review *Fielding v. Commissioner*, 916 N.W.2d 323 (Minn. 2018). That case involved a trust that owned shares in an S corporation. Nobody disputed Minnesota's ability to tax the trust's distributive share of the Minnesota S corporation's Minnesota source income.[2528] Rather, the dispute was taxing the other income when the trust's sole potentially meaningful contact with Minnesota regarding that other income was the grantor's residence. The Minnesota Supreme Court held that taxing the trust on that other income on that basis alone violated the Due Process Clauses of the U.S. and Minnesota Constitutions, which it view as identical to each other.

Attendees at the June 2019 meeting I attended speculated that, after *Kaestner*, the Court would have no appetite to hear other state fiduciary income tax cases.

Steuer v. Franchise Tax Board, 265 Cal. Rptr. 3d 216, 2020 WL 3496779 (Cal. Ct. App. 2020), held that California source income is taxable to a trust whether or not the trust is a California resident.

2009 Metropoulos Family Trust v. California Franchise Tax Board, 79 Cal. App.5th 245, 294 Cal. Rptr.3d 557 (Cal. Ct. App. 2022), held that nonresident trusts were taxed on their proportionate share of gain on the sale of intangible property, namely goodwill associated with the subsidiary's business located in California. Although the sale of intangible property is normally sitused to the taxpayer's residence, intangible property used in a business is sitused to where the business is conducted. The court in this case did an excellent job discussing the law in this area.

The Multistate Tax Commission's website includes at https://www.mtc.gov/Uniformity/Adopted-Uniformity-Recommendations models organized into the following general categories: Allocation and Apportionment Regulations, Business Income Tax - General, Other Income Tax, Sales and

[2528] The Minnesota court also noted (emphasis below supplied by the court):

> The Commissioner urges us to hold that the Trusts may be taxed as residents due to their connections to FFI, a Minnesota S corporation, and it is undisputed that the Trusts held interests in *intangible property*, FFI stock. Although FFI was incorporated in Minnesota and held physical property within the state, the intangible property that generated the Trusts' income was *stock* in FFI and funds held in investment accounts. These intangible assets were held outside of Minnesota, and thus do not serve as a relevant or legally significant connection with the State. *See, e.g.*, *Safe Deposit & Tr. Co.*, 280 U.S. at 92 (stating that intangible assets held by a trustee located in Maryland "did not and could not follow" the grantor and beneficiaries who were domiciled in Virginia); *In re Swift*, 727 S.W.2d 880, 881-82 (Mo. 1987) (concluding that the "creation and funding" of the trusts in Missouri with intangible assets that the trustee "held, managed and administered in Illinois" did not allow Missouri to tax the trust's income); *Mercantile-Safe Deposit & Tr. Co. v. Murphy*, 242 N.Y.S.2d 26, 28 (N.Y. App. Div. 1963) (concluding that New York, which was the grantor's domicile, could not tax the trust's income from intangible assets held in Maryland).

Use or Transaction Taxes, and Tax Administration.[2529] See also State Taxation of Partnerships - MTC. ACTEC Fellow Gray Edmondson posts updates from time to time at News - ESA Law.

If a trust owns an interest in a pass-through entity and resides in a state with no or low income tax, then any effort to minimize income tax payable to high rate states would focus on the entity hiring a state income tax expert to minimize the tax burden to the entity's owners.

All of the above assumes the underlying business assets are sold (or deemed sold). However, when a partnership interest is transferred, the buyer can get an inside basis step-up without a deemed sale of the partnership's assets; see part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.

Pursuant to Article IV, Section 6(3) of the Multistate Tax Compact (as it existed in 2018), which applies pursuant to Missouri Revisor of Statutes - Revised Statutes of Missouri, RSMo Section 32.200, capital gains from the sale of intangible personal property are not taxable to a nonresident individual who does not use the intangible personal property as part of that individual's conduct of a business in Missouri.

A partnership interest is intangible personal property. Unless the state has a rule that is inconsistent with federal law, Missouri law follows federal. *Grecian Magnesite Mining v. Commissioner*, 149 T.C. 63 (2017), *aff'd* 926 F3d 819 (D.C. Cir. 2019), held that one does not look through a partnership when selling a partnership interest, unless some specific federal law says to do so.[2530] (Congress later enacted a statute overriding this rule for certain international income tax purposes, but this fundamental aspect of this holding remains.) In *Noell Industries, Inc. v. Idaho State Tax Commission*, 470 P.3d 1176 (2020), the Idaho Supreme Court held that the sale of an interest in a partnership that did business in Idaho (Blackhawk) was nonbusiness income because the owner of the partnership interest (Noell Industries) was merely a passive investor:

> In addition, while Noell Industries occupied the same role and business functions as Blackhawk prior to the 2003 reorganization, Blackhawk's creation relieved Noell Industries of those responsibilities. In the 2003 reorganization, Noell Industries effectively handed over the reins to Blackhawk to make, sell, and distribute tactical and combat gear. Noell Industries could have retained control, and oversight over Blackhawk, but it did not. Control and management of Blackhawk products passed from Noell's wholly-owned corporation to the multi-manager managed limited liability company-Blackhawk. Like in Western Phoenix, N.V., Noell Industries' sole business between 2003 and 2010 was holding its investment in Blackhawk.
>
> Because this type of gain does not meet the definition of "business income" under either the transactional test or functional test (including the unitary business test), we affirm the district court's conclusion that the gain from selling Blackhawk was nonbusiness income under Idaho Code section 63-3027.... This case clearly concerns a passive investment, the taxation of which is not apportionable to Idaho.

[2529] For more about the Multistate Tax Commission, see fn 1150 in part II.G.3 State Income Taxation.
[2530] See part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest, especially fn. 5651.

The Idaho State Tax Commission appealed the case to the U.S. Supreme Court, and the Multistate Tax Commission filed an amicus brief (2/12/2021) in support of the Idaho State Tax Commission. Certiorari was denied 2/22/2021.

Similarly, in *Vas Holdings & Investments LLC v. Commissioner of Revenue*, 186 N.E. 3d 1240 (Mass. 2022), the Supreme Judicial Court of Massachusetts, Suffolk, held:

> This case requires us to consider the constitutional constraints on the Commonwealth's ability to tax a nondomiciliary corporation on the capital gain it reaped from the sale of its fifty percent membership interest in an in-State limited liability company. The nondomiciliary corporation, VAS Holdings & Investments LLC (VASHI), maintains that the ‘‘unitary business principle’’ is the only constitutionally permissible methodology pursuant to which the Commonwealth may impose a tax on such capital gain. Under that principle, the Commonwealth may tax the capital gain only where (i) there is functional integration, centralization of management, and economies of scale between the out-of-State corporation and the in-State entity, or (ii) the investment in the in-State entity serves an operational function of the out-of-State corporation.
>
> The Commissioner of Revenue (commissioner) concedes that, under the unitary business principle as applied to the facts of this case, the capital gain is not taxable in the Commonwealth. Nevertheless, he contends that the capital gain may be taxed because it reflects the in-State entity's growth in the Commonwealth. Because the nondomiciliary corporation reaped the benefit of that growth, the commissioner maintains, the Commonwealth may impose a tax on the nondomiciliary, consistent with the due process clause and the commerce clause of the United States Constitution. The Appellate Tax Board (board) agreed, and this appeal followed.
>
> The constitutionality of the imposed taxes was the only issue raised before the board and before this court, and all parties, including the board, have a significant interest in its resolution. Because we are persuaded that the constitutional limitations on the Commonwealth's authority to tax a nondomiciliary corporation may be satisfied where, as here, the nondomiciliary corporation has reaped the financial benefits (in the form of a capital gain) from its fifty percent ownership interest in an in-State entity whose growth is tied inextricably to the protections, opportunities, and benefits afforded to it by the Commonwealth, we agree that the capital gain could be subject to the Commonwealth's tax. Before the board, the parties did not dispute the statutory authority of the commissioner to deviate from the unitary business principle. Yet, any tax beyond that which is authorized by statute is invalid; accordingly, following oral argument before this court, we asked the parties to address whether the Legislature had authorized the tax asserted by the commissioner; having reviewed the parties' postargument briefs and the pertinent statutes, we conclude that the commissioner lacked the requisite statutory authority and reverse the decision of the board.1
>
> [1] We acknowledge the amicus briefs submitted by the Multistate Tax Commission and the American College of Tax Counsel.

The Multistate Tax Commission's positions fly in the face of the Multistate Tax Compact, which it sponsors! On the other hand, if the owner of a partnership actively participates in the partnership's activities, the partnership interest might be a business asset instead of a mere investment in intangible personal property. For examples of imputing partnership business activity to a partner, see parts II.Q.7.f.iii Active Business Requirement for Code § 355 (especially parts II.Q.7.f.iii.(d) Rev. Rul. 92-17 – Participation by Partners in Rental LP and II.Q.7.f.iii.(e) Rev. Rul. 2007-42 – Level of Participation in Rental LLC) and III.B.5.e.ii Code § 6166 Deferral (especially parts III.B.5.e.ii.(a) What is a Business? and III.B.5.e.ii.(b) Tiered Structures). A partner's participation in a business may be important in other areas, such as parts II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income, II.I.8 Application of 3.8% Tax to Business Income, and II.K Passive Loss Rules.

The Multistate Tax Commission is seriously considering recommending that any investment partnership (not one that operates a business) should be disregarded and an asset sale be deemed to occur. I last saw its draft report, "State Taxation of Partnerships," as of August 22, 2022.[2531] One must research the relevant state's law as to whether the state looks through the partnership in a manner that differs from federal law and how it balances the tension described above.

Some federal exceptions nuances to the entity theory:

- Code § 751 may tax part of the gain on sale of a partnership interest as ordinary income, thereby taking it out of capital gain protection. See part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

- As described in the text accompanying fn 4039 in part II.P.3.f Conversions from Partnership to Sole Proprietorships and Vice Versa, a seller of a partnership interest is taxed as selling the partnership interest, even if the buyer is treated as buying the assets.

II.J.3.e.ii.(g). Due Process and State Estate Tax – *Evans* (Oregon)

In *Estate of Evans v. Department of Revenue*, 492 P.3d 47 (Oregon 7/29/2021), the decedent, an Oregon resident, was the beneficiary of a QTIP trust created in Montana. Oregon taxed the estate based on the first spouse's QTIP election. Among the court's reasoning:

> Applying that standard to this case, we conclude that Evans had sufficient "enjoyment" of the trust principal (in addition to the enjoyment of the income generated thereby) to satisfy *Kaestner*'s requirement of "some degree of possession, control, or enjoyment" of the trust assets and thus to permit Oregon to include those trust assets in Evans's taxable estate.[5] While, under her husband's modified will, Evans could not claim a right to the whole of the trust principal or any particular portion thereof, she had a potential right to receive distributions of principal, to the extent that trust income was insufficient to satisfy her needs. No other person could receive any part of the principal during Evans's lifetime. And while the remainder beneficiaries had a right to whatever was left of the principal after Evans's death, they could not prevent her from receiving distributions of principal that would reduce or even eliminate their own ultimate shares in the remainder.
>
> > [5] "Enjoyment," in this context, appears to derive its meaning from the intransitive form of the verb "enjoy," i.e., "to have for ones use, benefit, or lot." *Merriam-Webster Dictionary*, https://www.merriam-webster.com/dictionary/enjoy (accessed July 21, 2021).

[2531] For more analysis, see Edmondson, "MTC Partnership Update" (8/9/2022).

The Oregon Supreme Court concluded:

> We have determined that Evans had sufficient enjoyment of the assets of the Gillam Trust during her lifetime that those assets cannot be dissociated from her, and that therefore, through Evans, Oregon had the minimum connection to the trust assets that due process requires before Oregon may tax the assets. And we have rejected plaintiff's additional arguments that, even if Oregon had the required minimum connection to the assets, its taxation of the assets is nonetheless unfair - and thus violates the Due Process Clause. It follows that the Tax Court did not err when it determined that Oregon's inclusion of the trust assets in Evans's Oregon estate was consistent with due process.

Lesson: before moving from a state that has no estate tax to a state that has estate tax, consider whether the surviving spouse should give up the QTIP trust (or divide the trust and renounce part of it), with the consequences described in part II.H.2.c QTIP Trusts - Code § 2519 Trap.

II.J.3.e.iii. Whether a State Recognizes Grantor Trust Status; Effect of Grantor Trust Status on a Trust's Residence

A state might ignore a trust's existence while the trust is a grantor trust.[2532] On the other hand, some states do not recognize grantor trust status of irrevocable trusts.[2533]

[2532] For example, in defining what is a trust, Illinois disregards the existence of a grantor trust. 35 ILCS 5/1501(a)(20)(D) and 86 Ill. Admin. Code § 100.3020(a)(4) refer to grantor trusts under Code §§ 671-678.

[2533] Nenno, 869 T.M. II.A. states:

> As noted above, if a trust is treated as a grantor trust for federal and for state income-tax purposes, all income (including accumulated ordinary income and capital gains) is taxed to the trustor, making planning difficult if not impossible while that status continues. Nevertheless, where the federal and state grantor-trust rules are not identical, it might be possible to structure a trust to be a grantor trust for federal purposes but to be a nongrantor trust for state purposes and to arrange matters so that the trust is not subject to that state's tax. For instance, Pennsylvania and Tennessee don't have grantor-trust rules for irrevocable trusts; Arkansas, the District of Columbia, Louisiana, and Montana tax the grantor only in limited circumstances;[21] and Massachusetts classifies a trust as a grantor trust based on §§ 671–678 only, so that a trust that falls under § 679 will be a grantor trust for federal but not for state purposes. Unfortunately, a number of those states tax individuals based on federal taxable income,[22] which captures all federal grantor-trust income,[23] making the foregoing planning option unavailable.
>
> [21] Ark. Inc. Tax Reg. § 4.26-51-102; D.C. Code §§ 47-1809.08–47-1809.09; La. Rev. Stat. Ann. § 47:187; Mont. Code Ann. § 15-30-2151(5).
>
> [22] § 63.
>
> [23] § 671.

Instructions to Pennsylvania's fiduciary income tax returns explain that they respect the grantor trust rules only for revocable trusts. Michael A. Breslow on Pennsylvania Senate Bill 815: Pennsylvania Will (Finally!) Recognize Grantor Trusts, Steve Leimberg's Income Tax Planning Newsletter #251, reported:

> On December 14, 2023, Pennsylvania Governor Shapiro signed Senate Bill 815, which amended the Pennsylvania tax code by adding subparagraph (c) to 72 P.S. §7302. Beginning January 1, 2025, Pennsylvania will finally join the other forty-nine states (and the District of Columbia) in recognizing grantor trusts. Effective for tax years starting after January 1, 2025, 72 P.S. § 7302(c) provides that income received by a Pennsylvania resident trust, or by a nonresident trust from sources within Pennsylvania, that is a grantor trust for federal income tax

Given that clients often retire to jurisdictions that are not subject to income tax, keeping the trusts as grantor trusts until the clients move to those jurisdiction might mean that the state in which the trust was created will not treat the trust as a resident trust, because for income tax purposes the trust was deemed not to exist until the grantor was not a resident.

See also part II.J.15.b QSSTs and State Income Tax Issues.

II.J.3.f. Consider Trust Purposes

If shifting the incidence of taxation requires making distributions, consider whether distributions are appropriate. Consider whether distributions undermine the following nonexclusive list of concerns:

- Supplemental needs trusts designed to protect the flow of governmental benefits
- Protection from tort creditors
- Protection from business creditors
- Protection from spouses or ex-spouses
- Otherwise keeping funds inside the family
- Poor spending habits
- Inability to handle money
- Discouraging undue influence
- Funding addictive behavior
- Protecting from estate tax
- Other spendthrift concerns

II.J.3.g. Effect on Future Years

The first time a distribution of principal is made from principal without referring to or actually distributing capital gain proceeds, the trustee is essentially electing for that year and all future years whether such distributions will carry out capital gains.[2534]

Causing a trust to be taxed to the grantor can be turned on or off by the presence or absence of a swap power or other powers.[2535]

---

purposes will be taxable to the grantor for Pennsylvania income tax purposes, regardless of whether income is distributed to the beneficiaries. Note that this change will not apply to trusts for the 2023 or 2024 tax years.

[2534] See part II.J.8.c.ii Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary.

[2535] See part III.B.2.h How to Make a Trust a Grantor Trust.

However, turning off the powers that make a trust deemed owned by one or more beneficiaries is more challenging.[2536] If one wants flexibility in turning on or off beneficiary deemed-owned trust treatment, consider using QSST strategies (which can cause difficulty splitting up trust assets if more than one person is a remainderman).[2537]

II.J.3.h. Drafting for Flexibility in Trust Income Taxation

When drafting using an ascertainable standard for distributions ("support" in my documents),[2538] one can give the trustee the flexibility to consider or ignore the beneficiary's other resources. If the trustee has a legal duty to support one or more beneficiaries, consider using "reasonable support and comfort"[2539] to emphasize that distributions are more than just the minimum that is required to discharge a support obligation.[2540]

I also like to include standards that are not ascertainable ("welfare" in my documents). To avoid the IRS alleging adverse estate/gift tax consequences, the trustee either cannot have been

[2537] See parts III.A.3.e.vi QSST (including part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts) and III.A.3.e.iv Flexible Trust Design.

[2538] See Reg. §§ 1.674(b)-1(b)(5)(i) (grantor trust income tax rules - see text accompanying fn 6670 in part III.B.2.h.vii.(a) Distribution Provisions Resulting from Control Causing Grantor Trust Treatment), 20.2041-1(c)(2) (exception to estate tax general power of appointment – see text accompanying fn 2124 in part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap) and 25.2511-1(g)(2) (gift tax ascertainable standard – see text accompanying fn 2485 in part II.J.2.b Trust Provisions Authorizing Distributions).
Some documents include a statement that the trustee's determination is conclusive and binding on all parties. Reg. §§ 1.674(b)-1(b)(5)(i) and 25.2511-1(g)(2) take the position that such language undermines the ascertainable standard exception, but Reg. § 20.2041-1(c)(2) is silent on the issue. Those regulations were promulgated before the Uniform Trust Code ("UTC"), section 814(s) of which provides:

> Notwithstanding the breadth of discretion granted to a trustee in the terms of the trust, including the use of such terms as "absolute", "sole", or "uncontrolled", the trustee shall exercise a discretionary power in good faith and in accordance with the terms and purposes of the trust and the interests of the beneficiaries.

UTC §§ 1002(b), 1008(a)(1) (see also the sections to which the Comments to Section 103(8) refer) provide similar references to good faith and the beneficiaries' interests in determining whether a trustee is liable. Thus, the assumption that "conclusive and binding" language makes the trustee's discretion unreviewable might be incorrect. I would not use such language in connection with trying to establish an ascertainable standard, but generally I would not urge reformation of an irrevocable trust merely for using that language. *Jennings v. Smith*, 161 F2d 74 (2nd Cir. 1947), upheld as not causing estate inclusion an ascertainable standard that included some language about the trustee's "absolution discretion."

[2539] As defined in Reg. §§ 25.2511-1(g)(2) (see text accompanying fn 2485 in part II.J.2.b **Trust** Provisions Authorizing Distributions) and 1.674(b)-1(b)(5)(i) (grantor trust income tax rules - see text accompanying fn 6670 in part III.B.2.h.vii.(a) Distribution Provisions Resulting from Control Causing Grantor Trust Treatment). See also Reg. § 20.2041-1(c)(2) (exception to estate tax general power of appointment – see text accompanying fn 2124 in part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap).

[2540] Generally, a legal support obligation encompasses a much more narrow view of support than does what is permitted for an ascertainable standard, but one would want to check state law to verify. Also, if a trust makes distributions for items encompassed by a support obligation, query whether the trust has a claim against the person who has the support obligation. Finally, state laws prohibiting trustees from discharging their legal obligations, as well as any such prohibitions in the trust instrument itself, should reinforce the idea of the trust having a claim against the beneficiary. Nevertheless, many estate planners prefer to have other mechanisms for getting distributions to dependent children.

appointed by the beneficiary or was appointed by the beneficiary but is not a related or subordinate party (as defined in Code § 672(c))[2541] with respect to the beneficiary.[2542]

When drafting, consider including an annually lapsing withdrawal right to make the trust deemed owned in part by the beneficiary;[2543] one twist on the power would be giving the trustee or a trust protector the power to turn off the power for a year (or range of years) before the year starts, allowing the power to be turned off if creditors are hovering. Absent such a provision, one might convert a trust to a partial beneficiary deemed-owned trust by exercising one of the standards described above with respect to the lesser of $5,000 or 5% of the trust's assets and giving the beneficiary the power to withdraw the declared amount or portion.[2544] In either case, such treatment generally has a permanent effect.[2545]

If locking in the beneficiary as the deemed owner is unattractive, the trust can dump its assets in an S corporation, make a QSST election when taxing the beneficiary is attractive,[2546] and convert to an ESBT when trapping income in the trust (primarily when the trust is not subject to state income tax but the beneficiary is) is more attractive.[2547] However, planning using S corporations involves additional long-term planning.[2548]

Also, to promote flexibility in including capital gains in distributable net income that the trustee can elect to carry out to the beneficiaries, consider using flexible language regarding allocating receipts between income and principal.[2549]

II.J.3.i. Planning for Excess Losses

Generally, an estate or nongrantor trust cannot pass losses (other than depreciation)[2550] to beneficiaries except in the year of termination. Also consider the points made in part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good in light of planning a trust's and its beneficiaries' income and losses.

If the trust is not terminating by the end of the calendar year, consider accelerating income (perhaps selling appreciated assets, among other items) or deferring deductions if and to the extent that the trust's deductions otherwise would exceed its income.

On the final termination of an estate or a nongrantor trust, it can pass to its beneficiaries a net operating loss carryover under Code § 172, a capital loss carryover under Code § 1212, or for

[2542] For the latter, see fn. 6713.
[2543] See part III.B.2.i.vii.(b) Determining Portion Owned When Trust Is Only a Partial Grantor Trust.
[2544] See part II.J.4.f Making Trust a Partial Grantor Trust as to a Beneficiary.
[2545] For flexibility regarding beneficiary grantor trust status, see fn. 2537.
[2546] See part III.A.3.e.vi QSST as a Grantor Trust; Sales to QSSTs, which is part of the larger part III.A.3.e QSSTs and ESBTs.
[2547] See parts III.A.3.e.ii.(c) When ESBT Income Taxation Might Help and III.A.3.e.iv Flexible Trust Design When Holding S Corporation Stock.
[2548] See part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts (Whether or Not a Sale Is Made).
[2549] See part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law, especially the text in fn. 2765.
[2550] See part II.J.11.a.ii.(b) Beneficiary's Ability to Deduct Depreciation That Generates Net Loss.

the last taxable year of the estate or trust deductions (other than the exemption and charitable deduction) in excess of gross income for such year, all to the extent provided in regulations:[2551]

- These carryovers and excess deductions are allocated among the beneficiaries succeeding to the property proportionately according to the share of each in the burden of the loss or deductions, which can include those receiving specific bequests that are abated.[2552] A person who qualified as a beneficiary succeeding to the property with respect to one amount and does not qualify with respect to another amount is a beneficiary succeeding to the property as to the amount with respect to which the beneficiary qualifies.[2553]

- Nothing in Reg. § 1.642(h)-1 expressly addresses whether Code § 1231 losses[2554] that generated a net operating loss also are reported as an informational item on the beneficiaries' K-1s. Doing so would be consistent with the principles of Code §§ 652(b) and 662(b),[2555] but those provisions deal with reporting income and do not coordinate with Code § 642(h).

- However, other than the NOL and capital loss carryover, excess deductions on termination had been miscellaneous itemized deductions in the hands of the beneficiaries, which had meant they will not receive any tax benefit for them until 2026. See parts II.G.4.n Itemized Deductions; Deductions Disallowed for Purposes of the Alternative Minimum Tax and II.J.3.d Who Benefits Most from Deductions. As needed, consider recognizing gain that can be offset by these deductions before distributing assets (essentially obtaining a free basis step-up) or retaining taxable income-producing assets, the income from which can be offset by those deductions instead of being taxable to the beneficiaries (if they had been distributed to the beneficiaries). Related party sales or an election to recognize gain on distribution[2556] are ways to recognize gain while keeping assets within the family. Neither the personal exemption nor the Code § 642(c) income tax deduction for charitable contributions is included in these excess deductions.[2557]

- When an electing small business trust (ESBT)[2558] terminates, if the S portion has a net operating loss under Code § 172, a capital loss carryover under Code § 1212, or deductions in excess of gross income, then any such loss, carryover, or excess deductions are allowed as a deduction, in accordance with the regulations under Code § 642(h), to the trust, or to the beneficiaries succeeding to the property of the trust if the entire trust terminates.[2559]

2551 Code § 642(h); Reg. § 1.642(h)-2.

2552 Reg. § 1.642(h)-4, which concludes with an example:

> A decedent's will leaves $100,000 to A, and the residue of his estate equally to B and C. His estate is sufficient to pay only $90,000 to A, and nothing to B and C. There is an excess of deductions over gross income for the last taxable year of the estate or trust of $5,000, and a capital loss carryover of $15,000, to both of which section 642(h) applies. A is a beneficiary succeeding to the property of the estate to the extent of $10,000, and since the total of the excess of deductions and the loss carryover is $20,000, A is entitled to the benefit of one half of each item, and the remaining half is divided equally between B and C.

2553 Reg. § 1.642(h)-4.

2554 See part II.G.6.a Code § 1231 Property.

2555 See part II.J.8.f.i.(b) Allocating Income Items Among Those Receiving It.

2556 See part II.J.8.d.i Distribution in Kind - Generally. The election to recognize gain on distribution may have unexpected results, so read that part carefully.

2557 Code § 642(h)(2).

2558 Part III.A.3.e.ii Electing Small Business Trusts (ESBTs describes what an ESBT is and how it is taxed.

2559 Reg. § 1.641(c)-1(j).

> Now that ESBT charitable contributions are deductible under Code § 170 instead of Code § 642(c),[2560] query whether they are included as an excess deduction.

Proposed regulations [REG-113295-18] (5/11/2020) would revise rules on excess losses on termination. They are consistent with ACTEC Comments on IRS Notice 2018-61 regarding the effect of new section 67(g) of the Internal Revenue Code on the ability of the beneficiary to deduct amounts comprising the section 642(h)(2) excess deduction upon termination of a trust or estate (February 19, 2019), in which I participated. The preamble explained:

> The Treasury Department and the IRS adopt the more specific suggestion from commenters of preserving the tax character of the three categories of expenses, rather than the suggestion of grouping all non-Section 67(e) expenses together, to allow for such expenses to be separately stated and to facilitate reporting to beneficiaries. Thus, under these proposed regulations, each deduction comprising the Section 642(h)(2) excess deduction retains its separate character, specifically: As an amount allowed in arriving at adjusted gross income; a non-miscellaneous itemized deduction; or a miscellaneous itemized deduction. The character of these deductions does not change when succeeded to by a beneficiary on termination of the estate or trust. Further, these proposed regulations require that the fiduciary separately state (that is, separately identify) deductions that may be limited when claimed by the beneficiary as provided in the instructions to Form 1041, U.S. Income Tax Return for Estates and Trusts and the Schedule K-1 (Form 1041), Beneficiary's Share of Income, Deductions, Credit, etc.
>
> The proposed regulations adopt the suggestion that the principles under § 1.652(b)-3 be used to allocate each item of deduction among the classes of income in the year of termination for purposes of determining the character and amount of the excess deductions under Section 642(h)(2). Section 1.652(b)-3(a) provides that deductions directly attributable to one class of income are allocated to that income. Any remaining deductions that are not directly attributable to a specific class of income, as well as any deductions that exceed the amount of directly attributable income, may be allocated to any item of income (including capital gains), but a portion must be allocated to tax-exempt income, if any. *See* § 1.652(b)-3(b) and (d). The proposed regulations provide that the character and amount of each deduction remaining after application of § 1.652(b)-3 comprises the excess deductions available to the beneficiaries succeeding to the property as provided under Section 642(h)(2).
>
> These proposed regulations incorporate a new example to illustrate the rule for determining the character of excess deductions in proposed § 1.642(h)-2. The proposed regulations also update the current example in § 1.642(h)-5 to account for changes in the Code since this example was last modified on June 16, 1965, in T.D. 6828, 1965-2 C.B. 264….
>
> Existing regulations under § 1.642(h)-4 provide that carryovers and excess deductions to which Section 642(h) applies are allocated among the beneficiaries succeeding to the property of an estate or trust proportionately according to the share of each in the burden of the loss or deduction. A person who qualifies as a beneficiary succeeding to the property of an estate or trust with respect to one amount and who does not qualify with respect to another amount is a beneficiary succeeding to the property of the estate

[2560] Code § 641(c)(2)(E), which is reproduced in fn 6055 in part III.A.3.e.ii.(b) ESBT Income Taxation - Overview.

or trust as to the amount with respect to which the beneficiary qualifies. These proposed regulations do not change the allocation method among beneficiaries set forth in § 1.642(h)-4.

One commenter asked that the Treasury Department and the IRS address the treatment of suspended deductions on the termination of a trust, such as those under Section 163(d) for investment interest, and asked that such suspended deductions be treated in the same manner as the excess **deduction** under Section 642(h). While the Treasury Department and the IRS acknowledge the comment, addressing suspended deductions under Section 163(d) and other Code sections is beyond the scope of these proposed regulations.

The preamble to the final regulations, T.D. 9918 (10/19/2020), provides:

B. Section 642(h)

1. IN GENERAL

Section 642(h) provides that if, on the termination of an estate or trust, the estate or trust has: (1) A net operating loss carryover under section 172 or a capital loss carryover under section 1212, or (2) for the last taxable year of the estate or trust, deductions (other than the deductions allowed under section 642(b) (relating to the personal exemption) or section 642(c) (relating to charitable contributions)) in excess of gross income for such year, then such carryover or excess will be allowed as a deduction, in accordance with the regulations prescribed by the Secretary of the Treasury or his delegate (Secretary), to the beneficiaries succeeding to the property of the estate or trust.

Section 1.642(h)-2(a), as articulated in the proposed regulations and these final regulations, provides that if, on termination of an estate or trust, the estate or trust has for its last taxable year deductions (other than the deductions allowed under section 642(b) or section 642(c)) in excess of gross income, the excess deductions are allowed under section 642(h)(2) as items of deduction to the beneficiaries succeeding to the property of the terminated estate or trust.

2. CHARACTER AND AMOUNT OF EXCESS DEDUCTIONS

Section 1.642(h)-2(b)(1) of the proposed regulations provides that each deduction comprising the excess deductions under section 642(h)(2) retains, in the hands of the beneficiary, its character (specifically, as allowable in arriving at adjusted gross income, as a non-miscellaneous itemized deduction, or as a miscellaneous itemized deduction) while in the estate or trust. The character of these deductions does not change when succeeded to by a beneficiary on termination of the estate or trust. Furthermore, an item of deduction succeeded to by a beneficiary remains subject to any limitation applicable under the Code in the computation of the beneficiary's tax liability.

One commenter noted that section 642(h) states that excess deductions on termination of an estate or trust are to be "allowed as a deduction, in accordance with regulations prescribed by the Secretary" and that there is no express authority to treat excess deductions as miscellaneous or non-miscellaneous itemized deductions (or tax preference items for AMT purposes). The Treasury Department and the IRS disagree with this comment. The characterization of these excess deductions as a single miscellaneous itemized deduction in the current regulations was made before the enactment of section 67(g) and served as an administrative convenience. Making a change to that characterization is now appropriate to reflect the temporary disallowance of miscellaneous itemized deductions under section 67(g) since the regulations were written and is a proper exercise of the Secretary's specific grant of regulatory authority in section 642(h).

Another commenter requested that non-miscellaneous itemized deductions included in excess deductions be fully deductible by the beneficiary and not subject to a second level of limitation applicable on the beneficiary's return, because the amounts already would have been subject to limitation on the return of the estate or trust. The commenter provided an example of a terminated trust that paid $25,000 of state income tax, for which the trust is limited to a $10,000 deduction under section 164(b)(6)(B) for taxable years beginning after December 31, 2017, and before January 1, 2026. In the commenter's example, the entire amount of the allowable $10,000 deduction was passed through to the beneficiary as an excess deduction on termination of the trust. The excess of state income tax over the $10,000 limitation ($15,000) would not pass through as an excess deduction to the beneficiaries in this circumstance because the excess amount was not deductible to the trust. Excess state income tax on termination of the estate or trust may, however, pass through to a beneficiary if the estate or trust had insufficient income to absorb the entire $10,000 of state income tax deduction. In that circumstance, the commenter opined that the limitation under section 164(b)(6)(B), having already been applied at the trust level, should not again be applied at the beneficiary level. The Treasury Department and the IRS carefully considered the comment but determined that beneficiaries remain subject to the limitation in section 164(b)(6)(B). The Treasury Department and the IRS found no authority to exempt such items from the application of any limitations applicable to the beneficiary under the Code. The excess deductions retain their character in the hands of the beneficiary on termination of the trust, and all applicable limitations apply to all of the beneficiary's items of that character, regardless of their origin.

One commenter noted that, under § 1.641(c)-1(j), if an electing small business trust (ESBT) election terminates or is revoked and the S portion has a net operating loss or capital loss carryover or deductions in excess of gross income, then any such loss, carryover or excess deductions are allowed as a deduction, in accordance with the regulations under section 642(h), to the trust or to the beneficiaries succeeding to the property of the trust if the entire trust terminates. However, the commenter also noted that under the TCJA, section 641(c)(2)(E) was amended to provide that ESBT charitable contributions are deductible under section 170, rather than under section 642(c), so that, unlike other trust charitable deductions, an ESBT's charitable deduction could constitute part of the excess deductions on termination of the trust. The commenter stated that neither the legislative history nor the explanation of the staff of the Joint Committee on Taxation addressed whether this result was intended. The Treasury Department and the IRS note that charitable contribution deductions under both sections 170 and 642(c) are non-miscellaneous itemized deductions under sections 63(d) and 67(b)(4) to the estate or trust and maintain that such character is retained in the hands of the beneficiary in these regulations. Although the Treasury Department and the IRS continue to consider the application of section 170 to ESBT charitable contributions under section 641(c)(2)(E), this issue is outside the scope of these regulations.

The above paragraph misses the point that was made by the ACTEC comments (the latter at my suggestion). Code § 642(c) charitable deductions are not *anything* in the beneficiary's hands, because Reg. § 1.642(h)-2(a)(1) expressly provides that Code § 642(c) charitable deductions are not allowed as Code § 642(h)(2) deductions. As a tax return preparer, I would interpret Reg. § 1.642(h)-2(a)(1), combined with this non-answer, as permitting an ESBT's Code § 170 deductions to be treated as excess deductions on termination.[2561]

The preamble continues:[2562]

> Another commenter requested clarification of whether an excess deduction on termination of a trust or estate that is allowed in determining the net investment income under section 1411 of the estate or trust remains deductible in the hands of the beneficiary in determining the net investment income of the beneficiary under section 1411. These final regulations provide that each excess deduction retains its separate character as a section 67(e) deduction, non-miscellaneous itemized deduction, or miscellaneous itemized deduction in the hands of the beneficiary. Whether a deduction retains its character as allowable in computing the net investment income of the beneficiary, however, is outside the scope of these regulations.
>
> **3. REPORTING OF EXCESS DEDUCTIONS**
>
> Section 1.642(h)-2(b)(1) of the proposed regulations provides that an item of deduction succeeded to by a beneficiary remains subject to any additional applicable limitation under the Code and must be separately stated if it could be so limited, as provided in the instructions to Form 1041, U.S. Income Tax Return for Estates and Trusts, and the Schedule K-1 (Form 1041), Beneficiary's Share of Income, Deductions, Credit, etc. Commenters requested that the Treasury Department and the IRS provide guidance on how the excess deductions are to be reported by both the terminated estate or trust and by its beneficiaries. The Treasury Department and the IRS released instructions for beneficiaries that chose to claim excess deductions on Form 1040 in the 2019 or 2018 taxable year based on the proposed regulations. In addition, the Treasury Department and the IRS plan to update the instructions for Form 1041, Schedule K-1 (Form 1041), and Form 1040, U.S. Individual Income Tax Return, for the 2020 and subsequent tax years to provide for the reporting of excess deductions that are section 67(e) expenses or non-miscellaneous itemized deductions.
>
> The Treasury Department and the IRS are aware that the income tax laws of some U.S. states do not conform to the Code with respect to section 67(g), such that beneficiaries may need information on miscellaneous itemized deductions of a terminated estate or trust. However, because miscellaneous itemized deductions are currently not allowed for Federal income tax purposes, that information is not needed for Federal income tax purposes. Therefore, it would not be appropriate to modify Federal income tax forms to require or accommodate the collection of such information while this deduction is suspended. Estates, trusts, and beneficiaries are advised to consult the relevant state

[2561] See text accompanying fn 6057 in part III.A.3.e.ii.(b) ESBT Income Taxation - Overview.
[2562] For section 67(e) deductions, see fn 2507 and accompanying text in part II.J.3.d Who Benefits Most from Deductions. Fn 2507 explains changes made 10/19/2020, which is after this NII preamble was written.

taxing authority for information about deducting miscellaneous itemized expenses on their state tax returns.

4. DETERMINATIONS OF DEDUCTIONS IN YEAR OF TERMINATION OF THE TRUST

Section 1.642(h)-2(b)(2) of the proposed regulations provides that the provisions of § 1.652(b)-3 are used to allocate each item of deduction among the classes of income in the year of termination for purposes of determining the character and amount of the excess deductions under section 642(h)(2). Accordingly, the amount of each separate deduction remaining after application of § 1.652(b)-3 comprises the excess deductions available to the beneficiaries succeeding to the property of the estate or trust as provided under section 642(h)(2). In addition, as previously explained, an item of deduction succeeded to by a beneficiary remains subject to any additional applicable limitation under the Code. Furthermore, § 1.642(h)-2(c) of the proposed regulations provides that excess deductions are allowable only in the taxable year of the beneficiary in which or with which the estate or trust terminates. That is, excess deductions of a terminated estate or trust may not carry over to a subsequent year of the beneficiary.

One commenter requested that these regulations provide an ordering rule clarifying whether excess deductions on termination of a trust allowed as a deduction to the beneficiary are claimed before, after, or ratably with the beneficiary's other deductions, particularly when the amount of the excess deductions and other deductions exceed the beneficiary's gross income. These final regulations clarify that beneficiaries may claim all or part of the excess deductions under section 642(h)(2) before, after, or together with the same character of deductions separately allowable to the beneficiary under the Code.

That commenter also requested that the final regulations include an exception for investment interest expense under section 163(d) from the general rule that excess deductions on termination of a trust or estate may be claimed only in the beneficiary's taxable year during which the trust or estate terminated. That section permits the carryforward of investment interest under section 163(d)(2) to the taxpayer's subsequent taxable years if the taxpayer is unable to deduct the investment interest in the current taxable year. The commenter stated that the disallowance of the carryover of section 642(h)(2) excess deductions should not apply to those excess deductions that are no longer treated as miscellaneous itemized deductions under the proposed regulations, and that carryover should be permitted to the extent otherwise permitted under the Code. The preamble to the proposed regulations states that addressing suspended deductions under section 163(d) is beyond the scope of the regulations and the same is true of these final regulations.

A commenter requested that the amount of a beneficiary's net operating loss carryover to a later taxable year under section 172 should include all of the beneficiary's section 642(h)(2) excess deductions that are section 67(e) deductions, as deductions that are attributable to the beneficiary's trade or business and thus deductions attributable to a trade or business under section 172(d)(4). Section 642(h) makes it clear that a net operating loss carryover under paragraph (1) of that section is separate and distinct from the excess deductions on termination described in paragraph (2) of that section. Furthermore, § 1.642(h)-2(d) provides that a deduction based upon a net operating loss carryover generally will not be allowed to beneficiaries under both paragraphs (1) and (2) of section 642(h). Therefore, an excess deduction allowable to the beneficiary under section 642(h)(2) is not a net operating loss carryover succeeded to by the beneficiary under section 642(h)(1) and (with one exception) a net operating loss carryover is not an excess deduction on termination. Moreover, these regulations provide that it is the character of the excess deductions as section 67(e) deductions, non-miscellaneous itemized deductions, and miscellaneous itemized deductions, and not the character of a deduction as attributable to a trade or business, that is retained in the hands of the beneficiary. Thus, whether section 642(h)(2) excess deductions that are section 67(e) deductions may be included in a beneficiary's net operating loss carryovers under section 172, separate from those it succeeds to from a terminated estate or trust, is beyond the scope of these regulations. Because § 1.642(h)-2(a) is clear that excess deductions on termination of an estate or trust are not carried over to future years and that such deductions are separate from a net operating loss carryover from the estate or trust, the Treasury Department and the IRS do not adopt this comment.

6. EXAMPLE 1

Section 1.642(h)-5(a), Example 1, of the proposed regulations (Example 1) updates an existing example illustrating computations under section 642(h) when there is a net operating loss. Section 1.642-5(a)(2)(ii) of Example 1 explains that the beneficiaries of the trust cannot carry back any of the net operating loss of the terminating estate that was made available to them under section 642(h)(1).

Two commenters requested that Example 1 be revised to take into account the amendments to section 172(b)(1)(D) under sec. 2302(b) of the Coronavirus Aid, Relief, and Economic Security Act, Public Law 116-136, 134 Stat. 281 (2020) (CARES Act), by allowing a beneficiary to carry back the net operating loss carryover the beneficiary succeeds to under section 642(h)(1) for net operating losses arising in taxable years beginning after December 31, 2017, and before January 1, 2021. Under section 2303 of the CARES Act, net operating losses arising in taxable years beginning after December 31, 2017, and before January 1, 2021, generally may be carried back five years before being carried forward. One of these commenters further requested confirmation that a beneficiary is allowed a carryback of the net operating loss under section 642(h)(1) for net operating losses of an estate or trust arising in taxable years ending before January 1, 2018, to the extent the beneficiary succeeds to a net operating loss carryover attributable to those net operating losses on a termination of the estate or trust between January 1, 2018, and December 31, 2020.

Unless otherwise provided under the Code, a net operating loss incurred by a taxpayer may only be used as a deduction by that taxpayer and cannot be transferred to another taxpayer for use by that other taxpayer. *Calvin v. U.S.*, 354 F.2d 202 (10th Cir. 1965), *Mellott v. U.S.*, 257 F.2d 798 (3d Cir. 1958). As an exception to this general principle, section 642(h) provides that if, on termination of an estate or trust, the estate or trust has a net operating loss carryover under section 172, then such carryover is allowed as a deduction, in accordance with the regulations prescribed by the Secretary, to the beneficiaries succeeding to the property of the estate or trust. Section 1.642(h)-1(a) provides that if, on the termination of an estate or trust, a net operating loss carryover under section 172 would be allowable to the estate or trust in a taxable year subsequent to the taxable year of termination but for the termination, a carryover is allowed under section 642(h)(1) to the beneficiaries succeeding to the property of the estate or trust. In addition, § 1.642(h)-1(b) provides that the first taxable year of the beneficiary to which the net operating loss will be carried over is the taxable year of the beneficiary in which or with which the estate or trust terminates.

Section 642(h)(1) provides a specific rule that allows the beneficiary to succeed to a net operating loss carryover of the estate or trust and deduct the amount of the net operating loss over the remaining carryover period that would have been allowable to the estate or trust but for the termination of the estate or trust. The phrase in section 642(h)(1) "the estate or trust has a net operating loss carryover' " means that the estate or trust incurred a net operating loss and either already carried it back to the earliest allowable year under section 172 or elected to waive the carryback period under section 172(b)(3), and now is limited to carrying over the remaining net operating loss. Accordingly, because the net operating loss is a carryover for the estate or trust, the beneficiary succeeding to that net operating loss may, under section 642(h)(1), only carry it forward.

The CARES Act amendments to section 172(b) mentioned by the commenters allow taxpayers a five-year carryback of certain net operating losses incurred by that taxpayer. The CARES Act amendments do not change the result that a beneficiary succeeding to the net operating loss carryover of a terminated estate or trust may only carryover that net operating loss in the same manner as the terminated estate or trust, but for the termination. Consequently, the Treasury Department and the IRS do not adopt these comments and add a citation to § 1.642(h)-1 to reference the rule that a beneficiary that succeeds to a net operating loss carryover of a terminated estate or trust may only carry forward the net operating loss.

7. EXAMPLE 2

Section § 1.642(h)-5(b), Example 2, of the proposed regulations (Example 2) demonstrates computations under section 642(h)(2). The expenses in Example 2 include rental real estate taxes in an attempt to illustrate a deduction subject to limitation under section 164(b)(6) to the beneficiary that must be separately stated as provided in § 1.642(h)-2(b)(1).

Multiple commenters noted that Example 2 raises several issues that could be potentially relevant to that example, such as whether the decedent was in a trade or business and the application of section 469 to estates and trusts. To avoid these issues, which are extraneous to the point being illustrated, one commenter suggested that the example be revised so that the entire amount of real estate expenses on rental property equals the amount of rental income. The Treasury Department and the IRS did not intend to raise such issues in the example and consider both issues to be outside the scope of these regulations. Accordingly, the Treasury Department and the IRS adopt the suggestion by the commenter and modify Example 2 to avoid these issues by having rental real estate expenses entirely offset rental income with no unused deduction.

Commenters also noted that Example 2 does not properly allocate rental real estate expenses because the example characterizes the rental real estate taxes as itemized deductions. These commenters asserted that real estate taxes on property held for the production of rental income are not itemized deductions but instead are allowed in computing gross income and cited to section 62(a)(4) as providing that ordinary and necessary expenses paid or incurred during the taxable year for the management, conservation, or maintenance of property held for the production of income under section 212(2) that are attributable to property held for the production of rents are deductible as above-the-line deductions in arriving at adjusted gross income. One commenter suggested that, if the goal of Example 2 is to illustrate state and local taxes passing through to the beneficiary, then the example should include state income taxes rather than real estate taxes on rental real estate. The Treasury Department and the IRS have revised this example in the final regulations to include personal property tax paid by the trust rather than taxes attributable to rental real estate.

Lastly, commenters noted that Example 2 does not demonstrate the broad range of trustee discretion in § 1.652(b)-3(b) and (d) for deductions that are not directly attributable to a class of income, or deductions that are, but which exceed such class of income, respectively. In response to these comments, the Treasury Department and the IRS have modified Example 2 to illustrate the application of trustee discretion as found in § 1.652(b)-3(b) and (d).

C. Applicability Dates

The proposed regulations provide that the changes to §§ 1.67-4, 1.642(h)-2, and 1.642(h)-5 apply to taxable years beginning after the date the regulations are published as final. The preamble to the proposed regulations explains that estates, non-grantor trusts, and their beneficiaries may rely on the proposed regulations under section 67 for taxable years beginning after December 31, 2017, and on or before the date these regulations are published as final. Taxpayers may also rely on the proposed regulations under section 642(h) for taxable years of beneficiaries beginning after December 31, 2017, and on or before the date the regulations are published as final, in which an estate or trust terminates.

One commenter requested that § 1.642(h)-2 of the proposed regulations be applied retroactively not only to taxable years beginning after December 31, 2017, but to all open years. The commenter asserted that the existing regulation treating excess deductions on termination of an estate as a miscellaneous itemized deduction was in error. As an example, the commenter argues that the current regulations mistakenly describe section 67(e) expenses as an exception to the rules applicable to miscellaneous itemized deductions, and therefore requested that the final regulations be applicable to all open years. The Treasury Department and the IRS have the authority to treat an excess deduction on termination of an estate or trust as a single miscellaneous itemized deduction. See section 642(h). The suspension under section 67(g) of miscellaneous itemized deductions caused the Treasury Department and the IRS to reconsider the treatment of excess deductions under section 642(h)(2) because the Treasury Department and the IRS do not interpret section 67(g) as suspending such deductions allowable under section 642(h)(2). The Treasury Department and the IRS interpret section 67(g) as not disallowing excess deductions succeeded to beneficiaries from terminated estates and trusts under section 642(h)(2). Therefore, taxpayers may rely on these regulations as of the effective date of section 67(g), but not for earlier periods.

The final regulations apply to taxable years beginning after October 19, 2020. Pursuant to section 7805(b)(7), taxpayers may choose to apply the amendments to § 1.67-4 and §§ 1.642(h)-2 and 1.642(h)-5 set forth in this Treasury decision to taxable years beginning after December 31, 2017, and on or before October 19, 2020.

On 10/18/2020 (last reviewed or updated 2/11/2020), the 2019 Instructions for Form 1041 included:

> **Box 11, Code A—Excess Deductions on Termination**
>
> If this is the final return of the estate or trust, and there are excess deductions on termination (see the instructions for line 23), enter the beneficiary's share of the excess deductions in box 11, using code A. Figure the deductions on a separate sheet and attach it to the return.
>
> Excess deductions on termination occur only during the last tax year of the trust or decedent's estate when the total deductions (excluding the charitable deduction and exemption) are greater than the gross income during that tax year.
>
> Generally, a deduction based on an NOL carryover isn't available to a beneficiary as an excess deduction. However, if the last tax year of the estate or trust is also the last year in which an NOL carryover may be taken (see section 172(b)), the NOL carryover is considered an excess deduction on the termination of the estate or trust to the extent it isn't absorbed by the estate or trust during its final tax year. For more information, see Regulations section 1.642(h)-4 for a discussion of the allocation of the carryover among the beneficiaries.
>
> Only the beneficiary of an estate or trust that succeeds to its property is allowed to deduct that entity's excess deductions on termination. A beneficiary who doesn't have enough income in that year to absorb the entire deduction can't carry the balance over to any succeeding year. An individual beneficiary must be able to itemize deductions in order to claim the excess deductions in determining taxable income.
>
> **Box 11, Codes B and C—Unused Capital Loss Carryover**
>
> Upon termination of the trust or decedent's estate, the beneficiary succeeding to the property is allowed as a deduction any unused capital loss carryover under section 1212. If the estate or trust incurs capital losses in the final year, use the Capital Loss Carryover Worksheet in the Instructions for Schedule D (Form 1041) to figure the amount of capital loss carryover to be allocated to the beneficiary.
>
> **Box 11, Codes D and E—NOL Carryover**
>
> Upon termination of a trust or decedent's estate, a beneficiary succeeding to its property is allowed to deduct any unused NOL (and any ATNOL) carryover for regular and AMT purposes if the carryover would be allowable to the estate or trust in a later tax year but for the termination. Enter in box 11, using codes D and E, the unused carryover amounts.

Reporting Excess Deductions on Termination of an Estate or Trust on Forms 1040, 1040-SR, and 1040-NR for Tax Year 2018 and Tax Year 2019 (9/19/2020) provides:

> Under Proposed Regulations 113295-18 (PDF), an excess deduction on termination of an estate or trust allowed in arriving at adjusted gross income (Internal Revenue Code (IRC) section 67(e) expenses) is reported as an adjustment to income on Forms 1040, 1040-SR, and 1040-NR; non-miscellaneous itemized deductions are reported, as

applicable, on Schedule A (Form 1040 or 1040-SR) or Schedule A (Form 1040-NR); and miscellaneous itemized deductions are not deductible. Taxpayers may rely on the proposed regulations for tax years of beneficiaries beginning after 2017 and before the final regulations are published.

For tax year 2019, an excess deduction for IRC section 67(e) expenses is reported as a write-in on Schedule 1 (Form 1040 or 1040-SR), Part II, line 22, or Form 1040-NR, line 34. On the dotted line next to line 22 or line 34 (depending on which form is filed), enter the amount of the adjustment and identify it using the code “ED67(e)”. Include the amount of the adjustment in the total amount reported on line 22 or line 34.

For tax year 2018, an excess deduction for IRC section 67(e) expenses is reported as a write-in on Schedule 1 (Form 1040), line 36, or Form 1040-NR, line 34. On the dotted line next to line 36 or line 34, (depending on which form is filed), enter the amount of the adjustment and identify it using the code “ED67(e)”. Include the amount of the adjustment in the total amount reported on line 36 or line 34.

The preamble and text of the proposed and final regulations refer to Reg. § 1.652(b)-3, which is discussed in part II.J.8.f.i.(a) Allocating Deductions to Various Income Items. Generally, expenses allocable to nontaxable items must be allocated pro rata to that income, but expenses allocable to taxable items may be applied to reduce that income in any manner the taxpayer wishes.

Reg. § 1.642(h)-2, “Excess deductions on termination of an estate or trust,” provides:

(a) Excess deductions.

(1) *In general.* If, on the termination of an estate or trust, the estate or trust has for its last taxable year deductions (other than the deductions allowed under section 642(b) (relating to the personal exemption) or section 642(c) (relating to charitable contributions)) in excess of gross income, the excess deductions as determined under paragraph (b) of this section are allowed under section 642(h)(2) as items of deduction to the beneficiaries succeeding to the property of the estate or trust.

(2) *Treatment by beneficiary*. A beneficiary may claim all or part of the amount of the deductions provided for in paragraph (a) of this section, as determined after application of paragraph (b) of this section, before, after, or together with the same character of deductions separately allowable to the beneficiary under the Internal Revenue Code for the beneficiary’s taxable year during which the estate or trust terminated as provided in paragraph (c) of this section.

(b) *Character and amount of excess deductions*

(1) *Character.* The character and amount of the excess deductions on termination of an estate or trust will be determined as provided in this paragraph (b). Each deduction comprising the excess deductions under section 642(h)(2) retains, in the hands of the beneficiary, its character (specifically, as allowable in arriving at adjusted gross income, as a non-miscellaneous itemized deduction, or as a miscellaneous itemized deduction) while in the estate or trust. An item of deduction succeeded to by a beneficiary remains subject to any additional

applicable limitation under the Internal Revenue Code and must be separately stated if it could be so limited, as provided in the instructions to Form 1041, *U.S. Income Tax Return for Estates and Trusts*, and the Schedule K-1 (Form 1041), *Beneficiary's Share of Income, Deductions, Credit, etc.*, or successor forms.

(2) *Amount.* The amount of the excess deductions in the final year is determined as follows:

(i) Each deduction directly attributable to a class of income is allocated in accordance with the provisions in § 1.652(b)-3(a);

(ii) To the extent of any remaining income after application of paragraph (b)(2)(i) of this section, deductions are allocated in accordance with the provisions in § 1.652(b)-3(b) and (d); and

(iii) Deductions remaining after the application of paragraph (b)(2)(i) and (ii) of this Section comprise the excess deductions on termination of the estate or trust. These deductions are allocated to the beneficiaries succeeding to the property of the estate of or trust in accordance with § 1.642(h)-4.

(c) *Year of termination*.

(1) *In general.* The deductions provided for in paragraph (a) of this section are allowable only in the taxable year of the beneficiary in which or with which the estate or trust terminates, whether the year of termination of the estate or trust is of normal duration or is a short taxable year.

(2) *Example.* Assume that a trust distributes all its assets to B and terminates on December 31, Year X. As of that date, it has excess deductions of $18,000, all characterized as allowable in arriving at adjusted gross income under section 67(e). B, who reports on the calendar year basis, could claim the $18,000 as a deduction allowable in arriving at B's adjusted gross income for Year X. However, if the deduction (when added to other allowable deductions that B claims for the year) exceeds B's gross income, the excess may not be carried over to any year subsequent to Year X.

(d) *Net operating loss carryovers.* [same as current Reg. § 1.642(h)-2(b)]

(e) *Items included in net operating loss or capital loss carryovers.* [same as current Reg. § 1.642(h)-2(c)]

(f) *Applicability date.* Paragraphs (a) through (c) of this section apply to taxable years beginning after October 19, 2020. The rules applicable to taxable years beginning on or before October 19, 2020 are contained in § 1.642(h)-2 as in effect prior to October 19, 2020 (see 26 CFR part 1 revised as of April 1, 2020). Taxpayers may choose to apply paragraphs (a) through (c) of this section to taxable years beginning after December 31, 2017, and on or before October 19, 2020.

The most important new idea is that, instead of the excess deductions being miscellaneous itemized deductions, they are divided into three categories:

- allowable in arriving at adjusted gross income (colloquially referred to as “above-the-line”),
- non-miscellaneous itemized deduction, or
- miscellaneous itemized deduction.

Here is an example from me: Suppose the terminating trust has $5,000 income, $2,000 of tax preparation fees, and $4,000 of legal fees. Thus, excess deductions are $1,000 ($5,000 – ($2,000 + $4,000)). Note that both deductions are Code § 67(e) above-the-line deductions (in other words, deducted in arriving at gross income). Before the regulations, this $1,000 excess deduction would have been a miscellaneous itemized deduction. Under the regulations, the $1,000 excess is an above-the-line deduction.

Variation 1: same example, but the $4,000 in legal fees is replaced by $4,000 in state income tax, which is an itemized deduction. Excess deductions remain $1,000. When preparing the tax return, you choose to apply $1,000 in tax preparation fees and $4,000 in state income tax to eliminate the $5,000 income. That leaves $1,000 in tax preparation fees. Under the regulations, the $1,000 excess is an above-the-line deduction.

Variation 2: same as Variation 1, but you instead offset the income by $2,000 in tax preparation fees and $3,000 in state income tax. That leaves $1,000 in state income tax. Under the regulations, the $1,000 excess is a regular itemized deduction (not a miscellaneous itemized deduction).

We would all choose Variation 1 over Variation 2, because an above-the-line deduction is better than an itemized deduction.

Rev. Rul. 77-466 asserted:

> In the instant case, since under state law the trustees’ termination commissions were not directly allocable to any particular class of income, but instead were paid for all the activity of the trustees during the trust’s lifetime, such commissions are properly allocable to: (1) the trust’s ordinary income (including tax-exempt income) realized during its existence, (2) net realized capital gains from its inception to its termination, and (3) any net unrealized capital appreciation of the assets distributed by the trust. However, the method used by the trustees resulted in none of the commissions being allocated to tax-exempt income, even though the trust had realized tax-exempt income during the period of its existence.
>
> Accordingly, since none of the trustees’ commissions were allocated to tax-exempt income the method used is not reasonable in the light of all the facts and circumstances and, therefore, is not an appropriate method for purposes of section 265 of the Code. However, in the instant case, a reasonable and appropriate method of allocation would be one based on the ratio of tax-exempt income realized by the trust during its existence to the total of ordinary income (including tax-exempt income) realized by the trust during its existence plus the excess of capital gains realized over capital losses sustained over the life of the trust plus any net unrealized capital appreciation of the assets distributed.

Reg. § 1.642(h)-5(a), Example 1, “Computations under Section 642(h) when an estate has a net operating loss,” provides:

(1) *Facts.* On January 31, 2020, A dies leaving a will that provides for the distribution of all of A's estate equally to B and an existing trust for C. The period of administration of the estate terminates on December 31, 2020, at which time all the property of the estate is distributed to B and the trust. For tax purposes, B and the trust report income on a calendar year basis. During the period of administration, the estate has the following items of income and deductions:

TABLE 1 TO PARAGRAPH (a)(1)

Income:	
Taxable interest	$2,500
Business income	3,000
Total Income	5,500

TABLE 2 TO PARAGRAPH (a)(1)

Deductions:	
Business expenses (including administrative expense allocable to business income)	5,000
Administrative expenses not allocable to business income that would not have been incurred if property had not been held in a trust or estate (section 67(e) deductions)	9,800
Total deductions	14,800

(2) *Computation of net operating loss.* (i) The amount of the net operating loss carryover is computed as follows:

TABLE 3 TO PARAGRAPH (a)(1)

Gross income	$ 5,500
Total deductions	14,800
Less adjustment under section 172(d)(4) (allowable non-business expenses ($9,800) limited to non-business income ($2,500))	7,300
Deductions as adjusted	7,500
Net operating loss	2,000

(ii) Under section 642(h)(1), B and the trust are each allocated $1,000 of the $2,000 unused net operating loss carryover of the terminated estate in 2020, with the allowance of any net operating loss carryover to B and the trust determined under section 172. Neither B nor the trust can carry back any of the net operating loss of A's estate made available to them under section 642(h)(1). See § 1.642(h)-1(b).

(3) *Section 642(h)(2) excess deductions.* The $7,300 of non-business deductions not taken into account in determining the net operating loss of the estate are excess deductions on termination of the estate under section 642(h)(2). Under § 1.642(h)-2(b)(1), such deductions retain their character as section 67(e) deductions. Under § 1.642(h)-4, B and the trust each are allocated $3,650 of excess deductions based on B's and the trust's respective shares of the burden of each cost.

(4) *Consequences for C.* The net operating loss carryover and excess deductions are not allowable directly to C, the trust beneficiary. To the extent the distributable net income of the trust is reduced by the net operating loss carryover and excess deductions, however, C may receive an indirect benefit from the carryover and excess deductions.

Reg. § 1.642(h)-5(b), Example 2, "Computations under Section 642(h)(2)" provides:

(1) *Facts.* D dies in 2019 leaving an estate of which the residuary legatees are E (75%) and F (25%). The estate's income and deductions in its final year are as follows:

TABLE 4 TO PARAGRAPH (b)(1)

Income:	
Dividends	$3,000
Taxable Interest	500
Rent	2,000
Capital Gain	1,000
Total Income	6,500

TABLE 5 TO PARAGRAPH (b)(1)

Deductions:	
Section 62(a)(4) deductions:	
Rental real estate expenses	2,000
Section 67(e) deductions:	
Probate fees	1,500
Estate tax preparation fees	8,000
Legal fees	2,500
Total Section 67(e) deductions	12,000
Non-miscellaneous itemized deductions:	
Personal property taxes	3,500
Total deductions	17,500

(2) *Determination of character.* Pursuant to § 1.642(h)-2(b)(2), the character and amount of the excess deductions is determined by allocating the deductions among the estate's items of income as provided under § 1.652(b)-3. Under § 1.652(b)-3(a), the $2,000 of rental real estate expenses is allocated to the $2,000 of rental income. In the exercise of the executor's discretion pursuant to § 1.652(b)-3(b), D's executor allocates $3,500 of personal property taxes and $1,000 of section 67(e) deductions to the remaining income. As a result, the excess deductions on termination of the estate are $11,000, all consisting of section 67(e) deductions.

(3) *Allocations among beneficiaries.* Pursuant to § 1.642(h)-4, the excess deductions are allocated in accordance with E's (75 percent) and F's (25 percent) interests in the residuary estate. E's share of the excess deductions is $8,250, all consisting of section 67(e) deductions. F's share of the excess deductions is $2,750, also all consisting of section 67(e) deductions.

(4) *Separate statement*. If the executor instead allocated $4,500 of section 67(e) deductions to the remaining income of the estate, the excess deductions on termination of the estate would be $11,000, consisting of $7,500 of section 67(e) deductions and $3,500 of personal property taxes. The non-miscellaneous itemized deduction for personal property taxes may be subject to limitation on the returns of both B and C's trust under section 164(b)(6)(B) and would have to be separately stated as provided in § 1.642(h)-2(b)(1).

Reg. § 1.642(h)-5(c), "Applicability date" provides:

> This section is applicable to taxable years beginning after October 19, 2020. Taxpayers may choose to apply this section to taxable years beginning after December 31, 2017, and on or before October 19, 2020.

Example 2 illustrates that generally a tax return preparer should avoid allocating Code § 67(e) deductions against income and instead allocate other expenses against income so that the only excess deductions passing through to the beneficiary would be Code § 67(e) deductions. This is consistent with the comments we put together: ACTEC submits comments on Treasury Notice 85 Fed. Reg. 27693 (5/11/20): Proposed Regulations on Income Tax Regulations (26 CFR part 1) under sections 67 and 642 of the Internal Revenue Code (June 22, 2020).

Reg. § 1.641(b)-3(b)[2563] provides:

> Generally, the determination of whether a trust has terminated depends upon whether the property held in trust has been distributed to the persons entitled to succeed to the property upon termination of the trust rather than upon the technicality of whether or not the trustee has rendered his final accounting. A trust does not automatically terminate upon the happening of the event by which the duration of the trust is measured. A reasonable time is permitted after such event for the trustee to perform the duties necessary to complete the administration of the trust. Thus, if under the terms of the governing instrument, the trust is to terminate upon the death of the life beneficiary and the corpus is to be distributed to the remainderman, the trust continues after the death of the life beneficiary for a period reasonably necessary to a proper winding up of the

[2563] Reg. § 1.641(b)-3(b) is incorporated by reference by Reg. § 1.642(h)-1(a).

affairs of the trust. However, the winding up of a trust cannot be unduly postponed and if the distribution of the trust corpus is unreasonably delayed, the trust is considered terminated for Federal income tax purposes after the expiration of a reasonable period for the trustee to complete the administration of the trust. Further, a trust will be considered as terminated when all the assets have been distributed except for a reasonable amount which is set aside in good faith for the payment of unascertained or contingent liabilities and expenses (not including a claim by a beneficiary in the capacity of beneficiary).

II.J.4. Tips for Fiduciary Income Tax Preparers

The IRS' web page for fiduciary income tax returns is https://www.irs.gov/uac/about-form-1041.

Income tax preparers might consider the following:

II.J.4.a. Distributions after Yearend to Carry Out Income to Beneficiaries

Prepare a rough draft of the income tax return in February and compare it to the beneficiaries' income tax rates.

If distributions are appropriate, make them by March 5 or 6.

For details, see part II.J.2 Tactical Planning Shortly After Yearend to Save Income Tax for Year That Ended.

II.J.4.b. Capital Gain Elections

Tax return preparation software automatically treats capital gains as trapped in the trust.

Consider whether current or future capital gains should be shifted to the beneficiaries.[2564]

Although a prior year return might have constituted an election not to distribute capital gains under one particular option, the tax laws are much more flexible than might appear at first. See part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI).

II.J.4.c. Charitable Distributions

Even more generous than the 65-day rule mentioned in part II.J.4.a Distributions after Yearend to Carry Out Income to Beneficiaries, a charitable contribution made any time in the current year can count for the current or immediately preceding year.[2565] For example, a contribution made December 31, 2017 can count as a 2016 contribution for a calendar year fiduciary taxpayer.

A nongrantor trust or estate's charitable deduction reduces adjusted gross income distributed to the beneficiaries and is the only way a charitable deduction can reduce net investment income subject to the 3.8% tax.[2566] However, the Code § 642(c) charitable deduction does not reduce

---

[2564] See part II.J.3 Strategic Fiduciary Income Tax Planning.
[2565] Code § 642(c)(1); Reg. § 1.642(c)-1(b)(1); extensions of time are common, including Letter Rulings 20201013, 20201014, and 20201013. Although an estate can deduct any amounts set aside and paid any time before termination, that election can be fraught with danger. See part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI), with the caution described in fn. 2720.
[2566] See fn. 2324.

the amount of the DNI allocated to a mandatory income beneficiary.[2567] If the trust is mandatory income as to a portion and discretionary as to a portion, the beneficiary receiving discretionary distributions may benefit from the charitable deduction and may receive a windfall,[2568] but these rules may also cause more K-1 income for the mandatory income beneficiary than the trust

[2567] Code § 651(b), as explained by Reg. § 1.651(a)-4(a), prevents trusts that make charitable distributions from being treated as simple trusts. Code § 662(a)(1), which applies to trusts other than simple trusts, provides:

> *Amounts required to be distributed currently*. The amount of income for the taxable year required to be distributed currently to such beneficiary, whether distributed or not. If the amount of income required to be distributed currently to all beneficiaries exceeds the distributable net income (computed without the deduction allowed by section 642(c), relating to deduction for charitable, etc., purposes) of the estate or trust, then, in lieu of the amount provided in the preceding sentence, there shall be included in the gross income of the beneficiary an amount which bears the same ratio to distributable net income (as so computed) as the amount of income required to be distributed currently to such beneficiary bears to the amount required to be distributed currently to all beneficiaries. For purposes of this section, the phrase "the amount of income for the taxable year required to be distributed currently" includes any amount required to be paid out of income or corpus to the extent such amount is paid out of income for such taxable year.

F. Ladson Boyle & Jonathan G. Blattmachr, §3:5.2 Tier System, *Blattmachr on Income Taxation of Estates and Trusts* (PLI 16th ed. 2016), explains:

> ... trust-accounting income (required to be distributed currently) may exceed DNI. In effect, charitable distributions of income are in a middle category: available income is first treated as going to first-tier beneficiaries; then, to the extent that income is distributed to charity, there is a charitable deduction. As a result, only the residue of income is taxed to the second-tier beneficiaries.

[2568] See Code § 662(a)(1), reproduced in fn. 2567. In applying this rule, Reg. § 1.662(b)-2 provides that:

> for the purpose of allocating items of income and deductions to beneficiaries to whom income is required to be distributed currently, the amount of the charitable contributions deduction is disregarded to the extent that it exceeds the income of the trust for the taxable year reduced by amounts for the taxable year required to be distributed currently.

Reg. § 1.662(b)-2, Example (1), illustrates this rule, with paragraph (e) of the example providing the discretionary beneficiary with the windfall of receiving:

> (a) A trust instrument provides that $30,000 of its income must be distributed currently to A, and the balance may either be distributed to B, distributed to a designated charity, or accumulated. Accumulated income may be distributed to B and to the charity. The trust for its taxable year has $40,000 of taxable interest and $10,000 of tax-exempt income, with no expenses. The trustee distributed $30,000 to A, $50,000 to charity X, and $10,000 to B.
>
> (b) Distributable net income for the purpose of determining the character of the distribution to A is $30,000 (the charitable contributions deduction, for this purpose, being taken into account only to the extent of $20,000, the difference between the income of the trust for the taxable year, $50,000, and the amount required to be distributed currently, $30,000).
>
> (c) The charitable contributions deduction taken into account, $20,000, is allocated proportionately to the items of income of the trust, $16,000 to taxable interest and $4,000 to tax-exempt income.
>
> (d) Under section 662(a)(1), the amount of income required to be distributed currently to A is $30,000, which consists of the balance of these items, $24,000 of taxable interest and $6,000 of tax-exempt income.
>
> (e) In determining the amount to be included in the gross income of B under section 662 for the taxable year, however, the entire charitable contributions deduction is taken into account, with the result that there is no distributable net income and therefore no amount to be included in gross income.
>
> (f) See subpart D (section 665 and following), part I, subchapter J, chapter 1 of the Code for application of the throwback provisions to the distribution made to B.

would have had if the trust had been able to accumulate the income.[2569] I have not explored the interaction of this rule with the fact that unrelated business income generally moves the charitable deduction from Code § 642(c) to Code § 170.[2570]

For the requirement that the contribution be paid from gross income and complexity that applies when the trust has S corporation, business, or debt-financed income, see part II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction. Special rules apply to electing small business trusts owning S corporations that make charitable contributions, which disallow the charitable contribution regarding any donations that the ESBT portion of the trust makes and essentially apply the individual Code § 170 contribution rules rather than Code § 642(c) to any contributions flowing through the K-1 that the ESBT receives.[2571]

But for these limitations, generally a nongrantor trust's charitable deduction is not subject to the limitations that would apply to a beneficiary. Nongrantor trusts and estates may deduct charitable contributions made during the taxable year or in the next taxable year,[2572] whereas generally individuals may deduct contributions made during the taxable year. Also note that 2017 tax reform eliminates the benefit of the charitable deduction for individuals who take the standard deduction, whereas nongrantor trusts and estates may deduct them in full, subject to

---

[2569] F. Ladson Boyle & Jonathan G. Blattmachr, §3:5.2 Tier System, *Blattmachr on Income Taxation of Estates and Trusts* (PLI 16th ed. 2016), suggests:

> **Example**: A complex trust has $65,000 of taxable dividend income. Annually, the trust is required to distribute the first $10,000 of income to a qualified charity, C, and the balance of its accounting income to an individual, A. In addition, the trustee is authorized to invade principal for the benefit of a second individual, B, and distributes $10,000 to B. The trust pays $10,000 in trustee fees that are chargeable one-half to income and one-half to principal. The accounting income for the trust is $60,000 ($65,000 less $5,000 (one-half of the trustee's fee)). Thus, the amount distributable to A is $50,000 ($60,000 less $10,000 due the charity).
>
> The trust's taxable income [ignoring the distribution deduction and exemption] is $45,000 ($65,000 less $10,000 trustee fee and less $10,000 charitable deduction). The DNI for the trust is $45,000. Because distributions to A and B exceed DNI, the trust's distribution deduction is limited to $45,000.
>
> When the amount of income A must report is computed, DNI is recomputed without a charitable deduction. Thus, DNI is $55,000 for this purpose and A has $50,000 of taxable income under section 662. Note that the amount of income A must report is less than the recomputed DNI by $5,000.
>
> Nevertheless, B has no income on the distribution of principal as the DNI for purposes of the tier 2 distribution is the original $45,000 and that amount is not in excess of the tier 1 distribution to A.

B's windfall comes at the expense of A paying tax on more income ($50,000) than the net of the trust's taxable items ($45,000).

[2570] See part II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction.

[2571] Under 2017 tax reform, Code § 642(c) does not apply to an ESBT; see fn 6055 in part III.A.3.e.ii.(b) ESBT Income Taxation - Overview and also note that fn 6054 allows an ESBT to deduct charitable contributions against its S corporation income only to the extent they are on the K-1 from the S corporation

[2572] See fn. 2565.

various limitations.[2573] Finally, nongrantor trusts and estates may deduct charitable contributions made to a foreign charity, whereas an individual cannot.[2574]

Compare and contrast part II.J.4.c.i Estate or Nongrantor Trust Contribution Deduction Requirements with part II.J.4.c.ii Individual Contribution Deduction Requirements. Estate and nongrantor trust charitable deduction rules appear to be more liberal as to who the donee is.[2575] As to the latter, note that Code § 170(c) describes who qualifies as a charitable donee, whereas Code § 642(c) refers to a contribution "paid for a purpose specified in Section 170(c) (determined without regard to section 170(c)(2)(A))."[2576]

Reg. § 1.642(c)-1(b)(1) provides that the fiduciary may elect under Code § 642(c)(1) to treat as paid during the taxable year "any amount of gross income received during such taxable year or any preceding taxable year which is otherwise deductible under such paragraph and which is paid after the close of such taxable year but on or before the last day of the next succeeding taxable year of the estate or trust."[2577] Reg. § 1.642(c)-1(b)(2) provides that this election "shall be made not later than the time, including extensions thereof, prescribed by law for filing the income tax return for the succeeding taxable year" and "shall, except as provided in subparagraph (4) of this paragraph, become irrevocable after the last day prescribed for making it." Letter Ruling 202332004 gave an extension of time to file an election that, "due to inadvertence," was not timely filed:

> This ruling is conditioned on Trust filing an income tax return (or amended return) for its Year 1 taxable year on which Trust must: (1) make the election under § 642(c)(1) to claim a deduction in Year 1 for the Contributions made by the close of Year 2, and (2) claim a deduction for such Contributions under § 642(c)(1). If necessary, Trust must

---

[2573] In addition to any limits imposed by Code § 642(c), charitable contributions by nongrantor trusts and estates may be reduced if they result in state tax credits, in a manner similar to that imposed on individuals. Reg. § 1.642(c)-3(g), "Payments resulting in state or local tax benefits," provides:

> (1) *In general*. If the trust or decedent's estate makes a payment of gross income for a purpose specified in section 170(c), and the trust or decedent's estate receives or expects to receive a state or local tax benefit in consideration for such payment, § 1.170A-1(h)(3) applies in determining the charitable contribution deduction under section 642(c).
>
> (2) *Effective/applicability date*. Paragraph (g)(1) of this section applies to payments of gross income after August 27, 2018.

Reg. § 1.170A-1(h)(3) is reproduced in part II.G.4.n Itemized Deductions; Deductions Disallowed for Purposes of the Alternative Minimum Tax, which also discusses the related state income effect.

[2574] Reg. § 1.642(c)-1(a)(2) provides:

> In determining whether an amount is paid for a purpose specified in section 170(c)(2) the provisions of section 170(c)(2)(A) shall not be taken into account. Thus, an amount paid to a corporation, trust, or community chest, fund, or foundation otherwise described in section 170(c)(2) shall be considered paid for a purpose specified in section 170(c) even though the corporation, trust, or community chest, fund, or foundation is not created or organized in the United States, any State, the District of Columbia, or any possession of the United States.

[2575] Code § 170(c) provides that "the term 'charitable contribution' means a contribution or gift to or for the purpose specified in section 170(c) (determined without regard to section 170(c)(2)(A))."

[2576] Code § 170(c)(2)(A) refers to a donation to a corporation, trust, or community chest, fund, or foundation "created or organized in the United States or in any possession thereof, or under the law of the United States, any State, the District of Columbia, or any possession of the United States."

[2577] Letter Ruling 201011001 granted an extension of time to file this election when:

> Due to an inadvertent oversight by the Trust's accountant, Trust's tax returns were filed late and Trust could not therefore make a proper § 642(c) election by including a statement with the tax return for Year1 as required under § 1.642(c)-1(b)(3) of the Income Tax Regulations.

file an income tax return (or amended return) for Trust's Year 2 taxable year to properly report the tax consequences of the Contribution in a manner consistent with the election having been made.

II.J.4.c.i. Estate or Nongrantor Trust Contribution Deduction Requirements

In addition to the rules below, see part II.G.4.g Limitations on Deducting Charitable Contributions.

However, rules requiring nongrantor trusts and estates to use gross income to make contributions can be tricky,[2578] especially when a nongrantor trust has unrelated business income.[2579] *Goldsby, Jr. v. Commissioner*, T.C. Memo. 2006-274, held that a contribution that could not possibly have come from gross income was not deductible to the contributing trust.

A trust claiming a charitable deduction must identify the "governing instrument," show that the charitable contributions were paid "pursuant to" the terms of that instrument as required by Code § 642(c)(1), and demonstrate that each contribution was paid for a charitable purpose under Code § 170(c).[2580] Trustee discretion to distribute to charity satisfies the "pursuant to" standard; however, the trustee relevant documents must authorize the distributions.

Old Colony Trust Co. v. Commissioner, 301 U.S. 379 (1937), construing the predecessor to Code § 642(c), rejecting the IRS' narrow construction and adopting a broad definition of "pursuant to":

> We are asked to hold that the words "pursuant to" mean directed or definitely enjoined. And this notwithstanding the admission that Congress intended to encourage charitable contributions by relieving them from taxation. *Lederer, Collector, v. Stockton*, 260 U.S. 3, 43 S.Ct. 5, 67 L.Ed. 99; *United States v. Provident Trust Co., Administrator*, 291 U.S. 272, 285, 54 S.Ct. 389, 392, 78 L.Ed. 793.
>
> "Pursuant to" is defined as "acting or done in consequence or in prosecution (of anything); hence, agreeable, conformable; following; according."[3]
>
> [3] *Webster's New International Dictionary, Unabridged* (2d Ed.) 1935.

In rejecting a Code § 642(c) deduction when a revocable trust distributed to a charity that was a beneficiary under the grantor-decedent's pourover will, *Love Charitable Foundation v. Commissioner*, 710 F.2d 1316 (8th Cir. 1983), reasoned:

> *Old Colony* stands for the proposition that a trust is entitled to a deduction when a trustee who is authorized but not required to make charitable contributions under the trust instrument does in fact make charitable contributions. We do not believe, however, that the *Old Colony* case and the definition of "pursuant to" given in that case should be read so broadly as to entitle a trust to a charitable deduction when a trustee, acting

[2578] See part II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction, fns. 4912-4914.
[2579] See part II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction, fns. 4927-4933, which impose individual percentage limitations in lieu of Code § 642(c) and seem to undo the benefits described above in the text accompanying fns. 2572 2575. This rule does not apply to estates. See part II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction, fns. 4939-4940.
[2580] *Hubbell Trust v. Commissioner*, T.C. Summ. Op. 2016-67, citing *Brownstone v. United States*, 465 F.3d 525, 529 (2nd Cir. 2006).

> without any authority under the trust instrument, distributes the Trust assets to charity. Rather, as stated earlier, we believe it is necessary that a trust instrument authorize the trustee to make charitable contributions if it is to be said that the charitable contributions were made "pursuant to the terms of" the Trust instrument.

Payments an estate made to charity out of estate income attributable to that part of the estate transferred to charity, under the terms of a settlement agreement resulting from a will contest, qualify for a Code § 642(c) deduction;[2581] absent an actual dispute, the IRS has questioned the deduction.[2582] When a charitable lead annuity trust distributed more to charity than its annuity amount and that distribution was not clearly authorized, the trust received neither a charitable nor an income distribution deduction for those excess distributions.[2583]

TAM 8446007 involved the following facts:

> A is the sole surviving income beneficiary of a testamentary trust ("Trust") created under the will of D. The will requires the Trust to distribute the net income to several beneficiaries, including A, for their lives and then to the descendants of A until the youngest becomes twenty-one years old, at which time the principal is to be divided among them. The will named several charitable organizations as contingent remaindermen in the event of the death of A without descendants or the death of all of A's descendants before the youngest becomes twenty-one years old. The terms of the will do not limit the transferability of the income interests.
>
> In 1971, A irrevocably assigned 50 percent of his income interest to B, an organization described in section 170(c) of the Internal Revenue Code. A private letter ruling was issued to A with respect to this assignment which provided that the assigned income is includible in the gross income of B and not of A. The ruling also provided that a deduction against the gift tax of the present value of the income interest as of the date of the transfer would be allowed A. No ruling was requested or provided regarding whether the Trust would be entitled to deduct, in computing its taxable income, the income it would distribute to B pursuant to the assignment.

When the trust argued it should not be taxed on the income distributed to B, TAM 8446007 concluded, "The Trust is not entitled to a deduction under either section 651(a), 661(a), 642(c) nor 170(a) of the Code for amounts of income distributed to B pursuant to the assignment by A," reasoning:

> Congress created the present structure for taxing the income of a trust or estate in 1954. There is a special set of rules for simple trusts in Subchapter J, Part I, Subpart B, sections 651-652. There is a general set of rules for all others ("complex" trusts) in Subpart C, sections 661-664. A simple trust is one that by its terms provides that all of its income is required to be distributed currently and that does not provide that any amounts are to be paid, permanently set aside, or used for charitable, etc., purposes.

[2581] Rev. Rul. 59-15, which was followed by Letter Ruling 9044047 regarding the settlement of a dispute among all interested parties, including the state attorney general.
[2582] CCA 200848020.
[2583] *Crown Income Charitable Fund v. Commissioner*, 98 T.C. 327 (1992), *aff'd* 8 F.3d 571, 573 (7th Cir. 1993). In denying the income distribution deduction as an alternative when the charitable deduction was disallowed, the Tax Court referred to Reg. § 1.663(a)-2, which provides:

> Amounts paid, permanently set aside, or to be used for charitable, etc., purposes are deductible by estates or trusts only as provided in section 642(c).

Section 651(a). Accordingly, the statute provides no deduction for charitable distributions made by a simple trust, and moreover expressly excludes simple trusts from the section that provides such a deduction for complex trusts. Section 642(c)(1).

The Trust has taken the position that it is a simple trust within the meaning of section 651(a), while reserving the right to argue for the deduction under the complex trust rules if the Service holds the Trust to be a complex trust. Paragraph FOURTH of the will under which the Trust was created placed the residue of the estate in trust for the payment of the net trust income to the stated life beneficiaries. Although there is no express prohibition forbidding the retention of income by the trustee, the reasonable interpretation of the simple language used in the will is that all of the trust income, net of proper expenses, is required to be paid currently to the beneficiaries. Thus the first part of the definition of a simple trust is met. Section 651(a)(1). Furthermore, the will contains absolutely no mention of any beneficiary other than the named members of the testator's family and their descendants. Therefore, there is no provision in the will for the trust to pay income to a charitable beneficiary, or for the setting aside or the use of any income for charitable, etc., purposes. Thus the second part of the definition of a simple trust is met. Section 651(a)(2). Accordingly, the Trust is a simple trust within the meaning of Subchapter J, Part I, Subpart B.

Counsel for the Trust has represented that the transfer of the one-half income interest by A to B created a legal right on the part of B to receive the income thereafter which is enforceable against the trustee under local law. In effect, A has caused the Trust to acquire a charitable beneficiary by assignment. However, the Trust's counsel has represented that under local law the assignment by A does not "read into" the will B as a beneficiary under the terms of the Trust. Thus, organization B is not considered under local law a named beneficiary under the terms of the Trust.

The Trust argues that it should be entitled to an income distribution deduction under section 651(a) for the distributions to B, as it was for the distributions to A. The argument is that the conduit principle built into sections 651 and 652 causes income distributions from a simple trust to be transferred from the gross income of the trust to the gross income of the recipient, and that the assignee of a named beneficiary should be treated in this respect as standing in the shoes of the named beneficiary. The flaw in this argument is that Subchapter J contains ample evidence that Congress intended for distributions to charitable beneficiaries to be subject to special rules and limitations that do not apply to ordinary beneficiaries. Sections 642(c) and 681. The statutory provision which the Trust uses as authority for its claimed deduction, section 651, expressly excludes trusts that are designed by the grantor to make charitable distributions. The Trust's argument that the design of a beneficiary to cause the Trust to make charitable distributions should produce a statutory deduction for the Trust under this section seems to be contrary to the statutory purpose revealed in the language of section 651.

Furthermore, to allow a section 651 deduction to a simple trust for distributions to charities would establish a means for evasion of section 681. Section 681 applies only to complex trusts because it concerns charitable deductions otherwise allowable under section 642(c), which expressly excludes simple trusts. Section 1.681(a)-(1) of the Income Tax Regulations provides, in part, that the charitable contributions deduction allowable to a trust under section 642(c) is subject to the limitations under section 170 applicable to contributions by individuals to the extent the deduction is allocable to unrelated business income. This section 681 limitation, which clearly applies to a trust that makes distributions to charity pursuant to the terms of its governing instrument, could be evaded where a trust instrument is executed that provides only for a non-charitable income beneficiary, and such beneficiary then assigns its interest to a charity. This two-step procedure would effectively relieve the trust of a limitation that would have applied if the trust instrument had provided for a charitable income beneficiary.

The Trust argues that the deduction should be permitted because section 681 is not in issue since no unrelated business income is generated by the Trust, and therefore there is no tax abuse in the instant case. However, Congress intended the charitable deduction for trusts to be limited to the amounts allowable under section 681 and section 642(c), and these sections specifically do not apply to simple trusts. Therefore, to permit simple trusts to deduct charitable distributions would not only provide a benefit not allowed in the statute, it would open a loophole that could be manipulated contrary to the general rules governing the taxation of trusts. Because this scheme is subject to abuse, we think it should not be allowed despite the fact that no such abuse is present in the instant case.

The Trust argues in the alternative that it should be entitled to income tax deductions for charitable contribution distributions to B under section 170(a). This assertion is contradicted by section 1.170A-1(h)(1) of the regulations, which provides, in part, that the provisions of section 170 do not apply to a trust (other than a private foundation subject to section 642(c)(6), which does not apply to the trust in this case).

Congress excluded charitable contributions from the simple trust provisions, and in our opinion the exclusion prevents the deduction by a simple trust of any distribution made to a charitable institution. To hold otherwise would contradict the statutory structure of Subchapter J and potentially allow infringement upon its objectives.

Support for this approach can be found in section 1.663(a)-2 of the regulations, which provides, in part, that amounts paid, permanently set aside, or to be used for charitable, etc., purposes are deductible by estates or trusts only as provided in section 642(c). The validity of the regulation was upheld in *Mott v. United States*, 462 F.2d 512 (Ct. Cl. 1972), *cert. denied*, 409 U.S. 1108 (1973). The *Mott* court emphasized the special treatment accorded charitable distributions by referring to "what we believe to be an implied Congressional intent to prevent all charitable distributions, whether or not deductible under Section 642(c), from entering into the operation of the distribution rules [of Sections 661 and 662]." 462 F.2d at 518.

Section 642(c) provides that the deductible amount must be paid or permanently set aside "pursuant to the terms of the governing instrument" for charitable, etc., purposes. Although there is no case law directly on assignment of a trust income interest, a number of cases are analogous. The closest case is *Weir Foundation v. United States*, 362 F.Supp. 928 (S.D.N.Y.1973), *aff'd per curiam*, 508 F.2d 894 (2d Cir. 1974), in which the surviving spouse exercised a testamentary power of appointment from the trust to charity. The trust was denied a deduction under section 642(c) on the ground that the appointment was not pursuant to the will that created the trust. See *Marquis v. United States*, 173 F.Supp. 616 (Ct. Cl. 1959); *O'Connor Estate v. Commissioner*, 69 T.C. 165 (1977), appeal dismissed (2d Cir. 1980); *cf*. *John Allan Love Charitable Foundation v. United States*, 540 F.Supp. 238 (E.D. Mo. 1982), *aff'd* 710 F.2d 1316 (8th Cir. 1983).

> The applicable principle is that for a deduction to be allowed, the charitable impulse must originate from the grantor, not the fiduciary or beneficiary. It does not require specific instruction, but there must be some indication of charitable intent in the instrument. See *Old Colony Trust Co. v. Commissioner*, 301 U.S. 379 (1937). In the present case the trust instrument contains absolutely no authority for the payment of trust income during the lives of the designated income beneficiaries to any kind of charitable institution. On the contrary, the document is very clear as to the intent of the grantor that the income should pass to her relatives and their descendants, with the corpus passing to charitable institutions only upon the contingency that no such descendants survive as specified. Therefore, we conclude that Congress has barred the deduction of the distributions to B because they are not made pursuant to the terms of the governing instrument. The limitation that the charitable distribution must be pursuant to the terms of the estate or will in order to be deductible has been in the law long before the distinction between simple and complex trusts was enacted. 1939 I.R.C. section 162(a); Revenue Act of 1918, section 219(b). It would be a mistake to interpret the simple trust provisions of current law as bypassing this longstanding legislative policy. We think that the correct interpretation of Subchapter J as a whole is that a trust which does not within its terms allow for charitable distributions of income cannot deduct such distributions if they come into being through an assignment of an income interest by a beneficiary to a charitable organization, whether the trust is simple or complex.

The TAM's logic seems tortured to me. The assignment made B a beneficiary under state law; that the charity was not originally a beneficiary doesn't mean that the charity did not become a beneficiary. *Love Charitable Foundation* posited that the distribution to charity was not authorized, whereas in the TAM the assignment of half of A's income interest was authorized; this, *Old Colony Trust Co.* would support approving the deduction. B did become a beneficiary, preventing the simple trust rules from applying and subverting the rest of the TAM's analysis.

When a surviving spouse who had a general power of appointment over the marital trust created for her, exercised that power in favor of her estate, and left her estate to charity, the marital trust was not entitled to a charitable income tax deduction. *Brownstone v. U.S.*, 465 F.3d 525 (2nd Cir. 2006). Instead of claiming the charitable deduction, the trust should have taken an income distribution deduction and the estate then taken the charitable deduction. Thus, the court was correct to deny the charitable deduction. However, rather than saying the above, the court used the following reasoning:

> Appellant's arguments are equally unavailing. Appellant asks us to consider Ethel's power of appointment and Lucien's will together as the governing instrument, but as the district court noted on the record, the statute refers to "governing instrument" in the singular. To combine Ethel's power of appointment with Lucien's will and deem the resultant agglomeration the "governing instrument" strains the statute's text. We agree with appellant that ordinarily "governing" can imply a broader subject-object relationship than does "creating." Nevertheless, we find that the implication is neutralized by the statute's legislative history, which deems the current statute and its predecessor "comparable." We also agree with the district court that "the legislative history doesn't suggest that there is any attempt to broaden the prior law...."
>
> In construing the statute, however, we do not go so far as to equate "governing instrument" with "will or deed creating the trust." Instead, we note "[i]t is a common principle of taxation that where doubt exists, courts should resolve deductions in favor of the government: 'Whether and to what extent deductions shall be allowed depends upon

legislative grace; and only as there is clear provision therefor can any particular deduction be allowed.'" *Holmes v. United States*, 85 F.3d 956, 961 n.3 (2d Cir. 1996) (quoting *New Colonial Ice Co. v. Helvering*, 292 U.S. 435, 440 (1934)). Here, Congress has not made clear provision that an instrument subsequent to the creating instrument, such as Ethel's exercise of the power of appointment, in Article Third of her will, when combined with the "creating" deed or will, such as Lucien's will, could qualify as a "governing instrument." Under this rule of construction, because there is no such clear provision, Ethel's appointment, combined with Lucien's will, cannot qualify as a governing instrument under § 642(c)(1). Indeed, were the Tax Code to permit a trustee to agglomerate the separately manifested intents of diverse testamentary instruments so as to create a single, chimerical "governing instrument," it would greatly enhance the ability of trusts to obtain income tax deductions. For this, Congress has not made clear provision. We hold, therefore, that the governing instrument in this case is not a combination of two separate instruments. It is Lucien's will alone.

The second step in our inquiry leads us to determine whether Ethel's distribution was made "pursuant to" the governing instrument, Lucien's will. In *Old Colony*, the U.S. Supreme Court held: "'Pursuant to' is defined as 'acting or done in consequence or in prosecution (of anything); hence, agreeable; conformable; following; according.'" 301 U.S. at 383-84. This standard is permissive, but it "still conveys more than 'not in violation of'." *Weir Foundation*, 362 F.Supp. at 939. Therefore, "the instrument must be shown to possess some positive charitable intent or purpose of the settlor–not merely that the settlor did not exclude charity from all the possible beneficiaries of his bounty." *Id.* Ethel's will, in exercising the power of appointment, did not make the charitable distribution "pursuant to" the terms of Lucien's will because Lucien's will does not express sufficient charitable intent with respect to the Trust principal. In Article Seventh of his will, Lucien established the Trust for the support and maintenance of his wife. Article Seventh also gave Ethel a power of appointment that allowed her to distribute the Trust principal in any manner she saw fit. Only if she did not validly exercise that power would the Trust principal pass to a charitable organization. By the terms of Lucien's will, Ethel could have distributed the Trust principal entirely to private individuals. Just as easily, she could have distributed the Trust principal entirely to charity. But the choice was Ethel's alone, and Lucien's will expressed no preference. Indeed, Lucien's will necessarily abandoned all charitable intent with respect to the Trust principal in creating the power of appointment; if it had not, the Trust could not have taken advantage of the marital deduction. See 26 U.S.C. § 2056(b)(5). Once Ethel received the power of appointment, Lucien's will could not bind her to any course of action, charitable or otherwise. We agree with the district court: "She was not compelled to give one penny to charity. The governing instrument did not govern her free exercise of her discretion in any way, shape or form." Thus, Ethel did not make her distribution "pursuant to" the terms of the governing instrument.

The above analysis went way beyond what was necessary to resolve the case.

When a trust gave a beneficiary an inter vivos power of appointment in favor of charity that the beneficiary exercised to direct charitable distributions, Letter Ruling 201225004 allowed the charitable deduction. However, CCA 201651013 asserted no charitable deduction and no income distribution deduction when a court order gave a beneficiary an inter vivos power to appoint to charity and the beneficiary exercised it. The CCA, which was issued in the name of Brad Poston, a well-respected senior IRS official, reasoned:

> In the current case, the taxpayer makes a summary argument that the payments qualify under § 642(c) because they are pursuant to the governing instrument, citing to *Old Colony*. They do not address the authorities concerning deductions under modified trust instruments. Here there was no conflict with respect to Trust B subsequent to the division of Parent Trust. The trust terms were unambiguous. The purpose of the court order was not to resolve a conflict in Trust B but to obtain the economic benefits which the parties believe they will receive from the modification of the Parent Trust. Neither Rev. Rul. 59-15 nor *Emanuelson* hold that a modification to a governing instrument will be construed to be the governing instrument in situations where the modification does not stem from a conflict of some sort. Additionally, both *Crown* and *Brownstone* have a narrow interpretation of what qualifies as pursuant to a governing instrument. Therefore, any payments to Foundation 1 and Foundation 2 after the modification of Trust B would not be considered to be made pursuant to the governing instrument, and Trust B is not entitled to a deduction for such payments under § 642(c).

In denying the income distribution deduction, the CCA looked at Reg. § 1.663(a)-2, reproduced in fn. 2583, but took a much closer look at the issues that it said that the regulation definitively resolved. However, the CCA failed to consider Rev. Rul. 73-142, which would seem to resolve the issue in favor of the taxpayer; see part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts, giving <u>prospective</u> effect to a court modification. Following up on this and other issues, CCA 201747005 discussed Rev. Rul. 73-142; however, the CCA's arguments focused on will/trust construction cases being retroactive under *Bosch* and did not distinguish that in its reasoning from the much lower hurdle of merely needing a final court decree required for respecting court action prospectively. For example, the CCA cited *Hubbell* as favoring the CCA's position when *Hubbell* addressed only an attempt to apply a decree retroactively.

Furthermore, the "pursuant to" requirement was not met when a court modified a trust to add charities as income beneficiaries when only individuals were beneficiaries and the charities did not become beneficiaries until a later taxable year, even though the court action purported to be a construction and not a modification. *Hubbell Trust v. Commissioner*, T.C. Summ. Op. 2016-67. The probate court order stated:

> The language of the Will, as written, providing for the administration of the Trust, authorizes, and has from the inception of the Trust authorized, the Trustees of the Trust to make distributions of income and principal for charitable purposes specified in Internal Revenue Code section 170(c), or the corresponding provision of any subsequent federal tax law, both currently and upon termination of the Trust.

The Tax Court rejected the purposed construction, holding that the will did not provide for charitable contributions during that time period and that there was no ambiguity about that. Note that Rev. Rul. 73-142, referred to in part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts, provides relief prospectively only.

"Estate Planning Current Developments and Hot Topics," by Steve R. Akers, Ronald D. Aucutt, and Kerri G. Nipp of Bessemer Trust, Dallas, Texas, for ALI's Estate Planning for the Family Business Owner 2023 (10/6/2023), included item 25:[2584]

[2584] The Memorandum in Support of Motion for Partial Summary Judgment and order are in Thompson Coburn LLP document number 29,992,666, starting at the 376th page of the PDF.

IRS Position Refusing to Respect Decanting and Denying Estate Tax Charitable Deduction Even Though Assets Were Actually Appointed to Charity Rejected by Tax Court, *Estate of Horvitz v. Commissioner*, T.C. Dkt. No. 20409-19 (Order dated Feb. 7, 2023)

a. **Synopsis and Basic Facts**. QTIP trusts, funded when the predeceased spouse died in 1992, were decanted in 2013 to trusts with a broadened testamentary power of appointment (that could be exercised by a signed written instrument taking effect at the surviving spouse's death) allowing the surviving spouse to appoint the assets to charity. The surviving spouse died in 2015 having appointed about $20 million to charities and her estate claimed an estate tax charitable deduction. The IRS took the position that the decanting was not appropriate, that the assets did not properly pass to the charities, and that no estate tax charitable deduction was allowed.

The Ohio decanting statute allows decanting to another trust if the trust agreement gives the trustee "absolute" authority to make principal distributions, which is defined as distributions that are not subject to an ascertainable standard. OHIO REV. CODE § 5808.18(A)(1) & (2)(a). The decanted trust can include a broadened power of appointment that includes additional potential appointees.

The original QTIP trusts had various clauses that supported the legitimacy of the decanting. The distribution standard permitted distributions for the beneficiary's "comfort or general welfare" and included within that standard were distributions that "serve estate or tax planning objectives" and transfers deemed to be in "the best interests of the beneficiary." The original trust agreement included a decanting authority, stating that any authority to make distributions to a beneficiary includes authority to "to pay principal to a trust for the benefit of the beneficiary." Despite those provisions, the IRS position was that the trustee of the original QTIP trusts had no authority to decant the assets to the second trusts.

Discovery disputes arose in the Tax Court litigation over whether certain requested information was relevant and whether it was protected from discovery by the attorney-client privilege and attorney work product doctrine. Eventually (on October 14, 2021), the estate filed a motion for summary judgment asking the court to determine that the estate tax charitable deduction was allowed, claiming that the validity of the applicability of the charitable deduction was a legal issue with no material facts in dispute. The IRS filed a motion to compel compliance with discovery requests.

Sixteen months later (on February 7, 2023) the court entered an Order generally agreeing with the estate's legal positions – factual testimony about whether the Trustee believed the decanting was permissible would not affect the outcome; even if the decanting was impermissible, no contest was asserted as to the decanting or the contributions to charities and the court knows of no authority permitting the IRS to collaterally attack the charitable contributions; the distribution standard was not an ascertainable standard; and the Order had no discussion suggesting uncertainty about whether the decanting transaction was permissible. The Order directed counsel for the parties to confer with one another within one week to consider settling the case in light of observations in the Order. *Estate of Horvitz v. Commissioner*, T.C. Dkt. No. 20409-19 (Petition filed Nov. 15, 2019; Order dated Feb. 7, 2023, Judge Gustafson).

Within that one-week period, the IRS agreed to allow a full estate tax charitable deduction for the assets that passed to charities pursuant to the exercise of the power of appointment under the decanted trust. A Stipulation of Settled Issues was filed within about two weeks, and a Stipulated Decision was entered almost two months later (on April 6, 2023) – 8 years after the decedent's death.

b. **Estate's Brief**. The estate's brief in support of the motion for summary judgment explained fundamental concepts about decanting, common law decanting, codification of decanting authority in Ohio, the effect of ascertainable standards, and the effect of the absence of ascertainable standards on decanting authority. The estate's brief emphasized (1) the language in the original QTIP trusts (including the broad distribution standard that included "comfort" and "general welfare," the ability to make transfers that serve estate or tax planning purposes or for the beneficiary's best interests, and the authority to make distributions in trust) and (2) the decanting authority under the Ohio decanting statute.

c. **IRS Position**. The IRS responded primarily that it needed more factual information to determine if material fact issues existed. The IRS did not respond in detail to the estate's legal arguments regarding the validity of the decanting other than to argue that the original trust had an ascertainable standard on distributions so the broadened power of appointment under the decanted trust was invalid. (The IRS made that argument despite the authority to make distributions for the beneficiary's comfort, general welfare, and best interests. The estate responded that the IRS's definition of an ascertainable standard ironically would mean that many very broad distribution standards in other trust instruments would not result in a beneficiary-trustee having a general power of appointment.)

d. **Observations.**

(1) **IRS's and Court's Reaction to Decanting**. The IRS was reluctant to allow an estate tax charitable deduction for charitable contributions that were made under the broadened power of appointment as a result of a decanting transaction. (It is rather surprising that the IRS chose to raise its objections to allowing an estate tax charitable deduction under a decanting transaction in a case in which about $20 million actually passed to charities.) The judge expressed no hostility to the decanting transaction or recognizing it for tax purposes. The IRS eventually conceded (and the taxpayer had good facts in the case to support the decanting authority).

Planners may experience similar IRS hostility in the future to broadened distribution authority granted in decanting transactions (for example, assets in a non-exempt trust might be decanted to a new trust giving someone a power of appointment to appoint assets to a non-skip person, who could engage in further estate planning transfers to minimize tax costs of passing assets to younger generations). Distributions pursuant to a broad authority to make distributions or a broad power of appointment rather than having to use a decanting transaction may be safer.

(2) **Significant Expense**. The dispute about the availability of an estate tax deduction for about $20 million that actually passed to charities took 8 years after the decedent's death and about 3½ years after the filing of a Tax Court petition to resolve. The litigation involved discovery disputes over "several thousand documents." The estate incurred significant litigation costs.

(3) **Recognition of Prior Transfers That Have Been Uncontested**. A paragraph in the Order questioned whether the IRS could contest the availability of a charitable deduction in a situation in which no one had complained about the decanting, the statute of limitations had passed on the ability to contest the transaction, and money had actually passed to charities. That paragraph of the Order is as follows (footnote omitted):

> As far as our record shows, there was no contest asserted as to the 2013 decanting (accomplished almost 10 years ago) or the 2015 contributions (accomplished almost 8 years ago). Presumably, a disappointed beneficiary whose interest might have been affected by either or both of these acts could have challenged them in the appropriate Ohio court, but as far as we know, none did. We know of no authority for the proposition that, in support of disallowing an estate tax deduction for a charitable contribution, the Commissioner may advance a collateral attack (not made by anyone with standing) against the propriety of the contribution. Another sort of deduction by an estate - say, for administration expenses - might be disallowed for tax purposes, even if the expense was demonstrably incurred and paid, if the expense was not “allowable by the laws of the jurisdiction”. § 2053. But we know of no such grounds for disallowance of a deduction for a charitable contribution deduction, and we would benefit from further discussion of this issue. The contribution at issue here appears to be plainly described in Section 2055(a)(2). Section 2055(e) does provide for “Disallowance of Deductions in Certain Cases”, but we do not see in that subsection the circumstances of this case.)

This argument is reminiscent of Revenue Ruling 73-142, 1973-1 C.B. 405, which addressed the tax effects of transfers pursuant to court construction actions that had become final and binding before a taxable event, even if the construction was improper. In Rev. Rul. 73-142, a settlor reserved the power to remove and replace the trustee with no express limitation on appointing himself, and the trustee held tax sensitive powers that would cause estate inclusion under §§ 2036 or 2038 if held by the grantor at his death. The settlor obtained a local court construction that the settlor only had the power to remove the trustee once and did not have the power to appoint himself as trustee. After obtaining this ruling, the settlor removed the trustee and appointed another, so the settlor no longer had the removal power.

In Revenue Ruling 73-142, the state court determination, which was binding on everyone in the world after the appropriate appeals periods ran, occurred before the taxable event, which would have been the settlor’s death. The IRS agreed that it was bound by the court’s ruling as well, “regardless of how erroneous the court’s application of the state law may have been.”

The court order must be obtained prior to the event that would otherwise have been a taxable event in order for the IRS to be bound under the analysis in Revenue Ruling 73-142.

(4) **Contrast with Trust Charitable Income Tax Deduction**. A trust is entitled to a charitable income tax deduction for amounts of gross income passing to charity “pursuant to the terms of the governing instrument.” §642(c)(1). However, no governing instrument requirement applies for the estate tax charitable deduction. That difference is another reason that the IRS’s reluctance to allow an estate tax charitable deduction for assets passing pursuant to provisions in a decanted trust is so puzzling.

> A 2016 Chief Counsel Advice refused to give effect to a court modification for purposes of whether or not charitable distributions were made "pursuant to the terms of the governing instrument" to allow a charitable income tax deduction for the trust. CCA 201651013. The trust was modified to give the beneficiary a limited power of appointment in favor of charity. The IRS concluded that if the beneficiary exercised a power of appointment to make distributions to charity, a charitable deduction would not be available under § 642(c) because the distribution would not be made pursuant to the terms of the governing instrument. A subsequent Chief Counsel Advice involving the same case similarly concluded that assets appointed to charities under a power of appointment granted in a court modification would not satisfy the "pursuant to the terms of the governing instrument" requirement. CCA 201747005 (includes extended discussion of *Bosch* and Rev. Rul. 73-142).
>
> This conclusion seems incorrect; if the governing instrument is effectively modified under state law before the transfer to charity, subsequent transfers would seem to be made pursuant to the terms of the governing instrument in the absence of guidance under § 642(c) that it looks only to the governing instrument as originally executed, without valid modifications. The case involved with that CCA was subsequently settled.

The *Horvitz* court order is reproduced in part II.J.18.c.i What Is Decanting. See also Rev. Rul. 73-142, which is reproduced in part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts after fn 6352 (IRS prospective recognition even though *Bosch* would not give retroactive effect).

To avoid controversy, consider expressly authorizing the trustee to make charitable distributions or a beneficiary to exercise an inter vivos power of appointment in favor of charity. I often give a beneficiary a broad inter vivos limited power of appointment at whatever age the settlor feels is appropriate. I include a clause saying that, whenever the trust refers to all persons (with or without excluding the beneficiary, the beneficiary's estate, and the creditors of either), that expressly includes the power to appoint to charity.

Also, consider having the trust participate in a partnership that makes the donation, which may avoid needing to satisfy the "pursuant to" requirement.[2585]

A trust claiming Code § 642(c) charitable deduction may have additional filing requirements. Split-interest trusts described in Code § 4947(a)(2) have their own filing requirements.[2586] Other trusts claiming Code § 642(c) deductions have certain filing requirements (Form 1041-A)[2587] unless "all the net income for the year, determined under the applicable principles of the law of

---

[2585] See fn. 4914, in part II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction.

[2586] Code § 6034(a). Code § 4947(a)(2) describes:

> … a trust which is not exempt from tax under section 501(a), not all of the unexpired interests in which are devoted to one or more of the purposes described in section 170(c)(2)(B), and which has amounts in trust for which a deduction was allowed under section 170, 545(b)(2), 642(c), 2055, 2106(a)(2), or 2522 ….

[2587] Code § 6034(b)(1).

trusts, is required to be distributed currently to the beneficiaries,"[2588] or the trust is described in Code § 4947(a)(1).[2589] Code § 4947(a)(1) describes:

> … a trust which is not exempt from taxation under section 501(a), all of the unexpired interests in which are devoted to one or more of the purposes described in section 170(c)(2)(B), and for which a deduction was allowed under section 170, 545(b)(2), 642(c), 2055, 2106(a)(2), or 2522 (or the corresponding provisions of prior law)….

IRM § 7.26.15.2.1 (04-08-1999), "Estates and Certain Trusts Performing Administrative Functions," as found on the IRS website https://www.irs.gov/irm/part7/irm_07-026-015 on 8/12/2019, provides:

1. An estate is not considered to be an IRC 4947(a)(1) trust during any reasonable period for administration or winding up of its affairs. Once it is terminated for federal income tax purposes or if it is considered unduly prolonged, the provisions of IRC 4947(a)(1) will apply.

2. Similarly, in the winding up of an IRC 4947(a)(2) trust, there are transitional rules that apply before the trust is considered described in IRC 4947(a)(1).

3. Examples of trusts or estates not subject to IRC 4947(a)(1) during a period of administration or settlement include the following:

    a. A split-interest trust for which a final distribution of all assets is required because its private interests have expired would not be subject to the provisions of IRC 4947(a)(1) until expiration of any reasonable period for settlement. Regs. 53.4947-1(b)(2)(iii).

    b. Another variation of the preceding example is a split interest trust where all private interests have expired and where the charitable beneficiaries are not entitled to a distribution will continue to be treated as a split-interest trust during a period of settlement. This trust is unlike the preceding trust because some or all of the charitable remainder interests remain in the trust rather than being distributed. Regs. 53.4947-1(b)(2)(iv).

    c. A revocable trust that becomes irrevocable at the creator's death and is required to make a final distribution of all its assets is not subject to IRC 4947(a)(1) during any reasonable period of settlement. Regs. 53.4947-1(b)(2)(v).

What is a reasonable period of administration for a trust depends on the circumstances, but presumably it is not less than that described in part II.J.7 Code § 645 Election to Treat a Revocable Trust as an Estate. For an estate, Reg. § 53.4947-1(b)(2)(ii)(A) provides:

> When an estate from which the executor or administrator is required to distribute all of the net assets in trust for charitable beneficiaries, or free of trust to such beneficiaries, is considered terminated for Federal income tax purposes under § 1.641(b)-3(a), then the

[2588] Code § 6034(b)(2)(A). Form 1041-A instructions refer to Code § 643(b) income. For more on Code § 643(b) income, see parts II.J.8.c.i.(a) Power to Adjust, II.J.8.c.i.(d) Exceptions in the Governing Instrument and II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law.
[2589] Code § 6034(b)(2)(B)

estate will be treated as a charitable trust under section 4947(a)(1) between the date on which the estate is considered terminated under § 1.641(b)-3(a) and the date final distribution of all of the net assets is made to or for the benefit of the charitable beneficiaries. This (ii) does not affect the determination of the tax liability under subtitle A of the beneficiaries of the estates.

Reg. § 1.641(b)-3(a) is reproduced after fn 2732 in part II.J.8.

Charitable contributions are merely deductions and do not trigger issuing a K-1 to the charity.[2590]

If the charitable deduction is problematic, consider:

- Adding a Code § 501(c)(4) organization as a beneficiary. Adding the organization appears not to be subject to gift tax.[2591] The trust would get an income distribution deduction for distributions to the organization,[2592] and the organization pays no income tax.

- Adding a charitable remainder trust (CRT) as a beneficiary.[2593] Adding the CRT may be subject to gift tax, ameliorated by the charitable deduction. Generally, a CRT is not subject to income tax, but distributions to the noncharitable beneficiary are taxed to that beneficiary. However, a CRT is subject to a punitive tax on business income.[2594]

II.J.4.c.ii. Individual Contribution Deduction Requirements

Furthermore, charitable gifts from nongrantor trusts and estates do not appear to be subject to the strict substantiation and appraisal rules that apply to individuals, partnerships, and corporations. Below are the requirements that apply to these other donors.

In addition to the rules below, see part II.G.4.g Limitations on Deducting Charitable Contributions.

II.J.4.c.ii.(a). Contemporaneous Written Acknowledgement (CWA)

Code § 170(f)(8) disallows contributions under Code § 170(a) if certain substantiation requirements are not met but does so without referring to Code § 642(c). Also, Code § 642(c) says that the deduction is “in lieu of the deduction allowed by section 170(a),” further disconnecting Code § 642(c) for Code § 170(f)(8). Note also that Reg. § 1.170A-13(f)(13) provides:

> Section 170(f)(8) does not apply to a transfer of property to a trust described in section 170(f)(2)(B), a charitable remainder annuity trust (as defined in section 664(d)(1)), or a charitable remainder unitrust (as defined in section 664(d)(2) or (d)(3) or § 1.664-3(a)(1)(i)(b)). Section 170(f)(8) does apply, however, to a transfer to

[2590] See fn 2866 in part II.J.9.a.ii Separate Share Rule.
[2591] See part II.Q.6.g Gift Tax Exclusion for Gifts to Certain Noncharitable Organizations.
[2592] See part II.J.1 Trust’s Income Less Deductions and Exemptions Is Split Between Trust and Beneficiaries, fns 2473-2475.
[2593] CRTs are described in Code § 664, which also governs income tax consequences of the taxable income they receive. Gift (Code § 2522) and estate tax (Code § 2055) charitable deductions also apply to the extent of the charitable interest. For another creative planning tool for CRTs, see part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.
[2594] See part II.Q.6.d Unrelated Business Taxable Income (UBTI).

> a pooled income fund (as defined in section 642(c)(5)); for such a transfer, the contemporaneous written acknowledgment must state that the contribution was transferred to the donee organization's pooled income fund and indicate whether any goods or services (in addition to an income interest in the fund) were provided in exchange for the transfer. The contemporaneous written acknowledgment is not required to include a good faith estimate of the income interest.

As to how strict Code § 170(f)(8) is, *Addis v. Commissioner*, 374 F.3d 881 (9th Cir. 2004) held:

> Congress enacted section 170(f)(8) to increase compliance with the rule that "where a charity receives a quid pro quo contribution (*i.e.*, a payment made partly as a contribution and partly in consideration for goods or services furnished to the payor by the donee organization)," a charitable contribution deduction is limited to the amount exceeding the value of the consideration received. H. Rep. 103-111, at 785 (1993). Section 170(f)(8) "does not impose an information reporting requirement upon charities; rather it places the responsibility upon taxpayers ... to request ... substantiation from the charity of their contribution (and any good or service received in exchange)." H. Conf. Rep. 103-213, at 563–64 (1993).
>
> The consideration disclosure requirement in section 170(f)(8) is threefold: the receipt must (1) state whether any goods and services were given as consideration; (2) describe the consideration provided, if any; and (3) give a good-faith estimate of the value of the consideration, if any, unless it consists solely of intangible religious benefits.
>
> Goods and services that must be disclosed include "cash, property, services, benefits, and privileges ... provided in a year other than the year in which the taxpayer makes the payment to the donee organization." 26 C.F.R. § 1.170A-13(f)(5), (6). "A donee organization provides goods or services in consideration for a taxpayer's payment if, at the time the taxpayer makes the payment to the donee organization, the taxpayer receives or expects to receive goods or services in exchange for that payment." 26 C.F.R. § 1.170A-13(f)(6)….
>
> We conclude the Addises expected consideration for their payments to the NHF. The Addises' receipt did not meet any of the three disclosure requirements of section 170(f)(8).

A reviewed decision, *15 West 17th Street LLC v. Commissioner*, 147 T.C. No. 19 (2016), disallowed a $64 million charitable deduction. The charity's acknowledgement of the gift failed to recite, as required by Code § 170(f)(8)(B)(ii), whether the charity provided any goods or services to the donor. The taxpayer lost even though the charity later filed an amended Form 990 stating the gift's value. Because no regulations implement Code § 170(f)(8)(D), taxpayers cannot rely on a charity's filing with the IRS as an exception to Code § 170(f)(8)(B)(ii).

However, *Big River Development, L.P. v. Commissioner*, T.C. Memo. 2017-166, held:

> LP did not receive from the donee organization a timely letter of the sort that normally acts as a "contemporaneous written acknowledgment" (CWA) within the meaning of section 170(f)(8)(B)…. We have previously held that a deed of easement may constitute a CWA. See *310 Retail, LLC v. Commissioner*, T.C. Memo. 2017-164; *RP Golf, LLC v. Commissioner,* T.C. Memo. 2012-282, 104 T.C.M. (CCH) 413; *Averyt v. Commissioner*,

> T.C. Memo. 2012-198, 104 T.C.M. (CCH) 65. We conclude that the deed of easement in this case qualifies as a CWA under the logic of these cases.

Izen v. Commissioner, 148 T.C. 71 (2017),[2595] involved the additional CWA requirements for vehicles, including aircraft:[2596]

> Petitioner urges that we excuse these defects on the ground that he "substantially complied" with the statutory requirements. As we have repeatedly held in cases involving section 170(f)(8)(B), however, "[t]he doctrine of substantial compliance does not apply to excuse compliance with the [statute's] strict substantiation requirements." *French*, at *8. In each instance, the Code unambiguously provides that "no deduction shall be allowed" in the absence of a CWA that satisfies the statute's specific demands. Sec. 170(f)(8)(A), (12)(A)(i).
>
> In sum, we conclude that petitioner did not include with his amended 2010 return, as required by section 170(f)(12)(A)(i), "a contemporaneous written acknowledgment … by the donee organization that meets the requirements of subparagraph (B)." Congress enacted this provision after identifying serious tax compliance problems relating to charitable contributions generally and to gifts of used vehicles in particular. See H.R. Conf. Rept. No. 108-755, supra at 747-752, 2004 U.S.C.C.A.N. at 1787-1792; *cf*. H.R. Rept. No. 108-548 (Part I), at 358 (2004). Congress accordingly imposed very strict requirements and provided explicitly that "no deduction shall be allowed" unless these requirements are met. Sec. 170(f)(8)(A), (12)(A)(i). We are not at liberty to override this legislative command.

Keefer v. U.S., 130 A.F.T.R.2d 2022-5002 (N.D. TX 7/6/2022), pointed out that, in addition to the contemporaneous written acknowledgement (CWA) requirements of Code § 170(f)(8), Code § 170(f)(18) requires more when giving to a donor advised fund:

> A deduction...for any contribution to a donor advised fund...shall only be allowed if...the taxpayer obtains a [CWA](determined under rules similar to the rules of paragraph (8)(C)) from the sponsoring organization...of such donor advised fund that such organization has exclusive legal control over the assets contributed.

Keefer v. U.S., 130 A.F.T.R.2d 2022-5002 (N.D. TX 7/6/2022), held:

> Below, the Court finds the Keefers did not obtain a statutorily compliant CWA and that their charitable donation deduction was properly denied on that basis. First, the Court explains why the June 8, 2015 DAF Packet is not a CWA. Next, the Court explains why the September 9, 2015 Acknowledgment Letter cannot be supplemented by the DAF

[2595] Affirmed 38 F.4th 459 (5th Cir. 2022).

[2596] Footnote 7 of the opinion commented:

> For contributions to which section 170(f)(8) applies, Congress considered requiring taxpayers to provide TINs to donee organizations but ultimately decided not to enact this requirement. See *15 West 17th Street LLC v. Commissioner*, 147 T.C. __, __ (slip op. at 17) (Dec. 22, 2016). Under paragraph (f)(12), by contrast, taxpayers must supply TINs to donee organizations so that the latter can issue CWAs meeting the statutory requirements and satisfy their obligation to file Forms 1098-C with the Secretary. See sec. 170(f)(12)(D). Because of serious tax compliance problems in this area, Congress created a specific mechanism to enable the IRS to identify taxpayers who had made contributions of used vehicles. The statutory requirement that the CWA for such contributions include the taxpayer's TIN thus cannot be regarded as insignificant.

> Packet. Finding that the DAF Packet cannot supplement the Acknowledgment Letter, the Court does not consider whether the DAF Packet establishes that Pi had "exclusive legal control" over the donated property. Instead, because the Acknowledgment Letter alone contains nothing to prove "exclusive legal control," the Court finds that § 170(f)(18) was not satisfied….
>
> … because the Acknowledgment Letter does not reference the Keefer DAF or otherwise affirm Pi's exclusive legal control, as required by § 170(f)(18), the Keefers did not obtain a CWA satisfying each statutory requirement.

Keefer v. U.S., 130 A.F.T.R.2d 2022-5406 (N.D. TX 8/10/2022), denied the taxpayers' motion for reconsideration, holding:

> Finally, to the extent that the Keefers now appear to argue that the June 18, 2015 Assignment of Interest should be read together with the June 8, 2015 DAF Packet to create a CWA satisfying the exclusive legal control requirement of 26 I.R.C. § 170(f)(18), the Court rejects that argument. See Doc. 85, Reply, 4–6. The Keefers correctly note that under Texas law "[d]ocuments 'pertaining to the same transaction may be read together,' even if they are executed at different times and do not reference each other, and 'courts may construe all the documents as if they were part of a single, unified instrument.'" *Id*. at 5 (quoting *In re laibe Corp.*, 307 S.W.3d 314, 317 (Tex. 2010)). However, before doing so, "a court may consider whether each written agreement and instrument was 'a necessary part of the same transaction.'" *Rieder v. Woods*, 603 S.W.3d 86, 94 (Tex. 2020). And, "when construing multiple documents together, courts must do so with caution, bearing in mind that tethering documents to each other is 'simply a device for ascertaining and giving effect to the intention of the parties and cannot be applied arbitrarily and without regard to the realities of the situation.'" *Id*. at 94-95 (quoting *Miles v. Martin*, 321 S.W.2d 62, 65 (Tex. 1959)).
>
> Critically, each of the cases cited above gives the Court permission to construe multiple documents together, where appropriate under all the circumstances and to give effect to the intent of the parties. None of these cases requires the Court to do so. And here, considering the ten-day gap between the June 8, 2015 DAF Packet's signing and the June 18, 2015 Assignment of Interest's execution; that only one (Kevin) out of three signatories to the June 18, 2015 Assignment of Interest signed the June 8, 2015 DAF Packet; that neither document references the other; and that the CWA requirement requires strict (not substantial) compliance, the Court finds that the realities of the situation do not permit the documents to be read together. See Doc. 66, DAF Packet, 38; Doc. 69-5, Assignment Int., 443–44; see also *Keefer*, 2022 WL 2473369, at *16–17 (discussing cases permitting a court to consider multiple documents as forming a CWA and the strict compliance requirement).

Braen v. Commissioner, T.C. Memo. 2023-85, reasoned and held:

> Even if we were to overlook Holdings' failure to value the zoning reversion, the deduction nonetheless would be barred because of a fatal defect in the contemporaneous written acknowledgment. See I.R.C. § 170(f)(8)(A); *Triumph*, T.C. Memo. 2018–65, at *29.
>
> Section 170(f)(8) requires that the contemporaneous written acknowledgment state (1) the amount of cash and a description (but not value) of any property other than cash contributed, (2) whether the charitable organization provided any goods or services in

consideration, in whole or part, for the contributed property, and (3) a description and good-faith estimate of the value of any goods or services the taxpayer received as consideration. *Addis v. Commissioner*, 118 T.C. 528, 533–34 (2002), *aff'd*, 374 F.3d 881 (9th Cir. 2004). "A donee organization provides goods or services in consideration for a taxpayer's payment if, at the time the taxpayer makes the payment to the donee organization, the taxpayer receives or expects to receive goods or services in exchange for that payment." Treas. Reg. § 1.170A-13(f)(6). "Goods or services means cash, property, services, benefits, and privileges." *Addis*, 118 T.C. at 534 n.8; Treas. Reg. § 1.170A-13(f)(5).

The written acknowledgment and other substantiation requirements are designed to "foster disclosure of `dual payment' or quid pro quo contributions." *Viralam v. Commissioner*, 136 T.C. 151, 171 (2011). "Where the written acknowledgment of a charitable contribution by a donee organization states that the donor received no consideration and the donor actually received a benefit in exchange for the donation, the deduction is disallowed in its entirety." *Id*.

A taxpayer's failure to supply a satisfactory contemporaneous written acknowledgment bars a charitable contribution deduction. *Izen v. Commissioner*, 148 T.C. 71, 76-77 (2017), *aff'd*, 38 F.4th 459 (5th Cir. 2022); *15 W. 17th St. LLC v. Commissioner*, 147 T.C. 557, 562-63 (2016); *Albrecht*, T.C. Memo. 2022-53, at *3–4. The doctrine of substantial compliance does not apply in this context. Izen, 148 T.C. at 77; *15 W. 17th St.*, 147 T.C. at 562; *French v. Commissioner*, T.C. Memo. 2016-53, at *8 [2016 RIA TC Memo ¶2016-053]; see also Addis v. Commissioner, 374 F.3d at 881, 887 ("The deterrence value of [a] total denial of a deduction [in the case of an improper contemporaneous written acknowledgment] comports with the effective administration of a self-assessment and self-reporting system.").

The 2011 acknowledgment letter provided by the Ramapo town attorney does not satisfy section 170(f)(8). Holdings negotiated for and received the zoning change as part of the settlement and land purchase, and, to satisfy section 170(f)(8), the acknowledgment was required to both identify it as consideration and provide a good-faith valuation of it. The letter plainly did not do so, instead stating that Holdings did not receive "any goods or services, in whole or in part, as consideration" other than the $5,250,000. See *Viralam*, 136 T.C. at 171; see also *Boone*, T.C. Memo. 2013-101, at *17-21.

The Braens argue that the letter's statement that "[a] lawsuit bearing Rockland County Index No. 1752/05 was settled incident to the sale and was approved by order of Hon. Margaret Garvey, Justice of the Supreme Court, dated April 7, 2010" suffices to meet the statutory requirements. But "[n]othing in the statute or legislative history requires [the Commissioner] to look beyond the written acknowledgment when on its face the acknowledgment fails to provide the information required to substantiate a charitable contribution deduction." *Durden v. Commissioner*, T.C. Memo. 2012-140, 2012 WL 1758655, at *4. Even if we were inclined to see the reference to the settlement as sufficient to identify the rezoning as consideration, neither the letter nor the settlement agreement provides a good-faith valuation as required by section 170(f)(8). See *Boone*, T.C. Memo. 2013-101, at *21-22.

With the doctrine of substantial compliance off limits, the Braens rely on the "reasonable cause" exception of section 170(f)(11)(A)(ii)(II) to excuse the acknowledgment's shortcomings. This exception, however, does not apply to the contemporaneous written acknowledgment requirement. See *Campbell v. Commissioner*, T.C. Memo. 2020-41, at *28 n.16.

Holdings' failure to comply with requirements of section 170(f)(8) accordingly prohibits the Braens from claiming charitable contribution deductions. See *Addis*, 118 T.C. at 537; *Albrecht*, T.C. Memo. 2022-53, at *5–6; *Boone*, T.C. Memo. 2013-101, at *21–22.[10]

[10] Given the Braens' failure to establish the value of the consideration received and to supply a contemporaneous written acknowledgment, we need not address the other issues that might justify disallowance of the deductions. See *Triumph*, T.C. Memo. 2018-65, at *30; *Boone*, T.C. Memo. 2013-101, at *22.

II.J.4.c.ii.(b). Appraisal and Form 8283 Requirements

Bond v. Commissioner, 100 T.C. 32, 40-42 (1993), applied the doctrine of substantial compliance:

> Respondent contends that by not obtaining and attaching to their 1986 income tax return a written appraisal of the airships, petitioners have failed to satisfy the prerequisites to a charitable deduction under sections 1.170A-13(c)(2)(i)(A) and (3) of the regulations. On the other hand, petitioners contend that they substantially complied with the requirements of the applicable statute and, therefore, have qualified for the charitable deduction under the doctrine of substantial compliance the test for which is set forth in *Taylor v. Commissioner*, 67 TC 1071, 1077-1078 (1977), as follows:
>
>> The critical question to be answered is whether the requirements relate "to the substance or essence of the statute." *Fred J. Sperapani*, 42 TC 308, 331 (1964). If so, strict adherence to all statutory and regulatory requirements is a precondition to an effective election. *Lee R. Dunavant*, 63 TC 316 (1974). On the other hand, if the requirements are procedural or directory in that they are not of the essence of the thing to be done but are given with a view to the orderly conduct of business, they may be fulfilled by substantial, if not strict compliance. See *Lee R. Dunavant*, *supra*; *George S. Cary*, 41 TC 214 (1963); *Columbia Iron & Metal Co.*, 61 TC 5 (1973)…
>
> Under the above test we must examine section 170 to determine whether the requirements of the regulations are mandatory or directory with respect to its statutory purpose. At the outset, it is apparent that the essence of section 170 is to allow certain taxpayers a charitable deduction for contributions made to certain organizations. It is equally apparent that the reporting requirements of section 1.170A- 13, Income Tax Regs., are helpful to respondent in the processing and auditing of returns on which charitable deductions are claimed. However, the reporting requirements do not relate to the substance or essence of whether or not a charitable contribution was actually made. We conclude, therefore, that the reporting requirements are directory and not mandatory. See *Taylor v. Commissioner*, *supra* at 1078-1079.
>
> Furthermore, our conclusion is not altered by the fact that section 170(a) states that "A charitable contribution shall be allowed as a deduction only if verified under regulations prescribed by the Secretary." See *Cary v. Commissioner*, 41 TC 214 (1963), where we held that a similar provision in section 302(c)(2)(A)(iii), requiring the filing of an agreement to notify the Commissioner of reacquisitions of stock within a 10-year period of a redemption under section 302(b)(3) in the manner prescribed by an applicable

regulation, is directory rather than mandatory. The fact that a Code provision conditions the entitlement of a tax benefit upon compliance with respondent's regulation does not mean that literal as opposed to substantial compliance is mandated. *Cary v. Commissioner*, *supra*.

In the case before us there is no question that a donation of the two airships was made during the taxable year, that the subject of the donation was appraised at the amount claimed by petitioners as a charitable deduction during the taxable year by a qualified appraiser, and that the donee was qualified to receive a charitable contribution. In fact, with the exception of the excellent qualifications of the appraiser all of these facts appeared on the Form 8283 attached to the return filed by petitioners. Furthermore, the name, title, and place of employment of the appraiser also appeared on the Form 8283 together with the identification number assigned to his employer by respondent. The appraiser's qualifications were promptly furnished to respondent's agent at or near the commencement of his audit. Therefore, this is not a case where petitioners failed to obtain a timely appraisal of the donated property and thereby failed to establish its value for claiming a contribution deduction on their return. Instead, petitioners, in this case, met all of the elements required to establish the substance or essence of a charitable contribution, but merely failed to obtain and attach to their return a separate written appraisal containing the information specified in respondent's regulations even though substantially all of the specified information except the qualifications of the appraiser appeared in the Form 8283 attached to the return. The denial of a charitable deduction under these circumstances would constitute a sanction which is not warranted or justified. See *Columbia Iron & Metal Company v. Commissioner*, 61 TC 5, 10 (1973).

We conclude, therefore, that petitioners have substantially complied with section 1.170-13A, Income Tax Regs., and are entitled to the charitable deduction claimed.

Estate of Evenchik v. Commissioner, T.C. Memo. 2013-34, held:

… Instead of valuing their contributed interest in Chateau, they valued Chateau's interest in two of its own assets - the apartment complexes. That miscue goes to the essence of the information required, because without knowing the specific property contributed the Commissioner is unable to determine whether the contributed property interest was overvalued. And the problem of misvalued property is so great that Congress was quite specific about what the charitably inclined have to do to defend their deductions. See *Mohamed*, 2012 WL 1937555 at *10. Indeed, that problem arose here - the parties stipulated that the Evenchiks overvalued their partial interest in Chateau by 35%.

Moreover, as it was in *Smith*, appraising the wrong asset was far from the only error in the appraisals that the Evenchiks submitted: The appraisals also didn't state the date or expected date of the contribution or the fair market value on those dates, didn't provide a statement that the appraisal was prepared for income-tax purposes, and didn't include the terms of any agreement or understanding entered into by Harvey or FHR relating to the use of the donated property. This is not a case where the taxpayers provided most of the information but left out one insignificant datum. *Cf*. *Hewitt*, 109 T.C. at 265. This is a case where the appraisals had gaping holes of required information. These defects prevented the Commissioner from properly evaluating the property interest contributed. The Evenchiks are not, therefore, entitled to the deduction they seek.

Costello v. Commissioner, T.C. Memo. 2015-87, held:

> We have declined to apply the substantial compliance doctrine where the taxpayer's reporting fails to meet substantive requirements set forth in the regulations[6] or omits entire categories of required information.[7] Petitioners' original appraisal and Form 8283 suffer from both of these defects. Those documents omit numerous categories of important information, including an accurate description of the contributed property, the salient terms of the agreements among the parties, a signature of the donee attesting to receipt of a contribution, an explanation of the quid pro quo petitioners received, and the date of the contribution.[8]
>
> [6] See, *e.g.*, *Hewitt*, 109 T.C. at 260, 264 (the taxpayer did not "substantially comply" where he did not supply a qualified appraisal or an appraisal summary); *Estate of Evenchik v. Commissioner*, T.C. Memo. 2013-34, at *12-*15 (the taxpayer did not "substantially comply" where he submitted an appraisal of the wrong property); *Rothman v. Commissioner*, T.C. Memo. 2012-218, slip op. at 10 (the taxpayer did not "substantially comply" where the appraisal valued "a property right different from the one petitioners contributed"); *D'Arcangelo v. Commissioner*, T.C. Memo. 1994-572, 68 T.C.M. (CCH) 1223, 1230 (1994) (the taxpayer did not "substantially comply" where he obtained an appraisal from a nonqualified appraiser).
>
> [7] See, *e.g.*, *Estate of Evenchik*, at *9-*10 (the taxpayer did not "substantially comply" where the appraisal omitted an accurate description of the contributed property, the contribution date, and the terms of an agreement relating to its disposition); *Lord v. Commissioner*, T.C. Memo. 2010-196, 100 T.C.M. (CCH) 201, 202 (the taxpayer did not "substantially comply" where the appraisal omitted the contribution date, the appraisal performance date, and the fair market value as of the contribution date); *Friedman v. Commissioner*, T.C. Memo. 2010-45, 99 T.C.M. (CCH) 1175, 1177 (the taxpayer did not "substantially comply" where the appraisal omitted, *inter alia*, an adequate description of the donated property); *Smith*, 94 T.C.M. (CCH) at 585 (the taxpayer did not "substantially comply" where the appraisal omitted, *inter alia*, the contribution date and disclosure of restrictions on use of the property).
>
> [8] Because petitioners' original Form 8283 disclosed the date of the alleged contribution, the absence of that information from the appraisal would not, standing alone, be fatal. See *Zarlengo v. Commissioner*, T.C. Memo. 2014-161, at *36 (finding that taxpayers substantially complied by disclosing contribution date on appraisal summary); *Simmons v. Commissioner*, T.C. Memo. 2009-208, 98 T.C.M. (CCH) 211, 215, *aff'd*, 646 F.3d 6 (D.C. Cir. 2011) (same).

Relaxing the appraisal rules a bit, *Cave Buttes L.L.C. vs. Commissioner*, 147 T.C. No. 10 (2016), included in its official syllabus:

> *Held*: C's appraisal report substantially complied with the requirements of sec. 1.170A-13(c)(5)(iii), Income Tax Regs., by including one of the two appraisers' signatures on Form 8283, Noncash Charitable Contributions.
>
> *Held, further*, a description of the appraised property by address and characteristics is sufficient to strictly comply with sec. 1.170A-13(c)(3)(ii)(A), Income Tax Regs.

> *Held, further*, the wording in the appraisal report that it was conducted to value the property for "filing with the IRS" at least substantially, if not strictly, complied with sec. 1.170A-13(c)(3)(ii)(G), Income Tax Regs.

Presley v. Commissioner, 790 Fed. Appx. 914 (10th Cir. 2019), reasoned and held:

> The Presleys argue they substantially complied with the regulatory substantiation requirements because they obtained an appraisal and the appraisal summary on Form 8283 provided the date of contribution, the date they purchased the residence, the cost basis of the residence, the description and condition of the residence, and the identity of the donee, as required by Treas. Reg. § 1.170A-13(c)(4)(ii). They claim the only defects on Form 8283 are that the donee acknowledgment is not signed and the appraiser's declaration does not identify the appraiser. The Form 8283 defects, they argue, do not go to the essence of the issue, which they claim is whether they donated their residence to PFM during the 2012 tax year. Nor, they claim, do the defects thwart the purpose of the substantiation requirements - to "alert the Commissioner to potential overvaluations of contributed property and thus deter taxpayers from claiming excessive deductions," *RERI Holdings I, LLC v. Comm'r*, 149 T.C. 1, 14 (2017).
>
> In support of their argument, they lean heavily on *Bond v. Commissioner*, 100 T.C. 32 (1993). The Commissioner argues that *Bond* is distinguishable, and we agree. In *Bond*, the Tax Court expressed the view that the reporting requirements of Treas. Reg. § 1.170A-13 "do not relate to the substance or essence of whether or not a charitable contribution was actually made," and therefore concluded "that the reporting requirements are directory and not mandatory." *Bond*, 100 T.C. at 41. However, the only substantiation requirement the Bond taxpayers failed to comply with was to provide the appraiser's qualifications. *Id*. at 41-42. When asked for those qualifications, the taxpayers promptly furnished them. *Id*. at 42.
>
> In concluding the taxpayers in *Bond* had substantially complied with the substantiation requirements, the Tax Court stated that the case was not one where the taxpayers had "failed to obtain a timely appraisal of the donated property and thereby failed to establish its value for claiming a contribution deduction on their return." *Id*.at 42 (emphasis added). That observation suggests that a *timely appraisal*, as defined by the regulation, is necessary for substantial compliance with the substantiation requirements. And in fact the Tax Court has since stated that "nothing in *Bond* ... relieves [a taxpayer] of the requirement of obtaining a qualified appraisal," *Hewitt v. Comm'r*, 109 T.C. 258, 264 (1997), and that "late appraisals do not substantially comply with the regulations," *Mohamed v. Comm'r*, 103 T.C.M. (CCH) 1814, at *9 (2012).
>
> In the Presleys' case, the Tax Court observed that the Presleys failed not only to have Mr. Scott fill out and sign the appraiser's section of Form 8283, as required by Treas. Reg. § 1.170A-13(c)(4)(i)(C), but also to "obtain" or "receive ... a qualified appraisal" within the time limits prescribed by Treas. Reg. § 1.170A-13(c)(3)(i)(A) and (iv)(B). Aplt. App., Vol. 2 at 213. As relevant here, the appraisal had to be "*made* not ... later than the date specified in paragraph (c)(3)(iv)(B) of this section." Treas. Reg. § 1.170A-13(c)(3)(i)(A) (emphasis added). In the Presleys' case, that date was October 15, 2013, the date their 2012 return was due, including extensions. See *id*. § 1.170A-13(c)(3)(iv)(B) ("The qualified appraisal must be received by the donor before the due date (including extensions) of the return on which a deduction is first claimed ... under

> section 170 with respect to the donated property."). The Tax Court found Mr. Scott made his appraisal on the date he signed it – December 5, 2013….
>
> In sum, the Presleys have failed to show the Tax Court clearly erred in finding the appraisal was not made before their 2012 return was due, as required by Treas. Reg. § 1.170A-13(c)(3)(i)(A) and (iv)(B). That failure is fatal to their substantial-compliance argument, see *Mohamed*, 103 T.C.M. (CCH) 1814, at *9; *Bond*, 100 T.C. at 42, regardless of whether the appraisal summary substantially complied with Treas. Reg. § 1.170A-13(c)(2)(i)(B).

The substantiation rules can knock out contributions that qualify but for having timely documentation, and lack of a good appraisal may add valuation penalties[2597] even if the deduction is knocked out for other reasons. Not disclosing basis on Form 8283 is one of those reasons:

Partita Partners LLC v. U.S., 120 A.F.T.R.2d 2017-5147 (D.C. NY 7/10/2017), which is consistent with another decision issued just a week before that one, *Reri Holdings I, LLC v. Commissioner*, 149 T.C. 1 (2017), the Official Tax Court Syllabus to which states:

> PS, a partnership, paid $2.95 million in March 2002 to acquire a remainder interest in property. The agreement that created the remainder interest provided covenants intended to preserve the value of the subject property but also limited the remedy available to the holder of the remainder interest for a breach of those covenants to immediate possession of the property; in no event would the holder of the corresponding term interest be liable for damages to the holder of the remainder interest. On Aug. 27, 2003, PS assigned the remainder interest to U, a university. On its 2003 Form 1065, U.S. Return of Partnership Income, PS claimed a deduction under sec. 170(a)(1) of $33,019,000. The Form 8283, Noncash Charitable Contributions, that PS attached to its return provides the date and manner of its acquisition of the contributed remainder interest but left blank the space for the "Donor's cost or other adjusted basis".
>
> *Held*: PS' omission from its Form 8283 of its cost or other adjusted basis in the contributed remainder interest violated the substantiation requirement of sec. 1.170A-13(c)(4)(ii)(E), Income Tax Regs.
>
> *Held*, *further*, because PS' disclosure of its cost or other basis in the contributed property would have alerted R to a potential overvaluation of that property, omission of that information prevented the Form 8283 from achieving its intended purpose; the omission thus cannot be excused on the grounds of substantial compliance.
>
> *Held*, *further*, PS' failure to comply, either strictly or substantially, with the requirements of sec. 1.170A-13(c)(2), Income Tax Regs., requires denial in full of its claimed charitable contribution deduction.

[2597] See Code § 6664(c) and *Kaufman v. Commissioner*, 784 F.3d 56 (1st Cir. 2015), *aff'g* T.C. Memo. 2014-52. In affirming the imposition of penalties, the First Circuit reasoned:

> The Tax Court did not purport to equate "good faith investigation" with "exhaustive investigation." It merely required that the Kaufmans do some basic inquiry into the validity of an appraisal whose result was squarely contradicted by other available evidence glaringly in front of them.

> *Held*, *further*, because of the limitation on remedies available to the holder of the remainder interest for breaches of protective covenants, the agreement that created that interest did not provide adequate protection to its holder, for purposes of sec. 1.7520-3(b)(2)(iii), Income Tax Regs.; the standard actuarial factors provided under sec. 7520 thus do not apply in valuing the remainder interest; instead, the value of that interest is its "actual fair market value", determined without regard to sec. 7520, on the basis of all of the facts and circumstances. Sec. 1.7520-3(b)(1)(iii), Income Tax Regs.
>
> *Held*, *further*, on the basis of all of the facts and circumstances, the remainder interest that PS assigned to U on Aug. 27, 2003, had a fair market value on that date of $3,462,886.
>
> *Held*, *further*, because the $33,019,000 value that PS assigned to the remainder interest it transferred to U is more than 400% of that interest's actual fair market value, PS' claimed charitable contribution deduction resulted in a gross valuation misstatement. sec. 6662(e)(1)(A), (h)(2).
>
> *Held*, further, any underpayment resulting from the disallowance of PS' claimed charitable contribution deduction would be "attributable to" a gross valuation misstatement to the extent the underpayment relates to the disallowance of that portion of the deduction that exceeds $3,462,886. *AHG Invs., LLC v. Commissioner*, 140 T.C. 73 (2013). *885 Inv. Co. v. Commissioner*, 95 T.C. 156 (1990), overruled.
>
> *Held*, *further*, PS did not make a good-faith investigation of the value of the property subject to the remainder interest and thus did not have reasonable cause for, or act in good faith with respect to, its claim of a charitable contribution deduction that resulted in a gross valuation misstatement. sec. 6662(c)(2)(B).

As applied to each owner of the LLC (partner for income tax purposes):

> Although the liability of a particular partner for the gross valuation misstatement penalty will depend on the arithmetic threshold provided in section 6662(e)(2), no partner will be able to avoid the penalty on the basis of the reasonable cause exception provided in section 6664(c).

The Tax Court did not refer to an argument previously made about whether the donor should have listed the single-member LLC it contributed instead of the underlying assets, which argument was described in fn. 342 in part II.B Limited Liability Company (LLC).

Reri was affirmed under the name *Blau v. Commissioner*, 924 F.3d 1261 (D.C. Cir. 2019), which held that omission of basis on Form 8283 was fatal regardless of whether the appraisal substantially complied (declining to address the latter).

Omitting basis from Form 8283 also preliminarily knocked out the deduction in *Oakhill Woods, LLC v. Commissioner*, T.C. Memo. 2020-24, which reasoned:

> The required information includes "an appraisal summary" that must be attached "to the return on which such deduction is first claimed for such contribution." Deficit Reduction Act of 1984 (DEFRA), Pub. L. No. 98-369, sec. 155(a)(1), 98 Stat. at 691; see sec. 1.170A-13(c)(2), Income Tax Regs. The IRS has prescribed Form 8283 to be used as the "appraisal summary." *Jorgenson v. Commissioner*, T.C. Memo. 2000-38,

> 79 T.C.M. (CCH) 1444, 1450. Failure to comply with this requirement generally precludes a deduction. See sec. 170(a)(1) ("A charitable contribution shall be allowable as a deduction only if verified under regulations prescribed by the Secretary.").
>
> In his motion for partial summary judgment, respondent contends that Oakhill's claimed deduction should be disallowed because it declined to report its "cost or adjusted basis" on Form 8283 and thus failed to attach to its return a properly completed appraisal summary. Oakhill contends that it strictly (or at least substantially) complied with the applicable regulation. We rejected that argument on virtually identical facts in *Belair Woods*, and we reject that argument again here. Accord, *Loube v. Commissioner*, T.C. Memo. 2020-3, at *17-*23.

However, *Oakhill Woods, LLC* held that reasonable cause may be a defense:

> In 2004, the year after the tax year involved in *RERI Holdings I*, Congress enacted the American Jobs Creation Act of 2004 (AJCA), Pub. L. No. 108-357, sec. 883(a), 118 Stat. at 1631. The AJCA added to the Code section 170(f)(11), which included, in subparagraph (A)(ii)(II), a new "reasonable cause" defense for failure to comply with the regulatory reporting requirements. That subparagraph excuses failure to satisfy the reporting requirements discussed above if "it is shown that the failure to meet such requirements is due to reasonable cause and not to willful neglect." This statutory "reasonable cause" defense is broader than the regulatory "reasonable cause" defense promulgated previously. As noted supra p. 12-13, the latter defense is limited to situations where the taxpayer has reasonable cause "for being unable to provide the information required." Sec. 1.170A-13(c)(4)(iv)(C)(1), Income Tax Regs.
>
> The formulation of the section 170(f)(11)(A)(ii)(II) defense - referring to the existence of "reasonable cause" and the absence of "willful neglect" - resembles that appearing in numerous Code provisions that impose penalties or additions to tax. See, *e.g.*, secs. 6039G(c) (flush language), 6704(c)(1), 6652(f)-(j), 6709(c). "Code provisions generally are to be interpreted so congressional use of the same words indicates an intent to have the same meaning apply." Elec. Arts, Inc., 118 T.C. at 241. Thus, although the section 170(f)(11)(A)(ii)(II) "reasonable cause" defense relieves the taxpayer from disallowance of a deduction rather than from imposition of a penalty, we have construed these defenses similarly. See *Alli*, 107 T.C.M. (CCH) at 1096; *Crimi v. Commissioner*, T.C. Memo. 2013-51, 105 T.C.M. (CCH) 1330, 1353.
>
> "Reasonable cause requires that the taxpayer have exercised ordinary business care and prudence as to the challenged item." *Crimi*, 105 T.C.M. (CCH) at 1353 (citing *United States v. Boyle*, 469 U.S. 241 (1985)). "The determination of whether a taxpayer acted with reasonable cause and in good faith is made on a case-by-case basis, taking into account all pertinent facts and circumstances." Sec. 1.6664-4(b)(1), Income Tax Regs.
>
> If a taxpayer alleges reliance on the advice of a tax professional, that "advice must generally be from a competent and independent advisor unburdened with a conflict of interest and not from promoters of the investment." *Mortensen v. Commissioner*, 440 F.3d 375, 387 (6th Cir. 2006), *aff'g* T.C. Memo. 2004-279; see *Gustashaw v. Commissioner*, 696 F.3d 1124, 1139 (11th Cir. 2012), *aff'g* T.C. Memo. 2011-195. "Advice hardly qualifies as disinterested or objective if it comes from parties who actively promote or implement the transactions in question." *Stobie Creek Invs. LLC v. United*

> *States*, 608 F.3d 1366, 1382 (Fed. Cir. 2010). A taxpayer advancing a reliance-on-professional-advice defense must also show that it actually relied in good faith on the advice it received. See *Alli*, 107 T.C.M. (CCH) at 1096; see also *Neonatology Assocs., P.A. v. Commissioner*, 115 T.C. 43, 98-99 (2000), *aff'd*, 299 F.3d 221 (3d Cir. 2002). This determination "is inherently a fact-intensive one." *Alli*, 107 T.C.M. (CCH) at 1096 (quoting *Crimi v. Commissioner*, 105 T.C.M. (CCH) at 1353).

One of the reasonable cause cases cited above, *Crimi v. Commissioner*, T.C. Memo. 2013-51, held:

> Reasonable cause requires that the taxpayer have exercised ordinary business care and prudence as to the challenged item. See *United States v. Boyle*, 469 U.S. 241 (1985). Thus, the inquiry is inherently a fact-intensive one, and facts and circumstances must be judged on a case-by-case basis. See *id*.; *Rothman v. Commissioner*, 103 T.C.M. (CCH) at 1874. A taxpayer's reliance on the advice of a professional, such as a certified public accountant, would constitute reasonable cause and good faith if the taxpayer could prove by a preponderance of the evidence that: (1) the taxpayer reasonably believed the professional was a competent tax adviser with sufficient expertise to justify reliance; (2) the taxpayer provided necessary and accurate information to the advising professional; (3) the taxpayer actually relied in good faith on the professional's advice. See *Rovakat, LLC v. Commissioner*, 102 T.C.M. (CCH) at 279 (citing *Neonatology Assocs., P.A. v. Commissioner*, 115 T.C. 43, 98-99 (2000), *aff'd*, 299 F.3d 221 (3d Cir. 2002)); see also sec. 1.6664-4(c)(1), Income Tax Regs.
>
> Mr. Crimi had relied on Mr. LaForge and Sobel as competent tax advisers for over 20 years. Upon the filing of the returns at issue, Mr. LaForge had been a certified public accountant for over 20 years and had expertise in preparing tax returns claiming deductions for charitable contributions. Sobel was an established regional accounting firm staffed with accountants, some of whom had law degrees. During the 24 years of engagement, Mr. LaForge had become intimately familiar with Mr. Crimi's and Concrete's financial affairs. The record reveals no prior history of mishaps by Mr. LaForge or Sobel. There had also been no indication to Mr. Crimi, at least up until the instant controversy, that Mr. LaForge or Sobel had acted incompetently in his or its provision of services to Mr. Crimi and Concrete. Thus, Mr. Crimi had no reason to doubt or second guess Mr. LaForge's or Sobel's competence, or to question Mr. LaForge's request for only a dated appraisal as inadequate. See *Estate of Lee v. Commissioner*, T.C. Memo. 2009-84, 97 T.C.M. (CCH) 1435, 1438 (2009) (taxpayer may conclude on the basis of adequate due diligence that his tax adviser was competent estate tax attorney).
>
> In seeking the advice, Mr. Crimi provided all documents to Mr. LaForge. Mr. Crimi regularly apprised Mr. LaForge of the status of the contribution transaction. When Mr. LaForge requested the 2000 appraisal to prepare the 2004 tax return, Mr. Crimi gave it to him. Indeed, Mr. Crimi gave Mr. LaForge unfettered access to all documents at Mr. Crimi's home and in Concrete's office.
>
> On the facts and testimony in the record, we find Mr. Crimi actually relied on Mr. LaForge's advice in good faith. For over two decades, Mr. Crimi had relied on Mr. LaForge's expertise in Federal income tax for his accounting and tax planning. As far as we can tell from the record, this was the first time Mr. Crimi had engaged in a transfer of real property as a charitable gift. While Mr. Crimi is a sophisticated businessman

experienced in buying and selling real estate, it was not unreasonable for him not to know the specific timeliness requirement for a qualified appraisal in the context of a charitable contribution. The record reveals Mr. Crimi's as well as Mr. LaForge's good-faith belief that an updated appraisal would not yield an appraised value much different from the one provided in the 2000 appraisal. In fact, the subsequent valuation prepared by petitioners' expert produced a number much higher than the one in the 2000 appraisal. Thus, on the facts and circumstance in these cases, it was also reasonable for Mr. Crimi to believe the 2000 appraisal was not stale in substance and thus a good appraisal. And because Mr. LaForge never raised any doubt over the 2000 appraisal to Mr. Crimi, Mr. Crimi had no reason to know or to suspect the appraisal did not meet the requirements under the regulations. On the basis of the long history of competent professional services provided, as Mr. Crimi put it at trial, "I rely on them heavily to tell me what to do."

In sum, petitioners are entitled to a deduction for the charitable contribution of the subject property even if petitioners did not attach a qualified appraisal required under the Code and the regulations, because any failure to comply with the requirement is excused on the ground of reasonable cause.

One of the reasonable cause cases cited above, *Alli v Commissioner*, T.C. Memo 2014-15, held:

Petitioners argue that reasonable cause exists because they relied on Mr. Siegal, the paid preparer for their 2008 return, regarding the charitable contribution deduction. Petitioners claim that Mr. Siegal is a C.P.A. and an attorney, and further claim that he has prepared their returns for over 30 years. However, petitioners have produced no reliable evidence of Mr. Siegal's qualifications, no reliable evidence that they provided Mr. Siegal with complete information, no reliable evidence of the content of Mr. Siegal's advice, and no reliable evidence that they reasonably relied on that advice.[30]

[30] We further note that petitioners did not call Mr. Siegal as a witness, which gives rise to an adverse inference that had he been called, his testimony would not have supported petitioners' contentions. See *Wichita Terminal Elevator Co. v. Commissioner*, 6 T.C. 1158, 1165 (1946), *aff'd*, 162 F.2d 513 (10th Cir. 1947).

Petitioners further argue that reasonable cause exists because they relied on the appraisals by Mr. Sanna and Mr. Jones. However, petitioners have produced no evidence that either Mr. Sanna or Mr. Jones is a "professional" as the term is defined in *Crimi* - *i.e.*, a competent tax adviser with sufficient expertise to justify reliance. Furthermore, petitioners did not rely on either Mr. Sanna or Mr. Jones in claiming a $499,000 deduction, a figure wholly unsupported by the record.

Accordingly, petitioners do not meet their burden of establishing reasonable cause based on their alleged reliance upon professional advice.

Riverside Place LLC v. Commissioner, T.C. Memo. 2020-103, followed *RERI*, brushing aside the taxpayer's argument that the IRS didn't really need basis (which the taxpayer actually argued in a statement included in the return itself). Then the court addressed this lack-of-need argument some more:

> Finally, petitioner in its cross-motion contends that the regulation requiring disclosure of "cost or other basis" on the appraisal summary is invalid. According to petitioner, this regulation does not "give effect to the unambiguously expressed intent of Congress" and is thus invalid under *Chevron, U.S.A., Inc.*, 467 U.S. at 842-843. The taxpayer in *Oakhill Woods*, at *22-*27, made precisely the same argument and we rejected it. We do so again here. For these reasons we hold that Riverside did not comply, strictly or substantially, with the regulatory reporting requirements. Accord, *Oakhill Woods*, at *21-*22; *Loube v. Commissioner*, T.C. Memo. 2020-3, at *15-*23; *Belair Woods*, 116 T.C.M. (CCH) at 329-330. This failure supplied an independent ground for denial of its charitable contribution deduction.[8]
>
> > [8] Section 170(f)(11)(A)(ii)(II) provides that a charitable contribution deduction may be allowed, notwithstanding the taxpayer's failure to comply with the appraisal summary requirements, "if it is shown that the failure to meet such requirements is due to reasonable cause and not to willful neglect." Petitioner has not advanced a "reasonable cause" defense under this provision and has adduced no facts that would be relevant in determining its availability.

Maple Landing, LLC v. Commissioner, T.C. Memo. 2020-104, and *Englewood Place, LLC v. Commissioner*, T.C. Memo. 2020-105, had an approach similar to that of *Riverside*.

Loube v. Commissioner, T.C. Memo. 2020-3, held:

> We conclude that petitioners failed to strictly comply with DEFRA sec. 155 and the regulations thereunder because they failed to provide, among other information, the basis and the acquisition date of the contributed property on the appraisal summary. Petitioners also failed to attach to the appraisal summary an explanation of reasonable cause for their inability to provide the basis, acquisition date, or other information related to the contributed property.

In response to the taxpayers' substantial compliance argument, *Loube* responded:

> Petitioners contend that attaching the full appraisal to their return provided the necessary information such that they substantially complied. We are not swayed. While it may have been possible for the Commissioner to glean sufficient information from the purchase price and tax information listed in the appraisal, that does nothing to change the fact that Congress specifically passed DEFRA's heightened substantiation requirements so that the Commissioner could efficiently flag properties for overvaluation from the face of appraisal summaries. In so doing, Congress wanted precisely to prevent the Commissioner from having to sleuth through the footnotes of millions of returns. "The IRS reviews millions of returns each year for audit potential, and the disclosure of cost basis on the Form 8283 itself is necessary to make this process manageable. Revenue agents cannot be required to sift through dozens or hundreds of pages of complex returns looking for clues about what the taxpayer's cost basis might be." *Belair Woods, LLC v. Commissioner*, at *20. "If cost basis is not explicitly disclosed where it is required to be disclosed, the Commissioner will be handicapped in identifying suspicious charitable deductions and deterring taxpayers from 'continu[ing] to play the "audit lottery."'" *Id*. (quoting S. Prt. No. 98-169 (Vol. 1), at 444 (1984)). That is why we ruled as we did in *RERI* and *Belair Woods* and why we rule as we do now.

Brooks v. Commissioner, T.C. Memo. 2022-122, held:[2598]

> We have held that Congress specifically passed DEFRA's heightened substantiation requirements to prevent the Commissioner from having to sleuth through the footnotes of millions of returns. *Belair Woods, LLC v. Commissioner*, T.C. Memo. 2018-159, at *20. We cannot find that, in reporting roughly twice the accurate cost basis, petitioners substantially complied with DEFRA. See *Loube v. Commissioner*, T.C. Memo. 2020-3, at *22-23. Accordingly, petitioners failed to meet the requirements of Treasury Regulation § 1.170A-13(c)(2)(i), and this is also a basis on which the deduction must be disallowed.

Emanouil v. Commissioner, T.C. Memo. 2020-120, held:

> Strict compliance will necessarily satisfy the elements of a qualified appraisal. However, the taxpayer who does not strictly comply may nevertheless satisfy the elements if he has substantially complied with the requirements. That is, the above requirements are "directory" (*i.e.*, "helpful to respondent in the processing and auditing of returns on which charitable deductions are claimed") rather than "mandatory" (*i.e.*, literal compliance is required); and "[t]he fact that a Code provision conditions the entitlement of a tax benefit upon compliance with respondent's regulation does not mean that literal as opposed to substantial compliance is mandated." *Bond v. Commissioner*, 100 T.C. 32, 41 (1993); see also *Costello v. Commissioner*, T.C. Memo. 2015-87, at *22; *cf. Hewitt v. Commissioner*, 109 T.C. 258, 264 (1997) (holding that substantial compliance would not apply where the taxpayers "furnished practically none of the information required by either the statute or the regulations"), *aff'd without published opinion*, 166 F.3d 332 (4th Cir. 1998).
>
> In *Cave Buttes, L.L.C. v. Commissioner*, 147 T.C. 338 (2016), we noted the legislative history of the qualified appraisal statute and observed that its purpose was to provide the Commissioner with sufficient information to "deal more effectively with the prevalent use of overvaluations." *Id*. at 349-350 (citing S. Prt. 98-169 (Vol. I), at 444-445 (S. Comm. Print 1984), and Staff of J. Comm. on Taxation, General Explanation of the Revenue Provisions of the Deficit Reduction Act ["DEFRA"] of 1984 ("General Explanation"), at 505-508 (J. Comm. Print 1985)). In *Alli v. Commissioner*, T.C. Memo. 2014-15, at *56, we stated that the purpose of the appraisal requirements is to "ensur[e] that the correct values of donated property are reported". Accordingly, it would follow that if the appraisal at issue does generally provide the information required in the regulations to do just that - *i.e.*, to ensure that the correct values of donated property are reported - then the "essential requirements of the governing statute", *Estate of Evenchik v. Commissioner*, T.C. Memo. 2013-34, at *12 (quoting *Estate of Clause v. Commissioner*, 122 T.C. 115, 122 (2004)), can be satisfied despite certain defects that may not be significant in a given case.
>
> This case does not involve the abuse, mentioned in the General Explanation, arising from "tax shelter promotions".[14] But Congress was also "concerned with situations, not involving organized tax shelters, where individuals overvalue donated property … , such as interests in real estate". General Explanation at 503 (emphasis added.) The property that the Emanouils contributed was real estate, but the phrase "interests in real estate" especially connotes and implicates partial interests, such as easements. A deduction for

[2598] In sustaining penalties for gross overvaluation, beyond disallowing the deduction.

the contribution of a conservation easement is permitted by section 170(h); but such partial interests in real estate are seldom the subject of arm's-length transactions, and valuing them reliably involves special challenges, which qualified appraisal rules address. Of course, one could also overvalue an owner's entire property held in fee simple absolute, and the substantiation rules do apply to contributions of entire interests as well; but they were not the bull's eye at which DEFRA took aim.

[14] As was explained in Staff of J. Comm. on Taxation, General Explanation of the Revenue Provision of the Deficit Reduction Act of 1984, at 503 (J. Comm. Print 1985):

> Congress recognized that in recent years, opportunities to offset income through inflated valuations of donated property have been increasingly exploited by tax shelter promoters. Under typical tax shelter promotions, individuals acquire objects such as limited edition lithographs, books, gems, and the like, hold the property for at least the capital gains holding period, and then contribute the items to a museum, library, educational institution, or other qualified donee at their "appreciated" fair market value. The shelter package may include an "independent" appraisal, and the potential donor may be assured that his or her subsequent gift will be accepted by a charitable organization.

The Emanouils contributed not an easement or other partial interest but rather their entire fee simple interest in the Allie Lane parcel and in lots 2 and 3, and the valuation issue here is the garden-variety question of the fair market values of pieces of real estate. In the absence of a heightened potential for abuse, it is appropriate to recall that Congress generally favors charitable giving and that the courts have honored that legislative intent by broadly construing statutes "begotten from motives of public policy" like section 170 and similar statutes "enacted to benefit … charitable organizations". See *Helvering v. Bliss*, 293 U.S. 144, 150-151 (1934); *Estate of Crafts v. Commissioner*, 74 T.C. 1439, 1455 (1980) ("As a relief provision which inures to the benefit of charity, we believe that it should be construed liberally so that the intended charitable purposes are furthered").

The Emanouils acknowledge that they did not strictly comply with the requirements - since neither of their appraisals stated the date of contribution or stated that it was prepared for income tax purposes - but they argue that they substantially complied with the qualified appraisal requirements. Because this is not a case where the taxpayers "furnished practically none of the information] required", the substantial compliance doctrine can apply. Hewitt v. Commissioner, 109 T.C. at 264. To that end we consider whether the Emanouils provided most of the information required (they did) and whether the defects in their appraisals were so significant that they failed to establish the "substance or essence" of a "qualified appraisal" (they were not). See *Hewitt v. Commissioner*, 109 T.C. at 265; *Bond v. Commissioner*, 100 T.C. at 42.

3. Date of contribution

The Commissioner points to no specific purpose for the requirement that the date (or expected date) of contribution be included in a qualified appraisal. We have previously held that "[r]equiring an appraisal to include the actual or expected date of the contribution allows an individual (such as the Commissioner's revenue agent) to compare the appraisal and contribution dates for purposes of isolating fluctuations in the property's fair market value between those dates." *Rothman v. Commissioner*, T.C.

Memo. 2012-163], slip op. at 36 (finding no substantial compliance in a facade easement case where the appraisal failed to satisfy several substantiation requirements including the requirement to provide the date (or expected date) of the contribution), supplemented and vacated in part on other grounds by T.C. Memo. 2012-218. In this case the appraisals were dated within 30 days of the contributions, and in each instance the appraisal explicitly stated that it gave “a current market value” (emphasis added), rather than a historic value as of a previous date.

We have held that failing to include the date of contribution in the appraisal is not significant when the return includes a Form 8283 that specifies the date of contribution. See *Zarlengo v. Commissioner*, T.C. Memo. 2014-161, at *36 (finding that taxpayers substantially complied by disclosing contribution date on appraisal summary); *Simmons v. Commissioner*, T.C. Memo. 2009-208, 98 T.C.M. (CCH) 211, 215 (2009) (same), *aff'd*, 646 F.3d 6 (D.C. Cir. 2011). Because the Emanouils' returns for 2008 and 2009 included the respective Forms 8283 and disclosed the respective dates of the contributions, the absence of that information from the appraisal is not fatal in this case.

4. Income tax purpose…

In other words, the importance of providing an income tax purpose statement is to help the appraiser and the client identify the appropriate scope of work for the appraisal and the level of detail to provide in the appraisal, *i.e.*, to make sure that all the information required for relying on the appraisal - for income tax purposes - is included in the appraisal.[15] But we do not perceive that the appraisals at issue here reflect any lack of this information. Although we accept the importance of a shared understanding by appraiser and client of the purpose of an appraisal, a statement of purpose may not always be necessary to achieve substantial compliance, especially not when the appraisal otherwise includes the level of detail necessary to estimate the fair market value of the property in question. See *Consol. Inv'rs Grp. v. Commissioner*, T.C. Memo. 2009-290, slip op. at 58 (finding substantial compliance where “[t]he appraisal did lack a statement that it was prepared specifically for income tax purposes; however, we find this omission to be insubstantial”)….

> [15] The Senate Committee on Finance provided the following explanation for the requirement of stating the income tax purpose of the appraisal: “[T]he appraisal must state that it is being prepared for income tax purposes, and must be signed by the appraiser, whose tax identification number must be listed. Accordingly, the appraiser is a person to whom the civil tax penalty for aiding and abetting an understatement of tax liability (sec. 6701) could apply.” S. Prt. 98-169 (Vol. I) at 446 (S. Comm. Print 1984). The Commissioner makes no mention of this rationale from the legislative history, nor how it would affect the analysis of “substantial compliance” in this case, so we do not address this rationale further.

It is certainly true that there is no such thing as an “income tax value” distinct from fair market value. A competently performed valuation that was prepared for income tax purposes should be identical to a valuation prepared for advising a sale. The appraisals used the word “disposition”, a term broad enough to include a sale or (as was relevant) a donation. There is no reason to suppose that Ms. McKinney's valuation would have been different if its stated purpose had been “income tax”.

> We have not previously held that failing to include a statement of income tax purpose in an appraisal would by itself defeat substantial compliance for purposes of a claimed deduction for a charitable contribution. *Cf. Irby v. Commissioner*, 139 T.C. 371, 387 (2012) ("The IRS has not provided to the public a specific form for the tax purpose statement, and respondent has not proffered any instance where a suboptimal tax purpose statement, by itself, invalidated an otherwise qualified appraisal"); *Alli v. Commissioner*, T.C. Memo. 2014-15, (finding that an appraisal was not qualified because of at least five failures including the lack of a statement of an income tax purpose and, more significantly, because the appraisal was nearly 10 years old and failed to use any of the three commonly accepted approaches (capitalization, cost, or comparable sales) to determine fair market value); *Estate of Evenchik v. Commissioner*, T.C. Memo. 2013-34 (finding that an appraisal was not qualified because of numerous failures including the lack of an income tax purpose statement and, most significantly, the appraisal valued the wrong asset).
>
> In this case each appraisal valued the correct asset (a fee simple interest in real property) according to the correct standard (fair market value); each was prepared within 30 days of the date of contribution; and each used a commonly accepted approach (the income approach) to estimate fair market value for the contribution (discussed below in part III). In other words, the appraisals do not have multiple cumulative defects that we have previously held to be fatal for deducting charitable contributions.
>
> We hold that the Emanouils provided sufficient information to permit the IRS to evaluate the reported contributions and to investigate and address concerns about overvaluation and other aspects of the reported charitable contributions. The IRS did perform that investigation without any impediment arising from the two alleged defects in the appraisals, and the SNOD issued by the examination personnel did not mention the omissions (which, rather, were raised for the first time in this litigation). Thus, the Emanouils have substantially complied with the regulations for qualified appraisals.

Pankratz v. Commissioner, T.C. Memo. 2021-26, reasoned and held:

> Pankratz argues that he had reasonable cause for the position he took on his return because he reasonably relied on Meier's and Horning's advice. When a taxpayer claims to have relied on the advice of a professional, he must show that: the professional was a competent tax adviser with sufficient expertise to justify reliance, he provided necessary and accurate information to the professional who gave him advice, and he actually relied in good faith on that advice. See *Alt. Healthcare Advocates v. Commissioner*, 151 T.C. 225, 246 (2018); *Neonatology Assocs., P.A. v. Commissioner*, 115 T.C. 43, 99 (2000), *aff'd*, 299 F.3d 221 (3d Cir. 2002)….
>
> Then there's the problem that Pankratz admitted that he never reviewed his return. A taxpayer's failure to review a return, though troubling, is not by itself fatal—there can be cases where even diligent taxpayers wouldn't be able to see a subtle problem in their tax returns. CNT Inv'rs, LLC, 144 T.C. at 234. That's not the case here. We first look to Pankratz's education, sophistication, and business experience. He is very well educated, with both a college degree and a doctorate. And, although he tried to represent himself as a lowly farm hand, he is a sophisticated and savvy businessman - he was able to create Grand Labs from nothing and sell it for $85 million, and he then invested his money in several different ventures in several different states. He may lack formal tax training, but we find that he possesses a sharp and sophisticated mind for business .

> Had Pankratz simply looked at Form 8283 he would have noticed that, at the very least, he likely needed to get appraisals. This makes his case unlike *CNT Investors, LLC*, because there the taxpayer met with his adviser and his review of the return would not have shown any issues. See *CNT Inv'rs, LLC*, 114 T.C. at 234.
>
> One does not have to be a tax expert to be able to read Form 8283. Had Pankratz reviewed that two-page form, he would have seen that it said "[a]n appraisal is generally required for property listed in Section B," or "you must attach a qualified appraisal of the property," or "[a]ppraised fair market value," or "Declaration of Appraiser." For a man as smart as Pankratz, this would have suggested that there was a potential major error on the return, and should have prompted him (at the very least) to ask Meier whether an appraisal was needed.[10] Instead, he just signed the return.
>
>> [10] Pankratz's excuse that he didn't review his return because he filed with only a day or so to spare and that he wasn't around when the return was filed offers no relief. Errors caused by waiting till the last minute to file are not reasonable. See sec. 1.6664-4(b)(2), Example (4), Income Tax Regs.
>
> With neither advice nor good faith reliance on that advice, we deny the deduction for Pankratz's contribution of his interests in the oil and gas fields.

Chiarelli v. Commissioner, T.C. Memo. 2021-27, reasoned and held:

> Petitioner contends that he cured his defective submissions by responding to respondent's request for additional documentation within 90 days in accordance with section 1.170A-13(c)(4)(iv)(H), Income Tax Regs. However, petitioner's position is grounded on a misreading of that regulation, which states that a deduction will not be disallowed for failure to attach an appraisal summary to a return if the donor complies with instructions to submit that document within 90 days of a request therefor. *Id.* By its terms that regulation does not apply here since petitioner did attach appraisal summaries to each of his returns. See *id.*; see also *Oakhill Woods, LLC v. Commissioner*, T.C. Memo. 2020-24, at *14-*15; *Belair Woods, LLC v. Commissioner*, at *13-*14. Further, that regulation applies only to appraisal summaries and does not afford petitioner a window to cure defects in his qualified appraisals. See *Belair Woods, LLC v. Commissioner*, at *13-*14; see also *Chrem v. Commissioner*, T.C. Memo. 2018-164, at *24 n.9; *Mohamed v. Commissioner*, 2012 WL 1937555, at *4. For all these reasons, we hold that petitioner did not comply, either strictly or substantially, with the regulatory reporting requirements for noncash charitable contributions.

Glade Creek Partner, LLC v. Commissioner, 130 A.F.T.R.2d 2022-5625 (11th Cir. 8/22/2022) (per curiam and not to be published), affirmed a penalty assessed because the appraisal was not obtained in good faith:

> As Glade Creek admits in its brief to us, Campbell understood that the goal of creating the conservation easement "was to raise enough money to repay the outstanding debt and preserve the property." And as the tax court found, Campbell "wanted an appraisal that accomplished his tax objectives for the easement transaction." By pursuing that goal single-mindedly, he did not obtain the appraisal in good faith. The court did not clearly err in finding an absence of good faith.

> Even assuming Campbell had obtained the appraisal in good faith, he was required to do more before Glade Creek could qualify for the reasonable cause exception. The exception also requires the taxpayer to make "a good faith investigation" into the property's value. I.R.C. § 6664(c)(3)(B); see also *Blau v. Comm'r*, 924 F.3d 1261, 1280 (D.C. Cir. 2019) (holding that the taxpayer had "failed to produce evidence that it conducted any investigation beyond the appraisal, let alone one that qualifies as a good faith investigation within the meaning of the statute") (quotation marks omitted); *Kaufman v. Comm'r*, 784 F.3d 56, 70 (1st Cir. 2015) (reasoning that if obtaining an appraisal were enough, it would "render the second requirement meaningless"). Glade Creek points to no evidence in the record that Campbell "made a good faith investigation" into the property's value beyond obtaining the appraisals. For this additional reason, the tax court did not clearly err in finding that Glade Creek failed to meet the requirements of the reasonable cause exception in § 6664.

Schweizer v. Commissioner, T.C. Memo. 2022-102, denied a charitable deduction when a very deficient Form 8283 was attached to the return. Before getting into the details about the tax return prepared by Mr. Kassel, consider the circumstances behind the donation:

> Shortly after assuming his position at Sotheby's, petitioner began donating works of African art to various museums. He claimed charitable contribution deductions for these gifts, all of which were reported on returns prepared by the Wasserman firm. These gifts included a work valued at $60,000 in 2007, a work valued at $100,000 in 2009, and a work valued at $5,000 in 2010.
>
> In 2011, the tax year at issue, petitioner decided to make a substantial contribution to the Minneapolis Institute of Art (MIA) to honor a colleague who was in poor health. The work he selected for donation was a Dogon sculpture that he had acquired in Paris, allegedly for $100,000, in 2003. (The Dogon people are indigenous to the central plateau region of Mali, in West Africa.)
>
> On December 6, 2011, petitioner donated the Dogon sculpture to the MIA. He anticipated claiming a charitable contribution deduction for this gift, and he received from the Internal Revenue Service (IRS) an automatic six-month extension of time, to October 15, 2012, to file his 2011 return. See § 6081(a). On June 7, 2012, he secured Mr. Kassel's assistance in requesting a Statement of Value (SOV) from the IRS with respect to the Dogon sculpture. A taxpayer may request an SOV from the IRS Art Appraisal Services (AAS) unit before filing the return on which a gift of art is to be reported, hoping to receive assurance that the IRS will accept the value as claimed. See I.R.S. Publication 561, Determining the Value of Donated Property 4 (Jan. 2022).
>
> Mr. Kassel transmitted the SOV package to the AAS unit. This package included a one-and-a-half page "appraisal" of the Dogon sculpture by Michael Oliver, a New York dealer in African art, who valued the work at $600,000. Mr. Oliver, who testified at trial, was not a certified appraiser in 2011 or at any time thereafter. He acknowledged that this was the only FMV appraisal that he had ever done.
>
> Mr. Kassel also included in the SOV package a substantially complete Form 8283, Noncash Charitable Contributions, reporting a $600,000 value for the sculpture. This document included Mr. Oliver's signature and the signature of an MIA officer attesting to receipt of the gift. Petitioner secured these signatures from Mr. Oliver and from the MIA

officer. At no time did Mr. Kassel have any contact with Mr. Oliver or with anyone at the MIA.

The taxpayer and return preparer told conflicting stories about taxpayer reliance on the preparer. Although the court did not believe the taxpayer, the court explained why such reliance would not have worked anyway:

Assuming arguendo that Mr. Kassel told petitioner that he need not include either a fully completed Form 8283 or a qualified appraisal with his 2011 return, we find no credible evidence that petitioner actually relied on such advice in good faith. A taxpayer who advances a reliance-on-professional-advice defense must establish that his “reliance was reasonable.” See *Atkinson v. Commissioner*, T.C. Memo. 2015-236, 110 T.C.M. (CCH) 550, 563 (quoting *Freytag v. Commissioner*, 89 T.C. 849, 888 (1987), *aff’d on another issue*, 904 F.2d 1011] (5th Cir. 1990), *aff’d*, 501 U.S. 868 (1991)); Treas. Reg. § 1.6664-4(b)(1).

“Circumstances that may indicate reasonable cause and good faith include an honest misunderstanding of fact or law that is reasonable in light of all of the facts and circumstances, including the experience, knowledge, and education of the taxpayer.” Treas. Reg. § 1.6664-4(b)(1). Petitioner is a highly educated and sophisticated individual, with a law degree and five years of doctoral study. Beginning in 2007, his position at Sotheby’s enabled him to gain considerable experience in matters involving art appraisal at the highest levels. He may lack formal training in U.S. tax law, but we find that he possesses a sharp and sophisticated mind for business and dealings in fine art.

Of particular relevance to this case, petitioner was clearly familiar with Form 8283 and the section 170(f)(11) reporting requirements. He had made at least three prior tax-deductible contributions of African art, including a work valued at $60,000 in 2007, a work valued at $100,000 in 2009, and a work valued at $5,000 in 2010. He was required to secure qualified appraisals for these donations, and he was required to include (and presumably did include) a fully completed Form 8283 with each return. This was not ancient history but immediately preceded his 2011 gift.

Petitioner testified that he himself secured the signatures of Mr. Oliver and the MIA officer on the Form 8283 for the Dogon sculpture that was submitted to the AAS unit in June 2012. Mr. Kassel had no contact with either of these parties. This further establishes that petitioner was personally familiar with Form 8283 and its requirements.

We have consistently held that blind reliance on a return preparer is not a defense. Rather, the taxpayer must personally review the return and satisfy himself that it is accurate before signing and filing it. See, *e.g.*, *Metra Chem Corp. v. Commissioner*, 88 T.C. 654 (1987); *Bronson v. Commissioner*, T.C. Memo. 2002-260, 84 T.C.M. (CCH) 447; *Osborne v. Commissioner*, T.C. Memo. 2002-11, 83 T.C.M. (CCH) 1083; *Bilzerian v. Commissioner*, T.C. Memo. 2001-187 [2001 RIA TC Memo ¶2001-187], 82 T.C.M. (CCH) 295.

Petitioner knew that his 2011 return had to include a properly completed Form 8283, duly signed by the appraiser and an MIA officer, and that a qualified appraisal needed to be attached to the return. Armed with this knowledge, petitioner could not [pg. 847] have reasonably relied on contrary advice from Mr. Kassel. Such reliance would exemplify

> "willful blindness." *Cf. Jarnagin v. United States*, 134 Fed. Cl. 368, 378 (2017) (rejecting taxpayers' reasonable cause defense because failing to read or pay attention to certain lines on their tax returns "constitute[d] willful blindness to the...requirement[s]" (quoting *United States v. Williams*, 489 F. App'x 655, 659 (4th Cir. 2012))).
>
> Even if petitioner had not already been familiar with Form 8283 and its requirements, the defects were there in plain view. The Dogon sculpture was listed (incongruously) in section A of the form, where taxpayers are instructed to report donated property worth less than $5,000 and "certain publicly traded securities." On the line calling for a "[d]escription of donated property," the words "SEE ATTACHED" appeared, but there was no attachment. Section B of the form, where the gift should have been reported, was left blank, including two gaping blanks for signatures. Form 8283 explicitly says that "[a]n appraisal is generally required for property listed in Section B" but there was no, appraisal.
>
> One does not need to be a tax expert to open his eyes and read plain English. If petitioner had reviewed the Form 8283 as he testified, it would have been obvious to him that it was defective in many respects. We find it wholly implausible that a taxpayer as educated as petitioner, having devoted almost a decade to the study of law, would have acquiesced in the notion that he could properly file a tax return obviously lacking these required elements.
>
> Taxpayers have a duty to review their returns before signing and filing them, and the duty of filing accurate returns cannot be avoided by placing responsibility on a tax return preparer. *Metra Chem*, 88 T.C. at 662; *Magill v. Commissioner*, 70 T.C. 465, 479–80 (1978), *aff'd*, 651 F.2d 1233 (6th Cir. 1981). We find it most likely that petitioner did not review his 2011 return with any care at all. And if he did review it, he could not have reasonably relied on advice from Mr. Kassel that the return's blatant errors and omissions were immaterial. See *Chiarelli v. Commissioner*, T.C. Memo. 2021-27, 121 T.C.M. (CCH) 1188, 1193 (*citing Metra Chem*, 88 T.C. at 662).

Lim v. Commissioner, T.C. Memo. 2023-11, involved the following scheme:

> On December 22, 2016, Michael L. Meyer, an attorney, made a presentation to petitioners regarding a scheme he called "The Ultimate Plan: the Ultimate Tax, Estate and Charitable Plan." That same day petitioners executed an engagement agreement with Mr. Meyer. He thereby agreed to form a "Charitable Limited Liability Company" (CLLC) as a charitable giving vehicle. He agreed to create documents that would transfer assets to the CLLC, to create documents that would transfer CLLC units to a charity, and to supply an appraisal supporting the valuation claimed for the gift. He also agreed to represent petitioners before the IRS and this Court if the tax return on which petitioners reported the gift was selected by the IRS for examination.

The promoter was compensated as follows:

> The engagement letter specified that Mr. Meyer's fee would be the greater of $25,000 or an amount calculated by reference to the assets transferred to the CLLC. In the latter case, his fee was defined as 6% of the "deductible amount" of assets up to $1 million, plus 4% of the "deductible amount" of assets exceeding $1 million. The engagement letter contemplated that the assets transferred to the CLLC would be five promissory notes with an aggregate face amount of $2,008,500. Copies of the promissory notes were attached to the engagement letter.
>
> The engagement letter stated that "the total fee assessed will be USD$84,000.00, which will be payable in installments over a six month period" beginning January 2017. The agreement thus

presupposed that the "deductible amount" of assets transferred to the CLLC would be $1,600,000 (6% x $1,000,000 + 4% x $600,000 = $84,000). It is not clear how Mr. Meyer knew, on December 22, 2016, that the assets would be appraised at $1,600,000. As described below, his "appraisal" reaching that conclusion was dated January 31, 2017.

The LLC was purportedly funded by notes, and the taxpayer had little or no evidence that the LLC interest was actually transferred to the charity. Rather than try the case, the court said that the appraisal that the promoter prepared was not qualified:

> Mr. Meyer's purported appraisal has the legalistic form of an appraisal but none of the substance. Like the Foundation's supposed acknowledgment letter, it appears to be a form document into which taxpayer-specific items have been input in bold font. The appraisal is addressed to Integra, the alleged donor, at petitioners' residential address. It states (incorrectly) that ABC has "one (1) Manager," then states (ungrammatically) that the "Manager of the LLC is Helen Chu and Calvin Lim." It asserts that "LLC interests" were donated to the [*6] Foundation in 2016, but it fails to specify, anywhere in the document, how many ABC units were donated. It recites that ABC's only assets were promissory notes, but it makes no attempt to value the notes and ignores the fact that they were not due for seven years. It assumes that the Foundation owned 100% of the ABC units on the valuation date, but it incoherently applies a discount for lack of control in determining the value of those units. After many pages of legalese, Mr. Meyer opined that the deductible value of ABC units allegedly donated to the Foundation on December 31, 2016, was $1,608,808.[2]
>
> [2] Mr. Meyer evidently rounded that number down to $1,600,000 in calculating his fee, given the formula in the engagement letter. See supra p. 3.
>
> Mr. Meyer attached to his purported appraisal a one-page "certification" stating that his compensation as preparer "[was] not contingent on an action or event resulting from the analysis, opinions, or conclusions in, or the use of, this report." He averred that he had no "present or prospective interest or bias with respect to the parties involved," even though he had arranged the entire transaction for petitioners and was the registered agent for ABC. He attached a curriculum vitae stating that he was a certified public accountant (CPA), a certified valuation analyst (CVA), and a licensed attorney in Kentucky at that time.[3]
>
> [3] Respondent contends that Mr. Meyer was not a licensed attorney in Kentucky and that he had let his CPA and CVA certifications lapse as of January 31, 2017. Petitioners question the timing of the lapse of Mr. Meyer's CPA license and contend that he is (and was during 2017) an attorney in good standing in Kentucky. These factual disputes are not material in deciding whether the engagement letter provided for a "prohibited appraisal fee" under Treasury Regulation § 1.170A-13(c)(6)(i). *See* infra pp. 11–12.

Estate of Hoensheid v. Commissioner, T.C. Memo. 2023-34, involved an appraisal with several defects relating to a $3M contribution, criticizing the taxpayer's reliance:

> Petitioner is an experienced and sophisticated businessman. See Treas. Reg. § 1.6664-4(c)(1) (stating that "[a]ll facts and circumstances must be taken into account in determining whether a taxpayer has reasonably relied in good faith on advice" and that "the taxpayer's education, sophistication and business experience will be relevant"). Petitioner made a business decision to have CSTC's transactional adviser conduct the appraisal gratis, rather than engage a national accounting firm on a paid basis. Given Mr. Dragon's admittedly limited experience and unfamiliarity with the qualified appraisal process, such a decision did not demonstrate ordinary business care and prudence. See, *e.g., Webster v. Commissioner*, T.C. Memo. 1992-538, 1992 WL 220112, at *4 (describing taxpayer's decision to engage unqualified adviser as "not a technical matter, but one calling for ordinary human wisdom and careful deliberation"). Petitioners have

> not provided credible evidence, aside from self-serving uncorroborated testimony, that they reasonably relied upon Ms. Kanski's judgment in proceeding with that unwise course of action.[25]
>
> [25] We do not ignore Ms. Kanski's email of April 16, in which she asked Mr. Hensien to inquire whether FINNEA could perform the appraisal as it "would seem to be the most efficient method." Ms. Kanski's preliminary inquiry to a colleague on behalf of petitioners does not speak to whether she ultimately exercised her judgment to advise petitioners that Mr. Dragon was qualified to conduct the appraisal nor to whether petitioners actually relied on that judgment. See, *e.g., Pankratz v. Commissioner*, T.C. Memo. 2021-26, at *26. The record is devoid of credible evidence on this point.
>
> In addition, petitioner's close involvement in the contribution and transaction requires us to cast a skeptical eye to his claim that he relied in good faith on Ms. Kanski as to the appraisal's incorrect date of contribution. The record firmly establishes that petitioner did not transfer the shares to Fidelity Charitable on June 11. The transactional documents, petitioner's contemporaneous emails, and the retention of the undated physical stock certificate strongly suggest that petitioner knew or at least should have known that the shares were not contributed to Fidelity Charitable on June 11. See Treas. Reg. § 1.6664-4(c)(1)(ii) (stating that for reliance to constitute reasonable cause "the advice must not be based upon a representation or assumption which the taxpayer knows, or has reason to know, is unlikely to be true"); see also *Exelon Corp. v. Commissioner*, 906 F.3d 513, 529 (7th Cir. 2018), *aff'g* 147 T.C. 230 (2016); *Blum v. Commissioner*, 737 F.3d 1303, 1318 (10th Cir. 2013), *aff'g* T.C. Memo. 2012-16. Consequently, we also conclude that petitioners have failed to establish good faith reliance on Ms. Kanski's judgment that the appraisal properly reported the required information, because petitioner knew or should have known that the date of contribution (and thus the date of valuation) was incorrect.

Braen v. Commissioner, T.C. Memo. 2023-85, discussed penalties for valuation overstatement in the context of the qualified appraisal requirement:

> Heightened requirements apply to the reasonable cause exception for valuation overstatements with respect to property for which a deduction has been claimed under section 170: (1) the value of the property must be based on a qualified appraisal made by a qualified appraiser and (2) the taxpayer must have made a good faith investigation into the value of the contributed property. I.R.C. § 6664(c)(3); *McGrady v. Commissioner*, T.C. Memo. 2016-233, at *54-55; *Costello*, T.C. Memo. 2015-87, at *35-36; *Esgar Corp. v. Commissioner*, 2012 WL 371809, at *23; . Reg. § 1.6664-4(h)(1). The qualified appraisal required for purposes of section 6664(c)(3)(A) is the same as under section 170(f)(11). I.R.C. § 6664(c)(4)(B); *Costello*, T.C. Memo. 2015-87, at *37.
>
> Treasury Regulation § 1.170A-13(c)(3)(ii) sets out the requirements for qualified appraisals. See I.R.C. § 170(f)(11)(E)(i); *Cave Buttes*, 147 T.C. at 348. Qualified appraisals must include, inter alia, the "terms of any agreement or understanding entered into (or expected to be entered into) by or on behalf of the donor or donee that relates to the use, sale, or other disposition of the property contributed." Treas. Reg. § 1.170A-13(c)(3)(ii)(D). This requirement extends to any agreement that ``[r]eserves to, or confers upon anyone (other than a donee organization or an organization participating with a donee organization in cooperative fundraising) any right...to the possession of the property." *Id*. subdiv. (ii)(D)(2). This information ``enables the IRS to determine whether

the appraiser took restrictions on the disposition of the contributed property into account when appraising it." *Alli v. Commissioner*, T.C. Memo. 2014-15, at *25.

Neither appraisal on which Holdings based its valuation satisfied the qualified appraisal requirements.[18] See I.R.C. § 6664(c)(3); see also *Costello*, T.C. Memo. 2015-87, at *35-36; Treas. Reg. § 1.170A-13(c)(5)(iii) ("If the donor uses the appraisal of more than one appraiser,...each appraiser shall comply with the requirements of [Treasury Regulation § 1.170A-13(c)]...."). The appraisals failed to include the terms of either the settlement agreement or Ramapo's agreement with New York to sell three lots, both of which "relate[] to the use, sale, or other disposition of the property contributed." See Treas. Reg. § 1.170A-13(c)(3)(ii)(D).[19]

[18] The Braens contend that Holdings reasonably relied upon the advice offered by McGladrey. The Braens fail to offer convincing support for the proposition that interposing an accounting firm to offer a reconciliation of underlying appraisals insulates the appraisals from the requirements of section 6664(c)(3).

[19] We further note that the agreement between Ramapo and New York "confer[red] upon" New York a "right...to the possession of the property." See Treas. Reg. § 1.170A-13(c)(3)(ii)(D)(2). Holdings does not argue that New York was an "organization participating with a donee organization in cooperative fundraising," so we do not address that possibility. *Id.*

To be more specific, the land purchase agreement provides that "th[e zoning] lawsuit is being settled as part of the conveyance of the [p]roperty from [Holdings] to the Town of Ramapo." In a later section entitled "Subject to Court Approval and Settlement," the agreement specifies that the sale was "contingent on the settlement of" the zoning litigation "and the entry by the Court of an Order which shall include the subdivision of the property in substantial conformity with the proposed order appended hereto." Likewise, the land purchase agreement provided that Ramapo's "obligation hereunder is expressly conditioned upon the execution and all necessary approvals of the contract of sale between" Ramapo and New York and stated that it would be "null and void" if the agreement between Ramapo and New York was not executed.

"Information concerning such agreements is essential to enable the IRS to evaluate...whether the donors have received or will receive something in exchange for their gift." *Costello*, T.C. Memo. 2015-87, at *19; see also *Alli*, T.C. Memo. 2014-15, at *26. Although the cover letter to Mr. Fader's appraisal report indicates that he was provided the contract of sale between Holdings and Ramapo, the appraisal neither attached nor described the terms of the land purchase agreement, the settlement agreement, or the Ramapo-New York agreement. Mr. Zdunczyk went a bit further, including the land purchase agreement as [*37] an attachment to his appraisal. The Braens argue that this suffices as the land purchase agreement references both the settlement agreement and the agreement between Ramapo and New York, but the land purchase agreement does not set forth the terms of the other agreements and thus cannot cure the omissions in Mr. Zdunczyk's appraisal. See Treas. Reg. § 1.170-13A(c)(3)(ii)(D).

Holdings thus did not strictly comply with the qualified appraisal requirements. The Braens contend, however, that any shortcomings are excused by the substantial compliance doctrine. See *Kaufman v. Shulman*, 687 F.3d 21, 29 (1st Cir. 2012) (noting that substantial compliance can be used to "forgive minor discrepancies"), vacating in part and remanding 136 T.C. 294 (2011), and 134 T.C. 182 (2010).

The "key question" for substantial compliance "is whether the requirements [at issue] relate `to the substance or essence of the statute.'" *Loube v. Commissioner*, T.C. Memo. 2020-3, at *17 (quoting *Bond v. Commissioner*, 100 T.C. 32, 41 (1993)). If they do, "strict adherence to the statutory and regulatory requirements is mandatory," and substantial compliance does not apply. *Id*. at *17–18. This "doctrine `should not be liberally applied'" and is no "substitute for missing entire categories of content." *Costello*, T.C. Memo. 2015-87, at *23–24 (first quoting *Alli*, T.C. Memo. 2014-15, at *54; and then quoting *Hendrix v. United States*, No. 2:09-cv-132, 2010 WL 2900391, at *5 (S.D. Ohio July 21, 2010)); see *Chiarelli v. Commissioner*, T.C. Memo. 2021-27, at *17-18; *Brannan Sand & Gravel Co. v. Commissioner*, T.C. Memo. 2020-76, at *17–18. "[R]ather, it is at most a means of accepting a nearly complete effort that has simply fallen short in regard to minor procedural errors or relatively unimportant clerical oversights." *Costello*, T.C. Memo. 2015-87, at *23-24 (quoting *Hendrix*, 2010 WL 2900391, at *5).

The omissions here "were not trivial, formal, or mechanical." *Costello*, T.C. Memo. 2015-87, at *19. The requirement to set forth terms relating "to the use, sale, or other disposition of the property contributed," Treas. Reg. § 1.170A-13(c)(3)(ii)(D), goes to the IRS's evaluation of whether the taxpayer received anything of value as part of a sale, see *Costello*, T.C. Memo. 2015-87, at *19; *Smith v. Commissioner*, T.C. Memo. 2007-368, 2007 WL 4410771, at *20, *aff'd*, 364 F. App'x 317 (9th Cir. 2009); see also *RERI Holdings I, LLC v. Commissioner*, 149 T.C. 1, 16-17 (2017) (framing substantial compliance as focusing on whether the donor provided sufficient information to permit the IRS to evaluate the reported contribution), *aff'd sub nom. Blau v. Commissioner*, 924 F.3d 1261 (D.C. Cir. 2019). This issue is at the very heart of the matter. See *Hewitt v. Commissioner*, 109 T.C. 258, 265 (1997), *aff'd*, 166 F.3d 332 (4th Cir. 1998); *Bond*, 100 T.C. at 41. We thus conclude that the doctrine of substantial compliance does not apply. See I.R.C. § 6664(c)(3)(A).

The Braens finally argue that any failure to comply with the qualified appraisal requirements should be excused for reasonable cause under section 170(f)(11)(A)(ii)(II). But this defense does not apply in the context of section 6664(c)(3). See *Gorra v. Commissioner*, T.C. Memo. 2013-254, at *62. Section 6664(c)(3) provides an additional requirement applicable to substantial valuation over statements, on top of the ordinary reasonable cause requirements. See *Costello*, T.C. Memo. 2015-87, at *35-36; , Treas. Reg. § 1.6664-4(h)(1), (3). Applying the reasonable cause defense to the qualified appraisal requirement under section 6664(c)(3)(A) would thus render the additional requirement meaningless.

We therefore conclude that the Braens are liable for the substantial valuation misstatement penalties and are not entitled to the reasonable cause defense under section 6664(c)(3).

II.J.4.c.ii.(c). Conservation Easements Donated by Pass-Through Entities

For post-December 29, 2022 contributions, Code § 170(h)(7)(A), "In general," provides:

A contribution by a partnership (whether directly or as a distributive share of a contribution of another partnership) shall not be treated as a qualified conservation contribution for purposes of this section if the amount of such contribution exceeds 2.5 times the sum of each partner's relevant basis in such partnership.

Code § 170(h)(7)(F) generally applies this rule to S corporations.

REG-112916-23 (11/20/2023) proposed regulations under Code § 170(h)(7).

II.J.4.d. Possible Change in Beneficiary's Residence

A beneficiary changing residence might change the beneficiary's income tax posture and possibly the trust's residence. See part II.J.3.e State and Local Income Tax.

II.J.4.e. Material Participation for Business or Rental Activities

The 3.8% tax on net investment income[2599] applies to passive activities a trust holds.[2600] However, if the business has enough potential for ups and downs in its taxable income that planning for a potential significant loss becomes important, see part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good, discussing a trade-off between NII tax and regular income.

Special rules apply to trusts when determining whether an activity is passive.[2601]

Consider how to document[2602] the trustee's participation as trustee in business activities,[2603] whether the trust should be converted to a beneficiary deemed-owned trust to use the beneficiary's work rather than the trustee's work,[2604] and the effect of the beneficiary's participation on any depreciation deductions.[2605]

II.J.4.f. Making Trust a Partial Grantor Trust as to a Beneficiary

A beneficiary may be treated as the deemed owner of a portion over which the beneficiary has - or previously had - a withdrawal right. See part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts, especially part III.B.2.i.vii Portion Owned When a Gift Over $5,000 is Made.

Generally, a nongrantor trust can offset deductions directly against income. However, generally the deemed owner of a grantor trust will report deductions as itemized deductions; note that administrative deductions are deducted against a nongrantor trust's income but are potentially

---

[2599] See part II.I 3.8% Tax on Excess Net Investment Income (NII).
[2600] See part II.I.8 Application of 3.8% Tax to Business Income, especially part II.I.8.g Structuring Businesses in Response to 3.8% Tax.
[2601] See part II.K.2 Passive Loss Rules Applied to Trusts or Estates Owning Trade or Business.
[2602] See part II.K.1.a.vi Proving Participation.
[2603] The IRS argues that the trust does not get credit for work a trustee does as an individual. See part II.K.2.b.i Participation by a Nongrantor Trust: Authority. Although the IRS has lost in court, one might consider avoiding being a test case. Accordingly, for steps one might consider to comply with the IRS' position, see part II.K.2.b.ii Participation by a Nongrantor Trust: Planning Issues.
[2604] See parts II.K.2.c Participation When Grantor Trusts Are Involved; Effect of Toggling and III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts.
[2605] As described in part II.J.11.a.ii Allocating Depreciation to Beneficiaries (Including Surprising Result Regarding Losses), depreciation deductions often pass through to the income beneficiaries, bypassing the usual fiduciary income tax filter. Therefore, the beneficiary's work is the only counted as participation in deciding whether the deductions are allowable.

disallowed on an individual deemed owner's return.[2606] Thus, being a grantor trust tends to save income tax only if the deemed owner has an overall lower federal, state, and local income tax rate than the trust; see part II.J.3.a Who Is Best Taxed on Gross Income.

In certain situations, New York may tax a trust as a resident trust if the trust has any New York source income, so consider giving one or more beneficiaries the right to withdraw New York source income; other states may have a similar approach.[2607]

If the trustee believes that a permanent change to the trust's income tax posture shifting income to the beneficiary would be helpful,[2608] the trustee might try to convert a trust to a partial beneficiary deemed-owned trust[2609] by exercising discretion to declare a distribution. Consider using this strategy to ameliorate unfavorable trust income taxation for the following:

- An interest in a partnership that does not distribute all of its K-1 income will often be taxed at the highest marginal income tax rate. See part III.A.4 Trust Accounting Income Regarding Business Interests and the example in part III.F.2 Trust Accounting and Taxation.

- ESBT taxation may be necessary for nontax reasons but unfavorable for income tax purposes: A nongrantor trust that makes an ESBT election is subject to tax at the highest marginal income tax rates and does not get a distribution deduction regarding any S corporation K-1 income it receives. The constraints placed on designing a trust taxed as a QSST may be inconsistent with the settlor's intent. See part III.A.3.e QSSTs and ESBTs for various issues regarding those types of trusts.

- After the SECURE Act, quite often IRAs and other retirement plans need to be withdrawn over 10 years instead of over the beneficiary's life expectancy. If the settlor wanted the trustee to accumulate most of those withdrawals, that income may be taxed in the top bracket.

This part II.J.4.f explains that a trustee may exercise discretion to "credit" a distribution to a beneficiary. For example, the trustee determines that it would be appropriate to distribute $50,000 for the beneficiary's support. Instead of sending the money to the beneficiary, the trustee tells the beneficiary that, upon the beneficiary's written request (for example, an email), the trustee will promptly distribute whatever portion (or all) of the $50,000 the beneficiary requests. For income tax purposes, the beneficiary is treated as having received the distribution. However, if that taxable year concludes without the beneficiary having taken out part or all of the $50,000, that unwithdrawn portion becomes a current or lapsed withdrawal right for the next taxable year.

Once part II.J.4.f explores what it means to "credit" a distribution, it then describes how to measure a lapse of a withdrawal right and what language might be used to maximize the lapse without gift tax consequences.

[2606] See part III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment and fns 2502 and 2508 in part II.J.3.d Who Benefits Most from Deductions.
[2607] See Ed Morrow, Jonathan Blattmachr and Marty Shenkman on Using Decanting and BDOT Provisions to Avoid a Peppercorn of Income Potentially Triggering State Income Tax on a Trust's Entire Income, LISI Income Tax Planning Newsletter #204 (September 15, 2020).
[2608] See part II.J.3 Strategic Fiduciary Income Tax Planning.
[2609] See part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts, especially part III.B.2.i.vii.(b) Determining Portion Owned When Trust Is Only a Partial Grantor Trust.

Distributions include amounts required to be distributed[2610] and any other amounts properly paid, credited, or required to be distributed to such beneficiary;[2611] Code § 663(b) provides, "If within the first 65 days of any taxable year of an estate or a trust, an amount is properly paid or credited, such amount shall be considered paid or credited on the last day of the preceding taxable year." Generally, an amount is considered credited if the trustee must pay it on the beneficiary's demand (without the trustee exercising any discretion when the beneficiary makes the demand) and there is no practical or legal impediment to making the payment.[2612] *Harris v. U.S.*, 370 F.2d 887 (4th Cir. 1966), interpreted prior law:

> In *Commissioner v. Stearns*, 65 F.2d 371, 373 (2 Cir. 1933), *cert. den.* 290 U.S. 670, "distributed currently" was construed in a statute corresponding to § 162(b) to mean a distribution required by the will, and thus money to which the beneficiary is absolutely entitled, whether or not paid. Likewise, the meaning in 162(c) of "properly credited" was said to contemplate that the distributions "must be actually made, or irrevocably fixed before they become the beneficiary's as of right. ... The income must be so definitively allocated to the legatee as to be beyond recall; 'credit' for practical purposes is the equivalent of 'payment'. Therefore a mere entry on the books of the fiduciary will not serve unless made in such circumstances that it cannot be recalled." Accord, *Lynchburg Trust & Savings Bank v. Commissioner*, 68 F.2d 356, 359 (4 Cir. 1934), *cert. den.* 292 U.S. 640.

In upholding an estate's crediting of income, *Harris* held:

> Furthermore, it is noteworthy that the Eleventh clause of the will, supra, directed the executors to determine the sufficiency of the liquid assets to pay the estate taxes at the time of the testator's death. In the event such liquidity was lacking they were directed to borrow, or to sell real estate, with authorization to encumber it as necessary. This again

---

[2610] Code §§ 652(a), 662(a)(1).

[2611] Code § 662(a)(2). Reg. § 1.662(a)-3(a) provides:

> There is included in the gross income of a beneficiary under section 662(a)(2) any amount properly paid, credited, or required to be distributed to the beneficiary for the taxable year, other than (1) income required to be distributed currently, as determined under § 1.662(a)-2, (2) amounts excluded under section 663(a) and the regulations thereunder, and (3) amounts in excess of distributable net income (see paragraph (c) of this section). An amount which is credited or required to be distributed is included in the gross income of a beneficiary whether or not it is actually distributed.

Stearns*, 65 F.2d 371 (2d Cir.), *cert. den.* 290 U.S. 670 (1933); *Weed's Estate v. United States*, 110 F.Supp. 149 (E.D. Tex. 1952); *Igoe v. Commissioner*, 19 T.C. 913 (1953); *Estate of Cohen v. Commissioner*, 8 T.C. 784 (1947); *Estate of Bruner v. Commissioner*, 3 T.C. 1051 (1944); *Estate of Hubbard v. Commissioner*, 41 B.T.A. 628 (1941); *cf. Harkness v. United States*, 469 F.2d 310 (Ct. Cl. 1972), *cert. denied* 414 U.S. 820 (1973); *Warburton v. Commissioner*, 193 F.2d 1008 (3d Cir. 1952). The author thanks Lad Boyle for providing the above citations from F. Ladson Boyle & Jonathan G. Blattmachr, *Blattmachr on Income Taxation of Estates and Trusts* (15th ed. 2008). Additional authority includes *Bohan v. U.S.*, 326 F.Supp. 1356 (W.D. Mo. 1971), *aff'd* 456 F.2d 851 (8th Cir. 1972), *nonacq.* Rev. Rul. 82-396.
Note also that Code § 643(g) provides circumstances under which a trustee may credit a beneficiary with the trust's estimated tax payments.
A similar concept is found in Reg. § 1.451-2(a), the constructive receipt doctrine, which is reproduced in the text accompanying fns 4205-4206 in part II.Q.1.e Trying to Avoid Possible Ordinary Income on the Sale of a Partnership or S Corporation.

> suggests that the executors were to look only to the liquidity of the corpus, not to the subsequent income for the payment of taxes.
>
> When the will clearly indicates, as appears in the portions to which we have adverted, that the estate income is not to be first charged with the payment of taxes, it is the law of West Virginia that the mandate of the will be followed.[2] *Cuppett v. Neilly*, 143 W.Va. 845, 105 S.E.2d 548, 563 (1958). The Federal law, IRC 1939 § 822(b), directing only that the tax be paid, leaves its impact and apportionment to the administering State. *Riggs v. del Drago*, 317 US 95 (1942). The Tax Court of the United States has so acknowledged. *Alma Igoe*, *supra*, 19 T.C. 913, 924.
>
>> [2] We note that should a fiduciary pay West Virginia taxes due on property under his control, W. Va. Code § 11A-1-11, apparently unconstrued, expresses indifference as to whether he be refunded from the property or its income. Since the passage of W. Va. Code § 44-2-16a in 1959, the mandate to follow the will has been made statutory.
>
> As the money to honor the credits was available to the executors, there is no warrant for holding that they "were a sham, or were part of some device or sub rosa understanding that no distributions of income could be based upon crediting of income to the legatees". *Id.* 924. Moreover, there is no showing of a sham here, but rather an effectuation of the testamentary directions.
>
> A testamentary injunction upon executors to satisfy costs of administration, debts and taxes before distributing the estate does not, as was quite correctly conceded by the Government in argument, nullify a distribution made before satisfaction of these items. The only result is to make the personal representatives and their surety liable therefor, if the remaining estate proves insufficient to meet these items. Consequently, there can be no doubt that the credits gave the present beneficiaries good title to the moneys segregated by the entries and then in the hands of the executors. Evidently, the Government considered the sequestrations valid and effective when made in 1948, 1949 and 1950. Without objection the United States acknowledged the credits as income to the beneficiaries. No attempt was ever made to assess this income to the estate, notwithstanding a greater tax would have thereby been realized and the Government was informed by the executors of this distribution of the estate income.
>
> In short, we find there was a recognizable - and recognized - allocation of estate income among the distributees and a sustainable loan by them to the estate.

However, mere book entries on the fiduciary's records do not constitute crediting. *Estate of Johnson v. Commissioner*, 88 T.C. 225, 235-237, *aff'd* 838 F.2d 1202 (2d Cir. 1987), held:

> Next we must determine whether the crediting of income on the accountant's workpapers and the reporting of income on the fiduciary income tax returns of petitioner and of Willard's estate in 1980 and 1981 can be considered to be distributions within the meaning of section 661. Section 661(a) provides:
>
>> SEC. 661(a). Deduction.—In any taxable year there shall be allowed as a deduction in computing the taxable income of any estate or trust (other than a trust to which subpart B applies), the sum of—

(1) any amount of income for such taxable year required to be distributed currently … and

(2) any other amounts properly paid or credited or required to be distributed for such taxable year;

but such deduction shall not exceed the distributable net income of the estate or trust.

The Second Circuit has interpreted the requirement that amounts be "properly credited" as follows:

> *The income must be so definitively allocated to the legatee as to be beyond recall*; "credit" for practical purposes is the equivalent of "payment." Therefore, a mere entry on the books of the fiduciary will not serve unless made in such circumstances that it cannot be recalled. If the fiduciary's account be stated inter partes, that would probably be enough…. But the unilateral act of entering items in the account is not conclusive… [*Commissioner v. Stearns*, 65 F.2d 371, 373 (2d Cir. 1933), cert. denied sub nom. *Stearns v. Burnet*, 290 U.S. 670 (1933). Emphasis added.][7]

[7] In *Commissioner v. Stearns*, the Second Circuit interpreted section 162(c) of the Revenue Act of 1928, which provided a deduction for an estate for amounts "properly paid or credited during such year to any legatee, heir, or beneficiary." 65 F.2d at 373. The Internal Revenue Code of 1954 did not materially change the relevant language.

Harris v. United States, 370 F.2d 887, 892 (4th Cir. 1966); see *Igoe v. Commissioner*, 19 T.C. 913, 923-924 (1953).

Petitioner and Willard's estate have the same executors and accountants. In 1976 Klein, one of the executors, met with Rosenberg, a senior partner of Main Hurdman, and instructed him to make the appropriate entries each year to credit 20 percent of petitioner's income to Willard's estate. Since 1976, under the direction of Richard Stone, who was the accountant charged with reviewing tax compliance for both estates, staff members of Main Hurdman have prepared annual work papers for both estates showing the distributions. The workpapers were prepared in the ordinary course of business. The entries on the work papers do not reflect any actual exchange of money, but Willard's estate treated the amounts credited as income on its 1980 and 1981 income tax returns pursuant to section 662(a), and petitioner claimed distributions deductions for the same amounts on its 1980 and 1981 returns. See sec. 661(a)(2).

Petitioner contends that because of the identity of executors and accountants, neither formal bookkeeping entries nor actual separation of funds was necessary to credit income from petitioner to Willard's estate within the meaning of section 661(a)(2). In petitioner's view, the informal workpapers, prepared in the ordinary course of business, were sufficient to evidence a commitment to set aside funds beyond the recall of petitioner, its creditors, and its other beneficiaries. Petitioner also argues that the consistent reporting of the transfers on the income tax returns for both estates is further evidence of its intent to permanently set aside the funds for Willard's estate. Respondent contends that the workpapers did not place the amounts transferred beyond petitioner's recall and that the amounts were, therefore, not properly credited within the meaning of section 661(a)(2).

> We agree with respondent. The workpapers, which were informal documents prepared in pencil, are the only records showing the transfers of funds between the estates. Stone testified that workpapers were prepared in the ordinary course of business after the close of each taxable year, always in pencil, and kept in the files for each estate. We nonetheless cannot find that the workpapers were sufficiently permanent documents to function as the books of the estate. We are convinced that, were petitioner to make a bad investment or incur unexpected indebtedness on its large contingent liabilities, the funds credited on the workpapers to Willard's estate would not be insulated from the claims of petitioner's creditors or other beneficiaries.
>
> Petitioner chose to credit Willard's account through entries on the work papers rather than actually transferring cash specifically because of the numerous contingent liabilities and other contingencies preventing it from settling the estate. Although the consistent income tax reporting of the transfers by both estates is evidence that the amounts were intended to be permanently set aside for Willard's estate (*cf. In re Estate of O'Neil*, 68 Misc.2d 634, 327 N.Y.S.2d 725, 732 (Surr. Ct. 1972), it is not enough to meet petitioner's burden of proof. Willard's estate, as a residuary beneficiary, can receive only the residue of petitioner's assets. Thus, it was prudent for the executors not to make cash distributions until they had collected all of petitioner's assets and settled its liabilities. As one of the executors testified, "we did not make any distributions to any of the beneficiaries … we felt it would be prejudicial to them to divide the thing in five places, we felt it was our duty to stay there and settle all claims, negotiate the claims, pay our taxes, collect all the assets and dispose of the liabilities."[8]
>
> [8] Transcript of trial, June 27, 1986 at 169.
>
> We do not hold that, where the representatives or accountants for estate and beneficiary are the same, funds must be physically segregated to satisfy the "properly credited" standard of section 661(a)(2). Entries on the books of the estate may be sufficient in such cases, but we do not believe that workpapers such as those prepared in this case can achieve an allocation beyond the recall of the executors, and petitioner has not shown us that New York law is otherwise. The amounts credited to Willard's estate in 1980 and 1981 were not, for Federal income tax purposes, distributions within the meaning of section 661, and petitioner is not entitled to deductions for them.

Instead of or in addition to exercising discretion by making payments to or for a beneficiary, a trustee can inform a beneficiary that the trustee is crediting a percentage (up to 5%) of the trust's assets[2613] and that, upon demand, the beneficiary may withdraw that amount for a stated reasonable period of time. The cases require that the credited amounts must be "beyond recall" by the trustee; my suggestion of lapsing after a reasonable period of time is not expressly authorized under the crediting cases but is consistent with *Crummey* and its progeny.[2614] Although that looks somewhat like a Code § 678(a)(1) withdrawal right, the process of crediting counts as a distribution rather than as a withdrawal right, because it was subject to the trustee's discretion.[2615] However, once it is credited and vests in the beneficiary, so that the beneficiary

[2613] It should be expressed as a portion of the trust's assets, rather than as a specific dollar amount. See fn 6125 in part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts (Whether or Not a Sale Is Made).
[2614] See fns 2132-2133 in part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap.
[2615] See part III.B.2.i.iii Can a Trust Without a Withdrawal Right Be a Code § 678 Trust?

has the unqualified right to withdraw, presumably looking forward after that taxable year one would look at the grantor trust rules as to income attributable to the beneficiary's withdrawal right and any lapses of it.[2616] If the trust instrument does have language along the lines of the text accompanying fn 2628, the trustee might substitute the following for the first sentence:

> I, the trustee, exercise my authority to distribute by declaring that, until I provide otherwise (see last sentence of this paragraph), the Primary Beneficiary shall have the right to withdraw all gross income (as defined for federal income tax purposes) accruing to the trust in each calendar year, including both ordinary income and capital gain income.

If the withdrawal right were included in the agreement instead of the crediting taking place, the beneficiary would be taxed on a portion of the trust instead of being treated as having been credited with a distribution.[2617] However, the process of crediting allows any allocable deductions to be determined at the trust level and offset directly against the trust's income,[2618] whereas any deductions allocable to the beneficiary deemed-owned trust portion are separately deducted on the deemed owner's return.[2619] Using the trust's own tax attributes may avoid various restrictions on the Code § 199A deduction for pass-through business income, state income tax, and deductions relating to managing the trust,[2620] so the crediting mechanism may provide better short-term tax benefits than having included a withdrawal right to begin with.

If the right to withdraw the credited funds lapses, the beneficiary would make a gift[2621] if and to the extent that the lapse exceeds the greater of $5,000 or 5% of the funds out of which the withdrawal could have been satisfied.[2622] The lapse of a withdrawal right does not cause the holder to become the transferor for generation-skipping transfer tax purposes except to the extent that the lapse constitutes a taxable gift. See generally part III.B.1.d Generation-Skipping Transfer (GST) Issues, including parts III.B.1.d.ii Estate Tax Inclusion Period (ETIP) and III.B.1.d.iii Who Is the Transferor (especially Reg. § 26.2652-1(a)(5), Example (5) in the latter). The ETIP rule applies only if the transferor or the transferor's spouse would have estate inclusion; see Reg. § 26.2632-1(c)(2)(i) and Code § 2642(f)(1), (4). Reg. § 26.2632-

[2620] See part II.J.3.d Who Benefits Most from Deductions.
[2621] Reg. § 25.2514-3(a), "In general," provides:

> *In general*. The exercise, release, or lapse (except as provided in paragraph (c) of this section) of a general power of appointment created after October 21, 1942, is deemed to be a transfer of property by the individual possessing the power. The exercise of a power of appointment that is not a general power is considered to be a transfer if it is exercised to create a further power under certain circumstances (see paragraph (d) of this section). See paragraph (c) of § 25.2514-1 for the definition of various terms used in this section. See paragraph (b) of this section for the rules applicable to determine the extent to which joint powers created after October 21, 1942, are to be treated as general powers of appointment.

[2622] Code § 2514(e)(2) excludes from gift tax consequences lapses in an amount that does not exceed "5 percent of the aggregate value of the assets out of which, or the proceeds of which, the exercise of the lapsed powers could be satisfied."

1(c)(2)(ii)(B) does attack Crummey rights held by a spouse. For a lapse in withdrawal right in excess of the 5-and-5 power, see Letter Ruling 200243026.[2623]

Be aware of circumstances under which the IRS may argue that the 5% refers to the income rather than referring to the whole trust. Code § 2514(e)(2) excludes from gift tax consequences lapses in an amount that does not exceed "5 percent of the aggregate value of the assets out of which, or the proceeds of which, the exercise of the lapsed powers could be satisfied." Reg. If within the first 65 days of any taxable year of an estate or a trust, an amount is properly paid or credited, such amount shall be considered paid or credited on the last day of the preceding taxable year. Reg. § 25.2514-3(c)(4), "Release or lapse of power," provides:

> A release of a power of appointment need not be formal or express in character. For example, the failure to exercise a general power of appointment created after October 21, 1942, within a specified time so that the power lapses, constitutes a release of the power. In any case where the possessor of a general power of appointment is incapable of validly exercising or releasing a power, by reason of minority, or otherwise, and the power may not be validly exercised or released on his behalf, the failure to exercise or release the power is not a lapse of the power. If a trustee has in his capacity as trustee a power which is considered as a general power of appointment, his resignation or removal as trustee will cause a lapse of his power. However, section 2514(e) provides that a lapse during any calendar year is considered as a release so as to be subject to the gift tax only to the extent that the property which could have been appointed by exercise of the lapsed power of appointment exceeds the greater of (i) $5,000, or (ii) 5 percent of the aggregate value, at the time of the lapse, of the assets out of which, or the proceeds of which, the exercise of the lapsed power could be satisfied. For example, if an individual has a noncumulative right to withdraw $10,000 a year from the principal of a trust fund, the failure to exercise this right of withdrawal in a particular year will not constitute a gift if the fund at the end of the year equals or exceeds $200,000. If, however, at the end of the particular year the fund should be worth only $100,000, the failure to exercise the power will be considered a gift to the extent of $5,000, the excess of $10,000 over 5 percent of a fund of $100,000. Where the failure to exercise a power, such as a right of withdrawal, occurs in more than a single year, the value of the taxable transfer will be determined separately for each year.

Rev. Rul. 66-87 applied the corresponding estate tax provision:

> Advice has been requested whether, for purposes of the Federal estate tax, the 5-percent lapsed power exclusion from gross estate provided in section 2041(b)(2)(B) of the Internal Revenue Code of 1954 is based on trust income or the value of the trust corpus, under the circumstances described below.
>
> The decedent was the lifetime beneficiary of a testamentary trust established under the will of her husband, who died in 1953. As the beneficiary, she had the noncumulative right to withdraw the income from the trust each year. Any income not so withdrawn was to be accumulated and added to corpus. The decedent did not exercise her right during

[2623] Letter Ruling 200243026 is described in the text accompanying fn 6356 in part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts. In part III.B.1.d.iii Who Is the Transferor, the effect of taxable lapses is discussed in fn 6404.

her lifetime. Each annual failure to exercise such right has been determined to constitute a lapse of a power for purposes of section 2041(b)(2) of the Code.

The issue is whether the 5-percent limitation on the lapsed power exclusion from decedent's gross estate provided by section 2041(b)(2)(B) of the Code applies to the income the decedent could have withdrawn from the trust or to the trust corpus from which the income was derived.

Section 2041(b)(2) of the Code provides that the lapse of a power of appointment created after October 21, 1942, during the life of the individual possessing the power shall be considered a release of such power. However, section 2041(b)(2) of the Code further provides that the lapse of the power during any calendar year shall be considered a release for purposes of inclusion of property in the gross estate of the individual only to the extent that the property, which could have been appointed by exercise of such lapsed power, exceeded in value the greater of $5,000 or 5 percent of the aggregate value, at the time of such lapse, "of the assets out of which, or the proceeds of which, the exercise of the lapsed powers could have been satisfied."

Example (2) of section 20.2041-3(f) of the Estate Tax Regulations illustrates the application of section 2041(b)(2) of the Code in a situation substantially similar in certain important respects to that under consideration in the instant case. In that example, the donee of the power, the decedent, had the noncumulative power to distribute $10,000 of each year's income to himself, which otherwise was accumulated. The trust income for the year was $20,000. Thus, where the donee did not distribute any income to himself, there was a lapse as to $5,000 (i.e., the amount by which $10,000 exceeds $5,000).

The fact that the 5-percent exclusion is not discussed in the above example is attributable to the reason that it does not apply in the described factual situation. Five percent of $20,000 is $1,000 and, therefore, the greater exclusion of $5,000 provided for in section 2041(b)(2)(A) of the Code is the applicable exclusion in the circumstances of the example.

The 5-percent exclusion provided for in section 2041(b)(2)(B) of the Code logically relates to the "assets out of which" the property in question could have been withdrawn. The value of the fund so described is the quantity against which the exclusion is computed. This is consistent with the underlying objective of this section, which is to provide a limited exclusion from the general rule of taxability of the property over which the decedent had command by his general power of appointment. It is considered significant that the Code uses the phrase "assets out of which" rather than more commonly used terms, as principal, corpus, etc.

In the instant case, the annual trust income earned by the testamentary trust created by the decedent's husband is "the assets out of which ... the exercise of the lapsed powers could have been satisfied" within the meaning of section 2041(b)(2)(B) of the Code. Accordingly, it is held that the 5-percent exclusion from decedent's gross estate provided for in section 2041(b)(2)(B) of the Code is based on the value of the trust income rather than on the trust corpus from which the income was derived.

Fish v. U.S., 432 F.2d 1278 (9th Cir. 1970), held that Code § 2514(e) measures the lapse of a right to income by multiplying the income, rather than the trust's value, by 5%. *Fish* cited Senate Report No. 382, 82nd Cong., 1st Sess., pp. 6-7 (2 U.S. Code Congressional and

Administrative News (1951) 1530, 1535). Here is an excerpt to which it may have been referring:

> The committee amendment provides an annual exemption with respect to lapsed powers equal to $5,000 or 5 percent of the trust or fund in which the lapsed power existed, whichever is the greater. Thus, for example, if a person has a noncumulative right to withdraw $10,000 a year from the principal of a $200,000 trust fund, failure to exercise this right will not result in either estate or gift tax with respect to the power over $10,000 which lapses each year prior to the year of death. At his death there will be included in his gross estate the $10,000 which he was entitled to draw for the year in which his death occurs, less any sums which he may have taken on account thereof while he was alive during the year. However, if, in the above example, the person had had a right to withdraw $15,000 annually, failure to exercise this right in any year prior to the year of death will be considered a release of a power to the extent of the excess over 5 percent of the trust fund.

Reg. § 25.2514-3(c)(4), "Release or lapse of power," provides:

> A release of a power of appointment need not be formal or express in character. For example, the failure to exercise a general power of appointment created after October 21, 1942, within a specified time so that the power lapses, constitutes a release of the power. In any case where the possessor of a general power of appointment is incapable of validly exercising or releasing a power, by reason of minority, or otherwise, and the power may not be validly exercised or released on his behalf, the failure to exercise or release the power is not a lapse of the power. If a trustee has in his capacity as trustee a power which is considered as a general power of appointment, his resignation or removal as trustee will cause a lapse of his power. However, section 2514(e) provides that a lapse during any calendar year is considered as a release so as to be subject to the gift tax only to the extent that the property which could have been appointed by exercise of the lapsed power of appointment exceeds the greater of (i) $5,000, or (ii) 5 percent of the aggregate value, at the time of the lapse, of the assets out of which, or the proceeds of which, the exercise of the lapsed power could be satisfied. For example, if an individual has a noncumulative right to withdraw $10,000 a year from the principal of a trust fund, the failure to exercise this right of withdrawal in a particular year will not constitute a gift if the fund at the end of the year equals or exceeds $200,000. If, however, at the end of the particular year the fund should be worth only $100,000, the failure to exercise the power will be considered a gift to the extent of $5,000, the excess of $10,000 over 5 percent of a fund of $100,000. Where the failure to exercise a power, such as a right of withdrawal, occurs in more than a single year, the value of the taxable transfer will be determined separately for each year.

Rev. Rul. 85-88 describes its view of the nontaxable lapse of a withdrawal right:

> Under section 2514(e) of the Code, the lapse of a general power of appointment created after October 21, 1942, like the release of such a power, results in a transfer for federal gift tax purposes. With respect to any calendar year, however, this rule applies only to the extent the value of the property subject to the lapsed powers exceeds the greater of $5,000 or 5 percent of the aggregate value of the assets ("5 and 5 exemption") out of which the exercise of the lapsed powers could have been satisfied. See section 25.2514-3(c)(4) of the Gift Tax Regulations.

There is no indication in the legislative history of the predecessor of section 2514(e) (section 811(f)(4) of the 1939 Code) that Congress intended that the holder of multiple noncumulative general powers of appointment should receive more than one "5 and 5 exemption" in a calendar year. See S. Rep. No. 382, 82 Cong., 1st Sess. 6-7 (1951). Moreover, the language of section 2514(e), states that the exemption applies "with respect to the lapse of *powers* during any calendar year." (Emphasis added.) Thus, under these circumstances, only one 5 and 5 exemption under section 2514(e) is available for all lapses of powers of appointment in a single trust in a calendar year. Accordingly, the beneficiary is entitled to only one $5,000 exemption per calendar year.

The 5 percent test of section 2514(e) is stated in terms of "the aggregate value of the assets out of which, or the proceeds of which, the exercise of the lapsed powers could be satisfied." For example, where a power of appointment is limited to annual trust income, the 5 percent test is based on annual trust income, not the amount of trust corpus. *Fish v. United States*, 291 F.Supp. 59 (D. Ore. 1968), *aff'd*, 432 F.2d 1278 (9th Cir. 1970). The 5 percent test is based on the value of the assets subject to the power at the time of the lapse of the power. See section 25.2514-3(c)(4) of the Gift Tax Regulations. Where the donee has more than one noncumulative withdrawal power in the same trust that lapse in a calendar year, the 5 percent test is based on the maximum amount subject to the donee's withdrawal power on the date of lapse of any such power during the calendar year. Where the donee has noncumulative powers to withdraw property from two or more trusts, the 5 percent test is applied by aggregating the amount determined pursuant to the preceding sentence for each such trust with respect to which the withdrawal power has lapsed during the calendar year.

For example, suppose B has the power to withdraw $20,000 from the corpus of one trust, and the power lapses on June 1, when the trust corpus is worth $300,000. If B has a second noncumulative power to withdraw $20,000 from the corpus of the same trust, and such power lapses on December 1, when the value of the trust corpus has appreciated to $400,000, then the maximum amount of trust assets subject to B's withdrawal power at the time of any lapse during the calendar year would be $400,000, and the amount of B's 5-and-5 exemption for the year would be $20,000 (5% X $400,000). On the other hand, if B's second withdrawal power in the example is exercisable only with respect to a second, separate trust, B's 5-and-5 exemption for the year would be $35,000 (5% X $700,000).

In Situation 1,[2624] S's powers of withdrawal were limited to contributions to the trust. Although each contribution creates a new withdrawal power and arguably provides a separate fund for the exercise of each such withdrawal power, only a single 5-and-5

[2624] [my footnote:] Situation 1 provides:

In March 1982, G created an irrevocable trust under which S was granted the right to receive the trust income for S's life and C was granted the remainder interest. In addition, S was given the right under the trust to withdraw up to $5,000 from each contribution made by any donor to the trust.

The trust instrument required the trustee to provide S with notice immediately on receipt of a contribution. S had the right for a period of 60 days following receipt of a notice to exercise the right of withdrawal, after which the right lapsed.

G contributed $5,000 to the trust upon its creation. S was promptly notified of the contribution, but did not make a demand for withdrawal within the prescribed period. G made another $5,000 contribution in September 1982. Again, S was notified of the contribution, but the right of withdrawal subsequently lapsed within the year without S having exercised it.

exemption is available to S in 1982. Providing a separate 5-and-5 exemption for each contribution would undermine the statutory purposes to limit the exemption provided by section 2514(e). Moreover, section 2514(e) states the $5,000 and 5 percent tests in terms of the aggregate value of the assets out of which the exercise of the lapsed powers could be satisfied. Nothing is said concerning separate tests for each of the funds out of which the lapsed powers could have been exercised.

In Situation 1, $10,000 was contributed to the trust in 1982. S did not exercise the powers of withdrawal and both powers lapsed within the year. Once a power lapsed, C acquired a vested interest in the amount subject to the lapse. Therefore, C received a remainder interest in $10,000 in 1982 as a result of the lapsed powers. The gift tax does not apply to the $5,000 portion of the trust property in which C has a remainder interest and which is covered by S's 5- and-5 exemption. However, to the extent of C's remainder interest in the excess portion ($10,000 − $5,000 = $5,000) of that property, the gift tax does apply.

Accordingly, under section 2514(e) of the Code, S is treated as having made a gift to C of the excess $5,000 less the value of S's retained interest in the excess $5,000. The value of the taxable gift from S to C is computed as the difference between the $5,000 excess and the value of the right in S to receive the income for life from the excess $5,000.

In Situation 2,[2625] the statutory purpose of section 2514(e) of the Code to provide a limited exemption to the general rule that lapses of powers of appointment carry the same transfer tax consequences as releases and exercises would be thwarted if multiple exemptions were allowed. The allowance of multiple 5-and-5 exemptions would be inconsistent with the purpose of the statute. Moreover, as discussed above section 2514(e) applies the 5-and-5 exemption to the aggregate value of the assets out of which the lapsed powers could have been satisfied. Permitting separate 5-and-5 exemptions for multiple trusts would elevate form over substance by providing more favorable treatment where a transfer to a trust is restructured as multiple transfers to separate trusts.

Thus, in Situation 2, S is allowed one $5,000 exemption for the two powers that lapsed in 1982. As in Situation 1, S is considered to have made a gift to C of C's remainder interest in the $5,000 not covered by the exemption. In order to ensure that C's multiple powers are not treated less favorably than a single power in one trust fund, in Situation 2 the 5 percent test would be applied by aggregating the maximum amount in each trust subject to C's withdrawal powers with respect to such trust on the date of lapse of such powers during the calendar year.

[2625] [my footnote:] Situation 2 provides:

> In February 1982, G created two irrevocable trusts under which S was named the life income beneficiary and C was designated as the remainderman.
>
> In addition to the life income interest, S was given a power in each trust to withdraw $5,000 of the contributions made by any donor in any calendar year. The powers given S were exercisable under the same conditions as the powers in Situation 1.
>
> When the trusts were created, G contributed $5,000 to each. S was promptly notified of the contributions, but did not make a demand for withdrawal with respect to either contribution within the prescribed period. No further contributions were made to either trust in 1982. The two trusts were at all times administered in all respects as separate trusts.

HOLDINGS

In both Situations 1 and 2, S is considered to have made a transfer for federal gift tax purposes as a result of the lapse of S's power to withdraw to the extent that the aggregate amount subject to S's powers exceeds the $5,000 exemption provided in section 2514(e) of the Code. In each situation, the amount taxable is $5,000 less the value of S's retained interest in that amount.[2626]

Rev. Rul. 86-39 involved the following:

ISSUE

If the beneficiary of a trust possesses a general testamentary power of appointment over the trust corpus, if the trust holds stock of a closely held corporation, and if a recapitalization results in a shift in value from that trust to a second trust over which that beneficiary has no power of appointment, then for purposes of estate and gift taxation, is acquiescence in the recapitalization a release of the power of appointment?

FACTS

D owned 100 percent of the voting shares of X corporation. D died in 1980 and D's will provided for the creation of two testamentary trusts. Trust A provided D's spouse, S, with a lifetime income interest and a general testamentary power of appointment over the corpus. Trust A was funded with shares of X corporation common stock worth 120x dollars. Trust B provided S with a life income interest and C, D's child, with the remainder interest. Trust B was funded with shares of X corporation common stock worth 80x dollars. The trustees of Trust A and Trust B were unrelated to the decedent or the trust beneficiaries.

In 1982, the stock of X corporation was recapitalized, resulting in two new classes of stock, voting common and nonvoting preferred. Preferred stock worth 50x dollars was allocated to Trust A and common stock worth 150x dollars was allocated to Trust B. The trustees of Trust A acquiesced in the recapitalization, and S executed a release, valid under local law, in which S agreed not to challenge the trustee's action with respect to the recapitalization. S died in 1985, when the fair market value of the preferred stock held by Trust A was 55x dollars and the fair market value of the common stock held by Trust B was 225x dollars.

Citing Reg. § 25.2514-3(c)(4) and other authority, Rev. Rul. 86-39 reasoned and concluded:

Prior to the recapitalization, S, as beneficiary of Trust A, had an income interest in, and a general testamentary power of appointment over, the stock of X corporation worth 120x dollars and an income interest, as beneficiary of Trust B, in the remaining stock worth 80x dollars. As a result of the recapitalization, S, as beneficiary of Trust A, received an income interest in, and a general testamentary power of appointment over, a different class of stock worth 50x dollars and, as beneficiary of Trust B, received an income interest for life in stock worth 150x dollars. Although the total value of S's income interest in the two trusts was unchanged as a result of the recapitalization, the value of the

[2626] [my footnote:] Note that the final sentence is subject to part III.B.7.d Code § 2702 Overview.

corpus of Trust A over which S retained a general testamentary power of appointment decreased by 70x dollars, the excess of 120x dollars over 50x dollars.

By consenting to the reallocation of stock, the trustee of Trust A, accepted stock with a lesser value than the value held prior to the recapitalization. S, as the beneficiary of Trust A, could have asserted the right of a trust beneficiary under local law to prevent the trustee from permitting a loss in value of the trust assets. The execution of the release in which S agreed not to raise an objection to the trustee's conduct with respect to the recapitalization constitutes a release of a general testamentary power of appointment by S over stock worth 70x dollars.

For purposes of the gift tax, the release by S is treated as a transfer of property to C, the owner of the remainder interest in Trust B, for which S did not receive adequate and full consideration. See Rev. Rul. 84-105. The value of the gift from S to C as a result of the recapitalization of X corporation is equal to the present value of the remainder interest in 70x dollars' worth of stock that was shifted from Trust A to Trust B.

For purposes of the estate tax, the release of the general testamentary power of appointment over the remainder interest in the 70x dollars' worth of stock is treated as a transfer under which S, as the income beneficiary of Trust B, retained an income interest for life in the transferred stock. An actual transfer of such an interest would have resulted, upon S's death in 1985, in the portion of the Trust B corpus attributable to the value of the interest so transferred being includible in S's gross estate under section 2036. Thus, in this case, S's release of the power results in the inclusion of a portion of the corpus of Trust B in the gross estate under section 2041 of the Code to the same extent that the property would have been includible under section 2036 if there had been an actual transfer.

Letter Ruling 200736023 held:

In the present case, under the terms of Trust A, Daughter, during her lifetime, possesses the noncumulative right to withdraw the entire income of Trust A each year. Daughter also has a testamentary limited power to appoint Trust A corpus on her death. In addition, Daughter has the discretionary power as a co-trustee, to distribute corpus to herself for support, health, education, and maintenance. Daughter will possess the same rights and powers with respect to Trusts 1-3.

Daughter's discretionary power to distribute corpus to herself is limited by an ascertainable standard relating to her health, maintenance support and education. Therefore, this power does not constitute a general power of appointment under section 2041(b)(2). Therefore, possession of this power will not cause Trust A, or Trusts 1-3 to be included in Daughter's gross estate.

However, under Trust A, and under Trusts 1-3, Daughter does possess a noncumulative right, exercisable annually, to withdraw trust income. Trust income that is not withdrawn during the calendar year is accumulated. The accumulated income is remains subject to Daughter's testamentary limited power to appoint trust corpus. In accordance with section 2041(a)(2) and section 2041(b)(2), the net income of Trusts 1-3 over which Daughter will have a general power of appointment in the year of her death will be included in the gross estate of Daughter. In addition, a portion of the corpus of Trusts 1-3 will be includible in Daughter's gross estate to the extent the value of the property

> Daughter failed to withdraw annually with respect to Trust A and after the division, fails to withdraw annually from Trusts 1-3, exceeded (or exceeds) the greater of $5,000 or 5% of the aggregate value of the property, which could have been appointed by exercise of her lapsed powers. The portion of the corpus includible will be the portion attributable to such property. In accordance with Rev. Rul. 85-88, the 5 percent test under section 2041(b)(2) is based on the annual trust income of Trust A, and after the division, Trusts 1-3, and not the amount of trust corpus. Further, after the division, the 5 percent test is applied by aggregating the amount subject to withdrawal with respect to each trust, and only one $5000 exemption is allowed with respect to the multiple trusts.

Given *Fish*, the withdrawal right should refer to the entire trust. For example, instead of granting a $20,000 right to withdraw, the trustee grants the right to withdraw a fractional share of the trust, the numerator of which is $20,000 and the denominator of which is the value of the trust's assets. The right to withdraw would continue, lapsing each year only to the extent provided in Code § 2514(e). Because the lapse does not constitute a gift for gift tax purposes, the lapse does not cause a portion of the trust to be included in the beneficiary's estate for estate tax purposes. (The latter might be important even for QTIP marital deduction trusts that are included in the beneficiary's estate anyway, because the inclusion of such a trust's assets might be valued at a lower rate as a QTIP asset than as an incomplete gift or Code § 2036 asset.[2627]) If it is desirable to isolate the grantor trust portion from the nongrantor trust portion, see part III.B.2.i.viii Funding the Trust with a Large Initial Gift or Bequest, which is within the larger discussion of part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts.

Consider language along the following lines to make the beneficiary the deemed owner of all of the gross income, taking into account the argument regarding the scope of the 5% lapse:[2628]

> The Primary Beneficiary shall have the right to withdraw all gross income (as defined for federal income tax purposes) accruing to the trust in each calendar year, including both ordinary income and capital gain income.[2629] Any income not withdrawn shall be added to principal and remain subject to withdrawal except to the extent the right of withdrawal lapses in accordance with the following sentence.[2630] On November 15 of the succeeding year and on November 15 of each subsequent year, any unexercised right of withdrawal shall lapse to the extent of 5% of the value of the trust on November 15 (or such larger amount that can lapse under section 2514(e) without being considered to be a transfer to the trust by the holder of the withdrawal right).[2631] If income accrues to the trust in a particular year that is not actually received by the trust by November 15 of the

---

[2627] For the potentially lower valuation of QTIP assets, see fn. 3792.

[2628] This was drafted by Ellen Harrison and Carlyn McCaffrey, which they modified after I raised certain issues.

[2629] Having the withdrawal right be specific to income causes that income to be taxable to the beneficiary under Code § 678(a)(1).

[2630] If one attempted to lapse the withdrawal right while it was a right over income, only the income would be the base against which the lapse would be measured, as was the case in *Fish*. Converting the withdrawal right to being a right over principal the following year provides a larger base against which the lapse would be measured. Also, adding undistributed income to principal at the end of the year is pretty routine, so this sentence simply follows the natural course of action.

[2631] The 5% is Ellen's and Carlyn's language; I prefer to use only language along the lines of that found in the parenthetical. November 15 resulted from the issue pointed out in the next sentence of text, which is that the trust might receive income from a pass-through entity that might file its return on extension, so the trustee and therefore the beneficiary might not have enough information to measure the beneficiary's withdrawal right.

> succeeding year, such as from a partnership, limited liability company or subchapter S corporation, or is deemed to have been received by the trust under any other provision of the tax laws (such as section 951), the holder of the withdrawal right may direct the trustee to irrevocably assign to the holder the right to receive such income when it becomes available to the trustee or to satisfy the withdrawal right with other assets of the trust.[2632] The independent trustee may amend the trust to terminate the withdrawal right but any termination shall be prospective and shall only affect the right to withdraw income accruing after the effective date of the amendment.

Also consider modifying November 15 above to a more convenient valuation date, such as December 31.

I might edit the above clause to have the trustee credit the income to the beneficiary and get the income distribution deduction, then use the concept of the above clause to address the post-yearend hanging power. The first sentence of the sample language might be changed to say:

> I, the independent trustee, exercise my authority to distribute by declaring that, until I provide otherwise (see last sentence of this paragraph), the Primary Beneficiary shall have the right to withdraw all gross income (as defined for federal income tax purposes) accruing to the trust in each calendar year, including both ordinary income and capital gain income.

Then include the rest.

The IRS might resist applying the above clause to a pass-through entity, to the extent that the taxable income is not actually distributed to the trust. It has done so when a taxpayer asserts a charitable deduction for gross income reinvested in the pass-through entity; see *Sid W. Richardson Foundation v. U.S.*, 430 F.2d 710 (5th Cir. 1970), discussed in part II.Q.7.c.i.(a) Contribution Must Be Made from Gross Income. If the pass-through is an S corporation, consider using a QSST, as mentioned in part II.J.4.g Making the Trust a Complete Grantor Trust as to the Beneficiary. If the pass-through is a partnership, consider whether to place it in an S corporation as described in part II.J.4.g. (but when you read my discussion, you will see I mention some drawbacks to that strategy). I would tend to use that clause rather than the QSST approach primarily when the pass-through holding is small relative to the trust's other assets (such as when investing in a publicly-traded partnership).

Instead of the trustee making discretionary distributions so the beneficiary can pay taxes or otherwise enjoy the trust's income, first have the beneficiary exercise his or her withdrawal right.

As to the extent to which the continuing withdrawal right over principal or any lapses thereof make the beneficiary the deemed owner even if the withdrawal right has later been turned off, see part III.B.2.i.vii.(a) Determining Portion Owned When a Withdrawal Right Does Not Lapse in Full Before Any Income Is Earned.

Over time, the portion deemed owned by the beneficiary increases. See part III.B.2.i.vii.(b) Determining Portion Owned When Trust Is Only a Partial Grantor Trust, found within the larger discussion of part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts.

[2632] This clause recognizes that pass-through entities frequently distribute to their owners less cash than the income appearing on the K-1s they issue. To give substance to the withdrawal right over the income the pass-through reinvested, the beneficiary is given the right to force the trustee to satisfy the withdrawal right with other assets.

For many more applications of the planning described in this part II.J.4.f, see Morrow, "IRC Section 678 and the Beneficiary Deemed Owner Trust (BDOT)" (5/6/2018, last revised 4/22/2021), available at https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3165592.

A corollary to the planning described in this part II.J.4.f is to use the trustee's discretion to make distributions for welfare as a vehicle to modify the trust to grant the beneficiary a formula general power of appointment to get a basis step-up.[2633]

II.J.4.g. Making the Trust a Complete Grantor Trust as to the Beneficiary

Generally, a nongrantor trust can offset deductions directly against income. However, generally the deemed owner of a grantor trust will report deductions as itemized deductions; note that administrative deductions are deducted against a nongrantor trust's income but are potentially disallowed on an individual deemed owner's return.[2634] Thus, being a grantor trust tends to save income tax only if the deemed owner has an overall lower federal, state, and local income tax rate that the trust; see part II.J.3.a Who Is Best Taxed on Gross Income.

If the beneficiary being taxed on the trust's income is desirable, whether because of rates or a desire to accumulate funds in the trust, then consider converting the trust to a qualified subchapter S trust (QSST).[2635]

The trust forms an S corporation, the trust is modified as needed to be eligible for a QSST election, and the beneficiary makes a QSST election.

The beneficiary is taxed on the trust's distributive share of the S corporation's income.

Although the trust must distribute all of its income, income generally means distributions from the S corporation, and the trustee as the sole shareholder can control how much the S corporation distributes.[2636] Note that the trust can continue to be a discretionary trust as to income if all of the income is actually distributed.[2637] Mandatory income is safer in that it prevents a misstep in not distributing enough income, but in some cases the flexibility is more important (in a mandatory income trust, the beneficiary might pressure the trustee to distribute more from the S corporation).

Unlike the partial grantor trust strategy mentioned above, this trust's beneficiary grantor status can be toggled off, with income being accumulated in the trust.[2638]

[2633] See Letter Ruling 202206008 and related planning, as described in the text accompanying and preceding fn 2129 in part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap.
[2634] See part III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment and fns 2502 and 2508 in part II.J.3.d Who Benefits Most from Deductions.
[2635] See parts III.A.3.e.i.(a) QSSTs Generally and III.A.3.e.vi QSST as a Grantor Trust; Sales to QSSTs.
[2636] See part II.J.8.e Partnerships and S corporations Carry Out Income and Capital Gain to Beneficiaries and III.A.4 Trust Accounting Income Regarding Business Interests.
[2637] See parts III.A.3.e.i.(a) QSSTs Generally (especially fn. 5971) and III.A.3.e.iv Flexible Trust Design When Holding S Corporation Stock.
[2638] See part III.A.3.e.iv Flexible Trust Design When Holding S Corporation Stock.

Before engaging in this approach, be careful to plan an exit strategy upon termination.[2639] Also consider that, if the trust is includible in the beneficiary's estate, the S corporation's assets do not get an inside basis step-up, although in some circumstances it may be possible to replicate one. See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.

II.J.4.h. Trapping Income in Trust Notwithstanding Distributions

This part II.J.4.h includes not only affirmative planning opportunities (part II.J.4.h.i Trapping Income in Trust Notwithstanding Distributions – ESBT) but also warnings (part II.J.4.h.ii Final Year Income Tax Traps).

II.J.4.h.i. Trapping Income in Trust Notwithstanding Distributions – ESBT

Just as in the above strategy, the trust forms an S corporation, only this time makes an electing small business trust (ESBT) election[2640] or creates another trust.

The trust's distributive share of S corporation income is taxed to the trust, even if distributed to the beneficiary.

To better control the effect of distributions, if the trust reinvests its distributions in taxable investments then it should divide and put those assets in a separate trust.[2641]

If circumstances change, the trust could toggle to being taxed to the beneficiaries.[2642]

Before engaging in this approach, be careful to plan an exit strategy upon termination.[2643]

II.J.4.h.ii. Final Year Income Tax Traps

Many of the ideas in this part II.J.4.h.ii come from Boyle, Jones and Blattmachr, "Unexpected Income Tax Surprises for Fiduciaries," Probate Practice Reporter, Vol. 32, Nos. 10-11 (Oct. and Nov. 2020) (as used in this part II.J.4.h.ii, the "Article").

An estate may have substantial gain from satisfying pecuniary bequests, which does not carry out to the recipient of the pecuniary bequest. See part II.J.8.d.i Distribution in Kind - Generally. Sometimes pecuniary bequests exceed available assets.

Generally, a specific bequest does not carry out income, either. See part II.J.8.d.ii Specific Bequest.

A subheading of the 10/2020 Article, "Gross Income Exceeds Allowable Deductions," explains:

> If an estate has income in its final year, but also has expenses that are not income tax deductible, then the amount available to distribute to the beneficiaries may be less than

[2639] See parts III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts (Whether or Not a Sale Is Made) and III.A.3.e.i.(b) QSST Issues When Beneficiary Dies.
[2640] See part III.A.3.e.ii Electing Small Business Trusts (ESBTs.
[2641] See part III.A.3.e.ii.(c) When ESBT Income Taxation Might Help.
[2642] See part III.A.3.e.v Converting a Multiple Beneficiary ESBT into One or More QSSTs.
[2643] See parts III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts (Whether or Not a Sale Is Made) and III.A.3.e.i.(b) QSST Issues When Beneficiary Dies.

the amount of gross income recognized on the final return. Thus, if the only assets that remain for distribution to beneficiaries are cash and property with a basis (or fair market value, if lower) that is less than the amount of DNI, the distribution deduction will not reduce the income tax liability to zero. Nondeductible expenses might include debts of the decedent (claims against the estate), liens against estate assets such as mortgages, state death taxes, or administration expenses that were elected under section 642(g) to be deducted on the estate tax return rather than on an income tax return.

Example 1: In its final year, an estate sells its sole remaining asset for $200,000. The asset has a $100,000 basis and is subject to a $100,000 mortgage. $40,000 of the proceeds of the sale are used to pay non-deductible expenses. The gain realized is $100,000, but the net cash flow is only $60,000 ($200,000 proceeds, less $100,000 mortgage, and less $40,000 of debts). In the final year, only a maximum of $60,000 of the $100,000 gain may be included in the estate's DNI because capital gain is included in DNI only when actually distributed. Therefore, a complete distribution of the net cash will provide only a $60,000 distribution deduction and the estate remains taxable on $40,000, but the fiduciary has no funds to pay the income tax.

In Example 1, the personal representative should withhold a portion of the $60,000 to pay income taxes. UPIA section 505 provides that income taxes are charged against receipts of income, so withholding a portion of the net proceeds is generally authorized by state law. This withholding has the potential to involve an "interrelated" computation because, when additional amounts of the cash are retained rather than distributed, the distribution deduction is smaller, causing the amount of the income tax due to increase. For example, if a combined 40 percent federal and state tax rate is assumed, the personal representative may distribute only $33,000 and must withhold nearly $27,000 to pay income taxes on $67,000 of net income (that is $100,000, less a $33,000 distribution deduction times 40 percent).

For more on the trustee's right to pay taxes before making mandatory distributions of income, see parts III.A.4 Trust Accounting Income Regarding Business Interests and III.F.2 Trust Accounting and Taxation. A formula for the interrelated calculation is found in part III.A.4.d.vi Appendix to 505 Discussion.

An estate may have substantial ordinary income from receiving income in respect of a decedent. See part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up. Example 2 of the 10/2020 Article explains:

An estate is about to close and the only asset remaining for distribution is the decedent's $1 million IRA. To close the estate, the personal representative of the estate withdraws $100,000 to pay nondeductible expenses. The $100,000 withdrawn from the IRA is gross income. A distribution of the remainder of the IRA (or any other rights to an IRD item of income) in-kind will not, by reason of section 643(e)(2), give rise to a section 661 distribution deduction. Therefore, the estate has $100,000 of taxable income in the final year.

A trust that distributes all of its DNI may still be subject to NII tax; see part II.I.7 Interaction of NII Tax with Fiduciary Income Tax Principles.

Depreciation can pass directly to beneficiaries, leaving more taxable income than expected. See part II.J.11.a.ii Allocating Depreciation to Beneficiaries (Including Surprising Result Regarding Losses).

An executor or trustee is liable if that person distributes assets before paying the estate's/trust's taxes. See generally parts III.B.5.e.iv Federal Estate Tax Liens and III.B.5.e.v Transferee Liability. When a trust/estate terminates, I tend to recommend:

- Filing Form 4810, which is described in part III.B.5.e.iv.(g) How to Avoid the Pitfalls of the Estate Tax Lien, to cut short the statute of limitations for the IRS to audit returns.

- Reserving enough cash to defend an audit and pay any tax, interest, and penalties that may be due. Retaining a cash reserve does not prevent the estate/trust from terminating for income tax purposes (although keeping it in an interest-bearing account may generate awkward fiduciary income tax returns filing requirements); see part II.J.3.i Planning for Excess Losses.[2644]

- Obtaining an agreement from the residual beneficiaries to return distributions to the extent needed to pay any tax, interest, and penalties that may be due. Usually the fiduciary would rather not have to try to collect from those beneficiaries, so that agreement is just in case the reserve is insufficient. The residual beneficiaries are also liable for any such tax, interest, and penalties; see part III.B.5.e.v Transferee Liability.

II.J.4.i. Modifying Trust to Make More Income Tax Efficient

In some states, the settlor and all beneficiaries may amend a noncharitable irrevocable trust, even if the modification or termination is inconsistent with a material purpose of the trust.[2645]

Also, depending on the distribution standard and state law, the trustee might be able to change a trust using decanting.[2646] Decanting might be done by merely amending the trust rather than by actually transferring assets to another trust.[2647] If the trust's situs has moved since inception, the trust's situs (not the substantive law of the original state) determines authority to decant through merger.[2648] If decanting is done using asset transfers to a new trust, see parts II.G.1 How and When to Obtain or Change an Employer Identification Number (EIN) and II.J.18 Trust Divisions, Mergers, and Commutations; Decanting.

See also part III.B.2.j.iv.(a) Grantor Trust Reimbursing for Tax Paid by the Deemed Owner, especially fns 6956-6958.

II.J.4.j. Helping the Trustee Provide Annual Notices to Beneficiaries to Reduce Exposure

II.J.4.j.i. Need to Provide Notices

In Missouri and many other states, a beneficiary can sue a trustee any time before five years after the first to occur of the trustee's removal, resignation, or death of the trustee, the termination of the beneficiary's interest in the trust, or the trust's termination.[2649]

However, a beneficiary may not sue a trustee more than one year after the last to occur of the date the beneficiary or a representative of the beneficiary was sent a report that adequately disclosed the existence of a potential claim for breach of trust and the date the trustee informed the beneficiary of the time allowed for commencing a proceeding with respect to any potential claim adequately disclosed on the report.[2650]

A report adequately discloses the existence of a potential claim if it provides sufficient information so that the beneficiary or representative knows of the potential claim or should have inquired into its existence.[2651] The trustee may choose to disclose less than complete information; in that case, the trustee is protected only with respect to the information that is disclosed.

The trustee might want to consider providing accountings or other notices to the beneficiaries that would start running the statute of limitations for making a claim against the trustee so that the beneficiaries could not add up all of their alleged grievances and then pile this one on top of it. Given that a beneficiary's failure to bring a claim might constitute a gift,[2652] allowing any disputes to settle annually might minimize gift tax issues.

[2649] Section 1005(c) of the Uniform Trust Code (http://www.uniformlaws.org/Act.aspx?title=Trust Code), provides:

> (c) If subsection (a) does not apply, a judicial proceeding by a beneficiary against a trustee for breach of trust must be commenced within five years after the first to occur of:
> (1) the removal, resignation, or death of the trustee;
> (2) the termination of the beneficiary's interest in the trust; or
> (3) the termination of the trust.

Missouri's version is R.S.Mo. § 456.10-1005, found at http://www.moga.mo.gov/mostatutes/stathtml/45601010051.html.

[2650] Section 1005(a) and (b) of the Uniform Trust Code (http://www.uniformlaws.org/Act.aspx?title=Trust Code), provide:

> (a) A beneficiary may not commence a proceeding against a trustee for breach of trust more than one year after the date the beneficiary or a representative of the beneficiary was sent a report that adequately disclosed the existence of a potential claim for breach of trust and informed the beneficiary of the time allowed for commencing a proceeding.
> (b) A report adequately discloses the existence of a potential claim for breach of trust if it provides sufficient information so that the beneficiary or representative knows of the potential claim or should have inquired into its existence.

Missouri's version is R.S.Mo. § 456.10-1005, found at http://www.moga.mo.gov/mostatutes/stathtml/45601010051.html.

[2651] Uniform Trust Code § 1005(b), found at http://www.uniformlaws.org/Act.aspx?title=Trust Code; R.S.Mo. § 456.10-1005.2, found at http://www.moga.mo.gov/mostatutes/stathtml/45601010051.html.

[2652] The failure to assert a claim is a gift when the right to assert the claim becomes foreclosed, Rev. Rul. 84-105, which is described in part III.B.1.b Transfers for Insufficient Consideration, Including

Each year, after a tax return preparer's peak period ends, the preparer might consider suggesting that the trustee contact counsel and obtain help in putting together an annual notice. The tax return preparer can compile the information, especially given that many preparers keep records in PDFs and can easily download them to a flash drive or memory stick. Part II.J.4.j.ii provides an example of what that might look like.

Every trustee should consider following this procedure:

- Litigious Beneficiaries. Having as few years as possible open will help reduce the stakes and make it less worthwhile for them to spend money to take legal action. Annual notices require them to state their concerns now, rather the criticizing many years in the future – put up or shut up. And, if the trustee has made a mistake (nobody's perfect), the trustee is in a better position to rectify it now than after the mistake's effects have been compounded for many years.

- One Big Happy Family. Sure, everyone's happy now. But relationships can change overnight – a beneficiary gets divorced, has a business failure, becomes addicted to drugs, is struck by physical or mental illness that changes his or her outlook on life, undergoes other financial or emotional stress, or simply starts disliking the trustee. Provide notices now, while everyone is happy and unlikely to complain. Besides, the trustee generally should be keeping beneficiaries informed anyway. Notices now can prevent a big claim later if a blow-up occurs.

Generally, a trustee may use the trust's resources to provide notices, respond to questions, provide distributions to some beneficiaries to adjust for perceived unfairness in distributions to other beneficiaries, and defend lawsuits (so long as the trustee did not engage in bad faith or reckless indifference to the beneficiaries' interests).

Countervailing this recommendation are concerns about the effect of notices on the beneficiaries themselves. The trustee might be concerned that knowing that a pool of funds is available for a beneficiary might change the beneficiary's behavior – make the beneficiary more interested in draining the trust than earning a living, generate a sense of entitlement, or encourage the beneficiary to ask the grantor or the grantor's surviving spouse for money. The trustee will need to weigh those concerns against the trustee's legal exposure and general duties to provide information and might even decide that serving as trustee is too thankless a task. Better to think about these issues now and with eyes opened than to encounter a surprise.

Restructuring Businesses or Trusts. Reg. §§ 20.2041-1(b)(1) (estate tax) and 25.2514-1(b)(1) (gift tax) provide:

> … the right in a beneficiary of a trust to assent to a periodic accounting, thereby relieving the trustee from further accountability, is not a power of appointment if the right of assent does not consist of any power or right to enlarge or shift the beneficial interest of any beneficiary therein.

If somehow the consent does somehow consist of any power or right to enlarge or shift a beneficial interest, note that a principal/income allocation generally is only a few percent, and a beneficiary's failure to object to an accounting – if somehow characterized as a lapse of a general power of appointment - might very well be less than the 5% lapse of a general power of appointment that, under Code § 2514(e), does not constitute a gift. Having an annual report may keep the grievances within the 5% range. For more details on calculating the 5% lapse, see fn 6125 in part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts (Whether or Not a Sale Is Made).

II.J.4.j.ii. Sample Notice

After this paragraph, the rest of this part II.J.4.j.ii is a shell of a notice I have used. The trustee should consult with the trustee's own legal counsel to determine the advisability and sufficiency of such a notice under the circumstances.

Re: Trustee's Notice re: [trust's name]

As you know, the [trust's name] (the "Trust") was created by the [name of trust agreement].

As a beneficiary of the Trust, and on behalf of any other current or future beneficiaries of the Trust, you have the right to request a copy of the [name of trust agreement] and to receive information about the Trust's investments and other activity.

[Disclose any related party transactions.]

The enclosed flash drive contains the following information for the Trust for the period of January 1, 20xx, through December 31, 20xx:

1. [any trust accounting regularly prepared]

2. [brokerage statements]: January 1, 20xx, through December 31, 20xx

3. 20xx Fiduciary Income Tax Return for the Trust

4. Investment policy for [brokerage account or for trust as a whole]

If you have any questions with respect to this letter and the information contained on the enclosed flash drive, or if you have any difficulty accessing the information, please contact me. If you want to make a claim that I, as trustee, have breached any duty with respect to the Trust, you have one (1) year from the last to occur of (i) the date on which you (or your representative) were sent a report that adequately disclosed the existence of potential claim for breach of trust, and (ii) the date you were informed of the time allowed for commencing a proceeding with respect to any potential claim adequately disclosed on the report.

Attached you will find an Acknowledgement confirming receipt of this information. Please sign and date the acknowledgement and return it via fax or email to my attention.

Thank you.

[closing]

[page break]

<u>ACKNOWLEDGEMENT</u>

On my behalf and on the behalf of any other current or future beneficiaries, I hereby acknowledge receipt of the Trustee's Notice to the beneficiaries of the [trust's name], which includes reports relating to the trust's activities for the period January 1, 20xx, through December 31, 20xx.

[signature line and date blank]

II.J.5. Mandatory Income Trusts

II.J.5.a. Issues Arising with Mandatory Income Trusts

The whole point to Code § 661(a)(1) or 651(a) is that fiduciary accounting income (FAI) required to be distributed – as contrasted with actually distributed – is deductible by the trust and included in income. That avoids needing to calculate FAI during the taxable year. Instead, you calculate it when doing the tax return and make any distributions that were required to be made within a reasonable amount of time (because of fiduciary duties) after FAI was calculated.

Reg. § 1.651(a)-2(a) includes:

> The fiduciary must be under a duty to distribute the income currently even if, as a matter of practical necessity, the income is not distributed until after the close of the trust's taxable year. For example: Under the terms of the trust instrument, all of the income is currently distributable to A. The trust reports on the calendar year basis and as a matter of practical necessity makes distribution to A of each quarter's income on the fifteenth day of the month following the close of the quarter. The distribution made by the trust on January 15, 1955, of the income for the fourth quarter of 1954 does not disqualify the trust from treatment in 1955 under section 651, since the income is required to be distributed currently. However, if the terms of a trust require that none of the income be distributed until after the year of its receipt by the trust, the income of the trust is not required to be distributed currently and the trust is not a simple trust.

As to the last sentence, a trust agreement never ***requires*** waiting until after yearend. Often distributions are made throughout the year based on actual income, perhaps with reserves to the extent that estimated amounts are used. I think the timing is more of a fiduciary than a tax issue, with the fiduciary communicating with the beneficiary and setting reasonable expectations for all.

Mandatory income trusts may provide additional planning options under part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI). Consider how timing under Reg. § 1.651(a)-2(a) coordinates with deciding whether to exercise a power to adjust to treat capital gain as FAI and therefore DNI, as described in part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law. Other than a nonexclusive example approving a 15-day delay, no guidance discusses the parameters for how much delay in determining income satisfies "practical necessity" under Reg. § 1.651(a)-2(a). Because FAI is reported on each fiduciary income tax return for a (nongrantor) mandatory income trust, often the tax return preparer will compute FAI and communicate with the trustee regarding the amount of FAI so that they agree on what number to use as FAI in Form 1041, page 2, Schedule B. Just as an outside CPA communicates adjusting journal entries and similar entries to an accounting client after yearend and works with a company's internal accounting staff, a tax return preparer would communicate similar information to a trustee. Absent clear guidance about how these adjustments interact with the "practical necessity" standard, I view this industry custom to provide substantial authority for adjusting FAI when the tax return preparer communicates with the trustee. Therefore, when the preparer puts together a draft of the return, the preparer may communicate with the trustee regarding FAI. The trustee may decide to exercise a power to adjust under part II.J.5.b.ii Power to Adjust or Convert to/from a Unitrust, especially part II.J.5.b.ii.(a) Power to Adjust. Any adjustment to FAI would change the amount required to be distributed. Because this timing is not coordinated with the 65-day rule under I.R.C. § 663(b), any adjustment satisfying the "practical necessity" standard could retroactively be required to be distributed.

Therefore, if the Discretionary Principal Rule could not be applied to distributions made after March 5/6 (see part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary), presumably because information was unavailable at that time, as a "practical necessity" it may be reasonable for the power to adjust to be made and the full FAI distributed sometime after the March 5/6 deadline.

For very important limitations on the use of the Code § 642(c) charitable deduction, see fns. 2567-2568 in part II.J.4.c Charitable Distributions.

Some of the interplay between entities and trusts is described in parts III.A.4 Trust Accounting Income Regarding Business Interests and III.F.2 Trust Accounting and Taxation.

Also consider what happens when a trust holds only illiquid business assets and the trust needs to pay the trustee fee. Generally, one-half of trustee fees and certain other administrative expenses is allocated to income and one-half to principal.[2653] Using the trust's income to pay trustee fees, etc. attributable to would be problematic. Consider:

- Draft into the trust agreement language flexible enough to opt out of this general rule.[2654]

- Consider exercising a power to adjust, reclassifying some of the entity's distributions from income to principal, if the income that the business generates after the adjustment fairly balances the interests of the income beneficiary and remaindermen.[2655]

- Consider that the trustee might not have any significant activities directly on behalf of the trust and might instead spend most of his or her time running the business entity. This would especially be true if the entity was formed to hold investment assets. Perhaps the business entity should pick up a large majority of the burden of compensating the trustee, so that the above two recommendations are more palatable?

- Have the entity make noncash distributions, which generally are treated as principal.[2656] The trust can then sell those assets and use the proceeds to pay trustee fees. Note that a distribution of property is a recognition event for corporations[2657] and might be a recognition event for partnerships,[2658] so consider distributing high basis assets (which the entity might need to purchase).

Also consider whether the trustee needs to sell part of the unmarketable asset or planning to avoid this issue.[2659]

II.J.5.b. Uniform Fiduciary Income & Principal Act (UFIPA)

II.J.5.b.i. General Ideas in UFIPA

A fiduciary determines trust accounting income by analyzing the character of the trust's receipts and disbursements, which are not necessarily tied to the trust's taxable income. This part II.J.5.b refers to trusts and trustees as a shorthand for any type of fiduciary arrangement (including an estate) or fiduciary (including a personal representative/executor; UFIPA (see below) section 103 determines the scope and section 102 provides definitions of "fiduciary" and "terms of the trust" refer to other trust-like arrangements (including life estates) to which this discussion applies.

At its July 2018 annual meeting, the Uniform Law Commission approved the Uniform Fiduciary Income & Principal Act (UFIPA). The drafting committee chair was Turney Berry; the "reporter" who drafted the results of the committee's decisions was Ron Aucutt; and, as an ACTEC observer, I had significant input into the process.

UFIPA re-wrote the Uniform Principal & Income Act ("UPIA" in this part II.J.5.b), the 2008 limited changes to which I served as the reporter.

In those states that adopt UFIPA/UPIA (the "Act" in this part II.J.5.b), the Act serves as rules that apply if and to the extent that the governing instrument does not provide different results ("default rules in this part II.J.5.b). UFIPA § 201(a) provides:[2660]

> In making an allocation or determination exercising discretion under this [act], a fiduciary shall:
>
> (1) act in good faith, based on what is fair and reasonable to all the beneficiaries;
>
> (2) administer a trust or estate impartially, except to the extent terms of the trust manifest an intent that the fiduciary shall or may favor one more beneficiaries;
>
> (3) administer the trust or estate in accordance with the terms of the trust, even if there is a different provision in this [act]; and
>
> (4) administer the trust or estate in accordance with this [act], except to extent the terms of the trust provide otherwise or authorize the fiduciary to determine otherwise.

Although the terms of a trust and UFIPA describe what happens under state law, the tax laws might not respect a provision that strays too far from traditional fiduciary accounting income (FAI) principles.[2661]

II.J.5.b.ii. Power to Adjust or Convert to/from a Unitrust

Mandatory income trusts can cause conflicts between the income beneficiary, who tends to want the trustee to invest to generate current income, and the remaindermen, who tend to want the trustee to invest to generate long-term growth in principal. However, investing for long-term

[2660] For UPIA's counterpart, see fn 2762 in part II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law.
[2661] See part II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law.

growth may increase long-term income, so all parties may benefit from investing for growth – especially if the trustee can count some of this growth as income.

UFIPA recognizes this solution by providing a power to adjust (see part II.J.5.b.ii.(a)) or to convert to/from a unitrust (see part II.J.5.b.ii.(b) Unitrust).

II.J.5.b.ii.(a). Power to Adjust

The power to adjust authorizes the trustee to divide the trust's total realized return, meaning income and realized gains, between income and principal. For example, if a reasonable income distribution rate is 3% and the total realized return is 8%, but traditional income included in the total realized return is only 2%, then the trustee would exercise the power to adjust by allocating 3% of the total realized return, consisting of 2% traditional income distribution rate and 1% from the realized gains. In other words, capital gains comprising 1% of the total return would be reallocated from trust accounting principal to trust accounting income. If desirable, the trustee would then be able to include that reallocated 1% capital gain to distributable net income (DNI), so that the income beneficiary would pay tax at his or her rates, rather than the capital gain possibly being taxed to the trust at its perhaps higher rates. See parts II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law and II.J.3.a Who Is Best Taxed on Gross Income.

Under UPIA, a trustee may adjust between principal and income to the extent the trustee considers necessary if:[2662]

- The trustee invests and manages trust assets as a prudent investor,
- The trust's terms describe the amount that may or must be distributed to a beneficiary by referring to the trust's income, and
- The trustee determines that the adjustment is necessary to fulfill the trustee's duty of impartiality between the beneficiaries.

The impartiality component recognizes that an income beneficiary would want the trustee to invest for income and the remaindermen want the trustee to invest for growth. A prudent investor would tend to invest for both income and growth and make fair distributions of total return to the income beneficiary. The power to adjust authorizes the trustee to invest for total return and allocate part of the growth component to the income beneficiary. If the trustee is actually distributing the capital gain to the income beneficiary as part of a fair sharing of the trust's total return, then it would seem fair to tax the income beneficiary on the capital gain that the income beneficiary receives. Depending on the overall situation, it might also be fair to include in that adjustment compensation for the taxes the income beneficiary pays on those capital gains.[2663] Often, the trustee couches the power to adjust in terms of a target percentage of the trust's value; however, the trustee might vary the target percentage as the trustee deems appropriate.

[2662] UPIA § 104(a).
[2663] See part II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the .

UPIA prescribes a number of the factors the trustee should consider[2664] and circumstances that limit or prevent the exercise of this power.[2665] Illinois has a more concise power to adjust that is in some ways more flexible and in some ways less flexible than UPIA.[2666]

Under UPIA, because the adjustment must be necessary to fulfill the trustee's duty of impartiality between the beneficiaries, presumably the power to adjust would not apply when the same standards apply to the distribution of income and principal.

However, UFIPA § 203(a) requires only that the trustee determine that "the exercise of the power to adjust will assist the fiduciary to administer the trust or estate impartially." Thus, UFIPA requires only that the power to adjust will be helpful, not necessary. UFIPA also clarifies that the trustee is not liable for failing to exercise the power[2667] and provides that the trustee is not liable for any decision regarding the power made in good faith.[2668] The fiduciary has wide latitude regarding the periods to which any such adjustment applies[2669] but is subject to reporting requirements.[2670]

In deciding whether and to what extent to exercise the power to adjust, a fiduciary must consider all factors the fiduciary considers relevant, including relevant factors in UFIPA § 201(e)

[2664] UPIA § 104(b).

[2665] UPIA § 104(c).

[2666] 760 ILCS 15/3(b)(2) authorizes the trustee to use discretion in allocating receipts to income or principal:

> if the trustee in the trustee's discretion determines that application of the provisions of this Act would result in a substantial inequity to either the income beneficiaries or the remaindermen, in accordance with what is reasonable and equitable in view of the interests of those entitled to income as well as those entitled to principal.

[2667] UFIPA § 203(b) provides:

> This section does not create a duty to exercise or consider the power to adjust under subsection (a) or to inform a beneficiary about the applicability of this section.

[2668] UFIPA § 203(c) provides:

> (c) A fiduciary that in good faith exercises or fails to exercise the power to adjust under subsection (a) is not liable to a person affected by the exercise or failure to exercise.

[2669] UFIPA § 203(j) provides:

> (j) The exercise of the power to adjust under subsection (a) in any accounting period may apply to the current period, the immediately preceding period, and one or more subsequent periods.

[2670] UFIPA § 203(k) requires a description of the exercise of the power to adjust to be:

> (1) included in a report, if any, sent to beneficiaries under [Uniform Trust Code Section 813(c)]; or
>
> (2) communicated at least annually to [the qualified beneficiaries determined under [Uniform Trust Code Section 103(13)], other than [the Attorney General]][all beneficiaries that receive or are entitled to receive income from the trust or would be entitled to receive a distribution of principal if the trust were terminated at the time the notice is sent, assuming no power of appointment is exercised].

and the application of UFIPA § 401(i),[2671] 408,[2672] or 413 (the latter being a general marital deduction savings clause).[2673]

UFIPA 201(e) provides factors a fiduciary must consider in deciding whether to exercise the power to adjust under UFIPA § 203, convert an income trust to a unitrust under UFIPA § 303(a)(1), change the percentage or method used to calculate a unitrust amount under UFIPA § 303(a)(2), or convert a unitrust to an income trust under UFIPA § 303(a)(3), all of which are exercisable "if the fiduciary determines the exercise of the power will assist the fiduciary to administer the trust or estate impartially."[2674] UFIPA § 201(e) provides the following factors:

(1) the terms of the trust;

(2) the nature, distribution standards, and expected duration of the trust;

(3) the effect of the allocation rules, including specific adjustments between income and principal, under Articles 4 through 7;

(4) the desirability of liquidity and regularity of income;

(5) the desirability of the preservation and appreciation of principal;

(6) the extent to which an asset is used or may be used by a beneficiary;

(7) the increase or decrease in the value of principal assets, reasonably determined by the fiduciary;

[2671] UFIPA § 401(i) provides:

> If a fiduciary receives additional information about the application of this section to an entity distribution after the fiduciary has paid part of the entity distribution to a beneficiary, the fiduciary is not required to change or recover the payment to the beneficiary but may consider that information in determining whether to exercise the power to adjust under Section 203.

[2672] UFIPA § 408 authorizes an independent fiduciary to ignore various insubstantial allocations to income (and allocate all to principal). Subsection (b) authorizes a fiduciary to presume an allocation is insubstantial if:

(1) the amount of the allocation would increase or decrease net income in an accounting period, as determined before the allocation, by less than 10 percent; and
(2) the asset producing the receipt to be allocated has a fair market value less than 10 percent of the total fair market value of the assets owned or held by the fiduciary at the beginning of the accounting period.

In addition to restrictions on exercising this power found within UFIPA § 408, UFIPA § 203(e) restricts the exercise of the UFIPA § 408 power; see fn 2675 and accompanying text.

[2673] UFIPA § 413, "Marital Deduction Property Not Productive of Income," provides:

> If a trust received property for which a gift or estate tax marital deduction was allowed and the settlor's spouse holds a mandatory income interest in the trust, the spouse may require the trustee to make property productive of income, convert property to property productive of income within a reasonable time, or exercise the power to adjust under Section 203, to the extent the trust assets otherwise do not provide the spouse with sufficient income from or use of the trust assets to qualify for the deduction. The trustee may decide which action or combination of actions to take.

[2674] UFIPA § 201(d).

(8) whether and to what extent the terms of the trust give the fiduciary power to accumulate income or invade principal or prohibit the fiduciary from accumulating income or invading principal;

(9) the extent to which the fiduciary has accumulated income or invaded principal in preceding accounting periods;

(10) the effect of current and reasonably expected economic conditions; and

(11) the reasonably expected tax consequences of the exercise of the power.

A fiduciary may not exercise the power to adjust:[2675]

(1) if the adjustment or determination would reduce the amount payable to a current income beneficiary from a trust that qualifies for a special tax benefit, except to the extent the adjustment is made to provide for a reasonable apportionment of the total return of the trust between the current income beneficiary and successor beneficiaries;

(2) if the adjustment or determination would change the amount payable to a beneficiary as a fixed annuity or a fixed fraction of the value of the trust assets under the terms of the trust;

(3) if the adjustment or determination would reduce an amount that is permanently set aside for a charitable purpose under the terms of the trust, unless both income and principal are set aside for the charitable purpose;

(4) if possessing or exercising the power would cause a person to be treated as the owner of all or part of the trust for federal income tax purposes;

(5) if possessing or exercising the power would cause all or part of the value of the trust assets to be included in the gross estate of an individual for federal estate tax purposes;

(6) if possessing or exercising the power would cause an individual to be treated as making a gift for federal gift tax purposes;

(7) if the fiduciary is not an independent person;[2676]

[2675] UFIPA § 203(e), which also precludes determining that an allocation is insubstantial under UFIPA § 408.

[2676] [This footnote is not in UFIPA § 203(e)(7).] UFIPA § 102(10) defines an "independent person as a parson that is not:

(A) for a trust:

(i) [a qualified beneficiary determined under [Uniform Trust Code Section 103(13)]][a beneficiary that is a distributee or permissible distributee of trust income or principal or would be a distributee or permissible distributee of trust income or principal if either the trust or the interests of the distributees or permissible distributees of trust income or principal were terminated, assuming no power of appointment is exercised];

(ii) a settlor of the trust; or

(8) if the trust is irrevocable and provides for income to be paid to the settlor and possessing or exercising the power would cause the adjusted principal or income to be considered an available resource or available income under a public-benefit program; or

(9) if the trust is a unitrust under Article 3.

However, if (4), (5), (6), or (7) above applies to a fiduciary but do not limit a co-fiduciary, the co-fiduciary may exercise the power to adjust, unless the exercise of the power by the remaining co-fiduciary or co-fiduciaries is not permitted by the terms of a trust or applicable law.[2677] If there is no such co-fiduciary, the fiduciary may appoint such a co-fiduciary, which may be a special fiduciary with limited powers, and the appointed co-fiduciary may exercise the power to adjust, unless the appointment of a co-fiduciary or the exercise of the power by a co-fiduciary is not permitted by the terms of the trust or applicable law.[2678]

Furthermore, a fiduciary may release or delegate to a co-fiduciary[2679] the power to adjust if the fiduciary determines that possessing or exercising the power to adjust will or may cause a result described in (1) through (6) or (8) above; or deprive the trust of a tax benefit or impose a tax burden not described in (1) through (6) above.[2680]

For tax issues regarding the power to adjust, see part II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law.

Terms of a trust which deny or limit the power to adjust between income and principal do not affect the application of UFIPA § 203, unless the terms of the trust expressly deny or limit the power to adjust.[2681]

(iii) an individual whose legal obligation to support a beneficiary may be satisfied by a distribution from the trust;

(B) for an estate, a beneficiary;

(C) a spouse, parent, brother, sister, or issue of an individual described in subparagraph (A) or (B);

(D) a corporation, partnership, limited liability company, or other entity in which persons described in subparagraphs (A) through (C), in the aggregate, have voting control; or

(E) an employee of a person described in subparagraph (A), (B), (C), or (D).

[2677] UFIPA § 203(f)(1).

[2678] UFIPA § 203(f)(2).

[2679] UFIPA § 203(h) provides that such a release or delegation to a co-fiduciary of the power to adjust:

(1) must be in a record;

(2) applies to the entire power to adjust under subsection (a), unless the release or delegation in the record provides a limitation, which may be a limitation to the power to adjust:

(A) from income to principal;

(B) from principal to income;

(C) for specified property; or

(D) in specified circumstances;

(3) for a delegation, may be modified by a re-delegation under this subsection by the co-fiduciary to which the delegation is made; and

(4) subject to paragraph (3), is permanent, unless the release or delegation in the record provides a specified period, including a period measured by the life of an individual or the lives of more than one individual.

[2680] UFIPA § 203(g).

[2681] UFIPA § 203(i).

II.J.5.b.ii.(b). Unitrust

UFIPA Article 3 provides for unitrusts. Part II.J.8.c.i.(c) Unitrust describes various tax issues relating to using unitrusts.

A "unitrust" is a trust for which net income is a unitrust amount.[2682] A "unitrust amount" means an amount computed by multiplying the trust's value by a determined percentage,[2683] the percentage being referred to as the "unitrust rate."[2684] Some tax laws prevent

The terms of a trust may provide that income must or may be calculated as a unitrust amount, in which case the trust is an "express unitrust."[2685] Otherwise, a fiduciary may convert an income trust to a unitrust if the fiduciary adopts a unitrust policy.[2686] A fiduciary may modify a unitrust policy[2687] or even convert a unitrust back to a trust that is not unitrust.[2688] In changing to or from or modifying a unitrust, a fiduciary must follow certain procedures and determine "that the action will assist the fiduciary to administer a trust impartially."[2689]

A fiduciary has no duty to take or consider any of these actions or to inform a beneficiary about the possibility of taking any of these actions.[2690] Furthermore, a fiduciary that in good faith takes or fails to take an action described above is not liable to a person affected by the action or inaction.[2691]

Of course,[2692] the terms of the trust may regulate or prohibit any of the above actions.[2693]

A unitrust policy must provide:

(1) the unitrust rate or the method for determining the unitrust rate,[2694]

[2682] UFIPA § 301(5).
[2683] UFIPA § 301(6).
[2684] UFIPA § 301(8).
[2685] UFIPA § 301(2).
[2686] UFIPA § 303(a)(1).
[2687] UFIPA § 303(a)(2).
[2688] UFIPA § 303(a)(3), which refers to an "income trust," which UFIPA § 301(3) defines as "a trust that is not a unitrust."
[2689] UFIPA § 303(b).
[2690] UFIPA § 302(e).
[2691] UFIPA § 302(f).
[2692] UFIPA § 201(a)(3) provides that a fiduciary shall "(3) administer the trust or estate in accordance with the terms of the trust, even if there is a different provision in [UFIPA]." Furthermore, UFIPA § 201(a)(4) requires a fiduciary to "administer the trust or estate in accordance with [UFIPA], except to the extent the terms of the trust provide otherwise or authorize the fiduciary to determine otherwise."
[2693] UFIPA § 302(a) provides that, except as provided in subsection (b), UFIPA Article 3 applies to:

(1) an income trust, unless the terms of the trust expressly prohibit use of this [article] by a specific reference to this [article] or an explicit expression of intent that net income not be calculated as a unitrust amount; and
(2) an express unitrust, except to the extent the terms of the trust explicitly:
   (A) prohibit use of this [article] by a specific reference to this [article];
   (B) prohibit conversion to an income trust; or
   (C) limit changes to the method of calculating the unitrust amount.

[2694] UFIPA § 305(b)(1), referring to UFIPA § 306.

(2) the method for determining the applicable value,[2695] and

(3) the application of certain mandatory or permissive rules.[2696]

A unitrust policy may:[2697]

(1) provide methods and standards for:

(A) determining the timing of distributions;

(B) making distributions in cash or in kind or partly in cash and partly in kind; or

(C) correcting an underpayment or overpayment to a beneficiary based on the unitrust amount if there is an error in calculating the unitrust amount;

(2) specify sources and the order of sources, including categories of income for federal income tax purposes, from which distributions of a unitrust amount are paid; or

(3) provide other standards and rules the fiduciary determines serve the interests of the beneficiaries.

UFIPA Article 3 does not apply to a trust described in Code § 170(f)(2)(B), 642(c)(5), 664(d), 2702(a)(3)(A)(ii) or (iii), or 2702(b).[2698] Also, if a trust qualifies for a special tax benefit or a fiduciary is not an independent person, then the unitrust rate must be 3%-5%, as well as other requirements.[2699] A "special tax benefit" includes the gift tax annual exclusion because the trust's income interest qualifies as a present interest in property;[2700] the trust is or was a QSST;[2701] a marital deduction trust;[2702] or a trust grandfathered from GST or a trust with an inclusion ratio less than one, in either case if needed to avoid possible GST tax.[2703] Whether a fiduciary in independent generally is based on whether that person is a settlor or a beneficiary or is related to either.[2704]

[2695] UFIPA § 305(b)(1), referring to UFIPA § 307.
[2696] UFIPA § 305(b)(3), referring to UFIPA §§ 306-309, including mandatory rules under UFIPA §§ 307(a) and 308(a) and optional rules to the extent the fiduciary adopts them, referring to UFIPA §§ 306, 307(b), 308(b), and 309(a).
[2697] UFIPA § 309(a).
[2698] UFIPA § 302(b).
[2699] UFIPA § 309(b).
[2700] UFIPA § 102(18)(A), referring to Code § 2503(b).
[2701] UFIPA § 102(18)(B). See part III.A.3.e.i QSSTs.
[2702] UFIPA § 102(18)(C), referring to an estate or gift tax marital deduction under Code § 2056 or 2523 for a transfer to a trust, which deduction depends or depended in whole or in part on the right of the settlor's spouse to receive the trust's net income.
[2703] UFIPA § 102(18)(D), (E).
[2704] UFIPA § 102(10) provides that an "independent person" is a person who is not:

(A) for a trust:

(i) [a qualified beneficiary determined under [Uniform Trust Code Section 103(13)]][a beneficiary that is a distributee or permissible distributee of trust income or principal or would be a distributee or permissible distributee of trust income or principal if either the trust or the interests of the distributees or permissible distributees of trust income or principal were terminated, assuming no power of appointment is exercised];

II.J.5.b.ii.(c). Comparing Power to Adjust to a Unitrust

Generally, a fiduciary exercises the power to adjust annually and the power to modify a unitrust only once or occasionally. Exercising a power to adjust generally is included in annual reports, whereas adopting, modifying, or revoking unitrust provisions requires specific notice to the beneficiaries.

However, UFIPA allows a power to adjust to apply to all future periods and also authorizes frequent changes to a unitrust policy, so the above generalization about frequency is not necessarily accurate.

Computing this average adds to the trustee's recordkeeping burden, although the calculation itself might or might not be simple. For a trust holding marketable securities, the calculation might not take very long. On the other hand, for a trust with closely-held business interests or real estate, the calculation might impose additional costs on the trust; in such a case, one might draft a trust applying the unitrust only to easy-to-value assets and using either more traditional principal and income concepts or the power to adjust for difficult-to-value assets.

Providing a fixed unitrust percentage allows the trustee to avoid fights with the income beneficiary and remaindermen over what percentage to use. However, it also can cause the trust to sell assets in a down year. For example, if the trust provides a 3% unitrust and interest and dividends are 2%, the trustee needs to raise the 1% difference by selling assets. That's fine when asset values increase, but it can cause the trust to be depleted if trust values have not increased, especially if the trust has several down years. Using a power to adjust, the trustee might distribute only interest and dividends in down years and distribute capital gains in up years, perhaps making extra distributions in up years to make up for decreased distributions in down years. The problem is that the income beneficiary might rely on a particular level of distributions, and distributing less in a down year might not be acceptable. Using a unitrust based on an average of the past few years' value would help smooth fluctuations, giving the beneficiary time to adjust spending habits when notified that values are down but that the decrease will be spread over time. When assets appreciate, the trustee might consider taking some of those gains and reserving them for down years, so that a unitrust will not have to sell assets in a down market.

Satisfying a unitrust with appreciated assets appears to be a deemed sale of those assets.[2705]

The first time a unitrust payment includes amounts in excess of trust accounting income, whether or not satisfied with appreciated assets, the trustee must make an irrevocable election

---

(ii) a settlor of the trust; or
(iii) an individual whose legal obligation to support a beneficiary may be satisfied by a distribution from the trust;
(B) for an estate, a beneficiary;
(C) a spouse, parent, brother, sister, or issue of an individual described in subparagraph (A) or (B);
(D) a corporation, partnership, limited liability company, or other entity in which persons described in subparagraphs (A) through (C), in the aggregate, have voting control; or
(E) an employee of a person described in subparagraph (A), (B), (C), or (D).

[2705] See part II.J.8.d.i Distribution in Kind - Generally, especially fns 2788-2789.

to treat that excess (to the extent required to satisfy the unitrust obligation) - in the current and all future years - as included in or excluded from DNI.[2706]

However, the trustee may each year separately elect to treat any distribution of capital gain pursuant to a power to adjust as included in or excluded from DNI.[2707]

Thus, to maximize income tax flexibility, I tend to prefer the power to adjust over a unitrust.

II.J.5.b.iii. Modifying a Mandatory Income Trust to Make It Discretionary Income

Modifying a mandatory income trust to allow the trustees to accumulate income and then require any accumulated income to be paid to the beneficiary's estate did not have any income, gift,[2708] or GST[2709] tax consequences.[2710] For further analysis of trust modifications, see part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting, which provides an overview and concludes with part II.J.18.f Commutation vs Mere Division.

II.J.5.b.iv. Income vs. Net Income

Although the tax laws use "income" when describing fiduciary accounting income, it must refer to "net income," given that each receipt and disbursement is allocated either to income or principal. For example, Reg. § 20.2056(b)-5(f)(1) requires that the surviving spouse be "entitled for life to ***all*** of the income" (emphasis added), and Reg. § 20.2056(b)-5(f)(3), (4) contemplate

---

[2706] See part II.J.8.c.i.(c) Unitrust, found in part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law.

[2707] See part II.J.8.c.i.(a) Power to Adjust, found in part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law.

[2708] Letter Ruling 201320004 reasoned:

> In this case, the income distribution provisions will be modified to give the trustees discretion to distribute income to the primary beneficiaries or to accumulate such income. However, the accumulated income will be included in each primary beneficiary's estate upon the death of the beneficiary. Accordingly, at the time of the modification, none of the income interest will be gratuitously transferred from the primary beneficiary to any other beneficiary of Trust. The beneficial interests in the modified Trust will be substantially similar to the interests prior to the modification. Accordingly, based upon the facts submitted and representations made, we conclude that the proposed modification to Trust will not cause any beneficiary of Trust to have made a gift that is subject to gift tax under § 2501.

[2709] Letter Ruling 201320004 reasoned:

> In this case, the proposed agreement to modify Trust provides that the trustees have no duty to distribute income annually to the primary beneficiary of each separate trust share but will have the discretion to pay or apply the income for the benefit of each beneficiary. In addition, the proposed agreement to modify Trust provides that any accumulated income not distributed prior to the death of the beneficiary will be paid and distributed to the estate of the deceased beneficiary. Accordingly, the accumulated income will be included in the beneficiary's gross estate for estate tax purposes and the beneficiary will be treated as the transferor of the accumulated income for GST tax purposes. The modification does not shift a beneficial interest in the trust to any beneficiary who occupies a lower generation (as defined in § 2651) than the person or persons who held the beneficial interest prior to the modification, and the modification does not extend the time for vesting of any beneficial interest in the trust beyond the period provided for in the original trust. Accordingly, based upon the facts submitted and the representations made, we conclude that the proposed agreement to modify Trust pursuant to Court Order will not cause Trust, as modified, to lose its GST exempt status as a result of allocating Settlor's GST exemption to Trust.

[2710] Letter Ruling 201320004.

an allocation of expenses to reduce the receipts of income, so Reg. § 20.2056(b)-5(f)(1) must mean "net income" when it says "income."

Nevertheless, below are some definitions.

Section 102 of the Uniform Fiduciary Income Principal Act (UFIPA (2018) includes:

> (9) "Income" means money or other property a fiduciary receives as current return from principal. The term includes a part of receipts from a sale, exchange, or liquidation of a principal asset, to the extent provided in [Article] 4.
>
> (10) "Income interest" means the right of a current income beneficiary to receive all or part of net income, whether the terms of the trust require the net income to be distributed or authorize the net income to be distributed in the fiduciary's discretion. The term includes the right of a current beneficiary to use property held by a fiduciary.
>
> (13) "Net income" means the total allocations during an accounting period to income under the terms of a trust and this [act] minus the disbursements during the period, other than distributions, allocated to income under the terms of the trust and this [act]. To the extent the trust is a unitrust under [Article] 3, the term means the unitrust amount determined under [Article] 3. The term includes an adjustment from principal to income under Section 203. The term does not include an adjustment from income to principal under Section 203.

Official Comments to UFIPA include:

> "**Net income**." "Net income" continues to be the term generally used in the 2018 Act to refer to what a current beneficiary must or may receive. This use is flexible enough to cover, for example, even a trust, or a special circumstance related to a trust, that requires or permits distributions of gross income, because "net income" is gross income (expressed as "the total allocations during an accounting period to income under the terms of a trust and this [act]") "minus the disbursements during the period, other than distributions, allocated to income under the terms of the trust and this [act]." To the extent the terms of a trust require or permit the distribution of gross income, there will necessarily be no "disbursements … allocated to income" – all such disbursement will necessarily be allocated to principal – and thus the definition will work even in that unusual case. In addition, the 2018 Act expands this definition to explicitly provide that in a unitrust, now provided for in new Article 3, "net income" is the unitrust amount, without deduction for any disbursements.

The Uniform Principal & Income Act defines "income" the same and in Section 102 provides:

> (8) "Net income" means the total receipts allocated to income during an accounting period minus the disbursements made from income during the period, plus or minus transfers under this [Act] to or from income during the period.

Official Comments to the Uniform Principal & Income Act include:

> "**Net income**." The reference to "transfers under this Act to or from income" means transfers made under Sections 104(a), 412(b), 502(b), 503(b), 504(a), and 506.

II.J.6. Income Allocation on Death of a Beneficiary

If income is required to be distributed currently to a beneficiary, by a trust for a taxable year which does not end with or within the last taxable year of a beneficiary (because of the beneficiary's death), the extent to which the income is included in the gross income of the beneficiary for the beneficiary's last taxable year or in the gross income of the beneficiary's estate is determined by the computations under Code § 652 for the taxable year of the trust in which his last taxable year ends.[2711] Consider whether income should be expressly payable or not payable to the beneficiary's estate.

If an amount is paid, credited, or required to be distributed by an estate or trust for a taxable year which does not end with or within the last taxable year of a beneficiary (because of the beneficiary's death), the extent to which the amount is included in the gross income of the beneficiary for his last taxable year or in the gross income of his estate is determined by the computations under Code § 662 for the taxable year of the estate or trust in which his last taxable year ends.[2712]

Both of these rules are subject to part II.J.9.a.ii Separate Share Rule.

II.J.7. Code § 645 Election to Treat a Revocable Trust as an Estate

An election under Code § 645, filing IRS Form 8855, causes a qualified revocable trust[2713] to be taxed as part of an estate. The form is due by the time of the first income tax return filed for the

[2711] Reg. § 1.652(c)-2, which further provides:

> Thus, the distributable net income of the taxable year of the trust determines the extent to which the income required to be distributed currently to the beneficiary is included in his gross income for his last taxable year or in the gross income of his estate. (Section 652(c) does not apply to such amounts.) The gross income for the last taxable year of a beneficiary on the cash basis includes only income actually distributed to the beneficiary before his death. Income required to be distributed, but in fact distributed to his estate, is included in the gross income of the estate as income in respect of a decedent under section 691. See paragraph (e) of § 1.663(c)-3 with respect to separate share treatment for the periods before and after the decedent's death. If the trust does not qualify as a simple trust for the taxable year of the trust in which the last taxable year of the beneficiary ends, see section 662(c) and § 1.662(c)-2.

[2712] Reg. § 1.662(c)-2, which further provides:

> Thus, the distributable net income and the amounts paid, credited, or required to be distributed for the taxable year of the estate or trust, determine the extent to which the amounts paid, credited, or required to be distributed to the beneficiary are included in his gross income for his last taxable year or in the gross income of his estate. (Section 662(c) does not apply to such amounts.) The gross income for the last taxable year of a beneficiary on the cash basis includes only income actually distributed to the beneficiary before his death. Income required to be distributed, but in fact distributed to his estate, is included in the gross income of the estate as income in respect of a decedent under section 691. See paragraph (e) of § 1.663(c)-3 with respect to separate share treatment for the periods before and after the death of a trust's beneficiary.

[2713] "Qualified revocable trust" means any trust treated under Code § 676 as owned by the decedent by reason of a power in the grantor, determined without regard to Code § 672(e). Code § 645(b)(1).

grantor's estate (or grantor's revocable trust, if no probate estate exists);[2714] there appears to be no relief for failing to meet that deadline, because the deadline is statutory.[2715]

An estate may elect to use a fiscal year,[2716] which can help shift income to the most suitable year, if the additional work in reconciling calendar year Forms 1099 can be justified; note that, if the estate holds a majority interest in a partnership, the partnership may be required to change to a fiscal year.[2717] Although that an estate might be able to elect a fiscal year on a late-filed return,[2718] an estate with a Code § 645 election requires a timely filing (including extensions).[2719]

[2714] Code § 645(c) provides a deadline of "not later than the time prescribed for filing the return of tax imposed by this chapter for the first taxable year of the estate (determined with regard to extensions)."
[2715] Letter Ruling 201314011 granted relief for late filing of Form 8939, which was due with the estate's first income tax return. The ruling noted:

> Estate did not make an effective election under § 645 to treat Trust as part of the estate However, Estate's first Form 1041, US Income Tax Return for Estates and Trusts, reported all of the income of Estate and Trust as if Estate had made an effective election under § 645, and set a fiscal tax year ending Date.

In granting the relief for late filing of Form 8939, the ruling held:

> This ruling is conditioned on the Estate and Trust filing amended returns consistent with their failure to make a timely and effective election under § 645.

[2716] Code § 441 generally allows the taxpayer to choose its taxable year, subject to certain limitations. Code § 644 requires trusts to use the calendar year, but estates are not so required.
[2717] Code § 706(b)(1)(B).
[2718] Reg. § 1.441-1(c)(1) provides:

> *In general*. Except as provided in paragraph (c)(2) of this section, a new taxpayer may adopt any taxable year that satisfies the requirements of section 441 and the regulations thereunder without the approval of the Commissioner. A taxable year of a new taxpayer is adopted by filing its first Federal income tax return using that taxable year. The filing of an application for automatic extension of time to file a Federal income tax return (*e.g.*, Form 7004, "Application for Automatic Extension of Time To File Corporation Income Tax Return"), the filing of an application for an employer identification number (*i.e.*, Form SS-4, "Application for Employer Identification Number"), or the payment of estimated taxes, for a particular taxable year do not constitute an adoption of that taxable year.

Although Reg. § 1.441-1(c)(2) provides exceptions, the only one of concern is that the taxpayer must keep books. Reg. § 1.441-1(c)(2)(ii) provides:

> *Taxpayers without books*. A taxpayer that must use a calendar year under section 441(g) and paragraph (f) of this section may not adopt a fiscal year without obtaining the approval of the Commissioner.

It has ben suggested that prior versions of this regulation required a timely return and that this requirement was dropped in regulations proposed in 2001 and finalized in 2002. REG-106917-99 and T.D. 8996.
[2719] Reg. § 1.645-1(c)(2)(i) provides:

> *Time and manner for filing the election*. If there is no executor for a related estate, an election to treat one or more QRTs of the decedent as an estate for purposes of subtitle A of the Internal Revenue Code is made by the trustees of each QRT joining in the election, by filing a properly completed election form, or in any other manner prescribed after December 24, 2002 by forms provided by the IRS, or by other published guidance for making the election. For the election to be valid, the election form must be filed not later than the time prescribed under section 6072 for filing the Form 1041 for the first taxable year of the trust, taking into account the trustee's election to treat the trust as an estate under section 645 (regardless of whether there is sufficient income to require the filing of that return). If an extension is granted for the filing of the Form 1041 for the first taxable year of the electing trust, the election form will be timely filed if it is filed by the time prescribed for filing the Form 1041 including the extension granted with respect to the filing of the Form 1041.

Among benefits are an unlimited charitable set-aside (which is not always beneficial)[2720] and UBTI not reducing the charitable deduction,[2721] deducting losses on funding pecuniary bequests, more favorable time deadlines for holding or making elections with respect to stock in an S corporation,[2722] and being able to deduct losses from certain active real estate rental.[2723] However, beware state income results – it might be easier for a state to claim jurisdiction over an estate than a trust, so making the Code § 645 election might convert a nonresident trust to a resident estate;[2724] note that this result might be better if the trust would be taxed in a high-tax state and the estate taxed in a low-or-no-tax state. Also, if the trust owns stock in an S corporation that makes material charitable contributions, an ESBT election may facilitate deducting the charitable contribution deduction.[2725]

This treatment expires on the "applicable date." If no estate tax return is required to be filed, the "applicable date" is two years after the date of the decedent's death;[2726] otherwise, it is six months after the date of the final determination of estate tax liability.[2727] Final determination of estate tax liability is the earliest of the following:[2728]

(A) The date that is six months after the issuance by the Internal Revenue Service of an estate tax closing letter, unless a claim for refund with respect to the estate tax is filed within twelve months after the issuance of the letter;

[2720] Code § 642(c)(1) and the regulations thereunder allow trusts to deduct gross income paid to charity during the taxable year and the following taxable year. Code § 642(c)(2) and the regulations thereunder (as well as Reg. § 1.645-1(e)(2)(i) and(e)(3)(i)) authorize estates to deduct gross income permanently set aside; however, contingent claims, regardless of size, might disallow the entire set-aside deduction. *Belmont v. Commissioner*, 144 T.C. No. 6 (2015). Reg. § 1.642(c)-2(d) provides, "No amount will be considered to be permanently set aside, or to be used, for a purpose described in paragraph (a) or (b)(1) of this section unless under the terms of the governing instrument and the circumstances of the particular case the possibility that the amount set aside, or to be used, will not be devoted to such purpose or use is so remote as to be negligible." *Estate of John D. DiMarco v. Commissioner*, T.C. Memo. 2015-184, citing *Belmont*, concerned with the uncertainty of administrative expenses in light of litigation, disallowed the charitable set-aside, holding, "By virtue of the fact that the settlements pertaining to designation of the beneficiaries and consequential legal and administrative expenses were not finalized until after the year at issue and the estate filed its income tax return, we find that the possibility that the funds would go exclusively to noncharitable beneficiaries was not so remote as to be negligible."

[2721] See part II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction, especially fn. 4939.

[2722] See the paragraph of text accompanying fns 6857-6858 in part III.B.2.j.ii.(c) Transfer of Shareholder's Entire Interest regarding allocation of K-1 income in the year of death. Fn 6858 cross-references an important footnote in part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation.

[2723] See part II.K.1.e.iv Active Rental Subject to AGI Limits, especially fn. 3237.

[2724] See part II.J.3.e.i Strategic State & Local Tax Issues re: Residence. For example, RSMo § 143.331 (http://www.moga.mo.gov/mostatutes/stathtml/14300003311.html) treats an estate as a resident merely if the decedent was domiciled in Missouri, whereas a trust is not a resident unless not only was the settlor a resident but also the trust has at least one income beneficiary who, on the last day of the taxable year, was a resident of Missouri.

[2725] See part II.Q.7.c.i.(a) Contribution Must Be Made from Gross Income, fn 4919 and the text preceding it.

[2726] Code § 645(b)(2)(A).

[2727] Code § 645(b)(2)(B).

[2728] Reg. § 1.645-1(f)(2)(ii).

(B) The date of a final disposition of a claim for refund, as defined in paragraph (f)(2)(iii) of this section, that resolves the liability for the estate tax, unless suit is instituted within six months after a final disposition of the claim;

(C) The date of execution of a settlement agreement with the Internal Revenue Service that determines the liability for the estate tax;

(D) The date of issuance of a decision, judgment, decree, or other order by a court of competent jurisdiction resolving the liability for the estate tax unless a notice of appeal or a petition for certiorari is filed within 90 days after the issuance of a decision, judgment, decree, or other order of a court; or

(E) The date of expiration of the period of limitations for assessment of the estate tax provided in section 6501.

The IRS might not issue a closing letter until the estate requests one, thereby extending the time that a Code § 645 might continue to apply under (A) above.[2729] Although Notice 2017-12 provides that an account transcript is the functional equivalent of a closing letter,[2730] it does not, however, state that the account transcript constitutes a "closing letter." The Notice still recognizes that a closing letter is a different procedure and does not expressly refer to Code § 645 or its regulations, so my position is that a transcript does not affect the period for the Code § 645 election. Thus, I view Notice 2017-12 as merely giving the executor the green light to make distributions without incurring personal liability re estate taxes. However, my view does not matter as much as the tax preparer's view, which is infinitely more important to the client than anything I might have to say! I think the lawyer and income tax return preparer should have this discussion and come to a mutual agreement. I am very confident in my view and believe the chance of IRS question it is quite slim, but consider mentioning to the client that one cannot guarantee the outcome. The main issue of consequence may be the timing of an ESBT election, and I would not take any risks whatsoever for that, because more important than the opinion of anyone described above would be the opinion of a strategic buyer's tax advisor, and nobody can predict that person's view.[2731]

After receiving a closing letter, the estate might try to extend the Code § 645 election by filing a claim for refund for expenses in administering the Code § 6166 election.[2732] Contrast this to an estate, for which Reg. § 1.641(b)-3(a) discusses whether administration is unduly prolonged:[2733]

[2729] See fn. 7181, found in part III.B.5.e.iv.(g).
[2730] For more about Notice 2017-12, see fn 7181 in part III.B.5.e.iv.(g) How to Avoid the Pitfalls of the Estate Tax Lien.
[2731] As to this ESBT issue, see part III.A.3.a Wholly Owned Grantor Trusts – How to Qualify, Risks, and Protective Measures, and be sure to read the various subparts under it.
[2732] Reg. § 1.645-1(f)(2)(ii). Rev. Rul. 76-23 held that, "where the sole purpose for retaining stock of a small business corporation in an estate of a deceased shareholder is to facilitate the payment of the estate tax under section 6166 of the Code, the administration of the estate will not be considered unreasonably prolonged for purposes of section 641(a)(3), and thus the estate will continue to be an eligible shareholder within the meaning of section 1371(a) for the period during which the estate complies with the provisions of section 6166." [Note that Subchapter S was overhauled for taxable years beginning after 12/31/82.]
[2733] I have been told that *Old Virginia Brock Co. Inc. v. Commissioner*, 367 F.2d 276 (4th Cir. 1966), found ownership of the S corporation's stock to be by a testamentary trust rather than the purported estate, and

> The income of an estate of a deceased person is that which is received by the estate during the period of administration or settlement. The period of administration or settlement is the period actually required by the administrator or executor to perform the ordinary duties of administration, such as the collection of assets and the payment of debts, taxes, legacies, and bequests, whether the period required is longer or shorter than the period specified under the applicable local law for the settlement of estates. For example, where an executor who is also named as trustee under a will fails to obtain his discharge as executor, the period of administration continues only until the duties of administration are complete and he actually assumes his duties as trustee, whether or not pursuant to a court order. However, the period of administration of an estate cannot be unduly prolonged. If the administration of an estate is unreasonably prolonged, the estate is considered terminated for Federal income tax purposes after the expiration of a reasonable period for the performance by the executor of all the duties of administration. Further, an estate will be considered as terminated when all the assets have been distributed except for a reasonable amount which is set aside in good faith for the payment of unascertained or contingent liabilities and expenses (not including a claim by a beneficiary in the capacity of beneficiary). Notwithstanding the above, if the estate has joined in making a valid election under section 645 to treat a qualified revocable trust, as defined under section 645(b)(1), as part of the estate, the estate shall not terminate under this paragraph prior to the termination of the section 645 election period. See section 645 and the regulations thereunder for rules regarding the termination of the section 645 election period.

Reg. § 601.6109-1(a)(4), "Taxpayer identification number to be used by a trust upon termination of a section 645 election," provides:[2734]

> (i) *If there is an executor*. Upon the termination of the section 645 election period, if there is an executor, the trustee of the former electing trust may need to obtain a taxpayer identification number. If § 1.645-1(g) of this chapter regarding the appointment of an executor after a section 645 election is made applies to the electing trust, the electing trust must obtain a new TIN upon termination of the election period. See the instructions to the Form 1041 for whether a new taxpayer identification number is required for other former electing trusts.
>
> (ii) *If there is no executor*. Upon termination of the section 645 election period, if there is no executor, the trustee of the former electing trust must obtain a new taxpayer identification number.
>
> (iii) *Requirement to provide taxpayer identification number to payors*. If the trustee is required to obtain a new taxpayer identification number for a former electing trust pursuant to this paragraph (a)(4), or pursuant to the instructions to the Form 1041, the trustee must furnish all payors of the trust with a completed Form W-9 or acceptable substitute Form W-9 signed under penalties of perjury by the trustee

to also review *Hargis' Estate v. Commissioner*, 19 T.C. 842 (1953); *Estate of Farrier v. Commissioner*, 15 T.C. 277 (1950); *Roebling v. Commissioner*, 18 T.C. 788 (1952); *Miller v. Commissioner*, 39 T.C. 940 (1963); and *Maresca Trust v. Commissioner*, T.C. Memo 1983-501.

[2734] Reg. § 301.6109-1(a)(5), "Persons treated as payors," provides:

> For purposes of paragraphs (a)(2), (3), and (4) of this section, a payor is a person described in § 1.671-4(b)(4) of this chapter.

Reg. § 1.671-4(b)(4) is found in part III.B.2.e.i Grantor Trust Treatment During the Grantor's Life.

providing each payor with the name of the trust, the new taxpayer identification number, and the address of the trustee.

II.J.8. Allocating Capital Gain to Distributable Net Income (DNI)

Although the discussion below generally refers to trusts, generally it applies to estates as well. If a trustee has discretion to make an election regarding that trust, the election does not affect the choices available regarding other trusts the trustee manages.[2735]

II.J.8.a. Capital Gain Constitutes DNI Unless Excluded

Taxable income is DNI unless expressly excluded.[2736]

Code § 643(a)(3) provides:[2737]

> *Capital gains and losses*. Gains from the sale or exchange of capital assets shall be excluded to the extent that such gains are allocated to corpus and are not (A) paid, credited, or required to be distributed to any beneficiary during the taxable year, or (B) paid, permanently set aside, or to be used for the purposes specified in section 642(c).

Thus, to be excluded from the income of a domestic trust,[2738] the gains must:

- Arise from the sale or exchange of capital assets,
- Be allocated to corpus, and
- Not be actually or deemed to be distributed.

The rest of this part II.J.8.a Capital Gain Constitutes DNI Unless Excluded focuses on the first two prongs.

II.J.8.a.i. Whether the Capital Gain Is from the Sale or Exchange of a Capital Asset

Only gains from the sale of capital assets are ordinarily excluded from DNI.[2739]

For example, "property, used in his trade or business, of a character which is subject to the allowance for depreciation provided in section 167, or real property used in his trade or

---

[2735] Reg. § 1.643(a)-3(e), Example (14).

[2736] Code § 643(a) provides:

> For purposes of this part, the term "distributable net income" means, with respect to any taxable year, the taxable income of the estate or trust computed with the following modifications….

[2737] Code § 643(a)(3) further provides:

> Losses from the sale or exchange of capital assets shall be excluded, except to the extent such losses are taken into account in determining the amount of gains from the sale or exchange of capital assets which are paid, credited, or required to be distributed to any beneficiary during the taxable year. The exclusion under section 1202 shall not be taken into account.

[2738] Code § 643(a)(6)(C) provides:

> Paragraph (3) shall not apply to a foreign trust. In the case of such a trust, there shall be included gains from the sale or exchange of capital assets, reduced by losses from such sales or exchanges to the extent such losses do not exceed gains from such sales or exchanges.

[2739] Code § 643(a)(3); Reg. § 1.643(a)-3(a).

business" is not a capital asset.[2740] Therefore, the sale of such property would constitute DNI, although it would not constitute trust accounting income.[2741] Whether other real estate is a capital asset depends on various facts.[2742]

However, "any recognized gain on the sale or exchange of property used in the trade or business" often receives capital gain treatment[2743] to the extent it does not constitute certain depreciation recapture.[2744] Goodwill that has not been amortized is a capital asset, but goodwill that is being amortized is not a capital asset.[2745] Thus, because such assets are not capital assets, such capital gains generally would be included in DNI.

II.J.8.a.ii. Whether the Gain from the Sale or Exchange of a Capital Asset Is Allocated to Corpus

I am unaware of any authority defining "allocated to corpus" as used in Code § 643(a)(3). Presumably it means receipts by the trust that are allocated to principal.

Does the statute mean that capital gain are automatically included in DNI unless they are affirmatively allocated to principal and certain other conditions exist? Reg. § 1.643(a)-3(a) might overrule that requirement, providing (highlighting added):

> *In general*. Except as provided in § 1.643(a)-6 and paragraph (b) of this section, gains from the sale or exchange of capital assets are ordinarily excluded from distributable net income and are not ordinarily considered as paid, credited, or required to be distributed to any beneficiary.

This regulation essentially has three parts:

- Reg. § 1.643(a)-6 deals with foreign trusts.

- Reg. § 1.643(a)-3(b) explains when capital gains from the sale or exchange of an asset are included in DNI and does not include a requirement that the capital gain be allocated to

[2742] See part II.G.26.c Future Development of Real Estate.
[2743] Code § 1231(a)(3)(A)(i). See part II.G.6 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business.
[2744] Depreciation recapture on the sale of tangible personal property is taxed as ordinary income; see fn. 1494. Depreciation recapture on the sale of real property tends to be taxed as a capital gain but at a higher rate; see fn. 1495. Note that cost segregation studies might break out building components as tangible personal property, so be sure to ask about this possibility when advising on the sale of a building. For various tips under regulations that applied starting in 2014, see Wood and Abdoo, "Applying the Final Tangible Property Regulations to Tenant Fit-Ups," *TM Real Estate Journal* (BNA) (9/2/2015); Atkinson and Afeman (KPMG), "The Tangible Property Regulations: Considerations For the Real Estate Industry," *TM Memorandum* (BNA) (9/7/2015). In October 2016, the IRS made major revisions to its Cost Segregation Audit Techniques Guide, found at https://www.irs.gov/businesses/cost-segregation-audit-techniques-guide-table-of-contents.
[2745] Letter Ruling 200243002. For more discussion of goodwill, see fns. 1978, 4097, and 4137 (especially the latter).

principal.[2746] In fact, one of the prongs discusses the treatment when capital gains are allocated to income.[2747]

- Depending on the meaning one gives to "ordinarily," this regulation might dispense with the statutory requirement that capital gains be allocated to corpus. The regulation does not explain when it says "ordinarily" what the exceptions might be, other than Reg. §§ 1.643(a)-6 and 1.643(a)-3(b). There would appear to be substantial authority for saying that an affirmative allocation of capital gains to principal is or is not required.

This issue seems to be most important for the trust's gross income that does not take the form of receipts of cash or other property. For example, a trust might invest in a partnership, S corporation, or other flow-through entity that does not distribute all of its taxable income. How should one treat capital gain from a flow-through entity's sale of a capital asset, when the entity distributes less than all of its taxable income? Should the undistributed capital gain be included in DNI?

- With respect to the accumulated capital gain, the trust has no receipts and therefore is not allocated to corpus. Arguably, the capital gain is not excluded from DNI and therefore constitutes DNI.

- On the other hand, the accumulated capital gain benefits the trust's corpus. Should it be treated as if it had been allocated to corpus? In that case, should it be trapped inside the trust, given that it was accumulated inside the entity and not distributed to the beneficiary?

- Given this uncertainty, would the trustee have discretion to take a different position each year? In Reg. § 1.643(a)-3(b), the Treasury generally agreed that the trustee would not be required to take a consistent position year-by-year, except for capital gain allocated to corpus and treated consistently by the fiduciary on the trust's books, records, and tax returns as part of a distribution to a beneficiary. Given that this gross income was not allocated corpus (because it was never physically received), perhaps the trustee has discretion to vary the treatment from year to year? Another approach might be to say that, because the undistributed capital gain was not allocated to principal, the regulations might presume that the undistributed capital gain is allocated to income and can be included in DNI inconsistently from year to year under Reg. § 1.643(a)-3(b)(1).

If all of a flow-through entity's K-1 items taxable to the trust are included in DNI, then part II.J.8.c Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal might cause ordinary income to be trapped at the trust level if the flow-through entity distributes cash in an amount less than all of these K-1 items; see part II.J.8.f Consequences of Allocating Capital Gain to DNI. In light of the consequences described there, the most taxpayer-favorable reading may be that capital gain is ordinarily excluded from DNI.

I leave it to the reader to decide which approach is "better" or perhaps to make that decision on a trust-by-trust basis.

[2746] See part II.J.8.c Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal, which quotes the regulation.
[2747] See part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law and the various subparts thereunder.

For more on using flow-through entities, see part II.J.8.e Partnerships and S corporations Carry Out Income and Capital Gain to Beneficiaries.

II.J.8.b. Should Capital Gain Be Allocated to DNI?

Often beneficiaries have income below the thresholds that cause the 3.8% tax and the additional 5% capital gain tax to be incurred, whereas trusts start paying those taxes at relatively modest income levels. Therefore, distributing capital gains to beneficiaries might be beneficial – at least from an income tax viewpoint.

Consider various factors described in part II.J.3 Strategic Fiduciary Income Tax Planning.

II.J.8.c. Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal

Generally, gains from the sale or exchange of capital assets, net of losses,[2748] are excluded from distributable net income (DNI).[2749] But that statement belies the flexibility we are about to see.

Reg. § 1.643(a)-3(b) provides:

> *Capital gains included in distributable net income*. Gains from the sale or exchange of capital assets are included in distributable net income to the extent they are, pursuant to the terms of the governing instrument and applicable local law, or pursuant to a reasonable and impartial exercise of discretion by the fiduciary (in accordance with a power granted to the fiduciary by applicable local law or by the governing instrument if not prohibited by applicable local law) -
>
> (1) Allocated to income (but if income under the state statute is defined as, or consists of, a unitrust amount, a discretionary power to allocate gains to income must also be exercised consistently and the amount so allocated may not be greater than the excess of the unitrust amount over the amount of distributable net income determined without regard to this subparagraph § 1.643(a)-3(b));
>
> (2) Allocated to corpus but treated consistently by the fiduciary on the trust's books, records, and tax returns as part of a distribution to a beneficiary; or

[2748] Reg. § 1.643(a)-3(d) provides:

> *Capital losses*. Losses from the sale or exchange of capital assets shall first be netted at the trust level against any gains from the sale or exchange of capital assets, except for a capital gain that is utilized under paragraph (b)(3) of this section in determining the amount that is distributed or required to be distributed to a particular beneficiary. See § 1.642(h)-1 with respect to capital loss carryovers in the year of final termination of an estate or trust.

See part II.J.3.i Planning for Excess Losses.

[2749] Reg. § 1.643(a)-1(a) provides:

> *In general*. Except as provided in § 1.643(a)-6 and paragraph (b) of this section, gains from the sale or exchange of capital assets are ordinarily excluded from distributable net income and are not ordinarily considered as paid, credited, or required to be distributed to any beneficiary.

Reg. § 1.643(a)-6 refers to DNI of a foreign trust (as defined in Code § 7701(a)(31)).

(3) Allocated to corpus but actually distributed to the beneficiary or utilized by the fiduciary in determining the amount that is distributed or required to be distributed to a beneficiary.

Note the word "or" after paragraph (2) above. That indicates capital gains are included in DNI if and to the extent that any one or more of paragraph (1) (the "Income Rule"), paragraph (2) (the "Consistent Principal Rule"), or paragraph (3) (the "Discretionary Principal Rule") applies. For more on the:

- Income Rule, see part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law
- Consistent Principal Rule, see part II.J.8.c.ii Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary
- Discretionary Principal Rule, see part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary.

Before its amendment by T.D. 9102 (12/30/2003), Reg. § 1.643(a)-3 made it more difficult to include capital gain in DNI.[2750]

II.J.8.c.i. Income Rule: Capital Gain Allocated to Income Under State Law

Most states have adopted the Uniform Principal and Income Act,[2751] which will be referred to at UPIA for the rest of this part II.J.8.c.i, or its replacement, which is described in part II.J.5.b Uniform Fiduciary Income & Principal Act (UFIPA).

Generally, any capital gain included as the distributive share of income from a partnership or S corporation and distributed from the entity to the trust will constitute income under the Act, making the rest of this part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI) be moot.[2752]

[2750] Former Reg. § 1.643(a)-3(a) provided:

> Except as provided in § 1.643(a)-6, gains from the sale or exchange of capital assets are ordinarily excluded from distributable net income, and are not ordinarily considered as paid, credited, or required to be distributed to any beneficiary unless they are:
> (1) Allocated to income under the terms of the governing instrument or local law by the generates fiduciary on its books or by notice to the beneficiary,
> (2) Allocated to corpus and actually distributed to beneficiaries during the taxable year, or
> (3) Utilized (pursuant to the terms of the governing instrument or the practice followed by the fiduciary) in determining the amount which is distributed or required to be distributed.
> However, if capital gains are paid, permanently set aside, or to be used for the purposes specified in section 642(c), so that a charitable deduction is allowed under that section in respect of the gains, they must be included in the computation of distributable net income.

See Zaritsky, Lane & Danforth, ¶3.03. Capital Gains and Losses, *Federal Income Taxation of Estates and Trusts* (WG&L).

[2751] See https://www.uniformlaws.org, with the 2008 amendments to the Uniform Principal & Income Act being referred to as the "Act" in the footnotes in this part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law. However, because the 2008 amendments changed only sections 409 and 505, generally a reference to the Act in this part is the same whether it is the 2000 version or 2008 version.

[2752] See part II.J.8.e Partnerships and S corporations Carry Out Income and Capital Gain to Beneficiaries.

Generally, the Act allocates capital gains to principal.[2753] The main exceptions are the power to adjust, unitrust distributions, and exceptions in the governing instrument; the power to adjust and power to convert to a unitrust followed adoption of the prudent investor rule.[2754] Following a discussion of each of these is a discussion of the respect fiduciary income tax law gives them.

II.J.8.c.i.(a). Power to Adjust

Capital gains may be reclassified as income if traditional trust accounting income principles cause insufficient receipts to be classified as income. See parts II.J.5.b.ii.(a) Power to Adjust.

II.J.8.c.i.(b). Possible Allocation to Income of Gain on Sale of Interest in Partnership or S corporation

It is not uncommon for partnerships and S corporations to reinvest part of their annual income; indeed, to facilitate growth or simply a stronger capital structure (which lenders might require), many distribute only enough to pay their owners' income taxes (commonly referred to as a "tax distribution") plus a modest bonus (referred to below as a "bonus distribution").

Taxes on this reinvested income are charged against the income of a trust that owns such an entity.[2755] This is the only practical solution to the trust's obligation to pay its taxes, because the taxing authorities' claims against the trustee are much more pressing than the beneficiaries' claims. (Note that the income beneficiary of a Qualified Subchapter S Trust pays this tax – part III.A.3.e QSSTs and ESBTs – which has an effect similar to charging the trust's income.)

The Uniform Principal and Income Act includes a remedy for the income beneficiary that had to pay the tax on the entity's accumulated income that has been inherently baked into principal. Section 506(a)(3) authorizes a fiduciary to "make adjustments between principal and income to offset the shifting of economic interests or tax benefits between income beneficiaries and remainder beneficiaries which arise from … the ownership by an estate or trust of an interest in an entity whose taxable income, whether or not distributed, is includable in the taxable income of the estate, trust, or a beneficiary." This specific provision supplements any power to adjust that might generally apply.[2756]

Thus, when an interest in a partnership or an S corporation is sold, the trustee should consider whether to allocate some of the sale proceeds to income. However, it's not at all obvious that the trustee should make an adjustment; consider that:

- The entity made distributions specifically to pay this tax, so the trust or income beneficiary was not really "out of pocket" for this tax.

- If the entity had been a C corporation, the entity would have paid the tax itself. Its dividend would have equaled the bonus distribution, and this issue would never have arisen.

- The true issue is whether the bonus distribution was sufficient. Was the decision to accumulate income fair – a sound exercise of the business judgment of those who run the entity? Did those who control the entity promise a make-up distribution at some point

[2753] Act § 401.
[2754] For an analysis of how these ideas interact, see Sager, "Litigation and the Total Return Trust," *ACTEC Journal*, vol. 35, no. 3, p. 206 (Winter 2009).
[2755] See part III.A.4 Trust Accounting Income Regarding Business Interests.
[2756] See part II.J.8.c.i.(a) Power to Adjust.

> because of a special project, or was the accumulation merely part of a solid plan to grow the business, which presumably would result in increased income and increased bonus distributions? Were those who control the entity running it just to benefit themselves (and, if owners, trying to extract more benefits as owners than the inactive owners received)? I have probably left out many other relevant considerations, but hopefully I have communicated why this decision is not easy.

See parts II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the Trust Accounting Rules and II.J.16 Fiduciary Income Taxation When Selling Interest in a Pass-Through Entity or When the Entity Sells Its Assets.

If the trustee is concerned that the income beneficiary might spend a perceived windfall unwisely, the trustee might consider using the power to adjust[2757] to spread distributions over an appropriate period of time. Such a spread over time might be more palatable if, instead of labelling the adjustment to sale proceeds as a tax reimbursement, the trustee labelled it as a make-up for insufficient bonus distributions, taking the position that future distributions to beneficiaries might be loosened because of a prior conservative distribution policy.[2758] The bonus distributions might have been sufficient from the viewpoint of what the entity should have distributed but might have been insufficient from the viewpoint of how much income the trustee should have tried to generate. As mentioned in part III.A.4.d.iv Advising Clients about the UPAIA § 505 Change and UFIPA § 506 (discussing conflicts with beneficiaries that might arise when an entity makes tax distributions but little or no bonus distributions), these issues have no easy answer.

See also part II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the Trust Accounting Rules.

II.J.8.c.i.(c). Unitrust

A unitrust is a trust that distributes fixed amounts, redetermined annually as a fixed percentage of the value of the trust's value, which value is redetermined annually but might be based on an average of values, such as the average value of the trust's assets for the past three years. See parts II.J.5.b.ii.(b) Unitrust and II.J.5.b.ii.(c) Comparing Power to Adjust to a Unitrust.

Reg. § 1.643(a)-3(e) provides the following examples regarding unitrusts:

> *Example (11)*. The applicable state statute provides that a trustee may make an election to pay an income beneficiary an amount equal to four percent of the fair market value of the trust assets, as determined at the beginning of each taxable year, in full satisfaction of that beneficiary's right to income. State statute also provides that this unitrust amount shall be considered paid first from ordinary and tax-exempt income, then from net short-

[2757] Part II.J.8.c.i.(a) Power to Adjust.

[2758] "Conservative" does not necessarily equate with "stingy." Paying fixed (or inflation-adjusted) amounts that exceed net cash income can cause a trust's net asset value to decline, causing future income to decline, or might simply cause the principal not to grow sufficiently, causing the remaindermen's interests not to keep up with inflation. Using the power to adjust to make up for peaks and valleys would seem wiser than paying fixed (or inflation-adjusted) amounts. Generally, trustees should fairly and impartially balance the beneficiaries' interests under the trust agreement and might consider additional communication to those currently receiving distributions about the peaks and valleys and provide to the beneficiaries (or encourage them to obtain) advice about how to manage these peaks and valleys.

term capital gain, then from net long-term capital gain, and finally from return of principal. Trust's governing instrument provides that A is to receive each year income as defined under state statute. Trustee makes the unitrust election under state statute. At the beginning of the taxable year, Trust assets are valued at $500,000. During the year, Trust receives $5,000 of dividend income and realizes $80,000 of net long-term gain from the sale of capital assets. Trustee distributes to A $20,000 (4% of $500,000) in satisfaction of A's right to income. Net long-term capital gain in the amount of $15,000 is allocated to income pursuant to the ordering rule of the state statute and is included in distributable net income for the taxable year.

> *Example (12)*. The facts are the same as in Example 11, except that neither state statute nor Trust's governing instrument has an ordering rule for the character of the unitrust amount, but leaves such a decision to the discretion of Trustee. Trustee intends to follow a regular practice of treating principal, other than capital gain, as distributed to the beneficiary to the extent that the unitrust amount exceeds Trust's ordinary and tax-exempt income. Trustee evidences this treatment by not including any capital gains in distributable net income on Trust's Federal income tax return so that the entire $80,000 capital gain is taxed to Trust. This treatment of the capital gains is a reasonable exercise of Trustee's discretion. In future years Trustee must consistently follow this treatment of not allocating realized capital gains to income.

> *Example (13)*. The facts are the same as in Example 11, except that neither state statutes nor Trust's governing instrument has an ordering rule for the character of the unitrust amount, but leaves such a decision to the discretion of Trustee. Trustee intends to follow a regular practice of treating net capital gains as distributed to the beneficiary to the extent the unitrust amount exceeds Trust's ordinary and tax-exempt income. Trustee evidences this treatment by including $15,000 of the capital gain in distributable net income on Trust's Federal income tax return. This treatment of the capital gains is a reasonable exercise of Trustee's discretion. In future years Trustee must consistently treat realized capital gain, if any, as distributed to the beneficiary to the extent that the unitrust amount exceeds ordinary and tax-exempt income.

A right to income expressed initially solely as a unitrust interest may qualify for the QTIP marital deduction.[2759]

[2759] Letter Ruling 201117005 approved a unitrust expressly authorized by state law:

> State Statute provides that the grantor of a trust may create an express total return unitrust which will become effective as provided in the trust document without requiring a conversion of an income trust to a total return unitrust under the provisions of State Statute. An express total return unitrust created by the grantor of the trust shall be treated as a unitrust under State Statute only if the terms of the trust document contain all of the following provisions: (a) that distributions from the trust will be unitrust amounts and the manner in which the unitrust amount will be calculated and the method in which the fair market value of the trust will be determined; (b) the percentage to be used to calculate the unitrust amount, provided the percentage used is not greater than 5 percent nor less than 3 percent; (c) the method to be used in determining the fair market value of the trust; and (d) which assets, if any, are to be excluded in determining the unitrust amount.

II.J.8.c.i.(d). Exceptions in the Governing Instrument

Although the Act provides general rules, it also allows trust agreements to override those rules:[2760]

> In allocating receipts and disbursements to or between principal and income, and with respect to any matter within the scope of [Articles] 2 and 3, a fiduciary:
>
> (1) shall administer a trust or estate in accordance with the terms of the trust or the will, even if there is a different provision in this [Act];
>
> (2) may administer a trust or estate by the exercise of a discretionary power of administration given to the fiduciary by the terms of the trust or the will, even if the exercise of the power produces a result different from a result required or permitted by this [Act];
>
> (3) shall administer a trust or estate in accordance with this [Act] if the terms of the trust or the will do not contain a different provision or do not give the fiduciary a discretionary power of administration; and
>
> (4) shall add a receipt or charge a disbursement to principal to the extent that the terms of the trust and this [Act] do not provide a rule for allocating the receipt or disbursement to or between principal and income.

II.J.8.c.i.(e). Fiduciary Income Tax Recognition of the Trust Agreement and State Law

Code § 643(b) generally defers to the trust agreement and applicable state law.[2761] The Uniform Principal and Income Act ("UPIA") and the Uniform Fiduciary Principal & Income Act ("UFIPA") authorizes the trust agreement to override the Act.[2762]

[2760] Act § 103(a).

[2761] Code § 643(b) provides:

> For purposes of this subpart and subparts B, C, and D, the term "income", when not preceded by the words "taxable", "distributable net", "undistributed net", or "gross", means the amount of income of the estate or trust for the taxable year determined under the terms of the governing instrument and applicable local law. Items of gross income constituting extraordinary dividends or taxable stock dividends which the fiduciary, acting in good faith, determines to be allocable to corpus under the terms of the governing instrument and applicable local law shall not be considered income.

[2762] Section 103(a) of UPIA provides:

> In allocating receipts and disbursements to or between principal and income, and with respect to any matter within the scope of [Articles] 2 and 3, a fiduciary:
>
> (1) shall administer a trust or estate in accordance with the terms of the trust or the will, even if there is a different provision in this [Act];
>
> (2) may administer a trust or estate by the exercise of a discretionary power of administration given to the fiduciary by the terms of the trust or the will, even if the exercise of the power produces a result different from a result required or permitted by this [Act];
>
> (3) shall administer a trust or estate in accordance with this [Act] if the terms of the trust or the will do not contain a different provision or do not give the fiduciary a discretionary power of administration; and

However, Reg. § 1.643(b)-1[2763] does not recognize trust agreements that depart too far from the usual rules:

> Trust provisions that depart fundamentally from traditional principles of income and principal will generally not be recognized. For example, if a trust instrument directs that all the trust income shall be paid to the income beneficiary but defines ordinary dividends and interest as principal, the trust will not be considered one that under its governing instrument is required to distribute all its income currently for purposes of section 642(b) (relating to the personal exemption) and section 651 (relating to simple trusts). Thus, items such as dividends, interest, and rents are generally allocated to income and proceeds from the sale or exchange of trust assets are generally allocated to principal.

Reg. § 1.643(b)-1 respects variations provided under applicable state law:

> However, an allocation of amounts between income and principal pursuant to applicable local law will be respected if local law provides for a reasonable apportionment between the income and remainder beneficiaries of the total return of the trust for the year, including ordinary and tax-exempt income, capital gains, and appreciation. For example, a state statute providing that income is a unitrust amount of no less than 3% and no more than 5% of the fair market value of the trust assets, whether determined annually or averaged on a multiple year basis, is a reasonable apportionment of the total return of the trust. Similarly, a state statute that permits the trustee to make adjustments between income and principal to fulfill the trustee's duty of impartiality between the income and remainder beneficiaries is generally a reasonable apportionment of the total return of the trust. Generally, these adjustments are permitted by state statutes when the trustee invests and manages the trust assets under the state's prudent investor standard, the trust describes the amount that may or must be distributed to a beneficiary by referring to the trust's income, and the trustee after applying the state statutory rules regarding the allocation of receipts and disbursements to income and principal, is unable to administer the trust impartially. Allocations pursuant to methods prescribed by such state statutes for apportioning the total return of a trust between income and principal will be respected regardless of whether the trust provides that the income must be distributed to one or more beneficiaries or may be accumulated in whole or in part, and regardless of which alternate permitted method is actually used, provided the trust complies with all requirements of the state statute for switching methods.[2764]

> (4) shall add a receipt or charge a disbursement to principal to the extent that the terms of the trust and this [Act] do not provide a rule for allocating the receipt or disbursement to or between principal and income.

For UFIPA's counterpart, UFIPA § 201(a), see text preceding the text accompanying fn 2661 in part II.J.5.b Uniform Fiduciary Income & Principal Act (UFIPA).

[2763] This version of the regulation applies to taxable years of trusts and estates ending after January 2, 2004.

[2764] The regulation sets forth parameters for switching methods:

> A switch between methods of determining trust income authorized by state statute will not constitute a recognition event for purposes of section 1001 and will not result in a taxable gift from the trust's grantor or any of the trust's beneficiaries. A switch to a method not specifically authorized by state statute, but valid under state law (including a switch via judicial decision or a binding non-judicial settlement) may constitute a recognition event to the trust or its beneficiaries for purposes of section 1001 and may result in taxable gifts from the trust's grantor and beneficiaries, based on the relevant facts and circumstances.

Circling back to the Act's authorizing trust agreements to depart from traditional principles, Reg. § 1.643(b)-1 concludes with:

> In addition, an allocation to income of all or a part of the gains from the sale or exchange of trust assets will generally be respected if the allocation is made either pursuant to the terms of the governing instrument and applicable local law, or pursuant to a reasonable and impartial exercise of a discretionary power granted to the fiduciary by applicable local law or by the governing instrument, if not prohibited by applicable local law.

For the "reasonable and impartial exercise" requirement in the context of the power to adjust, see part II.J.5.b.ii.(a) Power to Adjust.

I often use a clause providing that the trustee has wide discretion but must reasonably and fairly balance the interests of the income and remainder beneficiaries.[2765] That language comes from the marital deduction regulations.[2766] Generally, the trustee's authority to allocate between income and principal does not trigger grantor trust status,[2767] does not constitute a power of appointment,[2768] and does not have generation-skipping transfer tax implications.[2769] The trustee might want to consider providing accountings or other notices to the beneficiaries that would start running the statute of limitations for making a claim against the trustee so that the beneficiaries could not add up all of their alleged grievances and then pile this one on top of it, which procedure might help minimize any gift tax consequences to failing to make a claim.[2770]

How does one draw the line between what departs "fundamentally from traditional principles of income and principal" and what is "a reasonable and impartial exercise of a discretionary power granted to the fiduciary" under Reg. § 1.643(b)-1?

[2765] As with everything else, the reader must exercise independent legal judgment (or, if the reader is not an estate planning lawyer, retain one) before using the language reproduced below:

> The trustee is authorized to apportion any receipt or disbursement between principal and income, notwithstanding the apportionment that would apply under [applicable state law] apart from this provision; to determine the depletable, depreciable or amortizable interest of the principal and income in any property included among the trust estate subject to being depleted, depreciated or amortized, and to apportion the amount received from such property between principal and income; to maintain reasonable reserves for depletion, depreciation, amortization and obsolescence; to allocate to income or principal of the trust estate any gains or losses realized upon the sale or disposition of any part of the trust estate; to determine what part, if any, of the actual income received upon a wasting investment or upon any security purchased or acquired at a premium shall be returned and added to principal to prevent a diminution of principal upon exhaustion or maturity thereof; and to determine what payment, if any, should be made to any income beneficiary as compensation for losses of income due to the acquisition or retention of property returning no income or slight income; provided, however, that the trustee, in taking any action under this Section, must reasonably and fairly balance the interests of the income and remainder beneficiaries.

For an example of how the clause, "to determine what payment, if any, should be made to any income beneficiary as compensation for losses of income due to the acquisition or retention of property returning no income or slight income," can come in handy, see part II.J.16 Fiduciary Income Taxation When Selling Interest in a Pass-Through Entity or When the Entity Sells Its Assets, especially fn. 2933.

[2766] Reg. § 20.2056(b)-5(f)(1), which governs general power of appointment marital deduction trusts under Code § 2056(b)(5), looks to whether:

> the spouse is entitled to income as determined by applicable local law that provides for a reasonable apportionment between the income and remainder beneficiaries of the total return of the trust and that meets the requirements of § 1.643(b)-1 of this chapter.

Reg. § 20.2056(b)-5(f)(4) elaborates:

> Among the powers which if subject to reasonable limitations will not disqualify the interest passing in trust are the power to determine the allocation or apportionment of receipts and disbursements between income and corpus….

For QTIP (qualified terminable interest property) trusts, Reg. § 20.2056(b)-7(d)(1) provides:

> A power under applicable local law that permits the trustee to adjust between income and principal to fulfill the trustee's duty of impartiality between the income and remainder beneficiaries that meets the requirements of §1.643(b)-1 of this chapter will not be considered a power to appoint trust property to a person other than the surviving spouse.

Reg. § 20.2056(b)-7(d)(2) also circles back to the general power of appointment marital deduction rules:

> *Entitled for life to all income*. The principles of § 20.2056(b)-5(f), relating to whether the spouse is entitled for life to all of the income from the entire interest, or a specific portion of the entire

interest, apply in determining whether the surviving spouse is entitled for life to all of the income from the property regardless of whether the interest passing to the spouse is in trust.

[2767] Code § 674(b)(8); Reg. § 1.674(a)-1(b)(1)(iv).

[2768] Reg. §§ 20.2041-1(b)(1) (estate tax) and 25.2514-1(b)(1) (gift tax) provide:

> The mere power of management, investment, custody of assets, or the power to allocate receipts and disbursements as between income and principal, exercisable in a fiduciary capacity, whereby the holder has no power to enlarge or shift any of the beneficial interests therein except as an incidental consequence of the discharge of such fiduciary duties is not a power of appointment.

Although a trustee's allocations to income and principal ordinarily will not cause gift tax issues, other decisions that affect distributions might cause gift tax issues if the trustee is also a beneficiary. Reg. § 25.2511-1(g)(2) provides a safe harbor, which is reproduced in the text accompanying fn 2485 in part II.J.2.b **Trust** Provisions Authorizing Distributions. See also Reg. § 20.2041-1(c)(2) (exception to estate tax general power of appointment – see text accompanying fn 2124 in part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap).

See fn. 2538 for additional authority on ascertainable standards.

Letter Ruling 8908032 recognized that Reg. §§ 20.2041-1(b)(1) generally prevents administrative powers from creating a general power of appointment:

> …. Although the amount of income that A may receive each year is generally limited, the trust provides that any income from real estate must be distributed first and that all the income from real estate be distributed to A even if such distribution exceeds the annual limitation. Thus, if the trust had substantial income from real estate, it is possible for A to receive distributions in excess of the annual limitation imposed by the trust.
>
> Where the holder of a power is not completely free from legal control or restraint in the disposition of property, a power held by the holder would not be a general power of appointment. Such legal control or restraint exists when the holder is legally accountable for its exercise. fiduciary duties imposed by local law are always subject to the control of the courts and the holder is always under a legal duty to account. See *Security-Peoples Trust Company v. United States*, 238 F.Supp. 40 (W.D. Pa. 1965). The initial step in determining whether a decedent has a general power of appointment is to determine, in light of local law, the interest conveyed to the decedent under trust; *i.e.*, the extent to which consonant with testamentary trust provisions, the decedent could invade and consume the principal. See *Morgan v. Commissioner*, 309 U.S. 78 (1940).
>
> It is necessary to look to the law of State X to determine whether A has the power to alter the beneficial interest under the trust. If A appointed herself trustee, A, as the trustee, would have the authority under the trust to sell trust assets and to invest the proceeds in real estate. Thus, A could cause trust income from real estate to exceed the limitation set forth in the trust for income distributions from other sources and, consequently, increase the total income distributions to A. Such investment policy and actions by A as the trustee would result in a shift of the beneficial interest of the trust. However, A would not have complete freedom to set investment policy for the trust. The statutory law of State X requires that a trustee consider the relative interests of both income and remainder beneficiaries in determining the prudence of any investment and imposes a duty on the trustee to administer the trust with due regard to the respective interests of income beneficiaries and remainderpersons in accordance with the terms of the trust. In addition, the highest court in State X has addressed the responsibilities of the trustee and stated that:
>
> > It is the duty of the trustees to preserve the corpus of the trust for the remaindermen and to secure the usual rate of income upon safe investments for the life tenant, and to use a sound discretion in reference to each of those objectives. They cannot postpone the yielding of income for the increase of capital, nor select a wasting or hazardous investment for the sake of greater present income.
>
> *Congdon v. Congdon*, 160 Minn. 343, 200 N.W. 76 (1924).
>
> Moreover, *In re Clarke's Will*, 204 Minn. 574, 284 N.W. 876 (1939), addressed a situation where the trustee, who was also the income beneficiary, treated trust property incorrectly as "income" rather than "capital" and made erroneous distributions to herself. The court held that the trustee-

Presumably, the trustee should be on solid ground in allocating to income capital gains such that the total amount of all receipts allocated to income does not exceed 5%, given that the regulations expressly approve unitrusts in the 3%-5% range. The trusts should also be on solid ground in allocating to income capital gains generated by a partnership that the settlor intended to distribute to the income beneficiary.[2771]

Beyond that, it's a matter of facts and circumstances and judgment. However, Reg. § 1.643(a)-3(e), Example (4) respected a mandatory allocation of capital gain to income where a trust had $5,000 of dividends and $10,000 of capital gains, and the trustee distributed $17,000 to the beneficiary.

II.J.8.c.i.(f). Conclusion Regarding Allocating Capital Gain to Income

Reg. § 1.643(a)-3(b)(1) requires a consistent practice for unitrusts. Considering that the unitrust recipient is receiving cash and presumably would have the liquidity to pay tax on any capital gains distributed to the beneficiary, in many cases it would be fair to allocate capital gain to DNI to the extent that the unitrust amount exceeds the income that would apply under the Act's general rules. Given that one provides for a unitrust when tension between the income beneficiary and remaindermen might be high, the tension created by this tax issue would be high to the same degree. Consider providing a firm rule in the trust agreement regarding the allocation of capital gain to DNI. If one is concerned that shifting tax rates might create an unfair tax result, consider providing a clause reimbursing the unitrust beneficiary for taxes paid on the unitrust and on the reimbursement; this requires cooperation between the trustee's income tax preparer and the beneficiary's income tax preparer, but the calculation should be relatively mechanical.

For trusts that are not unitrusts, Reg. § 1.643(a)-3(b)(1) provides significant flexibility, allowing the trustee discretion whether to allocate capital gain to income for fiduciary accounting

---

> income beneficiary had a duty to distinguish between the rights of the life tenant and those of the remaindermen with meticulous care. The court found that, although there had been no intentional wrong, there was an invasion of the rights of the remaindermen by the trustee-income beneficiary that amounted to fraud, irrespective of intention.
>
> The law of State X clearly imposes a strong fiduciary duty on a trustee to protect the interests of all beneficiaries of the trust. While A, as the trustee, may invest trust assets in real estate that may produce sufficient income resulting in an increase in distributions to A, A cannot adopt an investment policy that would be detrimental to the interests of the remaindermen. Neither Trust 1 nor Trust 2 gives A, as the income beneficiary, any control over investment policy or income withdrawal. Due to the restrictions imposed by both the law of State X and the trust instruments, A does not have an unfettered right to change the interests of the beneficiaries.
>
> Accordingly, A's power to remove the current trustee and appoint anyone, including A, as the trustee is not a general power of appointment as described in section 2041 of the Code.

[2769] Reg. § 26.2601-1(b)(4)(i)(D)(2) provides:

> … administration of a trust in conformance with applicable local law that defines the term income as a unitrust amount (or permits a right to income to be satisfied by such an amount) or that permits the trustee to adjust between principal and income to fulfill the trustee's duty of impartiality between income and principal beneficiaries will not be considered to shift a beneficial interest in the trust, if applicable local law provides for a reasonable apportionment between the income and remainder beneficiaries of the total return of the trust and meets the requirements of § 1.643(b)-1 of this chapter.

[2770] See part II.J.4.j Helping the Trustee Provide Annual Notices to Beneficiaries to Reduce Exposure.

[2771] See fn. 2808.

purposes (if the trust agreement and state law permit) and also whether to include in DNI the capital gain that was allocated to income.

Consider the nuances for a mandatory income trust. Distributions must be made no later than 65 days after yearend to include capital gain in DNI in every other situation. In a mandatory income trust, a power to adjust might be able to retroactively include capital gain in income – perhaps as late as when the tax return is prepared. For how mandatory income trusts work, see part II.J.5 Mandatory Income Trusts. For limits on retroactivity, see part II.J.5.a Issues Arising with Mandatory Income Trusts.

II.J.8.c.ii. Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary

Reg. § 1.643(a)-3(e) helps guide our application of Reg. § 1.643(a)-3(b)(2):

> *Example (1)*. Under the terms of Trust's governing instrument, all income is to be paid to A for life. Trustee is given discretionary powers to invade principal for A's benefit and to deem discretionary distributions to be made from capital gains realized during the year. During Trust's first taxable year, Trust has $5,000 of dividend income and $10,000 of capital gain from the sale of securities. Pursuant to the terms of the governing instrument and applicable local law, Trustee allocates the $10,000 capital gain to principal. During the year, Trustee distributes to A $5,000, representing A's right to trust income. In addition, Trustee distributes to A $12,000, pursuant to the discretionary power to distribute principal. Trustee does not exercise the discretionary power to deem the discretionary distributions of principal as being paid from capital gains realized during the year. Therefore, the capital gains realized during the year are not included in distributable net income and the $10,000 of capital gain is taxed to the trust. In future years, Trustee must treat all discretionary distributions as not being made from any realized capital gains.
>
> *Example (2)*. The facts are the same as in Example 1, except that Trustee intends to follow a regular practice of treating discretionary distributions of principal as being paid first from any net capital gains realized by Trust during the year. Trustee evidences this treatment by including the $10,000 capital gain in distributable net income on Trust's federal income tax return so that it is taxed to A. This treatment of the capital gains is a reasonable exercise of Trustee's discretion. In future years Trustee must treat all discretionary distributions as being made first from any realized capital gains.
>
> *Example (3)*. The facts are the same as in Example 1, except that Trustee intends to follow a regular practice of treating discretionary distributions of principal as being paid from any net capital gains realized by Trust during the year from the sale of certain specified assets or a particular class of investments. This treatment of capital gains is a reasonable exercise of Trustee's discretion.

The all-or-nothing approach taken by Examples (1) and (2) is not very attractive, but we need to deal with it. Let's consider some fact patterns:

1. <u>The beneficiary needs regular annual distributions that cannot be made using a power to adjust</u>. Generally, distributions in excess of what can made using a power to adjust would not be sustainable. A power to adjust typically adjusts to a 3%-5% distribution, and most models suggest that distributions in excess of that will lead to a trust being depleted. Thus,

a more likely scenario is that a power to adjust is not available, because state law prevents using the power to adjust in particular situations (unless the trust agreement overrides it). In such a case, the beneficiary's federal and state/local income tax bracket for capital gains needs to be compared to the trust's federal and state/local income tax bracket for capital gains. Note that a nonresident trust would have a zero state/local income tax bracket, to the extent that the trust does not have income from a business sourced to the state/local jurisdiction.

2. The beneficiary's need for distributions in excess of income is sporadic. It's difficult to predict how the beneficiary's federal and state/local income tax bracket for capital gains compares to the trust's federal and state/local income tax bracket for capital gains, given that rates will change and the trust's and its beneficiaries' circumstances might change over time. In such a case, consider whether the distribution might be phrased as "allocated to corpus but actually distributed to the beneficiary or utilized by the fiduciary in determining the amount that is distributed or required to be distributed to a beneficiary." If that is likely to be the case, then consider not electing to carry out capital gain automatically under (b)(2) but rather deciding to rely on (b)(3), because (b)(3) is flexible whether to allocate capital gain to income, allowing the decision to made separately each year on a case-by-case basis.

Generally, trustees would not be likely to take advantage of the discretion that Example (3) provides to allocate to income only capital gain from the sale of certain specified assets or a particular class of investments, because such an election requires additional recordkeeping.

Some people point to the word "deem" in Example (1) and emphasize the need for such authority in the trust agreement or applicable state law. Uniform Trust Code § 816 generally authorizes trustees to make tax elections,[2772] so the authority to "deem" distributions to be capital gains is inherently authorized in UTC states, as well as any other state where a trustee generally has the authority to make tax elections.

II.J.8.c.iii. Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary

Reg. § 1.643(a)-3(b)(3) might seem confusing at first, but it actually has very practical use.

First, let's look at some examples that Reg. § 1.643(a)-3(e) provides:

> Example (5). The facts are the same as in Example 1, except that Trustee decides that discretionary distributions will be made only to the extent Trust has realized capital gains during the year and thus the discretionary distribution to A is $10,000, rather than $12,000. Because Trustee will use the amount of any realized capital gain to determine the amount of the discretionary distribution to the beneficiary, the $10,000 capital gain is included in Trust's distributable net income for the taxable year.
>
> *Example (6)*. Trust's assets consist of Blackacre and other property. Under the terms of Trust's governing instrument, Trustee is directed to hold Blackacre for ten years and

[2772] Paragraph (16) of that section authorizes the trustee to "exercise elections with respect to federal, state, and local taxes." The official Comment provides:

> Paragraph (16) authorizes a trustee to make elections with respect to taxes. The Uniform Trust Code leaves to other law the issue of whether the trustee, in making such elections, must make compensating adjustments in the beneficiaries' interests.

then sell it and distribute all the sales proceeds to A. Because Trustee uses the amount of the sales proceeds that includes any realized capital gain to determine the amount required to be distributed to A, any capital gain realized from the sale of Blackacre is included in Trust's distributable net income for the taxable year.

Although Reg. § 1.643(a)-3(b)(3) is viewed generally as discretionary, note that Example (6) is mandatory: if the trustee is required to distribute sale proceeds to a beneficiary, the capital gain from the sale is included in the DNI that the distribution carries out the beneficiary. Example (7) similarly requires all capital gain recognized in the trust's final taxable year to be included in the DNI that the distribution carries out the beneficiary.

The practical application is based on the ability to count as prior year distributions those distributions made in the first 65 days of the current year.[2773] For example, any distribution made on or before March 5, 2020 can be treated as a 2019 or 2020 distribution.[2774] This election applies to the greater of accounting income under Reg. § 1.643(b)-1 or DNI under Reg. §§ 1.643(a)-1 through 1.643(a)-7.[2775] By completing the line on the trust's income tax return, Form 1041, page 2, Part B, showing amounts (other than income required to be distributed currently) paid, credited, or otherwise required to be distributed and checking the Code § 663(b) box in "Other Information" at the bottom of Form 1041, page 2, the trustee decides how much of a current year distribution is allocated to the prior year; the balance would then be credited to the current year.[2776]

The practical application based on the 65-day rule would generally occur during February after the year ends and applies only if the trustee has discretion to distribute corpus.[2777] The regulations do not specify any particular trust records regarding the election, so do whatever seems best to evidence the intent. Perhaps the income tax return preparer emails the trustee recommending how much of a distribution be made to distribute income and capital gain under the 65-day rule (erring on the side of distributing too much), then the trustee makes the distribution, and the tax return carries through the intent. As long as the distribution is made timely, the tax return can treat none, part, or all of the distribution as a distribution of the taxable year's income. In a manner similar to Example (5), the trustee has referred to the capital gain itself in determining how much to distribute. Unlike Reg. § 1.643(a)-3(b)(2), Reg. § 1.643(a)-

[2773] Code § 663(b).
[2774] In a leap year, the deadline is March 5; in other years, the deadline in March 6.
[2775] Reg. § 1.663(b)-1(a)(2)(i).
[2776] Reg. § 1.663(b)-1(a)(2)(ii). The election may be made on an extended return but not on an amended return filed after the (extended) due date. Reg. § 1.663(b)-2(a)(1). If no return is required to be filed for the taxable year of the trust for which the election is made, the election shall be made in a statement filed with the internal revenue office (under Code § 6091 and the regulations thereunder) with which a return by such trust would be filed if such trust were required to file a return for such taxable year. Reg. § 1.663(b)-2(a)(2).
[2777] The authority to distribute principal for welfare would be helpful, but the trustee should not be a related or subordinate party. See Code § 2041(b)(1), absent the application of Code § 2041(b)(1)(A) and the other exceptions, combined with Rev. Rul. 95-58 and a variety of private letter rulings applying that Rev. Rul. to Code § 2041, found in fn. 6713. Alternatively, suppose the trustee has the authority to distribute under ascertainable standards, but the trustee has the discretion to consider or ignore the beneficiary's other resources. The trustee might have considered the other resources and taken a minimalist approach to distributions throughout the year; but, when doing 65-day-rule planning, the trustee might chooses to ignore other resources and take an expansive view of the authority to make distributions.

3(b)(3) allows one to carry out discretionary distributions of capital gain inconsistently from one year to another.

If the beneficiary does not require monthly or quarterly cash flow, the trustee can simply each February make a big distribution and apply it to the prior or current year for tax return preparation purposes. If the beneficiary does require monthly cash flow but is willing to accept informal constraints, the trustee makes the big distribution into an investment account that the beneficiary owns, and the account makes monthly transfers to the beneficiary's checking account. Obviously this would not work for a beneficiary who cannot exercise discipline, but there is a good segment of beneficiaries for whom it would work.

An alternative approach is to distribute an asset to a beneficiary before the asset is sold. Generally, the beneficiary will receive a carryover basis and then be taxed on the gain.[2778]

As with all tax planning, the strategies described in this part II.J.8.c.iii may be unavailable (based on the trust terms), inadvisable (based on sound financial planning), or stupid (giving money to a drug addict just to save taxes).

II.J.8.c.iv. Netting Capital Losses

Reg. § 1.643(a)-3(d), "Capital losses," provides:

> Losses from the sale or exchange of capital assets shall first be netted at the trust level against any gains from the sale or exchange of capital assets, except for a capital gain that is utilized under paragraph (b)(3) of this section in determining the amount that is distributed or required to be distributed to a particular beneficiary. See § 1.642(h)-1 with respect to capital loss carryovers in the year of final termination of an estate or trust.

Thus, if and to the extent that Reg. § 1.643(a)-3(b)(3) includes capital gains in DNI (see part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary), capital losses are not netted against such gains. The recipient beneficiaries report all such capital gains, and the capital losses remain in the trust.

However, note that Reg. § 1.643(a)-3(b)(3) has two elements: "actually distributed to the beneficiary," which would tend to require tracing except in the case of trust termination, or "utilized by the fiduciary in determining the amount that is distributed or required to be distributed to a beneficiary," in which case the trustee would have needed to consciously decide to refer to the capital gain when making the distribution.

Unless the trustee traces or decides to refer to the gross capital gain (instead of the net capital gain) when making the distribution, the loss would be offset under Reg. § 1.643(a)-3(b)(3). Alternatively, the trustee might not trace and not refer to capital gain but rather exercise the power to adjust, which would invoke Reg. § 1.643(a)-3(b)(1) (see part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law) and include an automatic offset.

[2778] Code § 643(e)(2).

II.J.8.c.v. Conclusions Regarding the Basic Framework on Allocating Capital Gains to DNI

Often, one cannot predict whether the combination of federal, state, and local income tax rates will be higher inside or outside of the trust.

Quite frankly, I keep changing my mind regarding the best income tax elections as I encounter new situations. If the document is flexible as to distributions and distributions are appropriate, then I would lean toward:

- Flexible language allowing the trustee to allocate capital gains to income, so long as the trustee must reasonably and fairly balance the interests of the income and remainder beneficiaries.

- Using the 65-day-rule to distribute large capital gains to the beneficiary as DNI.

- Electing not to establish a practice of carrying out capital gain to beneficiaries under Reg. § 1.643(a)-3(b)(2) unless it appears that the above two approaches will not suffice to minimize overall income taxes. However, it is not uncommon for me to decide that the above. two approaches will not suffice to minimize overall income taxes. On the other hand, if the situation involves enough money, the trustee can covert capital gain that would otherwise be trapped inside the trust to trust accounting income, using the tool described in part II.J.8.e Partnerships and S corporations Carry Out Income and Capital Gain to Beneficiaries.

Consider adding a withdrawal right of up to 5% of the trust's value. The beneficiary will be deemed to be the owner of the part that the beneficiary can withdraw and perhaps continue to be deemed the owner with respect to the lapsed portion. However, note that withdrawal rights can increase exposure to creditors to the extent of the withdrawal right and perhaps even after a lapse. For details on all of the ideas mentioned in this paragraph, see part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts. If one is concerned about the withdrawal right itself becoming a bad idea, consider using a provision along the following the lines:

> In addition to the distributions authorized by the preceding sentence, subject to the following sentence the trustee shall distribute to the beneficiary so much of the principal of the trust as the beneficiary, while at least __ years of age, may request once between February 23 and March 5 of every calendar year, on a noncumulative basis, up to five percent (5%) of the aggregate value, as of the time of such request by the beneficiary, of the principal of the trust. The trustee may, by instrument placed in the trust's records, provide that the preceding sentence shall not apply during any period (including the beneficiary's remaining life), which period shall begin no earlier than the January 1 following the date of the instrument.

This allows the trustee to turn off the withdrawal rights for any future year(s) without impeding the beneficiary's absolute right to withdraw during the current year.

II.J.8.c.vi. Fairness of Taxing Capital Gain to Beneficiaries; Need for Tax Distributions Here and Other Areas

Our income tax system taxes income to whoever receives it, subject to certain exceptions not relevant to this part II.J.8.c.vi. Therefore, it is fair to tax the beneficiaries.

However, when a distribution is made for a particular purpose and the money is spent, the beneficiary will get upset when handed a tax bill for which the beneficiary did not plan. Therefore, one might need to make a supplemental distribution to pay tax on the original distribution. The supplemental distribution would also need to be enough to pay tax on the supplemental distribution itself. This supplemental distribution is often referred to as "grossing up the distribution" to pay taxes.

This issue applies to more than just capital gains. Clients who leave residences in trust often wish to have the trust pay expenses that a life tenant would ordinarily pay. Distributions by the trust for those purposes run into the same problem – the money is spent for the intended purpose and not available to pay taxes. These distributions also need to be grossed up to pay taxes.

II.J.8.d. Distribution in Kind; Specific Bequests

II.J.8.d.i. Distribution in Kind - Generally

Except as provided below and except to the extent that it carries out DNI[2779] or constitutes a bequest of income,[2780] a distribution is a nontaxable gift[2781] (unless the recipient assumes liabilities, in which case it is taxed as a bargain sale).[2782]

When a trust distributes property to satisfy a pecuniary distribution[2783] (even if the amount is expressly authorized to be satisfied in cash or in kind),[2784] the trust recognizes gain on the

---

[2779] Reg. § 1.102-1(d).
[2780] Reg. §§ 1.102-1(b), (c) and 1.663(a)-1(b)(2)(i).
[2781] Reg. § 1.102-1(a), (d).
[2782] See part III.B.1.c.i Gifts with Consideration – Bargain Sales.
[2783] Similar logic applies to satisfying a debt. Citing Rev. Rul. 66-207 (fn 2786), Rev. Rul. 74-178 held:

> In the instant case the fair market value of the shares of stock at the time such stock was transferred to the creditor is equal to the amount of the claim satisfied ($8,000). However, since the executor did not elect the alternate valuation date, the estate's basis in the shares transferred is the fair market value of the shares at the date of the decedent's death ($7,000). Accordingly, it is held that upon such transfer the estate realized a gain of $1,000, which is the excess of the amount of the claim satisfied by the transfer over the estate's basis in the shares. Had the estate's basis in the shares of stock transferred exceeded the amount of the claim satisfied, the estate would have sustained a loss deductible to the extent allowed in sections 1211 and 1212 of the Code.

[2784] Rev. Rul. 86-105 held:

1. A bequest of "assets, in cash or in kind or partly in each," with a fair market value at date of distribution equal to a specified amount is a bequest of a "specific sum of money" under section 663(a) of the Code.
2. The bequest of unspecified property with a specified value at the date of distribution creates a right to receive a "specific dollar amount" under section 1.661(a)-2(f)(1) of the regulations. Therefore, gain or loss is realized by the estate upon a distribution in kind.

deemed sale,[2785] even if the trust's residue is less than the pecuniary obligation.[2786] Such a pecuniary obligation includes an equalizing distribution[2787] (presumably unless expressed as a

[2785] Reg. § 1.661(a)-2(f) provides:

> Gain or loss is realized by the trust or estate (or the other beneficiaries) by reason of a distribution of property in kind if the distribution is in satisfaction of a right to receive a distribution of a specific dollar amount, of specific property other than that distributed, or of income as defined under section 643(b) and the applicable regulations, if income is required to be distributed currently. In addition, gain or loss is realized if the trustee or executor makes the election to recognize gain or loss under section 643(e).

Reg. § 1.651(a)-2(d) provides:

> If a trust distributes property in kind as part of its requirement to distribute currently all the income as defined under section 643(b) and the applicable regulations, the trust shall be treated as having sold the property for its fair market value on the date of distribution. If no amount in excess of the amount of income as defined under section 643(b) and the applicable regulations is distributed by the trust during the year, the trust will qualify for treatment under section 651 even though property in kind was distributed as part of a distribution of all such income. This paragraph (d) applies for taxable years of trusts ending after January 2, 2004.

[2786] Rev. Rul. 66-207 included the following facts and conclusion:

> By the terms of the decedent's will he made a bequest of a specific sum of money in the amount of 250x dollars to be used to create a trust for the benefit of a designated beneficiary. After payment of all debts, costs of administration, claims, and specific bequests, other than the sum of 250x dollars, the executor finds that all he has left in the estate are assets now having a fair market value of 200x dollars and an aggregate basis to the estate of 150x dollars. Included among these assets is cash in the amount of 10x dollars. All of these assets will be transferred in trust to the designated trustee in accordance with the terms of the will….
>
> Section 1.661(a)-2(f) of the regulations provides, in part, that no gain or loss is realized by the trust or estate by reason of the distribution of property in kind unless the distribution is in satisfaction of a right to receive a distribution in a specific dollar amount. Under this provision of the regulations whenever property other than money is distributed by an estate to any beneficiary, including a trust, in satisfaction of a cash bequest the estate realizes gain or loss measured by the difference between the amount of the bequest satisfied and the basis to the estate of the property so distributed. See *William R. Kenan, Jr., et al. v. Commissioner*, 114 F.2d 217 (1940); and *Sarah P. Suisman v. Eaton*, 15 F.Supp. 113 (1935), *affirmed per curiam*, 83 F.2d 1019, *certiorari denied*, 299 U.S 573.
>
> When the executor of this estate distributes the property remaining in the estate to the designated trustee in creation of the trust the estate will realize a gain of 50x dollars. This is the difference between the amount of the bequest satisfied by distribution of property other than cash (200x dollars less 10x dollars cash, or 190x dollars) and the basis (150x dollars less 10x dollars cash or 140x dollars) to the estate of the assets other than cash distributed in satisfaction of the bequest of a specific sum of money. The effect of the distribution will be the same as if the executor sold the remaining assets of the estate and distributed the proceeds to the trustee in trust.
>
> No amount is deductible by the estate under section 661 of the Code or includible in gross income of the trust under section 662 of the Code since the distribution will be in satisfaction of a bequest of a specific sum of money, as defined by section 1.663(a)-1(b) of the regulations. Accordingly, a final distribution by the executor of an estate of appreciated property, in order to satisfy a pecuniary legacy, will result in a gain to the estate, although such distribution is of an insufficient amount to completely satisfy such bequest.

[2787] Rev. Rul. 82-4 held:

> In this case, as in Rev. Rul. 66-207, the residue equal to the value of 100,000 shares of X company stock as of date of death bequeathed to C is a "bequest of a specific sum of money," as that term is defined in section 1.663(a)-1(b)(1) of the regulations, because the amount is ascertainable under the terms of A's will as of the date of A's death. Thus, no amount is

fractional share). This rule includes a pecuniary obligation in the form of an annuity payment to a beneficiary,[2788] and the gain recognized in paying the annuity is not included in the beneficiary's distributive net income (DNI) unless the rules for including capital gain in DNI are satisfied.[2789] If the trust's residue is less than the pecuniary obligation, the fact that all bequests are protected by Code § 663(a)(1)[2790] and therefore no residual beneficiary can pick up income under Code § 662 means that the trust will pay the tax, given that the beneficiaries of the protected bequests will not be picking up that income;[2791] note that the trustee will need to

---

> deductible by the estate under section 661 of the Code or includible in the gross income of B under section 662. Also, under section 1.661(a)-2(f)(1), the estate realizes a gain on the distribution in kind of appreciated property in satisfaction of C's right to receive a distribution in a specific dollar amount.
>
> **Holding**
>
> The estate realizes gain of $60,000 (date of distribution value ($180,000) less the basis of the property in the estate ($120,000)) for federal income tax purposes when the executor distributes the entire residuary estate to C to equalize to the extent possible the respective shares of total transfers received from the decedent.
>
> If in this case the value of the residuary estate had been, for example, $250,000, the property remaining after satisfaction of the $200,000 bequest to C ($50,000) would pass to B and C in equal shares. The estate would realize no gain or loss under section 1.661(a)-2(f)(1) of the regulations upon distribution of this portion of the $50,000 residue because the distribution would not be in satisfaction of the right to receive a distribution in a specific dollar amount.

[2788] Rev. Rul. 83-75, citing *Kenan v. Commissioner*, 114 F.2d 217 (2nd Cir. 1940), reasoned:
