> Actively traded means actively traded as defined in § 1.1092(d)-1 (defining actively traded property for purposes of the straddle rules).

Reg. § 1.1092(d)-1(a) provides:

> *Actively traded*. Actively traded personal property includes any personal property for which there is an established financial market.

Reg. § 1.1092(d)-1(b)(1) provides:

> *In general*. For purposes of this section, an established financial market includes—
>
> (i) A national securities exchange that is registered under section 6 of the Securities Exchange Act of 1934 (15 U.S.C. 78f);
>
> (ii) An interdealer quotation system sponsored by a national securities association registered under section 15A of the Securities Exchange Act of 1934;

traded.[3863] A "qualified financial asset" does not include a partnership interest, but a partnership (upper-tier partnership) that holds an interest in a securities partnership (lower-tier partnership) must take into account the lower-tier partnership's assets and qualified financial assets.[3864]

A partnership is a securities partnership if the partnership is either a management company that is registered with the SEC[3865] or an investment partnership, and the partnership makes all of its book allocations in proportion to the partners' relative book capital accounts (except for reasonable special allocations to a partner that provides management services or investment advisory services to the partnership).[3866] A partnership is an investment partnership if:[3867]

(i) On the date of each capital account restatement, the partnership holds qualified financial assets that constitute at least 90% of the fair market value of the partnership's non-cash assets; and

(ii) The partnership reasonably expects, as of the end of the first taxable year in which the partnership adopts an aggregate approach under Reg. § 1.704-3(e)(3), to make revaluations at least annually.

A partnership that establishes appropriate accounts for each partner for the purpose of taking into account each partner's share of the book gains and losses and determining each partner's

---

(iii) A domestic board of trade designated as a contract market by the Commodities Futures Trading Commission;
(iv) A foreign securities exchange or board of trade that satisfies analogous regulatory requirements under the law of the jurisdiction in which it is organized (such as the London International Financial Futures Exchange, the Marche a Terme International de France, the International Stock Exchange of the United Kingdom and the Republic of Ireland, Limited, the Frankfurt Stock Exchange, and the Tokyo Stock Exchange);
(v) An interbank market;
(vi) An interdealer market (as defined in paragraph (b)(2)(i) of this section); and
(vii) Solely with respect to a debt instrument, a debt market (as defined in paragraph (b)(2)(ii) of this section).

Reg. § 1.1092(d)-1(b)(2) defines various terms above. Reg. § 1.1092(d)-1(c) discusses notional principal contracts, and Reg. § 1.1092(d)-1(d) discusses debt linked to the value of personal property and may be part pf a straddle.

[3863] Reg. § 1.704-3(e)(3)(ii)(B), which lists those additional assets as:
notes, bonds, debentures, or other evidences of indebtedness; interest rate, currency, or equity notional principal contracts; evidences of an interest in, or derivative financial instruments in, any security, currency, or commodity, including any option, forward or futures contract, or short position; or any similar financial instrument.

[3864] Reg. § 1.704-3(e)(3)(ii)(C), which continues:
(1) In determining whether the upper-tier partnership qualifies as an investment partnership, the upper-tier partnership must treat its proportionate share of the lower-tier securities partnership's assets as assets of the upper-tier partnership; and
(2) If the upper-tier partnership adopts an aggregate approach under this paragraph (e)(3), the upper-tier partnership must aggregate the gains and losses from its directly held qualified financial assets with its distributive share of the gains and losses from the qualified financial assets of the lower-tier securities partnership.

[3865] Reg. § 1.704-3(e)(3)(iii)(B)(1), provides:
Management company. A partnership is a management company if it is registered with the Securities and Exchange Commission as a management company under the Investment Company Act of 1940, as amended (15 U.S.C. 80a).

[3866] Reg. § 1.704-3(e)(3)(iii)(A).

[3867] Reg. § 1.704-3(e)(3)(iii)(B)(2).

share of the tax gains and losses may adopt the partial netting approach of making reverse-Code § 704(c) allocations.[3868] Reg. § 1.704-3(e)(3)(iv) further provides:

> Under the partial netting approach, on the date of each capital account restatement, the partnership:
>
> (A) Nets its book gains and book losses from qualified financial assets since the last capital account restatement and allocates the net amount to its partners;
>
> (B) Separately aggregates all tax gains and all tax losses from qualified financial assets since the last capital account restatement; and
>
> (C) Separately allocates the aggregate tax gain and aggregate tax loss to the partners in a manner that reduces the disparity between the book capital account balances and the tax capital account balances (book-tax disparities) of the individual partners.

Reg. § 1.704-3(e)(3)(ix), Example (1), illustrates the following under the partial netting approach:

- Each partner has a single revaluation account that shows a net positive or negative book-tax difference.

- Recognized gains and recognized losses are accounted for separately in each of the next two bullet points.

- Recognized gains are allocated only to the partners with positive revaluation accounts, until the positive accounts are exhausted. After that, recognized gains are allocated in proportion to partnership interests.

- Recognized losses are allocated only to the partners with negative revaluation accounts, until the negative accounts are exhausted. After that, recognized losses are allocated in proportion to partnership interests.

A partnership that establishes appropriate accounts for each partner for the purpose of taking into account each partner's share of the book gains and losses and determining each partner's share of the tax gains and losses may also adopt the full netting approach of making reverse-Code § 704(c) allocations.[3869] Reg. § 1.704-3(e)(3)(v) further provides:

> Under the full netting approach, on the date of each capital account restatement, the partnership:
>
> (A) Nets its book gains and book losses from qualified financial assets since the last capital account restatement and allocates the net amount to its partners;

[3868] Reg. § 1.704-3(e)(3)(iv). Letter Ruling 201421001 (described more fully in fn. 372 in part II.B Limited Liability Company (LLC)) approved separate partnerships investing in equities or in fixed income funds using this method to track not only Code § 704(c) allocations but also reverse-Code § 704(c) allocations:

> provided that a contribution or revaluation of property and the corresponding allocation of tax items with respect to the property are not made with a view to shifting the tax consequences of built-in gain or loss among the partners in a manner that substantially reduces the present value of the partners' aggregate tax liability.

[3869] Reg. § 1.704-3(e)(3)(v).

(B) Nets tax gains and tax losses from qualified financial assets since the last capital account restatement; and

(C) Allocates the net tax gain (or net tax loss) to the partners in a manner that reduces the book-tax disparities of the individual partners.

The character and other tax attributes of gain or loss allocated to the partners under these approaches must:[3870]

(A) Preserve the tax attributes of each item of gain or loss realized by the partnership;

(B) Be determined under an approach that is consistently applied; and

(C) Not be determined with a view to reducing substantially the present value of the partners' aggregate tax liability.

Reg. § 1.704-3(e)(3)(ix), Example (2), illustrates the following under the full netting approach:

- Each partner has a single revaluation account that shows a net positive or negative book-tax difference.

- Recognized gains and losses are netted against each other.

- If the net is a gain, then this net recognized gains in allocated only to the partners with positive revaluation accounts, until the positive accounts are exhausted. After that, the recognized gain is allocated in proportion to partnership interests.

- If the net is a loss, then the recognized loss is allocated only to the partners with negative revaluation accounts, until the negative accounts are exhausted. After that, the recognized loss is allocated in proportion to partnership interests.

If a securities partnership adopts an aggregate approach under these rules and later fails to qualify as a securities partnership, it must make reverse-Code § 704(c) allocations on an asset-by-asset basis after the date of disqualification.[3871] However, it is not required to disaggregate the book gain or book loss from qualified asset revaluations before the date of disqualification when making reverse-Code § 704(c) allocations on or after the date of disqualification.[3872] A securities partnership revaluing its qualified financial assets pursuant to Reg. § 1.704-1(b)(2)(iv)(f) on or after the effective date of these rules may use any reasonable approach to coordinate with revaluations that occurred before these rules' effective date.[3873]

The IRS may, by published guidance or by letter ruling, permit aggregation of properties other than those described above, partnerships and partners not described above to aggregate gain and loss from qualified financial assets, and aggregation of qualified financial assets for purposes of making Code § 704(c) allocations in the same manner as that described above.[3874]

[3870] Reg. § 1.704-3(e)(3)(vi).
[3871] Reg. § 1.704-3(e)(3)(vii).
[3872] Reg. § 1.704-3(e)(3)(vii).
[3873] Reg. § 1.704-3(e)(3)(viii).
[3874] Reg. § 1.704-3(e)(4).

Letter Rulings have approved:

- Two separate partnerships, one holding equities and another holding fixed income, created on trust termination.[3875]

[3875] In Letter Ruling 201421001, a trust used two series LLCs – one invested in equities (X) and the other in fixed income securities (Y) – to distribute its investment assets to remaindermen. The IRS ruled:

(1) Before the distribution of interests in X and Y to the remainder beneficiaries, X and Y will be disregarded entities as long as they remain single member series of a single-member limited liability company (wholly-owned by trust) and items of income, deduction, credit, gains and losses with respect to assets held within X and Y should be reported directly on the trust's federal income tax returns (as if Trust continued to hold X and Y assets directly).

(2) Upon the distribution of interests in X and Y to the remainder beneficiaries, X and Y will be converted from disregarded entities to partnerships for federal tax purposes, and distribution of X and Y interests by the trust shall be treated as (i) a non-taxable pro rata distribution of X and Y assets (subject to any related liabilities) to the remainder beneficiaries (in accordance with the fractional share of Trust residue to which each remainder beneficiary, respectively, is entitled), as if such assets had been distributed outright from Trust to the remainder beneficiaries; followed by (ii) a deemed capital contribution of those same assets by the remainder beneficiaries to X and Y in a non-taxable exchange for interests in X and Y.

(3) Once X and Y become partnerships for federal tax purposes, to avoid taxation under Code § 721(b) any later in-kind trust distribution of a diversified portfolio of stocks and securities that is transferred as an addition to X or Y on behalf of some or all remainder beneficiaries who hold or thereby acquire membership interests in X or Y shall be treated as: (i) a non-taxable pro rata distribution of such trust assets (subject to any related liabilities) to the remainder beneficiaries holding or thereby acquiring membership interests in X or Y (in accordance with the proportionate fractional share of the trust residue to which each remainder beneficiary, respectively, is entitled), as if such assets had been distributed outright from the trust to such remainder beneficiaries; followed by (ii) a deemed capital contribution of those same assets by such remainder beneficiaries to X or Y in a non-taxable exchange for membership interests in X or Y. See part II.M.3 Buying into or Forming a Partnership.

(4) X's and Y's use of the partial netting approach as defined in Reg. § 1.704-3(e)(3)(iv) for aggregating gains and losses from qualified financial assets for the purpose of making reverse-Code § 704(c) allocations is reasonable within the meaning of Reg. § 1.704-3(e)(3).[3875]

(5) X and Y have permission to aggregate built-in gains and losses from qualified financial assets contributed to X and Y by a partner with built-in gains and built-in losses from revaluations of qualified financial assets held by X and Y for purposes of making allocations under Code § 704(c)(1)(A) and Reg. § 1.704-3(a)(6). See parts II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, especially fns. 5444-5447 (describing reverse-Code § 704(c) allocations, which is where a partner makes a disproportionate contribution or receives a disproportionate distribution when the partner has assets with values not equal to basis, which book-tax difference needs to be accounted for) and II.P.1.a.i.(b) Special Rules for Allocations of Income in Securities Partnerships.

(6) After X and Y become partnerships for federal tax purposes, in-kind distributions of qualified financial assets from X and Y to one or more of its members will not be deemed a distribution of money under Code § 731(c). As a result, an in-kind distribution will not be treated as a "sale or exchange" and the distributee member should not recognize any gain or loss in connection therewith. Further, both (i) the "aggregate built-in gain or loss" at the partnership level, and (ii) the portion of such "aggregate built-in gain or loss" allocable to the partner receiving such distribution, may be adjusted by the full amount of net unrealized gain or loss in the assets so distributed.

See part II.Q.8.b.i.(a) Code § 731: General Rule for Distributions. For rules on revaluing capital accounts on certain events, see part II.C.7 Maintaining Capital Accounts, especially fn. 507.

- Partnerships between a voluntary employees' beneficiary association (VEBA) and plans providing for pension and welfare benefits of a common employer and its current and former subsidiaries.[3876]

- A partnership was allowed to apply this rule to Code § 704(c) allocations when applying the usual Code § 704(c) rules would have been two cumbersome, if a contribution or revaluation of the property and the corresponding allocation of tax items with respect to the property are not made with a view to shifting the tax consequences of built-in gain or loss among the partners in a manner that substantially reduces the present value of the partners' aggregate tax liability.[3877]

- Use of the partial netting approach when three partnerships merged.[3878]

Rev. Proc. 2007-59 allows certain partnerships to aggregate gains and losses from an expanded class of qualified financial assets in applying the above rules. It provides special rules for a "Qualified Partnership," which is a partnership that satisfies the following requirements:[3879]

(1) the partnership makes all of its book allocations in proportion to the partners' relative book capital accounts (except for reasonable special allocations to a partner that provides management services or investment advisory services to the partnership);

[3876] Letter Rulings 201028016 and 201028017.
[3877] Letter Ruling 201032003.
[3878] Letter Ruling 201710008 held:

> … Surviving Partnership's use of the partial netting approach for making reverse § 704(c) allocations is a reasonable approach within the meaning of § 1.704-3(e)(3), provided that a contribution or revaluation of property and the corresponding allocation of tax items with respect to the property are not made with a view to shifting the tax consequences of built-in gain or loss among the partners in a manner that substantially reduces the present value of the partners' aggregate tax liability….
>
> … if Surviving Partnership uses the partial netting approach to make § 704(c) allocations, including reverse § 704(c) allocations, this will be a reasonable method within the meaning of § 1.704-3(a)(1), and is permitted by the Commissioner under § 1.704-3(e)(4)(iii), provided that a contribution or revaluation of property and the corresponding allocation of tax items with respect to the property are not made with a view to shifting the tax consequences of built-in gain or loss among the partners in a manner that substantially reduces the present value of the partners' aggregate tax liability.
>
> This ruling is limited to allocations of gain or loss from the sale or other disposition of qualified financial assets made under § 704(b), § 704(c)(1)(A), and § 1.704-3(a)(6). Specifically, no opinion is expressed concerning allocations of items other than items of gain or loss from the sale or other disposition of qualified financial assets, or the aggregation of built-in gains and losses from qualified financial assets contributed to Surviving Partnership by any person other than Terminating Partnership A and Terminating Partnership B. Surviving Partnership must maintain sufficient records to enable it and its partners to comply with § 704(c)(1)(B) and § 737. Additionally, this ruling applies only to the contributions to Surviving Partnership made in connection with the mergers of Terminating Partnership A and Terminating Partnership B into Surviving Partnership and not to any other contributions or any other future partner.

Letter Ruling 201710007 seemed to be the same as Letter Ruling 201710008.
[3879] § 3.01.

(2) the partnership reasonably expects, as of the end of the first taxable year in which the partnership adopts an aggregate approach under this revenue procedure, to make revaluations of qualified financial assets at least four times annually;

(3) on the date of each capital account restatement during the taxable year, the partnership holds qualified financial assets that constitute at least 90 percent of the partnership's non-cash assets;

(4) the partnership reasonably expects, as of the first day of each taxable year for which the partnership seeks to aggregate under this revenue procedure, that the partnership

(a) will have at least 10 unrelated partners at all times during the taxable year; and

(b) will make at least 200 trades of qualified financial assets during the taxable year, the aggregate value of which will comprise at least 50% of the book value of the partnership's assets (including cash) as of the first day of the taxable year; and

(5) the application of the aggregation method to reverse section 704(c) allocations under this revenue procedure is not made with a view to shifting the tax consequences of built-in gain or loss among the partners in a manner that substantially reduces the present value of the partners' aggregate tax liability.

In applying the above definition, "partners are treated as related if they are related within the meaning of sections 267(b)[3880] or 707(b)."[3881]

In applying Rev. Proc. 2007-59, "qualified financial assets" are:[3882]

(1) those assets described in § 1.704-3(e)(3)(ii)(A) and (B);

(2) any interest in a partnership that is traded on an established securities market or readily tradable on a secondary market or the substantial equivalent thereof within the meaning of § 1.7704-1(c); and

(3) any interest owned by the partnership (the upper-tier partnership) in a partnership (the lower-tier partnership) that represents it is a securities partnership or a Qualified Partnership, provided that such interest is

(i) less than 10 percent of the capital and profits of the lower-tier partnership and that the upper-tier partnership does not actively or materially participate in the management or operations of the lower-tier partnership; and

(ii) less than 5 percent of the total book value of the upper-tier partnership's assets (including cash) as of the first day of the taxable year.

[3880] Code § 267(b) is reproduced in part II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses.
[3881] § 3.01. For a description of Code § 707(b), see part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.
[3882] § 3.02.

Rev. Proc. 2007-59 grants permission to any Qualified Partnership to aggregate built-in gains and losses from qualified financial assets for purposes of making reverse-Code § 704(c) allocations under Reg. § 1.704-3(e)(3).[3883] Once a partnership adopts an aggregate approach under this revenue procedure, that partnership must apply the same aggregate approach to all of its qualified financial assets for all taxable years in which the partnership qualifies as a Qualified Partnership.[3884] However, a partnership may choose not to aggregate all of the partnership's qualified financial assets if such qualified assets do not exceed in the aggregate 30% of the book value of the partnership's non-cash assets at the time any such qualified financial assets is acquired.[3885]

A Qualified Partnership that adopts an aggregate approach under Rev. Proc. 2007-59 and later fails to qualify as a Qualified Partnership must make reverse-Code § 704(c) allocations on an asset-by-asset basis after the date of disqualification.[3886] The partnership, however, is not required to disaggregate the book gain or book loss from qualified asset revaluations before the date of disqualification when making reverse-Code § 704(c) allocations on or after the date of disqualification.[3887]

Rev. Proc. 2001-36 grants automatic permission for certain securities partnerships to aggregate contributed property for purposes of making Code § 704(c) allocations.[3888] Rev. Proc. 2001-36[3889] provides that a Qualified Master-Feeder Structure (QMFS) may "aggregate built-in gains and losses from contributed qualified financial assets for purposes of making section 704(c) and reverse section 704(c) allocations."[3890] Section 4.02 provides:

[3883] § 4.01.
[3884] § 4.01, citing Reg. § 1.704-3(e)(3)(i).
[3885] § 4.01.
[3886] § 4.02.
[3887] § 4.02.
[3888] It also described the information that must be included with ruling requests for permission to aggregate contributed property for purposes of making Code § 704(c) allocations submitted by partnerships that do not qualify for automatic permission, but Rev. Proc. 2002-3, § 6.06, titled "Section 704(c)," superseded that part, providing that private letter rulings will not ordinarily be issued regarding:

> Contributed Property-Requests from Qualified Master-Feeder Structures, as described in section 4.02 of Rev. Proc. 2001-36, 2001-23 I.R.B. 1326, for permission to aggregate built-in gains and losses from contributed qualified financial assets for purposes of making § 704(c) and reverse § 704(c) allocations.

[3889] §§ 2.07 and 2.08 describe the Rev. Proc.'s purpose:

> .07. In a typical Master-Feeder Structure, two or more Feeder Funds or one or more Feeder Funds and an investment advisor, principal underwriter, or manager contribute their assets, consisting primarily of cash or financial investments, to a single Master Portfolio in exchange for beneficial interests in the Master Portfolio. In these cases, each Feeder Fund and the Master Portfolio is registered with the Securities and Exchange Commission under the Investment Company Act of 1940 (1940 Act). The shares of these Feeder Funds are typically publicly offered and widely held by individuals, corporations, and institutional investors. Generally, each Feeder Fund is an open-end mutual fund, which continuously offers to sell new shares or redeem existing shares for a price equal to the net asset value of their proportionate interest in the portfolio.
>
> .08. The IRS and Treasury Department have determined that it is in the best interest of sound tax administration to reduce the burden on taxpayers of submitting ruling requests by granting to certain Master-Feeder Structures automatic permission to aggregate built-in gains and losses from contributed securities.

[3890] § 4.01.

A QMFS is created where two or more investors contribute cash or qualified financial assets to a Master Portfolio in exchange for beneficial interests in the Master Portfolio. To qualify as a QMFS, the following requirements must be met:

(1) Each partner in the Master Portfolio is a Feeder Fund, or an investment advisor, principal underwriter, or manager of the Master Portfolio;

(2) Each Feeder Fund contributes only cash and/or a portfolio of diversified stocks and securities that satisfies the 25 and 50 percent tests of section 368(a)(2)(F)(ii) in exchange for beneficial interests in the Master Portfolio;

(3) Each partner in the Master Portfolio that is an investment advisor, principal underwriter, or manager, contributes only cash and/or services in exchange for beneficial interests in the Master Portfolio;

(4) The Master Portfolio is treated as a partnership for federal tax purposes and qualifies as a securities partnership under section 1.704-3(e)(3)(iii);

(5) Each Feeder Fund is a publicly offered regulated investment company, as defined in section 67(c)(2)(B) and section 1.67-2T(g)(3)(iii);

(6) The Master Portfolio is registered as an investment company under the 1940 Act.

(7) The Master Portfolio makes section 704(c) and reverse section 704(c) allocations under the partial netting approach or the full netting approach as described in section 1.704-3(e)(3)(iv) or section 1.704-3(e)(3)(v), respectively, and;

(8) The contributions to the Master Portfolio and the corresponding allocations of tax items with respect to the property contributed to the Master Portfolio are not made with a view to shifting the tax consequences of built-in gain or loss among the partners in a manner that substantially reduces the present value of the partners' aggregate tax liability.

II.P.1.b. Allocations of Income in S Corporations

As described further below, S corporations generally must have a single class of stock. Income is always allocated in proportion to stock ownership.[3891] Special allocations of profits are not permitted, and Code § 704(c) responsibility does not exist. However, trusts cannot use the Code § 179 expensing of equipment, etc., so if the corporation reports Code § 179 expense and has a nongrantor trust shareholder then the corporation will need to separately track as an asset the trust's share of Code § 179 expense and specially allocate to the trust depreciation from that asset.[3892]

Also described further below are ways to creatively compensate employees, providing incentive that is the same as, or similar to, the results one can attain from partnerships.

[3891] Code § 1377(a)(1). For allocations of income when ownership changes, see part III.B.2.j Tax Allocations upon Change of Interest, particularly III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.
[3892] See part II.J.11.a.i Code § 179 Disallowance for Estate or Nongrantor Trust.

S corporations are superior to C corporations in that undistributed S corporation income adds to the basis of the shareholders' stock.

Also see part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.

II.P.1.c. Schedules K-2 and K-3 for Pass-Throughs

IRS resources include:

- Schedules K-2 and K-3 Frequently Asked Questions (Forms 1065, 1120S, and 8865) | Internal Revenue Service (irs.gov)

- Schedules K-2 and K-3: Interim Electronic Filing for Tax Year 2021 | Internal Revenue Service (irs.gov)

- Notice 2021-39, Transition Period Penalty Relief for New Schedules K-2 and K-3 for Forms 1065, 1120-S and 8865

AICPA resources are at IRS Schedules K-2 and K-3 guidance and resources | AICPA (aicpa-cima.com).

II.P.1.d. Advantages of C and S Corporation Reporting of Owners' Compensation on Forms W-2

C and S corporations must withhold taxes and file quarterly forms 941 and annual Forms W-2 for owners' compensation, whereas partnerships and sole proprietorships are not involved in withholding taxes regarding owner compensation.

Timely filing Forms W-2 helps support the 20% deduction for qualified business income ("QBI") for owners of partnerships,[3893] but W-2 income itself does not constitute QBI.[3894]

Filing W-2 forms for owners provides some minor benefits:

(a) Unless the employee elects otherwise, federal income tax withheld is deemed paid evenly throughout the year. If the owner falls behind during the year, the owner may withhold large amounts at year-end, which generally will be deemed paid evenly throughout the year.

(b) Qualified retirement plans have a cap on compensation that can be considered in allocating contributions to the plans. Owners of corporations could adjust their W-2 income to reduce their compensation in good years and increase it in bad years to plan around this cap. Partners and sole proprietors do not have this flexibility. Of course, all businesses on the cash basis could delay or accelerate billings or disbursements.

(c) Providing a better base for the special deduction for domestic manufacturing.[3895]

[3893] See part II.E.1.c.vi.(a) W-2 wages under Code § 199A.
[3894] See parts II.E.1.c.ii.(b) Trade or Business of Being an Employee (Excluded from QBI) and II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A.
[3895] Note the W-2 limitation mentioned in part II.G.25 Code § 199 Deduction for Domestic Production Activities especially fn. 1898.

II.P.2. C Corporation Advantage Regarding Fringe Benefits

Only a C corporation may deduct the following items without including them in the recipient's income:

(a) Dependent care (child care) assistance payments for owners subject to a dollar cap (generally $5,000).

(b) The owners' meals and lodging for the employer's convenience without including them in the owner's income.[3896]

(c) Non-discriminatory premiums for up to $50,000 in group-term life insurance covering the owners without including them in the owner's income.[3897]

Partners' fringe benefits are summarized by McKee, Nelson & Whitmire;[3898] RIA has prepared summaries of fringe benefits that partners and S corporation shareholders can and cannot claim.[3899] Any partner who performs services for a partnership is considered employed by the

---

[3896] Code § 119. See Campbell and Mitchell, The Exclusion for Meals and Lodging, *The Tax Adviser* (April 2015) (also discussing the partnership issue described below), saved as doc. no. 6206076. However, this exclusion might apply beyond the C corporation context. See McKee, Nelson & Whitmire, ¶14.02. Partners Acting in Nonpartner Capacities: Section 707(a) Transactions, *Federal Taxation of Partnerships & Partners* (WG&L), citing a Fifth Circuit case looking with favor on the Code § 119 exclusion for a partner:

> *Armstrong v. Phinney*, 394 F.2d 661 (5th Cir. 1968) (remanding for determination whether partner was in fact employee of his partnership, and therefore entitled to exclude under § 119 value of meals and lodging furnished by the partnership). *Contra Wilson v. United States*, 376 F.2d 280 (Ct. Cl. 1967). The courts generally applied aggregate principles under the 1939 Code. See *Commissioner v. Doak*, 234 F.2d 704 (4th Cir. 1956) (partner may not be employee of his partnership); *Commissioner v. Moran*, 236 F.2d 595 (8th Cir. 1956) (same); *Commissioner v. Robinson*, 273 F.2d 503 (3d Cir. 1959) (cert. denied) (same); Rev. Rul. 53-80, 1953-1 CB 62 (same). See also *George A. Papineau*, 16 T.C. 130 (1951) (nonacq.); Tech. Adv. Mem. 9134003 (May 6, 1991) (incorporation of farming business; shareholder/employees claim benefits of § 119; § 269 not applicable because same benefits available if partnership had been formed). But *cf. Dilts v. United States*, 845 F.Supp. 1505 (D. Wyo. 1994) (§ 119 not available to shareholders of family-owned S corporation; result of *Armstrong v. Phinney* justified on grounds that taxpayer only 5 percent partner).

For more on *Armstrong v. Phinney* and when a partner may be considered as being compensated for services not in his or her capacity as a partner under Code § 707(a)(2), as contrasted as compensation for services rendered in his or her capacity as a partner under Code § 707(c), see fns. 551, 528 in part III.B.7.c.viii Creative Bonus Arrangements. Reg. § 1.707-1(c) provides that "partner who receives guaranteed payments for a period during which he is absent from work because of personal injuries or sickness is not entitled to exclude such payments from his gross income under section 105(d)."

See also part II.P.1.d Advantages of C and S Corporation Reporting of Owners' Compensation on Forms W-2. For a discussion of "fringe benefits" under Code § 1372, applying partnership rules to those owning at least 2% of an S corporation, see text accompanying fn 4472 in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit **Arrangement under Reg. § 1.61-22**, describing a unanimous Tax Court reviewed opinion.

partnership for purposes of Code § 132(a)(1) (relating to no-additional-cost services) and Code § 132(a)(2) (relating to qualified employee discounts),[3900] as well as Code § 132(a)(3) (relating to working condition fringes)[3901] and Code § 132(h)(5) (relating to on-premises athletic facilities).[3902] Partners are eligible for educational assistance programs under Code § 127.[3903] Qualified transportation fringe benefits under Code § 132(f) are available to partners only if they are entirely below the limits for the working condition and de minimis fringe exclusions under Code § 132(a)(3), (4).[3904]

Code § 162(*l*), "Special rules for health insurance costs of self-employed individuals," provides:

(1) *Allowance of deduction*. In the case of a taxpayer who is an employee within the meaning of section 401(c)(1) , there shall be allowed as a deduction under this section an amount equal to the amount paid during the taxable year for insurance which constitutes medical care for -

(A) the taxpayer,

(B) the taxpayer's spouse,

(C) the taxpayer's dependents, and

(D) any child (as defined in section 152(f)(1)) of the taxpayer who as of the end of the taxable year has not attained age 27.

(2) *Limitations*.

(A) *Dollar amount*. No deduction shall be allowed under paragraph (1) to the extent that the amount of such deduction exceeds the taxpayer's earned income (within the meaning of section 401(c)) derived by the taxpayer from the trade or business with respect to which the plan providing the medical care coverage is established.

(B) *Other coverage*. Paragraph (1) shall not apply to any taxpayer for any calendar month for which the taxpayer is eligible to participate in any subsidized health plan maintained by any employer of the taxpayer or of the spouse of, or any dependent, or individual described in subparagraph (d) of paragraph (1) with respect to, the taxpayer. The preceding sentence shall be applied separately with respect to -

(i) plans which include coverage for qualified long-term care services (as defined in section 7702B(c)) or are qualified long-term care insurance contracts (as defined in section 7702B(b)), and

(ii) plans which do not include such coverage and are not such contracts.

[3900] Reg. § 1.132-1(b)(1).
[3901] Reg. § 1.132-1(b)(2)(ii).
[3902] Reg. § 1.132-1(b)(3).
[3903] Code § 127(c)(2), (3).
[3904] Reg. § 1.132-9, A-24 (adopted in 2001 and amended in 2006); see Notice 94-3, Q-5(b).

(C) *Long-term care premiums*. In the case of a qualified long-term care insurance contract (as defined in section 7702B(b)), only eligible long-term care premiums (as defined in section 213(d)(10)) shall be taken into account under paragraph (1).

(3) *Coordination with medical deduction*. Any amount paid by a taxpayer for insurance to which paragraph (1) applies shall not be taken into account in computing the amount allowable to the taxpayer as a deduction under section 213(a).

(4) *Deduction not allowed for self-employment tax purposes*. The deduction allowable by reason of this subsection shall not be taken into account in determining an individual's net earnings from self-employment (within the meaning of section 1402(a)) for purposes of chapter 2 for taxable years beginning before January 1, 2010, or after December 31, 2010.

(5) *Treatment of certain S corporation shareholders*. This subsection shall apply in the case of any individual treated as a partner under section 1372(a), except that -

(A) for purposes of this subsection, such individual's wages (as defined in section 3121) from the S corporation shall be treated as such individual's earned income (within the meaning of section 401(c)(1)), and

(B) there shall be such adjustments in the application of this subsection as the Secretary may by regulations prescribe.

An individual who is a 2-percent shareholder of an S corporation pursuant to the attribution of ownership rules under Code § 318 is entitled to the deduction under Code § 162(*l*) for amounts that are paid by the S corporation under a group health plan for all employees and included in the individual's gross income, if the individual otherwise meets the requirements of Code § 162(*l*).[3905]

II.P.3. Conversions

Conversion to a C corporation is less taxing than conversion from a C corporation. Often, start-up businesses open as a pass-through entity (partnership or S corporation) to enable the owner to deduct initial losses, and then convert to a C corporation when they become profitable. To the extent that timing is discussed below, it is when changes in entity arise from check-the-box elections, which elections generally may be effective up to 75 days before the date of filing.[3906]

[3905] CCA 201912001.

[3906] Reg. § 301.7701-3(c)(1)(iii) provides:

Effective date of election. An election made under paragraph (c)(1)(i) of this section will be effective on the date specified by the entity on Form 8832 or on the date filed if no such date is specified on the election form. The effective date specified on Form 8832 can not be more than 75 days prior to the date on which the election is filed and can not be more than 12 months after the date on which the election is filed. If an election specifies an effective date more than 75 days prior to the date on which the election is filed, it will be effective 75 days prior to the date it was filed. If an election specifies an effective date more than 12 months from the date on which the election is filed, it will be effective 12 months after the date it was filed. If an election specifies an effective date before January 1, 1997, it will be effective as of January 1, 1997. If a purchasing corporation makes an election under section 338 regarding an acquired subsidiary, an election

For structural changes to partnerships, see parts II.C.5 Converting from One Entity Taxed as a Partnership to Another and II.C.6 Shifting Rights to Future Profits.

An eligible entity may elect to be classified other than its default classification or to change its classification, by filing Form 8832.[3907] If an eligible entity makes an election under the preceding sentence to change its classification (other than an election made by an existing entity to change its classification as of the effective date of this section), the entity cannot change its classification by election again during the 60 months succeeding the effective date of the election.[3908] However, the IRS may permit the entity to change its classification by election within the sixty months if more than 50% of the ownership interests in the entity as of the effective date of the subsequent election are owned by persons that did not own any interests in the entity on the filing date or on the effective date of the entity's prior election.[3909] An election by a newly formed eligible entity that is effective on the date of formation is not considered a change for purposes of the 60-month rule.[3910]

Regarding taxpayer identification numbers, Reg. § 301.6109-1(h), "Special rules for certain entities under § 301.7701-3," provides:

> (1) *General rule*. Any entity that has an employer identification number (EIN) will retain that EIN if its federal tax classification changes under § 301.7701-3.
>
> (2) *Special rules for entities that are disregarded as entities separate from their owners*.
>
> > (i) *When an entity becomes disregarded as an entity separate from its owner*. Except as otherwise provided in regulations or other guidance, a single owner entity that is disregarded as an entity separate from its owner under § 301.7701-3, must use its owner's taxpayer identifying number (TIN) for federal tax purposes.
> >
> > (ii) *When an entity that was disregarded as an entity separate from its owner becomes recognized as a separate entity*. If a single owner entity's classification changes so that it is recognized as a separate entity for federal tax purposes,

---

> under paragraph (c)(1)(i) of this section for the acquired subsidiary can be effective no earlier than the day after the acquisition date (within the meaning of section 338(h)(2)).

[3907] Reg. § 301.7701-3(c)(1)(i).

[3908] Reg. § 301.7701-3(c)(1)(iv). T.D. 8697 (12/18/1996) provides:

> The sixty month limitation only applies to a change in classification by election; the limitation does not apply if the organization's business is actually transferred to another entity.

The preamble to the proposed regulations, PS-43-95 (5/1996), followed a sentence similar to the above with:

> For example, an organization could liquidate into its parent, terminate and reform as another entity (e.g., by merger), or contribute its business to another organization without restriction.

[3909] Reg. § 301.7701-3(c)(1)(iv).

[3910] Reg. § 301.7701-3(c)(1)(iv). The preamble to the proposed regulations, PS-43-95 (5/1996), commented:

> The sixty month limitation only applies to a change in classification by election. Thus, if a new eligible entity elects out of its default classification effective from its inception, that election is not a change in the entity's classification.

Letter Ruling 201516034 confirmed that electing out of default classification is not a change in the entity's classification. The ruling permitted corporate subsidiaries to convert to LLCs under their original state law and for those LLCs to elect corporation taxation, after which the LLCs converted to LLCs governed by a different state's laws, and the newest LLCs were also permitted to elect corporation taxation.

and that entity had an EIN, then the entity must use that EIN and not the TIN of the single owner. If the entity did not already have its own EIN, then the entity must acquire an EIN and not use the TIN of the single owner.

(3) *Effective date*. The rules of this paragraph (h) are applicable as of January 1, 1997.

II.P.3.a. From Corporations to Partnerships and Sole Proprietorships

If an entity that elected taxation as a corporation that has more than one owner elects under Reg. § 301.7701-3(c)(1)(i) to be classified as a partnership, the corporation is deemed to distribute all of its assets and liabilities to its owners, who immediately contribute all of the distributed assets and liabilities to the partnership.[3911] The deemed transactions are treated as occurring immediately before the close of the day before the election is effective. For example, if an election is made to change the classification is effective on January 1, the deemed transactions are treated as occurring immediately before the close of December 31 and must be reported as of December 31. Thus, the last day of the corporation's taxable year will be December 31 and the first day of the partnership's taxable year will be January 1.[3912]

If an entity that elected taxation as a corporation that has only one owner elects under Reg. § 301.7701-3(c)(1)(i) to be classified as a disregarded entity, the corporation is deemed to distribute all of its assets and liabilities to its single owner in liquidation of the corporation;[3913] when a subsidiary is deemed to have liquidated into its parent due to such an election, "the surviving parent corporation is considered as having been engaged in the liquidated subsidiary's preliquidation trade or business, with the result that the assets of that trade or business are deemed assets used in the surviving parent's trade or business at the time of receipt."[3914] The deemed transaction is treated as occurring immediately before the close of the day before the election is effective. For example, if an election is made to change the classification is effective on January 1, the deemed transaction is treated as occurring immediately before the close of December 31 and must be reported as of December 31. Thus, the last day of the corporation's taxable year will be December 31 and the first day of the individual's taxable year regarding the activity will be January 1.[3915] If a parent corporation converts a wholly-owned subsidiary corporation to a single member LLC that is disregarded for tax purposes, the conversion constituted a tax free liquidation of the subsidiary under Code § 332.[3916]

The liquidation of a corporation is a taxable event.[3917] The corporation (or its shareholders through K-1s if it is an S corporation) is taxed on the extent by which any asset's fair market value (FMV) exceeds its basis.[3918] Each shareholder generally realizes capital gain or loss on the difference between the FMV received and the stock's adjusted basis. This double tax can be expensive.[3919]

[3911] Reg. § 301.7701-3(g)(1)(ii).
[3912] Reg. § 301.7701-3(g)(3).
[3913] Reg. § 301.7701-3(g)(1)(iii).
[3914] *Dover Corporation and Subsidiaries v. Commissioner*, 122 T.C. 324 (2004).
[3915] Reg. § 301.7701-3(g)(3).
[3916] Letter Ruling 201452016.
[3917] See Code §§ 336 and 337.
[3918] Contributing property with a built-in loss within 2 years of liquidation so as to avoid gain on liquidation generally would not work. Code § 336(d)(2).
[3919] See, *e.g.*, Everett, Hennig, and Raabe, Converting a C corporation into an LLC: Quantifying the Tax Costs and Benefits, *Journal of Taxation* (Aug. 2010).

What if the conversion is not a formless check-the-box conversion? Rev. Rul. 69-534 provides:

> A corporation was liquidated and its business was thereafter conducted as a partnership by the three individuals who had owned all of the stock of the corporation and who acquired the same relative interests in the partnership that they had previously held in the corporation.
>
> The account of each partner was credited on the books of the partnership with his share of the equity of the corporation, but no amount was actually distributed to the individuals.
>
> *Held*, the credit given to each shareholder on the books of the partnership that succeeded the corporation was equivalent to a distribution of such assets to the partners since upon the dissolution of the corporation each of its three shareholders became entitled to his proportionate share of its entire net assets. Accordingly, gain or loss is recognized to each shareholder measured by the difference between his aliquot portion of the fair market value of the assets of the corporation distributed in liquidation and the cost or other basis of his stock as provided by section 331 of the Internal Revenue Code of 1954.

Hackett, "Liquidating a controlled subsidiary tax-free," The Tax Adviser (9/2023), discusses "Avoiding recognition of gain or loss":

> Nonrecognition of gain or loss by a parent corporation and its subsidiary on the liquidation of the subsidiary is mandatory if the following requirements are met (Secs. 332 and 337):
>
> - The parent owns at least 80% of the voting stock of the subsidiary and at least 80% of the total value of all the subsidiary's stock (Secs. 332(b)(1), 337(c), and 1504(a)(2)). Sometimes, liquidating distributions are made over a number of years rather than at one point in time. In that instance, the parent corporation must own at least 80% of the subsidiary's stock beginning on the date of adoption of the plan of liquidation; that ownership must continue until all property has been distributed. If the parent's ownership falls below the required 80% at any time during this period, this requirement will not be met, and the nonrecognition provisions will not apply to any distribution (Regs. Sec. 1.332-2(a)). A resolution by the shareholders to distribute all the subsidiary's assets in complete cancellation or redemption of all the subsidiary's stock is an adoption of a plan of liquidation, even if the date to complete the property transfer is not identified (Sec. 332(b)(2)). However, when liquidating distributions are made in more than one tax year of the subsidiary, the plan must specify the period during which the property transfer to the parent will be completed (Regs. Sec. 1.332-4(a)(1)).
>
> - The distribution must be in complete cancellation or redemption of all the subsidiary's stock, and the transfer of property must occur within the tax year. Or the distribution must be one in a series of distributions in complete cancellation or redemption of the stock in accordance with a plan of liquidation under which the distributions of the property must occur within three years from the close of the tax year in which the first distribution occurred (Secs. 332(b)(2) and (3)).
>
> - The subsidiary must be solvent (Regs. Sec. 1.332-2(b)). This means that the Sec. 332 rules do not apply when an insolvent subsidiary liquidates because there is

> nothing to distribute in cancellation or redemption of the subsidiary's stock. If the parent receives nothing for the stock, the liquidation is not treated as a tax-free liquidation. Instead, the parent may be able to claim a worthless stock loss under Sec. 165(g).

Under "Obtaining other tax benefits," the article discusses NOL carryovers, capital loss carryovers, earnings and profits, business credit carryovers, and suspended business interest. Nonrecognition on complete liquidation also applies to cancellation of indebtedness income (again, if the subsidiary is solvent). Special rules apply to intercompany items of the liquidating corporation, making liquidating distributions to minority shareholders (given that the subsidiary can have up to 20% minority owners), and distributions from subsidiaries of tax-exempt entities.

If a corporation sells assets in a tax-deferred installment sale and the corporation liquidates into a partnership, the deemed distribution from the corporation to its shareholders does not trigger gain,[3920] and the deemed contribution to the partnership does not trigger gain.[3921]

II.P.3.b. Conversion from C Corporation to S Corporation

Converting from a C corporation to an S corporation can trigger LIFO recapture for companies that carry an inventory[3922] or built-in gain tax when assets are sold with a certain number of years after the S election.[3923]

Any S corporations that have not cleansed themselves of C corporation earnings and profits encounter constraints regarding too much investment income[3924] and reduced benefits from tax-exempt interest.[3925]

II.P.3.b.i. LIFO Recapture

If a C corporation inventoried goods under the LIFO method immediately before making an S election, it shall include in income the LIFO recapture amount in its last taxable year as a C corporation (for which its inventory then receives appropriate basis adjustments.[3926]

The corporation pays tax imposed on this conversion in its last C year and first three S years.[3927]

[3920] Reg. § 1.453-9(c)(1)(ii).
[3921] Reg. § 1.453-9(c)(2), (3).
[3922] See part II.P.3.b.i LIFO Recapture.
[3923] See part II.P.3.b.ii Built-in Gain Tax.
[3924] See part II.P.3.b.iii Excess Passive Investment Income.
[3925] See part II.P.3.b.iv Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds.
[3926] Code § 1363(d)(1).
[3927] Code § 1361(d)(2). FSA 20153001F discussed the treatment of a consolidated group with a C corporation parent being acquired by an S corporation and became a Qualified Subchapter S Subsidiary. The FSA included the following clarification:

> The recapture date is the day before the effective date of the S election. Treas. Reg. § 1.1363-2(c)(1). However, with reference to transactions described in § 1.1363-2(a)(2) (including Qsub elections), there appears to be a typo in the regulations. Treas. Reg. § 1.1363-2(c)(1) states that for a nonrecognition transaction described in § 1.1363-2(a)(2) or (b)(2), the recapture date is the date of the transfer of the partnership interest to the S corporation. However, only section (b)(2) refers to a transfer of a partnership interest, (a)(2) refers to transfers of LIFO inventory assets by

Considering that any inventory on hand is likely to be sold during the recognition period for the built-in gain tax, this recapture avoids double taxation. On the other hand, the corporation might have been able to maintain its old layer of inventory for tax purposes during the entire built-in gain recognition period, and this might be viewed as an additional tax burden.

II.P.3.b.ii. Built-in Gain Tax on Former C Corporations under Code § 1374

II.P.3.b.ii.(a). Explanation of Built-in Gain Tax on Former C Corporations under Code § 1374

When any asset is disposed of within 5 years of the S election,[3928] generally double taxation applies - normal taxation as a flow-through entity, plus a separate corporate level tax imposed on the lesser of the gain on disposition or the unrealized gain on the effective date of the S election.[3929] The corporation must disclose its unrealized built-in gain annually.[3930]

---

the C corporation to an S corporation. The LIFO recapture amount is determined as of the end of the recapture date for S corporation elections described in § 1.1363-2(a)(1), and as of the moment before the transfer occurs for nonrecognition transactions (including Qsub elections) described in 1.1363-2(a)(2). Treas. Reg. § 1.1363-2(c)(2).

[3928] Code § 1374(d)(7) generally provides a 5-year recognition period, which was 7 years for a sale in 2009 or 2010 or 10 years for a sale before then. Code § 1374(d)(7) describes the recognition period as follows:

(A) *In general*. The term 'recognition period' means the 5-year period beginning with the 1st day of the 1st taxable year for which the corporation was an S corporation. For purposes of applying this section to any amount includible in income by reason of distributions to shareholders pursuant to section 593(e), the preceding sentence shall be applied without regard to the phrase '5-year'.

(B) *Installment sales*. If an S corporation sells an asset and reports the income from the sale using the installment method under section 453, the treatment of all payments received shall be governed by the provisions of this paragraph applicable to the taxable year in which such sale was made.

Letter Ruling 201150023 includes some nuances as the 2011 transition rules related to an installment sale. The ABA Section of Taxation S corporations Committee meeting in May 2015 discussed various nuances to Code § 1374(d)(7) before the Protecting Americans from Tax Hikes Act of 2015 enacted the language quoted above; see Thompson Coburn document no. 6214396.

[3929] Code § 1374. For ways to minimize this tax using a charitable remainder trust, see part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax. Also, see generally, Dealing with the S corporation Built-In Gains Tax, Parts 1 and 2, *Journal of Taxation* (April and May 2008). Reg. § 1.1374-2(a) provides that an S corporation is taxed is the lesser of:

(1) Its taxable income determined by using all rules applying to C corporations and considering only its recognized built-in gain, recognized built-in loss, and recognized built-in gain carryover (pre-limitation amount);
(2) Its taxable income determined by using all rules applying to C corporations as modified by section 1375(b)(1)(B) (taxable income limitation); and
(3) The amount by which its net unrealized built-in gain exceeds its net recognized built-in gain for all prior taxable years (net unrealized built-in gain limitation).

[3930] Form 1120S (2014), page 2, Schedule B, question 8. To avoid an understatement penalty, the taxpayer might consider hiring an appraiser to value the more significant items that have value that differs from basis. For a taxpayer to rely on a professional's advice, Reg. § 1.6664-4(c)(1)(i) provides;

All facts and circumstances considered. The advice must be based upon all pertinent facts and circumstances and the law as it relates to those facts and circumstances. For example, the advice must take into account the taxpayer's purposes (and the relative weight of such purposes)

Generally, any item of income properly taken into account during the recognition period is recognized built-in gain if the item would have been properly included in gross income before the beginning of the recognition period by an accrual method taxpayer.[3931] Assets subject to this tax include inventory (but see part II.P.3.b.i LIFO Recapture) and a cash basis taxpayer's accounts receivable,[3932] as well as goodwill;[3933] however, an accrual taxpayer's the receipt of franchise fees not constituting a sale or exchange of a capital asset under Code § 1253(a) are not subject to built-in gain tax.[3934] If a corporation sells an asset before or during the recognition period and reports the income from the sale using the installment method during or after the recognition period, that income is subject to built-in gain tax.[3935]

> for entering into a transaction and for structuring a transaction in a particular manner. In addition, the requirements of this paragraph (c)(1) are not satisfied if the taxpayer fails to disclose a fact that it knows, or reasonably should know, to be relevant to the proper tax treatment of an item.

If the taxpayer obtains more than one opinion of value, the taxpayer does not need to provide the tax return preparer with an earlier appraisal if a later appraisal was obtained to correct errors and incorporate more current data. *The Ringgold Telephone Company v. Commissioner*, T.C. Memo. 2010-103 (no penalty assessed for underpayment of built-in gain tax). The court also rejected the IRS' criticism of the taxpayer's failure to give the tax return preparer a copy of a memorandum suggesting a value, because the memorandum was prepared primarily as a marketing tool, not as an objective valuation.

[3931] Reg. § 1.1374-4(b)(1). This determination disregards any method of accounting for which an election by the taxpayer must be made unless the taxpayer actually used the method when it was a C corporation. Reg. § 1.1374-4(b)(3), Example (4) discusses deferred prepayment income, and Example (5) discusses changes in accounting methods. For further discussion of various items of built-in gain, see McMahon and Simmons, Where Subchapter S Meets Subchapter C, *Tax Lawyer*, vol. 67, No. 2 (Winter 2014), saved as Thompson Coburn LLP doc. no. 6177833.

[3932] For accounts receivable, the S corporation takes them account in full when it collects them, but it takes into account no more than their fair market value at the time of the S election if it sells them to a third party instead. Reg. § 1.1374-4(b)(3), Example (1). For long-term contracts accounted for under the completed contract method, income that would have been earned before the S election under the percentage of completion method is built-in gain. Reg. § 1.1374-4(g).

[3933] Reg. § 1.1374-3(c), Example (1).

[3934] Letter Ruling 200411015 involved the following situation:

> Franchisees pay [taxpayer] a license fee upon grant of the license and monthly royalty fees which are composed of a fixed fee portion and a variable fee portion. Except for the limited use allowed by the Agreements, [taxpayer] retains a significant power, right, or continuing interest in the franchise and terminates any Agreement in violation of the terms and conditions of the license grant. The grant or transfer of franchise rights pursuant to an Agreement does not constitute a sale or exchange of a capital asset under section 1253(a).

The ruling held:

> The income of [taxpayer] with respect to the receipt of the license fees and royalty fees from franchisees after the Conversion Date will not be treated as recognized built-in gain within the meaning of section 1374(d).
>
> We express no opinion about the tax treatment of the license fees or royalty fees under other provisions of the Code and regulations or the tax treatment of any conditions existing at the time of, or the effects resulting from, the license fees and royalty fees that are not specifically covered by the above ruling. We also express no opinion about the tax treatment under 1374 of any income or gain that may be realized by [taxpayer] during the recognition period except as specifically provided above.

[3935] Reg. § 1.1374-4(h). Also watch out for acceleration as described in part II.G.15 Limitations on the Use of Installment Sales

This gain can be offset by built-in losses,[3936] such as a cash basis taxpayer's accounts payable.[3937] Thus, a cash basis taxpayer with accounts receivable at the time of the S election should be able to offset that built-in gain by its board of directors declaring a bonus, constituting reasonable compensation, before the S election, which bonus is payable while an S corporation.[3938]

An accrual taxpayer's deductions deferred by reason of the economic performance rules count as built-in losses.[3939]

Regulations prevent avoiding this tax merely by dropping assets into a partnership.[3940] However, if the corporation owns the partnership at the time of the S election, valuation discounts might reduce the amount of built-in gain. A charitably inclined business might consider part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.

[3936] Reg. § 1.1374-2(a)(1).

[3937] Reg. § 1.1374-4(b)(2) provides that, generally:

> …any item of deduction properly taken into account during the recognition period is recognized built-in loss if the item would have been properly allowed as a deduction against gross income before the beginning of the recognition period to an accrual method taxpayer (disregarding any method of accounting for which an election by the taxpayer must be made unless the taxpayer actually used the method when it was a C corporation).

Under an accrual method of accounting, a liability is incurred and generally is taken into account in the taxable year in which all the events have occurred that establish the fact of the liability, the amount of the liability can be determined with reasonable accuracy, and economic performance has occurred with respect to the liability. Reg. § 1.461-1(a)(2)(i). For example, if the corporation is involved in a lawsuit at the time of the S election, amounts paid as a result of the lawsuit are built-in losses only if a judgement had been awarded at the time of the S election. Reg. § 1.1374-4(b)(3), Examples (2) and (3). If an accrual method taxpayer would have been able to deduct amounts owed to related parties before making the S election and Code § 267(a)(2) suspended the deduction until after the S election was made, those expenses might be built-in losses under Reg. § 1.1374-4(c)(1). A similar rule applies to compensation appropriately accrued before the S election but suspended under Code § 404(a)(5) until after the S election was made. Reg. § 1.1374-4(c)(2). For a tax trap regarding to such compensation when a business is sold, see fn 5771 in part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

[3938] S. Rep. No. 445, 100th Cong., 2d Sess. 65 (1988), states:

> As an example of these built-in gain and loss provisions, in the case of a cash basis personal service corporation that converts to S status and that has receivables at the time of the conversion, the receivables, when received, are built-in gain items. At the same time, built-in losses would include otherwise deductible compensation paid after the conversion to the persons who performed the services that produced the receivables, to the extent such compensation is attributable to such pre-conversion services. To the extent such built-in loss items offset the built-in gains from the receivables, there would be no amount subject to the built-in gains tax.

Eustice & Kuntz, ¶ 7.06[4][f] Computation of Tax; Use of Certain Losses and Deductions to Reduce Tax Base, Federal Income Taxation of S corporations, views this as an accurate statement of current law.

[3939] Reg. § 1.1374-4(b)(2) provides that:

> In determining whether an item would have been properly allowed as a deduction against gross income by an accrual method taxpayer for purposes of this paragraph, section 461(h)(2)(C) and § 1.461-4(g) (relating to liabilities for tort, worker's compensation, breach of contract, violation of law, rebates, refunds, awards, prizes, jackpots, insurance contracts, warranty contracts, service contracts, taxes, and other liabilities) do not apply.

[3940] Reg. § 1.1374-4(i).

II.P.3.b.ii.(b). Consider S Election Even If Plan to Sell Within 5 Years

Even if one plans to sell the corporation within five years, one might find an S election useful and then revert back to a C corporation if the sale does occur during that time, if all of the following are present:

- The corporate stock is not eligible for the exclusion from gain on sale of the stock under Code § 1202 described in part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation. Being an S corporation for any significant period would blow the exclusion.[3941]

- The company does not have too much inventory subject to tax under part II.P.3.b.i LIFO Recapture. Note that any tax imposed on LIFO recapture is spread over several years.

- The company does not expect to dispose of significant assets subject to built-in gain tax.[3942] If the company reports on the cash receipts and disbursements method, then its accounts receivable and other accrued income in excess of its accounts payable and other accrued expenses would be subject to built-in gain tax; however, if it is on the accrual method, the income would already have been recognized and the built-in gain tax would not apply.[3943]

Making the S election would allow the shareholders to extract earnings during that period income-tax free, whether those earnings are extracted through distributions or when selling their stock.

If stock in the company is sold as just a straight stock sale, then either the buyer keeps the S election going (and benefits from to) or terminates the S election. If the buyer requires a basis step-up on the corporation's assets as described in part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold, then the seller might need to revoke the S election to avoid the built-in gain tax. Either way, terminating the S election might very well be relatively straightforward so that this process of turning on and then off the S election might have few bad tax effects (if the three bullet points above work out) and are advantageous while the election is in effect. See parts II.P.3.d Conversion from S Corporation to C Corporation and II.A.2.k Terminating an S Election.

II.P.3.b.iii. Excess Passive Investment Income

If a C corporation with accumulated earnings and profits (E&P)[3944] elects S status, it might be subject to a supplemental tax and lose its S status if it has excess passive investment income.[3945] The corporation can avoid this treatment by carefully planning its gross receipts or

[3941] See fn. 5233.
[3942] See part II.P.3.b.ii.(a) Explanation of Built-in Gain Tax on Former C Corporations under Code § 1374.
[3943] See fns. 3931-3939.
[3944] Reg. § 1.1375-1(b)(4) refers to Code § 1362(d)(3) and the regulations thereunder in determining E&P. E&P is based on C corporation principles under Code § 312 and taxed by Code § 316 when distributed. Code § 1371(c). E&P are the earnings and profits of any corporation, including the S corporation or an acquired or predecessor corporation, for any period with respect to which an S election was not in effect. Reg. § 1.1362-2(c)(3).
[3945] Code §§ 1362(d)(3), 1375. Certain S corporations may disregard pre-1983 earnings and profits. 2007 Small Business Act P.L. 110-28, Sec. 8235.

by distributing its E&P.[3946] Inadvertent termination relief may be available if the corporation distributes its E&P after violating the excess passive investment income test.[3947]

Some points on planning gross receipts to avoid excess passive investment income treatment include:

- Although the statute defines rent as tainted income,[3948] that characterization does not apply if, based on all the facts and circumstances, the corporation provides significant services or incurs substantial costs in the rental activity.[3949] For this purpose, "rent" does not include

---

[3946] Planning before the conversion might also help. Starr and Sobol, *S corporations: Operations*, T.M. 731-2nd, suggests at IV.B:

> Comment: When a C corporation converts to an S corporation, accumulated E&P is likely to be overstated, since timing differences originating in C status will tend to reverse while in S corporation status. As a result, excessive dividend distributions will be necessary to fully deplete the account. Conversely, when an S corporation converts to a C corporation, these timing differences may prove advantageous in that the accumulated E&P would reflect the reversal in C status while not being affected by the origination of the item in S status.
>
> Instances where timing differences come into play when switching from C to S or S to C status include:
>
> - accelerated cost recovery deductions for taxable income, but straight-line for accumulated E&P;
> - installment method elected for taxable income, but not allowed for accumulated E&P; and
> - special LIFO inventory adjustments required for accumulated E&P, but generally not required for taxable income.

[3947] Letter Ruling 201710013.

[3948] Code § 1362(d)(3)(C)(i).

[3949] Reg. § 1.1362-2(c)(5)(ii)(B)(2), which provides:

> *Rents derived in the active trade or business of renting property*. Rents does not include rents derived in the active trade or business of renting property. Rents received by a corporation are derived in an active trade or business of renting property only if, based on all the facts and circumstances, the corporation provides significant services or incurs substantial costs in the rental business. Generally, significant services are not rendered and substantial costs are not incurred in connection with net leases. Whether significant services are performed or substantial costs are incurred in the rental business is determined based upon all the facts and circumstances including, but not limited to, the number of persons employed to provide the services and the types and amounts of costs and expenses incurred (other than depreciation).

When describing net leases, the regulation did not clarify whether it was referring to leases in which the tenant does everything to rather leases in which the tenant reimburses the landlord for expenses the landlord incurs. If the taxpayer has very significant concern about this issue, consider making the lease a fixed annual rent that is enough to cover annual expenses – which may or may not be acceptable to the landlord in that the landlord assumes the risk of unexpected expenses.

Rev. Rul. 81-197 addressed leasing aircraft. Reimbursing the renter's expenses under a one-year lease, where the tenant does all of the work, did not make rental be active. However, chartering aircraft was active, where (a) the owner provides all pilots, fuel, catering, and operating supplies, and pays for all hull and liability insurance, landing and parking fees, taxes, and governmental fees and charges, (b) pilots who are its employees have primary authority for the safety and actual operation of the aircraft, and (c) it enters into a management agreement with the aircraft manufacturer to secure assistance in maintaining the aircraft.

A corporation did not provide significant services or incur substantial costs when it provided furniture for the bungalows (used as vacation homes) and a recreation area maintained by the corporation, as well as tables and cards use in that area, sponsored bingo games for the adults and parties for the children at which small prizes were given, and sponsored parties for the adults, providing food and entertainment, all of which cost approximately 0.15% of revenue. *Feingold v. Commissioner*, 49 T.C. 461(1968).

> “income realized by a landowner under a share-farming arrangement where the landowner participates to a material degree in the production of farm commodities through physical work or management decisions, or a combination of both,”[3950] but the payment of costs may

---

Performing decorating, repair, maintenance and cleaning services at the lessee’s separate expense did not make active the rental of stadium suites active, but income from concessions, stadium club membership fees and dues, and electronic scoreboard advertising was active. Letter Ruling 8247052 (GCM 38915 apparently provided the underlying analysis).

Letter Ruling 201725022 held that the following medical office lease was active:

> X contracts with an independent leasing agent to assist in soliciting prospective tenants for M, negotiating leases and renewals, and overseeing post-leasing activities such as build-outs and renovations of suite space. X, with the assistance of the independent leasing agent, drafts, proposes, presents, and negotiates letters of intent to lease available suite spaces. Negotiation for leasing regularly requires the use of an independent space planner to design and tailor the spaces for prospective tenants. Once letters of intent are accepted, X, with the assistance of the independent leasing agent, prepares, finalizes, and executes the lease agreements with prospective tenants. Renewals of leases are similarly handled by X, which are often complicated by requests for concessions and renegotiation of the leasing rate. Renewals often require significant time and attention by X.
>
> X, through its employees, its agents, and the agents’ employees, provides certain services in maintaining and repairing of the buildings, common areas, and grounds of M. X utilizes a standard lease agreement for its tenants, and under the lease agreements X has the obligation to provide certain services with respect to the leasing of space within M and to maintain or repair the following items: the heat and air conditioning systems, plumbing, hot water heaters, exterior lighting, signs, lawn care and gardening, roofs and exterior walls, exterior walkways, courtyards, parking areas, electricity, water and sewer, drainage, and garbage pickup.
>
> In addition, the following specific services are provided to M and its tenants by an employee or independent contractor/worker of X: daily walk-through inspections of M to report on water breaks, lighting outage, vandalism, damage to building exteriors and certain interior spaces; sweeping, cleaning and maintaining the common areas of M such as sideways, walkways, and parking lot; routine periodic inspection of building exteriors and interiors, including foundations, roofs, exterior lighting, grounds, and parking lot and engaging in maintenance and repairs as needed; treating the roofs of the buildings for moss growth yearly; recoating and resurfacing the parking lot; routine and periodic maintenance of the numerous heating and air conditioning units; renovating vacant suites for leasing; routine and periodic maintenance of the plumbing and sewer lines, and their repair and replacement as needed; maintenance, repair and replacement of exterior lighting and selected interior lighting; janitorial services for selected units and common areas; exterior window washing; regular maintenance of grounds and lawn care, and landscaping services when necessary; seasonal snow removal and ice control; weekly trash removal; periodic pest and vermin control; and emergency response and property access for public safety.

Events Terminating Election, *Federal Income Taxation of Corporations & Shareholders* (WG&L); Eustice, Kuntz & Bogdanski, ¶ 5.04[2][b] Rents, *Federal Income Taxation of S Corporations*; Christian & Grant, ¶ 11.03 Rents, *Subchapter S Taxation* (WG&L).

[3950] Rev. Rul. 61-112. See Letter Rulings 8927039, 9003056, 9514005, 200002033, 200217045, and 200739008, all cited in Thompson Coburn LLP doc. no. 6513203 (which would need to be sanitized before sharing), which is the background for Letter Ruling 201812003 (which approved S corporation status and an ESBT election when the trust that was the sole shareholder was required to cause the corporation to distribute real estate to charity, facts that were present but were not discernible from the ruling). *Kennedy v. Commissioner*, T.C. Memo. 1974-149, held that crop-sharing was passive rental when the corporation furnished nothing except the use of the land and the tenant furnished all the management, labor, supplies, etc.

Citing Rev. Rul. 61-112, Rev. Rul. 67-423 held that, when a corporation owns farmland it leases to a tenant under a crop-sharing arrangement that generates government payments under acreage reserve be sufficient to cause a farm arrangement to be nonpassive under this test.[3951] See also part II.G.26.b Real Estate as a Trade or Business.

- Gross receipts (rather than net income) of nonpassive income from partnerships in which the corporation is invested may be counted;[3952] some income from controlled foreign corporations might also count as nonpassive income.[3953] Investing in oil and gas partnerships frequently helps generate sufficient nonpassive gross receipts.[3954] Any gross

---

and conservation reserve programs and the landlord materially participates in the management of the farm production, the payments which the landlord receives under the foregoing programs are not "rents" for personal holding company income tax purposes. TAM 6211239430A, which also cited Rev. Rul. 61-112, held that crop-sharing payments were "rents" for personal holding company income tax purposes where the corporation did nothing and the tenant furnishes all of the equipment and performs all of the work.

GCM 35957 (1974) cited Rev. Rul. 61-112, among other authority, in analyzing whether crop-sharing constituted unrelated business taxable income.

GCM 35247 (1973) cited Rev. Rul. 61-112, among other authority, in analyzing whether crop-sharing constituted a business for purposes of estate tax deferral under Code § 6166.

[3951] Letter Ruling 201722019 approved as nonpassive both of the following:

> X is engaged in the business of farming and owns n acres in State. X has leased the land for sharecropping (Sharecropping Lease Arrangement) continuously beginning in Date 3. Beginning in Year, the land was leased to Y. Pursuant to the Sharecropping Lease Arrangement, all taxes, assessments or charges levied or assessed on products of the land must be paid by X and Y based in proportion to the percentage of crops to which X and Y are entitled. X and Y each pay one half of the actual cost of fertilizer and soil conditioner. X pays the cost of the power and fuel necessary to operate the drainage pumping plants as well as the cost of maintaining the irrigation and drainage canals and irrigation pipe line. X is also responsible for paying box rent and the grower's share of the state inspection fee. Any processing expenses incurred with the preparation of crops for sale, which are related to X's share of the crops, are paid by X. X also determines the percentage of Property to be farmed and the types of crops to be planted. Further, X is at risk for crop yields and marketing.
>
> In Year, X signed a new lease agreement (Rental Lease Arrangement) with Y for lease of Property. Under the lease, X's expenses are between o% and p% of X's rental income. X is responsible for providing and maintaining insurance on all improvements and fixtures owned by X. Further, X pays the costs and expenses associated with the repair, maintenance and replacement of the irrigation drainage pumps as well as the insurance, water reclamation tax, water rights fees, water coalition dues and property taxes.

[3952] Rev. Rul. 71-455; see also Reg. § 1.702-1(a)(8)(ii).

[3953] CCA 201030024.

[3954] For a summary of the issue, see 723 T.M. III.D.7.b.; see also part II.P.1.a.i Allocations of Income in Partnerships. Specific examples include Letter Rulings 200005012 (publicly traded partnership engaged in the purchasing, gathering, transporting, storage and resale of crude oil, refined petroleum products, and natural gas liquids, as well as some related activities), 200027037 (publicly traded limited partnerships engaged in the business of purchasing, gathering, transporting, trading, storage, and resale of crude oil, refined petroleum, and other chemical products), 200147034 (one publicly traded partnership's business consisted of purchasing, gathering, transporting, trading, storage and resale of crude oil and refined petroleum products and related activities, and the other's consisted of interstate and intrastate crude oil transportation, terminalling and storage, as well as crude oil gathering and marketing activities), 200240043 (publicly traded partnerships engaged in the business of purchasing, gathering, transporting, trading, storing, and reselling crude oil and refined petroleum products), 200309021 (publicly traded partnership engaged in the purchasing, gathering, transporting, trading, storage, and resale of crude oil, refined petroleum, and other mineral or natural resources), 200327004 (publicly traded partnership engaged in the purchasing, gathering, transporting, trading, marketing, storing, and reselling of crude oil, refined petroleum products, and natural gas liquids), and 200928024 (publicly traded receipts separately stated on such a K-1 would be reflected only in a worksheet provided in the Instructions for Form 1120S.[3955]

- In the case of sales or exchanges of stock or securities, gross receipts shall be taken into account only to the extent of the gains, without deduction for losses.[3956] For other capital assets, losses are netted against gains.[3957]

The corporation can distribute its E&P. Generally, distributions from an S corporation come first as generally[3958] nontaxable distributions of its accumulated adjustments account (AAA), then are treated as dividends to the extent of E&P, and then as a return of basis and gain on sale.[3959] However, an S corporation may, with the consent of all of its affected shareholders, elect to ignore AAA with respect to all distributions made during the taxable year for which the election is made.[3960]

Generally, a distribution of E&P must be effected using a distribution of money or other property.[3961] For these purposes, a distribution is taken into account on the date the corporation makes the distribution, regardless of when the distribution is treated as received by the shareholder.[3962] AAA at the close of the taxable year is applied to distributions during the taxable and pro-rated among them if they exceed AAA.[3963]

"Property" means money, securities, and any other property, but does not include stock in the corporation making the distribution (or rights to acquire such stock).[3964] However, no distribution of property is required if an S corporation elects to distribute all or part of its E&P through a deemed dividend, in which case: [3965]

- The corporation will be considered to have elected to bypass AAA for that year.

- The deemed dividend may not exceed the E&P on the last day of the taxable year, reduced by any actual distributions of E&P made during the taxable year.

---

partnerships engaged in the active trade of purchasing, gathering, transporting, trading, storage and/or resale of crude oil and refined petroleum products and related activities). It is best to document that the corporation's investment strategy is to provide for liquidity and also to diversify its investment risk.

[3955] The 2016 Instructions provide a worksheet to compute the excess net passive income tax for line 22a. The schedule computing the excess net passive income items includes+:

> *Income and deductions on lines 1, 2, and 5 are from total operations for the tax year. This includes applicable income and expenses from page 1, Form 1120S, as well as those imported separately on Schedule K.

[3956] Code § 1362(d)(3)(B)(ii).
[3957] Code § 1362(d)(3)(B)(i).
[3958] If and to the extent that the basis of a shareholder's stock is less than the shareholder's allocable AAA, the distribution of AAA would be taxed as a capital gain. Code § 1368(c)(1), (b)(2).
[3959] Code § 1368(c).
[3960] Code § 1368(e)(3)(A). Affected shareholder means any shareholder to whom a distribution is made by the S corporation during the taxable year. Code § 1368(e)(3)(B).
[3961] Code § 316(a). See Reg. § 1.1368-1(c).
[3962] Reg. § 1.1368-1(b).
[3963] Reg. § 1.1368-1(b), (c).
[3964] Code § 317(a).
[3965] Reg. § 1.1368-1(f)(3).

- The amount of the deemed dividend is considered, for all tax purposes,[3966] as if it were distributed in money to the shareholders in proportion to their stock ownership, received by the shareholders, and immediately contributed by the shareholders to the corporation, all on the last day of the corporation's taxable year.

A corporation makes an election for a taxable year by attaching a statement to a timely filed (including extensions) original or amended return required to be filed for that taxable year, which statement must include the amount of the deemed dividend that is distributed to each shareholder,[3967] as well as consent by each affected shareholder.[3968]

A deemed dividend might be attractive when dividend tax rates are low, if one expects to need to take distributions in excess of AAA is a future year. However, if the shareholder might later sell the stock to a third party or wait to have the stock redeemed until it obtains a basis step-up on death, then it's possible that distributions will never exceed AAA. In that case, investing in assets that generate nonpassive gross receipts might be a lot less painful than paying tax on a deemed dividend. If the majority shareholder does not want to mess with a closely-held business or active rental, then my experience has been that investing 1-3% of the corporation's assets in oil and gas partnerships will be sufficient to generate sufficient nonpassive gross receipts.[3969]

If a corporation does not know about the possible loss of its S election under the excess passive investment income rules and terminates its S election as a result of these rules, consider applying for inadvertent termination relief in which the corporation and shareholders agree to a retroactive deemed dividend described above.[3970]

II.P.3.b.iv. Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds

Tax-exempt income does not increase AAA.[3971]

Therefore, any tax-exempt income, although not taxable to the shareholders when earned, would be taxable dividends when distributed to the shareholders to the extent that the corporation has no remaining AAA but has E&P.

Even if the corporation has plenty of AAA, a need for AAA might later arise, such as tax-free redemptions of part of a shareholder's stock.[3972]

[3966] However, the dividend deemed distributed to a qualified subchapter S trust does not constitute trust accounting income and therefore is not required to be distributed to the beneficiary. Letter Ruling 200446007.

[3967] Reg. § 1.1368-1(f)(5)(iii).

[3968] Reg. § 1.1368-1(f)(5)(ii).

[3969] See footnote 3954.

[3970] Letter Rulings 201351013, 201629001.

[3971] Code § 1368(e)(1)(A). This includes tax-free receipts beyond just municipal bonds. See part II.Q.7.b.iv.(a) S corporation Distributions of Life Insurance Proceeds - Warning for Former C Corporations and Letter Ruling 201440013.

[3972] If a state law redemption is treated as a distribution under Code § 302(b)(2) or (3) and Code § 302(c), then it is a tax-free distribution to the extent of AAA. See part II.Q.7.b. Redemptions or Distributions Involving S Corporations.

These issues are spelled out more in part II.Q.7.b.iv.(a) S corporation Distributions of Life Insurance Proceeds - Warning for Former C Corporations.

II.P.3.b.v. Conversion from S Corporation to C Corporation then Back to S Corporation

CCA 201446021 asserted that, when an S election terminates, its accumulated adjustments account (AAA) is wiped out. Therefore, the IRS reasoned, if the corporation later becomes an S corporation, its AAA starts from scratch.

However, any distribution of ***money***[3973] by a corporation with respect to its stock during a post-termination transition period (generally, the first C corporation year after the S election terminate) is applied against and reduce the adjusted basis of the stock, to the extent that the amount of the distribution does not exceed AAA.[3974] Rev. Rul. 2019-13 clarifies that this treatment applies if and to the extent that a redemption if recharacterized as a Code § 301 distribution.[3975]

Thus, if the S corporation status is terminated, one should consider promptly distributing earnings as cash; although one might loan them back to the corporation if it needs the cash, the IRS may treat that as a step transaction that is a note distribution that does not qualify as a distribution of money.[3976] If one is planning a termination, consider distributing on the last day of

---

[3973] The law refers to "money," and the 2017 legislative history refers to "distributions of cash."

[3974] Code § 1371(e)(1). Code § 1377(b)(1) and Reg. § 1.1377-2(b) determine the post-termination transition period.

[3975] See parts II.Q.7.a.iii Redemption Taxed Either as Sale of Stock or Distribution; Which Is Better When and II.Q.7.b Redemptions or Distributions Involving S Corporations. The facts of Rev. Rul. 2019-13 are:

> X is a corporation that once was a C corporation and later elected to be an S corporation under § 1362(a) of the Code. X's S election terminated under § 1362(d), such that it is now a C corporation. A, an individual, owns all 100 shares of the outstanding stock of X. X is a calendar-year taxpayer. At the time of its conversion to an S corporation, X had accumulated earnings and profits (E&P) of $600x and no current E&P. At the time of the termination of its S election, X's AAA was $800x and its accumulated E&P was still $600x. During X's post-termination transition period, X redeems 50 of A's 100 shares of X stock for $1,000x. X makes no other distributions during the post-termination transition period. Pursuant to § 302(d) of the Code, the redemption is characterized as a distribution subject to § 301. For the taxable period that includes the redemption, X has current E&P of $400x.

Rev. Rul. 2019-13 holds:

> If, during a former S corporation's post-termination transition period, the corporation distributes cash in redemption of a shareholder's stock, which is characterized as a distribution subject to § 301, the corporation should reduce its AAA to the extent of the proceeds of the redemption pursuant to § 1368. The redemption of 50 of A's 100 shares of X stock for $1,000x is characterized as a reduction of X's $800x of AAA with the remaining $200x characterized as a dividend under § 301(c)(1).

[3976] See *McKelvy v. United States*, 478 F.2d 1217 (Ct. Cl. 1973); *DeTreville v. United States*, 445 F.2d 1306 (4th Cir. 1971); *Fountain v. Commissioner*, 59 T.C. 696 (1973); and *Roesel v. Commissioner*, 56 T.C. 14 (1971). In the first three cases, the corporation did not have cash on hand to honor the checks, and the loan or other transaction was needed to avoid bouncing checks. In *Roesel*, 56 T.C. at 26, the court noted, "The conversations which were had between Milling's president or comptroller and the shareholders with respect to the purported loans, the degree of correspondence between the book overdrafts created by Milling's distributions and the amounts purportedly loaned back by its shareholders, the close proximity in time of the purported loans and the issuance of checks by Milling, and the correlation between the amounts purportedly loaned by each shareholder and his interest in Milling, all serve to establish that the purported distributions and loans were but parts of interrelated transactions which must be viewed as such for tax purposes."

the last S corporation taxable year a formula note equal to AAA as of that date. See part II.P.3.d Conversion from S Corporation to C Corporation for discussion about additional opportunities for former S corporations whose owners at the time of revocation are the same as those on December 22, 2017.

A better strategy might be for the S corporation to do a tax-free "F" reorganization,[3977] in which the existing S corporation becomes a wholly-owned subsidiary of a new parent S corporation, which parent is owned by the original S corporation's shareholders immediately before the reorganization. The parent makes an S election, and the subsidiary elects taxation as a Qualified Subchapter S Subsidiary (QSub).[3978] The original S corporation initially is disregarded from the parent, giving the parent all of the subsidiary's AAA.[3979] Later, the subsidiary's QSub election is revoked, keeping the AAA intact at the parent level, notwithstanding that the subsidiary is now taxed as a C corporation. That way, if the subsidiary later becomes a QSub, the AAA remain to help carry out distributions to the shareholders.

This strategy also might allow a faster conversion back to taxation as an S corporation, because the S election was never terminated and therefore the five year waiting period[3980] would appear not to apply.[3981] Because the QSub is wholly owned, the deemed liquidation when the QSub election is made again generally would be nontaxable.[3982]

Another alternative would be for the S corporation to transfer one or more businesses to one or more C corporations (or to separate LLCs, which elect C corporation treatment once the transfers are complete).

However, an S corporation may want to issue a promissory note before converting to C corporation, so that it can make payments to shareholders after the C corporation conversion without those payments being taxable dividends; this strategy seems appealing but may have some disadvantages relating to the related interest income and expense.[3983] The only way this accomplishes the intended result is if the C corporation subsidiary is the borrower. Unfortunately, the deemed issuance of a promissory note upon the deemed Code § 351 transaction may constitute "boot" that triggers income tax on formation.[3984] The corporation may try to borrow from a third party immediately before the conversion and distribute its AAA to its shareholders, followed by them loaning back to the corporation after it becomes a C corporation to repay the debt; however, this solution is subject to two caveats (among others referred to in fn 3984). First, liabilities in excess of debt on the deemed Code § 351 formation of the C corporation may trigger income tax on that excess; see part II.M.2.b Initial Incorporation: Effect of Assumption of Liabilities. Second, consider whether such a tight sequence may constitute a step transaction, along the lines noted in fn 3976.

The "F" reorganization strategy is especially important when converting to a C corporation the stock of which generally would qualify for the exclusion described in part II.Q.7.k. Although a corporation that had been an S corporation cannot qualify for the exclusion, the S corporation

[3977] See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.
[3978] See part II.A.2.g Qualified Subchapter S Subsidiary (QSub).
[3979] Reg. § 1.1368-2(d)(2).
[3980] See fn 318 in part II.A.2.k Terminating an S Election.
[3981] See fns 197-199 in part II.A.2.g Qualified Subchapter S Subsidiary (QSub).
[3982] See fn 204 in part II.A.2.g Qualified Subchapter S Subsidiary (QSub).
[3983] See part II.E.2.b Converting from S Corporation to C Corporation.
[3984] See fn 3537 and accompanying text in part II.M.2.a Initial Incorporation – Generally.

can form a C corporation whose stock does qualify for the exclusion,[3985] which generally requires a transfer of assets and liabilities to a new entity. This reorganization strategy facilitates a seamless transition as a matter of state law – the old corporation turns into a new C corporation for income tax purposes. However, if the old corporation becomes a C corporation directly, it retains its old tax ID,[3986] which will show a history of having been an S corporation. That history may lead the IRS to question whether the deemed brand-new C corporation is, in fact, a prior S corporation, even though the QSub regulations clearly say it is. To avoid such questions, the cumbersome asset/liability transfer may be the better way to go. Query whether one might convert the old corporation into an LLC on a tax-free and seamless state law basis, then the parent transfers the LLC into a new C corporation (or do some other equivalent seamless conversion).

Finally, consider the built-in gain tax described in part II.P.3.b.ii Built-in Gain Tax on Former C Corporations under Code § 1374. That tax is imposed when as asset with unrecognized built-in gain when the corporation converts from C to S is sold within five years. This can be pernicious when an S corporation converts to C and then back to S again. For example, an asset has a zero basis and a $1 million value before the corporation revokes its S election. The asset grows to be worth $1.3 million before the corporation switches back from C to S. The full $1.3 million of unrealized gain constitutes built-in gain, even though only $300,000 of the appreciation occurs while taxed as a C corporation.

To avoid the problem described in the preceding paragraph, consider not simply revoking the S election when first converting to C corporation. Instead, leave behind in an S corporation parent any highly appreciated assets and lease them to the C corporation, while contributing the rest of the business to a C corporation.

II.P.3.c. Conversions from Partnerships and Sole Proprietorships to C Corporations or S Corporations

Transfers from a sole proprietorship to a corporation, including a disregarded LLC electing corporate taxation,[3987] are generally nontaxable.[3988]

However, shifting from a partnership to a corporation might cause the partners to recognize gain or lose their suspended losses.[3989]

Consider what adjustments might be required to convert a partnership interest, which might have capital accounts disproportionate to profit and loss sharing and might have profit in loss sharing that is not "straight-up," into shares, generally would have identical distribution and liquidation rights (and must have such rights in the case of an S corporation).

II.P.3.c.i. Formless Conversion

When an entity taxed as a partnership elects taxation as a corporation, the partnership is deemed to contribute all of its assets and liabilities to the corporation in exchange for stock in the corporation; and, immediately thereafter, the partnership liquidates by distributing the stock

[3986] Reg. § 301.6109-1(i)(3), reproduced in full in part II.A.2.g Qualified Subchapter S Subsidiary (QSub).
[3987] Reg. § 301.7701-3(g)(1)(iv).
[3988] See part II.M.2.a. Initial Incorporation – Generally.
[3989] See part II.M.2.c Contribution of Partnership Interest to Corporation.

of the corporation to its partners.[3990] The deemed transactions are treated as occurring immediately before the close of the day before the election is effective. For example, if an election is made to change the classification is effective on January 1, the deemed transactions are treated as occurring immediately before the close of December 31 and must be reported by the owners of the entity on December 31. Thus, the last day of the partnership's taxable year will be December 31 and the first day of the corporation's taxable year will be January 1.[3991]

Rev. Rul. 2004-59 held, "If an unincorporated state law entity that is classified as a partnership for federal tax purposes converts into a state law corporation under a state law formless conversion statute, the following is deemed to occur: the partnership contributes all its assets and liabilities to the corporation in exchange for stock in such corporation, and immediately thereafter, the partnership liquidates distributing the stock of the corporation to its partners." It said that Rev. Rul. 84-111 does not apply to that situation. Rev. Rul. 84-111 is described in part II.P.3.c.ii Transfer of Partnership Assets and Liabilities to a Newly Formed Corporation in Exchange for All of its Stock.

A partnership can be converted directly into an S corporation; the corporation is not deemed formed until the partnership is deemed to have distributed its assets to the corporation:[3992]

- Suppose that, on January 1, 2009, X, a calendar year taxpayer, is taxed as a partnership. X elects to be taxed as a corporation for federal tax purposes, effective January 1, 2010. On February 1, 2010, X files an S election, effective January 1, 2010. Each person who held stock in X on January 1, 2010 also holds stock at the time the S election is made. When X elects to be taxed as a corporation, the following steps are deemed to occur: X contributes all of its assets and liabilities to the corporation in exchange for stock in the corporation, and immediately thereafter X liquidates by distributing the stock of the association to its partners. These deemed steps are treated as occurring immediately before the close of the day before the election is effective.[3993] Thus, the partnership's taxable year ends on December 31, 2009, and the corporation's first taxable year begins on January 1, 2010. Therefore, the partnership will not be deemed to own the stock of the corporation during any portion of the association's first taxable year beginning January 1, 2010, and X is eligible to elect to be an S corporation effective January 1, 2010. Additionally, because the partnership's taxable year ends immediately before the close of the day on December 31, 2009, and the corporation's first taxable year begins at the start of the day on January 1, 2010, the deemed steps will not cause X to have an intervening short taxable year in which it was a C corporation.

- On January 1, 2009, Y, a calendar year taxpayer, is taxed as a partnership. Y converts into a corporation under a state law formless conversion statute, effective January 1, 2010. As a result of the conversion, Y is classified as a corporation for federal tax purposes. On February 1, 2010, Y files an S election, effective January 1, 2010. Each person who held

[3990] Reg. § 301.7701-3(g)(1)(i). Under Rev. Rul. 2004-59, when a formless conversion occurs under state law, Rev. Rul. 84-111 does not apply. Rev. Rul. 84-111 describes the differences in the basis and holding periods of the various assets received by the corporation and the basis and holding periods of the stock received by the former partners provided the steps described are actually undertaken and the underlying assumptions and purposes for the conclusions in the revenue ruling are applicable. Except to the extent inconsistent with the above, see the text accompanying footnotes 5358-5452 for tax effects of liquidating a partnership.
[3991] Reg. § 301.770l-3(g)(3).
[3992] Rev. Rul. 2009-15.
[3993] Reg. § 301.7701-3(g)(3)(i).

stock in Y on January 1, 2010 also holds stock at the time the S election is made. The result is the same as above.

Of course, the simplest way would be just to make the S election, by the partnership filing IRS Form 2553.[3994]

Because S corporations can have only a single class of stock,[3995] capital accounts need to be made proportionate to interests in profits and losses before converting to an S corporation.[3996]

II.P.3.c.ii. Transfer of Partnership Assets and Liabilities to a Newly Formed Corporation in Exchange for All of its Stock

If the conversion is not described in part II.P.3.c.i Formless Conversion, Rev. Rul. 84-111 provides for three scenarios. In each situation, the steps the partners and partnerships take are parts of a plan to transfer the partnership operations to a corporation organized for valid business reasons in exchange for its stock and were not devices to avoid or evade recognition of gain. Because the federal income tax consequences of the three situations are the same, each partnership is considered to make a nontaxable contribution of its assets and liabilities to a corporation in exchange for its stock,[3997] followed by a distribution of the stock to the partners in liquidation of the partnership.[3998]

In the first situation, the partnership transfers all of its assets to newly-formed corporation in exchange for all the outstanding stock of the corporation and the assumption by the corporation of the partnership's liabilities. The partnership then terminates by distributing all the stock of the corporation to the partners in proportion to their partnership interests. The tax results are:

- No gain or loss is recognized by the partnership when it transfers all of its assets to the corporation in exchange for the corporation's stock and the assumption by the corporation of the partnership's liabilities.[3999]

- The corporation's basis in the assets received from the partnership equals their basis to the partnership immediately before their transfer to the corporation.[4000]

- The partnership's basis of the stock received from the corporation is the same as the partnership's basis in the assets transferred to the corporation, reduced by the liabilities assumed by the corporation, which assumption is treated as a payment of money to the partnership.[4001]

[3994] See fn. 359.
[3995] See II.A.2.i Single Class of Stock Rule, for a description of the single class of stock rules and those rules' surprising flexibility.
[3996] See fn 361 in part II.B Limited Liability Company (LLC).
[3997] Code § 351.
[3998] Rev. Rul. 70-239.
[3999] Code § 351.
[4000] Code § 362(a). However, Reg. § 1.362-3 reduces the basis of property acquired in loss importation transaction.
[4001] Code § 358.

- The corporation's assumption of the partnership's liabilities decreases each partner's share of the partnership liabilities, thus, decreasing the basis of each partner's partnership interest.[4002]

- On distribution of the stock to the partners, the partnership terminates.[4003]

- The basis of the stock distributed to the partners in liquidation of their partnership interests is, with respect to each partner, equal to the adjusted basis of the partner's interest in the partnership.[4004]

- The partnership's holding period for the stock received in the exchange includes its holding period in the capital assets and Code § 1231 assets transferred (to the extent that the stock was received in exchange for such assets).[4005]

- To the extent the stock was received in exchange for neither capital nor Code § 1231 assets, the partnership's holding period for such stock begins on the day following the date of the exchange.[4006]

- The corporation's holding period in the assets transferred to it includes the partnership's holding period.[4007]

- When the partnership distributes the stock to its partners, the partners' holding periods includes the partnership's holding period of the stock.[4008]

In the second situation, the partnership distributes all of its assets and liabilities to its partners in proportion to their partnership interests, terminating the partnership. The partners then transfer all the assets received from the partnership to a new corporation in exchange for all the corporation's outstanding stock and the corporation's assumption of the partnership's liabilities that had been assumed by the partners. The tax results are:

- On the transfer of all of the partnership's assets to its partners:

  - The partnership terminates.[4009]

  - The basis of the assets (other than money) distributed to the partners in liquidation of their partnership interests is, with respect to each partner, equal to the adjusted basis of the partner's interest, reduced by the money distributed.[4010]

- The decrease in the partnership's liabilities resulting from the transfer to its partners was offset by the partners' corresponding assumption of such liabilities, so that the net effect on

[4004] Code § 732(b),
[4005] Code § 1223(1).
[4006] See Rev. Rul. 70-598.
[4007] Code § 1223(2).
[4008] Code §§ 735(b) and 1223. Furthermore, such distribution will not violate the Code § 368(c) control requirement.
[4009] Code § 708(b)(1)(A).
[4010] Code § 732(b).

the basis of each partner's interest in the partnership, with respect to the liabilities transferred, was zero.[4011]

- No gain or loss is recognized by the partnership's former partners when the partnership transfers its assets and liabilities to the corporation in exchange for its stock.[4012]

- The (former) partners' basis in the corporation's stock is the same as their basis in the assets received in the partnership's liquidation and the transfer to the corporation, reduced by the liabilities assumed by the corporation, which assumption is treated as a payment of money to the partners.[4013]

- The corporation's basis in the assets received from the (former) partners equals the (former) partners' basis immediately before the transfer to the corporation.[4014]

- The partners' holding periods for the assets the partnership distributes to them includes the partnership's holding period.[4015]

- The partners' holding periods for the stock received in the exchange includes the partners' holding periods in the capital assets and Code § 1231 assets transferred to the corporation (to the extent that the stock was received in exchange for such assets).[4016]

- However, to the extent that the stock received was in exchange for neither capital nor Code § 1231 assets, the holding period of the stock begins on the day following the date of the exchange.

- The corporation's holding period of the partnership's assets received in the exchange includes the partners' holding periods.[4017]

In the third situation, the partners transfer their partnership interests to a newly-formed corporation in exchange for all the corporation's outstanding stock. This exchange terminates the partnership, and all of its assets and liabilities became assets and liabilities of the corporation. The tax result is:

- No gain or loss is recognized by the partners on the transfer of the partnership interests to the corporation in exchange for the corporation's stock.[4018]

- When the transfer partners transfer their partnership interests to the corporation, the partnership terminates.[4019]

- The partners' basis of the stock received from the corporation in exchange for their partnership interests equals the basis of their partnership interests transferred to the

corporation, reduced by the partnership's liabilities assumed by the corporation, the release from which is treated as a payment of money to the partners.[4020]

- The corporation's basis for the assets received in the exchange equals the basis of the partners in their partnership interests.[4021]
- The corporation's holding period includes the partnership's holding period in the assets.
- The holding period of the stock received by the former partners includes each respective partner's holding period for the partnership interest transferred,[4022] except that the holding period of the stock that was received by the partners in exchange for their interests in any unrealized receivables, inventory, or various depreciable or amortizable assets of the partnership that are neither capital assets nor Code § 1231 assets begins on the day following the date of the exchange.

II.P.3.d. Conversion from S Corporation to C Corporation

Before discussing the consequences of such a conversion, consider forming an S corporation parent before converting an S corporation directly into a C corporation, or a similar transaction, for the reasons described in fns 3977-3985 in part II.P.3.b.v Conversion from S Corporation to C Corporation then Back to S Corporation and the closing comments in that part II.P.3.b.v.

See part II.A.2.k Terminating an S Election, which includes the fact that conversion from S status to C status requires an additional tax return if done mid-year and precludes an S election for 5 years.

Converting from an S corporation to a C corporation may require the corporation to switch from the cash receipts and disbursements method of accounting to the accrual method. Generally, a C corporation cannot use the cash method,[4023] unless the corporation conducts a qualified

[4020] Code §§ 358 and 752(d).
[4021] Allocated under Code § 732(c).
[4022] Code § 1223(1).
[4023] Code § 448(a)(1).

farming business,[4024] is a qualified personal service corporation,[4025] or has gross receipts that are no more than $25 million (after 2018 adjusted for inflation).[4026]

If a corporation was an S corporation on or before December 21, 2017, during the 2-year period beginning on December 22, 2017 revokes its S election, and the owners of the stock of which, determined on the date the revocation is made, are the same owners (and in identical proportions) as on December 22, 2017 (an "eligible terminated S corporation"), then any adjustment required by a change in accounting method under Code § 481(a)(2) which is attributable to that revocation is taken into account ratably during the 6-taxable year period beginning with the year of change.[4027] A taxpayer may also apply this rule if is not required to change from cash to accrual but does anyway.[4028]

Note that S corporation earnings might be extracted in cash tax-free in the first C corporation taxable period after the final S corporation yearend.[4029] Converting the corporation into a QSub before converting it to a C corporation might also be used to preserve the AAA of a corporation whose S election is revoked.[4030]

Additionally, after that first C Corporation taxable period, an eligible terminated S corporation's distribution is chargeable to accumulated earnings and profits, in the same ratio as the amount of such AAA bears to the amount of such accumulated earnings and profits.[4031] The preamble to final regulations, T.D. 9914 (10/20/2020), explains:

[4024] Code § 448(d)(1), "Farming business," provides that a "qualified personal service corporation" is any corporation:

(A) *In general*. The term "farming business" means the trade or business of farming (within the meaning of section 263A(e)(4)).

(B) *Timber and ornamental trees*. The term "farming business" includes the raising, harvesting, or growing of trees to which section 263A(c)(5) applies.

[4025] Code § 448(d)(2), "Qualified personal service corporation," provides:

(A) substantially all of the activities of which involve the performance of services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting, and

(B) substantially all of the stock of which (by value) is held directly (or indirectly through 1 or more partnerships, S corporations, or qualified personal service corporations not described in paragraph (2) or (3) of subsection (a)) by-

   (i) employees performing services for such corporation in connection with the activities involving a field referred to in subparagraph (A),

   (ii) retired employees who had performed such services for such corporation,

   (iii) the estate of any individual described in clause (i) or (ii), or

   (iv) any other person who acquired such stock by reason of the death of an individual described in clause (i) or (ii) (but only for the 2-year period beginning on the date of the death of such individual).

To the extent provided in regulations which shall be prescribed by the Secretary, indirect holdings through a trust shall be taken into account under subparagraph (B).

[4026] Code § 448(b), (c).

[4027] Code § 481(d).

[4028] Rev. Proc. 2018-44, modifying Rev. Proc. 2018-31, § 15.01(3).

[4029] See fn. 3974, found in part II.P.3.b.v Conversion from S Corporation to C Corporation then Back to S Corporation.

[4030] See part II.P.3.b.v Conversion from S Corporation to C Corporation then Back to S Corporation, especially fns. 3977-3979.

[4031] Code § 1371(f).

Background

In the case of an S corporation, as defined in section 1361(a)(1) of the Internal Revenue Code (Code), having accumulated earnings and profits (as described in section 316(a)(1) of the Code (AE&P)) that makes a distribution of property to which section 301 would otherwise apply, section 1368(c)(1) of the Code generally treats the amount of the distribution not in excess of the S corporation's accumulated adjustments account (as defined in § 1.1368-2(a)(1) (AAA)) or the recipient shareholder's adjusted basis in such S corporation's stock as excluded from the shareholder's gross income. Section 1368(c)(2) provides that the remaining portion of the distribution is treated as a dividend (as defined in section 316(a)) to the extent of the S corporation's AE&P. Finally, section 1368(c)(3) provides that any amount of the distribution in excess of the S corporation's AAA and AE&P is applied against the shareholder's remaining adjusted basis in the stock, with any amount exceeding that adjusted basis treated as gain from the sale or exchange of property.

Generally, a distribution by a C corporation to its shareholders with respect to their stock ownership is treated as a taxable dividend to the extent of the corporation's earnings and profits. See sections 301(c) and 316(a). However, following the termination of a corporation's S election made under section 1362 of the Code (S election), section 1371(e) of the Code allows shareholders of the resulting C corporation to benefit from the corporation's former status as an S corporation with respect to distributions of money during the corporation's post-termination transition period (PTTP), which is generally the one-year period after the corporation terminates its S election. Specifically, during the PTTP, a distribution of money by the C corporation is characterized as a distribution from the corporation's AAA. The receipt of such a distribution is tax-free to the extent of the recipient shareholder's basis in its stock and the corporation's AAA balance. If the distribution exceeds the recipient shareholder's basis in its stock, but not the corporation's AAA, then the distribution is tax-free to the extent of the recipient shareholder's basis, with the remainder treated as gain from the sale of property. If the distribution exceeds the corporation's AAA, then the excess is taxed as a dividend from current earnings and profits (as described in section 316(a)(2) (CE&P)) or any AE&P from the corporation's previous existence as a corporation taxed under subchapter C. Without section 1371(e), shareholders of the former S corporation would be precluded from receiving distributions allocable to AAA.

Section 13543(a) and (b) of Public Law 115-97, 131 Stat. 2054, 2155 (2017), commonly referred to as the Tax Cuts and Jobs Act (TJCA), amended the Code by adding new sections 481(d) and 1371(f), effective as of December 22, 2017, the date of enactment of the TCJA.

Section 481(d)(1) of the Code permits a corporation that qualifies as an eligible terminated S corporation (ETSC) to take into account any 481 adjustments (as defined in part II. C of the Summary of Comments and Explanation of Revisions) which are attributable to the revocation of an S election over the section 481(d) inclusion period, which is the six-taxable-year-period beginning with the year of change (as defined in part II. C of the Summary of Comments and Explanation of Revisions). Section 481(d)(2) defines an ETSC as a C corporation meeting the following three requirements: (i) The corporation was an S corporation on December 21, 2017; (ii) the S corporation revoked its election under section 1362(a) to be an S corporation (that is, the S election) during the two-year period beginning on December 22, 2017 (revocation requirement); and (iii) the owners of the stock of the corporation, determined on the date the corporation made a revocation of its S election, are the same owners (and own identical proportions of the corporation's stock) as on December 22, 2017 (shareholder identity requirement).

Section 1371(f) extends the period during which shareholders of an ETSC can benefit from its AAA generated during the corporation's former status as an S corporation (ETSC period) by providing that, in the case of distributions of money following the PTTP, (i) the distributing ETSC's AAA is allocated to a distribution of money to which section 301 would otherwise apply (qualified distribution), and (ii) the qualified distribution is chargeable to AE&P in the same ratio as the amount of such AAA bears to the amount of such AE&P. In enacting section 1371(f), Congress determined that "it is important to provide rules to ease the transition from S corporation to C corporation for the affected taxpayers" because, based on the TCJA's revisions to the Code, "taxpayers that previously elected to be taxed as S corporations may prefer instead to be taxed as C corporations." H. Rept. 115-409, 115th Cong., 1st Sess., at 245 (Nov. 14, 2017) (House Report).

On November 7, 2019, the Department of the Treasury (Treasury Department) and the IRS published a notice of proposed rulemaking (REG-131071-18) in the Federal Register (84 FR 60011) containing proposed regulations under section 1371 and proposed amendments to the Income Tax Regulations (26 CFR part 1) under sections 481 and 1377 (proposed regulations). The Treasury Department and the IRS received 16 written or electronic comments responding to the proposed regulations. All comments received on the proposed regulations are available at http://www.regulations.gov or upon request. As no request for a public hearing was received, no hearing was held. After full consideration of the comments received, this Treasury decision adopts generally the proposed regulations with certain modifications in response to the comments received, as described in the Summary of Comments and Explanation of Revisions.

Summary of Comments and Explanation of Revisions

I. Overview

The final regulations retain the approach and structure of the proposed regulations, with certain revisions. This Summary of Comments and Explanation of Revisions discusses those revisions, as well as the comments received in response to the proposed regulations.

II. Comments on Qualification as an Eligible Terminated S Corporation

A. Significance of Date of Revocation of S Election

To qualify as an ETSC under section 481(d)(2), a corporation must satisfy the revocation requirement by making a revocation of its S election during the two-year period beginning on December 22, 2017 (two-year period). See section 481(d)(2)(A)(ii) (setting forth the revocation requirement); proposed § 1.481-5(b)(2) (same). In addition, the shareholder identity requirement must be satisfied by the same shareholders owning identical proportions of the corporation's stock on two dates: December 22, 2017, and the date on which the corporation made a revocation of its S election. See section 481(d)(2)(B) (setting forth the shareholder identity requirement); proposed § 1.481-5(b)(3) (same). But see proposed § 1.481-5(c)(1) (identifying five categories of share transfers that do not result in a change in shareholder ownership for purposes of section 481(d)(2)(B)). Consequently, the date on which a corporation makes a revocation of its S election is critical for determining ETSC qualification.

A corporation can allow the effective date of its S election revocation to occur automatically by operation of section 1362(d)(1)(C), or it can specify an effective date under section 1362(d)(1)(D). For example, a revocation made before the 16th day of the third month of an S corporation's taxable year generally is effective retroactively on the first day of that taxable year. See section 1362(d)(1)(C)(i); § 1.1362-2(a)(2)(i). In contrast, a revocation made after the 15th day of the third month of a corporation's taxable year generally is effective prospectively on the first day of the corporation's following taxable year. See section 1362(d)(1)(C)(ii); § 1.1362-2(a)(2)(i). Alternatively, the corporation may specify an immediate or prospective effective date for a revocation by expressing a date (in terms of a stated day, month, and year) that occurs on or after the date on which the revocation is made. See section 1362(d)(1)(D); § 1.1362-2(a)(2)(ii).

1. Retroactive Effective Date of the Revocation Determines ETSC Status

One commenter suggested that the final regulations revise proposed § 1.481-5(b)(2) to confirm that, in the case of a revocation with a retroactive effective date pursuant to section 1362(d)(1)(C)(i), the revocation may be treated as occurring on the retroactive effective date for purposes of ETSC qualification. Based on the stated congressional goal of facilitating the transition from S corporation status to C corporation status, the commenter contended that taxpayers reasonably could have interpreted the statute to indicate that compliance with the shareholder identity requirement would be tested on the retroactive revocation's effective date. In support of this contention, the commenter correctly noted that, in the absence of such an interpretation, a corporation would not satisfy the shareholder identity requirement for qualifying as an ETSC in proposed § 1.481-5(b)(2) and (3) if the corporation (i) had the same shareholders (and in identical proportions) on both December 22, 2017, and the retroactive effective date of the revocation, but (ii) experienced a change in shareholder ownership during the period between the retroactive effective date of the revocation and the date on which the revocation was made.

The Treasury Department and the IRS agree with the commenter's interpretation. Proposed § 1.481-5(b)(2) and (3) directly address revocations with prospective effective dates, which can be specified with significant flexibility in the revocation. A retroactive effective date for a revocation results solely by operation of section 1362(d)(1)(C)(i) and § 1.1362-2(a)(2)(i) and, in such instance, is always effective on the first day of the corporation's taxable year. To confirm the commenter's interpretation, § 1.481-5(c)(2) of the final regulations provides that, solely with regard to revocations with retroactive effective dates, a revocation may be treated as having been made on the effective date of such revocation. Accordingly, for purposes of § 1.481-5(b)(2) and (3), a corporation may test compliance with the revocation requirement and the shareholder identity requirement on either the date the revocation was made or, in the case of a revocation with a retroactive effective date, the date the revocation was effective.

2. Application of Section 7503 to a Revocation of an S Election

As discussed in part II. A of this Summary of Comments and Explanation of Revisions, the revocation requirement of section 481(d)(2)(A)(ii) requires that a corporation must make a revocation during the two-year period to qualify as an ETSC. Section 7503 provides that, "when the last day prescribed under authority of the internal revenue laws for performing any act falls on Saturday, Sunday, or a legal holiday, the performance of such act shall be considered timely if it is performed on the next succeeding day which is not a Saturday, Sunday, or a legal holiday." Because a revocation is an act made under authority of the internal revenue laws (that is, section 1362 of the Code), section 7503 applies for purposes of determining whether the revocation was made within the required two-year period. As a result of the application of section 7503 in conjunction with section 1362 and § 1.1362-2(a)(2), December 23, 2019 (a Monday), is the last day of the two-year period. Therefore, a revocation made on that date would be treated as made within the two-year period. Without the application of section 7503, December 21, 2019 (a Saturday), would have been the last day of the two-year period.

To avoid any doubt, these final regulations clarify the text of § 1.1362-2(a)(2) to provide explicitly that section 7503 applies where the last day prescribed for making a revocation occurs on a Saturday, Sunday, or legal holiday. Therefore, a revocation made on December 23, 2019, will be treated as made during the two-year period.

B. Applicability of PTTP and ETSC Period to S Corporations With No AE&P

Following the termination of an S election, section 1371(e) permits shareholders of the resulting C corporation to benefit from the corporation's former status as an S corporation with respect to distributions of money during the corporation's PTTP, which generally is the one-year period after the corporation terminates its S election. Specifically, during the PTTP, a distribution of money by the C corporation is characterized as a distribution from the corporation's AAA. The receipt of such a distribution is tax-free to the extent of the recipient shareholder's basis in the stock with respect to which the shareholder received the distribution, and is taxed as gain from the sale of property to the extent the distribution exceeds the shareholder's basis in that stock. See section 1371(e)(1). If the corporation exhausts its AAA during the PTTP, subsequent distributions are subject to treatment under section 301.

A commenter requested confirmation that the rules regarding distributions made during the PTTP, including section 1371(e) and § 1.1377-2, apply if the corporation did not have AE&P at the time that it terminated its S election. Section 1371(e)(1) provides special treatment to distributions made by a corporation during the PTTP if such distributions (i) consist of money and (ii) are made with respect to the corporation's stock. Those two conditions would be satisfied regardless of whether the distributing corporation had AE&P. Therefore, the Treasury Department and the IRS agree with the commenter's interpretation of section 1371(e) and § 1.1377-2, but have determined that no clarifying revisions to the regulations are necessary in this regard.

The commenter also requested confirmation that the rules regarding distributions made during the ETSC period would apply if the distributing corporation did not have AE&P as of the effective date of the revocation. Example 1 of proposed § 1.1371-1(d) illustrates that, if an ETSC has no AE&P as of the beginning of the day on which the revocation is effective, its historical AE&P is zero. Pursuant to proposed § 1.1371-1(a)(2)(ix) and (x), such a corporation would enter its ETSC period with a AAA ratio of 1 and an AE&P ratio of zero. Therefore, each qualified distribution would be characterized as a distribution of AAA. Based on the guidance provided in Example 1, as well as the definition of the “AAA ratio” set forth in proposed § 1.1371-1(a)(ii), the Treasury Department and the IRS have determined that no clarifying revisions to the regulations are necessary in this regard.

C. Application of Section 481(d) to Qualified Subchapter S Subsidiaries

If an S corporation wholly owns the stock of a domestic C corporation that is not an ineligible corporation described in section 1361(b)(2), the S corporation may elect under section 1361(b)(3)(B)(ii) and § 1.1361-3 to treat the C corporation as a qualified subchapter S subsidiary (QSub) such that (i) the QSub will no longer be treated as a separate corporation and (ii) all of the QSub’s assets, liabilities, and items of income, deduction, and credit will be treated as assets, liabilities, and such items (as the case may be) of the S corporation parent. If the requirements of section 1361(b)(3)(B) cease to be satisfied with respect to a QSub, including by reason of the revocation of the parent’s S election, section 1361(b)(3)(C)(i) and § 1.1361-5(b)(1)(i) provide that the corporation’s QSub election is terminated such that the QSub is treated, for purposes of the Code, as (i) a newly formed C corporation subsidiary separate from the parent and (ii) acquiring all of its assets (and assuming all of its liabilities) from the parent through an exchange to which section 351 of the Code applies (deemed section 351 exchange).

If the taxable income of any taxpayer, including a corporation, for the current year (year of change) is computed under a method of accounting that is different from the method of accounting used by the taxpayer in the preceding year (accounting method change), section 481 requires that the taxpayer must take into account those adjustments that are determined to be necessary solely by reason of the accounting method change to prevent items of income or expense from being duplicated or omitted (481 adjustments). Section 481(a). The 481 adjustments are generally taken into account in computing the taxpayer’s taxable income in the year of change. However, section 481(c) permits a taxpayer, in such manner and subject to such conditions prescribed in regulations by the Secretary of the Treasury or his delegate (Secretary), to take 481 adjustments into account in computing taxable income for the taxable year or years permitted under such regulations. As noted earlier, section 481(d)(1) permits an ETSC to take into account any 481 adjustments that are attributable to the revocation of an S election over a six-taxable year period beginning with the year of change (that is, the section 481(d) inclusion period).

Commenters have correctly observed that section 481(a) and (d) do not apply to an ETSC’s newly formed C corporation subsidiary (ETSC corporate subsidiary) that operated as a QSub prior to the revocation of its parent’s S election. Upon such a revocation, the ETSC corporate subsidiary is treated as acquiring all of its assets and assuming all of its liabilities from the ETSC in a deemed section 351 exchange. See section 1361(b)(3)(C)(i); § 1.1361-5(b)(1)(i). A corporation formed for a business purpose is a taxpayer separate from its shareholder(s). See generally *Moline Properties v. Commissioner*, 319 U.S. 436 (1943). As a result of the ETSC corporate subsidiary’s status as a new C corporation with no prior taxable year (rather than, for example, as a successor under section 381(a) of the Code), commenters have noted that the ETSC corporate subsidiary lacks any historical method of accounting from which to change. Compare § 1.446-1(e)(1) (providing that a taxpayer filing its first return may adopt any permissible method of accounting in computing taxable income for the taxable year covered by such return) with section 381(c)(4) (providing that, in general, a successor corporation must use the method of accounting used by the predecessor corporation as of the date of the section 381(a) transaction).

Notwithstanding those observations of the law, commenters have requested that the final regulations extend the section 481(d) inclusion period to an accrual method ETSC corporate subsidiary that operated as a cash method QSub of a cash method S corporation prior to the revocation of the parent’s S election. These commenters highlighted that, in the deemed section 351 exchange required by section 1361(b)(3)(C)(i) and § 1.1361-5(b)(1)(i) that results from the revocation of the parent’s S election, the accounts receivable of a former cash method QSub would be deemed transferred to the accrual method ETSC corporate subsidiary with a zero basis. See generally *Raich v. Commissioner*, 46 T.C. 604 (1966) (holding that trade accounts receivable of a cash method transferor received by an accrual basis transferee in a section 351 exchange had a zero basis). Therefore, the ETSC corporate subsidiary would recognize income as it collects amounts on the transferred receivables. In the case where the ETSC corporate subsidiary collects the entire amount of the transferred receivables during its first taxable year, commenters contended that the ETSC corporate subsidiary’s inability to include the amount received over the six-year section 481(d) inclusion period would inappropriately disadvantage the former QSub as compared to its former S corporation parent.

The Treasury Department and the IRS understand the commenters’ concerns regarding the statutorily limited application of section 481(d) and observe that the commenters’ request is not unique to the application of section 481(d), but rather addresses the longstanding treatment of former S corporations and QSubs under section 481 with regard to a deemed section 351 exchange. Throughout the nearly 25-year period since the 1996 enactment of the QSub provisions under section 1361, section 481(a)(2) and any inclusion period for a 481 adjustment have not applied with respect to former QSubs. See section 1308 of the Small Business Job Protection Act of 1996, Public Law 104-188, 110 Stat. 1755, 1782-3 (August 20, 1996). See also Rev. Proc. 97-27, 1997-1 C.B. 680, section 5.02(3)(a) (providing a four-year amortization period solely to taxpayers that have a 481 adjustment); Rev. Proc. 2015-13, 2015-5 I.R.B. 419, section 7.03(1) (same). After considering the commenters’ analysis and the explicit reference in section 481(d) to section 481(a)(2), the Treasury Department and the IRS have determined that section 481(d) does not apply to ETSC corporate subsidiaries, but rather maintains the longstanding application of section 481(a) solely to taxpayers that make an accounting method change. Accordingly, there is no authority under section 481(d) to extend the section 481(d) inclusion period to ETSC corporate subsidiaries.

Commenters also contended that the Treasury Department and the IRS could override the limited scope of section 481(d) through special QSub regulations issued under the authority provided by section 481(c), which, in the case of a taxpayer making an accounting method change, authorizes regulations permitting a taxpayer to take any 481 adjustment into account in computing taxable income for the taxable year or years permitted under such regulations. For example, commenters suggested that the final regulations permit an accrual method ETSC corporate subsidiary to elect to treat the assets received (and liabilities assumed) by the ETSC corporate subsidiary in the deemed section 351 exchange as though the subsidiary had owned such assets (and had such liabilities) in a prior taxable year, thereby creating an accounting method change upon the revocation. However, this approach contradicts the explicit text of section 1362(b)(3)(C)(i), which provides that, “[f]or purposes of this title” (that is, for purposes of all of the provisions of the Code), an ETSC corporate subsidiary “shall be treated as a new corporation.”

In the alternative, commenters suggested that the final regulations could permit taxpayers to treat the assets received (and liabilities assumed) by an ETSC corporate subsidiary as though still owned by the former S corporation on the date on which the former S corporation becomes an ETSC. Under this approach, the ETSC’s 481 adjustment would be computed as if the ETSC owned such assets and was subject to such liabilities. For support, these commenters highlighted anti-abuse regulations issued under section 263A of the Code (UNICAP anti-abuse regulations) that utilized this alternative approach. See § 1.263A-7(c)(4)(ii) (providing an anti-abuse rule regarding the use of section 351 exchanges to avoid application of section 263A). However, the UNICAP anti-abuse regulations were issued under the authority of section 263A(h)(1) rather than the authority granted the Secretary under section 481(c). See 52 FR 10052, 10059 (March 30, 1987). Section 263A(h)(1) requires the Secretary to “prescribe rules to carry out the purpose of section 263A, including regulations to prevent the use of related parties, pass-thru entities, or intermediaries to avoid the application of this section.” Section 263A(j)(1).

The Treasury Department and the IRS have considered the commenters’ suggested approaches for extending the section 481(d) inclusion period to ETSC corporate subsidiaries but have determined that section 481(c) would not support either approach. Section 481(c) and § 1.481-1(c)(2) provide the general rule that the 481 adjustment is taken into account in computing taxable income in the year of change, unless the Commissioner prescribes a different taxable year or years to take the 481 adjustment into account under §§ 1.446-1(e)(3) and 1.481-4. Any regulations issued under section 481(c) can apply only “[i]n the case of any change described in [section 481](a)” with regard to “adjustments required by [section 481](a)(2).” As acknowledged by the commenters, section 481(a) does not apply to an ETSC corporate subsidiary because such entity is newly formed and therefore could not have had a prior accounting method to potentially change.

Based on the foregoing, the final regulations do not adopt either of the commenters’ alternative suggestions or provide any inclusion period for ETSC corporate subsidiaries under section 481. The Treasury Department and the IRS, however, note that TCJA amendments to section 448(c) of the Code have significantly expanded the applicability of the cash method to C corporations, including ETSC corporate subsidiaries. As amended by section 13102(a) of the TCJA (131 Stat. 2054, 2102-3), section 448(c) provides that a C corporation may use the cash method if the corporation has average annual gross receipts not exceeding $25 million (adjusted for inflation) for its three prior taxable years. Prior to the TCJA, the gross receipts threshold under section 448(c) was $5 million. As a result, fewer ETSC corporate subsidiaries will be required to adopt the accrual method as their permissible method of accounting for their first tax return than if the section 448(c) gross receipts threshold had not been increased from $5 million to $25 million.

III. Comments Regarding the Post-Termination Transition Period

The last sentence of § 1.1377-2(b), as in effect prior to the effective date of these final regulations (no-newcomer rule), limited the special treatment provided under section 1371(e)(1) (with respect to distributions of money during a corporation's PTTP) solely to those shareholders who were shareholders of the corporation at the time that it terminated or revoked its S election (collectively, legacy shareholders). Because the rules pertaining to the PTTP and to the ETSC period serve a similar objective of easing the transition from S corporation to C corporation status, the Treasury Department and the IRS determined that the rules regarding newcomers (that is, non-legacy shareholders) should be consistent. See preamble to the proposed regulations, Explanation of Provisions, part IV. Therefore, based on the rationale for rejecting a no-newcomer rule with respect to the ETSC period, as set forth in part II. A of the Explanation of Provisions of the preamble to the proposed regulations, the Treasury Department and the IRS determined that such a rule should also not apply with respect to the PTTP and proposed the removal of the no-newcomer rule in § 1.1377-2(b). See *Id.*

A. Reliance on the § 1.1377-2(b) No-Newcomer Rule

One commenter expressed concern that elimination of the no-newcomer rule in § 1.1377-2(b) could alter bargained-for economic results if a legacy shareholder had transferred less than all of its shares prior to November 7, 2019 (that is, the publication date of the proposed regulations) or after that date but pursuant to a binding agreement entered into before that date. In particular, the commenter contended that legacy shareholders who transferred less than all of their shares would have expected that only legacy shareholders could receive distributions of AAA during the PTTP, and perhaps even during the ETSC period. According to the commenter, this expectation would have reduced the bargained-for price for the transferred shares to reflect the tax benefit of the future tax-free distributions.

The commenter provided an example in which a sole shareholder of an ETSC sold 40 percent of its stock to a third-party. The sale price was set prior to November 7, 2019, and the parties assumed that the no-newcomer rule would limit distributions of AAA to the legacy shareholder during the PTTP, and that a similar rule would apply during the ETSC period. Under the proposed elimination of the no-newcomer rule in § 1.1377-2(b), however, the newcomer, and not the legacy shareholder, would be eligible to receive 40 percent of any AAA distributed during the PTTP or ETSC period. The commenter observed that the newcomer's accession to a 40 percent interest in the corporation's AAA during the PTTP and ETSC period amounts to a transfer of a tax benefit from the legacy shareholder to the newcomer for no consideration, contrary to the parties' expectations. Therefore, the commenter recommended that the final regulations include an additional transition rule. Under this rule, if shares of a former S corporation were transferred to a newcomer pursuant to a binding agreement entered into before the applicability date of the final regulations, then, except upon unanimous agreement of current shareholders of a corporation that are legacy shareholders, the no-newcomer rule would apply during the PTTP, and a similar rule would apply during the ETSC period.

The Treasury Department and the IRS understand the concern underlying the commenter's recommendation. However, the Treasury Department and the IRS intended the applicability date provisions in the proposed regulations, and as adopted in these final regulations, to afford corporations transition flexibility in applying § 1.1377-2(b) with regard to the PTTP. Section 1.1377-2(b), as revised by the final regulations to eliminate the no-newcomer rule for special treatment under section 1371(e)(1) of distributions of money by a corporation with respect to its stock during the post-termination transition period applies to a corporation's taxable years beginning after the date of publication of the final regulations. In the case of a corporation using the calendar year as its annual accounting period, newcomers are not entitled to receive distributions of AAA before January 1, 2021, unless the corporation chooses to apply § 1.1377-2(b) before January 1, 2021. Corporations to which the commenter's transition rule would have applied generally will thus have completed their PTTPs prior to the applicability of § 1.1377-2(b). Distributions of AAA during those PTTPs would have been limited to legacy shareholders. Additionally, the commenter's proposed transition rule would add complexity in administering these rules. Accordingly, the Treasury Department and the IRS have determined that the applicability date provisions, as set forth in the proposed regulations and adopted in these final regulations, balance appropriately the protection of legacy taxpayers' expectations with the goal of the Treasury Department and the IRS to minimize complexity and administrative difficulties for S corporations, their shareholders, and the IRS.

With regard to the ETSC period, as discussed in part II. A of the Explanation of Provisions of the preamble to the proposed regulations, section 1371(f) does not contain a no-newcomer rule similar to § 1.1377-2(b), and the Treasury Department and the IRS have concluded that it is inappropriate to adopt one. Corporations may have applied a similar analysis of section 1371(f) and made distributions of AAA to newcomers during their respective ETSC periods. Providing an alternate rule in these final regulations for the ETSC period could unexpectedly alter taxpayers' bargained-for economic results. Therefore, the Treasury Department and the IRS have determined that the best way to address this situation is to allow but not require corporations to apply the final regulations addressing distributions made during the ETSC period to taxable years beginning on or before the date that these final regulations are published in the Federal Register.

B. Consideration of Request for an Additional 120-Day PTTP

A commenter recommended that the final regulations provide a new 120-day PTTP that would begin on the applicability date of the final regulations. The commenter noted that this new PTTP would create an opportunity for any C corporation with undistributed AAA that expired at the end of its PTTP to restore and distribute such AAA pursuant to section 1371(e)(1) and § 1.1377-2. The commenter contended that the elimination of the no-newcomer rule only for terminations that occur after the issuance of the proposed regulations disadvantages corporations that terminated their S election more than one year prior to issuance of the proposed regulations, as compared to corporations that terminated their S election after the issuance of the proposed regulations.

The Code sets forth a statutory definition of the PTTP that includes detailed limits on its duration. Specifically, section 1377(b)(1)(A), (B), and (C) provide three separate durations for the PTTP, the respective applicability of which depends upon particular events. While the Treasury Department and the IRS acknowledge the concerns raised by the commenter, the final regulations do not adopt the commenter's recommendation because (i) section 1377(b) provides specific, detailed, and unambiguous guidance on the duration of a PTTP, and (ii) the recommended revision to § 1.1377-2 exceeds the scope of the authority granted to prescribe regulations under sections 1371 or 1377.

IV. Consideration of Comment Regarding Treatment of ETSC Status and AAA as Section 381 Items

In the case of certain asset acquisitions, section 381(a) generally requires the acquiring corporation to succeed to and take into account the tax items described in section 381(c) of the distributor or transferor corporation. See section 381(a) (describing distributions to which section 332 of the Code applies and transfers to which section 361 of the Code applies that are carried out in connection with certain reorganizations described in section 368(a)(1) of the Code); section 381(c) (enumerating tax items of the distributor or transferor corporation that the acquiring corporation succeeds to and takes into account under section 381(a)).

A commenter requested that the final regulations confirm that ETSC status and AAA constitute tax items that an acquiring corporation would succeed to or take into account under section 381(a). The Treasury Department and the IRS have considered the issue raised by the commenter but have determined that further study would be required to promulgate the appropriate rule. In addition, the Treasury Department and the IRS have concluded that this issue exceeds the scope of the final regulations because whether AAA constitutes a tax item to which a successor may succeed under section 381 is not limited to the ETSC context. Therefore, the final regulations do not address the commenter's request.

Applicability Dates

These regulations generally apply to taxable years beginning after October 20, 2020. See §§ 1.481-6(b), 1.1371-1(e), 1.1371-2(d), and 1.1377-3(c). However, a corporation may choose to apply the rules set forth in §§ 1.481-5, 1.1371-1, and 1.1371-2 in their entirety to taxable years beginning on or before October 20, 2020. If a corporation makes the choice described in the previous sentence, all shareholders of the corporation must report consistently, and the corporation must continue to apply the rules in §§ 1.481-5, 1.1371-1, and 1.1371-2 in their entirety for the corporation's subsequent taxable years.

In addition, a corporation generally may choose to not apply the no-newcomer rule in § 1.1377-2(b) to taxable years beginning on or before October 20, 2020 and with respect to which the period described in section 6501(a) as applied to that corporation has not expired. If a corporation makes the choice described in the previous sentence, all shareholders of the corporation must report consistently, and the corporation must adopt §§ 1.481-5, 1.1371-1, 1.1371-2 (if an ETSC), and § 1.1377-2(b) in their entirety and continue to apply those rules in their entirety for the corporation's subsequent taxable years.

II.P.3.e. Conversion from Qualified Subchapter S Subsidiary to Single Member LLC

The merger of a Qualified Subchapter S Subsidiary ("QSub") into an LLC wholly owned by the QSub's parent has no income tax consequences.[4032]

[4032] Reg. § 1.1361-5(b)(3), Example (2). See fn. 139 for details.

II.P.3.f. Conversions from Partnership to Sole Proprietorships and Vice Versa

When a sole proprietorship organized as an LLC adds a member, it becomes a partnership. If the original member sells part his or her interest in the LLC to a new member, then he or she is deemed to have sold a corresponding portion of the LLC's assets to the new member,[4033] as follows:[4034]

> In this situation, the LLC, which, for federal tax purposes, is disregarded as an entity separate from its owner, is converted to a partnership when the new member, B, purchases an interest in the disregarded entity from the owner, A. B's purchase of 50% of A's ownership interest in the LLC is treated as the purchase of a 50% interest in each of the LLC's assets, which are treated as held directly by A for federal tax purposes. Immediately thereafter, A and B are treated as contributing their respective interests in those assets to a partnership in exchange for ownership interests in the partnership.
>
> Under section 1001, A recognizes gain or loss from the deemed sale of the 50% interest in each asset of the LLC to B.
>
> Under section 721(a), no gain or loss is recognized by A or B as a result of the conversion of the disregarded entity to a partnership.
>
> Under section 722, B's basis in the partnership interest is equal to $5,000, the amount paid by B to A for the assets which B is deemed to contribute to the newly-created partnership. A's basis in the partnership interest is equal to A's basis in A's 50% share of the assets of the LLC.
>
> Under section 723, the basis of the property treated as contributed to the partnership by A and B is the adjusted basis of that property in A's and B's hands immediately after the deemed sale.
>
> Under section 1223(1), A's holding period for the partnership interest received includes A's holding period in the capital assets and property described in section 1231 held by the LLC when it converted from an entity that was disregarded as an entity separate from A to a partnership. B's holding period for the partnership interest begins on the day following the date of B's purchase of the LLC interest from A. See Rev. Rul. 66-7, 1966-1 C.B. 188, which provides that the holding period of a purchased asset is computed by excluding the date on which the asset is acquired. Under section 1223(2), the partnership's holding period for the assets deemed transferred to it includes A's and B's holding periods for such assets.

[4033] See T.D. 8844 (preamble to regulations on entity conversions) (11/29/99) and Rev. Rul. 99-5. See Rev. Rul. 2001-61 and CCA 201351018 regarding retention of employer identification number. See also The Treatment of Liabilities In Rev. Rul. 99-5 and Rev. Rul. 99-6 Situations *TM Memorandum* (BNA) (3/16/2009), and AICPA Comments to IRS on Rev. Rul. 99-5 on Disregarded Entities (6/5/2013), found at http://www.aicpa.org/advocacy/tax/partnerships/downloadabledocuments/comments-on-rev-ruling-99-5-v-6-5-13submit.pdf.

[4034] Rev. Rul. 99-5, Situation 1.

However, if the new member pays the LLC for a member interest, then the old and new member are deemed to have formed a partnership, which generally qualifies as a nontaxable transaction,[4035] as follows:[4036]

> In this situation, the LLC is converted from an entity that is disregarded as an entity separate from its owner to a partnership when a new member, B, contributes cash to the LLC. B's contribution is treated as a contribution to a partnership in exchange for an ownership interest in the partnership. A is treated as contributing all of the assets of the LLC to the partnership in exchange for a partnership interest.
>
> Under section 721(a), no gain or loss is recognized by A or B as a result of the conversion of the disregarded entity to a partnership.
>
> Under section 722, B's basis in the partnership interest is equal to $10,000, the amount of cash contributed to the partnership. A's basis in the partnership interest is equal to A's basis in the assets of the LLC which A was treated as contributing to the newly-created partnership.
>
> Under section 723, the basis of the property contributed to the partnership by A is the adjusted basis of that property in A's hands. The basis of the property contributed to the partnership by B is $10,000, the amount of cash contributed to the partnership.
>
> Under section 1223(1), A's holding period for the partnership interest received includes A's holding period in the capital and section 1231 assets deemed contributed when the disregarded entity converted to a partnership. B's holding period for the partnership interest begins on the day following the date of B's contribution of money to the LLC. Under section 1223(2), the partnership's holding period for the assets transferred to it includes A's holding period.

Thus, the parties can control whether the original owner is taxed and the new owner gets an inside basis step-up, or the original owner is not taxed and the new owner does not get an inside basis step-up.[4037] However, the parties can have their cake and eat it, too: in the latter case, the new owner can transfer the partnership interest to another partnership (or corporation) in a tax-free transaction and get an inside basis step-up.[4038]

[4035] See T.D. 8844 (preamble to regulations on entity conversions) (11/29/99), Rev. Rul. 99-5, and part II.M.3 Buying into or Forming a Partnership (especially part II.M.3.a General Rule: No Gain Or Loss on Contribution to Partnership). See Rev. Rul. 2001-61 and CCA 201351018 regarding retention of employer identification number. Letter Ruling 200633019 discusses a large variety of tax issues when a trust contributes a diversified portfolio of marketable securities to a single-member LLC and then distributes LLC interests to the remaindermen; Letter Ruling 201628008 includes a more abbreviated discussion of such a transaction. See also The Treatment of Liabilities In Rev. Rul. 99-5 and Rev. Rul. 99-6 Situations 201351018 (BNA) (3/16/2009).

[4036] Rev. Rul. 99-5, Situation 2.

[4037] See part II.Q.8.e.iii.(a) Illustration of Inside Basis Issue.

[4038] See parts II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss), II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000 and II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

When an LLC with more than one member is taxed as a partnership, and the number of members later is reduced to one, it becomes a sole proprietorship for tax purposes. When one member buys out the other(s), the selling member(s) is(are) taxed based on the rules for selling a partnership interest, and the remaining member (essentially the new sole proprietor) is deemed to have bought all of the LLC's assets on that date, with no tacking of holding period for any portion of the assets.[4039] Furthermore, payments that would have been deductible by a partnership had it continued in existence are deductible by the successors to the partnership.[4040]

Pierre v. Commissioner[4041] was a reviewed opinion (12-6 vote) holding that gifts and sales of interests in a single-member limited liability company (LLC) be treated for gift tax purposes as transfers of interests in an entity rather than transfers of the underlying assets.

Initially, the transferor was the LLC's sole owner. Some LLC interests were gifted, and the rest were sold. The IRS asserted that the transfers were of the LLC's underlying assets, not interests in the LLC. It tried to apply the principles of Rev. Rul. 99-5, Situation 1, which provides:

> In this situation, the LLC, which, for federal tax purposes, is disregarded as an entity separate from its owner, is converted to a partnership when the new member, B, purchases an interest in the disregarded entity from the owner, A. B's purchase of 50% of A's ownership interest in the LLC is treated as the purchase of a 50% interest in each of the LLC's assets, which are treated as held directly by A for federal tax purposes. Immediately thereafter, A and B are treated as contributing their respective interests in those assets to a partnership in exchange for ownership interests in the partnership.

The Tax Court majority rejected the application of the check-the-box rules[4042] to this gift. Those provisions apply only "where not otherwise distinctly expressed or manifestly incompatible with the intent" of other provisions in the tax law.[4043] Fundamental gift tax precepts require that one look to the bundle of rights transferred. The Tax Court held that, under state law, an LLC interest (not an interest in the underlying assets) was transferred; applying the check-the-box regulations would be manifestly incompatible with fundamental gift tax precepts. *Pierre* is quoted in length in part III.B.1.e Valuation Issues.

The court distinguished between classifying the entity and describing the nature of the assets that were transferred. This fine line might breed litigation in the transfer tax area.

4039 Rev. Rul. 99-6; see also part II.Q.8 Exiting From or Dividing a Partnership; see Letter Ruling 201723009 when such a transaction is done inside a consolidated group. See Rev. Rul. 2001-61 and CCA 201351018 regarding retention of employer identification number. See also "The Treatment of Liabilities In Rev. Rul. 99-5 and Rev. Rul. 99-6 Situations," *TM Memorandum* (BNA) (3/16/2009). For a myriad of tax issues raised in this situation, criticizing Rev. Rul. 99-6, see AICPA Comments on Revenue Ruling 99-6 on Conversions from Partnerships to Disregarded Entities (10/1/2013), found at http://www.aicpa.org/advocacy/tax/partnerships/downloadabledocuments/comments-on-rev-ruling-99-6-submit.pdf. The AICPA points to very different results when a purchaser buys 99% instead of 100%.

4043 Code § 7701(a) (introductory language).

II.P.3.g. Rescissions, Including Rescinding Conversion of Entity

The IRS often respects rescissions for income tax purposes[4044] when a transaction is reversed in the same taxable year. The IRS explains:[4045]

> The legal concept of rescission refers to the abrogation, canceling, or voiding of a contract that has the effect of releasing the contracting parties from further obligations to each other and restoring the parties to the relative positions that they would have occupied had no contract been made. A rescission may be effected by mutual agreement of the parties, by one of the parties declaring a rescission of the contract without the consent of the other if sufficient grounds exist, or by applying to the court for a decree of rescission.
>
> The annual accounting concept requires that one must look at the transaction on an annual basis using the facts as they exist at the end of the year. That is, each taxable year is a separate unit for tax accounting purposes…..
>
> In Situation 1 the rescission of the sale … placed A and B at the end of the taxable year in the same positions as they were prior to the sale. Thus, … the original sale is to be disregarded for federal income tax purposes because the rescission extinguished any taxable income for that year with regard to that transaction…..
>
> In Situation 2, as in Situation 1, there was a completed sale in 1978. However, unlike Situation 1, because only the sale and not the rescission occurred in 1978, at the end of 1978 A and B were not in the same positions as they were prior to the sale….[T]he rescission in 1979 is disregarded with respect to the taxable events occurring in 1978.
>
> In both situations, the annual accounting period principle requires the determination of income at the close of the taxable year without regard to subsequent events.

Gateway Hotel Partners, LLC v. Commissioner[4046] upheld the requirement that the transaction cannot qualify for rescission unless undone by the end of the taxable year. *Blagaich v.*

[4044] The IRS does not have a clear policy for estate and gift tax law. However, *Neal v. U.S.*, 187 F.3d 626 (3rd Cir. 1999) allowed a rescission under Pennsylvania law and considered the gift incomplete because of it.

[4045] Rev. Rul. 80-58. Although the ruling is old, it is still viable. Rev. Proc. 2013-3, Section 5.02(1) indicated that the IRS was considering its position in the rescission area. Rev. Proc. 2014-3, Section 1.02(6) mentioned that Section 5.02(1) was deleted and that Section 3.02(8) was added, the latter providing that whether a completed transaction can be rescinded for Federal income tax purposes is an issue on which the IRS will not issue a private letter ruling. At the May 2014 meeting of the Sales, Exchanges & Basis Committee of the American Bar Association's Section of Taxation, a government representative informally stated that withdrawing its study of the area indicates that the IRS has reaffirmed its commitment to Rev. Rul. 80-58. Materials for that meeting prepared by Section practitioner members are saved as Thompson Coburn document 6044351. For more on Rev. Rul. 80-58, see New York State Bar Association Tax Section Report on the Rescission Doctrine (Report No. 1216) (8/11/2010) at www.nysba.org/Content/ContentFolders20/TaxLawSection/TaxReports/1216-Report.pdf, citing Sheldon I. Banoff, Unwinding or Rescinding a Transaction: Good Tax Planning or Tax Fraud, *Taxes – The Tax Magazine* (Dec. 1984) at 942; and David H. Schnabel, Revisionist History: Retroactive Federal Tax Planning (2009) (unpublished manuscript), mentioning that an earlier version is published at 60 *Tax Lawyer* 685 (2007).

[4046] T.C. Memo. 2014-5.

Commissioner[4047] also refused to apply rescission to a payment that the taxpayer returned over three years later after payment, when she did so only after being order by a court to do so. However, in another case, a taxpayer was permitted to rescind a disclaimer based on erroneous tax advice, more than two years after the disclaimer, after joining the IRS as a party to a legal action to rescind.[4048]

[4047] T.C. Memo. 2016-2, holding:

> … In general, the annual accounting period principle reflected in section 451, considered in the light of the judicially articulated claim-of-right doctrine, limits application of the rescission exception such that, without regard to subsequent events, income received by the taxpayer under a claim of right and retained by her at the close of the taxable year must be included in gross income for that year. See [*Penn v. Robertson*, 115 F.2d 167, 175 (4th Cir. 1940)]; Rev. Rul. 80-58, Situation 2, 1980-1 C.B. at 182.
>
> ….
>
> The facts show that, in 2010, petitioner took possession of the whole amount in question, $400,000, without any substantial limitations or restrictions as to its disposition. She recognized no liability and made no provision to repay that amount until nearly three years later. None of the cases petitioner cites as allowing a relaxation of the same-year requirement for rescission is factually comparable to her own, and they provide no rationale for departing from the general rule.
>
> With respect to the equitable concerns petitioner raised in her motion—The equities in this case simply do not support strict adherence to the one-year guideline in the rescission doctrine.—we note only that our statutory mandate does not permit us to decide this case on the basis of general principles of equity. See *Knapp v. Commissioner*, 90 T.C. 430, 440 (1988) (citations omitted) (The Tax Court is a court of limited jurisdiction. *** We have only the powers expressly conferred on us by Congress, and may not apply equitable principles to expand our jurisdiction beyond the limits of section 7442.), *aff'd*, 867 F.2d 749 (2d Cir. 1989).

The court rejected the taxpayer's reliance on *Hope v. Commissioner*, 55 T.C. 1020, 1030 (1971), *aff'd*, 471 F.2d 738 (3d Cir. 1973), which the court said:

> suggests that the rescission doctrine may apply even when repayment of a gain does not formally occur in the year of receipt, but only if, before the end of the year, [the] taxpayer recognizes his liability under an existing and fixed obligation to repay the amount received and makes provisions for repayment.

The court rejected the taxpayer's reliance on *Guffey v. United States*, 339 F.2d 759 (9th Cir. 1964), which case the court described:

> In *Guffey*, the installment purchasers of the Guffeys' home sued to rescind the sale contract when, in the following year, they discovered dry rot, moved out, and refused to make further payments. A settlement was reached under which the purchasers' suit was dismissed and the Guffeys obtained a quitclaim deed and retained the previously received payments as rent.…While the Court of Appeals did state that it can fairly be said that the settlement with the *** original purchasers was, in substance, a reduction in the purchase price, *id.*, the Guffeys returned nothing to the original purchasers, the original purchasers apparently agreeing that the payments could be kept as rent. The sort of passive unwinding of the agreement that occurred in *Guffey* did not and could not occur in the case at bar; the only way Mr. Burns could be restored to status quo ante was if petitioner returned the $400,000.

[4048] *Breakiron v. Gudonis*, 106 A.F.T.R.2d 2010-5999 (D. Mass. 2010). The IRS was joined as a party when it attempted to collect gift tax. In another disclaimer case, the court dismissed the IRS as a party. *Van Vliet v. Van Vliet*, 115 A.F.T.R.2d 2015-803 (E.D. Va. 2015).

When I discussed *Breakiron* on a list-serve, one of the lawyers who represented Breakiron responded on 12/30/2022:

> Legally, *Breakiron* relied primarily on an incomplete gift theory (building on *Dodge*, *Berger*, etc.) – in theory, if the gift really is incomplete because the donor has a state law right to rescind the transaction on grounds of mistake, it remains incomplete for so long as that right remains

The IRS approved a rescission of a conversion from partnership to corporation where everything happened in one year and the taxpayer had a good nontax reason.[4049] The IRS has also allowed a taxpayer to rescind a restructuring involving a subsidiary to reverse unintended adverse Federal income tax consequences.[4050] However, the IRS will not issue any more letter rulings in this area.[4051]

A taxpayer cannot unilaterally recast a transaction merely because the taxpayer decides that documenting it differently would have produced a better tax result.[4052]

For the rescission to be effective, both parties must be put back in their original positions.[4053] A January 2005 article further analyzes the rescission doctrine.[4054]

> outstanding (at some point you'd no longer be able to enforce it because of limitations periods, laches, etc., which would render the gift complete at that time).
> Practically, it mattered significantly that the case was decided in federal court (both the underlying question of whether state law allowed a rescission in that particular case, and the question of that rescission's effect on federal tax law), allowing the judge to set aside the issues around collusion, etc. in the *Van den Wymelenberg* series of cases, and of course (unlike state court actions generally) making the state law determination regarding the mistake binding on the IRS as a party. We'd originally filed the action in state court, going the *Bosch* route, naming the government as a party but expecting them to ignore us, but to our surprise the DOJ removed the case to federal court. Once they did that, we realized what a lucky result that was, as (assuming we won on the merits) we'd have a binding ruling and wouldn't have to worry about whether and to what extent a state court action would solve the problem. I don't know whether anyone else has seen a case like this removed to federal court by the government, but (judging from the *Van Vliet* case that Steve cited) I suspect they decided after that to let things stay in state court, and deflect attempts to bring actions in federal court where they could, and then choose to fight instead over the extent to which those state court decisions affect federal tax liabilities.

[4049] Letter Ruling 200952036.
[4050] Letter Ruling 201008033.
[4051] Rev. Proc. 2017-3, Section 3.02(8), listed as a no-rule area "whether a completed transaction can be rescinded for Federal income tax purposes."
[4052] *Makric Enterprises, Inc. v. Commissioner*, TC Memo 2016-44, *aff'd* 119 A.F.T.R.2d ¶ 2017-580 (5th Cir. 3/27/2017).
[4053] Citing *Hutcheson v. Commissioner*, T.C. Memo. 1996-127 for that proposition, *Fitch v. Commissioner*, T.C. Memo. 2012-358, rebuffed IRS arguments in favor of rescinding a sale of a CPA practice, which was followed by a repurchase shortly thereafter when the original buyer's health deteriorated unexpectedly:

> The repurchase agreement, by its own terms, effected a sale of the C.P.A. practice from Mr. Gronke to Mr. Fitch and not an unwinding of the earlier sale. There is no evidence that Mr. Fitch and Mr. Gronke intended to abrogate, cancel, or void the sale agreement. Furthermore, we do not believe that the repurchase agreement returned them to their original positions. The C.P.A. practice continued as a dynamic, ongoing enterprise for approximately 4-1/2 months after the sale transaction, and we cannot say that Mr. Fitch received the C.P.A. practice back in the exact same condition in which he had sold it. Accordingly, we find that the sale and repurchase transactions were not rescinded.

Query whether the court was just being sympathetic to the seriously ill parties and really would set such a high bar if the taxpayers had sought to rescind the agreement.
[4054] Morehouse, The Rescission Doctrine: Tax Do-Overs, Another Roll of the Dice, *TM Real Estate Journal* (BNA) (1/7/2015).

An S election may be rescinded until the last day on which the election could have been timely made.[4055] The IRS will not permit a revocation that is more retroactive than that.[4056] A corporation may rescind such a revocation at any time before the revocation becomes effective, but only with the consent of each person who consented to the revocation and each person who became a shareholder of the corporation within the period beginning on the first day after the date the revocation was made and ending on the date on which the rescission is made.[4057]

For various state law grounds for rescission or reformation (retroactive), see Harrington, "Retroactive Revisions and Reversals: Risks and Rewards," Chapter 4, 55TH Annual Heckerling Institute on Estate Planning (2021).

As to tax issues, *Commissioner v. Estate of Bosch*, 387 U.S. 456 (1967), held:

> First, the Commissioner was not made a party to either of the proceedings here and neither had the effect of res judicata, *Freuler v. Helvering*, *supra*, nor did the principle of collateral estoppel apply. It can hardly be denied that both state proceedings were brought for the purpose of directly affecting federal estate tax liability. Next, it must be remembered that it was a federal taxing statute that the Congress enacted and upon which we are here passing. Therefore, in construing it, we must look to the legislative history surrounding it. We find that the report of the Senate Finance Committee recommending enactment of the marital deduction used very guarded language in referring to the very question involved here. It said that "proper regard," not finality, "should be given to interpretation of the will" by state courts and then only when entered by a court "in a bona fide adversary proceeding." S. Rep. No. 1013, Pt. 2, 80th Cong., 2d Sess., p. 4. We cannot say that the authors of this directive intended that the decrees of state trial courts were to be conclusive and binding on the computation of the federal estate tax as levied by the Congress. If the Congress had intended state trial court determinations to have that effect on the federal actions, it certainly would have said so—which it did not do. On the contrary, we believe it intended the marital deduction to be strictly construed and applied. Not only did it indicate that only "proper regard" was to be accorded state decrees but it placed specific limitations on the allowance of the deduction as set out in §§ 2056(b), (c), and (d). These restrictive limitations clearly indicate the great care that Congress exercised in the drawing of the Act and indicate also a definite concern with the elimination of loopholes and escape hatches that might jeopardize the federal revenue. This also is in keeping with the long-established policy of the Congress, as expressed in the Rules of Decision Act, 28 U.S.C. § 1652. There it is provided that in the absence of federal requirements such as the Constitution or Acts of Congress, the "laws of the several states ... shall be regarded as rules of decision in civil actions in the courts of the United States, in cases where they apply." This Court has held that judicial decisions are "laws of the ... state" within the section. *Erie R. Co. v. Tompkins*, *supra*; *Cohen v. Beneficial Loan Corp.*, 337 U. S. 541 (1949); *King v. Order of Travelers*, 333 U.S. 153 (1948). Moreover, even in diversity cases this Court has further held that while the decrees of "lower state courts" should be "attributed some weight ... the decision [is] not controlling ..." where the highest court of the State has not spoken on the point. *King v. Order of Travelers*, *supra*, at 161. And in *West v. A. T. & T. Co.*, 311 U.S. 223 (1940), this Court further held that "an intermediate appellate state court ...

[4055] Reg. § 1.1362-2(a)(2)(i).
[4056] Christian & Grant, ¶32.02. Revocation, *Subchapter S Taxation* (WG&L), cites varies IRS correspondence to that effect.
[4057] Reg. § 1.1362-2(a)(4).

is a datum for ascertaining state law which is not to be disregarded by a federal court unless it is convinced by other persuasive data that the highest court of the state would decide otherwise." At 237. Thus, under some conditions, federal authority may not be bound even by an intermediate state appellate court ruling. It follows here then, that when the application of a federal statute is involved, the decision of a state trial court as to an underlying issue of state law should *a fortiori* not be controlling. This is but an application of the rule of *Erie R. Co. v. Tompkins*, *supra*, where state law as announced by the highest court of the State is to be followed. This is not a diversity case but the same principle may be applied for the same reasons, *viz.*, the underlying substantive rule involved is based on state law and the State's highest court is the best authority on its own law. If there be no decision by that court then federal authority must apply what it finds to be the state law after giving "proper regard" to relevant rulings of other courts of the State. In this respect, it may be said to be, in effect, sitting as a state court. *Bernhardt v. Polygraphic Co.*, 350 U.S. 198 (1955).

We believe that this would avoid much of the uncertainty that would result from the "non-adversary" approach and at the same time would be fair to the taxpayer and protect the federal revenue as well.

Harrington's 2021 *Heckelring* article cited above explained various gift/estate tax recognitions of attempts to undo various transactions:

C. Gifts: Reformation for Scrivener's Error. Some relevant federal tax cases:

1. *Kraus Est. v. Comr.*, T.C. Memo 1988-154, *aff'd in part and rev'd in part*, 875 F.2d 597 (7th Cir. 1989), *on remand*, T.C. Memo 1990-399. Clear and convincing proof existed of scrivener's error in omitting general power of appointment for trust intended to qualify for marital deduction; court reformation given effect for federal estate tax purposes.

2. *Rapp v. Comm'r*, 140 F.3d 1211 (9th Cir. 1998). Marital deduction denied because all income was not required to be paid to spouse. No evidence of mistake or intention to qualify for marital deduction introduced. Court held that the state court order reforming the trust with consent of all parties did not operate to allow the marital deduction.

3. *Marguerita Touche v. Comm'rs*, 58 T.C. 565 (1972), *acq*. 1972-2 CB 3. Incorrect percentage interest in property recited in deed. Corrected deed recorded after attorney learned of mistake from IRS letter. Held that there was no completed gift as to the portion conveyed by mistake.

4. In *Dodge v. U.S.*, 413 F.2d 1239 (5th Cir 1969), taxpayer meant to transfer a 1/5 undivided interest in real estate to charity. Instead, the deed conveyed her entire interest. The deed was reformed to correct the mistake. The IRS rejected a charitable deduction for a subsequent transfer in the same property, concluding that taxpayer had already conveyed all of her interest. The Fifth Circuit affirmed the District Court's decision that the gift of all of her interest was incomplete as to the fraction erroneously conveyed, and the reformation was respected.

5. *Harris v Comm'r*, 461 F.2d 554 (5th Cir. 1972). Taxpayers created a trust for their child that did not qualify for the annual exclusion as a present interest. Donors

amended the trust and claimed the inadvertent omission by the typist of the crucial provisions. The court held that the donors failed to prove that their intent at the time of the gift was to include the missing language. The drafting lawyer stated in his opening statement that the omitted language was a typing error but did not testify, and this gave rise to inference that his testimony would not be favorable.

6. Rev. Rul. 71-416, 1971-2 CB 83, gives retroactive correction of a divorce decree where the mistake was computational rather than based on a misunderstanding of federal tax law.

7. There are many private rulings that address reformations to correct a scrivener's error. Some recent examples are PLRs 201941023 and 201837009. In both of these rulings, the applicable state law require clear and convincing evidence of the error. The rulings do not provide any specific details as to what the proof entailed but merely state that "an examination of the relevant trust instruments, affidavits, and representations of the parties" indicated that the original trust terms resulting from scrivener's error were contrary to the settlor's intent.

D. Gifts: Retroactive Reformation for Other Mistakes.

1. *Berger v. U.S.*, 487 F. Supp. 49 (W.D. 1980). Settlor Berger believed that he needed to transfer most of his assets to an irrevocable trust to comply with ethics rules for a high level government job. Berger did not receive the job but also learned that his transfer would not have been necessary had he received the position. The Pennsylvania Orphans Court reformed the trusts to be revocable based on state law allowing reformation for mistake of law or fact. District Court held that trust was revocable and taxpayer received a gift tax refund.

2. *Flitcroft v. Comr.*, 328 F.2d 449 (9th Cir. 1964). A provision making the trust irrevocable was inadvertently left out, which under state law made the trust revocable; trust was reformed in state court to be clearly irrevocable, which was held to be effective for federal gift and income tax purposes.

3. *Neal v. U.S.*, 82 AFTR 2d 98-5429, 98-2 USTC ¶60318 (DC PA 1998), *aff'd* 187 F3d 626 (3rd Cir. 1999). Taxpayer created a grantor retained income trust ("GRIT") in 1988. In 1989, the IRS issued Notice 89-99 that disqualified her GRIT under then existing IRC § 2036(c) because it included a reversionary interest worth more than 25% of the trust value. To comply with the Notice, taxpayer released her contingent reversion and paid a gift tax. After retroactive repeal of Sec 2036(c), taxpayer rescinded her release and claimed a refund of the gift tax. The Third Circuit affirmed the lower court's holding that taxpayer's release was based on a mistake and her gift tax paid should be refunded. But see *Lange v. U.S.*, 78 AFTR 2d 96-6553 (DC IN 1996), with same basic facts as *Neal*.

4. In *Breakiron v Gudonis*, 106 AFTR 2d 2010-5999, (DC MA 2010), parent created a QPRT for 10 years with the real estate to pass equally to two children at the end of the term. The son of the parent attempted to disclaim his interest so all would pass to his sister but did so more than 9 months after the creation of the QPRT because his lawyer had incorrectly advised him that he had until 9 months after the QPRT terminated to disclaim without gift tax consequences. Gift tax of

$2.3 million was imposed on the nonqualified disclaimer. Son sought rescission of his disclaimer in state court and the IRS removed to federal court. The District Court applied Massachusetts law and found that a written instrument may be reformed or rescinded in equity on grounds of mistake if there is full, clear and decisive proof of the mistake and that in *Kaufman v. Richard*, 442 Mass. 1010, 811 NE 2d 987 (2004), the state court recognized that a disclaimer could be reformed or rescinded where the intent was to minimize tax consequences for disclaimant's children. The son's disclaimers stated that they were intended to be qualified disclaimers under federal law. Rescission was granted effective as of the date of the disclaimer.

5. A number of private letter rulings have recognized that when a state's substantive law permits reformation to conform an instrument to the grantor's original intent, the changes will be given retroactive effect for federal tax purposes, even if the mistake is not a scrivener's error. See, *e.g.*, Private Letter Rulings 200423006, 200450033, 200311020, 200201020, 200143019 and 200147028, 200144018. For example, in PLR 200423006, the taxpayer's attorney gave wrong advice when he told the client that the trust income had to be distributed to the grantor's great-grandchildren when the great-grandchildren reached age 21. The grantor's great-grandchildren were unborn when the trust was created and the attorney apparently incorrectly advised the taxpayer that accumulating income past age 21 violated the local rule against accumulations. The taxpayer signed a trust instrument that reflected this incorrect advice. The grantor had signed four other trusts drafted at the same time for his grandchildren, in which mandatory income was not payable until age 35. The IRS ruled that a reformation based on the attorney's erroneous advice was a mistake of law and a scrivener's error, and that correcting it did not affect the effective date GST exempt status of the trust.

E. Gifts: Reformation Not Recognized Retroactively for Mistake.

1. *Van Den Wymelenberg v. U.S.*, 397 F.2d 443 (7th Cir. 1968), *cert. denied*, 393 U.S. 953 (1968). Taxpayer intended gifts to a trust to qualify for the gift tax annual exclusion. The trust did not qualify due to lawyer's error, but was later amended by taxpayer. The court held that the amendment had no retroactive effect and that reformation may relate back to original transfer as to the parties, but does not change rights of government.

2. Several cases have held that the reformation did not relate back to the date of the transfer to affect tax consequences. See, *M.T. Straight Trust v. Comm'r*, 245 F.2d 327 (8th Cir. 1957); *Sinopoulo v. Jones*, 154 F.2d 648 (10th Cir. 1946); *American Nurserymen Publishing Co. v. Comm'r*, 75 T.C. 271 (1980), *aff'd*. 673 F.2d 1333 (7th Cir. 1981); *Estate of Starkey v. U.S.*, 58 F.Supp.2d 939 (DC IN 1999); *Lange v. U.S.*, 78 AFTR 2d 96-6553 (DC IN 1996) (with same basic facts as *Neal* regarding IRC §2036(c), *supra*).

F. Failure to Qualify for Charitable Deduction--Special Rules.

1. Secs. 2055(e)(3) and 2522(c)(4) recognize retroactive to date of transfer "qualified reformations" as defined in IRC §2055(e)(3)(B).

2. For estate tax purposes, the complete termination of a disqualifying power to consume, invade or appropriate property for the benefit of an individual before the due date including extensions for filing the federal estate tax return due to the death of that individual before such power has been exercised is treated the same as a qualified disclaimer. IRC §2055(a), flush language at end, Treas. Reg. § 20.2055-2(c)(ii).

Harrington's 2021 *Heckelring* article cited above explained the rescission doctrine for income tax purposes:

> Rev. Rul. 80-58 addresses the rescission doctrine and concludes that when a real estate sale is rescinded in the same reporting period the sale is ignored for income tax purposes. However, the ruling also states (without discussing IRC § 1341, discussed below) that if the real estate sale is rescinded in the year after the sale, the seller reacquires the real estate with its basis being the amount that the seller repays.
>
> The ruling essentially recognizes a rescission under the facts described as retroactive if in the same taxable year and treats the rescission as a second independent transaction if it occurs in a subsequent year. However, the IRS also has required that parties be restored to their original positions for the doctrine to apply. There has been no requirement that an underlying legal basis exists for the rescission so that the agreement of the parties alone is an acceptable basis for the rescission.
>
> 1. The taxpayer's intent or motivation may not matter. In PLR 201211009, adverse tax consequences seemed to be the sole reason for the rescission. In that ruling, a stock sale was rescinded in the same taxable year as the sale and the transaction was redone later with a new buyer to be able to make an election under a IRC § 338(h)(10) where the buyer in the first transaction did not qualify for the election. In *Davis v. U.S.*, 378 F. Supp. 579 (ND TX 1974), a transfer that was intended as a gift by a mistake of the accountant was structured as a sale. The sale was reversed in the same tax year and redone as a gift, and the court held that there was no taxable sale. Other rulings allow rescission in the same year to nullify tax consequences where economic conditions have changed. See, *e.g.*, Rev. Rul. 74-501, 1974-2 CB 98; PLRs 200613027; 200923010.
>
> 2. The IRS currently has a no rule policy on whether a completed transaction may be rescinded for federal income tax purposes, in place since 2012 when it announced that it is studying the issues with rescissions. Rev. Proc. 2012-3, 2012-1 IRB 113, 5.02.02. However, William Alexander, IRS associate chief counsel (corporate), said at the New York State Bar Association Tax Section summer meeting in July 2013 that no such guidance will be coming out and that the rescission no-rule will stay in place for the indefinite future, where it remains at this time. 2013 TNT 127-1 (July 2, 2013); Rev. Proc. 2021-3, 2021-1 IRB 140, 3.02(8).

For income tax purposes, the focus is on correction within the same taxable year, to preserve the concept of annual accounting periods. When issues involve more than one taxable year, see part II.G.4.m Fixing Unfair Income Tax Results.

II.P.3.h. Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization

When transferring a corporation's business to a new partnership, consider doing the following:

1. The shareholders form a new corporation with ownership identical to the old corporation's ownership.

2. The shareholders contribute their stock of the old corporation to the new corporation, making the old corporation a wholly owned subsidiary of the new corporation. If the old corporation is an S corporation, the new corporation files Form 8869 to make the old corporation a disregarded entity.[4058]

3. The day after making a Qsub election (if an S corporation is involved),[4059] the old corporation converts or is merged into a limited liability company that is a disregarded entity. Consider filing Form 8832 to ensure that the converted limited liability company does not automatically convert from a QSub back into a tax corporation, like it was treated before the Code § 368(a)(1)(F) reorganization.[4060]

4. Optional: Either the new corporation then transfers its member interest in the LLC to a limited partnership, or the LLC itself admits one or more additional members to convert the LLC to an entity taxed as a partnership.

5. Prepare the statement described in Reg. § 1.368-3 that needs to be filed with relevant tax returns.

To qualify as an F reorganization[4061] nontaxable for federal income tax purposes (always check state income tax rules), this or any other transaction must result in a mere change in identity, form, or place of organization of one corporation.[4062] A transaction involving an actual or deemed transfer is a mere change only if:

- Immediately after the reorganization, all the stock of the resulting corporation, including any stock of the resulting corporation issued before the reorganization, must have been distributed (or deemed distributed) in exchange for stock of the transferor corporation;[4063]

[4058] See fn. 4078.
[4059] See fn. 192 in part II.A.2.g Qualified Subchapter S Subsidiary (QSub).
[4060] I don't view this as necessary, but others recommend it, and I don't mind filing Form 8832 to make others happy.
[4061] Code § 368(a)(1)(F).
[4062] Reg. § 1.368-2(m)(1). For an analysis of the background to this regulation and its impact, see Kliegman and Chen, Some Ado About a Nothing: Final F Reorganization Regulations, *TM Memorandum* (BNA) (4/4/2016). The article suggests that Rev. Rul. 68-349 appears to violate the requirements of the text accompanying fns. 4063-4064; it has been suggested that informal comments at the January 2016 meeting of the American Bar Association's Section of Taxation indicate that the government might not have considered the regulations' impact on that ruling.
[4063] However, a de minimis amount of stock issued by the resulting corporation other than in respect of stock of the transferor corporation to facilitate the organization of the resulting corporation or maintain its legal existence is disregarded. Reg. § 1.368-2(m)(1)(i).

- The same person or persons must own all of the stock of the transferor corporation, determined immediately before the reorganization, and of the resulting corporation, determined immediately after the reorganization, in identical proportions;[4064]

- The resulting corporation does not hold any property or have any tax attributes[4065] immediately before the reorganization;[4066]

- The transferring corporation completely liquidates, for federal income tax purposes, in the reorganization;[4067]

- Immediately after the reorganization, no corporation other than the resulting corporation holds property that was held by the transferor corporation immediately before the reorganization, if such other corporation would, as a result, succeed to and take into account the items of the transferor corporation described in Code § 381(c);[4068] and

- Immediately after the reorganization, the resulting corporation does not hold property acquired from a corporation other than the transferor corporation if the resulting corporation would, as a result, succeed to and take into account the items of such other corporation described in Code § 381(c).[4069]

The last two bullet points emphasize that tax attributes cannot change in an F reorganization.[4070] Thus, when a corporation engages in an F reorganization, the part of the tax year before the reorganization and the part after constitute a single tax year,[4071] and the

---

[4064] However, this requirement is not violated if one or more holders of stock in the transferor corporation exchange stock in the transferor corporation for stock of equivalent value in the resulting corporation, but having different terms from those of the stock in the transferor corporation, or receive a distribution of money or other property from either the transferor corporation or the resulting corporation, whether or not in exchange for stock in the transferor corporation or the resulting corporation. Reg. § 1.368-2(m)(1)(ii).
[4065] Including those specified in Code § 381(c).
[4066] However, this requirement is not violated if the resulting corporation holds or has held a de minimis amount of assets to facilitate its organization or maintain its legal existence, and has tax attributes related to holding those assets, or holds the proceeds of borrowings undertaken in connection with the potential F reorganization. Reg. § 1.368-2(m)(1)(iii).
[4067] However, the transferor corporation is not required to dissolve under applicable law and may retain a de minimis amount of assets for the sole purpose of preserving its legal existence. Reg. § 1.368-2(m)(1)(iv).
[4068] Reg. § 1.368-2(m)(1)(v). The preamble, T.D. 9739, explains:

> Thus, a transaction that divides the property or tax attributes of a Transferor Corporation between or among acquiring corporations, or that leads to potential competing claims to such tax attributes, will not qualify as a Mere Change.

[4069] Reg. § 1.368-2(m)(1)(vi). The preamble, T.D. 9739, explains:

> Thus, a transaction that involves simultaneous acquisitions of property and tax attributes from multiple transferor corporations (such as the transaction described in Rev. Rul. 58-422, 1958-2 CB 145) will not qualify as a Mere Change.

[4070] The preamble, T.D. 9739, says:

> From a federal income tax perspective, F reorganizations are generally neutral, involving no change in ownership or assets, no end to the taxable year, and inheritance of the tax attributes described in section 381(c) without a limitation on the carryback of losses. See, for example, Rev. Rul. 96-29 (discussed in section 3.B.ii. of the Background); § 1.381(b)-1(a)(2).

[4071] Reg. § 1.381(b)-1(a)(2) provides:

resulting corporation must file a single full-year return using the same EIN;[4072] however, if the old corporation was domestic and the new one is foreign, the F reorganization does close the tax year.[4073] In a purely domestic F reorganization, the new corporation's filing a tax return runs the statute of limitations for the old corporation's activity that was reported on the new corporation's return.[4074]

Continuity of the business enterprise and a continuity of interest are not required to qualify as an F reorganization.[4075]

Subject to certain limitations, an F reorganization might consist of a series of related transactions that together result in a mere change of one corporation.[4076]

> *Reorganizations under section 368(a)(1)(F)*. In the case of a reorganization qualifying under section 368(a)(1)(F) (whether or not such reorganization also qualifies under any other provision of section 368(a)(1)), the acquiring corporation shall be treated (for purposes of section 381) just as the transferor corporation would have been treated if there had been no reorganization. Thus, the taxable year of the transferor corporation shall not end on the date of transfer merely because of the transfer; a net operating loss of the acquiring corporation for any taxable year ending after the date of transfer shall be carried back in accordance with section 172(b) in computing the taxable income of the transferor corporation for a taxable year ending before the date of transfer; and the tax attributes of the transferor corporation enumerated in section 381(c) shall be taken into account by the acquiring corporation as if there had been no reorganization.

[4072] Rev. Rul. 73-526, Situation (3) described these facts:

> Corporation R was chartered in state X. It reincorporated in state Y as corporation S, a new corporate entity under the laws of state Y. The assets and liabilities of R were transferred to corporation S. Prior to the reincorporation, corporation R had been assigned an identifying number. Except for the technical difference of forming a new corporate entity chartered in state Y, the surviving corporation, S, is the same corporation as the transferor corporation, R. The same business with the same assets and the same stockholders is continued in the newly chartered entity. Consequently, the reincorporation constitutes a reorganization within the meaning of section 368(a)(1)(F) of the Internal Revenue Code of 1954. Under section 1.381(b)-1(a)(2) of the Income Tax Regulations, the acquiring corporation is treated just as the transferor corporation would have been treated in the absence of a reorganization, and the taxable year of the transferor does not close on the date of transfer. Thus, a final return is not required of corporation R in this transaction.

Rev. Rul. 73-526 concluded:

> Since the surviving corporation, S, is for Federal income tax purposes treated as the same corporation as the transferor corporation, R, the identifying number assigned to corporation R should be continued in use by corporation S after the transaction.

[4073] Reg. § 1.367(a)-1(e).

[4074] *New Capital Fire, Inc. v. Commissioner*, T.C. Memo. 2017-177, rejecting the IRS' contention that failing to file a return for the old corporation kept the statute of limitations open. The new corporation's return properly disclosed the F reorganization. The court held:

> New Capital's 2002 return purported to and did include Old Capital's income from January 1 through December 4, 2002. Respondent has not alleged, and we do not find, that New Capital's 2002 return was false or fraudulent with intent to evade tax as it pertains to Old Capital. It was respondent's duty to determine, within the period of limitations provided by section 6501(a), whether New Capital's 2002 return, as it pertains to Old Capital, was erroneous in any respect. The exception under section 6501(c)(3) does not apply. Accordingly, assessment of the determined deficiency and additions to tax is barred by the statute of limitations.

[4075] Reg. § 1.368-2(m)(2).

[4076] Reg. § 1.368-2(m)(3), which provides:

It has been suggested that substantive changes of ownership that were not allowed before these regulations are now allowed:[4077]

- Exchanging stock for stock of equivalent value but with different terms, or

- Either the old or new corporations distributing cash or other property.

Sometimes a conversion generally involves a direct or indirect merger of a corporation into an unincorporated entity taxed as a corporation.[4078] For example, an LLC that is taxed as an

---

> *Series of transactions*. A potential F reorganization consisting of a series of related transactions that together result in a mere change of one corporation may qualify as a reorganization under section 368(a)(1)(F), whether or not certain steps in the series, viewed in isolation, could be subject to other Code provisions, such as sections 304(a), 331, 332, or 351. However, see paragraph (k) of this section for transactions that qualify as reorganizations under section 368(a) and will not be recharacterized as a mere change as a result of one or more subsequent transfers of assets or stock.

The preamble, T.D. 9739, explains:

> In some cases, business or legal considerations may require extra steps to complete a transaction that is intended to qualify as a Mere Change. As discussed in section 3.B.i. of the Background, the Treasury Department and the IRS concluded that the words however effected in the statutory definition of F reorganization reflect a Congressional intent to treat a series of transactions that together result in a Mere Change as an F reorganization, even if the transfer (or deemed transfer) of property from the Transferor Corporation to the Resulting Corporation occurs indirectly. The Final Regulations confirm this conclusion by providing that a Potential F Reorganization consisting of a series of related transactions that together result in a Mere Change may qualify as an F reorganization, whether or not certain steps in the series, viewed in isolation, might, for example, be treated as a redemption under section 304(a), as a complete liquidation under section 331 or section 332, or as a transfer of property under section 351. For example, the first step in an F reorganization of a corporation owned by individual shareholders could be a dissolution of the Transferor Corporation, so long as this step is followed by a transfer of all the assets of the Transferor Corporation to a Resulting Corporation. However, see § 1.368-2(k) for completed reorganizations that will not be recharacterized as a Mere Change as a result of one or more subsequent transfers of assets or stock, such as where a Transferor Corporation transfers all of its assets to its parent corporation in liquidation, followed by the parent corporation's retransfer of those assets to a new corporation. See also Rev. Rul. 69-617, 1969-2 CB 57 (an upstream merger followed by a contribution of all the target assets to a new subsidiary corporation is a reorganization under sections 368(a)(1)(A) and 368(a)(2)(C)).

The preamble further discussed such a reorganization's role in a larger transaction:

> As discussed in section 3.B.ii. of the Background, the Treasury Department and the IRS recognized that an F reorganization may be a step, or a series of steps, before, within, or after other transactions that effect more than a Mere Change, even if the Resulting Corporation has only a transitory existence following the Mere Change. In some cases an F reorganization sets the stage for later transactions by alleviating non-tax impediments to a transfer of assets. In other cases, prior transactions may tailor the assets and shareholders of the Transferor Corporation before the commencement of the F reorganization. Although an F reorganization may facilitate another transaction that is part of the same plan, the Treasury Department and the IRS have concluded that step transaction principles generally should not recharacterize F reorganizations because F reorganizations involve only one corporation and do not resemble sales of assets.

[4077] McMahon, Recent Developments in Federal Income Taxation of Corporations and Partnerships, 64th Annual Montana Tax Institute (10/14/2016).

[4078] A direct approach is found Reg. § 1.368-2(m)(4), Example (8), and the logistics are explained in Letter Ruling 200839017. See Riser, Hiding Your Stuff in Plain Sight (Without Trusts): Dr. Funbundle (or How I Learned to Stop Worrying and Love Sec. 368(a)(1)(F)), American Bar Association Section of Real

S corporation can move assets comprising one line of business into a new parent LLC taxed as an S corporation that assumes its tax attributes and then under Code § 355 distribute assets comprising another line of business into another LLC taxed as an S corporation.[4079] Generally,

Property, Trust & Estate Law, 2009 Spring Symposia, discussing Letter Ruling 200701017. See also Rev. Ruls. 64-250, 73-256, and 2008-18 and Letter Rulings 200528021, 200622025, and 200719005. See also Kalinka, Transfer of an Interest in an LLC Taxed As an S corporation Raises Many Questions, p. 23 *Taxes-The Tax Magazine* (October 2007); Christian & Grant, ¶ 29.07. 'F' Reorganizations, *Subchapter S Taxation* (WG&L); and Gassman, Crotty, and O'Leary, The Estate Planner's Guide to New Parent F Reorganizations, *Estate Planning Journal* (WG&L), May 2008. These issues were discussed at the Fall 2009 Asset Protection Committee meeting of the American College of Trust & Estate Counsel (ACTEC) in, which included some practical materials for LLCs taxed as S corporations that are available to ACTEC Fellows. For whether a new employer identification number (IRS tax ID) is needed, see fns 188-191 in part II.A.2.g Qualified Subchapter S Subsidiary (QSub). Although Rev. Rul. 2008-18 says that the new entity retains the new entity's S election, I had suggested that the new entity file IRS Form 2553. However, Form 8869, line 14 asks, "Is this election being made in combination with a section 368(a)(1)(F) reorganization described in Rev. Rul. 2008-18, where the subsidiary was an S corporation immediately before the election and a newly formed holding company will be the subsidiary's parent?" and provides the following instructions:

> This box should be checked "Yes" if this election is being made pursuant to a reorganization under section 368(a)(1)(F) and Rev. Rul. 2008-18. This occurs when a newly formed parent holding company holds the stock of the subsidiary that was an S corporation immediately before the transaction and the transaction otherwise qualifies as a reorganization under section 368(a)(1)(F). No Form 2553, Election by a Small Business Corporation, is required to be filed by the parent. See Rev. Rul. 2008-18, 2008-13 I.R.B. 674, for details.

Letter Ruling 199947034, found in fn. 7284, ruled that Code § 2701 did not apply to such a reorganization.

See fn. 359 in part II.B Limited Liability Company (LLC) if the new entity is an LLC electing taxation as an S corporation and fn. 192 in part II.A.2.g Qualified Subchapter S Subsidiary (QSub) regarding the timing of an LLC electing S corporation status before acquiring a QSub.

[4079] Letter Ruling 201638004. The facts were:

(1) The X members will contribute all of their X equity units to Y, a newly formed-State X limited liability company, in exchange for all of the Y equity units.
(2) X will elect to become, or by default will become, a disregarded entity or qualified subchapter S subsidiary for Federal tax purposes. After this step, Y expects to continue X's S corporation election.
(3) X will distribute the assets comprising the Retained Business to Y in a transaction that it expects to be disregarded for Federal income tax purposes. After this step, X would continue to hold the assets comprising the Distributed Business.
(4) Y will transfer all of the equity units of X to Z, a newly-formed State X limited liability company, solely in exchange for all of the Z equity units. After this step, Z will hold only the equity units in X, which continues to hold the assets comprising the Distributed Business.
(5) Y will distribute pro rata all of the equity units of Z to Y's members in a transaction intended to qualify under section 355 of the Internal Revenue Code (the Distribution).

After reciting various representations, the ruling held:

(1) For purposes of determining whether Steps 1 and 2, viewed together, result in the realization of gain or loss under section 1001 (see *Weiss v. Stearn*, 265 U.S. 242 (1924)), or a reorganization under section 368(a)(1)(F) (see Rev. Rul. 72-206, 1972-1 C.B. 104), Steps 3 through 5 shall be disregarded.
(2) For U.S. Federal income tax purposes, Steps 3 through 5 will be treated as a direct transfer of the Distributed Business by Y to Z in exchange for all of the equity units of Z and the assumption of associated liabilities, followed by the pro rata distribution by Y of all of the equity units of Z to Y's members.
(3) X's S election will not terminate as a result of the completion of Steps 1 and 2, but continues for Y.

for an S corporation, I recommend that the LLC file a new Form 2553, election to be taxed as an S corporation, which converts the LLC to a corporation and makes an S election at the same time;[4080] however, when an existing S corporation passes its S corporation tax attributes to a new parent through a Code § 368(a)(1)(F) reorganization in which the old corporation becomes a qualified subchapter S subsidiary (QSub), only a QSub election is made, which results in the parent becoming an S corporation, as described in fn 4078. Query whether one wants to file Form 2553 for the new parent anyway, in case the Code § 368(a)(1)(F) reorganization is somehow deficient. Regarding tax IDs of those involved in Code § 368(a)(1)(F) reorganizations, see fns 4078-4080 and parts II.G.1 How and When to Obtain or Change an Employer Identification Number (EIN) and II.P.3 Conversions.

Letter Ruling 202102007 involved the following facts and rulings:

> **Summary of Facts**
>
> Oldco, prior to the Completed Transaction, was a publicly traded State A corporation and the common parent of an affiliated group of corporations that filed a consolidated federal income tax return (the "Oldco Group"). Oldco owned all the stock of Sub 1, which in turn held substantially all of the assets and operations of the Oldco Group.
>
> Oldco formerly operated a business that generated Historic Liabilities. Prior to the Completed Transaction, the Historic Liabilities were obligations of Oldco for state law purposes. Oldco undertook the Completed Transaction (described below) in order to separate its core business operations from the Historic Liabilities and to better manage the Historic Liabilities.
>
> **Completed Transaction**
>
> The Completed Transaction has been completed as of the date of this ruling, but either the tax return has not yet been filed for the year in which the transaction was completed or the tax return was filed for the year in which the transaction was completed, but this ruling request was filed prior to the filing of the tax return.
>
> The steps of the Completed Transaction are set forth below:
>
> (i) On Date 1, Oldco formed Newco, a State A corporation.
>
> (ii) On Date 2, Newco formed LLC, a State A limited liability company that will be treated as a disregarded entity for federal income tax purposes.
>
> (iii) On Date 3, Oldco merged with and into LLC, with LLC as the surviving entity. In the merger, the Oldco shareholders exchanged their shares of Oldco stock for shares of Newco stock. Steps (i) through (iii), collectively, are referred to as the "Potential Reorganization."
>
> Newco shareholders held no economic interest in LLC following the Potential Reorganization, except by reason of their ownership of Newco stock. At all times before

[4080] See fn. 359 and the accompanying and following text. Also consider what happens if there is some defect in Form 2553 that might make its filing invalid. Is converting into a partnership or a C corporation the lesser of two evils? If the latter, consider filing Form 8832 before Form 2553.

and following the Potential Reorganization, Newco had the sole authority to appoint LLC's board of directors.

(iv) On Date 4, Newco and LLC entered into the Support Agreement, whereby Newco agreed to contribute funds to LLC in order to ensure LLC's ongoing solvency.

(v) On Date 4, LLC distributed the stock of Sub 1 to Newco.

Representations

The taxpayer makes the following representations with respect to the Completed Transaction:

a) LLC is a domestic eligible entity under Treas. Reg. § 301.7701-3(a).

b) For all tax, accounting, financial statement, books, records, and corporate purposes, Newco and LLC have reported and will consistently report and treat Newco as the sole member and sole owner of LLC immediately before and immediately after the Potential Reorganization.

c) Except for the issue of the Shareholder Rights included in the LLC Agreement, the Potential Reorganization will qualify as a reorganization under section 368(a)(1)(F).

Rulings

Based solely on the information provided and the representations set forth above, we rule as follows regarding the Completed Transaction:

1) At the time of and immediately after the Potential Reorganization, LLC was an entity disregarded as separate from Newco under Treas. Reg. § 301.7701-3(b)(1)(ii) for federal income tax purposes.

2) The Shareholder Rights included in the LLC Agreement will not preclude the Potential Reorganization from otherwise qualifying as a reorganization under section 368(a)(1)(F).

Consider a different approach when the corporation has sold all of its business assets. See part II.F.2 Asset Protection Benefits of Dissolving the Business Entity After Asset Sale.

Nonrecognition treatment does not necessarily apply if foreign connections exist. *TBL Licensing LLC v. Commissioner*, 158 T.C. No. 1 (2022), explained:

> The rules of section 367 provide an overlay to the corporate nonrecognition provisions found in subchapter C of subtitle A, chapter 1 of the Code. When one of the parties to a transaction is a foreign corporation, affording the transaction the same nonrecognition treatment it would receive if the parties were domestic could lead to inappropriate results. When foreign corporations are involved, property can move in and out of the U.S. tax jurisdiction. Reflecting those changes in status requires adjustments to the normal nonrecognition rules. In particular, a U.S. person who makes an "outbound" transfer of property to a foreign corporation might be required to recognize gain even if, had the transfer been made to a U.S. corporation, it would have been entitled to

nonrecognition treatment. Section 367(a), which applies to outbound transfers of most types of property, achieves that result by providing, subject to significant exceptions, that the foreign corporation that receives the property is not treated as a corporation. Outbound transfers of intangible property are not covered by section 367(a) but are instead addressed by section 367(d). Section 367(d) generally requires the U.S. transferor of intangible property to recognize gain in the form of ordinary income, but the timing of that income recognition varies depending on the circumstances….

Letter Ruling 202339009 involved the following facts and conclusions:

Summary of Facts

Parent, a Country A corporation, is the foreign parent of a worldwide group (collectively, the "Parent Group"). Parent has a single class of voting common stock outstanding that is owned by the public (the "Shareholders") and publicly traded. Parent's stock is primarily listed on Exchange Y.

Parent owns all of the stock of FSub, a foreign corporation organized under the laws of Country C. FSub, through its subsidiaries, owns and operates all of the Parent Group's foreign business operations.

Parent owns all of the stock of US Sub, a U.S. corporation organized under the laws of State D. US Sub is the common parent of an affiliated group of corporations that files a consolidated return for federal income tax purposes. Prior to the Proposed Transaction, Parent will contribute all of the stock of US Sub to FSub.

Proposed Transaction

For what are represented to be valid business purposes, Parent intends to redomicile in Country B through the following steps (collectively, the "Proposed Transaction"):

1. Parent will form Resulting, a Country B corporation. Parent will own a nominal amount of shares of Resulting.

2. Parent will subscribe for additional shares of Resulting for nominal consideration and instruct Resulting to issue such shares for the benefit of the Shareholders on its behalf, in the same ratio as their ownership in Parent. The nominal amount of shares of Resulting held by Parent will be cancelled.

3. Parent will sell all of the shares of FSub to Resulting pursuant to the laws of Country A in exchange for promissory notes. The notes will be non-interest bearing, demand notes with a face value equal to the fair market value of FSub's shares.

4. The Shareholders will exchange all of their Parent stock for Resulting stock (the "Resulting Exchange").

5. Resulting's shares will be listed on and begin trading on Exchange Z.

6. Parent will file a notice of amendment to convert into a Country A private limited company (an eligible entity for purposes of Treas. Reg. § 301.7701-3).

Approximately *a* days after the Resulting Exchange and during which time Resulting's shares will be traded on Exchange Z, Parent will convert.

7. Effective as of the date of the conversion, Parent will make an election to be classified as disregarded from its owner for federal income tax purposes (the "Election").

Representations

1. Step 3 will be structured as a sale transaction solely for Country A purposes.

2. No planned purchase or sale of stock of Resulting during the period of time between the Resulting Exchange and the Election will be included as part of the Plan of Reorganization.

Rulings

Based solely on the information submitted and representations made, we rule as follows:

1. For federal income tax purposes, Steps 2, 3, 4, 6, and 7 of the Proposed Transaction will be treated as if 100 percent of the stock of Parent was contributed to Resulting and, subsequently, Parent made an election to be classified as disregarded from its owner for federal income tax purposes.

2. The period of time between the Resulting Exchange and the Election will not prevent the Proposed Transaction from qualifying as a reorganization under section 368(a)(1)(F).

3. Sales or exchanges of Resulting stock during the period of time between the Resulting Exchange and the Election will not prevent the Proposed Transaction from qualifying as a reorganization under section 368(a)(1)(F). Treas. Reg. § 1.368-2(m)(1)(ii).

II.P.3.i. Common Equity for Preferred Equity and Vice Versa

In the C corporation arena, Rev. Rul. 77-238 provides that converting common stock to preferred and vice versa may be nontaxable. Pay particular attention to Situation 1, because further below we will discuss arrangements with similar ideas in other entities. Rev. Rul. 77-238 involved the following situations:

Situation 1.

Corporation X is engaged in a manufacturing business and has shares of voting common stock and shares of <Page 116>nonvoting preferred stock outstanding. All the common stock is owned by employees of X. The certificate of incorporation requires that the shareholders of X convert their common stock into preferred stock at a specified exchange rate upon their retirement from X, or have the stock redeemed for cash. The taxpayer, a retiring employee of X, exchanged the X common stock for X preferred stock of equal value pursuant to the conversion privilege. The purpose of the conversion privilege is to eliminate common stock ownership by retiring employees and to reduce the cash expenditures by X that would otherwise result if the common stock of retiring employees were redeemed for cash.

Situation 2.

Corporation Y is engaged in a manufacturing business and has shares of voting common stock and shares of nonvoting preferred stock outstanding. The certificate of incorporation gives the shareholders of Y the right to convert their preferred stock into common stock at a specified exchange rate. The taxpayer, pursuant to the conversion privilege, exchanged preferred stock for Y common stock of equal value. The purpose of the conversion privilege is to encourage the conversion of preferred stock into common stock in order to simplify the capital structure of the corporation by eliminating the preferred stock.

Rev. Rul. 77-238 recited the law and provided the analysis and holding below:

Section 368(a)(1) of the Internal Revenue Code of 1954, in defining the term “reorganization,” includes a recapitalization as one of the kinds of transactions so defined.

Section 1.368-2(e) of the Income Tax Regulations provides, in part, that a transaction involving the exchange of common stock for preferred stock of the same corporation and a transaction involving the exchange of preferred stock for common stock are recapitalizations within the meaning of section 368(a)(1)(E) of the Code.

Section 354(a)(1) of the Code provides, in part, that no gain or loss will be recognized if stock or securities in a corporation a party to a reorganization are, in pursuance of a plan of reorganization, exchanged solely for stock or securities in a corporation a party to the same reorganization.

Section 1.368-1(c) of the regulations provides that the nonrecognition provisions of the Code relating to exchanges pursuant to reorganizations defined in section 368(a)(1) of the Code are not applicable unless the exchanges are in pursuance of a plan of reorganization.

Section 1.368-2(g) of the regulations provides that the transaction embraced in a plan of reorganization must not only come within the specific language of section 368(a) of the Code, but the readjustments involved in the exchange or distributions effected in the consummation thereof must be undertaken for reasons germane to the continuance of the business of a corporation a party to the reorganization.

The conversions of stock in Situation 1 were in furtherance of a corporate business purpose to encourage the conversion of common stock into preferred stock thereby permitting the corporation to use the cash that would otherwise be expended to redeem the common stock for other business purposes, and were pursuant to a continuing plan of reorganization represented by the conversion privilege embodied in the certificate of incorporation. Likewise, the conversions of stock in Situation 2 were in furtherance of a corporate business purpose to simplify the capital structure, and were in pursuance of a plan of reorganization. See Rev. Rul. 56-179, 1956-1 C.B. 187.

> Accordingly, the exchanges of stock in Situation 1 and Situation 2 pursuant to the conversion privileges involved are reorganizations within the meaning of section 368(a)(1)(E) of the Code. Under section 354(a)(1), no gain or loss is recognized to the taxpayers involved upon the exchanges of stock pursuant to the conversion privileges.
>
> Compare Rev. Rul. 72-265, 1972-1 C.B. 222, regarding the exercise of the conversion privilege provided for in a corporate debenture.[4081]

Note that dividend payments are required to achieve the desired objectives, making this strategy less desirable for a C corporation than for a partnership or an S corporation. See part II.E.1 Comparing Taxes on Annual Operations of C Corporations and Pass-Through Entities, especially subparts II.E.1.a Taxes Imposed on C Corporations and II.E.1.b Taxes Imposed on S Corporations, Partnerships, and Sole Proprietorships.

The goals of Situation 1 are easily attained in a partnership structure – and without the requirements for a corporation referred to above but not necessarily more easily. First, a partnership can rearrange profits interests so long as the partners' rights to existing capital are not changed; see part II.C.6 Shifting Rights to Future Profits. This restructuring may require appraising the partnership's assets as if a liquidation had occurred, so as to preserve the partners' rights to existing capital. The resulting structure is described in part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion – especially part II.H.11.a Basics of Preferred Partnerships. A redemption of the preferred partnership interest may also be done on a generally more favorable basis than is available for corporation stock; see part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736 – especially subpart II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale – and consider the restrictions against continued corporate employment in certain situations described in part II.Q.7.a.iv Dividends; Avoiding Dividend Treatment Using Redemptions under Code §§ 302 and 303.

An S corporation cannot have two classes of equity that differ and to distribution or liquidation rights; see part II.A.2.i Single Class of Stock Rule. However, an S corporation can reorganize and form an LLC subsidiary; see part II.A.2.j.i Using a Partnership to Avoid S Corporation Limitations on Identity or Number of Owners or to Permit Non-Pro Rata Equity Interests. Then the LLC subsidiary can issue a profits interest to one or more key employees; see part II.M.4.f Issuing a Profits Interest to a Service Provider. If the key employee is also a shareholder, consider getting an expert opinion that the profits interest is reasonable compensation for past, current, or future services rather than a distribution, because a distribution can have serious tax consequences, as described in parts II.Q.7.h.ii Taxation of Shareholders When Corporation Distributes Cash or Other Property and II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders (in an S corporation, the corporate taxation would be reported on K-1s to shareholders instead of paid by the corporation); also note in a family business part III.B.7.c Code § 2701 Interaction with Income Tax Planning, the subparts to which explore various avenues to consider pursuing.

[4081] Rev. Rul. 72-265 held that the exchange of a convertible debenture for stock under the embedded conversion option was not a realization event, except if the debenture was an installment note (Rev. Rul. 72-264 providing that exception).

II.Q. Exiting from or Dividing a Business

If selling less than all of a corporation's assets, see part II.Q.7.o Reorganizing to Sell a Business That Is Less Than All of a Corporation's Assets.

II.Q.1. General Principles When Selling Ownership of a Business

A business' value is the present value of the expected future cash flows to its owners. A buyer uses these cash flows to pay the purchase price:

- ***Third-Party Financing***. A third-party lender provides cash to pay the purchase price in a lump sum. Business risk is shared between the buyer and the third-party lender, with the buyer assuming substantially all of the risk. Because the seller receives all cash up-front, the seller's risk is minimal.

- ***Seller Financing***. A series of payments from the buyer to the seller is evidenced through a promissory note. From a technical legal viewpoint, the buyer has all of the risk. However, as a practical matter, the seller is subject to business risk because the buyer is much less likely to pay if the business' cash flow is insufficient to service this debt. At any given point in time, the buyer is likely to withhold part or all of the remaining payments if the business' cash flow is less than expected. From an income tax viewpoint, the seller might be able to use the installment method to defer income tax on the gain on sale,[4082] subject to limitations if and to the extent that the business interest sold is a partnership interest with "hot assets,"[4083] as well as acceleration in various events.[4084]

- ***Equity Financing***. The seller receives payments based on the business' performance over a short period of time following the transfer, or the timing of buyer's payments depends on the business' profitability. The taxation of contingent sales proceeds in the corporate arena[4085] is more uncertain than in the partnership arena.[4086]

[4082] Even though stock was generally listed on the stock market, taxpayers who were affiliates as defined in Rule 144 under the 1933 Act and could not sell their unregistered shares of stock in Company on the Market, except pursuant to the volume limitations and other restrictions imposed by Rule 144 could sell their shares on the installment method. Letter Ruling 9803021. Furthermore, stock in an S corporation was eligible for installment sale treatment even though it held marketable securities. Letter Ruling 9306003 reasoned:

> Application of section 453(k)(2) to the S Common Stock is inappropriate. The flush language of section 453(k) provides the Secretary with the authority to provide for the application of section 453(k) in whole or in part for transactions in which the rules of the section would be avoided through use of related parties, pass-thru entities, or intermediaries. Because the Secretary has not issued regulations pursuant to this authority, however, the flush language may not be applied to the sale of the S Common Stock. Thus, because the S Common Stock is neither traded on an established securities market nor convertible into such publicly traded property, section 453(k)(2) does not apply to the sale of the S Common Stock.

However, the legislative history to the Tax Reform Act of 1986, PL 99-514, authorized the issuance of retroactive regulations disallowing the avoidance of the rules regarding publicly traded stock through use of related parties or other intermediaries.

[4083] See part II.Q.8.e.ii.(c) Availability of Installment Sale Deferral for Sales of Partnership Interests.

[4084] See part II.G.15 Limitations on the Use of Installment Sales.

[4085] Skinner, Earn-Outs in Public Company Acquisitions: New CVRs Raise Unsettled Tax Issues, Journal of Taxation (Dec 2010).

[4086] See part II.Q.8.b.ii, Partnership Redemption – Complete Withdrawal Using Code § 736.

When the buyer uses debt to pay for the business, two layers of tax are imposed:

- First, the buyer pays income tax on the earnings used to repay the debt.
  - For a partnership or S corporation, if owners are taxed on income from operations at a 34.6%-45.8% ordinary federal and state income tax rate, the business must earn $153-185 of profits to fund a $100 principal payment on the debt.[4087]
  - A C corporation structure exacerbates this. If dividends are taxed at a 28.8% combined federal and state income rate, a $140 dividend generates $100 after tax. To distribute $140 to its shareholders, a C corporation that is subject to taxes on income from operations at a 26% ordinary federal and state income tax rate must generate over $189 of income. Thus, over $189 of business earnings are required to fund a $100 principal payment on the debt.
  - The interest component is easier to finance, assuming the interest is fully deductible.[4088] For a partnership or S corporation, only $100 of earnings is necessary to make a $100 interest payment. However, for a C corporation that is subject to taxes on income from operations at a 26% ordinary federal and state income tax rate, earnings of $189 are required to pay a $100 dividend.[4089]
- The seller pays tax on the sale. For example, if the seller has a combined 30% federal and state income tax rate, the seller nets $70 on every $100 of purchase price that constitutes capital gain. However, the seller would pay ordinary income tax on any interest component, so that $100 of interest payments would net only $50 to a seller subject to taxes on income from operations at a 50% ordinary federal and state income tax rate. Note that, although capital gain rates apply to the sale of stock in a C corporation or an S corporation, ordinary income tax rates apply to the portion of the sale of a partnership interest attributable to "hot assets."[4090]

[4087] However, if the owner is a partner who must pay self-employment tax on the earnings, additional earnings are required to pay the self-employment tax. Holding the partnership interest through an S corporation should avoid this issue.

[4088] See part II.G.20.a Code § 163(j) Limitation on Deducting Business Interest Expense. Also see part III.A.3 Trusts Holding Stock in S Corporations, for a discussion of various types of trusts that can hold stock in an S corporation, including part III.A.3.e.iii Comparing QSSTs to ESBTs, which addresses deducting interest on a loan to buy such stock in footnotes 6133-6076.

[4089] If an individual buyer/shareholder itemizes deductions, the buyer would deduct the interest as investment interest expense. Investment interest expense is deductible to the extent of net investment income. Code § 163(d). Preferably, the buyer would have ordinary interest or nonqualified dividends sufficient to generate this net investment income. Otherwise, the qualified dividends would need to be taxed at ordinary rates to constitute investment income; however, investment interest deducted at ordinary income tax rates generally would offset dividend income taxed using ordinary income tax rates. This comparison is not totally accurate, however, in that the dividend income is included in adjusted gross income (AGI) and can result in reduced itemized deductions and have other adverse AGI-related tax effects. If the buyer is a C corporation, these concerns are not present, and the corporation may also benefit from a dividends received deduction that can reduce or eliminate the tax on the dividends; however, the buyer's own shareholders would be taxed when the buyer distributes whatever return it receives on its investment.

[4090] See part II.Q.8.e.ii.(b) Character of Gain.

From these examples, some principles emerge:

- ***Paying Principal***. Principal payments can require from $153[4091]-$189[4092] of income to be generated to provide the seller with $71[4093]-$100[4094] after tax. Thus, the tax cost of principal payments represents 35%-62% of the earnings.

- ***Paying Interest***. Interest payments provide a deduction, which is less expensive for the buyer to pay than principal.

- ***Efficiency of Entity***. The tax cost is lowest for:

    - Interest or other deductible payments on the sale of a partnership or S corporation, or

    - Principal payments to the extent of the seller's basis.

    - Reinvested earnings increase the basis of S corporation stock or a partnership interest but not increase the basis of C corporation stock.[4095]

One may defer or avoid gain on the sale of a business using tools in parts II.G.7 Deferral or Partial Exclusion of Capital Gains (Even from Investment Assets) Invested in Opportunity Zones, II.Q.7.m Deferring Gain on Sale of Marketable Securities by Investing in a Specialized Small Business Investment Company, or II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation. However, because buyers prefer to get a basis step-in in the business' property, always consider parts II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations, II.Q.1.e Trying to Avoid Possible Ordinary Income on the Sale of a Partnership or S Corporation, II.Q.1.f Code § 1060 Allocation Rule When Selling Business, and II.Q.1.g Partnership Basis Adjustments. An important point gleaned from these parts is that gain on the sale of an S corporation's assets increases the business interest's basis and avoids gain on the sale of the S corporation stock itself. Conversely, the sale of an interest in a business taxed as a partnership is taxable but generates a basis increase in the business' assets; furthermore, depending on the jurisdiction, the sale of a partnership interest may avoid state income tax on the deemed asset sale, as described in *Vas Holdings & Investments LLC v. Commissioner of Revenue*, 186 N.E. 3d 1240 (Mass. 2022), which is discussed in part II.J.3.e.ii.(f) Business Income; *Fielding* (MN 2018); *Metropoulos* (CA 2022). The need to generate higher basis in the business' assets reduces the benefit of a tax-free sale of stock that does not generate that increased inside basis.

Some taxpayers consider deferring gain using the Code § 453 installment sale rules. See parts II.Q.3 Installment Sales - Deferring Tax on Lump Sum Payout Expected More than Two Years in the Future and II.G.15 Limitations on the Use of Installment Sales. However, redeeming a partnership interest tends to help a seller even more than an installment sale. See part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale.

[4091] $153-$185 for a partnership or S corporation.
[4092] For a C corporation.
[4093] For the gain component of principal payments, net of capital gain tax.
[4094] For the portion of principal payments representing a return of basis.
[4095] See part II.E.2.a Transferring the Business, especially fns 1024-1025 regarding basis increases for partnerships and S corporations.

II.Q.1.a. Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis

To minimize a sale's tax bite illustrated below, as discussed in the discussion after the illustrations tax planners seek structures with characteristics similar to interest or other deductible payments on the sale of a partnership or S corporation.[4096] The discussion below shows that seller-financed sales of partnership interests can avoid capital gain tax relative to a sale of stock in an S corporation (or a C corporation). Furthermore, the partnership sale structure allows goodwill to be sold later subject to capital gain rates, whereas a sale of goodwill generates slow deductions and may cause disadvantages for the future sale of that goodwill.[4097]

As noted earlier, reinvested earnings increase the basis of S corporation stock or a partnership interest but not increase the basis of C corporation stock.[4098] Thus, the gain component for a C corporation is likely to be much larger than that for a sale of S corporation stock or a partnership interest. Note, however, that some or all of up to $10 million of the gain on the sale of C corporation stock might be excluded from taxable income under part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation; this exclusion is increased to ten times the greater of the adjusted basis or fair market value of property contributed with respect to original issue stock.[4099] Thus, starting as a partnership and later converting to a C corporation may increase this exclusion, but the partnership cannot be worth more than $50 million when converted.[4100]

Further below is a discussion of special opportunities to shift towards a partnership structure,[4101] which generally is the best overall structure, the structure of which[4102] and a summary of ways to shift[4103] were described earlier in these materials.

For now, let's focus on ways to extract value that any entity can try to use.

4096 This is a little simplistic, in that partnerships also have unique benefits (earlier use of basis in installment sales; if considering such a sale, see part II.Q.8.e.ii.(c) Availability of Installment Sale Deferral for Sales of Partnership Interests) and detriments (look at partnership's underlying assets to determine the character of gain on sale). See II.Q.8 Exiting From or Dividing a Partnership, especially II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736 and II.Q.8.e.ii Transfer of Partnership Interests: Effect on Transferring Partner.

4097 For more details, see part II.Q.1.c.i Taxation When a Business Sells Goodwill; Contrast with Nonqualified Deferred Compensation.

4098 See part II.E.2.a Transferring the Business, especially fns 1024-1025 regarding basis increases for partnerships and S corporations.

4099 Code § 1202(b)(1). For this purpose, basis includes the fair market value of property contributed. See fns 5190-5033 of part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

4100 See fns 5238-5242 of part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

4101 See II.Q.8.b.iii Partnership Alternative to Seller-Financed Sale of Goodwill, regarding how a corporation might shift future appreciation to a partnership.

4102 See parts II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and II.E.6 Recommended Partnership Structure – Flowchart.

4103 See part II.E.7 Migrating into Partnership Structure.

II.Q.1.a.i. Scenario for Moderate State Tax

Consider the portion of the business' equity representing internally generated goodwill, and assume the following tax rates, which might or might not be attained:

An individual in a top bracket might be taxed at a rate of 34.6%-45.8%, consisting of:

- 29.6%-37% ordinary income tax (depending on whether the Code § 199A 20% deduction is available)
- zero-3.8% net investment income tax (working in the business may avoid this tax, and exceptions to SE tax may apply as well), and
- 5% state income tax.

The individual in a top bracket is assumed taxed at a rate of 28.8%, consisting of 20% capital gain tax, 3.8% net investment income tax, and 5% state income tax.

Sale of Goodwill - Assumptions

C corp. income tax rate:	26.0%	federal and state
Individual capital gain rate:	20.0%	federal
	5.0%	state
	3.8%	NII tax
	28.8%	
Pass-through income rate:	29.6%-37%	federal income tax
	5.0%	state
	Zero-3.8%	NII or SE tax
	34.6%-45.8%	

The capital gain rate for individuals might be overstated when a person sells stock in an S corporation, because the 3.8% tax on net investment income would not apply with respect to the business assets allocable to that stock when a shareholder who is active in the business sells the stock.[4104] The partnership income tax rate might be overstated, either if the partner is a limited partner not subject to self-employment tax[4105] or if the payment is neither self-employment income[4106] nor attributable to business assets allocable to the partnership interest when a partner who is active in the business sells the partnership interest.[4107]

The scenario in the left column below assumes that the buyer uses after-tax dollars to buy the seller's interest in the business. The tax to the buyer in the left column is based on the ordinary

[4104] See part II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.
[4105] See part II.L.4 Self-Employment Tax Exclusion for Limited Partner, which one might apply to avoid self-employment tax using the structure described in part II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and illustrated in part II.E.6 Recommended Partnership Structure – Flowchart.
[4106] See part II.L.7 SE Tax N/A to Qualified Retiring or Deceased Partner.
[4107] See parts II.I.8.d Partnership Structuring in Light of the 3.8% Tax on Net Investment Income and II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.

income rates, because the buyer is using income generated by operations to fund the payments to the seller. The seller is receiving income at capital gain rates.

	Capital Gain to Seller	Ordinary Income to Seller
Profit	$ 153-185	$109-131
Tax to Buyer	-(53-85)	-0
	$ 100	$109-131
Tax to Seller	- 29	38-60
Net to Seller	$ 71	$ 71

The tax in the right-hand column assumes that the buyer deducts payments to the seller, which is essentially what happens when one pays off a seller by allocating current partnership income to the seller.

The following pages illustrate this concept, showing that it takes a C corporation $189 in earnings to do a cross-purchase (one owner sells to another)[4108] and $135 to do either a redemption (entity buys from seller)[4109] or a cross-purchase using an exclusion that applies to the sale of certain stock,[4110] an S corporation $153-185 in earnings,[4111] and a partnership only $109-131 in earnings[4112] to get $71 to the seller.

[4108] See part II.Q.1.a.i.(a) C Corporation Triple Taxation

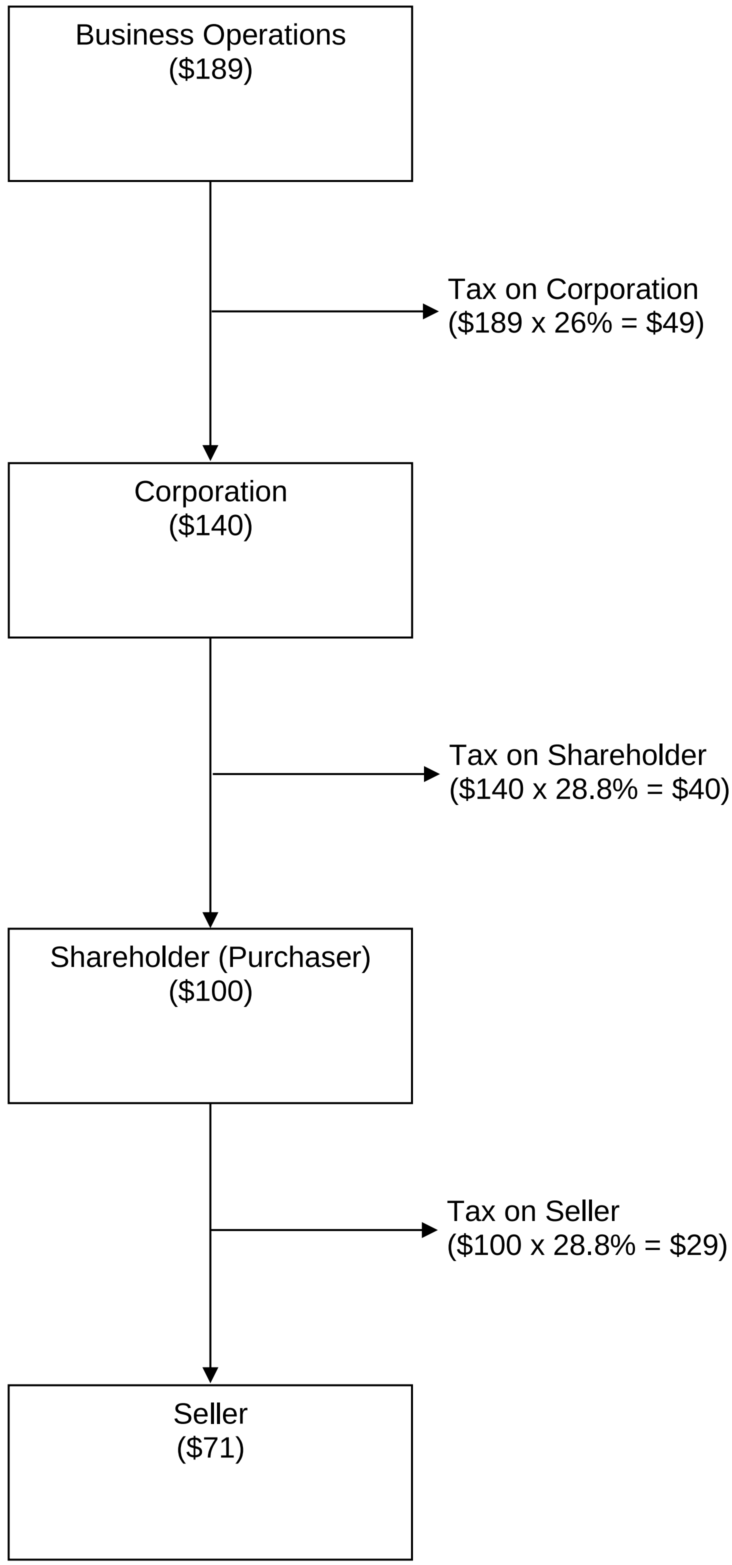
[4109] See part II.Q.1.a.i.(b) C Corporation Redemption. Redeeming the seller entirely might work if buying out one owner and increasing the other owners' interests in proportion to each other. However, if the sole owner is selling, or if the remaining owners are not increased in proportion to each other, then a cross-purchase or a stock issuance is needed to get the remaining owners' interests in the correct proportion, followed by the redemption. For approval of combining a cross-purchase with a redemption, see part II.Q.7.a.ii Hybrid Between Redemption and Cross-Purchase When Selling to New Shareholder or Other Shareholders.

[4110] See part II.Q.1.a.i.(c) C Corporation Double Taxation Under Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation.

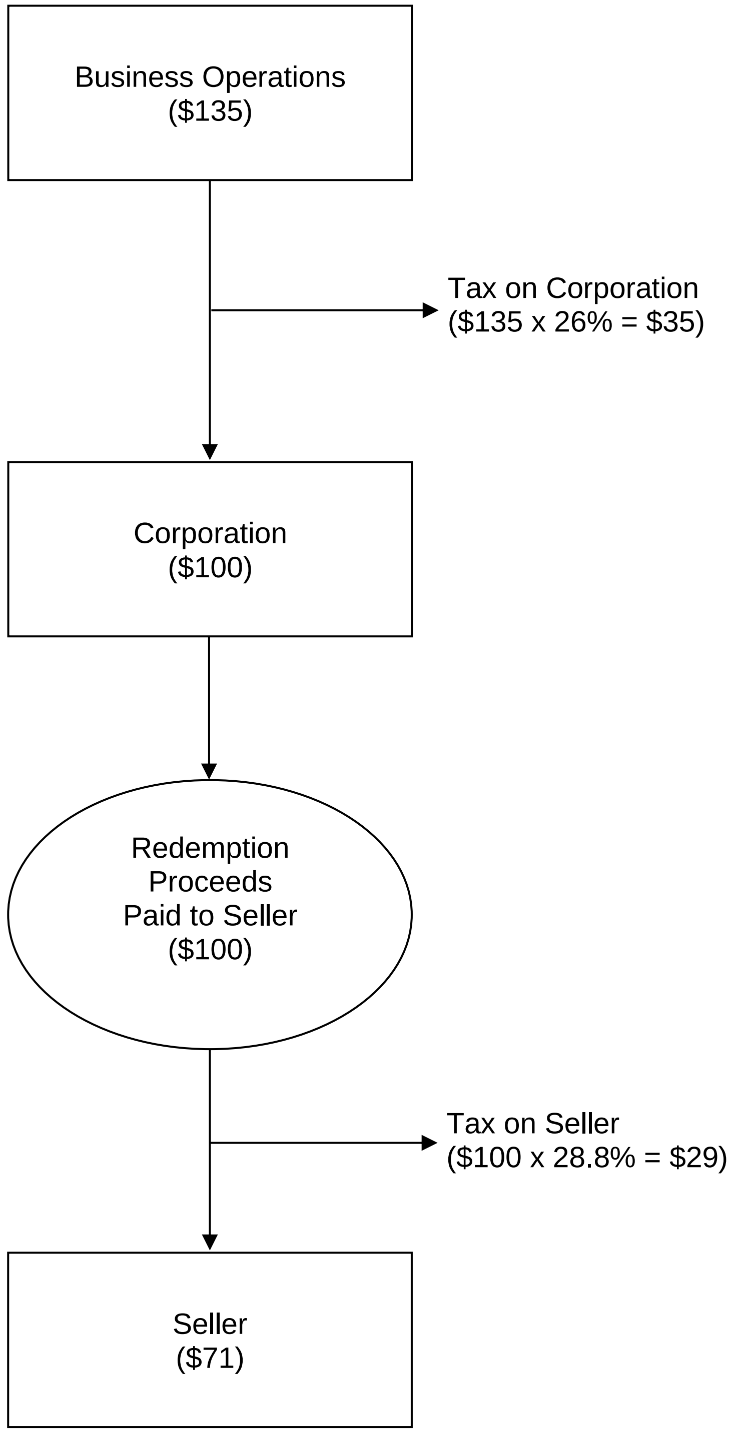
[4111] See part II.Q.1.a.i.(d) S Corporation Double Taxation.

[4112] See part II.Q.1.a.i.(e) Partnership Single Taxation of Goodwill.

II.Q.1.a.i.(a). C Corporation Triple Taxation

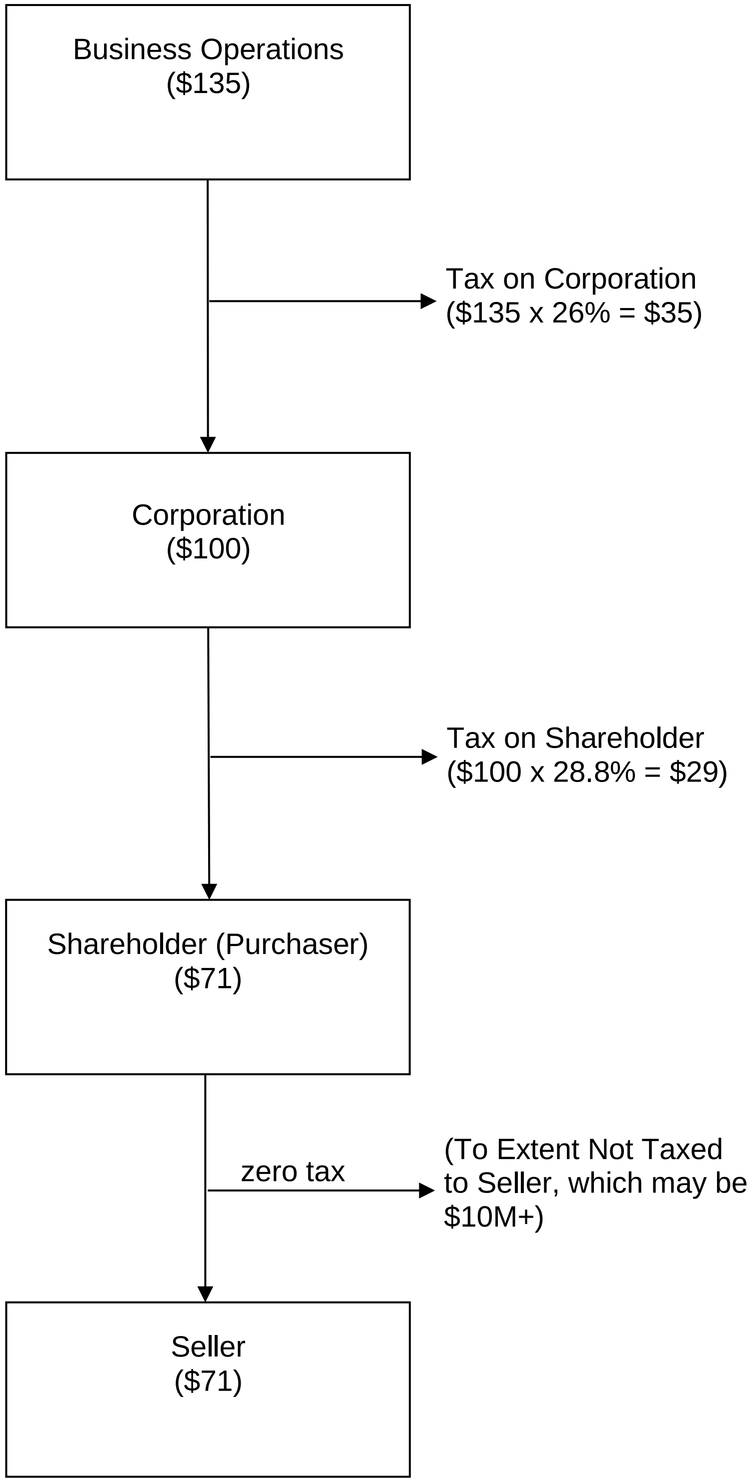


II.Q.1.a.i.(b). C Corporation Redemption



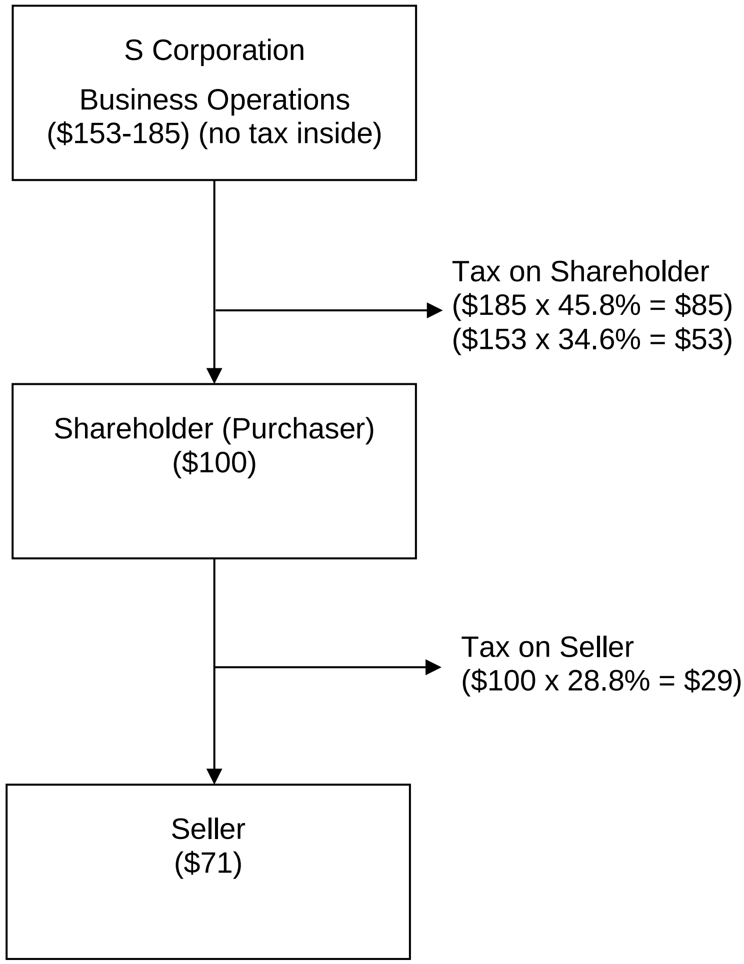
See part II.Q.7.a.ii Hybrid Between Redemption and Cross-Purchase When Selling to New Shareholder or Other Shareholders. The buyer may benefit more from buyer's future sale if buys from corporation more than two years before the seller is redeemed. See part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation.

II.Q.1.a.i.(c). C Corporation Double Taxation Under Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation



This structure may be required to avoid the anti-redemption rules described in the text accompanying and preceding fn 5226 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

II.Q.1.a.i.(d). S Corporation Double Taxation



Notes:

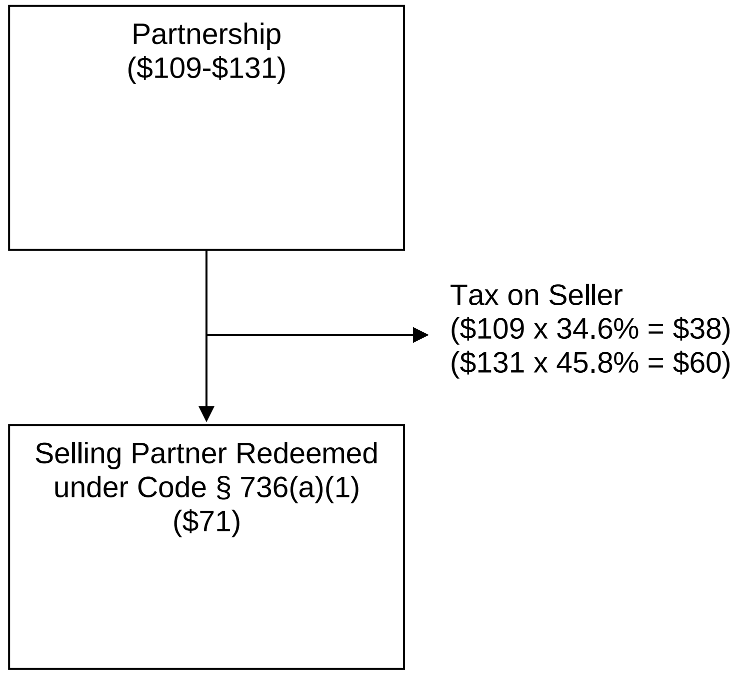
The buyers might very well have lower income tax rates than the seller, resulting in a decreased amount of earnings needed to buy out the seller. For example, a 40% income tax rate would require only $167 of earnings (40% of $167 is $67 tax).

Although an S corporation buyout might be perceived as the same as a Code § 736(b) buyout, it is not. Each year's Code § 736(b) payment creates a new goodwill asset that can amortized over 15 years. This option is not available to S corporations.

This scenario assumes corporate goodwill. Personal goodwill can be dealt with more effectively than corporate goodwill.

If and to the extent sale price is based on accumulated earnings rather than goodwill, sale price is not taxable and exclusion under part II.Q.1.a.i.(c) is not more favorable.

II.Q.1.a.i.(e). Partnership Single Taxation of Goodwill



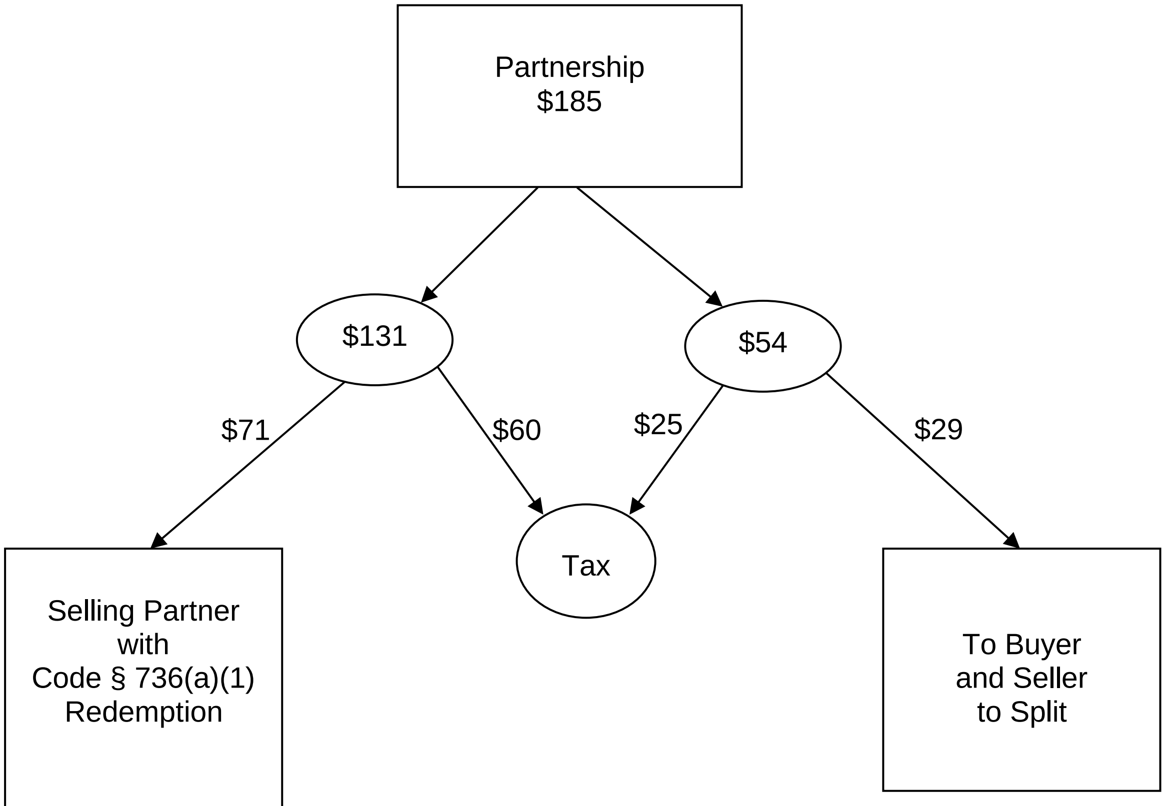
For more details on the tax and nontax benefits of this structure, see part II.Q.8.b.iii Partnership Alternative to Seller-Financed Sale of Goodwill, as well as part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736, which includes allowing income to be taxed to the seller under Code § 736(a).

See part II.Q.8.b.ii.(b) Flexibility in Choosing between Code § 736(a) and (b) Payments (including in fns. 5502-5504 the requirement that, to obtain Code § 736(a) treatment with respect to unrealized receivables and goodwill, a retiring partner must be a general partner and capital cannot be a material income-producing factor).

If the partnership is not a service partnership, one might need to use a preferred profits interest instead of Code § 736(a) payments. However, consider whether such a reallocation of profits might constitute a shifting of goodwill that should be reflected in capital accounts and therefore might constitute a taxable shift of a capital account.[4113]

[4113] See fn. 486 in part II.C.6 Shifting Rights to Future Profits.

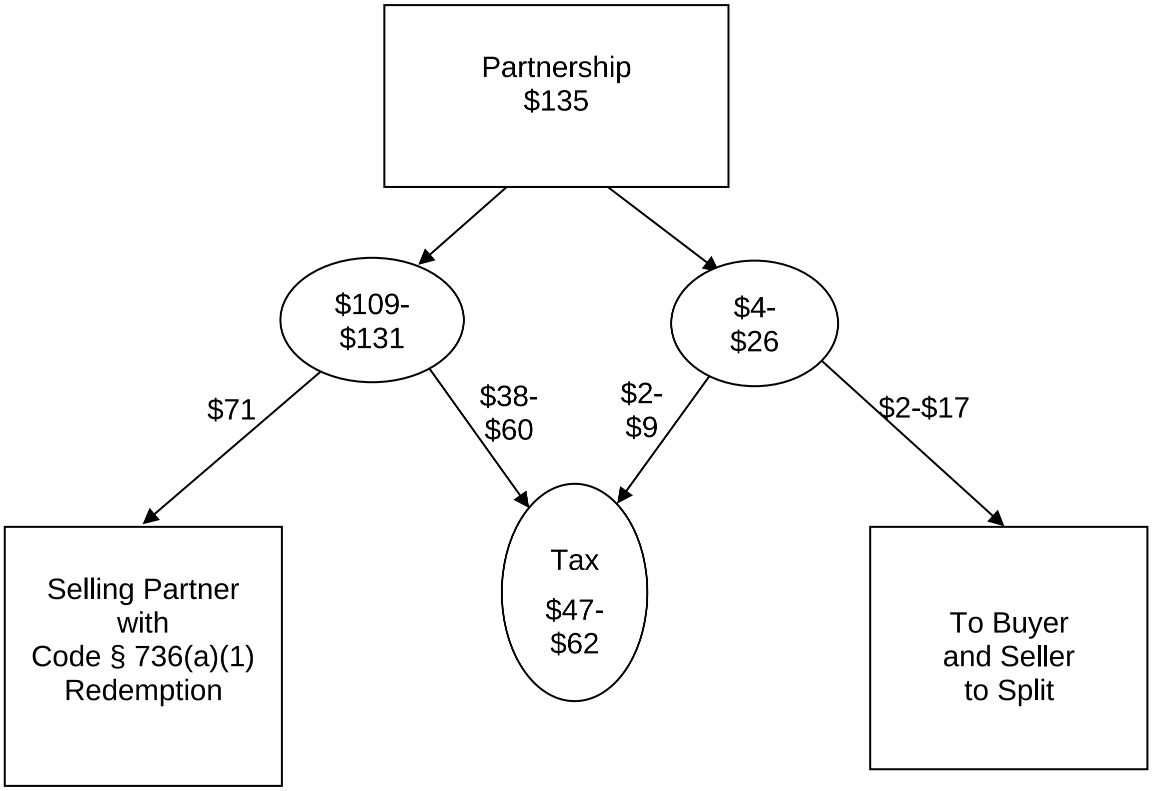
II.Q.1.a.i.(f). Partnership Use of Same Earnings as S Corporation in Sale of Goodwill



Notes:

- This scenario uses the income from the scenario II.Q.1.a.i.(d) S Corporation Double Taxation and applies the concepts from part II.Q.1.a.i.(e) Partnership Single Taxation of Goodwill. The left side of the flowchart duplicates the partnership scenario, with $131 of earnings and $71 of tax. The right side of the flowchart takes the $185 from the S corporation double taxation scenario and subtracts from it the $131 from the partnership scenario, resulting in $54 extra earnings in the partnership scenario not needed to generate $71 for the seller. However, these $54 of extra earnings are subject to $25 of income tax, so that only $29 is left, net after-tax.
- The $29 net after-tax is based on an original $100 purchase price, meaning that the partnership scenario nets 29% after-tax dollars that the parties can allocate.
- In either scenario, $185 is subjected to ordinary income tax.

II.Q.1.a.i.(g). Partnership Use of Same Earnings as C Corporation (Either Redemption or No Tax to Seller per Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation) in Sale of Goodwill



Notes:

- This scenario uses the income ($135) from the scenario in in part II.Q.1.a.i.(b) C Corporation Redemption or part II.Q.1.a.i.(c) C Corporation Double Taxation Under Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation and applies the concepts from part II.Q.1.a.i.(e) Partnership Single Taxation of Goodwill. The left side of the flowchart duplicates the partnership scenario, with $109-$131 of earnings and $38-$60 of tax. The right side of the flowchart takes the $135 from the C corporation scenario and subtracts from it the $109-$131 from the partnership scenario, resulting in $4-$26 extra earnings in the partnership scenario not needed to generate $70 for the seller. However, these $4-$26 of extra earnings are subject to $2-$9 of income tax, so that only $2-$17 is left, net after-tax.
- The $2-$17 net after-tax is based on an original $100 purchase price, meaning that the partnership scenario nets 4%-17% after-tax dollars that the parties can allocate.
- In either scenario, $135 is subjected to ordinary income tax.

II.Q.1.a.ii. California Scenarios

See assumptions in part II.Q.1.a.i Scenario for Moderate State Tax. Consider the portion of the business' equity representing internally generated goodwill, and assume the following top marginal income tax rates, which might or might not be attained:

<u>Sale of Goodwill - Assumptions</u>

C corp. income tax rate:	21.0%	federal
	8.8%	state (really 8.84%)
	29.8%	
Individual capital gain rate:	20.0%	federal
	13.3%	state
	3.8%	net investment income (NII) tax
	37.1%	
S corporation income rate:	29.6%-37%	federal
	13.3%	state individual
	1.5%	state entity
	zero-3.8%	NII tax
	44.4%-55.6%	
Partnership income rate:	29.6%-37%	federal
	13.3%	state
	zero-3.8%	NII or SE tax
	42.9%-54.1%	

The capital gain rate for individuals might be overstated when a person sells stock in an S corporation, because the 3.8% tax on net investment income would not apply with respect to the business assets allocable to that stock when a shareholder who is active in the business sells the stock.[4114] The partnership income tax rate might be overstated, either if the partner is a limited partner not subject to self-employment tax[4115] or if the payment is neither self-employment income[4116] nor attributable to business assets allocable to the partnership interest when a partner who is active in the business sells the partnership interest.[4117]

The scenario in the left column below assumes that the buyer uses after-tax dollars to buy the seller's interest in the business. The tax to the buyer in the left column is based on the ordinary income rates, because the buyer is using income generated by operations to fund the payments to the seller. The seller is receiving income at capital gain rates.

[4114] See part II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.
[4115] See part II.L.4 Self-Employment Tax Exclusion for Limited Partner.
[4116] See part II.L.7 SE Tax N/A to Qualified Retiring or Deceased Partner.
[4117] See parts II.I.8.d Partnership Structuring in Light of the 3.8% Tax on Net Investment Income and II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.

	Capital Gain to Seller	Ordinary Income to Seller
Profit	$ 175-218	$ 110-137
Tax to Buyer	- (75-118)	- 0
	$ 100	$ 110-137
Tax to Seller	- 37	- (47-74)
Net to Seller	$ 63	$ 63

The tax in the right-hand column assumes that the buyer deducts payments to the seller, which is essentially what happens when one pays off a seller by allocating current partnership income to the seller.

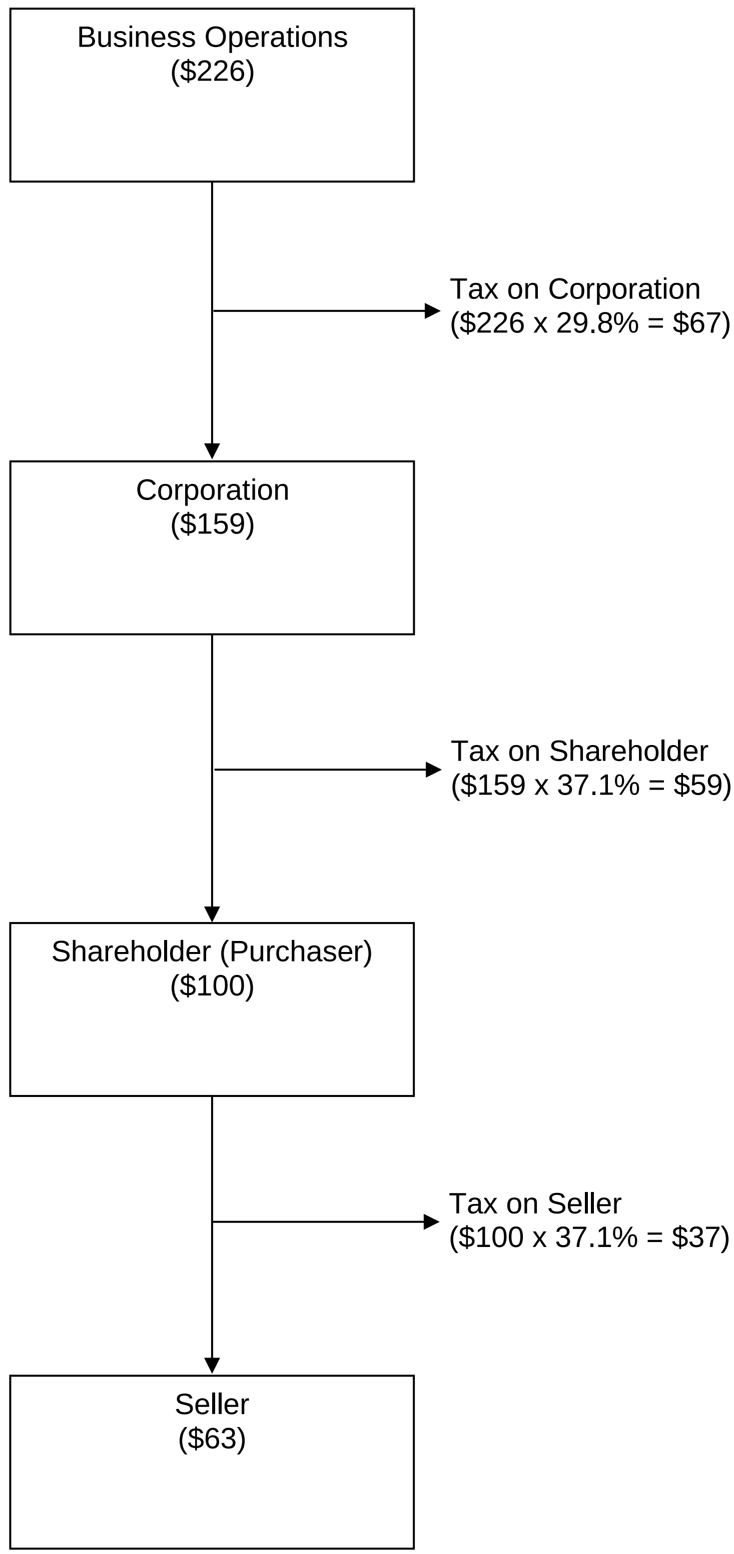
The illustrations ignore the California LLC fee (gross receipts tax) of up to nearly $12K that applies to an LLC taxed as a partnership. If the partnership uses the structure recommended in part II.E.6 Recommended Partnership Structure – Flowchart:

- This fee of up to nearly $12K would be imposed on each LLC subsidiary annually,
- Self-employment tax would not apply, and
- California's 1.5% entity-level tax on S corporations would apply to the general partner's 1% annual income and any profit from its management fee in excess of salaries paid to the owners.

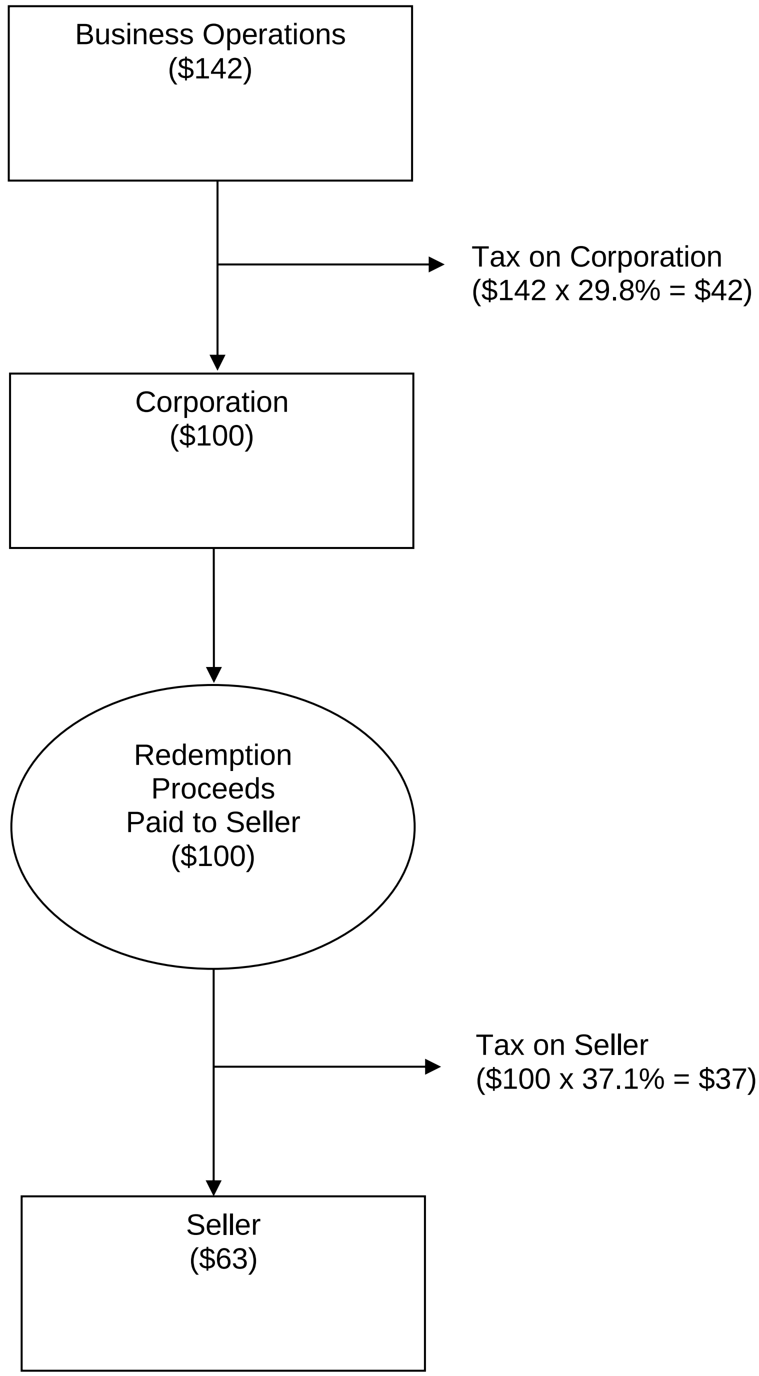
The following pages illustrate this concept, showing that it takes a C corporation $288 in earnings to do a cross-purchase (one owner sells to another)[4118] and $225 to do either a redemption (entity buys from seller)[4119] or a cross-purchase using an exclusion that applies to the sale of certain stock,[4120] an S corporation $218 in earnings,[4121] and a partnership only $147 in earnings[4122] to get $62 to the seller.

[4118] See part II.Q.1.a.ii.(a) C Corporation Triple Taxation (California).
[4119] See part II.Q.1.a.ii.(b) C Corporation Redemption (California). Redeeming the seller entirely might work if buying out one owner and increasing the other owners' interests in proportion to each other. However, if the sole owner is selling, or if the remaining owners are not increased in proportion to each other, then a cross-purchase or a stock issuance is needed to get the remaining owners' interests in the correct proportion, followed by the redemption. For approval of combining a cross-purchase with a redemption, see part II.Q.7.a.ii Hybrid Between Redemption and Cross-Purchase When Selling to New Shareholder or Other Shareholders.
[4120] See part II.Q.1.a.ii.(c) C Corporation Triple Taxation Under Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation (California).
[4121] See part II.Q.1.a.ii.(d) S Corporation Double Taxation (California).
[4122] See part II.Q.1.a.ii.(e) Partnership Single Taxation of Goodwill (California).

II.Q.1.a.ii.(a). C Corporation Triple Taxation (California)

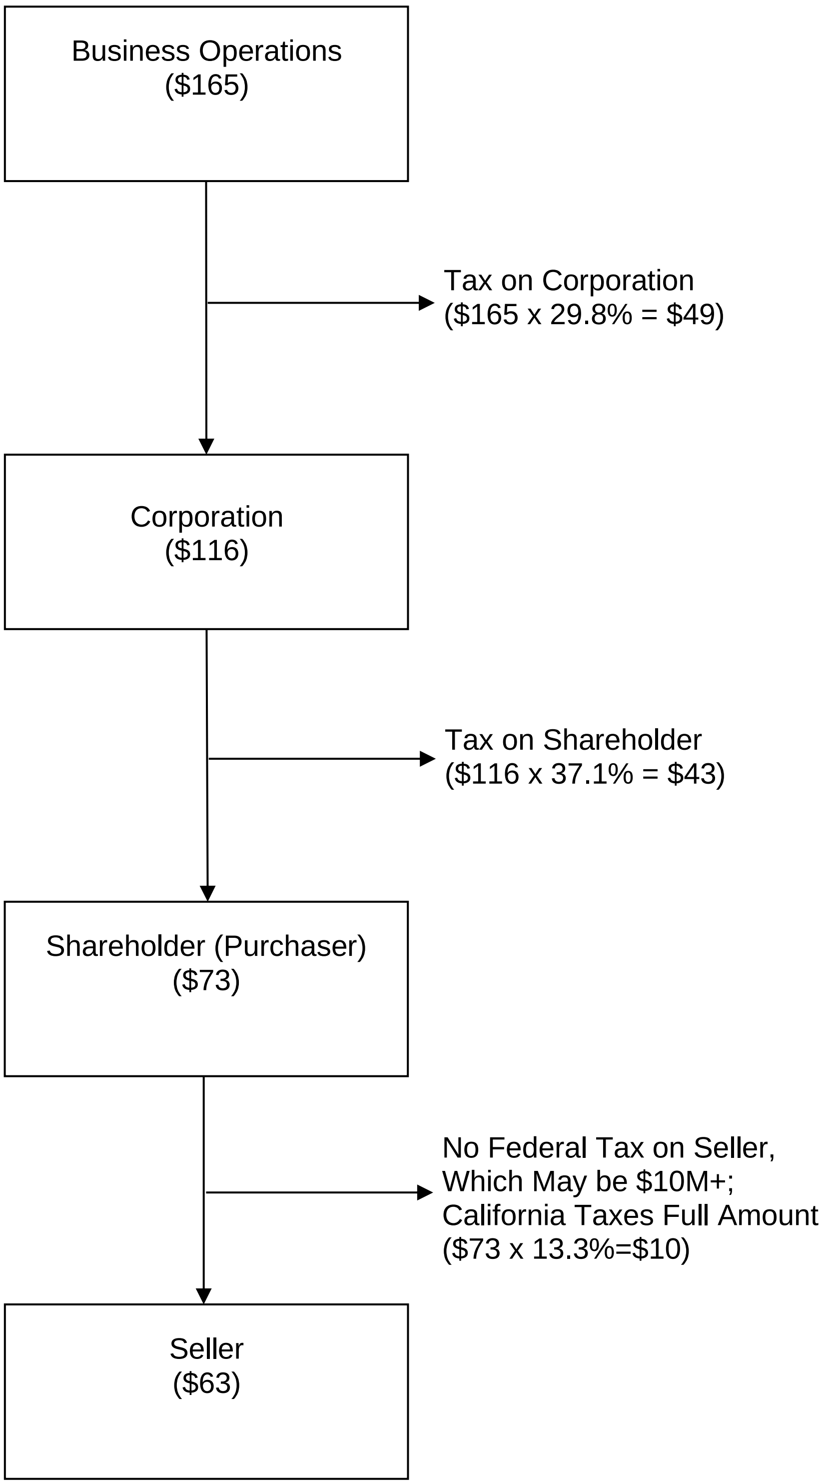


II.Q.1.a.ii.(b). C Corporation Redemption (California)

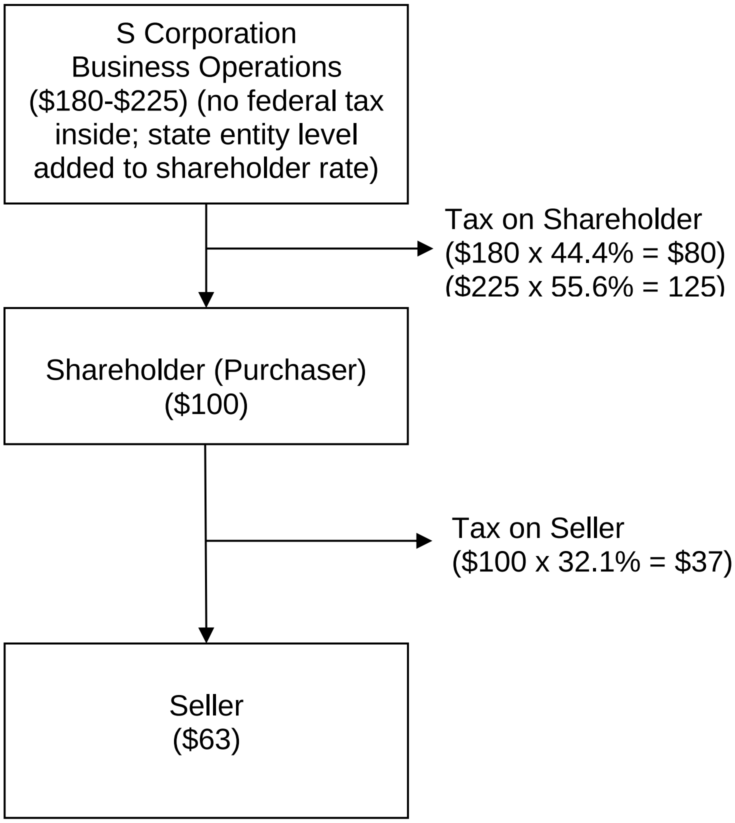


See part II.Q.7.a.ii Hybrid Between Redemption and Cross-Purchase When Selling to New Shareholder or Other Shareholders. The buyer may benefit more from buyer's future sale if buys from corporation more than two years before the seller is redeemed. See part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation.

II.Q.1.a.ii.(c). C Corporation Triple Taxation Under Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation (California)



II.Q.1.a.ii.(d). S Corporation Double Taxation (California)



<u>Notes</u>:

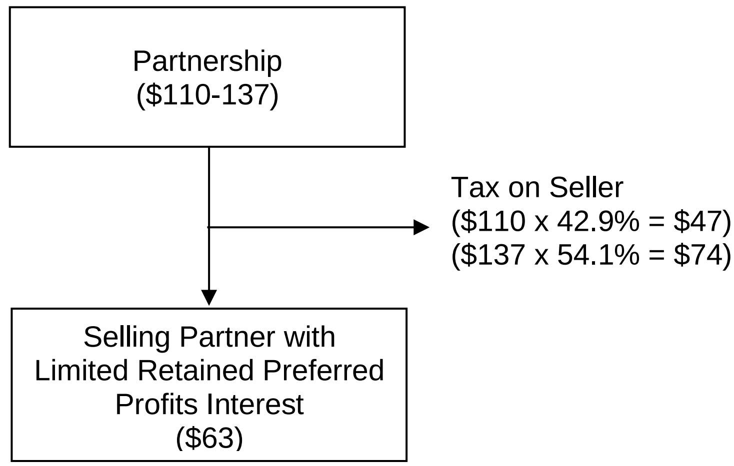
The buyers might very well have lower income tax rates than the seller, resulting in a decreased amount of earnings needed to buy out the seller.

Although an S corporation buyout might be perceived as the same as a Code § 736(b) buyout, it is not. Each year's Code § 736(b) payment creates a new goodwill asset that can amortized over 15 years. This option is not available to S corporations.

This scenario assumes corporate goodwill. Personal goodwill can be dealt with more effectively than corporate goodwill.

If and to the extent sale price is based on accumulated earnings rather than goodwill, sale price is not taxable and exclusion under part II.Q.1.a.ii.(c) is not more favorable.

II.Q.1.a.ii.(e). Partnership Single Taxation of Goodwill (California)



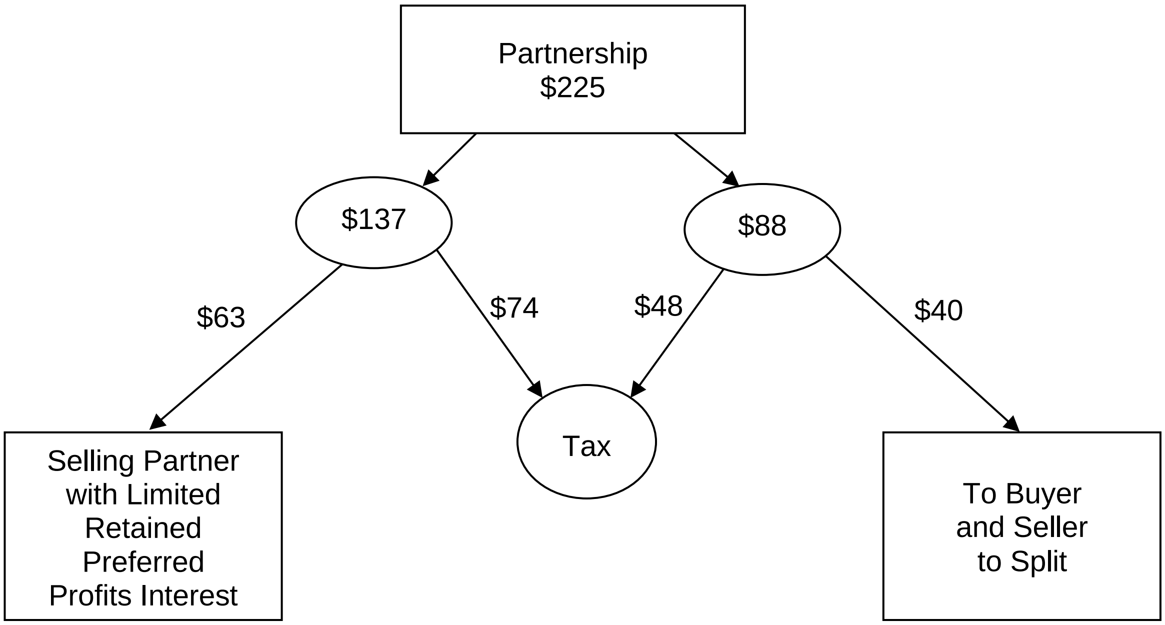
For more details on the tax and nontax benefits of this structure, see part II.Q.8.b.iii Partnership Alternative to Seller-Financed Sale of Goodwill, as well as part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736, which includes allowing income to be taxed to the seller under Code § 736(a).

See part II.Q.8.b.ii.(b) Flexibility in Choosing between Code § 736(a) and (b) Payments (including in fns. 5502-5504 the requirement that, to obtain Code § 736(a) treatment with respect to unrealized receivables and goodwill, a retiring partner must be a general partner and capital cannot be a material income-producing factor).

If the partnership is not a service partnership, one might need to use a preferred profits interest instead of Code § 736(a) payments. However, consider whether such a reallocation of profits might constitute a shifting of goodwill that should be reflected in capital accounts and therefore might constitute a taxable shift of a capital account.[4123]

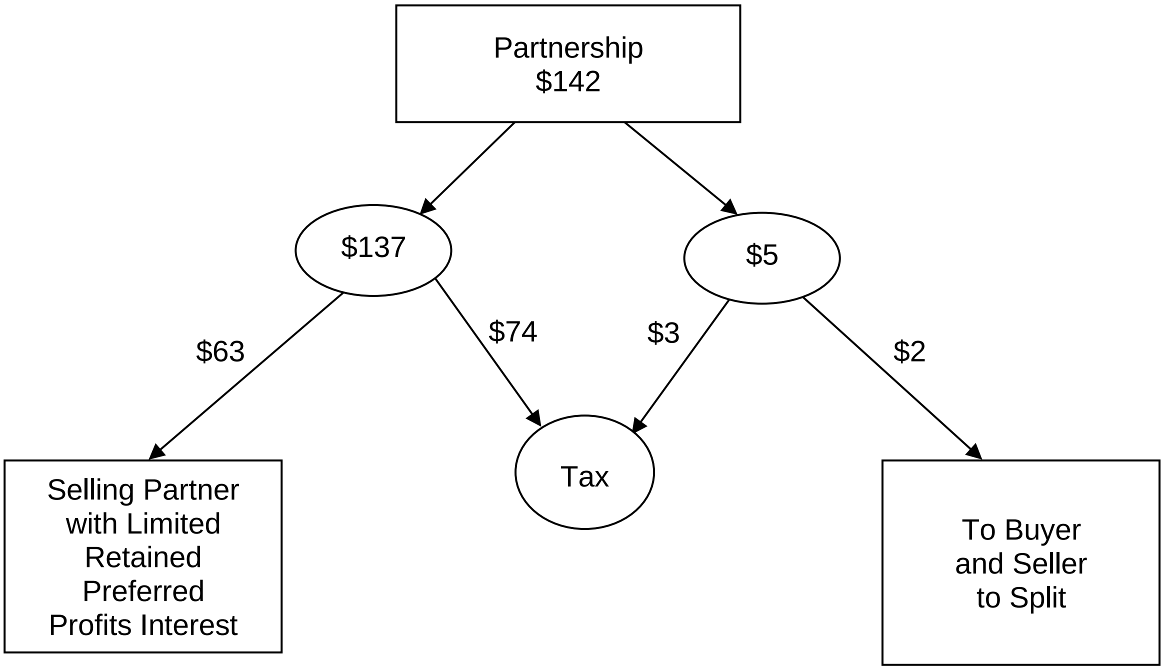
[4123] See fn. 486 in part II.C.6 Shifting Rights to Future Profits.

II.Q.1.a.ii.(f). Partnership Use of Same Earnings as S Corporation in Sale of Goodwill (California)



- This scenario uses the income from the scenario in part II.Q.1.a.ii.(d) S Corporation Double Taxation (California) and applies the concepts from part II.Q.1.a.ii.(e) Partnership Single Taxation of Goodwill (California). The left side of the flowchart duplicates the partnership scenario, with $137 of earnings and $74 of tax. The right side of the flowchart takes the $225 from the S corporation double taxation scenario and subtracts from it the $137 from the partnership scenario, resulting in $88 extra earnings in the partnership scenario not needed to generate $63 for the seller. However, these $88 of extra earnings are subject to $48 of income tax, so that only $40 is left, net after-tax.
- The $40 net after-tax is based on an original $100 purchase price, meaning that the partnership scenario nets 40% after-tax dollars that the parties can allocate. The $40 savings consists of $37 capital gain tax and $3 entity level tax (1.5% of $225 S corporation earnings).
- In either scenario, $225 is subjected to ordinary income tax.
- If the buyers are in a lower tax bracket than the seller, then not as much money is required in the S corporation scenario and the $40 net-after-tax amount can be reduced or eliminated.

II.Q.1.a.ii.(g). Partnership Use of Same Earnings as C Corporation – Redemption (California)

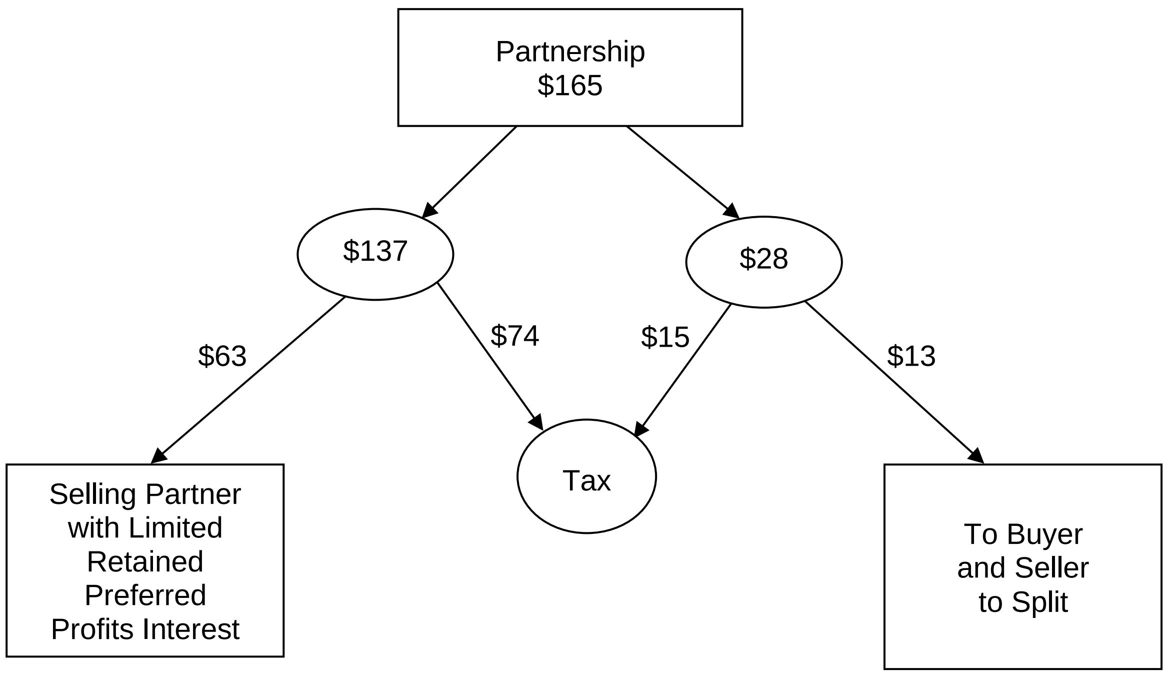


Notes:

- This scenario uses the income from the scenario in part II.Q.1.a.ii.(b) C Corporation Redemption (California) and applies the concepts from part II.Q.1.a.ii.(e) Partnership Single Taxation of Goodwill (California). The left side of the flowchart duplicates the partnership scenario, with $137 of earnings and $74 of tax. The right side of the flowchart takes the $142 from the C corporation double tax scenario and subtracts from it the $137 from the partnership scenario, resulting in $5 extra earnings in the partnership scenario not needed to generate $63 for the seller. However, these $5 of extra earnings are subject to $3 of income tax, so that only $2 is left, net after-tax.
- The $2 net after-tax is based on an original $100 purchase price, meaning that the partnership scenario nets 2% after-tax dollars that the parties can allocate.

In either scenario, $142 is subjected to ordinary income tax.

II.Q.1.a.ii.(h). Partnership Use of Same Earnings as C Corporation – No Federal Tax to Seller per Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation in Sale of Goodwill (California)



Notes:

- This scenario uses the income from the scenario in part II.Q.1.a.ii.(c) C Corporation Triple Taxation Under Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation (California) and applies the concepts from part II.Q.1.a.ii.(e) Partnership Single Taxation of Goodwill (California). The left side of the flowchart duplicates the partnership scenario, with $137 of earnings and $74 of tax. The right side of the flowchart takes the $165 from the C corporation double tax scenario and subtracts from it the $137 from the partnership scenario, resulting in $28 extra earnings in the partnership scenario not needed to generate $63 for the seller. However, these $28 of extra earnings are subject to $15 of income tax, so that only $13 is left, net after-tax.
- The $13 net after-tax is based on an original $100 purchase price, meaning that the partnership scenario nets 13% after-tax dollars that the parties can allocate.

In either scenario, $165 is subjected to ordinary income tax.

II.Q.1.a.iii. Migrating to a Partnership Structure

For what might be an ideal partnership structure, see part II.E Recommended Structure for Entities, especially parts II.E.3 Recommended Structure for Start-Ups, II.E.4 Reaping C Corporation Annual Taxation Benefits Using Hybrid Structure, II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons, and II.E.6 Recommended Partnership Structure – Flowchart.

Parts II.E.7 Migrating into Partnership Structure and II.E.9 Real Estate Drop Down into Preferred Limited Partnership explain how to get there.

II.Q.1.b. Leasing

Some assets used in a business might be held outside of the business and then leased to the business. The buyer continues to lease these assets from the seller. Such lease payments are deductible to the buyer and taxable to the seller, and the seller is not necessarily at risk in that the seller might be able to sell the property to a third party. If a partnership holds the business, the partnership that conducts business operations can save its owners self-employment (SE) tax by leasing real estate instead of owning it;[4124] However, equipment leasing generally would be subject to SE tax.[4125] Also note that Florida and perhaps other states impose a tax on gross rents.

If a long-term lease provides rent above the property's fair rental value, a lease termination payment is deductible as an ordinary business expense, even if the tenant buys the property;[4126] however, be prepared for a fight with the IRS and to go to District Court, because the Tax Court will require the taxpayer to capitalize the lease termination fee outside of the Sixth Circuit.[4127] On the other hand, amounts a lessee receives for the cancellation of a lease are considered as amounts received in exchange for that lease;[4128] although this exchange treatment does not affect whether the lease is a capital asset as to the lessee,[4129] it very well may be.[4130]

[4124] Real estate rental income received on a long-term basis is not subject to self-employment tax, Reg. § 1.1402(a)-4(a) (see part II.L.2.a.ii Rental Exception to SE Tax, especially fn. 3428), whereas the rent deduction would reduce self-employment income, if any, of the operating business. In early years of owning the real estate, rent deductions might not produce much saving relative to depreciation, interest expense, insurance and taxes; in later years, however, the saving might be significant. Although rental income generally is subject to the 3.8% tax on net investment income (NII), rental to a business with sufficient common ownership is not NII. See part II.I.8.c Application of 3.8% Tax to Rental Income.

[4125] See part II.L.2.a.ii Rental Exception to SE Tax, fns 3433-3437.

[4126] *ABC Beverage Corporation v. U.S.*, 756 F.3d 438 (6th Cir. 2014) (of $9M purchase price, $6.25M allocated to lease termination expense).

[4127] *Union Carbide Foreign Sales Corp. v. Commissioner*, 115 T.C. 423 (1993) (holding that Code § 167(c)(2) compelled that result). Code § 167(c)(2) provides:

> If any property is acquired subject to a lease-
> (A) no portion of the adjusted basis shall be allocated to the leasehold interest, and
> (B) the entire adjusted basis shall be taken into account in determining the depreciation deduction (if any) with respect to the property subject to the lease.

The Sixth Circuit's opinion in fn. 4126 pointed out that the purchase extinguished the lease; because the lease did not continue after the purchase, the property was not acquired subject to the lease.

[4128] Code § 1241.

[4129] Reg. § 1.1241-1(a).

[4130] In Letter Ruling 200045019, the tenant entered into a commercial lease, then later claimed that the rent that it paid was too high because it used the property primarily for residential purposes. After stating that the local housing authority ruled in the tenant's favor, the Ruling continued:

> City's rent control law gives a tenant the right to continued possession of a property and establishes the maximum rent that may be charged. This right of possession is for an indefinite time period. The landlord may evict such a tenant only under specific circumstances as listed in the Statute.
>
> As a result of the determination that the Premises were subject to the rent control law, the landlord agreed to pay Taxpayer $s in return for Taxpayer surrendering all lease and statutory rights to the Premises. This agreed sum represents $m plus $n to cover estimated taxes. The estimated tax amount was determined under the assumption that Taxpayer's gains from the transaction would be treated as capital gains. Further, the landlord agreed to pay an additional amount, up to $u, plus interest and penalties, if the Internal Revenue Service determines that the

gain is ordinary. Finally, the landlord agreed to pay $v to a law firm to cover Taxpayer's legal fees.

In finding that the lease termination payment was capital gain, the Ruling reasoned:

> We note that section 1231, rather than section 1221, may apply to the instant case because the facts indicate that Taxpayer's leasehold may have been used in part, or for a portion of the lease period, for the conduct of Taxpayer's business. Business use of real property precludes that property from receiving capital asset treatment under section 1221(2). However, we do not need to determine whether the leasehold is excluded under section 1221(2) because it will either be a section 1221 capital asset or a section 1231 asset. In either case, the gain recognized on the exchange of the leasehold will be capital, rather than ordinary.
>
> In Rev. Rul. 72-85, 1972-1 C.B. 234, the Service determined that a leasehold of land used in a trade or business is section 1231 property, even if it is of indefinite duration. This revenue ruling clarified Rev. Rul. 56-531, 1956-2 C.B. 983, which holds, in part, that the Service acquiesces in *McCue Bros. & Drummond, Inc. v. Commissioner*, 19 T.C. 667 (1953), *acq.* 1956-2 C.B. 7, *aff'd*, 210 F.2d 752 (2d Cir. 1954), *cert. denied*, 348 U.S. 829 (1954).
>
> The petitioner in *McCue Bros.* leased a hat shop in New York City. For a portion of his occupancy, the petitioner held the property under a written lease. However, after the lease expired, the petitioner continued to occupy the property under a "statutory tenancy" by virtue of the New York rent control laws that had taken effect shortly before the end of the written lease. In affirming the Tax Court in *McCue Bros.*, the Second Circuit stated that it was immaterial whether the petitioner held the property under a lease or through the rent control laws. The court stated, "we think the right of possession under a lease or otherwise, is a ...substantial property right which does not lose its existence when transferred. If it is sold by the tenant to a third person, the gain derived therefrom is a capital gain." 210 F.2d at 753. The court further stated that the holding period began when the statutory right of possession attached. *Id.* at 754.
>
> In *Stotis v. Commissioner*, T.C. Memo. 1996-431, the Tax Court came to a similar result in the case of a residential leasehold. Mr. Stotis, the petitioner, leased space in an apartment building that he used as a residence. The landlord, desiring to use the real estate for other purposes, entered into a surrender agreement with the petitioner whereby the petitioner exchanged his right in the property for a cash payment. The Tax Court held that the petitioner's leasehold interest in a residence was a capital asset, and that the petitioner's sale of the leasehold interest constituted a sale or exchange, taxable as capital gain.
>
> The facts of this case are not clear as to whether the property in question is properly treated as real property used in the trade or business for purposes of sections 1221 and 1231. If it is not real property used in the trade or business, the leasehold interest is a capital asset under section 1221. If it is real property used in the trade or business, any gain attributable to the sale or exchange of the leasehold interest is treated as long-term capital gain under section 1231. Taxpayer's holding period began with the vesting of the statutory right of occupancy on c. Therefore, Taxpayer held the property for more than one year. Additionally, under Rev. Rul. 72-85, the fact that Taxpayer's leasehold interest under the rent control laws was for an indefinite period does not preclude section 1231 long-term capital gain treatment.
>
> Under section 1241, amounts received by a lessee for the cancellation of a lease, or by a distributor of goods for the cancellation of a distributor's agreement (if the distributor has a substantial capital investment in the distributorship), are considered as amounts received in exchange for such lease or agreement.
>
> Based on the foregoing, we conclude that the amounts received by Taxpayer are considered amounts received in exchange for Taxpayer's leasehold interest in the Premises. Further, we conclude that Taxpayer realized long-term capital gain on the sale of the leasehold interest. Taxpayer's interest in the Premises is either a capital asset under section 1221 or real property used in the trade or business under section 1231. In either event, gain realized from the sale of the leasehold interest is treated as long-term capital gain. Payments of the legal fees and income taxes are part of the purchase price to the extent that such payments are given in exchange for Taxpayer's leasehold interest and not for Taxpayer abandoning some other legal right or property not related to the transaction in question.

Reg. § 1.162-11(a), "Acquisition of a leasehold," provides:

> If a leasehold is acquired for business purposes for a specified sum, the purchaser may take as a deduction in his return an aliquot part of such sum each year, based on the number of years the lease has to run. Taxes paid by a tenant to or for a landlord for business property are additional rent and constitute a deductible item to the tenant and taxable income to the landlord, the amount of the tax being deductible by the latter. For disallowance of deduction for income taxes paid by a lessee corporation pursuant to a lease arrangement with the lessor corporation, see section 110 and the regulations thereunder. See section 178 and the regulations thereunder for rules governing the effect to be given renewal options in amortizing the costs incurred after July 28, 1958, of acquiring a lease. See § 1.197-2 for rules governing the amortization of costs to acquire limited interests in section 197 intangibles.

Generally, real property should not be held in the entity that conducts the business. As discussed above, for self-employment tax purposes it should not be owned by a partnership that has business operations. Because appreciated real estate cannot be distributed from a corporation without triggering either premature (in the case of an S corporation) or double (in the case of a C corporation) taxation under Code § 311,[4131] usually real estate should not be held in a corporation (see footnote 367 for some of the issues, including basis step-up issues, involved in whether real estate should be in a corporation).

II.Q.1.c. Personal Goodwill and Covenants Not to Compete

II.Q.1.c.i. Taxation When a Business Sells Goodwill; Contrast with Nonqualified Deferred Compensation

If the business entity does not require its key employees to agree not to compete, the key employees might leave and take their contacts with them. Thus, in such situations the key employees really "own" the business' goodwill. When the business is sold, the buyer would buy goodwill from the person who owns the goodwill, pay key employees not to compete, pay the key employees to work in the business, or a combination of any of these.

Note, however, that, gain from the sale of a Code § 1231 asset may be different than gain from the sale of a capital asset. If the taxpayer had Code § 1231 losses in a prior year, those losses may have converted the gain to ordinary income. See part II.G.6.a Code § 1231 Property, especially fns. 1496-1497.

[4131] Code § 311 provides that, when a corporation distributes property, the distribution constitutes a sale or exchange by the corporation. See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders. Together with the rules governing income taxation of shareholders:

- For an S corporation, generally this means that the shareholders are taxed on the exchange (with favorable capital gain rates often available), receive an increased tax basis in their stock equal to the gain reported, reduce the basis of their stock to the extent of the value of the property that was distributed, and adjust to fair market value the basis of the property that was distributed.
- For a C corporation, generally this means that the corporation pays income tax (with favorable capital gain rates <u>not</u> available) and the shareholders are taxed on the distribution as a dividend, thus generating two layers of tax. However, as with an S corporation, the distributed property's basis is adjusted to fair market value.

When self-created goodwill is sold, generally the seller receives favorable capital gain treatment and the buyer deducts over 15 years the sum of the payments;[4132] furthermore, that capital gain may qualify for an exclusion from the 3.8% tax on net investment income.[4133] (Also goodwill that is not being amortized and is held by a partnership would be eligible for a basis step if a Code § 754 election is in place.[4134]) This capital gain treatment may incentivize taxpayers to allocate proceeds from sales of intangibles to goodwill, because the sale of some intangibles generates ordinary income instead of capital gain, as described in part II.G.18.b Sale or Exchange of Intellectual Property - Capital Gain vs. Ordinary Income. However, ordinary income treatment applies to the sale to a related party,[4135] which applies whether or not the goodwill was being amortized.[4136] Furthermore, the amortization of goodwill causes it to lose its status as a capital asset, which in some circumstances can cause part or all of the gain on sale to lose capital treatment.[4137] Additional rules are described in the text accompanying fn 1699 in part II.G.18.d Amortization of Code § 197 Intangibles.

[4132] *Horton v. Commissioner*, 13 T.C. 143 (1949) (income from the sale of goodwill is capital gain, whereas income from a noncompete agreement is ordinary income); Code § 197(a), (d)(1)(A) (deduction for amortizing goodwill). Although Reg. § 1.197-2(d)(2) disallows amortization deductions for self-created goodwill, it allows amortization when the taxpayer buys the goodwill (including from someone who bought it from the taxpayer). *Fitch v. Commissioner*, T.C. Memo. 2012-358 rebuffed an IRS attack on repurchased goodwill using a very simple contract. But for Code § 197, goodwill is not amortizable. Reg. § 1.167(a)-3(a).

[4133] See text accompanying and preceding fn 2437 in part II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.

[4134] See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000, fn. 5684. For an example of the effect of a Code § 754 election on goodwill that is being amortized, see fn. 5795 in part II.Q.8.e.iv Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform).

[4135] See parts II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), which applies to sale of an S corporation's goodwill, and II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

[4136] See text accompanying fn. 5084.

[4137] Letter Ruling 200243002 ruled that the sale of goodwill that has not been amortized is taxed as a capital gain, but goodwill that is being amortized is not a capital asset and therefore was subject to tax at ordinary income rates. However, amortizable goodwill may be eligible for capital gain treatment as described in part II.G.6 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business, especially fn. 1490. Because capital gain treatment in that situation arises solely by reason of Code § 1231, any Code § 1231 gain is taxed as ordinary income if and to the extent the taxpayer has unrecaptured Code § 1231 losses. Code § 1231 losses are ordinary losses generated by the sale of Code § 1231 property (property used in a trade or business).

Elaborating on the above, Letter Ruling 200243002 reasoned:

> It is well settled that prior to enactment of § 197, goodwill and going concern value were considered to be intangible and nonamortizable capital assets within the meaning of § 1221, by both the Service and the courts. Rev. Rul. 65-180, 1965-2 C.B. 279; Rev. Rul. 55-79, 1955-1 C.B. 370; *UFE, Inc. v. Commissioner*, 92 T.C. 1314, 1323 (1989) ("going-concern value is an intangible, nonamortizable capital asset that is often considered to be part of goodwill"); *Patterson v. Commissioner*, 810 F.2d 562, 569 (6th Cir. 1987) (stating that "any amount paid for goodwill, since it does not waste, becomes a nonamortizable capital asset," and "amounts received by a seller for the goodwill or going concern value of the business are taxed at the more favorable capital gains rates"); *Better Beverages, Inc. v. United States*, 619 F.2d 424, 425 n. 2 (5th Cir. 1980) ("goodwill is a capital asset"); *Dixie Finance Co. v. United States*, 474 F.2d 501, 506 n. 5 (5th Cir. 1973) (goodwill is a capital asset and amounts received therefor in excess of the

For an exception to capital gain treatment when a partnership distributes a client-based intangible asset, such as a customer list or book of business, see part II.Q.8.b.i.(d) Capital Accounting May Trigger Ordinary Income.

Also, the sale and subsequent amortization of goodwill turns it into a "hot" asset, reducing opportunities for deferral on its sale.[4138] Whether or not goodwill is being amortized, a controlled corporation's sale or distribution of goodwill might generate ordinary income,[4139] as would a sale involving a partnership.[4140]

When a covenant not to compete is involved, generally the seller receives ordinary income treatment and the buyer deducts the present value of the payments over 15 years.[4141]

---

seller's basis are treated as capital gains, but represent a nonamortizable capital investment resulting in no corresponding deduction for the purchaser); *Commissioner v. Killian*, 314 F.2d 852, 855 (5th Cir. 1963) ("[i]t is settled that goodwill, as a distinct property right, is a capital asset under the tax laws "); *Michaels v. Commissioner*, 12 T.C. 17 (1949) ("[w]e entertain no doubt that goodwill and such related items as customers' lists are capital assets").

Prior to enactment of § 197, goodwill and going concern value were not considered property used in the trade or business of a character which is subject to the allowance for depreciation provided in § 167, and thus were not excluded from the definition of capital asset by reason of § 1221(a)(2) of the Code. Under § 197, an amortizable section 197 intangible is treated as property of a character which is subject to the allowance for depreciation under § 167. Thus, goodwill and going concern value which are amortizable section 197 intangibles are not capital assets for purposes of § 1221, but if used in a trade or business and held for more than one year, gain or loss upon their disposition generally qualifies as § 1231 gain or loss. Taxpayer has questioned whether enactment of § 197 has changed the treatment of goodwill and going concern value as capital assets for goodwill and going concern value that do not qualify as amortizable section 197 intangibles.

In this case, Taxpayer represents that at the time of each sale of the c, the Goodwill is either self-created Goodwill of the selling entity (or a subsidiary of the selling entity acquired by the selling entity in a stock transaction) or Goodwill acquired by the selling entity (or a subsidiary of the selling entity acquired by the selling entity in a stock transaction) from third parties prior to August 11, 1993. While it is possible that a selling entity acquired the Goodwill after July 25, 1991, and prior to August 11, 1993, Taxpayer also represents that no retroactive election was made under § 1.197-1T. These representations are material representations. Based solely on Taxpayer's representations with respect to the Goodwill, we conclude that the Goodwill is not an amortizable section 197 intangible, and furthermore is not subject to depreciation under § 167. Thus, the Goodwill is not property that is of a character subject to the allowance for depreciation provided in § 167.

Because we conclude the Goodwill is not an amortizable section 197 intangible and is not property that is of a character subject to the allowance for depreciation provided in § 167, we further conclude that the Goodwill sold by Taxpayer qualifies as a capital asset under § 1221. Although § 197 now provides that goodwill and going concern value that is an amortizable section 197 intangible are not capital assets for purposes of § 1221, it does not address the treatment of goodwill and going concern value that is not an amortizable section 197 intangible, nor does it change prior law treatment of goodwill and going concern value.

[4138] See part II.Q.8.e.ii.(c) Availability of Installment Sale Deferral for Sales of Partnership Interests, especially fn. 5654, referring to part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

[4139] See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), especially fns. 5081-5085.

[4140] See part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

[4141] Code § 197(a), (d)(1)(E), (f)(3) (buyer's deduction) (see fn 1697 and the rest of part II.G.18.d Amortization of Code § 197 Intangibles); Rev. Rul. 69-643 (seller's income); *Kinney v.*

Thus, compensation for current services, which is deductible in full when paid, is much more beneficial to buyers than either of the above alternatives. Taxpayers tend to assign consideration in a sale to whatever produces the fastest deduction – ongoing services, office equipment, etc. Note that assigning a low value to goodwill or a non-compete agreement can have very practical effect – reducing or eliminating damages[4142] – if the agreement is broken, so the buyer is trading deductions for economic risk.

Even if goodwill is taxed to the seller at capital gain rates, deferred compensation[4143] is more tax-efficient than a payment for goodwill; however, the deferred compensation agreement constitutes a liability on the company's balance sheet that might impair its ability to obtain credit. The benefit of the immediate deduction for compensation for personal services is likely to be of so much benefit to the buyer that the buyer should be willing to pay extra to the seller so that the seller's proceeds after ordinary income tax exceed what the seller would have received for goodwill net of capital gain tax. For example, suppose the seller receives $100 for zero basis goodwill. If the seller's combined federal and state capital gain rate is 20%, the seller receives $80 net of tax. If the buyer pays 40% federal and state tax, the buyer must generate $167 of ordinary income to pay the $100 that it pays the seller. Thus, the buyer needs to earn $167 so that the seller receives $80 net of tax. However, if the buyer and seller both have 40% combined federal and state income taxes, then the seller would need just over $133 in ordinary income to net the same $80 after taxes. Thus, with a compensation payment of $134-$166, both the seller and buyer are better off (ignoring the deduction[4144] the buyer receives for capitalized goodwill in a purchase-of-goodwill scenario). A seller needs "strong proof" that a payment is for goodwill taxable as capital gain rather than a covenant not to compete taxable as ordinary income.[4145]

Commissioner, 58 T.C. 1038 (1972); *Coleman v. Commissioner*, T.C. Memo. 2004-126. *Recovery Group Inc. v. Commissioner*, T.C. Memo. 2010-76, held that payments under a one-year covenant not to compete agreed to in connection with the redemption of an employee's stock were deductible over 15 years. The IRS and taxpayer contested the meaning of entered into in connection with an acquisition (directly or indirectly) of an interest in a trade or business or substantial portion thereof. The court agreed with the IRS that "thereof" modifies "trade or business," and that "interest" means an ownership interest of any percentage, large or small. The court held alternatively that the employee's 23% stock ownership was substantial.

4142 A result reported to have happened in *Healthcase v. Orr*, 2016 Cal. App. Unpub. LEXIS 440 (1/20/2016) per *Business Valuation Update*, vol. 22, no. 4 (4/2016).

4143 Before working in this area, consider reading part II.Q.1.d Nonqualified Deferred Compensation, especially part II.Q.1.d.i IRS Audit Guide for Nonqualified Deferred Compensation..

4144 Although the deduction is valuable, the discounted present value is relatively small, considering that discount rates are high when the sale of a closely-held business is involved. For example, if $100 were capitalized and deducted over 15 years with a 40% tax saving, the extra tax benefit would be $2.67 per year, compared with an immediate tax saving of $20 in not having capital gain on the sale of goodwill. At a 20% discount rate, the present value of these deductions would be $12.48; at a 33% discount rate, the present value would be $7.98.

4145 *Muskat v. United States*, 554 F.3d 183 (1st Cir. 2009); *Kinney*, fn. 4141. For more on *Muskat*, see fn 5557 in part II.Q.8.b.iii Partnership Alternative to Seller-Financed Sale of Goodwill. *Dunlap v. Commissioner*, T.C. Summary Opinion 2020-10 held:

> There was no agreement between Mary Kay and Ms. Dunlap with respect to any sale of a business or goodwill. Other than the reference to goodwill in the preamble to some documents, there is no evidence in the record that would support a sale of a business interest. The payments under the FSP are calculated on the basis of sales and commissions and are being paid at a rate of 60% of a high average tiered sales activity. Lastly, Ms. Dunlap had no rights or legal

II.Q.1.c.ii. Consulting Agreement in Lieu of Covenant Not to Compete

Given that a seller needs "strong proof"[4146] that a payment is for goodwill[4147] and that payments are amortizable over 15 years if for goodwill or covenants not to compete,[4148] consider retaining the seller on a consulting agreement.[4149] The buyer might very well need the seller's cooperation to transition employees, customers, and vendors. If the purchase is amicable, hiring the seller to a lucrative consulting contract can provide not only valuable business benefits but also immediate income tax deductions.

Beware, however, that a consulting contract might very well prevent the seller from having a separation from service that might be needed under Code § 409A. Although that provision is generally viewed as applying to deferred compensation, various payments or noncash benefits triggered by a change in job status might constitute deferred compensation that might require a "separation from service" to avoid imposition of the harsh consequences of Code § 409A.[4150]

Furthermore, when a property right concerns the contractual right to perform a service and receive compensation for the service, a payment made to terminate the contract cannot be considered a capital asset unless the contract confers something more than the right to perform services or receive compensation for services performed.[4151] When an insurance company

---

relationship with the consultants and sales directors in her tiered Mary Kay activity. Accordingly, her goodwill argument does not change the outcome of this case.

4146 Because the "strong proof" rule "drives at the contracting parties' intentions," conflicting testimony as to that intent precludes summary judgment from being granted. *Cotto-Vázquez v. U.S.*, 127 A.F.T.R.2d 2021-1182 (D. P.R. 3/11/2021).

4147 See fn. 4145.

4148 See part II.Q.1.c.i Taxation When a Business Sells Goodwill; Contrast with Nonqualified Deferred Compensation.

4149 For whether a consultant is an employee, independent contractor, or partner, see *Thoma v. Commissioner*, T.C. Memo. 2020-67.

4150 See parts II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules and II.Q.1.d Nonqualified Deferred Compensation.

4151 *Trantina v. U.S.*, 512 F.3d 567 (9th Cir. 2008), held:

> The parties spend considerable time in the briefs discussing cases involving the question of whether a contractual right qualifies as a capital asset. These cases demonstrate that, when the property right asserted concerns the contractual right to perform a service and receive compensation for the service, a payment made to terminate the contract cannot be considered a capital asset unless the contract confers something more than the right to perform services or receive compensation for services performed. See, *e.g.*, *Furrer*, 566 F.2d at 1117; *Vaaler v. United States*, 454 F.2d 1120, 1122 (8th Cir. 1972) ("[T]he courts have quite uniformly held that contracts for the performance of personal services are not capital assets and that the proceeds from their transfer or termination will not be accorded capital gains treatment but will be considered to be ordinary income."); *Md. Coal & Coke Co. v. McGinnes*, 350 F.2d 293, 294 (3d Cir. 1965) (per curiam) (finding a contract giving the taxpayer an exclusive sales agency not to be a capital asset because it did not confer on the taxpayer "some interest or estate in or encumbrance upon some property with which the contract is concerned"); *United States v. Dresser Indus., Inc.*, 324 F.2d 56, 60–61 (5th Cir. 1963) (finding that the exclusive right to practice a patent did constitute a capital asset); *Nelson Weaver Realty Co. v. Comm'r*, 307 F.2d 897, 899–901 (5th Cir. 1962) (finding sale of mortgage servicing contract along with files, ledgers, and records to be a capital asset); *Dorman v. United States*, 296 F.2d 27, 29 (9th Cir. 1961) (finding that an option to become a full partner in a business venture constituted a capital asset); *Brown v. Comm'r*, 28 T.C.M. (CCH) 1330, 1332 (T.C. 1969) ("A payment in discharge of [the right to receive commissions on policies], unlinked to the policies themselves by any proprietary interest, is simply a substitute for ordinary income.").

retains all rights regarding a policies an agent sold, termination payments made to the agent cannot be considered a sale of rights with respect to those policies.[4152]

II.Q.1.c.iii. Does Goodwill Belong to the Business or to Its Owners or Employees?

For purposes of valuing a business:[4153]

> In the final analysis, goodwill is based upon earning capacity. The presence of goodwill and its value, therefore, rests upon the excess of net earnings over and above a fair return on the net tangible assets. While the element of goodwill may be based primarily on earnings, such factors as the prestige and renown of the business, the ownership of a trade or brand name, and a record of successful operation over a prolonged period in a particular locality, also may furnish support for the inclusion of intangible value. In some instances it may not be possible to make a separate appraisal of the tangible and intangible assets of the business. The enterprise has a value as an entity. Whatever intangible value there is, which is supportable by the facts, may be measured by the

---

> The question in the present case is thus whether the Corporate Agreement conferred on Trantina some right or interest beyond the right to perform the services required by the agreement or to receive compensation for the services performed under the agreement….
>
> We adopt the reasoning of the Seventh Circuit. A precondition to realizing a long-term capital gain is the ownership of a capital asset. Yet under the express terms of Trantina's Corporate Agreement with State Farm, Trantina simply had no property that could be sold or exchanged. The Corporate Agreement contains a provision nearly identical to the one that the *Baker* court found to be controlling. Trantina's Corporate Agreement states:
>
>> Information regarding names, addresses, and ages of policyholders of the Companies; the description and location of insured property; and expiration or renewal dates of State Farm policies acquired or coming into the Agent's possession during the effective period of this Agreement, or any prior agreement, except information and records of policyholders insured by the Companies pursuant to any governmental or insurance industry plan or facility, are trade secrets wholly owned by the Companies. forms and other materials, whether furnished by State Farm or purchased by the Agent, upon which this information is recorded shall be the sole and exclusive property of the Companies.
>
> Given this blanket reservation of all property rights to State Farm, it is unclear exactly what Trantina could have sold or exchanged. Trantina could not sell back to State Farm something that it already owned.

[4152] *Baker v. Commissioner*, 338 F3d 789 (7th Cir. 2003), held:

> Fundamentally, in order to have the ability to sell something, one must own it. Because Warren Baker did not own any property related to the policies, he could not sell anything. Section D of the Agreement provides:
>
>> Information regarding names, addresses, and ages of policyholders of the Companies; the description and location of insured property; and expiration or renewal dates of State Farm policies ... *are trade secrets wholly owned by the Companies*. All forms and other materials, whether furnished by State Farm or purchased by you, upon which this information is recorded *shall be the sole and exclusive property of the Companies*.
>
> (emphasis added). Thus, according to the terms of the Agreement, Warren Baker did not own anything related to the policies.
>
> As the Tax Court noted, Baker returned everything used in the daily course of business to State Farm. He returned the books, records, and customer lists because the Agreement designated them as the "sole and exclusive property" of State Farm.

Baker also dismissed the insurance agent's argument that he sold goodwill; see fn 4155 in part II.Q.1.c.iii Does Goodwill Belong to the Business or to Its Owners or Employees? This reasoning was also applied in *Pexa v. U.S.*, 121 AFTR.2d 2018-XXXX (D. CA 5/8/2018).

[4153] Rev. Rul. 59-60, Section 4.02(f).

amount by which the appraised value of the tangible assets exceeds the net book value of such assets.

"Goodwill is often defined as the expectation of continued patronage by existing customers."[4154] (However, in the insurance industry, policy records and policyholder information are the goodwill, and payments to agents tend to be for covenants not to compete.)[4155] Generally, if a business subjects its owners or employees to a covenant not to compete, the business owns the related goodwill; otherwise, generally the owners or employees own the goodwill.[4156]

[4154] *Estate of Adell v. Commissioner*, T.C. Memo. 2014-155, citing *Network Morning Ledger Co. v. United States*, 507 U.S. 546, 572-573 (1993).

[4155] *Baker v. Commissioner*, 338 F3d 789 (7th Cir. 2003) (highlighting added):

> Goodwill is the expectation of continued patronage. *Newark Morning Ledger Co. v. United States*, 507 U.S. 546, 555 (1993). Goodwill enables a purchaser to step into the shoes of the seller. *Decker v. Commissioner*, 864 F.2d 51, 54 (7th Cir. 1988) (quoting *Winn-Dixie Montgomery, Inc. v. United States*, 444 F.2d 677, 681 (5th Cir. 1971)). Courts have recognized that the insurance industry treats policy records and policyholder information as goodwill. *Schelble v. Commissioner*, 130 F.3d 1388, 1394 (10th Cir. 1997); *Marsh & McLennan, Inc. v. Commissioner*, 420 F.2d 667, 669–70 (3d Cir. 1969).
>
> As noted above, Baker did not own any assets related to the business. Goodwill cannot be transferred apart from the business with which it is connected. 38 Am.Jur.2d Goodwill § 10. We find reliance for our position in *Schelble v. Commissioner*, 130 F.3d 1388 (10th Cir. 1997) and *Vaaler v. United States*, 454 F.2d 1120 (8th Cir. 1972). In , the taxpayer argued that "extended earnings" payments made to him after terminating his position as an insurance agent constituted proceeds from the sale of goodwill . The court rejected the taxpayer's argument, finding that no sale of vendible assets occurred. *Schelble*, 130 F.3d at 1394. Citing *Elliott v. United States*, 431 F.2d 1149, 1154 (10th Cir. 1970), the court noted that for tax purposes, a sale of goodwill takes place "only when the business or a part of it, to which the goodwill attaches is sold." *Id.* at 1394. In *Vaaler v. United States*, the Eighth Circuit rejected a similar argument made by the taxpayer. It also cited *Elliott* for the same proposition, adding that as a general agent, the taxpayer built up goodwill for the insurance company, which belonged to the company. *Vaaler*, 454 F.2d at 1123; see also *Webster Investors, Inc. v. Commissioner*, 291 F.2d 192, 195 (2d Cir. 1961).
>
> While Baker built the insurance agency; the tools he used were on loan from State Farm. State Farm's termination payments were not for the sale of a business where a buyer was able to step into the seller's shoes. Baker owned nothing. Thus, he could sell no assets, including goodwill. We agree that goodwill was developed during Baker's tenure; however, it was not his to sell. Since Baker has failed to establish that the payments were consideration for the sale or exchange of a capital asset, the Commissioner's deficiency determination is upheld. One final point we briefly address: Baker asks if the purpose for the payments are not in consideration for goodwill, what are they? We agree with the Tax Court's conclusion that (a portion of) State Farm's payments were for a covenant not to compete. See, *e.g.*, *Clark v. Commissioner*, 67 T.C.M. 3105 (1994); *Foxe v. Commissioner*, 53 T.C. 21 (1969). The Agreement provides that Baker would not induce any State Farm policyholder to change coverage or solicit coverage through a competitor for one year. The tax consequences of such language are settled: the consideration a buyer pays a seller for a covenant not to compete is taxable as ordinary income. *Patterson v. Commissioner*, 810 F.2d 562, 569 (6th Cir. 1987); *Sonnleitner v. Commissioner*, 598 F.2d 464, 466 (5th Cir. 1979).

Baker similarly rejected an insurance agent's assertion that the agent sold other contractual rights for a capital gain; see fn 4152 in part II.Q.1.c.ii Consulting Agreement in Lieu of Covenant Not to Compete.

[4156] Shin, Lightened Taxpayer Burdens in the Sale of Personal Goodwill After *H&M, Inc. v. Commissioner*, *Tax Lawyer*, Vol. 67, No. 2 (Winter 2014), saved as Thompson Coburn LLP doc. no. 6177834; *Martin Ice Cream Co. v. Commissioner*, 110 T.C. 189 (1998); *Norwalk v. Commissioner*, T.C. Memo. 1998-279; *Bross Trucking, Inc.. v. Commissioner*, T.C. Memo. 2014-107 (lack of non-compete precluded corporate

Personal goodwill reflects the owners' relationships with customers; to prove that these relationships had value, the purchasing business should hire the sellers and not just sign a covenant not to compete with them.[4157] Generally, a sale of goodwill is recognized only if paired with the sale of a business; . *Potter v. Commissioner*, T.C. Memo. 2018-153, held:

> The questions of whether goodwill existed and was transferred are questions of fact. *Butler v. Commissioner,* 46 T.C. 280, 287 (1966). Petitioners scream for *Martin Ice Cream Co. v. Commissioner* (Martin Ice Cream), 110 T.C. 189 (1998), to rule the day because what Mr. Potter "sold" were his relationships with the various buyers of Green Country's products. In *Martin Ice Cream*, 110 T.C. at 207-208, the Court held that the benefits of the relationships with supermarket chains that a shareholder, Arnold Strassberg, cultivated were not the corporation's assets; Mr. Strassberg was the owner and seller of those assets. Thus, the corporation - *Martin Ice Cream Co.* - was not liable for tax due on payments for the shareholder's assets. The Court decided that the goodwill was not a corporate asset in Martin Ice Cream and did not address how the individual shareholder—Mr. Strassberg - should be taxed on the payments. See

---

goodwill regarding owner-officer's relationships; owner's sons developed relationships with owner's customers when owner shut down owner's business due to regulatory hassles and sons started new corporation; workforce intangible not deemed transferred when only 50% of the employees of the old corporation worked for the new corporation); *Estate of Adell v. Commissioner*, T.C. Memo. 2014-155 (lack of non-compete precluded corporate goodwill regarding owner-officer's relationships; customers did business with owner's son because they trusted the son personally; son was qualified to run the business). Conversely, goodwill generated while a covenant not to compete is in place is owned by the business entity, even though it was generated by the professional who was the sole owner of a personal service corporation. *Howard v. U.S.*, 106 A.F.T.R.2d 2010-5533 (E.D. Wash. 2010), *aff'd* 108 AFTR.2d 2011-5993 (9th Cir. 2011); *Kennedy v. Commissioner*, T.C. Memo. 2010-206 (payments were consideration for services rather than goodwill; payments varied based on success of seller's efforts to transition customers to buyer; part of payments were for non-compete; taxpayer failed to prove economics of allocation, the court finding that goodwill was a tax-motivated afterthought that occurred late in the negotiations) (distinguished from *Martin Ice Cream*) (self-employment tax imposed; reliance on tax advisor avoided negligence penalty); *H & M, Inc. v. Commissioner*, T.C. Memo. 2012-290 (insurance agent's name and talents were more highly valued than his incorporated insurance agency's name, so compensation payments to agent were not disguised payments to his agency followed by dividends to him; characterization as goodwill or compensation was not raised). See Kliegman and Turkenich, Goodwill Games: Determining the Existence And Ownership of Goodwill In a Closely Held Business, *T.M. Memorandum* (BNA) (9/22/2014).
For more details on sending business as a gift, see fn., part III.B.1.a.v Sending Business.

[4157] *Solomon v. Commissioner*, T.C. Memo. 2008-102, held:

> The *Martin Ice Cream* case is distinguishable from this case. First, the record does not persuade us, nor do we find as a fact, that the value of Solomon Colors in the market was attributable to the quality of service and customer relationships developed by Robert Solomon or Richard Solomon. Rather, the record reflects our finding that Solomon Colors, as a business of processing, manufacturing, and sale, rather than one of personal services, did not depend entirely on the goodwill of its employees for its success. See *Schilbach v. Commissioner*, T.C. Memo. 1991-556; *cf. Longo v. Commissioner*, T.C. Memo. 1968-217. Second, unlike the founder of Haagen-Dazs in *Martin Ice Cream*, who signed an agreement with Strassberg in his personal capacity, Robert Solomon and Richard Solomon were not named as the sellers of any asset but were included in the sale in their individual capacities solely to guarantee that they would not compete with Prince. Third, the fact that Prince required noncompete agreements, but not employment or consulting agreements, of Robert Solomon and Richard Solomon makes it unlikely that Prince was purchasing the personal goodwill of these individuals.

> *Kennedy v. Commissioner*, T.C. Memo. 2010-206, 100 T.C.M. (CCH) 268, 274-275 (2010). Thus, *Martin Ice Cream* is not controlling here.
>
> What is controlling is the fact that Mr. Potter did not sell a trade or business. See *Baker v. Commissioner*, 118 T.C. 452 (2002) (holding that the taxpayer did not sell a trade or business to which goodwill could attach), *aff'd*, 338 F.3d 789 (7th Cir. 2003). "To qualify as the sale of goodwill, the taxpayer must demonstrate that he sold 'the business or a part of it, to which the goodwill attaches." *Id*. at 465 (quoting *Schelble v. Commissioner*, 130 F.3d 1388, 1394 (10th Cir. 1997), *aff'g* T.C. Memo. 1996-269). Although a party to the asset purchase agreement between Oldcastle and Green Country, Mr. Potter did not sell any assets to Oldcastle or to Green Country. The word "sale" means "a transfer of property for a fixed price in money or its equivalent". *Schelble v. Commissioner*, 130 F.3d at 1394 (quoting *Iowa v. McFarland*, 110 U.S. 471, 478 (1884)); see also *Commissioner v. Brown*, 380 U.S. 563, 571 (1965). Potter Sales' office furniture, computers, and vehicles were included in the assets Oldcastle acquired when it purchased Green Country's assets, but it paid nothing for them.[10] Additionally, Potter Sales had only one client, Green Country. The relationships that Mr. Potter fostered were with Green Country's clients; the client contacts were not his to sell. See *Foxe v. Commissioner*, 53 T.C. 21, 26 (1969) (finding that an insurance salesman's personal contacts with customers did not amount to goodwill because the insurance company owned the customer contacts). Therefore, the 2010 termination payment was for Mr. Potter's right to service Green Country's clients and receive ordinary income; it was not for the sale of Mr. Potter's goodwill, because the client contacts were not his to sell.
>
> [10] Nor did Mr. Potter "exchange" property for another property that was materially different in either kind or extent. See sec. 1.1001-1(a), Income Tax Regs.

Sometimes a variety of factors reduce a company's goodwill, and having the next generation start a new company without so much baggage creates a viable company without making a gift of goodwill.[4158]

If the business is inside an entity taxed as a C or an S corporation, paying for the business' going concern value (of which goodwill tends to be a very significant part) results in short-term double or triple taxation.[4159] If the entity has only one owner, one can set the stage for a more tax-advantaged exit strategy by ***not*** subjecting the owner to a covenant not to compete. For a multiple-owner entity, the business reasons might trump the tax issues, so one might more strongly consider migrating to the ideal business structure[4160] so that one can put these protections in place as soon as possible without complicated issues. The problem with migrating from a corporation to a pass-through entity is that the IRS will argue that goodwill is being distributed from the corporation to the owners and then into the new entity, and a distribution from a corporation to its owners is a taxable event.[4161] If the owners of the new

[4158] See part II.Q.7.h.v Taxpayer Win in *Bross Trucking* When IRS Asserted Corporation Distribution of Goodwill to Shareholder Followed by Gift to Shareholder of New Corporation (2014).
[4159] See part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis.
[4160] See parts II.E Recommended Structure for Entities, II.Q.7.h Distributing Assets; Drop-Down into Partnership and II.Q.8.b.iii Partnership Alternative to Seller-Financed Sale of Goodwill.
[4161] See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

entity are different from but are the natural objects of the bounty of the owners of the original entity, the IRS might also argue that the deemed distribution and transfer constitute a gift.[4162]

A sole proprietorship or partnership does not face these concerns. A sole proprietorship can convert into a partnership tax free by granting the new owner a profits interest in the partnership.[4163] The partnership can then engage in a redemption that obtains the most income tax-efficient result. Thus, a sole proprietorship or partnership is free to enter into covenants not to compete without complicating income tax exit strategies.

II.Q.1.c.iv. Goodwill (and other intangible) Anti-Churning Rules

Generally, an anti-churning rule provides that goodwill and going concern value are not amortizable if:[4164]

1. The intangible was held or used at any time on or after July 25, 1991, and on or before such date of enactment by the taxpayer or a related person,

2. The intangible was acquired from a person who held such intangible at any time on or after July 25, 1991, and on or before such date of enactment, and, as part of the transaction, the user of such intangible does not change, or

3. The taxpayer grants the right to use such intangible to a person (or a person related to such person) who held or used such intangible at any time on or after July 25, 1991, and on or before such date of enactment.

If the business did not exist on July 25, 1991, the anti-churning would not apply because the goodwill did not yet exist.[4165]

For purposes of these rules, a person is "related" to any person only if the related person bears a relationship to such person specified in Code § 267(b)[4166] or 707(b)(1),[4167] or the related person and such person are engaged in trades or businesses under common control.[4168] In applying Code § 267(b) or 707(b)(1) to this test, use 20% instead of 50%.[4169] A person shall be treated as related to another person if such relationship exists immediately before or immediately after the acquisition of the intangible involved.[4170]

4162 See part III.B.1.a.v Sending Business. Taxpayers won, but it cost them significant legal fees.
4163 See part II.M.4.f Issuing a Profits Interest to a Service Provider. The new owner can also contribute capital to the new business, which generally is tax-free (see part II.M.3 Buying into or Forming a Partnership), but be wary of part II.M.3.e Exception: Disguised Sale.
4164 Code § 197(f)(9)(A).
4165 Letter Ruling 200551018, which noted the following representations:

> … Taxpayer represents that Taxpayer began operations during 1994. Furthermore, Taxpayer represents that none of the assets used in the formation of Taxpayer constituted a previous trade or business. Thus, Taxpayer's goodwill asset did not exist during the section 197(f)(9) transition period, and the anti-churning rules of section 197(f)(9) do not apply.

4166 Code § 267(b) is reproduced in part II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses.
4167 For a description of Code § 707(b), see part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.
4168 Code § 197(f)(9)(C)(i). The common control test used is that provided in Code § 41(f)(1)(A) and (B).
4169 Code § 197(f)(9)(C)(i).
4170 Code § 197(f)(9)(C)(ii).

However, if the anti-churning rule applies only because the related party's ownership is more than 20% instead of more than 50%, then this rule is subject to an exception.[4171] To qualify for the exception, the person from whom the taxpayer acquired the intangible must elect to recognize gain on the disposition of the intangible and to pay a tax on such gain which, when added to any other income tax on such gain under this title, equals such gain multiplied by the highest income tax rate applicable to such person.[4172] If this exception applies, then the goodwill or concern value is prevented from being amortized only to the extent that the taxpayer's adjusted basis in the intangible exceeds the gain recognized.[4173]

Also, the anti-churning rule does not apply to the acquisition of any property by the taxpayer if the basis of the property in the taxpayer's hands is determined under Code § 1014(a) (basis adjustment by reason of death).[4174]

Code § 197 also does not permit amortization of any intangible acquired in a transaction, one of the principal purposes of which is to avoid the anti-churning rules.[4175]

Reorganizing a tiered structure using nontaxable contributions under Code § 721[4176] and nontaxable distributions under Code § 731[4177] may avoid triggering the anti-churning rules so as to allow the pre-transaction amortization of post-1993 intangibles to continue.[4178]

With respect to any increase in the basis of partnership property under Code § 732, 734, or 743, determinations under the anti-churning rules are made at the partner level, and each partner shall be treated as having owned and used such partner's proportionate share of the partnership assets.[4179] See part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).

Letter Ruling 201906002 sets forth applicable rules and reasoning for partnerships:[4180]

> Section 197(f)(9)(E) provides that with respect to any increase in the basis of partnership property under §§ 732, 734, or 743, determinations under § 197(f)(9) shall be made at the partner level and each partner shall be treated as having owned and used such partner's proportionate share of the partnership assets.

[4171] Code § 197(f)(9)(B)(i).
[4172] Code § 197(f)(9)(B)(ii).
[4173] Code § 197(f)(9)(B).
[4174] Code § 197(f)(9)(D).
[4175] Code § 197(f)(9)(E). This provision also prevents amortization of any asset acquired in a transaction that was postponed to avoid the requirement that the intangible be acquired after the date of the enactment of Code § 197.
[4176] See part II.M.3 Buying into or Forming a Partnership, especially part II.M.3.a General Rule: No Gain Or Loss on Contribution to Partnership.
[4177] See part II.Q.8.b.i Distribution of Property by a Partnership, especially part II.Q.8.b.i.(a) Code § 731: General Rule for Distributions.
[4178] Letter Ruling 201709003.
[4179] Code § 197(f)(9)(E). For details, see Reg. § 1.197-2(h)(12); see also fn. 3847, found in part II.P.1.a.i Allocations of Income in Partnerships. For an example of the effect of a Code § 754 election on goodwill that is being amortized, see fn. 5795 in part II.Q.8.e.iv Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform).
[4180] See also text accompanying and preceding fn 5676 in part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).

Section 1.197-2(g)(3) provides that any increase in the adjusted basis of a § 197 intangible under...§ 743(b) (relating to the optional adjustment to the basis of partnership property after transfer of a partnership interest) is treated as a separate § 197 intangible. For purposes of determining the amortization period under § 197 with respect to the basis increase, the intangible is treated as having been acquired at the time of the transaction that causes the basis increase, except as provided in § 1.743-1(j)(4)(i)(B)(2) (dealing with an increase in the basis of the item of the partnership's recovery property under § 743(b) that is attributable to § 704(c) built-in gain when the partnership elects to use the remedial allocation method).

Section 1.197-2(h)(1)(i) provides that this paragraph (h) applies to § 197(f)(9) intangibles. For this purpose, § 197(f)(9) intangibles are goodwill and going concern value that was held or used at any time during the transition period and any other § 197 intangible that was held or used at any time during the transition period and was not depreciable or amortizable under prior law.

Section 1.197-2(h)(1)(ii) provides that the purpose of the anti-churning rules of § 197(f)(9) and § 1.197-2(h) is to prevent the amortization of § 197(f)(9) intangibles unless they are transferred after the applicable effective date in a transaction giving rise to a significant change in ownership or use. Special rules apply for purposes of determining whether transactions involving partnerships give rise to a significant change in ownership or use. See § 1.197-2(h)(12). The anti-churning rules are to be applied in a manner that carries out their purpose.

Section 1.197-2(h)(6)(i) provides, in pertinent part, that a person is related to another person for purposes of § 1.197-2(h) if the person bears a relationship to that person that would be specified (A) in § 267(b) (determined without regard to § 267(e)), and by substitution, § 267(f)(1), if those sections were amended by substituting 20 percent for 50 percent or (B) in § 707(b)(1) if that section were amended by substituting 20 percent for 50 percent.

Section 1.197-2(h)(6)(ii) provides that a person is treated as related to another person for purposes of § 1.197-2(h) if the relationship exists, in the case of a single transaction, immediately before or immediately after the transaction in which the intangible is acquired.

Section 1.197-2(h)(12)(i) provides that in determining whether the anti-churning rules apply to any increase in the basis of a § 197(f)(9) intangible under § 743(b), the determinations are made at the partner level and each partner is treated as having owned and used the partner's proportionate share of partnership property. In determining whether the anti-churning rules apply to any transaction under another section of the Internal Revenue Code, the determinations are made at the partnership level, unless under § 1.701-2(e) the Commissioner determines that the partner level is more appropriate.

Section 1.197-2(h)(12)(v)(A) provides, generally, that the anti-churning rules do not apply to an increase in the basis of a § 197 intangible under § 743(b) if the person acquiring the partnership interest is not related to the person transferring the partnership interest. In addition, the anti-churning rules do not apply to an increase in the basis of a § 197 intangible under § 743(b) to the extent that ...

(2) The partnership interest being transferred was acquired after the partnership acquired the § 197(f)(9) intangible, provided -

(i) The § 197(f)(9) intangible was acquired by the partnership after August 10, 1993, and is not amortizable with respect to the partnership;

(ii) The partnership interest being transferred was held after the partnership acquired the § 197 intangible by a person or persons (the post-contribution person or persons) other than the person transferring the partnership interest or persons who were related to the person transferring the partnership interest; and

(iii) The acquisition of such interest by the post-contribution person or persons was not part of a transaction or series of related transactions in which the person transferring the partnership interest or persons related to the person transferring the partnership interest acquired such interest.

Section 1.197-2(h)(12)(v)(B) provides that, solely for purposes of § 1.197-2(h)(12)(v)(A)(1) and (2), a partner who acquires an interest in a partnership in exchange for a contribution of property to the partnership is deemed to acquire a pro rata portion of that interest in the partnership from each person who is a partner in the partnership at the time of contribution based on each such partner's proportionate interest in the partnership.

Rev. Rul. 87-115, 1987-2 C.B. 163, states that when an upper-tier partnership has a § 754 election in effect, the transfer of an interest in the upper-tier partnership is treated as a transfer of an interest in the upper-tier partnership's interest in the lower-tier partnership for purposes of § 743. Such an election shall apply with respect to all distributions of property by the partnership and to all transfers of interests in the partnership during the taxable year when such election was filed and all subsequent years, unless revoked by the partnership, subject to § 1.754-1(c).

Section 754 provides that if a partnership files an election in accordance with regulations prescribed by the Secretary, the basis of partnership property shall be adjusted ...in the case of a transfer of a partnership interest, in the manner provided in § 743. Such an election shall apply with respect to all distributions by the property by the partnership and to all transfers of interests in the partnership during the taxable year when such election was filed and all subsequent years, unless revoked by the partnership, subject to § 1.754-1(c).

Section 743(b) provides, in part, that in the case of a transfer of an interest in a partnership by sale or exchange, a partnership with respect to which the election provided in § 754 is in effect shall increase the adjusted basis of the partnership property by the excess of the basis to the transferee partner of his interest in the partnership over his proportionate share of the adjusted basis of the partnership property.

Of the requirements for amortization under § 197, only the anti-churning rules are in question in this case. Special rules are provided for partnerships in § 1.197-2(h)(12), and specific rules for § 743(b) basis adjustments are provided in § 1.197-2(h)(12)(v).

Rev. Rul. 87-115 is described in part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).

Letter Ruling 201906002 reasoned:[4181]

> On Date1 (after August 10, 1993), Partnership3 was formed by Partnership5 and Partnership1 in a transaction that qualified for non-recognition under § 721(a). Partnership5 contributed the Intangible Asset to Partnership3 in exchange for its interest in Partnership3, and Partnership1 contributed cash and other assets in exchange for its interest in Partnership3. Partnership3 has used the Intangible Asset since then in its trade or business. Under § 1.197-2(h)(12)(v)(B), each of the partners of Partnership3 was deemed to acquire their interest in Partnership3 from the other, and each was deemed to acquire a proportional interest in the assets of Partnership3. Since the Intangible Asset was not amortizable in Partnership5's hands, it is also not amortizable in the hands of Partnership3. Section 197(f)(2) and § 1.197-2(g)(2). This will continue to be true after the transactions subject to this ruling occur.
>
> This ruling addresses the § 743(b) adjustments that are allocable to the Intangible Asset that result from the transfer of Partnership2 and Partnership3 interests to NewCo2, a newly formed corporation in a non-taxable transaction. Each § 743(b) adjustment results in a separate intangible asset that is analyzed under § 1.197-2(h)(12)(v) at the partner level. Sections 1.197-2(g)(3) and 1.197-2(h)(12)(i). Partners are treated as directly owning and using their proportionate share of partnership assets. Section 197(f)(9)(E).
>
> In this case, the anti-churning rules do not apply to a § 743(b) adjustment if one of two tests is met, either (i) the transferee is not related to the transferor or (ii) the requirements of § 1.197-2(h)(12)(v)(A)(2) are met. The basis adjustments do not satisfy the first test because the transferor and the transferee of any actual or deemed transfer of Partnership3 interests as a result of the Transaction will be related within the meaning of § 197(f)(9)(C)(i) and § 1.197-2(h)(6) immediately before and after the Transaction. Thus, any transferee entitled to a basis adjustment will be related to the transferor for purposes of the anti-churning rules. Therefore, the basis adjustments will be amortizable under § 197(a) only if the requirements of § 1.197-2(h)(12)(v)(A)(2) are met.
>
> *Principals Transactions*
>
> In the case of the interests in Partnership3 that Partnership1 and Partnership2 acquired in the Principals transactions, the Partnership3 interests that are transferred to NewCo2 were originally owned by Partnership5 and distributed to the exercising Principal through a series of non-recognition transactions. Taxpayer has represented that no Principal exercised their D in connection with, or as part of a plan that included, the formation of Partnership3.
>
> With respect to the interests in Partnership3 acquired by Partnership1 and Partnership2 from the Principals, the requirements of § 1.197-2(h)(12)(v)(A)(2) are met because:
>
> (i) The Principals transactions occurred after Partnership3 acquired the Intangible Asset and, therefore, the interests in Partnership3 that Partnership1 and Partnership2 acquired in the Principals transactions occurred after Partnership3 acquired the Intangible Asset. Also, Partnership3 acquired the Intangible Asset

[4181] See also text accompanying and preceding fn 5676 in part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).

after August 10, 1993, and the Intangible Asset is not amortizable in the hands of Partnership3;

(ii) The Principals' interests in Partnership3 that are being transferred were held after Partnership3 acquired the Intangible Asset by Partnership5, a person other than Partnership1 or Partnership2. Further, Taxpayer has represented that Partnership5 has never been related to Partnership1 or its predecessor, or Partnership2, within the meaning of § 197(f)(9)(C)(i) and § 1.197-2(h)(6); and

(iii) The acquisition of the interests in Partnership3 by Partnership5 was not part of a transaction or series of related transactions in which Partnership1 and Partnership2 acquired its Partnership3 interest from the Principals. That is, the exercise of the D occurred in transactions independent from the formation of Partnership3.

Public Trading

With respect to the interests in Partnership3 acquired by Partnership1 upon the formation of Partnership3 on Date1, the requirements of § 1.197-2(h)(12)(v)(A)(2) are met because:

(i) Partnership1 acquired its interest in Partnership3 after Partnership3 acquired the Intangible Asset. Also, Partnership3 acquired the Intangible Asset after August 10, 1993, and the Intangible Asset is not amortizable in the hands of Partnership3; and

(ii) In its letter dated July 31, 2018, Taxpayer represents, subject to confirmation by ongoing diligence, Taxpayer reasonably estimates that as of Date3, through public trading and issuances of limited partnership interests, [Redacted Text] percent or more of the economic interests in Partnership1 have changed ownership since Partnership1 acquired its interests in Partnership3 in Year1.

As stated in Rev. Rul. 87-115, when an upper-tier partnership has a § 754 election in effect, any § 743(b) adjustment resulting from the deemed transfer is segregated and allocated solely to the transferee of the upper-tier partnership interest.

Further, with respect to any increase in the basis of partnership property under § 743, a partnership is treated as an aggregate of its owners under the anti-churning rules. Section 197(f)(9)(E).

Applying § 1.197-2(h)(12)(i), for purposes of § 1.197-2(h)(12)(v)(A)(2)(iii), the public owners of Partnership1 are treated as acquiring interests in Partnership3 when each public owner purchased an interest in Partnership1, subsequent to the formation of Partnership3 in Year1. Because the public owners of Partnership1 acquired interests in Partnership3 after those interests were held by unrelated owners in transactions independent from the formation of Partnership3, § 1.197-2(h)(12)(v)(A)(2)(ii) and (iii) are satisfied for those acquisitions.

Based on Taxpayer's representation in a letter dated July 31, 2018 that, Taxpayer reasonably estimates that as of Date3, which is one business day before Date 4, through public trading and issuances of limited partnership interests, [Redacted Text] percent or more of the economic interests in Partnership1 have changed ownership since Partnership1 acquired its interests in Partnership3 in Year1, the increases to the tax basis of the Intangible Asset for the benefit of Newco2 or Partnership2 under § 743(b) resulting from Partnership1's transfer of interests in Partnership3 to Newco2 are amortizable under § 197(a) to the extent those interests were treated as previously acquired by public investors since the formation of Partnership3 on Date1.

CONCLUSIONS

Based solely on the facts and representations submitted and the law and analysis as set forth above, we rule that the increases to the tax basis of the Intangible Asset, a § 197(f)(9) intangible, under § 743(b) for the benefit of NewCo2 or Partnership2, that result from the Transaction will be amortizable under § 197(a) to the extent those basis adjustments relate to interests that (i) were previously acquired from the Principals or (ii) were treated as previously acquired by public investors subsequent to the formation of Partnership3 on Date1.

Except as expressly set forth above, no opinion is expressed or implied concerning the federal tax consequences of the facts described above under any other provision of the Code or regulations. Specifically, no opinion is expressed or implied concerning the federal income tax treatment of any transactions described in this letter, including the Transaction that Taxpayer represents occurred on Date4.

This letter ruling is conditioned upon Taxpayer demonstrating the extent that the ownership of Partnership1's interests changed between Date1 and Date3.

II.Q.1.d. Nonqualified Deferred Compensation

For draconian measures that can apply to compensation paid in a year different from the year is which it was earned (as well as detrimental balance sheet effects), see part II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules.

II.Q.1.d.i. IRS Audit Guide for Nonqualified Deferred Compensation and Other Noncash Compensation (other than fringe benefits)

In "Nonqualified Deferred Compensation Audit Techniques Guide (June 2015)," the IRS explained its view on deferred compensation and similar tools and described audit techniques.[4182]

II.Q.1.d.ii. Using Nonqualified Deferred Compensation to Facilitate a Sale

II.Q.1.d.ii.(a). Income Tax Issues when Using Nonqualified Deferred Compensation to Facilitate a Sale

A common tactic had been to pay the seller compensation for past services rendered. The theory was that, during its formative years, the business did not have the financial ability to compensate the owner for all that the owner did to develop the business into the successful operation it is today. When the business would be sold, finally the business would have

[4182] LB&I-04-0615-005, found at http://www.irs.gov/Businesses/Corporations/Nonqualified-Deferred-Compensation-Audit-Techniques-Guide.

sufficient resources to express its gratitude for the owner's past services. The business might pay the owner all at once; or, it might pay this bonus over time to provide the owner with a nice stream of retirement income. This compensation could be paid by the buyer or the seller. If the buyer makes the payments, it deducts them as it makes them and reduces the purchase price to take into account the present value of the payments. If the seller makes the payments, the seller would want to deduct the payments against the sale proceeds or against the interest or income equity component of any deferred sale proceeds.[4183]

Deferred compensation may help with a stock sale that is not treated as an asset sale. Deferred compensation can backfire in an asset sale.[4184]

Under 2017 tax reform, the service recipient may have a lower rate as a C corporation or as a pass-through entity than the service provider. See part II.E.1 Comparing Taxes on Annual Operations of C Corporations and Pass-Through Entities. This has always been a problem when the compensation paid exceeds ordinary taxable income, but now it may apply regarding most or all of the deferred compensation payments.

Also, under Code § 409A, one is required to have a written plan in place as soon as a legally binding right to nonqualified deferred compensation exists.[4185] Thus, if at the time of sale compensating the owner for past services is reasonable and necessary,[4186] and the entity can show that a legally binding right to compensation for past services did not exist until that time, then the strategy described in the preceding paragraph may be used. Absent a prior written plan, however, convincing a court that the owner was undercompensated might be very difficult.[4187]

[4183] The seller would not want to liquidate the entity that owned the business until after these payments are made. Otherwise, the payments would constitute an additional capital loss or reduction of capital gain rather than a deduction against ordinary income. *Arrowsmith, Exec. v. Commissioner*, 344 U.S. 6 (1952).

[4184] See fn 5771 in part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

[4185] A plan is any arrangement or agreement providing for a deferral of compensation. Code § 409A(d)(1), (3). If the payment is reasonable because it relates to past services, then it constitutes deferred compensation, and its material terms must be documented in writing to satisfy Code § 409A. Reg. § 1.409A-1(c)(3)(i). The written plan must be in place when the service provider obtains a legally binding right to the compensations. Reg. § 1.409A-1(a)(1). One might argue that compensation was earned in a prior year, but there was no legally binding right to payments based on that service, and now it is necessary and reasonable to pay for those past services to retain the employee. *Aries Communications Inc. v. Commissioner*, T.C. Memo. 2013-97 (comparing actual amounts paid in prior years against what was shown to have been higher reasonable compensation for those years), following the factors in *Elliotts* in fn. 31 as well the independent investor test of *Metro Leasing & Dev. Corp. v. Commissioner*, 376 F.3d 1015, 1019 (9th Cir. 2004), *aff'g* 119 T.C. 8 (2002). Although the author would make such an argument regarding past services on audit, the author would prefer to have more certainty when planning in light of Code § 409A's expansive reach. See part II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules.

[4186] See part II.A.1.b.i Compensating Individuals, especially fn. 31.

[4187] *PK Ventures, Inc. v. Commissioner*, T.C. Memo. 2006-36, *aff'd sub nom. Rose v. Commissioner*, 101 A.F.T.R.2d 2008-1888 (11th Cir. 2008), disallowed deductions for such deferred compensation beyond what the IRS conceded. *Thousand Oaks Residential Care Home I, Inc. v. Commissioner*, T.C. Memo. 2013-10, found credible testimony that compensation was intended as catchup compensation – payment of back salaries that were not paid in prior years due to insufficient cash flow. However, the court applied the independent investor test (see fn. 31) to determine that the catch-up compensation was unreasonably high.

A more conservative approach would be to have a plan in place when the business is doing well but is not yet sold, which plan vests over time. That strategy is described later.[4188] Alternatively, consider paying an immediate lump sum if a plan is not already in place and the payor has enough income to absorb the deduction.[4189] An immediate lump sum payment often is very unattractive to the buyer (who has cash flow issues and might not need that much deduction in a single year) or seller (who might rather receive payments over time to avoid accelerating income tax if adequate safeguards are in place to protect the payment).

Deferred compensation in an S corporation will not raise second-class of stock issues unless a principal purpose of the agreement is to circumvent the single class of stock rules.[4190]

II.Q.1.d.ii.(b). Balance Sheet Effects of Deferred Compensation

Before establishing a deferred compensation agreement, ask the company's outside CPA to determine what the balance sheet effect is going to be.

Then have the client take that information to the company's lenders to discuss the impact on balance sheet loan covenants. Same with any companies that provide construction bonds, etc., if the company is in such a line of business.

I have seen the balance sheet liability cause deferred compensation agreements to be killed.

[4188] See part III.B.7.c.vi Deferred Compensation.

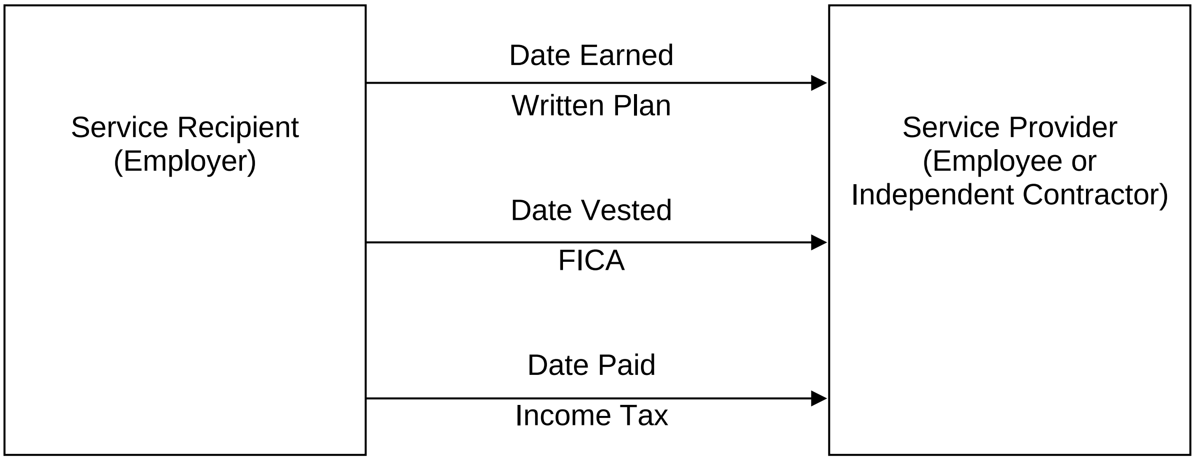
[4189] A special exception to Code § 409A applies to payments that occur immediately after the payment becomes vested if the taxpayer can prove that the payment was contingent on continuing to provide services from the date the service had been performed until the date that occurred during the current year. Reg. § 1.409A-1(b)(4)(i). The preamble to the final regulations, T.D. 9321, rejected cross-referencing existing rules:

> The final regulations generally adopt the definition of substantial risk of forfeiture set forth in the proposed regulations. Several commentators requested that the definition of substantial risk of forfeiture be the same as the definition of substantial risk of forfeiture in § 1.83-3(c). However, the definition of substantial risk of forfeiture for purposes of compensatory transfers of property under section 83 reflects different policy concerns from those involved in section 409A, and there are also practical differences between transfers of restricted property and promises to pay deferred compensation. This is reflected in the provisions of section 409A(e)(5), directing the Secretary of the Treasury Department to issue regulations disregarding a substantial risk of forfeiture in cases where necessary to carry out the purposes of section 409A. Accordingly, the final regulations do not adopt this suggestion.

[4190] See part II.A.2.i.iv Providing Equity-Type Incentives without Violating the Single Class of Stock Rules, especially fns. 266-267.

II.Q.1.d.iii. Timeline for FICA and Income Taxation of Deferred Compensation

Here is a timeline for FICA and income taxation of deferred compensation when the service recipient is not a tax-exempt entity:



Date Earned. Need to have written plan in place before service provider obtains legally enforceable rights – either required or best practice to be in place before performing service.

Date Vested. "Vested" corresponds to no further obligation to perform services. FICA will be due on present value[4191] and will not be due when the benefits are paid.[4192] This vesting is often beneficial when employee's compensation, for the year in vesting occurs, exceeds the taxable wage base ($160,200 in 2023 and $168,600 in 2024) because it is taxed at 2.9% (1.45% x 2) or 3.8% (for compensation in excess of $200,000 for a single person or $250,000 for a married person filing jointly) instead of 15.3% (7.65% x 2).[4193] The employer and employee can negotiate whether the employer should pay the employee an additional bonus to cover the additional FICA withholding in the year of vesting. On one hand, the employee might not have the cash flow to pay the FICA, since the employee has not been paid this deferred amount. On the other hand, the employee's share of FICA is properly taxed to the employee, and it is taxed at a lower rate than it would be if the plan had not been in effect, so it's only fair for the employee to pay this additional FICA. Note, however, that the FICA deferred compensation regulations do not provide a discount for the credit risk (that the employer might not be able to

---

[4191] Reg. § 31.3121(v)(2)-1(c)(2).

[4192] Code § 3121(v)(2)(B). Reg. § 31.3121(v)(2)-1(d)(2) provides how much income on this initially taxed amount is also excluded from FICA wages when paid.

[4193] FICA tax (for employer and employee combined, or for self-employment tax purposes) is 15.3% on annual income up to the taxable wage base (TWB) and 2.9% on all annual income above the TWB until $200,000 (single) or $250,000 (married), above which it is 3.8%. FICA consists of Old-Age, Survivors, and Disability Insurance benefits (OASDI) and Medicare's Hospital Insurance program (HI). The OASDI tax is 6.2% for employer and 6.2% for employee, for a total of 12.4%, imposed only up to the TWB. The HI tax is 1.45% for employer and 1.45% for employee, imposed on all FICA wages. See http://www.ssa.gov/OACT/COLA/cbb.html for the past and current TWB; see also part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax. Most of the FICA tax on the present value will be at the lower 2.9% or 3.8% rate. When payments are made in future years, they will not be subject to FICA tax. This could save around $15,959 of FICA tax each year ($128,700 TWB for 2018, multiplied by the 12.4% spread between 15.3% and 2.9%; if wages were taxed at 3.8% the savings would be $14,801). The savings is slightly less than indicated, because it does not consider that the employer receives a deduction for the employer's one-half portion of FICA.

pay) that the employee assumes,[4194] and the employee cannot get the FICA back if the employer defaults.[4195]

Date Paid. Income tax is due when paid or constructively received, but FICA is not due since that was already paid.[4196] Code § 409A places strict limits on events that accelerate payment and events that delay payment.

[4194] Reg. § 31.3121(v)(2)-1(c)(2)(ii) provides:

> For purposes of this section, the present value must be determined as of the date the amount deferred is required to be taken into account as wages under paragraph (e) of this section using actuarial assumptions and methods that are reasonable as of that date. For this purpose, a discount for the probability that an employee will die before commencement of benefit payments is permitted, but only to the extent that benefits will be forfeited upon death. In addition, the present value cannot be discounted for the probability that payments will not be made (or will be reduced) because of the unfunded status of the plan, the risk associated with any deemed or actual investment of amounts deferred under the plan, the risk that the employer, the trustee, or another party will be unwilling or unable to pay, the possibility of future plan amendments, the possibility of a future change in the law, or similar risks or contingencies. Nor is the present value affected by the possibility that some of the payments due under the plan will be eligible for one of the exclusions from wages in section 3121(a).

[4195] *Balestra v. U.S.*, 803 F.3d 1363 (Ct. Fed. Cl. 2014), holding:

> Sections 3101(b) and 3121(v)(2) required these benefits to be calculated and taxed when he retired, but do not require the use of a risk-adjusted discount rate nor a refund corresponding to the benefits plaintiff never received.

The Federal Circuit, at 803 F.3d 1363 (2015), affirmed the Court of Claims, validating Reg. § 31.3121(v)(2)-(1)(c)(2)(ii):

> Treasury's path to calculating the amount deferred in terms of the compensation's present value without consideration of an employer's financial condition is reasonably discernable. Treasury explained that it sought simple, workable, and flexible rules when valuing future benefits. It devised a regulation that satisfied these goals while comporting with the governing statute. This is neither arbitrary nor capricious. It may seem unfair in a specific instance such as this, but in balancing the desire for simplicity against the ideal of ultimate comprehensiveness, the agency must be allowed a reasonable degree of discretion. We cannot say that this one example of consequent unfairness by the agency results in invalidating the rule-making.

[4196] However, if an amount deferred is required to be taken into account in a particular year, but the employer fails to pay the additional FICA tax resulting from that amount, then the amount deferred and the income attributable to that amount must be included as wages when actually or constructively paid. Reg. § 31.3121(v)(2)-1(d)(1)(ii)(A). An employer that fails to withhold upfront and then causes the employees to pay more FICA when they retire is liable to the employees. *Davidson v. Henkel Corporation*, 115 A.F.T.R.2d ¶ 2015-321 (D. Mich. 2015). AM 2017-001 clamps down to an extent when employers do not follow the rules:

> As noted above, § 31.3121(v)(2)-1(d)(1)(ii) describes the steps to be taken if an employer fails to use the special timing rule as required for part or all of the amounts an employee defers under a NQDC plan. If an employer fails to pay FICA tax on amounts deferred as required under § 3121(v)(2), the employer is required to adjust its employment tax returns for any years for which the period of limitations has not expired to report and pay the additional FICA tax attributable to the amounts deferred and required to be included under the special timing rule. See § 6205 and § 31.6205-1(a) and (b) of the regulations with regard to making interest-free adjustments of underpayments. If the employer does so, the nonduplication rule will apply to the payment of the deferred compensation. However, the general timing rule will apply to any amounts deferred and income attributable to those amounts deferred for closed years that cannot be adjusted.
>
> Upon discovery that they have not correctly applied the special timing rule under § 3121(v) to pay FICA tax when required under the regulations, some employers have requested a closing

One might also consider whether FICA tax rates might increase in the future as Social Security and Medicare payments for the Baby Boomers increase.

Furthermore, the state in which the service provider worked may not subject the deferred compensation to tax except to the extent paid to the service provider while he or she is a resident of that state.[4197]

Because various tax-exempt entities have no incentive to accelerate income, the present value of the future payments is taxed when vested instead of when paid.[4198] Such an employer includes a State, political subdivision of a State, and any agency or instrumentality of a State or political subdivision of a State, and any other organization (other than a governmental unit) exempt from income tax.[4199] When the employee receives the deferred payments, the payments are exempt from FICA (as described above)[4200] but, to the extent of the interest component arising from the present value calculation, would be subject to income tax.[4201] If deferring payments is important to the employer, then the employer should consider paying up-front enough to pay for the employee's up-front taxes and deferring most or all of the rest. Note that the arrangement saves FICA relative to what otherwise might have been the parties' expectations,[4202] so they might want to consider that savings when negotiating the deferred compensation arrangement.

II.Q.1.e. Trying to Avoid Possible Ordinary Income on the Sale of a Partnership or S Corporation

My law partner Mariquita Barbieri contributed substantially to this part II.Q.1.e., which focuses on ordinary income that a sale of a business may generate when it involves an actual or deemed sale of the business' assets. As described below, ordinary income can be generated when the business uses the cash method or has Code § 1245 property. These issues also

agreement to permit them to pay FICA tax in a subsequent year that is prior to the year of payment in order to reduce the amount of total FICA taxes that would otherwise be due under the general timing rule if FICA tax was applied at the time of payment of the wages. The employer may also want to avoid application of the allocation rule in § 31.3121(v)(2)-1(d)(1)(ii)(B) that imposes FICA tax on a portion of each payment if the employer took some portion (but not all) of the NQDC into account for FICA tax under the special timing rule.

Because the applicable regulations provide the mechanism for the payment of FICA taxes in the case of NQDC which is not timely taken into account under the special timing rule in § 31.3121(v)(2)-1(a)(2), as a policy matter, a closing agreement should not be entered into if it that has the effect of avoiding application of this regulatory mechanism. The existence of the special transition rule in the regulations for years for which the period of limitations had expired at the time the regulations were finalized reinforces the importance of adhering to the rules contained in § 31.3121(v)(2)-1(d)(1)(ii) for determining the FICA tax due upon payment of amounts that were deferred in prior years and that should have been taken into account under § 3121(v)(2) in such prior years but for which the period of limitations has since expired.

inform the comparison between the often-overblown benefits of the exclusion of gain on the sale of Code § 1202 stock with the sale of an S corporation.[4203]

Many small businesses choose their initial accounting method to most benefit their owners, in light of the business industry. For many small businesses, the cash receipts and disbursements method of accounting (the "cash method") is most beneficial, as the company – or, ultimately, the owner in a company taxed as a partnership or as an S corporation – recognizes gain or loss in the tax year in which the company actually or constructively received the item of income, whether in the form of cash, property or services, and take deductions for the tax in which expenditures are actually made.[4204] Constructive receipt occurs in the year in which the taxpayer has unfettered access to income.[4205] Reg. § 1.451-2(a), "General rule," begins with:[4206]

> Income although not actually reduced to a taxpayer's possession is constructively received by him in the taxable year during which it is credited to his account, set apart for him, or otherwise made available so that he may draw upon it at any time, or so that he could have drawn upon it during the taxable year if notice of intention to withdraw had been given. However, income is not constructively received if the taxpayer's control of its receipt is subject to substantial limitations or restrictions. Thus, if a corporation credits its employees with bonus stock, but the stock is not available to such employees until some future date, the mere crediting on the books of the corporation does not constitute receipt.

The cash method gives taxpayers more control over the timing of income recognition and the deductibility of expenses than under the accrual method of accounting, which is a key reason many small businesses strive to use the cash method.

The accrual method is another common accounting method. Generally, the accrual method taxpayer recognizes income in the tax year when all events have occurred that establish the legal right to receive income and the amount of such income is able to be determined with reasonable accuracy. Reg. § 1.451-1(a) includes:[4207]

[4203] See text accompanying fns 5177-5178 in part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation.

[4204] For limits on a C corporation using the cash method, see fns 4023-4026 in part II.P.3.d Conversion from S Corporation to C Corporation.

[4205] For the Tax Court's reluctance to invoke constructive receipt except when clearly justifiable, see text accompanying fn 4731 in part II.Q.6.e Assignment of Income on Property Being Sold. For a beneficiary's inability to avoid taxation on mandatory distributions, see fn 2475 in part II.J.1 Trust's Income Less Deductions and Exemptions Is Split Between Trust and Beneficiaries; also, a trustee may effectuate a distribution by "crediting" the beneficiary (giving the beneficiary the equivalent of constructive receipt), as described in the text before and after fn 2612 in part II.J.4.f Making Trust a Partial Grantor Trust as to a Beneficiary. Letter Ruling 9413023 analyzed the timing of the employees recognizing income under the constructive receipt rule and is reproduced in part in the text accompanying fn 282 in part II.A.2.i.iv Providing Equity-Type Incentives without Violating the Single Class of Stock Rules.

[4206] The rest of subsection (a) discusses interest, dividends, or other earnings (whether or not credited) payable in respect of any deposit or account in a bank or similar institution. Subsection (b) provides some examples relating to dividends or interest.

[4207] Within Reg. § 1.451-1, subsections (b) and (c) provide:

> (b) *Timing of income inclusion for accrual method taxpayers with an applicable financial statement*. For the timing of income inclusion for taxpayers that have an applicable financial statement, as

> Under an accrual method of accounting, income is includible in gross income when all the events have occurred which fix the right to receive such income and the amount thereof can be determined with reasonable accuracy (all events test). Therefore, under such a method of accounting if, in the case of compensation for services, no determination can be made as to the right to such compensation or the amount thereof until the services are completed, the amount of compensation is ordinarily income for the taxable year in which the determination can be made.

In the same way, an expense is incurred and is, generally, deductible in the tax year in which all events occurred that establish the liability, the amount of the liability is able to be determined with reasonable accuracy, and economic performance has occurred with respect to the liability. Reg. § 1.461-1(a)(2), "Taxpayer using an accrual method," provides:

> (i) *In general*. Under an accrual method of accounting, a liability (as defined in § 1.446-1(c)(1)(ii)(B)) is incurred, and generally is taken into account for Federal income tax purposes, in the taxable year in which all the events have occurred that establish the fact of the liability, the amount of the liability can be determined with reasonable accuracy, and economic performance has occurred with respect to the liability. (See paragraph (a)(2)(iii)(A) of this section for examples of liabilities that may not be taken into account until a taxable year subsequent to the taxable year incurred, and see §§ 1.461-4 through 1.461-6 for rules relating to economic performance.) Applicable provisions of the Code, the Income Tax Regulations, and other guidance published by the Secretary prescribe the manner in which a liability that has been incurred is taken into account. For example, section 162 provides that the deductible liability generally is taken into account in the taxable year incurred through a deduction from gross income. As a further example, under section 263 or 263A, a liability that relates to the creation of an asset having a useful life extending substantially beyond the close of the taxable year is taken into account in the taxable year incurred through capitalization (within the meaning of § 1.263A-1(c)(3)), and may later affect the computation of taxable income through depreciation or otherwise over a period including subsequent taxable years, in accordance with applicable Internal Revenue Code sections and guidance published by the Secretary. The principles of this paragraph (a)(2) also apply in the calculation of earnings and profits and accumulated earnings and profits.
>
> (ii) *Uncertainty as to the amount of a liability*. While no liability shall be taken into account before economic performance and all of the events that fix the liability have occurred, the fact that the exact amount of the liability cannot be determined does not prevent a taxpayer from taking into account that portion of the amount of the liability which can be computed with reasonable accuracy within the taxable year. For example, A renders services to B during the taxable year for which A charges $10,000. B admits a liability to A for $6,000 but contests the remainder. B may take into account only $6,000 as an expense for the taxable year in which the services were rendered.

---

defined in § 1.451-3(b)(1), and that use an accrual method of accounting, see section 451(b) and § 1.451-3.

(c) *Special rule for timing of income inclusion from advance payments*. For the timing of income inclusion for taxpayers that receive advance payments, as defined in § 1.451-8(a)(1), and that use an accrual method of accounting, see section 451(c) and § 1.451-8.

(iii) *Alternative timing rules*.

(A) If any provision of the Code requires a liability to be taken into account in a taxable year later than the taxable year provided in paragraph (a)(2)(i) of this section, the liability is taken into account as prescribed in that Code provision. See, for example, section 267 (transactions between related parties) and section 464 (farming syndicates).

(B) If the liability of a taxpayer is subject to section 170 (charitable contributions), section 192 (black lung benefit trusts), section 194A (employer liability trusts), section 468 (mining and solid waste disposal reclamation and closing costs), or section 468A (certain nuclear decommissioning costs), the liability is taken into account as determined under that section and not under section 461 or the regulations thereunder. For special rules relating to certain loss deductions, see sections 165(e), 165(i), and 165(l), relating to theft losses, disaster losses, and losses from certain deposits in qualified financial institutions.

(C) Section 461 and the regulations thereunder do not apply to any amount allowable under a provision of the Code as a deduction for a reserve for estimated expenses.

(D) Except as otherwise provided in any Internal Revenue regulations, revenue procedure, or revenue ruling, the economic performance requirement of section 461(h) and the regulations thereunder is satisfied to the extent that any amount is otherwise deductible under section 404 (employer contributions to a plan of deferred compensation), section 404A (certain foreign deferred compensation plans), or section 419 (welfare benefit funds). See § 1.461-4(d)(2)(iii).

(E) Except as otherwise provided by regulations or other published guidance issued by the Commissioner (See §601.601(b)(2) of this chapter), in the case of a liability arising out of the use of property pursuant to a section 467 rental agreement, the all events test (including economic performance) is considered met in the taxable year in which the liability is to be taken into account under section 467 and the regulations thereunder.

A taxpayer can also adopt a hybrid method of accounting – using a combination of the accrual and cash methods – if the method clearly reflects income and is consistently used.[4208] For

---

[4208] Reg. § 1.446-1(c)(1)(iv), "Combinations of the foregoing methods," provides:

(a) In accordance with the following rules, any combination of the foregoing methods of accounting will be permitted in connection with a trade or business if such combination clearly reflects income and is consistently used. Where a combination of methods of accounting includes any special methods, such as those referred to in subdivision (iii) of this subparagraph, the taxpayer must comply with the requirements relating to such special methods. A taxpayer using an accrual method of accounting with respect to purchases and sales may use the cash method in computing all other items of income and expense. However, a taxpayer who uses the cash method of accounting in computing gross income from his trade or business shall use the cash method in computing expenses of such trade or business. Similarly, a taxpayer who uses an accrual method of accounting in computing business expenses shall use an accrual method in computing items affecting gross income from his trade or business.

business that maintain inventories, the accrual method of accounting is typically required.[4209] The IRS can also mandate the accrual method if it more accurately reflects the income of the business than does the cash method of accounting.[4210]

Code § 448 allows a taxpayer, including without limitation a C corporation or a partnership which has a C corporation as a partner, but not including a tax shelter, to use the cash method if and to the extent it engages in a farming business, is a qualified personal service corporation, or has average annual gross receipts for the 3-taxable-year period (ending with the taxable year which precedes such taxable year) that do not exceed $25 million, which is indexed for inflation.

As a business grows, it can still establish that the business is appropriately using the cash method of accounting, but the goal to maintain the use of the cash method can backfire for a company when it comes time to sell the business. Today, many private equity and venture capital acquirers also require a selling corporation to modify its tax structure to that of a partnership (through a tax-free reorganization) so that the buyer receives additional tax benefits from the acquisition of the seller's assets. When a cash basis taxpayer that is a corporation changes into a tax basis taxpayer that is a partnership or S corporation, the backfire of being a cash basis taxpayer occurs.

When a business is sold, for tax purposes, it is selling a collection of assets. Some of these are tangible (such as real estate, machinery, inventory) and some are intangible (such as goodwill, accounts receivable, a trade name). Unless the business is incorporated and it is selling the stock in a straightforward stock purchase and sale transaction (with no pre-closing reorganization and no deemed sale of the business' assets[4211]), the purchase price must be allocated among the assets that are being transferred. The IRS requires the buyer and seller to use the same allocation,[4212] so the allocation will have to be negotiated and put in writing as part of the purchase and sale agreement.

If the selling business is a C corporation or an S corporation, the gain on the sale of the stock of the company will – almost entirely if not entirely – be taxed at capital gain tax rates, the lowest tax rates. Thus, sellers of a C corporation and of an S corporation want the transaction to be a straightforward stock sale. But, often, buyers do not want to purchase the stock, both for tax and liability reasons. If the selling business is a partnership, the gain on the sale of the equity of a partnership is taxed at capital gains rates, but also subject to taxation at ordinary income tax

---

(b) A taxpayer using one method of accounting in computing items of income and deductions of his trade or business may compute other items of income and deductions not connected with his trade or business under a different method of accounting.

[4209] Reg. § 1.446-1(c)(2)(i).

[4210] Reg. § 1.446-1(a)(2) provides:

It is recognized that no uniform method of accounting can be prescribed for all taxpayers. Each taxpayer shall adopt such forms and systems as are, in his judgment, best suited to his needs. However, no method of accounting is acceptable unless, in the opinion of the Commissioner, it clearly reflects income. A method of accounting which reflects the consistent application of generally accepted accounting principles in a particular trade or business in accordance with accepted conditions or practices in that trade or business will ordinarily be regarded as clearly reflecting income, provided all items of gross income and expense are treated consistently from year to year.

[4211] See part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

[4212] Code § 1060.

rates on depreciated equipment and, if the seller is a cash basis taxpayer, accounts receivable.[4213]

If the transaction is structured as an asset purchase and sale transaction, selling the collection of assets of the company and not the underlying equity of the company, for a seller that is a C corporation (with no pre-closing reorganization), the C corporation asset seller will pay tax on any gains on the sale inside the company at corporate tax rates, then again when the company liquidates and net gain is paid to the company's shareholders, resulting in double taxation.[4214] If the selling business is an S corporation selling its assets, then the transaction to the S corporation seller is taxed in part at ordinary income tax rates and in part at capital gains tax rates, based on an allocation of the purchase price among the assets, which is impacted further by the S corporation being a cash basis taxpayer.[4215] Note:

- Usually, equipment is fully depreciated for tax purposes[4216] so a purchase price allocation to equipment generates ordinary income.[4217]

- Rather than allocating purchase price to equipment's value, the parties might allocate purchase price to equipment's basis. This gives the buyer less basis but also prevents arguing over who should bear the burden of the seller's ordinary income recognition.

For an example of a statement seeking to minimize taxation as ordinary income, see the chart in part II.Q.1.f Code § 1060 Allocation Rule When Selling Business.

The key consequences to a seller company that is a cash method taxpayer are as follows:

- Accounts receivable are taxed at ordinary income rates for cash basis taxpayers. An accrual basis taxpayer does not pay taxes on the portion of the purchase price related to the company's accounts receivable that have already been recognized as income. Accumulated depreciation on equipment is normally taxed at ordinary income tax rates.

- If the buyer requests a tax-free reorganization mechanism be used prior to closing to change the tax structure of the selling company, usually by use of an "F" reorganization,[4218] the selling shareholders wind up holding a parent company with the same tax attributes as the original corporation, with the parent company then owning a limited liability company,

---

4213 See part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest.

4214 If one considers the buyer paying tax on the income used pay down a loan used to by the business, often triple taxation is really occurring. See part II.Q.1 General Principles When Selling Ownership of a Business, especially part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis, which is illustrated in flowcharts in parts II.Q.1.a.i.(a) C Corporation Triple Taxation and II.Q.1.a.ii.(a) C Corporation Triple Taxation (California).

4215 If one considers the buyer paying tax on the income used pay down a loan used to by the business, often double taxation is really occurring. See part II.Q.1 General Principles When Selling Ownership of a Business, especially part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis, which is illustrated in flowcharts in parts II.Q.1.a.i.(d) S Corporation Double Taxation and II.Q.1.a.ii.(d) S Corporation Double Taxation (California).

4216 For an immediate expensing of part or all of the purchase price, see part II.G.5 Code § 179 Expensing Substitute for Depreciation; Bonus Depreciation.

4217 See part II.G.6.b Code § 1245 Property.

4218 See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

which is a disregarded entity for tax purposes.[4219] Selling the disregarded entity LLC is treated the same as a straight sale of assets by the corporation, such that the gain will be in part ordinary and in part capital based on the purchase price allocation. The F reorganization does not change the seller's method of accounting, so the issues regarding accounts receivable remain for a taxpayer using the cash method.

Options for the selling company to avoid the negative impact of being a cash basis taxpayer at the time of sale are to (i) consider changing to an accrual method taxpayer as it prepares to enter the market to sell its business; (ii) use a "drop down" limited liability structure; (iii) make the payment of the portion of the purchase price be contingent on the selling company's collection of accounts receivable.

The seller can make a Code § 481 election to change its method of accounting; however, the seller might pay taxes because of making the Code § 481 election to account for income not yet actually received but included in income because the legal right to receive the income is established and the amount of such income is able to be determined with reasonable accuracy. The potential tax impact incurred for changing the method of accounting, however, should be calculated against the impact of keeping the seller's cash method and proceeding with the F reorganization as a cash basis taxpayer. The ordinary income taxes paid as a cash basis taxpayer might be less than, or equal to, the taxes owed if the seller makes the Code § 481 election. The seller might also negotiate with the buyer to have the buyer gross up the purchase price to account for the ordinary income tax amount paid by the seller, covering the difference between the capital gains tax amount the seller would have paid in a traditional stock transaction and the amount paid at ordinary income rates resulting from the F reorganization. However, be wary that a buyer will remind the cash basis seller that the seller benefitted from being a cash basis taxpayer for years before the cash basis method "caught up with it" at the time of sale. Changing methods of accounting might also take time and requires excellent bookkeeping and accounting records to recharacterize income if needed to establish the new accounting method.

The parties to a purchase and sale transaction can also determine if the use of a "drop down" limited liability company structure would be beneficial. If possible, the seller could form a subsidiary company, taxed as a partnership for tax purposes, contributing the buyer-desired assets into the new subsidiary, likely carving out depreciated equipment and accounts receivable, with the buyer purchasing the new subsidiary's equity or the buyer contributing cash in exchange for the new subsidiary's equity. It is still possible for the seller to pay taxes at both capital gains rates and ordinary income rates, depending on the other assets subject to the transaction.

The parties could also consider adding a contingency to the purchase price to defer a portion of proceeds and tax payments until the contingency of collection of accounts receivable occurs; however, this is a partial potential solution, as it does not change the ordinary income treatment of depreciated equipment for the partnership or S corporation cash basis taxpayer.

[4219] See part II.E.7.c.i.(b) Use F Reorganization to Form LLC (which is within part II.E.7 Migrating into Partnership Structure). For an S corporation, see also part II.A.2.g Qualified Subchapter S Subsidiary (QSub), especially fn. 193. For long-term planning preceding a sale, see part II.Q.7.h.viii Value Freeze as Conservative Alternative, in case seller-financing is used (buyout by management or next generation of owners), to take advantage of part II.Q.1.a.i.(e) Partnership Single Taxation of Goodwill, which contrasts with double or triple taxation in S or C corporation scenarios; see generally part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis and its various subparts.

Overall, the impact of being a cash basis taxpayer for a selling S corporation or partnership are often discovered "too late" as the parties are on the precipice of a transaction, making any option to mitigate or change the impact of being a cash basis taxpayer no longer viable. Even if a potential solution might be timed prior to a selling business going out for bid, the seller must calculate the tax impact if it elects to change its accounting method prior to sale, and that amount might not be one that the seller can justify before it knows the purchase price and requirements of the buyer to achieve the closing of the transaction. Knowing the impact of being a cash basis taxpayer by the seller is, at least, good awareness to have to avoid the surprise of unexpected tax treatment at ordinary income tax rates for certain assets at the time of sale, if the seller, mistakenly, believed that the entire purchase price proceeds would be taxed at capital gains rates.

II.Q.1.f. Code § 1060 Allocation Rule When Selling Business

Code § 1060, "Special allocation rules for certain asset acquisitions," starts with subsection (a), "General rule," which provides:

> In the case of any applicable asset acquisition, for purposes of determining both -
>
> (1) the transferee's basis in such assets, and
>
> (2) the gain or loss of the transferor with respect to such acquisition,
>
> the consideration received for such assets shall be allocated among such assets acquired in such acquisition in the same manner as amounts are allocated to assets under section 338(b)(5). If in connection with an applicable asset acquisition, the transferee and transferor agree in writing as to the allocation of any consideration, or as to the fair market value of any of the assets, such agreement shall be binding on both the transferee and transferor unless the Secretary determines that such allocation (or fair market value) is not appropriate.

Code § 1060(c), "Applicable asset acquisition," provides:

> For purposes of this section, the term "applicable asset acquisition" means any transfer (whether directly or indirectly) -
>
> (1) of assets which constitute a trade or business, and
>
> (2) with respect to which the transferee's basis in such assets is determined wholly by reference to the consideration paid for such assets.
>
> A transfer shall not be treated as failing to be an applicable asset acquisition merely because section 1031 applies to a portion of the assets transferred.

Reg. § 1.1060-1(b), "Applicable asset acquisition," elaborates:

> (1) *In general*. An applicable asset acquisition is any transfer, whether direct or indirect, of a group of assets if the assets transferred constitute a trade or business in the hands of either the seller or the purchaser and, except as provided in paragraph (b)(8) of this section, the purchaser's basis in the transferred assets is determined wholly by reference to the purchaser's consideration.

(2) *Assets constituting a trade or business*.

(i) *In general*. For purposes of this section, a group of assets constitutes a trade or business if -

(A) The use of such assets would constitute an active trade or business under section 355; or[4220]

(B) Its character is such that goodwill or going concern value could under any circumstances attach to such group.

(ii) *Goodwill or going concern value*. Goodwill is the value of a trade or business attributable to the expectancy of continued customer patronage. This expectancy may be due to the name or reputation of a trade or business or any other factor. Going concern value is the additional value that attaches to property because of its existence as an integral part of an ongoing business activity. Going concern value includes the value attributable to the ability of a trade or business (or a part of a trade or business) to continue functioning or generating income without interruption notwithstanding a change in ownership. It also includes the value that is attributable to the immediate use or availability of an acquired trade or business, such as, for example, the use of the revenues or net earnings that otherwise would not be received during any period if the acquired trade or business were not available or operational.

(iii) *Factors indicating goodwill or going concern value*. In making the determination in this paragraph (b)(2), all the facts and circumstances surrounding the transaction are taken into account. Whether sufficient consideration is available to allocate to goodwill or going concern value after the residual method is applied is not relevant in determining whether goodwill or going concern value could attach to a group of assets. Factors to be considered include -

(A) The presence of any intangible assets (whether or not those assets are section 197 intangibles), provided, however, that the transfer of such an asset in the absence of other assets will not be a trade or business for purposes of section 1060;

(B) The existence of an excess of the total consideration over the aggregate book value of the tangible and intangible assets purchased (other than goodwill and going concern value) as shown in the financial accounting books and records of the purchaser; and

(C) Related transactions, including lease agreements, licenses, or other similar agreements between the purchaser and seller (or managers, directors, owners, or employees of the seller) in connection with the transfer.

(3) *Examples*. The following examples illustrate paragraphs (b)(1) and (2) of this section:

Example (1). S is a high grade machine shop that manufactures microwave connectors in limited quantities. It is a successful company with a reputation within the industry

[4220] [my footnote]: See part II.Q.7.f.iii Active Business Requirement for Code § 355.

and among its customers for manufacturing unique, high quality products. Its tangible assets consist primarily of ordinary machinery for working metal and plating. It has no secret formulas or patented drawings of value. P is a company that designs, manufactures, and markets electronic components. It wants to establish an immediate presence in the microwave industry, an area in which it previously has not been engaged. P is acquiring assets of a number of smaller companies and hopes that these assets will collectively allow it to offer a broad product mix. P acquires the assets of S in order to augment its product mix and to promote its presence in the microwave industry. P will not use the assets acquired from S to manufacture microwave connectors. The assets transferred are assets that constitute a trade or business in the hands of the seller. Thus, P's purchase of S's assets is an applicable asset acquisition. The fact that P will not use the assets acquired from S to continue the business of S does not affect this conclusion.

Example (2). S, a sole proprietor who operates a car wash, both leases the building housing the car wash and sells all of the car wash equipment to P. S's use of the building and the car wash equipment constitute a trade or business. P begins operating a car wash in the building it leases from S. Because the assets transferred together with the asset leased are assets which constitute a trade or business, P's purchase of S's assets is an applicable asset acquisition.

Example (3). S, a corporation, owns a retail store business in State X and conducts activities in connection with that business enterprise that meet the active trade or business requirement of section 355. P is a minority shareholder of S. S distributes to P all the assets of S used in S's retail business in State X in complete redemption of P's stock in S held by P. The distribution of S's assets in redemption of P's stock is treated as a sale or exchange under sections 302(a) and 302(b)(3), and P's basis in the assets distributed to it is determined wholly by reference to the consideration paid, the S stock. Thus, S's distribution of assets constituting a trade or business to P is an applicable asset acquisition.

Example (4). S is a manufacturing company with an internal financial bookkeeping department. P is in the business of providing a financial bookkeeping service on a contract basis. As part of an agreement for P to begin providing financial bookkeeping services to S, P agrees to buy all of the assets associated with S's internal bookkeeping operations and provide employment to any of S's bookkeeping department employees who choose to accept a position with P. In addition to selling P the assets associated with its bookkeeping operation, S will enter into a long term contract with P for bookkeeping services. Because assets transferred from S to P, along with the related contract for bookkeeping services, are a trade or business in the hands of P, the sale of the bookkeeping assets from S to P is an applicable asset acquisition.

(4) *Asymmetrical transfers of assets*. A purchaser is subject to section 1060 if -

(i) Under general principles of tax law, the seller is not treated as transferring the same assets as the purchaser is treated as acquiring;

(ii) The assets acquired by the purchaser constitute a trade or business; and

(iii) Except as provided in paragraph (b)(8) of this section, the purchaser's basis in the transferred assets is determined wholly by reference to the purchaser's consideration.

(5) *Related transactions*. Whether the assets transferred constitute a trade or business is determined by aggregating all transfers from the seller to the purchaser in a series of related transactions. Except as provided in paragraph (b)(8) of this section, all assets transferred from the seller to the purchaser in a series of related transactions are included in the group of assets among which the consideration paid or received in such series is allocated under the residual method. The principles of § 1.338-1(c) are also applied in determining which assets are included in the group of assets among which the consideration paid or received is allocated under the residual method.

(6) *More than a single trade or business*. If the assets transferred from a seller to a purchaser include more than one trade or business, then, in applying this section, all of the assets transferred (whether or not transferred in one transaction or a series of related transactions and whether or not part of a trade or business) are treated as a single trade or business.

(7) *Covenant entered into by the seller*. If, in connection with an applicable asset acquisition, the seller enters into a covenant (e.g., a covenant not to compete) with the purchaser, that covenant is treated as an asset transferred as part of a trade or business.

(8) *Partial non-recognition exchanges*. A transfer may constitute an applicable asset acquisition notwithstanding the fact that no gain or loss is recognized with respect to a portion of the group of assets transferred. All of the assets transferred, including the non-recognition assets, are taken into account in determining whether the group of assets constitutes a trade or business. The allocation of consideration under paragraph (c) of this section is done without taking into account either the non-recognition assets or the amount of money or other property that is treated as transferred in exchange for the non-recognition assets (together, the non-recognition exchange property). The basis in and gain or loss recognized with respect to the non-recognition exchange property are determined under such rules as would otherwise apply to an exchange of such property. The amount of the money and other property treated as exchanged for non-recognition assets is the amount by which the fair market value of the non-recognition assets transferred by one party exceeds the fair market value of the non-recognition assets transferred by the other (to the extent of the money and the fair market value of property transferred in the exchange). The money and other property that are treated as transferred in exchange for the non-recognition assets (and which are not included among the assets to which section 1060 applies) are considered to come from the following assets in the following order: first from Class I assets, then from Class II assets, then from Class III assets, then from Class IV assets, then from Class V assets, then from Class VI assets, and then from Class VII assets. For this purpose, liabilities assumed (or to which a non-recognition exchange property is subject) are treated as Class I assets. See Example 1 in paragraph (d) of this section for an example of the application of section 1060 to a single transaction which is, in part, a non-recognition exchange.

(9) *Insurance business*. The mere reinsurance of insurance contracts by an insurance company is not an applicable asset acquisition, even if it enables the reinsurer to establish a customer relationship with the owners of the reinsured contracts. However, a transfer of an insurance business is an applicable asset acquisition if the purchaser acquires significant business assets, in addition to insurance contracts, to which goodwill and going concern value could attach. For rules regarding the treatment of an applicable asset acquisition of an insurance business, see paragraph (c)(5) of this section.

Code § 1060(d), "Treatment of certain partnership transactions," provides:

In the case of a distribution of partnership property or a transfer of an interest in a partnership -

(1) the rules of subsection (a) shall apply but only for purposes of determining the value of section 197 intangibles for purposes of applying section 755, and

(2) if section 755 applies, such distribution or transfer (as the case may be) shall be treated as an applicable asset acquisition for purposes of subsection (b).

See part II.Q.1.g.ii Code § 755 Allocation to Inside Basis under Code § 743(b).

Reg. § 1.1060-1(c), "Allocation of consideration among assets under the residual method," provides:

(1) *Consideration*. The seller's consideration is the amount, in the aggregate, realized from selling the assets in the applicable asset acquisition under section 1001(b). The purchaser's consideration is the amount, in the aggregate, of its cost of purchasing the assets in the applicable asset acquisition that is properly taken into account in basis.

(2) *Allocation of consideration among assets*. For purposes of determining the seller's amount realized for each of the assets sold in an applicable asset acquisition, the seller allocates consideration to all the assets sold by using the residual method under §§ 1.338-6 and 1.338-7, substituting consideration for ADSP. For purposes of determining the purchaser's basis in each of the assets purchased in an applicable asset acquisition, the purchaser allocates consideration to all the assets purchased by using the residual method under §§ 1.338-6 and 1.338-7, substituting consideration for AGUB. In allocating consideration, the rules set forth in paragraphs (c)(3) and (4) of this section apply in addition to the rules in §§ 1.338-6 and 1.338-7.

(3) *Certain costs*. The seller and purchaser each adjusts the amount allocated to an individual asset to take into account the specific identifiable costs incurred in transferring that asset in connection with the applicable asset acquisition (*e.g.*, real estate transfer costs or security interest perfection costs). Costs so allocated increase, or decrease, as appropriate, the total consideration that is allocated under the residual method. No adjustment is made to the amount allocated to an individual asset for general costs associated with the applicable asset acquisition as a whole or with groups of assets included therein (e.g., non-specific appraisal fees or accounting fees). These latter amounts are taken into account only indirectly through

their effect on the total consideration to be allocated. If an election described in § 1.338-6(c)(5) is made with respect to an applicable asset acquisition, any allocation of costs pursuant to this paragraph (c)(3) shall be made as if such election had not been made. The preceding sentence applies to applicable asset acquisitions occurring on or after September 11, 2007. For applicable asset acquisitions occurring before September 11, 2007, and on or after September 15, 2004, see § 1.1060-1T as contained in 26 CFR Part 1 in effect on April 1, 2007. For applicable asset acquisitions occurring before September 15, 2004, see §§ 1.338-6 and 1.1060-1 as contained in 26 CFR Part 1 in effect on April 1, 2004.

(4) *Effect of agreement between parties*. If, in connection with an applicable asset acquisition, the seller and purchaser agree in writing as to the allocation of any amount of consideration to, or as to the fair market value of, any of the assets, such agreement is binding on them to the extent provided in this paragraph (c)(4). Nothing in this paragraph (c)(4) restricts the Commissioner's authority to challenge the allocations or values arrived at in an allocation agreement. This paragraph (c)(4) does not apply if the parties are able to refute the allocation or valuation under the standards set forth in *Commissioner v. Danielson*, 378 F.2d 771 (3d Cir.), *cert. denied*, 389 U.S. 858 (1967) (a party wishing to challenge the tax consequences of an agreement as construed by the Commissioner must offer proof that, in an action between the parties to the agreement, would be admissible to alter that construction or show its unenforceability because of mistake, undue influence, fraud, duress, etc.).

(5) *Insurance business*. If the trade or business transferred is an insurance business, the rules of this paragraph (c) are modified by the principles of § 1.338-11(a) through (d). However, in transactions governed by section 1060, such principles apply even if the transfer of the trade or business is effected in whole or in part through indemnity reinsurance rather than assumption reinsurance, and, for the insurer or reinsurer, an insurance contract (including an annuity or reinsurance contract) is a Class VI asset regardless of whether it is a section 197 intangible. In addition, the principles of § 1.338-11(f) through (h) apply if the transfer occurs in connection with the complete liquidation of the transferor.

Here is an example of a statement seeking to minimize taxation as ordinary income:

Asset Class	**Methodology for Determining Fair Market Value**
Cash and cash equivalents	Cash value.
Inventory, accounts receivable and other current assets	The amount assigned to such assets in the calculation of Working Capital; however, if any such asset is not subject to inclusion in the determination of Working Capital, then the net book value of such asset for financial accounting purposes as of immediately before the Closing.

Asset Class	Methodology for Determining Fair Market Value
Property, equipment, and other tangible and intangible assets (other than those assets that are set forth above or are Code Section 197 assets)	The tax basis of such assets as of immediately before the Closing.
Goodwill and going concern value and other Code Section 197 assets	The remainder of the Merger Consideration and any other relevant items in excess of the amount allocated to the assets set forth above; however, no amount will be allocated to any covenant not to compete or any similar covenant.

II.Q.1.g. Partnership Basis Adjustments

This part II.Q.1.g effectuates the basis adjustments triggered as described in part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

II.Q.1.g.i. Effect of Basis Adjustments

The basis of a partnership interest acquired from a decedent is the fair market value of the interest at the date of death, increased by the estate's share of partnership liabilities, and reduced to the extent that such value is attributable to IRD.[4221] Thus, the basis increase has two effects:

- Restoring Basis Arising from Liabilities. To the extent a partner assumes a liability, that partner is deemed to have contributed cash equal to the liabilities that person is allocated. To the extent a partner's allocable share of liabilities is reduced, that person is deemed to have received a cash distribution, reducing basis or triggering gain if and to the extent basis is insufficient to absorb the distribution. During life, distributions or losses might have reduced or eliminated basis generated by the assumption of liabilities. By passing through a decedent's estate, a partnership interest's basis due to allocated liabilities is fully restored.

- Basis Adjustment Due to Value. The partnership interest's value, which includes appropriate reductions for the balance sheet effect of liabilities and appropriate increases or decreases for control or lack thereof, reductions for lack of marketability, and any other features, is added to the amount of allocable liabilities.

[4221] Reg. § 1.742-1. For more details on Reg. § 1.742-1, see fn 5682 in part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).

In implementing the Code § 743(b) adjustments:[4222]

> No adjustment is made to the common basis of partnership property. Thus, for purposes of calculating income, deduction, gain, and loss, the transferee will have a special basis for those partnership properties the bases of which are adjusted under section 743(b) and this section. The adjustment to the basis of partnership property under section 743(b) has no effect on the partnership's computation of any item under section 703.

In other words, the partnership keeps two or more separate sets of books for transferee partner: one that applies to all partners based on the partnership's transactions and is reflected in their capital accounts, and one or more than applies to each partner separately based on that partner's events that affect outside basis (that do not involve transfers of the partnership's assets) and is reflected in the partnership's basis records specially allocated to the applicable partners. (However, if the Code § 743(b) basis adjustment remains when the partnership interest is liquidated, instead of being wasted it may cause an inside basis adjustment and perhaps even a capital account adjustment.)[4223] When a partnership interest is transferred, the transferor's capital account attributable to the transferred interest (which might be part or all of the transferor's capital account, depending on what portion is transferred) shifts to the transferee.[4224]

The amount of any positive basis adjustment that is recovered by the transferee in any year is added to the transferee's distributive share of the partnership's depreciation or amortization deductions for the year, which deductions also reduce the basis adjustment.[4225] Reg. § 1.743-1(j)(4)(i)(B), "Recovery period," provides:[4226]

[4222] Reg. § 1.743-1(j)(1). Reg. § 1.743-1(j)(2) provides more details:

> *Computation of partner's distributive share of partnership items*. The partnership first computes its items of income, deduction, gain, or loss at the partnership level under section 703. The partnership then allocates the partnership items among the partners, including the transferee, in accordance with section 704, and adjusts the partners' capital accounts accordingly. The partnership then adjusts the transferee's distributive share of the items of partnership income, deduction, gain, or loss, in accordance with paragraphs (j)(3) and (4) of this section, to reflect the effects of the transferee's basis adjustment under section 743(b). These adjustments to the transferee's distributive shares must be reflected on Schedules K and K-1 of the partnership's return (Form 1065). These adjustments to the transferee's distributive shares do not affect the transferee's capital account. [additional references re: accounting for long-term contracts]

CCA 201726012 (under the signature of David R. Haglund) stated:

> Adjustments to the adjusted tax basis of partnership property under § 743 are not reflected in the capital account of the transferee partner or on the books of the partnership. § 1.704-1(b)(2)(iv)(m)(2). No adjustment is made to the common basis of partnership property, and the § 743(b) adjustment has no effect on the partnership's computation of any item under § 703. § 1.743-1(j)(1). Section 743(b) adjustments are personal to the transferee partners and are not subject to reallocation under § 704(b).

Reg. 1.704-1(b)(2)(iv)(m)(2), which includes exceptions to the proposition for which it is quoted above, is reproduced in fn 519 in part II.C.7 Maintaining Capital Accounts.

[4223] See fns 515-519 in part II.C.7 Maintaining Capital Accounts.

[4224] Reg. § 1.704-1(b)(2)(iv)(*l*). See also Reg. § 1.704-1(b)(5), Ex. (13).

[4225] Reg. § 1.743-1(j)(4)(i)(A).

[4226] Reg. § 1.743-1(*l*), "Effective/applicability date," includes:

(1) *In general*. Except as provided in paragraph (j)(4)(i)(B)(2) of this section, for purposes of section 168, if the basis of a partnership's recovery property is increased as a result of the transfer of a partnership interest, then the increased portion of the basis is taken into account as if it were newly-purchased recovery property placed in service when the transfer occurs. Consequently, any applicable recovery period and method may be used to determine the recovery allowance with respect to the increased portion of the basis. However, no change is made for purposes of determining the recovery allowance under section 168 for the portion of the basis for which there is no increase. The partnership is allowed to deduct the additional first year depreciation under section 168(k) and § 1.168(k)-2 for an increase in the basis of qualified property, as defined in section 168(k) and § 1.168(k)-2, under section 743(b) in a class of property, as defined in § 1.168(k)-2(f)(1)(ii)(A) through (F), even if the partnership made the election under section 168(k)(7) and § 1.168(k)-2(f)(1) not to deduct the additional first year depreciation for all other qualified property of the partnership in the same class of property, as defined in § 1.168(k)-2(f)(1)(ii)(A) through (F), and placed in service in the same taxable year, provided the section 743(b) basis adjustment meets all requirements of section 168(k) and § 1.168(k)-2. Further, the partnership may make an election under section 168(k)(7) and § 1.168(k)-2(f)(1) not to deduct the additional first year depreciation for an increase in the basis of qualified property, as defined in section 168(k) and § 1.168(k)-2, under section 743(b) in a class of property, as defined in § 1.168(k)-2(f)(1)(ii)(A) through (F), and placed in service in the same taxable year, even if the partnership does not make that election for all other qualified property of the partnership in the same class of property, as defined in § 1.168(k)-2(f)(1)(ii)(A) through (F), and placed in service in the same taxable year. In this case, the section 743(b) basis adjustment must be recovered under a reasonable method.

Special rules apply if the partnership uses the remedial allocation method.[4227] Bonus depreciation does not apply to adjustments due to the remedial allocation method,[4228] does

The last three sentences of paragraph (j)(4)(i)(B)(1) of this section, and the last sentence of paragraph (j)(4)(i)(B)(2) of this section, apply to transfers of partnership interests that occur on or after September 24, 2019. However, a partnership may choose to apply the last three sentences in paragraph (j)(4)(i)(B)(1) of this section, and the last sentence of paragraph (j)(4)(i)(B)(2) of this section, for transfers of partnership interests that occur on or after September 28, 2017. A partnership may rely on the last three sentences in paragraph (j)(4)(i)(B)(1) of this section in regulation project REG-104397-18 (2018-41 I.R.B. 558) (see § 601.601(d)(2)(ii)(b) of this chapter) for transfers of partnership interests that occur on or after September 28, 2017, and ending before September 24, 2019.

[4227] Reg. § 1.743-1(j)(4)(i)(B)(2) provides:

Remedial allocation method. If a partnership elects to use the remedial allocation method described in § 1.704-3(d) with respect to an item of the partnership's recovery property, then the portion of any increase in the basis of the item of the partnership's recovery property under section 743(b) that is attributable to section 704(c) built-in gain is recovered over the remaining recovery period for the partnership's excess book basis in the property as determined in the final sentence of § 1.704-3(d)(2). Any remaining portion of the basis increase is recovered under paragraph (j)(4)(i)(B)(1) of this section. The first sentence of this paragraph (j)(4)(i)(B)(2) does not apply to a partnership that is not a publicly traded partnership within the meaning of section 7704(b) with respect to any basis increase under section 743(b) that is recovered using the additional first year depreciation deduction under section 168(k).

See fn 4226 re effective date.

[4228] See text accompanying fn 1471 in part II.G.5.b Bonus Depreciation.

apply in most cases when a new partner buys into a partnership,[4229] and does not apply when a partnership interest is transferred by reason of death.[4230]

Reg. § 1.1245-1(e)(3) recaptures depreciation/amortization on the disposition of the property to which the Code § 743(b) adjustment applies:

(i) If (a) a partner had a special basis adjustment under section 743(b) in respect of section 1245 property, or (b) on the date he acquired his partnership interest by way of a sale or exchange (or upon death of another partner) the partnership owned section 1245 property and an election under section 754 (relating to optional adjustment to basis of partnership property) was in effect with respect to the partnership, then the amount of gain recognized under section 1245(a)(1) by him upon a disposition by the partnership of such property shall be determined under this subparagraph.

(ii) There shall be allocated to such partner, in the same proportion as the partnership's total gain is allocated to him as his distributive share under section 704, a portion of (a) the common partnership adjusted basis for the property, and (b) the amount realized by the partnership upon the disposition, or, if nothing is realized, the fair market value of the property. There shall also be allocated to him, in the same proportion as the partnership's gain recognized under section 1245(a)(1) is allocated under subparagraph (2) of this paragraph as his distributive share of such gain, a portion of "the adjustments reflected in the adjusted basis" (as defined in paragraph (a)(2) of § 1.1245-2) of such property. If on the date he acquired his partnership interest by way of a sale or exchange the partnership owned such property and an election under section 754 was in effect, then for purposes of the preceding sentence the amount of the adjustments reflected in the adjusted basis of such property on such date shall be deemed to be zero. For special rules relating to the amount of adjustments reflected in the adjusted basis of property after partnership transactions, see paragraph (c)(6) of § 1.1245-2.

(iii) The partner's adjusted basis in respect of the property shall be deemed to be (a) the portion of the partnership's adjusted basis for the property allocated to the partner under subdivision (ii) of this subparagraph, (b) increased by the amount of any special basis adjustment described in section 743(b)(1) (or decreased by the amount of any special basis adjustment described in section 743(b)(2)) which the partner may have in respect of the property on the date the partnership disposed of the property.

(iv) The partner's recomputed basis in respect of the property shall be deemed to be (a) the sum of the partner's adjusted basis for the property, as determined in subdivision (iii) of this subparagraph, plus the amount of "the adjustments reflected in the adjusted basis" (as defined in paragraph (a)(2) of § 1.1245-2) for the property allocated to the partner under subdivision (ii) of this subparagraph, (b) increased by the amount by which any special basis adjustment described in section 743(b)(1) (or

---

[4229] See text accompanying fn 1474 in part II.G.5.b Bonus Depreciation. Following that, see Reg. § 1.168(k)-2(b)(3)(vii), Examples (14), (15), and (17) for when bonus depreciation does or does not apply.
[4230] Following the text accompanying fn 1474 in part II.G.5.b Bonus Depreciation, see Reg. § 1.168(k)-2(b)(3)(vii)(P), Example (16).

decreased by the amount by which any special basis adjustment described in section 743(b)(2)) in respect of the property was reduced, but only to the extent such amount was applied to adjust the amount of the deductions allowed or allowable to the partner for depreciation or amortization of section 1245 property attributable to periods referred to in paragraph (a)(2) of § 1.1245-2. The terms “allowed or allowable,” “depreciation or amortization,” and “attributable to periods” shall have the meanings assigned to these terms in paragraph (a) of § 1.1245-2.

(4) The application of subparagraph (3) of this paragraph may be illustrated by the following example:

Example. A, B, and C each hold a one-third interest in calendar year partnership ABC. On December 31, 1962, the firm holds section 1245 property which has an adjusted basis of $30,000 and a recomputed basis of $33,000. Depreciation deductions in respect of the property for 1962 were $3,000. On January 1, 1963, when D purchases C’s partnership interest, the election under section 754 is in effect and a $5,000 special basis adjustment is made in respect of D to his one-third share of the common partnership adjusted basis for the property. For 1963 and 1964 the partnership deducts $6,000 as depreciation in respect of the property, thereby reducing its adjusted basis to $24,000, and D deducts $2,800, *i.e.*, his distributive share of partnership depreciation ($2,000) plus depreciation in respect of his special basis adjustment ($800). On March 15, 1965, the partnership sells the property for $48,000. Since the partnership’s recomputed basis for the property ($33,000, *i.e.*, $24,000 adjusted basis plus $9,000 in depreciation deductions) is lower than the amount realized upon the sale ($48,000), the excess of recomputed basis over adjusted basis, or $9,000, is treated as partnership gain under section 1245(a)(1). D’s distributive share of such gain is $3,000⅓ of $9,000). However, the amount of gain recognized by D under section 1245(a)(1) is only $2,800, determined as follows:

(1) Adjusted basis:		
D’s portion of partnership adjusted basis (⅓ of $24,000)	$8,000	
D’s special basis adjustment as of December 31, 1964 ($5,000 minus $800)	4,200	
D’s adjusted basis		$12,200
(2) Recomputed basis:		
D’s adjusted basis	12,200	
D’s portion of partnership depreciation for 1963 and 1964, *i.e.*, for periods after he acquired his partnership interest (⅓ of $6,000)	2,000	
Depreciation for 1963 and 1964 in respect of D’s special basis adjustment	800	
D’s recomputed basis		15,000
(3) D’s portion of amount realize by partnership (⅓ of $48,000)		16,000

(4) Gain recognized to D under section 1245(a)(1), *i.e.*, the lower of (2) or (3), minus (1) 2,800

CCA 201726012 (under the signature of David R. Haglund) asserted that Reg. § 1.1502-13 did not permit increased deductions for depreciation and amortization that are attributable to Code § 743(b) adjustments arising from the transfer of a partnership interest in an intercompany reorganization to which Code § 368 applies and from the distribution of a partnership interest in an intercompany liquidation to which Code § 332(a) applies. It also asserted that the basis adjustment provisions of Code § 743(b) do not conflict with the carryover basis provisions of Code § 362(a) when a partnership interest is transferred in an intercompany reorganization to which Code § 368 applies or with the carryover basis provisions of Code § 334(b)(1) when a partnership interest is distributed in an intercompany liquidation to which Code § 332(a) applies.[4231]

For basis decreases, however, Reg. § 1.743-1(j)(4)(ii)(A) provides:

> *Reduced deduction*. The amount of any negative basis adjustment allocated to an item of depreciable or amortizable property that is recovered in any year first decreases the transferee's distributive share of the partnership's depreciation or amortization deductions from that item of property for the year. If the amount of the basis adjustment recovered in any year exceeds the transferee's distributive share of the partnership's depreciation or amortization deductions from the item of property, then the transferee's distributive share of the partnership's depreciation or amortization deductions from other items of partnership property is decreased. The transferee then recognizes ordinary income to the extent of the excess, if any, of the amount of the basis adjustment recovered in any year over the transferee's distributive share of the partnership's depreciation or amortization deductions from all items of property.

For purposes of Code § 168, the decrease is recovered over the remaining useful life of the item of the partnership's recovery property, using the following formula:[4232]

> The portion of the decrease that is recovered in any year during the recovery period is equal to the product of-

[4231] CCA 201726012 reasoned:

> In the case of property transferred in a reorganization to which § 368 applies, in which no gain or loss is recognized, the basis of such property in the hands of the transferee generally is the same as it would be in the hands of the transferor under § 362(a). Similarly, in the case of property distributed to a corporate parent from a subsidiary in a complete liquidation to which § 332(a) applies, in which no gain or loss is recognized, the basis of such property in the hands of the distributee generally is the same as it would be in the hands of the distributor under § 334(b)(1). Thus, with respect to the transfer of the Partnership1 interest from SubsidiaryH to SubsidiaryF in the Reorganization (to which § 368 applies), and the distribution of the Partnership1 interest from SubsidiaryC to SubsidiaryE in the Liquidation (to which § 332 applies), the transferee's and distributee's basis in their Partnership1 interest is the same as it would be in the hands of the respective transferor and distributor.
>
> Application of § 743(b), by contrast, has no effect on the basis of a *partnership interest* transferred in a reorganization or distributed in a complete liquidation. Rather, in such cases, if the partnership has a § 754 election in effect, § 743(b) provides for an increase or decrease in the adjusted basis of *partnership property*.

[4232] Reg. § 1.743-1(j)(4)(ii)(B). Reg. § 1.743-1(j)(4)(ii)(C) provides examples.

(1) The amount of the decrease to the item's adjusted basis (determined as of the date of the transfer); multiplied by

(2) A fraction, the numerator of which is the portion of the adjusted basis of the item recovered by the partnership in that year, and the denominator of which is the adjusted basis of the item on the date of the transfer (determined prior to any basis adjustments).

Also, Reg. § 1.743-1(j)(5) provides:

> *Depletion*. Where an adjustment is made under section 743(b) to the basis of partnership property subject to depletion, any depletion allowance is determined separately for each partner, including the transferee partner, based on the partner's interest in such property. See § 1.702-1(a)(8). For partnerships that hold oil and gas properties that are depleted at the partner level under section 613A(c)(7)(D), the transferee partner (and not the partnership) must make the basis adjustments, if any, required under section 743(b) with respect to such properties. See § 1.613A-3(e)(6)(iv).

II.Q.1.g.ii. Code § 755 Allocation to Inside Basis under Code § 743(b)

The partnership increases the adjusted basis of its property by the excess of the basis to the transferee partner of the partner's interest in the partnership over the partner's proportionate share of the adjusted basis of the partnership property.[4233] Consistent with the rule for outside basis stated above, a transferee's share of the adjusted basis to the partnership of partnership property is equal to the sum of the transferee's interest as a partner in the partnership's previously taxed capital, plus the transferee's share of partnership liabilities.[4234] Generally, a transferee's interest as a partner in the partnership's previously taxed capital is equal to:[4235]

- The amount of cash that the transferee would receive on a liquidation of the partnership following a certain hypothetical transaction, to the extent attributable to the acquired partnership interest; increased by

- The amount of tax loss,[4236] that would be allocated to the transferee from the hypothetical transaction (to the extent attributable to the acquired partnership interest); and decreased by

- The amount of tax gain, [4237] that would be allocated to the transferee from the hypothetical transaction (to the extent attributable to the acquired partnership interest).

The hypothetical transaction referred to the bullet points above means the disposition by the partnership of all of the partnership's assets, immediately after the transfer of the partnership interest, in a fully taxable transaction for cash equal to the fair market value of the assets.[4238] TAM 201929019 asserted that an assets-over merger[4239] constitutes a Code § 761(e) transfer, as described in the text following fn 5623 in part II.Q.8.e.i Distribution of Partnership Interests,

---

[4233] Code § 743(b).
[4234] Reg. § 1.743-1(d)(1).
[4235] Reg. § 1.743-1(d)(1).
[4236] Including any remedial allocations under Reg. § 1.704-3(d).
[4237] Including any remedial allocations under Reg. § 1.704-3(d).
[4238] Reg. § 1.743-1(d)(2).
[4239] See part II.Q.8.e.v Partnership Mergers, especially the text accompanying fns 5816 and 5824 (describing an "assets-over" merger).

and calculated a basis step-down as described later in this part II.Q.8.e.iii.(d). Next, TAM 201929019 asserted its view on how to account for gain or loss in this hypothetical transaction:

> A transferee partner's share of the adjusted basis of partnership property under § 1.743-1(d)(1) equals the sum of the transferee's interest as a partner in the partnership's previously taxed capital plus the transferee's share of partnership liabilities. In determining a transferee's interest as a partner in the partnership's previously taxed capital, the amount of tax gain and loss (including any remedial allocations under § 1.704-3(d)), that would be allocated to the transferee from a hypothetical transaction described in § 1.743-1(d)(2) (to the extent attributable to the acquired partnership interest) is taken into account. In this case, the amount of tax loss that would be allocated to A from a hypothetical disposition of Y's assets would be $N17. A argues that, as a result of the § 1.743-1(d)(2) hypothetical transaction, A should also be allocated "tax gain" equal to A's share of X's deferred COD income under § 108(i) ("deferred COD income") of $N9, for purposes of calculating A's share of Y's previously taxed capital under § 1.743-1(d)(1). The crux of A's argument is that this amount of deferred COD income is (or should be treated as) equivalent to "tax gain" within the meaning of § 1.743-1(d)(1)(iii) that would be attributable to the transferred interest in Y that X receives in the merger transaction and that, in certain cases, disparities between inside/outside basis may be created by not including the deferred COD income as tax gain.
>
> We disagree. Deferred COD income is not "tax gain" for purposes of determining the transferee partner's interest in previously taxed capital. This income is not "tax gain" that would arise upon the disposition of partnership assets within the meaning and for the intent and purposes of § 1.743-1(d)(1)(iii) because it does not arise as a result of a disposition of partnership assets or property at fair market value for cash. The hypothetical transaction described in § 1.743-1(d)(2) is only concerned with determining the amount of partnership tax gain or loss that would result from the disposition of partnership assets at fair market value for cash, for purposes of determining an inside basis adjustment to partnership property. Deferred COD income is not and does not relate to partnership assets or property for purposes of the hypothetical transaction described in § 1.743-1(d)(2), but is simply an item of deferred income that does not have or attract basis, is not transferrable or marketable, and has no fair market value.[16]
>
> [16] A argues that the deferred COD income should be treated as gain like recognized COD income is treated as gain for purposes of §§ 338, 382, and 1374, citing Notice 2003-65, 2003-2 C.B. 747, and § 1.1374-4(f). Those Code sections, however, are corporate-level tax provisions that do not apply to partnerships. In addition, the policy rationale for treating recognized COD income as gain for purposes of §§ 338, 382, and 1374 is not relevant for determining whether deferred COD income should be included in calculating a partner's share of previously taxed capital of a partnership for purposes of § 743(b).
>
> Although § 1.755-1(b)(1)(ii) allocates the basis adjustment under § 743(b) between classes of property and among items of property within each class based on allocations of tax gain and income that would result from a hypothetical sale of all of the partnership property for cash in an amount equal to the fair market value of such property (emphasis added), any ordinary income amounts must still relate to partnership property that can be valued, such as accounts receivable or recapture property. COD income does not

relate to any partnership asset that can be assigned a value under the § 755 regulations and, therefore, should not be treated or otherwise taken into consideration as "tax gain" under § 1.743-1(d)(1)(iii).[17] Accordingly, deferred COD income should play no role in determining Y's previously taxed capital for determining A's inside basis in Y under § 743(b).

[17] See, generally, Rev. Rul. 91-31, 1991-1 C.B. 19, holding that the reduction of the principal amount of an under-secured nonrecourse debt by the holder of a debt who was not the seller of the property securing the debt results in the realization of discharge of indebtedness income under § 61(a)(12) and does not result in the reduction to the basis of the property securing the debt.

Moreover, treating deferred COD income as "tax gain" frustrates the purpose of § 743(b) and perpetuates the disparity between the transferee partner's inside and outside basis. Treating deferred COD income as tax gain actually reduces the § 743(b) adjustment that is required to treat the transferee partner as though the transferee partner directly purchased its share of the partnership's assets and, thus, perpetuates the difference between the transferee partner's inside and outside basis. We also disagree with A's argument that it is appropriate to preserve the "status quo ante" when § 743(b) applies to a sale or exchange. The purpose of § 743(b) when it applies to a transaction is to reduce the disparities between the partner's inside basis and outside basis, not to maintain the status quo by perpetuating inside/outside basis disparities.

A points out, not incorrectly, that in a hypothetical situation[18] where the partner has sufficient outside basis in the partnership interest at the time of discharge, the deemed distribution under § 752(b) resulting from the reduction in liabilities will occur immediately under § 108(i)(6) even though the recognition of the § 108(i) amount is deferred. In such a situation, A argues that the failure to treat the deferred COD income as "tax gain" for purposes of calculating the partner's interest in previously taxed capital under § 1.743-1(d)(1) will lead to a permanent disparity between inside and outside basis, which is counter to the intent and purposes of § 743(b). While we acknowledge this point, we disagree with A's argument that this means that deferred COD income must be treated as "tax gain" in computing the partner's interest in previously taxed capital as a matter of policy in every case. We note that doing so would lead to permanent disparities in cases such as this one where the partner has a deferred § 752 amount. Accordingly, to address the concern raised by A's hypothetical situation in which a partner has sufficient outside basis at the time of the discharge to absorb at least a portion of the deemed distribution under § 752(b), it would be appropriate solely for purposes of computing the transferee partner's § 743(b) adjustment to adjust the transferee partner's basis in the transferred partnership interest under § 705 by the amount of the deferred COD income that equals the amount of the deemed distribution under § 752(b) previously taken into account. This adjustment would compensate for the difference in timing created under § 108(i) in taking into account the two related items. Adjusting a transferee partner's basis in its partnership interest in this manner in the hypothetical situation would obviate the need to make any adjustment to the transferee partner's interest in the resulting partnership's previously taxed capital in such a situation. Therefore, we conclude that A's share of Y's previously taxed capital equals the amount of tax loss that would be allocated to A from a hypothetical disposition of Y's assets, or $N17, and does not include A's deferred COD income of $N9.

[18] Field Counsel and A currently disagree as to whether this hypothetical situation may apply, in part, to the actual facts of this case.

> In summary, taking into account the conclusions reached in this technical advice memorandum, the downward inside-basis adjustment under § 743(b) with respect to A is $N13 ($N13 (A's share of the adjusted basis to the partnership of Y's property ($N17 (tax loss) plus $N14 (A's share of Y's liabilities)) over $N15 (A's basis in the transferred Y interest)). A asserts that this basis adjustment is inconsistent with the purpose of § 743(b) because it not only eliminates the "true built-in loss" (based on A's legal position that A's $N14 share of Y's liabilities should be $N15 and A's $N9 deferred COD income should reduce A's interest in Y's previously taxed capital when applying the § 743(b) calculation), but it inappropriately creates gain for A. Although A does not specify the amount of gain created, presumably it is the gain that A would recognize upon a sale or exchange of Y's property after the proposed basis adjustments (reduced by the amount of A's asserted "true built-in loss"). In any event, we disagree that our position inappropriately creates gain for A. This ordinary loss deduction of $N3 reduced A's basis in A's partnership interest in X to $N15. However, the bases in X's assets were not reduced by the ordinary loss deduction, and A continued to hold an interest in X and operate X in Year3 and Year4. The downward inside-basis adjustment of $N13 for A is the logical, necessary, and appropriate consequence of the prior reduction of A's outside basis to $N15 as a result of the § 165(a) ordinary loss deduction in Year2 when § 743(b) applies to a subsequent transaction (in this case, the assets-over merger). The downward inside-basis adjustment of $N13 does not inappropriately create gain for A but carries out the purpose of § 743(b) by correctly applying the rules in § 1.743-1 to reduce A's inside basis in Y and thereby eliminate additional losses or deductions for A in subsequent tax years with respect to the partnership property transferred from X to Y in Year4.

Note that the basis adjustment does not refer to the basis change that triggered the adjustment. Rather, the basis adjustment seeks to reconcile the cumulative effect of anything that changed inside and outside basis.

Code § 755 and the regulations thereunder determine the allocation of the Code § 743(b) basis adjustment among the individual items of partnership property.[4240] Generally, any Code § 743(b) change in the adjusted basis of partnership property will be allocated in a manner which has the effect of reducing the difference between the fair market value in any other manner permitted by regulations.[4241]

In applying this rule, changes in the adjusted basis of property consisting of capital assets and Code § 1231(b) property (property used in a trade or business), or any other property of the

[4240] Code § 743(c); Reg. § 1.743-1(e).

[4241] Code § 755(a), which the regulations follow by allocating according to gain or loss arising from a hypothetical sale. This concept prevents an outside basis decrease due to valuation discounts from reducing the basis of assets with unrealized gain (although such a discount may reduce any basis increase); see part II.H.3 Valuation Discounts – Friend or Enemy, especially fn. 2148. Similarly, a distribution shifting basis to distributed assets under Code § 732 that ordinarily would reduce inside basis cannot reduce the basis of assets with unrealized gain; see parts II.H.2.f Partnership Basis Shifting Opportunities and II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property (with fn. 5401 referring to this footnote).

partnership, is allocated to partnership property of a like character, except that the basis of any such partnership property is not reduced below zero.[4242] Reg. § 1.755-1(a)(1) provides:

- First, the partnership determines the value of each of its assets.

- Second, the basis adjustment is allocated between the two classes of property consisting of capital assets and Code § 1231(b) property (capital gain property), and any other property of the partnership (ordinary income property). Furthermore, properties and potential gain treated as unrealized receivables under Code § 751(c) and the regulations thereunder are treated as separate assets that are ordinary income property. References to "capital gain" or "ordinary income" property appear to disregard whether there is an unrealized gain or loss.

- Third, the portion of the basis adjustment allocated to each class is allocated among the items within the class.

TAM 201929019 asserted that an assets-over merger constitutes a Code § 761(e) transfer, as described in the text following fn 5623 in part II.Q.8.e.i Distribution of Partnership Interests. The TAM asserted a basis step-down, calculated as follows (and applied as described in the text following fn 4238 earlier in this part II.Q.8.e.iii.(d)):

> Section 1.743-1 sets forth a mathematical formula for calculating the mandatory downward basis adjustment to partnership property when § 743(b) applies to a transaction.[10, 11] Notwithstanding the complications, the formula can be applied to achieve the correct basis adjustment consistent with the purpose of § 743(b), § 752, and subchapter K generally.
>
> > [10] When Congress amended § 743(b) in 2004 to mandatorily apply to substantial built-in loss cases, the mathematical formula was in § 1.743-1(d), which was amended in 1999 to apply to transfers of partnership interests occurring on or after December 15, 1999. Accordingly, Congress was aware that any basis adjustment under § 743(b) would not only take into account the transferee partner's share of built-in gain and built-in loss in determining the partner's share of previously taxed capital but would also take into account the partner's share of partnership liabilities.
> >
> > [11] [blank]
>
> In applying the formula to the facts of this case and for purposes of computing A's adjusted basis in the transferred Y interest under § 1.743-1(c) and A's share of the adjusted basis to the partnership of Y's property under § 1.743-1(d)(1), any net decrease in A's share of X's liabilities that are assumed by Y in Step 1 of the assets-over merger under § 1.708-1(c)(3)(i) must be taken into account to carry out the mandatory basis adjustment of § 743(b). When X is deemed to contribute all of its assets and liabilities to Y in exchange for an interest in Y under § 1.708-1(c)(3)(i), X's (and consequently A's) share of those liabilities decreases under § 752(b) when Y assumes the liabilities. In addition, A, as a momentary indirect partner in Y, is allocated a share of Y's liabilities under § 1.752-3(a)(3).[12] Because A's profit share in Y with respect to its momentary indirect interest in Y is N15, A's share of Y's liabilities under § 1.752-3(a)(3) is $N15. Because the decrease in A's share of X's liabilities of $N14 exceeds A's share of Y's

[4242] Code § 755(b).

liabilities through X after Step 1 of the merger, A would be treated as receiving a distribution of money under § 752(b) after Step 1 of the merger absent the netting rule in § 1.752-1(f). Immediately before the deemed distribution under § 752(b), A's adjusted basis in X is $N15. Therefore, without the netting rule in § 1.752-1(f), A would recognize gain under § 731 after Step 1 of the merger to the extent that the distribution under § 752(b) exceeds A's adjusted basis in X.

[12] Section 1.752-3(a)(1) and (a)(2) do not apply to the facts of this case.

A's unrecognized gain under § 731 represents the net decrease in A's share of X's liabilities that are assumed by Y after Step 1 of the assets-over merger. To carry out the mandatory downward basis adjustment of § 743(b) when there is a disparity between a transferee partner's basis in a resulting partnership and the transferee's share of the adjusted basis to the partnership of the resulting partnership's property, we must account for this decrease in liabilities by respecting the steps of the assets-over merger in § 1.708-1(c)(3)(i) and by taking into account the effect of the netting rule under § 1.752-1(f) in determining the basis adjustments under § 743(b). Therefore, when a net decrease in liabilities under § 752(b) as a result of a deemed contribution of liabilities in Step 1 in an assets-over merger is greater than the transferee partner's outside basis in the terminating partnership, the transferee partner (as a momentary indirect partner in the resulting partnership) must be allocated enough liabilities of the resulting partnership under § 752(a) to avoid recognizing § 731 gain,[13] and/or recognize § 731 gain to the extent that the transferee partner is not allocated a sufficient amount of the liabilities of the resulting partnership.

[13] Allocating enough liabilities to avoid gain recognition under § 731 will also prevent negative basis consequences, which are not recognized under federal tax law. See *Tufts v. Comm'r*, 461 U.S. 300, 310.

Those liabilities of the resulting partnership that are allocated to the transferee partner are included in determining the transferee partner's adjusted basis in the transferred resulting partnership interest under § 1.743-1(c) and the transferee partner's share of the resulting partnership's liabilities for purposes of computing the transferee partner's share of the adjusted basis to the partnership of the resulting partnership's property under § 1.743-1(d)(1). The intended parity of § 743(b) when there is a substantial built-in loss is achieved by taking into account those allocated liabilities in determining the transferee partner's § 743(b) adjustment. Therefore, for purposes of determining A's basis in the transferred Y interest under § 1.743-1(c) and A's share of Y's liabilities for purposes of determining A's share of the adjusted basis to the partnership of Y's property under § 1.743-1(d)(1), A's share of Y's liabilities under § 752(a) after Step 1 of the assets-over merger is $N14, representing the amount of gain that A would recognize under § 731 after Step 1 of the assets-over merger absent the netting rule in § 1.752-1(f).

The netting rule in § 1.752-1(f) determines the effect of a merger under § 752 with respect to a partner. While the netting rule reflects and implements a "single transaction/unitary basis" approach to prevent gain upon a merger, this does not imply that the steps of a merger should be ignored and a net decrease in liabilities after Step 1 of a merger should not be taken into account in determining adjustments under § 743(b). A's § 743(b) adjustment can be computed irrespective of whether the netting rule in § 1.752-1(f) applies by respecting the steps of a merger and accounting for the net decrease in liabilities under § 752.[14] Any other rule or result would have the effect of frustrating the clear intent of § 743(b), which strives to achieve parity between inside basis of partnership property and outside basis of transferred partnership interests when the transfers are subject to that rule. Further, by not making a § 743(b) adjustment, A could be allocated losses or depreciation deductions from Y in subsequent years with respect to any depreciable built-in loss property that X contributed to Y in the assets-over merger which conflicts with Congressional intent in amending § 743(b) to apply in cases where there is a substantial built-in loss.[15] There is no reason why § 743(b) should be prevented from achieving its intended purpose in this case.

[14] For example, when applying the separate/bifurcated approach of § 743(b) to the facts from Example 2 of § 1.752-1(g) assuming a § 754 election is in effect and accounting for B's net decrease in liabilities under § 752, B has no adjustment under § 743. This is correct because before the merger, the inside and outside bases of B in partnership T and partnership S are equal. For simplicity, B's share of partnership liabilities in partnership T and partnership S is determined under § 1.752-3(a)(3). When partnership T merges into partnership S and transfers its assets ($600 of adjusted basis and value of $1,000) and liabilities ($900) to partnership T, B's share of partnership T's liabilities decreases by $630. B's share of partnership S's liabilities, as a momentary indirect partner in partnership S, is $70 (7% of $1,000). Under the netting rule in § 1.752-1(f), B does not recognize any gain under § 731. Absent the netting rule, B would recognize $140 of gain under § 731.

For purposes of determining B's § 743(b) adjustment, B's outside basis in partnership S (transferred partnership interest) is $0 ($420 (B's outside basis in partnership T before the merger) less $630 (decrease in B's share of partnership T's liabilities) plus $70 (B's share of partnership S's liabilities under § 1.752-3(a)(3) as a momentary indirect partner in partnership S) plus $140 of additional liabilities of partnership S (representing the amount of gain under § 731 that B does not recognize as a result of the netting rule in § 1.752-1(f))). B's share of the adjusted basis to the partnership of partnership S's property is $0 (negative $210 (B's interest as a partner in partnership S's previously taxed capital ($70 of cash under § 1.743-1(d)(1)(i) less $280 of tax gain under § 1.743-1(d)(1)(iii))) plus $210 (B's share of partnership S's liabilities, which is the same amount of liabilities used to compute B's outside basis in partnership S)). Therefore, because B's outside basis in partnership S with respect to the transferred partnership interest ($0) over B's share of the adjusted basis to the partnership of partnership S's property ($0) equals $0, there is no § 743 adjustment for B.

The separate/bifurcated approach of § 743(b) also reaches the correct result when applied to the same modified facts from Example 2 of § 1.752-1(g) assuming that another partner, A, in partnership T recognizes gain under § 731. Suppose that prior to the merger, A owns a 30% interest in partnership T, but does not own an interest in partnership S, and Z owns an 80% interest in partnership S. A's adjusted basis in its partnership T interest is $180 and A's share of partnership T's liabilities is $270. Z's share of partnership S's liabilities is $80. After the merger, A has a 3% interest in partnership S, B has a 25% interest in partnership S, and Z has a 72% interest in partnership S. When partnership T merges into partnership S and transfers its assets ($600 of adjusted basis and value of $1,000) and liabilities ($900) to partnership T, A's share of partnership T's liabilities decreases by $270 and Z's share of partnership S's liabilities increases by $640. A's share of partnership S's liabilities, as a momentary indirect partner in partnership S, is $30 (3% of $1,000). Under the netting rule in

§ 1.752-1(f), A will be treated as receiving a distribution under § 752(b) of $240 ($270 decrease in A's share of partnership T's liabilities less $30 increase in A's share of partnership S's liabilities). A's adjusted basis in its partnership S interest before the deemed distribution is $180 ($180 + $0). Because the $240 distribution exceeds A's adjusted basis in its partnership S interest by $60 ($240 - $180), A will recognize $60 of gain under § 731. After the merger, A's adjusted basis in its partnership S interest is $0 and includes A's $30 share of partnership S's liabilities. Z's share of partnership S's liabilities after the merger is $720 ($80 + $640, or 72% of $1,000).

For purposes of determining A's § 743(b) adjustment, A's outside basis in partnership S (transferred partnership interest) is $0 ($180 (A's outside basis in partnership T before the merger) less $270 (decrease in B's share of partnership T's liabilities) plus $30 (B's share of partnership S's liabilities under § 1.752-3(a)(3) as a momentary indirect partner in partnership S) plus $60 (amount of gain A recognizes under § 731)). A's share of the adjusted basis to the partnership of partnership S's property is $0 (negative $30 (A's interest as a partner in partnership S's previously taxed capital ($30 of cash under § 1.743-1(d)(1)(i) less $60 of tax gain under § 1.743-1(d)(1)(iii) adjusted to take into account A's $60 of § 731 gain)) plus $30 (A's share of partnership S's liabilities, which is the same amount of liabilities used to compute A's outside basis in partnership S)). Therefore, because A's outside basis in partnership S with respect to the transferred partnership interest ($0) over A's share of the adjusted basis to the partnership of partnership S's property ($0) equals $0, there is no § 743 adjustment for A.

[15] See footnote 5, *supra*.

[5] In 2004, Congress amended § 743 to mandate a downward inside-basis adjustment to partnership property with respect to a transferee partner in cases where there is a substantial built-in loss in the partnership. Under prior law, these adjustments would only be required in cases where the partnership had an election under § 754 in effect. Congress was concerned that, under those rules, built-in loss at the partnership level could be transferred to a transferee partner who would then be allocated a share of the loss when the partnership disposes of (or depreciates) the property. See H.R. Rep. No. 108-755, at 622 (2004) (Conf. Rep.).

A argues that the Service's interpretation of §§ 743(b) and 752 in the context of an assets-over merger creates a rule that is not in the regulations. We disagree. Although the regulations do not provide a specific example illustrating the analysis for an assets-over merger when § 743(b) applies, the regulations provide the rules necessary to perform the correct analysis consistent with the clear purpose of § 743(b) described above. The Service's position applies the rules in § 1.708-1(c), § 1.743-1(c) and (d)(1), § 1.752-1(f), and § 1.752-3 in an integrated, logical manner that effectuates Congressional intent consistent with the relevant statutes. In contrast, A seeks to apply the rules in § 1.752-3 in a mechanical manner that fails to give proper consideration to how the effect of the netting rule in § 1.752-1(f) must be taken into account to reach the correct results when § 743(b) applies to an assets-over merger. A's partial, mechanical application of the rules in the regulations reaches an erroneous basis adjustment that would allow the transfer of built-in loss assets to the resulting partnership and fails to achieve parity between A's inside/outside basis amounts contrary to § 743(b).

Valuation issues include:

- If the assets of the partnership constitute a trade or business,[4243] then the partnership is required to use the residual method to assign values to the partnership's section 197 intangibles (goodwill, etc.).[4244] The IRS is not bound by the parties' allocation of purchase price, even if the parties are bound by a statement required to be filed with the IRS.[4245]

- Except for certain Code § 743(b) basis adjustments resulting from substituted basis transactions,[4246] partnership gross value generally is equal to the amount that, if assigned to all partnership property, would result in a liquidating distribution to the partner equal to the transferee's basis in the transferred partnership interest immediately following the relevant transfer (reduced by the amount, if any, of such basis that is attributable to partnership

---

[4243] As defined in Reg. § 1.1060-1(b)(2), which provides that a group of assets constitutes a trade or business if:

> (A) The use of such assets would constitute an active trade or business under section 355; or
> (B) Its character is such that goodwill or going concern value could under any circumstances attach to such group.

See part II.Q.7.f.iii Active Business Requirement for Code § 355.

[4244] Reg. § 1.755-1(a)(2), which further provides:

> To do so, the partnership must, first, determine the value of partnership assets other than section 197 intangibles under paragraph (a)(3) of this section. The partnership then must determine partnership gross value under paragraph (a)(4) of this section. Last, the partnership must assign values to the partnership's section 197 intangibles under paragraph (a)(5) of this section. For purposes of this section, the term section 197 intangibles includes all section 197 intangibles (as defined in section 197), as well as any goodwill or going concern value that would not qualify as a section 197 intangible under section 197.

Reg. § 1.755-1(a)(3) provides:

> For purposes of this section, the fair market value of each item of partnership property other than section 197 intangibles shall be determined on the basis of all the facts and circumstances, taking into account section 7701(g).

Code § 7701(g) provides:

> *Clarification of fair market value in the case of nonrecourse indebtedness*. For purposes of subtitle A, in determining the amount of gain or loss (or deemed gain or loss) with respect to any property, the fair market value of such property shall be treated as being not less than the amount of any nonrecourse indebtedness to which such property is subject.

[4245] Reg. § 1.1060-1(c)(4) provides:

> *Effect of agreement between parties*. If, in connection with an applicable asset acquisition, the seller and purchaser agree in writing as to the allocation of any amount of consideration to, or as to the fair market value of, any of the assets, such agreement is binding on them to the extent provided in this paragraph (c)(4). Nothing in this paragraph (c)(4) restricts the Commissioner's authority to challenge the allocations or values arrived at in an allocation agreement. This paragraph (c)(4) does not apply if the parties are able to refute the allocation or valuation under the standards set forth in *Commissioner v. Danielson*, 378 F.2d 771 (3d Cir.), *cert. denied*, 389 U.S. 858 (1967) (a party wishing to challenge the tax consequences of an agreement as construed by the Commissioner must offer proof that, in an action between the parties to the agreement, would be admissible to alter that construction or show its unenforceability because of mistake, undue influence, fraud, duress, etc.).

[4246] Reg. § 1.755-1(a)(4)(ii):

> applies to basis adjustments under section 743(b) that result from exchanges in which the transferee's basis in the partnership interest is determined in whole or in part by reference to the transferor's basis in the interest or to the basis of other property held at any time by the transferee (substituted basis transactions). In the case of a substituted basis transaction, partnership gross value equals the value of the entire partnership as a going concern, increased by the amount of partnership liabilities at the time of the exchange giving rise to the basis adjustment.

liabilities).[4247] However, in certain circumstances, such as where income or loss with respect to particular section 197 intangibles are allocated differently among partners, partnership gross value may vary depending on the values of particular section 197 intangibles the partnership held.[4248] Also, where a partnership interest is transferred as a result of the death of a partner, the transferee's basis in its partnership interest is determined without regard to Code § 1014(c), and is deemed to be adjusted for that portion of the interest, if any, that is attributable to items representing income in respect of a decedent under Code § 691.[4249]

If the aggregate value of partnership property other than section 197 intangibles[4250] is equal to or greater than partnership gross value,[4251] then all section 197 intangibles are deemed to have a value of zero for purposes of this allocation.[4252] Otherwise, the aggregate value of the partnership's section 197 intangibles (the residual section 197 intangibles value) is deemed to equal the excess of partnership gross value over the aggregate value of partnership property other than section 197 intangibles.[4253] The residual section 197 intangibles value must be

[4247] Reg. § 1.755-1(a)(4)(i)(A).

[4248] Reg. § 1.755-1(a)(4)(i)(B), which further provides:

> In these special situations, the partnership must assign value, first, among section 197 intangibles (other than goodwill and going concern value) in a reasonable manner that is consistent with the ordering rule in paragraph (a)(5) of this section and would cause the appropriate liquidating distribution under paragraph (a)(4)(i)(A) of this section. If the actual fair market values, determined on the basis of all the facts and circumstances, of all section 197 intangibles (other than goodwill and going concern value) is not sufficient to cause the appropriate liquidating distribution, then the fair market value of goodwill and going concern value shall be presumed to equal an amount that if assigned to goodwill and going concern value would cause the appropriate liquidating distribution.

[4249] Reg. § 1.755-1(a)(4)(i)(C).

[4250] Reg. § 1.755-1(a)(3) provides:

> For purposes of this section, the fair market value of each item of partnership property other than section 197 intangibles shall be determined on the basis of all the facts and circumstances, taking into account section 7701(g).

[4251] Gross value as determined in Reg. § 1.755-1(a)(4).

[4252] Reg. § 1.755-1(a)(5)(i).

[4253] Reg. § 1.755-1(a)(5)(i).

allocated first among section 197 intangibles other than goodwill and going concern value[4254] and then to goodwill and going concern value.[4255]

Substituted basis transactions and other transactions have different methodologies.[4256] Subject to certain exceptions for substituted basis transaction:[4257]

- The portion of the basis adjustment allocated to one class of property may be an increase while the portion allocated to the other class is a decrease. This would be the case even though the total amount of the basis adjustment is zero.

- The portion of the basis adjustment allocated to one item of property within a class may be an increase while the portion allocated to another is a decrease. This would be the case even though the basis adjustment allocated to the class is zero.

If the Code § 743(b) basis adjustment does not result from a substituted basis transaction, then the allocation of that adjustment between the classes of property and among the items of property within each class are made based on the allocations of income, gain, or loss[4258] that the transferee partner would receive (to the extent attributable to the acquired partnership interest) if, immediately after the transfer of the partnership interest, all of the partnership's

---

[4254] Reg. § 1.755-1(a)(5)(ii) provides:

> *Values assigned to section 197 intangibles other than goodwill and going concern value*. The fair market value assigned to a section 197 intangible (other than goodwill and going concern value) shall not exceed the actual fair market value (determined on the basis of all the facts and circumstances) of that asset on the date of the relevant transfer. If the residual section 197 intangibles value is less than the sum of the actual fair market values (determined on the basis of all the facts and circumstances) of all section 197 intangibles (other than goodwill and going concern value) held by the partnership, then the residual section 197 intangibles value must be allocated among the individual section 197 intangibles (other than goodwill and going concern value) as follows. The residual section 197 intangibles value is assigned first to any section 197 intangibles (other than goodwill and going concern value) having potential gain that would be treated as unrealized receivables under the flush language of section 751(c) (flush language receivables) to the extent of the basis of those section 197 intangibles and the amount of income arising from the flush language receivables that the partnership would recognize if the section 197 intangibles were sold for their actual fair market values (determined based on all the facts and circumstances) (collectively, the flush language receivables value). If the value assigned to section 197 intangibles (other than goodwill and going concern value) is less than the flush language receivables value, then the assigned value is allocated among the properties giving rise to the flush language receivables in proportion to the flush language receivables value in those properties. Any remaining residual section 197 intangibles value is allocated among the remaining portions of the section 197 intangibles (other than goodwill and going concern value) in proportion to the actual fair market values of such portions (determined based on all the facts and circumstances).

[4255] Reg. § 1.755-1(a)(5)(i), (iii).

[4256] Reg. § 1.755-1(b)(1)(i) provides:

> For basis adjustments under section 743(b) resulting from substituted basis transactions, paragraph (b)(5) of this section shall apply. For basis adjustments under section 743(b) resulting from all other transfers, paragraphs (b)(2) through (4) of this section shall apply.

[4257] Reg. § 1.755-1(b)(1)(i).

[4258] Including remedial allocations under Reg. § 1.704-3(d).

property were disposed of in a fully taxable transaction for cash in an amount equal to the fair market value of such property (the hypothetical transaction):[4259]

1. The amount of the basis adjustment allocated to the class of ordinary income property is equal to the total amount of income, gain, or loss[4260] that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the sale of all ordinary income property in the hypothetical transaction.[4261] The amount of the basis adjustment to each item of property within the class of ordinary income property is equal to:

   A. The amount of income, gain, or loss[4262] that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of the item;[4263] reduced by

   B. The product of:[4264]

      - Any decrease to the amount of the basis adjustment to ordinary income property required pursuant to fn 4276; multiplied by

      - A fraction, the numerator of which is the fair market value of the item of property to the partnership and the denominator of which is the total fair market value of all of the partnership's items of ordinary income property.

2. The amount of the basis adjustment to capital gain property is equal to the total amount of the basis adjustment under Code § 743(b) minus he amount of the basis adjustment allocated to ordinary income property.[4265] The amount of the basis adjustment to each item of property within the class of capital gain property is equal to:[4266]

   A. The amount of income, gain, or loss[4267] that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of the item;[4268] minus

   B. The product of:[4269]

      - The total amount of gain or loss[4270] that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of all items of capital gain property, minus the amount of the positive basis adjustment

---

[4259] Reg. § 1.755-1(b)(1)(ii), which further provides:

> See § 1.460-4(k)(3)(v)(B) for a rule relating to the computation of income or loss that would be allocated to the transferee from a contract accounted for under a long-term contract method of accounting as a result of the hypothetical transaction.

[4260] Including any remedial allocations under Reg. § 1.704-3(d).
[4261] Reg. § 1.755-1(b)(2)(i).
[4262] Including remedial allocations under Reg. § 1.704-3(d).
[4263] Reg. § 1.755-1(b)(3)(i)(A).
[4264] Reg. § 1.755-1(b)(3)(i)(B).
[4265] Reg. § 1.755-1(b)(2)(i).
[4266] Reg. § 1.755-1(b)(3)(ii).
[4267] Including remedial allocations under Reg. § 1.704-3(d).
[4268] Reg. § 1.755-1(b)(3)(ii)(A).
[4269] Reg. § 1.755-1(b)(3)(ii)(B).
[4270] Including remedial allocations under Reg. § 1.704-3(d).

to all items of capital gain property or plus the amount of the negative basis adjustment to capital gain property; multiplied by

- A fraction, the numerator of which is the fair market value of the item of property to the partnership, and the denominator of which is the fair market value of all of the partnership's items of capital gain property.

An asset with respect to which the transferee partner has no interest in income, gain, losses, or deductions shall not be taken into account in calculating this product.[4271] Furthermore, the amount of any decrease in basis allocated to an item of capital gain property above[4272] may not exceed the partnership's adjusted basis in that item; if a decrease in basis allocated above to an item of capital gain property would otherwise exceed the partnership's adjusted basis in that item, the excess must be applied to reduce the remaining basis, if any, of other capital gain assets pro rata in proportion to the bases of such assets (as adjusted under these rules).[4273]

3. In no event may the amount of any decrease in basis allocated to capital gain property exceed the partnership's basis[4274] in capital gain property.[4275] If a decrease in basis allocated to capital gain property would otherwise exceed the partnership's basis in capital gain property, the excess must be applied to reduce the basis of ordinary income property.[4276]

4. Where a partnership interest is transferred as a result of the death of a partner, under Code § 1014(c) the transferee's basis in its partnership interest is not adjusted for that portion of the interest, if any, which is attributable to items representing income in respect of a decedent under Code § 691.[4277]

Next we discuss substituted basis transactions.[4278] Initially, this was limited to Code § 743(b) basis adjustments resulting from exchanges in which the transferee's basis in the partnership interest is determined in whole or in part by reference to the transferor's basis in that interest.[4279] For exchanges on or after June 9, 2003, it also applies to Code § 743(b) basis adjustments that result from exchanges in which the transferee's basis in the partnership interest is determined by reference to other property held at any time by the transferee, including when a partnership interest:[4280]

- Is contributed to a corporation in a Code § 351 transaction,

[4271] Reg. § 1.755-1(b)(3)(iii)(A).
[4272] In the case of property subject to the remedial allocation method, the transferee's share of any remedial loss under Reg. § 1.704-3(d) from the hypothetical transaction.
[4273] Reg. § 1.755-1(b)(3)(iii)(B)
[4274] In the case of property subject to the remedial allocation method, the transferee's share of any remedial loss under Reg. § 1.704-3(d) from the hypothetical transaction.
[4275] Reg. § 1.755-1(b)(2)(i)(B).
[4276] Reg. § 1.755-1(b)(2)(i).
[4277] Reg. § 1.755-1(b)(4)(i), referring to Reg. § 1.742-1. For more details on Reg. § 1.742-1, see fn 5682 in part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).
[4278] Reg. § 1.755-1(b)(5).
[4279] Reg. § 1.755-1(b)(5)(i).
[4280] Reg. § 1.755-1(b)(5)(i).

- Is contributed to a partnership in a Code § 721(a) transaction, or
- Is distributed by a partnership in a Code § 731(a) transaction.

The substituted basis transaction's effect depends on whether the Code § 743(b) basis adjustment is zero, positive, or negative:[4281]

- If the overall Code § 743(b) basis adjustment is zero, then no adjustment to the basis of partnership property will be made.
- If the overall Code § 743(b) basis adjustment is positive, the increase is allocated to capital gain property or ordinary income property, respectively, only if the total amount of gain or loss[4282] that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of all such property would result in a net gain or net income, as the case may be, to the transferee. If an increase in basis may be allocated to both capital gain assets and ordinary income assets, the increase is allocated to each class in proportion to the net gain or net income, respectively, which would be allocated to the transferee from the sale of all assets in each class.
- If the overall Code § 743(b) basis adjustment is negative, the decrease is allocated to capital gain property or ordinary income property, respectively, only if the total amount of gain or loss[4283] that would be allocated to the transferee (to the extent attributable to the acquired partnership interest) from the hypothetical sale of all such property would result in a net loss to the transferee. If a decrease in basis may be allocated to both capital gain assets and ordinary income assets, the decrease is allocated to each class in proportion to the net loss that would be allocated to the transferee from the sale of all assets in each class.

Any substituted basis increase within a class is allocated in the following order:[4284]

1. To properties with unrealized appreciation in proportion to the transferee's share of the respective amounts of unrealized appreciation before such increase (but only to the extent of the transferee's share of each property's unrealized appreciation), then any remaining increase
2. In proportion to the transferee's share of the amount that would be realized by the partnership upon the hypothetical sale of each asset in the class.

Any substituted basis decrease within a class is allocated in the following order:[4285]

1. To properties with unrealized depreciation in proportion to the transferee's shares of the respective amounts of unrealized depreciation before such decrease (but only to the extent of the transferee's share of each property's unrealized depreciation), then any remaining decrease

[4281] Reg. § 1.755-1(b)(5)(ii).
[4282] Including any remedial allocations under Reg. § 1.704-3(d).
[4283] Including any remedial allocations under Reg. § 1.704-3(d).
[4284] Reg. § 1.755-1(b)(5)(iii)(A).
[4285] Reg. § 1.755-1(b)(5)(iii)(B).

2. In proportion to the transferee's shares of their adjusted bases (as adjusted under the preceding sentence).

However, if a substituted basis decrease must be allocated to capital gain assets, ordinary income assets, or both, and the amount of the decrease otherwise allocable to a particular class exceeds the transferee's share of the adjusted basis to the partnership of all depreciated assets in that class, the transferee's negative basis adjustment is limited to the transferee's share of the partnership's adjusted basis in all depreciated assets in that class.[4286] Also, if a Code § 743(b) transferee's negative basis adjustment cannot be allocated to any asset, because the adjustment exceeds the transferee's share of the adjusted basis to the partnership of all depreciated assets in a particular class, the adjustment is made when the partnership subsequently acquires property of a like character to which an adjustment can be made.[4287]

II.Q.2. Consequences of IRS Audit Exposure for Prior Years' Activities

Consider the impact of part II.G.19 IRS Audits and whether the buyers might want a price adjustment if such audits occur:

- C Corporation. An audit changing a prior year's tax position results in the new shareholders paying the tax.

- S corporation. An audit changing a prior year's tax position results in the former shareholders paying the tax, except to the extent that the change relates to C corporation years,[4288] built-in gain tax,[4289] tax on excess net passive income,[4290] or any other taxes or penalties (for example, payroll taxes) imposed on the entity itself.

- Partnership. Depending on the situation, tax imposed by reason an audit changing a prior year's tax position might be paid by the partnership or by the former partners. Of course, taxes or penalties (for example, payroll taxes) other than income tax might be imposed on the entity itself.

II.Q.3. Installment Sales - Deferring Tax on Lump Sum Payout Expected More than Two Years in the Future

If one expects to sell a business interest for all cash in a few years and would like to defer capital gain on the sale of a business interest, consider selling the business interest in an installment sale to a nongrantor trust. The note might be interest-only for a few years, with principal payments beginning sometime after the business interest is expected to be sold. The trust receives basis for the full amount of the promissory note and can sell the business interest tax-free to the extent of that basis. Similar principles apply to the sale of land or other property that is not depreciable or amortizable.

[4286] Reg. § 1.755-1(b)(5)(iii)(C).
[4287] Reg. § 1.755-1(b)(5)(iii)(D).
[4288] Changes to C corporation years might result not only in more tax but also more earnings & profits (E&P); for the latter, see part II.Q.7.b Redemptions or Distributions Involving S Corporations (effect of E&P on taxation of distributions).
[4289] See part II.P.3.b.ii Built-in Gain Tax on Former C Corporations under Code § 1374.
[4290] See part II.P.3.b.iii Excess Passive Investment Income.

The preamble to the proposed regulations, "Identification of Monetized Installment Sale Transactions as Listed Transactions," Agency/Docket Number REG-109348-22 (8/4/2023), RIN 1545-BQ69, explains in part III, "Installment Sales":

> Section 61(a)(3) provides that a taxpayer's gross income includes gains from dealings in property. Under section 1001(a), a taxpayer's gain on a sale of property is equal to the excess of the amount realized on the sale over the taxpayer's adjusted basis in the property and, generally, a taxpayer must recognize the gain in the taxable year of the sale. The taxpayer's amount realized generally includes cash actually or constructively received, plus the fair market value of any property received or, in the case of a debt instrument issued in exchange for property, the issue price of the debt instrument. See § 1.1001–1 of the Income Tax Regulations.
>
> Section 453 provides an exception to the general rule that gain from the sale of property must be recognized in the year of sale. Section 453(a) provides, in general, that income from an installment sale is accounted for under the installment method. Under section 453(b), an installment sale is one in which a taxpayer disposes of property and at least one payment is to be received after the close of the taxable year of the disposition. The installment method, as described in section 453(c), requires a taxpayer to recognize income from a disposition as payments are actually or constructively received, in an amount equal to the proportion of the payment received that the gross profit (realized or to be realized when payment is completed) bears to the total contract price.
>
> Under section 453(f)(3) and 26 CFR 15a.453–1(b)(3) (Temporary Income Tax Regulations Under the Installment Sales Revision Act), a taxpayer generally does not receive a "payment," as such term is used in section 453(b), to the extent the taxpayer receives evidence of indebtedness "of the person acquiring the property" (installment obligation). As a result, notwithstanding that a taxpayer has received an installment obligation from the buyer evidencing the buyer's obligation to pay an amount equal to the purchase price, the taxpayer is not treated as having received full payment in the year in which the taxpayer received the installment obligation. Instead, the taxpayer is treated as receiving payments when the taxpayer receives (or constructively receives) payments under the installment obligation.
>
> However, to the extent that the taxpayer receives a note or other evidence of indebtedness in the year of sale from a person other than "the person acquiring the property," section 453(f)(3) is inapplicable. A note or other evidence of indebtedness received in the year of sale issued by a person other than the person acquiring the property is, under § 15a.453-1(b)(3), the receipt of a payment for purposes of section 453. Likewise, under § 15a.453-1(b)(3), the taxpayer's receipt of a note or other evidence of indebtedness that is secured directly or indirectly by cash or a cash equivalent is treated as the receipt of payment for purposes of section 453.
>
> Section 453A(d) provides rules relating to certain installment obligations arising from a disposition of property, the sales price of which is more than $150,000. Under section 453A(d), if any indebtedness is secured by an installment obligation to which section 453A applies, the net proceeds of the secured indebtedness are treated as a payment received on the installment obligation as of the later of the time the indebtedness becomes secured by the installment obligation or the time the taxpayer receives the proceeds of the indebtedness (the pledging rule). To the extent installment

payments are received after the date payment is treated as received under section 453A(d), the tax on such payments is treated as having already been paid.

Potential pitfalls include the following:

- If the trust is a related person (which usually is the case) and it re-sells the business interest within two years, the original seller's deferred gain is accelerated.[4291]

- The original seller's death will not generate a basis step-up in the note.[4292] If the original seller had simply held the business interest until death, part or all of the gain would be eliminated by basis step-up. Consider buying term insurance against the risk of loss of the financial benefit of the basis step-up.

- Be sensitive to possible acceleration of the deferred gain if the original seller later transfers the installment note, including by gift (or transfer to or from a nongrantor trust),[4293] or pledges the note.[4294]

- Beware of the possible need to pay interest on the deferred tax liability if the sale exceeds $5 million.[4295]

- The part of the gain on the sale of a partnership interest attributable to "hot assets" is not eligible for installment sale treatment.[4296]

- The direct or indirect sale of depreciable or amortizable assets to a related party (the nongrantor trust) might trigger ordinary income tax.[4297]

Dealers cannot use the installment method with respect to:[4298]

(A) *Personal property*. Any disposition of personal property by a person who regularly sells or otherwise disposes of personal property of the same type on the installment plan.

(B) *Real property*. Any disposition of real property which is held by the taxpayer for sale to customers in the ordinary course of the taxpayer's trade or business.

When entities disposed of real properties that were held for sale to customers in the ordinary course of their trades or businesses, they were not permitted to use the installment method to account for their sales of real properties made by contract for deed.[4299]

II.Q.4. Consequences of Buy-Sell Agreements Not Dependent on Choice of Entity

This part II.Q.4.g begins with practical issues of part II.Q.4.a Funding the Buy-Sell.

Because life insurance is so commonly used to fund buy-sell agreements, it then delves into various life insurance issues in parts:

- II.Q.4.b Transfer for Value Rule; Basis
- II.Q.4.c Income Tax Issues in Transferring Life Insurance; Code § 1035
- II.Q.4.d Income Tax on Distributions or Loans from Contract (Including Surrender of Policy)
- II.Q.4.e Income Tax Issues When the Owner Who Is Not the Insured Dies
- II.Q.4.f Split-Dollar Arrangements
- II.Q.4.g Income Tax Trap for Business-Owned Life Insurance

The next issue is part II.Q.4.h Establishing Estate Tax Values, which includes not only gift/estate tax issues in transferring a business interest but also estate tax issues caused by life insurance held by a business to redeem the insured's business interest.

To avoid the latter, the owners might agree to buy each other's interest on death (a "cross purchase"). A solution to several issues raised by a cross purchase is in part II.Q.4.i Life Insurance LLC.

II.Q.4.a. Funding the Buy-Sell

Insurance is by far the most common method by which a buy-sell agreement is funded, whichever form of agreement is used. Special rules apply if the beneficiary is two generations (or the equivalent) younger than the insured.[4300] If a business owner has a parent with an

---

[4300] If the policy proceeds are $250,000 or more, the life insurance company will need to verify with the beneficiary that the beneficiary is not a skip person receiving a payment subject to generation-skipping transfer (GST) tax; otherwise the insurance company might need to file relevant forms reporting and paying GST tax. Reg. § 26.2662-1(c)(2)(vi) explains:

> *Example (1)*. *Insurance proceeds less than $250,000*. On August 1, 1997, T, the insured under an insurance policy, died. The proceeds ($200,000) were includible in T's gross estate for Federal estate tax purposes. T's grandchild, GC, was named the sole beneficiary of the policy. The insurance policy is treated as a trust under section 2652(b)(1), and the payment of the proceeds to GC is a transfer from a trust for purposes of chapter 13. Therefore, the payment of the proceeds to GC is a direct skip. Since the proceeds from the policy ($200,000) are less than $250,000, the executor is liable for the tax imposed by chapter 13 and is required to file Form 706.
>
> *Example (2)*. *Aggregate insurance proceeds of $250,000 or more*. Assume the same facts as in Example 1, except T is the insured under two insurance policies issued by the same insurance company. The proceeds ($150,000) from each policy are includible in T's gross estate for Federal estate tax purposes. T's grandchild, GC1, was named the sole beneficiary of Policy 1, and T's other grandchild, GC2, was named the sole beneficiary of Policy 2. GC1 and GC2 are

estate tax problem, that parent's estate tax problem might lend itself to a special opportunity to pay for the policies that fund the buy-sell.[4301]

Not enough attention is focused on disability insurance, which can protect the business' cash flow due to the interruption caused and might also help fund buyouts. To the extent disability is to benefit the disabled person, one should avoid the draconian Code § 409A rules,[4302] which have a stringent disability provision,[4303] and instead pay the key employee compensation sufficient for that person to buy his or her own disability policy.

Having life insurance proceeds paid directly to the selling shareholder does not make the sale tax-free; rather, the payment is treated just as would be any other payment to a seller[4304] (which might be tax-free if the seller has sufficient basis, for example because of a basis step-up in the business interest).

Funding with life insurance under a cross-purchase plan will require that each shareholder own a life insurance policy on the life of every other shareholder. If there are more than three owners, however, policy ownership can become complicated and a stock redemption agreement may make better sense. One alternative to a stock redemption agreement may be a trusteed agreement whereby the trustee would act as custodian of the policies and purchase one life insurance policy for each shareholder. This avoids the need for multiple policies when there are more than two shareholders. If a stock redemption arrangement is employed, the

---

skip persons (as defined in section 2613). Therefore, the payments of the proceeds are direct skips. Since the total value of the policies ($300,000) exceeds $250,000, the insurance company is liable for the tax imposed by chapter 13 and is required to file Schedule R-1 of Form 706.
Example (3). *Insurance proceeds of $250,000 or more held by insurance company*. On August 1, 1997, T, the insured under an insurance policy, dies. The policy provides that the insurance company shall make monthly payments of $750 to GC, T's grandchild, for life with the remainder payable to T's great grandchild, GGC. The face value of the policy is $300,000. Since the proceeds continue to be held by the insurance company (the trustee), the proceeds are treated as if they were transferred to a trust for purposes of chapter 13. The trust is a skip person (as defined in section 2613(a)(2)) and the transfer is a direct skip. Since the total value of the policy ($300,000) exceeds $250,000, the insurance company is liable for the tax imposed by chapter 13 and is required to file Schedule R-1 of Form 706.
Example (4). *Insurance proceeds less than $250,000 held by insurance company*. Assume the same facts as in Example 3, except the policy provides that the insurance company shall make monthly payments of $500 to GC and that the face value of the policy is $200,000. The transfer is a transfer to a trust for purposes of chapter 13. However, since the total value of the policy ($200,000) is less than $250,000, the executor is liable for the tax imposed by chapter 13 and is required to file Form 706.
Example (5). On August 1, 1997, A, the insured under a life insurance policy, dies. The insurance proceeds on A's life that are payable under policies issued by Company X are in the aggregate amount of $200,000 and are includible in A's gross estate. Because the proceeds are includible in A's gross estate, the generation-skipping transfer that occurs upon A's death, if any, will be a direct skip rather than a taxable distribution or a taxable termination. Accordingly, because the aggregate amount of insurance proceeds with respect to Company X is less than $250,000, Company X may pay the proceeds without regard to whether the beneficiary is a skip person in relation to the decedent-transferor.

[4301] This tool, generational split-dollar, is described as it was approved in fns. 4538-4540 in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit Arrangement under Reg. § 1.61-22.

[4302] See part II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules.

[4303] See part III.B.7.c.vi Deferred Compensation, especially fn. 7362.

[4304] For an analogous situation, see Rev. Rul. 70-254, which is based on *Landfield Finance Company v. U.S.*, 418 F. 2d 172 (7th Cir. 1969), which in turn is based on Reg. § 1.101-1(b)(4).

corporation purchases a life insurance policy on each shareholder. Upon the shareholder's death, the beneficiary then uses the proceeds to purchase the decedent's shares. Similarly, as described in a Letter Ruling, the shareholders could form a limited liability company to own life insurance on each other, with the manager of the LLC retaining the proceeds until the parties agree on proper application of the proceeds.[4305] Also note that split-dollar life insurance arrangements[4306] are subject to Code § 409A rules restricting the events upon which deferred compensation can be paid, the violation of which trigger significant tax, penalties, and interest.[4307] When drafting a shareholder agreement using life insurance, consider authorizing transfers of the policy to the insured for fair market value to avoid Code § 409A risks; defining the value as cash surrender value might not be sufficient, particularly because features, such as no-lapse guarantees (which is the equivalent of prepaid insurance that is not revealed on annual insurance policy statements), provide additional value that is tracked through the life insurance company's internal "shadow account" that can provide surprising results when the insurance company issues IRS Form 712.[4308] Also, make sure that any rights an insured might have to purchase a policy others hold on his life arise only as a collateral consequence of acts or events of independent significance,[4309] so that they do not constitute an incident of ownership.[4310]

[4305] See part II.Q.4.i Life Insurance LLC.

[4306] Split-dollar is a cash value life insurance financing arrangement described in Reg. §§ 1.61-22 and 1.7872-15, with cross-references found in Reg. §§ 1.83-6(a)(5) (income tax treatment on rollout of employee split-dollar), 1.301-1(q) (shareholder arrangements), and 1.1402(a)-18 (self-employment tax issues). See part II.Q.4.f Split-Dollar Arrangements, especially part II.Q.4.i.ii.(b) Corporate Ownership of Policy, including *Machacek v. Commissioner*, where the Sixth Circuit, reversing the Tax Court and ignoring the parties' briefs, held that Reg. § 1.301-1(q) caused economic benefits under even compensatory split-dollar agreements to be treated as distributions and not compensation income to an employee-shareholder.

[4307] Notice 2007-34 sets forth transition rules. See part II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules, for a discussion of Code § 409A, including the permissible triggering events. Events that terminate pre-2005 split-dollar agreements often do not comply with these permissible triggering events, so a review of pre-2005 split-dollar agreements is a good idea. See Zaritsky, Aghdami & Mancini, ¶8.02. Life Insurance Funding, *Structuring Buy-Sell Agreements: Analysis With Forms*.

[4308] In the case of a split-dollar arrangement entered into on or before September 17, 2003, and which is not materially modified after that date, only the cash surrender value of the contract is considered to be property. Reg. § 1.83-3(e). Reg. §§ 20.2031-8 and 25.2512-6 determine the value for estate and gift tax purposes - based primarily on interpolated terminal reserve as a measure of the replacement value.

[4309] See part III.B.1.i Transfers with Contingencies Based on Acts of Independent Significance.

[4310] Letter Ruling 8049002 held that no incidents of ownership existed when a shareholder agreement gave the decedent the option to purchase policies at a price equal to the transfer value (cash surrender value), which option was exercisable only if decedent terminated his shareholder relationship with the corporation by offering all stock to the corporation and/or the other principal. This first-refusal option would become operative when a shareholder receives a bona fide offer, a shareholder terminates employment, or a shareholder becomes totally and permanently incapacitated. At date of death, although the option was still outstanding, the decedent had not terminated his shareholder relationship or acted in any way to exercise his option with respect to the insurance policies. The ruling was based on Rev. Ruls. 72-307, 75-50, and 79-46, from which the IRS gleaned an absence of incidents of ownership because the decedent could not independently initiate the events which would enable him to gain control over the policies (except, perhaps, by terminating employment, and, even then, he would not control the corporation's decision to repurchase). Thus, he lacked not only the practical ability to exercise any power with respect to these policies but also any power over the policies. Letter Ruling 9233006 also found no incidents of ownership when shareholders could buy policies on their respective lives and, thus, prevent cancellation of these policies only if the corporation redeems their stock interests in the event that the

If a shareholder is uninsurable, a sinking fund may be used to accumulate funds for premium payments or at least to provide a down payment. The remainder of the purchase price can be subject to an installment agreement whereby the payments can be spread out over a long time period.

When using life insurance, make sure the beneficiary is the owner. Otherwise, when the insured dies, the owner is deemed to have transferred the death benefit to the beneficiary.[4311]

In a redemption agreement, the value of the insurance on the decedent's life will not be includable in the decedent's gross estate for federal estate tax purposes if the corporation is the owner and beneficiary of the policy,[4312] and the insurance proceeds received by the corporation will not be subject to income tax.[4313] Unless a valid agreement that satisfies Code § 2703[4314] provides otherwise, the insurance proceeds will, however, be considered in valuing the decedent's interest in the business,[4315] but perhaps offset by the buy-sell obligation.[4316]

Insurance premiums used to fund the agreement are not deductible by the corporation.[4317] Same with "any interest paid or accrued on any indebtedness with respect to 1 or more life insurance policies owned by the taxpayer covering the life of any individual, or any endowment

---

insured is disabled for a prescribed period of time, the insured declines to participate in the sale of the corporation to a third party, or the insured declines to participate in a public offering of the corporation's stock. Thus, the right to acquire the insurance policies and thus, prevent cancellation would arise as a collateral consequence of acts or events of independent significance. That ruling also cited Rev. Ruls. 84-130 and 80-255. The ability to cancel a death benefit by divorcing one's spouse does not generate Code § 2038(a)(1) inclusion; see part III.D Code § 2038.

[4311] *Goodman v. Commissioner of Internal Revenue*, 156 F.2d 218 (2nd Cir. 1946).

[4312] Rev. Rul. 82-85, relying on Reg. § 20.2042-1(c)(6), which is reproduced in part II.Q.4.i.ii.(b) Corporate Ownership of Policy. If the decedent controls the entity that owns the policy and the insurance proceeds are not payable to the corporation or otherwise used for a valid business purpose (such as in satisfaction of a business debt of the corporation) so that the net worth of the corporation is increased by the amount of such proceeds, then the proceeds are includible in the decedent's estate. Reg. § 20.2042-1(c)(6). For purposes of determining whether a decedent controlled stock, the decedent will not be attributed ownership of a trust that the decedent did not create with respect to which the decedent was not the deemed owner under the grantor trust income tax rules. Letter Rulings 9808024 (decedent not deemed owner of trust and therefore not attributed stock ownership), 9511046 (decedent attributed stock ownership as deemed owner of QSST). Also, Code § 2035 causes inclusion if the life insurance proceeds are payable to a third party for other than a Reg. § 20.2042-1(c)(6) business purpose and: (a) the corporation, for less than adequate and full consideration, assigns an insurance policy on the stockholder's life and the stockholder then disposes of control of the corporation, or (b) within three years of death the stockholder had a controlling interest in a corporation that owns a life insurance policy on the stockholder's life. Rev. Rul. 90-21. Situation (2) of Rev. Rul. 90-21 reasoned that a shareholder who holds a non-controlling interest would not hold incidents of ownership; however, the facts did not indicate whether the shareholder had any authority to exercise any control over the policy.

[4313] Code § 101(a)(1). However, the death benefit might trigger significant alternative minimum tax (AMT), because book-tax differences generate an AMT preference. See part II.Q.7.a.v Redemptions and Alternative Minimum Tax.

[4314] See part II.Q.4.h Establishing Estate Tax Values.

[4315] Reg. § 20.2031-2(f); *Newell v. Commissioner*, 66 F.2d 102 (7th Cir. 1933).

[4316] In the *Blount* case, cited in footnote 4584, the Tax Court included the life insurance in the business' value, but the 11th Circuit reversed, holding that the buy-sell obligation offset the inclusion in the company's value.

[4317] Code § 264(a)(1).

or annuity contracts owned by the taxpayer covering any individual."[4318] This rule disallowing interest does "not apply to any interest paid or accrued on any indebtedness with respect to policies or contracts covering an individual who is a key person to the extent that the aggregate amount of such indebtedness with respect to policies and contracts covering such individual does not exceed $50,000."[4319] In this context, "key person" means an officer or 20% owner, except that the number of individuals who may be treated as key persons with respect to any taxpayer cannot exceed the greater of (A) five individuals, or (B) the lesser of 5% of the total officers and employees of the taxpayer or 20 individuals.[4320] In this context, a "20% owner" means any person who owns directly 20% or more of the outstanding stock of a corporation, stock possessing 20% or more of the total combined voting power of all stock of a corporation, or 20% or more of the capital or profits interest in a partnership.[4321] For purposes of determining stock ownership and applying the $50,000 debt limit, all members of a controlled group are treated as one taxpayer, and this limitation shall be allocated among the members of such group in such manner as the Treasury/IRS may prescribe.[4322]

A cross-purchase generally would constitute a taxable sale, treated as a capital gain.[4323] In many cases, a cross-purchase or a redemption that is paid over time can qualify for tax deferral as an installment sale.[4324] However, tax deferral on installment sales can be limited,[4325] so do not assume that it is available without our first having the rules thoroughly researched.

In a cross-purchase arrangement, the value of life insurance owned on the decedent's life by a surviving shareholder will not be included in the decedent's estate for federal estate tax purposes, but the decedent's gross estate will include the value of life insurance the decedent owned on the lives of the surviving shareholders. Premiums paid by the shareholders to fund the agreement are not deductible by the shareholders, and the insurance proceeds paid to the surviving shareholders will not be subject to income tax. Generally, a transferred policy would be valued for income tax purposes at its fair market value, rather than its Form 712 value. *Matthies v. Commissioner*, 134 T.C. 141 (2010 regarding tax years 2000 and 2001), rejected the taxpayer's attempt to used interpolated terminal reserve for income tax purposes, although the rejection appears to have responded to the taxpayer's failure to prove value when engaging in what many people call a pension rescue plan that the court considered to be a scheme. The case also held that, if and to the extent that cash surrender value is used, the value does not consider charges imposed on a surrender of the policy. Rev. Proc. 2005-25 applies generally in the context of valuing compensation under Code §§ 79, 83 and 402. Except for split-dollar arrangements and except for employee trusts and annuity plans subject to Code §§ 402(b) and 403(c), Reg. § 1.83-3(e) provides:

[4318] Code § 264(a)(4). However, such interest reduces earnings and profits if the payor is a C corporation. Rev. Rul. 2009-25.

[4319] Code § 264(e)(1). However, Code § 264(e)(2) may limit the interest deduction to a particular rate.

[4320] Code § 264(e)(3).

[4321] Code § 264(e)(4).

[4322] Code § 264(e)(5)(A). Code § 264(e)(5)(B), "Controlled group," provides:

> For purposes of this paragraph, all persons treated as a single employer under subsection (a) or (b) of section 52 or subsection (m) or (o) of section 414 shall be treated as members of a controlled group.

[4323] However, in a partnership, part of the sale might constitute ordinary income under Code § 751. See part II.Q.8.e.ii Transfer of Partnership Interests: Effect on Transferring Partner.

[4324] Code § 453.

[4325] Code § 453A.

> In the case of a transfer of a life insurance contract, retirement income contract, endowment contract, or other contract providing life insurance protection, or any undivided interest therein, the policy cash value and all other rights under such contract (including any supplemental agreements thereto and whether or not guaranteed), other than current life insurance protection, are treated as property for purposes of this section.

For qualified retirement plan purposes, see Reg. § 1.402(a)-1(a)(2), the preamble to which is T.D. 9223, which does a good job of explaining how that rule changed. Reg. § 1.402(a)-1(a)(2) requires that surrender charges be ignored in calculating the amount of a distribution from a qualified retirement plan. However, for a nonexempt employee trust (a trust established to fund payments of compensation to be made in the future), surrender charges are considered. *Schwab v. Commissioner*, 136 T.C. 120 (2011) (when surrender charges exceeded cash value, policies valued based on prepaid death benefit when no other evidence of value was introduced), *aff'd* 715 F.3d 1169 (9th Cir. 2013), and *Lowe v. Commissioner*, T.C. Memo. 2011-106. *Lowe* summarized the holding of the Schwab Tax Court opinion, contrasting the qualified retirement plan concept of entire cash value against the nonexempt employee trust concept of entire value:

> We concluded that while the entire cash value of a life insurance policy is determined without regard to surrender charges, the entire value of a life insurance policy is determined by its fair market value, which may include surrender charges. We thus rejected the simple proposition that surrender charges should never count or that they should always count, instead reading section 402(b) to require a court to consider the payment of surrender charges as part of a more general inquiry into the policy's fair market value.

Lowe pointed out that the Tax Court denied the IRS' motion for reconsideration of *Schwab*. In denying the IRS' motion for summary judgment, the *Lowe* court held:

> The facts of the instant case are virtually identical to those presented in *Schwab*. The policies were variable universal life insurance policies with steep premiums, and both were distributed from nonexempt employee trusts in late 2003. Both policies carried surrender charges that rendered the accumulated value of the policy zero or less than zero. In Schwab we decided that the fair market values of the policies the taxpayers received were less than their accumulated values. Here, we are unable to determine the fair market value of Mr. Lowe's policy because the record does not allow us to do so.

Thus, the Tax Court appears to heavily weigh surrender charges in determining the value of a policy for income tax purposes, if a specific rule does not apply to override that. Specific rules to the contrary include qualified retirement plans (discussed above) and split-dollar arrangements (Reg. § 1.61-22(d)(4)(i)). Reg. § 1.83-3(e) provides further:

However, in the case of the transfer of a life insurance contract, retirement income contract, endowment contract, or other contract providing life insurance protection, which was part of a split-dollar arrangement (as defined in § 1.61-22(b)) entered into (as defined in § 1.61-22(j)) on or before September 17, 2003, and which is not materially modified (as defined in § 1.61-22(j)(2)) after September 17, 2003, only the cash surrender value of the contract is considered to be property. Where rights in a contract providing life insurance protection are substantially nonvested, see § 1.83-1(a)(2) for rules relating to taxation of the cost of life insurance protection.

For estate and gift tax purposes, the IRS Form 712 value is usually, but not always, appropriate. Reg. § 25.2512-6(a) provides:

> The value of a life insurance contract or of a contract for the payment of an annuity issued by a company regularly engaged in the selling of contracts of that character is established through the sale of the particular contract by the company, or through the sale by the company of comparable contracts. As valuation of an insurance policy through sale of comparable contracts is not readily ascertainable when the gift is of a contract which has been in force for some time and on which further premium payments are to be made, the value may be approximated by adding to the interpolated terminal reserve at the date of the gift the proportionate part of the gross premium last paid before the date of the gift which covers the period extending beyond that date. If, however, because of the unusual nature of the contract such approximation is not reasonably close to the full value, this method may not be used.

Dematteo v. Commissioner, Tax Court Docket 3634-21 (7/21/2022), declined the request for "a determination that a particular method of valuation of certain life insurance policies may be used by petitioner for gift tax purposes." The court refused to choose between Form 712 and another method, saying that the answer:

> [Depends] on the evidence of the nature of the policies and the quality of the respective valuations. Both must be approximations that are reasonable and reliable….

Reg. § 20.2031-8(a)(1), (2) provide:

> (1) The value of a contract for the payment of an annuity, or an insurance policy on the life of a person other than the decedent, issued by a company regularly engaged in the selling of contracts of that character is established through the sale by that company of comparable contracts. An annuity payable under a combination annuity contract and life insurance policy on the decedent's life (e.g., a retirement income policy with death benefit) under which there was no insurance element at the time of the decedent's death (see paragraph (d) of § 20.2039-1) is treated like a contract for the payment of an annuity for purposes of this section.
>
> (2) As valuation of an insurance policy through sale of comparable contracts is not readily ascertainable when, at the date of the decedent's death, the contract has been in force for some time and further premium payments are to be made, the value may be approximate by adding to the interpolated terminal reserve at the date of the decedent's death the proportionate part of the gross premium last paid before the date of the decedent's death which covers the period extending beyond that date. If, however, because of the unusual nature of the contract such an approximation is not reasonably close to the full value of the contract, this method may not be used.

Rev. Rul. 78-137 held:

> In general, the replacement cost of a single premium policy will determine the value of the policy for gift tax purposes. *United States v. Ryerson*, 312 U.S. 260 (1941), Ct. D. 1488, 1941-1 C.B. 447. The replacement cost is based upon the single premium cost of a comparable policy. *Candler v. Allen*, 43 F.Supp. 435 (M.D. Ga. 1942). Generally, the estate tax and gift tax provisions are in *pari materia*. *Sanford Estate v. Commissioner*, 308 U.S. 39 (1939), Ct. D. 426, 1939-2 C.B. 340.

> In order for an insurance policy to qualify as a comparable contract within the meaning of section 20.2031-8(a), the policy must provide the same economic benefits as the policy owned by the decedent. *Candler v. Allen*, above at 437. The economic benefits of a single premium life insurance policy consist of an entire bundle of rights including the right to surrender the policy, the right to retain it for investment virtues, the right to borrow the cash surrender value of the policy and the right to payment of the face amount on the death of the insured. *Guggenheim v. Rasquin*, 312 U.S. 254 (1941), Ct. D. 1487, 1941-1 C.B. 445; *Candler v. Allen*, above at 437. All of the economic benefits of the decedent's policy must be taken into consideration. To single out one economic benefit of the decedent's policy and to disregard the others is, in effect, to substitute a different property interest for the one that was owned by the decedent. *Cf. Guggenheim v. Rasquin*, above at 257.
>
> Since the cash surrender value of the replacement policy is less than the cash surrender value of the decedent's policy, the replacement policy does not reflect all of the economic benefits of the policy owned by the decedent. Therefore, the replacement policy is not a comparable contract within the meaning of section 20.2031-8(a) of the regulations. Accordingly, in the present case, the value of the policy owned by A on the life of A's child shall be determined, for Federal estate tax purposes, by reference to a comparable contract that reflects all of the economic benefits of the decedent's policy. If, however, information pertaining to a comparable contract is not obtainable, the value of the policy shall be determined by reference to the interpolated terminal reserve value of the policy pursuant to section 20.2031-8(a)(2) of the regulations, quoted above.

¶ 3.02[2][a][iii] of Zaritsky & Leimberg, *Tax Planning with Life Insurance: Analysis With Forms* (WG&L), provides an interesting discussion. Also see Anoia, Mendelsohn, and Slane, Complexities of Life Insurance Policy Valuation, *Estate Planning Journal* (June 2014), especially for some insightful analysis of valuing no-lapse guarantee policies.

In a cross purchase funded by life insurance, consider not only the transfer for value but also income tax rules when an owner enters or exits the ownership group. How will policies on the existing owners be transferred to the new owner? How will policies that a departing owner owns be transferred when that person leaves, and how will policies on that person's life be transferred from the other owners? Consider not only income tax but also Code § 409A nonqualified deferred compensation issues. One might use a Life Insurance LLC to minimize these potentially adverse tax consequences – particularly when new insurance can be obtained.[4326]

Using split-dollar arrangements[4327] to fund a cross-purchase might also help when unwinding the arrangement. The insured pays the premiums and is deemed the policy owner under the split-dollar regulations,[4328] but the other business owners are entitled to the term insurance component of the death benefit and hold title and all other incidents of ownership with respect to the policy.[4329] If the insured leaves the business, the policy is transferred to the insured (or, preferably, an irrevocable grantor trust established by the insured); the transfer of the policy to the insured is not deemed a transfer for income tax purposes because the insured was already deemed to be the owner.

[4326] See part II.Q.4.i, Life Insurance LLC.
[4327] See part II.Q.4.f Split-Dollar Arrangements.
[4328] Reg. § 1.61-22(c).

II.Q.4.b. Transfer for Value Rule; Basis

II.Q.4.b.i. Transfer for Value Rule Generally

If life insurance policies can be transferred among the shareholders or from the corporation to the shareholders, the transfer for value rules must be examined. The transfer-for-value rule states that, if consideration is given for the transfer of an insurance policy, then the proceeds of the policy will be taxed as income to the owner-beneficiary upon the insured's death.[4330] Specifically:[4331]

> A transfer for valuable consideration means any transfer of an interest in a life insurance contract for cash or other consideration reducible to a money value.

Under prior regulations,[4332] the IRS had taken the position that, when an insured transfers a policy on his life to his business co-owner, and his co-owner does the same, the transfer for value rules apply, and the death proceeds will be exempt only to the extent of the new premiums paid after the transfer, with the balance of the proceeds being taxed as ordinary income;[4333] given that T.D. 9879 (10/31/2019) changed the regulation to require "cash or other

---

[4330] Code § 101(a)(2) provides, subject to certain exceptions:

> In the case of a transfer for a valuable consideration, by assignment or otherwise, of a life insurance contract or any interest therein, the amount excluded from gross income by paragraph (1) shall not exceed an amount equal to the sum of the actual value of such consideration and the premiums and other amounts subsequently paid by the transferee.

Code § 101(a)(1) is the general rule that death benefits are not taxable.

[4331] Reg. § 1.101-1(f)(5).

[4332] Before T.D. 9879 (10/31/2019) was issued, Reg. § 1.101-1(b)(4) provided:

> … a "transfer for a valuable consideration" is any absolute transfer for value of a right to receive all or a part of the proceeds of a life insurance policy. Thus, the creation, for value, of an enforceable contractual right to receive all or a part of the proceeds of a policy may constitute a transfer for a valuable consideration of the policy or an interest therein. On the other hand, the pledging or assignment of a policy as collateral security is not a transfer for a valuable consideration of such policy or an interest therein, and section 101 is inapplicable to any amounts received by the pledgee or assignee.

Rev. Rul. 74-76 held no transfer for value when an employee-participant assigned a life insurance directly to a profit-sharing trust as a voluntary employee contribution.

[4333] Letter Ruling 7734048, reasoning:

> In the case of *Monroe v. Patterson*, 197 F.Supp. 146 (N.D. Ala. 1961), two policies were purchased on the life of an officer-stockholder, one by the insured and the other by the corporation. Subsequently insured entered into an agreement with two key employees for the purchase of his stock at his death. The policies were transferred to a trustee for use in partially financing the agreement and the key employees took over the payment of premiums. Upon insured's death, the proceeds were applied to the purchase of his stock. The Court held, the employees were transferees for value even though they had paid no purchase price for the policies. Their agreement to make the premium payments and to purchase the stock constituted a valuable consideration. Consequently the employees were taxed on the difference between the premiums they had paid and the proceeds applied toward their purchase of the insured's stock.

For additional discussion of the transfer for value rules, see Zaritsky & Leimberg, ¶2.07. The Transfer-For-Value Rule Causing the Loss of Tax-Free Status, *Tax Planning With Life Insurance: Analysis With Forms* (WG&L).

consideration reducible to a money value," that position should no longer apply. A policy without cash value is subject to these rules.[4334]

Reg. § 1.101-1(g)(9), Example (9)(i) treats a nontaxable exchange – a contribution to a partnership in exchange for a partnership interest under Code § 721(a)[4335] – as a transfer for valuable consideration. Also, Reg. § 1.101-1(g)(10), Example 10 assumes that a transfer to a corporation is a transfer for value.

The transfer for value rule does not apply to transfers made to the insured, a corporation in which the insured is an officer or stockholder, a partner of the insured,[4336] a partnership in which the insured is a partner, or where the new owner's basis is determined in whole or in part by reference to the transferor's basis.[4337] This exception looks at the deemed owner of a grantor trust.[4338] A gift subject to a policy loan that is not in excess of basis is a substituted basis

---

4334 *James F. Waters, Inc. v. Commissioner*, 160 F.2d 596 (9th Cir. 1947) (prior version of this statute).

4335 See part II.M.3.a General Rule: No Gain Or Loss on Contribution to Partnership.

4336 Not surprisingly, Letter Ruling 200120007 treated an LLC as a partnership in applying this rule. That LLC was formed to hold stock in a C corporation. The ruling also treated as having no adverse transfer-for-value effects:

- The transfer of a second-to-die policy to a trust deemed owned by one of the insureds.
- The transfer of a policy from a trust deemed owned by husband to a trust deemed owned by wife (due to Code § 1041 make it a substituted basis transaction).

Letter Ruling 9347016 applied this exception when shareholders bought a policy from a corporation (to facilitate a future cross-purchase of that corporation), triggering the transfer-for-value rule, but the investment partnership the shareholders owned triggered the exception. Same with Letter Ruling 9045004, which had the following facts:

> Corp. X, a C corporation, sells musical instruments. The stock of Corp. X is owned by A (42.85%), B (7.15%), C (42.85%), and D (7.15%). A, B, C, and D also are partners in Partnership. Partnership is involved in rental real estate activities and oil and gas production. A and C each have a 49% interest and B and D each have a 1% interest in Partnership. Corp. X is the owner and beneficiary of two life insurance policies on each of the lives of A and C. Premiums for the policies are paid for by Corp. X.
>
> Corp. X proposes to transfer the ownership and change the beneficiaries on the policies it owns as follows. The two policies currently insuring A will be transferred to B with B as the primary beneficiary and C and D as secondary beneficiaries.
>
> The two policies currently insuring C will be transferred to D with D as the primary beneficiary and A and B as secondary beneficiaries. It is represented that the secondary beneficiaries would be the beneficiaries should the primary beneficiary predecease the insured. It is further represented that Corp. X will retain the cash value portion of the policies and will continue to pay the premiums for that portion representing the cash value. The new owners of the policies will pay the premiums representing the life insurance portion of the policies.
>
> It is represented that the purpose of the transaction is to facilitate a buy-sell agreement. Upon the death of one or more of the insureds of the insurance policies, the financial means will be available for the remaining shareholders to secure control of Corp. X by purchasing the decedent's share from his estate.

4337 Code § 101(a)(2)(A), (B).

4338 Rev. Rul. 2007-13 posited the following situations:

> Situation 1. TR1 and TR2 are grantor trusts, both of which are treated as wholly owned by G under subpart E of Part I of subchapter J of the Internal Revenue Code. TR2 owns a life insurance contract upon the life of G. TR2 transfers the life insurance contract to TR1 in exchange for cash.
>
> Situation 2. The facts are the same as in Situation 1, except that TR2 is not a grantor trust.

It held:

transaction that does not trigger the transfer-for-value rule.[4339] A transfer of an interest in a partnership that owns a life insurance policy is not subject to the transfer for value rules if the

---

> The grantor who is treated for federal income tax purposes as the owner of a trust that owns a life insurance contract on the grantor's life is treated as the owner of the contract for purposes of applying the transfer for value limitations of § 101(a)(2). Accordingly, in Situation 1, the transfer of a life insurance contract between two grantor trusts that are treated as wholly owned by the same grantor is not a transfer for a valuable consideration within the meaning of § 101(a)(2); in Situation 2, the transfer of a life insurance contract to a grantor trust that is treated as wholly owned by the insured is a transfer to the insured within the meaning of § 101(a)(2)(B) and is therefore excepted from the transfer for value limitations under § 101(a)(2).

Note that Rev. Proc. 2019-3, Section 3.01(14) states that the IRS will not issue letter rulings on:

> Section 101.—Certain Death Benefits.—Whether there has been a transfer for value for purposes of § 101(a) in situations involving a grantor and a trust when (i) substantially all of the trust corpus consists or will consist of insurance policies on the life of the grantor or the grantor's spouse, (ii) the trustee or any other person has a power to apply the trust's income or corpus to the payment of premiums on policies of insurance on the life of the grantor or the grantor's spouse, (iii) the trustee or any other person has a power to use the trust's assets to make loans to the grantor's estate or to purchase assets from the grantor's estate, and (iv) there is a right or power in any person that would cause the grantor to be treated as the owner of all or a portion of the trust under §§ 673 to 677.

However, that did not stop the IRS from issuing Letter Ruling 201423009, which including the following facts and conclusions:

> Individual A and his spouse, Individual B, are the grantors of the AC Trust. The AC Trust, as amended, is represented to be a grantor trust for federal income tax purposes owned by Individual A and Individual B. The AC Trust, as amended, owns and is currently the beneficiary of Number Y life insurance contracts on the joint lives of Individual A and Individual B and the Number X policy on Individual B (collectively, the life insurance contracts which total Number Z policies).
>
> The movement of the life insurance contracts from the AC Trust to the AB Trust has two aspects. The first aspect is that, pursuant to the rationale of Rev. Rul. 85-13, Individual A, as a grantor of the AC Trust, as amended, proposes to transfer the life insurance contracts to the AB Trust of which Individual A is the grantor. Thus, this aspect of the transaction cannot be recognized as a sale or exchange for tax purposes because Individual A is treated for income tax purposes as owning the purported consideration both before and after the transaction. The second aspect of the transaction is that Individual B's interest in the AC Trust (in which she is a grantor) is being moved to the AB Trust in which Individual B's husband, Individual A, is the grantor. This action has the result, under § 1041(a), as being treated as a gift to her husband, Individual A, who pursuant to § 1041(b) receives a carryover basis in the life insurance contracts from his wife, Individual B.

[4339] Rev. Rul. 69-187 involved the following facts:

> *A* was the owner of a life insurance policy on his life under which his estate was designated as the beneficiary. The policy was in the face amount of 2,000x dollars, and had a value of approximately 860x dollars. Approximately 845x dollars had been advanced to *A* as a policy loan, on the security of the value of the policy and without personal liability on the part of *A*. *A* transferred the policy, subject to the indebtedness, to his wife, *B*. The transfer was made by the execution by *A* of a form that designated the new owner as *B*, and on her death, then to the executors, administrators, or assigns of *B*. *B* did not assume any personal liability with respect to the indebtedness.

Rev. Rul. 69-187 held:

> In the instant case the transferee's interest in the life insurance policy was acquired in part for a valuable consideration and in part by gift. Thus, upon the insured's death the insurance proceeds will be received under a policy that has a basis with respect to the transferee determinable in part by reference to the basis of the policy in the hands of the transferor. Accordingly, the limitation

transfer does not constitute a termination of the partnership.[4340] Similarly, contributing a life insurance policy to a partnership in a Code § 721 nontaxable transfer[4341] is a substituted basis transaction that is not subject to the original transfer for value rules[4342] but may need to be checked under the reportable policy sale rule under part II.Q.4.b.ii The Impact of Reportable Policy Sale on Transfer for Value Rule.

II.Q.4.b.ii. The Impact of Reportable Policy Sale on Transfer for Value Rule

Special rules apply to a "reportable policy sale," which is "the acquisition of an interest in a life insurance contract, directly or indirectly, if the acquirer has no substantial family, business, or financial relationship with the insured apart from the acquirer's interest in such life insurance contract."[4343] "Indirectly" includes "the acquisition of an interest in a partnership, trust, or other entity that holds an interest in the life insurance contract."[4344] Special rules for a reportable policy sale include:

- The exceptions to the transfer for value rule described above, all of which are Code § 101(a)(2)(A) or (B), do not apply.[4345] Thus, the death benefit generally is taxable, to the extent described in fn 4330.

- Various reporting requirements apply when the death benefit is paid.[4346]

The relevant committee report provides:

> **In general**
>
> The provision imposes reporting requirements in the case of the purchase of an existing life insurance contract in a reportable policy sale and imposes reporting requirements on the payor in the case of the payment of reportable death benefits. The provision sets forth rules for determining the basis of a life insurance or annuity contract. Lastly, the

---

> provided in section 101(a)(2) of the Code is not applicable. Upon the death of the insured, the proceeds of the policy are paid to *B* solely by reason of the death of the insured and are excludable from her gross income, as provided in section 101(a)(1) of the Code, except to the extent that section 101(d) of the Code is applicable by reason of payment of the proceeds at a date later than the death of the insured.

See also Letter Rulings 8628007 and 8951056, the latter pointing out that the transaction was substituted basis because basis exceeded debt.

[4340] Letter Ruling 200826009. Note, however, that Rev. Proc. 2011-3, Section 3.01(8) states that the IRS will not issue letter rulings on:

> Sections 101, 761, and 7701.—Definitions. — Whether, in connection with the transfer of a life insurance policy to an unincorporated organization, (i) the organization will be treated as a partnership under §§ 761 and 7701, or (ii) the transfer of the life insurance policy to the organization will be exempt from the transfer for value rules of § 101, when substantially all of the organization's assets consists or will consist of life insurance policies on the lives of the members.

[4341] See part II.M.3.a General Rule: No Gain Or Loss on Contribution to Partnership.

[4342] Letter Ruling 201308019.

[4343] Code § 101(a)(3)(B).

[4344] Code § 101(a)(3)(B).

[4345] Code § 101(a)(3)(A).

[4346] Code § 6050Y, which is reproduced in part II.Q.4.b.ii.(f) Reporting Requirements for Reportable Policy Sales.

provision modifies the transfer for value rules in a transfer of an interest in a life insurance contract in a reportable policy sale.

Reporting requirements for acquisitions of life insurance contracts

Reporting upon acquisition of life insurance contract

The reporting requirement applies to every person who acquires a life insurance contract, or any interest in a life insurance contract, in a reportable policy sale during the taxable year. A reportable policy sale means the acquisition of an interest in a life insurance contract, directly or indirectly, if the acquirer has no substantial family, business, or financial relationship with the insured (apart from the acquirer's interest in the life insurance contract). An indirect acquisition includes the acquisition of an interest in a partnership, trust, or other entity that holds an interest in the life insurance contract.

Under the reporting requirement, the buyer reports information about the purchase to the IRS, to the insurance company that issued the contract, and to the seller. The information reported by the buyer about the purchase is (1) the buyer's name, address, and taxpayer identification number ("TIN"), (2) the name, address, and TIN of each recipient of payment in the reportable policy sale, (3) the date of the sale, (4) the name of the issuer, and (5) the amount of each payment. The statement the buyer provides to any issuer of a life insurance contract is not required to include the amount of the payment or payments for the purchase of the contract.

Reporting of seller's basis in the life insurance contract

On receipt of a report described above, or on any notice of the transfer of a life insurance contract to a foreign person, the issuer is required to report to the IRS and to the seller (1) the name, address, and TIN of the seller or the transferor to a foreign person, (2) the basis of the contract (*i.e.*, the investment in the contract within the meaning of section 72(e)(6)), and (3) the policy number of the contract. Notice of the transfer of a life insurance contract to a foreign person is intended to include any sort of notice, including information provided for nontax purposes such as change of address notices for purposes of sending statements or for other purposes, or information relating to loans, premiums, or death benefits with respect to the contract.

Reporting with respect to reportable death benefits

When a reportable death benefit is paid under a life insurance contract, the payor insurance company is required to report information about the payment to the IRS and to the payee. Under this reporting requirement, the payor reports (1) the name, address and TIN of the person making the payment, (2) the name, address, and TIN of each recipient of a payment, (3) the date of each such payment, (4) the gross amount of the payment, and (5) the payor's estimate of the buyer's basis in the contract. A reportable death benefit means an amount paid by reason of the death of the insured under a life insurance contract that has been transferred in a reportable policy sale.

For purposes of these reporting requirements, a payment means the amount of cash and the fair market value of any consideration transferred in a reportable policy sale…

> **Scope of transfer for value rules**
>
> The provision provides that the exceptions to the transfer for value rules do not apply in the case of a transfer of a life insurance contract, or any interest in a life insurance contract, in a reportable policy sale. Thus, some portion of the death benefit ultimately payable under such a contract may be includable in income.

The last paragraph above, consistent with the statutory language, does not say that a reportable policy sale is an additional type of transfer that is subject to the transfer for value rule; rather, it says that the exceptions to the transfer for value rule do not apply when the transfer is also a reportable policy sale. Notwithstanding this lack of income tax effect of a reportable policy sale that is not a transfer for value, a reportable policy may be subject to additional reporting obligations, which are purely informational.[4347]

II.Q.4.b.ii.(a). Income Tax Effect of a Reportable Policy Sale

Below is a discussion of Reg. § 1.101-1, overhauled by REG-103083-18.

Part 6 of the preamble to the proposed regulations, REG-103083-18 (3/25/2019), "Section 1.101-1: Exclusion from Gross Income of Proceeds of Life Insurance Contracts Payable by Reason of Death," explains:

> Generally, amounts received under a life insurance contract that are paid by reason of the death of the insured are excluded from federal income tax under section 101(a)(1). However, if a life insurance contract is sold or otherwise transferred for valuable consideration, the "transfer for value rule" set forth in section 101(a)(2) limits the excludable portion of the amount paid by reason of the death of the insured. Section 101(a)(2) provides that the excludable amount following a transfer for valuable consideration generally may not exceed the sum of (1) The actual value of the consideration paid by the transferee to acquire the life insurance contract and (2) the premiums and other amounts subsequently paid by the transferee. Section 101(a)(2) provides two exceptions to this transfer for value rule. Specifically, the limitation set forth in section 101(a)(2) does not apply if (1) The transferee's basis in the contract is determined in whole or in part by reference to the transferor's basis in the contract or (2) the transfer is to the insured, to a partner of the insured, to a partnership in which the insured is a partner, or to a corporation in which the insured is a shareholder or officer.
>
> Section 13522 of the Act added section 101(a)(3) to the Code. Section 101(a)(3)(A) provides that these two exceptions shall not apply in the case of a transfer of a life insurance contract, or any interest therein, that is a reportable policy sale. Section 101(a)(3)(B) defines the term "reportable policy sale" to mean the acquisition of an interest in a life insurance contract, directly or indirectly, if the acquirer has no substantial family, business, or financial relationship with the insured apart from the acquirer's interest in such life insurance contract. For purposes of the preceding sentence, the term "indirectly" applies to the acquisition of an interest in a partnership, trust, or other entity that holds an interest in the life insurance contract.

[4347] For more about these nuances, see part II.Q.4.b.ii.(g) Transfer of Interest in an Entity Holding Life Insurance, especially fn 4395.

> The proposed regulations update § 1.101-1(a)(1) of the existing regulations to reflect the repeal of section 101(b) (treatment of employees' death benefits) in 1996, and the addition of section 7702 (definition of life insurance contract) in 1984, section 101(j) (treatment of certain employer-owned life insurance contracts) in 2006, and section 101(a)(3) (exception to valuable consideration rules for reportable policy sales) in 2017. The proposed regulations remove the second and third sentences of § 1.101-1(a)(1) of the existing regulations and add a sentence at the end of § 1.101-1(a)(1) to address the earlier changes in law. To address the changes in law made by the Act, the proposed regulations under section 101 provide updated rules for determining the amount of death benefits excluded from gross income following a transfer for value or gratuitous transfer, including a reportable policy sale, and provide definitions applicable under section 101. The proposed regulations under section 6050Y adopt the relevant definitions by cross-reference.

Part 6 of the preamble to the final regulations, T.D. 9879 (10/31/2019), "Comments and Changes Relating to § 1.101-1(a) of the Proposed Regulations," explains:

> The proposed regulations would remove the second sentence of § 1.101-1(a)(1) of the existing regulations, which states: "Death benefit payments having the characteristics of life insurance proceeds payable by reason of death under contracts, such as workmen's compensation insurance contracts, endowment contracts, or accident and health insurance contracts, are covered by this provision." As noted in the preamble to the proposed regulations, this update reflects the addition of section 7702 to the Code in 1984. See 84 FR 11015.
>
> One commenter stated that it is important that no changes be made with respect to the second sentence because the benefits described therein were written into older policies, some of which are still in effect, and changing the rules would negatively impact policyholders who have long relied on the appropriate exclusion of these death benefits from income. The commenter further stated that there is a longstanding and extensive body of court decisions and IRS rulings that establish the conditions under which such benefits qualify for treatment as life insurance proceeds.
>
> In response to these comments, the final regulations revise, rather than remove, the second sentence of § 1.101-1(a)(1) of the existing regulations to clarify that the sentence only applies to contracts issued on or before December 31, 1984, the effective date of section 7702.

Reg. § 1.101-1(a)(1) was changed by "Revising the second sentence of paragraph (a)(1), removing the third sentence of paragraph (a)(1), and adding a sentence at the end of paragraph (a)(1), as follows:

> … Death benefit payments having the characteristics of life insurance proceeds payable by reason of death under contracts, such as workmen's compensation insurance contracts, endowment contracts, or accident and health insurance contracts, issued on or before December 31, 1984, are covered by this provision…. If the life insurance contract is an employer-owned life insurance contract within the definition of section 101(j)(3), the amount to be excluded from gross income may be affected by the provisions of section 101(j).

Thus, Reg. § 1.101-1(a) now reads:

(1) *In general*. Section 101(a)(1) states the general rule that the proceeds of life insurance policies, if paid by reason of the death of the insured, are excluded from the gross income of the recipient. Death benefit payments having the characteristics of life insurance proceeds payable by reason of death under contracts, such as workmen's compensation insurance contracts, endowment contracts, or accident and health insurance contracts, issued on or before December 31, 1984, are covered by this provision. For provisions relating to death benefits paid by or on behalf of employers, see section 101(b) and § 1.101-2. The exclusion from gross income allowed by section 101(a) applies whether payment is made to the estate of the insured or to any beneficiary (individual, corporation, or partnership) and whether it is made directly or in trust. The extent to which this exclusion applies in cases where life insurance policies have been transferred for a valuable consideration is stated in section 101(a)(2) and in paragraph (b) of this section. In cases where the proceeds of a life insurance policy, payable by reason of the death of the insured, are paid other than in a single sum at the time of such death, the amounts to be excluded from gross income may be affected by the provisions of section 101(c) (relating to amounts held under agreements to pay interest) or section 101(d) (relating to amounts payable at a date later than death). See §§ 1.101-3 and 1.101-4. However, neither section 101(c) nor section 101(d) applies to a single sum payment which does not exceed the amount payable at the time of death even though such amount is actually paid at a date later than death. If the life insurance contract is an employer-owned life insurance contract within the definition of section 101(j)(3), the amount to be excluded from gross income may be affected by the provisions of section 101(j).[4348]

(2) *Cross references*. For rules governing the taxability of insurance proceeds constituting benefits payable on the death of an employee -

(i) Under pension, profit-sharing, or stock bonus plans described in section 401(a) and exempt from tax under section 501(a), or under annuity plans described in section 403(a), see section 72(m)(3) and paragraph (c) of § 1.72-16;

(ii) Under annuity contracts to which § 1.403(b)-3 applies, see § 1.403(b)-7. For the definition of a life insurance company, see section 801; or

(iii) Under eligible State deferred compensation plans described in section 457(b), see paragraph (c) of § 1.457-1.

Part 1.B. of the preamble to the final regulations, T.D. 9879 (10/31/2019), "Applicability Date for Section 101 Regulations," explains:

> Section 1.101-6(b) of the proposed regulations provides that, for purposes of section 6050Y, § 1.101-1(b), (c), (d), (e), (f), and (g) apply to reportable policy sales made after December 31, 2017, and to reportable death benefits paid after December 31, 2017. Section 1.101-6(b) of the proposed regulations further provides that, for any other purpose, § 1.101-1(b), (c), (d), (e), (f), and (g) apply to transfers of life

[4348] [my footnote:] For Code § 101(j), see part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance.

> insurance contracts, or interests therein, made after the date the Treasury decision adopting the proposed regulations as final regulations is published in the Federal Register.
>
> Several commenters requested clarification regarding the applicability dates set forth in § 1.101-6(b) of the proposed regulations. Two of these commenters requested that the Treasury Department and the IRS clarify that the rules issued with respect to section 101(a)(3) apply to all transfers of life insurance contracts, or interests therein, made after December 31, 2017, or alternatively, that the Treasury Department and the IRS allow taxpayers to rely upon the rules in § 1.101-1 of the proposed regulations for transactions undertaken after December 31, 2017, and before the date that the Treasury Department adopts final rules. Another commenter recommended that application of the rules under section 101 (as well as the reporting obligations under section 6050Y) be delayed until 60 days after the date the final regulations are published in the Federal Register, but suggested that language should be included in the preamble to the final regulations to provide that taxpayers may rely on the proposed regulations for the period prior to the effective date of the final regulations.
>
> Because the final regulations provide that the reporting obligations under section 6050Y apply to reportable policy sales and payments of reportable death benefits occurring after December 31, 2018, for purposes of determining whether a transfer of an interest in a life insurance contract is a reportable policy sale or a payment of death benefits is a payment of reportable death benefits subject to the reporting requirements of section 6050Y and §§ 1.6050Y-1 through 1.6050Y-4 of the final regulations, the definitions and rules set forth in § 1.101-1(b) through (g) of the final regulations apply to reportable policy sales made after December 31, 2018, and to reportable death benefits paid after December 31, 2018. See §§ 1.101-6(b) and 1.6050Y-1(b) of the final regulations.
>
> The final regulations provide that, for other purposes, specifically for purposes of determining the amount of the proceeds of life insurance contracts payable by reason of death excluded from gross income under section 101, § 1.101-1(b) through (g) of the final regulations apply to amounts paid by reason of the death of the insured under a life insurance contract, or interest therein, transferred after October 31, 2019. However, under section 7805(b)(7), a taxpayer may apply the rules set forth in § 1.101-1(b) through (g) of the final regulations, in their entirety, with respect to all amounts paid by reason of the death of the insured under a life insurance contract, or interest therein, transferred after December 31, 2017, and on or before October 31, 2019.

Reg. § 1.101-6(b) provides:

> Notwithstanding paragraph (a) of this section, for purposes of determining whether a transfer of an interest in a life insurance contract is a reportable policy sale or a payment of death benefits is a payment of reportable death benefits subject to the reporting requirements of section 6050Y and §§ 1.6050Y-1 through 1.6050Y-4, § 1.1011(b) through (g) apply to reportable policy sales made after December 31, 2018, and to reportable death benefits paid after December 31, 2018. For any other purpose, including for purposes of determining the amount of the proceeds of life insurance contracts payable by reason of death excluded from gross income under section 101, § 1.101-1(b) through (g) apply to amounts paid by reason of the death of the insured under a life insurance contract, or interest therein, transferred after October 31, 2019.

> However, under section 7805(b)(7), a taxpayer may apply the rules set forth in § 1.101-1(b) through (g) of the final regulations, in their entirety, with respect to all amounts paid by reason of the death of the insured under a life insurance contract, or interest therein, transferred after December 31, 2017, and on or before October 31, 2019.

Reg. § 1.101-1(b)(1)(i), "In general," (under (b)(1), "Transfer of an interest in a life insurance contract for valuable consideration") provides:

> In the case of a transfer of an interest in a life insurance contract for valuable consideration, including a reportable policy sale for valuable consideration, the amount of the proceeds attributable to the interest that is excludable from gross income under section 101(a)(1) is limited under section 101(a)(2) to the sum of the actual value of the consideration for the transfer paid by the transferee and the premiums and other amounts subsequently paid by the transferee with respect to the interest. For exceptions to this general rule for certain transfers for valuable consideration that are not reportable policy sales, see paragraph (b)(1)(ii) of this section. The application of section 101(d), (f) or (j), which is not addressed in paragraph (b) of this section, may further limit the amount of the proceeds excludable from gross income.

Before getting into the exceptions to the transfer-for-value rule, let's address the last sentence of Reg. § 1.101-1(b)(1)(i). Code § 101(d) provides that payments other than simply the death benefit on the date of death will be taxable. Code § 101(f) relates to "a flexible premium life insurance contract issued before January 1, 1985." Code § 101(j) relates to a policy owned by an employer of or business entity owned by an insured; see part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance.

Part 1.B.2 of the preamble to the final regulations, T.D. 9879 (10/31/2019), "Comments and Changes Relating to § 1.101-1(b) of the Proposed Regulations," explains:

> Generally, amounts received under a life insurance contract that are paid by reason of the death of the insured are excluded from gross income for Federal income tax purposes under section 101(a)(1). However, if a life insurance contract or interest therein is sold or otherwise transferred for valuable consideration, the "transfer for value rule" set forth in section 101(a)(2) limits the excludable portion of the amount received by reason of the death of the insured to the sum of the consideration paid for the contract or interest therein and any premiums and other amounts subsequently paid by the transferee with respect to the contract or interest therein. Section 101(a)(2)(A) and (B) provide two exceptions to this transfer for value rule. One exception (the "certain person exception") applies to transfers to the insured, a partner of the insured, a partnership in which the insured is a partner, or a corporation in which the insured is a shareholder or officer ("certain persons"). See section 101(a)(2)(B). The other exception (the "carryover basis exception") applies if the transferee's basis for determining gain or loss in the life insurance contract or interest therein is determined in whole or in part by reference to the transferor's basis in the contract or interest therein. See section 101(a)(2)(A). Under section 101(a)(3), which was added by section 13522 of the TCJA, neither of these exceptions to the transfer for value rule apply in the case of a transfer of a life insurance contract, or any interest therein, that is a reportable policy sale.
>
> Section 1.101-1(b)(1)(i) of the proposed regulations provides the general transfer for value rule set forth in section 101(a)(2). Section 1.101-1(b)(1)(ii) of the proposed regulations sets forth the exceptions from this general rule for transfers for valuable

consideration that are not reportable policy sales (the certain person exception and carryover basis exception provided in section 101(a)(2)). Section 1.101-1(b)(2) of the proposed regulations provides rules regarding gratuitous transfers of interests in life insurance contracts, as well as transfers of only a part of an interest in a life insurance contract and bargain sales of an interest in a life insurance contract (that is, transfers that are in part gratuitous and in part transfers for valuable consideration). This section of this Summary of Comments and Explanation of Revisions discusses comments received on § 1.101-1(b) of the proposed regulations.

A. Transfers to certain persons

One commenter on the proposed regulations described a life insurance policy subject to the section 101(a)(2) transfer for value rule as "tainted," in that death benefits paid under the policy are no longer fully excluded from income under section 101(a)(1). The commenter asked that the final regulations provide for removal of the "taint" by a transfer to the insured, as was permitted before the TCJA, and asked for clarification regarding whether a transfer of a policy to the insured must be a sale for fair market value to remove the "taint" of a transfer for valuable consideration. The commenter suggested that mistakes happen, including the mistake of not seeking tax advice from a professional who knows the section 101 rules, and that taxpayers should be able to take corrective measures to remove this "taint." The commenter noted that the insured may no longer have a business or other need for the current transferee to own the policy and may wish to hold the policy to protect the insured's family, or the insured may regret selling the policy and wish to buy the policy back after the policy was transferred in a reportable policy sale. The commenter pointed out that § 1.101-1(b)(3)(ii) of the existing regulations (not yet revised to reflect TCJA changes to section 101) currently provides such a corrective measure, allowing the "taint" to be removed by a transfer of the policy to certain persons. However, § 1.101-1(b)(1)(ii)(B)(2) of the proposed regulations makes this corrective measure unavailable to the extent that the transfer to those certain persons was preceded by a transfer of the policy for valuable consideration in a reportable policy sale. The commenter also noted that § 1.101-1(b)(3)(ii) of the existing regulations does not require the corrective transfer to be a sale for fair market value, and that § 1.101-1(b)(1)(ii)(B)(/) of the proposed regulations does not impose such a requirement. The commenter suggested that Example 1, Example 2, and Example 3 in § 1.101-1(g)(1), (2), and (3) of the proposed regulations, read together, however, appear to require that the transfer to the insured be a sale for fair market value to clear the "taint" of a prior transfer for valuable consideration. The commenter asked for clarification on this point. The commenter suggested that the transfer to the insured be available as a corrective measure even if that transfer was preceded by a reportable policy sale, and, to prevent any possible abuse, that the insured be required to pay fair market value if the policy previously had been transferred in a reportable policy sale.[4349]

Section 1.101-1(b)(1)(ii)(B)(/) of the proposed regulations does not explicitly require that the valuable consideration for a transfer of an interest in a life insurance contract be equal to the interest's fair market value, but, in the case of a bargain sale, the rules implementing the provisions of section 101 are applied separately to the sale and gift portions of the transferred interest. Under § 1.101-1(b)(2)(iii) of the proposed regulations, part of the transfer in a bargain sale is treated as a gratuitous transfer subject to § 1.101-1(b)(2)(i) of the proposed regulations. Example 1, Example 2, and Example 3 in § 1.101-

[4349] [My footnote:] I was that commenter.

1(g)(1), (2), and (3) of the proposed regulations are intended to illustrate the application of the rules implementing the changes made by the TCJA. For the sake of simplicity, the consideration in these examples equals fair market value, so the bargain sale rules do not apply. The final regulations include an example that illustrates the application of the bargain sale rules. See Example 7 in § 1.101-1(g)(7) of the final regulations.

In response to the comments received, the final regulations provide for a fresh start with respect to an interest gratuitously transferred to the insured, provided the interest has not previously been transferred for value in a reportable policy sale. See § 1.101-1(b)(2)(i) of the final regulations. Example 2 in § 1.101-1(g)(2) of the final regulations illustrates the application of this rule. The final regulations also provide for a fresh start with respect to an interest (or portion thereof) that is transferred to the insured following a reportable policy sale of the interest for valuable consideration, but only to the extent that the insured pays fair market value for the interest and only with respect to the interest (or relevant portion thereof) transferred to the insured that is not subsequently transferred in a transfer for valuable consideration or in a reportable policy sale. See § 1.101-1(b)(1)(ii)(B)(3) of the final regulations. The application of this rule is illustrated in revised Example 6, new Example 7, new Example 8, and new Example 9 in § 1.101-1(g)(6), (g)(7), (g)(8), and (g)(9) of the final regulations.

B. Gratuitous Transfers

Under § 1.101-1(b)(2)(i) of the proposed regulations, the amount of the policy proceeds attributable to a gratuitously transferred interest in a life insurance policy that is excludable from gross income under section 101(a)(1) is limited to the sum of the amount attributable to the gratuitously transferred interest that would have been excludable by the transferor if the transfer had not occurred, and the premiums and other amounts subsequently paid by the transferee with respect to the interest. Unlike the existing regulations, the proposed regulations do not provide a special rule for a gratuitous transfer made by or to certain persons.[1] As explained in the preamble to the proposed regulations, such a rule is not required by section 101(a), and a special rule for these transfers could be subject to abuse. *See* 84 FR 11009, 11017.

[1] Under § 1.101-1(b)(2) of the existing regulations, in the case of a gratuitous transfer, by assignment or otherwise, of a life insurance policy or any interest therein, the amount of the proceeds attributable to such policy or interest that is excludable from the transferee's gross income under section 101(a) is, as a general rule, limited to the sum of the amount which would have been excludable by the transferor if no such transfer had taken place and any premiums and other amounts subsequently paid by the transferee with respect to the interest. However, if the gratuitous transfer in question is made by or to the insured, a partner of the insured, a partnership in which the insured is a partner, or a corporation in which the insured is a shareholder or officer, the entire amount of the proceeds attributable to the policy or interest transferred is excludable from the transferee's gross income.

Section 1.101-1(b)(2)(i) of the proposed regulations applies to any gratuitous transfer of an interest in a life insurance contract, "including a reportable policy sale that is not for valuable consideration." One commenter requested that this language be deleted, asserting that including gratuitous transfers within the definition of reportable policy sales is not consistent with section 101.[2] The commenter noted that the title of section 101(a)(3) is "Exception to valuable consideration rules for commercial transactions," which the commenter asserted makes clear that a reportable policy sale can occur only if there has been a transfer for valuable consideration. The commenter further asserted that the provisions of section 101(a)(3)(A) and (B) limit the relevance of reportable policy sales to those situations in which a taxpayer needs to determine whether one of the section 101(a)(2) exceptions applies and, because those exceptions are never relevant for gratuitous transfers, reportable policy sales are never relevant for gratuitous transfers.

[2] The commenter also asserted that this language creates unnecessary and confusing reporting requirements under section 6050Y for gift transfers and is inconsistent with the statutory language, which, according to the commenter, indicates that a reportable policy sale must be a transfer for value. The commenter's concerns about reporting are discussed in section 10.A of this Summary of Comments and Explanation of Revisions.

The TCJA added section 101(a)(3)(A) to provide that the two pre-existing exceptions to the transfer for value rules no longer apply if the transfer is a reportable policy sale. Section 101(a)(3)(B) defines a reportable policy sale as any acquisition of an interest in a life insurance contract in the absence of the described relationship between the acquirer and insured. Although the availability of exceptions from the transfer for value rules is not directly relevant to a gratuitous transfer standing alone, the acquisition of an interest in a contract by an acquirer that does not have the described relationship with the insured, including a gratuitous transfer, may affect the exclusion of the policy proceeds from gross income under section 101(a) and the regulations thereunder if there are subsequent transfers. Consistent with the statutory language, the definition of a reportable policy sale in the final regulations does not exclude gratuitous transfers.

Reg. § 1.101-1(b)(2), "Other transfers," provides:

(i) *Gratuitous transfer of an interest in a life insurance contract*. To the extent that a transfer of an interest in a life insurance contract is gratuitous, including a reportable policy sale that is not for valuable consideration, the amount of the proceeds attributable to the interest that is excludable from gross income under section 101(a)(1) is limited to the sum of the amount of the proceeds attributable to the gratuitously transferred interest that would have been excludable by the transferor if the transfer had not occurred and the premiums and other amounts subsequently paid by the transferee with respect to the interest. However, if an interest in a life insurance contract is transferred gratuitously to the insured, and that interest has not previously been transferred for value in a reportable policy sale, the entire amount of the proceeds attributable to the interest transferred to the insured is excludable from gross income.

(ii) *Partial transfers*. When only part of an interest in a life insurance contract is transferred, the transferor's exclusion is ratably apportioned between or among the several parts. If multiple parts of an interest are transferred, the transfer of each part is treated as a separate transaction, with each transaction subject to the rule under paragraph (b) of this section that is applicable to the type of transfer involved.

(iii) *Bargain sales*. When the transfer of an interest in a life insurance contract is in part a transfer for valuable consideration and in part a gratuitous transfer, the transfer of each part is treated as a separate transaction for purposes of determining the amount of the proceeds attributable to the interest that is excludable from gross income under section 101(a)(1). Each separate transaction is subject to the rule under paragraph (b) of this section that is applicable to the type of transfer involved.

"Gratuitous" is not defined anywhere, but the context of Reg. § 1.101-1(b)(2) suggests that it means any transfer that is not for valuable consideration. Reg. § 1.101-1(f)(5), reproduced in the text accompanying fn 4331, refers to "cash or other consideration reducible to a money value." Reg. § 1.101-1(g)(9), Example (9)(i) treats a nontaxable exchange – a contribution to a partnership in exchange for a partnership interest under Code § 721(a)[4350] – as a transfer for valuable consideration.

The last sentence of Reg. § 1.101-1(b)(2)(i) is an important cleansing rule that the final regulations added after I asked for it. See part II.Q.4.b.ii.(e) Cleansing by Transfer Back to Insured.[4351]

Reg. § 1.101-1(b)(3), "Determination of amounts paid by the transferee," provides:

> For purposes of paragraphs (b)(1) and (2) of this section, in determining the amounts, if any, of consideration paid by the transferee for the transfer of an interest in a life insurance contract and premiums and other amounts subsequently paid by the transferee with respect to that interest, the amounts paid by the transferee are reduced, but not below zero, by amounts received by the transferee under the life insurance contract that are not received as an annuity, to the extent excludable from gross income under section 72(e).

II.Q.4.b.ii.(b). Interest in a Life Insurance Contract

The preamble to the proposed regulations explains:[4352]

> The proposed regulations provide that any transfer of an interest in a life insurance contract for cash or other consideration reducible to a money value is a transfer for valuable consideration. See § 1.101-1(f)(5) of the proposed regulations; see also § 25.2512-8 ("[a] consideration not reducible to a value in money or money's worth, as love and affection, promise of marriage, etc., is to be wholly disregarded"). An interest in a life insurance contract (also referred to as a life insurance policy) is held by any person that has taken title to or possession of the life insurance contract, in whole or part, for state law purposes, including any person that has taken title or possession as nominee for another person, or by any person that has an enforceable right to receive all or a part of the proceeds of the life insurance contract or to any other economic benefits of the insurance policy as described in § 20.2042-1(c)(2). See § 1.101-1(e)(1) of the proposed regulations. The enforceable right to designate a contract beneficiary is an interest in a life insurance contract. *Id.* Any person named as the owner in a life insurance contract generally is the owner (or an owner) of the contract and holds an interest in the contract. *Id.*

4350 See part II.M.3.a General Rule: No Gain Or Loss on Contribution to Partnership.
4351 Especially text accompanying fn 4390, as well as Example (2) that is discussed in the text accompanying fn 4384.
4352 Part 6 of the preamble REG-103083-18, "Section 1.101-1: Exclusion from Gross Income of Proceeds of Life Insurance Contracts Payable by Reason of Death."

> The transfer of an interest in a life insurance contract includes the transfer of any interest in the life insurance contract as well as any transfer of the life insurance contract itself (meaning a transfer of title to, possession of, or legal or beneficial ownership of the life insurance contract). See § 1.101-1(e)(2) of the proposed regulations. For instance, the creation of an enforceable right to receive all or a part of the proceeds of a life insurance contract constitutes the transfer of an interest in the life insurance contract. *Id.* However, the revocable designation of a beneficiary of the policy proceeds does not constitute a transfer of an interest in a life insurance contract to the beneficiary until the designation becomes irrevocable other than by reason of the death of the insured. *Id.* For purposes of this rule, a beneficiary designation is not revocable if the person with the right to designate the beneficiary of the contract has an enforceable contractual obligation to designate a particular contract beneficiary. The pledging or assignment of a policy as collateral security also is not a transfer of an interest in a life insurance contract. *Id.* In response to comments received on Notice 2018-41 suggesting that the initial owner of a life insurance contract should not be considered an "acquirer" for purposes of section 6050Y(a), § 1.101-1(e)(2) of the proposed regulations clarifies that the issuance of a life insurance contract to a policyholder, other than the issuance of a policy in an exchange pursuant to section 1035, is not a transfer of an interest in a life insurance contract.

Part 1.B.4 of the preamble to the final regulations, T.D. 9879 (10/31/2019), "Comments and Changes Relating to § 1.101-1(e) of the Proposed Regulations," explains:

> Section 1.101-1(e) of the proposed regulations defines the terms used to determine whether there has been an acquisition of an interest in a life insurance contract. This section of this Summary of Comments and Explanation of Revisions discusses comments that generally relate to the definitions in § 1.101-1(e) of the proposed regulations.
>
> **A. Interest in a Life Insurance Contract**
>
> Under § 1.101-1(e)(1) of the proposed regulations, an "interest in a life insurance contract" is generally defined as the interest held by any person that has taken title to or possession of the life insurance contract, in whole or part, for state law purposes, and the interest held by any person that has an enforceable right to receive all or a part of the proceeds of the life insurance contract or to any other economic benefits of the policy as described in § 20.2042-1(c)(2). Section 1.101-1(e)(2) of the proposed regulations provides that the term "transfer of an interest in a life insurance contract" means the transfer of any interest in the life insurance contract, including any transfer of title to, possession of, or legal or beneficial ownership of the life insurance contract itself. Under § 1.101-1(e)(3) of the proposed regulations, the acquisition of an interest in a life insurance contract may be direct or indirect, as described in § 1.101-1(e)(3)(i) (defining "direct acquisition of an interest in a life insurance contract") and (ii) (defining "indirect acquisition of an interest in a life insurance contract").
>
> One commenter on the proposed regulations suggested that, in a life settlement transaction in which a securities intermediary holds legal title to the acquired life insurance contract as nominee for the new beneficial owner of the life insurance contract pursuant to a securities account agreement, the new beneficial owner does not acquire an interest in the life insurance contract under § 1.101-1(e)(3) of the proposed regulations, even though the new beneficial owner controls and enjoys all of the benefits

of the life insurance policy, because the new beneficial owner neither acquires legal title to the life insurance policy nor holds an ownership interest in the securities intermediary holding legal title. However, under the proposed regulations, the new beneficial owner acquires an interest in the life insurance contract because it acquires control of all of the benefits of the life insurance policy. Any person that acquires an enforceable right to receive all or a part of the proceeds of the life insurance contract or to any other economic benefits of the policy as described in § 20.2042-1(c)(2) acquires an interest in the life insurance contract under § 1.101-1(e)(1) of the proposed regulations. In the situation described in the comment, after the life settlement transaction, there are two persons who have an interest in the life insurance contract at issue: the legal title holder and the new beneficial owner. Example 16 of § 1.101-1(g)(16) of the final regulations illustrates a reportable policy sale in which one acquirer acquires legal title and another acquires beneficial ownership.

B. Section 1035 Exchanges[4353]

Section 1.101-1(e)(2) of the proposed regulations provides that the issuance of a life insurance contract to a policyholder, other than the issuance of a policy in an exchange pursuant to section 1035, is not a transfer of an interest in a life insurance contract. The preamble to the proposed regulations requests comments on whether the proposed regulations should include additional provisions regarding the treatment of section 1035 exchanges of life insurance contracts. *See* 84 FR 11009, 11019.

One commenter on the proposed regulations recommended that no additional provisions be added to the proposed regulations for this circumstance. The commenter stated that the acquirer of a life insurance contract in a reportable policy sale would be unlikely to meet the requirements for an insurable interest in the insured and, consequently, would not be able to make a section 1035 exchange. In support of this position, the commenter explained that, in order for an exchange of policies to qualify as a section 1035 exchange, the owner of the new contract must be the same person who owned the old contract at the time of the exchange. The commenter also stated that an insurer can issue a new policy only when that new policy will meet state insurance laws requiring an insurable interest in the insured, and an insurable interest is generally based on a close familial relationship with the insured or a lawful and substantial financial interest in the continued life of the insured.

Another commenter recommended that the statement in § 1.101-1(e)(2) of the proposed regulations regarding section 1035 exchanges be deleted or amended to eliminate any suggestion that such transactions, by themselves, can lead to reportable policy sales. The commenter indicated that the statement suggests that the mere issuance of a new life insurance policy in a section 1035 exchange could (or perhaps would) give rise to a reportable policy sale and asserted that such treatment is unnecessary and would be inappropriate.

In support of this position, the commenter explained that, mechanically, a section 1035 exchange typically involves the assignment by the policyholder of the existing policy to the carrier, followed by the surrender of the policy and the application of the cash proceeds as a premium under a new policy issued to the same owner on the same

[4353] [My footnote – not in the preamble:] For why this exception may be perceived to be too narrow, see text accompanying fn 4364 in part II.Q.4.b.ii.(c) “Reportable Policy Sale”.

insured's life. The commenter remarked that, although the new carrier acquires an interest in the old policy, that interest is immediately extinguished. The commenter also remarked that treating the exchange as a reportable policy sale is not necessary to serve any information collection purpose in the case of an exchange involving a new, different carrier, because the exchange must be reported to the IRS and the policyholder on a Form 1099-R. Additionally, the commenter suggested that, even if an exchange were viewed as potentially meeting the definition of a reportable policy sale, the new carrier should be viewed as having a substantial business or financial relationship with the insured, considering that the carrier just issued a new policy on that individual's life.

The commenter suggested that, if there are specific transactions involving section 1035 exchanges that fall outside the normal situation described by the commenter, and the Treasury Department and the IRS determine that such atypical scenarios might give rise to reportable policy sales, the scope of any provision addressing those transactions should be limited to those particular transactions, so that doubt will not be cast on everyday policy exchanges.

The reference in § 1.101-1(e)(2) of the proposed regulations to section 1035 exchanges was not intended to imply that the transfer of a policy to an insurance company in a section 1035 exchange would be a reportable policy sale. In response to the comments received on section 1035 exchanges, § 1.101-1(c)(2)(iv) of the final regulations provides that the acquisition of a life insurance contract by an insurance company in an exchange pursuant to section 1035 (such as the acquisition that would result from the assignment by the policyholder of the existing policy to the insurance company in exchange for the issuance of a new life insurance contract) is not a reportable policy sale.

The concern prompting the reference in § 1.101-1(e)(2) of the proposed regulations to section 1035 exchanges related to the possibility that a policy transferred in a reportable policy sale subsequently could be exchanged for a new policy in an exchange pursuant to section 1035 and that, absent the reference in § 1.101-1(e)(2), the death benefits paid under the new policy might not be reported under section 6050Y(c). Under the final regulations, which adopt § 1.101-1(e)(2) of the proposed regulations as proposed, the issuance of a new life insurance contract to a policyholder in an exchange pursuant to section 1035 is a transfer of an interest in a life insurance contract (the newly issued life insurance contract) to the policyholder, which results in a direct acquisition of an interest in a life insurance contract (the newly issued life insurance contract) by the policyholder. *See* § 1.101-1(e)(2) and (3)(i) of the final regulations. The tax treatment of the newly issued life insurance contract under section 101 is not affected by the tax treatment of the policy for which it was exchanged. However, if the policyholder's acquisition of the newly issued contract constitutes a reportable policy sale, the rules generally applicable to reportable policy sales under section 101 and the regulations thereunder apply to determine the effect of the reportable policy sale on the tax treatment of the newly issued policy under section 101, and the rules generally applicable to reportable policy sales under section 6050Y and the regulations thereunder apply to determine whether section 6050Y reporting is required with respect to the reportable policy sale. The final regulations provide that the acquisition of a newly issued life insurance contract by a policyholder in an exchange pursuant to section 1035 is not a reportable policy sale, if the policyholder has a substantial family, business, or financial relationship with the insured, apart from its interest in the life insurance contract, at the time of the exchange. *See* § 1.101-1(c)(2)(v) of the final regulations. If no such relationship exists at the time of the section 1035 exchange, the exchange is a reportable policy sale under § 1.101-

1(c)(1) of the final regulations. The Treasury Department and the IRS have determined that no exception from the definition of reportable policy sale should apply in this situation. Based on comments received, this situation should rarely arise due to state law insurable interest requirements.

Should this situation arise, however, the policyholder, as an acquirer, must furnish the statement to the issuer required by section 6050Y(a)(2) and § 1.6050Y-2(d)(2) of the final regulations (the reportable policy sale statement or "RPSS"). *See* § 1.6050Y-2(f)(3) of the final regulations. In this case, the statement must be furnished to the issuer that issues the new life insurance contract. *See* § 1.6050Y-1(8)(ii) of the final regulations. However, the policyholder is not required to file the information return required by section 6050Y(a)(1) and § 1.6050Y-2(a) of the final regulations. *See* § 1.6050Y-2(f)(3). Also, because the policyholder is not only the acquirer, but is also the reportable policy sale payment recipient and the seller with respect to the reportable policy sale, the policyholder is not required to furnish the statement generally required to be furnished to the reportable policy sale payment recipient under § 1.6050Y-2(d)(1) of the final regulations. See § 1.6050Y-1(a)(15), (16), and (18) of the final regulations; § 1.6050Y-2(f)(3) of the final regulations. Additionally, although the issuer that issues the new life insurance contract receives an RPSS, it is not required to file a return or furnish a statement to the seller under section 6050Y(b) and § 1.6050Y-3 because the seller does not need the information that would be provided on the statement to properly report a section 1035 exchange. See § 1.6050Y-3(f)(3) of the final regulations.

However, if the issuer makes a payment of reportable death benefits under the newly issued life insurance contract, the issuer must report that payment under section 6050Y(c) and § 1.6050Y-4 of the final regulations, unless an exception under § 1.6050Y-4 applies.

C. Ordinary Course Trade or Business Acquisitions

Several commenters on Notice 2018-41 suggested that acquisitions of life insurance contracts, or interests therein, in ordinary course business transactions in which one trade or business acquires another trade or business that owns life insurance on the lives of former employees or directors should not be reportable policy sales. The proposed regulations include provisions that exclude certain of these transactions from the definition of reportable policy sales. These provisions include the definition of substantial business relationship in § 1.101-1(d)(2) of the proposed regulations, the special rule for indirect acquisitions in § 1.101-1(d)(4)(i) of the proposed regulations, and the definition of the term "indirect acquisition of an interest in a life insurance contract" in § 1.101-1(e)(3)(ii) of the proposed regulations.

Two commenters on the proposed regulations suggested that ordinary course business transactions (such as mergers or acquisitions) involving businesses that own life insurance contracts were not intended by Congress to fall within the meaning of a reportable policy sale and noted that the rules describing a reportable policy sale in the proposed regulations are very helpful in confirming that narrow intent. Another commenter stated that, although the legislative history does not elaborate on the intent of section 101(a)(3)(A) (which limits the carryover basis exception to transfers for value that fall outside the definition of reportable policy sale in section 101(a)(3)(B)), it is widely understood to be aimed at ensuring enforcement of the transfer for value rule with respect to newer forms of speculative transfers involving life insurance policies, rather than imposing new restrictions on legitimate business uses of life insurance. The commenter asserted that the preamble to the proposed regulations implicitly acknowledges this by stating that some provisions are meant to ensure that “certain ordinary course business transactions” will not be treated as reportable policy sales. In response to these comments supporting the ordinary course exclusions from the definition of reportable policy sales in the proposed regulations, those provisions are retained in the final regulations.

One commenter on the proposed regulations requested that the proposed regulations be revised to provide that any transfer of an interest in a life insurance contract as part of a tax-free reorganization conducted in the ordinary course of business is eligible for an exception to being treated as a reportable policy sale under section 101(a)(3)(B), regardless of whether the target survives the reorganization transaction. In this regard, the commenter recommended revising § 1.101-1(e)(3)(ii) of the proposed regulations, which defines the term “indirect acquisition of an interest in a life insurance contract,” to specifically cover all transactions involving the acquisition of a C corporation that qualify for tax-free reorganization treatment unless, immediately prior to the acquisition, more than 50 percent of the gross value of the assets of the C corporation consists of life insurance contracts. The commenter also recommended adding an example to illustrate this point. The commenter concluded that § 1.101-1(e)(3)(ii) of the proposed regulations applies in the case of acquisition transactions in which the corporate existence of the target survives the acquisition (for instance, a taxable stock sale with no section 338 election, a reverse subsidiary merger structured to qualify as a tax-free reorganization under section 368(a)(2)(E), or a tax-free reorganization under section 368(a)(1)(B)) and appears not to apply in the case of acquisition transactions in which the target corporation is merged with and into the acquiring corporation and the target’s separate corporate existence is terminated as of the merger date (for instance, a tax-free reorganization under section 368(a)(1)(A), (C), or (D) or section 368(a)(2)(D)).

Under § 1.101-1(e)(3)(ii) of the proposed regulations, an indirect acquisition of an interest in a life insurance contract occurs when a person (acquirer) becomes a beneficial owner of a partnership, trust, or other entity that holds (whether directly or indirectly) the interest in the life insurance contract. However, for this purpose, the term “other entity” does not include a C corporation, unless more than 50 percent of the gross value of the assets of the C corporation consists of life insurance contracts immediately before the indirect acquisition. Accordingly, the acquisition of ownership of a C corporation that owns an interest in a life insurance contract is not an indirect acquisition of such an interest, and therefore is not a reportable policy sale, if no more than 50 percent of the gross value of the assets of the C corporation consists of life insurance contracts. The commenter thus is correct that § 1.101-1(e)(3)(ii) of the proposed regulations applies only in the case of indirect acquisitions of life insurance contracts (which include a tax-free reorganization in which the corporate existence of the target that holds an interest in a life insurance contract survives the acquisition), and not direct acquisitions of life insurance contracts (which include a tax-free reorganization in which the separate corporate existence of a target that holds an interest in a life insurance contract is terminated).

The commenter asserted that this disparate treatment (between policies transferred directly in tax-free asset reorganizations and indirectly in stock reorganizations) is inappropriate and not warranted as a matter of good tax policy. The commenter further asserted that all tax-free reorganizations should be eligible for an exception similar to the exception provided in § 1.101-1(e)(3)(ii) of the proposed regulations. The commenter noted that the proposed regulations provide certain exceptions that could apply to tax-free mergers in which the target goes out of existence and the surviving corporation continues to hold the life insurance contract, but asserted that having to determine in these types of tax-free mergers whether a particular exception applies on a contract-by-contract basis is unduly complex and a trap for the unwary. The commenter further asserted that this burdensome exercise does not appear to serve the purpose of the change in the statute, which is to address abusive transactions and a failure to report income when appropriate.

The final regulations do not adopt the commenters recommendation regarding amendments to § 1.101-1(e)(3)(ii). The exception in § 1.101-1(e)(3)(ii) of the proposed regulations is not targeted to acquisitions of C corporation stock in tax-free reorganizations, but instead is a relatively broad exception that applies to the acquisition of any interest in a C corporation, provided that no more than 50 percent of the C corporation’s gross asset value consists of life insurance contracts. This exception is one of a number of exceptions in the proposed regulations intended to provide relief for indirect acquisitions in which acquisition of the underlying life insurance contract interest likely was not a significant motivating factor for the acquisition. The final regulations preserve the different results for stock and asset reorganizations because there are significant differences between these two types of reorganizations, and the Treasury Department and the IRS have concluded that those distinctions justify different treatment for purposes of sections 101 and 6050Y. In addition, no exception is provided in the final regulations that excludes reorganizations from the definition of a reportable policy sale. Rather, there are exclusions based on the application of the definitions of substantial relationships as mandated by the statute and exceptions for certain indirect acquisitions that may produce different results in different types of reorganizations.

One reason for treating indirect and direct acquisitions of life insurance contract interests differently is that an acquirer of an interest in an entity may have limited ability to determine what types of assets an entity owns, or to obtain from the entity information necessary to report on the entity’s assets. Thus, for example, the proposed regulations provide a reportable policy sale exception for the acquisition of a small (five percent or less) interest in any entity, unless more than 50 percent of the entity’s gross asset value consists of life insurance contracts. See § 1.101-1(c)(2)(iii)(B) of the proposed regulations. In addition, in the case of a C corporation, a corporate level income tax applies to corporate earnings in addition to income tax on distributions at the shareholder level. As a result, C corporations are not frequently used as vehicles for investing in life insurance contracts covering insureds with respect to which the corporation does not have a substantial business, financial, or family relationship at the time the contract is issued. For this reason, the proposed regulations provide a more generous exception for acquisitions of interests in a C corporation, provided that no more than 50 percent of the C corporation’s gross asset value consists of life insurance contracts, as determined under § 1.101-1(f)(4) of the proposed regulations. *See* § 1.101-1(e)(3)(ii) of the proposed regulations.[4]

[4] Section 1.101-1(f)(4) of the final regulations clarifies that the gross value of assets means, with respect to any entity, the fair market value of the entity’s assets, including assets beneficially owned by the entity under § 1.101-1(f)(1) of the final regulations as a beneficial owner of a partnership, trust, or other entity. Accordingly, the 50 percent test in § 1.101-1(e)(3)(ii) of the final regulations applies to a C corporation’s assets and

the assets held by any partnership, trust, or other entity beneficially owned by the C corporation.

After the TCJA amendments to section 101, the fact that the transfer of a life insurance contract occurs in a carryover basis transaction qualifying under section 101(a)(2)(A) (such as a tax-free reorganization) is no longer sufficient to avoid the limit on the amount of life insurance policy proceeds that are excludable from gross income under the section 101(a)(1) transfer for value rule. Rather, Congress provided that the carryover basis exception in section 101(a)(2)(A) does not apply unless the transferee also has a substantial family, business, or financial relationship with the insured. Under the proposed regulations, in the case of life insurance contracts transferred in an asset reorganization, the surviving corporation could, for example, establish that a substantial business relationship exists by determining that the life insurance policies transferred in the reorganization cover insureds who are key persons of, or materially participate in, an active trade or business of the acquirer as owners, employees, or contractors. *See* § 1.101-1(d)(2)(i) of the proposed regulations. The surviving corporation could also establish that a substantial business relationship exists by determining that the life insurance contracts cover insureds who either (i) are officers, directors or employees of the business being acquired immediately before the acquisition or (ii) previously were directors, highly compensated employees or highly compensated individuals within the meaning of section 101(j)(2)(A)(ii) and the surviving corporation will have ongoing financial obligations with respect to these individuals after the acquisition (such as retirement obligations). *See* § 1.101-1(d)(2)(ii) of the proposed regulations. Corporations must track this data annually for purposes of section 101(j) corporate owned life insurance (COLI) reporting obligations and related recordkeeping, so it should not be overly burdensome to obtain this information. Additionally, in an asset reorganization, it would in any case be necessary to review the life insurance contracts directly acquired on a contract-by-contract basis in order to update insurance contract ownership and beneficiary information with the relevant insurance company.

It is possible that an asset acquisition could result in the loss of the complete exclusion of death benefits from income with respect to some COLI policies that cover insureds who are not employed by the target immediately before the acquisition or employed by the acquirer after the acquisition and with respect to whom the acquirer has no ongoing obligations to pay retirement or other benefits. However, the Treasury Department and the IRS have not identified any clear policy reason why that tax benefit should carry over when ownership of the insurance policy is transferred. The indirect transfer exceptions in the proposed regulations that could permit COLI benefits to be retained with respect to some policies covering no-longer-connected officers, directors, and employees apply only when ownership of the insurance policy is not transferred, such as in a stock reorganization. These exceptions reflect a weighing by the Treasury Department and the IRS of information collection burdens versus potential for abuse in indirect acquisition scenarios.

The commenter also recommended modifying the language in Example 8 of § 1.101-1(g)(8) of the proposed regulations to clarify that the example is intended only to illustrate application of the rule under § 1.101-1(d) of the proposed regulations and is not intended to imply that, without the insured’s current employment by the acquired corporation, the transaction would be treated as a reportable policy sale. Example 8 of § 1.101-1(g)(8) of the proposed regulations describes a tax-free reorganization in which a corporation transfers to an acquiring corporation its active trade or business and a life insurance policy on the life of a current employee that was acquired from the employee. The example concludes that, because the insured was an employee of the target corporation at the time of the tax-free reorganization, and the acquiring corporation carries on the acquired trade or business, the transfer in the tax-free reorganization is not a reportable policy sale because the acquirer has a substantial business relationship with the insured under § 1.101-1(d)(2)(ii) of the proposed regulations. The commenter observed that the example suggests that the transfer of the policy as part of the tax-free reorganization described in the example would not have qualified for an exception from being treated as a reportable policy sale under the proposed regulations absent the existence of the substantial business relationship. The commenter's understanding of the example is correct. The substantial business relationship is necessary for the tax-free reorganization in the example to avoid being treated as a reportable policy sale. As discussed in this section of this Summary of Comments and Explanation of Revisions, the Treasury Department and the IRS have not adopted the commenter's recommendation regarding amendments to § 1.101-1(e)(3)(ii), and therefore have not revised the example in the final regulations.

This commenter also recommended a related change to § 1.101-1(d)(4)(i) of the proposed regulations. Under § 1.101-1(d)(4)(i) of the proposed regulations, an indirect acquirer is deemed to have a substantial business or financial relationship with the insured if the direct holder of the interest in the life insurance contract has a substantial business or financial relationship with the insured immediately before and after the date the indirect acquirer acquires its interest. Section 1.101-1(d)(4)(i) of the proposed regulations provides relief for acquirers who do not hold their interest in the relevant life insurance contracts directly, when the direct holder of those interests has a substantial business or financial relationship with the insured before and after the acquisition. The Department of Treasury and the IRS have determined that it is not appropriate to treat an indirect acquisition of an interest in a life insurance contract as a reportable policy sale when the direct owner of the interest in the life insurance contract does not change and the direct owner has a substantial family, business, or financial relationship with the insured. The commenter recommended modification of § 1.101-1(d)(4)(i) of the proposed regulations to eliminate what the commenter describes as disparate treatment that arises depending on the type of merger transaction the acquirer undertakes or whether after the merger the insured remains with the company or retains the right to retirement or other post-employment benefits.

First, the commenter observed that, in a tax-free merger in which the target goes out of existence, the direct holder of the life insurance contract no longer exists, and therefore would no longer have any relationship with the insured. Accordingly, the acquirer cannot be deemed to have a substantial business or financial relationship with the insured under § 1.101-1(d)(4)(i) of the proposed regulations. However, in a tax-free merger in which the target does not survive, § 1.101-1(d)(4)(i) of the proposed regulations would not apply because the acquirer would own the insurance contract directly. An acquirer that holds its interest in the relevant life insurance contract directly must determine whether it has a substantial family, business, or financial relationship with the insured under § 1.101-1(d) of the proposed regulations at the time of the acquisition.

Second, the commenter suggested that there are situations in which the insured's employment with the target company is terminated as a result of a merger or acquisition, and the insured has no continuing relationship with the surviving company that retains the life insurance contract. The commenter observed that, in such cases, the "after the date of the acquisition" prong of § 1.101-1(d)(4)(i) of the proposed regulations cannot be satisfied. The commenter recommended modifying § 1.101-1(d)(4)(i) of the proposed regulations to provide that the acquirer of an interest in a life insurance contract in a tax-free merger is deemed to have a substantial business or financial relationship with the insured if the target has a substantial business or financial relationship with the insured immediately prior to the merger, provided the acquirer does not otherwise transfer any interest in the life insurance contract in a transaction treated as a reportable policy sale. The commenter also recommended that the rule specifically state that the fact that the surviving company continues to hold, after the merger, the contract on the life of an individual with whom the target had a substantial financial or business relationship is the determinative factor under this modified rule.

The proposed modification is not adopted because, although § 1.101-1(d)(4)(i) of the proposed regulations generally would not apply to the situations referenced by the commenter, the proposed regulations already include exceptions that may apply in the situations referenced by the commenter. In a tax-free merger in which the target does not survive, § 1.101-1(d)(4)(i) of the proposed regulations would not apply because the acquirer would have a direct acquisition of any interest in a life insurance contract acquired from the target. However, the acquirer does not have a reportable policy sale if the acquirer has a substantial family, business, or financial relationship with the insured. Under § 1.101-1(d)(2)(ii) of the proposed regulations, the surviving company has a substantial business relationship with the insured, and therefore has not acquired its interest in the life insurance contract on the insured's life in a reportable policy sale, if: (1) the insured is an employee within the meaning of section 101(j)(5)(A) of the acquired trade or business immediately preceding the acquisition, and (2) the surviving company either carries on the acquired trade or business or uses a significant portion of the acquired business assets in an active trade or business that does not include investing in interests in life insurance contracts. Accordingly, the proposed regulations already include a rule similar to the one requested by the commenter that is applicable to direct acquisitions of interests in life insurance contracts (such as acquisitions resulting from tax-free mergers in which the target does not survive).

REG-108054-21, Information Reporting and Transfer for Valuable Consideration Rules for Section 1035 Exchanges of Life Insurance and Certain Other Life Insurance Contract Transactions (5/09/2023) describes how the regulations it proposes softens the approach to Code § 1035 exchanges:

Explanation of Provisions

Section 1035 Exchanges

As stated in the preamble to the final regulations, the concern prompting the references to section 1035 exchanges in the 2019 proposed regulations and the final regulations related to the possibility that a policy transferred in a reportable policy sale subsequently could be exchanged for a new policy in an exchange pursuant to section 1035 and that the death benefits paid under the new policy might not be reported under section 6050Y(c). See 84 FR 58460, 58465. The section 1035 exchange provisions were not intended to change the treatment under section 101 of the policyholder's new contract if the policyholder's old contract was never transferred in a reportable policy sale.

However, the Treasury Department and the IRS have determined that such a change was inadvertently effected by the final regulations. Prior to the issuance of the final regulations, the transfer for value rule of section 101(a)(2) did not apply as the result of a section 1035 exchange of a life insurance contract by the original policyholder of the contract. However, under § 1.101-1(e)(2) of the final regulations, the issuance of a new policy in a section 1035 exchange is a transfer of an interest in a life insurance contract. Because the new policy is issued in exchange for an old policy, the exchange is a transfer for valuable consideration under § 1.101-1(f)(5) of the final regulations. Therefore, the new policy is subject to the transfer for value rule of section 101(a)(2), unless one of the exceptions in section 101(a)(2)(A) and (B) applies. For either exception to apply, there must be a substantial business, family, or financial relationship between the insured and the acquirer of the new policy. The Treasury Department and the IRS have determined that the carryover basis exception of section 101(a)(2)(A) would not apply in this case.[5] Therefore, the application of the transfer for value rule would generally limit the amount of death benefits excludable under section 101(a)(1), even in the absence of a reportable policy sale, unless one of the section 101(a)(2)(B) exceptions applies (that is, the transfer is to the insured, to a partner of the insured, to a partnership in which the insured is a partner, or to a corporation in which the insured is a shareholder or officer). The Treasury Department and the IRS have determined that this result is inconsistent with the prior treatment of new policies issued in section 1035 exchanges.

[5] The Code recognizes two categories of substituted basis property: transferred basis property and exchanged basis property. See section 7701(a)(42). Property has a "transferred basis" for Federal tax purposes when the same property is transferred from one person to another but keeps the same basis. See section 7701(a)(43). Property has an "exchanged basis" for Federal tax purposes when a person's basis in new property is determined by reference to other property held by that same person. See section 7701(a)(44). The section 101(a)(2) "carryover basis" exception applies to a transfer if the transferred life insurance contract or interest therein has a basis for determining gain or loss in the hands of a transferee determined in whole or in part by reference to such basis of such contract or interest therein in the hands of the transferor. That is, the exception applies if the contract is transferred basis property. However, the basis of a new policy issued in a section 1035 exchange to the same taxpayer is the same as the basis of the old policy held by that taxpayer, decreased in the amount of any money received by the taxpayer and increased in the amount of gain or decreased in the amount of loss to the taxpayer that was recognized on such exchange. See sections 1035(d)(2) and 1031(d). The new policy is thus exchanged basis property, not transferred basis property. It is therefore ineligible for the carryover basis exception of section 101(a)(2)(A).

Accordingly, the proposed regulations are intended to correct the unintended change effected by the final regulations to the treatment under section 101 of a life insurance contract issued to a policyholder in a section 1035 exchange, while continuing to address the concern that the reporting of death benefits paid under section 6050Y(c) could be avoided by exchanging a policy transferred in a reportable policy sale for a new policy in a section 1035 exchange, as well as the concern that a policyholder could attempt to avoid the limitation on the excludability of death benefits resulting from the application of the transfer for value rule through a section 1035 exchange. The proposed regulations would accomplish these objectives by revising the final regulations in four ways.

1. Modify definition of a transfer of an interest in a life insurance contract

First, proposed § 1.101-1(e)(2) would revise the definition of a transfer of an interest in a life insurance contract in § 1.101-1(e)(2) of the final regulations to exclude the issuance of a life insurance contract to a policyholder, without qualification. As such, any issuance of a life insurance contract to a policyholder, including in a section 1035 exchange, is not a transfer of an interest in a life insurance contract and therefore cannot be a reportable policy sale under § 1.101-1(c)(1) of the final regulations. The Treasury Department and the IRS do not view this position as inconsistent with the purpose of section 101(j). See Public Law 109-280, §863(d), 120 Stat. 780, 1024 (2006) (providing that section 101(j) generally applies to life insurance contracts issued after August 17, 2006, “except for a contract issued after such date pursuant to an exchange described in section 1035...for a contract issued on or prior to that date”); Notice 2009- 48, 2009-1 C.B. 1085 (providing that further notice and consent is not required by section 101(j) with regard to a contract received in a section 1035 exchange for an employer-owned life insurance contract issued after August 17, 2006, for which the notice and consent requirements were previously satisfied if either (1) the existing consent remains valid, or (2) the exchange does not result in a material change in the death benefit or other material change in the contract).

The proposed regulations make conforming changes to remove the exception in § 1.101-1(c)(2)(v) of the final regulations (providing that the acquisition of a life insurance contract by a policyholder in a section 1035 exchange is not a reportable policy sale if the policyholder has a substantial family, business, or financial relationship with the insured, apart from its interest in the life insurance contract, at the time of the exchange); to remove §§ 1.6050Y-2(f)(3) and 1.6050Y-3(f)(3) of the final regulations (providing certain reporting requirement exceptions related to section 1035 exchanges that are no longer necessary); and to remove § 1.6050Y-1(a)(8)(ii) of the final regulations (providing a definitional rule related to section 1035 exchanges that is no longer necessary).

2. New rule addressing section 1035 exchanges

Second, proposed § 1.101-1(b)(2)(iv) provides a new rule that would apply to the exchange of an interest in a life insurance contract (old interest) in a section 1035 exchange for an interest in a newly issued life insurance contract (new interest) and provides guidance on how to determine the amount of the proceeds attributable to the new interest that is excludable from gross income under section 101(a), provided the new interest is not subsequently transferred or exchanged. If the new interest is subsequently transferred or exchanged, the amount excludable from gross income under section 101(a) would be determined under the rule in § 1.101-1(b) applicable to the type of transfer or exchange involved. The limitation (or lack of any limitation) on the amount of the proceeds attributable to the old interest that is excludable from gross income applies under proposed § 1.101-1(b)(2)(iv) to the new interest for which it is exchanged, just as the basis of the old interest applies to the new interest. See sections 1031(d) and 1035(d)(2) (providing that a contract acquired in a section 1035 exchange has the same basis as the contract for which it was exchanged). The IRS has previously treated certain attributes of contracts exchanged in section 1035 exchanges as applying to the new contracts acquired. See, e.g., Rev. Rul. 92-95, 1992-2 C.B. 43 (for purposes of section 72(q)(2)(I) and 72(u)(4), the “date of purchase” of an annuity contract acquired in a section 1035 exchange for another annuity contract is the date of purchase of the annuity contract that was exchanged for the new contract). See also section 7702A(a)(2) (defining a modified endowment contract to include any contract exchanged for a contract that is a modified endowment contract under section 7702A(a)(1)).

Proposed § 1.101-1(b)(2)(iv) ensures that the acquirer of an interest in a life insurance contract in a reportable policy sale cannot avoid any limit imposed by section 101(a)(2) and (a)(3) on the amount of the proceeds attributable to the interest that is excludable from gross income under section 101(a)(1) by simply exchanging the interest for a new life insurance contract. Under proposed § 1.101-1(b)(2)(iv)(A), if the entire amount of the proceeds attributable to the old interest would have been excludable from gross income under section 101(a) at the time of the section 1035 exchange, the entire amount of the proceeds attributable to the new interest is excludable from gross income. Under proposed § 1.101-1(b)(2)(iv)(B), if less than the entire amount of the proceeds attributable to the old interest would have been excludable from gross income under section 101(a) at the time of the section 1035 exchange, the amount of the proceeds attributable to the new interest that is excludable from gross income is limited to the sum of the amount of the proceeds attributable to the old interest that would have been excludable at the time of the section 1035 exchange, and the premiums and other amounts subsequently paid with respect to the new interest by the policyholder. Proposed § 1.101-1(b)(2)(iv)(B) also provides that, when determining the premiums and other amounts subsequently paid by the policyholder with respect to the new interest, the amounts paid by the policyholder are reduced, but not below zero, by amounts received by the policyholder under the new life insurance contract that are not received as an annuity, to the extent excludable from gross income under section 72(e). The proposed regulations also make conforming changes to § 1.101-1(a)(1) of the final regulations and the headings of § 1.101-1(b) and (b)(2) of the final regulations to reflect the addition of proposed § 1.101-1(b)(2)(iv). The proposed regulations also add two examples to illustrate the application of the rules set forth in proposed § 1.101-1(b)(2)(iv). See proposed § 1.101-1(g)(17) and (18).

3. Modification to definition of reportable policy sale

Third, the proposed regulations would modify the definition of “reportable policy sale” to address section 1035 exchanges. Specifically, proposed § 1.101-1(c)(3) addresses situations in which an old interest is exchanged in a section 1035 exchange for a new interest, and the old interest was previously transferred for valuable consideration in a reportable policy sale or is treated, under proposed § 1.101-1(c)(3), as an interest in a life insurance contract that was previously transferred for valuable consideration in a reportable policy sale. In such cases, the new interest is treated, for purposes of § 1.101-1, as an interest in a life insurance contract that was previously transferred for valuable consideration in a reportable policy sale. Under the proposed rule, the old interest’s attribute of having been previously transferred for valuable consideration in a reportable policy sale applies to the new interest acquired in a section 1035 exchange. Whether or not an interest in a life insurance policy was previously transferred in a reportable policy sale is relevant for the purpose of determining the applicability of certain provisions in the final regulations. See, e.g., § 1.101-1(b)(1)(ii)(B)(1) of the final regulations (applies only if the interest was not previously transferred for valuable consideration in a reportable policy sale); § 1.101- 1(b)(1)(ii)(B)(2) and (3) of the final regulations (apply if the interest was previously transferred for valuable consideration in a reportable policy sale); § 1.101-1(b)(2)(i) of the final regulations (includes a special rule for interests that have not previously been transferred for value in a reportable policy sale). The Treasury Department and the IRS have previously treated (and continue to treat) other attributes of contracts exchanged in section 1035 exchanges as applying to the new contracts acquired, so the new contract is treated the same as the old contract. See, e.g., Rev. Rul. 92-95. Similarly, the proposed rule ensures that the new interest is treated the same as the old interest when applying rules that consider whether an interest in a life insurance contract was previously transferred in a reportable policy sale. See proposed § 1.101-1(c)(3). Proposed § 1.101-1(c)(3) also provides that, for purposes of §§ 1.6050Y-3 and 1.6050Y-4, the section 1035 exchange is treated as the transfer of an interest in the life insurance contract in a reportable policy sale if the old interest previously was transferred for valuable consideration in a reportable policy sale (or is treated, under proposed § 1.101-1(c)(3), as an interest in a life insurance contract that previously was transferred for valuable consideration in a reportable policy sale). Accordingly, the designation of death benefits as reportable death benefits is an attribute that transfers from the old interest to the new interest in a section 1035 exchange. See also proposed § 1.6050Y-1(a)(12). The Treasury Department and the IRS previously have treated other attributes of contracts exchanged in section 1035 exchanges as transferring to the new contracts acquired. In this case, the proposed rule ensures that death benefits under the new interest are treated the same as under the old interest for purposes of reporting under section 6050Y(c) and § 1.6050Y-4. These rules are necessary to ensure that the acquirer of an interest in a life insurance contract in a reportable policy sale cannot avoid the designation of the death benefits as reportable death benefits and the associated reporting of the payment of the reportable death benefits by simply exchanging the interest for a new life insurance contract. The proposed regulations also make conforming changes to § 1.101-1(c)(1) of the final regulations to reflect the addition of proposed § 1.101-1(c)(3).

The preamble explains that taxpayers can choose to rely on the proposed regulations – possibly even retroactively to when the reportable policy sale rule first became effective:

Applicability Dates

Proposed §§ 1.101-1(b)(2)(iv) and (c)(3) are proposed to apply to section 1035 exchanges occurring on or after the date the Treasury decision adopting these regulations as final regulations is published in the Federal Register, and proposed § 1.101-1(c)(2)(v) is proposed to apply to any acquisition of an interest in a life insurance contract occurring on or after the date the Treasury decision adopting these regulations as final regulations is published in the Federal Register. See proposed § 1.101-6(c). However, it is proposed that a taxpayer may choose to apply § 1.101-1(b)(2)(iv), (c)(2)(v), and (c)(3) of the regulations set forth in the Treasury decision adopting these regulations as final regulations to all section 1035 exchanges and acquisitions occurring after December 31, 2017, and before the date of publication of the Treasury decision adopting these rules as final regulations in the Federal Register. See section 7805(b)(7) of the Code. Alternatively, a taxpayer may rely on proposed § 1.101- 1(b)(2)(iv), (c)(2)(v), and (c)(3) for all section 1035 exchanges and acquisitions occurring after December 31, 2017, and before the date of publication of the Treasury decision adopting these rules as final regulations in the Federal Register.

The reporting obligations under proposed § 1.6050Y-3 are proposed to apply to any section 1035 exchange treated as a reportable policy sale under proposed § 1.101-1(c)(3) if the exchange occurs on or after the date the Treasury decision adopting these regulations as final regulations is published in the Federal Register. See proposed § 1.6050Y-1(b)(2). The reporting obligations under proposed § 1.6050Y-4 are proposed

> to apply to reportable death benefits paid with respect to an interest in a life insurance contract issued in a section 1035 exchange treated as a reportable policy sale under proposed § 1.101-1(c)(3) if the exchange occurs on or after the date the Treasury decision adopting these regulations as final regulations is published in the Federal Register. See proposed § 1.6050Y-1(b)(2). Any person with a reporting obligation under proposed § 1.6050Y-3 or proposed § 1.6050Y-4 may, however, rely on the proposed regulations with respect to all section 1035 exchanges occurring after May 10, 2023, and before the date of publication of the Treasury decision adopting these rules as final regulations in the Federal Register.

Reg. § 1.101-1(e)(1), "Definition," provides:[4354]

> For purposes of this section and section 6050Y, the term interest in a life insurance contract means the interest held by any person that has taken title to or possession of the life insurance contract (also referred to as a life insurance policy), in whole or part, for state law purposes, including any person that has taken title or possession as nominee for another person, and the interest held by any person that has an enforceable right to receive all or a part of the proceeds of a life insurance contract or to any other economic benefits of the policy as described in § 20.2042-1(c)(2) of this chapter, such as the enforceable right to designate a contract beneficiary. Any person named as the owner in the life insurance contract generally is the owner (or an owner) of the contract and holds an interest in the contract.

Reg. § 20.2042-1(c)(2) is reproduced in part II.Q.4.i.ii Summary of Estate Tax Rules Governing Life Insurance Payable to a Business Entity.

What happens when more than one person is named in a contract/policy as holding title or has possession? How does one define each person's interest? Presumably, one would review part II.Q.4.f Split-Dollar Arrangements.

Reg. § 1.101-1(e)(2), "Transfer of an interest in a life insurance contract," provides:

> For purposes of this section and section 6050Y, the term transfer of an interest in a life insurance contract means the transfer of any interest in the life insurance contract, including any transfer of title to, possession of, or legal or beneficial ownership of the life insurance contract itself. The creation of an enforceable right to receive all or a part of the proceeds of a life insurance contract constitutes the transfer of an interest in the life insurance contract. The following events are not a transfer of an interest in a life insurance contract: the revocable designation of a beneficiary of the policy proceeds (until the designation becomes irrevocable other than by reason of the death of the insured); the pledging or assignment of a policy as collateral security; and the issuance of a life insurance contract to a policyholder, other than the issuance of a policy in an exchange pursuant to section 1035.

[4354] Part II.Q.4.b.ii.(g) Transfer of Interest in an Entity Holding Life Insurance discusses an interest in a life insurance contact under Reg. § 1.101-1(e)(1) in the text accompanying fn 4394.

The preamble to the proposed regulations explains:[4355]

> Under § 1.101-1(e)(3)(i) of the proposed regulations, the transfer of an interest in a life insurance contract results in the direct acquisition of the interest by the transferee (acquirer). Under § 1.101-1(e)(3)(ii) of the proposed regulations, an indirect acquisition of an interest in a life insurance contract occurs when a person (acquirer) becomes a beneficial owner of a partnership, trust, or other entity that holds (directly or indirectly) an interest in the life insurance contract. For this purpose, the term "other entity" does not include a C corporation (as that term is defined in section 1361(a)(2)), unless more than 50 percent of the gross value of the assets of the C corporation (as determined under § 1.101-1(f)(4)) consists of life insurance contracts immediately before the indirect acquisition. Under § 1.101-1(f)(1) of the proposed regulations, a "beneficial owner" of a partnership, trust, or other entity is an individual or C corporation with an ownership interest in that partnership, trust, or other entity. The beneficial owner's interest may be held directly or indirectly, through one or more other partnerships, trusts, or other entities.
>
> Accordingly, under § 1.101-1(e)(3)(ii) of the proposed regulations, persons that acquire shares in a C corporation that holds an interest in a life insurance contract generally will not be considered to have an indirect acquisition of an interest in such contract. However, if the C corporation primarily owns life insurance contracts (or interests therein), any person that acquires shares in the C corporation will be considered to have an indirect acquisition of an interest in any life insurance contract held by the C corporation.

Reg. § 1.101-1(e)(3), "Acquisition of an interest in a life insurance contract," provides:[4356]

> For purposes of this section and section 6050Y, the acquisition of an interest in a life insurance contract may be direct or indirect.
>
> (i) *Direct acquisition of an interest in a life insurance contract*. For purposes of this section and section 6050Y, the transfer of an interest in a life insurance contract results in the direct acquisition of the interest by the transferee (acquirer).
>
> (ii) *Indirect acquisition of an interest in a life insurance contract*. For purposes of this section and section 6050Y, an indirect acquisition of an interest in a life insurance contract occurs when a person (acquirer) becomes a beneficial owner of a partnership, trust, or other entity that holds (whether directly or indirectly) the interest (whether legal or beneficial) in the life insurance contract. For purposes of this paragraph (e)(3)(ii), the term other entity does not include a C corporation, unless more than 50 percent of the gross value of the assets of the C corporation consists of life insurance contracts (as determined under paragraph (f)(4) of this section) immediately before the indirect acquisition.

[4355] Part 6 of the preamble REG-103083-18, "Section 1.101-1: Exclusion from Gross Income of Proceeds of Life Insurance Contracts Payable by Reason of Death."
[4356] For the significance of indirect acquisitions under Reg. § 1.101-1(e)(3)(ii), see text accompanying fn 4396 in part II.Q.4.b.ii.(g) Transfer of Interest in an Entity Holding Life Insurance. Certain indirect acquisitions that are not treated as reportable policy sales are described in Reg. § 1.101-1(c)(2)(iii), which is reproduced in the text accompanying fn 4363 in part II.Q.4.b.ii.(c) "Reportable Policy Sale" Defined.

Elaborating on clause (ii) above, the preamble to the proposed regulations explains:[4357]

> Finally, in response to comments received on Notice 2018-41, certain indirect acquisitions of life insurance contracts, or interests in life insurance contracts, are excepted from the definition of a reportable policy sale. The limited definition of "indirect acquisition" under § 1.101-1(e)(3)(ii) of the proposed regulations means that shareholders acquiring an interest in a C corporation that holds an interest in one or more life insurance contracts will not be considered to have an indirect acquisition or reportable policy sale unless the C corporation primarily owns life insurance contracts (or interests therein). The proposed regulations also provide an exception from the definition of a reportable policy sale for an indirect acquisition of an interest in a life insurance contract if the direct holder of the interest acquired the interest in a reportable policy sale and reported the acquisition in compliance with section 6050Y(a) and § 1.6050Y-2 of the proposed regulations. See § 1.101-1(c)(2)(iii)(A) of the proposed regulations. Also, the indirect acquisition of an interest in a life insurance contract is not a reportable policy sale if (1) Immediately before the acquisition, no more than 50 percent of the gross value of the assets of the entity that directly holds the interest in the life insurance contract consists of life insurance contracts, and (2) the acquirer and his or her family members own five percent or less of the ownership interests in the entity that directly holds the interest in the life insurance contract. See § 1.101-1(c)(2)(iii)(B) of the proposed regulations. Section 1.101-1(f)(4) of the proposed regulations provides rules regarding the determination of the gross value of assets for this purpose.

Reg. § 1.101-1(f)(2), "C corporation," provides:

> The term C corporation has the meaning given to it in section 1361(a)(2).

Code § 1361(a)(2) is reproduced in fn 1774.

Reg. § 1.101-1(f)(4), "Gross value of assets," provides:

> (i) *Determination of gross value of assets*. Except as provided in paragraph (f)(4)(ii) or (iii) of this section, for purposes of paragraphs (c)(2)(iii)(B) and (e)(3)(ii) of this section, the term gross value of assets means, with respect to any entity, the fair market value of the entity's assets, including assets beneficially owned by the entity under paragraph (f)(1) of this section as a beneficial owner of a partnership, trust, or other entity.
>
> (ii) *Determination of gross value of assets of publicly traded entity*. For purposes of determining the gross value of assets of an entity that is publicly traded, if the entity's annual Form 10-K filed with the United States Securities and Exchange Commission (or equivalent annual filing if the entity is publicly traded in a non-U.S. jurisdiction) for the period immediately preceding a person's acquisition of an ownership interest in the entity does not contain information demonstrating that more than 50 percent of the gross value of the entity's assets consist of life insurance contracts, that person may assume that no more than 50 percent of the gross value of the entity's assets consists of life insurance contracts, unless that person has actual knowledge or

[4357] Part 6 of the preamble REG-103083-18, "Section 1.101-1: Exclusion from Gross Income of Proceeds of Life Insurance Contracts Payable by Reason of Death."

reason to know that more than 50 percent of the gross value of the entity's assets consists of life insurance contracts.

(iii) *Safe harbor definition of gross value of assets*. An entity may choose to determine the gross value of all the entity's assets for purposes of this section using the following alternative definition of gross value of assets:

(A) In the case of assets that are life insurance policies or annuity or endowment contracts that have cash values, the cash surrender value as defined in section 7702(f)(2)(A); and

(B) In the case of assets not described in paragraph (f)(4)(iii)(A) of this section, the adjusted bases (within the meaning of section 1016) of such assets.

II.Q.4.b.ii.(c). "Reportable Policy Sale" Defined

What is a "reportable policy sale" is important to determine whether a transfer for valuable consideration will cause a policy's death benefit to lose its income tax exclusion[4358] and for whether certain reporting must be done.[4359]

The preamble to the proposed regulations explains:[4360]

> Section 1.101-1(c) of the proposed regulations defines the term "reportable policy sale," which was introduced in section 101(a)(3). The proposed regulations provide that, as a general matter, any direct or indirect acquisition of an interest in a life insurance contract is a "reportable policy sale" if the acquirer has, at the time of the acquisition, no substantial family, business, or financial relationship with the insured apart from the acquirer's interest in that life insurance contract. See § 1.101-1(c)(1) of the proposed regulations.

Reg. § 1.101-1(c) describes what is a reportable policy sale.

Reg. § 1.101-1(c)(1), "In general," provides:[4361]

> Except as provided in paragraph (c)(2) of this section, a reportable policy sale for purposes of this section and section 6050Y is any direct or indirect acquisition of an interest in a life insurance contract if the acquirer has, at the time of the acquisition, no substantial family, business, or financial relationship with the insured apart from the acquirer's interest in the life insurance contract.

[4358] See part II.Q.4.b.ii.(a) Income Tax Effect of a Reportable Policy Sale, as well as most of the rest of this part II.Q.4.b.ii The Impact of Reportable Policy Sale on Transfer for Value Rule.
[4359] See part II.Q.4.b.ii.(f) Reporting Requirements for Reportable Policy Sales.
[4360] Part 6 of the preamble REG-103083-18, "Section 1.101-1: Exclusion from Gross Income of Proceeds of Life Insurance Contracts Payable by Reason of Death."
[4361] Reg. § 1.101-1(e)(3)(ii) defines "indirect acquisition" and is reproduced in the text accompanying fn 4356 in part II.Q.4.b.ii.(b) Interest in a Life Insurance Contract.

The preamble to the proposed regulations explains exceptions:[4362]

> The proposed regulations also provide several exceptions from the definition of reportable policy sale. The proposed regulations provide that the transfer of an interest in a life insurance contract between certain related entities is not a reportable policy sale. Specifically, a transfer between entities with the same beneficial owners is not a reportable policy sale if the ownership interest of each beneficial owner in each entity does not vary by more than a 20 percent ownership interest. See § 1.101-1(c)(2)(i) and (g)(10) of the proposed regulations. Also, a transfer between corporations that are members of an affiliated group (as defined in section 1504(a)) that files a consolidated U.S. tax return for the taxable year in which the transfer occurs is not a reportable policy sale. See § 1.101-1(c)(2)(ii) of the proposed regulations.

Part 1.B.3 of the preamble to the final regulations, T.D. 9879 (10/31/2019), "Comments and Changes Relating to § 1.101-1(c) of the Proposed Regulations," explains:

> Under section 101(a)(3)(B) and § 1.101-1(c)(1) of the proposed regulations, a reportable policy sale is, as a general matter, any direct or indirect acquisition of an interest in a life insurance contract if the acquirer has, at the time of the acquisition, no substantial family, business, or financial relationship with the insured apart from the acquirer's interest in the life insurance contract. Exceptions to the definition of reportable policy sale for transfers between certain related entities are provided in § 1.101-1(c)(2)(i) and (ii) of the proposed regulations. Section 1.101-1(c)(2)(iii) of the proposed regulations sets forth exceptions from the definition of reportable policy sales for certain indirect acquisitions. This section of this Summary of Comments and Explanation of Revisions discusses comments received on § 1.101-1(c) of the proposed regulations.
>
> **A. Pre-TCJA Acquisitions**
>
> Two commenters on the proposed regulations requested clarification regarding the application of § 1.101-1(c)(2)(iii)(A) with respect to the indirect acquisition of an interest in a life insurance contract if the entity that directly holds the interest acquired the interest before January 1, 2018 (that is, before the existence of any reporting requirements under section 6050Y(a)). Both commenters recommended that an exception from the definition of reportable policy sale be provided with respect to the indirect acquisition of an interest in a life insurance contract by a person if the partnership, trust, or other entity that directly holds the interest in the life insurance contract acquired the interest before January 1, 2018. One commenter recommended that, if the requested exception is not provided, the partnership, trust, or other entity in which the investment interest is purchased should be permitted to undertake the applicable reporting, instead of requiring the investor to navigate the complexities of the reporting requirements. This commenter also suggested that, if the requested exception is provided, the partnership, trust, or other entity could file an information return with the IRS for its portfolio of policies acquired prior to January 1, 2018, as a transition solution. However, the other commenter suggested that the partnership, trust, or other entity may not have tracked or retained information sufficient to satisfy the reporting requirements under section 6050Y with respect to interests acquired before January 1, 2018.

[4362] Part 6 of the preamble REG-103083-18, "Section 1.101-1: Exclusion from Gross Income of Proceeds of Life Insurance Contracts Payable by Reason of Death."

In response to these comments, § 1.101-1(c)(2)(iii)(A) of the final regulations provides an exception from the definition of reportable policy sale with respect to the indirect acquisition of an interest in a life insurance contract by a person if a partnership, trust, or other entity in which an ownership interest is being acquired directly or indirectly holds the interest in the life insurance contract and acquired that interest before January 1, 2019, or acquired that interest in a reportable policy sale reported in compliance with section 6050Y(a) and § 1.6050Y-2.[3]

[3] As discussed in section 1.A of this Summary of Comments and Explanation of Revisions, the final regulations provide that the reporting obligations under section 6050Y apply to reportable policy sales and payments of reportable death benefits occurring after December 31, 2018. See § 1.6050Y-1(b) of the final regulations. Section 3.B of this Summary of Comments and Explanation of Revisions describes changes adopted in § 1.101-1(c)(2)(iii)(A) of the final regulations in response to other comments requesting expanded indirect acquisition exceptions.

B. Additional Requests for Expanded Indirect Acquisition Exceptions

One commenter on the proposed regulations identified the existence of a possible technical issue with § 1.101-1(c)(2)(iii)(A) of the proposed regulations, which provides an exception from reportable policy sale status for certain indirect acquisitions. The commenter noted that, under this provision, the indirect acquisition of an interest in a life insurance contract is not a reportable policy sale if the partnership, trust, or other entity that directly holds the interest in the life insurance contract acquired the interest in a reportable policy sale that was reported in compliance with section 6050Y(a) and the regulations thereunder. The commenter described a fact pattern in which legal title to a life insurance contract is held by a nominee (for example, a securities intermediary) on behalf of a partnership, trust, or other entity (for example, an investment fund). The commenter concluded that, in this fact pattern, the exception in § 1.101-1(c)(2)(iii)(A) of the proposed regulations cannot apply to an investor in the partnership, trust, or other entity because the investor's ownership interest is in the partnership, trust, or other entity (which does not hold a direct interest in the life insurance contract), not in the nominee (which directly holds the legal interest in the life insurance contract). The commenter also recommended that § 1.101-1(c)(2)(iii)(A) be revised to clarify that the exception applies if reporting under section 6050Y is done by either the legal owner of the life insurance contract (such as a securities intermediary holding legal title as a nominee) or the beneficial owner of the life insurance policy that controls the life insurance contract under a securities account agreement (such as an investment fund).

In the fact pattern described in the comment letter, the partnership, trust, or other entity in which the investor acquires an ownership interest holds an interest in the life insurance contract. An interest in a life insurance contract is not limited to legal ownership of the contract. Instead, any person that acquires an enforceable right to receive all or a part of the proceeds of the life insurance contract or acquires the right to any other economic benefits of the policy as described in § 20.2042-1(c)(2) acquires an interest in the life insurance contract under § 1.101-1(e)(1) of the proposed regulations.

The partnership, trust, or other entity described by the commenter presumably would hold such an interest directly, even though legal title to the life insurance contract is held by a nominee or other intermediary. By acquiring an interest in the partnership, trust, or other entity, the investor indirectly would acquire a beneficial interest in the life insurance contract. The exception in § 1.101-1(c)(2)(iii)(A) of the proposed regulations would apply to this indirect acquisition if the partnership, trust, or other entity reported its acquisition of the beneficial interest in the contract in compliance with section 6050Y(a). The commenter's recommended revision to § 1.101-1(c)(2)(iii)(A) of the proposed regulations therefore is not adopted in the final regulations.

The commenter also proposed that § 1.101-1(c)(2)(iii)(A) of the proposed regulations be modified to apply if "the partnership, trust, or other entity that directly or indirectly holds the interest in the life insurance contract acquired that interest in a reportable policy sale reported in compliance with section 6050Y(a) and § 1.6050Y-2."

This change is adopted in the final regulations, which also clarify that the partnership, trust, or other entity must be a partnership, trust, or other entity in which an ownership interest is being acquired. As modified, the exception applies to the indirect acquisition of an interest in a life insurance contract by a person acquiring an ownership interest in a partnership, trust, or other entity that holds the interest in the life insurance contract, regardless of whether the person's ownership interest in the partnership, trust, or other entity that reported its acquisition of the interest in the life insurance contract is direct or indirect and regardless of whether that partnership, trust, or other entity acquired its interest in a direct or indirect acquisition, provided the partnership, trust, or other entity acquired its interest in a reportable policy sale reported in compliance with section 6050Y(a) and § 1.6050Y-2 or, as discussed in section 3.A of this Summary of Comments and Explanation, acquired its interest before January 1, 2019.

One commenter on the proposed regulations reiterated its previous request, made in comments on Notice 2018-41, that an exception from the reporting requirements of section 6050Y be provided with respect to an indirect acquisition of an interest in a life insurance contract by any investor that acquires a 5 percent or less economic and voting interest in an investment vehicle that holds, directly or indirectly, life insurance policies, with the added proviso that the investor must not be an officer or director of the investment vehicle. Section 1.101-1(c)(2)(iii)(B) of the proposed regulations provides that the indirect acquisition of an interest in a life insurance contract is not a reportable policy sale if the acquirer and his or her family members own, in the aggregate, 5 percent or less of the partnership, trust, or other entity that directly holds the interest in the life insurance contract, but this exception applies only if, immediately before the acquisition, no more than 50 percent of the gross value of the assets of the partnership, trust, or other entity that directly holds the interest in the life insurance contract consists of life insurance contracts.

The final regulations do not adopt the proposed change because, if more than 50 percent of an entity's asset value is life insurance contracts, investment in life insurance contracts is likely the entity's primary business activity, and it is reasonable to expect even small investors to be able to determine the primary activity of the business they are investing in, regardless of whether they are also officers or directors of the entity. In addition, any investor that does not qualify for the exception set forth in § 1.101-1(c)(2)(iii)(B) of the final regulations because more than 50 percent of the gross value of the assets of the partnership, trust, or other entity that directly holds the interest in the life insurance contract consists of life insurance contracts may still qualify for the exception set forth in § 1.101-1(c)(2)(iii)(A) of the final regulations if a partnership, trust, or other entity that directly or indirectly holds the interest in the life insurance contract acquired the interest before January 1, 2019, or acquired that interest in a reportable policy sale reported in compliance with section 6050Y(a) and § 1.6050Y-2.

> Separately, § 1.101-1(c)(2)(iii)(B) of the final regulations clarifies that, if the partnership, trust, or other entity in which the acquirer is directly acquiring an ownership interest indirectly holds an interest in one or more life insurance contracts, (i) the assets of the partnership, trust, or other entity in which the ownership interest is being acquired are tested to determine whether more than 50 percent of the gross value of the assets of that partnership, trust, or other entity consists of life insurance contracts, and (ii) the ownership interest in that partnership, trust, or other entity held by the acquirer and his or her family members after the acquisition is tested to determine whether they hold more than a 5 percent ownership interest in the entity. The assets of the partnership, trust, or other entity that directly holds the interest in the life insurance contract and the interest in that partnership, trust, or other entity held by the acquirer and his or her family member are tested only if the acquirer is directly acquiring an ownership interest in that partnership, trust, or other entity.

Reg. § 1.101-1(c)(2), "Exceptions," provides:

> None of the following transactions is a reportable policy sale:[4363]
>
> (i) A transfer of an interest in a life insurance contract between entities with the same beneficial owners, if the ownership interest of each beneficial owner in the transferor entity does not vary by more than a 20 percent ownership interest from that beneficial owner's ownership interest in the transferee entity. In a series of transfers, the prior sentence is applied by comparing the beneficial owners' ownership interest in the first transferor entity and the last transferee entity. For purposes of this paragraph (c)(2)(i), each beneficial owner of a trust is deemed to have an ownership interest determined by the broadest possible exercise of a trustee's discretion in that beneficial owner's favor. Paragraph (g)(13) (Example 13) of this section provides an illustration of the application of this paragraph (c)(2)(i).
>
> (ii) A transfer between corporations that are members of an affiliated group (as defined in section 1504(a)) that files a consolidated U.S. income tax return for the taxable year in which the transfer occurs.
>
> (iii) The indirect acquisition of an interest in a life insurance contract by a person if—
>
> > (A) A partnership, trust, or other entity in which an ownership interest is being acquired directly or indirectly holds the interest in the life insurance contract and acquired that interest before January 1, 2019, or acquired that interest in a reportable policy sale reported in compliance with section 6050Y(a) and § 1.6050Y-2; or
> >
> > (B) Immediately before the acquisition, no more than 50 percent of the gross value of the assets (as determined under paragraph (f)(4) of this section) of the partnership, trust, or other entity that directly or indirectly holds the interest in the life insurance contract, and in which an ownership interest is being directly

[4363] Reg. § 1.101-1(e)(3)(ii) defines "indirect acquisition" and is reproduced in the text accompanying fn 4356 in part II.Q.4.b.ii.(b) Interest in a Life Insurance Contract.

acquired, consists of life insurance contracts, provided that, after the acquisition, with respect to that partnership, trust, or other entity, the person indirectly acquiring the interest in the life insurance contract and his or her family members own, in the aggregate-

(1) With respect to an S corporation, stock possessing 5 percent or less of the total combined voting power of all classes of stock entitled to vote and 5 percent or less of the total value of shares of all classes of stock of the S corporation;

(2) With respect to a trust or decedent's estate, 5 percent or less of the corpus and 5 percent or less of the annual income (taking into account, for the purpose of determining any person's ownership interest, the maximum amount of income and corpus that could be distributed to or held for the benefit of that person); or

(3) With respect to a partnership or other entity that is not a corporation or a trust, 5 percent or less of the capital interest and 5 percent or less of the profits interest.

(iv) The acquisition of a life insurance contract by an insurance company that issues a life insurance contract in an exchange pursuant to section 1035.

(v) The acquisition of a life insurance contract by a policyholder in an exchange pursuant to section 1035, if the policyholder has a substantial family, business, or financial relationship with the insured, apart from its interest in the life insurance contract, at the time of the exchange.

Reg. § 1.101-1(c)(2)(v) requires the holder of a policy on the insured who does a Code § 1035 exchange for a replacement policy on the insured to have a substantial family, business, or financial relationship with the insured or risk its interest in the replacement policy being tainted as having been transferred in a reportable policy sale.[4364] This creates concerns when an employer uses a cash value life insurance policy to fund its payments of post-retirement benefits for a living former employee. (It would not create a concern when funding the post-mortem purchase of the retiree's interest in the employer or any other obligations that mature by reason of the employee's death.)[4365]

Reg. § 1.101-1(c)(2)(i) refers to Reg. § 1.101-1(g)(13),[4366] which provides:

Example 13. Partnership X and Partnership Y are owned by individuals A, B, and C. A holds 40% of the capital and profits interest of Partnership X and 20% of the capital and profits interest of Partnership Y. B holds 35% of the capital and profits interest of

[4364] For the preamble discussing this issue, see fn 4353 in part II.Q.4.b.ii.(b) Interest in a Life Insurance Contract.
[4365] See Reg. § 1.101-1(d)(2)(ii).
[4366] Reg. § 1.101-1(g), "Examples," begins with:

The application of this section is illustrated by the following examples. Each example assumes that the transferee did not receive any amounts under the life insurance contract other than the amounts described in the examples. With the exception of paragraph (g)(7) (Example 7) of this section, the bargain sale rules set forth in paragraph (b)(2)(iii) of this section do not apply in the examples because the consideration paid for the policy transferred is fair market value....

Partnership X and 40% of the capital and profits interest of Partnership Y. C holds 25% of the capital and profits interest of Partnership X and 40% of the capital and profits interest of Partnership Y. Partnership X is the initial policyholder of a $100,000 insurance policy on the life of A. Partnership Y purchases the policy from Partnership X. Under paragraph (c)(2)(i) of this section, this transfer is not a reportable policy sale because the ownership interest of each beneficial owner in Partnership X does not vary from that owner's interest in Partnership Y by more than a 20% ownership interest. A's ownership varies by a 20% interest, B's ownership varies by a 5% interest, and C's ownership varies by a 15% interest.

Reg. § 1.101-1(g)(15)[4367] elaborates on Reg. § 1.101-1(c)(2)(iii)(B), providing:

> *Example 15*. The facts are the same as in Example 14[4368] in paragraph (g)(14) of this section, except that A is no longer an employee of Partnership X, and Partnership X has no substantial family, business, or financial relationship with A, when B acquires the profits interest in Partnership X. Also, B acquires only a 5% profits interest in exchange for a cash payment of $500,000. Partnership X does not own an interest in any other life insurance policies, and the gross value of its assets is $10 million. Although neither Partnership X nor B has a substantial family, business, or financial relationship with A at the time of B's indirect acquisition of an interest in the policy covering A's life, because B's profits interest in Partnership X does not exceed 5%, and because no more than 50% of Partnership X's asset value consists of life insurance contracts, the exception in paragraph (c)(2)(iii)(B) of this section applies, and B's indirect acquisition of an interest in the policy covering A's life is not a reportable policy sale.

Reg. § 1.101-1(c)(1) above stated that a reportable policy sale can apply only if, at the time of the acquisition, the acquirer has "no substantial family, business, or financial relationship with the insured apart from the acquirer's interest in the life insurance contract." Reg. § 1.101-1(d) describes these substantial relationships.

The preamble to the proposed regulations explains:[4369]

> Section 1.101-1(d) of the proposed regulations defines the terms "substantial family relationship," "substantial business relationship," and "substantial financial relationship." Under section 1.101-1(d)(1) of the proposed regulations, a "substantial family relationship" is the relationship between an individual and any family member of that individual as defined in § 1.101-1(f)(3) of the proposed regulations. A substantial family relationship also exists between an individual and his or her former spouse with regard to a transfer of an interest in a life insurance contract to (or in trust for the benefit of) that former spouse incident to divorce. See § 1.101-1(d)(1) of the proposed regulations. Additionally, a substantial family relationship exists between the insured and an entity if

[4367] Reg. § 1.101-1(g), "Examples," begins with:

> The application of this section is illustrated by the following examples. Each example assumes that the transferee did not receive any amounts under the life insurance contract other than the amounts described in the examples. With the exception of paragraph (g)(7) (Example 7) of this section, the bargain sale rules set forth in paragraph (b)(2)(iii) of this section do not apply in the examples because the consideration paid for the policy transferred is fair market value....

[4368] [Not in the regulation - click to go to:] Example 14.

all of the entity's beneficial owners have a substantial family relationship with the insured. *Id.*

Section 1.101-1(d)(2) describes the two situations in which a substantial business relationship exists between the acquirer and insured: (1) The insured is a key person (as defined in section 264) of, or materially participates (as defined in section 469 and the corresponding regulations) in, an active trade or business as an owner, employee, or contractor, and at least 80% of that trade or business is owned (directly or indirectly, through one or more partnerships, trusts, or other entities) by the acquirer or the beneficial owners of the acquirer, and (2) the acquirer acquires an active trade or business and acquires the interest in the life insurance contract either as part of that acquisition or from a person owning significant property leased to the acquired trade or business or life insurance policies held to facilitate the succession of the ownership of the business, if certain requirements are met. See § 1.101-1(d)(2)(i) and (ii) of the proposed regulations.

Comments received on Notice 2018-41 suggested that acquisitions of life insurance contracts, or interests therein, in certain ordinary course business transactions involving the acquisition of a trade or business should not be considered reportable policy sales, including ordinary course business transactions whereby one trade or business acquires another trade or business that owns life insurance on the lives of former employees or directors. The definition of substantial business relationship in § 1.101-1(d)(2) of the proposed regulations, as well as certain other provisions in the proposed regulations, are intended to exclude certain of these transactions from the definition of reportable policy sales.

Section 1.101-1(d)(3) of the proposed regulations describes the three situations in which a substantial financial relationship exists between the insured and the acquirer: (1) The acquirer (directly or indirectly, through one or more partnerships, trusts, or other entities of which it is a beneficial owner) has, or the beneficial owners of the acquirer have, a common investment (other than the interest in the life insurance contract) with the insured and a buy-out of the insured's interest in the common investment by the co-investor(s) after the insured's death is reasonably foreseeable; (2) the acquirer maintains the life insurance contract on the life of the insured to provide funds to purchase assets or satisfy liabilities following the death of the insured; or (3) the acquirer is an organization described in sections 170(c), 2055(a), and 2522(a) that previously received financial support in a substantial amount or significant volunteer support from the insured. See § 1.101-1(d)(3)(i) through (iii) of the proposed regulations.

The proposed regulations also specify that the fact that an acquirer is a partner of the insured, a partnership in which the insured is a partner, or a corporation in which the insured is a shareholder or officer (all relationships that are covered by an exception from the transfer for value rule) is not sufficient to establish a substantial business or financial relationship, nor is such status required to establish a substantial business or financial relationship. See § 1.101-1(d)(4)(ii) of the proposed regulations. The proposed regulations also clarify that, for purposes of determining whether the acquirer in an indirect acquisition of an interest in a life insurance contract has a substantial business or financial relationship with the insured, the acquirer will be deemed to have a substantial business or financial relationship with the insured if the direct holder of the interest in the life insurance contract has a substantial business or financial relationship with the insured immediately before and after the date the acquirer acquires its interest.

> See § 1.101-1(d)(4)(i) of the proposed regulations. Accordingly, the acquirer in an indirect acquisition may establish a substantial business or financial relationship with the insured based on the acquirer's own relationship with the insured or the relationship between the insured and the direct holder of the interest in the life insurance contract.

Part 1.B.3 of the preamble to the final regulations, T.D. 9879 (10/31/2019), "Comments and Changes Relating to § 1.101-1(d) of the Proposed Regulations," explains:

> Section 1.101-1(d) of the proposed regulations defines the terms substantial family relationship, substantial business relationship, and substantial financial relationship, and provides special rules for applying these definitions. This section of this Summary of Comments and Explanation of Revisions discusses comments that generally relate to the definitions and special rules in § 1.101-1(d) of the proposed regulations.
>
> **A. Beneficial Owners With a Combination of Substantial Relationships**
>
> Under § 1.101-1(d)(1) of the proposed regulations, a substantial family relationship exists between the insured and a partnership, trust, or other entity if all of the beneficial owners of that partnership, trust, or other entity have a substantial family relationship with the insured. A partnership, trust, or other entity may itself have a substantial business or financial relationship with the insured under § 1.101-1(d)(2) or (3) of the proposed regulations.
>
> One commenter on the proposed regulations recommended that a transfer to a trust, partnership, or other entity not be a reportable policy sale within the meaning of section 101(a)(3) if all of the beneficial owners of the trust, partnership, or other entity have a substantial family, business, or financial relationship with the insured.[4370] The Treasury Department and the IRS have determined it would be appropriate to expand the definition of substantial family, business, or financial relationship to include the relationship between the insured and a trust, partnership, or other entity, every beneficial owner of which has a substantial family, business, or financial relationship with the insured. Accordingly, § 1.101-1(d)(4)(iii) of the final regulations provides this expanded definition.
>
> The commenter also suggested that the definition of "family member" under § 1.101-1(f)(3) should include charities to which the insured has given substantial financial support or significant volunteer support. Another commenter suggested that a trust with beneficiaries that include both individual family members and a charity with a substantial financial relationship to the insured should qualify as a "family member."[4371] Under § 1.101-1(d)(3)(iii) of the proposed regulations, a substantial financial relationship exists between the insured and acquirer if the acquirer is an organization described in sections 170(c), 2055(a), and 2522(a) that previously received financial support in a substantial amount or significant volunteer support from the insured. Under either of the approaches suggested by the commenters, the acquisition of an interest in a life insurance contract by a trust with beneficiaries that include both individuals who are

[4370] [my footnote:] I was that commenter (one of only 12 comments submitted); see https://www.thompsoncoburn.com/docs/default-source/blog-documents/gorin-transfer-for-value-comments.pdf. Discussing with ACTEC Fellow Michael Van Cise's the comment he was making below got me thinking more about this issue.

[4371] [my footnote:] ACTEC Fellow Michael Van Cise was that commenter.

family members of the insured and a charity described in § 1.101-1(d)(3)(iii) of the proposed regulations would not be a reportable policy sale. The Treasury Department and the IRS agree that the existence of a trust beneficiary that is a charity described in § 1.101-1(d)(3)(iii) of the proposed regulations should not cause a transfer to that trust to be a reportable policy sale. However, rather than expanding the definition of "family member" under § 1.101-1(f)(3) of the proposed regulations as suggested by the commenters, the Treasury Department and the IRS have adopted a more direct and expansive approach to address the commenters' concerns by adding a new rule in the final regulations providing that any combination of the described substantial relationships between a trust's beneficiaries and the insured is sufficient to qualify the transfer to that trust for the reportable policy sale exclusion. See § 1.101-1(d)(4)(iii) of the final regulations. As a result, under the final regulations, there is no need to also expressly treat a trust established and maintained for the primary benefit of the insured or one or more of the insured's family members as a family member of the insured. Therefore, the final regulations do not include such a trust in the definition of family member.

B. Substantial Financial Relationships With Charities

Under § 1.101-1(d)(3)(iii) of the proposed regulations, the acquirer of an interest in a life insurance contract has a substantial financial relationship with the insured if the acquirer is an organization described in sections 170(c), 2055(a), and 2522(a) that previously received financial support in a substantial amount or significant volunteer support from the insured. One commenter on the proposed regulations suggested that this provision be expanded to include any other such organization with which the insured has substantial personal ties, such as the donor or a family member having benefitted from the charitable organization's services in some manner.[4372] The commenter stated that it is not uncommon for a donor to both (i) contribute very modestly, if at all, to a charity during life because the donor is concerned about having sufficient retirement income, and (ii) want to benefit the charity when the donor no longer needs to preserve retirement income sources. The commenter also stated that donors often benefit charities through either a split interest trust described in section 170(f)(2) or a bargain sale described in § 1.1011-2.

The Treasury Department and IRS have not adopted this suggestion in the final regulations because it would be challenging to determine when personal ties with a charity are substantial enough to constitute a substantial financial relationship with the insured, in the absence of a significant donation of time or property. Also, there generally will be little detriment to a charity as a result of an acquisition (whether gratuitous or for value) of an interest in a life insurance contract in a reportable policy sale. Nevertheless, as discussed later in this section, the final regulations provide that the category of charities considered to have a substantial financial relationship with an insured may be expanded in the future in guidance published in the Internal Revenue Bulletin.

Treating a gratuitous transfer of an interest in a life insurance contract (or the part of the transfer that is gratuitous, in the case of a bargain sale) as a reportable policy sale does not affect the amount of proceeds excludable by the gratuitous transferee.
Section 1.101-1(b)(2)(i) of the final regulations applies to all gratuitous transfers of interests in life insurance contracts and generally provides that the transferee in a gratuitous transfer of an interest in a life insurance contract steps into the shoes of the

[4372] [my footnote:] I was that commenter; see fn 4370.

transferor and may exclude death benefits paid under the contract from gross income to the same extent that the transferor would have been able to exclude the benefits, in addition to the premiums and other amounts paid by the transferee. Furthermore, treatment of a gratuitous transfer as a reportable policy sale does not result in reporting obligations for the gratuitous transferee because the gratuitous transferor is not a reportable policy sale payment recipient. See §§ 1.6050Y-1(a)(16) and 1.6050Y-2(a) of the final regulations.

Even if a charity purchased some or all of its interest in a life insurance contract for valuable consideration, a charity generally is not subject to Federal income tax on its income (including insurance policy proceeds) unless the income arises from an unrelated trade or business. Thus, the charity's obligation in case of a purchase generally would be limited to acquirer reporting under § 1.6050Y-2, which merely requires providing on Form 1099-LS information that should be readily available to the charity. This reporting provides important information regarding the sale to reportable policy sale payment recipients and the IRS.

In response to the commenters concerns, however, the final regulations provide that the IRS may publish guidance in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter) describing other situations in which a substantial financial relationship exists between the insured and an acquirer that is an organization described in sections 170(c), 2055(a), and 2522(a). See § 1.101-1(d)(3)(iii) of the final regulations.

C. Substantial Financial Relationships and BOLI Pooling Transactions

One commenter on the proposed regulations requested confirmation that a reportable policy sale will not arise when a life insurance policy is involved in a transaction that pools bank-owned life insurance (BOLI). The commenter explained that businesses, such as banks, commonly promise certain pre-and post-retirement benefits to their employees, such as retiree health care benefits, which can result in substantial liabilities for the businesses that must be reflected on their financial statements. The commenter described BOLI as permanent, cash value life insurance coverage on the lives of a bank's officers, directors, and employees purchased by the bank to fund such obligations informally and to establish assets on its financial statements to offset liabilities for the promised benefits. The commenter stated that BOLI owners typically hold the policies until the death benefits become payable and use the benefits to fund the costs of the employee benefits or to recover such costs after the fact. The commenter described BOLI pooling transactions as transactions that pool the BOLI policies of multiple banks for the continued purpose of funding each bank's employee benefits, but in a more effective, centralized way. The commenter described the initial step of a BOLI pooling transaction as the transfer by multiple unrelated banks of their pre-existing BOLI policies to a partnership, in return for which each bank receives a partnership interest proportional to the value of its contributed policies. The commenter explained that the partnership holds and manages the contributed policies and distributes death benefits among the bank-partners pro rata based on their respective partnership interests, which is expected to help normalize cash flows from the policies.

The commenter asserted that BOLI pooling transactions are ordinary course business transactions that should not be treated as reportable policy sales because they are not speculative and can be distinguished from sales of policies to third parties because the intent and result is to pool the policies among all the original policyholders for the continued purpose of funding their employee benefit liabilities. The commenter noted that the IRS has issued private letter rulings that confirm, directly or indirectly, that the carryover basis exception to the transfer for value rule in section 101(a)(2) applies to a bank's contribution of BOLI policies to the partnership in a BOLI pooling transaction, thereby preserving the tax-free character of the death benefits when paid to the partnership. These rulings pre-date the addition of section 101(a)(3) to the Code. The reportable policy sale rules of section 101(a)(3) are in addition to the carryover basis exception of section 101(a)(2). As a result, policy transfers are ineligible for the carryover basis exception if no substantial family, business, or financial relationship exists between the acquirer of an interest in a life insurance contract and the insured under that contract at the time of the acquisition.

The commenter asserted that the proposed regulations support the requested treatment of BOLI pooling transactions because a substantial financial relationship exists between the acquirer and insured. A substantial financial relationship exists under § 1.101-1(d)(3)(ii) of the proposed regulations if the acquirer maintains the life insurance contract on the life of the insured to provide funds to purchase assets or satisfy liabilities following the death of the insured. The commenter asserted that this provision applies in BOLI pooling transactions with respect to both the bank and the partnership as follows: (1) the partnership has a direct acquisition of life insurance policies, which it maintains to satisfy liabilities following the death of the insured, namely, the employee benefit liabilities of the bank-partners for which they originally purchased the policies; (2) the bank has an indirect acquisition of life insurance policies contributed by other banks to the partnership; and (3) the bank maintains its indirect interest in those policies to continue funding the same employee benefit liabilities. The commenter recommended clarification of the regulations to confirm this treatment, either by adding additional language to the definition of substantial financial relationship, or by adding an example that applies that provision to the BOLI pooling transaction. Alternatively, the commenter suggested a separate exception to the reportable policy sale definition.

The final regulations do not adopt the commenters requested changes because the changes would be inconsistent with the statute. The proposed regulations do not support, and were not intended to support, the requested treatment of BOLI pooling transactions.

First, the partnership described by the commenter does not have a substantial family, business, or financial relationship with the insureds under the proposed regulations. Specifically, it does not have a substantial financial relationship with any insured under § 1.101-1(d)(3)(ii) of the proposed regulations because it does not maintain the life insurance contract on the life of the insured to provide funds for the partnership to purchase assets or satisfy liabilities following the insured's death. As described by the commenter, the partnership maintains the life insurance contracts to provide its partners, the banks, with funds to satisfy the banks' employee benefit liabilities. Accordingly, the partnership's acquisition of the life insurance contracts in the circumstances described is a reportable policy sale that must be reported under section 6050Y and § 1.6050Y-2 of the proposed regulations.

Second, the definition of a substantial financial relationship in § 1.101-1(d)(3)(ii) of the proposed regulations was not intended to cover relationships as tenuous as those existing between the indirect acquirers (the banks) and the insureds in the BOLI pooling transactions described by the commenter. Section 1.101-1(d)(3)(ii) of the proposed regulations was intended to cover situations in which the life insurance contract is held to provide funds to purchase assets or satisfy liabilities, when the need for the asset purchases or liability payments results from the insured's death. In the situation described by the commenter, a bank does not have this kind of relationship with the insureds under life insurance contracts contributed to the partnership by other banks. However, in the circumstances described, because the partnership acquires the life insurance contracts in a reportable policy sale that must be reported under section 6050Y(a) and § 1.6050Y-2 of the proposed regulations, the bank's indirect acquisition of the life insurance contracts is not a reportable policy sale, provided the partnership complies with the reporting requirements. See § 1.101-1(c)(2)(iii)(A) of the proposed regulations.

D. Substantial Financial Relationships Under § 1.101-1(d)(3)(ii)

A substantial financial relationship exists under § 1.101-1(d)(3)(ii) of the proposed regulations if the acquirer maintains the life insurance contract on the life of the insured to provide funds to purchase assets or satisfy liabilities following the death of the insured. As described in section 5.0 of this Summary of Comments and Explanation of Revisions, this definition was intended to apply in situations in which the life insurance contract is held to provide funds to purchase assets or satisfy liabilities following the death of the insured, when the need for the asset purchases or liability payments results from the insured's death. Accordingly, § 1.101-1(d)(3)(ii) of the final regulations revises the definition to provide that a substantial financial relationship exists between the acquirer and insured if the acquirer maintains the life insurance contract on the life of the insured to provide funds to purchase assets of or to satisfy liabilities of the insured or the insured's estate, heirs, legatees, or other successors in interest, or to satisfy other liabilities arising upon or by reason of the death of the insured.

Reg. § 1.101-1(d)(1), "Substantial family relationship," provides:

For purposes of this section, a substantial family relationship means the relationship between an individual and any family member of that individual as defined in paragraph (f)(3) of this section. In addition, a substantial family relationship exists between an individual and his or her former spouse with regard to the transfer of an interest in a life insurance contract to (or in trust for the benefit of) that former spouse incident to divorce.

Reg. § 1.101-1(f)(3), "Family member," provides:

With respect to any individual, the term family member refers to any person described in paragraphs (f)(3)(i) through (vi) of this section. For purposes of this paragraph (f)(3), full effect is given to a legal adoption, and a step-child is deemed to be a descendant. The family members of an individual include:

(i) The individual;

(ii) The individual's spouse or a person with whom the individual is in a registered domestic partnership, civil union, or other similar relationship established under state law;

(iii) Any parent, grandparent, or great-grandparent of the individual or of the person described in paragraph (f)(3)(ii) of this section and any spouse of such parent, grandparent, or great-grandparent, or person with whom the parent, grandparent, or great-grandparent is in a registered domestic partnership, civil union, or other similar relationship established under state law;

(iv) Any lineal descendant of the individual or of any person described in paragraph (f)(3)(ii) or (iii) of this section;

(v) Any spouse of a lineal descendant described in paragraph (f)(3)(iv) of this section and any person with whom such a lineal descendant is in a registered domestic partnership, civil union, or other similar relationship established under state law; and

(vi) Any lineal descendant of a person described in paragraph (f)(3)(v) of this section.

Reg. § 1.101-1(d)(2), “Substantial business relationship,” provides:

For purposes of this section, a substantial business relationship between the insured and the acquirer exists in each of the following situations:

(i) The insured is a key person (as defined in section 264) of, or materially participates (within the meaning of section 469) in, an active trade or business as an owner, employee, or contractor, and at least 80 percent of that trade or business is owned (directly or indirectly, through one or more partnerships, trusts, or other entities) by the acquirer or the beneficial owners of the acquirer.

(ii) The acquirer acquires an active trade or business and acquires the interest in the life insurance contract either as part of that acquisition or from a person owning significant property leased to the acquired trade or business or life insurance policies held to facilitate the succession of the ownership of the business if--

(A) The insured—

(1) Is an employee within the meaning of section 101(j)(5)(A) of the acquired trade or business immediately preceding the acquisition; or

(2) Was a director, highly compensated employee, or highly compensated individual within the meaning of section 101(j)(2)(A)(ii) of the acquired trade or business, and the acquirer, immediately after the acquisition, has ongoing financial obligations to the insured with respect to the insured’s employment by the trade or business (for example, the life insurance contract is maintained by the acquirer to fund current or future retirement, pension, or survivorship obligations based on the insured’s relationship with the entity or to fund a buy-out of the insured’s interest in the acquired trade or business); and

(B) The acquirer either carries on the acquired trade or business or uses a significant portion of the acquired business assets in an active trade or business that does not include investing in interests in life insurance contracts.

For the above references to Code § 264, see fns 4320-4322 in part II.Q.4.a Funding the Buy-Sell. Under that provision, generally a key person is an officer or 20% owner, but the number of individuals who may be treated as key persons may be as few as five people.

For the above references to material participation under Code § 469, see part II.K.1.a.ii Material Participation and various other discussion in part II.K.1 Passive Loss Rules Generally.

For the above references to Code § 101(j), see part II.Q.4.g.i Analysis of Code § 101(j).

Reg. § 1.101-1(d)(2), "Substantial financial relationship," provides:

> For purposes of this section, a substantial financial relationship between the insured and the acquirer exists in each of the following situations:
>
> (i) The acquirer (directly or indirectly, through one or more partnerships, trusts, or other entities of which it is a beneficial owner) has, or the beneficial owners of the acquirer have, a common investment (other than the interest in the life insurance contract) with the insured and a buy-out of the insured's interest in the common investment by the co-investor(s) after the insured's death is reasonably foreseeable.
>
> (ii) The acquirer maintains the life insurance contract on the life of the insured to provide funds to purchase assets of or to satisfy liabilities of the insured or the insured's estate, heirs, legatees, or other successors in interest, or to satisfy other liabilities arising upon or by reason of the death of the insured.
>
> (iii) The acquirer is an organization described in sections 170(c), 2055(a), and 2522(a) that previously received from the insured either financial support in a substantial amount or significant volunteer support or that meets other requirements prescribed in guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter) for establishing that a substantial financial relationship exists between the insured and the organization.

Neither the proposed regulations nor their preamble defines "common investment." Presumably this provides full latitude for buy-sell agreements among owners of a business entity.

Reg. § 1.101-1(d)(4), "Special rules," provides:

> Paragraphs (d)(4)(i), (ii), and (iii) of this section apply for purposes of determining whether a substantial relationship (whether family, business, or financial) exists under paragraph (d)(1), (2), or (3) of this section, respectively.
>
> (i) *Indirect acquisitions*. The acquirer of an interest in a life insurance contract in an indirect acquisition is deemed to have a substantial business or financial relationship with the insured if the direct holder of the interest in the life insurance contract has a substantial business or financial relationship with the insured immediately before and after the date the acquirer acquires its interest.
>
> (ii) *Acquisitions by certain persons*. The sole fact that an acquirer is a partner of the insured, a partnership in which the insured is a partner, or a corporation in which the insured is a shareholder or officer, is not sufficient to establish a substantial business or financial relationship with the insured. In addition, an acquirer need not be a

partner of the insured, a partnership in which the insured is a partner, or a corporation in which the insured is a shareholder or officer to have a substantial business or financial relationship with the insured.

(iii) *Acquisitions by those with differing types of substantial relationships*. A substantial family, business, or financial relationship exists between the insured and a partnership, trust, or other entity if each beneficial owner of that partnership, trust, or other entity has a substantial family, business, or financial relationship with the insured. For example, a substantial family, business, or financial relationship exists between the insured and a trust if each trust beneficiary is a family member of the insured or an organization described in paragraph (d)(3)(iii) of this section.

Reg. § 1.101-1(f)(1), "Beneficial owner," provides:

> A beneficial owner of a partnership, trust, or other entity is an individual or C corporation with an ownership interest in that entity. The interest may be held directly or indirectly, through one or more other partnerships, trusts, or other entities. For instance, an individual that directly owns an interest in a partnership (P1), which directly owns an interest in another partnership (P2), is an indirect beneficial owner of P2 and any assets or other entities owned by P2 directly or indirectly. For purposes of this paragraph (f)(1), the beneficial owners of a trust include those who may receive current distributions of trust income or corpus and those who could receive distributions if the trust were to terminate currently.

Note that the beneficial owners of a trust ***include*** those persons named above [emphasis added]. My understanding is that, in federal tax regulations, "includes" means "includes without limitation." Query whether that expansion of the definition means that one or more persons beyond the current potential distributees and immediate remaindermen need to be considered.

Reg. § 1.101-1(g)(14)[4373] elaborates on Reg. § 1.101-1(d)(4), providing:

> *Example 14*. Partnership X conducts an active trade or business and is the initial policyholder of a $100,000 insurance policy on the life of its full-time employee, A. A materially participates in Partnership X's active trade or business in A's capacity as an employee. Individual B acquires a 10% profits interest in Partnership X in exchange for a cash payment of $1,000,000. Under paragraphs (d)(1) through (3) of this section, B does not have a substantial family, business, or financial relationship with A. Under paragraph (d)(4)(i) of this section, however, B is deemed to have a substantial business relationship with A because, under paragraph (d)(2)(i) of this section, Partnership X (the direct policyholder) has a substantial business relationship with A. Accordingly, although the acquisition of the 10% partnership interest by B is an indirect acquisition of a 10% interest in the insurance policy covering A's life, the acquisition is not a reportable policy sale.

[4373] Reg. § 1.101-1(g), "Examples," begins with:

> The application of this section is illustrated by the following examples. Each example assumes that the transferee did not receive any amounts under the life insurance contract other than the amounts described in the examples. With the exception of paragraph (g)(7) (Example 7) of this section, the bargain sale rules set forth in paragraph (b)(2)(iii) of this section do not apply in the examples because the consideration paid for the policy transferred is fair market value....

Reg. § 1.101-1(g)(16)[4374] elaborates on Reg. § 1.101-1(d), providing:

> *Example 16*. A is the initial policyholder of a $100,000 insurance policy on A's life. A sells the policy for its fair market value. As a result of the sale, Bank X holds legal title to the life insurance contract as the nominee of Partnership B, and Partnership B has the enforceable right to designate the contract beneficiary. Under paragraphs (d)(1) through (4) of this section, neither Bank X nor Partnership B has a substantial family, business, or financial relationship with the insured, A, at the time of the sale. Accordingly, the transfer of legal title to the policy to Bank X is a reportable policy sale under paragraph (c)(1) of this section, unless an exception set forth in paragraph (c)(2) of this section applies. The same is true of the transfer of the economic benefits of the policy to Partnership B. At a later date, Partnership B sells its economic interest in the policy to Partnership C for fair market value. Bank X continues to hold legal title to the life insurance contract, but now holds it as Partnership C's nominee. Partnership C has no substantial family, business, or financial relationship with the insured, A, under paragraphs (d)(1) through (4) of this section at the time of the transfer. Accordingly, Partnership C's acquisition of the economic interest in the policy from Partnership B is a reportable policy sale under paragraph (c)(1) of this section, unless an exception set forth in paragraph (c)(2) of this section applies.

Prop. Reg. § 1.101-1(g)(17)[4375] elaborates on Prop. Reg. § 1.101-1(b)(2)(iv), providing:

> *Example 17*. The facts are the same as in Example 4 in paragraph (g)(4) of this section except that, before A's death, C exchanges the policy on A's life for a new policy on A's life in a section 1035 exchange. The amount of the proceeds C may exclude from C's gross income under this section is limited under paragraph (b)(2)(iv)(B) of this section to $6,000 plus any premiums and other amounts paid by C with respect to the original policy subsequent to the transfer and any premiums and other amounts paid by C with respect to the new policy subsequent to the exchange.

Prop. Reg. § 1.101-1(g)(18)[4376] elaborates on Prop. Reg. § 1.101-1(b)(2)(iv), providing:

> *Example 18*. The facts are the same as in Example 17 in paragraph (g)(17) of this section except that, before A's death, C sells the new policy to A for fair market value.

[4374] Reg. § 1.101-1(g), "Examples," begins with:

> The application of this section is illustrated by the following examples. Each example assumes that the transferee did not receive any amounts under the life insurance contract other than the amounts described in the examples. With the exception of paragraph (g)(7) (Example 7) of this section, the bargain sale rules set forth in paragraph (b)(2)(iii) of this section do not apply in the examples because the consideration paid for the policy transferred is fair market value....

[4375] See retroactivity provided in Applicability Dates of the proposed regulations. Reg. § 1.101-1(g), "Examples," begins with:

> The application of this section is illustrated by the following examples. Each example assumes that the transferee did not receive any amounts under the life insurance contract other than the amounts described in the examples. With the exception of paragraph (g)(7) (Example 7) of this section, the bargain sale rules set forth in paragraph (b)(2)(iii) of this section do not apply in the examples because the consideration paid for the policy transferred is fair market value....

[4376] See retroactivity provided in Applicability Dates of the proposed regulations. Reg. § 1.101-1(g), "Examples," begins with:

> The application of this section is illustrated by the following examples. Each example assumes that the transferee did not receive any amounts under the life insurance contract other than the

A’s estate receives the proceeds of $100,000 on A’s death. Under paragraph (b)(1)(ii)(B)(3)(i) of this section, the amount of the proceeds A’s estate may exclude from gross income is not limited by paragraph (b) of this section.

Prop. Reg. § 1.101-1(g)(19)[4377] provides:

> *Example 19*. A is the initial policyholder of a $100,000 insurance policy on A’s life. A transfers the policy for $6,000, its fair market value, to an individual, C, who does not have a substantial family, business, or financial relationship with A at the time of the transfer. The transfer from A to C is a reportable policy sale. C also is the initial policyholder of a $200,000 insurance policy on A’s life. Before A’s death, C exchanges the two policies on A’s life for a single new policy on A’s life in a section 1035 exchange. C receives the proceeds from the new policy on A’s death. The entire amount of the proceeds attributable to the interest in the new policy that was issued in exchange for the policy originally issued to C is excludable from gross income under paragraph (b)(2)(iv)(A) of this section. The amount of the proceeds attributable to the interest in the new policy that was issued in exchange for the policy originally issued to A that is excludable from gross income is limited under paragraph (b)(2)(iv)(B) of this section to $6,000 plus any premiums and other amounts paid by C with respect to the policy originally issued to A subsequent to the transfer and any premiums and other amounts paid by C with respect to the interest in the new policy that was issued in exchange for the policy originally issued to A.

II.Q.4.b.ii.(d). Transfer With Substituted Basis or To Permitted Transferee When Not a Reportable Policy Sale

Code § 101(a)(2) provides that the transfer for value rule does not apply:

> (A) if such contract or interest therein has a basis for determining gain or loss in the hands of a transferee determined in whole or in part by reference to such basis of such contract or interest therein in the hands of the transferor, or
>
> (B) if such transfer is to the insured, to a partner of the insured, to a partnership in which the insured is a partner, or to a corporation in which the insured is a shareholder or officer.

Thus, either the substituted basis rule of Code § 101(a)(2)(A) or the permitted transferee rule of Code § 101(a)(2)(B) suffices to exclude from the transfer for value rules any transfer that is not a reportable policy sale.

> amounts described in the examples. With the exception of paragraph (g)(7) (Example 7) of this section, the bargain sale rules set forth in paragraph (b)(2)(iii) of this section do not apply in the examples because the consideration paid for the policy transferred is fair market value....

[4377] See retroactivity provided in Applicability Dates of the proposed regulations. Reg. § 1.101-1(g), “Examples,” begins with:

> The application of this section is illustrated by the following examples. Each example assumes that the transferee did not receive any amounts under the life insurance contract other than the amounts described in the examples. With the exception of paragraph (g)(7) (Example 7) of this section, the bargain sale rules set forth in paragraph (b)(2)(iii) of this section do not apply in the examples because the consideration paid for the policy transferred is fair market value....

The preamble to the proposed regulations explains:[4378]

> Section 1.101-1(b)(1)(i) of the proposed regulations provides that, in the case of a transfer of an interest in a life insurance contract for valuable consideration, the amount of the proceeds attributable to the interest that is excludable from gross income under section 101(a)(1) is limited under section 101(a)(2) to the sum of the actual value of the consideration for the transfer paid by the transferee and the premiums and other amounts subsequently paid by the transferee with respect to that interest. Consistent with section 101(a)(3), this general rule applies to all transfers of interests in life insurance contracts for valuable consideration that are reportable policy sales. Consistent with section 101(a)(2), this general rule also continues to apply to transfers of interests in life insurance contracts for valuable consideration that are not reportable policy sales, unless an exception set forth in section 101(a)(2) applies. See § 1.101-1(b)(1)(i) and (ii) of the proposed regulations. Section 1.101-1(b)(1)(ii)(A) of the proposed regulations applies to carryover basis transfers that are not also subject to § 1.101-1(b)(1)(ii)(B) of the proposed regulations. Section 1.101-1(b)(1)(ii)(B) of the proposed regulations applies to transfers to certain persons.
>
> Under § 1.101-1(b)(1)(ii)(A) of the proposed regulations, the limitation described in section 101(a)(2) and § 1.101-1(b)(1)(i) of the proposed regulations does not apply to the transfer of an interest in a life insurance contract for valuable consideration if (1) The transfer is not a reportable policy sale, (2) the basis of the interest transferred, for the purpose of determining gain or loss with respect to the transferee, is determinable in whole or in part by reference to the basis of that interest in the hands of the transferor, and (3) § 1.101-1(b)(1)(ii)(B) of the proposed regulations does not apply to the transfer. The amount of the proceeds attributable to the interest that is excludable from gross income under section 101(a)(1) is, however, limited to the sum of (1) The amount that would have been excludable by the transferor, and (2) the premiums and other amounts subsequently paid by the transferee.
>
> This limitation applies without regard to whether the interest previously has been transferred or to the nature of any prior transfer of the interest. For instance, it is irrelevant whether a prior transfer was gratuitous or for value, whether section 101(a)(2)(A) or (B) applied to a prior transfer, whether any prior transfer was a reportable policy sale, or whether the prior transfer was of the same interest or a larger interest in a life insurance contract that included the same interest. If the full amount of the proceeds would have been excludable by the transferor, as would generally be the case if the original policyholder is the transferor, § 1.101-1(b)(1)(ii)(A) of the proposed regulations will, as a practical matter, impose no limitation on the amount of the proceeds attributable to the interest that is excludable from gross income under section 101(a)(1).
>
> Under § 1.101-1(b)(1)(ii)(B)(1) of the proposed regulations, the limitation on the excludable amount of the proceeds described in section 101(a)(2) and § 1.101-1(b)(1)(i) of the proposed regulations will not apply to an interest in a life insurance contract that is transferred for valuable consideration if (1) The transfer is not a reportable policy sale and the interest was not previously transferred for valuable consideration in a reportable policy sale, and (2) the transfer is to the insured, a partner of the insured, a partnership

[4378] Part 6 of the preamble REG-103083-18, "Section 1.101-1: Exclusion from Gross Income of Proceeds of Life Insurance Contracts Payable by Reason of Death."

> in which the insured is a partner, or a corporation in which the insured is a shareholder or officer (a (B)(1) person).
>
> Under § 1.101-1(b)(1)(ii)(B)(2) of the proposed regulations, if a transfer of an interest in a life insurance contract to a (B)(1) person follows a transfer for valuable consideration in a reportable policy sale (whether in the immediately preceding transfer or an earlier transfer), the amount of the proceeds attributable to that interest that is excludable from gross income under section 101(a)(1) is limited to the sum of (1) The higher of the amount that would have been excludable by the transferor if the transfer to the (B)(1) person had not occurred or the actual value of the consideration for the transfer to the (B)(1) person paid by the (B)(1) person, and (2) the premiums and other amounts subsequently paid by the transferee. Thus, in determining the excludable amount of the proceeds attributable to an interest in a life insurance contract that is transferred to a (B)(1) person in a transfer that is not a reportable policy sale, the limitation described in section 101(a)(2) and § 1.101-1(b)(1)(i) of the proposed regulations is inapplicable unless the interest previously had been transferred in a reportable policy sale. Additionally, because of the alternative in the formula for computing the limitation, a (B)(1) person will not be subject to a less favorable limitation than the limitation applicable to a transferee in a carryover basis transfer eligible for the exception set forth in § 1.101-1(b)(1)(ii)(A) of the proposed regulations.
>
> The proposed regulations provide a single rule applicable to all gratuitous transfers of interests in life insurance contracts, including reportable policy sales that are not for valuable consideration: the amount of the proceeds attributable to the interest that is excludable from gross income under section 101(a)(1) is limited to the sum of (1) The amount of the proceeds attributable to the gratuitously transferred interest that would have been excludable by the transferor if the transfer had not occurred, and (2) the premiums and other amounts subsequently paid by the transferee. See § 1.101-1(b)(2)(i) of the proposed regulations. Although § 1.101-1(b)(2) of the existing regulations provides a special rule for gratuitous transfers made by or to the insured, a partner of the insured, a partnership in which the insured is a partner, or a corporation in which the insured is a shareholder or officer, such a rule is not required by section 101(a), and the proposed regulations do not contain a special rule for these transfers because it could be subject to abuse.
>
> Section 1.101-1(b)(3) of the proposed regulations clarifies that, for purposes of § 1.101-1(b)(1) and (2) of the proposed regulations, in determining the amounts, if any, of consideration paid by the transferee for the transfer of an interest in a life insurance contract and premiums and other amounts subsequently paid by the transferee with respect to that interest, the amounts paid by the transferee are reduced, but not below zero, by amounts received by the transferee under the life insurance contract that are not received as an annuity, to the extent excludable from gross income under section 72(e). This provision is necessary to prevent an exclusion from gross income based on a double-counting of consideration paid.

Reg. § 1.101-1(b)(1)(ii), "Exceptions," explains in (A), "Exception for carryover basis transfers," when the substituted basis rule of Code § 101(a)(2)(A) causes the transfer for value rule under Code § 101(a)(2) not to apply:

> The limitation described in paragraph (b)(1)(i) of this section does not apply to the transfer of an interest in a life insurance contract for valuable consideration if each of the

following requirements are satisfied. First, the transfer is not a reportable policy sale. Second, the basis of the interest, for the purpose of determining gain or loss with respect to the transferee, is determinable in whole or in part by reference to the basis of the interest in the hands of the transferor (see section 101(a)(2)(A)). Third, paragraph (b)(1)(ii)(B) of this section does not apply. In the case of a transfer described in this paragraph (b)(1)(ii)(A), the amount of the proceeds attributable to the interest that is excludable from gross income under section 101(a)(1) is limited to the sum of the amount that would have been excludable by the transferor if the transfer had not occurred and the premiums and other amounts subsequently paid by the transferee with respect to the interest. The preceding sentence applies without regard to whether the interest previously has been transferred and the nature of any prior transfer of the interest.

Thus, the substituted basis rule of Code § 101(a)(2)(A) applies when the permitted transferee rule of Code § 101(a)(2)(B), which is elaborated upon in Reg. § 1.101-1(b)(1)(ii)(B), does not apply. Reg. § 1.101-1(b)(1)(ii)(B), "Exception for transfers to certain persons," provides:

(1) *In general*. The limitation described in paragraph (b)(1)(i) of this section does not apply to the transfer of an interest in a life insurance contract for valuable consideration if both of the following requirements are satisfied. First, the transfer is not a reportable policy sale and the interest was not previously transferred for valuable consideration in a reportable policy sale. Second, the interest is transferred to the insured, a partner of the insured, a partnership in which the insured is a partner, or a corporation in which the insured is a shareholder or officer (see section 101(a)(2)(B)).

(2) *Transfers to certain persons subsequent to a reportable policy sale*. Except as provided in paragraph (b)(1)(ii)(B)(3) of this section, if a transfer of an interest in a life insurance contract would be described in paragraph (b)(1)(ii)(B)(/) of this section, but for the fact that the interest previously was transferred for valuable consideration in a reportable policy sale (whether in the immediately preceding transfer or an earlier transfer), then the amount of the proceeds attributable to the interest that is excludable from gross income under section 101(a)(1) is limited to the sum of -

(i) The higher of the amount that would have been excludable by the transferor if the transfer had not occurred or the actual value of the consideration for the transfer paid by the transferee; and

(ii) The premiums and other amounts subsequently paid by the transferee with respect to the interest.

(3) *Transfers to the insured subsequent to a reportable policy sale*.

(i) Except as provided in paragraph (b)(1)(ii)(B)(3)(ii) of this section, to the extent that an interest (or portion of an interest) in a life insurance contract that was transferred for valuable consideration in a reportable policy sale subsequently is transferred to the insured for valuable consideration, the limitations described in paragraph (b)(1)(i) of this section and paragraph (b)(1)(ii)(B)(2) of this section do not apply. To the extent that fair market value is not paid by the insured for the transferred interest, the transfer of the portion of the interest with a value in excess of the consideration paid will be treated as a gift under the bargain sale rule in paragraph (b)(2)(iii) of this section.

(ii) This paragraph (b)(1)(ii)(B)(3)(ii) applies with respect to an interest described in paragraph (b)(1)(ii)(B)(3)(i) of this section (or portion of such an interest) that subsequently is transferred by the insured to any other person. If all subsequent transfers of the interest (or portion of the interest) are gratuitous transfers that are not reportable policy sales, the amount of the proceeds excluded from gross income is determined under paragraph (b)(2)(i) of this section, taking into account the application of paragraph (b)(1)(ii)(B)(3)(i) of this section to the insured's acquisition of the interest. If any subsequent transfer of the interest (or portion of the interest) is for valuable consideration or is a reportable policy sale, the amount of the policy proceeds excludable from gross income is determined in accordance with paragraph (b) of this section; if the amount that would have been excludable from gross income by the insured following the transaction described in paragraph (b)(1)(ii)(B)(3)(i) of this section if no subsequent transfer had occurred is relevant, that amount is determined under paragraph (b)(1)(ii)(B)(2) of this section. Paragraph (g)(8) (Example 8) of this section and paragraph (g)(9) (Example 9) of this section illustrate the application of this paragraph (b)(1)(ii)(B)(3)(ii).

Reg. § 1.101-1(b)(1)(ii)(B)(1) above continues the policy of the prior regulations that a transfer to a permitted transferee cleanses a prior transfer for value, but it adds in the requirement that the transfer not be a reportable policy and removes the requirement that the transfer be the final transfer before the insured's death.[4379]

Reg. § 1.101-1(b)(1)(ii)(B)(3) was added in response to my comments requesting cleansing if the insured buys the policy after a reportable policy sale. See part II.Q.4.b.ii.(e) Cleansing by Transfer Back to Insured.[4380]

Examples (10) through (12) in Reg. § 1.101-1(g)(10) through(12)[4381] shed some light on this rule (other than the cleansing aspects, which are discussed later:

(10) *Example 10*. A is the initial policyholder of a $100,000 insurance policy on A's life. A contributes the policy to Corporation X in exchange for stock. Corporation X's basis in the policy is determinable in whole or in part by reference to A's basis in the policy. Corporation X conducts an active trade or business that it wholly owns, and A materially participates in that active trade or business as an employee of Corporation X. Corporation X receives the proceeds of $100,000 on A's death. A's contribution of the policy to Corporation X is not a reportable policy sale because Corporation X has a substantial business relationship with A under paragraph (d)(2)(i) of this section. Although Corporation X's basis in the policy is

---

[4379] Reg. § 1.101-1(b)(1)(ii)(B)(1) is applied is Example (3), which is discussed in the text accompanying fn 4385 in part II.Q.4.b.ii.(e) Cleansing by Transfer Back to Insured.

[4380] Especially text accompanying fn 4389.

[4381] Reg. § 1.101-1(g), "Examples," begins with:

> The application of this section is illustrated by the following examples. Each example assumes that the transferee did not receive any amounts under the life insurance contract other than the amounts described in the examples. With the exception of paragraph (g)(7) (Example 7) of this section, the bargain sale rules set forth in paragraph (b)(2)(iii) of this section do not apply in the examples because the consideration paid for the policy transferred is fair market value....

determinable in whole or in part by reference to A's basis in the policy, paragraph (b)(1)(ii)(A) of this section does not apply because the insured, A, is a shareholder of Corporation X and the other requirements under paragraph (b)(1)(ii)(B) of this section are satisfied. Accordingly, paragraph (b)(1)(ii)(B) of this section applies, and paragraph (b)(1)(ii)(A) of this section is inapplicable. Under paragraph (b)(1)(ii)(B)(/) of this section, Corporation X's exclusion is not limited by paragraph (b) of this section.

(11) *Example 11*. The facts are the same as in Example 10 in paragraph (g)(10) of this section, except that Corporation X transfers its active trade or business and the policy on A's life to Corporation Y in a tax-free reorganization at a time when A is still employed by Corporation X, but is no longer a shareholder of Corporation X. Corporation Y's basis in the policy is determinable in whole or in part by reference to Corporation X's basis in the policy, and Corporation Y carries on the trade or business acquired from Corporation X. Corporation Y receives the proceeds of $100,000 on A's death. The transfer from Corporation X to Corporation Y is not a reportable policy sale because Corporation Y has a substantial business relationship with A under paragraph (d)(2)(ii) of this section. The amount of the proceeds that Corporation Y may exclude from gross income is limited under paragraph (b)(1)(ii)(A) of this section to the sum of the amount that would have been excludable by Corporation X had the transfer to Corporation Y not occurred, plus any premiums and other amounts paid by Corporation Y with respect to the policy subsequent to the transfer. Accordingly, because Corporation X's exclusion is not limited by paragraph (b) of this section, as described in Example 10 in paragraph (g)(10) of this section, Corporation Y's exclusion is not limited by paragraph (b) of this section.

(12) *Example 12*. A is the initial policyholder of a $100,000 insurance policy on A's life. A contributes the policy to a C corporation, Corporation W, in exchange for stock. After the acquisition, A owns less than 20% of the outstanding stock of Corporation W and owns stock possessing less than 20 % of the total combined voting power of all stock of Corporation W and is therefore not a key person with respect to Corporation W under section 264(e)(3). Corporation W's basis in the policy is determinable in whole or in part by reference to A's basis in the policy. However, no substantial family, business, or financial relationship exists between A and Corporation W, so A's contribution of the policy to Corporation W is a reportable policy sale. Corporation W receives the proceeds of $100,000 on A's death. Under paragraph (b)(1)(i) of this section, the amount of the proceeds Corporation W may exclude from gross income is limited to the actual value of the stock exchanged for the policy, plus any premiums and other amounts paid by Corporation W with respect to the policy subsequent to the transfer. The exceptions in paragraph (b)(1)(ii) of this section do not apply because the transfer to Corporation W is a reportable policy sale.

Example (10) meets each element of the 3-prong test of Reg. § 1.101-1(b)(1)(ii). Example (11) meets the substituted basis and not-a-reportable-sale elements but not the qualified transferee element. However, Example (11) concludes that, because the transferor would have excluded the proceeds from gross income, the substituted-basis transferee may also do so. Thus, Reg. § 1.101-1(b)(1) is essentially imprinting on to the substituted basis rule of Code § 101(a)(2)(A) the idea that a policy's taint under the transfer-for-value rule continues when the policy is transferred in a substituted basis transaction without being cleansed.

Conventional wisdom had been that a transfer to the insured would cleanse the taint. However, Reg. § 1.101-1 seems to suggest limitations on which transfers to the insured would cleanse the taint; see part II.Q.4.b.ii.(e) Cleansing by Transfer Back to Insured.

Example (12) points out that a substituted basis transfer that is a reportable policy sale is subject to the transfer-for-value rules, which is consistent with Code § 101(a)(3).

II.Q.4.b.ii.(e). Cleansing by Transfer Back to Insured or Permitted Transferee

For a sale that is ***not*** a reportable policy sale, Examples (1), (2) and (3) in Reg. § 1.101-1(g)(1), (2), and (3)[4382] describe how to cleanse a policy:

(1) *Example 1*. A is the initial policyholder of a $100,000 insurance policy on A's life. A sells the policy to B, A's child, for $6,000, its fair market value. B is not a partner in a partnership in which A is a partner. B receives the proceeds of $100,000 upon the death of A. Because the transfer to B was for valuable consideration, and none of the exceptions in paragraph (b)(1)(ii) of this section applies, the amount of the proceeds B may exclude from B's gross income under this section is limited under paragraph (b)(1)(i) of this section to $6,000 plus any premiums and other amounts paid by B with respect to the policy subsequent to the transfer.

(2) *Example 2*. The facts are the same as in Example 1 in paragraph (g)(1) of this section except that, before A's death, B gratuitously transfers the policy back to A. A's estate receives the proceeds of $100,000 on A's death. Because the transfer from B to A is a gratuitous transfer to the insured, and the preceding transfer from A to B was not a reportable policy sale, the amount of the proceeds A's estate may exclude from gross income under this section is not limited by paragraph (b)(2)(i) of this section.

(3) *Example 3*. The facts are the same as in Example 1 in paragraph (g)(1) of this section except that, before A's death, B sells the policy back to A for its fair market value. A's estate receives the proceeds of $100,000 on A's death. The transfer from A to B is not a reportable policy sale because the acquirer B has a substantial family relationship with the insured, A. The transfer from B to A also is not a reportable policy sale because the acquirer A has a substantial family relationship with the insured, A. Accordingly, paragraph (b)(1)(ii)(B)(*l*) of this section applies to the transfer to A, and the amount of the proceeds A's estate may exclude from gross income is not limited by paragraph (b) of this section.

Before discussing cleansing, let's discuss Example (1). If A had given the policy to B, then the gift would have qualified for the substituted basis exception to the transfer for value rule. If A had sold the policy to an irrevocable grantor trust that A had previously established for B, the sale would have been disregarded and the rule would not have applied.[4383]

[4382] Reg. § 1.101-1(g), "Examples," begins with:

> The application of this section is illustrated by the following examples. Each example assumes that the transferee did not receive any amounts under the life insurance contract other than the amounts described in the examples. With the exception of paragraph (g)(7) (Example 7) of this section, the bargain sale rules set forth in paragraph (b)(2)(iii) of this section do not apply in the examples because the consideration paid for the policy transferred is fair market value....

[4383] See Rev. Rul. 2007-13, reproduced in fn 4338 in part II.Q.4.b.i Transfer for Value Rule Generally.

Example (2) cleansed the policy by a gratuitous transfer to the insured under Reg. § 1.101-1(b)(2)(i).[4384]

Example (3) applies the exception for a transfer for valuable consideration to a permitted transferee in Reg. § 1.101-1(b)(1)(ii)(B)(1).[4385] Unlike Example (2), it was a transfer for valuable consideration, so it also had to avoid being a reportable policy sale.

For a sale that ***<u>is</u>*** a reportable policy sale, the Examples in Reg. § 1.101-1(g)(4), (5), and (6)[4386] in the proposed regulations asserted that no transfer back to the insured will cleanse the policy from the transfer for value rules, but the final regulations allow a fair market value sale to the insured to cleanse the policy:

(4) *Example 4*. A is the initial policyholder of a $100,000 insurance policy on A's life. A transfers the policy for $6,000, its fair market value, to an individual, C, who does not have a substantial family, business, or financial relationship with A. The transfer from A to C is a reportable policy sale. C receives the proceeds of $100,000 on A's death. The amount of the proceeds C may exclude from C's gross income under this section is limited under paragraph (b)(1)(i) of this section to $6,000 plus any premiums and other amounts paid by C with respect to the policy subsequent to the transfer.

(5) *Example 5*. The facts are the same as in Example 4 in paragraph (g)(4) of this section, except that before A's death, C transfers the policy to D, a partner of A who co-owns real property with A, for $8,000, the policy's fair market value. D receives the proceeds of $100,000 on A's death. The transfer from C to D is not a reportable policy sale because the acquirer D has a substantial financial relationship with the insured, A. However, because that transfer follows a reportable policy sale (the transfer from A to C), the amount of the proceeds that D may exclude from gross income under this section is limited by paragraph (b)(1)(ii)(B)(2) of this section to the sum of--

(i) The higher of the amount C could have excluded had the transfer to D not occurred ($6,000 plus any premiums and other amounts paid by C with respect to the policy subsequent to the transfer to C, as described in Example 4 in paragraph (g)(4) of this section) or the actual value of the consideration for that transfer paid by D ($8,000); and

(ii) Any premiums and other amounts paid by D with respect to the policy subsequent to the transfer to D.

[4384] Fn 4390 reproduces the relevant part of . § 1.101-1(b)(2)(i), and Reg. § 1.101-1(b)(2) is reproduced in the text preceding fn 4351 in part II.Q.4.b.ii The Impact of Reportable Policy Sale on Transfer for Value Rule.

[4385] See text accompanying and preceding fn 4379 in part II.Q.4.b.ii.(d) Transfer With Substituted Basis or To Permitted Transferee When Not a Reportable Policy Sale.

[4386] Reg. § 1.101-1(g), "Examples," begins with:

> The application of this section is illustrated by the following examples. Each example assumes that the transferee did not receive any amounts under the life insurance contract other than the amounts described in the examples. With the exception of paragraph (g)(7) (Example 7) of this section, the bargain sale rules set forth in paragraph (b)(2)(iii) of this section do not apply in the examples because the consideration paid for the policy transferred is fair market value....

(6) *Example 6*. The facts are the same as in Example 4 in paragraph (g)(4) of this section, except that before A's death, C transfers the policy back to A for $8,000, its fair market value. A's estate receives the proceeds of $100,000 on A's death. The transfer from C to A is not a reportable policy sale because the acquirer A has a substantial family relationship with the insured, A. Although the transfer follows a reportable policy sale (the initial transfer from A to C), A's estate may exclude all of the policy proceeds from gross income because paragraph (b)(1)(ii)(B)(3)(i) of this section applies and, therefore, the amount of the proceeds that A may exclude from gross income is not limited by paragraph (b)(1)(i) of this section or (b)(1)(ii)(B)(2) of this section.

Reg. § 1.101-1(g)(7), Example (7)[4387] applies the bargain sale rule to Example (6):

(7) *Example 7*. The facts are the same as in Example 6 in paragraph (g)(6) of this section, except that C transfers the policy back to A for $4,000, rather than its fair market value of $8,000. A's estate receives the proceeds of $100,000 on A's death. Because A did not pay fair market value for the policy, the transfer is bifurcated and treated as a bargain sale under paragraph (b)(2)(iii) of this section. A therefore is treated as having purchased 50% of the policy interest for valuable consideration equal to fair market value and as having received 50% of the policy interest in a gratuitous transfer. The transfer from C to A is not a reportable policy sale because the acquirer, A, has a substantial family relationship with the insured, A, but the transfer from C to A follows a reportable policy sale (the transfer from A to C).

(i) *Treatment of policy interest purchased by A*. A's estate may exclude from income all of the policy proceeds related to the 50% policy interest transferred for valuable consideration ($50,000) because, under paragraph (b)(1)(ii)(B)(3)(i) of this section, the amount of the proceeds that may be excluded from gross income is not limited by paragraph (b)(1)(i) of this section or (b)(1)(ii)(B)(2) of this section.

(ii) *Treatment of policy interest gratuitously transferred to A*. The amount of the policy proceeds related to the 50% policy interest transferred gratuitously that A's estate may exclude from income is limited under paragraph (b)(2)(i) of this section to the sum of the amount C could have excluded with respect to 50% of the policy had the transfer back to A not occurred (that is, 50% of the $6,000 that C paid A for the policy, plus 50% of any premiums and other amounts paid by C with respect to the policy subsequent to the transfer to C), plus 50% of any premiums and other amounts paid by A with respect to the policy subsequent to the transfer to A.

[4387] Reg. § 1.101-1(g), "Examples," begins with:

The application of this section is illustrated by the following examples. Each example assumes that the transferee did not receive any amounts under the life insurance contract other than the amounts described in the examples. With the exception of paragraph (g)(7) (Example 7) of this section, the bargain sale rules set forth in paragraph (b)(2)(iii) of this section do not apply in the examples because the consideration paid for the policy transferred is fair market value....

Additional cleansing examples are in Reg. § 1.101-1(g)(8) and (9), Examples (8) and (9)[4388]:

(8) *Example 8*. The facts are the same as in Example 6 in paragraph (g)(6) of this section, except that, before A's death, A gratuitously transfers 50% of the policy interest to B, A's child, and sells 50% of the policy interest for its fair market value to an individual, E, who does not have a substantial family, business, or financial relationship with A. B and E each receive $50,000 of the proceeds on A's death. Paragraph (b)(1)(ii)(B)(3)(ii) of this section applies to determine the amount of the proceeds that B and E may exclude from gross income because the policy interests transferred to B and E were first transferred for valuable consideration in a reportable policy sale (the transfer by A to C) and then transferred to the insured, A, for fair market value.

(i) *Treatment of policy interest transferred to B*. With respect to the portion of the policy interest transferred to B, because the transfer to B was the only transfer subsequent to the transfer to A and the transfer to B was gratuitous and not a reportable policy sale, under paragraph (b)(1)(ii)(B)(3)(ii) of this section, the amount of the policy proceeds excludable from gross income by B is determined under paragraph (b)(2)(i) of this section, taking into account the application of paragraph (b)(1)(ii)(B)(3)(i) of this section to A's acquisition of the interest. Under paragraph (b)(2)(i) of this section, the amount of the proceeds B may exclude is limited to the sum of the amount A could have excluded had the transfer to B not occurred, and any premiums and other amounts paid by B with respect to the policy subsequent to the transfer to B. As described in Example 6 in paragraph (g)(6) of this section, under paragraph (b)(1)(ii)(B)(3)(i) of this section, the amount of the proceeds that A may exclude from gross income is not limited by paragraph (b)(1)(i) of this section or (b)(1)(ii)(B)(2) of this section. Accordingly, the amount of the proceeds that B may exclude from gross income is not limited by paragraph (b) of this section.

(ii) *Treatment of policy interest transferred to E*. With respect to the portion of the policy interest transferred to E, because the transfer to E was not gratuitous and was a reportable policy sale, under paragraph (b)(1)(ii)(B)(3)(ii) of this section, the amount of the policy proceeds excludable from gross income by E is determined in accordance with paragraph (b) of this section. Accordingly, because the transfer to E was for valuable consideration, the amount excludable from gross income by E is limited by paragraph (b)(1)(i) of this section unless an exception in paragraph (b)(1)(ii) of this section applies. Because the transfer from A to E is a reportable policy sale, none of the exceptions in paragraph (b)(1)(ii) of this section apply. Therefore, the amount of the proceeds E may exclude from gross income under this section is limited by paragraph (b)(1)(i) of this section to the sum of the consideration paid by E and the premiums and other amounts paid by E with respect to the policy subsequent to the transfer to E.

[4388] Reg. § 1.101-1(g), "Examples," begins with:

The application of this section is illustrated by the following examples. Each example assumes that the transferee did not receive any amounts under the life insurance contract other than the amounts described in the examples. With the exception of paragraph (g)(7) (Example 7) of this section, the bargain sale rules set forth in paragraph (b)(2)(iii) of this section do not apply in the examples because the consideration paid for the policy transferred is fair market value....

(9) *Example 9*. The facts are the same as in Example 8 in paragraph (g)(8) of this section, except that, before A's death, B transfers B's policy interest to Partnership F, whose partners are A and other family members of A, in exchange for a partnership interest in Partnership F. Partnership F receives $50,000 of the proceeds on A's death. With respect to the policy interest transferred to Partnership F, paragraph (b)(1)(ii)(B)(3)(ii) of this section applies to determine the amount of the proceeds that Partnership F may exclude from gross income for the reasons described in Example 8 in paragraph (g)(8) of this section.

(i) *Treatment of policy interest transferred to Partnership F*. The transfer to Partnership F was not a reportable policy sale. However, because the transfer to Partnership F was not gratuitous, the amount of the policy proceeds excludable from gross income by Partnership F is determined in accordance with paragraph (b) of this section as if the amount that would have been excludable from gross income by A following the transfer to A, if no subsequent transfer had occurred, was determined under paragraph (b)(1)(ii)(B)(2) of this section. Because B's transfer to Partnership F was a transfer for valuable consideration to a partnership in which the insured is a partner that was preceded by a reportable policy sale (the transfer to C), the amount of the proceeds Partnership F may exclude from gross income under this section is limited under paragraph (b)(1)(ii)(B)(2) of this section to the higher of the amount that would have been excludable by B if the transfer to Partnership F had not occurred or the actual value of the consideration for the policy paid by Partnership F, plus any premiums and other amounts paid by Partnership F with respect to the policy subsequent to the transfer to Partnership F.

(ii) *Amount that B could have excluded*. Because the transfer from A to B was a gratuitous transfer, the amount of the proceeds B could have excluded from gross income under this section if the transfer to Partnership F had not occurred is limited under paragraph (b)(2)(i) of this section to the sum of the amount A could have excluded had the transfer to B not occurred, and any premiums and other amounts paid by B with respect to the policy subsequent to the transfer to B.

(iii) *Amount that A could have excluded*. As described in paragraph (g)(9)(i) of this section, the amount of the proceeds A could have excluded under this section if the transfer to B had not occurred must be determined under paragraph (b)(1)(ii)(B)(2) of this section in accordance with paragraph (b)(1)(ii)(B)(3)(ii) of this section. Under paragraph (b)(1)(ii)(B)(2) of this section, the amount that would have been excludable by A is limited to the higher of the amount that would have been excludable by C if the transfer to A had not occurred ($6,000 plus premiums and other amounts subsequently paid by C) or the actual value of the consideration for the policy paid by A ($8,000), plus any premiums and other amounts paid by A with respect to the policy subsequent to the transfer to A.

These Examples helpfully illustrate that reportable policy sale can be completely cleansed through a sale to the insured for fair market value, and a subsequent transferee may (if appropriate) inherit the policy's cleansed status.[4389] A bargain sale is broken into its separate

[4389] Reg. § 1.101-1(b)(1)(ii)(B)(3) is reproduced in the text preceding fn 4380.

components of a sale plus a gratuitous transfer. A gratuitous transfer back to the insured does not cleanse the policy after a reportable policy sale. Furthermore, Reg. § 1.101-1(b)(2) also provides cleansing: “if an interest in a life insurance contract is transferred gratuitously to the insured, and that interest has not previously been transferred for value in a reportable policy sale, the entire amount of the proceeds attributable to the interest transferred to the insured is excludable from gross income.”[4390] And that cleansing can apply to subsequent transferees, when appropriate. I am delighted that, in response my comments, the final regulations provide both of these cleansing opportunities.

Contrast this to what was in effect before the reportable policy sale rules were enacted, Reg. § 1.101-1(b)(3), which had provided:

> In the case of a series of transfers, if the last transfer of a life insurance policy or an interest therein is for a valuable consideration -
>
> (i) The general rule is that the final transferee shall exclude from gross income, with respect to the proceeds of such policy or interest therein, only the sum of—
>
> (a) The actual value of the consideration paid by him, and
>
> (b) The premiums and other amounts subsequently paid by him;
>
> (ii) If the final transfer is to the insured, to a partner of the insured, to a partnership in which the insured is a partner, or to a corporation in which the insured is a shareholder or officer, the final transferee shall exclude the entire amount of the proceeds from gross income;
>
> (iii) Except where subdivision (ii) of this subparagraph applies, if the basis of the policy or interest transferred, for the purpose of determining gain or loss with respect to the final transferee, is determinable, in whole or in part, by reference to the basis of such policy or interest therein in the hands of the transferor, the amount of the proceeds which is excludable by the final transferee is limited to the sum of—
>
> (a) The amount which would have been excludable by his transferor if no such transfer had taken place, and
>
> (b) Any premiums and other amounts subsequently paid by the final transferee himself.

Thus, under prior regulations, cleansing applied only to a transfer to the insured for valuable consideration and then only if the insured or a permitted transferee was the final transferee. The prior regulations were much narrower than what the 2019 regulations adopted.

II.Q.4.b.ii.(f). Reporting Requirements for Reportable Policy Sales

See “About Form 1099-LS, Reportable Life Insurance Sale,” at https://www.irs.gov/forms-pubs/about-form-1099-ls.

[4390] Reg. § 1.101-1(b)(2) is reproduced in the text preceding fn 4351 in part II.Q.4.b.ii The Impact of Reportable Policy Sale on Transfer for Value Rule.

Code § 6050Y, “Returns relating to certain life insurance contract transactions,” starts with subsection (a), “Requirements of reporting of certain payments”:

(1) *In general*. Every person who acquires a life insurance contract or any interest in a life insurance contract in a reportable policy sale during any taxable year shall make a return for such taxable year (at such time and in such manner as the Secretary shall prescribe) setting forth—

(A) the name, address, and TIN of such person,

(B) the name, address, and TIN of each recipient of payment in the reportable policy sale,

(C) the date of such sale,

(D) the name of the issuer of the life insurance contract sold and the policy number of such contract, and

(E) the amount of each payment.

(2) *Statement to be furnished to persons with respect to whom information is required*. Every person required to make a return under this subsection shall furnish to each person whose name is required to be set forth in such return a written statement showing—

(A) the name, address, and phone number of the information contact of the person required to make such return, and

(B) the information required to be shown on such return with respect to such person, except that in the case of an issuer of a life insurance contract, such statement is not required to include the information specified in paragraph (1)(E).

Code § 6050Y(b), “Requirement of reporting of seller’s basis in life insurance contracts,” provides:

(1) *In general*. Upon receipt of the statement required under subsection (a)(2) or upon notice of a transfer of a life insurance contract to a foreign person, each issuer of a life insurance contract shall make a return (at such time and in such manner as the Secretary shall prescribe) setting forth—

(A) the name, address, and TIN of the seller who transfers any interest in such contract in such sale,

(B) the investment in the contract (as defined in section 72(e)(6)) with respect to such seller, and

(C) the policy number of such contract.

(2) *Statement to be furnished to persons with respect to whom information is required*. Every person required to make a return under this subsection shall furnish to each

person whose name is required to be set forth in such return a written statement showing—

(A) the name, address, and phone number of the information contact of the person required to make such return, and

(B) the information required to be shown on such return with respect to each seller whose name is required to be set forth in such return.

Code § 6050Y(c), "Requirement of reporting with respect to reportable death benefits," provides:

(1) In general. Every person who makes a payment of reportable death benefits during any taxable year shall make a return for such taxable year (at such time and in such manner as the Secretary shall prescribe) setting forth—

(A) the name, address, and TIN of the person making such payment,

(B) the name, address, and TIN of each recipient of such payment,

(C) the date of each such payment,

(D) the gross amount of each such payment, and

(E) such person's estimate of the investment in the contract (as defined in section 72(e)(6)) with respect to the buyer.

(2) Statement to be furnished to persons with respect to whom information is required. Every person required to make a return under this subsection shall furnish to each person whose name is required to be set forth in such return a written statement showing—

(A) the name, address, and phone number of the information contact of the person required to make such return, and

(B) the information required to be shown on such return with respect to each recipient of payment whose name is required to be set forth in such return.

Code § 6050Y(d), "Definitions," provides that, for purposes of Code § 6050Y:

(1) *Payment*. The term "payment" means, with respect to any reportable policy sale, the amount of cash and the fair market value of any consideration transferred in the sale.

(2) *Reportable policy sale*. The term "reportable policy sale" has the meaning given such term in section 101(a)(3)(B).

(3) *Issuer*. The term "issuer" means any life insurance company that bears the risk with respect to a life insurance contract on the date any return or statement is required to be made under this section.

(4) *Reportable death benefits*. The term "reportable death benefits" means amounts paid by reason of the death of the insured under a life insurance contract that has been transferred in a reportable policy sale.

For details on the definition of “reportable policy sale” in Code § 101(a)(3)(B), see part II.Q.4.b.ii.(c) “Reportable Policy Sale”.

Part 1.A.3 of the preamble to the final regulations, T.D. 9879 (10/31/2019), “Applicability Date for Section 6050Y Regulations,” explains:

> Section 1.6050Y-1 of the proposed regulations provides that the rules in § 1.6050Y-1 through 1.6050Y-4 of the proposed regulations apply to reportable policy sales made and reportable death benefits paid after December 31, 2017, and provides transition relief with respect to reporting required on reportable policy sales and payments of reportable death benefits occurring after December 31, 2017, and before the date final regulations under section 6050Y are published in the Federal Register.
>
> One commenter recommended that reporting obligations under section 6050Y (as well as application of the rules under section 101 relating to section 6050Y) be delayed until 60 days after the date the final regulations are published in the Federal Register. Informal comments also were received requesting transition relief (such as delayed reporting) or permanent relief with respect to the reporting obligations under section 6050Y for reportable policy sales and payments of reportable death benefits occurring after December 31, 2017, and before January 1, 2019 (such as waiving the reporting obligations for this period). One commenter requested that at least an additional 30 days be added to the 90-day relief period provided in § 1.6050Y-1(b)(2) and (3) of the proposed regulations for filing returns and furnishing statements required under section 6050Y(b) and (c) and § 1.6050Y-3 and 1.6050Y-4 of the proposed regulations, to give issuers at least 60 days to complete their reporting after the 60-day extension period provided to acquirers of an interest in a life insurance contract under § 1.6050Y-1(b)(1) of the proposed regulations. The commenter asserted that issuers require significantly more time than the 30 days effectively provided to complete Forms 1099-SB, “Seller’s Investment in Life Insurance Contract,” and 1099-R “Distributions From Pensions, Annuities, Retirement or Profit-Sharing Plans, IRAs, Insurance Contracts, etc.”, and to add new forms (such as Form 1099-SB) to their systems. The commenter stated that issuers must identify policies that are subject to reporting once the Forms 1099-LS, “Reportable Life Insurance Sale,” are received as well as enhance systems to track these policies over their life and transmit data between various systems in order to accurately report under sections 6050Y(b) and (c).
>
> In response to these comments, and to give acquirers and issuers ample time to develop and implement reporting systems, the final regulations provide that the rules in §§ 1.6050Y-1 through 1.6050Y-4 of the final regulations apply to reportable policy sales made and reportable death benefits paid after December 31, 2018. See § 1.6050Y-1(b) of the final regulations. As a result, no reporting is required under section 6050Y for reportable policy sales made and reportable death benefits paid after December 31, 2017, and before January 1, 2019.
>
> Section 1.6050Y-1(a)(12) of the final regulations defines “reportable death benefits” as “amounts paid by reason of the death of the insured under a life insurance contract that are attributable to an interest in the contract that was transferred in a reportable policy sale.” Accordingly, because the definition of “reportable policy sale” under § 1.6050Y-1(a)(14) of the final regulations applies only to transfers of interests in life insurance contracts made after December 31, 2018, death benefits are “reportable death benefits” under § 1.6050Y-1(a)(12) of the final regulations and are subject to the reporting

> requirements of § 1.6050Y-4 of the final regulations only if the death benefits are paid by reason of the death of the insured under a life insurance contract transferred after December 31, 2018, in a reportable policy sale.
>
> The final regulations also provide transition relief as set forth in the proposed regulations with two modifications. First, the transition relief applies with respect to reportable policy sales made and reportable death benefits paid after December 31, 2018, and on or before October 31, 2019. Second, as requested by one of the commenters, § 1.6050Y-1(b)(3), (4), and (5) of the final regulations provide issuers with at least 120 days after the final regulations are published in the Federal Register to file returns and furnish statements under section 6050Y(b) and (c) and §§ 1.6050Y-3 and 1.6050Y-4 of the final regulations. These features of the final regulations are intended to give acquirers and issuers ample time to develop and implement reporting systems.
>
> Noting that 250 or more information returns of a single taxpayer must be filed electronically, one commenter requested waivers from electronic filing for 2018 and 2019 issuer reporting under section 6050Y(b) and (c). The Treasury Department and the IRS have determined not to provide the requested waiver in the final regulations under section 6050Y because procedures already exist for any person required to file 250 or more returns during the calendar year to request a waiver from the requirement to file electronically by showing hardship. See § 301.6011-2(c).

Part 7 of the preamble to the final regulations, T.D. 9879 (10/31/2019), "Comments and Changes Relating to Sec. 1.6050Y-1 of the Proposed Regulations," explains:

> Section 1.6050Y-1 of the proposed regulations provides that the rules in § 1.6050Y-1 through 1.6050Y-4 of the proposed regulations apply to reportable policy sales made and reportable death benefits paid after December 31, 2017, and provides transition relief with respect to reporting required on reportable policy sales and payments of reportable death benefits occurring after December 31, 2017, and before the date final regulations under section 6050Y are published in the Federal Register.

I have not reproduced the rest of the preamble explaining various changes to these regulations.

Reg. § 1.6050Y-2, "Information reporting by acquirers for reportable policy sale payments," provides:

> (a) *Requirement of reporting*. Except as provided in paragraph (f) of this section, every person that is an acquirer in a reportable policy sale during any calendar year must file a separate information return with the Internal Revenue Service (IRS) in the form and manner as required by the IRS for each reportable policy sale payment recipient, including any seller that is a reportable policy sale payment recipient. Each return must include the following information with respect to the seller or other reportable policy sale payment recipient to which the return relates:
>
> (1) The name, address, and taxpayer identification number (TIN) of the acquirer;
>
> (2) The name, address, and TIN of the seller or other reportable policy sale payment recipient to which the return relates;
>
> (3) The date of the reportable policy sale;

(4) The name of the 6050Y(a) issuer of the life insurance contract acquired and the policy number of the life insurance contract;

(5) The aggregate amount of reportable policy sale payments made, or to be made, to the seller or other reportable policy sale payment recipient to which the return relates with respect to the reportable policy sale; and

(6) Any other information that is required by the form or its instructions.

(b) *Unified reporting*. The information reporting requirement of paragraph (a) of this section applies to each acquirer in a series of prearranged transfers of an interest in a life insurance contract, as well as each acquirer in a simultaneous transfer of different interests in a single life insurance contract. In either case, an acquirer's reporting obligation is deemed satisfied if the information required by paragraph (a) of this section with respect to that acquirer is timely reported on behalf of that acquirer in a manner that is consistent with forms, instructions, and other IRS guidance by one or more other acquirers or by a third party information reporting contractor.

(c) *Time and place for filing*. Returns required to be made under paragraph (a) of this section must be filed with the Internal Revenue Service Center designated on the prescribed form or in its instructions on or before February 28 (March 31 if filed electronically) of the year following the calendar year in which the reportable policy sale occurred. However, see § 1.6050Y-1(b)(5) for transition rules.

(d) *Requirement of and time for furnishing statements*.

(1) *Statements to reportable policy sale payment recipients*.

(i) *Requirement of furnishing statement*. Every person required to file an information return under paragraph (a) of this section with respect to a reportable policy sale payment recipient must furnish in the form and manner prescribed by the IRS to the reportable policy sale payment recipient whose name is set forth in that return a written statement showing the information required by paragraph (a) of this section with respect to the reportable policy sale payment recipient and the name, address, and phone number of the information contact of the person furnishing the written statement. The contact information of the person furnishing the written statement must provide direct access to a person that can answer questions about the statement. The statement is not required to include information with respect to any other reportable policy sale payment recipient in the reportable policy sale or information about reportable policy sale payments to any other reportable policy sale payment recipient.

(ii) *Time for furnishing statement*. Each statement required by paragraph (d)(1)(i) of this section to be furnished to any reportable policy sale payment recipient must be furnished on or before February 15 of the year following the calendar year in which the reportable policy sale occurred. However, see § 1.6050Y-1(b)(2) for transition rules.

(2) *Statements to 6050Y(a) issuers*.

(i) *Requirement of furnishing RPSS*.

(A) *In general*. Except as provided in paragraph (d)(2)(i)(B) of this section, every person required to file a return under paragraph (a) of this section must furnish in the form and manner prescribed by the IRS to the 6050Y(a) issuer whose name is required to be set forth in the return an RPSS with respect to each reportable policy sale payment recipient that is also a seller. Each RPSS must show the information required by paragraph (a) of this section with respect to the seller named therein, except that the RPSS is not required to set forth the amount of any reportable policy sale payment. Each RPSS must also show the name, address, and phone number of the information contact of the person furnishing the RPSS. This contact information must provide direct access to a person that can answer questions about the RPSS.

(B) *Exception from reporting*. An RPSS is not required to be furnished to the 6050Y(a) issuer by an acquirer acquiring an interest in a life insurance contract in an indirect acquisition.

(ii) *Time for furnishing RPSS*. Except as provided in this paragraph (d)(2)(ii), each RPSS required by paragraph (d)(2)(i) of this section to be furnished to a 6050Y(a) issuer must be furnished by the later of 20 calendar days after the reportable policy sale, or 5 calendar days after the end of the applicable state law rescission period. However, if the later date is after January 15 of the year following the calendar year in which the reportable policy sale occurred, the RPSS must be furnished by January 15 of the year following the calendar year in which the reportable policy sale occurred. However, see § 1.6050Y-1(b)(1) for transition rules.

(3) *Unified reporting*. The information reporting requirements of paragraphs (d)(1)(i) and (d)(2)(i) of this section apply to each acquirer in a series of prearranged transfers of an interest in a life insurance contract, as well as each acquirer in a simultaneous transfer of different interests in a single life insurance contract, as described in paragraph (b) of this section. In either case, an acquirer's obligation to furnish statements is deemed satisfied if the information required by paragraphs (d)(1)(i) and (d)(2)(i) of this section with respect to that acquirer is timely reported on behalf of that acquirer consistent with forms, instructions, and other IRS guidance by one or more other acquirers or by a third party information reporting contractor.

(e) *Notice of rescission of a reportable policy sale*. Any person that has filed a return required by section 6050Y(a)(1) and this section with respect to a reportable policy sale must file a corrected return within 15 calendar days of the receipt of notice of the rescission of the reportable policy sale. Any person that has furnished a written statement under section 6050Y(a)(2) and this section with respect to the reportable policy sale must furnish the recipient of that statement with a corrected statement within 15 calendar days of the receipt of notice of the rescission of the reportable policy sale.

(f) *Exceptions to requirement to file*.

(1) An acquirer that is a foreign person is not required to file an information return under paragraph (a) of this section with respect to a reportable policy sale unless -

(i) The life insurance contract (or interest therein) transferred in the sale is on the life of an insured who is a United States person at the time of the sale; or

(ii) The sale is subject to the laws of one or more States of the United States that pertain to acquisitions or sales of life insurance contracts (or interests therein).

(2) An acquirer is not required to file an information return under paragraph (a) of this section with respect to a reportable policy sale payment to a reportable policy sale payment recipient other than the seller if the reportable policy sale payment is reported by the acquirer under section 6041 or 6041A.

(3) An acquirer is not required to file an information return under paragraph (a) of this section with respect to the issuance of a life insurance contract in an exchange pursuant to section 1035. However, the acquirer is required to furnish the 6050Y(a) issuer with the statement required under paragraph (d)(2) of this section as if the acquirer were required to file an information return under paragraph (a) of this section.

(g) *Cross-reference to penalty provisions*.

(1) *Failure to file correct information return*. For provisions relating to the penalty provided for failure to file timely a correct information return required under section 6050Y(a)(1) and this section, see section 6721 and § 301.6721-1 of this chapter. See section 6724(a) and § 301.6724-1 of this chapter for the waiver of a penalty if the failure is due to reasonable cause and is not due to willful neglect.

(2) *Failure to furnish correct statement*. For provisions relating to the penalty provided for failure to furnish timely a correct statement to identified persons under section 6050Y(a)(2) and this section, see section 6722 and § 301.6722-1 of this chapter. See section 6724(a) and § 301.6724-1 of this chapter for the waiver of a penalty if the failure is due to reasonable cause and is not due to willful neglect.

Reg. § 1.6050Y-6, "Information reporting by 6050Y(b) issuers for reportable policy sales and transfers of life insurance contracts to foreign persons," provides:

(a) *Requirement of reporting*. Except as provided in paragraph (f) of this section, each 6050Y(b) issuer that receives an RPSS or any notice of a transfer to a foreign person must file an information return with the Internal Revenue Service (IRS) with respect to each seller in the form and manner prescribed by the IRS. The return must include the following information with respect to the seller:

(1) The name, address, and taxpayer identification number (TIN) of the seller;

(2) The investment in the contract with respect to the seller;

(3) The amount the seller would have received if the seller had surrendered the life insurance contract on the date of the reportable policy sale or the transfer of the contract to a foreign person, or if the date of the transfer to a foreign person is not known to the 6050Y(b) issuer, the date the 6050Y(b) issuer received notice of the transfer; and

(4) Any other information that is required by the form or its instructions.

(b) *Unified reporting*. Each 6050Y(b) issuer subject to the information reporting requirement of paragraph (a) of this section must satisfy that requirement, but a 6050Y(b) issuer's reporting obligation is deemed satisfied if the information required by paragraph (a) of this section with respect to that 6050Y(b) issuer is timely reported on behalf of that 6050Y(b) issuer in a manner that is consistent with forms, instructions, and other IRS guidance by one or more other 6050Y(b) issuers or by a third party information reporting contractor.

(c) *Time and place for filing*. Except as provided in this paragraph (c), returns required to be made under paragraph (a) of this section must be filed with the Internal Revenue Service Center designated on the prescribed form or in its instructions on or before February 28 (March 31 if filed electronically) of the year following the calendar year in which the reportable policy sale or the transfer to a foreign person occurred. If the 6050Y(b) issuer does not receive notice of a transfer to a foreign person until after January 31 of the calendar year following the year in which the transfer occurred, returns required to be made under paragraph (a) of this section must be filed by the later of February 28 (March 31 if filed electronically) of the calendar year following the year in which the transfer occurred or thirty days after the date notice is received. However, see § 1.6050Y-1(b)(5) for transition rules.

(d) *Requirement of and time for furnishing statements*.

(1) *Requirement of furnishing statement*. Every 6050Y(b) issuer filing a return required by paragraph (a) of this section must furnish to each seller that is a reportable policy sale payment recipient or makes a transfer to a foreign person and whose name is required to be set forth in the return a written statement showing the information required by paragraph (a) of this section with respect to that seller and the name, address, and phone number of the information contact of the person filing the return. This contact information must provide direct access to a person that can answer questions about the statement.

(2) *Time for furnishing statement*. Except as provided in this paragraph (d)(2), each statement required by paragraph (d)(1) of this section to be furnished to any seller must be furnished on or before February 15 of the year following the calendar year in which the reportable policy sale or transfer to a foreign person occurred. If a 6050Y(b) issuer does not receive notice of a transfer to a foreign person until after January 31 of the calendar year following the year in which the transfer occurred, each statement required to be made under paragraph (d) of this section must be furnished by the date thirty days after the date notice is received. However, see § 1.6050Y-1(b)(3) for transition rules.

(3) *Unified reporting*. Each 6050Y(b) issuer subject to the information reporting requirement of paragraph (d)(1) of this section must satisfy that requirement, but a 6050Y(b) issuer's reporting obligation is deemed satisfied if the information required by paragraph (d)(1) of this section with respect to that 6050Y(b) issuer is timely reported on behalf of that 6050Y(b) issuer consistent with forms, instructions, and other IRS guidance by one or more other 6050Y(b) issuers or by a third party information reporting contractor.

(e) *Notice of rescission of a reportable policy sale or transfer of an insurance contract to a foreign person*. Any 6050Y(b) issuer that has filed a return required by section 6050Y(b)(1) and this section with respect to a reportable policy sale or transfer of an insurance contract to a foreign person must file a corrected return within 15 calendar days of the receipt of notice of the rescission of the reportable policy sale or transfer of the insurance contract to a foreign person. Any 6050Y(b) issuer that has furnished a written statement under section 6050Y(b)(2) and this section with respect to the reportable policy sale or transfer of the insurance contract to a foreign person must furnish the recipient of that statement with a corrected statement within 15 calendar days of the receipt of notice of the rescission of the reportable policy sale or transfer of the insurance contract to a foreign person.

(f) *Exceptions to requirement to file*. A 6050Y(b) issuer is not required to file an information return under paragraph (a) of this section if paragraph (f)(1), (2), or (3) of this section applies.

(1) Except as provided in this paragraph (f)(1), the 6050Y(b) issuer obtains documentation upon which it may rely to treat a seller of a life insurance contract or interest therein as a foreign beneficial owner in accordance with § 1.1441-1(e)(1)(ii), applying in such case the provisions of § 1.1441-1 by substituting the term "6050Y(b) issuer" for the term "withholding agent" and without regard to the fact that that these provisions apply only to amounts subject to withholding under chapter 3 of subtitle A of the Internal Revenue Code. A 6050Y(b) issuer may also obtain from a seller that is a partnership or trust, in addition to documentation establishing the entity's foreign status, a written certification from the entity that no beneficial owner of any portion of the proceeds of the sale is a United States person. In such a case, the issuer may rely upon the written certification to treat the partnership or trust as a foreign beneficial owner for purposes of this paragraph (f)(1) provided that the seller does not have actual knowledge that a United States person is the beneficial owner of all or a portion of the proceeds of the sale. See § 1.1441-1(c)(6)(ii) for the definition of beneficial owner that applies for purposes of this paragraph (f)(1). Additionally, for certifying its status as a foreign beneficial owner (as applicable) for purposes of this paragraph (f)(1), a seller that is required to report any of the income from the sale as effectively connected with the conduct of a trade or business in the United States under section 864(b) is required to provide to the 6050Y(b) issuer a Form W-8ECI, Certificate of Foreign Person's Claim that Income is Effectively Connected with the Conduct of a Trade or Business in the United States. If a 6050Y(b) issuer obtains a Form W-8ECI from a seller with respect to the sale or has reason to know that income from the sale is effectively connected with the conduct of a trade or business in the United States under section 864(b), the exception to reporting described in this paragraph (f)(1) does not apply.

(2) The 6050Y(b) issuer receives notice of a transfer to a foreign person, but does not receive an RPSS with respect to the transfer, provided that, at the time the notice is received -

(i) The 6050Y(b) issuer is not a United States person;

(ii) The life insurance contract (or interest therein) transferred is not on the life of a United States person; and

(iii) The 6050Y(b) issuer has not classified the seller as a United States person in its books and records.

(3) The RPSS received by the 6050Y(b) issuer is with respect to the 6050Y(b) issuer's issuance of a life insurance contract to a policyholder in an exchange pursuant to section 1035.

(g) *Cross-reference to penalty provisions*.

(1) *Failure to file correct information return*. For provisions relating to the penalty provided for failure to file timely a correct information return required under section 6050Y(b)(1) and this section, see section 6721 and § 301.6721-1 of this chapter. See section 6724(a) and § 301.6724-1 of this chapter for the waiver of a penalty if the failure is due to reasonable cause and is not due to willful neglect.

(2) *Failure to furnish correct statement*. For provisions relating to the penalty provided for failure to furnish timely a correct statement to identified persons under section 6050Y(b)(2) and this section, see section 6722 and § 301.6722-1 of this chapter. See section 6724(a) and § 301.6724-1 of this chapter for the waiver of a penalty if the failure is due to reasonable cause and is not due to willful neglect.

Reg. § 1.6050Y-7, "Information reporting by payors for reportable death benefits," provides:

(a) *Requirement of reporting*. Except as provided in paragraph (e) of this section, every person that is a payor of reportable death benefits during any calendar year must file a separate information return for such calendar year with the Internal Revenue Service (IRS) for each reportable death benefits payment recipient in the form and manner prescribed by the IRS. The return must include the following information with respect to the reportable death benefits payment recipient to which the return relates:

(1) The name, address, and taxpayer identification number (TIN) of the payor;

(2) The name, address, and TIN of the reportable death benefits payment recipient;

(3) The date of the payment;

(4) The gross amount of reportable death benefits paid to the reportable death benefits payment recipient during the taxable year;

(5) The payor's estimate of investment in the contract with respect to the buyer, limited to the payor's estimate of the buyer's investment in the contract with

respect to the interest for which the reportable death benefits payment recipient was paid; and

(6) Any other information that is required by the form or its instructions.

(b) *Time and place for filing*. Returns required to be made under this section must be filed with the Internal Revenue Service Center designated in the instructions for the form on or before February 28 (March 31 if filed electronically) of the year following the calendar year in which the payment of reportable death benefits was made. However, see § 1.6050Y-1(b)(5) for transition rules.

(c) *Requirement of and time for furnishing statements*.

(1) *Requirement of furnishing statement*. Every person required to file an information return under paragraph (a) of this section must furnish to each reportable death benefits payment recipient whose name is required to be set forth in that return a written statement showing the information required by paragraph (a) of this section with respect to that reportable death benefits payment recipient and the name, address, and phone number of the information contact of the payor. This contact information must provide direct access to a person that can answer questions about the statement.

(2) *Time for furnishing statement*. Each statement required by paragraph (c)(1) of this section to be furnished to any reportable death benefits payment recipient must be furnished on or before January 31 of the year following the calendar year in which the payment of reportable death benefits was made. However, see § 1.6050Y-1(b)(4) for transition rules.

(d) *Notice of rescission of a reportable policy sale*. Any person that has filed a return required by section 6050Y(c) and this section with respect to a payment of reportable death benefits must file a corrected return within 15 calendar days of recovering any portion of the reportable death benefits payment from the reportable death benefits payment recipient as a result of the rescission of the reportable policy sale. Any person that has furnished a written statement under section 6050Y(c)(2) and this section with respect to a payment of reportable death benefits must furnish the recipient of that statement with a corrected statement within 15 calendar days of recovering any portion of the reportable death benefits payment from the reportable death benefits payment recipient as a result of the rescission of the reportable policy sale.

(e) *Exceptions to requirement to file*. A payor is not required to file an information return under paragraph (a) of this section with respect to a payment of reportable death benefits if paragraph (e)(1), (2), or (3) of this section applies.

(1) Except as provided in this paragraph (e)(1), the payor obtains documentation in accordance with § 1.1441-1(e)(1)(ii) upon which it may rely to treat the reportable death benefits payment recipient as a foreign beneficial owner of the reportable death benefits, applying in such case the provisions of § 1.1441-1 by substituting the term “payor” for the term “withholding agent” and without regard to the fact that the provisions apply only to amounts subject to withholding under chapter 3 of subtitle A of the Internal Revenue Code. A payor may also obtain from a

partnership or trust that is a reportable death benefits recipient, in addition to documentation establishing the entity's foreign status, a written certification from the entity that no beneficial owner of any portion of the reportable death benefits payment is a United States person. In such a case, a payor may rely upon the written certification to treat the partnership or trust as a foreign beneficial owner for purposes of this paragraph (e)(1) provided that the payor does not have actual knowledge that a United States person is the beneficial owner of all or a portion of the reportable death benefits payment. See § 1.1441-1(c)(6)(ii) for the definition of beneficial owner that applies for purposes of this paragraph (e)(1). Other due diligence or reporting requirements may, however, apply to a payor that relies on the exception set forth in this paragraph (e)(1). See § 1.1441-5(c) and (e) (determination of payees of foreign partnerships and certain foreign trusts for amounts subject to withholding under § 1.1441-2(a)) and § 1.1461-1(b) and (c) (amounts subject to reporting for chapter 3 purposes).

(2) The buyer obtained the life insurance contract (or interest therein) under which reportable death benefits are paid in a reportable policy sale to which the exception to reporting described in § 1.6050Y-3(f)(2) applies.

(3) The payor never received, and has no knowledge of any issuer having received, an RPSS with respect to the interest in a life insurance contract with respect to which the reportable death benefits are paid.

(f) *Cross-reference to penalty provisions*.

(1) *Failure to file correct information return*. For provisions relating to the penalty provided for failure to file timely a correct information return required under section 6050Y(c)(1) and this section, see section 6721 and § 301.6721-1 of this chapter. See section 6724(a) and § 301.6724-1 of this chapter for the waiver of a penalty if the failure is due to reasonable cause and is not due to willful neglect.

(2) *Failure to furnish correct statement*. For provisions relating to the penalty provided for failure to furnish timely a correct statement to identified persons under section 6050Y(c)(2) and this section, see section 6722 and § 301.6722-1 of this chapter. See section 6724(a) and § 301.6724-1 of this chapter for the waiver of a penalty if the failure is due to reasonable cause and is not due to willful neglect.

II.Q.4.b.ii.(g). Transfer of Interest in an Entity Holding Life Insurance

Under pre-2018 law, a transfer of an interest in an entity did not constitute a transfer of the entity's life insurance under the transfer for value rule. Letter Ruling 9410039, involving a general partnership, held:

> … the admittance of new partners to Taxpayer and/or the withdrawal of partners from Taxpayer will not result in a transfer for valuable consideration under section 101(a)(2) of the life insurance contract on Managing Director, provided there is no termination of the partnership under section 708(b). We express no opinion about the application of

> section 101(a)(2) in the event that there is a termination of the partnership under section 708(b).[4391]

For an LLC taxed as a partnership, Letter Ruling 200826009 similarly ruled:

> … the sale or exchange of membership interests in X either by N or any of the Investors will not result in a transfer for a "valuable consideration" under § 101(a)(2), provided there is no termination of the partnership under § 708(b)(1)(B).[4392]

2017 tax reform did not change the language that what triggers the transfer for value rules is "a transfer for a valuable consideration, by assignment or otherwise, of a life insurance contract or any interest therein."[4393] Code § 101(a)(3)(A) added that the permitted transfer and permitted transferee exceptions to the transfer for value rule "shall not apply in the case of a transfer of a life insurance contract, or any interest therein, which is a reportable policy sale." Code § 101(a)(3)(B) defines a "reportable policy sale" as "the acquisition of an interest in a life insurance contract, directly or indirectly," if the acquirer does not have a required connection to the insured.

As described in part II.Q.4.b.ii.(b) Interest in a Life Insurance Contract, Reg. § 1.101-1(e)(1), "Definition,"[4394] an "interest" refers to taking "title to or possession of the life insurance contract (also referred to as a life insurance policy), in whole or part, for state law purposes," as well as holding "an enforceable right to receive all or a part of the proceeds of a life insurance contract or to any other economic benefits of the policy" as described in Reg. § 20.2042-1(c)(2) (incidents of ownership).

Applying the above definition of an "interest" in a contract, it appears that for purposes of testing whether a transfer for value has occurred that may affect the exclusion of a death benefit from income, direct ownership of a policy (in whole or in part) must be subjected to a "transfer for a valuable consideration."[4395] Therefore, the conclusion of Letter Rulings 9410039 and 200826009 - that a transfer of a partnership interest does not constitute a deemed transfer of the partnership's insurance policies - would seem to continue to apply. Presumably the same analysis would apply to the transfer of an interest in any other type of entity.

Through this lens, let's consider that a transfer of an interest in an entity may cause the acquirer to have an "indirect acquisition" that constitutes a reportable policy sale.[4396] Although such a transfer does not appear to trigger the transfer for value rule's income taxation of death benefits, it may trigger reporting requirements, given that the rules in part II.Q.4.b.ii.(f) Reporting

---

4391 [My footnote:] See part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform).

4392 [My footnote:] See part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform).

4393 Code § 101(a)(2).

4394 Reg. § 1.101-1(e)(1) is reproduced in the text accompanying fn 4354.

4395 For a discussion of legislative history supporting this idea, see fn 4347 in part II.Q.4.b.ii The Impact of Reportable Policy Sale on Transfer for Value Rule.

4396 Reg. § 1.101-1(e)(3)(ii) defines "indirect acquisition" and is reproduced in the text accompanying fn 4356 in part II.Q.4.b.ii.(b) Interest in a Life Insurance Contract. Certain indirect acquisitions that are not treated as reportable policy sales are described in Reg. § 1.101-1(c)(2)(iii), which is reproduced in the text accompanying fn 4363 in part II.Q.4.b.ii.(c) "Reportable Policy Sale" Defined.

Requirements for Reportable Policy Sales refer to the definition in part II.Q.4.b.ii.(c) "Reportable Policy Sale" Defined.

If the required connection with the insured exists, one does not need to worry about an "indirect acquisition." Also, the "indirect acquisition" rule does not apply if:[4397]

> A partnership, trust, or other entity in which an ownership interest is being acquired directly or indirectly holds the interest in the life insurance contract and acquired that interest before January 1, 2019, or acquired that interest in a reportable policy sale reported in compliance with section 6050Y(a) and § 1.6050Y-2.

So, if the entity acquired each life insurance contract before January 1, 2019, one does not need worry about the transfer of any interest in the entity (but, for policies issued after August 17, 2006, see part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance). One also need not worry when dealing with an interest of no more than 5%, if the entity does not hold mainly life insurance contracts.[4398] Otherwise, one may need to file Form 1099-LS for each policy, to qualify for the exception for a reportable policy sale reported in compliance with Code § 6050Y(a) and Reg. § 1.6050Y-2.

Although I feel comfortable taking the position that the rule regarding indirect acquisitions does not cause the transfer of an interest in a business entity to be a transfer for value, the IRS might assert that such a position makes the reportable policy sale rule toothless for income tax purposes, because all one needs to do to protect a life insurance contract from the income tax consequences is to put the life insurance in a partnership wrapper. Thus, the IRS' might argue that an "indirect acquisition" constitutes a "a transfer for a valuable consideration, by assignment or otherwise, of a life insurance contract or any interest therein."[4399]

Therefore, when in doubt regarding whether the transfer of an interest in a business entity might constitute an "indirect acquisition," one should consider reporting on Form 1099-LS any policy where the requisite relationship with the insured might not exist, to avoid any argument by the IRS that the policy's death benefit might be subjected to income tax.

REG-108054-21, Information Reporting and Transfer for Valuable Consideration Rules for Section 1035 Exchanges of Life Insurance and Certain Other Life Insurance Contract Transactions (5/09/2023) describes how the regulations it proposes softens the approach to corporation reorganizations:[4400]

> *Ordinary Course Trade or Business Acquisitions*
>
> As noted in the preamble to the final regulations, C corporations are not frequently used as vehicles for investing in life insurance contracts covering insureds with respect to which the corporation does not have a substantial business, financial, or family relationship at the time the contract is issued because a corporate level income tax applies to corporate earnings in addition to income tax on distributions at the shareholder level. See 84 FR 58460, 58467. After consideration of the comments and

letter received on the 2019 proposed regulations and the final regulations, respectively, regarding ordinary course trade or business acquisitions, the Treasury Department and the IRS are proposing an exception for certain direct acquisitions of interests in life insurance contracts from a C corporation.

> Proposed § 1.101-1(c)(2)(v) provides that the direct acquisition of an interest in a life insurance contract from a C corporation by a C corporation is not a reportable policy sale if (1) the acquisition results from a transaction that qualifies as a reorganization under section 368(a); (2) immediately before the acquisition, (i) the interest is held by a C corporation that conducts an active trade or business within the meaning of § 1.367(a)-2(d)(2) and (3), (ii) the C corporation does not engage in a trade or business of investing in interests in life insurance contracts, and (iii) no more than 5 percent of the gross value of the assets of the C corporation consists of life insurance contracts; and (3) immediately after the acquisition, (i) the acquiring C corporation does not engage in a trade or business of investing in interests in life insurance contracts, and (ii) not more than 5 percent of the gross value of the assets of the C corporation consists of life insurance contracts. This exception would provide relief from the reportable policy sale rules for acquisitions of interests in life insurance contracts through certain ordinary course trade or business acquisitions while preserving different treatment for direct and indirect acquisitions of interests in life insurance contracts in other cases. The proposed regulations modify Example 11 in § 1.101-1(g)(11) of the final regulations to reflect the addition of the exception in proposed § 1.101-1(c)(2)(v). See proposed § 1.101-1(g)(11).

II.Q.4.b.iii. Basis in Purchased Life Insurance Contract

Rev. Rul. 2009-13 took the position that the basis of a policy that is sold to a person other than the issuer is not equal to the premiums paid.[4401] Effective for transactions entered into after August 25, 2009 (coinciding with the effective date of the IRS' position), section 13521 of the 2017 tax reform act reversed the IRS' position,[4402] adding Code § 1016(a)(1)(B), which provides:

> Proper adjustment in respect of the property shall in all cases be made for expenditures, receipts, losses, or other items, properly chargeable to capital account, but no such adjustment shall be made for mortality, expense, or other reasonable charges incurred under an annuity or life insurance contract.

Rev. Rul. 2020-5 modifies Rev. Ruls. 2009-13 and 2009-14 to effectuate Code § 1016(a)(1)(B).[4403]

For basis step-up when an owner who is not the insured dies and for an analysis of "investment in the contract" (which governs distributions from a policy) generally, see part II.Q.4.e Income Tax Issues When the Owner Who Is Not the Insured Dies.

[4401] See Rev. Ruls. 2009-13 and 2009-14. Commentators disagreed with the IRS' position.

[4402] The Senate report stated:

> The provision provides that in determining the basis of a life insurance or annuity contract, no adjustment is made for mortality, expense, or other reasonable charges incurred under the contract (known as "cost of insurance"). This reverses the position of the IRS in Revenue Ruling 2009-13 that on sale of a cash value life insurance contract, the insured's (seller's) basis is reduced by the cost of insurance.

[4403] For details on Rev. Rul. 2020-5, see text accompanying fn 4408.

II.Q.4.c. Income Tax Issues in Transferring Life Insurance; Code § 1035

Generally, income tax applies when buying, selling, or swapping policies. However, Code § 1035, "Certain exchanges of insurance policies," provides:

(a) *General rules*. No gain or loss shall be recognized on the exchange of -

(1) a contract of life insurance for another contract of life insurance or for an endowment or annuity contract or for a qualified long-term care insurance contract;

(2) a contract of endowment insurance (A) for another contract of endowment insurance which provides for regular payments beginning at a date not later than the date payments would have begun under the contract exchanged, or (B) for an annuity contract, or (C) for a qualified long-term care insurance contract;

(3) an annuity contract for an annuity contract or for a qualified long-term care insurance contract; or

(4) a qualified long-term care insurance contract for a qualified long-term care insurance contract.

(b) *Definitions*. For the purpose of this section -

(1) *Endowment contract*. A contract of endowment insurance is a contract with an insurance company which depends in part on the life expectancy of the insured, but which may be payable in full in a single payment during his life.

(2) *Annuity contract*. An annuity contract is a contract to which paragraph (1) applies but which may be payable during the life of the annuitant only in installments. For purposes of the preceding sentence, a contract shall not fail to be treated as an annuity contract solely because a qualified long-term care insurance contract is a part of or a rider on such contract.

(3) *Life insurance contract*. A contract of life insurance is a contract to which paragraph (1) applies but which is not ordinarily payable in full during the life of the insured. For purposes of the preceding sentence, a contract shall not fail to be treated as a life insurance contract solely because a qualified long-term care insurance contract is a part of or a rider on such contract.

(c) *Exchanges involving foreign persons*. To the extent provided in regulations, subsection (a) shall not apply to any exchange having the effect of transferring property to any person other than a United States person.

(d) *Cross references*.

(1) For rules relating to recognition of gain or loss where an exchange is not solely in kind, see subsections (b) and (c) of section 1031.

(2) For rules relating to the basis of property acquired in an exchange described in subsection (a), see subsection (d) of section 1031.

Reg. § 1.1035-1(c) provides, "section 1035 does not apply to such exchanges if the policies exchanged do not relate to the same insured."[4404] Rev. Rul. 90-109 examined a contract that allowed the insured to change (highlighting added):

> A change in contractual terms effected through an option provided in the original contract is treated as an exchange under section 1001 if there is a sufficiently fundamental or material change that the substance of the original contract is altered through the exercise of the option. Under such circumstances, the old contract is treated as if it were actually exchanged for a new one. *Cf.* Rev. Rul. 69-135, 1969-1 C.B. 198 (recognition of realized gain or loss under former section 1002 where bonds of one corporation are converted into stock of another corporation pursuant to an option contained in the bonds). See also Rev. Rul. 79-155, 1979-1 C.B. 153 (addition of new parent as obligor is a change which, together with other changes, constitutes a material change for purposes of section 1001).
>
> In the present situation, X exercised an option in its key person insurance policy that permitted it to change the insured from A, the original insured under the policy, to B, the new insured. This resulted in a change in the fundamental substance of the original contract because the essence of a life insurance contract is the life that is insured under the contract. Thus, X's exercise of the change-of-insureds option is substantively the same as an actual exchange of contracts and is a sale or other disposition for purposes of section 1001.
>
> Section 1.1035-1 of the regulations expressly excludes from the application of section 1035 exchanges of policies that do not relate to the same insured and thus prevents policy owners from deferring indefinitely recognition of gain with respect to the policy value. Had X actually assigned a life insurance policy on A to the insurance company as consideration for a new life insurance policy on B, any gain realized on the exchange would have been ineligible for nonrecognition treatment under section 1035 of the Code. X cannot avoid the same-insured limitations of section 1035 simply by placing terms in its original documents that obviate the need for an actual exchange but nevertheless effect a de facto exchange of the original contract for a new contract on a different insured. For example, the result would be the same if X insured a person holding a particular position and, thus, no formal substitution is made when a new person occupies that position.

It held:

> The exercise of an option in an insurance policy to change the insured constitutes a sale or other disposition under section 1001 of the Code, and this disposition does not qualify as a tax-free exchange of insurance policies under section 1035.

A taxpayer may roll over part of a policy into another policy. Notice 2011-68, § 2.05 states:

> In *Conway v. Commissioner*, 111 T.C. 350 (1998), *acq.*, 1999-2 C.B. xvi, the Tax Court held that the direct exchange by an insurance company of a portion of an existing annuity contract to an unrelated insurance company for a new annuity contract was a tax-free exchange under § 1035. Such a transaction is sometimes referred to as a

[4404] Some tax research services make this clause look like part of subsection (c) only, but T.D. 6211 (11/14/56) clearly indents (a), (b), and (c) without indenting this part.

> "partial exchange." See also Rev. Rul. 2003-76, 2003-2 C.B. 355 (direct transfer of a portion of an annuity contract for a new annuity contract treated as a tax-free exchange under § 1035); Rev. Rul. 2002-75, 2002-2 C.B. 812 (assignment of an entire annuity contract for deposit into a preexisting annuity contract treated as a tax-free exchange under § 1035).

Similarly, Rev. Rul. 92-43 held that a taxpayer's exchange of an annuity contract issued by a life insurance company that has become subject to a rehabilitation, conservatorship, or similar state proceeding, for an annuity contract issued by another life insurance company qualify as tax-free under Code § 1035 if the new contract is funded by a series of two or more payments from the old annuity contract, even in the case of serial funding of a new life insurance contract. Its facts were:

> L1 is a life insurance company within the meaning of section 816(a) of the Code. L1 is domiciled in state O. A owns an annuity contract (Old Contract) issued by L1.
>
> L1 is subject to a O rehabilitation, conservatorship, or similar state proceeding under the jurisdiction and control of the O insurance commissioner and a O court. Under the terms imposed by any O authorities pursuant to the proceeding, L1 is permitted to distribute no more than X percent of the full cash value of the annuity contract. A wishes to terminate all of A's rights in Old Contract and acquire a new annuity contract (New Contract) from L2. L2 is a life insurance company within the meaning of section 816(a) of the Code.
>
> A assigns Old Contract to L2 in exchange for a New Contract. Pursuant to the assignment, L1 pays cash to L2 in an amount that represents X percent of the cash value of Old Contract, and is required to pay L2 an amount equal to any residual value of Old Contract when it is permitted to do so by the O authorities. L2 must credit to New Contract all amounts received from L1.

Rev. Rul. 92-43 reasoned:

> Section 1035(a)(3) of the Code provides that no gain or loss is recognized on the exchange of one annuity contract solely for another annuity contract. Neither the statute nor the regulations contain a time limit for completion of the exchange. In addition, nonrecognition treatment under section 1035 is not expressly conditioned upon the relative policy values of the contracts exchanged, so long as no other property or cash is distributed as part of the exchange.
>
> Under the facts described, A has effected an exchange of annuity contracts. Because section 1035(a)(3) of the Code does not require that an exchange be completed concurrently where the issuer is precluded from distributing the full cash value of the contract, the transaction is a nontaxable exchange of an annuity contract for an annuity contract under that section.

Rev. Rul. 92-43 held:

> Under section 1035 of the Code, A does not recognize gain or loss on the exchange of Old Contract for New Contract even though New Contract will be funded through a series of payments from L1 that may extend over a period of time. The same holding

applies in the case of serial funding of an exchange of a life insurance contract for a life insurance, endowment, or annuity contract.

Letter Ruling 200323012 held that a revocable trust could swap tax-free under Code § 1035 two annuity contracts it owned on the life of its deemed owner for one annuity contract that owner owned on her life.[4405]

A life insurance contract may be swapped into another life insurance, endowment, annuity, or qualified long-term care insurance contract. Notice 2011-68, § 3 describes certain changes made by the Pension Protection Act of 2006, P.L. 109-280 (the "PPA"):

> .04. Section 844(b) of the PPA expanded the categories of exchanges that are treated as tax-free under § 1035 to include certain exchanges that involve a qualified long-term care insurance contract. Accordingly, § 1035 now applies to the exchange of a life insurance contract for another life insurance, endowment, annuity, or qualified long-term care insurance contract; an endowment contract for another endowment, annuity, or qualified long-term care insurance contract; an annuity contract for another annuity or qualified long-term care insurance contract; or a qualified long-term care insurance contract for another qualified long-term care insurance contract. The PPA also amended § 1035(b)(2) and (3) to provide that, for purposes of § 1035, a contract does not fail to be treated as a life insurance contract or an annuity contract solely because a qualified long-term care insurance contract is a part of or a rider on the contract.
>
> .05. Just as the direct transfer of a portion of the cash surrender value of an existing deferred annuity contract for a second annuity contract may be treated as a tax-free exchange under § 1035, the direct transfer of a portion of the cash surrender value of an existing deferred annuity contract for a qualified long-term care insurance contract may be treated as a tax-free exchange, provided the requirements of § 1035 are otherwise met. See, *e.g.*, Rev. Proc. 2011-38, 2011-30 I.R.B. 66 (setting forth conditions under which such a transfer will be treated as a tax-free exchange under § 1035); but see, Rev. Rul. 2007-24, 2007-21 I.R.B. 1282 (receipt of a check under a nonqualified annuity contract and endorsement of the check to a second company as consideration for a second annuity contract treated as a distribution under § 72(e), rather than as a tax-free exchange under § 1035).
>
> .06. Although § 7702B(b)(1)(D) and (E) limit the extent to which a qualified long-term care insurance contract may have a cash value or premium refund feature, § 7702B(b)(2)(C) permits the refund of premiums in the event of a complete surrender or cancellation of the contract, provided the amount does not exceed the aggregate premiums paid under the contract. Such a refund is includible in gross income to the extent that any deduction or exclusion was allowable with respect to the premiums. Moreover, § 1031(d) provides that if property is acquired in an exchange described in § 1035(a), then the acquired property's adjusted basis shall be the same as that of the property exchanged, decreased in the amount of any money received by the taxpayer and increased in the amount of gain or decreased in the amount of loss to the taxpayer that was recognized on such exchange. Accordingly, Treasury and the IRS believe that, under § 1031(d), the adjusted basis of a qualified long-term care insurance contract received in a tax-free exchange under § 1035(a) generally carries over from the life

[4405] Letter Ruling 200323012 is discussed (including large excerpts) in part II.J.19.a.v Annuity Contract Issued to Grantor Trust in the text before and after fn 3026.

> insurance, endowment, annuity, or qualified long-term care insurance contract exchanged.

If one insured in a second-to-die policy has died, Code § 1035 may apply to the exchange of that policy for a policy on the life of only the surviving insured. Consistent with Letter Ruling 9248013, Letter Ruling 9330040 reasoned and held:

> The legislative history of section 1035 of the Code indicates that Congress viewed nonrecognition treatment as appropriate for "individuals who have merely exchanged one insurance policy for another better suited to their needs and who have not actually realized gain." See H.R. Rep. No. 1337, 83d Cong., 2d Sess. 81 (1954).
>
> Trust's proposed assignment of Policy to the issuer of New Policy and its receipt of New Policy will qualify as an exchange of one contract of life insurance for another contract of life insurance under section 1035(a)(1) of the Code. At the time of the proposed exchange, the sole remaining insured on Policy will be A. The sole insured on New Policy will also be A. Therefore, the proposed exchange does not involve a change of insured, which would disqualify the transaction from nonrecognition treatment under section 1035.
>
> Accordingly, under section 1035 of the Code no gain or loss will be recognized by Trust upon the exchange of Policy solely for New Policy. Further, the basis of New Policy in the hands of Trust will, as provided in section 1031(d), be the same as Trust's basis in Policy.
>
> We express no opinion on whether section 1035 of the Code applies to the exchange of a survivorship or "second to die" life insurance contract for a single life insurance contract prior to the death of either of the insureds under the survivorship contract. We also express no opinion on whether Policy or New Policy qualifies as a life insurance contract under section 7702(a).

However, Code § 1035 does not apply to changing from having two insureds under a second-to-die policy to one insured under a policy or from one insured under a policy to two insureds under a second-to-die policy. Letter Ruling 9542037 rejected the application of Code § 1035 in all of the following situations:

> Taxpayer has inquired as to several situations involving exchanges by Taxpayer's policyholders who are spouses. In Situation 1, Spouse A exchanges a life insurance contract insuring solely his own life for a second-to-die life insurance contract covering the lives of both Spouse A and Spouse B. In Situation 2, Spouse A exchanges two life insurance contracts, one of which insures the life of Spouse A and one of which insures the life of Spouse B, for a second-to-die life insurance contract which covers the lives of both Spouse A and Spouse B. In Situation 3, Spouse A and Spouse B jointly exchange separate life insurance contracts each of which insures solely the life of one spouse for a jointly owned second-to-die life insurance contract which covers the lives of both Spouse A and Spouse B. In Situations 4A and 4B respectively, the facts are the same as in Situations 1 and 2 except that a trust is the owner and exchanger of the life insurance contracts involved. In none of the Situations do Spouse A, Spouse B or the trust receive any money or other property not permitted to be transferred without the recognition of gain or loss.

It held:

> In each of the Situations described above, the individual insured under each contract given up in the exchange is not the sole individual insured under the contract received in the exchange. As the contracts do not relate to the same insured, any gain realized on the exchange is ineligible for nonrecognition under section 1035 of the Code.

The transfer for value rule might cause the death benefit to be subject to income tax. see part II.Q.4.a Funding the Buy-Sell.

When life insurance is sold in a taxable transaction, the IRS' position was that:[4406]

[4406] Rev. Rul. 2009-13, Situation 2 provides the following facts and analysis, which works from Situation 1:

> **Situation 1**
>
> On January 1 of Year 1, A, an individual, entered into a life insurance contract (as defined in § 7702 of the Internal Revenue Code (Code)) with cash value. Under the contract, A was the insured, and the named beneficiary was a member of A's family. A had the right to change the beneficiary, take out a policy loan, or surrender the contract for its cash surrender value. The contract in A's hands was not property described in § 1221(a)(1)-(8).
>
> On June 15 of Year 8, A surrendered the contract for its $78,000 cash surrender value, which reflected the subtraction of $10,000 of cost-of-insurance charges collected by the issuer for periods ending on or before the surrender of the contract. Through that date, A had paid premiums totaling $64,000 with regard to the life insurance contract. A had neither received any distributions under the contract nor borrowed against the contract's cash surrender value.
>
> A determines taxable income using the cash method of accounting and files income tax returns on a calendar year basis. As of June 15 of Year 8, A was not a terminally ill individual, nor a chronically ill individual, within the meaning of § 101(g)(4).
>
> **Situation 2**
>
> The facts are the same as in Situation 1, except that on June 15 of Year 8, A sold the life insurance contract for $80,000 to B, a person unrelated to A and who would suffer no economic loss upon A's death.
>
> ….
>
> **Law and Analysis**
>
> ….
>
> In Situation 2, A paid total premiums of $64,000 under the life insurance contract through the date of sale, and $10,000 was subtracted from the contract's cash surrender value as cost-of-insurance charges. Accordingly, A's adjusted basis in the contract as of the date of sale under §§ 1011 and 1012 and the authorities cited above was $54,000 ($64,000 premiums paid less $10,000 expended as cost of insurance).
>
> Accordingly, A must recognize $26,000 on the sale of the life insurance contract to B, which is the excess of the amount realized on the sale ($80,000) over A's adjusted basis of the contract ($54,000).
>
> [above two paragraphs were superseded by Rev. Rul. 2020-5, as described in fn 4408.]
>
> **Character of income recognized on sale of the life insurance contract**
>
> Unlike Situation 1, which involves the surrender of the life insurance contract to the issuer of the contract, Situation 2 involves an actual sale of the contract. Nevertheless some or all of the gain on the sale of the contract may be ordinary if the substitute for ordinary income doctrine applies. The Supreme Court has held, under the so-called substitute for ordinary income doctrine, that property within the meaning of § 1221 does not include claims or rights to ordinary income. Instead, the Court has consistently construed 'capital asset' to exclude property representing income items or accretions to the value of a capital asset themselves properly attributable to income. *United States v. Midland-Ross Corp.*, 381 U.S. 54, 57 (1965). *See also Commissioner v. P.G. Lake, Inc.*, 356 U.S. 260 (1958) (consideration received on the sale of a working interest in

1. The taxpayer's gain is:

    - Ordinary income to the extent that it does not exceed the excess of the policy's cash value over the taxpayer's "investment in the contract" (this excess referred to later as the "inside build-up"),[4407] and

    - Capital gain to the extent of the balance.

2. The selling taxpayer's basis is reduced by the cost of insurance.

However, as mentioned above, Congress retroactively repealed the IRS' position that the selling taxpayer's basis is reduced by the cost of insurance.[4408]

---

an oil well represented a substitute for what would have been received in the future as ordinary income, therefore taxable as ordinary income and not capital gain); *Arkansas Best Corp. v. Commissioner*, 485 U.S. 212, 217, n. 5 (1988) (noting that the substitute for ordinary income doctrine had no application to that case). Thus, ordinary income that has been earned but not recognized by a taxpayer cannot be converted into capital gain by a sale or exchange. *See also Prebola v. Commissioner*, 482 F.3d 610 (2d Cir. 2007); *United States v. Maginnis*, 356 F.3d 1179 (9th Cir. 2004); *Davis v. Commissioner*, 119 T.C. 1 (2002) (applying the substitute for ordinary income doctrine after the Arkansas Best decision).

The substitute for ordinary income doctrine has been applied to characterize the profit on a sale of an annuity contract or life insurance contract as ordinary income. For example, in *Gallun*, 327 F.2d 809, 811 (7th Cir. 1964), the court stated:

> The question presented has been considered by other courts. Uniformly, they have held that the assignment of income doctrine . . . should be applied and the profits realized from the sale or the surrender value of an annuity or life insurance contract should be treated as ordinary income rather than capital gain. These cases are: *First Nat'l Bank of Kansas City v. Commissioner*, 309 F.2d 587 (8th Cir. 1962); *Rolf v. Commissioner*, 304 F.2d 450 (3d Cir. 1962); *Commissioner v. Phillips*, 275 F.2d 33 (4th Cir. 1960); *Arnfeld v. United States*, 163 F.Supp. 865, 143 Ct. Cl. 277 (1958).

Application of the substitute for ordinary income doctrine is limited to the amount that would be recognized as ordinary income if the contract were surrendered (i.e., to the inside build-up under the contract). Hence, if the income recognized on the sale or exchange of a life insurance contract exceeds the inside build-up under the contract, the excess may qualify as gain from the sale or exchange of a capital asset. *See*, *e.g.*, *Commissioner v. Phillips*, 275 F.2d 33, 36 n. 3 (4th Cir. 1960).

In Situation 2, the inside build-up under A's life insurance contract immediately prior to the sale to B was $14,000 ($78,000 cash surrender value less $64,000 aggregate premiums paid). Hence, $14,000 of the $26,000 of income that A must recognize on the sale of the contract is ordinary income under the substitute for ordinary income doctrine. Because the life insurance contract in A's hands was not property described in § 1221(a)(1)-(8) and was held by A for more than one year, the remaining $12,000 of income is long-term capital gain within the meaning of § 1222(3).

[4407] Although the IRS did not expressly say so, this policy result is required to preserve the integrity of the system described in part II.Q.4.d Income Tax on Distributions or Loans from Contract (Including Surrender of Policy), which also explains why this policy result is required in the text preceding fn. 4423.

[4408] See text accompanying fn 4403 in part II.Q.4.b.iii Basis in Purchased Life Insurance Contract. Thus, Rev. Rul. 2020-5 modifies the analysis of fn 4406:

> In Situations 2 and 3 in Rev. Rul. 2009-13, under § 1016(a)(1)(B), as added by the TCJA, A is not required to reduce A's basis in the contract by the cost of insurance. Accordingly, in Situation 2 of Rev. Rul. 2009-13, A's adjusted basis in the contract equals the premiums paid. A must recognize $16,000 of income on the sale of the contract ($80,000 amount realized on sale less

If the policy is a term policy, then the IRS asserts that the basis is any unexpired premiums and the gain is purely capital gain.[4409] Rev. Rul. 2009-14 discusses tax consequences to the purchaser of a term life insurance policy but must be read in light of the modification to Situation 2 made by Rv. Rul. 2020-5.

Using a life insurance LLC might solve most or all of these issues.[4410]

II.Q.4.d. Income Tax on Distributions or Loans from Contract (Including Surrender of Policy)

To the extent that the distributions are nontaxable death benefits,[4411] the rules described below do not apply.[4412]

Generally, distributions (other than tax-free death benefits) from life insurance contracts are not taxable "the extent allocable to the investment in the contract."[4413] Dividends used to pay premiums are not taxable.[4414] Furthermore, loans generally are also not subject to income tax (without reference to the investment in the contract) while the borrower continues to hold the policy[4415] and are treated as distributions when those exceptions apply.[4416] However, distributions and loans generally are taxable if the policy is a "modified endowment contract," which generally applies when a policy's premiums are paid too quickly in its initial years.[4417]

Furthermore, gifts or trust distributions may trigger income taxation. Code § 72(e)(4)(C), "Treatment of transfers without adequate consideration," provides:

> $64,000 adjusted basis). In Situation 3 of Rev. Rul. 2009-13, A's adjusted basis in the contract equals the premiums paid. A will recognize a $25,000 loss on the sale of the contract ($20,000 amount realized on the sale less $45,000 adjusted basis). A will not be permitted to deduct the loss unless the loss is incurred under § 165(c)(1) or (2).

However, Rev. Rul. 2020-5, fn 1 provides:

> Section 13521 of the TCJA only applies to determine a taxpayer's adjusted basis in a life insurance contract under § 1016. Section 13521 of the TCJA does not affect the analysis in Situations 2 and 3 of Rev. Rul. 2009-13 and Situation 2 of Rev. Rul. 2009-14 with respect to the character of any income or loss recognized by a taxpayer on the sale of a life insurance contract.

[4409] Rev. Rul. 2009-13, Situation 1.

[4410] See parts II.Q.4.i Life Insurance LLC, II.M.3 Buying into or Forming a Partnership, and II.Q.8 Exiting From or Dividing a Partnership.

[4411] Code § 101(a)(1).

[4412] Reg. § 1.72-2(b)(1)(i) provides:

> In general, the amounts to which section 72 applies are any amounts received under the contracts described in paragraph (a)(1) of this section. However, if such amounts are specifically excluded from gross income under other provisions of chapter 1 of the Code, section 72 shall not apply for the purpose of including such amounts in gross income. For example, section 72 does not apply to amounts received under a life insurance contract if such amounts are paid by reason of the death of the insured and are excludable from gross income under section 101(a). See also sections 101(d), relating to proceeds of life insurance paid at a date later than death, and 104(a)(4), relating to compensation for injuries or sickness.

[4413] Code § 72(e)(5)(C) applies the Code § 72(e)(5)(A) rule of nontaxable recovery of investment coming first.

[4414] Code § 72(e)(4)(B).

[4415] Code § 72(e)(4)(A) includes various exceptions.

[4416] Code § 72(e)(4)(A) includes various exceptions.

[4417] Code § 72(e)(10), using the definition of modified endowment contract in Code § 7702A.

(i) *In general*. If an individual who holds an annuity contract transfers it without full and adequate consideration, such individual shall be treated as receiving an amount equal to the excess of -

(I) the cash surrender value of such contract at the time of transfer, over

(II) the investment in such contract at such time,

under the contract as an amount not received as an annuity.

(ii) *Exception for certain transfers between spouses or former spouses*. Clause (i) shall not apply to any transfer to which section 1041(a) (relating to transfers of property between spouses or incident to divorce) applies.

(iii) *Adjustment to investment in contract of transferee*. If under clause (i) an amount is included in the gross income of the transferor of an annuity contract, the investment in the contract of the transferee in such contract shall be increased by the amount so included.

Consider whether turning off grantor trust status, whether voluntarily or by reason of death, might trigger Code § 72(e)(4)(C) income taxation.

Kitces, "Owning Deferred Annuities In Trusts And Preserving Tax-Deferral Treatment" (12/25/2013), explains:

> Ironically, in situations where an annuity is transferred out of a trust, the transaction also does not trigger IRC Section 72(e)(4)(C), as the IRS reads the provision literally, and since it states that it must be "an individual who holds an annuity..." a trust that owns the annuity in the first place isn't an individual and therefore cannot trigger tax treatment by transferring the contract. Thus, in PLR 201124008, where an annuity was distributed in-kind by a bypass trust to its trust natural person trust beneficiary, the transfer was not taxable at the time.
>
> However, in situations where the annuity is being transferred as a (taxable) gift to a trust, the situation is less clear. If the trust is not a grantor trust and the transfer is a gift, IRC Section 72(e)(4)(C) will clearly be triggered, even if all the beneficiaries are natural persons such that subsequent gains may again be tax-deferred once the trust owns the annuity. Perhaps the most confusing situation is when an annuity is transferred to an Intentionally Defective Grantor Trust (IDGT), which is a grantor trust for income tax purposes but outside of the individual's estate for gift and estate tax purposes. While some have contended that the transfer of the annuity to the IDGT should not trigger taxation upon transfer - it certainly wouldn't face ongoing under 72(u) since it's a grantor trust - it's difficult to claim that the annuity was not "a transfer without full and adequate consideration" when the grantor has to file a gift tax return to report the transfer in the first place! Notably, while popular Revenue Ruling 85-13 has indicated that a sale of property to a grantor trust should not trigger gain, as one cannot have a sale between a grantor and the grantor's trust, in this case the problem is actually that the annuity was not sold but gifted as a gratuitous transfer (without full and adequate consideration). Ironically, this suggests that while a sale of an annuity to an IDGT might avoid gains treatment, the gratuitous gift transfer of an annuity to an IDGT may trigger gain. Unfortunately, though, neither situation has been directed address on point in a Tax Court case or even via a Private Letter Ruling.

Any distributions in excess of "investment in the contract" constitute ordinary income.[4418] However, Code § 1234A might be used to argue that income on surrender should be all capital gain.[4419]

"Investment in the contract":[4420]

> as of any date is-
>
> (A) the aggregate amount of premiums or other consideration paid for the contract before such date, minus
>
> (B) the aggregate amount received under the contract before such date, to the extent that such amount was excludable from gross income under this subtitle or prior income tax laws.

However, charges relating to a long-term insurance component of a policy may reduce "investment in the contract."[4421]

What constitutes "other consideration paid for the contract"? Code § 72(g) tells us what to do when the policy is sold:

> (g) **Rules for transferee where transfer was for value**. Where any contract (or any interest therein) is transferred (by assignment or otherwise) for a valuable consideration, to the extent that the contract (or interest therein) does not, in the

---

[4418] Code § 72(e)(2).

[4419] At the 2015 Heckerling Institute, Larry Brody reported having settled a Tax Court case on this basis. See part II.G.8 Code § 165(a) Loss for Worthlessness; Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A Limitation on that Strategy. Rev. Rul. 2009-13 asserted, without explanation, that Code § 1234A does not apply to a surrender.

[4420] Code § 72(e)(6).

[4421] Notice 2011-68, § 3 describes certain changes made by the Pension Protection Act of 2006, P.L. 109-280 (the "PPA"):

> .02. Section 844(a) of the PPA amended § 72(e) by adding a new paragraph, § 72(e)(11). Section 72(e)(11) provides that a charge against the cash value of an annuity contract or the cash surrender value of a life insurance contract made as payment for coverage under a qualified long-term care insurance contract that is part of or a rider on the annuity or life insurance contract is not includible in income. The investment in the contract is reduced (but not below zero) by the charge.
>
> .03. The PPA did not otherwise amend the definition of "investment in the contract" in § 72(c)(1) and 72(e)(6). Accordingly, the Treasury Department and the IRS believe that all premiums paid for a combination contract that is an annuity and also provides long-term care insurance are generally included in investment in the contract under § 72 if (i) the premiums are credited to the contract's cash value (rather than directly to the long-term care insurance contract that is part of or a rider to the contract), and (ii) coverage under the long-term care insurance contract is paid for by charges against the cash value of the contract. Consistently, a waiver of premiums under such a contract, such as on account of disability or because the annuitant has become chronically ill, should be accounted for in the same manner as a waiver of premiums under other contracts for which "investment in the contract" is determined under § 72(c)(1) or 72(e)(6). See, *e.g.*, *Estate of Wong Wing Non v. Commissioner*, 18 T.C. 205 (1952) (waived premiums not treated as constructively received as disability benefits, and therefore not included as part of premium paid for endowment life insurance policy).

hands of the transferee, have a basis which is determined by reference to the basis in the hands of the transferor, then—

(1) for purposes of this section, only the actual value of such consideration, plus the amount of the premiums and other consideration paid by the transferee after the transfer, shall be taken into account in computing the aggregate amount of the premiums or other consideration paid for the contract;

(2) for purposes of subsection (c)(1)(B), there shall be taken into account only the aggregate amount received under the contract by the transferee before the annuity starting date, to the extent that such amount was excludable from gross income under this subtitle or prior income tax laws; and

(3) the annuity starting date is January 1, 1954, or the first day of the first period for which the transferee received an amount under the contract as an annuity, whichever is the later.

For purposes of this subsection, the term “transferee” includes a beneficiary of, or the estate of, the transferee.

Code § 72(g)(2) does not apply, because our income is based on Code § 72(e)(6), not Code § 72(c)(1)(B).

Consider the following potential abuse:

1. Policy owner sells the policy and receives capital gain treatment.

2. Buyer receives a new “investment in the contract” under Code § 72(g).

3. Buyer cashes in the policy, tax-free.

Given that the buyer has no risk, a policy owner could easily find a straw man to help the policy owner cash in the policy and receive capital gain treatment, avoiding the ordinary income treatment provided by Code § 72(e)(1). Rev. Rul. 2009-13,[4422] Situation 2,[4423] prevents this potential abuse.

Thus, if one sells a policy in a taxable transaction:

1. If and to the extent one has gain, the first tier of this gain is ordinary income.[4424]

2. All of the gain on the sale translates into increased “investment in the contract” against which distributions can be taken tax-free.

3. Be careful to fit within an exception to the transfer for value rules[4425] if the buyer expects to receive death benefit in excess of investment in the contract.

[4422] See fn 4402 in part II.Q.4.b Transfer for Value Rule; Basis for the fact that Rev. Rul. 2009-13 does not apply to basis determinations.
[4423] See fn. 4406.
[4424] See text accompanying fn. 4406.
[4425] Code § 101(a)(2).

II.Q.4.e. Income Tax Issues When the Owner Who Is Not the Insured Dies

Generally, property an individual owns (including indirectly through a partnership[4426]) receives a new tax basis when that individual dies if that property is included in that individual's estate for estate tax purposes.[4427]

The discussion below focuses on if and the extent to which a life insurance might not get a basis adjustment on the death of an owner who is not insured and then explores practical issues in implementing any basis adjustment that is available.

II.Q.4.e.i. Life Insurance Basis Adjustment on the Death of an Owner Who Is Not the Insured

"Annuities described in section 72" do not receive a new basis.[4428] Although Code § 72 governs distributions from life insurance companies to policy owners, this provision appears to be aimed at annuity contracts and not life insurance contracts.

Of greater concern is whether the internal build-up in a cash value life insurance contract constitutes "income in respect of a decedent" (IRD) ineligible for a basis adjustment; see part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up. Reg. § 1.691(a)-1(b) provides:

> **General definition.** In general, the term "income in respect of a decedent" refers to those amounts to which a decedent was entitled as gross income but which were not properly includible in computing his taxable income for the taxable year ending with the date of his death or for a previous taxable year under the method of accounting employed by the decedent. See the regulations under section 451. Thus, the term includes-
>
> (1) All accrued income of a decedent who reported his income by use of the cash receipts and disbursements method;
>
> (2) Income accrued solely by reason of the decedent's death in case of a decedent who reports his income by use of an accrual method of accounting; and
>
> (3) Income to which the decedent had a contingent claim at the time of his death.

Income is "accrued" when "all the events have occurred which fix the right to receive such income and the amount thereof can be determined with reasonable accuracy."[4429] 2017 tax

---

[4426] Generally, the partnership need to have a Code § 754 election in place for the partnership's taxable year in which the individual dies or in certain situations when that person's interest in the partnership is later transferred. See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.
[4427] Code § 1014, which applies to more than just what this sentence describes.
[4428] Code § 1014(b)(9); Reg. § 1.1014-2(b)(3)(i).
[4429] Reg. § 1.451-1(a). On the deduction side, see *U.S. v. General Dynamics Corp.*, 481 U.S. 239 (1987); U*.S. v. Hughes Properties, Inc.*, 476 U.S. 593 (1986); Rev. Rul. 78-212; *Giant Eagle, Inc. v. Commissioner*, 822 F.3d 666 (3rd Cir. 2016), *rev'g* T.C. Memo. 2014-146. In addition to the all events test, the Code § 461(h) economic performance rules may defer deductions.

reform modified this test; a brief explanation is in the "SUPPLEMENTARY INFORMATION" portion of the preamble to T.D. 9941 (1/6/2021):[4430]

> **Background**
>
> This document contains amendments to the Income Tax Regulations (26 CFR part 1) under section 451(b) and (c) of the Internal Revenue Code (Code).
>
> On December 22, 2017, section 451(b) and (c) were amended by section 13221 of Public Law 115-97 (131 Stat. 2054), commonly referred to as the Tax Cuts and Jobs Act (TCJA). Section 451(b) was amended to provide that, for a taxpayer using an accrual method of accounting (accrual method taxpayer), the all events test for an item of gross income, or portion thereof, is met no later than when the item, or portion thereof, is included in revenue for financial accounting purposes on an applicable financial statement (AFS). Section 451(c) was amended to provide that an accrual method taxpayer may use the deferral method of accounting provided in section 451(c) for advance payments. Unless otherwise indicated, all references to section 451(b) and section 451(c) hereinafter are references to section 451(b) and section 451(c), as amended by the TCJA.
>
> **I. Section 451(b)**
>
> In general, section 451(a) provides that the amount of any item of gross income is included in gross income for the taxable year in which it is received by the taxpayer, unless, under the method of accounting used in computing taxable income, the amount is to be properly accounted for as of a different period. Under § 1.451-1(a), accrual method taxpayers generally include items of income in gross income in the taxable year when all the events occur that fix the right to receive the income and the amount of the income can be determined with reasonable accuracy (all events test). All the events that fix the right to receive income occur when (1) the required performance takes place, (2) payment is due, or (3) payment is made, whichever happens first. Revenue Ruling 2003-10, 2003-1 C.B. 288; Revenue Ruling 84-31, 1984-1 C.B. 127; Revenue Ruling 80-308, 1980-2 C.B. 162.
>
> Section 451(b)(1)(A) provides that, for an accrual method taxpayer, the all events test for an item of gross income, or portion thereof, is met no later than when the item, or portion thereof, is included as revenue in an AFS (AFS Income Inclusion Rule).
>
> Section 451(b)(1)(B) lists exceptions to the AFS Income Inclusion Rule. The AFS Income Inclusion Rule does not apply to taxpayers that do not have an AFS for a taxable year or to any item of gross income from a mortgage servicing contract.
>
> Section 451(b)(1)(C) codifies the all events test, stating that the all events test is met for any item of gross income if all the events have occurred which fix the right to receive such income and the amount of such income can be determined with reasonable accuracy.

[4430] One provision makes death trigger income tax regarding inventory; see part III.A.6 Post-Mortem Trust and Estate Administration.

Section 451(b)(2) provides that the AFS Income Inclusion Rule does not apply for any item of gross income the recognition of which is determined using a special method of accounting, “other than any provision of part V of subchapter P (except as provided in clause (ii) of paragraph (1)(B)).”

Section 451(b)(3) defines an AFS, as referenced in section 451(b)(1)(A)(i), by providing a hierarchical list of financial statements.

Section 451(b)(4) provides that for purposes of section 451(b), in the case of a contract which contains multiple performance obligations, the allocation of the transaction price to each performance obligation is equal to the amount allocated to each performance obligation for purposes of including such item in revenue in the taxpayer’s AFS.

Section 451(b)(5) provides that, if the financial results of a taxpayer are reported on the AFS for a group of entities, the group’s financial statement shall be treated as the AFS of the taxpayer.

II. Section 451(c)

Section 451(c) provides special rules for the treatment of advance payments. Section 451(c)(1)(A) provides the general rule requiring an accrual method taxpayer to include an advance payment in gross income in the taxable year of receipt. However, section 451(c)(1)(B) permits a taxpayer to elect to include any portion of the advance payment in gross income in the taxable year following the year of receipt to the extent income is not included in revenue in the AFS in the year of receipt. Section 451(c)(1)(B) generally codifies Revenue Procedure 2004-34, 2004-22 I.R.B. 991, which provided for a similar deferral period.

Section 451(c)(2)(A) provides the Secretary of the Treasury or his delegate (Secretary) with the authority to provide the time, form and manner for making the election under section 451(c)(1)(B), and the categories of advance payments for which an election can be made. Under section 451(c)(2)(B), the election is effective for the taxable year that it is first made and for all subsequent taxable years, unless the taxpayer receives the consent of the Secretary to revoke the election. Section 451(c)(3) provides that the deferral election does not apply to advance payments received in the taxable year that the taxpayer ceases to exist.

Section 451(c)(4)(A) defines advance payment for purposes of section 451(c). Under section 451(c)(4)(A), the term advance payment means any payment that meets the following three requirements: (1) The full inclusion of the payment in gross income in the year of receipt is a permissible method of accounting; (2) any portion of the advance payment is included in revenue in an AFS for a subsequent tax year; and (3) the advance payment is for goods, services, or such other items that the Secretary has identified. Section 451(c)(4)(B) lists certain payments that are excluded from the definition of advance payment and gives the Secretary the authority to identify other payments to be excluded from the definition. Section 451(c)(4)(C) provides a special definition of the term “receipt” for purposes of the definition of advance payment, and section 451(c)(4)(D) states that rules similar to those for allocating the transaction price among performance obligations in section 451(b)(4) also apply for purposes of section 451(c).

IRD does not include “items which are excluded from gross income under subtitle A.”[4431]

When the owner who is not the insured dies, we do not know whether the policy’s value in excess of “investment in the contract” (such excess, the “inside build-up”) is going to be includible in income (if taken out before the insured dies)[4432] or excluded from income (if received as a nontaxable death benefit).[4433] In other words, it is not true that “all the events have occurred which fix the right to receive such income and the amount thereof can be determined with reasonable accuracy.” Therefore, the inside build-up has not “accrued” upon that owner’s death and cannot constitute IRD.

This analysis is consistent with a test the Tax Court formulated for determining whether proceeds from a sale contract are IRD. The test considers:[4434]

[4431] Reg. § 1.691(a)-1(c).

[4432] Code § 72(e).

[4433] See fns. 4411-4412.

[4434] *Estate of Peterson v. Commissioner*, 667 F.2d 675 (8th Cir. 1981), summarizing the Tax Court’s holding. Although the Eighth Circuit agreed with the Tax Court’s holding and pointed out that the IRS agreed with the test when it appealed, it held that lack of delivery of the sold goods sufficed to prevent IRD treatment:

> Here, the task remaining to be performed by the estate was performance of the contract. We agree with the conclusion of the Tax Court that performance of the contract, which, under the circumstances, involved care and feeding of livestock and delivery, cannot be characterized as a ministerial or minor act. However, we think that characterization of the tasks which remain after the death of the decedent should not necessarily depend upon the nature of the subject matter of the sales transaction. For example, the subject matter of the sales transaction in the present case was livestock, which obviously required care and feeding. What if the subject matter was not livestock but logs or refrigerators? It would still be the task of the decedent’s transferee to deliver or otherwise dispose of the logs or refrigerators, even though that type of property does not require the care that livestock does.
>
> We recognize that the analysis followed by the Tax Court emphasizes delivery or disposal of the subject matter of the sales transaction and, to a certain degree, discounts the significance of the sales contract. Compare Gordon, Income in Respect of a Decedent and Sales Transactions, 1961 Wash. U.L.Q. 30, 37-38 (proposing that §691 should apply to sales proceeds if the contract of sale is incomplete at death “only as to delivery of the res and receipt of the purchase price”). Nonetheless, this analysis is not inconsistent with *Trust Co. v. Ross*, *supra*, 392 F.2d at 697, where the contract of sale was executed and the stock was placed in escrow before the death of the decedent and the tasks remaining for the estate were “minor,” and *Commissioner v. Linde*, *supra*, 213 F.2d at 4-8, where the decedent had delivered the property before death to the marketing cooperative, thus “converting” the property into a right to receive income. Moreover, “while the death of a decedent can be a fortuitous event tax-wise, it is certainly hard to visualize death as a tax avoidance scheme.” Note, Sales Transactions and Income in Respect of a Decedent, *supra*, 3 Ga. L. Rev. at 615. After all, the decedent in a sales case does not prearrange his death in order to shift the responsibility for delivering the subject matter of the sale transaction to his executor or to take advantage of the fair market value basis rule of § 1014(a) and thus avoid the reach of § 691.

However, the IRS does not appear to agree with the Eighth Circuit’s emphasis on delivery. Rev. Rul. 82-1 involved the following facts:

> A taxpayer, who used the cash receipts and disbursements method of accounting, held title to a personal residence solely in the taxpayer’s name. The taxpayer met all the age, use, and holding requirements of section 121 of the Code relating to the treatment of gain from sale or exchange of a principal residence by an individual who has attained age 55. The taxpayer had not previously made an election under section 121 with respect to any prior sale.

(1) whether the decedent entered into a legally significant arrangement regarding the subject matter of the sale,[5]

(2) whether the decedent performed the substantive (nonministerial) acts required as preconditions to the sale,[6]

(3) whether there existed at the time of the decedent's death any economically material contingencies which might have disrupted the sale,[7] and

(4) whether the decedent would have eventually received the sale proceeds if he or she had lived.[8]

74 T.C. at 639-41.

[5] As noted by the Tax Court, "[t]his arrangement may take a variety of forms: an express executory contract of sale [as in *Trust Co. v. Ross*, *supra*, 392 F.2d 694]; an implied contract for sale [A delivers apples to Y, Y accepts the apples, A dies before Y can pay for them]; or a contractual arrangement with a cooperative marketing association [as in *Commissioner v. Linde*, *supra*, 213 F.2d 1 (no contract or sale, just delivery of grapes to marketing cooperative; proceeds held income in respect of a decedent when received)]." *Estate of Peterson v. Commissioner*, 74 T.C. 630, 639 (1980) (parentheticals substituted and expanded). *See also Halliday v. United States*, 655 F.2d 68, 72 (5th Cir. 1981) (the right to income need not be legally enforceable).

[6] "One indicium of whether a decedent has performed the applicable substantive acts is whether he has delivered, or somehow placed, the subject matter of the sale beyond his control prior to his death." *Estate of Peterson v. Commissioner*, *supra*, 74 T.C. at 640. *Compare* M. Ferguson, J. Freeland & R. Stephens, *Federal Income Taxation of Estates*

> The taxpayer entered into a binding executory contract to sell the residence and accepted a down payment. The terms of the contract called for delivery of the deed and possession of the property upon receipt of the balance of the purchase price. After substantial fulfillment of the prerequisites to consummation of the sale and with only ministerial obligations remaining to be performed under the contract, but prior to closing the sale, the taxpayer died and the sale was completed when the executor of the taxpayer's estate received payment in full and delivered the deed.

Rev. Rul. 82-1 held:

> Consistent with the extension of rights and privileges accorded a fiduciary under section 6903, the executor may "stand in the shoes" of the decedent for purposes of making the election under section 121, with respect to the sale of the residence described herein. However, if the executor chooses not to make the election under section 121, or to the extent that the gain exceeds the amount excludable under section 121, the provisions of section 691(a), relating to income in respect of a decedent, will apply. Rev. Rul. 78-32.

In *Trust Co. of Ga. v. Ross*, 392 F.2d 694 (5th Cir. 1967), *aff'g* 262 F.Supp. 900 (N.D. Ga. 1966), cert. denied 393 U.S. 830 (1968), the decedent had fully performed, but the buyer had not met financing contingencies and other contingencies out of the decedent's control remained. The Fifth Circuit found IRD:

> When the facts in these cases are all viewed, it is readily apparent that the proceeds in issue were realized as a consequence of negotiations and an enforceable contract made by Mr. Dinkler, Sr., during his lifetime, and not the result of any material acts or activities by the estate. The right to the proceeds was acquired by the plaintiffs solely by virtue of the death of the decedent and not through their own efforts. Had Mr. Dinkler lived through the closing date, the proceeds would have been income to him and, consequently, they constitute income in respect of a decedent when received by the estate.

> *and Beneficiaries*, *supra*, 180-84 ("[E]vend where the property has been made the subject of a binding, executory contract of sale, if the benefits and hazards of ownership are still possessed by the decedent at his death, the property is entitled to a § 1014(a) basis in the hands of his estate, and his negotiated profit will not be taxed to his estate (or to anyone) under § 691 when the sale is completed after his death.") (footnote omitted), with Gordon, Income in Respect of a Decedent and Sales Transactions, 1961 *Wash. U.L.Q.* 30, 37 (§ 691 should apply to sale proceeds from sales which at the time of the decedent's death are incomplete "only as to delivery of the *res* and receipt of the purchase price").
>
> [7] *Cf. Keck v. Commissioner*, *supra* 415 F.2d at 534 (sale of stock was contingent upon Interstate Commerce Commission approval; proceeds held not income in respect of decedent where ICC approval not granted at time of the decedent's death).
>
> [8] *See* 26 C.F.R. § 1.691(a)-2(b) (Ex. 4) (buy-sell agreement effective at date of death; proceeds not income in respect of a decedent because the decedent could not have received the proceeds if he had lived).

The Tax Court in that case held:[4435]

> Although three of the four requirements tend to support a conclusion opposite to the one reached, all four elements are necessary to support a finding that the decedent possessed a right to the sale proceeds as of his date of death. [fn. omitted] Accordingly, the absence of one of these requirements precludes the applicability of section 691.

In analyzing the requirement that was missing, the Tax Court said:[4436]

> The fourth requirement is that the decedent, himself, would have eventually received (actually or constructively) the sale proceeds if he had lived. This situation may be best exemplified by a typical date-of-death buy-sell agreement between a decedent and his corporation; since, by its terms, the sale is only effective upon the decedent's death, the decedent could not have received the sale proceeds if he had lived. Therefore, the proceeds from such a sale are not income in respect of a decedent.

(Related to this is the "open transaction" doctrine. See part II.A.1.d.ii Monetizing Founder's Remaining Shares After Going Public, discussing the prepaid variable forward Tax Court case of *Estate of Andrew J. McKelvey v. Commissioner*). Also, the IRS has unsuccessfully attempted to use the tax benefit rule (see part II.G.4.m.iii Tax Benefit Rule) to circumvent any protection provided above.[4437]

Applying the Tax Court's fourth requirement to the insurance policy analysis, would the decedent have received taxable income from the policy if the decedent/policy owner had lived? The answer is not necessarily – if the insured died while the policy owner was living, the policy owner would have received a tax-free death benefit. The answer would be different if the policy

---

[4435] 74 T.C. at 643-44.
[4436] 74 T.C. at 641. In a case involving a similar issue, farm inputs deducted on the decedent's final returns received a basis step-up at death and could be deducted by his widow on her return, even though their expected use was obvious. See *Backemeyer*, discussed in part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.
[4437] See text accompanying fn 6593 in part III.B.2.g Income Tax Concerns When Removing Property from the Estate Tax System.

owner had submitted the appropriate forms to cash out the policy before the policy owner died and the insurance company simply had not cut the check before the policy owner died. Thus, if the policy owner has not, before the policy owner's death, submitted whatever documentation is required to cash in the policy, then the events fixing the policy's tax consequences have not occurred before the policy owner's death and the internal cash build-up obtains a basis step-up because it does not constitute IRD.

Insurance companies remain concerned because they view the inside build-up as vested untaxed earnings. Although this argument seems untenable for contracts whose cash value might later decrease, for fully paid whole-life they understandably view it as absolute earnings that will never decrease. Rev. Rul. 2009-13[4438] took the position that, on the sale of a life insurance contract, the gain on sale is ordinary income to the extent that it does not exceed the inside build-up.[4439] The substitute-for-income doctrine, under which the IRS states that the asset is not a capital asset to the extent that the doctrine applies, makes them view the inside build-up as IRD. What they do not take into account is that assets that generate ordinary income on sale, such as inventory (which is not a capital asset),[4440] do not constitute IRD unless actually sold before death; an asset's character as an ordinary income asset has nothing to do with IRD characterization unless the income is "accrued"[4441] or is a specified class of assets subject to IRD, neither of which applies to a life insurance contract. If and to the extent that a policy might not constitute a capital asset, that classification is irrelevant, because the Code § 1014 basis step-up rules apply to more than just capital assets.[4442] Furthermore, Rev.

[4438] See fn 4402 in part II.Q.4.b Transfer for Value Rule; Basis for the fact that Rev. Rul. 2009-13 does not apply to basis determinations.

[4439] See fn. 4406.

[4440] Code § 1221(a)(1) provides:

> For purposes of this subtitle, the term capital asset means property held by the taxpayer (whether or not connected with his trade or business), but does not include … stock in trade of the taxpayer or other property of a kind which would properly be included in the inventory of the taxpayer if on hand at the close of the taxable year, or property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business.

Note that real estate might or might not constitute inventory. See part II.G.26.c Future Development of Real Estate.

[4441] Rev. Rul. 58-436. However, crop shares or livestock received as rent by a decedent, who had employed the cash method of accounting, before the decedent's death, and owned by the decedent at the time of the decedent's death, as well as crop shares or livestock which the decedent had a right to receive as rent at the time of the decedent's death for economic activities occurring before the decedent's death, constitute income in respect of a decedent which is required to be included in gross income, for Federal income tax purposes, in the year in which the crop shares or livestock are sold, or otherwise disposed of. Rev. Rul. 64-289. *Friedman v. Commissioner*, 41 T.C. 428 (1965), *aff'd* 346 F.2d 506 (6th Cir. 1965) and Rev. Rul. 69-102 were disturbed when a taxpayer sought a charitable deduction for the full value of life insurance policies and therefore taxed the taxpayer on ordinary income on the policies' inside build-up based on a combination of the assignment-of-income principle and the taxpayers realizing a benefit (charitable deduction) for that income; Code § 170(e) and Reg. § 1.170A-4(a) address this issue by not permitting a deduction on the portion of the policy that would constitute ordinary income if the policy were sold, so presumably these authorities are obsolete in light of Rev. Rul. 2009-13. Rev. Rul. 69-102 involved an endowment policy, which typically provides for a payout of the accrued income on a specified maturity date, so before the gift all events had occurred that would require the payout of the inside build-up. Once a policy has been annuitized, an assignment triggers the assignment of income doctrine, *Jones v U.S.*, 395 F.2d 938 (6th Cir. 1968), but that should not apply to a policy passing by reason of death to the extent that the policy had not been annuitized.

[4442] For example, nobody has ever suggested that a depreciable building used in a business is not eligible for a new basis under Code § 1014, even though Code § 1221(a)(2) provides that such a building is not a

Rul. 2009-13 did not say that inside build-up creates gain; it merely said that inside build-up recharacterizes part or all of the gain on sale of the policy as ordinary income. Of course, Rev. Rul. 2009-13 has been retroactively repealed, [4443] so my mention of it simply provides context in which to analyze these issues.

Thus, although the potential ordinary income taxation of inside build-up might make one inclined to view it as IRD, that view has no basis in the law, although I found one probably irrelevant and unsound source that the IRS might try to seize upon in the event of an audit.[4444]

II.Q.4.e.ii. Practical Issues In Implementing Any Basis Adjustment On the Death of an Owner Who Is Not the Insured

The only direct immediate practical use of a stepped-up basis is avoiding gain on sale. After all, the death benefit is tax-free if one avoids the transfer for value rules (see part II.Q.4.a Funding the Buy-Sell). The remaining big question is any effect on distributions of inside build-up, the taxation of which depends on the "investment in the contract" under Code § 72(g).

The estate of the decedent who is not the insured does not appear to receive a new "investment in the contract" because the contract was not transferred to it "for a valuable consideration." However, if that estate later sold the policy for full value to a different taxpayer:

- The estate would have a stepped-up basis.
- The transferee would have a new "investment in the contract."
- The transferee would need to make sure that the "transfer for value" rules[4445] do not make the death benefit taxable.[4446]

Before buying a cash value policy to be includible in the estate of a person who is not the insured or that might be transferred in a taxable sale (perhaps one that avoids the transfer for value rules), consider asking the insurance company its procedures in this area. Results from that inquiry include the following:

---

capital asset. See, *e.g.*, Reg. §§ 1.1245-2(c)(1)(iv) and 1.1250-3(b)(2)(i), providing that Code § 1014 can wipe out depreciation recapture when such property is included in the deceased owner's estate. See also the quotes from the U.S. Supreme Court and Tax Court in the text accompanying fn. 2086, found in part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

[4443] See fn 4402 in part II.Q.4.b Transfer for Value Rule; Basis for the fact that Rev. Rul. 2009-13 does not apply to basis determinations.

[4444] Rev. Rul. 75-125 (which the Rev. Rul. 92-47 cited as being good law) took the position that stock, which has net unrealized appreciation (NUA) that was not taxed when distributed from a qualified retirement plan, does not receive a basis step-up at death to the extent of that NUA. This ruling preceded *Peterson* (fn. 4434), and I believe it is simply wrong in light of *Peterson*, because there is no assurance that the gain will ever be realized, and the ruling did not cite any particular support in reaching the conclusion it did. It is also philosophically inconsistent with the IRS' failure to assert assignment of income principles or otherwise impose any taint when NUA property was given to charitable remainder trusts in Letter Rulings 200038050, 200202078, 200215032, 200302048, and 200335017.

[4445] See part II.Q.4.a Funding the Buy-Sell, especially fns. 4330-4342.

[4446] Nothing in Code § 72(g) or Reg. § 1.72-10 suggests that an exception to the transfer for value rules (other than a substituted basis transaction) would make the contract not transferred for a valuable consideration.

- "We never undertake to make a Code § 72(g) adjustment, because we don't want to be bothered with it." If the insurance company answers that way, ask whether they will honor a request to check the box "taxable amount not determined" so that the taxpayer is not required to disprove what otherwise would be an incorrect Form 1099.

- "We don't want to undertake to make a Code § 72(g) adjustment, but we will do it if a sale violates the transfer for value rules; in that case, we need to tell the IRS the taxable amount at death, so it is worth it to track this." To obtain that Form 1099 reporting, the policy owner's estate might sell the policy in a transaction that violates the transfer for value rules. One might follow that transfer by a transfer to the insured, which would cleanse the transfer for value taint (perhaps other cleansing opportunities are available as well). For example, Dad owns policy on Daughter's life. Dad dies. Dad's estate sells the policy to Son, violating the transfer for value rules (unless an exception applies) and triggering the insurance company tracking the new "investment in the contract." Then Son sells the policy to Daughter (the insured); this transaction would not generate any gain to the extent of Son's basis due to his purchase from Dad's estate, and Daughter's purchase cleanses the transfer-for-value taint because she is the insured. However, one might decide that taking all these steps is not worth the effort and simply ask whether the insurance company will honor a request to check the box "taxable amount not determined."

II.Q.4.f. Split-Dollar Arrangements

II.Q.4.f.i. Split-Dollar Generally

A split-dollar arrangement is an arrangement in which one party pays part or all of the premiums and one or more of the economic rights to the policy (cash value, death benefits, etc.) are divided. An employer cannot bundle together a number of such arrangements and call them deductible welfare benefit plans; doing so subjects the employer to penalties.[4447] If an employer buys insurance on an employee's life and allows the employee to designate the beneficiary, that arrangement may constitute an ERISA plan.[4448] The IRS has an audit techniques guide on split-dollar arrangements.[4449]

The IRS created split-dollar rules before the U.S. Supreme Court found that interest could be imputed on loans and before Code § 7872 was enacted. During that period, the employer would retain the premiums it paid when the arrangement terminated (whether by death or by unwinding the arrangement – the latter referred to as a "rollout"), and the employee's beneficiary

---

[4447] *Our Country Home Enterprises, Inc. v. Commissioner*, 145 T.C. 1 (2015). This case involved seven taxpayers, and the parties in approximately 40 other cases agreed to be bound by the result of this case. Notice 2007-83 announced that the IRS would target welfare benefit plans funded by life insurance. Notice 2007-84 announced that the IRS would target certain multi-employer welfare benefit plans. Program Manager Technical Advice 2015-11 explains how to apply the 30% accuracy-related penalty under Code § 6662A(c), to taxpayers who didn't follow the requirement of Notice 2007-83 to disclose participation in a listed transaction that used cash value life insurance policies to provide welfare benefits in a purported Code § 419 plan. The IRS successfully penalized Keller Tank Services II, Inc., one of the employers in the *Our Country Home Enterprises* case, for failure to report its participation in the plan as a "listed transaction" on its tax return. *Keller Tank Services II, Inc. v. Commissioner*, 854 F3d 1192 (10th Cir. 2017).

[4448] And it did in *Alberth v. Southern Lakes Plumbing & Heating, Inc.*, 2020 WL 1082775, 2020 Employee Benefits Cas. 84,566 (E.D. Wis. 3/6/2020) (Docket No. 19-CV-62).

[4449] See http://www.irs.gov/Businesses/Corporations/Split-Dollar-Life-Insurance-Audit-Technique-Guide-(03-2005) and www.irs.gov/businesses/corporations/article/0,id=136548,00.html.

(or employee on rollout) would receive the death benefit (or cash value in the case of a rollout) after reimbursing the premiums paid.[4450] It needed a mechanism to tax long-term interest-free loans, which is what split-dollar was essentially at that time, but without a promissory note. Under that system, the employer was treated as owning the policy and providing taxable economic benefits to the employee each year equal to the value of one year of life insurance protection. This treatment applied whether the employer or employee owned the policy. To avoid estate tax on the death benefit, an irrevocable life insurance trust ("ILIT") would own the policy, so that each year's imputed income to the employee was also a gift to the trust. Eventually, the arrangement would be undone before the employee's death, whether because the annual life insurance protection became too high as the employee got older, because the parties wanted to simplify the arrangement, or termination of employment. Often, the policy's cash value exceeded the premiums paid; and some taxpayers took the position that receipt of the life insurance policy, which had a cash value in excess of the premiums reimbursed to the employer on rollout, was not a taxable event, because the employee (or life insurance trust) already had legal title to the policy. The government was not happy with the taxpayer using the tax fiction of the employer owning the policy before rollout and then ignoring that tax fiction at rollout and responded by promulgating the regulatory regime described below.

Now split-dollar arrangements are governed by Reg. § 1.7872-15, under which premium payments generally are treated as loans, or Reg. § 1.61-22, the "economic benefit regime," under which generally one person is treated as owning all of the policy's cash value and the other person pays, or is treated as paying, for one-year term life insurance to the extent of the death benefit not allocated to the owner or deemed owner.

In the economic benefit regime, generally the owner and non-owner receive tax-free death benefits. The owner applies Code § 72 to any distributions that are not death benefits; even a deemed owner is treated as the real owner under Code § 72. See part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit Arrangement. The other version involves the premium payor being treated as making loans to the policy owner. Generally, interest is actually paid when the insured dies but treated as paid every year,[4451] and the parties need to make an election to give effect to the loan for income and gift tax purposes.[4452] See part II.Q.4.f.iii Split-Dollar Loans under Reg. § 1.7872-15.

For the treatment of the economic benefit regime before Reg. § 1.61-22 was promulgated, agreements entered into on or before September 17, 2003 are instead subject to IRS Notices 2001-10 and 2002-8[4453] and Rev. Rul. 2003-105, so long as they are not "materially

[4450] The reimbursement obligation was nonrecourse – paid only out of the policy and not personally by the employee.

[4451] Stated interest that is not payable annually triggers the Code § 1272 original issue discount (OID) rules. See text accompanying fns 4501-4506 in part Split-Dollar Loans under Reg. § 1.7872-15.

[4452] See text accompanying fns 4515-4516 in part II.Q.4.f.iii Split-Dollar Loans under Reg. § 1.7872-15.

[4453] Notice 2002-8 discusses the extent to which changes in the IRS' view might affect arrangements then in effect:

> **VI. Effect On Other Documents**
> Notice 2001-10 is revoked. Notwithstanding that revocation, Rev. Rul. 55-747 remains revoked, and Rev. Rul. 64-328, 1964-2 C.B. 11, and Rev. Rul. 66-110 remain modified to the extent that those rulings indicate that an employer's premium payments under a split-dollar life insurance arrangement may not be treated as loans.
> Except for Part III (Revised Standards for Valuing Current Life Insurance Protection), no inference should be drawn from this notice regarding the appropriate Federal income, employment and gift

modified." Reg. § 1.61-22(j) lists some unenlightening safe harbors for what does not constitute a material modification. "Material modification" for this purpose includes changes that would not constitute a material modification under Code § 101(j) (employer-owned life insurance)[4454] or 264(f) (limiting deductions for interest expense allocable to unborrowed policy cash value).[4455]

The economic benefit regime might also trigger the harsh nonqualified deferred compensation rules of Code § 409A.[4456] Although the Code § 409A risk described in fn. 4456 is much smaller under Reg. § 1.61-22 than under prior law, be careful to consider it in either case.[4457]

All split-dollar arrangements require an exit strategy. For the loan regime, somehow the loans must be repaid; however, they do not need to be repaid until the insured's death, so the exit strategy might be easy. For the economic benefit regime, the deemed term portion becomes prohibitively expensive when the insured reaches a certain age, and it is not unusual for the parties not to have planned for how the non-owner obtains ownership for tax purposes (even though they should have). For split-dollar agreements entered into on or before September 17, 2003, when the policy is rolled out with the non-owner merely repaying the premiums:

- The equity (excess of policy value over amount owed the owner) may be taxable, but the no-inference language in fn 4453 supports a reasonable basis argument that lets one take a tax return reporting position that the equity is not taxable, so a taxpayer can take the position, file Form 8275, and see what happens. *Neff v. Commissioner*, T.C. Memo. 2012-244, accepted the IRS' position that the taxpayer had taxable income to the extent that the amount the taxpayer owed the employer on rollout exceeded the amount the employee paid the employer (rather than the employee's argument that the present value of the amount payable at death was the proper measure). It appears that nobody considered whether the

---

> tax treatment of split-dollar life insurance arrangements entered into before the date of publication of final regulations. However, taxpayers may rely on this notice (including a reasonable application of the rules to be proposed as described in Part II) or Notice 2001-10 for split-dollar life insurance arrangements entered into before the date of publication of final regulations.

I am aware of a taxpayer who took the position of no income or gift on rollout, filed Form 8275, received a brief question from the IRS, and then heard nothing before the statute of limitations passed. See Thompson Coburn doc. 6348842 (email from an outside lawyer to that effect).

[4454] See part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance, especially part II.Q.4.g.i Analysis of Code § 101(j).

[4455] Notice 2008-42.

[4456] See text accompanying fns. 4307-4308.

[4457] Reg. § 1.409A-1(b)(1) provides:

> A legally binding right to an amount that will be excluded from income when and if received does not constitute a deferral of compensation, unless the service provider has received the right in exchange for, or has the right to exchange the right for, an amount that will be includible in income….

Generally, for post-2003 split-dollar agreements, the employee will have to pay for the policy's value under part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit Arrangement under Reg. § 1.61-22; however, one might want to clarify that the employee will need to pay the greater of the amount provided under the regulations or the policy's fair market value, which as a practical matter would likely to be the value on Form 712. For pre-2003 agreements that are not materially modified, the employee paying the cash surrender value would suffice. Given that these older arrangements might not require the employee to pay the cash surrender value, one should look to Notice 2007-34 to try to make the policy qualify for being grandfathered from Reg. § 1.61-22 and comply with Code § 409A.

employee should have been taxable on the policy's value, which exceeded the amount owed to the employer.

- However, if I can find a way to avoid doing that, I will. For example, if the employer can use the deduction (or is a pass-through entity whose owners can use the deduction), then the employer can afford to gross them up for taxes, because the employer is saving taxes by taking that reporting position. A classic example: Employer and employee are both in the federal and state combined 40% bracket, and the amount of equity is $100. The employer pays the employee a $67 bonus so that the employee can pay the employee's taxes. The employee's taxes are $67, which is 40% of $167, the latter being the sum of the $100 policy value and the $67 bonus. The employer saves $67 taxes by reporting the same $167 compensation value, so the employer is not out-of-pocket anything.

- I successfully use the above strategy most of the time. However, the paradigm falls apart when the employer's tax benefit is less than the employee's tax cost, which often happens when the employer has little taxable income from operations against which to use the deduction. And my solution does not address estate/gift tax issues. So sometimes we need to fall back to the taxpayer taking the position that the equity is not taxable. And I have not heard any war stories about the IRS auditing this issue.

The loan regime can be somewhat unwieldy, in that each year's premium requires a separate loan. Furthermore, the economic benefit regime tends to be most beneficial to the non-owner in the policy's early years, in which the premiums paid tend to exceed the policy's cash value. Considering these issues, one might consider starting with the economic benefit regime and the switching to the loan regime when cash value approaches premium paid. This switching approach avoids administering and accruing interest on multiple loans in the policy's early years and allow cash value increases after that point to benefit the party that originally was the non-owner. By the time the switch occurs, the policy might very well be earning enough dividends to pay premiums, perhaps avoiding the need to administer multiple loans to pay for those future premiums. If the original non-owner is an irrevocable trust, during the economic benefit phase (and of course later) the grantor can make annual exclusion gifts to the trust and perhaps even use leveraged estate planning techniques[4458] to grow the trust so that the trust can afford to pay future premiums and perhaps even retire the split-dollar loans.

II.Q.4.f.ii. Technical Details of the Split-Dollar Economic Benefit Regime

II.Q.4.f.ii.(a). Is the Arrangement a Split-Dollar Arrangement?

Generally, in the split-dollar economic benefit regime, the idea is giving only pure term protection to the "non-owner" and all other right to the actual or deemed "owner."

Reg. § 1.61-22(b)(1) provides:

> *In general*. A split-dollar life insurance arrangement is any arrangement between an owner and a non-owner of a life insurance contract that satisfies the following criteria -

[4458] See part III.B.2.b General Description of GRAT vs. Sale to Irrevocable Grantor Trust.

(i) Either party to the arrangement pays, directly or indirectly, all or any portion of the premiums on the life insurance contract, including a payment by means of a loan to the other party that is secured by the life insurance contract;

(ii) At least one of the parties to the arrangement paying premiums under paragraph (b)(1)(i) of this section is entitled to recover (either conditionally or unconditionally) all or any portion of those premiums and such recovery is to be made from, or is secured by, the proceeds of the life insurance contract; and

(iii) The arrangement is not part of a group-term life insurance plan described in section 79 unless the group-term life insurance plan provides permanent benefits to employees (as defined in § 1.79-0).

Even if the above requirements are not met, any arrangement between an owner and a non-owner of a life insurance contract is treated as a split-dollar life insurance arrangement if it qualifies as a certain compensatory arrangement or shareholder arrangement.[4459]

Reg. § 1.61-22(b)(2)(ii) provides that the following constitutes a split-dollar compensatory arrangement:

(A) The arrangement is entered into in connection with the performance of services and is not part of a group-term life insurance plan described in section 79;

(B) The employer or service recipient pays, directly or indirectly, all or any portion of the premiums; and

(C) Either-

(1) The beneficiary of all or any portion of the death benefit is designated by the employee or service provider or is any person whom the employee or service provider would reasonably be expected to designate as the beneficiary; or

(2) The employee or service provider has any interest in the policy cash value of the life insurance contract.

As to Reg. § 1.61-22(b)(2)(ii)(A), *Our Country Home Enterprises, Inc. v. Commissioner*, 145 T.C. 1 (2015), discussed this requirement in depth, including the requirement of Reg. § 1.79-1(a)(4) that a group term arrangement not involve individual selection:

> Guardian and Minnesota Life required that the Our Country and Environmental shareholder/employees tender information on their health, traveling tendencies, and/or driving traits. The need to submit that type of personal information as a condition to receiving the insurance strongly suggests, and we find, that the insurers were exercising underwriting judgment with respect to at least the Our Country and Environmental shareholder/employees in connection with the issuance of the life insurance related to them. This finding is further strengthened by the fact that, in the case of Guardian at least, Guardian specifically rated each of Our Country's participating employees for purposes of setting the premiums payable on their policies and offered to try to find a way to reduce the premium attributable to the Blake policy. The mere fact that an

[4459] Reg. § 1.61-22(b)(2)(i).

insurer such as Guardian or Minnesota Life may add up the premiums that apply to separate policies that it sells on a specific group of insureds and then tender the total as the amount due on a group policy does not necessarily recharacterize the separate policies as part of a single group term life insurance plan. Instead, as we have stated, the exercise of underwriting judgment with respect to the specific persons in a group is indicative of the issuance of individual insurance policies rather than group policies. We hold that the insurance policies at hand are not group term life insurance policies for Federal income tax purposes.

De Los Santos v. Commissioner, T.C. Memo. 2018-155, followed *Our Country Home*. In contrast, if a group-term policy allows employees to buy additional pure term insurance on an after-tax basis without any such purchases affecting the employer-provided group plan, the employees' independent choices do not affect the employer-provided group plan's qualification as such. Letter Ruling 201542003.

As to Reg. § 1.61-22(b)(2)(ii)(C)(1), *Our Country Home Enterprises, Inc. v. Commissioner*, 145 T.C. 1 (2015), discussed this requirement in depth:

The shareholder/employees named the beneficiaries of the death benefits payable under their insurance policies by designating through the Sterling Plan the individuals who would receive the death benefits under the plan, which, in turn were the death benefits under the policy. In addition, those shareholder/employees were assured that their designated beneficiaries would receive any death benefits payable on those policies to the extent that the shareholder/employees died while participants in the plan. Petitioners seek a contrary holding essentially by looking at the life insurance policies through the wider end of a telescope towards its narrower end and seeing that the Sterling Plan is named as the beneficiary on the policies. They conclude from this view that none of the individuals who the participating employees designate to receive the death benefits payable by the Sterling Plan is [t]he beneficiary of all or any portion on the death benefit for purposes of section 1.61-22(b)(2)(ii)(C), Income Tax Regs. We, on the other hand, look telescopically at the life insurance benefit from the narrower end towards the wider end, as one commonly does, and see the ultimate recipient of the death proceeds as the person designated by the shareholder/employees. The fact that the death proceeds from the life insurance policies are funneled through the Sterling Plan to each of the ultimate recipients does not blur our view (or our conclusion) that each of those recipients is the beneficiary of the death benefit for purposes of section 1.61-22(b)(2)(ii)(C), Income Tax Regs. *Cf. Commissioner v. Court Holding Co.*, 324 U.S. 331, 334 (1945) (To permit the true nature of a transaction to be disguised by mere formalisms *** would seriously impair the effective administration of the tax policies of Congress.); *Minn. Tea Co. v. Helvering*, 302 U.S. 609, 613 (1938) (A given result at the end of a straight path is not made a different result because reached by following a devious path.). The light at the end of the tunnel brightly illuminates our conclusion, given that the Sterling Plan would pay no death benefit were it not for the life insurance policies, and the employee to whom a policy relates, rather than the Sterling Plan, is assured of receiving the entire amount that is payable under the terms of the policy.

As to Reg. § 1.61-22(b)(2)(ii)(C)(1), *Our Country Home Enterprises, Inc. v. Commissioner*, 145 T.C. 1 (2015), discussed this requirement in depth:

We also conclude that the shareholder/employees of Our Country and Environmental had interests in the their life insurance policies and the cash values thereof. This conclusion is supported by at least five facts. First, each life insurance policy and any funds related thereto were intended to be received by the corresponding employee or his or her designee(s) and no one else, and those employees were the only ones who had the right to receive or otherwise to redirect to someone else the cash value of the life insurance policies related to them. Second, the employees could elect to receive their policies upon retiring from employment with the employer. Third, the funds in the Sterling Plan could not be accessed by either the employer or by the employer's creditors, and Our Country and the Environmental employees, upon retiring or alternatively upon their employers' ceasing participation in the Sterling Plan, were certain to get those funds in the form of the policies that then passed to the employees. Fourth, a participating employee, before actually receiving the funds in his or her account, could be allowed to direct the investment of those funds and thus enjoy the benefit of any investment gain or suffer the detriment of any investment loss. Fifth, if the participating employee were to die while his or her insurance policy was in force, then the death benefit under that policy would ultimately be paid to his or her beneficiary in accordance with the terms of the policy.

> We also find important to our just-stated conclusion that the plan benefits were set to be fully vested either when a shareholder/employee satisfied the vesting requirements that he or she chose (or possibly could choose) in the name of the employer or when the employer terminated the plan. And as to vesting, the shareholder/employees were not necessarily bound by the vesting requirements that were initially set in their plans. Instead, at their whim they could accelerate or otherwise change the vesting requirements to their preference. In the case of Mr. Blake, for example, he executed an adoption agreement on July 30, 2006, retroactive to January 1, 2005, that lowered the normal retirement age for the employee participants in the Our Country plan and accelerated his complete vesting to the then-present time.

If an employer funds a split-dollar arrangement using a Code § 419(e) welfare benefit fund, the employer and employee retain their status as such under the split-dollar arrangement notwithstanding the fund's role and notwithstanding any delay in the fund remitting premiums to the insurance company.[4460]

The following constitutes a split-dollar shareholder arrangement:[4461]

(A) The arrangement is entered into between a corporation and another person in that person's capacity as a shareholder in the corporation;

(B) The corporation pays, directly or indirectly, all or any portion of the premiums; and

(C) Either-

(1) The beneficiary of all or any portion of the death benefit is designated by the shareholder or is any person whom the shareholder would reasonably be expected to designate as the beneficiary; or

[4460] *De Los Santos v. Commissioner*, T.C. Memo. 2018-155.
[4461] Reg. § 1.61-22(b)(2)(iii).

(2) The shareholder has any interest in the policy cash value of the life insurance contract.

Mcgowan v. U.S., 132 A.F.T.R.2d 2023-5955 (N.D. OH 9/25/2023),[4462] held that an employer-funded life insurance arrangement was split dollar. First, it discussed Reg. § 1.61-22(b)(2)(ii):

> Plaintiffs do not dispute that the arrangement was "entered into in connection with the performance of services." Additionally, the Restricted Property Trust was a whole life insurance policy, not a group-term life insurance plan. The requirement of subparagraph A is therefore satisfied. Plaintiffs concede that the premiums were paid by the Company (the employer), which satisfies subparagraph B. And according to the terms of the Benefits Trust Agreement, upon Dr. McGowan's death, the death benefit would be paid by the RPT subtrust to Dr. McGowan's designee. His designee was his wife, Michelle McGowan. The parties primarily disagree over whether this case meets the overarching criteria that the transaction was between an owner and non-owner of the policy, which would require the Company to be treated as the policy owner.
>
> **Policy Ownership**
>
> The insurance policy was owned during the five-year Restricted Property Trust term by the DBT subtrust, which was owned by trustee Aligned Partners Trust Company. Plaintiffs contend this means the split-dollar regulation is inapplicable. Defendant responds that "in the case of a compensatory split-dollar arrangement, the employer is treated as the owner if the owner is an employee trust or welfare benefit fund."

The court quoted from Reg. § 1.61-22(c)(1)(iii), "Attribution rules for compensatory arrangements," which provides:

> For purposes of this section, if a split-dollar life insurance arrangement is entered into in connection with the performance of services, the employer or service recipient is treated as the owner of the life insurance contract if the owner (within the meaning of paragraph (c)(1)(i) of this section) of the life insurance contract under the split-dollar life insurance arrangement is -
>
> (A) A trust described in section 402(b);
>
> (B) A trust that is treated as owned (within the meaning of sections 671 through 677) by the employer or the service recipient;
>
> (C) A welfare benefit fund within the meaning of section 419(e)(1); or
>
> (D) A member of the employer or service recipient's controlled group (within the meaning of section 414(b)) or a trade or business that is under common control with the employer or service recipient (within the meaning of section 414(c)).

The court continued:

> Section 419(e)(1) defines a welfare benefit fund as any fund "which is part of a plan of an employer, and...through which the employer provides welfare benefits to employees

[4462] In discussing this case, court citations to locations of evidence are omitted from all of my quotations.

or their beneficiaries." 26 U.S.C. §§ 419(e)(1). The DBT was devised for the purpose of providing benefits from the Company to Dr. McGowan. ("through this Trust Agreement, ...[the] Corporation desires to provide certain financial benefits to each employee designated on Schedule A as an incentive to remain with the Corporation and as compensation for prior valuable services rendered"). Additionally, Plaintiffs admit the DBT is a welfare benefit fund. The tax courts have previously held a corporate employer is the owner of a life insurance policy owned by a fund or trust under the split-dollar regulation. See *Our Country Home Enters., Inc. v. Comm'r of Internal Revenue*, 145 T.C. 1, 40 (2015). This Court finds that the Company is correctly treated as the owner of the policy under the regulation.

Because the transaction meets the requirements of the split-dollar regulation, the taxation rules of the regulation are applicable.

II.Q.4.f.ii.(b). Split-Dollar Economic Benefit Arrangement under Reg. § 1.61-22

The rules below apply for purposes of the income tax, the gift tax, the Federal Insurance Contributions Act (FICA), the Federal Unemployment Tax Act (FUTA), the Railroad Retirement Tax Act (RRTA), and the Self-Employment Contributions Act of 1954 (SECA).[4463] Generally, the split-dollar economic benefit regime[4464] applies to any arrangement that is not subject to the split-dollar loan regime.[4465] It also applies to a loan arrangement if the following requirements of Reg. § 1.61-22(b)(3)(ii) apply:

(A) The arrangement is entered into in connection with the performance of services, and the employer or service recipient is the owner of the life insurance contract (or is treated as the owner of the contract under paragraph (c)(1)(ii)(A)(1) of this section); or

(B) The arrangement is entered into between a donor and a donee (for example, a life insurance trust) and the donor is the owner of the life insurance contract (or is treated as the owner of the contract under paragraph (c)(1)(ii)(A)(2) of this section).

[4463] Reg. § 1.61-22(a)(1) provides:

> *In general*. This section provides rules for the taxation of a split-dollar life insurance arrangement for purposes of the income tax, the gift tax, the Federal Insurance Contributions Act (FICA), the Federal Unemployment Tax Act (FUTA), the Railroad Retirement Tax Act (RRTA), and the Self-Employment Contributions Act of 1954 (SECA). For the Collection of Income Tax at Source on Wages, this section also provides rules for the taxation of a split-dollar life insurance arrangement, other than a payment under a split-dollar life insurance arrangement that is a split-dollar loan under § 1.7872-15(b)(1). A split-dollar life insurance arrangement (as defined in paragraph (b) of this section) is subject to the rules of paragraphs (d) through (g) of this section, § 1.7872-15, or general tax rules. For rules to determine which rules apply to a split-dollar life insurance arrangement, see paragraph (b)(3) of this section.

Noticeably absent from the list in the first sentence is estate tax, the consequences of which are provided in part II.Q.4.f.v Estate Tax Consequences of Split-Dollar Agreements.

[4464] The regulatory framework for the split-dollar economic benefit regime is valid. *Our Country Home Enterprises, Inc. v. Commissioner*, 145 T.C. 1 (2015).

[4465] Reg. § 1.61-22(b)(3)(i).

Generally, “with respect to a life insurance contract, the person named as the policy owner of such contract generally is the owner of such contract.[4466]

However:[4467]

(1) An employer or service recipient is treated as the owner of a life insurance contract under a split-dollar life insurance arrangement that is entered into in connection with the performance of services if, at all times, the only economic benefit that will be provided under the arrangement is current life insurance protection as described in paragraph (d)(3) of this section; and

(2) A donor is treated as the owner of a life insurance contract under a split-dollar life insurance arrangement that is entered into between a donor and a donee (for example, a life insurance trust) if, at all times, the only economic benefit that will be provided under the arrangement is current life insurance protection as described in paragraph (d)(3) of this section.

Note that (1) above does not prevent an employee from setting up an endorsement arrangement with the employer, in which the employee owns the policy (including cash surrender value) and pays the premiums and the employer pays for some current life insurance protection. In such an arrangement, the employee’s interest in the cash value means that current life insurance protection is not the employee’s only interest in the policy; therefore, the employee’s being named as the policy owner also makes the employee the owner for tax purposes.

Similarly, in a donor-donee economic benefit split-dollar agreement, if the donee is designated the owner of the life insurance policy, then the donee will be treated as the owner for tax purposes if the donee has any interest other than current life insurance protection. Although the donee having actual ownership of the policy would seem risky for this reason, such an arrangement might save estate tax if the donor is not the insured, as described in part II.Q.4.f.v Estate Tax Consequences of Split-Dollar Agreements.[4468]

Rev. Rul. 81-198 involved the following facts:

> The donor, D, is an employee of X, a corporation. In 1974, D and X entered into a “split-dollar” arrangement to purchase a whole life insurance policy on the life of D.
>
> Under the arrangement, X pays that portion of the annual premium that is equal to the amount of the increase in the cash surrender value of the policy during the year. D pays the balance.

[4466] Reg. § 1.61-22(c)(1)(i), which further provides:

> If two or more persons are named as policy owners of a life insurance contract and each person has, at all times, all the incidents of ownership with respect to an undivided interest in the contract, each person is treated as the owner of a separate contract to the extent of such person’s undivided interest. If two or more persons are named as policy owners of a life insurance contract but each person does not have, at all times, all the incidents of ownership with respect to an undivided interest in the contract, the person who is the first-named policy owner is treated as the owner of the entire contract.

[4467] Reg. § 1.61-22(c)(1)(ii)(A).

[4468] Especially fns. 4538-4540.

> Upon D's death, X will be entitled to receive out of the proceeds of the policy an amount equal to the funds it provided for premium payments. D has the right to name the beneficiary of the balance of the insurance proceeds.
>
> X was designated as owner of the policy. However, X could not cancel, surrender or assign the policy without D's approval. Neither X nor D had an obligation to continue making premium payments.
>
> On April 1, 1981, D executed a trust agreement for the benefit of D's child, assigning all of D's rights in the policy to the trustee. However, D was to continue to pay the portion of the premium allocated to D. At that time, the total of premiums previously paid by X was $8,590. The interpolated terminal reserve and proportionate part of the last premium paid before the date of the assignment which covers the period extending beyond the date totaled $12,583.

Rev. Rul. 81-198 held:

> Since the policy had been in force for some time and further premium payments were to be made after the date of the gift, the value of the transferred interest, for purposes of section 2512 of the Code, is $3,993, the interpolated terminal reserve plus the proportionate part of the gross premium paid before the date of the gift, $12,583, reduced by the amount of funds provided by X for premiums, which is the corporation's interest in the policy, $8,590. Regarding the gift tax consequences with respect to the payment of annual premiums on the policy after the transfer. D's annual premium payment is a transfer by D for purposes of section 2511 of the Code. See section 25.2511-1(h)(3) of the regulations. Further, the value of the life insurance protection provided by the corporation, which is included in the income of D, is deemed to be transferred by D for purposes of section 2511 of the Code. See Rev. Rul. 78-420, 1978-2 C.B. 67.

The preamble to the split-dollar regulations, T.D. 9092 (9/11/2003), commented:

> The gift tax consequences of the transfer of an interest in a life insurance contract to a third party will continue to be determined under established gift tax principles notwithstanding who is treated as the owner of the life insurance contract under the final regulations. See, for example, Rev. Rul. 81-198 (1981-2 C.B. 188). Similarly, for estate tax purposes, regardless of who is treated as the owner of a life insurance contract under the final regulations, the inclusion of the policy proceeds in a decedent's gross estate will continue to be determined under section 2042. Thus, the policy proceeds will be included in the decedent's gross estate under section 2042(1) if receivable by the decedent's executor, or under section 2042(2) if the policy proceeds are receivable by a beneficiary other than the decedent's estate and the decedent possessed any incidents of ownership with respect to the policy. One commentator requested that these regulations address the extent to which a decedent's interest in a co-owned policy is included in that decedent's gross estate under section 2042, but the IRS and Treasury believe that issue is beyond the scope of these regulations and may be addressed in future guidance.

For purposes of measuring current life insurance protection, Reg. § 1.61-22(d)(3)(i) provides:

> the amount of the current life insurance protection provided to the non-owner for a taxable year (or any portion thereof in the case of the first year or the last year of the arrangement) equals the excess of the death benefit of the life insurance contract (including paid-up additions thereto) over the total amount payable to the owner (including any outstanding policy loans that offset amounts otherwise payable to the owner) under the split-dollar life insurance arrangement, less the portion of the policy cash value actually taken into account under paragraph (d)(1) of this section or paid for by the non-owner under paragraph (d)(1) of this section for the current taxable year or any prior taxable year.

Reg. § 1.61-22(d)(1) provides:

> In the case of a split-dollar life insurance arrangement subject to the rules of paragraphs (d) through (g) of this section, economic benefits are treated as being provided to the non-owner of the life insurance contract. The non-owner (and the owner for gift and employment tax purposes) must take into account the full value of all economic benefits described in paragraph (d)(2) of this section, reduced by the consideration paid directly or indirectly by the non-owner to the owner for those economic benefits. Depending on the relationship between the owner and the non-owner, the economic benefits may constitute a payment of compensation, a distribution under section 301, a contribution to capital, a gift, or a transfer having a different tax character. Further, depending on the relationship between or among a non-owner and one or more other persons (including a non-owner or non-owners), the economic benefits may be treated as provided from the owner to the non-owner and as separately provided from the non-owner to such other person or persons (for example, as a payment of compensation from an employer to an employee and as a gift from the employee to the employee's child).

Letter Ruling 200910002 involved the following facts:

> Settlor A and Settlor B who are married, created an irrevocable trust (Trust) on Date. Trustees were named as trustees of the trust. Under the terms of Trust, the trustee is required to distribute trust income annually to a class of beneficiaries consisting of the Settlors' living issue (but excluding their children). Each member of the class has a noncumulative power to withdraw their share of any contributions to the trust. The trustee also has the discretion to distribute corpus to a member of the class to provide for the beneficiary's health, education, support, and maintenance. If a member of the class dies survived by issue, the surviving issue become members of the class. Trust will terminate on the later of the death of the last surviving Settlor, or when the number of class members equals 40. In no event may any trust established under the Trust instrument extend beyond the applicable rule against perpetuities. Upon termination, the corpus will be divided into as many equal shares as there are then living children of the Settlors and deceased children of the Settlors who have left issue then surviving.
>
> Each share created on account of a living or deceased child of the Settlors shall be further divided into as many equal shares as there are then living children of the said child and deceased grandchildren who have left issue then surviving. Each share created for a grandchild that is age 35 at termination will be distributed outright. If a grandchild is not age 35, then the share will continue in trust for the grandchild. If a

> deceased grandchild is survived by issue, then the grandchild's share is to be distributed outright, per stirpes.
>
> The terms of the Trust specifically preclude either Settlor from acting as trustee. Further, the Settlors have retained no powers or authority over the Trust, Trust property, or the administration of the Trust.
>
> The Trust has purchased a second-to-die life insurance policy on the lives of Settlor A and Settlor B and proposes to entered into a split-dollar life insurance agreement (Agreement) with Settlors. Under the agreement, the Trust will continue to own the policy and will pay during the joint lives of the Settlors an amount equal to the insurance company's current published premium rate for annually renewable term insurance generally available for standard risks. After the death of the first Settlor, the Trust will pay an amount equal to the lesser of: (1) the applicable amount provided in § Notice 2001-10, 2001-1 C.B. 549, or subsequent IRS guidance; or (2) the insurer's current published premium rate for annually renewable term insurance generally available for standard risks. The Settlors will pay the balance of the premiums.
>
> Under the Agreement, the Trust will collaterally assign the following rights to the Settlors: (1) if the Agreement terminates on the death of the survivor of Settlor A and Settlor B, then upon the death of the survivor, the right of the survivor's estate to receive the greater of the cash surrender value of the policy or the cumulative premiums paid by the Settlors; and (2) if the Agreement terminates during the lifetime of Settlor A and Settlor B, or the lifetime of the survivor, then within 60 days of termination, the right to receive from Trust an amount equal to the greater of the cash surrender value of the policy, or the premiums paid by Settlor A and Settlor B, to the extent Trust has other assets. Under the Agreement, all incidents of ownership over the policy (including the sole right to surrender or cancel the policy, and the sole right to borrow or withdraw against the policy) are vested in the Trustees of Trust.

Letter Ruling 200910002 reasoned and concluded:

> In the present case, under section 1.61-22(c)(1)(ii)(A)(2), A and B will be treated as the owners of Policy, because under the terms of the Agreement, the only economic benefit that will be provided under the split-dollar arrangement is current life insurance protection. Under the terms of the Agreement, Trust will pay the portion of the premium equal to the cost of current life insurance protection and Settlor A and B will pay the balance of the premium. Settlor A and/or B (or the estate of the survivor) will be entitled to receive an amount equal to the greater of the policy cash surrender value or premiums paid on early termination or at the death of the survivor. We conclude that the payment of the premiums by Settlors A and B, pursuant to the terms of the Agreement, will not result in a gift by Settlor A and B under § section 2511, provided that the amounts paid by the Trust for the life insurance benefit that the Trust receives under the Agreement is at least equal to the amount prescribed under § Notice 2001-10
>
> We also conclude that, if some or all of the cash surrender value is used (either directly, or indirectly through loans) to fund the Trust's obligation to pay premiums, Settlor A and B will be treated as making a gift at that time….
>
> In the present case, under Agreement and the collateral assignment, neither Settlor A nor B will hold any incidents of ownership in Policy. As noted above, all incidents of

> ownership in the policies, including the power to change the beneficiary, the power to surrender or cancel the policy, the power to assign the policy or to revoke an assignment, and the power to pledge the policy for a loan or to obtain from the insurer are vested in the Trustee of Trust. Accordingly, we conclude that the proceeds of the policy payable to the Trust will not be included in the gross estate of the second to die of A and B under § section 2042(2). The portion of the proceeds payable to the estate of the survivor of A and B will be includible under § section 2042(1). See, *e.g.*, Rev. Rul. 79-129, 1979-1 C.B. 306.

Machacek v. Commissioner, T.C. Memo. 2016-55, held that a split-dollar agreement benefitting a shareholder-employee was a compensatory plan, causing income inclusion to the shareholder-employee. The Sixth Circuit reversed, 906 F.3d 429 (2018),[4469] ignoring both parties' briefs and instead citing Reg. § 1.301-1(q)(1), "Split-dollar life insurance arrangements," which provides:

> (i) *Distribution of economic benefits*. The provision by a corporation to its shareholder pursuant to a split-dollar life insurance arrangement, as defined in § 1.61-22(b)(1) or (2), of economic benefits described in § 1.61-22(d) or of amounts described in § 1.61-22(e) is treated as a distribution of property, the amount of which is determined under § 1.61-22(d) and (e), respectively.
>
> (ii) *Distribution of entire contract or undivided interest therein*. A transfer (within the meaning of § 1.61-22(c)(3)) of the ownership of a life insurance contract (or an undivided interest therein) that is part of a split-dollar life insurance arrangement is a distribution of property, the amount of which is determined pursuant to § 1.61-22(g)(1) and (2).

The Sixth Circuit stated that Reg. § 1.301-1(q)(1)(i) did not differentiate between compensatory and non-compensatory split-dollar arrangements and noted that this was not inconsistent with Reg. § 1.61-22(d)(1), which specifically contemplates that Code § 301 may apply to a split-dollar arrangement. Although such a disproportionate distribution should be cured if an S election is in place, it almost never will cause the corporation to violate the single-class-of-stock rule.[4470]

However, in a unanimous reviewed decision, *De Los Santos v. Commissioner*, 156 T.C. No. 9 (2021), refused to accept this reversal outside the Sixth Circuit,[4471] commenting on the enactment of Code § 301(a):

> This provision, Congress explained, "has applicability only to distributions of property to shareholders in their capacity as such." S. Rept. No. 83-1622, at 231 (1954), 1954 U.S.C.C.A.N. 4621, 4868. "For example, a distribution of property to a shareholder who is a creditor of the corporation in satisfaction of his claim against the corporation is not within the scope of section 301." *Ibid.*
>
> The regulations issued under section 301 must (and can) be interpreted to be consistent with this statutory mandate. Section 1.301-1(a) describes the statute as setting forth "the general rule for treatment of distributions … by a corporation to a shareholder with

---

[4469] The Sixth Circuit denied the Government's petition for rehearing on December 9, 2020.
[4470] See part II.A.2.i Single Class of Stock Rule, especially parts II.A.2.i.ii Temporary Timing Differences; Other Varying Differences (especially fn 252, citing Reg. § 1.1361-1(l)(2)(i)) and II.A.2.i.iii Disproportionate Distributions.
[4471] The Sixth Circuit consists of MI, OH, KY, and TN.

respect to its stock." Section 1.301-1(c) states that "[s]ection 301 is not applicable to an amount paid by a corporation to a shareholder unless the amount is paid to the shareholder in his capacity as such."

These general rules, unambiguously stated at the outset of the section 301 regulations, necessarily apply to (and limit) the subsequent, more granular provisions. Those subsequent provisions often refer to "distributions to shareholders" or "property transferred by a corporation to a shareholder," without explicitly saying-each and every time-that the distribution or transfer is being made to the shareholder "in his capacity as such."[5] But there was no need for Treasury to include that verbiage in these more granular provisions because the general rules stated at the outset limit the scope of the regulations to distributions by a corporation with respect to its stock.

[5] *See, e.g.*, sec. 1.301-1(b), Income Tax Regs. (specifying time for inclusion in gross income of "[a] distribution made by a corporation to its shareholders," without specifically stating that the distribution was made to shareholders in their capacity as such); *id*. para. (d)(3) (specifying consequences for "a distribution of property … by a foreign corporation to a shareholder," without specifically stating that the distribution was made to the shareholder in its capacity as such); *id*. para. (f), Examples (1), (2), and (3) (specifying consequences of various distributions to stockholders, without specifically stating that the distributions were made to them in their capacity as such); *id*. para. (j) (specifying consequences where "property is transferred by a corporation to a shareholder which is not a corporation for an amount less than its fair market value in a sale or exchange," without specifically stating that the distribution was made to a shareholder in his capacity as such); id. para. (m) (providing that "[t]he cancellation of indebtedness of a shareholder by a corporation shall be treated as a distribution of property," without specifically stating that this benefit is conferred on the shareholder in his capacity as such).

The same analysis applies to section 1.301-1(q)(1)(i), Income Tax Regs. It says that "[t]he provision by a corporation to its shareholder pursuant to a split-dollar life insurance arrangement ... of economic benefits … is treated as a distribution of property." *Ibid*. This sentence necessarily applies only to the provision of economic benefits to a shareholder "in his capacity as such," because that is the only type of transfer to which section 301 applies. Interpreting "shareholder" to mean "shareholder in his capacity as such" - when used here and in comparable paragraphs of the regulation-is not only justified but is required by the statutory text and by the regulation's introductory provisions.[6]

[6] The Sixth Circuit suggested that there was "no alternative interpretation that gives meaning to the inclusion of compensatory arrangements in § 1.301-1(q)(1)(i)." *Machacek*, 906 F.3d at 436. Again we respectfully disagree. The "alternative interpretation" that renders this provision consistent with the statute and the rest of the regulation is to interpret "to its shareholder," as used in sec. 1.301-1(q)(1)(i), to mean "to its shareholder in his capacity as such." That is the clear meaning of this phrase throughout sec. 1.301-1, Income Tax Regs. See supra note 5.

When proposing and finalizing the split-dollar regulations, Treasury made clear that the manner in which economic benefits are taxed depends on whether the arrangement is a compensatory arrangement or a shareholder arrangement. "[I]f the arrangement were in a compensatory context," Treasury advised, "the employee … would account for the amount as compensation." Sec. 1.61-22, Proposed Income Tax Regs., 67 Fed.

Reg. 45417 (July 9, 2002). The final regulations similarly state that the manner in which economic benefits are taxed "[d]epend[s] on the relationship between the owner and the non-owner." Sec. 1.61-22(d)(1), Income Tax Regs. Depending on the capacity in which the non-owner receives the transfer, it "may constitute a payment of compensation, a distribution under section 301, a contribution to capital, a gift, or a transfer having a different tax character." *Ibid*. Under the Sixth Circuit's approach in *Machacek*, economic benefits received by a shareholder would invariably constitute a distribution under section 301, regardless of the relationship that accounts for the payment. We are unable to reconcile that approach either with the text of section 301(a) or with the split-dollar regulations.

Notably, the split-dollar regulations govern the taxation of such arrangements, not only for income and gift tax purposes, but also for employment tax purposes. See sec. 1.61-22(a)(1), Income Tax Regs. ("This section provides rules for the taxation of a split-dollar life insurance arrangement for purposes of … the Federal Insurance Contributions Act (FICA), the Federal Unemployment Tax Act (FUTA), … and the Self-Employment Contributions Act[.]"). It is well established that an S corporation "cannot avoid Federal employment taxes by characterizing compensation … as distributions of the corporation's net income." *Veterinary Surgical Consultants, P.C. v. Commissioner*, 117 T.C. 141, 145-146 (2001), *aff'd sub nom. Yeagle Drywall Co. v. Commissioner*, 54 F. App'x 100 (3d Cir. 2002).

But if a corporate employer could characterize benefits paid to employees under compensatory arrangements as section 301 "distributions," the employer could avoid paying a substantial amount of taxes that fund programs like Medicare and Social Security. An S corporation might even offer its rank-and-file employees a few shares of stock. By converting each employee into a "shareholder," the employer could avoid paying employment taxes on split-dollar insurance benefits, contrary to Treasury's evident purpose in promulgating these rules.

For these reasons, we conclude that the economic benefits received by petitioner husband under the split-dollar arrangement cannot be characterized as "distributions" under section 301. In the notice of deficiency respondent determined that these benefits, having been received under a compensatory arrangement, are taxable as "compensation for services" under section 61(a)(1) and thus as ordinary income. Although we agree that the benefits are taxable as ordinary income, we think the path to that conclusion requires a few additional steps.

Subchapter S governs the tax treatment of S corporations and their shareholders. Section 1372, one of its provisions, is captioned "Partnership Rules to Apply for Fringe Benefit Purposes." Section 1372(a) provides that, "[f]or purposes of applying the provisions of this subtitle [*viz*., subtitle A, dealing with income taxes] which relate to employee fringe benefits - (1) the S corporation shall be treated as a partnership, and (2) any 2-percent shareholder of the S corporation shall be treated as a partner of such partnership." A "2-percent shareholder" is defined to include "any person who owns … more than 2 percent of the outstanding stock of such corporation." Sec. 1372(b).

In *Our Country Home Enterprises*, 145 T.C. at 51, we ruled that an employer's provision of economic benefits to its employees under a compensatory split-dollar arrangement "generally is deemed to be the payment of compensation." But we noted that this general rule is subject to an exception "where the employer is an S corporation that

> provides the benefits to a 2% shareholder in consideration for services rendered." Ibid. "In the case of such an S corporation," we reasoned, "the 2% shareholder is treated as a partner for purposes of applying the employee fringe benefit rules, the economic benefits are categorized as guaranteed payments under section 707(c), and the 2% shareholder must recognize the amount of the guaranteed payments as gross income under section 61(a)." *Ibid*.; see *Hurst v. Commissioner*, 124 T.C. 16, 35 (2005) (treating an S corporation's payment of insurance premiums on behalf of a 2% shareholder as "guaranteed payments" under section 707(c)).
>
> Petitioner husband owned 100% of the S Corp.'s stock at all relevant times. Under section 1372(a), the S Corp. is treated as a partnership, and he is treated as a partner, for purposes of determining the taxation of employee fringe benefits. The life insurance benefits petitioner husband received under the split-dollar arrangement are "employee fringe benefits" within the meaning of section 1372. *Our Country Home Enters., Inc.*, 145 T.C. at 51; see *Hurst*, 124 T.C. at 35. Those economic benefits are thus taxed to petitioner husband as "guaranteed payments" under section 707(c) and hence as ordinary income under section 61.

The Tax Court explained its interpretation of "fringe benefit" for the purposes of Code § 1372:[4472]

> The term "fringe benefit" is commonly understood to mean "any form of employee compensation provided in addition to wages or base salary, as a pension, insurance coverage, vacation time, etc." Webster's New World Collegiate Dictionary 568 (4th ed. 2010); see Black's Law Dictionary (11th ed. 2019) (defining "fringe benefit" as a "benefit (other than direct salary or compensation) received by an employee from an employer, such as insurance"); see also Internal Revenue Manual pt. 4.23.5.15(1) (Nov. 22, 2017) (defining "fringe benefit" as a benefit "that an employee receives in addition to regular taxable wages").
>
> Although the term "fringe benefit" is not defined in the Code, all available evidence suggests that Congress intended to adopt the common understanding of this term, *i.e.*, that a "fringe benefit" includes any employer-provided benefit that supplements an employee's salary, specifically including life insurance benefits. Because the Code "is broad enough to include in taxable income any … benefit conferred on the employee as compensation," *Commissioner v. Smith*, 324 U.S. 177, 181 (1945), any fringe benefit is taxable unless "excluded by § 132 or some other explicit exclusionary rule," Boris I. Bittker & Lawrence Lokken, *Federal Taxation of Employee Compensation*, para. 5.1, at *1 (2020), Westlaw WGL-COMP. Section 132, captioned "Certain fringe benefits," specifically excludes from gross income eight types of fringe benefits, but split-dollar insurance benefits are not among those so excluded.
>
> Congress codified section 1372 as part of the Subchapter S Revision Act of 1982 (Act), Pub. L. No. 97-354, 96 Stat. at 1682. In the section of the Act governing effective dates Congress provided that, in the case of "existing fringe benefits," section 1372 shall apply "only with respect to taxable years beginning after December 31, 1987." Act sec. 6(d)(1), 96 Stat. at 1699. Congress defined "existing fringe benefit" to mean "any employee fringe benefit of a type which the corporation provided to its employees as of

---

[4472] Code § 132 is referred to in the paragraph accompanying fn 3899 in part II.P.2 C Corporation Advantage Regarding Fringe Benefits.

September 28, 1982." *Id*. para. (3). By referring to "any employee fringe benefit," Congress evidently intended to give this term broad scope.

The Act's legislative history expressed Congress' understanding that "fringe benefits" within the meaning of section 1372 included various insurance benefits, such as death benefits, group term life insurance benefits, and benefits received under accident and health plans. See S. Rept. No. 97-640, at 22 (1982), 1982-2 C.B. 718, 728; H.R. Rept. No. 97-826, at 21 (1982), 1982-2 C.B. 730, 739. Both reports state, without exceptions, that "the treatment of fringe benefits of any person owning more than two percent of the stock of the corporation will be treated in the same manner as a partner in partnership." Ibid. Petitioners offer no plausible explanation why the death benefits they received under the Legacy Plan, unlike all other employer-provided insurance benefits, should be excluded from "fringe benefits" that are subject to this rule.[7]

[7] Notably, the IRS has consistently characterized split-dollar life insurance benefits as "fringe benefits" for purposes of subchapter S. See Priv. Ltr. Rul. 200441023 (Oct. 8, 2004); Priv. Ltr. Rul. 9248019 (Nov. 27, 1992). Petitioners seek to differentiate such benefits from other insurance benefits on the theory that "split-dollar arrangements represent more of a co-ownership of an asset for income tax purposes which benefits both parties." This statement is factually incorrect, at least as applied to the Legacy Plan: The Trust owned the Policy, and the S Corp. was simply deemed "the owner" for purposes of the split-dollar regulations. See sec. 1.61-22(c)(1)(ii)(A)(1), Income Tax Regs. In any event all employee benefit programs may be said to "benefit both parties." Otherwise employers presumably would not offer them to their employees.

Besides pointing us to the correct technical analysis, section 1372 confirms the error of petitioners' reliance on section 1.301-1(q), Income Tax Regs. For purposes of taxing the economic benefits at issue here, section 1372 requires that the S Corp. be treated as a partnership. Although partnerships can distribute property, see secs. 731-737, they cannot make "distributions" covered by section 301, see sec. 301(a) (specifying taxability of distributions of property "made by a corporation to a shareholder"). The regulation on which petitioners rely accordingly has no application to this case. See sec. 1.301-1(q)(1)(i), Income Tax Regs. (addressing the provision of economic benefits "by a corporation to its share-holder"). Thus, even if petitioners were correct in contending that split-dollar insurance benefits received by an employee-shareholder of a C corporation would necessarily be treated as a distribution under section 301, sections 1372 and 707(c) dictate that the result is different for an employee-shareholder of an S corporation who owns 2% or more of its stock. These provisions therefore supply a distinct and independently sufficient basis for denying petitioners' motion for partial summary judgment.[8]

[8] Although the employer in *Machacek*, 906 F.3d at 430, was an S corporation, the Sixth Circuit in its opinion did not address sec. 1372, and neither party appears to have brought that provision to the court's attention.

The opinion says that the compensation is taxable as a Code § 707(c) guaranteed payment. Presumably the IRS will use the logic of Rev. Rul. 91-26 and Announcement 92-16 (both reaffirmed in Notice 2005-8) and reported on Form W-2.

In AOD 2021-02 (5/24/2021), the IRS announced its position:[4473]

> The Service's position is that these benefits must be "taken into account based on their character." *Split-Dollar Life Insurance Arrangements*, T.D. 9092, 68 Fed. Reg. 54,336, 54,339 (Sept. 17, 2003). Payments that arise from an employer-employee relationship, like those in Machacek, are compensation, not distributions subject to section 301. Treas. Reg. § 1.301-1(q) applies only to split-dollar life insurance arrangements between a corporation and a shareholder in his or her capacity as such. See also *De Los Santos v. Commissioner*, 156 T.C. No. 9 at 16-20 (Apr. 12, 2021) (declining to follow the Sixth Circuit's reasoning and conclusion in *Machacek* in a case appealable to a different circuit).
>
> Although the Service disagrees with the decision of the court in *Machacek*, we recognize the precedential effect of the decision to cases appealable to the Sixth Circuit. Therefore, the Service will follow it in cases within that circuit if the opinion cannot be meaningfully distinguished. The Service does not, however, acquiesce in the opinion, and we will continue to litigate our position in cases in other circuits.
>
> In cases appealable to the Sixth Circuit, the Service's position is that taxpayers must adopt consistent reporting positions in light of the opinion in *Machacek*, which may result in unfavorable consequences for some taxpayers. For example, if the economic benefits of a split-dollar life insurance arrangement are treated as distributions, the costs of the arrangement will never be deductible as compensation under Treas. Reg. § 1.83-6(a)(5) or otherwise. Additionally, the Service's position is that adoption of a split-dollar life insurance arrangement by a corporation will terminate the corporation's S election (or invalidate a subsequent S election) if the arrangement provides some shareholders with superior rights to distribution proceeds. See section 1361(b)(1)(D); Treas. Reg. § 1.1361-1(*l*).

When the IRS says, "if the economic benefits of a split-dollar life insurance arrangement are treated as distributions," my best guess is that the AOD applies only if the taxpayer chooses to treat the economic benefits in that manner. However, to be safe, corporations in the Sixth Circuit should consider treating the economic benefits as distributions and giving make-up distributions to the other shareholders.

Mcgowan v. U.S., 132 A.F.T.R.2d 2023-5955 (N.D. OH 9/25/2023),[4474] in "Deductions by the Company," viewed the situation as similar to *Machacek*:

> In addition to imposing tax consequences upon Dr. McGowan, the policy's fulfillment of the split-dollar regulation requirements imposes consequences upon the Company; namely: "No premium...is deductible by the owner." 26 C.F.R. § 1.61-22(f)(2)(ii). Plaintiffs attempted to deduct the Company's premium payments as a transfer to a trust subject to substantial risk of forfeiture, pursuant to 26 U.S.C. §§ 83, and as contribution to a welfare benefit trust for an employee's benefit, pursuant to 26 U.S.C. and §§ 162 and 419. But under 26 C.F.R. § 1.301-1, economic benefits flowing from split-dollar life insurance arrangements are "treated as a distribution of property", not as the

[4473] See part II.A.2.i.iv Providing Equity-Type Incentives without Violating the Single Class of Stock Rules, especially text accompanying and preceding fn 269.
[4474] In discussing this case, court citations to locations of evidence are omitted from all of my quotations.

> transactions under which Plaintiffs could have deducted the income. *Machacek v. Comm'r of Internal Revenue*, 906 F.3d 429, 434 (6th Cir. 2018).
>
> Despite Plaintiffs' assertions to the contrary, the facts relevant to Plaintiffs' deductions are similar to those in *Machacek*, where a company provided the premiums for its shareholder-employee's life insurance policy and deducted those premiums; the shareholder-employee included neither those premiums nor the "economic benefits flowing from the increase in value of the life insurance policy" on his tax return as individual income. *Id*. at 431. While the shareholder-employee in that case appeared to argue that the tax regulations "do not carry sufficient weight to overcome Congress' unambiguous standards expressed in [the tax code]" - as Plaintiffs here argue there is "no authority for the proposition that the IRS's interpretive regulation, 26 C.F.R. § 1.61-22, can supersede Congressionally enacted statutes" - the regulations help determine which statutes of the tax code apply. And "[26 C.F.R. §] 1.301-1 treats economic benefits provided to a shareholder pursuant to any split-dollar arrangement as a distribution of property...and are thus deemed to have been paid to the shareholder in his capacity as a shareholder." *Machacek*, 906 F.3d at 436. Because the policy value ought to have been included in Dr. McGowan's income, and because the Company was not permitted to deduct the premium payments, the IRS calculations of tax liability in the Notices of Deficiency are correct, and Defendant is entitled to summary judgment on these issues.

Below are some letter rulings issued before the split-dollar regulations were promulgated:

Letter Ruling 9248019 held:

> Like the payment of accident and health insurance premiums described in Rev. Rul. 91-26, X's payment of premiums under the split-dollar life insurance agreement is a fringe benefit to employees, not a vehicle for the circumvention of the one class of stock requirement. Therefore, based solely on the representations made and the information submitted, it is held that X's split-dollar life insurance agreement with its employees and their spouses will not create more than one class of stock within the meaning of section 1361(b)(1)(D) of the Internal Revenue Code.

Letter Ruling 9318007 held:

> Because the arrangement provides that, at the time X pays the premiums, A, or the irrevocable trust established by A, must reimburse X to the extent the payment confers an economic benefit to that shareholder, X's split-dollar arrangement does not alter rights to distribution and liquidation proceeds. Therefore, based solely on the representations made and the information submitted, it is held that X's split-dollar life insurance agreement with the irrevocable trust established by A will not create more than one class of stock within the meaning of section 1361(b)(1)(D) of the Code.

Letter Ruling 9331009 held:

> Because the agreement provides that each of the shareholders or their trusts must reimburse X to the extent the payment confers an economic benefit to the shareholder, X's split-dollar arrangement does not alter rights to distribution and liquidation proceeds. Therefore, based solely on the representations made and the information submitted, it is

> held that X's split-dollar life insurance agreement with its shareholders will not create more than one class of stock within the meaning of section 1361(b)(1)(D) of the Code.

Letter Ruling 9413023 held:

> Like the payment of accident and health insurance premiums described in Rev. Rul. 91-26, X's payment of premiums under the split-dollar life insurance agreement is a fringe benefit to B, not a vehicle for the circumvention of the one class of stock requirement. Therefore, the agreement will be disregarded in determining whether X's shares of stock confer identical distribution and liquidation rights.

Letter Ruling 9651017 held:

> Because the arrangement provides that, at the time X pays the premiums, either (1) H, W, or the irrevocable trust established by H and W must reimburse X to the extent of the economic benefit of the life insurance protection, or (2) if H is an employee of X, X may treat the economic benefit as compensation to H during the taxable year, X's split-dollar arrangement does not alter rights to distribution and liquidation proceeds. Therefore, based solely on the representations made and the information submitted, we hold that X's split-dollar life insurance agreement with the irrevocable trust established by H and W will not create more than one class of stock within the meaning of section 1361(b)(1)(D).

Letter Ruling 9709027 held:

> Because the arrangement provides that, at the time X pays the premiums, H, through a contribution to the Trust, and payment by the Trust to X, will reimburse X to the extent of the economic benefit of the life insurance protection, the split-dollar agreement between Trust and X does not alter rights to distribution and liquidation proceeds. Therefore, based solely on the representations made and the information submitted, we hold that X's split-dollar life insurance agreement with Trust will not create more than one class of stock within the meaning of section 1361(b)(1)(D).

Letter Ruling 9735006 held:

> Because the agreements in this case provide that, at the time Company pays the premiums, the Trusts, or their settlors or beneficiaries, must reimburse Company to the extent the payments confer an economic benefit to the Trusts, Company's split-dollar life insurance agreements do not alter rights to distribution and liquidation proceeds. Therefore, based solely on the facts submitted and the representations made, we conclude that Company's split-dollar life insurance agreements will not create more than one class of stock within the meaning of section 1361(b)(1)(D).

Letter Ruling 200441023, which was issued after the split-dollar regulations, held:

> Because the agreements in this case provide that, at the time Company pays the premiums, the Recipients, must reimburse Company to the extent the payments confer an economic benefit to the Recipients, Company's split-dollar life insurance agreements do not alter rights to distribution and liquidation proceeds.

TD 9954 (9/22/2021) "adopts the 2019 proposed regulations as final regulations with no substantive changes and with certain non-substantive changes for purposes of clarity and readability," so that Reg § 1.301-1(m), "Split-dollar and other life insurance arrangements," provides:

(1) *Split-dollar life insurance arrangements*

(i) *Distribution of economic benefits*. The provision by a corporation to its shareholder pursuant to a split-dollar life insurance arrangement, as defined in § 1.61-22(b)(1) or (2), of economic benefits described in § 1.61-22(d), or of amounts described in § 1.61-22(e), is treated as a distribution of property, the amount of which is determined under § 1.61-22(d) and (e), respectively.

(ii) *Distribution of entire contract or undivided interest therein*. A transfer (within the meaning of § 1.61-22(c)(3)) of the ownership of a life insurance contract (or an undivided interest therein) that is part of a split-dollar life insurance arrangement is a distribution of property, the amount of which is determined pursuant to § 1.61-22(g)(1) and (2).

(2) *Other life insurance arrangements*. A payment by a corporation on behalf of a shareholder of premiums on a life insurance contract or an undivided interest therein that is owned by the shareholder constitutes a distribution of property, even if such payment is not part of a split-dollar life insurance arrangement under § 1.61-22(b).

(3) *When distribution is made*

(i) *In general*. Except as provided in paragraph (m)(3)(ii) of this section, paragraph (c) of this section applies to determine when a distribution described in paragraph (m)(1) or (2) of this section is taken into account by a shareholder.

(ii) *Exception*. Notwithstanding paragraph (c) of this section, a distribution described in paragraph (m)(1)(ii) of this section is treated as made by a corporation to its shareholder at the time that the life insurance contract, or an undivided interest therein, is transferred (within the meaning of § 1.61-22(c)(3)) to the shareholder.

(4) *Applicability date*

(i) *General rule*. This paragraph (m) applies to split-dollar and other life insurance arrangements entered into after September 17, 2003. For purposes of this paragraph (m)(4), a split-dollar life insurance arrangement is entered into as determined under § 1.61-22(j)(1)(ii).

(ii) *Modified arrangements treated as new arrangements*. If a split-dollar life insurance arrangement entered into on or before September 17, 2003, is materially modified (within the meaning of § 1.61-22(j)(2)) after September 17, 2003, the arrangement is treated as a new arrangement entered into on the date of the modification.

I do not view this finalization of regulations as changing anything but included it for the sake of completeness.

The requirement that the non-owner receive only current life insurance protection means that the non-owner cannot have any other economic benefits, such as current or future access to cash value. Reg. § 1.61-22(d)(2) provides:

> *Value of economic benefits*. The value of the economic benefits provided to a non-owner for a taxable year under the arrangement equals -
>
> (i) The cost of current life insurance protection provided to the non-owner as determined under paragraph (d)(3) of this section;
>
> (ii) The amount of policy cash value to which the non-owner has current access within the meaning of paragraph (d)(4)(ii) of this section (to the extent that such amount was not actually taken into account for a prior taxable year); and
>
> (iii) The value of any economic benefits not described in paragraph (d)(2)(i) or (ii) of this section provided to the non-owner (to the extent not actually taken into account for a prior taxable year).

McGowan v. U.S., 132 A.F.T.R.2d 2023-5955 (N.D. OH 9/25/2023),[4475] applied that regulation in its discussion, "Current Access to Cash Value":

> The Benefits Trust Agreement states Dr. McGowan had no "interest or right in or to" the policy while it was owned by the DBT, as it was in 2014 and 2015. But the split-dollar regulation defines "current access" in a perhaps counterintuitive way: "a non-owner has current access to that portion of the policy cash value...[t]o which, under the arrangement, the non-owner has a current or future right; and...[t]hat currently is directly or indirectly accessible by the non-owner, *inaccessible to the owner*, or inaccessible to the owner's general creditors." 26 C.F.R. § 1.61-22(d)(4)(ii) (emphasis added).
>
> Plaintiffs argue "the cash value could not be accessed by anyone." This fact does not, however, mean that Dr. McGowan did not have "current access" to the cash value as that term is defined under the regulation. A non-owner has "current access" when he has "future right" to cash value inaccessible to the owner, and Dr. McGowan had "a `future right' to the [p]olicy cash value because [he had] the exclusive right to designate who would receive death benefits under the [p]olicy." *De Los Santos v. Comm'r of Internal Revenue*, 116 T.C.M. (CCH) 304, at *8 (2018).
>
> Plaintiffs appear to argue that because the death benefits were subject to a "substantial risk of forfeiture" (referring to the provision that if the Company stopped paying the premiums during the policy term, the cash value of the policy would be distributed to a charity of Dr. McGowan's choosing), Dr. McGowan did not have the exclusive right to designate who would receive the benefit and thus did not have "current access".[1] The regulation makes no reference to whether a non-owner's future right to the policy value may be construed as "current access" where that future right is contingent.
>
> [1] The Court notes as an aside that Dr. McGowan designated the charity himself, just as he designated Michelle McGowan as the beneficiary in the event of his death,

[4475] In discussing this case, citations to locations of evidence are omitted from all of my quotations.

which in this Court's view means that even in the event of forfeiture, he had the right to designate who would receive the policy's value.

Plaintiffs contend this contingency excludes the policy's cash value from the total value of economic benefits under the regulation by contrasting it to the facts of another split-dollar regulation case, where "the facts therein are clearly and significantly distinguishable": "`The Court has repeatedly held [that the regulation] does not allow an employer to deduct its payments to a purported welfare benefit plan *where the participating employees could receive the value reflected in insurance policies purchased by those plans*." (quoting *Our Country Home*, 145 T.C. at 48 (emphasis added by Plaintiffs)). The Court is not convinced that the emphasized portions are substantially different from the facts of this case. Plaintiffs seem to believe that the word "purported" means "sham" or "fictitious" (see Doc. 103, at 21); rather, it means "imputed" or "alleged". Even so, the split-dollar regulation expressly states that it applies to welfare benefit plans. 26 C.F.R. § 1.61-22(c)(1)(iii)(C). Additionally, this *is* a case where the participating employee (Dr. McGowan) could receive the value reflected in the insurance policy (by declining to renew the Restricted Property Trust transaction after the five-year term, as he did).

Defendant argues that "a contingent right is still a right", and that the split-dollar regulation makes no exception for a contingent right. While Plaintiffs argue that such a contingency being "[n]oticeably absent from the Treasury Regulation" implies that it makes the regulation inapplicable, this Court finds that the regulation's plain language, including the absence of an exception for any "substantial forfeiture" provision in a policy, indicates that the regulation includes such contingent rights. Additionally, this Court notes that no insurance policy's benefit is conferred if its premiums are not paid; if potential cancellation of an insurance policy due to failure to pay premiums were enough to negate a future right to the policy's value or benefits, there is likely no case in which paragraph (d)(2)(ii) would apply. *Cf. United States v. Henry*, 983 F.3d 214, 218 (6th Cir. 2020) ("When interpreting a statute, we begin with the plain meaning of the statutory language. This requires that we look at the specific statutory language as well as the language and design of the statute as a whole.").

The Court therefore finds that Dr. McGowan had "current access" to the policy cash value as defined by the split-dollar regulation, and it should have been included as part of the value of economic benefits provided to Dr. McGowan and taxed accordingly. 26 C.F.R. § 1.61-22(d)(2).

Policy cash value excludes surrender charges or other similar charges or reductions and includes policy cash value attributable to paid-up additions.[4476] A non-owner has current access to that portion of the policy cash value (A) to which the non-owner has a current or future right and (B) that currently is directly or indirectly accessible by the non-owner, inaccessible to the owner, or inaccessible to the owner's general creditors.[4477] Note that the policy's being

[4476] Reg. § 1.61-22(d)(4)(i).

[4477] Reg. § 1.61-22(d)(4)(ii). *De Los Santos v. Commissioner*, T.C. Memo. 2018-155, held: Petitioners had a "future right" to the Policy cash value because they had the exclusive right to designate who would receive death benefits under the Policy. *See Our Country Home Enters.*, Inc., 145 T.C. at 45-46, 53-54. Moreover, once a participating employer had made contributions to the Legacy/Flex Trust, those contributions were irrevocable and were inaccessible to the employer and its creditors. Employers and their creditors likewise had no access to the income inaccessible to the owner is not enough to attribute cash value to the non-owner; the non-owner must also have a current or future right to the cash value.[4478] Thus, as *McGowan* points out, the

---

or assets (including insurance contracts) held by the Legacy/Flex Trust. Thus, although petitioners during 2011-2012 could not withdraw funds from the Policy or the Legacy/Flex Plan, the Policy cash value, in its entirety, was "inaccessible to the owner" (*i.e.*, the S Corp.) and was "inaccessible to the owner's general creditors." See sec. 1.61-22(d)(4)(ii)(B), Income Tax Regs.[4]

[4] Petitioners insist that they enjoyed no economic benefit beyond the cost of current insurance protection - i.e., $178 for 2011 and $213 for 2012 - because they could not withdraw cash from the Policy or from the Legacy/Flex Plan currently. This argument ignores the governing regulation, which explicitly states that a non-owner possessing future rights "has current access to that portion of the policy cash value" that is "inaccessible to the owner" or "inaccessible to the owner's general creditors." Sec. 1.61-22(d)(4)(ii)(B), Income Tax Regs.

Although the Legacy/Flex Plan documents make clear that the Policy cash value was not subject to the claims of any participating employer or its creditors, petitioners assert that a clawback provision in the bankruptcy code could lead to a different outcome. Under 11 U.S.C. sec. 548(e)(1) (2012), a bankruptcy trustee may claw back any transfers made by a debtor within 10 years of the petition date if the transfer (among other things) was made to a self-settled trust or to a similar device whose beneficiary was the debtor. This provision is irrelevant here. The Legacy and Flex Trusts were not self-settled trusts. And the S Corp., the debtor in the scenario petitioners imagine, was not a beneficiary of the Legacy or Flex Trust. We accordingly hold that petitioners had "current access" to the entire cash value of the Policy during 2011 and 2012.

[4478] See fns. 4538-4540, in which the cash value seemed to be as inaccessible to the donor as it could possibly be, and the court dismissed out-of-hand arguments about inaccessibility because the non-owner had no current or future right to any part of the cash value. The split-dollar agreement provided:

Section 2.01. <u>Policy Ownership</u>.

(a) The Trust be the sole and absolute owner of the Policy. and may exercise all ownership rights granted to the owner thereof under the term of the Policy, except as otherwise provided in and limited by this Agreement.

(b) It is the intention of the parties to this Agreement and the purpose of the Collateral Assignment that the Trust shall retain all rights that the Policy grants to the owner thereof, except as otherwise provided in and provided by this Agreement. The sole right of the Donor under this Agreement and under the Collateral Assignment shall be to be repaid the amount due to Donor under this Agreement. Specifically, but without limitation, the Donor shall neither have nor exercise any right as collateral assignee of the Policy that could in any way defeat or impair the Trust's right to receive the Policy Cash Value or the death benefit of the Policy in excess of the total amount due to the Donor under this Agreement. All provisions of this Agreement and of the Collateral Assignment shall be construed so as to carry out such intention and purpose.

Section 2.02. <u>Dividends</u>. All dividends declared and paid on the Policy shall be applied as the Trust shall deem appropriate.

Section 6.01 of the split-dollar agreement said that the agreement is to be interpreted such that the only economic benefit is the current life insurance protection. Query whether the IRs and court assumed that this savings clause meant that the dividends could not be paid to the trust – rather that the trust merely had discretion how to apply the dividends to the policy's cash value; I do not recall them addressing the issue. Note that the trust having a right to be receive dividends itself would have violated the Reg. § 1.61-22(c)(1)(ii)(A)(2) rule that the only right to the policy be current life insurance protection and the consequence of violating that rule would have been that the trust would be deemed the owner for gift tax purposes.

Paragraph 2 of the collateral assignment (also not mentioned in the court's opinion) provided as follows:

2. It is expressly agreed that the Assignee's interest in the Policy under and by virtue of this Assignment shall be limited to die following specific rights, and no others: (a) the right to be paid the amount due to the Assignee under the Agreement by recovering said amount directly from the Insurer out of the net death proceeds of the Policy; upon the death of the Insured; and (b) the

owner needs to have the right to designate a beneficiary with respect to the death benefit consisting of at least the cash value; if not, the non-owner is treated as having received the cash value.

Now that we have established that the non-owner receives only the term portion and the owner receives everything else, let's discuss how to treat money received with respect to the subject life insurance contract.

For death benefits (noting that Code § 101(a) exempts death benefits from income taxation except to the extent that the transfer for value or rules apply, if at all, or to the extent that the policy's issuance violates the employer-owned life insurance rules):[4479]

(i) *Death benefit proceeds to beneficiary (other than the owner)*. Any amount paid to a beneficiary (other than the owner) by reason of the death of the insured is excluded from gross income by such beneficiary under section 101(a) as an amount received under a life insurance contract to the extent such amount is allocable to current life insurance protection provided to the non-owner pursuant to the split-dollar life insurance arrangement, the cost of which was paid by the non-owner, or the value of which the non-owner actually took into account pursuant to paragraph (d)(1) of this section.

(ii) *Death benefit proceeds to owner as beneficiary*. Any amount paid or payable to an owner in its capacity as a beneficiary by reason of the death of the insured is

---

right to be paid the amount due to the Assignee under the Agreement by recovering said amount from the Assignor out of the Policy Cash Value (as defined in the Agreement), in the event the Policy is surrendered or cancelled by the Assignor or m the event the Agreement is terminated during the Insured's lifetime. The Assignee shall have no other rights or powers in and to the Policy as a result of the assignment of the Policy to the Assignee hereunder, and specifically shall not have the right or power to borrow against or obtain loans or advances on the Policy, make withdrawals from the Policy, nor cancel or surrender the Policy.

3. Except as otherwise provided in this Assignment and the Agreement, the Assignor shall specifically retain all incidents of ownership in and to the Policy, including, but not limited to: (a) the sole right to cancel or surrender the Policy at any time provided by the terms of the Policy and at such other times as the Insurer may allow; (b) the sole right to collect and receive all distributions or shares of surplus, dividend deposits or additions to the Policy now or hereafter made or apportioned thereto, and to exercise any and all options contained in the Policy with respect thereto; (c) the sole right to exercise all non-forfeiture rights permitted by the return of the Policy or allowed by the Insurer and to receive all benefits and advantages derived therefrom; (d) the sole right to designate and change the beneficiary of the Policy (for any amount in excess of the amount to the .Assignee under the Agreement); (e) the sole right to elect any optional mode of settlement permitted by the Policy or allowed by the Insurer; and (c) the sole right to collect directly from the Insurer that portion of the net death proceeds of the Policy in excess of those proceeds payable to the Assignee under the Agreement; *provided, however,* in no event shall the Assignor possess the right or power to receive loans or other advances respecting the Policy from the Insurer or any other lender; *provided, further,* all of the foregoing rights retained by the Assignor in the Policy hereunder shall be subject to the terms and conditions of the Agreement.

I view the collateral assignment as being limited by the split-dollar agreement.

Notwithstanding any of the above possible interpretations, I recommend making it clear that the donee is not entitled to dividends. This particular policy was variable life insurance but paid dividends presumably because it was a mutual insurance company.

[4479] Reg. § 1.61-22(f)(3). These exceptions are found in parts II.Q.4.b Transfer for Value Rule; Basis and II.Q.4.g Income Tax Trap for Business-Owned Life Insurance.

excluded from gross income of the owner under section 101(a) as an amount received under a life insurance contract to the extent such amount is not allocable to current life insurance protection provided to the non-owner pursuant to the split-dollar life insurance arrangement, the cost of which was paid by the non-owner, or the value of which the non-owner actually took into account pursuant to paragraph (d)(1) of this section.

Except for death benefits:[4480]

> Any amount received under a life insurance contract that is part of a split-dollar life insurance arrangement … is treated, to the extent provided directly or indirectly to a non-owner of the life insurance contract, as though such amount had been paid to the owner of the life insurance contract and then paid by the owner to the non-owner. The amount received is taxable to the owner in accordance with the rules of section 72. The non-owner (and the owner for gift tax and employment tax purposes) must take the amount described in paragraph (e)(3) of this section into account as a payment of compensation, a distribution [from a corporation],[4481] a contribution to capital, a gift, or other transfer depending on the relationship between the owner and the non-owner.

The owner is the only party who is credited with "investment in the contract" under Code § 72(e)(6).[4482]

If the employee or donee is provided only current life insurance protection so that a policy owned by the that person for state law purposes is treated as owned by the employer or donor for income tax purposes,[4483] then any modification that causes the employer or donor not to be treated as the donor for income tax purposes has the following consequences:[4484]

(1) If, immediately after such modification, the employer, service recipient, or donor is the owner of the life insurance contract under the split-dollar life insurance arrangement (determined without regard to paragraph (c)(1)(ii)(A) of this section), the employer, service recipient, or donor continues to be treated as the owner of the life insurance contract.

(2) If, immediately after such modification, the employer, service recipient, or donor is not the owner of the life insurance contract under the split-dollar life insurance arrangement (determined without regard to paragraph (c)(1)(ii)(A) of this section), the

---

4480 Reg. § 1.61-22(e)(1).
4481 The actual text refers to Code § 301.
4482 Reg. § 1.61-22(f)(2)(ii) provides:

> *To owner*. Any premium paid by an owner under a split-dollar life insurance arrangement subject to the rules of paragraphs (d) through (g) of this section is included in the owner's investment in the contract under section 72(e)(6). No premium or amount described in paragraph (d) of this section is deductible by the owner (except as otherwise provided in § 1.83-6(a)(5)). Any amount paid by a non-owner, directly or indirectly, to the owner of the life insurance contract for current life insurance protection or for any other economic benefit under the life insurance contract is included in the owner's gross income and is included in the owner's investment in the life insurance contract for purposes of section 72(e)(6) (but only to the extent not otherwise so included by reason of having been paid by the owner as a premium or other consideration for the contract).

4483 Reg. § 1.61-22(c)(1)(ii)(A), reproduced in the text accompanying fn 4467.
4484 Reg. § 1.61-22(c)(1)(ii)(B).

employer, service recipient, or donor is treated as having made a transfer of the entire life insurance contract to the employee, service provider, or donee under the rules of paragraph (g) of this section as of the date of such modification.

(3) For purposes of this paragraph (c)(1)(ii)(B), entering into a successor split-dollar life insurance arrangement that has the effect of providing any economic benefit in addition to that described in paragraph (d)(3) of this section is treated as a modification of the prior split-dollar life insurance arrangement.

A transfer of the ownership of a life insurance contract (or an undivided interest in such contract) that is part of a split-dollar life insurance arrangement occurs on the date that a non-owner becomes the owner (within the meaning of Reg. § 1.61-22(c)(1)) of the entire contract or of an undivided interest in the contract.[4485] After a transfer of an entire life insurance contract,[4486] the transferee generally becomes the owner for Federal income, employment, and gift tax purposes, including for purposes of Reg. § 1.61-22.[4487]

Reg. § 1.61-22(g) provides rules for unwinding the arrangement so that the non-owner becomes the owner. Unwinding the agreement before the insured's death would have the following consequences:

1. If the non-owner buys the policy (outside of an employment setting – see footnote):[4488]

   - The buyer (and the seller for gift tax and employment tax purposes) takes into account the excess of the life insurance contract's fair market value at that time over the sum of:[4489]

     - The amount the buyer pays to the seller; and

[4485] Reg. § 1.61-22(c)(3).
[4486] Reg. § 1.61-22(c)(4), "Undivided interest," provides:

> An undivided interest in a life insurance contract consists of an identical fractional or percentage interest or share in each right, benefit, and obligation with respect to the contract. In the case of any arrangement purporting to create undivided interests where, in substance, the rights, benefits or obligations are shared to any extent among the holders of such interests, the arrangement will be treated as a split-dollar life insurance arrangement.

[4487] Preamble to T.D. 9092, which further explains:

> Thus, if the transferor pays premiums after the transfer, the payment of those premiums may be includible in the transferee's gross income if the payments are not split-dollar loans under § 1.7872-15. Alternatively, the arrangement will be subject to the loan regime if the payments constitute split-dollar loans under § 1.7872-15.

[4488] Reg. § 1.61-22(g)(3) provides:

> *Exception for certain transfers in connection with the performance of services*. To the extent the ownership of a life insurance contract (or undivided interest in such contract) is transferred in connection with the performance of services, paragraph (g)(1) of this section does not apply until such contract (or undivided interest in such contract) is taxable under section 83. For purposes of paragraph (g)(1) of this section, fair market value is determined disregarding any lapse restrictions and at the time the transfer of such contract (or undivided interest in such contract) is taxable under section 83.

[4489] Reg. § 1.61-22(g)(1).

- The amount of all economic benefits (cash value and other policy features other than term insurance protection)[4490] actually taken into account by the buyer (and the seller for gift tax and employment tax purposes), plus certain consideration[4491] paid or treated as having been paid by the buyer for such economic benefits, to the extent that it was not previously applied to such economic benefits.[4492]

The life insurance contract's fair market value used above is the policy's cash value and the value of all other rights under the contract (including any supplemental agreements thereto and whether or not guaranteed), other than the value of current life insurance protection; however, a life insurance contract's fair market value for gift tax purposes is determined under Reg. § 25.2512-6(a).

- Presumably, for income tax purposes the transferor treats the transaction as a sale (to the extent of sale proceeds) or a gift. The transferor's basis would be the fair market value of the split-dollar receivable at the original owner's death plus any premiums paid by the current owner.[4493] The IRS' position is that any part of the gain attributable to cash value inside the policy is ordinary income and the rest of the gain would be capital gain.[4494]

- After a transfer of an life insurance contract (except when such transfer is in connection with the performance of services and the transfer is not yet taxable under Code § 83), the buyer is treated as the owner of such contract for all purposes.[4495] Furthermore, the buyer's investment in the contract[4496] treats as premiums paid the greater of the fair market value of the contract or certain amounts accounted for under the split-dollar

[4490] Referring to benefits described in Reg. § 1.61-22(d)(2)(ii) and (iii), which are reproduced in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit Arrangement under Reg. § 1.61-22.
[4491] Referring to consideration described in Reg. § 1.61-22(d)(1), which is reproduced in the text following fn 4468 in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit Arrangement under Reg. § 1.61-22.
[4492] Referring to accounting for benefits under Reg. § 1.61-22(e)(3)(ii) or (g)(1)(ii).
[4493] See part II.Q.4.e.i Life Insurance Basis Adjustment on the Death of an Owner Who Is Not the Insured.
[4494] See fn 4406 in part II.Q.4.c Income Tax Issues in Transferring Life Insurance; Code § 1035.
[4495] Reg. § 1.61-22(g)(4)(i), which applies to a transfer of an entire policy, referring to Reg. §§ 1.61-22(b) and 1.61-2(d)(2)(ii)(A), and continues:

> After the transfer of an undivided interest in a life insurance contract (or, if later, at the time such transfer is taxable under section 83), the person who previously had been the non-owner is treated as the owner of a separate contract consisting of that interest for all purposes, including for purposes of paragraph (b) of this section and for purposes of § 1.61-2(d)(2)(ii)(A).

[4496] For the significance of the "investment in the contract," see part II.Q.4.e.ii Practical Issues In Implementing Any Basis Adjustment On the Death of an Owner Who Is Not the Insured.

rules.[4497] Generally, the buyer does not get credit toward "investment in the contract" for the economic benefit of any term portion previously taken into account.[4498]

[4497] Reg. § 1.61-22(g)(4)(ii), "Investment in the contract after transfer," provides:

(A) *In general*. The amount treated as consideration paid to acquire the contract under section 72(g)(1), in order to determine the aggregate premiums paid by the transferee for purposes of section 72(e)(6)(A) after the transfer (or, if later, at the time such transfer is taxable under section 83), equals the greater of the fair market value of the contract or the sum of the amounts determined under paragraphs (g)(1)(i) and (ii) of this section.

(B) *Transfers between a donor and a donee*. In the case of a transfer of a contract between a donor and a donee, the amount treated as consideration paid by the transferee to acquire the contract under section 72(g)(1), in order to determine the aggregate premiums paid by the transferee for purposes of section 72(e)(6)(A) after the transfer, equals the sum of the amounts determined under paragraphs (g)(1)(i) and (ii) of this section except that—

(1) The amount determined under paragraph (g)(1)(i) of this section includes the aggregate of premiums or other consideration paid or deemed to have been paid by the transferor; and

(2) The amount of all economic benefits determined under paragraph (g)(1)(ii) of this section actually taken into account by the transferee does not include such benefits to the extent such benefits were excludable from the transferee's gross income at the time of receipt.

(C) *Transfers of an undivided interest in a contract*. If a portion of a contract is transferred to the transferee, then the amount to be included as consideration paid to acquire the contract is determined by multiplying the amount determined under paragraph (g)(4)(ii)(A) of this section (as modified by paragraph (g)(4)(ii)(B) of this section, if the transfer is between a donor and a donee) by a fraction, the numerator of which is the fair market value of the portion transferred and the denominator of which is the fair market value of the entire contract.

(D) *Example*. The following example illustrates the rules of this paragraph (g)(4)(ii):

(i) In year 1, donor D and donee E enter into a split-dollar life insurance arrangement as defined in paragraph (b)(1) of this section. D is the owner of the life insurance contract under paragraph (c)(1) of this section. The life insurance contract is not a modified endowment contract as defined in section 7702A. In year 5, D gratuitously transfers the contract, within the meaning of paragraph (c)(3) of this section, to E. At the time of the transfer, the fair market value of the contract is $200,000 and D had paid $50,000 in premiums under the arrangement. In addition, by the time of the transfer, E had current access to $80,000 of policy cash value which was excludable from E's gross income under section 102.

(ii) E's investment in the contract is $50,000, consisting of the $50,000 of premiums paid by D. The $80,000 of policy cash value to which E had current access is not included in E's investment in the contract because such amount was excludable from E's gross income when E had current access to that policy cash value.

[4498] Reg. § 1.61-22(g)(4)(ii), "No investment in the contract for current life insurance protection," provides:

Except as provided in paragraph (g)(4)(ii)(B) of this section, no amount allocable to current life insurance protection provided to the transferee (the cost of which was paid by the transferee or the value of which was provided to the transferee) is treated as consideration paid to acquire the contract under section 72(g)(1) to determine the aggregate premiums paid by the transferee for purposes of determining the transferee's investment in the contract under section 72(e) after the transfer.

The above preceded the 2017 enactment of Code § 1016(a)(1)(B), which is described in the text accompanying fn 4402 in part II.Q.4.b.iii Basis in Purchased Life Insurance Contract, which perhaps might affect the regulation's validity? However, the regulation discusses "investment in the contract," whereas the statutory change address basis.

2. If the owner cashes in the policy. The owner reports ordinary income to the extent that the cash received exceeds the premiums paid, without regard to basis, so long as the policy has not been sold (including transfer by pecuniary bequest).[4499]

Reg. § 1.61-22(g), "Examples," provides:

> The following examples illustrate the rules of this section. Except as otherwise provided, each of the examples assumes that the employer (R) is the owner (as defined in paragraph (c)(1) of this section) of a life insurance contract that is part of a split-dollar life insurance arrangement subject to the rules of paragraphs (d) through (g) of this section, that the employee (E) is not provided any economic benefits described in paragraph (d)(2)(iii) of this section, that the life insurance contract is not a modified endowment contract under section 7702A, that the compensation paid to E is reasonable, and that E makes no premium payments. The examples are as follows:
>
> *Example (1)*.
>
> (i) In year 1, R purchases a life insurance contract on the life of E. R is named as the policy owner of the contract. R and E enter into an arrangement under which R will pay all the premiums on the life insurance contract until the termination of the arrangement or E's death. Upon termination of the arrangement or E's death, R is entitled to receive the greater of the aggregate premiums or the policy cash value of the contract. The balance of the death benefit will be paid to a beneficiary designated by E.
>
> (ii) Because R is designated as the policy owner of the contract, R is the owner of the contract under paragraph (c)(1)(i) of this section. In addition, R would be treated as the owner of the contract regardless of whether R were designated as the policy owner under paragraph (c)(1)(i) of this section because the split-dollar life insurance arrangement is described in paragraph (c)(1)(ii)(A)(1) of this section. E is a non-owner of the contract. Under the arrangement between R and E, a portion of the death benefit is payable to a beneficiary designated by E. The arrangement is a split-dollar life insurance arrangement under paragraph (b)(1) or (2) of this section. Because R pays all the premiums on the life insurance contract, R provides to E the entire amount of the current life insurance protection E receives under the arrangement. Therefore, for each year that the split-dollar life insurance arrangement is in effect, E must include in gross income under paragraph (d)(1) of

[4499] See part II.Q.4.e.ii Practical Issues In Implementing Any Basis Adjustment On the Death of an Owner Who Is Not the Insured. Reg. § 1.61-22(f)(2)(ii) provides:

> *To owner*. Any premium paid by an owner under a split-dollar life insurance arrangement subject to the rules of paragraphs (d) through (g) of this section is included in the owner's investment in the contract under section 72(e)(6). No premium or amount described in paragraph (d) of this section is deductible by the owner (except as otherwise provided in § 1.83-6(a)(5)). Any amount paid by a non-owner, directly or indirectly, to the owner of the life insurance contract for current life insurance protection or for any other economic benefit under the life insurance contract is included in the owner's gross income and is included in the owner's investment in the life insurance contract for purposes of section 72(e)(6) (but only to the extent not otherwise so included by reason of having been paid by the owner as a premium or other consideration for the contract).

this section the value of current life insurance protection described in paragraph (d)(2)(i) of this section provided to E in each year.

Example (2).

(i) The facts are the same as in Example 1 except that, upon termination of the arrangement or E’s death, R is entitled to receive the lesser of the aggregate premiums or the policy cash value of the contract. Under the terms of the arrangement and applicable state law, the policy cash value is fully accessible by R and R’s creditors but E has the right to borrow or withdraw at any time the portion of the policy cash value exceeding the amount payable to R.

(ii) Because R is designated as the policy owner, R is the owner of the contract under paragraph (c)(1)(i) of this section. E is a non-owner of the contract. For each year that the split-dollar life insurance arrangement is in effect, E has the right to borrow or withdraw at any time the portion of the policy cash value exceeding the amount payable to R. Thus, under paragraph (d)(4)(ii) of this section, E has current access to such portion of the policy cash value for each year that the arrangement is in effect. In addition, because R pays all the premiums on the life insurance contract, R provides to E all the economic benefits that E receives under the arrangement. Therefore, for each year that the split-dollar life insurance arrangement is in effect, E must include in gross income under paragraph (d)(1) of this section, the value of all economic benefits described in paragraph (d)(2)(i) and (ii) of this section provided to E in each year.

Example (3).

(i) The facts are the same as in Example 1 except that in year 5, R and E modify the split-dollar life insurance arrangement to provide that, upon termination of the arrangement or E’s death, R is entitled to receive the greater of the aggregate premiums or one-half the policy cash value of the contract. Under the terms of the modified arrangement and applicable state law, the policy cash value is fully accessible by R and R’s creditors but E has the right to borrow or withdraw at any time the portion of the policy cash value exceeding the amount payable to R.

(ii) For each year that the split-dollar life insurance arrangement is in effect, E must include in gross income under paragraph (d)(1) of this section the value of the economic benefits described in paragraph (d)(2)(i) of this section provided to E under the arrangement during that year. In year 5 (and subsequent years), E has the right to borrow or withdraw at any time the portion of the policy cash value exceeding the amount payable to R. Thus, under paragraph (d)(4)(ii) of this section, E has current access to such portion of the policy cash value. Thus, in year 5 (and each subsequent year), E must also include in gross income under paragraph (d)(1) of this section the value of the economic benefits described in paragraph (d)(2)(ii) of this section provided to E in each year.

(iii) The arrangement is not described in paragraph (c)(1)(ii)(A)(1) of this section after it is modified in year 5. Because R is the designated owner of the life insurance contract, R continues to be treated as the owner of the contract under paragraph (c)(1)(ii)(B)(1) of this section after the arrangement is modified. In addition, because the modification made by R and E in year 5 does not involve the transfer (within the meaning of paragraph (c)(3) of this section) of an undivided interest in the life insurance contract from R to E, the modification is not a transfer for purposes of paragraph (g) of this section.

Example (4).

(i) The facts are the same as in Example 2 except that in year 7, R and E modify the split-dollar life insurance arrangement to provide that, upon termination of the arrangement or E's death, R will be paid the lesser of 80 percent of the aggregate premiums or the policy cash value of the contract. Under the terms of the modified arrangement and applicable state law, the policy cash value is fully accessible by R and R's creditors but E has the right to borrow or withdraw at any time the portion of the policy cash value exceeding the lesser of 80 percent of the aggregate premiums paid by R or the policy cash value of the contract.

(ii) Commencing in year 7 (and in each subsequent year), E must include in gross income the economic benefits described in paragraph (d)(2)(ii) of this section as provided in this Example 4(ii) rather than as provided in Example 2(ii). Thus, in year 7 (and in each subsequent year) E must include in gross income under paragraph (d) of this section, the excess of the policy cash value over the lesser of 80 percent of the aggregate premiums paid by R or the policy cash value of the contract (to the extent E did not actually include such amounts in gross income for a prior taxable year). In addition, in year 7 (and each subsequent year) E must also include in gross income the value of the economic benefits described in paragraph (d)(2)(i) of this section provided to E under the arrangement in each such year.

Example (5).

(i) The facts are the same as in Example 3 except that in year 7, E is designated as the policy owner. At that time, E's rights to the contract are substantially vested as defined in § 1.83-3(b).

(ii) In year 7, R is treated as having made a transfer (within the meaning of paragraph (c)(3) of this section) of the life insurance contract to E. E must include in gross income the amount determined under paragraph (g)(1) of this section.

(iii) After the transfer of the contract to E, E is the owner of the contract and any premium payments by R will be included in E's income under paragraph (b)(5) of this section and § 1.61-2(d)(2)(ii)(A) (unless R's payments are split-dollar loans as defined in § 1.7872-15(b)(1)).

Example (6).

(i) In year 1, E and R enter into a split-dollar life insurance arrangement as defined in paragraph (b)(2) of this section. Under the arrangement, R is required to make annual premium payments of $10,000 and E is required to make annual premium payments of $500. In year 5, a $500 policy owner dividend payable to E is declared by the insurance company. E directs the insurance company to use the $500 as E's premium payment for year 5.

(ii) For each year the arrangement is in effect, E must include in gross income the value of the economic benefits provided during the year, as required by paragraph (d)(2) of this section, over the $500 premium payments paid by E. In year 5, E must also include in gross income as compensation the excess, if any, of the $500 distributed to E from the proceeds of the policy owner dividend over the amount determined under paragraph (e)(3)(ii) of this section.

(iii) R must include in income the premiums paid by E during the years the split-dollar life insurance arrangement is in effect, including the $500 of the premium E paid in year 5 with proceeds of the policy owner dividend. R's investment in the contract is increased in an amount equal to the premiums paid by E, including the $500 of the premium paid by E in year 5 from the proceeds of the policy owner dividend. In year 5, R is treated as receiving a $500 distribution under the contract, which is taxed pursuant to section 72.

Example (7).

(i) The facts are the same as in Example 2 except that in year 10, E withdraws $100,000 from the cash value of the contract.

(ii) In year 10, R is treated as receiving a $100,000 distribution from the insurance company. This amount is treated as an amount received by R under the contract and taxed pursuant to section 72. This amount reduces R's investment in the contract under section 72(e). R is treated as paying the $100,000 to E as cash compensation, and E must include that amount in gross income less any amounts determined under paragraph (e)(3)(ii) of this section.

Example (8).

(i) The facts are the same as in Example 7 except E receives the proceeds of a $100,000 specified policy loan directly from the insurance company.

(ii) The transfer of the proceeds of the specified policy loan to E is treated as a loan by the insurance company to R. Under the rules of section 72(e), the $100,000 loan is not included in R's income and does not reduce R's investment in the contract. R is treated as paying the $100,000 of loan proceeds to E as cash compensation. E must include that amount in gross income less any amounts determined under paragraph (e)(3)(ii) of this section.

II.Q.4.f.iii. Split-Dollar Loans under Reg. § 1.7872-15

For purposes of Reg. § 1.7872-15, "split-dollar life insurance arrangement," "owner," and "non-owner" have the same meanings as provided in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit Arrangement under Reg. § 1.61-22.[4500]

Reg. § 1.7872-15(a)(2) provides:[4501]

[4500] Reg. § 1.7872-15(b), referring to Reg. § 1.61-22(b) and (c).
[4501] Reg. § 1.7872-15(a)(1) provides, "This section applies to split-dollar loans as defined in paragraph (b)(1) of this section." Reg. § 1.7872-15(b)(1) provides, "A split-dollar loan is a loan described in paragraph (a)(2)(i) of this section." Thus, Reg. § 1.7872-15(a)(2)(i) is our starting point.

(i) *General rule*. A payment made pursuant to a split-dollar life insurance arrangement is treated as a loan for Federal tax purposes, and the owner and non-owner are treated, respectively, as the borrower and the lender, if—

(A) The payment is made either directly or indirectly by the non-owner to the owner (including a premium payment made by the non-owner directly or indirectly to the insurance company with respect to the policy held by the owner);

(B) The payment is a loan under general principles of Federal tax law or, if it is not a loan under general principles of Federal tax law (for example, because of the nonrecourse nature of the obligation or otherwise), a reasonable person nevertheless would expect the payment to be repaid in full to the non-owner (whether with or without interest); and

(C) The repayment is to be made from, or is secured by, the policy's death benefit proceeds, the policy's cash surrender value, or both.

(ii) *Payments that are only partially repayable*. For purposes of § 1.61-22 and this section, if a non-owner makes a payment pursuant to a split-dollar life insurance arrangement and the non-owner is entitled to repayment of some but not all of the payment, the payment is treated as two payments: one that is repayable and one that is not. Thus, paragraph (a)(2)(i) of this section refers to the repayable payment.

(iii) *Treatment of payments that are not split-dollar loans*. See § 1.61-22(b)(5) for the treatment of payments by a non-owner that are not split-dollar loans.

(iv) *Examples*. The provisions of this paragraph (a)(2) are illustrated by the following examples:

Example (1). Assume an employee owns a life insurance policy under a split-dollar life insurance arrangement, the employer makes premium payments on this policy, there is a reasonable expectation that the payments will be repaid, and the repayments are secured by the policy. Under paragraph (a)(2)(i) of this section, each premium payment is a loan for Federal tax purposes.

Example (2).

(i) Assume an employee owns a life insurance policy under a split-dollar life insurance arrangement and the employer makes premium payments on this policy. The employer is entitled to be repaid 80 percent of each premium payment, and the repayments are secured by the policy. Under paragraph (a)(2)(ii) of this section, the taxation of 20 percent of each premium payment is governed by § 1.61-22(b)(5). If there is a reasonable expectation that the remaining 80 percent of a payment will be repaid in full, then, under paragraph (a)(2)(i) of this section, the 80 percent is a loan for Federal tax purposes.

(ii) If less than 80 percent of a premium payment is reasonably expected to be repaid, then this paragraph (a)(2) does not cause any of the payment to be a loan for Federal tax purposes. If the payment is not a loan under general principles of Federal tax law, the taxation of the entire premium payment is governed by § 1.61-22(b)(5).

Reg. § 1.7872-15(a)(1) provides:

> If a split-dollar loan is not a below-market loan, then, except as provided in this section, the loan is governed by the general rules for debt instruments (including the rules for original issue discount (OID) under sections 1271 through 1275 and the regulations thereunder). If a split-dollar loan is a below-market loan, then, except as provided in this section, the loan is governed by section 7872. The timing, amount, and characterization of the imputed transfers between the lender and borrower of a below-market split-dollar loan depend upon the relationship between the parties and upon whether the loan is a demand loan or a term loan. For additional rules relating to the treatment of split-dollar life insurance arrangements, see § 1.61-22.

The OID rules referred to above provide that, if adequate stated interest is not paid annually, payments will be deemed made from the borrower to the lender each year, generating interest income[4502] and generally nondeductible interest,[4503] even though no cash changes hands.[4504] If the split-dollar agreement is between a donor and a donee, consider making the donee be an irrevocable grantor trust, so that no interest income is recognized while the trust is deemed owned by the donor.[4505] Presumably any accrued interest at the time that grantor trust treatment is turned off will be considered principal for income tax purposes; perhaps the promissory note might be drafted so that any accrued but unpaid interest is added to principal on the note's anniversary to further support that treatment.

[4502] Code § 1272.

[4503] Reg. § 1.7872-15(c) provides:

> *Interest deductions for split-dollar loans*. The borrower may not deduct any qualified stated interest, OID, or imputed interest on a split-dollar loan. See sections 163(h) and 264(a). In certain circumstances, an indirect participant may be allowed to deduct qualified stated interest, OID, or imputed interest on a deemed loan. See paragraph (e)(2)(iii) of this section (relating to indirect loans).

[4504] Reg. § 1.7872-15(f), "Treatment of stated interest and OID for split-dollar loans," provides:

> (1) *In general*. If a split-dollar loan provides for stated interest or OID, the loan is subject to this paragraph (f), regardless of whether the split-dollar loan has sufficient interest. Except as otherwise provided in this section, split-dollar loans are subject to the same Internal Revenue Code and regulatory provisions for stated interest and OID as other loans. For example, the lender of a split-dollar loan that provides for stated interest must account for any qualified stated interest (as defined in § 1.1273-1(c)) under its regular method of accounting (for example, an accrual method or the cash receipts and disbursements method). See § 1.446-2 to determine the amount of qualified stated interest that accrues during an accrual period. In addition, the lender must account under § 1.1272-1 for any OID on a split-dollar loan. However, § 1.1272-1(c) does not apply to any split-dollar loan. See paragraph (h) of this section for a subsequent waiver, cancellation, or forgiveness of stated interest on a split-dollar loan.
>
> (2) *Term, payment schedule, and yield*. The term of a split-dollar term loan determined under paragraph (e)(4)(iii) of this section (other than paragraph (e)(4)(iii)(C) of this section) applies to determine the split-dollar loan's term, payment schedule, and yield for all purposes of this section.

[4505] Rev. Rul. 85-13, referred to in part III.B.2.d.i.(a) General Concepts of the Effect of Irrevocable Grantor Trust Treatment on Federal Income Taxation.

Generally, a split-dollar loan will bear and accrue interest at the long-term applicable federal rate, so that making the loan does not constitute a gift in a donor-donee setting or compensation in an employer-employee setting. This accrued interest can be ignored for two reasons (in addition to possibly being ignored under general tax principals. First, Reg. § 1.7872-15(a)(4), "Certain interest provisions disregarded," provides:

(i) *In general*. If a split-dollar loan provides for the payment of interest and all or a portion of the interest is to be paid directly or indirectly by the lender (or a person related to the lender), then the requirement to pay the interest (or portion thereof) is disregarded for purposes of this section. All of the facts and circumstances determine whether a payment to be made by the lender (or a person related to the lender) is sufficiently independent from the split-dollar loan for the payment to not be an indirect payment of the interest (or a portion thereof) by the lender (or a person related to the lender).

(ii) *Examples*. The provisions of this paragraph (a)(4) are illustrated by the following examples:

Example (1).

(i) On January 1, 2009, Employee B issues a split-dollar term loan to Employer Y. The split-dollar term loan provides for five percent interest, compounded annually. Interest and principal on the split-dollar term loan are due at maturity. On January 1, 2009, B and Y also enter into a fully vested non-qualified deferred compensation arrangement that will provide a payment to B in an amount equal to the accrued but unpaid interest due at the maturity of the split-dollar term loan.

(ii) Under paragraph (a)(4)(i) of this section, B's requirement to pay interest on the split-dollar term loan is disregarded for purposes of this section, and the split-dollar term loan is treated as a loan that does not provide for interest for purposes of this section.

Example (2).

(i) On January 1, 2004, Employee B and Employer Y enter into a fully vested non-qualified deferred compensation arrangement that will provide a payment to B equal to B's salary in the three years preceding the retirement of B. On January 1, 2009, B and Y enter into a split-dollar life insurance arrangement and, under the arrangement, B issues a split-dollar term loan to Y on that date . The split-dollar term loan provides for five percent interest, compounded annually. Interest and principal on the split-dollar term loan are due at maturity. Over the period in which the non-qualified deferred compensation arrangement is effective, the terms and conditions of B's non-qualified deferred compensation arrangement do not change in a way that indicates that the payment of the non-qualified deferred compensation is related to B's requirement to pay interest on the split-dollar term loan. No other facts and circumstances exist to indicate that the payment of the non-qualified deferred compensation is related to B's requirement to pay interest on the split-dollar term loan.

(ii) The facts and circumstances indicate that the payment by Y of non-qualified deferred compensation is independent from B's requirement to pay interest under the split-dollar term loan. Under paragraph (a)(4)(i) of this section, the fully vested non-qualified deferred compensation does not cause B's requirement to pay interest on the split-dollar term loan to be disregarded for purposes of this section. For purposes of this section, the split-dollar term loan is treated as a loan that provides for stated interest of five percent, compounded annually.

Thus, one should avoid bequeathing the split-dollar note receivable until long after the funds are advanced.[4506]

Second, interest (or any other payment) needs to be reasonably expected to be repaid or must be deemed expected to be repaid. As mentioned above,[4507] to be a split-dollar loan, among other requirements the payment of premiums must be "a loan under general principles of Federal tax law or, if it is not a loan under general principles of Federal tax law (for example, because of the nonrecourse nature of the obligation or otherwise), a reasonable person nevertheless would expect the payment to be repaid in full to the non-owner (whether with or without interest)." Split-dollar loans are commonly nonrecourse, and if the policy does not perform then typically the lender eats the loss. Reg. § 1.7872-15(d), (j) discuss nonrecourse or contingent payments.[4508]

Reg. § 1.7872-15(j) controls over the usual rules governing contingent payments in making loans at the applicable federal rate (AFR).[4509] The lender puts together a projected payment schedule, which everyone directly or indirectly involved in the loan must use.[4510] The term of a split-dollar loan payable on the death of an individual is the individual's life expectancy as determined under the appropriate table in Reg. § 1.72-9 on the day the loan is made;[4511] if the

---

[4506] See text accompanying fns 4532-4533 in part II.Q.4.f.iv.(b) Loan Regime After Initial Owner Has Died.

[4507] Reg. § 1.7872-15(a)(2)(i)(B), quoted in full in the text accompanying fn 4501.

[4508] Reg. § 1.7872-15(d)(1) provides:

(1) *In general*. Except as provided in paragraph (d)(2) of this section, if a payment on a split-dollar loan is nonrecourse to the borrower, the payment is a contingent payment for purposes of this section. See paragraph (j) of this section for the treatment of a split-dollar loan that provides for one or more contingent payments.

[4509] Reg. § 1.7872-15(j)(1) provides:

(1) *In general*. Except as provided in paragraph (j)(2) of this section, this paragraph (j) provides rules for a split-dollar loan that provides for one or more contingent payments. This paragraph (j), rather than § 1.1275-4, applies to split-dollar loans that provide for one or more contingent payments.

[4510] Reg. § 1.7872-15(j)(3)(ii)(E) provides:

Borrower/lender consistency. Contrary to § 1.1275-4(b)(4)(iv), the lender rather than the borrower is required to determine the projected payment schedule and to provide the schedule to the borrower and to any indirect participant as described in paragraph (e)(2) of this section. The lender's projected payment schedule is used by the lender, the borrower, and any indirect participant to compute interest accruals and adjustments.

[4511] Reg. § 1.7872-15(e)(5)(ii)(C), which further provides:

If a split-dollar loan is payable on the earlier of the individual's death or another term determined under paragraph (e)(4)(iii) of this section, the term of the loan is whichever term is shorter.

If the split-dollar loan is payable on the later of the individual's death or a term certain, the term certain is used. Reg. § 1.7872-15(e)(5)(v)(A), (B)(2).

The contingent payment rules look to the above regulations. Reg. § 1.7872-15(j)(3)(ii)(B) provides:

Split-dollar term loans payable upon the death of an individual. If a split-dollar term loan described in paragraph (e)(5)(ii)(A) or (v)(A)(1) of this section provides for one or more contingent insured outlives his or her life expectancy, the split-dollar loan is treated as retired and reissued as a split-dollar demand loan at that time for an amount of cash equal to the loan's adjusted issue price on that date.[4512] Although a payment is not contingent merely because of the possibility of impairment by insolvency, default, or similar circumstances, if any payment on a split-dollar loan is nonrecourse to the borrower, the payment is a contingent payment for purposes unless the parties to the arrangement make the written representation provided for in Reg. § 1.7872-15(d)(2).[4513] Treating a nonrecourse payment as contingent may cause that payment to assigned a zero value,[4514] which would mean that the usual nonrecourse split dollar loan would be assigned a zero value.

Thus, the written representation provided for in Reg. § 1.7872-15(d)(2) is critically important in making sure that a nonrecourse loan is respected. An otherwise noncontingent payment on a split-dollar loan that is nonrecourse to the borrower is not deemed a contingent payment if the parties to the split-dollar life insurance arrangement represent in writing that a reasonable person would expect that all payments under the loan will be made.[4515] Unless the IRS provides otherwise, "both the borrower and the lender must sign the representation not later than the last day (including extensions) for filing the Federal income tax return of the borrower or lender, whichever is earlier, for the taxable year in which the lender makes the first split-dollar loan under the split-dollar life insurance arrangement."[4516] If the interest actually paid on the split-dollar loan is less than the interest required to be accrued on the split-dollar loan according to the representation, "the excess of the interest required to be accrued over the interest actually paid is treated as waived, cancelled, or forgiven by the lender."[4517]

> payments, the projected payment schedule is determined based on the term of the loan as determined under paragraph (e)(5)(ii)(C) or (v)(B)(2) of this section, whichever is applicable.

Closing the loop, Reg. § 1.7872-15(e)(5)(ii)(A) provides:

> *Applicability*. This paragraph (e)(5)(ii) applies to a split-dollar term loan payable not later than the death of an individual.

[4512] Reg. § 1.7872-15(e)(5)(ii)(D), which further provides:

> However, the loan is not retested at that time to determine whether the loan provides for sufficient interest. For purposes of determining forgone interest under paragraph (e)(5)(ii)(B) of this section, the appropriate AFR for the reissued loan is the AFR determined under paragraph (e)(5)(ii)(B) of this section on the day the loan was originally made.

[4513] Reg. § 1.7872-15(j)(2)(ii).

[4514] When the lender determines the projected payment schedule, Reg. § 1.7872-15(j)(3)(ii)(A) provides:

> The projected payment for a contingent payment is the lowest possible value of the payment. The projected payment schedule, however, must produce a yield that is not less than zero. If the projected payment schedule produces a negative yield, the schedule must be reasonably adjusted to produce a yield of zero.

[4515] Reg. § 1.7872-15(d)(2)(i).

[4516] Reg. § 1.7872-15(d)(2)(ii), which further provides:

> This representation must include the names, addresses, and taxpayer identification numbers of the borrower, lender, and any indirect participants. Unless otherwise stated therein, this representation applies to all subsequent split-dollar loans made pursuant to the split-dollar life insurance arrangement. Each party should retain an original of the representation as part of its books and records and should attach a copy of this representation to its Federal income tax return for any taxable year in which the lender makes a loan to which the representation applies.

Letter Rulings 200923002, 201041006, and 202336013 granted an extension of time to make the election.

[4517] Reg, § 1.7872-15(h)(1)(iv).

Once we have figured out the payment schedule that the IRS will respect, Reg. § 1.7872-15(k) applies a payment made by the borrower on all direct and indirect split-dollar loans in the following order:

(1) A payment of interest to the extent of accrued but unpaid interest (including any OID) on all outstanding split-dollar loans in the order the interest accrued;

(2) A payment of principal on the outstanding split-dollar loans in the order in which the loans were made;

(3) A payment of amounts previously paid by a non-owner pursuant to a split-dollar life insurance arrangement that were not reasonably expected to be repaid by the owner; and

(4) Any other payment with respect to a split-dollar life insurance arrangement, other than a payment taken into account under ... (1), (2), and (3) ….

Reg. § 1.7872-15(m) describes what happens when the insurance company pays the lender:

> *Repayments received by a lender*. Any amount received by a lender under a life insurance contract that is part of a split-dollar life insurance arrangement is treated as though the amount had been paid to the borrower and then paid by the borrower to the lender. Any amount treated as received by the borrower under this paragraph (m) is subject to other provisions of the Internal Revenue Code as applicable (for example, sections 72 and 101(a)). The lender must take the amount into account as a payment received with respect to a split-dollar loan, in accordance with paragraph (k) of this section. No amount received by a lender with respect to a split-dollar loan is treated as an amount received by reason of the death of the insured.

II.Q.4.f.iv. Income Taxation of Split-Dollar Agreement After Premium Payor Dies When Life Insurance Not on the Owner's Life

When the premium payor dies holding a split-dollar receivable on the payor's life, the receivable is repaid immediately and correspondingly has a basis equal to the amount of the receivable, generating no income taxation.

However, if the split-dollar receivable is not on the premium payor's life, the receivable would be valued based on when the receivable is collected. The split-dollar arrangement's long-term nature may cause the receivable to be valued at significantly less than its face amount, leading to a step-down in basis; see the cases in part II.Q.4.f.v Estate Tax Consequences of Split-Dollar Agreements.

The rest of this discussion, from part II.Q.4.f.iv, assumes that the initial owner has died and refers to the successor owner as the owner.

II.Q.4.f.iv.(a). Economic Benefit Model After Initial Owner Has Died

In the economic benefit model described in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit Arrangement under Reg. § 1.61-22, the economic benefit of current life insurance protection is considered a payment from the owner to the non-owner.[4518] The payment's nature depends on the relationship between the owner and non-owner.[4519] As the insured gets older, the amount of this payment increases and may become exorbitant, and the arrangement might need to be terminated. If the insurance company distributes the cash value, the holder of the split-dollar receivable recognizes ordinary income to the extent that the amount received exceeds the holder's "investment in the contract," the latter which is described in part II.Q.4.d Income Tax on Distributions or Loans from Contract (Including Surrender of Policy). Under those rules, the change in basis by reason of death does not affect the "investment in the contract." If the policy's ownership is considered transferred from the owner to the non-owner, then the transfer may be a sale (taxable to the extent that proceeds exceed basis), a gift, a distribution, or some other appropriate arrangement.[4520] An advantage of just cashing out the policy with the insurance company is that the investment in the contract, which would generally exceed the stepped-down basis on the date of the original owner's death, would reduce income relative to the gain on sale, which the IRS would assert (not necessarily successfully)[4521] is ordinary income anyway.

If the arrangement stays in place until the insured's death, then:

- Generally, the owner's death benefit is nontaxable under Code § 101(a).[4522]

- Generally, the non-owner's death benefit is nontaxable under Code § 101(a), if the non-owner paid for or properly took into account the value of the economic benefit of the life insurance protection.[4523]

[4518] Reg. § 1.61-22(d)(1), quoted in the text following fn 4468 in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit Arrangement under Reg. § 1.61-22.

[4519] The part of § 1.61-22(d)(1) that follows fn 4468 in part 1.61-22(d)(1) provides:

> Depending on the relationship between the owner and the non-owner, the economic benefits may constitute a payment of compensation, a distribution under section 301, a contribution to capital, a gift, or a transfer having a different tax character. Further, depending on the relationship between or among a non-owner and one or more other persons (including a non-owner or non-owners), the economic benefits may be treated as provided from the owner to the non-owner and as separately provided from the non-owner to such other person or persons (for example, as a payment of compensation from an employer to an employee and as a gift from the employee to the employee's child).

[4520] See fns 4480 and 4488-4494 in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit Arrangement under Reg. § 1.61-22.

[4521] See fn 4419 in part II.Q.4.d Income Tax on Distributions or Loans from Contract (Including Surrender of Policy).

[4522] Reg. § 1.61-22(f)(3)(ii) provides:

> *Death benefit proceeds to owner as beneficiary*. Any amount paid or payable to an owner in its capacity as a beneficiary by reason of the death of the insured is excluded from gross income of the owner under section 101(a) as an amount received under a life insurance contract to the extent such amount is not allocable to current life insurance protection provided to the non-owner pursuant to the split-dollar life insurance arrangement, the cost of which was paid by the non-owner, or the value of which the non-owner actually took into account pursuant to paragraph (d)(1) of this section.

[4523] Reg. § 1.61-22(f)(3)(i) provides:

> *Death benefit proceeds to beneficiary (other than the owner)*. Any amount paid to a beneficiary (other than the owner) by reason of the death of the insured is excluded from gross income by such beneficiary under section 101(a) as an amount received under a life insurance contract to the

- Generally, any death benefit not described above is taxable.[4524]

If the insured was employed by or owned at least 5% of the original owner when the policy was issued, special requirements apply to obtain the Code § 101(a) exclusion. See part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance. Also, to obtain the Code § 101(a) exclusion, any transfer from the original owner to a successor owner needs to qualify for an exception from the transfer-for-value rules,[4525] which means that any distribution from a trust or estate should be pick-and-choose fractional instead of pecuniary.[4526]

II.Q.4.f.iv.(b). Loan Regime After Initial Owner Has Died

Suppose a $1 million split-dollar loan under Code § 1.7872-15 is worth $150,000 at the death of the owner who is not the insured. This valuation spread is realistic, because commercial lenders do not make long-term loans except for real estate, and even then they tend to require significant equity. Unlike other loans, payment of annual interest is not required in a split-dollar loan.[4527] A split-dollar loan does not require any equity, and the lender cannot accelerate the loan if the underlying collateral starts to lose value or otherwise fail to perform. Furthermore, a cash value life insurance policy loses value immediately, due to commissions and other start-up costs the insurance company incurs that are allocated to the policy. Commercial lenders who finance life insurance tend to require some combination of equity or outside collateral, use floating interest rates, and impose loan maturities much shorter than the insured's life expectancy.

Let's look at the character of the note repayment:

- Any payment from the life insurer to repay the note is treated as a payment from the insurer to the borrower and then from the borrower to the lender.[4528]

- To the extent of any accrued interest, the payment would have that character.[4529]

---

extent such amount is allocable to current life insurance protection provided to the non-owner pursuant to the split-dollar life insurance arrangement, the cost of which was paid by the non-owner, or the value of which the non-owner actually took into account pursuant to paragraph (d)(1) of this section.

[4524] Reg. § 1.61-22(f)(3)(iii) provides:

Transfers of death benefit proceeds. Death benefit proceeds paid to a party to a split-dollar life insurance arrangement (or the estate or beneficiary of that party) that are not excludable from that party's income under section 101(a) to the extent provided in paragraph (f)(3)(i) or (ii) of this section, are treated as transferred to that party in a separate transaction. The death benefit proceeds treated as so transferred will be taxed in a manner similar to other transfers. For example, if death benefit proceeds paid to an employee, the employee's estate, or the employee's beneficiary are not excludable from the employee's gross income under section 101(a) to the extent provided in paragraph (f)(3)(i) of this section, then such payment is treated as a payment of compensation by the employer to the employee.

[4525] See part II.Q.4.b Transfer for Value Rule; Basis.

[4526] See part II.J.8.d Distribution in Kind; Specific Bequests.

[4527] See part II.Q.4.f.i Split-Dollar Generally, especially the text accompanying fns 4451-4452.

[4528] See Reg. § 1.7872-15(m), reproduced in full near the end of part II.Q.4.f.iii Split-Dollar Loans under Reg. § 1.7872-15.

[4529] See Reg. § 1.7872-15(k), reproduced in full near the end of part II.Q.4.f.iii Split-Dollar Loans under Reg. § 1.7872-15, provides that accrued interest is deemed paid first.

- To the extent that a payment is principal and the payment exceeds basis, the payment would probably be taxed as capital gain to the original holder of the note or to a substituted basis transferee or ordinary income for any other holder.[4530] Thus, if the decedent's estate is considered to be the issuer, then the estate and any beneficiary (except the recipient of a pecuniary bequest) should have capital gain. Otherwise, the gain would be taxed as ordinary income.

Many commentators have suggested that, because one misstep can cause the economic benefit split-dollar regime (described in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit **Arrangement under Reg. § 1.61-22**) to be unwound, resulting in potentially huge income and gift tax consequences, the loan regime is safer.[4531] However, consider *Morrissette*, in which the split-dollar receivable's owner bequeathed the receivable to the split-dollar obligor.[4532] If the arrangement had been a split-dollar loan, that bequest might have violated Reg. § 1.7872-15(a)(4) (especially Example (1)), causing the interest expected to be paid under the loan to be disregarded, eviscerating most of the loan's value for gift tax purposes.[4533]

On the other hand, the economic benefit regime would let the successor owner cash in the policy using the investment in the contract (generally premiums paid) instead of the basis that was greatly reduced when the original owner died.[4534] Furthermore, if the insured dies before the economic benefit regime is unwound and the transfer-for-value and related rules have not been violated, all benefits to everyone are received tax-free.[4535]

II.Q.4.f.v. Estate Tax Consequences of Split-Dollar Agreements

Rev. Rul. 79-129 involved the following facts:

> In 1973, D obtained an ordinary life insurance policy on D's life. The policy had a face amount of $150,000. Simultaneously, D created an irrevocable funded insurance trust and named the X Trust Company as trustee.
>
> The insurance policy designated the trustee of the insurance trust as owner of the policy. Under the terms of the policy, D possessed the right to borrow against the cash surrender value in an amount not to exceed the total amount of the policy premiums paid by D. However, the policy had no cash surrender value during the first year.
>
> The policy designated D's estate as the beneficiary of the policy proceeds to the extent of an amount equal to the cash surrender value of the policy immediately prior to D's death, less any outstanding indebtedness against the policy. The policy designated the

[4530] See fns 2159-2160 (especially the latter) in part II.H.5.b Moving Real Estate or Other Low-Basis Property from Irrevocable Trust to Grantor, discussing what if an irrevocable grantor trust sold assets to the decedent in exchange for a note from the decedent.
[4531] See fn 4478 in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit Arrangement under Reg. § 1.61-22.
[4532] See fns 4538-4541 in part II.Q.4.f.v Estate Tax Consequences of Split-Dollar Agreements.
[4533] Reg. § 1.7872-15(a)(4) is reproduced in full in text preceding the sentence that includes fn 4506 in part II.Q.4.f.iii Split-Dollar Loans under Reg. § 1.7872-15.
[4534] See text accompanying fns 4520-4521 in part II.Q.4.f.iv.(a) Economic Benefit Model After Initial Owner Has Died.
[4535] See fn 4479 in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit Arrangement under Reg. § 1.61-22.

> X Trust Company, as trustee of the insurance trust, as the beneficiary of the balance of the proceeds.
>
> With the exception of D's right to borrow against the cash surrender value, noted above, all other contract rights with respect to the policy were exercisable by the trustee of the insurance trust, as owner of the policy. These contract rights included the right to assign and surrender the policy, to elect paid up insurance, and to change the beneficiary of the policy proceeds to the extent they exceeded the cash surrender value, which was payable to D's estate.
>
> The terms of the trust provide that on D's death, the trustee is to hold the insurance proceeds for the benefit of D's spouse and children. The trust agreement further provides that D would be responsible for payment of the portion of the annual premium that is equal to the increase in the cash surrender value of the policy during the year. The trustee would be responsible for the payment of the balance of the annual premium.
>
> D died in 1977, more than three years after D obtained the insurance policy and created the insurance trust. Between 1973 and 1977, D paid a total of $12,000 in premiums on the policy, in accordance with D's obligations under the terms of the trust agreement. During the period, D did not exercise the power to borrow against the cash surrender value. At the time of D's death, the cash surrender value of the policy was $12,000. Consequently, $12,000 of the policy proceeds was paid to D's estate. The balance of the proceeds, $138,000, was paid to the X Trust Company in accordance with the terms of the policy.
>
> On the Federal estate tax return filed for D's estate, the executor included the $12,000 in policy proceeds payable to the decedent's estate under section 2042(1) of the Code. The executor excluded the $138,000 balance of the proceeds, which was payable to a beneficiary other than the decedent's estate, on the ground that this portion of the proceeds was not includible under section 2042(2) of the Code, because the incidents of ownership in the policy possessed by D could not be exercised to affect this portion of the policy proceeds.

Rev. Rul. 79-129 held that $12K of proceeds were includible in the decedent's estate and the balance was not, based on the following reasoning:

> Section 20.2042-1(c)(2) of the Estate Tax Regulations describes "incidents of ownership" as follows:
>
> > For purposes of this paragraph, the term "incidents of ownership" is not limited in its meaning to ownership of the policy in the technical legal sense. Generally speaking, the term has reference to the right of the insured or his estate to the economic benefits of the policy. Thus, it includes the power to change the beneficiary, to surrender or cancel the policy, to assign the policy, to revoke an assignment, to pledge the policy for a loan, or to obtain from the insurer a loan against the surrender value of the policy, etc. ...."
>
> The right of an insured to obtain a loan against the surrender value of the policy is specified in the regulations as an incident of ownership. The courts have recognized that this power furnishes grounds for including the entire policy proceeds in the gross estate, even in situations where the decedent's power to borrow is limited to the amount of the

policy premiums. *Estate of Neuberger v. Hickey*, Civil No. 836 (N.D. N.Y. August 13, 1942); *Estate of McCoy v. Commissioner*, T.C. Memo. 1961-40.

In the situation presented in the instant case, $12,000 in policy proceeds were paid to D's estate, under the terms of the policy. Since this $12,000 in proceeds is payable to D's estate, this amount is includible in D's gross estate pursuant to section 2042(1) of the Code.

The balance of the proceeds, $138,000, was paid to the X Trust Company, a beneficiary other than the decedent's estate. Consequently, the estate taxation of these proceeds is governed by section 2042(2) of the Code.

Under the terms of the insurance contract, D possessed the right to borrow against the cash surrender value of the policy to the extent of the premiums paid by D and not recovered. In accordance with section 20.2042-1(c)(2) of the regulations, and the courts' decisions in *Neuberger* and *McCoy*, cited above, this power qualifies as an incident of ownership for purposes of section 2042(2), even though the amount D could borrow against the surrender value was limited. If the decedent possessed an incident of ownership in the policy, then the entire policy proceeds payable to a beneficiary other than the decedent's estate are includible in the decedent's gross estate regardless of the fact that a portion of the proceeds subject to inclusion could not be affected by the exercise of the incident of ownership.

Letter Ruling 9745019 involved the following facts:

You represent that the taxpayers, husband and wife, reside in a community property state. The taxpayers have three children: child A, child B, and child C. The taxpayers created an irrevocable trust in October 1996. Child A was named trustee. The terms of the trust specifically preclude the taxpayers from acting as trustees. The trust is irrevocable and the taxpayers have retained no powers or authority over either the trust or the trust property or the administration thereof.

The trust instrument provides that, during the lifetime of the taxpayers, the net income of the trust is to be paid in equal shares quarter-annually to child A, child B, and child C. Upon the death of the last to die of the taxpayers, the trust is to be divided into as many shares as there are children of the taxpayers then living and children of the taxpayers then deceased leaving issue then living (except no share is to be established for the issue of child B). Each share is to comprise a separate subtrust. The net income of each subtrust is to be paid quarter-annually for the benefit of the child for whom the subtrust was created. The principal of each subtrust may be distributed, at the discretion of the trustee, for the respective child's health, education, maintenance, or support. At the death of either child A or child C with both taxpayers deceased, the trustee of the subtrust for such deceased child is to distribute the remaining corpus of the subtrust to the issue of the deceased child by right of representation. Upon the death of child B with both taxpayers deceased, the remaining corpus of the subtrust for child B is to be distributed to the taxpayers' issue by right of representation except that no distributions are to be made to the issue of child B.

The taxpayers initially funded the primary trust with a cash gift. With this initial contribution the trustee purchased, and paid the first premium on, a second-to-die life insurance policy covering the lives of the taxpayers. The irrevocable trust was named the owner and beneficiary of the policy. The taxpayers and the trustee propose to enter into a collateral assignment split-dollar agreement with respect to any policies held by the trust.

Under the collateral assignment split-dollar agreement, the trustee is designated the owner of the policy. During the joint lives of the taxpayers, the trustee will pay that portion of the annual policy premiums equal to the insurer's current published premium rate for annually renewable term insurance generally available for standard risks. After the death of the first taxpayer to die, the trustee will pay that portion of the annual policy premiums equal to the lesser of 1) the applicable amount provided in the P.S. 58 tables set forth in Rev. Rul. 55-747, 1955-2 C.B. 228, or 2) the insurer's current published premium rate for annually renewable term insurance generally available for standard risks. The taxpayers will pay the remaining portion of the annual premium. The entire premium may be remitted by the taxpayers, and, if the taxpayers remit the total premium, the trustee is obligated to reimburse the taxpayers within 30 days for the trustee's portion of the premium.

The split-dollar agreement may be terminated at will by either the trustee or the taxpayers if the value of the assets held by the trust, excluding the value of the insurance policy, but including the loan value of the policy, equal or exceed the amount that is to be paid to the taxpayers upon termination as set forth below. In all other cases, the split-dollar agreement may be terminated only through the mutual consent of the trustee and the taxpayers. The agreement will also terminate upon the bankruptcy of the taxpayers, the failure of the trustee to timely reimburse the taxpayers, the failure of the taxpayers to pay the premiums, or the death of the survivor of the taxpayers.

If the agreement is terminated prior to the death of the survivor of the taxpayers, the survivor of the taxpayers will be entitled to receive an amount equal to the cash surrender value of the policy (net of the cash surrender value at the end of the initial policy year). For a 60-day period after the date of termination the owner has the option of obtaining a release from the collateral assignment by returning to the insureds (taxpayers) or the survivor an amount equal to the then cash surrender value of the policy less the cash surrender value at the end of the initial policy year. If the owner fails to exercise this option, the insureds or the survivor have the right to surrender the policy and obtain the cash surrender value less the cash surrender value at the end of the initial policy year.

If the agreement is terminated as a result of the death of the survivor of the taxpayers, the estate of the survivor of the taxpayers (or its designated beneficiaries) will be entitled to receive an amount equal to the cash surrender value of the policy immediately prior to the death of the survivor of the taxpayers less the cash surrender value at the end of the initial policy year.

In order to secure the taxpayers' interest (or the interest of the estate of the survivor) in the policy, the trustee will assign to the taxpayers, under a collateral assignment agreement, certain rights in the policy. Under the agreement, the following rights are assigned to the taxpayers: 1) the right to receive a portion of the proceeds payable on the survivor's death equal to the taxpayers' interest under the split-dollar agreement; and 2) the right to receive the cash value of the policy if the policy is surrendered by the trustee, less the cash surrender value amount at the end of the initial policy year. All

> other rights with respect to the policy are reserved to the trustee and all such rights may be exercised solely by the trustee subject to the taxpayer's security interest.

Letter Ruling 9745019 summarized Code § 2042(2) and Reg. § 20.2042-1(c)(2)[4536] and then reasoned and ruled:

> In the present case, the taxpayers have retained no incidents of ownership in the second-to-die life insurance policy on their lives. In the event that the trust includes assets (other than the insurance policy) such that these assets when added to the loan value of the policy would allow the trustee to pay the specified amount upon termination and the taxpayer(s) elects to cancel the agreement, the trustee could pay the taxpayer(s) an amount equal to the cash surrender value of the policy (net of the cash surrender value at the end of the initial policy year). The taxpayer(s) cannot, thus, force the cancellation of the policy.
>
> We conclude that the insurance proceeds payable to the trust pursuant to the split-dollar agreement from the second-to-die life insurance policy held by the irrevocable trust will not be includible in the gross estate of the last taxpayer to die under section 2042.

Letter Ruling 9809032 involved the following facts:

> On May 7, 1982, Decedent created an irrevocable trust (Trust) and transferred certain life insurance policies to the trust. Individual and Corporation were appointed trustees of the Trust and continue to serve as trustees.
>
> Paragraph C of Article FIRST of Trust provides that the trustees are vested with all right, title, and interest in and to the policies of insurance that were transferred to the trust and any additional policies of insurance assigned to the trust by any person. Paragraph C also authorizes the trustees to exercise all options, benefits, rights, elections, privileges, and other powers under the policies, including the right to borrow upon the policy or policies, to pledge any for a loan, to surrender any policy for the cash surrender value, and to convert a policy into other forms of insurance.
>
> Paragraph E of Article FIRST authorizes the trustees to receive all payments on insurance policies.
>
> Paragraph (4) of Article SECOND provides that, at the death of Decedent and if his wife predeceases him, the trustees shall pay $1,000,000 to Individual, if he survives decedent or, if not, to Individual's issue that survive Decedent. If the $1,000,000 amount is more than five percent of the Decedent's gross estate including the principal held by the Trustees, the amount shall be reduced so that it is no greater than five percent of Decedent's gross estate. The balance of the remaining principal shall be paid to the issue of the Decedent.
>
> Article THIRD provides that Trust's principal shall be divided into equal shares, one for each of Decedent's children who is then living and each of his children who has died leaving issue.

[4536] Reg. § 20.2042-1(c)(2) is reproduced in part II.Q.4.i.ii Summary of Estate Tax Rules Governing Life Insurance Payable to a Business Entity.

> Article THIRTEENTH provides that, during Decedent's life, the trustees shall receive compensation for their services as fiduciaries as is determined by Decedent. Individual is granted the authority to name a successor trustee provided any such successor trustee is a partner of Individual's law firm.
>
> Decedent died on October 27, 1996, survived by his three children, A, B, and C. During Decedent's life, the trustees borrowed from the Decedent amounts that were documented with promissory notes. The amounts borrowed were used to pay premiums on the insurance policies and, at his death, five of the notes were outstanding. The terms of the notes are substantially identical except for the amount borrowed and the interest rate prevailing at the time each note was executed. The executor has represented that the Decedent owned and controlled the notes through a revocable trust and that the notes are includible in Decedent's gross estate for federal estate tax purposes.

Letter Ruling 9809032 ruled:

> In this case, Decedent transferred insurance policies to Trust during his life. Trust was irrevocable and authorized the trustees to exercise all options, benefits, rights, elections, privileges, and other powers under the policies, including the right to borrow upon the policy or policies, to pledge any for a loan, to surrender any policy for the cash surrender value, and to convert a policy into other forms of insurance. The trustees were Individual and Corporation. Under these circumstances, Decedent did not have the incidents of ownership in the policies as that term is defined in section 20.2042-1(c)(2).
>
> In addition, the trustees borrowed from Decedent amounts that were used to pay premiums on the insurance policies. At Decedent's death, five of the notes were outstanding. Under section 2042, the payment of premiums is irrelevant in determining whether a decedent retained any incidents of ownership in the policy proceeds. *Estate of Leder v. Commissioner of Internal Revenue*, 893 F.2d 237 (10 Cir. 1989); *Estate of Headrick v. Commissioner of Internal Revenue*, 918 F.2d 1263 (6th Cir. 1990).
>
> Accordingly, based on the facts submitted and the representations made, we rule … the decedent did not possess any incidents of ownership in the policy under section 2042(2) as a result of loaning the amounts for payments of life insurance premiums to the trust.

The split-dollar economic benefit regime regulations do not apply for estate tax purposes.[4537]

Apparently taking advantage of this gap, *Estate of Morrissette v. Commissioner*[4538] held that a taxpayer's entering into a heavily discounted generational split-dollar agreement[4539] did not

---

[4537] See fn 4463 in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit Arrangement under Reg. § 1.61-22.
[4538] 146 T.C. 171 (2016). For a complete discussion, see S. Gorin & H. Zaritsky, Tax Court Approves Some Key Issues with Intergenerational Split-Dollar Arrangements, 28 Probate Practice Reporter 1 (June 2016). For a link to various selected documents filed with the Tax Court, including the split dollar agreement and appraisal the IRS viewed as representative of the arrangements, see http://tcinstitute.com/rv/ff002894cb41394cda173f9fe7469759eae604bd. In *Estate of Levine v. Commissioner*, Tax Court docket no. 9345-15, a July 13, 2016 order granted summary judgment to the taxpayer because the parties agreed that *Morrissette* controlled, with the IRS preserving its right to appeal, indicating that it continued to disagree with *Morrissette*.
[4539] Under the split-dollar rules, the decedent was the deemed owner of policies on younger insureds. Such an arrangement is referred to as generational because the insured is expected to outlive the

constitute a gift, even though the decedent bequeathed her interest to the other party in the split-dollar arrangement.[4540] In that case, the mother funded life insurance owned by irrevocable life insurance trusts ("ILITs") to fund cross purchase buy-sell obligations that her children had to each other. Because the mother had to wait until her children died to receive cash on the split-dollar receivables and the ILITs had full control over the policies, the mother's estate tax return reported that her right to receive the almost $30 million she invested was worth only approximately $7.5 million. Because the split-dollar receivable would have a low basis, repayment would have generated significant income tax; by bequeathing the receivable to the

---

decedent by a significant number of years. That the decedent's estate has to wait for many years to collect what it is owed and must also continue to expend funds during that time might cause the value of the decedent's economic rights to be discounted. However, the decedent's estate would benefit from the growth in the policy's cash value and would not bear the mortality charge (except to the extent that the mortality charge exceeded the rates under the IRS' Table 2001 rates), so it is unclear how much the policy should be discounted.

[4540] The IRS apparently argued that bequeathing the decedent's split-dollar interest to the other party to the contract made the restrictions illusory. From the opinion:

> Respondent argues that the Dynasty Trusts had a direct or indirect right in the cash values of the insurance policies by virtue of the terms of the 2006 Amendment to the CMM Trust. Under that amendment, the CMM Trust's interest in the cash values of the policies would pass to the Dynasty Trusts or directly to Mrs. Morrissette's sons or their heirs upon her death. However, because the CMM Trust was a revocable trust with respect to Mrs. Morrissette, she retained an absolute right to alter the CMM Trust throughout her lifetime. Accordingly, the Dynasty Trusts did not have a legally enforceable right to the cash values of the policies during the lifetime of the grantor. Furthermore, the split-dollar life insurance arrangements did not require the CMM Trust to distribute the receivables to the Dynasty Trusts. Rather, Mrs. Morrissette retained the right to receipt of the receivables.

The decedent's ability to amend her revocable trust was pure legal fiction, which legal fiction this case takes to the extreme. From the finding of facts:

> [The decedent's sons] Arthur, Donald, and Kenneth petitioned the Circuit Court of Fairfax County, Virginia (Fairfax court) for appointment of a conservator for Mrs. Morrissette's estate and asked the conservator to transfer additional assets to the CMM Trust. On August 18, 2006, the court found Mrs. Morrissette to be permanently incapacitated and appointed Cathleen A. Hatfield, an employee of the Interstate Group, to serve as the conservator. The Fairfax court granted Ms. Hatfield broad authority to act on Mrs. Morrissette's behalf. The conservatorship expired on October 20, 2006.

The conservator did the following during that 2-month period:

1. Established Dynasty Trusts,
2. Amended the revocable trust to authorize entering into the split-dollar agreements and bequeathing the revocable trust's interest in each split-dollar agreement to the other party to the split-dollar agreement, and
3. Entered into a buy-sell agreement requiring the life insurance.

Then, the Dynasty Trusts bought the policies and, together with the revocable trust (of which the sons were co-trustees), entered into the split-dollar agreements.

The idea that this arrangement would ever be modified was ludicrous, given that the sons orchestrated this entire transaction for their benefit, using as the conservator an employee of the company that they directly or beneficially owned, to set up a multi-million dollar transaction in a compressed period of time.

The following facts might have helped the estate's case:

- The purchase of the policies was for a legitimate and significant nontax reason [my assumption that the *Bongard* test might have been in the court's mind - see fn 91 in part II.A.2.d.i Benefits of Estate Planning Strategies Available Only for S Corporation Shareholders] – to fund a buy-sell agreement.
- The donor lived 4 years after the arrangement was made.
- The gift tax returns used the IRS' Table 2001 rates instead of any alternative term rates provided by the insurance company.

other party the agreement, the mother might have prevented that result.[4541] However, in a similar situation, *Estate of Cahill v. Commissioner*, T.C. Memo. 2018-84, held that Code §§ 2036, 2038, and 2703[4542] may very well apply, probably not qualifying for the exception for a sale for adequate and full consideration that would prevent the former two[4543] from applying because the split dollar receivable was only a small fraction of the amount of money the decedent contributed to the agreement.[4544] The court failed to address Reg. § 20.2038-

---

[4541] Presumably the bequest of the receivable or even a note under the loan regime would not generate income tax. Bequeathing a note (other than a note received in an installment sale) does not trigger cancellation of indebtedness income to the debtor; see fn. 7075, found in part III.B.5.b Promissory Notes. However, if *Morrissette* had used the loan regime, bequeathing the note may have caused the loan to be disregarded for gift tax purposes, which would have made the whole amount advanced constitute a gift. See fn 4506 in part II.Q.4.f.iii Split-Dollar Loans under Reg. § 1.7872-15.

[4542] The court held:

> On the basis of the undisputed facts, we conclude that under section 2703(a)(1) the split-dollar agreements, and specifically the provisions that prevent decedent from immediately withdrawing his investment, are agreements to acquire or use property at a price less than fair market value. The estate claims that decedent paid $10 million to the insurance companies for the benefit of MB Trust and in return received certain rights, namely, the termination rights (which the estate claims are worthless) and decedent's death benefit rights (which, according to the estate's valuation theory, are worth less than 2% of the cash surrender value). MB Trust, meanwhile, paid nothing into this arrangement and received MB Trust's death benefit rights. As best we understand the estate's valuation theory, MB Trust's death benefit rights are allegedly worth at least the cash surrender value minus the value of decedent's death benefit rights (*i.e.*, $9,611,624 – (allegedly) $183,700 = $9,427,924). Nothing in the parties' filings suggests that MB Trust ever paid, or was obligated to pay, any interest or other amount to compensate decedent for MB Trust's acquisition and use of this amount….
>
> Next, it is clear that under section 2703(a)(2) the split-dollar agreements, and specifically MB Trust's ability to prevent termination, also significantly restrict decedent's right to use the termination rights. The split-dollar agreements, taken as a whole, clearly restrict decedent's right to terminate the agreements and withdraw his investment from these arrangements.

[4543] The court held:

> … the rights to terminate and recover at least the cash surrender value were clearly rights, held in conjunction with another person (MB Trust), both to designate the persons who would possess or enjoy the transferred property under section 2036(a)(2) and to alter, amend, revoke, or terminate the transfer under section 2038(a)(1).

[4544] The court noted:

> Whether a transfer was for adequate and full consideration is a question of value; *i.e.*, did what decedent transferred roughly equal the value of what he received in return? See, *e.g.*, *Estate of Hurford v. Commissioner*, T.C. Memo. 2008-278. On the basis of the undisputed facts presently before us, we conclude that it was not.
>
> According to the estate, at decedent's date of death MB Trust's ability to veto decedent's termination of the agreements rendered the termination rights valueless. Additionally, the estate alleges that decedent's death benefit rights are worth less than 2% of the cash surrender value (i.e., $183,700 ÷ $9,611,624 < 2%). But MB Trust's veto power existed from the moment decedent entered into these split-dollar agreements, and nothing in the undisputed facts presently before us suggests that the terms of the split-dollar agreements were altered between execution of the agreements and decedent's date of death; consequently, this alleged 98% discount must have been present from the execution of these agreements. Therefore, *according to the estate's valuation theory*, the initial transfer of $10 million in value cannot have been in exchange for property worth that amount; *i.e.*, under the estate's argument, what decedent received was necessarily worth at least 98% less than what he transferred (even without taking into account the amounts used to pay commissions and fees to the insurance company). Consequently, at least according to the estate's valuation theory, the value of what decedent received (allegedly, something close to $183,700) was not even roughly equal to the $10 million decedent paid.

1(a)(2), which prevents Code § 2038 from applying "if the decedent's power could be exercised only with the consent of all parties having an interest (vested or contingent) in the transferred property, and if the power adds nothing to the rights of the parties under local law."[4545] On December 12, 2018, the parties settled the case, with the estate paying $2,123,508 in estate tax and $424,702 in Code § 6662(h) penalties (but no Code § 6662(a) penalties).

In an order entered June 21, 2018, the *Morrissette* Tax Court denied the taxpayer's motion for partial summary judgment on grounds similar to *Cahill*.[4546] On February 19, 2019, the court

---

[4545] That exception is an alternative to the exception to which the court alluded, Reg. § 20.2038-1(a)(1), which prevents Code § 2038 from applying, "to the extent that the transfer was for an adequate and full consideration in money or money's worth (see §20.2043-1)."

[4546] The court reasoned and ruled (Docket No. 4415-14):

> Petitioners argue that the decedent's only right under the split-dollar arrangements was the death benefit and that right was without restriction. They argue that the property being valued is the death benefit, the death benefit is free of any restriction as defined in section 2703(a)(2), and accordingly section 2703(a) does not apply to the valuation of the split-dollar arrangements. They argue that the split-dollar arrangements did not contain any restrictions on the decedent's rights for purposes of section 2703(a)(2). They state, without further analysis, that the termination restriction, *i.e.*, that neither party had the unilateral right to terminate the split-dollar arrangements, is not a restriction for purposes of section 2703(a)(2).
>
> Respondent argues that the decedent's rights also include the termination right and receipt of a payout upon termination. He argues that the termination right were restricted by the split-dollar arrangements and that section 2703(a)(2) applies to disregard the termination restrictions. He also argues the decedent had rights under collateral assignment agreements. He contends that the CMM Trust and the Dynasty Trusts entered into agreements in which the Dynasty Trusts assigned the insurance policies to the CMM Trust as collateral for its $30 million premium prepayment, and the collateral assignments contained a restriction that should be disregarded under section 2703(a)(2). He argues that neither the termination restriction nor the collateral assignment restriction is inherent or necessary to a split-dollar agreement. See *Estate of Strangi v. Commissioner*, 115 T.C. 478, 488-489 (2000), *aff'd* in part, *rev'd* on another issue, 293 F.3d 279 (5th Cir. 2002) (holding that section 2703 did not apply to disregard partnership entity to cause partnership assets to be included in the estate); *cf. Estate of Elkins v. Commissioner*, 140 T.C. 86 (2013), *aff'd* in part, *rev'd* in part, 767 F.3d 443 (5th Cir. 2014) (applying section 2703(a) to disregard restriction on decedent's right to institute a partition action for undivided fractional interests in art work); *Holman v. Commissioner*, 130 T.C. 170 (2008) (applying section 2703 to disregard restrictions in partnership agreement on partner's right to transfer her partnership interest). He argues that we should deny summary judgment in petitioners' favor because genuine issues of material fact exist. He argues that the Court should find that section 2703 applies to the decedent's rights under the split-dollar arrangements as a matter of law, but he did not file a cross-motion for summary judgment on this issue. If section 2703 applies, respondent argues that we should disregard the termination restrictions pursuant to section 2703 and value the decedent's rights under the split-dollar arrangement as if she had the right to unilaterally terminate the agreements. He does not seek to disregard the split dollar arrangements in their entirety.
>
> The restriction on the decedent's termination rights is a restriction for purposes of section 2703(a)(2). *Estate of Cahill v. Commissioner*, T.C. Memo. 2018-84, at *23-28. In *Estate of Cahill*, we denied the estate's motion for partial summary judgment that section 2703(a) is inapplicable to split-dollar arrangements with termination restrictions similar to those at issue here where the parties to the arrangements could mutually agree to terminate the arrangement but neither party could unilaterally terminate the arrangements. *Id.* Here the CMM Trust and the respective Dynasty Trust could mutually agree to terminate the split-dollar arrangement, but neither party could unilaterally terminate the agreement. Respondent has asserted alternative arguments that the split-dollar arrangements are includible in the decedent's gross estate

denied the IRS motion for summary judgment under Code §§ 2036(a)(2) and 2038(a)(1) and (2), finding that "there is a material factual dispute concerning the issue of full and adequate consideration" and denied the IRS motion for summary judgment under Code § 2703, stating that Code § 2703 "will apply unless the requirements of the section 2703(b) exception are satisfied" but that "there is a genuine dispute of material fact of whether the transfers were a device to transfer property to members of decedent's family for less than full an adequate consideration in money or money's worth." Ultimately, however, T.C. Memo 2021-60 held that Code § 2036 did not apply:[4547]

> Taking into account the totality of the facts and circumstances, the CMM trust had legitimate and significant nontax purposes for entering into the split-dollar agreements and funding payment of the premiums in exchange for repayment plus interest in the form of inside buildup. An important purpose of the transfer was to promote the management succession and efficiency and to protect corporate profits for the accumulation of capital to develop the business. On the basis of the record before us, we find that unrelated parties would have agreed to similar terms. Respondent has not argued otherwise….
>
> To qualify for the bona fide sale exceptions, the transfer must have been made for adequate and full consideration in money or money's worth….
>
> Compliance with the economic benefit regime does not mean that the adequate and full consideration requirement is met. *Estate of Cahill v. Commissioner*, at *33. Under the plain text of the regulations, the economic benefit regime does not apply for estate tax purposes. The regime is set out in the income tax regulations, and the regulations state that the regime applies for income, gift, employment, and self-employment tax purposes. Sec. 1.61-22(a), Income Tax Regs. Estate tax is not listed. The economic benefit regime does not use the phrase "adequate and full consideration" or otherwise invoke the concept of adequate and full consideration….
>
> We hold that the CMM trust received adequate and full consideration on the basis of the split-dollar agreements' repayment terms that included interest earned in the form of inside buildup of the insurance policies. The minimum interest rates and the actual appreciation in the policies' cash values were higher than the interest rates that the CMM trust had been earning on the money. Respondent does not argue that the repayment terms were inadequate. The split-dollar agreements also provide the additional benefit of deferral of tax on the policies' inside buildup and the tax-exempt payout of the death benefits to the beneficiaries.

---

pursuant to sections 2036 and 2038 relating to inter vivos transfers, which petitioners have not been addressed in their summary judgment motions and remain at issue for trial. See *Estate of Cahill v Commissioner*, T.C. Memo. 2018-84, at *15-*16 (holding the estate retained rights under the split-dollar arrangements as defined in sections 2036(a) and 2038(a) and denying summary judgment to the estate that those sections are inapplicable). As there may be facts or theories not yet presented, we decline to treat respondent's response to petitioners' motion for partial summary judgment as a cross-motion for partial summary judgment.

Accordingly, it is ORDERED that petitioners' motion for partial summary judgment, filed December 5, 2016, relating to the issue of the applicability of section 2703 is denied.

[4547] These are strategic excerpts from the full analysis that is reproduced in the text following fn 7470 in part III.C.1 Whether Code § 2036 Applies.

> Estate tax saving was not achieved through execution of the split-dollar agreements alone but rather through the undervaluation of the split-dollar rights….

The court held that Code § 2703 did not apply,[4548] which is not surprising given that it bought into the bona fide arguments for Code § 2036. However, the court did not buy into the estate's valuation, holding the split-dollar agreement would be unwound much earlier than its stated termination (thereby undermining the effect of various discounts):

> Petitioners argue that there was no prearranged plan to terminate the split-dollar agreements when the agreements were executed. We are not convinced. When the 2006 plan was implemented, the CMM trust agreement was amended to distribute the split-dollar rights to the respective dynasty trusts that owned the underlying policies. Such a distribution indicates an intent to give the dynasty trusts full control over the policies once the distribution occurred. Such control makes it appropriate to apply a maturity date, and we apply a maturity date of December 31, 2013. That is the date that respondent seeks. Accordingly, we do not apply an earlier one. We acknowledge that Ken testified that he did not intend to cancel the policies. While we find him credible, the brothers were free to choose to cancel the policies after the agreements were distributed to the dynasty trusts. From the outset, the plan was to give the dynasty trusts complete control after Mrs. Morrissette's death, and the CMM trust agreement was so amended. Respondent points to other facts to support a December 31, 2013, maturity date including the decision to purchase policies with high premiums and modest death benefits and July 2010 emails between Don, Mr. Meltzer, and Mr. McNair that discuss the possibility of canceling certain policies. Mr. McNair responded to Don that he insisted that the policies not be canceled until the three-year period of limitations on the estate return had expired. This is the basis for respondent's choosing December 31, 2013, as the maturity date. Petitioners raise valid objections to the emails including that Ken and Buddy were not involved and the discussion started out about the effect of cancellation of the policies on Mr. Meltzer's future commissions. However, on our review of all the facts and circumstances, the key factor in setting the December 31, 2013, maturity date is the brothers' complete control over the split-dollar agreements. As stated above, there are grounds for setting an earlier maturity date, but we will use respondent's date.

The court imposed an undervaluation penalty:

> When considering reliance on an appraisal as a defense to a valuation penalty, we consider the methodology and assumptions underlying the appraisal, the appraised value, the circumstances under which the appraisal was obtained, and the appraiser's relationship to the taxpayer. *Estate of Richmond v. Commissioner*, T.C. Memo. 2014-26, at *48. In this case we place the most weight on the appraised value, less than $7.5 million. Mr. Stephanson's opined value was not reasonable, and the brothers should have known that. The brothers had the CMM trust pay $30 million and turned it into $7.5 million for estate tax reporting purposes. They should have known that the claimed value was unreasonable and not supported by the facts.
>
> While the brothers credibly testified to the business and nontax purposes for entering into the split-dollar agreements, they also knew that Mr. Meltzer and Mr. McNair were marketing the agreements as an estate tax saving strategy. Mr. Meltzer and Mr. McNair made it clear that the tax benefits of the split-dollar agreements would be obtained

---

[4548] See text accompanying fn 7400 in part III.B.7.e Code § 2703 Overview.

> through the undervaluation of the split-dollar agreements, and the brothers knew from the time they decided to enter into the split-dollar agreements that any estate tax saving depended on valuing the split-dollar rights at a substantial discount from the premiums that the CMM trust paid. In July 2010, before the return's filing, Mr. McNair warned Don that the IRS would likely see problems with the values of the split-dollar rights that the estate had planned to report on the return. Nevertheless, the brothers had the estate report substantially discounted values on the return.
>
> Mrs. Morrissette had significant, nontax reasons for entering into the split-dollar agreements. However, the only purpose for the substantially discounted values of the split-dollar rights as compared to the $30 million that the CMM trust paid is estate tax saving. Knowing that any estate tax saving would be from the undervaluation of the split-dollar rights, the brothers engaged an appraiser that Mr. McNair recommended. Mr. McNair reviewed a draft of Mr. Stephanson's appraisal and asked Mr. Stephanson to make changes that reduced his opined values.
>
> Mr. Stephanson's appraisal was not reasonable, and petitioners did not rely on it in good faith. Accordingly, the estate is not entitled to rely on Mr. Stephanson's appraisal as a reasonable cause defense. The estate did not act reasonably or in good faith in the valuation of the split-dollar rights. The estate is liable for the 40% penalty for the gross valuation misstatement of the split-dollar rights.

On the other hand, the taxpayer won *Estate of Levine v. Commissioner*, 158 T.C. No. 2 (2/28/2022). The Syllabus summarized the facts:

> D, the deceased, entered into split-dollar life-insurance arrangements which required her revocable trust to pay premiums for life-insurance policies taken out on the lives of her daughter and son-in-law. When the arrangements terminate, D's revocable trust has the right to be paid the greater of the premiums paid or the cash surrender value of the policies. An irrevocable life-insurance trust was the owner of these policies. D's children and grandchildren were the beneficiaries of the irrevocable trust, and F, a family friend who was substantially involved in the family's businesses, was the sole member of the investment committee that managed the irrevocable trust. F and two of D's children also acted as D's attorneys-in-fact and as the revocable trust's successor cotrustees. As the sole member of the irrevocable trust's investment committee, only F had the right to prematurely terminate the life-insurance policies: the arrangements gave D and the other two attorneys-in-fact no rights to terminate the policies or the arrangement itself.

Levine reviewed the general rules of estate inclusion when the life insurance is not on the life of the person advancing the premiums:

> On this we have precedent. In *Morrissette I*, we held that a split-dollar arrangement much like this one fell under the economic-benefit regime for gift-tax purposes. But we also noted in *Morrissette I*, 146 T.C. at 172 n.2, that "we [were] not deciding whether the estate's valuation of the receivables...in the gross estate [was] correct." And section 1.61-22(a)(1) seems not to cover the estate-tax consequences of split-dollar arrangements at all.21 The final regulations do make one reference to estate tax in their preamble, which states "[f]or estate tax purposes, regardless of who is treated as the owner of a life insurance contract under the final regulations, the inclusion of the policy proceeds in a decedent's gross estate will continue to be determined under section 2042." T.D. 9092, § 5, 2003-2 C.B. 1055, 1063. But the express terms of section

> 2042 limit its applicability to life-insurance policies on a decedent's own life, not split-dollar arrangements where policies are taken out on the lives of others. See § 2042(1); Treas. Reg. § 20.2042-1(a)(2) ("[S]ection 2042 has no application to the inclusion in the gross estate of the value of rights in an insurance policy on the life of a person other than the decedent"). From this we conclude that neither the regulation nor section 2042 governs our valuation of the split-dollar arrangement we have to analyze.

Levine rebuffed the IRS' Code §§ 2036, 2038 attacks, first comparing Code § 2036(a)(2) inclusion in *Estate of Strangi*, T.C. Memo. 2003-145, and *Estate of Powell v. Commissioner*, 148 T.C. 392 (2017), to the taxpayer's win in *United States v. Byrum*, 408 U.S. 125 (1972):

> In *Byrum*, the Supreme Court held that a decedent's right to vote shares of stock in three corporations that he had transferred to a trust for the benefit of his children did not cause those shares to be included in his estate under section 2036(a)(2). The Court noted that any powers the decedent might have had were subject to a number of different "economic and legal constraints" that prevented those powers from being equivalent to the right to designate a person to enjoy trust income. *Id*. at 144. One of these constraints was that the decedent, as the controlling shareholder of each corporation whose stock was transferred into the trust, owed fiduciary duties to minority shareholders that limited his influence over the corporations' dividend policies. *Id*. at 142-43. The Supreme Court also noted that an independent corporate trustee alone had the right under the trust agreement to pay out or withhold income, *id*. at 137, so the decedent had no way of compelling the trustee to pay out or accumulate that income, *id*. at 144. That the decedent had fiduciary duties to these minority shareholders - duties that were legally enforceable - was important to the Supreme Court's analysis. *Id*. at 141-42.
>
> We have been careful to distinguish *Byrum* in later cases when we see something behind a transaction's facade that suggests appearance doesn't match reality. *Estate of Strangi*, 85 T.C.M. (CCH) at 1333-34, featured a decedent who could act with others to dissolve a family limited partnership to which he had transferred property in exchange for a 99% limited-partner interest. The decedent in *Estate of Strangi* - through his son-in-law—also had the right to determine the amount and timing of partnership distributions. *Id*. at 1337. This led us to distinguish *Byrum*, because in *Byrum* the son-in-law had fiduciary duties to other members of the family limited partnership; in *Estate of Strangi*, the son-in-law's potential fiduciary duties - as the decedent's attorney-in-fact and 99% owner of the family limited partnership - were duties he owed "essentially to himself." *Id.* at 1343.
>
> We decided *Estate of Powell* on essentially the same grounds as *Estate of Strangi*. In *Estate of Powell*, 148 T.C. at 394-95, a fiduciary also owed duties to the decedent both as his attorney-in-fact and as partner in a family limited partnership. We found that there was nothing in the record of that case to suggest that as a fiduciary he "would have exercised his responsibility as a general partner of [the family limited partnership] in ways that would have prejudiced decedent's interests." *Id*. at 404. And we again determined that whatever duties were owed were duties that "he owed almost exclusively to decedent herself." *Id.*
>
> Here's where the Commissioner makes his thrust. He contends that Levine - through her attorneys-in-fact - stood on both sides of these transactions and therefore could unwind the split-dollar transactions at will. This meant that she - again through the attorneys-in-fact - had the power to surrender the policies at any time for their cash-surrender values.

(Remember that, under the terms of the split-dollar arrangements, if the Insurance Trust surrendered the policies before the deaths of both Nancy and her husband, it would immediately owe the Revocable Trust the full cash-surrender values of the policies.) The Commissioner argues that these powers constitute the right to possession and enjoyment of, or the right to income from, the split-dollar receivable under section 2036(a)(1). If he's right, we would have to value the receivable at the policies' cash-surrender values.

We agree that Robert, Nancy, and Larson - as Levine's attorneys-in-fact - stood in the shoes of Levine for this split-dollar arrangement. That is the point of giving someone a power of attorney. The Revocable Trust is the entity that paid the $6.5 million, and its cotrustees are Nancy, Larry, and Larson. The Insurance Trust, however, owns the life-insurance policies, and its trustee is South Dakota Trust. South Dakota Trust is directed by the investment committee, and the investment committee's only member is Larson. This, however, means that the only person that stood on both sides of the transaction is Larson -in his role as the investment committee and as one of Levine's attorneys-in-fact.

We therefore must look at each of Larson's roles in this transaction to consider how to apply sections 2036(a) and 2038. Under the 1996 power of attorney and Minnesota law, all actions taken by Larson as an attorney-in-fact are considered to be actions of Levine. See Minn. Stat. § 523.12 (2008).[25] The Insurance Trust's instrument, however, states that the Insurance Trust is irrevocable. We have no reason to doubt that this means what it says. And the consequence is that Levine irrevocably surrendered her interest in the Insurance Trust and had no right to change, modify, amend, or revoke its terms. Once it was created, Levine had no legal power over its assets. Levine did not have the power to surrender the policies by herself. Since Larson - in his role as an attorney-in-fact - could not take any action which Levine could not take herself, we find that he could not surrender the policies in his capacity as attorney-in-fact. This means that even if we treat the Insurance Trust, the policies, or that Trust's rights under the split-dollar deal as the "property transferred" (and thus the property whose value we look for) under section 2036, Levine did not retain any right to possession or enjoyment of the property transferred.

[25] The Minnesota statute states: "Any action taken by the attorney in-fact-pursuant to the power-of-attorney binds the principal, the principal's heirs and assigns, and the representative of the estate of the principal *in the same manner as though the action was taken by the principal* ...." (Emphasis added.)

To get around these problems, the Commissioner has to argue that Larson has the right to designate who shall possess or enjoy the cash-surrender value of the policies, either by surrendering them or by terminating the entire arrangement. See *Estate of Cahill*, 115 T.C.M. (CCH) at 1467. For example, in Estate of Cahill, we found that section 2036(a)(2) applied when the decedent jointly held the right to terminate the split-dollar life-insurance policy with the irrevocable trust that held the policies. *Id*. We think that's the only way the Commissioner can include the combined cash-surrender values of the life-insurance policies in Levine's estate under section 2036(a)(2) or section 2038.

But we also think that this argument fails to consider the fiduciary obligations Larson owes to the beneficiaries of the Insurance Trust—obligations that would prevent him from surrendering the policies. The Commissioner first questions the validity and existence of these duties. He notes that "Larson was not compensated for his role as the sole member of the Investment Committee despite the fact that petitioner has taken the position that he assumed significant fiduciary responsibilities under this role." But we don't think that matters. There is no requirement under either South Dakota law[26] or general trust law[27] that a trustee or trust adviser be compensated to have fiduciary obligations. The terms of the Insurance Trust expressly state that Larson—in his role as the single-member investment committee - shall be considered to be acting in a fiduciary capacity. Therefore we do find that Larson was under fiduciary obligations in his role as the sole member of the investment committee.

[26] S.D. Codified Laws § 55-1B-4 (2008) provides:

> If one or more trust advisors are given authority by terms of the governing instrument to direct, consent to, or disapprove a fiduciary's investment decisions, or proposed investment decisions, *such trust advisors shall be considered to be fiduciaries when exercising such authority unless the governing instrument provides otherwise*''

(Emphasis added).

And S.D. Codified Laws § 55-2-1 (2008) provides that "[i]n all matters connected with his trust a trustee is bound to act in the highest good faith toward his beneficiary . . . ."

[27] *Restatement (Third) of Trusts* § 70, cmt. d(1) (Am. L. Inst. 2007) states that "[w]hether or not a person receives compensation for serving as trustee, the person is subject to a duty to administer the trust in accordance with its terms . . . with prudence . . . and in good faith and conformity with other fiduciary duties referred to in Clause (b)."

Larson's duties in his role for the Insurance Trust required him, however, to look out for the interests of that Trust's beneficiaries. And here is where the Commissioner makes a different and subtler argument. He contends that, since Nancy and Robert are beneficiaries of the Insurance Trust, they stand to benefit under the split-dollar arrangement regardless of whether the life-insurance policies remain in place or are surrendered during their lifetime. This means, he says, that Larson would not violate his fiduciary duties to the beneficiaries of the Insurance Trust if he either surrendered, or didn't surrender, the policies because Nancy and Robert would benefit no matter what. If Larson immediately terminated the split-dollar arrangement, surrendered the policies, and sent the money out of the Insurance Trust to the Estate and then to Levine's children, he'd just be benefiting the children in a different capacity.

To this subtle thrust, the Estate has a blunt parry: Levine's children are not the only beneficiaries under the Insurance Trust. Her grandchildren are also beneficiaries, and Larson has fiduciary obligations to them as well. According to the terms of the Insurance Trust, Levine's grandchildren would receive nothing if the life-insurance policies were surrendered. Left unmentioned is the final step in this argument - that Larson has no right to violate his fiduciary obligations by looting the Insurance Trust for the benefit of only some of its beneficiaries.

The Commissioner counters by arguing that the Insurance Trust itself allows Nancy and Robert to extinguish their children's interests in it. This means, he says, that Nancy and Robert are the only real beneficiaries, and stand to benefit regardless of whether the life insurance policies stay in effect.

This misinterprets the way that "extinguishment" works under the provisions of the Insurance Trust, however. The Trust plainly states that "the special testamentary power of appointment hereby granted to said Beneficiary shall not be exercisable in favor of or for the benefit of the Beneficiary ..."—i.e. they can't extinguish another beneficiary's interest in favor of themselves. The Insurance Trust also states that extinguishment of a beneficiary's interest can occur only by will and cannot take place until the death of the beneficiary doing the extinguishing (which in this case would be Nancy or Robert). So if Nancy and Larry hoped to extinguish the interests of their own children, they couldn't do so until they themselves directly named some other beneficiary to take their place. This means that during the lives of Nancy and Robert, their children will remain beneficiaries of the Insurance Trust, and a decision by Larson to surrender the policies would mean the grandchildren would receive nothing. This would breach his fiduciary duties to them.

Levine's case is thus distinguishable from *Estate of Strangi* and *Estate of Powell*. Many of the same "economic and legal constraints" that existed in *Byrum* exist here. First, the fiduciary obligations that Larson owed were not duties that he "essentially owed to himself." His fiduciary obligations are owed to all the beneficiaries of the Insurance Trust, which include not just Levine's children, but her grandchildren. As we've already discussed, if Larson surrendered the life insurance-policies, those grandchildren would receive nothing as beneficiaries. That makes these fiduciary obligations more analogous to the duties owed to the minority shareholders in *Byrum*, which like them are duties that do limit the powers of the person who holds them. They are also legally enforceable duties, established by South Dakota state law, *see, e.g.*, S.D. Codified Laws §§ 55-2-1, 55-1B-4 (2008), and if Larson breached these duties or was put in a position where he was forced to do so, he would be required under S.D. Codified Law § 55-2-6 (2008) to inform all of the beneficiaries of the Insurance Trust, and he could be removed. He could also be subject to liability under South Dakota law for breach of his duty. *See, e.g.*, *Matter of Heupel Fam. Revocable Tr.*, 914 N.W.2d 571 (S.D. 2018) (trustee breaching fiduciary duties removed and required to personally reimburse trust).

We stress that the fiduciary duties that Larson owed to the beneficiaries of the Insurance Trust do not conflict with the fiduciary duties that he owed Levine as one of her attorneys-in-fact. In both *Estate of Strangi* and *Estate of Powell* we held that the fiduciary's role as the attorney-in-fact would potentially require him to go against his duties as a trustee. *Estate of Strangi*, 85 T.C.M. (CCH) at 1343; *Estate of Powell*, 148 T.C. at 404. This is not the case here: Under Minnesota law, whenever Larson and the other attorneys-in-fact exercise their powers, they are to do so "in the same manner as an ordinarily prudent person of discretion and intelligence would exercise in the management of the person's own affairs and shall have the interests of the principal utmost in mind." Minn. Stat. § 523.21 (1992). And Larson, Nancy, and Robert all credibly testified that one of the reasons for this split-dollar arrangement was that Levine wished to provide for her grandchildren and keep this arrangement in effect until the insureds died. So not only did Larson's role as an attorney-in-fact not require him to go against his duties as a trustee, the two roles reinforced each other and pushed him to fulfill Levine's stated purpose in her estate planning. They made it more likely that he would not want to cancel the life-insurance policies.

We therefore find it more likely than not that the fiduciary duties that limit Larson's ability to cancel the life-insurance policies were not "illusory". It also persuades us that we cannot characterize his ability to unload the policies and realize their cash-surrender values as a right retained by Levine, either alone or in conjunction with Larson, to designate who shall possess or enjoy the property transferred or the income from it.

We conclude that this precludes the inclusion of the cash-surrender values of the life-insurance policies in Levine's estate under section 2036(a)(2).[28]

[28] Section 2036(a) also excepts from its sweep transfers that are bona fide sales for adequate and full consideration. We need not determine whether this exception applies.

Section 2038 focuses on a decedent's power to "alter, amend, revoke, or terminate" the enjoyment of the property in question. The Commissioner's argument under section 2038 mirrors his argument under section 2036 - that the attorneys-in-fact have controlled the entirety of Levine's affairs since 1996, and that this control includes the ability to "alter, amend, revoke or terminate" any aspect of the split-dollar arrangements. He argues again that the termination of the split-dollar arrangements would provide Levine - through her attorneys-in-fact - with complete control over the cash-surrender values of the policies, and the power to do this would fall within section 2038(a)(1). He argues that it applies to section 2038(a)(1) for the same reasons that he argues it applies to section 2036. We disagree for the same reasons and need not repeat them.

The cash-surrender values of the insurance policies are not includible under section 2038(a)(1) either. The cash-surrender values of the insurance policies are not includible under section 2038(a)(1) either.[29]

[29] Section 2038 also includes an exception for a "*bonafide* sale for an adequate and full consideration in money or money's worth." We need not decide whether this exception applies here.

Levine rebuffed the IRS' Code § 2703 argument that the split-dollar agreement was a restriction on the estate's property:

We disagree. Section 2703 does refer to "any property." But the "any property" it refers to is property of an estate, not some other entity's property. Our caselaw confirms the plain meaning of the Code, and tells us to confine section 2703's valuation rule to property held by a decedent at the time of her death*. See, e.g., Estate of Strangi v. Commissioner*, 115 T.C. 478 (2000), aff'd in part, rev'd in part, 293 F.3d 279 (5th Cir. 2002). The district court in *Church v. United States*, 85 A.F.T.R.2d 2000-804 (W.D. Tex. 2000), aff'd without published opinion, 268 F.3d 1063 (5th Cir. 2001), rejected precisely this argument when it held that "property" in section 2703 consideration does not include assets that a decedent contributed to a partnership before her death, but only the partnership interest she got in exchange. *See also Estate of Strangi*, 115 T.C. at 488 ("Congress 'wanted to value property interests more accurately when they transferred, instead of including previously transferred property in the transferor's gross estate'" (citing *Kerr v. Commissioner*, 113 T.C. 449 (1999), aff'd, 292 F.3d 490 (5th Cir. 2002))).

The property we have to value here is the property in Levine's estate, which is the split-dollar receivable she held at the time of her death. There were no restrictions on that property. She could do with the receivable what she wanted. She was free to sell it or transfer it as she wished. One needs to remember that what the Estate valued on its return was the receivable owned by Levine in her Revocable Trust. Section 2703 is not

> relevant to the valuation of the receivable because Levine had unrestricted control of it. Section 2703 therefore does not apply.
>
> The only property left in the Estate after this arrangement was done was the split-dollar receivable. It is the value of that property that must be included in the gross estate, and the parties have agreed that its value is $2,282,195. The Estate having almost entirely prevailed, no accuracy-related penalties apply.

Also consider potential estate tax inclusion when the insured controls an employer that is a party to the split-dollar agreement. Because part of the death benefit is not payable to the employer,[4549] the IRS might argue that the insured has incidents of ownership over the policy that is subjected to the split-dollar arrangement. To avoid such an argument, the split-dollar agreement and any collateral assignments might limit the employer's rights to just those provided in the split-dollar agreement.[4550] Although that approach would work for the split-dollar loan regime, it might not work so well for the economic benefit regime. The economic benefit regime provides that the non-owner is deemed to have current access to that portion of the policy cash value to which the non-owner has a current or future right and that currently is

---

[4549] If all of the death benefit is payable to the employer or used for the employer's business purpose, the insurance policy is not included in the insured's estate by reasons of incidents of ownership, although the death benefit might very well affect the employer's value that is included in its deceased owner's estate. See part II.Q.4.a Funding the Buy-Sell, especially fn. 4312.

[4550] For example, Letter Ruling 9651017 held:

> Under the split-dollar agreement in the present case, X is expressly prohibited from borrowing against any part of the policy. In addition, the power to change the beneficiary, the power to surrender or cancel the policy, the power to assign the policy or to revoke an assignment, and the power to pledge the policy for a loan or to obtain from the insurer a loan against the surrender value of the policy are vested in the trustee of Trust. Accordingly, we conclude, that X will possess no incidents of ownership in the policy acquired by the Trust. See Rev. Rul. 76-274, 1976-2 C.B. 278, modified by Rev. Rul. 82-145, 1982-2 C.B. 213.

Letter Ruling 9651030 had the same or similar language. Letter Ruling 9511046 elaborated:

> Under the split-dollar agreement in the present case, the corporation will, however, hold no incidents of ownership. The corporation will have no defacto ability to force the trustee to borrow against the policy because the corporation is required to make the necessary premium payments for the duration of the trust. The power to change the beneficiary, the power to surrender or cancel the policy, the power to assign the policy or to revoke an assignment, and the power to pledge the policy for a loan or to obtain from the insurer a loan against the surrender value of the policy are vested in the third party trustee of the irrevocable trust and are not attributable to the corporation. Accordingly, although the surviving spouse will hold control of the corporation for purposes of section 20.2042-1(c)(6), the corporation will hold no incidents of ownership in the second-to-die life insurance policy, and, thus, no incidents of ownership in the policy will be attributable to the surviving spouse. Reg. § 20.2042-1(c)(6) is reproduced in part II.Q.4.i.ii.(b) Corporate Ownership of Policy.

Letter Ruling 9348009 held:

> The facts in this case indicate that the Company's economic interest in the policy is limited to that of irrevocably designated beneficiary of that portion of the proceeds that is equal to the cash surrender of the policy. Additionally, we assume that no agreement or other factors exist that would cause the value of the decedent's stock holdings in the corporation not to be taken into account for purposes of section 2031. Under these circumstance, because the Company possesses no rights the exercise of which would impact that portion of the proceeds payable to a beneficiary other than the Company, the Company cannot be said to possess any incidents of ownership in the policy of the type that would be attributable to the surviving spouse under section 20.2042-1(6) of the regulations.

inaccessible to the owner.[4551] In other words, if the employer is generally the deemed owner but cannot access the cash value, the other party to the split-dollar agreement is deemed to benefit from that cash value if the other party has a current or future right to part of the cash value. Thus, the approach suggested in fn. 4550 risks being recharacterized as being owned by the employee (and therefore the employer's premium being considered paid to the employee to the extent not attributable to the employer's retained rights to absolutely control cash value) unless the split-dollar agreement is absolutely tight about the employer being entitled to the full cash value. For those less than absolutely confident that the agreement, when using the economic benefit regime consider making the case that the entire arrangement is for the employer's business purpose – the employer receives the employer's portion of the death benefit, and the balance of the death benefit was provided through reasonable compensation for valuable services that the insured provided to the employer or through sharing the premium. However, *Morrissette*'s approval of a split-dollar policy as being solely owned by the premium payer (other than current life insurance protection) will boost the confidence of practitioners regarding the ability to draft agreements without risking the named owner being treated as the owner for income and gift tax purposes; see fn. 4538.

For donor-donee arrangements on the life of the insured, naming the donor as owner is not available. If the donor is the insured, one must draw up an absolutely tightly woven split-dollar agreement preventing the donor from having incidents of ownership, if using the economic regime (as in fn. 4538); those who are risk averse should use the loan regime. If the donor is not the insured, preventing the donor from having incidents of ownership is not important; one can then either name the donor as owner to take a conservative approach or, using a tightly woven split-dollar to try to secure valuation discounts,[4552] name the donee as the owner.

Letter Ruling 200728015 involved the following facts:

> Taxpayers A and B, husband and wife, have four adult children. On Date 1, Taxpayers' four children each established an irrevocable trust, Trusts 1-4 (collectively "Trusts"), for the sole benefit of each child's respective descendants. Taxpayers A and B have no beneficial interest in the Trusts. An unrelated third party is the current trustee of the Trusts. In addition, each Taxpayer has renounced the right to serve as trustee of the Trusts.
>
> On Date 2, a trust created under the will of Decedent for the benefit of Taxpayer A loaned $X to each Trust. The Taxpayers represent that they have made no contributions to the Trusts and will make no contributions to the Trusts in the future.
>
> The Trusts purchased a second-to-die life insurance policy (Policy) on the lives of Taxpayers A and B. The Policy lists the Trusts as joint owners and each trust is designated as the beneficiary of 25 percent of the policy proceeds.
>
> On Date 3, Taxpayers and trustees of the Trusts formed a limited partnership under State law (Partnership). The Taxpayers each own a 1% general partnership interest and a 47% limited partnership interest. The Trusts each own a 1% limited partnership interest. On Date 4, prior to January 28, 2002, the Partnership and the Trusts entered into a collateral assignment split-dollar life insurance agreement (Agreement). Under the Agreement, during the joint lives of Taxpayers A and B, the Trusts will pay that portion of

---

[4551] Reg. § 1.61-22(d)(2)(ii) - see fn. 4477 for text of the relevant regulations.
[4552] See fns. 4538-4540.

the annual premium due equal to the insurer's current published premium rate for annually renewable term insurance generally available for standard risks. After the death of the first insured to die, the Trusts will pay the portion of the annual premium equal to the lesser of (i) the applicable amount provided in the P.S. 58 tables set forth in Rev. Rul. 55-747, 1955-2 C.B. 228 or (ii) the insurer's current published premium rate for annually renewable term insurance generally available for standard risks. The Partnership will pay the balance of any premium amount. The Agreement further provides that upon the death of the last to die of Taxpayer A and Taxpayer B, Partnership is to be paid from the Policy proceeds an amount equal to the greater of (i) the cash surrender value of the Policy immediately prior to the death of the survivor of the last to die of Taxpayer A and Taxpayer B, or (ii) the net premiums paid by the Partnership. In the event the Agreement is terminated prior to death of the last to die of Taxpayer A and Taxpayer B, then the Partnership is entitled to receive an amount equal to the cash surrender value of the Policy.

To secure the Partnership's right to repayment, the Trusts executed a collateral assignment of the Policy to the Partnership. The collateral assignment provides that the Trusts shall retain and possess all incidents of ownership, including, the sole and exclusive right to surrender or cancel the policy for its cash surrender value; the right to designate and change the beneficiary of the death benefits; the right to elect and exercise any optional mode of settlement or dividend payment permitted by the Policy; and the sole right to obtain loans secured by the Policy or make withdrawals from the Policy.

It is further represented that on Date 5, a date after September 17, 2003, while Taxpayer A and Taxpayer B were alive, the Agreement was terminated. At the time Agreement was terminated, the Policy had a cash surrender value of zero. Immediately after the Agreement was terminated, as part of a negotiated agreement with the insurance company, the insurance company waived the surrender charges with respect to the Policy, and the Policy was exchanged by the life insurance company for a new policy (Policy 2), a fully paid up policy but with a significantly lower death benefit. The Trusts are listed as the joint owners of Policy 2 and each Trust is listed as the designated beneficiary of 25% of the proceeds.

As to estate tax issues, Letter Ruling 200728015 reasoned and ruled:

Any incidents of ownership in a life insurance policy held by the partnership are effectively held by the partners as individuals. Rev. Rul. 83-147,1983-2 C.B. 158.

In the instant case, Taxpayers did not retain any interests in the Trusts that would cause the corpus of the respective trusts to be included in the Taxpayers' gross estates under section 2036. Further, the Partnership held no incidents of ownership in the Policy under the terms of the Agreement, as described above. See, Rev. Rul. 79-129, 1979-1 C.B. 306. Thus, no incidents of ownership in the Policy or Policy 2 will be attributed to Taxpayers as a result of their ownership interest in the Partnership, nor would Taxpayers be treated as relinquishing any incidents of ownership in the Policy or Policy 2 for purposes of section 2035, if either Taxpayer was to die within three years of the termination of the Agreement on Date 5. No portion of Policy or Policy 2 will be includible in the gross estate of the second to die of Taxpayer A or Taxpayer B.

The collateral assignment that secured the Taxpayers' interest in Letter Ruling 200728015 gave all of the incidents of ownership to the Partnership, other than securing the Taxpayers' interest. This is referred to as a "bare bones" collateral assignment. I have been told that other "bare bones" collateral assignments were in Letter Rulings 9204041, 9511046, 9651030, 9709027, 9808024, 9848011, and 9318009.

Lee Slavutin suggests the following guidelines for drafting generational split dollar agreements:[4553]

1. Clearly state that the purpose of the split dollar agreement is to "fund a permanent life insurance policy for estate liquidity or business succession, for example."

2. Add a preliminary recital that the agreement is intended to qualify as an economic benefit arrangement under Reg. § 1.61-22 and that the ONLY benefit intended to be provided to the "donee" trust is life insurance protection.

3. Do NOT give the donee trust the right to borrow against the cash value.

4. At termination or death, make sure that the donor gets the GREATER of cash value or premiums paid.

5. The donor should be REQUIRED to pay all premiums. The donee has no obligation to pay premiums. If premiums are prepaid, there will be no additional benefit to the donee trust.

6. Do not mention the disposition of the receivable at death. Otherwise, it might be construed as an additional benefit to the donee trust.

II.Q.4.g. Income Tax Trap for Business-Owned Life Insurance

II.Q.4.g.i. Analysis of Code § 101(j)

Beware that an employer-owned life insurance contract might not qualify for the usual exclusion from regular income tax.[4554] An "employer-owned life insurance contract" (a term that applies to much more than one would think) does not receive the exclusion unless certain notice and consent requirements are met.[4555]

An "employer-owned life insurance contract" is a life insurance contract that (i) is owned by a person engaged in a trade or business and under which such person (or certain related party) is directly or indirectly a beneficiary under the contract, and (ii) covers the life of an insured who is an employee with respect to the trade or business of the applicable policyholder on the date the contract is issued.[4556] An "applicable policyholder" means, with respect to any employer-owned

[4553] A Post-*Morrissette* Roadmap for Drafting Intergenerational Split Dollar Agreements, *Steve Leimberg's Estate Planning Email Newsletter* - Archive Message #2414 (5/12/2016).
[4554] Code § 101(j).
[4555] Code § 101(j)(1), (2).
[4556] Code § 101(j)(3)(A).

life insurance contract, the person described in the preceding sentence who owns the contract[4557] at the time it is issued.[4558]

"Employee" includes a "highly compensated employee" under Code § 414(q),[4559] and Code § 414(q)(1)(A) pulls in people who own at least 5% of the company.[4560] Thus, an owner who is not an employee is an "employee" for purposes of this rule by being a 5% owner.[4561]

The notice and consent requirements are met if, before the issuance of the contract, the employee (A) is notified in writing that the applicable policyholder intends to insure the employee's life and the maximum face amount for which the employee could be insured at the time the contract was issued, (B) provides written consent to being insured under the contract and that such coverage may continue after the insured terminates employment, and (C) is informed in writing that an applicable policyholder will be a beneficiary of any proceeds payable upon the death of the employee.[4562] The only way that this requirement makes any sense is if the policy was issued to the person treated as the insured's employer under these rules - this requirement would be impossible to satisfy if it was issued to the insured or someone else because the person treated as an employer might not even know about the policy. Thus, "applicable policyholder" should mean the person to whom the policy is issued when the insured is an "employee" of that person.[4563]

In addition to the notice and consent requirements, either the insured must have a qualifying relationship with the company or the death benefit must be put to certain uses:

[4557] Code § 101(j)(3)(B)(i).

[4558] The qualification at the time it is issued is not mentioned in any particular authority but appears to be implicit in the statutory scheme. See the text accompanying fn. 4563.

[4559] Code § 101(j)(5).

[4560] Code § 414(q)(1), "In general," provides:

> The term "highly compensated employee" means any employee who -
> (A) was a 5-percent owner at any time during the year or the preceding year, or
> (B) for the preceding year -
> (i) had compensation from the employer in excess of $80,000, and
> (ii) if the employer elects the application of this clause for such preceding year, was in the top-paid group of employees for such preceding year.
>
> The Secretary shall adjust the $80,000 amount under subparagraph (B) at the same time and in the same manner as under section 415(d), except that the base period shall be the calendar quarter ending September 30, 1996.

Notice 2018-83 provides that the $80,000 amount is $125,000 for 2019.

[4561] Notice 2009-48, A-8 provides:

> Section 101(j)(4) provides no exception that would excuse a wholly-owned corporation and its employee-owner from the notice and consent requirements that otherwise apply, nor can actual knowledge alone substitute for the statutory requirement that notice and consent be 'written.' Moreover, the requirement that notice and consent be written avoids factual controversies that otherwise could result where, for example, the sole owner of a corporation delegates financial matters to an employee.

[4562] Code § 101(j)(4).

[4563] Notice 2009-48, A-1, further below, clarifies that the person to whom this sentence refers generally is the entity that employs the insured rather than an owner of the entity and that the entity is treated as owning a policy owned by a grantor trust with respect to which the entity is the deemed owner.

- A qualifying relationship includes the insured being an employee, director, or 5% owner at any time during the 12-month period before the insured's death.[4564]

- Another qualifying relationship is if, when the contract is issued, the insured is a director, certain highly compensated employees, or a 5% owner.[4565] (Note that Code § 101(j) does not apply unless the insured is an employee with respect to the trade or business of the applicable policyholder when the contract is issued, so the concern for the qualifying relationship or qualifying use applies only when the insured is an employee who does not satisfy this bullet point when the contract is issued.)[4566]

- A qualifying use is being paid to a member of the family of the insured, any individual who is the designated beneficiary of the insured under the contract (other than the applicable policyholder), a trust established for the benefit of any such member of the family or designated beneficiary, or the estate of the insured.[4567]

- Another qualifying use is the purchase of an equity (or capital or profits) interest in the applicable policyholder from any person described in the preceding bullet point.[4568] Beware of the proceeds exceeding this use.

A life insurance-funded buy-sell agreement might be structured to comply with these rules, in case the parties forget to do the required notice and consent.[4569] It also would guard against

---

[4564] Code § 101(j)(2)(A)(i). The reference to director comes from Code § 101(j)(5), and a 5% owner is described in the text accompanying fns. 4559-4561.

[4565] Code § 101(j)(2)(A)(ii). The reference to a 5% owner is described in the text accompanying fns. 4559-4561. The highly compensated employees are those described in Code § 414(q) (without regard to Code § 414(q)(1)(B)(ii)) or Code § 105(h)(5) (except that 35% is substituted for "25 percent" in Code § 105(h)(5)(C). Code § 414(q)(1) is reproduced in fn 4560 in part II.Q.4.g.i Analysis of Code § 101(j).

[4566] See text accompanying fns. 4556-4558.

[4567] Code § 101(j)(2)(B)(i). "Family member" refers to Code § 267(b)(4).

[4568] Code § 101(j)(2)(B)(ii).

[4569] One might consider provisions such as that found in part II.Q.4.g.ii Consent Integrated into Operating Agreement. The sample is an attempt to be a catch-all in case clients do not follow the recommended procedure. Letter Ruling 201217017 approved what appears to have been a similar provision in a corporate buy-sell agreement:

> … the Agreement provides that Taxpayer will obtain life insurance on the life of each Shareholder, and that Taxpayer will be the owner and beneficiary of such life insurance. If the Agreement is terminated, or a Shareholder disposes of his interest in Taxpayer as allowed by the Agreement, a Shareholder has the right to purchase from Taxpayer any Taxpayer-owned life insurance covering his life. If the life insurance was not purchased, Taxpayer retained the right to surrender or otherwise dispose of the life insurance.

The ruling concluded:

> …considering all of Taxpayer's documentation as a whole, for the Contracts listed in the Appendix, all of the requirements of § 101(j)(4) were met before the issuance of the Contracts:
>
> a) through the Agreement and the Application, each Shareholder was notified in writing that Taxpayer intended to insure the Shareholder's life;
>
> b) through the Application, each Shareholder was notified in writing of the maximum face amount for which the Shareholder could be insured at the time the Contract was issued, in dollars;
>
> c) by signing both the Agreement and the Application, each Shareholder consented to being insured under the Contract;

error in my suggestion that "applicable policyholder" is limited to being the person to whom the policy is issued when the insured is an "employee" of that person.

These rules impose various notice and other requirements that in most cases will not be a practical obstacle to implementing buy-sell agreements if signed before the application is signed.[4570] The employer might be able to cure a failure before the due date of its return for the year in which the policy was issued if the insured has not died yet.[4571] Another cure would be to transfer the policy to the insured, then the insured transfers the policy back to the company (generally, transfers from the insured to the company are not subject to the rule, except with respect to increases in coverage);[4572] step transaction concerns might suggest that the insured transfer the policy into a life insurance LLC[4573] instead of waiting long enough (whatever that means) to avoid an assertion of the step transaction doctrine.

The proposed policy owner should obtain the insured's written consent before the life insurance application is signed.

Consider having the maximum face amount in that consent provide a cushion in excess of the largest amount that the parties can conceive of that death benefit being (including increased death benefits due to investing the cash value very successfully).

An insurance agent might provide such a consent form, which counsel should consider reviewing, or counsel could provide his/her own consent form to the client. Although some agents understand these issues, many agents do not know (or think they know but actually

---

d) by signing the Agreement, each Shareholder consented that such coverage may continue after the Shareholder terminates employment; and

e) through the Agreement and the Application, each Shareholder was informed in writing that Taxpayer will be a beneficiary of any proceeds payable upon the death of the Shareholder.

[4570] Leimberg and Zaritsky, IRS Provides New and Substantial Guidance on Employer-Owned Life Insurance, 36 *Estate Planning*, No. 8, 3 (August 2009).

[4571] Notice 2009-48, A-13 provides:

> Section 101(j) does not contain a provision for correcting an inadvertent failure to satisfy the notice and consent requirements of § 101(j)(4). The Service will not, however, challenge the applicability of an exception under § 101(j)(2) based on an inadvertent failure to satisfy the notice and consent requirements if the following conditions are met: (1) the applicable policyholder made a good faith effort to satisfy those requirements, such as by maintaining a formal system for providing notice and securing consents from new employees; (2) the failure to satisfy the requirements was inadvertent; and (3) the failure to obtain the requisite notice and consent was discovered and corrected no later than the due date of the tax return for the taxable year of the applicable policyholder in which the employer-owned life insurance contract was issued. Because § 101(j)(4)(B) requires that the employee's consent be written, failure to obtain such consent cannot be corrected after the insured employee has died.

[4572] Notice 2009-48, Q/A-8 provides:

> Q-8. Is notice and consent required with regard to an existing life insurance contract that an employee irrevocably transfers to an employer?
>
> A-8. No. The actual transfer of an existing life insurance contract by an employee to an employer is sufficient to satisfy the requirements that the employee be notified in writing of the intention to insure and the maximum face amount of insurance, that written consent be secured, and that the employee be notified that the employer will be a beneficiary upon his or her death. In the event the employer subsequently increases the face amount of the contract, however, written notice and consent must be secured to establish the requisite notice to the employee and consent to the new face amount.

[4573] See part II.Q.4.i Life Insurance LLC.

misunderstand) these rules. Accordingly, tax advisors should consider warning their clients that the tax advisors need to be involved <u>before</u> any policy is issued.

Every applicable policyholder owning one or more employer-owned life insurance contracts issued after August 17, 2006 is required to file IRS Form 8925 each year.[4574] "Applicable policyholder" and "employer-owned life insurance contract" are defined for purposes of this reporting rule the same way they are for determining whether a policy is subject to the notice and consent rules.[4575]

These rules for life insurance contracts issued or materially changed after August 17, 2006.[4576] Notice 2009-48 elaborates on the rules described above, as well as providing rules for what constitutes a material modification,[4577] including guidance on tax-free exchanges.[4578]

As to buy-sell agreements, Notice 2009-48 provides that a contract that is owned by the owner of an entity engaged in a trade or business (such as for purposes of financing the purchase of an equity interest of another owner – in other words, a cross-purchase - is not subject to these rules.[4579] However, if the business owns it,[4580] the following rules apply (emphasis added):[4581]

[4574] Code § 6039I(a) is the general reporting requirement, and Reg. § 1.6039I-1 specifies the form.

[4575] Code § 6039I(c).

[4576] P.L. 109-280, Sec. 863(a). Changing a split-dollar agreement without changing the underlying policy will not constitute a material modification under Code § 101(j), although it might very well affect other tax treatment. Notice 2008-42, discussed in part II.Q.4.f.i Split-Dollar Generally, especially the text accompanying fns. 4455-4457.

[4577] Notice 2009-48, A-14 provides:

> The following changes are not treated as material changes for purposes of determining whether an existing contract is treated as a new contract for purposes of § 101(j): (1) increases in death benefit that occur as a result of either the operation of § 7702 or the terms of the existing contract (provided the insurer's consent to the increase is not required); (2) administrative changes; (3) changes from general account to separate account or from separate account to general account; or (4) changes as a result of the exercise of an option or right granted under the contract as originally issued. Thus, for example, a death benefit increase does not cause a contract to be treated as a new contract if the increase is necessary to keep the contract in compliance with § 7702, or if the increase results from the application of policyholder dividends to purchase paid-up additions, or if the increase is the result of market performance or contract design with regard to a variable contract. Notice and consent are required if a contract is treated as a new contract by reason of a material increase in death benefit or other material change, unless a valid consent remains in effect with regard to the insured.

[4578] Notice 2009-48, A-15 provides:

> Section 863(d) of the PPA provides that § 101(j) generally does not apply to a contract issued after August 17, 2006 in an exchange described in § 1035 for a contract issued on or before that date. Section 863(d) also provides that, for purposes of determining when a contract is issued, a material increase in the death benefit or other material change generally causes the contract to be treated as a new contract. A § 1035 exchange that results in a material increase in death benefit or other material change (other than a change in issuer) is treated as the issuance of a new contract after August 17, 2006 for purposes of determining whether § 101(j) applies to the contract.

[4579] A-1.

[4580] Including through a grantor trust that the business established, per A-1.

[4581] After A-3 and before Q-4.

Exceptions to the Application of § 101(j)(1)

Section 101(j)(2) provides several exceptions to the application of § 101(j)(1), ***provided the notice and consent requirements of § 101(j)(4) are met***. Specifically, under § 101(j)(2)(A), § 101(j)(1) does not apply if the insured either was an employee at any time during the 12-month period before death, or was a director, highly compensated employee or highly compensated individual, as defined, at the time the contract was issued. Under § 101(j)(2)(B), § 101(j)(1) does not apply to any amount received by reason of the death of an insured to the extent the amount is paid to or used to purchase an equity (or capital or profits) interest from a family member of the insured, an individual who is a designated beneficiary, a trust established for the benefit of a family member or designated beneficiary, or the estate of the insured.

If plans do change, the Notice allows consent to be given before the death benefit exceeds the amount shown in the consent. The Notice also provides for a change in the employer.

The Notice further provides:

Q-1. Can a contract be an employer-owned life insurance contract if it is owned not by a person engaged in a trade or business, but by a related person who is not engaged in a trade or business?

A-1. No. A contract is an employer-owned life insurance contract only if it is owned by a person engaged in a trade or business and is otherwise described in § 101(j)(3). Thus, a contract that is owned by the owner of an entity engaged in a trade or business (such as for purposes of financing the purchase of an equity interest of another owner), or by a qualified plan or VEBA that is sponsored by an entity engaged in a trade or business, is not an employer-owned life insurance contract. A contract, however, that is owned by a grantor trust (such as a rabbi trust), assets of which are treated as assets of a grantor that is engaged in a trade or business, is an employer-owned life insurance contract if the contract is otherwise described in § 101(j)(3).

Q-2. Can a contract be an employer-owned life insurance contract if it is subject to a split dollar arrangement?

A-2. Yes. A contract that is subject to a split dollar arrangement is an employer-owned life insurance contract if the contract is owned by a person engaged in a trade or business and is otherwise described in § 101(j)(3). See § 1.61-22(c)(1) (defining the owner of a contract subject to a split dollar arrangement to be the person named as the policy owner of the contract). Under § 101(j)(2)(B), however, the general rule of § 101(j)(1) does not apply to the extent any amount received by reason of the death of the insured is paid to a family member of the insured, an individual who is a designated beneficiary, a trust established for the benefit of a family member or designated beneficiary.

Q-3. Is a contract an employer-owned life insurance contract if it is owned by a partnership or sole proprietorship that is engaged in a trade or business; the partnership or sole proprietorship is directly or indirectly a beneficiary under the contract; and, the contract covers the life of an insured who is an employee with respect to the trade or business on the date the contract is issued?

A-3. Yes. If a life insurance contract is otherwise described in § 101(j)(3), ownership of the contract by a partnership or sole proprietorship does not prevent the contract from being treated as an employer-owned life insurance contract. A life insurance contract that is owned by a sole proprietor on his or her own life is not, however, an employer-owned life insurance contract.

Q-4. Under § 101(j)(2)(A) and (j)(4), when is a contract treated as "issued" for purposes of determining whether the notice and consent are timely, or whether the insured is a director, a highly compensated employee, or a highly compensated individual at the time the contract is issued?

A-4. Generally, the issue date of a contract is the date on the policy assigned by the insurance company, which is on or after the date the application was signed. Solely for purposes of § 101(j)(2)(A) and (j)(4), an employer-owned life insurance contract is treated as "issued" on the later of (1) the date of application for coverage, (2) the effective date of coverage, or (3) the formal issuance of the contract. Thus, if an employer-owned life insurance contract is effective for a limited period of time before formal issuance of the contract (such as to complete underwriting), the notice and consent requirements may be satisfied during the period between the effective date of coverage and formal issuance of the contract. In addition, an employer-owned life insurance contract may be treated as a new contract, and thus newly "issued," by reason of a material increase in death benefit or other material change in the contract. See A-14, this Notice.

Q-5. For purposes of § 101(j), is the term "employee" limited to common law employees?

A-5. No. Section 101(j)(5)(A) provides that the term "employee" includes an officer, director, and highly compensated employee (within the meaning of § 414(q)). A director is an independent contractor in his or her capacity as a director.

Section 414(q) contains special rules relating to certain former employees and self-employed individuals. For example, a former employee is treated as a highly compensated employee (within the meaning of § 414(q)) if the individual was a highly compensated employee when he separated from service, or was a highly compensated employee at any time after attaining age 55. In addition, the term "employee" for purposes of § 414(q) includes an individual who is a self-employed individual who is treated as an employee pursuant to § 401(c)(1).

Although policies used to fund redemptions are subject to the notice and consent rules if the insured is either an employee or holds at least 5% ownership, an exception applies if and to the extent that the company uses the policy to redeem the insured's stock shortly after death:

A-6. In order to know whether an amount received as a death benefit under an employer-owned life insurance contract is eligible for exclusion from gross income under § 101(a), or is ineligible for exclusion under the general rule of § 101(j)(1), it is necessary to determine the availability of the exception for amounts used to purchase an equity (or capital or profits) interest in the applicable policyholder. Accordingly, an amount must be so paid or used by the due date, including extensions, of the tax return for the taxable year of the applicable policyholder in which the applicable policyholder is treated as receiving a death benefit under the contract.

I insist on notice and consent - even for redemption arrangements - because the purchase might not be completed within that deadline, the parties might later all agree that the money would be better used in the business, or the death benefit might exceed the purchase price.

II.Q.4.g.ii. Consent Integrated into Operating Agreement

As with any sample, consultation with a qualified tax advisor and a lawyer are required before using the sample below. See fn. 4569 for authority for relying on such a provision; however, I recommend obtaining a separate notice and consent for more direct evidence to show the IRS. The rest of this part II.Q.4.g.ii is the sample:

The Company or Members may from time to time obtain life insurance policies on the lives of the Members. In the event those policies fall within the definition of "employer-owned life insurance policies" as defined in Code section 101(j), it is intended that the policies qualify for an exclusion from those rules (and thus the proceeds will be income tax-free) and that this Operating Agreement comply with the notice and consent requirements necessary to obtain that exclusion. Therefore, each Member is hereby given written notice that the Company or Members intend to insure his or her life by purchasing life insurance policy(ies) in the maximum face amount of $___________, and that the Company or Members will be the owner and beneficiary of that policy and of any proceeds payable on such Member's death. Each Member (by signing this Operating Agreement) hereby gives advance written consent to being insured under such policy(ies) and to the continuation of the policy(ies) after such Member ceases to have an Interest in the Company or otherwise terminates employment (as defined in Code section 101(j)(4)(B)) with the Company (and no inference is intended that a Member is an "employee" for any purposes other than the possible application of Code section 101(j)). The Members also agree to enter into a specific notice and consent containing these terms with regard to each policy obtained before the issuance of that policy.

II.Q.4.g.iii. Consent for Owner Who Is Not an Employee

As mentioned in part II.Q.4.g.i, a person owning at least 5% of a company is treated as an employee for purposes of this rule, even if that person not an employee. The rest of this part II.Q.4.g.iii is a sample. As with any sample, consultation with a qualified tax advisor and a lawyer are required before using the sample below.

Notice and Consent

For _____ Owner

Under I.R.C. Section 101(j)(4)

I acknowledge notification that ______________ (the "Employer") intends to obtain a policy insuring my life with a maximum face amount of $_______. Although the Employer does not employ me, I understand that my ownership in the Employer makes me considered an "employee" for purposes of I.R.C. Section 101(j). Therefore:

(A) I acknowledge that the Employer intends to insure my life regarding the death benefits listed in the attached schedule.

(B) I consent to being insured under these contracts and that such coverage may continue after I no longer own an interest in the Employer or otherwise terminate employment.

(C) I understand that the Employer will be a beneficiary of any proceeds payable upon my death.

[add signature line and date, dated on before policy issuance]

II.Q.4.g.iv. Consent for an Employee

The rest of this part II.Q.4.g.iv is a sample. As with any sample, consultation with a qualified tax advisor and a lawyer are required before using the sample below.

Notice and Consent

For _______ Employee

Under I.R.C. Section 101(j)(4)

I acknowledge notification that ____________ (the "Employer") intends to obtain a policy insuring my life with a maximum face amount of $_______, and:

(A) I acknowledge that the Employer intends to insure my life regarding the death benefits listed in the attached schedule.

(B) I consent to being insured under these contracts and that such coverage may continue after I terminate employment.

(C) I understand that the Employer will be a beneficiary of any proceeds payable upon my death.

[add signature line and date, dated on before policy issuance]

II.Q.4.h. Establishing Estate Tax Values

For estate tax purposes, fair market value is defined as "the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or to sell and both having reasonable knowledge of relevant facts."[4582] If a decedent owns voting and nonvoting shares, the shares are valued together as a single block.[4583]

Suppose a company is worth $4M and A owns 75% of the company. Perhaps A's estate would want to be bought out for $3M, which is 75% of $4M.

Suppose the company then buys a $3M policy insuring A's life, so it could buy A's interest when A dies. On A's death, however, the company is worth $7M – the sum of its $4M normal value and $3M of life insurance. Should the company have to pay 75% of $7M for A's interest, because of this life insurance? That higher price certainly would not honor the parties' intent. If

---

[4582] Reg. § 20.2031-1(b). Rev. Rul. 59-60 and its progeny discuss valuation principles.
[4583] *Ahmanson Foundation v. United States*, 674 F.2d 761 (9th Cir. 1981).

the parties agree that A's estate gets $3M instead of 75% of $7M, does that mean that A has bequeathed the difference to the company's other owners? Imposing estate tax on A's estate for money that the estate will never receive is certainly an unfair result. On the other hand, if the company's other owner was A's son or some other natural object of A's bounty, then perhaps A's goal was essentially to bequeath the difference to that other owner. In the latter case, A's estate should pay estate tax on the difference and – depending on A's intent – perhaps recover the extra estate tax from that other owner.

How does the estate tax system differentiate between these situations? Regarding buy-sell agreements, Reg. § 20.2031-2(h), "Securities subject to an option or contract to purchase," provides:

> Another person may hold an option or a contract to purchase securities owned by a decedent at the time of his death. The effect, if any, that is given to the option or contract price in determining the value of the securities for estate tax purposes depends upon the circumstances of the particular case. Little weight will be accorded a price contained in an option or contract under which the decedent is free to dispose of the underlying securities at any price he chooses during his lifetime. Such is the effect, for example, of an agreement on the part of a shareholder to purchase whatever shares of stock the decedent may own at the time of his death. Even if the decedent is not free to dispose of the underlying securities at other than the option or contract price, such price will be disregarded in determining the value of the securities unless it is determined under the circumstances of the particular case that the agreement represents a bona fide business arrangement and not a device to pass the decedent's shares to the natural objects of his bounty for less than an adequate and full consideration in money or money's worth. See section 2703 and the regulations at § 25.2703 of this chapter for special rules involving options and agreements (including contracts to purchase) entered into (or substantially modified after) October 8, 1990.

Thus, a buy-sell or similar agreement must apply during a decedent's life as well as after death before it might be given effect. Recent cases have reaffirmed this requirement.[4584] If a buy-sell agreement is held to have testamentary intent rather than a legitimate business purpose, a bargain sale may constitute a gift.[4585]

Reg. § 20.2031-2(h) is not the only hurdle. For purposes of gift, estate and GST tax, Code § 2703(a) provides that the value of any property shall be determined without regard to:

[4584] *True v. Commissioner*, 390 F.3d 1210 (10th Cir. 2004); *Estate of Blount*, T.C. Memo. 2004-116, *aff'd* in part, *rev'd* in part, 428 F.3d 1338 (11th Cir. 2005) (life insurance included in valuing company, but the Eleventh Circuit treated the buy-sell obligation as offsetting the inclusion); *Smith III v. U.S.*, 96 A.F.T.R.2d 2005-6549 (W.D. Pa. 2005). In a case citing *True* but taking an unusual tack, in *Huber v. Commissioner*, T.C. Memo. 2006-96, the IRS tried to use a buy-sell agreement against a taxpayer, but Judge Goeke ruled that a right of first refusal in the agreement did not increase the value of the subject stock. Not mentioned in the Huber opinion is that, according to one of the taxpayer's counsel, prior gift tax audits had accepted the taxpayer's appraisals or settled very close to it, so the IRS' posture was radically different than before. In *Estate of Cartwright v. Commissioner*, 183 F.3d 1034 (9th Cir. 1999), *aff'g* in part and *rev'g* in part T.C. Memo. 1996-286, life insurance proceeds did not increase the value of the decedent's interest in the law firm to which he had belonged, except as necessary to take into account advanced client costs and work in process pursuant to the buy-sell agreement.

[4585] See quote from *Estate of Lauder v. Commissioner*, T.C. Memo. 1994-527, in the text preceding fn 3790 in part II.O.2.c Effect of Buy-Sell Agreement on Marital Deduction.

(1) any option, agreement, or other right to acquire or use the property at a price less than the fair market value of the property (without regard to such option, agreement, or right), or

(2) any restriction on the right to sell or use such property.

Thus, when a parent transfers an equity interest to a child pursuant to a legally binding stock option or buy-sell agreement, generally for gift, estate and GST tax purposes the parent is deemed to make a taxable transfer to the extent that the equity interest's value exceeds the payment under that agreement. Reg. § 25.2703-1(a)(3) provides:

> A right or restriction may be contained in a partnership agreement, articles of incorporation, corporate bylaws, a shareholders' agreement, or any other agreement. A right or restriction may be implicit in the capital structure of an entity.

A waiver of the right to partition art was disregarded under Code § 2703(a)(2).[4586]

However, Code § 2703(b) provides that Code § 2703(a) does not apply to any option, agreement, right, or restriction which meets each of the following requirements:

(1) It is a bona fide business arrangement.[4587]

[4586] *Elkins v. Commissioner*, 140 T.C. No. 5 (2013).

[4587] *Holman v. Commissioner*, 130 T.C. 170 (2008) held:

> We believe that [the transfer restrictions] were designed principally to discourage dissipation by the children of the wealth that Tom and Kim had transferred to them by way of the gifts. The meaning of the term bona fide business arrangement in section 2703(b)(1) is not self-apparent. As discussed supra, in *Estate of Amlie v. Commissioner*, T.C. Memo. 2006-76, we interpreted the term bona fide business arrangement to encompass value-fixing arrangements made by a conservator seeking to exercise prudent management of his ward's minority stock investment in a bank consistent with his fiduciary obligations to the ward and to provide for the expected liquidity needs of her estate. Those are not the purposes of [the transfer restrictions]. There was no closely held business here to protect, nor are the reasons set forth in the Committee on Finance report as justifying buy-sell agreements consistent with petitioners' goals of educating their children as to wealth management and disincentivizing them from getting rid of Dell shares, spending the wealth represented by the Dell shares, or feeling entitled to the Dell shares.

The court had cited this portion of the legislative history (an informal report of the Senate Committee on Finance):

> [Buy-sell agreements] are common business planning arrangements … that … generally are entered into for legitimate business reasons…. Buy-sell agreements are commonly used to control the transfer of ownership in a closely held business, to avoid expensive appraisals in determining purchase price, to prevent the transfer to an unrelated party, to provide a market for the equity interest, and to allow owners to plan for future liquidity needs in advance….

The Eighth Circuit affirmed, 601 F.3d 763 (2010):

> Here that context shows that the Tax Court correctly assessed the personal and testamentary nature of the transfer restrictions. Simply put, in the present case, there was and is no business, active or otherwise. The donors have not presented any argument or asserted any facts to distinguish their situation from the use of a similar partnership structure to hold a passbook savings account, an interest-bearing checking account, government bonds, or cash. We and other courts have held that maintenance of family ownership and control of [a] business may be a bona fide business purpose. *St. Louis County Bank*, 674 F.2d at 1207; see also *Estate of Bischoff v. Commissioner*, 69 T.C. 32,

39–40 (1977). We have not so held, however, in the absence of a business. [footnote described below]

That is not to say we necessarily believe it will always be easy to apply § 2703(b)(1) or that investment-related activities cannot satisfy the subsection (b)(1) test. When the restrictions at issue, however, apply to a partnership that holds only an insignificant fraction of stock in a highly liquid and easily valued company with no stated intention to retain that stock or invest according to any particular strategy, we do not view this determination as difficult. See, e.g., *Higgins v. Commissioner*, 312 U.S. 212, 217–18 (1941) (holding in another context that merely keeping records and collecting interest and dividends did not amount to carrying on a business); *Estate of Thompson v. Commissioner*, 382 F.3d 367, 380 (3d Cir. 2004) (Other than favorable estate tax treatment resulting from the change in form, it is difficult to see what benefit could be derived from holding an untraded portfolio of securities in this family limited partnership with no ongoing business operations.).

In footnote 3 discussing the *St. Louis County Ban*k case, 674 F.2d 1207 (8th Cir. 1982), the court pointed out:

In *St. Louis County Bank*, for example, the transferred interests were shares in a family company that had started out as a moving, storage, and parcel-delivery business and evolved into a real estate management company. *St. Louis Bank*, 674 F.2d at 1208–09. When engaged in the moving and storage business, the company had created a stock-purchase agreement based on a valuation formula keyed to income. *Id*. At 1209. Later, the family exited the moving and storage business but kept the business structure as a vehicle for renting real estate. *Id*. With this new activity, the formula resulted in a dramatically lower value. *Id*. We stated, We have no problem with the District Court's findings that the stock-purchase agreement provided for a reasonable price at the time of its adoption, and that the agreement had a bona fide business purpose—the maintenance of family ownership and control of the business. Courts have recognized the validity of such a purpose. *Id*. at 1210.

Judge Beam offered a strong dissent:

Here, the Tax Court made the express factual determination that the partnership agreement restrictions were designed principally to protect family assets from dissipation by the Holman daughters. *Holman*, 130 T.C. at 195 (emphasis added). In other words, the Tax Court determined that the restrictions were designed primarily to serve a non-tax purpose. Notably, the Tax Court did not find that the Holmans merely paid lip service to legitimate business purposes for the restrictions while, in reality, using the restrictions for the primary purpose of avoiding taxes. [footnote omitted] Additionally, the Tax Court did not find that the restrictions failed to match the partnership's legitimate, non-tax goals. [footnote omitted] The underlying purposes of § 2703 are not served where, as here, the bona fide business arrangement test is applied in a manner that discourages partners in family partnerships from creating restrictions principally to achieve non-tax, economic goals. Thus, I would hold that the Holman partnership agreement restrictions are bona fide business arrangements because they were not created for the primary purpose of avoiding taxes, and they served the following legitimate business purposes: (1) maintaining family control over the right to participate as a limited partner; (2) maintaining family control over the right to receive income from the partnership's investment assets; (3) protecting partnership assets from creditors and potential future ex-spouses; and (4) preserving the partners' fundamental right to choose who may become a partner.

…Under § 2703(b)(3)'s comparable terms test, the Holman partnership restrictions' terms must be comparable to similar arrangements entered into by persons in an arms' length transaction. While the Tax Court did not decide whether the restrictions satisfied the comparable terms test, it noted that both parties' experts agree that transfer restrictions comparable to those found in [the Holman partnership agreement] are common in agreements entered into at arm's length. [footnote omitted] Holman, 130 T.C. at 198–99. The Tax Court explained that this would seem to be all that [the Holmans] need to show to satisfy section 2703(b)(3). Id. at 199. I agree, and I would hold that the Holman partnership restrictions satisfy § 2703(b)(3)'s comparable terms test. Thus, because the partnership restrictions satisfy all three of § 2703(b)'s tests, I would reverse and remand to the Tax Court for a valuation of the limited partnership interests that does not disregard the partnership restrictions.

The U.S. District Court for the Southern District of Indiana, following *Holman*, held that holding undeveloped land did not constitute a business that could qualify for the Code § 2703 safe harbor. *Fisher*

(2) It is not a device to transfer such property to members of the decedent's family for less than full and adequate consideration in money or money's worth.[4588]

---

v. U.S., 106 A.F.T.R.2d 2010-6144. The court later ruled that the taxpayer could not introduce into evidence the discounts that the IRS had used on audit, ruling that the IRS' audit determination was irrelevant to determining the actual value. 106 A.F.T.R.2d 2010-6144.

For an in-depth discussion of the facts of some of these cases, see Aghdami, Mancini, & Zaritsky, *Structuring Buy-Sell Agreements*, ¶ 6.02[4] Restriction on Lifetime Transfer.

[4588] Judge Beam's dissent in *Holman v. Commissioner*, 601 F.3d 763 (2010), argued that "decedent" in Code § 2703(b)(2) means it does not apply to gifts:

> Having determined that the partnership restrictions satisfy § 2703(b)(1), I now turn to § 2703(b)(2)'s device test. Under this test, the Holman partnership restrictions must not be a device to transfer such property to members of the decedent's family for less than full and adequate consideration in money or money's worth. I.R.C. § 2703(b)(2) (emphasis added). Treasury Regulation § 25.2703-1(b)(1)(ii) excises the phrase members of the decedent's family found in § 2703(b)(2) and substitutes in its place the phrase natural objects of the transferor's bounty, apparently because the Secretary of the Treasury interprets § 2703(b)(2) to apply to both inter vivos transfers and transfers at death. Holman, 130 T.C. at 195–96. Applying this regulation, the Tax Court held that the Holman partnership restrictions operate as a device to transfer property to the natural objects of the Holmans' bounty. The Holmans argue that Treasury Regulation § 25.2703-1(b)(1)(ii) is invalid because it fails to give effect to § 2703(b)(2)'s plain language. I agree. [discusses Chevron deference] The parties primarily dispute whether § 2703(b)(2) is ambiguous. The Holmans assert that the term decedent unambiguously refers to a deceased person and, therefore, § 2703(b)(2) asks only whether restrictions operate as a device to transfer property to family members at death. The Holmans point out that only the term decedent, not the broader term transferor, is used throughout § 2703(b)(2)'s legislative history. Conversely, the Commissioner argues that the term decedent is ambiguous due to § 2703's location in the Internal Revenue Code. Specifically, § 2703 is located in Subtitle B of the Code, which includes three transfer taxes—the estate, gift and generation-skipping transfer taxes. More precisely, § 2703 is located in Subtitle B, Chapter 14. In Chapter 14, § 2703 joins a set of special valuation rules targeting transfer tax avoidance schemes. It is clear that the phrase members of the decedent's family unambiguously limits § 2703(b)(2)'s application to transfers at death. First, the term decedent is itself unambiguous. *Black's Law Dictionary* 465 (9th ed. 2009) plainly defines decedent as [a] dead person. Moreover, the phrase members of decedent's family is not ambiguous when read in the greater context of Chapter 14. While Congress used the term decedent in § 2703(b)(2), it used the broader term transferor in Chapter 14's other valuation statutes. See I.R.C. §§ 2701(a)(1) & 2702(a)(1). And, as the Holmans point out, the term decedent consistently appears in § 2703(b)(2)'s legislative history. Finally, I find it telling that members of Congress have failed in their attempts to amend § 2703(b)(2) by substituting the legislative phrase members of the decedent's family with the Commissioner's phrase natural objects of the transferor's bounty. See *Smith v. United States*, No. C.A. 02-264 ERIE, 2004 WL 1879212, at 6 n.3 (W.D. Pa. June 30, 2004). Thus, although Congress enacted Chapter 14 to generally address transfer tax avoidance schemes, § 2703(b)(2) applies specifically to transfers at death. Therefore, Treasury Regulation § 25.2703-1(b)(1)(ii) is invalid because it does not give effect to the plain language of § 2703(b)(2). Since the Holmans are living persons, they are, by definition, not decedents and § 2703(b)(2)'s device test is satisfied.

Kress v. U.S., 123 AFTR 2d 2019-1224 (E.D. Wis. 3/26/2019), held that Code § 2703(b)(2) does not apply to gifts (highlighting added):

> Under the second requirement, the Restriction cannot be "a device to transfer such property to members of the decedent's family for less than full and adequate consideration in money or money's worth." § 2703(b)(2). Citing Treasury Regulation § 25.2703–1, the Government contends that this second requirement applies not only to transfers at death but also to inter vivos transfers. See 26 C.F.R. § 25.2703–1(b)(1)(ii) ("The right or restriction is not a device to transfer property to the natural objects of the transferor's bounty for less than full and adequate consideration in money or money's worth."). The Government argues that the term "decedent" in § 2703(b)(2) is ambiguous in

(3) Its terms are comparable to similar arrangements entered into by persons in an arms' length transaction.

One way to satisfy this exception is if the entity is not family owned, using Code § 2701 principles:[4589]

> A right or restriction is considered to meet each of the three requirements … if more than 50 percent by value of the property subject to the right or restriction is owned directly or indirectly (within the meaning of § 25.2701-6) by individuals who are not members of the transferor's family. In order to meet this exception, the property owned by those individuals must be subject to the right or restriction to the same extent as the property owned by the transferor. For purposes of this section, members of the transferor's family include the persons described in § 25.2701-2(b)(5) and any other individual who is a natural object of the transferor's bounty. Any property held by a member of the transferor's family under the rules of § 25.2701-6 (without regard to § 25.2701-6(a)(5)) is treated as held only by a member of the transferor's family.

If the entity does not satisfy this non-family-controlled test, then one must satisfy each of the above three exceptions separately. The Code § 2703(b)(3) comparability test, which is the main test that Code § 2703 added to pre-1990 law, uses the following principles:[4590]

(i) In general. A right or restriction is treated as comparable to similar arrangements entered into by persons in an arm's length transaction if the right or restriction is one that could have been obtained in a fair bargain among unrelated parties in the same business dealing with each other at arm's length. A right or restriction is considered a fair bargain among unrelated parties in the same business if it conforms with the general practice of unrelated parties under negotiated agreements in the same

---

light of the statute's place within Subtitle B, Chapter 14 of the Internal Revenue Code, which includes other valuation rules targeting transfer avoidance schemes, and thus the court should defer to the agency's interpretation of the statute.…

Although Chapter 14 is intended to generally address transfer tax avoidance schemes, it is clear from the statute itself that the phrase "members of the decedent's family" unambiguously limits its application to transfers at death. See Black's Law Dictionary (10th ed. 2014) (defining "decedent" as a "dead person, especially one who has died recently"); see also *Smith v. United States*, No. C.A. 02-264 ERIE, 2004 WL 1879212, at *6 (W.D. Pa. June 30, 2004) (noting that "one of Congress's primary concerns [in enacting § 2703(b)(2)] was the free passage of wealth to family members through a device that is testamentary in nature"). Although Congress has attempted to amend § 2703(b)(2) to conform with the agency regulations, no such legislation has been enacted. See *Smith*, 2004 WL 1879212, at *6 n.3 (citing HR Conf. Rep. 1555, 102d Cong., 1st Sess. (1991); The Revenue Bill of 1992, HR Conf. Rep. 11, 102d Cong., 2d Sess. (1992)); see also *Holman*, 601 F.3d at 781 (Bean, J., dissenting) ("I find it telling that members of Congress have failed in their attempts to amend § 2703(b)(2) by substituting the legislative phrase `members of the decedent's family' with the Commissioner's phrase `natural objects of the transferor's bounty.'").

In short, I find that Congress has spoken unambiguously to the precise question at issue: § 2703(b)(2) applies specifically to transfers at death. Because Plaintiffs gifted their shares to their family members as living persons, they are, by definition, not decedents. Therefore, § 2703(b)(2) is satisfied. But even were I to conclude that § 2703(b)(2) does apply to inter vivos transfers, this would not change the result. For as noted above, the family transfer restrictions serve the bona fide purpose of maintaining family ownership and control of the business, and were not intended as a tax avoidance device.

[4589] Reg. § 25.2703-1(b)(3).

[4590] Reg. § 25.2703-1(b)(4).

business. This determination generally will entail consideration of such factors as the expected term of the agreement, the current fair market value of the property, anticipated changes in value during the term of the arrangement, and the adequacy of any consideration given in exchange for the rights granted.

(ii) Evidence of general business practice. Evidence of general business practice is not met by showing isolated comparables. If more than one valuation method is commonly used in a business, a right or restriction does not fail to evidence general business practice merely because it uses only one of the recognized methods. It is not necessary that the terms of a right or restriction parallel the terms of any particular agreement. If comparables are difficult to find because the business is unique, comparables from similar businesses may be used.

The Tax Court, convinced that the taxpayer's buy-sell agreement was arrived upon in a manner intended to arrive at fair market value, applied the comparability test in *Estate of Amlie*:[4591]

> For the reasons discussed below, we conclude that the estate has satisfied section 2703(b)(3). By its terms, the statute requires only a showing that the agreement's terms are "comparable" to similar arrangements entered at arm's length. While the regulations caution against using "isolated comparables", we believe that in context the regulations delineate more of a safe harbor than an absolute requirement that multiple comparables be shown.

Even if the above rules are not complied with, obligations do tend to affect a stock's marketability,[4592] in that they cloud the business' future operations.[4593] In reversing the Tax Court,[4594] *Estate of Blount*, 428 F.3d 1338 (11th Cir. 2005) held:

> To establish the fair market value of BCC, the Tax Court blended the analyses of the experts to arrive at a value of $6.75 million. The IRS and the Taxpayer, albeit alternatively, agree that this is the base value for the assets and liabilities of BCC as of the date of Blount's death. We accept the accuracy of this value as not clearly erroneous. The Tax Court then added the insurance proceeds that BCC would receive on Blount's death to the value of the company, concluding that the value of BCC would have been $9.85 million. In doing so, the Tax Court erred.
>
> In valuing the corporate stock, "consideration shall also be given to nonoperating assets, including proceeds of life insurance policies payable to or for the benefit of the company, to the extent that such nonoperating assets have not been taken into account in the determination of net worth." Treas. Reg. § 20.2031-2(f)(2). The limiting phrase, "to the extent that such nonoperating assets have not been taken into account," however, precludes the inclusion of the insurance proceeds in this case. In *Cartwright v. Commissioner*, the Ninth Circuit approved deducting the insurance proceeds from the value of the organization when they were offset by an obligation to pay those proceeds

[4591] T.C. Memo. 2006-76.

[4592] Rev. Rul. 77-287 explains valuation adjustments due to stock being restricted from resale pursuant to Federal securities laws.

[4593] *True v. Commissioner*, 390 F.3d 1210 (10th Cir. 2004), citing *Estate of Lauder v. Commissioner*, T.C. Memo. 1994-527, for the concept that, even if a provision does not bind the IRS as to estate tax value, it can still affect its value.

[4594] T.C. Memo. 2004-116.

to the estate in a stock buyout. 183 F.3d 1034, 1038] (9th Cir. 1999)[5] ; see also *Huntsman v. Comm'r*, 66 T.C. 861, 875 (1976)[6].

[5] The Ninth Circuit observed that the Tax Court "properly determined that [the] insurance policy would not necessarily affect what a willing buyer would pay for the firm's stock because it was offset dollar-for-dollar by [the] obligation to pay out the entirety of the policy benefit's to [the] estate." *Cartwright*, 183 F.3d at 1038.

[6] The Tax Court focused on the word "consideration" to make its judgment about including life insurance proceeds: "The Commissioner argues that our interpretation of section 20.2031-2(f), Estate Tax Regs., frustrates the clear intent of Congress to include corporate-owned life insurance in the estate of its sole shareholder. See H. Rept. No. 2333, 77th Cong., 1st Sess. (1942), 1942-2 C.B. 372, 491; S. Rept. No. 1631, 77th Cong., 2d Sess. (1942) 1942-2 C.B. 504, 677. However, the statements in the legislative history relied upon by the Commissioner indicate only that Congress believed that a sole shareholder was deemed to have the incidents of ownership possessed by his corporation on insurance policies on his life. The regulations now provide that the incidents of ownership held by a corporation are not to be attributed to its shareholder, and no indication is included in the committee reports that Congress intended property owned by a decedent to be includable in his gross estate at other than its fair market value. Consequently, our interpretation of such section does not frustrate a congressional intent. In accordance with section 20.2031-2(f), Estate Tax Regs., we must determine the fair market value of the decedent's stock in the two corporations by applying the customary principles of valuation and by giving "consideration" to the insurance proceeds." *Huntsman*, 66 T.C. at 875–76.

The rationale in *Cartwright* is persuasive and consistent with common business sense. BCC acquired the insurance policy for the sole purpose of funding its obligation to purchase Blount's shares in accordance with the stock-purchase agreement. Even when a stock-purchase agreement is inoperative for purposes of establishing the value of the company for tax purposes, the agreement remains an enforceable liability against the valued company, if state law fixes such an obligation.[7] Here the law of Georgia required such a purchase.

[7] Other courts have found - when the restrictive agreement is an attempt to effect a testamentary transfer and avoid the estate tax - that honoring a restrictive element in determining fair market value would be improper. See *True v. Comm'r*, 390 F.3d 1210, 1239-41 (10th Cir. 2004) (listing cases that honor restrictive clauses in determining value and cases that do not honor such restrictive clauses). The IRS urges us to adopt the broadest rule that, when an agreement is ignored for valuation purposes, the agreement plays no role in determining the fair market value. We decline to do so because, as proved by this case, such a rule is overinclusive and represents a manifest departure from common business (i.e., market) sense.

Thus, we conclude that the insurance proceeds are not the kind of ordinary nonoperating asset that should be included in the value of BCC under the treasury regulations. To the extent that the $3.1 million insurance proceeds cover only a portion of the Taxpayer's 83% interest in the $6.75 million company, the insurance proceeds are offset dollar-for-dollar by BCC's obligation to satisfy its contract with the decedent's estate. We conclude that such nonoperating "assets" should not be included in the fair market valuation of a company where, as here, there is an enforceable contractual obligation that offsets such

> assets. To suggest that a reasonably competent business person, interested in acquiring a company, would ignore a $3 million liability strains credulity and defies any sensible construct of fair market value.
>
> **III. CONCLUSION**
>
> The Tax Court properly determined that the 1981 agreement, as amended by the 1996 agreement, had no effect for purposes of determining the value of the BCC shares in Blount's estate and that the fair market value of the corporation was the proper basis for tax assessment. The Tax Court erred when it ignored the amended agreement's creation of a contractual liability for BCC, which the insurance proceeds were committed to satisfy. We reject the Tax Court's inclusion of the insurance proceeds paid upon the death of the insured shareholder as properly included in the computation of the company's fair market value. We remand for disposition consistent with this opinion.

I cannot reconcile the Eleventh Circuit's opinion with the regulations. I believe that the Eleventh Circuit stretched to do justice, in that the benefit of the reduced purchase price went to an ESOP that generally was not for the benefit of the decedent's family. Reviewing footnote 7 above, the court acknowledged that "when the restrictive agreement is an attempt to effect a testamentary transfer and avoid the estate tax … honoring a restrictive element in determining fair market value would be improper," but added that such a result would defy common sense in this case.

Connelly v. U.S., 128 A.F.T.R.2d 2021-5955 (E.D. MO 9/21/2021), agreed with the Tax Court's reasoning and disagreed with the Eleventh Circuit's opinion in *Blount*:

> The Estate urges that the fair market value of Crown C does not include the $3 million in life-insurance proceeds at issue because those proceeds "were off-set dollar for dollar by the obligation to redeem [Michael's] shares" under the Stock Agreement. Doc. 65. According to the Estate, a hypothetical "willing buyer" of Crown C would have to account for substantial liabilities like Crown C's redemption obligation. See, *e.g.*, *Estate of Dunn v. C.I.R.*, 301 F.3d 339, 352 (5th Cir. 2002) (the value of a corporation's assets is discounted by the corporation's capital-gains liability); *Eisenberg v. Comm'r*, 155 F.3d 50, 57 (2d Cir. 1998) (a hypothetical buyer would pay less for shares in a corporation because of the buyer's "inability to eliminate the contingent tax liability"). The Estate emphasizes that a willing buyer would pay less for a company encumbered with a stock-purchase agreement, to account for the company's future decrease in assets when fulfilling the contractual obligation. See *Estate of Blount*, 428 F.3d at 1346.
>
> The parties agree that the facts of this case present the same fair-market-value issue as *Estate of Blount*, 2004 WL 1059517, at *26 (T.C. 2004), *aff'd in part*, *rev'd in part*, 428 F.3d 1338 (11th Cir. 2005). Doc. 52 at 12; Doc. 46 at 6–7. In *Estate of Blount*, a closely-held family company entered into a stock purchase agreement with its shareholders, intending that the company would use life-insurance proceeds to redeem a key shareholder's shares upon his death. 428 F.3d at 1340. When one of the shareholders died, his estate argued that the life-insurance proceeds should not be included in the value of the company, for purposes of determining fair market value of the redeemed shares, because of the company's offsetting contractual obligation to redeem those shares from the estate. *Id*. at 1345.
>
> The Tax Court in *Estate of Blount* included the life-insurance proceeds in the value of the company and the shareholders' shares, determining that the redemption obligation was

not like an ordinary liability because the redemption involved the very same shares being valued. 2004 WL 1059517, at *26. The Eleventh Circuit reversed on this issue, holding that the fair market value of the closely-held corporation did not include life-insurance proceeds used to redeem the shares of the deceased shareholder under a stock purchase agreement. *Estate of Blount*, 428 F.3d at 1346. The Eleventh Circuit reasoned that the stock-purchase agreement created a contractual liability for the company, offsetting the life-insurance proceeds. *Id*. at 1345-46. The Eleventh Circuit concluded that the insurance proceeds were "not the kind of ordinary nonoperating asset that should be included in the value of [the company] under the treasury regulations" because they were "offset dollar-for-dollar by [the company's] obligation to satisfy its contract with the decedent's estate." *Id*. at 1346 (citing 26 C.F.R. § 20.2031-2(f)(2)).

The IRS urges the Court to reject the Eleventh Circuit's holding in *Estate of Blount* and apply the Tax Court's reasoning. Doc. 52 at 12–14. The IRS contends that the Eleventh Circuit's approach violates customary valuation principles, resulting in a below-market valuation for Crown C and a windfall for Thomas at the expense of Michael's estate. *Id*. According to the IRS, a willing buyer and seller would value Crown C at approximately $6.86 million, rather than $3.86 million, because on the date of Michael's death, Crown C possessed the $3 million in life-insurance proceeds that were later used to redeem Michael's shares. *Id*. at 19. This, in turn, would make Michael's 77.18% interest in Crown C worth about $5.3 million. *Id*. The Estate disagrees, somewhat reflexively arguing that under the Eleventh Circuit's holding in *Estate of Blount*, the Court should not include the $3 million in life-insurance proceeds in the valuation of Crown C because of the redemption obligation in the Stock Agreement. Doc. 46 at p. 6. But other than citing the Eleventh Circuit's holding and its own expert opinions (which essentially say that holding controls), the Estate does not really explain why it believes the Eleventh Circuit's holding is correct. *Id.*

Life-insurance proceeds are nonoperating assets that generally increase the value of a company. 26 C.F.R. § 20.2031-2(f)(2); *Estate of Huntsman*, 66 T.C. at 874. Here, the parties agree that the proceeds are a nonoperating asset that would have increased Crown C's value, but they dispute whether Crown C's redemption obligation was a liability that offset the proceeds for valuation purposes. Doc. 52 at pp. 14-15; Doc. 46 at pp. 5-6. Therefore, to determine the fair market value of Michael's shares as of the date of his death, the Court analyzes whether Crown C's outstanding redemption obligation was a corporate liability that reduced the fair market value of Crown C.

Under the willing-buyer-willing-seller principle, a redemption obligation does not reduce the value of a company as a whole or the value of the shares being redeemed. A redemption obligation requires a company to buy its own shares from a shareholder, and just like any other contractual obligation, a redemption obligation expends company resources. But as the Tax Court observed in *Estate of Blount*, a redemption obligation is not a "value-depressing corporate liability when the very shares that are the subject of the redemption obligation are being valued." 2004 WL 1059517, at *25.

Consider what a hypothetical "willing buyer" would pay for a company subject to a redemption obligation. See 26 C.F.R. § 20.2031-1(b). The willing buyer would not factor the company's redemption obligation into the value of the company, because with the purchase of the entire company, the buyer would thereby acquire all of the shares that would be redeemed under the redemption obligation; in other words the buyer would pay all of the shareholders the fair market value for all of their shares. The company, under the buyer's new ownership, would then be obligated to redeem shares that the buyer now holds. Since the buyer would receive the payment from the stock redemption, the buyer would not consider the obligation to himself as a liability that lowers the value of the company to him. See *Estate of Blount*, 2004 WL 1059517, at *25 (T.C. 2004) ("To treat the corporation's obligation to redeem the very shares that are being valued as a liability that reduces the value of the corporate entity thus distorts the nature of the ownership interest represented by those shares.").

A willing buyer purchasing Crown C on the date of Michael's death would not demand a reduced purchase price because of the redemption obligation in the Stock Agreement, as Crown C's fair market value would remain the same regardless. The willing buyer would buy all 500 of Crown C's outstanding shares (from Michael's Estate and Thomas) for $6.86 million, acquiring Crown C's $3.86 million in estimated value plus the $3 million in life-insurance proceeds at issue. If Crown C had no redemption obligation, the willing buyer would then own 100% of a company worth $6.86 million.

But even with a redemption obligation, Crown C's fair market value remains the same. Once the buyer owned Crown C outright, the buyer could either: 1) cancel the redemption obligation to himself and own 100% of a company worth $6.86 million, or 2) let Crown C redeem Michael's former shares - the buyer (and not Michael's Estate) would receive roughly $5.3 million in cash and then own 100% of a company worth the remaining value of about $1.56 million, leaving the buyer with a total of $6.86 million in assets. Therefore, with or without the redemption obligation, the fair market value of Crown C on the date of Michael's death was $6.86 million.

The Estate urges the Court to follow the Eleventh Circuit's reasoning in *Estate of Blount*, which declared that "nonoperating assets should not be included in the fair market valuation of a company where, as here, there is an enforceable contractual obligation that offsets such assets." 428 F.3d at 1346 (quotation marks omitted). But as the IRS points out, the Court must determine the fair market value of Crown C on the date of Michael's death, not the value in its post-redemption configuration. See 26 U.S.C. § 2031. Excluding the insurance proceeds from Crown C's value impermissibly treats Michael's shares as both outstanding and redeemed at the same time, reducing Crown C's value by the redemption price of the very shares whose value is at issue. This approach ignores the ownership interest represented by Michael's shares; construing a redemption obligation as a corporate liability only values Crown C post redemption (*i.e.*, excluding Michael's shares), not the value of Crown C on the date of death (i.e. including Michael's shares).

Demonstrating this point, exclusion of the insurance proceeds from the fair market value of Crown C and valuing Michael's shares at $3 million results in drastically different share prices for Michael's shares compared to Thomas's. If on the date of his death, Michael's 77.18% interest was worth only $3 million ($7,774/share), that would make Thomas's 22.82% interest worth $3.86 million ($33,863/share) because Thomas owned all other outstanding shares and the residual value of Crown C was $3.86 million. See Doc. 53-19 at ¶ 61. The residual value of Crown C is the value of the company apart from the $3 million of insurance proceeds at issue. The parties have agreed that this value was $3.8 million. Doc. 48 at ¶¶ 1–3; Doc. 58 at ¶¶ 43, 79–81. Because Thomas was the only other shareholder of Crown C, his ownership interest must therefore equal the residual value of Crown C: $3.8 million. This outcome violates customary valuation principles because Thomas's shares would be worth 336% more than Michael's at the exact same time. See Doc. 53-19 at ¶ 61. A willing seller of Michael's shares would not accept this bargain, as it creates a windfall for the buyer (Crown C of which Thomas would now have 100% control), while undervaluing Michael's shares in comparison.

Only by including the insurance proceeds in the fair market value of Crown C do Michael's and Thomas's shares hold an equal value on the date of Michael's death. Michael's 77.18% interest in a $6.86 million company would be worth $5.3 million ($13,782/share) and Thomas's 22.82% interest would be worth $1.56 million ($13,782/share). This outcome tracks customary valuation principles, because the brothers' shares have the same value-per-share. A willing seller of Michael's shares would only accept this outcome, because it assigns the same value to Michael's shares as to Thomas's and neither party's economic position changes through the transaction.

The Eleventh Circuit declared in *Estate of Blount* that 26 C.F.R. § 20.2031-2(f)(2) precludes the inclusion of insurance proceeds in the corporate value when the proceeds are used for a redemption obligation. 428 F.3d at 1345 ("The limiting phrase, 'to the extent that such nonoperating assets have not been taken into account,' however, precludes the inclusion of the insurance proceeds in this case." (citing 26 C.F.R. § 20.2031-2(f)(2))). But, 26 C.F.R. § 20.2031-2(f)(2) begins with a discussion of the factors considered in determining the fair market value of a closely-held corporation, including "the company's net worth, prospective earning power and dividend-paying capacity, and other relevant factors." The regulation goes on to state that "[i]n addition to the relevant factors described above, consideration shall also be given to nonoperating assets, including proceeds of life insurance policies payable to or for the benefit of the company, to the extent such nonoperating assets have not been taken into account in the determination of net worth." *Id.*

While in *Estate of Huntsman* the Tax Court ultimately rejected the Commissioner's valuation as not following customary valuation principles, the court found this regulation to mean that the court "must determine the fair market value of the decedent's stock...by applying customary principles of valuation and by giving 'consideration' to the [life-]insurance proceeds." 66 T.C. at 875. The Eleventh Circuit's holding in *Estate of Blount* notwithstanding, the text of the regulation does not indicate that the very presence of an offsetting liability means that the life-insurance proceeds have already been "taken into account in the determination of a company's net worth." See 26 C.F.R. § 20.2031-2(f)(2). By its plain terms, the regulation means that the proceeds should be considered in the same manner as any other nonoperating asset in the calculation of the fair market value of a company's stock. See id. And as already discussed, a redemption obligation is not the same as an ordinary corporate liability. See supra at pp. 29–31.

The Eleventh Circuit's opinion in *Estate of Blount* relied heavily on *Estate of Cartwright*, 183 F.3d 1034, 1037 (9th Cir. 1999), which excluded insurance proceeds from the fair market value of a company when the proceeds were offset by an obligation to pay those proceeds to a shareholder's estate. *Estate of Blount*, 428 F.3d at 1345. But *Estate of Cartwright* is distinguishable. As the Tax Court in *Estate of Blount* explained about *Estate of Cartwright*:

> The lion's share of the corporate liabilities in that case which were found to offset the insurance proceeds were *not obligations of the corporation to redeem its own stock*. Rather, we determined that approximately $4 million of the $5 million liability of the corporation was to compensate the decedent shareholder for services; *i.e.*, for his

> interest in work in progress. Thus, a substantial portion of the liability was no different from any third-party liability of the corporation that would be netted against assets, including insurance proceeds, to ascertain net assets.

2004 WL 1059517, at *27 (emphasis added). Unlike in *Estate of Cartwright*, Crown C's redemption obligation simply bought Michael's shares. See *id*. The redemption did not compensate Michael for his past work, so it was not an ordinary corporate liability. See *Estate of Blount*, 2004 WL 1059517, at *27 (T.C. 2004). While some of the life-insurance proceeds in *Estate of Cartwright* were used for a stock redemption, *Estate of Cartwright* mainly discussed how the insurance proceeds compensated the shareholder for past work, not for his shares in the company. See *Estate of Cartwright* , 1996 WL 337301, at *7-8 (T.C. 1996), *aff'd in part, rev'd in part by*, 183 F.3d 1034, 1037-38 (9th Cir. 1999). And to the extent that *Estate of Cartwright* excluded some of the life-insurance proceeds from the company's fair market value because of an offsetting redemption obligation, the opinion contains the same analytical flaw as *Estate of Blount*, 183 F.3d at 1037, *i.e*. considering a redemption obligation to be a corporate liability that depresses a company's value by ignoring the ownership interest represented by the redeemed shares.

The Court finds the Tax Court's reasoning in *Estate of Blount* persuasive. *Estate of Blount*, 2004 WL 1059517, at *24-27; *see also* Adam S. Chodorow, *Valuing Corporations for Estate Tax Purposes: A Blount Reappraisal*, 3 Hastings Business Law Journal 1, 25 (2006) ("Taking redemption obligations into account leads the court to value the wrong property...redemption obligations are different from other types of corporate obligations in that a redemption obligation both shrinks the corporate assets and changes its ownership structure."). A redemption obligation is not an ordinary corporate liability - a stock redemption involves a change in the ownership structure of the company, where the company buys a shareholder's interest - so a redemption obligation does not change the value of the company as a whole before the shares are redeemed. Nor can a redemption obligation diminish the value of the same shares being redeemed; the shareholder is essentially "cashing out" his share of ownership in the company and its assets. Moreover, a stock redemption results in the company (and more specifically its remaining shareholder(s)) getting something of equal value for the cash spent, *i.e.* the decedent's share of ownership in the company; the exchange increases the ownership interest for each of the company's outstanding shares, *i.e.* the surviving shareholders' shares.

For these reasons, the Court respectfully finds that the Eleventh Circuit's opinion in *Estate of Blount* is "demonstrably erroneous" and there are "cogent reasons for rejecting [it]." *Keasler v. United States*, 766 F.2d 1227, 1233 (8th Cir. 1985) ("[T]he tax decisions of other circuits should be followed unless they are demonstrably erroneous or there appear cogent reasons for rejecting them." (internal quotation marks and citation omitted)). Accordingly, the Court holds that the $3 million in life-insurance proceeds used to redeem Michael's shares must be included in the fair market value of Crown C and of Michael's shares.

Connelly hypothesized that a buyer would buy 100% before buying the decedent's interest. Hypothesizing a strategic buyer is reversible error, unless that part of the opinion can be disregarded and the rest of the opinion holds together. Query how the court will value the decedent's stock. If the buy-sell agreement is disregarded, will the resulting liquidity also be disregarded? In that case, the stock needs to be valued based on lack of marketability and how much control a hypothetical willing buyer of the company's stock would have over the company.

In affirming the District Court, among its reasons the Eighth Circuit, 70 F.4th 412 (2023) reasoned:

> We now consider the fair market value of Michael's shares. The key question is whether the life insurance proceeds received by Crown and intended for redemption should be taken into account when determining the corporation's value at the time of Michael's death.[4] Two principles guide the analysis. The first deals with valuing property in general, and the second addresses companies whose stock prices cannot be readily determined from an exchange, as is the case with closely held corporations.
>
> [4] We focus on this moment in time - after Michael's death but before his shares are redeemed. See *Bright's Est. v. United States*, 658 F.2d 999, 1006 (5th Cir. 1981) (en banc) ("[T]he estate tax is an excise tax on the transfer of property at death and accordingly ... the valuation is to be made as of the moment of death and is to be measured by the interest that passes, as contrasted with the interest held by the decedent before death or the interest held by the legatee after death."). Regardless of the timing, no one argues that the proceeds were ever in doubt. Crown expected to receive $3.5 million from the policy, most of which would be used to buy Michael's shares.
>
> Generally, the value of property in the gross estate is "the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or to sell and both having reasonable knowledge of relevant facts." 26 C.F.R. § 20.2031-1(b); see also *United States v. Cartwright*, 411 U.S. 546, 551 (1973) ("The willing buyer-willing seller test of fair market value is nearly as old as the federal income, estate, and gifts taxes themselves ... .").
>
> To this end, for closely held corporations, the share value "shall be determined by taking into consideration, in addition to all other factors, the value of stock or securities of corporations engaged in the same or a similar line of business which are listed on an exchange." 26 U.S.C. § 2031(b). Treasury regulations have interpreted this as a "fair market value" analysis. 26 C.F.R. § 20.2031-2(a). The fair market value depends on the company's net worth, prospective earning power and dividend-paying capacity, and other relevant factors like "the good will of the business; the economic outlook in the particular industry; the company's position in the industry and its management; [and] the degree of control of the business represented by the block of stock to be valued." 26 C.F.R. § 20.2031-2(f)(2); see also *Est. of Huntsman v. Comm'r*, 66 T.C. 861, 876 (1976) ("[W]e ... determine the fair market value of the decedent's stock ... by applying the customary principles of valuation ... ."). Setting aside for the moment the life insurance proceeds used to redeem Michael's shares, so far as Crown's operations, revenue streams, and capital are concerned, we know its value - about $3.86 million. See supra n.2.
>
> But in valuing a closely held corporation, "consideration shall also be given to nonoperating assets, including proceeds of life insurance policies payable to or for the benefit of the company, to the extent such nonoperating assets have not been taken into account in the determination of net worth, prospective earning power and dividend-earning capacity." 26 C.F.R. § 20.2031-2(f)(2). This need to "take[] into account" life

insurance proceeds appears again in a nearby regulation, 26 C.F.R. § 20.2042-1(c)(6). That regulation clarifies 26 U.S.C. § 2042, which has to do with life insurance proceeds that go to beneficiaries other than the decedent's estate. Understanding the relationship between § 2031 (defining the gross estate) and § 2042, along with their corresponding regulations, helps further illuminate what it means to "take[] into account" life insurance proceeds.

Section 2042 says that the value of a decedent's gross estate includes life insurance proceeds received directly by the estate as well as proceeds received by other beneficiaries under insurance policies in which the decedent "possessed at his death any of the incidents of ownership." For example, if Michael obtained a life insurance policy for the benefit of Crown, the value of that policy's proceeds would be included in Michael's gross estate. See § 2042(2). Yet here, Crown obtained the policy for its own benefit.

Now, there might be a plausible argument that under § 2042 Michael possessed "incidents of ownership" in the life insurance policy through his controlling-shareholder status. If that were the case, then § 2042 would require that Michael's gross estate include the proceeds used for his stock redemption. But that is not the case. Treasury regulation § 20.2042-1(c)(6) clarifies that a decedent does not possess the "incidents of ownership" described in § 2042 merely by virtue of being a controlling shareholder in a corporation that owns and benefits from the policy.

Still, although § 2042 does not require that the proceeds be included here, it does not exclude them either. We are cautioned to "[s]ee § 20.2031-2(f) for a rule providing that the proceeds of certain life insurance policies shall be considered in determining the value of the decedent's stock." 26 C.F.R. § 20.2042-1(c)(6). Thus, although the life insurance proceeds intended for redemption do not directly augment Michael's gross estate by way of § 2042, they may well do so indirectly through a proper valuation of Crown. Indeed, the $500,000 of proceeds not used to redeem shares and which simply went into Crown's coffers undisputedly increased Crown's value according to the principles in § 2031 and 26 C.F.R. § 20.2031-2(f)(2).

We must therefore consider the value of the life insurance proceeds intended for redemption insofar as they have not already been taken into account in Crown's valuation and in light of the willing buyer/seller test. In this sense, the parties agree that this case presents the same fair-market-value issue as *Estate of Blount v. Commissioner*, 428 F.3d at 1345-46, from the Eleventh Circuit. But they disagree on whether *Blount* was correctly decided. Like here, *Blount* involved a stock-purchase agreement for a closely held corporation. Although the court referenced the requirement in 26 C.F.R. § 20.2031-2(f)(2) that proceeds be "taken into account," it concluded that the life insurance proceeds had been accounted for by the redemption obligation, which a willing buyer would consider. 428 F.3d at 1345. In balance-sheet terms, the court viewed the life insurance proceeds as an "asset" directly offset by the "liability" to redeem shares, yielding zero effect on the company's value.[5] The court summarized its conclusion with an appeal to the willing buyer/seller concept: "To suggest that a reasonably competent business person, interested in acquiring a company, would ignore a $3 million liability strains credulity and defies any sensible construct of fair market value." Id. at 1346.

[5] *Blount* cited favorably the Ninth Circuit's decision in *Estate of Cartwright v. Commissioner*, 183 F.3d 1034, 1038 (9th Cir. 1999), which employed similar reasoning. Like the Eleventh Circuit in *Blount*, the Ninth Circuit's analysis was limited - one paragraph citing 26 C.F.R. § 20.2031-2(f)(2) and the tax-court decision in *Estate of Huntsman v. Commissioner*, 66 T.C. at 875, which merely emphasized that life insurance proceeds are to be considered according to § 20.2031-2(f)(2).

Like the estate in *Blount*, Thomas argues that life insurance proceeds do not augment a company's value where they are offset by a redemption liability. In his view, the money is just passing through and a willing buyer and seller would not account for it. The IRS counters that this assumption defies common sense and customary valuation principles, as reflected in Treasury regulations.

The IRS has the better argument. *Blount*'s flaw lies in its premise. An obligation to redeem shares is not a liability in the ordinary business sense. See 6A Fletcher Cyclopedia of the Law of Corporations § 2859 (Sept. 2022 update) ("The redemption of stock is a reduction of surplus, not the satisfaction of a liability."). Treating it so "distorts the nature of the ownership interest represented by those shares." See Est. of Blount v. Comm'r, 87 T.C.M. (CCH) 1303, 1319 [2004 RIA TC Memo ¶2004-116] (2004), aff'd in part and rev'd in part, 428 F.3d at 1338 [96 AFTR 2d 2005-6795]. Consider the willing buyer at the time of Michael's death. To own Crown outright, the buyer must obtain all its shares. At that point, he could then extinguish the stock-purchase agreement or redeem the shares from himself. This is just like moving money from one pocket to another. There is no liability to be considered - the buyer controls the life insurance proceeds. A buyer of Crown would therefore pay up to $6.86 million, having "taken into account" the life insurance proceeds, and extinguish or redeem as desired. See 26 C.F.R. § 20.2031-2(f)(2). On the flip side, a hypothetical willing seller of Crown holding all 500 shares would not accept only $3.86 million knowing that the company was about to receive $3 million in life insurance proceeds, even if those proceeds were intended to redeem a portion of the seller's own shares. To accept $3.86 million would be to ignore, instead of "take[] into account," the anticipated life insurance proceeds. See *id*.

To further see the illogic of the estate's position, consider the resulting windfall to Thomas. If we accept the estate's view and look to Crown's value exclusive of the life insurance proceeds intended for redemption, then upon Michael's death, each share was worth $7,720 before redemption.[6] After redemption, Michael's interest is extinguished, but Thomas still has 114.1 shares giving him full control of Crown's $3.86 million value. Those shares are now worth about $33,800 each.[7] Overnight and without any material change to the company, Thomas's shares would have quadrupled in value.[8] This view of the world contradicts the estate's position that the proceeds were offset dollar-by-dollar by a "liability." A true offset would leave the value of Thomas's shares undisturbed. See Cox & Hazen, supra, § 21:2 ("When a corporation purchases its own stock, it has depleted its assets by whatever amount of money or property it gave in exchange for the stock. There is, however, an increase in the proportional interest of the nonselling shareholders in the remaining assets of the corporation."). In sum, the brothers' arrangement had nothing to do with corporate liabilities. The proceeds were simply an asset that increased shareholders' equity. A fair market value of Michael's shares must account for that reality.

[6] $3.86 million divided by 500 shares.

[7] $3.86 million divided by 114.1 shares.

[8] No one has argued that Michael's death and Thomas's subsequent sole ownership of Crown accounts for such an increase. *Cf. Huntsman*, 66 T.C. at 879 ("The decedent was the dominant force in both businesses, and his untimely death obviously reduced the value of the stock in the two corporations.").

For background on the court's Code § 2042 analysis, see part II.Q.4.i.ii.(b) Corporate Ownership of Policy.

Keeping a pre-1990 agreement outside of the application of Code § 2703 would avoid the statute's imposition of the comparability test. Any discretionary modification of a right or restriction, whether or not authorized by the terms of the agreement, that results in a significant change to the quality, value, or timing of the rights of any party with respect to property that is subject to the right or restriction is a substantial modification that's would subject it to this test.[4595] If the terms of the right or restriction require periodic updating, the failure to update is presumed to substantially modify the right or restriction unless updating would not have resulted in a substantial modification.[4596] Adding any family member as a party to a right or restriction is a substantial modification unless either the terms of the right or restriction require the addition or the added family member is assigned to a generation no lower than the lowest generation occupied by individuals already party to the right or restriction.[4597] However, a substantial modification does not include a modification required by the terms of a right or restriction, a discretionary modification of an agreement conferring a right or restriction if the modification does not change the right or restriction, a modification of a capitalization rate used with respect to a right or restriction if the rate is modified in a manner that bears a fixed relationship to a specified market interest rate, or a modification that results in an option price that more closely approximates fair market value.[4598] Amending an agreement to extend the number of years of payment, to clarify that the prime rate is to be established semi-annually, and to update the name of the banking institution from the original bank's name to its successor's name was not a substantial modification.[4599] Issuing nonvoting shares proportionately to the owners of voting stock in an S corporation was not a substantial modification.[4600]

Letter Ruling 202014006, approving certain actions and amendments as not ruining grandfathering. Facts included:

[4595] Reg. § 25.2703-1(c)(1).
[4596] Reg. § 25.2703-1(c)(1).
[4597] Reg. § 25.2703-1(c)(1).
[4598] Reg. § 25.2703-1(c)(2).
[4599] Letter Ruling 201313001.
[4600] Letter Ruling 201536009, reasoning:

> In this case, the stock split and amendment to the Articles will apply to all of the common shares (whether voting or nonvoting). Because each shareholder will receive c shares for every common share he or she currently holds, the beneficial interests in Company will not be affected by the stock split, amendment, and share dividend.
>
> Likewise, because the number of authorized voting shares will continue to be x, the shareholders' voting rights will remain unchanged.
>
> Consequently, the stock split, amendment to the Articles, and share dividend will not affect the quality, value or timing of any rights under the Articles, and the changes will not be a substantial modification of the Articles for purposes of § 25.2703-1(c). Accordingly, the Articles will remain exempt from the application of chapter 14.

As a result of the transfers of shares of Company stock since the Agreement date, Date 1, Company is now owned by Daughters, C, D, and E, six living grandchildren F, G, H, J, K, and L, as well as six GST Trusts created by C on Date 9.

The Board of Directors of Company proposes to cancel all shares of Company common stock held in treasury and to recapitalize Company so that newly issued voting stock in Company can thereafter be primarily held by shareholders who are active in the management of Company. To accomplish this, Company will amend its Articles to increase the number of common shares and to immediately convert each outstanding common share into one share of Class A voting common stock and x shares of Class B nonvoting common stock. After adoption of the foregoing amended capital structure, the Articles and the Agreement will be amended to reflect the common stock split and the addition of the Class B nonvoting common stock (Plan of Recapitalization).

In addition and as indicated above, after approval of the changes to the corporate structure, C, D and E propose to transfer shares of her Class B nonvoting common stock to the GST Trusts created by her on Date 9 (with respect to C) and Date 10 (with respect to each of D and E).

Letter Ruling 202014006 held:

Ruling #1

The individuals and trusts who were parties to the Agreement as of Date 1 are A, B, C, D, E, the Daughters' Trust, and the six Grandchildren's' Trusts (excluding L's Trust). Under § 2651, A and B, as parents and grandparents of the other parties to the Agreement, are assigned to the eldest generation, which will be referred to as the First Generation. C, D and E, as children of A and B, are assigned to the generation immediately below the First Generation and will be referred to as the Second Generation. The Daughters' Trusts are also assigned to the Second Generation because C, D and E are the only current beneficiaries of the Daughters' Trusts. The six Grandchildren's' Trusts (excluding L's Trust) are assigned to the Third Generation, as each trust benefits only a grandchild of A and B.

There are nine transactions or events after October 8, 1990, in which new parties were treated as having been added to the Agreement. The nine events occurred as follows: (i) on Date 3 with the addition of A's estate upon the death of A; (ii) through (vii) through the addition of F, G, H, J, K, and L, on the date each respective Grandchild's Trust distributed shares of Company stock subject to the Agreement to each such Grandchild, outright and free of trust; (viii) on Date 5 with the addition of B's estate upon the death of B, and (ix) on Date 9 when C transferred shares of her Company stock to the GST Trusts C created, each benefiting a niece or nephew of C.

On Date 2, a date after Date 1 but prior to October 8, 1990, A and B created and funded with shares of Company stock a seventh Grandchild's Trust for L (L's Trust), a newly-born descendant. Since L's Trust was not in existence on Date 1, L's Trust was not a party to the Agreement. However, L's Trust was treated as having been added to the Agreement when it received the shares of Company stock from A and B. Pursuant to Paragraph 1 of the Agreement, the gifted shares were subject to the terms of the Agreement and to the obligations of the transferors thereunder and L's Trust was prohibited from transferring such shares except in accordance with the Agreement.

Pursuant to Paragraph 8 of the Agreement, the Endorsement appeared on the certificates issued to L's Trust. Accordingly, the addition is mandatory under the terms of the right or restriction within the meaning of § 25.2703-1(c)(1). Further, under § 2651(f)(2), L's Trust is assigned to the same generation as the sole beneficiary, L, a grandchild of A and B. Therefore, L's Trust is assigned to the Third Generation of family members already parties to the Agreement. Accordingly, L's Trust is assigned to a generation no lower than the lowest generation occupied by individuals already party to the right or restriction, within the meaning of § 25.2703-1(c).

On Date 3, A died, survived by his spouse, B, and his Daughters, C, D, and E, and his grandchildren. Pursuant to A's will, B, C, D, and E were the beneficiaries of A's estate. Accordingly, pursuant to § 2651(f)(1) and (2), A 's estate was assigned to the Second Generation of shareholders already parties to the Agreement. Accordingly, the addition of A's estate to the Agreement was the addition of a family member of no lower a generational assignment than the family members already party to the Agreement on Date 1.

On Date 4, and subsequently, the trustee of the Grandchildren's Trusts benefiting F, G, H, J, K, and L distributed shares of Company stock subject to the Agreement to the grandchild for whom a Grandchild's Trust was held, outright and free of trust. The foregoing transfers for J, K and L included shares of Company stock received from Grandchild's Trust for I upon I's death. F , G, H, J, K, and L were treated as having been added to the Agreement when shares of Company stock were distributed to them, outright and free of trust. Pursuant to § 2651(f)(2), each Grandchild's Trust was assigned to the same generational assignment as its sole beneficiary, a grandchild of A and B. Therefore, the addition of the beneficiary of each Grandchild's Trust to the Agreement was the addition of a family member of no lower a generational assignment than the individuals already party to the Agreement as of Date 1.

On Date 5, B died, survived by her Daughters, C, D, and E, and her grandchildren. B's estate is treated as a new party to the Agreement. Pursuant to B's will, C, D , and E were the beneficiaries of B's estate. C, D, and E executed partial disclaimers which resulted in F, G, H, I, J, K , and L acquiring beneficial interests in B's estate. Pursuant to § 2651(f)(1) and (2), B 's estate is treated as being assigned to the Third Generation of shareholders. Therefore, the addition of B's estate to the Agreement was the addition of a family member of no lower than the generational assignment of the individuals already party to the Agreement as of Date 1.

On Date 9, C created and funded six GST Trusts with shares of Company stock for the initial benefit of each of her six living nieces and nephews. A niece or nephew of C, each of whom is also a grandchild of A and B, is the sole beneficiary of each GST Trust for and during the lifetime of each such beneficiary. There are no other permissible distributees from any such GST Trust during such time. Therefore, pursuant to § 2651(f)(1), each GST Trust is treated as being assigned to the Third Generation. Accordingly, a transfer of shares of Company stock subjecting the GST Trust to the Agreement is treated as a transfer to a family member of no lower than the generational assignment of the parties already subject to the Agreement on Date 1. The Agreement was adopted before October 8, 1990 and, consequently is exempt from the application of § 2703, provided the Agreement is not substantially modified as set forth in § 25.2703-1(c). No family member which is treated as having been added to the Agreement after October 8, 1990 is assigned to a lower generational assignment than the parties already subject to the Agreement on Date 1. Accordingly, based upon the information submitted and representations made, we conclude that none of the transfers of shares of Company stock subject to the Agreement after October 8, 1990, constitute substantial modifications within the meaning of § 25.2703-1(c). Consequently, the Agreement continues to be grandfathered for purposes of chapter 14.

Ruling #2

On Date 7, a date after October 8, 1990, Company amended the Articles to change its name to the current name. On Date 8, Company amended and restated the Articles. Also on Date 8, Company amended and restated the Bylaws that included administrative changes such as name change, indemnification, and number of members constituting the Board of Directors.

Based upon the facts submitted and representations made, we conclude that none of the amendments to the Articles on Date 7, the amendments and restatement of the Articles on Date 8, and the amendment and restatement of the Bylaws on Date 8 constitute substantial modifications of any right or restriction in the Articles, the Bylaws, or the Agreement within the meaning of § 25.2703-1(c). Consequently, we conclude that the Articles, the Bylaws, and the Agreement continue to be grandfathered for purposes of chapter 14.

Ruling #3

The proposed Plan of Recapitalization includes a stock split of one share of Company common stock into one share of Class A voting common stock and x shares of Class B nonvoting common stock. The Articles and Agreement will be amended to reflect the stock split and the addition of Class B nonvoting common stock to the capital structure. The issuance of the Class B nonvoting common stock does not change the terms and conditions to which the shareholders are already subject. In addition, the beneficial interest in the Company will not be affected by the stock split because each shareholder of common stock will receive x shares of Class B nonvoting common stock for every share of common stock held prior to the recapitalization. Accordingly, we conclude that the recapitalization does not affect the quality, value, or timing of any rights of the parties to the Agreement.

Based upon the facts submitted and representations made, we conclude that the proposed Plan of Recapitalization, the proposed amendments to the Articles and Agreement to reflect the stock split and the addition of Class B nonvoting common stock to the capital structure, and the issuance of Class B nonvoting common stock, will not constitute substantial modifications of the Agreement or the Articles within the meaning of § 25.2703-1(c). Further, we conclude that the proposed Plan of Recapitalization and the proposed amendments, described above, will not cause § 2703 to apply to transfers of shares of Company stock subject to the Agreement, as amended.

Ruling #4

C, D and E propose to transfer shares of Class B nonvoting stock in the Company to the GST Trusts created by each. Each GST Trust is assigned to the Third Generation of family members subject to the Agreement. We concluded under Ruling 1 that the prior transfers by C of shares of Company stock to C's GST Trusts do not cause a substantial modification of the Agreement. We likewise conclude that the proposed transfers of shares of Company stock by C to her GST Trusts do not cause a substantial modification to the Agreement. Similarly, the proposed transfers by D and E of shares of Company stock to D's and E's GST Trusts, respectively, do not cause a substantial modification of the Agreement.

> Accordingly, based upon the facts submitted and representations made, we conclude the proposed transfers of shares of Company stock by C, D and E to the GST Trusts created by each will not constitute substantial modifications of the Agreement within the meaning of § 25.2703-1(c). Further, we conclude that the proposed transfers of shares of Company stock by C, D and E to the GST Trusts created by each will not cause § 2703 to apply to the transfer of shares of Company stock subject to the Agreement, as amended.

Letter Rulings 202014007, 202014008, 202014009, and 202014010 are reported to be companion rulings to Letter Ruling 202014006. Letter Rulings 202015004-202015013 also appear to be companion rulings.

BNA Daily Tax Report (4/24/2020) described ten letter rulings:[4601]

> In 10 similar ruling letters, the IRS concluded that certain events occurring after October 8, 1990 (the date defining whether tax code Section 2703 applies), subject to an agreement that "Company" shareholders (individuals and trusts in a family lineage) entered into before that date, don't constitute substantial modifications of the Agreement or other applicable documents within the meaning of Treasury Regulations Section 25.2703-1(c) such that would cause application of these sections. The events are: (rulings 1,2) transfers of Company shares and additions of new parties to the Agreement - including the estates of first-generation individuals (a husband and wife) upon their deaths, and new generation-skipping transfer (GST) tax-exempt trusts for additional or newly born family members none of whom are assigned to a lower generation than those already subject to the Agreement - as well as amendment and restatement of Company's Articles of Incorporation (including name change); consequently grandfathering continues on all the applicable documents for purposes of Chapter 14 (Special Valuation Rules) of the tax code; (ruling 3) proposed amendments to the Articles and Agreement to reflect Company's plan of recapitalization, including a stock split into voting and nonvoting common shares, deemed as not affecting the quality, value, or timing of any rights of the parties to the Agreement; and (ruling 4) proposed transfers of Company shares by second-generation trust beneficiaries to GST trusts for third-generation beneficiaries.

Finally, many of the buy-sell restrictions in partnership agreements are no more restrictive than would otherwise apply under state law, so the application of Code § 2703 would not have a significant impact on the valuation. Yet the IRS makes a big deal of these issues on audit and acts as if some of the cases cited above give it a major advantage. Consider asking the appraiser to expressly state that (s)he is ignoring any provisions in the agreement that are more restrictive than otherwise applicable state law. That way, when the IRS makes a big deal about

[4601] Letter Rulings 202017001, 202017002, 202017003, 202017004, 202017005, 202017006, 202017011, 202017012, 202017013, 202017014.

Code § 2703, one might respond that one has already assumed that Code § 2703 applied, so that issue is off the table.

II.Q.4.i. Life Insurance LLC

Wouldn't it be nice to avoid using a lot of policies, minimize life insurance income tax consequences to owners coming and going,[4602] and keep the life insurance policies in a safer environment? One solution is to place the policies in a limited liability company (LLC) taxed as a partnership. The owners of the business entity also would be the members (owners) of the LLC. A trust company could serve as manager, taking charge of the policies and ensuring that the proceeds are used as intended. Each owner would have an interest in policies insuring the other partners' lives. I obtained Letter Ruling 200747002, which approved such a strategy.

Before reviewing that, as background consider that Letter Ruling 9309021 involved the following facts:

> A and B are shareholders of Corporation X and Corporation Y (Corporations) and also will be partners in Partnership. A represents that Corporations own life insurance policies (the Policies) on the lives of A and B, the proceeds of which are dedicated to the purchase of common stock under stock purchase agreements of Corporations. A and B plan to form Partnership and thereafter, Corporations will transfer the Policies to Partnership in consideration of payment to Corporations by Partnership of the interpolated reserve value of the Policies at the time of the transfer.
>
> After the transfer, Partnership will own the Policies and will change the beneficiary of the policies from Corporations to itself. Partnership will pay all premiums due on the Policies after the transfers. A represents that the business purpose for the proposed transfer is to facilitate a cross-purchase agreement between A and B for the stock of Corporations in the event of the death of either A or B.
>
> Partnership will be formed under State's Uniform Partnership Act (the Act). The Act provides in part that all partners are jointly liable for all debts and obligations of Partnership. In addition, the partnership agreement provides that the management and authority of Partnership is equally vested in each of the partners. Partnership will engage in the purchase and acquisition of life insurance policies on the lives of its partners. Partnership will have ownership rights in the Policies and will manage a portfolio of insurance policies.

Letter Ruling 9309021 included the following reasoning/conclusions:

> Under the proposed transaction, Partnership will transfer cash to Corporations, the current owners of the Policies, and will receive in exchange ownership of the Policies on the lives of A and B, the insureds. Under section 1.101-1(b)(4) of the regulations, a transfer for valuable consideration is "any absolute transfer for value of a right to receive all or a part of the proceeds of a life insurance Policy." Corporations' transfers of the Policies to partnership in exchange for payment of a sum equal to the interpolated

---

[4602] See text accompanying fns. 4340-4342 in part II.Q.4.b.i Transfer for Value Rule Generally regarding certain transfers involving partnerships. Distributions from partnerships generally are tax-free, as described in part II.Q.8.b.i Distribution of Property by a Partnership; and, as described in fn 5372, a life insurance contract is not targeted by part II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them).

> reserve value of the Policies is a transfer for valuable consideration under section 101(a)(2) of the Code and section 1.101-1(b)(4) of the regulations.
>
> When the Corporations transfer the Policies to Partnership, the insureds, A and B, are partner of Partnership. Since the insureds are partners in the partnership to which the Policies are transferred, the transfer for valuable consideration of the Policies from Corporation to partnership is covered by section 101(a)(2)(B) of the Code and as such, the exclusion limitation of section 101(a)(2) does not apply….
>
> Provided that the life insurance proceeds are exempt from gross income under section 101(a) of the Code, the proceeds will be reflected in the partner's distributive share under section 702 as tax-exempt income. The partner's basis in their respective partnership interests will increase under section 705(a)(1)(B) due to their distributive shares of tax-exempt income. Under section 731, distributions from a partnership to a partner are generally nontaxable to the extent that any money distributed does not exceed the adjusted basis of the partner's interest in the partnership immediately before the distribution. Accordingly, any proceeds of the life insurance policies distributed to A are not taxable to A to the extent that the distribution does not exceed the adjusted basis of A's partnership interest immediately before the distribution.

II.Q.4.i.i. The Facts of Letter Ruling 200747002

The flowcharts in the Appendices A and B illustrate the situation. Appendix A illustrates trusts that were set up. Appendix B explains the Insurance LLC's structure. Appendix C illustrates some creative planning described below.

In this case, an S corporation had three shareholders: Child A (Brother), Child B (Sister), and BA. BA was an unrelated shareholder. Although the ruling does not disclose the percentage ownership, in fact BA owned 5% of the stock, and Brother and Sister owned the rest in roughly equal amounts. The buy-sell agreement was funded by term life insurance policies.

The grantor, parent of Brother and Sister, set up an irrevocable trust, Trust 2A, for Brother ("Brother's Irrevocable Trust"). This was a typical flexible generation-skipping trust. Brother was trustee and could make distributions under an ascertainable standard to Brother and Brother's descendants. Brother also had the power to appoint Brother's Irrevocable Trust's assets at Brother's death to anyone except to Brother, Brother's creditors, Brother's estate or the creditors of Brother's estate. The grantor had allocated GST exemption to Brother's Irrevocable Trust, and Brother's Irrevocable Trust was not subject to the rule against perpetuities. Thus, Brother's Irrevocable Trust provides Brother with flexibility to use its assets during life and pass them to practically anyone at death. The grantor also set up Trust 2B for Sister with similar terms ("Sister's Irrevocable Trust").

Under a buy-sell agreement, Brother would buy Sister's and BA's stock at their deaths. Brother owned policies on their lives to fund this purchase. Brother also had the right to assign Brother's purchase rights and obligations to Brother's Irrevocable Trust or other trusts controlled by Brother. Brother would then transfer these policies to the LLC. Brother and Brother's Irrevocable Trust would contribute premiums to the LLC and receive the right to death benefits from Policies on Sister's and BA's lives in proportion to the premiums that Brother and Brother's Irrevocable Trust made these premium contributions. The goal was to maximize Brother's Irrevocable Trust's proportion of contributions, because Brother's Irrevocable Trust and any trusts created under it are excluded from the estate tax system. However, given the uncertainties of cash flow and the impracticality of frequently changing beneficiary designations, being flexible in sharing premiums was important and the LLC's use of partnership accounting seemed to be the best way to accomplish that. Brother and Sister had virtually identical goals regarding the buy-sell arrangement.

The LLC had some other features. The manager was a corporate trustee. Using a corporate trustee as manager provided security to ensure that no party to the buy-sell agreement would use the life insurance proceeds improperly. The manager was instructed to retain all life insurance proceeds until the parties agreed on their application toward the cross-purchase. Thus, the manager's roles were essentially the equivalent of a combination of trustee of an irrevocable life insurance trust before a shareholder's death and escrow agent for the buy-sell agreement after a shareholder's death.

The LLC's activity required special partnership accounting provisions. Each member had a separate capital account for each policy the member owned on a shareholder. Also, the members needed to contribute cash to pay the LLC's administrative expenses, requiring an additional set of capital accounts.

II.Q.4.i.ii. Summary of Estate Tax Rules Governing Life Insurance Payable to a Business Entity

Code § 2042(2) provides that an insured's gross estate includes the value of all property "to the extent of the amount receivable by all other beneficiaries as insurance under policies on the life of the decedent with respect to which the decedent possessed at his death any of the incidents of ownership, exercisable either alone or in conjunction with any other person."[4603]

Code § 2035(a) provides:

> If—
>
> (1) the decedent made a transfer (by trust or otherwise) of an interest in any property, or relinquished a power with respect to any property, during the 3-year period ending on the date of the decedent's death, and
>
> (2) the value of such property (or an interest therein) would have been included in the decedent's gross estate under section 2036 , 2037, 2038, or 2042 if such transferred

[4603] It continues:

> For purposes of the preceding sentence, the term "incident of ownership" includes a reversionary interest (whether arising by the express terms of the policy or other instrument or by operation of law) only if the value of such reversionary interest exceeded 5 percent of the value of the policy immediately before the death of the decedent. As used in this paragraph, the term "reversionary interest" includes a possibility that the policy, or the proceeds of the policy, may return to the decedent or his estate, or may be subject to a power of disposition by him. The value of a reversionary interest at any time shall be determined (without regard to the fact of the decedent's death) by usual methods of valuation, including the use of tables of mortality and actuarial principles, pursuant to regulations prescribed by the Secretary. In determining the value of a possibility that the policy or proceeds thereof may be subject to a power of disposition by the decedent, such possibility shall be valued as if it were a possibility that such policy or proceeds may return to the decedent or his estate.

> > interest or relinquished power had been retained by the decedent on the date of his death,
>
> the value of the gross estate shall include the value of any property (or interest therein) which would have been so included.

Reg. 20.2042-1(c)(1) begins with:

> Section 2042 requires the inclusion in the gross estate of the proceeds of insurance on the decedent's life not receivable by or for the benefit of the estate if the decedent possessed at the date of his death any of the incidents of ownership in the policy, exercisable either alone or in conjunction with any other person.

Then it continues by pointing out inclusion when incidents of ownership are transferred too soon to death, which is now covered by Code § 2035.

Reg. 20.2042-1(c)(2) provides:

> For purposes of this paragraph, the term "incidents of ownership" is not limited in its meaning to ownership of the policy in the technical legal sense. Generally speaking, the term has reference to the right of the insured or his estate to the economic benefits of the policy. Thus, it includes the power to change the beneficiary, to surrender or cancel the policy, to assign the policy, to revoke an assignment, to pledge the policy for a loan, or to obtain from the insurer a loan against the surrender value of the policy, etc. See subparagraph (6) of this paragraph for rules relating to the circumstances under which incidents of ownership held by a corporation are attributable to a decedent through his stock ownership.

Reg. 20.2042-1(c)(3) discusses reversionary interests:

> The term "incidents of ownership" also includes a reversionary interest in the policy or its proceeds, whether arising by the express terms of the policy or other instrument or by operation of law, but only if the value of the reversionary interest immediately before the death of the decedent exceeded 5 percent of the value of the policy. As used in this subparagraph, the term "reversionary interest" includes a possibility that the policy or its proceeds may return to the decedent or his estate and a possibility that the policy or its proceeds may become subject to a power of disposition by him. In order to determine whether or not the value of a reversionary interest immediately before the death of the decedent exceeded 5 percent of the value of the policy, the principles contained in paragraph (c)(3) and (4) of § 20.2037-1, insofar as applicable, shall be followed under this subparagraph. In that connection, there must be specifically taken into consideration any incidents of ownership held by others immediately before the decedent's death which would affect the value of the reversionary interest. For example, the decedent would not be considered to have a reversionary interest in the policy of a value in excess of 5 percent if the power to obtain the cash surrender value existed in some other person immediately before the decedent's death and was exercisable by such other person alone and in all events. The terms "reversionary interest" and "incidents of ownership" do not include the possibility that the decedent might receive a policy or its proceeds by inheritance through the estate of another person, or as a surviving spouse under a statutory right of election or a similar right.

Reg. 20.2042-1(c)(4) is reproduced in part II.Q.4.i.ii.(a) Trust Ownership of Policy.

Reg. 20.2042-1(c)(5) discusses the impact of state law property rights:

> As an additional step in determining whether or not a decedent possessed any incidents of ownership in a policy or any part of a policy, regard must be given to the effect of the State or other applicable law upon the terms of the policy. For example, assume that the decedent purchased a policy of insurance on his life with funds held by him and his surviving wife as community property, designating their son as beneficiary but retaining the right to surrender the policy. Under the local law, the proceeds upon surrender would have inured to the marital community. Assuming that the policy is not surrendered and that the son receives the proceeds on the decedent's death, the wife's transfer of her one-half interest in the policy was not considered absolute before the decedent's death. Upon the wife's prior death, one-half of the value of the policy would have been included in her gross estate. Under these circumstances, the power of surrender possessed by the decedent as agent for his wife with respect to one-half of the policy is not, for purposes of this section, an "incident of ownership", and the decedent is, therefore, deemed to possess an incident of ownership in only one-half of the policy.

Reg. 20.2042-1(c)(6) is reproduced in part II.Q.4.i.ii.(b) Corporate Ownership of Policy.

Simple cross-purchase agreements avoid these issues. Rev. Rul. 56-397 ruled that when each of two business associates owns, is the beneficiary of and pays all premiums for an insurance policy on the other business associate, neither of the business associates possesses incidents of ownership in the policy on his or her respective life.

TAM 9349002 asserted incidents of ownership in the following situation:

> On December 31, 1985, the stockholders of the Company entered into the STOCKHOLDERS AGREEMENT, (the "buy-sell agreement") culminating a series of agreements and contracts dated 1980, 1982, 1984, and July 1985. Under the terms of the buy-sell agreement the purchase price of shares purchased pursuant to the agreement was to be determined by a formula increasing the book value of the Company by a weighted income factor. On January 31, 1987, the FIRST AMENDMENT TO STOCKHOLDER'S AGREEMENT modified the applicable date for computation of book value of the Company.
>
> On May 16, 1988, the SECOND AMENDMENT TO STOCKHOLDERS AGREEMENT --
>
> (1) Deleted a right held by B to acquire shares held by Decedent;
>
> (2) Required the Company to redeem Decedent's shares at the end of the 1991 fiscal year (or at any prior date determined by Decedent) unless they had previously been redeemed under the terms of the agreement;
>
> (3) Modified the method of computing book value; and
>
> (4) Made other miscellaneous changes to the buy-sell agreement.
>
> On November 5, 1988, the THIRD AMENDMENT TO SHAREHOLDER'S AGREEMENT was executed. At the time of the third amendment the Decedent held 49.5 percent of the

outstanding shares of stock in the Company. While the majority of the remaining shares were held by B, four other employees also held shares in the Company. No single individual held a majority interest in the Company.

After the Third amendment, the buy-sell agreement provided that, if either Decedent or B survived the other by thirty days, the Company stock held by the first to die of Decedent or B would be acquired by the surviving shareholders to the extent insurance proceeds were available. To the extent such proceeds were not available, or if neither survived the other by thirty days, the Company was to redeem the stock. The amount to be paid on the purchase or redemption of the stock was the greater of (1) the amount of insurance proceeds available, or (2) the amount otherwise calculated under the agreement. Any amount in excess of the insurance proceeds was to be paid by the Company over a period of four years pursuant to a promissory note containing the terms set forth in the agreement. Information submitted by the taxpayer indicates that the application of the formula as of June 30, 1989, would have resulted in a promissory note in the amount of $490,000.

The amended buy-sell agreement named a corporate trustee to be the applicant, owner, and beneficiary of policies of insurance on the lives of each of Decedent and B except that the Company was to be the owner to the extent of the each policy's cash surrender value. The trustee was precluded from exercising any powers of ownership by canceling a policy, assigning ownership, changing the name of the beneficiary, borrowing against a policy, or otherwise changing the nature or value of any policy.

The amended buy-sell agreement provided that, upon termination of tile trust, any unmatured policy was to be transferred to the Company subject to the right of the insured to purchase the policy for the then interpolated terminal reserve (cash surrender value). The trust was to terminate upon the first to occur of --

(1) the death of the first to die of Decedent or B,

(2) the completion of the redemption of Decedent's shares, or

(3) the completion of the redemption of B's shares.

Subparagraph 6 (I) of the amended buy-sell agreement provided, in part --

> If [a] redeeming shareholder dies prior to the completion of [the] redemption, the Trustee shall collect the insurance proceeds and ... pay the balance remaining due for said redemption to the deceased Shareholder1s estate and pay the balance of the insurance proceeds pro rata to the remaining Shareholders of record on the date of death. If any Shareholder sells his shares during his lifetime pursuant to the terms of the Agreement or upon termination of this Amendment, such Shareholder(s) shall have the right to purchase the policy or policies upon his life owned by the Trustee, but only after all monies being paid to the redeeming Shareholder have been paid in full. This purchase shall be upon the same terms and conditions as set forth . . . for the purchase of such policy or policies by the surviving shareholder from the corporation.

On February 7, 1989, when Decedent was age 54, the trust acquired an increasing premium term policy of insurance on Decedent's life ($500,000 face value) using funds furnished by the Company to pay the initial premium on the policy. Under the terms of the policy there would be “no cash values until after insured’s age 71.”

On November 10, 1989, Decedent, and three of the small shareholders entered into a “STOCK PURCHASE AND REDEMPTION AGREEMENT” (the “redemption agreement”) wherein it was agreed that the Company would purchase Decedent’s shares by delivery of a promissory note having a face value of $300,000 payable over a thirty month period. The agreement also provided that Decedent would receive a cash payment of $150,000 at closing in exchange for her covenant not to compete for a period of two years. The agreement, signed by B as President, was contingent on the execution by B of a repurchase agreement with respect to B’s shares in another jointly owned company engaged in a similar line of business. No insurance policies were involved with respect to the repurchase of B’s shares in the other company.

Paragraph 10 of the redemption agreement provides that, after full payment of the promissory note, Decedent would have the right to purchase any company owned policies insuring Decedent’s life at the policies’ then cash surrender value plus the amount of the pro-rated annual premium.

The redemption agreement contains a recital that it supersedes all prior understandings and written agreements specifically including the amended buy-sell agreement. We note that one individual holding a small number of shares did not execute the repurchase agreement.

On December 15, 1989, Decedent surrendered her shares to Company in exchange for a promissory note in the amount of $300,000. The note provided for 30 equal monthly payments of principal and interest with the final payment due on June 15, 1992.

Decedent died on September 27, 1991, at age 55 (age 56 as of her nearest birthday) when the balance due under the promissory note was $96,231.47. Upon the death of Decedent the trustee distributed a portion of the insurance proceeds to the estate (in an amount equal to the balance due on the promissory note) and the balance to B and the other shareholders.

The probability that a person aged 56 will survive for a period of nine months exceeds 99 percent.

TAM 9349002 asserted that the above facts supported the following conclusions:

1. At the time the life insurance arrangement was created, the Decedent’s stock was to be redeemed by Company within thirty-eight months and that final payment of the promissory note would have occurred within sixty-eight months.

2. The insurance policies were acquired with Company earnings that would otherwise have accrued to the benefit of the shareholders.

3. Neither the Company nor the trustee could exercise any of the incidents of ownership that existed with respect to the insurance policy during the term of the trust (except as directed by the shareholders through modification of the agreement). The “trustee,” holding no independent authority, functioned solely as an agent for the shareholders ([sic] accepting and forwarding the premiums on the insurance policies

and collecting and disbursing the proceeds, if any, received with respect to each policy.

4. The policy was structured so that its cash surrender value would be zero until several years after the trust terminated. Thus, the Decedent would have been able to acquire the policy by paying the then unexpired (pro-rata) portion of the annual premium regardless of the actual value of the policy at the completion of the redemption.

TAM 9349002 agreed with the estate "that the Decedent did not possess more than 50 percent of the combined voting power of the corporation; thus, the incidents of ownership in the policy held by the Company, if any, are not attributed to the Decedent under the indirect control rationale of section 20.2042-1(c)(6)." However, the IRS disagreed regarding Reg. 20.2042-1(c)(3):

> Taxpayer argues that the Decedent did not have a reversionary interest in the policy immediately prior to death. Taxpayer contends that a reversion cannot exist in property that was never held by the Decedent and, even if it could, no reversion exists in this case because the policy would not have automatically returned to the Decedent.
>
> Taxpayer relies on *Estate of Leder v. Commissioner*, 893 F.2d 237 (10th Cir. 1989), *Estate of Headrick v. Commissioner*, 918 F.2d 1263 (6th Cir. 1990), and *Estate of Perry v. Commissioner*, 927 F.2d 209 (5th Cir. 1991), for the proposition that Decedent did not "transfer" a policy of insurance on Decedent's life. We believe taxpayer's reliance is misplaced. While those cases did reject a "constructive", (or "beamed") transfer doctrine in the application of section 2035(d)(2), they did not deny the validity of that doctrine.
>
> In *Leder* for example, the court recognized the existence of a transfer, stating, in part:
>
>> The typical example of a constructive transfer is where the decedent purchases a life insurance policy on himself or herself, pays all the premiums, and designates his or her children or spouse as the owners and beneficiaries. In these situations courts construing section 2035(a) view the decedent's actions as acts of transfer, because the decedent "beamed" the policy proceeds to the children or spouse by paying the policy premiums and creating in the children or spouse all of the contractual rights to the insurance benefits. [*Bel*, 452 F.2d 683 (5th Cir. 1971), *cert. denied*, 406 U.S. 919 (1972)].
>
> It is clear that in *Leder*, as in the other cases cited by the taxpayer, the decision did not hinge on whether the insured had transferred a policy of insurance but on the technical issue of whether the insured had transferred an interest in the policy that would have caused inclusion of the proceeds under section 2042 of the Code if the interest had not been transferred. In addition, in those cases the trustee or other third party transferee who purchased the policy ostensibly had a much greater degree of independence in the selection and acquisition of trust assets.
>
> In this case the Decedent, along with the other shareholders, caused the Company to transfer assets to the trustee who was directed to acquire a policy of insurance on the life of each of the two major shareholders. Whether the arrangement is viewed as a transfer of the assets or as an interest free loan, the result is a constructive transfer of an insurance policy.

Similarly, we disagree with the taxpayer’s analysis of the Decedent’s potential right to re-acquire the policy.

Taxpayer, citing *Estate of Smith*, 73 T.C. 307 (1979), *acq. in result only*, 1981-1 C.B. 2, suggests that no reversion exists if return of the policy is contingent on events over which the insured has no control. We believe the absence of control is relevant only with respect to the VALUE of the insured’s right (the PROBABILITY of reverter) and has no relevance with respect to the EXISTENCE of that right (the POSSIBILITY of reverter).

In *Smith* the insured possessed the right to acquire an employer- owned policy only if the employer elected to discontinue the policies either through nonpayment of premiums or by surrender of the policies. At the date of death the contingencies under which the insured could acquire the policy had not occurred and the issue before the court was whether the insured’s veto power (over the cancelation of the policies) was a sufficient incident of ownership to cause inclusion in the gross estate.

We do not believe that *Smith* is relevant here. The issue as framed by the court in *Smith* was whether the insured, acting alone or in conjunction with the employer could have exercised any of the incidents of ownership or if the insured could have prevented the exercise by the employer of any incidents of ownership. We can find no discussion as to whether the insured’s contingent right to acquire the policies constituted a reversionary interest as contemplated in section 20.2042-1(a)(6) of the regulations. We assume that the issue was not discussed because the value of the insured’s possibility of reverter would not have exceeded five percent of the value of the policies immediately before the death of the insured.

Taxpayer further argues that the Decedent possessed no reversionary interest in the policy because her right to acquire the policy was contingent on the final payment of the promissory note, “an event over which [the Decedent] had no control”. We can find no indication in the file that the promissory note was not enforceable at the time of the Decedent’s death and taxpayer has furnished no information that would suggest that the Decedent could not have required the Company to make the final payment as contemplated therein. If such evidence does exist, we believe it would be relevant solely for purposes of determining the value of Decedent’s reversionary interest immediately before the Decedent’s death.

Finally, taxpayer argues that no reversion existed because the only way the Decedent could have acquired the policy was to purchase it. Again, we believe that taxpayer raises an issue going to the valuation of the insured’s interest rather than the existence of that interest. We note that in this case the purchase price contemplated in the arrangement did not require the Decedent to pay an amount equal to the replacement cost of the policy; *i.e.*, the arrangement did not require the Decedent to pay an amount equal to the cost of a similar policy under the then existent facts.

We would also note that this arrangement did not involve the cross-purchase of life insurance policies. In this case, prior to the redemption, the amended buy-sell agreement essentially created a “winner take all” arrangement. If the Decedent had survived B by more than 30 days, the Decedent would have acquired over ninety percent of the stock in the Company and, thus, would have indirectly owned more than ninety percent of the policy on the her life (with the additional option of acquiring the entire policy).

TAM 9349002 also asserted incidents of ownership under Reg. § 20.2042-1(c)(4):

> When the insured cannot initiate the acts associated with the incidents of ownership but can only consent to or veto the exercise of the incidents of ownership by another, the courts have held that the veto power itself constitutes an incident of ownership over the policy. The Second Circuit held that where the insured must consent before the actions of others effectively alter a revocable trust, the insured holds incidents of ownership in a life insurance policy held by the trust. *Estate of Karagheusian v. Commissioner*, 233 F.2d 197 (2d Cir. 1956). Similarly, the Court of Claims held that where the beneficiary/owner of an insurance policy had the power to change the beneficiary, but the power could be exercised only with the consent of the insured, the insured held incidents of ownership in the policy for federal estate tax purposes. *Estate of Goldstein v. United States*, 122 F.Supp 677 (Ct. Cl. 1954). It is immaterial whether the decedent may initiate changes, or whether he must merely consent to them. It is the power and not the substantiality of the power that we must look to. *Schwager v. Commissioner*, 64 T.C. 781 (1975).
>
> Taxpayer argues that the insurance policy at issue was purchased for a valid business purpose and is not, therefore, includible in the insured's gross estate. In support of this position taxpayer cites *Estate of Bert L. Fuchs*, 47 T.C. 199 (1966) and *Estate of Howard F. Infante*, 29 T.C. Memo 1970-206. Additionally, taxpayer cites *Estate of Smith*, *supra*, and Rev. Rul. 84-130, 1984-2 C.B. 194.
>
> In *Fuchs* the partners agreed to acquire insurance on the lives of the other partners to fund a buy-sell agreement. The partners each acquired insurance on the lives of the other partners pursuant to an agreement which the court characterized as creating an "informal relationship of a quasi-trust nature which obligated the partners to deal with each policy in a manner conforming to the terms of the agreement. Under the "policy facts", the incidents of ownership were vested in the owner. The court stated that any power held by the insured with respect to those incidents was held in a fiduciary capacity similar to that imposed on a trustee.
>
> The facts in *Infante* were similar to those in *Fuchs*, except that the partnership originally acquired the policies, which were then reissued naming each partner absolute owner and beneficiary of the policy on the other partner's life. The court noted that the veto right held by the insured arose from the partnership agreement and as such could only be exercised in conformance with the limitations imposed by the that agreement. Citing *Fuchs*, the court held that the insured did not possess the true incidents of ownership in the policy.
>
> We note that the court in *Infante* recognized that policy facts do not always control and that side agreements can create incidents of ownership. With respect to *Karagheusian*, *supra*., the court stated, in part:
>
>> Decedent had no direct ownership interest in the policy and held none of the powers granted by the terms of the policy itself. His veto power derived exclusively from the trust instrument.
>>
>> While the "incident of ownership" was created exclusively by the collateral contract (the trust instrument), the contract substantially impinged upon the terms of the policy itself. Through the trust, and in conjunction with his wife, he could have

> exercised all rights of ownership. In addition, there were no restrictions on the decedent as to the purposes for which he could have used the proceeds of the funds. Hence, through a merely formalistic change of ownership, decedent was able to reserve all rights of ownership without being the owner of record.

The court found the decedent's power to be an "incident of ownership" in the policy for purposes of section 2042(2). In reaching this conclusion, the court analogized the trust situation to the [Estate Tax Regs.] example of indirect ownership of a policy through a corporation as an "incident of ownership" and held that the decedent had obtained an "incident of ownership" (his veto power) through his indirect ownership of the policy.

Rev. Rul. 84-130, 1984-2 C.B. 194, provides that the decedent does not hold incidents of ownership in a group term life insurance policy where the only right the decedent held over a noncontributory group term policy on the decedent's life was the right to convert the policy to an individual policy should the individual cease employment. The ruling notes that the powers mentioned in section 20.2042-1(c)(2) of the regulations are powers that directly affect the insurance policy rather than powers that arise as collateral consequences of independent actions of the insured. As an example of a power exercisable as a result of an independent action and, thus, not an incident of ownership, the ruling cites the power to cancel coverage under a group term policy by terminating employment. See Rev. Rul. 72-307, 1972-1 C.B. 307. The power of cancelation is considered a collateral consequence of the power that every employee holds to terminate employment. See also Rev. Rul. 80-255, 1908-2 C.B. 272.

Both Rev. Rul. 84-130 and *Estate of Smith*, *supra*., involved an employee's rights with respect to employer owned insurance. Neither case involved the insured's rights with respect to a policy of insurance held by a trust created by the insured.

Based on the above we conclude that, under the terms of the amended buy-sell agreement, the Decedent-insured, through her ability to withhold consent to the exercise of the policy rights effectively acquired the incidents of ownership in the life *insurance* policy held by the "trustee". See *Estate of Raragheusian v. Commissioner*, supra. Similarly, because the economic rights with respect to the policy could only be changed by modification of the trust arrangement, and because that arrangement could not be modified without her consent, it seems Clear that the Decedent-insured, in conjunction with the other shareholders, possessed the incidents of ownership in the policy at the date of death.

Analysis of the terms of the amended buy-sell agreement indicates that the duties of the "trustee" thereunder are limited to acquiring the policies of insurance on the lives of B and the Decedent; receiving premium payments from the Company and forwarding those payments to the insuror, and distributing any proceeds paid under the policies to the actual beneficiaries thereof. In as much as the "trustee" was precluded from exercising any of the "powers of ownership" of the policy, it is apparent that the "trustee" acted more as an agent for the shareholders rather than as an independent trustee.

On brief taxpayer has argued that inclusion of the insurance proceeds along with inclusion of the balance on the promissory note would result in double taxation.

In most cases when the issue of double taxation has been before the court, the owner and beneficiary of the insurance policy was the business entity involved. In those cases

> the question before the court involved indirect ownership of the proceeds through the insured's ownership in the entity.
>
> In this case no portion of the value of the proceeds is indirectly included in the value of the Decedent's gross estate. The fact that the trustee paid a portion of the proceeds to the Company (rather than to the new owners of the Company) would be relevant if the value of the company (as affected by those proceeds) were relevant in determining the value of the Decedent's gross estate.

II.Q.4.i.ii.(a). Trust Ownership of Policy

Reg. § 20.2042-1(c)(4) provides:

> A decedent is considered to have an "incident of ownership" in an insurance policy on his life held in trust if, under the terms of the policy, the decedent (either alone or in conjunction with another person or persons) has the power (as trustee or otherwise) to change the beneficial ownership in the policy or its proceeds, or the time or manner of enjoyment thereof, even though the decedent has no beneficial interest in the trust. Moreover, assuming the decedent created the trust, such a power may result in the inclusion in the decedent's gross estate under section 2036 or 2038 of other property transferred by the decedent to the trust if, for example, the decedent has the power to surrender the insurance policy and if the income otherwise used to pay premiums on the policy would become currently payable to a beneficiary of the trust in the event that the policy were surrendered.

Letter Ruling 9622036 discussed the following scenario:

> You represent that A, B, and C are the shareholders of Corporation X, a "subchapter C" corporation. Shareholder A owns 43 percent of the stock of the corporation; shareholder B owns 14 percent of the stock, and shareholder C owns 43 percent of the stock. Shareholder A is the father of shareholder C. Shareholder B is not related to shareholder A or C.
>
> The corporation and the three shareholders have entered into a stock restriction agreement. It is represented that the agreement was contracted on a bona fide basis for full and adequate consideration. The agreement is legally binding and enforceable against the shareholders and their estates under state law. The agreement provides for the transfer of a shareholder's corporate stock in the event of the death, disability, retirement, or termination of employment of that shareholder. At a shareholder's death, the shareholder (or his estate) is obligated to sell, and the surviving shareholders are obligated to buy, his shares at a price specified in the agreement. The agreement requires that the shareholders purchase life insurance on the lives of the other shareholders to ensure payment of the purchase price. The policies that are purchased must be made expressly subject to the agreement. Each shareholder, in signing the agreement, agrees that he will not exercise any of the rights, privileges, or benefits accruing under the policies owned by him and that he will not assign, encumber, borrow against, or otherwise dispose of the policies without the prior written consent of all other shareholders.
>
> Pursuant to the agreement, two life insurance policies have been purchased by the shareholders. Policy 1 is a first-to-die life insurance policy which designates A and C as

the insureds and B or his estate as the owner. At the death of the first-to-die of A or C, the survivor of A or C is named the beneficiary of 75 percent of the proceeds of the policy and B is named the beneficiary of the remaining 25 percent.

A second policy, Policy 2, is a life insurance policy on the life of B that is owned by shareholders A and C. Shareholders A and C are each beneficiaries of 50 percent of the proceeds of Policy 2. The premiums on Policies 1 and 2 are paid by the corporation under a collateral assignment split dollar agreement.

Upon the death of a shareholder, the stock restriction agreement requires that the surviving shareholders purchase, on a pro rata basis, such shares of the corporation owned by the decedent as may be purchased for cash with the proceeds of the life insurance policy. The estate of the decedent is obligated to sell such shares. The purchase price under the agreement is to be redetermined annually at the end of each fiscal year by the unanimous agreement of the shareholders. If the shareholders fail to redetermine the value of the shares, the fair market value of the stock is to be determined by an independent certified public accountant. In the event that the insurance proceeds are not sufficient to purchase all of the deceased shareholder's shares, the corporation is obligated to purchase the balance of the shares. The party that has the obligation to purchase the stock of a deceased shareholder may retain any policy proceeds that are in excess of the amount necessary to purchase the stock. The agreement is made expressly binding upon all shareholders and their respective heirs, executors and administrators, successors and assigns.

The shareholders propose to create an irrevocable trust and transfer Policy 1 and Policy 2 to the trust. The trustee of the trust will be a third party unrelated to A, B, or C, and will at no time be a shareholder of the corporation. The trust will be named the beneficiary of the proceeds of each policy and all "policy rights" will be transferred to the trustee of the trust. The "policy rights" include all of the right, title, interest, ownership, control, and incidents of ownership in any and all insurance policies that become subject to the terms of the trust, and in any insurance provided under such policies, together with any additions to such insurance. The "policy rights" are also defined to include any conversion privilege, waiver of premium benefit and accidental death benefit, the right to pledge the policy for a loan or to obtain from the insurer a loan against the surrender value of the policy, and the right to assign, pledge, sell or otherwise dispose of any and all right, title, interest, ownership, option, election, privilege, or benefit under the policy.

Upon receipt of any proceeds under either policy, the trustee is obligated to distribute such proceeds to the surviving shareholders who, pursuant to the agreement, are obligated to purchase the decedent's shares. The proceeds are to be distributed in proportion to the percentage of stock held by each surviving shareholder (excluding the stock owned by the deceased shareholder). In the event that a shareholder's shares are purchased by the other shareholders pursuant to the terms of the agreement for any reason other than the shareholder's death, the trustee is obligated to distribute any policy in which the selling shareholder is a named insured to the purchasing shareholders in proportion to the stock ownership of the purchasing shareholders (excluding the shares of stock being purchased from the selling shareholder). In the event of a liquidation of the corporation, the entire trust corpus must be distributed to the shareholders in proportion to their respective percentage stock ownership in the corporation.

Letter Ruling 9622036 ruled that each insured did not hold incidents of ownership:

> In the present case, shareholders A, B, and C, have entered into a binding stock restriction agreement with respect to their corporate stock. The agreement is funded, in part, by a first-to-die life insurance policy, Policy 1, on the lives of shareholders A and C. A portion of the proceeds from Policy 1 is payable to the survivor of A and C, and a portion is payable to B. The beneficiaries must use the policy proceeds to purchase the decedent's stock in the corporation.
>
> The agreement is also funded by a second policy, Policy 2, which insures the life of shareholder B. The proceeds of Policy 2 are payable equally to shareholders A and C. The beneficiaries must use the policy proceeds to purchase the decedent's stock in the corporation.
>
> The shareholders propose to transfer Policy 1 and Policy 2 to an irrevocable trust. The trustee of the trust will be a third party, unrelated to A, B, or C, who will not be a shareholder in the corporation. The trust will be named the beneficiary of the proceeds of each policy and all "policy rights" will be transferred to the trustee of the trust.
>
> We conclude that the proceeds of Policy 1 will not be includible in the gross estate of the first to die of shareholder A or shareholder C under section 2042(2), after the proposed transfer of the policy to the irrevocable trust. Similarly, the proceeds of Policy 2 will not be includible in the gross estate of shareholder B under section 2042(2), after the proposed transfer of the policy to the irrevocable trust.

Zaritsky & Leimberg, ¶7.04. Life Insurance Funding for Buy-Sell Agreements, *Tax Planning with Life Insurance: Analysis With Forms* (WG&L), commented on Letter Ruling 9622036:

> The Service ruled that the shareholders did not have incidents of ownership over the policies held by the trust. Although this ruling appears to be favorable, there are several issues that the Service did not address. For example, it is unclear whether one of the shareholders (and which one) must report as taxable income the economic benefit of the policies, since it cannot be known whom the survivor of the father and son will be. In this regard, it is unclear whether 75 percent of the economic benefit should be allocated to or between father and son (the survivor of whom will receive 75 percent of the proceeds) and whether the remaining 25 percent of the economic benefit should be allocated to the unrelated shareholder, who will receive the 25 percent balance of the proceeds. Similarly, it is unclear how the parties should measure the annual economic benefit, as there is no official IRS table for measuring the value of coverage under a first-to-die contract. Furthermore, it is unclear whether there has been a transfer for value, and whether, if neither father nor son reports any annual economic benefit, whether the proceeds payable to the survivor should be subjected to ordinary income tax treatment.
>
> Policy 2 in the ruling was owned by the father and son and insured the life of the unrelated shareholder. When the unrelated shareholder died, the proceeds would be split equally between father and son. The Service could argue that neither father nor son would have allowed the other to be an automatic surviving owner had the other not allowed the same. That reciprocity could provide the consideration required to invoke the transfer-for-value rules. Because of the underlying business reasons for the insurance coverage, it may be difficult to argue that the "transfer" between father and son qualifies under the "gift" exception to the transfer-for-value rule, despite the family relationship. If

father and son owned the policy on the unrelated shareholder as tenants-in-common (rather than as joint tenants with rights of survivorship) and one of them died, the decedent's interest in the policy on the unrelated shareholder's life would vest in the decedent-policy owner's estate. It is unclear how the surviving owner would acquire the interest from the deceased's estate without creating a transfer for value.

The ruling was requested because the shareholders wanted to create an irrevocable trust with an independent trustee and transfer both policies to that trust. The trust is to be the beneficiary of the proceeds of Policy 1 and Policy 2 and also hold all policy rights. The taxpayers' letter indicated that those policy rights encompass every right that might be considered an incident of ownership. When the trust receives policy proceeds, it must pay out the money to the surviving shareholders who are obligated to buy a decedent's shares—in proportion to the percentage of stock held by the surviving shareholders (without counting stock owned by the estate of the deceased shareholder).

If a shareholder's stock were bought on an event other than death, the trustee must distribute the policy on the selling shareholder's life to the buying shareholders in proportion to their percentage ownership (without counting stock owned by the selling shareholder). If the corporation were liquidated while the shareholders were alive, any policy or other asset in the trust must be distributed to the shareholders in proportion to their respective stock ownership in the corporation. In other words, policy ownership will never revert to the insured. The Service stated that, after the policies are transferred to the trust, the proceeds from Policy 1 and Policy 2 will not be includable in the insured's estate. That favorable outcome was based on the belief that all ownership rights were to be held by the trust, and that there would be no "reversion" of ownership or beneficial interest to the insured. Although it is not totally clear from the facts, it appears that at the death of any shareholder, his interest in the life insurance on the lives of the other shareholders shifts to the surviving shareholder(s). This would be a transfer of an interest in a policy for valuable consideration (*i.e.*, each shareholder tacitly has agreed to allow the interest he owns in a policy to shift to the others in return for their agreement to reciprocate). As noted previously, in the event of a corporate liquidation while all three shareholders are alive, the policies will be distributed in proportion to their respective stock ownership. Were the first-to-die policy to be distributed, father and son (the insureds) would be among the "purchasing" shareholders (together with the unrelated party), and part of the policy will be distributed to father and son, or both. If so, it is unclear what percentage of the assets should be distributed to each of the beneficiaries—in an unsigned document, the decedent could possibly resolve all the potential transfer-for-value problems by making the shareholders legitimate partners in a bona fide partnership, one actually engaged in a business or investment enterprise that meets state and federal law partnership requirements. This brings all three shareholders into a safe harbor exception to the transfer-for-value rule and assures that the life insurance proceeds will be income tax free.

The intent in the arrangement in this ruling was to fund a cross-purchase plan with a minimum number of policies and reduce administration. The ruling seems to bless this approach by stating that neither policy would be includable in the insured's estate. However, planners should consider income as well as estate tax implications. Any transfer for value that were made before the transfer of the policies to the trust would, however, remain, because of the arrangements. Thus, the death proceeds may to be treated as ordinary income taxable to the beneficiaries.

For details on the income issues that concerned Zaritsky & Leimberg, see part II.Q.4.b Transfer for Value Rule; Basis.

Further below are authorities when the insured is a trustee or a beneficiary.

The Official Tax Court Syllabus for *Estate of. Fruehauf v. Commissioner*, 50 T.C. 915 (reviewed 1968), summarized:

> Decedent's wife owned several insurance policies taken out on the life of her husband. She died 14 months before her husband. In the wife's will it was provided that the policies were to go to a trust of which decedent was cotrustee and income beneficiary. The trustees were given broad powers to retain policies as long as they desired, to assign some of the policies to obtain money to pay premiums, to designate themselves as beneficiaries, and to sell or convert policies for cash surrender value. Held, the proceeds of the policies were correctly included in decedent's estate and he held incidents of ownership over the policies within sec. 2042, I.R.C. 1954, and the fact that his powers, affecting the beneficiaries' enjoyment of the proceeds, were held by him in his capacity as trustee, was immaterial.

The majority reasoned and held:

> There is no merit in petitioners' argument. The right of the insured or his estate to the economic benefits of the policy is merely one of the several incidents of ownership. The argument advanced by petitioners was rejected in *United States v. Rhode Island Hospital Trust Co.*, 355 F.2d 7 (C.A. 1, 1966), where the court said:
>
>> Plaintiffs seize on Section 20.2042-1(c)(2) of the Treasury Regulations on Estate Tax, which says "… the term 'incidents of ownership' is not limited in its meaning to ownership of the policy in the technical legal sense. Generally speaking, the term has reference to the right of the insured or his estate to the economic benefits of the policy." Plaintiffs urge that there must be "a real control over the economic benefits". To this there are two answers. First, it is clear that the reference to ownership in the "technical legal sense" is not abandoned and supplanted by reference to "economic benefits". Second, the regulation goes on to list illustrative powers referred to by Congress in its reports. All of these are powers which may or may not enrich decedent's estate, but which can affect the transfer of the policy proceeds…..
>
> In *United States v. Rhode Island Hospital Trust Co.*, *supra*, the court said the relevant question to ask with respect to this statute is: "Did he [decedent] have a capacity to do something to affect the disposition of the policy if he had wanted to?" It cannot be said the capacity to do something to affect the disposition of the policy is lacking merely because it is held in a fiduciary capacity.
>
> It is no answer to say that decedent as trustee owed a duty to the beneficiary to faithfully administer the trust and the beneficiary could have had his actions with respect to the trust corpus reviewed in an action at law or in equity. *Cf. Reinecke v. Smith*, 289 U.S. 172 (1933). As stated in *United States v. Rhode Island Hospital Trust Co.*, *supra*, it is the existence of "powers" that renders the proceeds of the policies taxable as distinguished from the existence of "rights" or duties owed to others.

In the last-cited case, in answer to the same argument with respect to decedent's power over the property being limited because of trustee duties and responsibilities, the court said:

> For decedent had some powers—perhaps not rights, but powers—which could, if exercised alone or in conjunction with another, affect the disposition of some or all of the proceeds of the policy.

There is no doubt at all but that sections 2038 and 2042 are parts of a tax pattern to make includable in the gross estate property over which the decedent held various powers affecting beneficial enjoyment. Since case law makes immaterial for purposes of section 2038 the capacity in which the powers are held, it is not logical to make capacity a significant factor as far as section 2042 is concerned.

In spite of the fact that there is language expressing a contrary view in some of our prior cases, we now hold that the fact the powers over the policies were held by decedent in a fiduciary capacity is no bar to their constituting incidents of ownership under section 2042.

The Sixth Circuit affirmed, 427 F.2d 80 (1970), while disagreeing with the breadth of the Tax Court's reasoning:

> While the opinion of the Tax Court clearly related the holding to the facts of this case, certain language in that opinion is susceptible to interpretation as a broad per se rule that possession by a decedent of powers constituting incidents of ownership in insurance policies on his life, regardless of the capacity in which they are held, always requires inclusion of the proceeds of the policies in the decedent's gross estate. In reasoning to this conclusion the Tax Court placed heavy reliance on a number of cases[2] which arose under § 2038 (and its predecessor sections) of the Code. Section 2038 charges a decedent's gross estate with any property of which he made an inter vivos transfer if, at the date of his death, he possessed the power to "alter, amend, revoke, or terminate" the transfer. The statute also provides that the existence of the power is to be determined "without regard to when or from what source the decedent acquired the power." Thus, the Tax Court reasoned:
>
> > "There is no doubt at all but that sections 2038 and 2042 are parts of a tax pattern to make includable in the gross estate property over which the decedent held various powers affecting beneficial enjoyment. Since case law makes immaterial for purposes of section 2038 the capacity in which the powers are held, it is not logical to make capacity a significant factor as far as section 2042 is concerned."
>
> and held that:
>
> > "[T]he fact the powers over the policies were held by decedent in a fiduciary capacity is no bar to their constituting incidents of ownership under section 2042." 50 T.C. at 926.
>
> [2] *E.g.*, *Van Beuren v. McLoughlin*, 262 F.2d 315; (1st Cir. 1958), *cert. denied* (359 U.S. 991 (1959); *Estate of Loughridge v. Commissioner*, 183 F.2d 294 (10th Cir. 1950), *cert. denied*, 340 U.S. 830 (1950); *Union Trust Company of Pittsburgh v.*

> *Driscoll*, 138 F.2d 152 (3rd Cir. 1943), *cert. denied*, 321 U.S. 764 (1944); *Welch v. Terhune*, 126 F.2d 695 (1st Cir. 1942).

We must disagree with the Tax Court's broad per se rule. We believe that there is a distinction between the issues arising under § 2038 where the decedent, as transferor of certain property, possesses at his death the power, even though in a fiduciary capacity, to revoke or change the transfer, and the issues in a case arising under § 2042 where the decedent is the transferee, in a fiduciary capacity, of powers constituting incidents of ownership in the insurance policies on his life. Where a decedent holds the requisite powers over policies on his life solely because he is a transferee, in a fiduciary capacity, of those powers, with no beneficial interest therein, such arrangement can hardly be construed as a substitute for testamentary disposition on decedent's part. *Cf*. *Porter v. Commissioner*, 288 U.S. 436, 444 (1933); *Commissioner v. Chase National Bank*, 82 F.2d 157, 158 (2d Cir. 1936).

Moreover, the Tax Court has previously held that where the decedent himself procured the policies on his life and transferred them to a trust, while retaining certain powers over the policies in a fiduciary capacity, the proceeds of the policies were not includible in the decedent's gross estate. In *Estate of Newcomb Carlton*, 34 T.C. 988 (1960), *rev'd on other grounds*, 298 F.2d 415 (2d Cir. 1962), the decedent originally procured 21 insurance policies on his life. He then transferred them to a trust, together with certain securities, with instructions to use the net income from the securities to pay the premiums on the life insurance policies. The decedent originally retained certain powers over the policies, but by a subsequent instrument he relinquished all rights over the trust except the right to the income from the trust in excess of that necessary to pay the premiums on the life insurance policies, and the right to appoint a co-trustee, including himself, for a co-trustee who had resigned. Decedent never exercised the power to appoint himself as co-trustee, but he retained that power until his death. Had he appointed himself as co-trustee he would have had, in conjunction with the other co-trustees, broad powers to borrow on the insurance policies or surrender them for their cash surrender value, powers which would constitute incidents of ownership in the policies. The Tax Court stated, however:

> "Any control that decedent would have acquired over the insurance policies had he appointed himself co-trustee would have been control over the policies jointly with the corporate trustee as trustee only and such control would be solely for the benefit of the trust. Such control as trustee would not constitute incidents of ownership in the insurance policies in decedent except in his capacity as trustee for the benefit of the trust." 34 T.C. at 996.

In *Estate of Bert L. Fuchs*, 47 T.C. 199 (1966), the decedent was one of three business partners who funded a partnership purchase agreement with insurance policies on the lives of the respective partners. The purchase agreement provided that the beneficiaries would be the owners of the policies, that the beneficiaries would pay the premiums on the policies, and that the insureds would have no right, title or interest in the policies on their respective lives. Through inadvertence on the part of the insurance agent, the policies showed ownership to be in the insured rather than in the beneficiaries, thereby giving the insured the right under the policy to change the beneficiary and to surrender or assign the policies. Nevertheless the Tax Court held that the insured decedent did not possess any incidents of ownership in the policies on his life at the date of his death. While that determination was based on a finding that the insurance policies were subject to the provisions in the partnership purchase agreement, the Tax Court clearly recognized the nature of the fiduciary relationship:

> "Assuming, arguendo, that the insured of each policy herein possessed the naked power to change beneficiaries or make an assignment, we cannot say, in view of the partners' agreement regarding the policies, that the insured herein should be treated in any way differently than a common trustee. Each insured herein was under no less of a legal duty to respect the terms of the partners' agreement than a common trustee legally obligated to respect the terms of a trust indenture. Decedent merely had the same type of power over the ... policies as a trustee's power to affect trust proceeds. We do not believe that this type of naked power alone is sufficient to bring the insurance proceeds within decedent's gross estate." 47 T.C. at 204.

We believe that the Tax Court in this case ignored what it had clearly recognized in these prior cases, *i.e.*, the fundamental nature of the fiduciary relationship. Accordingly, we decline to hold that mere possession by a decedent of any powers in the nature of incidents of ownership in a fiduciary capacity invariably requires inclusion of the proceeds of the policies on the decedent's life in his gross estate.

Our rejection of the per se rule of the Tax Court majority opinion does not dispose of the case, however. In an opinion in which three other judges joined, Judge Simpson of the Tax Court similarly rejected the per se rule of the majority opinion but concurred in the result because of the special facts of this case. Judge Simpson viewed the powers held by decedent in his fiduciary capacity as broad enough to permit their exercise for his individual benefit. Specifically, the concurring opinion concluded that decedent had the power as trustee under paragraph Eighth of his wife's will to surrender the insurance policies for their cash surrender values. The amounts so received could then have been added to the corpus of the trust, thereby increasing the income receivable from the trust by decedent as income beneficiary.

The estate's first response to this analysis of the facts is that decedent did not actually have any powers as trustee or any right to receive any increased income which would result from a surrender of the insurance policies because, at the date of his death, no distribution of assets had been made to the trust, and neither decedent nor any of the other co-trustees had been formally appointed as trustees of the testamentary trust by the state probate court. In support of this argument the estate contends that the normal period for the administration of decedents' estates in Michigan is eighteen months, and since decedent's death here occurred only fourteen months after his wife's death the testamentary trust could not reasonably have been created.

It appears, however, that eighteen months is the maximum period allowable by a Michigan probate court for the administration of an estate before the accrual of interest on pecuniary bequests begins. See *In re Howlett's Estate*, 275 Mich. 596, 602, 267 N.W. 743, 745 (1936). It does not appear that swifter administration of an estate is impossible. Decedent here had the power to become both trustee and life income beneficiary of the testamentary trust through the exercise of his powers as executor of the will. We believe that it is the existence of that power, not its exercise, which is determinative. Merely because decedent had not performed certain acts necessary to enable [pg. 70-1627] him to become trustee-beneficiary of the trust does not detract from his power to do so. Moreover, under the terms of paragraph Eighth of his wife's will decedent had the power in his capacity as executor as well as trustee to surrender the policies for their cash

> value. Accordingly, he could have surrendered the policies for their cash value while he was executor thereby enlarging the income producing ability of the corpus available for distribution in due course to the testamentary trust. We therefore do not consider it significant that decedent had not been formally appointed trustee by the probate court.
>
> The estate's second line of argument is that the fiduciary duty of loyalty imposed upon decedent in his capacity as executor and trustee would have prevented him from exercising any of the powers granted to him in any manner which would benefit himself to the detriment of the remainderman; that any powers granted to decedent which would appear to give him authority to perform acts which would benefit himself to the detriment of the remainderman were void as a matter of law.
>
> It is a well-established rule of law that a fiduciary cannot use his position to benefit himself in his individual capacity. See *e.g.*, *Michigan Trust Co. v. Luton*, 267 Mich. 547, 554, 255 N.W. 351, 353-54 (1934); *Chambers v. Chambers*, 207 Mich. 129, 136, 173 N.W. 367, 369-70 (1919); *Sloan v. Silberstein*, 2 Mich. App. 660, 673, 141 N.W.2d 332, 338 (1966); Bogert, *Trusts and Trustees* § 129 (2d ed. 1965); II *Scott on Trusts* § 170.23 (3rd ed. 1967). There is, however, an equally well established countervailing rule of law that a fiduciary may be authorized by the terms of the instrument creating his powers to do that which in the absence of such provision would be a violation of his fiduciary duty of loyalty. II *Scott on Trusts* § 170.9 (3rd ed. 1967). Michigan courts have recognized this rule. See *Waddell v. Waddell*, 335 Mich. 498, 506-7, 56 N.W.2d 257, 260-61 (1953).
>
> Under the provisions of paragraph Eighth of decedent's wife's will, decedent was authorized, both as executor and as trustee, to surrender the policies on his life for their cash value. If this had been done the policies would have been transformed from non-income producing assets designed to benefit primarily the ultimate beneficiary of the trust into income producing assets (since it must be assumed that such proceeds would not remain idle), which would benefit decedent when he assumed his capacity as trustee and income beneficiary of the trust. We must therefore hold that under the facts of this case decedent could exercise powers in the nature of incidents of ownership in the policies to his individual benefit, and that therefore the proceeds of the policies were includible in his gross estate.

Does being the trustee of a trust containing an insurance policy on the trustee's life, with the trustee having no beneficial interest in the trust, result in estate tax inclusion under Code § 2042? *Estate of Skifter v. Commissioner*, 468 F. 2d 699 (2d Cir. 1972) held that the insured as trustee would not have an includable incident of ownership unless the insured had transferred the policy to the trust, implying this requirement into the regulation, which otherwise would not have complied with the statute:

> Although this legislative history is hardly conclusive on the matter, we feel that there is sufficient support to justify our conclusion that Congress intended § 2042 to parallel the statutory scheme governing the interests and powers that will cause other types of property to be included in a decedent's estate. This conclusion is reinforced by the types of interests and powers that Congress indicated were exemplary of what it meant to be included within the scope of "incidents of ownership." The interests there listed are interests that would cause other types of property to be included in a decedent's estate under § 2036 or § 2037; and the powers that Congress discussed are also powers that would result in the property being included in the decedent's estate under § 2038 or

§ 2041.[4604] Therefore, in ruling on the Commissioner's contention that the fiduciary power here involved is an "incident of ownership," a question that has not been considered under § 2042, we feel that we should look to the experience under the statutory scheme governing the application of the estate tax to other types of property. Indeed, the Commissioner, in making his contention before us, relies on numerous analogies to decisions under these other statutory provisions.

The core of the controversy here centers on the decedent's power, as trustee, to prefer the current income beneficiary over the remainderman and all later income beneficiaries through payment of the entire trust corpus. He did not have the power to alter or revoke the trust for his own benefit and he could not name new, additional, or alternative beneficiaries. In this regard, Reg. § 20.2042-1(c)(4) provides:

> A decedent is considered to have an "incident of ownership" in an insurance policy on his life held in trust if, under the terms of the policy, the decedent (either alone or in conjunction with another person or persons) has the power (as trustee or otherwise) to change the beneficial ownership in the policy or its proceeds, or the time or manner of enjoyment thereof, even though the decedent has no beneficial interest in the trust.

The Commissioner contends that this regulation requires that the proceeds of the policies here be included in decedent's estate.

The Tax Court declined to interpret that regulation so as to make it applicable here, but concluded that, since the power could not be exercised to benefit the decedent or his estate, it would not cause the proceeds to be included in his estate. If the power had been exercisable for the benefit of decedent, or for the benefit of whomever the decedent selected, it would have been necessary to include the proceeds in the estate; for there would be a powerful argument that this was an incident of ownership since he would have had the equivalent of a power of appointment, which under § 2041 would cause other types of property to be included in the estate of the holder of such a power. This distinction causes us to concur in the Tax Court's conclusion that the Commissioner's reliance on our decision in *Commissioner v. Karagheusian's Estate*, 233 F.2d 197 (2d Cir. 1956), is misplaced.

The power that the decedent possessed was over the entire trust corpus, which included property other than the insurance policies. But there is no serious doubt that this power did not result in this other property being in decedent's estate for tax purposes. This type of power would fall under both § 2036 and § 2038. The former provision is clearly not triggered in this case because it only applies to a power retained by the grantor over the income from property when he transferred it to another. Thus, for purposes of § 2036, it would not matter that the decedent effectively had the power to deprive later income beneficiaries of the income from the corpus in favor of an earlier income beneficiary. However, the latter provision, § 2038, would apply because decedent had the power "to alter, amend ..., or terminate" the trust. The Commissioner has pointed to many cases holding that such a power would result in the property interest over which the power could be exercised being included in the estate of the holder of the power. See *e.g.*

[4604] [my footnote:] See parts III.C.1 Whether Code § 2036 Applies, III.D Code § 2038, and II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap, the latter of which covers Code § 2041. Code § 2038 cases often cite *Skifter*.

Lober v. United States, 346 U.S. 335 (1953); *United States v. O'Malley*, 383 U.S. 627 (1966) (decided under § 2036); *Commissioner v. Newbold's Estate*, 158 F.2d 694 (2d Cir. 1946). Therefore, he argues, this power must be an incident of ownership for § 2042 purposes also.

But the Commissioner's reliance on § 2038 cases exposes the fatal flaw in his position. The cases he cites dealt with powers that were retained by the transferor or settlor of a trust. That is not what we have here; the power the decedent had was given to him long after he had divested himself of all interest in the policies—it was not reserved by him at the time of the transfer. This difference between powers retained by a decedent and powers that devolved upon him at a time subsequent to the assignment is not merely formal, but has considerable substance. A taxpayer planning the disposition of his estate can select the powers that he reserves and those that he transfers in order to implement an overall scheme of testamentary disposition; however, a trustee, unless there is agreement by the settlor and/or beneficiaries, can only act within the powers he is granted. When the decedent is the transferee of such a power and holds it in a fiduciary capacity, with no beneficial interest therein, it is difficult to construe this arrangement as a substitute for a testamentary disposition by the decedent. *Cf. Porter v. Commissioner*, 288 U.S. 436, 444 (1933); *Commissioner v. Chase National Bank*, 82 F.2d 157, 158 (2d Cir. 1936).

Accordingly, we conclude that, although such a power might well constitute an incident of ownership if retained by the assignor of the policies, it is not an incident of ownership within the intended scope of § 2042, when it has been conveyed to the decedent long after he had divested himself of all interest in the policies and when he cannot exercise the power for his own benefit. We justify this interpretation of "incidents of ownership" on the apparent intent of Congress that § 2042 was not to operate in such a manner as to discriminate against life insurance, with regard to estate tax treatment, as compared with other types of property. We also note that our conclusion comports with the views expressed by the Sixth Circuit in *Estate of Fruehauf v. Commissioner*, 427 F.2d 80, 84-85 (6th Cir. 1970). Therefore, we must reject the contention of the Commissioner that the language of § 2042 requires that it be given a broader scope of operation than the statutes covering other types of property.

Until now, the discussion has assumed that § 2038 only applies when the power possessed by the decedent was reserved by him at the time he divested himself of all interest in the property (other than life insurance) subject to the power. This necessitates a brief discussion of the language of § 2038, which provides in pertinent part:

> The value of the gross estate shall include the value of all property to the extent of any interest therein of which the decedent has at any time made a transfer ..., by trust or otherwise, where the enjoyment thereof was subject at the date of his death to any change through the exercise of a power (in whatever capacity exercisable) ... *without regard to when or from what source the decedent acquired such power*), to alter, amend, revoke, or terminate ... (emphasis added).

The emphasized language would appear to indicate that § 2038 would apply even when the power was acquired under circumstances such as are present here. However, there is no indication that the Commissioner has ever made such an argument and we have been able to find no case applying § 2038 in this manner.

> The noted language was added to the predecessor of § 2038 in 1936 in response to the decision in *White v. Poor*, 296 U.S. 98 (1935). In that case, the decedent had created an inter vivos trust and conferred on the trustee the power jointly to terminate the trust. Subsequently, the decedent was appointed a successor trustee. Therefore, at death decedent possessed this power to terminate and the Commissioner attempted to apply the predecessor to § 2038; but the Supreme Court held this was impermissible because decedent had not retained the power at the time of transfer but had received it later. It was for the purpose of changing this result that Congress added the emphasized language. However, this language appears never to have been applied to a power other than one that the decedent created at the time of transfer in someone else and that later devolved upon him before his death. In essence, the language has been applied strictly to change the result in *White v. Poor*.
>
> We need not here consider the reasons for applying § 2038 to powers such as that involved in *White v. Poor*. Nor need we speculate whether or not such a power would trigger § 2042, for that question is not before us. What is significant for our purposes is that § 2038 has not been applied when the power possessed by decedent was created and conferred on him by someone else long after he had divested himself of all interest in the property subject to the power. Therefore, because of our view that Congress did not intend § 2042 to produce divergent estate tax treatment between life insurance and other types of property, we conclude that the fiduciary power that Skifter possessed at his death did not constitute an "incident of ownership" under § 2042; hence, that provision does not require that the life insurance proceeds at issue be included in Skifter's estate.
>
> The Tax Court was thus correct in holding that Reg. § 20.2042-1(a)(4) must be read to apply to "reservations of powers by the transferor as trustee" and not to powers such as that in issue. Accordingly, the decision of the Tax Court is affirmed.

GCM 39317 followed *Skifter*. However, *Rose v. U.S.*, 511 F.2d 259 (5th Cir. 1975) held that there was no transfer requirement.

Rev. Rul. 84-179 reasoned:

> The legislative history of section 2042 indicates that Congress intended section 2042 to parallel the statutory scheme governing those powers that would cause other types of property to be included in a decedent's gross estate under other Code sections, particularly sections 2036 and 2038. S. Rep. No. 1622, 83rd Cong., 2d Sess. 124 (1954). See *Estate of Skifter v. Commissioner*, 468 F. 2d 699 (2d Cir. 1972).
>
> Sections 2036(a)(2) and 2038(a)(1) concern lifetime transfers made by the decedent. Under these sections, it is the decedent's power to affect the beneficial interests in, or enjoyment of, the transferred property that required inclusion of the property in the gross estate. Section 2036 is directed at those powers retained by the decedent in connection with the transfer. See, for example, *United States v. O'Malley*, 383 U.S. 627 (1966), 1966-2 C.B. 526. Section 2038(a)(1) is directed at situations where the transferor-decedent sets the machinery in motion that purposefully allows fiduciary powers over the property interest to subsequently return to the transferor-decedent, such as by an incomplete transfer. See *Estate of Reed v. United States*, Civil No. 74-543 (M.D. Fla., May 7, 1975); *Estate of Skifter v. Commissioner*, above cited, at 703-05.

> In accordance with the legislative history of section 2042(2), a decedent will not be deemed to have incidents of ownership over an insurance policy on decedent's life where decedent's powers are held in a fiduciary capacity, and are not exercisable for decedent's personal benefit, where the decedent did not transfer the policy or any of the consideration for purchasing or maintaining the policy to the trust from personal assets, and the devolution of the powers on decedent was not part of a prearranged plan involving the participation of decedent. This position is consistent with decisions by several courts of appeal. See *Estate of Skifter*; *Estate of Fruehauf v. Commissioner*, 427 F.2d 80 (6th Cir. 1970); *Hunter v. United States*, 624 F.2d 833 (8th Cir. 1980). But see *Terriberry v. United States*, 517 F.2d 286 (5th Cir. 1975), *cert. denied*, 424 U.S. 977 (1976); *Rose v. United States*, 511 F.2d 259 (5th Cir. 1975), which are to the contrary. Section 20.2042-1(c)(4) will be read in accordance with the position adopted herein.
>
> The decedent will be deemed to have incidents of ownership over an insurance policy on the decedent's life where decedent's powers are held in a fiduciary capacity and the decedent has transferred the policy or any of the consideration for purchasing and maintaining the policy to the trust. Also, where the decedent's powers could have been exercised for decedent's benefit, they will constitute incidents of ownership in the policy, without regard to how those powers were acquired and without consideration of whether the decedent transferred to property to the trust. *Estate of Fruehauf*; *Estate of Skifter*, above cited at 703. Thus, if the decedent reacquires powers over insurance policies in an individual capacity, the powers will constitute incidents of ownership even though the decedent is a transferee.
>
> In the present situation, D completely relinquished all interest in the insurance policy on D's life. The powers over the policy devolved on D as a fiduciary, through an independent transaction, and were not exercisable for D's own benefit. Also, D did not transfer property to the trust. Thus, D did not possess incidents of ownership over the policy for purposes of section 2042(2) of the Code.

Rev. Rul. 84-179 held:

> An insured decedent who transferred all incidents of ownership in a policy to another person, who in an unrelated transaction transferred powers over the policy in trust to the decedent, will not be considered to possess incidents of ownership in the policy for purposes of section 2042(2) of the Code, provided that the decedent did not furnish consideration for maintaining the policy and could not exercise the powers for personal benefit. The result is the same where the decedent, as trustee, purchased the policy with trust assets, did not contribute assets to the trust or maintain the policy with personal assets, and could not exercise the powers for personal benefit.

Citing Rev. Rul. 84-179 with approval, Letter Ruling 9602010 reasoned and held:

> In the present case, the Indenture of Trust vests the trustees of the separate trusts with all rights, title, and interest in and to the policies and prohibits the trustees from distributing any portion of a life insurance policy or its proceeds to the insured daughter. In addition, neither A nor B can serve as a trustee under the Indenture of Trust. Therefore, we need not address specifically the problems concerning the application of 2042(2) where the insured holds powers over the life insurance policies in a fiduciary capacity. Instead, we must consider A and B's powers over the maintenance and distribution of the assets held in their separate trusts. The ability to control these assets

may indirectly give A and B or their estates powers over the economic benefits of the life insurance policies.

Although A and B are the income beneficiaries of their respective separate trusts and each has the right to receive distributions of principal, their rights to distributions of principal are subject to the trustees absolute discretion. Neither A nor B can direct corpus to be distributed to themselves.

Under the Indenture of Trusts, the separate trusts were created by A and B's father. The annual premiums on the life insurance policies will be paid from the principal of the separate trusts. Neither A nor B can transfer assets to their separate trusts. Therefore, neither A nor B can maintain any life insurance policies held by their separate trusts with personal assets.

Although both A and B have special powers of appointment to cause the trustees of their separate trusts to distribute principal of their separate trusts to such beneficiaries (other than the daughter, her creditors, her estate, or the creditors of her estate) as they designate, these powers of appointment are effective only when there are no life insurance policies on the life of the beneficiary included in trust assets. Generally, an inter vivos exercise of a special power of appointment could reduce the principal of a trust so that there are insufficient funds to pay the premiums on the life insurance policies. In addition, a testamentary exercise of a special power of appointment could result in a reversionary interest in the life insurance policies. In this case, the special powers of appointment are not effective when insurance policies on the life of the beneficiary-daughter are among trust assets. Therefore, A and B cannot exercise their special powers of appointment to gain any economic benefits of the life insurance policies.

Based on the facts and representations made in your request for rulings and your subsequent submissions, we conclude that neither A nor B will possess any incidents of ownership over life insurance policies on their lives held by the trustees of their irrevocable trusts and that the proceeds of the policies will not be includible in their gross estates under section 2042(2).

We express no opinion at this time with respect to the gift tax consequences to A or B where the trustees of their separate trusts invest in a nonincome-producing life insurance policy on their lives.

Letter Ruling 9111028 involved the following facts:

A is a trustee of the Trust. The Trust, a family trust, was originally part of a revocable trust, which, on B's death, was divided into the Trust and a marital trust. The trustee of the Trust is to pay to or apply for the benefit of A (B's surviving spouse) and B's descendants as much of the net income and principal of the Trust as the trustee deems necessary or advisable for their education, health, maintenance, and support, provided that no distribution to the descendants will operate to discharge or relieve A of any legal support obligation. Any income not distributed is accumulated and added to principal. Distributions of principal from the Trust to A are to be made only after exhaustion of the marital trust principal.

> A has a limited power to appoint, at any time, all or any portion of the principal of the Trust, other than any insurance policy on her life, to or for the benefit of B's descendants, in such amounts and proportions, and terms as A may elect. A may remove a trustee without reason by written notice at any time.
>
> The Trust provides that any trustee with an interest in the trust is excluded from decisions to distribute income or principal to such trustee except as limited by an ascertainable standard. In addition, the trustee is excluded from making any decisions with respect to distributions to any person the trustee is legally obligated to support. Any individual trustee whose life is insured by a policy held as trust property is prohibited from exercising any power conferred on the owner of such policy.

Letter Ruling 9111028 reasoned and held:

> In the present case, distributions of income and principal of the Trust can only be made to A or B's descendants when the trustees deem it necessary or advisable for their education, health, maintenance, and support. A, as a trustee whose life is insured by a policy held by the Trust, is specifically prohibited from exercising any power normally conferred on the owner of a policy. In addition, although A has a special power of appointment over the Trust principal, any insurance policies on A's life are specifically excluded from the scope of that power. Therefore, A does not possess any incidents of ownership over the policies on A's life held by the Trust that would cause inclusion of the policies in A's gross estate at A's death.

Letter Ruling 9434028 involved the following facts:

> You represent that, in 1975, the taxpayer's father created an irrevocable trust for the benefit of the taxpayer. The taxpayer is the life income beneficiary of the Trust and is currently serving as trustee. As trustee, she may also distribute principal to herself under an ascertainable standard relating to her maintenance. During the taxpayer's lifetime, she has the power to appoint all or any portion of the Trust principal to, or for the benefit of any one or more of her issue. Upon her death, the Trust assets will be distributed to her issue, per stirpes. Under the laws of the state in which the Trust was created, the powers granted to the trustee of the Trust include the power to invest and reinvest, as the fiduciary deems advisable, in insurance contracts on the life of any beneficiary or of any person in whom a beneficiary has an insurable interest, and generally in such property as the fiduciary shall deem advisable, even though such investment shall not be of the character approved by applicable law but for this provision.
>
> The taxpayer proposes to resign as trustee of the Trust. The terms of the Trust provide for a specified successor third-party trustee if the trustee should resign or fail to serve for any reason. If this third-party trustee should fail to serve, a corporate bank is named as trustee. You represent that the successor trustee proposes to purchase a life insurance policy on the life of the taxpayer. It is represented that the annual premium on the policy will be paid from Trust principal. On the taxpayer's death, the insurance proceeds will be paid to the Trust and will be allocated to principal, which will be distributed as set forth in the trust instrument.

Letter Ruling 9434028 reasoned and held:

> In the present case, the taxpayer is currently trustee and income beneficiary of the Trust and has the right to receive discretionary distributions of corpus for her maintenance. The taxpayer proposes to resign as trustee of the Trust. A third-party named in the Trust instrument will become successor trustee. It is represented that the successor trustee, after being named trustee, proposes to purchase a life insurance policy on the life of the taxpayer. The Trust was created and funded by the taxpayer's father during his lifetime and the taxpayer has not transferred any assets to the Trust. The annual premiums on the policy will be paid from the principal of the Trust and the taxpayer will not maintain the policy with personal assets.
>
> We express no opinion at this time with respect to the gift tax consequences to the taxpayer/income beneficiary where the trustee invests in a nonincome-producing life insurance policy on the taxpayer's life.
>
> We conclude that the taxpayer will not possess incidents of ownership over a life insurance policy on her life that is purchased by the successor trustee of an irrevocable trust where the taxpayer is the former trustee. Therefore, the proceeds of the policy will not be includible in the taxpayer's gross estate at her death under section 2042(2), assuming that the taxpayer is not reinstated as trustee and serving in that capacity at the time of her death or, after being reinstated, subsequently resigns as trustee within three years of her death. See *Estate of Fruehauf* and Rev. Rul. 84-179.

Letter Ruling 9602010 involved the following facts:

> The Grantor proposes to execute an Indenture of Trust. Under the Indenture of Trust, the Grantor will establish two separate irrevocable trusts, one for the benefit of each of his two daughters, A and B. Under the terms of the Indenture of Trust, trust assets include the property listed in "Schedule A" of the Indenture of Trust. In addition, the trustees shall accept any other property which may be transferred to them by the Grantor or others by will or other instrument. Neither the Grantor nor his daughters may serve as trustees.
>
> During each daughter's lifetime, the net income of her separate trust is to be distributed to the daughter in convenient periodic installments. The trustees, also, may distribute to each daughter principal of their separate trust. The amount of principal distributable is the amount the trustees, in their absolute discretion, deem advisable and is not limited otherwise.
>
> Generally, during a daughter's lifetime, the trustees must distribute principal of the daughter's separate trust to any beneficiary (other than the daughter, her creditors, her estate, or the creditors of her estate) the daughter designates in writing. This power of appointment, however, is not effective if the daughter's separate trust holds any insurance policies on the life of the daughter.
>
> Upon a daughter's death, the balance of the principal of the daughter's separate trust is distributable to any beneficiary (other than the daughter, her creditors, her estate, or the creditors of her estate) the daughter appoints by will or other written instrument delivered to the trustees during her lifetime. This power of appointment, however, is not effective if,

at the time of the daughter’s death or immediately prior to her death, the daughter’s separate trust holds any insurance policies on the life of the daughter.

To the extent that a daughter fails to exercise her power of appointment or cannot exercise her power of appointment prior to or upon her death, the remaining principal of her separate trust will be distributed to her issue then living, per stirpes. If there is no such issue, the trust assets shall be divided among the Grantor’s issue then living, per stirpes. Any share attributable to A or B shall be added to such daughter’s separate trust established under the Indenture of Trust. In the case of a share attributable to a child of the Grantor born subsequent to the date of the Indenture of Trust, that child’s share shall be added to a trust established under another indenture of trust with terms identical to the terms in the Indenture of Trust. Each share attributable to a grandchild of the grantor shall be held in a separate trust for the benefit of such grandchild.

Section VI of the Indenture of Trust gives the trustees of each separate trust the power to purchase life insurance policies on the life of the beneficiary of the separate trust. In addition, section VII indicates that life insurance policies may be among the assets transferred to the separate trusts. Under section VII of the Indenture of Trust, the trustees are vested with all rights, title, and interest in and to the policies. In addition, the trustees of each separate trust may not distribute to the beneficiary all or any portion of a policy of insurance on the life of the beneficiary.

It is represented that the annual premiums on any life insurance policies on the life of the beneficiaries will be paid from principal of the separate trusts. On the death of A or B, the insurance proceeds of the life insurance policies will be paid to their respective separate trust and will be allocated to principal, which will be distributed as set forth in the trust instrument.

Letter Ruling 9602010 reasoned and held:

Under the facts presented in the ruling, the decedent transferred the policy to the spouse and subsequently, in an unrelated transaction, reacquired incidents of ownership over the policy in a fiduciary capacity. The ruling holds that under these circumstances, the decedent will not be considered to possess incidents of ownership in the policy for purposes of section 2042(2), provided the decedent did not furnish consideration for maintaining the policy and could not exercise the powers for the decedent’s personal benefit. The ruling further provides that the result would be the same if the decedent acting as trustee purchased a policy as a trust asset. The ruling states, however, that where the decedent’s powers over the policy could have been exercised for the decedent’s benefit, they would constitute incidents of ownership in the policy without regard to how those powers were acquired and without consideration of whether or not the decedent was the source of the funds used to pay the premiums. See *Estate of Fruehauf v. Commissioner*, 427 F.2d 80 (6th Cir. 1970).

In the present case, the Indenture of Trust vests the trustees of the separate trusts with all rights, title, and interest in and to the policies and prohibits the trustees from distributing any portion of a life insurance policy or its proceeds to the insured daughter. In addition, neither A nor B can serve as a trustee under the Indenture of Trust. Therefore, we need not address specifically the problems concerning the application of 2042(2) where the insured holds powers over the life insurance policies in a fiduciary capacity. Instead, we must consider A and B’s powers over the maintenance and distribution of the assets held in their separate trusts. The ability to control these assets may indirectly give A and B or their estates powers over the economic benefits of the life insurance policies.

Although A and B are the income beneficiaries of their respective separate trusts and each has the right to receive distributions of principal, their rights to distributions of principal are subject to the trustees absolute discretion. Neither A nor B can direct corpus to be distributed to themselves.

Under the Indenture of Trusts, the separate trusts were created by A and B's father. The annual premiums on the life insurance policies will be paid from the principal of the separate trusts. Neither A nor B can transfer assets to their separate trusts. Therefore, neither A nor B can maintain any life insurance policies held by their separate trusts with personal assets.

Although both A and B have special powers of appointment to cause the trustees of their separate trusts to distribute principal of their separate trusts to such beneficiaries (other than the daughter, her creditors, her estate, or the creditors of her estate) as they designate, these powers of appointment are effective only when there are no life insurance policies on the life of the beneficiary included in trust assets. Generally, an inter vivos exercise of a special power of appointment could reduce the principal of a trust so that there are insufficient funds to pay the premiums on the life insurance policies. In addition, a testamentary exercise of a special power of appointment could result in a reversionary interest in the life insurance policies. In this case, the special powers of appointment are not effective when insurance policies on the life of the beneficiary-daughter are among trust assets. Therefore, A and B cannot exercise their special powers of appointment to gain any economic benefits of the life insurance policies.

Based on the facts and representations made in your request for rulings and your subsequent submissions, we conclude that neither A nor B will possess any incidents of ownership over life insurance policies on their lives held by the trustees of their irrevocable trusts and that the proceeds of the policies will not be includible in their gross estates under section 2042(2).

We express no opinion at this time with respect to the gift tax consequences to A or B where the trustees of their separate trusts invest in a nonincome-producing life insurance policy on their lives.

Letter Ruling 9748020 involved the following facts:

Decedent's Spouse is the current beneficiary and was one of three co-trustees of Trust B. During her life, the trustees of Trust B are to distribute all of the net income of the trust to Decedent's Spouse. If the income is insufficient to provide for Decedent's Spouse's health, support, and maintenance in accordance with the standard of living she enjoyed at the time of Decedent's death, the trustees are authorized to distribute principal. Decedent's Spouse has no power of appointment over the assets in Trust B. Decedent's children and grandchildren are contingent beneficiaries. Decedent's Spouse resigned as a co-trustee of Trust B on Date 2. The Trust instrument provides that no successor trustee is to be appointed and the remaining trustees will serve as co-trustees.

> Trustees of Trust B propose to purchase a policy of insurance on the life of Decedent's Spouse. Trustees request a ruling that Decedent's Spouse will not possess any incidents of ownership over the life insurance policy on her life held by the trustees of Trust B and that the proceeds of the policy will not be includible in her gross estate under sections 2036 and 2042(2).

Letter Ruling 9748020 cited Reg. §§ 20.2042-1(c)(2)[4605] and 20.2042-1(c)(4) and Rev. Rul. 84-179 and reasoned and held:

> In this case, Decedent's Spouse is the current beneficiary of Trust B. During her life, the trustees of Trust B are to distribute all of the net income of the trust to Decedent's Spouse. If the income is insufficient to provide for Decedent's Spouse's health, support, and maintenance in accordance with the standard of living she enjoyed at the time of Decedent's death, the trustees are authorized to distribute principal. Decedent's children and grandchildren are contingent beneficiaries of Trust B.
>
> Because Decedent's Spouse resigned as a trustee of Trust B, Decedent's Spouse will not possess any incidents of ownership over a life insurance policy on her life purchased by the remaining trustees of Trust B and held as an asset of Trust B. Therefore, proceeds of a life insurance policy on her life purchased by the trustees of Trust B and held as an asset of Trust B will not be included in Decedent's Spouse's gross estate provided that (1) she has not transferred any assets to Trust B, (2) the premiums on the policy are paid from the principal of Trust B, (3) she does not maintain the policy with personal assets, and (4) she is not reinstated as a trustee of Trust B.

Letter Ruling 9748029 involved the following facts:

> On May 7, 1990, A, established an irrevocable trust, Trust, for the benefit of his spouse, B, and his children. The Trust was funded with a second to die life insurance policy on the lives of A and B. The trustees of Trust are A's two children. Under the terms of the Trust, any contribution to the Trust may be withdrawn by B, provided the amount of withdrawal cannot exceed $5,000 for any calendar year. A's children have the right to withdraw a proportionate amount of any contribution not withdrawn by B, not to exceed $5,000. Each withdrawal right lapses on the earlier of (a) the last of the year in which the contribution was made, or (b) 60 days after the contribution. During A's lifetime, the trustee is authorized to use some or all of the trust income to pay premiums on policies of life insurance on the lives of A and B. After paying any insurance premium, the trustees may distribute to or for the benefit of B and the children so much of the trust income and principal as the trustees deem appropriate.
>
> After A's death, the trustees are to pay to or for the benefit of B and the children so much of the Trust's income and principal, as the trustees deem appropriate for the comfort and general welfare of those beneficiaries. Upon B's death, the trustees have discretion to pay B's burial expenses, expenses of her last illness, and death and succession taxes. Any remaining corpus is to be divided into separate shares with a separate share to be distributed to each living child and a share to be distributed per stripes to the living descendants of a deceased child.

[4605] Reg. § 20.2042-1(c)(2) is reproduced in part II.Q.4.i.ii Summary of Estate Tax Rules Governing Life Insurance Payable to a Business Entity.

> A transferred property to Trust, and Trust applied for a second to die life insurance policy on the lives of A and B. Trust has owned the policy at all times. The trustees possess all incidents of ownership in the policy. A died on January 26, 1996, survived by B. B has made no transfers to Trust. The trustees have continued to pay the premiums on the insurance policy from trust funds.
>
> Although a bank is named successor trustee, the trustees have the ability to name additional co-trustees. The trust instrument does not prohibit B from being added as an additional co-trustee.

First, the ruling cited a variety of rules, including Reg. § 20.2042-1(b), which provides:

> (1) Section 2042 requires the inclusion in the gross estate of the proceeds of insurance on the decedent's life receivable by the executor or administrator, or payable to the decedent's estate. It makes no difference whether or not the estate is specifically named as the beneficiary under the terms of the policy. Thus, if under the terms of an insurance policy the proceeds are receivable by another beneficiary but are subject to an obligation, legally binding upon the other beneficiary, to pay taxes, debts, or other charges enforceable against the estate, then the amount of such proceeds required for the payment in full (to the extent of the beneficiary's obligation) of such taxes, debts, or other charges is includible in the gross estate. Similarly, if the decedent purchased an insurance policy in favor of another person or a corporation as collateral security for a loan or other accommodation, its proceeds are considered to be receivable for the benefit of the estate. The amount of the loan outstanding at the date of the decedent's death, with interest accrued to that date, will be deductible in determining the taxable estate. See § 20.2053-4.
>
> (2) If the proceeds of an insurance policy made payable to the decedent's estate are community assets under the local community property law and, as a result, one-half of the proceeds belongs to the decedent's spouse, then only one-half of the proceeds is considered to be receivable by or for the benefit of the decedent's estate.

Letter Ruling 9748029 reasoned and held:

> In the present case, A created and funded the Trust in 1990 and made all transfers to the Trust. B has made no direct contributions nor indirect contributions by reason of the lapse of the $5,000 withdrawal right. See section 2514(e). Under the terms of the Trust, B does not possess any rights within the meaning of sections 2036 or 2038. Assuming B is not named as an additional trustee, B will not have any incidents of ownership in the policy by reason of section 20.2042-1(c)(4). Assuming B does not make any contributions to the Trust (either directly or indirectly) we conclude that the Trust and insurance policy will not be included under sections 2036, 2038, and 2042(2) in B's gross estate upon her death.
>
> However, we express no opinion regarding the application of section 2042(1) which is dependent on facts presented at the spouse's death; for example, whether the trustee

> will be legally bound to pay B's burial expenses, expenses of her last illness, and death and succession taxes at that time. See Rev. Rul. 77-157, 1977-1 C.B. 279.[4606]

Note that the surviving spouse in Letter Ruling 9748029 was not a trustee, did not have any power of appointment, and could not receive any distributions until after the insurance premiums were paid. If a policy on only one spouse can use decent mortality charges and the premium savings from a second-to-die policy is mainly due to a longer time to fund the death benefit, consider whether that timing of premium payments is really worth sacrificing giving the surviving spouse the control that a surviving spouse often has over a spousal limited access trust.

Letter Ruling 200314009 found no incidents of ownership where a grantor had the power to name as a successor trustee anyone except himself or any party related or subordinate to the grantor when the two designated trustees are unavailable to act as trustee or are removed; however, the grounds for removal were not spelled out. The IRS pointed out that Reg. § 20.2042-1(c)(4) provides that:

> A decedent is considered to have an incident of ownership in an insurance policy on his life held in trust if, under the terms of the policy, the decedent, (either alone or in conjunction with another person or persons) has the power (as trustee or otherwise) to change the beneficial ownership in the policy or its proceeds, or the time or manner of enjoyment thereof, even though the decedent has no beneficial interest in the trust.

The IRS looked to Rev. Rul. 77-182 (no Code § 2036 inclusion where decedent could appoint a successor corporate trustee if the original trustee resigned or was removed by judicial process) and Rev. Rul. 95-58 (no Code § 2036 inclusion where decedent could remove the trustee and appoint an individual or corporate successor trustee that was not related or subordinate to the decedent).[4607]

In Letter Rulings 201919002-201919003, the settlor established an irrevocable trust for the benefit of Child 1 and Child 1's descendants, with the trustee being Child 1. When the trustee planned to buy life insurance, the trustee petitioned to have the trust modified so that Child 2 (presumably Child 1/s sibling) would serve as special trustee over insurance, holding all incidents of ownership, and Child 1 would have no power of appointment over the life insurance policy. However, Child 1 had the power to change trustees, so long Child 1 did not appoint a person related to or subordinate to Child 1, within the meaning of Code § 672(c), as successor insurance trustee. Citing Rev. Rul. 84-179 but not Rev. Rul. 95-58, the ruling held:

> In this case, Child 1's powers, in the capacity as Trustee and beneficiary were eliminated prior to the acquisition of the life insurance policy on Child 1's life. Trust is the owner and beneficiary of the policy. Accordingly, when the Insurance Trustee purchased a life insurance policy on Child 1's life, Child 1 did not possess and did not have the power to exercise, any incidents of ownership in the policy acquired by Trust. Child 1 will not relinquish or transfer any incidents of ownership in the policy as a result of the modification prior to the acquisition of the policy.

[4606] Rev. Rul. 77-157 ruled as to Code § 2039(c), which has since been repealed; therefore, Rev. Rul. 88-85 obsoleted Rev. Rul. 77-157.

[4607] "Related or subordinate" looked to Code § 672(c) – see fn. 2541 in part II.J.3.h Drafting for Flexibility in Trust Income Taxation.

> Accordingly, based on the facts submitted and the representations made, we conclude that Child 1 does not and will not possess any incidents of ownership over any life insurance policy on Child 1's life acquired by Trust, as amended, and that the proceeds of any policy on Child 1's life will not be includible in Child 1's gross estate under § 2042(2). The above conclusions assume that Child 1 is not serving as Insurance Trustee at the time of Child 1's death, or Trust is modified such that Child 1 regains fiduciary powers over life insurance on Child 1's life.

A decedent's right to veto a change in the transfer of a policy, where the decedent could gain no economic benefits from the veto power, did not constitute incidents of ownership.[4608]

Letter Ruling 200404013 involved the following facts:

> On Date 1, A created and funded an irrevocable trust, Trust. Under the terms of Trust, the co-trustees (B, A's spouse, and Corporate Trustee) have absolute discretion to distribute income and corpus to A's children and their descendants for such person's care, health, education, maintenance, support, purchase or improvement of home, to establish a professional practice, or acquire an interest in a business. Upon the death of A, or earlier if the Trust fails to qualify as a grantor trust for federal income tax purposes, the trustees are to segregate any shares of stock of a corporation which is an S corporation for federal income tax purposes. The segregated stock is to be held in separate trusts (hereinafter referred to as separate trusts), one trust for each child or deceased child of A. The remainder of any Trust assets are to be held in trusts (hereinafter referred to as remainder trusts), one trust for each child or deceased child of A.
>
> Under the terms of the separate trusts, the net income is to be paid quarterly to the designated child (or in the case of a trust created for a deceased child, the child's descendants). The trustees also have absolute discretion to distribute corpus to such child (or child's descendants as the case may be) for care, health, education, maintenance, support, purchase or improvement of home, to establish a professional practice, or acquire an interest in a business. Upon the death of a child, any remaining corpus that has not been appointed pursuant to a testamentary special power of appointment, is to be held in further trust, under terms and conditions described above, for the child's descendants.
>
> Under the terms of the remainder trusts, the trustees have absolute discretion to distribute income and corpus to A's child and that child's descendants for such person's care, health, education, maintenance, support, purchase or improvement of home, to establish a professional practice, or acquire an interest in a business. Upon the death of a child, any remaining corpus that has not been appointed pursuant to a testamentary special power of appointment, is to be held in further trust, under terms and conditions described above, for the child's descendants.
>
> In the case of the Trust, separate trusts, and remainder trusts, no income or principal may be distributed for support or maintenance of a beneficiary if A or B is legally obligated to support such beneficiary.

[4608] *Estate of Rockwell v. Commissioner*, 779 F.2d 931 (3rd Cir. 1985).

> Under the terms of Trust, the Corporate Trustee may be replaced by the vote of three designated advisors. Under Article XVII, a trustee, by written instrument, may renounce in whole or in part any one or more powers, authorities or discretion given by Trust or by law to that trustee. Under Article XXIV, A may not be appointed trustee, nor may A remove a trustee or appoint a successor trustee.
>
> Trust purchased a joint and survivor life insurance policy on the lives of A and B. It is represented that Trust will make ten annual premium payments and that the Trust should have adequate income each year to fully pay the annual premium. B, as trustee, also executed a written instrument renouncing her right as trustee to: (1) change the beneficiary of the policy; (2) revoke any change of beneficiary; (3) assign the policy; (4) revoke any assignment of the policy; In addition, B has renounced any right to make contributions to Trust and to appoint a successor advisor.
>
> It is represented that A funded Trust, but that B has consented to treat the gift as made one-half by A and one-half by B under § 2513. Further, it is represented that sufficient GST exemption under § 2631 was allocated to Trust, such that Trust has a zero inclusion ratio for GST tax purposes.

Letter Ruling 200404013 reasoned and held:

> In the present case, neither A or B have any beneficial interest in Trust. Trust has purchased the life insurance policy using funds held in trust. Further, it is represented that neither A nor B will make any additional transfers to Trust for the purpose of paying premiums on the policy. Under these circumstances, we conclude that the purchase by Trust of the life policy with Trust assets will not be a treated as a gift by A or B.
>
> In the present case, Trust purchased and owns the life insurance policy. Trust is also the designated beneficiary of the policy proceeds and Trust will also make all future premium payments from Trust assets. Accordingly, we conclude that A will not possess any incidents of ownership, under § 2042(2) and § 20.2042-1(c)(2), in the policies owned by Trust. Further, we conclude that the proceeds of the policies payable to the trustee of Trust will not be includible, under § 2042(2) in the gross estate of A. Further, in the present case, it is represented that B has not transferred any property to Trust, nor will B make any transfers to Trust in the future to maintain the policy. Accordingly, notwithstanding that B is a trustee of Trust, we conclude that B will not possess any incidents of ownership, under § 2042(2) and § 20.2042-1(c)(2), in the policies owned by Trust and the proceeds of the policies payable to the trustee of Trust will not be includible, under § 2042(2) in the gross estate of B. Rev. Rul. 84-179.
>
> In the present case, A and B have treated A's transfer to Trust, as made one-half by each under § 2513. Under § 2652(a)(2), if the requirements for signifying consent under § 2513(b) were satisfied, A and B are each deemed the transferor for Federal GST tax purposes of one-half of A's gift to Trust. It is represented that A and B have each allocated sufficient GST exemption to the Trust such that Trust will have an inclusion ratio of zero for GST tax purposes. As noted above, it is represented that the insurance policy was purchased with current trust assets and all future premium payments will be paid from Trust assets. Accordingly we conclude that the purchase of the insurance policy by Trust, will not affect the identity of the transferors of Trust for GST tax purposes, nor will the purchase effect the inclusion ratio with respect to Trust.

Letter Ruling 200518005 involved the following facts:

> Trust A and Trust B were not established by Taxpayer. Pursuant to the terms of each trust, Taxpayer is to receive the net income of each trust for her life. Upon her death, the principal of each trust is to be divided into equal shares for the benefit of Taxpayer's children. Taxpayer was a co-trustee of Trust A and Trust B, but on Date 1, she renounced all of her rights as co-trustee of Trust A and Trust B in connection with life insurance policies on her life. Life insurance policies on Taxpayer's life were purchased by Trusts A and B using trust corpus subsequent to Taxpayer's renunciation. Taxpayer resigned as co-trustee of Trust A and Trust B on Date 2 and Date 3, respectively. Trustee A and Trustee B are the current co-trustees of both trusts.

Letter Ruling 200518005 reasoned and held:

> In the present case, Taxpayer is the current income beneficiary of Trust A and Trust B. During her life, the trustees of Trust A and Trust B are to distribute all of the net income of each trust to Taxpayer. Upon Taxpayer's death, the trust is to be divided into equal shares for Taxpayer's issue. It has been represented that Taxpayer will not contribute assets to Trust A or Trust B, or maintain the life insurance policies held as assets of Trust A and Trust B with Taxpayer's personal assets.
>
> Based on the foregoing, Taxpayer will not possess any incidents of ownership over the life insurance policies held as assets of Trust A and Trust B because Taxpayer renounced her rights as co-trustee of Trust A and Trust B in connection with the life insurance policies and ultimately resigned as co-trustee of the trusts. Therefore, we conclude that the proceeds of the life insurance policies held as assets of Trust A and Trust B will not be included in Taxpayer's gross estate under § 2042(2) or 2035, provided the premiums for the policies are not paid from the income of Trust A or Trust B.

Letter Ruling 200617008 involved the following facts:

> The Trustees are to pay Wife the entire net income and so much of the principal of Trust A as the trustees in their absolute discretion determine. Trust A is to terminate upon the death of Wife, and the balance of the Trust A corpus is to be paid to Husband's then living issue, per stirpes. The balance of the Trust corpus (after providing for the funding of Trust A) is to be paid to husband's then living issue, per stirpes, provided that any property payable to a child of Husband who had not attained the age of 29 is to be held in further trust for the benefit of the child.
>
> Article Fifth (I) of the Trust Agreement provides that if any person currently eligible to receive any principal or income from any trust created under the terms of Trust is acting as a trustee, then such trustee shall have no power whatsoever to make or participate in making decisions affecting in any way the disposition of the income or principal of such trust to himself or herself, including determining how much income or principal should be distributed and whether the trust should be terminated.
>
> … Wife and Father are currently serving as co-trustees of Trust A.
>
> Wife proposes to resign as co-trustee of Trust A. Subsequent to Wife's resignation, Father, as trustee of Trust A, will apply for and purchase a policy of insurance on Wife's

> life. Trust A will be the owner and beneficiary of the policy. It is represented that the principal of Trust A will be used to pay the premiums on the policy and that the annual premiums will be less than Q% of the principal of Trust A. Wife will not pay any premiums with respect to the policy or otherwise contribute towards the maintenance of the policy. All the income of Trust A will continue to be paid to Wife.

Letter Ruling 200617008 reasoned and held:

> In the present case, Wife will resign as co-trustee of Trust A prior to the acquisition by Trust A of the life insurance policy on Wife's life. Trust A will be the owner and beneficiary of the policy. Accordingly, because Wife is resigning as co-trustee prior to the acquisition of the policy, Wife will never possess, or have the power to exercise, any incidents of ownership in the policy to be acquired by Trust A, nor will she relinquish or transfer any incidents of ownership in the policy by resigning as co-trustee prior to the acquisition of the policy. Further, it is represented that only trust principal will be used to pay the premiums on the policy and the annual premiums will be less than Q% of the Trust A principal. All the income of Trust A will continue to be paid to Wife. In addition, Wife has not transferred, nor will she transfer any assets to Trust A, and she will not pay any premiums with respect to the policy to be held as an asset of Trust A.
>
> Based on the foregoing, we conclude that the proceeds of the life insurance policy to be acquired by Trust A, as described above, will not be includible in Wife's gross estate under section 2042(2). Further, the policy proceeds will not be includible under section 2035(a), if Wife dies within three years of resigning as co-trustee of Trust A. The above conclusions assume that Wife is not reinstated as co-trustee and is not serving as co-trustee at the time of her death, or after being reinstated, subsequently resigns within three years of death. See Rev. Rul. 84-179.

Letter Ruling 201327010 involved the following facts:

> Over a period of years, Taxpayer s spouse, Decedent, purchased several life insurance policies naming Taxpayer as the insured and Decedent s estate as the beneficiary. It is represented that Taxpayer paid none of the premiums on the policies and, as well, that Taxpayer anticipates that no further premiums will be due on the policies.
>
> Decedent died on Date 1. Under Decedent s will ownership of the policies passed to Family Trust. Under the terms of Family Trust, income and principal is distributable to Taxpayer and Decedent s descendants in the discretion of the trustee. The remainder is payable to such persons, other than Taxpayer, Taxpayer s estate, Taxpayer s creditors, or the creditors of Taxpayer s estate, as Taxpayer shall appoint by will, and in default of appointment, to certain takers in default. Taxpayer is named the trustee of Family Trust, as well as the protector of Family Trust, with the power to remove and replace trustees. As trustee, Taxpayer possessed the incidents of ownership in the policies.
>
> On Date 2, pursuant to its terms, Family Trust was divided into two trusts, Family Trust 1 and Family Trust 2. Family Trust 1 was funded with the insurance policies, while Family Trust 2 was funded with the remaining assets. Concurrent with the division of Family Trust, Taxpayer relinquished his roles as trustee and protector of Family Trust 1, his ability to be reappointed as trustee of Family Trust 1, and his power of appointment over the assets of Family Trust 1. Taxpayer retained his beneficial interest in Family Trust 1 as a permissible distributee of trust income and principal.

Letter Ruling 201327010 reasoned and held:

> Here, prior to the Date 2 transaction, Family Trust held policies of insurance on Taxpayer's life. Under the terms of Decedent s will, Taxpayer possessed trustee powers over the Family Trust assets, a beneficial interest in Family Trust, and a testamentary power of appointment over the Family Trust assets. Taxpayer could exercise in a fiduciary capacity the trustee powers over the incidents of ownership in the policies of insurance on Taxpayer's life for Taxpayer's own benefit, and could exercise in his individual capacity the power of appointment over the proceeds of the policies. On these facts, both the fiduciary powers and individually held powers constitute incidents of ownership in the policies, without regard to how those powers were acquired and without consideration of whether Taxpayer transferred property to Family Trust. Section 20.2042-1(c)(4). After the Date 2 transactions, however, with regard to Family Trust 1, Taxpayer held only a beneficial interest as a permissible distributee of income and corpus, but no powers over the policies or their proceeds, and thus, no incidents of ownership for purposes of § 2042(2). Assuming that Taxpayer survives the three-year period of § 2035, the proceeds of the policies will not be includible in Taxpayer s gross estate. Section 20.2042-1(c)(1).

The mere right to the dividends, by itself, is not an incident of ownership that would cause the value of the insurance proceeds to be included in Decedent's gross estate under Code § 2042(2).[4609] This conclusion was based on the view that dividends represent a return of premiums[4610] and did not address whether dividends in excess of premiums would be treated differently.

Letter Ruling 201919002 involved the following facts:

> On Date 1, Settlor established an irrevocable trust, Trust, for the benefit of Child 1 and Child 1's descendants. The Trustee of Trust is Child 1. Settlor predeceased Child 1. It is represented that Child 1 has not made any contributions to Trust and does not intend to make any contributions to Trust.
>
> Section 2.1 of Trust provides that the Trustee is expressly granted the power to own and acquire life insurance and to pay the premiums on existing life insurance on the life of any person in which the trust or its beneficiaries may have an insurable interest. The ownership of any and all policies of insurance applied for and purchased by the Trustee or transferred and assigned to the Trustee is irrevocably vested in the Trustee.
>
> Under Section 2.4, the Trustee is vested with all rights, powers, options, elections, privileges and incidents of ownership in all insurance policies owned by Trust.
>
> Section 2.5 provides that the Trustee shall have the power to use all or any part of the net income or corpus of Trust to pay all or any part of any premiums or other charges due on any insurance policies held in trust. Provided, however, notwithstanding any contrary provision in this paragraph, in the event the Trust owns any life insurance on

[4609] CCA 201328030.

[4610] CCA 201328030 cited *Estate of Bowers v. Commissioner*, 23 T.C. 911, 917 (1955) (the right to dividends, which may be applied against a current premium, is nothing more than a reduction in the amount of premiums paid rather than a right to the income of the policy) and *Estate of Jordahl v. Commissioner*, 65 T.C. 92, 99 (1975) (since dividends are merely a reduction in the amount of premiums paid, the right to dividends is not an incident of ownership).

the life of Settlor, premium payments shall only be made out of corpus, and not out of income (as determined for federal income tax purposes under Subpart E of Part I, Subchapter J, Chapter 1, Subtitle A of the Internal Revenue Code (Code)).

Under Article III, during Child 1's lifetime, the Trustee shall have the power to distribute net income and corpus of Trust as Trustee may determine to be appropriate to provide for the health, support, maintenance and education of Child 1 and Child 1's descendants. Any undistributed net income shall be accumulated and added to the corpus of Trust.

Section 6.1 provides that upon the death of Child 1, Child 1 shall have a testamentary special power of appointment over the remaining assets of Trust limited to the class consisting of Child 1's descendants. To the extent Child 1 does not exercise or ineffectively exercises Child 1's testamentary special power of appointment, then the Trustee shall apportion the property of Trust into separate equal trusts, one for the benefit of each of Child 1's then living children (Child's Trust) and one trust for the benefit of the descendants (Descendant's Trust), taken collectively, of each child of Child 1 who is then deceased leaving descendants then surviving. Moreover, Sections 6.2 and 6.3 grant a testamentary special power of appointment to the primary beneficiary of a Child's Trust or a Descendant's Trust.

Under Section 7.2, Child 1 shall have the power to appoint one or more persons, individual or corporate, to serve as Co-Trustee or sole Trustee of Trust or the separate trusts created hereunder and shall have the power to remove or replace any Co-Trustee or sole Trustee whether named in Trust or appointed pursuant to Article VII. If Child 1 should die, resign or be unable or unwilling to serve as Trustee for any reason, or fail to appoint a successor, then Settlor appoints Child 1's spouse, Spouse, as Trustee. If Spouse is unable to serve for any reason, then Settlor appoints Child 2. Upon the death of Child 1, if Child 1 has not appointed a trustee to succeed upon Child 1's death, Settlor appoints each child of Child 1 as sole Trustee of any separate trust created for his or her benefit.

Section 7.12 provides that Settlor does not intend that the Trustee have any power over trust property that, if held by the Trustee in a fiduciary capacity, would result in inclusion of trust assets in the estate of the Trustee for federal estate tax purposes. To this end, the Settlor appoints the Co-Trustee or, if none, the next Successor Trustee named or appointed under Article VII who is qualified to serve as Trustee and who does not suffer the same disability, as Special Co-Trustee during any period in which a trust governed by this agreement provides for current distribution to beneficiaries to whom the primary Trustee owes a legal obligation of support or contains property over which the primary Trustee's powers would result in such inclusion.

Section 7.12(a) provides that a Special Co-Trustee shall be appointed if a trust governed under this agreement owns or otherwise possesses any incidents of ownership over any life insurance policies on the life of the primary Trustee within the meaning of § 2042.

Section 7.12(c) provides that a Special Co-Trustee shall be appointed if a trust governed under this agreement provides for current distributions to beneficiaries to whom the primary Trustee has a legal obligation of support. The Special Co-Trustee shall have the sole power to determine the amount and timing of any discretionary distribution to a beneficiary to whom the primary Trustee has a legal obligation of support. The primary

Trustee's powers at such times shall be limited to management of trust assets and distributions to beneficiaries to whom the primary Trustee owes no legal support obligation.

In Year 1, Trustee proposed to purchase a life insurance policy on the joint lives of Child 1 and Spouse. However, Section 6.1 of Trust provides Child 1 with a testamentary special power of appointment over all assets contained in Trust. As a result, if Trust owned a life insurance policy on the life of Child 1, there is a risk that the life insurance death benefit proceeds will be included in Child 1's gross estate for federal estate tax purposes upon Child 1's death.

Accordingly, Child 1, in the capacity of Trustee of Trust, petitioned Court to modify the terms of Trust to remove Child 1's testamentary special power of appointment over any life insurance policy on Child 1's life or the proceeds of such policy; to add an Insurance Trustee, who will have sole authority over any insurance policies on the life of Child 1 purchased by Trust; and to modify Trust to require that premium payments on life insurance policies on Child 1 must be paid out of Trust corpus. On Date 2, in Year 1, a Final Judgment of Modification was issued by Court approving the modification of Trust.

Pursuant to the Final Judgment of Modification, Trust is modified as follows: Section 2.5, as modified, provides that if Trust owns any life insurance on the life of Settlor, a beneficiary, or a trustee, premium payments shall only be made out of corpus, and not out of income (as determined for federal income tax purposes under Subpart E of Part I, Subchapter J, Chapter 1, Subtitle A of the Internal Revenue Code (Code)).

Sections 6.1, 6.2 and 6.3, as modified, provide that a holder of a testamentary special power of appointment under the terms of Trust, Child's Trust or Descendant's Trust is excluded from exercising the power over any life insurance policy on such beneficiary's life or proceeds of such policy on such beneficiary's life.

Section 7.12(a) of Trust, as modified, is deleted and replaced with the following:

> Notwithstanding the foregoing procedure, [Child 2] is appointed as Insurance Trustee (hereinafter referred to as "Insurance Trustee") if a trust governed by this Agreement intends to purchase, purchases, owns or otherwise possesses any incidents of ownership over any life insurance policies on the life of the primary Trustee within the meaning of § 2042 of the Internal Revenue Code. [Child 1] shall have the power to: (i) change the Insurance Trustee succession herein, (ii) appoint one or more persons, individual or corporate, excluding [Child 1], to serve as Insurance Trustee or Co-Trustees of this trust or any trust created hereunder, and (iii) remove such persons appointed, whether now serving or appointed to serve in the future. Provided, however, [Child 1] shall not have the power to appoint a person related to or subordinate to [Child 1], within the meaning of § 672(c) of the Internal Revenue Code, as successor Insurance Trustee. The Insurance Trustee shall have the power to maintain the policies in which the applicable trust has an ownership interest and pay the trust's proportionate share of the premiums thereon. If for any reason there are not sufficient funds to pay the premiums and maintain the policies in force, the Insurance Trustee shall have authority to accept paid-up insurance for the policies. Additionally, if necessary for the health, support or maintenance of the beneficiary of that trust, the Insurance Trustee shall have complete authority to surrender the said policies, or borrow on them, and to utilize the proceeds for the benefit of that trust

beneficiary. The Insurance Trustee shall not be liable to any beneficiary by virtue of its decision in exercising its discretion and in carrying out these instructions. If [Child 2] should die, resign or be unable or unwilling to exercise the power described in this subparagraph, unless [Child 1] has otherwise named a successor Insurance Trustee, then a majority of the beneficiaries then entitled or permitted to receive income from each separate trust hereunder, per stirpes and not per capita, who are at least twenty-one (21) years of age, shall have the authority to appoint a successor Insurance Trustee, other than Settlor.

Statute provides, in pertinent part, that on the petition of a trustee or a beneficiary, a court may order that the terms of the trust be modified if because of circumstances not known to or anticipated by the settlor, the order will further the purposes of the trust; modification of administrative, non-dispositive terms of the trust is necessary or appropriate to prevent waste or avoid impairment of the trust's administration; the order is necessary or appropriate to achieve the settlor's tax objectives and is not contrary to the settlor's intentions; or the order is not inconsistent with the material purpose of the trust and all beneficiaries of the trust have consented or are deemed to have consented to the order.

In Year 2, subsequent to the Court's Final Judgment, Child 2, in the capacity of Insurance Trustee, purchased a second-to-die policy on the lives of Child 1 and Spouse.

Letter Ruling 201919002 reasoned and held:

In the present case, prior to the modifications of Trust, Section 2.1 of Trust expressly granted the Trustee the power to own and acquire life insurance and to pay the premiums on existing life insurance on the life of any person in which the trust or its beneficiaries may have an insurable interest. The ownership of any and all policies of insurance applied for and purchased by the Trustee or transferred and assigned to the Trustee is irrevocably vested in the Trustee. Under Section 2.4, Child 1, as the Trustee, is vested with all rights, powers, options, elections, privileges and incidents of ownership in all insurance policies owned by Trust. Accordingly, prior to the modifications, Child 1 possessed all incidents of ownership in any life insurance policy on Child 1's life that the Trust may acquire.

The modifications to Trust relinquished Trustee's powers with respect to any life insurance policy on Child 1's life acquired by Trust and granted such powers to an Insurance Trustee. Under Section 7.12(a), as modified, Child 2 is appointed as Insurance Trustee with power to maintain and pay premiums on a life insurance policy on the life of Child 1. Child 2 shall have complete authority to surrender policies, borrow on them, or utilize the proceeds for the benefit of the beneficiary if necessary for the health, support or maintenance of the beneficiary. Accordingly, Trustee is precluded from exercising any power normally conferred on the owner of a policy.

Child 1 retains a beneficial interest in income and principal of Trust, subject to an ascertainable standard. However, under Section 2.5, as modified, premium payments will only be made out of corpus and not income. In addition, Child 1 has not made any contributions to Trust and further represents that Child 1 will not make any contributions to Trust.

Further, prior to the modifications of Trust, Child 1 possessed a testamentary special power of appointment over the Trust principal, which would include any proceeds from life insurance on the life of Child 1 that Trust may hold. This power gave Child 1 the power to change the beneficial ownership of the proceeds. However, the modifications to Trust restrict Child 1's testamentary special power of appointment. Under Section 6.1, as modified, Child 1 may not exercise Child 1's testamentary special power of appointment over any life insurance policies on the life of Child 1. Accordingly, Child 1 may not exercise Child 1's testamentary special power of appointment to change the beneficial interests in the proceeds of the life insurance policy on Child 1's life.

In this case, Child 1's powers, in the capacity as Trustee and beneficiary were eliminated prior to the acquisition of the life insurance policy on Child 1's life. Trust is the owner and beneficiary of the policy. Accordingly, when the Insurance Trustee purchased a life insurance policy on Child 1's life, Child 1 did not possess and did not have the power to exercise, any incidents of ownership in the policy acquired by Trust. Child 1 will not relinquish or transfer any incidents of ownership in the policy as a result of the modification prior to the acquisition of the policy.

Accordingly, based on the facts submitted and the representations made, we conclude that Child 1 does not and will not possess any incidents of ownership over any life insurance policy on Child 1's life acquired by Trust, as amended, and that the proceeds of any policy on Child 1's life will not be includible in Child 1's gross estate under § 2042(2). The above conclusions assume that Child 1 is not serving as Insurance Trustee at the time of Child 1's death, or Trust is modified such that Child 1 regains fiduciary powers over life insurance on Child 1's life.

We neither express nor imply any opinion concerning the tax consequences of any aspect of any transaction or item discussed or referenced in this letter.

Reviewing various authorities cited above, Mezzullo, T.M. 826-3rd, *Life Insurance*, Detailed Analysis Part I.D., "Special Issues in Trust-Owned Insurance: Application of Incidents of Ownership Test," subpart 1, "What Are Consequences of Decedent Serving as Trustee of Trust Holding Insurance Policy on Decedent's Life?" point e, "Practical Application of Rules," suggests:

- The most cautious approach is for the insured not to serve as a trustee of a trust that holds insurance policies on his or her life, whether or not he or she is the transferor.

- If the insured is to serve as a trustee in a *Estate of Skifter v. Commissioner*[94] situation (that is, where the trust is created by someone other than the insured), certain precautions should be taken. First, the insured should not have a beneficial interest in the trust. If the insured's spouse or children are trust beneficiaries, language should be used precluding trust distributions that may satisfy the insured's obligation of support to the spouse and children. Second, there should be a source for premium payments other than the insured because, under Rev. Rul. 84-179, the insured's powers as trustee may result in the inclusion of the insurance policies in his or her gross estate, if the insured furnished "consideration for maintaining the policies." Thus, it will probably be necessary for the trust holding the insurance policies to hold other assets that can be used to pay premiums.

- If there is a plan for a trust to acquire a policy of insurance on the life of a trustee who is a beneficiary of the trust, the trustee should, before the policy is acquired, either renounce all powers that may affect the policy or resign as trustee.

- Notwithstanding the result in *Estate of Bloch v. Commissioner*,[95] the insured/trustee should not use the trust property for his own benefit in contravention of the terms of the trust. At some point, a court may conclude that the transaction is a sham. Moreover, the planning objective is to avoid, rather than encourage, litigation with the IRS.

- Where a question of inclusion in the decedent's gross estate of the proceeds of an insurance policy on the decedent's life is raised not in a planning context, but as a fait accompli, it should not be assumed that inclusion is inevitable, even if the decedent is transferor, trustee, and beneficiary. As in *Estate of Jordahl v. Commissioner*,[96] the powers of the decedent (under the terms of the relevant document and based on the actual facts) should be analyzed closely in determining whether, in fact, the decedent possessed any incidents of ownership.

Reviewing various authorities cited above, Mezzullo, T.M. 826-3rd, *Life Insurance*, Detailed Analysis Part I.D., "Special Issues in Trust-Owned Insurance: Application of Incidents of Ownership Test," subpart 2, "What Are Consequences if Decedent Is Beneficiary of Trust Holding Insurance Policy on Decedent's Life?" point g, "Guidelines," suggests:

> There are no definitive answers, but the following thoughts are offered as possible guidelines in the insured/beneficiary arena:

- In a number of rulings, the IRS has ruled favorably where the insured/beneficiary was entitled to the income. However, if the insured has the right, as income beneficiary, to demand that the policy be converted to income-producing assets, there is a significant risk that (1) this could create a § 2042 problem under the reasoning of *Estate of Fruehauf v. Commissioner*[99] and/or (2) the failure to exercise the right could have adverse gift and estate tax consequences.

  [99] 427 F.2d 80 (6th Cir. 1970).

- If the insured is entitled to income, the trust should provide that all premium payments will be made from principal, although this will have the effect of reducing the income in the future.

- If distributions to the beneficiary/insured are permitted with no reference to a standard, the insured has no right to the economic benefit of the policy and § 2042 should not apply.

- If distributions can be made to the insured only in accordance with a standard and the standard is not satisfied, § 2042 should not apply because no distribution could be made to the beneficiary.

- If distributions are required to be made to the insured only in accordance with a standard and the standard is satisfied, § 2042 should not apply. Even though the beneficiary has a right to distributions (which right, if not enforced, may create estate and gift tax issues in and of itself), the beneficiary should have no § 2042 economic benefit in the policy if he or she has no right to demand distribution of the policy itself.

- If distributions are permitted (but not required) to be made to the insured only in accordance with a standard and the standard is satisfied, possible § 2042 includibility is even more remote than in the bullet point immediately above.

- All of the above assumes that the insured has not made contributions to the trust. While it may well be that contributions by the insured should have no relevance in the § 2042 context (or at least in this aspect of § 2042), the fact that the favorable result in Rev. Rul. 84-179 (and in each of the private rulings discussed above) is contingent on the no-contribution condition raises a significant concern.

- All of the above assumes that the insured is not a trustee of the trust (or at least has no distribution powers as trustee). While PLR 9111028 shows that it may be possible for the insured/beneficiary to serve as trustee, *Fruehauf* points out the potential danger. A fair inference from the private letter rulings discussed above is that the renunciations and resignations were a prerequisite to the favorable rulings.

- The beneficiary/insured should not hold any power of appointment (inter vivos or testamentary) over the insurance policy.

- *Bottom* Line: The taxpayer may want to consider requesting a private letter ruling. While there are certainly trusts with other terms that should be outside the scope of § 2042, a conservative approach is to draft a trust in which (1) the only permissible distributions to the insured are in the discretion of the trustee (without a standard), (2) distribution to the insured of any insurance policy on his or her life is prohibited, and (3) the insured has no power of appointment over any such policies.

To me, the focus seems to be whether the beneficiary might have been able to make a claim on the money used to pay premiums because the trustee diverted to the policy money that should have been distributed to the beneficiary. I think that this emphasis is misplaced, in that the beneficiary cannot control the trustee's actions and should not be imputed incidents of ownership unless the beneficiary actually obtains authority to exercise incidents of ownership; however, the IRS' and courts' opinion is much more important than my view. To avoid these concerns, the trustee might consider forming a partnership to hold the policy.[4611]

II.Q.4.i.ii.(b). Corporate Ownership of Policy

However, redemptions require further analysis, as do arrangements for cross-purchase agreements when all of the parties hold policies on each other through an entity. If a decedent

[4611] See text accompanying fns 3032-3033 in part II.J.19.b Comparing Annuity to Life Insurance.

is the sole or controlling shareholder of a corporation that owns an insurance policy on the decedent's life, then the decedent will not be deemed to possess incidents of ownership as a result of the decedent's stock ownership so long as the proceeds of the policy are payable to the corporation.

Reg. 20.2042-1(c)(6) provides:

> In the case of economic benefits of a life insurance policy on the decedent's life that are reserved to a corporation of which the decedent is the sole or controlling stockholder, the corporation's incidents of ownership will not be attributed to the decedent through his stock ownership to the extent the proceeds of the policy are payable to the corporation. Any proceeds payable to a third party for a valid business purpose, such as in satisfaction of a business debt of the corporation, so that the net worth of the corporation is increased by the amount of such proceeds, shall be deemed to be payable to the corporation for purposes of the preceding sentence. See § 20.2031-2(f) for a rule providing that the proceeds of certain life insurance policies shall be considered in determining the value of the decedent's stock. Except as hereinafter provided with respect to a group-term life insurance policy, if any part of the proceeds of the policy are not payable to or for the benefit of the corporation, and thus are not taken into account in valuing the decedent's stock holdings in the corporation for purposes of section 2031, any incidents of ownership held by the corporation as to that part of the proceeds will be attributed to the decedent through his stock ownership where the decedent is the sole or controlling stockholder. Thus, for example, if the decedent is the controlling stockholder in a corporation, and the corporation owns a life insurance policy on his life, the proceeds of which are payable to the decedent's spouse, the incidents of ownership held by the corporation will be attributed to the decedent through his stock ownership and the proceeds will be included in his gross estate under section 2042. If in this example the policy proceeds had been payable 40 percent to decedent's spouse and 60 percent to the corporation, only 40 percent of the proceeds would be included in decedent's gross estate under section 2042. For purposes of this subparagraph, the decedent will not be deemed to be the controlling stockholder of a corporation unless, at the time of his death, he owned stock possessing more than 50 percent of the total combined voting power of the corporation. Solely for purposes of the preceding sentence, a decedent shall be considered to be the owner of only the stock with respect to which legal title was held, at the time of his death, by (i) the decedent (or his agent or nominee); (ii) the decedent and another person jointly (but only the proportionate number of shares which corresponds to the portion of the total consideration which is considered to be furnished by the decedent for purposes of section 2040 and the regulations thereunder); and (iii) by a trustee of a voting trust (to the extent of the decedent's beneficial interest therein) or any other trust with respect to which the decedent was treated as an owner under subpart E, part I, subchapter J, chapter 1 of the Code immediately prior to his death. In the case of group-term life insurance, as defined in the regulations under section 79, the power to surrender or cancel a policy held by a corporation shall not be attributed to any decedent through his stock ownership.

Letter Ruling 9511009 involved a transfer from corporations of policies on the lives of both shareholders, with each shareholder receiving the policies on the other's life to facilitate a cross-purchase:

> B1 and B2 together own 100% of the stock of Corporation 1 and Corporation 2 (Corporations). B1 and B2 also together own 100% interests in Partnership 1 and

> Partnership 2 (Partnerships). Corporations currently own various life insurance policies on the lives of Partners. Corporations are the beneficiaries of these policies and make all of the premium payments.
>
> Under the terms of the shareholder's agreement currently in force, on the death of a shareholder, the surviving shareholder is required to purchase, and the estate of the deceased shareholder is required to sell, the deceased shareholder's stock.
>
> Separately, all of the parties mentioned herein have now entered into a Stock Purchase Agreement and Partnership Interest Purchase Agreement (Stock Purchase Agreement) which supersedes the earlier Stock Purchase Agreement and Amended Stock Transfer Restriction Agreement regarding how the stock or partnership interests will be purchased on the death of either Partner.
>
> Corporations propose to distribute the life insurance policies to Partners for cash surrender value. Partners will receive the policies insuring the life of the other partner/shareholder. Contemporaneously, Partners will assign the policies to Trust. Trust will be the beneficiary of the policies and the trustee will be an unrelated third party. Partners represent that Trust is a grantor trust under sections 671-677 of the Code. Partners will make payments to Trust in the amount of the premiums necessary to maintain the policies.
>
> The terms of Trust require that, after the death of the first of Partners to die, the trustee will distribute the proceeds of the policies to the decedent's estate on behalf of the surviving Partner in payment of the purchase price of the stock of Corporations the survivor is required to purchase. If the purchase price of the stock as set forth in the partner's/shareholder's agreement is less than the amount of the proceeds, any excess insurance proceeds will be distributed to the surviving partner/shareholder.

Letter Ruling 9511009 reasoned:

> In the present case, Partners will assign the polices to an irrevocable life insurance trust (Trust). The beneficiary of the policies at the death of the first Partner to die will be Trust. The trustee of Trust and not Partners will hold all incidents of ownership on the polices. Accordingly, neither Partners will hold incidents of ownership in the policies on their lives during the time the policies are held by Trust.
>
> Further, the terms of Trust require that the trustee distribute the proceeds of the policies to the estate of the first Partner to die on behalf of the surviving partner/shareholder, in payment for the stock the survivor is required to purchase, and the decedent's estate is required to sell. Any proceed in excess of the amount required under the shareholder's agreement to purchase the stock will be distributed to the surviving Partner. Thus, any proceeds received by the decedent's estate will be remitted on behalf of the survivor as payment for the purchase of decedent's stock in Corporation, and will not be received by the executor as the beneficiary, either directly or indirectly, of the insurance proceeds.
>
> In the present case, Partners will hold incidents of ownership over the insurance policies during the time in which the policies are held by Partners as individuals. However, the policies held by each Partner during this time will be the policies insuring the life of the other Partner. Accordingly, the policies would not be includible in the gross estate of the Partner holding the policies under section 2042 of the Code if that Partner had retained

> the policies until his death and, thus, the proceeds would not be includible in the gross estate of that Partner under section 2035 if the Partner dies within three years of the transferring the policies to Trust.

Letter Ruling 9511009 held:

> The policy proceeds will not be received by the executor of Partners' estate for purposes of section 2042(1) of the Code, nor will either Partner hold incidents of ownership to the irrevocable life insurance trust. Thus, the proceeds of the polices will not be includible under section 2042 in the gross estate of the insured Partner while the policies are held by Trust.

II.Q.4.i.ii.(c). Partnership Ownership of Policy

Neither Code § 2042 nor its Regulations specifically address the issues raised by insurance owned by a partnership in which the insured is a partner. However, case law and IRS rulings have analyzed these issues. The Tax Court has held that a general partner does not possess incidents of ownership in a policy that names a general partnership as the owner and beneficiary if the policy was purchased in the partnership's ordinary course of business and the insured partner owned less than a 50% interest in the general partnership.[4612] Rev. Rul. 83-147 held that a partner does possess incidents of ownership if the policy on the partner's life is owned by the partnership, designates a member of the partner's family as the beneficiary, and premiums were paid by the partnership in partial satisfaction of the partner's share of partnership income. The ruling stated that the result was different than the Tax Court case because the beneficiary was not the partnership.

In a number of Letter Rulings, the IRS has addressed Code § 2042 with respect to a partnership that owns and is designated as the beneficiary of an insurance policy on the life of one of its partners.

Letter Ruling 9623024 held that the insured general partner does not possess incidents of ownership in the policy if the partnership agreement states that the proceeds, once received by the partnership, can be distributed to the remaining partners in proportion to their interests to the extent that the proceeds from the policy were not needed to pay the partnership's obligations. The IRS reasoned that the value of the deceased partner's interest would include his pro rata portion of the proceeds and therefore inclusion under Code § 2042 would amount to unwarranted double counting of the proceeds.

Letter Rulings 9625022 and 9625023 ruled that life insurance proceeds would not be included in the estate of a member in a limited liability company (that was taxed as a partnership) who could not participate in decisions regarding a policy insuring the member's life held. Letter Rulings 9625013-9625019 had the same result and also involved using the proceeds to fund the purchase of a deceased owner's share of a related corporation and also of the limited liability company, which held real estate that it rented to the corporation.

[4612] *Estate of Knipp v. Commissioner*, 25 T.C. 153 (1955), *acq*. in result, 1959-1 C.B. 4, *aff'd* on another issue 244 F.2d 436 (4th Cir.), *cert. denied*, 355 U.S. 827 (1957).

Letter Rulings 9843024 and 200111038 held that the insured limited partner does not possess incidents of ownership in the policy if the partnership agreement precludes the limited partners from exercising any control over the partnership's management and investment activities.

Letter Ruling 200017051 ruled that the insured general partner does not possess incidents of ownership in the policy if the partnership agreement expressly states that an insured partner "had no right or power to exercise or to otherwise participate in the exercise of any of the incidents of ownership with respect to such policy or policies."[4613]

In Letter Ruling 200214028, the IRS ruled that the insured general partner did not possess incidents of ownership because the proceeds were payable to or for the benefit of the partnership. In that case, the partnership agreement required that the proceeds be used to redeem the insured partner's interest in the partnership.

TAM 200432015 dealt with Code section 2042 and the transfer of insurance policies to a limited liability company. The TAM deals with Code §§ 2035 and 2042 and involves an insured who transferred an insurance policy on his own life to a limited liability company. If none of the insureds own policies on their own lives that they transfer to a limited liability company, the TAM would not apply.

II.Q.4.i.iii. IRS' Response to Request that Resulted in Letter Ruling 200747002

In response to my ruling request, Letter Ruling 200747002 held that none of the insureds possessed incidents of ownership on the policies that the others contributed to the LLC.

However, the IRS requested some modifications to the LLC's operating agreement. The IRS limited the members' ability to make decisions regarding the LLC's holding of policies. Not mentioned in the ruling is that the operating agreement originally allowed the members voting rights customarily given in a manager-managed LLC, limiting them only to the extent that no member could vote regarding insurance on that member's life. The IRS was concerned that the members could collude in a manner akin to the reciprocal trust doctrine, so it required that the operating agreement preclude members from voting on anything relating to any life insurance policy. Similarly, the IRS required that the operating agreement not expressly authorize amendments by the members, preferring that applicable state law defaults control the situation.

The ruling did not address the effect of the members' assigning their interests in the LLC to others. Although the IRS was not troubled by the prospect of that occurring, it did not wish to consider situations that might arise by reason of such an assignment.

An issue with respect to with a ruling was not sought is the transfer-for-value rules, which make death benefits taxable if policies are transferred in various taxable transactions.[4614] Formation of the LLC should not implicate these rules, because formation is a nontaxable transfer.[4615] Similarly, a Member receiving an increased ownership percentage of a policy due to an increased contribution is also a nontaxable transfer.[4616] In our case, the Members also

[4613] It did not think to cite cases involving trust-owned insurance on a beneficiary's life, where no incidents of ownership were attributed to the beneficiary. Letter Rulings 9602010 and 9748020. Rev. Rul. 84-179 might also be helpful.
[4614] Code § 101(a)(2).
[4615] Code §§ 101(a)(2)(A), 721(a).
[4616] Code § 721(a).

participated in other LLCs that held rental real estate; because they were partners for income tax purposes, the transfer-for-value rules do not apply to transfers of policies between them.[4617]

II.Q.4.i.iv. Significance of Letter Ruling 200747002

The ruling has other implications. Using a corporate trustee to hold the policies as manager of the LLC provides security that the proceeds will be used as intended. As mentioned, one of the disadvantages of a cross-purchase is that a shareholder's creditors might be able to prevent application of the proceeds. Depending on applicable state law, the insurance being in an LLC might make a charging order the exclusive remedy. A charging order allows creditors to receive any distributions that belong to the debtor but does not allow the creditor to force the LLC to make distributions. The manager's duty to the other members would prevent the proceeds from being distributed without the consent of the deceased shareholder's beneficiaries.

The operating agreement's original restrictions on members' voting rights generally should be sufficient to avoid estate inclusion. The additional restrictions should be placed in the operating agreement only if seeking a Letter Ruling or advising a client who is willing to sacrifice flexibility to be as close as possible to the letter ruling's facts.

Letter Ruling 200747002 is not geared towards a policy with cash values. However, through a split-dollar arrangement, one might carve out the term portion for the LLC and make other arrangements with the cash value.[4618] Although the term portion eventually becomes uneconomic, one could use a variety of estate-planning techniques with the cash value portion before that happens so that, ultimately, the insurance arrangement becomes sustainable.

The ruling also held that Brother's Irrevocable Trust was a grantor trust, in which Brother was treated as owning Brother's Irrevocable Trust's assets for income tax purposes under Code § 678; Sister was similarly treated as the owner of Sister's Irrevocable Trust. This was critically important to allow Brother's Irrevocable Trust and Sister's Irrevocable Trust to own stock in the S corporation. Brother initially had a withdrawal right in Brother's Irrevocable Trust that had since lapsed; the same tool was used for Sister and Sister's Irrevocable Trust. Although such withdrawal rights are usually used to obtain the gift tax annual exclusion, in this case a significant purpose of granting withdrawal rights was to obtain grantor trust status treating the beneficiary as the owner.

The above issues are as far as the ruling was sought to cover. However, this structure has uses far beyond the issues discussed in the ruling.

First, Trusts 2A and 2B were originally funded with modest gifts that they invested in LLCs that used bank financing to buy real estate. These LLCs leased the real estate to the S corporation. The net cash flow from the rental operations would be used to pay the life insurance premiums through the insurance LLC. Thus, the income tax goal of holding real estate in partnerships was married with leveraging gifts to generation-skipping trusts.

Second, Trusts 2A and 2B were ideal for the tactic of selling stock to an irrevocable grantor trust.[4619] For example, Brother could sell S stock to Brother's Irrevocable Trust in exchange for a promissory note. No income tax would result during Brother's life, because Brother is treated

---

[4617] Code § 101(a)(2)(B).
[4618] See footnote 4306 for a summary of how split-dollar arrangements work.
[4619] See part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts.

for income tax purposes as owning Brother's Irrevocable Trust. If the IRS determined that the stock's value was too high and that therefore Brother made a gift, Brother would pay no gift tax because the gift is an incomplete gift due to Brother's power to appoint the trust's assets at death. If Brother's Irrevocable Trust were thinly funded, Brother and other trusts created by Grantor for Brother could guarantee the promissory note to provide additional economic reality to the sale.

If Brother dies during the term of the note, Sister and BA would use the insurance to buy Brother's Irrevocable Trust's stock, thus providing cash to retire the note to Brother.

If the sale of S stock to Brother's Irrevocable Trust generates cash flow in excess of the note payments, the excess cash could be used to pay premiums through the insurance LLC, allowing Brother's Irrevocable Trust to participate more in the buy-sell than it would have been able to do with just the net rental proceeds.

Note that Brother has access to the excess funds for Brother's support. The excess funds could also be used to help Brother's children when they are no longer legally dependents, without being limited by the annual gift tax exclusion or using Child 2A's applicable exclusion amount.

What if the parties had used a cash value policy subject to a split-dollar arrangement instead of term policies? After Brother's Irrevocable Trust fully repays the note on the sale of stock, it should have plenty of cash flow to repay the split-dollar obligations.

Sister would use the same strategy.

II.Q.4.i.v. Practical Logistics for Life Insurance LLC

First, keep in mind that any person who is at least a 5% owner of the LLC would be considered an employee whose notice and consent are required, as described in part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance. Whether the parties transfer the life insurance to the LLC or the LLC buys original issue insurance, the parties will probably use a notice and consent along the lines of part II.Q.4.g.iii Consent for Owner Who Is Not an Employee. However, the operating agreement might also include notice and consent as a safety valve.[4620]

Often, the operating business will pay the premiums on behalf of the owners – just to make sure it gets done so that the business' succession plan is funded as expected.

If the operating business is a C corporation, it would account for the premium payments as compensation (as an officer or director), because dividends are nondeductible to the company and taxable to the shareholders.

If the operating business is an S corporation, it would account for the premium payments as compensation or as a distribution. Compensation tends to be the more popular choice, in that it can be non-pro rata, but the parties' economic deal might make distributions more attractive, and any temporary timing differences of distributions should not cause problems with the S corporation single class of stock rules.[4621] However, in the Sixth Circuit the corporation might

[4620] See fn. fn. 4569, which is found in part II.Q.4.g.i Analysis of Code § 101(j); for an example, see part II.Q.4.g.ii Consent Integrated into Operating Agreement.
[4621] See part II.A.2.i.ii Temporary Timing Differences.

be compelled to treat the economic benefit from a split-dollar arrangement[4622] as a distribution.[4623]

When the operating company is taxed as a partnership, it might consider setting up a separate distribution account for premiums paid on behalf of each owner. That way, the distributions can be reconciled more easily against what the life insurance LLC is doing.

When the operating company pays a term premium, the life insurance LLC would credit the relevant owner's capital account with a contribution and debit premium expense, with the premium expense separately allocated to the relevant owner.

II.Q.4.i.vi. Letter Ruling 200947006

The IRS has also ruled that an insured who was a partner in a partnership had no incidents of ownership. In Letter Ruling 200947006, the insured had direct and indirect ownership of a partnership that held a policy on his life.[4624] That partnership and other partnerships (in which the insured had direct or indirect ownership) were beneficiaries. The arrangement was restructured so that the insured had no right to make decisions on behalf of a trust that owned the partnership, and the insured's other direct or indirect interest in the partnership was terminated. The IRS ruled that the insured not only had no incidents of ownership after the transaction but also (to avoid Code § 2035) had no incidents of ownership before the transaction.

II.Q.4.i.vii. Conclusion

The Insurance LLC provides security for the owners, facilitates flexibility in making premium payments, and demonstrates a model for reducing the number of policies that must be used in a cross-purchase. Convincing the business owners' parents to set up generation-skipping perpetual trusts to buy real estate used in the business can help the business owners continue to enjoy the business' financial success while moving the business outside of the estate tax system.

For income tax issues generally, see parts II.Q.4.e Income Tax Issues When the Owner Who Is Not the Insured Dies. If a life insurance policy owned on a surviving owner receives a new basis when the beneficial owner predeceases the surviving owner,[4625] consider whether this new basis increases the "investment in the contract" and, if not, whether additional steps should be taken to effectuate that increase.[4626]

[4622] See generally part II.Q.4.f Split-Dollar Arrangements.
[4623] See text accompanying fns 4469-4473 in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit **Arrangement under Reg. § 1.61-22**.

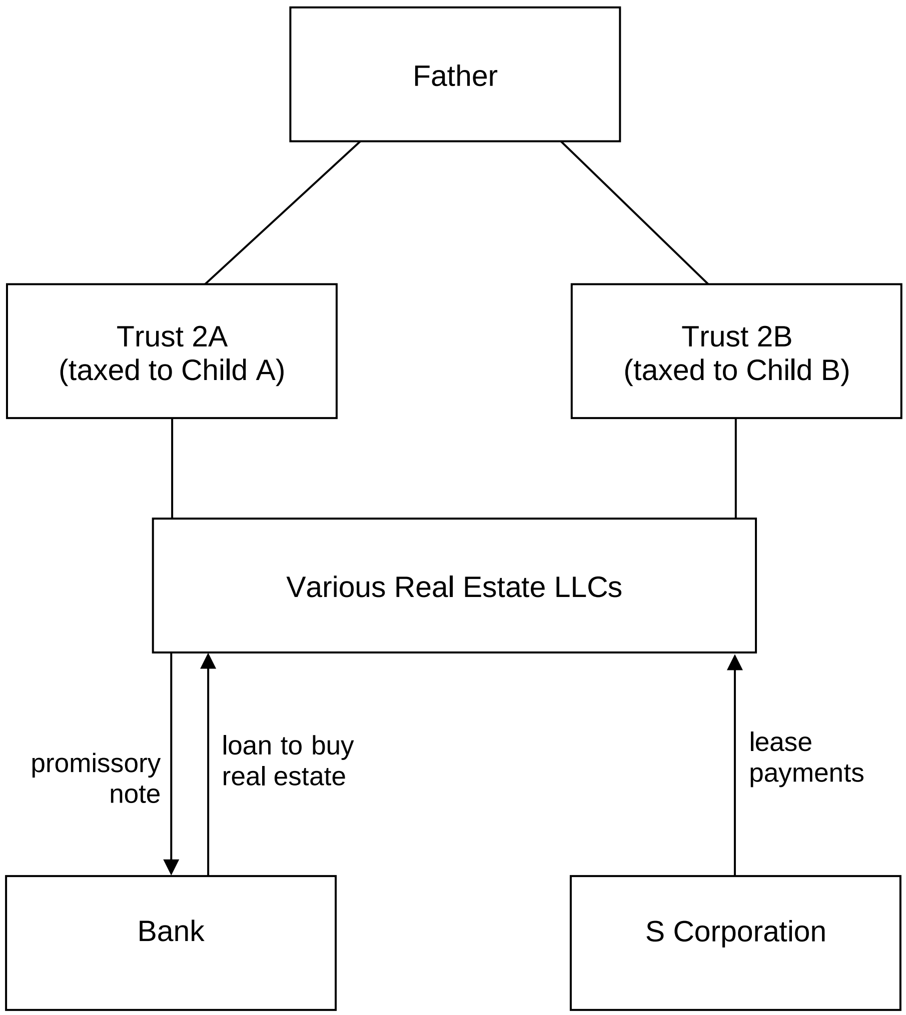
For basis changes on the death of an owner other than the insured, see part II.Q.4.e.i Life Insurance Basis Adjustment on the Death of an Owner Who Is Not the Insured.
[4626] See part II.Q.4.e.ii Practical Issues In Implementing Any Basis Adjustment On the Death of an Owner Who Is Not the Insured.

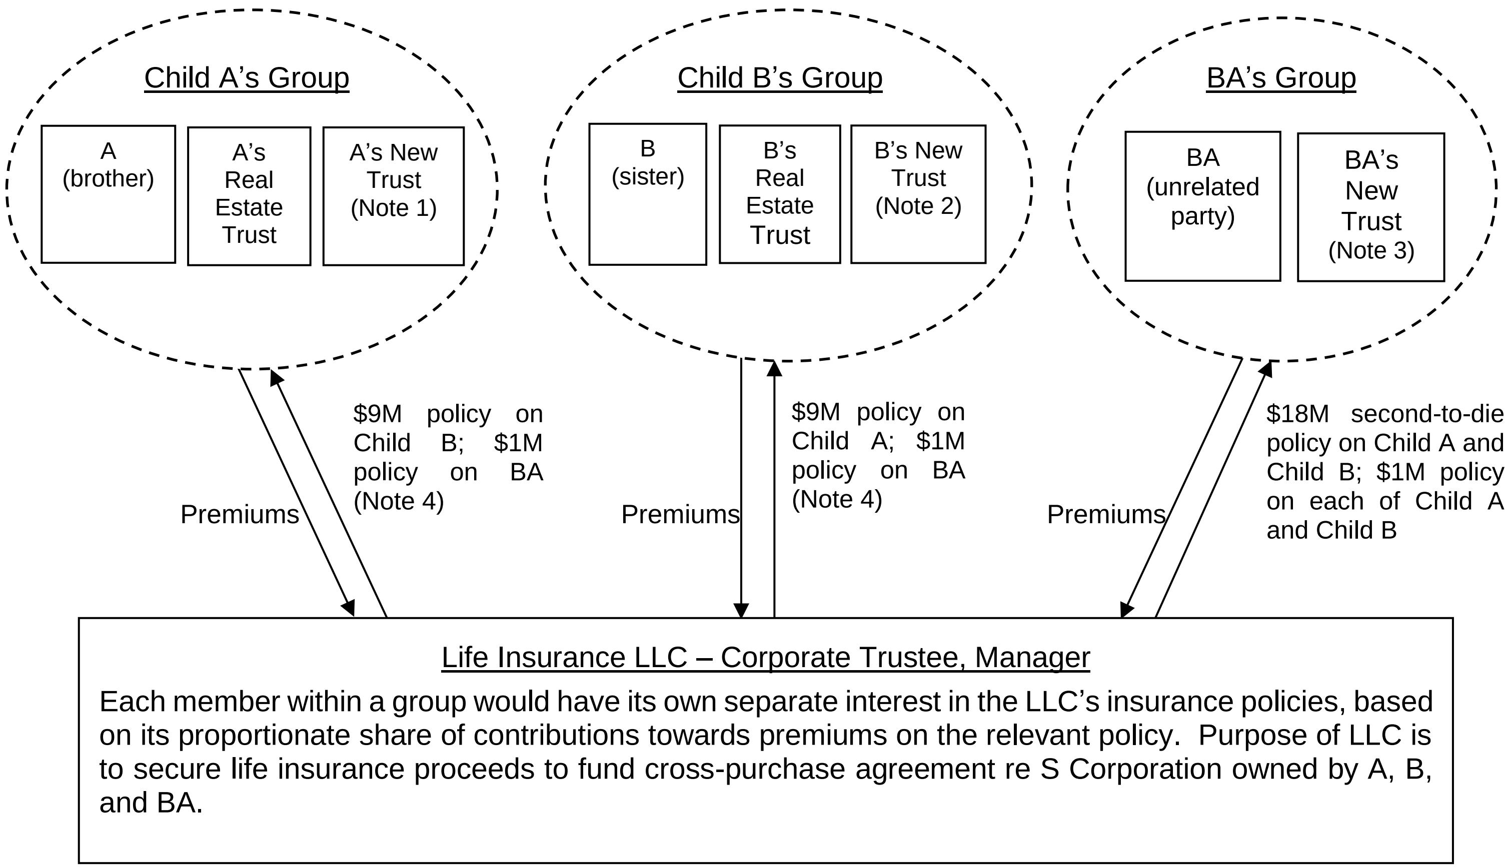
Appendix A

Prior Formation of Trusts



Appendix B

Insurance LLC Structure



Note 1: Child A would be the grantor and trustee of this irrevocable trust for his spouse's and their descendants' support, with appropriate prohibitions against discharging any support obligations.

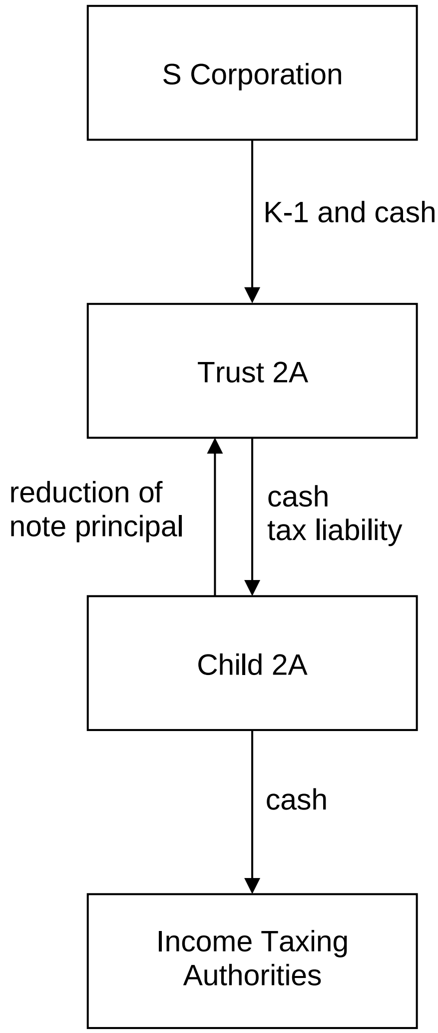
Note 2: Child B would be the grantor and trustee of this irrevocable trust for her descendants' support. (Her children are adults.) Her grandchild would be cut out, but her son could include him.

Note 3: BA would be the grantor and trustee of this irrevocable trust for his wife's and their descendants' support, with appropriate prohibitions against discharging any support obligations.

Note 4: If Child A dies first, Child B's group would become the premium payer with respect to Child A's group's policy on BA's life. If Child B dies first, Child A's group would become the premium payer with respect to Child B's group's policy on BA's life.

Appendix C

Later Sale of S corporation Stock to Irrevocable Grantor Trust



II.Q.4.j. Cross-Purchase Using Trusts

Letter Ruling 9328010 involved the following facts:[4627]

> Partners represent that together they own 100% of the stock of Corporation and also own 100% of the interest in Partnership. All Partners are shareholders of Corporation. Both Corporation and Partnership existed prior to the proposed transaction. Partners represent that Corporation owns life insurance policies on the lives of each Partner, with Corporation as the beneficiary of the policies. Currently, Partners and Corporation are party to a redemption agreement, under which upon the death of any shareholder (one of the Partners), Corporation must use the proceeds from the life insurance policy held by Corporation on the life of that deceased shareholder (Partner) to redeem the shares of Corporation owned by the deceased shareholder's (Partner's) estate.
>
> Partners represent that they intend to replace the current agreement with a new redemption agreement, entitled Stock and Partnership Unit Purchase Agreement [hereinafter new agreement], a copy of which is appended to the request for ruling. Under the new agreement, upon the death of a Partner (who is also a shareholder of Corporation), the surviving Partners will be obligated to purchase all shares in Corporation and interests in Partnership held by a deceased Partner's estate. The new agreement provides that Partners are to use the proceeds from a life insurance policy insuring the life of a deceased Partner to facilitate the discharge of the obligations of the surviving Partners to pay for the purchase of the Corporation shares and Partnership interests from the estate of a deceased Partner. In order to effectuate this redemption agreement, Partners have decided to transfer ownership of the life insurance policies as described below.
>
> Initially, Corporation will transfer the existing life insurance policies to Partnership in part payment of annual rent due Partnership from Corporation. Secondly, Partnership will transfer the policies to Partners such that after the transfers, the policies will be owned as follows:
>
> i. The policy on Partner A will be jointly owned by Partners B, C, D, and E, each owning an equal 25% interest in such policy.
>
> ii. The policy on Partner B will be jointly owned by Partners A, C, D, and E, each owning an equal 25% interest in such policy.
>
> iii. The policy on Partner C will be jointly owned by Partners A, B, D, and E, each owning an equal 25% interest in such policy.
>
> iv. The policy on Partner D will be jointly owned by Partners A, B, C, and E, each owning an equal 25% interest in such policy.
>
> v. The policy on Partner E will be jointly owned by Partners A, B, C, and D, each owning an equal 25% interest in such policy.

[4627] Letter Rulings 9328012, 9328017, 9328019 and 9328020 appear to be companion rulings.

After these transfers, neither Corporation nor Partnership will have any legal or beneficial interest in the life insurance policies.

Partners further represent that after the above transfer from the Partnership to the Partners, the policies will be transferred from Partners to Trust A, Trust B, Trust C, Trust D, and Trust E (hereinafter the Trusts). Copies of the trust agreements are appended to the request for ruling. Partners represent that each Trust is a grantor trust under sections 671−677 of the Code and that the only asset of each Trust will be a life insurance policy of the life of a partner, who is not a grantor in that trust.

The grantors of each Trust will be Partners that transferred the policy to the Trust; these same Partners will be the only beneficiaries of the Trust. The Trusts will be created as follows:

i. The grantors and beneficiaries of Trust A will be Partners B, C, D, and E; the only asset of Trust A will be the life insurance policy on the life of Partner A, currently owned by Partners B, C, D, and E.

ii. The grantors and beneficiaries of Trust B will be Partners A, C, D, and E; the only asset of Trust B will be the life insurance policy on the life of Partner B, currently owned by Partners A, C, D, and E.

iii. The grantors and beneficiaries of Trust C will be Partners A, B, D, and E; the only asset of Trust C will be the life insurance policy on the life of Partner C, currently owned by Partners A, B, D, and E.

iv. The grantors and beneficiaries of Trust D will be Partners A, B, C, and E; the only asset of Trust D will be the life insurance policy on the life of Partner D, currently owned by Partners A, B, C, and E.

v. The grantors and beneficiaries of Trust E will be Partners A, B, C, and D; the only asset of Trust E will be the life insurance policy on the life of Partner E, currently owned by Partners A, B, C, and D.

Partners represent that the transfers of the policies from Corporation to Partnership to Partners to Trusts will be completed within one month.

Partners further represent that upon the death of any Partner, the trust agreements of Trusts provides that the trustee of Trust will distribute the proceeds from the life insurance policy to the beneficiaries, grantors, who will then use the proceeds to pay the estate of the deceased Partner for the value of the Partner’s interest in Partnership and shares in Corporation. Additionally, upon the death of any Partner, the interest of the deceased Partner’s estate in the remaining Trusts will be transferred to the surviving Partners in return for a cash payment equal to the value of the estate’s interest in the unmatured policies which are owned by the remaining Trusts.

For example, upon the death of Partner A, the Trustee of Trust A will distribute the proceeds from the life insurance policy on the life of Partner A to the beneficiaries of Trust A, Partners B, C, D, and E; Partners B, C, D, and E will then use the proceeds to pay the estate of Partner A for the value of Partner A’s interest in Partnership and shares in Corporation. Additionally, all interests that Partner A has in Trusts B, C, D, and E will

> be transferred to Partners B, C, D, and E, pursuant to the terms of each Trust. In transferring the interest that Partner A had in the Trusts, the recipients of the interests will be the remaining beneficiaries of each Trust. Thus, as to Trust B, the grantors of Trust B are Partners A, C, D, and E. Partner A's interest in Trust B will be transferred in equal shares to the surviving grantors of Trust B, Partners C, D, and E; Partner B has no interest in Trust B and thus does not receive any of Partner A's interest therein. Similarly, as to Trust C, Partner A's interest will be transferred in equal shares to the surviving grantors, Partners B, D, and E. Similar transfers occur with respect to Partner A's interests in Trusts D and E. In exchange, the estate of Partner A will receive a cash payment equal to the value of those interests.

After citing then-Reg. § 1.101-1(b)(3)(ii) for the proposition that, "if the final transfer is to the insured, to a partner of the insured, to a partnership in which the insured is a partner, or to a corporation in which the insured is a shareholder or officer, the final transferee shall exclude the entire amount of the life insurance policy proceeds paid by reason of death of the insured from gross income under section 101(a)(1) of the Code," Letter Ruling 9328010 reasoned:

> Under the Taxpayers' facts, there are two separate transactions; the first is a series of contemporaneous transfers from Corporation to Partnership to certain Partners to certain Trusts and the second is a set of singular transfers that occur upon the death of a Partner when the interests in Trusts owning unmatured life insurance policies are transferred to other Partners.
>
> With respect to the first series of transfers, pursuant to section 1.101-1(b)(3)(ii) of the regulations, if the last transfer of the life insurance policies are to partners of the insureds, then the exclusion from income of the life insurance proceeds provided by section 101(a)(1) of the Code applies. The Taxpayers' representations indicate that the last transfers of the policies are to the Trusts. Under Rev. Rul. 74-76, when the grantors, Partners, contribute the life insurance policies to each Trust, there is no change in beneficial ownership of the policies; thus, the Partners who owned the policies prior to transfer to the Trusts continue to own them after the transfer. After the transfers, the Trusts are the legal owners of the policies and the grantors have beneficial ownership. In each Trust, the grantors are partners to the insureds. Thus, the final transfer in the first transaction is to partners of the insureds under section 101(a)(2)(B) of the Code.
>
> In the second transaction, upon the death of each Partner, the interest that the deceased Partner's estate has in the Trusts will be transferred to the surviving grantor Partners for each Trust. Since the trusts are grantor trusts and the only asset in each trust are unmatured life insurance policies, the estate of the deceased Partner is transferring interests in unmatured life insurance policies to persons who are partners of the insureds. When Partner A dies, any interest that Partner A had in Trust B is transferred to the other grantors of Trust B. The only asset of Trust B is a life insurance policy on the life of Partner B; at the death of Partner A, the surviving grantors of Trust B are Partners C, D, and E. Since Partners C, D, and E are partners in Partnership with Partner B, the insured under the life insurance policy in Trust B, the interest in Trust B is being transferred to partners of the insured. Thus, upon the death of a Partner, the interests which that deceased Partner's estate had in the life insurance policies on the remaining Partners, which are the sole assets of the Trusts, are transferred to partners of the insured under section 101(a)(2)(B) of the Code.

Letter Ruling 9328010 concluded:

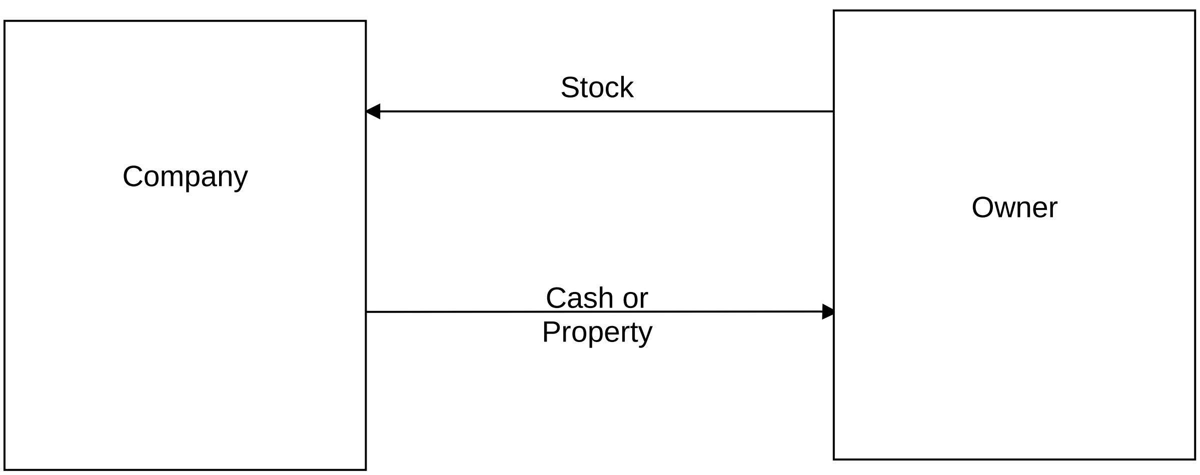
1. The transfer of the life insurance policies from Corporation to Partnership to Partners is a "transfer to a partner of the insured" within the meaning of section 101(a)(2)(B) of the Code and therefore not subject to the "transfer-for-value" limitation of section 101(a)(2).

2. The transfer of the life insurance policies from Partners to Trusts is not a "transfer for a valuable consideration" within the meaning of section 101(a)(2).

3. The transfer of a deceased Partner's beneficial interest in Trusts to the other surviving Partners is a "transfer to a partner of the insured" within the meaning of section 101(a)(2)(B) and therefore not subject to the "transfer-for-value" limitation of section 101(a)(2).

This strategy may work well if the ownership structure of A, B, C, D, and E remains unchanged perpetually. Unfortunately, that is not realistic, and a life insurance LLC provides a more nimble arrangement. If parties want to use irrevocable trusts, the trusts can own the life insurance LLC.

II.Q.5. Dividing a Business Using a Redemption - Corporation vs. Partnership



II.Q.5.a. Corporations Generally

Code § 302 provides a number of rules determining whether a redemption for state law purposes is treated as a sale or exchange of the stock or as a distribution for income tax purposes.

Sale or exchange treatment has the following benefits:

- Possible installment sale deferral.

- Capital gain treatment.

- Use of a pro rata share of basis.

Distributions are treated as the following (generally):

1. Reduction in basis (no gain) to the extent of S corporation accumulated adjustments account (AAA), if applicable. If and to the extent that state-law redemption of S corporation stock is reclassified as a distribution, the redemption uses basis dollar-for-dollar rather than prorating basis.

2. Taxable dividend (no offset for basis, no installment sale deferral) to the extent of C corporation earnings and profits (E&P), if a C corporation or if an S corporation that had been a C corporation.

3. Return of basis.

4. Gain from the sale or exchange of stock.

No deferral applies if the corporation's issuance of a note is treated as a distribution.[4628]

Corporate redemptions are discussed in more detail at part II.Q.7.a Corporate Redemption.

II.Q.5.b. Partnerships Generally

Partnerships do not have a rule equivalent to Code § 302.

Subject to certain exceptions, distributions to a partner are not taxable to the extent of basis in the partner's partnership interest.[4629] Basis includes the partner's allocable share of the partnership's debt, a rule that does not apply to C or S corporations.

Partnership distributions are described generally in part II.Q.8 Exiting From or Dividing a Partnership.

Partnership redemptions use basis to offset payments (except to the extent of certain "hot assets") dollar-for-dollar until exhausted, whereas corporate redemptions often pro-rate basis or sometimes don't use basis at all (to the extent taxed as a dividend). Furthermore, if the seller dies while installments are being made, the gain is already locked in if a sale of corporate (S or C) stock, whereas arguably a basis step-up applies to a partnership interest being redeemed. See part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736, especially part II.Q.8.b.ii.(h) Interaction of Death with Code § 736 Payments.

II.Q.5.c. Distribution of Property

When a C corporation or an S corporation distributes property, it is deemed to have sold the property to its shareholders in a taxable transaction. In a C corporation, shareholders are taxed on dividend or partial or total liquidation. If a corporation contributes assets to charity, the contributed assets must not constitute substantially all of the corporation's assets, because a corporation recognizes gain if it conveys substantially all of its assets to a tax-exempt entity.[4630]

Generally, when a partnership distributes property, no tax consequences apply to anyone. Exceptions include:

[4628] See part II.Q.7.a.iii Redemption Taxed Either as Sale of Stock or Distribution; Which Is Better When, especially fn. 4816.
[4629] See part II.Q.8.b.i Distribution of Property by a Partnership.
[4630] Reg. § 1.337(d)-4(a)(1).

- Property contributed no more than 7 years before distribution that is distributed to a partner other than the partner who contributed may generate a deemed sale by the contributing partner, the recipient partner, or both (but no double taxation). Code §§ 704(c)(1)(B), 737.

- A distribution of marketable securities might be deemed a distribution of cash. Code § 731(c).

Partnership distributions of property are described in II.Q.8.b.i Distribution of Property by a Partnership.

II.Q.6. Contributing a Business Interest to Charity

After reading part II.Q.6.a General Concepts, see discussion of various issues, which are summarized below:

- Part II.Q.6.b Possible Deemed Sale or Reduced Deduction When Contributing Partnership Interest to Charity. Transferring a partnership interest in a way that reduces the donor's share of the partnership's liabilities constitutes a bargain sale that may trigger income tax. Also, the amount of any charitable contribution is reduced by the amount of gain which would not have been long-term capital gain if the property contributed had been sold by the taxpayer at its fair market value (determined at the time of such contribution).

- Part II.Q.6.c Possible Adverse Consequences When Contributing Partnership Interest to Charitable Remainder Trust. A charitable remainder trust pays a 100% tax on any unrelated business taxable income generated from any actual or deemed sale of a partnership interest and or from any K-1 it receives from holding a partnership. Additionally, that income is taxed to the beneficiary when the trust makes distributions.

- Part II.Q.6.d Unrelated Business Taxable Income (UBTI). Particular UBTI topics are described below.

    - Part II.Q.6.d.i UBTI Related to a Partnership or Sole Proprietorship. UBTI can arise from the partnership's business operations or from income generated by acquisition indebtedness. Partnership debt may make the entire gain on the sale of the partnership interest constitute unrelated business income (UBI) in ways that may surprise advisors. Discussion includes whether UBI includes non-debt-financed income from operations and gain on sale.

    - Part II.Q.6.d.ii UBTI Related to an S Corporation. UBTI automatically includes items on a K-1 issued by an S corporation and gain on the sale of S corporation stock, even if the S corporation invests only in items that otherwise would not constitute UBI.

    - Part II.Q.6.d.iii Charitable Deduction Against UBTI. An entity that receives UBI can deduct against it charitable distributions to the extent of 10% if the entity is a corporation or 50% if the entity is a trust, which percentages may increase on a temporary basis.[4631] To use this deduction, a donation for the benefit of an operating public charity should

[4631] See part II.G.4.g.i Charitable Deduction vs. Business Expense, including the increase of 50% to 100% for certain 2020 and 2021 contributions.

pass through a donor-advised fund taxed as a trust (or perhaps a supporting organization for the benefit of the charity).

- Part II.Q.6.e Assignment of Income on Property Being Sold. If property is subject to a legally binding obligation to sell before being donated, the donor will be taxed on the sale. However, careful drafting of the related letter of intent[4632] that typically is signed when negotiations open will avoid this issue.

- Part II.Q.6.f Incomplete Gift and Charitable Partial Interest Prohibitions:

  - Part II.Q.6.f.i Completed Gift Requirement. A gift to charity must be complete for gift tax purposes to qualify for an income tax deduction.

  - Part II.Q.6.f.iiForced Sale to Related Party for Note. When the donee was required to sell to a related party for a note, the IRS asserted that the donation was in substance the donation of a note, which is not deductible until paid.

  - Part II.Q.6.f.iii Charitable Partial Interest Prohibition. Most people are aware that split-interest gifts must be qualified charitable remainder or charitable lead trusts or qualify for other exceptions to be eligible for a charitable deduction. However, depending on the situation, slicing and dicing economic or control rights may also violate these rules.

II.Q.6.a. General Concepts in Contributing a Business Interest to Charity

Contributions to public charities can work well, although any income from an S corporation K-1 or from the sale of S corporation stock constitutes unrelated business income subject to tax (regardless of the nature of the corporation's assets).[4633] Contributions of closely-held business interests to private foundations can be deducted only to the extent of the contributed property's basis.[4634] Contributions of inventory to any charity are not deductible except to the extent of

---

[4632] After a $2 billion recovery in a failed merger, *Texaco, Inc. v. Pennzoil Co.*, 729 S.W.2d 768 (Tex. App. Ct. 1987), business lawyers tightened up their letters of intent to preclude any legally binding agreement to buy or sell until the final sale documents are actually signed. For example, when two businesses explored forming a partnership and may have engaged in conduct suggesting a partnership, *Enterprise Products Partners, L.P. v. Energy Transfer Partners, L.P.*, 529 S.W.3d 531 (Tex. App. 2017), held that the following language in a letter of intent precluded a partnership from being formed absent proof of waiver of those conditions (emphasis added by court):

> Neither this letter nor the JV Term Sheet create any binding or enforceable obligations between the Parties and ... *no binding or enforceable obligations shall exist between the Parties with respect to the Transaction unless and until the Parties have received their respective board approvals and definitive agreements memorializing the terms and conditions of the Transaction have been negotiated, executed and delivered by both of the Parties.* Unless and until such definitive agreements are executed and delivered by both of the Parties, either [Enterprise] or ETP, for any reason, may depart from or terminate the negotiations with respect to the Transaction at any time without any liability or obligation to the other, whether arising in contract, tort, strict liability or otherwise.

The court reaffirmed:

> ETP also argues that the Letter Agreement did not contain a no-oral-modification clause, meaning that the parties permitted oral modifications to reflect changing circumstances. However, ETP does not cite, and we have not found, any evidence that the parties orally agreed to waive the conditions precedent.

[4633] See part II.Q.7.c S Corporation Owned by a Trust Benefitting Charity.

[4634] Code § 170(e)(1)(B)(ii).

basis.[4635] That's because Code § 170(e)(1)(A) disallows as a deduction "the amount of gain which would not have been long-term capital gain (determined without regard to section 1221(b)(3)) if the property contributed had been sold by the taxpayer at its fair market value (determined at the time of such contribution)." Code § 1221, "Capital asset defined," provides in subsection (a), "In general":

> For purposes of this subtitle, the term "capital asset" means property held by the taxpayer (whether or not connected with his trade or business), but does not include -
>
> (1) stock in trade of the taxpayer or other property of a kind which would properly be included in the inventory of the taxpayer if on hand at the close of the taxable year, or property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business;
>
> (2) property, used in his trade or business, of a character which is subject to the allowance for depreciation provided in section 167 , or real property used in his trade or business;
>
> (3) a patent, invention, model or design (whether or not patented), a secret formula or process, a copyright, a literary, musical, or artistic composition, a letter or memorandum, or similar property, held by -
>
> (A) a taxpayer whose personal efforts created such property,
>
> (B) in the case of a letter, memorandum, or similar property, a taxpayer for whom such property was prepared or produced, or
>
> (C) a taxpayer in whose hands the basis of such property is determined, for purposes of determining gain from a sale or exchange, in whole or part by reference to the basis of such property in the hands of a taxpayer described in subparagraph (A) or (B);
>
> (4) accounts or notes receivable acquired in the ordinary course of trade or business for services rendered or from the sale of property described in paragraph (1);
>
> (5) a publication of the United States Government (including the Congressional Record) which is received from the United States Government or any agency thereof, other than by purchase at the price at which it is offered for sale to the public, and which is held by -
>
> (A) a taxpayer who so received such publication, or
>
> (B) a taxpayer in whose hands the basis of such publication is determined, for purposes of determining gain from a sale or exchange, in whole or in part by reference to the basis of such publication in the hands of a taxpayer described in subparagraph (A);

[4635] Code § 170(e)(1); *Furrer v. Commissioner*, T.C. Memo. 2022-100 (no basis in contributed crops because all expenditures allocable to producing the crops had been deducted as expenses).

(6) any commodities derivative financial instrument held by a commodities derivatives dealer, unless -

(A) it is established to the satisfaction of the Secretary that such instrument has no connection to the activities of such dealer as a dealer, and

(B) such instrument is clearly identified in such dealer's records as being described in subparagraph (A) before the close of the day on which it was acquired, originated, or entered into (or such other time as the Secretary may by regulations prescribe);

(7) any hedging transaction which is clearly identified as such before the close of the day on which it was acquired, originated, or entered into (or such other time as the Secretary may by regulations prescribe); or

(8) supplies of a type regularly used or consumed by the taxpayer in the ordinary course of a trade or business of the taxpayer.

Real estate can constitute inventory; see part II.G.26.a Real Estate Dealer vs. Investor. Also, CCA 202309015 argued that LLC interests were inventory under Code § 1221; see part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest.

One might consider whether the entity should make the contribution instead of the owner making a contribution.[4636]

For substantiation requirements, see parts II.J.4.c.ii.(a) Contemporaneous Written Acknowledgement (CWA) and II.J.4.c.ii.(b) Appraisal and Form 8283 Requirements.

To increase the deduction for C corporation stock, consider contributing it to a charitable remainder unitrust (CRUT),[4637] in which the donor's retained interest is worth only the 10% minimum.[4638] After the CRUT sells the stock, it will have cash, and the donor can contribute his or her unitrust interest to the charity. Thus, 90% of the donation will be of an interest in cash, valued without discounts and without the basis limitation, but it should be done more than one year after the contribution was made to the CRUT to make the unitrust interest be a long-term capital asset; also, be sure to avoid a step transaction, which the IRS might use to assert that the partial interest disallowance applies.[4639] Also, if the sale turns out to generate fewer proceeds than expected, the donor might decide to keep part or all the unitrust interest.[4640]

[4636] See parts II.G.4.g.ii Basis Limitations on Deducting Charitable Contributions Made by an S corporation or a Partnership and II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction. For a comparison of S corporations donating business assets compared to donating S corporation stock when the donor owns all of the S corporation, see text accompanying fn. 4910.

[4637] A CRUT may begin life as an income-only unitrust and then switch to a trust that pays the unitrust without regard to income (a flip unitrust). Reg. § 1.664-3(a)(1)(i)(c). A flip CRUT is often used when the assets contributed do not generate enough income to pay the unitrust. For those clients who have sufficient liquidity, rather than doing a flip CRUT they might consider doing a straight CRUT and then contribute cash to the CRUT so that it has enough money to pay them, thereby obtaining an additional charitable deduction with respect this additional gift to the CRUT.

[4638] Code § 664(d)(1)(D) requires the actuarial value of the charitable remainder interest to be at least 10% of the value of the property contributed to the trust.

[4639] See part II.Q.6.f Incomplete Gift and Charitable Partial Interest Prohibition, especially fns. 4760-4761.

[4640] A donation may not be made too close to a sale, as described in part II.Q.6.e Assignment of Income (but this concern tends to be overstated).

Deductions for contributions of partnership interests or S corporation stock may be reduced by the business entity's hot assets.[4641]

Charitable remainder trusts cannot hold stock in an S corporation;[4642] however, an S corporation may donate property to a charitable remainder trust.[4643] Also, generally they should not hold an interest in an entity taxed as a partnership, if the partnership has business income[4644] or debt-financed income,[4645] because their unrelated business taxable income is taxed at 100%.[4646]

Contributions of business interests can cause self-dealing issues (although bequests might be less likely to cause self-dealing issues)[4647] and might be subject to rules limiting the period in which a charity may own a significant part of a closely-held business.[4648] On the IRS' website, "IRC Section 4943(c)(7), Extension of Period to Dispose of Certain Assets," explains:[4649]

IRC Section and Treas. Regulation

- IRC Section 4943(a) Initial tax
- IRC Section 4943(c)(1) Excess business holdings
- IRC Section 4943(c)(2) Permitted holdings in a corporation
- IRC Section 4943(c)(3) Permitted holdings in partnerships, etc.
- IRC Section 4943(c)(6) 5-year period to dispose of gifts, bequests, etc.
- IRC Section 4943(c)(7) 5-year extension of period to dispose of certain large gifts and bequests

---

[4641] See part II.Q.6.b Possible Deemed Sale or Reduced Deduction When Contributing Partnership Interest to Charity, especially fns. 4655-4660 (fn. 4660 explaining that the rules limiting the charitable deduction for partnership interests apply to S corporation stock as well).
[4642] For what types of trusts can own stock in an S corporation, see part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation. An electing small business trust (ESBT) is the only type of trust described there into which a charitable remainder trust (CRT) might fit, but Code § 1361(e)(1)(B)(iii) prohibits a CRT from qualifying as an ESBT. However, an S corporation may donate property to a charitable remainder trust; see part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.
[4643] See part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.

TRG 60.6 – Five-Year Extension of Initial Five-Year Disposition Period

IRC Section 4943 – Taxes on Excess Business Holdings

Reducing Private Foundation Excess Business Holdings: Additional Time to Dispose of Large Gifts or Bequests discusses the information required to be submitted with requests for extensions under Section 4943(c)(7). This information is also available in Section 4943(c)(7).

Analysis

How can a private foundation obtain an extension of time to reduce excess business holdings to permissible levels and avoid excise tax imposed under IRC Section 4943?

Section 4943(a) imposes an initial 10 percent tax on the value of any “excess business holdings” of a private foundation in a “business enterprise.” (For purposes of Section 4943, the term “private foundation” includes donor advised funds and certain Type II and III supporting organizations. See Section 4943(e)-(f)). Any excess business holdings remaining at the close of the taxable period are subject to the second-tier excise tax at a rate of 200 percent of the value of the excess business holdings under Section 4943(b).

“Business enterprise,” as defined in Treas. Reg. Section 53.4943-10(a)(1), means any activity which is regularly carried on for the production of income from the sale of goods or the performance of services and which constitutes an unrelated trade or business under Section 513. It does not include certain program-related activities (e.g., a functionally related business as defined in Section 4942(j)(4) or program-related investments as defined in Section 4944(c)) or a trade or business at least 95 percent of the gross income of which is derived from passive sources. See Section 4943(d)(3) and Treas. Reg. Section 53.4943-10 for more information.

The term “excess business holdings” is defined in Section 4943(c)(1) as the amount of stock or other interest in the enterprise a foundation would have to dispose of (to a person other than a disqualified person) for the remaining holdings of the foundation to be permitted holdings. Generally, under Section 4943(c)(2)(A) and 4943(c)(3)(A), a foundation is permitted to hold twenty percent of an interest in a business enterprise (such as voting stock in a corporation or profits interest in a partnership), reduced by the amount held by disqualified persons. Any excess holdings constitute excess business holdings for purposes of Section 4943. Excess business holdings acquired other than by purchase (e.g., by contribution) are treated as held by a disqualified person (rather than the foundation) for a five-year period beginning on the date such holdings were acquired by the foundation. See Section 4943(c)(6)(A). Section 4943(c)(6)(B) sets forth a similar rule for a change in holdings which causes an increase in excess business holdings. Note, however, that Section 4943(g) provides an exception for certain limited holdings to independently operated businesses which meet the requirements of Section 4943(g)(2), (3), and (4). See Section 4943(g) for more information on this exception. See Section 4943 for more information on permitted holdings, which are also discussed in detail in the IRC Section 4943 – Taxes on Excess Business Holdings Issue Snapshot.

When the excess business holdings provisions of Section 4943(a) apply, Section 4943(c)(7) provides that the Service may extend the five-year disposition period under Section 4943(c)(6) for an additional five years where there is an unusually large gift or bequest of diverse business holdings or holdings with complex corporate structures if:

a. the foundation establishes that -

   i. diligent efforts to dispose of the holdings have been made within the initial 5-year period and

   ii. disposition within the initial 5-year period has not been possible (except at a price substantially below fair market value) by reason of the size and complexity or diversity of the holdings.

b. before the close of the initial 5-year period-

   i. the foundation submits to the Service a plan for disposing of the excess business holdings involved in the extension, and

   ii. the foundation submits the plan to the appropriate state official (e.g., Attorney General) and forwards any response thereto to the Service; and

c. the Service determines the plan reasonably can be expected to be carried out before the close of the extension period.

Example: Foundation 2 was one of two successors in interest to the assets of Foundation 1, a dissolved entity that had received a distribution from Trust which included complex holdings. After receiving that distribution, Foundation 1 was restructured into Foundations 2 and 3, the latter of which then received interests in certain business enterprises that owned real estate that was being developed. Such distributions were treated as having been acquired other than by purchase. Due to the state of the real estate market and other factors, Foundation 2 was concerned about its ability to dispose of the interests, which were Section 4943 excess business holdings. The IRS granted an extension of the deadline for disposition thereof. Noting the criteria that had to be satisfied to extend the disposition deadline, the IRS held, inter alia, that Foundation 2 had made diligent efforts to dispose of the holdings but that such efforts had not been successful due at least in part to the size and complexity of the holdings. Foundation 2 thus was properly granted an additional five-year period within which to dispose of the interests. See PLR 201510056. Note: PLRs cannot be cited as precedent.

Example: Foundation received a bequest of 100 percent of stock in Corporation. Stock represented an excess business holding for foundation. At time of testator’s death, Corporation operated various retail stores and warehouses. Since testator’s death, substantial efforts were made to improve Corporation’s marketability. However, due to Corporation’s complex nature and the current economic conditions, it could not dispose of the excess business holdings except at a price substantially below fair market value.

> Corporation was being restructured and an investment management firm was employed to help market the stock and was in negotiations with a prospective buyer. IRS granted relief finding that the plan to dispose of the excess business holding within the additional five-year period can reasonably be expected to be carried out. See PLR 201329027.
>
> **Requesting approval of an extension**
>
> A request for extension of the period for disposition, as well as a copy of any response received from state officials, should be submitted as a private letter ruling request to the Associate Chief Counsel (Employee Benefits, Exempt Organizations, and Employment Taxes). To request the ruling, the foundation must follow the instructions in Revenue Procedure 2020-1 (updated annually) and pay the required user fee. The current user fee amount can be found in Appendix A (schedule of user fees) of Revenue Procedure 2020-1.
>
> **Issue Indicators or Audit Tips**
>
> - Review Part VII-B of Form 990-PF, Return of Private Foundation or Section 4947(a)(1) Trust Treated as Private Foundation, for reporting of excess business holdings.
> - The five-year disposition period starts the date the business interest or stock is contributed.
> - Extensions should be substantiated by proof of IRS approval.
> - If a foundation fails to establish that an extension was approved, seek to impose the Section 4943 excise taxes.

Generally, the donor should contribute either all of the donor's interest in the business or an undivided interest in every right the donor has, including voting and other noneconomic rights.[4650] However, donating nonvoting stock and keeping voting stock would work.[4651] Similarly, one might create an LLC to control the sale of the donated partnership interest.[4652]

II.Q.6.b. Possible Deemed Sale or Reduced Deduction When Contributing Partnership Interest to Charity

When a partner transfers a partnership interest, any reduction in liabilities allocated to that partner is considered sale proceeds. Letter Ruling 9533014 commented:

> We also note certain other consequences of the proposed transaction. A proposes to transfer to Y by gift an interest in X. The transfer of a partnership interest subject to nonrecourse liabilities to a charitable remainder trust is treated as a sale or exchange for purposes of section 1011(b) of the Code. See section 1.1001-2(c), Example (4) of the regulations; Rev. Rul. 75-194, 1975-1 C.B. 80; *Guest v. Commissioner*, 77 T.C. 9 (1981), *acq.*, 1982-1 C.B. 1. Under sections 752(d) and 1011(b) of the Code, the

[4650] See part II.Q.6.f Incomplete Gift and Charitable Partial Interest Prohibition.
[4651] See fn. 4768 part II.Q.6.f Incomplete Gift and Charitable Partial Interest Prohibition. But donating voting stock and keeping the voting rights would not work. See fn. 4766.
[4652] See the paragraph of text accompanying fn. 4783 in part II.Q.6.f.iii Charitable Partial Interest Prohibition

> amount of A's share of partnership liabilities at the time of the transfer corresponding to the partnership interest transferred constitutes an amount realized by A. Consequently, in determining A's gain, A's basis must be apportioned as required by section 1011(b) of the Code and 1.1011-2(b) of the regulations. It is not known whether section 751 of the Code applies to the transfer to require that part of the gain be treated as ordinary income (e.g., through the application of the recapture rules of section 1250). If section 751 applies, the amount of the charitable contribution may be reduced under section 170(e)(5) (applying to contributions of ordinary income property). In determining whether a charitable contribution is allowable, section 170(e)(5) is to be applied without regard to section 1011(b) and the amount by which the contributed portion of the property must be reduced is the amount determined by taking into account the amount of gain which would have been ordinary income or long-term capital gain if the contributed portion of the property had been sold by the donor at its fair market value at the time of the sale or exchange. See section 1.1011-2(a)(1) of the regulations. Finally, we note that although the liability is nonrecourse, the charity must take the liability into account in determining the net fair market value of the trust assets for calculating the unitrust amount.

Similarly, if contributing a partnership interest results in the partner being relieved of liabilities[4653] previously allocated to that partner, the donor has made a bargain sale. Rev. Rul. 75-194 includes the following facts and conclusion:

> L became a limited partner in a partnership on its formation in 1971. In 1974, L contributed his entire limited partnership interest to a charitable organization described in section 170(c) of the Internal Revenue Code of 1954. On that date all of the partnership liabilities were liabilities on which neither L, the other partners, nor the partnership had assumed any personal liability. Also on that date, L's proportionate share of the value of the partnership assets was greater than his proportionate share of the partnership liabilities and because of partnership losses L's adjusted basis for his partnership interest was less than his proportionate share of the partnership liabilities. At the time of the contribution the partnership had no unrealized receivables or inventory items described in section 751.
>
> [Citations to Code §§ 170(a), 741, 752(c), 752(d), and 1011(b) and to Reg. §§ 1.170A-1(c), 1.752-1(e), 1.752-1(e), 1.170A-4(c)(2)(iii), 1.170A-4(c), and 1.1011-2 (including Reg. § 1.1011-2(a)(3)) follow.]
>
> Since the value of L's share of the partnership assets at the time he transferred his partnership interest exceeded his share of partnership liabilities at that time, a charitable contribution deduction is allowable under section 170 of the Code, subject to the reductions and limitations set forth therein. At the same time, pursuant to sections 752(d) and 1011(b), the amount of L's share of partnership liabilities at the time of the transfer constitutes an amount realized by L. Based on the foregoing, a bargain sale within the meaning of sections 170 and 1011(b) has occurred.
>
> Accordingly, in the instant case, L has a recognized gain on the transfer equal to the excess of the amount realized by L over that portion of the adjusted basis of L's partnership interest (at the time of the transfer) allocable to the sale under section 1011(b) of the Code. Since the partnership had no unrealized receivables or

[4653] See part II.C.3 Allocating Liabilities (Including Debt).

appreciated inventory items described in section 751, the gain is considered a gain from the sale of a capital asset under section 741.

This rule applies even if the liabilities are nonrecourse. Letter Ruling 9533014 commented:

> We also note certain other consequences of the proposed transaction. A proposes to transfer to Y by gift an interest in X. The transfer of a partnership interest subject to nonrecourse liabilities to a charitable remainder trust is treated as a sale or exchange for purposes of section 1011(b) of the Code. See section 1.1001-2(c), Example (4) of the regulations; Rev. Rul. 75-194, 1975-1 C.B. 80; *Guest v. Commissioner*, 77 T.C. 9 (1981), *acq.*, 1982-1 C.B. 1. Under sections 752(d) and 1011(b) of the Code, the amount of A's share of partnership liabilities at the time of the transfer corresponding to the partnership interest transferred constitutes an amount realized by A. Consequently, in determining A's gain, A's basis must be apportioned as required by section 1011(b) of the Code and 1.1011-2(b) of the regulations. It is not known whether section 751 of the Code applies to the transfer to require that part of the gain be treated as ordinary income (e.g., through the application of the recapture rules of section 1250). If section 751 applies, the amount of the charitable contribution may be reduced under section 170(e)(5) (applying to contributions of ordinary income property). In determining whether a charitable contribution is allowable, section 170(e)(5) is to be applied without regard to section 1011(b) and the amount by which the contributed portion of the property must be reduced is the amount determined by taking into account the amount of gain which would have been ordinary income or long-term capital gain if the contributed portion of the property had been sold by the donor at its fair market value at the time of the sale or exchange. See section 1.1011-2(a)(1) of the regulations. Finally, we note that although the liability is nonrecourse, the charity must take the liability into account in determining the net fair market value of the trust assets for calculating the unitrust amount.

Contributing various properties subject to debt, rather than a partnership interest, would result in the bargain sale rules applying to each property separately.[4654]

Also, the amount of any charitable contribution is reduced by the amount of gain which would not have been long-term capital gain[4655] if the property contributed had been sold by the taxpayer at its fair market value (determined at the time of such contribution).[4656] Although the sale of a partnership interest generally is taxed as a capital gain[4657] (which might be long- or short-term), certain underlying assets might convert part or all of the gain to ordinary income.[4658] However, it appears that certain assets that otherwise might have severe limitations on

[4654] Letter Ruling 201709001.
[4655] Determined without regard to Code § 1221(b)(3).
[4656] Code § 170(e)(1)(A).
[4657] Code § 741; see part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest, especially fn. 5651 (look to partnership interest itself absent statutory authority to look through to the partnership's assets).
[4658] See parts II.Q.8.b.i.(g) Code § 751 – Hot Assets and II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), the latter including fn. 5087 the sale of partnership interests to a controlled corporation.

deductions[4659] may be held in a partnership without tainting the deduction for the partnership interest.[4660]

II.Q.6.c. Possible Adverse Consequences When Contributing Partnership Interest to Charitable Remainder Trust

Letter Ruling 9705013 approved a charitable remainder trust (CRT) investing in an in an investment partnership. However, contributing a partnership interest to a CRT is very complex and might not be worthwhile if the partnership operates a business or has significant debt-financed property. Below are some issues.

First is a possible gain on sale, as described in part II.Q.6.b Possible Deemed Sale or Reduced Deduction When Contributing Partnership Interest to Charity.

Second, a charitable remainder trust (CRT) pays a 100% tax on any unrelated business taxable income (UBTI).[4661] The beneficiary also pays tax on this income (along with the rest of the CRT's income) when distributed to the beneficiary.[4662] A gift of any partnership interest that has significant debt risks significant UBTI – a risk that is probably too high for a CRT, given this 100% tax.[4663] One might avoid the UBI issue if the donor keeps part of the partnership interest

---

[4659] Code § 170(e)(1)(B) reduces the deduction regarding contributions:

- (i) of tangible personal property—
  - (I) if the use by the donee is unrelated to the purpose or function constituting the basis for its exemption under section 501 (or, in the case of a governmental unit, to any purpose or function described in subsection (c)), or
  - (II) which is applicable property (as defined in paragraph (7)(C), but without regard to clause (ii) thereof) which is sold, exchanged, or otherwise disposed of by the donee before the last day of the taxable year in which the contribution was made and with respect to which the donee has not made a certification in accordance with paragraph (7)(D),
- (ii) to or for the use of a private foundation (as defined in section 509(a)), other than a private foundation described in subsection (b)(1)(F),
- (iii) of any patent, copyright (other than a copyright described in section 1221(a)(3) or 1231(b)(1)(C)), trademark, trade name, trade secret, know-how, software (other than software described in section 197(e)(3)(A)(i)), or similar property, or applications or registrations of such property, or
- (iv) of any taxidermy property which is contributed by the person who prepared, stuffed, or mounted the property or by any person who paid or incurred the cost of such preparation, stuffing, or mounting

[4660] The flush language of Code § 170(e)(1), provides that, for purposes of applying Code § 170(e)(1) to the charitable contribution of stock in an S corporation, rules similar to those in fn. 4658 shall apply in determining whether gain on such stock would have been long-term capital gain if such stock were sold by the taxpayer. If the rules of Code § 170(e)(1)(B) looked through the partnership, presumably they would also look through an S corporation, which they do not.

[4661] Code § 664(c)(2)(A); Reg. § 1.664-1(c). The latter refers to UBTI as defined in section 512, determined as if part III, subchapter F, chapter 1, subtitle A of the Internal Revenue Code applied to such trust.

[4662] Code § 664(b); Reg. § 1.664-1(c). The latter provides, Such excise tax shall be allocated to corpus and, therefore, is not deductible in determining taxable income distributed to a beneficiary.

[4663] See part II.Q.6.d Unrelated Business Taxable Income, especially fns. 4697-4707. Letter Ruling 9015049 held:

> In the instant case, the Trust as proposed will make the payments on the mortgage liability for which the grantor remains personally liable. Therefore, pursuant to section 1.677(a)-1(d) of the

regulations, the grantor of the proposed Trust will be treated as the owner of the entire Trust. As long as the grantor is treated as the owner of the entire trust under section 677, the trust is not deemed to be created for purposes of section 664. Thus, the Trust as proposed is not a charitable remainder unitrust under section 664 of the Code.

Consider having the donor agree to pay all of debt and indemnify the CRT against having to pay any share of the debt. Often the donor will contribute a partial interest, and essentially pay the entire debt from his/her share of the sales proceeds. Here are some ideas suggested by others at a meeting I attended:

- Does the "hold harmless" approach resolve the grantor trust issue (if the donee is a CRT)? The answer appears to be "yes", because the CRT will not pay any debt of the donor – the donor in fact pays the entire debt personally.
- Does the "hold harmless" approach resolve the UBI issue? Maybe not – the property transferred is still "subject to a lien", which is the language used in Code § 514, regardless of the indemnification agreement. Further, *Tidler v. Commissioner*, T.C. Memo. 1987-268, noted in a similar situation that the property in question was subject to a debt, regardless of an indemnification, because the lender was not bound by the indemnification and could take the property from charity. The donor's obligation to pay or hold the donee harmless was seen as a promise to pay, deductible (if at all) only when paid.
- Does the "hold harmless" approach resolve the bargain sale issue? The donor is not really "discharged" from any debt, as he/she pays all of it. But *Tidler* isn't entirely helpful.
- Does the "hold harmless" approach resolve the self-dealing issue (if the donee is a private foundation or CRT)? It seems to me this should follow on the resolution of the bargain sale issue (the prohibited transaction is the sale aspect of the Bargain Sale). The CRT is not taking property and assuming a mortgage. Query, however, whether it is taking the property subject to a mortgage: one could argue "no" due to the donor's indemnification; on the other hand, the property is legally subject to a lien regardless of any contractual indemnification agreements made by the donor and the CRT (see discussion regarding UBI).

Tidler held:

> The fact of the matter is that the donated property remained subject to the mortgage and to foreclosure by the mortgagee in the event of nonpayment. Indeed, we believe that the mortgagee would at the very least be required first to pursue foreclosure before seeking any recovery from 197 Partnership. See notes 23 and 27, *supra*. In the foregoing context, we find it difficult to conclude that the value of the property should not be reduced by the amount of the mortgage obligation in order to determine the amount of the contribution by 197 Partnership to Intercity. To be sure, Intercity's exposure to loss may have been ultimately eliminated by the obligation of 197 Partnership under the special warranty, but it is clear that this obligation was one "in futuro" and, although it ran with the land, would not be considered breached until an adverse claim was made against the property. See *Marathon Builders, Inc. v. Polinger*, 263 Md. 410, 283 A.2d 617, 620 (1971); 6A Powell, *Law of Real Property*, par. 899 (1986). Furthermore, under Maryland law, the measure of damages for breach of a warranty [pg. 87-1305]Permalink to hereof title is limited to the consideration paid for the property plus interest and costs of enforcement of the warranty at the discretion of the finder of fact. *See Reamer v. Kessler*, 233 Md. 311, 196 A.2d 896, 899-900 (1964); *Wlodarek v. Thrift*, 178 Md. 453, 13 A.2d 774, 781 (1940). See also generally, 6A Powell, *Law of Real Property*, *supra*; 4 Tiffany, *Law of Real Property*, sec. 1017 (3d ed. 1975); 21 C.J.S., Covenants, sec. 148 (1940). In light of the foregoing, we conclude that the special warranty was, at best, a promise to make payments at some point or points of time in the future and that such a structure does not give rise to a charitable contribution until payment is actually made.[28] *Cf. Guren v. Commissioner*, 66 T.C. 118 (1976).
>
> [28] We express no opinion as to whether any such payments on the mortgage herein would in fact constitute as charitable contributions in view of the presence of the obligation under the special warranty deed, although as we have noted, that obligation may have been severely limited under Maryland law because of the absence of consideration. Moreover, we note that there is no evidence in the record herein that any payments were made in the mortgage by anyone after November 8, 1974. See also note 26, *supra.*

and contractually assumes the burden of the partnership's debt;[4664] whether that idea is practical or too complex depends on the situation.

[4664] The TAM's holding regarding the escrow fund to reallocate nonrecourse debt, which was described in fn. 4698, together with its reference to Code § 752 (see fn. 4697). See 735 T.M. *Private Equity Funds*, part VIII.H.1., suggesting:

> A fund that allows its tax-exempt investors to replace their share of any fund level debt with a capital contribution should allocate the debt to the other investors. *See* TAM 9651001 (applying § 752 to determine portion of partnership debt allocable to tax-exempt partner).

For the assumption of liabilities when transferring a partnership interest to which liabilities have been allocated, see fn. 6596, found in part III.B.2.g Income Tax Concerns When Removing Property from the Estate Tax System.

Hill & Mancino, *Taxation of Exempt Organizations*, ¶ 26.03[3] Nonassumed Debt, direct the reader to GCM 39486 (1986), in which the IRS internally had asked:

> If an organization exempt from tax under section 501(a) is a limited partner in a partnership that lends money under or acquires wrap-around mortgages, are the wrap-around mortgages debt-financed property of the exempt organization?

Relying on Rev. Rul. 75-99, the GCM concluded:

> A wrap-around mortgage acquired by the partnership as an investment solely by advancing its own funds is not debt-financed property merely because the wrap-around note is for an amount in excess of the funds advanced by the partnership.

Rev. Rul. 75-99 involved the following:

> An unincorporated trust, qualifying as a real estate investment trust under section 856 of the Internal Revenue Code of 1954, invested in a wrap-around loan. In the wrap-around loan in this case a party owning real estate encumbered by a senior mortgage executed a note to the trust for the total of the unpaid principal balance of the senior mortgage, plus cash advanced by the trust. The borrower also executed a mortgage to the trust encumbering the real estate described in the senior mortgage. The trust agreed to look solely to the mortgaged property for the payment of the indebtedness and agreed not to seek or obtain any deficiency or other money judgment in respect thereof. The borrower received from the trust that sum by which the principal amount of the wrap-around loan exceeded the unpaid principal balance of the senior mortgage.
>
> The trust is not liable to the senior mortgagee on the underlying note. However, the trust agreed with the mortgagor-owner to make the periodic payments of principal and interest due on the senior obligation, provided, however, that if the mortgagor defaults on its payments on the note to the trust, the trust is relieved of its obligation to make payments on the senior mortgage. For purposes of making payments on the senior mortgage and performing other obligations required under the mortgage, the borrower appointed the trust its attorney-in-fact.
>
> In the wrap-around loan in this case, the trust determined that certain property with a 300x dollar senior mortgage bearing interest at 7 percent per annum was of sufficient value to support a wrap-around loan to the owner in the amount of 400x dollars at 8 percent per annum. The borrower executed a note, and a mortgage securing the note, in the amount of 400x dollars at 8 percent per annum. The trust advanced 100x dollars to the borrower, the amount by which the wrap-around loan exceeded the principal of the senior mortgage. The borrower periodically pays to the trust an amount equal to interest at the rate of 8 percent on the 400x dollar note, together with principal thereon.

Rev. Rul. 75-99 held:

> Section 856(c)(2) and (3) of the Code provides that for a trust to qualify as a real estate investment trust, certain percentages of its gross income must be derived from specified sources, including interest and interest on obligations secured by mortgages on real property.
>
> For purposes of section 856(c)(2) and (3) of the Code, the indebtedness between the trust and the borrower giving rise to an obligation to pay interest is not the total amount of the wrap-around loan. See *Mindlin v. Davis*, 74 So.2d 789 (Fla. 1954). Although the borrower signs a note for 400x dollars, the trust actually loans the borrower 100x dollars. Payments made by the trust on

Consider whether, instead of contributing a partnership interest to a CRT, one might place the partnership interest in a corporation and contribute the corporation to the CRT. Such a corporation is commonly referred to as a blocker. Any partnership liabilities from which the donor is deemed to be relieved might trigger income on formation of the corporation.[4665] The CRT would not receive any UBTI; however, the corporation would pay tax on its share of the partnership's income and on any gain on sale of the partnership. If the partnership has little or no debt-financed property, then the corporation might save little tax and might even cost more tax; if it has much debt-financed property, then the corporation might produce a significant benefit. The benefit of forming the corporation would be taxing income at regular rates instead of 100% while getting the benefit of the deduction of the full value of the corporation (which presumably would be reduced by tax paid on the expected upcoming sale of the partnership interest). However, the corporation's sale of the partnership interest would be subject to income tax at corporate rates, whereas the CRT's sale of a partnership interest it owns directly would defer or avoid income tax on gain on the sale, if and to the extent that the sale would not generate UBTI. Furthermore, if the CRT sold its shares in the corporation, a purchaser would reduce the price to take into account the partnership's built-in gain, especially if the purchaser would have been able to benefit from depreciation or amortization deductions if it had bought the partnership interest directly.[4666] So, the blocker concept, although avoiding UBTI issues, might not save much money, and a donor concerned about UBTI might consider just selling the partnership interest and donating the proceeds.

Another way a CRT could avoid UBTI from a partnership is to contribute to a blocker any portion of the partnership interest that would generate UBTI. If the partnership interest is about to be sold and the sale itself would not generate UBTI, then the blocker can avoid UBTI on current income without subjecting the sale proceeds to the corporate tax regime. To avoid the prohibition described in part II.Q.6.f Incomplete Gift and Charitable Partial Interest Prohibition, the donor should contribute to the CRT a vertical slice of everything the donor owns in the partnership, and then the CRT contributes to the blocker the portion of the partnership interest that generates UBTI.

> the senior obligation are considered to be made on behalf of the borrower from payments received from the borrower on the 400x dollar note.
>
> Accordingly, it is held that only the interest on 100x dollars, the amount of the cash advanced by the trust, is includible in the trust's gross income.

Analogizing, GCM 39486 reasoned:

> Here, as in Rev. Rul. 75-99, there is no indication that the contract between the partnership and the borrower creates a debtor-creditor relationship between the partnership and the lender under the first mortgage. The partnership does not contract with the lender under the first mortgage for liability for repayment of the first mortgage. Thus, it cannot be said, on these facts, that the partnership has borrowed the amount of the first mortgage in order to advance the funds to the borrower. Accordingly, there is not any acquisition indebtedness.
>
> The same conclusion is reached by analyzing the property acquired. In this case, the partnership acquires a note secured by an interest in property subordinate to one or more other mortgages or similar interests in the property. The partnership does not acquire the borrower's property that is subject to these senior obligations. Thus, the property acquired is not, in our opinion, subject to any acquisition indebtedness, rather, the property acquired (the note) is an obligation to pay secured by the borrower's encumbered property. Thus, we think it is clear that a wrap-around note acquired by the partnership solely by advancing its own funds is not debt-financed property.

[4665] See part II.M.2.b Initial Incorporation: Effect of Assumption of Liabilities.

[4666] See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.

In either CRT scenario, the UBTI would be taxed at the corporate level and again when the CRT distributes the dividend to the recipient, rather than being taxed to the donor at the donor's ordinary income tax rates (which usually are higher than corporate rates but lower than corporate rates and capital gain rates combined), so the sale not taking place would increase the annual income tax burden. On the other hand, the charitable deduction might offset this tax disadvantage to a certain extent. Note also that distributions to the recipient, which are based on a percentage (5% or more) of the value of the CRT's assets, would likely be smaller than the annual distributions from the partnership.

Also note that the donor being compensated for services to the partnership or otherwise engaging in transactions with the partnership might be limited by self-dealing rules:[4667] Payment of compensation by a private foundation directly or indirectly to a disqualified person is self-dealing.[4668] One may be a disqualified person with respect to a CRT by being a "substantial contributor" to the CRT[4669] or a trustee of the CRT.[4670] The payment of compensation to a disqualified person by a partnership owned by the CRT is not direct self-dealing because the payment is not being made by the CRT to the recipient. Instead, one would look to rules governing indirect self-dealing[4671] between a disqualified person and an organization controlled[4672] by a private foundation.

Also, if the partnership is unmarketable,[4673] then any required valuation (at initial contribution and annually for a unitrust) must be performed exclusively by an independent trustee or determined by a current qualified appraisal from a qualified appraiser.[4674]

II.Q.6.d. Unrelated Business Taxable Income (UBTI)

II.Q.6.d.i. UBTI Related to a Partnership or Sole Proprietorship

UBTI can arise from business operations[4675] or from income generated by acquisition indebtedness. If a trade or business regularly carried on by a partnership of which an

---

[4667] See Letter Ruling 9533014.
[4668] Code § 4941(d)(1)(D).
[4669] A substantial contributor is the creator of a charitable trust and any donor who gives more than $5,000 to the private foundation if the amount given is more than 2% of the total contributions in the taxable year. Code §§ 4946(a)(2) and 507(d)(2).
[4670] Code § 4946(a)(1).
[4671] Reg. § 53.4941(d)-1(b), which provides the indirect self-dealing rules and various exceptions.
[4672] Reg. § 53.4941(d)-1(b)(5).
[4673] Reg. § 1.664-1(a)(7)(ii) provides:

> *Unmarketable assets*. Unmarketable assets are assets that are not cash, cash equivalents, or other assets that can be readily sold or exchanged for cash or cash equivalents. For example, unmarketable assets include real property, closely-held stock, and an unregistered security for which there is no available exemption permitting public sale.

[4674] Reg. § 1.664-1(a)(7)(i).
[4675] Code § 512(a)(1). Citing Code § 513(a), (c) and Reg. § 1.513-1(a), Letter Ruling 201626004 reasoned:

> Therefore, unless one of the specific exceptions of sections 512 or 513 is applicable, gross income of an exempt organization subject to the tax imposed by section 511 is includible in the computation of unrelated business taxable income if:
> (1) it is income from a trade or business;
> (2) such trade or business is regularly carried on by the organization; and

organization is a member is an unrelated trade or business with respect to the organization, the organization in computing its UBTI must, subject to the exceptions, additions, and limitations

---

(3) the conduct of such trade or business is not substantially related (other than through the production of funds) to the organization's performance of its exempt functions.

The Letter Ruling reviewed Reg. § 1.513-1(c)(1):

> Hence, for example, specific business activities of an exempt organization will ordinarily be deemed to be regularly carried on if they manifest a frequency and continuity, and are pursued in a manner, generally similar to comparable commercial activities of nonexempt organizations.

After reviewing Reg. § 1.513-1(d) (see fn. 4713 in part II.Q.6.d.i UBTI Related to a Partnership or Sole Proprietorship) for whether an activity is substantially related (other than through the production of funds) to the purposes for which exemption is granted, it reviewed case law:

> In *United States v. American Bar Endowment*, 477 U.S. 105 (1986), the Supreme Court held that a section 501(c)(3) organization's insurance program constituted both the sale of goods and the performance of services and, therefore, was a trade or business for purposes of the tax on unrelated business income. The organization was the group policyholder and administrator of insurance policies offering life, disability and medical coverage. Its activities included compiling a list of its members and soliciting their insurance business.
>
> In *Ohio Farm Bureau Federation, Inc., v, Commissioner*, 106 T.C. 222 (1996), the Tax Court concluded that a covenant not to compete did not constitute a trade or business. The Tax Court declined to treat the absence of activity as equivalent to the affirmative conduct of a trade or business in the context of unrelated business income.

The Letter Ruling addressed a donation of accounts receivable bequeathed to a foundation:

> At the time of Decedent's death, the Company's primary assets were receivables related to legal services provided by the Company in connection with certain lawsuits (the receivables). The receivables represent the Company's share of the remaining unpaid balance of the attorney's fees awarded upon settlement of the lawsuits. The fees due to the Company were determined under various settlement agreements and, under the terms of the settlement, payment of fees was deferred over time. Payments are expected to continue for approximately x additional years. The Company's ownership in its share of the attorney's fees payable wholly vested when the lawsuits finally settled, which was prior to Decedent's death. Currently, none of the Estate, the Foundation, or the Company provides any services in relation to the legal services generating the receivables. Furthermore, the Foundation represents that it will not perform any act (including administrative acts) with respect to the receivables other than receiving payments related to satisfaction of the receivables.
>
> The Foundation represents that the receivables:
>
> - Are comprised solely of income from services previously provided by the Company, including Decedent;
> - Are not debt-financed property within the meaning of section 514(b); and
> - Are not gains or losses from the sale or exchange or other disposition of any property or gains or losses from the lapse or termination of options to buy or sell securities.

The Letter Ruling concluded:

> However, the Company completed provision of the legal services prior to Decedent's death. The Foundation represents that none of the Estate, the Foundation, or the Company currently provides any services in relation to the receivables and, further, that the Foundation will not perform any act (including administrative acts) other than receiving payments related to satisfaction of the receivables. The Foundation is merely the distributee of the assets of the Estate and the recipient of the payments. The Foundation is performing no activity, similar to the organization in *Ohio Farm Bureau Federation, Inc.*, *supra*, other than receiving payments. The Foundation is neither selling goods nor performing any services in order to receive income from the receivables, unlike the organization in *United States v. American Bar Endowment*, *supra*, that was engaged in a trade or business. See section 513(c); Treas. Reg. Sec. 1.513-1(b). Therefore, the income resulting from the receivables is not unrelated business income within the meaning of section 512(a) and will not be subject to the tax on unrelated business income described in section 511(a).

contained in Code § 512(b), include its share (whether or not distributed) of the gross income of the partnership from such unrelated trade or business and its share of the partnership deductions directly connected with such gross income.[4676] For UBI purposes, generally a trust looks to "any trade or business regularly carried on by such trust or by a partnership of which it is a member."[4677] A partnership's activities are attributed to a nonprofit partner for purposes of determining both whether the nonprofit operates exclusively for Code § 501(c)(3) purposes[4678] and whether the nonprofit operates has engaged in an unrelated trade or business and therefore may be subject to the unrelated business income tax on its distributive share of the partnership's income.[4679]

When a foundation collects accounts receivable that the decedent had earned and bequeathed to it but the foundation did not conduct the business from which the accounts receivable arose, income from collecting the accounts was not UBI. Letter Ruling 201626004 reasoned:

> At the time of Decedent's death, the Company's primary assets were receivables related to legal services provided by the Company in connection with certain lawsuits (the receivables). The receivables represent the Company's share of the remaining unpaid balance of the attorney's fees awarded upon settlement of the lawsuits. The fees due to the Company were determined under various settlement agreements and, under the terms of the settlement, payment of fees was deferred over time. Payments are

---

[4676] Code § 512(c)(1).

[4677] Code § 513(b) provides:

> The term "unrelated trade or business" means, in the case of—
>
> (1) a trust computing its unrelated business taxable income under section 512 for purposes of section 681 ; or
>
> (2) a trust described in section 401(a) , or section 501(c)(17) , which is exempt from tax under section 501(a);
>
> any trade or business regularly carried on by such trust or by a partnership of which it is a member.

Reg. 1.512(c)-1 provides:

> In the event an organization to which section 511 applies is a member of a partnership regularly engaged in a trade or business which is an unrelated trade or business with respect to such organization, the organization shall include in computing its unrelated business taxable income so much of its share (whether or not distributed) of the partnership gross income as is derived from that unrelated business and its share of the deductions attributable thereto. For this purpose, both the gross income and the deductions shall be computed with the necessary adjustments for the exceptions, additions, and limitations referred to in section 512(b) and in § 1.512(b)-1. For example, if an exempt educational institution is a partner in a partnership which operates a factory and if such partnership also holds stock in a corporation, the exempt organization shall include in computing its unrelated business taxable income its share of the gross income from the operation of the factory, but not its share of any dividends received by the partnership from the corporation. If the taxable year of the organization differs from that of the partnership, the amounts included or deducted in computing unrelated business taxable income shall be based upon the income and deductions of the partnership for each taxable year of the partnership ending within or with the taxable year of the organization.

[4678] Rev. Rul. 2004-51 concluded that the nonprofit's activities conducted through the partnership are not a substantial part of the nonprofit's activities within the meaning of Code § 501(c)(3) and Reg. § 1.501(c)(3)-1(c)(1). Therefore, based on all the facts and circumstances, the nonprofit's participation in the partnership, taken alone, will not affect the nonprofit's continued qualification for exemption as a Code § 501(c)(3) organization.

[4679] Rev. Rul. 2004-51 concluded that the nonprofit's activities conducted through the partnership constitute a trade or business that is substantially related to the exercise and performance of the nonprofit's exempt purposes and functions.

> expected to continue for approximately x additional years. The Company's ownership in its share of the attorney's fees payable wholly vested when the lawsuits finally settled, which was prior to Decedent's death. Currently, none of the Estate, the Foundation, or the Company provides any services in relation to the legal services generating the receivables. Furthermore, the Foundation represents that it will not perform any act (including administrative acts) with respect to the receivables other than receiving payments related to satisfaction of the receivables.
>
> The Foundation represents that the receivables:
>
> - Are comprised solely of income from services previously provided by the Company, including Decedent;
> - Are not debt-financed property within the meaning of section 514(b); and
> - Are not gains or losses from the sale or exchange or other disposition of any property or gains or losses from the lapse or termination of options to buy or sell securities.

Letter Ruling 201626004 concluded:

> However, the Company completed provision of the legal services prior to Decedent's death. The Foundation represents that none of the Estate, the Foundation, or the Company currently provides any services in relation to the receivables and, further, that the Foundation will not perform any act (including administrative acts) other than receiving payments related to satisfaction of the receivables. The Foundation is merely the distributee of the assets of the Estate and the recipient of the payments. The Foundation is performing no activity, similar to the organization in *Ohio Farm Bureau Federation, Inc.*, *supra*, other than receiving payments. The Foundation is neither selling goods nor performing any services in order to receive income from the receivables, unlike the organization in *United States v. American Bar Endowment*, *supra*, that was engaged in a trade or business. See section 513(c); Treas. Reg. Sec. 1.513-1(b). Therefore, the income resulting from the receivables is not unrelated business income within the meaning of section 512(a) and will not be subject to the tax on unrelated business income described in section 511(a).

On the other hand, when a partnership ran an active business, the taxpayer in Letter Ruling 9340043 cleansed the partnership's assets before contributing the partnership to a charitable remainder trust. Before the contribution, the partnership distributed cash, accounts receivable, and any substantially appreciated inventory pro rata to its owners. "Immediately after" the transfer of the partnership interest to the CRT, the partnership sold all its assets to the buyer. The ruling held that the sale "does not involve a sale of inventory or property held primarily for sale to customers in the ordinary course of the business of an investment management and advisory company;" therefore, under Code § 512(b)(5), the gain did not produce UBTI. Furthermore:

> Since the sale of the partnership assets occurred on October 21, 1992, the same day of the Trust's receipt of its interest in the partnership, the Trust was not the owner of a partnership interest in an unrelated trade or business, which would have produced unrelated business taxable income to the Trust. Therefore, the transaction will not result

> in the Trust's incurring any unrelated business income tax liability pursuant to section 512(c)(1) of the Code.
>
> The mere continued holding of its partnership interest after the partnership's assets other than office furnishings and equipment have been transferred to the subsidiary of F will not involve the Trust in any income producing activity which could be characterized as trade or business. Therefore, the Trust's mere holding of such partnership interest after the transfer of assets to F's subsidiary, as described previously, will not result in the Trust's incurring any unrelated business income tax liability pursuant to section 512(c)(1) of the Code.
>
> Accordingly, we have concluded that the Trust will not realize any income subject to unrelated business income tax as a result of the transactions described above.

Although dividends,[4680] interest,[4681] annuity payments,[4682] royalties,[4683] rent from real property or from personal property incidental to the real property rental,[4684] and capital gains (and gain from certain other property) generally do not constitute unrelated business income (UBI) if the donee does not engage in business activity, but if they arise from debt-financed property then they may constitute UBI.[4685] Below is a discussion of gain on sale without considering debt-financing, then debt-financing is addressed.

[4680] Code § 512(b)(1).

[4681] Code § 512(b)(1).

[4682] Code § 512(b)(1). Letter Ruling 200425027 held that bequests relating to the following were not UBI:

> In addition to receiving the residue of the Decedent's estate, Trust will be funded by a distribution from Decedent's Plan 1 and Decedent's Plan 2 (the "Plans"). In addition, Trust will be funded by a distribution from Decedent's Annuity. It is represented that (1) the Plans are qualified plans under section 401; (2) the Annuity is not a qualified plan under section 401 or an individual retirement account (IRA), but is a tax-sheltered annuity that was purchased by Decedent as an investment; and (3) the Decedent's basis in the Annuity was greater than the fair market value of the Annuity at the date of Decedent's death.

Similarly, Letter Ruling 200234019 held that bequests relating to the following, that an estate assigned to charity, were not UBI:

> Decedent's Estate included four contracts, represented as being annuities described in § 403(b), and three individual retirement accounts (IRAs), represented as being qualified IRAs described in § 408. Decedent was also the beneficiary of a custodial account held in the name of the Decedent's late spouse, represented as being an account described in § 403(b)(7).

[4683] Code § 512(b)(2).

[4684] Code § 512(b)(3). Short-term rentals involving significant services constitute UBI. Rev. Rul. 76-402 (ten-week summer tennis camp, in which a school provided tennis courts, furnished dormitory rooms, linens, maid service, meals, and dining facilities for use by the individual in conducting the camp), amplified Rev. Rul. 80-297; Rev. Rul. 80-298 (professional football team leases stadium from university for practice during several months of the year, with university providing heat, light, water, dressing room, linen, significant stadium security services, and maintenance of playing surface and all other ground.). The IRS' web page, at https://www.irs.gov/charities-non-profits/exclusion-of-rent-from-real-property-from-unrelated-business-taxable-income, provides an informal brief overview in "Exclusion of Rent from Real Property from Unrelated Business Taxable Income."
See also part II.L.2.a.ii Rental Exception to SE Tax, especially fns. 3429-3437, comparing the rental exception for self-employment tax to the rental exception for UBTI purposes (the latter being set forth in fn. 3434).

[4685] Superseding Code § 512(b)(5) and other exceptions, Code § 512(b)(4) provides:

The exclusion of gains, Code § 512(b)(5), provides:

> There shall be excluded all gains or losses from the sale, exchange, or other disposition of property other than-
>
> (A) stock in trade or other property of a kind which would properly be includible in inventory if on hand at the close of the taxable year, or
>
> (B) property held primarily for sale to customers in the ordinary course of the trade or business.
>
> There shall also be excluded all gains or losses recognized, in connection with the organization's investment activities, from the lapse or termination of options to buy or sell securities (as defined in section 1236(c)) or real property and all gains or losses from the forfeiture of good-faith deposits (that are consistent with established business practice) for the purchase, sale, or lease of real property in connection with the organization's investment activities. This paragraph shall not apply with respect to the cutting of timber which is considered, on the application of section 631, as a sale or exchange of such timber.

This provision does not protect various depreciable or amortizable property from constituting UBI.[4686] When Code § 512(b)(5) refers to the sale, exchange, or other disposition of property, it encompasses "gains and losses from involuntary conversions, casualties, etc."[4687]

Special rules apply regarding options.[4688]

> Notwithstanding paragraph (1), (2), (3), or (5), in the case of debt-financed property (as defined in section 514) there shall be included, as an item of gross income derived from an unrelated trade or business, the amount ascertained under section 514(a)(1), and there shall be allowed, as a deduction, the amount ascertained under section 514(a)(2).

[4686] Reg. § 1.1245-6(b) (see part II.G.6.b Code § 1245 Property) may override Code § 512(b)(5):
> *Nonrecognition sections overridden*. The nonrecognition provisions of subtitle A of the Code, which section 1245 overrides include, but are not limited to, sections 267(d), 311(a), 336, 337, 501(a), 512(b)(5) and 1039. See section 1245(b) for the extent to which section 1245(a)(1) overrides sections 332, 351, 361, 371(a), 374(a), 721, 731, 1031, 1033, 1071, and 1081 (b)(1) and (d)(1)(A). For limitation on amount of adjustments reflected in adjusted basis of property disposed of by an organization exempt from income taxes (within the meaning of section 501(a)), see paragraph (a)(8) of § 1.1245-2.

[4687] Reg. § 1.512(b)-1(d)(1).

[4688] Reg. § 1.512(b)-1(d)(2) provides:
> There shall be excluded from the computation of unrelated business taxable income any gain from the lapse or termination after December 31, 1975, of options to buy or sell securities (as that term is defined in section 1236(c)). An option is considered terminated when the organization's obligation under the option ceases by any means other than by reason of the exercise or lapse of such option. If the exclusion is otherwise available it will apply whether or not the organization owns the securities upon which the option is written, that is, whether or not the option is "covered." However, income from the lapse or termination of an option is excludable only if the option is written in connection with the organization's investment activities. Thus, for example, if the securities upon which the options are written are held by the organization as inventory or for sale to customers in the ordinary course of a trade or business, the income from the lapse or termination will not be excludable under the provisions of this paragraph. Similarly, if an organization is engaged in the trade or business of writing options (whether or not such options are covered) the exclusion will not be available.

Beyond that, let's focus on whether property, held by an exempt organization itself, is inventory or held for the sale to customers, which depend on the organization's activities. An exempt organization's specific business activities ordinarily be deemed to be "regularly carried on" if they manifest a frequency and continuity, and are pursued in a manner, generally similar to comparable commercial activities of nonexempt organizations.[4689] "Where income producing activities are of a kind normally conducted by nonexempt commercial organizations on a year-round basis, the conduct of such activities by an exempt organization over a period of only a few weeks does not constitute the regular carrying on of trade or business."[4690] Assets that normally

---

[4689] Reg. § 1.513-1(c)(1) provides:

> *General principles*. In determining whether trade or business from which a particular amount of gross income derives is "regularly carried on," within the meaning of section 512, regard must be had to the frequency and continuity with which the activities productive of the income are conducted and the manner in which they are pursued. This requirement must be applied in light of the purpose of the unrelated business income tax to place exempt organization business activities upon the same tax basis as the nonexempt business endeavors with which they compete. Hence, for example, specific business activities of an exempt organization will ordinarily be deemed to be "regularly carried on" if they manifest a frequency and continuity, and are pursued in a manner, generally similar to comparable commercial activities of nonexempt organizations.

[4690] Reg. § 1.513-1(c)(2)(i), which continues:

> For example, the operation of a sandwich stand by a hospital auxiliary for only 2 weeks at a state fair would not be the regular conduct of trade or business. However, the conduct of year-round business activities for one day each week would constitute the regular carrying on of trade or business. Thus, the operation of a commercial parking lot on Saturday of each week would be the regular conduct of trade or business. Where income producing activities are of a kind normally undertaken by nonexempt commercial organizations only on a seasonal basis, the conduct of such activities by an exempt organization during a significant portion of the season ordinarily constitutes the regular conduct of trade or business. For example, the operation of a track for horse racing for several weeks of a year would be considered the regular conduct of trade or business because it is usual to carry on such trade or business only during a particular season.

Reg. § 1.513-1(c)(2)(ii) provides:

> *Intermittent activities; in general*. In determining whether or not intermittently conducted activities are regularly carried on, the manner of conduct of the activities must be compared with the manner in which commercial activities are normally pursued by non-exempt organizations. In general, exempt organization business activities which are engaged in only discontinuously or periodically will not be considered regularly carried on if they are conducted without the competitive and promotional efforts typical of commercial endeavors. For example, the publication of advertising in programs for sports events or music or drama performances will not ordinarily be deemed to be the regular carrying on of business. Similarly, where an organization sells certain types of goods or services to a particular class of persons in pursuance of its exempt functions or "primarily for the convenience" of such persons within the meaning of section 513(a)(2) (as, for example, the sale of books by a college bookstore to students or the sale of pharmaceutical supplies by a hospital pharmacy to patients of the hospital), casual sales in the course of such activity which do not qualify as related to the exempt function involved or as described in section 513(a)(2) will not be treated as regular. On the other hand, where the nonqualifying sales are not merely casual, but are systematically and consistently promoted and carried on by the organization, they meet the section 512 requirement of regularity.

Reg. § 1.513-1(c)(2)(iii) provides:

> *Intermittent activities; special rule in certain cases of infrequent conduct*. Certain intermittent income producing activities occur so infrequently that neither their recurrence nor the manner of their conduct will cause them to be regarded as trade or business regularly carried on. For example, income producing or fund raising activities lasting only a short period of time will not

generate business income that the charity sells in an orderly disposition without undertaking further activity do not constitute UBI.[4691] Although crops contributed to a charitable remainder

---

ordinarily be treated as regularly carried on if they recur only occasionally or sporadically. Furthermore, such activities will not be regarded as regularly carried on merely because they are conducted on an annually recurrent basis. Accordingly, income derived from the conduct of an annual dance or similar fund raising event for charity would not be income from trade or business regularly carried on.

[4691] Letter Ruling 9413020 provided:

> A is a sole proprietor engaged in the business of cattle ranching and farming. In these operations, he raises cattle to be sold for beef ("slaughter cattle") and crops. The crops and the slaughter cattle are sold to customers in the ordinary course of his business. As a first step in a plan to wind up and retire from his ranching and farming operation, A will fund the unitrust with separate irrevocable transfers of slaughter cattle and crops with a total value of approximately X. These two transfers will take place within a period of several weeks, and both transfers will occur in 1993.
>
> The trust agreement will permit A to make additional contributions to the unitrust at any time. A anticipates that he will transfer additional farming and ranching assets to the proposed unitrust in another series of transfers that will probably take place in about two years. That second series of transfers will occur as part of A's completion of his plan to wind up and retire from his ranching and farming operation. The items to be transferred at that time will include more slaughter cattle and crops, and also breeding cattle and farm machinery that A has used in his ranching and farming operations. (A is not in the business of selling either breeding cattle or farm machinery.) Although not all of these transfers will occur at one time, it is represented that they will all take place within a period of several months.
>
> A is a cash-basis taxpayer who has deducted all costs incurred in raising the slaughter cattle and crops for the years in which such costs were incurred. A will claim no income tax charitable contribution deduction for any transfer of slaughter cattle, crops, breeding stock or farm machinery (collectively "farm items") to the unitrust.
>
> C will have complete discretion as to whether and when to sell any farm items transferred to the proposed unitrust. It is likely that any quantity of farm items that is received by the unitrust in a particular transfer will be sold by the trustee in a single transaction, or at most two transactions, shortly after such farm items are transferred to the trust. However, at the time of a transfer to the unitrust, neither A nor C will be under any legally binding obligations to sell the transferred farm items.
>
> The proposed unitrust will not take over any operations of A's farm whose farm land and buildings will continue to be owned by the donor, who may retire and discontinue farming in a few years. If C decides to sell any slaughter cattle or crops that A has transferred to the unitrust, it will hire an agent that will try to find a buyer for the items in question at an attractive price. This is a method often used by farmers in selling the agricultural products they raise. It is also one of the fastest and most economical ways of liquidating such items. C will arrange for the slaughter cattle to be fed and cared for on a strictly maintenance basis (*i.e.*, it will not be engaging in efforts to "fatten them for market") from the time it receives them until a sale occurs. If C decides to sell breeding stock, it will sell them at a single auction after arranging for them to be fed and cared for from the time it receives them until the auction. It will use a similar procedure for disposing of any farm machinery it decides to sell. Thus, it is represented that the unitrust will not engage in regularly carried on sales of the farm items as a dealer and that the farm items to be sold are not held by the unitrust for sale to customers in the ordinary course of any unitrust business. It is also represented that the sales of donated farm items will not involve property that is debt-financed under section 514 of the Code….
>
> Section 1.513-1(c)(2)(iii) of the regulations indicates that business is not "regularly carried on" in the case of intermittent income-producing activities that occur so infrequently that neither their recurrence nor the manner of their conduct will cause them to be regarded as a business

trust (CRT) that sells the crops do not generate UBI when the CRT sells the crops, income from the sale remains ordinary (absent proof otherwise) and flows to the annuity or unitrust recipient as ordinary income.[4692]

For case law in a related area discussing when property is inventory from a regularly carried on business and when sales might be viewed as not from the conduct of a business, see part II.L.2.a.iii Whether Gain from Sale of Property is Subject to SE Tax.[4693] Real estate might or might not constitute inventory.[4694]

Rev. Rul. 60-352 asserts that the donation of an interest in a partnership holding installment obligations triggers income. For a discussion of installment obligations, see parts II.G.15 Limitations on the Use of Installment Sales and II.Q.8.e.ii.(c) Availability of Installment Sale Deferral for Sales of Partnership Interests (the latter including reference to a 2017 Tax Court case holding that specific statutory authority is required to view a partnership as an aggregate).[4695]

> regularly carried on. See also the discussion of a similar principle in *Robert L. Adam and Judith W. Adam v. Commissioner*, 60 T.C. 996 (September 27, 1973), *Acq.* 1974-1 C.B. 1….
>
> In this case, in regard to sections 511, 512, and 513 of the Code, occasional sales by the unitrust to dispose of the farm items described will not be "regularly carried on" within the meaning of section 512(a)(1) because such sales will be infrequent and intermittent. In addition, the farm items are the types of properties whose income from sales is excludible from unrelated business taxable income pursuant to section 512(b)(5), described above. Also, as to section 514, these transactions will not involve debt-financed property. Therefore, the unitrust's receipts of the proceeds from any sales of the farm items will not result in any unrelated business taxable income to the unitrust under sections 511 through 514.
>
> Accordingly, under sections 511, 512, 512(b)(5), 513, and 514 of the Code, the unitrust will not have any unrelated business taxable income on its sales, under the circumstances described, of the farm items which the donor may transfer to it.

[4692] *Furrer v. Commissioner*, T.C. Memo. 2022-100, in which the court applied the Code § 664 tiers and noted that the taxpayer did not contend that the crops became capital assets and noted that, even if the taxpayer had successfully argued that they were, the sale would have generated short-term capital gain. The taxpayer made various frivolous arguments that certain promoters of CRATs assert when selling their CRAT-creation services, but the IRS and court did not impose penalties for making these frivolous arguments.

[4693] Especially fn. 3439.

[4694] See part II.G.26.c Future Development of Real Estate. Referring to *Malat* cited in that fn., Letter Ruling 201630009 held:

> Foundation intends to hold the real estate properties as part of a diversified investment portfolio that will also contain cash and publicly traded securities and intends to continue to hold the properties, at least in the near term. Foundation anticipates that any sales of the real estate properties will be sporadic and occasional. The decision to retain or sell any of the real estate properties will be made by Foundation's Board of Directors based on the relevant facts and circumstances and in accordance with their fiduciary duty to prudently manage Foundation's investments. Any such decision will be made on a property-by-property basis, taking into consideration the overall investment portfolio, investment strategy, and capital appreciation. Foundation may decide to make capital improvements to the real estate properties as needed, but the real estate properties will not be held for the primary purpose of improving the properties for immediate resale. The real estate properties will be held as income producing properties and not as inventory used in a trade or business.

[4695] *Grecian Magnesite Mining v. Commissioner* is discussed more fully in part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest, especially fn. 5651.

Rev. Rul. 75-194 described how the bargain sale rules apply when contributing an interest in a partnership with debt. For how partnerships with debt work, see part II.C.3 Allocating Liabilities (Including Debt). The facts of Rev. Rul. 75-194 were:

> L became a limited partner in a partnership on its formation in 1971. In 1974, L contributed his entire limited partnership interest to a charitable organization described in section 170(c) of the Internal Revenue Code of 1954. On that date all of the partnership liabilities were liabilities on which neither L, the other partners, nor the partnership had assumed any personal liability . Also on that date, L's proportionate share of the value of the partnership assets was greater than his proportionate share of the partnership liabilities and because of partnership losses L's adjusted basis for his partnership interest was less than his proportionate share of the partnership liabilities. At the time of the contribution the partnership had no unrealized receivables or inventory items described in section 751.

Rev. Rul. 75-194 reasoned and held:

> Section 1.1011-2(a)(3) of the regulations provides that if property is transferred subject to an indebtedness, the amount of the indebtedness must be treated as an amount realized for purposes of determining whether there is a sale or exchange to which section 1011(b) of the Code and section 1.1011-2 apply, even though the transferee does not agree to assume or pay the indebtedness.
>
> Since the value of L's share of the partnership assets at the time he transferred his partnership interest exceeded his share of partnership liabilities at that time, a charitable contribution deduction is allowable under section 170 of the Code, subject to the reductions and limitations set forth therein. At the same time, pursuant to sections 752(d) and 1011(b), the amount of L's share of partnership liabilities at the time of the transfer constitutes an amount realized by L. Based on the foregoing, a bargain sale within the meaning of sections 170 and 1011(b) has occurred.
>
> Accordingly, in the instant case, L has a recognized gain on the transfer equal to the excess of the amount realized by L over that portion of the adjusted basis of L's partnership interest (at the time of the transfer) allocable to the sale under section 1011(b) of the Code. Since the partnership had no unrealized receivables or appreciated inventory items described in section 751, the gain is considered a gain from the sale of a capital asset under section 741.

For bargain sales, see part III.B.1.c.i Gifts with Consideration – Bargain Sales.

A partnership holding debt-financed assets can generate UBI not only on annual income but also on the sale of the partnership interest. Debt of a lower-tier partnership is attributed to an upper-tier partnership and then to the owner,[4696] so creating a patchwork of partnerships will not help.

[4696] Reg. 1.514(c)-1(a)(2), Example (4), which was cited in TAM 9651001 (which is reproduced in part in fns. 4697-4698 and analyzed in fns. 4700-4708), provides:

> In 1972 X, an exempt organization, forms a partnership with A and B. The partnership agreement provides that all three partners shall share equally in the profits of the partnership, shall each invest $3 million, and that X shall be a limited partner. X invests $1 million of its own funds in the

TAM 9651001 asserted that gain from the sale of a partnership generated UBI with respect to the partnership's debt that was allocated to the seller,[4697] except to the extent that the

---

partnership and $2 million of borrowed funds. The partnership purchases as its sole asset an office building which is leased to the general public for purposes other than those described in section 514(b)(1)(A), (B), (C), or (D). The office building cost the partnership $24 million of which $15 million is borrowed from Y bank. This loan is secured by a mortgage on the entire office building. By agreement with Y bank, X s held not to be personally liable for payment of such mortgage. By reason of section 702(b) the character of any item realized by the partnership and included in the partner's distributive share shall be determined as if the partner realized such item directly from the source from which it was realized by the partnership and in the same manner. Therefore, a portion of X's income from the building is debt-financed income. Under these circumstances, since both the $2 million indebtedness incurred by X in acquiring its partnership interest and $5 million, the allocable portion of the partnership's indebtedness incurred with respect to acquiring the office building which is attributable to X in computing the debt/basis percentage (one-third of $15 million), were incurred in acquiring income-producing property, X has acquisition indebtedness of $7 million ($2 million plus $5 million). Similarly, the allocable portion of the partnership's adjusted basis in the office building which is attributable to X in computing the debt-basis percentage is $8 million (one-third of $24 million). Assuming no payment with respect to either indebtedness and no adjustments to basis in 1972, X's average acquisition indebtedness is $7 million and X's average adjusted basis is $8 million for such year. Therefore, X's debt/basis percentage with respect to its share of the partnership income for 1972 is 87.5 percent ($7 million/$8 million).

[4697] The TAM reasoned:

There is no disagreement concerning the fact that both Partnership and Z held debt-financed property. Sections 702(b) and 512(c)(1) of the Code make it clear that the income of a partnership retains its character in the hands of the partners. Thus, when Partnership and Z received income attributable to debt-financed property, X reported its share of this income as unrelated business income (UBI). The central area of disagreement is the treatment of income received from the sale of a partnership interest by an exempt organization when the interest of the exempt organization was not purchased with borrowed funds, but the property owned within the partnership was purchased by the partnership itself with (or partially with) borrowed funds. The facts indicate that X reported for each taxable year its distributive share of rental income from Partnership as unrelated debt-financed income. X did not report as unrelated debt-financed income X's gain on the sale of its interests in Partnership and Z, which held debt-financed real estate. Had Partnership and Z instead sold the debt-financed real estate, X's distributive share of gain from the sale would have been reportable as unrelated debt-financed income. X maintains that because X did not borrow directly to purchase its interests in Partnership and Z, gain from the sale of the partnership interests, rather than from the sale of the debt-financed real estate itself held by the partnerships, was not reportable as unrelated debt-financed income. However, whether X sells its interests in the partnerships or the partnerships sell the real estate, X is accomplishing economically the same result of realizing its share of any appreciation in the debt-financed real estate.

A partnership can be viewed in two ways under subchapter K: as a separate entity or as an aggregate of its partners. See *Casel v. Commissioner*, 79 T.C. 424, 432-33 (1982). The entity view of partnerships treats each partner as owning no direct interest in partnership assets or operations, but only an interest in the partnership entity itself. The aggregate view treats each partner as the owner of a direct and undivided interest in partnership assets and operations. Subchapter K is an attempt to balance the entity view with the aggregate view to avoid the use of a partnership as a means of obtaining improper tax advantages. The many situations not clearly covered by subchapter K can be resolved by both looking to whether the subchapter applies an entity or aggregate approach in analogous situations and considering the purpose of the particular provision of the Code to be applied.

partnership's non-recourse debt was effectively defeased by the establishment of the independently trusteed, fully funded escrow account which is contractually committed to paying

---

The House Conference Committee report addressing the enactment of Subchapter K states that, even though Subchapter K takes an entity approach in transactions between a partner and a partnership, no inference is intended, however, that a partnership is to be considered as a separate entity for purpose of applying other provisions of the internal revenue laws if the concept of the partnership as a collection of individuals is more appropriate for such provisions. H.R. Rep. No. 2453, 83d Cong., 2d Sess. 59 (1954).

Example (4) of section 1.514(c)-1(a)(2) of the regulations shows that BOTH debt incurred to acquire a partnership interest AND debt incurred by the partnership to acquire property are included in calculating that portion of a partnership's interest that is subject to acquisition indebtedness. The debt/basis percentage thus calculated for the partnership interest is the same whether the partnership sells the property or the partner sells its partnership interest.

An interest in a partnership that holds debt-financed property is effectively an interest in the underlying assets and liabilities of the partnership. An anomalous result would occur if ownership of debt-financed property through a partnership would result in one tax treatment when direct ownership would result another. The aggregate view of the partnership interest, while not clearly delineated in section 514 of the Code, is suggested by Example (4) of section 1.514(c)-1(a)(2) of the regulations and is consistent with treatment of partnership interests elsewhere in the Internal Revenue Code (*e.g.*, section 751(a) and section 512(b)).

For purposes of the debt-financed property rule of section 514 of the Code, the aggregate approach should be applied with respect to sales of partnership interests consistently with the aggregate approach contemplated in section 512(b)(4) with respect to items of income from debt-financed property that flow through to the partners. Analogously, when a partner sells a partnership interest, section 751(a) requires a look through of its partnership interest to determine the character of assets sold and the classification of gain. It would make no economic or policy sense that X should defeat the existing aggregate approach to section 512(b)(4) simply by selling an intermediary rather than have the intermediary sell the debt-financed property. We believe that Congress could not have intended that section 512(b)(4) could be so easily avoided. Consequently, X's sales of its interests in Partnership and Z at a gain result in unrelated business income under section 514.

The debt on Partnership's revolving line of credit apparently existed, at least in part, when X acquired its interest in Partnership. Accordingly, X's share, if any, of this liability under section 752 and regulations thereunder constitutes acquisition indebtedness of X, because the indebtedness was effectively incurred by X in acquiring the partnership interest. See section 514(c)(1)(A) of the Code. In addition, X's share under the section 752 regulations of any increases in debt on the revolving line of credit after X acquires its interest in Partnership constitutes acquisition indebtedness to the extent the increases were incurred to acquire or improve property within the meaning of section 514(c)(1)(A), (B), or (C).

Because the debt with respect to X's interest in Z was incurred before July 18, 1984, the effective date for application of this exception to organizations such as X, the exception provided in section 514(c)(9)(A) of the Code is not applicable. See P.L. 98-369. In addition, X has not shown that it meets the specific requirements of section 514(c)(9)(B).

Reg. 1.514(c)-1(a)(2), Example (4), which was referred to in the quote above, is reproduced in fn. 4696.

interest and principal on the debt.[4698] The latter is consistent with Letter Rulings that held that loans from a partner to a partnership did not trigger debt-financed income.[4699]

The TAM was not clear how the UBI was computed. To me, the better view of the TAM's analysis is that one looks through the partnership to see the extent to which the debt constituted acquisition indebtedness with respect to the partnership's assets,[4700] which may extend to

---

[4698] The TAM reasoned:

> Even though the properties of Z are collateral on the prior loan of Y's, the payment of the loan is not an obligation of Z, nor was it an obligation of Venture or a previous obligation of any of the other ventures. Y personally makes the payments and neither the loan nor the payments on it are considered in calculating partnership income. However, even though this is not a debt of Z, X could be at risk of loss of its share of the value of the property if the property should be foreclosed upon. Thus, X, in that case, though not contractually obligated, would in effect be paying on the loan. This risk is eliminated by the creation of the independently trusteed, fully funded, escrow account solely for the purpose of paying the loan should Y default. Therefore, the loan, although collateralized by Z property, is not an obligation or liability of Z or X, and the escrow account, which must at all times be maintained a level sufficient to pay off the loan, ensures that even if Y should default neither Z nor X would be at risk of any loss or be required to make any payments. Because neither Z nor X are obligated on the loan, and are not at risk to suffer any loss because of the loan, it is not a debt of either and can be excluded in calculating acquisition indebtedness.

[4699] Letter Ruling 8415105 included the following facts:

> In those instances in which the Partnership invests indirectly in a Project through a Joint Venture, the Partnership's investment may, in some transactions, consist of both a capital contribution and a loan to the particular Joint Venture. The monies invested by the Partnership in the Joint Venture will consist solely of the capital contributions received by the Partnership from Y {the corporate general partner] and the Limited Partners, including your capital contribution. Neither Y nor the Limited Partners will borrow any portion of their respective capital contributions. The Partnership's capital contribution and loan to the Joint Venture, together with the capital contribution, if any, of the developer, will be used by the Joint Venture to acquire the Project. Any funds used by the Joint Venture to acquire a Project will be obtained solely from the Partnership or the developer/co-venturer, and no part of the acquisition price will be financed by a third-party lender or the seller of a particular Project. The terms of the joint venture agreement to be entered into by the Partnership and a developer will provide that any such loan by the Partnership will be entitled to certain priorities established by the agreement or the laws of the jurisdiction under which the particular Joint Venture is formed, including for example, the repayment of the loan from any available liquidation proceeds prior to the return of either joint venturer's capital contribution.

Letter Ruling 8415105 concluded:

> The loans from the Partnership to any Joint Venture in which it is a co-venturer will be funded by each Limited Partner from each partner's capital, rather than by borrowing from third party sources. Accordingly, the properties acquired would not be considered to be debt-financed property within the meaning of section 514 of the Code. It follows that section 512(b)(4) would not apply in these situations.

Letter Ruling 8414066 appeared identical to Letter Ruling 8415105 in this respect.

[4700] Andersen Tax LLC, ¶ 20.02[2][c] Sources of UBTI and Exceptions From UBTI Characterization, *Tax Economics of Charitable Giving*, said in a footnote:

> To reach its conclusion, the IRS applied an aggregate (*i.e.*, not an entity) approach, so it looked through the partnership to determine if there was debt financing, and treated the situation the same as if the partnership itself sold the assets that had been debt financed.

591 T.M. *Real Estate Transactions by Tax-Exempt Entities*, part II.G.3.f., Sale of Partnership Interests, states:

treatment as UBI of a portion of other assets held by the partnership as well,[4701] but would also mean that debt incurred merely to fund operations after the CRT acquires the partnership

Applying an aggregate view of partnerships, the National Office advised that an interest in a partnership that holds debt-financed property is effectively an interest in the partnership's underlying assets and liabilities. Thus, the National Office deemed the charity to have received unrelated debt-financed income from the sale of its interest in the first partnership.

[4701] 723 T.M. *Publicly Traded Partnerships*, part III.D.2.c. Sale of a Partnership Interest, states:

Based on the rationale expressed in TAM 9651001,[849] the IRS may attempt to include in a tax-exempt organization's UBTI any gains recharacterized as ordinary income under § 751(a) to the extent those gains are attributable to excluded property. In TAM 9651001, the IRS relied in part on § 751(a) to justify its application of the aggregate view of partnerships.[850] The IRS also stated that the aggregate view of partnerships is consistent with the treatment of partnerships under § 512(b). This position also would be consistent with the IRS's apparent belief that the same result should occur regardless of whether the tax-exempt organization sold its interest in the partnership or the partnership sold its assets.[851]

[849] *Cf.* Rev. Rul. 89-108, 1989-2 C.B. 100 (gain from sale of partnership interest that is attributable to inventory is not eligible to be reported under installment sale rules because installment method would not be available if selling partner had sold its share of underlying inventory); CCA 200722027 (applying rationale of Rev. Rul. 89-108 to gain attributable to unrealized receivables). See also Rev. Rul. 91-32 (gain on sale of foreign partner's interest in partnership was ECI to extent attributable to U.S. trade or business property of partnership). [Gorin note: The Tax Court has repudiated Rev. Rul. 91-32. See fn. 4708.]

[850] It is not clear from the memorandum whether the IRS asserted that § 751(a) treats the transferor as selling an undivided interest in partnership assets rather than a partnership interest. Section 751(a) is merely an income recharacterization rule and should not constitute a basis for deeming a selling partner to have sold an interest in the underlying property of the partnership. The legislative history to the rules regarding transfers of partnership interests is consistent with this approach*. See, e.g.*, H.R. Rep. No. 83-1337, at 4096-7 (1954) (stating that § 751(a) was adopted to prevent the conversion of potential ordinary income into capital gain by virtue of transfers of partnership interests, but that [t]he general rule that the sale of an interest in a partnership is to be treated as the sale of a capital asset is retained).

[851] *See* TAM 9651001 ([a]n anomalous result would occur if ownership of debt-financed property through a partnership would result in one tax treatment when direct ownership would result another). For example, if a partnership conducting an unrelated trade or business recognized income from the sale of inventory, § 512(b)(5) would not exclude from a tax-exempt organization's UBTI its distributive share of that income. § 512(b)(5)(A). If, instead, the tax-exempt organization sold its partnership interest, § 751(a) would recharacterize any gain or loss recognized by the organization from the sale that is attributable to the inventory as ordinary income, which then would be included in the tax-exempt organization's UBTI.

Carman, "'Contract Units' As A Work-Around For UBTI," *Journal of Real Estate Taxation* (4th Quarter 2011), stated:

If an exempt organization is a partner in a partnership that borrows money to make an investment, the unrelated debt-financed income rules are applied to the exempt organization as if the organization borrowed the money and owned the property directly.[9]

[9] Rev. Rul. 74-197, 1974-1 CB 143, TAM 9651001.

In Rev. Rul. 74-197, an exempt organization invested in a general partnership, which borrowed money to acquire investment property. The ruling held that the partnership's borrowing constituted acquisition indebtedness and, accordingly, the exempt trust's investment activity may result in UBTI.

Hill & Mancino, *Taxation of Exempt Organizations*, ¶ 26.06[4] Disposition of Partnership Interests, also approaches the issue on an aggregate basis [footnotes citing to TAM omitted]:

Importantly, the Service has also ruled that a partner of a partnership is treated as having unrelated debt-financed income on the disposition of a partnership interest that was not acquired with funds borrowed by the tax-exempt organization directly if the partnership itself had interest would not generate debt-financed income.[4702] One article suggests that the TAM may be wrong[4703] but would apply the TAM by referring to the partnership interest rather than looking

---

> acquisition indebtedness with respect to partnership assets. The Service reasoned that a partnership is an aggregate of its partners and not a separate entity for this purpose and that a partnership interest is a direct and undivided interest in partnership assets and liabilities. The Service reasoned that [t]he 'aggregate' view of the partnership interest, while not clearly delineated in section 514 of the Code, is suggested by Example (4) of section 1.514(c)-1(a)(2) of the regulations and is consistent with treatment of partnership interests elsewhere in the Internal Revenue Code (*e.g.*, section 751(a) and section 512(b)). The Service also made the tax policy argument that [i]t would make no economic or policy sense that [the exempt partner] should defeat the existing aggregate approach to section 512(b)(4) simply by selling an intermediary rather than having the intermediary sell the debt-financed property. We believe that Congress could not have intended that section 512(b)(4) could be so easily avoided. The Service also ruled that this reasoning applied only to the extent that the partnership liabilities constituted acquisition indebtedness within the meaning of Section 514.

[4702] Hill & Mancino, *Taxation of Exempt Organizations*, ¶ 26.03[10] Indebtedness Incurred by Pass-Through Entities, commented on the TAM:

> In this technical advice memorandum, the Service also made an important distinction with regard to unsecured debt incurred by the partnership pursuant to a revolving line of credit: namely, that the partnership's unsecured debt under the revolving line of credit that was outstanding at the time the exempt organization became a partner was acquisition indebtedness of the partner with respect to its partnership interest, on the theory that a portion of the partnership's unsecured debt at the time of the exempt organization's admission became, in effect, a debt of the exempt partner. However, the Service also ruled that increases in debt on the revolving line of credit after the exempt organization acquires its partnership interest would constitute acquisition indebtedness only to the extent that the increases were incurred to acquire or improve property within the meaning of Section 514(c)(1)(A), Section 514(c)(1)(B) or Section 514(c)(1)(C). In other words, if the partnership drew down on its line of credit to fund operating expenses, rather than to fund acquisitions of property, increases in the debt incurred on the revolving line of credit after the exempt organization acquires its interest in the partnership would not constitute acquisition indebtedness.

[4703] Woodhull, Selling A Partnership Interest Means Complexity For Tax-Exempt Partners, *Taxation of Exempts* (WG&L) (Mar./Apr. 2012), stated that a number of practitioners have questioned whether the IRS position would be upheld if this issue were to be litigated and later argued:

> The IRS also noted that Example 4 of Reg. 1.514(c)-1(a)(2) provides further support for debt-financed UBTI characterization…. According to the IRS, the debt/basis percentage thus calculated for the partnership interest is the same whether the partnership sells the property or the partner sell its partnership interest.
>
> Notwithstanding the Service's statement in the TAM, Example 4 does not actually state that the debt/basis percentage is the same whether the partnership sells the property or the partner sells the partnership interest. Example 4 in fact provides that in 1972, X's average acquisition indebtedness is $7 million and X's average adjusted basis is $8 million for such year. Therefore, X's debt/basis percentage *with respect to its share of partnership income* [emphasis added] for 1972 is 87.5 percent. The conclusion that should be drawn from this example is that portfolio income (interest, rental income, and capital gains) that is reported to a tax-exempt partner on the partner's Schedule K-1 is debt-financed income to the extent of its entire debt/basis percentage. This conclusion in Example 4 is also consistent with Sections 512(c)(1) and 702(b). Both sections, as noted above, attribute the character of the income earned by the partnership to the partners. Furthermore, if the partnership sells its own debt-financed assets, it is clear under Sections 702(b), 512(c)(1), and 512(b)(4) that a portion of the realized gain will be characterized as debt-financed gain to the extent of the debt/basis percentage and that the debt portion of this percentage includes debt incurred to acquire the partnership interest as well as debt incurred by the partnership.

at the underlying assets,[4704] the latter seeming to be supported by a statement made by a treatise that in other places looks to the aggregate theory.[4705] It's difficult to reconcile the TAM's

> Again, in this situation, the debt-financed gain is reported on the Schedule K-1 issued to the tax-exempt partner. The distinction that appears to be missing from the IRS interpretation of Example 4 in TAM 9651001 is that the above Code sections all relate to income that is earned by the partnership and then allocated and reported on a Schedule K-1 as part of the partner's distributive share. The gain on the sale of a partnership interest is not earned by the partnership and is neither allocated nor reported on the partner's Schedule K-1. Thus, if one looks strictly at the Code and regulations, there is an argument that the gain from the sale of the partnership interest that was not acquired with debt should be excluded from characterization as debt-financed UBTI in that the partnership interest is not property subject to acquisition indebtedness. The fact that debt is used by the partnership to acquire underlying assets, and that this debt is used to determine the debt/basis percentage of the tax-exempt partner's distributive share of portfolio income allocated by the partnership, does not mean that the proceeds of the partner's sale of its ownership interest are subject to the debt-financed UBTI rules.
>
> The Service's conclusion in TAM 9651001 is that whether X sells its interests in the partnerships or the partnerships sell the real estate, X is accomplishing economically the same result of realizing its share of any appreciation in the debt-financed property. This may be true economically, but, as discussed above, the Code and regulations do not necessarily support that conclusion. Even when the IRS appears to acknowledge that the aggregate view is not clearly supported by Section 514, it still maintains that this approach is suggested by Example 4 and Sections 751 and 512(b), and notes that Congress could not have intended that Section 512(b)(4) could be so easily subverted.

[4704] Woodhull, Selling A Partnership Interest Means Complexity For Tax-Exempt Partners, *Taxation of Exempts* (WG&L) (Mar./Apr. 2012), stated:

> Assuming that [the TAM] is a correct interpretation, calculating debt-financed UBTI with respect to the tax-exempt partner's capital gain or loss on the sale of its interest in the partnership will require the partner to:
>
> (1.) Calculate the highest amount of the partnership's indebtedness during the 12-month period ending on the date of the sale, including the partnership's allocable share of any indebtedness in lower-tier partnerships.
>
> (2.) Calculate the tax-exempt partner's allocable share of that indebtedness. Assuming that the debt is nonrecourse debt secured only by the partnership assets, this may be determined by reference to the partner's overall interest in the partnership unless the partnership agreement provides otherwise. If the debt is recourse with respect to one or more partners, it would affect this determination.
>
> (3.) Divide the tax-exempt partner's share of the partnership's indebtedness by the partner's average adjusted basis in the partnership. The partner's average adjusted basis in the partnership is the average of the partner's adjusted basis as of the first day during the tax year of the partner during which it held the interest in the partnership and its adjusted basis as of the date of the sale.
>
> (4.) Multiply the tax-exempt partner's share of the partner's capital gain or loss on the sale of its interest in the partnership by the percentage calculated above. The resulting amount will be debt-financed UBTI to that partner.

It later concluded:

> To determine the portion of the partner's capital gain or loss that is debt-financed UBTI, the tax-exempt partner should multiply its capital gain realized from the sale of the partnership interest as calculated above by the debt/basis percentage, the numerator of which is the partner's share of the highest amount of the partnership's debt during the 12-month period preceding the sale, and the denominator of which is the partner's average adjusted basis in the partnership during the tax year in which the sale took place.

[4705] Compare from fn. 4702 & Mancino, *Taxation of Exempt Organizations*, ¶ 26.03[10] Indebtedness Incurred by Pass-Through Entities, stating that:

looking at the aggregate approach and then seeming to turn around and apply an entity approach.[4706] This uncertainty is not the only way in which the TAM's position creates serious tax issues for exempt organizations that acquire partnership interests for investment purposes.[4707]

On the other hand, the burden now appears to be on the IRS to point to a specific provision overriding the general rule that a partnership interest is taxed as a single asset, viewing the partnership as a single entity, rather than viewing the partnership interest as an aggregate of the underlying interests.[4708] In other words, even though Code § 702 preserves the character of income flowing through a partnership's K-1 and runs those items through a Code § 512 analysis, Code § 512(b)(5) does not look through the partnership interest in applying its exclusion from UBI to gain on sale of the interest (subject of course to the debt-financed override provided by Code § 512(b)(4)[4709]). Thus, although Code § 751 may recharacterize gain on sale of a partnership interest,[4710] Code § 751 does not purport to override

> the Service [took the position] that the partnership's unsecured debt under the revolving line of credit that was outstanding at the time the exempt organization became a partner was acquisition indebtedness of the partner with respect to its partnership interest, on the theory that a portion of the partnership's unsecured debt at the time of the exempt organization's admission became, in effect, a debt of the exempt partner.

with fn. 4701, Hill & Mancino, *Taxation of Exempt Organizations*, ¶ 26.06[4] Disposition of Partnership Interests:

> The Service reasoned that a partnership is an aggregate of its partners and not a separate entity for this purpose and that a partnership interest is a direct and undivided interest in partnership assets and liabilities. The Service reasoned that [t]he 'aggregate' view of the partnership interest, while not clearly delineated in section 514 of the Code, is suggested by Example (4) of section 1.514(c)-1(a)(2) of the regulations and is consistent with treatment of partnership interests elsewhere in the Internal Revenue Code (*e.g.*, section 751(a) and section 512(b)). The Service also made the tax policy argument that [i]t would make no economic or policy sense that [the exempt partner] should defeat the existing aggregate approach to section 512(b)(4) simply by selling an intermediary rather than having the intermediary sell the debt-financed property. We believe that Congress could not have intended that section 512(b)(4) could be so easily avoided. The Service also ruled that this reasoning applied only to the extent that the partnership liabilities constituted acquisition indebtedness within the meaning of Section 514.

[4706] The IRS might have been uncomfortable applying only an entity approach, in light of GCM 39486 (1986), described in detail in fn. 4664, in which debt from a wraparound mortgage was not deemed assumed by the tax-exempt partner.

[4707] Hill & Mancino, *Taxation of Exempt Organizations*, ¶ 29.05. Taxation of Pass-Through Income, made that observation, commenting:

> First, the sale of a partnership interest is not a sale of the underlying asset of the partnership, so the result is not necessarily economically the same. Second, the exempt organization may have no control over the timing of the incurrence or repayment of debt by the partnership. This position is problematic because Section 514 uses a twelve-month lookback rule.

[4708] *Grecian Magnesite Mining v. Commissioner*, 149 T.C. No. 3 (2017) (repudiating Rev. Rul. 91-32), discussed more fully in part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest, especially fn. 5651.

[4709] See fn. 4685.

[4710] See part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

Code § 512(b)(5),[4711] so that ordinary income would not constitute UBI.[4712] Furthermore, merely holding a partnership interest that was donated and then selling it does not mean that the owner was engaged in a trade or business even though the partnership itself was, so selling the partnership interest does not constitute engaging in a business and therefore would not be captured by Code § 511, the latter being the underpinning of all UBI taxation. A similar argument would apply for tax-exempt investors that hold partnership interests as part of their investment strategy, so long as they are not dealers and the partnership interests themselves (without looking inside the partnerships) qualify under Code § 512(b)(5).

All of the above assumes that any business activity is unrelated to the exempt organization's exempt function. Gross income is UBI only if the trade or business producing the income is not substantially related (other than through the production of funds) to the purposes for which exemption is granted.[4713] Thus, one must examine the relationship between the business activities which generate the particular income in question—the activities, that is, of producing or distributing the goods or performing the services involved—and the accomplishment of the organization's exempt purposes.[4714] The collection of accounts receivable as part of the continuing day to day operation of exempt activities is not UBI.[4715] See also Advertising Unrelated Business Taxable Income and 3rd Party Contractor Issues | Internal Revenue Service (irs.gov).

II.Q.6.d.ii. UBTI Related to an S Corporation

Any K-1 income or gain from the sale of the S corporation stock constitutes unrelated business income if the shareholder is an IRA holding bank stock before October 22, 2004 or is a qualified retirement plan (other than an ESOP) or a Code § 501(c)(3) charity.[4716]

4711 Code § 751(a) and Reg. § 1.751-1(a)(1) provide that part of the gain "shall be considered as an amount realized from the sale or exchange of property other than a capital asset." Other than expressly not protecting certain noncapital assets such as inventory and property held for sale to customers, Code § 512(b)(5) does not require that property be a capital asset to qualify for its exclusion from UBI.
4712 However, Woodhull, Selling A Partnership Interest Means Complexity For Tax-Exempt Partners, *Taxation of Exempts* (WG&L) (Mar./Apr. 2012), expressed a view that is inconsistent with my conclusion (footnotes omitted):

> In general, the portion of a partner's gain or loss on the sale of a partnership interest that is attributable to Section 751 assets is treated as ordinary income or loss, and is subject to tax as UBTI to tax-exempt partners.

I called the author, and he said that he had not considered the point I raised above. In an informal conversation on November 10, 2017, he said that he agrees with my conclusion.
4713 Reg. 1.513-1(d)(1).
4714 Reg. 1.513-1(d)(1).
4715 Letter Ruling 9005068.
4716 Code § 512(e), which was added by P.L. 104-188 in 1996, effective for taxable years beginning after December 31, 1997.

A charitable remainder trust may not hold stock in an S corporation.[4717] Even if it could, the imposition of unrelated business income tax would be disastrous.[4718]

Suppose a trust's remainder passes to charity, and the trust holds S corporation stock. Every day the trust holds the stock after the primary beneficiary's death generates more and more UBTI. Consider converting the S corporation into an LLC taxed as an S corporation in a tax-free Code § 368(a)(1)(F) reorganization[4719] as early as one can (if converting is not more expensive than selling to an unrelated third party),[4720] then when the primary beneficiary dies the LLC has 75 days to convert to partnership or disregarded entity status retroactive to the date of death.[4721]

II.Q.6.d.iii. Charitable Deduction Against UBTI

If the charity is a trust, it may deduct up to 50%-60% of UBTI for gifts made to another charity.[4722] For 2020 and 2021, this is increased to 100% for certain cash contributions.[4723]

If the charity is a corporation, it may deduct up to 10% of UBTI for gifts made to another charity.[4724]

[4717] For what types of trusts can own stock in an S corporation, see part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation. An electing small business trust (ESBT) is the only type of trust described there into which a charitable remainder trust (CRT) might fit, but Code § 1361(e)(1)(B)(iii) prohibits a CRT from qualifying as an ESBT. However, an S corporation may donate property to a charitable remainder trust; see part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.

[4718] See part II.Q.6.c Possible Adverse Consequences When Contributing Partnership Interest to Charitable Remainder Trust especially fns. 4661-4662.

[4719] See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

[4720] If the S corporation holds assets that are depreciable or amortizable in the hands of the buyer, conversion might trigger ordinary income on the entire gain from sale of those assets, whereas sale to a third party might generate ordinary income only to the extent of recapture of amortization or accelerated depreciation deductions. Compare part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill) to part II.G.6.b Code § 1245 Property.

[4721] See parts II.P.3 Conversions (timing of election to convert) and II.P.3.a From Corporations to Partnerships and Sole Proprietorships (effect of election to convert).

[4722] See part II.Q.7.c.i.(b) Business Income Limiting Trust Income Tax Deduction, especially fn 4931. Code § 170(b)(1)(G)(i) provides:

> *In general*. In the case of any contribution of cash to an organization described in subparagraph (A), the total amount of such contributions which may be taken into account under subsection (a) for any taxable year beginning after December 31, 2017, and before January 1, 2026, shall not exceed 60 percent of the taxpayer's contribution base for such year.

[4723] See part II.G.4.g.i Charitable Deduction vs. Business Expense, including the increase of 50% to 100% for certain 2020 and 2021 contributions.

[4724] Code § 512(b)(1) provides:

> In the case of any organization described in section 511(a), the deduction allowed by section 170 (relating to charitable etc. contributions and gifts) shall be allowed (whether or not directly connected with the carrying on of the trade or business), but shall not exceed 10 percent of the unrelated business taxable income computed without the benefit of this paragraph.

Reg. § 1.512(b)-1(g)(3) provides:

> The contribution, whether made by a trust or other exempt organization, must be paid to another organization to be allowable. For example, a university described in section 501(c)(3) which is exempt from tax and which operates an unrelated business, shall be allowed a deduction… for

CCA 202027003 concluded:[4725]

> Section 265(a)(1) may not be applied to disallow a section 170 charitable contribution deduction allowed under section 512(b)(10) in calculating unrelated business taxable income under section 512(a)(1). This is because a charitable contribution is not

---

gifts or contributions to another university described in section 501(c)(3) for educational work but shall not be allowed any deduction for amounts expended in administering its own educational program.

Code § 511(a) provides:

(1) *Imposition of tax*. There is hereby imposed for each taxable year on the unrelated business taxable income (as defined in section 512) of every organization described in paragraph (2) a tax computed as provided in section 11. In making such computation for purposes of this section, the term "taxable income" as used in section 11 shall be read as "unrelated business taxable income".

(2) *Organizations subject to tax*.

(A) Organizations described in sections 401(a) and 501(c). The tax imposed by paragraph (1) shall apply in the case of any organization (other than a trust described in subsection (b) or an organization described in section 501(c)(1)) which is exempt, except as provided in this part or part II (relating to private foundations), from taxation under this subtitle by reason of section 501(a).

(B) *State colleges and universities*. The tax imposed by paragraph (1) shall apply in the case of any college or university which is an agency or instrumentality of any government or any political subdivision thereof, or which is owned or operated by a government or any political subdivision thereof, or by any agency or instrumentality of one or more governments or political subdivisions. Such tax shall also apply in the case of any corporation wholly owned by one or more such colleges or universities.

Code § 11 imposes tax on corporations.

[4725] CCA 202027003 reasoned:

> Other than UBTI, Organization's income generally is not subject to tax under section 501(a) and therefore falls within the classes of income considered tax-exempt income for purposes of section 265(a)(1). In order to determine if expenses are allocable to tax-exempt income for purposes of section 265(a)(1), courts have looked to whether the expenses were "intended to be covered" by tax-exempt income or whether the expenses would not exist "but for" the tax-exempt income. *See Induni v. Commissioner*, 990 F.2d 53 (1993); *Dalan v. Commissioner*, T.C. Memo. 1988-106. Similarly, Rev. Rul. 83-3 disallows expenses under section 265(a)(1) that were incurred for the purpose of earning or otherwise producing tax-exempt income and expenses that were incurred in carrying out the specific purpose to which the tax-exempt income is earmarked. 1983-1 C.B. 72, modified by Rev. Rul. 87-32, 1987-1 C.B. 131.
>
> In order to establish that a "contribution or gift" has been made under section 170, a taxpayer must show a voluntary and irrevocable transfer of ownership of money or property without the receipt of adequate consideration or a substantial return benefit. See *United States v. American Bar Endowment*, 477 U.S. 105, 116 (1986); see also *Transamerica Corp. v. United States*, 902 F.2d 1540 (Fed. Cir. 1990); *Singer Co. v. United States*, 449 F.2d 413 (Ct. Cl. 1971). In determining whether a taxpayer has made a contribution without the expectation of any return benefit or quid pro quo, the "external features of the transaction in question" are examined. *Hernandez v. Commissioner*, 490 U.S. 680, 690 (1989). In addition, the taxpayer is required to have charitable intent in making the contribution. See *American Bar Endowment*, 477 U.S. at 118.
>
> A charitable contribution is, by its nature, not allocable to any source of income, but instead arises from a donor's charitable intent to voluntarily transfer money or property without receiving any benefit in return. Consequently, section 265(a)(1) may not be applied to disallow Organization's charitable contribution deduction claimed in computing UBTI under section 512(a)(1).

allocable to tax-exempt income, but instead arises from a donor's charitable intent to voluntarily transfer money or property without receiving any benefit in return.

A charity that spends donations it receives on programs (as opposed to using donations for grants to other charities) should consider not receiving directly a gift that would generate UBTI, because the charity will be taxed on all of the UBTI:

- Instead, the gift should be made to a trust that is a Type I supporting organization or donor advised fund, so that the UBTI can be reduced by the trust's up to 50% deduction for distributions to the ultimate charity.

- The trust should consider forming a single member LLC that is disregarded for income tax purposes, to accept the donation; the LLC should have significant other assets. Contributions to the LLC will be deductible as if made directly to the trust.[4726] Forming the LLC may avoid a trap that applies when the flow-through entity does not distribute to the trust before yearend at least as much cash as the amount of the trust's expected charitable contribution deduction.[4727] The LLC would use cash from its other assets to distribute to the trust cash at least equal in amount to the gross income flowing through the LLC to the trust. That way, the trust's receipts from the LLC will equal or exceed the gross income passing through the LLC, allowing the trust to meet the rules requiring its contribution to charity to be from gross income that the trust actually received. However, that concern applies to charitable distributions not made from unrelated business income (UBI) and therefore deductible under Code § 642(c)[4728] and presumably does not apply to charitable distributions made from UBI and therefore deductible under Code § 681 applying the Code § 170 rules.[4729]

II.Q.6.e. Assignment of Income on Property Being Sold

The IRS has attacked the donation to charity of property that the charity then quickly sells as instead constituting a sale of that property by the donor.

More generally, Reg. § 1.671-1(c) discusses the assignment of income theory, distinguishing certain aspects from the grantor trust rules:[4730]

> Except as provided in such subpart E, income of a trust is not included in computing the taxable income and credits of a grantor or another person solely on the grounds of his dominion and control over the trust. However, the provisions of subpart E do not apply in situations involving an assignment of future income, whether or not the assignment is to a trust. Thus, for example, a person who assigns his right to future income under an employment contract may be taxed on that income even though the assignment is to a trust over which the assignor has retained none of the controls specified in sections 671 through 677. Similarly, a bondholder who assigns his right to interest may be taxed on interest payments even though the assignment is to an uncontrolled trust. Nor are the rules as to family partnerships affected by the provisions of subpart E, even though a partnership interest is held in trust. Likewise, these sections have no application in

[4726] See fn. 334, found in part II.B Limited Liability Company (LLC).
[4727] See part II.Q.7.c.i.(a) Contribution Must Be Made from Gross Income, describing the issue and a similar strategy in fns. 4921-4924.
[4728] See fn. 4727.
[4729] See part II.Q.7.c.i.(b) Business Income Limiting Trust Income Tax Deduction.
[4730] See part III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment.

> determining the right of a grantor to deductions for payments to a trust under a transfer and lease-back arrangement. In addition, the limitation of the last sentence of section 671 does not prevent any person from being taxed on the income of a trust when it is used to discharge his legal obligation. See § 1.662(a)-4. He is then treated as a beneficiary under subparts A through D or treated as an owner under section 677 because the income is distributed for his benefit, and not because of his dominion or control over the trust.

The Humacid Company v. Commissioner, 42 T.C. 894, 912-913 (1964) (*Humacid*), held:[4731]

> The fact that at the time he delivered the notes to the exempt organizations on December 2, 1958, Huntsinger controlled petitioner and contemplated that petitioner would redeem the notes prior to the end of the year does not put him in constructive receipt of the redemption proceeds. Respondent has proffered no evidence that petitioner had credited or set aside any funds for the redemption of the notes prior to Huntsinger's contribution of the notes to the exempt organizations on December 2, 1958. *Cf.* sec. 1.451-2(a), Income Tax Regs. This Court has, upon numerous occasions, noted that the doctrine of constructive receipt is not to be lightly applied but is to be invoked only in situations where it is clearly justifiable. *Robert J. Dial*, 24 T.C. 117, 124 (1955); *Hal E. Roach*, 20 B.T.A. 919 (1930); *C.E. Gullett*, 31 B.T.A. 1067, 1069 (1935). The mere fact of Huntsinger's control of petitioner is not sufficient to constitute constructive receipt. *Hyland v. Commissioner*, 175 F.2d 422, 424 (C.A. 2, 1949), affirming a Memorandum Opinion of this Court; *Robert J. Dial*, *supra*; *Basil F. Basila*, 36 T.C. 111, 116-117 (1961). Since respondent has failed to prove that petitioner ever set aside any funds with which to redeem the notes donated by Huntsinger to the exempt organizations prior to such transfer, Huntsinger cannot be found to have been in constructive receipt of the redemption proceeds.
>
> We have found as a fact that Huntsinger made valid gifts of notes in the principal amount of $41,000 on December 2, 1958, giving up all right, title, and interest therein at that time. Respondent, moreover, has failed to establish that the notes so transferred by Huntsinger included any element of ordinary income thereon. Huntsinger's donation of those notes to the three organizations is not a case of anticipatory assignment of income (*cf. Helvering v. Horst*, 311 U.S. 112 (1940), and *S. M. Friedman*, 41 T.C. 428 (1963), on appeal (C.A. 6, May 5, 1964)), for Huntsinger was not transferring the right to receive earned income.
>
> The law with respect to gifts of appreciated property is well established. A gift of appreciated property does not result in income to the donor so long as he gives the property away absolutely and parts with title thereto before the property gives rise to income by way of a sale. *Stuart A. Rogers*, 38 T.C. 785, 788-789 (1962); *Elizabeth H. Potter*, 38 T.C. 951 (1962); *Campbell v. Prothro*, 209 F.2d 331 (C.A. 5, 1954); *Estate of W. G. Farrier*, 15 T.C. 277 (1950); *Elsie SoRelle*, 22 T.C. 459, 475-479 (1954); *South Lake Farms, Inc.*, 36 T.C. 1027 (1961), *affd.* 324 F.2d 837 (C.A. 9, 1963). On the basis of the facts before us, it is our opinion that Huntsinger did this. Therefore, he should not be regarded as having received income upon petitioner's redemption of the notes from the three charitable or educational organizations.

[4731] For more on constructive receipt, see fns 4205-4206 in part II.Q.1.e Trying to Avoid Possible Ordinary Income on the Sale of a Partnership or S Corporation.

Although the IRS does not attack the donation of marketable securities that a charity sells immediately after the contribution,[4732] it has attempted to treat, as a sale by the donor, the contribution of closely-held stock to a charity, followed by a redemption. After losing,[4733] the IRS ruled:[4734]

> In *Palmer*, the taxpayer had voting control of both a corporation and a tax-exempt private foundation. Pursuant to a single plan, the taxpayer donated shares of the corporation's stock to the foundation and then caused the corporation to redeem the stock from the foundation….The Service will treat the proceeds of a redemption of stock under facts similar to those in *Palmer* as income to the donor only if the donee is legally bound, or can be compelled by the corporation, to surrender the shares for redemption.

An enforceable cause of action under the promissory estoppel theory counted as a legally binding commitment to sell stock.[4735] So did the tender of shares sufficient to bind the shareholders of a corporation being acquired by a taxable merger, even though the acquiring corporation had not legally bound itself to acquire the shares.[4736]

Until recently, taxpayers who fall within the no-binding-agreement safe harbor of Rev. Rul. 78-197 are protected from the IRS, even if the sale appears certain to occur. *Rauenhorst v.*

[4732] Rev. Rul. 74-53 (no assignment of income where no express or implied obligation imposed upon the trustee to sell or exchange). For the origin of the assignment of income rule, see *Lucas v. Earl*, cited in fn. 1896, found in part II.G.24 Taxing Entity or Individual Performing Services.

[4733] *Palmer v. Commissioner*, 62 T.C. 684 (1974), *aff'd* on another issue, 523 F.2d 1308 (8th Cir. 1975).

[4734] Rev. Rul. 78-197, followed by Letter Rulings 8623007, 9413020, 9452020, 9452026, 9611047, and 200230004.

[4735] *Blake v. Commissioner*, T.C. Memo 1981-579, *aff'd* 697 F.2d 473 (2nd Cir. 1982).

[4736] *Ferguson v. Commissioner*, 108 T.C. 244 (1997), *aff'd* 174 F.3d 997 (9th Cir. 1999), *followed Gail Vento, LLC v. U.S.*, 111 A.F.T.R.2d 2013-1505 (D.C. V.I. 2013). *Ferguson* included some contingencies that the court disregarded. In *Ferguson*, the gift was made September 9, 1988. Here is the timeline for the tender:

> On July 28, 1988, AHC, CDI Holdings, Inc. (CDI), and DC Acquisition entered into the merger agreement. According to the merger agreement, DC Acquisition would be merged into AHC, and AHC would thereupon become a wholly owned subsidiary of CDI as soon as practicable after DC Acquisition had purchased the stock of AHC pursuant to the tender offer. The merger agreement provided that each outstanding share of AHC stock, following the purchase of AHC stock pursuant to the tender offer, would be converted into the right to receive $22.50 a share in cash.
> On August 3, 1988, DC Acquisition made a tender offer for the stock of AHC at $22.50 a share.
> By the close of business on August 31, 1988, more than 50 percent of the outstanding shares of AHC stock had been tendered or guaranteed. At that time, despite the various contingencies to be discussed infra, we believe the reality and substance of the merger agreement and the tender offer indicate that the stock of AHC was converted from an interest in a viable corporation to a fixed right to receive cash.
> The tender or guarantee of more than 50 percent of the outstanding shares of AHC stock was the functional equivalent to a vote by the shareholders of AHC approving the merger. The terms of the tender offer provided that DC Acquisition, with the acquisition of a majority of AHC stock, could assure that the requisite number of affirmative votes in favor of the merger would be received even if no other shareholder voted in favor of the merger. Therefore, with the exception of the hypothetical possibility that a sufficient number of tendered or guaranteed shares of AHC stock could be withdrawn, DC Acquisition was positioned to proceed unilaterally with consummation of the merger by the close of business on August 31, 1988.

So the conditions to effectuate the merger had been satisfied before the gift, with the chance of the conditions being undone being viewed as remote.

Commissioner, 119 T.C. 157 (1993), focused exclusively on legally binding commitments.[4737] In that case, the court faulted the IRS' nonspecific allegations of an informal agreement or understanding between the donees and other parties, accepting on their face affidavits the taxpayer produced. The court also rejected the IRS' contentions that certain facts caused the assignment of income doctrine to apply:

> In support of respondent's position that the right to sale proceeds had ripened to a practical certainty at the time of the contributions, he cites: (1) The September 28, 1993, letter of intent from WCP expressing its intention to purchase all the issued and outstanding stock of NMG; (2) the October 22, 1993, resolution by WCP's board of directors, which authorized its officers to negotiate and enter into the agreement for the purchase of all the issued and outstanding capital stock of NMG; and (3) a valuation report prepared by Houlihan, Lokey, Howard, & Zukin (Houlihan Lokey), which was attached to petitioners' 1993 return and which opined that, as of November 12, 1993, there was little chance the transaction involving WCP would not close on or before December 31, 1993. Those items might be particularly relevant for determining whether the stock warrant purchase ripened to a practical certainty; however, none of those items alone, or in combination, show that the donees were legally bound, or could be compelled, to sell their stock warrants.

Given that the probability of sale affects valuation, a taxpayer might maximize the charitable deduction by waiting to make the donation until the date before the sale closes. However, the Tax Court looks at the facts, and *Chrem v. Commissioner*, T.C. Memo. 2018-164, which was a sale between related parties, included some unfortunate language when denying summary judgment for the taxpayer, misstating the conclusion of *Rauenhorst*.[4738] *Chrem* involved sloppy

---

[4737] See fn 4632 regarding why letters of intent are tightly drafted to avoid any legally binding agreement before closing.

[4738] See the highlighted language in this except:

> Another relevant question is whether the charity is obligated, or can be compelled by one of the parties to the transaction, to surrender the donated shares to the acquirer. Rev. Rul. 78-197, 1978-1 C.B. 83 (1978); see *Rauenhorst v. Commissioner*, 119 T.C. 157, 166 (2002) (finding "the donee's control to be … an important factor"). The existence of an "understanding" among the parties, or the fact that transactions occur simultaneously or according to prearranged steps, may be relevant in answering that question. See, *e.g.*, *Blake v. Commissioner*, 697 F.2d 473, 480 (2d Cir. 1982) (stating that an "understanding" among the parties need not be "legally enforceable under state law"), *aff'g* T.C. Memo. 1981-579; *Ferguson v. Commissioner*, 108 T.C. 244 (1997) (finding assignment of income with respect to proceeds of merger that occurred contemporaneously with charitable contribution), *aff'd*, 174 F.3d 997 (9th Cir. 1999).
>
> We conclude that there exist genuine disputes of material fact that prevent us from resolving the assignment of income issue summarily. Comtrad and SDI were related by common management, the interests of both companies appear to have been aligned, and both companies seemingly desired that the stock acquisition be completed. If so, these facts may support the conclusion that the acquisition was virtually certain to occur. Respondent also points to emails and an alleged exchange of documents between JCF and petitioners on November 12, 2012. This evidence may support respondent's contention that JCF agreed in advance to tender its shares to SDI and that all steps of the transaction were prearranged.
>
> The parties also dispute the dates on which relevant events occurred. Petitioners assert that they transferred their shares to JCF on December 5 and there appears to be documentary evidence arguably supporting that assertion. Respondent contends that JCF did not acquire ownership of its 900 shares until (at the earliest) December 10, allegedly after JCF unconditionally agreed to sell the 900 shares to SDI. That contention derives arguable support from other documentary

taxpayers who did not obtain appraisals of the donated interests and had to argue substantial compliance in their effort to get a charitable deduction, so this may be a case of sloppiness being punished on many levels.

Dickinson v. Commissioner, T.C. Memo. 2020-128, demonstrates that *Chrem* was an outlier. *Dickinson* provides much comfort to taxpayers regarding donations of illiquid assets or concentrated positions when the charity has a policy of liquidating such donations. *Dickinson*'s facts were:

> Petitioner husband was the chief financial officer and a shareholder of Geosyntec Consultants, Inc. (GCI), a privately held company, during the years at issue. The GCI board of directors (Board) authorized shareholders to donate GCI shares to Fidelity Investments Charitable Gift Fund (Fidelity), an organization tax exempt under section 501(c)(3), through written consent actions in 2013 and 2014. In both consent actions the Board stated that Fidelity "has a donor advised fund program which incorporates procedures requiring … [Fidelity] to immediately liquidate the donated stock" and "seeks an imminent exit strategy and, therefore, promptly tenders the donated stock to the issuer for cash". The Board approved a third round of donations at a Board meeting by unanimous vote in 2015; the Board members signed the written minutes of the meeting. After each Board authorization, petitioner husband donated appreciated GCI shares to Fidelity. Petitioner husband remained a full-time GCI employee following each donation.
>
> GCI confirmed in letters to Fidelity that its books and records reflected Fidelity as the new owner of the shares. For each stock donation, petitioner husband signed a letter of understanding (LOU) to Fidelity, indicating that the transferred stock was "exclusively owned and controlled by Fidelity", and that Fidelity "maintains full discretion over all conditions of any subsequent sale" of the stock and "is not and will not be under any obligation to redeem, sell, or otherwise transfer" the stock. Petitioners received confirmation letters from Fidelity, which explained that Fidelity had "exclusive legal

---

evidence, as well as from Empire's description of the proposed transaction, which recited that petitioners would transfer 900 shares to JCF "[s]imultaneously with SDI's acquisition of the 6,100 shares."

There are also genuine disputes of material fact concerning the extent to which JCF, having received the 900 shares, was obligated to tender them to SDI. Empire stated in its report that petitioners would use "all reasonable efforts to cause [JCF] to agree to sell the shares to SDI." At this juncture the record includes little if any evidence concerning petitioners' ability to sway JCF's actions or JCF's separate negotiations (if any) with SDI. Respondent contends that JCF had no meaningful discussions with SDI at all but was "simply informed by petitioners" that the 900 shares should be tendered at once. A trial will be necessary to determine whose version of the facts is correct.

One fact potentially relevant to this question concerns JCF's fiduciary duties as a custodian of charitable assets. If JCF tendered its Comtrad shares, it would immediately receive $4,050,000 in cash. If it refused to tender its shares and the entire transaction were scuttled, JCF would apparently be left holding a 13% minority interest in a closely held Hong Kong corporation, the market value of which might be questionable.

In sum, viewing the facts and the inferences that might be drawn from the facts in the light most favorable to respondent as the nonmoving party, we find that there exist genuine disputes of material fact that prevent summary adjudication of the assignment of income issue. To the extent petitioners seek summary judgment on this question, we will deny their motion.

> control over the contributed asset". Shortly after each donation, Fidelity redeemed the GCI shares for cash.

Dickinson reasoned and held:

> In the notice of deficiency, respondent determined that each donation of the GCI shares, followed by Fidelity's exchange of the shares for cash, should be treated in substance as a redemption of the shares for cash by petitioner husband, followed by petitioners' donation of the cash redemption proceeds to Fidelity. Per *Humacid Co. v. Commissioner*, 42 T.C. 894, 913 (1964), we respect the form of this kind of transaction if the donor (1) gives the property away absolutely and parts with title thereto (2) before the property gives rise to income by way of a sale. See also *Grove v. Commissioner*, 490 F.2d 241, 246 (2d Cir. 1973), *aff'g* T.C. Memo. 1972-98; *Carrington v. Commissioner*, 476 F.2d 704, 708 (5th Cir. 1973), *aff'g* T.C. Memo. 1971-222; *Behrend v. United States*, 31 A.F.T.R.2d (RIA) 73-406, 1972 WL 2627, at *3 (4th Cir. 1972); *Rauenhorst v. Commissioner*, 119 T.C. 157, 162-163 (2002).
>
> The first *Humacid* prong requires us to determine whether the donor transferred all his rights in the donated property. See, *e.g.*, *Grove v. Commissioner*, 490 F.2d at 246; *Carrington v. Commissioner*, 476 F.2d at 708; *Behrend*, 1972 WL 2627, at *3. To defeat petitioners' motion on this point, respondent must set forth specific facts showing that there is a genuine dispute for trial as to whether petitioner husband made an absolutely perfected gift of the GCI stock before the redemption. See Rule 121(d); *Sundstrand Corp. v. Commissioner*, 98 T.C. at 520.
>
> GCI's letters to Fidelity confirming ownership transfer, Fidelity's letters to petitioners explaining that Fidelity had "exclusive legal control" over the donated stock, and the LOUs to the same effect all support petitioners' claim that petitioner husband transferred all his rights in the shares. Respondent makes much of the fact that Fidelity regularly redeemed the GCI shares shortly after each donation, according to what the Board understood to be Fidelity's internal procedures. Respondent argues that these facts suggest petitioner husband, GCI, and Fidelity could have arranged the redemptions in advance of the gifts, but a preexisting understanding among the parties that the donee would redeem donated stock does not convert a postdonation redemption into a predonation redemption. See *Behrend*, 1972 WL 2627, at *3. Furthermore, neither a pattern of stock donations followed by donee redemptions, a stock donation closely followed by a donee redemption, nor selection of a donee on the basis of the donee's internal policy of redeeming donated stock suggests that the donor failed to transfer all his rights in the donated stock. See, *e.g.*, *Grove v. Commissioner*, 490 F.2d at 242-245 (respecting form of transaction where donee needed to fundraise to support its operations, and over a decade consistently redeemed annual donations of stock for which donor remained entitled to dividends); *Carrington v. Commissioner*, 476 F.2d at 705-706 (respecting form of transaction where donee redeemed stock eight days after it was donated); *Palmer v. Commissioner*, 62 T.C. 684, 692-693 (1974), (respecting form of transaction where, pursuant to a single plan, the taxpayer donated stock to a foundation and then caused the corporation to redeem the stock from the foundation the day after the donation), *aff'd*, 523 F.2d 1308 (8th Cir. 1975). Petitioners' contemporaneous documentary evidence of an absolute gift, and respondent's failure to assert facts indicating any genuine controversy on this point, lead us to conclude that petitioner husband's donations satisfy the first *Humacid* requirement.

The second *Humacid* requirement, that the taxpayer make the donation before the stock gives rise to income by way of sale, implements the assignment of income doctrine: A taxpayer who has earned income cannot escape taxation by assigning his right to receive payment. See *Helvering v. Horst*, 311 U.S. 112, 116 (1940). *Humacid* prong two ensures that if stock is about to be acquired by the issuing corporation via redemption, the shareholder cannot avoid tax on the transaction by donating the stock before he receives the proceeds.

Where a donee redeems shares shortly after a donation, the assignment of income doctrine applies only if the redemption was practically certain to occur at the time of the gift, and would have occurred whether the shareholder made the gift or not. See *Palmer v. Commissioner*, 62 T.C. at 694-695; see also *Ferguson v. Commissioner*, 174 F.3d 997, 1003-1004 (9th Cir. 1999) (finding that the shareholder recognizes income from a stock sale where acquisition is "practically certain to occur", rather than the subject of "a mere anticipation or expectation", before the shareholder donates stock), *aff'g* 108 T.C. 244 (1997). In *Hudspeth v. United States*, 471 F.2d 275, 276 (8th Cir. 1972), for example, the court recast a stock donation as a taxable stock sale and donation of the sale proceeds where the taxpayer donated stock after the issuing corporation's directors and shareholders had adopted a plan of complete liquidation. See also *Jones v. United States*, 531 F.2d 1343, 1343-1344 (6th Cir. 1976); *Allen v. Commissioner*, 66 T.C. 340, 347 (1976).[2] By contrast, there was no assignment of income in *Palmer v. Commissioner*, 62 T.C. at 687-688, 695, even though all parties were related and anticipated the redemption before the donation, because "no vote for the redemption had yet been taken" when the shareholder donated the stock. As in *Palmer*, the redemption in this case was not a fait accompli at the time of the gift. As noted above, respondent argues that the parties may have prearranged for Fidelity to redeem the stock. Even if that was the case, it would not affect the analysis under the second *Humacid* requirement. Rather, we respect the form of the transaction because petitioner husband did not avoid receipt of redemption proceeds by donating the GCI shares.

[2] The Court of Appeals for the Ninth Circuit has gone a step further, asserting in dicta that stock sale proceeds are taxable to a shareholder who donates stock absent a binding obligation to sell if the facts and circumstances indicate that a tender offer and merger are "practically certain to proceed" in the immediate future. See *Ferguson v. Commissioner*, 174 F.3d 997, 1004 (9th Cir. 1999), *aff'g* 108 T.C. 244 (1997).

The parties point us to Rev. Rul. 78-197, 1978-1 C.B. 83, a "bright-line" rule the IRS applies in cases like *Palmer*, which focuses on the donee's control over the disposition of the appreciated property. See *Rauenhorst v. Commissioner*, 119 T.C. at 165.[3] This Court has not adopted Rev. Rul. 78-197, *supra*, as the test for resolving anticipatory assignment of income issues, see *Rauenhorst v. Commissioner*, 119 T.C. at 166, and does not do so today. The ultimate question, as noted in *Palmer*, is whether the redemption and the shareholder's corresponding right to income had already crystallized at the time of the gift. See *Palmer v. Commissioner*, 62 T.C. at 694-695. Regardless of whether the donee's obligation to redeem the stock may suggest the donor had a fixed right to redemption income at the time of the donation, see *Rauenhorst v. Commissioner*, 119 T.C. at 166-167, respondent does not allege that petitioner husband had any such right in this case. Accordingly, respondent's resort to Rev. Rul. 78-197, *supra*, is unavailing.

> [3] Rev. Rul. 78-197, 1978-1 C.B. 83, 83, announces that the IRS "will treat the proceeds as income to the donor under facts similar to those in the Palmer decision only if the donee is legally bound, or can be compelled by the [issuing] corporation, to surrender the shares for redemption."
>
> *Conclusion*
>
> As required by *Humacid* and its progeny, petitioner husband made an absolute gift of the GCI shares in each taxable year before the stock gave rise to income by way of a sale. We will therefore grant petitioners' motion for summary judgment, and deny respondent's motion for partial summary judgment.

Based on all of the above, I believed that the "practical certainty" test is whether the legal requirement for the owner to sell the donated property was practically certain, not whether as a matter of the parties' actions the sale was practically certain and not whether the buyer was compelled to buy if the owner decided to sell. At least I did until *Estate of Hoensheid v. Commissioner*, T.C. Memo. 2023-34, decided to the contrary:

> While we consider a donee's legal obligation to sell as "significant to the assignment of income analysis," *Ferguson*, 108 T.C. at 259, it "is only one factor to be considered in ascertaining the 'realities and substance' of the transaction," *Allen*, 66 T.C. at 348 (quoting *Jones*, 531 F.2d at 1345). Instead, "the ultimate question is whether the transferor, considering the reality and substance of all the circumstances, had a fixed right to income in the property at the time of transfer." *Ferguson*, 108 T.C. at 259; see *Dickinson*, T.C. Memo. 2020-128, at *10. We thus look to several other factors that bear upon whether the sale of shares was virtually certain to occur at the time of petitioners' gift. In this case the relevant factors include (1) any legal obligation to sell by the donee, (2) the actions already taken by the parties to effect the transaction, see *Ferguson*, 106 T.C. at 264, (3) the remaining unresolved transactional contingencies, see *Robert L. Peterson Irrevocable Tr. #2 v. Commissioner*, T.C. Memo. 1986-267, 51 T.C.M. (CCH) 1300, 1316, *aff'd sub nom. Peterson v. Commissioner*, 822 F.2d 1093 (8th Cir. 1987), and (4) the status of the corporate formalities required to finalize the transaction, see *Estate of Applestein*, 80 T.C. at 345–46.
>
> **A. Fidelity Charitable's Obligation to Sell**
>
> We turn first to whether Fidelity Charitable did in fact have an obligation to sell the CSTC shares. We conclude that respondent has not established that Fidelity Charitable had any legal obligation to sell the shares.[23] As petitioners point out, the terms and conditions of Fidelity Charitable's Letter of Understanding expressly disclaimed any such obligation. In addition, respondent has not sufficiently established the existence of any informal, prearranged understanding between petitioners and Fidelity Charitable that might otherwise constitute an obligation. See *Greene v. United States*, 13 F.3d 577, 583 (2d Cir. 1994); see also *Chrem*, T.C. Memo. 2018-164, at *13. This factor weighs against an anticipatory assignment of income but is not dispositive. See *Ferguson*, 108 T.C. at 259.
>
> [23] In *Chrem v. Commissioner*, T.C. Memo. 2018-164, we suggested that a donor-advised fund's sponsoring organization may be subject to fiduciary duties that might impose a legal obligation to sell contributed shares constituting a small minority interest in a closely held corporation. *Id*. at *15 ("If it refused to tender its shares and

the entire transaction were scuttled, [the sponsoring organization] would apparently be left holding a 13% minority interest in a closely held Hong Kong corporation, the market value of which might be questionable."); see also *Grove v. Commissioner*, 490 F.2d 241, 248 (2d Cir. 1973) (Oakes, J. dissenting) (looking to New York trust law and observing that offering donated shares for redemption was "the only practice which a university treasurer could correctly take and still meet his own statutory obligations as a fiduciary"), *aff'g* T.C. Memo. 1972-98. Respondent did not present arguments or testimony as to what, if any, fiduciary duties Fidelity Charitable might have owed that would compel it to sell the CSTC shares to HCI. Accordingly, lacking the benefit of meaningful briefing on the subject, we cannot find that Fidelity Charitable was in fact legally obligated to sell the contributed shares by way of fiduciary duty.

B. Bonuses & Shareholder Distributions

Next, we look to what acts CSTC and HCI took to effect the transaction before the July 13, 2015, gift. As of that date, a number of acts had already taken place that may suggest the transaction was a virtual certainty. One week before the gift, HCI had caused the incorporation of a new holding company subsidiary to acquire the CSTC shares. Three days before the gift, CSTC had amended its Articles of Incorporation to allow for written shareholder consent, an action requested by HCI. Most significantly, however, the "cash sweeping" actions taken by CSTC strongly suggest that the transaction with HCI was a virtual certainty before the gift on July 13.

On July 7, 2015 petitioner amended CSTC's Change in Control Bonus Plan in order to specify that CSTC "desire [sic] that the consummation of the Investment Transaction result in payments to eligible Grantees under the Plan." That same day, petitioner stated in an email that CSTC would "sweep the cash from the company prior to closing and distribute it to the brothers." As of July 7, CSTC and petitioner thus considered the transaction with HCI so certain to occur that they took action to trigger the bonus payouts, consistent with the plan to sweep CSTC's cash before closing. On July 10, 2015, CSTC then paid out approximately $6.1 million in employee bonuses and, a few days later on July 14, distributed approximately $4.7 million to petitioner and his two brothers as shareholders. While the July 14 distribution took place the day after the gift, petitioner's statement on July 7 evidences that the decision to make the distribution had already been made as of that date, if not well formally authorized by CSTC. See Mich. Comp. Laws § 450.1345(1) and (2). We thus find that, before July 13, CSTC and petitioner had distributed and/or determined to distribute over $10 million out of the corporation.

Moreover, we consider it highly improbable that petitioner and his two brothers would have emptied CSTC of its working capital if the transaction had even a small risk of not consummating. Absent its working capital, CSTC was no longer a going concern until the transaction was finalized. See *Cook*, 5 T.C. at 911 (finding assignment of income where donor of shares was "well aware that the corporate activities had all but ceased except for the actual distribution in liquidation"); see also *Apt v. Birmingham*, 89 F.Supp. 361, 393 (N.D. Iowa 1950) (stating that gain may be realized when "for all practical purposes corporate stock had no further purposes to fulfill" aside from underlying transaction). The bonus payouts and distributions do not appear from the record to have been in any way contingent on the final execution of the purchase agreement. Accordingly, we conclude that, once made, the bonus payouts and distributions could not be clawed back and had tax consequences upon receipt for the participating employees and shareholders, including petitioner himself.

In the reality of the transaction, the cash sweeps were thus highly significant conditions precedent to consummating the transaction with HCI. *Cf. Kinsey v. Commissioner*, 58 T.C. 259, 265–66 (1972) (finding right to income on shares from liquidation was fixed where "a substantial portion of [corporation's] assets were distributed prior to the date of the gift"), *aff'd*, 477 F.2d 1058 (2d Cir. 1973). As of July 13, 2015, the CSTC shares were essentially "hollow receptacles" for conveying proceeds of the transaction with HCI, "rather than an interest in a viable corporation." *Estate of Applestein*, 80 T.C. at 345-46; see *Hudspeth v. United States*, 471 F.2d 275, 279 (8th Cir. 1972) (describing donated shares as "merely empty vessels by which the taxpayer conveyed the liquidation proceeds"). The cash sweep strongly weighs in favor of a conclusion that the sale was a virtual certainty and thus petitioners' right to income from the shares was fixed as of July 13, 2015.

C. Unresolved Sale Contingencies

Next, we look to what unresolved sale contingencies remained between the parties as of the July 13, 2015, gift. See *Robert L. Peterson Irrevocable Tr. #2*, 51 T.C.M. (CCH) at 1316–19 (focusing on various contingencies that taxpayers argued precluded their right to sale proceeds from becoming fixed before a gift). Petitioners argue that the transaction with HCI was still being negotiated up until the closing on July 15. Petitioners rely on petitioner's trial testimony, where he identified several negotiated issues, including an environmental liability, employee compensation arrangements, and excess real estate. At trial petitioner testified that he and HCI "basically negotiated right up until the day before we closed" - i.e., July 14, 2015.

However, the record does not bear out the substance of petitioner's characterization. The identified employee compensation and excess real estate issues appear to have been resolved in drafts of the agreement prepared before July 13, 2015. At trial, a representative of HCI characterized the environmental liability issue as "the one probably biggest item of negotiation" resolved before closing. On July 10, 2015, HCI's counsel prepared a draft with a new seller indemnity provision addressing the environmental liability issue. By 4:38 a.m. on [*32] the morning of July 13, when HCI's counsel next ran a redline comparison of a new draft, the environmental liability provision had already been accepted into the draft agreement. Given that the written drafts memorialized the negotiations between the parties, we find that the parties had resolved the environmental liability issue before the contribution to Fidelity Charitable.

Moreover, the only substantive change made to the drafts after the contribution to Fidelity Charitable was a minor revision to the provision for ongoing compensation to Mark and Kurt to cover the cost of their health insurance. We thus find that none of the unresolved contingencies remaining on July 13, 2015, were substantial enough to have posed even a small risk of the overall transaction's failing to close. See *Robert L. Peterson Irrevocable Tr. #2*, 51 T.C.M. (CCH) at 1319 (concluding that remaining contingencies "at best...represent remote and hypothetical possibilities that the stock purchase would be abandoned"); *cf. Martin v. Machiz*, 251 F. Supp. 381, 389 (D. Md. 1966) (finding no assignment of income where, at time of gift of shares, parties had "substantial" disagreements about closing date and buyer's insistence on a surety bond as security for breach of warranty). We find that petitioner, consistent with his "99% sure" statement, waited until all material details had been agreed to with HCI before he transferred the shares to Fidelity Charitable. See *Malkan*, 54 T.C. at 1314 ("Even though [the taxpayer] had discussed creating the trusts for several months, he did not establish them until the parties had agreed upon the details of the sale."). The absence of significant unresolved contingencies also weighs in favor of the sale of shares to HCI being a virtual certainty.

D. Corporate Formalities

Finally, we look to the status of the corporate formalities necessary for effecting the transaction. See *Estate of Applestein*, 80 T.C. at 345-46 (finding that taxpayer's right to sale proceeds from shares had "virtually ripened" upon shareholders' approval of proposed merger agreement). Under Michigan law, a proposed plan to exchange shares must generally be approved by a majority of the corporation's shareholders. See Mich. Comp. Laws § 450.1703a(2)(d); *id*. § 450.1407(1). Formal shareholder approval of a transaction has often proven to be sufficient to demonstrate that a right to income from shares was fixed before a subsequent transfer. See *Ferguson*, 108 T.C. at 262; see also *Hudspeth*, 471 F.2d at 279. However, such approval is not necessary for a right to income to be fixed, when other actions taken establish that a transaction was virtually certain to occur. See *Ferguson*, 104 T.C. at 262-63 (rejecting taxpayer's "attempt to impose formalistic obstacle[]" of formal shareholder approval); see also *Hudspeth*, 471 F.2d at 280 (describing final resolution to dissolve corporation as a "mere formality" where shareholders and board had already approved plan of liquidation, despite "remote, hypothetically possible abandonment[]" of that plan); *Kinsey*, 58 T.C. at 265–66.

On June 11, 2015, petitioner and his two brothers (the sole shareholders of CSTC) unanimously approved pursuing a sale of all outstanding stock of CSTC to HCI. On July 15 they provided written consent to the final Contribution and Stock Purchase Agreement with HCI. However, viewed in the light of the reality of the transaction, the record shows that final written consent was a foregone conclusion. As a practical matter, finalizing the transaction with HCI presented petitioner and his two brothers with the opportunity to partially (or fully, as in Kurt's case) cash out of CSTC at a significant premium over their initial target price of $80 million. See *Ferguson v. Commissioner*, 174 F.3d at 1004–05 (considering formal shareholder approval to be unnecessary where shareholders were receiving substantial premium). From HCI's perspective, it also believed it was acquiring CSTC at a fair price and, as of July 13, had resolved the environmental liability issue, its final significant due diligence concern. See *id*. at 1005. All three Hoensheid brothers, and particularly petitioner, were involved in negotiating the transaction, making their approval all but assured as of July 13, 2015. *Cf. Perry v. Commissioner*, T.C. Memo. 1976-381, 35 T.C.M. (CCH) 1718, 1724 (concluding that shareholder approval of sale was not just a "rubber stamp" where corporation was not "a closely held corporation controlled by the same individuals who negotiated the [a]greement"). We conclude that formal shareholder approval was purely ministerial, as any decision by the brothers not to approve the sale was, as of July 13, "remote and hypothetical." *Jones*, 531 F.2d at 1346; see *Allen*, 66 T.C. at 347 (finding assignment of income despite parties not completing "purely ministerial act of executing quitclaim deed" before transfer). This factor is neutral as to whether petitioners' right to income was fixed.

E. Conclusion

> To avoid an anticipatory assignment of income on the contribution of appreciated shares of stock followed by a sale by the donee, a donor must bear at least some risk at the time of contribution that the sale will not close. On the record before us, viewed in the light of the realities and substance of the transaction, we are convinced that petitioners' delay in transferring the CSTC shares until two days before closing eliminated any such risk and made the sale a virtual certainty. Petitioners' right to income from the sale of CSTC shares was thus fixed as of the gift on July 13, 2015. We hold that petitioners recognized gain on the sale of the 1,380 appreciated shares of CSTC stock.
>
> We echo prior decisions in recognizing that our holding does not specify a bright line for donors to stop short of in structuring charitable contributions of appreciated stock before a sale. See *Allen*, 66 T.C. at 346 (rejecting proposed bright-line rule approach and noting that "drawing lines is part of the daily grist of judicial life"); see also *Harrison v. Schaffner*, 312 U.S. 579, 583–84 (1941). However, as petitioners' tax counsel seems to have recognized in her advice to petitioner, "any tax lawyer worth [her] fees would not have recommended that a donor make a gift of appreciated stock" so close to the closing of a sale. *Ferguson v. Commissioner*, 174 F.3d at 1006; see *Allen*, 66 T.C. at 346 (recognizing that realities and substance approach puts "a premium on consulting one's lawyer early enough in the game"). By July 13, 2015, the transaction with HCI had simply "proceeded too far down the road to enable petitioners to escape taxation on the gain attributable to the donated shares." *Allen*, 66 T.C. at 348.

I find this case difficult to reconcile with the *Rauenhorst* statement: "Those items might be particularly relevant for determining whether the stock warrant purchase ripened to a practical certainty; however, none of those items alone, or in combination, show that the donees were legally bound, or could be compelled, to sell their stock warrants."[4739] In *Rauenhorst*, the court faulted the IRS' nonspecific allegations of an informal agreement or understanding between the donees and other parties, accepting on their face affidavits the taxpayer produced. However, in *Hoensheid*, the IRS proved exactly how far along the sale was. To me, the court seems to be moving away from *Rauenhorst* and instead saying to taxpayers, "You can't get a deal totally worked out, take all of the economic steps consistent with being totally ready to close, pause for a day to figure out who you want to be taxed on the sale, rearrange ownership, then the next day close with new owners who will be taxable instead of you." For more about the gift's timing, see excerpt in part II.Q.6.f.i Completed Gift Requirement.

II.Q.6.f. Incomplete Gift and Charitable Partial Interest Prohibitions

II.Q.6.f.i. Completed Gift Requirement

The Tax Court has held that a Code § 170 deduction is allowed "only if the transfer at issue satisfies the six essential elements of a bona fide inter vivos gift:"[4740]

[4739] See fn 4737.

[4740] *Fakiris v. Commissioner*, T.C. Memo. 2017-126, fn. 12, citing:
Goldstein v. Commissioner, 89 T.C. 535, 541-542 (1987) (quoting *Weil v. Commissioner*, 31 B.T.A. 899, 906 (1934), *aff'd*, 82 F.2d 561 (5th Cir. 1936)); *Guest v. Commissioner*, 77 T.C. 9, 15-17 (1981); *Stjernholm v. Commissioner*, T.C. Memo. 1989-563.
Before that quote, the footnote stated:

(1) a donor competent to make the gift;

(2) a donee capable of taking the gift;

(3) a clear and unmistakable intention on the part of the donor to absolutely and irrevocably divest himself of the title, dominion, and control of the subject matter of the gift, in praesenti;

(4) the irrevocable transfer of the present legal title and of the dominion and control of the entire gift to the donee, so that the donor can exercise no further act of dominion or control over it;

(5) a delivery by the donor to the donee of the subject of the gift or the most effectual means of commanding the dominion of it; and

(6) acceptance of the gift by the donee.

Thus, a retained right to require the donee to transfer ownership to another nonprofit made the gift conditional and therefore nondeductible.[4741]

On the other hand, if the charity voluntarily sells donated stock to the issuer, the donor's control over the issuer does not prevent the gift from being complete.[4742]

> It is well settled that the term "charitable contribution" as it is used generally in sec. 170 and the regulations thereunder is synonymous with the term "gift". See *Collman v. Commissioner*, 511 F.2d 1263, 1267 (9th Cir. 1975), *aff'g in part, rev'g in part, and remanding* T.C. Memo. 1973-93; *Seed v. Commissioner*, 57 T.C. 265, 275 (1971); *Sutton v. Commissioner*, 57 T.C. 239, 242 (1971); *Wolfe v. Commissioner*, 54 T.C. 1707, 1713 (1970); *Murphy v. Commissioner*, 54 T.C. 249, 252 (1970); *McLaughlin v. Commissioner*, 51 T.C. 233, 234 (1968), *aff'd*, 23 A.F.T.R.2d (RIA) 69-1763 (1st Cir. 1969); *Perlmutter v. Commissioner*, 45 T.C. 311, 316-317 (1965); *DeJong v. Commissioner*, 36 T.C. 896, 899 (1961), *aff'd*, 309 F.2d 373, 376-379 (9th Cir. 1962); *Stjernholm v. Commissioner*, T.C. Memo. 1989-563, *aff'd*, 933 F.2d 1019 (10th Cir. 1991).

In light of *BC Ranch II, L.P. v. Commissioner*, 867 F.3d 547 (5th Cir. 2017), T.C. Memo. 2020-157 supplemented *Fakiris v. Commissioner*, T.C. Memo. 2017-126.

[4741] *Fakiris v. Commissioner*, T.C. Memo. 2017-126, mentioning Reg § 1.170A-1(e) (see fn. 4743) but also noting *Graev v. Commissioner*, 140 T.C. 377, 390 (2013), and *Briggs v. Commissioner*, 72 T.C. at 656-659. In light of *BC Ranch II, L.P. v. Commissioner*, 867 F.3d 547 (5th Cir. 2017), T.C. Memo. 2020-157 supplemented *Fakiris v. Commissioner*, T.C. Memo. 2017-126.

[4742] *DeWitt v. U.S.*, 204 Ct.Cl. 274 (1974), holding:

> Defendant does not affirmatively challenge DeWitt's donative intent, nor the actual delivery of the stock to the Academy; but it does contend that DeWitt did not relinquish dominion and control over the stock since it views the transfer of the stock as conditional based on an agreement between DeWitt and the Academy that the Academy would retain the stock until such time as DeWitt, through his controlled corporation, Mortgage Co., offered to repurchase the stock. Since DeWitt subsequently repurchased the stock through his controlled corporation, defendant sees in this fact substance for its view that a conditional agreement did exist when the stock was given to the Academy. This fact, however, is not particularly persuasive here, nor have similar facts had any determinative effect in analogous cases. See *Sheppard v. United States*, *supra*; *Carrington v. Commissioner*, *supra*; *Behrend v. United States*, decided December 14, 1972 (4th Cir.), 31 AFTR.2d 73-406; *Makoff v. Commissioner*, 26 Tax Ct. Mem. 83, 90 (1967); *Fox v. Commissioner*, 27 Tax Ct. Mem. 1001 (1968). Since the eight shares of stock were in a closely-

If a transfer for charitable purposes depends on the performance of some act or the happening of a precedent event in order that it might become effective, no deduction is allowable unless the possibility that the charitable transfer will not become effective is so remote as to be negligible.[4743]

Estate of Hoensheid v. Commissioner, T.C. Memo. 2023-34, analyzed the timing of the transfer of stock in a closely-held corporation:

> "Ordinarily, a contribution is made at the time delivery is effected." Treas. Reg. § 1.170A-1(b). The regulations further provide that "[i]f a taxpayer unconditionally delivers or mails a properly endorsed stock certificate to a charitable donee or the donee's agent, the gift is completed on the date of delivery.[15] *Id*. However, the regulations do not define what constitutes delivery. See, *e.g., Dyer v. Commissioner*, T.C. Memo. 1990-51, 58 T.C.M. (CCH) 1321, 1323; *Brotzler v. Commissioner*, T.C. Memo. 1982-615, 44 T.C.M. (CCH) 1478, 1480; *Alioto v. Commissioner*, T.C. Memo. 1980-360, 40 T.C.M. (CCH) 1147, 1154, *aff'd*, 692 F.2d 762 (9th Cir. 1982). Accordingly, we must first look to state law for the threshold determination of whether petitioners divested themselves of their property rights via gift.[16] See *United States v. Nat'l Bank of Com.*, 472 U.S. 713, 722 (1985) (concluding that state law determines property rights and federal law classifies them for appropriate tax treatment); *Jones*, 129 T.C. at 150 ("In order to make a valid gift for Federal tax purposes, a transfer must at least effect a valid gift under the applicable State law."); *Greer v. Commissioner*, 70 T.C. 294, 304 (1978) (applying state gift law requirements to charitable contribution of property), aff'd on another issue, 634 F.2d

---

held company, there was little, if any, market for them. Indeed, the only potential buyer was Mortgage Co., DeWitt's corporation. Thus, it is not surprising that the offer to purchase the stock came from the only likely source available.[6]

[6] Defendant attempts to make much of DeWitt's candid uncertainty that, if the policies of the Academy were such as to preclude any effort on his part to repurchase the stock, he doesn't know whether he would have made the gift of stock to the Academy. This pre-delivery speculation adds little to resolution of the matter at hand. DeWitt realized some risk existed, once he donated the stock to the Academy, that he might not be able to repurchase the stock from the Academy. He acknowledged that the risk was small since there was little, if any, market for the stock. However, even if the Academy sold the stock to another party, DeWitt would have sought to repurchase it from that party since the stock was worth more to him than anybody else. The important fact is that after delivery of the stock, DeWitt no longer had dominion and control over the stock. The presence of this risk factor supports the view that a bona fide gift of stock was given. See *Sheppard v. United States*, *supra*, 176 Ct.Cl. at 253-56, 361 F.2d at 977-78; *Apt v. Birmingham*, 89 F.Supp. 361, 392 (N.D. Iowa, 1950). The fact that DeWitt and the Academy may have expected and anticipated that the shares would be repurchased by Mortgage Co. does not invalidate the gift made. *Fox v. Commissioner*, *supra*, 27 Tax Ct. Mem. At 1013.

[4743] Reg § 1.170A-1(e), which provides:

Transfers subject to a condition or power. If as of the date of a gift a transfer for charitable purposes is dependent upon the performance of some act or the happening of a precedent event in order that it might become effective, no deduction is allowable unless the possibility that the charitable transfer will not become effective is so remote as to be negligible. If an interest in property passes to, or is vested in, charity on the date of the gift and the interest would be defeated by the subsequent performance of some act or the happening of some event, the possibility of occurrence of which appears on the date of the gift to be so remote as to be negligible, the deduction is allowable. For example, A transfers land to a city government for as long as the land is used by the city for a public park. If on the date of the gift the city does plan to use the land for a park and the possibility that the city will not use the land for a public park is so remote as to be negligible. A is entitled to a deduction under section 170 for his charitable contribution.

1044 (6th Cir. 1980); *Kissling v. Commissioner*, T.C. Memo. 2020-153, at *22 ("Whether delivery is effected is a question of state law."). In doing so, we apply state law in the manner in which the highest court of the state has indicated that it would apply the law. See *Commissioner v. Estate of Bosch*, 387 U.S. 456, 465 (1967). Where the state's highest court is silent, we must discern and apply the state law, giving "proper regard" to the state's lower courts. See *Julia R. Swords Tr. v. Commissioner*, 142 T.C. 317, 342 (2014) (quoting *Commissioner v. Estate of Bosch*, 387 U.S. at 465).

[15] The regulations alternatively provide, in relevant part, that "[i]f the donor delivers the stock certificate to his bank or broker as the donor's agent, or to the issuing corporation or its agent, for transfer into the name of the donee, the gift is completed on the date the stock is transferred on the books of the corporation." Treas. Reg. § 1.170A-1(b).

[16] This Court has at times applied its own longstanding test for a valid inter vivos gift. See *Guest*, 77 T.C. at 16 (quoting *Weil v. Commissioner*, 31 B.T.A. 899, 906 (1934), *aff'd*, 82 F.2d 561 (5th Cir. 1936)). This test, while more extensive on its face than what is required under Michigan law, shares the same core elements: "donative intent, delivery by the donor and acceptance by the donee." *Goldstein v. Commissioner*, 89 T.C. 535, 542 (1987) (distilling the *Weil* test); see *Estate of Sommers v. Commissioner*, T.C. Memo. 2013-8, at *43 n.20 (analyzing validity of gift under principles consistent with both federal and state law); *Estate of Dubois v. Commissioner*, T.C. Memo. 1994-210, 1994 WL 184393, at *2 (reaching conclusion that no valid gift was made under both federal and state law).

As to the choice of state law, both parties focused their state law briefing on Michigan law, and we cannot discern a choice of law principle that would suggest the parties' understanding is incorrect. Accordingly, we apply the law of the state of petitioners' domicile, Michigan, with respect to whether and when petitioners made a valid gift of the CSTC shares. See *Macatawa Bank v. Wipperfurth*, 822 N.W.2d 237, 238 (Mich. Ct. App. 2011) ("The longstanding rule in Michigan is that 'the situs of intangible assets is the domicile of the owner unless fixed by some positive law.'" (quoting *Brown v. O'Donnell* (*In re Rapoport's Est.*), 26 N.W.2d 777, 781 (Mich. 1947))); see also *Malkan v. Commissioner*, 54 T.C. 1305, 1314 n.3 (1970) (applying law of the situs to determine validity of gift of shares of stock).

In determining the validity of a gift, Michigan law requires a showing of (1) donor intent to make a gift; (2) actual or constructive delivery of the subject matter of the gift; and (3) donee acceptance.[17] See *Davidson v. Bugbee*, 575 N.W.2d 574, 576 (Mich. Ct. App. 1997) (citing *Molenda v. Simonson*, 11 N.W.2d 835, 836 (Mich. 1943)); see also *United States v. Four Hundred Seventy Seven (477) Firearms*, 698 F. Supp. 2d 894, 902 (E.D. Mich. 2010) (applying Michigan law).

[17] Petitioners alternatively direct us to Article 8 of the Uniform Commercial Code (UCC), as adopted by Michigan, which on its face is applicable to gift transfers of certificated securities. *See* Mich. Comp. Laws § 440.1201(2)(cc) (2015) ("'Purchase' means taking by sale, lease, discount, negotiation, mortgage, pledge, lien, security interest, issue or reissue, gift, or any other voluntary transaction creating an interest in property." (Emphasis added.)); *id*. (dd); *id*. § 440.8301(1)(a) and (b) (delivery of certificated security occurs when purchaser or third party acting on their behalf "acquires possession of the security certificate"). While the Michigan Supreme Court

does not appear to have expressly addressed the issue, we do not read the UCC provisions as disturbing the longstanding Michigan common law test. See *id*. § 440.8302 cmt. 2 ("Article 8 does not determine whether a property interest in certificated or uncertificated security is acquired under other law, such as the law of gifts, trusts, or equitable remedies."); *id*. § 440.1103(2) (stating that "principles of law and equity" supplement UCC provisions); see also *Young v. Young*, 393 S.E.2d 398, 401 (Va. 1990) ("The common law requirements of delivery and acceptance are not removed by those provisions of the [UCC] pertaining to the transfer of securities.").

Petitioners and respondent each advance different dates for when petitioners made a gift to Fidelity Charitable of the CSTC shares. Petitioners argue that a gift was made on June 11, 2015, and they point to petitioner's testimony and Fidelity Charitable's corrected contribution confirmation letter, which both claim June 11 as the date of the gift. Respondent argues that a valid gift was not made until at least July 13, 2015, when Fidelity Charitable first received a stock certificate from petitioners' representatives.[18] We will examine each of three required elements for a valid gift in turn.

[18] Respondent raises a separate issue with regard to the dividend paid out by CSTC on July 14 to petitioner and the two brothers, but not paid to Fidelity Charitable, speculating that petitioners did not make a valid gift of the shares. Respondent's contention appears to be foreclosed by Michigan law, which provides that retention of a dividend does not preclude a valid gift of the underlying shares. See *Cook v. Fraser*, 299 N.W. 113, 114 (Mich. 1941) (citing *Ford v. Ford*, 259 N.W. 138 (Mich. 1935)); *In re Estate of Prinstein*, No. 252682, 2005 WL 1459575, at *1 (Mich. Ct. App. June 21, 2005) ("[T]he fact that a donor collects dividends on a security does not make an inter-vivos gift of that security invalid.").

A. Present Intent

The determination of a party's subjective intent at some historical point is necessarily a highly fact-bound issue. When deciding such an issue, we must determine "whether a witness's testimony is credible based on objective facts, the reasonableness of the testimony, the consistency of statements made by the witness, and the demeanor of the witness." *Ebert v. Commissioner*, T.C. Memo. 2015-5, at *5-6; see also *Estate of Kluener v. Commissioner*, 154 F.3d 630, 636 (6th Cir. 1998), *aff'g in relevant part* T.C. Memo. 1996-519. If contradicted by the objective facts in the record, we will not "accept the self-serving testimony of [the taxpayer]...as gospel." *Tokarski v. Commissioner*, 87 T.C. 74, 77 (1986); see *Davis v. Commissioner*, 88 T.C. 122, 143 (1987), *aff'd*, 866 F.2d 852 (6th Cir. 1989).

We start with petitioner's contemporaneous emails and the contemporaneous transactional documents, which we consider to be especially probative evidence with respect to his intent. On June 1, petitioner first expressed in an email that he wanted to wait to make the gift of the shares to Fidelity Charitable until the last possible moment, when he was "99% sure" that the sale to HCI would close. Petitioner's subsequent actions and communications were consistent with that intent. On June 11, petitioner and his two brothers executed the Consent to Assignment agreement, an act that demonstrated petitioner's generalized future intent to make a gift. However, the Consent to Assignment cannot establish that, as of June 11, such an intent was sufficiently present and specific. See *Czarski v. Bonk*, 124 F.3d 197, 1997 WL 535773, at *4 (6th Cir. 1997) (unpublished table decision) (applying Michigan law and finding no evidence establishing purported donor's "specific intent" with respect to the particular property). On its face, the Consent to Assignment agreement failed to specify a number of shares to be contributed, suggesting that petitioner had not yet decided that key detail. Similarly, the original stock certificate, which was prepared on or sometime after June 11, failed to specify an effective date, again suggesting that a date would be decided upon later.[19] On July 6, petitioner stated in an email that he was still "not totally sure of the shares being transferred to the charitable fund yet." That email confirms that, as of July 6, the details of the contribution were still in flux. Indeed, three days later, on July 9, Mr. Bear emailed Mr. Boland to inform him that "it looks like Scott has arrived at 1380 shares."

[19] We note that copies of the Consent to Assignment agreement and stock certificate that were produced to the Commissioner during the examination appear to have been modified and backdated to specify, respectively, a number of shares and an effective date that were not originally present at the time of the transaction. We find such inconsistencies to be significant in evaluating petitioners' claim that the gift was made on June 11. *Cf. Ferguson v. Commissioner*, 174 F.3d 997, 1000 (9th Cir. 1999) (questioning purported date of contribution where "the original handwritten date in a printed box entitled 'date of donation'...had been completely scratched out" and a new date written next to it), *aff'g* 108 T.C. 244 (1997).

At trial, petitioner testified that he believed the number of shares to be donated was set at 1,380 on June 11. That testimony is squarely contradicted by the Consent to Assignment agreement, petitioner's July 6 email, and Mr. Bear's July 9 email. See, e*.g.* , *Richardson v. Commissioner*, T.C. Memo. 1984-595, 49 T.C.M. (CCH) 67, 73-74 (concluding that taxpayer's characterization of date of contribution was not credible where in conflict with "documents written contemporaneously with the donation"). Petitioner also testified that his July 6 email was referring to a potential donation of a second tranche of shares, a theoretical event which apparently never took place. The record contains no evidence supporting the claim that petitioners attempted to make (or even contemplated) two separate gifts of CSTC shares. We find petitioner's self-serving testimony as to his intent to be incredible.

The record does not support a finding of present intent to make a gift until July 9 when petitioner settled on a number of 1,380 shares. From that point on, petitioner took a number of actions that confirmed his present intent to transfer. On July 9 or 10 petitioner delivered the physical stock certificate to Ms. Kanski's office. Similarly, on July 10 petitioner created an online giving account with Fidelity Charitable. Taken together, these actions provide sufficient credible evidence of petitioner's intent. We conclude that, as of July 9, petitioner had present intent to make a gift.

B. Delivery

At bottom, the delivery requirement generally contemplates an "open and visible change of possession" of the donated property. *Shepard v. Shepard*, 129 N.W. 201, 208 (Mich. 1910); *Davis v. Zimmerman*, 40 Mich. 24, 27 (1879). As the term itself suggests, manually providing tangible property to the donee is the classic form of delivery. *See, e.g.*, Restatement (Second) of Property § 31.1 cmt. b (Am. L. Inst. 1992) (describing the "simplest" form of delivery as the donor's "plac[ing] the subject matter of the gift in the hands of the intended donee"). Similarly, manually providing to the donee a stock certificate that represents intangible shares of stock is traditionally sufficient delivery. See Philip Mechem, Gifts of Corporation Shares, 20 Ill. L. Rev. 9, 15-16 (1925-1926) (collecting cases). However, the determination of what constitutes delivery is inherently context-specific and depends upon the “nature of the subject-matter of the gift” and the “situation and circumstances of the parties.” *Shepard*, 129 N.W. at 208 (“[N]o absolute rule can be laid down as to what will constitute a sufficient delivery....”).

Delivery need not necessarily be actual. Constructive delivery may be effected where property is delivered into the possession of another on behalf of the donee. *See, e.g. , In re Van Wormer’s Estate*, 238 N.W. 210, 212 (Mich. 1931) (finding constructive delivery where stock certificate was issued in the name of donee and deposited at bank). Whether constructive or actual, delivery “must be unconditional and must place the property within the dominion and control of the donee” and “beyond the power of recall by the donor.” *In re Casey Estate*, 856 N.W.2d 556, 563 (Mich. Ct. App. 2014) (citing *Osius v. Dingell*, 134 N.W.2d 657, 659 (Mich. 1965)); see *Geisel v. Burg*, 276 N.W. 904, 908 (Mich. 1937) (finding no valid gift where certificates of deposit were never placed beyond donor’s control). If constructive or actual delivery of the gift property occurs, its later retention by the donor is not sufficient to defeat the gift. See *Estate of Morris v. Morris*, No. 336304, 2018 WL 2024582, at *5 (Mich. Ct. App. May 1, 2018) (citing *Jackman v. Jackman*, 260 N.W. 769, 770 (Mich. 1935)); see also *Garrison v. Union Tr. Co.*, 129 N.W. 691, 692 (Mich. 1911).

With respect to delivery, neither Mr. Hoensheid nor Ms. Kanski was able to credibly identify a specific action taken on June 11 that placed the shares within Fidelity Charitable’s dominion and control.[20] See *Czarski*, 1997 WL 535773, at *4 (finding no evidence that donor took any action that would constitute delivery or place gift property in donee’s dominion and control); see also *Reed Smith Shaw & McClay v. Commissioner*, T.C. Memo. 1998-64, 1998 WL 62393, at *8 (declining to credit uncorroborated self-serving testimony regarding actions purportedly taken to effect transfer of shares to trust). Instead, petitioner’s and Ms. Kanski’s trial testimony suggested that the physical, partially completed stock certificate remained on petitioner’s desk until July 9 or 10, 2015, at which point it was dropped off at Ms. Kanski’s office. Consequently, delivery to Fidelity Charitable could not have taken place before July 9 or 10, because petitioner retained dominion and control of the shares while the physical certificate was sitting on his desk. *Cf. In re Casey Estate*, 856 N.W.2d at 563 (finding no delivery where donor retained property in his safe and could thus change the combination at any time to preclude access by purported donee).

[20] In his testimony, petitioner implied a belief that the execution of the Consent to Assignment agreement had effected a transfer. Execution of the Consent to Assignment agreement did not purport to transfer ownership of any portion of petitioner’s shares; instead, it merely allowed him the ability to transfer shares in the future.

The same principle is applicable to the three or four days when the physical certificate was in Ms. Kanski’s office, before the forwarding of the PDF share certificate to Fidelity Charitable. The Minority Stock Purchase Agreement’s seller representative clause, as executed, named Ms. Kanski’s firm, Clark Hill, as the seller’s representative of Fidelity Charitable. That designation raises the question of whether Ms. Kanski’s possession of the certificate constituted delivery to Fidelity Charitable. However, we cannot conclude that providing the certificate to Ms. Kanski removed the shares from petitioner’s power of recall. Petitioners have not provided any evidence to indicate that Ms. Kanski could have disregarded an instruction from petitioner - her client - to return or simply discard the stock certificate before July 13. See *Osius*, 134 N.W.2d at 656 (stating that a valid gift "must invest ownership in the donee beyond the power of recall by the donor"); *Snyder v. Snyder*, 92 N.W. 353, 354 (Mich. 1902) ("The retaining of any control in the hands of the donor over the subject of the gift renders it invalid."); see also *Londen v. Commissioner*, 45 T.C. 106, 109 (1965) (finding it "unlikely" that corporation's secretary "would have refused to honor a countermand of the transfer instructions issued by [the taxpayer]"); *Morrison v. Commissioner*, T.C. Memo. 1987-112, 53 T.C.M. (CCH) 251, 255 (finding no evidence that if taxpayer had "countermanded her instructions to transfer the stock, [her broker] would have refused to halt the transfer"). Thus, we conclude that the stock certificate, while in the possession of Ms. Kanski, was subject to recall by petitioner at any time and was not within the dominion and control of Fidelity Charitable, precluding delivery. See *Londen*, 45 T.C. at 109; *Zipp v. Commissioner*, 28 T.C. 314, 324-25 (1957) (finding retention of stock certificates by donor's attorney to preclude a valid gift), *aff'd*, 259 F.2d 119 (6th Cir. 1958); *Bucholz v. Commissioner*, 13 T.C. 201, 204 (1949) (finding no valid gift where taxpayer instructed custodian of corporate books to prepare stock certificates but remained undecided about ultimate gift).

In some jurisdictions, transfer of shares on the books of the corporation can, in certain circumstances, constitute delivery of an inter vivos gift of shares. See, e.g., *Wilmington Tr. Co. v. Gen. Motors Corp.*, 51 A.2d 584, 594 (Del. Ch. 1947); *Chi. Title & Tr. Co. v. Ward*, 163 N.E. 319, 322 (Ill. 1928); *Brewster v. Brewster*, 114 A.2d 53, 57 (Md. 1955). However, the Michigan Supreme Court does not appear to have addressed whether transfer on the books of a corporation alone can constitute delivery of a valid gift of certificated shares of stock. In several older tax cases, the U.S. Court of Appeals for the Sixth Circuit - to which an appeal in this case would lie, absent stipulation to the contrary - has stated that transfer on the books of a corporation constitutes delivery of shares of stock, apparently as a matter of federal common law. See *Lawton v. Commissioner*, 164 F.2d 380, 384 (6th Cir. 1947), *rev'g* 6 T.C. 1093 (1946); *Bardach v. Commissioner*, 90 F.2d 323, 326 (6th Cir. 1937), *rev'g* 32 B.T.A. 517 (1935); *Marshall v. Commissioner*, 57 F.2d 633, 634 (6th Cir. 1932), *aff'g in part, rev'g in part* 19 B.T.A. 1260 (1930). We have previously observed that, in this line of cases, the transfers on the books of the corporation were bolstered by other objective actions that evidenced a change in possession and thus a gift. See *Jolly's Motor Livery Co. v. Commissioner*, T.C. Memo. 1957-231, 16 T.C.M. (CCH) 1048, 1073 (distinguishing *Bardach* and *Marshall* and instead concluding that taxpayer failed to make a valid gift under Tennessee law); see also *Bucholz*, 13 T.C. at 204; *Campbell v. Commissioner*, T.C. Memo. 1979-411, 39 T.C.M. (CCH) 287, 289. We would thus be hesitant to conclude that transfer on the books of CSTC would be sufficient here as a matter of law, given the apparent split of authorities on the issue and lack of state law precedent. See Fletcher Cyclopedia of the Law of Corporations § 5684 (West 2022) ("Generally, a transfer of stock from the donor to the donee on the corporate books, standing alone, is not sufficient to constitute a valid gift, at least with regard to a close corporation where the donor is in control[.]"); Mark S. Rhodes, Transfer of Stock § 6:3 (7th ed. 2021) ("There is a division of authority as to whether a mere transfer on the books of the corporation without delivery of the certificate constitutes a valid gift of stock."); Mechem, Gifts of Corporation Shares, supra, at 25-26 (describing view that transfer on the books of the corporation effects only the relationship between new shareholder and corporation, while delivery of certificate separately transfers ownership of shares as property between persons).

However, even assuming arguendo that a transfer on the corporate books is sufficient to constitute delivery of certificated shares of stock in Michigan, we are still unable to find on the record before us that such a transfer occurred. The primary relevant evidence produced by petitioners is the printout of a purported stock ledger. The printout, which has a report date of July 13, shows an entry issuing 1,380 shares to Fidelity Charitable on July 10. At trial, however, petitioner testified that the printout was not from CSTC's official stock ledger but appeared to him instead to have been prepared by one of CSTC's attorneys. Indeed, petitioners themselves have at no point asserted that a gift occurred on July 10 and have not produced any evidence to corroborate such a transfer on the books of CSTC. We thus attribute little weight to the printout, given petitioners' failure to corroborate it with credible evidence. See *Sellers v. Commissioner*, T.C. Memo. 1977-70, 36 T.C.M. (CCH) 305, 312 (observing that self-serving corporate records are relevant evidence but "the weight to be accorded them is dependent upon their completeness and credibility"), *aff'd*, 592 F.2d 227 (4th Cir. 1979). Consequently, the record is insufficient to support a conclusion that delivery of the shares was made on July 10 via transfer on the books of CSTC.

Finally, we look to Mr. Bear's July 13 email of the PDF stock certificate to Fidelity Charitable. That email provides the strongest documentary evidence of the shares' leaving petitioner's dominion and control. Providing Fidelity Charitable with a copy of a stock certificate issued in its name was an objective act evidencing an "open and visible change of possession." *Shepard*, 129 N.W. at 208. Further, we find that this act placed the shares of CSTC in Fidelity Charitable's dominion and control, by providing Fidelity Charitable with an instrument that it could present to CSTC and exercise its rights as shareholder. Nor did any postdelivery retention by petitioner of a stock certificate render delivery ineffectual. See *id*. (stating that donor's postdelivery retention of stock certificates was "immaterial" to validity of gift). On the basis of the foregoing, we conclude that delivery of the shares of CSTC did not occur before July 13.

C. Acceptance

Donee acceptance of a gift is generally "presumed if the gift is beneficial to the donee." *Davidson*, 575 N.W.2d at 576; see *Osius*, 134 N.W.2d at 660; *Dunlap v. Dunlap*, 53 N.W. 788, 790 (Mich. 1892) ("The donation being for [the donees'] advantage, they will be deemed to have accepted it, unless the contrary appears."). Petitioners seek to reinforce that presumption by relying on the corrected contribution confirmation letter and yearend account statement from Fidelity Charitable, both of which stated that the shares were contributed (and thus presumably accepted by Fidelity Charitable) on June 11. Both Fidelity Charitable's guidelines and the year end account statement note that donors are able to request corrections of both contribution confirmation letters and account statements. Petitioners did not produce a copy of the original contribution confirmation letter, dated July 15, 2015, that they received from Fidelity Charitable. Such evidence could have confirmed whether Fidelity Charitable consistently understood the date of contribution to be June 11 and what errors were present in the original letter. Petitioners' failure to produce such evidence within their control gives rise to a presumption that it would be unfavorable to their case. See *Wichita Terminal Elevator Co. v. Commissioner*, 6 T.C. 1158, 1165 (1946), *aff'd*, 162 F.2d 513 (10th Cir. 1947). Given our conclusions above that neither the present intent nor the delivery requirement was met on June 11, we do not consider the corrected documentation from Fidelity Charitable to be reliable evidence with respect to the date of acceptance.

In contrast, Mr. Boland's July 13 email is the more convincing evidence and rebuts any presumption that acceptance took place on an earlier date. In that email Mr. Boland

> represented that he would need the stock certificate before he could take action with respect to the sale of shares to HCI. As Mr. Boland later testified, Fidelity Charitable typically required receipt of a stock certificate as a precondition to its acceptance of a gift when dealing with a contribution of closely held, certificated securities. Later on July 13, after receiving the stock certificate, Mr. Boland on behalf of Fidelity Charitable executed the Minority Stock Purchase Agreement under warranty of good title. That act is sufficient to establish acceptance by Fidelity Charitable. We conclude that acceptance occurred on July 13.
>
> **D. Conclusion**
>
> Petitioners have failed to establish that any of the elements of a valid gift was present on June 11, 2015. Instead, as a matter of state law, we find that petitioners made a valid gift of CSTC shares by effecting delivery on July 13. We thus conclude that petitioners divested themselves of title to the shares on July 13. See *Humacid Co.*, 42 T.C. at 913.

As is described in part II.Q.6.e Assignment of Income on Property Being Sold, the court in this case viewed the donor as holding and controlling the stock until all necessary steps to prepare for the sale had been completed, making signatures at closing a meaningless formality.

This uncertainty regarding gifts is less likely to occur when transferring an interest in a partnership or LLC than when transferring stock. Usually the partnership/operating agreement and applicable state law impose specific requirements regarding the transfer of the economic interest (which may require consent of other owners), admission as a partner/member (which may require consent of other owners), and the donee's acceptance of the terms of the partnership/operating agreement.

II.Q.6.f.ii. Forced Sale to Related Party for Note

CCA 201507018 disallowed a deduction of a partnership interest (referred to as Units) that the charitable organization immediately sold for a note to a related party for a note:

> In the present case, Partner has claimed a deduction under § 170 for a donation of Units to Organization. However, after Transaction, and within a day of Partner's assignment of Units to Organization, Organization does not hold any rights to Units. Organization holds Note. Further, Partner, through Partner's power to approve of Partnership distributions to Corp, controls when in fact interest payments will be made on Note. Had Partner or Corp contributed Note directly to Organization, a deduction under § 170 would not be allowed because payment of the donation would not have been made within the year and, under Rev. Rul. 68-174, Note would have been treated as a promise to make a donation, but not an actual donation….
>
> Under the terms of the Partnership Agreement, Organization is required to surrender its right as an assignee of Units to Partner on Partner's terms. Further, under the Partnership Agreement, Organization had to obtain the approval of Partner to transfer its interest in Units. Partner, in Partner's sole discretion, could approve or disapprove any transfer. Partner, in exercising this discretion, had no fiduciary duty at the time of Transaction to Organization. If Organization attempted to transfer its interest in Units to a third party, Partner had the power to nullify the transfer. Further, the Special Call Price would become active and the call price provision limits the call price to Organization's contributions which are zero. Accordingly, Partner had the power to nullify the donation

> to Organization if Organization attempted to transfer its interest in Units without Partner's approval. Further, Organization could not retain its interest in Units without violating its representations to the Service that it would not hold an interest in a Partnership with nonexempt taxpayers. Partnership could call Organization's interest in Units at any time. Based on the above elements of Transaction, Organization was essentially compelled to engage in Transaction.

A possibly required forced sale for a bargain price also violated the S corporation prohibition on a second class of stock.[4744]

However, when one donates property to charity and buys it back because the donor very much wanted the property and the charity very much needs cash, the sale is not considered

[4744] See text accompanying and preceding fn 288 in part II.A.2.i.ix Warrants Designed to Restore Original Shareholders' Equity Position.

forced.[4745] Even if the charity is required sign a right-of-first-refusal[4746] in connection with the donated stock that pays no dividends,[4747] the donor-controlled corporation's redemption of the donated stock is not concerned forced.[4748]

[4745] *DeWitt v. U.S.*, 204 Ct.Cl. 274 (1974), discussed in fn 4742, was along these lines, following *Sheppard v. United States*, 176 Ct.Cl. 244, 252, 361 F.2d 972, 976 (1965), which upheld a donation, involved the following:

> On June 16, 1959, plaintiff carried out his plan. He wrote letters to the Sisters and to the University offering to each, as a gift absolute, one-third of his right, title, and interest in Star's Pride, which he described as a one-sixth interest in the horse with a current market value of $50,000. He attached no conditions or obligations to these offers. However, on the same day, in the case of the University, and on the following day, in the case of the Sisters, he sent each donee a letter from The Farms, signed by him as president, by which The Farms offered to purchase the interest of each donee for the sum of $50,000. Each letter contained a paragraph advising that, if the offer was found acceptable, the proper officers of the respective donees should execute and return an enclosed form of bill of sale, upon receipt of which The Farms would make immediate payment…. On June 17 each donee accepted The Farms' offer, executed and delivered the bill of sale, and later received payment from The Farms in due course. As the recited facts demonstrate, the record is clear that neither donee acted under any legal obligation, express or implied, to accept The Farms' offer of purchase as a condition to accepting plaintiff's gift. However, neither donee "looked the gift horse in the mouth." They made no independent investigation of the value or earnings potential of Star's Pride, nor did they solicit offers from any other sources. Instead, they relied implicitly on plaintiff's integrity and international reputation for expertise in the field of standardbred horses.
>
> As for plaintiff, he had no real doubt that, despite the absence of any prior commitment by the charities, The Farms would be able to acquire the donated interests for cash. He was aware that, because of their construction programs, they wanted money, not an interest in a breeding stallion. He was also aware that, once the interest was beyond his effective control, there was a possibility that either donee (particularly the University) might shop around for a better offer from other persons interested in standardbred horses. He was willing to assume that risk, however, because he was ready to have The Farms outbid any possible competitor.
>
> On June 17, plaintiff also sold his own remaining one-sixth interest in Star's Pride to The Farms for $50,000 and reported the same on his 1959 income tax return as capital gain. On the same return he claimed a charitable contribution deduction of $50,000 for his gift to the Sisters and a like deduction for his gift to the University. The Commissioner of Internal Revenue disallowed both deductions in their entirety as not being valid gifts.

The court held:

> The proof is clear and convincing that there were no prearrangements or commitments entered into between taxpayer and the two charities, nor did he place any conditions upon, or tie any strings to, his gifts. Legally speaking, the charities were as free to deal with their donated interests as any other owner would be . As a matter of fact, the Mother Superior testified that the Academy would have sold to someone else had the bid price been higher, after Mr. Sheppard had been notified. She testified she relied on his judgment in the matter and felt she owed him, as the donor of the gift, this respect.
>
> Indeed, the defendant does not appear to controvert this, but it points vigorously to the taxpayer's candid testimony to the effect that, in his own mind, he felt confident The Farms' offer to purchase the interests from the charities would be accepted by them. That the reasoning which led him to this unilateral conviction was entirely sound is perhaps best demonstrated by the alacrity with which both charities accepted The Farms' offer.
>
> The fact remains, despite defendant's refusal to face it, that following the gifts there was a period of time, albeit short in duration, when plaintiff had lost control of two-thirds of his interest in Star's Pride. During that period he was exposed to the possibility, however remote he might have

considered it, that The Farms might not succeed in purchasing the donated interests short of increasing the amount of its offers….

The court is not unmindful of the tax benefits which flow from affording full recognition to the plaintiff's admittedly tax-motivated transactions in this case. Such motivation demands special analysis and scrutiny, but its presence is essentially immaterial except as an eye-opening mechanism or interpreter of equivocal conduct. [footnote omitted]

[4746] *Grove v. Commissioner*, 490 F.2d 241 (2nd Cir. 1973), described the right-of-first-refusal:

RPI agreed not to "sell, transfer, give, pledge or hypothecate, or in any way dispose of the whole or any part of the common stock of the Corporation now or hereafter owned ... until [RPI] shall have first offered the Corporation the opportunity to purchase said shares upon the terms and conditions hereinafter provided." The redemption price was established at book value of the shares as noted on the Corporation's most recent certified financial statement prior to the offer. Pursuant to the contract, the Corporation was "entitled (but not obligated) to purchase all or any part of the shares of stock so offered." If the Corporation did not exercise its option to purchase within sixty days, RPI could transfer the shares to any other party and the Corporation's right of first refusal would not subsequently attach to such transferred shares.[3]

[3] Other minority shareholders of the Corporation signed similar agreements, which, in effect put in writing the Corporation's practice of redeeming, when financial conditions permitted, any minority-owner shares offered to it, for example, by a departing employee or a deceased employee's widow.

[4747] *Grove v. Commissioner*, 490 F.2d 241 (2nd Cir. 1973), explained:

The Corporation's business is building airfields, highways, tunnels, canals, and other similar heavy construction projects in both the United States and foreign countries. These projects usually involve the investment of large sums of money over an extended period of time and involve a high degree of risk. Since, in this industry, contract payments normally are made only after specified levels of progress are achieved, a firm must always commit substantial amounts of its own funds, whether borrowed or internally generated, to a project. Moreover, a company can determine an acceptable contract price based only on its best estimate of the cost to complete the project. A bad "guess" or unforeseen contingency may require a firm to complete a project while incurring a loss. Not surprisingly, the mortality rate in this industry is high. To protect against such adverse developments, successful firms seek to maintain liquidity by holding ample cash or other assets easily converted to cash. One method of conserving cash, adopted by the Corporation, is to retain all earnings and refrain from paying dividends.

[4748] Affirming *Grove v. Commissioner*, T.C. Memo. 1972-98, in a 2-to-1 decision the Second Circuit, 490 F.2d 241 (1973), allowed a charitable deduction for a deduction for stock in exchange for a charitable gift annuity, citing *Behrend v. United States*, __ F.2d __ (4th Cir. 1972), holding:

Grove, of course, owned a substantial majority of the Corporation's shares. His vote alone was sufficient to insure redemption of any shares offered by RPI. But such considerations, without more, are insufficient to permit the Commissioner to ride roughshod over the actual understanding found by the Tax Court to exist between the donor and the donee….

Nothing in the December, 1954, minority shareholder agreement between the Corporation and RPI serves as a basis for disturbing the conclusion of the Tax Court. Although the Corporation desired a right of first refusal [on minority shares—understandably so, in order to reduce the possibility of unrelated, outside ownership interests—it assumed no obligation to redeem any shares so offered. In the absence of such an obligation, the Commissioner's contention that Grove's initial donation was only the first step in a prearranged series of transactions is little more than wishful thinking grounded in a shaky foundation. See *Carrington v. Commissioner of Internal Revenue*, *supra*, at __; *Behrend*, *supra*, at __, 73-1 USTC ¶9123 at 80,067; *Sheppard v. United States*, *supra*, at 978; *Robert L. Fox*, 27 TCM 1001, 1013 (1968).

We are not so naive as to believe that tax considerations played no role in Grove's planning. But foresight and planning do not transform a non-taxable event into one that is taxable. Were we to adopt the Commissioner's view, we would be required to recast two actual transactions—a gift by Grove to RPI and a redemption from RPI by the Corporation—into two completely fictional transactions—a redemption from Grove by the Corporation and a gift by Grove to RPI. Based upon the facts as found by the Tax Court, we can discover no basis for elevating the Commissioner's "form" over that employed by the taxpayer in good faith.

II.Q.6.f.iii. Charitable Partial Interest Prohibition

Generally, if a taxpayer contributes less than the taxpayer's entire interest in such property, for individual income tax purposes[4749] a charitable income[4750] tax deduction is allowed only to the extent that the value of the interest contributed would be allowable as a deduction if that interest had been transferred in trust:

- This rule does not apply if the donation is of "the taxpayer's entire interest in the property, such as an income interest or a remainder interest."[4751]

- However, if "the property in which such partial interest exists was divided in order to create such interest and thus avoid" the partial interest prohibition, the deduction is not allowed.[4752] Where the creation of the partial interest was 4 years before the charitable gift and was for reasons unrelated to a future charitable gift, the deduction is allowed.[4753]

[4749] This provision applies for purposes of Code § 170, which is contributions deducted on a personal income tax return (including contributions through an S corporation or a partnership). It does not apply for the fiduciary income tax deduction under Code § 642(c); see part II.J.4.c Charitable Distributions. However, if and to the extent that the trust has unrelated business taxable income, Code § 170 would apply to calculate the percentage limitations of the deduction; I have not formed an opinion on whether the UBTI rules makes the charitable partial interest prohibition not apply for income tax purposes. See part II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction, fns. 4927-4933. See also part II.Q.6.d Unrelated Business Taxable Income.

[4750] Code § 170(f)(3)(A). However, Code § 170(f)(3)(B) excludes from this rule a contribution of a remainder interest in a personal residence or farm, a contribution of an undivided portion of the taxpayer's entire interest in property, and a qualified conservation contribution.

[4751] Reg. § 1.170A-7(a)(2)(i), which further provides:

> Thus, if securities are given to A for life, with the remainder over to B, and B makes a charitable contribution of his remainder interest to an organization described in section 170(c), a deduction is allowed under section 170 for the present value of B's remainder interest in the securities.

[4752] Reg. § 1.170A-7(a)(2)(i), which further provides:

> Thus, for example, assume that a taxpayer desires to contribute to a charitable organization an income interest in property held by him, which is not of a type described in paragraph (b)(2) of this section. If the taxpayer transfers the remainder interest in such property to his son and immediately thereafter contributes the income interest to a charitable organization, no deduction shall be allowed under section 170 for the contribution of the taxpayer's entire interest consisting of the retained income interest. In further illustration, assume that a taxpayer desires to contribute to a charitable organization the reversionary interest in certain stocks and bonds held by him, which is not of a type described in paragraph (b)(2) of this section. If the taxpayer grants a life estate in such property to his son and immediately thereafter contributes the reversionary interest to a charitable organization, no deduction will be allowed under section 170 for the contribution of the taxpayer's entire interest consisting of the reversionary interest.

[4753] In allowing a deduction for gifts made in 1975, Rev. Rul. 76-523 reasoned:

> In the instant case, the 1960 trusts were set up long before the revision of section 170 of the Code by the enactment of the Tax Reform Act of 1969. Thus, the taxpayers' purpose in setting up these trusts could not have been the avoidance of the provisions of section 170(f)(3)(A). Further, in view of all of the above circumstances, the taxpayer's purpose in setting up the 1971 trust was not the avoidance of the provisions of section 170(f)(3)(A), but to provide financial security to an old friend and valued former employee, while insuring their future financial security and protecting their interests in the family corporation from outside incursions. Only when these concerns were no longer relevant, because of the merger of the family corporation, did the taxpayers donate their remainder interests, which were their entire interests, to a charitable organization.

- On the other hand, the partial interest prohibition does not apply to a contribution of a partial interest in property if the contribution constitutes part of a charitable contribution not in trust in which all interests of the taxpayer in the property are given to a charitable organization.[4754]

- Nor does it apply "merely because the interest which passes to, or is vested in, the charity may be defeated by the performance of some act or the happening or some event, if on the date of the gift it appears that the possibility that such act or event will occur is so remote as to be negligible."[4755]

- Also, the prohibition does not apply to an undivided portion of a donor's entire interest in property, which "must consist of a fraction or percentage of each and every substantial interest or right owned by the donor in such property and must extend over the entire term of the donor's interest in such property and in other property into which such property is converted."[4756]

[4754] Reg. § 1.170A-7(a)(2)(ii), which continues:

> Thus, if on March 1, 1971, an income interest in property is given not in trust to a church and the remainder interest in the property is given not in trust to an educational organization described in section 170(b)(1)(A), a deduction is allowed for the value of such property.

[4755] Reg. § 1.170A-7(a)(3), referring to Reg § 1.170A-1(e), which is reproduced in fn. 4743, found in part II.Q.6.f.i Completed Gift Requirement.
[4756] Reg. § 1.170A-7(b)(1)(i).

Although the preceding bullet points describe income tax rules, similar rules apply for gift tax[4757] and estate tax[4758] purposes, except that, where the initial division results in an interest being transferred to a noncharitable person, any later contribution of the donor's entire remaining interest in the property "will not be considered the donor's entire interest in the property" for estate and gift tax purposes.[4759] Donating 20% of the taxpayer's unitrust interest in a charitable remainder trust six years after the trust's formation did not trigger the partial interest prohibition.[4760] Donating all of one's annuity interest in a charitable remainder annuity trust did not violate the prohibition,[4761] nor did donating all of one's unitrust in a charitable remainder unitrust trust.[4762]

Rev. Rul. 76-143 held that the partial interest prohibition denied charitable deductions when the taxpayer donated the cash surrender value and retained the right to the death benefit, even if all

---

[4757] Code § 2522(c)(2), incorporating by reference the Code § 170(f)(3)(B) exclusion in fn. 4750; see Reg. § 25.2522(c)-3(c).

[4758] Code § 2055(e)(2), incorporating by reference the Code § 170(f)(3)(B) exclusion in fn. 4750; see Reg. § 20.2055-2(e)(2). Code § 2055(e)(3) may allow a post-mortem reformation.

[4759] Reg. §§ 25.2522(c)-3(c)(2)(i) and 20.2055-2(e)(2)(i). The former illustrates this rule:

> For example, if the donor gave a life estate in an office building to his wife for her life and retained a reversionary interest in the office building, the gift by the donor of one-half of that reversionary interest to charity while his wife is still alive will not be considered the transfer of a deductible interest; because an interest in the same property has already passed from the donor for private purposes, the reversionary interest will not be considered the donor's entire interest in the property. If, on the other hand, the donor had been given a life estate in Blackacre for the life of his wife and the donor had no other interest in Blackacre on or before the time of gift, the gift by the donor of one-half of that life estate to charity would be considered the transfer of a deductible interest; because the life estate would be considered the donor's entire interest in the property, the gift would be of an undivided portion of such entire interest.

[4760] Letter Ruling 9550026 involved a joint-and-survivor net-income charitable remainder unitrust. The transaction involved the following steps:

(a) Taxpayer A will execute a disclaimer that is substantially similar to the one submitted with your ruling request. This disclaimer provides that Taxpayer A disclaims his contingent right to receive Taxpayer B's unitrust interest after Taxpayer B's death. Taxpayer B will execute a disclaimer that is substantially similar to the one submitted with your ruling request. This disclaimer provides that Taxpayer B disclaims her contingent right to receive Taxpayer A's unitrust interest after Taxpayer A's death.

(b) Taxpayers will make a gift of a twenty percent undivided interest in the Unitrust Payment to University, by execution and delivery of an irrevocable assignment valid under State A law.

(c) The income interest in Trust which University receives in this gift will merge with its remainder interest in Trust, leaving University with a twenty percent undivided interest in the entire trust and an eighty percent undivided interest in the remainder of the trust.

(d) Taxpayers and University will consent to the partial termination of Trust in their respective capacities as grantors and beneficiaries so that all of the grantors and beneficiaries will have consented to termination of twenty percent of the trust.

(e) The trustee of Trust will distribute to University twenty percent of the trust assets. The distributed assets will be fairly representative of the relative bases of the various assets in the trust. The trustee will continue to hold the balance of the Trust assets in accordance with the terms of the trust.

The ruling concluded:

(1) Taxpayers will be entitled to an income tax deduction under section 170 of the Code for the value of the undivided interest in the Unitrust Payment transferred to University.

(2) Taxpayers will be entitled to a gift tax deduction under section 2522 of the Code for the value of the undivided interest in the Unitrust Payment transferred to University.

of the rights were fixed (including making the beneficiary designation irrevocable). The denial applied whether the cash value was fully paid[4763] or was for cash value build-up due to the current year's premium.[4764] Now, Code § 170(f)(10) also prohibits various split-dollar and similar arrangements from qualifying for the charitable deduction.

---

(3) The value of Taxpayers' gift under sections 170 and 2522 of the Code will be the present value of the right to receive annual payments equal to nine percent of the value of twenty percent of the Trust assets determined annually for a term starting on the date of the transfer of the gift to University and ending on the date of death of the survivor of Taxpayers.

(4) The gift of the undivided part interest in Trust will not cause the trust to cease to be a trust described in 664(d)(2) of the Code.

(5) To the extent that in prior years, Trust had capital gain income, and that income was not realized or included in the income of Taxpayers, such capital gain shall not be included in the income of, or realized by, Taxpayers solely because of the transfer of the undivided interest in the Unitrust Payment to University.

[4761] Rev. Rul. 86-60 involved the following facts:

> *Situation 1*. In 1980, A created a charitable remainder annuity trust (hereinafter, CRAT) described in section 664(d)(1) of the Code. A retained the annuity interest in the trust for life. The remainder beneficiary was X, a charitable organization described in sections 170(c) and 2522(a). In 1984 A transferred the annuity interest in the trust to X.
>
> *Situation 2*. In 1980, A created a CRAT described in section 664(d)(1) of the Code. The trust instrument provides that the trustee shall pay the annuity amount annually to A for life and upon A's death to B, the successive life interest beneficiary, for such time as B survives. Upon the death of the survivor of A and B, the corpus is to be distributed to X, a charitable organization that meets the requirements of sections 170(c) and 2522(a). In 1984, A and B assigned their interests in the trust to the charitable remainder beneficiary.
>
> No property interests were created for the purpose of avoiding the rules of section 170(f)(2) and (f)(3)(A).

The ruling held:

> In *Situation 1*, the gift by A, the grantor, to the remainder beneficiary of A's retained life annuity interest in a charitable remainder annuity trust qualifies for an income tax charitable deduction under section 170 of the Code and a gift tax charitable deduction under section 2522.
>
> In *Situation 2*, where A has created a charitable remainder annuity trust with life annuity interest to A and survivor life annuity interest to B, the gifts by A and B of their life annuity interests in the trust to the charitable remainder beneficiary qualify for an income tax charitable deduction and a gift tax charitable deduction. A's gift of the life annuity, however, qualified for the gift tax charitable deduction only because the interest that was transferred was in one of the forms set out in section 25.2522(c)-3(c)(2) of the regulations.

[4762] Letter Ruling 9721014, citing Rev. Rul. 86-60. However, "X and Y represent that when Trust was created in 1986, there was no intention to divide the income and remainder interests in order to avoid the partial interest rules in section 170(f)." With a representation like that, I don't understand what the ruling accomplished.

[4763] The ruling reasoned:

> In *Situation 1*, the gift made by the taxpayer of the right to the cash surrender value of the policy was a gift of less than an entire interest in the property. Furthermore, a gift of this kind is not a gift of a fraction or percentage of each and every substantial interest owned by the donor in such property since the taxpayer retained the right to designate the beneficiary. Even if the taxpayer irrevocably designated the beneficiary prior to making the gift in order to create a remainder interest that would then constitute the taxpayer's entire interest in the property, such division would be regarded as having been made to avoid section 170(f)(3)(A) of the Code and the deduction would not be allowed.

[4764] The ruling reasoned:

Before we delve further into what violates the partial interest prohibition, let's consider the consequences other than denying the charitable deduction. *Keefer v. U.S.*, 130 A.F.T.R.2d 2022-5002 (N.D. TX 7/6/2022), reasoned:

> "The assignment of income doctrine holds that one who earns income cannot escape tax upon the income by assigning it to another." *Caruth Corp. v. United States*, 865 F.2d 644, 648 (5th Cir. 1989). Instead, "if one, entitled to receive [income] at a future date...makes a grant of it by anticipatory assignment, he realizes taxable income as if he had collected [it]...and then paid it over." *Id*. (quoting *Comm'r v. P.G. lake, Inc.*, 356 U.S. 260, 267 (1958)). "Ultimately, the question is whether the taxpayer himself ever earned income, or whether it was earned instead by the assignee," or, in the terms of Justice Holmes's famous metaphor for this doctrine (set out in *Lucas v. Earl*, 281 U.S. 111, 115 (1930)), "whether the fruit has been attributed to a different tree, or whether instead the entire tree has been transplanted." *Id*. at 649.
>
> Applied to a taxpayer's gift of "earnings derived from an income-producing asset, the crucial question is whether the asset itself, or merely the income from it, has been transferred." *Id*. at 648. "If the taxpayer gives away the entire asset, with accrued earnings, the assignment of income doctrine does not apply." *Id*. at 648-49 (first citing *Blair v. Comm'r*, 300 U.S. 5, 14 (1937); and then citing *United States v. Ga. R.R. & Banking Co.*, 348 F.2d 278, 285 (5th Cir. 1965)). But, it does apply "[i]f the taxpayer carves income or a partial interest out of the [granted] asset, and retains something for himself." *Id*. at 649 (quoting *P & G Lake*, 356 U.S. at 265 & n. 5).
>
> "Per *Humacid Co. v. Commissioner*, 42 T.C. 894, 913 (1964), [courts will] respect the form of [a donation of appreciated stock shares] if the donor (1) gives the property away absolutely and parts with title thereto (2) before the property gives rise to income by way of a sale." *Dickinson v. Comm'r*, 2020 WL 5249242, at *3 (T.C. Sept. 3, 2020) (first citing *Grove v. Comm'r*, 490 F.2d 241, 246 (2d Cir. 1973); then citing *Carrington v. Comm'r*, 476 F.2d 704, 708 (5th Cir. 1973); then citing *Behrend v. United States*, 1972 WL 2627, at *3 (4th Cir. 1972); and then citing *Rauenhorst v. Comm'r*, 119 T.C. 157, 162–163 (2002)).

Keefer v. U.S., 130 A.F.T.R.2d 2022-5002 (N.D. TX 7/6/2022),[4765] held:

> Based on this evidence, the Court finds that no genuine issue of material fact exists as to whether the Keefers carved out a portion of the 4% partnership interest before donating it to Pi. They did. After the assignment, Pi did not have the right that other partners had to share in a distribution of Available Cash Flow as described in the Partnership Agreement, but only had a right to share in the net proceeds of the Hotel sale. See *id*. at 35; Doc. 69-1, Appraisal, 209 (noting that "the Foundation would only share in the proceeds from Seller's Closing Statement; the Foundation would not receive its *pro rata* share in other net assets of the Partnership"). Or, in the unlikely event the Hotel sale had not been completed as planned, Pi would not have shared equally with the other limited partners in the duty to contribute funds for renovation, should additional

---

> In *Situation 2*, the gift made by the taxpayer of the right to the cash surrender value of a nonpaid-up life insurance policy was also a gift of less than the taxpayer's entire interest in the property. Since the taxpayer retains the right to designate the beneficiary, and the right to surrender the policy and defeat the college's interest, the gift is not a gift of a fraction or percentage of each and every substantial interest in the property.

[4765] Motion for reconsideration denied, 130 A.F.T.R.2d 2022-5406 (N.D. TX 8/10/2022).

> funds be required to fulfill the partnership's obligations under the loan or franchise agreements. See Doc. 69-1, Keefer Dep., 34 (noting that the pre-assignment reserves were needed because "the Pi Foundation could not obviously contribute capital for the renovation"). Reflecting this carve out, the Appraisal calculated a lower value for the donated interest than for a full 4% interest in all of the partnership's assets. Doc. 69-9, Appraisal, 594 ("All assets not included in the $54 million [sale price] have been excluded."); *id*. at 595 (calculating 4% of net sale proceeds without reserves). Accordingly, the Keefers did not donate their full 4% partnership interest on June 18, 2015, but donated only a portion thereof. They did not transplant the *whole* tree.
>
> The anticipatory assignment of income doctrine therefore applies to this transaction.

If a donor transfers voting stock but retains the voting rights, Rev. Rul. 81-282 asserted that retaining the voting rights violated the partial interest prohibition.[4766] However, when a donor kept voting and donated nonvoting restricted[4767] stock, the donation did not constitute a partial interest;[4768] this reasoning also applied to an estate.[4769] Furthermore, when the donated voting

---

[4766] The ruling reasoned:

> The right to vote stock is inherent in the ownership of common stock and, as such, is a property right. This right gives the holder a voice in the management of the corporation and is crucial in protecting the stockholder's financial interest. Therefore, the right to vote the stock of X is a substantial right in that stock. See *Brown v. McLanahan*, 148 F.2d 703 (4th Cir. 1945); and *DuVall v. Moore*, 276 F.Supp. 674 (N.D. Iowa 1967).
>
> While A's retention of the right to vote the stock will not defeat Y's right to dividends or the right to dispose of the stock, and, while the right retained by the donor will not defeat the donee's interest in the transferred property, nevertheless, A has not transferred all substantial rights in the stock to Y. Therefore, A has transferred a partial interest in property to Y within the meaning of section 170(f)(3) of the Code. See Rev. Rul. 76-143.

[4767] Comparing Class A voting to Class B nonvoting:

> The rights of the Class A shares are freely transferable. In contrast, the Class B shares are not transferable except: (1) to the Corporation; (2) in connection with an acquisition of the Corporation; (3) in the case of natural persons, upon death or pursuant to a valid and binding court order mandating transfer; or (4) with the consent of the Corporation's Board of Directors.

[4768] Letter Ruling 201129033, holding:

> In the present case, Donor and Donor's Spouse propose to transfer Class B common stock to Charity. The Class B common stock is a separate property interest apart from the other class of stock in Corporation. Under the facts as presented, the shares of one class of stock do not constitute an interest in the shares of any other class of stock. Therefore, we conclude that for gift tax purposes the plan described above will not result in interests in the same property passing for both charitable and noncharitable purposes within the meaning of § 2522(c)(2).

[4769] Letter Ruling 9022010 reasoned:

> In the present case, [four separate charities] will receive, in effect, under the terms of the will and the Trust, the residue of A's estate, which may include a portion of the Class A nonvoting shares of V. The outright distribution of the Class A nonvoting shares to [the charities] while the Class B voting shares are held in trust for the benefit of individuals will not be a distribution of property for both charitable and noncharitable purposes under section 2055(e)(2) of the Code.
>
> Each class of stock represents a separate property interest. Further, considering that the dividend rights and liquidation preferences of the respective classes are identical and considering the currently issued and outstanding shares in the various classes, each distributee of the respective classes of stock will receive all the property rights and economic benefits inherent in the equity interests represented by those shares. Under the facts as presented, the shares of one class of stock do not constitute an interest in the shares of any other class of stock.

stock was subject to a voting agreement created eight years previously for business purposes, the lack of voting rights did not make the gift a nondeductible partial interest.[4770] However, when the terms of the bequest required the executor to retain the stock and pay the dividends to an individual during the period of administration and to distribute the stock to the charity after administration is completed, Rev. Rul. 83-45 asserts that the dividend payment violates the partial interest rule. On the other hand, when a charity separated a debt obligation it issued into principal and income receipts that were legally separate rights, the partial interest prohibition did not apply when holders donated those rights.[4771]

Rev. Rul. 75-373 allowed a charitable contribution deduction in the manner and to the extent provided by Code § 170 for the value of the restricted easement granted in the following situation:

> An individual conveyed an easement in a tract of 50 acres of vacant, beachfront property to the county in which the property was located to be used solely as a public bathing beach and recreational area operated and maintained by the county. The land is located in a rapidly expanding urban area. The county is a political subdivision of state X.
>
> The deed from the taxpayer to the county granted the easement in gross in perpetuity but reserved to the taxpayer certain rights, including the right of access to and from the open water by boat from the remainder of the land owned by the grantor or his heirs, the right to have an open and usable channel connecting the open sea with the lands retained by the grantor, and the retention of all mineral rights in the land underlying the easement. Any prospective drilling and/or mining is to be done by slant from adjacent property so that the surface of the land will not be disturbed. The donor is responsible for all taxes, levies, and assessments of any kind to which the conveyed property is or

---

> Therefore, we conclude that the estate plan described above will not result in interests in the same property passing for both charitable and noncharitable purposes, within the meaning of section 2055(e)(2) of the Code.

[4770] Letter Rulings 200108012, 200108013 and 200108014 included the following facts and holding:

> In 1992, Taxpayer and other Company shareholders entered into a voting agreement. The purpose of the voting agreement was to facilitate any future negotiations to sell Company. Pursuant to the voting agreement, Taxpayer transferred to Individual her voting rights with respect to corporate events affecting change of ownership or control of Company. The voting agreement required Taxpayer to agree to vote as directed by Individual. Recently, the voting agreement was amended to provide that the votes would be directed by a person who is not Individual and is not related to Taxpayer….
>
> When Taxpayer contributes her shares in Company stock to Foundation, she will not contribute all interests in the shares. Certain voting rights have already been transferred to a third party. The voting rights are substantial rights. See Rev. Rul. 81-282. However, because those rights had been transferred eight years ago for a business purpose, the interests were not divided in order to avoid section 170(f)(3)(A). Thus, section 1.170A-7(a)(2)(i) of the Regulations does not cause disallowance of the charitable contribution deduction in this case.

[4771] Letter Ruling 8939014 described the approved rights as follows:

> Each debenture receipt represents, in form, the right to receive specific future interest or principal payments on the debenture. Accordingly, the debenture receipts will be denominated as coupon receipts and principal receipts. Each coupon receipt will represent the right to receive a single payment at the date of a specific interest payment on the debenture. Each principal receipt will represent the right to receive a specific payment of principal on the debenture. No payments, however, will be made on any debenture receipt prior to the date on which the specific payment of interest or principal, respectively, is made on the debenture.

> shall be subject, but the assessment will be reduced to reflect the value of the easement conveyed....
>
> Under the law of state X, an easement in gross in perpetuity is a valuable property right or interest in favor of the party for whose benefit the easement is created and is enforceable by that party.
>
> In the instant case, the easement in gross in perpetuity is an open space easement within the meaning of section 1.170A-7(b)(1)(ii) of the regulations.

Rev. Rul. 76-253 disallowed a deduction for the contribution of land when the taxpayer retained timber-cutting rights. *Sells v. Commissioner*, T.C. Memo. 2021-12, also denied a deduction for donating timber:

> Although we find that the donation of Burning Bush's timber is at issue, we agree with the members that the Commissioner's analysis of it is quite confusing. He argues in his posttrial briefs that the timber donation violates section 170(h) - the subsection that addresses contributions of qualified conservation easements. He specifically argues that the timber donation doesn't have a conservation purpose since the clearcutting of land can't possibly be for a conservation purpose.
>
> As we search through the record, we find next to no other mention of the timber donation from either party. The only evidence that we have (besides the disallowance of the timber donations in the notices of deficiency) is the initial claiming of the deduction by the partners on their tax returns. Those returns each have two separate Forms 8283 attached - one for the donation of the conservation easement and one for the donation of "Timber". And attached to each form were separate appraisals - one of the value of the conservation easement and one of the value of the timber. The appraisal of the timber donation describes the value of eight timber products that were "growing on [the] property" but makes no mention of a conservation easement. When we look at the entire record, we find it more likely than not that the timber donation was not a donation of a conservation easement but rather just a separate noncash donation. Section 170(h) and its regulations that govern the donation of conservation easements just don't apply.
>
> But that doesn't mean the partners are out of the woods just yet. According to the appraisal, Burning Bush acquired the land on which it placed the easement on the very same date that it reported it had acquired the timber - August 6, 2002. And Burning Bush contributed both the easement and the timber to the same donee, COLT. Because of this, we find it more likely than not that the timber donated by Burning Bush is the same standing timber on which it had placed a conservation easement.
>
> That is a problem. The value that Burning Bush placed on the standing timber is its value as timber products. One can see this on the Form 8283 - which describes the donation of "Pulp, Chip N Saw, Saw Timber" - products that result from timber's harvest. And the attached appraisal - which described eight products - would require the timber's harvest.
>
> The problem here is that Alabama law[15] makes timber that hasn't been severed from the land the property of the land owner, and as a general rule not even a life tenant has the right to cut and sell it. See *White v. Watts*, 812 So.2d 328, 331 (Ala. 2001); *Wilder v. Scott*, 89 So.2d 682, 685 (Ala. 1956). There are exceptions to this general rule - if the property was a tree farm, *White*, 812 So.2d at 331; *Robinson v. Robinson*,

> 215 So.2d 585, 590-91 (Ala. 1967), or the timber cutting was an incident to clearing land for cultivation, *Westmoreland v. Birmingham Tr. & Sav. Bank*, 108 So. 536, 538 (Ala. 1926) - but none of these could conceivably apply here.
>
> > [15] State law defines property interests. See, *e.g.*, *Case v. United States*, 633 F.2d 1240, 1246 (6th Cir. 1980); *Oakbrook*, T.C. Memo. At *34.
>
> The cutting of timber and its conversion into lumber and other wood products is not a conservation purpose. See sec. 170(h)(4)(A); sec. 1.170A-14(e), Income Tax Regs. The deed forbids it.[16] That makes Burning Bush's donation of the timber either a nondeductible gift of a partial interest in real estate other than a conservation easement, or a future interest in tangible personal property. If it's the first, the Code says it's never deductible, see sec. 170(f)(3)(A); if it's the second, section 170(a)(3) says that it's not deductible until the timber is severed from the real property. Either way, the members of Burning Bush don't get deductions for donating standing timber to COLT for their 2003 tax year.
>
> > [16] That makes these cases different from *Butler Land Holdings, LLC v. Commissioner*, T.C. Memo. 2012-72, 2012 WL 913695, at *42-*43, because there the deed explicitly allowed the harvesting of timber as part of an approved plan.

Rev. Rul. 76-331 applied the partial interest rule to disallow the following contributions:

> *Situation 1*. A corporation transferred a tract of land to an organization described in section 170(c)(2) of the Code. However, it retained all mineral rights with respect to the property, including the sole right to exploit and sell any minerals obtained from the property.
>
> *Situation 2*. An individual, aged 50 and in good health, owned timberland that the individual leased to a corporation in 1975 for a term of 60 years. In 1976, the individual transferred this land to an organization described in section 170(c)(2) of the Code, subject to the individual's receiving, during the individual's lifetime, all the payments due under the lease. Upon the individual's death, all rights under the lease will pass to the charitable organization.

However, if the retained mineral interest cannot ever interfere with the charity's interest, the retained interest might be too insubstantial to invoke the partial interest disallowance.[4772] Donating land to the U.S. did not trigger the prohibition when the donor reserved the right to train a hunting dog and maintain paths for that purpose.[4773] Also, a donation of undivided

[4772] *Stark v. Commissioner*, 86 T.C. 243 (1986).

[4773] Rev. Rul. 75-66 involved the following facts and holding:

> An individual donated his entire interest in 800 acres of land to the United States and retained the right during his lifetime to train his personal hunting dog, and any other hunting dog he may subsequently own, on trails extending over the entire tract, including the right to maintain paths and lanes relating to the reserved use. The individual was informed by the United States Department of the Interior that the reservation would not interfere with the Government's use and enjoyment of the donated property. The trails for training the dog are used in accordance with the Department of the Interior's regulations on such use.
>
> the instant case, the retained right during the taxpayer's lifetime to train his personal hunting dog on the entire tract, in accordance with the regulations of the Department of the Interior on such use, is not substantial enough to affect the deductibility of the property contributed.

interests in real estate subject to leases was not subject to the partial interest disallowance when it conveyed all of the donor's rights and duties and substantial interests with respect to the leases and the undivided interests in the property.[4774] (Additional rulings regarding easements need to be reviewed.) But taxpayers who granted a fire department the right to conduct training exercises on their property and destroy a building thereon during the exercises were held not to donate any ownership interest in property to the fire department, and the partial interest rule prohibit deducting the value of the use of the property. *Patel v. Commissioner*, 138 T.C. 395 (2012), the official syllabus mentioning the following:

> At the end of May 2006, Ps purchased property in Vienna, Virginia (Vienna property), with the intention to demolish the house situated thereon (house) and construct a new one on the site. Their realtor told them about the Fairfax County Fire and Rescue Department (FCFRD) Acquired Structures Program, where a property owner allows FCFRD to conduct live fire training exercises on his or her property. As part of the exercises, FCFRD destroys, by burning, the designated building on the owner's property. Within a few weeks of purchasing the Vienna property, Ps contacted FCFRD and obtained information about the requirements for participating in the program. After Ps obtained a demolition permit and completed all of the other requirements, they executed documents granting FCFRD the right to conduct training exercises on the Vienna property and to destroy the house by burning during the exercises. During October 2006, FCFRD, along with six other fire departments, used the Vienna property to conduct live fire training exercises, during which the house was destroyed.

Mann v. U.S., 984 F.3d 317 (4th Cir. 2021), disallowed a deduction where the charity selected parts of a house it was given to demolish and the taxpayer later disposed of parts that the charity did not take. The appraisal valued everything that the charity could have taken, rather than what the charity actually did take. But the appraisal being flawed was only part of the story. The court reasoned:

> Thus, in the end, some components of the Manns' house were salvaged by Second Chance for resale; some components were destroyed as part of the deconstruction process; and the remaining components were left by Second Chance for demolition and removal by the Manns' contractor. In these circumstances, Linda's entire interest in the house was not donated to Second Chance, and the value of the house was therefore not deductible under 26 U.S.C. §§ 170(f)(3).
>
> While the Manns read the donation agreement more narrowly, focusing only on the conveyance language of all of her "right, title and interest" in the house, nonetheless when matters of taxation are involved, "substance rather than form prevails." *W. Va. N. R.R. Co. v. Comm'r*, 282 F.2d 63, 65 (4th Cir. 1960). Thus, "the taxability of a transaction is determined by its true nature rather than by the name which the parties may use in describing it." *Id*.; see also *Comm'r v. Ct. Holding Co.*, 324 U.S. 331, 334 (1945) ("To permit the true nature of the transaction to be disguised by mere formalisms, which exist solely to alter tax liabilities, would seriously impair the effective administration of the tax policies of Congress"); *BB&T Corp. v. United States*, 523 F.3d 461, 471, 474 (4th Cir. 2008) (noting that "the doctrine of 'substance over form' recognizes that the substance of a transaction, rather than its form, governs for tax purposes" and that the doctrine thus "serves to prevent taxpayers from manipulating the tax code"). Moreover, "the transaction must be viewed as a whole." *Ct. Holding Co.*,

[4774] Letter Ruling 8639019.

> 324 U.S. at 334.; *cf*. *Volvo Cars of N. Am. v. United States*, 571 F.3d 373, 379 (4th Cir. 2009) (recognizing that "in applying federal law to determine the tax consequences of a transaction defined by state law, we look to the intention of the parties as evidenced by the written agreements read in light of the attendant facts and circumstances" (cleaned up)).
>
> Focusing on substance over form, Linda donated some components of the house for salvage, which were in fact removed from the house and taken by Second Chance for resale. And some of the house's components were destroyed onsite, either for work-force training or as necessary to remove salvageable components. But, Linda maintained the benefits and burdens of ownership of the remaining components which she ultimately paid her contractor to demolish. Thus, she did not donate, as personal property, her entire interest in the house to Second Chance, making the Manns' attempt to claim the value of the entire house as a charitable deduction improper.

If the owner of the working interest under an oil and gas lease[4775] gives an overriding royalty interest[4776] or a net profits interest[4777] to a charitable organization, Rev. Rul. 88-37 asserts that the partial interest rule bars the deduction. The ruling viewed the right to control or to participate

---

[4775] The ruling describes a working interest:

> A working interest is the operating interest under an oil and gas lease. It is typically created by a transaction in which the owner of a tract of land, or the owner of the mineral rights to a tract of land, grants the right to exploit the oil and gas under the land, while at the same time retaining a royalty interest in production. Alternatively, the owner of a tract of land, or the owner of mineral rights to a tract of land, may, as in the instant case, retain the working interest and grant a royalty interest to another person. The owner of the working interest has the exclusive right to exploit the oil and gas resources. For federal tax purposes, a working interest is defined as an interest in oil and gas in place that is burdened with the cost of development and operation of the property. *Brooks v. Commissioner*, 424 F.2d 116 (5th Cir. 1970).

After defining an overriding royalty interest (see fn. 4776) and a net profits interest (see fn. 4777), the ruling comments:

> The right to exploit the oil and gas resources under the land is a right inherent in the ownership of a working interest. Even an owner of only a percentage of the working interest has the right to participate in decisions on the exploitation of the oil and gas resources. The owner of an overriding royalty interest or a net profits interest does not have this right.

[4776] The ruling describes an overriding royalty interest:

> An overriding royalty interest is an economic interest in oil and gas in place, created from the working interest. An overriding royalty entitles its owner to a specified fraction of gross production, free of operating and developing costs. The term of an overriding royalty interest is coextensive with the term of the working interest from which it was created. The transfer of an overriding royalty is an assignment of a property interest and is not an anticipatory assignment of income. See Rev. Rul. 67-118, 1967-1 C.B. 163.

[4777] The ruling describes a net profits interest:

> A net profits interest is, for federal tax purposes, an interest in oil and gas in place that is defined as a share of gross production measured by net profits from operation of the property. It is created out of the working interest and has the same duration. Unlike the income accruing to an overriding royalty, the income accruing to the net profits interest is reduced by specified operating and development costs, but the interest bears these expenses only to the extent of its share of the income. Unlike the working interest, the net profits interest is not required to pay out, advance, or become liable for such costs. *Burns v. Commissioner*, 78 T.C. 185, 209 (1982). Like a transfer of an overriding royalty, the transfer of such a net profits interest conveys, for federal tax purposes, a depletable property interest in oil and gas in place. See *Kirby Petroleum Co. v. Commissioner*, 326 U.S. 599 (1946), 1946-1 C.B. 69; *Burton-Sutton Oil Co., Inc. v. Commissioner*, 328 U.S. 25 (1946), 1946-1 C.B. 237.

in control, which a working interest has but which neither an overriding royalty interest nor a net profits interest has, as a substantial right, the retention of which prevents the donated interest from being considered an undivided interest in the donor's property rights.[4778]

On the other hand, separate bequests of preferred stock and common stock did not trigger the partial interest prohibition.[4779]

Rev. Rul. 2003-28 asserted that the partial interest prohibition applies to patents:

(1) A taxpayer's contribution to a qualified charity of a license to use a patent is not deductible under § 170(a) if the taxpayer retains any substantial right in the patent.[4780]

(2) A taxpayer's contribution to a qualified charity of a patent subject to a conditional reversion is not deductible under § 170(a), unless the likelihood of the reversion is so remote as to be negligible.

[4778] The IRS reasoned:

> … the donor did not contribute the donor's entire interest in the property but carved out and contributed only a portion of that interest. Further, the portion contributed was not an undivided portion of the donor's interest because it did not convey a fraction of each and every substantial interest or right owned by the donor in the property. By transferring an overriding royalty interest or a net profits interest, the donor has retained the right inherent in the ownership of a working interest to control, or, in the case of ownership of a part of the working interest, to participate in the control of, the development and operation of the lease. This right to control or to participate in control, similar to the retained voting rights in Rev. Rul. 81-282, is a substantial right, the retention of which prevents the donated interest from being considered an undivided portion.
>
> After the transfer, … the contributed interest is a separate property interest for federal tax purposes. However, if the charitable interest is created by dividing a greater interest held by the donor, the application of section 170(f)(3) to deny the charitable contribution deduction is not precluded merely because the contributed interest is a separate property in the hands of the donee and the incidence of taxation on income from the contributed interest is shifted from the donor to the donee. Rev. Rul. 70-477, 1970-2 C.B. 62, for example, holds that for years after the effective date of section 170(f)(3), a contribution of rent-free use of property, even if recognized as a conveyance of property under local law, does not give rise to a deduction under section 170.
>
> In both Situation 1 and Situation 2, therefore, the contributed interest is less than the taxpayer's entire interest within the meaning of section 170(f)(3) of the Code, and is not an undivided portion of the taxpayer's entire interest. In each case, the partial interest was not transferred in trust and was not in a form that would have resulted in an allowable deduction under section 170(f)(2) had it been transferred in trust.

[4779] Letter Ruling 8950071.

[4780] The ruling reasoned:

> In *Situation 1*, X contributes a license to use a patent, but retains a substantial right, i.e., the right to license the patent to others. The license granted to University is similar to the rent-free lease described in § 1.170A-7(a)(1) and the partial interest in motion picture films described in § 1.170A-7(b)(1)(i), in that it constitutes neither X's entire interest in the patent, nor a fraction or percentage of each and every substantial interest or right that X owns in the patent. As a result, the contribution in Situation 1 constitutes a transfer of a partial interest, and no deduction under § 170(a) is allowable. The result would be the same if X had retained any other substantial right in the patent. For example, no deduction would be allowable if X had contributed the patent (or license to use the patent) solely for use in a particular geographic area while retaining the right to use the patent (or license) in other geographic areas.

(3) A taxpayer's contribution to a qualified charity of a patent subject to a license or transfer restriction is deductible under § 170(a), assuming all other applicable requirements of § 170 are satisfied, and subject to the percentage limitations of § 170, but the restriction reduces what would otherwise be the fair market value of the patent at the time of the contribution, and therefore reduces the amount of the charitable contribution for § 170 purposes.[4781]

Generally, all the rights to a partnership are considered a single property interest.[4782] It would not appear to be susceptible to being split up as separate assets the way that corporate stock would be. Thus, a donor should transfer a vertical slice of all of the donor's interest in the partnership. Suppose one wants to control a donated business interest or other property that requires special handling. One might target one's donation, divide it by 49%, and put that among into an LLC in which a majority vote of the members can direct the manager to sell the LLC's assets:

- For example, one owns a 20% partnership interest and wants to give away 5%. Transfer a 10.2% partnership interest (5% divided by 49%) into the LLC and then donate a 49% interest in the LLC to the charity. To encourage the charity – especially a donor-advised fund or supporting organization – to use any distributions from the LLC,[4783] one might also consider obligating the non-charitable member of the LLC to pay any expenses (such as from a seller's representations and warranties) either through its share of sale proceeds or by paying the expenses directly. Also, to minimize valuation discounts, require that all cash the LLC receives must be distributed, except for a very small amount required to pay expenses that are expected to occur in the near future; no reserve would be made for the expenses described in the preceding sentence, because the donor would be obligated to fund those as they arise. If the sale is imminent, the appraiser might very well apply a relatively small valuation discount.

- Suppose assets the donor wants to sell would be awkward to be held by a private foundation or would receive a reduced deduction if contributed to the private foundation, but the donor needs to control their sale. The donor could instead use the above LLC mechanism to donate to a donor-advised fund (DAF), and the private foundation could be the adviser if the DAF's procedures so permit. The DAF could not accept the asset to be sold with restrictions on control over the sale of the underlying asset, and the DAF might not

[4781] The ruling reasoned:

> In *Situation 3*, Z transfers to University all of Z's interests in the patent with the restriction that University cannot transfer or license the patent for a period of 3 years after the transfer. Unlike the conditional reversion in Situation 2, the restriction on transfer or license is not a condition that can defeat the transfer. Thus, Z's contribution is deductible under § 170(a), assuming all other applicable requirements of § 170 are satisfied, and subject to the percentage limitations of § 170. See Publication 526, Charitable Contributions (describing other requirements for, and limitations on, the deductibility of charitable contributions). Under § 1.170A-1(c), however, the restriction reduces what would otherwise be the fair market value of the patent, and therefore reduces the amount of Z's charitable contribution. If Z had received a benefit in exchange for the contribution, the value of the benefit would further reduce the amount of Z's charitable contribution. See § 1.170A-1(h); Rev. Rul. 67-246, 1967-2 C.B. 104. See also *Singer Co. v. United States*, 449 F.2d 413, 423-424 (Ct. Cl. 1971).

[4782] See part II.Q.8.e.ii.(a) Unitary Basis, citing Rev. Rul. 84-53.

[4783] See part II.Q.6.d.iii Charitable Deduction Against UBTI, pointing out that a donor-advised fund or supporting organization may generate a deduction against unrelated business income (UBI) by making distributions to a charity in the same calendar year that the entity receives the UBI.

> want the responsibility for deciding when to sell and what the sales terms should be.[4784] Meanwhile, the donor would get the full deduction, subject to any reduction due to the LLC's control mechanism.

Donating an assignee interest and retaining the voting rights might be comparable to Rev. Rul. 81-282[4785] and violate the split-interest prohibition. However, when taxpayers donated all of their interest, which was an interest as a limited partner, but the donees received only an interest as an assignee, the Tax Court[4786] and Fifth Circuit in *McCord* allowed a charitable gift tax deduction for an interest as an assignee.[4787] On the other hand, Judge Swift's concurring opinion in the Tax Court argued that the partial interest prohibition applied to assignee interests. Judge Swift pointed out that the donor transferred the economic rights but not the voting and other noneconomic rights[4788] to charity. The majority and Fifth Circuit did not address the issue, being content with the donor having transferred all of the donor's rights.[4789] Both arguments are correct, but neither pointed out what happened to the donor's voting rights. When a partner transfers all of the partner's interest in a partnership and the transferee is not admitted as a partner, the transferor's voting rights lapse. This lapse then gives others who have the right to vote on those matters a higher proportionate vote. Judge Swift, although pointing out that that the charity did not receive noneconomic rights, did not articulate that the donor's voting rights essentially shifted to the other limited partners. Neither the majority nor the Fifth Circuit addressed this shift; their written opinions did not indicate whether they understood that the shift occurred. Thus, one can point to *McCord* as support for the proposition that one does not need to transfer one's noneconomic rights to a charity to avoid the partial interest prohibition, if one does not retain any noneconomic rights, but the strength of this support is unclear, given the lack of analysis of what happened to the voting rights. To avoid any doubt, one might suggest transferring voting rights as well. On the other hand, in self-dealing letter rulings, the IRS did

---

4784 See Fox, "Recent Court Decision in Donor Advised Fund Lawsuit Against Fidelity Investments Charitable Gift Fund Provides Lessons for Sponsors and Donors Alike," *Estate Planning Journal* (6/2021). This case involved a December 2017 donation to Fidelity's DAF, which the donors alleged had promised to give the donors input into the sale of stock that had blockage discount issues. The court held that the donors did not prove their case against Fidelity's DAF. My full sympathy is with Fidelity's DAF. In December 2016, at Fidelity's DAF's recommendation, I used the LLC mechanism described in the text above to help donors control the sale of their interests in a private company and received great service from Fidelity's DAF.

4785 See fn. 4766.

4786 *McCord v. Commissioner*, 120 T.C. 358 (2003) (reviewed opinion).

4787 *Succession of McCord, Jr. v. Commissioner*, 461 F.3d 614 (5th Cir. 2006), allowing the deduction without even mentioning the partial interest rule.

4788 The majority described certain rights:

> Limited partners generally do not participate in the management of the partnership's affairs. However, limited partners do have veto power with respect to certain major decisions, most notably relating to voluntary bankruptcy filings. In addition, if any two of the children are not serving as managing partners, class B limited partners have voting rights with respect to certain large dollar managerial decisions. Limited partners also have access to certain partnership financial information.

4789 See fn. 4756, providing that transferring an undivided interest in all of the donor's rights is an exception to the partial interest rules. In *McCord*, the assigned interests also carried with them the right to sell their interests at fair market value for cash, which sale took place shortly after the transfer. Perhaps this quick liquidation made the court more sympathetic to allowing the charitable deduction?

not comment about the partial interest prohibition when approving the transfer of nonvoting interests in LLCs.[4790]

Finally, suppose neither an income nor an estate tax deduction is needed; rather, the donor is making a gift and does not want the partial interest prohibition to result in gift tax. In that case, consider instead donating to a Code § 501(c)(4) organization. See part II.Q.6.g Gift Tax Exclusion for Gifts to Certain Noncharitable Organizations.

II.Q.6.g. Gift Tax Exclusion for Gifts to Certain Noncharitable Organizations

Code § 2501(a)(6), "Transfers to certain exempt organizations," provides:[4791]

> Paragraph (1) shall not apply to the transfer of money or other property to an organization described in paragraph (4), (5), or (6) of section 501(c) and exempt from tax under section 501(a), for the use of such organization.

Code § 501(c)(4) describes:

> (A) Civic leagues or organizations not organized for profit but operated exclusively for the promotion of social welfare, or local associations of employees, the membership of which is limited to the employees of a designated person or persons in a particular municipality, and the net earnings of which are devoted exclusively to charitable, educational, or recreational purposes.
>
> (B) Subparagraph (A) shall not apply to an entity unless no part of the net earnings of such entity inures to the benefit of any private shareholder or individual.

Thus, a person who is charitably inclined who does not need the income tax deduction and would like to make a gift without complying with the charitable income tax deduction requirements may very well be able to achieve his or her goals through a donation to a Code § 501(c)(4) organization.

See Life Cycle of a Social Welfare Organization (irs.gov).

Code § 501(c)(5) refers to "labor, agricultural, or horticultural organizations."

Code § 501(c)(6) refers to:

> Business leagues, chambers of commerce, real-estate boards, boards of trade, or professional football leagues (whether or not administering a pension fund for football players), not organized for profit and no part of the net earnings of which inures to the benefit of any private shareholder or individual.

[4790] See fn 4958 in part II.Q.7.c.ii Private Foundations, Etc. Some of the rulings cautioned that charitable deduction valuation issues may apply.

[4791] Code § 2501(a)(1), "General rule," provides:

> A tax, computed as provided in section 2502, is hereby imposed for each calendar year on the transfer of property by gift during such calendar year by any individual, resident or nonresident.

T.D. 9873 (7/23/2019), which promulgated Reg. § 1.506-1, explains:

> *1. Section 501(c)(4) Organizations*
>
> Section 501(a) of the Code generally provides that an organization described in section 501(c) is exempt from federal income tax. Section 501(c)(4) describes certain civic leagues or organizations operated exclusively for the promotion of social welfare and certain local associations of employees. An organization is described in section 501(c)(4) and exempt from tax under section 501(a) if it satisfies the requirements applicable to such status. Subject to certain exceptions, section 6033, in part, requires organizations exempt from taxation under section 501(a) to file annual information returns or notices, as applicable.
>
> Although an organization may apply to the IRS for recognition that the organization qualifies for tax-exempt status under section 501(c)(4), there is no requirement to do so (except as provided in section 6033(j)(2), which requires organizations that lose tax-exempt status for failure to file required annual information returns or notices and want to regain tax-exempt status to apply to obtain reinstatement of such status). Accordingly, a section 501(c)(4) organization that files annual information returns or notices (Form 990, "Return of Organization Exempt From Income Tax," or, if eligible, Form 990-EZ, "Short Form Return of Organization Exempt From Income Tax," or Form 990-N (e-Postcard)), as required under section 6033, need not seek an IRS determination of its qualification for tax-exempt status in order to be described in and operate as a section 501(c)(4) organization.
>
> *2. The PATH Act*
>
> Section 405(a) of the PATH Act added section 506 to the Code, requiring an organization to notify the IRS of its intent to operate as a section 501(c)(4) organization. In addition, section 405(b) and (c) of the PATH Act amended sections 6033(f) and 6652(c), relating to information that section 501(c)(4) organizations may be required to include on their annual information returns and penalties for certain failures by tax-exempt organizations to comply with filing or disclosure requirements, respectively.
>
> Section 506(a) requires a section 501(c)(4) organization, no later than 60 days after the organization is established, to notify the Secretary of the Department of the Treasury (Secretary) that it is operating as a section 501(c)(4) organization (the notification). Section 506(b) provides that the notification must include: (1) The name, address, and taxpayer identification number of the organization; (2) the date on which, and the state under the laws of which, the organization was organized; and (3) a statement of the purpose of the organization. Section 506(c) requires the Secretary to send the organization an acknowledgment of the receipt of its notification within 60 days. Section 506(d) permits the Secretary to extend the 60-day notification period in section 506(a) for reasonable cause. Section 506(e) provides that the Secretary shall impose a reasonable user fee for submission of the notification. Section 506(f) provides that, upon request by an organization, the Secretary may issue a determination with respect to the organization's treatment as a section 501(c)(4) organization and that the organization's request will be treated as an application for exemption from taxation under section 501(a) subject to public inspection under section 6104.[1]

[1] The separate procedure by which an organization may request a determination of tax -exempt status is currently prescribed in Rev. Proc. 2019-5, 2019-1 IRB 230 and will be set forth in successor annual updates of that Revenue Procedure.

In addition, the PATH Act amended section 6033(f) to require a section 501(c)(4) organization submitting the notification to include with its first annual information return after submitting the notification any additional information prescribed by regulation that supports the organization's treatment as a section 501(c)(4) organization.

II.Q.6.h. Donation of Goodwill

Generally, goodwill must be sold at the same time the business is sold. See part II.Q.1.c Personal Goodwill and Covenants Not to Compete.

Suppose taxpayer wishes to donate an S corporation's goodwill to a charitable remainder trust: The CRT cannot hold the goodwill separately while S corporation runs the business; otherwise, prohibited self-dealing would occur. Consider the following:

1. Do a Code § 368(a)(1)(F) reorganization, in which an identical corporation is formed to serve as the parent of the existing corporation, and the existing corporation converts or merges into a single member, disregarded LLC. See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

2. Presumably one is selling only some of the S corporation's assets, because contributing substantially all of the S corporation's assets to the CRT would be a deemed taxable liquidation.[4792] Move the retained assets to a separate LLC or otherwise separate them from the LLC to be donated.

3. Cleanse the LLC to be donated, to avoid the 100% CRT tax on UBTI. Letter Ruling 9340043 is a sample roadmap described in part II.Q.6.d.i UBTI Related to a Partnership or Sole Proprietorship.

4. Donate the LLC to the CRT, keeping a 20-year fixed term interest. See part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.

5. Complete the sale.

If you can use *Rauenhorst* to avoid step transaction,[4793] steps 3, 4 and 5 may be close together in time, but step 5 cannot be legally binding when you do step 3 or 4, so you may need a very understanding buyer.

II.Q.7. Exiting from or Dividing a Corporation

If selling less than all of a corporation's assets, see part II.Q.7.o Reorganizing to Sell a Business That Is Less Than All of a Corporation's Assets.

Double taxation applies to C corporations: taxation when the corporation earns profits and taxation when it distributes the profits. To encourage corporations to distribute profits (triggering

---

[4792] See fn 4971 in part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.
[4793] See fn 4737 in part II.Q.6.e Assignment of Income on Property Being Sold.

the second level of taxation), penalties are imposed for accumulating excessive profits. Before discussing these concepts, consider strategies to avoid future double taxation.

Although dividends are taxed at the same rates as capital gains, taxation of dividends might be less favorable, in that the recipient of a dividend generally cannot use his or her basis to reduce the gain on sale and would not be able to defer tax (with respect to the amount treated as a dividend) if a note is used in the redemption.[4794] A majority shareholder who waives a dividend that is paid to other shareholders does not recognize income if done for a bona fide business reason but does recognize income if the waiver is primarily to benefit family members.[4795] The IRS will consider a ruling request approving a waiver when the amounts benefitting family members are relatively incidental.[4796] When a subordinated note's value became an issue

---

[4794] Code § 301(c)(1) states that the amount distributed as a dividend is ordinary income. Code § 316 generally provides that distributions are taxable as dividends to the extent of the corporation's current and accumulated earnings and profits. However, if and to the extent that a distribution is not a dividend, it is treated more favorably than a sale, in that such distributions first reduce the stock's basis, without any portion of the distribution considered to be a profit, until basis is exhausted. Code § 301(c)(2).

[4795] Rev. Rul. 56-431, holding:

> On the basis of facts in the instant case it is deemed that the benefits to be afforded the taxpayer's relatives by the waiver of his right to share in the dividend payments was the primary purpose for signing the waiver. The alleged business purpose to be served, namely, the payment of a larger dividend to minority stockholders who are key employees to maintain their good will, is merely incidental. No opinion is expressed whether such a purpose might be appropriate in other circumstances. Since the amounts distributed to the minority stockholders do not impair the capital by any greater amount than if distributed pro rata to all stockholders, the waiver is not considered necessary to protect the working capital of the corporation. Thus, the taxpayer's disposition of his power to receive his pro rata share of any dividends declared by the corporation, through effecting payment of such pro rata share to his relatives (including his minor children) as well as to his employees by the signing of a waiver must be considered the realization of income by him to the extent of dividend payments waived.
>
> For example, if the corporation in the instant case declared dividends of $1000 on January 31, 1955, and, in accordance with the waiver previously executed by the majority stockholder, it paid the total of such dividends, pro rata, to the minority stockholders, the taxpayer, or majority stockholder, will be considered to have realized income to the extent of 65 percent of the total dividends paid, or $650, since he owned 65 percent of the capital stock of the corporation. The minority stockholders will be considered to have received, as dividends, only $350.
>
> The above conclusion is not in conflict with Revenue Ruling 45, C. B. 1953-1, 178, which holds that the declaration of a dividend upon minority shares did not result in the receipt of income by the majority stockholder who had waived his right to share in the dividend. That ruling was based upon a factual situation in which no family or direct business relationship existed between the majority and minority stockholders and the arrangement was entered into only for bona fide business reasons, situations which do not exist in the instant case.

[4796] Section 3 of Rev. Proc. 67-14 provides that the IRS will consider a ruling request if all of the following conditions exist:

.01. A bona fide business reason must exist for the proposed waiver of dividends.

.02. The relatives of the stockholder proposing to waive his right to future dividends must not be in a position to receive more than 20 percent of the total dividends distributed to the nonwaiving shareholders. For this purpose the relatives of a waiving stockholder include his brother and sister (whether by the whole or half blood), spouse, ancestors, and lineal descendants, the spouses of his brothers and sisters (whether by the whole or half blood) and the spouses of his lineal descendants.

.03. A ruling issued on a proposed waiver of dividends transaction will clearly indicate that the ruling will no longer be applicable if any change in the stock ownership during the waiver relating to a merger with an unrelated third party, the IRS waived dividend treatment when the note was disposed of in a disproportionate manner.[4797]

Once commonly used strategy is to distribute the profits to owners through wages to owners (subject to immediate income and FICA taxation at individual rates) or through contributions to qualified retirement plans (subject to income taxation upon distribution from the plans).[4798] However, note that a corporation may not deduct unreasonably high compensation. This issue applies primarily when profits come from the sale of goods (rather than services) or from the efforts of non-owners. Generally, a professional should be able to justify compensation based on profits derived directly from the professional's work.

When a shareholder takes money out of a corporation without declaring compensation, the transfer constitutes a distribution unless the shareholder can prove that it was a bona fide loan to the shareholder[4799] or perhaps a repayment of a loan the shareholder made to the corporation.[4800] Payments by the majority shareholder of a corporation may also constitute income to the recipient, notwithstanding the recipient's practically unsupported allegations that the payments were loan repayments.[4801]

Any assets that could appreciate may be held by the owners directly and rented to the corporation. The owners should hold these assets in one or more LLCs.

---

period enables nonwaiving relatives to receive more than 20 percent of a dividend, unless the change occurs because of death.

.04. A ruling issued on a proposed waiver of dividends transaction will not be effective for a period longer than three years from the date of the ruling.

.05. A request for a ruling on a proposed waiver of dividends transaction must be submitted to the National Office in accordance with Revenue Procedure 67-1, page 544, this Bulletin.

[4797] Letter Ruling 201636037.

[4798] See part II.A.1.b C Corporation Tactic of Using Shareholder Compensation to Avoid Dividend Treatment.

[4799] *Zang v. Commissioner*, T.C. Memo. 2017-55, which held that the payments constituted income, without specifying the type of income. The court set forth the law:

> Objective factors are considered to determine the parties' intent and whether a bona fide loan occurred, and no single factor is dispositive. See *Welch v. Commissioner*, 204 F.3d 1228, 1230 (9th Cir. 2000), *aff'g* T.C. Memo. 1998-121; *Frierdich v. Commissioner*, 925 F.2d 180, 182 (7th Cir. 1991), *aff'g* T.C. Memo. 1989-393. We examine the following factors to determine whether the additional checks and cash withdrawals that petitioners received were loans:
> (1) the ability of the borrower to repay;
> (2) the existence or nonexistence of a debt instrument;
> (3) security, interest, a fixed repayment debt, and a repayment schedule;
> (4) how the parties' records and conduct reflect the transaction;
> (5) whether the borrower has made repayments;
> (6) whether the lender had demanded repayment;
> (7) the likelihood that the loans were disguised compensation for services; and
> (8) the testimony of the purported borrower and lender.
> *Welch v. Commissioner*, 204 F.3d at 1230; see also *Kaider v. Commissioner*, T.C. Memo. 2011-174.

[4800] See part II.G.20.b When Debt Is Recharacterized as Equity.

[4801] *Dufresne v. Commissioner*, T.C. Memo. 2019-93, citing the factors from *Welch v. Commissioner* in fn 4799. Ironically, the taxpayer and his mother (to whom he had purportedly loaned money) made their living doing psychic readings, must not have been able to see far enough in the future to know to keep better records to satisfy the IRS or to keep her out of bankruptcy.

II.Q.7.a. Corporate Redemption

II.Q.7.a.i. Redemption Compared to Cross-Purchase

The remaining parts of this part II.Q.7.a and part II.Q.7.b Redemptions or Distributions Involving S Corporations describe various issues involved in corporate redemptions.

How might one compare a redemption to a purchase by a new or existing shareholder (a cross-purchase)? One should consider the reliability (or lack thereof) of the corporation as a purchaser compared with a shareholder as a purchaser. A cross-purchase generally avoids the tax issues that involve redemptions. If C corporation stock is involved, one might consider preserving for the buyer the possibility that $10 million or more[4802] of future gain might be excluded from income;[4803] that benefit applies only to stock issued by the corporation, and a redemption that occurs to close to a stock issuance can disqualify the stock issuance.[4804] The special rule for ordinary loss treatment of up to $50,000 on the sale of stock also applies only to stock issued to the holder.[4805]

II.Q.7.a.ii. Hybrid Between Redemption and Cross-Purchase When Selling to New Shareholder or Other Shareholders

Instead of a shareholder selling all of his or her C corporation stock to a buyer, consider selling some of the stock and having the corporation redeem the rest. That way, instead of the buyer having to pay tax on dividends used to buy the stock, the buyer pays tax only on dividends the buyer uses to buy the seller's stock, and corporation completes the rest of the purchase, reducing the corporation's earnings and profits.[4806] This imposes double taxation (the corporation paying tax on its earnings used to buy the seller's stock, and the seller paying capital gain tax) instead of triple taxation (the corporation paying tax on its earnings used to pay

[4802] Or ten times the stock's basis, if greater. Code § 1202(b)(1)(B).
[4803] See part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation.
[4804] See text accompanying fns. 5220-5223 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.
[4805] See part II.Q.7.l Special Provisions for Loss on the Sale of Stock in a Corporation under Code § 1244.
[4806] In *Zenz v. Quinlivan*, 213 F.2d 914 (6th Cir. 1954):

> Prospective buyer did not want to assume the tax liabilities which it was believed were inherent in the accumulated earnings and profits of the corporation. To avoid said profits and earnings as a source of future taxable dividends, buyer purchased part of taxpayer's stock for cash. Three weeks later, after corporate reorganization and corporate action, the corporation redeemed the balance of taxpayer's stock, purchasing the same as treasury stock which absorbed substantially all of the accumulated earnings and surplus of the corporation.

The IRS and lower court did not like this tax-motivated structure. The Sixth Circuit said that taxpayers can use the structure that is most favorable, holding:

> Since the intent of the taxpayer was to bring about a complete liquidation of her holdings and to become separated from all interest in the corporation, the conclusion is inevitable that the distribution of the earnings and profits by the corporation in payment for said stock was not made at such time and in such manner as to make the distribution and cancellation or redemption thereof essentially equivalent to the distribution of a taxable dividend.

The IRS agreed to follow *Zenz* in Rev. Ruls. 54-458 (1939 Code) and 55-745 (1954 Code), which was followed (although in a different context) by Rev. Ruls. 75-447, 77-226, 79-273, 81-186, and 84-114.

a dividend to the buyer, then the buyer paying dividend tax, and the seller paying capital gain tax).[4807]

The redemption reduces the corporation's earnings and profits,[4808] thereby reducing potential dividend treatment and facilitating an S election.[4809] If the corporation does not make an S election, consider whether the buyer should first buy the stock directly from the corporation, which may make the stock eligible for a certain capital gain exclusion,[4810] followed by the seller being redeemed after a waiting period that is generally at least two years.[4811]

This method, however, does not provide the buyer with basis except to the extent that the buyer, rather than the corporation, buys the seller's stock.

II.Q.7.a.iii. Redemption Taxed Either as Sale of Stock or Distribution; Which Is Better When

In a redemption by an entity taxed as a corporation, the seller generally is taxed on the extent to which the redemption proceeds exceed the seller's tax basis.[4812] However, if the seller retains an interest in the corporation, or other family members also retain an interest, the redemption might be considered a distribution rather than a sale of the stock.[4813] In other words, what for state law purposes is a redemption is not necessarily treated as a redemption for income tax purposes.[4814]

A redemption for a promissory note that is recast as a dividend[4815] is immediately taxed; installment sale deferral does not apply – not even to the capital gain portion.[4816]

4807 For triple taxation, see parts II.Q.1.a.i.(b) C Corporation and II.Q.1.a.ii.(b) C Corporation Redemption (California).

4808 See fn. 4904, found in part II.Q.7.b.iv.(b) S Corporation Redemptions Using Life Insurance Proceeds.

4809 The main issue is avoiding possible termination of an S election described in part II.P.3.b.iii Excess Passive Investment Income, which is not difficult to avoid if one is attuned to the issue. See also parts II.P.3.b.iv Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds and II.Q.7.b.iv.(a) S corporation Distributions of Life Insurance Proceeds - Warning for Former C Corporations.

4810 See part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation.

4811 See the text accompanying fns. 5220–5232 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

4812 Code §§ 302(a), 1001.

4813 Code §§ 302(b)(2)(C) and 302(c) provide that family attribution can cause redemptions to be treated as distributions that might be taxed as dividends rather than as sales.

4814 However, since Code § 302(a) looks to the Code § 317(b) definition of redemption, generally a transaction must be a redemption for state law purposes before it might be considered a redemption for tax purposes.

4815 See fn. 4794 in part II.Q.7 Exiting from or Dividing a Corporation.

4816 Reg. §§ 1.301-1(b), 1.301-1(*l*); *Cox v. Commissioner*, 78 T.C. 1021 (1982); *Brams v. Commissioner*, 734 F.2d 290 (6th Cir. 1984), *aff'g* T.C. Memo. 1983-25. *Cox* held at 1028-1029:

> Section 453(b) requires a sale. Section 301(c)(3)(A) is intended to tax distributions which impair a corporation's capital as capital gains (*Cloutier v. Commissioner*, 24 T.C. 1006, 1013 (1955)). We can see no reason why a taxpayer should be allowed to account for section 301(c)(3)(A) gain differently from income under section 301(c)(1), especially since the applicability of section 301(c)(3)(A) depends, to a large extent, upon the combination of a fortuitous lack of

On the other hand, taxing as a distribution the redemption of S corporation stock might be more favorable than taxing it as the sale of the stock, because generally the former allows basis to apply first to all of the proceeds[4817] and the latter would use only the basis attributable to the block redeemed.

II.Q.7.a.iv. Dividends; Avoiding Dividend Treatment Using Redemptions under Code §§ 302 and 303

The rules are in part II.Q.7.a.iv.(a) Actual Payments.

For when transactions between corporations and shareholders constitute distributions, see part II.Q.7.a.iv.(b) Constructive Dividends.

II.Q.7.a.iv.(a). Actual Payments

The amount of cash (or fair market value of property)[4818] that a C corporation distributes to its shareholders:[4819]

(1) Is included in income to the extent that it is a dividend.

(2) Is applied against the adjusted basis of their stock, to the extent it is not a dividend and basis is available.

(3) Constitutes "gain from the sale or exchange of property" to the extent (1) and (2) do not apply.

"Dividend" means any distribution of property[4820] made by a corporation to its shareholders out of its earnings and profits accumulated after February 28, 1913, or out of its earnings and profits (E&P) of the taxable year (computed as of the close of the taxable year without diminution by reason of any distributions made during the taxable year), the latter without regard to the amount of the E&P at the time the distribution was made.[4821]

> corporate earnings and profits and a small stock basis. We find no intent in section 301(c)(3)(A) to afford shareholders access to a more desirable method of accounting. Section 301(c)(3)(A) merely characterizes the gain as gain from a sale or exchange, it does not provide the sale needed for section 453(b).

[4817] See part II.Q.7.b.i Redemptions or Distributions Involving S corporations - Generally, especially the text accompanying fns. 4874-4875.

[4818] Code § 301(b)(1). Fair market value is determined as of the date of the distribution. Code § 301(b)(3).

[4819] Code § 301(c).

[4820] Reg. § 1.316-1(a)(1) refers to "any distribution of property as defined in section 317 in the ordinary course of business, even though extraordinary in amount." Code § 317(a) provides:

> For purposes of this part, the term "property" means money, securities, and any other property; except that such term does not include stock in the corporation making the distribution (or rights to acquire such stock).

However, cases tax as a constructive dividend either the value or the out-of-pocket costs of goods or services a corporation provides to a shareholder in that person's capacity as such. See 764(3d) T.M. IV.F. (detailed discussion); *Federal Tax Coordinator* ¶J-2701 Distribution made for shareholder's benefit in his capacity as a shareholder; Bittker & Eustice, ¶8.06. Constructive Distributions, *Federal Income Taxation of Corporations & Shareholders* (WG&L).

[4821] Code § 316(a).

Although qualified dividends are taxed at the same rate as capital gains,[4822] redemptions have an advantage in that the shareholders may deduct tax basis against redemption proceeds. For stock passing from a decedent, the basis adjustment at death might eliminate any tax on redemption. Also, tax deferral using the installment method is not available if the state law redemption is treated for tax purposes as a dividend.[4823] Furthermore, to the extent that a redemption recharacterized as a distribution is treated as a return of capital (because it exceeds earnings and profits and the excess is not treated as a dividend), presumably the distribution would be a return of basis pro rata, which could create unexpected capital gain if some shares have high basis and others have low basis.[4824]

Code §§ 302 and 303 set forth two methods by which a stock redemption can be qualified to avoid dividend treatment.

Code § 303 provides a way for the estate of a deceased shareholder to obtain cash from a closely held corporation to pay estate taxes and expenses while obtaining the favored tax treatment of an exchange. To qualify for Code § 303, the estate's total stock holdings in the closely held corporation must exceed 35% of the total adjusted gross value of the estate, and the distribution must occur within 90 days after the expiration of the three-year limitations period for the assessment of estate tax set forth in Code § 6501(a) (subject to extension in Tax Court proceedings or if a Code § 6166 election is in place). The amount eligible for Code § 303 redemption cannot exceed the total administration expenses allowable under Code § 2053, including estate taxes and interest.

For amounts exceeding estate taxes and expenses, one of the following four exceptions must apply to qualify as an exchange under § 302:

(a) <u>The redemption is not essentially equivalent to a dividend</u>. This applies on a case-by-case basis, based on whether the redemption results in a "meaningful" reduction in ownership.[4825]

(b) <u>The redemption is substantially disproportionate</u>. A substantially disproportionate redemption is one that decreases the shareholder's voting stock interest below 80% and the shareholder's ownership of outstanding stock below 50% immediately following the redemption. Attribution make this exception difficult to satisfy.[4826]

(c) <u>The redemption is a complete termination of the shareholder's interest</u>. If the shareholder completely terminates his or her interest in the corporation, the redemption may qualify

---

[4822] Code § 1(h)(11).
[4823] See Regs. §§ 1.301-1(d)(1)(ii), 1.301-1(h)(2)(i) and 1.301-1(l) and Code § 312(a)(2).
[4824] See part II.Q.7.h.ii Taxation of Shareholders When Corporation Distributes Cash or Other Property, especially the text accompanying fn. 5096.
[4825] *U.S. v. Davis*, 397 U.S. 301 (1970); Rev. Ruls. 75-502, 75-512, and 78-401; in ruling favorably for the taxpayer, Letter Ruling 201918009 also cited Rev. Ruls. 75-502, 76-385, and 77-726 but not 78-401. The transaction should also have a business purpose. See footnote 31 of *H.J. Heinz Company & Subs. v. U.S.*, 99 AFTR 2d 2007-2940, 76 Fed. Cl. 570 (2007).
[4826] Code §§ 302(c)(1), 318. See Harris & Kessler, Constructive Ownership under Section 318, *Business Entities* (WG&L), Mar/Apr 2016.

under Code § 302.[4827] A gift of stock to a family member, followed by a redemption of the donor's remaining stock, qualified as a complete termination.[4828]

(d) The redemption is a partial liquidation distribution. A distribution is a partial liquidation[4829] if:[4830]

(1) it is not essentially equivalent to a dividend (determined at the corporate level rather than the shareholder level);

(2) the distribution is pursuant to a plan and occurs within the taxable year in which the plan is adopted or within the succeeding taxable year;

(3) the distribution is attributable to the distributing corporation's ceasing to conduct, or consists of the assets of, a qualified trade or business which the corporation has actively conducted for the five years immediately prior to the distribution; and

(4) the distributing corporation is actively engaged in the conduct of a qualified trade or business.

However, a buy-sell agreement might convert what appears to be a redemption above into a deemed dividend followed by a deemed cross-purchase. The IRS takes this position if a shareholder has the primary, unconditional obligation to enter into a cross-purchase and the corporation redeems the stock instead.[4831] However, the IRS does not take this position if a shareholder has a mere option to cross-purchase, if a shareholder's purchase obligation is contingent on the corporation not redeeming the stock, if a shareholder has the right to assign the purchase obligation to the corporation, or if the agreement is amended before a shareholder's purchase obligation became unconditional.[4832]

Also, certain Code § 302(d) redemptions and other transactions might be recharacterized if any of the company's stock "is structured so that dividends (as defined in section 316) paid by the corporation with respect to the stock are economically (in whole or in part) a return of the holder's investment (as opposed to only a return on the holder's investment)."[4833]

II.Q.7.a.iv.(b). Constructive Dividends

"A constructive dividend occurs when a corporation confers an economic benefit on a shareholder without the expectation of repayment." *Povolny Group, Inc. v. Commissioner*, T.C.

[4827] Reg. §§ 1.302-4, 1.302-4T. When a beneficiary grantor trust owns stock in a corporation, the beneficiary is the owner whose complete termination must be tested. Rev. Rul. 72-471, cited with approval in Rev. Rul. 85-13.
[4828] Letter Ruling 200939011.
[4829] Code § 302(b)(4) provides that redemption treatment applies if the distribution is:
(A) in redemption of stock held by a shareholder who is not a corporation, and
(B) in partial liquidation of the distributing corporation.
[4830] Code § 302(e).
[4831] Rev. Rul. 69-608, Situations 1, 2 and 3.
[4832] Rev. Rul. 69-608, Situations 4, 5, 6 and 7, respectively.
[4833] Reg. § 1.7701(l)-3(b)(2)(i), explaining stock to which Reg. § 1.7701(l)-3 might apply. See Reg. § 1.7701(l)-3(e), Example (3) for a Code § 302(d) redemption that would be recharacterized. Most planning for dividends and earnings & profits (E&P) under Code §§ 312 and 316 is beyond the scope of my materials.

Memo. 2018-37, in which payment to a related corporation was a dividend from the payor to the shareholder, followed by a contribution to capital from the shareholder to the recipient. The case was cited in fn 1161 in part II.G.4.a.ii Bad Debt Loss – Must be Bona Fide Debt and fn. 1839 in part II.G.20.b When Debt Is Recharacterized as Equity. The case reasoned:

> A *constructive* dividend occurs when "a corporation confers an economic benefit on a shareholder without the expectation of repayment." *Magnon v. Commissioner*, 73 T.C. 980, 993-94 (1980). A transfer between related corporations can be a constructive dividend to common shareholders even if those shareholders don't personally receive the funds. See, *e.g.*, *Benson v. Commissioner*, T.C. Memo. 2004-272, 2004 WL 2698858, at *18-*22 (payments for purported royalties and nonexistent services between related entities were constructive dividend), supplemented by T.C. Memo. 2006-55, *aff'd*, 560 F.3d 1133 (9th Cir. 2009); *Shedd*, 2000 WL 1337177, at *6-*7 (advance between shareholder's entities was constructive dividend). That type of transfer is a constructive dividend if the common shareholder has direct or indirect control over the transferred property and the transfer wasn't made for a legitimate business purpose but instead primarily benefited the shareholder. *Shedd*, 2000 WL 1337177, at *6-*7; see also *Stinnett's Pontiac Serv., Inc. v. Commissioner*, 730 F.2d 634, 641 (11th Cir. 1984), *aff'g* T.C. Memo. 1982-314. Povolny had complete control over the transferred funds - he was and is the sole shareholder of PG and Archetone International and he owns 49% of Archetone Limited. And there was no discernible business reason for PG to make the transfer - as we found above, there was no hope of repayment or contemplation of interest. The transfer was undeniably bad for PG, but it was good for Povolny because it reduced his other entities' liabilities. PG's payment of $70,000 of Archetone International's and Archetone Limited's expenses was therefore a constructive dividend to Povolny.

When a corporation performs services for a shareholder without the expectation of repayment, the corporation cannot deduct its costs of performing those services, and that cost constitutes a dividend. *Magnon v. Commissioner*, 73 T.C. 980, 993-94 (1980), holding:

> The provision of services by a corporation has been held to be "property" within the meaning of section 1.317-1, Income Tax Regs. *Loftin & Woodard, Inc. v. United States*, 577 F.2d 1206, 1214 (5th Cir. 1978); *Benes v. Commissioner*, 42 T.C. 358, 379 (1964), *affd*. 355 F.2d 929 (6th Cir. 1966).
>
> Where a corporation confers an economic benefit on a shareholder without the expectation of repayment, that benefit becomes a constructive dividend, taxable to the shareholder, even though neither the corporation nor the shareholder intended a dividend. However, "not every corporate expenditure which incidentally confers economic benefit on a shareholder is a constructive dividend." The crucial test of the existence of a constructive dividend is whether "the distribution was primarily for the benefit of the shareholder". *Loftin & Woodard, Inc. v. United States*, *supra* at 1214; *Crosby v. United States*, 496 F.2d 1384, 1388 (5th Cir. 1974); *Sammons v. Commissioner*, 472 F.2d 449 (5th Cir. 1972), *affg.*, *revg.*, and remanding a Memorandum Opinion of this Court.
>
> In the instant case, Magnon Service performed the electrical contracting services in issue primarily for Magnon's benefit as sole shareholder. All of the properties on which the corporation did work were owned by Magnon either in his own name or with partners. Moreover, there is no evidence in the record that Magnon ever intended that

> Magnon Service would acquire any interest in the properties on which it was working. See *Benes v. Commissioner*, *supra* at 379. Rather, the main purpose for the agreement between the corporation and Magnon, as recorded in the corporation's minutes for December 7, 1970, was to provide the sole shareholder with needed services at a low cost and with loose terms for repayment. Given that Magnon Service's agreements to perform jobs for unrelated customers usually provided for higher profit margins and more definite terms for repayment than did its agreement with Magnon, any business purpose for the corporation entering into the transaction with Magnon would be inadequate to disturb our conclusion that the corporation's services were performed primarily for the sole shareholder's benefit. *Sammons v. Commissioner*, *supra* at 453.
>
> Magnon Service also performed the services herein for Magnon without any expectation of being repaid for them. In *Benes v. Commissioner*, *supra*, we held (42 T.C. at 379) that where a taxpayer-shareholder has a corporation build property on his behalf, the costs incurred constitute a constructive dividend to the shareholder if: (1) He intends the property to be his from the very beginning, and (2) the shareholder has no intention of repaying the corporation either during or upon completion of the construction. Since Magnon apparently intended that the properties on which Magnon Service did work would remain his own from the start, he attempts to escape the result in *Benes* by arguing that he always intended to repay the corporation for its services. Based on the facts herein, however, we conclude that Magnon never intended to repay the corporation either during or upon the completion of its services and that Magnon's receipt of those services therefore constituted dividends to him during the years that the work was performed.

Elaborating on this test, *Palmarini, Inc. v. Commissioner*, T.C. Memo. 2022-119, explained:

> Thus, there is a two-part test to determine a constructive dividend: (1) the expense must be nondeductible to the corporation, and (2) it must represent some economic gain, benefit, or income to the shareholder. *See, e.g.*, *Dobbe v. Commissioner*, T.C. Memo. 2000-330, 80 T.C.M. (CCH) 577, 587, *aff'd*, 61 F. App'x 348 (9th Cir. 2003).

Palmarini, Inc. v. Commissioner, T.C. Memo. 2022-119, held:

> Mr. Palmarini argues that Palmarini Inc. uses his personal rental properties for the business purpose of storing its equipment, and that therefore its payments related to these properties are deductible business expenses of Palmarini Inc. in the nature of rent, rather than a constructive dividend to him. Although we accept that Palmarini Inc. may have made some use of these properties for business purposes, there is no documented rental agreement between Palmarini Inc. and Mr. Palmarini for the corporation's use of the properties, nor are there any recurring payments from which to infer that anything like a rental arrangement existed. Furthermore, these payments by Palmarini Inc. are to third parties, rather than to Mr. Palmarini, and the description lines simply state the address of the property and specify neither the work done nor its business purpose. Palmarini Inc.'s expenses for maintenance and improvements to Mr. Palmarini's personal rental properties represent a constructive dividend to him, see, *e.g.*, *Magnon*, 73 T.C. at 994; and, to the extent set out in the Commissioner's revised examination report and the parties' stipulation of settled issues, Mr. Palmarini may deduct the third parties' expenditures as rental expenses on Schedule E.

> Mr. Palmarini further asserts that Palmarini Inc.'s corporate bylaws provide for paying the cost of medical care and of a vacation for officers and their families. No copy of Palmarini Inc.'s corporate bylaws was produced in these cases; but even if we assume their existence, a corporation's bylaws do not overrule the federal income tax consequences of a corporation's distributions to its shareholders. Financial benefits to be paid to officers have their federal tax consequences even if bylaws authorize those benefits to be paid. Palmarini Inc.'s payment of personal expenses for Mr. Palmarini and his family must be included in his income as a constructive dividend. See, *e.g.*, *Dobbe*, 80 T.C.M. (CCH) at 587-88.

In *Starer v. Commissioner*, T.C. Memo. 2022-124, the shareholder played fast and loose with distributions in a few areas, including this one:

> Respondent determined that petitioners' rent-free use of the home owned by Bayview during the years in issue constituted a constructive dividend from Bayview to petitioners equal to the $24,000 per year fair rental value of the property. It is well settled that a shareholder's use of corporate property can result in a constructive dividend to him measured by the fair market rental value of the property. *Nicholls, North, Buse Co. v. Commissioner*, 56 T.C. 1225, 1240-42 (1971). Petitioners concede to residing in the home during that time without paying rent to Bayview and do not argue against the determination that their residence there constitutes a constructive dividend. Instead, they argue that an 87% reduction should be applied to the stipulated value of the constructive dividend on the basis of their self-serving testimony that they lived in only 13% of the home. We do not find this argument persuasive, and we have no obligation to accept uncorroborated self-serving testimony. *Tokarski v. Commissioner*, 87 T.C. 74, 77 (1986). In addition, petitioners have stipulated the amount of the constructive dividend and Rule 91(e) requires that we bind them to this stipulation absent clearly contrary evidence.[14] See *Jasionowski v. Commissioner*, 66 T.C. 312, 318 (1976) (holding that the Court has discretion not to be bound by the stipulation of facts where clearly contrary evidence is presented at trial). Consequently, we conclude petitioners' rent-free use of the home constitutes a constructive dividend from Bayview to petitioners in the amount stipulated by the parties.
>
> [14] The parties have also stipulated the resulting tax consequences if the Court determined petitioners' rent-free use of the home constitutes a constructive dividend.

A constructive dividend also applies when a corporation overpays shareholders. *Plentywood Drug, Inc. v. Commissioner*, T.C. Memo. 2021-45, analyzed rent a corporation paid to its shareholders. First, it discussed the principles:

> The rules we apply today are well settled. Section 162(a) allows a taxpayer to deduct the "ordinary and necessary" expenses he pays in carrying on a trade or business. The Code specifically lists the rent paid by a business as one of these deductible expenses. Sec. 162(a)(3). But for an expense like rent to be ordinary and necessary, it must also be reasonable in amount. *United States v. Haskel Eng'g & Supply Co.*, 380 F.2d 786, 788 (9th Cir. 1967). Any part of rent that is unreasonable is not ordinary and necessary and thus not deductible. *Velvet Horn, Inc. v. Commissioner*, 41 T.C.M. (CCH) 1445, 1449 (1981).

The Commissioner does not often question the reasonableness of a rent agreed to by parties at arm's length. But he does sometimes look closely to the fairness of rent charged when landlord and tenant might not have an incentive to drive a hard bargain:

> When there is a close relationship between lessor and lessee and in addition there is no arm's length dealing between them, an inquiry into what constitutes reasonable rental is necessary to determine whether the sum paid is in excess of what the lessee would have been required to pay had he dealt at arm's length with a stranger…

Place v. Commissioner, 17 T.C. 199, 203 (1951), *aff'd*, 199 F.2d 373 (6th Cir. 1952); see also *Safway Steel Scaffolds Co. of Ga. v. United States* 590 F.2d 1360, 1362 (5th Cir. 1979). The Commissioner sometimes suspects that a corporation might call a payment to its shareholders something like rent, which is deductible, when the economic reality is that it's a distribution of profits. If his suspicion turns out to be true, the seemingly deductible expense is actually a nondeductible dividend. Tax law calls such a dividend a "constructive" dividend because the corporation itself doesn't call it that on its books. See *Rosser v. Commissioner*, 99 T.C.M. (CCH) 1035, 1039 (2010); *Benson v. Commissioner*, 88 T.C.M. (CCH) 520, 534 (2004). Shareholders have to include constructive dividends in their taxable income under section 61(a)(7).[7] These kinds of cases are disputes about value, and as in any valuation dispute we may use testimony from experts, see *Harmon City, Inc. v. United States*, 733 F.2d 1381, 1383-84 (10th Cir. 1984), and may look at all the circumstances of the case and the entire history of transactions between the parties, *Safway Steel Scaffolds*, 590 F.2d at 1362.

[7] Plentywood Drug contends that the Commissioner may not recharacterize the rent that it pays as qualified dividends under section 482. But the Commissioner did not rely on section 482 to reclassify the rent. Section 482 caselaw is not relevant here. Plentywood Drug contends that the Commissioner may not recharacterize the rent that it pays as qualified dividends under section 482. But the Commissioner did not rely on section 482 to reclassify the rent. Section 482 caselaw is not relevant here.

Plentywood Drug, Inc. v. Commissioner, T.C. Memo. 2021-45, determined that the rent paid was excessive:

> A fair market rent is one at which "the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or sell and both having reasonable knowledge of relevant facts." Sec. 1.170A-1(c)(2), Income Tax Regs. The parties in these cases quickly realized that finding comparable properties in a town of 1,700 people in frontier Montana and then using them to come up with a fair market rent would be difficult. One problem right out of the chute is that Montana is a nondisclosure state. This means that real-estate data such as sales prices that appraisers can typically find in other states is legally confidential and simply not available. This issue is magnified in a town the size of Plentywood, which already has a limited number of even potentially comparable buildings. We heard entirely credible testimony that Montanans - perhaps especially Montanans in small communities - don't commonly share details of their financial lives very readily with strangers. The Commissioner's expert was particularly credible in his statement that when he tried to find information in Plentywood he did not identify himself as an IRS agent.

The court evaluated the competing experts' views and determined that rent paid in two years exceeded fair rent by approximately 12% but declined to impose penalties, given the difficulty the valuation entailed.

II.Q.7.a.v. Redemptions and Alternative Minimum Tax

Before 2017 tax reform, life insurance proceeds received by a C corporation may have been taxed under the corporate alternative minimum tax (AMT) because insurance proceeds increase a corporation's book earnings, but are not included in the taxable income of the corporation.[4834] AMT did not apply to corporations whose average annual gross receipts did not exceed a threshold[4835] or to S corporations.[4836]

That version of corporate AMT has been repealed. However, a corporation with more than $1 billion of annual income is subject to corporate AMT. Notice 2023-64 imposes more unfavorable rules regarding book earnings than the old corporate AMT did, but of curse only to a selected few C corporations.

II.Q.7.a.vi. Redemptions and Accumulated Earnings Tax

Generally, a C corporation that accumulates funds could also be subject to the 20% accumulated earnings tax.[4837] The tax applies to every corporation "formed or availed of for the purpose of avoiding the income tax with respect to its shareholders or the shareholders of any other corporation, by permitting earnings and profits to accumulate instead of being divided or distributed,"[4838] except:[4839]

(1) a personal holding company (as defined in section 542),

(2) a corporation exempt from tax under subchapter F (section 501 and following), or

(3) a passive foreign investment company (as defined in section 1297).

Thus, it complements the personal holding company tax, which is also designed to force C corporations to declare dividends. See part II.A.1.e Personal Holding Company Tax.

The tax is on "accumulated taxable income."[4840] "Accumulated taxable income" means the adjusted taxable income,[4841] minus the sum of the dividends paid deduction[4842] and the accumulated earnings credit.[4843]

[4834] Code § 56(g).
[4835] Code § 55(e)(1).
[4836] Code § 56(g)(6).
[4837] Code § 531.
[4838] Code § § 532(a).
[4839] Code § § 532(b).
[4840] Code § 531.
[4841] Code § 535(b) adjusts taxable income, including to deduct federal income and certain other taxes, deduct charitable contributions with modifications, disallow the dividends-received deductions, allow capital losses subject to modifications, and deduct U.S.-source capital gains.
[4842] Code § 561.
[4843] Code § 535(b).

The accumulated earnings credit works as follows:

- "If the corporation is a mere holding or investment company, the accumulated earnings credit is the amount (if any) by which $250,000 exceeds the accumulated earnings and profits of the corporation at the close of the preceding taxable year."[4844]

- Otherwise, the accumulated earnings credit is equal to such part of the earnings and profits for the taxable year as are retained for the business' reasonable needs, minus a certain deduction relating to U.S.-source capital gains.[4845] The dividends paid deduction[4846] reduces retained earnings and profits.[4847] The accumulated earnings credit for such a corporation is no less than the amount by which $250,000 exceeds the corporation's accumulated earnings and profits at the close of the preceding taxable year.[4848] The $250,000 amount is reduced to $150,000 for a corporation the principal function of which is the performance of services in the field of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting.[4849]

Let's examine how the $250,000 credit would work for a mere holding or investment company. Suppose the accumulated earnings and profits at the close of the preceding taxable year were $250,000 or more. The credit would be zero, because $250,000 did not exceed the accumulated earnings and profits at the close of the preceding taxable year. Suppose the accumulated earnings and profits at the close of the preceding taxable year were $200,000. The credit would be $50,000, leaving $200,000 subject to the tax. the sweet spot would seem to be $125,000 accumulated earnings and profits at the close of the preceding taxable year, where a credit of $125,000 ($250,000 minus $125,000) would offset the $125,000 accumulated earnings and profits at the close of the preceding taxable year. Of course, that assumes that the corporation is not a personal holding company, which is exempt from the accumulated earnings tax.[4850]

Earnings and profits of a corporation accumulating beyond the business' reasonable needs is determinative of the purpose to avoid the income tax with respect to shareholders, unless the corporation by the preponderance of the evidence proves otherwise.[4851] A corporation being a mere holding or investment company is prima facie evidence of the purpose to avoid income tax with respect to shareholders.[4852] If the corporation does not the liquidity to pay a cash distribution, it should consider declaring a Code § 565 consent dividend,[4853] being extra careful about the consent dividend if a trust that makes charitable contributions is a shareholder.[4854]

[4844] Code § 535(c)(3).
[4845] Code § 535(c)(1).
[4846] Code § 561.
[4847] Code § 535(c)(1).
[4848] Code § 535(c)(2)(A).
[4849] Code § 535(c)(2)(B).
[4850] See fn 4839 and part II.A.1.e Personal Holding Company Tax.
[4851] Code § 533(a).
[4852] Code § 533(a).
[4853] CCA 201653017 asserted accumulated earnings tax on a holding company and would not accept lack of liquidity as an excuse, pointing to the consent dividend procedure and relying on the discussion of that procedure's purpose in TAM 9124001.
[4854] See part II.Q.7.c.i.(b) Business Income Limiting Trust Income Tax Deduction, including the paragraph accompanying fn. 4917.

However, reasonable business needs include the business' reasonably anticipated needs, funding a redemption to pay estate tax or expenses of estate administration, or is being used to fund certain redemptions of charitable shareholders.[4855] Consider documenting the business purposes for accumulating earnings in annual meeting minutes. If the earnings get too high and cannot be reduced through high but reasonable compensation (especially qualified retirement plans) or rent, consider making an S election.[4856]

II.Q.7.a.vii. Corporate Liquidation

When a corporation liquidates completely:

- Generally, the liquidating corporation recognizes gain or loss on the distribution of property in complete liquidation as if such property were sold to the distributee at its fair market value.[4857] Code § 337 (liquidation of an 80%-owned corporate subsidiary) and other provisions of Code § 336 provide exceptions. The entire gain (not just depreciation recapture) from the deemed sale of any depreciable or amortizable property may be taxed as ordinary income (which, in addition to having consequences to S corporation owners, can be an issue to C corporations that have capital losses that could otherwise be offset).[4858]

- The shareholder's proceeds are considered to be proceeds from selling the shareholder's stock.[4859] Such proceeds are reduced by any liabilities the shareholders assume.[4860] Subject to a particular exception, dividend taxation does not apply to the deemed sale proceeds.[4861]

Rather than applying installment sale rules to the gain on sale, basis is applied to each receipt until basis runs out, and then gain is recognized for proceeds in excess of basis.[4862]

"As a general rule, losses resulting from a complete liquidation will be recognized only after the corporation has made its final distribution."[4863] However, if at least 99% of the proceeds have been paid to the shareholders, they can recognize loss on the liquidation at that time.[4864] Furthermore, "certain exceptions to the general rule have been recognized by the courts where the stock is shown to have been worthless prior to complete liquidation, such as, for example, where the corporation's liabilities exceeded its assets,"[4865] or "where the losses are so

---

4855 Code § 537(a)(1), (2).
4856 Although S corporations cannot have excessive income from investments, that prohibition is easy to avoid using a modest amount of oil and gas investments. See part II.P.3.b.iii Excess Passive Investment Income, especially fn. 3954.
4857 Code § 336(a).
4858 See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill).
4859 Code § 331.

4861 Code § 331(b).
4862 Rev. Rul. 85-48, amplifying Rev. Rul. 68-348. The proceeds are applied separately to each allocable block of stock. For allocating proceeds to more than one class of stock, see Rev. Rul. 79-10.
4863 *Schmidt v. Commissioner*, 55 T.C. 335, 340 (1970), citing *Dresser v. United States*, 55 F.2d 499, 511-512 (Ct. Cl. 1932), *certiorari denied* 287 U.S. 635 (1932); *Turner Construction Co. v. United States*, 364 F.2d 525 (2nd Cir. 1966); and Rev. Rul. 68-348.
4864 Rev. Rul. 69-334.
4865 *Schmidt v. Commissioner*, 55 T.C. 335, 340-341 (1970), citing *Dresser v. United States,* 55 F.2d 499, 512 (Ct. Cl. 1932), *certiorari denied* 287 U.S. 635 (1932)*; Industrial Rayon Corp. v. Commissioner*,

reasonably certain in fact and ascertainable in amount as to justify their deductions before they were absolutely realized."[4866]

Suppose a corporation transfers assets to a trust for the benefit of the shareholders to take of post-liquidation winding-up issues, such as contingent liabilities. In such a case, the shareholders are considered the "owners" of the trust under the grantor trust rules.[4867] If in a subsequent year, the shareholders or the trust discharge a contingent liability of the corporation, such discharge will give rise to a capital loss in the year of discharge.[4868]

One might decide that the above constitutes substantial authority for taking the following position:

1. When shareholders liquidate a corporate at a loss and some of the liquidating proceeds are escrowed to cover contingent liabilities, the loss is recognized at the time the proceeds are escrowed based on the amount of the escrow.

2. Any payments from the escrow for contingent liabilities are recognized as capital losses when paid. Any amounts escrowed for known liabilities would constitute liabilities assumed, reducing the net sale proceeds and causing or increasing the loss.

It has been suggested to me that the IRS might take a rigid position that losses are not allowed until all contingencies are finally resolved and that the above position is stronger when a liquidating trust is used rather than an escrow account. However, the language quoted in the analysis persuades me enough to take the deduction as described above.

II.Q.7.a.viii. Code § 318 Family Attribution under Subchapter C

Code § 318(a), "General rule," provides that, for purposes of those provisions of Subchapter C ("Corporate Distributions and Adjustments," which is Code §§ 301-386) to which the rules contained in Code § 318 are expressly made applicable:

---

94 F.2d 383 (6th Cir. 1938); *Gowen v. Commissioner,* 65 F.2d 923 (6th Cir. 1933), *affirming* 24 B.T.A. 1028, *certiorari denied* 290 U.S. 687 (1933); *Weintraub v. United States,* 26 A.F.T.R. 1183 (E.D. Pa. 1939).

[4866] *Schmidt v. Commissioner*, 55 T.C. 335, 341 (1970), citing *Lucas v. American Code Co.*, 280 U.S. 445 (1930); *Commissioner v. Winthrop*, 98 F.2d 74 (2nd Cir. 1938), *affirming* 36 B.T.A. 314 (1937), *acq.* 1940-1 C.B. 5. Further discussing *Winthrop*, *Schmidt* stated:

> The *Winthrop* case was held to be controlling in *Palmer v. United States*, an unreported case (D. Conn. 1958, 1 A.F.T.R. 2d 863, 58-1 U.S.T.C. par. 9288). In that case, a corporation contracted to sell all of its assets, except cash, to another corporation and adopted a resolution to liquidate and dissolve. The purchase price was paid, 70 percent in cash and 30 percent in notes secured by a first mortgage on the property sold. The District Court held that the taxpayer sustained a loss in 1952, the year of the sale, since there was no uncertainty as to the amount of cash and the notes, secured by the mortgage, could reasonably be valued at par.

[4867] Rev. Rul. 72-137. Rev. Proc. 82-58 which specifies the conditions that must be present before the IRS will consider issuing advance rulings whether a liquidating trust is treated as such or as a business entity under Reg. § 301.7701-4, and Rev. Proc. 91-15 provides a checklist that must accompany all such requests. For rules governing liquidating trusts generally, see part II.D.4.b Liquidating Trusts. For grantor trusts generally, see part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.

[4868] Rev. Rul. 72-137.

(1) *Members of family*.

(A) *In general*. An individual shall be considered as owning the stock owned, directly or indirectly, by or for—

(i) his spouse (other than a spouse who is legally separated from the individual under a decree of divorce or separate maintenance), and

(ii) his children, grandchildren, and parents.

(B) *Effect of adoption*. For purposes of subparagraph (A)(ii), a legally adopted child of an individual shall be treated as a child of such individual by blood.

(2) *Attribution from partnerships, estates, trusts, and corporations*.

(A) *From partnerships and estates*. Stock owned, directly or indirectly, by or for a partnership or estate shall be considered as owned proportionately by its partners or beneficiaries.

(B) *From trusts*.

(i) Stock owned, directly or indirectly, by or for a trust (other than an employees' trust described in section 401(a) which is exempt from tax under section 501(a)) shall be considered as owned by its beneficiaries in proportion to the actuarial interest of such beneficiaries in such trust.

(ii) Stock owned, directly or indirectly, by or for any portion of a trust of which a person is considered the owner under subpart E of part I of subchapter J (relating to grantors and others treated as substantial owners) shall be considered as owned by such person.

(C) *From corporations*. If 50 percent or more in value of the stock in a corporation is owned, directly or indirectly, by or for any person, such person shall be considered as owning the stock owned, directly or indirectly, by or for such corporation, in that proportion which the value of the stock which such person so owns bears to the value of all the stock in such corporation.

(3) *Attribution to partnerships, estates, trusts, and corporations*.

(A) *To partnerships and estates*. Stock owned, directly or indirectly, by or for a partner or a beneficiary of an estate shall be considered as owned by the partnership or estate.

(B) *To trusts*.

(i) Stock owned directly or indirectly, by or for a beneficiary of a trust (other than an employees' trust described in section 401(a) which is exempt from tax under section 501(a)) shall be considered as owned by the trust, unless such beneficiary's interest in the trust is a remote contingent interest. For purposes of this clause, a contingent interest of a beneficiary in a trust shall be considered remote if, under the maximum exercise of discretion by the trustee in favor of such beneficiary, the value of such interest, computed actuarially, is 5 percent or less of the value of the trust property.

(ii) Stock owned, directly or indirectly, by or for a person who is considered the owner of any portion of a trust under subpart E of part I of subchapter J (relating to grantors and others treated as substantial owners) shall be considered as owned by the trust.

(C) *To corporations*. If 50 percent or more in value of the stock in a corporation is owned, directly or indirectly, by or for any person, such corporation shall be considered as owning the stock owned, directly or indirectly, by or for such person.

(4) *Options*. If any person has an option to acquire stock, such stock shall be considered as owned by such person. For purposes of this paragraph, an option to acquire such an option, and each one of a series of such options, shall be considered as an option to acquire such stock.

(5) *Operating rules*.

(A) *In general*. Except as provided in subparagraphs (B)and (C), stock constructively owned by a person by reason of the application of paragraph (1), (2), (3), or (4), shall, for purposes of applying paragraphs (1), (2), (3), and (4), be considered as actually owned by such person.

(B) *Members of family*. Stock constructively owned by an individual by reason of the application of paragraph (1) shall not be considered as owned by him for purposes of again applying paragraph (1) in order to make another the constructive owner of such stock.

(C) *Partnerships, estates, trusts, and corporations*. Stock constructively owned by a partnership, estate, trust, or corporation by reason of the application of paragraph (3) shall not be considered as owned by it for purposes of applying paragraph (2) in order to make another the constructive owner of such stock.

(D) *Option rule in lieu of family rule*. For purposes of this paragraph, if stock may be considered as owned by an individual under paragraph (1) or (4), it shall be considered as owned by him under paragraph (4).

(E) *S Corporation treated as partnership*. For purposes of this subsection —

(i) an S corporation shall be treated as a partnership, and

(ii) any shareholder of the S corporation shall be treated as a partner of such partnership.

The preceding sentence shall not apply for purposes of determining whether stock in the S corporation is constructively owned by any person.

Code § 318(b) refers to provisions applying Code § 318.

See Harris & Kessler, "Constructive Ownership under Section 318," *Business Entities* (WG&L), Mar/Apr 2016.

Note that Code § 318(a)(2)(B)(ii) expressly recognizes the deemed owner of the trust under the grantor trust rules as an owner of the trust's stock.[4869] Letter Rulings have applied this provision for purposes of avoiding a deemed transfer that might have limited net operating losses under Code § 382,[4870] for purposes of determining whether a redemption constituted a dividend instead of a sale under Code § 302,[4871] or certain tests relating to a real estate investment trust (REIT) under Code § 856.[4872]

II.Q.7.b. Redemptions or Distributions Involving S Corporations

II.Q.7.b.i. Redemptions or Distributions Involving S corporations - Generally

An S corporation shareholder's taxation depends on whether the corporation has any accumulated earnings and profits ("E&P") from any part of its prior existence as a C corporation.[4873]

When reviewing this part II.Q.7.b.i, see parts:

- II.Q.7.b.i.(a) IRS View of Estimating Accumulated Earnings & Profits, and
- II.Q.7.b.i.(b) IRS View of Taxing Distributions When S Corporation Has Accumulated Earnings & Profits.

Code § 1368(a), "General rule," provides:

> A distribution of property made by an S corporation with respect to its stock to which (but for this subsection) section 301(c) would apply shall be treated in the manner provided in subsection (b) or (c), whichever applies.

Code § 1368(b), "S corporation having no earnings and profits, provides:

> In the case of a distribution described in subsection (a) by an S corporation which has no accumulated earnings and profits -
>
> (1) *Amount applied against basis*. The distribution shall not be included in gross income to the extent that it does not exceed the adjusted basis of the stock.

[4869] See part III.B.2.d.i.(a) General Concepts of the Effect of Irrevocable Grantor Trust Treatment on Federal Income Taxation; fn 6529.
[4870] Letter Ruling 199918051.
[4871] Code § 302 is described in part II.Q.7.a.iii Redemption Taxed Either as Sale of Stock or Distribution; Which Is Better When. Code § 318 is applied in Letter Rulings 9035038, 9224036, 9810020, 201328025, and 201805011.
[4872] Letter Ruling 200132008.
[4873] For how E&P affects taxation of distributions from a C corporation, see fn 4821 in part II.Q.7.a.iv Dividends; Avoiding Dividend Treatment Using Redemptions under Code §§ 302 and 303.

(2) *Amount in excess of basis*. If the amount of the distribution exceeds the adjusted basis of the stock, such excess shall be treated as gain from the sale or exchange of property.

Code § 1368(c), "S corporation having earnings and profits, provides:

> In the case of a distribution described in subsection (a) by an S corporation which has accumulated earnings and profits -
>
> (1) *Accumulated adjustments account*. That portion of the distribution which does not exceed the accumulated adjustments account shall be treated in the manner provided by subsection (b).
>
> (2) *Dividend*. That portion of the distribution which remains after the application of paragraph (1) shall be treated as a dividend to the extent it does not exceed the accumulated earnings and profits of the S corporation.
>
> (3) *Treatment of remainder*. Any portion of the distribution remaining after the application of paragraph (2) of this subsection shall be treated in the manner provided by subsection (b).
>
> Except to the extent provided in regulations, if the distributions during the taxable year exceed the amount in the accumulated adjustments account at the close of the taxable year, for purposes of this subsection , the balance of such account shall be allocated among such distributions in proportion to their respective sizes.

Thus, if the corporation has an S election in place, then taxation as a distribution generally is favorable, in that distributions generally reduce basis,[4874] without any part of the distribution being treated as profit on the sale of stock.[4875] Redemptions might very well be taxed as distributions,[4876] so long as they are not partial liquidations.[4877] This can help when a corporation wants to make a distribution to a QSST without the QSST having to pay the beneficiary.[4878]

The accumulated adjustments account (AAA) is an account of the S corporation and is not apportioned among shareholders.[4879] AAA is increased for the taxable year of the corporation by the sum of the following items with respect to the corporation for the taxable year:[4880]

[4874] Note, however, that distributions from a Qualified Subchapter S Subsidiary to its parent are ignored. See Reg. § 1.1361-4(a)(1)(ii), the principles of which were adopted in Reg. § 1.1361-5(a)(4), Example (4).
[4875] See Rev. Rul. 95-14. However, life insurance and other nontaxable income will increase stock basis but will not increase the accumulated adjustments account (AAA). Code § 1368(e)(1). Similarly, premiums paid on life insurance owned by the S corporation do not reduce AAA. Rev. Rul. 2008-42. If the S corporation has prior C corporation earnings and profits, then a distribution in excess of AAA will constitute a taxable dividend rather than merely being applied against the basis acquired by that life insurance or other nontaxable income. Code §§ 1368(c)(2), 301(c).
[4876] See part II.Q.7.a.iv Dividends; Avoiding Dividend Treatment Using Redemptions under Code §§ 302 and 303.
[4877] See fns. 4829-4830 and accompanying text.
[4878] See part III.A.3.e.i.(a) QSSTs Generally.
[4879] Reg. § 1.1368-2(a)(1).
[4880] Reg. § 1.1368-2(a)(2).

(i) The items of income described in section 1366(a)(1)(A) other than income that is exempt from tax;

(ii) Any nonseparately computed income determined under section 1366(a)(1)(B); and

(iii) The excess of the deductions for depletion over the basis of property subject to depletion unless the property is an oil or gas property the basis of which has been allocated to shareholders under section 613A(c)(11).

AAA is decreased for the taxable year of the corporation by the sum of the following items with respect to the corporation for the taxable year:[4881]

(A) The items of loss or deduction described in section 1366(a)(1)(A);

(B) Any nonseparately computed loss determined under section 1366(a)(1)(B);

(C) Any expense of the corporation not deductible in computing its taxable income and not properly chargeable to a capital account, other than -

(1) Federal taxes attributable to any taxable year in which the corporation was a C corporation; and

(2) Expenses related to income that is exempt from tax; and

(D) The sum of the shareholders' deductions for depletion for any oil or gas property held by the corporation described in section 1367(a)(2)(E).

The above reductions may decrease AAA below zero.[4882] Distributions under Code § 1368(b) or (c)(1) reduce AAA, but not below zero.[4883]

In corporations with accumulated C corporation earnings and profits, consider electing to treat the distribution first as a dividend coming from C corporation earnings and profits (E&P),[4884] if the taxation is comparable, to try to cleanse the S corporation of the E&P taint.[4885]

[4881] Reg. § 1.1368-2(a)(3)(i).

[4882] Reg. § 1.1368-2(a)(3)(ii), which further provides:

> The AAA is decreased by noncapital, nondeductible expenses under paragraph (a)(3)(i)(C) of this section even though a portion of the noncapital, nondeductible expenses is not taken into account by a shareholder under § 1.1367-1(g) (relating to the elective ordering rule). The AAA is also decreased by the entire amount of any loss or deduction even though a portion of the loss or deduction is not taken into account by a shareholder under section 1366(d)(1) or is otherwise not currently deductible under the Internal Revenue Code. However, in any subsequent taxable year in which the loss, deduction, or noncapital, nondeductible expense is treated as incurred by the corporation with respect to the shareholder under section 1366(d)(2) or § 1.1367-1(g) (or in which the loss or deduction is otherwise allowed to the shareholder), no further adjustment is made to the AAA.

[4883] Reg. § 1.1368-2(a)(3)(iii).

[4884] Code § 1368(e)(3). See part II.P.3.b Conversion from C Corporation to S Corporation, for special considerations involving S corporations that used to be C corporations.

[4885] In addition to E&P causing taxation of distributions, E&P can generate a tax or even terminate the S election if the corporation has too much "passive" income. See part II.P.3.b.iii Excess Passive Investment Income.

In *Sarvak v. Commissioner*, T.C. Memo. 2018-68, a taxpayer who received an excess distribution argued that applicable state law required him to return the distribution, converting the excess distribution into a debt he owed the corporation.[4886] The court rejected his argument. Certainly a properly advised taxpayer could borrow using a bona fide loan, and I consider this case a warning that taxpayers who skirt near the edge on distributions have appropriate documentation to support any borrowing they purport to have made.

See also part II.Q.7.a.vii Corporate Liquidation. Any activity for the year that affects basis is applied in determining the basis of the liquidated stock.[4887]

For the termination of the S election wiping out AAA, see part II.P.3.b.v Conversion from S Corporation to C Corporation then Back to S Corporation.

For the effect of a transfer on the allocation of income reported on the involved shareholders' K-1s, see part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation, within part III.B.2.j Tax Allocations upon Change of Interest.

II.Q.7.b.i.(a). IRS View of Estimating Accumulated Earnings & Profits

This part II.Q.7.b.i.(a) describes the view set forth in the IRS' LB&I Concept Unit, "General Overview of Distributions and Accumulated Earnings & Profits," Document Control Number (DCN) SCO-C-009 (6/18/2020), which is referred to in this part as "the resource."

The resource explains generally how to estimate accumulated earnings & profits (AE&P):

> Neither the Code nor the Treasury regulations define earnings and profits (E&P) but for purposes of this practice unit, E&P and AE&P are synonymous.
>
> AE&P starts with taxable income. It is increased or decreased by the items described in IRC 312 and the regulations (money, principal amount of corporate debt, and the adjusted basis of other property distributed by the corporation). Generally, there is little difference between the AE&P of a C corporation and the accumulated retained earnings of that C corporation. As a result, a C corporation's retained earnings are sometimes used as an estimate of its AE&P….
>
> Before continuing the analysis, determine whether the tax return is reliable by reconciling the corporation's balance sheet and Schedule M-2. Complete both worksheets in the "Reconciliation" Excel workbook.
>
> The workbook should be prepared for the year under examination. But since the taxability of Adjustments Account, Shareholders' distributions is cumulative over the life of the S corporation, the examiner may want to prepare the worksheet for multiple years. If there is a difference between the balance sheet and Schedule M-2, ask the taxpayer to explain. Generally, there are three possible explanations:
>
> - The numbers on the balance sheet are incorrect and cannot be relied upon.

[4886] His argument was a bit more confused and convoluted than that, but that ultimately was the essence.
[4887] Letter Ruling 200106009.

- An entry was made directly to "Retained Earnings" thereby skipping the income statement and tax return. Examine all such entries to determine if taxable income is under-reported.

- The distribution sections of the Schedule K and Schedule M-2 are incomplete or incorrect.

- The above analysis of the reconciliation workbook should detect if Schedule K and Schedule M-2 are incorrect. If no entries were made directly to the retained earnings other than actual distributions, then this analysis yields the distribution amount. Always reconcile any differences.

The resource mentions IRM 4.10.3.9.4.23 as helpful in implementing the above. Then it explains how to discern AE&P from 2018 Form 1120S:

> There are several ways to determine if an S corporation has AE&P. An S corporation reports dividend distributions on Form 1120S, Schedule K, line 17c and non-dividend distributions on Form 1120S, Schedule K, line 16d. If the S corporation reports a dividend distribution on line 17c or on Schedule M-2, column (c), then it's reporting it has AE&P….
>
> Per the Instructions for Form 1120S, the taxpayer may estimate the AE&P amount based on retained earnings of the last year of the C corporation. If an amount is on Schedule M-2, line 1(c), ask how the amount was determined and request documentation to support the computation.
>
> **DECISION POINT**: If there is a dividend distribution reported on Form 1120S, Schedule K, line 17c, or AE&P amount reported on Form 1120S, Schedule M-2, then the S corporation has AE&P. Use this Practice Unit to calculate the AE&P. Next, use the Distributions with AE&P Practice Unit to calculate how much of the distribution is a dividend.
>
> **CAUTION**: If Form 1120S, Schedule M-2 is blank, don't automatically assume the S corporation does not have AE&P. S corporations sometimes fail to report AE&P on the return.
>
> If the return does not report a dividend distribution or AE&P on Schedule M-2, then gather additional facts to determine if AE&P exists. Since an S corporation does not accumulate AE&P once it becomes an S corporation, determine how such AE&P was acquired.
>
> An S corporation can accumulate or acquire AE&P in the following situations:
>
> 1. The S corporation has AE&P from years before the S election was made and it reported in those prior years as a C corporation.
>
> 2. The S corporation merges with a C corporation that has AE&P and the S corporation is the surviving corporation.

3. A wholly owned C corporation that has AE&P liquidates tax-free into the S corporation. The most common scenario is when an S corporation makes a QSub election for its wholly owned C corporation.

The resource then explains how to identify if one of these situations caused the S corporation to accumulate or acquire AE&P:

> <u>The S Corporation Has AE&P from Years When It Reported as a C Corporation</u>
>
> Look at page 1 of the Form 1120S. If the S corporation effective date (Box A) is later than the incorporation date (Box E), the S corporation may have AE&P from when it reported as a C corporation. However, the C corporation could have operated at a loss, resulting in no net AE&P.
>
> <u>The S Corporation Merges With a C corporation That Has AE&P and the S Corporation Is the Surviving Corporation</u>
>
> A tax-free merger of a C corporation into an S corporation results in the AE&P of the C corporation being carried over to the surviving S corporation. The balance sheet of the C corporation is added to the balance sheet of the S corporation ….
>
> The S Corporation Merges With a C corporation That Has AE&P and the S Corporation Is the Surviving Corporation In a tax-free merger, the S election date reported on Form 1120S, Page 1, Box A is the same as the date incorporated reported on Form 1120S, Page 1, Box E. Changes in commonly controlled entities on yK1 from year to year can also be used to identify merged entities. If there are indications that a merger took place, interview an officer or shareholder with knowledge of the company's history, capital structure, and operations to identify such merger transactions.
>
> <u>A wholly Owned C Corporation That Has AE&P Liquidates Tax-free into the S Corporation</u>
>
> A common scenario of a tax-free liquidation is when an S corporation makes a qualified subchapter S (QSub) election for its wholly owned C corporation. If a valid QSub election is filed for the C corporation, then the C corporation is deemed to liquidate into the S corporation and treated as its division at the close of the day before the QSub election is effective. The liquidation of a corporation into the parent is generally a tax-free liquidation where the S corporation takes a carryover basis in the QSub's assets.
>
> A significant difference between the retained earnings and the Accumulated Adjustment Account (AAA) is an indication of AE&P. Interview an officer or shareholder with knowledge of the company's history, capital structure, and operations to identify such liquidation transactions. Consider requesting IDRS information to identify QSub elections. yK1 can also be used to identify Qsubs. The S election and date incorporated may be the same.

The resource mentions IRM 4.10.3 as helpful for the above. Then it continues:

> **DECISION POINT**: Determine the amount of AE&P if at least one of the three events exists:

- The S corporation has AE&P from previous C corporation years,
- The S corporation merged with a C corporation with AE&P, or
- A C corporation with AE&P liquidates tax-free into the S corporation.

If not, then you should analyze distributions without AE&P. See the Taxability of Distributions Not From Accumulated Earnings & Profits Practice Unit for more information.

CAUTION: If there are no identifiable corporate events in which AE&P may have been accumulated or acquired, but there is a significant unexplained difference in beginning retained earnings and beginning AAA, request that the taxpayer reconcile the two amounts, as there may be another issue.

Determining the Amount of AE&P

There are simple ways to estimate an S corporation's amount of AE&P:

1. Use the amount reported on Form 1120S, Schedule B, line 9.
2. Obtain a copy of the entity's last C corporation return, just before it made its S election, and use the amount reported as retained earnings.
3. Using Form 1120S, take the difference between Beginning Retained Earnings (Schedule L, line 24b) less Beginning AAA (Schedule M-2, line 1a) less Beginning OAA (Schedule M2, line 1d) (RE>AAA+OAA)

Once the estimated amount of AE&P is determined, adjust as discussed below.

CAUTION: The return available closest in time to the AE&P acquisition event identified should be used for the most accurate estimate of AE&P.

CONSULTATION: If none of the above estimates are viable, then you should contact the Corporate Distributions & Adjustments Practice Network for guidance on the actual computation of AE&P.

Adjustments to AE&P – General Rule

When a C corporation elects S status, AE&P is frozen at the start of the first S corporation year and can only be reduced by the following:

- Distributions treated as dividends;
- Payment of tax by the S corporation for the recapture of investment tax credits claimed during a C corporation year (rare); or
- Certain redemptions, liquidations, reorganizations, and divisions.

If a C corporation is audited after it converts to an S corporation, and additional taxable income is determined, the additional taxable income will increase the corporation's

AE&P while the payment of the tax will decrease the AE&P. Any resulting tax paid during an S corporation year will not affect AAA.

The resource mentions Code §§ 1371 and 1379(c) as helpful for the above. Then it continues:

Adjustments to AE&P – Unreported Dividends

AE&P is reduced by reported dividend distributions but is not reduced by unreported dividend distributions. The S corporation has the burden to establish that the dividend amount was reported by the shareholders before AE&P is reduced. The duty of consistency precludes an S corporation from changing the character of distributions reported in closed statute years from non-dividend to dividend. Such a change would improperly reduce AE&P by reported non-dividend distributions.

The resource mentions Code § 1371(c)(1), *Welch v. Helvering*, 290 U.S. 111 (1933), and 15 *Mertens Law of Fed. Income Tax'n* Section 60:5. Quasi-Estoppel or Duty of Consistency, as helpful for the above. Then it continues:

Adjustments to AE&P – Percentage of Completion Method of Accounting

A C corporation's AE&P is frozen as of the date of the S election, even if the C corporation's AE&P was estimated under the percentage of completion method. Any adjustments made to this estimate after the S election is in place will apply to the AAA rather than the AE&P. The courts strictly interpreted IRC 1371(c)(1); that is, no adjustment shall be made to the AE&P of an S corporation, except for certain items noted in the Code.

The resource mentions Code §§ 1371(c)(1) and 312(h), (n)(7) as helpful for the above. Then it continues:

Adjustments to AE&P – Not Affected by Reversal of Timing Differences Subsequent to S Election

AE&P is not adjusted for the reversal of timing differences that occur between C corporation years and S corporation years.

Adjustments to AE&P - Corporate Transactions

AE&P is adjusted up or down based upon various corporate transactions such as certain redemptions, liquidations, reorganizations, divisions, etc. The rules of subchapter C are applied.

When a redemption is treated as a sale or exchange, the corporation's AAA and AE&P are reduced in proportion to the stock redeemed. However, when the redemption is treated as a distribution, the AAA and AE&P are computed in the same way as any other distribution from an S corporation and it does not reduce AE&P unless it is reported as a dividend distribution.

In a complete liquidation of the S corporation, the distribution of the property is not subject to dividend treatment. In addition, all of the AE&P is reduced to zero as a result of the liquidation. Note that a partial liquidation is treated in the same manner as a redemption.

A spin-off, split-off, or split-up transaction requires the allocation of the AE&P between the entities. See Treas. Reg. 1.312-10, Treas. Reg. 1.312-11, and the Corporate Distributions & Adjustments Practice Network resources in the Corporate/Business Issues & Credits Knowledge Base for additional information.

The resource mentions Code § 1371(c)(1) and *Broadaway v. Comm'r*, 111 F.3d 593 (8th Cir 1997), *aff'g Cameron v. Comm'r*, 105 T.C. 380 (1995), as helpful for the above. After discussing shareholders' requirement to track basis, it concludes with a series of examples:

<u>Determine AE&P Using the Final C Corporation Return</u>

Example 1: The retained earnings on the final C corporation return, just before making the S election, is $400,000. Thus, the estimated AE&P for the corporation is $400,000.

Example 2: The tax return for the final year of the C corporation is not available, but the tax return for the initial year S corporation is available and it reported beginning retained earnings of $400,000. This is the estimated AE&P for the corporation.

<u>How to Determine AE&P Using the Current S Corporation Return</u>

Example 3: An S corporation that previously reported as a C corporation is under examination. The balance sheet reflects beginning retained earnings of $450,000, beginning AAA of $35,000, and beginning OAA of $0. Estimated C corporation AE&P is $415,000 [which is beginning RE of $450,000 less $35,000 combined AAA and OA].

Example 4: Same facts as Example 3, except there are accumulated net timing differences of tax in excess of book deductions of $5,000 in depreciation and $7,000 in nondeductible travel and entertainment expenses. The estimated AE&P is reduced by the $5,000 of depreciation timing differences but the permanent difference in nondeductible travel and entertainment expenses does not reduce the estimated amount of AE&P. Therefore, there is $410,000 of estimated AE&P. The nondeductible travel and entertainment expenses already reduced retained earnings (as a deductible expense for book purposes) and AAA (as a nondeductible expense for tax purposes). Consequently, it is not an adjustment to arrive at AE&P.

<u>Common Transactions Resulting in an S Corporation Acquiring AE&P Through a Merger or Liquidation</u>

Example 5: Shareholder A wholly owns an S corporation and a C corporation. The S corporation and the C corporation are neither banks nor insolvent. There are no intercompany transactions.

The balance sheet of each entity reflects the following: [chart showing that the S corporation has $3.000 of AAA and $15,000 of retained earnings, the latter also representing estimated AE&P]

Shareholder A contributes the C corporation's stock into the S corporation in an IRC 368(a)(1)(A) tax-free merger transaction. The S corporation is the surviving entity.

The tax attributes of the C corporation, including any AE&P, carry over into the S corporation. Therefore, the estimated AE&P of the C corporation is $15,000 based upon the ending retained earnings immediately before the merger transaction. The balance sheet of the S corporation immediately after the merger transaction is reflected in the combined column. Using the combined balance sheet immediately after the merger transaction, AE&P is estimated as retained earnings less the AAA balance.

Example 6: Shareholder A wholly owns an S corporation and a C corporation. The S corporation and the C corporation are neither banks nor insolvent. There are no intercompany transactions.

The shareholder contributes the C corporation stock into the S corporation in a tax-free reorganization under IRC 368(a). The S corporation then makes a QSub election under IRC 1361(b)(3)(B) for the C corporation, resulting in a deemed liquidation of the C corporation into the S corporation (Treas. Reg. 1.1361-4(a)(2)). Using the same balance sheet as Example 5, the same results occur as the AE&P of the C corporation is carried over to the S corporation upon the deemed liquidation of the C corporation when the Qsub election is effective. The AE&P is still estimated as $15,000 and AAA is still $3,000.

The main difference between Example 5 and Example 6 is the C corporation no longer exists in Example 5 while the C corporation still exists in Example 6 but as a QSub of the S corporation. A QSub is disregarded for Federal income tax purposes but is not disregarded for other taxes like payroll and certain excise taxes, or for assessment of tax incurred in taxable years when it was a separate entity.

II.Q.7.b.i.(b). IRS View of Taxing Distributions When S Corporation Has Accumulated Earnings & Profits

This part II.Q.7.b.i.(a) describes the view set forth in the IRS' LB&I Transaction Unit, "Distributions with Accumulated Earnings & Profits," Document Control Number (DCN) SCO-T-008 (6/18/2020), which is referred to in this part as "the resource." The resource explains:

A C corporation has two levels of taxation, one at the corporate level and one at the shareholder level when the corporation distributes its earnings and profits to the shareholder(s) (i.e. a dividend). The S corporation income, loss and deduction items pass through to the shareholder(s) and are taxed or deducted at the shareholder level. One advantage of an S corporation is a single level of taxation, however there are situations where an S corporation distribution is taxable to the S corporation shareholder creating a second level of tax similar to a dividend distribution for a C corporation shareholder. Distributions from an S corporation can be either in cash or property; the tax effect of which to the shareholder can be non-taxable, long-term or short-term capital gain income, or ordinary or qualified dividend income.

<u>Sourcing the Distribution - General</u>

The taxability of S corporation distributions is covered primarily by IRC 1368. The distribution must be sourced by the S corporation to determine its taxability as a dividend or non-dividend distribution.

IRC 1368(c), 1379(c) and the Instructions for Form 1120S state that a distribution made by an S corporation with AE&P is made (or sourced) from the following items (in the order listed):

1. Accumulated Adjustments Account (AAA),

2. Previously Taxed Income (PTI) under IRC 1379(c),

3. Accumulated Earnings & Profits (AE&P) (i.e. a dividend distribution),

4. Tax Exempt Income in the Other Adjustments Account (OAA),

5. Non-taxable up to the shareholder's stock basis (i.e. a return of capital),

6. Any distributions in excess of the shareholder's stock basis will be taxed as a capital gain (i.e. a deemed sale of stock with no basis).

IRC 1368(c)(3) provides that any portion of a distribution remaining after the application of item 3 is treated consistently with IRC 1368(b), which states that all distributions made by an S corporation that do not have any AE&P will be:

1. Non-taxable up to the shareholder's stock basis (i.e. a return of capital), and

2. Any distributions in excess of the shareholder's stock basis will be taxed as a capital gain (i.e. a deemed sale of stock with no basis).

<u>Sourcing the Distribution - Elections to Change the Sourcing from AAA, PTI, AE&P, OAA</u>

An S corporation can make one or more of four possible elections, with the consent of all affected shareholders, to change the distribution source as described in Treas. Reg. 1.1368-1. The S corporation can elect to:

- Distribute AE&P before AAA,

- Forego sourcing distributions from PTI,

- Create a deemed dividend distribution to the extent of AE&P followed by a deemed capital contribution for the same amount,

- Report separate tax years for purpose of the first three elections if there is a qualifying disposition.

<u>Sourcing From AAA</u>

Thus, for S corporations with AE&P, verify its AAA, as any distribution in excess of AAA may be taxed as a dividend. AAA first came into existence for taxable years beginning after 1982. It represents the cumulative total of pass-through items generated by the S corporation, which have been taxed to the shareholders, and that remain undistributed by the S corporation. The AAA is a corporate account and does not belong to any particular shareholder. Thus, when an S corporation shareholder sells their stock, the AAA is unaffected. Unlike stock basis, the AAA can have a negative balance. The negative balance can be created by the pass through of loss and deduction items. Treas. Reg. 1.1368-2(a)(3)(ii). Distributions sourced from AAA are reported as non-dividend distributions by the S corporation to the shareholder. Keep in mind that non-dividend distributions can still be taxable to the shareholder as a capital gain to the extent the non-dividend distribution exceeds shareholder stock basis.

Sourcing from PTI

If the distribution is not sourced from AAA it can still be treated as a non-dividend distribution if the distribution is sourced from the PTI account. S corporation income, losses and deductions from before 1983 are recorded in PTI accounts. Any amount in these accounts apply to specific shareholders and can't be transferred to another shareholder. It is rare for an S corporation to have PTI since the election must have been made before 1983 and the current shareholder must have continuously owned S corporation stock from prior to 1983.

Sourcing from AE&P

If the distribution is not sourced from AAA or PTI, then the distribution is a dividend to the extent of AE&P. AE&P is generally the cumulative C corporation taxable income that is increased or decreased by the items described in IRC 312 and the Regulations. Generally, there is little difference between the AE&P of a C corporation and the accumulated retained earnings of that C corporation.

Sourcing from OAA

As discussed later in this Practice Unit, the AAA computation does not include tax-exempt income and the expenses related to the tax-exempt income. Tax-exempt items of income and expense are recorded in the OAA. All distributions after the AE&P is exhausted are non-dividend distributions. Therefore, the only purpose of the OAA account is to help the S corporation determine the source of the distribution that is not from S corporation taxable earnings (AAA or PTI), or C corporation taxable earnings (AE&P).

S Corporation Reporting

Once the S corporation has properly sourced the dividend distributions from AE&P and exhausted its AE&P, all other distributions are non-dividend distributions regardless of their source. Dividend and non-dividend distributions are reported separately. The S corporation reports all dividends on Form 1120S, Schedule K, line 17c and issues a Form 1099-DIV to the shareholders to report their individual dividends. Non-dividend distributions are reported on Form 1120S, Schedule K, line 16d, and on Schedule K-1, line 16d to the shareholders.

If the non-dividend distribution exceeds the shareholder's stock basis, the non-dividend distribution may still be taxable to the shareholders as a long-term or short-term capital gain. Please see the Taxability of Distributions Not From Accumulated Earnings and Profits Practice Unit for additional information on the taxability of non-dividend distributions.

CAUTION: If the distribution is part of a stock redemption transaction or a complete liquidation of the S corporation, the distribution might not be reportable as a dividend distribution even though it otherwise would be a dividend distribution according to the sourcing rules above. Please see the Taxability of Distributions Not From Accumulated Earnings and Profits Practice Unit for additional information on stock redemption transactions and complete liquidations of the S corporation.

AAA Ordering Rules – Regular Ordering

Since both losses and distributions are used in the computation of the AAA, it is important to understand the ordering rules of items that adjust the AAA. The ordering rules for the AAA are not the same as the ordering rules for stock basis. Distributions are applied to stock basis after current period income items but before non-deductibles and current period losses and deductions. This will result in more tax-free distributions, along with more deferred S corporation losses due to a lack of stock basis.

Per Treas. Reg. 1.1368-2(a)(5), the AAA ordering rules are:

1. Increased for income items and excess depletion;

2. Decreased for non-deductible, non-capital expenses and depletion;

3. Decreased for items of loss and deduction; and

4. Decreased for non-dividend distributions without making AAA negative.

Any distribution in excess of AAA is sourced from the next category of PTI, AE&P, then OAA as described in IRC 1368(c). The Sch. M2 row items follow the AAA ordering rules.

[picture of Form 1120S, Schedule M-2]

AAA Ordering Rules – Net Negative Adjustment Ordering

The AAA ordering rules are modified if the S corporation has a "net negative adjustment." IRC 1368(e)(1)(C). A "net negative adjustment" occurs when the S corporation's current year income items less the loss, deduction and non-deductible expenses (includable in the AAA computation) results in a negative number. The "net negative adjustment" rule allows distributions to be taken from beginning AAA, if the S corporation has a net loss for the year. Under the Small Business Job Protection Act of 1996, for tax years starting after December 31, 1996 when the S corporation has a net negative adjustment then per IRC 1368(e)(1)(C), the net negative adjustment AAA ordering rules are:

1. Decreased for non-dividend distributions to the extent of be

2. Increased for income items and excess depletion;

3. Decreased for non-deductible, non-capital expenses and depletion; and

4. Decreased for items of loss and deduction.

CAUTION: The distributions sourced from the beginning AAA will cause the AAA balance to become more negative. Any distributions in excess of the beginning AAA balance will not be sourced from AAA. The line items on Sch. M-2 do not follow the net negative adjustment AAA ordering rules; thus, the examiner needs to remember the above ordering rules when a net negative adjustment exists.

The resource then describes how to examine a distribution, setting forth the following facts:

- S corporation makes a distribution to the shareholder.
- S corporation has AE&P.
  - − Form 1120S, Schedule M-2, line 1(c)
- The S corporation should reflect the distribution on:
  - − Schedule K, line 16d (non-dividend) or 17c (dividend),
  - − Schedule K-1, Box 16, Code D (non-dividend),
  - − Schedule M-2, line 7 and
  - − Schedule L, Balance Sheet, as a reduction of Retained Earnings, line 24.
- If any amount of the distribution is a dividend, the S corporation should issue the shareholder a Form 1099-DIV for the dividend amount.

CAUTION: An S corporation may not properly report its amount of AE&P on Form 1120S, Schedule M-2, line 1(c). Even if reported, the amount of AE&P is allowed to be an estimate.

The resource then instructs, "Gather all the necessary facts to determine the correct amount of AE&P and AAA in order to properly compute the amount of dividend versus non-dividend distributions," describing the following fact elements:

- Use the Reconciliation Workbook to verify the reliability of the tax return information as discussed in the *General Overview of Distributions and Accumulated Earnings & Profits* Practice Unit.
- Determine the amount of AE&P at the beginning of the exam year. Use the *General Overview of Distributions and Accumulated Earnings & Profits Practice Unit* to determine the existence of AE&P and compute or estimate the amount of AE&P.
- For purpose of verifying or recomputing AAA, review the current and previous year form 1120S returns to determine the corrected items of income, loss, deduction, non-deductible expenses and distribution for the current and all prior S corporation years. Corrected items include any adjustments to income, loss, deduction or distribution items through an amended return or as adjusted through an examination.

The resource then sets forth, "**Issue 1** In general, computing the amount of taxable dividend distributions," providing the following explanations of the issue:

> S corporations must properly compute AAA, PTI, AE&P and OAA in order to accurately source and report dividend versus non-dividend distributions to shareholders. If the S corporation does not report the dividend, then in most cases the shareholder will not pick up the proper amount of income on their return. The issue is to ensure that the dividend distribution is taxed at the proper time during the corporation's life cycle.
>
> The first step is to allocate the items of income, loss and deduction between AAA and OAA. The PTI and AE&P accounts are not affected by current year income, loss or deduction items. Most income, loss or deduction items included in the computation are reported on Schedule K. Some, however, are only reported on Schedule K-1 or an attachment to Schedule K-1. These should also be included in the computation. For instance, the sale or other disposition of property for which a section 179 expense deduction was previously passed through to its shareholders is reported on Schedule K-1, Box 17, Code K and should be included in the AAA computation.
>
> This chart shows where the Schedule K items are reflected in the AAA, PTI, AE&P or OAA. Verify the AAA reported on the S corporation's Schedule M-2 is accurate. If it is not accurate, recompute AAA using the Schedules K beginning with the first S corporation year.

Schedule M-2 **Analysis of Accumulated Adjustments Account, Shareholders' Undistributed Taxable Income Previously Taxed, Accumulated Earnings and Profits, and Other Adjustments Account**
(see instructions)

	(a) Accumulated adjustments account	(b) Shareholders' undistributed taxable income previously taxed	(c) Accumulated earnings and profits	(d) Other adjustments account
1 Balance at beginning of tax year	$0 first year of S corp	Balance from pre-1983	C corp earnings	$0 first year of S corp
2 Ordinary income from page 1, line 21	Sch K line 1 (if income)			
3 Other additions	Sch K line 2-10			Sch K line 16a & 16b
4 Loss from page 1, line 21	(Sch K line 1 (if loss))			
5 Other reductions	(Sch K line 2-12d, 14l, 16c)			(related to tax exempt)
6 Combine lines 1 through 5	Subtotal	Subtotal	Subtotal	Subtotal
7 Distributions	Subtotal Sch K line 16d	Sch K line 16d	Sch K line 17c	Sch K line 16d
8 Balance at end of tax year. Subtract line 7 from 6	Total	Total	Total	Total

> Once the allocation is made to AAA and OAA, the distributions can be sourced. Distributions are sourced first from AAA to the extent of positive AAA after considering the income, loss and deduction items for the year unless the net negative adjustment rule applies or an election discussed in Issue 3 is elected.
>
> To the extent the distributions are not sourced from AAA, the distributions are next sourced from PTI unless the election discussed in Issue 3 is made. The distributions are sourced from PTI to the extent of positive PTI.
>
> To the extent not sourced from PTI, the distributions are next sourced from AE&P to the extent of positive AE&P and reported as dividend distributions to the shareholders. Any distributions not sourced from AE&P, regardless of their sourcing, are reported as nondividend distributions.

To determine the amount of distributions reportable as dividends versus non-dividends, use the Distributions with AE&P Worksheet to source them from AAA, PTI, AE&P or OAA.

Distributions from AAA to the extent of positive AAA after considering the income, loss and deduction items.

OAA

- Review current and prior year returns for statements regarding reorganizations, liquidations and corporate division transactions that will impact the AE&P, AAA or PTI amounts. If an S corporation was previously a C corporation or received assets with a carryover basis from a C corporation, an amount should be included on Form 1120S, Schedule B lines 8 and 9. Also, review the balance sheet for any significant changes to owner's equity accounts to identify these transactions. Interview a corporate officer or review the board of director's minutes to verify your conclusions.

CAUTION: When a new S corporate entity is formed and a C corporation is merged into the S corporation in a tax-free transaction, the C corporation's AE&P carries over to the S corporation. However, the S corporation's date of incorporation and S election effective date remain the same. Review the newly formed S corporation's return for significant assets or sales. This may indicate a reorganization with a preexisting entity.

- Verify if any prior dividend distributions reported by the S corporation were actually reported as dividend distributions by the shareholder(s).

Correct the S corporation's AAA, OAA, AE&P, and PTI computation. Then reduce these accounts by the distribution (per ordering rules) to determine the correct amount of dividend versus non-dividend distribution required to be reported. The S corporation's AAA, OAA, AE&P, and PTI can be corrected for improper computations from prior years. Recompute AAA, OAA, AE&P and PTI if there were any errors identified in the computations in the current or prior years.

- Common errors in the computation of AAA include failure to:

  − Use the amended or exam adjusted items of income, loss, deduction and distribution in the computation.

  − Reconcile AAA current year increases and decreases to Schedule K. These reconciliation errors may be caused by:

  - Including book-tax differences in the AAA computation.

  - Neglecting to reduce AAA by loss and deduction items.

- Source distributions from AAA, OAA, AE&P, or PTI in prior years.

- Account at the S corporation-level for the impact of any redemption, merger, acquisition, split-up or split-off transactions on the account balances.

- Include tax-exempt income or expenses in AAA.

- Consider the Net Negative Adjustment rule.

- Reduce AAA for non-deductible expenses

- Exclude from AAA disallowed losses such as from related party sales and distributions of property when the Fair Market Value (FMV) is less than the adjusted tax basis.

The resource then sets forth, "**Issue 2** More than one distribution and part of the distribution exceeds the AAA," providing the following explanations of the issue:

> When an S corporation makes multiple distributions during the year that exceed the AAA balance at the close of the tax year, then the AAA balance is allocated among the distributions in proportion to the distributions' respective sizes. Therefore, each distribution made during the year could be partially a non-dividend distribution from AAA and partially a taxable dividend distribution from AE&P. However, AE&P is not prorated among the distributions, rather each distribution to which AAA (or PTI) is not allocated is from AE&P until AE&P is exhausted.
>
> Further, the allocation of AAA among various distributions can affect the shareholder's timing of income recognition and the amount of tax owed if the:
>
> - S corporation is on a different year end from the shareholders,
> - There are stock ownership changes during the year,
> - Shareholders receive disproportionate distributions during the year, or
> - The timing of distributions to each shareholder is different and AE&P will be exhausted.
>
> For example, calendar-year shareholders of a fiscal-year S corporation may not know until the next year whether any of the current year's distributions are taxable because they are taxed on dividends in the year received. In this situation, an extension or amended return is required for the shareholder's income tax return.

The resource mentions as helpful to the above Code §§ 444, 1368, 1378 and Reg. §§ 1.301-1(b) and 1.1368-2(b), then describes various fact elements:

- Determine if there is more than one distribution during the year and to whom the different distributions were made by reviewing the S corporation's General Ledger or through an interview of a corporate officer. The timing of each distribution to the different shareholders can make a tax difference even if the distributions are proportionate. Consider verifying the information by requesting the banking information for the timing of the distributions as appropriate.

- Review the Schedules K-1 for a year over year percentage change in stock ownership. If there are distributions before and after a change in ownership then the computation of dividend versus non-dividend distributions is more complicated. Depending on how ownership changed (i.e. stock sale, stock redemption, etc.), consider consulting with a specialist.

- Compare the shareholder's percentage of the total distributions for the year to the stock ownership percentages. If the percentages don't match, there is a distribution that is disproportionate to stock ownership. [Total distributions include the sum of dividend and non-dividend distributions reported on Schedule K.]

- Review tax returns to determine if the S corporation and shareholder file using different fiscal year ends.

The resource then explains potential adjustments:

> When an S corporation makes multiple distributions during the year that exceed the AAA balance at the close of the tax year, then the AAA balance is allocated among the distributions in proportion to the distributions' respective sizes. If you have determined the dividend versus non-dividend distributions will make a tax difference based upon one of the following circumstances:
>
> - The S corporation is on a different year end from the shareholders,
>
> - There are stock ownership changes during the year,
>
> - Shareholders receive disproportionate distributions during the year, or
>
> - AE&P will be exhausted and the timing of the distributions to the shareholders is different, then recompute the dividend versus non-dividend distribution allocation among the shareholders.
>
> Note that S Corporations are required to have a single class of stock by IRC 1361(b)(1)(D). Generally, this means that each share of S Corporation has equal rights to receive distributions. If an S corporation makes distributions that are disproportionate with respect its stock, it may mean that the S Corporation has violated the single class of stock rule. Contact your local counsel if you identify such a situation.

Before going further, I want to make sure the reader does not overstate the consequences of disproportionate distributions. Although the organizational documents must provide each share with equal rights to distributions,[4888] distributions that violate that provision do not bust the S election[4889] (although they should be corrected when discovered).

[4888] See part II.A.2.i Single Class of Stock Rule.
[4889] See parts II.A.2.i.ii Temporary Timing Differences; Other Varying Differences and II.A.2.i.iii Disproportionate Distributions.

The resource then provides examples:

Example 1 – Allocating AAA and AE&P to Multiple Distributions

S corporation is owned 50-50 by shareholders A and B. The S corporation has $3,000 of beginning AAA and earns $7,000 of income. The S corporation has $60,000 of AE&P and distributes $80,000 cash to Shareholder A on 3/31 and $20,000 cash to Shareholder B on 6/30.

	Date	Distribution	AAA	Dividend	Return of Capital
Shareholder A	3/31	80,000	8,000 (1)	60,000 (3)	12,000
Shareholder B	6/30	20,000	2,000 (2)	0	18,000
		100,000	10,000	60,000	30,000

(1) 80,000/100,000 x 10,000 = 8,000

(2) 20,000/100,000 x 10,000 = 2,000

(3) There is no rule that the AE&P be allocated proportionately to the distributions, so it is allocated to the distributions issued first until exhausted.

AAA before distributions is computed as 10,000 [10,000 = 3,000 + 7,000]. The distribution is sourced $10,000 as a non-dividend distribution and $60,000 is a dividend distribution with the remaining $30,000 being a return of capital. The AAA must be allocated to the shareholders in proportion to their distributions during the year. See the discussion on the previous slide with respect to the prohibition on multiple classes of stock.

Generally, S corporations and their shareholders will use a calendar year. Therefore, the year in which the dividend distribution is reported by the S corporation and the shareholder will be the same. However, an S corporation is allowed to have a different year end if it establishes a business purpose for the fiscal year to the satisfaction of the Secretary, or if the corporation elects a corporate year covered by IRC 444. The permitted year-ends for an IRC 444 election are September 30, October 31, or November 30.

Whenever an S corporation and any shareholder have different year ends, determine the timing of the distributions. The year in which the dividend distribution takes place for the shareholder will determine the year in which it is includable in the shareholder's taxable income. This is correct even if the S corporation is unable to determine if the distribution is taxable as a dividend until the end of the S corporation's year.

Adjust the shareholder's return for the proper year of dividend reporting. Note that the shareholder may have to file an amended return to report the dividend distribution.

CAUTION: This Practice Unit does not address the impact on the allocation of dividend versus non-dividend distributions if there is a stock sale or stock redemption transaction during the year. Please contact the S Corporations & Cooperatives Practice Network if there are dividend and non-dividend distributions in the same year as a stock redemption transaction.

Example 2 – Fiscal Year Distributions Exceeding AAA

S corporation's fiscal year ends October 31st. The shareholder is on a calendar year end of December 31st. For FY2 S corporation made the following distributions:

Date	Distribution
11-01-CY1	50,000
01-30-CY2	45,000
05-01-CY2	55,000
	$150,000

At the end of FY2, the corporation showed the following:

AAA at 10-31-FY2 Before Distributions	100,000
AE&P	20,000
Initial Stock Investment	250,000

Since the FY2 distributions exceeded the fiscal year-end AAA, AAA needs to be allocated based on the respective sizes of the distributions. The AAA is allocated as follows:

Date	Distribution	AAA		Dividend		Return of Capital
11-01-CY1	50,000	33,333	(1)	16,667	(3)	0
01-30-CY2	45,000	30,000	(2)	3,333		11,667
05-01-CY2	55,000	36,667		0		18,333
	150,000	100,000		20,000		30,000

(1) 50,000/150,000 x 100,000 = 33,333
(2) 45,000/150,000 x 100,000 = 30,000
(3) There is no rule that the AE&P be allocated proportionately to the distribution, so it is allocated to the distributions issued first until it is exhausted.

The shareholders would have to report $16,667 and $3,333 of dividend income in CY1 and CY2, respectively.

It should be noted that the shareholders will not know the amount of their CY1 dividend income until after FY2 closes when the S corporation's books are closed and the FY2 income tax return is completed. This would require the shareholders to estimate their FY1 dividend income when they file their CY1 return. They would then have to amend the CY1 return when the final figures are determined.

The resource then sets forth, "**Issue 3** Elections effecting distributions," providing the following explanations of the issue:

> The general sourcing rule is AAA, PTI, AE&P then OAA. However, an S corporation is allowed to make certain elections that will impact the general sourcing rule with the consent of all affected shareholders. The four elections are:
>
> - Election 1: Distribute AE&P Before AAA
> - Election 2: Forego PTI
> - Election 3: Deemed Dividend
> - Election 4: Separate Tax Years
>
> More than one election can be made in a given year. Each election is irrevocable once made and is effective only for the tax year of the election. There is no limit on the number of times an election can be made.

The resource cites in support of the above Reg. §§ 1.1368-1(f)(2), 1.1368-1(f)(4), 1.1368-1(f)(3), 1.1368-1(g), 1.1368-1(f)(5)(iv), and 1.1368-1(g)(2)(iii), then continues:

> <u>Election 1: Distribute AE&P Before AAA</u>
>
> An S corporation can elect to change the distribution sourcing rules to source distributions from AE&P before AAA. The election applies to all distributions for the year. The election does not provide that AE&P is distributed before PTI; therefore, the new sourcing of the distribution order is PTI, AE&P, AAA then OAA.

The resource cites in support of the above Code § 1368(e)(3) and Reg. § 1.1368-1(f)(2), then continues:

> <u>Election 2: Forego PTI</u>
>
> An S corporation can elect to forgo considering distributions from PTI. This is not the same as Election 1 where it is changing the ordering rules but rather the taxpayer does not consider PTI as a part of the computation. The election applies to all distributions for the year. This election by itself does not provide that AE&P is distributed before AAA; therefore, the ordering with the election is AAA, AE&P, OAA.

The resource cites in support of the above Reg. § 1.1368-1(f)(4), then continues:

> <u>Election 3: Deemed Dividend</u>
>
> An S corporation that lacks the assets to make a distribution can make an election to deem a dividend distribution followed by a corresponding deemed capital contribution. The deemed dividend distribution amount is limited to the amount of AE&P after considering any actual distributions from AE&P. The deemed dividend distribution is allocated pro-rata to the shareholders according to their stock ownership.

The resource cites in support of the above Reg. § 1.1368-1(f)(3), then continues:

> Election 4: Separate Tax Years
>
> The S corporation can elect to have two separate tax years for purposes of making Elections 1-3 if there is a qualifying disposition during the year. Qualifying dispositions include (i) certain dispositions of 20% or more of the stock by a shareholder, (ii) certain redemption transactions and (iii) certain new stock issuances. Qualifying dispositions do not include a complete termination of the shareholder's interest in which case an election under IRC 1377(a)(2) and Treas. Reg. 1.1377-1(b) must be made. The election requires separate taxable years for purposes of allocating items of income and loss, making adjustments to AAA, earnings and profits, and basis.

The resource cites in support of the above Code § 1377(a)(2) and Reg. §§ 1.1377-1(b) and 1.1368-1(g)(ii), then continues:

> Who Must Consent to Each Election
>
> An S corporation makes an election for a taxable year by attaching a statement to a timely filed (including extensions) original or amended return. The election must receive consent from each "affected shareholder." An affected shareholder is any shareholder to whom a distribution is made by the S corporation during the S corporation's taxable year. For purposes of Election 4, the affected shareholders are all shareholders during the year. Therefore, all shareholders must consent.
>
> Statements Required to Be Attached to the Return
>
> - The S corporation must attach a statement to an original filed return (including extensions) or an amended return. The statement must identify the election, state the shareholder(s) consent to the election and signed under penalty of perjury by a corporate officer (note that signing the return suffices the penalty of perjury signature requirement).
>
> - If Election 3, the deemed dividend election, is made, the statement must also include the amount of the deemed dividend allocated to each shareholder.
>
> - If Election 4, separate tax years, is made, the statement must provide facts regarding the qualifying disposition.

The resource cites in support of the above Code § 1368(e)(3) and Reg. § 1.1368-1(f)(5), (g)(iii) and (g)(5), then continues with the following fact elements:

- Review the S corporation tax return for any statements regarding elections.

- Request a copy of the S corporation's work papers allocating AAA, PTI, AE&P and OAA to its various distributions if the Schedule M-2 is not reconcilable. Normally, it's easy to reconcile the Schedule M-2 to the return; however, certain corporate transactions can occur that make it irreconcilable. For example, if there is a redemption, liquidation, split-up, split-off, merger or acquisition transaction, obtain additional information and workpapers.

- Request supporting documentation for the timing and amounts of any adjustments to AAA, PTI, AE&P, or OAA if the elections were part of a series of transactions that include a redemption, liquidation, split-up, split-off, merger or acquisition transaction.

The resource then continues with the following explanations of adjustments:

- Each of the elections can be made on an original filed return (including extensions) or an amended return. Therefore, the elections can be made during an examination.

- An S corporation can make Election 1, Distribute AE&P before AAA, and Election 2, Forego PTI, in the same year causing distributions to be sourced from AE&P, AAA then OAA. There are a variety of reasons an S corporation may make the elections including trying to avoid the Tax on Excessive Net Passive Investment Income, expiring shareholder net operating losses requiring income to offset the loss, or the distribution will be in excess of stock basis. Therefore, the shareholder may prefer to reduce AE&P instead, among other reasons.

- Election 1, Distribute AE&P before AAA, and Election 3, Deemed Dividend, are frequently requested on examinations when the issue involved is the tax on excessive net passive investment income, as the tax can result in a termination of the S election if there is excessive passive income and AE&P for 3 consecutive years. By making the election, the S corporation prevents the S election from terminating and reports a deemed dividend distribution in lieu of paying the additional tax on the passive investment income.

- An S corporation that does not have the cash to make the distributions may make Election 3 to: create basis to claim losses, to allow the shareholder to claim an expiring net operating losses, or because a new shareholder does not want AE&P and requires the old shareholder to recognize the dividend income.

Example 3 – Elections to Avoid Net Passive Investment Income Tax

At the end of CY3, S corporation has $1 million of AE&P and $5 million of AAA, and for years 1 through 4 the S corporation has passive income exceeding 25 percent of the corporation's gross receipts for each year as provided for under IRC 1375. The S corporation does not have PTI. The S corporation did not report the IRC 1375 tax in years 1 through 4 despite a legal requirement to do so.

If the statute of limitation for assessment on year 3 is open, the taxpayer can file elections 1 and 3 to have a deemed dividend distribution of $1 million effective on 12/31/CY3. The election eliminates the S corporation's AE&P and prevents the termination of the S corporation under IRC 1362(d)(3). The election has the effect of eliminating the IRC 1375 tax in years 3 and 4 and the S election won't terminate, but results in the shareholder reporting a $1 million dividend distribution in CY3.

Example 4 – Inadvertent Termination Relief and Elections

Same facts as Example 3 except, if the statute of limitations for assessment on years 1 through 3 are closed, the S election will terminate on the first day of CY4. The taxpayer can request inadvertent termination relief through a Private Letter Ruling (PLR) to prevent the S election from terminating. The PLR may require the S corporation to pay any IRC 1375 taxes.

The resource cites in support of the above Code § 1362(f) and 1375 and Reg. § 1.1368-1(f)(2), (3), then continues with a bibliography. Among the sources it cites are:

II.Q.7.b.ii. Redemptions or Distributions Involving S Corporations Compared with Partnerships

Presumably any payment for stock treated as a distribution instead of a redemption would be applied pro rata to the owner's shares, which might cause premature taxation if some shares have much lower basis than other shares.[4890] However, if all shares have the same adjusted basis, this would not be a concern.

The owner of a partnership interest, however, treats all of the owner's interest in the partnership as a single holding,[4891] allowing the entirety of the owner's basis to be applied against any distribution before triggering gain.[4892] For more about partnership redemptions compared with installment sales of stock, see parts II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale and II.Q.8.b.ii.(e) Effect of Code § 736 Payments, Installment Sale Payments, or Deferred Compensation on Balance Sheet; be cautious, however, about property distributions,[4893] especially those within seven years of any contribution to a partnership in exchange for a partnership interest.[4894]

Partial liquidations would not receive this favorable distribution treatment for an S corporation,[4895] but classifying a pro rata distribution as a partial liquidation would not change

[4890] See part II.Q.7.h.ii Taxation of Shareholders When Corporation Distributes Cash or Other Property, especially fn. 5096.
[4891] See part II.Q.8.e.ii.(a) Unitary Basis.
[4892] See part II.Q.8.b.i.(a) Code § 731: General Rule for Distributions.
[4893] See part II.Q.8.b.i Distribution of Property by a Partnership.
[4894] See part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, including a warning that a partner contributing cash in exchange for a partnership interest also causes these issues to arise, as described in the text accompanying fn. 5444.
[4895] See fns. 4829-4830 and accompanying text.

its treatment under Code § 736 as described above, so partnership treatment allows more rapid use of basis.

Also, suppose the corporation redeemed stock in exchange for a promissory note, and the redemption was treated as a distribution. Installment treatment is not permitted in a corporate setting for notes that are treated as distributions,[4896] thereby accelerating income, whereas a naked promise to pay a partner in redemption of a partnership interest does not count until cash is paid.[4897]

II.Q.7.b.iii. S Corporation Receipt of Life Insurance Proceeds

In Letter Ruling 200409010, upon the death of the key person, the S corporation (presumably using the accrual method of accounting) would immediately redeem the stock held by the key person at the time of death by issuing a promissory note to the key person's estate. After the redemption, the remaining shareholders would elect to cut off the taxable year.[4898] By terminating the taxable year after the redemption but before submitting a claim on the life insurance policy, the remaining shareholders sought to have all of the insurance proceeds allocated to their stock for purposes of increasing their tax basis. The IRS ruled that the life insurance death benefit will be required to be recognized as of the date of death. Notwithstanding needing to go through the claims submission and evaluation process, death would establish the corporation's rights to the proceeds as a beneficiary of the insurance policy.

Thus, the basis increase due to the receipt of the life insurance death benefit would not be allocated solely to the surviving shareholders. By using a redemption, they would have received a smaller basis increase than if they had received the life insurance proceeds directly and bought the decedent's stock. In fact, if and to the extent that an accounting cut-off can<u>not</u> be made, a portion of the basis increase would be allocated to the decedent's stock and perhaps subsumed (and, as a practical matter, lost) in the basis step-up of that stock upon death. If the accounting cut-off places date of death events into the decedent's hands, then perhaps the decedent's portion of basis from nontaxable income would be allocated to the decedent's stock and subsumed (and, as a practical matter, lost) in the basis step-up of that stock upon death.

Although cash basis taxpayers should be able to avoid these issues, be careful to see how the accounting cut-off would apply, because it can be quite tricky.

Of course, a C corporation's remaining shareholders receive no basis step-up as a result of a redemption (whether or not funded by life insurance).

To avoid these issues, I tend to prefer the planning in part II.Q.4.i Life Insurance LLC.

[4896] See fn. 4816.

II.Q.7.b.iv. S Corporation Distributions of, or Redemptions Using, Life Insurance Proceeds

II.Q.7.b.iv.(a). S corporation Distributions of Life Insurance Proceeds - Warning for Former C Corporations

Below is a variation of the theme of part II.P.3.b.iv Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds.

In Rev. Rul. 2008-42,[4899] an S corporation purchased an employer-owned life insurance contract on the life of one of its employees in order to cover expenses the company would incur as a result of the death of the employee (also known as a key-man policy). The employee was a highly compensated employee of the corporation. The corporation paid all of the premiums for the policy and was the beneficiary of the policy. At the end of the taxable year, the corporation had earnings and profits ("E&P"). The IRS reminded us that Code 101(j) imposes notice and reporting requirements regarding employer-owned life insurance to preserve the Code § 101 exclusion of life insurance proceeds from income taxation.[4900]

The IRS ruled that premiums paid did not reduce the S corporation's AAA. It also ruled that the death benefit received does not increase the S corporation's AAA. What the IRS does not point out is the general ordering rules of Code § 1368, which are that distributions from an S corporation are treated as the following:[4901]

1. A tax-free distribution to the extent of the lesser of stock basis or AAA, then

2. A taxable dividend to the extent of E&P, then

3. Return of principal to the extent of remaining basis, and finally

4. Capital gain.

Suppose, for example, that the shareholders contributed $10,000 to the corporation at its inception, and no stock has been transferred since inception. It operated as a C corporation and earned $1,000,000 of E&P. Then it elects S status and has $250,000 of AAA. A key employee dies, and the corporation receives $1,500,000 of life insurance proceeds from a term policy and then distributes $700,000 to the shareholders. The consequences are:

- Immediately before the employee died, the shareholders had tax basis in their stock of $260,000, which is the sum of the initial $10,000 contribution and the $250,000 of AAA. Immediately after the death, this tax basis is increased to $1,760,000 due to the receipt of death benefits.

- Of the $700,000 the shareholders receive, $250,000 is a tax-free return of AAA that they could have pulled out tax-free before the employee died; their stocks' tax basis is reduced to $1,510,000 by reason of the $250,000 tax-free distribution. The remaining $450,000 is a taxable dividend out of the $1,000,000 E&P, even though it can be traced to the tax-free life insurance proceeds and even though the shareholders have ample basis to receive

[4899] See New Ruling Provides Guidance on AAA of S corporations, *Business Entities* (WG&L) (Jan./Feb. 2009).
[4900] See part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance.
[4901] See part II.Q.7.b.i Redemptions or Distributions Involving S corporations - Generally.

distributions if the corporation had never been a C corporation. E&P is reduced to $550,000, since $450,000 out of the $1,000,000 E&P has been distributed.

Turning tax-free life insurance proceeds into taxable dividends – not a good deal!

Suppose instead that the shareholders had owned the policy, had been the beneficiaries, and had received distributions from the corporation to pay premiums:

- Each year, AAA would have been reduced to the extent of the distributions that were used to pay premiums.

- The shareholders receive the life insurance proceeds tax-free, assuming they complied with Code § 101(j) as in the Revenue Ruling.

- When the shareholders invest into the company the $800,000 that, under the above example was retained in the corporation, their stock basis increases by that $800,000 to $1,060,000 from the pre-death $260,000 used in the example.

- Thus, the shareholders have lower basis than in the first example, which is the price they pay for not having dividend income.

- If future distributions exceed AAA, they could have dividend income up to the full $1,000,000 of E&P.

Thus, this alternative defers dividend taxation but does not avoid it if future distributions significantly exceed AAA. However, if future distributions in excess of AAA are in the form of redemptions that are taxed as such, then this alternative might very well avoid dividend taxation.

A more tax-efficient way to structure this alternative would be for the shareholders to contribute their $800,000 investment of the life insurance proceeds to a new limited liability company taxed as a partnership. Then either:

- The new LLC loans the proceeds to the S corporation as needed, documenting the loan with interest at the applicable federal rate, or

- The S corporation then contributes all of its business assets to the LLC. Later, when the LLC does not need part or all of the $800,000 anymore, it can distribute that excess money to the shareholders as a tax-free return of their capital contribution. This might or might not be a practical alternative, depending on the non-tax issues caused by transferring the S corporation's assets, as well as the annual expense of filing two business income tax returns instead of one. This is more cumbersome than the loan alternative, but it might have the positive effect of shifting a significant portion of the business operations to a partnership income tax model, which is more tax-efficient when changing the composition of the business' equity ownership, as discussed at the beginning of part II.M Buying into a Business, as well at part II.M.4 Providing Equity to Key Employees and an Introduction to Code § 409A Nonqualified Deferred Compensation Rules, of these materials.

Finally, to protect the life insurance from various business exigencies inherent in the shareholders owning life insurance under the alternative, the shareholders should consider forming a limited liability company to hold the life insurance.

These issues could be avoided if the corporation had an S election in place from inception or to the extent it had distributed all of its E&P in the past. Owners of S corporations with E&P might consider cleansing the corporation's E&P while dividend rates are low. Code § 1368(e)(3) allows taxpayers to elect to reverse the normal distribution rules and have distributions come first from E&P and then from AAA to implement this strategy.[4902]

Finally, owners of limited liability companies or other entities taxed as partnerships would not need to even consider this issue.

II.Q.7.b.iv.(b). S Corporation Redemptions Using Life Insurance Proceeds

When an S corporation redeems stock under Code § 302(a) or 303(a):

- AAA is reduced by an amount equal to the AAA multiplied by the number of shares redeemed and divided by the number of shares of stock in the corporation immediately before the redemption.[4903]

- E&P is reduced by a ratable share of post-2/28/1913 E&P.[4904]

- These reductions in AAA and E&P are independent of each other.[4905]

If an S corporation is a former C corporation with significant E&P, then a disadvantage of a redemption relative to a cross-purchase is that AAA is reduced in a redemption, whereas in a cross-purchase AAA is not affected. (It could be an advantage if the goal is to cleanse the corporation of E&P to avoid worrying about the passive investment income rules, but those rules are easy to work around by investing in oil and gas partnerships; see part II.P.3.b.iii Excess Passive Investment Income.)

II.Q.7.b.v. Donation of Stock to Charity Followed by S Corporation Redemption

See part II.Q.6.d.ii UBTI Related to an S Corporation for the fact that gain on sale of S corporation stock and any S corporation K-1 items are per se UBTI.

If the donee is not an eligible shareholder (for example, a government),[4906] consider donating to a donor advised fund and then having the proceeds go to the charity. If the donor advised fund is organized as a trust, any UBTI can be offset by the charitable tax deduction that individuals generally receive.[4907]

[4902] See part II.P.3.b, for issues relating to S corporations that have E&P.
[4903] Code § 1368(e)(1)(B); Reg. § 1.1368-2(d)(1)(i).
[4904] Code § 312(n)(7), superseding the limitations of Reg. § 1.312-5. Rev. Rul. 79-376, which had governed, was obsoleted by Rev. Rul. 95-71, presumably in response to this change; see T.M. 767 Redemptions IV.A.2.c. The Senate Report to P.L. 98-369 that enacted the current statutory language provides:

> In the case of a distribution by a corporation in redemption of its own stock, earnings and profits are to be reduced in proportion to the amount of the corporation's outstanding stock that is redeemed. However, the Senate does not intend that earnings and profits be reduced by more than the amount of the redemption.

[4905] Reg. § 1.1368-2(d)(1)(iii).
[4906] See part II.A.2.f Shareholders Eligible to Hold S Corporation Stock, especially fn. 138.
[4907] See part II.Q.6.d.iii Charitable Deduction Against UBTI.

II.Q.7.c. S Corporation Owned by a Trust Benefitting Charity

S corporation stock is a challenging asset for a charity to hold. Not only the K-1 the charity receives from the S corporation but also gain on the sale of S corporation stock constitute unrelated business income; see part II.Q.6.d.ii UBTI Related to an S Corporation.

Note that a charitable remainder trust can own a partnership but not an S corporation;[4908] however, an S corporation may donate property to a charitable remainder trust.[4909]

Also see parts II.G.4.g.ii Basis Limitations on Deducting Charitable Contributions Made by an S corporation or a Partnership and II.Q.6 Contributing a Business Interest to Charity. For a discussion of S corporation contributions to charity, see C. Hoyt, "Charitable Gifts by Subchapter S corporations and by Shareholders of S corporation Stock," *ALI-ABA Estate Planning Course Materials Journal* (April 2006).[4910]

The S corporation's business activities are not attributable to the charity in determining the nature of the charity's activities, which means that a lot of S corporation business income does not destroy the charity's otherwise exempt status.[4911]

[4908] For what types of trusts can own stock in an S corporation, see part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation. An electing small business trust (ESBT) is the only type of trust described there into which a charitable remainder trust (CRT) might fit, but Code § 1361(e)(1)(B)(iii) prohibits a CRT from qualifying as an ESBT. However, an S corporation may donate property to a charitable remainder trust; see part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.
[4909] See part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax.

[4911] Letter Ruling 201441018.

II.Q.7.c.i. Income Tax Trap - Reduction in Trust's Charitable Deduction

II.Q.7.c.i.(a). Contribution Must Be Made from Gross Income

Although trusts can deduct amounts of gross income[4912] paid to charity, the trust must actually receive the income in the current or a prior year[4913] and must be authorized to make the payment to charity.[4914] Gain recognized on the in-kind satisfaction of a pecuniary distribution to

---

[4912] The amount must be payable out of gross income and not out of corpus. Rev. Rul. 2003-123 pointed out the requirement to trace gross income:

> Under section 642(c), a trust is generally allowed an unlimited charitable deduction for amounts that are paid from gross income for charitable purposes pursuant to the terms of the governing instrument. Because section 642(c) specifically requires that a charitable deduction is available only if the source of the contribution is gross income, tracing of the contribution is required in determining its source. *Van Buren v. Commissioner*, 89 T.C. 1101, 1109 (1987); *Riggs National Bank v. United States*, 352 F.2d 812 (Ct. Cl. 1965); *Mott v. United States*, 462 F.2d 512 (Ct. Cl. 1972), *cert. denied*, 409 U.S. 1108 (1973); see also *Crestar Bank v. Internal Revenue Service*, 47 F. Supp.2d 670 (E.D. Va. 1999).

However, various conventions apply to this tracing rule. Satisfaction of a formula pecuniary bequest that is not allocated income does not qualify for this charitable deduction. Rev. Rul. 68-667. On the other hand, if the trust instrument is silent, a charitable deduction is allowed when applicable state law provides that, where the trust instrument is silent, payments are required to be made first from income of the trust and, if the income is not sufficient, then from its principal. Rev. Rul. 71-285. Thus, the IRS is not looking to trace dollars mechanically but rather looks to whether the income was first earned and then allocated to the contribution.

[4913] *Green v. U.S.*, 880 F.3d 519 (10th Cir. 2018), upheld as reasonable the allowance in Reg. § 1.642(c)-1(a)(1) for a deduction:

> for an amount paid during the taxable year in respect of gross income received in a previous taxable year, but only if no deduction was allowed for any previous taxable year to the estate or trust, or in the case of a section 645 election, to a related estate, as defined under § 1.645-1(b), for the amount so paid.

[4914] Rev. Rul. 2004-5 stated:

> For a trust to claim a charitable deduction under § 642(c) for amounts of gross income that it contributes for charitable purposes, the governing instrument of the trust must give the trustee the authority to make charitable contributions. This requirement is an essential element to qualify the trust to claim a deduction for a charitable contribution made directly by the trust. In the case of a trust's investment in a partnership, the partnership may make a charitable contribution from the partnership's gross income, and that income is never available to the trust. For federal tax purposes, however, the trust must take into account its distributive share of the partnership's income, gain, loss, deductions (including charitable contributions), and credits. Under these circumstances, a trust's deduction for its distributive share of a charitable contribution made by a partnership will not be disallowed under § 642(c) merely because the trust's governing instrument does not authorize the trustee to make charitable contributions.

FSA 200140080 reached the same conclusion, pointing out that the UBTI concerns described below must also be addressed. CCA 200928029 (which appears to have been a quick email) asserted:

> Rev. Rul. 2004-5 does permit trusts to claim charitable contributions made by a partnership of which the trust is a partner, even if the trust instrument does not provide for charitable contributions. However, the Rev. Rul. does not eliminate a second requirement that this charitable contribution be made out of the trust's gross income. Therefore, the contribution of the easement does cannot be claimed as a charitable contribution.

Gross income distributed to charity under an inter vivos power of appointment to distribute to charity satisfies the requirement that the charitable distribution be authorized under the trust agreement. Letter Ruling 200906008.

charity meets this test;[4915] however, if gain is not recognized on an in-kind distribution, only the adjusted basis of the property may count.[4916] As to the latter, let's compare and contrast some scenarios:

- A trust's charitable contribution of appreciated marketable securities avoids capital gain tax on the sale of those securities but generates only a contribution deduction equal to basis.

- If the trust distributes the securities to its beneficiaries, the beneficiaries may deduct the full fair market value when contributing them to charity, but the beneficiaries' income and other itemized deductions (relative to the standard deduction) may or may not support that much of a deduction.

- If the trust has significant income taxed at ordinary rates, the trust might consider selling the securities for a long-term capital gain, then distributing the cash to charity. If the trust makes no distributions to noncharitable beneficiaries, then as a practical matter the contribution will reduce the trust's ordinary income subject to tax, because capital gains are always taxed first; thus, the sale and contribution may have the practical effect of converting ordinary income to capital gain, which may save substantial tax (at least that's how it works for individuals). On the other hand, if distributions are made to noncharitable beneficiaries, the charitable deduction may need to be allocated partly to capital gain on their K-1s; see fn 2822 in part II.J.8.f.i.(a) Allocating Deductions to Various Income Items.

Income included on an estate's K-1 from an S corporation does *not* support a Code § 642(c) deduction unless the S corporation distributes that income to the estate; this issue can also

---

[4915] Rev. Rul. 83-75 (fn 2788), holding that the distribution by a trust of corpus consisting of appreciated securities in satisfaction of its obligation to pay a fixed annuity to a qualified charitable organization is a sale or exchange of the securities that results in taxable gain to the trust, but the trust is entitled to a charitable deduction equal to the amount of gain recognized upon the distribution of appreciated securities (after making adjustment for any deduction of capital gain provided under the tax law at that time). Letter Ruling 9044047 provided a similar result.

[4916] *Green v. U.S.*, 880 F.3d 519 (10th Cir. 2018), held:

> As an initial matter, the IRS asserts, and the Trust agrees, that the statutory phrase "any amount of the gross income" means that charitable donations must be made out of a trust's gross income, but that real property purchased with gross income can also be treated as the equivalent of gross income for purposes of the deduction outlined in § 642(c)(1). This, we conclude, is an entirely reasonable interpretation of the statutory language. More specifically, this interpretation is consistent with the statutory language, and also encourages charitable donations to a greater degree than an interpretation that fails to include a sourcing component, *i.e.*, an interpretation that limits the deduction to donations made exclusively from gross income.[4] See *Old Colony*, 301 U.S. at 384 ("Congress sought to encourage donations out of gross income ....").
>
> [4] In reaching this conclusion, we note that the Government has not cited to any section of the Code, any regulation, or even any treatise or basic accounting principle that directly supports its proposed interpretation.
>
> That still leaves open the question of the allowable amount of a deduction for donated real property that was purchased with a taxpayer's gross income. The IRS has consistently asserted, both in addressing the Trust's claim for a refund and in this litigation, that the deduction amount is limited to the taxpayer's adjusted basis in the donated real property, *i.e.*, the amount of gross income the taxpayer originally paid for the real property. Without granting any deference to the IRS's position, we conclude that it is the most reasonable interpretation of the statutory language, particularly when considered in light of the Code as a whole.

arise with consent dividends[4917] and partnership income.[4918] The latter problem does not apply if an electing small business trust election is made;[4919] so, instead of electing to be taxed as an estate,[4920] a qualified revocable trust might want to make an ESBT election. This policy is so strong that, in *Sid Richardson*, [4921] the Fifth Circuit held an estate was not permitted a charitable set-aside deduction with respect to undistributed S corporation income even though the estate was the sole owner of the S corporation and the charity ultimately received all of the estate's income, including the S corporation stock.[4922] The court reasoned:

> … to qualify for the charitable deduction, the amount here in question must have been (1) part of the Estate's gross income, and (2) pursuant to the terms of the governing instrument (here the Will) must have been (3) paid or permanently set aside or properly designated to be used exclusively for legitimate charitable purposes.
>
> In considering the Foundation's contentions it is important to understand in fact the undistributed income at issue never left the coffers of the Subchapter S corporation. Undaunted by this apparently insurmountable obstacle, the Foundation doggedly insists that the amounts in question have met the requirements of 642(c) and that the Estate is entitled to the claimed deduction. The Foundation explains that because Oils was a Subchapter S corporation, its undistributed income was a part of the Estate's gross income; and, under the terms of the Will, all of the income of the Estate was set aside for

---

[4917] A consent dividend is a deemed (not actually distributed) dividend from a corporation to avoid accumulated earnings tax; see fn. 4853, found in part II.Q.7.a.vi Redemptions and Accumulated Earnings Tax. *Estate of Esposito v. Commissioner*, 40 T.C. 459 (1963), denied a charitable set-aside deduction for consent dividends, even though the entire residue was set aside for charity.

[4918] In *Estate of Freund v. Commissioner*, 35 T.C. 629, *aff'd* 303 F.2d 30 (2nd Cor. 1962), the estate received a K-1 for all of the partnership's earnings, some of which decedent withdrew before death and some of which the estate withdrew after death. The charitable deduction was allowed only with respect to the amount the partnership to the estate distributed after death.

[4919] Under 2017 tax reform, Code § 642(c) does not apply to an ESBT; see fn 6055 in part III.A.3.e.ii.(b) ESBT Income Taxation - Overview and also note that fn 6054 allows an ESBT to deduct charitable contributions against its S corporation income only to the extent they are on the K-1 from the S corporation.

[4920] See part II.J.7 Code § 645 Election to Treat a Revocable Trust as an Estate.

[4921] *Sid W. Richardson Foundation v. U.S.*, 430 F.2d 710 (5th Cir. 1970), *reh. den.* 430 F.2d 710 [the decision and the denial of rehearing were published together], *cert. den.* 4/5/1971, *reh. den.*, 403 US 912 (1971). The tax years in question were 1960 and 1961 – before Code § 681 moved UBTI items from Code § 642(c) into Code § 170. Generally, Code § 512(e) treats as unrelated business income S corporation K-1 items and gain from the sale of S corporation stock, even if the S corporation never engaged in any business or debt-financed activities.

[4922] In this case involving 1960 and 1961 tax returns, the Fifth Circuit noted:

> Richardson's will (Will) provided that all of the income of the Estate which accrued during its administration would be included in the residue of his estate. The following residuary clause governed the final distribution of this income:
>
> > I give devise and bequeath ... all of the residue of my estate wherever situated which shall remain after the payment of debts and obligations, taxes and similar charges, the expenses of administering my estate and the satisfaction of the bequests and devises made in Article III hereof, to Sid W. Richardson Foundation....
>
> All of the specific bequests in the Will were satisfied in property except for $256,060.36 and a monthly provision for a sister payable out of corpus. None of the Estate's income was used to pay cash bequests. The residue of the Estate, including all outstanding capital stock of Oils and all income was transferred to the Foundation as of January 1, 1962.

> and "actually" did go to the Foundation, a charitable institution. Thus, it concludes that the requirements of § 642(c) have been met and the Estate is entitled to the deduction.
>
> We must reject this conjuration on two grounds. First, the undistributed income of Oils was never subject to the charitable provisions of the Will. Second, the amounts in question were not paid or permanently set aside or otherwise properly designated for charitable purposes.
>
> Although the undistributed income of Oils was considered in computing the gross income of the Estate, it was never a part of the Estate; it never came within the dominion and control of the executors as distinguished from the corporate entity; and it was never subject to the charitable provisions of decedent's Will. The Foundation's argument assumes that because the undistributed income of Oils was included in computing the Estate's gross income, it actually became a part of the Estate and was subject to the terms of the Will. We find no support for such an assumption.

After discussing other cases, Fifth Circuit concluded:

> The Foundation attempts to distinguish *Freund* and *Esposito* by arguing that in the instant case, the funds in question were "actually distributed by Oils to the Estate in the two years involved, all of which was under the complete control of the executors, who were required to see, and did see, that it went with the residue of the remainder to Foundation." This argument grossly misstates the facts. It could only be correct if the corporate existence of Oils were totally ignored. The Foundation supports its position by explaining that all of the stock of Oils was part of the corpus of the Estate and was duly transferred to the Foundation. In essence, the Foundation is arguing that ownership of the stock is ownership of the income and transfer of the stock is transfer of the income. The Foundation erroneously disregards the fact that Oils is a separate entity, and as such the undistributed profits could be used by Oils in any legitimate way it saw fit. The rule is well-settled that the fact that taxpayers exercised complete dominion and control over the corporation, were in charge of its administration and management, and fully directed its policies, does not justify disregarding the corporate entity for tax purposes.[6] The district court correctly rejected Foundation's claimed deduction for amounts equivalent to the undistributed income of Oils.[7]
>
> [6] *National Carbide v. Commissioner*, 336 U.S. 422 (1949); *Skarda v. Commissioner*, 250 F.2d 429 (10th Cir. 1957). One of the more perplexing aspects of this case is that the Foundation never argued that the corporate entity should be disregarded; such an argument would seem to be logically necessary to support its contention that the amount in question "actually" went to the Foundation. In any event, the above cited authorities seem conclusive on this point.
>
> [7] See the district court's opinion, 306 F.Supp. at 761. The court correctly and cogently concluded:
>
>> The capital stock of Richardson Oils came within the control of the provisions of the will, but the corporation's undistributed profits did not. Until a dividend was declared, the corporation had the right to use those profits in any legitimate way it saw fit, without regard to the provisions of the will which governed the Estate. Under those circumstances, Sec. 642(c) did not become applicable to such undistributed profits.

306 F. Supp at 762.

An S corporation was able to satisfy this requirement by distributing accounts receivable, which would first be used to satisfy remaining estate liabilities and then either be distributed to or set aside for the estate's sole beneficiary, a private foundation.[4923] If there is a disconnect between cash flow and K-1 items, it has been suggested that one consider creating an LLC that holds plenty of cash and also holds the partnership or S corporation. That way, the K-1 from the partnership or S corporation can be accompanied by cash. In other words, if the K-1 is $100,000, the LLC distributes $100,000 to the trust. If the pass-through entity is an S corporation, the estate must be the LLC's sole owner so that the LLC can be disregarded for income tax purposes; an LLC taxed as a partnership would not be an eligible S corporation shareholder.[4924] I am not confident that works, because the distribution is deemed to have come from the trust, not the S corporation, for income tax purposes.

The extent to which gross income the trust received during the year must be traced to a distribution from the trust to charity is unclear; the IRS appears to believe that, the distribution to charity can be deducted to the extent that the distributed property itself constituted gross income in the current or in any prior year, which means that only the basis of property distributed can be deducted.[4925]

[4923] Letter Ruling 201246003.

[4924] See part II.A.2.e.v Relief for Late S Corporation and Entity Classification Elections for the Same Entity, especially fns. 146-150, the latter which makes me very confident that a disregarded entity treated as owned by one qualified individual can hold stock in an S corporation so long as the entity continues to be disregarded in that manner.

[4925] CCA 201042023 (trust's charitable contribution deduction should be limited to the adjusted basis of the properties purchased from accumulated gross income). Contradicting the CCA and holding in the taxpayer's favor is *Green v. United States*, 116 A.F.T.R.2d 2015-6668 (W.D. Okla. 2015 (trust's charitable contribution deduction are *not* limited to the adjusted basis of the properties purchased from accumulated gross income), but the Tenth Circuit reversed, 880 F.3d 519 (1/12/2018), holding that only the basis of contributed property was deductible under Code § 642(c). *U.S. v. Benedict*, 338 U.S. 692 (1950) (capital gains which expressly is not to be taken into account in computing taxable net income as also excluded from statutory gross income) denied a deduction under for a contribution of certain capital gains because those gains were excludable from gross income under another provision. The CCA cited that case and *W.K. Frank Trust of 1931 v. Commissioner*, 145 F.2d 411 (3d Cir. 1944), both of which the *Green* judge rejected as controlling.

See also fn. 4912 (tracing requirement applies but uses accounting conventions rather than actual tracing); Fox, ¶12.04 Requirement That Source of Contribution Be From Gross Income, *Charitable Giving: Taxation, Planning, and Strategies* (WG&L); WTAS LLC, ¶31.09 Source of Payment: Gross Income Only, *Tax Economics of Charitable Giving* (WG&L), citing *Old Colony Trust Co. v. Commissioner*, 301 U.S. 379 (1937) (charitable contributions by a trust need not be shown to have been paid out of income received in the year in which they were made if, by the terms of the trust, no limitation was prescribed on the source of payment), and its progeny.

Jonathan Blattmachr's 2015 Heckerling materials stated:

> It seems that if the partnership's gross income is used to acquire another asset, the contribution to charity of the asset, so acquired with the trust's gross income, should be treated as a contribution of gross income for purposes of Section 642(c).[23]
>
> [23] See, e.g., *Old Colony Trust Co. v. Commissioner*, 301 U.S. 379 (1937), dealing with the predecessor to current Section 642(c) and in which the Court deferred to the fiduciary's accounting treatment to answer the question whether a certain payment was made from gross income or principal. See, also, Chief Counsel Advice (CCA) 201042023 (the Service ruled that a property bought with accumulated income of a trust was deductible under Section 642(c) when

II.Q.7.c.i.(b). Business Income Limiting Trust Income Tax Deduction

Although normally trusts may deduct all of their gross income that they pay to charity,[4926] this deduction is eliminated to the extent that the trust has unrelated business taxable income (UBTI).[4927] However, in computing the UBTI causing this disallowance, a charitable contribution deduction is allowed, using the percentages that apply to contributions by an individual.[4928] Thus, a partial charitable contribution is allowed to be made out of unrelated business income.[4929] The contribution must be made during the taxable year; the one-year delay permitted by Code § 642(c)(1) does not apply to this deduction.[4930] Furthermore, consider whether the trust also becomes subject to an individual's restrictions[4931] regarding substantiation[4932] and identity of donee.[4933]

Any K-1 income or gain from the sale of the S corporation stock constitutes unrelated business income if the shareholder is an IRA holding bank stock before October 22, 2004 or is a qualified

---

distributed to charity because it was out of gross income. However, the charitable deduction was limited to the trust's adjusted basis in the property. (Not precedent.) Cf. *Crestar Bank v. Internal Revenue Service*, 47 F.Supp.2d 670 (E.D. Va. 1999); *Freund's Estate v. Commissioner*, 303 F.2d 30 (2nd Cir. 1962); *Sid W. Richardson Foundation v. U.S.,* 430 F.2d 710 (5th Cir. 1970); *Frank Trust of 1931 v. Commissioner*, 145 F.2d 411 (1944); *Estate of Joseph Esposito v. Commissioner*, 40 TC 459 (1963).

[4926] Code § 642(c).

[4927] Code §§ 642(c)(4) and 681. See part II.Q.6.d Unrelated Business Taxable Income.

[4928] Code § 512(b)(11); Reg. § 1.512(b)-1(g).

[4929] Reg. § 1.681(a)-2(b).

[4930] Reg. § 1.681(a)-2(a).

[4931] Reg. § 1.681(a)-2(a) provides:

> While the charitable contributions deduction under section 642(c) is entirely disallowed by section 681(a) for amounts allocable to unrelated business income, a partial deduction is nevertheless allowed for such amounts by the operation of section 512(b)(11), as illustrated in paragraphs (b) and (c) of this section.

Code § 512(b)(11) provides:

> In the case of any trust described in section 511(b), the deduction allowed by section 170 (relating to charitable etc. contributions and gifts) shall be allowed (whether or not directly connected with the carrying on of the trade or business), and for such purpose a distribution made by the trust to a beneficiary described in section 170 shall be considered as a gift or contribution. The deduction allowed by this paragraph shall be allowed with the limitations prescribed in section 170(b)(1)(A) and (B) determined with reference to the unrelated business taxable income computed without the benefit of this paragraph (in lieu of with reference to adjusted gross income).

Tying in the final piece of statutory authority, Code § 511(b) provides:

> (1) *Imposition of tax*. There is hereby imposed for each taxable year on the unrelated business taxable income of every trust described in paragraph (2) a tax computed as provided in section 1(e). In making such computation for purposes of this section, the term taxable income as used in section 1 shall be read as unrelated business taxable income as defined in section 512.
>
> (2) *Charitable, etc., trusts subject to tax*. The tax imposed by paragraph (1) shall apply in the case of any trust which is exempt, except as provided in this part or part II (relating to private foundations), from taxation under this subtitle by reason of section 501(a) and which, if it were not for such exemption, would be subject to subchapter J (sec. 641 and following, relating to estates, trusts, beneficiaries, and decedents).

[4932] See part II.J.4.c Charitable Distributions.

[4933] See part II.J.4.c Charitable Distributions, fn. 2575.

retirement plan (other than an ESOP) or a Code § 501(c)(3) charity;[4934] as mentioned in fn. 4931 above, Code § 681(a) takes away the Code § 642(c) deduction from trusts (and instead applies the individual percentage limitations) to the extent that they have unrelated business income, determined as if the trust were a Code § 501(c)(3) charity. This is yet another disadvantage of S corporations compared to partnerships, the income from which is unrelated business income only to the extent it fits within the usual unrelated business income (UBI) categories; see part II.Q.6.d Unrelated Business Taxable Income. If a trust that owns S corporation stock that is includible in the income beneficiary's estate and has a charitable remainderman, the S corporation might liquidate immediately after the beneficiary's death, to minimize UBTI; one easy way might be to convert the S corporation to an LLC taxed as an S corporation during the planning stage,[4935] then revoke the election to be taxed as a corporation as of the beneficiary's death. On the other hand, an ESBT might be in a better position to deduct charitable contributions flowing from an S corporation's K-1 than any other fiduciary entity holding an interest in a pass-through entity.[4936]

This partial deduction means that the trustee should not distribute all of the UBI to charity, because the trust will need to pay income tax on the UBI that cannot be fully offset by the charitable deduction.[4937] If the trust mandates that all of the income be paid to charity, the trustee may still allocate the taxes as an expenditure charged against income so that the trustee can pay the taxes.[4938]

Fortunately, these rules do not apply to estates.[4939] If a qualified revocable trust elects to be taxed as an estate, then it should escape this limitation.[4940] These rules also would not apply to

---

[4934] Code § 512(e), some of which was added by P.L. 104-188, effective for taxable years beginning after December 31, 1997.
[4935] See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization. Instead of doing a merger or former conversion, the S corporation might transfer all of its assets to the LLC and then liquidate, trying to use the statute of limitations for claims against liquidated companies to avoid claims by creditors from when the S corporation operated a business or otherwise subjected itself to tort liabilities; see part II.F.2 Asset Protection Benefits of Dissolving the Business Entity After Asset Sale.
[4936] See part II.Q.7.c.i.(a) Contribution Must Be Made from Gross Income, especially fn 4919 and the text preceding it.
[4937] For example, in Reg. § 1.681(a)-2(c), Ex. 3, the trust paid the charity all $31K of its UBI, but it still had $24K of taxable income (based on a 20% charitable deduction limitation). It reserved no cash to pay that tax, a fact not pointed out by the Example.
[4938] Section 506(a)(2) of the Uniform Principal and Income Act.
[4939] Code § 681 and the regulations thereunder apply to trusts; they does not mention estates. Letter Ruling 201246003 authorized a full Code § 642(c) deduction for income from an S corporation set aside for the estate's sole beneficiary, which was a private foundation.
[4940] See part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI)
Although the discussion below generally refers to trusts, generally it applies to estates as well. If a trustee has discretion to make an election regarding that trust, the election does not affect the choices available regarding other trusts the trustee manages.

I.A.1.o. Capital Gain Constitutes DNI Unless Excluded

Taxable income is DNI unless expressly excluded.

Code § 643(a)(3) provides:

> *Capital gains and losses*. Gains from the sale or exchange of capital assets shall be excluded to the extent that such gains are allocated to corpus and are not (A) paid, credited, or required to be distributed to any beneficiary during the taxable year, or (B) paid, permanently set aside, or to be used for the purposes specified in section 642(c).

Thus, to be excluded from the income of a domestic trust, the gains must:

- Arise from the sale or exchange of capital assets,
- Be allocated to corpus, and
- Not be actually or deemed to be distributed.

The rest of this part II.J.8.a Capital Gain Constitutes DNI Unless Excluded focuses on the first two prongs.

I.A.1.o.i. Whether the Capital Gain Is from the Sale or Exchange of a Capital Asset

Only gains from the sale of capital assets are ordinarily excluded from DNI.

For example, "property, used in his trade or business, of a character which is subject to the allowance for depreciation provided in section 167, or real property used in his trade or business" is not a capital asset. Therefore, the sale of such property would constitute DNI, although it would not constitute trust accounting income. Whether other real estate is a capital asset depends on various facts.

However, "any recognized gain on the sale or exchange of property used in the trade or business" often receives capital gain treatment to the extent it does not constitute certain depreciation recapture. Goodwill that has not been amortized is a capital asset, but goodwill that is being amortized is not a capital asset. Thus, because such assets are not capital assets, such capital gains generally would be included in DNI.

I.A.1.o.ii. Whether the Gain from the Sale or Exchange of a Capital Asset Is Allocated to Corpus

I am unaware of any authority defining "allocated to corpus" as used in Code § 643(a)(3). Presumably it means receipts by the trust that are allocated to principal.

Does the statute mean that capital gain are automatically included in DNI unless they are affirmatively allocated to principal and certain other conditions exist? Reg. § 1.643(a)-3(a) might overrule that requirement, providing (highlighting added):

> *In general*. Except as provided in § 1.643(a)-6 and paragraph (b) of this section, gains from the sale or exchange of capital assets are ordinarily excluded from distributable net income and are not ordinarily considered as paid, credited, or required to be distributed to any beneficiary.

This regulation essentially has three parts:

- Reg. § 1.643(a)-6 deals with foreign trusts.

- Reg. § 1.643(a)-3(b) explains when capital gains from the sale or exchange of an asset are included in DNI and does not include a requirement that the capital gain be allocated to principal. In fact, one of the prongs discusses the treatment when capital gains are allocated to income.

- Depending on the meaning one gives to "ordinarily," this regulation might dispense with the statutory requirement that capital gains be allocated to corpus. The regulation does not explain when it says "ordinarily" what the exceptions might be, other than Reg. §§ 1.643(a)-6 and 1.643(a)-3(b). There would appear to be substantial authority for saying that an affirmative allocation of capital gains to principal is or is not required.

This issue seems to be most important for the trust's gross income that does not take the form of receipts of cash or other property. For example, a trust might invest in a partnership, S corporation, or other flow-through entity that does not distribute all of its taxable income. How should one treat capital gain from a flow-through entity's sale of a capital asset, when the entity distributes less than all of its taxable income? Should the undistributed capital gain be included in DNI?

- With respect to the accumulated capital gain, the trust has no receipts and therefore is not allocated to corpus. Arguably, the capital gain is not excluded from DNI and therefore constitutes DNI.

- On the other hand, the accumulated capital gain benefits the trust's corpus. Should it be treated as if it had been allocated to corpus? In that case, should it be trapped inside the trust, given that it was accumulated inside the entity and not distributed to the beneficiary?

- Given this uncertainty, would the trustee have discretion to take a different position each year? In Reg. § 1.643(a)-3(b), the Treasury generally agreed that the trustee would not be required to take a consistent position year-by-year, except for capital gain allocated to corpus and treated consistently by the fiduciary on the trust's books, records, and tax returns as part of a distribution to a beneficiary. Given that this gross income was not allocated corpus (because it was never physically received), perhaps the trustee has discretion to vary the treatment from year to year? Another approach might be to say that, because the undistributed capital gain was not allocated to principal, the regulations might presume that the undistributed capital gain is allocated to income and can be included in DNI inconsistently from year to year under Reg. § 1.643(a)-3(b)(1).

If all of a flow-through entity's K-1 items taxable to the trust are included in DNI, then part II.J.8.c Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal might cause ordinary income to be trapped at the trust level if the flow-through entity distributes cash in an amount less than all of these K-1 items; see part II.J.8.f Consequences of Allocating Capital Gain to DNI. In light of the consequences described there, the most taxpayer-favorable reading may be that capital gain is ordinarily excluded from DNI.

I leave it to the reader to decide which approach is “better” or perhaps to make that decision on a trust-by-trust basis.

For more on using flow-through entities, see part II.J.8.e Partnerships and S corporations Carry Out Income and Capital Gain to Beneficiaries.

I.A.1.p. Should Capital Gain Be Allocated to DNI?

Often beneficiaries have income below the thresholds that cause the 3.8% tax and the additional 5% capital gain tax to be incurred, whereas trusts start paying those taxes at relatively modest income levels. Therefore, distributing capital gains to beneficiaries might be beneficial – at least from an income tax viewpoint.

Consider various factors described in part II.J.3 Strategic Fiduciary Income Tax Planning.

I.A.1.q. Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal

Generally, gains from the sale or exchange of capital assets, net of losses, are excluded from distributable net income (DNI). But that statement belies the flexibility we are about to see.

Reg. § 1.643(a)-3(b) provides:

> *Capital gains included in distributable net income*. Gains from the sale or exchange of capital assets are included in distributable net income to the extent they are, pursuant to the terms of the governing instrument and applicable local law, or pursuant to a reasonable and impartial exercise of discretion by the fiduciary (in accordance with a power granted to the fiduciary by applicable local law or by the governing instrument if not prohibited by applicable local law) -
>
> (1) Allocated to income (but if income under the state statute is defined as, or consists of, a unitrust amount, a discretionary power to allocate gains to income must also be exercised consistently and the amount so allocated may not be greater than the excess of the unitrust amount over the amount of distributable net income determined without regard to this subparagraph § 1.643(a)-3(b));
>
> (2) Allocated to corpus but treated consistently by the fiduciary on the trust’s books, records, and tax returns as part of a distribution to a beneficiary; or
>
> (3) Allocated to corpus but actually distributed to the beneficiary or utilized by the fiduciary in determining the amount that is distributed or required to be distributed to a beneficiary.

Note the word “or” after paragraph (2) above. That indicates capital gains are included in DNI if and to the extent that any one or more of paragraph (1) (the “Income Rule”), paragraph (2) (the “Consistent Principal Rule”), or paragraph (3) (the “Discretionary Principal Rule”) applies. For more on the:

- Income Rule, see part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law

- Consistent Principal Rule, see part II.J.8.c.ii Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary

- Discretionary Principal Rule, see part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary.

Before its amendment by T.D. 9102 (12/30/2003), Reg. § 1.643(a)-3 made it more difficult to include capital gain in DNI.

I.A.1.q.i. Income Rule: Capital Gain Allocated to Income Under State Law

Most states have adopted the Uniform Principal and Income Act, which will be referred to at UPIA for the rest of this part II.J.8.c.i, or its replacement, which is described in part II.J.5.b Uniform Fiduciary Income & Principal Act (UFIPA).

Generally, any capital gain included as the distributive share of income from a partnership or S corporation and distributed from the entity to the trust will constitute income under the Act, making the rest of this part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI) be moot.

Generally, the Act allocates capital gains to principal. The main exceptions are the power to adjust, unitrust distributions, and exceptions in the governing instrument; the power to adjust and power to convert to a unitrust followed adoption of the prudent investor rule. Following a discussion of each of these is a discussion of the respect fiduciary income tax law gives them.

I.A.1.q.i.(a). Power to Adjust

Capital gains may be reclassified as income if traditional trust accounting income principles cause insufficient receipts to be classified as income. See parts II.J.5.b.ii.(a) Power to Adjust.

I.A.1.q.i.(b). Possible Allocation to Income of Gain on Sale of Interest in Partnership or S corporation

It is not uncommon for partnerships and S corporations to reinvest part of their annual income; indeed, to facilitate growth or simply a stronger capital structure (which lenders might require), many distribute only enough to pay their owners' income taxes (commonly referred to as a "tax distribution") plus a modest bonus (referred to below as a "bonus distribution").

Taxes on this reinvested income are charged against the income of a trust that owns such an entity. This is the only practical solution to the trust's obligation to pay its taxes, because the taxing authorities' claims against the trustee are much more pressing than the beneficiaries' claims. (Note that the income beneficiary of a Qualified Subchapter S Trust pays this tax – part III.A.3.e QSSTs and ESBTs – which has an effect similar to charging the trust's income.)

The Uniform Principal and Income Act includes a remedy for the income beneficiary that had to pay the tax on the entity's accumulated income that has been inherently baked into principal. Section 506(a)(3) authorizes a fiduciary to "make adjustments between principal and income to offset the shifting of economic interests or tax benefits between income beneficiaries and remainder beneficiaries which arise from … the ownership by an estate or trust of an interest in an entity whose taxable income, whether or not distributed, is includable in the taxable income of the estate, trust, or a beneficiary." This specific provision supplements any power to adjust that might generally apply.

Thus, when an interest in a partnership or an S corporation is sold, the trustee should consider whether to allocate some of the sale proceeds to income. However, it's not at all obvious that the trustee should make an adjustment; consider that:

- The entity made distributions specifically to pay this tax, so the trust or income beneficiary was not really "out of pocket" for this tax.

- If the entity had been a C corporation, the entity would have paid the tax itself. Its dividend would have equaled the bonus distribution, and this issue would never have arisen.

- The true issue is whether the bonus distribution was sufficient. Was the decision to accumulate income fair – a sound exercise of the business judgment of those who run the entity? Did those who control the entity promise a make-up distribution at some point because of a special project, or was the accumulation merely part of a solid plan to grow the business, which presumably would result in increased income and increased bonus distributions? Were those who control the entity running it just to benefit themselves (and, if owners, trying to extract more benefits as owners than the inactive owners received)? I have probably left out many other relevant considerations, but hopefully I have communicated why this decision is not easy.

See parts II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the Trust Accounting Rules and II.J.16 Fiduciary Income Taxation When Selling Interest in a Pass-Through Entity or When the Entity Sells Its Assets.

If the trustee is concerned that the income beneficiary might spend a perceived windfall unwisely, the trustee might consider using the power to adjust to spread distributions over an appropriate period of time. Such a spread over time might be more palatable if, instead of labelling the adjustment to sale proceeds as a tax reimbursement, the trustee labelled it as a make-up for insufficient bonus distributions, taking the position that future distributions to beneficiaries might be loosened because of a prior conservative distribution policy. The bonus distributions might have been sufficient from the viewpoint of what the entity should have distributed but might have been insufficient from the viewpoint of how much income the trustee should have tried to generate. As mentioned in part III.A.4.d.iv Advising Clients about the UPAIA § 505 Change and UFIPA § 506 (discussing conflicts with beneficiaries that might arise when an entity makes tax distributions but little or no bonus distributions), these issues have no easy answer.

See also part II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the Trust Accounting Rules.

I.A.1.q.i.(c). Unitrust

A unitrust is a trust that distributes fixed amounts, redetermined annually as a fixed percentage of the value of the trust's value, which value is redetermined annually but might be based on an average of values, such as the average value of the trust's assets for the past three years. See parts II.J.5.b.ii.(b) Unitrust and II.J.5.b.ii.(c) Comparing Power to Adjust to a Unitrust.

Reg. § 1.643(a)-3(e) provides the following examples regarding unitrusts:

> *Example (11)*. The applicable state statute provides that a trustee may make an election to pay an income beneficiary an amount equal to four percent of the fair market value of the trust assets, as determined at the beginning of each taxable year, in full satisfaction of that beneficiary's right to income. State statute also provides that this unitrust amount shall be considered paid first from ordinary and tax-exempt income, then from net short-term capital gain, then from net long-term capital gain, and finally from return of principal. Trust's governing instrument provides that A is to receive each year income as defined under state statute. Trustee makes the unitrust election under state statute. At the beginning of the taxable year, Trust assets are valued at $500,000. During the year, Trust receives $5,000 of dividend income and realizes $80,000 of net long-term gain from the sale of capital assets. Trustee distributes to A $20,000 (4% of $500,000) in satisfaction of A's right to income. Net long-term capital gain in the amount of $15,000 is allocated to income pursuant to the ordering rule of the state statute and is included in distributable net income for the taxable year.
>
> *Example (12)*. The facts are the same as in Example 11, except that neither state statute nor Trust's governing instrument has an ordering rule for the character of the unitrust amount, but leaves such a decision to the discretion of Trustee. Trustee intends to follow a regular practice of treating principal, other than capital gain, as distributed to the beneficiary to the extent that the unitrust amount exceeds Trust's ordinary and tax-exempt income. Trustee evidences this treatment by not including any capital gains in distributable net income on Trust's Federal income tax return so that the entire $80,000 capital gain is taxed to Trust. This treatment of the capital gains is a reasonable exercise of Trustee's discretion. In future years Trustee must consistently follow this treatment of not allocating realized capital gains to income.
>
> *Example (13)*. The facts are the same as in Example 11, except that neither state statutes nor Trust's governing instrument has an ordering rule for the character of the unitrust amount, but leaves such a decision to the discretion of Trustee. Trustee intends to follow a regular practice of treating net capital gains as distributed to the beneficiary to the extent the unitrust amount exceeds Trust's ordinary and tax-exempt income. Trustee evidences this treatment by including $15,000 of the capital gain in distributable net income on Trust's Federal income tax return. This treatment of the capital gains is a reasonable exercise of Trustee's discretion. In future years Trustee must consistently treat realized capital gain, if any, as distributed to the beneficiary to the extent that the unitrust amount exceeds ordinary and tax-exempt income.

A right to income expressed initially solely as a unitrust interest may qualify for the QTIP marital deduction.

I.A.1.q.i.(d). Exceptions in the Governing Instrument

Although the Act provides general rules, it also allows trust agreements to override those rules:

> In allocating receipts and disbursements to or between principal and income, and with respect to any matter within the scope of [Articles] 2 and 3, a fiduciary:
>
> (1) shall administer a trust or estate in accordance with the terms of the trust or the will, even if there is a different provision in this [Act];
>
> (2) may administer a trust or estate by the exercise of a discretionary power of administration given to the fiduciary by the terms of the trust or the will, even if the exercise of the power produces a result different from a result required or permitted by this [Act];
>
> (3) shall administer a trust or estate in accordance with this [Act] if the terms of the trust or the will do not contain a different provision or do not give the fiduciary a discretionary power of administration; and
>
> (4) shall add a receipt or charge a disbursement to principal to the extent that the terms of the trust and this [Act] do not provide a rule for allocating the receipt or disbursement to or between principal and income.

I.A.1.q.i.(e). Fiduciary Income Tax Recognition of the Trust Agreement and State Law

Code § 643(b) generally defers to the trust agreement and applicable state law. The Uniform Principal and Income Act ("UPIA") and the Uniform Fiduciary Principal & Income Act ("UFIPA") authorizes the trust agreement to override the Act.

However, Reg. § 1.643(b)-1 does not recognize trust agreements that depart too far from the usual rules:

> Trust provisions that depart fundamentally from traditional principles of income and principal will generally not be recognized. For example, if a trust instrument directs that all the trust income shall be paid to the income beneficiary but defines ordinary dividends and interest as principal, the trust will not be considered one that under its governing instrument is required to distribute all its income currently for purposes of section 642(b) (relating to the personal exemption) and section 651 (relating to simple trusts). Thus, items such as dividends, interest, and rents are generally allocated to income and proceeds from the sale or exchange of trust assets are generally allocated to principal.

Reg. § 1.643(b)-1 respects variations provided under applicable state law:

> However, an allocation of amounts between income and principal pursuant to applicable local law will be respected if local law provides for a reasonable apportionment between the income and remainder beneficiaries of the total return of the trust for the year,

> including ordinary and tax-exempt income, capital gains, and appreciation. For example, a state statute providing that income is a unitrust amount of no less than 3% and no more than 5% of the fair market value of the trust assets, whether determined annually or averaged on a multiple year basis, is a reasonable apportionment of the total return of the trust. Similarly, a state statute that permits the trustee to make adjustments between income and principal to fulfill the trustee's duty of impartiality between the income and remainder beneficiaries is generally a reasonable apportionment of the total return of the trust. Generally, these adjustments are permitted by state statutes when the trustee invests and manages the trust assets under the state's prudent investor standard, the trust describes the amount that may or must be distributed to a beneficiary by referring to the trust's income, and the trustee after applying the state statutory rules regarding the allocation of receipts and disbursements to income and principal, is unable to administer the trust impartially. Allocations pursuant to methods prescribed by such state statutes for apportioning the total return of a trust between income and principal will be respected regardless of whether the trust provides that the income must be distributed to one or more beneficiaries or may be accumulated in whole or in part, and regardless of which alternate permitted method is actually used, provided the trust complies with all requirements of the state statute for switching methods.

Circling back to the Act's authorizing trust agreements to depart from traditional principles, Reg. § 1.643(b)-1 concludes with:

> In addition, an allocation to income of all or a part of the gains from the sale or exchange of trust assets will generally be respected if the allocation is made either pursuant to the terms of the governing instrument and applicable local law, or pursuant to a reasonable and impartial exercise of a discretionary power granted to the fiduciary by applicable local law or by the governing instrument, if not prohibited by applicable local law.

For the "reasonable and impartial exercise" requirement in the context of the power to adjust, see part II.J.5.b.ii.(a) Power to Adjust.

I often use a clause providing that the trustee has wide discretion but must reasonably and fairly balance the interests of the income and remainder beneficiaries. That language comes from the marital deduction regulations. Generally, the trustee's authority to allocate between income and principal does not trigger grantor trust status, does not constitute a power of appointment, and does not have generation-skipping transfer tax implications. The trustee might want to consider providing accountings or other notices to the beneficiaries that would start running the statute of limitations for making a claim against the trustee so that the beneficiaries could not add up all of their alleged grievances and then pile this one on top of it, which procedure might help minimize any gift tax consequences to failing to make a claim.

How does one draw the line between what departs "fundamentally from traditional principles of income and principal" and what is "a reasonable and impartial exercise of a discretionary power granted to the fiduciary" under Reg. § 1.643(b)-1?

Presumably, the trustee should be on solid ground in allocating to income capital gains such that the total amount of all receipts allocated to income does not exceed 5%, given that the regulations expressly approve unitrusts in the 3%-5% range. The trusts should also be on solid ground in allocating to income capital gains generated by a partnership that the settlor intended to distribute to the income beneficiary.

Beyond that, it's a matter of facts and circumstances and judgment. However, Reg. § 1.643(a)-3(e), Example (4) respected a mandatory allocation of capital gain to income where a trust had $5,000 of dividends and $10,000 of capital gains, and the trustee distributed $17,000 to the beneficiary.

I.A.1.q.i.(f). Conclusion Regarding Allocating Capital Gain to Income

Reg. § 1.643(a)-3(b)(1) requires a consistent practice for unitrusts. Considering that the unitrust recipient is receiving cash and presumably would have the liquidity to pay tax on any capital gains distributed to the beneficiary, in many cases it would be fair to allocate capital gain to DNI to the extent that the unitrust amount exceeds the income that would apply under the Act's general rules. Given that one provides for a unitrust when tension between the income beneficiary and remaindermen might be high, the tension created by this tax issue would be high to the same degree. Consider providing a firm rule in the trust agreement regarding the allocation of capital gain to DNI. If one is concerned that shifting tax rates might create an unfair tax result, consider providing a clause reimbursing the unitrust beneficiary for taxes paid on the unitrust and on the reimbursement; this requires cooperation between the trustee's income tax preparer and the beneficiary's income tax preparer, but the calculation should be relatively mechanical.

For trusts that are not unitrusts, Reg. § 1.643(a)-3(b)(1) provides significant flexibility, allowing the trustee discretion whether to allocate capital gain to income for fiduciary accounting purposes (if the trust agreement and state law permit) and also whether to include in DNI the capital gain that was allocated to income.

Consider the nuances for a mandatory income trust. Distributions must be made no later than 65 days after yearend to include capital gain in DNI in every other situation. In a mandatory income trust, a power to adjust might be able to retroactively include capital gain in income – perhaps as late as when the tax return is prepared. For how mandatory income trusts work, see part II.J.5 Mandatory Income Trusts. For limits on retroactivity, see part II.J.5.a Issues Arising with Mandatory Income Trusts.

I.A.1.q.ii. Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary

Reg. § 1.643(a)-3(e) helps guide our application of Reg. § 1.643(a)-3(b)(2):

> *Example (1)*. Under the terms of Trust's governing instrument, all income is to be paid to A for life. Trustee is given discretionary powers to invade principal for A's benefit and to deem discretionary distributions to be made from capital gains realized during the year. During Trust's first taxable year, Trust has $5,000 of dividend income and $10,000 of capital gain from the sale of securities. Pursuant to the terms of the governing instrument and applicable local law, Trustee allocates the $10,000 capital gain to principal. During the year, Trustee distributes to A $5,000, representing A's right to trust income. In addition, Trustee distributes to A $12,000, pursuant to the discretionary power to distribute principal. Trustee does not exercise the discretionary power to deem the

discretionary distributions of principal as being paid from capital gains realized during the year. Therefore, the capital gains realized during the year are not included in distributable net income and the $10,000 of capital gain is taxed to the trust. In future years, Trustee must treat all discretionary distributions as not being made from any realized capital gains.

Example (2). The facts are the same as in Example 1, except that Trustee intends to follow a regular practice of treating discretionary distributions of principal as being paid first from any net capital gains realized by Trust during the year. Trustee evidences this treatment by including the $10,000 capital gain in distributable net income on Trust's federal income tax return so that it is taxed to A. This treatment of the capital gains is a reasonable exercise of Trustee's discretion. In future years Trustee must treat all discretionary distributions as being made first from any realized capital gains.

Example (3). The facts are the same as in Example 1, except that Trustee intends to follow a regular practice of treating discretionary distributions of principal as being paid from any net capital gains realized by Trust during the year from the sale of certain specified assets or a particular class of investments. This treatment of capital gains is a reasonable exercise of Trustee's discretion.

The all-or-nothing approach taken by Examples (1) and (2) is not very attractive, but we need to deal with it. Let's consider some fact patterns:

1. <u>The beneficiary needs regular annual distributions that cannot be made using a power to adjust</u>. Generally, distributions in excess of what can made using a power to adjust would not be sustainable. A power to adjust typically adjusts to a 3%-5% distribution, and most models suggest that distributions in excess of that will lead to a trust being depleted. Thus, a more likely scenario is that a power to adjust is not available, because state law prevents using the power to adjust in particular situations (unless the trust agreement overrides it). In such a case, the beneficiary's federal and state/local income tax bracket for capital gains needs to be compared to the trust's federal and state/local income tax bracket for capital gains. Note that a nonresident trust would have a zero state/local income tax bracket, to the extent that the trust does not have income from a business sourced to the state/local jurisdiction.

2. <u>The beneficiary's need for distributions in excess of income is sporadic</u>. It's difficult to predict how the beneficiary's federal and state/local income tax bracket for capital gains compares to the trust's federal and state/local income tax bracket for capital gains, given that rates will change and the trust's and its beneficiaries' circumstances might change over time. In such a case, consider whether the distribution might be phrased as "allocated to corpus but actually distributed to the beneficiary or utilized by the fiduciary in determining the amount that is distributed or required to be distributed to a beneficiary." If that is likely to be the case, then consider not electing to carry out capital gain automatically under (b)(2) but rather deciding to rely on (b)(3), because (b)(3) is flexible whether to allocate capital gain to income, allowing the decision to made separately each year on a case-by-case basis.

Generally, trustees would not be likely to take advantage of the discretion that Example (3) provides to allocate to income only capital gain from the sale of certain specified assets or a particular class of investments, because such an election requires additional recordkeeping.

Some people point to the word “deem” in Example (1) and emphasize the need for such authority in the trust agreement or applicable state law. Uniform Trust Code § 816 generally authorizes trustees to make tax elections, so the authority to “deem” distributions to be capital gains is inherently authorized in UTC states, as well as any other state where a trustee generally has the authority to make tax elections.

I.A.1.q.iii. Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary

Reg. § 1.643(a)-3(b)(3) might seem confusing at first, but it actually has very practical use.

First, let’s look at some examples that Reg. § 1.643(a)-3(e) provides:

> Example (5). The facts are the same as in Example 1, except that Trustee decides that discretionary distributions will be made only to the extent Trust has realized capital gains during the year and thus the discretionary distribution to A is $10,000, rather than $12,000. Because Trustee will use the amount of any realized capital gain to determine the amount of the discretionary distribution to the beneficiary, the $10,000 capital gain is included in Trust’s distributable net income for the taxable year.
>
> *Example (6)*. Trust’s assets consist of Blackacre and other property. Under the terms of Trust’s governing instrument, Trustee is directed to hold Blackacre for ten years and then sell it and distribute all the sales proceeds to A. Because Trustee uses the amount of the sales proceeds that includes any realized capital gain to determine the amount required to be distributed to A, any capital gain realized from the sale of Blackacre is included in Trust’s distributable net income for the taxable year.

Although Reg. § 1.643(a)-3(b)(3) is viewed generally as discretionary, note that Example (6) is mandatory: if the trustee is required to distribute sale proceeds to a beneficiary, the capital gain from the sale is included in the DNI that the distribution carries out the beneficiary. Example (7) similarly requires all capital gain recognized in the trust’s final taxable year to be included in the DNI that the distribution carries out the beneficiary.

The practical application is based on the ability to count as prior year distributions those distributions made in the first 65 days of the current year. For example, any distribution made on or before March 5, 2020 can be treated as a 2019 or 2020 distribution. This election applies to the greater of accounting income under Reg. § 1.643(b)-1 or DNI under Reg. §§ 1.643(a)-1 through 1.643(a)-7. By completing the line on the trust’s income tax return, Form 1041, page 2, Part B, showing amounts (other than income required to be distributed currently) paid, credited, or otherwise required to be distributed and checking the Code § 663(b) box in “Other Information” at the bottom of Form 1041, page 2, the trustee decides how much of a current year distribution is allocated to the prior year; the balance would then be credited to the current year.

The practical application based on the 65-day rule would generally occur during February after the year ends and applies only if the trustee has discretion to distribute corpus. The regulations do not specify any particular trust records regarding the election, so do whatever seems best to evidence the intent. Perhaps the income tax return preparer emails the trustee recommending how much of a distribution be made to distribute income and capital gain under the 65-day rule (erring on the side of distributing too much), then the trustee makes the distribution, and the tax return carries through the intent. As long as the distribution is made timely, the tax return can treat none, part, or all of the distribution as a distribution of the taxable year's income. In a manner similar to Example (5), the trustee has referred to the capital gain itself in determining how much to distribute. Unlike Reg. § 1.643(a)-3(b)(2), Reg. § 1.643(a)-3(b)(3) allows one to carry out discretionary distributions of capital gain inconsistently from one year to another.

If the beneficiary does not require monthly or quarterly cash flow, the trustee can simply each February make a big distribution and apply it to the prior or current year for tax return preparation purposes. If the beneficiary does require monthly cash flow but is willing to accept informal constraints, the trustee makes the big distribution into an investment account that the beneficiary owns, and the account makes monthly transfers to the beneficiary's checking account. Obviously this would not work for a beneficiary who cannot exercise discipline, but there is a good segment of beneficiaries for whom it would work.

An alternative approach is to distribute an asset to a beneficiary before the asset is sold. Generally, the beneficiary will receive a carryover basis and then be taxed on the gain.

As with all tax planning, the strategies described in this part II.J.8.c.iii may be unavailable (based on the trust terms), inadvisable (based on sound financial planning), or stupid (giving money to a drug addict just to save taxes).

I.A.1.q.iv. Netting Capital Losses

Reg. § 1.643(a)-3(d), "Capital losses," provides:

> Losses from the sale or exchange of capital assets shall first be netted at the trust level against any gains from the sale or exchange of capital assets, except for a capital gain that is utilized under paragraph (b)(3) of this section in determining the amount that is distributed or required to be distributed to a particular beneficiary. See § 1.642(h)-1 with respect to capital loss carryovers in the year of final termination of an estate or trust.

Thus, if and to the extent that Reg. § 1.643(a)-3(b)(3) includes capital gains in DNI (see part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary), capital losses are not netted against such gains. The recipient beneficiaries report all such capital gains, and the capital losses remain in the trust.

However, note that Reg. § 1.643(a)-3(b)(3) has two elements: "actually distributed to the beneficiary," which would tend to require tracing except in the case of trust termination, or "utilized by the fiduciary in determining the amount that is distributed or required to be distributed to a beneficiary," in which case the trustee would have needed to consciously decide to refer to the capital gain when making the distribution.

Unless the trustee traces or decides to refer to the gross capital gain (instead of the net capital gain) when making the distribution, the loss would be offset under Reg. § 1.643(a)-3(b)(3). Alternatively, the trustee might not trace and not refer to capital gain but rather exercise the power to adjust, which would invoke Reg. § 1.643(a)-3(b)(1) (see part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law) and include an automatic offset.

I.A.1.q.v. Conclusions Regarding the Basic Framework on Allocating Capital Gains to DNI

Often, one cannot predict whether the combination of federal, state, and local income tax rates will be higher inside or outside of the trust.

Quite frankly, I keep changing my mind regarding the best income tax elections as I encounter new situations. If the document is flexible as to distributions and distributions are appropriate, then I would lean toward:

- Flexible language allowing the trustee to allocate capital gains to income, so long as the trustee must reasonably and fairly balance the interests of the income and remainder beneficiaries.

- Using the 65-day-rule to distribute large capital gains to the beneficiary as DNI.

- Electing <u>not</u> to establish a practice of carrying out capital gain to beneficiaries under Reg. § 1.643(a)-3(b)(2) <u>unless</u> it appears that the above two approaches will not suffice to minimize overall income taxes. However, it is not uncommon for me to decide that the above. two approaches will not suffice to minimize overall income taxes. On the other hand, if the situation involves enough money, the trustee can covert capital gain that would otherwise be trapped inside the trust to trust accounting income, using the tool described in part II.J.8.e Partnerships and S corporations Carry Out Income and Capital Gain to Beneficiaries.

Consider adding a withdrawal right of up to 5% of the trust's value. The beneficiary will be deemed to be the owner of the part that the beneficiary can withdraw and perhaps continue to be deemed the owner with respect to the lapsed portion. However, note that withdrawal rights can increase exposure to creditors to the extent of the withdrawal right and perhaps even after a lapse. For details on all of the ideas mentioned in this paragraph, see part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts. If one is concerned about the withdrawal right itself becoming a bad idea, consider using a provision along the following the lines:

> In addition to the distributions authorized by the preceding sentence, subject to the following sentence the trustee shall distribute to the beneficiary so much of the principal of the trust as the beneficiary, while at least __ years of age, may request once between February 23 and March 5 of every calendar year, on a noncumulative basis, up to five percent (5%) of the aggregate value, as of the time of such request by the beneficiary, of the principal of the trust. The trustee may, by instrument placed in the trust's records, provide that the preceding sentence shall not apply during any period (including the beneficiary's remaining life), which period shall begin no earlier than the January 1 following the date of the instrument.

This allows the trustee to turn off the withdrawal rights for any future year(s) without impeding the beneficiary's absolute right to withdraw during the current year.

I.A.1.q.vi. Fairness of Taxing Capital Gain to Beneficiaries; Need for Tax Distributions Here and Other Areas

Our income tax system taxes income to whoever receives it, subject to certain exceptions not relevant to this part II.J.8.c.vi. Therefore, it is fair to tax the beneficiaries.

However, when a distribution is made for a particular purpose and the money is spent, the beneficiary will get upset when handed a tax bill for which the beneficiary did not plan. Therefore, one might need to make a supplemental distribution to pay tax on the original distribution. The supplemental distribution would also need to be enough to pay tax on the supplemental distribution itself. This supplemental distribution is often referred to as "grossing up the distribution" to pay taxes.

This issue applies to more than just capital gains. Clients who leave residences in trust often wish to have the trust pay expenses that a life tenant would ordinarily pay. Distributions by the trust for those purposes run into the same problem – the money is spent for the intended purpose and not available to pay taxes. These distributions also need to be grossed up to pay taxes.

I.A.1.r. Distribution in Kind; Specific Bequests

I.A.1.r.i. Distribution in Kind - Generally

Except as provided below and except to the extent that it carries out DNI or constitutes a bequest of income, a distribution is a nontaxable gift (unless the recipient assumes liabilities, in which case it is taxed as a bargain sale).

When a trust distributes property to satisfy a pecuniary distribution (even if the amount is expressly authorized to be satisfied in cash or in kind), the trust recognizes gain on the deemed sale, even if the trust's residue is less than the pecuniary obligation. Such a pecuniary obligation includes an equalizing distribution (presumably unless expressed as a fractional share). This rule includes a pecuniary obligation in the form of an annuity payment to a beneficiary, and the gain recognized in paying the annuity is not included in the beneficiary's distributive net income (DNI) unless the rules for including capital gain in DNI are satisfied. If the trust's residue is less than the pecuniary obligation, the fact that all bequests are protected by Code § 663(a)(1) and therefore no residual beneficiary can pick up income under Code § 662 means that the trust will pay the tax, given that the beneficiaries of the protected bequests will not be picking up that income; note that the trustee will need to reserve for this tax before making distributions to beneficiaries and may have a mismatch for net investment income tax purposes as well. However, when a charity that was the annuity recipient was bequeathed the remainder, the resulting merger of interests and trust termination were not a taxable event. Also, if the bequest is satisfied using date-of-death values, presumably no gain or loss would be realized, but to qualify for the marital or charitable deduction the assets' value relative to date of death values must be "fairly representative of appreciation or depreciation in the value of all property thus available for distribution in satisfaction of such pecuniary bequest or transfer."

If a trust makes a non-pro rata distribution of residue without either the trust instrument or local law authorizing a non-pro rata distribution, each beneficiary may be treated as having received a pro rata distribution and exchanged it with the other beneficiaries. Otherwise, generally the trust does not recognize any gain or loss and the beneficiaries receive the same basis as the trust's; for further analysis of dividing trusts (including on termination), see part II.D.5 Severing Trusts with Multiple Grantors. However, the trust may elect to treat all property distributions during the taxable year as sales, but losses in transactions with beneficiaries and other related parties are disallowed except to the extent that they are from an estate (including a revocable trust electing to be taxed as an estate) satisfying a pecuniary bequest. The loss disallowance applies even if the distribution, taken as a whole, results in a net gain. Thus, gains are recognized and losses generally are not.

The amount deemed distributed is the lesser of the property's basis or fair market value, unless gain was recognized, in which case it is the property's value.

Distributing low basis assets will generate a new basis (often a step-up) when the beneficiary dies. However, distributed assets are subject to the beneficiary's creditors, changes in the beneficiary's estate tax posture (including not only changes in the tax law but also changes in financial situation through the beneficiary's own efforts or through marriage and change in residence to a state that imposes its own estate tax), and changes in the beneficiary's dispositive goals. To get a basis step-up, I would rather add (perhaps by decanting) a formula general power of appointment, as described in part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap.

Distributing an unmarketable partnership interest would carry out DNI without giving the beneficiary cash. However, valuation adjustments might depress the amount of the deemed distributions, and the beneficiary would be entitled to a proportionate share of future distributions from the partnership. However, if the trustee controls the partnership, the trustee can also control the distribution spigot.

I.A.1.r.ii. Specific Bequest

A gift or bequest of a specific sum of money or of specific property, which is required by the specific terms of the will or trust instrument and is properly paid or credited to a beneficiary, is not allowed as a deduction to an estate or trust under Code § 661 and is not included in the gross income of a beneficiary under Code § 662, unless under the terms of the will or trust instrument the gift or bequest is to be paid or credited to the recipient in more than three installments.

I.A.1.r.iii. Distributing a Note to the Obligor

Rev. Rul. 75-68 provides:

> The income of a testamentary trust consisting solely of interest from mortgages on the beneficiary's property was required to be distributed periodically. Although the mortgage notes held by the trust required the periodic payment of interest, it was agreed between

the beneficiary and the trustees, that the beneficiary would pay no interest on the mortgages and the trustees would distribute no income from the trust.

Held, notwithstanding the foregoing agreement, the interest income due on the mortgages held by the trust is includible in the gross income of the trust, and this same amount, as the distributable income of the trust, is includible in the gross income of the beneficiary. Further, the beneficiary is entitled to a deduction for this interest deemed paid on the mortgages.

Below is authority consistent with this conclusion:

Reg. § 1.643(c)-1(a) treats as a beneficiary "any person with respect to an amount used to discharge or satisfy that person's legal obligation as that term is used in § 1.662(a)-4." Reg. § 1.661(a)-2(d) provides:

The terms "income required to be distributed currently" and "any other amounts properly paid or credited or required to be distributed" also include any amount used to discharge or satisfy any person's legal obligation as that term is used in § 1.662(a)-4.

Reg. § 1.662(a)-4, "Amounts used in discharge of a legal obligation," provides:

Any amount which, pursuant to the terms of a will or trust instrument, is used in full or partial discharge or satisfaction of a legal obligation of any person is included in the gross income of such person under section 662(a)(1) or (2), whichever is applicable, as though directly distributed to him as a beneficiary, except in cases to which section 71 (relating to alimony payments) or section 682 (relating to income of a trust in case of divorce, etc.) applies. The term "legal obligation" includes a legal obligation to support another person if, and only if, the obligation is not affected by the adequacy of the dependent's own resources. For example, a parent has a "legal obligation" within the meaning of the preceding sentence to support his minor child if under local law property or income from property owned by the child cannot be used for his support so long as his parent is able to support him. On the other hand, if under local law a mother may use the resources of a child for the child's support in lieu of supporting him herself, no obligation of support exists within the meaning of this paragraph, whether or not income is actually used for support. Similarly, since under local law a child ordinarily is obligated to support his parent only if the parent's earnings and resources are insufficient for the purpose, no obligation exists whether or not the parent's earnings and resources are sufficient. In any event, the amount of trust income which is included in the gross income of a person obligated to support a dependent is limited by the extent of his legal obligation under local law. In the case of a parent's obligation to support his child, to the extent that the parent's legal obligation of support, including education, is determined under local law by the family's station in life and by the means of the parent, it is to be determined without consideration of the trust income in question.

Reg. § 1.661(a)-2(d) provides:

> The terms "income required to be distributed currently" and "any other amounts properly paid or credited or required to be distributed" also include any amount used to discharge or satisfy any person's legal obligation as that term is used in § 1.662(a)-4.

I.A.1.s. Partnerships and S corporations Carry Out Income and Capital Gain to Beneficiaries

Generally, K-1 income from a passthrough business entity will carry out any income (including capital) distributed to the trust and then to the trust's beneficiaries. This section focuses on nongrantor trusts holding partnerships rather than S corporations, because generally a trust can hold S corporation stock that is not a grantor trust, QSST, or ESBT only during a relatively limited amount of time. (Although the principles in this part II.J.8.e would apply to a net income with make-up charitable remainder unitrust – a NIMCRUT – the IRS has concerns about that application and might shut it down at some point.)

Also, if one elected not to carry out capital gains under Reg. § 1.643(a)-3(b)(2) and later decides that all capital gain should be included in DNI going forward (or does not want to take a risk that the IRS will not respect deviations from general rules of the Uniform Principal and Income Act, consider forming an entity taxed as a partnership. Capital gains earned through a partnership generally constitute trust accounting income.

The Uniform Principal and Income Act provides that, generally, all cash distributions from an entity (including a partnership) are considered trust accounting income. Only the following distributions from an entity are not considered trust accounting income:

- property other than money;
- money received in one distribution or a series of related distributions in exchange for part or all of a trust's interest in the entity;
- money received in total or partial liquidation of the entity; and
- money received from an entity that is a regulated investment company or a real estate investment trust if the money distributed is a capital gain dividend for federal income tax purposes.

Thus, a partnership's capital gains recognized in the ordinary course of managing and re-balancing a portfolio would constitute fiduciary accounting income to the extent distributed from the partnership in cash and therefore would be includible in DNI under (1) above.

To keep control of the partnership, consider having the trust be a 1% general partner and 98% limited partner, and the beneficiary or someone else might contribute 1% as a limited partner. Distributing a limited partnership interest to a beneficiary can carry out income and perhaps capital gain while at the same time not giving the beneficiary cash to spend (but be sure to distribute enough cash so that the beneficiary can pay tax on the distribution). Be careful to avoid the gain on formation that applies when a contributing partner diversifies the partner's holdings by forming the partnership. If the trust holds not only marketable securities but also investments in businesses, consider setting up one partnership for the business investments and another partnership for the marketable securities, which would help facilitate allocating trust assets on termination or any other trust division. Also consider whether a state with jurisdiction over the trust might subject the partnership itself to state income tax.

Complexity might arise if a partnership distributes less than all of its taxable income to a mandatory income trust. It is unclear whether all of the trust's distributive share of capital gain is DNI. Furthermore, interrelated calculations might be required for a mandatory income trust. Generally, we should look to see whether planning under part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law or II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary is sufficient before recommending a partnership solely to address the issues described in part II.J.8.c.ii Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary.

I.A.1.t. Consequences of Allocating Capital Gain to DNI

I.A.1.t.i. General Rules of the Proportion of DNI Constitutes Capital Gain Compared to Other Income (and General Retention of the Character of DNI Distributed to Beneficiaries)

This part II.J.8.f.i first discusses netting deductions against income then discusses allocating that income.

I.A.1.t.i.(a). Allocating Deductions to Various Income Items

Rules for allocating deductions include:

- All deductible items directly attributable to one class of income are allocated to that class. To the extent that any items of deduction which are directly attributable to a class of income exceed that class of income, they may be allocated to any other class of income (including capital gains) included in distributable net income as described above except that any excess deductions attributable to tax-exempt income may not be offset against any other class of income.

- Deductions not directly attributable to a specific class of income may be allocated to any item of income (including capital gains) included in computing DNI, but Code § 265 requires a portion of such indirect expenses to be allocated to non-taxable income. Such indirect expenses include trustee fees, the rental of safe deposit boxes, and state income and personal property taxes. Once one has allocated expenses to tax-exempt income, how does one choose to which items of taxable income to allocate deductions? One would consider allocating to those income items that are most highly taxed, considering federal and state income tax and the 3.8% tax on net investment income. For example, interest income is taxed at the highest rates, whereas qualified dividends are taxed at long-term capital gain rates. Within interest income, consider whether the interest is from U.S. obligations exempt from state income tax. Although distributions from qualified retirement plans and IRAs are taxed at the highest regular tax rate, they are exempt from the 3.8% tax on net investment income. See part II.I.6 Deductions Against NII (especially the text accompanying fns. 2307-2308).

- If a charitable deduction under Code § 642(c) is involved, any allocations of taxable income between the charitable deduction and the beneficiaries must have substantial economic effect.

- Special rules apply to depreciation deductions.

I.A.1.t.i.(b). Allocating Income Items Among Those Receiving It

In allocating income between the trust and the beneficiary (or beneficiaries), the amounts of DNI distributed to the beneficiaries:

> shall be treated as consisting of the same proportion of each class of items entering into the computation of distributable net income of the estate or trust as the total of each class bears to the total distributable net income of the estate or trust in the absence of the allocation of different classes of income under the specific terms of the governing instrument.

However, this proportionate rule is subject to specific provisions in the governing instrument for the allocation of different classes of income or different allocations under local law, subject to tax-exempt income being allocated in a manner that does not allow it to be deducted.

Thus, except for tax-exempt income and allocations between the charitable and noncharitable shares (and any special rules regarding depreciation deductions), it appears that a trust agreement may create ordering provisions between which items of DNI the trust retains and which items of DNI the trust distributes to beneficiaries. However, such a provision might encounter significant resistance from the IRS.

Once one decides which items of DNI the trust distributes to beneficiaries, generally distributions to each beneficiary carry out a pro rata portion of ordinary income and capital gain items allocated to the beneficiaries, and any other characteristic of the income at the trust level retains its status in the beneficiary's hands (which, among other things, is important for net investment income tax purposes). Code § 652(b) provides that amounts included in the beneficiary's income for regular income tax purposes:

> … shall have the same character in the hands of the beneficiary as in the hands of the trust. For this purpose, the amounts shall be treated as consisting of the same proportion of each class of items entering into the computation of distributable net income of the trust as the total of each class bears to the total distributable net income of the trust, unless the terms of the trust specifically allocate different classes of income to different beneficiaries. In the application of the preceding sentence, the items of deduction entering into the computation of distributable net income shall be allocated among the items of distributable net income in accordance with regulations prescribed by the Secretary.

Code § 662(b) provides that amounts included in the beneficiary's income for regular income tax purposes:

> … shall have the same character in the hands of the beneficiary as in the hands of the estate or trust. For this purpose, the amounts shall be treated as consisting of the same proportion of each class of items entering into the computation of distributable net income as the total of each class bears to the total distributable net income of the estate or trust unless the terms of the governing instrument specifically allocate different classes of income to different beneficiaries. In the application of the preceding sentence, the items of deduction entering into the computation of distributable net income (including the deduction allowed under section 642(c)) shall be allocated among the items of distributable net income in accordance with regulations prescribed by the Secretary. In the application of this subsection to the amount determined under paragraph (1) of subsection (a), distributable net income shall be computed without regard to any portion of the deduction under section 642(c) which is not attributable to income of the taxable year.

Reg. § 1.662(b)-1 provides:

> In determining the amount includible in the gross income of a beneficiary, the amounts which are determined under section 662(a) and §§ 1.662(a)-1 through 1.662(a)-4 shall have the same character in the hands of the beneficiary as in the hands of the estate or trust. The amounts are treated as consisting of the same proportion of each class of items entering into the computation of distributable net income as the total of each class bears to the total distributable net income of the estate or trust unless the terms of the governing instrument specifically allocate different classes of income to different beneficiaries, or unless local law requires such an allocation. For this purpose, the principles contained in § 1.652(b)-1 shall apply.

Reg. § 1.652(b)-1 provides:

> In determining the gross income of a beneficiary, the amounts includible under § 1.652(a)-1 have the same character in the hands of the beneficiary as in the hands of the trust. For example, to the extent that the amounts specified in § 1.652(a)-1 consist of income exempt from tax under section 103, such amounts are not included in the beneficiary's gross income. Similarly, dividends distributed to a beneficiary retain their original character in the beneficiary's hands for purposes of determining the availability to the beneficiary of the dividends received credit under section 34 (for dividends received on or before December 31, 1964) and the dividend exclusion under section 116…. Similarly, to the extent such amounts consist of an amount received as a part of a lump sum distribution from a qualified plan and to which the provisions of section 72(n) would apply in the hands of the trust, such amount shall be treated as subject to such section in the hands of the beneficiary except where such amount is deemed under section 666(a) to have been distributed in a preceding taxable year of the trust and the partial tax described in section 668(a)(2) is determined under section 668(b)(1)(B). The tax treatment of amounts determined under § 1.652(a)-1 depends upon the beneficiary's status with respect to them not upon the status of the trust. Thus, if a beneficiary is deemed to have received foreign income of a foreign trust,

the includibility of such income in his gross income depends upon his taxable status with respect to that income.

This proportionate requirement applies "unless the terms of the governing instrument specifically allocate different classes of income to different beneficiaries, or unless local law requires such an allocation."

When allocating income among beneficiaries:

> The terms of the trust are considered specifically to allocate different classes of income to different beneficiaries only to the extent that the allocation is required in the trust instrument, and only to the extent that it has an economic effect independent of the income tax consequences of the allocation.

I.A.1.t.ii. How Undistributed Capital Gains Being Allocated to DNI Affects Character of Income Trapped Inside of Trust Compared to Distributed to the Beneficiary

If the amount of DNI is less than the amount distributed to the beneficiary, the issues described in this part II.J.8.f.ii How Undistributed Capital Gains Being Allocated to DNI Affects Character of Income Trapped Inside of Trust Compared to Distributed to the Beneficiary become important.

Some income might be inadvertently trapped in the trust if the allocation rules of part II.J.8.f.i General Rules of the Proportion of DNI Constitutes Capital Gain Compared to Other Income apply without being modified by any special ordering rule in the trust agreement and if all of a pass-through entity's capital gain constitutes DNI under an approach described in part II.J.8.a.ii Whether the Gain from the Sale or Exchange of a Capital Asset Is Allocated to Corpus That's because looking exclusively at those two factors bypasses the analysis of part II.J.5.c.i Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal.

For example, trust has $10,000 of interest income. Trust's distributive share of partnership's income is $20,000 of dividend income and $70,000 of long-term capital gains. If the rules described in the preceding paragraph apply, then 10% of all distributions constitute interest income, 20% constitute dividend income, and 70% constitute long-term capital gains. Trust distributes $50,000 to the beneficiary. Therefore, each of the beneficiary and the trust has $5,000 of interest income, $10,000 of dividend income, and $35,000 of long-term capital gains.

Contrast that to an approach under which the trustee is able to control how much capital gain is included in DNI, under part II.J.5.c.i Basic Framework for Allocating Capital Gain to DNI If Allocated to Income or Principal. On a year-by-year basis, the trustee can selectively include capital gain in DNI to the extent that one or both of part II.J.8.c.ii Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary or part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary is available. By including in DNI just enough capital gain to cause the DNI to match the cash distributed to the beneficiary, the trustee can ensure that all of the ordinary income is distributed to the beneficiary.

QSSTs, because the beneficiary is treated as the owner of the S corporation stock for income tax purposes;[4941] of course, the beneficiary would have the overall charitable deduction contribution limitations, which limitations do not apply to trusts that do not have unrelated business income. An ESBT cannot deduct contributions it makes but can, subject to the rules of this part II.Q.7.c.i, deduct its distributive share of contributions the S corporation makes.[4942]

Once all of this analysis regarding unrelated business income is done at the trust level, presumably it will not be repeated at the charity's level, because the trust does not give the charity a K-1.[4943] When deciding whether to have a business run by a charity itself or by a trust that benefits charity, consider the following:

- If the activity definitely would generate UBTI, run it through the trust. Instead of all of the UBTI being taxed, the trust will be taxed on only the excess UBTI over the charitable deduction.

- If there is substantial authority for the activity not generating UBTI, for example because it is related to the charity's exempt purpose, then perhaps the charity should undertake the activity and report it as not being subject to UBTI.

I.A.1.u. Effectuating Allocation of Capital Gain to DNI

Form 1041 (Schedule D), Part III, column (1) allocates the beneficiaries' shares. Once one separates that, the rest should flow naturally.

.

4941 See fn. 5992.

4942 See part III.A.3.e.ii.(b) ESBT Income Taxation - Overview, especially fns. 6054.

4943 Consistent with Code § 663(a)(2), Reg. § 1.663(a)-2 provides:

> Any amount paid, permanently set aside, or to be used for the charitable, etc., purposes specified in section 642(c) and which is allowable as a deduction under that section is not allowed as a deduction to an estate or trust under section 661 or treated as an amount distributed for purposes of determining the amounts includible in gross income of beneficiaries under section 662. Amounts paid, permanently set aside, or to be used for charitable, etc., purposes are deductible by estates or trusts only as provided in section 642(c). For purposes of this section, the deduction provided in section 642(c) is computed without regard to the provisions of section 508(d), section 681, or section 4948(c)(4) (concerning unrelated business income private foundations).

See fn 2866 in part II.J.9.a.ii Separate Share Rule.

Notice 2004-35 provides:

> The Treasury Department and the Internal Revenue Service intend to propose regulations modifying Treas. Reg. § 53.4940-1(d)(2) to provide that a private foundation's net investment income for purposes of section 4940 does not include distributions from trusts and estates. Until further guidance is promulgated, income distributions from trusts and estates will not retain their character in the hands of a distributee private foundation for purposes of determining the foundation's net investment income under section 4940(c).

II.Q.7.c.ii. Private Foundations, Etc.

A private foundation may hold only limited amounts of an S corporation[4944] (or similar amounts for other entities, including C corporations and partnerships),[4945] and any excess amounts may be held for only five or so years.[4946] However, if the business entity does not operate a business and instead merely generates investment income, it will not be subject to this rule.[4947]

Code § 4941 imposes a modest penalty on each act of self-dealing between a disqualified person and a private foundation.[4948] The tax applies to each participating disqualified person[4949] and foundation manager,[4950] which becomes punitive if not corrected within the taxable period.[4951] "Self-dealing" means any direct or indirect:[4952]

(A) sale or exchange, or leasing, of property between a private foundation and a disqualified person;

(B) lending of money or other extension of credit between a private foundation and a disqualified person;

(C) furnishing of goods, services, or facilities between a private foundation and a disqualified person;

(D) payment of compensation (or payment or reimbursement of expenses) by a private foundation to a disqualified person;

(E) transfer to, or use by or for the benefit of, a disqualified person of the income or assets of a private foundation; and

(F) agreement by a private foundation to make any payment of money or other property to a government official (as defined in section 4946(c)), other than an agreement to employ such individual for any period after the termination of his government service if such individual is terminating his government service within a 90-day period.

[4951] Code § 4941(b).
[4952] Code § 4941(d)(1).

In applying the above rules, Code § 4941(d)(2), "Special rules," provides:

(A) the transfer of real or personal property by a disqualified person to a private foundation shall be treated as a sale or exchange if the property is subject to a mortgage or similar lien which the foundation assumes or if it is subject to a mortgage or similar lien which a disqualified person placed on the property within the 10-year period ending on the date of the transfer;

(B) the lending of money by a disqualified person to a private foundation shall not be an act of self-dealing if the loan is without interest or other charge (determined without regard to section 7872) and if the proceeds of the loan are used exclusively for purposes specified in section 501(c)(3);

(C) the furnishing of goods, services, or facilities by a disqualified person to a private foundation shall not be an act of self-dealing if the furnishing is without charge and if the goods, services, or facilities so furnished are used exclusively for purposes specified in section 501(c)(3);

(D) the furnishing of goods, services, or facilities by a private foundation to a disqualified person shall not be an act of self-dealing if such furnishing is made on a basis no more favorable than that on which such goods, services, or facilities are made available to the general public;

(E) except in the case of a government official (as defined in section 4946(c)), the payment of compensation (and the payment or reimbursement of expenses) by a private foundation to a disqualified person for personal services which are reasonable and necessary to carrying out the exempt purpose of the private foundation shall not be an act of self-dealing if the compensation (or payment or reimbursement) is not excessive;

(F) any transaction between a private foundation and a corporation which is a disqualified person (as defined in section 4946(a)), pursuant to any liquidation, merger, redemption, recapitalization, or other corporate adjustment, organization, or reorganization, shall not be an act of self-dealing if all of the securities of the same class as that held by the foundation are subject to the same terms and such terms provide for receipt by the foundation of no less than fair market value;

(G) in the case of a government official (as defined in section 4946(c)), paragraph (1) shall in addition not apply to -

(i) prizes and awards which are subject to the provisions of section 74(b) (without regard to paragraph (3) thereof), if the recipients of such prizes and awards are selected from the general public,

(ii) scholarships and fellowship grants which would be subject to the provisions of section 117(a) (as in effect on the day before the date of the enactment [10/22/86] of the Tax Reform Act of 1986) and are to be used for study at an educational organization described in section 170(b)(1)(A)(ii),

(iii) any annuity or other payment (forming part of a stock-bonus, pension, or profit-sharing plan) by a trust which is a qualified trust under section 401,

(iv) any annuity or other payment under a plan which meets the requirements of section 404(a)(2),

(v) any contribution or gift (other than a contribution or gift of money) to, or services or facilities made available to, any such individual, if the aggregate value of such contributions, gifts, services, and facilities to, or made available to, such individual during any calendar year does not exceed $25,

(vi) any payment made under chapter 41 of title 5, United States Code, or

(vii) any payment or reimbursement of traveling expenses for travel solely from one point in the United States to another point in the United States, but only if such payment or reimbursement does not exceed the actual cost of the transportation involved plus an amount for all other traveling expenses not in excess of 125 percent of the maximum amount payable under section 5702 of title 5, United States Code, for like travel by employees of the United States; and

(H) the leasing by a disqualified person to a private foundation of office space for use by the foundation in a building with other tenants who are not disqualified persons shall not be treated as an act of self-dealing if -

(i) such leasing of office space is pursuant to a binding lease which was in effect on October 9, 1969, or pursuant to renewals of such a lease;

(ii) the execution of such lease was not a prohibited transaction (within the meaning of section 503(b) or any corresponding provision of prior law) at the time of such execution; and

(iii) the terms of the lease (or any renewal) reflect an arm's-length transaction.

The IRS' web page provides an "an introduction to self-dealing, specifically IRC 4941(d)(1)(C), Furnishing of goods, services, or facilities between a private foundation and a disqualified person," which includes a basic summary and a link to IRS audit techniques.[4953]

Below is a brief review of some aspects of self-dealing issues; my materials are intended to provide only limited coverage.

Applying Code § 4941(d)(2)(E), Letter Ruling 201937003 reasoned:

> Treas. Reg. § 53.4941(d)-3(c)(1) provides, in part, that under § 4941(d)(2)(E), the payment of compensation by a private foundation to a disqualified person for personal services which are reasonable and necessary to carry out the exempt purpose of the private foundation shall not be an act of self-dealing if the compensation is not excessive. This rule applies without regard to whether the person who receives the compensation is an individual.

[4953] https://www.irs.gov/government-entities/private-foundations-self-dealing-irc-4941d1c.

Treas. Reg. § 53.4941(d)-3(c)(2) provides examples of “personal services” for purposes of Treas. Reg. § 53.4941(d)-3(c)(1). These include legal services, investment counseling services, and general banking services.

In *Madden v. Commissioner*, 74 T.C. Memo. 1997-395, the Tax Court ruled that maintenance, janitorial, and security services provided by a disqualified person to a private foundation are not “personal services” that are necessary to carrying out the exempt purposes of a private foundation for purposes of the exception to self-dealing. Citing the legislative history of § 4941, the Court noted that one of Congress’s stated goals in enacting § 4941 was to minimize the need for an arm’s-length standard by generally prohibiting self-dealing transactions between private foundations and disqualified persons and that any exceptions to the self-dealing transaction rules should be construed narrowly. The Court characterized the services described in the regulations under § 4941 as essentially professional and managerial in nature, and concluded that maintenance, janitorial, and custodial services do not meet the definition of “personal services” allowed under § 4941.

Founder is a substantial contributor, as defined in § 507(d)(2), and therefore, is a disqualified person with respect to Foundation as described in section 4946(a)(1)(A). Thus, any direct or indirect payment of compensation to Founder by Foundation will constitute an act of self-dealing unless an exception applies. Because A and B are disregarded as entities separate from their owners within the meaning of Treas. Reg. § 301.7701-3, any payments of compensation by Foundation to either of them are considered to be payments to Founder. [Redacted Text]. Founder, through A, which is a disregarded entity, employs individuals who provide a variety of services to Foundation. In order to carry out its exempt purposes, Foundation requires the services of individuals such as those employed by Founder through A, who provide the services described above to Foundation.

Payment of compensation by a private foundation to a disqualified person generally is an act of self-dealing under § 4941(d)(1)(D). However, § 4941(d)(2)(E) provides an exception to self-dealing for the payment of compensation by a private foundation to a disqualified person for personal services which are reasonable and necessary to carrying out the exempt purposes of the private foundation if the compensation is not excessive.

Treas. Reg. § 53.4941(d)-3(c)(2) provides examples of allowable personal services that consist of legal services, investment counseling services, and general banking services. Additionally, *Madden v. Commissioner*, *supra*, indicates that services that are professional and managerial in nature are types of personal services that are permitted under § 4941.

Foundation will enter into a services agreement to hire A to perform certain charitable program, grant-making and consulting services. Unlike the maintenance, janitorial, and custodial services described in *Madden v. Commissioner*, *supra*, the grant-making, consulting, investment, and management services that directly further charitable purposes are provided to Foundation by Founder through A (a disregarded entity) and are professional and managerial services. The programmatic, grant-making and consulting services are reasonable and necessary services that enable Foundation to carry out its charitable purposes. As such, they fall within the exception to the self-dealing rules for "personal services" described in § 4941(d)(2)(E) as long as the compensation is not excessive in relation to the services provided.

> The services agreement also will include a provision that permits A to hire B to provide investment services. This situation is similar to the example in Treas. Reg. § 53.4941(d)-3(c)(2), Example (2), in which a manager of a private foundation who owned an investment counseling business provided investment services directly to the private foundation and was paid compensation for those services. Consequently, payments by Foundation to A for B's investment services provided to Foundation will be payment for reasonable expenses necessary to carry out the exempt purposes of Foundation as long as the compensation is necessary and reasonable to carrying out Foundation's investment program and not excessive under § 4941(d)(2)(E).

> Accordingly, payment to A by Foundation of a reasonable fee for the described services will not constitute a prohibited act of self-dealing within the meaning of § 4941 as long as the amount of the payment is not excessive.

The sale or exchange of property between a private foundation and a disqualified person constitutes self-dealing, including the transfer of real or personal property by a disqualified person to a private foundation shall be treated as a sale or exchange if the foundation assumes a mortgage or similar lien which was placed on the property prior to the transfer, or takes subject to a mortgage or similar lien which a disqualified person placed on the property within the 10-year period ending on the date of transfer.[4954] The Code § 4941(d)(2)(F) exception for corporate transactions is quite important, in that it allows a corporation to redeem stock issued to a private foundation if everyone receives the same offer. Reg. § 53.4941(d)-3(d), "Certain transactions between a foundation and a corporation," provides:

> (1) In general. Under section 4941(d)(2)(F), any transaction between a private foundation and a corporation which is a disqualified person will not be an act of self-dealing if such transaction is engaged in pursuant to a liquidation, merger, redemption, recapitalization, or other corporate adjustment, organization, or reorganization, so long as all the securities of the same class as that held (prior to such transaction) by the foundation are subject to the same terms and such terms provide for receipt by the foundation of no less than fair market value. For purposes of this paragraph, all of the securities are not subject to the same terms unless, pursuant to such transaction, the corporation makes a bona fide offer on a uniform basis to the foundation and every other person who holds such securities. The fact that a private foundation receives property, such as debentures, while all other persons holding securities of the same class receive cash for their interests, will be evidence that such offer was not made on a uniform basis. This paragraph may apply even if no other person holds any securities of the class held by the foundation. In such event, however, the consideration received by holders of other classes of securities, or the interests retained by holders of such other classes, when considered in relation to the consideration received by the foundation, must indicate that the foundation received at least as favorable treatment in relation to its interests as the holders of any other class of securities. In addition, the foundation must receive no less than the fair market value of its interests.

[4954] Reg. § 53.4941(d)-2(a).

(2) *Examples*. The provisions of this paragraph may be illustrated by the following examples:

Example (1). Private foundation X owns 50 percent of the class A preferred stock of corporation M, which is a disqualified person with respect to X. The terms of such securities provide that the stock may be called for redemption at any time by M at 105 percent of the face amount of the stock. M exercises this right and calls all the class A preferred stock by paying 105 percent of the face amount in cash. At the time of the redemption of the class A preferred stock, it is determined that the fair market value of the preferred stock is equal to its face amount. In such case, the redemption by M of the preferred stock of X is not an act of self-dealing.

Example (2).[4955] Private foundation Y, which is on a calendar year basis, acquires 60 percent of the class A preferred stock of corporation N by will on January 10, 1970. N, which is also on a calendar year basis, is a disqualified person with respect to Y. In 1971, N offers to redeem all of the class A preferred stock for a consideration equal to 100 percent of the fact amount of such stock by the issuance of debentures. The offer expires January 2, 1972. Both Y and all other holders of the class A preferred stock accept the offer and enter into the transaction on January 2, 1972, at which time it is determined that the fair market value of the debentures is no less than the fair market value of the preferred stock. The transaction on January 2, 1972, shall not be treated as an act of self-dealing for 1972. However, because under § 53.4941(e)-1(e)(1)(i) an act of self-dealing occurs on the first day of each taxable year or portion of a taxable year that an extension of credit from a foundation to a disqualified person goes uncorrected, if such debentures are held by Y after December 31, 1972, except as provided in § 53.4941(d)-4(c)(4), such extension of credit shall not be excepted from the definition of an act of self-dealing by reason of the January 2, 1972, transaction. See § 53.4941(d)-4(c)(4) for rules indicating that under certain circumstances such debentures could be held by Y until December 31, 1979.

That applies only to corporations. As to partnerships, FSA 200015007 is reproduced in full:

ISSUES

1. Whether the self-dealing penalties of section 4941 would apply have if:

[4955] [My footnote:] Letter Ruling 9731034 held:

In your letter dated June 24, 1992, you were concerned with the tax consequences of a redemption of shares of common stock from B following the donation of such shares to B by C. Redemption was to be accomplished through extensions of credit by A, a disqualified person with respect to B. On August 31, 1993, we issued a favorable ruling to B (PLR #9347035) on this request. Subsequent to the issuance of the ruling it was discovered that the ruling was contrary to Example 2 of section 53.4941(d)-3(d)(2) of the Foundation and Similar Excise Taxes Regulations. When B was informed of our intent to revoke the ruling, B indicated that the transaction was never entered into and asked that the ruling request be withdrawn. On October 27, 1994, we acknowledged the withdrawal of B’s ruling request.

This letter formally revokes PLR #9347035.

a. all of the partners agreed to sell the partnership;

b. the foundation were to sell its interest to a third party, either separately or as part of a transaction involving the sale of all partnership interests;

c. if the other partners were to purchase the foundation's interest at fair market value to facilitate a sale of all interests to a third party?

2. Whether the exception found in section 4941(d)(2)(F) regarding liquidation of corporations would apply if all of the partners agreed to dissolve or liquidate the partnership.

3. What are the maximum penalties under section 4941 in any of the above situations.

4. Whether a private letter ruling could be obtained by the foundation covering any of the above situations.

CONCLUSIONS

1. Assuming that the foundation managers or other disqualified persons receive no benefit from the sale, the sale of the foundation's interest to a third party either separately or as part of a transaction involving the sale of all partnership interests, would not give rise to an act of self-dealing. Similarly, the sale of a disqualified person's interest in the partnership to anyone other than the foundation would not be an act of self-dealing. On the other hand, the sale by the foundation of its partnership interest at fair market value to a disqualified person would be an act of self- dealing.

2. If the procedure followed in dissolving or liquidating the partnership is in accord with Treas. Reg. section 53.4941 (d)-3(d), then the dissolution or liquidation of the private foundation's interest would not be self-dealing.

3. Section 4941 contains a two-tier series of sanctions. The first tier tax is a tax of 5% of the transaction amount which is imposed on the disqualified person regardless of intent, and a tax of 2 1/2% of the transaction amount imposed on a foundation manager who knowingly participates in the act of self-dealing. In the event that the self-dealing transaction is not corrected, a second tier tax of 200% of the transaction amount is imposed on the disqualified person and a tax of 50% of the transaction amount is imposed on a foundation manager who refuses to agree to the correction.

4. A ruling could be obtained on the sales transactions described above, or whether a liquidation or dissolution met the requirements of section 4941(d)(2)(F) of the Code.

FACTS

On date 1, decedent executed a revocable trust. The trust has two trustees, decedent's son, and employee, an unrelated individual who serves as the family's business advisor. The beneficiaries of the trust are son (50%) and decedent's grandsons, grandson 1 (25%) and grandson 2 (25%), the children of decedent's predeceased child.

On date 2, the trustees established a limited liability company. Son was designated as president and employee was designated as vice president and tax matters partner. The trust contributed $w in exchange for a 99% interest and son contributed $x for a 1% interest. On that same day, the trust and the company formed a limited partnership. The trust contributed $y in liquid assets and realty for a 99% limited partnership interest, while the company contributed its assets for a 1% general partnership interest. The trust then assigned .065% of its interest to the foundation, a tax- exempt private foundation.

Under the terms of the partnership agreement, the general partner has exclusive responsibility for the management, operations and control of the partnership's affairs. Unanimous consent of all partners is required to terminate the partnership prior to the expiration of its 50 year term or to amend the partnership agreement.

The foundation is a non-profit corporation founded by decedent's family more than thirty years earlier. Decedent was the president of foundation, and had made a substantial contribution to it. Son is now the president and employee is now the vice-president of foundation. The fair market value of all assets in foundation at the close of the taxable year which included decedent's date of death was $z.

Decedent died five days after the creation of the partnership. As of that date, the partnership interests were held as follows:

Partner	Partnership Interest
Company	1.000%
(General Partner)	
Revocable trust	98.935%
(Limited Partner)	
Foundation	0.065%
Limited Partner)	
Total	100.000%

In valuing decedent's 98.935% limited partnership interest, decedent's executor reduced the net asset value of the partnership to reflect the minority status and lack of marketability of the interests, The minority interest discount was based in part on the opinion of the estate's attorney that the presence of the foundation as a partner, which implicates the self-dealing provisions of IRC section 4941, would limit the ability of the hypothetical purchaser of decedent's 98.935% interest to maximize the return on that investment. Secondly, the estate argues that despite the existence of actual family control at all relevant times, section 4941 would effectively eliminate the family's ability to liquidate the partnership, thereby precluding the application of section 2704.

LAW AND ANALYSIS

OVERVIEW

Section 2031(a) of the Code provides that the value of the gross estate is to be determined for Federal estate tax purposes "by including … the value at the time of his death of all property, real or personal, tangible or intangible, wherever situated." Value is determined at the moment of death. *Ahmanson Found. v. United States*, 674 F.2d 761, 767 (9th Cir. 1981). The standard for valuation is fair market value, defined as "'the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or to sell and both having reasonable knowledge of relevant facts.'" *United States v. Cartwright*, 411 U.S. 546, 551 (1973) (quoting Treas. Reg. section 20.3031-1(b); *Collins v. Commissioner*, 3 F.3d 625, 633 (2d Cir. 1993). This objective test requires property to be valued from the viewpoint of a hypothetical buyer and seller, each of whom would seek to maximize his or her profit from any transaction involving the property. *Estate of Watts v. Commissioner*, 823 F.2d 483, 486 (11th Cir. 1987); *Estate of Bright v. United States*, 658 F.2d 999, 1005-1006 (5th Cir. 1981).

Section 2704 of the Code is part of a set of special valuation rules designed to mitigate the effect of Treas. Reg. section 20.3031-1(b) in certain intra-family contexts. Section 2704(b)(1) provides, in part, that in the case of a transfer of an interest in a partnership to a member of the transferor's family, it the transferor and members of the transferor's family hold, immediately before the transfer, control of the entity, then an applicable restriction will be disregarded in valuing the transferred interest. An applicable restriction is one which limits the ability of the partnership to liquidate, but which the transferor or the family, either alone or collectively, has the right to remove after the transfer. Stated another way, in the case of a transfer subject to a liquidation restriction, if the family holds control both before and after the transfer, the transfer is valued without regard to the restriction. Section 2704 differs from section 2031 in that it looks to the actual parties to the transfer, and not to a hypothetical third party.

As noted above, the estate has argued that the presence of the foundation as a partner, which implicates the self-dealing provisions of IRC section 4941, would limit the ability of the hypothetical purchaser of decedent's partnership interest to maximize the return on that investment. Secondly, the estate argues that despite the existence of actual family control at all relevant times, section 4941 would effectively eliminate the family's ability to liquidate the partnership, thereby precluding the application of section 2704. For the reasons discussed below we believe that there are realistic sales transactions and liquidation transactions which would not subject the hypothetical purchaser, the foundation managers, the general partner or any disqualified persons to self- dealing taxes. Secondly, under certain circumstances, the foundation could join with the family in voting to liquidate the partnership without subjecting the foundation managers, the general partner or any disqualified persons to self-dealing taxes. Accordingly, we agree that the presence of the foundation in the transaction does not affect the application of either section 2031 or 2704. We will now answer the specific questions that you have posed.

Issue 1

Section 4941(a)(1) of the Code imposes a tax upon any act of self-dealing between a private foundation and any of its disqualified persons as defined in section 4946.

Section 4941(d)(1)(A) of the Code defines the term self- dealing to mean any direct or indirect sale or exchange, or leasing of property between a private foundation and a disqualified person. Section 4941(d)(1)(D) defines the term self-dealing to mean any direct or indirect payment of compensation (or payment or reimbursement of expenses) between a private foundation and a disqualified person. Section 4941(d)(1)(E) defines the term self- dealing to mean any direct or indirect transfer to, or use by or for the benefit of a disqualified person of the income or assets of a private foundation.

Section 4946(a)(1) of the Code provides, in pertinent part, that the term "disqualified person" means with respect to a private foundation, a person who is -

(A) a substantial contributor to the foundation;[1]

(B) a foundation manager(within the meaning of subsection (b)(1);[2]

(C) an owner of more than 20 percent of -- (i) the total combined voting power of a corporation, (ii) the profits interest of a partnership, or (iii) the beneficial interest of a trust or unincorporated enterprise, which is a substantial contributor to the foundation;

(D) a member of the family (including a spouse, children, and grandchildren) of any individual described in sub-paragraph (A), (B), or (C);

(E) a corporation in which persons described in subparagraph (A), (B), (C), or (D) own more than 35 percent of the total combined voting power;

(F) a partnership in which persons described in subparagraph (A), (B), (C), or (D) own more than 35 percent of the profits interest;

(G) a trust or estate in which persons described in subparagraph (A), (B), (C), or (D) hold more than 35 percent of the beneficial interest.

[1] Section 507(d)(2)(A) of the Code defines "substantial contributor" as any person who contributed or bequeathed an aggregated amount of more than $5,000 to a private foundation, if such amount is more than 2 percent of the total contributions and bequests received by the foundation before the close of the taxable year of the foundation in which the contribution or bequest is received by the foundation from such person. In the case of a trust, the term "substantial contributor" also means the creator of the trust. Section 507(d)(2)(B)(iv) provides that any person who is a substantial contributor on any date shall remain a substantial contributor for all subsequent periods.

[2] A "foundation manager" is an officer, director, or trustee of a foundation, as well as an employee having responsibility with respect to a specific act or failure to act. Section 4946(b).

Here, decedent's estate, the trust, the company, decedent's family, employee and the members of employee's family are "disqualified persons" for purposes of section 4941. An unrelated third party is not a disqualified person. For self-dealing to take place, there must be a disqualified person engaging in a transaction with a private foundation. Therefore, any transaction between the foregoing parties and the foundation could be an act of self-dealing. The sale by the foundation of its partnership interest at fair market value to another one of the pre-death partners would be an act of self-dealing. Furthermore, if the managers of the foundation sell the foundation's interest to a third party but receive some inappropriate benefit the sale would result in self-dealing by the managers. For example, Treas. Reg. section 53.4941(d)-2(f)(1) states that "the purchase or sale of stock or other securities by a private foundation shall be an act of self-dealing if such purchase or sale is made in attempt to manipulate the price of the stock or other securities to the advantage of a disqualified person." On the other hand, the sale by the foundation of its interest to a third party would not give rise to an act of self-dealing unless the managers or other disqualified persons received some benefit from the sale. Similarly the sale of a disqualified person's interest in the partnership to any one other than the foundation would not be an act of self- dealing. Thus, it is clear that sales can be hypothesized that do not constitute acts of self-dealing.

If all the partners including the foundation were to enter into an agreement to sell their interests as a unit to a third party, this agreement could result in an act of self-dealing. Depending upon the particular facts concerning such agreement the joint sale could be a prohibited use by the disqualified persons of the foundation's assets, within the meaning of section 4941(d)(1)(E). Similarly if the foundation managers were to sell the foundation's interest in conjunction with their own interests in order to get a personal benefit, questions could be raised about whether the foundation's assets were being used by the managers. On the other hand, and with regard to section 4941(d)(2)(F) of the Code, in *Deluxe Corp v. United States*, 885 F. 2d 848 (Fed. Cir. 1989), the circuit court held that a redemption offer was a bona fide offer within the meaning of treas. Reg. section 53.4941(d)-3(d)(1) despite the exclusion of officers and directors, who were shareholders, because to include them in the offer would create a potential conflict with the securities laws restrictions applying to them. Thus, assuming that a sale of the foundation's interest did not constitute a prohibited use of the foundation's assets by disqualified persons, it would not constitute an act of self-dealing.

Issue 2

Section 4941(d)(2)(F) of the Code provides that any transaction between a private foundation and a corporation which is a disqualified person pursuant to any liquidation, merger, redemption, recapitalization, or other corporate adjustment, organization, or reorganization, shall not be an act of self-dealing if all the securities of the same class held by the foundation are subject to the same terms and such terms provide for receipt by the foundation of no less than fair market value.

Treas. Reg. section 53.4941(d)-3(d)(1) provides, in part, that securities are not 'subject to the same terms' unless, pursuant to such transaction, the corporation makes a bona fide offer on a uniform basis to the foundation and every other person who holds such securities. Treas. Reg. section 53.4941(e)-1 (f) provides that for purposes of sections 53.4941(a)-1 through 53.4941(f)-1, fair market value shall be determined pursuant to the provisions of section 53.4942(a)-2(c)(4).

Section 4941(d)(2)(F) of the Code contains an exception to the general prohibition against transactions between private foundations and disqualified persons to permit certain essential transactions. The prohibitions against self-dealing were enacted in 1969 to protect private foundations from improper acts by those who control the foundation, and to curtail possible abuse of the foundation's tax-exempt status. H.R. Rep. No. 413, 91st Cong., 1st Sess. 20-21, reprinted in 1969 U.S. Code Cong. Admin. News 1645, 1665; S.Rep. No. 552, 91st Cong., 1st Sess. 28-29, reprinted in 1969 U.S. Code Cong. & Admin. News 2027, 2055. Nevertheless, as the Treasury explained when it endorsed the bill, see Hearings Before the Committee on Ways and Means, 91 Cong., 1st Sess. On the Subject of Tax Reform, pt 14 at 5059 (1969), an exception to the self-dealing rules "would be made to permit essential donor-foundation transactions." *Id* at 5322.

In enacting section 4941(d)(2)(F), Congress expressly rejected an absolute prohibition against transactions between private foundations and disqualified persons, but replaced the standard of the prior law, which had permitted arm's-length transactions with disqualified persons with one that requires that the foundation must be dealt with on the same terms as other parties to the transaction. The purpose of this requirement is to assure that a foundation's status is not abused, whether the transaction is a "liquidation, merger, redemption, recapitalization, or other corporate adjustment, organization or reorganization", so that a foundation does not receive less advantageous terms than any other shareholder when dealing with a disqualified person. See S. Rep. No 552, supra at 28-29, 31 reprinted at 2055-58.

Section 4941(d)(2)(F) of the Code and Treas. Reg. section 53.4941(d)-3(d)(1) speak in terms of a corporation. We believe that in some situations these provisions provide guidance in the disposition of a private foundation's interest in a partnership. See, *e.g.*, PLR 9237032. Accordingly, if the procedure followed in dissolving or liquidating a partnership is in accord with Treas. Reg. section 53.4941(d)-3(d) then the dissolution or liquidation of the private foundation's interest would not be an act of self-dealing within the meaning of section 4941 of the Code. Cf. TAM 9205001, concluding on its facts that a stock redemption did not meet the criteria of section 4941(d)(2)(F).

Issue 3

Should a private foundation and a disqualified person engage in an act of self-dealing, a two-tier series of sanctions may be triggered. As to the first tier tax, a tax of 5% of the greater of the amount of money given or received or of the fair market value of the property given or received is automatically imposed on the disqualified person, regardless of the inadvertence of the transaction. Section 4941(a)(1). With regard to the sale of one of the current partners' partnership interest to the foundation the excise tax would be calculated on the higher of the fair market value of the partnership interest or the amount of money paid for it by the foundation. If the foundation's partnership interest were sold to the partnership or any one of the current partners the excise tax would be calculated on the higher of the fair market value of the partnership's interest or the amount of money paid for it. A liquidation or dissolution of the foundation's partnership interest would be equivalent to a sale to the partnership and the excise tax would be calculated in the same way unless the requirements of section 4941(d)(2)(F) were satisfied. If it were determined that the foundation managers or other disqualified persons improperly used the foundation's assets in arranging a sale of the entire partnership to a third party, the excise tax would be applied to the fair market value of that use. Treas. Reg. section 53.4941(e)-1(b)(2)(ii).

Not only is the 5% tax imposed for the taxable year of the transaction, but the 5% tax is applied again for each taxable year, or part of a year (within the taxable period as defined in section 4941(e)(1)), from the date on which the act of self-dealing occurs to the earlier of either the date of mailing of a deficiency notice regarding the tax imposed, the date on which the tax imposed by section 4941(a)(1) is assessed, or the date on which correction of the act of self-dealing is completed. To correct the transaction, the disqualified person must do one of two things, i.e. undo the transaction, to the extent possible, or, if rescission is not possible, then the disqualified person must place the foundation in at least the position in which it would have been had the disqualified person met the highest fiduciary standards of dealing in the original transaction. Section 4941(e)(3).

Under the first tier tax of sanctions, when the 5% tax is imposed on the disqualified person, a tax of 2 1/2% of the transaction amount may be imposed on the foundation manager. This may occur, however, only if the manager knowingly participates in the act of self-dealing. On the other hand, if the act of participation is not willful and arises from a reasonable cause, the sanction is inapplicable. Section 4941(a)(2). This tax on the manager has a limit of $10,000 for each act of self-dealing. Section 4941(c)(2).

Should the disqualified person fail to correct the self- dealing transaction within the correction period, a second tier tax is triggered and an additional tax of 200% of the transaction amount is imposed on the disqualified person. Section 4941(b)(1). An additional tax of 50% of the transaction amount is imposed on the foundation manager if the manager has refused to agree to part or all of the correction. Section 4941(b)(2). This tax on the manager has a limit of $10,000 for any one act of self-dealing. Section 4941(c)(2). The transaction amount under the second tier tax is the highest fair market value of the property during the taxable period. Section 4941(e)(2)(B).

Issue 4

A ruling could be obtained on the above sales transactions or on whether a liquidation or dissolution meets the requirements of section 4941(d)(2)(F) of the Code. The time it would take to obtain such a ruling would depend on the workload at the time.

Another self-dealing exception is Reg. § 53.4941(d)-1(b)(3), “Transactions during the administration of an estate or revocable trust,” which provides:

The term “indirect self-dealing” shall not include a transaction with respect to a private foundation’s interest or expectancy in property (whether or not encumbered) held by an estate (or revocable trust, including a trust which has become irrevocable on a grantor’s death), regardless of when title to the property vests under local law, if -

(i) The administrator or executor of an estate or trustee of a revocable trust either -

(a) Possesses a power of sale with respect to the property,

(b) Has the power to reallocate the property to another beneficiary, or

(c) Is required to sell the property under the terms of any option subject to which the property was acquired by the estate (or revocable trust);

(ii) Such transaction is approved by the probate court having jurisdiction over the estate (or by another court having jurisdiction over the estate (or trust) or over the private foundation);

(iii) Such transaction occurs before the estate is considered terminated for Federal income tax purposes pursuant to paragraph (a) of § 1.641(b)-3 of this chapter (or in the case of a revocable trust, before it is considered subject to sec. 4947);[4956]

(iv) The estate (or trust) receives an amount which equals or exceeds the fair market value of the foundation's interest or expectancy in such property at the time of the transaction, taking into account the terms of any option subject to which the property was acquired by the estate (or trust); and

(v) With respect to transactions occurring after April 16, 1973, the transaction either -

(a) Results in the foundation receiving an interest or expectancy at least as liquid as the one it gave up,

(b) Results in the foundation receiving an asset related to the active carrying out of its exempt purposes, or

(c) Is required under the terms of any option which is binding on the estate (or trust).

Also important is the Code § 4941(d)(2)(B) prohibition against any direct or indirect lending of money or other extension of credit between a private foundation and a disqualified person, with the Code § 4941(d)(2)(B) exception that a disqualified person may loan to a foundation if the foundation uses the loan for its exempt purposes. Reg. § 53.4941(d)-2(c), "Loans," provides:[4957]

(1) *In general*. Except as provided in subparagraphs (2), (3), and (4) of this paragraph, the lending of money or other extension of credit between a private foundation and a disqualified person shall constitute an act of self-dealing. Thus, for example, an act of self-dealing occurs where a third party purchases property and assumes a mortgage, the mortgagee of which is a private foundation, and subsequently the third party transfers the property to a disqualified person who either assumes liability under the mortgage or takes the property subject to the mortgage. Similarly, except in the case of the receipt and holding of a note pursuant to a transaction described in § 53.4941(d)-1(b)(3), an act of self-dealing occurs where a note, the obligor of which is a disqualified person, is transferred by a third party to a private foundation which becomes the creditor under the note.

(2) *Loans without interest*. Subparagraph (1) of this paragraph shall not apply to the lending of money or other extension of credit by a disqualified person to a private foundation if the loan or other extension of credit is without interest or other charge.

[4956] [My footnote:] The Reg. § 1.641(b)-3 trust termination rule is described in the text accompanying fn 2563 in part II.J.3.i Planning for Excess Losses, describing excess losses allowed to a beneficiary on termination of a trust. Reg. § 1.641(b)-3(a) is reproduced after fn 2732 in part II.J.8.
[4957] A hold-harmless provision does not seem to cure the problem. See fn 4663 in part II.Q.6.a

> (3) *Certain evidences of future gifts*. The making of a promise, pledge, or similar arrangement to a private foundation by a disqualified person, whether evidenced by an oral or written agreement, a promissory note, or other instrument of indebtedness, to the extent motivated by charitable intent and unsupported by consideration, is not an extension of credit (within the meaning of this paragraph) before the date of maturity.

Reg. § 53.4941(d)-2(c)(4) discusses the foundation's commercial banking relationships.

A bequest to a foundation of debt owed by a disqualified person constitutes self-dealing.[4958] One may avoid the foundation making decisions by bequeathing nonvoting interests in an LLC to it, such as occurred in Letter Ruling 201907004, which involved a charitable lead trust treated as a private foundation for these purposes. The facts were:

> Trustor transferred certain business interests to trusts established for the benefit of Trustor's descendants (Beneficiary Trusts) in exchange for promissory notes that pay interest only for a term of 30 years, with the total principal amount due at the end of the term. The sole beneficiary or all of the beneficiaries of each Beneficiary Trust are Trustor's descendants.
>
> Trustor assigned the promissory notes to LLC, a State limited liability company. The members of LLC are Trustor, who holds all of the nonvoting interests in LLC, and LLC 2, which holds all of the voting interests in LLC. The members of LLC 2 are Trustor's descendants and each holds interests as individuals.
>
> LLC will hold and administer the promissory notes and receive payments of interest and principal on the promissory notes. Aside from the cash initially contributed by LLC 2 for the voting interests in LLC (which will fund LLC expenses), LLC's sole assets and source of income will be the promissory notes.
>
> Power to manage the affairs of LLC is vested in the manager, who is selected and may be removed by a vote of the members holding at least a majority of the voting interests in LLC (currently LLC 2, which holds 100 percent of such voting interests). Daughter, who is also the trustee of Trust, is the initial manager of LLC. Daughter holds interests in LLC only in an individual capacity indirectly through her interests in LLC 2, not in her capacity as trustee of Trust.
>
> The members holding nonvoting interests (currently Trustor, who holds 100 percent of such nonvoting interests) possess no management rights or rights to vote on who will be the manager of LLC. LLC may be dissolved only with written approval of all members, whether holding voting or nonvoting interests.

Letter Ruling 201907004 reasoned and held:[4959]

> As a split-interest trust described in section 4947(a)(2), Trust is subject to the requirements of section 4941 as if it were a private foundation. Trustor is a disqualified

[4958] GCMs 37731 (10/26/1978) and 37037 (3/9/1977).

[4959] To similar effect, see Letter Rulings 201723006 (which also approved the LLC as not being a "business enterprise" subject to the excess business holdings prohibition), 201723005, 201446024 (approved post-mortem formation of LLC and approved the LLC as not being a "business enterprise" person under section 4946(a)(1)(A) with respect to Trust as a "substantial contributor" because Trustor is the creator of Trust. Daughter is a disqualified person under section 4946(a)(1)(B) with respect to Trust as a "foundation manager."

Beneficiary Trusts are disqualified persons under section 4946(a)(1)(G) with respect to Trust because they are trusts in which Trustor's descendants, who are disqualified persons under section 4946(a)(1)(D) with respect to Trust, hold more than a 35-percent beneficial interest. Beneficiary Trusts are the obligors of promissory notes given to Trustor in exchange for certain business interests. An act of self-dealing would occur if Trustor transferred the promissory notes to Trust, which would become creditor under the notes. See Treas. Reg. § 53.4941(d)-2(c)(1).

Instead, Trustor assigned the promissory notes to LLC and proposes to transfer nonvoting interests in LLC to Trust. Trust will acquire the nonvoting interests in LLC by gift rather than through a self-dealing transaction. However, if Trust would be considered to "control" LLC within the meaning of Treas. Reg. § 53.4941(d)-1(b)(5), then Trust would be considered to be the creditor, indirectly, under the note by reason of its ownership interest in LLC. See Treas. Reg. § 53.4941(d)-1(b)(8), Example (1).

As holder of the nonvoting interests, Trust will have no management rights or right to vote on the manager of LLC. LLC 2 will own all of the voting interests, giving LLC 2 the right to select and remove the manager LLC. As a holder of nonvoting interests, Trust will have a right to receive distributions only if LLC dissolves or chooses to make current distributions, but the timing and amount of such distributions will be uncertain and could not be compelled by Trust. Only LLC 2, as the holder of the voting interests, may elect or remove the manager of LLC, and such manager will have the sole power to manage the affairs of LLC and determine the timing and amount of distributions. Thus, Trust and Trust's trustees (acting only in such capacity) will not have sufficient votes or positions of authority to cause LLC to engage in a transaction.

Additionally, Trust will not have the power to compel dissolution of LLC since LLC may only be dissolved with written approval of all members, including LLC 2. The power associated with the nonvoting interests of LLC as a necessary party to vote on the liquidation of LLC is not considered equivalent to a "veto power" within the meaning of Treas. Reg. § 53.4941(d)-1(b)(5) because the power cannot be exercised over an action relevant to any potential act of self-dealing. Consequently, Trust will not "control" LLC within the meaning of Treas. Reg. § 53.4941(d)-1(b)(5).

Accordingly, Trust's receipt of nonvoting interests in LLC from Trustor will not constitute a loan or extension of credit between a "private foundation" and a "disqualified person" within the meaning of section 4941(d)(1)(B) and Treas. Reg. § 53.4941(d)-2(c) because Trust will not acquire an interest in the promissory note; instead, Trust will acquire nonvoting interests in LLC, with respect to which it will not have any management rights or control over distributions.

---

subject to the excess business holdings prohibition; ruling obtained by Turney Berry's law firm), 201407023, and 201407021 (which also approved the LLC as not being a "business enterprise" subject to the excess business holdings prohibition).

> Thus, Trustor's proposed transfer of nonvoting interests in LLC to Trust will not constitute an act of self-dealing described in section 4941.

Note that nonvoting interests will be subject to valuation discounts, reducing the charitable deduction.[4960]

Letter Ruling 200635017 approved the following involving options and LLC holding notes:

> B had three children: C, married to D, E, married to F, and G. C, E, D, and G are now deceased. D, F and G are each referred to as a "Taxpayer" and collectively as the "Taxpayers."
>
> C, F and G entered into a business transaction with family members (including trusts or other entities controlled by, or created for the benefit of, family members). Pursuant to these transactions, C, F and G acquired a promissory note as consideration, each referred to as a "Note." Each Note provides for annual interest at the mid-term Applicable Federal Rate, with principal due at the end of the note term.
>
> Each Taxpayer created a single member limited liability company of which the Taxpayer is the sole member. Each of these entities is referred to as a "Company" and collectively as the "Companies." Each Taxpayer contributed his or her Note to his or her Company, in exchange for which the Taxpayer received all of the voting units ("Voting Units") and nonvoting units ("Nonvoting Units") of his or her respective Company. Pursuant to C's and D's estate plans, D's estate currently owns the Voting and Nonvoting Units in C's Company. In addition, F (through her revocable trust) currently owns the Voting and Nonvoting Units in F's Company, and G's estate currently owns the Voting and Nonvoting Units in G's Company. Each taxpayer entered into a limited liability company agreement ("Company Agreement") to govern his or her respective Company.
>
> Taxpayers state that each Company will be engaged solely in passive investment activities; will not engage in the operation of any business enterprise; and at least 95 percent of the gross income of each Company will be derived from passive investments that will include, for example, interest and dividends.
>
> Each Taxpayer created a charitable trust to be funded at his or her death. Each of these trusts is referred to as a "CT" and collectively as the "CTs." Each CT has a 20-year term commencing at the Taxpayer's death, during which term the CT will annually pay a guaranteed annuity to one or more charitable organizations.
>
> Each Taxpayer has also created a revocable trust, separate and distinct from the Taxpayer's CT. Taxpayers state that each Taxpayer has provided in his or her revocable trust that at the Taxpayer's death, the Nonvoting Units owned by the Taxpayer will be allocated to the CT created by that Taxpayer. As a Nonvoting Unit holder, the CT cannot be required by the Company or its members, under the Company Agreement, to make any capital contributions or take any other actions. Nor does the CT have a right to force any distributions from the Company. Rather, under the Company Agreement the CT only has a right to receive distributions (in proportion to its ownership interest) when the Company dissolves or otherwise chooses to make distributions. The Taxpayer's

[4960] See part II.O.3 Effect of Buy-Sell on Charitable Estate Tax Deduction.

Voting Units will be bequeathed to or in trust for the benefit of the Taxpayer's descendants.

Pursuant to an agreement (the "Option Agreement"), each Taxpayer (and his or her revocable trust) granted his or her children and a business entity controlled by the Taxpayers and their families (collectively, the "Option Holders") an option (the "Option") to purchase one or more specific assets (including the Note and any of the Nonvoting Units) (collectively, the "Option Assets") from the then current owner of the Option Assets, including the Company or the Taxpayer's estate or revocable trust. The Option Assets will not include any of the Voting Units. The Option Agreement provides that the Option Holders may purchase some or all of the Option Assets for a purchase price equal to the fair market value of such Option Assets as determined for federal estate tax purposes in the Taxpayer's estate at any time within nine months of the Taxpayer's death (the "Option Term"). The Option Holders will be required to pay the purchase price for the Option Assets in cash, marketable securities, or a combination of both.

With respect to any Option Assets to be purchased from the Taxpayer's estate or revocable trust, before the expiration of the Option Term, Taxpayers state that their estates or revocable trusts will petition a court of competent jurisdiction for approval of both the Option Holders' exercise of their options, as well as the tendering and receipt of consideration pursuant to each Option Agreement. Taxpayers state that the exercise of the Options by the Option Holders, the sale and purchase of Option Assets, and the tendering and receipt of consideration related thereto, will occur before the end of the period reasonably required by the executors or trustees to perform the ordinary duties of administration necessary for the settlement of the Taxpayers' estates and before the Taxpayers' revocable trusts are treated as trusts under section 4947 of the Code. Taxpayers state that the purchase of the Option Assets owned by the Taxpayers' estates or revocable trusts pursuant to each Option Agreement will be contingent upon receipt of approval from a court of competent jurisdiction.

Letter Ruling 200635017 concluded:

1. The exercise of the Option and the purchase of Option Assets from a Taxpayer's estate or revocable trust by the Option Holders, the tendering of consideration by the Option Holders to the Taxpayer's revocable trust or estate, the receipt of such consideration by the Taxpayer's revocable trust or estate, and a distribution of such consideration from the Taxpayer's revocable trust or estate to the CT, will satisfy the requirements for the exception to indirect self-dealing described in section 53.4941(d)-1(b)(3) of the regulations, and therefore will not constitute impermissible acts of self-dealing under section 4941 of the Code.

2. Neither (i) the exercise of an Option and related sale and purchase of the Option Assets between one or more disqualified persons as to a Taxpayer's CT and the Taxpayer's Company nor (ii) the retention by that Company of a Note following the Taxpayer's death, will constitute indirect acts of self-dealing pursuant to section 53.4941(d)-1 of the regulations, and will not violate section 4941 of the Code.

We are expressly not ruling as to whether any subsequent transactions between a CT and a Company would constitute an act of self-dealing under section 4941 of the Code.

3. A CT's ownership of Nonvoting Units will not constitute a violation of the prohibition against ownership of excess business holdings under section 4943 of the Code because the Company is not a "business enterprise" within the meaning of section 4943(d)(3).

Letter Ruling 9312024 applied Reg. § 53.4941(d)-1(b)(3) to approve a redemption and related note payments to M, a private foundation, ruling:[4961]

1. The sale by A's estate and the purchase by N and O or B of the shares pursuant to the terms of the Redemption Agreement for the consideration specified in the Redemption Agreement will not be an act of self-dealing with M under section 4941 of the Code by N, O, B, or A's estate.

2. The acceptance by A's estate and the delivery by N and O or B of the note of N and O or B in payment for the shares of N and O owned by A's estate will not be an act of self-dealing with M under section 4941 of the Code by N, O, B, or A's estate.

3. The distribution by A's estate to M of the note of N and O or of B will not be an act of self-dealing with M under section 4941 of the Code by N, O, B, or A's estate.

4. After distribution of the note by A's estate to M, payments on the note by N and O or B will not be acts of self-dealing under section 4941 of the Code by N and O or B as payor or M as payee.

5. The determination whether, for purposes of section 4941 of the Code and the regulations promulgated thereunder, A's estate will receive an amount which equals or exceeds the fair market value of M's interest or expectancy in the shares, will be determined after taking into account the terms of the Redemption Agreement to which the shares acquired by A's estate will be subject.

Letter Ruling 9112012 approved the following arrangement:

> You were established by A and B to carry on certain charitable endeavors. A and B are members of your seven member board of directors. In addition to other property interests, you have a remainder interest in certain nonresidential rental real estate. You have been recognized as exempt under section 501(c)(3) of the Code and are a private foundation within the meaning of section 509(a).
>
> A and B also established two revocable inter-vivos trusts which are controlled and operated by their two sons. The sons have never made contributions to you, nor have they been members of, nor served as your trustees. The trusts in turn have established a partnership. The partnership has the option to purchase the real estate you have the remainder interest in. A and B have also given quit claim deeds to the partnership transferring their current life estate in the property to the partnership. Your remainder

[4961] Consistent with this result (but not including all of the rulings) include Letter Rulings 200729043 (notes owed by disqualified persons to a corporation that liquidated into a revocable trust that distributed the notes to the foundation), 199924069, 9350038, 9108024, and 9042030 (the latter approving the foundation's "exercise of any rights granted it under the note and any deed of trust, security agreement or similar instrument that secures payment of the note").

interest has not vested because A and B are still living. Furthermore, as stated above the two inter-vivos trusts are revocable.

The option agreement provides that the partnership has an exclusive option to purchase the property, or any part thereof, for a period or five years from the date of death of the survivor of A and B. The option price shall be equal to the fair market value of the property as determined by a mutually agreed appraiser. The purchase price shall be amortized over thirty years and the rate or interest shall be the prevailing prime interest rate at a named bank. It also states that no brokerage fee shall be due as a result of this transaction.

Letter Ruling 9112012 reasoned:

Example (4) in Section 53.4941(d)-1(b)(8) of the regulations describes a situation where a substantial contributor to a private foundation bequeaths one-half of his estate to his spouse and one-half to the private foundation. The estate includes a one-third interest in a partnership, the remaining two-thirds of the partnership are owned by a disqualified person to the private foundation. The one-third interest was subject to an option agreement when it was acquired by the estate. The sale of the one-third interest in the partnership to the disqualified person did not constitute an act of self-dealing because the transaction satisfied the requirements set forth in section 53.4941(d)-1(b)(3).

The sons of A and B are disqualified parties and the partnership is controlled by them. You are the holder of the remainder interest in the property that the partnership has the option to buy. Therefore, unless otherwise excluded, any transaction between you and the partnership is an indirect act of self-dealing. The option agreement may be exercised within 5 years from the death of the grantors. The agreement provides that you will receive fair market value for your interest in the property. You have represented that a probate court with jurisdiction over this matter will approve the transaction and that the option agreement is legally binding upon the trust.

Accordingly, we have concluded that if the option is exercised under the conditions represented and if all of the requirements set forth in section 53.4941(d)-1(b)(3) of the regulations are satisfied, exercising the described option will not be an act of self-dealing.

Letter Ruling 201448023 applied Reg. § 53.4941(d)-1(b)(3) in its conclusion number 5 approving debt that otherwise would have constituted self-dealing, where "M" was a private foundation:

None of the following will constitute an act of direct or indirect self-dealing under § 4941:

a. The distribution from a decedent's Estate to a QTIP Trust, and the receipt by such Trust of a Note which was received by such Estate during the administration thereof in a transaction meeting all the requirements of § 53.4941(d)-1(b)(3), such Trust's holding of such Note during the lifetime of the surviving spouse, or the receipt by such Trust of any payments under such Note; or

b. The distribution from such QTIP Trust to M of any Note which was received by such Trust either from a decedent's Estate during the administration thereof or during the administration of the QTIP Trust after the surviving spouse's death in a transaction meeting all of the requirements of § 53.4941(d)-1(b)(3), and M's receipt of the same, its holding of any such Note, or its receipt of any payments under any such Note.

As to the interest rate for the debt, Franklin and Goode, "The Intermediary CLAT Alternative to the Residuary Estate Family Foundation Gift," 39 *ACTEC Law Journal* 355, 361, note 15 comments:

> Some planners believe that a promissory note issued under the estate administration exception to the self-dealing rules could simply carry an interest rate at the applicable Federal rate ("AFR"), and that would make the fair market value of the promissory note equal its face amount. In support for this position, I.R.C. § 7872 cites the AFR as the floor for a market rate loan. Moreover, in several existing PLRs, the IRS has blessed purchase transactions under the estate administration exception where the purchase price was provided through a promissory note bearing interest at the AFR. PLR 201206019 (Nov. 15, 2011); PLR 201129049 (Apr. 26, 2011); PLR 200124029 (Mar. 22, 2001). Attention should be paid, however, to the fact that in each PLR the taxpayer made a blanket representation that the promissory note in question had a fair market value equal to that of the property purchased without providing any further explanation. Additionally, the IRS made specific reference to such representation in reaching its conclusion despite having already established the note's rate of interest. Third-party loans, however, often carry much higher rates of interest. Given the near historically low AFRs, the government may view an AFR loan for purposes of the estate administration exception as being abusive. Pursuant to Treas. Reg. § 53.4941(d)-1(b)(3)(iv), the estate or trust must receive from the disqualified person property that "equals or exceeds the fair market value of the foundation's interest or expectancy ...." Therefore, consider whether the value of an AFR note is equal to its face value for purposes of the estate administration exception. Treas. Reg. §53.4941(e)-1(f) provides that "fair market value" under the estate administration exception should be determined pursuant to Treas. Reg. § 53.4942(a)-2(c)(4). This provision in turn makes reference to the principles stated in I.R.C. § 2031. Clearly, on the seller's side, the principles of § 2031 control how the property sold by the estate or trust would need to be valued. On the purchaser's side, it would seem odd if the promissory note being exchanged by the purchaser could be valued pursuant to different rules, such as § 7872, which might allow an AFR note to have a value equal to its face value. I.R.C. § 2031 provides for an all-inclusive view of a promissory note's value (*i.e.*, the note's value is not merely a factor of its principal amount and interest rate but also its terms of payment and enforceability, etc.). Treas. Reg. § 20.2031-4. The basic idea of the self-dealing rules is to prohibit a disqualified person from gaining an advantage at the foundation's expense. To construe the estate administration exception as allowing a disqualified person to garner a bargain rate of interest using the current low AFRs would seemingly violate the spirit of the self-dealing rules. For purposes of this paper, the assumption is that any promissory note issued under the estate administration exception must carry a market rate of interest, as well as other reasonable terms relating to enforceability, to enable the promissory note's value (*i.e.*, by appraisal) to equal its face value.

See Private Foundations: Amount Involved - Self-Dealing Lending of Money to Disqualified Persons IRC Section 4941(e)(2) | Internal Revenue Service (irs.gov).

II.Q.7.c.iii. Cleansing Earnings and Profits from a Prior C Corporation

As discussed above, dividend treatment applies to the extent that a distribution exceeds AAA and is made out of C corporation earnings and profits. This treatment would not apply on liquidation of the corporation.[4962] What happens when a trust that owns an interest in an S corporation has a charity as its beneficiary?

The charitable income tax deduction should offset dividend income received by the trusts from the corporation.[4963] Making an ESBT election should not affect the charitable income tax deduction, because the dividend is not considered part of the S portion.[4964] If the trust's basis in the S corporation stock was determined by reason of purchase, the dividend income reduces the basis of the S stock in determining the gain or loss on the sale that constitutes unrelated business taxable income.[4965]

If distributions exceed AAA and earnings & profits, that excess would be treated as a return of capital,[4966] reducing basis.[4967] Any amount that exceeds basis would be treated as a gain from the sale of stock,[4968] which would be treated as part of the S portion and, if an ESBT election is in effect, would not be offset by the charitable income tax deduction.

If an amount is intended to be accumulated in the trust, then using AAA is the easiest way.

If an amount is intended to be distributed to charity and it's possible that future distributions will need to be accumulated, then a Code § 1368(e)(3) election should be made to treat the distribution as a dividend from earnings and profits so that AAA is used only for future accumulated distributions.

II.Q.7.c.iv. Using a Charitable Remainder Trust to Avoid Built-in Gain Tax

If an S corporation contributes built-in gain property to a term-of-years (typically 20 years) charitable remainder trust ("CRT") for the benefit of the corporation[4969] and that property is sold for a capital gain, then the sale will not trigger immediate tax. Instead, the CRT's distributions

---

[4962] See Letter Ruling 200402003 regarding an S corporation that merges into a nonprofit corporation.
[4963] Code § 642(c). Code § 512(e)(1) characterizes S corporation items as unrelated business income; however, those items are just items on the K-1 issued by the S corporation, together with any gain or loss on the disposition of the stock in the S corporation. Congress appeared to recognize that distributions of C corporation earnings and profits would escape this tax when it provided for basis reductions with respect to some of that dividend income, as described in the text accompanying fn. 4965; this basis reduction provision was enacted at the same time as the tax K-1 items and gain on the sale of stock. See Conference Report 104-737, reproduced in *RIA Checkpoint* at COMREP ¶13,611.001 S corporations permitted to have 75 shareholders. (Small Business Job Protection Act of 1996, PL 104-188, 8/20/96), P.L. 104-188, Sec. 1316(c), and P.L. 105-34, Sec. 1523(a).
[4964] Reg. §§ 1.641(c)-1(g)(2), 1.641(c)-1(l), Example (1)(iii).
[4965] Code § 512(e)(2). This rule would not apply if the trust acquired its stock by reason of death, since that provision (by way of Code § 1361(e)(1)(C)) refers to Code § 1012, not Code § 1014.
[4966] Code § 1368(c)(3).
[4967] Code § 1368(b)(1).
[4968] Code § 1368(b)(2).
[4969] The term interest must benefit the corporation; if it benefits the shareholders, then the gratuitous transfer will be treated as a constructive distribution to such partners or shareholders for tax purposes and the partners or the shareholders will be treated as the grantors of the trust. Letter Ruling 200203034, citing Reg. § 1.671-2(e)(4), and also holding that the trust would not qualify as a charitable remainder trust.

will come first from ordinary income and not from any built-in gain, and during the recognition period distributions will be subject to built-in gain tax only to the extent that capital gain constituting built-in gain is distributed to the S corporation.[4970] The contributed assets must not constitute substantially all of the corporation's assets, since a corporation recognizes gain if it conveys substantially all of its assets to a tax-exempt entity.[4971] See also part II.D.2 Business Entity as Grantor of Tru.

Also, if and to the extent that sale (or holding) of the asset constitutes unrelated business taxable income (UBTI), this strategy will not work. Any UBTI a CRT earns is subject to a 100% excise tax, in addition to being taxable when distributed to the beneficiary, resulting in an ultimate tax well in excess of 100%.[4972] For example, a so-called "negative basis asset"[4973] generally has significant debt-financed income, and debt-financed income/gain and ordinary business income are UBTI.[4974]

II.Q.7.d. Special Rules for Certain Sales of Stock in an S corporation

The sale of stock in an S corporation can be treated as a sale of the corporation's assets, followed by the corporation's liquidation. See part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

II.Q.7.e. Bequest to a Corporation

A bequest to a corporation is treated as a bequest to the remaining shareholders, followed by a contribution of capital to the corporation.[4975] Thus, the remaining shareholders receive an increased basis in their stock in the corporation.

If the bequest is of stock in the corporation, a bequest to the remaining shareholders directly would be cleaner from an income tax perspective, in that the remaining shareholders may specifically identify lots of stock when they sell or otherwise transfer their stock. However, a bequest to the corporation might be simpler, in that ownership might vary over time, and a "transfer on death" designation to the corporation will accomplish the objective in a simple manner.

[4970] Letter Ruling 200644013 focused on whether a contribution of property that had built-in gain accumulated from prior C corporation years would trigger Code § 1374 built-in gain tax. In that ruling, the corporation contributed real estate to a 20-year CRT. Later, but before the end of the Code § 1374 recognition period, the CRT would sell the property and use the sale proceeds to invest in stocks, bonds, and other securities that pay interest and dividends. The IRS declined to rule on whether the corporation would have recognized built-in gain under Code § 1374 on unitrust amounts received by it after the recognition period. The donor corporation was required to represent that the donation did not constitute "substantially all" of the donor's assets; see fn 4971.

[4971] Reg. § 1.337(d)-4(a)(1). Note the last sentence in fn 4970.

[4972] See part II.Q.6.c Possible Adverse Consequences When Contributing Partnership Interest to Charitable Remainder Trust, especially fns. 4661-4662.

[4973] See fn. 6590 in part III.B.2.g Income Tax Concerns When Removing Property from the Estate Tax System.

[4974] Code §§ 512, 513, and 514. Consider whether Code § 514(c)(2)(B) might address that concern.

[4975] Rev. Rul. 74-329.

Naming a corporation as the beneficiary of a life insurance policy might generate some challenging disclosures on the estate tax return.[4976]

[4976] Reg. § 20.2031-2(f) provides:

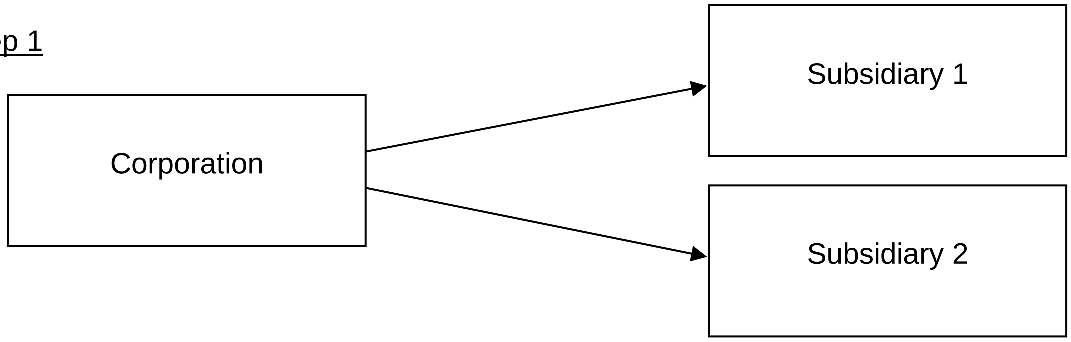
> In addition to the relevant factors described above, consideration shall also be given to nonoperating assets, including proceeds of life insurance policies payable to or for the benefit of the company, to the extent such nonoperating assets have not been taken into account in the determination of net worth, prospective earning power and dividend-earning capacity.

If the decedent gratuitously named the corporation as the beneficiary of a life insurance policy, arguably the death benefits' inclusion under Code § 2042 should be the only inclusion under the principle that it is really a bequest to the other shareholder and not to the corporation. Consideration of the death benefit should not equate to required inclusion in value in a situation such as that. However, the result is not nearly as clean as when the corporation itself owns the policy, which Reg. § 20.2042-1(c)(6) provides generally does not result in incidents of ownership even if the decedent controls the corporation. Reg. § 20.2042-1(c)(6), which is reproduced in part II.Q.4.i.ii.(b) Corporate Ownership of Policy. So a business owner who wants the business entity to hold insurance on the owner's life should consider instead having the entity own the policy. Consider Code § 2035 if transferring an existing policy. A tax-efficient way to move the policy might involve part II.Q.4.i Life Insurance LLC. When an entity owns a life insurance policy, consider part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance.

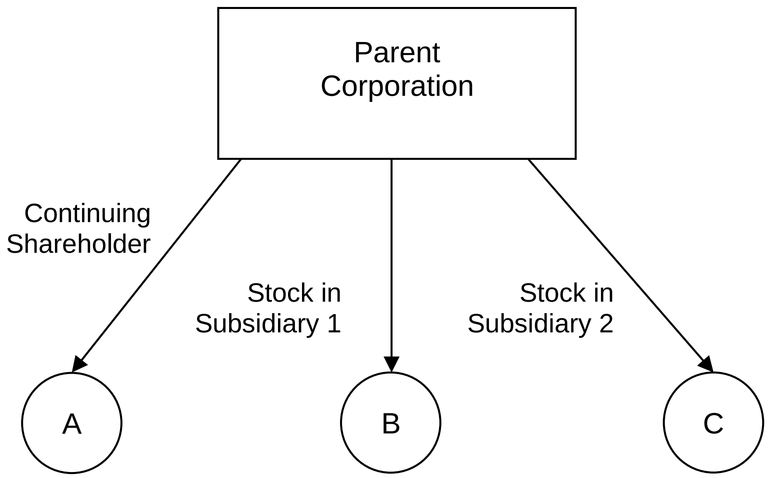
II.Q.7.f. Corporate Division into More Than One Corporation

II.Q.7.f.i. Overview

<u>Step 1</u>



<u>Step 2</u>



If a corporation owns another corporation, the parent corporation has no earnings and profits, and the subsidiary's value equals the parent's basis in its stock, then distributing the subsidiary might not have much tax effect. However, that is often not the case, and one wants to look for a way to do a tax-free corporate division, as described below.

In a spin-off, split up, etc., a corporation transfers one or more active businesses into one or more subsidiaries:

- "Active business" includes active real estate rental.
- It also includes an interest in an LLC that conducts an active business – 20% if the corporation performs management functions and 33-1/3% if not.

The active business needs to be at least 5 years old.

The transaction needs a business purpose that could not be accomplished in another nontaxable transaction.

- Estate planning is not a valid reason to split up a business.

- Differences in management objectives generally constitute a valid reason.

- Personal dislike is not enough; resolving disputes over business strategy generally is.

Letter Ruling 200842003 was a creative estate planning technique:[4977]

- Parent split corporation into 5 different entities.

- Parent sold an interest in each entity to a different irrevocable grantor trust for a different child.

- Although Code § 355 required the parent to continue to hold on to the new corporations, the parent was deemed not to have sold the corporations because the sale to the irrevocable grantor trust was disregarded for income tax purposes.

Also, a transaction in which (1) a parent corporation transfers all of the interests in its limited liability company that is taxable as a corporation to the first subsidiary in exchange for additional stock, (2) the first subsidiary transfers all of the interests in the limited liability company to the second subsidiary in exchange for additional stock, (3) the second subsidiary transfers all of the interests in the limited liability company to the third subsidiary in exchange for additional stock, and (4) the limited liability company elects to be disregarded as an entity separate from its owner for federal income tax purposes effective after it is owned by the third subsidiary, is properly treated for federal income tax purposes as two transfers of stock in Code § 351 exchanges followed by a Code § 368(a)(1)(D) reorganization.[4978]

Eustice, Kuntz & Bogdanski, *Federal Income Taxation of S Corporations* (WG&L), ¶ 3.03. Types of Shareholders,[4979] describes Letter Ruling 201949013 as:

> distributing corporation's "momentary ownership" of stock of controlled corporation distributed in split-off that was Type D reorganization did not cause controlled corporation to have ineligible shareholder for any portion of its first taxable year; thus, controlled corporation could be S corporation from its inception.

Bloomberg BNA's Tax Management Weekly Report (12/9/2019) described Letter Ruling 201949013:

> The IRS issued 15 rulings on an S corporation's ("Distributing") reorganization in which Distributing created Controlled as a subsidiary in order to facilitate a proposed transaction to resolve differences of opinion among its shareholders about how one of its lines of business, Business C, should be operated. Ruling (1) Upon the distribution, Controlled will no longer be a qualified subsidiary (QSub). Ruling (2) The contribution followed by the distribution will qualify as a reorganization under tax code Section 368(a)(1)(D), with Distributing and Controlled each "a party to a reorganization" within the meaning of Section 368(b). Rulings (3), (4), (7), (8) No gain or loss will be recognized by relevant entities in the contribution or the distribution. Rulings (5), (9) The basis of assets transferred in the Contribution and in the Distribution won't change upon

[4977] See part II.Q.7.f.iii.(g) Combining Split Up with Sale to Irrevocable Grantor Trust.
[4978] Rev. Rul. 2015-10.
[4979] As to Letter Ruling 201930011, the treatise says:
same as to multiple stocks distributed in split-up that was Type D reorganization.

the moment of transfer. Rulings (6), (10) The holding period for the recipient for a given asset will include that of the previous owner in the contribution and in the Distribution. Rulings (11),(12) Any earnings and profits will be allocated between Distributing and Controlled in accordance with Section 312(h) and regulations, and Distributing's accumulated adjustments account will be allocated between Distributing and Controlled in a similar manner. Ruling (13) Distributing's momentary ownership of Controlled stock won't cause Controlled to have an ineligible shareholder for any portion of its first taxable year under Section 1361(b)(1)(B); therefore Controlled will be permitted to elect to be an S corporation for its first taxable year provided it otherwise qualifies and makes such election effective immediately upon its QSub termination. Ruling (14), (15) Payments made by and between Distributing and Controlled will be treated as occurring immediately before the distribution.

Letter Ruling 201949013 involved the following facts and rulings:

Summary of Facts

Distributing was formed on Date 1 as a State A corporation. On Date 2, Distributing elected under § 1362(a) of the Code to be treated as a subchapter S corporation for Federal income tax purposes. Distributing is engaged in Business A, Business B, and Business C. Business A is operated by QSub 1, a State A corporation which has elected under § 1361(b)(3)(B) of the Code to be treated as a qualified subchapter S subsidiary for federal income tax purposes. Business B is operated by QSub 2, a State A limited liability corporation which has elected under § 1361(b)(3)(B) of the Code to be treated as a qualified subchapter S subsidiary for federal income tax purposes. Business C is operated by QSub 3, a State A limited liability corporation which has elected under § 1361(b)(3)(B) of the Code to be treated as a qualified subchapter S subsidiary for federal income tax purposes. Business C consists of assets including Asset A, Asset B, and Asset C. Distributing also owns a percent of LLC 1, a State A limited liability company which has elected to be disregarded for federal income tax purposes.

Distributing has both voting and non-voting shares of stock outstanding. Distributing's Series A stock represents a percent of the vote and b percent of the value. Distributing's Series B stock represents c percent of the vote and d percent of the value. Grantor Trust 1 owns e percent of the outstanding Series A stock. Grantor Trust 2 owns f percent of the outstanding Series A stock. Irrevocable Trust 1 owns g percent of the outstanding Series B stock. Irrevocable Trust 2 owns h percent of the outstanding Series B stock. Irrevocable Trust 3 owns i percent of the outstanding Series B stock. Distributing is managed and operated by the beneficiaries of Grantor Trust 1, Grantor Trust 2, Irrevocable Trust 1, Irrevocable Trust 2, and Irrevocable Trust 3.

On Date 3, Irrevocable Trust 1 elected to be treated as an electing small business trust under § 1361(e) of the Code. Irrevocable Trust 1 was created for the benefit of Beneficiary 1, Beneficiary 2, Beneficiary 3, and Beneficiary 4. Beneficiary 1, Beneficiary 2, Beneficiary 3, and Beneficiary 4 are siblings.

Beneficiary 1 is the beneficiary of Irrevocable Trust 4. Beneficiary 2 is the beneficiary of Irrevocable Trust 5. Beneficiary 3 is the beneficiary of Irrevocable Trust 6. Beneficiary 4 is the beneficiary of Irrevocable Trust 7.

Financial information has been submitted indicating that each of Business A and Business C have had gross receipts and operating expenses representing the active conduct of a trade or business for each of the past five years.

To resolve differences of opinion among the shareholders as to how Business C should be operated, Distributing proposes the following transaction (the “Proposed Transaction”):

Proposed Transaction

To achieve the business purposes described above, the following series of steps are proposed:

1. The assets of Irrevocable Trust 1 will be divided into j equal shares and be contributed to Irrevocable Trust 4, Irrevocable Trust 5, Irrevocable Trust 6, and Irrevocable Trust 7. Irrevocable Trust 4 will receive k Series B shares of Distributing representing l percent of the outstanding Series B Shares. Irrevocable Trust 5, Irrevocable Trust 6, and Irrevocable Trust 7 will receive m Series B shares of Distributing representing n percent of the outstanding Series B Shares.

2. On Date 4, Controlled was formed as a subsidiary of Distributing. Distributing will file an election to treat Controlled as a qualified subchapter S subsidiary for federal income tax purposes under § 1361(b)(3)(B) of the Code. On Date 5, Controlled formed o State A single member limited liability companies (each a “Controlled SPE”).

3. Distributing will contribute Asset A, Asset B, and Asset C (the “Contribution” and collectively, the “Controlled Business”), Asset D, and p percent of LLC 1 to Controlled in exchange for Controlled common stock and the assumption of liabilities described in Step 4. Each asset of the Controlled Business and Asset D will be transferred to a separate Controlled SPE.

4. Distributing will cause Controlled to enter into a credit agreement with Bank, which will establish a line of credit with a maximum aggregate principal amount of $q prior to the Split-off and $r after the Split-off (the “Controlled Credit Line”). Prior to the Split-off, Controlled will draw down $q on the Controlled Credit Line, which will be evidenced by a promissory note (the “Controlled Loan”) and the outstanding principal of Distributing’s loan with Bank (the “Bank Loan”) will be reduced by a corresponding amount.

5. Any obligations (not otherwise settled or resolved in other steps) that would result in obligations between Distributing immediately following the Split-off (defined below) will be settled in cash, other than obligations under the Continuing Relationships (defined below).

6. Distributing will distribute all of the Controlled common stock to Irrevocable Trust 4 in exchange for all of the shares of Series B stock of Distributing owned by Irrevocable Trust 4 (the “Split-off” or the “Distribution”). Irrevocable Trust 4 may receive a cash distribution from Distributing equal to the Tax Cover Price, if that amount is positive, and Irrevocable Trust 4 will be required to pay the Negative Tax Cover to Distributing, if that amount is negative.

7. Contemporaneous with Step 6, Distributing will redeem for cash s shares of its Series A stock held by Grantor Trust 1 to reduce the percentage of Series A stock owned by Grantor Trust 1 to t percent of the outstanding Series A stock.

8. After the Split-off, Controlled will elect under § 1362(a) of the Code to be treated as an S corporation on the first available date, effective as of the date of the Split-off. Controlled's sole owner, Irrevocable Trust 4, will file a timely election to be treated as an electing small business trust under § 1361(e) of the Code.

9. Following the Proposed Transaction, Distributing will engage in certain continuing business relationships with Controlled, Irrevocable Trust, and Beneficiary 1 (collectively, the "Continuing Relationships"). All such relationships will be based on arm's length terms and conditions and will not be inconsistent with the overall separation of Business A and the Controlled Business.

Representations

With respect to the Distribution, except as set forth below, Distributing has made all of the representations in Section 3 of the Appendix to Rev. Proc. 2017-53, 2017-41 I.R.B. 283 in the form set forth therein.

Distributing has made the following alternative representations set forth in Section 3 of the Appendix to Rev. Proc. 2017-53:

Representations 3(a), 8(a), 11(a), 15(a), 22(a), 31(a), and 41(b).

Distributing has not made the following representations, which do not apply to the Proposed Transaction:

Representations 5, 6, 19, 20, 24, 25, 35, 36, 37, 38, 39, and 40.

In addition, except as set forth below, Distributing has made all of the representations in Section 3.04 of Rev. Proc. 2018-53, 2018-43 I.R.B. 667.

Distributing has made the following modified representation:

Representation 4: The Controlled Loan was obtained to substitute for an equivalent amount of Distributing Debt (the Bank Loan). Distributing incurred the Distributing Debt that will be satisfied with the Controlled Loan (a) before the request for any relevant ruling is submitted and (b) no later than 60 days before the earliest of the following dates: (i) the date of the first public announcement (as defined in § 1.355-7(h)(10)) of the Divisive Reorganization or a similar transaction, (ii) the date of the entry by Distributing into a binding agreement to engage in the Divisive Reorganization or a similar transaction, and (iii) the date of approval of the Divisive Reorganization or a similar transaction by the board of directors of Distributing.

Rulings

Based solely on the information submitted and representations made, we rule as follows:

1. The Split-off will cause a termination of Controlled's QSub election because Controlled will cease to be a wholly-owned subsidiary of an S corporation. For federal income tax purposes, Controlled will be treated as a new corporation acquiring all of its assets and assuming all of its liabilities from distributing immediately before the termination of Controlled's QSub election in exchange for the stock of Controlled (the Contribution), pursuant to Treas. Reg. § 1.1361-5(b)(1)(i) (§ 1361(b)(3)(B) and (C)).

2. The Contribution followed by the Split-off will qualify as a "reorganization" within the meaning of section 368(a)(1)(D). Distributing and Controlled will each be "a party to the reorganization" within the meaning of section 368(b).

3. Distributing will recognize no gain or loss on the Contribution. Sections 357 and 361(a).

4. Controlled will recognize no gain or loss on the Contribution. Section 1032(a).

5. Controlled's basis in each asset received in the Contribution will be the same as the basis of that asset in the hands of Distributing immediately prior to the Contribution. Section 362(b).

6. Controlled's holding period in each asset received in the Contribution will include the period during which Distributing held such asset. Section 1223(2).

7. Distributing will recognize no gain or loss on the Split-off. Section 361(c)(1).

8. Irrevocable Trust 4 will recognize no gain or loss (and no amount will be includable in its income) on the receipt of the stock of Controlled in the Split-off. Section 355(a).

9. The basis of the Controlled stock in the hands of Irrevocable Trust 4 immediately after the Split-off will be the same as the basis of the Distributing stock held by Irrevocable Trust 4 immediately before the Split-off. Section 358(a)(1).

10. Irrevocable Trust 4's holding period of the Controlled stock received in the Split-off will include the holding period of Irrevocable Trust 4's Distributing stock exchanged, provided that Irrevocable Trust 4 holds such Distributing stock as a capital asset on the date of the Split-off. Section 1223(1).

11. As provided in section 312(h), proper allocation of earnings and profits among Distributing and Controlled will be made in accordance with Treas. Reg. § 1.312-10(a).

12. Distributing's accumulated adjustments account immediately before the transaction will be allocated between Distributing and Controlled in a manner similar to the manner in which earnings and profits are allocated under § 312(h) in accordance with Treas. Reg. § 1.1368-2(d)(3) (§§ 1.312-10(a) and 1.1368-2(d)(3)).

13. Momentary ownership by Distributing of the stock of Controlled, as part of the reorganization, will not cause Controlled to have an ineligible shareholder for any portion of its first taxable year under section 1361(b)(1)(B). Controlled may, without requesting the Commissioner's consent, make a valid S corporation election before the expiration of the five-year period described in section 1361(b)(3)(D) and Treas. Reg. § 1.1361-5(c)(1), provided that (i) immediately following the distribution of the Controlled stock, Controlled is otherwise eligible to make an S corporation election, and (ii) the election is made effective on the date of the Split-off.

14. Payments made by and between Distributing and Controlled under the Continuing Relationships regarding liabilities, indemnities, or other obligations that (i) relate to periods ending on or before the Split-off, and (ii) do not become fixed and ascertainable until after the Split-off, will be treated as occurring immediately before the Split-off. See *Arrowsmith v. Commissione*r, 344 U.S. 6, 8 (1952); Rev. Rul. 83-73, 1983-1 C.B. 84.

15. Payments of Tax Cover Price made by Distributing to Irrevocable Trust 4 and payments of Negative Tax Cover Price made by Irrevocable Trust 4 to Distributing that do not become fixed and ascertainable until after the Split-off, will be treated as occurring immediately before the Split-off. See *Arrowsmith v. Commissioner*, 344 U.S. 6, 8 (1952); Rev. Rul. 83-73, 1983-1 C.B. 84.

Letter Ruling 202211009 approved a spin-off of Business A into a new corporation that was distributed to Family B in exchange for all of Family B's stock:

> Distributing is a State A corporation engaged in Business A which has a single class of voting common stock issued and outstanding (the "Distributing Stock"). Distributing Stock is owned equally by three families, Family A, Family B, and Family C. Distributing has outstanding debt, including the Related Party Note.
>
> Distributing has submitted financial information indicating that Business A has had the gross receipts and operating expenses representing the active conduct of a trade or business for each of the past five years.

If the corporation has a complex corporate structure implicating Code § 2701, one can prevent gift tax problems by making sure that the shareholders' rights in each corporation are identical to those they held in the parent corporation.[4980]

II.Q.7.f.ii. Code § 355 Requirements

Code § 355 provides seven requirements that must be met for a tax-free corporate division. The main corporation to be divided may be referred to as the distributing corporation. A corporation, stock in which is being distributed, may be referred to as the controlled corporation.

If a corporation cannot satisfy these rules, consider part II.Q.7.h.ix Value Freeze as Alternative to Code § 355 Division.

[4980] See Letter Ruling 9843010, discussed in fn. 7284.

The IRS will not issue private letter rulings merely to provide comfort. Instead, it will rule on only an issue of law the resolution of which is not essentially free from doubt and that is germane to determining the tax consequences of the transaction.[4981]

Furthermore, the IRS ordinarily will not issue letter rulings:[4982]

- If property owned by any distributing corporation or any controlled corporation becomes the property of a regulated investment company (RIC), within the meaning of Code § 851, or a real estate investment trust (REIT), within the meaning of Code § 856, in a certain type of transaction.[4983]

- If, immediately after any such distribution, the fair market value of the gross assets of the trade(s) or business(es) on which the distributing corporation or the controlled corporation relies to satisfy the active trade or business requirement of Code § 355(b) is less than 5% of the total fair market value of the gross assets of such corporation.[4984]

II.Q.7.f.ii.(a). Distribution to a Shareholder with Respect to the Shareholder's Stock

The first requirement Code § 355 sets out for a tax-free corporate division is that a distribution is made to a shareholder with respect to the shareholder's stock.[4985]

The distribution can be made in the following ways:

- First, the distribution could be a disproportionate distribution, where some of the shareholders receive a distribution and some do not. This type of division, a "split-off," is most often used when all of a company's stock is owned by the second generation of a family. One group of shareholders will receive a distribution of stock in the controlled corporation in exchange for their stock in the distributing corporation. The distribution could also be a pro-rata distribution.[4986] However, in family business succession planning, the pro-rata distribution scheme can be hard to use, since tax-free treatment might not be allowed if the distribution's stated purpose was to end shareholder dispute.

- Another option for distributions under Code § 355 would be a partially disproportionate distribution that involves a shareholder or group of shareholders leaving the distributing corporation completely, as in the disproportionate distribution, but one shareholder keeps his stock in the distribution corporation and receives some stock in the controlled corporation. This is another "split-off" scenario and is usually used when the corporate

[4981] Rev. Proc. 2013-32.

[4982] Rev. Proc. 2015-43. Notice 2015-59 announced these changes because, depending on the situation:

> The Treasury Department and the Service believe that these transactions may present evidence of device for the distribution of earnings and profits, may lack an adequate business purpose or a Qualifying Business, or may violate other § 355 requirements. In addition, these transactions may circumvent the purposes of Code provisions intended to repeal the Supreme Court's decision in *General Utilities & Operating Co. v. Helvering*, 296 U.S. 200 (1935) (General Utilities repeal). See, *e.g.*, §§ 311(b), 337(d), 367(a)(5), and 367(e); H.R. Rep. No. 100-391, at 1080-1084 (1987).

Section 3 of Notice 2015-59 was obsoleted by REG-134016-15 (7/15/2016).

[4983] Adding paragraph (57) to section 4.01 of Rev. Proc. 2015-3.

[4984] Adding paragraph (58) to section 4.01 of Rev. Proc. 2015-3.

[4985] Code § 355(a)(1)(A)(i). A distribution with respect to other securities is beyond the scope of these materials.

[4986] Code § 355(a)(2)(A).

separation occurs before the death of the business founder or family patriarch and that person holds the ownership interest in both corporations.

II.Q.7.f.ii.(b). Distribute Stock of a "Controlled Corporation" Which Distributing Corporation Controls Immediately Before the Distribution

The second requirement for a tax-free division under Code § 355 is that the distributing corporation must distribute stock of a "controlled corporation" which it controls immediately before the distribution.[4987]

Additionally, the distributing corporation must distribute all of the stock of the controlled corporation that it owns or at least must distribute enough of the stock to meet the Code § 368 control requirements.[4988] Under Code § 368, a corporation controls another if it owns at least 80% of the total combined voting power of the controlled corporation and at least 80% of the total number of shares of all other classes of stock of the controlled corporation. If the distributing corporation retains any of the controlled corporation's stock, it must establish that the retention was not in pursuance of a plan to avoid taxes.[4989]

Determining whether an acquisition of control has substance for federal tax purposes can be difficult and fact-intensive.[4990] The government became concerned that, in some cases, taxpayers may not be able to determine whether such an acquisition has substance with sufficient certainty to proceed with transactions that otherwise satisfy the requirements of Code § 355.[4991] Rev. Proc. 2016-40 provides a safe harbor[4992] for the following transactions that meet certain requirements:[4993]

(1) D owns C stock not constituting control of C;

(2) C issues shares of one or more classes of stock to D and/or to other shareholders of C (the issuance), as a result of which D owns C stock possessing at least 80 percent of the total combined voting power of all classes of C stock entitled to

[4989] Reg. § 1.355-2(e)(2).
[4990] Rev. Proc. 2016-40, Section 2.10. In describing the background for this concern, various parts of Section 2 pointed to Rev. Rul. 56-117, Rev. Ruls. 63-260, 69-407, and 98-27 (limiting the application of *Commissioner v. Court Holding Co.*, 324 U.S. 331 (1945), the limitation being based, in part, on § 1012(c) of the Taxpayer Relief Act of 1997, Pub. L. No. 105-34, 111 Stat. 788, 916-17, which added Code § 355(e)). Rev. Proc. 2016-40, Section 2.09 explained:

> Although the § 355(e) legislative history states, and Rev. Rul. 98-27 provides, that post-distribution events are not to be taken into account in determining whether a distributing corporation has control of the distributed corporation, this interpretation of § 355 applies only after it has been determined that, at the time of the distribution, the distributing corporation otherwise had control of the distributed corporation in substance. Thus, the § 355(e) legislative history and Rev. Rul. 98-27 do not prevent the step transaction doctrine from applying to determine if, taking into account all facts and circumstances (including post-distribution events), a pre-distribution acquisition of control has substance such that a distributing corporation has control of a corporation within the meaning of § 355(a)(1)(A) immediately prior to a distribution of the stock of that corporation.

[4991] Rev. Proc. 2016-40, Section 2.10.
[4992] Rev. Proc. 2016-40, Section 5 describes scope and effect of being within or not being within the safe harbors.
[4993] Rev. Proc. 2016-40, Section 3.

vote and at least 80 percent of the total number of shares of all other classes of stock of C;

(3) D distributes its C stock in a transaction that otherwise qualifies under § 355 (the distribution); and

(4) C subsequently engages in a transaction that, actually or in effect, substantially restores

(a) C's shareholders to the relative interests, direct or indirect, they would have held in C (or a successor to C) had the issuance not occurred; and/or

(b) the relative voting rights and value of the C classes of stock that were present prior to the issuance (an unwind).

The IRS will not assert that such a transaction lacks substance, and that therefore D lacked control of C immediately before the distribution, within the meaning of Code § 355(a)(1)(A), if the transaction is also described in one of the following safe harbors:[4994]

.01 No Action Taken Within 24 Months. No action is taken (including the adoption of any plan or policy), at any time prior to 24 months after the distribution, by C's board of directors, C's management, or any of C's controlling shareholders (as defined in § 1.355-7(h)(3)) that would (if implemented) actually or effectively result in an unwind.

.02 Unanticipated Third Party Transaction. C engages in a transaction with one or more persons (for example, a merger of C with another corporation) that results in an unwind, regardless of whether the transaction takes place more or less than 24 months after the distribution, provided that--

(1) There is no agreement, understanding, arrangement, or substantial negotiations (within the meaning of § 1.355-7(h)(1)) or discussions (within the meaning of § 1.355-7(h)(6)) concerning the transaction or a similar transaction (applying the principles of § 1.355-7(h)(12) and (13), relating to similar acquisitions), at any time during the 24-month period ending on the date of the distribution; and

(2) No more than 20 percent of the interest in the other party, in vote or value, is owned by the same persons that own more than 20 percent of the stock of C. For purposes of this section, ownership is determined by application of the constructive ownership rules of § 318(a) as modified by § 304(c)(3), except that for purposes of applying § 318(a)(3)(A) and (B), the principles of § 304(c)(3)(B)(ii) (without regard to § 304(c)(3)(B)(ii)(I)) apply.

For Code § 318(a), see part II.Q.7.a.viii Code § 318 Family Attribution under Subchapter C.

[4994] Rev. Proc. 2016-40, Section 4.

II.Q.7.f.ii.(c). Cannot Be Used Principally as a Device to Distribute the Earnings and Profits of either the Distributing or Controlled Corporations or Both

The third requirement is that the corporate division cannot be used principally as a device to distribute the earnings and profits of either the distributing or controlled corporations or both.[4995]

This rule prevents a corporation from helping its shareholders avoid dividend treatment by abusing Code § 355 and enabling shareholders to avoid immediate tax consequences, and to get capital gains treatment when one of the divided corporations is eventually sold. Although changes in the tax law since 2003 diminished the incentive to transform dividends into capital gains by lowering the tax rate on dividend income, sale treatment remains more beneficial than dividend treatment, because sale treatment allows the seller to use the seller's basis to offset gain and to defer tax using the installment method.[4996]

The determination that a division is being used as a device to avoid taxes is a facts and circumstances based test, but a number of "device factors" are strong evidence of tax avoidance. For example, when a distribution is pro-rata and no stock is surrendered back to the corporation, the IRS will take a close look at the transaction and make sure the distribution is not in fact a dividend.[4997] Another factor that may indicate abuse is when stockholders "cash-out" shortly after the division.[4998] The purpose of the Code § 355 tax-free provisions is to allow a corporation to continue its business is the form of two corporations instead of one, not to allow stockholders a quick tax-free way out of the company. The IRS will take into consideration significant changes in economic conditions that may have caused a stockholder to cash-out shortly after a distribution,[4999] but it is a situation the IRS will examine closely. The IRS will also examine the "nature, kind, amount, and use of the assets" of both the distributing and controlled corporations immediately after the transaction.[5000] This examination prevents a company from attempting to distribute assets unrelated to the corporation's business under a guise of splitting the corporation's active business. Another questionable situation arises when the controlled corporation and the distributing corporation have an exclusionary post-division relationship where one corporation is the secondary corporation that essentially serves the other.[5001] When such a relationship exists and the secondary corporation could be sold without adversely affecting the other corporation's business, the IRS considers this to be evidence of a tax-avoidance device.[5002] Proposed regulations would modify the nature and use of assets device factor.[5003]

In addition to listing numerous "device factors" in the Regulations, the IRS also provides a number of "nondevice factors" that are evidence of no tax avoidance purpose. Again, this determination is based on facts and circumstances, but the presence of one of these factors can help a corporation defend its division. These "nondevice factors" include having a strong business purpose of the transaction, having a distributing corporation that is publicly traded and

widely held, and having a distribution to shareholders that are domestic corporations eligible for the dividends-received deduction.[5004] Proposed regulations would modify the corporate business purpose nondevice factor.[5005]

Proposed regulations would add a per se device test to the device determination.[5006]

The IRS has removed this test from its list of areas on which it will not issue a private letter ruling.[5007]

II.Q.7.f.ii.(d). Active Business

The fourth requirement of Code § 355 is the "active business" test. For what is an "active business," see part II.Q.7.f.iii Active Business Requirement for Code § 355.

Both the distributing corporation and the controlled corporation must be engaged in an active trade or business for five years before the distribution. Thus, it may not always be easy for a business owner to separate the business into two distinct corporations, and sometimes it may be more costly for the business owner to do so than it would be for him to maintain the business as a whole and use less tax-advantageous business separation techniques when such separation becomes necessary. For example, two divisions could be separated into two wholly owned limited liability companies.

Code § 355(b)(1) requires that either (A) immediately after the division the distributing and controlled corporations are engaged in the active conduct of a trade or business, or (B) immediately before the distribution, the distributing corporation has no assets other than stock or securities of the controlled corporation and the controlled corporation is engaged in an active business immediately after the distribution. Four specific requirements must be met in order for a corporation to be treated as engaged in an active business. First, the corporation must be engaged in the active conduct of a trade or business, or, immediately after the distribution, substantially all of its assets are stock and securities of a corporation controlled by it which is engaged is such a trade or business.[5008] "Active trade or business" for purposes of Code § 355 is defined as a specific group of activities of the corporation being carried on for purposes of earning income or profit and the activities included in such group include all operations that form any part of, or step in, the process of earning income or profit.[5009] Next,

[5006] REG-134016-15 (7/15/2016), providing:

> Under proposed § 1.355-2(d)(5), if designated percentages of Distributing's and/or Controlled's Total Assets are Nonbusiness Assets, the transaction would be considered a device, notwithstanding the presence of any other nondevice factors, for example, a corporate business purpose or stock being publicly traded and widely held. By their nature, these transactions present such clear evidence of device that the Treasury Department and the IRS have determined that the nondevice factors can never overcome the device potential. The only exceptions to this per se device rule would apply if the distribution is also described in § 1.355-2(d)(3)(iv) (distributions in which the corporate distributee would be entitled to a dividends received deduction under section 243(a) or 245(b)) or in redesignated § 1.355-2(d)(6) (§ 1.355-2(d)(5) of the current regulations, relating to transactions ordinarily not considered as a device).

[5007] Rev. Proc. 2016-45.
[5008] Code § 355(b)(2)(A).
[5009] Reg. § 1.355-3(b)(2)(ii). Specifically excluded from the definition of an active trade or business are activities such as holding of stock, securities, land or other property for investment purposes.

such trade or business is required to have been actively conducted throughout the five-year period ending on the date of the distribution.[5010] The trade or business also must not have been acquired within that five-year period in a transaction in which gain or loss was recognized either in whole or in part.[5011] Finally, the control of a corporation conducting an active trade or business must not have been acquired in a taxable transaction in the same five year period.[5012] Additional details are further below.

Rev. Rul. 2019-9 provides:

> This revenue ruling suspends Rev. Rul. 57-464, 1957-2 C.B. 244, and Rev. Rul. 57-492, 1957-2 C.B. 247, pending the completion of a study by the Department of the Treasury (Treasury Department) and the Internal Revenue Service (Service) regarding the active trade or business (ATB) requirement under sections 355(a)(1)(C) and (b) of the Internal Revenue Code.
>
> **Revenue Rulings**
>
> In Rev. Rul. 57-464, the Service considered the section 355 qualification of a corporation's separation of a manufacturing business from a group of real estate assets consisting of an old factory building used for storage and four other buildings: a duplex apartment building rented to employees of the corporation, a small office building rented to a single tenant, and two houses, one of which was occupied by a sister-in-law of the president of the corporation. The use of the old factory building for storage "was not in itself the active operation of a business as defined in the regulations." The rental activities "produced only a nominal rental" and "negligible" net income, and the properties "were acquired either as an investment or as a convenience to employees of the manufacturing business." The Service held that the separation did not satisfy the ATB requirement.
>
> In Rev. Rul. 57-492, a corporation engaged in refining, transporting, and marketing petroleum products began a separate operation to explore for and produce oil. The exploration and production operation incurred substantial expenditures but "did not include any income producing activity or any source of income" until less than five years preceding its separation from the primary refining, transportation, and marketing operation. The Service held that the exploration and production operation failed to
