Section 355(a)(1) provides that, if certain requirements are met, a corporation may distribute stock and securities of a controlled corporation to its shareholders and security holders without recognition of gain or loss or income to the recipient shareholders or security holders. Among those requirements, both the distributing corporation and the controlled corporation must be engaged in an ATB immediately after the distribution. Sections 355(a)(1)(C) and (b), and § 1.355-3(a)(1)(i). Each trade or business must have been actively conducted throughout the five-year period ending on the date of the distribution. Section 355(b)(2)(B) and § 1.355-3(b)(3).

Section 1.355-3(b)(2)(ii) describes a "trade or business" as "a specific group of activities [that] are being carried on by the corporation for the purpose of earning income or profit, and the activities included in such group include every operation that forms a part of, or a step in, the process of earning income or profit." In particular, "[s]uch group of activities ordinarily must include the collection of income and the payment of expenses." Section 1.355-3(b)(2)(ii).

Analysis

The Treasury Department and the Service are conducting a study to determine, for purposes of section 355, "whether a business can qualify as an ATB if entrepreneurial activities, as opposed to investment or other non-business activities, take place with the purpose of earning income in the future, but no income has yet been collected." See IRS statement regarding the active trade or business requirement for section 355 distributions, dated September 25, 2018, available at http://www.irs.gov/newsroom/statements-from-office-of-the-chief-counsel. The ATB analysis underlying the holdings in Rev. Rul. 57-464 and Rev. Rul. 57-492 focuses, in significant part, on the lack of income generated by the activities under consideration. Consequently, these rulings could be interpreted as requiring income generation for a business to qualify as an ATB.

Accordingly, Rev. Rul. 57-464 and Rev. Rul. 57-492 are suspended pending completion of the study. See IRM 32.2.2.8.1, para. 9 (Aug. 11, 2004) (providing that a revenue ruling can be suspended "only in rare situations to show that previously published guidance will not be applied pending some future action, such as ... the outcome of a Service study").

"Letter ruling addresses Section 355 ATOB requirement," *Journal of Taxation* (4/2020), reports:

Ltr. Rul. 201948001 (the PLR) focuses on whether a company satisfies the active trade or business (ATOB) requirement in a Section 355 transaction based on the business of a corporate subsidiary it indirectly owned through a foreign partnership. The IRS ruled that the acquisition of subsidiaries through a partnership termination did not preclude the businesses conducted by the subsidiaries from qualifying as an ATOB within the meaning of Section 355(b)….

Observations and implications. Although a PLR may not be relied on as precedent, this ruling indicates that in certain cases and when structured properly, a company may

> be able to rely on the ATOB of a corporate subsidiary of a partnership in order to satisfy the ATOB requirement in a Section 355 transaction. This ruling goes beyond previously issued PLRs as well as proposed regulations that the Treasury and the IRS issued in 2007 under Section 355(b) (the 2007 Proposed Regulations).
>
> The 2007 Proposed Regulations permit a distributing corporation to rely on an ATOB of a partnership in which the distributing corporation either holds a "substantial interest" or a "meaningful interest," as applicable, depending upon whether the distributing corporation performs active and substantial management functions for the partnership. The regulations do not specifically permit a distributing corporation to look through a partnership to the partnership's corporate subsidiary in order to rely on the corporate subsidiary's ATOB for purposes of satisfying the ATOB requirement under Section 355(b). However, the 2007 Proposed Regulations provide that a partnership may distribute the stock of a subsidiary to a distributing corporation and the distributing corporation may rely on the subsidiary's ATOB, notwithstanding that the distributing corporation acquired the stock of the subsidiary within five years of the Section 355 transaction date (See Prop. Reg. 1.355(b)(4)(ii)(B) and 1.355-3(d)(2), Example 35.)
>
> While the IRS also had previously issued at least one PLR that permitted a distributing corporation to rely on ATOB assets acquired from a partnership termination (Ltr. Rul. 201827008), Ltr. Rul. 201948001 appears to be the first PLR that permits a taxpayer to rely on a subsidiary's ATOB if that subsidiary was acquired from a partnership in a non-liquidating or a liquidating distribution within five years of the date of the Section 355 transaction. Although limited to its facts, the PLR illustrates that if an ATOB is held by a corporate subsidiary of a partnership, a taxpayer-partner intending to make a distribution in a Section 355 transaction may terminate the partnership prior to the Section 355 transaction and bring that subsidiary into its separate affiliated group and rely on the ATOB conducted by such subsidiary to satisfy the ATOB requirement under Section 355.

Letter Ruling 202033005, when a family business divided when a trust holding it terminated, is reproduced in part II.Q.7.f.ii.(f) Continuity of Interest.[5013]

Letter Ruling 202340015 approved a Code § 355 separation for the following (highlighting mine):

> Distributing is a publicly traded corporation engaged in non-pharmaceutical Business A and non-pharmaceutical Business B through its direct and indirect subsidiaries (the "Distributing Worldwide Group") which includes conducting research and development activities for the production of Product. Before Product can be marketed and sold to the public, it must go through a series of steps in order to receive approval from the Regulatory Agency. The operations associated with Business A and Business B are conducted in Country B and Country C, respectively.
>
> Distributing directly owns 100 percent of the stock of FSub 1 and FSub 2, which are each corporations organized under the laws of Country A. FSub1 and FSub 2, in turn, collectively own 100 percent of the stock of FSub 3, a corporation organized under the laws of Country B. FSub 3 owns the assets associated with Business A. Distributing

[5013] Beginning with the text accompanying fn 5028.

acquired 100 percent of the stock of FSub 1 on Date A in a transaction intended to qualify as a tax-free reorganization under § 368(a).

Distributing owns 100 percent of the stock of FSub 4, which is organized under the laws of Country A and classified as a corporation for federal income tax purposes. FSub 4 owns 100 percent of the stock of Sub 1, a corporation organized under the laws of Country C. Sub 1 directly owns 100 percent of the equity interests in LLC1, a limited liability company organized under the laws of Country C that is classified as an entity disregarded as separate from its owner for federal income tax purposes. Sub 1 and LLC1 collectively own the assets associated with Business B.

For more than five years, the Distributing Worldwide Group's employees have engaged in regular, continuing operational and managerial activities with respect to each of Business A and Business B. The Distributing Worldwide Group has not yet collected income associated with either Business A or Business B but submitted information in accordance with Rev. Proc. 2017-52 indicating that it had incurred substantial, continuing operating expenses representing the active conduct of a trade or business with respect to Business A and Business B for each of the past five years.

II.Q.7.f.ii.(e). Transaction Must Have At Least One Corporate Business Purpose

The fifth requirement is that the transaction must have at least one corporate business purpose.[5014]

The predecessor to this regulation provided that "a distribution by a corporation of stock of a controlled corporation will not qualify under section 355 of the Code where carried out for purposes not germane to the business of the corporations, and that the distribution must be incident to a readjustment of corporate structures required by business exigencies."[5015] Under that regulation, retaining a "franchise vital to the business of the distributing corporation" was a "valid business purpose."[5016]

[5014] Reg. § 1.355-2(b).

[5015] Rev. Rul. 75-337, summarizing then-Reg. § 1.355-2(c).

[5016] Rev. Rul. 75-337 involved the following facts:

> X corporation operated an automobile dealership. Its franchise for the sale and service of automobiles was in the name of individual A who managed X and owned 53 percent of its stock. A was 70 years old and this stock constituted the bulk of his estate. The balance of the stock was held by A's five daughters in equal proportions. Three of the daughters were also actively employed in the X business. The other two daughters were not actively employed by X.
>
> Y corporation, a wholly owned subsidiary of X, was engaged in the business of renting automobiles.
>
> The franchise policy of the automobile manufacturer did not favor granting or continuing a franchise where there were inactive shareholders unless the manager holding the franchise owned a majority of the stock. As an alternative, the manufacturer's policy permitted the granting or continuing of a franchise where there was no majority shareholder, provided the shareholders were few in number and all were active in the business. The manufacturer does not grant franchises to corporations, only to individuals or partnerships. The franchise was renewable periodically and was not transferable by inheritance or otherwise.
>
> As the first step in a plan to insure that X's shareholders would be able to renew the franchise upon the death or retirement of A, who was then 70 years old, X distributed three-fourths of the Y stock to the two inactive-daughter shareholders in exchange, value for value, for all of their X

This requirement ensures that nonrecognition treatment is given only to distributions that are part of readjustments of corporate structures caused by business exigencies and to readjustments of continuing interests in property under modified corporate form.[5017] The purpose must be a "real and substantial non Federal tax purpose."[5018] The distribution to shareholders does not satisfy a corporate business purpose if the corporate business purpose can be achieved through a nontaxable transaction that does not involve the distribution of stock of a controlled corporation and is neither impractical nor unduly expensive.[5019]

> stock. The remaining one-fourth of the Y stock was distributed to A in exchange for shares of his X stock of equal value. A intended that upon his death the inactive-daughter shareholders would receive their inheritance in Y stock and assets other than stock of X.
>
> The distribution of the Y stock to A furthered the objective of enabling X's shareholders to retain the automobile franchise by increasing the percentage of ownership in X on the part of the active shareholders (other than A) and by providing A with Y stock which he could bequeath or gift to the inactive-daughter shareholders, leaving his remaining X stock available for bequests or gifts to the active shareholders.

Rev. Rul. 75-337 reasoned:

> Upon the death or retirement of A, the present stock ownership of X with proportionate bequests or gifts to A's daughters (because A's X stock represented the bulk of his estate) would preclude the existence of a majority active shareholder of X or all active shareholders in X for the purpose of renewing the X shareholders' franchise under the manufacturer's dealership policy. In order to insure qualification under the alternate conditions of the franchise policy, it was necessary to set the stage for X shareholders to retain the franchise at A's death or retirement, without chancing a potential interruption in the continuity of, or even the loss of, the franchise which might occur if nothing was done until after A's death or retirement. This was accomplished by first causing the Y stock to be distributed and then having A provide in his will or by gift for only the active shareholders to receive his shares of X stock.
>
> Thus, the distribution of Y stock is germane to the continuation of the X business in the reasonably foreseeable future. Execution of the plan will forstall an impending disruption to the X business by reason of the current active family group being unable to renew X's franchise upon A's death or retirement.
>
> In *Rafferty v. Commissioner*, 452 F.2d 767 (1st Cir. 1971), it was held, under a plan to avoid any remote possibility of interference in a business by future sons-in-law, that the spin-off had no immediate business reason, involved a personal motive and had as its primary purpose a desire to make bequests in accordance with an estate plan. The difficulties anticipated were so remote that they might never come to pass. The daughters might never marry - thus eliminating completely any cause to worry about business interference by future sons-in- law. There was, at best, "only an envisaged possibility of future debilitating nepotism," and the effect on the business was conjectural.
>
> In the instant case, the problem was immediate due to the advanced age of A and was directly related to the retention of a franchise vital to the business of the distributing corporation. Accordingly, the distribution by X of the Y stock to the inactive-daughter shareholders and to A in exchange for X stock is supported by a valid business purpose within the contemplation of section 1.355-2(c) of the regulations.

[5017] Reg. § 1.355-2(b).

[5018] Reg. § 1.355-2(b).

[5019] Reg. § 1.355-2(b)(3). Reg. § 1.355-2(b)(5), Example (3) provides:

> Corporation X is engaged in the manufacture and sale of toys and the manufacture and sale of candy. The shareholders of X wish to protect the candy business from the risks and vicissitudes of the toy business. Accordingly, X transfers the toy business to new corporation Y and distributes the stock of Y to X's shareholders. Under applicable law, the purpose of protecting the candy business from the risks and vicissitudes of the toy business is achieved as soon as X transfers the toy business to Y. Therefore, the distribution is not carried out for a corporate business purpose. See paragraph (b)(3) of this section.

The Regulations also note that a "shareholder purpose… is not a corporate business purpose."[5020] However, sometimes a shareholder's purpose is so coextensive with the corporate business purpose that no real distinction exists between the two, and in such cases, the transaction will be considered to have a corporate business purpose.[5021] Clearly, not all shareholder disputes will rise to the level of a corporate business purpose. For example, a dispute between shareholders who are not part of management would have little effect on the business itself, thus, such a dispute would not be co-extensive with a business purpose:

- The Regulations provide an example of a shareholder dispute that would be coextensive with a corporate business purpose.[5022] The example involves a corporation, owned by two shareholders, engaged in two businesses – manufacturing and selling furniture and selling jewelry. Shareholder A wants to continue the furniture business, and Shareholder B wants to continue the jewelry business. If A and B decide to split up the business and cut ties with one another, the transaction will be considered to have a corporate business purpose – the business will likely benefit from having the interested shareholder running the business – even though the separation was also driven by a shareholder purpose.

- Citing the above example, Rev. Rul. 2003-52 approved as having a business purpose the division of a farming corporation[5023] where the "distribution will eliminate this disagreement

[5020] Reg. § 1.355-2(b)(2).
[5021] Reg. § 1.355-2(b).
[5022] Reg. § 1.355-2(b)(5), Example (2).
[5023] The facts were:

Corporation X is a domestic corporation that has been engaged in the farming business for more than five years. The stock of X is owned 25 percent each by Father, age 68, Mother, age 67, Son, and Daughter. Although Father and Mother participate in some major management decisions, most of the management and all of the operational activities are performed by Son, Daughter, and several farmhands. The farm operation consists of breeding and raising livestock and growing grain.

Son and Daughter disagree over the appropriate future direction of X's farming business. Son wishes to expand the livestock business, but Daughter is opposed because this would require substantial borrowing by X. Daughter would prefer to sell the livestock business and concentrate on the grain business. Despite the disagreement, the two siblings have cooperated on the operation of the farm in its historical manner without disruption. Nevertheless, it has prevented each sibling from developing, as he or she sees fit, the business in which he or she is most interested.

Having transferred most of the responsibility for running the farm to the children, Father and Mother remain neutral on the disagreement between their children. However, because of the disagreement, Father and Mother would prefer to bequeath separate interests in the farm business to their children.

For reasons unrelated to X's farm business, Son and Daughter's husband dislike each other. Although this has not impaired the farms operation to date, Father and Mother believe that requiring Son and Daughter to run a single business together is likely to cause family discord over the long run.

To enable Son and Daughter each to devote his or her undivided attention to, and apply a consistent business strategy to, the farming business in which he or she is most interested, to further the estate planning goals of Father and Mother, and to promote family harmony, X transfers the livestock business to newly formed, wholly owned domestic corporation Y and distributes 50 percent of the Y stock to Son in exchange for all of his stock in X. X distributes the remaining Y stock equally to Father and Mother in exchange for half of their X stock. Going forward, Daughter will manage and operate X and have no stock interest in Y, and Son will manage and operate Y and have no stock interest in X. Father and Mother will also amend their

> and allow each sibling to devote his or her undivided attention to, and apply a consistent business strategy to, the farming business in which he or she is most interested, with the expectation that each business will benefit."[5024]

Real world businesses may not have such neatly separable businesses within one corporation, as in the example from the Regulations. But even in "single function" businesses, a shareholder purpose (shareholder dispute) can still rise to the level of a corporate business purpose. The IRS has approved a Code § 355 tax-free corporate division where the division was driven by friction that had developed between shareholders "regarding fundamental management policy and the expansion of the business" and the shareholders had been "unable to agree to a current fair market value of the stock."[5025]

Thus, for a shareholder dispute to rise to the level of a corporate business purpose, the dispute must be one that will negatively affect the corporation's business if it is not carried out. Disputes between purely passive shareholders will not reach that threshold. But disputes between active shareholders on whether to grow the company or other differences in business philosophies would likely reach the necessary corporate business purpose threshold. Essentially, as long as

---

> wills to provide that Son and Daughter will inherit stock only in Y and X, respectively. After the distribution, Father and Mother will still each own 25 percent of the outstanding stock of X and Y and will continue to participate in some major management decisions related to the business of each corporation.
>
> Apart from the issue of whether the business purpose requirement of 1.355-2(b) is satisfied, the distribution meets all of the requirements of 368(a)(1)(D) and 355 of the Internal Revenue Code.

[5024] After reviewing the 1989 preamble to the regulations, T.D. 8238, the ruling cited the example then reasoned:

> The disagreement of Son and Daughter over the farms future direction has prevented each sibling from developing, as he or she sees fit, the business in which he or she is most interested. The distribution will eliminate this disagreement and allow each sibling to devote his or her undivided attention to, and apply a consistent business strategy to, the farming business in which he or she is most interested, with the expectation that each business will benefit. Therefore, although the distribution is intended, in part, to further the personal estate planning of Father and Mother and to promote family harmony, it is motivated in substantial part by a real and substantial non-Federal tax purpose that is germane to the business of X. Hence, the business purpose requirement of 1.355-2(b) is satisfied.

[5025] Letter Ruling 8943038. See also Letter Ruling 201411012, which, consistent with IRS ruling policy, declined to rule on business purpose:

> Sibling 1 is President of Distributing, operating and managing the businesses with active input from Sibling 2 and both siblings' adult children. In recent years, however, the Shareholders have disagreed significantly about the direction in which to take each of the businesses. Therefore, they propose the following transaction:
>
> (i) Distributing will form Controlled and transfer to it approximately c percent of Distributing's active trade or business assets, including some of the separable tracts of land, in exchange for all of Controlled's outstanding stock (the Contribution).
>
> (ii) Distributing will distribute to Sibling 2 all of the Controlled shares in exchange for all of Sibling 2's stock in Distributing (the Split-Off).
>
> After the Split-Off, Sibling 1 will hold all of the outstanding stock of Distributing, which will remain actively engaged in its historic businesses using the remaining d percent of its historic business assets. Sibling 2 will hold all of the outstanding stock of Controlled, which will be actively engaged in Business E using the c percent of Distributing's historic business assets received in the Contribution.

Presumably the taxpayers request the ruling to approve Code § 355's other requirements (although the IRS also declined to rule on the device test or whether the split-off was part of a plan proscribed by Reg. § 1.355-7).

the dispute is between active shareholders, as is usually the case in the standard family business model, it should be relatively easy to establish that the dispute would affect the corporation's operations, thus establishing that the shareholder purpose is co-extensive with a corporate business purpose.

The IRS has removed this test from its list of areas on which it will not issue a private letter ruling.[5026]

II.Q.7.f.ii.(f). Continuity of Interest

The sixth requirement is "continuity of interest." Reg. § 1.355-2(c)(1), "Requirement," provides:

> Section 355 applies to a separation that effects only a readjustment of continuing interests in the property of the distributing and controlled corporations. In this regard section 355 requires that one or more persons who, directly or indirectly, were the owners of the enterprise prior to the distribution or exchange own, in the aggregate, an amount of stock establishing a continuity of interest in each of the modified corporate forms in which the enterprise is conducted after the separation. This continuity of interest requirement is independent of the other requirements under section 355.

Reg. § 1.355-2(c)(2), "Examples," provides:

> *Example (1)*. For more than five years, corporation X has been engaged directly in one business, and indirectly in a different business through its wholly owned subsidiary, S. The businesses are equal in value. At all times, the outstanding stock of X has been owned equally by unrelated individuals A and B. For valid business reasons, A and B cause X to distribute all of the stock of S to B in exchange for all of B's stock in X. After the transaction, A owns all the stock of X and B owns all the stock of S. The continuity of interest requirement is met because one or more persons who were the owners of X prior to the distribution (A and B) own, in the aggregate, an amount of stock establishing a continuity of interest in each of X and S after the distribution.
>
> *Example (2)*. Assume the same facts as in Example (1), except that pursuant to a plan to acquire a stock interest in X without acquiring, directly or indirectly, an interest in S, C purchased one-half of the X stock owned by A and immediately thereafter X distributed all of the S stock to B in exchange for all of B's stock in X. After the transactions, A owns 50 percent of X and B owns 100 percent of S. The distribution by X of all of the stock of S to B in exchange for all of B's stock in X will satisfy the continuity of interest requirement for section 355 because one or more persons who were the owners of X prior to the distribution (A and B) own, in the aggregate, an amount of stock establishing a continuity of interest in each of X and S after the distribution.
>
> *Example (3)*. Assume the same facts as in Examples (1) and (2), except that C purchased all of the X stock owned by A. After the transactions, neither A nor B own any of the stock of X, and B owns all the stock of S. The continuity of interest requirement is not met because the owners of X prior to the distribution (A and B) do not, in the aggregate, own an amount of stock establishing a continuity of interest in each of X and S after the distribution, i.e., although A and B collectively have

[5026] Rev. Proc. 2016-45.

retained 50 percent of their equity interest in the former combined enterprise, they have failed to continue to own the minimum stock interest in the distributing corporation, X, that would be required in order to meet the continuity of interest requirement.

Example (4). Assume the same facts as in Examples (1) and (2), except that C purchased 80 percent of the X stock owned by A. After the transactions, A owns 20 percent of the stock of X, B owns no X stock, and B owns 100 percent of the S stock. The continuity of interest requirement is not met because the owners of X prior to the distribution (A and B) do not, in the aggregate, have a continuity of interest in each of X and S after the distribution, *i.e.*, although A and B collectively have retained 60 percent of their equity interest in the former combined enterprise, the 20 percent interest of A in X is less than the minimum equity interest in the distributing corporation, X, that would be required in order to meet the continuity of interest requirement.

The division really must be a division and not essentially a sale. One or more direct or indirect owners of the distributing corporation before the distribution must own, in the aggregate, an amount of stock establishing a continuity of interest in each of the modified corporate forms in which the enterprise is conducted after the separation. Continuing ownership of 50% or more should be enough to establish a continuity of interest.[5027] In most family business divisions, meeting this test will not be a problem, since both the distributing and controlled corporations will be owned by original shareholders.

Letter Ruling 202033005 involved the following facts:[5028]

Summary of Facts

Distributing, formed under the laws of State A, is an accrual basis Subchapter S corporation, which is engaged primarily in Business A. It was formed on Date 1. One of Distributing's founders was Settlor. Distributing has outstanding A shares of stock, all of which are held by Trust as the sole shareholder. Sibling 1, Sibling 2, Sibling 3 and Sibling 4 (the "Siblings") are the remaindermen beneficiaries of Trust.

Distributing owns all of the outstanding stock of Q Sub 1 and all of the outstanding interests in Q Sub 2, both disregarded entities for federal income tax purposes. Each of Q Sub 1 and Q Sub 2 owns land that is unrelated to Distributing's Business A operations.

Controlled, formed under the laws of State A, is an accrual basis corporation formed to effectuate the proposed transaction. Controlled has outstanding B shares of stock, all of which are held by Distributing.

Distributing owns approximately C acres of land and leases another D acres of land. It is on this land that Distributing engages in Business A. Distributing has submitted financial and employment information indicating that it is actively engaged in Business A and

---

[5027] See Reg. § 1.355-2(c)(2), Example (2) and Rev. Proc. 96-30, § 4.07.
[5028] To explain some of the terms used below, see parts II.A.2.g Qualified Subchapter S Subsidiary (QSub) and III.A.3.e.ii Electing Small Business Trusts (ESBTs.

represents that it has gross receipts and has documented operating expenses representing the active conduct of a trade or business for each of the past five years.

Settlor created Trust on Date 2 and funded it with all of the outstanding shares of Distributing. Trust elected to become an Electing Small Business Trust ("ESBT") on Date 3, the same day Distributing made its Subchapter S corporation election. Settlor and Trustee A served as co-trustees of Trust until Settlor's death, at which point Trust became irrevocable and Trustee A became the sole trustee.

Other than some cash in a bank account, Trust's sole asset is all the outstanding shares of Distributing. Under the terms of Trust, Trust shall terminate upon: (a) the last to die of Settlor, Trustee A, and X; and (b) either: (i) the youngest of Trustee A's children (Sibling 1, Sibling 2, Sibling 3 and Sibling 4, referred to in the aggregate as the Siblings) attains age 25; or (ii) the last survivor of Trustee A's children dies before attaining age 25. Upon termination, Trust's stock ownership in Distributing is to be transferred free of Trust in equal shares to each of the Siblings.

Trustee A died on Date 5. Settlor, Trustee A and X have passed away and the Siblings are all over age 25. Trust is terminating, and its ownership of Distributing's stock has vested in the Siblings equally. Because of considerable disagreement amongst the Siblings regarding the operation of Business A, the Siblings requested that Trustee B facilitate a settlement amongst them with respect to Distributing before terminating Trust and distributing to each of them his/her equal interest in the corpus of Trust. The settlement devised by Trustee B and approved by the Siblings is as follows (the "Proposed Transaction"):

Proposed Transaction (some of the steps have already been consummated):

1. On Date 4, Distributing organized Controlled.

2. Distributing shall timely elect to have Controlled treated as its qualified Subchapter S Subsidiary, effective as of Controlled's date of organization.

3. In exchange for all of Controlled's stock, Distributing will contribute to Controlled approximately one-half of the C acres of land now owned by Distributing, including any and all buildings and improvements situated thereon ("Contributed Land"), as well as certain assets and liabilities (in the aggregate, the "Contribution") pursuant to an Agreement and Plan of Reorganization ("Plan"), which will also provide -

    a. To the extent necessary, Controlled and Distributing will enter into an agreement or arrangement that would allow the Siblings access to their respective homes situated on the land to be distributed to Controlled. Alternatively, the homes may be moved.

    b. Any obligations for bank loans and mortgages affecting the land now divided between Distributing and Controlled shall be shared equally by Distributing and Controlled until refinanced by such corporations.

    c. Any existing mortgages or home equity lines of credit secured by the land now divided between Distributing and Controlled may be paid in full by Trust prior to the distribution or continue to be an obligation of the Siblings.

d. Distributing may retain the right to continue to lease the D acres of land it currently leases for its operations.

e. Distributing will have direct access to the water shed vital to the Business A operations of both corporations. Distributing and Controlled will enter into a water access and piping easement in connection with catching, storing and moving water from Distributing's land to Controlled's land via the existing water infrastructure. The cost to maintain the water infrastructure will be shared equitably.

f. After the Distribution, Controlled will have direct access to a water reservoir. Distributing and Controlled will enter into an agreement permitting Distributing's representatives reasonable travel across Controlled's land to access the reservoir.

g. Trustee B and the Siblings will outline an equitable percentage of Business A assets which will be retained by Distributing or transferred to Controlled.

h. Distributing will transfer approximately one-half of outstanding receivables or the proceeds from such receivables to Controlled.

i. Distributing will transfer to Controlled machinery and equipment, including office equipment, vehicles, furniture and fixtures, etc. not specifically identified with either Distributing or Controlled, as they agree, or if they are unable to agree, as Trustee B shall decide in Trustee B's sole discretion.

j. Distributing will transfer a one-half interest in the assets of or one-half of the stock ownership in Q Sub 1 to Controlled. If Q Sub 1's assets are sold before the closing occurs, the net proceeds shall be added to cash.

k. Distributing will transfer a one-half interest in the assets of or one-half of its membership interest in Q Sub 2 (after conversion to a multiple member LLC) to Controlled. If Q Sub 2's assets are sold before the closing occurs, the net proceeds shall be added to cash.

l. Distributing will distribute one-half of its interest in undeveloped coastal land to Controlled. If this property is sold before the closing occurs, the net proceeds shall be added to cash.

m. The balance from any outstanding accounts payable shall be paid equally by Distributing and Controlled.

n. Distributing's employees will either stay with Distributing or move to Controlled depending on how the Siblings and employees shall agree. The corporations shall not have or share common employees.

o. Distributing's Qualified Retirement Plan shall be divided between Distributing and Controlled, subject to the approval of the Internal Revenue Service, in proportion and according to the current employees covered by the Qualified Retirement Plan retained by each after the Closing Date. Account balances and liability for payment of benefits to former employees shall remain with Distributing.

p. Distributing will transfer cash and other assets not specifically identified above to Controlled to the extent necessary to equalize the net worth of Distributing and Controlled.

q. The ultimate values of Distributing and Controlled may be properly redetermined, necessitating adjustments to the above-mentioned distributions. In the event there are insufficient cash and other assets to equalize such values, Trustee B shall equalize such values, by reallocating assets, borrowing funds, creating a debt obligation between Distributing and Controlled, or such other means as the Trustee B determines, in the Trustee B's sole discretion, to be the most appropriate means to accomplish equalization. All transfers from Distributing to Controlled will be in furtherance of equalizing the net worth of the two corporations.

4. Trust will transfer to Distributing one-half of the outstanding shares of Distributing stock in exchange for all the outstanding shares of Controlled stock. Trust will either distribute: (A) all outstanding shares of Distributing's stock equally to Sibling 3 and Sibling 4 and all outstanding shares of Controlled's stock equally to Sibling 1 and Sibling 2; or (B) all outstanding shares of Distributing's stock equally to Sibling 1 and Sibling 2 and all outstanding shares of Controlled's stock equally to Sibling 3 and Sibling 4 (the "Distribution"). After the Distribution, Distributing will be wholly owned by Siblings 1 and 2 or Siblings 3 and 4, and Controlled will be wholly owned by the other Siblings.

5. After the Distribution, both Controlled and Distributing will be actively engaged in Business A, the historic business of Distributing and Controlled. Distributing and Controlled will each use in their Business A operations the historic business assets previously employed by Distributing in the operations of Business A.

6. Controlled will make a timely S-Corporation election.

Shareholders Before and After Distribution:

The income beneficiaries of Trust have passed away. Trust is terminating. The remaindermen of Trust are currently entitled to receive the Trust corpus, which consists of both principal and income, and the remaindermen are entitled to receive such Trust corpus in equal shares. Trust holds mere legal title to the Distributing shares; the remaindermen (*i.e.*, the Siblings) are the vested owners, not Trust. Trust continues pursuant to court order solely at the behest of the Siblings.

Representations:

Except as set forth below,

1. Trustee B makes all the representations in section 3 of the Appendix to Rev. Proc. 2017-52 in the form set forth therein.

2. Trustee B does not make the following representations, which do not apply to the Proposed Transaction: 5, 6, 20, 24, 25, 35, 36, 37, 38, 39, and 40.

3. Trustee B makes the following alternative representations set forth in section 3 of the Appendix to Rev. Proc. 2017-52: 3(a), 8(a), 11(a), 15(a), 22(a), 31(a) and 41(b).

Letter Ruling 202033005 called the following the "Significant Issue Ruling":

> Based solely on the information submitted and the representations made, we rule that Sibling 1, Sibling 2, Sibling 3 and Sibling 4 are the shareholders of Distributing for purposes of satisfying the shareholder control requirement of IRC § 368(a)(1)(D), and the continuity of interest requirement of Treas. Reg. § 1.355-2(c)(1).

Letter Ruling 202033005 called the following the "Transactional Ruling":

> Based solely on the information submitted and the representations made, we rule as follows with respect to the Proposed Transaction:

1. The Contribution, followed by the Distribution, will qualify as a reorganization under IRC § 368(a)(1)(D) and Distributing and Controlled will each be "a party to a reorganization" within the meaning of IRC § 368(b).

2. No gain or loss will be recognized by Distributing on the Contribution (IRC §§ 361(a) and 357(a)) to Controlled.

3. No gain or loss will be recognized by Controlled on the Contribution (IRC § 1032(a)).

4. Controlled's basis in each asset received from Distributing in the Contribution will be the same as the basis of such asset in the hands of Distributing immediately before the Contribution (IRC § 362(b)).

5. Controlled's holding period for each asset received from Distributing in the Contribution will include the period during which Distributing held that asset (IRC § 1223(2)).

6. No gain or loss will be recognized by Distributing on the Distribution (IRC § 361(c)(1)).

7. No gain or loss will be recognized by (and no amount will otherwise be included in the income of) any shareholder of Distributing upon receipt of Controlled stock in the Distribution (IRC § 355(a)).

8. The basis of the shares of Controlled in the hands of its shareholders immediately after the Distribution will be the same as the basis of the Distributing shares surrendered in exchange thereof (IRC § 358(a)(1)).

9. The holding period of the Controlled shares received by each shareholder in the Distribution will include the holding period of the Distributing shares surrendered in exchange therefor, provided that the Distributing shares were held as a capital asset in the Distributee's hands on the date of the Distribution (IRC § 1223(1)).

10. Earnings and Profits, if any, will be allocated between Distributing and Controlled in accordance with IRC § 312(h) and Treas. Reg. § 1.312-10(a).

11. Distributing's accumulated adjustment account immediately before the transaction will be allocated between Distributing and Controlled in a manner similar to the manner in which Distributing's earnings and profits will be allocated under IRC § 312(h) in accordance with Treas. Reg. § 1.1368-2(d)(3) (Treas. Reg. §§ 1.312-10(a) and 1.1368-2(d)(3)).

12. Pursuant to Treas. Reg. § 1.1361-5(b)(1)(i) (and (C)), the Distribution will cause a termination of Controlled's Q-Sub election because Controlled will cease to be a wholly owned subsidiary of Distributing, an S corporation.

13. For federal income tax purposes, Controlled will be treated as a new corporation acquiring all of its assets and assuming all of its liabilities from Distributing immediately before the termination of Controlled's Q-Sub election in exchange for the stock of Controlled.

14. The momentary ownership by Distributing of the stock of Controlled, as part of the reorganization under IRC § 368(a)(1)(D), will not cause Controlled to have an ineligible shareholder for any portion of its first taxable year under IRC § 1361(b)(1)(B), and will not, in itself, render Controlled ineligible to elect to be an S Corporation for its first taxable year.

15. If Controlled otherwise meets the requirements of a small business corporation under IRC § 1361, Controlled will be eligible to make a subchapter S election under IRC § 1362(a) for its first taxable year, provided that such election is made effective immediately following the termination of the original Q-Sub election.

Letter Ruling 202033005 limited its rulings' scope:

> This Office has made no determination regarding whether the Distribution (as defined below): (i) satisfies the business purpose requirement of Treas. Reg. § 1.355-2(b); (ii) is used principally as a device for the distribution of the earnings and profits of the Distributing corporation or the Controlled or both (see section 355(a)(1)(B) and Treas. Reg. § 1.355-2(d)); or (iii) is part of a plan (or series of related transactions) pursuant to which one or more persons will acquire directly or indirectly stock representing a 50-percent or greater interest in Distributing or Controlled, or any predecessor or successor of Distributing or Controlled, within the meaning of Treas. Reg. § 1.355-8T (see section 355(e)(2)(A)(ii) and Treas. Reg. § 1.355-7).

Letter Ruling 202244008 approved the split-up of subsidiaries in an affiliated group:

> Parent directly owns all of the outstanding stock of Sub 1, a domestic corporation and a member of the Parent Group. Sub 1 engages in Business A1, Business A2, Business B, and Business C through its direct and indirect subsidiaries. Parent has submitted financial information in accordance with Rev. Proc. 2017-52 indicating that each of Business A1, Business A2, Business B, and Business C will have had gross receipts and operating expenses representing the active conduct of a trade or business for each of the past five years at the time of the Proposed Transaction. The direct and indirect subsidiaries of Sub 1 relevant to the Proposed Transactions are described below….

For what are represented to be valid business reasons, Sub 1 proposes to separate Business A1, Business A2, and Business B from Business C in the following steps, which will occur sequentially unless otherwise specified...

II.Q.7.f.ii.(g). The Active Trade or Business That Existed Five Years Before the Separation Must Exist After the Separation

The final requirement is that the active trade or business that existed five years before the separation must exist after the separation.[5029]

This requirement will normally be easy to fulfill, as long as all other requirements are met, since corporations that meet the "active business" requirements will likely meet this requirement as well.

II.Q.7.f.iii. Active Business Requirement for Code § 355

The IRS and Treasury have provided significant guidance for what qualifies as an active business. Below is a history of some of the most important guidance.

II.Q.7.f.iii.(a). Farming

In Rev. Rul. 73-234, a corporation engaged in a farm operation as follows:

- The planting, raising, and harvesting of crops and the breeding and raising of livestock in the corporation's farm operation are done by tenant farmers, acting as independent contractors. The tenant farmers are compensated by a share of the proceeds from the sale of all crops and livestock resulting from the farm operation. The corporation employs a general handy-man to maintain the farm property and equipment.

- The corporation employs its sole shareholder and president to participate in the farm operation. He prefers to contract with tenant farmers who have experience with farm machinery and livestock. He supplies all equipment and arranges for all financing necessary for the corporation's operation. With regard to the farm equipment, he engages a local mechanic for the maintenance and repair thereof that is not performed by the general handy-man or the tenant farmers.

- The president devotes significant time and effort to the corporation's farm business. He studies Federal price support and acreage reserve programs, plans all rotation, planting, and harvesting of crops, and purchases and plans the breeding of livestock. He hires seasonal workers and purchases farming equipment, is responsible for handling sales of all crops and livestock, and is responsible for accounting to the tenant farmers for their shares of the proceeds of the sales.

The IRS ruled that the corporation's farm activities included its direct performance of substantial management and operational functions, apart from those activities performed by the tenant farmers acting as independent contractors. Therefore, the corporation satisfied the active business requirements.

[5029] Code § 355(b), Reg. § 1.355-2(h) and 1.355-3(b)(3). See also the last sentence of fn 5009 regarding proposed regulations under Reg. § 1.355-3.

Rev. Rul. 86-126 explains that not all tenant farming qualifies as an active business. In that case:

- The sole officers and shareholders are both farmers who are engaged in the business of farming their own individual tracts of farmland not owned by the corporation, which holds title to large tracts of farmland elsewhere in the same state. Each tract of land held by the corporation is leased for one year at a time to a tenant farmer who has agreed with the corporation to share one-half of all income and expenses of the farm. Each party to the lease is responsible for securing the financing necessary to pay that party's share of expenses. In the case of each tract leased, the planting, raising, and harvesting of corn and soybeans (the only crops grown on these farms) are done by the tenant farmer. The tenant farmer also supplies the farm equipment used in these activities. The tenant farmer repairs and maintains the equipment, and also maintains the irrigation system, fences, and other fixtures located on the property. After consulting with the corporation's officers, the tenant farmer purchases all herbicides, insecticides, and fertilizers used on the property. Also after consulting with them, the tenant farmer contracts to sell the crops at a future date, or sells them when harvested. Each tenant farmer is responsible for accounting to the corporation's officers for the corporation's share of the proceeds.

- The officers each devote to substantial part of their time to the operation of their own respective farms which are unconnected with the farmland owned by the corporation. After completing work on their own properties, the officers occasionally inspect the crops and improvements located on each leased tract. If any corrective steps must be taken, an officer points out the problem to the tenant farmer, who makes the necessary corrections in the way the tenant farmer sees fit. The officers also decide each year what portion of each tract will be leased, in the light of soil conservation needs, market conditions, and federal price support and acreage reserve programs. They review each tenant farmer's accounting of operations and sales.

The IRS contrasted this situation with Rev. Rul. 73-234. In that case, the corporation was engaged in hiring seasonal workers, purchasing and supplying equipment, maintaining equipment, arranging financing, planning all rotation and planting and harvesting of crops, purchasing livestock, planning livestock breeding, selling all crops and livestock, and accounting to the tenant farmers for their shares of the proceeds. That corporate activity, carried on through its own employees and constituting active and substantial managerial and operational activity, contrasts with the activity carried on by the employees of P in the present situation. Here, the IRS said, the corporation either did not engage in the above activities at all, or engaged in them only on a limited basis. At best, it said, the corporation could be considered to engage in some managerial and operational activity but not enough to "qualitatively distinguish its operations from mere investments."

Because of the absence of active and substantial operational and managerial activities, the corporation did not satisfy the active business requirement.

II.Q.7.f.iii.(b). Rev. Rul. 79-394 – Commercial Real Estate

In this ruling, the stock of corporation P is owned by four unrelated individuals. For over five years, P has owned all the stock of corporations X and Y. During that period, P has acted solely as a holding company, X has been engaged in the general contracting business, and Y has been engaged in renting its commercial and residential real estate to unrelated third parties. X's employees have performed all operational activities in connection with Y's rental business. X has paid its employees for these services and has been reimbursed by Y. Y's three officers, who are also officers of P and X, supervise, control and direct the employees of X performing work for Y. Y's officers receive no compensation from Y for the amount of their time devoted to the management and supervision of Y's affairs. These officers are paid only by P and X, and P and X have been reimbursed by Y for the services rendered by the officers to Y.

Y holds title to several commercial and residential rental buildings and associated realty. Y, through its officers and X's employees, continuously seeks additional property of a similar nature for expansion of its rental business. When property is located, Y negotiates its purchase and required financing. Y is primarily obligated on the mortgages relating to its property and pays the principal and interest due thereon. Newly acquired buildings are renovated or altered to reflect the design by Y of custom floor plans that make the property suitable for rental. Y periodically repaints and refurbishes its existing property.

Y endeavors to keep its property rented at all times. When new property is available or when existing property is vacated, Y immediately advertises to attract new tenants. Y verifies the information contained in a prospective tenant's application and negotiates the lease provisions.

Pursuant to the terms of its leases, Y provides and pays for gas, water, electricity, sewage, and insurance for the property and pays the taxes assessed thereon. Moreover, the lease agreements require Y to provide day-to-day maintenance and repair services. These services include insect control, janitorial service, trash collection, ground maintenance, and heating, air conditioning and plumbing maintenance. Y routinely inspects its properties.

Y maintains separate records and accounts to reflect income and expenses relating to each of Y's rental properties as well as Y's general expenses.

Y's above described activity in acquiring, renovating, refurbishing, maintaining, servicing and leasing its rental property is accomplished under the supervision and control of Y's officers using the employees of X.

For valid business reasons, P proposes to distribute all of the Y stock to one of its shareholders solely in exchange for all of that shareholder's P stock in a transaction intended to be tax-free under Code § 355(a). The fair market value of the Y stock to be distributed and the P stock to be surrendered in the exchange are equal.

After the proposed distribution, Y will continue its rental activities as discussed above, and will directly employ, on a full-time basis, most of those employees who have worked on its behalf before the distribution.

The IRS held that Y was engaged in the active conduct of a trade or business under Code § 355(b) for the five-year period preceding distribution of its stock, notwithstanding the fact that during that period it had no employees other than its officers. Moreover, Y will be engaged immediately after the distribution in the active conduct of a trade or business.

The IRS viewed the only factor tending to prove the lack of a pre-distribution active trade or business conducted by Y to be the absence of salaried employees of Y. The IRS reasoned that, given the nature of Y 's conduct of its pre-distribution rental operations and the existence of substantial objective factors that otherwise adequately demonstrate the active conduct of a trade or business, Y's failure to have salaried employees should not, without more, result in failure to meet the Code § 355(b) active trade or business requirement. However, the IRS further stated that the presence or absence of formal employment of employees other than officers, in the distributing corporation or the controlled corporation, will be one factor for consideration in making this determination under Code § 355(b).

II.Q.7.f.iii.(c). Rev. Rul. 80-181 – Reimbursement for Services

The IRS amplified Rev. Rul. 79-394, ruling that the Code § 355(b) active trade or business requirement is satisfied even if Y does not reimburse P and X for the use of their employees and officers in the conduct of Y's real estate activities.

The IRS pointed out, however, that, if Y did not reimburse X and P for the services that X's employees and X's and P's officers rendered to Y, then the IRS would apply Code § 482 to allocate income to X and P in an amount equal to an arm's length charge for the services rendered by the employees of X and the officers of X and P to Y. Y would then deduct the amounts deemed paid by Y to X and P for the services rendered.

II.Q.7.f.iii.(d). Rev. Rul. 92-17 – Participation by Partners in Rental LP

For more than 5 years, limited partnership LP has owned several commercial office buildings that are leased to unrelated third parties. Corporation D has owned a 20% interest in LP for more than 5 years, and throughout that period of time D has been a general partner of LP. The partnership agreement requires that D, as a general partner, provide the managerial services to LP necessary to operate LP's rental business. For more than 5 years, D has owned all the stock of C, a corporation which has been actively engaged for more than 5 years in the conduct of a trade or business that is unrelated to D's activities.

LP continuously seeks additional properties to expand its rental business. When a property is located, LP negotiates its purchase and financing and determines whether renovations or alterations are necessary to make the building suitable for rental. LP periodically repaints and refurbishes its existing properties.

LP's leases require LP to provide day-to-day upkeep and maintenance services for its office buildings. These services include trash collection, ground maintenance, electrical and plumbing repair, and insect control. Additionally, LP advertises for new tenants, verifies information contained in lease applications, negotiates leases, handles tenant complaints, prepares eviction notices and warnings for delinquent tenants, collects rent, and pays all expenses, including gas, water, sewage, electricity and insurance for the office buildings. LP also maintains financial and accounting records to reflect income and expenses relating to each of its rental properties as well as LP's general expenses.

LP has conducted these activities for more than five years. Officers of D form active and substantial management functions with respect to LP's activities, including making significant business decisions of the partnership (e.g., decisions with respect to significant renovations of partnership properties, the purchase and sale of properties, and significant financings and refinancings). In addition, D's officers regularly participate in the overall supervision, direction and control of LP's employees in their performance of LP's operational functions.

For a valid business purpose, D proposes to distribute all its C stock pro rata to D's shareholders in a transaction intended to satisfy Code § 355. After the distribution, officers of D will continue to provide LP with the services described above.

Except for the issue of whether the activities performed by D in connection with the operation of LP's rental business constitute an active trade or business, the transaction will otherwise meet all the requirements of Code § 355.

The IRS held that, if officers of a corporation that is a general partner in a limited partnership perform active and substantial management functions for the partnership, including making significant business decisions of the partnership and regular participation in the overall supervision, direction and control of the employees of the partnership in operating the partnership's rental business, the corporation is engaged in the active conduct of a trade or business under Code § 355(b) and the distribution of the stock of C by D to D's shareholders is tax-free to the D shareholders under section 355.

The IRS reasoned that the fact that a partnership engages in activities that would constitute the active conduct of a trade or business if conducted by a corporation does not mean that each partner in the partnership is considered to engage in the active conduct of a trade or business for purposes of Code § 355(b). It stated that whether a partner is considered to engage in the active conduct of a trade or business must be made with reference to the activities of the partner as well as the partnership.

It further reasoned that, D, like Y in Rev. Rul. 79-394, performs through its officers and the employees of LP significant services with respect to the operation and management of LP's rental business. The only factor tending to prove that D has not been engaged in the active conduct of a trade or business is D's lack of employees to perform the operational services necessary to operate LP's office buildings. However, this factor, standing alone, will not cause D to fail the Code § 355(b) active trade or business test.

II.Q.7.f.iii.(e). Rev. Rul. 2007-42 – Level of Participation in Rental LLC

The IRS contrasted two situations in which a corporation (D) owns a membership interest in an LLC taxed as a partnership, holding that in one case D was deemed engaged in the active conduct of a trade or business and the other case D was not deemed to be so engaged.

In Situation 1, D was deemed to be deemed engaged in the active conduct of a trade or business. For more than five years, LLC owned several commercial office buildings that are leased to unrelated third parties. LLC has one class of membership interests outstanding. For more than five years, D has owned a 33.3% membership interest in LLC and has owned all the stock of a subsidiary (C), a corporation that has been engaged for more than five years in the active conduct of a trade or business that is unrelated to D's activities.

LLC continuously seeks additional properties to expand its rental business. When a property is located, LLC negotiates its purchase and financing and determines whether renovations or alterations are necessary to make the building suitable for rental. LLC periodically repaints and refurbishes its existing properties.

Pursuant to the terms of its leases, LLC provides day-to-day upkeep and maintenance services for its office buildings. These services include trash collection, ground maintenance, electrical and plumbing repair, and insect control. Additionally, LLC advertises for new tenants, verifies information contained in lease applications, negotiates leases, handles tenant complaints, prepares eviction notices and warnings for delinquent tenants, collects rent, and pays all expenses, including gas, water, sewage, electricity and insurance for the office buildings. LLC also maintains financial and accounting records to reflect income and expenses relating to each of its rental properties as well as LLC's general expenses.

The above described activities of LLC have been conducted for more than five years. The employees of LLC perform all management and operational functions with respect to LLC's rental business. Neither D nor any other member of LLC performs services with respect to LLC's business.

The IRS ruled that D is engaged in the active conduct of LLC's rental business for purposes of Code§ 355(b) because D owns a significant interest in LLC and LLC performs the required activities that constitute an active trade or business under the regulations.

In Situation 2, the facts are the same as Situation 1 except that D owns a 20% membership interest in LLC. The IRS ruled that D was not engaged in the active conduct of LLC's rental business for purposes of Code§ 355(b) because a 20% interest was not sufficiently significant.

The IRS reasoned that the fact that a partnership engages in activities that would constitute the active conduct of a trade or business if conducted by a corporation does not necessarily mean that each partner in the partnership is considered to be engaged in the active conduct of a trade or business for purposes of Code § 355(b). In such a case, the determination of whether a partner is considered to be engaged in the active conduct of a trade or business must be based on the requirements of Code § 355 and the regulations thereunder taking into account the activities of the partner (if any), the partner's interest in the partnership, and the activities of the partnership.

Although Rev. Rul. 92-17 viewed a 20% interest in a partnership to be sufficient, in that case the corporate partner performed management functions. The IRS pointed out that D's officers performed active and substantial management functions with respect to LP, including the significant business decision-making of the partnership, and regularly participated in the overall supervision, direction, and control of LP's employees in operating LP's rental business. Rev. Rul. 2002-49 reached a similar conclusion where D and another corporation (X) each own a 20% interest in a member-managed LLC and D and X jointly managed the LLC's business.

The IRS looked to Reg. § 1.368-1(d)(4)(iii)(B) to validate its position that a one-third interest was sufficient to impute activity to a partner that does not perform active and substantial management functions for the business of the partnership. That regulation, regarding the continuity of business enterprise requirement applicable to corporate reorganizations, provides that the issuing corporation will be treated as conducting a business of a partnership if members of the qualified group, in the aggregate, own an interest in the partnership representing a significant interest in that partnership business.

II.Q.7.f.iii.(f). Proposed Regulations on Active Conduct of Business

Recent proposed regulations would provide that, for purposes of the active conduct of a business rule, a partner in a partnership will be attributed the trade or business assets and activities of that partnership during the period that such partner satisfies the requirements; however: the stock of a corporation owned by the partnership is not attributed to a partner; for purposes of determining the activities that are conducted by the partnership that may be attributed to the partner, the activities of independent contractors, and partners that are not affiliates of the partner, are not taken into account; and, generally, the activities of partners that are affiliates of the partner are only taken into account during the period that such partners are affiliates of the partner.[5030] The trade or business assets and activities of a partnership will be attributed to a partner if the partner owns a ***significant*** interest in the partnership. [5031] Generally, the trade or business assets and activities of a partnership will be attributed to a partner if the partner performs active and substantial management functions for the partnership with respect to the trade or business assets and activities (for example, makes decisions regarding significant business issues of the partnership and regularly participates in the overall supervision, direction, and control of the employees performing the operational functions for the partnership), and the partner owns a ***meaningful*** interest in the partnership. [5032]

Examples illustrate these concepts:[5033]

Example (8). <u>Jointly owned partnership</u>. For more than five years, D has owned all of the stock of C, and D and C each have owned a 17-percent interest in Partnership. Throughout this period, D and Partnership have engaged in the active conduct of ATB1 and ATB2, respectively. In year 6, D transfers its 17-percent interest in Partnership to C and distributes all of the C stock to the D shareholders. Because D owns Code § 1504(a)(2) stock of C, D and C are treated as one corporation for purposes of determining whether D and C are engaged in the active conduct of a trade or business.[5034] Accordingly, throughout the pre-distribution period, D and C are each treated as owning a 34-percent interest in Partnership, and both D and C are treated as engaged in the active conduct of both ATB1 and ATB2 throughout the pre-distribution period.[5035] The transfer of the Partnership interest is disregarded.[5036] After the distribution, C owns 34% of Partnership and is therefore engaged in the active conduct of ATB2. [5037] Therefore, both D and C satisfy Code § 355(b).

Example (22). <u>Partnership—meaningful but not significant</u>. For more than five years, unrelated X and Y have owned a 20% and one-third interests, respectively, in Partnership. The remaining interests in Partnership are owned by unrelated parties. For more than five years, Partnership has manufactured power equipment. But for the performance of all its management functions by employees of X, Partnership would satisfy all the requirements of Prop. Reg. § 1.355-3(b)(2)(i). X and/or Y will be attributed the trade or business assets and activities of Partnership only if the corporation satisfies the requirements of Prop. Reg. § 1.355-3(b)(2)(v)(B) or (C).[5038] While X does not satisfy the requirements of Prop. Reg. § 1.355-3(b)(2)(v)(B) because X's interest in Partnership is not significant, under Prop. Reg. § 1.355-3(b)(2)(v)(C), X owns a meaningful interest in Partnership and performs active and substantial management functions for the trade or business assets and activities of Partnership. Therefore, X is attributed the trade or business assets and activities of Partnership. Accordingly, X is engaged in the active conduct of the business of manufacturing power equipment.[5039] In determining whether Y is engaged in the business of manufacturing power equipment, the management functions performed by X for Partnership are not taken into account.[5040] Therefore, although Y is attributed Partnership's trade or business assets and activities under Prop. Reg. § 1.355-3(b)(2)(v)(B) because Y owns

---

[5030] Prop. Reg. § 1.355-3(b)(2)(v)(A).
[5031] Prop. Reg. § 1.355-3(b)(2)(v)(B).
[5032] Prop. Reg. § 1.355-3(b)(2)(v)(C).
[5033] Prop. Reg. § 1.355-3(d)(2).
[5034] Prop. Reg. § 1.355-3(b)(1)(ii).
[5035] Prop. Reg. § 1.355-3(b)(2)(v)(A), (B).
[5036] Prop. Reg. § 1.355-3(b)(1)(ii).
[5037] Prop. Reg. § 1.355-3(b)(2)(v)(A), (B).
[5038] Prop. Reg. § 1.355-3(b)(2)(v)(A).
[5039] Prop. Reg. § 1.355-3(b)(2).
[5040] Prop. Reg. § 1.355-3(b)(2)(v)(A).

a significant interest in Partnership, Y is not engaged in the business of manufacturing power equipment because neither Y nor Partnership perform any management functions for the business.[5041]

Example (23). Partnership—significant but not meaningful. The facts are the same as Example 22 except that all the management functions related to the business of Partnership are performed by employees of Partnership. Because employees of Partnership perform all of the management functions related to the trade or business assets and activities of manufacturing power equipment, Partnership itself satisfies all the requirements of Prop. Reg. § 1.355-3(b)(2)(i). X neither owns a significant interest in Partnership nor performs active and substantial management functions with respect to the trade or business assets and activities of Partnership. Accordingly, X does not satisfy the requirements Prop. Reg. § 1.355-3(b)(2)(v)(B) or (C), X is not attributed the trade or business assets and activities of Partnership's business of manufacturing power equipment, and X is not engaged in the active conduct of the business of manufacturing power equipment. On the other hand, because Y owns a significant interest in Partnership, Y satisfies the requirements of Prop. Reg. § 1.355-3(b)(2)(v)(B). Therefore, Y is attributed the trade or business assets and activities of Partnership's business. Accordingly, Y satisfies the requirements of Prop. Reg. § 1.355-3(b)(2)(i) and is engaged in the active conduct of the business of manufacturing power equipment.

Example (24). Partnership—significant by many. The facts are the same as Example 23 except that X, Y, and Z each own a one-third interest in Partnership. Because X, Y, and Z each own a significant interest in Partnership, each of X, Y, and Z satisfies the requirements of Reg. § 1.355-3(b)(2)(v)(B). Accordingly, each of X, Y, and Z is attributed the trade or business assets and activities of Partnership, satisfies the requirements of Reg. § 1.355-3(b)(2)(i), and is engaged in the active conduct of the business of manufacturing power equipment.

II.Q.7.f.iii.(g). Combining Split Up with Sale to Irrevocable Grantor Trust

While we waited for those proposed regulations to be finalized, Letter Ruling 200842003 was issued, providing an excellent example of how a family business can be divided and then sold using a sale to a separate irrevocable grantor trust for each adult child. First, the parent split the corporation into five different entities. Then, the parent sold an interest in each entity to a different irrevocable grantor trust for a different child. Although Code § 355 required the parent to continue to hold on to the new corporations, the parent was deemed not to have sold the corporations because the sale to the irrevocable grantor trust was disregarded for income tax purposes. Below are details excerpted from the ruling.

Distributing is a C corporation. Less than 10 years ago, Distributing elected taxation as an S corporation. Distributing has two classes of common stock that differ only by the number of votes per share. All of the Distributing stock is owned by one family. Shareholder 5 is the parent of each of Shareholders 1 through 4. The parent and the children own the Series A stock. The children own the Series B stock. The parent is the majority shareholder of Distributing.

Distributing has directly had gross receipts and operating expenses representative of the active conduct of a trade or business for each of the past five years.

[5041] Prop. Reg. § 1.355-3(b)(2)(iii).

For what are represented to be valid business reasons, Distributing has proposed the following transactions (the "Proposed Transactions"):

(i) Distributing will create Controlled 1, Controlled 2, Controlled 3, and Controlled 4 (collectively, the "Controlled corporations").

(ii) Distributing will transfer all of its assets to the Controlled corporations in exchange for all of the stock of each of the Controlled corporations and the assumption by each of the Controlled corporations of the liabilities associated with the assets transferred (collectively, the "Contributions").

(iii) Distributing will distribute pro rata all of its stock in each of the Controlled corporations to Shareholders 1 through 5 in exchange for all of the stock of Distributing held by Shareholders 1 through 5 (collectively, the "Distributions"). Each of the Controlled corporations will make an S election on the first available date after the Distributions.

(iv) Distributing will liquidate.

Shareholder 5 will establish four irrevocable grantor trusts: Trust 1, Trust 2, Trust 3, and Trust 4 (collectively, the "Trusts"). Distributing represents that Shareholder 5 will be the grantor of each of the Trusts and will be treated as the owner of each Trust's assets under Code § 671. Shareholder 1 will be the sole beneficiary of Trust 1, Shareholder 2 will be the sole beneficiary of Trust 2, Shareholder 3 will be the sole beneficiary of Trust 3, and Shareholder 4 will be the sole beneficiary of Trust 4.

Shareholder 5 will transfer e% of her stock in Controlled 1 to Trust 1, e% of her stock in Controlled 2 to Trust 2, e% of her stock in Controlled 3 to Trust 3, and e% of her stock in Controlled 4 to Trust 4 (the "Gift Transactions"). Shareholder 5 will sell f% of her stock in Controlled 1 to Trust 1, f % of her stock in Controlled 2 to Trust 2, f% of her stock in Controlled 3 to Trust 3, and f% of her stock in Controlled 4 to Trust 4 in exchange for promissory notes from each Trust (the "Sale Transactions"). Distributing has represented that the Gift Transactions and the Sale Transactions are disregarded for federal income tax purposes.

Shareholder 5's estate plan provides that her ownership interests in each of the Controlled corporations will be separated, so that Shareholder 1 will only inherit the stock of Controlled 1, Shareholder 2 will only inherit the stock of Controlled 2, Shareholder 3 will only inherit the stock of Controlled 3, and Shareholder 4 will only inherit the stock of Controlled 4.

The taxpayer made the following representations regarding the Proposed Transactions:

(a) Neither the business nor control of any entity conducting this business was acquired during the five-year period ending on the date of the Distributions in a transaction in which gain or loss was recognized (or treated as recognized) in whole or in part.

(b) The fair market value of the stock of each of the Controlled corporations to be received by each shareholder of Distributing will be approximately equal to the fair market value of the Distributing stock surrendered by each shareholder in exchange therefor.

(c) No part of the consideration to be distributed by Distributing will be received by a shareholder as a creditor, employee, or in any capacity other than that of a shareholder of the corporation.

(d) Following the Proposed Transactions, the Controlled corporations will each continue, independently and with its separate employees, the active conduct of its share of all the integrated activities of Business D conducted by Distributing prior to consummation of the Proposed Transactions.

(e) The distribution of the stock of each of the Controlled corporations is carried out for the following corporate business purposes: (1) to implement business succession planning; and (2) to avoid shareholder deadlock after implementation of the plan by allowing each shareholder in the post-transition structure to independently manage his or her portion of Distributing's business.

(f) The Proposed Transactions are not used principally as a device for the distribution of the earnings and profits of Distributing or the Controlled corporations.

(g) For purposes of Code § 355(d), immediately after the Distributions, no person (determined after applying Code § 355(d)(7)) will hold stock possessing 50% or more of the total combined voting power of all classes of Distributing stock entitled to vote or 50% or more of the total value of shares of all classes of Distributing stock, that was acquired by purchase (as defined in Code § 355(d)(5) and (8)) during the five-year period (determined after applying Code § 355(d)(6)) ending on the date of the Distributions.

(h) For purposes of Code § 355(d), immediately after the Distributions, no person (determined after applying Code § 355(d)(7)) will hold stock possessing 50% or more of the total combined voting power of all classes of any Controlled stock entitled to vote or 50% or more of the total value of the shares of all classes of any Controlled stock, that was either (i) acquired by purchase (as defined in Code § 355(d)(5) and (8)) during the five-year period (determined after applying Code § 355(d)(6)) ending on the date of the Distribution, or (ii) attributable to distributions on Distributing stock that was acquired by purchase (as defined in Code § 355(d)(5) and (8)) during the five-year period (determined after applying Code § 355(d)(6)) ending on the date of the Distributions.

(i) Any liabilities assumed (within the meaning of Code § 357(d)) by the Controlled corporations in the Proposed Transactions were incurred in the ordinary course of business and are associated with the assets being transferred.

(j) With respect to each Contribution to a Controlled corporation, the total adjusted bases and the total fair market value of the assets transferred to the Controlled corporation by Distributing in the Proposed Transactions will exceed the sum of the amount of any liabilities assumed (within the meaning of Code § 357(d)) by the Controlled corporation in the exchange.

(k) No intercorporate debt will exist between Distributing and any of the Controlled corporations at the time of, or subsequent to, the Distributions.

(l) Payments made in connection with all continuing transactions, if any, between any of the Controlled corporations will be for fair market value based on terms and conditions arrived at by the parties bargaining at arm's length.

(m) No parties to the Proposed Transactions are investment companies as defined in Code § 368(a)(2)(F)(iii) and (iv).

(n) The Distributions are not part of a plan or series of related transactions (within the meaning of Treas. Reg. § 1.355-7) pursuant to which one or more persons will acquire directly or indirectly stock representing a 50% or greater interest (within the meaning of Code § 355(d)(4)) in either Distributing or any of the Controlled corporations (including any predecessor or successor of Distributing or any of the Controlled corporations).

(o) Immediately after the Distributions, either (i) no person will hold a 50% or greater interest (within the meaning of Code § 355(g)) in the stock of Distributing or any of the Controlled corporations who did not hold such an interest immediately before the distribution, or (ii) neither Distributing nor any of the Controlled corporations will be a disqualified investment corporation (within the meaning of Code § 355(g)(2)).

The IRS ruled as follows:

(1) Each Contribution, together with its respective Distribution, will be a reorganization within the meaning of Code § 368(a)(1)(D). With respect to each such reorganization, Distributing and the respective Controlled corporation will be "a party to a reorganization" within the meaning of Code § 368(b).

(2) No gain or loss will be recognized by Distributing on the Contributions (Code § 357(a) and 361(a)).

(3) No gain or loss will be recognized by any of the Controlled corporations on the Contributions (Code § 1032(a)).

(4) The basis of each asset received by each of the Controlled corporations in the Contributions will equal the basis of that asset in the hands of Distributing immediately before the Contributions (Code § 362(b)).

(5) The holding period of each asset received by each of the Controlled corporations in the Contributions will include the period during which Distributing held the asset (Code § 1223(2)).

(6) No gain or loss will be recognized by (and no amount will be included in the income of) Shareholder 1, Shareholder 2, Shareholder 3, Shareholder 4, or Shareholder 5 on their receipt solely of the stock of the Controlled corporations in the Distributions (Code § 355(a)).

(7) No gain or loss will be recognized by Distributing in connection with the Distributions (Code § 361(c)(1)).

(8) With respect to each of Shareholders 1 through 5, the aggregate basis of the stock of the Controlled corporations in their hands after the Distributions will equal the aggregate basis of the Distributing stock surrendered in exchange therefor, and this aggregate basis will be allocated between the stock of the Controlled corporations in proportion to the fair market value of each immediately following the Distributions in accordance with Treas. Reg. § 1.358-2(a) (Code § 358(a) and (b)(2)).

(9) The holding period of the stock in each of the Controlled corporations received by each of Shareholders 1 through 5 in the Distributions will include the holding period of the

Distributing stock surrendered in exchange therefor, provided the Distributing stock was held as a capital asset on the date of the Distributions (Code § 1223(1)).

(10) The earnings and profits of Distributing (if any) will be allocated to each of the Controlled corporations in accordance with Code § 312(h) and Treas. Reg. section 1.312-10(a).

(11) Each of the Controlled corporations will be subject to Code § 1374 with respect to any asset transferred from Distributing to the Controlled corporations to the same extent Distributing was subject to Code § 1374 with respect to such asset. For purposes of Code § 1374, the recognition period of each of the Controlled corporations will be reduced by the portion of Distributing's recognition period that expires prior to Distributing's transfer of the assets (Code § 1374(d)(8) and IRS Ann. 86-128).

The IRS specifically expressed no opinion regarding:

(i) Whether the Distributions satisfy the business purpose requirement of Treas. Reg. § 1.355-2(b);

(ii) Whether the Distributions are used principally as a device for the distribution of the earnings and profits of Distributing or the Controlled corporations;

(iii) Whether the Proposed Transactions are part of a plan (or series of related transactions) under Code § 355(e)(2)(A)(ii);

(iv) Whether Distributing's election to be taxed as a subchapter S corporation is valid; whether the Controlled corporations are otherwise eligible to be taxed as subchapter S corporations; and whether the Controlled corporations' elections to be taxed as subchapter S corporations will be valid under Code § 1362(a);

(v) The gift and estate tax treatment of the proposed transactions, including whether the Gift Transactions and the Sale Transactions constitute separate transactions for gift tax purposes and the extent to which the Gift Transactions and the Sale Transactions constitute transfers for adequate consideration in money or money's worth; and

(vi) Whether the Trusts are trusts grantor trusts.

II.Q.7.f.iii.(h). Other Estate Planning Applications of Split Ups

Other letter rulings involving Code§ 355 transactions in estate planning situations include:

- Letter Ruling 200850018 (Code § 303 redemption)
- Letter Ruling 200809017 (two families)
- Letter Ruling 200645010 (two locations)
- Letter Ruling 200645010 (three subsidiaries)

II.Q.7.f.iv. Tax Effects When Code § 355 Provisions Are Not Met

If a corporation might not be able to satisfy Code § 355, consider part II.Q.7.h.ix Value Freeze as Alternative to Code § 355 Division to avoid the consequences described in this part II.Q.7.f.iv.

II.Q.7.f.iv.(a). Distributing Corporation

In a number of situations, a distributing corporation may have to recognize gain on a distribution that would otherwise qualify as tax-free, Code § 355 distribution.[5042] The first of these exceptions to the non-recognition rule is the "disguised sale" rule of Code § 355(c)(2), as modified by Code § 355(d). Code § 355(c)(2) requires the distributing corporation to recognize gain when it distributes property, other than stock of the controlled corporation, if the fair market value of the property exceeds it adjusted basis.[5043] Code § 355(d) applies to certain distributions of the controlled corporation's stock, and requires that the distributing corporation recognize gain if any one person holds a 50% or greater interest in disqualified stock in either the distributing or controlled corporation after the distribution.[5044] In family business situations, often the majority shareholder (usually the founder) has owned the business for more than five years. Additionally, even if the founder has transferred equity in the business within the past five years through gifts or through a transfer at death, the disguised sale rule still will not apply, since they only apply to purchase transfers.[5045]

Code § 355(e) is similar to Code § 355(d), but applies when distributions are part of a plan in which one or more persons will acquire 50% or greater interest in either the distributing or controlled corporation.[5046] No five year requirement similar to Code § 355(d) applies, but if one or more persons acquires the 50% or greater interest in either corporation within two years before or after the distribution, then the transaction is considered to be "pursuant to a plan."[5047] Additionally, Code § 355(e) makes no distinction between transfers made for consideration and those made for no consideration. However, to prevent Code § 355(e) from making tax-free corporation division impossible, a number of exceptions limit what is considered an "acquisition" for Code § 355(e) purposes. For example, Code § 355(e)(3)(A)(i) states that the acquisition of stock in a controlled corporation by a distributing corporation will not be taken into account for Code § 355(e) purposes. Reg. § 1.355-8 fleshes out these rules some and describes the gain resulting from applying these rules.[5048] Additionally, in most family businesses, Code § 355(e) will not be an issue because of a related party provision similar to the one present in Code § 355(d), causing all stock owned by family members to be treated as owned by one person.[5049] The only time that Code § 355(e) is likely to come into play in family business

[5042] Code § 355(c)(2).
[5043] Code § 355(c)(2)(A)(ii). The distributing corporation is taxed as if it had sold the property to the distributee at fair market value. Code § 355(c)(2)(A) (flush language).
[5044] Code § 355(d)(2). Under Code § 355(d)(4), the 50% or greater interest means stock possessing at least 50% of the total combined voting power of all classes of stock entitled to vote or at least 50% of the total value of shares of all classes of stock. Disqualified stock is defined in Code § 355(d)(3) as any stock of the distributing corporation acquired by purchase during the five year period leading up to the distribution and as any stock in the controlled corporation that was acquired by purchase in the five years leading up to the distribution or by distribution on disqualified stock in the distributing corporation.
[5045] Reg. § 1.355-6(d)(1)(i)(A).
[5046] Code § 355(e)(2)(A); see Reg. § 1.355-7.
[5047] Code § 355(e)(2)(B).
[5048] T.D. 9888 (12/17/2019).
[5049] Code § 355(e)(4)(C)(i).

succession planning would be in cases where the founder plans to shift ownership to second generation family members who are not lineal descendants of the founder. In such cases, additional planning needs to be done to ensure the transfers and tax-free division will not be considered "pursuant to a plan."

All of the above assumes that the distribution satisfies the requirements of Code § 355 but for the conditions described above. If a transaction does not fit above, consider whether other tax-free provisions apply; otherwise, consider whether the distributing corporation might be taxed on the distribution, as provided in part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

II.Q.7.f.iv.(b). Controlled Corporation

Regardless of whether Code § 355 is met, the controlled corporation will not recognize gain or loss on a corporate division.[5050] Thus, the controlled corporation's basis in the property distributed to it by the distributing corporation before the distribution of the controlled corporation's stock will be equal to the property's basis in the hands of the distributing corporation, increased by any gain recognized by the distributing corporation on the transfer.[5051] When such property distributions are made to the controlled corporation, the distributing corporation must allocate part of its earnings and profits to the controlled corporation.[5052] This allocation will generally be made in proportion to the fair market value of the business and property interests retained by the distributing corporation and the business and property interests of the controlled corporation immediately after the distributions.[5053]

II.Q.7.f.iv.(c). Shareholders

Generally speaking, shareholders of the distributing and controlled corporations will not recognize any gain or loss on the receipt of the controlled corporation's stock in a Code § 355 division. However, if the shareholders of the controlled corporation receive "boot" in addition to stock, then they will have to recognize some gain. This situation will arise when a controlled corporation's shareholder receives other property or money, in addition to the controlled corporation's stock, so that the amount received is equal to the fair market value of the stock the shareholder gave up in the distributing corporation. When this occurs, the shareholder must recognize gain, but not more than the sum of the fair market value of other property and money received.[5054] This type of distribution could also lead to gift tax consequences if one of the shareholders receives more stock than he would have been entitled to, based on his original ownership in the distributing corporation. If the proper donative intent exists, the shareholder may be deemed to have received a gift from the other shareholders. Thus, it is important to make sure that when a shareholder receives more than he was entitled to (based on his ownership), the transfer is properly documented so that it is clear whether there was any intent to gift and the transfer can be properly taxed.

The total basis of all shareholders' stock in the distributing and controlled corporation after the division will be the same as the total basis of all shareholders' stock in the distributing

[5050] Code § 118(a).
[5051] Code § 362(b). However, Reg. § 1.362-3 reduces the basis of property acquired in loss importation transaction.
[5052] Reg. § 1.312-10(a). However, a distributing corporation's unused NOL carryover will not be allocated to the controlled corporation. Rev. Rul. 77-133.
[5053] Reg. § 1.312-10(a).
[5054] Code § 356(a)(1).

corporation before the division, increased by gain or other income each shareholder recognized and reduced by returns of capital each shareholder received or loss recognized.[5055] However, each individual shareholder's basis may be different before and after the division and must be recalculated after the division. The shareholder's basis is allocated among stock held after the distribution in based on each share's fair market value relative to the fair market value of all shares.[5056]

II.Q.7.g. Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill)

Generally, a sale or exchange of property, directly or indirectly,[5057] between related persons, will treat as ordinary income any gain recognized to the transferor if such property is depreciable or amortizable property in the hands of the transferee.[5058] Also beware similar issues relating to patents.[5059]

In this context, "related persons" means:[5060]

- a person and all entities which are controlled entities with respect to such person,
- a taxpayer and any trust in which such taxpayer (or his spouse) is a beneficiary, unless such beneficiary's interest in the trust is a remote contingent interest,[5061] and
- except in the case of a sale or exchange in satisfaction of a pecuniary bequest, an executor of an estate and a beneficiary of such estate.

As used above, "controlled entity" means, with respect to any person:[5062]

- a corporation more than 50% of the value of the outstanding stock of which is owned (directly or indirectly) by or for such person,[5063]
- a partnership more than 50% of the capital interest or profits interest in which is owned (directly or indirectly) by or for such person, and
- any entity which is a related person to such person under certain attribution rules.[5064]

[5055] Code § 358(a)(1).
[5056] Reg. § 1.358-2(a)(2).
[5057] Boot received in a Code § 351 transaction triggered Code § 1239 in *Fish v. Commissioner*, T.C. Memo. 2013-270 (QSSS status terminated when the subsidiary gained another shareholder, causing the parent to be deemed to have transferred the former QSSS' assets to the subsidiary in a Code § 351 transaction).
[5058] Code § 1239(a).
[5059] See part II.G.18.c Patents, especially fn. 1691.
[5060] Code § 1239(b).
[5061] Within the meaning of Code § 318(a)(3)(B)(i). For Code § 318(a), see part II.Q.7.a.viii Code § 318 Family Attribution under Subchapter C.
[5062] Code § 1239(c)(1).
[5063] A requirement to elect an independent director does not cause the shareholder's voting power to drop below this threshold. *Fish v. Commissioner*, T.C. Memo. 2013-270.
[5064] Code § 267(b)(3), (10), (11), or (12).

The Code § 267(c) constructive ownership rules apply in determining ownership,[5065] including to attribute ownership between individuals[5066] who are family members.[5067] In addition, stock owned by a trust is considered as being owned proportionately by its beneficiaries.[5068] However, nothing in Code § 267(c) attributes to a trust stock owned by its beneficiaries. Although stock owned by children would be attributed to each other,[5069] that ownership would flow to the trusts. Therefore, even though a corporation would be a controlled entity with respect to each of children, it would not be a controlled entity with respect to any trust owning no more than 50% of the value of its stock.

Therefore, if stock in an S corporation is distributed to separate taxpayer trusts for children after the surviving spouse's death so that no trust owns more than 50% of the value of its stock, the children's trusts can liquidate the corporation, and each trust can receive its own property (instead of a tenant-in-common interest in every corporate asset) so it can make its own investment decision separately after the liquidation. Depending on the situation,[5070] the trust may need to make an ESBT election.[5071]

Code § 1239 applies not only to depreciable property but also to "an amortizable section 197 intangible."[5072] A "section 197 intangible" includes goodwill,[5073] going concern value,[5074] workforce in place,[5075] any information base,[5076] know-how,[5077] customer-based intangibles,[5078]

[5065] Code § 1239(c)(2), applying Code § 267(c) (other than Code § 267(c)(3)) for purposes of Code § 1239. See part II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses.
[5066] Code § 267(c)(2).
[5067] Code § 1239(c)(2), which applies Code § 267(c) without applying Code § 267(c)(3).
[5068] Code § 267(c)(1).
[5069] Code § 267(c)(2).
[5070] See part III.A.3.c.ii Flowchart of Testamentary Trusts (Trusts Created on Grantor's Death or Continued after QSST Beneficiary's Death).
[5071] See part III.A.3.e.ii Electing Small Business Trusts (ESBTs). If a child's trust is a QSST, generally K-1 income is taxable to the child as the deemed owner (which would raise concerns about child-to-child attribution), but K-1 income counts as trust income (instead of beneficiary deemed-owned income) if and to the extent it is from the actual or deemed sale of assets in connection with a sale or liquidation of the corporation; see fns 5995 and 5996 in part III.A.3.e.i.(a) QSSTs Generally.
[5072] Code § 197(f)(7); Reg. § 1.197-2(g)(8) (which is also consistent with the Joint Committee of Taxation report).
[5073] In this context, the value of a trade or business attributable to the expectancy of continued customer patronage, which expectancy may be due to the name or reputation of a trade or business or any other factor.
[5074] In this context, the additional value that attaches to property by reason of its existence as an integral part of an ongoing business activity, including the value attributable to the ability of a business to continue functioning or generating income without interruption notwithstanding a change in ownership, as well as the use of the revenues or net earnings that otherwise would not be received during any period if the acquired trade or business were not available or operational.
[5075] This includes the existence of a highly-skilled workforce, any existing employment contracts, or a relationship with employees or consultants.
[5076] This includes the intangible value of technical manuals, training manuals or programs, data files, and accounting or inventory control systems, customer lists, subscription lists, insurance expirations, patient or client files, or lists of advertisers.
[5077] This includes any patent, copyright, formula, process, design, pattern, know-how, format, package design, internally developed or modified computer software, or interest in a film, sound recording, video tape, book, or other similar property.
[5078] This includes the existence of a customer base, a circulation base, an undeveloped market or market growth, insurance in force, the existence of a qualification to supply goods or services to a particular

supplier-based intangibles,[5079] any license, permit, or other right granted by a governmental unit (even if the right is granted for an indefinite period or is reasonably expected to be renewed for an indefinite period), any covenant not to compete, any franchise, trademark, or trade name, and any right under a license, contract, or other arrangement providing for the use of property described above.[5080]

Does Code § 1239 apply to the sale of goodwill? This rule applies only if these assets are "amortizable." However, amortizable section 197 intangibles do not include any intangible created by the taxpayer (a self-created intangible).[5081] On the other hand, the exception for self-created intangibles does not apply to any intangible created in connection with the purchase of a business.[5082] Does the sale of a business transform self-created intangibles into amortizable section 197 intangibles at the time of the sale, so that Code § 1239 applies?[5083] The Tax Court has held that Code § 1239 applies to gain if the property is an amortizable section 197 intangible in the transferee's hands.[5084] (Also note that goodwill that is not being amortized and is held by a partnership would be eligible for a basis step if a Code § 754 election is in place.[5085])

However, Code § 1239 does not apply to depletable property that is not depreciable under Code § 167.[5086]

---

customer, a mortgage servicing contract, an investment management contract, or other relationship with customers involving the future provision of goods or services.

[5079] This includes the existence of a favorable relationship with persons providing distribution services (such as favorable shelf or display space at a retail outlet), the existence of a favorable credit rating, or the existence of favorable supply contracts.

[5080] Reg. § 1.197-2(b).

[5081] Reg. § 1.197-2(d)(2)(i). See also fn. 4132 regarding amortization of purchased goodwill.

[5082] Reg. § 1.197-2(d)(2)(iii)(B).

[5083] One reading is that Reg. § 1.197-2(g)(8) would have omitted amortizable if this result had been intended. A contrary argument is that Code § 1239 looks to the property in the hands of the transferee, and the self-created goodwill becomes purchased goodwill in the transferee's hands and is therefore amortizable. The contrary argument is more consistent with the purpose of Code § 1239, but Congress might have had other thoughts when it later enacted Code § 197.

[5084] *Fish v. Commissioner*, T.C. Memo. 2013-270.

[5085] See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000, fn. 5684. For an example of the effect of a Code § 754 election on goodwill that is being amortized, see fn. 5795 in part II.Q.8.e.iv Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform).

[5086] Letter Ruling 8139052, reasoning:

> Depletion is based upon the concept of the exhaustion of a natural resource, whereas depreciation is based upon the concept of exhaustion, wear and tear, and also obsolescence of property, not otherwise a natural resource, used in a trade or business or held for the production of income. Depletion and depreciation are made applicable to different types of assets and the method by which a depletion allowance is spread over the taxable years is different from that applied in the case of depreciation. 4 J. Mertens, *Law of Federal Income Taxation* 24.02 (1980 rev.).

Letter Ruling 200602018 held:

> Though Individual B and Taxpayer are related persons under section 1239(b)(1), section 1239(a) applies to the sale or exchange of the Reserves only if the Reserves are subject to the allowance for depreciation provided in section 167. By claiming deductions for depletion under section 611 and for intangible drilling costs under section 263(c), Taxpayer has represented that the Reserves

Furthermore, when a husband and wife who own all of a partnership sell the partnership to a corporation they control, Rev. Rul. 72-172 asserted that Code § 1239 applies to the sale followed by the distribution of the partnership's depreciable property from the dissolved partnership to the corporation.[5087] However, Letter Ruling 8052086 declined to apply Code § 1239 to the sale of a partnership interest, without mentioning Rev. Rul. 72-172;[5088] it has been suggested that Rev. Rul. 72-172 is confined to cases when the partnership terminates as a result of the transfer.[5089] Furthermore, outside of the context of Code § 1239, *Grecian*

> are mineral property and, therefore, not subject to the allowance for depreciation under section 167.
>
> … we conclude that section 1239(a) does not apply to the Reserves, which are subject to the allowance for depletion under section 611(a). However, section 1239(a) does apply to any improvements which are subject to the allowance for depreciation under sections 611(a) and 167.

[5087] The ruling stated:

> In the instant circumstances, the transaction had the effect of transferring to the corporation, the partnership assets attributable to the partners' interests in the partnership. See *United States v. R. T. and Gertrude Woolsey et al.*, 326 F.2d 287 (1963); *Edwin E. McCauslen v. Commissioner*, 45 T.C. 588 (1966); and Rev. Rul. 67-65, C.B. 1967-1, 168. Compare *Kimbell-Diamond Milling Company*, 14 T.C. 74 (1950), *affirmed per curiam* 187 F.2d 718 (1951) *certiorari denied*, 342 U.S. 827 (1951).

[5088] Letter Ruling 8052086, issue 7, reasoned:

> Section 1239(a) of the Code provides that in the case of a sale or exchange of property, directly or indirectly, between related persons, any gain recognized to the transferor shall be treated as ordinary income if such property is, in the hands of the transferee, of a character which is subject to the allowance for depreciation provided in Section 167.
>
> Section 1.167(a) of the regulations provides, in pertinent part, that an intangible asset, the useful life of which is not limited, is not subject to the allowance for depreciation. Thus, since a partnership interest is an intangible asset of indefinite duration, a partnership interest is not property of a character which is subject to the allowance for depreciation provided in Section 167. Since the partnership interest being sold by Sub has a life of potentially indefinite duration, the partnership interest is not subject to the allowance for depreciation provided by Section 167 of the Code. Accordingly, Section 1239 of the Code will not operate to cause any portion of the gain recognized by Sub to be ordinary income.

[5089] McKee, Nelson & Whitmire, ¶ 16.03[1] Aggregate-Entity Theory, found within ¶ 16.03 Transfers of Partnership Interests: *Transfers of Partnership Assets Compared of Federal Taxation of Partnerships & Partners* (WG&L). Letter Ruling 8048051 commented (when Code § 1239 did not apply because the corporation was not a controlled corporation):

> Rev. Rul. 72-172, 1972-1 C.B. 265 holds that section 1239 of the Code applied upon the sale of all partnership interests, including depreciable property, totally owned by a man and wife to a corporation in which they owned all the capital stock. In this instance the transaction had the effect of transferring to the corporation, the partnership assets attributable to the partners' interest in the partnership.

Grace Kim, in "Redeeming a Partner with The Partnership's Note," *Tax Management Memorandum* (BNA) (3/21/2016) (saved as Thompson Coburn doc. 6817740), says:

> There is an argument that a partnership interest is not depreciable property and that therefore § 1239 does not apply to the sale or exchange of a partnership interest.[41]
>
> [41] See PLR 8052086 (explaining that since a partnership interest is an intangible asset of indefinite duration, a partnership interest is not property of a character which is subject to the allowance for depreciation provided in § 167, and thus § 1239 will not operate to cause any portion of the gain recognized by the seller of a partnership interest to be ordinary income). *Cf.* Rev. Rul. 72-172, 1972-1 C.B. 265, holding that § 1239 applies upon the sale of all partnership interests, including depreciable property, totally owned by a man and wife to a corporation in which they owned all the capital stock. Note that there have been legislative efforts to enact a provision that would subject partnership interests to § 1239. See, *e.g.*, H.R. 1935, Bill to Provide

Magnesite Mining v. Commissioner, 149 T.C. No. 3 (7/13/2017) explained that Code § 741, which governs the nature of gain on sale of a partnership interest, treats a partnership interest as an indivisible asset, unless a statute specifically overrides[5090] that treatment.[5091]

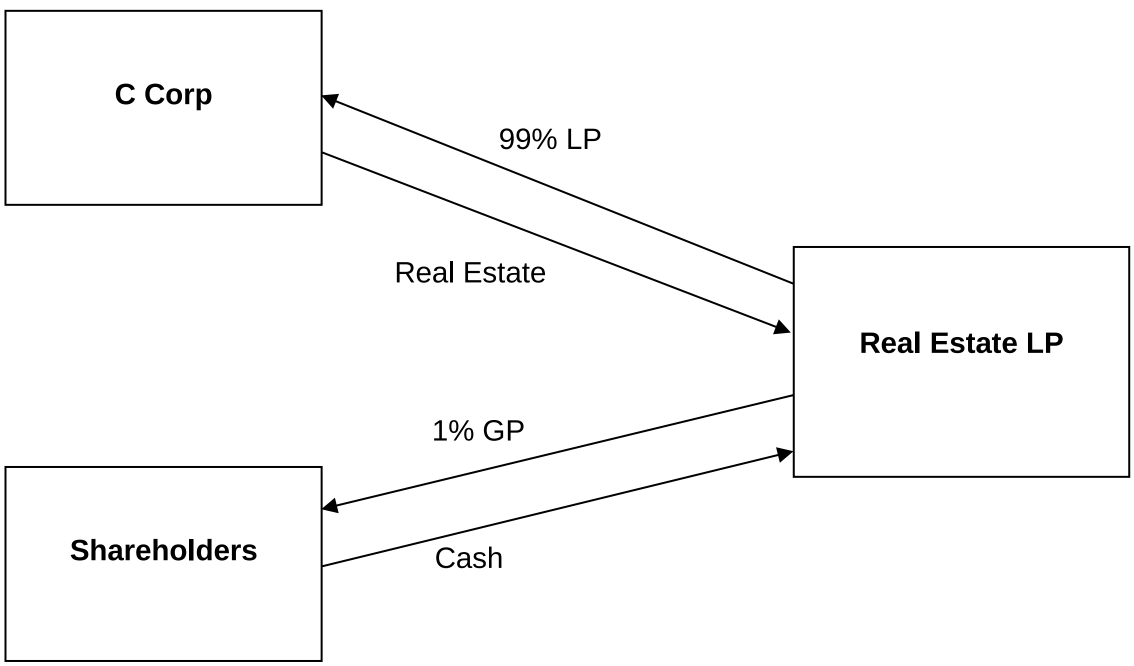
Although sales of partnership interests holding depreciable property trigger ordinary income taxation, that provision does so only to the extent of accumulated depreciation,[5092] whereas Code § 1239 applies with respect to the entire gain. Thus, placing depreciable property into a limited partnership,[5093] before liquidating the corporation or otherwise distributing the partnership interest, may avoid the full brunt of Code § 1239, subject to cautions about doing so too close to the liquidation.[5094]

The partnership provision most closely resembling Code § 1239 is part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

II.Q.7.h. Distributing Assets; Drop-Down into Partnership

II.Q.7.h.i. Structure

<u>Step 1</u>



for Tax Treatment of Partnership Interests Held by Partners Providing Services, Introduced by Rep. Sander Levin (D-Mich.), 111th Cong. 1st Sess. (2009). Arguably, such legislation would not have been needed if under current law partnership interests are subject to § 1239.

5090 See part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

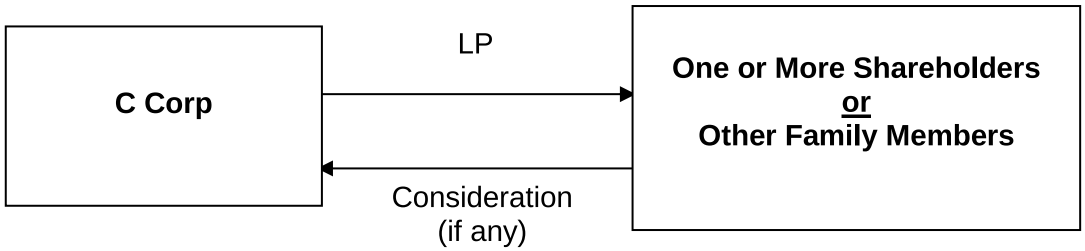
5091 See fn 5651 in part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest.

5092 See part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

5093 See part II.Q.7.h Distributing Assets; Drop-Down into Partnership.

5094 See part II.Q.7.h.iii.(a) Taxable Gain to Corporation When It Distributes Property to Shareholders, especially fn. 5104.

Step 2



Step 1

General rule under Code § 721 is no gain or loss to contributing partner or receiving partnership when a partnership interest is issued in exchange for cash or other property.

Although real estate is illustrated here, this transaction could involve a line of business or marketable securities. However, if it involves marketable securities and the other partners contribute more than a de minimis amount, then one needs to consider additional issues to avoid gain recognition. Code § 721(b).

Step 2

The corporation recognizes gain as if it had sold the property that was distributed. Code § 311. Given that what is transferred is an interest as a limited partner, valuation discounts would reduce the transfer's value and therefore the gain that it triggers.

Shareholders recognize dividend income to the extent of the corporation's earnings and profits (E&P) if it is a distribution (or a state law redemption that does not qualify as an income tax redemption under Code § 302). The balance of the distribution simply reduces the stock's basis and is capital gain after that.

Step 2 could also be done as a taxable sale.

Step 2 might be done in stages to minimize step transaction attacks, including those mentioned in footnote 5104.

II.Q.7.h.ii. Taxation of Shareholders When Corporation Distributes Cash or Other Property

For taxation of distributions by S corporations, see part II.Q.7.b.iv.(a) S corporation Distributions of Life Insurance Proceeds - Warning for Former C Corporations.

Distributions to shareholders of a C corporation are taxed as dividends to the extent of earnings and profits (E&P), then as return of basis, and then as gain on the sale of stock.[5095] The distributions are applied to each block of share proportionately; if a block of stock has basis lower than other blocks of stock and runs out of basis, then distributions attributable to that block trigger gain, even if the shareholder has plenty of basis available in other blocks of stock that would otherwise have been available to absorb the distribution tax-free.[5096]

[5095] Code § 301(c).
[5096] *Johnson v. United States*, 435 F.2d 1257 (4th Cir. 1971), *rev'g* 303 F.Supp. 1 (E.D. Va. 1969).

Redemptions reduce E&P.[5097]

II.Q.7.h.iii. Taxation of Corporation When It Distributes Property to Shareholders

The rules below apply to S corporations as well as C corporations.[5098]

II.Q.7.h.iii.(a). Taxable Gain to Corporation When It Distributes Property to Shareholders Other Than in Liquidation of the Corporation

Code § 311(b)(1) taxes a corporation when it distributes appreciated assets to its shareholders in a distribution described in Code §§ 301-307 (note that corporate liquidations are described in Code §§ 331-346).[5099] The corporation is deemed to have sold the assets to the distributee.[5100] If the corporation is a C corporation, then the deemed sale is taxed at ordinary income rates, just like any other corporation gain or loss would be. If the corporation is an S corporation, then it is taxed to the shareholders on their K-1s,[5101] subject of course to any applicable built-in gain tax under Code § 1374.[5102] The entire gain (not just depreciation recapture) from the deemed sale of any depreciable or amortizable property may be taxed as ordinary income (which, in addition to having consequences to S corporation owners, can be an issue to C corporations that have capital losses that could otherwise be offset).[5103]

If the distribution is of all of the corporation's interest in the property, the IRS will attempt to disregard any valuation discounts that would not have applied if the corporation had distributed all of the corporation's interest in the property to one shareholder.[5104] Furthermore, if the IRS determines that a corporation's receipt of a partnership interest does not constitute adequate and full consideration for the property it transferred to the partnership, the IRS will argue that a dividend was made to the other partners and that the corporation recognized gain on the

---

[5097] Code § 312(n)(7), superseding the limitations of Reg. § 1.312-5. Rev. Rul. 79-376, which had governed, was obsoleted by Rev. Rul. 95-71, presumably in response to this change; see T.M. 767 Redemptions IV.A.2.c. The Senate Report to P.L. 98-369 that enacted the current statutory language provides:

> In the case of a distribution by a corporation in redemption of its own stock, earnings and profits are to be reduced in proportion to the amount of the corporation's outstanding stock that is redeemed. However, the Senate does not intend that earnings and profits be reduced by more than the amount of the redemption.

[5098] Code § 1371(a).

[5099] For the latter, see part II.Q.7.a.vii Corporate Liquidation.

[5100] Although a bargain sale of property to a shareholder is a deemed sale for full fair market value with the bargain element constituting a divided, a corporation is not required to make a profit when it provides services to a shareholder – reimbursing the corporation for the costs it incurred is sufficient to avoid any sale or dividend treatment. *Welle v. Commissioner*, 140 T.C. 420 (2013) (services were incidental; business generally was conducted to make a profit in serving the general public).

[5101] Code § 1366.

[5102] See part II.P.3.b.ii Built-in Gain Tax.

[5103] See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill).

[5104] TAM 200443032; *Pope & Talbot, Inc. v. Commissioner*, 104 T.C. 574 (1995), *aff'd* 162 F.3d 1236 (9th Cir. 1999). See also *Robert E. Smith, III v. Commissioner*, T.C. Memo. 2017-218, in which an S corporation was formed and liquidated in the same year and claimed a loss on the deemed sale of the limited partnership interest it received when it also formed the partnership in the same year; the economic substance doctrine disallowed the loss and imposed penalties (see part II.G.17 Economic Substance Penalty and Doctrines, but the tax year was before Code § 7701(o) was enacted, so penalties applied even without that statute).

property deemed distributed to the other partners.[5105] However, in what might be the same case, the IRS lost that argument, when the taxpayer convinced the court of the taxpayer's business purpose, in *Cox Enterprises, Inc. & Subsidiaries v. Commissioner*.[5106]

II.Q.7.h.iii.(b). Nondeductible Loss to Corporation When It Distributes Property to Shareholders

Under Code § 311(a), a corporation cannot deduct a loss when distributing property, the value of which is less than its basis.

CCA 201421015 concluded:[5107]

> Disallowed § 311(a) losses will be treated as non-deductible, non-capital expenses pursuant to § 1367(a)(2)(D). Thus, a § 311(a) loss will reduce shareholders' bases in S corporation stock, and the S corporation must reduce its accumulated adjustments account.

II.Q.7.h.iv. Taxpayer Win in *Cox Enterprises* When IRS Asserted That Contributing Property to Partnership Constituted Distribution to Shareholders (2009); *Dynamo Holdings*' Limitation on Using *Cox Enterprises* (2018)

Before discussing *Cox Enterprises*, let's review an important concept when entities owned by related parties conduct business. *Dynamo Holdings Ltd. Partnership v. Commissioner*, T.C. Memo. 2018-61, enunciated the issue of "constructive distribution":

> It is well settled that a transfer of property from one entity to another for less than adequate consideration may constitute a constructive distribution to an individual who has ownership interests in both entities.[5108] A bargain sale, including a bargain sale based on competing property valuations, between related parties, however, does not automatically result in a constructive distribution.[5109]
>
> Courts have outlined a two-prong analysis to determine whether a transfer resulted in a constructive distribution. The first prong, the objective test, asks whether the transfer caused "funds or other property to leave the control of the transferor corporation and …[whether] it allow[ed] the stockholder to exercise control over such funds or property either directly or indirectly through some instrumentality other than the transferor

---

[5105] TAM 200239001 (property deemed distributed is based on the value of the property contributed to the partnership rather than the value of the partnership interests received by the partner).

[5106] T.C. Memo. 2009-134.

[5107] This disallowed loss nevertheless reduces the S stock's basis. See fn. 1200. Code § 1367 is reproduced in part II.G.4.d.i Basis Limitation Generally.

[5108] Fn 76 of *Dynamo Holdings* cited here:

> *Stinnett's Pontiac Serv., Inc. v. Commissioner*, 730 F.2d at 640; *Cox Enters., Inc., & Subs. v. Commissioner*, T.C. Memo. 2009-134, 97 T.C.M. (CCH) 1767, 1774 (2009).

Fn 42 of *Dynamo Holdings* introduced the citation to *Stinnett's Pontiac Service, Inc. v. Commissioner*, 730 F.2d 634, 638 (11th Cir. 1984), *aff'g* T.C. Memo. 1982-314.

[5109] Fn 77 of *Dynamo Holdings* cited here:

> *Davis v. Commissioner*, T.C. Memo. 1995-283, 69 T.C.M. (CCH) 3004, 3007 (1995); *see also Joseph Lupowitz Sons, Inc. v. Commissioner*, 497 F.2d 862, 868 (3d Cir. 1974), *aff'g in part, rev'g in part* T.C. Memo. 1972-238; *Cox Enters., Inc., & Subs. v. Commissioner*, 97 T.C.M. (CCH) at 1775.

corporation."[5110] The second prong, the subjective test, a "crucial inquiry" in the constructive distribution determination, asks whether the transfer occurred primarily for the common shareholder's personal benefit rather than for a valid business purpose.[5111] Both prongs must be satisfied for a court to find a constructive distribution.[5112]

As to the objective prong, "Because the common shareholder does not directly receive funds or property in a transfer between entities, such a transfer is a distribution if: (1) the transferred funds leave the control of the transferring entity and (2) the owner controls the funds, directly or indirectly, through some means other than the transferor."[5113] As to the subjective prong, *Dynamo Holdings* enunciated:

> The subjective prong asks the Court to consider whether the transfer occurred primarily for the benefit of the common shareholder, rather than for a valid business purpose. In applying the subjective prong "the search for this underlying purpose usually involves the objective criterion of actual primary economic benefit to the shareholders as well".[5114] The Court of Appeals for the Eleventh Circuit states the point as follows: "In determining whether the primary purpose test has been met, we must determine not only whether a subjective intent to primarily benefit the shareholders exists, but also whether an actual primary economic benefit exists for the shareholders."[5115]
>
> If the primary purpose is a valid business purpose, then the primary purpose is not for the shareholder benefit.[5116] The benefit to the shareholder must be "direct", a term broadly construed.[5117] For example, courts have found a benefit to the shareholder

when the primary purpose of the transfer is to or for the benefit of a member of the shareholder's family.[5118]

The *Cox* court held that a corporation's contribution of a television station to a partnership did not constitute a dividend even though the partnership interest it received was originally worth $60.5 million less than the assets it contributed. The partners in the partnership were the remaindermen of certain trusts. These trusts, indirectly and collectively, owned 98% of the corporation's stock.

The corporation contributed assets worth $300 million, became the managing general partner, and received a majority partnership interest, which entitled it to 55% of partnership distributable profits and liquidation proceeds up to specified base amounts and 75% of distributable profits and liquidation proceeds in excess of those base amounts. The other partners contributed assets worth $62 million and received the balance of the rights to distributions. Thus, the corporation contributed nearly 83% ($300 million divided by $362 million) of the assets and received the right to profits of 55%-75%.

The IRS argued that the transfer to the partnership should be deemed an indirect distribution to the remaindermen of the trusts and therefore a distribution to the trusts. Judge Halpern rejected the IRS' contention. First, he held that the corporation's transfer to the partnership "was not intended to provide a gratuitous economic benefit to the other partners…." Second, he held that, even if the corporation had made such a gratuitous transfer, the transfer did not benefit the shareholder trusts.

In *Cox*, several factors demonstrated that the corporation's directors did not intend a gratuitous transfer:

1. The partnership's formation had nontax business reasons. As recommended by independent consultants, the corporation tried to sell these operating assets but was unable to do so. The partnership's formation allowed the corporation to retain, for use in other areas, the working capital it had previously needed for the television station.

2. The corporation's board's executive committee adopted a resolution that the other partners be required to make cash contributions to the partnership "in an amount corresponding to the fair market value of the partnership interests acquired by" those other partners. Furthermore, the other partners' acquisition of partnership interests was to "be on terms and conditions no less favorable to" the corporation "than the terms and conditions that would apply in a similar transaction with persons who are not affiliated with" the corporation.

---

received was derivative in nature. Since no direct benefit was received, we cannot properly hold he received a constructive dividend."), *aff'd*, 441 F.2d 593 (5th Cir. 1971).

[5118] Fn 86 of *Dynamo Holdings* cited here:

Green v. United States, 460 F.2d 412, 419-421 (5th Cir. 1972); *Byers v. Commissioner*, 199 F.2d 273, 275 (8th Cir. 1952), *aff'g* a Memorandum Opinion of this Court, *Epstein v. Commissioner*, 53 T.C. 459, 474-475 (1969) (explaining that it is firmly established that when a corporation makes a transfer of property for no or insufficient consideration "to a member of the stockholder's family, whether it be directly or in trust, the stockholder has enjoyed the use of such property no less than if it had been distributed to him directly").

Based on the *Dynamo Holdings* conclusion below, it's not surprising that the court held that the test for constructive distributions was satisfied.

3. The corporation retained an outside accounting firm "to render an opinion of appropriate marketability and minority interest discounts applicable to a minority interest" in the partnership as of the date of formation. The partners made contributions based on the appraised amount. Three years later, the corporation's management discovered errors in computing the other partners' interests in the partnership and obtained a new appraisal. The other partners made additional contributions to bring their contributions up to the appraised value.

4. The court relied on *United States v. Byrum*[5119] to find that the controlling shareholders were subject to fiduciary duties to the minority shareholders. In the *Cox* case, two percent of the stock was owned by people who were not members of the controlling family; these minority shareholders were principally employees of the corporation. Judge Halpern pointed out that the minority shareholders did not own interests in the other partners and "would not be made financially whole for the likely shortfall in income and liquidation (or sale) proceeds" if the corporation's contribution to the partnership constituted a transfer to the other partners.

The court also found that any gratuitous transfer to the other partners would not have benefitted the shareholder trusts. The remaindermen of the trusts held significant interests in the partners, so a transfer to the other partners would have accelerated the remaindermen's interests in violation of the trust agreements. Because the trusts were the controlling shareholders (and the court assumed for the sake of argument that the trustees also controlled the actions of the other board members), the trustees would have violated their fiduciary duties by accelerating the interests of the remaindermen. Thus, a gratuitous transfer to the other partners would have been detrimental to the shareholder trusts as entities and would have violated the trustees' fiduciary duties.

The court concluded that any gratuitous transfer of an interest from the corporation to the other partners did not constitute a distribution to the shareholder trusts subject to Code § 311.[5120]

Other issues relating to these parties were still before the court when Judge Halpern wrote this opinion, some of which involved the trusts themselves. Subject to any light shed by those cases, one may draw some planning tips from this case:

1. As usual, documenting a transaction very well is always advisable, particularly documentation demonstrating an intent to deal at arms-length.

2. Although the Tax Court seems to place little weight on the *Byrum* case in family limited partnership cases under Code § 2036, having nonfamily member employees hold 2% of the stock might do the trick.

3. Practitioners often wonder whether parties must contribute assets with fair market value to obtain capital accounts proportionate to their interests in profits when all partners are making their initial contributions on formation of the partnership. In this case, the majority partner (the corporation) contributed assets with value significantly in excess of the value of its partnership interest. However, the minority partners contributed assets equal to the value of their interests in the partnership. Thus, the majority partners received capital accounts that were higher relative to their interests in profits compared with the minority partners'

[5119] 408 U.S. 135, 137-138 (1972).

[5120] For information on Code § 311, see part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

> capital accounts relative to their respective interests in profits. Judge Halpern did not seem to recognize this issue; if he did, he did not mention it in analyzing the dividend issue.[5121] It will be interesting to see whether the companion cases consider this issue to be of consequence.

However, *Dynamo Holdings Ltd. Partnership v. Commissioner*, T.C. Memo. 2018-61, which was a taxpayer win on other intra-family issues,[5122] contrasted its taxpayer's repeated bargain sales against *Cox Enterprises*' isolated transaction. *Dynamo Holdings* noted and reasoned (footnotes to *Cox Enterprises* omitted):

> Petitioners argue that Beekman's directors held fiduciary duties to the beneficiaries of the Canadian trusts not to deplete the value of Beekman and therefore Beekman could not have underpriced the property. Petitioners rely on *Cox Enters.*, where we held that there was not a constructive distribution. In *Cox Enters.*, one corporation contributed an asset to a partnership in exchange for a partnership interest the value of which was lower than the value of the contributed asset, effectively transferring value to the other partners. The other partners were two family partnerships. We found that the primary purpose was not to benefit the other partners, in part because the corporation's majority shareholder and directors would have had to breach their fiduciary duties. This would have resulted in a financial detriment to the minority shareholders who did not own any interest in the partnerships.
>
> Petitioners ask that we follow this line of reasoning because the beneficiaries of the Canadian trusts are not identical to the beneficiaries of the U.S. trusts. Petitioners argue that the directors, officers, and controlling shareholders did not breach any duties to the Canadian trusts by depleting value from Beekman. We disagree. *Cox Enters.* involved a single instance of undervaluing an interest. In these cases, we have found five bargain sales exceeding $200 million. Unlike *Cox Enters.*, we find that the directors, officers, and controlling shareholder acted for the benefit of the U.S. trusts and to the detriment of the Canadian trusts.
>
> We agree with the Commissioner that the primary intent and benefit was for Dynamo and by extension, the dynasty trusts. The bargain sale properties went to Dynamo, enhancing its value. The properties put more equity in Dynamo and freed up its liquid assets. This allowed Dynamo to develop its Florida business and increased Dynamo's borrowing capability. All of this directly benefited the dynasty trusts for the benefit of Christine and Mr. Julien and furthered Mrs. Moog's estate planning. Accordingly, Beekman made deemed distributions.

[5121] If this case is the same as TAM 200239001, then the IRS must have pressed this issue, because the TAM specifically addressed it. The judge did point out that the IRS argued, in the alternative, that the dividend was of the TV station or of a partnership interest. However, he still did not seem to notice the disproportionality on which the TAM focused.

[5122] See part III.B.1.a.i.(a) Loans Must be Bona Fide, text accompanying fns 6220-6236, excused defects in formalities of loans because, objectively, the parties treated the advances as loans, consistently reported them as such for tax purposes, and were intended to be - and actually were - repaid.

II.Q.7.h.v. Taxpayer Win in *Bross Trucking* When IRS Asserted Corporation Distribution of Goodwill to Shareholder Followed by Gift to Shareholder of New Corporation (2014)

In *Bross Trucking, Inc. v. Commissioner*,[5123] the IRS asserted that the existing corporation (Bross Trucking) distributed appreciated intangible assets to its sole shareholder, who then made a gift of the intangibles to his three sons, who organized their own[5124] corporation (LWK Trucking). The alleged value of the intangible assets would have required both filing a gift tax return and paying gift tax.

The court held:

> there are two regimes of goodwill: (1) personal goodwill developed and owned by shareholders; and (2) corporate goodwill developed and owned by the company. Bross Trucking's goodwill was primarily owned by Mr. Bross personally, and the company could not transfer any corporate goodwill to Mr. Bross in tax year 2004.

Although a lack of non-compete agreements generally facilitates the lack of corporate goodwill,[5125] in this case regulatory action jeopardized Bross Trucking's business and

---

[5123] T.C. Memo. 2014-107.

[5124] The sons were not actually the owners – it was their Roth IRAs, as the court explained:

> LWK Trucking was organized on October 1, 2003. Its stock was divided into two classes when it was organized: class A voting stock and class B nonvoting stock. Class A stock represented a 98.2% interest in LWK Trucking and class B stock represented the remaining 1.8%. In December of 2003 each of the three Bross sons established a self-directed Roth IRA. Later that month, each of the Bross sons directed his respective Roth IRA to acquire 2,000 shares of class A shares in LWK Trucking. Together, the 6,000 shares acquired by the three Roth IRAs represented all of the class A shares in LWK Trucking, giving the three sons a combined 98.2% interest in LWK Trucking.[8] The remaining class B shares were acquired by an unrelated third party.

Footnote 8 commented:

> As stated infra note 19, a discussion on the merits of this structure is not relevant to the issues in these cases and the Court does not address the validity of this transaction.

Footnote 19 stated:

> Thus, Mr. Bross could not transfer Bross Trucking assets to his three sons, and it follows that the three Bross sons could not transfer Bross Trucking assets to each of their respective Roth IRAs. Accordingly, IRS Notice 2004-8, 2004-1, C.B. 333, is outside the scope of these cases because Bross Trucking and LWK Trucking never shared any assets. Further, a discussion on the structure of the Bross sons' ownership of LWK Trucking is outside the scope of this opinion.

My understanding is that the IRS initiated this audit to explore Roth IRA issues, then focused its attack on the corporate issues, trying to get more money from the taxpayers. For more on Roth IRAs owning businesses, see part II.G.22 IRA as Business Owner.

[5125] See part II.Q.1.c.iii Does Goodwill Belong to the Business or to Its Owners or Employees? Focusing on the authority cited in fn. 4156, the *Bross Trucking* court held that any goodwill associated with Bross Trucking was personally owned by its shareholder:

> The remaining attributes assigned to Bross Trucking's goodwill all stem from Mr. Bross's personal relationships. Bross Trucking's established revenue stream, its developed customer base, and the transparency of the continuing operations were all spawned from Mr. Bross's work in the road construction industry.
>
> Any established revenue stream, developed customer base, or transparency of continuing operations was a direct result of Mr. Bross's personal efforts and relationships. Like the shareholder in Martin Ice Cream Co., Mr. Bross developed the crucial relationships with the

businesses' customers. Bross Trucking's customers chose to patronize the company solely because of the relationships that Mr. Bross personally forged. Mr. Bross had close, personal relationships with the owners of Bross Trucking's primary customers. For example, Mark Twain Redi-Mix, a substantial Bross Trucking customer, was owned by Mr. Bross's wife and two sons. As with the taxpayer in *Norwalk v. Commissioner*, T.C. Memo. 1998-279, it is safe to assume that Bross Trucking's customers sought Mr. Bross' personal ability and reputation when hiring Bross Trucking because he was a successful construction businessman who has been in the road construction industry since the 1960s.

Bross Trucking may have had a developed revenue stream, but only as a result of Mr. Bross' having personal relationships with the customers. It follows that Bross Trucking's developed customer base was also a product of Mr. Bross' relationships. Mr. Bross was the primary impetus behind the Bross Family construction businesses, and the transparency of the continuing operations among the entities was certainly his personal handiwork. [footnote omitted] His experience and relationships with other businesses were valuable assets, but assets that he owned personally.

A company does not have any corporate goodwill when all of the goodwill is attributable solely to the personal ability of an employee. See *MacDonald v. Commissioner*, 3 T.C. 720, 727 (1944); *Norwalk v. Commissioner*, T.C. Memo. 1998-279. Unlike the taxpayer's products in *Solomon v. Commissioner*, T.C. Memo. 2008-102, Bross Trucking's products did not contribute to developing the goodwill. This is demonstrated in part by the services performed by Bross Trucking. Bross Trucking's business model involved hiring independent contractors to haul equipment and supplies around the State. There were very few obstacles to obtaining authority and directly hiring the independent contractors who performed the actual work for Bross Trucking. The State of Missouri's deregulation of the trucking industry allows new entrants to easily begin trucking operations. In other words, it was not Bross Trucking's product which enticed customers to use its services because the services were not unique. *Cf. Schilbach v. Commissioner*, T.C. Memo. 1991-556 (holding that a single-shareholder-owned professional corporation possessed all of the goodwill because the corporation's services were unique and was not based on the ability of the shareholder). The expectation of continuing patronage must have been a result of the unique relationships between Mr. Bross and the customers.

….

Mr. Bross did not transfer any goodwill to Bross Trucking through an employment contract or a noncompete agreement. A key employee [footnote omitted] who develops relationships for his or her employer may transfer goodwill to the employer through employment contracts or noncompete agreements. See *Martin Ice Cream Co. v. Commissioner*, 110 T.C. at 207. The transfer is evidenced by the employee's covenant to not use his or her goodwill to compete against the employer. *O'Rear v. Commissioner*, 28 B.T.A. 698, 700 (1933) ([I]t is at least doubtful whether a professional man can sell or dispose of any good will which may attach to his practice except perhaps by contracting to refrain from practicing.), *aff'd*, 80 F.2d 473 (6th Cir. 1935). In other words, an employee transfers the benefit of his or her relationships to an employer when the employee cannot benefit from the relationships without the employer.

An employer has not received personal goodwill from an employee where an employer does not have a right, by contract or otherwise, to the future services of the employee. See *MacDonald v. Commissioner*, 3 T.C. at 727-728. Mr. Bross did not have an employment contract with Bross Trucking and was under no obligation to continue working for Bross Trucking. A contractual duty to continue to use his or her assets for the benefit of the company may show that an employee transferred personal goodwill to an employer for the length of the obligation. Mr. Bross, however, was under no such obligation: he was free to leave the company and take his personal assets with him. Similarly, the lack of an employment contract shows that there was not an initial obligation for Mr. Bross to transfer any of his personal assets to Bross Trucking. Bross Trucking did not take an ownership interest in Mr. Bross' goodwill from the beginning because Mr. Bross never agreed to transfer those rights. Thus, the lack of an employment contract between Mr. Bross and Bross Trucking shows that Bross Trucking did not expect to--and did not--receive necessitated forming a new company.[5126] Therefore, the court held that "the sole attribute of goodwill displayed by Bross Trucking was a workforce in place, and it is therefore the only

personal goodwill from Mr. Bross. Accordingly, Mr. Bross' personal goodwill remained a personal asset separate from Bross Trucking's assets.

An employee may transfer personal goodwill to an employer through a covenant not to compete. See *Martin Ice Cream Co. v. Commissioner*, 110 T.C. at 207-208; *H & M Inc. v. Commissioner*, T.C. Memo. 2012-290. In those cases the Court held an employee did not transfer personal goodwill to the employer because he or she did not sign a noncompete agreement. Similar to those taxpayers, Mr. Bross never transferred any personal goodwill to Bross Trucking by signing a noncompete agreement. Much in the same way that Bross Trucking did not have any contractual expectation of continued services from Mr. Bross while he was an employee, Bross Trucking could also not expect to benefit from Mr. Bross's personal goodwill after he left the business. Mr. Bross' freedom to use his personal goodwill in direct competition with Bross Trucking if he stopped working for the company shows that he did not transfer it to Bross Trucking.

[5126] The *Bross Trucking* court stated:

Bross Trucking might have had elements of corporate goodwill at some point but had lost most of it by the time of the alleged transfer. Specifically, through various regulatory infractions Bross Trucking lost any corporate goodwill because of an impending suspension and the negative attention brought by the Bross Trucking name. During the late 1990s and early 2000s Bross Trucking was investigated extensively by the DOT and the MCRS. As a result of the investigations, Bross Trucking faced a possible suspension of operations and several fines because the authorities gave Bross Trucking unsatisfactory safety ratings. Further, the various regulatory authorities were hounding Bross Trucking to the point that LWK Trucking wanted to immediately remove the Bross name from leased trucks to avoid their being spotted and stopped. The impending suspension would cause customers to reevaluate whether to trust Bross Trucking and continue to do business with it. Indeed, Mr. Bross expressed his concern to his attorney that Bross Trucking might not be able to perform necessary functions as a result of the suspension. Mr. Bross's solution was to find or create another business to take over the trucking needs for the Bross family businesses. This is the antithesis of goodwill: Bross Trucking could not expect continued patronage because its customers did not trust it and did not want to continue doing business with it.

Further, the lack of corporate goodwill is demonstrated by the necessity to separate LWK Trucking from Bross Trucking by hiding the Bross name on leased trucks. Trade names and trademarks are the embodiment of goodwill. *Canterbury v. Commissioner*, 99 T.C. 223, 252 (1992). LWK Trucking specifically chose to quickly remove the Bross Trucking name from any leased equipment to avoid confusion between the two companies. This shows that any transferred corporate goodwill was not valuable and may have actually been detrimental to LWK Trucking. In other words, LWK Trucking was trying to hide any relationship with Bross Trucking because association with the targeted company was seen in a negative light. A new company trying to use the transferred goodwill of another company would likely try to associate with the recognized company, not hide the company logo.

Mr. Bross credibly testified that Bross Trucking had relationships with several national suppliers for fuel and parts, but no evidence was submitted showing that LWK Trucking benefited from any transferred supplier relationships. Further, it is unclear whether Mr. Bross or Bross Trucking cultivated the supplier relationships.

….

Bross Trucking's customers had a choice of trucking options and chose to switch from Bross Trucking to LWK Trucking. Respondent's contention that Bross Trucking transferred a developed customer base and an established revenue stream is misleading because it suggests that the transfer was organized between Bross Trucking and LWK Trucking. It appears, however, that Bross Trucking's customers were interested in changing trucking providers because of the impending suspension, showing that the act was not a transfer of intangibles at the service attribute that the corporation could have distributed to Mr. Bross." The court rejected the IRS' assertion that Bross Trucking's intangible workforce assets were transferred to LWK Trucking[5127] or that any other transfers occurred.[5128]

provider level but a business choice made at the customer level. For example, forming LWK Trucking gave Mark Twain Redi-Mix, which shared ownership with LWK Trucking and one of Bross Trucking's primary customers, the option to use a trucking company with an untarnished reputation and clean service record. Thus, the facts support a finding that Bross Trucking did not transfer its customers but that the customers chose to use a new company because of Bross Trucking's troubled past.

[5127] The *Bross Trucking* court stated:

As discussed above, the only aspect of corporate goodwill that Bross Trucking displayed was a workforce in place, but Bross Trucking did not transfer an established workforce in place to Mr. Bross. Respondent repeatedly contends that most of the Bross Trucking employees became LWK Trucking employees. The evidence, however, shows that only about 50% of LWK Trucking's employees formerly worked at Bross Trucking. The Court is unconvinced that most of a workforce in place was transferred when only 50% of the current employees were previously employees by the alleged transferor. Instead it appears that LWK Trucking assembled a workforce independent of Bross Trucking. This is demonstrated by the new key employees and services offered by LWK Trucking. Mr. Bross's sons managed LWK Trucking and also engaged in services different from those performed at Bross Trucking. For instance, in 2004 LWK Trucking started One Star Midwest, which sold GPS services, and LWK Trucking later started performing truck maintenance for third parties. Bross Trucking did not perform these services and could not have provided employees to start the separate service lines . LWK Trucking may have hired former Bross Trucking employees, but there is no evidence that these employees were transferred to LWK Trucking rather than hired away on their own merit. It is also unclear whether any of the alleged transferred employees that moved to LWK Trucking were independent contract drivers. These drivers were not obligated to work solely for Bross Trucking and in fact were almost certainly expected to have contracts with companies outside of Bross Trucking. Independent contractors' choosing to accept work from a different business is not a transfer of workers.

[5128] The *Bross Trucking* court stated:

In addition, Bross Trucking did not distribute any cash assets and retained all the necessary licenses and insurance to continue business. Further, Mr. Bross remained associated with Bross Trucking and was not involved in operating or owning LWK Trucking. He was free to compete against LWK Trucking and use every cultivated relationship in order to do so. In other words, the fact that Bross Trucking could have resumed its hauling business supports the view that it retained any corporate intangibles. Accordingly, there was no transfer of intangible assets because Bross Trucking's customers chose to use a different company and Bross Trucking remained a going concern.

LWK Trucking did not benefit from any of Bross Trucking's assets or relationships. LWK Trucking was independently licensed and developed a wholly new trucking company. LWK Trucking did not take a transferred basis in any assets such as property or purchased authority. There is no indication that LWK Trucking used any relationship that Mr. Bross personally forged. The Bross sons were in a similarly close capacity to Bross Trucking's customers to develop relationships apart from Mr. Bross. Cultivating and profiting from independently created relationships are not, however, the same as receiving transferred goodwill. It is true that LWK Trucking's and Bross Trucking's customers were similar, but it does not mean that Bross Trucking transferred goodwill; instead the record shows that LWK Trucking's employees created their own goodwill.

II.Q.7.h.vi. IRS' Conservative Roadmap: Letter Ruling 200934013

This ruling approved a corporation's contribution of marketable securities to a partnership in exchange for a partnership interest.[5129] Unlike *Cox Enterprises*, no value was shifted, although future appreciation would be effectively shifted out. This ruling followed the IRS' position that one cannot create discounts by placing assets in a partnership and then distributing all of the corporation's partnership interests to the shareholders. A family-owned S corporation ("Corp") owned 100% of the membership interests in LLC, which was disregarded as an entity separate from Corp for federal tax purposes. LLC's operations consist solely of investing in a diversified portfolio of passive investment assets, including hedge funds, mutual funds, and private equity funds. LLC has no outstanding liabilities. Shareholder A and Corp reached an agreement pursuant to which Shareholder A was admitted as a new member of LLC. Specifically, Shareholder A contributed cash to LLC in exchange for a newly issued, non-voting, preferred interest in LLC. The terms and pricing of the preferred interest were based on an independent appraiser's determination of market rate terms for similar equity investments.

For what have been represented to be valid business purposes, the following steps were proposed: (i) Corp will distribute some of its membership interests in LLC pro-rata to its stockholders (the "Distributed LLC Interests") and (ii) LLC's operating agreement will be amended to provide Corp with a share of LLC's profits disproportionate to capital in exchange for Corp providing future management services to LLC with respect to LLC's ongoing activities. Corp made the following representations with respect to this ruling request:

(a) The principal purpose of the Shareholder A contribution to LLC in exchange for a preferred membership interest was to allow Shareholder A to invest his excess cash directly in a diversified portfolio of investment assets managed by a team of experienced professionals, in a manner that allows Shareholder A to enjoy a high rate of preferred return and a priority on distributions. The principal purposes of the Proposed Transaction are to: (1) increase flexibility with respect to the allocation of profits, losses, and cash distributions associated with the LLC asset pool through issuance of various classes of interests in LLC, (2) provide increased liability protection to the LLC asset pool from the ongoing business operations of Corp, (3) facilitate estate planning and charitable objectives of Corp shareholders with respect to their investment in LLC, and (4) facilitate continued co-investment amongst family members outside of Corp.

b) Shareholder A cannot independently cause Corp to distribute its interest in LLC. Additionally, Shareholder A's contribution to LLC was not dependent upon the consummation of the Proposed Transaction and the Corp stockholders had not ratified the Proposed Transaction as of the date of the ruling request.

(c) Following the Proposed Transaction, it is intended that LLC will continue to carry on the operations that were carried on by LLC before the Proposed Transaction.

(d) At the time of the Proposed Transaction, there will be no amounts payable or receivable between LLC and Corp or LLC and Shareholder A.

[5129] For more information on preferred partnerships, see part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

(e) For purposes of measuring the Code § 311(b) gain to Corp on the Proposed Transaction, if any, the Distributed LLC interests will be valued as a percentage of the value of the assets held by LLC.[5130]

(f) To the best of Corp's knowledge and belief, there is no plan or intention for any transferor to transfer assets to LLC other than cash and/or a diversified portfolio of stocks and securities.[5131]

(g) The assets of LLC immediately prior to the admission of Shareholder A consisted of a diversified portfolio of stocks and securities.[5132]

(h) There is no intention following the Proposed Transaction to dispose of any material assets of LLC (other than dispositions in the ordinary course of business).

(i) To the best of Corp's knowledge and belief, the Corp stockholders have no plan or intention to dispose of any portion of the distributed LLC interests except for the potential transfer to irrevocable trusts which will be taxed as grantor trusts to the respective grantor.

(j) LLC has not, and will not, elect to be classified as a corporation.

(k) No property, other than cash, has ever been contributed by Corp to LLC, and LLC has never made a distribution of property to Corp.

The IRS ruled:[5133]

- The admission of Shareholder A to LLC caused LLC to convert to a partnership for U.S. federal income tax purposes. Corp, as the sole owner of LLC prior to the admission of Shareholder A, is deemed to contribute the existing assets of LLC to the newly-formed LLC partnership in exchange for a membership interest in LLC.[5134] This deemed transaction is treated as a nontaxable contribution of property to LLC by Corp.[5135] Additionally, because the assets of LLC are represented to be a diversified portfolio of assets, Code § 721(b) does not cause taxation with respect to Shareholder A's contribution of cash and to Corp's deemed contribution of property to LLC.

- Corp's adjusted basis in the Distributed LLC Interests is equal to the product of (A) the amount of Corp's adjusted tax basis in its entire membership interest in LLC and (B) a fraction, the numerator of which is the fair market value of the Distributed LLC Interests on

---

[5130] Citing *Pope & Talbot, Inc. v. Commissioner*, 104 T.C. 574 (1995), aff'd 162 F.3d 1236 (9th Cir. 1999). See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.
[5131] For this representation, a portfolio of stocks and securities is diversified under Reg. § 1.351-1(c)(6)(i) if it satisfies the 25% and 50% tests of Code § 368(a)(2)(F)(ii), applying the relevant provisions of Code § 368(a)(2)(F)(ii), except that in applying Code § 368(a)(2)(F)(iv), government securities are included in determining total assets unless government securities are acquired to satisfy the requirements of Code § 368(a)(2)(F)(ii).
[5132] As defined under Reg. § 1.351-1(c)(6)(i).
[5133] The IRS also ruled regarding Code § 2701 – that a preferred payment right, the rate at which changes over time, was not a qualified payment right except to the extent that a qualified payment right election is made. Reg. § 25.2701-2(b)(6).
[5134] Rev. Rul. 99-5.
[5135] Code § 721(a).

the date of the distribution, and the denominator of which is the fair market value of Corp's entire membership interest in LLC as of that date.

- Corp will recognize gain, if any, on the pro-rata distribution of the Distributed LLC Interests to its stockholders to the extent the fair market value of the Distributed LLC Interests exceeds their adjusted tax basis in the hands of Corp on the date of the distribution.[5136]

II.Q.7.h.vii. What We Learned

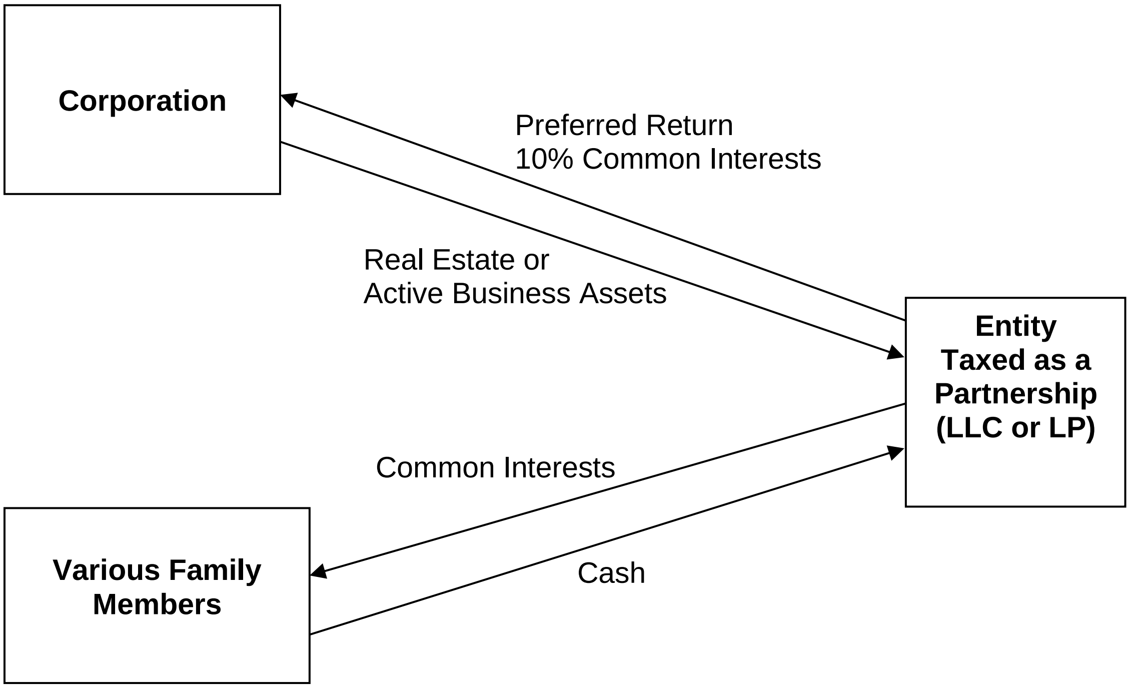
The *Cox* case represented a significant shift in value from the corporation to the shareholders' family members. The corporation's contribution was based on a full pro-rata share of its interest in the partnership, but the family members' contribution was based on the discounted value of its interest in the partnership. The IRS argued that the value shift was a disguised dividend to the shareholders, who wanted to benefit their family members, but the taxpayer convinced the court of the transaction's strong business purpose. The IRS would probably attack similar transactions, so tax advisors should go to extra lengths to document a strong business purpose and warn clients of the risks.

The Letter Ruling shows what the IRS is willing to approve. The IRS continues to want to treat a distribution of a recently formed partnership to its shareholders as if the corporation owned and was distributing the partnership's underlying property. Corporations might want to consider waiting for a while after forming the partnership, then they might consider selling the partnership interests to shareholders at various times in separate minority blocks of the partnership, but again they should be prepared for an IRS attack.

II.Q.7.h.viii. Value Freeze as Conservative Alternative

Consider the following structure:

[5136] Code § 311(b). See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.



The corporation contributes the real estate or other business assets to a partnership,[5137] taking in return a large preferred partnership interest and an interest in the residue of the profits (a "common interest") equal in value to at least 10% of the contributed equity, with the other partners receiving a common interest in the partnership for the balance. Thus, a large majority of the total return (appreciation plus cash flow) that exceeds the preferred interest will be outside of the corporation. Moving to this structure is discussed in part II.E.7.a Overview of How to Migrate into Desired Structure and diagrammed in part II.E.7.c Flowcharts: Migrating Existing Corporation into Preferred Structure, culminating in the above structure, which is shown at part II.E.7.c.ii Moving New LLC into Preferred Structure.

The preferred return is to be satisfied out of the partnership's net cash flow and payable at the AFR or another appropriate fixed rate; we typically ask a qualified appraiser to tell us what the rate should be. The preferred return should be cumulative and payable on a periodic basis (at least annually) to constitute a qualified payment under Code § 2701.[5138] For more information on preferred partnerships, see part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

If the corporation is receiving a return whose present value is equal to the value of the contributed goodwill (if any), it should not be treated as having distributed such goodwill to its shareholders. Using a preferred partnership adds safety, in that a corporation can easily escape the disguised sale rules. If the preferred profits distribution is payable at no more than

---

[5137] If the owners perceive difficulty in transferring all of its assets, the owners can form an identical corporation, contribute all of the stock in the old corporation to the new corporation, then merge or convert the old corporation into an LLC owned solely by the new corporation. This first step should constitute a nontaxable F reorganization; see part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization. The LLC can be the main organization in which the owners are separately admitted as members, but in most cases the corporation would just contribute its interest as the LLC's sole member to a limited partnership. See part II.E Recommended Structure for Entities.

[5138] Reg. § 25.2701-2(b)(6)(i)(B).

150% of the AFR or is limited to the extent of operating cash flow, each of two regulations[5139] separately creates a presumption that a sale has not occurred.[5140]

Investing at least 10% of equity in a common interest is our way of trying to provide the preferred partner with more economic risk than that undertaken by a lender, which is important under cases that held that complying with the disguised sale rules was not enough because the regulations create only a presumption.[5141] This 10%-of-equity-in-common approach is not a hard and fast rule but rather an exercise of judgment; much less than 10% may very well work.

[5139] Reg. §§ 1.707-4(a)(2) and 1.707-4(b), discussed further in part II.M.3.e Exception: Disguised Sale.

[5140] As discussed in part II.M.3.e Exception: Disguised Sale, it is unlikely that the partnership anti-abuse rules would come into play. The transaction is consistent with the intent of the partnership income tax rules:

- <u>The partnership must be bona fide, and each transaction must have a substantial business purpose.</u> The proposed transaction splits income for generally around 5 years, and it provides the old owner with a way to take control over the business more quickly if the transaction does not work out than in a traditional sale. The new owner benefits by minimizing his risk, in that he is not personally liable. These are substantial, practical business issues.
- <u>The form of each transaction must be respected under substance over form principles.</u> No games are being played here: the parties have every incentive to ensure that the new entity's cash flow is distributed as promised in the transaction.
- <u>Clear reflection of income.</u> All distributions the old owner receives are being taxed. The new owner is not being taxed on income the new owner does not receive.

For more information on possible attacks, see fn. 3585.

[5141] *Chemtech Royalty Associates, L.P. v. U.S.*, 114 A.F.T.R.2d 2014-5940 (5th Cir 2014) (1% partnership interest by provider of capital was not sufficient to make provider a partner where partner's preferred return was virtually certain to be paid and 99% partner indemnified provider for any losses; partnership lacked economic substance). Dow provided the partnership with a stable revenue stream and indemnified the banks that provided the capital against any liabilities the partnership incurred:

> First, the transactions were structured to ensure that Dow paid the foreign banks a fixed annual return on their investment regardless of the success of the [Chemtech] venture, just as in the transaction in *Castle Harbour II*….
> Second, Dow agreed to bear all of the non-insignificant risks arising out of the Chemtech transactions, which further shows that the parties did not intend to share any possible losses….
> Third, just as in *Castle Harbour II*, the foreign banks did not meaningfully share in any potential upside.

The court pointed out:

> As a practical matter, payment of less than the full priority return was highly unlikely because (i) the minimum royalty payments from Dow sufficiently funded the priority return, and (ii) Chemtech could not incur more than $1 million in annual expenses without the banks' approval.

Also, regarding penalties, the court held that:

> the district court erred in foreclosing the applicability of both the substantial-valuation and gross-valuation misstatement penalties. We remand for the court to determine whether to impose either or both of those penalties. We express no opinion on whether the court erred in imposing the negligence and substantial-understatement penalties. On remand, the court should consider the extent to which imposing those penalties remains consistent with this opinion.

Although the court held that the partnership lacked economic substance, no consideration appears to have been given to the penalty described in part II.G.17 Economic Substance.

Also note that the *Castle Harbour* trial court refused to uphold negligence penalties on the taxpayer's actions, *TIFD III-E, Inc. v. U.S.*, 113 A.F.T.R.2d 2014-1557 (D.C. Conn.), which is analyzed by Lipton, *Castle Harbour* V—The Government Loses (Again) in the District Court, *Journal of Taxation* (Oct. 2014).

Although one might be inclined to use an LLC, a limited partnership is better if the partnership engages in a trade or business, to help avoid self-employment tax.[5142] When using a limited partnership, consider using an entity taxed as an S corporation for the general partner and conducting business through various single-member LLCs that the limited partnership owns.[5143] For more description showing how to move in such a structure, see part II.E.7 Migrating into Partnership Structure, especially part II.E.7.c Flowcharts: Migrating Existing Corporation into Preferred Structure.

Be careful about possible changes in accounting method. For example, if a cash method C corporation contributes its business to a partnership, the partnership might not be able to continue using the cash method;[5144] for example, if the corporation were a personal service corporation[5145] before the transaction and all of its personal service activities were moved to the partnership, the corporation might no longer qualify and therefore the partnership might not qualify as well. The corporation can avoid this limitation by making an S election[5146] but needs to plan around the built-in gain tax.[5147]

If the corporation has subsidiaries, the subsidiaries could convert to single-member disregarded LLCs, then do a tax-free liquidation;[5148] if the parent and subsidiaries file a consolidated return, be sure that the subsidiaries do not have any excess loss accounts[5149] or deferred intercompany transactions.[5150] Before the liquidation, the parent might consider contributing to the subsidiary any obligations of the subsidiary that the parent holds or cancelling them outright,[5151] particularly as needed to cause them to have a positive net worth on liquidation.[5152] If the corporation has affiliated corporations, they might combine in a tax-free reorganization[5153] before forming the new entity, so that only one corporation remains as the general partner; each corporation that does not survive the merger as a corporation could survive as an LLC (disregarded for tax purposes) wholly owned by the surviving corporation and then contributed to the limited partnership intact as an LLC that is then wholly owned by the partnership. Generally, among

5149 Reg. § 1.1502-19. See Hennessey, Yates, Banks & Pellervo, The Consolidated Tax Return (WG&L), ¶13.04. Excess-Loss Accounts.
5150 Reg. § 1.1502-13 (intercompany transactions). I am not an expert in Code § 332 and consolidated returns; one of my partners told me to watch for excess loss accounts or deferred intercompany transactions. The concept is that certain transactions not recognized in a consolidated environment are recognized when a corporation leaves the consolidated group – in this case, by liquidating a subsidiary.
5151 See Reg. § 1.332-7 if the parent does not do this. In a consolidated return environment, the parent can take a bad debt deduction based on the partial or complete worthlessness of the debt. Reg. § 1.1502-13(g)(7), Example 3(iii). For more details, see 784 T.M. *Corporate Liquidations*, part IV Tax Treatment of Intercorporate Debt in a Liquidation of a Subsidiary.
5152 See 784 T.M. Corporate Liquidations, III. Subsidiary Liquidations Not Qualifying Under §332, C. Insolvent Subsidiary. Reg. § 1.332-2(b) provides:

> Section 332 applies only to those cases in which the recipient corporation receives at least partial payment for the stock which it owns in the liquidating corporation. If section 332 is not applicable, see section 165(g) relative to allowance of losses on worthless securities.

5153 Code § 368.

other requirements, reorganizations require a continuity of business to be tax-free; this continuity can be satisfied when the acquired business is continued through the new partnership.[5154] Consider the effect of mergers on accounting methods, in that affiliated corporations using different accounting methods might need to change in some manner when combined into a single taxpayer.

If any owners are members of the same family or if any owner might split up his ownership in the corporate general partner from his interest as a limited partner when making transfers to family members, see parts III.B.7.b Code § 2701 Overview and III.B.7.c Code § 2701 Interaction with Income Tax Planning.

Transferring the common interest in a preferred partnership is less tax-efficient than selling (to an irrevocable grantor trust)[5155] an interest in a partnership that just has one class of owners, because (appraisers tell us that) the return required on an equity interest in a partnership generally is significantly higher than the AFR. However, a traditional sale to an irrevocable grantor trust is not practical here, as the corporation would have to form the irrevocable grantor trust for its benefit,[5156] which would undermine the whole concept of getting the property out of corporate solution.

II.Q.7.h.ix. Value Freeze as Alternative to Code § 355 Division

Consider separately applying part II.Q.7.h.viii Value Freeze as Conservative Alternative to different lines of business or groups of assets to split up future growth in each line or group.

The common (non-preferred) interests might be owned by those who have the most interest in particular lines or groups.

Alternatively, each subsidiary depicted at the bottom of part II.E.6 Recommended Partnership Structure – Flowchart can remain wholly owned but might have a separate incentive plan, such as the partnership equivalent of a stock appreciation right.[5157]

None of these alternatives provides the clean break, disentangling shareholders from each other, provided by part II.Q.7.f Corporate Division into More Than One Corporation.

II.Q.7.i. Distribution or Sale to Shareholder to Defer Gain on the Sale of Corporate Assets and Perhaps Avoid Double Taxation on Part

Consider forming a partnership, using one of the techniques described in part II.Q.7.h Distributing Assets; Drop-Down into Partnership, more than two years before selling property.

[5154] Reg. § 1.368-1(d)(4)(iii)(A).
[5155] As described in part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.
[5156] If a corporation makes a gratuitous transfer to a trust that is not for a business purpose of the corporation but is for the personal purposes of one or more of the shareholders, the gratuitous transfer will be treated as a constructive distribution to such shareholders under federal tax principles and the shareholders will be treated as the grantors of the trust. Reg. § 1.671-2(e)(4). See part II.D.2 Business Entity as Grantor of Tru.
[5157] See part II.M.4.g Options to Acquire Equity, especially the text accompanying fn. 3768. See also part III.B.7.c Code § 2701 Interaction with Income Tax Planning.

The corporation then might sell the partnership interest using an installment note to defer tax.[5158] If the corporation is an S corporation, be sure not to convert capital gain into ordinary income by using depreciable or amortizable assets.[5159]

The partnership's tax return for the year of the sale of the partnership interest (or before) would elect to step-up the basis of its underlying assets.[5160]

If and to the extent that the corporation is a C corporation that can sell the partnership interest at a discount relative to the partnership's underlying assets, that discount reduces income subject to C corporation income tax.

Be careful if the corporation is an S corporation that was a C corporation within the past 5 years.[5161]

II.Q.7.j. Prohibition Against Using Partnership to Circumvent Tax on Gain in Property Used to Redeem Stock

Promulgated under Code § 732(f), Reg. § 1.337(d)-3(b) provides that a corporate partner is required to recognize gain when a transaction has the effect of the corporate partner acquiring or increasing an interest in its own stock in exchange for appreciated property when a partnership, either directly or indirectly, owns, acquires, or distributes stock of the corporate partner. Furthermore, Code § 732(f) provides that, if (1) a corporate partner receives a distribution from a partnership of stock in another corporation (distributed corporation); (2) the corporate partner has control of the distributed corporation immediately after the distribution or at any time thereafter; and (3) the partnership's basis in the stock immediately before the distribution exceeded the corporate partner's basis in the stock immediately after the distribution, then the basis of the distributed corporation's property must be reduced by this excess.[5162]

II.Q.7.k. Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation

Code § 1202 excludes part or all of the gain[5163] on the sale of stock in a qualified small business corporation originally issued to the seller (with some exceptions)[5164] and held for at least

---

[5158] See parts II.Q.3 Installment Sales - Deferring Tax on Lump Sum Payout Expected More than Two Years in the Future and II.Q.8.e.ii Transfer of Partnership Interests: Effect on Transferring Partner.
[5159] See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill).
[5160] See part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).
[5161] See part II.P.3.b.ii Built-in Gain Tax.
[5162] T.D. 9833 (6/8/2018), promulgating Reg. § 1.732-3. T.D. 9833 further provides:

> The amount of this reduction is limited to the amount by which the sum of the aggregate adjusted basis of property and the amount of money of the distributed corporation exceeds the corporate partner's adjusted basis in the stock of the distributed corporation.

[5163] See text accompanying fns 5188-5193 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation. CCA 200609024 took the position that, in determining whether the statute of limitations was extended by omitting more than 25% of gross income, any capital gain excluded by Code § 1202 is not included in the gross income calculation.
[5164] See text accompanying fns 5208-5232 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

five years;[5165] be sure also to check for state income tax recognition of the exclusion.[5166] Many types of businesses are ineligible.[5167] Also, the corporation needs to have no more than $50 million at all times before and immediately after stock issuance[5168] and needs to have conducted sufficient business activities at all times.[5169] These business activities need to be either directly or through C corporation subsidiaries and require at least 80% of the assets being used for those activities (with additional restrictions on real estate ownership); they do not appear to be able to be done be through partnership subsidiaries.[5170] The corporation must have been a C corporation during substantially all of the taxpayer's holding period for such stock.[5171] Thus, stock in a former S corporation would not qualify, but an S corporation may form a C corporation subsidiary that would qualify;[5172] but beware of the mechanics.[5173]

The exclusion for most taxpayers is the greater of $10 million or 10 times the qualified small business stock's adjusted basis of the issued by the corporation and disposed of by the taxpayer during the taxable year.[5174] Adjusted basis used in the 10-times calculation includes the fair market value of property contributed to the corporation, but any built-in gain in contributed assets is not eligible for the exclusion, so running a business as a partnership and then converting to a C corporation has advantages and disadvantages for Code § 1202 purposes,[5175] as well as other tax considerations (beware of contributing too much debt; also consider forming a separate corporation for each business).[5176]

In contrast to the Code § 1202 exclusion, which requires a five-year holding period, under Code § 1045 a taxpayer may roll over the gain on the sale of qualified small business stock (QSBS) held for only six months by investing in other QSBS. See part II.Q.7.k.iv Code § 1045 Rollover of Gain from Qualified Small Business Stock (QSBS) to Another QSBS.

5175 See text accompanying fns 5313-5314 in part II.Q.7.k.iii Does the Exclusion for Sale of Certain Stock Make Being a C Corporation More Attractive Than an S corporation or a Partnership?

5176 See text accompanying fns 5314-5315 in part II.Q.7.k.iii Does the Exclusion for Sale of Certain Stock Make Being a C Corporation More Attractive Than an S corporation or a Partnership?

Here are some ideas when comparing the Code § 1202 exclusion to other tools:

- Purchasers of businesses want to get a new basis in the business' assets rather than just buying stock.

  - If they buy stock instead of assets, they tend to require the sellers to make a special election to treat the stock sale as an asset sale followed by a liquidation; for example, see part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold in part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.

  - When an S corporation's assets are deemed sold, the gain or other income on the shareholders' K-1s increases the basis in their stock.[5177] This benefit is much better than suffering through the limitations of Code § 1202 described in this part II.Q.7.k, because it applies regardless of the type of business, wipes out all of the gain (not just gain protected by Code § 1202), applies for state income tax purposes (not all states recognize Code § 1202), and protects more than just the original owner; further, an S corporation provides for tax-free distributions of earnings, which is not available for a C corporation.[5178] See part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

- A seller-financed sale of a partnership may be able to avoid capital gain tax on the sale of goodwill, making it more tax-efficient than a tax-free sale of stock. For how the Code § 1202 exclusion compares to other sales of business, see part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis. You will notice that a redemption (purchase by the C corporation) is less taxing than a cross-purchase (purchase by other shareholders). In a cross-purchase, the purchased stock will not be eligible for the Code § 1202 exclusion when the buyer later sells it, because it was not originally issued to the buyer.[5179] Similarly, if stock is issued too close to a redemption (within two years), the transactions may be stepped together and the new stock treated as if it had been sold to the buyer instead of issued to the buyer.[5180]

Here is an example of Code § 1202, taken from an ABA Section of Taxation meeting:[5181]

- Tom Investor and Tammy Techy organize We Are Tech, LLC on 1/1/2016.

5177 Code § 1367, which is reproduced in part II.G.4.d.i Basis Limitation Generally.
5178 See part II.Q.7.h.ii Taxation of Shareholders When Corporation Distributes Cash or Other Property
5179 See text accompanying fns 5208-5211 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.
5180 See text accompanying fns 5220-5232 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.
5181 May 2018 meeting of the Sales, Exchanges and Basis Committee II.Q.7.k.ie of the American Bar Association's Section of Taxation, program name "The Tax Exemption for Small Business Stock is Big Business," slides named "Section 1202 Qualified Small Business Stock," presented by Kohn, Friedman, Rappaport, and Kristall (the latter probably did not author, because the IRS does not author presentation materials at such meetings).

- Each provides capital contributions of $2 million in exchange for 50% interest in the LLC, which is taxed as a partnership.

- During 2016, the LLC purchases a building for $2 million cash and no debt, creates IP assets worth $2 million, and sustains a $1 million loss.

- Thus, each member's capital account and outside basis is $1.5 million at the end of 2016.

- On January 1, 2017, the LLC incorporates as We Are Tech, Inc., a C corporation that would qualify as a qualified small business stock, in an assets-over transaction:

  - The LLC contributes all assets to the C corporation in exchange for stock, then distributes stock to each member in liquidation.

  - The transaction qualifies under Code § 351.[5182] See also Rev. Rul. 84-111.[5183]

  - The fair market value of the LLC's assets was $5 million at the time of transaction.

- Each shareholder receives a $1.5 million carry-over basis for general tax purposes[5184] and a $2.5 million basis (50% of fair market value) in applying Code § 1202.[5185]

- On January 1, 2018, Tom sells his stock in We Are Tech, Inc. for $10 million. Tom has realized an $8.5 million long-term capital gain ($10 million proceeds minus $1.5 million adjusted basis).

- Within 60 days, Tom reinvests in Tech Savvy, Inc., a qualified small business, for $8 million and elects rollover treatment under Code § 1045.[5186] Consequences:

  - Total recognition of $3 million long-term capital gain (LTCG), consisting of:

    - Immediate recognition of $1 million LTCG, which is the built-in gain deferred upon incorporation.[5187]

    - Immediate recognition of $2 million LTCG, which under Code § 1045(a) is the $10 million gross sales price minus the $8 million gross purchase price of replacement qualified small business stock

  - Adjusted basis under Code § 1045(b)(3) is $2.5 million.

[5182] See part II.M.2 Buying into or Forming a Corporation.
[5183] See part II.P.3.c.ii Transfer of Partnership Assets and Liabilities to a Newly Formed Corporation in Exchange for All of its Stock.
[5184] Code § 358(a).
[5185] See fns 5191-5198 (overall limitation on amount of gain excluded and determination of gain subject to exclusion) of part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.
[5186] See part II.Q.7.k.iv Code § 1045 Rollover of Gain from Qualified Small Business Stock (QSBS) to Another QSBS.
[5187] See fns 5191-5198 (overall limitation on amount of gain excluded and determination of gain subject to exclusion) of part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

- On January 2, 2022, Tom sells all of his stock in Tech Savvy, Inc. for $25 million without rolling over to another qualified small business:

  - Tom has realized an $22.5 million long-term capital gain ($25 million proceeds minus $2.5 million adjusted basis).

  - The Code § 1202 exclusion limit is $25 million, which is ten times the $2.5 million basis under Code § 1202.

  - The $22.5 million long-term capital gain is less than the Code § 1202 exclusion limit of $25 million, so all of the gain is excluded.

- Contrast with Tom selling all We Are Tech, Inc. stock to purchase Tech Savvy, Inc. in a non-Code § 1045 rollover:

  - $1 million total long-term capital gain recognition.

  - No need to recognize the other $2 million under Code § 1045(a).

  - However, Tom would need to wait until January 2, 2023 to sell in order to meet his holding period requirement.

Other ideas when selling C corporation stock are covered in parts:

- II.G.7 Deferral or Partial Exclusion of Capital Gains (Even from Investment Assets) Invested in Opportunity Zones

- II.G.8 Code § 165(a) Loss for Worthlessness; Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A Limitation on that Strategy

- II.Q.7.l Special Provisions for Loss on the Sale of Stock in a Corporation under Code § 1244

- II.Q.7.m Deferring Gain on Sale of Marketable Securities by Investing in a Specialized Small Business Investment Company.

II.Q.7.k.i. Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation

This part II.Q.7.k applies to stock issued on or after August 11, 1993. The amount of gain that is subject to partial or complete exclusion from income cannot exceed the greater of:[5188]

(A) $10 million ($5 million for married filing separately)[5189] reduced by the aggregate amount of eligible gain taken into account under this rule for prior taxable years and attributable to dispositions of stock issued by such corporation, or

(B) 10 times the aggregate adjusted bases[5190] of qualified small business stock issued by the corporation and disposed of by the taxpayer during the taxable year. The greater of basis or

[5188] Code § 1202(b)(1).
[5189] Code § 1202(b)(3).
[5190] Only the basis on the date of issuance counts for purposes of this test. See the flush language at the end of Code § 1202(b)(1).

the fair market value of property contributed for Code § 1202 stock counts towards this basis limitation.[5191] The adjusted basis of any stock is determined without regard to any addition to basis after the date on which such stock was originally issued;[5192] therefore, to maximize the benefit of capital contributions, they should be made only in exchange for new stock when the company has assets with a basis (subject to unusual rules defining basis) of no more than $50 million.[5193]

The taxpayer must not be a corporation.[5194] However, an S corporation that holds qualified small business stock may be looked through to its owners who are taxed on the gain.[5195]

Gain is eligible only if from the sale or exchange of qualified small business stock held for more than 5 years.[5196] Also:[5197]

> If property (other than money or stock) is transferred to a corporation in exchange for its stock, the basis of the stock received is treated as not less than the fair market value of the property exchanged. Thus, only gains that accrue after the transfer are eligible for the exclusion.

Thus, contributing appreciated property in exchange for stock is a double-edged sword. On one hand, it provides an even greater amount of future gain that can be excluded. On the other hand, the built-in gain at the time of contribution is not eligible for the exclusion, whereas it would have been eligible if the property had been contributed earlier so that the appreciation occurred after contribution. Thus, if a partnership is considering converting to a C corporation, its owners should consider how long before they intend to sell (so that the 5-year holding period

---

[5191] Code § 1202(i)(1) provides that, for purposes of Code § 1202:

Stock exchanged for property. In the case where the taxpayer transfers property (other than money or stock) to a corporation in exchange for stock in such corporation -

(A) such stock shall be treated as having been acquired by the taxpayer on the date of such exchange, and

(B) the basis of such stock in the hands of the taxpayer shall in no event be less than the fair market value of the property exchanged.

The legislative history quoted in the text accompanying fn 5197 makes me wonder whether this increase in the overall amount excluded was intended, but the statute's literal language appears to provide this result.

[5192] Code § 1202(b)(1) (flush language).

[5193] See fns 5238-5242.

[5194] Code § 1202(a)(1).

[5195] Code § 1202(g), discussed in the text accompanying fns 5212-5218 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

[5196] Code § 1202(b)(2).

[5197] H. Rept. No. 103-111 (P.L. 103-66), p. 603. Code § 1202(i) provides that, for purposes of Code § 1202:

(1) *Stock exchanged for property*. In the case where the taxpayer transfers property (other than money or stock) to a corporation in exchange for stock in such corporation-

  (A) such stock shall be treated as having been acquired by the taxpayer on the date of such exchange, and

  (B) the basis of such stock in the hands of the taxpayer shall in no event be less than the fair market value of the property exchanged.

(2) *Treatment of contributions to capital.* If the adjusted basis of any qualified small business stock is adjusted by reason of any contribution to capital after the date on which such stock was originally issued, in determining the amount of the adjustment by reason of such contribution, the basis of the contributed property shall in no event be treated as less than its fair market value on the date of the contribution.

is satisfied) and whether appreciation while a partnership is good (to increase the 10-times-basis exclusion) or bad (pre-conversion appreciation ineligible for the exclusion).[5198]

A taxpayer who wishes to try to exceed these limitations might transfer stock to family members or others by gift before the stock appreciates, and presumably each donee would separately apply the limitation.[5199] If the taxpayer has insufficient lifetime gift tax exemption, consider transferring part of the stock to one or more incomplete gift nongrantor (ING) trusts;[5200] however, beware part II.J.9.c.i Multiple Trusts Created for Tax Avoidance. Another way to get more than $10 million limitation would be to have a separate C corporation for each qualified business.

For "qualified small business stock" issued after September 27, 2010 and held for more than five years, Code § 1202 excludes from income all of the gain from its sale or exchange, within the limits set forth above.[5201]

For "qualified small business stock" issued before September 28, 2010 and held for more than five years, Code § 1202 excludes from income a portion of the gain from its sale or exchange (within the limits set forth above)[5202]:

- If the above and other requirements are satisfied, then the portion excluded from income is 50% for stock (60% for gain attributable to an empowerment zone business) acquired before February 18, 2009 and 75% for stock acquired on or before September 27, 2010.[5203]

- Any gain that is not excluded is subject to 28% tax instead of the usual, lower capital gain rates.[5204]

- Note also that taxable gain from the sale of C corporation stock is subject to the 3.8% tax on net investment income,[5205] whereas gain on the sale of a partnership or S corporation stock engaged in a trade or business is largely excluded from that tax.[5206]

For stock acquired after September 27, 2010, alternative minimum taxable income no longer applies to the amount excluded from regular taxable income.[5207]

An example combining Code §§ 1202 and 1045 is in the text following fn 5181 in part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation.

"Qualified small business stock" means any stock in a C corporation which the taxpayer acquires on original issue by a qualified small business either in exchange for money or other

[5200] See text accompanying fns 2514-2516 in part II.J.3.e.i Strategic State & Local Tax Issues re: Residence, briefly mentioning the idea of an incomplete gift nongrantor (ING) trust.
[5201] See text accompanying fn 5188.
[5202] See text accompanying fn 5188.
[5203] Code § 1202(a).
[5204] Compare Code § 1(h)(4) (tax on Code § 1202 gain) to Code § 1(h)(1) (tax on capital gains generally).
[5205] See part II.I 3.8% Tax on Excess Net Investment Income (NII).
[5206] See part II.I.8.e NII Components of Gain on the Sale of an Interest in a Partnership or S Corporation.
[5207] Code § 1202(a)(4)(C), eliminating the application of Code § 57(a)(7).

property (not including stock)[5208] or as compensation for services provided to such corporation (other than services performed as an underwriter of such stock).[5209] An option to acquire stock does not count as stock until the stock is actually issued to the taxpayer.[5210] The House Report for the 1993 Revenue Reconciliation Act, P.L. 103-66, included:

> *Options, nonvested stock, and convertible instruments.*
>
> Stock acquired by the taxpayer through the exercise of options or warrants, or through the conversion of convertible debt, is treated as acquired at original issue. The determination whether the gross assets test is met is made at the time of exercise or conversion, and the holding period of such stock is treated as beginning at that time.

[5208] But, if a corporate reorganization is involved, see fn 5279 of part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold.

[5209] Code § 1202(c)(1).

[5210] *Natkunanathan v. Commissioner*, T.C. Memo. 2010-15, *aff'd* 479 Fed. Appx. 775 (9th Cir. 2012), held that, where the taxpayer had been issued options to buy stock in his employer and did not exercise those options, except to acquire shares in a corporation (Intel) that acquired his employer, the taxpayer could not apply Code § 1202:

> Section 1202 itself does not define the term "stock" or otherwise specify what securities constitute stock for purposes of the qualified small business stock exclusion. By comparison, some provisions of the Code explicitly specify that the term "stock" includes options to acquire stock. See, *e.g.*, sec. 305(d)(1) ("For purposes of this section, the term `stock' includes rights to acquire such stock."); sec. 1091(a) (same). We are unaware of any authority that has interpreted the term "stock" for purposes of section 1202. However, we have previously declined to extend the term "stock" beyond its plain meaning in a statutory provision and construe it expansively to include options to acquire stock. See *Gantner v. Commissioner*, 91 T.C. 713 (1988) (options to purchase stock are not "shares" of "stock or securities" under the plain language of section 1091, which was subsequently amended to explicitly provide otherwise), *affd*. 905 F.2d 241 (8th Cir. 1990). Moreover, the legislative history of section 1202 suggests that Congress did not intend section 1202 to cover options to acquire stock.
>
> Section 1202 was added to the Code by the Omnibus Budget Reconciliation Act of 1993, Pub.L. 103-66, sec. 13113(a), 107 Stat. 422. The accompanying conference report included the following statement: "Stock acquired by the taxpayer through the exercise of options * * * is treated as acquired at original issue. The determination whether the gross assets test is met is made *at the time of exercise* * * * and the holding period of such stock is treated as beginning at that time." H. Conf. Rept. 103-213, at 526 (1993), 1993-3 C.B. 393, 404 (emphasis added). The second sentence of the excerpt from the conference report quoted above, in the absence of any countervailing argument by petitioner, suggests to us that the original issuance contemplated by section 1202 in petitioner's case would be the issuance of Intel stock to petitioner upon exercise of his options. This conclusion seems appropriate since both the application of the gross assets test and the commencement of the holding period would occur at the time of such exercise.
>
> Reading the term "stock" as used in section 1202 to exclude petitioner's options to acquire stock, we hold that petitioner could not possibly have satisfied the 5-year holding period requirement of section 1202(a)(1). Petitioner concedes that he sold the Intel stock received upon exercise of his options on the same day that he had exercised the options. Therefore, the period during which petitioner could have held qualified small business stock would, at most, have lasted 1 day. Moreover, for the stock underlying petitioner's options to constitute qualified small business stock under section 1202(d)(1), the aggregate gross assets of Intel on the date of exercise would have to have been less than or equal to $50 million. Petitioner makes no such claims with respect to Intel's aggregate gross assets.

In the case of convertible preferred stock, the gross assets determination is made at the time the convertible stock is issued, and the holding period of the convertible stock is added to that of the common stock acquired upon conversion.

Stock received in connection with the performance of services is treated as issued by the corporation and acquired by the taxpayer when included in the taxpayer's gross income in accordance with the rules of section 83.

Offsetting short positions.

A taxpayer cannot exclude gain from the sale of qualified small business stock if the taxpayer (or a related person) held an offsetting short position with respect to that stock any time before the 5-year holding period is satisfied. If the taxpayer (or a related person) acquires an offsetting short position with respect to qualified small business stock after the 5-year holding period is satisfied, the taxpayer must elect to treat the acquisition of the offsetting short position as a sale of the qualified small business stock in order to exclude any gain from that stock.

An offsetting short position is defined to be (1) a short sale of property substantially identical to the qualified small business stock (including writing a call option that the holder is more likely than not to exercise or selling the stock for future delivery) or (2) an option to sell substantially identical property at a fixed price.

If any stock in a corporation is acquired solely through the conversion of other stock in such corporation which is qualified small business stock in the hands of the taxpayer, the stock so acquired is treated as qualified small business stock in the hands of the taxpayer and is treated as having been held during the period during which the converted stock was held.[5211]

Special rules apply to C corporation stock owned by certain pass-through entities.[5212] A pass-through entity is any partnership, any S corporation,[5213] any regulated investment company (RIC),[5214] or any common trust fund.[5215] If any amount included in gross income by reason of holding an interest in a pass-through entity meets the requirements of the following sentence, the amount shall be treated as Code § 1202(a) gain and, for purposes of applying Code § 1202(b), that amount is treated as gain from a disposition of stock in the corporation issuing the stock disposed of by the pass-through entity and the taxpayer's proportionate share

[5211] Code § 1202(f).
[5212] Code § 1202(g).
[5213] Code § 1202(g)(4)(B).
[5214] Code § 1202(g)(4)(C). Notice 97-64, § 8, contemplates that temporary regulations will provide guidance on how RICs may designate dividends as "section 1202 gain distributions," which guidance is:

> expected to provide that: (1) section 1202 gain distributions will be designated separately for different issuers of qualified small business stock; (2) the exclusion from income permitted by section 1202 will be determined at the shareholder level not the RIC level; and (3) the maximum distributable section 1202 gain for each issuer will be calculated separately from limitations on all other classes of capital gain dividends but in the aggregate will not exceed the RIC's net capital gain.

Notice 2015-41, § 5, provides that Notice 97-64, § 8, continues to apply. Notice 2015-41, § 3, requires that RICs must account for "section 1202 gain" in distributions. Code § 1202(g) applies to such distributions.
[5215] Code § 1202(g)(4).

of the adjusted basis of the pass-through entity in such stock is taken into account.[5216] The amount must be attributable to gain on the sale or exchange by the pass-through entity of stock which is qualified small business stock in the hands of such entity (determined by treating such entity as an individual) and which was held by such entity for more than 5 years, and such amount must be includible in the gross income of the taxpayer by reason of the holding of an interest in such entity which was held by the taxpayer on the date on which such pass-through entity acquired such stock and at all times thereafter before the disposition of such stock by such pass-through entity.[5217] This gain exclusion does not apply to any amount to the extent such amount exceeds the amount to this rule would have applied if the amount were determined by reference to the interest the taxpayer held in the pass-through entity on the date the qualified small business stock was acquired.[5218]

The original issuance requirement means that stock bought from another shareholder would not qualify. May one avoid this prohibition by redeeming the seller and issuing stock to the buyer? Code § 1202(c)(3) imposes a waiting period related to redemption activity (including certain cross-purchases between related persons).[5219] Stock is disqualified if, at any time within 2 years before or after the issuance of such stock, the corporation issuing such stock purchased (directly or indirectly) any of its stock from the taxpayer or from a person related[5220] to the taxpayer.[5221] In applying the preceding sentence, one can ignore stock acquired from the taxpayer or a related person if the aggregate amount paid for the stock does not exceed $10,000 and no more than 2% of the stock held by the taxpayer and related persons is acquired.[5222] Also, stock is disqualified if, within the year before or after the issuance of such stock, the corporation made one or more purchases of its stock with an aggregate value (as of the time of the respective purchases) exceeding 5% of the aggregate value of all of its stock as

[5216] Code § 1202(g)(1).
[5217] Code § 1202(g)(2).
[5218] Code § 1202(g)(3).
[5219] Code § 1202(c)(3)(C) refers to Code § 304(a), "Acquisition by related corporation (other than subsidiary)," which provides:

> For purposes of sections 302 and 303, if -
> (A) one or more persons are in control of each of two corporations, and
> (B) in return for property, one of the corporations acquires stock in the other corporation from the person (or persons) so in control,
>
> then (unless paragraph (2) applies) such property shall be treated as a distribution in redemption of the stock of the corporation acquiring such stock. To the extent that such distribution is treated as a distribution to which section 301 applies, the transferor and the acquiring corporation shall be treated in the same manner as if the transferor had transferred the stock so acquired to the acquiring corporation in exchange for stock of the acquiring corporation in a transaction to which section 351(a) applies, and then the acquiring corporation had redeemed the stock it was treated as issuing in such transaction.

[5220] Within the meaning of Code § 267(b) or 707(b). For a description of Code § 267(b), see part II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses. For a description of Code § 707(b), see part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.
[5221] Code § 1202(c)(3)(A).
[5222] Reg. § 1.1202-2(a)(2), which further provides:

> The following rules apply for purposes of determining whether the 2-percent limit is exceeded. The percentage of stock acquired in any single purchase is determined by dividing the stock's value (as of the time of purchase) by the value (as of the time of purchase) of all stock held (directly or indirectly) by the taxpayer and related persons immediately before the purchase. The percentage of stock acquired in multiple purchases is the sum of the percentages determined for each separate purchase.

of the beginning of that 2-year period.[5223] The preceding sentence has a similar de minimis rule.[5224] These rules are strict and do not exclude redemptions that are not tied to issuances. For example, two founders don't get along, and the departing founder could sell his stock to either the corporation or to the remaining founder. If the departing founder were the buyer, the corporation may need to issue a dividend to that buyer, causing the buyer to pay a dividend tax.[5225] If the corporation were the buyer, this dividend tax could be avoided,[5226] but under the above anti-abuse rule the redemption may taint any issuance to a related party, whether the continuing founder or a new investor.

Although generally a shareholder who transfers stock to an employee or independent contractor (or to a beneficiary of an employee or independent contractor) is treated has transferring the stock to the corporation and the corporation then transferring the stock to the employee or independent contractor,[5227] any such deemed transfer to the corporation is not treated as such for purposes of the anti-redemption rules.[5228] The anti-redemption rules also are not triggered by any of the following:

- The stock was acquired by the seller in connection with the performance of services as an employee or director and the stock is purchased from the seller incident to the seller's retirement or other bona fide termination of such services.[5229]

- Before a decedent's death, the stock (or an option to acquire the stock) was held by the decedent or the decedent's spouse (or by both), by the decedent and joint tenant, or by a trust revocable by the decedent or the decedent's spouse (or by both), and the stock is purchased from the decedent's estate, beneficiary (whether by bequest or lifetime gift), heir, surviving joint tenant, or surviving spouse, or from a trust established by the decedent or decedent's spouse; and the stock is purchased within 3 years and 9 months from the date of the decedent's death.[5230]

- The stock is purchased incident to the disability or mental incompetency of the selling shareholder.[5231]

[5223] Code § 1202(c)(3)(B).

[5224] Reg. § 1.1202-2(b)(2) provides that, for purposes of this exception:

> … stock exceeds a de minimis amount only if the aggregate amount paid for the stock exceeds $10,000 and more than 2 percent of all outstanding stock is purchased. The following rules apply for purposes of determining whether the 2-percent limit is exceeded. The percentage of the stock acquired in any single purchase is determined by dividing the stock's value (as of the time of purchase) by the value (as of the time of purchase) of all stock outstanding immediately before the purchase. The percentage of stock acquired in multiple purchases is the sum of the percentages determined for each separate purchase.

[5225] See part II.Q.1.a.i.(c) C Corporation Double Taxation Under Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation, which is a variation of part II.Q.1.a.i.(a) C Corporation Triple Taxation.

[5226] Contrast part II.Q.1.a.i.(b) C Corporation Redemption with part II.Q.1.a.i.(a) C Corporation Triple Taxation.

[5227] Reg. § 1.83-6(d)(1).

[5228] Reg § 1.1202-2(c).

[5229] Reg. § 1.1202-2(d)(1)(i).

[5230] Reg. § 1.1202-2(d)(2).

[5231] Reg. § 1.1202-2(d)(3).

- The stock is purchased incident to the divorce (within the meaning of Code § 1041(c)) of the selling shareholder.[5232]

During substantially all of the taxpayer's holding period for such stock, the corporation must be a C corporation and use at least 80% (by value) of its assets in the active conduct of one or more qualified trades or businesses.[5233] See part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold. Therefore, the C corporation cannot have been an S corporation. However, an S corporation can contribute its assets to a C corporation, and the C corporation could then qualify for the exclusion.[5234] To simplify this process, the owners of the S corporation form a parent S corporation, which new parent assumes all of the original S corporation's tax attributes;[5235] this makes the original corporation a disregarded entity;[5236] then the original corporation elects C corporation treatment. Although technically this reorganization works, it appears that the subsidiary would have the same tax ID as the parent S corporation,[5237] making the C corporation appear on the IRS' records as a former S corporation, even though technically it is considered a new C corporation.

The corporation's aggregate gross assets cannot have a basis exceeding $50 million:[5238]

(A) the aggregate gross assets of such corporation (or any predecessor thereof) at all times on or after the date of the enactment of the Revenue Reconciliation Act of 1993, and before the issuance did not exceed $50,000,000,

(B) the aggregate gross assets of such corporation immediately after the issuance (determined by taking into account amounts received in the issuance) does not exceed $50,000,000, and

---

5232 Reg. § 1.1202-2(d)(4).

5233 Code § 1202(c)(2)(A), (e). The taxpayer must affirmatively prove what the business assets are and that they met this 80% test. *Holmes v. Commissioner*, T.C. Memo. 2012-251, held:

> The record is again devoid of documentary evidence showing the amount of corporate assets owned during the years in which he held the stock and the amount of those assets used in its business of providing on demand physician practice management software. In fact, the only evidence in the record concerning LeonardoMD's business is a stipulated paragraph describing its business as providing on demand physician practice management software delivered over the Web, and petitioner's above-cited testimony. We cannot, on the basis of uncorroborated testimony and a stipulation that does not rule out inactive business assets and income, reasonably conclude that petitioner met his burden of proving that, during substantially all of his holding period for LeonardoMD stock, the corporation used at least 80% of its assets in the active conduct of one or more qualified trades or businesses.

5234 See fn 5213.

5235 See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization, especially fn 4078.

5236 See part II.A.2.g Qualified Subchapter S Subsidiary (QSub).

5237 See Reg. § 301.6109-1(i)(3) in the text accompanying fn 188 in part II.A.2.g Qualified Subchapter S Subsidiary (QSub).

5238 Code § 1202(d). This applies to gross assets at all times on or after the date of the enactment of the Revenue Reconciliation Act of 1993 and before the issuance, as well as immediately after the issuance (determined by taking into account amounts received in the issuance).

(C) such corporation agrees to submit such reports to the Secretary and to shareholders as the Secretary may require to carry out the purposes of this section.[5239]

Although regulations have not been issued regarding reporting requirements, taxpayers will lose the deduction if they do not have records to substantiate that the stock met this requirement.[5240]

As used above, "aggregate gross assets" means the amount of cash and the aggregate adjusted bases of other property held by the corporation.[5241] As used in (A) above:[5242]

> The adjusted basis of any property contributed to the corporation (or other property with a basis determined in whole or in part by reference to the adjusted basis of property so contributed) shall be determined as if the basis of the property contributed to the corporation (immediately after such contribution) were equal to its fair market value as of the time of such contribution.

[5239] [Footnote is mine and not in the statute:] Federal Tax Coordinator Analysis (RIA) ¶ S-4455 Reports With Respect to Exclusion of Gain From Qualified Small Business Stock (QSBS) reports:

> IRS has yet to issue either any reporting requirements described in Code Sec. 1202(d)(1)(C) … or any guidance as to the manner in which, as mandated by Code Sec. 1202(d)(1)(C), a corporation is to agree to meet these requirements. RIA understands that, until IRS provides guidance as to the manner in which a corporation is to agree, a corporation can issue QSBS without the necessity for the corporation to file any sort of agreement that it will comply with any reporting requirements, if and when issued. Presumably, if IRS ever does require reporting, it will prescribe procedures at that time for making the agreement called for in the Code.

[5240] *Natkunanathan v. Commissioner*, T.C. Memo. 2010-15, *aff'd* 479 Fed. Appx. 775 (9th Cir. 2012), held:

> There are no balance sheets or other financial statements of Cognet in the record that establish the amounts of total assets, total liabilities, or owner's equity of Cognet at any time, and petitioner made no attempt to introduce any such evidence at trial.[5] In the absence of any such evidence, we cannot determine the value of Cognet's gross assets at the time that it issued options to petitioner and, therefore, cannot conclude that Cognet constituted a qualified small business within the meaning of section 1202(d)(1) at that time.
>
> [5] After the trial petitioner attached to his reply brief a document purporting to be a statement by the chief executive officer of Cognet at the time of its acquisition by and merger with Intel declaring that "*To the best of my recollection*, the company's assets, including physical assets and total value of outstanding shares did not exceed $50,000,000 before the acquisition." [Emphasis added.] Subsequently, after the record had closed upon the filing of reply briefs, petitioner filed a motion for leave to reopen the record in order to introduce a notarized version of this and other documents. A notarized written statement from Cognet's chief executive officer, even if it were introduced at trial, could have been subject to a hearsay objection and, absent concessions or stipulation by respondent, would probably not have been admitted into evidence. But here, where the purported statement constitutes an affidavit attached to a brief, Rule 143(b) explicitly bars us from considering it as evidence. We have previously issued an order denying petitioner's motion to reopen the record as inappropriate because petitioner has not shown good cause for his failure to introduce such evidence at trial.

Issuing stock options does not necessarily qualify as issuing stock; however, the taxpayer did not hold actual stock for the five-year holding period, so that's why the court looked at when the stock options were issued. See fn 5210 for more about these issues.

[5241] Code § 1202(d)(2)(A).

[5242] Code § 1202(d)(2)(B).

The following businesses are not eligible for this treatment:[5243]

- any trade or business involving the performance of services in the fields of health,[5244] law, engineering, architecture, accounting, actuarial science, performing arts,[5245] consulting,[5246] athletics, financial services, brokerage services, or any other trade or business where the principal asset of such trade or business is the reputation or skill of one or more of its employees,[5247]

- any banking, insurance, financing, leasing, investing, or similar business,

- any farming business (including the business of raising or harvesting trees),

- any business involving the production or extraction of products, such as oil, gas and mines, eligible for certain depletion deductions, or

- any business of operating a hotel, motel, restaurant, or similar business.

However, engaging in the above activities is not fatal, if it comprises a sufficiently small part of the business.[5248]

The corporation must be a domestic corporation other than a DISC or former DISC, corporation with respect to which an election under Code § 936 is in effect or which has a direct or indirect subsidiary with respect to which such an election is in effect, regulated investment company, real estate investment trust, REMIC, or cooperative.[5249]

Below are some rulings elaborating on the bullet point disqualified businesses:

CCA 202204007 asserted:

> We conclude that Corporation should be classified as a broker under the common meaning of the term and as it is defined under § 6045, rather than the more narrow definition that applies for purposes of § 199A.[9] While Corporation states that it does not

[5243] Code § 1202(e)(3). Code § 1202(e)(3)(A) is discussed in part II.E.1.c.iv Specified Service Trade or Business (SSTB) If Taxable Income Exceeds Certain Thresholds. However, that discussion is expressly limited to Code § 199A and cannot be relied upon in applying Code § 1202. CCA 202204007 is discussed after these bullet points.

[5244] Letter Ruling s201436001 and 201717010 are discussed after these bullet points. For additional context, when Congress enacted Code § 199A and referred to Code § 1202(e)(3), it also looked to Code § 448. See part II.E.1.c.iv.(b) Health. However, that discussion is expressly limited to Code § 199A and cannot be relied upon in applying Code § 1202.

[5245] For additional context regarding performing arts, when Congress enacted Code § 199A and referred to Code § 1202(e)(3), it also looked to Code § 448. See part II.E.1.c.iv.(f) Performing Arts. However, that discussion is expressly limited to Code § 199A and cannot be relied upon in applying Code § 1202.

[5246] For additional context regarding consulting, might when Congress enacted Code § 199A and referred to Code § 1202(e)(3), it also looked to Code § 448. See part II.E.1.c.iv.(g) Consulting. However, that discussion is expressly limited to Code § 199A and cannot be relied upon in applying Code § 1202. Letter Ruling 202342015 is discussed after these bullet points.

[5247] Letter Ruling 202319013 and *Owen v. Commissioner*, T.C. Memo. 2012-21, are discussed after these bullet points.

[5248] See part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold, especially fns 5251-5253.

[5249] Code § 1202(e)(4).

provide brokerage services but instead provides advertising services, it is our view that the actions and services provided by Corporation support our position that Corporation is a broker for purposes of § 1202(e)(3)(A).

> [9] It is important to emphasize that the §199A regulations' narrow interpretation of what constitutes brokerage services by its terms only applies for purposes of § 199A and no other Code section. Further, the examples in the section 448 regulations confirm the common meaning of the term brokerage services.

> A broker serves as an intermediary between a buyer and a seller, and Corporation does this. Corporation does not just passively publish advertisements on its website that are provided to it from potential lessors desiring to lease property. Unlike a search engine that provides content to users and also sends targeted advertisements to those users based on their search history, Corporation's website is solely devoted to effectuating agreements between potential lessors and potential lessees of certain property.

> Corporation charges a minimum flat fee to lessors irrespective of whether a potential lessor succeeds in entering into lease agreements as a result of the use of Corporation's website. However, Corporation is also compensated on a commission basis based on leasing transactions that are entered into as the result of the use of Corporation's website.

> Corporation does not have the authority to enter into leasing agreements on behalf of lessors that use its services. Corporation only provides a vehicle for potential lessees to transmit non-binding reservation requests to potential lessors. Only the potential lessor and lessee have the authority to enter into a binding lease agreement. However, brokerage activity can include simply bringing a potential buyer and seller together to work out the transaction. See *American West Hotel Brokers v. Wu*, 697 P.2d 34, 36 (Colo. 1985).

> The fact that Corporation's services are provided by software created by people rather than directly by people does not change the functional nature of the services. Because Corporation provides brokerage services within the meaning of § 1202(e)(3)(A), taxpayer is not entitled to exclude any of the gain from the sale of stock in Corporation under § 1202.

Letter Ruling 201436001 held that the health service and related exclusion did not apply to the taxpayer:

> Section 1202(e)(3) excludes various service industries and specified non-service industries from the term qualified trade or business. Thus, a qualified trade or business cannot be primarily within service industries, such as restaurants or hotels or the providing of legal or medical services. In addition, § 1202(e)(3) excludes businesses where the principal asset of the business is the reputation or skill of one or more of its employees. This works to exclude, for example, consulting firms, law firms, and financial asset management firms. Thus, the thrust of § 1202(e)(3) is that businesses are not qualified trades or businesses if they offer value to customers primarily in the form of services, whether those services are the providing of hotel rooms, for example, or in the form of individual expertise (law firm partners).

> Company is not in the business of offering service in the form of individual expertise. Instead, Company's activities involve the deployment of specific manufacturing assets and intellectual property assets to create value for customers. Essentially, Company is a pharmaceutical industry analogue of a parts manufacturer in the automobile industry. Thus, although Company works primarily in the pharmaceutical industry, which is certainly a component of the health industry, Company does not perform services in the health industry within the meaning of § 1202(e)(3). Neither are Company's business activities within any of the prohibited categories set forth in § 1202(e)(3).

Letter Ruling 201717010 held that the health service and related exclusion did not apply to a lab:

> Company provides laboratory reports to health care professionals. However, Company's laboratory reports do not discuss diagnosis or treatment. Company neither discusses with, nor is informed by, healthcare providers about the diagnosis or treatment of a healthcare provider's patients. Company's sole function is to provide healthcare providers with a copy of its laboratory report.
>
> Company neither takes orders from nor explains laboratory tests to patients. Company's direct contact with patients is billing patients whose insurer does not pay all of the costs of a laboratory test.
>
> In addition, you represent that the skills employees bring to Company are not useful in performing X tests and that skills they develop at Company are not useful to other employers.
>
> Further, none of Company's revenue is earned in connection with patients' medical care. Other than the laboratory director [who federal law required to have certain qualifications], Company's laboratory technicians are not subject to state licensing requirements or classified as healthcare professionals by any applicable state or federal law or regulatory authority.
>
> Although Company's laboratory reports provide valuable information to healthcare providers, Company does not provide health care professionals with diagnosis or treatment recommendations for treating a healthcare professional's patients nor is Company aware of the health care provider's diagnosis or treatment of the healthcare provider's patients. In addition, the skills that Company's employees have are unique to the work they perform for Company and are not useful to other employers.
>
> Thus, based on the facts and representations submitted, we conclude that for purposes of § 1202(e)(3), Company is not in a trade or business (i) involving the performance of services in the field of health or (ii) where the principal asset of the trade or business is the reputation or skill of one or more of its employees.

Letter Ruling 202342015 involved a C corporation that provided the following services:

> Company offers data migration and management services to businesses. It does not sell software or technical equipment as part of the services it provides. To understand its customers' needs, Company creates a transformation assessment plan. Its service delivery teams determine an optimized cloud and data transformation roadmap based on assessment outcomes. Company team members will integrate into the customer's team

> often on a full-time basis to orchestrate and troubleshoot the data migration and work to implement the data migration, as well as provide limited advice and counsel when working with a customer's team. Company also provides post-migration managed technical services, which include monitoring and resolving incidents.
>
> The invoices provided to Company's clients for the services it performs represent billing for implementation services and embedded advice. Company does not separately bill for advice and counsel. Taxpayer represents that more than 80% of Company's assets are used in its data migration and management business.

Letter Ruling 202342015 reasoned and ruled:

> Company's employees provide advice and counsel as part of the process of determining a client's data management needs but the advice and counsel is ancillary to and supports the sale of the implementation work Company's employees perform. Company does not separately bill for advice and counsel, but only for its final product of implementing data management solutions. Therefore, Company does not engage a trade or business involving the performance of services in the field of consulting….
>
> We conclude that for the purposes of section 1202(e)(3), Company is engaged in a qualified trade or business as defined in section 1202(e)(3) and is not engaged in a trade or business involving the performance of services in the field of consulting within the meaning of section 1202(e)(3)(A).

Letter Ruling 202342013 seems the same as Letter Ruling 202342015. However, it involved the following additional fact:

> On Date 1, Company elected to be classified as an S corporation but Company had more than one class of stock in violation of section 1.361-1(*l*)1 of the Regulations. Thus, Taxpayer represents that its S corporation election was immediately invalid.

See part II.A.2.h Important Protections for S Corporation Shareholder Agreements.

Letter Ruling 202342013 commented about that fact:

> Specifically, no opinion is expressed or implied concerning whether the Company made an invalid S corporation election on Date 1. However, this ruling is conditioned upon Taxpayer's representation that the S corporation election on Date 1 was invalid.

That's because a current or former S corporation cannot be qualified small business stock (although an S corporation can form a QSBS C corporation subsidiary).

Letter Ruling 202319013 had the following facts and conclusion:

> Company is an enterprise cloud application services software company, which provides solutions tailored to the operating functions and industry-specific challenges of their clients. The Company's employees possess technical skills and knowledge which allow for effective implementation and the quality of the Company's services. However, they are trained on one or more of the Company's proprietary service delivery processes and methodology packages that are unique to the Company and may not be utilized by the employees at any other employers that may provide the same or similar service. The

> Company can recruit and train new employees with the required technical skillset to perform substantially identical services using its methodology packages….
>
> The Company's employees possess technical skills and knowledge due to training received on one or more of the Company's proprietary service delivery processes and methodology packages. Such processes and packages are unique to Company and may not be utilized by the employees at other similar companies. The Company can recruit and train new employees with the required technical skillset to perform substantially identical services using its methodology packages. Therefore, the principal asset of the Company is not the reputation or skills of one or more employees, but the intellectual property held by the Company itself in its proprietary service delivery processes and methodology packages.

Also, a commission sales business was not disqualified under this provision. In *Owen v. Commissioner*, T.C. Memo. 2012-21, a company that sold prepaid legal service policies, including estate planning services, which were like insurance in that purchasers would get a reduced fee in legal cost by joining this prepaid legal membership, was a qualified small business. The court seemed to accept the taxpayer's testimony that, in the industry, independent contractors generally sold the products and services offered by the company. The taxpayer performed services as an executive and as a sales representative and his compensation was reported on Form W-2 (as an executive) and Form 1099-MISC (as an independent consultant who furnished services through his personal corporation that received commissions and in turn paid him using Form 1099-MISC. The court held:

> Although respondent argues that FFAEP is not qualified because one of the principal assets is the skill of Mr. Owen, the Court disagrees. While we have no doubt that the success of the Family First Companies is properly attributable to Mr. Owen and Mr. Michaels, the principal asset of the companies was the training and organizational structure; after all, it was the independent contractors, including Mr. Owen and Mr. Michaels in their commission sales hats, who sold the policies that earned the premiums, not Mr. Owen in his personal capacity.

However, ultimately this holding was moot (which did not stop the court from opining on it), because the taxpayer was trying to do a Code § 1045 rollover of gain on sale from one company to another. Although the new company qualified as described above, the company being sold did not (fn. 5261), resulting in the taxpayer losing the case. So, keep in mind the IRS' lack of incentive to appeal this holding when viewing it as instructive.

II.Q.7.k.ii. Limitation on Assets a Qualified Small Business May Hold

During substantially all of the taxpayer's holding period for the qualified small business stock,[5250] the corporation must use at least 80% (by value) of its assets in the active conduct of one or more qualified trades or businesses and be an eligible corporation.[5251] Assets used for certain start-up or research activities count as qualified.[5252] A specialized small business investment

[5250] Code § 1202(c)(2).
[5251] Code § 1202(e)(1).
[5252] Code § 1202(e)(2), "Special rule for certain activities," provides:

> For purposes of paragraph (1), if, in connection with any future qualified trade or business, a corporation is engaged in—
>
> (A) start-up activities described in section 195(c)(1)(A),

company automatically meets the active business requirement.[5253] Query whether the active business requirement of Code § 355[5254] may inform this discussion, even though it does not literally apply to Code § 1202.

In applying the requirement that the corporation hold active business assets, stock and debt in any subsidiary corporation are disregarded and the parent corporation is deemed to own its ratable share of the subsidiary's assets and to conduct its ratable share of the subsidiary's activities;[5255] no special rule applies to a subsidiary partnership.[5256] The parent owns more than 50% of the combined voting power of all classes of stock entitled to vote, or more than 50% in value of all outstanding stock, of a corporation for the parent to be able to treat the corporation as a subsidiary.[5257] If the holding falls below this threshold, then watch out – the parent fails the active business asset test for any period during which more than 10% of the value of its assets (in excess of liabilities) consists of stock or securities in other corporations which are not subsidiaries of such corporation (other than assets described under the "working capital" exception).[5258]

Under the "working capital" exception, active business assets include assets held as a part of the reasonably required working capital needs of a qualified trade or business of the corporation, or held for investment and are reasonably expected to be used within two years to finance research and experimentation in a qualified trade or business or increases in working capital needs of a qualified trade or business.[5259] However, for periods after the corporation has been in existence for at least two years, no more than 50% of the assets of the corporation may qualify as used in the active conduct of a qualified trade or business by reason of this rule.[5260] Be careful not to start the C corporation just accumulating cash for possible business operations, which will disqualify the corporation.[5261] To avoid this issue and for other reasons as

---

(B) activities resulting in the payment or incurring of expenditures which may be treated as research and experimental expenditures under section 174, or

(C) activities with respect to in-house research expenses described in section 41(b)(4),

assets used in such activities shall be treated as used in the active conduct of a qualified trade or business. Any determination under this paragraph shall be made without regard to whether a corporation has any gross income from such activities at the time of the determination.

[5253] Code § 1202(c)(2)(B), referring to an eligible corporation licensed to operate under section 301(d) of the Small Business Investment Act of 1958 (as in effect on May 13, 1993). As to "specialized small business investment company," see part II.Q.7.m Deferring Gain on Sale of Marketable Securities by Investing in a Specialized Small Business Investment Company.

[5254] See part II.Q.7.f.iii Active Business Requirement for Code § 355.

[5255] Code § 1202(e)(5)(A). Code § 1202(d)(3)(A) provides that all corporations which are members of the same parent-subsidiary controlled group shall be treated as one corporation for purposes of the assets test. In determining what is a "parent-subsidiary controlled group," Code § 1202(d)(3)(B) refers to Code § 1563(a)(1), except that:

(i) "more than 50 percent" shall be substituted for "at least 80 percent" each place it appears in section 1563(a)(1), and

(ii) section 1563(a)(4) shall not apply.

[5256] See fns 5268-5270 in part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold.

[5257] Code § 1202(e)(5)(C).

[5258] Code § 1202(e)(5)(B).

[5259] Code § 1202(e)(6).

[5260] Code § 1202(e)(6).

[5261] *Owen v. Commissioner*, T.C. Memo. 2012-21. The court addressed the qualifications of two companies, one of which did not qualify (this footnote) and one of which did qualify (fn. 5247). In discussing why the company was not a qualified small business under Code § 1202 and therefore not well, consider instead starting as an LLC taxable as a partnership then later converting to a corporation.[5262]

A corporation also fails the active business assets test for any period during which more than 10% of the total value of its assets consists of real property which is not used in the active conduct of a qualified trade or business.[5263] In applying the preceding sentence, the ownership of, dealing in, or renting of real property is not treated as the active conduct of a qualified trade or business;[5264] renting the property to the business may be better anyway.[5265]

In applying the active business asset test, rights to computer software which produces active business computer software royalties[5266] are treated as an asset used in the active conduct of a trade or business.[5267]

Although Code § 1202 authorizes qualified small business stock to be held by a partnership[5268] and corporate subsidiaries,[5269] it does not discuss the corporation conducting its business through one or more partnerships. Accordingly, from a planning perspective, I would not recommend having a corporation seeking qualified small business status invest its assets in a partnership. However, if one is asked to advice an owner of a corporation that is already invested in a partnership, I would look to the active business rules for corporate split-ups, which describe when an interest in a partnership constitutes an active business asset.[5270]

---

eligible for a capital gain deferral under Code § 1045 (which rollover is not necessary for newer companies), the court imposed a 20% accuracy-related penalty:

> We also find that the Owens did not act with good faith with respect to the section 1045 transaction. Mr. Owen explained that it was his vision to build up J&L Gems as he had the Family First Companies; yet even as late as 2 years after the money had been deposited in the company, J&L Gems had only 16 pieces of jewelry. Mr. Owen should not in good faith have believed that deferring income tax under section 1045, by operating a business, merely involved depositing a large amount of cash in an account. Nor could he reasonably believe that using less than 8 percent of that cash to purchase inventory and selling only a part of what little inventory he did buy to his friends and coworkers was sufficient to defer the tax. Even under Mr. Owen's understanding of section 1045, that he had to operate the business in good faith and reasonably, he failed to meet that requirement.

In discussing Letter Ruling 202016013, which was a Code § 721(b) ruling, Banoff and Cohen comment:[5271]

> We observe that Section 1202 has (at least at first glance) a similar disconnect between subsidiary corporations and subsidiary partnerships. See Shop Talk, "Is LLC Business Attributed to Corporate Member for Section 1045 Purposes?," 93 *JTAX* 254 (October 2000). In that article, we hypothesized a taxpayer looking to roll over her sales proceeds from the sale of qualified small business stock (QSBS) within the meaning of Section 1045. (Coincidentally, Section 1045 (like the amendment to Section 351(e)) was enacted by The Taxpayer Relief Act of 1997.) Generally, under Section 1045(a), a noncorporate taxpayer may defer the recognition of otherwise taxable gain from the sale of QSBS that was held more than six months prior to the date of sale of the QSBS. In our 2000 Shop Talk article, we asked whether our hypothetical taxpayer could successfully invest those proceeds in a corporation that itself does not conduct a qualified small business but has an interest in a partnership or an LLC that engages in a business that otherwise would satisfy Section 1045 if the business were conducted by the corporation.
>
> Section 1045 defines QSBS by incorporating the definition of QSBS contained in Section 1202. Stock will be treated as QSBS under Section 1202 if, among other things, during substantially all of the period during which the taxpayer holds the stock, the issuing corporation must be engaged in an active trade or business.
>
> In order to satisfy the active business requirement, at least 80% of the issuer's assets (as measured by their FMV) must be used in the active conduct of one or more qualified businesses. A special look-through rule applies when a parent corporation owns stock in a subsidiary corporation that is engaged in a qualified business. Specifically, the parent corporation will be deemed to own a ratable share of the subsidiary's assets and to conduct its ratable share of the subsidiary's activities. Section 1202(e)(5)(A). To get this look-through treatment, the parent corporation must own more than 50% of the combined voting power of all classes of stock or more than 50% of the value of all the outstanding stock of the subsidiary corporation. Section 1202(e)(5)(C).
>
> Can the look-through rule that applies to parent and subsidiary corporations as described in Section 1202(e)(5) be extended to a corporation that owns an interest in a partnership or LLC, for purposes of Section 1202? Todd D. Golub, a Chicago CPA and attorney and author of a then-contemporaneous article on Section 1045 rollovers, provided Shop Talk in our 2000 article with these observations:
>
>> If the corporation is not the sole member and the LLC is taxable as a partnership, the look-through rule applicable to parent-subsidiary corporations on its face does not apply. Further, Section 1045 provides special rules for persons who invest in a flow-through entity that invests in QSBS to obtain the benefits of Section 1045. See also Rev. Proc. 98-48, 1998-2 CB 367, providing further guidance for persons who invest in flow-through entities to get the benefits of Section 1045. Thus, both Congress and the IRS considered the application of the aggregate theory of partnerships when

---

[5271] Shop Talk column, "Section 721(b)-A Partnership Issue, a Corporate Issue, or Just a Jumble?" *Journal of Taxation* (7/2020). For a reproduction of most of Letter Ruling 202016013 and their detailed discussion of it, see text preceding and accompanying fns 3576-3577 in part II.M.3.b Exception: Diversification of Investment Risk.

> enacting Section 1045 but did not extend that theory to the determination of whether the qualified business requirement is met if a corporation invests in an LLC that engages in a qualified business. Thus, this omission may indicate that the look-through rule does not extend to a subsidiary LLC for purposes of Section 1045.
>
> The 1997 Blue Book states at page 58 that Congress enacted Section 1045 with the hope that the deferral benefit would encourage investors to reinvest funds in qualified small businesses, making more capital available to new, small businesses that are important to the long-term growth of the economy. There is no indication of why Congress limited the deferral benefit to investors that provide funds to small businesses that operate only in corporate form. So long as Congress intended to provide such a benefit, there is no apparent reason why it should not be extended to flow-through entities. In fact, by limiting this benefit to parent-subsidiary corporate relationships, Congress actually may have limited the funding that otherwise might be available to businesses that choose not to incorporate.
>
> Accordingly, it would seem that [for purposes of Sections 1045 and 1202] a look-through rule should apply to corporations that have an interest in LLCs or other entities taxed as partnerships that are engaged in a qualified business....
>
> Congress, however, did not go so far as to specifically provide for a look-through rule when a corporation invests directly in an LLC or partnership. So, if one looks solely to the statute [Section 1202], the business of the LLC arguably may not be attributable to the corporate member.

Golub's conclusion in our 2000 Shop Talk article is eerily and equally applicable to the corporate-partnership conundrum discussed in this article with respect to Section 721(b): "One can only hope that future guidance will clarify that the deferral benefit of Section 1045 should apply to the shareholders of corporations that invest directly in qualified businesses regardless of the form of entity that engages in the qualified business."

Golub's plea for guidance under Section 1045 (via Section 1202) published in Shop Talk 20 years ago apparently has gone unheard; there seems to have been no further guidance issued with respect to the attribution of a partnership's or an LLC's trade or business to a corporate member for purposes of Section 1045, notwithstanding strong policy reasons to support that result (just as there are under Sections 721(b) and 351(e)). Moreover, we are unaware of any letter rulings that provide relief to subsidiary partnerships and their corporate partners for purposes of Section 1045. On the other hand, Ltr. Rul. 202016013 (and the two predecessor letter rulings described above) have created a niche where certain qualifying (majority interest) contributors to partnerships would apparently be able to apply a corporate look-through rule to subsidiary partnerships. And these Section 721(b) rulings by analogy may give some (albeit indirect) comfort to taxpayers and practitioners for purposes of Section 1045 that the Service would similarly apply a corporate look-through/attribution rule to subsidiary partnerships for purposes of attributing their trades or businesses to corporate partners holding majority interests in their partnerships.

Special rules apply to certain tax-free transfers.[5272] If a transfer is by gift,[5273] at death, or from a partnership,[5274] the transferee is treated as having acquired such stock in the same manner as the transferor and having held such stock during any continuous period immediately preceding the transfer during which it was held (or treated as held under these rules) by the transferor:[5275]

- Presumably a taxpayer whose stock's value exceeds the cap of the exclusion of gain[5276] by giving the stock to family members, each of whom could sell the stock separately.

- If the transfer is from a partnership, it must be to a partner of stock with respect to which requirements similar to the pass-through rules described above are met at the time of the transfer (without regard to the 5-year holding period requirement).[5277]

If a trust transfers Code § 1202 stock to a beneficiary, does that count as a permitted transfer by gift? Probably so.[5278] However, I am unaware of any authority discussing Code § 1202(h)(2)(A) addressing this issue, so when in planning mode consider trying to avoid distributing the stock.

In a Code § 351 formation of a corporation or a Code § 368 reorganization, if qualified small business stock is exchanged for other stock which would not qualify as qualified small business stock but for this rule, that other stock shall be treated as qualified small business stock acquired on the date on which the exchanged stock was acquired.[5279] Unless the stock treated

---

5272 Code § 1202(h).
5273 See text accompanying fn 5200 regarding gifts to trusts.
5274 Code § 1202(h)(2).
5275 Code § 1202(h)(1).
5276 See fn. 5188.
5277 Code § 1202(h)(2)(C).
5278 The paradigm created by Reg. §§ 1.102-1(b), (c) and 1.663(a)-1(b)(2)(i) is that distributions from trusts are treated as gifts unless they satisfy a requirement to distribute income. See text accompanying fn 2780 in part II.J.8.d.i Distribution in Kind - Generally
5279 Code § 1202(h)(4)(A). Letter Ruling 9810010 applied Code § 1202(h)(4) to a corporate split-up that was partly tax-free under Code §§ 355(a)(1) and 368(a)(1)(D). Letter Ruling 9810010 said that Code § 1202(h)(4)(A) necessarily means:

> Thus, stock received in a section 368 reorganization may be treated as QSBS despite the prohibition in section 1202(c)(1)(B)(i) against stock received in exchange for other stock.

Letter Ruling 9810010 continued:

> In the instant case, the taxpayers have represented that the portion of the Distributing stock given up by A through N in exchange for Controlled stock was qualified small business stock (QSBS) and that Controlled was a qualified small business at the time of the reorganization. As part of the section 368 reorganization, A through N received Controlled stock in exchange for a portion of their Distributing stock and thereafter sold their remaining Distributing stock to FX. Unless the specific shares of Distributing stock exchanged for Controlled stock can be adequately identified by each of the exchanging shareholders, it is assumed pursuant to section 1.1012-1(c)(1) that the Distributing stock exchanged will be charged against the earliest of such lots acquired in order to determine cost or other basis and holding period. This rule also applies in determining whether the Distributing QSBS held by each of the exchanging shareholders at the time of the exchange was among the Distributing stock exchanged for Controlled stock.
>
> Based on the assumption that the portion of the Distributing stock given up by A through N was QSBS in the hands of such shareholders as determined by applying the rules of section 1.1012-1, a portion of the Controlled stock received by such shareholders in exchange therefor will be treated as QSBS acquired on the date the exchanged Distributing QSBS was acquired (section 1202(h)(4)(A)). If the stock exchanged by a Distributing shareholder consists of both

as qualified small business stock by reason of the preceding sentence is issued by a corporation that (as of the time of that transfer) is a qualified small business, Code § 1202 applies to gain from the sale or exchange of stock treated as qualified small business stock by reason of the preceding sentence only to the extent of the gain which would have been recognized at the time of the transfer described in the preceding sentence if Code § 351 or 368 had not applied at that time.[5280]

To the extent provided in regulations, stock in a corporation, the basis of which (in the hands of a taxpayer) is determined in whole or in part by reference to the basis in his hands of stock in such corporation which meets certain requirements or which is received in a reorganization that is a mere change in form in exchange for stock which meets such requirements (and interests in an LLC that elected C corporation taxation qualify as stock),[5281] is treated as meeting such requirements.[5282] For more discussion, see "Section 351 Transactions and Section 368 Reorganizations" in RIA Checkpoint *Catalyst* ¶ 511:114 Original Issuance Requirement within ¶ 511:110 Qualified Small Business Stock: Definition.

If the taxpayer has an offsetting short position with respect to any qualified small business stock, Code § 1202(a) shall not apply to any gain from the sale or exchange of such stock unless the stock was held by the taxpayer for more than 5 years as of the first day on which there was such a short position, and the taxpayer elects to recognize gain as if such stock were sold on

---

> QSBS and non-QSBS, then only a proportionate amount of the Controlled stock received in exchange will be treated as QSBS.

Ruling 12 of Letter Ruling 9810010 held:

> Based solely on the taxpayer's representations that a portion of the Distributing stock owned by A through N was classified as qualified small business stock under section 1202 (Distributing QSBS), a proportionate amount of Controlled stock received by each of A through N in exchange for such individual's Distributing QSBS will be treated as qualified small business stock (section 1202(h)(4)(A)). The holding period for the Controlled stock treated as qualified small business stock under section 1202(h)(4)(A) includes the holding period for which each of A through N held the Distributing QSBS. Further, based on the representation that Controlled was a qualified small business at the time of the reorganization, the limitation in section 1202(h)(4)(B) will not apply.
>
> Ruling (12) only applies to the Controlled stock that was received in exchange for Distributing stock that was QSBS in the hands of the individual shareholders at the time of the exchange. We have not been asked, and we do not address, whether any stock issued by Distributing was qualified small business stock at any time or whether Controlled is a qualified small business within the meaning of section 1202(d).

[5280] Code § 1202(h)(4)(B). Letter Ruling 9810010 noted:

> Section 1202(h)(4)(B) limits the amount of gain that can be excluded under section 1202(a) if the stock constitutes qualified small business stock by virtue of section 1202(h)(4)(A). However, the limitation does not apply if the stock is issued by a corporation that is itself a qualified small business as of the time of the reorganization.

Code § 1202(h)(4)(C) provides:

> *Successive application*. For purposes of this paragraph, stock treated as qualified small business stock under subparagraph (A) shall be so treated for subsequent transactions or reorganizations, except that the limitation of subparagraph (B) shall be applied as of the time of the first transfer to which such limitation applied (determined after the application of the second sentence of subparagraph (B)).

[5281] See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization. Converting a corporation into an LLC taxed as a corporation was such a change. Letter Rulings 201603010-201603014.

[5282] Code § 1202(h)(3), incorporating by reference Code § 1244(d)(2).

such first day for its fair market value.[5283] For purposes of the preceding sentence, the taxpayer shall be treated as having an offsetting short position with respect to any qualified small business stock if the taxpayer has made a short sale of substantially identical property, the taxpayer has acquired an option to sell substantially identical property at a fixed price, or to the extent provided in regulations, the taxpayer has entered into any other transaction which substantially reduces the risk of loss from holding such qualified small business stock; in applying this rule, any reference to the taxpayer is treated as including a reference to any person who is related (within the meaning of Code § 267(b)[5284] or 707(b)[5285]) to the taxpayer.[5286]

II.Q.7.k.iii. Does the Exclusion for Sale of Certain Stock Make Being a C Corporation More Attractive Than an S corporation or a Partnership?

Does the exclusion for the sale of certain stock make being a C corporation more attractive than an S corporation or a partnership? First, we will explore when the sale of such stock has advantages, when the sale does not have advantages, and operational income tax issues.

If and to the extent that the gain on the sale of a business relates to the sale of self-created goodwill, the basis of the ownership interest does not reflect that basis, no matter what kind of entity owns the business. To that extent, the sale of such stock is more favorable than the sale of stock in an S corporation[5287] and the sale for cash of a partnership interest.[5288] However, the seller-financed sale of a partnership interest still produces better results than the sale of such stock.[5289]

In some situations, the exclusion for the sale of certain C corporation stock does not provide any particular advantage, if and to the extent that the owner of a pass-through interest would not have gain on sale. If and to the extent that the sale of the business interest arises from reinvested earnings, the basis of a partnership interest[5290] or stock in an S corporation is increased.[5291] Furthermore, if a pass-through entity redeems only part of one's ownership, the

---

[5283] Code § 1202(j)(1).

[5284] Code § 267(b) is reproduced in part II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses.

[5285] For a description of Code § 707(b), see part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

[5286] Code § 1202(j)(2).

[5287] Compare part II.Q.1.a.i.(c) with part II.Q.1.a.i.(d) (moderate tax states) and part II.Q.1.a.ii.(c) with part II.Q.1.a.ii.(d) (California).

[5288] The sale of a partnership interest for cash generally would have similar dynamics regarding goodwill as the sale of S corporation stock. The sale of a partnership interest would have a slight advantage, in that the goodwill could obtain a basis step-up (part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations and fn. 5677, unless the anti-churning rules apply per part II.Q.1.c.iv Goodwill (and other intangible) Anti-Churning Rules, especially fn. 4175), but amortization would be over a 15-year period under Code § 197 (fn. 5561). Also, amortizing goodwill turns it into a hot asset, reducing opportunities for deferral on its sale; for more information on the sale of goodwill, including disadvantages of goodwill being amortized, see part II.Q.1.c.i Taxation When a Business Sells Goodwill; Contrast with Nonqualified Deferred Compensation.

[5289] See parts II.Q.1.a.i.(g) Partnership Use of Same Earnings as C Corporation (Either Redemption or No Tax to Seller per Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation) in Sale of Goodwill and II.Q.1.a.ii.(g) Partnership Use of Same Earnings as C Corporation – Redemption (California).

[5290] Code § 705. However, as described in part II.Q.8.e.ii.(a) Unitary Basis, a partner does not have the flexibility of a shareholder to pick and choose which shares to sell.

[5291] Code § 1367, which is reproduced in part II.G.4.d.i Basis Limitation Generally.

reinvested earnings might offset part or all of the gain on the sale – perhaps even that attributable to self-created goodwill.[5292]

Furthermore, the exclusion is available only for qualified stock that is issued, gifted, or bequeathed to the taxpayer,[5293] making it unavailable to subsequent purchasers of the stock. Some states, such as California,[5294] do not recognize the exclusion. Also, during substantially all of the taxpayer's holding period for the qualified small business stock, the corporation must use at least 80% (by value) of its assets in the active conduct of one or more qualified trades or businesses and be an eligible corporation.[5295] No rules explain how often one must evaluate the company's assets to see whether they satisfy that test; presumably testing whenever the qualified small business stock is issued[5296] and annually[5297] would suffice, to inject some reasonableness into the statute, but I am unaware of any authority addressing how frequently the corporation must evaluate its assets and their use to help its shareholders prove this element.

A stock sale tends to have a lower sale price than an asset sale, due to buyer's concerns about assuming undisclosed or unseen liabilities and perhaps not receiving a basis step-up in the corporation's assets. Because buyers want to depreciate or amortize business assets or may later sell them, buyers like to obtain a new basis in the entity's assets when they buy an interest in an entity. See Part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations. This is especially important when an entity sells only a business line,[5298] rather than the entire business. Therefore, many business sales are actual or deemed asset sales; for the latter, see part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold. When the entity sells all of its assets, it might as well liquidate to take full advantage of the exclusion on the gain on sale of the stock and let the shareholders move the sale proceeds outside of a potentially risky business environment.[5299]

[5292] For S corporations, see part II.Q.7.b.i Redemptions or Distributions Involving S corporations - Generally, especially fns. 4874-4876. Of course, the basis resulting reduction basis reduces the ability to take distributions and increases future gains on the sale of the stock, the latter which might not be of concern if and to the extent the stock receives a new basis on the shareholder's death. See part II.H.9 Basis Step-Up In S Corporations That Had Been C Corporations.
For partnerships, see part II.Q.8.b Partnership Redemption or Other Distribution.
[5293] See various requirements described in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.
[5294] Cal. Rev. & Tax. Cd. § 18152.5(n).
[5295] See text accompanying fns 5250-5251 in part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold.
[5296] An example of what purported evidence does not work is described in fn 5240 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.
[5297] A taxpayer who did not even come close to hitting the target of investing cash quickly enough is in fn 5261 in part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold.
[5298] One cannot easily divide a business tax-free, sell a business line, and liquidate the corporation owning just that business lines. See part II.Q.7.f.ii Code § 355 Requirements.
[5299] See part II.F.2 Asset Protection Benefits of Dissolving the Business Entity After Asset Sale. Levun's article, cited at fn. 5320, comments:

> Note that the receipt of liquidation proceeds after a corporate asset sale also qualifies for the QSBC exclusion. However, because of the corporate-level tax exacerbated by the lack of a corporate capital gains rate, the scales would still tip in favor of flow-through taxation, notwithstanding no tax due on liquidation. In other words, assume all an entity owns is zero-basis

Until the 21% federal corporate income tax rate increases, a C corporation selling business assets tends to use a lower rate than does a pass-through entity. The latter generates income taxed at higher rates:

- Any equipment, amortizable (purchased) Code § 197 intangibles (including goodwill),[5300] certain intellectual property,[5301] and various other property[5302] is subject to taxation at high ordinary income tax rates. See part II.G.6.b Code § 1245 Property. Although ordinary income from the sale of business assets may be qualified business income eligible for the 20% deduction under Code § 199A, [5303] not all businesses qualify,[5304] and even those that do often won't be able to take advantage of large income from such sales because the deduction is limited to a formula based on wages paid, with possible adjustments for depreciable property held at the end of the year.[5305]

- Depreciable real estate may also trigger capital gain tax on depreciation recapture at higher rates.[5306] Also, if and to the extent that selling business assets generated a prior Code § 1231 ordinary loss, later gain from selling business assets is taxed as ordinary income instead of capital gain.[5307]

I am a big fan of partnerships, as described in part II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and diagrammed in part II.E.6 Recommended Partnership Structure – Flowchart, after starting more simply as an LLC as described in part II.E.3 Recommended Structure for Start-Ups. Partnerships that are not capital-intensive are great candidates for avoiding any tax on the seller-financed sale of a partnership interest;[5308] that tool tends to apply to a sale to management or other owners, who care more about paying over time, in a manner than devotes less earnings to the buy-out, than they care about inside

---

> self-created goodwill having a value of $1 million. In the case of an asset sale as an LLC, there would be federal tax due of $200,000 (assuming a 20-percent maximum capital gains rate). In the case of the same asset sale by a QSBC, while there would be no shareholder tax on the liquidation of the corporation, the corporate entity-level federal tax burden would be $340,000 (or tax at a 35-percent rate, to the extent the corporation has taxable income in excess of $10 million).

The reference to a 35% tax rate was before 2017 tax reform lowered the corporate tax rate.

[5300] Goodwill and other intangibles are not amortized and therefore not subject to this rule when they are self-created. When a business buys such assets, then they are amortizable. For how these rules work, see part II.G.18.d Amortization of Code § 197 Intangibles.

[5301] See parts II.G.18.b Sale or Exchange of Intellectual Property - Capital Gain vs. Ordinary Income and II.G.18.c Patents (the latter being subject to the former).

[5302] Various assets that are not capital assets, such as inventory (see Code § 1221(a), reproduced in fn 6914 in part III.B.2.j.iii.(e) Allocation of Specific Items), and assets triggering the assignment of income, such as cash basis accounts receivable, are among them. For certain assets held by a partnership, see part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

[5303] See part II.E.1.c.ii Types of Income and Activities Eligible or Ineligible for Deduction.

[5304] See part II.E.1.c.iv Specified Service Trade or Business (SSTB) If Taxable Income Exceeds Certain Thresholds.

[5305] See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.

[5306] See fn 1495 in part II.G.6.a Code § 1231 Property. If and to the extent accelerated depreciation applied, beware of ordinary income treatment under part II.G.6.b Code § 1245 Property.

[5307] See text accompanying fn 1497 in part II.G.6.a Code § 1231 Property.

[5308] See parts II.Q.1.a.i.(g) Partnership Use of Same Earnings as C Corporation (Either Redemption or No Tax to Seller per Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation) in Sale of Goodwill and II.Q.1.a.ii.(g) Partnership Use of Same Earnings as C Corporation – Redemption (California).

basis step-up. Furthermore, the death of a partner or sale or other qualified transfer of a partnership interest generates a new basis in the partnership's assets attributable to the relevant partnership interest; see part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000.

Furthermore, if one decides that a C corporation structure is ultimately desirable, one might consider instead starting as an LLC taxable as a partnership or sole proprietorship, which enables start-up losses to be deducted more easily anyway;[5309] then, if one determines that a C corporation is the ideal structure, convert[5310] to a qualified small business corporation[5311] the earlier of five years before a sale is anticipated or shortly before the $50 million gross asset limitation is exceeded.[5312] Factors when considering this strategy include:

- The delay in forming the corporation can help avoid being disqualified for not deploying start-up capital quickly enough.[5313]

- During this initial operating period, the owners could build value in the business, and the greater of value or basis of the partnership's assets when it converts to a C corporation is used in computing the exclusion of ten times the investment.[5314] This is a double-edged sword in that any value in excess of basis (in other words, built-in gain) at the time of the conversion is not eligible for the exclusion.[5315]

- The ability to deduct start-up losses may be good or bad, depending on whether the owner is in a high or low tax bracket. See part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good. If the taxpayer is in a high tax bracket, then consider taking bonus

---

[5309] See part II.G.4 Limitations on Losses and Deductions; Loans Made or Guaranteed by an Owner, especially part II.G.4.f Comparing C Corporation Loss Limitations to Those for Partnership and S Corporation Losses.

[5310] See part II.P.3.c Conversions from Partnerships and Sole Proprietorships to C Corporations or S Corporations. One might simply file Form 8832 to elect corporate taxation, assign the LLC to a corporation, or convert or merge the LLC into a corporation. As to the former, Letter Ruling 201636003 held:

> While ownership of a corporation is normally tied to stock ownership, and under state law LLC owners hold a member interest and not formal stock, the term "stock" for federal tax purposes is not restricted to cases where formal stock certificates have been issued. Rather, it has been consistent Service position that for federal tax purposes stock ownership is a matter of economic substance, *i.e.*, the right to which the owner has in management, profits, and ultimate assets of a corporation. The presence or absence of pieces of paper called "stock" representing that ownership is immaterial. See Rev. Rul. 69-591, 1969-2 C.B. 172.
>
> Therefore, based on the facts and representations submitted, we rule that the Corporation stock meets the definition of qualified small business stock under §§§ 1202(c), 1202(f) and 1202(h).

[5311] See part II.P.3.c Conversions from Partnerships and Sole Proprietorships to C Corporations or S Corporations.

[5312] See fn. 5238.

[5313] See part II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold, especially the text accompanying fns. 5259-5261.

[5314] See part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation, especially fns. 5190-5198.

[5315] See paragraph of text accompanying fn. 5198 in part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.

depreciation[5316] and generating a high-tax-rate deduction now, then paying tax at a lower rate when the assets are sold after conversion to C corporation taxation.

- If the entity accumulates debt in excess of basis, forming the corporation might be a taxable event.[5317]

- Before converting to ***a*** qualified small business corporation, consider whether the LLC might divide into separate entities, each of which conducts a separate business,[5318] and then each separate business would become its own qualified small business corporation with a separate limitation on the amount of gain that is excluded. That may also help stay under the $50 million gross asset limitation for each corporation.

For a case study on converting a partnership to a C corporation to accommodate a venture capital firm's desire for this exclusion, whether converting to a C corporation is a good idea, the Code § 1045 rollover, and issues facing recipients of profits interests on conversion,[5319] see Levun, "Using Partnerships to Leverage "Zero-Tax" Code Sec. 1202 Stock."[5320]

II.Q.7.k.iv. Code § 1045 Rollover of Gain from Qualified Small Business Stock (QSBS) to Another QSBS

Code § 1045 allows a taxpayer to roll over the gain into new qualified small business stock.[5321]

[5316] See part II.G.5 Code § 179 Expensing Substitute for Depreciation; Bonus Depreciation, especially part II.G.5.b Bonus Depreciation.
[5317] See parts II.M.2.b Initial Incorporation: Effect of Assumption of Liabilities and II.M.2.c Contribution of Partnership Interest to Corporation.
[5318] See part II.Q.8.d Partnership Division.
[5319] See part II.M.4.f Issuing a Profits Interest to a Service Provider. Levun, fn. 5320, points out:

> As a final observation, and somewhat of a frolic and detour, let's assume that the LLC being discussed in this column had a service provider that had been previously admitted as a partner (either by reason of (1) having received a fully vested LLC interest, (2) having received a profits interest subject to a substantial risk of forfeiture but for which the requirements of Rev. Proc. 2001-43, 2001-2 CB 191, had been satisfied or (3) having received a capital interest subject to a substantial risk of forfeiture for which a timely Code Sec. 83(b) election had been made. Also assume that, as part of the incorporation transaction contemplated above (to obtain QSBC stock), the service provider was required to agree to a substantial risk of forfeiture with respect to the C corporation stock he was now obtaining in the LLC to C corporation conversion transaction. Rev. Rul. 2007-49, 2007-2 CB 237, would require that a Code Sec. 83(b) election be made in order for the service partner to be treated as a shareholder in the corporation. This revenue ruling provides that the transfer of vested stock in exchange for nonvested stock in a tax-free corporate reorganization requires a Code Sec. 83(b) election in order for the service provider to be considered the tax owner of the shares received in the reorganization. While the revenue ruling addresses a tax-free reorganization under Code Sec. 368(a), there is no reason to believe that the result would be any different in a Code Sec. 351 transaction. Note that making a Code Sec. 83(b) election does not result in any tax to the service provider, as under the principles contained in Rev. Rul. 2007-49, the service provider would be considered to have paid an amount for the QSBC stock equal to its fair market value.

[5320] *Partnership Tax Watch Newsletter* (Current), No. 349, PARTNERSHIP TAX PLANNING and PRACTICE 11/22/2016, saved as Thompson Coburn LLP document no. 6486765.
[5321] Rev. Proc. 98-48 explains how to elect Code § 1045 deferral, the deadline for which may be extended using Reg. § 301.9100-3 relief (*see*, *e.g.*, Letter Ruling 201650010). Reg. § 1.1045-1 provides rules for partnerships and supersedes Rev. Proc. 98-48 to that extent (see T.D. 9353 8/14/2007). Letter

In the case of any sale of qualified small business stock held for more than 6 months[5322] by a taxpayer other than a corporation and with respect to which the taxpayer elects to apply Code § 1045, gain from the sale is recognized only to the extent that the amount realized on such sale exceeds the cost of any qualified small business stock (QSBS) purchased by the taxpayer during the 60-day period beginning on the date of such sale, reduced by any portion of that cost previously taken into account under Code § 1045.[5323]

Code § 1045 does not apply to any gain which the Code treats as ordinary income.[5324]

QSBS has the meaning given such term by Code § 1202(c). See various explanations under other subparts of this part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation. However, only the first 6 months of the taxpayer's holding period for the stock referred to in Code § 1045(a)(1) are taken into account for purposes of applying Code § 1202(c)(2).[5325]

A taxpayer is treated as having purchased any property if, but for Code § 1045(b)(3), the unadjusted basis of such property in the hands of the taxpayer would be its cost (within the

---

Ruling 202244004 granted an extension of time until 60 days after the ruling to file an amended return to make a section 1045 election under Rev. Proc. 98-48, using the following reasoning:

> Taxpayer in this case has represented that it requested relief before the failure to make the regulatory election was discovered by the Service and that it failed to make the election because Taxpayer did not receive necessary K-1s to file his Year 1 return by the extended due date for Year 1. Thus, under sections 301.9100-3(b)(1)(i) and (ii), Taxpayer will be deemed to have acted reasonably and in good faith. Taxpayer has also represented that none of the circumstances listed in section 301.9100-3(b)(3) apply…
>
> … the interests of the government are not prejudiced in this case. Taxpayer has represented that granting relief would not result in a lower tax liability in the aggregate for all taxable years affected by the election than Taxpayer would have had if the election had been timely made (taking into account the time value of money). Furthermore, Taxpayer has represented that the taxable year in which the regulatory election should have been made and any taxable years that would have been affected had it been timely made, are not closed by the period of assessment.

[5322] Code § 1045(b)(4)(A) provides, "the taxpayer's holding period for such stock and the stock referred to in subsection (a)(1) shall be determined without regard to section 1223."

[5323] Code § 1045(a).

[5324] Code § 1045(a).

[5325] Code § 1045(b)(4)(B). Code § 1202(c)(2), "Active business requirement; etc.," provides:

> (A) *In general*. Stock in a corporation shall not be treated as qualified small business stock unless, during substantially all of the taxpayer's holding period for such stock, such corporation meets the active business requirements of subsection (e) and such corporation is a C corporation.
>
> (B) *Special rule for certain small business investment companies*.
>
> (i) *Waiver of active business requirement*. Notwithstanding any provision of subsection (e), a corporation shall be treated as meeting the active business requirements of such subsection for any period during which such corporation qualifies as a specialized small business investment company.
>
> (ii) *Specialized small business investment company*. For purposes of clause (i), the term "specialized small business investment company" means any eligible corporation (as defined in subsection (e)(4)) which is licensed to operate under section 301(d) of the Small Business Investment Act of 1958 (as in effect on May 13, 1993).

As to "specialized small business investment company," see part II.Q.7.m Deferring Gain on Sale of Marketable Securities by Investing in a Specialized Small Business Investment Company.

meaning of Code § 1012).[5326] Code § 1045(b)(3) uses the deferred gain to reduce the basis of any QSBS the taxpayer buys during the 60-day rollover period.

II.Q.7.l. Special Provisions for Loss on the Sale of Stock in a Corporation under Code § 1244

An individual[5327] may deduct the first $50,000 of loss[5328] on the sale of "section 1244 stock" as an ordinary loss, rather than a capital loss.[5329]

"Section 1244 stock" is stock of a domestic corporation if:[5330]

- at the time such stock is issued, such corporation was a small business corporation,
- such stock was issued by such corporation for money or other property (other than stock and securities), and
- such corporation, during the period of its five most recent taxable years ending before the date the loss on such stock was sustained, derived more than 50% of its aggregate gross receipts from sources other than royalties, rents, dividends, interests, annuities, and sales or exchanges of stocks or securities.

The corporation cannot be capitalized with more than $1 million adjusted basis of assets.[5331]

Although it applies to the sale of stock in an S corporation, it might not provide much of a benefit, as often such a loss arises from loss due to operations and therefore was already deducted as a loss on the K-1 issued to the shareholder each year. Similarly, this provision might not provide much of a benefit when choosing whether to be taxed as a corporation instead of a partnership, as often such a loss arises from loss due to operations and therefore was already deducted as a loss on the K-1 issued to the partners each year. Furthermore, S corporation shareholders and partners in a partnership would likely obtain a current deduction for such losses, rather than having to wait until their ownership is disposed of, and they would not be required to jump through any statutory hoops similar to Code § 1244 to obtain the ordinary loss deduction. For more information on the concepts described in this paragraph, see part II.G.4 Limitations on Losses.

[5326] Code § 1045(b)(2).
[5327] Trust, estates, and corporations are not eligible for this treatment. Code § 1244(d)(4); see Part II.J.11.b Code § 1244 Treatment Not Available for Trusts. Individuals may deduct losses flowing through partnerships if the partnerships were the original owners, and corporations may not claim this benefit. Reg. § 1.1244(a)-1(b)(2).
[5328] $100,000 if married filing jointly. Code § 1244(b).
[5329] Code § 1244(a).
[5330] Code § 1244(c).
[5331] Code § 1244(c)(3).

II.Q.7.m. Deferring Gain on Sale of Marketable Securities by Investing in a Specialized Small Business Investment Company

Generally, an individual may defer $50,000 or a corporation may defer $250,000 of gain on the sale of any publicly traded securities by reinvesting in a specialized small business investment company (SSBIC).[5332]

An SSBIC is any partnership or corporation licensed by the Small Business Administration under section 301(d) of the Small Business Investment Act of 1958 as in effect on May 13, 1993.[5333] That provision authorizes the licensing of small business investment companies organized to invest in small business concerns in such a way as to facilitate ownership by persons whose participation in the free enterprise system has been hampered by social or economic disadvantages.[5334]

II.Q.7.n. Selling Stock to an Employee Stock Ownership Plan (ESOP)

Code § 1042 defers the gain on the sale of stock to an ESOP. If the corporation is an S corporation, the deferral election may be made with respect to not more than 10% of the amount realized on such sale.[5335]

Under Code § 1042(e), qualified replacement property (QRP) is certain stock purchased with the proceeds of a sale of stock to an employee stock ownership plan (ESOP); this purchase allows the seller to defer gain on the sale, which deferred gain reduces the QRP's basis. Code § 1042(e) requires the deferred gain to be recognized if the seller later disposes of the QRP. Code § 1042(e)(3)(C) provides that a gift does not count as a Code § 1042(e) disposition. Divorce counts as such a gift; see part II.O.2.b Divorce – Income Tax Issues Relating to Buy-Sell Agreements.

II.Q.7.o. Reorganizing to Sell a Business That Is Less Than All of a Corporation's Assets

Suppose a business is being sold, and the corporation has nonoperating assets or other businesses that are not part of the sale.

Generally, the shareholders should form a new corporation with identical ownership, making the original corporation be a wholly owned subsidiary, with the original corporation contemporaneously being converted into an LLC that is treated as a disregarded entity for income tax purposes. This is a tax-free reorganization, with the LLC keeping its original tax ID and the new corporation getting its own tax ID but inheriting the old corporation's income tax attributes; see part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

Then the LLC can distribute to the parent whatever assets the corporation intends to keep. Generally, this presents less tax risk than keeping the old corporation's corporate status; see part II.P.3.a From Corporations to Partnerships and Sole Proprietorships.

[5332] Code § 1044.
[5333] Code § 1044(c)(3).
[5334] Federal Tax Coord. 2d ¶ I-3794.
[5335] Code § 1042(h).

If the parent is a C corporation, consider making an S election, converting to an LLC taxed as a partnership, or liquidating. See parts II.E.2 Comparing Exit Strategies from C Corporations and Pass-Through Entities and II.P.3.b Conversion from C Corporation to S Corporation.

I prefer not to keep liquidity from the sale in corporate format, because the owners may want different investment and distribution strategies, and separating a partnership is very likely to be much less painful than separating a corporation; compare part II.Q.7 Exiting from or Dividing a Corporation to part II.Q.8 Exiting From or Dividing a Partnership, being sure to read the FULL TABLE OF CONTENTS before diving into it. In most cases, I would prefer to move to partnership income taxation of nonbusiness assets as soon as we can, unless a significant owner has a relatively short life expectancy and the owners are willing until that person's death to liquidate; generally, one would convert to an S corporation and wait until at least 5 years after the S election to liquidate; especially consider parts II.P.3.b.ii Built-in Gain Tax on Former C Corporations under Code § 1374, II.P.3.b.iii Excess Passive Investment Income (may need to invest 3% of portfolio in oil & gas) and II.P.3.b.iv Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds.

II.Q.8. Exiting From or Dividing a Partnership

See part II.Q.8.e.vi Required Documentation to Avoid Withholding on Sale or Redemption of Partnership Interest.

Below, a few themes emerge:

- Exiting a partnership in exchange for a portion of the partnership's assets can be a nontaxable event, in which the exiting partner's basis is reallocated among the distributed assets.[5336]

- Seller-financed redemptions for cash can save a level of capital gain tax, and the buyer and seller can come out ahead, if structured properly.

- If a partner contributes property with a basis not equal to its fair market value, and that partner or that property leaves the partnership within seven years of the contribution, beware of the tax effects!

Contrasting partnership and corporate tax-free divisions:

- A partnership division does not require a business purpose to be nontaxable, but a corporate division does. Generally, a partnership division is not taxable.[5337]

- Contrast a seven-year waiting period for partnership distributions (other than divisions) described further below with a five-year waiting period for corporate divisions. However, the waiting periods are for different reasons! In partnerships, it is to account for contributed property. In corporations, it is to make sure business activities are conducted continuously for at least five years.

[5336] See Abrams, Now You See It; Now You Don't: Exiting a Partnership and Making Gain Disappear, *TM Memorandum* (2/16/2009).

[5337] Reg. § 1.708-1(d).

Generally, the parties can designate whether a transaction constitutes a sale between partners or a redemption by the partnership.[5338]

See also part II.P.3.f Conversions from Partnership to Sole Proprietorships and Vice Versa.

Resources available to IRS examiners include those in part II.G.2.e IRS Practice Units.

II.Q.8.a. Partnership as a Master Entity

II.Q.8.a.i. Partnership Rules Allowing Basis Shifting

Partnerships provide the opportunity to shift basis from one asset to another, which can be helpful when it appears that a low basis asset will be sold; see part II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property.[5339]

However, the partnership needs to be properly seasoned, which generally means at least 7 years from the time that property is contributed to the partnership until the time property is distributed.[5340] Changes in or issuances of partnership interests when the partnership has property with basis different from fair market value can also bring this 7-year waiting period into play.[5341]

If one has considerable marketable securities that one would like to be in a partnership, one should consider placing them in a partnership that has no business assets.[5342] Although the strategy described in this part II.Q.8.a is not geared toward marketable securities, if the estate is large enough then one might consider dividing the marketable securities into a few partnerships that move in different directions and using a series of rolling, asset-splitting GRATs to shift value to the next generation.[5343] This might be a good strategy for the cash generated from an equity-stripping transaction designed to obtain a basis step-up on real estate with minimal estate tax cost.[5344]

5338 Letter Ruling 9715008 (respecting the form of a sale between partners). The ruling relied on *Foxman v. Commissioner*, 41 T.C. 535, 551 (1964) (treating a transaction as a sale between partners), aff'd 352 F.2d 466 (3d Cir. 1965) and also cited *Cooney v. Commissioner*, 65 T.C. 101, 109 (1975) (treating a transaction as a redemption).

5339 Paul S. Lee of Northern Trust has been exploring this idea and has called this the mother ship partnership.

5340 See part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

5341 See text accompanying fn. 5444, which is part of the link from fn. 5340.

5342 Distributions of marketable securities from a partnership might be a taxable transaction. See parts II.Q.8.b.i.(a) Code § 731: General Rule for Distributions (distributions from a partnership generally do not generate income tax) and II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them) (special rules taxing such distributions). See particularly text accompanying fn. 5383 et. seq.

5343 See part III.B.2.b General Description of GRAT vs. Sale to Irrevocable Grantor Trust, especially the text accompanying fn. 6504.

5344 See part II.H.10 Extracting Equity to Fund Large Gift. This strategy requires leveraging and maintaining a security interest in loan proceeds, and placing different baskets of marketable securities into separate LLCs (that start as single member LLCs but sooner or later become taxed as partnerships)

The basis shifting opportunity might work best when few assets are involved. Furthermore, generally it requires a Code § 754 election to be in effect, and such an election requires record-keeping that is often quite complex.[5345] Thus, one might consider dividing the partnership and making the Code § 754 election only with respect to the property involved in the basis shifting strategy.[5346]

Various basis stripping strategies involve plays on differences between outside basis and inside basis.[5347] A transfer of a partnership interest allocates basis according to the value of the transferred interest, rather than according to the proportion of rights to income, distributions, etc.[5348]

One might consider having any marketable securities be held in their own partnership that qualifies as an "investment partnership." See part II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them).

Also, note that certain assets are not conducive to non-pro rata distributions of property. See part II.Q.8.b.i.(g) Code § 751 – Hot Assets. To the extent practicable, one might consider holding such assets in a separate partnership and leasing them to the businesses they serve.[5349] Consider the effect, if any, this isolation of leasing activity might have on the passive loss rules and the 3.8% net investment income tax.[5350]

Similarly, consider whether consolidating assets inside of a partnership affects the passive loss grouping rules,[5351] which impact not only the use of passive losses and credits but also the 3.8% tax on net investment income.[5352]

Check to see whether the applicable jurisdiction imposes fees or taxes on partnerships or LLCs.[5353]

---

can facilitate maintaining this security interest. See part II.H.10.d Maintaining the Security Interest in the Loan Proceeds If Using a Donee Guarantee.

[5345] See generally part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000.

[5346] See part II.Q.8.d Partnership Division, especially fn. 5578 (division should result in identical percentage interests before and after the division for each partnership).

[5347] For an example, see part II.Q.8.e.iii.(a) Illustration of Inside Basis Issue. For a more generic description of inside basis and outside basis, see my blog article, "Tax basis: The key to reducing gain on sale or deducting asset purchases," at http://www.thompsoncoburn.com/insights/blogs/business-succession-solutions/post/2017-01-10/tax-basis-the-key-to-reducing-gain-on-sale-or-deducting-asset-purchases.

[5353] For example, New York City imposes a 4% tax on unincorporated business organizations.

II.Q.8.a.ii. Caution When Using Master Entity If Liquidity Needed to Pay Estate Tax

Estate tax generated by business interests can be deferred. Obtaining a deferral for a year or two does not require any special structuring.[5354] Obtaining longer deferrals requires the right structure and involves more uncertainty with partnerships than with corporations.[5355]

If one places assets in a master partnership, consider whether those might affect the owner's estate's ability to make a Code § 6166 to defer estate tax if the owner has insufficient liquidity.[5356] If the partnership is merely a holding entity and does not itself engage in business activity, it might be considered a nonbusiness asset ineligible for such an election.[5357]

II.Q.8.a.iii. Examples of Using Partnership to Shift Basis

II.Q.8.a.iii.(a). Applying Outside Basis to Very Low Inside Basis

Each of A, B, and C invests $500 in a partnership that uses its $1,500 capital to buy land: Parcel X for $100 and Parcel Y for $1,400.

Parcel X grows in value to $900, and Parcel Y increases in value to $1,800. Thus, the partnership's assets are worth $2,700 ($900 plus $1,800). Thus, ignoring valuation adjustments, each partner's interest is worth $900 ($2,700 divided by 3).

The partnership distributes Parcel X to C in liquidation of C's partnership interest. C's $500 basis is applied to Parcel X, increasing its basis from $100 to $500.

If a Code § 754 election is not in place, then Parcel Y's basis does not change.

Although as a group the partners have managed to increase the real estate's tax basis, C did not get a great deal. If C sells Parcel X, C recognizes a $400 gain ($900 value minus its new $500 basis). If the partnership had sold Parcel X, the $800 gain ($900 value minus $100 basis before the distribution), then each partner (including C) would recognize a $267 gain ($800 divided by 3). Thus, C would pay tax on $133 more gain ($400 minus $267) than if the partnership had not distributed Parcel X. On the other hand, C is relieved of responsibility for $133 gain inherent in Parcel Y ($1,800 value minus $1,400 basis equals $400 gain; $400 gain divided by 3 partners equals $133).

II.Q.8.a.iii.(b). Basis Stripped from Distributed Property and Applied to Remaining Property

Each of D, E, and F contributes $200 to a partnership, which uses its $600 contributions to buy land: $200 for Parcel M and $400 for Parcel N. Parcel M increases in value to $400, and Parcel N decreases in value to $200. The partnership distributes Parcel N to F in redemption of F's partnership interest. Parcel N's basis is reduced to F's $200 basis, which is a $200 ($400 basis inside the partnership minus $200 in F's hands) basis reduction. If the

[5355] See part III.B.5.e.ii Code § 6166 Deferral.
[5356] See part III.B.5.e.ii Code § 6166 Deferral, especially part III.B.5.e.ii.(a) What is a Business?
[5357] Code § 6166(b)(9). Although Code § 6166(b)(8) provides special rules making corporate holding companies eligible, it does not apply to partnership holding companies. For more details, see fn. 7088.

partnership has a Code § 754 election in place, the $200 basis that is stripped from Parcel N is added to the basis of Parcel M, which is increased from $200 to $400.

II.Q.8.a.iii.(c). Basis Stripped from New Property and Applied to Existing Property

Each of G, H, and I contributes $100 to a partnership, which buys Parcel T (raw land) for $300. Parcel T's value increases to $900, and the partners take advantage of this value increase by causing the partnership to borrow $600 (which is $200 debt per partner) and distribute that $600 equally to G, H and I ($600 divided by 3 equals $200 distribution each), resulting in each having a capital account of -$100 ($100 initial contribution minus $200 distribution), which also happens to equate to $100 debt in excess of basis ($200 share of debt minus $100 original capital contribution). Note that each partner's share of Parcel T's unrealized appreciation is $200, which is $600 ($900 value minus $300 basis) divided by 3.

The partnership borrows $300 to buy Parcel U (raw land) for $300. Parcel U retains its value. Thus, the partnership's net value continues to be $300, which is the excess of the $1,200 values of Parcels T ($900) and U ($300) over the partnership's debt of $900 ($600 on Parcel T and $300 on Parcel U).

The partnership distributes Parcel U to G to redeem G's partnership interest. G assumes $200 of the debt on Parcel U, and the partnership shifts $100 of the debt on Parcel U to Parcel T. Thus, G receives $100 net value ($300 value of Parcel U minus $200 debt assumed). The basis of G's partnership interest before the distribution was $200, consisting of $100 original contribution plus $300 debt (1/3 of the partnership's $900 debt before distribution) minus $200 prior cash distribution. On the distribution, G assumed $200 of debt and was relieved of $300 of debt, for a net reduction in debt of $100. This $100 net debt reduction is treated as a $100 cash distribution. Thus, the basis of G's partnership interest after the distribution is $100 ($200 basis before distribution minus $100 deemed distribution), and G recognizes no gain or loss on the redemption on G's partnership interest. After the redemption:

- Parcel U's basis is reduced from its original $300 to the $100 basis of G's partnership interest. This $200 basis strip ($300 original basis minus $100 remaining basis) from Parcel U will be applied to increase the partnership's basis in Parcel T from its initial $300 to a new $500 if the partnership has a Code § 754 election in effect.

- G winds up with Parcel U with a $300 value, $100 basis, and a $200 debt. Thus, the net value of G's position is $100 ($300 value minus $200 debt). Before the redemption, G had net debt in excess of basis of $100; after the redemption, G continues to have $100 debt in excess of basis ($200 debt minus $100 basis in Parcel U).

- The partnership has Parcel T with $900 value, $500 basis, and $700 debt ($600 from the original borrowing and $100 from Parcel U). Thus, the partnership has property with $400 value in excess of basis ($900 value minus $500 basis), which is $200 value in excess of basis per partner ($400 divided by 2 partners), the same as before the redemption. Furthermore, the partnership has $200 debt in excess of basis ($700 debt minus $500 basis), which translates to each partner having $100 debt in excess of basis ($200 divided by 2 partners).

Has the partnership made a disguised sale of Parcel U to G? See Reg. § 1.707-6(b)(2).

II.Q.8.a.iii.(d). Basis Shift When Parent Owns Large Majority

Parent owns 98%, Son owns 1%, and Daughter owns 1% of a partnership. The partnership has land that the partnership previously bought that has $100 value and $100 debt, so the partnership has net equity of zero and each partner's interest is worthless. Based on prior distributions that zeroed out everyone's basis, Parent is allocated $98 debt in excess of basis, and each of Son and Daughter is allocated $1 debt in excess of basis ($2 total).

Partnership plans to sell the property would result in $98 gain to Parent, $1 gain to Son, and $1 gain to Daughter.

Instead, Parent contributes $25 to the partnership, which the partnership uses, together with $100 of additional borrowing to buy Parcel Q (land) for $125.

The partnership then redeems Parent, distributing Parcel Q and its associated $100 debt to Parent. Parent's basis in Parent's partnership interest before the redemption was $123, which comes from $98 original debt plus $98 new debt (98% of the $100 borrowed to buy Parcel Q) plus $25 contributed toward the purchase of Parcel Q minus $98 prior distributions. In the redemption, Parent assumed the $100 debt but was relieved of Parent's $196 ($98 original debt plus $98 new debt) share of liabilities before the redemption, the basis of Parent's partnership interest decreased by $96 ($196 liabilities relieved minus $100 liabilities assumed) to $27 ($123 minus $96). Thus, Parcel Q's basis deceases from its original $125 basis to $27 (the basis of Parent's partnership interest), a $98 reduction in basis. If the partnership has a Code § 754 election in place, this $98 basis strip from Parcel Q translates into a $98 increase in the basis of the original land.

After the redemption, each of Son and Daughter owns one half of the partnership. The partnership has the original land, with a value of $100, basis of $98, and liabilities of $100. When Parent was redeemed, Son and Daughter assumed the partnership's original debt, so their share of liabilities increases by $98 from $2 combined to $100 combined. Their basis increases correspondingly, so that, instead of having $2 debt in excess of basis, they have $98 debt in excess of basis ($100 liabilities allocated minus $2 prior distributions).

Thus, when the partnership sells the original property for $100, the partnership recognizes a $2 gain ($100 proceeds minus $98 basis), the same $2 gain that would have been allocated to Son and Daughter if Parcel Q had never come into the picture.

The difference is in Parent's treatment. Parent would have been allocated $98 gain before Parcel Q came into the picture. Now, Parent does not pay any tax on the sale of the original land. Instead, the basis of Parcel Q has been reduced by $98 because of the redemption. If Parent holds Parcel Q until death, Parcel Q's unrealized gain is wiped out by a basis step-up.

II.Q.8.b. Partnership Redemption or Other Distribution

II.Q.8.b.i. Distribution of Property by a Partnership

Distributions to a partner may be taxable under Code §§ 731, 704(c)(1)(B), and 737.[5358] After the parts describing Code § 731 are the discussions of the other two sections, followed by part II.Q.8.b.i.(d) Capital Accounting May Trigger Ordinary Income.

II.Q.8.b.i.(a). Code § 731: General Rule for Distributions

Partnership distributions of property are usually tax-free to both the partnership and the partner under Code § 731(a) and (b), whether current distributions or liquidating distributions.[5359]

A loan from a partnership to a partner who is obligated to repay the amount of the loaned money or property does not constitute a distribution subject to Code § 731 but is a loan governed by Code § 707(a). To the extent that such an obligation is canceled, the obligor partner will be considered to have received a distribution of money or property at the time of cancellation.[5360] The partnership has taxable income or loss in an amount equal to the difference between its basis in the distributed debt and the debt's fair market value at the time of the distribution, just as if the partnership had sold the debt for this amount and distributed the sale proceeds to the distributee-partner-debtor. The distributee-partner generally does not recognize any gain on the distribution unless the amount of the distribution exceeds the basis of his interest and, unless the special liquidating distribution rule in Code § 731(a)(2) applies, does not recognize a loss; however, the distributee-partner might recognize cancellation-of-indebtedness income on the deemed purchase of the debt.[5361]

The IRS treats differently partner indebtedness that the partnership bought from a third party. In that case, if the partnership distributes (in a liquidating or nonliquidating distribution) the indebtedness to the partner so that the debt is extinguished, the distribution of property rules will apply to determine the consequences for the partnership. Under Code § 61(a)(12) (and Reg. § 1.61-12(c)(2)), the partner is treated as having repurchased its indebtedness for an amount equal to the fair market value of the indebtedness and therefore will recognize capital gain or loss to the extent the fair market value of the indebtedness differs from the basis of the indebtedness determined under Code § 732.[5362]

CCA 201525010 stated, "The regulations under § 752 do not determine if a debt is recourse or nonrecourse to a partnership for purposes of determining whether, upon foreclosure of the property, the partnership has cancellation of debt income under § 61(a)(12) or gains from dealings in property under § 61(a)(3)." A panel at the May 2016 meeting of the ABA Section on Taxation seemed to disagree with the assumption of the parties in *Great Plains Gasification Associates v. Commissioner*, T.C. Memo. 2006-276, that certain debt was nonrecourse based

---

[5358] Partnership distributions might also be subject to the anti-abuse rules (regulations issued under Code § 701), which was asserted in CCA 200650014 when a partnership acquired real estate to be distributed to a partner and that partner was allocated all of the economic risks of that real estate purchase.
[5359] Reg. § 1.731-1(a)(1)(i).
[5360] Reg. § 1.731-1(c)(2).
[5361] McKee, Nelson & Whitmire, *Federal Taxation of Partnerships & Partners* (WG&L), ¶ 19.02[5] Distributions of a Partner's Debt to the Debtor-Partner. Letter Ruling 201314004 confirmed the Code § 731 aspects of such a distribution but did not address any other issues.
[5362] Rev. Rul. 93-7.

on Code § 752. The author of CCA 201525010 indicated that the CCA was not just her view but rather was a consensus approach at the IRS.

A deficit capital account is not by itself sufficient to establish the creation of a loan. Similarly, the fact that on a final accounting the partners will take a deficit capital account into consideration is not sufficient to create an obligation to repay a loan. If there is no unconditional and legally enforceable obligation that requires a partner to repay any of the amounts withdrawn to the partnership on or before a determinable date, then withdrawals by that partner that created a deficit in his capital account are not loans governed by Code § 707(a) but are partnership distributions received by him in his capacity as a partner. Rev. Ruls. 73-301, 81-241.

Exceptions to the rule of tax-free distributions include:

- Part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.

- Part II.Q.8.b.i.(g) Code § 751 – Hot Assets. Even if "hot assets" can be distributed tax-free under Code § 731(a), they may be tainted in terms of generating ordinary income when sold. For the latter, see part II.Q.8.b.i.(h) Characteristics of Distributed Property.

- Part II.M.3.e Exception: Disguised Sale.

Also, Code § 731(a)(1) requires a partner to recognize gain on a monetary distribution when the distribution exceeds the partner's adjusted basis in the partnership;[5363] for the taxation of any gain, see part II.Q.8.e.ii Transfer of Partnership Interests: Effect on Transferring Partner. A reduction in a partner's share of liabilities[5364] is considered a cash payment in the amount of the liabilities discharged.[5365] The amount of gain recognized is the excess of the distribution over

[5363]Code § 731(a)(2) explains potential loss recognition consequences of a partnership distribution.
[5364] See part II.C.3 Allocating Liabilities (Including Debt).
[5365] Rev. Rul. 74-40, Situations 2 and 3 are most relevant, but let's look at all three for the sake of completeness. Situation 1 involved the following facts and conclusions:

> L is a limited partner in partnership GL to which he contributed $10,000 in cash on its formation. His distributive share of partnership items of income and loss is 10 percent and he is not entitled to receive any guaranteed payments. The adjusted basis of his partnership interest at the end of the current year is $20,000. His proportionate share of partnership liabilities, on which neither he, the other partners nor the partnership have assumed any personal liability, is $15,000. The partnership has no other liabilities. L sells his interest in the partnership to M, an unrelated taxpayer, for $10,000 in cash. At the time of the transaction the partnership had no unrealized receivables or inventory items described in section 751 of the Internal Revenue Code of 1954 nor any goodwill and L had been paid his distributive share of partnership income.
> [Citations to Code §§ 752(c) and 741 and to Reg. §§ 1.752-1(e) and 1.751-1(d) follow.]
> Accordingly, in the instant situation, the amount realized by L from the sale of his partnership interest is $25,000, consisting of cash in the amount of $10,000 and release from his share of partnership liabilities in the amount of $15,000. Since the adjusted basis of L's interest in the partnership is $20,000, he realized a gain of $5,000 determined under the provisions of section 741 of the Code.

Situation 2 involved the following facts and conclusions:

the partner's adjusted basis;[5366] basis in a partnership interest includes any partnership debt allocated to it.[5367] If the partnership distributes cash and property to a partner in the same transaction, the partner applies the cash to basis and then allocates basis to the property distributed.[5368] However, if a liquidating distribution consists of only cash, unrealized receivables, or inventory with an adjusted basis to the recipient partner that is less than the partner's adjusted basis in the partnership, then the partner would recognize loss.[5369]

However, special rules apply to marketable securities, which might be treated as cash for purposes of Code § 731(a)(1) and therefore might trigger gain on distributions.[5370]

August, "The Debt Cancellation Culture of Section 108: Tax Hurdles for Partnerships Engaged in Debt Workouts," *Corporate Taxation* (WG&L), Sep/Oct 2023, explains "Partnership Transfer or Distribution of Encumbered Property on Disposition of Partnership Interest":

> Section 731(a) provides that a partner will realize gain from a distribution of money, including a deemed distribution resulting from a reduction in share of partnership liabilities under Section 752(b), in excess of his aggregate basis in the partnership. Where the partnership distributes property that is subject to an indebtedness, the partner

---

> The facts are the same as in situation 1, except that L withdraws from the partnership and the partnership distributes $10,000 to him in cash in complete liquidation of his interest in the partnership.
>
> [Citations to Code §§ 752(b), 731(a), 731(c) and 736 and to Reg. § 1.736-1(b)(1) follow.]
>
> Accordingly, in the instant situation, distributions to L with respect to his partnership interest total $25,000 and consist of cash in the amount of $10,000 and a decrease in his share of the partnership liabilities in the amount of $15,000 that is considered under section 752(b) of the Code as a distribution of money to L by the partnership.
>
> Furthermore, since the money distributed ($25,000) exceeds the adjusted basis of L's interest in the partnership immediately before the distribution ($20,000), he realizes a gain of $5,000 determined under the provisions of section 731(a) of the Code.

Situation 3 involved the following facts and conclusions:

> Instead of selling his interest L withdraws from the partnership at a time when the adjusted basis of his interest in the partnership is zero and his proportionate share of partnership liabilities, all of which consist of liabilities on which neither he, the other partners nor the partnership have assumed any personal liability, is $15,000.
>
> Accordingly, L is considered to have received a distribution of money from the partnership of $15,000 and realizes a gain of $15,000 determined under the provisions of section 731(a) of the Code.

See also Rev. Rul. 77-402 (similar result when grantor trust status terminates with respect to a partnership interest), discussed in fn. 6591, found in part III.B.2.a Tax Basis Issues When Using Irrevocable Grantor Trusts, and Rev. Rul. 75-194 (deemed bargain sale of partnership interest contributed to charity), discussed in part II.Q.6.b Possible Deemed Sale or Reduced Deduction When Contributing Partnership Interest to Charity.

[5366] Code § 731(a)(1).

[5367] See part II.C.3 Allocating Liabilities (Including Debt), especially part II.C.3.a Basic Consequences of Changes in Liability Allocations.

[5368] Although Code § 731 and the regulations thereunder do not appear to address this issue, Reg. § 1.732-1(a) and (b) implicitly mandate this result when determining the basis of assets distributed to a partner.

[5369] Code § 731(a)(2).

[5370] See part II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them).

will be taxable only to the extent that the amount of money distributed exceeds the basis of the distributee partner's interest in the partnership immediately before the distribution.

Where the partnership distributes encumbered property proportionately among the partners, then the distributee partners will not receive a deemed distribution of money under Section 752(b) because the amount of liability each partner assumes under Section 752(a) will generally equal the amount of liability that such partner is relieved of as a result of the distribution. It is now clear that increases and decreases in a distributee partner's liabilities occurring by reason of a liquidating or non-liquidating distribution are deemed to occur simultaneously for purposes of determining gain or loss under Section 731.[80]

[80] See Section 752(c).

If a partnership makes a disproportionate distribution of encumbered property, then any partner who receives less than his proportionate share of the encumbered property may be required to pick up gain under Section 751(b) . That's a fairly complex jigsaw puzzle that requires a thorough review. The result could also be an inside basis increase to the partnership. Again, "do the math!" As mentioned, a deemed distribution of money for liability reduction previously allocated to a partner may result in taxable gain under Section 731(a). Such gain is not eligible for exclusion under Section 108.

See parts II.C.3.c Allocations of Recourse and Nonrecourse Liabilities, II.G.31.b Debt Forgiveness (which includes more from August's article), and II.Q.8.b.i.(g) Code § 751 – Hot Assets.

II.Q.8.b.i.(b). Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them)

Although marketable securities are not normally considered cash for income tax purposes, they are treated as "money" for purposes of Code § 731(a)(1) gain calculation.[5371] Thus, distributions of marketable securities can result in gain under Code § 731(a)(1), if the total amount of money and securities distributed is higher than the adjusted basis of the partner's partnership interest. Beware that "marketable securities" means not only financial instruments[5372] and foreign currencies which are, as of the date of the distribution, actively traded,[5373] but also:[5374]

- any interest in a common trust fund or a regulated investment company, the latter which is offering for sale or has outstanding any redeemable security[5375] of which it is the issuer,

[5371] Code § 731(c)(1). Marketable securities are defined in Code § 731(c)(2)(A) as financial instruments and foreign currencies which are, as of the date of distribution, actively traded. Code § 731(c)(2)(B) includes mutual funds, derivatives and various other financial instruments. Code § 731(c)(2)(C) defines financial instruments to include stocks and other equity interests, evidences of indebtedness, options, forwards, futures, notional principal contracts and derivatives.
[5372] Financial instrument includes stocks and other equity interests, evidences of indebtedness, options, forward or futures contracts, notional principal contracts, and derivatives. Code § 731(c)(2)(C). Letter Ruling 200651023 held that Code § 731(c)(2)(C) does not apply to life insurance policies, which are "neither money nor marketable securities."
[5373] Code § 731(c)(2)(A).
[5374] Code § 731(c)(2)(B).
[5375] As defined in section 2(a)(32) of the Investment Company Act of 1940. Code § 731(c)(2)(B)(i)(II).

- any financial instrument which, pursuant to its terms or any other arrangement, is readily convertible into, or exchangeable for, money or marketable securities,[5376]

- any financial instrument the value of which is determined substantially by reference to marketable securities,

- except to the extent provided in regulations, any interest in a precious metal which, as of the date of the distribution, is actively traded[5377] unless such metal was produced, used, or held in the active conduct of a trade or business by the partnership,

- except as otherwise provided in regulations, interests in any entity[5378] if substantially all of the assets[5379] of such entity consist (directly or indirectly) of marketable securities, money, or both, and

- to the extent provided in regulations,[5380] any interest in an entity[5381] not described in the preceding bullet point to the extent of the value of such interest which is attributable to marketable securities, money, or both.

However, two exceptions to the "marketable securities are money" rule of Code § 731(c) often apply. First, a marketable security is not treated as money if the security was contributed to the partnership by the partner receiving the distribution, except to the extent the security's value is attributable to other marketable securities or money contributed to the entity to which the distributed security relates.[5382] Second, Code § 731(c) does not apply to distributions of

---

[5376] FSA 200219008 asserted that short-term (nine-month) debt instruments issued by a bank should be treated as financial instruments that were readily convertible into money. The IRS probably viewed them as the equivalent of certificates of deposit.
[5377] Within the meaning of Code § 1092(d)(1). Code § 731(c)(2)(B)(iv).
[5378] According to Letter Ruling 200223036, this includes a partnership division under part II.Q.8.d Partnership Division. More details on the Letter Ruling are at fn. 5608.
[5379] Reg. § 1.731-2(c)(3)(i) provides:

> *Substantially all*. For purposes of section 731(c)(2)(B)(v) and this section, substantially all of the assets of an entity consist (directly or indirectly) of marketable securities, money, or both only if 90 percent or more of the assets of the entity (by value) at the time of the distribution of an interest in the entity consist (directly or indirectly) of marketable securities, money, or both.

This rule also applies for purposes of the investment company rules that might trigger gain recognition when a partnership is formed. See part II.M.3.b Exception: Diversification of Investment Risk.
[5380] Reg. § 1.731-2(c)(3)(ii) provides:

> *Less than substantially all*. For purposes of section 731(c)(2)(B)(vi) and this section, an interest in an entity is a marketable security to the extent that the value of the interest is attributable (directly or indirectly) to marketable securities, money, or both, if less than 90 percent but 20 percent or more of the assets of the entity (by value) at the time of the distribution of an interest in the entity consist (directly or indirectly) of marketable securities, money, or both.

This rule also applies for purposes of the investment company rules that might trigger gain recognition when a partnership is formed. See part II.M.3.b Exception: Diversification of Investment Risk.
[5381] Letter Ruling 200223036 provides helpful analysis of the consequences of a situation similar to this arising from a partnership division. See fn. 5608.
[5382] Code § 731(c)(3)(A)(i); Reg. § 1.731-2(d)(1)(i). Letter Rulings 201537002 and 201537003 applied that rule to replacement stock certificates (referring to Reg. § 1.1012-1(c)(2)) for purposes of this rule and Code §§ 704(c)(1)(B) and 737; the rulings appear to be merely comfort rulings, because nothing jumped out at me as in doubt.

marketable securities by investment partnerships to eligible partners.[5383] An investment partnership is defined in Code § 731(c)(3)(C)(i) as a partnership that never has been engaged in any trade or business[5384] and whose assets have always substantially consisted of money, stock, notes and bonds, interest rate or currency contracts, foreign currencies, interests in or derivate financial instruments, and other specifically prescribed assets; and an eligible partner is a partner who has contributed only the aforementioned types of assets to the partnership.[5385] With regard to investment partnership status, remember that, if the partnership owns an interest in an entity that is a disregarded entity or partnership for federal income tax purposes, that entity's activity will be treated as a trade or business activity of the holding partnership. Thus, it could be beneficial to set up two partnerships and have one hold the assets that will prevent investment partnership status and another that would be an investment partnership. Furthermore, certain investment partnerships formed with almost all contributions being in the form of cash might be eligible for avoiding the mandatory inside basis step-down that applies when certain transfers of partnership interests or assets occur when a partnership has significant loss assets.[5386]

Two more exceptions might not apply frequently but are still important to note. First, if the security was acquired in a nonrecognition transaction and the value of the securities and money exchanged in that nonrecognition transaction is less than 20% of the value of all the assets exchanged in the nonrecognition transaction, the securities will not be considered money.[5387] Additionally, the security is not treated as money if it was not a marketable security on the date the partnership acquired it and the issuing entity did not have any outstanding marketable securities at that time, the partnership held the security for at least six months before it became

[5383] Reg. § 1.731-2(e)(1). An eligible partner includes a remainderman of a trust that was an eligible partner. Letter Rulings 200824005 and 200824009. This includes the remaindermen when the LLC starts as a disregarded entity and becomes a partnership when distributed to the remaindermen. Letter Ruling 201421001 (described more fully in fn. 372). However, it does not include the transferor or transferee in a nonrecognition transaction involving a transfer of any portion of an interest in a partnership with respect to which the transferor was <u>not</u> an eligible partner. Code § 731(c)(3)(C)(iii)(II). The committee reports to P.L. 103-465 (12/8/94) explained:

> A partner who is not an eligible partner may not remove the taint from his partnership interest by transferring any portion of his interest to another person in a transaction in which gain or loss is not recognized in whole or in part.

This may suggest a more limited scope to Code § 731(c)(3)(C)(iii)(II), but the regulations did not adopt any such limitation, so I would not rely on this suggestion of limited scope for planning purposes. The implicit corollary to the above is that, if the transferor is an eligible partner with respect to the transferor's entire partnership interest, a transferee partner in a nonrecognition transaction is also an eligible partner.

[5384] Reg. § 1.731-2(e)(4) provides:

> *Partnership tiers*. For purposes of section 731(c)(3)(C)(iv) and this section, a partnership (upper-tier partnership) is not treated as engaged in a trade or business engaged in by, or as holding (instead of a partnership interest) a proportionate share of the assets of, a partnership (lower-tier partnership) in which the partnership holds a partnership interest if—
>
> (i) The upper-tier partnership does not actively and substantially participate in the management of the lower-tier partnership; and
>
> (ii) The interest held by the upper-tier partnership is less than 20 percent of the total profits and capital interests in the lower-tier partnership.

[5385] Code § 731(c)(3)(C)(iii). Investment partnerships, as defined in 86 Ill. Admin. Code § 100.9730, are also exempted from the Illinois replacement tax that generally would otherwise apply to an Illinois partnership. 35 ILCS 5/205(b).

[5386] See text accompanying footnote 5712.

[5387] Reg. § 1.731-2(d)(1)(ii).

marketable, and the partnership distributed the security within five years of when it became marketable.[5388]

In addition to these four general exceptions to Code § 731(c), Code § 731(c)(3)(B) limits the amount of marketable securities treated as money, thereby limiting the amount of gain a recipient partner has to recognize. The limitation is calculated by first determining the partner's share of the partnership's built-in gain in all of its marketable securities, before the distribution is made.[5389] From this amount you subtract the partner's distributive share of the built-in gain that is attributable to marketable securities held by the partnership immediately after the transaction.[5390] The end result is the amount of marketable securities that are treated as "property other than money." Thus, to the extent a distribution of marketable securities does not decrease the recipient's share of built-in gain, the recipient will not be taxed under Code § 731(c). In other words:

- Try to make sure that each person retains a proportionate amount of unrealized appreciation.

- If the parties miss the mark a little, then they are taxed on shifted unrealized appreciation only to the extent that they missed the mark.

- Consider that any tax imposed will increase basis. Given that marketable securities tend to turn over anyway, part or all of the tax due to missing the mark a little might very well be saved when the marketable securities are later sold.

II.Q.8.b.i.(c). Disguised Sale from Partnership to Partner

A distribution of property from a partnership to a partner may be recharacterized as sale of that property in exchange for the partner's contribution of cash or property.[5391] Generally, one would apply rules similar to those described in part II.M.3.e Exception: Disguised Sale.[5392]

Thus, when a partnership distributes property and within two years after the distribution the recipient contributes cash, the partnership is deemed to have sold the property if the rules described in part II.M.3.e Exception: Disguised Sale would have recharacterized the opposite transaction.[5393]

[5388] Reg. § 1.731-2(d)(1)(iii).
[5389] Code § 731(c)(3)(B); Reg. § 1.731-2(b)(2).
[5390] *Id*.
[5391] Reg. § 1.707-6(a) provides:

> Rules similar to those provided in § 1.707-3 apply in determining whether a transfer of property by a partnership to a partner and one or more transfers of money or other consideration by that partner to the partnership are treated as a sale of property, in whole or in part, to the partner.

[5392] See fn. 5391, in which Reg. § 1.707-6(a) refers to Reg. § 1.707-3.
[5393] Reg. § 1.707-6(d), Example (1), "Sale of property by partnership to partner," provides:

> (i) A is a member of a partnership. The partnership transfers property X to A. At the time of the transfer, property X has a fair market value of $1,000,000. One year after the transfer, A transfers $1,100,000 to the partnership. Assume that under the rules of section 1274 the imputed principal amount of an obligation to transfer $1,100,000 one year after the transfer of property X is $1,000,000 on the date of the transfer.

Disclosure rules similar to those described in part II.M.3.e Exception: Disguised Sale would apply.[5394]

II.Q.8.b.i.(d). Capital Accounting May Trigger Ordinary Income

If a distribution (including client-based intangibles – taking clients with you) has a fair market value that exceeds the distributee's capital account, then the usual "qualified income offset" provision may trigger ordinary income to the distributee if the partnership agreement does not have "substantial economic effect" and values the distribution in a manner that drives the distributee's capital account negative.[5395] When the client-based intangibles, which had a book value of zero, were distributed with a significant book value, the increase in book value was allocated to the remaining partners rather than to the distributees. If enough of the increase in book value had been allocated to the distributees, the distributees' capital account could have been zero rather than negative as a result of the distribution. Using target allocations and adjusting book values to match the distributions may have prevented that result.

Therefore, when a partner receives a distribution, consider analyzing the effect and including in the withdrawal agreement provisions to address that possible result. Possible approaches include:

- No gain or loss on distribution.
- The partnership recognizes capital gain on the sale of the asset and allocates it to the distributee.[5396]
- The allocation of ordinary income described above. However, further analysis would be required to determine how confident one can be in advising clients that they can attain this ordinary income result.

(ii) Since the transfer of $1,100,000 to the partnership by A is made within two years of the transfer of property X to A, under rules similar to those provided in § 1.707-3(c), the transfers are presumed to be a sale unless the facts and circumstances clearly establish otherwise. If no facts exist that would rebut this presumption, on the date that the partnership transfers property X to A, the partnership is treated as having sold property X to A in exchange for A's obligation to transfer $1,100,000 to the partnership one year later.

[5394] Reg. § 1.707-6(c) provides:
Disclosure rules. Similar to the rules provided in §§ 1.707-3(c)(2) and 1.707-5(a)(7)(ii), a partnership is to disclose to the Internal Revenue Service, in accordance with § 1.707-8, the facts in the following circumstances:
(1) When a partnership transfers property to a partner and the partner transfers money or other consideration to the partnership within a two-year period (without regard to the order of the transfers) and the partnership treats the transfers as other than a sale for tax purposes; and
(2) When a partner assumes or takes subject to a liability of a partnership in connection with a transfer of property by the partnership to the partner, and the partnership incurred the liability within the two-year period prior to the earlier of the date the partnership agrees in writing to the transfer of property or the date the partnership transfers the property, and the partnership treats the liability as a qualified liability under rules similar to § 1.707-5(a)(6)(i)(B).

[5395] For more details, see the text accompanying and preceding fn 510 in part II.C.7 Maintaining Capital Accounts.

[5396] See part II.Q.1.c Personal Goodwill and Covenants Not to Compete, especially subpart II.Q.1.c.i Taxation When a Business Sells Goodwill; Contrast with Nonqualified Deferred Compensation.

II.Q.8.b.i.(e). Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property

When the distribution is a liquidating distribution, the partner's adjusted basis in the distributed property is equal to the adjusted basis of the partner's interest in the partnership, less any money distributed.[5397] Therefore, if a high basis partnership interest is redeemed in exchange for low basis property, the property receives a new basis equal to the basis of the redeemed partnership interest;[5398] this basis increase has no consequences to the partnership if a Code § 754 election is not in place (and certain mandatory basis adjustments are not in effect)[5399] and no consequences to the redeemed partner or other partners so long as none of the exceptions to the nonrecognition apply.[5400] The consequence would be a basis reduction.[5401] However, this basis reduction would apply only to the extent of any unrealized losses in the partnership's assets; it would not reduce the basis of any assets with unrealized gains.[5402]

In non-liquidating distributions, the partner's adjusted basis in the property distributed is simply the partnership's adjusted basis in the property before the distribution.[5403] However, the partner's adjusted basis in the distributed property cannot exceed his adjusted basis in his partnership interest less any money distributed at the same time.[5404]

The substituted basis portion continues the contributing partner's depreciation schedule.[5405]

If a transferee partner receives a distribution of property from the partnership within two years after acquiring an interest or part thereof in the partnership by a transfer with respect to which a Code § 754 election was not in effect, the partner may elect to treat as the adjusted partnership basis of such property the adjusted basis such property would have as if a Code § 754 election were in effect; see part II.Q.8.e.iii.(e) Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election. This applies whether or not the distribution liquidates the partnership interest.

However, when a partnership distributes unrealized receivables (Code § 751(c)) or substantially appreciated inventory items (Code § 751(d)) in exchange for any part of a partner's interest in

[5399] Part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000, fn. 3184 briefly describes the effect on basis when a Code § 754 election is in place or in connection with certain substantial built-in loss transactions.
[5400] For possible exceptions to nonrecognition, see parts II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them), II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, and II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.
[5401] See part II.Q.8.e.iii.(e) Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election.
[5402] See fn. 4241, found in part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.
[5403] Code § 732(a)(1).
[5404] Code § 732(a)(2).
[5405] Code § 168(i)(7).

other partnership property (including money), or, conversely, partnership property (including money) other than unrealized receivables or substantially appreciated inventory items in exchange for any part of a partner's interest in the partnership's unrealized receivables or substantially appreciated inventory items, the distribution will be treated as a sale or exchange of property under the provisions of Code § 751(b).[5406] In such case, Code § 732 determines the partner's basis of the property which the partner is treated as having sold to or exchanged with the partnership (as constituted after the distribution); the partner is considered as having received such property in a current distribution and, immediately thereafter, as having sold or exchanged it.[5407] However, Code § 732 does not apply in determining the basis of that part of property actually distributed to a partner which is treated as received by the partner in a sale or exchange under Code § 751(b), so the basis of such property shall be its cost to the partner.[5408]

The rule that assets received in a liquidating distribution get a basis equal to the liquidated partnership interest's basis can result in the liquidated asset receiving a basis step-up:[5409]

> Partner B, with a partnership interest having an adjusted basis to him of $12,000, retires from the partnership and receives cash of $2,000, and real property with an adjusted basis to the partnership of $6,000 and a fair market value of $14,000. The basis of the real property to B is $10,000 (B's basis for his partnership interest, $12,000, reduced by $2,000, the cash distributed).

However, this can turn around to bite the taxpayer, when the basis of the distributed assets exceeds the basis of the recipient's partnership interest (even if not in liquidation):[5410]

> Partner R has an adjusted basis of $10,000 for his partnership interest. He receives a current distribution of $4,000 cash and property with an adjusted basis to the partnership of $8,000. The basis of the distributed property to partner R is limited to $6,000 ($10,000, the adjusted basis of his interest, reduced by $4,000, the cash distributed).

Thus, the distributed property's basis decreased by $2,000, the excess of the $8,000 basis before the distribution over the $6,000 basis after the distribution.

However, Code § 734(b)(1), which applies if a Code § 754 election is in effect,[5411] causes the partnership to allocate this basis to other assets.

Special opportunities are available if the partnership has low basis property and a partner has a low basis partnership interest. (The partner might need to receive a large cash distribution to turn a high basis partnership interest into a low basis partnership interest.)[5412] The partnership

---

[5406] Reg. § 1.732-1(e).
[5407] Reg. § 1.732-1(e), referring to Code § 751(b) and Reg. § 1.751-1(b).
[5408] Reg. § 1.732-1(e).
[5409] Reg. § 1.732-1(b).
[5410] Reg. § 1.732-1(a), Example (2).
[5411] See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000.
[5412] If the partnership borrows to finance this distribution, consider the interest tracing rules to make sure that the partnership can deduct the interest. Because the debt the partnership incurred generally would give everyone's partnership interest a higher basis, note the suggestions further below in this part II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property for keeping the basis of the distributee partner's partnership interest low.

borrows to buy property. The partnership then distributes the new property to the partner with the low basis. If a Code § 754 election is in place or if the distribution falls within the special rules of Code § 732(d), the distribution strips basis from the new property and results in the partnership allocating that stripped basis to the old, low basis property.

This basis stripping technique requires more work than is described above. The debt the partnership incurred generally would give everyone's partnership interest a higher basis.[5413] Increasing the basis of the distributee partner's partnership interest would reduce the basis stripping. Keeping the basis of the distributee partner's partnership interest low requires one of the following to occur:

- Make the distribution terminate the partner's interest in the partnership. Because the distributee will no longer be a partner, he will no longer be allocated any liabilities in the partnership. This reallocation of liabilities will be treated as a cash distribution,[5414] reducing the basis of his partnership interest available to allocate to the distributed property.[5415]

    - If the partner whose interest is being redeemed contributed to the partnership within seven years assets that the partnership retains or was allocated some built-in gain in the property when other partners were later admitted to the partnership, the partner would recognize gain when leaving the partnership,[5416] undercutting part or all of the short-term tax saving from the basis stripping transaction. To plan in advance for the possibility of using this strategy, on might consider forming a partnership many years before the opportunity arises.[5417]

    - If the partner wishes to stay in the partnership, consider dividing the partnership before this series of transactions,[5418] so that only the low basis asset remains in the partnership that eventually would buy this new property. Note, however, that a partnership division that distributes a partnership holding marketable securities might trigger Code § 731(c) gain.[5419]

- Take some special action to make sure that the partners other than the distributee partner are allocated the debt used to buy the new property. These actions relate to the nature of the debt, loan guarantees, and other documentation shifting risk of loss regarding the debt.[5420]

[5413] Code §§ 752(a) (a partnership's incurring debt is treated as a cash contribution to the partnership), 722 (contribution of cash increases the basis of the contributor's partnership interest).
[5414] Code § 752(b).
[5415] Reg. § 1.732-1(b).
[5416] See part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value.
[5417] See part II.Q.8.a Partnership as a Master Entity.
[5418] See part II.Q.8.d Partnership Division. The division should keep the partners' percentage ownership the same in each partnership before and after the division to prevent the 7-year anti-mixing bowl rules (see fn. 5416) from applying to either partnership; see fn. 5578.
[5419] See fns. 5378 and 5608.
[5420] See part II.C.3 Allocating Liabilities (Including Debt). Code § 752 analysis can interact with the Code § 465 at-risk rules; see part II.G.4.j At Risk Rules, especially CCA 201606027, including key excerpts in fns. 1282-1285.

- If the distributed property is encumbered by debt to reduce the equity distributed to the redeemed partner, make sure that the debt is old and cold.[5421]

[5421] See Reg. § 1.707-6(b)(2) (dealing with liabilities incurred in connected with disguised sales). Reg § 1.707-6(d) includes the following example:

Example (2). *Assumption of liability by partner*.

(i) B is a member of an existing partnership. The partnership transfers property Y to B. On the date of the transfer, property Y has a fair market value of $1,000,000 and is encumbered by a nonrecourse liability of $600,000. B takes the property subject to the liability. The partnership incurred the nonrecourse liability six months prior to the transfer of property Y to B and used the proceeds to purchase an unrelated asset. Assume that, under the rule of § 1.707-5(a)(2)(ii) (which determines a partner's share of a nonrecourse liability), B's share of the nonrecourse liability immediately before the transfer of property Y was $100,000.

(ii) The liability is not allocable under the rules of § 1.163-8T to capital expenditures with respect to the property transferred to B and was not incurred in the ordinary course of the trade or business in which the property transferred to the partner was used or held. Since the partnership incurred the nonrecourse liability within two years of the transfer to B, under rules similar to those provided in § 1.707-5(a)(5), the liability is presumed to be incurred in anticipation of the transfer unless the facts and circumstances clearly establish the contrary. Assuming no facts exist to rebut this presumption, the liability taken subject to by B is not a qualified liability. The partnership is treated as having received, on the date of the transfer of property Y to B, $500,000 ($600,000 liability assumed by B less B's share of the $100,000 liability immediately prior to the transfer) as consideration for the sale of one-half ($500,000/$1,000,000) of property Y to B. The partnership is also treated as having distributed to B, in B's capacity as a partner, the other one-half of property Y.

Also, be careful not to trip the anti-abuse regulations, which set forth basic ideas generally respecting[5422] or criticizing[5423] partnership transactions, including a facts and circumstances

---

[5422] Reg. § 1.701-2(a) provides:

> *Intent of subchapter K*. Subchapter K is intended to permit taxpayers to conduct joint business (including investment) activities through a flexible economic arrangement without incurring an entity-level tax. Implicit in the intent of subchapter K are the following requirements—
>
> (1) The partnership must be bona fide and each partnership transaction or series of related transactions (individually or collectively, the transaction) must be entered into for a substantial business purpose.
>
> (2) The form of each partnership transaction must be respected under substance over form principles.
>
> (3) Except as otherwise provided in this paragraph (a)(3), the tax consequences under subchapter K to each partner of partnership operations and of transactions between the partner and the partnership must accurately reflect the partners' economic agreement and clearly reflect the partner's income (collectively, proper reflection of income). However, certain provisions of subchapter K and the regulations thereunder were adopted to promote administrative convenience and other policy objectives, with the recognition that the application of those provisions to a transaction could, in some circumstances, produce tax results that do not properly reflect income. Thus, the proper reflection of income requirement of this paragraph (a)(3) is treated as satisfied with respect to a transaction that satisfies paragraphs (a)(1) and (2) of this section to the extent that the application of such a provision to the transaction and the ultimate tax results, taking into account all the relevant facts and circumstances, are clearly contemplated by that provision. See, for example, paragraph (d) Example 6 of this section (relating to the value-equals-basis rule in § 1.704-1(b)(2)(iii)(c)), paragraph (d) Example 9 of this section (relating to the election under section 754 to adjust basis in partnership property), and paragraph (d) Examples 10 and 11 of this section (relating to the basis in property distributed by a partnership under section 732). See also, for example, §§ 1.704-3(e)(1) and 1.752-2(e)(4) (providing certain de minimis exceptions).

For regulations under Code § 752 that were changed in October 2016, see part II.C.3 Allocating Liabilities (Including Debt).

[5423] Reg. § 1.701-2(b) provides:

> *Application of subchapter K rules.* The provisions of subchapter K and the regulations thereunder must be applied in a manner that is consistent with the intent of subchapter K as set forth in paragraph (a) of this section (intent of subchapter K). Accordingly, if a partnership is formed or availed of in connection with a transaction a principal purpose of which is to reduce substantially the present value of the partners' aggregate federal tax liability in a manner that is inconsistent with the intent of subchapter K, the Commissioner can recast the transaction for federal tax purposes, as appropriate to achieve tax results that are consistent with the intent of subchapter K, in light of the applicable statutory and regulatory provisions and the pertinent facts and circumstances. Thus, even though the transaction may fall within the literal words of a particular statutory or regulatory provision, the Commissioner can determine, based on the particular facts and circumstances, that to achieve tax results that are consistent with the intent of subchapter K—
>
> (1) The purported partnership should be disregarded in whole or in part, and the partnership's assets and activities should be considered, in whole or in part, to be owned and conducted, respectively, by one or more of its purported partners;
>
> (2) One or more of the purported partners of the partnership should not be treated as a partner;
>
> (3) The methods of accounting used by the partnership or a partner should be adjusted to reflect clearly the partnership's or the partner's income;
>
> (4) The partnership's items of income, gain, loss, deduction, or credit should be reallocated; or
>
> (5) The claimed tax treatment should otherwise be adjusted or modified.

test.[5424] These regulations accept some basis shifting, which is inherent in Code § 732 itself, such as apportioning among tangible assets with equal value[5425] or among a group of

---

[5424] Reg. § 1.701-2(c) provides:

Facts and circumstances analysis; factors. Whether a partnership was formed or availed of with a principal purpose to reduce substantially the present value of the partners' aggregate federal tax liability in a manner inconsistent with the intent of subchapter K is determined based on all of the facts and circumstances, including a comparison of the purported business purpose for a transaction and the claimed tax benefits resulting from the transaction. The factors set forth below may be indicative, but do not necessarily establish, that a partnership was used in such a manner. These factors are illustrative only, and therefore may not be the only factors taken into account in making the determination under this section. Moreover, the weight given to any factor (whether specified in this paragraph or otherwise) depends on all the facts and circumstances. The presence or absence of any factor described in this paragraph does not create a presumption that a partnership was (or was not) used in such a manner. Factors include:

(1) The present value of the partners' aggregate federal tax liability is substantially less than had the partners owned the partnership's assets and conducted the partnership's activities directly;

(2) The present value of the partners' aggregate federal tax liability is substantially less than would be the case if purportedly separate transactions that are designed to achieve a particular end result are integrated and treated as steps in a single transaction. For example, this analysis may indicate that it was contemplated that a partner who was necessary to achieve the intended tax results and whose interest in the partnership was liquidated or disposed of (in whole or in part) would be a partner only temporarily in order to provide the claimed tax benefits to the remaining partners;

(3) One or more partners who are necessary to achieve the claimed tax results either have a nominal interest in the partnership, are substantially protected from any risk of loss from the partnership's activities (through distribution preferences, indemnity or loss guaranty agreements, or other arrangements), or have little or no participation in the profits from the partnership's activities other than a preferred return that is in the nature of a payment for the use of capital;

(4) Substantially all of the partners (measured by number or interests in the partnership) are related (directly or indirectly) to one another;

(5) Partnership items are allocated in compliance with the literal language of §§ 1.704-1 and 1.704-2 but with results that are inconsistent with the purpose of section 704(b) and those regulations. In this regard, particular scrutiny will be paid to partnerships in which income or gain is specially allocated to one or more partners that may be legally or effectively exempt from federal taxation (for example, a foreign person, an exempt organization, an insolvent taxpayer, or a taxpayer with unused federal tax attributes such as net operating losses, capital losses, or foreign tax credits);

(6) The benefits and burdens of ownership of property nominally contributed to the partnership are in substantial part retained (directly or indirectly) by the contributing partner (or a related party); or

(7) The benefits and burdens of ownership of partnership property are in substantial part shifted (directly or indirectly) to the distributee partner before or after the property is actually distributed to the distributee partner (or a related party).

[5425] Reg. § 1.701-2(d) provides:

Example (10). Basis adjustments under section 732; use of partnership consistent with the intent of subchapter K.

(i) A, B, and C are partners in partnership PRS, which has for several years been engaged in substantial bona fide business activities. For valid business reasons, the partners agree that A's interest in PRS, which has a value and basis of $100x, will be liquidated with the following assets of PRS: a nondepreciable asset with a value of $60x and a basis to PRS of $40x, and related equipment with two years of cost recovery remaining nonmarketable securities[5426] the basis of a partnership interest that is being liquidated. On the other hand, the regulations view as abusive duplication of losses a partner contributing property

---

and a value and basis to PRS of $40x. Neither asset is described in section 751 and the transaction is not described in section 732(d). Under section 732(b) and (c), A's $100x basis in A's partnership interest will be allocated between the nondepreciable asset and the equipment received in the liquidating distribution in proportion to PRS's bases in those assets, or $50x to the nondepreciable asset and $50x to the equipment. Thus, A will have a $10x built-in gain in the nondepreciable asset ($60x value less $50x basis) and a $10x built-in loss in the equipment ($50x basis less $40x value), which it expects to recover rapidly through cost recovery deductions. In selecting the assets to be distributed to A, the partners had a principal purpose to take advantage of the fact that A's basis in the assets will be determined by reference to A's basis in A's partnership interest, thus, in effect, shifting a portion of A's basis from the nondepreciable asset to the equipment, which in turn would allow A to recover that portion of its basis more rapidly. This shift provides a federal tax timing advantage to A, with no offsetting detriment to B or C.

(ii) Subchapter K is intended to permit taxpayers to conduct joint business activity through a flexible economic arrangement without incurring an entity-level tax. See paragraph (a) of this section. The decision to organize and conduct business through PRS is consistent with this intent. In addition, on these facts, the requirements of paragraphs (a)(1) and (2) of this section have been satisfied. The validity of the tax treatment of this transaction is therefore dependent upon whether the transaction satisfies (or is treated as satisfying) the proper reflection of income standard under paragraph (a)(3) of this section. Subchapter K is generally intended to produce tax consequences that achieve proper reflection of income. However, paragraph (a)(3) of this section provides that if the application of a provision of subchapter K produces tax results that do not properly reflect income, but the application of that provision to the transaction and the ultimate tax results, taking into account all the relevant facts and circumstances, are clearly contemplated by that provision (and the transaction satisfies the requirements of paragraphs (a)(1) and (2) of this section), then the application of that provision to the transaction will be treated as satisfying the proper reflection of income standard.

(iii) A's basis in the assets distributed to it was determined under section 732(b) and (c). The transaction does not properly reflect A's income due to the basis distortions caused by the distribution and the shifting of basis from a nondepreciable to a depreciable asset. However, the basis rules under section 732, which in some situations can produce tax results that are inconsistent with the proper reflection of income standard (see paragraph (a)(3) of this section), are intended to provide simplifying administrative rules for bona fide partnerships that are engaged in transactions with a substantial business purpose. Taking into account all the facts and circumstances of the transaction, the application of the basis rules under section 732 to the distribution from PRS to A, and the ultimate tax consequences of the application of that provision of subchapter K, are clearly contemplated. Thus, the application of section 732 to this transaction will be treated as satisfying the proper reflection of income standard under paragraph (a)(3) of this section. The Commissioner therefore cannot invoke paragraph (b) of this section to recast the transaction.

[5426] Reg. § 1.701-2(d) provides:

Example (9). Absence of section 754 election; use of partnership consistent with the intent of subchapter K.

(i) PRS is a bona fide partnership formed to engage in investment activities with contributions of cash from each partner. Several years after joining PRS, A, a partner with a capital account balance and basis in its partnership interest of $100x, wishes to withdraw from PRS. The partnership agreement entitles A to receive the balance of A's capital account in cash or securities owned by PRS at the time of withdrawal, as mutually with a built-in loss and later receiving other assets with low value in liquidation of his partnership interest (to get a high basis allocated to the distributed assets), then selling the distributed

---

agreed to by A and the managing general partner, P. P and A agree to distribute to A $100x worth of non-marketable securities (see section 731(c)) in which PRS has an aggregate basis of $20x. Upon distribution, A's aggregate basis in the securities is $100x under section 732(b). P RS does not make an election to adjust the basis in its remaining assets under section 754. Thus, PRS's basis in its remaining assets is unaffected by the distribution. In contrast, if a section 754 election had been in effect for the year of the distribution, under these facts section 734(b) would have required PRS to adjust the basis in its remaining assets downward by the amount of the untaxed appreciation in the distributed property, thus reflecting that gain in PRS's retained assets. In selecting the assets to be distributed, A and P had a principal purpose to take advantage of the facts that A's basis in the securities will be determined by reference to A's basis in its partnership interest under section 732(b), and because PRS will not make an election under section 754, the remaining partners of PRS will likely enjoy a federal tax timing advantage (i.e., from the $80x of additional basis in its assets that would have been eliminated if the section 754 election had been made) that is inconsistent with proper reflection of income under paragraph (a)(3) of this section.

(ii) Subchapter K is intended to permit taxpayers to conduct joint business activity through a flexible economic arrangement without incurring an entity-level tax. See paragraph (a) of this section. The decision to organize and conduct business through PRS is consistent with this intent. In addition, on these facts, the requirements of paragraphs (a)(1) and (2) of this section have been satisfied. The validity of the tax treatment of this transaction is therefore dependent upon whether the transaction satisfies (or is treated as satisfying) the proper reflection of income standard under paragraph (a)(3) of this section. A's basis in the distributed securities is properly determined under section 732(b). The benefit to the remaining partners is a result of PRS not having made an election under section 754. Subchapter K is generally intended to produce tax consequences that achieve proper reflection of income. However, paragraph (a)(3) of this section provides that if the application of a provision of subchapter K produces tax results that do not properly reflect income, but application of that provision to the transaction and the ultimate tax results, taking into account all the relevant facts and circumstances, are clearly contemplated by that provision (and the transaction satisfies the requirements of paragraphs (a)(1) and (2) of this section), then the application of that provision to the transaction will be treated as satisfying the proper reflection of income standard.

(iii) In general, the adjustments that would be made if an election under section 754 were in effect are necessary to minimize distortions between the partners' bases in their partnership interests and the partnership's basis in its assets following, for example, a distribution to a partner. The electivity of section 754 is intended to provide administrative convenience for bona fide partnerships that are engaged in transactions for a substantial business purpose, by providing those partnerships the option of not adjusting their bases in their remaining assets following a distribution to a partner. Congress clearly recognized that if the section 754 elections were not made, basis distortions may result. Taking into account all the facts and circumstances of the transaction, the electivity of section 754 in the context of the distribution from PRS to A, and the ultimate tax consequences that follow from the failure to make the election with respect to the transaction, are clearly contemplated by section 754. Thus, the tax consequences of this transaction will be treated as satisfying the proper reflection of income standard under paragraph (a)(3) of this section. The Commissioner therefore cannot invoke paragraph (b) of this section to recast the transaction.

assets at a loss,[5427] a result largely deterred by changes in the law since then.[5428] They also view as abusive distributing an insubstantial asset, allocating substantial basis to it, and then

---

[5427] Reg. § 1.701-2(d) provides the following example in which the lack of a Code § 754 election was viewed as abusive:

> *Example (8).* Plan to duplicate losses through absence of section 754 election; use of partnership not consistent with the intent of subchapter K.
>
> (i) A owns land with a basis of $100x and a fair market value of $60x. A would like to sell the land to B. A and B devise a plan a principal purpose of which is to permit the duplication, for a substantial period of time, of the tax benefit of A's built-in loss in the land. To effect this plan, A, C (A's brother), and W (C's wife) form partnership PRS, to which A contributes the land, and C and W each contribute $30x. All partnership items are shared in proportion to the partners' respective contributions to PRS. PRS invests the cash in an investment asset (that is not a marketable security within the meaning of section 731(c)). PRS also leases the land to B under a three-year lease pursuant to which B has the option to purchase the land from PRS upon the expiration of the lease for an amount equal to its fair market value at that time. All lease proceeds received are immediately distributed to the partners. In year 3, at a time when the values of the partnership's assets have not materially changed, PRS agrees with A to liquidate A's interest in exchange for the investment asset held by PRS. Under section 732(b), A's basis in the asset distributed equals $100x, A's basis in A's partnership interest immediately before the distribution. Shortly thereafter, A sells the investment asset to X, an unrelated party, recognizing a $40x loss.
>
> (ii) PRS does not make an election under section 754. Accordingly, PRS's basis in the land contributed by A remains $100x. At the end of year 3, pursuant to the lease option, PRS sells the land to B for $60x (its fair market value). Thus, PRS recognizes a $40x loss on the sale, which is allocated equally between C and W. C's and W's bases in their partnership interests are reduced to $10x each pursuant to section 705. Their respective interests are worth $30x each. Thus, upon liquidation of PRS (or their interests therein), each of C and W will recognize $20x of gain. However, PRS's continued existence defers recognition of that gain indefinitely. Thus, if this arrangement is respected, C and W duplicate for their benefit A's built-in loss in the land prior to its contribution to PRS.
>
> (iii) On these facts, any purported business purpose for the transaction is insignificant in comparison to the tax benefits that would result if the transaction were respected for federal tax purposes (see paragraph (c) of this section). Accordingly, the transaction lacks a substantial business purpose (see paragraph (a)(1) of this section). In addition, factors (1), (2), and (4) of paragraph (c) of this section indicate that PRS was used with a principal purpose to reduce substantially the partners' tax liability in a manner inconsistent with the intent of subchapter K. On these facts, PRS is not bona fide (see paragraph (a)(1) of this section), and the transaction is not respected under applicable substance over form principles (see paragraph (a)(2) of this section). Further, the tax consequences to the partners do not properly reflect the partners' income; and Congress did not contemplate application of section 754 to partnerships such as PRS, which was formed for a principal purpose of producing a double tax benefit from a single economic loss (see paragraph (a)(3) of this section). Thus, PRS has been formed and availed of with a principal purpose of reducing substantially the present value of the partners' aggregate federal tax liability in a manner inconsistent with the intent of subchapter K. Therefore (in addition to possibly challenging the transaction under judicial principles or other statutory authorities, such as the substance over form doctrine or the disguised sale rules under section 707 (see paragraph (h) of this section)), the Commissioner can recast the transaction as appropriate under paragraph (b) of this section.

[5428] See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000.

selling it at a substantial loss.[5429] Depending on the situation, not making a Code § 754 election might be considered abusive[5430] or not abusive.[5431] Also, the IRS reserves the right to assert and to rely upon applicable nonstatutory principles and other statutory and regulatory authorities

---

[5429] Reg. § 1.701-2(d) provides:

> *Example (11).* Basis adjustments under section 732; plan or arrangement to distort basis allocations artificially; use of partnership not consistent with the intent of subchapter K.
>
> (i) Partnership PRS has for several years been engaged in the development and management of commercial real estate projects. X, an unrelated party, desires to acquire undeveloped land owned by PRS, which has a value of $95x and a basis of $5x. X expects to hold the land indefinitely after its acquisition. Pursuant to a plan a principal purpose of which is to permit X to acquire and hold the land but nevertheless to recover for tax purposes a substantial portion of the purchase price for the land, X contributes $100x to PRS for an interest therein. Subsequently (at a time when the value of the partnership's assets have not materially changed), PRS distributes to X in liquidation of its interest in PRS the land and another asset with a value and basis to PRS of $5x. The second asset is an insignificant part of the economic transaction but is important to achieve the desired tax results. Under section 732(b) and (c), X's $100x basis in its partnership interest is allocated between the assets distributed to it in proportion to their bases to PRS, or $50x each. Thereafter, X plans to sell the second asset for its value of $5x, recognizing a loss of $45x. In this manner, X will, in effect, recover a substantial portion of the purchase price of the land almost immediately. In selecting the assets to be distributed to X, the partners had a principal purpose to take advantage of the fact that X's basis in the assets will be determined under section 732(b) and (c), thus, in effect, shifting a portion of X's basis economically allocable to the land that X intends to retain to an inconsequential asset that X intends to dispose of quickly. This shift provides a federal tax timing advantage to X, with no offsetting detriment to any of PRS's other partners.
>
> (ii) Although section 732 recognizes that basis distortions can occur in certain situations, which may produce tax results that do not satisfy the proper reflection of income standard of paragraph (a)(3) of this section, the provision is intended only to provide ancillary, simplifying tax results for bona fide partnership transactions that are engaged in for substantial business purposes. Section 732 is not intended to serve as the basis for plans or arrangements in which inconsequential or immaterial assets are included in the distribution with a principal purpose of obtaining substantially favorable tax results by virtue of the statute's simplifying rules. The transaction does not properly reflect X's income due to the basis distortions caused by the distribution that result in shifting a significant portion of X's basis to this inconsequential asset. Moreover, the proper reflection of income standard contained in paragraph (a)(3) of this section is not treated as satisfied, because, taking into account all the facts and circumstances, the application of section 732 to this arrangement, and the ultimate tax consequences that would thereby result, were not clearly contemplated by that provision of subchapter K. In addition, by using a partnership (if respected), the partners' aggregate federal tax liability would be substantially less than had they owned the partnership's assets directly (see paragraph (c)(1) of this section). On these facts, PRS has been formed and availed of with a principal purpose to reduce the taxpayers' aggregate federal tax liability in a manner that is inconsistent with the intent of subchapter K. Therefore (in addition to possibly challenging the transaction under applicable judicial principles and statutory authorities, such as the disguised sale rules under section 707, see paragraph (h) of this section), the Commissioner can recast the transaction as appropriate under paragraph (b) of this section.

[5430] Reg. § 1.701-2(d), Example (8), reproduced in fn 5427.

[5431] Reg. § 1.701-2(d), Example (9), reproduced in fn 5426.

to challenge transactions,[5432] which might subject taxpayers to penalties,[5433] so be careful not to get too cute.

Other partnership transactions might also be helpful.[5434]

Note that partners can shift basis without going through this process, but the transactions also require seasoning. Suppose A has for many years held low basis real estate worth $1 million. Last year, B bought real estate for $1 million, intending to hold it for investment. A and B swap real estate in a tax-free Code § 1031 exchange.[5435] The old property now has a high basis in B's hands, and the new property has a low basis in A's hands. Code § 1031 generally requires A and B to have intended to hold the property for investment when they bought them and to intend to hold the swapped property for investment after the Code § 1031 exchange.

In reviewing anything in this part II.Q.8.b.i.(e), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.

II.Q.8.b.i.(f). Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value

The Code § 731(a) rule that there are no tax consequences to a partner when the partner receives a partnership distribution is subject to two exceptions if the distribution is made within seven years after the partner contributed property to the partnership:

- First, earlier it was discussed that Code § 704(c)(1)(B) triggers gain when the partnership distributes contributed property to a partner other than the contributing partner[5436] within seven years after the contribution; it also applies if the partnership agreement is amended within seven years to shift to the other partner the burdens and benefits and the property is distributed to that other partner more than seven years after contribution.[5437]

- Second, Code § 737 will trigger gain to a distributee partner if the partner contributes property to the partnership and then receives a distribution of some other property[5438] within seven years of the partner's original contribution. When such a distribution is made, the partner must recognize gain equal to the lesser of (1) the excess of the fair market value of the distributed property over the partner's partnership interest's adjusted basis (less any money received in the distribution) or (2) the partner's net pre-contribution gain.[5439] Net pre-contribution gain, as defined in Code § 737(b), is the gain that would have been recognized by the distributee partner under Code § 704(c)(1)(B) if all property the partner had contributed to the partnership within seven years of the distribution that was still held by the

[5434] See Abrams, Now You See It; Now You Don't: Exiting a Partnership and Making Gain Disappear, *TM Memorandum* (2/16/2009).
[5435] See part II.G.16 Like-Kind Exchanges.
[5436] When a partnership distributes to a partner property that the partnership contributed, none of Code § 704(c)(1)(B), 731(c) or 737 applied. See fn. 5382.
[5437] Reg. § 1.704-4(f)(2), Example (1).
[5438] When a partnership distributes to a partner property that the partnership contributed, none of Code § 704(c)(1)(B), 731(c) or 737 applied. See fn. 5382.
[5439] Code § 737(a)(1) and (2).

partnership immediately before the distribution was distributed by the partnership to some other partner.

These rules relate to Code § 704(c) responsibility – the allocation to a partner of built-in gain or loss when the partnership contributes to a partnership property the basis of which differs from its fair market value – which integrates with part II.P.1.a.i Allocations of Income in Partnerships.

“The transferee of all or a portion of a contributing partner’s partnership interest succeeds to the transferor’s net precontribution gain, if any, in an amount proportionate to the interest transferred.”[5440] Because debt associated with contributed property is allocated to a partner to the extent of Code § 704(c) gain,[5441] anti-abuse rules prevent the acceleration or duplication of loss through the assumption of potentially suspect obligations.[5442] Obligations that are not

---

[5440] Reg. § 1.737-1(c)(2)(iii), which further provides:

> See § 1.704-3(a)(7) and § 1.704-4(d)(2) for similar provisions in the context of section 704(c)(1)(A) and section 704(c)(1)(B).

Reg. § 1.704-3(a)(7) provides:

> *Transfer of a partnership interest*. If a contributing partner transfers a partnership interest, built-in gain or loss must be allocated to the transferee partner as it would have been allocated to the transferor partner. If the contributing partner transfers a portion of the partnership interest, the share of built-in gain or loss proportionate to the interest transferred must be allocated to the transferee partner. This rule does not apply to any person who acquired a partnership interest from a § 1.752-7 liability partner in a transaction to which paragraph (e)(1) of § 1.752-7 applies. See § 1.752-7(c)(1).

Reg. § 1.704-4(d)(2) provides:

> *Transfers of a partnership interest*. The transferee of all or a portion of the partnership interest of a contributing partner is treated as the contributing partner for purposes of section 704(c)(1)(B) and this section to the extent of the share of built-in gain or loss allocated to the transferee partner. See § 1.704-3(a)(7).

[5441] See paragraph (2) of the text accompanying fn 439 in part II.C.3.c.iii Allocating Nonrecourse (Remaining) Liabilities.

[5442] Reg. § 1.752-7(a) provides:

> *Purpose and structure*. The purpose of this section is to prevent the acceleration or duplication of loss through the assumption of obligations not described in § 1.752-1(a)(4)(i) in transactions involving partnerships. Under paragraph (c) of this section, any such obligation that is assumed by a partnership from a partner in a transaction governed by section 721(a) is treated as section 704(c) property. Paragraphs (e), (f), and (g) of this section provide rules for situations where a partnership assumes such an obligation from a partner and, subsequently, that partner transfers all or part of the partnership interest, that partner receives a distribution in liquidation of the partnership interest, or another partner assumes part or all of that obligation from the partnership. These rules prevent the duplication of loss by prohibiting the partnership and any person other than the partner from whom the obligation was assumed from claiming a deduction, loss, or capital expense to the extent of the built-in loss associated with the obligation. These rules also prevent the acceleration of loss by deferring the partner’s deduction or loss attributable to the obligation (if any) until the satisfaction of the § 1.752-7 liability (within the meaning of paragraph (b)(8) of this section). Paragraph (d) of this section provides a number of exceptions to paragraphs (e), (f), and (g) of this section, including a de minimis exception. Paragraph (i) provides a special rule for situations in which an amount paid to satisfy a § 1.752-7 liability is capitalized into other partnership property. Paragraph (j) of this section provides special rules for tiered partnership transactions.

Reg. § 1.752-7(c)(1)(i) provides:

> *Section 704(c)*. Except as otherwise provided in this section, sections 704(c)(1)(A) and (B), section 737, and the regulations thereunder, apply to § 1.752-7 liabilities. See § 1.704-3(a)(12).

potentially suspect include those that generate basis (such as buying or improving an asset), result in an immediate deduction, or give rise to a nondeductible expense.[5443]

If a new partner joins a partnership (or an existing partner makes a non-pro rata contribution) when the partnership holds property the basis of which differs from its fair market value:

- The existing partners' capital accounts obtain Code § 704(c) responsibility;[5444] this is called a "reverse-Code § 704(c))" allocation. Thus, any unrealized gain that occurred between the time the partnership acquired the property and the time a new partner joined (or an existing partner makes a non-pro rata contribution) constitutes Code § 704(c) responsibility that is allocated to all of the existing partners.[5445] This responsibility can be reflected by either a

---

> However, §1.704-3(a)(7) does not apply to any person who acquired a partnership interest from a § 1.752-7 liability partner in a transaction to which paragraph (e)(1) of this section applies.

Reg. § 1.752-7(e)(1) limits deduction, loss, or capital expense is allowed to the partnership on the satisfaction of a Reg. § 1.752-7 liability.

[5443] Reg. § 1.752-1(a)(4)(i). For details, see fn 396 in part II.C.3.b What Is a "Liability" and also fn 6279 in part III.B.1.a.ii.(d) Income Tax Consequences Involving Loan Guarantees.

[5444] See Reg. § 1.704-3(a)(6). See also Reg. § 1.704-1(b)(2)(iv)(s)(2).

[5445] Reg. §§ 1.704-1(b)(5), Example (14)(i), provides:

> MC and RW form a general partnership to which each contributes $10,000. The $20,000 is invested in securities of Ventureco (which are not readily tradable on an established securities market)…. Assume that the Ventureco securities subsequently appreciate in value to $50,000. At that time SK makes a $25,000 cash contribution to the partnership (thereby acquiring a one-third interest in the partnership), and the $25,000 is placed in a bank account. Upon SK's admission to the partnership, the capital accounts of MC and RW (which were $10,000 each prior to SK's admission) are, in accordance with paragraph (b)(2)(iv)(f) of this section, adjusted upward (to $25,000 each) to reflect their shares of the unrealized appreciation in the Ventureco securities that occurred before SK was admitted to the partnership. Immediately after SK's admission to the partnership, the securities are sold for their $50,000 fair market value, resulting in taxable gain of $30,000 ($50,000 less $20,000 adjusted tax basis) and no book gain or loss. An allocation of the $30,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the $30,000 taxable gain will, in accordance with section 704(c) principles, be shared $15,000 to MC and $15,000 to RW, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

Reg. §§ 1.704-1(b)(5), Example (14)(ii), provides:

> Assume the same facts as (i), except that after SK's admission to the partnership, the Ventureco securities appreciate in value to $74,000 and are sold, resulting in taxable gain of $54,000 ($74,000 less $20,000 adjusted tax basis) and book gain of $24,000 ($74,000 less $50,000 book value). Under the partnership agreement the $24,000 book gain (the appreciation in value occurring after SK became a partner) is allocated equally among MC, RW, and SK, and such allocations have substantial economic effect. An allocation of the $54,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the taxable gain will, in accordance with section 704(c) principles, be shared $23,000 to MC $23,000 to RW, and $8,000 to SK, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

Reg. §§ 1.704-1(b)(5), Example (14)(iii), provides:

> Assume the same facts as (i) except that after SK's admission to the partnership, the Ventureco securities depreciate in value to $44,000 and are sold, resulting in taxable gain of $24,000

special allocation of gain in the partnership agreement or by revaluing capital accounts on the books,[5446] but the partnership must take one of these steps for the partnership agreement to be respected.[5447] An unexpected part of this issue is that one can become saddled with Code § 704(c) responsibility for assets one did not contribute; consider whether this might reset the seven-year period with respect to that newly acquired Code § 704(c) responsibility (I have not researched the latter). Also, beware that a book-up

($44,000 less $20,000 adjusted tax basis) and a book loss of $6,000 ($50,000 book value less $44,000). Under the partnership agreement the $6,000 book loss is allocated equally among MC, RW, and SK, and such allocations have substantial economic effect. An allocation of the $24,000 taxable gain cannot have economic effect since it cannot properly be reflected in the partners' book capital accounts. Under paragraph (b)(2)(iv)(f) of this section and the special partners' interests in the partnership rule contained in paragraph (b)(4)(i) of this section, unless the partnership agreement provides that the $24,000 taxable gain will, in accordance with section 704(c) principles, be shared equally between MC and RW, the partners' capital accounts will not be considered maintained in accordance with paragraph (b)(2)(iv) of this section.

[5446] For how to revalue, see Reg. § 1.704-1(b)(2)(iv)(f), which is reproduced in fn. 507 in part II.C.7 Maintaining Capital Accounts. See also Reg. § 1.704-1(b)(5), Example (33). Although generally this responsibility is determined separately for each asset, see an alternative approach is in part II.P.1.a.i.(b) Special Rules for Allocations of Income in Securities Partnerships.

[5447] See Reg. § 1.704-1(b)(5), Example (14)(iv), referencing Reg. § 1.704-1(b)(1)(iii), (iv).
Reg. § 1.704-1(b)(1)(iii) provides:

> *Effect of other sections*. The determination of a partner's distributive share of income, gain, loss, deduction, or credit (or item thereof) under section 704(b) and this paragraph is not conclusive as to the tax treatment of a partner with respect to such distributive share. For example, an allocation of loss or deduction to a partner that is respected under section 704(b) and this paragraph may not be deductible by such partner if the partner lacks the requisite motive for economic gain (see, *e.g.*, *Goldstein v. Commissioner*, 364 F.2d 734 (2d Cir. 1966)), or may be disallowed for that taxable year (and held in suspense) if the limitations of section 465 or section 704(d) are applicable. Similarly, an allocation that is respected under section 704(b) and this paragraph nevertheless may be reallocated under other provisions, such as section 482, section 704(e)(2), section 706(d) (and related assignment of income principles), and paragraph (b)(2)(ii) of § 1.751-1. If a partnership has a section 754 election in effect, a partner's distributive share of partnership income, gain, loss, or deduction may be affected as provided in § 1.743-1 (see paragraph (b)(2)(iv)(m)(2) of this section). A deduction that appears to be a nonrecourse deduction deemed to be in accordance with the partners' interests in the partnership may not be such because purported nonrecourse liabilities of the partnership in fact constitute equity rather than debt. The examples in paragraph (b)(5) of this section concern the validity of allocations under section 704(b) and this paragraph and, except as noted, do not address the effect of other sections or limitations on such allocations.

Reg. § 1.704-1(b)(1)(iv) provides:

> *Other possible tax consequences*. Allocations that are respected under section 704(b) and this paragraph may give rise to other tax consequences, such as those resulting from the application of section 61, section 83, section 751, section 2501, paragraph (f) of § 1.46-3, § 1.47-6, paragraph (b)(1) of § 1.721-1 (and related principles), and paragraph (e) of § 1.752-1. The examples in paragraph (b)(5) of this section concern the validity of allocations under section 704(b) and this paragraph and, except as noted, do not address other tax consequences that may result from such allocations.

Implicit in clause (iv) is that failure to maintain proper capital accounts can have gift tax consequences under Code § 2501.
Also see Reg. § 1.704-1(b)(2)(iv)(b), which is reproduced in the text accompanying fn. 500 in part II.C.7 Maintaining Capital Accounts.

resulting from a revaluation may shift nonrecourse liabilities,[5448] which can generate income tax.[5449]

- If the partnership included a nominal partner merely to get the seven-year period running and the previously contributed property is promptly distributed to a partner who is admitted just after the seven-year had run, the nominal partner's existence is ignored in determining the seven-year period, so Code § 704(c)(1)(B) taxes the contributing partner.[5450]

Note that Code § 737 is applied after Code § 731(c), which means that any marketable securities that are treated as money for Code § 731(c) purposes are ignored when applying Code § 737.[5451] This can lead to a favorable result for a distributee partner in two ways. First, since the property piece of the distribution is reduced by treating marketable securities as money, the Code § 737 gain potential is reduced. Second, the total amount of cash and marketable securities treated as money could be less than the basis of the distributee partner's partnership interest, resulting in no gain recognition under Code § 731.

As in the Code § 704(c) analysis, the prevailing view among commentators seems to be that a transferee of a partnership interest will "step into" the transferor's shoes in Code § 737 situations. This view is supported by the fact that regulations supporting Code § 704(c)(1)(B) and Code § 737 were written by the same people, at the same time, in the same project, and are likely to have been designed to work in coordination with one another. A partner should not be able to avoid the rules of Code § 737 by transferring the partnership interest to a third party. Thus, the transferee partner should be treated as the contributing partner under Code § 737.[5452]

When contributed property is distributed to any non-contributing partner within seven years of its contribution, the contributing partner is treated as if the property were sold to the recipient partner at its fair market value and must recognize the proper gain or loss under Code § 704(c)(1)(A); however, an exception applies for certain deemed like-kind exchanges.[5453]

[5448] See text preceding and accompanying fn 398 in part II.C.3.c Allocations of Recourse and Nonrecourse Liabilities.

[5449] See part II.C.3.a Basic Consequences of Changes in Liability Allocations.

[5450] Reg. § 1.704-4(f)(2), Example (2).

[5451] Reg. § 1.731-2(g).

[5452] I am very comfortable with the statement in the text, although it is not totally free from doubt. See Robinson, Don't Nothing Last Forever – Unwinding the FLP to the Haunting Melodies of Subchapter K, *ACTEC Journal*, Spring 2003, p. 302; Blum and Harrison, Another View: A Response to Richard Robinson's Don't Nothing Last Forever – Unwinding the FLP to the Haunting Melodies of Subchapter K, *ACTEC Journal*, Spring 2003, p. 313; and Robinson's Comments on Blum and Harrison's Another View, *ACTEC Journal*, Spring 2003, p. 318.

[5453] Code § 704(c)(2). See Borden and Longhofer, The Effect of Like-Kind Property on the Section 704(c) Anti-Mixing Bowl Rules, *TM Real Estate Journal* (3/2/2011). Reg. § 1.704-4(d)(3) provides:

> *Distributions of like-kind property*. If section 704(c) property is distributed to a partner other than the contributing partner and like-kind property (within the meaning of section 1031) is distributed to the contributing partner no later than the earlier of (i) 180 days following the date of the distribution to the non-contributing partner, or (ii) the due date (determined with regard to extensions) of the contributing partner's income tax return for the taxable year of the distribution to the noncontributing partner, the amount of gain or loss, if any, that the contributing partner would otherwise have recognized under section 704(c)(1)(B) and this section is reduced by the amount of built-in gain or loss in the distributed like-kind property in the hands of the contributing partner immediately after the distribution. The contributing partner's basis in the distributed like-kind property is determined as if the like-kind property were distributed in an unrelated distribution

This like-kind exception applies not only to Code § 704(c) but also to Code § 737.[5454] Thus, partners in a real estate mixing bowl partnership might completely avoid gain recognition under Code §§ 704(c)(1)(B) and 737 if the partnership is liquidated before the seven year waiting period and the different partners each receive part or complete ownership of various properties owned by the partnership.[5455]

For issues relating to built-in losses, see the American Bar Association Section of Taxation's "Comments on Proposed Regulations on Certain Partnership Provisions of the American Jobs Creation Act of 2004," *Tax Lawyer*, vol. 69, No. 1, p. 5 (Fall 2015).

II.Q.8.b.i.(g). Code § 751 – Hot Assets

Code § 751(a) and Reg. § 1.751-1(a)(1) provide that part of the gain attributable to hot assets (substantially appreciated inventory or unrealized receivables) "shall be considered as an amount realized from the sale or exchange of property other than a capital asset." Because capital gain treatment does not apply, this gain tends to be viewed colloquially as ordinary income, even though it is actually gain from the sale of property. This noncapital gain is "qualified business income" that may receive a deduction of up to 20% under Code § 199A.[5456]

When read together, Reg. § 1.751-1(b)(1)(i), -1(b)(2)(i), -1(b)(3)(i), and the -1(g) examples provide that one looks to differences in Code § 751 allocation before and after the distribution. If a partner is distributed exactly its share of each item of Code § 751 property, so that nobody's share of Code § 751 property decreases, then Code § 751 does not apply.

A partner might be deemed to have entered into a transaction regarding hot assets if:[5457]

- The partner receives hot assets in exchange for all or a part of the partner's interest in other partnership property (including money), or

---

> prior to the distribution of any other property distributed as part of the same distribution and is determined without regard to the increase in the contributing partner's adjusted tax basis in the partnership interest under section 704(c)(1)(B) and this section. See § 1.707-3 for provisions treating the distribution of the like-kind property to the contributing partner as a disguised sale in certain situations.

Reg. § 1.704-4(d)(4) provides an example.

[5454] In determining the precontribution gain subject to possible taxation under Code § 737, Reg. § 1.737-1(c)(2)(iv) provides:

> *Section 704(c)(1)(B) gain recognized in related distribution*. A distributee partner's net precontribution gain is determined after taking into account any gain or loss recognized by the partner under section 704(c)(1)(B) and § 1.704-4 (or that would have been recognized by the partner except for the like-kind exception in section 704(c)(2) and § 1.704-4(d)(3)) on an actual distribution to another partner of section 704(c) property contributed by the distributee partner that is part of the same distribution as the distribution to the distributee partner.

However, Reg. § 1.737-1(c)(2)(v) requires an actual distribution:

> *Section 704(c)(2) disregarded*. A distributee partner's net precontribution gain is determined without regard to the provisions of section 704(c)(2) and § 1.704-4(d)(3) in situations in which the property contributed by the distributee partner is not actually distributed to another partner in a distribution related to the section 737 distribution.

[5455] Breitstone and Wilensky, Dividing a Real Estate Empire: The Mixing Bowl Alternative, *TM Memorandum* (BNA) (3/9/2015).

[5456] See Reg. § 1.199A-3(b)(1)(i), reproduced in part II.E.1.c.ii.(a) Generally; List of Items Included in QBI.

[5457] Code § 751(b)(1).

- The partner receives partnership property (including money) in exchange for all or a part of the partner's interest in hot assets.

This rule does not apply to not apply to a distribution of property that the distributee contributed to the partnership or Code § 736(a) payments to a retiring partner or successor in interest of a deceased partner.[5458] Also, if applies only if and to the extent that a partner receives more or less than that partner's share of hot assets.[5459]

Proposed regulations "prescribe how a partner should measure its interest in a partnership's unrealized receivables and inventory items … and … provide guidance regarding the tax consequences of a distribution that causes a reduction in that interest."[5460]

A partnership's inventory items are "substantially appreciated" if their fair market value exceeds 120% of the partnership's adjusted basis in such property, unless a principal purpose for acquiring such property was to avoid these rules regarding inventory items.[5461] "Inventory items" include:[5462]

- the partnership's Code § 1221(a)(1) property,[5463]

- any other partnership property that, if the partnership sold or exchanged them, would be considered property other than a capital asset and other than Code § 1231 property,[5464] and

[5458] Code § 751(b)(2).
[5459] See Reg. §§ 1.751-1(b)(1)(i), 1.751-1(b)(2)(i), and 1.751-1(b)(3)(i), and the Reg. § 1.751-1(g) examples.
[5460] REG-151416-06, Certain Distributions Treated as Sales or Exchanges [FR Doc. 2014-25487 Filed 10/31/2014 at 8:45 am; Publication Date: 11/03/2014]. The proposed regulations would obsolete Rev. Rul. 84-102. For the effective date:

> The regulations, as proposed, apply to distributions occurring in any taxable period ending on or after the date of publication of a Treasury decision adopting these rules as final regulations in the Federal Register. The rules contained in § 1.751-1(a)(2) would apply to transfers of partnership interests that occur on or after [11/03/2014]. However, the rules contained in § 1.751-1(a)(2) are a clarification of existing rules, and no inference is intended from the change to § 1.751-1(a)(2) with respect to sales or exchanges of partnership interests prior to the effective date for § 1.751-1(a)(2). The rules contained in § 1.751-1(a)(3) continue to apply to transfers of partnership interests that occur on or after December 15, 1999. A partnership and its partners would be able to rely on § 1.751-1(b)(2) of these proposed regulations for purposes of determining a partner's interest in the partnership's section 751 property on or after [11/03/2014] provided the partnership and its partners apply each of § 1.751-1(a)(2), § 1.751-1(b)(2), and § 1.751-1(b)(4) of these proposed regulations consistently for all partnership distributions and sales or exchanges, including for any distributions and sales or exchanges the partnership makes after a termination of the partnership under section 708(b)(1)(B).

See Longhofer and Rimmke, Proposed Section 751(b) Regulations: An Exchange for the Better? *Journal of Taxation* (Aug. 2015).
[5461] Code § 751(b)(3).
[5462] Code § 751(d).
[5463] Real estate might or might not constitute inventory. See part II.G.26.c Future Development of Real Estate.
[5464] Code § 1231 is discussed in part II.G.6 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business. Code § 1245 depreciation recapture overrides Code § 1231; see fn. 1494.

- any other property the partnership held that, if held by the selling or distributee partner, would be considered property of the type described above.

"Unrealized receivables" include, to the extent not previously includible in income under the partnership's tax accounting method, any rights (contractual or otherwise) to payment for:[5465]

- goods delivered, or to be delivered, to the extent the proceeds therefrom would be treated as amounts received from the sale or exchange of property other than a capital asset, or

- services rendered, or to be rendered.

For purposes of Code §§ 731, 732, 741, and 751, but not for purposes of Code § 736,[5466] "unrealized receivables" includes the following as if the partnership had been sold it at its fair market value, to the extent that their sale would trigger certain unfavorable tax treatment:[5467]

- mining property,[5468]

- stock in a DISC,[5469]

- Code § 1245 property (as defined in Code § 1245(a)(3) (generally, depreciable personal property and amortizable intangible property),[5470]

- stock in certain foreign corporations,[5471]

- Code § 1250 property (generally, real estate depreciated faster than straight-line depreciation),[5472]

[5465] Code § 751(c).
[5466] P.L. 103-66 (8/10/1993), § 13262(b), deleted the reference to Code § 736. As to Code § 736, see part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.
[5467] Code § 751(c).
[5468] As defined in Code § 617(f)(2), to the extent that Code § 617(d)(1) would apply.
[5469] As described in Code § 992(a), to the extent that Code § 995(c) would apply.
[5470] See part II.G.6.b Code § 1245 Property and, with respect to amortizable Code § 197 intangibles, fn 1526 reproducing Code § 1245(b)(8), treating such intangibles as one Code § 1245 property, and fn 1704 in part II.G.18.d Amortization of Code § 197 Intangibles, reproducing Code § 197(f)(7), treating all amortizable Code § 197 intangibles as subject to Code § 167.
[5471] As described in Code § 1248, to the extent that Code § 1248(a) would apply. For purposes of applying Code § 731, 741, and 751, in the case of an individual, the tax attributable to such amount shall be limited in the manner provided by Code § 1248(b) (relating to gain from certain sales or exchanges of stock in certain foreign corporation). Code § 751(e).
[5472] As defined in Code § 1250(c), to the extent that Code § 1250(a) would apply. Code § 1250(a)(1)(A)(i) applies Code § 1250(a) to additional depreciation, referring to subsections (b)(1) and (b)(4). Subsection (b)(1) applies to depreciation faster than straight line. Subsection (b)(4) applies to certain rehabilitation expenditures. Reg. § 1.1(h)-1(b)(3), "Section 1250 capital gain," provides:

(i) *Definition*. For purposes of this section, section 1250 capital gain means the capital gain (not otherwise treated as ordinary income) that would be treated as ordinary income if section 1250(b)(1) included all depreciation and the applicable percentage under section 1250(a) were 100 percent.

(ii) *Share of section 1250 capital gain allocable to interest in partnership*. When an interest in a partnership held for more than one year is sold or exchanged in a transaction in which all

- farm land,[5473]
- franchises, trademarks, or trade names,[5474] or
- an oil, gas, or geothermal property.[5475]

For purposes of Code §§ 731, 732, 741, and 751, but not for purposes of Code § 736, "unrealized receivables" also includes any market discount bond[5476] and any short-term obligation[5477] but only to the extent of the amount which would be treated as ordinary income if the partnership had sold such property.

More drastic consequences may apply when selling to a controlled corporation interests in a partnership holding depreciable property (including depreciable real estate that would not have depreciation recapture under Code § 1250), taxing the entire gain as ordinary income, not just the part that might have constituted depreciation recapture.[5478]

See also part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

Reg. § 1.6050K-1(a)(1), "In general," provides:

> Except as otherwise provided in this paragraph (a), a partnership shall make a separate return on Form 8308 with respect to each section 751(a) exchange (as defined in paragraph (a)(4)(i) of this section) of an interest in such partnership which occurs after December 31, 1984. A partnership that is in doubt as to whether partnership property constitutes section 751 property to any extent or as to whether a transfer of a partnership interest constitutes a section 751(a) exchange may file Form 8308 in order

---

realized gain is recognized, there shall be taken into account under section 1(h)(7)(A)(i) in determining the partner's unrecaptured section 1250 gain the amount of section 1250 capital gain that would be allocated (taking into account any remedial allocation under §1.704-3(d)) to that partner (to the extent attributable to the portion of the partnership interest transferred that was held for more than one year) if the partnership transferred all of its section 1250 property in a fully taxable transaction for cash equal to the fair market value of the assets immediately before the transfer of the interest in the partnership. If less than all of the realized gain is recognized upon the sale or exchange of an interest in a partnership, the same methodology shall apply to determine the section 1250 capital gain recognized by the transferor, except that the partnership shall be treated as transferring only a proportionate amount of each section 1250 property determined as a fraction that is the amount of gain recognized in the sale or exchange over the amount of gain realized in the sale or exchange. This paragraph (b)(3) does not apply to a transaction that is treated, for Federal income tax purposes, as a redemption of a partnership interest.

(iii) *Limitation with respect to net section 1231 gain*. In determining a transferor partner's net section 1231 gain (as defined in section 1231(c)(3)) for purposes of section 1(h)(7)(B), the transferor partner's allocable share of section 1250 capital gain in partnership property shall not be treated as section 1231 gain, regardless of whether the partnership property is used in the trade or business (as defined in section 1231(b)).

[5473] As defined in Code § 1252(a), to the extent that Code § 1252(a) would apply.
[5474] Referred to in Code § 1253(a), to the extent that Code § 1253(a) would apply.
[5475] As defined in Code § 1254, to the extent that Code § 1254(a) would apply.
[5476] As defined in Code § 1278.
[5477] As defined in Code § 1283.
[5478] See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), especially the text accompanying fns. 5087-5092.

to avoid the risk of incurring a penalty under section 6721. The penalty under section 6721 will generally apply, however, to partnerships that do not file Form 8308 where in fact a section 751(a) exchange occurred, except as provided in paragraphs (a)(2) and (e) of this section.

Reg. § 1.6050K-1(a)(4), "Definitions," provides that, for purposes of Code § 6050K and Reg. § 1.6050K-1:

(i) *Section 751(a) exchange*. The term "section 751(a) exchange" means any sale or exchange of a partnership interest (or portion thereof) in which any portion of any money or other property received by a transferor partner in exchange for all or a part of his or her interest in the partnership is attributable to section 751 property. The term does not include a distribution which is treated as a sale or exchange between the distributee and the partnership under section 751(b) of the Code.

(ii) *Section 751 property*. The term "section 751 property" means unrealized receivables, as defined in section 751(c) of the Code, and inventory items which have appreciated substantially in value ("substantially appreciated inventory items"), as defined in section 751(d) of the Code.

(iii) *Transferor and transferee*. The term "transferor" means the beneficial owner of a partnership interest immediately before the transfer of that interest. The term "transferee" means the beneficial owner of a partnership interest immediately after the transfer of that interest. However, if a partnership does not know the identity of the beneficial owner of an interest in the partnership, the record holder of such interest shall be treated as the transferor or transferee (as the case may be) for purposes of paragraphs (b) and (c) of this section.

See About Form 8308, Report of a Sale or Exchange of Certain Partnership Interests.

Notice 2024-19 explains in part II, "Background":

> Generally, § 6050K and § 1.6050K-1 require a partnership with § 751 property to provide information to each transferor and transferee that are parties to a sale or exchange of an interest in the partnership (or portion thereof) in which any money or other property received by a transferor from a transferee in exchange for all or part of the transferor's interest in the partnership is attributable to § 751 property (§ 751(a) exchange). Section 1.6050K-1(a)(2) provides that partnerships are required to report each § 751(a) exchange on Form 8308. Generally, § 1.6050K-1(f)(1) provides that a partnership is required to file Form 8308 as an attachment to its Form 1065, U.S. Return of Partnership Income, for the taxable year of the partnership that includes the last day of the calendar year in which the § 751(a) exchange took place. Form 8308 is due at the time for filing the partnership return, including extensions….
>
> On November 30, 2020, the Department of the Treasury (Treasury Department) and the Internal Revenue Service (IRS) published T.D. 9926, 85 FR 76910, which amended § 1.6050K-1(c)(2) to require a partnership to furnish to a transferor partner the information necessary for the transferor to make the transferor partner's required statement in § 1.751-1(a)(3). Among other items, § 1.751-1(a)(3) requires a transferor partner in a § 751(a) exchange to submit with the transferor partner's income tax return a statement setting forth the amount of gain or loss attributable to § 751 property. In

> October 2023, the IRS released a revised version of Form 8308. Consistent with the requirements in § 1.6050K-1(c)(2), new Part IV of the 2023 Form 8308 requires a partnership to report, among other items, the partnership's and the transferor partner's share of § 751 gain and loss, collectibles gain under § 1(h)(5), and unrecaptured § 1250 gain under § 1(h)(6).

Notice 2024-19, part III, "Grant of Relief," provides:

> With respect to § 751(a) exchanges during calendar year 2023, the IRS will not impose penalties under § 6722 solely for failure to furnish Form 8308 with a completed Part IV by the due date specified in § 1.6050K-1(c)(1) for a partnership that (1) timely and correctly furnishes to the transferor and transferee a copy of Parts I, II, and III of Form 8308, or a statement that includes the same information, by the later of (a) January 31, 2024, or (b) 30 days after the partnership is notified of the § 751(a) exchange, and (2) furnishes to the transferor and transferee a copy of the complete Form 8308, including Part IV, or a statement that includes the same information and any additional information required under § 1.6050K-1(c), by the later of (a) the due date of the partnership's Form 1065 (including extensions), or (b) 30 days after the partnership is notified of the § 751(a) exchange.
>
> The relief provided in this notice applies only with respect to furnishing Form 8308 to the transferor and transferee. This notice does not provide relief with respect to filing Form 8308 as an attachment to a partnership's Form 1065; as such, this notice does not provide relief from penalties under § 6721 for failure to file correct information returns.

II.Q.8.b.i.(h). Characteristics of Distributed Property

Often, asset distributions precede, follow, or are substitutes for the transfer of partnership interests. Therefore, the concepts of distributions and transfers of partnership interests should be considered together. For the latter, see part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).

A distributed property's basis depends on whether the distribution liquidated the partner's partnership interest:

- Generally, the basis of property (other than money) distributed by a partnership to a partner, other than in liquidation of the partner's interest, is its adjusted basis to the partnership immediately before such distribution.[5479] However, this basis cannot exceed the adjusted basis of the partner's interest in the partnership, reduced by any money distributed in the same transaction.[5480]

- The basis of property (other than money) distributed by a partnership to a partner in liquidation of the partner's interest is the partnership interest's adjusted basis, reduced by any money distributed in the same transaction.[5481]

[5479] Code § 732(a)(1).
[5480] Code § 732(a)(2). If that cap causes a loss of basis, the partnership can reallocate that lost basis to the partnership's other assets under Code § 734 if a Code § 754 election is in place. See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.
[5481] Code § 732(b).

However, neither of these rules applies to the extent that a distribution is treated as a sale or exchange of property under Code § 751(b) (relating to unrealized receivables and inventory items).[5482]

Also, special rules apply to a partner who acquired all or a part of his interest by a transfer with respect to which a Code § 754 election is not in effect, and to whom a distribution of property (other than money) is made with respect to the transferred interest within two years after such transfer.[5483] The partner may elect to treat as the adjusted partnership basis of such property the adjusted basis such property would have if the adjustment provided in Code § 743(b) were in effect.[5484] Depending on the situation, this basis adjustment requires elections or is mandatory.[5485]

A partner's holding period for property received in a distribution from a partnership generally includes the partnership's holding period.[5486]

When a partner who receives "hot assets" later disposes of them, the partner will recognize ordinary income:

- The disposition of Code § 751(c) unrealized receivables received from a partnership is ordinary gain or loss.[5487]

- The disposition of Code § 751(d) inventory received from a partnership, within 5 years from the date of the distribution,[5488] is ordinary gain or loss.[5489]

[5482] Code § 732(e). For details regarding these assets, see part II.Q.8.b.i.(g) Code § 751 – Hot Assets.
[5483] Code § 732(d). For a discussion of these rules, including any opportunity to shift basis from non-depreciable to depreciable assets, see McKee, Nelson & Whitmire, ¶26.01 Transferees' Special Basis Adjustments in Connection With Subsequent Distributions, *Federal Taxation of Partnerships & Par*tners (WG&L).
[5484] Reg. § 1.732-1(d)(1)(iii). The amount of this adjustment is not diminished by any depletion or depreciation of that portion of the basis of partnership property arising from this special basis adjustment, since depletion or depreciation on such portion before distribution is allowed or allowable only if the optional adjustment under Code § 743(b) is in effect. Reg. § 1.732-1(d)(1)(iv). If this property is not the same property which would have had a special basis adjustment, then such special basis adjustment applies to any like property received in the distribution, if the transferee, in exchange for the property distributed, has relinquished the transferee's interest in the property with respect to which the transferee would have had a special basis adjustment. Reg. § 1.732-1(d)(1)(v).
[5485] Reg. § 1.731-1(d)(2), (3), (4).
[5486] Code § 735(b). See Goold & Schneider, Finding the Gold Nuggets in Partnership Holding Periods, *Passthrough Entities* 31 (Nov./Dec. 2002). See also Borden, Navigating State Law and Tax Issues Raised by Partnership and LLC Reorganizations, *Business Entities* (Jul./Aug. 2014), suggesting that the holding period of distributed property might be the longer of the partnership's holding period or the partnership interest's holding period.
[5487] Code § 735(a)(1).
[5488] For purposes of this rule, the partnership's holding period does not tack, and Code § 751(d) (defining inventory item) shall be applied without regard to any holding period in Code § 1231(b). Code § 735(b), (c)(1).
[5489] Code § 735(a)(2).

If any of these hot assets is disposed of in a nonrecognition transaction or a series of nonrecognition transactions, the above tax treatment shall also apply to any substituted basis property resulting from such transaction(s).[5490]

II.Q.8.b.ii. Partnership Redemption – Complete Withdrawal Using Code § 736

When reading this part II.Q.8.b.ii, beware of part II.Q.8.b.i.(d) Capital Accounting May Trigger Ordinary Income.

II.Q.8.b.ii.(a). Introduction to Code § 736

When a partnership redeems[5491] a partner's interest in full,[5492] Code § 736(a) provides that payments may be deductible to the partnership and ordinary income to the selling partner;[5493] if and to the extent that these payments are based on partnership income rather than being fixed, they constitute a shifting of a distributive share of partnership income to the retiring partner, rather than a deduction to the partnership and income to the retiring partner.[5494] Or, one may

---

[5490] Code § 735(c)(2)(A). This rule does not apply to any stock in a C corporation received in a Code § 351 exchange. Code § 735(c)(2)(B).

[5491] Code § 736 applies only to payments made by the partnership and not to transactions between partners. Reg. § 1.736-1(a)(1)(i). If the responsibility for making payments in a transaction between partners is assigned to the partnership, the assignment does not transform the sale into a Code § 736 redemption. *Coven v. Commissioner*, 66 T.C. 295 (1976), *acq.* 1976-2 C.B. 1, reasoning:

> We therefore conclude that petitioner sold his partnership interest to Suttenberg individually. The resulting tax consequences accordingly cannot be determined by section 736, since that section applies "only to payments made by the partnership and not to transactions between the partners." Sec. 1.736-1(a)(1)(i), Income Tax Regs. See also *Karan v. Commissioner*, 319 F.2d 303, 307 (7th Cir. 1963), *affg.* a Memorandum Opinion of this Court; *Smith v. Commissioner*, 313 F.2d 16, 19 (10th Cir. 1962), *affg.* 37 T.C. 1033 (1962); *Charles F. Phillips*, 40 T.C. 157, 161 (1963); 1 Willis, Partnership Taxation, sec. 46.01, p. 606 (2d ed. 1976).[10]
>
> [10] Although the agreement made a specific allocation for goodwill, capital gains treatment under sec. 736(b)(2)(B) would still not be possible, even if that agreement were not later superseded, because sec. 736 is inapplicable to this sale between partners. Furthermore, even if sec. 736 were applicable, the Consultant Contract, which was adopted, does not make any reference to goodwill, and the partnership did not operate under a written agreement: no operative written partnership agreement specifying payments for goodwill thus existed. Sec. 736(b)(2)(B) would therefore still be inapplicable. See *V. Zay Smith*, 37 T.C. 1033, 1037 (1962), *affd.* 313 F.2d 16 (10th Cir. 1962).

[5492] Code § 736 applies only to payments made to a retiring partner or to a deceased partner's successor in interest in liquidation of such partner's entire interest in the partnership. Code § 736 does not apply if the estate or other successor in interest of a deceased partner continues as a partner in its own right under local law. Reg. § 1.736-1(a)(1)(i). A partner retires when that person ceases to be a partner under local law. However, for partnership income tax purposes, a retired partner or a deceased partner's successor will be treated as a partner until such partner's interest in the partnership has been completely liquidated. Reg. § 1.736-1(a)(1)(ii). Thus, if one of the members of a two-person partnership retires or dies and the retiring member or deceased member's estate is to receive Code § 736 payments, the partnership will not be considered terminated, nor will the partnership year close with respect to either partner, until the retiring partner's or deceased member's estate's entire interest is liquidated, since the retiring partner or deceased member's estate continues to hold a partnership interest in the partnership until that time. Reg. § 1.736-1(a)(6).

[5493] For whether such payments are subject to self-employment tax, see part II.L.7 SE Tax N/A to Qualified Retiring or Deceased Partner.

[5494] Reg. § 1.736-1(a)(4). The retiring partner might like (if credits are passed through) or dislike (if nondeductible expenses increase taxable income) this result.

choose to apply Code § 736(b) so that they are nondeductible to the partnership (although possibly depreciated or amortized) and gain to the partner.[5495]

In analyzing the discussion below, note that one must be careful in relying on the regulations, which were last amended before P.L. 103-66 was enacted in 1993. The legislative history to 1993 changes to Code § 736 provides:

> *In general*.
>
> The bill generally repeals the special treatment of liquidation payments made for goodwill and unrealized receivables. Thus, such payments would be treated as made in exchange for the partner's interest in partnership property, and not as a distributive share or guaranteed payment that could give rise to a deduction or its equivalent. The bill does not change present law with respect to payments made to a general partner in a partnership in which capital is not a material income-producing factor. The determination of whether capital is a material income-producing factor would be made under principles of present and prior law [e.g., sections 401(c)(2) and 911(d) of the Code and old section 1348(b)(1)(A) of the Code]. For purposes of this provision, capital is not a material income-producing factor where substantially all the gross income of the business consists of fees, commissions, or other compensation for personal services performed by an individual. The practice of his or her profession by a doctor, dentist, lawyer, architect, or accountant will not, as such, be treated as a trade or business in which capital is a material income-producing factor even though the practitioner may have a substantial capital investment in professional equipment or in the physical plant constituting the office from which such individual conducts his or her practice so long as such capital investment is merely incidental to such professional practice. In addition, the bill does not affect the deductibility of compensation paid to a retiring partner for past services.
>
> *Unrealized receivables*.
>
> The bill also repeals the special treatment of payments made for unrealized receivables (other than unbilled amounts and accounts receivable) for all partners. Such amounts would be treated as made in exchange for the partner's interest in partnership property. Thus, for example, a payment for depreciation recapture would be treated as made in exchange for an interest in partnership property, and not as a distributive share or guaranteed payment that could give rise to a deduction or its equivalent.

The comment about unrealized receivables – particularly recapture of depreciation for not only Code § 1245 property but also Code § 1250 property – is quite important. Generally, when selling a partnership interest, sale proceeds are reclassified as ordinary income to the extent attributable to that property and many other types of property. See part II.Q.8.b.i.(g) Code § 751

[5495] Except to the extent Code § 751(b) applies (see part II.Q.8.b.i.(g) Code § 751 – Hot Assets), the amount of any gain or loss with respect to such payments is determined under Code § 731. Reg. § 1.736-1(b)(6). However, where the total of such payments is a fixed sum, the seller may elect (in the seller's tax return for the first taxable year for which the seller receives such payments), to report and to measure the amount of any gain or loss by the difference between the amount treated as a distribution under Code § 736(b) in that year, and the portion of the partner's adjusted basis that bears the same proportion to the partner's total adjusted basis for the partner's partnership interest as the amount distributed under Code § 736(b) in that year bears to the total amount to be distributed under Code § 736(b). *Id*.

– Hot Assets. However, the scope of items subject to that ordinary income recharacterization is dramatically reduced in a Code § 736 redemption.[5496]

Regarding payments for past services, see part II.L.7 SE Tax N/A to Qualified Retiring or Deceased Partner, regarding when such payments are not subject to self-employment tax.

Code § 736 prevails over the rules of Code § 1001 that normally govern sales.[5497] For further discussion, see part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale.

We will see below that generally a Code § 736(b) payment is taxed under Code § 731(a), so one might wonder how important it might be to be within the scope of Code § 736. Part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale, especially the text accompanying fns. 5525-5528, explains why Code § 736 treatment can be extremely important.

Further below, a brief discussion illustrates why a partner whose interest is being redeemed would generally prefer Code § 736(a) treatment, even though at first glance it would seem that the retiring partner would prefer Code § 736(b) treatment, because capital gains rates are lower than ordinary income rates.

II.Q.8.b.ii.(b). Flexibility in Choosing between Code § 736(a) and (b) Payments

Before explaining this counter-intuitive rule, let's discuss the flexibility allowed. Within certain limits, the redemption agreement can provide that as much or as little of the redemption payments receive treatment under Code § 736(a) or (b).[5498] However, Code § 736(b) payments

---

[5496] See text accompanying fns 5467-5477 in part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

[5497] The first sentence of Reg. § 1.1001-1(a) says, "**Except as otherwise provided in subtitle A of the Code**, the gain or loss realized from the conversion of property into cash, or from the exchange of property for other property differing materially either in kind or in extent, is treated as income or as loss sustained." (emphasis added)

[5498] Reg. § 1.736-1(b)(5)(iii). For what constitutes an agreement designating payments, see *Commissioner v. Jackson Investment Company*, 346 F.2d 187 (9th Cir. 1965), *rev'g* 41 T.C. 675 (reviewed decision 1964 holding that a withdrawal agreement was not given effect under Code § 736 as it did not constitute a partnership agreement); the Tax Court seems to have abandoned its decision in *Jackson Investment Company* in other Circuits as well – see *Spector v. Commissioner*, T.C. Memo. 1982-433, characterizing *Jackson Investment Company* as involving an ambiguous provision. If an agreement between all the remaining partners and the withdrawing partner or his successor in interest does not designate payments, then, subject to the limits described further below, Reg. § 1.736-1(b)(5)(i), (ii) provide the following:

> If a fixed amount (whether or not supplemented by any additional amounts) is to be received over a fixed number of years, the portion of each payment to be treated as a distribution under section 736(b) for the taxable year shall bear the same ratio to the total fixed agreed payments for such year (as distinguished from the amount actually received) as the total fixed agreed payments under section 736(b) bear to the total fixed agreed payments under section 736(a) and (b). The balance, if any, of such amount received in the same taxable year shall be treated as a distributive share or a guaranteed payment under section 736(a)(1) or (2). However, if the total amount received in any one year is less than the amount considered as a distribution under section 736(b) for that year, then any unapplied portion shall be added to the portion of the payments for the following year or years which are to be treated as a distribution under section 736(b). For example, retiring partner W who is entitled to an annual payment of $6,000 for 10 years for his interest in partnership property, receives only $3,500 in 1955. In 1956, he receives $10,000. Of this amount $8,500 ($6,000 plus $2,500 from 1955) is treated as a distribution under section 736(b) for 1956; $1,500, as a payment under section 736(a).

cannot exceed the fair market value of the withdrawing partner's share of the partnership property;[5499] therefore, Code § 736(a) must apply to such excess.

Except as discussed below, Code § 736(b) payments cannot be for (and therefore Code § 736(a) must apply to) the partnership's:

- Unrealized receivables;[5500]

- Goodwill, except to the extent that the partnership agreement provides for a payment with respect to goodwill.

The above limitation on what constitutes Code § 736(b) payments means that such payments must be classified as Code § 736(a) payments. It does not mean that such payments are the only types of payments that can be classified as Code § 736(a) payments instead of Code § 736(b) payments.[5501]

However, starting in 1993, payments for unrealized receivables and goodwill are eligible for Code § 736(a) treatment only if capital is not a material income-producing factor for the partnership and the retiring or deceased partner was a general partner in the partnership.[5502] The regulations have not been updated to take into account this rule. In applying this rule, capital is not a material income-producing factor where substantially all the gross income of the business consists of fees, commissions, or other compensation for personal services performed by an individual.[5503] The professional practice of a doctor, dentist, lawyer, architect, or accountant is not treated as a trade or business in which capital is a material income-producing factor even though the practitioner may have a substantial capital investment in professional equipment or in the physical plant constituting the office from which such individual conducts that practice if the capital investment is merely incidental to such professional practice.[5504]

Code § 736(a) payments are available for payments in the form of mutual insurance not determined by reference to any partnership asset,[5505] payments of compensation to a retired

---

> If the retiring partner or deceased partner's successor in interest receives payments which are not fixed in amount, such payments shall first be treated as payments in exchange for his interest in partnership property under section 736(b) to the extent of the value of that interest and, thereafter, as payments under section 736(a).

Whether a Code § 754 election is in effect or is deemed to be in effect might affect whether undesignated payments are 736(a) or 736(b) payments. McBride, Alice's Estate in the Wonderland of Subchapter K, *Tax Notes* 2/23/2009, pages 971-980.

[5499] Reg. § 1.736-1(b)(5)(iii).

[5500] Code § 736(b)(2)(A). Unrealized receivables include the right to payments for (1) goods delivered, or to be delivered, to the extent the proceeds would be treated as amounts received from the sale or exchange of property other than a capital asset, or (2) services rendered, or to be rendered. Code § 751(c), which is further described in part II.Q.8.b.i.(g) Code § 751 – Hot Assets. However, for purposes of Code § 736, they do not include other items that Code § 751 would normally treat as unrealized receivables. See text accompanying fns. 5466-5477.

[5501] Reg. § 1.736-1(b)(3) provides a ceiling on payments for goodwill, not a floor under which they may not be lowered. *Tolmach v. Commissioner*, T.C. Memo. 1991-538.

[5502] Code § 736(b)(3).

[5503] See part II.Q.8.b.ii.(a) Introduction to Code § 736.

[5504] See part II.Q.8.b.ii.(a) Introduction to Code § 736.

[5505] Reg. § 1.736-1(a)(2).

partner for past services,[5506] and perhaps a portion[5507] of payments where capital is a material income-producing factor.[5508]

If and to the extent that goodwill would not be eligible for Code § 736(a) treatment, consider how one would measure goodwill. For example, if the retiring partner was undercompensated for prior services before the company reached its full potential or for any other reason, payments could be allocated to past services.

If none of the above works around the inability to apply Code § 736(a) to goodwill, consider doing a partial redemption instead of a complete termination. Code § 736 applies only to payments made to a retiring partner or to a deceased partner's successor in interest in liquidation of such partner's entire interest in the partnership.[5509] Instead, provide a preferred interest in the partnership's profits up to a certain limit. Generally, reallocating profits between partners is not a taxable event.[5510]

II.Q.8.b.ii.(c). Comparing Code § 736(a) with (b) Strategically

See the example in part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis. The "Capital Gains to Seller" scenario corresponds to part II.Q.1.a.i.(d) S Corporation Double Taxation, which corresponds to Code § 736(b) payments, and the "Ordinary Income to Seller" scenario corresponds to part II.Q.1.a.i.(e) Partnership Single Taxation of Goodwill, which corresponds to Code § 736(a) payments. The contrast between these scenarios is illustrated in part II.Q.1.a.i.(f) Partnership Use of Same Earnings as S Corporation in Sale of Goodwill.

<u>Main Points</u>

1. Using a capital gain Code § 736(b) scenario, taxes consume much more to the parties as a whole than would the ordinary income Code § 736(a) scenario in meeting the targeted payments of "principal." Thus, the ordinary income scenario provides more money available to buy out the seller and ease the stress of the buy-out.

2. To compensate the seller for a higher ordinary income tax rate, the seller must receive more to generate the same after-tax flow. Thus, the stated sales price would appear to be higher and more burdensome, although really the buyer is better off because deducting the payments saves more than the additional purchase price cost.

3. In the § 736(a) scenario, increases in ordinary income tax rates harm the seller disproportionately, although it might be possible for the buyer to agree to pay seller more because the buyer saves more tax by making those additional payments. On the other hand, in a capital gain scenario, an increase in capital gain rates without a corresponding increase in ordinary income rates would not help the buyer save as much tax by paying the seller more.

[5506] See part II.Q.8.b.ii.(a) Introduction to Code § 736.
[5507] If the partners have agreed that the value of the Code § 736(b) payments is not to exceed a certain amount that is below fair market value, the remainder would be Code § 736(a) payments.
[5508] Banoff, More on Section 736(a) Payments After RRA '93 Changes, 83 *Journal of Taxation* 191 (Sept. 1995).
[5509] See fn. 5492.
[5510] See part II.C.6 Shifting Rights to Future Profits.

4. Code § 736(a) requires a complete liquidation in the redeemed partner's interest.[5511] However, the complete redemption may be made over time, and Code § 736 does not terminate the partnership, even if only one owner is left (but Code § 736 does not prevent termination if the partnership ceases activity).[5512] If the partnership assumes the partner's share of liabilities, it cannot deduct the payment of those liabilities under Code § 736 later than the year in which the partner's relationship with the partnership terminated;[5513] the liabilities are treated as relieved (and therefore cash is deemed paid) when the withdrawing partner is no longer a partner (ignoring the Code § 736 deemed continuation).[5514]

5. The above treatment does not apply to the extent that the LLC is repaying the seller's capital account, to the extent that the seller's capital account would be the LLC's earnings that are

[5511] Reg. § 1.736-1(a)(1)(i).

[5512] Rev. Rul. 75-154 involved the following facts:

> ABC partnership was formed in 1968 to conduct a management consulting business. Under the terms of the partnership agreement, upon retirement, the retiring partner was entitled to receive, in addition to amounts paid for his interest in partnership property, a specified amount payable in monthly installments over a three-year period following his retirement. There was no provision in the partnership agreement with respect to the payment to a retiring partner for goodwill.
>
> Partner C retired on January 2, 1972, and received 12 monthly payments from the partnership during 1972. On January 2, 1973, all of the business and financial activities of the partnership ended and A and B withdrew from the business. The former partners, A and B, assumed their share of the remaining liability to C and made the required payments for the years 1973 and 1974.

The ruling analyzed and held:

> Section 1.736-1(a)(6) of the Income Tax Regulations provides, in part, that a retiring partner or a deceased partner's successor in interest receiving payments under section 736 of the Code is regarded as a partner until the entire interest of the retiring or deceased partner is liquidated. Therefore, if one of the members of a 2-man partnership retires under a plan whereby he is to receive payments under section 736, the partnership will not be considered terminated, nor will the partnership year close with respect to either partner, until the retiring partner's entire interest is liquidated, since the retiring partner continues to hold a partnership interest in the partnership until that time.
>
> Section 1.736-1(a)(6) of the regulations prevents the termination of a partnership under section 708 of the Code, only in those situations in which the partnership would otherwise be terminated because of the withdrawal of a retiring or a deceased partner who is entitled to receive payments under section 736(a)(2). However, in the instant case, section 1.736-1(a)(6) of the regulations does not prevent the termination of the partnership under section 708, even though C was receiving liquidating payments under section 736(a)(2). It was the withdrawal of A and B that caused the partnership to terminate, not C's prior retirement.
>
> Accordingly, the partnership did not continue to exist under section 736 of the Code, but terminated under section 708 when partners A and B discontinued the financial operation of the partnership and withdrew from the business.
>
> It has been previously held that payments that would have been deductible by a partnership had it continued in existence were deductible by the former partners after termination of the partnership. See *Flood v. United States*, 133 F.2d 173 (1st Cir. 1943).
>
> Thus, in the instant case, after the partnership terminated, payments made by former partners A and B, in satisfaction of the liability to retired partner C, are deductible by them as trade or business expenses under section 162(a) of the Code in the year paid, since the payments would have been deductible by the partnership if it had not terminated. Furthermore, the payments to C are includible in C's gross income under section 61(a) in the year received.

[5513] *Whitman & Ransom v. Commissioner*, T.C. Memo. 2005-172.

[5514] See Reg. § 1.736-1(b)(7), Example (1), implementing Reg. § 1.736-1(a)(2) (treating assumption of liabilities treated as a distribution of money under Code § 752 in applying Code § 736).

allocated to the seller but not distributed. The seller would not be taxed on such distributions, because they were taxed when originally earned.

6. Combined with a Code § 754 election, a Code § 736(b) payment would generate a separate basis for each asset whose basis is adjusted, and each year a new set of assets would be created.[5515] Rather than try to recover that tax benefit, a Code § 736(a) is an easier way for the remaining partners to avoid tax on earnings used to buy the redeemed partner.

7. A partnership might be structured with profits interests that shift over time, which might achieve results similar to that of Code § 736 without the partner completely retiring. For example, suppose an older partner brought in a lot of business, but the agreement would be that the younger partners would take over the business after a number of years. The partnership might be structured to give the older partner a larger profits interest in early years and a smaller profits interest in later years. Generally, merely shifting interests in future profits is not a taxable event.[5516] The objective would be to structure it not as a sale, but rather as an allocation of profits related to the business each partner generates and the services each partner performs.

8. A technique similar to Code § 736 ordinary income payments used to be available to corporations in some situations. If the corporation could make a case that the departing shareholder was under-compensated for prior services, the corporation would pay compensation to him or her, with economic results similar to that of Code § 736 ordinary income payments. Code § 409A has made that strategy more difficult to use, imposing a 20% penalty on deferred compensation to the extent substantially vesting occurs after December 31, 2004, unless the statute's strict requirements are satisfied. To use deferred compensation payments based on prior services, the parties would need to prove that it is fair to compensate the selling owner-employee for prior services even though the employer was previously not legally obligated to do so. The sooner one plans for this future compensation, the easier it will be to prove reasonableness, since the owner-employee will be earning the compensation over time in a manner that is specifically referred to as an incentive for continued efforts. A challenge is that an appropriate level of compensation may be difficult to determine many years in advance of a sale.

<u>Additional Code § 736 Issues</u>

As discussed above, to the extent permitted by law, generally:

- Returns of basis should be structured as Code § 736(b) payments, because the seller is not taxed on them, and

- Profit on the sale of a partnership should be structured as Code § 736(a) payments, and the sale price should be increased at least enough to compensate the seller for paying taxes at ordinary income and self-employment and similar tax rates instead of any applicable capital gain rates.

[5515] See the paragraph of text accompanying fn. 5546 in part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale.
[5516] See part II.C.6 Shifting Rights to Future Profits.

II.Q.8.b.ii.(d). Comparing Code § 736(b) to an Installment Sale

Suppose one partner is exiting and being bought out over time, and one or more remaining partners will have higher interests in profits and losses. Should it be structured as a sale from one partner to another, or should the partnership redeem the exiting partner? If the latter, should the partnership issue a note to the partner?

In many cases, the partnership should redeem the exiting partner, documented by the partnership agreement without a separate promissory note. Code § 736 redemptions of a retiring partner are often better than an installment sale; and issuing a note might move the transaction into an unclear tax posture, whereas relying solely on the partnership agreement avoids certain questions. Merely shifting the right to future profits would not generate an income tax consequence;[5517] however, shifting a partner's capital account and any gain or loss inherent in that partner's share of the partnership's existing value would have income tax consequences. We have already seen how Code § 736(a) payments tend to work better for the partnership's value relating to goodwill;[5518] the rest of this part II.Q.8.b.ii.(d) discusses all components of value in a general sense.

Code § 736 taxes the retired partner on Code § 736 payments as if the retired partner were still a partner;[5519] complete liquidation of a partner's interest does not occur until no more payments may be made to the withdrawn partner.[5520] Code § 736(a) payments are taxed in the year for which they are made, rather than in the year of receipt.[5521] Furthermore, except to the extent Code § 751(b) applies, the amount of any gain or loss with respect to payments under Code § 736(b) for a retiring or deceased partner's interest in property for each year of payment is determined under Code § 731.[5522]

Code § 736 redemptions do not appear to contemplate the installment sale rules applying. If Code § 736 applies instead of the installment sale rules applying, then, rather than pro rating basis among the scheduled installment payments the way an installment sale would work, basis is applied fully to the earliest payments until it is used up. Thus, Code § 736 payments defer recognition of gain on sale relative to installment sales, a benefit that is not present in the sale of stock in a C or an S corporation; it also allows distributions to be applied to the partner's entire basis in the partnership,[5523] whereas distributions to shareholders are applied pro rata to their

[5523] See part II.Q.8.e.ii.(a) Unitary Basis.

shares and are taxed according to the basis in each block of shares,[5524] perhaps heightening the impact of deferred basis recovery for those sales that are redemptions recharacterized as distributions.

The installment sale of a partnership interest can be particularly disastrous if the partnership has significant "hot assets," which can include not only inventory and accounts receivable but also depreciable property,[5525] because income from those items is taxable immediately – even if it exceeds the amount that the seller received up front.[5526] However, depreciable property and certain other property[5527] are not "hot assets" when applying Code § 736.[5528] Also, when a partnership redeems a partnership interest and the redeemed partner is allocated ordinary income from hot assets, the remaining partners receive basis in those hot assets.[5529] This contrasts with S corporations, where the remaining shareholders report ordinary income on corresponding items.[5530]

Not all redemptions qualify for Code § 736 treatment – they need to be "in liquidation of the interest of a retiring partner or a deceased partner."[5531] If a Code § 736 payment obligation is evidenced as a promissory note rather than contract right, do the installment sale provisions apply when the partner receives the note?[5532] The amounts paid for his interest in assets are treated in the same manner as a distribution in complete liquidation under Code §§ 731, 732, and, where applicable, 751.[5533]

[5530] See part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

[5531] Code § 736(a), (b)(1). Reg. § 1.736-1(a)(1)(i) elaborates:

> Section 736 and this section apply only to payments made to a retiring partner or to a deceased partner's successor in interest in liquidation of such partner's entire interest in the partnership. See section 761(d). Section 736 and this section do not apply if the estate or other successor in interest of a deceased partner continues as a partner in its own right under local law. Section 736 and this section apply only to payments made by the partnership and not to transactions between the partners. Thus, a sale by partner A to partner B of his entire one-fourth interest in partnership ABCD would not come within the scope of section 736.

[5532] See Kim and Saunders, Redeeming a Partner with The Partnership's Note, *TM Memorandum* (BNA) (3/21/2016) (saved as Thompson Coburn doc. 6817740).

[5533] Reg. § 1.736-1(a)(2), which also refers to Reg. § 1.751-1(b)(4)(ii). Reg. § 1.751-1(b)(4)(ii) provides:

> Section 751(b) does not apply to payments made to a retiring partner or to a deceased partner's successor in interest to the extent that, under section 736(a), such payments constitute a distributive share of partnership income or guaranteed payments. Payments to a retiring partner or to a deceased partner's successor in interest for his interest in unrealized receivables of the partnership in excess of their partnership basis, including any special basis adjustment for them to which such partner is entitled, constitute payments under section 736(a) and, therefore, are not subject to section 751(b). However, payments under section 736(b) which are considered as made in exchange for an interest in partnership property are subject to section 751(b) to the extent that they involve an exchange of substantially appreciated inventory items for other property. Thus, payments to a retiring partner or to a deceased partner's successor in interest under section 736 must first be divided between payments under section 736(a) and

Neither Code § 731 nor Code § 732 nor the regulations under either statute address the effect of distributing a note in which the partnership is the maker. For purposes of maintaining capital accounts, generally distributions of notes do not count as distributions except to the extent that the partner disposes of or the partnership repays the note, but a distribution of a note will count as a distribution if the note is readily tradable on an established securities market,[5534] is negotiable,[5535] or perhaps if it is payable upon demand.[5536] However, a leading treatise strongly opposes counting a note in which the partnership is the maker, whether or not negotiable, as a distribution;[5537] the treatise does, suggest, however, reducing the basis available to allocate to

---

> section 736(b). The section 736(b) payments must then be divided, if there is an exchange of substantially appreciated inventory items for other property, between the payments treated as a sale or exchange under section 751(b) and payments treated as a distribution under sections 731 through 736. See subparagraph (1)(iii) of this paragraph, and section 736 and § 1.736-1.

However, the scope of unrealized receivables is narrower under Code § 736 than on other transactions involving hot assets; see part II.Q.8.b.i.(g) Code § 751 – Hot Assets, especially the text accompanying fn. 5466.

[5534] In addition to Reg. § 1.704-1(b)(2)(iv)(e)(2) that is reproduced in fn. 5535, consider that Code §§ 731(c)(2)(B)(ii) (any financial instrument which, pursuant to its terms or any other arrangement, is readily … exchangeable for, money or marketable securities) and 731(c)(2)(C) (The term 'financial instrument' includes … evidences of indebtedness ….) treat a distribution of publicly traded debt as a cash distribution.

[5535] Reg. § 1.704-1(b)(2)(iv)(e)(2) provides:

> *Distribution of promissory notes*. Notwithstanding the general rule of paragraph (b)(2)(iv)(b)(5), except as provided in this paragraph (b)(2)(iv)(e)(2), if a promissory note is distributed to a partner by a partnership that is the maker of such note, such partner's capital account will be decreased with respect to such note only when there is a taxable disposition of such note by the partner or when the partnership makes principal payments on the note. The previous sentence shall not apply if a note distributed to a partner by a partnership who is the maker of such note is readily tradable on an established securities market. Furthermore, the capital account of a partner whose interest in a partnership is liquidated will be reduced to the extent of (i) the fair market value, at the time of distribution, of any negotiable promissory note (of which such partnership is the maker) that such partnership distributes to the partner on or after the date such partner's interest is liquidated and within the time specified in paragraph (b)(2)(ii)(b)(2) of this section, and (ii) the fair market value, at the time of liquidation, of the unsatisfied portion of any negotiable promissory note (of which such partnership is the maker) that such partnership previously distributed to the partner. For purposes of the preceding sentence, the fair market value of a note will be no less than the outstanding principal balance of such note, provided that such note bears interest at a rate no less than the applicable federal rate at time of valuation.

[5536] Consider that Code §§ 731(c)(2)(B)(ii) (any financial instrument which, pursuant to its terms … is readily convertible into, or exchangeable for, money) and 731(c)(2)(C) (The term 'financial instrument' includes … evidences of indebtedness ….) treat a distribution of a demand note as a cash distribution.

[5537] McKee, Nelson & Whitmire, ¶19.05. Distributions in Complete Liquidation of a Partnership Interest, *Federal Taxation of Partnerships & Partners* (WG&L), reasons (footnotes omitted):

> Treating even a secured negotiable promissory note of the partnership as cash or a cash equivalent, the distribution of which triggers gain under § 731(a), would be inconsistent with the statutory scheme of Subchapter K because a § 754 election by the partnership would permit the partnership to increase the basis of its assets as the result of the distribution of zero-basis property. Similarly, treating a partnership's promissory note as property for purposes of applying §§ 731 and 732 also would produce results totally inconsistent with the Subchapter K scheme. Property characterization in connection with a current distribution would give the note a zero basis in the distributee-partner's hands under § 732(a)(1) because it would have a zero basis in the partnership's hands immediately prior to the distribution. Subsequent payments on the note would have to be treated as payments rather than distributions; the expenditure of partnership assets with no corresponding overall impact on the bases of the partners' interests would destroy

other distributed assets by the amount of payments expected to be made.[5538] Issuing a formal note creates much complexity and uncertainty,[5539] so one might consider keeping the payment right a contract right not reduced to a note. On the other hand, using a note and installment sale treatment would enable a cleaner break between the redeemed partner and the partnership and simplify inside basis step up issues (fn. 5546). The clean break from the partnership allows the retiring partner not to be treated as a partner any more for income tax purposes[5540] but also locks in the installment sale gain as income in respect of a decedent, the latter making the installment obligation ineligible for a basis step-up at death, whereas mere Code § 736(b) installments appear eligible for a basis step-up at death.[5541]

> the symmetry between the partnership's basis in its assets and the partners' bases in their interests, which Subchapter K strives to preserve. Similarly, if a partnership note were treated as property distributed as the sole consideration for the liquidation of a partner's entire interest in the partnership, it would take on a basis equal to the distributee-partner's basis in his interest. If a § 754 election were in effect, the partnership would be required to reduce the basis of its retained assets under § 734(b)(2)(B) by the amount of the distributee-partner's post-distribution basis in the note. By contrast, a cash distribution in the amount of the note would produce an increase in the basis of partnership assets if the cash distributed exceeded the distributee-partner's predistribution basis in his interest. A partnership note should thus not be treated as property under §§ 731 and 732, either. Payments on the note should be treated as distributions of cash, subject to all the rules applicable to such distributions.

[5538] McKee, Nelson & Whitmire, ¶19.05. Distributions in Complete Liquidation of a Partnership Interest, *Federal Taxation of Partnerships & Partners* (WG&L), reasons in a footnote:

> See Reg. § 1.732-1(b) (Where a partnership distributes property (other than money) in liquidation of a partner's entire interest in the partnership, the basis of such property to the partner shall be an amount equal to the adjusted basis of his interest in the partnership reduced by the amount of any money distributed to him *in the same transaction*. (emphasis added)). The reference to the same transaction should be interpreted to refer to the entire series of liquidating distributions in order to be consistent with the Regulations § 1.761-1(d) definition of liquidation. Further, any other interpretation of Regulations § 1.732-1(b) would make the timing of liquidating distributions a key ingredient in determining the basis of distributed property, and would allow taxpayers to artificially inflate the basis of property distributed in liquidation by agreeing to defer cash distributions. For example, assume a partner, whose basis of his interest is $10,000, is to receive $4,000 cash and a capital asset in liquidation of his interest. Under the interpretation suggested in the text, the distributed capital asset will have a basis of $6,000 to the partner regardless of the order in which the distributions are made. If subsequent cash distributions are not taken into account in computing the basis of the distributed capital asset, the capital asset will take a basis of $10,000 if it is distributed first and the $4,000 cash distribution will be taxable when received, a combination that would allow the distributee to accelerate losses (by selling the distributed capital asset) in exchange for a deferred gain on the eventual receipt of the cash.

[5539] See Cuff, Distributions of Promissory Notes In Liquidation of a Partner's Interest, *Journal of Real Estate Taxation* (now simply *Real Estate Taxation*) (WG&L), (1st Qtr. 2006) (capital accounting for promissory note distributions to a partner, allocations with respect to contributed property, allocations after a book-up of partnership assets, the minimum gain chargeback, the qualified income offset, unrecaptured Code § 1250 gain, allocation of partnership liabilities, and collapsible partnerships); Cuff, Promissory Notes In Liquidation of a Partner's Interest Still Hold Questions, *Journal of Real Estate Taxation* (now simply *Real Estate Taxation*) (WG&L), (2nd Qtr. 2006) (considering the interplay of the rules described in the 1st Qtr. Article, and the rules on disguised sales and collapsible partnerships).

[5540] See fns. 5519-5520.

[5541] See fns. 5544 and 5545 and part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

One might also be cautious when admitting a partner and redeeming a partner close in time to each, lest the IRS argue a disguised sale between the retiring partner and the new partner.[5542]

Letter Ruling 8304059 assumed that using a promissory note to redeem a partner does not necessarily take the transaction out of Code § 736 and ruled that any interest paid constitutes a Code § 707(c) guaranteed payment and that Reg. §§ 1.267(b)-1(b) and 1.707-1(c) prevent Code § 267 from limiting the timing of the interest deduction. Although a Code § 736 payment may bear interest, it need not.[5543] For details on Code § 707(c), see part II.C.8.a Code § 707 -

---

[5542] See Kim and Saunders, Redeeming a Partner with The Partnership's Note, *TM Memorandum* (BNA) (3/21/2016) (saved as Thompson Coburn doc. 6817740). Announcement 2009-4 stated:

> Until new guidance is issued, any determination of whether transfers between a partner or partners and a partnership is a transfer of a partnership interest will be based on the statutory language, guidance provided in legislative history, and case law.

Announcement 2009-4 looks askance at a couple of cases in this area, which cases are discussed in the Kim and Saunders article but which might control, notwithstanding the IRS' view. Announcement 2009-4 stated:

> Section 707(a)(2)(B) provides that, under regulations prescribed by the Secretary, if transfers of property between a partner or partners and a partnership, when viewed together, are properly characterized as a sale or exchange of property, such transfers shall be treated as either transactions between the partnership and one who is not a partner or between two or more partners acting other than in their capacity as partners. The legislative history of section 707(a)(2)(B) indicates the provision was adopted as a result of Congressional concern that taxpayers were deferring or avoiding tax on sales of partnership property, including sales of partnership interests, by characterizing sales as contributions of property, including money, followed or preceded by related partnership distributions. See H.R. Rep. No. 861, 98th Cong. 2nd Sess. 861 (1984), 1984-3 (Vol. 2) CB 115. Specifically, Congress was concerned about court decisions that allowed tax-free treatment in cases that were economically indistinguishable from sales of property to a partnership or another partner, and believed that these transactions should be treated for tax purposes in a manner consistent with their underlying economic substance. See H.R. Rep. No. 432, 98th Cong. 2nd Sess. 1218 (1984) (H.R. Rep.), and S. Prt. No. 169 (Vol. I), 98th Cong. 2nd Sess. 225 (1984) (S. Prt.) (discussing *Communications Satellite Corp. v. United States*, 625 F.2d 997 (Ct. Cl. 1980), and *Jupiter Corp. v. United States*, 2 Cl. Ct. 58 (1983), both of which involved disguised sales of a partnership interest).

[5543] Garlock, ¶1308 Debt Contributed To And Distributed From Partnerships, *Federal Income Taxation of Debt Instruments* (CCH), asserts in ¶1308.02 Distributions of Debt Instruments from Partnerships, [B] Debt of the Partnership:

> …The real issue, then, is whether interest will be imputed on partnership notes to partners that do not bear adequate stated interest. As noted above, the better view is that interest should not be imputed.
>
> If a partnership's note distributed to a partner is respected for all tax purposes, and if the partner's interest in the partnership is not reduced as a result of the distribution (as would be the case in a situation involving a pro rata distribution of notes to all partners), the determination of its issue price is unclear. The note is not issued for cash or property because the partner is not giving anything to the partnership in exchange for the note. There is no partnership analogue to section 1275(a)(4), which deems a corporation's note distributed to a shareholder as being issued in exchange for property. Hence, section 1273(b) does not provide any rule for determining the note's issue price.[258] Reg. § 1.1273-2(d)(1), which is broader than the corresponding statutory rule, effectively treats any debt instrument not issued for money or publicly traded property or subject to section 1274 as having an issue price equal to its stated redemption price.
>
> If the debt distributed provides for qualified stated interest (QSI), then its stated redemption price at maturity equals its stated principal amount and little is at stake here. The stated interest is respected as interest, and the stated principal amount is respected as principal. Even if the interest is at a rate below the AFR (or is zero), no interest is imputed under section 1274 because

Compensating a Partner for Services Performed, which focuses on guaranteed payments for services rather than for capital even though Code § 707 covers both.

It appears that a basis adjustment would apply at the retiring partner's death, which might eliminate a considerable part of the gain to be recognized on future installments (to the extent that gain is not attributable to the deceased partner's share of items constituting income in respect of a decedent)[5544] and might also lead to depreciation and goodwill amortization deductions.[5545] Thus, installment sales lock in gain as income in respect of a decedent, whereas Code § 736 payments appear eligible for a basis step-up. A partnership agreement might even convert Code § 736(a) payments to Code § 736(b) payments upon death, perhaps reducing the installments to take into account the smaller tax burden imposed on the seller.

Suppose that the partnership agreement provided for a Code § 736(b) payment with respect to goodwill. Each Code § 736(b) installment would give rise to a new goodwill asset that could be amortized over 180 months.[5546] Thus, the parties could get some tax arbitrage by the buyer getting ordinary deductions over 15 years when the seller gets capital gain, but query what the time value of money would be like in a business deal, which generally requires a faster payback. If assets have a faster depreciation period but the number of assets to track is high, consider abandoning the use of Code § 736(b) payments and simply using Code § 736(a); see part II.Q.8.b.ii.(c) Comparing Code § 736(a) with (b) Strategically.

> the debt was not issued in exchange for property and no interest is imputed under section 7872 because a loan from a partnership to a partner is not one of the categories of loans subject to that section, absent regulations treating the loan as a significant tax effect loan.[259] The only real problem arises if the debt provides for stated interest that is not QSI. Because all payments other than QSI are included in a debt's stated redemption price at maturity,[260] the effect of treating the debt's issue price as being equal to its stated redemption price at maturity would be to recharacterize all stated interest on the debt as principal. It is doubtful that this result was intended. The more sensible rule is to treat the debt instrument as issued for its stated principal amount in this situation.
> [258] See ¶ 203. Section 1273(b)(1) and (2) apply to debt instruments not issued for property, but the rules in those paragraphs depend on the price at which the instruments were offered for sale or actually sold, and this does not apply in the present case. Section 1273(b)(4) is generally the rule that applies if no other rule applies (and it deems the issue price to be equal to the stated redemption price at maturity), but it only applies to debt issued for property.
> [259] See ¶ 402.02.
> [260] See ¶ 202.01.

[5544] See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000, fn. 5682.
[5545] See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000, especially fn. 5684.
[5546] Reg. § 1.734-1(e)(1), referred to by McKee, Nelson & Whitmire, ¶25.02. Allocations of Section 734(b) Adjustments to Partnership Assets: Section 755, *Federal Taxation of Partnerships & Partners* (WG&L), interpreting the consequence of Rev. Rul. 93-13, which provides:

> If a partnership that has in effect an election to adjust basis under section 754 of the Internal Revenue Code completely liquidates the interest of a partner by agreeing to make a series of cash payments that are treated as distributions under section 736(b)(1), the section 734(b) basis adjustments to partnership property respond in timing and amount with the recognition of gain or loss by the retiring partner with respect to those payments.

If the Code § 736(b) payments were contingent, perhaps Reg. § 1.197-2(f)(2) would apply to amortize the new payments over the remaining months of the 180-month period.

Presumably, this lack of installment sale treatment would allow partnership redemptions to avoid the interest on deferred tax liabilities that Code § 453A imposes on installment sales. A prominent treatise states:[5547]

> A selling partner who receives deferred payments and reports gain under § 453 may be subject to acceleration of deferred gain under the pledge rule in § 453A(d) and may be required to pay interest on his deferred tax liability under § 453A(c). There are no analogous provisions applicable to deferred distributions to partners whose partnership interests are liquidated under § 736.

The treatise later states:[5548]

> In general, amounts that are computed like interest and paid to a partner for the use of partnership capital constitute guaranteed payments under § 707(c). Because a retired partner who receives post-retirement liquidation distributions is treated as a continuing partner (and not as a partnership creditor) for Subchapter K purposes until his interest is completely liquidated, it seems that any "interest" paid with respect to deferred § 736(b) distributions should be treated as guaranteed payments to the retired partner for the use of his unreturned capital. This notion is buttressed by the fact that § 736(a)(2) treats all payments "made in liquidation of the interest of a retiring partner" as § 707 guaranteed payments if they are determined without regard to partnership income and are not paid for the retiring partner's interest in partnership property under § 736(b).
>
> If deferred liquidation payments cannot bear tax-recognized interest, it follows that the imputed interest rules of §§ 483, 1272, and 7872 do not apply to deferred liquidation distributions under § 736. [In other words, deferred payments under Code § 736 should not be recharacterized as part principal and part interest.] From a policy perspective, inapplicability of these rules may not be as offensive as might first appear, since the timing of any tax benefits and burdens of deferred liquidation payments under § 736 are matched. Thus, because deferred liquidation payments are not treated as liabilities, the continuing partners cannot increase the bases of their partnership interests by the amount of deferred payments under § 752(a). In addition, the partnership is entitled to adjust the basis of its assets under § 734(b) only when the deferred payments are actually made and the retired partner actually recognizes gain or loss. Finally, if amounts payable to a retired partner include interest-like payments, such payments constitute § 736(a)(2) payments that will be included in the income of the retired partner at the same time that they are deducted by the partnership under the matched timing rules of § 707(c).

I am not aware of any primary authority addressing the above issue.

[5547] McKee, Nelson & Whitmire, ¶16.02. Transfers of Partnership Interests by Sale or Exchange: Tax Consequences of Liquidations Compared, *Federal Taxation of Partnerships & Partners*.

[5548] McKee, Nelson & Whitmire, ¶22.02[4][c] Interest on Deferred Section 736(b) Payments, *Federal Taxation of Partnerships & Partners*. For details on Code § 707(c), see part II.C.8.a Code § 707 - Compensating a Partner for Services Performed, which focuses on guaranteed payments for services rather than for capital even though Code § 707 covers both.

II.Q.8.b.ii.(e). Effect of Code § 736 Payments, Installment Sale Payments, or Deferred Compensation on Balance Sheet

Generally, Code § 736(a)(1) payments that are structured as preferred distributions of profits are considered equity and do not affect the entity's net worth.

On the other hand, Code § 736(a)(2) guaranteed payments and Code § 736(b) installment sale payments would be liabilities on the entity's balance sheet. Similarly, in a cross-purchase, the buyers would have liability on their balance sheets (which can also impede the use of guaranties). Finally, deferred compensation agreements, which are the corporate attempt to replicate Code § 736(a)(2) guaranteed payments, would also constitute a liability on the entity's balance sheets.

Liabilities on balance sheets can impede access to credit before and during the buy-out period. That a business is transitioning from the successful founder to new management doesn't help that situation.

Thus, Code § 736(a)(1) payments that are structured as preferred distributions of profits might very help the business' operations relative to the other ways of structuring buyouts.

II.Q.8.b.ii.(f). Planning for the 3.8% Tax on Net Investment Income and Passive Loss Rules When Using Code § 736 Payments

For purposes of the 3.8% tax on net investment income,[5549] see part II.I.8.d.iv Treatment of Code § 736 Redemption Payments under Code § 1411.

See also part II.K.1.d Applying Passive Loss Rules to a Retiring Partner under Code § 736.

II.Q.8.b.ii.(g). Code § 736 Payments as Retirement Income – Possible FICA and State Income Tax Benefits

Compensatory payments to be made for the rest of a partner's life, which generally would be Code § 736(a) payments, might be excluded from FICA but would be subject to Code § 409A. See part II.L.7 SE Tax N/A to Qualified Retiring or Deceased Partner.

No state may impose income tax on any retirement income of an individual who is not a resident or domiciliary of that state (as determined under that state's laws).[5550] "Retirement income" includes income from a written plan, program, or arrangement that is in effect immediately

---

[5549] See part II.I 3.8% Tax on Excess Net Investment Income.

[5550] 4 U.S.C. § 114(a). Missouri Private Letter Ruling No. LR 3570 (1/2/2007) held that this statute protected the following payments from state income tax:

> Applicant is a participant of a Retirement Plan (RP) and is also a participant of an Insurance Plan (collectively, the Plans). The purpose of the Plans is to supplement retirement benefits from the Pension Plan (Pension Plan) and the Retirement Plan for eligible corporate officers in recognition of service to their employer. The administrator of the RP is the Corporation and the administrator of the insurance plan is a committee within the Pension Plan.
>
> ….
>
> In this case the Plans are plans or arrangements as described in IRC section 3121(v)(2)(C) and the monthly payments meet the requirements of section 114(b)(1)(I)(i) of Title 4 of the United States Code. Therefore, for purposes of state income tax, the monthly payments from the Plans received by Applicant will be treated as retirement income as defined in section 114(b) of Title 4 of the United States Code.

before retirement begins and provides retirement payments in recognition of prior service to be made to a retired partner,[5551] if the income is from an excess benefit plan[5552] or if the income is part of a series of substantially equal periodic payments payable at least annually for either the life or life expectancy of the recipient (or the joint lives or joint life expectancies of the recipient and a designated beneficiary of the recipient) or a period of not less than 10 years.[5553]

II.Q.8.b.ii.(h). Interaction of Death with Code § 736 Payments

Generally, the retiring partner's payments would consist of:

- Code § 736(a) payments (taxable as ordinary income), grossed up for income taxes as illustrated in the different purchase prices used in parts II.Q.1.a.i.(f) Partnership Use of Same Earnings as S Corporation in Sale of Goodwill and II.Q.1.a.i.(g) Partnership Use of Same Earnings as C Corporation (Either Redemption or No Tax to Seller per Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation) in Sale of Goodwill, would be paid during the retiring partner's life, and

- Code § 736(b) payments, not grossed up but generally tax-free because the deceased partner's successor in interest has received a basis step-up, would be made after the retiring partner's death.[5554]

Perhaps the partnership has life insurance to pay a retired partner. The life insurance is received tax-free (so long as the partnership complies with the rules on employer-owned life insurance, which apply to any 5% partner, whether or not the partner actually works in the business).[5555] Thus, the partnership does not need to deduct payments it makes to the retired partner's beneficiaries. Furthermore, the basis step-up mentioned above, if my assumption is correct, means that there is no capital gain tax for the retired partner's beneficiaries to avoid. Code § 753 denies a basis step-up to Code § 736(a) payments but does not address Code § 736(b) payments, which implies that Code § 736(b) payments receive a basis step-up. Therefore, consider converting Code § 736(a) payments to Code § 736(b) payments when a partner dies, perhaps reducing the payments to take into account that the seller does not need to be grossed up to pay the seller's taxes on the distribution.

[5551] 4 U.S.C. § 114(b)(4) provides:

> For purposes of this section, the term retired partner is an individual who is described as a partner in section 7701(a)(2) of the Internal Revenue Code of 1986 and who is retired under such individual's partnership agreement.

[5552] 4 U.S.C. § 114(b)(1)(I)(ii) refers to:

> a payment received after termination of employment and under a plan, program, or arrangement (to which such employment relates) maintained solely for the purpose of providing retirement benefits for employees in excess of the limitations imposed by 1 or more of sections 401(a)(17), 401(k) , 401(m) , 402(g), 403(b), 408(k), or 415 of such Code or any other limitation on contributions or benefits in such Code on plans to which any of such sections apply.

I have assumed, without verification, that withdrawal from a partnership counts as termination of employment, consistent with the treatment of partners as employees eligible to participate in a qualified retirement plan. Please let me know what you discover when you research this issue.

[5553] 4 U.S.C. § 114(b)(1)(I)(i).

[5554] For the basis step-up, see fns. 5544 and 5545 in part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale.

[5555] See part II.Q.4.g Income Tax Trap for Business-Owned Life Insurance.

II.Q.8.b.iii. Partnership Alternative to Seller-Financed Sale of Goodwill

Is goodwill an asset that belongs to the individual owner or to the entity? Where a non-compete agreement is not in place and business is largely attributable to the close personal relationships that the owner has developed and maintained for decades, goodwill belongs to the owner personally.[5556] Where a contract allocates large amounts to the entity's goodwill and the owner enters into a noncompete agreement to preserve the entity's goodwill, the owner's receipt of noncompetition payments is ordinary income rather than the sale of personal goodwill.[5557] Given that the buyer's deductions relating to goodwill are the same as for a noncompetition agreement,[5558] the seller should consider maximizing the extent to which payments directly to the seller are for personal goodwill rather than a covenant not to compete.[5559]

As a practical matter, often the buyer will be able to pay the promissory note for goodwill only if the business is sufficiently profitable. If the business is not profitable, the seller would need to sue the buyer to enforce the note, and all that lawsuit would accomplish would be a judgment against someone who cannot pay it. The seller's most effective recourse might be to take over the business, which the judgment on the promissory note is unlikely to accomplish without further legal action.

[5556] See part II.Q.1.c.iii Does Goodwill Belong to the Business or to Its Owners or Employees?

[5557] *Muskat v. U.S.*, 554 F.3d 183 (1st Cir. 2009), *aff'g* 101 AFTR 2d 2008-1606 (D.N.H. 2008). When Muskat sold his business to Jac Pac and agreed not to compete, nothing in the contract mentioned that Muskat was selling personal goodwill. The trial court described the negotiations for the sale:

> During the negotiation process, the parties were well-aware of Jac Pac's business goodwill, to which more than $15,000,000 of the purchase price was allocated. Warren testified that he was not aware of any goodwill in the transaction other than Jac Pac's goodwill. The noncompetition agreement defines Goodwill as an asset of Jac Pac including its goodwill and business as a going concern. The purpose of the noncompetition agreement was to protect Jac Pac's Goodwill in the transaction. Muskat acknowledged in the agreement that the noncompetition provisions were necessary to preserve and protect the proprietary rights and the goodwill of [MAC] (including [Jac Pac's goodwill]) and the Related Entities as going concerns. The consideration paid under the agreement was expressly for the covenants not to compete, with no mention of personal goodwill.

The District Court applied First Circuit precedent requiring the taxpayer to produce strong proof before applying tax treatment that varied from the transaction's legal documentation. The First Circuit agreed with the District Court and also clarified what strong proof means: To constitute "strong proof" a taxpayer's evidence must have persuasive power closely resembling the "clear and convincing" evidence required to reform a written contract on the ground of mutual mistake. For a discussion of whether a taxpayer may use substance over form, see also cases cited in fn 5699 in part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).

In *Duffy v. U.S.*, 120 Fed. Cl. 55 (Ct. Fed. Cl. 2015), *aff'd* 117 A.F.T.R.2d 2016-397 (Fed. Cir. 2016), the recipient of proceeds in a settlement in a case for retaliatory firing asserted that the settlement was for personal injury or as compensation for impaired personal goodwill, the latter because he could not find a job because his former employer would not give him a reference. However, the settlement agreement provided that the payment was for the exclusive purpose of avoiding the expense and inconvenience of further litigation. The Court of Claims used that language to throw out the taxpayer's personal injury and goodwill assertions and held for the IRS. The Federal Circuit cited the quoted language and also noted, Mr. Duffy simply extinguished his claims, and any goodwill in his business remained with him.

[5558] Compare Code § 197(d)(1)(A) (goodwill) with Code § 197(d)(1)(E) (covenant not to compete).

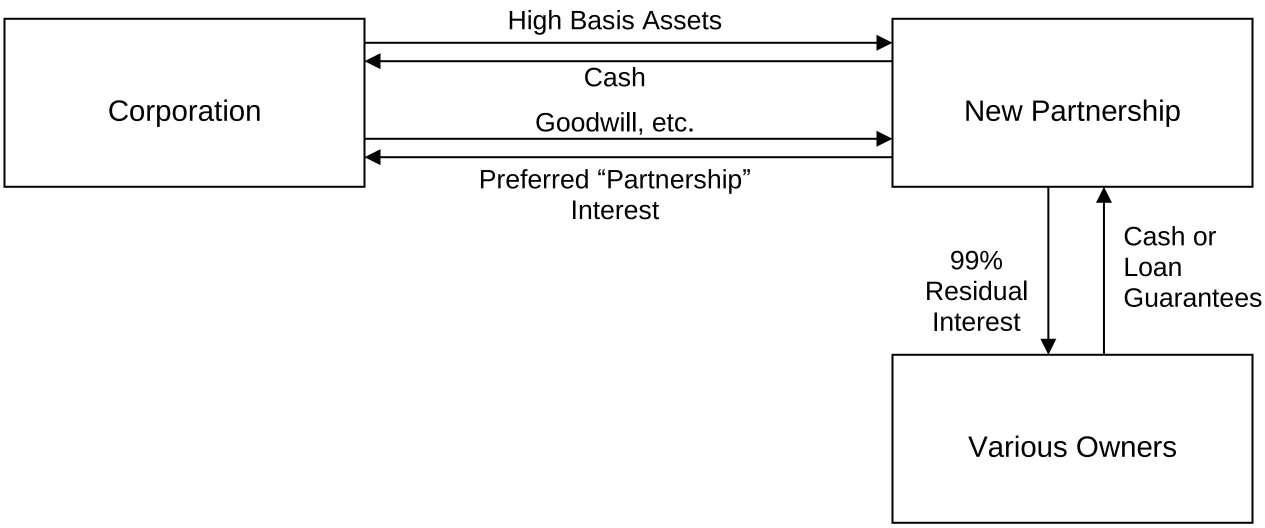
[5559] One might also consider whether applicable state law allows the buyer more latitude in imposing restrictions relating to sale of goodwill than for a noncompetition agreement and whether the seller is trading off state law rights for favorable tax treatment.

The seller might prefer a mechanism in which:

- The seller has a quicker route to gaining control over the business if the buyer does not attain the results necessary to pay the seller.

- The deal is more tax-efficient than the traditional sale of goodwill.

This mechanism recognizes that, although the transfer of goodwill is technically a debt-financed deal, it really carries risks similar to an equity interest. Below is a diagram showing the transaction, in which the seller contributes the goodwill to a new entity in exchange for what for tax purposes is considered a preferred partnership interest.[5560]



This new arrangement needs to involve a real sharing of profits. Therefore, ideally the existing corporation would continue to own a residual interest. The amount and duration of the retained residual interest depend on the facts and circumstances.

The sale of high basis assets is optional. The high basis assets can instead be included in the contribution to capital. Because preferred partnership rates are higher than interest rates, the new partnership – essentially the various owners who own a 99% residual interest in the new partnership in the agreement – would be incurring a higher cost of capital than if the partnership bought the assets for a note. On the other hand, transferring all assets in the business in one fell swoop is appealing and might be the most practical; for how to transfer assets by operation of law to avoid issues that might arise from piecemeal or inadvertently incomplete transfers, see part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.

Usually this structure is not for new owners but rather so that the existing owners can own the business in a more tax-efficient structure. The shareholders, as individual owners of the new entity, sign a covenant not to compete (together with other provisions protecting the new entity's intellectual property, etc.) in consideration for their interest in the new entity, as well as contributing some reasonable amount of cash. When an individual retires, that person's capital

[5560] For more information on preferred partnerships, see part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

account is returned over time, and the perpetual residual profits interest is converted to a preferred profits interest until a target amount is reached. This new preferred profits interest would consist of Code § 736(a) payments (taxable as ordinary income), grossed up for income taxes, and Code § 736(b) payments, not grossed up; see part II.Q.8.b.ii.(h) Interaction of Death with Code § 736 Payments.

For the new entity's structure, see part II.E Recommended Structure for Entities, except that this arrangement involves the corporate partner owning not only the 1% of profits commonly shared but also a preferred partnership interest.

Let's look at the non-tax financial issues, then discuss the tax issues in addition to the advantages discussed in parts II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis and II.Q.7.h Distributing Assets; Drop-Down into Partnership.

II.Q.8.b.iii.(a). Non-Tax Financial Issues When Using a Preferred Partnership to Acquire Goodwill and Other Assets

The seller receives preferred payments equal to the lesser of the entity's net operating cash flow or a target amount before any amounts are distributed to the buyer. Because the payments are targets and not mandatory, they do not constitute debt or a fixed obligation; rather, they are a return of investment to the owners. Stock purchases for a note and deferred compensation constitute liabilities on financial statement that can impair financing– enough that such arrangements might be considered highly unattractive. This liability might very well be required to be disclosed in financial statements even if the event triggering the notes or deferred compensation have not occurred and are unlikely to occur soon. Clients and advisors tend not to consider this issue when planning, so be sure to raise it early and have the CPA directly address this issue.

If the target is not attained, then:

- The deficiency is added to the following year's target amount.
- The seller might be given control over certain aspects of running the business. This could be as modest as limiting the buyer's compensation for services rendered or as far-reaching as taking over control of part or all of the business' operations. The partial or total shift on control would be a focal point of negotiations.

These provisions would be built directly into the partnership agreement. So that they know that authority has not been transferred to the seller, third-party lenders would require assurances that the buyer is complying with the agreement with the seller, thus providing an independent check on the buyer's compliance with the deal.

After the seller has received all that has been bargained-for, the seller would no longer be an owner of the entity.

II.Q.8.b.iii.(b). Tax Issues When Transferring Assets to New Entity

Suppose the seller is an S corporation. If all of an S corporation's assets were sold to a new entity, the corporation would recognize income taxable to its shareholder. The sale of goodwill would be taxable, but the new entity's deduction for that payment would be spread over 180 months (15 years).[5561] Furthermore, if the IRS were to find that goodwill was transferred to the new entity at a substantial value, without the S corporation retaining a sufficient interest in the new entity, then:

- 1. The S corporation would have income equal to the goodwill.
- 2. The shareholders would have immediate dividend income equal to the goodwill, which they then contributed to the new entity without receiving an immediate deduction (the deduction would be spread over 180 months).

If the entity transfers its assets to a new LLC, retaining a preferred interest at no more than 150% of the AFR[5562] that distributes only to the extent of operating cash flow, a sale is presumed not to have occurred.[5563] If the S corporation is receiving a return whose present value (using the AFR) is equal to the value of the contributed goodwill (if any), the S corporation should not be treated as having distributed such goodwill to its shareholders. It might be advisable to give the corporation a small but significant profits interest in the LLC.

This concept of transferring to a new LLC also works better when the transferring entity is a partnership. Suppose the transferring entity sells all of its assets in exchange for a promissory note, and the buyer is unable to make all of the payments. Any basis remaining in the note would need to be written off as a bad debt.[5564] Contrast that to a partnership redemption, in which distributions or payments generally are applied to basis first and generate a gain only after recovering basis,[5565] subject to possible application of the disguised sale rules for payments made in the first two years.[5566]

II.Q.8.c. Related Party Sales of Non-Capital Assets by or to Partnerships

Gain on the sale of property is ordinary income if it is not a capital asset in the hands of the transferee and the sale is between:[5567]

- a partnership and a person owning, directly or indirectly, more than 50% of the capital interest, or profits interest, in such partnership, or
- two partnerships in which the same persons own, directly or indirectly, more than 50% of the capital interest or profits interests.

In applying this rule, "the ownership of a capital or profits interest in a partnership shall be determined in accordance with the rules for constructive ownership of stock provided in

[5561] Code § 197 provides for 15 years, and Reg. § 1.197-2(f)(1)(i) applies this starting with a particular month.
[5562] AFR meaning the applicable federal rate provided under the tax laws as an arms-length interest rate.
[5563] See part II.M.3.e.i.(b) Distributions Presumed Not to Be Disguised Sales.
[5564] CCA 201328031.
[5565] See parts II.Q.8.b.i Distribution of Property by a Partnership and II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.
[5566] See part II.M.3.e Exception: Disguised Sale, explaining the rules and simple steps to avoid their application.
[5567] Code § 707(b)(2). Code § 707(b)(1) lists the same parties.

section 267(c) other than paragraph (3) of such section."[5568] For Code § 267(c), see part II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses.[5569]

For an explanation of regulations proposed November 27, 2023, see text accompanying and following fn 1417 in part II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses. Note that the Tax Reform Act of 1986 modified Code § 707(b), so keep in mind that some of the prior authority mentioned in the rest of this part II.Q.8.c may reflect prior law.

An irrevocable trust paying mandatory income to the grantor's surviving spouse, remainder to the grantor's children is not related under Code § 267(b) or 707(b)(1) with respect to grantor trusts deemed owned by the grantor's two siblings, respectively.[5570]

In applying the first bullet point above, grantor trusts are disregarded from their deemed owners. See CCA 201343021.[5571]

Property subject to this rule includes trade accounts receivable, inventory, stock in trade, and depreciable or real property used in the trade of business.[5572] If a business is being sold and a related partnership needs to transfer assets as part of the sale, that asset transfer may implicate Code § 707(b)(2) if it is to the business on or before the sale. The related partnership may need to sell either to the buyer separately or to the business after the buyer owns the business.

Rev. Rul. 67-105 provides:

> Advice has been requested whether a partnership, owned entirely by A and B, may sell a portion of its real property, held for more than 6 months, to another partnership owned entirely by the adult children of A and B, and treat the gain on such sale as long-term capital gain.
>
> A and B are the only partners in X, a valid partnership for Federal income tax purposes, which owns and operates various citrus groves. X proposes to sell one of its groves to Y, a valid partnership for Federal income tax purposes, for use in Y's fruit-growing business. The sale to Y will be at fair market value and in an arms-length transaction. All of the partners in Y are children of A and B and operate this partnership independently of their parents. Neither A nor B is a member of the Y partnership.
>
> Section 707(b)(2)(B) of the Internal Revenue Code of 1954 provides that in the case of a sale or exchange, directly or indirectly, of property which in the hands of the transferee is property other than a capital asset (as defined in section 1221 of the Code), any recognized gain shall be considered as gain from the sale or exchange of property other than a capital asset, if the sale or exchange is between partnerships in which the same persons own, directly or indirectly, more than 80 percent of the capital or profits interests in each partnership. See also section 1.707-1(b)(2) of the Income Tax Regulations.
>
> In determining ownership for the purposes of section 707(b)(2)(B) of the Code, the rules for the constructive ownership of stock provided in section 267(c)(1), (2), (4), and (5) of

[5568] Code § 707(b)(3).
[5569] Code § 267(c) and Reg. § 1.267(c)-1 are reproduced in the text following fn 1423 in that part.
[5570] Letter Ruling 200920032.
[5571] See fn 6523 in part III.B.2.d.i.(a) General Concepts of the Effect of Irrevocable Grantor Trust Treatment on Federal Income Taxation.
[5572] Reg. § 1.707-1(b)(2).

> the Code are applied pursuant to section 707(b)(3) of the Code. Under the rule provided by section 267(c)(2) of the Code, an individual shall, for the purpose of section 707(b)(2)(B) of the Code, be considered as owning the interests in a partnership owned, directly or indirectly, by or for his family. The family of an individual is defined in section 267(c)(4) of the Code, as including brothers, and sisters, spouse, ancestors, and lineal descendants.
>
> Accordingly, A and B must be regarded as the owners of the interests in the Y partnership owned by their children. See *Max A. Burde v. Commissioner*, 43 T.C. 252 (1964), *affirmed* 352 F. 2d 995 (1965), *certiorari denied*, 383 U.S. 966 (1966). Thus, the gain realized by the X partnership upon the sale of its citrus grove to Y partnership for use in Y's business will be treated as gain from the sale of property other than a capital asset.

Dyess v. Commissioner, T.C. Memo. 1993-219, reasoned and held:

> The parties in this case agree that the sale of Foxfire Village involved property described in section 707(b)(2), that is, property, which, in the hands of the transferee, is property other than a capital asset as defined in section 1221. Thus, the issue is whether petitioner and Nace owned 80 percent or less of the Foxfire partnership on the date of the sale, thereby saving the transaction from the application of section 707(b)(2)(B). This depends upon petitioner's argument that the Court should disregard the form of the Foxfire limited partnership agreement executed on October 4, 1982, and rely upon what petitioner views as the substance of the transaction.
>
> Respondent argues that section 707(b)(2)(B) is a concisely and clearly drafted provision that must be applied as it is written. Respondent points out that section 707(b)(2)(B) provides a bright-line test and gives plain notice to taxpayers concerning when its restrictions apply. Since, on October 4, 1982, petitioner and Nace owned and controlled 100 percent of Equity and 92.5 percent of Foxfire, respondent concludes that petitioner improperly classified the income he received from the sale of Foxfire Village as capital gain rather than as ordinary income as mandated by section 707(b)(2)(B).
>
> Petitioner admits that, at the time of the sale of property, he and Nace technically owned and controlled more than 80 percent of the partnership interests in Equity and in Foxfire. However, petitioner asserts that the substance of the transaction, rather than its form, dictates that the transaction be viewed not as one between related entities (controlled partnerships) but as one between Equity and a partnership of petitioner, Nace, and a sufficient number of unrelated investors (so as not to constitute controlled partnerships).
>
> Petitioner argues that the substance is readily apparent from the events leading to and occurring after the transaction and is quite different from the mechanical form of the transaction. Petitioner states that he had a commitment and prearranged plan to bring in local, unrelated investors as limited partners. The transfer of the property to Foxfire would have been futile, he says, without the completion of a series of transactions that transferred the limited interests to the outside investors. Without that series, he argues, there would have been no need to create a limited partnership, in light of the fact that the whole purpose of the venture was to provide capital and liquidity to a failing real estate holding.

Petitioner contends that at the time of the transaction he was holding, in an escrow-like arrangement, the limited partnership interests in conjunction with Nace merely for convenience and to avoid unnecessary expenses prior to transferring the interests to the limited partners once they had paid their capital contributions. Petitioner asserts that the holding of the limited partnership interests by himself and Nace was merely an accommodation to avoid having expensive Articles of Limited Partnership with escrow agreements.9 Petitioner asserts that the time between the acquisition of the property and the entry of all of the limited partners was merely 30 to 45 days after October 4, 1982.10 He contends that neither he nor Nace received any tax benefits from the holding of the limited partnership interests during this interim period.11 Therefore, petitioner concludes that, when the substance rather than the form of the transaction is considered, Equity's sale of Foxfire Village to Foxfire does not violate section 707(b)(2)(B).

Respondent does not dispute that petitioner is entitled to have the substance of the transaction examined, as it is an established principle of tax law that the substance of a transaction will govern over its form. *Commissioner v. Court Holding Co.*, 324 U.S. 331 (1945); *Gregory v. Helvering*, 293 U.S. 465 (1935); *Kuper v. Commissioner*, 533 F.2d 152, 155 (5th Cir. 1976), *affg. in part and revg. in part* 61 T.C. 624 (1974). Nevertheless, respondent asserts that the substance of the transaction in this case is fully consistent with its form, and that, as a result, section 707(b)(2)(B) is applicable.

Respondent suggests that substance over form, specifically the step transaction doctrine invoked by petitioner, may not be applicable in cases involving provisions such as section 707(b)(2)(B) that mandate restrictive tax treatment for transactions between related parties.[12] Even if the step transaction doctrine is applicable, respondent asserts that petitioner has offered no evidence proving that the form of the partnership agreement does not comport with the substance of the transaction at issue.

[12] In support of this suggestion respondent cites *King Enterprises, Inc. v. United States*, 189 Ct. Cl. 466, 477, 418 F.2d 511, 516 (1969): "aphorisms about 'closely related steps' and 'integrated transactions' may have different meanings in different contexts, and … there may be not one rule, but several, depending on the substantive provision of the Code to which they are being applied" (quoting Mintz & Plumb, Step Transactions, pp. 247, 252-253 (1954)).

As another rule of substance over form, the step transaction doctrine "treats a series of formally separate 'steps' as a single transaction if such steps are in substance integrated, interdependent, and focused toward a particular result". *Penrod v. Commissioner*, 88 T.C. 1415, 1428 (1987).[13] As described in *Smith v. Commissioner*, 78 T.C. 350, 389 (1982):

> The step transaction doctrine generally applies in cases where a taxpayer seeks to get from point A to point D and does so stopping in between at points B and C. The whole purpose of the unnecessary stops is to achieve tax consequences differing from those which a direct path from A to D would have produced. In such a situation, courts are not bound by the twisted path taken by the taxpayer, and the intervening stops may be disregarded or rearranged. [Citation omitted.]

[13] See also *Barter v. Commissioner*, T.C. Memo. 1990-142.

Courts have applied three tests in deciding whether to employ the step transaction doctrine in a particular situation: (1) the binding commitment test, (2) the end result test, and (3) the interdependence test. Under the binding commitment test, a series of transactions are collapsed if, at the time the first step is taken, there is a binding commitment to undertake the later steps. *Commissioner v. Gordon*, 391 U.S. 83, 96 (1968). Under the end result test, the step transaction doctrine is applicable if it appears that a series of formally separate steps are really prearranged parts of a single transaction intended from the outset to reach an ultimate result. *King Enterprises, Inc. v. United States*, 189 Ct. Cl. 466, 475, 418 F.2d 511, 516 (1969). The interdependence test focuses on "whether on a reasonable interpretation of objective facts the steps are so interdependent that the legal relations created by one transaction would have been fruitless without a completion of the series." *Redding v. Commissioner*, 630 F.2d 1169, 1177 (7th Cir. 1980), *revg. and remanding* 71 T.C. 597 (1979) (quoting Paul, Selected Studies in Federal Taxation 200, 254 (2d series 1938)).

The final limited partnership agreement for Foxfire (the Agreement) is clear and unambiguous in its language, but petitioner seeks to vary its meaning. In doing so, petitioner invokes this Court's "strong proof" rule. The strong proof rule requires that a taxpayer, who seeks to establish a position at variance with the language of the written agreement to which he or she was a party, must present more than a preponderance of the evidence that the terms of the written instrument do not reflect business reality and the actual intentions of the contracting parties. *Elrod v. Commissioner*, 87 T.C. 1046, 1066 (1986); *G C Services Corp. v. Commissioner*, 73 T.C. 406, 412 (1979). Alternatively, respondent asserts that we should require petitioner to meet the *Danielson* standard, a parol evidence rule of substantive law that proposes that "a party can challenge the tax consequences of his agreement as construed by the Commissioner only by adducing proof which in an action between the parties to the agreement would be admissible to alter that construction or to show its unenforceability because of mistake, undue influence, fraud, duress, etc.". *Commissioner v. Danielson*, 378 F.2d 771, 775 (3d Cir. 1967), *vacating and remanding* 44 T.C. 549 (1965), *cert. denied* 389 U.S. 858 (1967). The Court of Appeals for the Fifth Circuit, to which an appeal in this case would lie, has declined to follow the strong proof rule in certain situations, applying instead the Danielson approach. *Spector v. Commissioner*, 641 F.2d 376 (5th Cir. 1981), *revg. and remanding* 71 T.C. 1017 (1979), *cert. denied* 454 U.S. 868 (1981). In the instant case, we would reach the same result under either the strong proof rule or the *Danielson* rule.

The uncontroverted facts of the case at issue are that, on October 4, 1982, petitioner and Nace held a combined 92.5-percent ownership in Foxfire, which on the day of its formation bought real property from another partnership (Equity) of which they owned a combined 100 percent. Petitioner and Nace gave notes to the Foxfire partnership in the total amount of $185,000 and executed a formal, binding partnership agreement. They were directly involved in the drafting of that agreement. The Agreement in no way suggests that there were undisclosed limited partners in Foxfire as of October 4, 1982.

Petitioner argues that the Letter, which was drafted and executed to waive the requirement of the Agreement that an interest could not be sold without the prior offer to and rejection by the other partners, indicated that there were other limited partners in Foxfire. We do not agree. The prospective investors who signed that Letter were, on October 4, 1982, under no legally binding commitments to become limited partners, and they actually signed the Letter sometime after October 4, 1982. The Letter, seeking to waive restrictions on the sale of a partnership interest, merely provides that additional limited partners can be brought into the partnership in the future. Neither the Agreement nor the Letter provides for the entry of limited partners on the date of the formation of the Foxfire partnership as petitioner contends. That Letter does not change the fact that, at the time of the sale of the Foxfire Village property, petitioner and Nace were the owners of 92.5 percent of Foxfire. Although the people contacted about the investment opportunity orally expressed strong interest in purchasing interests in Foxfire, they would not commit to investing until after the formation of Foxfire and its acquisition of the Foxfire Village property. These prospective investors, other than Laube, would not commit to investing before seeing the documentation of the transaction and having it reviewed by their personal attorneys or accountants. Just as the potential investors were not bound to make investments, petitioner and Nace were not bound to sell to the previously contacted potential investors. They intended to sell to whoever first offered the money to purchase a limited interest.

The substance or economic reality of the transaction, *i.e.*, the infusion of capital by bringing in limited partners, was in fact accomplished by the form or structure of the limited partnership agreement that was actually used. That economic result could also have been accomplished by other forms or structures. What petitioner complains of is not the failure to achieve the substance or economic reality of the transaction, but the personal tax consequences to him of the form or structure that was used for that purpose.

Petitioner had, or should have had, knowledge of the tax consequences associated with the different forms available for the structure of the limited partnership agreement. The record shows that petitioner consulted Jackson about possible forms of a limited partnership. He also consulted him about tax considerations, but the record is silent as to the nature of any tax advice he received. The initial version of the partnership agreement drafted by Jackson contemplated first selling the 10 limited partnership interests for $150,000 and then having the partnership purchase an undivided 75-percent interest in the Foxfire Village property from Equity, with petitioner and Nace to contribute their remaining 25 percent of that property as their capital contribution. Had that structure been used, the limited partners would have held a 75-percent interest in the partnership at the time of the purchase of the property from Equity. In that event, the restriction of section 707(b)(2)(B) regarding sales of property between “controlled partnerships” would not appear to come into play.

The record does not contain any satisfactory explanation as to why that draft version was not used. See supra note 3. In any event, a different version was executed, with three partners and with petitioner and Nace holding 92.5 percent of the partnership interests on October 4, 1982, the date the partnership was formed and the date of the sale of the property. Although Jackson was under the misimpression that the limited partnership interests had already been sold or virtually sold, he knew the partnership would be changed as the limited partners came in. He drafted a First Amendment to Certificate of Limited Partnership with blank lines so the names of the limited partners could be added later. In fact, three more such amendments were drafted, executed, and recorded in the county court by the time the last of the limited partners had purchased their interests in March of 1983.

Petitioner cannot now disavow the route he in fact followed for a different route he might have but did not take. Furthermore, one cannot find, from the face of the Agreement or from the facts as they developed, that outside limited partners were actually present and part of the partnership on the date of its formation as petitioner contends. The facts show there were no outside limited partners (other than Laube) at that time. Petitioner has met neither the strong proof test nor the *Danielson* test and cannot now successfully invoke the substance over form doctrine to disavow the manner in which the Foxfire partnership was structured and the limited partnership interests sold.

The transaction at issue, thus, was in substance and in form a sale between related partnerships, falling under the provisions of section 707(b)(2)(B). In this case, petitioner is not asking us merely to "skip, collapse, or rearrange the steps he employed[,] … [h]e is instead asking that we accept … new … steps or events that did not take place. The step transaction doctrine cannot be stretched so far". *Glacier State Electric Supply Co. v. Commissioner*, 80 T.C. 1047, 1057-1058 (1983). We must rely upon the established principle that "a taxpayer is bound by what he did and he cannot prevail upon the basis of what he could have done but did not do." *Island Gas, Inc. v. Commissioner*, 30 T.C. 787, 795 (1958). See also *Commissioner v. National Alfalfa Dehydrating & Milling Co.*, 417 U.S. 134, 149 (1974), where the Supreme Court stated:

> This Court has observed repeatedly that, while a taxpayer is free to organize his affairs as he chooses, nevertheless, once having done so, he must accept the tax consequences of his choice, whether contemplated or not … and may not enjoy the benefit of some other route he might have chosen to follow but did not.

On brief, petitioner raises a new argument that, under the "interim closing of the books" method, he was never in violation of section 707(b)(2)(B) as he was always deemed to have less than the prohibited percentage of ownership in Foxfire. Petitioner asserts that, when the interim closing of the books method is applied to the partnership, the outside investors, who entered the partnership on October 14, 1982, are deemed to have owned their limited partnership interests as of October 4, 1982. There is no evidence in the record to suggest that Foxfire ever used or contemplated using the interim closing of the books method.[14]

[14] There is no indication that Foxfire closed its books when limited partners were taken in in October or again in November of 1982. There is a strong suggestion that that did not occur, since the loss for 1982 was allocated according to the percentages of interest as of December 31, 1982.

In any event, petitioner has misconstrued the purpose of the interim closing of the books accounting method. When a partner sells or exchanges a portion of or all of his partnership interest, his distributive share of partnership items for the portion of the taxable year he held that interest must be determined. Sec. 706(c) and (d). Prior to the Tax Reform Act of 1976, partners who entered partnerships late in the tax year were nevertheless taking into account partnership items incurred prior to their entries (*e.g.*, "retroactive allocations" of partnership losses). The Tax Reform Act of 1976 provided that, when partners' interests change during the taxable year, each partner's share of various items of partnership income, gain, loss, deduction, and credit is to be determined by taking into account each partner's varying interest in the partnership during the taxable year. H. Rept. 98-861 (1984), 1984-3 C.B. (Vol.2) 1, 109. Section 72(a) of Public Law 98-369, 98 Stat. 494, 589, again addressed the retroactive allocation issue, adding a new subsection (d) to section 706 (relating to taxable years of partner and partnership). Section 706(d)(1) generally provides, with exceptions for certain cash basis items, that

> if during any taxable year of the partnership there is a change in any partner's interest in the partnership, each partner's distributive share of any item of income, gain, loss deduction, or credit of the partnership for such taxable year shall be determined by the use of any method prescribed by the Secretary by regulations which takes into account the varying interests of the partners in the partnership during such taxable year.

We have recognized that the determination of the varying interests of the partners may be made by using the interim closing of the books method, the proration method, or any other reasonable method. *Richardson v. Commissioner*, 76 T.C. 512 (1981), *affd*. 693 F.2d 1189 (5th Cir. 1982); sec. 1.706-1(c)(2)(ii), Income Tax Regs. We described the interim closing of the books accounting method in *Cottle v. Commissioner*, 89 T.C. 467, 495 (1987) as follows:

> The interim closing of the books method requires a closing of the partnership books as of the date of entry of the new partner and the computation of the various items of partnership income, gain, loss, deduction, and credit as of that date.

The interim closing of the books method would not help petitioner if the books were closed "as of the date of entry" of the new partners. Petitioner essentially relies on an accounting convention to avoid the clear terms of Foxfire's limited partnership agreement and the proscription of section 707(b)(2)(B). When Congress enacted section 706(d) in 1984, it considered but did not pass a monthly convention.

The legislative history of 706(d) indicates that the Senate amendment contained an explicit provision for a monthly convention: "when there is a disposition of less than an entire interest in a partnership by a partner (including entry of a new partner), the partnership may elect (on an annual basis) to determine the varying interests of the partners by using a monthly convention that treats any changes in any partner's interest as occurring on the first day of the month." H. Rept. 98-861, supra 1984-3 C.B. (Vol. 2) at 110. The conference agreement eliminated the monthly convention and determined that the statutory provision of a monthly convention as adopted by the Senate was unnecessary since the Secretary intended to provide for a monthly convention by regulation. *Id*. at 112. The legislative history also indicates that the Secretary may provide for other conventions and "may deny the use of any convention when the occurrence of significant, discrete events (e.g., a large, unusual gain or loss) would mean that use of a convention could result in significant tax avoidance". *Id*.

The Commissioner issued an information release that permitted partnerships using the interim closing of the books method to use a mid-month convention, to be effective until issuance of regulations.[15] I.R.S. News Release IR-84-129 (Dec. 13, 1984). The information release was issued in 1984, after the taxable year at issue in this case and provided as follows:

> The Internal Revenue Service today announced that partnerships using the "interim-closing-of-the-books" method to take into account the varying interests of partners during a taxable year will be permitted to use a semi-monthly convention….

Under a semi-monthly convention, this [each partner's distributive share] is determined by treating partners entering during the first 15 days of the month as entering on the first day of the month and partners entering after the 15th day of the month (but before the end of the month) as entering on the 16th day of the month, except to the extent section 706(c)(2)(A) of the Code applies. Partnerships that use the proration method will not be permitted to use a semi-monthly convention, but rather will be required to use a daily convention.

[15] No such regulations have yet been issued. [my comment: for updates to this issue, see part III.B.2.j.iii Allocations upon Change of Interest in a Partnership.

The release does not indicate that the mid-month convention may be used by taxpayers for tax years before 1984.

The interim closing of the books method and the mid-month convention are accounting methods designed to make the computation of varying partnership interests easier when a partnership interest has been sold or exchanged during the taxable year. However, there remains the obligation to use them in a manner that ensures that the tax treatment of various partnership items reflects economic reality. The determination to be made for section 707(b)(2)(B), however, is not a matter of accounting methods or conventions. Section 707(b)(2)(B) requires that a partner's percentage ownership of the capital interest or the profits interest be determined on a particular date, at the time the property is sold or exchanged, to establish the presence or absence of controlled partnerships (i.e., partnerships in which the same persons own more than 80 percent).[16] Nothing in the legislative history of section 706(d) suggests that the convention is to be extended beyond distributive share determinations to impute ownership interests for purposes of section 707(b)(2)(B). Section 707(b)(3) explicitly states that the constructive ownership rules of section 267(c) are to be used to determine percentage ownership of a capital or profits interest.

[16] The current version of sec. 707(b)(2)(B) has reduced the percentage to more than 50 percent.

In any event, as noted earlier, the record does not indicate that Foxfire used the interim closing of the books method in 1982, and therefore would not be entitled to use the mid-month convention. The parties have stipulated that, on its 1982 partnership return, Foxfire reported a loss, which was allocated among the partners in accordance with ownership interests as of December 31, 1982. Thus, Equity and Foxfire constitute two controlled partnerships, and section 707(b)(2)(B) applies to the sale of Foxfire Village by Equity to Foxfire.

The corporate provision most closely related to this one is part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), including possible ordinary income taxation when selling to a controlled corporation interests in a partnership holding depreciable property.[5573]

[5573] See text accompanying fns. 5087-5092.

II.Q.8.d. Partnership Division

For an overview with helpful charts and diagrams, see Borden, "Navigating State Law and Tax Issues Raised by Partnership and LLC Reorganizations," *Business Entities* (Jul./Aug. 2014).[5574]

II.Q.8.d.i. Partnership Division - Generally

In the case of a division of a partnership into two or more partnerships, the resulting partnerships (other than any resulting partnership the members of which had an interest of 50% or less in the capital and profits of the prior partnership) are a continuation of the prior partnership.[5575] Thus, generally a partnership can be divided without immediate income tax recognition.[5576]

However, some divisions might be taxable.[5577] Also, tax elections might be revoked and re-started for the new partnership. Furthermore, a division could re-start the seven-year waiting period for measuring Code § 704(c) responsibility; however, if each partner's overall interest in

[5574] RIA Checkpoint *Catalyst*, ¶ 218:123 Tax Characterization of Division Transaction, discussed a ruling: In IRS Letter Ruling 201619001, the IRS respected the form of a transaction when a partnership division was one step of a larger transaction. In the ruling, an existing partnership (X) divided into two partnerships, X and M, in a transaction in which the partners of X before the division owned identical interests in both X and M after the division. Following the division, M transferred all of its assets to a third partnership (OP) in exchange for partnership interests in OP and other property (stock of the principal partner of OP, a real estate investment trust (REIT stock)). M then liquidated, distributing the partnership interests to some of its partners and the REIT stock to other partners. The partners receiving the REIT stock agreed to treat the transaction as if they sold their partnership interests in M to OP (see ¶ 218:114). The IRS ruled that the transaction would be treated in accordance with its form—i.e., as a division followed by a merger—and that the partners receiving the REIT stock would be treated as having sold their interests to the resulting merged partnership. IRS Letter Ruling 201619001

> Comment: The IRS could have disregarded the division and recharacterized the transaction in IRS Letter Ruling 201619001 as a transfer of property by X directly to OP in exchange for partnership interests and other property (the REIT stock). In that case, the transaction would have been treated as a part-sale, part-contribution under IRC § 707(a)(2)(B). See Topic #206, Transactions Between Partner and Partnership, at ¶ 206:150. Presumably, the form of the transaction was intended to permit the gain attributable to the receipt of the REIT stock to be taken into account solely by the partners of X that received the stock.

[5575] Code § 708(b)(2)(B). Even an apparently taxable division might have less adverse tax effects than one might have thought. When a court ordered a partnership's assets sold and three of five partners bought all of the assets and continued operation of the business, the transaction was not treated as a sale of partnership assets to the three remaining partners but rather was considered as a sale or a liquidation of the partnership interests of the two withdrawing partners. Rev. Rul. 66-264.

[5576] Reg. § 1.708-1(d).

[5577] If a foreign person is directly or indirectly involved, see the discussion of when Code § 721(a) does not apply to any deemed contribution to a partnership in part II.M.3.g Exception: Foreign Partner (among various other exceptions to Code § 721(a).

each partnership property does not change, then Code § 704(c) responsibility would not be affected.[5578] Below are the rules governing whether the above events occur.[5579]

II.Q.8.d.ii. Which Partnership Keeps Original Partnership's Tax Identity?

When a partnership divides into two or more partnerships, any resulting partnership(s)[5580] shall be considered a continuation of the prior partnership[5581] if the members of the resulting partnership(s) had an interest of more than 50% in the capital and profits of the prior partnership.[5582]

[5578] The preamble to T.D. 8925 provides:

> To the extent that a partnership division merely affects a restructuring of the form in which the partners hold property (that is, each partner's overall interest in each partnership property does not change), the IRS and Treasury agree that a partnership division should not create new section 704(c) property or section 737 net precontribution gain. However, it is not clear that this result is necessarily appropriate where a division is non-pro rata as to the partners, where some property is extracted from or added to the partnerships in connection with the division, or where new partners are added to the ownership group in connection with the division. The IRS and Treasury intend to study this issue and request comments in this regard.

McKee, Nelson & Whitmire, *Federal Taxation of Partnerships & Partners* (WG&L), ¶ 13.06 Partnership Terminations and Continuations Resulting From Mergers and Divisions, opines:

> The authors believe that, unless there are extenuating circumstances, a division should never be the occasion for the creation of new § 704(c) property or § 737 net precontribution gain. The justification for this conclusion flows from the very nature of a division; it is a restructuring of the form in which partners hold property through partnerships. There are no additions or deletions of property to or from the partnership pool. There is no change in the composition of the partners as a group. Instead of owning all the property through a single partnership, the partners now own it through several partnerships. Why should a transaction that involves so little change be the occasion for the imposition of such draconian rules?
>
> The authors' view is consistent with the rules applicable to § 708(b)(1)(B) terminations which, unlike divisions, involve substantial changes in the composition of the partner group. Both the § 704(c)(1)(B) Regulations and the § 737 Regulations provide that these provisions do not apply to the deemed distribution of interests in the new partnership that is caused by the termination. Subsequent distributions by the new partnership may trigger § 704(c)(1)(B) or § 737 with respect to partners in the new partnership who were partners in the terminated partnership, but only to the same extent they would have been triggered without the termination. [citing Reg. §§ 1.704-3(c)(3), 1.737-2(a).] A similar rule should apply to divisions. While further developments are anticipated, they are not expected any time soon.

[5579] See McKee, Nelson & Whitmire, *Federal Taxation of Partnerships & Partners* (WG&L), ¶ 13.06 Partnership Terminations and Continuations Resulting From Mergers and Divisions. Also note that Reg. § 1.708-1(d)(6) provides:

> If any transactions described in paragraph (d)(3) of this section are part of a larger series of transactions, and the substance of the larger series of transactions is inconsistent with following the form prescribed in such paragraph, the Commissioner may disregard such form, and may recast the larger series of transactions in accordance with their substance.

[5580] As defined in Reg. § 1.708-1(d)(4)(iv), which provides that a resulting partnership is a partnership resulting from the division that exists under applicable jurisdictional law after the division and that has at least two partners who were partners in the prior partnership. For example, where a prior partnership divides into two partnerships, both partnerships existing after the division are resulting partnerships.

[5581] As defined in Reg. § 1.708-1(d)(4)(ii), which provides that the prior partnership is the partnership subject to division that exists under applicable jurisdictional law before the division.

[5582] Reg. § 1.708-1(d)(1).

Any other resulting partnership will not be considered a continuation of the prior partnership but will be considered a new partnership.[5583]

If the members of none of the resulting partnerships owned an interest of more than 50% in the capital and profits of the prior partnership, none of the resulting partnerships will be considered a continuation of the prior partnership, and the prior partnership will be considered to have terminated.[5584]

Where members of a partnership which has been divided into two or more partnerships do not become members of a resulting partnership which is considered a continuation of the prior partnership, such members' interests shall be considered liquidated as of the date of the division.[5585]

The resulting partnership that is treated as the divided partnership[5586] shall file a return for the taxable year of the partnership that has been divided and shall include the name, address, and employer identification number (EIN) of the prior partnership. [5587]

All other resulting partnerships that are regarded as continuing and new partnerships shall file separate returns for the taxable year beginning on the day after the date of the division with new EINs for each partnership.[5588]

All resulting partnerships that are regarded as continuations of a prior partnership are subject to preexisting elections that were made by that prior partnership.[5589] A subsequent election that is made by a resulting partnership does not affect the other resulting partnerships.[5590]

[5583] Reg. § 1.708-1(d)(1).
[5584] Reg. § 1.708-1(d)(1).
[5585] Reg. § 1.708-1(d)(1).
[5586] As defined in Reg. § 1.708-1(d)(4)(i), which provides as follows:

> The divided partnership is the continuing partnership which is treated, for Federal income tax purposes, as transferring the assets and liabilities to the recipient partnership or partnerships, either directly (under the assets-over form) or indirectly (under the assets-up form). If the resulting partnership that, in form, transferred the assets and liabilities in connection with the division is a continuation of the prior partnership, then such resulting partnership will be treated as the divided partnership. If a partnership divides into two or more partnerships and only one of the resulting partnerships is a continuation of the prior partnership, then the resulting partnership that is a continuation of the prior partnership will be treated as the divided partnership. If a partnership divides into two or more partnerships without undertaking a form for the division that is recognized under Reg. § 1.708-1(d)(3), or if the resulting partnership that had, in form, transferred assets and liabilities is not considered a continuation of the prior partnership, and more than one resulting partnership is considered a continuation of the prior partnership, the continuing resulting partnership with the assets having the greatest fair market value (net of liabilities) will be treated as the divided partnership.

[5587] Reg. § 1.708-1(d)(2)(i). The return must include the names, addresses, and EINs of all resulting partnerships that are regarded as continuing. The return must also state that the partnership is a continuation of the prior partnership and shall set forth separately the respective distributive shares of the partners for the periods before and including the date of the division and after the date of division.
[5588] Reg. § 1.708-1(d)(2)(i).
[5589] Reg. § 1.708-1(d)(2)(ii).
[5590] Reg. § 1.708-1(d)(2)(ii).

II.Q.8.d.iii. Assets-Over vs. Assets-Up Division

II.Q.8.d.iii.(a). Assets-Over Divisions

Generally, in an "assets-over" division, an existing partnership transfers some portion of its assets and liabilities (directly or by distributing an interest in an entity the partnership owns) to a new partnership, and immediately thereafter distributes interests in the new partnership to some or all of its partners.

When in doubt, the division is an "assets-over" division.[5591]

In an assets-over division, the following transactions are deemed to have occurred:

- Where at least one resulting partnership is a continuation of the prior partnership:
    - The divided partnership[5592] contributes certain assets and liabilities to a recipient partnership(s)[5593] in exchange for interests in such recipient partnership(s).
    - Immediately thereafter, the divided partnership distributes the interests in such recipient partnership(s) to some or all of its partners in partial or complete liquidation of the partners' interests in the divided partnership.[5594]
- Where none of the resulting partnerships is a continuation of the prior partnership:
    - The prior partnership will be treated as contributing all of its assets and liabilities to new resulting partnerships in exchange for interests in the resulting partnerships.

[5591] Reg. § 1.708-1(d)(3)(i). The preamble, T.D. 8925, provides:

> …it is appropriate to require consistency in applying either the Assets-Over Form or the Assets-Up Form to characterize a transfer of assets to a resulting partnership. However, where a single partnership is divided in a transaction that involves a transfer of assets (either actual or deemed) to multiple partnerships, the transfer to each resulting partnership should be viewed separately. As with mergers involving more than two partnerships, it is consistent with the purposes of these regulations, in the context of divisions, to allow the transfer to one resulting partnership to be characterized under the Assets-Over Form while characterizing the transfer to another resulting partnership under the Assets-Up Form. The proposed regulations provided an example that illustrates when such a division accomplished under both the Assets-Over Form and the Assets-Up Form will be respected. The final regulations do not change the example. See § 1.708-1(d)(5) Example 7 of the final regulations. The final regulations also add an example to illustrate when a division accomplished under both the Assets-Over Form and the Assets-Up Form will not be respected.

[5592] See fn. 5586.

[5593] As defined in Reg. § 1.708-1(d)(4)(iii), which provides that a recipient partnership is a partnership that is treated as receiving, for Federal income tax purposes, assets and liabilities from a divided partnership, either directly (under the assets-over form) or indirectly (under the assets-up form).

[5594] Reg. § 1.708-1(d)(3)(i)(A).

- Immediately thereafter, the prior partnership will be treated as liquidating by distributing the interests in the new resulting partnerships to the prior partnership's partners.[5595] Distributions of partnership interests trigger Code § 743 adjustments.[5596]

Code § 737 and Reg. § 1.737-2 do not apply to a transfer by a partnership (transferor partnership) of all of the Code § 704(c) property contributed by a partner to a second partnership (transferee partnership) in a Code § 721 exchange, followed by a distribution as part of the same plan or arrangement of an interest in the transferee partnership (and no other property) in complete liquidation of the interest of the partner that originally contributed the Code § 704(c) property to the transferor partnership.[5597] A later distribution of property by the transferee partnership to a partner of the transferee partnership that was formerly a partner of the transferor partnership is subject to Code § 737 to the same extent that a distribution from the transferor partnership would have been subject to Code § 737.[5598]

II.Q.8.d.iii.(b). Assets-Up Divisions

Generally, in an "assets-up" division, an existing partnership distributes assets and liabilities to some or all of its partners, who then contribute them to a new partnership.

If the divided partnership[5599] distributes certain assets (such that state law causes the partners to be treated as the owners of such assets)[5600] to some or all of its partners in partial or complete liquidation of the partners' interests in the divided partnership and immediately thereafter such partners contribute the distributed assets to one or more partnerships in exchange for interests in such recipient partnership(s), the transaction is respected as an "assets-up" division.[5601]

5595 Reg. § 1.708-1(d)(3)(i)(B).

5596 See parts II.Q.8.e.i Distribution of Partnership Interests and II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss).

5597 Reg. § 1.737-2(b)(2).

5598 Reg. § 1.737-2(b)(3).

5599 Which Reg. § 1.708-1(d)(4)(i) requires to be a continuing partnership.

5600 The preamble in T.D. 8925 says:

> While the IRS and Treasury believe that it should be necessary for a partnership to actually convey ownership of the partnership's assets to its partners in order to follow the Assets-Up Form, it should not be necessary for the partners to actually assume the liabilities of the partnership in order to follow such form. Pursuant to section 752 and the regulations thereunder, a partner essentially is deemed to have directly incurred a share of the partnership's liabilities. Requiring the partners to actually assume debt that they already are deemed to have incurred is unnecessary. Such a requirement also could create a trap for the unwary. If a partner momentarily assumes an amount of the partnership's debt that is less than the partner's share of such debt under section 752 (and other partners momentarily assume an amount of debt in excess of their shares), the partner could inappropriately recognize gain as a result of the deemed distribution.

5601 Reg. § 1.708-1(d)(3)(ii)(A). That form is respected for transfers to a particular recipient partnership only if all assets held by the prior partnership that are transferred to the recipient partnership are distributed to, and then contributed by, the partners of the recipient partnership.

If none of the resulting partnerships is a continuation of the prior partnership, then despite the partners' transitory ownership of some or all of the prior partnership's assets, the form of a partnership division will be respected for Federal income tax purposes if:[5602]

- The prior partnership distributes certain assets (such that state law causes the partners to be treated as the owners of such assets) to some or all of its partners in partial or complete liquidation of the partners' interests in the prior partnership, and

- Immediately thereafter, such partners contribute the distributed assets to a resulting partnership(s) in exchange for interests in such resulting partnership(s).

However, if the prior partnership does not liquidate for state law purposes, then, with respect to the assets and liabilities that, in form, are not transferred to a new resulting partnership, the prior partnership will be treated as transferring these assets and liabilities to a new resulting partnership in an assets-over division.[5603]

II.Q.8.d.iii.(c). Effect of Basis Issues on Type of Division

If the basis of the partnership's assets ("inside basis") exceeds the basis of the partnership interests ("outside basis") involved, then one would tend to want to preserve the inside basis, and an assets-over division would tend to be attractive.

If the outside basis exceeds the inside basis, then one might seek to have the outside basis applied to the partnership's assets in an assets-up division, which involves a liquidating distribution.

See part II.Q.8.b.i.(h) Characteristics of Distributed Property.

II.Q.8.d.iii.(d). Checklist of Issues in Choosing Assets-Over vs. Assets-Up

If any division described above is part of a larger series of transactions, and the substance of the larger series of transactions is inconsistent with following the form prescribed above, the IRS may disregard such form, and may recast the larger series of transactions in accordance with their substance.[5604]

The following are among issues to consider in planning partnership divisions:[5605]

- Any mixing bowl gain in current transaction?[5606]
    - Assets up: Are contributed assets distributed to another partner, or other assets contributed to a Code § 704(c) partner within 7 years?

[5602] Reg. § 1.708-1(d)(3)(ii)(B). That form is respected for transfers to a particular recipient partnership only if all assets held by the prior partnership that are transferred to the recipient partnership are distributed to, and then contributed by, the partners of the recipient partnership.
[5603] Reg. § 1.708-1(d)(3)(ii)(B).
[5604] Reg. § 1.708-1(d)(6).
[5605] A selected list from Borden, O'Conner, and Schneider, Partnership and LLC Reorganizations, 2013 *LLC Institute* (10/18/2013).
[5606] See part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737.

- Assets over: If one looks through distributed partnership interest, would underlying asset distribution trigger Code § 704(c)(1)(B) or Code § 737 gain?

- These issues apply only if the partners do not have identical percentage interests in each partnership.[5607]

- Is there any potential gain under Code § 731(c), relating to a distribution of marketable securities? An assets-over division that distributes a partnership the value of which is at least 20% marketable securities might be an indirect distribution of marketable securities.[5608]

- Consider future mixing bowl ramifications from creation of new 7-year mixing bowl clock.[5609]

  - Can form be changed to minimize costs?

  - What are future distribution plans?

- Consider effect of debt shifts under Code § 752, because deemed distributions from relief of debt might trigger income.

- Any Code § 708(b)(1)(B) terminations of lower-tier partnerships?

[5607] See fn. 5578.

[5608] See part II.Q.8.b.i.(a) Code § 731, including fns. 5379 and 5380. Letter Ruling 200223036 included the following facts and holding:

> To effect an assets-over form of division, LLC proposes contributing certain assets, including marketable securities, and liabilities to LLC 2 in exchange for 100 percent of the membership interests in LLC 2. Immediately thereafter, LLC will distribute the interests in LLC 2 to Son, Son's Trusts, and Mother's Trust (Distributee Partners) in partial or complete liquidation of their interests in LLC. Consequently, LLC's partnership division will yield two resulting partnerships, LLC and LLC 2. The respective members of LLC and LLC 2 immediately after the division will have had an interest in capital and profits of the prior partnership (LLC before the division) of more than 50 percent. Therefore, we assume that each of the two resulting partnerships will be considered a continuation of the prior partnership. In addition, as the partnership that will transfer the assets and liabilities in the division, LLC should constitute the divided partnership. As the partnership that will be treated as receiving the assets and liabilities, LLC 2 should constitute the recipient partnership.
>
> Because the term money includes marketable securities, LLC's distribution of the interests in LLC 2 to the Distributee Partners will have potential gain consequences under § 731(a). LLC's shares of stock in three public companies meet the definition of marketable securities under § 731(c). In addition, more than 90 percent of the value of LLC 2 will be attributable to the marketable securities, stock shares, it will receive in the division. Therefore, the membership interests in LLC 2 themselves should constitute marketable securities (in an amount equal to their fair market value on the distribution date), the distribution of which should constitute a distribution of money.
>
> A limitation applies to the amount of the distribution of marketable securities (membership interests) that is treated as a distribution of money. The amount of such a distribution is reduced under § 731(c)(3)(B) by a distributee partner's share of the built- in gain in the securities held by the partnership. LLC is concerned that the partnership referred to in § 731(c)(3)(B) in determining the reduction amount may include both continuing partnerships, LLC and LLC 2, thereby eliminating most of the anticipated limitation on any § 731(a) gain resulting from the proposed division.

[5609] See part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737.

- Compare state or local taxes based on form - particularly transfer taxes.

- Consider potential application of new Code § 704(c)(1)(C) if one or more assets are depreciated, even if overall net appreciation. Code § 704(c)(1)(C) locks in built-in loss to contributing partner and could create differences depending on form chosen.[5610]

- Consider Code § 704(c) generally.

  - If assets up, individual partners are Code § 704(c) contributing partners on specific assets.

  - If assets over, consider Code § 704(c) step in the shoes rules.

  - In either case, if the division is pro rata, no new Code § 704(c) responsibility should be created.[5611]

- If assets up transaction, consider disguised sale rules: were appreciated assets contributed within prior two years?[5612]

- Will assets up transaction result in a shift, at least transitorily, of hot asset sharing or trigger any Code § 751(b) gain?[5613]

II.Q.8.e. Transfers of Partnership Interests

II.Q.8.e.i. Distribution of Partnership Interests

Except as otherwise provided in regulations, for purposes of Code § 708 (termination of partnership, which generally no longer applies),[5614] Code § 743 (adjustment to inside basis of partnership property when the outside basis of the partnership interest changes), and any partnership income tax matters specified in regulations, any distribution of an interest in a partnership (not otherwise treated as an exchange) is treated as a Code § 761(e) exchange.[5615] CCA 201517006 held that shifting rights to future profits not is treated as a Code § 761(e) exchange; see part II.C.6 Shifting Rights to Future Profits.

[5610] See fn. 5707.
[5611] See fn. 5578.
[5612] See part II.M.3.e Exception: Disguised Sale.
[5613] See part II.Q.8.e.ii Transfer of Partnership Interests: Effect on Transferring Partner and part II.Q.8.b.i.(g) Code § 751 – Hot Assets.
[5614] See part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform).
[5615] Code § 761(e) provides:

> *Distributions of partnership interests treated as exchanges*. Except as otherwise provided in regulations, for purposes of—
> (1) section 708 (relating to continuation of partnership),
> (2) section 743 (relating to optional adjustment to basis of partnership property), and
> (3) any other provision of this subchapter specified in regulations prescribed by the Secretary,
>
> any distribution of an interest in a partnership (not otherwise treated as an exchange) shall be treated as an exchange.

The Conference Report adopting this rule focused on a distribution of a partnership interest by a partnership or corporation.[5616] The relevant regulation focuses on distributions by partnerships;[5617] corporate distributions are already taxable as sales or exchanges through corporate income tax provisions.[5618] However, the statute's literal language is not so limited (and CCA 201726012 took a broad approach),[5619] so this rule also appears to apply to any distribution (other than a specific bequest) of a partnership interest by an estate or trust.[5620] Therefore, under prior law, when a trust or estate distributes at a 50% or more partnership interest, the partnership would have terminated, resetting all partnership elections and stretching the period over which depreciation is deducted.[5621] The distribution would have been added to all other transfers constituting a sale or exchange under Code §708 within a period of 12 consecutive months to determine whether such a termination occurs under pre-2018 law;[5622] to avoid such a consequence, one might have spread distributions over a period exceeding 12 months.

Furthermore, TAM 201929019 took the position that a deemed distribution of a partnership interest in an assets-over merger of two partnerships under Reg. § 1.708-1(c)(3)(i)[5623] is treated as an "exchange" pursuant to Code § 761(e). TAM 201929019 reasoned:

[5616] Tax Reform Act of 1984, P.L. 98-369, 7/18/1984.

[5617] Reg. § 1.761-1(e) provides:

> *Distribution of partnership interest*. For purposes of section 708(b)(1)(B) and § 1.708-1(b)(1)(iv), the deemed distribution of an interest in a new partnership by a partnership that terminates under section 708(b)(1)(B) is not a sale or exchange of an interest in the new partnership. However, the deemed distribution of an interest in a new partnership by a partnership that terminates under section 708(b)(1)(B) is treated as an exchange of the interest in the new partnership for purposes of section 743.

A new partnership formed as the result of the termination of a partnership under Code § 708(b)(1)(B) is not required to use the same method as the terminated partnership with respect to Code § 704(c) property deemed contributed to the new partnership by the terminated partnership under Reg. § 1.708-1(b)(1)(iv); see fn. 3836 in part II.P.1.a.i Allocations of Income in Partnerships.

See part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform).

[5618] See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders. Note that Code § 761(e) was enacted in 1984, before tax-free corporate liquidations were abolished in 1986, so the reference to corporate distributions did make sense when Code § 761(e) was enacted.

[5619] CCA 201726012 (under the signature of David R. Haglund), in addressing, "Issue 1: Whether the transfer of a partnership interest in a complete liquidation to which § 332(a) applies or a reorganization to which § 368(a)(1)(A) and/or (D) applies is a transfer by sale or exchange for purposes of § 743(b)," held:

> The regulations under § 761 do not limit the definition of exchange to taxable exchanges for purposes of § 743. In particular, no provisions limit the definition of an exchange between related parties or members of a consolidated group. The transactions at issue here involved the distribution of a partnership interest as part of the complete liquidation of a corporate partner, and the transfer of a partnership interest as part of the reorganization of a corporate partner. Consequently, these transactions constitute an exchange for purposes of § 743 under the provisions of § 761(e).

[5620] For further analysis, see McKee, Nelson & Whitmire, *Federal Taxation of Partnerships and Partners*, ¶23.05. Special Problems Relating to the Income Taxation of Partnership Interests Held by Estates and Trusts. For how distributions affect allocating tax items under Code § 706, see part III.B.2.j.iii Allocations upon Change of Interest in a Partnership.

[5621] Reg. § 1.708-1(b)(1); see part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform).

[5622] Reg. § 1.708-1(b)(1).

[5623] See part II.Q.8.e.v Partnership Mergers, especially the text accompanying fns 5819-5820.

Under § 1.708-1(c)(3)(i), X is deemed to contribute all of its assets and liabilities to Y in exchange for an interest in Y (Step 1), and immediately thereafter, X is deemed to distribute interests in Y to A and Q in liquidation of X (Step 2). Except as otherwise provided in regulations, any distribution of an interest in a partnership is treated as an exchange under § 761(e) for purposes of §§ 708 and 743. Neither the Code nor the regulations suggest that § 761(e) was only intended to apply to actual distributions and, therefore, not intended to apply to constructive distributions such as the one described in § 1.708-1(c)(3)(i). Under Subchapter K of the Code, partnership distributions that are "deemed" to occur as a result of the application of certain rules in the Code or regulations to specific facts (such as "deemed" distributions of cash or money under § 731(a) resulting from the forgiveness or shifting of liabilities among partners under § 752(b)) generally will have the same or similar tax effects as actual partnership distributions of money or other property. Accordingly, under the plain language of § 761(e), we conclude that X's deemed distribution of interests in Y to A and Q in liquidation of X resulting from an assets-over merger under § 1.708-1(c)(3)(i) is treated as an exchange for purposes of § 743(b).

A argues that Congress did not intend § 761(e)(2) to apply to constructive distributions of partnership interests because when Congress amended § 743(b) to require mandatory basis adjustments for a partnership with a substantial built-in loss, it did not also amend the parenthetical language in § 761(e)(2) to reference a "substantial built-in loss." Because the parenthetical language in § 761(e)(2) only references an "optional adjustment to basis of partnership property" when a § 754 election is in effect, A argues that § 761(e) was not meant to apply to constructive distributions of partnership interests when a partnership has a substantial built-in loss. A disconnect in A's argument exists because if A's argument is correct, then § 761(e) would not apply to actual distributions of partnership interests when a partnership has a substantial built-in loss. Clearly, this was not what Congress intended when it amended § 743(b).

We disagree that the failure to amend the parenthetical language in § 761(e)(2) was meant to limit the application of § 743(b) to only actual distributions of partnership interests when a § 754 election is in effect for the partnership. The "relating to" parenthetical language is best read as a descriptive short-hand reference to § 743 and not as limiting language. We find support for our interpretation of § 761(e) in the fact that Congress also did not amend the parenthetical language in § 755(a) when it enacted the substantial built-in loss mandatory basis adjustment rule. Both parentheticals in § 755(a) only refer to optional basis adjustments to partnership property and not the mandatory basis adjustments that would apply when the partnership has a substantial built-in loss. Interpreting § 755(a) as only applying to optional basis adjustments would be erroneous given that § 755 and related regulations provide the exclusive rules for allocation of basis among specific partnership properties when §§ 734(b) and 743(b) adjustments apply. No other rules or methods outside of § 755 provide for allocation of basis among specific partnership properties for mandatory basis adjustments. Because it would be erroneous to limit the application of § 755 to optional basis adjustments based solely on the failure to amend the parenthetical language in § 755(a), it would be equally erroneous to interpret the failure to amend the parenthetical language in § 761(e)(2) as limiting § 761(e) to apply only to optional basis adjustments under § 743(b) and not to mandatory basis adjustments under § 743(b) as well. A's argument regarding the parenthetical language in § 761(e) is unpersuasive and, thus, § 761(e) applies to actual and constructive distributions of partnership interests when either a § 754 election is in effect for the partnership or the partnership has a substantial built-in loss.

Alternatively, A argues that Y, the resulting partnership in this case, should be treated as a continuation of both X and Y under the literal language of § 708(b)(2)(A) and, as a result, § 761(e) should not apply to any constructive distributions that would result by treating X as a terminated partnership under the "tiebreaker rule" in § 1.708-1(c)(1). In A's view, because the merger of two partnerships owned by the same majority partner in the same proportion represents a "mere change in form," the deemed steps that occur under § 1.708-1(c)(3)(i) by treating X as a terminated partnership under § 1.708-1(c)(1) should have no substantive tax effects or consequences, including any potential § 743(b) adjustments. A cites language from the preamble to proposed regulations under § 704(c) to support A's argument that because the majority ownership of X and Y was essentially unchanged after the merger, the transaction should result in no substantive tax consequences to the partners.[6]

[6] See Preamble to Proposed § 1.704-4(c)(4) and § 1.737-2(b), 72 Fed. Reg. 46932, 46933 (Aug. 22, 2007).

We disagree with A's argument that no substantive tax effects or consequences should result when X and Y merge. When a resulting partnership could be considered the continuation of more than one of the merging or consolidating partnerships under § 708(b)(2)(A) (for example, because the same majority partner owns both partnerships), the "tiebreaker rule" in § 1.708-1(c)(1) mandates that only one of the merging or consolidating partnerships continues (based on fair market value of assets contributed) while any other merging or consolidating partnership terminates. This rule and the rule in § 1.708-1(c)(3)(i) describing the steps that are treated as occurring to effectuate the deemed termination of any merged or consolidated partnership as a result of the merger cannot be ignored. For tracking basis and capital accounts, determining partnership elections, and other administrative concerns, only one merging partnership can be treated as continuing. Additionally, A's reliance on the preamble to the regulations under § 704(c) is misplaced. The "substantive tax consequences" described in that preamble concern the recognition of immediate gain and not the conformity of partnership basis under § 743(b). Finally, A's assertion that the merger in this case represents a "mere change in form" ignores the fact that Federal tax law recognizes the existence of separate entities and the resulting tax consequences from transactions between those separate entities. The fact that two separate entities are owned by the same majority partner does not mean they are the same partnership or should be treated as one partnership for Federal income tax purposes. A chose the form of the transaction (in this case, a merger of X into Y) for A's own reasons. This indicates that the form of the transaction had real substantive legal effects, and therefore, the transaction was not a mere change in form. Accordingly, the transaction as carried out had substantive effects and consequences that are respected for Federal income tax purposes, and the transaction is of a type that falls within and is subject to § 1.708-1(c)(3)(i). The deemed steps that occur as a result of an assets-over merger under § 1.708-1(c)(3)(i) include the treatment of the constructive distribution by X of the partnership interest in Y as an exchange under § 761(e) for purposes of § 743(b).

A also argues that because Rev. Rul. 90-17, 1990-1 C.B. 119, holds that a deemed distribution resulting from an assets-over merger is not an exchange under § 761(e) for § 708(b)(1)(B) purposes, it should not be treated as an exchange for purposes of

§ 743(b). Even though A concedes that Rev. Rul. 90-17 does not address whether a deemed distribution resulting from an assets-over merger is an exchange for purposes of § 743, A argues that the conclusion that the deemed distribution in an asset-over merger is not an exchange for § 743 purposes necessarily follows from this ruling because § 761(e) applies to both §§ 708 and 743. Accordingly, not applying § 708 for purposes of § 761(e) means that § 743 cannot be applied for § 761(e) purposes either. We disagree. As discussed in Rev. Rul. 90-17, the § 708(b)(2)(A) merger rules take precedence over the § 708(b)(1)(B) termination rule in cases where both could theoretically apply. Therefore, even though deemed distributions resulting from assets-over mergers may not be properly treated as exchanges for purposes of applying § 708(b)(1)(B) to the resulting partnership, neither the Code nor the regulations prevent a deemed distribution resulting from an assets-over merger from being treated as an exchange of the distributed interests in the resulting partnership under § 708(b)(2)(A), for purposes of applying § 743(b) to those distributed interests. The holding in Rev. Rul. 90-17 supports this position and does not alter our conclusion that a deemed distribution of a partnership interest in an assets-over merger is treated as an exchange under § 761(e) for purposes of § 743(b).

Finally, A asserts that the netting rule of § 1.752-1(f) reflects and implements a "single transaction/unitary basis" approach and that the application of § 743(b) to the assets-over merger under § 1.708-1(c)(3)(i) assumes a two-step transaction in which the interest acquired in Step 2 is disaggregated from all other interests previously held by the transferee partner in the resulting partnership. Accordingly, A argues that a single transaction approach cannot be reconciled with the separate interest/bifurcated approach that applies for § 743(b) purposes and, therefore, § 743(b) should not apply to an assets-over merger under § 1.708-1(c)(3)(i).

We disagree. The application of the netting rule in § 1.752-1(f) to an assets-over merger under § 1.708-1(c)(3)(i) also does not alter our conclusion. Even though the netting rule in § 1.752-1(f) treats an assets-over merger under § 1.708-1(c)(3)(i) as a single transaction for purposes of determining any net liability shifts under § 752, § 1.752-1(g) Example 2 (illustrating the application of the netting rule when two partnerships merge) demonstrates that an assets-over merger is a single transaction involving two steps, as described in § 1.708-1(c)(3)(i). Therefore, by respecting the deemed steps that occur in an assets-over merger, the single transaction approach can be reconciled with the separate/bifurcated approach that applies for § 743(b) purposes.[7]

[7] See footnote 14, infra, for additional detail.

[14.] For example, when applying the separate/bifurcated approach of § 743(b) to the facts from Example 2 of § 1.752-1(g) assuming a § 754 election is in effect and accounting for B's net decrease in liabilities under § 752, B has no adjustment under § 743. This is correct because before the merger, the inside and outside bases of B in partnership T and partnership S are equal. For simplicity, B's share of partnership liabilities in partnership T and partnership S is determined under § 1.752-3(a)(3). When partnership T merges into partnership S and transfers its assets ($600 of adjusted basis and value of $1,000) and liabilities ($900) to partnership T, B's share of partnership T's liabilities decreases by $630. B's share of partnership S's liabilities, as a momentary indirect partner in partnership S, is $70 (7% of $1,000). Under the netting rule in § 1.752-1(f), B does not recognize any gain under § 731. Absent the netting rule, B would recognize $140 of gain under § 731. For purposes of determining

B's § 743(b) adjustment, B's outside basis in partnership S (transferred partnership interest) is $0 ($420 (B's outside basis in partnership T before the merger) less $630.

If a partnership does not make a Code § 754 election when a partner dies, consider asking the partnership to make the election when the decedent's estate or (former) revocable trust funds bequests by distributing the partnership interest, which also might be an event triggering a basis adjustment. The basis adjustment is not tied to any change in basis but rather generally catches up the "inside basis" to the "outside basis,"[5624] so every estate or (former) revocable trust has a chance to make up for the partnership's failure to make a Code § 754 election. Note also that, if a Code § 754 election is in place as of date of death, technically the basis adjustments need to be done not only as of date of death but also as of date of distribution. However, if the adjustments are made as of date of death and the distribution is a carryover basis event, then the fact that outside basis equals inside basis means that no further Code § 743(b) is required.[5625]

However, a disposition of a partnership interest by gift (including assignment to a successor in interest), bequest, or inheritance, or the liquidation of a partnership interest, was not a sale or exchange for purposes of Code § 708.[5626] Willis & Postlewaite, ¶ 16.01[7] Termination by Gift, Transfer on Death, or Distribution from Estate or Trust, *Partnership Taxation* (WG&L), states:

> The transfer of a partnership interest by bequest or inheritance also is specifically excluded from sale or exchange treatment.[69] The treatment of a distribution of a partnership interest from a trust or estate, however, is less clear. There is no explicit language in the Regulations excluding such distributions from sale or exchange treatment.[70] Thus, while a transfer of a partnership interest to a trust or estate (if in the form of a gift or bequest) is not an exchange, a distribution of such an interest from the trust or estate arguably constitutes such a transfer.[71] The statutory language provides that, subject to Regulations, any distribution will constitute a § 708 exchange.[72] While the Conference Committee Report[73] focuses only on distributions of partnership interests made by partnerships and corporations, the language clearly is not so limited.
>
> [69] Reg. § 1.708-1(b)(2).

[5624] See part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss), particularly the paragraph in which lies the text accompanying fn. 5678.
[5625] See fn. 5679 and accompanying text.
[5626] Reg. § 1.708-1(b)(2), which was last amended after Code § 761(e) was enacted. Does a distribution from a trust qualify for this exception? The Conference Report adopting Code § 761 in 1984 does not expressly address trusts, saying that Code § 761 provides:

> that for purposes of section 708, section 743, or any other provision of subchapter K specified in regulations (not just section 743 as in the House bill and Senate amendment) a distribution of a partnership interest by a partnership or corporation will be treated as a sale or exchange of the interest.

Reg. § 1.708-1(b)(2) was Reg. § 1.708-1(b)(1)(ii) before it was re-designated by T.D. 8925 (1/4/2001). It had the same provision since its adoption in 1956. The 2001 redesignation related to comprehensive rules on partnership mergers and divisions and did not mention Code § 761. When T.D. 8717 (5/8/1997) amended other provisions of Reg. § 1.708-1, it also amended Reg. § 1.761-1, without touching this language. So my best guess is that Treasury did not view Code § 761 as having an impact on that particular sentence.
Distributions from trusts tend to be viewed as gifts. See part II.J.8.d Distribution in Kind.

[70] Regulation § 1.708-1(b)(2) in permitting an assignment of a partnership interest to "a successor in interest" without risk of termination might be thought to include transfers of an interest from a trust. The assignment language, however, appears to modify only the word "gift".

[71] But see Private Letter Ruling 8605047, involving a terminated trust and the distribution of its assets which included a 50 percent interest in a partnership. The Ruling contained no reference to the termination issue under § 708, possibly because its focal point was whether the partnership, which later divided into two partnerships, could retain its use of a fiscal year.

[72] IRC § 761(e), discussed at ¶ 16.01[8].

[73] HR Rep. No. 861, 98th Cong., 2d Sess. 864 (1984).

Tax policy, authority in related sections of Subchapter K, and subsequent legislative history, however, dictate that distributions from estates and trusts should be exempted from coverage.[74] However, the Regulation does not contain such an exemption.[75]

[74] IRC § 761(e). See Regulation § 1.706-1(c)(3)(vi) example (3) (distribution of a partnership interest by an estate is not a sale or exchange of the interest; the partnership taxable year does not close with respect to the estate as partner). Compare Revenue Ruling 72-352, 1972-2 CB 395 (distribution of a partnership interest to a trust beneficiary upon termination of the trust closes the partnership taxable year with respect to the trust as partner). See discussion at ¶ 9.06.

[75] Reg. § 1.761-1(e). The Senate Finance Committee Report (S. Rep. No. 313, 99th Cong., 2d Sess. 924 (1986)) suggested that the Regulations under § 761(e) exclude such dispositions from sale or exchange treatment. The Report provided that it "is intended that exceptions might include a distribution of a partnership interest by an estate or testamentary trust by reason of the death of a partner will not be treated as a sale or exchange for purposes of § 708(b)."

However, the concept of a partnership terminating by reason of a transfer no longer exists. See part II.Q.8.e.iv Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform).

Code § 761(e)(2) provides, "Except as otherwise provided in regulations, for purposes of … section 743 (relating to optional adjustment to basis of partnership property) …, any distribution of an interest in a partnership (not otherwise treated as an exchange) shall be treated as an exchange." Regulations do not modify the application of Code § 761(e)(2).

II.Q.8.e.ii. Transfer of Partnership Interests: Effect on Transferring Partner

II.Q.8.e.ii.(a). Unitary Basis

A partner has a single basis in a partnership interest (determined under Code § 705), even if such partner is both a general partner and a limited partner of the same partnership.[5627] (A partner also has a single capital account that reflects all of the partner's interests, "regardless of

[5627] Rev. Rul. 84-53, citing Rev. Rul. 84-52.

the class of interests owned by such partner (*e.g.*, general or limited) and regardless of the time or manner in which such interests were acquired.")[5628]

A partner does not have a divided holding period in an interest in a partnership unless the partner acquired portions of an interest at different times or acquired portions of the partnership interest in exchange for property transferred at the same time but resulting in different holding periods.[5629] The portion of a partnership interest to which a holding period relates is determined by reference to a fraction, the numerator of which is the fair market value of the portion of the partnership interest received in the transaction to which the holding period relates, and the denominator of which is the fair market value of the entire partnership interest (determined

[5628] Reg. § 1.704-1(b)(2)(iv)(b), which is reproduced in the text accompanying fn. 500 in part II.C.7 Maintaining Capital Accounts.
[5629] Reg. § 1.1223-3(a). See McKee, Nelson & Whitmire, ¶ 4.01[2][a] Contributing Partner's Holding Period for His Partnership Interest, *Federal Taxation of Partnerships & Partners* (WG&L). For other aspects of split holding periods, including options to buy, see Bittker & Lokken, ¶ 49.5 Split Holding Periods, *Federal Taxation of Income, Estates, and Gifts* (WG&L), Rev. Ruls. 62-140 and 75-524, and *Commissioner v. Williams*, 256 F.2d 152 (1958), *aff'd on rehearing*, 285 F.2d 582 (5th Cir. 1961).

immediately after the transaction).[5630] Special rules apply to the sale or exchange of all or a portion of an interest in a partnership[5631] and distributions.[5632]

When one transfers a partnership interest, the basis allocated to the transferred interest is based on the relationship between the value of the transferor's partnership interest and the value of the transferred interest.[5633] Thus, when one transfers partnership interests that are

---

[5630] Reg. § 1.1223-3(b)(1). The rest of Reg. § 1.1223-3(b) provides:

> (2) *Special rule*. For purposes of applying paragraph (b)(1) of this section to determine the holding period of a partnership interest (or portion thereof) that is sold or exchanged (or with respect to which gain or loss is recognized upon a distribution under section 731), if a partner makes one or more contributions of cash to the partnership and receives one or more distributions of cash from the partnership during the one-year period ending on the date of the sale or exchange (or distribution with respect to which gain or loss is recognized under section 731), the partner may reduce the cash contributions made during the year by cash distributions received on a last-in-first-out basis, treating all cash distributions as if they were received immediately before the sale or exchange (or at the time of the distribution with respect to which gain or loss is recognized under section 731).
>
> (3) *Deemed contributions and distributions*. For purposes of paragraphs (b)(1) and (2) of this section, deemed contributions of cash under section 752(a) and deemed distributions of cash under section 752(b) shall be disregarded to the same extent that such amounts are disregarded under § 1.704-1(b)(2)(iv)(c).
>
> (4) *Adjustment with respect to contributed section 751 assets*. For purposes of applying paragraph (b)(1) of this section to determine the holding period of a partnership interest (or portion thereof) that is sold or exchanged, if a partner receives a portion of the partnership interest in exchange for property described in section 751(c) or (d) (section 751 assets) within the one-year period ending on the date of the sale or exchange of all or a portion of the partner's interest in the partnership, and the partner recognizes ordinary income or loss on account of such a section 751 asset in a fully taxable transaction (either as a result of the sale of all or part of the partner's interest in the partnership or the sale by the partnership of the section 751 asset), the contribution of the section 751 asset during the one-year period shall be disregarded. However, if, in the absence of this paragraph, a partner would not be treated as having held any portion of the interest for more than one year (e.g., because the partner's only contributions to the partnership are contributions of section 751 assets or section 751 assets and cash within the prior one-year period), this adjustment is not available.
>
> (5) *Exception*. The Commissioner may prescribe by guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter) a rule disregarding certain cash contributions (including contributions of a de minimis amount of cash) in applying paragraph (b)(1) of this section to determine the holding period of a partnership interest (or portion thereof) that is sold or exchanged.

For Code § 751, see part II.Q.8.b.i.(g) Code § 751 – Hot Assets. Reg. § 1.1223-3(e), "Section 751(c) assets," provides:

> For purposes of this section, properties and potential gain treated as unrealized receivables under section 751(c) shall be treated as separate assets that are not capital assets as defined in section 1221 or property described in section 1231.

See part II.G.6.a Code § 1231 Property.

[5631] Reg. § 1.1223-3(c).

[5632] Reg. § 1.1223-3(d).

[5633] Rev. Rul. 84-53 allocates this basis as follows:

> Under section 1.61-6(a) of the regulations, when a partner makes a taxable disposition of a portion of an interest in a partnership, the basis of the transferred portion of the interest generally equals an amount which bears the same relation to the partner's basis in the partner's entire interest as the fair market value of the transferred portion of the interest bears to the fair market

discounted relative to one's holding, one also transfers a proportionately smaller portion of basis to the transferee. Note also that, if a transfer is made to a grantor trust, the consequences of the transfer apply only when the trust ceases to be taxed to the grantor.[5634]

Presumably the basis could be divided if the buyer uses an S corporation for a subsequent investment into the partnership. Other consequences of that structure are in part II.L.5 Self-Employment Tax: Partnership with S Corporation Blocker, especially part II.L.5.a S Corporation Blocker Generally.

Also, dividing a partnership would isolate the basis with respect to groups of assets in that the groups of assets are in separate partnerships; any such division should result in percentage interests that are the same in each partnership before or after the division.[5635]

II.Q.8.e.ii.(b). Character of Gain on Sale of Partnership Interest

Although the sale of stock in a corporation (whether or not an S election is in place)[5636] is pure capital gain or loss, the sale of a partnership interest often has an ordinary income component. The gain is ordinary to the extent attributable to the selling partner's indirect interest in the partnership's unrealized receivables, certain depreciable assets, and inventory items;[5637] the rest generally receives capital gain treatment.[5638] If any interest in a partnership which, directly or indirectly, is transferred to (or is held by) the taxpayer in connection with the performance of substantial services by the taxpayer (or any other related person) in a disfavored trade or business, the holding period for long-term capital gain treatment may be extended to over three

---

> value of the entire interest. However, if such partnership has liabilities, special adjustments must be made to take into account the effect of those liabilities on the basis of the partner's interest. In cases where the partner's share of all partnership liabilities does not exceed the adjusted basis of such partner's entire interest (including basis attributable to liabilities), the transferor partner shall first exclude from the adjusted basis of such partner's entire interest an amount equal to such partner's share of all partnership liabilities, as determined under section 1.752-1(e) of the regulations. A part of the remaining adjusted basis (if any) shall be allocated to the transferred portion of the interest according to the ratio of the fair market value of the transferred portion of the interest to the fair market value of the entire interest. The sum of the amount so allocated plus the amount of the partner's share of liabilities that is considered discharged on the disposition of the transferred portion of the interest (under section 752(d) of the Code and section 1.1001-2 of the regulations) equals the adjusted basis of the transferred portion of the interest.
>
> On the other hand, if the partner's share of all partnership liabilities exceeds the adjusted basis of such partner's entire interest (including basis attributable to liabilities), the adjusted basis of the transferred portion of the interest equals an amount that bears the same relation to the partner's adjusted basis in the entire interest as the partner's share of liabilities that is considered discharged on the disposition of the transferred portion of the interest bears to the partner's share of all partnership liabilities, as determined under section 1.752-1(e).

For Reg. § 1.752-1 after October 2016 changes, see part II.C.3 Allocating Liabilities (Including Debt). I have not yet reviewed their interaction with Rev. Rul. 84-53.

[5636] Code § 341, before its repeal, provided exceptions for collapsible corporations.

[5637] Code § 751(a); for details on the assets subject to these rules, see part II.Q.8.b.i.(g) Code § 751 – Hot Assets. See also fn. 5366.

[5638] Code § 741.

years (instead of over one year); see part II.M.4.f.ii.(b) Code § 1061 - Certain Sales of Compensatory Partnership Interests Recharacterized from Long-Term to Short-Term Gains.

"Unrealized receivables" includes previously untaxed rights to payment from the sale of:[5639]

1. Inventory or other ordinary income items, or

2. Services rendered, or to be rendered.

Depreciable assets to which this provision applies are primarily those the sale of which would trigger depreciation recapture, such as depreciation on tangible personal property or accelerated depreciation on the sale of real property; see part II.Q.8.b.i.(g) Code § 751 – Hot Assets.[5640] However, sometimes depreciable real property without accelerated depreciation might be subject to more onerous provisions.[5641]

"Inventory items" includes not only inventory[5642] but certain other ordinary income items,[5643] whether those assets would receive that treatment in the hands of the partnership or the selling partner.[5644] Under prior law, this provision applies only if those assets are substantially appreciated,[5645] meaning that their fair market value exceeds 120% of the adjusted basis to the partnership of such property.[5646] However, now inventory items do not have to be substantially appreciated to impute ordinary income on the portion of the sale of the partnership interest attributable to such items;[5647] thus, the sale of a partnership interest is treated less favorably than a redemption,[5648] since a redemption triggers ordinary income attributable to inventory items only if the inventory items are substantially appreciated.[5649]

[5639] Code § 751(c). Untaxed means to the extent that income arising from such rights to payment was not previously includible in income under the method of accounting employed by the partnership. Reg. § 1.751-1(c)(1). Reg. § 1.751-1(c) describes various aspects of various kinds of unrealized receivables.
[5640] The flush language of Code § 751(c) refers to mining property, stock in a DISC, section 1245 property, stock in certain foreign corporations, section 1250 property, farm land, franchises, trademarks, or trade names, and an oil, gas, or geothermal property, but only to the extent of the amount which would be treated as gain to which certain recapture provisions would apply if, at the time of the sale of the partnership interest, such property had been sold by the partnership at its fair market value. Similar treatment applies any market discount bond and any short-term obligation to the extent of the amount would have been treated as ordinary income; however, this sentence does not apply with respect to the redemption of a partnership interest under Code § 736.
[5641] See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill), particularly fn. 5087 the sale of partnership interests to a controlled corporation, which is which is further reaching than Code § 751.

[5646] Reg. § 1.751-1(d)(1).
[5647] Before P.L. 105-34 was amended in 1997, Code § 751(a)(2) applied to impute ordinary income on the sale of a partnership interest with respect to inventory items of the partnership which have appreciated substantially in value. P.L. 105-34 struck which have appreciated substantially in value from Code § 751(a)(2).
[5648] Milo, The Tax Cost of Hot Assets upon the Disposition of a Partnership Interest, *The Tax Advisor* (August 2010).
[5649] Code § 751(b)(3).

When a partner transfers part or all of the partner's interest via gift, part of that transfer will be treated as a sale if the partner's share of partnership liabilities exceeds the adjusted basis of the partner's partnership interest. The transfer is treated as such because liability is shifting from the donor to the donee, and the donor is treated as having received cash to the extent that the donor's share of liabilities is reduced. The shift can be analyzed in two potential ways. One way would be to argue the shift is governed by Code § 752(b), which treats a reduction in a partner's share of partnership liabilities as a deemed cash distribution. In this case, the donor would recognize gain to the extent the distribution exceeded his partnership interest adjusted basis. However, another view is that only a portion of the basis of the partner's partnership interest should be allocated to the sale portion of the transfer, and gain is recognized to the extent the shift in liabilities exceeds the allocated portion of the adjusted basis.[5650]

For the effect of a transfer on the allocation of income reported on the involved partners' K-1s, see part III.B.2.j.iii Allocations upon Change of Interest in a Partnership, found within part III.B.2.j Tax Allocations upon Change of Interest.

Rev. Rul. 91-32 held that gain or loss of a foreign partner that disposes of its interest in a partnership that is engaged in a trade or business through a fixed place of business in the United States will be United States source effectively connected income (ECI) gain or will be ECI loss that is allocable to United States source ECI gain, to the extent that the partner's distributive share of unrealized gain or loss of the partnership would be attributable to ECI (United States source) property of the partnership. However, *Grecian Magnesite Mining v.*

[5650] Code § 752(d).

Commissioner, 149 T.C. 63 (2017),[5651] repudiated Rev. Rul. 91-32.[5652] Before getting to that analysis, it explained that Code § 741 works solely at the entity level (which is the focus of this part Character of Gain on Sale of Partnership InterestII.Q.8.e.ii.(b) and why that case is mentioned here), treating the partnership interest as a single unitary asset, without looking through to the underlying assets, absent any overriding provision:

> In sum, section 736(b)(1) provides that payments such as those giving rise to the disputed gain "*shall* … be considered as a distribution by the partnership"; section 731(a) provides that such gain "shall be considered as gain … from the sale or exchange of the

---

[5651] Aff'd 926 F3d 819 (D.C. Cir. 2019). The ECI portion of the case was repealed, as described in the text following fn 940 in part II.E.1.c.viii Income or Gain from or Sale of Property Used in the Business or Business Interest Itself. The Official Tax Court Syllabus described the case as follows:

> In 2001 P, a foreign corporation, purchased an interest in PS, a U.S. limited liability company that was treated as a partnership for U.S. income tax purposes. From 2001 to 2008 income was allocated to P from PS, and P paid income tax in the United States. In 2008 P's interest was redeemed by PS, and P received two liquidating payments, one in July 2008 and the second in January 2009 but deemed to have been made on December 31, 2008. P realized gain totaling over $6.2 million, of which $2.2 million was deemed attributable to U.S. real property interests (and which P now concedes is taxable income). P contends that the remainder—"disputed gain" of $4 million—is not taxable for U.S. purposes. P timely filed a Form 1120-F, "U.S. Income Tax Return of a Foreign Corporation", for 2008, wherein it reported its distributive share of PS's income, gain, loss, deductions, and credits, but did not report any income it received from the redemption of its partnership interest (i.e., neither the now-conceded real estate gain nor the disputed gain). P did not file a return or pay any income tax in the United States for 2009. Ps reporting position was recommended to it by an experienced certified public accountant ("C.P.A.") who was recommended to P by its U.S. lawyer.
>
> R prepared a substitute for return pursuant to sec. 6020(b) for P's 2009 year, and issued a notice of deficiency for 2008 and 2009, determining, inter alia, that P must recognize its gain on the redemption of its partnership interest for U.S. tax purposes as U.S.-source income that was effectively connected with a U.S. trade or business, consistent with Rev. Rul. 91-32. P timely filed a petition with this Court.
>
> *Held*: P's disputed gain was capital gain that was not U.S.-source income and that was not effectively connected with a U.S. trade or business. This Court will not follow Rev. Rul. 91-32. P is therefore not liable for U.S. income tax on the disputed gain.
>
> Held, further, as to the now-conceded tax liability for gain on the real estate, P is not liable for the sec. 6662(a) penalty for 2008 or the additions to tax under sec. 6651(a)(1) and (2) for 2009, because P reasonably relied on the erroneous advice of the C.P.A.

[5652] The court summarized:

> Our level of deference to agency interpretations of law varies. Where the interpretation construes an agency's own ambiguous regulation, that interpretation is accorded deference, *Rand v. Commissioner*, 141 T.C. 376, 380-381 (2013) (citing *Auer v. Robbins*, 519 U.S. 452, 461 (1997)). On the other hand, where a revenue ruling improperly interprets the text of relevant statutes and has inadequate reasoning, we afford it no deference at all. *PSB Holdings, Inc. v. Commissioner*, 129 T.C. 131, 145 (2007). Between these poles, we follow revenue rulings to the extent that they have the "power to persuade". See *id.* at 144.
>
> Rev. Rul. 91-32 is not simply an interpretation of the IRS's own ambiguous regulations, and we find that it lacks the power to persuade. Its treatment of the partnership provisions discussed above in part II.B is cursory in the extreme, not even citing section 731 (which, as we set out, yields a conclusion of "gain or loss from the sale or *exchange of the partnership interest*" (emphasis added)). The ruling's subchapter K analysis essentially begins and ends with the observation that "subchapter K of the Code is a blend of aggregate and entity treatment for partners and partnerships." We criticize the ruling's treatment of the subchapter N issues in notes 22 and 24 below. We decline to defer to the ruling. We will instead follow the Code and the regulations to determine whether the disputed gain is effectively connected income.

partnership interest of the distributee partner"; and section 741 provides that such gain "*shall* be considered as gain … from the sale or exchange of a capital asset". (Emphasis added.) Accordingly, GMM's gain from the redemption of its partnership interest is gain from the sale or exchange of an indivisible capital asset - *i.e.*, GMM's interest in the partnership.

The court reasoned:

The Commissioner posits that the only way to reconcile the two provisions is to interpret section 741 as applicable only to the character of the gain recognized - *i.e.*, as capital rather than ordinary. That is, the Commissioner maintains that while section 741 expressly requires that the gain "shall be considered as gain or loss from the sale or exchange of a capital asset", the statute does not preclude treating the (capital) gain as arising not from the sale of the partnership interest per se (which the entity theory would yield) but from the partnership's underlying assets that give value to the partnership interest (which the aggregation theory would yield).

It is true that, in providing that the gain "shall be considered as gain * * * from the sale or exchange of a capital asset", section 741 does not specify which asset. However, there are four flaws in the Commissioner's approach that cause us to reject it. First, he exaggerates the conflict between an "entity theory" construction of section 741 and the existence of an exception in section 897(g). In its own terms, section 741 acknowledges one exception ("except as otherwise provided in section 751"),[16] so section 741 is only a general rule, not a rule of absolute and universal application. Congress is always free, having enacted a general rule, to enact exceptions.

[16] Section 751 is a specific exception to section 741 that causes unrealized receivables and inventory items to be addressed separately from the remainder of the partnership interest when that interest is sold or liquidated. In the context of liquidating distributions, the partnership is deemed to have bought the liquidated partner's share of those assets from that partner, so that that partner has gain of a character and amount consistent with such a hypothetical sale. The IRS did not assert application of section 751(b) in the SNOD, and the Commissioner has not asserted it as an alternative position in this case. Consequently, we do not consider section 751 further. We note that by the express terms of section 741, section 751 is (like section 897(g); see supra note 11) an exception, and it mandates an "aggregation" approach for characterizing only gain "attributable to" unrealized receivables or inventory items". This statute thus presumes the existence of a general rule to which this aggregation approach is an exception. Section 751 does not provide (and the Commissioner does not contend that it provides) a general rule that all gain from a partner's sale of its partnership interest shall be considered an amount received from the sale of the partnership's properties of whatever types.

Second, the Commissioner's reading of section 741 gives insufficient effect to one word in the statute. Section 741 provides that income realized on the sale of a partnership interest "shall be considered as gain * * * from the sale or exchange of a capital *asset*". (Emphasis added.) Congress used the singular "asset", rather than the plural "assets". This singular wording is more consistent with the treatment of the sale of a partnership interest according to the entity theory, under which the selling partner is deemed to have sold only one asset (its partnership interest) rather than being deemed to have sold its interest in the multiple underlying assets of the partnership. See also *P.B.D. Sports, Ltd.*

v. Commissioner, 109 T.C. 423, 438 (1997) ("Generally, subchapter K employs the entity approach in treating transfers of partnership interests. The sale of a partnership interest is treated as the sale of a single capital asset rather than as a transfer of the individual assets of the partnership. See secs. 741 and 742."); *Unger v. Commissioner*, T.C. Memo. 1990-15 (listing section 741 as an example of the entity theory in the Internal Revenue Code), *aff'd*, 936 F.2d 1316 (D.C. Cir. 1991). And absent some overriding mandate, section 731 directs that gain or loss on a distribution (such as the one at issue) "shall be considered as gain or loss from the sale or exchange of the partnership interest of the distributee partner" (that is, as directed by section 741).

Third, Congress has explicitly carved out a few exceptions to section 741 that, when they apply, do require that we look through the partnership to the underlying assets and deem such a sale as the sale of separate interests in each asset owned by the partnership. If Congress had intended section 741 to be interpreted as a look-through provision, these exceptions in sections 751 and 897(g) would be superfluous. See *TRW Inc. v. Andrews*, 534 U.S. 19, 31 (2001).

Accordingly, the enactment of section 897(g) actually reinforces our conclusion that the entity theory is the general rule for the sale or exchange of an interest in a partnership. Without such a general rule, there would be no need to carve out an exception to prevent U.S. real property interests from being swept into the indivisible capital asset treatment that section 741 otherwise prescribes.

Fourth, section 731(a)—brought into this analysis by the express wording of section 736(b)(1)—makes explicit that the "entity theory" generally applies to a partner's gain from a distribution:

> Any gain or loss recognized under this subsection shall be considered as gain or loss *from the sale or exchange of the partnership interest* of the distributee partner.

Sec. 731(a) (emphasis added). This wording could hardly be clearer. The partnership provisions in subchapter K of the Code provide a general rule that the "entity theory" applies to sales and liquidating distributions of partnership interests—i.e., that such sales are treated not as sales of underlying assets but as sales of the partnership interest. Of course, Congress may enact exceptions or different rules, such as for foreign partners, and we consider that possibility below; but we begin our analysis with this generality from subchapter K.

The Commissioner's interpretation of the Code acknowledges the same sequence we have followed—i.e., that section 736(b)(1) leads to section 731, which in turn leads to section 741, but he evidently thinks such an analysis stops short. The Commissioner apparently maintains that, after applying those sections in that order, one must still return to section 736(b)(1)—so that, while section 741 mandates the capital character of the income, in the end the distribution is still characterized as "payments * * * made in exchange for the interest of such partner in partnership property". Sec. 736(b)(1) (emphasis added). The emphasized phrase certainly does appear in section 736(b)(1), and the analysis in this case begins there precisely because GMM did indeed receive payments that, given the nature of a partnership, can be said to have been made ultimately in exchange for GMM's interest in the partnership's various items of property. However, sections 736(b)(1), 731(a), and 741 tell us what to do with such payments for tax purposes; and as we have shown, they direct us to a conclusion: "gain or loss from the sale or exchange of the partnership interest", sec. 731(a), which is "a [singular] capital asset", sec. 741. We see no reason to abandon that conclusion, return to section 736(b)(1), and halt at the phrase that most nearly coincides with the Commissioner's position.[17]

[17] Indeed, when we read section 736(a) and (b) together, it becomes clear that the role of the words "partnership property" in section 736(b) is to distinguish distributions made for such property from those made out of a partner's "distributive share" of entity-level partnership income (as in section 736(a)(1)) or as a "guaranteed payment" (as in section 736(a)(2)). A partner's "distributive share", sec. 736(a)(1), is governed by sections 704(b) and 701; the tax treatment of a "guaranteed payment", sec. 736(a)(2), is provided in section 707(a); and payments for partnership property, sec. 736(b), are "considered as a distribution by the partnership"—i.e., are treated as provided in section 731. In none of these instances is the ultimate tax treatment of the transfer of money or property from a partnership to a partner prescribed solely by reference to section 736.

The Commissioner also argues that section 741 should not be applied to characterize the income at issue because applying it in that manner would contradict "Congress' intent in enacting section 865", the sourcing rule we discuss below in part IV.B. The Commissioner argues that, when addressing a partnership question under subchapter K of the Code (which deals primarily with partners and partnerships) and applying a Code section (such as section 865) that is outside of subchapter K, one must look to "the nature of the partnership interest involved, together with the intent and purpose of the non-subchapter K section being applied." Using this rule, the Commissioner explains that not section 741 but rather section 736(b)(1) more appropriately characterizes the type of income here—i.e., as a payment for GMM's interest in the "partnership property". We see no basis for the Commissioner's selection of this particular phrase from section 736(b)(1) as the guiding star for navigating the intersection of partnership taxation and the taxation of international transactions, and we have already explained why this phrase is at the beginning and not the end of the analysis. More important, the Commissioner cites no authority for his posited rule, which seems (at least as he uses it here) to shortcut or distort the subchapter K analysis by invoking a purpose (not explicitly enacted) that he discerns in subchapter N. The Commissioner has not convinced us to reconsider the argument that we rejected 38 years ago when it was advanced by the taxpayer in Pollack. Addressing ourselves to the statutory text, we conclude that subchapter K mandates treating the disputed gain as capital gain from the disposition of a single asset, and in part IV.B below we apply the provisions of section 865 accordingly.

CCA 202309015 asserted that LLC interests were inventory and that sales were taxed as ordinary income (and presumably subject to self-employment tax). The CCA characterized the facts:

Between Year 1 and Year 4, Taxpayer directly, and indirectly through entities owned and managed by Taxpayer (Managed LLCs),[1] engaged in the promotion and sale of interests in LLCs. The only asset held by the LLCs was land. Each of the LLCs engaged in transactions involving the donation of an easement with respect to the land, in exchange for a charitable contribution deduction, as described in Notice 2017-10,[2] and/or the donation of a fee simple interest in the land in exchange for a charitable contribution deduction. Hereinafter, because the analysis is the same and for ease of discussion, we refer to these transactions, collectively, as the SCE transactions and to the LLCs that donated the easements and/or land as the SCE LLCs. The character of the gain Taxpayer recognized on the sales of the SCE LLCs is the subject of this advice.

[1] Taxpayer held, through disregarded entities, interests in the Managed LLCs with A and B through which Taxpayer engaged in the transactions described herein. Taxpayer reported the activities of the Managed LLCs as partnerships for federal tax purposes.

[2] 2017-4 I.R.B. 544.

According to information provided by Taxpayer, Taxpayer has been engaged in a variety of business activities including real estate management, acquisition, and investment activities.[3] In at least Year 2, Taxpayer represented that Taxpayer and the Managed LLCs did not sell real property and were not engaged in a trade or business of selling real property.[4] Promotional materials for the sale of the SCE transactions described certain principals of Managed LLCs as "only providing additional information regarding the potential acquisition of membership interests to prospective members and are not acting as a real estate broker nor are they acting as a broker or dealer in securities."[5] During the audit of Taxpayer, LB&I Examination found that Taxpayer's activities are primarily operated through X, located in State, and that X conducts its activities through various Managed LLCs.

[4] 30-day Letter Protest Taxpayer Resp. 2 for Year 2 Form 1040, p. 4.

[5] X, Year 3 Information Package for: Y, p. 4.

Transaction Steps[6]

[6] In general, the transaction steps were the same when the SCE LLC donated easements and/or the land.

Taxpayer, or Taxpayer through a Managed LLC, managed, marketed, and negotiated all transaction steps. From Year 1 through Year 4, Taxpayer generally undertook the following steps to promote and sell the SCE LLC interests. Taxpayer:

1. Identified a third-party owner of an undeveloped piece of land who held the land for more than one year (Landowner). Landowner formed an LLC (Land LLC) and contributed the undeveloped land to Land LLC.

2. Formed a Managed LLC that purchased a% of the interests in Land LLC from Landowner in exchange for cash.

3. Directed Land LLC to subdivide the undeveloped land into parcels, contribute one parcel each to several newly formed LLCs (SCE LLC),[7] and distribute the SCE LLC interests b% to Landowner and a% to Managed LLC, the same ownership percentages each held in Land LLC. Land LLC continued to hold one of the parcels.

   [7] Taxpayer reported the activities of the SCE LLCs as partnerships for federal tax purposes.

4. Directed Managed LLC to either continue to hold a% interest in each SCE LLC, or distribute the interest to its partners, Taxpayer, A, and B.

5. Managed LLC, or Taxpayer, A, and B, then sold c% of the SCE LLC interests to a newly formed LLC (Investor LLC) of which Managed LLC or Taxpayer was the managing member. Taxpayer used a different newly formed Managed LLC to sell the SCE LLC interests every year. Individual investors contributed tens of thousands of dollars into the Investor LLC to purchase the SCE LLC interests. Managed LLC, or Taxpayer, A, and B , continued to hold d% interest in and act as the managing member of SCE LLC.

Typically, within one to four months from the date of Land LLC's formation, the SCE LLC donated the easement and/or the land to a § 501(c)(3) organization.[8] The SCE LLC reported the donation as a charitable contribution on its federal tax returns. Taxpayer and the investors, through Investor LLC, claimed a deduction for their distributive shares of the charitable contribution deduction.

[8] X, Year 3 Information Package for: Y, pp. 7, 14, 21.

Taxpayer, through Investor LLC, made oral and written promises to the investors that they would receive a charitable contribution deduction with respect to the donation of the easement and/or the land many times the amount the investors contributed to Investor LLC.[9] Although the promotional materials for the Investor LLCs offered the investors several investment options, Taxpayer, acting as managing member of the SCE LLCs caused all the SCE LLCs to donate easements and/or the land to § 501(c)(3) organizations. Taxpayer, through Investor LLC, received a promotional fee or other consideration in connection with the sales of the SCE LLC interests to the investors.[10]

[9] X, Year 3 Information Package for: Y, pp. 14-15.

[10] X, Year 3 Information Package for: Y, p. 7.

From Year 1 through Year 4, Taxpayer and the Managed LLCs, collectively, reported about $e of gain on the sales of their interests in f SCE LLCs to the Investor LLCs. Other than in Year 4, Taxpayer reported the gain from the sales of the SCE LLC interests as long-term capital gain.[11] In Year 4, Taxpayer sold SCE LLC interests directly and reported the gain from these sales as long-term capital gain. During Year 4, Taxpayer also formed an entity that elected to be treated as an S corporation for federal tax purposes. Taxpayer contributed SCE LLC interests to the S corporation that then sold the SCE LLC interests. Taxpayer reported gain on the sales of the SCE LLC interests sold by the S corporation as Schedule E ordinary income. On Taxpayer's personal tax return, Taxpayer reported no other source of income other than the income generated by Taxpayer from the promotion and sale of the SCE transactions.

[11] Each Managed LLC reported the sales of the SCE LLC interests as long-term capital gain, its share of the charitable deduction from the SCE LLC, and other expenses associated with the SCE transactions. Each Managed LLC also reported distributions of the SCE LLC sale proceeds.

CCA 202309015 argued that the LLC interests were inventory under Code § 1221:

> In *Malat*, the Supreme Court stated, "[a]s used in § 1221(1), 'primarily' means 'of first importance' or 'principally.'"[12] The court also explained that the purpose of § 1221 "is to differentiate between the 'profits and losses arising from the everyday operation of a business' on the one hand and 'the realization of appreciation in value accrued over a substantial period of time' on the other."[13]
>

>
> (1) From Year 1 through Year 4, Taxpayer sold interests in f SCE LLCs to the Investor LLCs, the sales took place every year, and there were multiple investors in each Investor LLC.
>
> (2) From Year 1 through Year 4, Taxpayer recognized gain of about $e from selling the SCE LLC interests to the Investor LLCs.
>
> (3) The length of time from the acquisition of the Land LLC interests to the sale of Taxpayer's interests in the SCE LLCs was usually less than a year.
>
> (4) Taxpayer did not separately identify property held for sale versus property held for investment with respect to the SCE LLC interests.
>
> (5) Taxpayer directed Managed LLC to acquire an interest in the Land LLC from Landowners to create the SCE LLCs and sell interests in these SCE LLCs quickly, usually within a year.
>
> (6) Each year from Year 1 through Year 4, Taxpayer vigorously advertised the SCE transactions, through promotional and other written materials and verbal communications, to attract investors who would contribute a minimum of tens of

thousands of dollars to an Investor LLC. Taxpayer also engaged in significant sales activities, resulting in sales of interests in f SCE LLCs with multiple investors buying interests in Investor LLCs every year.

(7) Taxpayer devoted a substantial amount of time to the SCE transactions. Taxpayer found Landowner with whom Taxpayer negotiated a land purchase price, convinced the Landowner to structure the land sale as a sale of a% interest in Land LLC with Landowner keeping b% in Land LLC.[16] Taxpayer determined the scope and nature of the SCE transactions and arranged financing. Taxpayer directed the subdivision of land in Land LLC, the creation of SCE LLCs and placement of the subdivided land parcels into them, hired appraisers and other professionals, directed the creation of Investor LLC and the promotion and sale of interests therein to investors. As managing member of Investor LLC and in other ways, Taxpayer caused the SCE LLCs to donate the easement and/or the land. Taxpayer repeated these steps every year from Year 1 through Year 4.

[16] X, Year 3 Information Package for: Y, p. 2.

(8) "Use of sales proceeds to replenish inventory indicates property is held for sale."[17] Taxpayer clearly intended to replace the SCE LLC interests being sold. From Year 1 through Year 4, Taxpayer created new SCE LLCs and sold Taxpayer's interests in them. The frequency and size of these transactions support that Taxpayer used the proceeds from the sales of the SCE LLC interests to purchase replacement properties for subsequent similar transactions.

[17] *Williford*, T.C. Memo. 1992-450.

In selling the SCE LLC interests, Taxpayer met each factor relevant to whether property is held primarily for sale to customers in the ordinary course of a trade or business. This confirms that, under § 1221(a)(1), Taxpayer held the SCE LLC interests as inventory "or property held... primarily for sale to customers in the ordinary course of Taxpayer's trade or business," not as capital assets. In addition, Taxpayer sold the SCE LLC interests quickly, generally within a year, and did not hold them on a long-term basis. Thus, under *Malat*, Taxpayer realized income "from the everyday operation of a business" and not "the realization of appreciation in value accrued over a substantial period of time." Therefore, Taxpayer's gain on the sales of the SCE LLC interests is ordinary income.

In *Corn Products Refining Co.*, a corn products manufacturer's profits and losses from trading in corn futures were held to be ordinary income, not capital gains under the predecessor to § 1221.[18] The court determined that trading in corn futures was not "separate and apart from [the company's] manufacturing operations," but "a form of insurance against increases in the price of raw corn," which was "closely geared to [the] company's manufacturing enterprise [and very] important to its successful operation."[19]

[18] *Corn Products Refining Co. v. Commissioner*, 350 U.S. 46 (1955).

[19] *Id*. at 49-50.

The SCE LLC interests sold by Taxpayer are also excepted from the capital asset definition under Corn Products, as the SCE LLC interests are not "separate and apart from” Taxpayer’s operations but are rather “closely geared to” Taxpayer’s business, promoting SCE LLC interests, and are critically “important to its successful operation.”20

[20] *Id*.

Section 1221 applies despite § 741

Section 741 provides that in the case of a sale or exchange of an interest in a partnership, gain or loss shall be recognized to the transferor partner. Such gain or loss shall be considered as gain or loss from the sale or exchange of a capital asset, except as otherwise provided in § 751 (relating to unrealized receivables and inventory items).

While the general rule under § 741 treats the sale of partnership interests as a sale of a capital asset, here § 1221 applies, despite § 741, because the legislative history indicates that § 741 contemplates only the sale of partnership assets that are in fact capital assets.

The legislative history of § 741 shows that Congress intended to codify a line of court decisions that held that the sale of a partnership interest is generally considered to be a sale of a capital asset.[21] In enacting § 741, Congress stated that “[u]nder present decisions the sale of a partnership interest is *generally* considered to be a sale of a capital asset, and any gain or loss realized is treated as a capital gain or loss.”[22] Further, Congress intended that “[t]he House and your committee’s bill retain the *general rule* of present law that the sale of an interest in a partnership is to be treated as the sale of a capital asset.”[23]

[21] See *Pollack v. Commissioner*, 69 T.C. 142, 148 (1977) (Tannenwald, J., dissenting).

[22] H. Rept. No. 1337, 83d Cong., 2d Sess. (1954) (emphasis added).

[23] S. Rept. 1622, 83d Cong., 2d Sess. (1954) (emphasis added).

In the cases prior to the enactment of § 741, the government took the position that the aggregate theory of partnership determined the result such that the sale of a partnership interest was a sale of the selling partner’s undivided interest in each specific partnership asset.[24] The courts rejected the government’s position and found that the sale of a partnership interest was the sale of a capital asset under § 117 (the predecessor to § 1221).[25] The courts that addressed the question of the treatment of the sale of partnership interests determined, in part, whether the entity or aggregate theory would prevail in the sale of a partnership interest.[26] In these cases, the courts reasoned that because partners did not have a separate or exclusive right to the partnership assets, but rather a common interest in all the assets, a partner’s sale of their partnership interest should be treated as the sale of a capital asset as opposed to the sale of their interest in the partnership assets.[27]

[24] GCM 26379, 1950-1 C.B. 58.

[25] See, *e.g.*, *Kessler v. United States*, 124 F.2d 152, 153 (3rd Cir. 1941); *Commissioner v. Shapir*o, 125 F.2d 532, 533 (6th Cir. 1942); *Long v. Commissioner*, 173 F.2d 471, 471-72 (5th Cir. 1949) (finding that a partner’s sale of a partnership

interest is a sale of a capital asset, rather than his share of each asset owned in the partnership).

[26] See, *e.g.*, *Kessler*, *supra*; *Commissioner v. Lehman*, 165 F.2d 383, 384 (2nd Cir. 1948).

[27] See, *e.g.*, *Shapiro*, *supra*; *Commissioner v. Smith*, 173 F.2d 470, 470 (5th Cir. 1949); *Thornley v. Commissioner*, 147 F.2d 416, 422; *Lehman*, 165 F.2d at 385-386.

Notably, the courts that addressed the treatment of the sale of a partnership interest in the pre-1954 cases did not deal with facts that showed the sale of a partnership interest was something other than the sale of a capital asset.[28] In other words, the courts were not given the opportunity to consider whether capital gain or ordinary income treatment would apply when a taxpayer was engaged in the business of holding partnership interests for sale to customers. Given the facts of the pre-1954 cases and Congress's intent to codify a line of cases that held that the entity approach should determine the consequences of the sale of a partnership interest, Congress intended to give capital asset treatment only to the sale of partnership interests that are in fact held as capital assets.

[28] See, *e.g.*, *Kessler*, *supra* (advertising agency partnership); *Shapiro*, *supra* (partnership engaged in the business of manufacturing and selling cosmetics and medicines); *Thornley*, 147 F.2d at 416-17 (3rd Cir. 1944) (advertising agency partnership); *Stilgenbaur v. United States*, 115 F.2d 283, 285 (9th Cir. 1940) (general produce partnership); *Lehman*, *supra* (brokerage business partnership); *Smith*, *supra* (oil - field retailer partnership); *Long*, *supra* (drilling partnership).

Further, Congress's statement that § 741 retained merely the general rule of present law that the sale of a partnership interest is treated as the sale of a capital asset leaves open the possibility for ordinary treatment on the sale of a partnership interest when the facts and circumstances are appropriate.

Here, because the substance of the sales of the SCE LLC interests by the Taxpayer (and the Managed LLCs) were necessary steps in the SCE transactions (facilitated using LLC interests) in the ordinary course of Taxpayer's trade or business of selling SCE LLC interests, § 1221(a)(1) applies to determine the character of the gain on such sales. We are not challenging the entity approach of partnership taken by § 741 (*i.e.*, that the sale of a partnership interest is treated as the sale of a single asset, like corporate stock). The application of § 1221 under the present set of facts harmonizes §§ 1221 and 741 such that capital gain treatment does not apply when a taxpayer's gain or loss arises from the everyday operation of a trade or business. Thus, § 741 does not foreclose treating the gain on the sale of the SCE LLC interests as ordinary income in situations when, as here, the SCE LLC interests were pre-arranged products frequently created and sold to customers (investors).

CCA 202309015 reviewed whether real estate was a Code § 751 asset:

Here, the facts presented do not support that the land was included in the inventory[30] of the SCE LLCs or held by the SCE LLCs primarily for sale to customers. Additionally, there are no facts to support that the SCE LLCs were engaged in the trade or business of selling land. Each SCE LLC donated the easement, and/or the land, to a § 501(c)(3) organization on behalf of the investors. Therefore, § 751(a)(2) and (d)(1) collectively would not apply to characterize the gain recognized by Taxpayer (or the Managed LLCs) as ordinary income.

[30] Here and elsewhere in this document, potential characterization of real property as inventory is included in the analysis for the sake of consistency with the statutory language in § 751. However, note that the Tax Court has held that real property does not constitute merchandise within the meaning of § 471. See *W.C. & A.N. Miller Development Company v. Commissioner*, 81 T. C. 619 (1983). Accordingly, ordinary income treatment would depend on a determination that the underlying real property constitutes property held by the taxpayer primarily for sale to customers in the ordinary course of the taxpayer's trade or business.

Section 751(a)(2) and (d)(1) would apply, however, to characterize the gain recognized by Taxpayer (or the Managed LLCs) as ordinary income if additional facts are presented to support their application. That is, the facts must support that the SCE LLCs were engaged in the trade or business of selling land and that the land held by the SCE LLCs was either inventory or held primarily for sale to customers by the SCE LLCs.

Sections 751(a)(2) and (d)(3)

Collectively, § 751(a)(2) and (d)(3) apply to characterize as ordinary the gain recognized from the sale of a partnership interest attributable to partnership property, which, if held by the selling partner, would be considered: (1) property of the kind described in § 1221(a)(1) and (2) any other property considered to be other than a capital asset and other than property described in § 1231. In other words, ordinary treatment would be appropriate when a partnership asset, if held by the selling partner is, property other than a capital asset to the selling partner; inventory to the selling partner; or held by the selling partner primarily for sale to customers in the ordinary course of the selling partner's trade or business.

Here, the facts presented do not support that Taxpayer (or the Managed LLCs) was in the trade or business of selling land. Promotional materials for the SCE transactions described Taxpayer as not acting as a real estate broker with respect to the SCE transactions. Additionally, in at least one year Taxpayer stated that neither Taxpayer, nor the Managed LLCs, sold land and was not engaged in the business of selling land. Accordingly, the land in the SCE LLCs, if held by Taxpayer (or the Managed LLCs), would have been a capital asset to Taxpayer (or the Managed LLCs) because there is no indication that the land was inventory to the Taxpayer (or the Managed LLCs) or held by Taxpayer (or the Managed LLCs) primarily for sale to customers in the ordinary course of the Taxpayer's (or the Managed LLCs') trade or business. Therefore, § 751(a)(2) and (d)(3) collectively would not apply to characterize the gain recognized by Taxpayer (or the Managed LLCs) as ordinary income.

Section 751(a)(2) and (d)(3) would apply, however, to characterize the gain recognized by Taxpayer (or the Managed LLCs) on the sales of the SCE LLCs as ordinary income if additional facts are presented to support their application. That is, the facts must support that the Taxpayer (or the Managed LLCs) was engaged in the business of selling land. In addition, the facts must support that the land held by the SCE LLCs was (i) inventory to the Taxpayer (or the Managed LLCs); (ii) property other than a capital asset to the

> Taxpayer (or the Managed LLCs); or (iii) property held by the Taxpayer (or the Managed LLCs) primarily for sale to customers.

CCA 202309015 concluded:

> 1. Yes. Despite § 741, § 1221 applies to treat Taxpayer's gain on the sales of LLC interests as ordinary income because Taxpayer held the LLC interests primarily for sale to customers in the ordinary course of a trade or business during Year 3 through Year 4.
>
> 2. No. Sections 741 and 751(d)(1) and (d)(3) do not collectively apply to treat Taxpayer's gain on the sales of LLC interests as ordinary income because Taxpayer was not engaged in a trade or business of selling land during Year 3 through Year 4.

Presumably "SCE" is an abbreviation for syndicated conservation easement, which the IRS has labeled abusive, describing them as follows in IR-2022-214 (12/6/2022):

> In these transactions, investors typically acquire an interest in a partnership that owns land and then claim an inflated charitable contribution deduction based on a grossly overvalued appraisal when the partnership donates a conservation easement on the land.

The promoters in CCA 202309015 were churning out multiple alleged tax schemes. The LLCs were not investment vehicles (any activity involving the land was purely incidental to the primary purpose) but rather arrangements to sell tax benefits. This is very different than a low-income housing tax credit project, new market tax credit project, or qualified opportunity fund that promotes tax benefits expressly intended to promote rental or business activity within the project. I view CCA 202309015 as a narrow approach to impose heavy taxes on those who promote allegedly abusive tax schemes. I am not concerned about spillover into serial entrepreneurs or those with numerous real estate investment portfolios; the latter are already constrained by part II.G.26.a Real Estate Dealer vs. Investor. This paragraph is just a judgment call that may or may not be correct.

II.Q.8.e.ii.(c). Availability of Installment Sale Deferral for Sales of Partnership Interests

Generally, sales of partnership interests are eligible for installment sale deferral under Code § 453 (subject to the limitations of Code §§ 453A and 453B).[5653]

However, the income from the sale of a partnership interest may not be reported under the installment method to the extent it represents income attributable to some of the partnership's "hot assets" under Code § 751[5654] that would not be eligible for the installment sale treatment if sold directly.[5655]

[5653] Rev. Rul. 76-483. For more discussion on these limitations and recommended strategies, see part II.G.15 Limitations on the Use of Installment Sales.

[5654] See part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

[5655] Rev. Rul. 89-108 held that the income from the sale of a partnership interest may not be reported under the installment method to the extent it represents income attributable to the partnership's substantially appreciated inventory under Code § 751(d) that would not be eligible for the installment sale treatment if sold directly. It explained:

The IRS has asserted that installment sale treatment is not available for partnership interests to the extent that the cash-basis partnership's underlying assets constitute unrealized receivables for payment for services rendered;[5656] consider whether that is a valid argument in light of *Grecian Magnesite Mining v. Commissioner*, 149 T.C. No. 3 (2017) (repudiating Rev. Rul. 91-32).[5657]

Under section 741 of the Code, the sale of a partnership interest generally is treated as the sale of a single capital asset without regard to the nature of the underlying partnership property. See H.R. Rep. No. 1337, 83d Cong., 2d Sess. 70 (1954). In this respect, the tax treatment of the sale of a partnership interest differs from that accorded the sale of a sole proprietorship. See, *e.g.*, *Williams v. McGowan*, 152 F.2d 570 (2d Cir. 1945), which held that the sale of an entire business as a going concern was the sale of the individual assets of the business. See also Rev. Rul. 68-13, 1968-1 C.B. 195, which holds that the installment sale of a sole proprietorship is generally considered to be a sale of individual assets of the proprietorship for purposes of applying section 453.

Section 751 of the Code was enacted to prevent the conversion of certain potential ordinary income into capital gain upon the sale or exchange of a partnership interest. This section, in effect, severs certain income items from the partnership interest. H.R. Rep. No. 1337, *supra*, at 70, 71, and S. Rep. No. 1622, 83d Cong., 2d Sess. 99 (1954). Thus, to the extent a partnership interest represents substantially appreciated inventory or unrealized receivables described in section 751, the tax consequences to the transferor partner are the same tax consequences which would be accorded an individual entrepreneur. H.R. Rep. No. 1337 at 71, and S. Rep. 1622, *supra*, at 99. In effect, the transferor partner is treated as disposing of the property described in section 751 independently of the rest of his partnership interest. S. Rep. No. 1622 at 98, 99. *George Edward Quick Trust v. Commissioner*, 54 T.C. 1336 (1970), *acq.* 1970-2 C.B. xxi, *aff'd per curiam*, 444 F.2d 90 (8th Cir. 1971); *Woodhall v. Commissioner*, T.C. Memo. 1969-279, *aff'd*, 454 F.2d 226 (9th Cir. 1972).

Gain recognized under section 741 of the Code on the sale of a partnership interest is reportable under the installment method. See Rev. Rul. 76-483, 1976-2 C.B. 131. However, because section 751 effectively treats a partner as if the partner had sold an interest in the section 751 property of the partnership, the portion of the gain that is attributable to section 751 property is reportable under the installment method only to the extent that income realized on a direct sale of the section 751 property would be reportable under such method. Because the installment method of reporting income would not be available on a sole proprietor's sale of the inventory, the installment method is not available for reporting income realized on the sale of a partnership interest to the extent attributable to the substantially appreciated inventory which constitutes inventory within the meaning of section 453(b)(2)(B).

Accordingly, P's income from the sale of the partnership interest may not be reported under the installment method to the extent it represents income attributable to the partnership's substantially appreciated inventory which would not be eligible for installment sale treatment if sold directly. The balance of the income realized by P from the sale of the partnership interest is reportable under the installment method.

[5656] In CCAs 200722027 and 200728001, the IRS asserted that installment sale treatment is not available for partnership interests to the extent that the cash-basis partnership's underlying assets constitute unrealized receivables for payment for services rendered, based on its interpretation of some cases as holding that compensation for services could not be reported under the installment method. See *Sorensen v. Commissioner*, 22 T.C. 321 (1954) (a reviewed decision), *followed Mingo v. Commissioner*, T.C. Memo. 2013-149, *aff'd* 773 F.3d 629 (5th Cir. 2014) (the latter also holding that the disallowance of the installment method is a change of accounting method triggering adjustments under Code § 481, to which the statute of limitations does not apply).

[5657] The case is discussed more fully in part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest, especially fn. 5651.

Although publicly traded stock is not eligible for installment sale treatment,[5658] the sale of an interest in a partnership owning publicly traded stock might not preclude deferral.[5659] For partnerships that have a lot of hot assets – especially those with significant depreciable property, a Code § 736 redemption[5660] often would generate a much better result.[5661]

II.Q.8.e.iii. Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations

II.Q.8.e.iii.(a). Illustration of Inside Basis Issue

For a more generic description of inside basis and outside basis, see my blog article, "Tax basis: The key to reducing gain on sale or deducting asset purchases."[5662]

Here is an example:

An S corporation has assets with zero basis and $1,000,000 value.

Sam Sucker buys 50% of stock for $500,000.

Assets are sold, and S corporation gives Sam a K-1 for his $500,000 share of the gain. Sam is the proud owner of a $1,000,000 basis in his stock ($500,000 purchase price plus $500,000 K-1) that is worth $500,000.

Smart Sally finds a partnership with the same characteristics - assets with zero basis and $1,000,000 value.

Sally buys a 50% partnership interest for $500,000. The partnership makes a Code § 754 election, giving Sally a $500,000 in her half of its assets; see part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest. See also part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754

[5658] Code § 453(k)(2).

[5659] The legislative history to the Tax Reform Act of 1986, P.L. 99-514, suggests that the sale of a partnership interest would be eligible for installment treatment as follows:

> The committee intends that any Treasury regulations would not deny use of the installment method if the seller could not have sold, or caused the sale of, the publicly traded stock or securities directly. For example, a retiring partner in a large investment partnership makes an installment sale of his partnership interest, a substantial portion of the value of which is attributable to stocks and securities held by the partnership. Provided that the retiring partner, could not have sold or caused the sale of the partnership's assets directly, the gain on the sale of the partnership interest may be reported on the installment method.

The letter ruling described in fn. 4082 held that the installment method applied to the sale of stock in an S corporation that appears to have held only marketable securities, suggesting that Code § 453(k)(2) would not apply absent regulations being promulgated.

[5660] See part II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.

[5661] See part II.Q.8.b.ii.(d) Comparing Code § 736(b) to an Installment Sale, especially fn. 5526.

[5662] http://www.thompsoncoburn.com/insights/blogs/business-succession-solutions/post/2017-01-10/tax-basis-the-key-to-reducing-gain-on-sale-or-deducting-asset-purchases.

Election or Required Adjustment for Built-in Loss). For a single member LLC, any change to outside basis would automatically apply to the inside basis.[5663]

When the partnership sells its assets, Sally has no gain on that sale and is content with her $500,000 basis. If assets are not sold, Sally is happy with any depreciation on her share of assets

Going back to Sam, he does have a way to avoid this terrible result. If the S corporation is liquidated in the same year in which the assets are sold, he can apply his $1 million basis to his $500,000 liquidation proceeds to net a $500,000 loss, which he may be able use to offset gain on the sale of the corporation's assets. See part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation, especially part II.H.8.a.i Solution That Works for Federal Income Tax Purposes (To an Extent). However, if Sam lives in a different state than wherever the assets sale is sourced, then the Sam's loss on the sale of the stock will not offset the gain on the sale of the assets; see part II.H.8.a.ii State Income Tax Disconnect. Also, to the extent that the S corporation's assets generated ordinary income on sale, such as recapture of depreciation of personal property, Sam's capital loss from liquidation will not offset Sam's ordinary income from the asset sale; see part II.H.8.b Depreciable Personal Property in an S Corporation. Finally, if a substantial part of the S corporation's assets is sold, but an even larger part is not sold, the other owners are unlikely to be willing to liquidate.

However, Code § 338(h)(10) provides a special opportunity when all of the stock in an S corporation is sold and the S corporation is liquidated. The election allows the parties to treat all of the S corporation's assets as having been sold to the person that bought the S corporation stock, enabling the buyer to get a new tax basis on the assets. Meanwhile, the deemed gain on sale of the S corporation's assets increases the basis of the stock in the S corporation, so that often the shareholders are not taxed on the stock's sale and might even have a loss on the sale.[5664] The main downside[5665] to the selling shareholders is that the deemed asset sale might trigger ordinary income taxation (including without limitation depreciation recapture of Code § 1245 property, which is generally depreciable tangible personal property) or higher capital gain taxation (including without limitation the sale of Code § 1250 property, which generally is depreciable real estate), whereas they generally would have paid lower regular long-term capital gain rates on the sale of their S corporation stock had they not made the Code § 338(h)(10) election.

[5663] See fn. 2097 in part II.H.2.h Basis Step-Up for Property Held Outside an Entity; Moving Liabilities Outside of an Entity to Maximize Deductions for Estate Tax Purposes, the latter which points out that results may be better not holding assets in an entity.

[5664] Reg. § 1.338(h)(10)-1(d)(5)(i) provides:

> *In general*. If T is an S corporation target, S corporation shareholders (whether or not they sell their stock) take their pro rata share of the deemed sale tax consequences into account under section 1366 and increase or decrease their basis in T stock under section 1367. Members of the selling consolidated group, the selling affiliate, or S corporation shareholders are treated as if, after the deemed asset sale in paragraph (d)(3) of this section and before the close of the acquisition date, they received the assets transferred by old T in the transaction described in paragraph (d)(4)(i) of this section. In most cases, the transfer will be treated as a distribution in complete liquidation to which section 331 or 332 applies.

See part II.Q.7.a.vii Corporate Liquidation for the tax consequences of the deemed liquidation.

[5665] For former C corporations that have made their S election too recently, beware of part II.P.3.b.ii Built-in Gain Tax.

Code § 338(h)(10) is also available for C corporations, but it does not provide the same benefits to the sellers, in that the corporation's recognition of gain on its deemed sale of assets does not increase its shareholders' stock basis.

II.Q.8.e.iii.(b). Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss)

Upon a partner's death (including the death of the grantor of a revocable trust,[5666] of the beneficiary of a QTIP trust,[5667] or presumably of the holder of a general power of appointment[5668]) or on the sale or exchange of a partnership interest, the partnership's property's basis is adjusted under Code § 743 if the partnership has in effect a Code § 754 election[5669] and makes a Code § 754 election on the return that covers the taxable period that includes the date of death, which election might be filed[5670] up to 12 months after the due

---

[5666] Rev. Rul. 79-84, which reasoned as follows in arriving at that conclusion:

> Before A's death, A had powers over T of the types described in sections 676 and 677 of the Code, and T was therefore a grantor trust. Additionally, T held a partnership interest. Under the principles of Rev. Rul. 77-402, A is considered to have been the partner during this period for federal income tax purposes. Further, at the time of A's death T ceased to be a grantor trust. The partnership interest is thus considered to have been transferred from A to T at that time. As a result, a transfer of a partnership interest occurred upon the death of a partner.

See also Reg. § 1.1001-2(c), Example (5) is reproduced in fn 6591 in part III.B.2.g Income Tax Concerns When Removing Property from the Estate Tax System. Query whether an irrevocable trust for the benefit of A's spouse, which would have been a grantor trust under Code § 677 but excluded from A's estate, would qualify for this treatment.

[5667] The IRS seems to believe that a Code § 743(a) adjustment would apply when a QTIP trust holds a partnership interest and the surviving spouse dies, even though the individual who died is not actually a partner. See Letter Ruling 200019029 (approving a late Code § 754 election without addressing the literal language of Code § 743(a)). Note that Code § 1014(b)(10), which provides a basis adjustment for QTIP assets when the surviving spouse dies, was enacted after Code § 743(a). Thus, considering the surviving spouse to be a partner for purposes of Code § 743(a) is consistent with the philosophy of Code § 1014(b)(10) and should, as a matter of tax policy, be the correct result, even though it seems inconsistent with the literal language of Code § 743(a). See also part II.Q.8.e.i Distribution of Partnership Interests regarding the effect of a distribution on Code § 743.

[5668] Inclusion in the surviving spouse's estate under fn 5667 is not as direct an estate inclusion as inclusion by reason of a general power of appointment. See text accompanying fn 3792 in part II.O.2.e Marital Deduction Trusts - Discount Planning.

[5669] Code § 743(a) does not address whether an adjustment of basis in partnership property may occur by reason of other transfers without a Code § 754 election. For example, the statute does not address whether an adjustment would be made with respect to a transfer by gift (*i.e.*, not a transfer by sale or exchange or the death of a partner which are referenced in Code § 743) even if a Code § 754 election is in place. Code § 1015(d), allowing a basis adjustment for gift tax paid, was not in existence when Code § 743 was enacted. That might be why Code § 743 does not discuss the gift situation. The legislative history when Code § 1015(d) was adopted makes no mention at all of this partnership issue. The issue would seem to be: would an inside adjustment of partnership property be made in the absence of a statute (since no statute is applicable) under general tax principles? That is further complicated by the fact that tax principles sometimes use an aggregate theory and sometimes an entity theory with respect to partnerships. Although perhaps a position might be taken that the payment of gift tax should trigger an inside basis adjustment, if I were to take that position I would disclose it on Form 8725. A safer approach might be to follow the payment of gift tax by a transfer, which part II.Q.8.e.i Distribution of Partnership Interests discusses generally would give rise to an inside basis adjustment.

[5670] T.D. 9963 (2022) removed the signature requirement from Reg. § 1.754-1(b); REG-116256-17 (10/12/2017) issued proposed regulations to that effect, on which taxpayers could then rely.

date.[5671] However, whether or not the election provided in Code § 754 is in effect, the basis of partnership property is not adjusted as the result of a contribution of property, including money, to the partnership.[5672] The Code § 754 election may not be filed in a year before death occurs, unless some other Code § 743 or 734 event occurs in the year covered by the filing.[5673] When a partnership interest is community property and receives an outside basis adjustment of both halves, both halves are eligible for a corresponding inside basis adjustment by reason of that death.[5674]

See also part II.Q.8.e.i Distribution of Partnership Interests regarding the effect of a distribution on Code § 743, including not only a variety of actual or deemed nontaxable exchanges that are treated as distribution but also a suggestion that a trust's or estate's distribution of a partnership interest (other than distributing specifically bequeathed property), triggers application of a Code § 743 adjustment. Thus, even though ideally one should make a Code § 754 as of the year if death (if one decides to make the election), if the suggestion described in the preceding sentence is correct then one may also make a Code § 754 election as of the year in which the

[5671] Reg. § 301.9100-2(a)(2)(vi) grants an automatic 12-month extension from the due date of the partnership's return, including extensions (Reg. § 301.9100-2(a)(1)), with the election made on an amended return (Reg. § 301.9100-2(c)).

In addition to making the election, the partnership must attach a statement to its tax return that reports the name and taxpayer identification number of the transferee partner, the basis adjustment computation, and the allocation of the basis adjustment to the partnership's properties. Reg. § 1.743-1(k)(1). The transferee partner has an obligation to provide written notice to the partnership of the information needed to compute the basis adjustment, as listed in Reg. § 1.743-1(k)(2). Once that notice is given, the partnership can rely on that information in preparing the adjustment, as long as no partner who is responsible for federal income tax reporting has any knowledge that the information is clearly erroneous. Reg. § 1.743-1(k)(3). Failure to attach this statement would not appear to invalidate the Code § 754 election; this result is inferred by the fact that Reg. § 1.743-1(k)(2) provides procedures for when errors or omissions are made in complying with obligations under Reg. § 1.743-1(k).

Does the long term holding period under Code § 1233(9), that applies when assets are included in a decedent's estate, also apply to the portion of the basis of a partnership's assets that constitutes a basis adjustment under Code § 743? Rev. Rul. 68-79 says that, generally, the change in the holding period of a partnership interest does not change the partnership's holding period in its assets. However, it does not address the impact, if any, on a Code § 754 election. With one exception, regulations under Code §§ 743, 755 and 1233 do not address this issue. Reg. § 1.743-1(j)(4)(i)(B)(1) restarts the holding period for depreciable property when there is a positive adjustment but does not change it when there is a negative adjustment, Reg. § 1.743-1(j)(4)(ii)(B).

[5672] Reg. § 1.743-1(a). Instead, see part II.M.3.a General Rule: No Gain Or Loss on Contribution to Partnership.

[5673] Reg. § 1.754-1(b), which is modified in certain ways as described in fn 5671, provides:

> An election under section 754 and this section to adjust the basis of partnership property under sections 734(b) and 743(b), with respect to a distribution of property to a partner or a transfer of an interest in a partnership, shall be made in a written statement filed with the partnership return for the taxable year during which the distribution or transfer occurs. For the election to be valid, the return must be filed not later than the time prescribed by paragraph (e) of § 1.6031-1 (including extensions thereof) for filing the return for such taxable year (or before August 23, 1956, whichever is later). Notwithstanding the preceding two sentences, if a valid election has been made under section 754 and this section for a preceding taxable year and not revoked pursuant to paragraph (c) of this section, a new election is not required to be made….

[5674] Rev. Rul. 79-124.

revocable trust or estate distributes property (other than a specific bequest). A corporate liquidation would also be a triggering event – even if it is a nontaxable event.[5675]

Tiered partnerships may carry the effect of Code § 754 elections throughout the partnership system, if each layer has an election in place. Two revenue rulings describe these rules. First, the facts and holdings of Rev. Rul. 78-2 were:

> X, an investment partnership, was formed for the purpose of holding interests in operating real estate partnerships. X is a partner of partnership Y, an operating real estate partnership ….
>
> For purposes of sections 743 and 754 of the Code, a sale or exchange of an interest in X or the death of a partner of X is considered to result in an adjustment to the basis of the property of Y as though the transferee partner were a partner of Y.
>
> Accordingly, upon the transfer of an interest in X by sale or exchange or on the death of a partner of X during a taxable year with respect to which elections under section 754 of the Code are in effect for X and Y, the adjustment to the basis of partnership property under section 743(b) will include, (a) an adjustment to X's partnership interest in Y and (b) an equivalent basis adjustment to Y's property with respect to X and the transferee partner of X only. Compare Rev. Rul. 77-309, 1977-2 C.B. 216, concerning the allowance of a distributive share of partnership loss to a limited partner in a limited partnership that is itself a limited partner of another limited partnership.

The facts of Rev. Rul. 87-115 were:

> UTP is a partnership in which A, B, C, and D are equal partners. UTP is a partnership in which A, B, C, and D each contributed 30x dollar of cash to UTP upon its formation, and they each have a 30x interest in partnership capital and surplus. A's share of the adjusted basis of partnership property is 30x dollars, the sum of A's interest as a partner in partnership capital and surplus, plus A 's share of partnership liabilities (neither UTP nor LTP have any liabilities). UTP is an equal partner in LTP, along with X and Y. LTP was formed by X, Y, and Z, who each contributed 110x dollars of cash to LTP upon its formation. UTP purchased its interest in LTP from Z for 80x dollars in a taxable year for

---

[5675] CCA 201726012 (under the signature of David R. Haglund), in addressing, "Issue 1: Whether the transfer of a partnership interest in a complete liquidation to which § 332(a) applies or a reorganization to which § 368(a)(1)(A) and/or (D) applies is a transfer by sale or exchange for purposes of § 743(b)," reasoned:

> Sale or exchange is not defined in § 743, the regulations thereunder, or the legislative history of the provision. Section 743 was enacted to ameliorate the tax consequences to a transferee partner by giving a partnership the option to eliminate discrepancies between a transferee partner's inside and outside basis when the partnership's inside basis in its property is not equal to the fair market value of the property. Jt. Comm. On Taxation, *Summary of the New Provisions of the Internal Revenue Code of 1954*, at 92 (1955).
> General Counsel Memorandum 35921 (July 29, 1974) held that for purposes of § 743(b), a transfer of a partnership in a liquidation under former § 333 was not a transfer of an interest by sale or exchange. As demonstrated by the GCM, whether the distribution of a partnership interest by a liquidating corporation was a sale or exchange was considered an open question prior to the Deficit Reduction Act of 1984 (1984 Act). See, *e.g.*, John S. Pennell and Terence F. Cuff, "Tax Results of Liquidation of Corporate Partner Still Unclear Despite DRA 1984," *Journal of Taxation*, Vol. 62, No. 2 (February 1985).

> which LTP did not have an election under section 754 in effect. UTP, X, and Y each have a 110x dollar interest in partnership capital and surplus.
>
> UTP has an adjusted basis of 120x dollars in its property as follows: an adjusted basis of 80 dollars in its partnership interest in LTP and an adjusted basis of 40x dollars in inventory. UTP's partnership interest in LTP has a fair market value of 120x dollars, and UTP's inventory has a fair market value of 80x dollars. LTP has only one asset, a capital asset that is not a section 751 asset. LTP's asset has an adjusted basis of 330 x dollars and a fair market value of 360x dollars.
>
> In 1985, A sold A's entire interest in UTP to E for 50x dollars.
>
> **Situation 1**
>
> Both UTP and LTP have valid section 754 elections in effect.
>
> **Situation 2**
>
> UTP has a section 754 election in effect, but LTP does not.
>
> **Situation 3**
>
> UTP does not have a section 754 election in effect, but LTP does.

Rev. Rul. 87-115 reviewed Rev. Rul. 78-2, then reasoned:

> In essence, if an election under section 754 is not in effect, the partnership is treated as an independent entity, separate from its partners. Thus, absent a section 754 election, even though the transferee receives a cost basis for the acquired partnership interest, the partnership does not adjust the transferee's share of the adjusted basis of partnership property. If, however, an election under section 754 is in effect, the partnership is treated more like an aggregate of its partners, and the transferee's overall basis in the assets of the partnership is generally the same as it would have been had the transferee acquired a direct interest in its share of those assets. Nevertheless, the transferee's adjusted basis for specific partnership assets will not necessarily equal the basis the assets would have had if the transferee had acquired a direct interest in the assets. The difference is due to the fact that the transferee's basis in specific partnership assets is controlled by section 755, which does not adopt a pure aggregate approach. See section 1.755-1(c) of the regulations.
>
> **Situation 1**
>
> E purchased A's interest for 50x dollars. Thus, under section 742, E's basis in E's partnership interest is 50x dollars. Because UTP made a valid section 754 election, under section 743(b) UTP must increase the adjusted basis of its property by 20x dollars, the excess of the transferee partner's basis in the partnership interest (50x dollars) over that partner's share of the adjusted basis of such property. Under section 1.743-1(b)(1), E's share of the adjusted basis of partnership property is 30x dollars, because E succeeds to A's interest in partnership capital and surplus. See, *e.g.*, section 1.743-1(b)(1) Example (2). The 20x dollar special basis adjustment raises UTP's adjusted basis in its partnership property to 140x dollars, but the additional 20x dollars

must be segregated and allocated solely to E. Under section 755, the 20x dollars must be allocated between capital assets (UTP's interest in LTP) and other assets (UTP's inventory).

Under section 1.755-1(b)(2) of the regulations, to the extent that an amount paid by a purchaser of a partnership interest (here, 50x dollars) is attributable to the value of capital assets (here, 120x dollars, the value of UTP's interest in LTP), any difference between the amount so attributable and the transferee partner's share of the partnership basis of such property constitutes a special basis adjustment with respect to such capital assets. In the instant case, 30x dollars (60 percent of 50 x dollars) of E's purchase price is attributable to the value of UTP's interest in LTP, because 120 x dollars, the value of UTP's interest in LTP, is 60 percent of 200x dollars, the total value of UTP's property. Thus, 10x dollars, the difference between the 30 x dollars attributable to the value of UTP's interest in LTP and 20x dollars, E's proportionate share of UTP's basis in LTP, is a special basis adjustment to UTP's interest in LTP. This adjustment gives E an adjusted basis of 30x dollars in UTP's interest in LTP. The remaining 10 x dollars of the 20x dollar special basis adjustment is allocated to the adjusted basis of UTP's inventory. This gives E a 20x dollar adjusted basis in UTP's inventory.

Because UTP made a section 754 election manifesting an intent to be treated as an aggregate for purposes of sections 754 and 743, it is appropriate, for purposes of section 743 and 754, to treat the sale of A's partnership interest in UTP as a deemed sale of an interest in LTP. The selling price of E 's share of UTP's interest in LTP is deemed to equal E's share of UTP's adjusted basis in LTP, 30x dollars (¼ of 80x dollars plus 10x dollars, E 's special basis adjustment). Further, this deemed sale of an interest in LTP triggers the application of section 743(b) to LTP. Because LTP made a valid section 754 election, under section 743(b) LTP must increase the adjusted basis of its partnership property by 2.5x dollars, the excess of E's share of UTP's adjusted basis in LTP (30x dollars) over E's share of the adjusted basis of LTP's property (¼ of 110x dollars, or 27.5x dollars). Section 755 applies to LTP to allocate this basis adjustment, but because LTP has only one asset, no allocation is necessary. The 2.5 x dollar adjustment must be segregated and allocated solely to UTP and E, the transferee partner of UTP.

Situation 2

UTP has made a valid section 754 election. Thus, as in Situation 1, E gets an adjusted basis of 30x dollars in UTP's interest in LTP and an adjusted basis of 20x dollars in UTP's inventory. Also, as in Situation 1, because UTP made a section 754 election, it is appropriate, for purposes of sections 754 and 743, to treat the sale of A's interest in UTP as the sale of an interest in LTP. However, in this situation, LTP does not have a section 754 election in effect. That is, under section 743(a), LTP chose not to have the basis of its property adjusted as the result of the transfer of an interest in it. Thus, E's purchase of a partnership interest in UTP has no effect on LTP's adjusted basis in its property.

Situation 3

LTP has made a valid election under section 754, but UTP does not make a section 754 election. On the sale by A of an interest in UTP, E succeeds to A's 20x dollar adjusted basis in UTP's interest in LTP and to A's 10 x dollar adjusted basis in UTP's inventory. E succeeds to these bases because, by not making a section 754 election, UTP chose not to have the basis of its property adjusted as the result of the transfer of an interest in UTP.

In addition, by not making a section 754 election, UTP manifested an intent to be treated as an entity for purposes of sections 754 and 743. Thus, it is inappropriate, for purposes of sections 754 and 743, to treat A's sale of an interest in UTP as the sale of an interest in LTP. Consequently, UTP cannot increase E 's share of the basis of LTP's property. Nevertheless, LTP's section 754 election is not meaningless. If UTP were to sell its partnership interest in LTP, the purchaser's share of the adjusted basis of LTP's assets would be adjusted.

Rev. Rul. 87-115 held:

Situation 1

Upon the sale of A's partnership interest in UTP, the transferee's (E's) share of UTP's adjusted basis in its assets is adjusted by the amount by which the basis in E's partnership interest differs from E's share of UTP's adjusted basis in its assets. In addition, E's share of LTP's adjusted basis in its assets is adjusted by the amount by which E's share of UTP's adjusted basis in LTP differs from E's share of the adjusted basis of LTP's property.

Situation 2

Upon the sale of A's partnership interest in UTP, E's share of UTP's adjusted basis in its assets is adjusted by the amount by which the basis in E's partnership interest differs from E's share of UTP's adjusted basis in its assets. However, because LTP did not make a section 754 election, the transfer does not affect LTP's adjusted basis in its property.

Situation 3

The sale of A's partnership interest in UTP does not affect either UTP's adjusted basis in its property or LTP's adjusted basis in its property.

Letter Ruling 201906002 reasoned:

As stated in Rev. Rul. 87-115, when an upper-tier partnership has a § 754 election in effect, any § 743(b) adjustment resulting from the deemed transfer is segregated and allocated solely to the transferee of the upper-tier partnership interest.

Further, with respect to any increase in the basis of partnership property under § 743, a partnership is treated as an aggregate of its owners under the anti-churning rules. Section 197(f)(9)(E).

See part II.Q.1.c.iv Goodwill (and other intangible) Anti-Churning Rules.[5676]

[5676] Especially text accompanying fns 4180-4181 in part II.Q.1.c.iv Goodwill (and other intangible) Anti-Churning Rules.

If the basis of the transferee partner's partnership interest is greater than the former partner's share of the basis of the partnership's assets, then the election will give the new partner a stepped-up basis in the partnership assets.[5677] This basis adjustment is not necessarily tied to the change in basis between the old and new partner; rather, it is based on the relationship between the basis in the partnership interest (the "outside basis") and basis of the partnership's assets allocable to that partner (the "inside basis"). Of course, a change in basis of the partnership interest affects this relationship. However, prior changes in basis of the partnership also count. In fact, a substituted basis transaction, in which the basis in the partnership interest might or might not change, triggers the basis adjustment;[5678] however, no adjustment is made in a substituted basis transaction if the outside basis equals the inside basis.[5679] If a partnership does not make a Code § 754 election when a partner dies, consider asking the partnership to make the election when the decedent's estate or (former) revocable trust funds bequests by distributing the partnership interest, which also might be an event triggering a basis adjustment;[5680] as described above, that basis adjustment is not tied to any change in basis but rather generally catches up the "inside basis" to the "outside basis."

In a sale or exchange situation, the transferee partner's basis step-up in partnership assets is based on the extent to which the partner's basis in the partnership interest exceeds the basis of the partner's share of the partnership's assets; any contingent payments cause a basis increase to the extent they constitute gain to the seller and potentially deductible interest to the extent they constitute interest income to the seller.[5681] If the transfer is caused because of a partner's death, the basis step-up is based on the fair market value of the deceased partner's partnership interest as of the date of death, plus the transferee partner's share of partnership liabilities, minus any allocable income in respect of a decedent items;[5682] although liabilities are included in the basis of a partnership interest, they do not generate a basis increase in the partnership's assets.

[5677] Code § 743(b). Note that previously non-amortizable self-created goodwill becomes purchased amortizable goodwill. Letter Ruling 9715008 (but only if the remaining partners and the selling partner are not related under Code § 197(f)(9)(C)). See also.

[5678] Reg. § 1.755-1(b)(5). Reg. § 1.755-1(b)(5)(iv), Example (2) provides a basis adjustment as the result of a wholly nontaxable contribution to a partnership under Code § 721.

[5679] Reg. § 1.755-1(b)(5)(ii) provides, If the total amount of the basis adjustment under section 743(b) is zero, then no adjustment to the basis of partnership property will be made under this paragraph (b)(5).

[5680] See part II.Q.8.e.i Distribution of Partnership Interests.

[5681] Letter Ruling 9715008, which also held that contingent payments made more than 6 months after the date of the sale would be divided into additional principal and unstated interest under Reg. § 1.1275-4(c).

[5682] Code § 743; Reg. § 1.742-1. Code § 691 income in respect of a decedent includes the portion of the distributive share of partnership income of the decedent partner's successor in interest that is attributable to the decedent for the period ending with the date of the decedent's death. Letter Ruling 9715008. See also Rev. Rul. 66-325 (no basis step-up for accounts receivable under Code § 743 because Code § 736(a) applied); *Long v. Commissioner*, 71 T.C. 1 (1978), *aff'd* 660 F.2d 416 (10th Cir. 1981) (estate increased its basis in partnership interest to extent it paid liabilities); *Hesse v. Commissioner*, 74 T.C. 1307 (1980) and Letter Ruling 9102018 (no basis step-up for distributive share of income that is attributable to decedent for the period ending with the date of his death – obsoleted by later changes to Code § 706 because the income is reported on the decedent's final return and therefore not an unrecognized item at death). Regarding basis step-up attributable to liabilities, see fn 2091 in part II.H.2.g Partnership Basis Adjustments.

A partner's share of income in respect of a decedent under Code § 691 (including unrealized receivables) does not receive a basis step-up.[5683] Unrealized receivables are not eligible for a basis step-up, but goodwill that is not being amortized is eligible for a basis step-up.[5684]

When a person's partnership interest is liquidated, the basis of the partnership interest is allocated to the assets that person receives:[5685]

- This has led to the observation that, if one is going to liquidate the partnership anyway, a Code § 754 election might not be necessary. However, if the partnership sells its assets and then liquidates, then this strategy might not work as well for state income tax purposes as it does for federal income tax purposes;[5686] a Code § 754 election might be particularly important if the owner of the partnership interest resides in a state other than the state in which the partnership does business.

- These rules can generate opportunities to enhance the basis of an asset to be sold (but might be attacked if used to accelerate or duplicate recognition of loss):[5687]

    - A partner who receives low basis assets can use the basis in his partnership interest to increase the basis in those assets. If a Code § 754 election is not in effect, then this basis increase is not matched by a corresponding decrease in the distributed asset. Absence of a Code § 754 election might[5688] or might not[5689] be considered abusive in such a case.

    - If a partnership interest with a low basis is liquidated in exchange for high basis assets, a Code § 754 election will take into account the basis reduction in the distributed asset and increase the basis in its remaining assets by a corresponding amount.

Once a Code § 754 election is made, it cannot be revoked without IRS consent. This is extremely important to remember, since the election can lead to a step-down in the basis of partnership assets if the basis of the transferee's interest is less than the transferor's partnership property adjusted basis.

[5683] Reg. § 1.755-1(b)(4)(i).
[5684] Example provided in Reg. § 1.755-1(b)(4)(ii).
[5685] Code § 732(b).
[5686] By analogy, when an S corporation sells its assets to a third party and liquidates, it can replicate in many ways the partnership result for federal income purposes but not necessarily for state income tax purposes. Compare part II.H.8.a.i Solution That Works for Federal Income Tax Purposes with part II.H.8.a.ii State Income Tax Disconnect.
[5687] See part II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property.
[5688] See example in fn. 5427 (absence of Code § 754 election considered a duplication of loss). However, Congress has since attacked this abuse (see part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000), so the concerns expressed in the example might be less likely to be applied now.
[5689] See fn. 5426.

Because a Code § 754 election is irrevocable, consider dividing a partnership before making the election; divisions generally are income tax-free.[5690] Reasons to avoid Code § 754 elections except to the extent necessary include:

- Avoiding record-keeping requirements regarding events where basis changes are not worth the complexity.

- Reducing the possibility of events causing an inside basis step-down. However, sometimes basis reductions must be made as if a Code § 754 election were in effect.[5691] To avoid possible unwanted inside basis reductions, one should consider monitoring a partnership's unrealized losses and realizing losses to the next necessary to keep net unrealized losses comfortably below $250K.

The partnership and the transferee partner, including a decedent's estate, should consider extending their income tax returns so that any IRS adjustments to basis, including the value of assets in the decedent's gross estate, can be reflected in the transferee partner's income tax returns; ignoring the interplay of these statutes of limitations can cause the taxpayer to lose the benefit of the basis step-up.[5692] For example, suppose decedent died December 1, 2004, and the partnership sold assets December 31, 2004. The estate tax return is due August 1, 2005 (nine months after death) and may be audited as late as August 1, 2008. The estate's income tax return for calendar year 2004 is due April 15, 2005, and may be amended only as late as April 15, 2008. Thus, audit adjustments on the estate tax return might be made between April 15, 2008 and August 1, 2008, but the estate could not amend its income tax return to reflect any increase in basis due to the audit. The partnership should extend the due date of its return.[5693] Additionally, the estate could file an extension for its initial income tax return, so that the return is filed timely between August 1, 2005 and October 15, 2005 (six months being the latest date for an extension). An alternative to extending the estate's income tax return might be for the estate to choose a fiscal year ending on or after April 30, 2005; note that a Code § 645 election would be required if the decedent's partnership interest were held in a revocable trust. Additional measures may be required to preserve the basis step-up.[5694]

If the partnership's assets are included in the decedent's gross estate under Code § 2036, the partnership's assets will receive a basis adjustment, without regard to whether a Code § 754

[5690] See part II.Q.8.d Partnership Division.

[5691] See part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000.

[5692] In *Malm v. U.S.*, 420 F.Supp. 1040 (D.C. N.D. 2005), the court stated:

> Harry Malm died on August 5, 1998. His estate included shares of Medtronic stock. The IRS disputed the estate's valuation of that stock. The dispute wound up in court, and on July 23, 2003, this Court ruled that the IRS' stock valuation was correct….As a result of this ruling, the Medtronic stock had a higher fair market value than reported by the estate on its federal estate tax return. Therefore, the estate's federal income tax return overstated the amount of the gain on the sale of this stock….The estate filed its income tax return on November 14, 1999. Since the estate did not file a claim for a refund on that return until February 12, 2004, its claim is barred by the statute of limitations.

[5693] The partnership will need to make any Code § 754 election no later than the extended due date of the return. If the election does not look worthwhile but upon audit it starts looking worthwhile, the IRS will not grant Code § 9100 relief. Letter Ruling 200626003.

[5694] See text accompanying and following fn 1421 in part II.G.4.m.i Code § 1341 Claim of Right Deduction.

election was made;[5695] any gift of a partnership interest brought back under Code § 2036 qualifies for the new basis, even though the donee and not the donor's estate owned the partnership interest,[5696] and the partnership (and possibly the partners) needs to take appropriate steps to preserve the use of this basis step-up for sales that occur after death and before any estate tax audit concludes.[5697] Consider whether an estate that is well below the threshold for paying estate tax would argue that any partnership interest it holds should be disregarded under Code § 2036 and the underlying assets included in the estate, so that the

---

[5695] Letter Ruling 200626003. See *Hurford*, discussed in fn 1574 in part II.G.8 Code § 165(a) Loss for Worthlessness; Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A Limitation on that Strategy.

[5696] *Estate of Jorgensen v. Commissioner*, T.C. Memo. 2009-66, an equitable recoupment case described more fully in the text accompanying and preceding fn 1425 in part II.G.4.m.ii Equitable Recoupment, which held:

> Respondent argues that if we determine the estate is entitled to equitable recoupment, we should limit the recoupment to the income taxes paid by Jerry Lou and Gerald, who, pursuant to Ms. Jorgensen's will and revocable trust, are ultimately responsible for the estate tax liability. The grandchildren are not liable for the estate tax deficiency. In *Estate of Branson*, the residuary beneficiary, like Gerald and Jerry Lou, was responsible for the estate tax liability and was the one who overpaid income tax, thus entitling the estate to equitable recoupment. However, the relevant caselaw does not indicate that the taxpayer who overpaid tax must be the one responsible for the related deficiency for equitable recoupment to apply.
>
> We have found that there was an implied agreement that Ms. Jorgensen would retain control of the assets she contributed to the partnerships even though she purported to give partnership interests to her children and grandchildren. The partnerships paid her expenses including her Federal and California estate tax liabilities (as calculated on the estate tax returns). The assets were included in her gross estate as if they had not been transferred to the partnerships. The goal of Ms. Jorgensen's gift program was to reduce the value of her estate; i.e., a testamentary goal. Because of the program, the objects of her bounty, her children and grandchildren, paid income taxes on assets that were later determined to be properly included in valuing her gross estate, thus subjecting those assets to improper double taxation. Under these circumstances, we find that there is sufficient identity of interest between Ms. Jorgensen's estate and her children and grandchildren.
>
> It would be inequitable for the assets to be included in the value of Ms. Jorgensen's gross estate under section 2036 on the one hand, and on the other hand for the estate not to recoup the income taxes her children and grandchildren overpaid on their sale of those very same assets but are unable to recover in a refund suit. Accordingly, the estate is entitled to equitable recoupment of the 2003 income taxes overpaid by Ms. Jorgensen's children and grandchildren as a result of our determination that the values of the assets Ms. Jorgensen transferred to the partnerships are included in the value of her gross estate under section 2036.

The recoupment referred to above arose from the estate tax case being settled after the statute of limitations had passed for amending the donees' income tax returns that reported gain from sale of some of the included assets. See part II.G.4.m.ii Equitable Recoupment, which is part of part II.G.4.m Fixing Unfair Income Tax Results.

See also Rev. Rul. 79-124, cited in fn 5674, holding a Code § 743(b) adjustment applies to a Code § 1014(b)(6) basis adjustment for community property.

[5697] See text accompanying and following fn 1421 in part II.G.4.m.i Code § 1341 Claim of Right Deduction; see also text accompanying fn 1426 in part II.G.4.m.ii Equitable Recoupment.

assets could get a higher basis step-up.[5698] Query the level of proof required to invoke Code § 2036 in such a situation.[5699] The logistics of this inside basis step-up are unclear:

[5698] See fns 91-92 in part II.A.2.d.i Benefits of Estate Planning Strategies Available Only for S Corporation Shareholders (which part highlighted an S corporation's ability to avoid Code § 2036).

[5699] For an estate tax TAM, see fn 230 in part II.A.2.i.i.(b) Why Nonvoting Shares Are Needed for Estate Planning. The TAM cited *Estate of Robinson v. Commissioner*, 101 T.C. 499, 513-514 (1993), which case, involving annual exclusion gifts, stated:

> The ability of a taxpayer to avoid the form of a transaction requires strong proof in this Court, and is even more restricted by the Court of Appeals for the Eleventh Circuit, the court to which an appeal in the instant case would be taken. *Bradley v. United States*, 730 F.2d 718, 720 (11th Cir. 1984). The rule, first announced in *Commissioner v. Danielson*, 378 F.2d 771, 775 (3d Cir. 1967), vacating and remanding 44 T.C. 549 (1965), is as follows:
>
> > A party can challenge the tax consequences of his agreement as construed by the Commissioner only by adducing proof which in an action between the parties to the agreement would be admissible to alter that construction or to show its unenforceability because of mistake, undue influence, fraud, duress, etc.…
>
> Although *Danielson* involved the allocation of payments to a covenant not to compete, it is clear that the rule applies beyond the confines of such an allocation. *Sullivan v. United States*, 618 F.2d 1001 (3d Cir. 1980); *Coleman v. Commissioner*, 87 T.C. 178, 202 (1986), *affd.* in an unpublished order 833 F.2d 303 (3d Cir. 1987). The Court of Appeals for the Eleventh Circuit has also adopted a similar rule to the rule in *Danielson*. *Bradley v. United States*, *supra*. We are bound to follow *Bradley* under the rule of *Golsen v. Commissioner*, 54 T.C. 742 (1970), *affd.* 445 F.2d 985 (10th Cir. 1971).
>
> The rule in *Danielson* prevents a taxpayer from arguing against the form of a transaction adopted by the taxpayer and the other parties to the transaction unless mistake, undue influence, fraud, duress, or other defenses to the formation of a contract could be shown by the taxpayer in action against the other parties to the transaction. The rule in *Danielson* is not applicable when the form of the transaction adopted by the parties is ambiguous. *Smith v. Commissioner*, 82 T.C. 705, 713-714 (1984).
>
> In the instant case, neither the form of the transaction nor the deeds used to facilitate the transaction can be reasonably construed as ambiguous. The deeds do not refer to any interests that petitioner contends decedent's great-grandchildren had in the transferred properties. Therefore, under the rule in *Danielson*, petitioner is prevented from arguing that implied trusts were created under Georgia law for the benefit of decedent's great-grandchildren.

Along the lines of a case cited above that the taxpayer could not report as goodwill – taxed as capital gain - payments under a covenant not to compete, which was ordinary income, *Muskat v. U.S.*, 554 F.3d 183 (1st Cir. 2009), *aff'g* 101 AFTR 2d 2008-1606 (D.N.H. 2008), which is further described in fn 5557 in part II.Q.8.b.iii Partnership Alternative to Seller-Financed Sale of Goodwill, stated:

> In our view, to constitute "strong proof" a taxpayer's evidence must have persuasive power closely resembling the "clear and convincing" evidence required to reform a written contract on the ground of mutual mistake.

In rejecting a taxpayer's argument that an S corporation of which he owned 49% had a second class of stock, *Mowry v. Commissioner*, T.C. Memo. 2018-105, which is also discussed in fns 259-260 in part II.A.2.i.iii Disproportionate Distributions, held:

> Generally taxpayers are bound by the form of the transaction that they choose unless they can provide "strong proof" that the parties intended a different transaction in substance. *Schulz v. Commissioner*, 294 F.2d 52, 55 (9th Cir. 1961), *aff'g* 34 T.C. 235 (1960); see also *Vandenbosch v. Commissioner*, T.C. Memo. 2016-29, at *19-*20. There is no proof that either petitioner or G. Mowry intended an arrangement different from that which they agreed to and reported consistently on their tax filings.

Zaritsky & Law, "Finding Basis - It's Not Always Where You Thought It Was" (5/18/2020), asserted.

- If the partnership's assets are somehow treated as passing by reason of the decedent's death, is there somehow a new contribution to the partnership that generates outside basis?

- If not, then outside basis may be much lower than inside basis. In that case, a Code § 754 election may have cause inside basis to decrease to match outside basis when the relevant partnership interest is transferred. Another result would be inside basis being stripped when assets are distributed without outside basis to match.

- Because these issues have not been definitively explored, it may be wise not to distribute the relevant partnership interest or distribute the stepped up assets from the partnership until after one is confident that there will be no IRS Code § 2036 inquiry.

- Although not directly on point, the policy of *Estate of Jorgensen v. Commissioner*, T.C. Memo. 2009-66, described in part II.G.4.m.ii Equitable Recoupment, suggests that the Tax Court would accept giving the taxpayer the full income tax benefit of Code § 2036 inclusion. The only way to do that is to treat the assets as passing from the decedent to the partnership immediately after death, to avoid the trap described above. I am very comfortable taking a reporting position consistent with this theory in such a case, while at the same being aware that the lack of authority directly addressing this issues makes this analysis less than ironclad.

In reviewing anything in this part II.Q.8.e.iii.(b), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.

II.Q.8.e.iii.(c). When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000

Generally, Code § 754 election adjusts the basis of a partnership's assets when certain events occur; those events are described in part II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets, which also refers back to part II.Q.8.e.i Distribution of Partnership Interests. The idea is that the value of the partnership's assets should reflect the basis in the partnership interest when a triggering event occurs that may or may not change of basis in the partnership interest. If outside basis changes at some point and the inside basis is not reconciled then, other events may trigger an inside basis adjustment.[5700] Estate planners tend

---

The courts and the IRS, however, have held that the taxpayer cannot argue substance over form, because the taxpayer selects the form of the transaction and cannot thereafter challenge it. *City of New York v. Comm'r*, 103 T.C. 481 (1994), *aff'd*, 70 F.3d 142 (D.C. Cir. 1995) ("To freely allow tax-payers to argue for alternative tax treatment of a transaction upon the examination of the returns would be tantamount to administering the tax laws based on a policy that tax consequences flow from the 'transaction taxpayers have chosen or from any other form [of transaction] they might have chosen, whichever is … [more favorable]'"); *Estate of Durkin v. Comm'r*, 99 T.C. 561, 571-573 (1992); *Comm'r v. Danielson*, 378 F.2d 771 (3d Cir. 1967), *rev'g* 44 T.C. 549 (1965); *Coleman v. Comm'r*, 87 T.C. 178 (1986), *aff'd without op.* 833 F.2d 303 (3d Cir. 1987); *Howell v. Comm'r*, T.C. Memo. 2012-303. See also, CCA 201121020; FSAs 199921002, 199909018, 200004011, and 200242004; and TAMs 9515003, 200334001, and 200418008.

For a more recent case reciting the doctrine's history, see part II.G.33 Taxpayer Disavowing Form. That case held that "the taxpayer must establish that the form of the transaction was not chosen for the purpose of obtaining tax benefits … that are inconsistent with those the taxpayer seeks through disregarding that form.""

[5700] See part II.Q.8.e.iii.(a) Illustration of Inside Basis Issue.

to view death as the main triggering event, but the scope of events that trigger these changes is quite broad.

In one limited case involving straddles, the IRS ruled that failure to make a Code § 754 election constituted an abuse.[5701]

IRS provided to its personnel "Guidance on the Revocation of Internal Revenue Code Section 754 Election Procedures," outlining on August 26, 2021 procedures for use by LB&I and SB/SE employees when determining whether to approve or deny a request filed by a partnership to revoke its election to adjust the basis of partnership property under IRC section 754, available at https://www.irs.gov/pub/foia/ig/lmsb/lbi-04-0621-0004.pdf. Taxpayers use Form 15254, Request for Section 754 Revocation, available at https://www.irs.gov/forms-pubs/about-form-15254.

When a Code § 754 election is in place, any Code § 743 adjustments that apply to the transfers of partnership interests require the partnership to essentially create a separate set of books for each partner[5702] (until the relevant partnership interest is liquidated),[5703] whereas any Code § 734 adjustments (increasing or decreasing inside basis as a result of a change in the basis of distributed property) apply to the partnership as a whole.[5704] For more details on the implementation of a Code § 743(b) basis step-up, see part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

[5701] Notice 2002-50; see also Reg. § 1.701-2(e)(1) and the discussion of the anti-abuse regulations described in part II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property.

[5702] Reg. § 1.743-1(j).

[5703] If the Code § 743(b) basis adjustment remains when the partnership interest is liquidated, instead of being wasted it may cause an inside basis adjustment and perhaps even a capital account adjustment. See fns 515-519 in part II.C.7 Maintaining Capital Accounts.

[5704] Code § 734(b) provides:

> *Method of adjustment*. In the case of a distribution of property to a partner by a partnership with respect to which the election provided in section 754 is in effect or with respect to which there is a substantial basis reduction, the partnership shall—
>
> (1) increase the adjusted basis of partnership property by—
>
> (A) the amount of any gain recognized to the distributee partner with respect to such distribution under section 731(a)(1), and
>
> (B) in the case of distributed property to which section 732(a)(2) or (b) applies, the excess of the adjusted basis of the distributed property to the partnership immediately before the distribution (as adjusted by section 732(d)) over the basis of the distributed property to the distributee, as determined under section 732, or
>
> (2) decrease the adjusted basis of partnership property by—
>
> (A) the amount of any loss recognized to the distributee partner with respect to such distribution under section 731(a)(2) , and
>
> (B) in the case of distributed property to which section 732(b) applies, the excess of the basis of the distributed property to the distributee, as determined under section 732, over the adjusted basis of the distributed property to the partnership immediately before such distribution (as adjusted by section 732(d)).
>
> Paragraph (1)(B) shall not apply to any distributed property which is an interest in another partnership with respect to which the election provided in section 754 is not in effect.

CCA 201521012 explained the interaction of Code § 734(b) with Code § 481 adjustments for change in accounting method.[5705] Also, in reviewing anything in this part II.Q.8.e.iii.(c), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.

The taxpayer can take advantage of a basis step-up, without the partnership making a Code § 754 election, by receiving a distribution of appreciated assets within two years after death or sale or exchange of the partnership interest; see part II.Q.8.e.iii.(e) Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election. Such a distribution would tend to undermine valuation discounts, which might be good (higher basis step-up) or bad (potentially higher estate tax).

If a partnership holds assets with built-in losses greater than $250,000, one must consider harvesting those losses before engaging in any disposition or acquisition of any interest in the partnership, including the death of a partner. The rest of this section explains why.

The American Jobs Creation Act added three new mandatory basis adjustment rules that can cause serious problems if a partnership does not have a Code § 754 election in effect.[5706] The

---

[5705] When the IRS determined that a partnership had improperly deferred gain:

> When there is a change in accounting method to which IRC § 481(a) is applied, income for taxable years preceding the year of change must be determined under the accounting method that was then used, and income for the year of change and the following taxable years must be determined under the new accounting method as if the new method had always been used. Accordingly, Taxpayer's IRC § 734(b) adjustments for years preceding the year of change must be computed using the accounting method that was then used. Taxpayer's IRC § 734(b) adjustments for the year of change and subsequent years must be redetermined consistent with the new accounting method.
>
> In computing the net § 481(a) adjustment, a taxpayer must take into account all relevant accounts. See Rev. Proc. 2002-18, section 2.04(1), Rev. Proc. 97-27, 1997-1 C.B. 680, section 2.05(1). Here, the IRC § 481(a) adjustment represents the difference in gain or loss for all of the underlying securities that would have been recognized under the new method, less the gain or loss that was recognized under the prior method as of the beginning of the year of change. Taxpayer's IRC § 734(b) adjustments for taxable years prior to the year of change, as calculated under the prior method, are fully taken into account in calculating the basis in the securities. In addition, beginning in the year of change, Taxpayer's basis in its securities will be modified to reflect the gain or loss recognized in connection with the change in accounting method.
>
> The determination of whether a partnership has a change in accounting method does not depend on whether the partnership made an election under IRC § 754, whose only purpose and effect is to eliminate distortions caused by partnership distributions and sales of partnership interests. The partners of a partnership using a given accounting method ultimately recognize the same amount of cumulative taxable income over the life of the partnership whether or not the partnership makes an election under IRC § 754. A change in accounting method under IRC § 446 occurs when Taxpayer/partnership no longer treats certain securities transactions as options and thus, stops deferring the gains, losses, income, or deductions associated with those transactions.

[5706] For more details, see IRS Notice 2005-32; see also Rosenberg, AJCA Imposes New Burdens for Partnership Basis Adjustments Under Sections 734 and 743, *Journal of Taxation*, vol. 101, No. 6, 12/2004 at 334, which was followed by Lipton and Golub, Dealing With the Service's Interim Guidance on Downward Basis Adjustments Under 734 and 743, *Journal of Taxation*, vol. 103, No. 1, 7/2005 at 33; Schneider, New Basis Rules Aim at Transfer and Duplication of Built-in Losses, *Taxes – The Tax Magazine*, May 2005 at 39. Also note that Reg. § 1.701-2(d), Ex. 8 also considers failure to make a first rule applies to limit the transfer of built-in losses on property contributed to a partnership after October 22, 2004.[5707] The second rule applies when a partnership distributes cash or property after October 22, 2004 that results in the transferee either recognizing a loss or receiving a stepped-up basis in the property greater than $250,000.[5708] The third rule applies when a partner dies or transfers an interest in a partnership after October 22, 2004 and the partnership has built-in losses greater than $250,000.[5709] Furthermore, starting in 2018, this adjustment applies when the transferee partner would be allocated a loss of more than $250,000 if the partnership assets were sold for cash equal to their fair market value immediately after such transfer.[5710]

Limited exceptions apply to certain electing investment partnerships and securitization partnerships.[5711] One of these provisions encourages taxpayers to structure marketable securities partnerships as follows: all contributions are cash in exchange for partnership interests issued within 24 months of formation; the partnerships buys investment assets but does not engage in a trade or business; no partner can readily redeem that partner's partnership interest; and the partnership has a term of no more than 15 years;[5712] this structure has other advantages as well.[5713]

These adjustments can be particularly disturbing when a partnership interest is sold to a related party. Let's start with an example from IRS Notice 2005-32 that tracks the legislative history:

Section 754 election to be an abuse, but Ex. 9 does not consider failure to make a Section 754 election to be an abuse. Similarly, if a tax-indifferent party attempts to shift built-in losses to a U.S. taxpayer who has not incurred an economic loss so that the U.S. taxpayer may claim a deduction of the built-in losses from the distressed assets, the transaction might be a listed transaction under Notice 2008-34.

[5707] Code § 704(c)(1)(C). For a discussion of proposed regulations, see Kim and Carrasco, Proposed Regulations on Contributions of Built-in Loss Property: Paving a Framework for Super C, *TM Memorandum* (BNA), 10/20/2014, Vol. 55, No. 21. See also the American Bar Association Section of Taxation's Comments on Proposed Regulations on Certain Partnership Provisions of the American Jobs Creation Act of 2004, *Tax Lawyer*, vol. 69, No. 1, p. 5 (Fall 2015).

[5708] Code § 734(b).

[5709] Code § 743(a) and (b), as amended.

[5710] Code § 743(d)(1)(B). The Senate Report said:

> For example, a partnership of three taxable partners (partners A, B, and C) has not made an election pursuant to section 754. The partnership has two assets, one of which, Asset X, has a built-in gain of $1 million, while the other asset, Asset Y, has a built-in loss of $900,000. Pursuant to the partnership agreement, any gain on sale or exchange of Asset X is specially allocated to partner A. The three partners share equally in all other partnership items, including in the built-in loss in Asset Y. In this case, each of partner B and partner C has a net built-in loss of $300,000 (one third of the loss attributable to asset Y) allocable to his partnership interest. Nevertheless, the partnership does not have an overall built-in loss, but a net built-in gain of $100,000 ($1 million minus $900,000). Partner C sells his partnership interest to another person, D, for $33,333. Under the provision, the test for a substantial built-in loss applies both at the partnership level and at the transferee partner level. If the partnership were to sell all its assets for cash at their fair market value immediately after the transfer to D, D would be allocated a loss of $300,000 (one third of the built-in loss of $900,000 in Asset Y). A substantial built-in loss exists under the partner-level test added by the provision, and the partnership adjusts the basis of its assets accordingly with respect to D.

[5711] Code §§ 734(e) and 743(e), (f).

[5712] Code § 743(e).

[5713] Distributions of marketable securities might be considered nontaxable distributions of property rather than potentially taxable distributions of cash. See text accompanying footnotes 5383-5385.

> PRS is a partnership which does not have an election under § 754 in effect. PRS has no liabilities. The fair market value of PRS's assets is $4 million and the adjusted basis of PRS's assets is $4.3 million. Under § 743(d), PRS has a substantial built-in loss because the adjusted basis of the partnership property exceeds the fair market value of the partnership property by more than $250,000. A, a partner of PRS, sells a 25 percent partnership interest in PRS to B for its fair market value of $1 million. Under § 743(b), an adjustment is required to the adjusted basis of PRS's assets with respect to B....

Presumably that adjustment would be to reduce the basis of the partnership's assets by $75,000, which is the excess of A's $1,075,000 pro rata share of the basis of the partnership's assets (25% of $4,300,000) over the sale price ($1,000,000).

This provision was intended to prevent double deductions as follows, assuming that the basis of A's partnership interest is 25% of the basis of the partnership's assets:

- A has a $75,000 loss, since A's basis of $1,075,000 (25% of $4.3 million) exceeds A's $1,000,000 proceeds.

- B reports a $75,000 loss when PRS sells its assets.

What if, however, B were a related party, and Code § 267 prevented A from deducting the loss? Generally, the perceived double deduction would not apply, since A cannot deduct A's $75,000 loss. Therefore, as a matter of policy, the $75,000 mandatory basis adjustment should not apply. However, the statute does not appear to have any exceptions that take into account a Code § 267 loss disallowance, so it appears that B would be stuck with the negative basis adjustment. Thus, neither A nor B recognizes this loss.[5714]

The situation is worsened when one applies valuation adjustments, since (unlike the example in Notice 2005-32) A's partnership interest is worth less than a pro-rata-share of the underlying assets. For example, suppose A sold A's partnership interest to B for $750,000? Then a special allocation of basis adjustment would reduce B's share of the basis from A's original $1,075,000 to only $750,000. So, at first glance, the basis reduction is $325,000 ($1,075,000 minus $750,000), which exceeds the $300,000 ($4.3 million minus $4 million) substantial built-in loss that triggered the whole situation. However, the basis reduction cannot decrease an asset's basis below its fair market value,[5715] so this provision is not as onerous as it might have seemed.

One might sell the partnership's loss assets so that the partners recognize the loss, then buy other assets that have similar investment attributes but do not constitute "substantially identical stock or securities" under the wash sale rules of Code § 1091. That should avoid the mandatory basis reductions and give A the losses that would otherwise have been disallowed.

[5714] B would be able to take advantage of this disallowed loss if and to the extent that B later sells B's partnership interest for a gain. Code § 267(d).

[5715] See fn. 4241 in part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

II.Q.8.e.iii.(d). Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest

For when a transfer triggers a Code § 743 inside basis adjustment, see part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000. This part II.Q.8.e.iii.(d) assumes that one has determined that a Code § 743(b) adjustment applies. In reviewing anything in this part II.Q.8.e.iii.(d), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.

Before getting into how the allocations work, consider various reporting issues:

- Make a Code § 754 election on the partnership return covering the year of transfer, if not yet in effect.

- A transferee that acquires, by sale or exchange, an interest in a partnership with a Code § 754 election in effect for the taxable year of the transfer, must notify the partnership, in writing, within 30 days of the sale or exchange.[5716] A transferee that acquires, on the death of a partner, an interest in a partnership with a Code § 754 election in effect for the taxable year of the transfer, must notify the partnership, in writing, within one year of the death of the deceased partner.[5717] In making the adjustments under Code § 743(b) and any statement or return relating to such adjustments under this section, a partnership may rely on the written notice described above to determine the transferee's basis in a partnership interest, unless any partner who has responsibility for the partnership's federal income tax reporting has knowledge of facts indicating that the statement is clearly erroneous.[5718] A partnership is not required to make Code § 743(b) adjustments (or any statement or return relating to those adjustments) with respect to any transfer until it has been notified of the transfer.[5719] If the transferee fails to provide the partnership with the written notice described

---

[5716] Reg. § 1.743-1(k)(2)(i) (also referred to by Reg. § 1.755-1(d)), which further provides:

> The written notice to the partnership must be signed under penalties of perjury and must include the names and addresses of the transferee and (if ascertainable) of the transferor, the taxpayer identification numbers of the transferee and (if ascertainable) of the transferor, the relationship (if any) between the transferee and the transferor, the date of the transfer, the amount of any liabilities assumed or taken subject to by the transferee, and the amount of any money, the fair market value of any other property delivered or to be delivered for the transferred interest in the partnership, and any other information necessary for the partnership to compute the transferee's basis.

[5717] Reg. § 1.743-1(k)(2)(ii), which further provides:

> The written notice to the partnership must be signed under penalties of perjury and must include the names and addresses of the deceased partner and the transferee, the taxpayer identification numbers of the deceased partner and the transferee, the relationship (if any) between the transferee and the transferor, the deceased partner's date of death, the date on which the transferee became the owner of the partnership interest, the fair market value of the partnership interest on the applicable date of valuation set forth in section 1014, and the manner in which the fair market value of the partnership interest was determined.

[5718] Reg. § 1.743-1(k)(3).

[5719] Reg. § 1.743-1(k)(4), which provides that a partnership is notified of a transfer when either:

> (i) The partnership receives the written notice from the transferee required under paragraph (k)(2) of this section; or
>
> (ii) Any partner who has responsibility for federal income tax reporting by the partnership has knowledge that there has been a transfer of a partnership interest.

above, the partnership must attach a statement to its return in the year that the partnership is otherwise notified of the transfer.[5720]

- A partnership that must adjust the bases of partnership properties under Code § 743(b)) must attach a statement to the partnership return for the year of the transfer setting forth the name and taxpayer identification number of the transferee as well as the computation of the adjustment and the partnership properties to which the adjustment has been allocated.[5721]

What happens when a partner who has received a Code § 743(b) basis adjustment later transfers the partnership interest? Reg. § 1.743-1(f), "Subsequent transfers," provides:

> Where there has been more than one transfer of a partnership interest, a transferee's basis adjustment is determined without regard to any prior transferee's basis adjustment. In the case of a gift of an interest in a partnership, the donor is treated as transferring, and the donee as receiving, that portion of the basis adjustment attributable to the gifted partnership interest. The provisions of this paragraph (f) are illustrated by the following example:
>
> *Example.*
>
> (i) A, B, and C form partnership PRS. A and B each contribute $1,000 cash, and C contributes land with a basis and fair market value of $1,000. When the land has appreciated in value to $1,300, A sells its interest to T1 for $1,100 (one-third of $3,300, the fair market value of the partnership property). An election under section 754 is in effect; therefore, T1 has a basis adjustment under section 743(b) of $100.
>
> (ii) After the land has further appreciated in value to $1,600, T1 sells its interest to T2 for $1,200 (one-third of $3,600, the fair market value of the partnership property). T2 has a basis adjustment under section 743(b) of $200. This amount is determined without regard to any basis adjustment under section 743(b) that T1 may have had in the partnership assets.
>
> (iii) During the following year, T2 makes a gift to T3 of fifty percent of T2's interest in PRS. At the time of the transfer, T2 has a $200 basis adjustment under section 743(b). T2 is treated as transferring $100 of the basis adjustment to T3 with the gift of the partnership interest.

The 1954 legislative history says:

> If property with respect to which the transferee has a special basis under section 743(b) is distributed to a partner other than the transferee, then the transferee partner's special basis allocable to such property is shifted to other property remaining in the partnership (or distributed to the transferee in the same transaction) in the same manner as is

[5720] Reg. § 1.743-1(k)(5), which describes the attachment, as well as what to do when the transferee supplies the information.

[5721] Reg. § 1.743-1(k)(1)(i); in addition to referring to this requirement, Reg. § 1.755-1(d) indicates that this statement should include the partnership properties to which the adjustment is allocated under section 755, which is what this part II.Q.8.e.iii.(d) is all about. See Reg. § 1.743-1(k)(1)(ii) for special rules for oil and gas properties that are depleted at the partner level under Code § 613A(c)(7)(D).

described on page 400 of the report of the Committee on Finance with respect to the Senate amendments (S. Rept. 1622, 83d Cong., 2d sess.).

Reg. § 1.743-1(g), "Distributions," provides:

(1) *Distribution of adjusted property to the transferee*.

(i) *Coordination with section 732*. If a partnership distributes property to a transferee and the transferee has a basis adjustment for the property, the basis adjustment is taken into account under section 732. See § 1.732-2(b).

(ii) *Coordination with section 734*. For certain adjustments to the common basis of remaining partnership property after the distribution of adjusted property to a transferee, see § 1.734-2(b).

(2) *Distribution of adjusted property to another partner*.

(i) *Coordination with section 732*. If a partner receives a distribution of property with respect to which another partner has a basis adjustment, the distributee does not take the basis adjustment into account under section 732.

(ii) *Reallocation of basis*. A transferee with a basis adjustment in property that is distributed to another partner reallocates the basis adjustment among the remaining items of partnership property under § 1.755-1(c).

(3) *Distributions in complete liquidation of a partner's interest*. If a transferee receives a distribution of property (whether or not the transferee has a basis adjustment in such property) in liquidation of its interest in the partnership, the adjusted basis to the partnership of the distributed property immediately before the distribution includes the transferee's basis adjustment for the property in which the transferee relinquished an interest (either because it remained in the partnership or was distributed to another partner). Any basis adjustment for property in which the transferee is deemed to relinquish its interest is reallocated among the properties distributed to the transferee under § 1.755-1(c).

(4) *Coordination with other provisions*. The rules of sections 704(c)(1)(B), 731, 737, and 751 apply before the rules of this paragraph (g).

(5) *Example*. The provisions of this paragraph (g) are illustrated by the following example:

Example.

(i) A, B, and C are equal partners in partnership PRS. Each partner originally contributed $10,000 in cash, and PRS used the contributions to purchase five nondepreciable capital assets. PRS has no liabilities. After five years, PRS's balance sheet appears as follows:

Assets

	Adjusted basis	Fair Market value
Asset 1	$10,000	$10,000
Asset 2	4,000	6,000
Asset 3	6,000	6,000
Asset 4	7,000	4,000
Asset 5	3,000	13,000
Total	30,000	39,000

Capital

	Adjusted per books	Fair Market value
Partner A	$10,000	$13,000
Partner B	10,000	13,000
Partner C	10,000	13,000
Total	30,000	39,000

(ii) A sells its interest to T for $13,000 when PRS has an election in effect under section 754. T receives a basis adjustment under section 743(b) in the partnership property that is equal to $3,000 (the excess of T's basis in the partnership interest, $13,000, over T's share of the adjusted basis to the partnership of partnership property, $10,000). The basis adjustment is allocated under section 755, and the partnership's balance sheet appears as follows:

Assets

	Adjusted basis	Fair Market value	Basis adjustment
Asset 1	$10,000	$10,000	0.00
Asset 2	4,000	6,000	666.67
Asset 3	6,000	6,000	0.00
Asset 4	7,000	4,000	(1,000.00)
Asset 5	3,000	13,000	3,333.33
Total	30,000	39,000	3,000.00

	Capital Adjusted per books	Fair Market value	Special basis
Partner T	$10,000	$13,000	$3,000
Partner B	10,000	13,000	0
Partner C	10,000	13,000	0
Total	30,000	39,000	3,000

(iii) Assume that PRS distributes Asset 2 to T in partial liquidation of T's interest in the partnership. T has a basis adjustment under section 743(b) of $666.67 in Asset 2. Under paragraph (g)(1)(i) of this section, T takes the basis adjustment into account under section 732. Therefore, T will have a basis in Asset 2 of $4,666.67 following the distribution.

(iv) Assume instead that PRS distributes Asset 5 to C in complete liquidation of C's interest in PRS. T has a basis adjustment under section 743(b) of $3,333.33 in Asset 5. Under paragraph (g)(2)(i) of this section, C does not take T's basis adjustment into account under section 732. Therefore, the partnership's basis for purposes of sections 732 and 734 is $3,000. Under paragraph (g)(2)(ii) of this section, T's $3,333.33 basis adjustment is reallocated among the remaining partnership assets under § 1.755-1(c).

(v) Assume instead that PRS distributes Asset 5 to T in complete liquidation of its interest in PRS. Under paragraph (g)(3) of this section, immediately prior to the distribution of Asset 5 to T, PRS must adjust the basis of Asset 5. Therefore, immediately prior to the distribution, PRS's basis in Asset 5 is equal to $6,000, which is the sum of (A) $3,000, PRS's common basis in Asset 5, plus (B) $3,333.33, T's basis adjustment to Asset 5, plus (C) ($333.33), the sum of T's basis adjustments in Assets 2 and 4. For purposes of sections 732 and 734, therefore, PRS will be treated as having a basis in Asset 5 equal to $6,000.

For more details on distributions generally when a Code § 754 election is in effect, see part II.Q.8.e.iii.(e) Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election.

As noted in part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000, special rules apply when built-in losses are involved. For a discussion of proposed regulations implementing Code § 743(b) adjustments in such cases, see the American Bar Association Section of Taxation's "Comments on Proposed Regulations on Certain Partnership Provisions of the American Jobs Creation Act of 2004," *Tax Lawyer*, vol. 69, No. 1, p. 5 (Fall 2015).

For effectuating these basis adjustments, see part II.Q.1.g Partnership Basis Adjustments.

II.Q.8.e.iii.(e). Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election

The basis of partnership property is adjusted as the result of a distribution of property to a partner if a Code § 754 election is in effect with respect to such partnership or if there is a substantial basis reduction with respect to such distribution:[5722]

(1) To the extent that the adjustment is an increase, the partnership increases the basis of its property by:[5723]

- (A) the amount of any gain recognized to the distributee partner with respect to such distribution under Code § 731(a)(1), and

- (B) in the case of distributed property to which Code § 732(a)(2) or (b) applies, the excess of the adjusted basis of the distributed property to the partnership immediately before the distribution (as adjusted by Code § 732(d) – see further below) over the basis of the distributed property to the distributee, as determined under Code § 732.[5724]

(2) To the extent that the adjustment is a decrease, the partnership increases the basis of its property by:[5725]

- (A) the amount of any loss recognized to the distributee partner with respect to such distribution under Code § 731(a)(2), and

- (B) in the case of distributed property to which Code § 732(b) applies, the excess of the basis of the distributed property to the distributee, as determined under Code § 732, over the adjusted basis of the distributed property to the partnership immediately before such distribution (as adjusted by Code § 732(d)).

This adjustment to the basis of the partnership's property may also cause partners' capital accounts to be adjusted.[5726]

Reg. § 1.734-1(e), "Recovery of adjustments to basis of partnership property," includes:

(1) *Increases in basis*. For purposes of section 168, if the basis of a partnership's recovery property is increased as a result of the distribution of property to a partner, then the increased portion of the basis must be taken into account as if it were newly-purchased recovery property placed in service when the distribution occurs. Consequently, any applicable recovery period and method may be used to determine the recovery allowance with respect to the increased portion of the basis. However, no change is made for purposes of determining the recovery allowance under section 168 for the portion of the basis for which there is no increase.

5722 Code § 734(a), see part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000.
5723 Code § 734(b)(1).
5724 The rule in (B) does not apply to any distributed property which is an interest in another partnership with respect to which a Code § 754 election is not in effect.
5725 Code § 734(b)(2).
5726 See fn 514 in part II.C.7 Maintaining Capital Accounts.

(2) *Decreases in basis*. For purposes of section 168, if the basis of a partnership's recovery property is decreased as a result of the distribution of property to a partner, then the decrease in basis must be accounted for over the remaining recovery period of the property beginning with the recovery period in which the basis is decreased.

However, basis adjustments under Code § 732 or 734(b) do not qualify for bonus depreciation.[5727]

Code § 755 allocates the basis adjustment described above.[5728] Generally, any Code § 743(b) change in the adjusted basis of partnership property will be allocated in a manner which has the effect of reducing the difference between the fair market value in any other manner permitted by regulations;[5729] this concept prevents any increase in the basis of assets that are distributed from reducing the basis of the partnership's assets with unrealized gain. In applying Code § 755 allocations to Code § 734(b) basis adjustments:

(1) Where a distribution of partnership property results in an adjustment to the basis of undistributed partnership property under Code § 734(b)(1)(B) or (b)(2)(B), the adjustment must be allocated to remaining partnership property of a character similar to that of the distributed property with respect to which the adjustment arose.[5730] Where a distribution results in an adjustment under Code § 734(b)(1)(A) or (b)(2)(A) to the basis of undistributed partnership property, the adjustment is allocated only to capital gain property.[5731]

(2) If a basis increase is allocated within a class, the increase is allocated first to properties with unrealized appreciation in proportion to their respective amounts of unrealized appreciation before such increase (but only to the extent of each property's unrealized appreciation), and any remaining increase must be allocated among the properties within the class in proportion to their fair market values.[5732] If a basis decrease is allocated within a class, the decrease is allocated first to properties with unrealized depreciation in proportion to their respective amounts of unrealized depreciation before such decrease (but only to the extent of each property's unrealized depreciation), and any remaining decrease must be allocated among the properties within the class in proportion to their adjusted bases (as adjusted under the preceding sentence).[5733]

[5727] See text accompanying fns 1472 and 1473 in part II.G.5.b Bonus Depreciation.

[5728] Code § 732(c).

[5729] See fn. 4241, found in part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

[5730] Reg. § 1.755-1(c)(1)(i), which continues:

> Thus, when the partnership's adjusted basis of distributed capital gain property immediately prior to distribution exceeds the basis of the property to the distributee partner (as determined under section 732), the basis of the undistributed capital gain property remaining in the partnership is increased by an amount equal to the excess. Conversely, when the basis to the distributee partner (as determined under section 732) of distributed capital gain property exceeds the partnership's adjusted basis of such property immediately prior to the distribution, the basis of the undistributed capital gain property remaining in the partnership is decreased by an amount equal to such excess. Similarly, where there is a distribution of ordinary income property, and the basis of the property to the distributee partner (as determined under section 732) is not the same as the partnership's adjusted basis of the property immediately prior to distribution, the adjustment is made only to undistributed property of the same class remaining in the partnership.

[5731] Reg. § 1.755-1(c)(1)(ii).

[5732] Reg. § 1.755-1(c)(2)(i).

[5733] Reg. § 1.755-1(c)(2)(ii).

(3) Where Code § 734(b)(2) requires a decrease in the basis of partnership assets and the amount of the decrease exceeds the adjusted basis to the partnership of property of the required character, the basis of that property is reduced to zero (but not below zero).[5734]

(4) Where an increase or a decrease in the basis of undistributed property cannot be made because the partnership owns no property of the character required to be adjusted, or because the basis of all the property of a like character has been reduced to zero, the adjustment is made when the partnership later acquires property of a like character to which an adjustment can be made.[5735]

If a transferee partner receives a distribution of property (other than money) from the partnership within two years after the partner acquired the partner's interest or part thereof in the partnership by a transfer with respect to which a Code § 754 election was not in effect, the partner may elect to treat as the adjusted partnership basis of such property the adjusted basis such property would have if the Code § 754 election were in effect.[5736] For these purposes, a "transfer of a partnership interest occurs upon a sale or exchange of an interest or upon the death of a partner."[5737] Also, if a Code § 754 election is not in place, a partner is required to apply this rule to a distribution to him, whether or not made within two years after the transfer, if at the time of his acquisition of the transferred interest:[5738]

[5734] Reg. § 1.755-1(c)(3).

[5735] Reg. § 1.755-1(c)(4).

[5736] Reg. § 1.732-1(d)(1)(iii). Reg. § 1.732-1(d)(1)(iv) provides:

> If an election under section 732(d) is made upon a distribution of property to a transferee partner, the amount of the adjustment with respect to the transferee partner is not diminished by any depletion or depreciation of that portion of the basis of partnership property which arises from the special basis adjustment under section 732(d), since depletion or depreciation on such portion for the period prior to distribution is allowed or allowable only if the optional adjustment under section 743(b) is in effect.

The final regulations did not change the proposed regulations much. The preamble to the proposed regulations, REG 209682-94, provides:

> Section 732(d) provides a special rule that applies to determine the basis of property distributed to a transferee partner who acquired any part of its partnership interest in a transfer when an election under section 754 was not in effect. When the special rule applies, the basis of distributed property is adjusted immediately before the distribution to reflect the basis that the property would have had if the partnership had a section 754 election in effect at the time the transferee acquired the partnership interest. As a result, the basis of the distributed property in the hands of the partnership immediately before the distribution more closely approximates its fair market value. Consequently, the transferee's basis in the distributed property will also more closely approximate its fair market value.

[5737] Reg. § 1.732-1(d)(1)(i).

[5738] Reg. § 1.732-1(d)(4). The preamble to the proposed regulations, REG 209682-94, provided:

> The purpose of § 1.732-1(d)(4) was to prevent distortions caused by section 732(c) that might inflate the basis of depreciable, depletable, or amortizable property above its fair market value. At the time that the regulations were adopted, such distortions might occur because section 732(c) allocated basis among distributed properties based on their relative bases. The changes made to section 732(c) by the Taxpayer Relief Act of 1997, Public Law 105-34, section 1061, 111 Stat. 788, 945-46 (1997), make the distortions targeted by the regulations less likely to occur. As a result, the Service and Treasury request comments on the proper scope of section 732(d), and specifically, under what circumstances, if any, the Secretary should exercise its authority to mandate the application of section 732(d) to a transferee.

T.D. 8847 described and responded to the requested comments:

- The fair market value of all partnership property (other than money) exceeded 110% of its adjusted basis to the partnership,

- An allocation of basis under Code § 732(c) upon a liquidation of his interest immediately after the transfer of the interest would have resulted in a shift of basis from property not subject to an allowance for depreciation, depletion, or amortization, to property subject to such an allowance, and

- A Code § 743(b) basis adjustment would change the basis to the transferee partner of the property actually distributed.

If property is distributed to a transferee partner who makes a Code § 732(d) election, and if that property is not the same property that would have had a special basis adjustment, then the special basis adjustment applies to any like property received in the distribution, if the transferee, in exchange for the property distributed, has relinquished the transferee's interest in the property with respect to which the transferee would have had a special basis adjustment.[5739] This rule applies whether the property in which the transferee has relinquished the transferee's interest is retained or disposed of by the partnership.[5740]

Special rules apply to unrealized receivables and substantially appreciated inventory items.[5741] Also, in reviewing anything in this part II.Q.8.e.iii.(e), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.

II.Q.8.e.iii.(f). Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold

When an asset sale is desirable for tax purposes but a stock sale is necessary for nontax purposes, Code § 338(g) permits a corporation that buys another corporation from the target's parent in a qualified purchase to elect to treat the stock purchase as an asset purchase. This may help if the gain on sale can be offset by net operating losses[5742] – especially the target's[5743] – or perhaps if the corporation expects to be taxed at a lower rate now and a higher rate later.

Several commentators suggested that the mandatory application of section 732(d) no longer should be required, because the changes made to section 732(c) by the Taxpayer Relief Act of 1997, Public Law 105- 34, 111 Stat. 788, 945-46 (1997), make the distortions targeted by the regulations less likely to occur. However, other commentators noted that distortions caused by section 732(c) still may occur. Accordingly, the rule contained in § 1.732-1(d)(4), which requires the mandatory application of section 732(d) in certain cases, remains in effect.

[5739] Reg. § 1.732-1(d)(1)(v).

[5740] Reg. § 1.732-1(d)(1)(v). For a shift of transferee's basis adjustment under Code § 743(b) to like property, see Reg. § 1.743-1(g).

[5741] See fns. 5406-5408, found in part II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property.

[5742] See part II.G.4.l.ii Net Operating Loss Deduction.

[5743] Code § 382 limits the amount of the taxable income of any new loss corporation for any post-change year which may be offset by pre-change losses. However, Code § 382(h)(1)(C) provides that this limitation does not apply to any gains recognized by reason of an election under Code § 338.

Similarly, the owners of an S corporation should consider making a Code § 338(h)(10) election when selling their S corporation stock to a corporation.[5744] The stock that is sold must be at least 80% of the voting power and at least 80% of the total value of the corporation's stock.[5745]

The election causes the stock sale to be treated as if the S corporation sold all its assets while owned by the sellers and while still an S corporation. Gain is therefore recognized by the S corporation and taxed to the selling shareholders, which creates additional basis in their S corporation stock. The actual sale of the stock is ignored for tax purposes and the shareholders are treated as receiving the sale proceeds in liquidation of the S corporation.

Thus, the selling shareholders will be taxed on a deemed asset sale and liquidation, rather than on a stock sale:

- Unless they bought a portion of their stock at a premium over the value of the corporation's assets, a Code § 338(h)(10) election will generally not significantly affect the amount of gain on which they would be taxed. However, it may cause a portion of their gain to be ordinary income, rather than capital gain, to the extent that a sale of the S corporation's assets would generate ordinary income, and state income tax surprises might occur; for a discussion of the some of the issues mentioned in the sentence, see similar issues raised in part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation. But, the whole point was to replicate an asset sale for tax purposes, so the Code § 338(h)(10) election merely allows a different form to be used for the deemed asset sale. Note, however, that ordinary income tax to the seller may be more expensive than the deduction allowed the buyer, if the buyer is a C corporation taxed at a lower rate, so in an environment of very low C corporation rates relative to individual rates may tend to drive the parties further apart with respect to the value of a Code § 338(h)(10) election. These concerns about ordinary income tend to be moot, because buyers usually agree to allocate proceeds in a manner that generates only capital gain on the deemed sale of assets; see part II.Q.1.f Code § 1060 Allocation Rule When Selling Business.

- Thus, gain on sale of the assets will be capital gain and add to basis of the stock that is deemed sold on liquidation. Unless pre-sale outside basis was lower than pre-sale inside basis, this addition to basis will result in a new outside basis greater than or equal to liquidation proceeds. This has some concepts in common with part II.H.8.a Depreciable Real Estate in an S Corporation – Possible Way to Replicate Effect of Basis Step-Up If the Stars Align Correctly.

- This mechanism automatically avoids gain on sale of stock, with no limit. Compare that with the limitations on the exclusion for the gain on the sale of certain C corporation stock under part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation.

These income tax consequences may affect selling shareholders differently. Variations in purchase price among shareholders do not violate the S corporation single-class-of-stock rule if

---

[5744] Reg. § 1.338(h)(10)-1(c)(1) authorizes a Code § 338(h)(10) election when a corporation buys stock of the target corporation meeting the requirements of Code § 1504(a)(2) from a selling consolidated group, a selling affiliate, or the S corporation shareholders in a qualified stock purchase. See Code §§ 338(d)(3) and 338(h)(3)(A).
[5745] Code § 1504(a)(2).

determined in arm's length negotiations with the purchaser. See part II.A.2.i.vii Adjustments in Code § 338(h)(10) Sales in part II.A.2.i Single Class of Stock Rule.

If the purchaser is not a corporation, a Code § 336(e) election might allow the buyer to replicate the results of a Code § 338(h)(10) election.[5746] The selling corporation or S corporation shareholder(s) must dispose of stock of another corporation (target) in a qualified stock disposition.[5747] "Qualified stock disposition" means any transaction or series of transactions in which stock meeting the requirements of Code § 1504(a)(2) of a domestic corporation is either sold, exchanged, or distributed, or any combination thereof, by another domestic corporation or by the S corporation shareholders in a disposition,[5748] during the 12-month disposition period.[5749] "Disposition" means any sale, exchange, or distribution of stock, but only if:[5750]

(A) The basis of the stock in the hands of the purchaser is not determined in whole or in part by reference to the adjusted basis of such stock in the hands of the person from whom the stock is acquired or under Code § 1014(a) (property acquired from a decedent);

(B) Subject to an exception for certain Code § 355(d)(2) and (e)(2) transactions,[5751] the stock is not sold, exchanged, or distributed in a transaction to which Code § 351, 354, 355, or 356 applies and is not sold, exchanged, or distributed in any transaction described in regulations in which the transferor does not recognize the entire amount of the gain or loss realized in the transaction; and

(C) The stock is not sold, exchanged, or distributed to a related person.

Both the rules governing Code § 338(h)(10) elections and Code § 336(e) elections[5752] provide that stock acquired by a purchasing corporation from a related corporation is generally not considered acquired by purchase.[5753] The seller cannot be a person the ownership of whose stock would, under Code § 318(a) (other than Code § 318(a)(4)), be attributed to the buyer.[5754] (Also, in reviewing anything in this part II.Q.8.b.i.(e), consider whether part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits may be relevant.)

A Code § 336(e) election for an S corporation target is made by completing the following requirements:[5755]

[5746] Reg. § 1.336-1(a) provides that the effects of Code § 338(h)(10) and the regulations thereunder generally apply to Code § 336(e) elections.
[5747] Reg. § 1.336-2(a), referring to Reg. § 1.336-1(b)(6) in defining a qualified stock disposition.
[5748] Within the meaning of Reg. § 1.336-1(b)(5).
[5749] Reg. § 1.336-1(b)(6).
[5750] Reg. § 1.336-1(b)(5).
[5751] Reg. § 1.336-1(b)(5)(ii) provides that:

> a distribution of stock to a person who is not a related person in a transaction in which the full amount of stock gain would be recognized pursuant to section 355(d)(2) or (e)(2) shall be considered a disposition.

[5752] Reg. § 1.336-1(b)(5)(iii) provides:

> *Transactions with related persons*. In determining whether stock is sold, exchanged, or distributed to a related person, the principles of section 338(h)(3)(C) and § 1.338-3(b)(3) shall apply.

[5753] Reg. § 1.338-3(b)(3).
[5754] Code § 338(h)(3)(A)(iii). For Code § 318(a), see part II.Q.7.a.viii Code § 318 Family Attribution under Subchapter C.
[5755] Reg. § 1.336-2(h)(3).

- All of the S corporation shareholders, including those who do not dispose of any stock in the qualified stock disposition, and the S corporation target must enter into a written, binding agreement, on or before the due date (including extensions) of the Federal income tax return of the S corporation target for the taxable year that includes the disposition date, to make a Code § 336(e) election;

- The S corporation target must retain a copy of the written agreement; and

- The S corporation target must attach the Code § 336(e) election statement, to its timely filed (including extensions) Federal income tax return for the taxable year that includes the disposition date. A Reg. § 301.9100-3 extension of time to file the election may be available.[5756]

Instead of the seller(s) being treated as selling stock, the target is treated as selling its assets to an unrelated person in a single transaction at the close of the disposition date (but before the deemed liquidation described below)[5757] in exchange for the aggregate deemed asset disposition price.[5758] The target realizes the deemed disposition tax consequences from the deemed asset disposition before the close of the disposition date while the target is owned by seller or the S corporation shareholders.[5759] If the target is an S corporation, its S election continues in effect through the close of the disposition date (including the time of the deemed asset disposition and the deemed liquidation) notwithstanding the usual rules for S corporation terminations.[5760] Also, if the target is an S corporation (but not a qualified subchapter S subsidiary (QSub) [5761]), any direct or indirect subsidiaries of the target that the target has elected to treat as QSubs remain qualified QSubs through the close of the disposition date.[5762] If the target is an S corporation, its shareholders (whether or not they sell or exchange their stock)

5756 Letter Rulings 201652014 and 201711007, the latter holding:

WITHIN 45 DAYS OF THE DATE ON THIS LETTER, S Corporation Target and the S Corporation Shareholder must enter into a written, binding agreement to make a section 336(e) election and S Corporation Target must file the section 336(e) election statement in accordance with § 1.336-2(h). The section 336(e) election statement must be attached to S Corporation Target's tax return for B Year. In addition, a copy of this letter must be attached to S Corporation Target's return. Alternatively, if S Corporation Target files its return electronically, it may satisfy the requirement of attaching a copy of this letter to the return by attaching a statement to its return that provides the date and control number (PLR-131803-16) of this letter ruling.

WITHIN 120 DAYS OF THE DATE ON THIS LETTER, all relevant parties must file or amend, as applicable, all returns and amended returns (if any) necessary to report the transaction consistently with the making of a section 336(e) election for the taxable year in which the transaction was consummated (and for any other affected taxable year).

The above extension of time is conditioned on the taxpayers' (*i.e.*, Purchaser's, S Corporation Target's, and S Corporation Shareholder's) tax liability (if any) being not lower, in the aggregate, for all years to which the section 336(e) election applies than it would have been if the Election had been timely filed (taking into account the time value of money). No opinion is expressed as to the taxpayers' tax liability for the years involved. A determination thereof will be made by the applicable Director's office upon audit of the federal income tax returns involved.

5757 Reg. § 1.336-2(b)(1)(iii).

5758 Reg. § 1.336-2(b)(1)(i)(A).

5759 Reg. § 1.336-2(b)(1)(i)(A).

5760 Reg. § 1.336-2(b)(1)(i)(A).

5761 See part II.A.2.g Qualified Subchapter S Subsidiary (QSub).

5762 Reg. § 1.336-2(b)(1)(i)(A).

take their pro rata share of the deemed disposition tax consequences into account under Code § 1366 and increase or decrease their basis in target stock under Code § 1367.[5763]

Immediately after the deemed asset disposition described above, the target is treated as acquiring all of its assets from an unrelated person in a single, separate transaction at the close of the disposition date in exchange for an amount equal to the adjusted grossed-up basis.[5764] The target remains liable for the tax liabilities it had before this deemed sale and purchase (including the tax liability for the deemed disposition tax consequences).[5765]

The target and seller (or S corporation shareholders) are treated as if, before the close of the disposition date, after the deemed asset disposition described above, and while target is owned by seller or S corporation shareholders, the target transferred all of the consideration deemed received in the deemed asset disposition to seller or S corporation shareholders, any S corporation election for the original target terminated, and the original target ceased to exist.[5766] This transfer to the seller or S corporation shareholders is characterized for Federal income tax purposes in the same manner as if the parties had actually engaged in the transactions deemed to occur above and taking into account other transactions that actually occurred or are deemed to occur.[5767]

Thus, the following transactions are deemed to have occurred:

1. The target sells its assets to a hypothetical buyer.

2. The target is treated as having bought its assets from a hypothetical seller.

3. The target liquidates, while the old shareholders are deemed to continue owning the stock.

The time for taking into account liabilities in the hypothetical asset transaction and the amount of the liabilities taken into account is determined as if the consideration included the discharge of the liabilities by the unrelated person.[5768] For example, if no amount of a liability is properly taken into account in amount realized as of the beginning of the day after the disposition date, the liability is not initially taken into account in determining the purchase price, but it may be taken into account at some later date.[5769] At the January 2017 American Bar Association Section of Taxation meeting, a discussion of Code § 336(e) gave this example:[5770]

[5763] Reg. § 1.336-2(b)(1)(iii)(A). Code § 1367 is reproduced in part II.G.4.d.i Basis Limitation Generally.
[5764] Reg. § 1.336-2(b)(1)(ii).
[5765] Reg. § 1.336-2(b)(1)(ii).
[5766] Reg. § 1.336-2(b)(1)(iii)(A).
[5767] Reg. § 1.336-2(b)(1)(iii)(A), which continues:

> For example, the transfer may be treated as a distribution in pursuance of a plan of reorganization, a distribution in complete cancellation or redemption of all of its stock, one of a series of distributions in complete cancellation or redemption of all of its stock in accordance with a plan of liquidation, or part of a circular flow of cash. In most cases, the transfer will be treated as a distribution in complete liquidation to which sections 331 or 332 and sections 336 or 337 apply.

[5768] Reg. § 1.336-3(d)(2).
[5769] Reg. § 1.336-3(d)(2).
[5770] Slides discussed by Bakal, Bakke, Mottahedeh, and Weiss are saved as Thompson Coburn LLP document no. 6563470.

- Deemed asset purchase price equals cash paid plus "liabilities" assumed.

- Liabilities do not include amounts which are not currently deductible or amounts not borrowed from a third party.

- Assume that the assets are worth 100 and are associated with 20 of liabilities, and that the purchaser pays 80 for the target's stock.

- On the target's deemed liquidation after filing a conversion election, assets distributed are worth 100, but basis is limited to 80, which potentially triggers 20 of gain.

The meeting gave the following examples of liabilities that may trigger this gain:

- Environmental and other contingent liabilities

- Deferred compensation (Code § 404(a)(5))[5771]

- Obligations to perform future services (*Pierce*)

- Economic performance (Code § 461(h))

However, it was suggested that such a mismatch may occur in a straight asset sale as well.

A minority shareholder who retains its target stock does not recognize gain or loss with respect to its shares of target stock; thus, the minority shareholder's basis (except as noted below) and holding period for that target stock are not affected by Code § 336(e) election.[5772] Notwithstanding this treatment of the minority shareholder, if a Code § 336(e) election is made, target will still be treated as disposing of all of its assets in the deemed asset disposition.[5773] If the target is an S corporation, any K-1 items the minority shareholder reports by reason of the deemed sale will affect the shareholder's basis.[5774]

[5771] *Hoops, LP v. Commissioner*, T.C. Memo. 2022-9, held:

> Section 404(a)(11)(B) provides that, for purposes of determining when deferred compensation is paid, no amount shall be treated as received by the employee, or paid, until it is actually received by the employee. This result is consistent with Congress' intent for nonqualified plans under section 404, as discussed in the previous section, to deviate from the clear reflection of income principle and require matching of income inclusion and deduction between the employee and employer. Accordingly, Hoops must include the deferred compensation liability in its amount realized on the 2012 sale and is not entitled to offset or reduce its amount realized by the amount of the deferred compensation liability.

For an introduction to deferred compensation, see parts II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules and II.Q.1.d Nonqualified Deferred Compensation, the latter focusing on using it to complement a stock sale that is not treated as an asset sale.

[5772] Reg. § 1.336-3(d)(3).

[5773] Reg. § 1.336-3(d)(3).

[5774] Note the parenthetical in this quote from Reg. § 1.336-2(b)(1)(iii)(A):

> If old target is an S corporation, S corporation shareholders (whether or not they sell or exchange their stock) take their pro rata share of the deemed disposition tax consequences into account under section 1366 and increase or decrease their basis in target stock under section 1367.

A handy list comparing Code § 338(h)(10) elections and Code § 336(e) elections is found at Harper & Andersen, "Section 336(e)-Another Tool in the Toolbox," *BNA Daily Tax Report* (5/28/2014).[5775]

At the May 2017 American Bar Association Section of Taxation meeting, a discussion of Code §§ 336(e), 338(h)(10), 453(h), and 453B(h), included:[5776]

- Helpful flowcharts showing the transactions deemed to occur in Code § 336(e) or 338(h)(10) elections.
- Potential surprises, how to avoid them using a one-day note for 100% of the transaction, and disadvantages of doing so.[5777]
- State approaches.

One way to avoid the complexity of these elections and disparate state law treatment may be to create a new parent corporation, convey or merge the old corporation into a new single-member, tax-disregarded LLC, and then sell the LLC to the buyers. The first two steps constitute a tax-free Code § 368(a)(1)(F) transaction.[5778] Selling the LLC to the buyers means that the buyer is not concerned with the old corporation's status as an S corporation.[5779] If the LLC becomes a partnership that is then sold, the allocation of purchase price among assets might become more complex; see part II.Q.1.f Code § 1060 Allocation Rule When Selling Business and II.Q.8.b.i.(g) Code § 751 – Hot Assets.

II.Q.8.e.iii.(g). Certain Changes in Inside Basis May Reduce Foreign Tax Credits

A "covered asset acquisition" may disqualify a portion of the foreign tax credit.[5780]

For purposes of this rule, "covered asset acquisition" means:[5781]

(A) a qualified stock purchase (as defined in section 338(d)(3)) to which section 338(a) applies,

(B) any transaction which-

[5775] A copy of which is saved as Thompson Coburn LLP document no. 6344607.
[5776] "Converting Stock Sales to Assets Sales (and Back Again)," slides discussed by Dolan, Harper, and Waters, is saved as Thompson Coburn LLP document no. 6617969.
[5777] If the buyer was willing to pay cash and the seller wanted the one-day note, the buyer's willingness to pay cash does not prevent the seller from using the installment method – only the actual deal counts. Rev. Rul. 73-396. See Reg. § 1.453-11, "Installment obligations received from a liquidating corporation." See also *The Tax Adviser*, "S Corporation Sale of Assets Followed by a Liquidation" (10/1/2008).
[5778] See parts II.E.7.c.i.(b) Use F Reorganization to Form LLC and II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization. If the entity is an S corporations, this tool also involves part II.A.2.g Qualified Subchapter S Subsidiary (QSub).
[5779] For example, the S corporation may have had an ineligible shareholder. See parts II.A.2.f Shareholders Eligible to Hold S Corporation Stock and III.A.3.a.ii How a Trust Can Fall Short of Being Wholly Owned by One Person, the latter explaining how one might think that a trust is a wholly-owned grantor trust but may be incorrect.
[5780] Code § 901(m)(1).
[5781] Code § 901(m)(2).

(i) is treated as an acquisition of assets for purposes of this chapter, and

(ii) is treated as the acquisition of stock of a corporation (or is disregarded) for purposes of the foreign income taxes of the relevant jurisdiction,

(C) any acquisition of an interest in a partnership which has an election in effect under section 754, and

(D) to the extent provided by the Secretary, any other similar transaction.

Prop. Reg. § 1.901(m)-2(b) would add:[5782]

(4) Any transaction (or series of transactions occurring pursuant to a plan) to the extent it is treated as an acquisition of assets for purposes of U.S. income tax and as the acquisition of an interest in a fiscally transparent entity for purposes of a foreign income tax;

(5) Any transaction (or series of transactions occurring pursuant to a plan) to the extent it is treated as a partnership distribution of one or more assets the U.S. basis of which is determined by section 732(b) or 732(d) or which causes the U.S. basis of the partnership's remaining assets to be adjusted under section 734(b), provided the transaction results in an increase in the U.S. basis of one or more of the assets distributed by the partnership or retained by the partnership without a corresponding increase in the foreign basis of such assets; and

(6) Any transaction (or series of transactions occurring pursuant to a plan) to the extent it is treated as an acquisition of assets for purposes of both U.S. income tax and a foreign income tax, provided the transaction results in an increase in the U.S. basis without a corresponding increase in the foreign basis of one or more assets.

Generally, international structures and most of subchapter C are beyond the scope of this paper. This part II.Q.8.e.iii.(g) Certain Changes in Inside Basis May Reduce Foreign Tax Credits is merely one consideration when an international structure is affected by the tools described in parts II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property, II.Q.8.e.iii.(b) Transfer of Partnership Interests: Effect on Partnership's Assets (Code § 754 Election or Required Adjustment for Built-in Loss) and II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10),

---

[5782] These supplement Reg. § 1.901(m)-2T(b) (which is not repeated in the text because it does not seem to add to the statute):

Covered asset acquisitions. Except as provided in paragraph (d) of this section, the transactions set forth in this paragraph (b) are CAAs.

(1) A qualified stock purchase (as defined in section 338(d)(3)) to which section 338(a) applies (section 338 CAA);

(2) Any transaction that is treated as an acquisition of assets for U.S. income tax purposes and as an acquisition of stock of a corporation (or the transaction is disregarded) for foreign income tax purposes;

(3) Any acquisition of an interest in a partnership that has an election in effect under section 754 (section 743(b) CAA);

(4)-(6) [Reserved].

and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

II.Q.8.e.iv. Transfer of Partnership Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform)

Caution – This part II.Q.8.e.iv was repealed by 2017 tax reform.

If a sale or exchange of 50% or more of the total interest in partnership capital ***and***[5783] profits occurs (in the aggregate) within a 12-month period, the partnership is deemed to have terminated.[5784] However, a disposition of a partnership interest by gift (including assignment to a successor in interest), bequest, or inheritance, the liquidation of a partnership interest, and the contribution of property to a partnership do not constitute such a sale or exchange is not a sale or exchange for purposes of this test.[5785]

If a partnership is terminated by a sale or exchange of an interest, the partnership is deemed to contribute all of its assets and liabilities to a new partnership in exchange for an interest in the new partnership; and, immediately thereafter, the terminated partnership is deemed to distribute interests in the new partnership to the purchasing partner and the other remaining partners in proportion to their respective interests in the terminated partnership in liquidation of the terminated partnership, either for the continuation of the business by the new partnership or for its dissolution and winding up:[5786]

- Subject to the points made below in this part II.Q.8.e.iv, see parts II.Q.8.b.i Distribution of Property by a Partnership and II.M.3 Buying into or Forming a Partnership for the deemed distribution from the old partnership and contribution to the new partnership, respectively (which tend to be tax-free transactions).

- Book values and capital accounts from the old partnership carry over to the new partnership.[5787] Therefore, no Code § 704(c) accounting for newly contributed property applies; instead, the terminating entity's Code § 704(c) accounting carries over.[5788]

- These deemed transactions do not trigger Code § 704(c)(1)(B)[5789] or Code § 737[5790] taxation on the distribution of property within seven years after contribution, which makes sense given the continuation of Code § 704(c) accountability.

- The partner who acquired the partnership interest in the sale or exchange that triggered the deemed termination would obtain a basis adjustment in the partnership's assets that this partner is deemed to acquire if a Code § 754 election is in place.[5791] A partner with a Code § 743 basis adjustment in the partnership's property will continue to have the same

---

5783 For example, the sale of a 30% interest in partnership capital and a 60% interest in partnership profits is not the sale or exchange of 50% or more of the total interest in partnership capital and profits. Reg. § 1.708-1(b)(2).
5784 Code § 708(b)(1)(B).
5785 Reg. § 1.708-1(b)(2).
5786 Reg. § 1.708-1(b)(4).
5787 Reg. § 1.704-1(b)(2)(iv)(l).
5788 Reg. § 1.704-3(a)(3)(i). See part (iii) of the example in Reg. § 1.708-1(b)(4).
5789 Reg. § 1.704-4(c)(3).
5790 Reg. § 1.737-2(a).
5791 Reg. § 1.708-1(b)(5).

basis adjustment with respect to property deemed contributed by the terminated partnership to the new partnership,[5792] regardless of whether the new partnership makes a Code § 754 election.[5793] See part II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest, which describes inside basis adjustments.[5794]

- Any start-up expenditures being amortized under Code § 195(b) or organizational expenses being amortized under Code § 709(b)(1) continue to use the same schedule.[5795] However, depreciation of tangible property starts over,[5796] as does the method for accounting for book-

[5794] See part II.Q.8.e.iii.(a) Illustration of Inside Basis Issue.
[5795] Reg. § 1.708-1(b)(6). See also Reg. §§ 1.197-2(g)(2) and 1.197-2(k), Example (16), the latter providing:

(i) A and B are partners with equal shares in the capital and profits of general partnership P. P's only asset is an amortizable section 197 intangible, which P had acquired on January 1, 1995. On January 1, 2000, the asset had a fair market value of $100 and a basis to P of $50. On that date, A sells his entire partnership interest in P to C, who is unrelated to A, for $50. At the time of the sale, the basis of each of A and B in their respective partnership interests is $25.

(ii) The sale causes a termination of P under section 708(b)(1)(B). Under section 708, the transaction is treated as if P transfers its sole asset to a new partnership in exchange for the assumption of its liabilities and the receipt of all of the interests in the new partnership. Immediately thereafter, P is treated as if it is liquidated, with B and C each receiving their proportionate share of the interests in the new partnership. The contribution by P of its asset to the new partnership is governed by section 721, and the liquidating distributions by P of the interests in the new partnership are governed by section 731. C does not realize a basis adjustment under section 743 with respect to the amortizable section 197 intangible unless P had a section 754 election in effect for its taxable year in which the transfer of the partnership interest to C occurred or the taxable year in which the deemed liquidation of P occurred.

(iii) Under section 197, if P had a section 754 election in effect, C is treated as if the new partnership had acquired two assets from P immediately preceding its termination. Even though the adjusted basis of the new partnership in the two assets is determined solely under section 723, because the transfer of assets is a transaction described in section 721, the application of sections 743(b) and 754 to P immediately before its termination causes P to be treated as if it held two assets for purposes of section 197. See paragraph (g)(3) of this section. B's and C's proportionate share of the new partnership's adjusted basis is $25 each in one asset, which continues to be amortized over the 10 years remaining in the original 15-year amortization period. For the other asset, C's proportionate share of the new partnership's adjusted basis is $25 (the amount of the basis increase resulting from the application of section 743 to the sale or exchange by A of the interest in P), which is amortized over a new 15-year period beginning in January 2000.

(iv) If P did not have a section 754 election in effect for its taxable year in which the sale of the partnership interest by A to C occurred or the taxable year in which the deemed liquidation of P occurred, the adjusted basis of the new partnership in the amortizable section 197 intangible is determined solely under section 723, because the transfer is a transaction described in section 721, and P does not have a basis increase in the intangible. Under section 197(f)(2) and paragraph (g)(2)(ii) of this section, the new partnership continues to amortize the intangible over the 10 years remaining in the original 15-year amortization period. No additional amortization is allowable with respect to this asset.

[5796] In proposing regulations that T.D. 8717 (5/8/1997) finalized, [PS-5-96], Termination of a Partnership under Section 708(b)(1)(B), stated:

tax differences when depreciating assets.[5797] The terminating partnership cannot depreciate any assets it places in service during the termination year;[5798] rather the new partnership depreciates them, including receiving bonus depreciation[5799] for any assets placed in service during the termination year.[5800]

- For purposes of certain procedures regarding changing accounting methods, a technical termination constitutes cessation of a trade or business.[5801]

- The new partnership retains the old partnership's tax ID.[5802] Each of the old and new partnership files a short period return, with the new partnership filing a return for its taxable year beginning after the date of termination of the terminated partnership.[5803]

Contrast this with a corporation (whether or not an S election is in place). It is not deemed to terminate when its shareholders change, although a change in shareholders could impair the use of net operating losses, etc.[5804]

> In addition, the proposed regulations will not change the effect of a termination on the depreciation of partnership property by the new partnership. Property deemed contributed to the new partnership will continue to be subject to the anti-churning provisions of section 168(f)(5), which generally require the new partnership to depreciate the property as if it were newly-acquired property under the same depreciation system used by the terminated partnership. This result is required by statute and is not affected by the specific mechanics of a termination under section 708(b)(1)(B). See Code sections 168(f)(5); 168(i)(7); 168(e)(4) and (f)(10)(repealed 1986).

Code § 168(i)(7) provides that the transferee steps into the shoes of the transferor when depreciating an asset to which Code § 332, 351, 361, 721, or 731 applies. However, Code § 168(i)(7)(B) provides that this rule does not apply in the case of a partnership's termination under Code § 708(b)(1)(B). By negative implication, such a termination restarts the depreciation period. See McKee, Nelson & Whitmire, ¶ 13.05[2][k] Effect on Depreciation of Partnership Property, *Federal Taxation of Partnerships & Partners* (WG&L).

[5797] Reg. § 1.704-3(a)(2).

[5798] Reg. § 1.168(d)-1(b)(3)(ii) includes:

> No depreciation deduction is allowed for property placed in service and disposed of during the same taxable year.

[5799] See part II.G.5.b Bonus Depreciation.

[5800] Reg. § 1.168(k)-1(b)(5)(iii).

[5801] See Section 3.04(2)(f) of Rev. Proc. 2015-13, the other provisions of which Rev. Proc. 2015-33 clarified. Lovett, "Technical Termination of LLCs and Partnerships: Overview, Mechanics and Opportunities," *TM Real Estate Journal* (BNA) (2/1/2017), suggests that the termination's closing the tax year will require that two separate installments of a prior Code § 481(a) adjustment be taken into account in one calendar year.

[5802] Reg. § 301.6109-1(d)(2)(iii); see also the Example in Reg. § 1.708-1(b)(4).

[5803] Notice 2001-5.

[5804] Code § 382.

II.Q.8.e.v. Partnership Mergers

For partnership mergers, see Notice 2005-15,[5805] Notice 2009-70[5806] and any related proposed regulations.[5807] For an overview of mergers, with helpful charts and diagrams, see Borden,

---

[5805] Notice 2005-15 announced the principles of proposed regulations, which Notice 2009-70, § 2 described:

> On August 22, 2007, the IRS and the Treasury Department published in the Federal Register (2007-41 I.R.B. 790 [72 FR 46932]) a notice of proposed rulemaking (REG-143397-05) (the Proposed Merger Regulations), consistent with Notice 2005-15 (2005-1 C.B. 527), providing that (1) section 704(c)(1)(B) applies to newly created section 704(c) gain or loss in property contributed by the transferor partnership to the continuing partnership in an assets-over merger, but does not apply to newly created reverse section 704(c) gain or loss resulting from a revaluation of property in the continuing partnership, and (2) for purposes of section 737(b), net precontribution gain includes newly created section 704(c) gain or loss in property contributed by the transferor partnership to the continuing partnership in an assets-over merger, but does not include newly created reverse section 704(c) gain or loss resulting from a revaluation of property in the continuing partnership. On November 6, 2007, corrections to the proposed regulations were published in the Federal Register (72 FR 62608).
>
> The proposed regulations include several examples. Example (3) of the proposed regulations (see Treas. Proposed Reg. § 1.704-4(c)(4)(ii)(F), Example (3)) involves a situation where built-in gain property contributed to the transferor partnership has both a revaluation loss in the transferor partnership and additional gain upon merger with the transferee partnership. The example concludes that the section 704(c) layers are collapsed in the merger and that upon contribution to the transferee partnership the property had only built-in gain and no built-in loss.

After describing Example (3), Notice 2009-70 states:

> A number of rules in existing regulations may be relevant to mergers, divisions and tiered partnerships. In particular Treas. Reg. § 1.704-3(a)(7)-(9) may apply.

[5806] Notice 2009-70, § 3, "Discussion," provides:

> While no requests for a hearing were received in response to the proposed regulations issued on August 22, 2007, the IRS and the Treasury Department did receive comments relating to the proposed regulations and took notice of a number of articles published in response to the proposed regulations.
>
> Most of the comments and articles address Example (3) which provides that property either has a built-in gain or built-in loss upon merger, not both, and that original section 704(c) gain is reduced by subsequent revaluation losses. Several comments discussed not only the specifics of Example (3), but also the broader implications of the example. In particular, the commentators questioned whether the example implies that a subsequent revaluation loss would reduce prior section 704(c) gains rather than create a new section 704(c) loss layer where there has been no partnership merger. Another comment suggested that the section 704(c) allocations in the example could be different if, for example, the transferor partnership used the remedial method instead of the traditional method. Other commentators expressed concerns that the application of the proposed regulations would result in tax allocations after the merger that are not consistent with the economic arrangement of the partners of the transferor partnership. For example, if layers of reverse section 704(c) built-in gain or built-in loss are collapsed in the merger, then a partner who prior to the merger was allocated a net loss for book purposes with respect to the property would not recognize a corresponding tax loss until liquidation of its interest. They contend that if the transferor partnership had continued in existence instead of liquidating, the section 704(c) layers would have been preserved under the tiered partnership rules of Treas. Reg. § 1.704-3(a)(9). Some practitioners believe the results should be the same in a merger.
>
> The IRS and the Treasury Department have also become aware that there are conflicting views among practitioners about how section 704(c) layers should be maintained with respect to tiered partnerships. One view is that an aggregate approach should apply or be permitted such that a tiered partnership arrangement can be "looked through" and section 704(c) applied as if the

"Navigating State Law and Tax Issues Raised by Partnership and LLC Reorganizations," *Business Entities* (Jul./Aug. 2014), suggesting using an "assets-over" form to preserve basis or holding period and an "assets-up" type to change basis or holding period.[5808] For example, TAM 201929019[5809] asserted that a deemed distribution of a partnership interest in an assets-over merger (described below) is treated as an exchange that triggered an automatic basis step-down (or would have triggered a basis step-up if a Code § 754 election had been place and the assets had increased in value) under part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000. Hamill, "Tax Reporting Issues Following a Merger of Partnerships," *Journal of Taxation* (6/2023),[5810] discussed:

> This article will address the tax filing requirements and reporting issues for the terminated and continuing partnerships. This will include basic information such as due dates for tax returns, use of tax identification numbers, identification and survival of tax attributes, any information required to be attached to the returns, reporting of shares of liabilities in the continuing partnership and the effects of any shifts in such shares, determinations of MACRS deductions in the terminated and continuing partnerships, and the holding periods of partnership properties and partnership interests. The intent is to assist the tax return preparers of the combining partnerships with both basic and advanced reporting issues. Exhibits are provided to identify the continuing partnership,

---

> partners of the upper-tier partnership directly own a portion of the assets of the lower-tier partnership (the Aggregate Approach). Another view is the entity approach under which the upper-tier partnership is treated as owning an interest in the lower-tier partnership but is not treated as owning any interest in the section 704(c) property of the lower-tier partnership (the Entity Approach). Each approach raises different issues and has unique consequences.
> After extensive consideration of the concerns raised, the IRS and the Treasury Department believe that comments would be helpful to the development of guidance concerning section 704(c) layers in tiered partnerships and in mergers and divisions. The IRS and Treasury Department believe that it is appropriate to consider the issues regarding section 704(c) layers in general before finalizing the Proposed Merger Regulations.

Notice 2009-70 requested comments on a number of issues, without requesting comments on the principles described in Notice 2005-15.

[5807] See also CCA 201315026. RIA Checkpoint *Catalyst*, ¶ 218:111 Merger or Consolidation of Partnerships, described a ruling:

> In IRS Letter Ruling 201619001, a real estate investment trust (REIT) formed a partnership (OP), then transferred cash and its own stock to the partnership in exchange for a partnership interest. A second partnership (M) then transferred all of its assets to OP in exchange for OP partnership interests and the REIT stock. M then liquidated, distributing the REIT stock to some of its partners and the OP partnership interests to the remaining partners. The IRS ruled that the transaction was a merger of OP and M under Reg. § 1.708-1(c). IRS Letter Ruling 201619001.
>
> > Comment: In IRS Letter Ruling 201619001, M was formed immediately before the merger as the result of the division of a third partnership (X) into two separate partnerships. The IRS respected the form of the transaction as a division followed by a merger. The apparent purpose of this form was to permit the partners of X receiving REIT stock (who were also partners of M after the division) as having sold their partnership interests in M to OP under Reg. § 1.708-1(c)(4) (see ¶ 218:114) For further discussion, see Substance Over Form Exception in ¶ 218:113.

[5808] For a description of the two types of transactions, see part II.Q.8 Exiting From or Dividing a Partnership, especially part II.Q.8.d.iii Assets-Over vs. Assets-Up Division.

[5809] See fn 5623 of part II.Q.8.e.i Distribution of Partnership Interests.

[5810] Saved as Thompson Coburn LLP doc. no. 30167834.

distinguish the two forms of combinations, and identify the statutory provisions supporting the tax consequences of a merger or consolidation.

More detailed issues that may confound reporting will also be discussed. These include: (1) The treatment of old and new layers of Section 704(c) gain or loss, including partner-level reporting for items M and N on a partner's schedule K-1; (2) The treatment of the 7-year rule for recognition of Section 704(c) gains as a result of a distribution that triggers either Section 704(c)(1)(B) or Section 737; (3) The recording of tax basis and Section 704(b) "book" basis capital accounts for the continuing partnership; (4) The ability of the continuing partnership to complete a Section 1031 exchange started by any of the partnerships involved in the merger or consolidation; (5) The effect of the merger or consolidation on an partnership election to defer gain by investing in a qualified opportunity fund or a merger of partnerships with interests qualifying as qualified opportunity zone property; (6) Tax allocations in the continuing partnership in the year of merger based on the varying interests rule; (7) The effect of the merger or consolidation on prior Section 465 aggregation or Section 469 grouping decisions of the combining partnerships; (8) The effect of the merger or consolidation on the ability of the continuing partnership to change or to make new aggregation decisions for purposes of Section 199A ; and, (9) The applicability of the Section 743(d) mandatory basis adjustment rule.

Below are some details of partnership mergers.

If two or more partnerships merge or consolidate into one partnership, the resulting partnership is considered a continuation of the merging or consolidating partnership the members of which own an interest of more than 50% in the capital and profits of the resulting partnership.[5811] Generally, if this resulting partnership can be considered a continuation of more than one of the merging or consolidating partnerships, it is considered the continuation solely of that partnership which is credited with the contribution of assets having the greatest fair market value (net of liabilities) to the resulting partnership, and any other merging or consolidating partnerships shall be considered as terminated.[5812] However, if the members of none of the merging or consolidating partnerships have an interest of more than 50% in the capital and profits of the resulting partnership, all of the merged or consolidated partnerships are terminated, and a new partnership results.[5813]

The taxable years of any merging or consolidating partnerships which are considered terminated shall be closed in under Code § 706(c) the regulations thereunder, and those partnerships shall file their returns for a taxable year ending upon the date of merger or consolidation.[5814] Any resulting partnership shall file a return for the taxable year of the merging or consolidating partnership that is considered as continuing.[5815]

A merger is an "assets-over" merger unless it as an "assets-up" merger.[5816] In an "assets-up" merger, the merged or consolidated partnership that is considered terminated as described above distributes all of its assets to its partners (in a manner that causes the partners to be

[5811] Code § 708(b)(2)(A); Reg. § 1.708-1(c)(1).
[5812] Reg. § 1.708-1(c)(1).
[5813] Reg. § 1.708-1(c)(1).
[5814] Reg. § 1.708-1(c)(2).
[5815] Reg. § 1.708-1(c)(2), which also provides that the resulting partnership shall keep its original taxpayer identification number and include certain tax disclosures.
[5816] Reg. § 1.708-1(c)(3)(i).

treated, under the laws of the applicable jurisdiction, as the owners of such assets) in liquidation of the partners' interests in the terminated partnership, and immediately thereafter, the partners in the terminated partnership contribute the distributed assets to the resulting partnership in exchange for interests in the resulting partnership.[5817] The form of such a partnership merger or consolidation will be respected for federal income tax purposes despite the partners' transitory ownership of the terminated partnership's assets.[5818]

When two or more partnerships merge or consolidate into one partnership under the applicable jurisdictional law, without undertaking a form for the merger or consolidation, or undertake a form for the merger or consolidation that is not an assets-up merger, any merged or consolidated partnership that is considered terminated is treated as undertaking the assets-over form for Federal income tax purposes.[5819] Under the assets-over form, the merged or consolidated partnership that is considered terminated contributes (or is treated as contributing) all of its assets and liabilities to the resulting partnership in exchange for an interest in the resulting partnership, and immediately thereafter, the terminated partnership distributes interests in the resulting partnership to its partners in liquidation of the terminated partnership.[5820] For whether an assets-over merger constitutes a Code § 761(e) transfer, see TAM 201929019, described in the text following fn 5623 in part II.Q.8.e.i Distribution of Partnership Interests.

Code §§ 704(c)(1)(B) and 737 and Reg. §§ 1.704-4 and 1.737-2 do not apply to a transfer by a partnership (transferor partnership) of all of its assets and liabilities to a second partnership (transferee partnership) in an exchange described in Code § 721, followed by a distribution of the interest in the transferee partnership in liquidation of the transferor partnership as part of the same plan or arrangement.[5821] A later distribution of Code § 704(c) property by the transferee partnership to a partner of the transferee partnership is subject to Code § 704(c)(1)(B) to the same extent that a distribution by the transferor partnership would have been subject to Code § 704(c)(1)(B).[5822] Similarly, a later distribution of property by the transferee partnership to a partner of the transferee partnership that was formerly a partner of the transferor partnership is subject to Code § 737 to the same extent that a distribution from the transferor partnership would have been subject to Code § 737.[5823]

In an assets-over merger, a sale of all or part of a partner's interest in the terminated partnership to the resulting partnership that occurs as part of a merger or consolidation will be respected as a sale of a partnership interest if the merger agreement (or another document) specifies that the resulting partnership is purchasing interests from a particular partner in the merging or consolidating partnership and the consideration that is transferred for each interest sold, and if the selling partner in the terminated partnership, either before or at the same time as the transaction, consents to treat the transaction as a sale of the partnership interest.[5824]

[5817] Reg. § 1.708-1(c)(3)(ii).
[5818] Reg. § 1.708-1(c)(3)(ii).
[5819] Reg. § 1.708-1(c)(3)(i).
[5820] Reg. § 1.708-1(c)(3)(i).
[5821] Reg. §§ 1.704-4(c)(4), 1.737-2(b)(1).
[5822] Reg. § 1.704-4(c)(4).
[5823] Reg. § 1.737-2(b)(3).
[5824] Reg. § 1.708-1(c)(4), referring to Code § 741 and Reg. § 1.741-1 for determining the selling partner's gain or loss on the sale or exchange of the partnership interest; see part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest. Letter Ruling 201619001 (described in fn. 5807) respected a sale under

When merging, consider whether any relief of debt or other actual or deemed distributions within two years might constitute a disguised sale. See part II.M.3.e Exception: Disguised Sale. However, some divisions might be taxable to the extent that they rely on Code § 721(a) nonrecognition.[5825]

The IRS expects to issue regulations, effective for distributions from partnerships made after January 19, 2005, providing the following regarding Code § 704(c) gain and reverse-Code § 704(c) gain:[5826]

> The regulations will apply the principles of Rev. Rul. 2004-43 to distributions of property following assets-over partnership mergers. The regulations will apply to distributions of property with newly created § 704(c) gain or loss whether or not that gain or loss is treated as reverse § 704(c) gain or loss as the result of a revaluation by the transferor partnership. The regulations also will apply to distributions of property with original § 704(c) gain or loss that existed upon contribution to the transferor partnership. However, the regulations will provide that if the transferor partnership in an assets-over merger holds contributed property with original § 704(c) gain or loss, the seven year periods in §§ 704(c)(1)(B) and 737 do not restart with respect to that gain or loss as a result of the merger.
>
> The regulations will provide that § 704(c)(1)(B) does not apply to newly created § 704(c) gain or loss in property contributed by the transferor partnership to the continuing partnership in an assets-over partnership merger involving partnerships owned by the same owners in the same proportions. In addition, the regulations will provide that for purposes of § 737, net precontribution gain does not include newly created § 704(c) gain or loss in property contributed by the transferor partnership to the continuing partnership in an assets-over partnership merger involving partnerships owned by the same owners in the same proportions. In order for merging partnerships to qualify for the exceptions described in this paragraph, each partner's percentage interest in the transferor partnership's capital, profits, losses, distributions, liabilities, and all other items must be the same as the partner's percentage interest in those items of the continuing partnership.

The survivor of merged partnerships may want to see whether it qualifies for special Code § 704(c) accounting for securities partnerships.[5827]

Reg. § 1.708-1(c)(4), when the contribution agreement relating to a merger will specify (i) that the partnership is purchasing its interest in another partnership from each particular partner in the purchasing partnership and (ii) the consideration that is transferred for each interest purchased.

[5825] If a foreign person is directly or indirectly involved, see the discussion of when Code § 721(a) does not apply to any deemed contribution to a partnership in part II.M.3.g Exception: Foreign Partner (among various other exceptions to Code § 721(a).

[5826] Notice 2005-15. Query whether the regulations would be retroactive, given all of the time that has passed. For a description of reverse-Code § 704(c) allocations, see part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value, especially fns. 5444-5447.

[5827] See fn. 3878 (especially Letter Ruling 201710008), found in part II.P.1.a.i Allocations of Income in Partnerships.

A book-up resulting from a revaluation (which results from a merger or consolidation) may shift nonrecourse liabilities,[5828] which can generate income tax.[5829] When two or more partnerships merge or consolidate in an assets-over merger, increases and decreases in partnership liabilities associated with the merger or consolidation are netted by the partners in the terminating partnership and the resulting partnership to determine the effect of the merger under the Code § 752 rules allocating liabilities to partners and determining whether a change in liabilities constitutes a distribution or contribution.[5830] For more information, see part II.C.3 Allocating Liabilities (Including Debt).

If any merger described above is part of a larger series of transactions and the substance of the larger series of transactions is inconsistent with following the form prescribed above, the IRS may disregard the form and recast the larger series of transactions according to their substance.[5831]

Langdon and Byrd, "Missing Partnership Merger Definition Raises Questions," *The Tax Advisor* (7/2016), discussed "determining the federal income tax consequences when a taxpayer collapses two partnerships - one an upper-tier partnership, or UTP, and the other a lower-tier partnership, or LTP - into a single entity." The article says:

> The lack of a merger definition means that the tax characterization can vary dramatically depending on how the transaction is viewed. To illustrate possible different treatments, consider this scenario.
>
> **Example**: X, Y, and a UTP own 10%, 10%, and 80% interests, respectively, in an LTP. Neither X nor Y holds an interest in the UTP. The parties agree to consolidate the two entities by having X and Y contribute their LTP interests to the UTP in exchange for interests in the UTP. For state law purposes, both legal entities still exist after the transaction, although for federal income tax purposes only one partnership remains. The remaining partnership is owned 10% by X, 10% by Y, and 80% by the UTP's former partners.

[5828] See text preceding and accompanying fn 398 in part II.C.3.c Allocations of Recourse and Nonrecourse Liabilities.

[5829] See part II.C.3.a Basic Consequences of Changes in Liability Allocations.

[5830] Reg. § 1.752-1(f).

[5831] Reg. § 1.708-1(c)(6)(i), providing the following example in Reg. § 1.708-1(c)(6)(ii):

> A, B, and C are equal partners in partnership ABC. ABC holds no section 704(c) property. D and E are equal partners in partnership DE. B and C want to exchange their interests in ABC for all of the interests in DE. However, rather than exchanging partnership interests, DE merges with ABC by undertaking the assets-up form described in paragraph (c)(3)(ii) of this section, with D and E receiving title to the DE assets and then contributing the assets to ABC in exchange for interests in ABC. As part of a prearranged transaction, the assets acquired from DE are contributed to a new partnership, and the interests in the new partnership are distributed to B and C in complete liquidation of their interests in ABC. The merger and division in this example represent a series of transactions that in substance are an exchange of interests in ABC for interests in DE. Even though paragraph (c)(3)(ii) of this section provides that the form of a merger will be respected for Federal income tax purposes if the steps prescribed under the assets-up form are followed, and paragraph (d)(3)(i) of this section provides a form that will be followed for Federal income tax purposes in the case of partnership divisions, these forms will not be respected for Federal income tax purposes under these facts, and the transactions will be recast in accordance with their substance as a taxable exchange of interests in ABC for interests in DE.

Because of the lack of guidance on partnership mergers, there appear to be at least three potential characterizations of this transaction for federal income tax purposes.

Alternative 1: LTP Merges Into UTP

It is generally thought a merger exists in any case in which (1) at least two tax partnerships exist immediately before a transaction, (2) immediately after the transaction only one tax partnership exists, and (3) the equity holders of each of the preexisting tax partnerships become equity holders in the single remaining tax partnership as part of the transaction. From this perspective, the transaction could be viewed as a merger because two partnerships existed at the beginning of the day and only one partnership remains at the end.

Sec. 708(b)(2)(A) provides:

> In the case of a merger or consolidation of two or more partnerships, the resulting partnership shall, for purposes of this section, be considered the continuation of any merging or consolidating partnership whose members own an interest of more than 50 percent in the capital and profits of the resulting partnership [(the ownership test)].

Here, determining which of the LTP or the UTP should be considered the continuing partnership depends on whether an aggregate or entity approach to partnerships is taken.

Under an entity approach, of the historic partners of the LTP (X, Y, and the UTP), only X and Y hold interests in the resulting partnership (20%). The historic partners of the UTP hold the remaining 80% interest in the resulting partnership. Accordingly, the resulting partnership would appear to be considered a continuation of the UTP. This result depends on treating the UTP as an entity for purposes of applying the ownership test.

If the UTP were treated as an aggregate, then arguably both partnerships would be treated as continuations, but under Regs. Sec. 1.708-1(c)(1), the resulting partnership would be treated as a continuation of the LTP because the net value of the LTP's assets exceeded the net value of the UTP's assets. The aggregate approach appears to be inconsistent with the entity-level focus of Sec. 708, but if it were applied, the application of the merger rules would be largely consistent with the liquidation of the UTP and continuation of the LTP characterization discussed below. Under Regs. Sec. 1.708-1(c)(3)(i), the form of a merger then would be characterized as the LTP contributing all its assets and liabilities to the UTP for a "hook" interest, with the LTP then making a liquidating distribution of the new UTP interests to its partners (UTP, X, and Y).

The merger characterization may not be an exact fit for this transaction because a common expectation of a merger is that the resulting entity will go forward with a combination of assets and operations obtained from the merged entities. In this transaction, there has been no combination of assets and operations. The historic holding company activity of the UTP has disappeared, and the historic operating activity of the LTP has survived without any change other than the identity of the majority of its direct owners. Furthermore, application of the ownership test appears inconsistent with the realities of the transaction because the UTP would be viewed as the continuing partnership despite contributing no real assets in the transaction, while the LTP is deemed to terminate despite being the source of all the assets.

Alternative 2: UTP Liquidates and LTP Continues

If the results of the merger characterization do not quite fit the economic realities of the transaction, Sec. 708 suggests an alternative characterization. Sec. 708(a) provides that an existing partnership shall be considered as continuing if it is not terminated, and Sec. 708(b)(1)(A) provides that a partnership will be considered terminated if no part of its business, financial operation, or venture is carried on by any of its partners in a partnership form. Under this rule, the LTP would be treated as continuing because the LTP's historic business would still be operated in partnership form, while the UTP would be treated as terminating because its historic business—holding an investment in the LTP—would no longer exist.

If the LTP is considered to continue, then the substance of the transaction appears to be a liquidation of the UTP. Under a liquidation scenario, the UTP is deemed to make liquidating distributions of the LTP interests to its partners, and, pursuant to Sec. 732(b), the partners would take a substituted basis in the LTP interest received.

The UTP's liquidation view gives effect to the requirements of Secs. 708(a) and 708(b)(1)(A) and avoids creating a new layer of Sec. 704(c) gain, but it seems out of line with the form of the transaction. The partners that actually engage in a transaction (X and Y) are treated as doing nothing, while the partners of the UTP (which do not engage in a state law transaction) are treated as exchanging their interests in the UTP for interests in the LTP.

Alternative 3: X and Y Contribute LTP Interests in a Sec. 721 Transaction

As a third alternative, it may be appropriate to give effect to the form of the transaction (a Sec. 721 contribution of interests in the LTP by X and Y to the UTP). Following the contribution, the UTP would hold all the partnership interests in the LTP, and the LTP would terminate under Sec. 708(b)(1)(A).

This perspective is similar to what is described in Rev. Rul. 99-6, Situation 1, in which Partner B purchases, in a taxable transaction, the partnership interests held by Partner A. Under the ruling, Partner A is treated as selling its interest to Partner B, but Partner B must treat the transaction as if (1) the partnership made a liquidating distribution of a proportionate interest in the partnership assets to Partner A; (2) Partner A sold its proportionate interest in assets to Partner B; and (3) Partner B received a liquidating distribution of its proportionate interest in assets from the partnership.

As with the merger characterization, this viewpoint appears to create a layer of Sec. 704(c) gain for X and Y. In addition, it is not clear that Rev. Rul. 99-6 was intended to apply to a nonrecognition transaction. If it was intended to apply to this transaction, it is not clear that the Sec. 721 contribution viewpoint can be reconciled with the terms of Sec. 708(b)(1)(A). If the model of Rev. Rul. 99-6 is followed, the LTP would terminate under Sec. 708(b)(1)(A), but this characterization is inconsistent with the terms of the statute because X and Y continue to be partners with regard to the historic operations of LTP. Under existing case law (*Byrum*, 440 F.2d 949 (6th Cir. 1971), *aff'd*, 408 U.S. 125 (1972)), a revenue ruling may be disregarded if it conflicts with the statute it purports to interpret.

Conclusion

None of these three characterizations appears to meet all of the existing guidance and policies of the transaction. The absence of a definition of "merger" for purposes of Sec. 708 makes it difficult for taxpayers to know how to appropriately apply the U.S. federal income tax rules when faced with choosing among at least these three possible characterizations and possibly more when a holding partnership structure is collapsed.

II.Q.8.e.vi. Required Documentation to Avoid Withholding on Sale or Redemption of Partnership Interest

Generally, if any portion of the gain (if any) on any disposition of an interest in a partnership would be treated under Code § 864(c)(8) as effectively connected with the conduct of a trade or business within the United States, the transferee shall be required to deduct and withhold a tax equal to 10% of the amount realized on the disposition.[5832]

However, this requirement does not apply if the transferor furnishes to the transferee an affidavit by the transferor stating, under penalty of perjury, the transferor's United States taxpayer identification number and that the transferor is not a foreign person.[5833]

A sample affidavit is in Thompson Coburn LLP doc. no. 6729373.

Also see Notice 2018-29, "Guidance Regarding the Implementation of New Section 1446(f) for Partnership Interests That Are Not Publicly Traded."

II.Q.9. Trust Selling a Business

See parts:

- II.J.16 Fiduciary Income Taxation When Selling Interest in a Pass-Through Entity or When the Entity Sells Its Assets,
- II.J.15 QSST Issues That Affect the Trust's Treatment Beyond Ordinary K-1 Items, and
- II.J.17 Planning for Grantor and Nongrantor Trusts Holding Stock in S Corporations in Light of the 3.8% Tax.

[5832] Code § 1446(f)(1).

[5833] Code § 1446(f)(2)(A). Subparagraphs (B) and (C) provide:

(B) *False affidavit*. Subparagraph (A) shall not apply to any disposition if -

(i) the transferee has actual knowledge that the affidavit is false, or the transferee receives a notice (as described in section 1445(d)) from a transferor's agent or transferee's agent that such affidavit or statement is false, or

(ii) the Secretary by regulations requires the transferee to furnish a copy of such affidavit or statement to the Secretary and the transferee fails to furnish a copy of such affidavit or statement to the Secretary at such time and in such manner as required by such regulations.

(C) *Rules for agents*. The rules of section 1445(d) shall apply to a transferor's agent or transferee's agent with respect to any affidavit described in subparagraph (A) in the same manner as such rules apply with respect to the disposition of a United States real property interest under such section.

II.R. Choice of Entity Hypothetical

Alice, Ben and Connie want to form a business manufacturing and selling widgets. They have been friends for many years. Even though they consider themselves family, technically they are not related to each other.

Alice is a natural at sales. She has many contacts and could sell any product that she believes is beneficial to the customer. Alice is terrific at selling not only to potential customers but also potential investors.

Ben is great at putting together and running organizations. He always knows what is going on in the business, tracking current progress, making short-term and long-term financial projections, and keeping everyone focused on the company's goals. Ben is talented at securing financing and making investors feel comfortable that they are receiving accurate information.

Connie is a creative genius. She has scientific knowledge, engineering skills, and a keen mind for how to make machines and manufacturing and packaging processes work. Connie will enable the company to be a low-cost producer for generic products and to efficiently tailor manufacturing processes to fit special customer needs.

Initial Formation - Year 1

Connie came up with a revolutionary widget that every household should have, and Alice has informally discussed with various retailers how they might help market the product. Ben has arranged a $1,000,000 bank loan, but the bank is going to make Alice, Ben and Connie personally guarantee loan repayment. Alice, Ben and Connie have agreed to take no compensation the first year, $50,000 each the second year, and then see where the business is headed. The business requires a $500,000 machine, as well as five employees to run it, initially under Connie's supervision. The business leases its space.

How should they set up their deal in Year 1?

Types of entities: sole proprietorships, partnerships, C corporations and S corporations. Business ownership and management structure. Tax on formation. Allocating gain when entity later sells contributed property. Ability to deduct losses: basis and at-risk limitations; net operating losses at entity vs. shareholder level; Code § 1244 stock. Allocating gain and loss from ongoing operations; tax distribution clauses. Self-employment/FICA tax: partnership vs. limited partnership vs. S corporation vs. C corporation.

Outside Investors - Year 2

Due to additional capital needs to take the business to the next level, Alice has been working on securing two investors who would put up capital of $250,000 each. They seek an annual preferred return of 20%, as well as one-fifth each of the business' residual value.

How should they bring in the investors? What governance/approval mechanisms would the investors want to protect themselves?

Tax on later contribution to entity. Allocation of income from operations, including preferred returns and, if taxed as a partnership, disguised sale issues. Restrictions on shareholders (S corporations).

Buying Out Outside Investors - Year 5

In Year 5, the business is earning $600,000 per year net profit, after paying $100,000 annual compensation to each of Alice, Ben and Connie. Alice, Ben and Connie are not getting along with the outside investors and want to buy them out. They believe the business will continue to expand and do not wish to share this growth with the investors when the company is later sold, and they are tired of paying a 20% return to the investors.

How should Alice, Ben and Connie go about buying out the investors? How would the form of organization affect this?

Structurally, it would require an agreement on the part of the investors to be bought out. The founders could have an option built into the original financing arrangements allowing them to buy back at certain formula, or upon certain triggers. Discuss dispute resolution mechanisms as well as buy-out options. Contrast S corporation or C corporation buy-out with after-tax dollars with LLC buy-out with pre-tax dollars under Code § 736, which can eliminate capital gain tax on part or all of the complete liquidation of an LLC member's interest.

Bigger Workforce; Family Business Succession Planning - Year 10

In Year 10, the business is earning $2,000,000 net profit, after paying $250,000 annual compensation to each of Alice, Ben and Connie. It has full sales and manufacturing forces and excellent office support, for a total of 50-100 employees. Everyone loves these new widgets; Connie keeps finding ways to improve the product; and Alice keeps finding new customers. Ben, however, is tired of trying to keep up with their unbridled energy. Ben's son, George, just received an MBA from a leading business school. Ben thinks that George should take over Ben's job and would like to transfer some of his equity to him. Alice and Connie agree to let George work his way into the business, getting experience in various office functions and eventually moving up to Ben's job in five years if George works out well.

How should they handle George's new role and Ben's phasing out of his own role? What if George turns out to be a slacker?

Estate planning issues: tax rates and exemption levels, ability to make gifts, transferring business opportunities or leveraged businesses, asset protection planning using trusts, passing to spouse and children, fair vs. equal, dividing into voting and nonvoting ownership interests, need for single class of equity interest (consider nonvested stock), and estate tax issues with related party buy-sell agreements. Alice, Ben and Connie want to institute some kind of nonqualified deferred compensation plan for themselves. Develop simple performance bonus for George, payable within 2½ months after close of year with no option for deferral. Important to set goals based on where Alice, Ben and Connie want George to be in five years. If George turns out to be a slacker, he gets no bonus. When Ben wants to transfer some of his shares to George, consider the issues of restrictions on transfer, rights of first refusal, etc.

Purchase of Retiring Founder's Interest; Business Succession Planning to Current Key Employee - Year 15

In Year 15, Alice gets bored. She wants to sell her share of the business to Ben, George and Connie and retire to a tropical island, along with the main characters in John Grisham's first two books. Sally, an employee who has been a top salesman for years, wants to take Alice's job. However, Sally has no money to invest to buy out Alice. Furthermore, Sally wants some financial incentives based on the company's sales and profitability.

Should the company, the other owners, or Sally buy out Alice? What kind of incentives should Sally be given?

Availability of capital gain rates when entity sells assets. Tax on splitting up or dissolving. Code § 736 payments. Consider phantom shares or restricted stock for Sally. George needs to be ahead of Sally because he is the son of the founder and, in his mind, the heir apparent. Include George in same plan developed for Sally. Also see issues from Year 10.

Purchase of Deceased Founder's Interest, Including Possible Sale of Business - Year 20

In Year 20, Connie dies. The stresses of keeping up with changing technology and foreign competition left her exhausted.

How should the remaining owners handle buying out Connie's ownership interest, which under her estate plan would pass to her husband, Herman?

Instead, should they sell the business? To the employees or to outside investors? Possible merger?

What if the remaining owners prefer to retire, turning the business over to the employees?

Estate tax deferral. Restricted stock (or phantom stock) immediately vested. Also see issues from Year 15.

III. Estate Planning Implications

The first section of this portion deals with drafting and administering trusts and estates, including income taxation and fiduciary responsibility. The second section deals with transfer tax issues, including transfers during life, estate tax issues, and special valuation issues (including the effect of buy-sell agreements). The third section discusses fairness within families, including allocating assets when businesses are involved and potential conflicts of interest involved in those allocation decisions.

The American College of Trust and Estate Counsel provides free estate planning resources for those who do not specialize in the field.

The AICPA has Trust, Estate and Gift Tax Resources.[5834]

III.A. Drafting and Administering Trusts and Estates

Drafting trusts to hold business interests involves melding the grantor's wishes with the related income tax consequences, especially when holding stock in S corporations. Trustees need to consider diversifying, but when a special purpose of the trust is to hold a business interest, the trustees will want to make sure that the businesses are professionally run in a manner that is both economically sound for the beneficiaries but also minimizes the trustees' liability.

III.A.1. General Benefits of Trusts

Increasingly, people are becoming aware of the need to protect their assets from claims by creditors or spouses. Clients can do a big favor for their surviving spouses or children by leaving assets in trust instead of outright. The trust agreement can provide them with virtually complete control over the trust. Or, if clients wish, the trust agreement could be very restrictive. It all depends on what they want.

For example, a wife leaves her entire estate outright to her husband upon her death. They orally agree that he will leave her remaining assets to their children at his death. Unfortunately, that's a moral, not a legal, agreement. Suppose the husband remarries after the wife's death. Under Missouri law, upon his death, his new spouse would have the right to about 1/3 of his estate. This would be contrary to the clients' originally agreed goal of having all of their assets pass to their children at her death.

What about estate taxes? A credit shelter trust can protect future appreciation from estate tax, for those concerned about it. Lawyers can include various options to attain basis step-up through selective estate inclusion, to the extent it later turns out to be beneficial.

Clients can avoid these problems and reduce or avoid estate tax by leaving their property in trust for the surviving spouse. If they wish, the surviving spouse can be the sole trustee, take distributions for support as the surviving spouse determines, and change how the trust's assets pass at the surviving spouse's death to take into account changes in their children's family circumstances. Because the assets are in a trust the first spouse created, if the second spouse remarries, the new spouse would not have a claim on them upon the second spouse's death. Because the first spouse used his or her estate tax exclusion amount to create the trust, it will be excluded from the surviving spouse's estate at the surviving spouse's death, and the surviving spouse can use his or her exclusion amount to cover the assets that the surviving spouse owned outside of that trust.

What about leaving assets to children? Even adult children may need protection from creditors and spouses. Suppose a child starts a new business. The child's creditors will demand personal guarantees. If the client leaves assets to the child outright, they would be at risk. Likewise, if the child marries, the child's spouse might persuade the child to put the money in a joint account. If the child later divorces, the child will need to split this account with the soon-to-be ex-spouse.

[5834] See http://www.aicpa.org/INTERESTAREAS/TAX/RESOURCES/TRUSTESTATEANDGIFT/Pages/default.aspx.

When I asked a client whether he liked the idea of trusts for his children, he told me about his neighbor. The neighbor bought a house for his daughter and her husband. The house was titled jointly in their names. When the daughter divorced, the neighbor bought his ex-son-in-law's half so that the daughter could own the house outright. In other words, the neighbor paid for his daughter's house one and a half times!

Clients can avoid these, and other (special needs trusts), problems by leaving your property in a separate trust for each child. If the client wishes, his or her child can be the sole trustee of the child's trust, take distributions to support the child as the child determines, and change how the trust's assets pass at the child's death. The child might even be able to pass the trust's assets free from estate tax, even if the child's separate assets use up the estate tax exclusion amount.

I often authorize an independent person to make unlimited distributions to the beneficiary, to facilitate tax planning or decanting.[5835]

Many states now allow trusts to last forever. However, flexible drafting can let each generation change the rules for the next.

By using trusts, we can help clients protect their families from predators. We can also build in flexibility to allow them to react to changes that nobody can foresee, so that we can help clients give their families a legacy that they might enjoy forever.

III.A.2. Liability Issues

In most states, trusts may hold interests in general partnerships or sole proprietorships only if the governing instrument or a state statute grants the trustee authority to do so, because of the liability risks involved. Even investments in limited liability entities may be considered too risky unless they have a proven track record. The propriety of an authorized investment in a closely-held business is determined by applying the same standard of care as for other assets.[5836]

Under the Uniform Prudent Investor Act (UPIA), [5837] a trustee "shall invest and manage trust assets as a prudent investor would by considering the purposes, terms, distribution requirements, and other circumstances of the trust;" and in making such decisions, the trustee "shall exercise reasonable care, skill and caution."[5838] Additionally, a trustee's investment and management decisions regarding individual assets are to be evaluated with respect to the trust portfolio as a whole and "as part of an overall investment strategy having risk and return objectives reasonably suited to the trust."[5839] While making investment decisions and managing trust assets, the trustee should consider factors such as general economic conditions, tax consequences, the role of the asset in the overall trust portfolio, and the expected return from the asset.[5840] Perhaps the most important factor to be considered is the asset's special relationship or value to the purposes of the trust or to one or more of the beneficiaries, when the special purpose of the trust is to hold a business interest.[5841] This factor ties in with the UPIA's

[5835] See part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting.
[5836] See generally, Bogert, *The Law of Trusts and Trustees*, § 679 (Rev. 2d. Ed. 1982).

[5840] UPIA §2(c) .
[5841] UPIA §2(c)(8).

other requirement that the trustee diversify the trust investments unless special circumstances indicate the trust's purposes would be better served without diversification.[5842] Thus, when the trust's specific purpose is to hold a business interest, a lack of diversity in the assets of the trust will not run afoul of the UPIA's requirements. Finally, the UPIA imposes a "duty of impartiality" when the trust has more than one beneficiary. The trustee is to act impartially in performing his or her duties and in doing so should take into account any differences in the beneficiaries' interests. For example, the trustee has to consider any potential conflicts between the interests of beneficiaries interested in trust income versus those interested in trust principal.[5843] This duty of impartiality will affect the trustee's investment and management conduct with regard to principal and income allocations – especially with regard to tax burden allocations.

The Uniform Trust Code (UTC)[5844] provides default rules governing the trustee's duties and powers but allows for many of those rules to be modified by terms of the trust.[5845] Among those duties are the duty of loyalty and the duty of impartiality among beneficiaries, a duty identical to the UPIA's duty of impartiality.[5846] With regard to the duty of loyalty, the trustee must act in furtherance of the best interests of the beneficiaries. Specifically, when the trust holds a business interest, the trustee has a duty to vote shares and use proper care to promote beneficiary interests; and when the trust is the sole owner of an entity, the trustee should elect or appoint a director or manager to manage the entity in the best interests of the beneficiaries.[5847] In a corporate context, the trustee must vote for corporate directors who will follow policy consistent with the trustee's duty of impartiality. The UTC also emphasizes that when a trustee has special skills or expertise in an area, he or she should use those skills in managing the trust.[5848] In recognition of the trustee's ability to hold business interests, the UTC gives the trustee the power to continue business and take actions that would be taken by shareholders, members, or property owners and allows the trustee to exercise rights of an absolute owner with respect to stocks or other securities.[5849] One might consider including a provision addressing the compensation a person earns as trustee, as a director, and as an officer or other employee of the company – who makes the payments and how do the payments relate to each other. These duties might conflict with the corporate directors' duties to *all* the shareholders.

With regard to partnership interests specifically, National Banks may find it difficult to hold a partnership interest. The Office of the Comptroller of the Currency (OCC) regulates these banks and has stated that, as a general partner, a bank's liability is not limited to the principal of a particular account, but that it would object to a bank investing in general partnerships unless local law limited the bank's liability.[5850] As a limited partner, a bank usually would not have a say in the management of the assets. When a bank does hold a limited partnership interest, the OCC will not object if such investment is authorized by the governing instrument, local law or by written consent of account beneficiaries. Additionally, the bank would still be subject to the

prudent investment standard, and the investment would have to meet the objective of the entity to match the outsider's offer.[5851] Distributions are mandatory, but the person controlling the entity may establish reasonable reserves.

Some people give the donee the right to sell the interest to the donee for cash equal to the appraised value, which right lasts 15-45 days – whatever the practitioner feels is similar to what would be a reasonable period within which to exercise *Crummey* rights.[5852]

III.A.3. Trusts Holding Stock in S Corporations

Estates, including not only decedents' estates but also bankruptcy estates, are qualified shareholders during a reasonable period of administration.[5853]

The holder of a usufruct interest is similar to a life tenant and is not considered to be a trustee of a trust. Rather, the holder is treated as the sole owner for K-1 purposes.[5854]

The rest of this part III.A.3 deals with trusts.

Rev. Rul. 93-79 held:

> A state court order, which retroactively reforms a trust to meet the requirements of a qualified subchapter S trust, does not have retroactive effect for purposes of determining the trust's eligibility to be a shareholder of an S corporation.

However, Rev. Rul. 93-79 also held:

> The trust reformation, however, will be recognized prospectively. Therefore, because X has never been an S corporation, it may file a new S corporation election for a subsequent taxable year without waiting the 5-year period specified in section 1362(g) of the Code for new S corporation elections by corporations whose previous elections have terminated.

Rev. Rul. 93-79 reasoned:

> In the present situation, the original terms of the Trust did not satisfy the requirements of section 1361(d)(3)(A)(ii) of the Code regarding distributions of corpus. Consequently, the Trust was not a QSST and was ineligible to be an S corporation shareholder. Thus, the S corporation election filed by X on March 15, 1992, was ineffective because the Trust held shares of X at the time the election was filed. In an effort to cure the ineffective

election, the Trust's beneficiaries obtained a court-approved retroactive reformation of the governing trust instrument.

Retroactive changes of the legal effects of a transaction through judicial nullification of a transfer or judicial reformation of a document do not have retroactive effect for federal tax purposes. *American Nurseryman Publishing Company v. Commissioner*, 75 T.C. 271, 276-277 (1980), *aff'd without published opinion*, 673 F.2d 1333 (7th Cir. 1982); *Estate of Hill v. Commissioner*, 64 T.C. 867 (1975), *aff'd without published opinion*, 568 F.2d 1365 (5th Cir. 1978); *Emerson Institute v. United States*, 356 F.2d 824 (D.C. Cir. 1966), *cert. denied*, 385 U.S. 822 (1966); *Piel v. Commissioner*, 340 F.2d 887 (2d Cir. 1965); *M.T. Straight Trust v. Commissioner*, 245 F.2d 327 (8th Cir. 1957); *Eisenberg v. Commissioner*, 161 F.2d 506 (3d Cir. 1947), *cert. denied*, 332 U.S. 767 (1947); *Sinopoulo v. Jones*, 154 F.2d 648 (10th Cir. 1946).

American Nurseryman considered whether an S corporation election was terminated when stock in the corporation was transferred to a trust. A state court found that the stock transfer was a mistake and held it to be void. The Tax Court disregarded the effect of the state court action for purposes of determining the federal tax status of the corporation and found that the S election was terminated. The court followed the consistently expressed judicial opinion that judicial reformation cannot operate to change the federal tax consequences of a completed transaction.

Quoting its opinion in *M.T. Straight Trust v. Commissioner*, 24 T.C. 69 (1955), *aff'd*. 245 F.2d 327 (8th Cir. 1957), the court in *American Nurseryman* said that it recognized that "[t]here are numerous cases in which the construction or interpretation of an instrument by a decision of a State court involving the taxpayer and rendered subsequent to the taxable period involved has been relied upon to determine the tax consequences of the document, but the court stated that "In the instant case, however, the reformation decree is not a determination of the legal effect of the original trust instrument under local law, nor does it purport to be such a determination. On the contrary, it alters and modifies the instrument." 75 T.C. 275. The court went on to observe that "as a general rule a reformation of an instrument has retroactive effect as between the parties to the instrument, but not as to third parties who previously acquired rights under the instrument." 75 T.C. 276.

In *Flitcroft v. Commissioner*, 328 F.2d 449 (9th Cir. 1964), *rev'g*. 39 T.C. 52 (1962), the taxpayers established trusts that were not by their terms irrevocable. State law mandated that a trust was not irrevocable unless expressly stated in the trust instrument. A state court reformed the trusts, based on the asserted original intent of the grantors, and decreed that the trusts were irrevocable from their execution. The Ninth Circuit held that the trusts were irrevocable for federal tax purposes. The Service does not follow the Ninth Circuit's decision in *Flitcroft* to the extent it requires the Service to give effect to a retroactive reformation.

Accordingly, the reformation of the Trust will not be recognized retroactively to cure the defective S corporation election filed by X. Because an ineligible trust held shares of X stock at the time X's S corporation election was filed, X was not a small business corporation on that date (as required by section 1362(a) of the Code) and on each day of 1992 before that date (as required by section 1362(b)(2)(B)(i)). Therefore, X never became an S corporation because the S corporation election filed by X on March 15, 1992, was ineffective. Furthermore, the provision of section 1362(b)(2) permitting

> certain otherwise ineffective elections to be effective for the following taxable year does not permit the election filed by X to be valid for the following taxable year, 1993, because X was not a small business corporation when the election was filed.

However, see parts II.A.2.e.iii Relief for Late S corporation Elections Within 3+ Years, II.A.2.e.v Relief for Late S Corporation and Entity Classification Elections for the Same Entity, and III.A.3.c.iii.(b) Flowchart Showing Relief for Late QSST & ESBT Elections.

III.A.3.a. Wholly Owned Grantor Trusts – How to Qualify, Risks, and Protective Measures

A wholly owned grantor trust is among the types of trusts that can hold stock in an S corporation. For a description of the types of trusts that qualify, see part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation.

Below are discussions of what types of trusts can qualify as wholly owned grantor trusts, what it means to be "wholly" owned, how a trust can fall short, and what step an S corporation should take to avoid a trust falling short if it is at risk for doing so.

III.A.3.a.i. Qualifying as a Wholly Owned Grantor Trust

This part III.A.3.a Wholly Owned Grantor Trusts – How to Qualify, Risks, and Protective Measures discusses a trust that qualifies as a shareholder solely because all of the trust is treated under the grantor trust rules as owned by an individual who is a citizen or resident of the United States.[5855] If a trust has more than one deemed owner but they have substantially separate and independent shares, the trusts are treated as separate trusts[5856] and may separately qualify as wholly owned grantor trusts.[5857]

[5855] Implementing Code § 1361(c)(2)(A)(i), Reg. § 1.1361-1(h)(1)(i) provides:

> *Qualified subpart E trust*. A trust all of which is treated (under subpart E, part I, subchapter J, chapter 1) as owned by an individual (whether or not the grantor) who is a citizen or resident of the United States (a qualified subpart E trust). This requirement applies only during the period that the trust holds S corporation stock.

[5856] Implementing the flush language at the end of Code § 1361(d)(3), Reg. § 1.1361-1(j)(3) includes:

> For purposes of sections 1361(c) and (d), a substantially separate and independent share of a trust, within the meaning of section 663(c) and the regulations thereunder, is treated as a separate trust.

[5857] In approving a community property trust as an eligible shareholder before and after divorce, Letter Ruling 9729025 held:

> Under the trust agreement, H and W retain the power to revoke TR and revest the trust's property in themselves. Therefore, H and W are treated, under section 676, as the owners of TR until their divorce. Because TR is treated as owned entirely by H and W between d2 and d3, TR is a trust described in section 1361(c)(2)(A)(i).
>
> Under section 663(c) and section 1.663(c)-1(a) of the Income Tax Regulations, shares of a single trust are treated as separate trusts if the trust has more than one beneficiary and the different beneficiaries have substantially separate and independent shares. Section 1.663(c)-3 provides that the applicability of the separate share rule generally depends upon whether distributions of the trust are to be made in substantially the same manner as if separate trusts had been created. Thus, if an instrument directs a trustee to divide the trust estate into separate shares for each beneficiary and the trustee is given discretion, with respect to each share, to distribute or

If not a foreign trust,[5858] such a grantor trust automatically qualifies as an S corporation shareholder,[5859] and the trust's deemed owner is treated as the shareholder for all tax purposes,[5860] including the 100-shareholder limitation.[5861]

A revocable trust would qualify as a grantor trust taxed to its grantor.[5862] An irrevocable trust might qualify as a grantor trust taxed to the grantor under the normal rules of Code §§ 671-677, to the beneficiary under Code § 678, or to the beneficiary through a QSST election made by the beneficiary.

A trust might be taxable to a beneficiary under Code § 678 if the beneficiary has a withdrawal right with respect to all gifts to the trust (a *Crummey* trust);[5863] whether such withdrawal rights impair spendthrift protection requires additional analysis.[5864] Examples of Code § 678 trusts include:

- Grantor creates a "vested" trust for a grandchild, as follows: The grandchild can withdraw the entire gift and all earnings on the gift. This withdrawal right lapses in full after a

---

> accumulate income or to distribute principal or accumulated income or to do both, separate shares will exist under section 663(c).
>
> Upon the dissolution of H's and W's marriage, the community property held by TR (including the X stock) was divided equally on the trustee's books and each half was treated as the separate property of H and W. As a result, H was entitled to all of the income from his separate share of the trust property and so much of the principal as he directed. Likewise, W was entitled to all of the income from her separate share of the trust property and so much of the income as she directed. Therefore, H's and W's shares of TR are substantially separate and independent shares within the meaning of section 663(c).

I am not sure that I agree with the logic of why the trust qualified while they were married, although ultimately the result was probably correct. The ruling points out that Code § 1361(c)(1) treats spouses as one shareholder for purposes of Code § 1361(b)(1)(A). However, the ruling determined eligibility under Code § 1361(c)(2)(A)(i), so presumably applying the spousal unity rule for purposes of Code § 1361(b)(1)(A) would not have been relevant to the ruling. Therefore, because the ruling's spousal unity reasoning appears incorrect, make sure that any community property trusts are held as separate and independent shares during life.
For further analysis, see fns 6618-6619 and accompanying text in part III.B.2.h.i Who Is the Grantor

[5858] Consistent with the last sentence of Code § 1361(c)(2)(A), Reg. § 1.1361-1(h)(2) precludes a foreign trust, as defined in Code § 7701(a)(31), from holding stock, even it otherwise would qualify as a shareholder.

[5859] Code § 1361(c)(2)(A)(i).

[5860] Code § 671. Grantor trusts may use their deemed owners' social security numbers as their taxpayer identification numbers. Reg. § 1.671-4(b)(2)(A). However, a QSST must file Form 1041 and attach a statement of the items treated as having been received directly by its beneficiary. Reg. § 1.671-4(b)(6). One might consider filing Form 1041 for other grantor trusts as well to get the statute of limitations running on grantor trust treatment.

[5861] Code § 1361(c)(2)(B)(i).

[5862] Code § 676.

[5863] See discussion of IRS Letter Rulings in 730-2nd T.M., S corporation*s: Formation and Termination*, II.E.1.b(3), and in *Federal Income Taxation of S corporations* ¶ 3.03[10] (4th ed., Warren, Gorham & Lamont). A trustee-beneficiary's power to make distributions to himself under an ascertainable standard might make the trustee-beneficiary a Code § 678 owner to the extent of that distributions would be authorized under that standard. Letter Rulings 8211057 and 200747002 (Code § 678(a)(2) lapse followed by the beneficiary-trustee being able to make distributions to himself under an ascertainable standard was sufficient to allow the trust to hold stock in an S corporation). For more details, see part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts.

[5864] See parts III.B.2.i.ix Creditor and Gift/Estate Tax Issues Regarding Withdrawal Rights.

reasonable interval. The grandchild is the sole beneficiary during his or her life and has a general power of appointment upon death. For income tax purposes, one may treat the trust as deemed owned 100% by the beneficiary.[5865] The gift qualifies for the annual exclusion.[5866] For estate tax purposes, the trust is includible in the beneficiary's estate.[5867] If and to the extent that the gift qualifies for the annual exclusion, the gift is also exempt for generation-skipping transfer (GST) purposes, without using any GST exemption.[5868] If and to the extent that the lapse exceeds the greater of $5,000 or 5% of the trust's assets (subject to coordination with other lapses by that beneficiary),[5869] the beneficiary has made an incomplete gift[5870] and for GST purposes becomes the transferor;[5871] however, because the trust is included in the beneficiary's estate for estate tax purposes, the beneficiary's GST exemption needs to be allocated upon death anyway.

- Grantor makes a gift of less than $5,000 to the trust[5872] and later sells stock in an S corporation to the trust.[5873]

- Decedent bequeaths to a trust over which the beneficiary holds an unlimited withdrawal right, making the trust taxable to the beneficiary under Code § 678(a)(1), building in features that would trigger Code § 678(a)(2) after the withdrawal rights lapse.[5874]

Note that the settlor's grantor trust powers trump any beneficiary's grantor trust powers.[5875]

A beneficiary may also be treated as the owner by making a "QSST" election[5876] to have the grantor trust rules apply. See part III.A.3.e.i QSSTs.

III.A.3.a.ii. How a Trust Can Fall Short of Being Wholly Owned by One Person

If a person is treated as the owner of a portion of a trust, that portion may or may not include both ordinary income and other income allocable to corpus.[5877] However, for a trust to meet the

[5866] For qualification of withdrawal rights for the annual exclusion and whether an interest in a business entity qualifies for the annual exclusion, see part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts, especially the paragraph accompanying fn. 6345.
[5867] Code § 2041(a)(2).
[5868] Code § 2642(c).
[5869] Code § 2514(e). For more details on calculating the 5% lapse, see fn 6125 in part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts (Whether or Not a Sale Is Made).
[5870] Reg. 25.2511-2(b).
[5871] See Reg. § 26.2652-1(a)(5), Example (5), reproduced in fn 673 in part II.D.3 Trust as Grantor or Deemed Owner of Another Trust.
[5872] See part III.B.2.i.vi Funding the Trust with Small Gifts.
[5873] See part III.B.2.i.v Sale to a Beneficiary Deemed-Owned Trust – When a Traditional Sale to an Irrevocable Grantor Trust Does Not Meet the Client's Objectives.
[5874] See part III.B.2.i.viii Funding the Trust with a Large Initial Gift or Bequest.
[5875] Code § 678(b).
[5876] Code § 1361(d)(1). If the beneficiary dies and the trust continues, with another beneficiary stepping into his or her place, the QSST election remains in place, Reg. § 1.1361-1(j)(9); but, if the trust terminates by reason of the beneficiary's death, then a new QSST election must be filed. Reg. § 1.1361-1(j)(9)(ii), Example (2). One might consider including a clause that, during trust administration, after the beneficiary's death and before separate trusts can be funded, the trust will not terminate but rather will continue as a single trust with separate shares pursuant to Reg. § 1.1361-1(j)(9)(ii), Example (1).
[5877] Reg. § 1.671-3(b).

wholly owned grantor trust rules, one person must be the deemed owner of both income and principal.[5878]

If the grantor's spouse is a beneficiary, the trust is not necessarily deemed wholly owned,[5879] so an additional grantor trust power might be advisable.[5880] The trust might very well cease qualifying as a wholly-owned grantor trust upon separation or divorce,[5881] so that an ESBT election might be necessary after divorce or separation.[5882]

If a trust qualifies as being deemed wholly owned by the beneficiary, consider what might happen if the provision upon which the beneficiary's deemed ownership is based includes some ambiguity.[5883] Also, if the beneficiary does not have a withdrawal right over every gift to the trust and over the income and gains generated by each such gift or if the beneficiary has a withdrawal right that lapses in an incorrect manner, the trust might not be deemed wholly owned by the beneficiary.[5884]

III.A.3.a.iii. Steps an S Corporation Might Take to Avoid a Trust Falling Short of Being a Wholly-Owned Grantor Trust

An S corporation might insist that certain protective measures be taken in case a trust falls short of being deemed wholly owned by one person.

If the trust is intended to be deemed owned wholly by the beneficiary, the beneficiary might file a QSST election, just in case the trust is not deemed wholly owned by the beneficiary. A beneficiary cannot elect QSST treatment if the grantor is taxed as the owner; however, a beneficiary may elect QSST treatment if the beneficiary is taxed as the owner.[5885] However, the beneficiary might not want to make the QSST election during any time when the trust is buying stock from the beneficiary, because a QSST election complicates the purchase and might make the process of getting the value of the stock out of the beneficiary's estate take twice as long.[5886]

For a trust deemed owned by its settlor (or a trust deemed owned by its beneficiary where QSST status is undesirable to impractical), the trust might file an ESBT election, just in case the

---

[5878] Code § 1361(c)(2)(A)(i). Letter Ruling 200226006 held that a trust that was partly a nongrantor trust and partly a grantor trust did not satisfy this rule, even though the grantor trust portion was created by contributing S corporation stock and the nongrantor portion was created by contributing other assets. (Generally I would recommend separating grantor and nongrantor trusts anyway; the facts in that letter ruling were particularly problematic in that the trust appears to be partially a GST-exempt trust and partially a Code § 2036 trust.) This ruling is consistent with Reg. § 1.1361-1(k)(1), Example (10), paragraph (iii) (reproduced in fn. 5973, which is found in part III.A.3.e.i.(a) QSSTs Generally). Letter Ruling 200942020 approved an irrevocable grantor trust as an S corporation shareholder when it had multiple *Crummey* power holders, holding that Code § 678(b) caused the grantor's deemed owner status to trump the beneficiaries' deemed owner status.

[5879] Letter Ruling 201208013.

[5880] See part III.B.2.h How to Make a Trust a Grantor Trust.

[5881] See fn. 5973, discussing how Reg. § 1.1361-1(k)(1), Example (10), applies Code § 682 to a trust owning stock in an S corporation.

[5882] See parts III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation (especially part III.A.3.b.v An Electing Small Business Trust) and III.A.3.e.ii.(a) Qualification as an ESBT.

[5883] See part III.B.2.i.xii Dealing with Code § 678(a)(2) Uncertainty.

[5884] See part III.B.2.i.vii Portion Owned When a Gift Over $5,000 is Made.

[5885] Reg. § 1.1361-1(j)(6)(iv).

[5886] See part III.A.3.e.vi.(c) Required Structure for a Sale to a QSST (Including Possible Pitfalls).

trust is not a wholly-owned grantor trust taxable to only one person. Although estate planners commonly rely on swap powers, they are not foolproof.[5887] A grantor trust may make an ESBT election.[5888] However, grantor trust treatment trumps ESBT taxation.[5889] That doesn't mean that the ESBT election is not technically in effect[5890] - it just means that the election has no current income tax consequences.

These protective measures are not necessarily beneficial to anyone other than the S corporation:

- A grantor trust can use regular income taxation for the first two years after the grantor's death and get more favorable income tax treatment as a regular trust.[5891] Post-mortem ESBT treatment may be good or bad, depending on whether the income distribution deduction would generate higher or lower federal and state (consider the trust's and beneficiaries' respective residences) income taxes; see part II.J.3 Strategic Fiduciary Income Tax Planning (and other cross-references in the footnote at the end of this sentence).[5892] The ESBT portion of the trust should get a $10,000 state income tax deduction that is separate from the non-S portion, so if the trust has other income then having an additional state income tax deduction can help; see part II.J.3.d Who Benefits Most from Deductions.

- Some grantor trusts might qualify as a QSST or an ESBT upon termination of grantor trust status. The regulations limit how often one can switch back and forth between QSST and ESBT status. Initially making the ESBT election means that, after switching to a QSST once, the trust must wait 36 months before switching back to a QSST or later back to an ESBT again. Absent the initial ESBT election, the beneficiary could make a QSST election upon termination of grantor trust status and later switch to ESBT status with waiting 36 months. Part III.A.3.e.iv Flexible Trust Design When Holding S Corporation Stock

---

[5887] Whether a swap power is effective depends on the facts and circumstances, as described in Reg. § 1.675-1(b)(4)(iii). Part III.B.2.h.iii Swap Power quotes this regulation and describes why estate planners do not mind relying on it as the sole grantor trust feature. Letter Ruling 9548013 held (highlighting added):

> Based upon the facts and representations you submitted, we conclude that A will be treated as the owner of TR1 and B will be treated as the owner of TR2 provided that the District Director determines that the circumstances indicate that A and B hold the power of administration over the entire corpus of their respective trusts in a nonfiduciary capacity. Therefore, A and B will be considered the owners of their respective trusts until their deaths, the termination of the trusts, or they release their administrative power, whichever comes first.

To protect an S election against an adverse finding by the District Director, one might want the additional protection that an ESBT election provides.

[5888] Reg. §§ 1.1361-1(m)(2)(v) (general approval for grantor trust to make an ESBT election), 1.1361-1(m)(8)(iii), Example 3 (Code § 678 trust may make an ESBT election).

[5889] Reg. § 1.641(c)-1(c). A partial grantor trust is illustrated in Reg. §1.641(c)-1(*l*), Example (1).

[5890] A trust may not make a protective ESBT election. Reg. § 1.1361-1(m)(2)(v), which concludes with:

> In addition, a trust that qualifies as an ESBT may make an ESBT election notwithstanding that the trust is a wholly-owned grantor trust.

[5891] Code § 1361(c)(2)(A)(ii). See Code § 641(c) for ESBTs' unfavorable income tax treatment.

[5892] With that part or outside that part, see especially parts II.J.4.h.i Trapping Income in Trust Notwithstanding Distributions – ESBT, as well as parts II.E.1.f Trusts/Estates and the Code § 199A Deduction (especially part II.E.1.f.ii Electing Small Business Trusts (ESBTs)), II.J.3.a Who Is Best Taxed on Gross Income, II.J.3.c Who Is Benefits the Most from Losses, II.J.3.d Who Benefits Most from Deductions, III.A.3.e.ii.(b) ESBT Income Taxation - Overview, and III.A.3.e.ii.(c) When ESBT Income Taxation Might Help.

describes this, as well as the Reg. § 1.1361-1(m)(6) requirement to obtain a private letter ruling to revoke an ESBT election when not converting to a QSST.

If the sole risk to being wholly owned is the separation or divorce of a beneficiary from the grantor, an irrevocable grantor trust that includes the grantor's spouse as a beneficiary might provide that separation or divorce terminates the spouse's interest. That provision might avoid the need for an ESBT election upon which the S corporation otherwise might have required.

III.A.3.a.iv. Why to Be Extraordinarily Sensitive to Protecting the S Election

Some people point to the generous relief the IRS provides for inadvertent terminations and decide that going to great lengths to protect the S election is not necessary.[5893]

However, a buyer might be very sensitive to the S election's validity, particularly in a stock sale that is treated as an asset purchase.[5894] Fixing any problems that the buyer's tax counsel perceives to exist (whether or not the problem actually exists) can delay a transaction, during which time other issues might arise that might cause the seller to lose a sale to a strategic buyer at a premium price. I became much more aware of this issue when a transaction worth hundreds of millions of dollars faced a possible delay due to an issue caused by prior counsel and I was asked to obtain a private letter ruling to fix it; I was able to get a private letter ruling in only six weeks from the date of submission, but until I did the client was very nervous about the six-month delay projected by those who insisted on the PLR. If I had not been able to get the PLR that quickly (which I have no assurance of being able to replicate) and that deal had cratered, I wonder what the repercussions would have been to prior counsel and then realized that any of us could be in that situation someday if there is even the slightest concern.

A solution that may satisfy the buyer (but does not cure the seller's S corporation problem) involves moving all of the corporation's assets into a single member LLC, which can be done using state law conversion/merger statutes and then selling that LLC.[5895] That solution may address other issues as well.[5896]

[5893] See part III.A.3.c.iii.(b) Flowchart Showing Relief for Late QSST & ESBT Elections and the related discussion preceding that.
[5894] See part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.
[5895] See fns. 5778-5779 in part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.
[5896] See part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold, especially fns. 5770-5776.

III.A.3.b. Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation

To qualify as S corporation shareholders for any length of time,[5897] generally[5898] an irrevocable trust must either be a grantor trust or an electing small business trust (ESBT). Planning to avoid the 3.8% tax on net investment income[5899] requires additional planning regarding participation in the business; it may be advisable to have the trustee materially participate even if the trust is a grantor trust.[5900]

If not a foreign trust,[5901] any of the trusts described below may be a shareholder. See also part III.B.2.j.ii.(e) Change in Qualification of Trust to Hold S corporation Stock During Taxable Year, which is part of part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.

III.A.3.b.i. A Trust All of Which Is Treated Under the Grantor Trust Rules as Owned by An Individual Who Is a Citizen or Resident of the United States

See part III.A.3.a Wholly Owned Grantor Trusts – How to Qualify, Risks, and Protective Measures.

III.A.3.b.ii. A Trust That Was a Grantor Trust with Respect to All of Its Assets Immediately Before the Death of The Deemed Owner and Which Continues in Existence After Such Death

Code § 1361(c)(2)(A)(ii). This includes a former QSST.[5902]

[5897] Trusts can qualify as S shareholders by electing to be taxed as an estate under Code § 645 (which election has a limited duration under Code § 645(b)(2)), by being a continuation of a grantor trust under Code § 1361(c)(2)(A)(ii), or a testamentary trust under Code § 1361(c)(2)(A)(iii) – for the latter, see part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, especially part III.A.3.b.iii A Trust with Respect to Stock Transferred to It Pursuant to The Terms of a Will (or a Qualified Revocable Trust When a Code § 645 Election Terminates), But Only for the 2-Year Period Beginning on The Day on Which Such Stock Is Transferred to It.

[5898] A voting trust does not have time limits on how long it is an eligible shareholder under Code § 1361(c)(2)(A)(iv).

[5899] See part II.I 3.8% Tax on Excess Net Investment Income (NII).

[5900] See part II.J.17 Planning for Grantor and Nongrantor Trusts Holding Stock in S Corporations in Light of the 3.8% Tax.

[5901] Consistent with the last sentence of Code § 1361(c)(2)(A), Reg. § 1.1361-1(h)(2) precludes a foreign trust, as defined in Code § 7701(a)(31), from holding stock, even it otherwise would qualify as a shareholder.

[5902] Reg § 1.1361-1(j)(7)(ii) provides:

> If, upon the death of an income beneficiary, the trust continues in existence, continues to hold S corporation stock but no longer satisfies the QSST requirements, is not a qualified subpart E trust, and does not qualify as an ESBT, then, solely for purposes of section 1361(b)(1), as of the date of the income beneficiary's death, the estate of that income beneficiary is treated as the shareholder of the S corporation with respect to which the income beneficiary made the QSST election. The estate ordinarily will cease to be treated as the shareholder for purposes of section 1361(b)(1) upon the earlier of the transfer of that stock by the trust or the expiration of the 2-year period beginning on the day of the income beneficiary's death. During the period that the estate is treated as the shareholder for purposes of section 1361(b)(1), the trust is

Generally, such a trust is an eligible shareholder only for the 2-year period beginning on the day of the deemed owner's death.[5903] It does not include a trust that did not own the stock during the deemed owner's life and received the stock pursuant to the terms of a will,[5904] which is subject instead to the time period described in part III.A.3.b.iii A Trust with Respect to Stock Transferred to It Pursuant to The Terms of a Will (or a Qualified Revocable Trust When a Code § 645 Election Terminates), But Only for the 2-Year Period Beginning on The Day on Which Such Stock Is Transferred to It. However, if the trust is subject to an election under Code § 645,[5905] then the trust is taxed as an estate and can hold the stock during the entire period during which the trust is taxable as an estate.[5906] Whether the trust qualifies as a former grantor trust or as an estate, the grantor's estate is treated as the owner for purposes of the 100-shareholder limitation.[5907]

> treated as the shareholder for purposes of sections 1366, 1367, and 1368. If, after the 2-year period, the trust continues to hold S corporation stock and does not otherwise qualify as a permitted shareholder, the corporation's S election terminates. If the termination is inadvertent, the corporation may request relief under section 1362(f).

[5903] Reg. § 1.1361-1(h)(1)(ii), "Subpart E trust ceasing to be a qualified subpart E trust after the death of deemed owner," provides:

> A trust that was a qualified subpart E trust immediately before the death of the deemed owner and that continues in existence after the death of the deemed owner, but only for the 2-year period beginning on the day of the deemed owner's death. A trust is considered to continue in existence if the trust continues to hold the stock pursuant to the terms of the will or the trust agreement, or if the trust continues to hold the stock during a period reasonably necessary to wind up the affairs of the trust. See § 1.641(b)-3 for rules concerning the termination of trusts for federal income tax purposes.

The Reg. § 1.641(b)-3 trust termination rule is described in the text accompanying fn 2563 in part II.J.3.i Planning for Excess Losses, describing excess losses allowed to a beneficiary on termination of a trust. Reg. § 1.641(b)-3(a) is reproduced in fn 2732 in part II.J.8.

[5904] Regs. § 1.1361-1(k)(1), Example 3, paragraph (i), provides:

> *2-year rule under section 1361(c)(2)(A)(ii) and (iii)*. F owns stock of Corporation P, an S corporation. In addition, F is the deemed owner of a qualified subpart E trust that holds stock in Corporation O, an S corporation. F dies on July 1, 2003. The trust continues in existence after F's death but is no longer a qualified subpart E trust. On August 1, 2003, F's shares of stock in Corporation P are transferred to the trust pursuant to the terms of F's will. Because the stock of Corporation P was not held by the trust when F died, section 1361(c)(2)(A)(ii) does not apply with respect to that stock. Under section 1361(c)(2)(A)(iii), the last day on which the trust could be treated as a permitted shareholder of Corporation P is July 31, 2005 (that is, the last day of the 2-year period that begins on the date of the transfer from the estate to the trust). With respect to the shares of stock in Corporation O held by the trust at the time of F's death, section 1361(c)(2)(A)(ii) applies and the last day on which the trust could be treated as a permitted shareholder of Corporation O is June 30, 2005 (that is, the last day of the 2-year period that begins on the date of F's death).

[5905] See part II.J.7 Code § 645 Election to Treat a Revocable Trust as an Estate.

[5906] Regs. §§ 1.1361-1(k)(1), Example 3, paragraph (ii) and 1.645-1(e)(2)(i); Letter Ruling 200529006.

[5907] Code § 1361(c)(2)(B)(ii). Reg. § 1.1361-1(h)(3)(i)(B) provides:

> If stock is held by a trust defined in paragraph (h)(1)(ii) of this section, the estate of the deemed owner is generally treated as the shareholder as of the day of the deemed owner's death. However, if stock is held by such a trust in a community property state, the decedent's estate is the shareholder only of the portion of the trust included in the decedent's gross estate (and the surviving spouse continues to be the shareholder of the portion of the trust owned by that spouse under the applicable state's community property law). The estate ordinarily will cease to be treated as the shareholder upon the earlier of the transfer of the stock by the trust or the expiration of the 2-year period beginning on the day of the deemed owner's death. If the trust

Reg. § 1.1361-1(k)(1), Example (1) illustrates how these rules might apply to a joint revocable trust when the grantor dies and then again later when the survivor's revocable trust and downstream irrevocable trusts are funded:

(i) *Terms of the trust*. In 1996, A and A's spouse, B, created an inter vivos trust and each funded the trust with separately owned stock of an S corporation. Under the terms of the trust, A and B designated themselves as the income beneficiaries and each, individually, retained the power to amend or revoke the trust with respect to the trust assets attributable to their respective trust contributions. Upon A's death, the trust is to be divided into two separate parts; one part attributable to the assets A contributed to the trust and one part attributable to B's contributions. Before the trust is divided, and during the administration of A's estate, all trust income is payable to B. The part of the trust attributable to B's contributions is to continue in trust under the terms of which B is designated as the sole income beneficiary and retains the power to amend or revoke the trust. The part attributable to A's contributions is to be divided into two separate trusts both of which have B as the sole income beneficiary for life. One trust, the Credit Shelter Trust, is to be funded with an amount that can pass free of estate tax by reason of A's available estate tax unified credit. The terms of the Credit Shelter Trust meet the requirements of section 1361(d)(3) as a QSST. The balance of the property passes to a Marital Trust, the terms of which satisfy the requirements of section 1361(d)(3) as a QSST and section 2056(b)(7) as QTIP. The appropriate fiduciary under § 20.2056(b)-7(b)(3) is directed to make an election under section 2056(b)(7).

(ii) *Results after deemed owner's death*. On February 3, 1997, A dies and the portion of the trust assets attributable to A's contributions including the S stock contributed by A, is includible in A's gross estate under sections 2036 and 2038. During the administration of A's estate, the trust holds the S corporation stock. Under section 1361(c)(2)(B)(ii), A's estate is treated as the shareholder of the S corporation stock that was included in A's gross estate for purposes of section 1361(b)(1); however, for purposes of sections 1366, 1367, and 1368, the trust is treated as the shareholder. B's part of the trust continues to be a qualified subpart E trust of which B is the owner under sections 676 and 677. B, therefore, continues to be treated as the shareholder of the S corporation stock in that portion of the trust. On May 13, 1997, during the continuing administration of A's estate, the trust is divided into separate trusts in accordance with the terms of the trust instrument. The S corporation stock that was included in A's gross estate is distributed to the Marital Trust and to the Credit Shelter Trust. A's estate will cease to be treated as the shareholder of the S corporation under section 1361(c)(2)(B)(ii) on May 13, 1997 (the date on which the S corporation stock was transferred to the trusts). B, as the income beneficiary of the Marital Trust and the Credit Shelter Trust, must make the QSST election for each trust by July 28, 1997 (the end of the 16-day-and-2-month period beginning on the date the estate ceases to be treated as a shareholder) to have the trusts become permitted shareholders of the S corporation.

---

qualifies and becomes an electing QSST, the beneficiary and not the estate is treated as the shareholder as of the effective date of the QSST election, and the rules provided in paragraph (j)(7) of this section apply. If the trust qualifies and becomes an ESBT, the shareholders are determined under paragraphs (h)(3)(i)(F) and (h)(3)(ii) of this section as of the effective date of the ESBT election, and the rules provided in paragraph (m) of this section apply.

Reg. § 1.1361-1(k)(1), Example (2) illustrates how these rules might apply to a revocable trust that stays intact when the grantor dies and includes a variation where a beneficiary has an unlimited withdrawal right after the grantor's death[5908] (common in joint revocable trusts for small estates):

(i) *Qualified subpart E trust as shareholder*. In 1997, A, an individual established a trust and transferred to the trust A's shares of stock of Corporation M, an S corporation. A has the power to revoke the entire trust. The terms of the trust require that all income be paid to B and otherwise meet the requirements of a QSST under section 1361(d)(3). The trust will continue in existence after A's death. The trust is a qualified subpart E trust described in section 1361(c)(2)(A)(i) during A's life, and A (not the trust) is treated as the shareholder for purposes of sections 1361(b)(1), 1366, 1367, and 1368.

(ii) *Trust ceasing to be a qualified subpart E trust on deemed owner's death*. Assume the same facts as paragraph (i) of this Example 2, except that A dies without having exercised A's power to revoke. Upon A's death, the trust ceases to be a qualified subpart E trust described in section 1361(c)(2)(A)(i). A's estate (and not the trust) is treated as the shareholder for purposes of section 1361(b)(1). A's estate will cease to be treated as the shareholder for purposes of section 1361(b)(1) upon the earlier of the transfer of the Corporation M stock by the trust (other than to A's estate), the expiration of the 2-year period beginning on the day of A's death, or the effective date of a QSST or ESBT election if the trust qualifies as a QSST or ESBT. However, until that time, because the trust continues in existence after A's death and will receive any distributions with respect to the stock it holds, the trust is treated as the shareholder for purposes of sections 1366, 1367, and 1368. If no QSST or ESBT election is made effective upon the expiration of the 2-year period, the corporation ceases to be an S corporation, but the trust continues as the shareholder of a C corporation.

(iii) *Trust continuing to be a qualified subpart E trust on deemed owner's death*. Assume the same facts as paragraph (ii) of this Example 2, except that the terms of the trust also provide that if A does not exercise the power to revoke before A's death, B will have the sole power to withdraw all trust property at any time after A's death. The trust continues to qualify as a qualified subpart E trust after A's death because, upon A's death, B is deemed to be the owner of the entire trust under section 678. Because the trust does not cease to be a qualified subpart E trust upon A's death, B (and not A's estate) is treated as the shareholder for purposes of sections 1361(b)(1), 1366, 1367, and 1368. Since the trust qualifies as a QSST, B may make a protective QSST election under paragraph (j)(6)(iv) of this section.

Note that, if the grantor's gross estate (for federal estate tax purposes) might be subject to estate tax, it is common for the trustee to hold the S stock for more than two years after the grantor's death. This is done to avoid the trustee incurring personal liability under the tax laws, because a final determination of estate tax might not be made until after the two-year period has expired. Therefore, the trustee should consider making a Code § 645 election, as described in the preceding paragraph.

[5908] Part (iii) of the regulation allows a protective QSST election, which is helpful as described in fn 5966 in part III.A.3.e.i.(a) QSSTs Generally.

Suppose S corporation stock a trust held at its deemed owner's death was transferred upon that death to two trusts created by the agreement that created the original trust. Would those trusts be treated as continuations of the original grantor trust under Code § 1361(c)(2)(A)(ii)? Letter Ruling 201709016[5909] assumed, without explanation, that the answer is "yes." Given that trust law treats the new trusts as separate trusts and legal title was transferred from the original trust, the former grantor trust does not appear to have continued its existence as to the transferred shares, so I would not rely on that assumption when planning.

Even when keeping the S corporation stock in such a trust or estate is permitted, doing so might come at an income tax cost. If the S corporation does not distribute all of its income, part or all its income might be taxed at the highest rate.[5910] One might save significant annual income taxes by distributing the S corporation stock to one or more QSSTs, each of which is taxed at its beneficiary's income tax rate (without regard to how much cash the S corporation distributes),[5911] which might be significantly lower. However, if estate tax is or might be due, consider the risks that the executor takes in distributing property before estate tax is paid in full.[5912]

For additional cash flow issues relating to a trust that was a grantor trust before the deemed owner's death, see also part III.A.3.d Special Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests.

III.A.3.b.iii. A Trust with Respect to Stock Transferred to It Pursuant to The Terms of a Will (or a Qualified Revocable Trust When a Code § 645 Election Terminates), But Only for the 2-Year Period Beginning on The Day on Which Such Stock Is Transferred to It

Code § 1361(c)(2)(A)(iii). In such a case, the testator's estate is treated as an owner for purposes of the 100-shareholder limitation.[5913]

Reg. § 1.1361-1(h)(1)(iv), "Testamentary trusts, provides:

> A trust (other than a qualified subpart E trust, an electing QSST, or an electing small business trust) to which S corporation stock is-
>
> (A) Transferred pursuant to the terms of a will, but only for the 2-year period beginning on the day the stock is transferred to the trust except as otherwise provided in paragraph (h)(3)(i)(D) of this section; or
>
> (B) Transferred pursuant to the terms of an electing trust as defined in § 1.645-1(b)(2) during the election period as defined in § 1.645-1(b)(6), or deemed to be distributed at the close of the last day of the election period pursuant to § 1.645-1(h)(1), but in each case only for the 2-year period beginning on the day the stock is transferred or

[5909] In Letter Ruling 201709016, the two successor trusts qualified as QSSTs, but no QSST election was made within two years after the original deemed owner's death. The ruling allowed late QSST elections to be made, retroactive to two years after the original deemed owner's death.
[5910] See parts III.A.4 Trust Accounting Income Regarding Business Interests and III.F.2 Trust Accounting and Taxation.
[5911] See part III.A.3.e.i.(a) QSSTs Generally.
[5912] See generally III.B.3.c.iv Federal Estate Tax Liens.
[5913] Code § 1361(c)(2)(B)(iii).

> deemed distributed to the trust except as otherwise provided in paragraph (h)(3)(i)(D) of this section.

Thus, because a revocable trust that has made a Code § 645 election is treated as an estate, any transfer from that estate by reason of termination of the election or by bequest under that revocable trust is treated as transferred pursuant to the terms of a will. See part II.J.7 Code § 645 Election to Treat a Revocable Trust as an Estate.

Inadvertent termination relief has been granted for failure to make QSST elections for downstream trusts after the grace period expires.[5914] A special rule applies if a Code § 645 election terminates before the stock is distributed to the transferee trust. On the close of the last day of the election period, the combined electing trust and related estate, if there is an executor, or the electing trust, if there is no executor, is deemed to distribute the share (or shares, as determined under Code§ 663(c)) comprising the electing trust to a new trust in a distribution to which Code §§ 661 and 662 apply.[5915] The qualified revocable trust is an eligible shareholder for the 2-year period beginning on the day the stock is deemed distributed to the trust.[5916] Special rules apply for determining who is treated as the owner for purposes of the 100-shareholder limitation.[5917]

Reg. § 1.1361-1(k)(1), Example (3) provides:

> (i) *2-year rule under section 1361(c)(2)(A)(ii) and (iii)*. F owns stock of Corporation P, an S corporation. In addition, F is the deemed owner of a qualified subpart E trust that holds stock in Corporation O, an S corporation. F dies on July 1, 2003. The trust continues in existence after F's death but is no longer a qualified subpart E trust. On August 1, 2003, F's shares of stock in Corporation P are transferred to the trust pursuant to the terms of F's will. Because the stock of Corporation P was not held by the trust when F died, section 1361(c)(2)(A)(ii) does not apply with respect to that stock. Under section 1361(c)(2)(A)(iii), the last day on which the trust could be treated as a permitted shareholder of Corporation P is July 31, 2005 (that is, the last day of the 2-year period that begins on the date of the transfer from the estate to the trust). With respect to the shares of stock in Corporation O held by the trust at the time of F's death, section 1361(c)(2)(A)(ii) applies and the last day on which the trust could be treated as a permitted shareholder of Corporation O is June 30, 2005 (that is, the last day of the 2-year period that begins on the date of F's death).

[5914] Letter Rulings 202004002, 202004003, and 202004004.

[5915] Reg. § 1.645-1(h)(1).

[5916] Reg. § 1.1361-1(h)(1)(iv)(B).

[5917] Reg. § 1.1361-1(h)(3)(i)(D) provides:

> If stock is transferred or deemed distributed to a testamentary trust described in paragraph (h)(1)(iv) of this section (other than a qualified subpart E trust, an electing QSST, or an ESBT), the estate of the testator is treated as the shareholder until the earlier of the transfer of that stock by the trust or the expiration of the 2-year period beginning on the day that the stock is transferred or deemed distributed to the trust. If the trust qualifies and becomes an electing QSST, the beneficiary and not the estate is treated as the shareholder as of the effective date of the QSST election, and the rules provided in paragraph (j)(7) of this section apply. If the trust qualifies and becomes an ESBT, the shareholders are determined under paragraphs (h)(3)(i)(F) and (h)(3)(ii) of this section as of the effective date of the ESBT election, and the rules provided in paragraph (m) of this section apply.

(ii) *Section 645 electing trust and successor trust*. Assume the same facts as in paragraph (i) of this Example 3, except that F's trust is a qualified revocable trust for which a valid section 645 election is made on October 1, 2003 (electing trust). Because under section 645 the electing trust is treated and taxed for purposes of subtitle A of the Code as part of F's estate, the trust may continue to hold the O stock pursuant to § 1361(b)(1)(B), without causing the termination of Corporation O's S election, for the duration of the section 645 election period. However, on January 1, 2004, during the election period, the shares of stock in Corporation O are transferred pursuant to the terms of the electing trust to a successor trust. Because the successor trust satisfies the definition of a testamentary trust under paragraph (h)(1)(iv) of this section, the successor trust is a permitted shareholder until the earlier of the expiration of the 2-year period beginning on January 1, 2004, or the effective date of a QSST or ESBT election for the successor trust.

III.A.3.b.iv. A Trust Created Primarily to Exercise the Voting Power of Stock Transferred to It

Code § 1361(c)(2)(A)(iv). In such a case, each beneficiary of the voting trust is treated as the owner for purposes of the 100-shareholder limitation.[5918]

To qualify as a voting trust, the beneficial owners must be treated as the owners of their respective portions of the trust under the grantor trust rules, and the trust must have been created pursuant to a written trust agreement entered into by the shareholders, that:[5919]

(A) Delegates to one or more trustees the right to vote;

(B) Requires all distributions with respect to the stock of the corporation held by the trust to be paid to, or on behalf of, the beneficial owners of that stock;

(C) Requires title and possession of that stock to be delivered to those beneficial owners upon termination of the trust; and

(D) Terminates, under its terms or by state law, on or before a specific date or event.[5920]

Let's explore the requirement that the beneficial owners be treated as the owners of their respective portions of the trust under the grantor trust rules.[5921] This is automatic for the settlors of the trust,[5922] but not automatic when the settlors transfer their beneficial interests (voting trust certificates) to others. One treatise suggests making the beneficiaries entitled to distributions, but that might not satisfy the requirement that the trust agreement require payment of distributions to the beneficiaries; therefore, one might consider giving the beneficiaries the right

[5918] Code § 1361(c)(2)(B)(iv).
[5919] Reg. § 1.1361-1(h)(1)(v).
[5920] I am not aware of any authoritative interpretation of on or before a specific date or event. Presumably the trust might provide that the trust terminates when it holds no voting stock or perhaps when each individual in a named list of people has died.
[5921] Reg. § 1.1361-1(h)(1)(v)(C). If the beneficiary originally transferred the stock to the trust, then it is a grantor trust under Code § 677. Otherwise, the trust needs to qualify as an investment trust; see part II.D.4.a Investment Trusts, which also describes the income tax consequences when a voting trust that is an investment trust sells stock. This regulation was adopted by TD 8600 (7/20/1995). For the IRS' interpretation before then, see Letter Ruling 9344020.
[5922] Code § 677(a) combined with Reg. § 1.1361-1(h)(1)(v)(B).

to withdraw any distributions the trust receives from the S corporation, followed by a requirement that the trustee pay to the beneficiaries any such distributions.[5923] It has also been suggested that the voting trust might qualify as an investment trust, in which case a transferee would be treated as a grantor and therefore the trust would automatically qualify.[5924]

III.A.3.b.v. An Electing Small Business Trust (ESBT)

Code § 1361(c)(2)(A)(v). In such a case, each potential current beneficiary of the trust is treated as the owner for purposes of the 100-shareholder limitation.[5925] The 100-shareholder limitation is made less severe by a family attribution rule, treating a person, his or her spouse, and his or her descendants as one shareholder.[5926] A charitable remainder trust cannot own stock in an S corporation, so an electing small business trust (ESBT) election would not help it; instead, consider donating the stock to a charity in exchange for a charitable gift annuity, after

---

[5923] When the beneficiary has the right to withdraw such distributions, Code § 678(a)(1) would treat the beneficiary as the owner. After that withdrawal right has lapsed, the IRS' Letter Ruling position would support a position that Code §§ 678(a)(2) and 677(a) would treat the beneficiary as the owner.

[5924] See part II.D.4.a Investment Trust. Letter Ruling 201226019 approved this approach, holding:

1. During the lives of A and B and after their deaths, Voting Trust will be classified as an investment trust under § 301.7701-4(c) for U.S. federal income tax purposes.
2. During the lives of A and B (assuming they are the only holders of the Certificates during their lives), Voting Trust will be considered a qualified voting trust under § 1361(c)(2)(A)(iv) and § 1.1361-1(h)(1)(v). Accordingly, Voting Trust will be a permitted S corporation shareholder. If, during their lives, A or B transfer all or a portion of their Certificates to a transferee that is a permitted S corporation shareholder, the transferee will be treated as a successor grantor of the Voting Trust. Therefore,
    - (i) Voting Trust will continue to be a voting trust described in § 1361(c)(2)(A)(iv) and a permitted S corporation shareholder, and
    - (ii) the Certificate holders will include in their gross income and report their proportionate share of the S corporation income that is allocated to the Company shares held by the Voting Trust.
3. After the death of A or B, when the executor of their respective Wills (the Executor) holds the Certificates held by A or B, as applicable, prior to their deaths, A's and B's respective estates (if the period during which such estates hold the Certificates does not exceed the period actually required to fully administer the estates as described in § 1.641(b)-3(a)) will be treated as successor grantors of the Voting Trust. After the Executor distributes the Certificates held by A or B in accordance with the terms and provisions of their estate planning documents, as applicable, such transferees of the Certificates will be treated as successor grantors of their portions of the Voting Trust. Therefore,
    - (i) Trust will continue to be a voting trust described in § 1361(c)(2)(A)(iv) and a permitted S corporation shareholder, and
    - (ii) the Certificate holders will include in their gross income and report their proportionate share of the S corporation income that is allocated to the Company shares held by the Voting Trust.

The Reg. § 1.641(b)-3 trust termination rule is described in the text accompanying fn 2563 in part II.J.3.i Planning for Excess Losses, describing excess losses allowed to a beneficiary on termination of a trust. Reg. § 1.641(b)-3(a) is reproduced after fn 2732 in part II.J.8.

[5925] Code § 1361(c)(2)(B)(v) applied in Reg. § 1.1361-1(m)(4)(vii). The 2017 tax reform act amended Code § 1361(c)(2)(B)(v) to make it not apply for purposes of Code § 1361(b)(1)(C), the latter which does not allow an S corporation to "have a nonresident alien as a shareholder." Thus, an ESBT may have a nonresident alien as a beneficiary, which makes sense because the trust is paying tax at the highest possible rate, notwithstanding having such a beneficiary. See part II.A.2.f Shareholders Eligible to Hold S Corporation Stock, especially fns 140-136.

[5926] Family attribution rules ameliorate the 100-shareholder limitation. See fn 160 in part II.A.2.f Shareholders Eligible to Hold S Corporation Stock.

considering unrelated business taxable income issues.[5927] For details about ESBTs, see part III.A.3.e.ii Electing Small Business Trusts (ESBTs, which is found in part III.A.3.e QSSTs and ESBTs.

III.A.3.b.vi. Retirement Plans

Retirement plans are trusts, so let's discuss those for a moment. First, IRAs are qualified under Code § 408, not § 401(a). Therefore, IRAs are not eligible shareholders, as they are not trusts that qualify under these rules.[5928] Second, qualified retirement plans are eligible shareholders[5929] but are taxed on unrelated business taxable income,[5930] including ***all*** income from S corporations, whether or not it normally constitutes unrelated business income.[5931] However, employee stock ownership plans (ESOPs) are not subject to this tax.[5932] Furthermore, transitory ownership by an IRA of S corporation stock rolled over from an IRA will not terminate the S election.[5933]

III.A.3.b.vii. Charitable Trusts

Charities are permitted shareholders.[5934] The S corporation's business activities are not attributable to the charity in determining the nature of the charity's activities, which means that a lot of S corporation business income does not destroy the charity's otherwise exempt status.[5935]

5927 See part II.Q.7.c S Corporation Owned by a Trust Benefitting Charity.
5928 Reg. § 1.1361-1(h)(1)(vii), which became final on August 13, 2008, provides that individual retirement accounts (including Roth IRAs) are not eligible S corporation shareholders, unless they satisfy the exception created in Code § 1361(c)(2)(A)(vi) for bank stock that was held by the IRA as of October 22, 2004. That regulation is extremely unlikely to be challenged as, for various reasons, a reviewed opinion of the Tax Court concluded that IRAs, including Roth IRAs, were not eligible shareholders before that regulation was promulgated. *Taproot Administrative Services, Inc. v. Commissioner*, 133 T.C. 202.
5929 Code § 1361(c)(6)(A), referring to organizations described in Code § 401(a).
5930 Code § 511(a)(1), 501(a).
5931 Code § 512(e)(1).
5932 Code § 512(e)(3).
5933 Rev. Proc. 20014, Section 4 provides:

> The Service will accept the position that an S corporation's election is not affected as a result of an ESOP's distribution of S corporation stock where the participant directs that such stock be distributed to an IRA in a direct rollover, provided that:
>
> .01. The terms of the ESOP require that the S corporation repurchase the stock immediately upon the ESOP's distribution of the stock to an IRA;
>
> .02. Either, pursuant to the terms of the ESOP, the S corporation actually repurchases the S corporation stock contemporaneously with, and effective on the same day as, the distribution, or, pursuant to the terms of the ESOP, the ESOP is permitted to assume the rights and obligations of the S corporation to repurchase the S corporation stock immediately upon the ESOP's distribution of the stock to an IRA and the ESOP actually repurchases the S corporation stock contemporaneously with, and effective on the same day as, the distribution; and
>
> .03. No income (including tax-exempt income), loss, deduction, or credit attributable to the distributed S corporation stock under § 1366 is allocated to the participant's IRA.

5934 Code § 1361(c)(6) provides that an organization, which not only is described in Code § 401(a) or 501(c)(3) but also is exempt from taxation under Code § 501(a), may be a shareholder in an S corporation.
5935 Letter Ruling 201441018.

However, a charitable remainder trust is not a permitted shareholder. See part II.Q.7.c S Corporation Owned by a Trust Benefitting Charity for that[5936] and other nuances.

III.A.3.b.viii. Observations About Trusts as S Corporation Shareholders

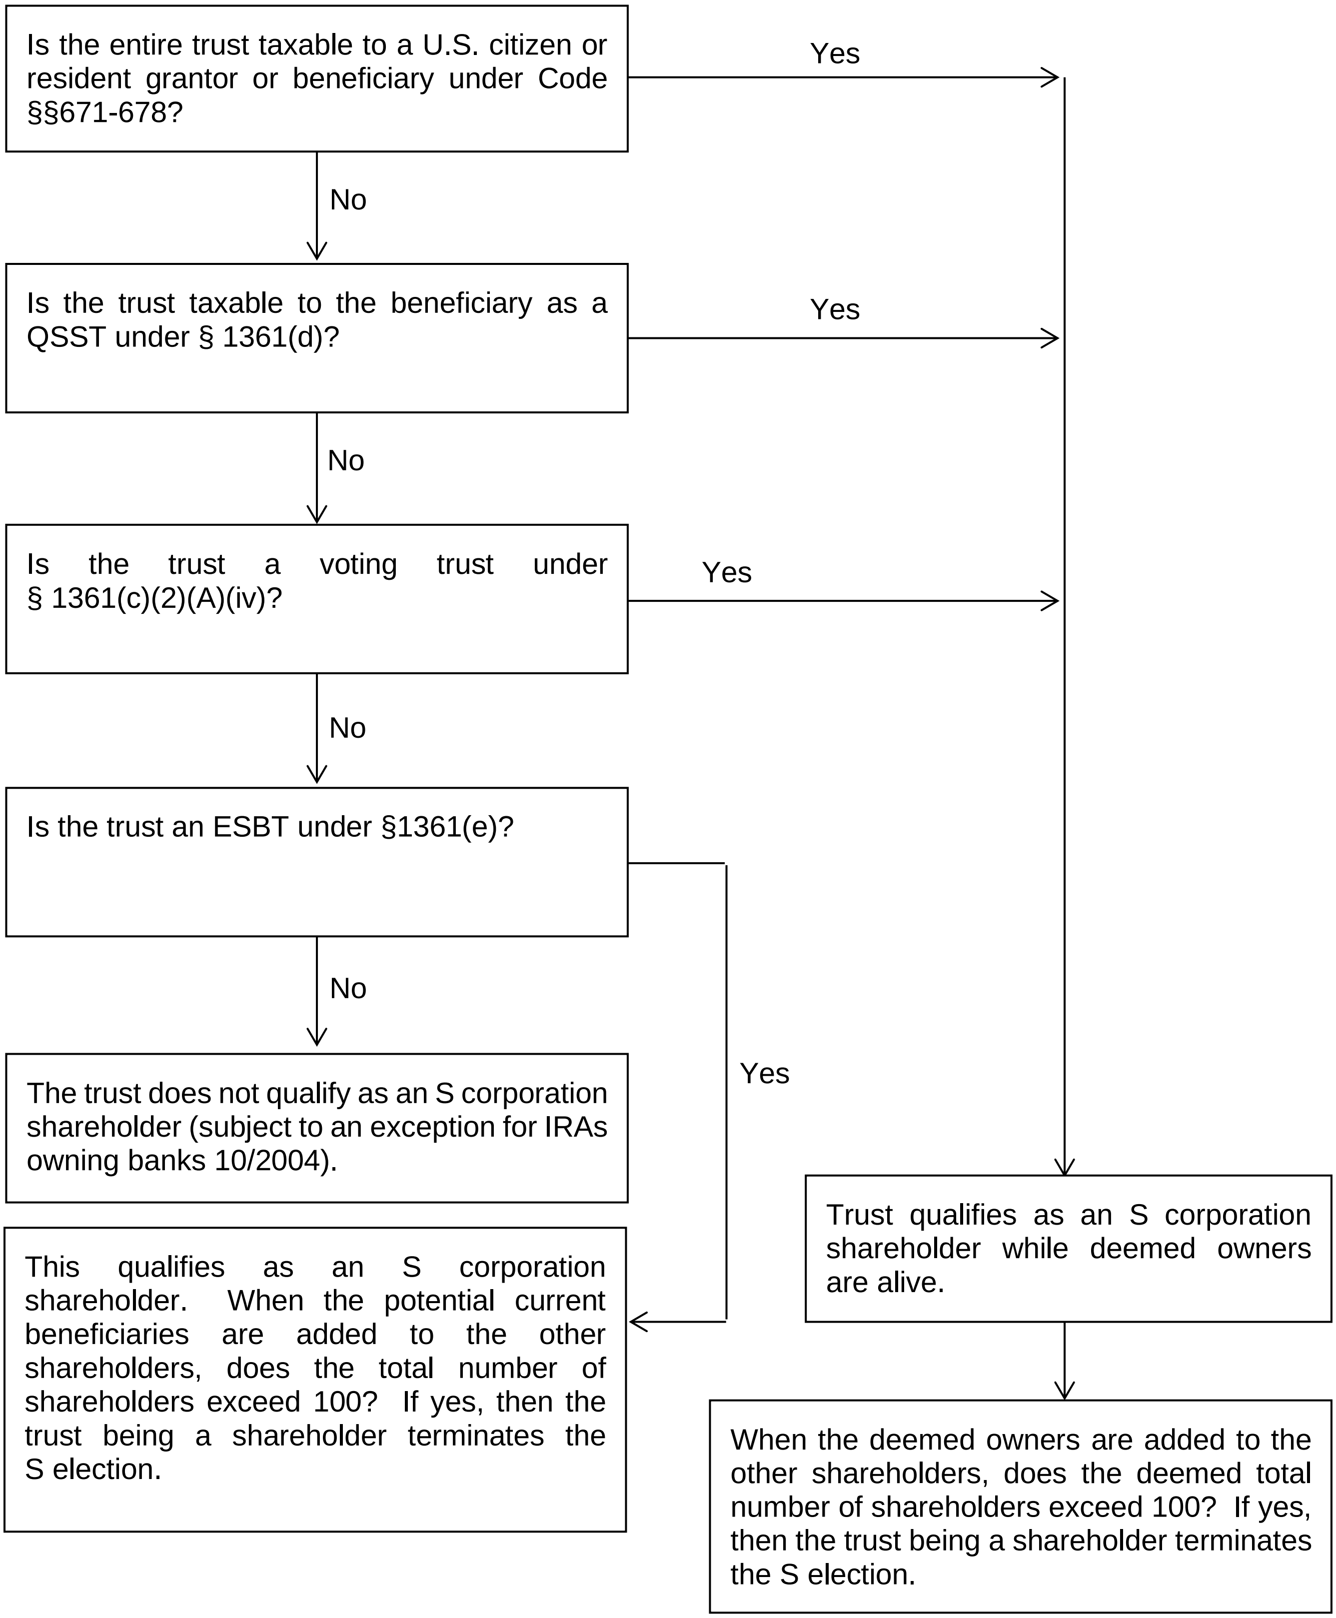
The shareholder agreement does not need to specify these trusts, as the reference to causing the corporation not to be a "small business corporation" as defined in Code § 1361(b)(1) should be sufficient to limit which kinds of trusts may be owners without going into all the detail described above. However, when preparing shareholders' estate plans, make sure the beneficiaries of the estate plans qualify.

III.A.3.c. Deadlines for Trust Qualifying as S Corporation Shareholder

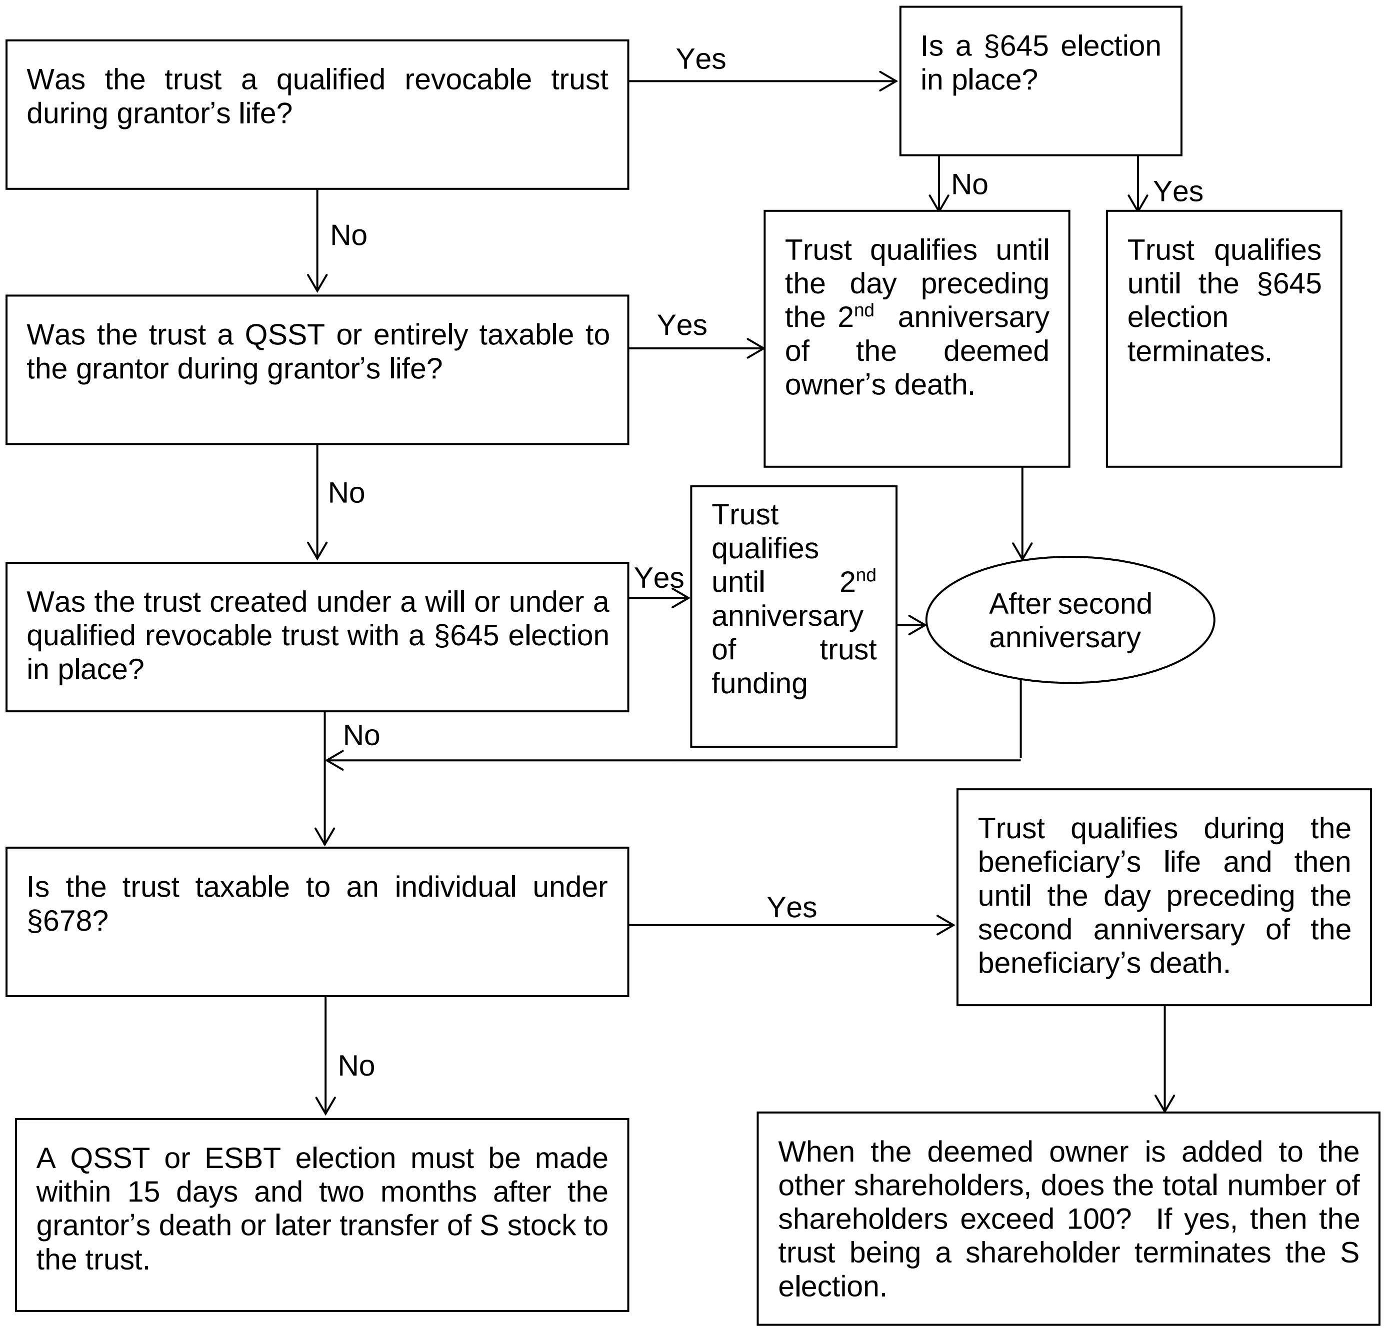
Below are some flowcharts illustrating trust qualification as a shareholder of an S corporation. The flowcharts do not consider trusts that are tax-exempt.

[5936] See fn 4908.

III.A.3.c.i. Flowchart of Inter Vivos Trusts (Trusts Created while Grantor is Alive)



III.A.3.c.ii. Flowchart of Testamentary Trusts (Trusts Created on Grantor's Death or Continued after QSST Beneficiary's Death)



III.A.3.c.iii. Deadlines for QSST and ESBT Elections

III.A.3.c.iii.(a). General Description of Deadlines for QSST and ESBT Elections

A separate QSST election must be made with respect to each S corporation in which the trust owns stock.[5937] Although initially an ESBT election needs to be filed at every IRS Service Center that receives the returns of the S corporations the trust owns, no future ESBT elections are required when the trust acquires stock in another S corporation.[5938]

The beneficiary must make a QSST election no later than fifteen days and two months after the trust received the stock.[5939] The trustee of an ESBT must file the ESBT election within the same time framework.[5940] If the trust is a wholly owned grantor trust or meets some other exception allowing it to be an eligible shareholder,[5941] the deadline would be based on whenever the election's effective date is required[5942] or desired. If the trust is already an eligible shareholder and the QSST or ESBT election is made with an effective date that is later than when the trust first acquired the stock, when drafting the QSST or ESBT election I generally include the fact of that qualification when I say when the trust first acquired the stock, so that any IRS reviewer of the election will see that there does not appear to be any time gap in the trust's eligibility as a shareholder.

If an ESBT or QSST election is made late or is in some manner defective, the S corporation status can be retroactively reinstated if the termination or invalidity was inadvertent, within a reasonable period of time after discovery of the terminating event or invalid election steps were taken to rectify the situation, and the corporation and shareholders agree to adjustments that the IRS may require for the period.[5943] If a trust fails to make an ESBT election and fails to file tax returns consistent with the ESBT election, the corporation and each of its shareholders must

[5937] Reg. § 1.1361-1(j)(6)(i).
[5938] Reg § 1.1361-1(m)(2)(i).
[5939] Reg. § 1.1361-1(j)(6)(ii)(C). A QSST election by a person who is under a legal disability by reason of age may be made on that person's behalf by that person's guardian or other legal representative, or if there be none, by that person's natural or adoptive parent. Reg. § 1.1361-1(j)(6)(i).
[5940] Reg. § 1.1361-1(m)(3)(i) provides that trust is an ESBT on the effective date of the ESBT election.
[5941] See part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation.
[5942] For example, Reg. § 1.1361-1(j)(6)(iii)(C) provides:

> If a trust ceases to be a qualified subpart E trust, satisfies the requirements of a QSST, and intends to become a QSST, the QSST election must be filed within the 16-day-and-2-month period beginning on the date on which the trust ceases to be a qualified subpart E trust. If the estate of the deemed owner of the trust is treated as the shareholder under paragraph (h)(3)(i) of this section, the QSST election may be filed at any time, but no later than the end of the 16-day-and-2-month period beginning on the date on which the estate of the deemed owner ceases to be treated as a shareholder.

As a further example, Reg. § 1.1361-1(j)(6)(iii)(D) provides:

> If a testamentary trust is a permitted shareholder under paragraph (h)(1)(iv) of this section, satisfies the requirements of a QSST, and intends to become a QSST, the QSST election may be filed at any time, but no later than the end of the 16-day-and-2-month period beginning on the day after the end of the 2-year period.

For Reg. § 1.1361-1(h)(1)(iv), see part III.A.3.b.iii A Trust with Respect to Stock Transferred to It Pursuant to The Terms of a Will (or a Qualified Revocable Trust When a Code § 645 Election Terminates), But Only for the 2-Year Period Beginning on The Day on Which Such Stock Is Transferred to It.
[5943] Reg. § 1.1362-4(a). Among the many private letter rulings providing relief for a late ESBT election is Letter Ruling 202234003, involving multiple failures.

file any original and amended returns for all open taxable years consistent with the inadvertent termination relief.[5944]

The corporation and all persons who were shareholders of the corporation at any time during the period must consent to make to any adjustments that the IRS may require.[5945] Each consent should be in the form of a statement agreeing to make the adjustments:[5946]

- The statement must be signed by the shareholder and corporation.
- A shareholder's consent statement should include the name, address, and taxpayer identification numbers of the corporation and shareholder, the number of shares of stock owned by the shareholder, and the dates on which the shareholder owned any stock.
- The corporate consent statement should include the name, address, and taxpayer identification numbers of the corporation and each shareholder.

A late ESBT or QSST election may be made within 3 years and 75 days after the effective date of the election, without the $30,000 fee generally required for letter rulings under Code § 9100, illustrated by the following chart provided by the IRS:[5947]

Retroactive reinstatement is required to prevent the accumulated adjustments account (AAA) from being wiped out.[5948]

For the statute authorizing relief and the importance of provisions in a shareholders' agreement ensuring that this relief would be available, see part II.A.2.h Important Protections for S Corporation Shareholder Agreements.

[5944] Letter Ruling 201943018.

[5945] Reg. § 1.1362-4(e). However, if relief under Rev. Proc. 2013-30 applies, Section 6.01(4) of that procedure requires:

> Statements from all shareholders during the period between the date the S corporation election was to have become effective or was terminated and the date the completed Election Form is filed that they have reported their income on all affected returns consistent with the S corporation election for the year the election should have been made and for all subsequent years.

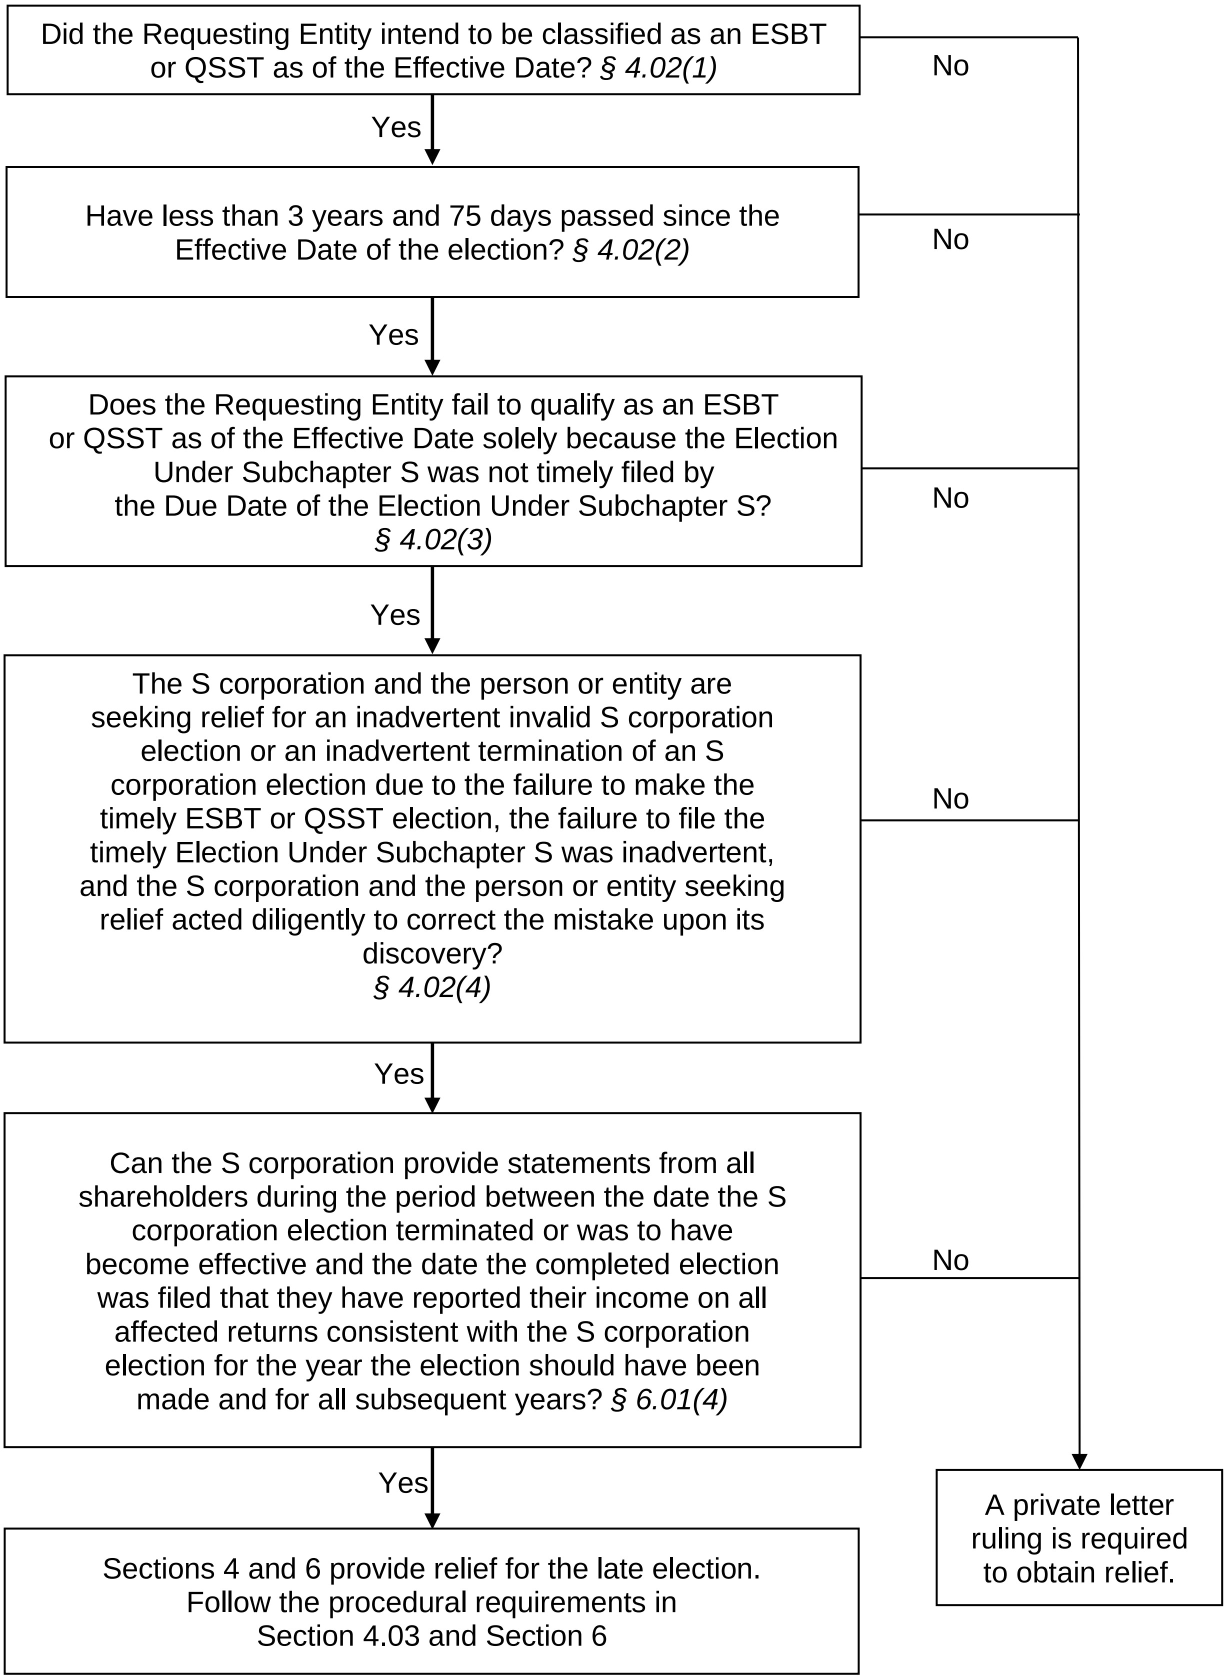
Presumably, these statements are in lieu of consenting to adjustments. One might consider supplementing the statements by agreeing to make adjustments as required by Reg. § 1.1362-4(e), but supplementing the statements does not appear to be required. The relevant IRS web page is https://www.irs.gov/businesses/small-businesses-self-employed/late-election-relief.

[5946] Reg. § 1.1362-4(e).

[5947] Rev. Proc. 2013-30, modifying and superseding Rev. Procs. 2003-43, 2004-48, and 2007-62. One might consider checking the most recent annual Revenue Procedure for issuing letter rulings, the successor to Rev. Proc. 2020-1, for any updates to user fees and to verify the status of Rev. Proc. 2013-30. Also, some taxpayers might qualify for reduced user fees. The relevant IRS web page is https://www.irs.gov/businesses/small-businesses-self-employed/late-election-relief.

[5948] For AAA's importance, see part II.Q.7.b Redemptions or Distributions Involving S Corporations. For the idea that termination of the S election wipes out AAA, see part II.P.3.b.v Conversion from S Corporation to C Corporation then Back to S Corporation.

III.A.3.c.iii.(b). Flowchart Showing Relief for Late QSST & ESBT Elections



III.A.3.d. Special Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests

III.A.3.d.i. Various Fiduciary Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests

Regarding basis step-up issues regarding S corporation stock, see fn 2082 in part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

If one bequeaths S corporation stock, consider expressly providing that any distributions with respect to that stock are to be passed on to the beneficiary receiving that stock. Not only does such a provision ensure fairness if the trust/estate administration lasts any significant amount of time, but it also prevents a potentially unfair tax result from occurring, as described below.

A bequest of a partnership interest or S corporation stock that is "ascertainable under the terms of a testator's will as of the date of his death, or under the terms of an inter vivos trust instrument as of the date of the inception of the trust" is a specific bequest that does not count as a distribution that carries with it distributable net income;[5949] the "date of the inception" rule means that the exercise of an inter vivos limited power of appointment does not fall within this exception. On the other hand, income allocated to a beneficiary *does* count a distribution that carries with it distributable net income.[5950] The bequest of the partnership interest or S corporation stock does not constitute a separate share, but distributions bequeathed to the recipient of that business interest *do* constitute a separate share.[5951] See part II.J.9.a.ii Separate Share Rule.

See parts III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation (especially part III.B.2.j.ii.(e) Change in Qualification of Trust to Hold S corporation Stock During Taxable Year) and III.B.2.j.iii Allocations upon Change of Interest in a Partnership.

The distributive share of partnership or S corporation income that does not constitute trust accounting income:[5952]

> is allocated among the separate shares that could potentially be funded with these amounts irrespective of whether the share is entitled to receive any income under the terms of the governing instrument or applicable local law. The amount of such gross income allocated to each share is based on the relative value of each share that could potentially be funded with such amounts.

[5949] Reg. § 1.663(a)-1(b)(1), delineating items that qualify for the exclusion under Reg. § 1.663(a)-1(a). See Reg. § 1.663(a)-1(b)(3), Example (1).

[5950] Reg. § 1.663(a)-1(b)(2)(i), defining items that do not qualify for the exclusion under Reg. § 1.663(a)-1(a).

[5951] Reg. § 1.663(c)-5, Example (8). Reg. § 1.663(c)-4(a) provides:

> Separate shares include… the income on bequeathed property if the recipient of the specific bequest is entitled to such income …. Conversely, a gift or bequest … of property as defined in section 663(a)(1) is not a separate share.

[5952] Reg. § 1.663(c)-2(b)(4), which applies to:

> the allocation of the portion of gross income includible in distributable net income that is not attributable to cash received by the estate or trust (for example, original issue discount, a distributive share of partnership tax items, and the pro rata share of an S corporation's tax items).

Tying together the separate share rules[5953] with the above rules regarding distributive shares of partnership or S corporation income, one can distill the following rules:[5954]

- DNI equal to undistributed income is allocated among the separate shares according to the amount of income to which each share is entitled.

- DNI equal to distributions from an S corporation or partnership constituting trust accounting income is allocated among the separate shares according to the amount of income to which each share is entitled.[5955] DNI equal to distributions from an S corporation or partnership not

---

[5953] See generally part II.J.9.a.ii Separate Share Rule.

[5954] Reg. § 1.663(c)-5, Examples (4) and (5) provide:

Example 4. (i) *Facts*. Testator, who dies in 2000, is survived by a spouse and one child. Testator's will provides for a pecuniary formula bequest to be paid in not more than three installments to a trust for the benefit of the child of the largest amount that can pass free of Federal estate tax and a bequest of the residuary to the surviving spouse. The will provides that the bequest to the child's trust is not entitled to any of the estate's income and does not participate in appreciation or depreciation in estate assets. During the 2000 taxable year, the estate receives dividend income of $200,000 and pays expenses of $15,000 that are deductible on the estate's federal income tax return. The executor partially funds the child's trust by distributing to it securities that have an adjusted basis to the estate of $350,000 and a fair market value of $380,000 on the date of distribution. As a result of this distribution, the estate realizes long-term capital gain of $30,000.

(ii) *Conclusion*. The estate has two separate shares consisting of a formula pecuniary bequest to the child's trust and a residuary bequest to the surviving spouse. Because, under the terms of the will, no estate income is allocated to the bequest to the child's trust, the distributable net income for that trust's share is zero. Therefore, with respect to the $380,000 distribution to the child's trust, the estate is allowed no deduction under section 661, and no amount is included in the trust's gross income under section 662. Because no distributions were made to the spouse, there is no need to compute the distributable net income allocable to the marital share. The taxable income of the estate for the 2000 taxable year is $214,400 ($200,000 (dividend income) plus $30,000 (capital gain) minus $15,000 (expenses) and minus $600 (personal exemption)).

Example 5. The facts are the same as in Example 4, except that during 2000 the estate reports on its federal income tax return a pro rata share of an S corporation's tax items and a distributive share of a partnership's tax items allocated on Form K-1s to the estate by the S corporation and by the partnership, respectively. Because, under the terms of the will, no estate income from the S corporation or the partnership would be allocated to the pecuniary bequest to child's trust, none of the tax items attributable to the S corporation stock or the partnership interest is allocated to the trust's separate share. Therefore, with respect to the $380,000 distribution to the trust, the estate is allowed no deduction under section 661, and no amount is included in the trust's gross income under section 662.

Example 6. The facts are the same as in Example 4, except that during 2000 the estate receives a distribution of $900,000 from the decedent's individual retirement account that is included in the estate's gross income as income in respect of a decedent under section 691(a). The entire $900,000 is allocated to corpus under applicable local law. Both the separate share for the child's trust and the separate share for the surviving spouse may potentially be funded with the proceeds from the individual retirement account. Therefore, a portion of the $900,000 gross income must be allocated to the trust's separate share. The amount allocated to the trust's share must be based upon the relative values of the two separate shares using a reasonable and equitable method. The estate is entitled to a deduction under section 661 for the portion of the $900,000 properly allocated to the trust's separate share, and the trust must include this amount in income under section 662.

[5955] Reg. § 1.663(c)-2(b)(2) provides that:

constituting trust accounting income would be allocated to each share according to "its portion of gross income that is includible in distributable net income and its portion of any applicable deductions or losses."[5956] Note that distributions from an S corporation or partnership that do not constitute trust accounting income but constitute gross income would constitute DNI only if they are (a) not from the sale of a capital asset,[5957] or (b) from the sale of a capital asset but satisfy the rules for including capital gain in DNI.[5958]

- Note that the amounts deducted by the trust or estate and included in the beneficiary's income are the lesser of the beneficiary's allocable share of DNI and the amount actually distributed.[5959] If and to the extent that the trust or estate does not make distributions (or is not required to make) to the beneficiary attributable to DNI, the distributive shares of partnership or S corporation income are trapped inside the trust or estate to the extent not distributed (or required to be made). Thus, the estate or trust is taxed on that income, even though the recipient of the specific bequest ultimately benefits from the undistributed income.

However, practical logistics might suggest not allocating distributions to the recipient of the specific bequest. It is not unusual for tax distributions to be made after yearend. For example, A dies January 31, 2016. The partnership or S corporation makes distributions April 1, 2016 to the owners to pay taxes incurred with respect to 2015 income. A's estate or revocable trust will need that cash to pay its 2015 tax that is due April 15, 2016. Therefore, if A's estate plan bequeathed the partnership or S corporation to B, B should be allocated all of the distributions with respect to the partnership or S corporation, other than distributions relating to 2015 tax and other than distributions relating to tax on income earned between January 1, 2016 and January 31, 2016. Furthermore, these distributions might also draw an allocation of DNI. Thus, consider a clause along these lines (after further thought if the specific bequest is to a QTIP trust):[5960]

> If any partnership interest or stock in any S corporation is specifically allocated to one or more persons, the person(s) entitled to the allocation shall also be entitled to any distributions from the date of the allocation until the date the partnership interest or stock is distributed; however, any distributions that were intended for the payment of tax imposed on taxable items with respect to periods before the event that caused that allocation shall be paid to the person reporting those items.

Also note that state corporate law might not permit distributions to use record dates (determining who is the shareholder of record) more than a certain number of days before the distribution. For example, Missouri law does not allow a corporation to make a distribution with

---

> gross income includible in distributable net income that is income within the meaning of section 643(b) … is allocated among the separate shares in accordance with the amount of income that each share is entitled to under the terms of the governing instrument or applicable local law.

For income under Code § 643(b), see part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law; although focused on capital gain, it discusses Code § 643(b) generally as well.

[5956] Reg. § 1.663(c)-2(b)(1).

[5957] See part II.J.8.a Capital Gain Constitutes DNI Unless Excluded.

[5958] See part II.J.8.c.ii Consistent Principal Rule: Capital Gain Allocated to Corpus but Treated Consistently as Part of a Distribution to a Beneficiary.

[5959] See part II.J.9.a.ii Separate Share Rule, especially the text accompanying fns. 2863-2865.

[5960] If the specific bequest is to a QTIP trust and income otherwise payable to the QTIP trust is diverted, query whether that violates the requirement that QTIP exclusively benefit the surviving spouse.

a record date more than 70 days before the date of distribution.[5961] If these statutes apply, one might consider declaring a distribution in the form of a promissory note, the principal of which is any taxes, interest, and penalties imposed on the shareholders by reason of any examination of any prior year returns. This method might also be needed for taxes during the current year, depending on whether the tax laws allow the corporation to close its books as of the date of death. One might also consider converting the corporation into an LLC taxed as an S corporation using a tax-free reorganization,[5962] because LLC laws might not impose such a requirement.

III.A.3.d.ii. Bequeathing S Corporation Stock to or from QSSTs – Special Fiduciary Income Tax Issues

If the terminating trust is a QSST,[5963] coordinate these concerns with those found in part III.A.3.e.i.(b) QSST Issues When Beneficiary Dies, which also includes a reference to marital deduction issues relating to the payment of income.[5964]

If the trust terminates in favor of one or more QSSTs, consider whether, during post-mortem administration, part or all of the income might be trapped inside the trust at high income tax rates if the S corporation does not distribute all of the income shown on the K-1 that the corporation issues the trust.[5965] A similar issue arises for partnerships, which may be placed into one or more S corporations using a QSST strategy. Quickly funding the QSST(s) may tax the income at the beneficiary's rate instead of the trust's rate; see part III.A.4.a General Strategies Regarding Fiduciary Income Taxation of Business Interests.

III.A.3.e. QSSTs and ESBTs

III.A.3.e.i. QSSTs

After reviewing a variety of QSST issues that apply during the beneficiary's life, see part III.A.3.e.i.(b) QSST Issues When Beneficiary Dies, for a discussion of various issues one should consider when a beneficiary makes a QSST election.

III.A.3.e.i.(a). QSSTs Generally

After determining a trust's eligibility for its beneficiary to make a "qualified subchapter S trust" (QSST) election, see part III.A.3.c.iii Deadlines for QSST and ESBT Elections. A beneficiary may make a protective QSST election.[5966]

5961 R.S.Mo. § 351.250.
5962 See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization.
5963 See part III.A.3.e.i QSSTs.
5964 See fn. 6006.
5965 See part III.A.4 Trust Accounting Income Regarding Business Interests, as well as parts II.J.11 Trust Business Income Tax Nuances and III.A.3.e QSSTs and ESBTs.
5966 See Reg. § 1.1361-1(k)(1), Example (2), part (iii), reproduced in the text accompanying fn 5908 in part III.A.3.b.ii A Trust That Was a Grantor Trust with Respect to All of Its Assets Immediately Before the Death of The Deemed Owner and Which Continues in Existence After Such Death.

A QSST may have only one beneficiary (who also must be a U.S. citizen or resident) who may receive income or corpus during the beneficiary's lifetime, and all of its income must be distributed currently to that beneficiary[5967] while the trust[5968] holds S stock.[5969]

The only-one-beneficiary rule is in Code § 1361(d)(3)(A) and Reg. § 1.1361-1(j)(1)(ii), (iii). A trust cannot qualify as a QSST if it provides that, if the trust does not hold shares of an S corporation, the trust may terminate during the life of the current income beneficiary and distribute its corpus to persons other than the current income beneficiary. Rev. Rul. 89-55. Consistent with this limitation, Reg. § 1.1361-1(j)(2)(iii) restricts powers of appointment:

> If, under the terms of the trust, a person (including the income beneficiary) has a special power to appoint, during the life of the income beneficiary, trust income or corpus to any person other than the current income beneficiary, the trust will not qualify as a QSST. However, if the power of appointment results in the grantor being treated as the owner of the entire trust under the rules of subpart E, the trust may be a permitted shareholder under section 1361(c)(2)(A)(i) and paragraph (h)(1)(i) of this section.

Note, however, that failure to make a trust a spendthrift trust (and therefore allowing the beneficiary's interest to be assignable) will not disqualify the trust as a QSST unless it gets assigned (and then it might or might not disqualify the trust).[5970] On the other hand, Letter

---

[5967] Code § 1361(d)(3). Letter Ruling 9014008 ruled that a distribution to a grantor trust created by the beneficiary would not qualify, but Letter Rulings 9442036, 9444022, 9444024, and 9444059 permitted distributions to a disability trust because the beneficiary did not have legal capacity, and Letter Rulings 8831020, 9001010, and 9140055 approved distributions to custodial accounts under the Uniform Transfers to Minors Act (the latter also approved distributions to "a court-appointed guardian or conservator of the beneficiary"). This requirement does not preclude secured sales in which all income is used to buy the stock (part III.A.3.e.vi.(c) Required Structure for a Sale to a QSST (Including Possible Pitfalls)), nor does it prevent the trust from agreeing to make payments to a third party if stock the trust bought is resold within a certain number of years after the trust's purchase (Letter Ruling 200140040).

[5968] In Letter Ruling 200404037, the IRS accepted the representation that applicable state law deemed a life estate, with the power to sell, to be a trust relationship between the life tenant and the remaindermen and that the deemed trust satisfies the requirements for treatment as a QSST. Letter Ruling 200247030 elaborated on the basis for this deemed trust treatment:

> It is represented that under State law, a life tenant, with the power to sell or dispose of property devised to him or her for life with remainder to designated persons, is a trustee or quasi trustee and occupies a fiduciary relationship to the remaindermen. In the exercise of that power, the life tenant owes to the remaindermen the highest duty to act honorably and in good faith. A life tenant is a trustee in the sense that he cannot injure or dispose of property to the injury of the rights of the remaindermen, but differs from a pure trustee in that he may use property for his exclusive benefit and take all income and profits.

[5969] Rev. Rul. 92-20 held that a provision in a trust agreement authorizing the trustee to accumulate trust income if the trust does not hold any shares of an S corporation does not, by itself, preclude the trust's qualification as a QSST.

[5970] Reg. § 1.1361-1(j)(2)(iv). Reg. § 1.1361-1(k), Example (5), "QSST when current income beneficiary assigns the income interest to a person not named in the trust," provides:

> On January 1, 1996, stock of Corporation R, a calendar year S corporation, is transferred to a trust that satisfies all of the requirements to be a QSST. Neither the terms of the trust nor local law preclude the current income beneficiary, K, from assigning K's income interest in the trust. K files a timely QSST election that is effective January 1, 1996. On July 1, 1996, K assigns the income interest in the trust to N. Under applicable state law, the trustee is bound as a result of the assignment to distribute the trust income to N. Thus, the QSST will cease to qualify as a QSST under section 1361(d)(3)(A)(iii) because N's interest will terminate on K's death (rather than on

Ruling 9437021 viewed the possibility of distribution from the QSST to another trust for that same beneficiary as an error, but ruled that it was harmless error in that case because the recipient trust never existed and therefore could never receive a distribution (see also fn. 5967 regarding the distribution of income other than directly to the beneficiary); however, one might not want to assume that the IRS' national office will repeat this kind and gentle approach. Thus, one may need to avoid authorizing the merger or decanting of any trust that has a QSST election in place. For decanting, see fn. 2646, found in part II.J.4.i Modifying Trust to Make More Income Tax Efficient. However, the Uniform Trust Decanting Act allows decanting to be done by trust amendment rather than actual transfer of assets, in which case a QSST need not prevent decanting; for details on decanting by mere amendment, see fn. 2960, found in part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting.

Also, the grantor trust treating a person other than the current income beneficiary as the owner of a part or all of that portion of a trust which does not consist of the S corporation stock does not disqualify the trust from making a QSST election. Reg. § 1.1361-1(j)(2)(vi). Does that, by negative implication, suggest that the settlor (who is not the beneficiary) being treated as deemed owner of the portion of a trust that includes the S corporation stock precludes a QSST election? Reg. § 1.1361-1(j)(4) suggests that prohibition exists; Reg. § 1.1361-1(k)(1), Example (10), paragraph (iii) (reproduced in fn. 5973) confirms that result.

As to the requirement to distribute income: All of the trust's income, not just the income from the S stock, must be distributed or distributable currently. Letter Ruling 9603007. This refers to trust accounting income, not taxable income. Reg. § 1.1361-1(j)(1)(i). Letter Ruling 200446007 held that the amount of a deemed dividend under Code § 1361(d)(3)(B) was not required to be distributed. Also, consistent with ideas discussed in part II.Q.7.b.i Redemptions or Distributions Involving S corporations - Generally (with fn 4878 referring the reader here), Letter Ruling 200451021 clarifies that, when Code § 302(d) taxes a partial liquidation as a distribution rather than as a redemption, the trust itself is not taxed on any income on the distribution if the trust has sufficient AAA to absorb the basis reduction (Ruling Request 1) and the proceeds from the sale of stock in partial liquidation are principal that the QSST does not need to distribute (Ruling Request 2). Similarly, in Letter Ruling 9349009:

> Company wishes to make a substantial distribution to its shareholders, but for estate planning purposes, its shareholders prefer that the distribution be treated as principal of the Trusts rather than income distributable to the Beneficiaries. Company proposes making a cash distribution to its shareholders ("Distribution") in a stock redemption under section 302(d) of the Code.

Letter Ruling 9349009 held:

> As indicated above, each of the Trusts gives the trustee broad discretionary power to allocate trust receipts between income and principal. Moreover, it is represented that under State law the Distribution should be allocated to principal. Accordingly, the Distribution proceeds received by the Trusts will not constitute fiduciary accounting "income" within the meaning of section 643(b) of the Code.
>
> Assuming the Distribution will qualify as a redemption under section 302(d) of the Code, we conclude that the provisions of sections 1368(b) and 1368(c) will apply for purposes

---

N's death). Accordingly, as of the date of the assignment, the trust ceases to be a QSST and Corporation R ceases to be an S corporation.

> of determining whether the Distribution to Company's shareholders will be includable in their gross income. In addition, the treatment of the proposed Distribution by the Trusts as principal rather than income will not cause the Trusts to fail to satisfy the current distribution requirement of section 1361(d)(3). Therefore, assuming the Trusts otherwise qualify as qualified subchapter S trusts, the Distribution will not adversely affect Company's election to be an S corporation.

In Letter Ruling 200234062, an S corporation distributed a partnership interest to its shareholders; the partnership held only cash. Because a distribution of property did not constitute fiduciary accounting income, the partnership interests were not required to be distributed to the income beneficiary. The facts were:

> Company elected in 1999 to be treated as an S corporation for federal income tax purposes. Company has accumulated earnings and profits from periods prior to 1999. Company has 32 shareholders. Fifty three percent of the stock in Company is owned by Trusts #1 through #26, which were established between and by Grantor, Grantor's son (Son), the spouse of Son (Spouse), and the granddaughters of Grantor (Granddaughter 1 and Granddaughter 2) for the benefit of various descendants of Grantor. Granddaughters 1 and 2 are also shareholders of Company. The remaining 4 shareholders are other trusts (not at issue in this ruling request) established by one of the granddaughters. All of the individual trustees of Trusts #1 through #26 are descendants of Grantor. In addition, an independent corporate trustee is a co-trustee of Trusts #1 through #8, and Trusts #18 and #19. A major asset of each of the trusts is stock in Company.
>
> It is represented that: Trusts #1 through #8 and Trusts #18 and #19 qualify as shareholders of Company as electing small business trusts (ESBTs); Trusts #9 through #17 qualify as shareholders of Company as qualified subchapter S trusts (QSST Trusts); and Trusts #20 through #26 are grantor trusts, within the meaning of Subpart E, Part I, Subchapter J, Chapter 1, Subtitle A of the Internal Revenue Code of 1986.
>
> **Trusts #1 - #19:**
>
> Trusts #1 through #4 are either inter vivos or testamentary trusts that were created by Grantor primarily for the benefit of Granddaughters 1 and 2 and their issue. Trusts #5 through #8 are either inter vivos or testamentary trusts that were created by Son also primarily for the benefit of Granddaughters 1 and 2 and their issue. Likewise, Trusts #9 through #19 are either inter vivos or testamentary trusts that were created by Spouse primarily for the benefit of Granddaughters 1 and 2 and their issue. Trusts #1 through #19 do not contain any provision directing the allocation of receipts between income and principal. Trusts #1 through #19 are governed by Maryland law and were irrevocable prior to September 25, 1985. It is represented that no additions have been made to any of Trust #1 through Trust #19 after September 25, 1985.
>
> **Trusts #20 - #23:**
>
> Trusts #20 through #23 are irrevocable trusts that were established on Date 1, after September 25, 1985, by Granddaughter 1, primarily for the benefit of her issue and their descendants. You represent that Granddaughter 1 allocated sufficient GST exemption so that Trusts #20 through #23 each has an inclusion ratio of zero for generation-

skipping transfer tax purposes. These trusts are also governed by Maryland law. Art. III(G)13 of each trust states that:

> Fiduciary Powers. In addition to the powers granted by law, I grant my Trustee the powers set forth in the Estates and Trusts Article of the Maryland Code, as well as the powers set forth in the following paragraphs, which is subject, however, to the restrictions set forth in the following Paragraphs H, I, and J of this Article. My Trustee (hereinafter sometimes referred to as "fiduciary") is empowered, in its discretion as a fiduciary and without the order or ratification of any court: ...
>
> 13. To determine whether items should be charged or credited to income or principal or allocated between income and principal, in such manner as the Trustee deems equitable and fair under all the circumstances, without regard to how such items are treated for federal estate or income tax purposes, . . .

Further, the Maryland Uniform Principal and Income Act (Md. Code Ann., Est. & Trusts, § 15-508 (2001)) provides, in part:

> (c) Receipts allocated to principal. - Except as provided in subsection (f) of this section, a trustee shall allocate the following receipts from an entity to principal:
>
> (1) Property other than money;
>
> (2) Money received in one distribution or a series of related distributions in exchange for part or all of a trust's interest in the entity; . . .

Trusts #24 - #26:

Trusts #24 through #26, are irrevocable trusts established on Date 2, after September 25, 1985, by Granddaughter 2 primarily for the benefit of her issue and their descendants. You also represent that Granddaughter 2 allocated sufficient GST exemption so that Trusts #20 through #23 each has an inclusion ratio of zero for generation-skipping transfer tax purposes. Trusts #24 through #26 are governed by New Jersey law. Art. III(G)(13) of each trust states that:

> Fiduciary Powers. In addition to the powers granted by law, I grant my Trustee the powers set forth in the New Jersey Statutes, as well as the powers set forth in the following paragraphs, which shall be subject, however, to the restrictions set forth in the following Paragraphs H, I, and J of this Article. My Trustee (hereinafter sometimes referred to as "fiduciary") is empowered, in its discretion as a fiduciary and without the order or ratification of any court: . . .
>
> 13. To determine whether items should be charged or credited to income or principal or allocated between income and principal, in such manner as the Trustee deems equitable and fair under all the circumstances, without regard to how such items are treated for federal estate or income tax purposes, ...

Further, New Jersey law provides that, where the trust instrument makes provision for the ascertainment of principal and income or grants discretion to the fiduciary or other person to do so, the provision or the grant of discretion shall control, notwithstanding any provision in the New Jersey statute. N.J. Stat. Ann. § 3B:19A-5(a) (West 2001).

> The shareholders of Company created LLC1, a limited liability company, in 2000. The shareholders' membership interests in LLC1 are in the same proportion as their respective shares in Company. It is represented that, to date, no capital contributions have been made to LLC1 by its members.
>
> **Proposed Transaction**
>
> Company proposes to create a second limited liability company (LLC2) in which Company will initially be the sole member. Upon the creation of LLC2, Company will contribute property and cash to LLC2 in an amount not in excess of its accumulated adjustments account, as defined in § 1368(e)(1) of the Internal Revenue Code. Company will then distribute its interest in LLC2 to its shareholders in proportion to each of the shareholders' stock holdings in Company. The trustee of each of the Trusts will allocate the LLC2 interests received to principal. LLC2 will then merge into LLC1 with LLC1 as the surviving entity. All of these transactions will occur in quick succession.

After ruling that the changes will not undo GST grandfathering or change the GST inclusion ratio, Letter Ruling 200234062 held:

> The distribution of the LLC2 interests to the QSST Trusts is a distribution of property allocable to principal under Maryland law. Therefore, the receipt of the LLC2 interests by the QSST Trusts will not be considered a receipt of income to the trusts for § 1361(d)(3)(B) purposes. As the receipt of the LLC2 interests is not income to the QSST Trusts, the proposed transaction will not cause the QSST Trusts to fail to qualify as QSSTs if they do not distribute the LLC2 interests to the beneficiaries of those trusts.
>
> During the time Company is the sole member of LLC2, LLC2 will be treated as a disregarded entity for federal tax purposes. Therefore, the transfer of assets to LLC2 has no federal tax consequences. Company's distribution of the LLC2 interests to its shareholders will be considered a distribution of the property and cash held by LLC2 followed by a contribution of the property and cash to LLC2 by the shareholders. The distribution of the LLC2 interests by Company (treated as a distribution of LLC2 's property and cash) will be subject to §§ 1368 and 311(b). Furthermore, the shareholders of Company will be treated as contributing the property and cash to LLC2 under § 721.

Although LLC1 was an empty shell, even if it had assets the merger of LLC2 into it would have been nontaxable. See part II.Q.8.e.v Partnership Mergers.

This result is consistent with section 401(d)(1) of the Uniform Fiduciary Income and Principal Act (2018) and section 401(c)(1) of the (last revised in 2008) Uniform Principal & Income Act (UPIA). Comments trace this rule back to the 1962 UPIA. Further thoughts:

- With this precedent, the taxpayers might feel emboldened to repeat this transaction every year – the corporation might put cash into a new single member LLC, distribute to the shareholder, then merge into LLC1. That would frustrate the intent behind the QSST distribute-all-income requirement, so I would not try it without a private letter ruling.

- Query whether a QSST's trustee has a duty to object to annual receipts of operating income in the form of property other than cash. In doing the planning suggested by the ruling, consider who is making the decision. I tend to make voting stock 5% of the entity's stock and pass that differently than nonvoting stock, so consider making the voting shareholders be different from these QSSTs and not having a paper trail of doing this at the request of the QSSTs' trustees.

- Consider whether the trustee of a QSST should consider exercising the power to adjust when this occurs.

- Consider whether a beneficiary may object to a trustee's decision not to pursue these avenues. However, the beneficiary must prove an abuse of discretion.

If the income may be used to discharge the beneficiary's parent's support obligation, actual (not mere potential) use for that purpose may ruin the trust's qualification. Reg. 1.1361-1(j)(2)(ii)(B), "Legal obligation to support," provides:

> If under local law a distribution to the income beneficiary is in satisfaction of the grantor's legal obligation of support to that income beneficiary, the trust will not qualify as a QSST as of the date of distribution because, under section 677(b), if income is distributed, the grantor will be treated as the owner of the ordinary income portion of the trust or, if trust corpus is distributed, the grantor will be treated as a beneficiary under section 662. See § 1.677(b)-1 for rules on the treatment of trusts for support and § 1.662(a)-4 for rules concerning amounts used in discharge of a legal obligation.

Reg. § 1.1361-1(j)(2)(ii)(C) provides an example illustrating Reg. 1.1361-1(j)(2)(ii)(B):

> *Example*. F creates a trust for the benefit of F's minor child, G. Under the terms of the trust, all income is payable to G until the trust terminates on the earlier of G's attaining age 35 or G's death. Upon the termination of the trust, all corpus must be distributed to G or G's estate. The trust includes all of the provisions prescribed by section 1361(d)(3)(A) and paragraph (j)(1)(ii) of this section, but does not preclude the trustee from making income distributions to G that will be in satisfaction of F's legal obligation to support G. Under the applicable local law, distributions of trust income to G will satisfy F's legal obligation to support G. If the trustee distributes income to G in satisfaction of F's legal obligation to support G, the trust will not qualify as a QSST because F will be treated as the owner of the ordinary income portion of the trust. Further, the trust will not be a qualified subpart E trust because the trust will be subject to tax on the income allocable to corpus.

However, if the distribution is caught within the first 2½ months of the year, consider converting the trust to an ESBT. See parts III.A.3.c.iii Deadlines for QSST and ESBT Elections and III.A.3.e.iv Flexible Trust Design When Holding S Corporation Stock.

The income distribution rule is that all income either actually is distributed each year or is required to be distributed each year;[5971] inadvertent termination relief may be available if the

[5971] Code § 1361(d)(3)(B); Reg. § 1.1361-1(j)(1)(i), the latter which expressly recognizes that income distributed in the first 65 days of the year may be treated under Code § 663(b) as being distributed in the immediately preceding year. Letter Rulings 8508048, 8836057, and 199927011 approved trusts in which the income must be distributed currently, but the beneficiary may elect in any year to have the trustee retain all or any portion of the income of the trust (it is not clear whether the trusts expressly permitted their beneficiaries to elect that retention or whether that was simply a practice that was contemplated); for related issues not discussed in the rulings, see part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts, especially part III.B.2.i.ix Creditor and Gift/Estate Tax Issues Regarding Withdrawal Rights, Whether Currently Exercisable or Lapsed.

income is not distributed and catch-up distributions are made.[5972] Special rules apply to an inter vivos QTIP or another trust for a spouse.[5973] If a QSST ceases to meet any of the requirements of Reg. § 1.1361-1(j)(1)(ii), the QSST rules will cease to apply as of the first day on which that requirement ceases to be met.[5974] If such a trust ceases to meet the income distribution

---

[5972] Letter Ruling 201710001.

[5973] Reg. § 1.1361-1(j)(4) approves testamentary QTIP trusts but, for inter vivos ones, prohibits a QSST election during marriage and requires one to ensure that the grantor is treated as wholly owning the trust:

> However, if property is transferred to a QTIP trust under section 2523(f), the income beneficiary may not make a QSST election even if the trust meets the requirements set forth in paragraph (j)(1)(ii) of this section because the grantor would be treated as the owner of the income portion of the trust under section 677. In addition, if property is transferred to a QTIP trust under section 2523(f), the trust does not qualify as a permitted shareholder under section 1361(c)(2)(A)(i) and paragraph (h)(1)(i) of this section (a qualified subpart E trust), unless under the terms of the QTIP trust, the grantor is treated as the owner of the entire trust under sections 671 to 677.

Reg. § 1.1361-1(k)(1), Example (10), provides:

> (i) *Transfers to QTIP trust*. On June 1, 1996, A transferred S corporation stock to a trust for the benefit of A’s spouse B, the terms of which satisfy the requirements of section 2523(f)(2) as qualified terminable interest property. Under the terms of the trust, B is the sole income beneficiary for life. In addition, corpus may be distributed to B, at the trustee’s discretion, during B’s lifetime. However, under section 677(a), A is treated as the owner of the trust. Accordingly, the trust is a permitted shareholder of the S corporation under section 1361(c)(2)(A)(i), and A is treated as the shareholder for purposes of sections 1361(b)(1), 1366, 1367, and 1368.
>
> (ii) *Transfers to QTIP trust where husband and wife divorce*. Assume the same facts as in paragraph (i) of this Example 10, except that A and B divorce on May 2, 1997. Under section 682, A ceases to be treated as the owner of the trust under section 677(a) because A and B are no longer husband and wife. Under section 682, after the divorce, B is the income beneficiary of the trust and corpus of the trust may only be distributed to B. Accordingly, assuming the trust otherwise meets the requirements of section 1361(d)(3), B must make the QSST election within 2 months and 15 days after the date of the divorce.
>
> (iii) *Transfers to QTIP trust where no corpus distribution is permitted*. Assume the same facts as in paragraph (i) of this Example 10, except that the terms of the trust do not permit corpus to be distributed to B and require its retention by the trust for distribution to A and B’s surviving children after the death of B. Under section 677, A is treated as the owner of the ordinary income portion of the trust, but the trust will be subject to tax on gross income allocable to corpus. Accordingly, the trust does not qualify as an eligible shareholder of the S corporation because it is neither a qualified subpart E trust nor a QSST.

Paragraph (iii) illustrates two points. First, to qualify as a wholly owned grantor trust (see part III.A.3.a.i Qualifying as a Wholly Owned Grantor Trust), the trust must have not only its income but also its principal deemed owned wholly by the same individual (see part III.A.3.a.ii How a Trust Can Fall Short of Being Wholly Owned by One Person, especially fn. 5878); therefore, when drafting a trust for a spouse that holds stock in an S corporation for which an ESBT election is not in effect, one should consider including a grantor trust power beyond merely Code § 677, to make sure that the entire trust is taxed to the grantor (see part III.B.2.h How to Make a Trust a Grantor Trust). Second, no part of a QSST may be deemed owned by a person other than the beneficiary.

Paragraph (ii) offers insight into the application of Code § 677(a) after divorce. See part III.B.2.h.ix Code § 682 Limitations on Grantor Trust Treatment, the result of which is that, if distributions are made after separation, the trust no longer qualifies as a wholly owned grantor trust and a QSST election is unavailable; therefore, an ESBT election must be made (but note that Code § 682 is being repealed by 2017 tax reform). For the interaction of divorce with Chapter 14, see parts III.B.7.b.iv Divorce Planning to Avoid Code § 2701 and III.B.7.d Code § 2702 Overview, especially the text accompanying fns. 7393-7398.

[5974] Reg. § 1.1361-1(j)(5).

requirement of Reg. § 1.1361-1(j)(1)(i), but continues to meet all of the requirements Reg. § 1.1361-1(j)(1)(ii), the QSST rules will cease to apply as of the first day of the first taxable year beginning after the first taxable year for which the trust ceased to meet that income distribution requirement. See parts III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation[5975] and III.A.3.e.i.(b) QSST Issues When Beneficiary Dies.

Reg. § 1.1361-1(k)(1), Example (4) illustrates the income distribution rule (before the number of shareholder limitation was increased from 75 to 100):

(i) *QSST when terms do not require current distribution of income*. Corporation Q, a calendar year corporation, makes an election to be an S corporation effective for calendar year 1996. On July 1, 1996, G, a shareholder of Corporation Q, transfers G's shares of Corporation Q stock to a trust with H as its current income beneficiary. The terms of the trust otherwise satisfy the QSST requirements, but authorize the trustee in its discretion to accumulate or distribute the trust income. However, the trust, which uses the calendar year as its taxable year, initially satisfies the income distribution requirement because the trustee is currently distributing all of the income. On August 1, 1996, H makes a QSST election with respect to Corporation Q that is effective as of July 1, 1996. Accordingly, as of July 1, 1996, the trust is a QSST and H is treated as the shareholder for purposes of sections 1361(b)(1), 1366, 1367, and 1368.

(ii) *QSST when trust income is not distributed currently*. Assume the same facts as in paragraph (i) of this Example 4, except that, for the taxable year ending on December 31, 1997, the trustee accumulates some trust income. The trust ceases to be a QSST on January 1, 1998, because the trust failed to distribute all of its income for the taxable year ending December 31, 1997. Thus, Corporation Q ceases to be an S corporation as of January 1, 1998, because the trust is not a permitted shareholder.

(iii) *QSST when a person other than the current income beneficiary may receive trust corpus*. Assume the same facts as in paragraph (i) of this Example 4, except that the events occur in 2003 and H dies on November 1, 2003, and the trust does not qualify as an ESBT. Under the terms of the trust, after H's death, L is the income beneficiary of the trust and the trustee is authorized to distribute trust corpus to L as well as to J. The trust ceases to be a QSST as of November 1, 2003, because corpus distributions may be made to someone other than L, the current (successive) income beneficiary. Under section 1361(c)(2)(B)(ii), H's estate (and not the trust) is considered to be the shareholder for purposes of section 1361(b)(1) for the 2-year period beginning on November 1, 2003. However, because the trust continues in existence after H's death and will receive any distributions from the corporation, the trust (and not H's estate) is treated as the shareholder for purposes of sections 1366, 1367, and 1368, during that 2-year period. After the 2-year period, the S election terminates and the trust continues as a shareholder of a C corporation. If the termination is inadvertent, Corporation Q may request relief under section 1362(f). However, the S election would not terminate if the trustee distributed all Corporation Q shares to L, J, or both on or before October 31, 2005, (the last day of

[5975] Especially fn 6853 in part III.B.2.j.ii.(c) Transfer of Shareholder's Entire Interest.

the 2-year period) assuming that neither L nor J becomes the 76th shareholder of Corporation Q as a result of the distribution.

Suppose a QSST owns the S corporation stock through a single-member LLC that is disregarded for income tax purposes. Only distributions from the LLC to the trust – rather than distributions from the S corporation – must be distributed to satisfy the QSST rules. I would tend to stay away from the idea of reducing what must be distributed to the beneficiary:

- I am concerned about gift tax issues for failure to require the trustee to pull out the LLC's assets.[5976] Is the trustee making sure the statute of limitations runs annually so that the income beneficiary's claim at death is not huge,[5977] and is the annually retained income less than 5% of the distributions?[5978] Does the lapse generate Code § 678 issues regarding the LLC's non-S corporation income[5979] or Code § 2036 issues regarding the excess lapse?[5980]

- I am also concerned about – upon termination - the trustee distributing the LLC to more than one beneficiary, thereby creating a partnership that is not eligible to hold S stock and terminating the S election.[5981]

Reg. § 1.1361-1(k)(1), Example (7) illustrates the effect of a remote possibility[5982] that principal may be distributed to someone other than the current income beneficiary and curing that defect:

> QSST when settlor of trust retains a reversion in the trust. On January 10, 1996, M transfers to a trust shares of stock in corporation X, an S corporation. D, who is 13 years old and not a lineal descendant of M, is the sole income beneficiary of the trust. On termination of the trust, the principal (including the X shares) is to revert to M. The trust instrument provides that the trust will terminate upon the earlier of D's death or D's 21st birthday. The terms of the trust satisfy all of the requirements to be a QSST except those of section 1361(d)(3)(A)(ii) (that corpus may be distributed during the current income beneficiary's life only to that beneficiary) and (iv) (that, upon termination of the trust during the life of the current income beneficiary, the corpus, must be distributed to that beneficiary). On February 10, 1996, M makes a gift of M's reversionary interest to D. Until M assigns M's reversion in the trust to D, M is deemed to own the entire trust under section 673(a) and the trust is a qualified subpart E trust. For purposes of section 1361(b)(1), 1366, 1367, and 1368, M is the shareholder of X. The trust ceases

5979 See part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts.

5980 Part III.C Code § 2036.

5981 See text accompanying fns 146-157 in part .

5982 Using the latest mortality tables that had issued, on July 5, 2019 a 13-year-old had a 99.5% chance of reaching age 21. I don't know why Code § 673(a) was chosen, because the facts below do not appear to satisfy Code § 673(a), which provides that, subject to subsection (b) when the beneficiary is a minor descendant, "The grantor shall be treated as the owner of any portion of a trust in which he has a reversionary interest in either the corpus or the income therefrom, if, as of the inception of that portion of the trust, the value of such interest exceeds 5 percent of the value of such portion."
See fn 5987, which reproduces the holding of Rev. Rul. 93-31 regarding a remote possibility that the corpus of the trust will be distributed during the lifetime of the current income beneficiary to someone other than that beneficiary

> to be a qualified subpart E trust on February 10, 1996. Assuming that, by virtue of the assignment to D of M's reversionary interest, D (upon his 21st birthday) or D's estate (in the case of D's death before reaching age 21) is entitled under local law to receive the trust principal, the trust will be deemed as of February 10, 1996, to have satisfied the conditions of section 1361(d)(3)(A)(ii) and (iv) even though the terms of the trust do not explicitly so provide. D must make a QSST election by no later than April 25, 1996 (the end of the 16-day-and-2-month period that begins on February 10, 1996, the date on which the X stock is deemed transferred to the trust by M). See example (5) of § 1.1001-2(c) of the regulations.

Some annual expenses are ordinarily allocated one-half to income and one-half to principal. Generally, these include (1) the regular compensation of the trustee and of any person providing investment advisory or custodial services to the trustee, and (2) expenses for accountings, judicial proceedings, or other matters that involve both the income and remainder interests.[5983] If S corporation distributions are the trust's only source of cash, this rule is impractical, because the trust would be unable to pay the portion of the expense allocated to principal. Accordingly, I often suggest that the trustee make an adjustment, allocating the entire expense to income, which might be authorized under either state law[5984] or the governing instrument.[5985] If the business or the stock is sold later, the proceeds are taxable to the trust, rather than the beneficiary; at that time, some of the proceeds might be allocated to income to make up for these prior allocations of administrative expenses, which would help move taxable items from the trust's high rates to the beneficiary's potentially lower rates.[5986]

A trust that has substantially separate and independent shares, each of which is for the sole benefit of one beneficiary, may qualify as a QSST with respect to each separate share.[5987] For

[5985] See parts II.J.8.c.i.(d) Exceptions in the Governing Instrument and II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law, especially fns. 2765-2770 (language that might be included in one's forms authorizing such an adjustment, as well as the consequences of using such language).

[5986] See parts II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax) and II.J.16 Fiduciary Income Taxation When Selling Interest in a Pass-Through Entity or When the Entity Sells Its Assets. See also part II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the . For form language that might facilitate this allocation, see fn. 2765, found in part II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law.

[5987] Code § 1361(d)(3); see Letter Ruling 201119005, discussed in fn 6001 in part III.A.3.e.i.(b) QSST Issues When Beneficiary Dies. Although the statute cites to the separate share rules under Code § 663(c) (see part II.J.9.a.ii Separate Share Rule), the test is more stringent than that. Code § 663(c) provides for that distributions to other beneficiaries be ignored in determining separate share treatment if the possibility of distribution is remote. Rev. Rul. 93-31 holds:

> A substantially separate and independent share of a trust, within the meaning of section 663(c) of the Code, is not a QSST if there is a remote possibility that the corpus of the trust will be distributed during the lifetime of the current income beneficiary to someone other than that beneficiary.

For example, if an inter vivos QSST includes a clause requiring the payment of estate tax if the grantor dies during the beneficiary's life, and that payment clause might benefit the grantor's estate beyond whatever applicable law would provide but for that clause, the IRS' view is that mere possibility of such a example, a grantor sets up an irrevocable trust for the benefit of his four children, who are the only children he will ever have. Each child receives one-fourth of the income and corpus distributions. Each child would be considered the owner of one-fourth of the stock owned by the trust.[5988] This could also work well for a vested trust for a grandchild, which qualifies for the GST annual exclusion;[5989] see part III.A.3.a.i Qualifying as a Wholly Owned Grantor Trust for an example of a vested trust.

To avoid the requirement that all of the trust income – not just its S corporation income – be distributed to the beneficiary, it is not uncommon for a trust agreement to divide the trust so that the QSST is a separate trust. For inter vivos QSSTs, this approach might have additional state income tax benefits; see part II.J.15.b QSSTs and State Income Tax Issues. On a separate but related note, suppose a QSST holds investments (such as partnerships) that generate taxable income without necessarily generating trust accounting income. Can the nongrantor trust portion of the QSST take an income distribution deduction with respect to the distributions to the beneficiary of trust accounting income derived from S corporation? The QSST regulations[5990] do not address it, but the grantor trust regulations provide some support for my preliminary view that the nongrantor trust portion cannot get credit for those distributions.[5991]

---

diversion might disqualify the QSST from inception. Letter Ruling 201451001 (which I obtained to obtain inadvertent termination relief at the insistence of the CPAs for the company that was acquiring my client). However, paying transfer tax on the beneficiary's death should not cause any QSST problem. Letter Ruling 9014008 (GST tax).
See the text accompanying fn 5982 for an example in the regulations about what happens when the remote possibility is cured.

[5988] However, it would not work if trust provided that the birth of another child after the trust is created would cause the trust to be divided five ways, essentially diverting one-fourth of each existing trust. Rev. Rul. 89-45.

[5989] Code § 2642(c)(2) provides that the GST annual exclusion applies to a trust that uses *Crummey* withdrawal rights only if the grandchild (or other skip person) is the sole beneficiary of the trust, and the trust's assets must be includible in the beneficiary's gross estate upon her death. Code § 2654(b) provides that substantially separate and independent shares of different beneficiaries shall be treated as separate trusts under the GST rules. Suppose a grantor sets up an irrevocable trust for the benefit of his four grandchildren. Each grandchild receives one-fourth of the income and corpus distributions; the trust distributes all of its income each year; and each of the four living grandchild would be considered the owner of one-fourth of the stock owned by the trust. If a grandchild who dies before or after trust termination holds a general power of appointment over one-fourth of the trust's assets, the trust will qualify for the GST annual exclusion and as a QSST.

[5990] Reg. § 1.1361-1(j).

[5991] Reg. § 1.671-3(a)(2) provides:

> If the portion treated as owned consists of specific trust property and its income, all items directly related to that property are attributable to the portion. Items directly related to trust property not included in the portion treated as owned by the grantor or other person are governed by the provisions of subparts A through D (section 641 and following), part I, subchapter J, chapter 1 of the Code.

"Items" refers to "items of income, deduction, and credit against tax attributable to or included in that portion," so I can't say with absolute certainty what the answer is. However, I think that the "better" answer is that distributions from the trust of S corporation trust accounting income would be attributable to the grantor trust portion. This is consistent with the IRS' general approach in CCA 201327009, discussed in the text accompanying fns 6113-6115 in part III.A.3.e.vi.(a) Grantor Trust Issues Involved in a Sale of S Stock to a QSST.

The beneficiary of a QSST is taxed on all of the QSST's K-1 income and losses from the S corporation[5992] (although the trust still needs to get its own tax ID and use a grantor information statement to report K-1 items to the beneficiary).[5993] However, when the QSST sells the stock, the trust itself is taxable on any gain on the sale,[5994] including any gain the corporation incurs after adopting a plan of complete liquidation[5995] or from the deemed asset sale resulting from a Code § 338(h)(10) election.[5996] If the corporation actually sells its assets without adopting a plan of liquidation, I am unsure of the result. For additional planning issues, see parts II.G.6 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business, II.J.8.a.i Whether the Capital Gain Is from the Sale or Exchange of a Capital Asset (discussing whether the gain is included in DNI), and II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax). From the above, one can glean that depreciation recapture on the actual or deemed sale of personal property is ordinary income that is principal but might be best taxed to the beneficiary, who might either be in a lower tax bracket or might have losses from operations during the year of sale passing through the grantor trust portion to offset; thus, consider including in one's trust the flexibility to distribute principal or to reallocate principal to income.[5997]

The beneficiary must make a separate QSST election with respect to each corporation whose stock the trust holds.[5998]

See part II.A.2.d Estate Planning Strategies Available Only for S Corporation Shareholders for a brief introduction to a QSST's unique benefits. To explore a QSST's unique attributes as a grantor trust deemed owned by its beneficiary, see part III.A.3.e.vi QSST as a Grantor Trust; Sales to QSSTs.

Also note that a QSST election might enhance (or perhaps reduce) the trust's ability to deduct charitable contributions made by the S corporation.[5999]

[5992] Code § 1361(d)(1)(B). Reg. § 1.1361-1(j)(7)(i) provides:

> The income beneficiary who makes the QSST election and is treated (for purposes of section 678(a)) as the owner of that portion of the trust that consists of S corporation stock is treated as the shareholder for purposes of sections 1361(b)(1), 1366, 1367, and 1368.

Reg. § 1.1361-1(j)(8) further provides:

> If a valid QSST election is made, the income beneficiary is treated as the owner, for purposes of section 678(a), of that portion of the trust that consists of the stock of the S corporation for which the QSST election was made.

[5993] Reg. § 1.671-4(b)(6)(iii).

[5994] Reg. § 1.1361-1(j)(8). However, for purposes of recognizing any losses suspended due to the at-risk rules of Code § 465 or the passive activity rules of Code § 469, the regulation treats the beneficiary as having sold the stock so that the suspended losses can be triggered. For more details on such sales, see part II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets.

[5995] Letter Rulings 9721020 and 199905011. This includes gain from the actual sale of assets as well as gain on the Code § 336 deemed sale of assets distributed to shareholders. Of course, Code § 331 gain on the deemed sale of stock on dissolution is also taxed to the trust.

[5996] Letter Rulings 9828006, 199920007, and 201232003.

[5997] See part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law, which includes parts discussing allocating to income what otherwise would be principal receipts.

[5998] Reg. § 1.1361-1(j)(6)(i). Inadvertent termination relief is available when the trust acquires stock in another S corporation if a timely QSST election is not made with respect to that other S corporation. Letter Ruling 201618003.

[5999] See part II.Q.7.c S Corporation Owned by a Trust Benefitting Charity, especially the text accompanying fn. 4941.

III.A.3.e.i.(b). QSST Issues When Beneficiary Dies

QSSTs have excellent post-mortem planning flexibility:

- A QSST may hold stock for two years after the beneficiary's death without making any election at all.[6000]

- If a QSST continues as separate QSST-eligible shares for each beneficiary after termination but before the new QSST trusts are actually funded, no new election is required until actual funding of the new trusts; in other words, the QSST election stays in effect, with the individual remaindermen taxed as the QSST beneficiaries until actual post-mortem trust funding occurs.[6001]

The latter is a very important tool. Consider what happens after the beneficiary dies and before the stock is retitled in the remaindermen's names. If the S corporation does not distribute all of its taxable income, the trust might not be able to obtain an income distribution deduction to carry out all of the income to the remaindermen, thereby trapping the income[6002] at the trust's presumably higher income tax rates.[6003] Keeping the QSST election intact post-mortem before stock retitling to make sure that individual beneficiaries are taxed directly on the S corporation's K-1 income might save income tax during that period.

However, challenges arise when the remaindermen are not the residual beneficiaries of the beneficiary's estate plan. The S corporation might make distributions to pay the shareholders' income taxes after the beneficiary dies, and then how will the beneficiary's estate pay tax on the

[6000] See part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, especially part III.A.3.b.ii A Trust That Was a Grantor Trust with Respect to All of Its Assets Immediately Before the Death of The Deemed Owner and Which Continues in Existence After Such Death.

[6001] See Reg. § 1.1361-1(j)(9)(ii), contrasting Example (1) with Example (2). Code § 1361(d)(2)(B)(ii) provides:

> Elections with respect to successive income beneficiaries. If there is an election under this paragraph with respect to any beneficiary, an election under this paragraph shall be treated as made by each successive beneficiary unless such beneficiary affirmatively refuses to consent to such election.

Letter Ruling 201119005 held that, when the QSST beneficiary died, separate shares were created that qualified as QSSTs, without any QSST election needing to be affirmatively made with respect to the remaindermen, in the following scenario:

> Upon B's death, Trust's assets were divided into two shares. The income from one share is required to be paid to C and the income from the other share is required to be paid to D. During the life of each of C and D (the income beneficiaries), the income and principal from one beneficiary's share can only be paid to that income beneficiary. Neither income beneficiary has a claim against the income and principal of the other beneficiary's share. Since Date 4, the income from each share of Trust has been distributed to the income beneficiary of that share. Neither beneficiary has affirmatively refused to consent to the QSST election made for Trust on Date 3.

For separate share treatment for QSSTs, see fn 5987 in part III.A.3.e.i.(a) QSSTs Generally.

[6002] See parts III.A.4 Trust Accounting Income Regarding Business Interests and III.F.2 Trust Accounting and Taxation.

[6003] Note, however, that trapping income inside trusts might be beneficial. See parts II.J.3 Strategic Fiduciary Income Tax Planning and III.A.3.e.ii.(c) When ESBT Income Taxation Might Help, the latter not directly on point but having some helpful ideas.

beneficiary's allocable share[6004] of the S corporation's income? What happens when a QSST's beneficiary dies, the beneficiary's estate is taxed on pre-mortem income, and the remaindermen are different than the beneficiaries of the beneficiary's estate? This might occur, for example, in a second marriage situation. Although the Uniform Principal and Income Act discusses issues along these lines to a certain extent,[6005] drafting to address this issue would be advisable:

- If the beneficiary does not control disposition of the trust's assets, the beneficiary might consider negotiating income tax reimbursement provisions with the trustee as a condition of making the QSST election.

- If the beneficiary does control disposition, the beneficiary might consider exerting that control to require that the remaindermen reimburse the beneficiary's estate for income tax on the pre-mortem income. On the other hand, if the QSST's remaindermen are the same as under the beneficiary's estate plan generally, the opportunity to create a debt (taxes on the earned but undistributed income) on the beneficiary's estate tax return might prove beneficial. In the latter case, the beneficiary might exercise any power of appointment he or she might have to provide for the QSST election to remain in place after the beneficiary's death during trust administration before the trust is divided.

One might consider a provision along the following lines:

(1) If the individuals to whom the S corporation stock is allocated do not share in the residue of the deceased beneficiary's estate (in this Agreement, Article 5 determines the sharing of the residue of my estate, because my will bequeaths my estate to the Revocable Trust and Article 5 bequeaths the residuary trust assets), then any distributions the S corporation makes to pay its shareholders' taxes with respect to their distributive shares of taxable income before the date of death shall be treated as income earned before the beneficiary's death and paid to the beneficiary's estate.

(2) If and to the extent that paragraph (1) does not apply, during trust administration, after the beneficiary's death and before separate trusts can be funded, the trust will not terminate but rather will continue as a single trust with separate shares pursuant to U.S. Treas. Reg. section 1.1361-1(j)(9)(ii), Example (1), and the trusts for the beneficiaries will be amended under [the QSST provisions].

Such a provision would not cause any marital deduction problems for the trust that is terminating.[6006] However, if the trust is included in the beneficiary's estate and the beneficiary is bequeathing the stock to a QTIP trust and income otherwise payable to the QTIP trust is

---

[6004] See part III.B.2.j Tax Allocations upon Change of Interest, especially part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.

[6005] Section 201 of the Uniform Principal and Income Act (last amended or revised in 2008; see http://www.uniformlaws.org/shared/docs/principal%20and%20income/upia_final_08_clean.pdf) addresses actions when a trust terminates.

[6006] Rev. Rul. 92-64 generally allows income earned during the surviving spouse's life but paid after the surviving spouse's death to be paid to either the surviving spouse's estate (if allowed under state law) or the successor beneficiary. State corporate law often limits the gap between record date (the date on the shareholder actually owned the stock) and payment date; generally, an LLC taxed as an S corporation would not face this problem. Of course, in a trust situation, with either type of entity the trust would receive the distribution and then direct it according to the beneficiaries' respective interests, if the ownership interest was not transferred between death and date of the distribution from the corporation.

diverted, query whether that violates the requirement that QTIP exclusively benefit the surviving spouse.

A successive income beneficiary may disaffirm this QSST continuation, retroactively by as much as 2 months and 15 days (but may not disaffirm after that period).[6007]

The amount of income allocated before and after death is also potentially subject to considerable uncertainty, unless an election to close the corporation's books is made, as described in part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation, especially part III.B.2.j.ii.(d) Death of a Shareholder.

If the stock is bequeathed to a person other than the persons receiving the trust's residue, consider the issues in part III.A.3.d Special Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests, which addresses timing issues relating to distributions to pay taxes on the trust's distributive share of the entity's income.

Letter Ruling 201420005 addressed the following facts:

> The information submitted states that X was incorporated under the laws of State on Date 1, and elected to be an S corporation effective Date 2. Trust 1, Trust 2 and Trust 3, each of which was a qualified subchapter S trust (QSST) under § 1361(d)(1) for which A was the sole income beneficiary, were shareholders of X.
>
> On Date 3, A died. Trust 1, Trust 2 and Trust 3 each continued to qualify as a permissible S corporation shareholder under § 1.1361-1(j)(7)(ii) of the Income Tax Regulations for the 2-year period beginning on the day of the deemed owner's death and ending on Date 4.
>
> On Date 4, Trust 1, Trust 2 and Trust 3 each became an ineligible shareholder of X and X's election to be an S corporation terminated. On Date 5, the trustees of each of Trust 1, Trust 2 and Trust 3 distributed each Trust's stock in X to Trust 4, which X represents is a QSST. X represents that the circumstances resulting in the termination of X's S corporation election were inadvertent and were not motivated by tax avoidance or retroactive tax planning.

[6007] Reg. § 1.1361-1(j)(10), "Affirmative refusal to consent," provides:

- (i) *Required statement*. A successive income beneficiary of a QSST must make an affirmative refusal to consent by signing and filing with the service center where the corporation files its income tax return a statement that -
  - (A) Contains the name, address, and taxpayer identification number of the successive income beneficiary, the trust, and the corporation for which the election was made;
  - (B) Identifies the refusal as an affirmative refusal to consent under section 1361(d)(2); and
  - (C) Sets forth the date on which the successive income beneficiary became the income beneficiary.
- (ii) *Filing date and effectiveness*. The affirmative refusal to consent must be filed within 15 days and 2 months after the date on which the successive income beneficiary becomes the income beneficiary. The affirmative refusal to consent will be effective as of the date on which the successive income beneficiary becomes the current income beneficiary.

Without mentioning any of the rules stated above, Letter Ruling 201420005 concluded:

> Based solely on the information submitted and the representations made, we conclude that X's S corporation election terminated on Date 4, when Trust 1, Trust 2 and Trust 3 became ineligible shareholders. We further conclude that the termination of X's S corporation election was an inadvertent termination within the meaning of § 1362(f). Accordingly, pursuant to the provisions of § 1362(f), X will be treated as an S corporation from Date 4 and thereafter, provided that X's S corporation election was otherwise valid and has not otherwise terminated under § 1362(d).

The ruling did not address how Trust 1, Trust 2 and Trust 3 were administered after A's death. Did they accumulate income, as trusts do between date of termination and date of funding the downstream trusts? Or, did they distribute all of the income to the sole beneficiary of Trust 4, who presumably under state law should have received any fiduciary accounting income not necessary to wind up Trust 1, Trust 2 or Trust 3? These questions make me want to be very specific in referring to Reg. § 1.1361-1(j)(9)(ii), Example (1), as does the sample clause listed above. If one does not have similar language, consider documenting in writing that this continuation is in fact occurring between date of termination and date of funding the downstream trusts if for some reason it is impractical to fund the downstream trusts before the two-year post-mortem grace period expires. That documentation might also save income taxes; see fns 6002-6003 and the accompanying text.

III.A.3.e.ii. Electing Small Business Trusts (ESBTs)

III.A.3.e.ii.(a). Qualification as an ESBT

After determining eligibility to make an electing small business trust (ESBT) election, see part III.A.3.c.iii Deadlines for QSST and ESBT Elections. Make sure the election correctly refers to the date shares were transferred to the trust that is selected as the effective date.[6008]

To qualify to make an ESBT election,[6009] the trust cannot have as a beneficiary any person other than an individual, an estate, a charity within certain definitions;[6010] if a potential current

---

[6008] Letter Ruling 201941006 granted inadvertent termination relief as of Date 3 in the following situation:

> On Date 2, Trust 1 acquired shares in A. Trust 1 qualified under § 1362(c)(2)(A)(v) as an eligible S corporation shareholder and timely filed an ESBT election effective Date 2. A represents that on Date 3, under the laws of State Trust 1 merged with and into Trust 2, with Trust 2 surviving. As a result of the merger, the shares of A owned by Trust 1 were transferred to Trust 2 as of Date 3.
>
> On Date 4, the trustee of Trust 2 filed an election under § 1362(c)(2)(A)(v) to be treated as an ESBT effective Date 5. The ESBT election incorrectly stated that the shares of A owned by Trust 1 prior to the merger were transferred to Trust 2 on Date 5, when the shares were actually transferred on Date 3. A represents that Trust 2 intended the ESBT election to be effective as of Date 3. As a result, A's S corporation election terminated on Date 3 because Trust 2 was an ineligible shareholder.

See parts II.J.18.b Trust Mergers and II.J.18.c Decanting, the latter being relevant because a decanting may be a trust merger treated as a mere continuation of the original trust.

[6009] Code § 1361(e)(1)(A)(iii) authorizes the election.

[6010] Code § 1361(e)(1)(A)(i). Permitted charities include an organization described in Code § 170(c)(2), (3), (4), or (5) or, if it has a contingent interest in the trust and is not a potential current beneficiary, a Code § 170(c)(1) organization. As described in part II.A.2.f Shareholders Eligible to Hold S Corporation Stock, 2017 tax reform allowed a nonresident alien (NRA) to be a beneficiary. In exchange, any part of the trust that the NRA is deemed to own is taxed as a nongrantor S portion; see fns 142-143.

beneficiary of an ESBT is not an eligible shareholder of an S corporation, the S election terminates.[6011] "Beneficiary" includes a person who has a present, remainder, or reversionary interest in the trust.[6012] A distributee trust is the beneficiary of the ESBT only if the distributee trust is a Code § 170(c)(2) or (3) organization.[6013] In all other situations, any person who has a beneficial interest in a "distributee trust" is a beneficiary of the ESBT, rather than the trust itself being considered to be a beneficiary.[6014] A "distributee trust" is a trust that receives or may receive a distribution from the ESBT, whether the rights to receive the distribution are fixed or contingent, or immediate or deferred.[6015]

If an impermissible shareholder might become a potential current beneficiary, one might consider taking steps to exclude that person from being a potential current beneficiary ("PCB") of the ESBT portion.[6016] Generally, a PCB is any person who at any time during the taxable year is entitled to, or in the discretion of any person may receive, a distribution from the principal or income of the trust;[6017] the deemed owner of a grantor trust is also a PCB.[6018] A potential trap

---

[6011] Reg. § 1.1361-1(m)(5)(iii), which provides further:

> For example, the S corporation election will terminate if a charitable remainder trust becomes a potential current beneficiary of an ESBT. Such a potential current beneficiary is treated as an ineligible shareholder beginning on the day such person becomes a potential current beneficiary, and the S corporation election terminates on that date. However, see the special rule of paragraph (m)(4)(iii) of this section. If the S corporation election terminates, relief may be available under section 1362(f).

[6012] Reg. § 1.1361-1(m)(1)(ii)(A).

[6013] Reg. § 1.1361-1(m)(1)(ii)(B).

[6014] Reg. § 1.1361-1(m)(1)(ii)(B).

[6015] Reg. § 1.1361-1(m)(1)(ii)(B).

[6016] Letter Ruling 200913002 held that such a modification did not affect GST grandfathering.

[6017] Code § 1361(e)(2). Reg. § 1.1361-1(m)(4)(i) provides:

> *Generally*. For purposes of determining whether a corporation is a small business corporation within the meaning of section 1361(b)(1), each potential current beneficiary of an ESBT generally is treated as a shareholder of the corporation. Subject to the provisions of this paragraph (m)(4), a potential current beneficiary generally is, with respect to any period, any person who at any time during such period is entitled to, or in the discretion of any person may receive, a distribution from the principal or income of the trust. A person is treated as a shareholder of the S corporation at any moment in time when that person is entitled to, or in the discretion of any person may, receive a distribution of principal or income of the trust. No person is treated as a potential current beneficiary solely because that person holds any future interest in the trust. An NRA potential current beneficiary of an ESBT is treated as a shareholder for purposes of the 100-shareholder limit under section 1361(b)(1)(A). However, an NRA potential current beneficiary of an ESBT is not treated as a shareholder in determining whether a corporation is a small business corporation for purposes of the NRA-shareholder prohibition under section 1361(b)(1)(C).

Reg. § 1.1361-1(m)(4)(iii) further provides:

> *Special rule for dispositions of stock*. Notwithstanding the provisions of paragraph (m)(4)(i) of this section, if a trust disposes of all of the stock which it holds in an S corporation, then, with respect to that corporation, any person who first met the definition of a potential current beneficiary during the 1-year period ending on the date of such disposition is not a potential current beneficiary and thus is not a shareholder of that corporation.

Reg. § 1.1361-1(m)(4)(v) also provides:

> *Contingent distributions*. A person who is entitled to receive a distribution only after a specified time or upon the occurrence of a specified event (such as the death of the holder of a power of appointment) is not a potential current beneficiary until such time or the occurrence of such event.

For the effect of a power of appointment, see fn 6032.

[6018] Reg. § 1.1361-1(m)(4)(ii) provides:

applies when an ESBT terminates in favor of trusts (the "downstream trusts"). After the event terminating the ESBT (such as the primary beneficiary's death) and before the trust distributes its assets to the downstream trusts, the downstream trusts might become PCBs, applying the following rules:

(1) Generally, a trust that exists is a distributee trust if it becomes entitled to, or at the discretion of any person, may receive a distribution from principal or income of an ESBT.[6019] A trust is not currently in existence if the trust has no assets and no items of income, loss, deduction, or credit.[6020] A trust that is not yet funded not currently a distributee trust.[6021]

(2) If the distributee trust qualifies a trust described in part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, then the persons who would be its PCBs if the distributee trust were an ESBT are treated as the potential current beneficiaries of the ESBT.[6022] However, if the distributee trust is a former grantor trust[6023] or is a testamentary trust,[6024] in either case during the special initial 2-year period, then the relevant estate is treated as the ESBT's PCB during that period.[6025]

(3) If the distributee trust is not a trust described in part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, then the distributee trust is the potential current beneficiary of the ESBT and the corporation's S corporation election terminates.[6026] However, if the distributee trust would be a valid QSST or ESBT if the relevant election were made and the election is not made because the trust does not hold S stock, then the distributee trust does not count as a PCB,[6027] and the distributee trust's

---

> *Grantor trusts*. If all or a portion of an ESBT is treated as owned by a person under subpart E, part I, subchapter J, chapter 1 of the Internal Revenue Code, such owner is a potential current beneficiary in addition to persons described in paragraph (m)(4)(i) of this section.

[6019] Reg. § 1.1361-1(m)(4)(iv)(A).
[6020] Reg. § 1.1361-1(m)(4)(iv)(A).
[6021] Reg. § 1.1361-1(m)(4)(iv)(A). Letter Rulings 200816012 and 200913002 approved as an ESBT a trust prohibiting distributions to a nonresident alien for so long as (1) the trust has an ESBT election in effect, and (2) a non-resident alien is not permitted to be a PCB of an ESBT under the Code and Regs. (I do not know why the rulings cited Reg. § 1.1361-1(m)(4)(iv) instead of Reg. § 1.1361-1(m)(4)(v). I wonder whether that is a typo.) However, starting in 2018, a nonresident alien may be a beneficiary of an ESBT. See part II.A.2.f Shareholders Eligible to Hold S Corporation Stock, especially fns 140-136.
[6022] Reg. § 1.1361-1(m)(4)(iv)(C).
[6023] See part III.A.3.b.ii A Trust That Was a Grantor Trust with Respect to All of Its Assets Immediately Before the Death of The Deemed Owner and Which Continues in Existence After Such Death.
[6024] See part III.A.3.b.iii A Trust with Respect to Stock Transferred to It Pursuant to The Terms of a Will (or a Qualified Revocable Trust When a Code § 645 Election Terminates), But Only for the 2-Year Period Beginning on The Day on Which Such Stock Is Transferred to It.
[6025] Reg. § 1.1361-1(m)(4)(iv)(C).
[6026] Reg. § 1.1361-1(m)(4)(iv)(B).
[6027] Reg. § 1.1361-1(m)(4)(iv)(D) provides:

> For the purposes of paragraph (m)(4)(iv)(C) of this section, a trust will be deemed to be described in section 1361(c)(2)(A) if such trust would qualify for a QSST election under section 1361(d) or an ESBT election under section 1361(e) if it owned S corporation stock.

Letter Ruling 200912005 approved a distributee trust that would have been eligible to make an ESBT election even though its sole remainderman was a charity (it did not, as drafted, qualify as a charitable remainder trust).

Reg. § 1.1361-1(m)(8)(vi), Example 6, provides:

> (A) *Distributee trust that would itself qualify as an ESBT*. Trust-1 holds stock in X, an S corporation, and has a valid ESBT election in effect. Under the terms of Trust-1, the

PCBs would count as PCBs of the trust that does hold the S stock.[6028] Another option is for the main trust to partially fund the distributee trust and have the distributee trust then qualify as a shareholder.[6029]

Each potential current beneficiary is treated as a shareholder for the purposes of the 100-shareholder limitation.[6030]

Regulations had provided that an open-ended inter vivos power of appointment violates the 100-shareholder limitation; however, Congress modified that provision for years beginning after December 31, 2004 to provide that powers of appointment are considered during a period only

---

trustee has discretion to make distributions to A, B, and Trust-2, a trust for the benefit of C, D, and E. Trust-2 would qualify to be an ESBT, but it owns no S corporation stock and has made no ESBT election. Under paragraph (m)(4)(iv) of this section, Trust-2's potential current beneficiaries are treated as the potential current beneficiaries of Trust-1 and are counted as shareholders for purposes of section 1361(b)(1). Thus, A, B, C, D, and E are potential current beneficiaries of Trust-1 and are counted as shareholders for purposes of section 1361(b)(1). Trust-2 itself will not be counted as a shareholder of Trust-1 for purposes of section 1361(b)(1).

(B) *Distributee trust that would not qualify as an ESBT or a QSST*. Assume the same facts as Example 6 in paragraph (m)(8)(vi)(A) of this section except that D is a charitable remainder trust. Trust-2 would not be eligible to make an ESBT or QSST election if it owned S corporation stock and therefore Trust-2 is a potential current beneficiary of Trust-1. Since Trust-2 is not an eligible shareholder, X's S corporation election terminates.

(C) *Distributee trust that is a section 1361(c)(2)(A)(ii) trust*. Assume the same facts as in Example 6 in paragraph (m)(8)(vi)(A) of this section except that Trust-2 is a trust treated as owned by A under section 676 because A has the power to revoke Trust-2 at any time prior to A's death. On January 1, 2003, A dies. Because Trust-2 is a trust described in section 1361(c)(2)(A)(ii) during the 2-year period beginning on the day of A's death, under paragraph (m)(4)(iv)(C) of this section, Trust-2's only potential current beneficiary is the person listed in section 1361(c)(2)(B)(ii), A's estate. Thus, B and A's estate are potential current beneficiaries of Trust-1 and are counted as shareholders for purposes of section 1361(b)(1).

[6028] Reg. § 1.1361-1(m)(4)(iv)(B) provides:

If the distributee trust is a trust described in section 1361(c)(2)(A), the persons who would be its potential current beneficiaries (as defined in paragraphs (m)(4)(i) and (ii) of this section) if the distributee trust were an ESBT are treated as the potential current beneficiaries of the ESBT. Notwithstanding the preceding sentence, however, if the distributee trust is a trust described in section 1361(c)(2)(A)(ii) or (iii), the estate described in section 1361(c)(2)(B)(ii) or (iii) is treated as the potential current beneficiary of the ESBT for the 2-year period during which such trust would be permitted as a shareholder.

See Reg. § 1.1361-1(m)(8)(vi), Example 6, reproduced in fn. 6027.

[6029] Reg. § 1.1361-1(m)(8)(v), Example 5, provides:

Potential current beneficiaries and distributee trust holding S corporation stock. Trust-1 has a valid ESBT election in effect. The trustee of Trust-1 has the power to make distributions to A directly or to any trust created for the benefit of A. On January 1, 2003, M creates Trust-2 for the benefit of A. Also on January 1, 2003, the trustee of Trust-1 distributes some S corporation stock to Trust-2. A, as the current income beneficiary of Trust-2, makes a timely and effective election to treat Trust-2 as a QSST. Because Trust-2 is a valid S corporation shareholder, the distribution to Trust-2 does not terminate the ESBT election of Trust-1. Trust-2 itself will not be counted toward the shareholder limit of section 1361(b)(1)(A). Additionally, because A is already counted as an S corporation shareholder because of A's status as a potential current income beneficiary of Trust-1, A is not counted again by reason of A's status as the deemed owner of Trust-2.

[6030] Code § 1361(c)(2)(B)(v).

to the extent exercised during that period,[6031] and the regulations now reflect this change.[6032] If a distribution can be made to an existing trust, that trust must be qualify under the general rules for trusts as S corporation shareholders;[6033] similar to the power of appointment rule, that rule does not apply until the distributee trust has been created.[6034]

[6031] Code § 1361(e)(2).

[6032] Reg. § 1.1361-1(m)(4)(vi)(A) provides:

> (A) *Powers of appointment*. A person to whom a distribution may be made during any period pursuant to a power of appointment (as described for transfer tax purposes in section 2041 and § 20.2041-1(b) of this chapter and section 2514 and § 25.2514-1(b) of this chapter) is not a potential current beneficiary unless the power is exercised in favor of that person during the period. It is immaterial for purposes of this paragraph (m)(4)(vi)(A) whether such power of appointment is a ``general power of appointment'' for transfer tax purposes as described in §§ 20.2041-1(c) and 25.2514-1(c) of this chapter. The mere existence of one or more powers of appointment during the lifetime of a power holder that would permit current distributions from the trust to be made to more than the number of persons described in section 1361(b)(1)(A) or to a person described in section 1361(b)(1)(B) or (C) will not cause the S corporation election to terminate unless one or more of such powers are exercised, collectively, in favor of an excessive number of persons or in favor of a person who is ineligible to be an S corporation shareholder. For purposes of this paragraph (m)(4)(vi)(A), a ``power of appointment'' includes a power, regardless of by whom held, to add a beneficiary or class of beneficiaries to the class of potential current beneficiaries, but generally does not include a power held by a fiduciary who is not also a beneficiary of the trust to spray or sprinkle trust distributions among beneficiaries. Nothing in this paragraph (m)(4)(vi)(A) alters the definition of "power of appointment" for purposes of any provision of the Internal Revenue Code or the regulations.
>
> (B) *Powers to distribute to certain organizations not pursuant to powers of appointment*. If a trustee or other fiduciary has a power (that does not constitute a power of appointment for transfer tax purposes as described in §§ 20.2041-1(b) and 25.2514-1(b) of this chapter) to make distributions from the trust to one or more members of a class of organizations described in section 1361(c)(6), such organizations will be counted collectively as only one potential current beneficiary for purposes of this paragraph (m), except that each organization receiving a distribution also will be counted as a potential current beneficiary. This paragraph (m)(4)(vi)(B) shall not apply to a power to currently distribute to one or more particular charitable organizations described in section 1361(c)(6). Each of such organizations is a potential current beneficiary of the trust.

[6033] Reg. § 1.1361-1(m)(4)(iv)(B).

[6034] Reg. § 1.1361-1(m)(4)(iv)(A), which further provides:

> For this purpose, a trust is not currently in existence if the trust has no assets and no items of income, loss, deduction, or credit. Thus, if a trust instrument provides for a trust to be funded at some future time, the future trust is not currently a distributee trust.

An ESBT cannot have a beneficiary whose interest was acquired by purchase.[6035] This prohibition does not have anything to do with whether the trust has purchased or might later purchase S stock.[6036]

[6035] Code § 1361(e)(1)(A)(ii). For whether a change in a beneficiary's interest in a trust might cause an interest in the trust to be obtained by purchase in violation of this rule, see Potter, Trust Decanting of S corporation Shareholders: Avoiding Inadvertent Termination of the Company's S Election, *TM Memorandum* (BNA) (12/29/2014) or *TM Estates, Gifts and Trusts Journal* (BNA) (3/12/2015). Letter Ruling 201834007 ruled:

> A is causing A's grantor trust to transfer the shares of X stock to the Trust pursuant to the divorce Decree, and the amount of the liabilities assumed plus the liabilities that the property transferred is subject to does not exceed the adjusted basis of the property transferred.
>
> Accordingly, based on the facts submitted and representations made, provided that the transfer of the shares of X stock to the Trust occurs within six years of the entry of final judgment and the terms of the Trust as executed by A and B remain materially identical to those submitted, we conclude that § 1041(a) applies and A and B will not recognize any gain or loss on the transfer of the shares of X stock from A's grantor trust to the Trust.
>
> Further, § 1041(b) applies such that the transfer is treated as a gift under § 1041(b). As such, B's acquisition of B's lifetime distribution rights in the Trust for consideration is not a purchase within § 1361(e) because the sale is not governed by § 1012(a). Accordingly, B's acquisition of B's distribution rights will not disqualify Trust from being an ESBT.

Letter Rulings 201436006 and 201436007 ruled that the following transactions did not constitute a prohibited purchase of an interest in a trust:

> X created Trust 1 on D1. Trust 1 is a grantor trust wholly owned by X. X proposes to create Trust 2 which will be a grantor trust wholly owned by X. X proposes to contribute S corporation stock to Trust 2 and sell the Trust 2 remainder interest to Trust 1. Trust 2 will elect to be an electing small business trust (ESBT) under 1361(e) upon creation.
>
> ….
>
> [W]e conclude that the sale of the Trust 2 remainder interest to Trust 1 will not disqualify Trust 2 from being an ESBT under § 1361(e) during the period when Trust 1 is a grantor trust as to X because the sale of the remainder interest is not a purchase within the meaning of § 1361(e). The sale of the remainder interest is not a purchase within the meaning of 1361(e) because the sale is not governed by § 1012(a). However, to the extent that the sale is treated as a gift, the sale will be covered by § 1015(a). In addition, we conclude that Trust 2 will not cease to be or fail to qualify as an ESBT after the termination of Trust 1's grantor trust status because Trust 1's acquisition of the remainder is not a purchase within the meaning of § 1361(e).

[6036] Reg. § 1.1361-1(m)(1)(iii) provides:

> *Interests acquired by purchase*. A trust does not qualify as an ESBT if any interest in the trust has been acquired by purchase. Generally, if a person acquires an interest in the trust and thereby becomes a beneficiary of the trust as defined in paragraph (m)(1)(ii)(A), and any portion of the basis in the acquired interest in the trust is determined under section 1012, such interest has been acquired by purchase. This includes a net gift of a beneficial interest in the trust, in which the person acquiring the beneficial interest pays the gift tax. The trust itself may acquire S corporation stock or other property by purchase or in a part-gift, part-sale transaction.

T.D. 8994 (5/13/2002) stated:

> Two commentators requested clarification on whether a trust is eligible to be an ESBT if it acquires property in a part-gift, part-sale transaction, such as a gift of encumbered property or a net gift, in which the donor transfers property to a trust provided the trust pays the resulting gift tax. Section 1361(e)(1)(A)(ii) provides that a trust is eligible to be an ESBT only if "no interest in the trust was acquired by purchase." Section 1361(e)(1)(C) defines <u>purchase</u> as "any acquisition if the basis of the property acquired is determined under section 1012." The proposed regulations provide that if any portion of a beneficiary's basis in the beneficiary's interest is determined under section 1012, the beneficiary's interest was acquired by purchase. The final regulations clarify

If an ESBT transfers stock to a qualified voting trust,[6037] the ESBT continues to be treated as the owner for purposes of reporting income and the current beneficiaries of the ESBT continue to be treated as the shareholders for purposes of determining whether the corporation remains eligible to be taxed as an S corporation.[6038]

If an ESBT is decanted, be sure to file a new ESBT election.[6039]

A trust ceases to be an ESBT on the first day the trust fails to meet the definition of an ESBT, and the last day the trust is treated as an ESBT is the day before the date on which the trust fails to meet the definition of an ESBT.[6040] A trust ceases to be an ESBT on the first day following the day the trust disposes of all S corporation stock; but, if the trust is using the installment method to report income from the sale or disposition of its stock in an S corporation, the trust ceases to be an ESBT on the day following the earlier of the day the last installment payment is received by the trust or the day the trust disposes of the installment obligation.[6041]

III.A.3.e.ii.(b). ESBT Income Taxation - Overview

ESBT income taxation is complicated. An ESBT is treated as two separate trusts for purposes of chapter 1 of subtitle A of the Code.[6042] The portion that consists of stock in one or more S corporations is treated as one trust, and the portion that consists of all the other assets in the trust is treated as a separate trust.[6043] The grantor trust rules trump this treatment;[6044] but, to the extent a nonresident alien is a deemed owner, that portion is reallocated to the nongrantor S portion.[6045] However, the ESBT is treated as a single trust for administrative purposes, such as having one taxpayer identification number and filing one tax return.[6046]

The income from the Schedule K-1 that the S corporation files for the trust is separately taxed to the trust at the highest individual income tax rate for that type of income.[6047] Very few deductions are allowed against this income, and the income distribution deduction is not

---

> that the prohibition on purchases applies to purchases of a beneficiary's interest in the trust, not to purchases of property by the trust. A net gift of a beneficial interest in a trust, where the donee pays the gift tax, would be treated as a purchase of a beneficial interest under these rules, while a net gift to the trust itself, where the trustee of the trust pays the gift tax, would not.

The Joint Committee on Taxation, *General Explanation of Tax Legislation Enacted in the 104th Congress* (JCS-12-96), December 18, 1996 (Blue Book), stated:

> No interest in the trust may be acquired by purchase. For this purpose, "purchase" means any acquisition of property with a cost basis (determined under sec. 1012). Thus, interests in the trust must be acquired by reason of gift, bequest, etc. The trust itself may acquire property (including stock of an S corporation) by purchase.

[6037] See part III.A.3.b.iv A Trust Created Primarily to Exercise the Voting Power of Stock Transferred to It.
[6038] Letter Ruling 201837012.
[6039] Letter Ruling 201442047, essential parts of which are reproduced in the text accompanying fn 2970 in part II.J.18.c.ii Tax Consequences of Decanting, viewed decanting as requiring a new ESNT election. The ruling seems to indicate that beneficial interests did not change in the trust merger and that the decanting was solely to change trustee provisions.

available;[6048] capital loss carryforwards appear to be allowable.[6049] Two CCAs discussed how ESBTs treat NOLs:

CCA 200734019 involved the following facts:

> Trust was created pursuant to the last will and testament of A, who died on Date 1 . Trust, a residuary testamentary trust, was funded on Date 2 with various assets including the stock of X, an S corporation. Prior to A's death, A held the X stock directly. During the administration of A's estate, the estate did not have sufficient income to absorb losses attributable to the X stock which gave rise to a NOL as defined under § 172.
>
> The NOL carryover remained unused upon the termination of A's estate on Date 2 , the same date that Trust was funded. As a residuary testamentary beneficiary of A's estate, Trust succeeded to the NOL carryover that was unused by A's estate at the time of its termination under § 642(h)(1).
>
> Trust qualified as a permissible S corporation shareholder under § 1361(c)(2)(A)(iii) during the 2-year period beginning on Date 2, the date the X stock was transferred to it pursuant to A's will. In order to remain an eligible trust following the 2-year period, the trustee made an election for Trust to be an ESBT under § 1361(c)(3), effective Date 3.

CCA 200734019 asserted:

> We conclude that § 641(c)(2)(C) provides a complete list of the items of income, loss, deduction, or credit that the S portion of an ESBT may take into account. Section 642(c)(2)(C), flush language, provides that "no deduction or credit shall be allowed for any amount not described in this paragraph." The NOLs that Trust succeeded to under § 642(h)(1) are not described in § 641(c)(2)(C); therefore, the S portion of Trust is precluded from taking deductions attributable to those NOLs. However, the NOLs should be available as a deduction to the non-S portion Trust following Trust's ESBT election.

CCA 202335014 posited the following facts:

> In its X taxable year, an S corporation incurred an NOL that it passed through to its sole shareholder, an ESBT. The ESBT had sufficient basis in its stock to fully claim the loss. However, it did not have sufficient income in its S portion to cover the loss, thus creating an NOL at the trust level. The ESBT carried the NOL to its Y taxable year to use against the income of the S portion.

CCA 202335014 explained:

> S corporation shareholders generally take into account in their current taxable year the items their pro rata share of the S corporation's income, loss, deduction, or credit allocated to them under § 1366(a)(1). But the ability to use the losses flowing through in

---

[6048] Code § 641(c)(2).

[6049] Reg. § 1.641(c)-1(d)(3)(i) disallows deductions for losses capital losses that exceed gains by more than $3,000 under Code § 1211(b) but does not refer to capital loss carryforwards under Code § 1212. Nothing directly addresses whether capital losses incurred before making an ESBT election but relating to S corporation items can be deducted against capital gain incurred while an ESBT.

the current year may be limited for various reasons, including when the shareholder's current year income is less than the amount of the losses, the basis limitation of § 1366(d)(1) applies, or other provisions of law such as the "at-risk" rules under § 465 or the passive loss rules under § 469, and such suspended losses will be deductible in other taxable years only as specifically authorized by the relevant provision.

In the case of an individual S corporation shareholder who is allocated a loss from the corporation, if the amount of the loss exceeds the shareholder's gross income for the taxable year, the shareholder may sustain an NOL, which the shareholder may carry to another taxable year pursuant to § 172(b) and claim an NOL deduction under § 172(a). However, if such a loss is allocated to the S portion of an ESBT shareholder and creates a trust-level NOL, the special rules of § 641(c)(2)(C) are implicated, complicating the question of whether such NOL may be carried over to another taxable year of the trust and taken into account by the S portion in that year.

Uncertainty in this area has been created in part by commentators' speculation as to the meaning of CCA 200734019 (issued 8/24/07). In the CCA, Trust was a residuary testamentary trust created pursuant to the will of A, who died on Date 1. On Date 2, Trust was funded with assets including stock of X, an S corporation, which A had held directly during life. During the administration of A's estate (between Dates 1 and 2), A's estate did not have sufficient income to absorb losses attributable to the X stock, giving rise to an NOL. The NOL carryover remained unused at the termination of the estate and funding of Trust on Date 2, and Trust succeeded to it under § 642(h)(1). Pursuant to § 1361(c)(2)(A)(iii), Trust qualified as an S corporation shareholder for the 2-year period beginning on Date 2. To remain as an eligible shareholder following that period, Trust elected to be an ESBT effective Date 3.

The CCA concludes that § 641(c)(2)(C) provides a complete list of the items of income, loss, deduction, or credit that the S portion of an ESBT may take into account, the flush language specifically denying a deduction or credit for any amount not included in the statutory list. Because the NOLs that Trust succeeded to under § 642(h)(1) are not listed, the S portion was precluded from taking deductions attributable to them. However, the NOLs would be available as a deduction to the non-S portion. The CCA notes that the taxpayer had argued that the NOL should be allocated to the S portion of Trust because it is attributable to losses sustained by the S corporation whose stock is held in that portion. The CCA rejects this taxpayer argument based on the "plain language" of § 641(c)(2)(C).

A standard treatise, S Corporations Federal Taxation (May 2020 updated version), Blau, Richard D., Lemons, Bruce N., and Rohman, Thomas P., (hereinafter, "Blau") suggests at § 19:35 a possible government interpretation of the CCA that would forbid the S portion of an ESBT from using NOL carryovers in any situation:

> As an additional example, consider that while losses that pass through the S corporation to the ESBT under § 1366 are specifically required to be taken into account in the S portion of the trust, the S portion of the trust may have insufficient income to absorb these losses in a particular year. In that case, the S portion of the trust would carry such loses back forward [sic], presumably, under § 172 to a prior or future year. But, when the losses are carried forward to the future year, the losses arise, not under § 1366, but, rather, under § 172. The Service might argue that since losses under § 172 are not 'items required to be taken into account under § 1366' as

provided in § 641(c)(2)(C), these types of carry forward losses can only be taken into account with respect to the non-S portion of the trust, perhaps resulting in the inability to use the losses against future income of the S corporation passed through to the S portion of the trust. One can argue that such an approach would not be appropriate.

The footnotes to the quoted text cite to the CCA and suggest that its holding could have been reached on other grounds: “One way of dealing with this issue would have been for the Service to simply have noted that since the losses had arisen before the trust was an ESBT, the losses were necessarily part of the non-S portion of the trust.” They then suggest multiple reasons in opposition to a reading of the CCA as disallowing any NOL carryovers to the S portion of an ESBT, which we paraphrase as follows:

1. There is no policy ground for disallowing losses carried forward or back under a section other than § 1366. The statute and regulation only require that they “originate” under § 1366. Section 1.641(c)-1(d)(2)(i) states that rules otherwise applicable to trusts apply in determining the extent to which a loss or deduction may be taken into account by the S portion; under those rules, a trust would normally be able to carry over a § 1366 loss under § 172.

2. Disallowing losses that flowed through under § 1366 in a prior or subsequent year leads to an unreasonable result. If an ESBT owned stock in two S corporations, it would clearly be able to offset flow-through gain from one with a flow-through loss from the other, yet a narrow reading of the CCA would disallow the use of losses from one corporation against gain from that same corporation if they occurred in different years, which the treatise describes as “simply mak[ing] no sense.”

3. As previously noted, the CCA conclusion could have been reached on the alternative ground that the losses were part of the non-S portion because they arose before the trust was an ESBT that had an S portion.[2]

4. Losses suspended under § 1366(d) because of insufficient current year basis would be treated more favorably than other losses for no apparent reason. The statute explicitly allows these losses to carry forward, whereas losses based on insufficient current year income would be permanently lost.

5. Section 1.641(c)-1(j) does not imply any limit on the use of NOL carryovers by the S portion of an ESBT during its existence, but merely addresses the use of unused NOLs upon the termination of the S portion.

[2] This point is not convincing. We would have reached the same answer in the CCA, as in this document, if the testamentary trust and the ESBT had existed concurrently.

We agree with the commentators that the holding of the CCA does not require the disallowance of all NOL carryovers by the S portion of an ESBT. The ESBT described in the CCA received the NOL carryovers from another taxpayer, the estate, under the special rule of § 642(h)(1) allowing these items to be carried over to a successor rather than lost at the estate’s termination. The ESBT never had a § 1366 item related to these losses. We believe that if a loss flowing through to the S portion of an ESBT under § 1366 cannot be used in the current taxable year because of the lack of offsetting income, it is nonetheless an item “taken into account” by reason of § 1366 in the prior or

> subsequent year in which it is deductible under § 172. To hold otherwise is to defeat the language of both § 1.641(c)-1(d)(2)(i) that the rules "otherwise applicable to trusts apply in determining the extent to which any loss, deduction, or credit may be taken into account," and of § 1.642(d)-1 providing that the § 172 NOL deduction should be "generally" available other than for listed exceptions. We do not feel compelled to interpret § 641(c)(2)(C) in a manner that anomalously disadvantages certain § 1366 flow-through losses relative to others or ESBTs relative to other S corporation shareholders.

State and local income taxes and administrative expenses directly related to the S portion and those allocated to that portion are taken into account by the S portion.[6050] These items may be allocated in any manner that is reasonable in light of all the circumstances, including the terms of the governing instrument, applicable local law, and the trustee's practice with respect to the trust if it is reasonable and consistent.[6051] Note that the $10,000 limit on state income tax deductions[6052] would apply separately to the S portion and the non-S portion,[6053] allowing the trust to deduct up to $20,000 in state income tax.

Complications arise if the ESBT is a grantor trust in whole or in part or if the trust is a charitable lead trust or other trust eligible for a charitable income tax deduction. The charitable deduction applies only the charitable contributions passing through a K-1 from the S corporation to the trust and not to contributions made by the trust.[6054] Effective for tax years beginning after December 31, 2017, an ESBT's contribution deduction does not apply Code § 642(c) but rather uses the Code § 170 limits based on the rules that apply to individuals,[6055] which means that the

[6050] Reg. § 1.641(c)-1(d)(4)(i), which is specifically authorized by Code § 641(c)(2)(C)(iii).
[6051] Reg. § 1.641(c)-1(h). For an example, see Reg. § 1.641(c)-1(*l*)(1)(iv).
[6052] For the $10,000 limit, see the text accompanying fn 2509 in part II.J.3.d Who Benefits Most from Deductions. Because Reg. § 1.641(c)-1(d)(4)(i).says that these taxes are "taken into account," rather than "deducted," the regulation does not appear to provide an independent basis for a deduction.
[6053] See fns 6042-6043 in this part III.A.3.e.ii.(b).
[6054] The charitable deduction is not allowed against ESBT income if made directly by the trust. See Code § 641(c)(2)(C) and Reg. § 1.641(c)-1(d)(1), disallowing all deductions except those expressly listed (but the deduction should be allowed against the non-S portion of the trust). However, Reg. § 1.641(c)-1(d)(2)(ii) describes charitable deductions passing through a K-1 the ESBT receives from an S corporation:

> *Special rule for charitable contributions*. If a deduction described in paragraph (d)(2)(i) of this section [referring to K-1 items] is attributable to an amount of the S corporation's gross income that is paid by the S corporation for a charitable purpose specified in section 170(c) (without regard to section 170(c)(2)(A)), the contribution will be deemed to be paid by the S portion pursuant to the terms of the trust's governing instrument within the meaning of section 642(c)(1) [the unlimited charitable deduction for trusts]. The limitations of section 681, regarding unrelated business income, apply in determining whether the contribution is deductible in computing the taxable income of the S portion.

Code § 512(e)(1)(B)(i) provides all S corporation K-1 income is per se unrelated business income, so Code § 681 and Reg. § 1.681(a)-2(a) would apply the individual contribution limits, rather than the unlimited Code § 642(c), to such deductions. For more information about Code § 681, mentioned in the last sentence of this regulation, see part II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction.
[6055] Code § 641(c)(2)(E) provides:

> (i) Section 642(c) shall not apply.
> (ii) For purposes of section 170(b)(1)(G), adjusted gross income shall be computed in the same manner as in the case of an individual, except that the deductions for costs which are paid or

charitable deduction generally is based on the fair market of property donated, in contrast to the Code § 642(c) deduction being limited to the property's adjusted basis;[6056] furthermore, Code § 170 but not Code § 642(c) deductions may be passed through to beneficiaries as excess deductions on termination.[6057] For other differences between Code §§ 170 and 642(c), see part II.J.4.c Charitable Distributions.

For application of the passive loss rules to ESBTs, see part II.K.2.b.v Electing Small Business Trusts (ESBTs) and the Passive Loss Rules.

Regarding the Code § 199A deduction, which generally is 20% of qualified business income, see part II.E.1.f Trusts/Estates and the Code § 199A Deduction, especially part II.E.1.f.ii Electing Small Business Trusts (ESBTs).

If the nongrantor trust portion of an ESBT is included in a person's estate, the ESBT election might prevent a basis step-up of depreciable property.[6058]

For a corporate split-up involving ESBTs, see Letter Ruling 202033005, when a family business divided when a trust holding it terminated. It is reproduced in part II.Q.7.f.ii.(f) Continuity of Interest.[6059]

III.A.3.e.ii.(c). When ESBT Income Taxation Might Help

ESBT income taxation can be favorable in the right circumstances. For example:

- The trust's income might be taxed at lower state income rates (or not at all) inside the trust than in the beneficiary's hands, or
- The beneficiary might be in the top income tax bracket, and reporting additional income would cause the beneficiary to lose some itemized deductions, AMT exemption, or personal exemptions.

In either case, the ESBT can make distributions to the beneficiary without passing S corporation income to the beneficiary. To maximize this flexibility, the trustee might consider dividing the ESBT into two separate trusts – one that holds S stock and one that holds any distributions that the trustee intends to reinvest, based on the following analysis:

> incurred in connection with the administration of the trust and which would not have been incurred if the property were not held in such trust shall be treated as allowable in arriving at adjusted gross income.

The Senate report adopting this rule said:

> The Senate amendment provides that the charitable contribution deduction of an ESBT is not determined by the rules generally applicable to trusts but rather by the rules applicable to individuals. Thus, the percentage limitations and carryforward provisions applicable to individuals apply to charitable contributions made by the portion of an ESBT holding S corporation stock.

[6056] See fn 4925 in part II.Q.7.c.i.(a) Contribution Must Be Made from Gross Income.
[6057] See text accompanying fn 2561 in part II.J.3.i Planning for Excess Losses.
[6058] See part II.J.11.a.ii.(c) Trust vs. Separately Recognized Business Entity Holding Depreciable Property, particularly fns. 2895-2896.
[6059] Beginning with the text accompanying fn 5028.

1. Distributions from a trust that generates investment income (other than S corporation K-1 income) will carry out income to the beneficiary.

2. If the investments are held in a separate trust, that trust can accumulate income and trap the investment income.

3. Therefore, when the trustee of the trust that holds S stock receives a distribution, the trustee would retain enough to pay income tax and administrative expenses, distribute to the beneficiary as appropriate, and then transfer the balance of the cash to the trust that generates investment income.

This three-part analysis applies when the S corporation distributes all of its income. It would not apply if the corporation distributes only enough for its shareholders to pay tax and uses the rest to grow the business (or its marketable securities portfolio). For trusts that are somewhere in between, it might or might not be helpful.

III.A.3.e.iii. Comparing QSSTs to ESBTs

A QSST tends to be used when:

- The trust is a marital trust or other trust whose income is required to be distributed currently to one beneficiary with no other current beneficiary. Under the marital trust rules,[6060] all income must be distributed annually, which means that, under normal trust rules, the income that the spouse is required to receive is taxable to her, just like any other mandatory income beneficiary.[6061]

- The beneficiary's income tax rate is lower than the trust's income tax rate. Because trust income above a modest threshold is taxed at the highest possible rates that apply to individuals,[6062] a beneficiary in a lower bracket should save taxes.

A QSST is not the best for trusts intended to accumulate their income, including trusts with multiple current beneficiaries. In most such cases, such trusts should be ESBTs.

ESBTs might avoid the 3.8% NII tax[6063] by appointing a trustee who is active in the business if the beneficiary is not active in the business.[6064] A QSST's income is not subject to the 3.8% NII tax if the beneficiary is active in the business[6065] or has income below the threshold;[6066] however, because the trustee's participation is what counts when the QSST sells the stock, consider making the trustee active well in advance of a potential sale.[6067] Also note that, if the

[6060] Code §§ 2056(b)(1) and 2523(b).
[6061] Code § 651.
[6062] Code § 1(e)(2).
[6063] For the 3.8% tax on net investment income (NII), see II.I 3.8% Tax on Excess Net Investment Income. For calculating the tax on an ESBT, see fn 2912 (which also refers to an example in the proposed regulations) and the accompanying text.
[6064] See parts II.K.2.b.i Participation by a Nongrantor Trust: Authority and II.K.2.b.ii Participation by a Nongrantor Trust: Planning Issues.
[6065] A QSST is a grantor trust deemed owned by the beneficiary. The 3.8% tax looks to the character of the income in the hands of the deemed owner; see fn. 2318.
[6066] See part II.I.3 Tax Based on NII in Excess of Thresholds.
[6067] See part II.J.17 Planning for Grantor and Nongrantor Trusts Holding Stock in S Corporations in Light of the 3.8% Tax.

trust directly or indirectly owns real estate that is rented to the S corporation, a QSST election might complicate a trust's qualification for the self-rental exception, which exception would enable the taxable rental income avoid the 3.8% NII tax, so the trustee might consider retaining some stock in an ESBT, rather than moving all of the stock into a QSST.[6068] See also part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good.

See part III.A.3.e.i.(b) QSST Issues When Beneficiary Dies, for a discussion of various issues one should consider when a beneficiary makes a QSST election.

Other than possible complexity regarding taxes on the earned but undistributed income, a QSST generally has more flexibility than an ESBT. A QSST offers options for deferring S corporation trust tax elections.[6069] If the trustee of an irrevocable grantor trust makes an ESBT election as a protective measure,[6070] the trust's ESBT taxation continues after death,[6071] in effect springing into place without any of the savings that other former irrevocable grantor trusts (including QSSTs) have.[6072]

On the other hand, ESBTs might provide more flexibility that QSSTs in avoiding adverse taxation of certain related party sales of depreciable or amortizable property or in replicating an inside basis step-up if the stock receives a basis step-up. For related party sales, see part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill). For inside basis step-up opportunities,[6073] see part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation, explaining how to replicate an inside basis step-up for property to the extent that Code § 1239 is not triggered, as

[6068] See part II.I.8.g Structuring Businesses in Response to 3.8% Tax, particularly the text accompanying fns. 2460-2461.

[6069] See text accompanying fns. 6000-6001.

[6070] A trustee cannot make a conditional ESBT election. Reg. § 1.1361-1(m)(2)(v). If the trustee of a grantor trust makes an unconditional current ESBT election, the election is in effect but does not control the trust's taxation to the extent trumped by the grantor trust rules. Reg. § 1.641(c)-1(c). T.D. 8994 (5/13/2002) includes the government's response to the idea that a protective ESBT election should be available:

> One commentator suggested that grantor trusts should be permitted to make protective ESBT elections in light of the uncertain status of some trusts that may be grantor trusts under section 674. The IRS and the Treasury Department continue to believe that a conditional ESBT election that only becomes effective in the event the trust is not a wholly-owned grantor trust should not be available. A conditional ESBT election should not be allowed because the ESBT election must have a fixed effective date. If, in the absence of a conditional ESBT election, the trust is an ineligible shareholder, relief under section 1362(f) may be available for an S corporation. In addition, a trust that qualifies as an ESBT may make an ESBT election notwithstanding that the trust is a wholly-owned grantor trust.

[6071] Reg. § 1.1361-1(m)(8)(iv), Example 4.

[6072] part III.A.3.b Comprehensive Description of Types of Trusts That Can Hold Stock in an S Corporation, especially part III.A.3.b.ii A Trust That Was a Grantor Trust with Respect to All of Its Assets Immediately Before the Death of The Deemed Owner and Which Continues in Existence After Such Death regarding a grantor trust's continuing eligibility to hold S stock for two years after the deemed owner's death. Normal trust income tax rules, which generally are more favorable than ESBT income tax rules, apply during that time. See text accompanying fns. 6047-6049 for ESBT taxation.

[6073] Part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations explains such issues.

well as state income tax issues that can complicate matters when the taxpayer is not a resident of the state in which the property is located.[6074]

A QSST complicates purchases made out of earnings, as described in part III.A.3.e.vi.(c) Required Structure for a Sale to a QSST. In ESBTs, interest on the promissory note is deductible only for tax years beginning after December 31, 2006.[6075] A better solution is a trust taxable to its beneficiary under Code § 678.[6076] Also, it might be possible for the income beneficiary to sell S corporation stock to the QSST and not recognize gain or loss on the sale.[6077]

III.A.3.e.iv. Flexible Trust Design When Holding S Corporation Stock

Consider a GST-exempt trust with only one beneficiary, with discretionary distributions of income and principal under an ascertainable standard. An independent person is authorized to direct that, for a period of no less than 36 months, all of the income is required to be distributed, based on the following:

- The minimum period of time between ESBT and QSST conversions is 36 months. This minimum period applies between conversions but does not apply to the first conversion. In other words, once the first ESBT or QSST election is made, a conversion to the alternate form (QSST or ESBT) can be made at any time. However, once one converted from a QSST to an ESBT or vice versa, the 36-month period applies in reversing the conversion.[6078] But for this process, Reg. § 1.1361-1(m)(6) provides:

  > An ESBT election may be revoked only with the consent of the Commissioner. The application for consent to revoke the election must be submitted to the Internal Revenue Service in the form of a letter ruling request under the appropriate revenue procedure.

- Mandatory distributions ensure no missteps in distributing income to maintain QSST status, because mandatory income trusts are not required to prove actual distributions of all of the income. However, a trust that actually distributes all of its income qualifies even without a mandatory distribution clause.[6079]

- Before converting, split the trust if it has assets other than S corporation stock, so that the other assets are not subjected to the QSST distribution scheme.

- The independent person would also be authorized to turn off the mandatory income direction for any trust taxable year that begins after the date the mandatory income direction is turned off. (Otherwise, the IRS might argue that the mandatory income provision is illusory because it could get turned off at any time during the year.)

[6074] See part II.H.8.a.ii State Income Tax Disconnect.
[6075] Reg. § 1.641(c)-1(d)(4)(ii) provides, (ii) *Special rule for certain interest*. Interest paid by the trust on money borrowed by the trust to purchase stock in an S corporation is allocated to the S portion but is not a deductible administrative expense for purposes of determining the taxable income of the S portion. This was repealed for tax years beginning after December 31, 2006 by Code § 641(c)(2)(C)(iv).
[6076] See fn 5863.
[6077] See part III.B.2.i.xiv QSST as an Alternative Form of Beneficiary Deemed-Owned trust.
[6078] Reg. §§ 1.1361-1(j)(12)(iii), 1.1361-1(m)(7)(iii).
[6079] See fn. 5971.

This would open up the opportunity to toggle between QSST and ESBT taxation, while allowing any ESBT income to accumulate inside an environment protected from estate taxes and creditors. After a trust has been an ESBT for 36 months, it may be divided into a separate trust for each beneficiary, and each new trust can separately either continue as an ESBT or become subject to a QSST election.[6080] Thus, every three years the trustee can consider how much of the trust should be a QSST and how much an ESBT and then ask the independent person to adjust the mandatory income direction as appropriate. This toggling decision would take into account the expected annual S corporation income, the beneficiary's adjusted gross income, and the beneficiary's participation in the business (see below).

In making these elections, consider part III.A.3.c.iii Deadlines for QSST and ESBT Elections.

Note that toggling only affects whether income distributions to that beneficiary may or must be mandatory or discretionary; the beneficiary must remain the trust's sole beneficiary of income[6081] and principal[6082] during the beneficiary's life.[6083] Thus, if the beneficiary has an inter vivos limited power of appointment, the beneficiary can hold the power of appointment during an initial ESBT period,[6084] but once the trust converts to a QSST the beneficiary must permanently renounce the power of appointment.

S corporation business income is free from the 3.8% tax on net investment income (NII) if the recipient significantly participates in the S corporation's business activity.[6085] For a QSST, one would look to the beneficiary's participation, whereas for an ESBT the IRS would look to the participation of a trustee;[6086] however, for a QSST, the IRS would look to trustee participation when the trust sells S corporation stock or the S corporation sells substantially all of its business assets.[6087]   If the beneficiary materially participates in the business, then either QSST or ESBT taxation could avoid the tax, the latter if the beneficiary is appointed as a trustee for purposes of holding the S corporation stock and satisfies the rules for trustee participation.[6088] If the beneficiary does not materially participate in the business, the S corporation income would constitute NII; however, the beneficiary might be in a sufficiently low tax bracket that the 3.8% tax on NII might not apply to the beneficiary at all.

Additionally, if the beneficiary already owns stock in the S corporation, the trust might buy the stock from the beneficiary, perhaps without any capital gain tax on the sale.[6089]

[6080] Letter Ruling 201122003.
[6081] Code § 1361(d)(3)(A)(i).
[6082] Code § 1361(d)(3)(A)(ii).
[6083] Rev. Rul. 93-31 provides that even a remote possibility of these conditions not being met would disqualify the trust from being a QSST. See fn 5987 in part III.A.3.e.i.(a) QSSTs Generally.
[6084] See text accompanying fns. 6031-6032.
[6085] See part II.I.8 Application of 3.8% Tax to Business Income (application of the 3.8% tax on net investment income), especially part II.I.8.f Summary of Business Activity Not Subject to 3.8% Tax.
[6086] See parts II.J Fiduciary Income Taxation (application of the 3.8% tax on net investment income) (particularly fn. 2318 and later sections of part II.J dealing with the sale of QSST or ESBT stock) and II.K.2 Passive Loss Rules Applied to Trusts or Estates Owning Trade or Business (determining when a trust materially participates).
[6087] See part II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax).
[6088] See parts II.K.2.b.i Participation by a Nongrantor Trust: Authority and II.K.2.b.ii Participation by a Nongrantor Trust: Planning Issues.
[6089] See part III.B.2.i.xiv QSST as an Alternative Form of Beneficiary Deemed-Owned trust.

Finally, QSSTs provide more post-mortem tax options than ESBTs, so pre-mortem toggling to QSST status can provide this enhanced flexibility.[6090]

III.A.3.e.v. Converting a Multiple Beneficiary ESBT into One or More QSSTs

III.A.3.e.v.(a). Strategic Issues

Every dollar of ESBT income is taxed at 37% federal income tax and 3.8% tax on net investment income ("NII").[6091] The beneficiaries' federal income tax brackets might be significantly lower,[6092] and the NII tax would not apply except to the extent that their modified adjusted gross income exceeds $200,000 for a single individual or $250,000 for a married person filing jointly.

However, any trustee and tax preparation fees might be deductible by the beneficiaries as miscellaneous itemized deductions (and disallowed for AMT purposes) rather than being deducted directly against the S corporation income.[6093]

This might increase the state income tax on the business income. As an ESBT, only the trust's state income tax posture is considered. Depending on the ESBT's state of residence, the ESBT might not be responsible for tax on the trust's income (particularly investment income) that is not sourced to a particular state. If the trust is converted to QSSTs, each beneficiary would need to file an income tax return for each state in which the S corporation does business, reporting his or her share of each state's income, thereby complicating each beneficiary's income tax return preparation. Additionally, each beneficiary who lives in a state with income tax would need to pay state income tax on his or her share of income, ameliorated in whole or in part by a credit for income taxes paid to other states.

The ESBT might have been accumulating income or perhaps distributing income to separate GST-exempt trusts for beneficiaries, the latter so that each beneficiary decides on a case-by-case basis whether to accumulate income in a protected trust. This accumulation might be important for estate tax reasons, as well as perhaps for nontax reasons. Now, however:

- With the $5+ million estate tax exemption, this accumulation strategy has less estate tax benefit, if the beneficiaries do not have estates near the exemption.

- Trusts that accumulate income face the same increase in federal income tax and NII tax as described above if they are ESBTs or have more than $12,000[6094] in taxable income, so the accumulation strategy would have additional income tax costs.

[6090] See text accompanying fn. 6069.
[6091] See part II.I 3.8% Tax on Excess Net Investment Income. It's possible that some ESBT income might be below the adjusted gross income threshold. See part II.J.14 Application of 3.8% NII Tax to ESBTs.
[6092] Consider the effect of phase-outs based on adjusted gross when evaluating the beneficiaries' income tax rates.
[6093] Reg. § 1.67-2T(b)(1).
[6094] $12,750 in 2019 per Rev. Proc. 2018-57, § 3.01, Table 5; presumably higher in future years.

III.A.3.e.v.(b). Implementation

The trustee might consider the following:

- Evaluate the trustee's authority to divide trusts and to convert separate trusts into QSSTs. If the trust has beneficiaries of more than one generation (*e.g.*, children and grandchildren), the trustee needs to consider any fiduciary duties to the lower generations (*e.g.*, grandchildren) in dividing the trust into separate trusts for the upper generation (*e.g.*, children). The trustee might obtain ratification from all adult beneficiaries to protect the trustee. The parent (who is not a beneficiary) of any minor or unborn descendant would sign on behalf of that descendant; this can be problematic if the child who is a beneficiary is divorced or otherwise having marital troubles. A consent by a beneficiary might raise Code § 2702 issues; this is less of a concern if the beneficiary had not been receiving distributions and never expected to receive distributions before that beneficiary's parent's death.

- If centralized management is a concern:

    - Determine whether the trustee is authorized to commingle the QSSTs, treating them as separate shares.[6095] The trustee might maintain a single new bank account for new deposits, which would then either distribute anything it receives or reimburse the existing account for administrative expenses the trust incurs. The division of shares would be done simply by recording the shares on a spreadsheet.

    - See whether the beneficiaries have the right to change the trustees of their separate trusts, which rights they might not have had in the main trust.

- Determine whether paying 100% of annual trustee fees and administrative expenses regarding the QSST portion out of income reasonably and fairly balances the interests of the income and remainder beneficiaries, as the trust might not have another source to pay those fees; the trustee would want to reserve the right to allocate them to principal in the year of sale.[6096] Normally such fees and expenses are allocated one-half to income and one-half to one-half to principal.[6097] Perhaps the corporation would pay the fees, but

[6095] This is permitted under the last sentence of Code § 1361(d)(3) and Reg. § 1.1361-1(j)(3).
[6096] Gain on sale of stock, including any gain reported on a K-1 form the S corporation issues reporting gain by reason of a Code § 338(h)(10) election to treat a stock sale as an asset sale, is taxable to the trust, rather than the being taxable as the grantor trust portion. See parts II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax) and III.A.3.e.i QSSTs, particularly the text accompanying fns. 5994-5996, dealing with sales of not only S corporation stock but also of an S corporation's business in an asset sale. For additional planning issues, see parts II.G.6 Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business and II.J.8.a.i Whether the Capital Gain Is from the Sale or Exchange of a Capital Asset (discussing whether the gain is included in DNI). Of course, the trust might obtain a distribution deduction by distributing the sale proceeds; see part II.J.8 Allocating Capital Gain to Distributable Net Income (DNI), especially part II.J.8.a.ii Whether the Gain from the Sale or Exchange of a Capital Asset Is Allocated to Corpus.
[6097] Section 501 of the Uniform Principal & Income Act.

note that the payment might need to be a separately stated K-1 item, if the character of the fees would change on a beneficiary's income tax return.[6098]

III.A.3.e.v.(c). Timing Tax Deductions in Year of Conversion

Consider which expenses would be better deductions against ESBT or QSST income and pay them in the appropriate time period.

K-1 items need to be pro-rated.[6099]

Presumably, administrative expenses relating to S corporation income would be allocated to the time before and after the conversion and any expenses allocable to the QSST portion would be deductible by the beneficiary.

III.A.3.e.vi. QSST as a Grantor Trust; Sales to QSSTs

Because the beneficiary pays tax on not only the S corporation's distributed income but also its undistributed income, a QSST can be a way to:

- Avoid high trust income tax rates and take advantage of a full run through the beneficiary's graduated tax rates.

- Allow the beneficiary to deduct a loss before the trust's termination, if the stock has sufficient basis.

- Have the beneficiary pay tax on any reinvested earnings used to grow the S corporation, increasing the trust's value and reducing the beneficiary's gross estate.

- Prevent the grantor of a trust for a spouse from being taxed on any reinvested taxable income after divorce.[6100] If the beneficiary/former spouse may also receive principal distributions, the beneficiary may elect to treat the trust as a QSST, thereby ensuring that the taxable items of the trust's assets inside an S corporation owned by the trust are taxable to the beneficiary, whether or not actually distributed to the beneficiary.[6101]

- Allow the beneficiary to sell S corporation stock (and, indirectly, other assets) to the trust on what appears to be a tax-free basis.[6102] A sale to an irrevocable grantor trust is a powerful estate planning technique.[6103] Clients sometimes balk at selling assets to a trust where they are not beneficiaries, because they might need the assets for their living expenses. For a client who refuses to part with all of the enjoyment of sufficient assets, consider suggesting

---

[6098] See text accompanying fn. 6093 and Code § 1366(a)(1)(A).
[6099] See part III.B.2.j.ii Tax Allocations on the Transfer of Stock in an S Corporation.
[6100] Code § 677 treats the grantor as owners of any items that can be distributed to or held for eventual distribution to the grantor or the grantor's spouse. Code § 672(e)(1)(A) treats as the spouse any individual who was the spouse of the grantor at the time of the creation of such power or interest. Thus, divorce does not terminate grantor trust treatment. However, Reg. § 1.682(a)-1(a)(1) provides that the grantor is not taxed as the owner to the extent that income is paid, credited, or required to be distributed and therefore taxed to the former spouse.
[6101] See fn. 5973, noting the contrast between paragraphs (ii) and (iii) within Example (10).
[6102] See part III.A.3.e.vi.(c) Required Structure for a Sale to a QSST (Including Possible Pitfalls).
[6103] See part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.

that he or she sell assets to a trust in which he or she is a beneficiary and is the deemed owner - a beneficiary deemed-owned trust.[6104]

The grantor trust aspects can be powerful planning techniques but are also subject to some significant disadvantages.[6105]

Beneficiary deemed-owned trusts involve complex tax issues, including the risk that the Internal Revenue Service, which generally has stopped issuing private letter rulings regarding such trusts,[6106] might at some point take a position inconsistent with its many past favorable private letter rulings. The complexity involved often includes a sale being highly leveraged (sometimes using a trust funded with no more than $5,000), which might invite IRS scrutiny.

QSSTs do not face the funding issues that apply to many other beneficiary deemed-owned trusts. They can be funded very substantially and still be entitled to grantor trust treatment.

III.A.3.e.vi.(a). Grantor Trust Issues Involved in a Sale of S Stock to a QSST

If a QSST buys the beneficiary's stock from the beneficiary after making a QSST election for its then-existing S stock (issued by the same corporation), that would be a disregarded transaction for income tax purposes, following the general principle under Rev. Rul. 85-13 that a transaction between a trust and its deemed owner (for income tax purposes) is disregarded (for income tax purposes).[6107]

The regulation that treats the beneficiary as the Code § 678(a) provides that the trust's <u>selling</u> or <u>distributing</u> the stock is attributable to the trust, not the beneficiary,[6108] but does not discuss the consequences of the trust <u>buying</u> S corporation stock. This regulation overrode Rev. Rul. 92-84, which applied grantor trust treatment to a QSST's sale of S corporation stock; however, the logic of Rev. Rul. 92-84 might continue to apply (as a matter of good analysis, not as a matter of precedent) to the extent that the regulation is silent. The preamble to the regulation[6109] overrode Rev. Rul. 92-84 for practical reasons: if the trust no longer holds S stock during the deferred consummation of an installment sale, how could QSST treatment apply? That should not be a concern when the trust is <u>buying</u> stock. Although the IRS might have concerns about the asymmetry involved (the trust buying stock from the beneficiary having a different result than

[6104] See part III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts.
[6105] See part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts.
[6106] Rev. Proc. 2015-3, Section 4.01(39), provides that ordinarily the IRS will not rule on:

> Whether a person will be treated as the owner of any portion of a trust over which that person has a power to withdraw the trust property (or had such power prior to a release or modification, but retains other powers which would cause that person to be the owner of the trust under § 671 if the person were the grantor), other than a power which would constitute a general power of appointment within the meaning of § 2041, if the trust purchases the property from that person with a note and the value of the assets with which the trust was funded by the grantor is nominal compared to the value of the property purchased.

[6107] Code § 1361(d)(1)(B) provides, for purposes of section 678(a), the beneficiary of such trust shall be treated as the owner of that portion of the trust which consists of stock in an S corporation with respect to which the [QSST] election … is made.
[6108] For gain on sale of stock or assets and for related planning opportunities, see text accompanying fns. 5994-5996.
[6109] T.D. 8600.

the trust selling stock to the beneficiary), those concerns would not appear to be supported by the IRS' official pronouncements.[6110]

If an income beneficiary who sells S corporation stock to an existing QSST that already owns stock in the same S corporation, the above analysis might be more comfortable. Three companion private letter rulings, in approving the merger of one QSST into another, used analysis that supports this concept:[6111]

> Under 1.1361-1(j)(7), the X shares which make up the corpus of Exempt QSST A and Exempt QSST B are treated as directly owned by Y. Any transfer of the X shares, pursuant to a merger under Article 5.6, would effectively be a transfer of the shares from Y to Y.

What is the tax treatment of interest payments on a promissory note a QSST uses to buy stock in an S corporation?[6112] The IRS has taken the position that, when the QSST buys stock from a

---

[6110] This asymmetry already exists under Rev. Rul. 85-13. In that ruling, initially the trust was not a grantor trust. The grantor bought stock from the trust in exchange for an unsecured promissory note. The note's existence is what made the trust a grantor trust deemed owned by its grantor and caused the transaction to be disregarded. On the other hand, if the trust had bought stock from its grantor, its grantor would have recognized gain on the sale, because a promissory note owed by the trust to the grantor would not have triggered grantor trust status. This asymmetry did not prevent that ruling from becoming the IRS' formal position.

Notice 97-24 points out that Rev. Rul. 85-13 avoids assets receiving a basis step-up. In the case of a beneficiary selling to a QSST, if the beneficiary did not pay capital gain tax on the sale to the trust, then the stock the trust acquires, which will be outside of the estate tax system, will not receive a new basis and therefore will be taxed more highly to the trust if sold after beneficiary's death (or after any other event terminating grantor trust status).

Based on a long line of law, Rev. Rul. 85-13 held that the deemed owner was the deemed owner of the trust's property. See fn. 6525.

The bottom line is that the beneficiary would be deemed to own the stock that the beneficiary sells to the trust both before and after the proposed transaction. One cannot have a recognition event when one sells closely-held business stock, which Rev. Rul. 90-7 expressly held is deemed owned by a trust's deemed owner, to oneself. Rev. Rul. 85-13 recognized this longstanding principle when it reasoned:

> A transaction cannot be recognized as a sale for federal income tax purposes if the same person is treated as owning the purported consideration both before and after the transaction. See *Dobson v. Commissioner*, 1 B.T.A. 1082 (1925).

The *Dobson* case itself involved closely-held business stock. Rev. Rul. 2007-13, reproduced in fn 4338 in part II.Q.4.b.i Transfer for Value Rule Generally, reaffirmed this concept, and it should be applied to the sale to a QSST as well.

[6111] Letter Rulings 200441013, 200441014, and 200441015.

[6112] In all fairness, the beneficiary should get the deduction, especially in light of the separate share rules under Code § 663. However, an argument can be made that only S corporation K-1 items are treated as part of the Code § 678 share allocated to the beneficiary. Code § 1361(d)(1)(B) provides, "for purposes of section 678(a), the beneficiary of such trust shall be treated as the owner of that portion of the trust which consists of stock in an S corporation with respect to which the election under paragraph (2) is made...." On the other hand, Code §§ 1361(d)(1)(B) and 641(c)(1)(A) use very similar language. Therefore, when an issue is not expressly addressed by authority, the ESBT and QSST rules should be read consistently. The principle behind the ESBT regulation quoted in fn 6075 tends to support the beneficiary's deduction of interest under Code § 1361(d)(1)(B) (or a disregard of the interest income and deduction under Code § 678 if the seller is the beneficiary), because the Regulation's allocation of the interest to the S portion remains intact.

third party using a promissory note, the note is part of the S corporation portion that is deemed owned by the QSST's beneficiary and therefore the interest is deductible by the beneficiary.[6113] Informal conversations indicated that this position was the result of discussions at the highest levels of IRS policy-makers. Interest expense is deductible on Schedule E, Part II of the beneficiary's individual income tax return.[6114]

This position - that the promissory note is part of the S corporation portion that the beneficiary is deemed to own - gives me confidence that a beneficiary's sale to a QSST would be disregarded under Rev. Rul. 85-13 because the beneficiary would be considered to be selling to himself or herself.[6115]

Furthermore, often a trust that holds stock in an S corporation is split off as a separate QSST, which never accumulates any income, because all of the income is distributed to the beneficiary. Allocating income to a nonexistent non-S portion would not make sense in those situations. That contrasts with ESBTs, where generally there is no reason for the S stock to be held in a separate trust.
Allocating the interest deduction to the non-S corporation portion of the trust would result in a mismatch, in that the interest the trust pays is allocated to income that the beneficiary, not the trust, is treated as owning for income tax purposes. It would appear to run counter to the spirit of the debt-tracing rules of Reg. § 1.163-8T, which would characterize the interest as related to the S corporation. If the interest is allocated to the non-S corporation portion of the trust, its deductibility should relate to the nature of the income passing through on the K-1 the trust receives from the company. To the extent the K-1 income is income from a trade or business, presumably the interest would be expense from trade or business that would generate a net operating loss carryover if the trust did not have sufficient other income.
Reg. § 1.163-8T(a)(4)(i). Notice 89-35 supports this approach:

> In the case of debt proceeds allocated under section 1.163-8T to the purchase of an interest in a passthrough entity (other than by way of a contribution to the capital of the entity), the debt proceeds and the associated interest expense shall be allocated among all the assets of the entity using any reasonable method. Reasonable methods of allocating debt among the assets of a passthrough entity ordinarily include a pro-rata allocation based on the fair market value, book value, or adjusted basis of the assets, reduced by any debt of the passthrough entity or the owner allocated to such assets.

If the trust generates a net operating loss (NOL) carryforward due to the interest expense, be sure not to make an ESBT election, as Chief Counsel Advice 200734019 takes the position that the NOL carryforward is not deductible against ESBT income.

[6113] CCA 201327009 allows the beneficiary to deduct the interest when the QSST buys from a third party using a promissory note. The IRS declined to rule on the loan's effect under the at-risk rules out of concern that taxpayers would set up a Code § 465(c)(4) device to limit liability. Because the trust had no other assets, debt tracing was not a concern, and all of the interest was allocated to the S corporation activity. The IRS also declined to address the passive loss rules.

[6114] The 2013 instructions to Form 1040, Schedule E, Part II say:

> Interest expense relating to the acquisition of shares in an S corporation may be fully deductible on Schedule E. For details, see Pub. 535.

Publication 535, for use in preparing 2013 returns, says to report interest expenses from S corporation business borrowing on Schedule E (Form 1040), line 28, entering interest expense and the name of the S corporation in column (a) and the amount in column (h). Presumably this would also apply to loans to a QSST to acquire stock in an S corporation.

[6115] This background on CCA 201327009 results from informal discussions with an attorney, who has since left the IRS, when I asked whether the IRS would consider approving a sale to a QSST. The IRS informally indicated that it would decline to issue such a ruling if I sought it, because it was not totally certain of the result and does not wish to encourage sales to Code § 678 trusts. It was suggested that the IRS never would have approved a sale to an irrevocable grantor trust if it had realized that the technique would become so popular.

III.A.3.e.vi.(b). Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts (Whether or Not a Sale Is Made)

Using QSSTs involves challenges that do not apply to other Code § 678 trusts. Consider the disadvantages of an S corporation as an investment vehicle that is shared among family members:

- Take Care to Make Formation of Corporation Nontaxable. See part II.M.2 Buying into or Forming a Corporation.

- Inability to Divide S Corporation. An S corporation that does not engage in a trade or business would not be able to be divided income-tax free under Code § 355.[6116] This would trap all family members in a single investment entity, unable to manage investments suitable for each person's goals.

- Tax Cost of Distributing Investments. A distribution of investments would be taxed as a sale.[6117] Thus, distributing marketable securities to family members so that they go their separate ways would subject them to capital gain tax on the deemed sale of the investments. Distributing depreciable property might subject them to tax on ordinary income.[6118]

  However, pre-mortem planning might help. Suppose the trust is a credit shelter trust or a GST-exempt trust and the beneficiary's estate is subject to estate tax. If the QSST sells its investments that have unrealized gain, the income (capital gain) tax liability will be a debt deductible on the beneficiary's estate tax return. Harvesting gain would prevent the distribution of securities from being a taxable event at the shareholder level. However, the distribution of securities in a corporation would generate income tax to the extent that the fair market value of the distribution exceeds the basis (and might generate dividend income if and to the extent the corporation had been a C corporation and the distribution constituted a distribution of earnings and profits); on the other hand, the recognition of gain on the sale of securities would increase the stock's basis.[6119] Just be sure that the pre-mortem gain harvesting is not pursuant to a plan of liquidation[6120] or a sale of stock combined with a Code § 338(h)(10) election;[6121] either event would subject to sale of assets to stock at the trust's level, rather than the beneficiary's level.[6122]

[6116] See part II.Q.7.f Corporate Division, including part II.Q.7.f.iii Active Business Requirement for Code § 355.
[6117] See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.
[6118] See part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property.
[6119] See part II.Q.7.b Redemptions or Distributions Involving S Corporations.
[6120] See fn. 5995, found within part III.A.3.e.i.(a) QSSTs Generally. This is important because an S corporation that used be a C corporation can avoid dividend taxation by engaging in a liquidation; see fn. 4861, found within part II.Q.7.a.vii Corporate Liquidation.
[6121] See fn. 5996, found within part III.A.3.e.i.(a) QSSTs Generally.
[6122] In addition to the citations within fns. 6120 and 6121, see part II.J.15.a QSST Treatment of Sale of S Stock or Sale of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax).

- Inability to Swap. Although a beneficiary does not recognize gain or loss when selling S corporation stock to a QSST, the trust would recognize income on selling S corporation stock back to the beneficiary.[6123]

- All Income Must Be Distributed. A QSST must distribute to its beneficiary all of its trust accounting income. This can be controlled by the S corporation not making distributions to the trust. The IRS might argue that the beneficiary's failure to compel the trustee to compel a distribution from the S corporation constitutes a gift. Note, however, that the IRS considers 3%-5% to be a reasonable range for income distributions, so the IRS should view any distributions within than range as sufficient.[6124] If distributions were below this range, the IRS would argue that the lapsing withdrawal right 5-and-5 safe harbor of Code § 2514(e) that appears to protect such a small lapse is calculated in a way that does not provide much protection.[6125]

- Personal Use Assets. Placing personal use assets inside an S corporation would require the charging of rent. The S corporation would recognize rental income, and those paying rent would not be able to deduct that rent. If the beneficiary uses a trust asset for personal purposes, he does not need to pay rent, since the point of the trust is to benefit him.

These limitations are not imposed on Code § 678(a)(2) trusts. When their assets are divided among family members, the division is done on a tax-free basis and they can each go their separate ways quite easily.

Consider who pays income tax for the year in which the beneficiary dies.[6126] These considerations also apply when the beneficiary of a Code § 678(a)(2) trust dies, although the beneficiary of the latter has a broader power of appointment than the former.

Income tax difficulties in splitting an S corporation after the beneficiary's death might be addressed as follows:

- Form a Partnership. By forming an entity taxed as a partnership with the beneficiary, other family members, or other trusts, a QSST might be able to access investment opportunities not otherwise available to it or might be able to facilitate their access to investment opportunities not available to them. Although such a partnership could preserve the expected annual cash flow, the commitment to retaining funds in the partnership would reduce the fair market value of the S corporation's partnership interest. This value reduction would also reduce the tax if the corporation distributes some or all of assets when the QSST divides upon the beneficiary's death. Such a partnership should be formed well in advance of the beneficiary's death.[6127] When the beneficiary dies, perhaps the S corporation would distribute some of its partnership interests right away so that the trust could immediately fund part of the bequests; then, later, after the trustee is satisfied that all tax and other fiduciary liabilities have been resolved, the S corporation could distribute the remaining partnership interests.[6128] Furthermore, the partnership could later divide in a variety of ways

[6123] Reg. § 1.1361-1(j)(8); see fns. 5994-5996.
[6124] See part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law, especially the text accompanying fn. 2764.
[6125] See part II.J.4.f Making Trust a Partial Grantor Trust as to a Beneficiary.
[6126] See part III.A.3.d Special Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests.
[6127] See part II.Q.7.h Distributing Assets; Drop-Down into Partnership, especially fn 5104.
[6128] Distributing in stages would tend to alleviate the concerns described in fn 5104.

on a tax-free basis,[6129] so that each family member can implement his or her own investment strategy over time; however, if the family members do not have strategies that either are consistent with each other's or complement each other's, pursuing different investment strategies would rend to require asset sales that might generate capital gain tax.[6130]

- Create Separate Corporations. Suppose a trustee decides to contribute its assets to an S corporation with the expectation that the beneficiary will make a QSST election. Instead, consider forming a separate S corporation for the future benefit of each of the beneficiary's children. When the beneficiary dies, each of the beneficiary's children will be allocated a separate S corporation, thereby eliminating the need to divide the corporation or distribute its assets. This solution merely postpones the issue, because these issues would need to be addressed when a child of the beneficiary dies (or if a child predeceases the beneficiary, but that postponement might be sufficiently beneficial to address concerns for a while).

- Marital Trust QSST Doesn't Have This Problem. If a marital deduction trust that holds 100% of an S corporation and the beneficiary makes a QSST election, then the S corporation stock gets a basis step-up, which essentially passes through in a nontaxable (because of the basis step-up) liquidation, subject to certain qualifications; see part II.H.8.a Depreciable Real Estate in an S Corporation – Possible Way to Replicate Effect of Basis Step-Up If the Stars Align Correctly, subject to the caveats in part II.H.8.a.i.(b) Challenging Issues When S Corporation Liquidates Holding Depreciable Property or Other Ordinary Income Property. This is one of the few times when I like to have an LLC elect S corporation status, because the S corporation status can be revoked, resulting in a constructive liquidation, retroactively within 75 days after the beneficiary spouse's death.

See also parts II.A.2.d.ii Estate Planning and Income Tax Disadvantages of S Corporations, II.A.2.d.iii Which Type of Entity for Which Situation? and III.A.3.d Special Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests.

III.A.3.e.vi.(c). Required Structure for a Sale to a QSST (Including Possible Pitfalls)

In QSSTs, all income must be distributed to the beneficiary.[6131] Therefore, at first glance, it would appear impossible for a QSST to use its S corporation distributions to buy stock.

However, if a QSST buys stock in a secured sale in which it pledges all of its S corporation distributions, the trust never receives the distributions, so the trust has no income receipts to

---

[6129] See part II.Q.8 Exiting From or Dividing a Partnership.

[6130] If the strategies are consistent with each other's, then the partnership could simply divide pro rata. If the strategies complement each other's, then each person could take the assets that interest him or her. Anything else would require post-division adjustments, most likely accomplished through sales.

[6131] Reg. § 1.1361-1(j)(1)(i) provides

> All of the income (within the meaning of § 1.643(b)-1) of the trust is distributed (or is required to be distributed) currently to one individual who is a citizen or resident of the United States. For purposes of the preceding sentence, unless otherwise provided under local law (including pertinent provisions of the governing instrument that are effective under local law), income of the trust includes distributions to the trust from the S corporation for the taxable year in question, but does not include the trust's pro rata share of the S corporation's items of income, loss, deduction, or credit determined under section 1366….

pay to the beneficiary.[6132] Private letter rulings have readily accepted this theory for mandatory income trusts;[6133] this theory should apply to a discretionary income trust.[6134]

A significant disadvantage is that this method might take twice as long as a normal sale to a grantor trust. In most states, the trustee must transfer from principal to income an amount equal to the income paid to reduce the principal balance of the note (as used in this part III.A.3.e.vi.(c), the "adjustment amount").[6135] Thus, although note payments complete the sale (the obligation to the beneficiary in the beneficiary's capacity as a creditor), they create an obligation that the trust owes to the beneficiary as a beneficiary:

- Worst Case Scenario – Simplistic view. In other words, first the trust repays the note, then the trust repays the beneficiary the income that was diverted from the beneficiary (as a beneficiary) to pay the note. Thus, the original note principal is not removed from the estate tax system until both the note and the adjustment amount to the beneficiary are fully paid. However, if the adjustment amount is not expected to be paid made for a while, consider that the possible inclusion of the adjustment amount in the beneficiary's estate might very well be the present value of that principal distribution, which might be significantly less than the amount of the principal that is owed.

- Actual Law – Not So Bad? The trust's obligation is to transfer to income principal equal to the adjustment amount. This means that, when the trust receives cash generally classified as principal, it must reclassify that cash as income, to the extent of the adjustment amount.

[6132] The trust would need to pay any future cash receipts of principal to the beneficiary to make up for this diversion of amounts that would otherwise constitute trust accounting income. Adopting Section 502(b) of the Uniform Principal and Income Act (last amended or revised in 2008; see http://www.uniformlawcommission.com/Act.aspx?title=Principal and Income Amendments (2008)), RSMo section 469.453.2 provides:

> If a principal asset is encumbered with an obligation that requires income from that asset to be paid directly to the creditor, the trustee shall transfer from principal to income an amount equal to the income paid to the creditor in reduction of the principal balance of the obligation.

[6133] This accounting treatment is consistent with Letter Rulings 200140040 (which not only diverted dividends to repay the seller but also required that the trust pay additional purchase price if it resold the stock within a certain period of time after buying the stock), 200140043, and 200140046 (trust's purchases from another shareholder), as well as 9140055 (distributions used to pay bank loan used to buy stock), which rulings essentially treated the repayment of principal on the notes as income disbursements rather than principal disbursements. See also Letter Ruling 9639013, permitting the use of income to repay notes on a seller-financed sale to QSSTs. CCA 201327009 did not expressly consider this issue; however, based on the facts and conclusion, it implicitly assumed that the use of S corporation distributions to repay the note was permitted.

Other rulings dealing with principal and income issues include Letter Rulings 9140055 (beneficiary repayment of trust distribution to pay interest QSST owed bank), 200446007 (deemed dividend is not fiduciary accounting income and therefore not required to be distributed), and 200451021 (redemption treated as distribution for income tax purposes, but proceeds were principal not required to be distributed).

[6134] What if the trust would be relying on the payment of actual income to satisfy Code § 1361(d)(3)(B) and Reg. § 1.1361-1(j)(1)(i)? One might be concerned that the trust would be receiving no income and therefore would be making no distributions of income. On the other hand, all of the company's distributions that are payable to the trust would in fact wind up in the hands of the trust's sole beneficiary; it will simply get there as a note repayment, rather than as a distribution. Thus, relying on the payment of actual income would not appear to violate the spirit of Code § 1361(d)(3)(B) and Reg. § 1.1361-1(j)(1)(i).

[6135] See fn. 6132.

That principal receipt might never happen during the beneficiary's life, and the trust might never be required to pay the beneficiary.

Consider the following ways to repay this additional obligation, if it exists:

1. Suppose the trust is a discretionary income trust. Perhaps an independent trustee would be able to toggle on and off the mandatory income feature (which, of course, is not possible in a one-lung QTIP plan[6136] but might be possible using a *Clayton*-QTIP plan).[6137] After the note is repaid, the independent trustee might turn off the mandatory income obligation. If the beneficiary never needs the income under the standards provided by the trust, the trust might accumulate funds thereafter and never pay cash equal to the full adjustment amount. However, the IRS might argue that such a modification undermines the point of recharacterizing the principal as income,[6138] so consider a compromise: Instead of the trustee accumulating income under the discretionary standards and perhaps never paying the adjustment amount, the trustee and beneficiary come to the following agreement: The trustee agrees to pay future income to the beneficiary to the extent of the adjustment amount, notwithstanding the fact that the trustee has determined that the beneficiary would not receive income under the trust's new distribution standards. That income is payable until the earlier of the beneficiary's death or amounts equal to the adjustment amount have been paid. The trustee might sign a revocable letter directing the company to pay the beneficiary directly any distributions of income (up to the adjustment amount) that normally would have gone to the trust.

2. If the trust is a mandatory income trust, see whether the corporation will make a distribution to all shareholders in partial liquidation of the entity or merely redeem the trust's stock, depending whether it is important to keep proportionate stock ownership. Such a distribution or redemption might very well constitute a nontaxable return of AAA (reinvested S corporation taxable income).[6139] For example, a partial liquidation would be a principal distribution for trust accounting purposes (even if it is a distribution of AAA for income tax purposes) that could then be used to repay the principal obligation.

3. If the trust has other assets, then gain from the sale of other assets would be used to repay this principal obligation. Being transferred to income[6140] or being used to determine a distribution[6141] should cause the capital gain to be taxed to the beneficiary.

When drafting a trust that might engage in such a transaction, keep in mind the above issue. Perhaps the trustee might have some flexibility in allocating receipts and disbursements

[6136] For an explanation of a one-lung plan, including some of its advantages and disadvantages, see part II.H.2.a Free Basis Step-Up When First Spouse Dies.
[6137] For a description of a *Clayton*-QTIP plan, see the paragraph accompanying fn. 6153.
[6138] Reg. § 1.643(b)-1 provides, "Trust provisions that depart fundamentally from traditional principles of income and principal will generally not be recognized." See part II.J.8.c.i.(e) Fiduciary Income Tax Recognition of the Trust Agreement and State Law, especially the text accompanying fn. 2763.
[6139] See part II.Q.7.b Redemptions or Distributions Involving S Corporations.
[6140] See part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law.
[6141] See part II.J.8.c.iii Discretionary Principal Rule: Allocated to Principal but Actually Distributed to the Beneficiary or Used by the Trustee to Determine the Amount Distributed or Required to be Distributed to a Beneficiary.

between principal and income?[6142] Perhaps the trust might have a provision requiring the trustee to give the beneficiary notice of a right to principal and provide that the right to that principal adjustment lapses as provided in Code § 2514(e)?

Consider whether the IRS might attack the sale as follows:

- The IRS might argue that stock's value exceeded the sale price; therefore, the IRS might argue, the seller made a gift to a trust that benefits the seller, triggering Code § 2036 inclusion.

- One might consider using a defined value clause,[6143] instructing the trustee to distribute any excess value to a separate share of the trust, of which 10% would be structured as a completed gift (no power of appointment over the remainder) and 90% would be structured as an incomplete gift (power of appointment over the remainder - perhaps even a presently exercisable withdrawal right) or a sale. With adequate disclosure, the gift tax statute of limitations would run regarding how much comprises the completed gift and incomplete gift portions.[6144] For a fully completed gift, see part III.B.2.i.xviii Sample Beneficiary Deemed-Owned Trust.

- The separate share of the trust would be treated as a separate trust for QSST purposes; however, the separate share's treatment as a grantor trust as to the seller[6145] would make a QSST election unnecessary during the seller's life.

- Might the fact that the separate share is created only in the event of an audit cause that share to be disrespected? It did for a charitable gift (see part III.B.3.h *Moore*), but charitable gifts have stricter standards than noncharitable gifts.

Such a possible Code § 2036 attack may deter using this technique. If one is trying to move miscellaneous assets by contributing them to an S corporation and selling the S corporation stock to a trust, consider instead using a preferred partnership.[6146] However, if one has an operating business in an S corporation, a preferred partnership is not available[6147] unless the transferor is the sole owner or all of the owners have the same estate planning goal.[6148]

III.A.3.e.vi.(d). Using a QSST to Buy Stock When Using a "One-Lung" Marital Deduction Plan

One of my favorite estate planning tools for married couples is to bequeath the entire residue into a trust that can qualify to the QTIP marital deduction. The executor may elect a marital deduction with respect to none, part, or all of the trust. For an explanation of some of the

[6142] For flexibility in allocating between income and principal, see part II.J.8.c.i Income Rule: Capital Gain Allocated to Income Under State Law, which includes a sample general clause (not geared toward the QSST sale issue) as well as the regulations governing such allocations.
[6143] See part III.B.3 Defined Value Clauses in Sale or Gift Agreements or in Disclaimers.
[6144] See part III.B.4 Adequate Disclosure on Gift Tax Returns.
[6145] Code § 677.
[6146] See part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.
[6147] A partnership is not an eligible owner of a S stock. Code § 1361(b)(1)(B); see part II.A.2.e.v Relief for Late S Corporation and Entity Classification Elections for the Same Entity.
[6148] If the transferor is the sole owner or all owners have the same estate planning goals, the S corporation itself could contribute its assets to a preferred partnership. See part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

advantages and disadvantages of such a plan, see part II.H.2.a Free Basis Step-Up When First Spouse Dies.

More recently, I have been including in the trust the authority for an independent trustee to make distributions for the surviving spouse's welfare. If the surviving spouse is the trustee, he or she may appoint as a co-trustee a person who is not a related or subordinate party,[6149] who could make a distribution for welfare and then resign.

Suppose the decedent's estate tax exemption is insufficient to cover all of the decedent's S corporation stock. Some S corporation stock is allocated to a trust excluded from the estate tax system (a "nonmarital trust"), and the rest is allocated to a marital deduction trust (a "marital trust"). The surviving spouse elects QSST treatment for each trust.[6150] The marital trust distributes its S corporation stock to the surviving spouse, who then sells it to the nonmarital trust in exchange for a promissory note.

If the client has an independent trustee who is quite comfortable with the surviving spouse and the remainderman, one might consider using *Clayton*-QTIP planning.[6151] *Clayton*-QTIP planning is where the portion that is not elected QTIP goes to a trust that has different dispositive provisions than the portion that is elected QTIP.[6152] In the nonmarital trust, an independent trustee would be able to distribute income for the surviving spouse's welfare (in addition to any other desirable discretionary distributions for the surviving spouse). This would help address a particular drawback to sales to QSSTs.[6153]

III.A.3.e.vi.(e). Converting Existing Trust to a QSST to Obtain Beneficiary Deemed-Owned Trust Status

Suppose the client is the beneficiary of an existing GST-exempt trust with discretionary distributions. Consider converting the trust into a QSST, by whatever legal means are available to do so. Consider the ideas discussed in parts III.A.3.e.iv Flexible Trust Design and III.A.3.e.v Converting a Multiple Beneficiary ESBT into One or More QSSTs.

Then the client can sell the client's S corporation stock to the QSST.

If the client does not have an S corporation, the client could contribute assets to an S corporation and then sell the S corporation stock to the trust. Alternatively, an existing GST-exempt trust with only one beneficiary might simply form an S corporation and the beneficiary make a QSST election, effectively converting the trust to a beneficiary deemed-owned trust.[6154] However, in either case, be sure to consider exit strategies upon the client's death, as described

---

[6149] As fn. 6713 explains, the spouse's power to appoint a trustee who can distribute for the spouse's welfare will not cause the spouse to hold a general power of appointment if the trustee is not a related or subordinate party, as defined in Code § 672(c) (see fn. 2541).
[6150] Using this strategy, a QSST election is required for the nonmarital trust but not for the marital trust. However, making such an election for the marital trust tends to simplify income tax issues.
[6151] Authorizing an independent trustee to be the executor with authority to make the QTIP election should avoid any attack the IRS might make whether a spouse who is the executor had made a gift to the extent that failure to make a QTIP election causes the surviving spouse to lose his or her mandatory income rights.
[6152] Reg. § 20.2056(b)-7(d)(3) authorizes this in response to case law.
[6153] See fn. 6137.
[6154] This would be ideal if the trust is already a mandatory income trust. If the trust is not a mandatory income trust, then complying with the requirement to distribute all income might be tricky.

in part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts.

III.A.3.e.vi.(f). QSST to Convert Terminating Trust to GST-Exempt Life Trust

Suppose the client created a trust for children that terminates at various ages. The client could create a QSST for each adult child.

See part III.A.3.e.vi.(e) Converting Existing Trust to a QSST for considerations involved in using this strategy.

III.A.4. Trust Accounting Income Regarding Business Interests

When a trust holds a business entity interest, complicated accounting and tax issues can arise. One of the main reasons for these complexities is the difference between accounting income and taxable income. Accounting income helps determine the amount of distributions a trust is required to make, under the governing instrument or state law, which in turn may determine how much taxable income is carried out to the beneficiaries of the trust. The Code defines "income required to be distributed currently" as the fiduciary accounting income that must be distributed currently pursuant to the governing instrument or state law. Because fiduciary accounting income is determined by state law or the governing instrument, differences between taxable income and accounting income generally arise. An example of such a difference would be capital gains. Capital gains are usually principal for fiduciary accounting purposes, but taxable income for income tax purposes.

III.A.4.a. General Strategies Regarding Fiduciary Income Taxation of Business Interests

Trusts and estates reach the top income tax brackets and are subjected to the 3.8% tax on net investment income[6155] far more rapidly than beneficiaries. See part II.J Fiduciary Income Taxation.

Part III.F Hypothetical illustrates the issues described in this part III.A.4 Trust Accounting Income Regarding Business Interests. That income tax dynamic may subject income to a higher tax bracket than if all of the income were taxed in a QSST, in which the beneficiary is the deemed owner of all of the K-1 income.[6156] Thus:

- If the trust holds S corporation stock, consider facilitating a QSST election.

- If the trust holds a partnership interest, consider placing the partnership interest in an S corporation (or in a slightly more elaborate structure)[6157] and facilitating a QSST election.

III.A.4.b. Example for Trust Accounting Income Regarding Business Interests

A similar problem can arise when a trust holds a partnership interest. Often a partnership may report significant earnings on its K-1s, but may distribute a much smaller amount in cash to its

---

[6155] See part II.I 3.8% Tax on Excess Net Investment Income.
[6156] See part III.A.3.e.i QSSTs.
[6157] The trustee might place the partnership interest into an LLC, owned by one S corporation for each expected remainderman. See part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned Trusts (Whether or Not a Sale Is Made).

partners. For example, a trust could receive a partnership K-1 with $100,000 of taxable income but may only receive $60,000 of cash as a distribution. The $60,000 is all the accounting income, because the amount distributed does not exceed the amount of income attributable to the trust.[6158] When this happens, the trust will have distributable income equal to $60,000, but will be unable to distribute the additional $40,000 of "phantom income" from the K-1, meaning the trust will be taxed on the $40,000. This can lead to cash flow problems when the trust has no other income, since once the trust distributes the $60,000 to the beneficiary it will have no available cash to pay the taxes. The Uniform Principal and Income Act[6159] provides a solution to this problem. Under old section 505(c)(1), a tax that is required to be paid by a trustee on the trust's share of an entity's taxable income is proportionally divided between principal and income based on the receipts allocated to each.[6160] Thus, the trustee will be able to keep some of the cash to pay the taxes on the trust's undistributed income. See below for the 2008 clarification to section 505 that makes sure that the trustee has enough money to pay the tax.

Another example, with a flowchart, is at part III.F.2 Trust Accounting and Taxation.

III.A.4.c. Distributions from Entities as Trust Accounting Income or Principal

Generally, cash distributions from a business entity are trust accounting income unless they are in partial or complete liquidation. Below are how the Uniform Principal & Income Act ("UPIA") and Uniform Fiduciary Income & Principal Act ("UFIPA") treat a trust's receipt of distributions. UFIPA is the Uniform Law Commission's 2018 overhaul of UPIA; check applicable state law to see which of them applies. I was ABA Advisor to the 2008 amendments to UPIA, which did not change the rules below (except for part III.A.4.d Distributions from Pass-Through Entities Used to Pay Income Tax) and an ACTEC observer and an active participant in drafting UFIPA.

Before reviewing these rules, note that their application is just a first step. Consider also parts:

- III.A.4.d Distributions from Pass-Through Entities Used to Pay Income Tax (when the trustee may use trust accounting income to pay tax attributable to the business entity's reinvested income, even if the trust requires trust accounting income to be distributed),

- II.J.8.c.i.(a) Power to Adjust (reclassifying principal as income and vice versa), and

- II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the Trust Accounting Rules (when the business entity is sold, reimbursing an income beneficiary burdened by part III.A.4.d - see first bullet point above).

UPIA § 401, Character of Receipts," provides:

> (a) In this section, "entity" means a corporation, partnership, limited liability company, regulated investment company, real estate investment trust, common trust fund, or any other organization in which a trustee has an interest other than a trust or estate

---

[6158] Uniform Principal and Income Act § 401(b). See footnote 6159.
[6159] Citations to the Uniform Principal and Income Act are to the version adopted in 1997, as amended or revised in 2000, published August 21, 2003, by the National Conference of Commissioners on Uniform State Laws.
[6160] See also R.S.Mo. § 469.459.3(1).

to which Section 402 applies, a business or activity to which Section 403 applies, or an asset-backed security to which Section 415 applies.

(b) Except as otherwise provided in this section, a trustee shall allocate to income money received from an entity.

(c) A trustee shall allocate the following receipts from an entity to principal:

(1) property other than money;

(2) money received in one distribution or a series of related distributions in exchange for part or all of a trust's interest in the entity;

(3) money received in total or partial liquidation of the entity; and

(4) money received from an entity that is a regulated investment company or a real estate investment trust if the money distributed is a capital gain dividend for federal income tax purposes.

(d) Money is received in partial liquidation:

(1) to the extent that the entity, at or near the time of a distribution, indicates that it is a distribution in partial liquidation; or

(2) if the total amount of money and property received in a distribution or series of related distributions is greater than 20 percent of the entity's gross assets, as shown by the entity's year-end financial statements immediately preceding the initial receipt.

(e) Money is not received in partial liquidation, nor may it be taken into account under subsection (d)(2), to the extent that it does not exceed the amount of income tax that a trustee or beneficiary must pay on taxable income of the entity that distributes the money.

(f) A trustee may rely upon a statement made by an entity about the source or character of a distribution if the statement is made at or near the time of distribution by the entity's board of directors or other person or group of persons authorized to exercise powers to pay money or transfer property comparable to those of a corporation's board of directors.

The official Comment to UPIA § 401 explains:

Entities to which Section 401 applies. The reference to partnerships in Section 401(a) is intended to include all forms of partnerships, including limited partnerships, limited liability partnerships, and variants that have slightly different names and characteristics from State to State. The section does not apply, however, to receipts from an interest in property that a trust owns as a tenant in common with one or more co-owners, nor would it apply to an interest in a joint venture if, under applicable law, the trust's interest is regarded as that of a tenant in common.

Capital gain dividends. Under the Internal Revenue Code and the Income Tax

Regulations, a "capital gain dividend" from a mutual fund or real estate investment trust is the excess of the fund's or trust's net long-term capital gain over its net short-term capital loss. As a result, a capital gain dividend does not include any net short-term capital gain, and cash received by a trust because of a net short-term capital gain is income under this Act.

Reinvested dividends. If a trustee elects (or continues an election made by its predecessor) to reinvest dividends in shares of stock of a distributing corporation or fund, whether evidenced by new certificates or entries on the books of the distributing entity, the new shares would be principal. Making or continuing such an election would be equivalent to deciding under Section 104 to transfer income to principal in order to comply with Section 103(b). However, if the trustee makes or continues the election for a reason other than to comply with Section 103(b), e.g., to make an investment without incurring brokerage commissions, the trustee should transfer cash from principal to income in an amount equal to the reinvested dividends.

Distribution of property. The 1962 Act describes a number of types of property that would be principal if distributed by a corporation. This becomes unwieldy in a section that applies to both corporations and all other entities. By stating that principal includes the distribution of any property other than money, Section 401 embraces all of the items enumerated in Section 6 of the 1962 Act as well as any other form of nonmonetary distribution not specifically mentioned in that Act.

Partial liquidations. Under subsection (d)(1), any distribution designated by the entity as a partial liquidating distribution is principal regardless of the percentage of total assets that it represents. If a distribution exceeds 20% of the entity's gross assets, the entire distribution is a partial liquidation under subsection (d)(2) whether or not the entity describes it as a partial liquidation. In determining whether a distribution is greater than 20% of the gross assets, the portion of the distribution that does not exceed the amount of income tax that the trustee or a beneficiary must pay on the entity's taxable income is ignored.

Other large distributions. A cash distribution may be quite large (for example, more than 10% but not more than 20% of the entity's gross assets) and have characteristics that suggest it should be treated as principal rather than income. For example, an entity may have received cash from a source other than the conduct of its normal business operations because it sold an investment asset; or because it sold a business asset other than one held for sale to customers in the normal course of its business and did not replace it; or it borrowed a large sum of money and secured the repayment of the loan with a substantial asset; or a principal source of its cash was from assets such as mineral interests, 90% of which would have been allocated to principal if the trust had owned the assets directly. In such a case the trustee, after considering the total return from the portfolio as a whole and the income component of that return, may decide to exercise the power under Section 104(a) to make an adjustment between income and principal, subject to the limitations in Section 104(c).

UFIPA § 401, "Character of Receipts from Entity," provides more details about factual inquiries or assumptions the trustee may make and adds clarity to various terms. It says:

(a) In this section:

(1) “Capital distribution” means an entity distribution of money which is a:

(A) return of capital; or

(B) distribution in total or partial liquidation of the entity.

(2) “Entity”:

(A) means a corporation, partnership, limited liability company, regulated investment company, real estate investment trust, common trust fund, or any other organization or arrangement in which a fiduciary owns or holds an interest, whether or not the entity is a taxpayer for federal income tax purposes; and

(B) does not include:

(i) a trust or estate to which Section 402 applies;

(ii) a business or other activity to which Section 403 applies which is not conducted by an entity described in subparagraph (A);

(iii) an asset-backed security; or

(iv) an instrument or arrangement to which Section 416 applies.

(3) “Entity distribution” means a payment or transfer by an entity made to a person in the person’s capacity as an owner or holder of an interest in the entity.

(b) In this section, an attribute or action of an entity includes an attribute or action of any other entity in which the entity owns or holds an interest, including an interest owned or held indirectly through another entity.

(c) Except as otherwise provided in subsection (d)(2) through (4), a fiduciary shall allocate to income:

(1) money received in an entity distribution; and

(2) tangible personal property of nominal value received from the entity.

(d) A fiduciary shall allocate to principal:

(1) property received in an entity distribution which is not:

(A) money; or

(B) tangible personal property of nominal value;

(2) money received in an entity distribution in an exchange for part or all of the fiduciary’s interest in the entity, to the extent the entity distribution reduces the fiduciary’s interest in the entity relative to the interests of other persons that own or hold interests in the entity;

(3) money received in an entity distribution that the fiduciary determines or estimates is a capital distribution; and

(4) money received in an entity distribution from an entity that is:

(A) a regulated investment company or real estate investment trust if the money received is a capital gain dividend for federal income tax purposes; or

(B) treated for federal income tax purposes comparably to the treatment described in subparagraph (A).

(e) A fiduciary may determine or estimate that money received in an entity distribution is a capital distribution:

(1) by relying without inquiry or investigation on a characterization of the entity distribution provided by or on behalf of the entity, unless the fiduciary:

(A) determines, on the basis of information known to the fiduciary, that the characterization is or may be incorrect; or

(B) owns or holds more than 50 percent of the voting interest in the entity;

(2) by determining or estimating, on the basis of information known to the fiduciary or provided to the fiduciary by or on behalf of the entity, that the total amount of money and property received by the fiduciary in the entity distribution or a series of related entity distributions is or will be greater than 20 percent of the fair market value of the fiduciary's interest in the entity; or

(3) if neither paragraph (1) nor (2) applies, by considering the factors in subsection (f) and the information known to the fiduciary or provided to the fiduciary by or on behalf of the entity.

(f) In making a determination or estimate under subsection (e)(3), a fiduciary may consider:

(1) a characterization of an entity distribution provided by or on behalf of the entity;

(2) the amount of money or property received in:

(A) the entity distribution; or

(B) what the fiduciary determines is or will be a series of related entity distributions;

(3) the amount described in paragraph (2) compared to the amount the fiduciary determines or estimates is, during the current or preceding accounting periods:

(A) the entity's operating income;

(B) the proceeds of the entity's sale or other disposition of:

(i) all or part of the business or other activity conducted by the entity;

(ii) one or more business assets that are not sold to customers in the ordinary course of the business or other activity conducted by the entity; or

(iii) one or more assets other than business assets, unless the entity's primary activity is to invest in assets to realize gain on the disposition of all or some of the assets;

(C) if the entity's primary activity is to invest in assets to realize gain on the disposition of all or some of the assets, the gain realized on the disposition;

(D) the entity's regular, periodic entity distributions;

(E) the amount of money the entity has accumulated;

(F) the amount of money the entity has borrowed;

(G) the amount of money the entity has received from the sources described in Sections 407, 410, 411, and 412; and

(H) the amount of money the entity has received from a source not otherwise described in this paragraph; and

(4) any other factor the fiduciary determines is relevant.

(g) If, after applying subsections (c) through (f), a fiduciary determines that a part of an entity distribution is a capital distribution but is in doubt about the amount of the entity distribution which is a capital distribution, the fiduciary shall allocate to principal the amount of the entity distribution which is in doubt.

(h) If a fiduciary receives additional information about the application of this section to an entity distribution before the fiduciary has paid part of the entity distribution to a beneficiary, the fiduciary may consider the additional information before making the payment to the beneficiary and may change a decision to make the payment to the beneficiary.

(i) If a fiduciary receives additional information about the application of this section to an entity distribution after the fiduciary has paid part of the entity distribution to a beneficiary, the fiduciary is not required to change or recover the payment to the beneficiary but may consider that information in determining whether to exercise the power to adjust under Section 203.

The official Comment to UFIPA § 401 explains:

> **Entities to which Section 401 applies**. Section 401 covers distributions from all types of entities. For example, the reference to partnerships in Section 401(a)(2)(A) includes all forms of partnerships, including limited partnerships, limited liability partnerships, and variants that have slightly different names and characteristics from state to state. And subsection (b) provides that the same is true of a chain or chains of entities, whether the entities are the same or different and no matter how many tiers the entities represent. This section does not apply, however, to receipts from an interest in property that a

fiduciary owns as a tenant-in-common with one or more coowners, nor would it apply to an interest in a joint venture if, under applicable law, the interest is regarded as that of a tenant-in-common.

Section 401(a)(2)(A) of the 2018 Act clarifies that Section 401 applies to an entity that meets these tests whether or not the entity is respected for federal income tax purposes. In Section 401(a)(2)(B) the 2018 Act retains the exceptions from the application of Section 401 in Section 401(a) of the 1997 Act, except that it clarifies that it does not exclude a business that might appear to be described in Section 403 if it is conducted in an entity that is subject to Section 401 under Section 401(a)(2)(A). This clarification and a similar clarification to Section 403(a)(2) prevent what might otherwise seem to be a circularity between Sections 401 and 403, with each of those sections excluding an entity described in the other section.

Terms. The 2018 Act introduces the term “entity distribution” to refer to distributions from entities to which Section 401 applies and the term “capital distribution” to refer to distributions of money, rather than other property, which nevertheless are treated as principal. “Capital distribution” replaces the former term “total or partial liquidation” and includes a “return of capital.”

Reinvested dividends. If a fiduciary elects (or continues an election made by a predecessor) to reinvest dividends in shares of stock of a distributing corporation or fund, whether evidenced by new certificates or entries on the books of the distributing entity, the new shares would be principal. Making or continuing such an election would be equivalent to making an adjustment from income to principal under Section 203. If the fiduciary makes or continues the election for a reason other than to comply with the standards of Section 203, such as making an investment without incurring brokerage commissions, the fiduciary has the option of considering a corresponding transfer of cash from principal to income.

Distribution of property. The 1962 Act described a number of types of property that would be principal if distributed by a corporation. This became unwieldy in a section (former Section 401) that applied to both corporations and all other entities. By stating that the distribution of any property other than money is generally allocated to principal, subsection (d)(1) embraces all of the items enumerated in Section 6 of the 1962 Act as well as any other form of nonmonetary distribution not specifically mentioned in that act. The new exception in subsections (c)(2) and (d)(1)(B) for “tangible personal property of nominal value” would cover, for example, an item of food sent to owners (and perhaps others such as customers, suppliers, and employees) at a holiday time. It is not necessarily given in proportion to ownership interests, and as a practical matter it often needs to be allocated to income, in effect, so it can be conveniently distributed and enjoyed.

With respect to large distributions of cash, the 2018 Act is sensitive to the fact that the fiduciary might not have enough information to properly categorize the distribution. Subsection (d)(2) addresses the relatively easy case of a likely non-pro-rata distribution that reduces the fiduciary’s proportionate interest in the entity – in effect, a redemption. Subsection (d)(4) retains the special rule for capital gain dividends from a regulated investment company (RIC) or real estate investment trust (REIT) that was added in 1997, and adds a reference to other distributions that federal income tax law treats comparably.

Subsection (d)(2) retains the rule that a distribution in exchange for part of all of the fiduciary's interest in the entity is principal, but clarifies that this rule applies only to the extent the transaction reduces the fiduciary's proportional interest in the entity relative to other owners. It does not necessarily apply, for example, to a corporate reorganization in which shareholders exchange their stock for other stock. If all owners receive proportionate distributions, the distribution to the fiduciary is tested as described in the next paragraph.

With regard to receipts of money that could be what the act refers to as a "capital distribution" – a return of capital or a distribution in partial liquidation of the entity – subsections (d)(3), (e), and (f) provide some help with what the act acknowledges might be only an "estimate" by the fiduciary. For this purpose, subsection (e) provides that the fiduciary may first rely on how the entity describes the distribution, unless the fiduciary possesses information that casts doubt on that description or the fiduciary is a majority voting owner, in which case the fiduciary may have a duty to inquire or investigate further. Next, the fiduciary may be satisfied with treating the distribution as a capital distribution if information the entity provides, together with other information the fiduciary knows, indicates that the distribution exceeds 20 percent of the fair market value of the fiduciary's interest. This 20 percent test is retained from the 1997 Act, except that (i) it is a permissive safe harbor and not a presumption and (ii) the 1997 Act applied the 20 percent test to "the entity's gross assets" and the 2018 Act applies it to "the fair market value of the fiduciary's interest in the entity," thus focusing the inquiry on the distribution to that fiduciary rather than all distributions made by the entity. For this purpose, what the available information indicates is or will be a series of distributions is aggregated. Finally, under subsection (e)(3), the fiduciary may make a determination or estimate based on factors in subsection (f), including but not limited to the entity's characterization of the distribution, that may help point the fiduciary to a distribution that is extraordinary enough under the circumstances to be treated as a capital distribution. But it is not possible to describe a "capital distribution" with reference to objective characteristics alone, and fiduciaries will have to exercise some judgment in making the necessary determinations and estimates.

Because estimates may be necessary and are expressly contemplated by the act, subsections (h) and (i) help the fiduciary know how to make distributions on the basis of incomplete information and, as a last resort, cite the power to adjust between income and principal in Section 203.

III.A.4.d. Distributions from Pass-Through Entities Used to Pay Income Tax

In the summer of 2008, the Uniform Law Commission amended Section 505 of the Uniform Principal & Income Act (the "UPAIA"); see part III.A.4.d.vi Appendix to 505 Discussion. The amendment responds to litigation over the income tax burden when a mandatory income trust holds an interest in a partnership or other pass-through entity. This article addresses the concerns underlying the changes, explains the changes, and discusses the planning implications of this change and related issues.

When a mandatory income trust holds an interest in a partnership or other flow-through entity, coordinating the UPAIA with fiduciary income tax rules can get tricky. The changes to UPAIA section 505 provide needed clarity regarding the treatment of taxes paid regarding a trust's distributive share of an entity's income; however, they do not address the other issues described in part II.J.5 Mandatory Income Trusts.

The Uniform Law Commission approved an overhaul of UPAIA in 2018. The Uniform Fiduciary Income and Principal Act ("UFIPA") retained UPAIA § 505 but renumbered it as UFIPA § 506. I was an ACTEC observer and was actively involved with the drafting committee.

III.A.4.d.i. Concerns Underlying the UPAIA Section 505 Changes

Before discussing the technical reasons for change, one must understand some of the basic income tax rules governing business entities, the rules governing the income taxation of trusts, and how they interact.

Income Tax Rules Governing Business Entities

Three different paradigms apply to business entities. A traditional corporation (also known as a "C corporation") pays income taxes on its own income. When it distributes its current or accumulated earnings, the distribution is taxed to its shareholders as a dividend. It might also make one or more distributions in partial or total liquidation, which is taxed to its shareholders as a sale of part or all of the stock rather than a dividend if certain tax law requirements are satisfied.

The Tax Reform Act of 1986 prevented C corporations from liquidating without both the shareholders and corporation being taxed. These new rules encouraged those who owned C corporations to convert them to S corporations. S corporation owners are taxed on the corporation's income rather than the corporation being taxed on the income. An example will help explain this difference:

- <u>C Corporation</u>. Suppose the corporation has one shareholder, A. A invests $1,000x. In Year 1, the corporation earns $100,000x and pays $40,000x in income tax, leaving $60,000x of after-tax earnings and a total of $61,000x of cash. The corporation liquidates, distributing $61,000x to A. A pays income tax of $12,000x on the excess of the $61,000x proceeds over the $1,000x that A invested. After paying taxes, A has $49,000x ($61,000x liquidation proceeds minus $12,000x taxes that A paid).

- <u>S corporation</u>. Same situation, only an S election is in place. In Year 1, the corporation pays no income tax on its earnings; instead, A receives Schedule K-1 from the corporation reporting $100,000x of gross income and pays $40,000x income tax on the corporation's earnings. Code § 1366(c). The corporation distributes $40,000x to A to pay the income taxes, so A has really not used any of A's own money to pay the income tax. Code § 1368(b)(1) provides that this distribution is not taxed because it does not exceed the shareholder's tax basis. However, A's investment in the corporation has increased for income tax purposes. A's basis is now $61,000x, which is the $1,000x that A invested, plus the $100,000x income on which A was taxed, minus the $40,000x that the corporation distributed to A to pay A's income tax. Code § 1367. The corporation then liquidates, distributing $61,000x to A ($1,000x that A invested, plus $100,000x earnings, minus $40,000x distributed to A to pay A's income taxes). A keeps the entire $61,000x without paying any income tax on the distribution, because A received the same amount as A is deemed to have invested.

In the example, the sole shareholder has received more using an S corporation than using a C corporation. The $40,000x that the S corporation distributed to A really was not intended as a benefit to A; instead, it was reimbursing A for the taxes that A paid on the corporation's income. The $40,000x is referred to below as a "tax distribution."

C and S corporations are the first two of the three paradigms. Partnerships (including limited liability companies taxed as partnerships) have similar effects on the taxation of owners for purposes of UPAIA section 505. Therefore, this article refers to S corporations and partnerships as "flow-through" entities and uses "K-1 income" to describe the income from the flow-through entity that an owner needs to report. For reasons beyond the scope of this article, partnerships have much more flexible income tax rules regarding distributions from the entity to owners.

In the example above, let's compare distributions from C corporations with distributions from flow-through entities.

- The owner of a C corporation receives no distribution.

- The owner of a pass-through entity receives a tax distribution, so that the owner retains no cash after paying income taxes.

Suppose that, in the example above, the owner is a mandatory income trust:

- A trust that owns stock in a C corporation has no trust accounting income because it has no receipts.

- How much trust accounting income does a trust that owns a pass-through entity have that must be distributed to the beneficiary? To achieve parity with the C corporation scenario, the income taxes paid using the tax distribution would be charged against income, so that again the beneficiary receives nothing. However, that result was not clear under UPAIA section 505 before the amendment.

One must understand trust income taxation to fully understand how UPAIA section 505 works.

Income Tax Rules Governing Trusts

Suppose a trust receives Schedule K-1 reporting $100,000x income. Ignoring the trust's small exemption amount and very modest use of lower tax brackets, the trust would be required to pay $40,000x of income tax, assuming a 40% federal and state income tax rate. However, if the trust distributes $100,000x to its beneficiary, it receives a $100,000x income distribution deduction and pays no income tax;[6161] instead, the trust gives the beneficiary a Schedule K-1 reporting $100,000x income, and the beneficiary pays income tax on the $100,000x Schedule K-1 income (to the extent not offset by the beneficiary's deductions, exemptions, etc.).[6162]

Carrying this example further, suppose the trust receives only a $40,000x tax distribution and does not have other funds to distribute to the beneficiary. If the trust distributes the $40,000x to the beneficiary, then the trust receives a $40,000x income distribution deduction and must pay $24,000x income tax ($60,000x multiplied by 40%) on its remaining $60,000x ($100,000x Schedule K-1 income minus $40,000x income distribution deduction) taxable income. However, the trustee has no funds with which to pay the $24,000x income tax. In fact, the only way to

[6161] Code §§ 651, 661.
[6162] Code §§ 652, 662.

prevent the trustee from not being able to pay income tax with respect to the Schedule K-1 income would be for the trustee to retain the entire tax distribution.

What are the principles that apply to determining the income distribution deduction described above? First, compute the amount of trust's distributable net income (taxable income, with certain adjustments). Next, determine the amount required to be distributed and any additional amounts actually distributed to the beneficiary. The income distribution deduction, which is always taxable to the beneficiary through the Schedule K-1 the trustee gives to the beneficiary, is the lesser of the distributable net income or the distributions described above. The rules become more complicated when one considers capital gains, tax-exempt income, or other similar issues, but the framework is similar.

Now let's apply this to a mandatory income trust. The trust accounting income, determined under the UPAIA, is an amount required to be distributed using the above principles. Some people assume that the Schedule K-1 income is the amount deemed distributed. That assumption is false. For income tax purposes, the amount of income required to be distributed is based on state law fiduciary accounting income.[6163] UPAIA Section 102(4) provides that "'income' means money or property that a fiduciary receives as a current return…." Thus, income would not exceed "money or property that a fiduciary receives" even if the Schedule K-1 income is higher.

In a trust that receives a $40,000x tax distribution, the trust has $40,000x of income receipts.[6164] How much income tax should the trustee deduct from the $40,000x receipt to determine the income that must be distributed? UPAIA section 505 answers that question. However, the answer was unclear and bred litigation, because beneficiaries receiving no cash from a mandatory income trust were understandably upset. Below, this article explains the UPAIA change and how attorneys drafting estate plans or representing disappointed beneficiaries might advise their clients in light of these changes and existing law.

III.A.4.d.ii. Explanation of the UPAIA Section 505 Changes

Before this amendment, the language of UPAIA section 505 was ambiguous regarding accounting for tax distributions. The amendment clarifies the overriding principle that the trustee of a mandatory income trust uses tax distributions to the extent necessary to pay income taxes and distributes any remaining income to the beneficiary. The official comments contain an algebraic formula that might be used when an interrelated calculation is required, which is whenever distributions from a pass-through are less than its Schedule K-1 income and the trustee has no other funds to distribute to the beneficiary or pay income tax on its Schedule K-1 income.

The policy behind this change is that the UPAIA should not place trustees in a position where they cannot pay the trust's income tax. Generally, it is not practical or prudent for a trustee to borrow to pay income tax when the trustee has no idea when, if ever, a distribution in excess of a tax distribution will be made. Furthermore, if the trust owned C corporation stock rather than an interest in a flow-through entity, the trust would never have received a distribution from the business entity anyway.

[6163] Reg. §§ UPAIA Section 401(b).
[6164] UPAIA Section 401(b).

In the example above, suppose the business entity annually accumulated the $40,000x excess of Schedule K-1 income over the tax distribution. Suppose these accumulated amounts were later distributed to the trust. UPAIA section 506(a)(3) would authorize additional distributions to the beneficiary because the beneficiary essentially paid the tax on these accumulated amounts when the trustee used the tax distributions to pay income tax instead of distributing part or all of them to the beneficiary.

Before turning to advising clients about these changes, let's discuss particular rules affect how these rules apply to various trusts that own stock in S corporations:

- An electing small business trust ("ESBT") does not receive an income distribution deduction with respect to its Schedule K-1 income that is distributed to its beneficiary.[6165]

- A qualified subchapter S trust ("QSST") under Code Section 1361(d), or other trust treated as wholly owned by one grantor or one beneficiary, does not pay taxes on any of its Schedule K-1 income from an S corporation. Instead, the individual beneficiary or grantor treated for income tax purposes as receiving Schedule K-1 income pays all the income taxes attributable to the Schedule K-1 income.[6166] Therefore, the trustee would distribute to the beneficiary all of the tax distribution.

- Only in very limited situations may a trust not described above be qualified to hold stock in an S corporation. The main situations involve trusts that were grantor trusts during the grantor's or beneficiary's life (but only for the two years following the deemed owner's death), estates (including a revocable trust taxed as an estate if a Code Section 645 election is made), and trusts that are funded upon termination of an estate (but only for the two years following funding).[6167]

III.A.4.d.iii. UFIPA § 506

UFIPA § 506, "Income Taxes," provides:

(a) A tax required to be paid by a fiduciary which is based on receipts allocated to income must be paid from income.

(b) A tax required to be paid by a fiduciary which is based on receipts allocated to principal must be paid from principal, even if the tax is called an income tax by the taxing authority.

(c) Subject to subsection (d) and Sections 504, 505, and 507, a tax required to be paid by a fiduciary on a share of an entity's taxable income in an accounting period must be paid from:

(1) income and principal proportionately to the allocation between income and principal of receipts from the entity in the period;

(2) principal to the extent the tax exceeds the receipts from the entity in the period.

[6165] Code § 1361(e); Reg. § 1.641(c)-1(i).
[6166] Code § 1361(d)(1)(B).
[6167] Code § 1361(c)(2). See part III.A.3 Trusts Holding Stock in S Corporations.

(d) After applying subsections (a) through (c), the fiduciary shall adjust income or principal receipts, to the extent the taxes the fiduciary pays are reduced because of a deduction for payments made to a beneficiary.

UFIPA § 506 retained the Comment to UPAIA (see part III.A.4.d.vi Appendix to 505 Discussion) and added a Comment clarifying that it has no effect on the marital deduction.[6168]

III.A.4.d.iv. Advising Clients about the UPAIA § 505 Change and UFIPA § 506

The common yet extreme scenario posited – where a mandatory income trust owns only an interest in a flow-through entity that limits distributions to tax distributions – presents difficult challenges for settlors, trustees, and beneficiaries. The changes to UPAIA section 505 and UFIPA § 506 allow the trustee to pay the trust's taxes notwithstanding these significant other challenges. One must consider why this difficult situation arises, what the trustee must do to alter the trust's investments if the trust agreement does not address the issue, and how to minimize disputes about what the trustee should do.

III.A.4.d.iv.(a). Why This Difficult Situation Arises

The first question is why the settlor would provide for a mandatory income interest, while expecting that no income will be available to distribute to the beneficiary? Scenarios include:

- *Marital Deduction Mandatory Income Requirement*. The trust is for a surviving spouse who does not need distributions but must provide for mandatory income to qualify for the marital deduction. The trust has the usual clause allowing the spouse to require the trustee to make the property productive. In some cases, using a separate trust to hold a flow-through entity without holding any other assets might be necessary to minimize the estate tax risk of buy-sell agreements.[6169] The Internal Revenue Service has taken the position that a fixed-price buy-sell agreement, in which the sale price of a decedent's equity is less than the Internal Revenue Service-determined fair market value, effectively passes property to a person other than the surviving spouse and therefore disqualifies the marital trust from being eligible for a marital deduction.[6170] If the client uses a fixed-price buy-sell agreement, the client might protect the marital deduction with respect to other assets by placing the other assets into a marital deduction trust that is separate from the trust that holds the client's equity. In such a case, the settlor should make sure that the spouse understands the trust's purposes and does not expect any distributions from the

[6168] The added Comment says:

Marital deduction issues. Any payment of income tax from income could raise issues of the estate or gift tax marital deduction, especially if the income on which that income tax is paid is not fully distributed, as in the case of income retained in an entity owned in whole or in part by the trust. These issues are similar to the issues raised by Revenue Ruling 2006-26 in the context of defined contribution qualified retirement plans and individual retirement accounts (IRAs). See Section 409 and the Comment thereto. The 2018 Act makes no change to Section 506 because the power in the spouse to cause the trust assets to be made reasonably productive of income addresses any marital deduction issue. See Section 413.

[6169] In addition to the estate tax reason mentioned below, a QSST that holds only S stock (and no other assets) is not required to take any particular action to continue to qualify as an S corporation shareholder within two years after the beneficiary dies. Code §§ 1361(c)(2)(A)(ii), 1361(d)(1)(B).

[6170] See part II.O.2.c Effect of Buy-Sell Agreement on Marital Deduction, especially fn 3780.

trust. If, however, the surviving spouse is adverse to the remaindermen, then the grantor settlor should consider a prenuptial agreement or other ways of documenting a particular expectation of cash flow to the surviving spouse.

- *Future Income Expected*. The settlor does not expect income to be generated initially but expects the business entity eventually to generate income and does not expect the beneficiary to need the income until later. In this case, the settlor might consider describing the settlor's expectation regarding income so that the trustee has more guidance on what the settlor expects and can respond to concerns that the income beneficiary might raise.

- *Post-Mortem Business Sale Expected*. The settlor wanted to mandate income distributions, knowing full well that the business would need to be sold. The settlor might not have been able to find a buyer while alive, might have wanted to have a place to work for as long as the settlor lived, or might have wanted to wait until death to save income (including capital gain) tax on the sale.

III.A.4.d.iv.(b).What the Trustee Must Do to Alter the Trust's Investments If the Trust Agreement Does Not Address the Issue

The Uniform Prudent Investor Act (the "Investor Act") imposes various requirements:

- The trustee must consider "the purposes, terms, distribution requirements, and other circumstances of the trust."[6171]

- The trustee must further consider not only total return from income and appreciation of capital but also needs for liquidity and regularity of income.[6172]

- "A trustee shall diversify the investments of the trust unless the trustee reasonably determines that, because of special circumstances, the purposes of the trust are better served without diversifying."[6173]

- "Within a reasonable time after accepting a trusteeship or receiving trust assets, a trustee shall review the trust assets and make and implement decisions concerning the retention and disposition of assets, in order to bring the trust portfolio into compliance with the purposes, terms, distribution requirements, and other circumstances of the trust, and with the requirements of this [Act]."[6174]

- "If a trust has two or more beneficiaries, the trustee shall act impartially in investing and managing the trust assets, taking into account any differing interests of the beneficiaries."[6175]

Thus, absent an expression of intent to the contrary, the trustee has a duty to sell enough of the business interest to generate income sufficient to fairly balance the income beneficiary's interests against the other beneficiaries' interests; note that a sale might not be required if the

[6171] Section 2(a) of the Investor Act.
[6172] Section 2(c)(5) and (7) of the Investor Act.
[6173] Section 3 of the Investor Act.
[6174] Section 4 of the Investor Act.
[6175] Section 6 of the Investor Act.

business already generates sufficient income to create that fair balance. The trustee also must sell enough of the business interest to create a diversified portfolio. Therefore, for all practical purposes, the trustee must dispose of substantially all of the business interest, if that comprises too much of the trust.

The trust agreement can expressly modify this duty to sell. It might include some or all of the following provisions:

- Expressly authorize the trustee to hold the property (for a particular period of time or indefinitely), notwithstanding its failure to produce income and notwithstanding any requirement to diversify that might otherwise apply. However, this authorization might be insufficient when the stock is performing poorly.[6176] Although the lower court's decision was reversed, it indicates what some judges might do. Also, such a provision cannot be used for marital deduction trusts if it would deprive the surviving spouse of the right to income.[6177] The author routinely includes language authorizing the spouse to require that the trustee either make the trust's property productive or convert it to income-producing property within a reasonable time.[6178]

- Subject to the marital trust concerns described above, require the trustee to hold the property (for a particular period of time or indefinitely). The authorization to hold might be viewed as requiring the trustee to consider the merits of selling even if it places less pressure to sell, whereas the requirement to hold should remove any requirement to consider selling.

- Give family members interested in the business the power to direct the trustee to hold the business interest. Some states completely relieve the trustee of liability for following directions that the trust agreement authorizes; others might implicitly impose a duty to resist instructions if the instructions appear inconsistent with the trustee's duties to various beneficiaries.

- If the trust is not a marital trust, add as beneficiaries those family members working in the business by stating that a purpose of retaining the business interest is to provide jobs for those family members. Even if the trust agreement does not provide for distributions to them, some steps should be taken to recognize their interests; otherwise, the trustee has no duty to protect their interests.[6179]

Note, however, that these ideas do not resolve marital deduction issues if the surviving spouse wants more income. Consistent with the regulations cited in fn 6178, UFIPA § 413 provides:

> *Marital Deduction Property Not Productive of Income*. If a trust received property for which a gift or estate tax marital deduction was allowed and the settlor's spouse holds a

---

[6176] *Testamentary Trust UW Dumont* , 791 N.Y.S.2d 868 (Surr. Ct. 2004), reversed *In re Chase Manhattan Bank*, 809 N.Y.S.2d 360 (N.Y.A.D. 2006).
[6177] Regs. §§ 20.2056(b)-5(f)(5) (general power of appointment marital trusts), 20.2056(b)-7(d)(2) (same rules apply to QTIP trusts).
[6178] Reg. § 20.2056(b)-5(f)(4) suggests such a provision if the trust's assets consist substantially of unproductive property. However, Reg. § 20.2056(b)-5(f)(5) looks to the trust's overall return and approves of distributing principal to make up for lack of income from any nonproductive assets, so such a provision can relate to the trust's overall level of distributions, rather than requiring that each asset be productive.
[6179] Section 5 of the Investor Act.

> mandatory income interest in the trust, the spouse may require the trustee to make property productive of income, convert property to property productive of income within a reasonable time, or exercise the power to adjust under Section 203, to the extent the trust assets otherwise do not provide the spouse with sufficient income from or use of the trust assets to qualify for the deduction. The trustee may decide which action or combination of actions to take.

UFIPA § 413 did not make any substantive changes to UPAIA.[6180]

III.A.4.d.iv.(c). How to Minimize Disputes About What the Trustee Should Do

The most effective way to minimize disputes is to have legally binding, unambiguous language in the trust. However, being too detailed might unduly tie the trustee's hands when the settlor really wanted to rely on the trustee's judgment. It is impossible to predict the future, and giving the trustee flexibility is often the best call.

The settlor should consider discussing with family members the settlor's intent in placing an essentially unproductive asset into a mandatory income trust. An income beneficiary who has lowered expectations might be less demanding, especially if the trustee and the other beneficiaries are all in the room when the settlor expresses this intent.

The settlor might also consider writing a precatory letter to the trustee (and beneficiaries, if appropriate) expressing this intent. Although the trustee cannot rely on this letter to change the trustee's legal obligations, a trustee usually finds comfort to the extent the letter supports the trustee's discretionary actions under the trust agreement.

For example, to maximize flexibility in a trustee who is to make the ultimate decision, the settlor would:

- include in the trust agreement express authority (but not a mandate) for the trustee to retain assets originally contributed (or sold by the settlor) to the trust, including without limitation (name of the company, its affiliates, etc.), without any requirement to diversify under the Investor Act, and

- write a precatory letter to the trustee.

Extreme caution is recommended in using such provisions with a marital deduction trust or other trust that the tax laws require to have a mandatory income provision. Being too explicit might trigger an attack on the provision as undermining the mandatory income characterization; however, including a right to make productive should suffice.[6181]

[6180] The Comment to UPAIA § 413 says

> In Section 413 the 2018 Act makes little substantive change from the 1997 Act. It omits Section 413(b) of the 1997 Act, which had provided:
>
> > In a case not governed by subsection (a), proceeds from the sale or other disposition of an asset are principal without regard to the amount of income the asset produces during any accounting period.
>
> Section 404(2) of the 2018 Act provides that proceeds from a sale or exchange of a principal asset remain principal, which renders former Section 413(b) duplicative.

[6181] See fn. 6178.

III.A.4.d.iv.(d).Fairness When the Trust Sells Its Interest in the Entity

See parts II.J.8.c.i.(b) Possible Allocation to Income of Gain on Sale of Interest in Partnership or S corporation and II.J.12 Equitable Adjustments to Reimburse Income Tax Paid or Tax Benefit Received by a Party That Does Not Bear the Burden Under the Trust Accounting Rules.

III.A.4.d.v. Conclusion

The amendment to UPAIA section 505 should prove helpful. It should avoid disputes over whether the trustee will be able to pay the trust's income taxes and place the focus where it belongs – whether a mandatory income trust should hold assets that, in the aggregate, produce no after-tax income. Trusts to hold most or all of their assets in the form of flow-through entities such as partnerships that sometimes make no more than tax distributions might be drafted with a discretionary instead of a mandatory income distribution and in any event should be drafted with careful consideration to the Uniform Prudent Investor Act.

III.A.4.d.vi. Appendix to 505 Discussion

Below are the amendments to Uniform Principal and Income Act, which are incorporated into the UPAIA at http://www.law.upenn.edu/bll/archives/ulc/upaia/2008_final.htm:

Section 505 is amended to read:

SECTION 505. INCOME TAXES

(a) A tax required to be paid by a trustee based on receipts allocated to income must be paid from income.

(b) A tax required to be paid by a trustee based on receipts allocated to principal must be paid from principal, even if the tax is called an income tax by the taxing authority.

(c) A tax required to be paid by a trustee on the trust's share of an entity's taxable income must be paid ~~proportionately~~:

(1) from income to the extent that receipts from the entity are allocated <u>only</u> to income; ~~and~~

(2) from principal to the extent that~~:~~

~~(A)~~ receipts ~~from~~ the entity are allocated <u>only</u> to principal; ~~and~~

~~(B) the trust's share of the entity's taxable income exceeds the total receipts described in paragraphs (1) and (2)(A).~~

<u>(3) proportionately from principal and income to the extent that receipts from the entity are allocated to both income and principal; and</u>

<u>(4) from principal to the extent that the tax exceeds the total receipts from the entity.</u>

(d) ~~For~~ purposes ~~of this section, receipts allocated to principal or income~~

~~must be reduced by the amount distributed to a beneficiary from principal or income for which the trust receives a deduction in calculating the tax.~~ After applying subsections (a) through (c), the trustee shall adjust income or principal receipts to the extent that the trust's taxes are reduced because the trust receives a deduction for payments made to a beneficiary.

Comment

~~**Electing Small Business Trusts.** An Electing Small Business Trust (ESBT) is a creature created by Congress in the Small Business Job Protection Act of 1996 (P.L. 104-188). For years beginning after 1996, an ESBT may qualify as an S corporation stockholder even if the trustee does not distribute all of the trust's income annually to its beneficiaries. The portion of an ESBT that consists of the S corporation stock is treated as a separate trust for tax purposes (but not for trust accounting purposes), and the S corporation income is taxed directly to that portion of the trust even if some or all of that income is distributed to the beneficiaries.~~

~~A trust normally receives a deduction for distributions it makes to its beneficiaries. Subsection (d) takes into account the possibility that an ESBT may not receive a deduction for trust accounting income that is distributed to the beneficiaries. Only limited guidance has been issued by the Internal Revenue Service, and it is too early to anticipate all of the technical questions that may arise, but the powers granted to a trustee in Sections 506 and 104 to make adjustments are probably sufficient to enable a trustee to correct inequities that may arise because of technical problems.~~

Taxes on Undistributed Entity Taxable Income. When a trust[6182] owns an interest in a pass-through entity, such as a partnership or S corporation, it must report its share of the entity's taxable income regardless of how much the entity distributes to the trust. Whether the entity distributes more or less than the trust's tax on its share of the entity's taxable income, the trust must pay the taxes and allocate them between income and principal.

Subsection (c) requires the trust to pay the taxes on its share of an entity's taxable income from income or principal receipts to the extent that receipts from the entity are allocable to each. This assures the trust a source of cash to pay some or all of the taxes on its share of the entity's taxable income. Subsection 505(d) recognizes that, except in the case of an Electing Small Business Trust (ESBT), a trust normally receives a deduction for amounts distributed to a beneficiary. Accordingly, subsection 505(d) requires the trust to increase receipts payable to a beneficiary as determined under subsection (c) to the extent the trust's taxes are reduced by distributing those receipts to the beneficiary.

Because the trust's taxes and amounts distributed to a beneficiary are interrelated, the trust may be required to apply a formula to determine the correct amount payable to a beneficiary. This formula should take into account that each time a distribution is made to a beneficiary, the trust taxes are reduced and amounts distributable to a beneficiary are increased. The formula assures that after deducting distributions to a beneficiary, the trust has enough to satisfy its taxes on its share of the entity's taxable income as reduced by distributions to

[6182] [This is my footnote.] UFIPA added "nongrantor" before "trust" beneficiaries.

Example (1) – Trust T receives a Schedule K-1 from Partnership P reflecting taxable income of $1 million. Partnership P distributes $100,000 to T, which allocates the receipts to income. Both Trust T and income Beneficiary B are in the 35% tax bracket.
Trust T's tax on $1 million of taxable income is $350,000. Under Subsection (c) T's tax must be paid from income receipts because receipts from the entity are allocated only to income. Therefore, T must apply the entire $100,000 of income receipts to pay its tax. In this case, Beneficiary B receives nothing.

Example (2) - Trust T receives a Schedule K-1 from Partnership P reflecting taxable income of $1 million. Partnership P distributes $500,000 to T, which allocates the receipts to income. Both Trust T and income Beneficiary B are in the 35% tax bracket.
Trust T's tax on $1 million of taxable income is $350,000. Under Subsection (c), T's tax must be paid from income receipts because receipts from P are allocated only to income. Therefore, T uses $350,000 of the $500,000 to pay its taxes and distributes the remaining $150,000 to B. The $150,000 payment to B reduces T's taxes by $52,500, which it must pay to B. But the $52,500 further reduces T's taxes by $18,375, which it also must pay to B. In fact, each time T makes a distribution to B, its taxes are further reduced, causing another payment to be due B.

Alternatively, T can apply the following algebraic formula to determine the amount payable to B:

$$D = (C-R*K)/(1-R)$$

D = Distribution to income beneficiary
C = Cash paid by the entity to the trust
R = tax rate on income
K = entity's K-1 taxable income

Applying the formula to Example (2) above, Trust T must pay $230,769 to B so that after deducting the payment, T has exactly enough to pay its tax on the remaining taxable income from P.

Taxable Income per K-1	1,000,000
Payment to beneficiary	230,769[6183]
Trust Taxable Income	$ 769,231
35% tax	269,231

Partnership Distribution	$ 500,000
Fiduciary's Tax Liability	(269,231)
Payable to the Beneficiary	$ 230,769

[6183] D = (C-R*K)/(1-R) = (500,000 – 350,000)/(1 - .35) = $230,769. (D is the amount payable to the income beneficiary, K is the entity's K-1 taxable income, R is the trust ordinary tax rate, and C is the cash distributed by the entity).

In addition, B will report $230,769 on his or her own personal income tax return, paying taxes of $80,769. Because Trust T withheld $269,231 to pay its taxes and B paid $80,769 taxes of its own, B bore the entire $350,000 tax burden on the $1 million of entity taxable income, including the $500,000 that the entity retained that presumably increased the value of the trust's investment entity.

If a trustee determines that it is appropriate to so, it should consider exercising the discretion granted in UPIA section 506 to adjust between income and principal. Alternatively, the trustee may exercise the power to adjust under UPIA section 104 to the extent it is available and appropriate under the circumstances, including whether a future distribution from the entity that would be allocated to principal should be reallocated to income because the income beneficiary already bore the burden of taxes on the reinvested income. In exercising the power, the trust should consider the impact that future distributions will have on any current adjustments.

III.A.5. Fiduciary Duties Regarding Business Interests Held in Trust

Issues regarding the duty to diversify are discussed in part III.A.4.d.iv, Advising Clients about the UPAIA § 505 Change and UFIPA § 506.

This author has heard of bank regulators requiring corporate trustees to revalue closely-held business interests annually, citing 12 CFR 9.6, which provides:

Sec. 9.6 Review of fiduciary accounts.

(a) *Pre-acceptance review*. Before accepting a fiduciary account, a national bank shall review the prospective account to determine whether it can properly administer the account.

(b) *Initial post-acceptance review*. Upon the acceptance of a fiduciary account for which a national bank has investment discretion, the bank shall conduct a prompt review of all assets of the account to evaluate whether they are appropriate for the account.

(c) *Annual review*. At least once during every calendar year, a bank shall conduct a review of all assets of each fiduciary account for which the bank has investment discretion to evaluate whether they are appropriate, individually and collectively, for the account.

III.A.6. Post-Mortem Trust and Estate Administration

Although the decedent's final income tax year ends with the date of death, the filing of a return and payment of tax may be made as though the decedent had lived throughout the last taxable year.[6184] For details on activity on the date of death and when the decedent's final income tax year closes and the estate's fiduciary income tax year begins, see part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

[6184] Reg. § 1.443-1(a)(2).

If a joint return is filed, the surviving spouse may sign the first return on behalf of both of them if no court-appointed executor is serving and certain other conditions are satisfied;[6185] otherwise, the court-appointed executor signs, and if no executor is court-appointed then another person "charged with" the decedent's property may sign.[6186] A person "charged with" the decedent's property includes an heir,[6187] the trustee of the decedent's revocable trust,[6188] or perhaps an

---

[6185] Reg. § 1.6013-1(d).

[6186] Reg. § 1.6012-3(b). If multiple executors are named, any one of them may sign the return. Rev. Rul. 83-41, citing Reg. § 1.6012-3(b)(1). Rev. Rul. 83-41 also allows any one fiduciary to sign a fiduciary income tax return or extend the time to assess tax, citing Reg. § 1.6012-3(a)(1). Rev. Rul. 84-165 clarifies:

> While a consent signed by any one executor or administrator is valid for federal tax purposes, more than one executor or administrator may sign the consent.

Rev. Rul. 83-41 also discusses rules for signing consents for an active or a dissolved corporation regarding tax generally or for a partnership liable for employment or excise taxes.

[6187] CCA 201334040 (an informal letter – not a National Office pronouncement) advised:

> Q. Decedent is a non-filer who died intestate with one asset: a bank account held by the decedent, her daughter, and her daughter's husband. Field counsel considers the daughter a distributee and proposed having the daughter to sign a Form 56, Notice Concerning Fiduciary Relationship, and then sign the decedent's unfiled tax returns and Form 870 or 872.
>
> A. The daughter may sign the decedent's unfiled returns, because section 6012(b)(1) provides that "Tax returns of decedents are to be made by the decedent's executor, administrator, or other person charged with the property of the decedent." The daughter has the decedent's property. If the daughter submits balance due returns, those are acceptable without proof of authority; but if she claims credit elects or refunds, the Service may demand Form 1310 and/or documentary authority before refunding or crediting any claimed overpayment. See IRM 3.11.3.10.2(3). The Service may communicate with the daughter and her representatives about returns the daughter signs for her mother.
>
> Section 6501(c)(4)(A) provides for extending the ASED and section 6213(d) provides for waiving restrictions on assessment, but who may sign ASED extension consents and waivers for decedents is not specified in the statutes or regulations. Although Revenue Ruling 83-41, 1983-1 C.B. 349, clarified, amplified by Rev. Rul. 84-165, 1984-2 C.B. 305, held that "the Service will generally apply the rules applicable to execution of the original returns to consents to the extension of time to make an assessment", it ruled that in the absence of a court-appointed administrator for an intestate decedent, nobody may sign an ASED extension for the intestate decedent. Under the revenue rulings, the daughter may sign ASED extensions for her liability as a transferee, because it's her own liability, but she may not sign Form 870 or 872 for her mother's estate without being appointed as the personal representative (administrator) for her mother's estate by a court of competent jurisdiction. The same rules should apply to Form 870, as well. The Service should require letters of administration or equivalent proof of such appointment before accepting an 870 or 872 from the daughter.
>
> The daughter should also submit a Form 56 to document her fiduciary relationship as the personal representative of her mother's estate. The regulations require the fiduciary to retain proof of authority to act for the principal, sec. 301.6903-1(b)(2), and the same authority that would provide a foundation for Form 56 would likely suffice for Forms 870 and 872 (that is, letters of administration from a state probate court).

[6188] CCA 201334040 (an informal letter – not a National Office pronouncement) advised:

> Q: Decedent established a revocable trust into which he transferred all his assets before he died. He died testate, naming B his executor. B is also one of three trustees of the trust. The will has not been probated, and nothing passed under the will. Field counsel proposes treating the trustees as "testamentary trustees" and having them sign Form 56 and Form 870 or 872. The trust documents require the trustees to act unanimously, and the trustees have voted to appoint B the person to handle IRS matters.

agent under a durable power of attorney who does not yet know of the death.[6189] However, only a court-appointed executor may sign an amended return[6190] or consent to extend the time to assess tax.[6191]

See part III.A.3.d Special Income Tax Issues Regarding Bequeathing S Corporation Stock and Partnership Interests. Consider whether to do a very quick funding of any QSSTs created upon death or to place a partnership interest in an S corporation owned by a QSST; see part III.A.4.a General Strategies Regarding Fiduciary Income Taxation of Business Interests. A huge downside to quick funding is the executor's personal liability if an federal debts are unpaid before the distribution[6192] or due to an estate tax lien imposed on the executor's own assets.[6193] An executor can obtain some assurance by filing Forms 4810 to get the statute of limitations on income tax matters shortened, writing a letter to the IRS (certified mail, return receipt requested)

A: B may execute any unfiled returns for the decedent, because section 6012(b)(1) provides that "Tax returns of decedents are to be made by the decedent's executor, administrator, or other person charged with the property of the decedent." The Service will accept returns signed by B as trustee in possession of the decedent's property, but the Service may require a Form 1310 and/or documentation of B's appointment by a court if the returns claim an overpayment.
As for filing a Form 870 or 872, the Service should require proof of authority, confirmed by a court (that is, letters testamentary), before accepting either an ASED extension or a waiver of restrictions on assessment.

[6189] CCA 201334040 (an informal letter – not a National Office pronouncement) advised:
Q: The day after decedent died (in New Jersey) and before his attorney-in-fact learned the decedent (principal) had died, the POA (acting in Florida) executed a Form 872 extending the ASED. No probate has been opened, and no representative has been appointed.
A: The ASED extension signed by the attorney-in-fact the day after the taxpayer's death and at a time when neither the attorney-in-fact nor the IRS knew that the taxpayer had died is valid, because under both Florida law (where the attorney-in-fact acted) and New Jersey law (where the taxpayer died and may have been domiciled) acts by an attorney-in-fact done in good faith and without knowledge that the principal is dead are valid and binding. Fla. Stat. § 709.2109(4); N.J. Stat. § 46:2B-8.5(a).
Now that the attorney-in-fact is aware of the principal's death, the POA is terminated, and he is not authorized to act for the decedent. If the estate wishes to submit a Form 870 or 872, the Service should require proof of authority to bind the estate. If the decedent died intestate, then court appointment of an administrator (and letters of administration) will be required. If the decedent died testate and named an administrator, then court approval (and letters testamentary) will be required.
Conclusion: In all cases, if the purported personal representative won't provide proof of authority (letters of administration or letters testamentary from an appropriate court), then no 870 or 872 should be accepted, and notices of deficiency should issue to ensure that the assessments are valid (copies to the taxpayer's last known address and to the address of any fiduciaries, whether confirmed or not).

[6190] CCA 201107020, citing *Estate of Weisel v. Commissioner*, T.C. Memo. 1990-351, and Rev. Rul. 83-41. The CCA was an informal letter – not a National Office pronouncement.

[6191] Rev. Rul. 83-41; CCA 201107020 (see fn. 6190); CCA 201334040 (see fns. 6187-6189). However, Rev. Rul. 83-41 held that heirs liable under Code § 6901 as transferees may sign consents for their own liabilities.

[6192] 31 U.S.C. § 3713(b), as described in fn. 7167 in part III.B.5.e.iv.(e) Which Estates Are Affected by the Estate Tax Lien?.

[6193] See part III.B.5.e.iv Federal Estate Tax Liens.

to the IRS to obtain a discharge under Code §§ 2204(a), (b) and 6905,[6194] and obtaining an agreement by the beneficiaries to pay back any distributions if the executor did not reserve enough (a "refunding agreement");[6195] however, a refunding agreement is only as good as the executor's ability to seize assets from the beneficiaries.

[6194] Instead of a letter, one might file IRS Form 5495. However, the form has various requirements, and neither provision requires using the form. Referring to the format for a Code § 2204 discharge request, *U.S. v. Paulson*, 125 A.F.T.R.2d 2020-1429 (DC CA 03/23/2020) held:

> Currently, there is no authority that requires specific format, form or wording to make an application for discharge. See *United States v. Johnson*, 224 F.Supp.3d 1220, 1237 (D. Utah 2016) ("*Johnson II*"), reversed on other grounds *United States v. Johnson*, 920 F.3d 639 (10th Cir. 2019). However, Plaintiff argues that Michael Paulson signed various documents in different capacities and sometimes would sign the same document multiple times in his differing capacities. (Doc. No. 191-1 at 19–21.) There is no such requirement, however, how to sign the letter nor is there a requirement that Michael Paulson was supposed to provide two letters to the IRS….
>
> Further, the IRS never contacted Michael Paulson regarding any confusion over the letter. In fact, the IRS never responded to the letter. The IRS is "to notify the fiduciary (1) of the amount of such tax for which it has been determined the fiduciary is liable, or (2) that it has been determined that the fiduciary is not liable for any such tax." 26 U.S.C. § 2204. If there was any confusion, Plaintiff argues that the IRS should have alerted the fiduciary that he remained liable for the full amount of "any estate tax for which the fiduciary may be personally liable." The Court agrees. Plaintiff should not have waited twelve years to raise this issue in litigation.

In fn 1, *U.S. v. Paulson*, 131 A.F.T.R.2d 2023-1743 (9th Cir. 5/17/2023), noted that the U.S. did not appeal this conclusion.

Johnson (fn 7171) awarded the taxpayer attorney fees when the IRS persisted with arguments that the taxpayer did not qualify for a Code § 2204 discharge.

[6195] Letter Ruling 201745001 held that entering into a refunding agreement with a private foundation would not be a prohibited act of self-dealing under Code § 4941, and any repayments the foundation may make would not constitute taxable expenditures under Code § 4945. The IRS described the refunding agreement:

> You represent that Trust and Foundation are seeking to fulfill Grantor's intent that the Trust distribute the maximum value of Trust to the Foundation at the earliest opportunity. You further represent that the administration of Trust has not been completed and is ongoing. Pursuant to the provisions of Trust instrument, assets remaining to be distributed to the Foundation may be or become subject to expenses, losses or liabilities sustained in the administration of Trust. You state that under State law, Trustee 1 and Trustee 2 may be personally liable for expenses, losses and liabilities sustained in the administration of the Trust. Given the potential exposure to future claims and liabilities against Trust, Trustee 1 and Trustee 2 believe it would be prudent to retain until the completion of trust administration a sufficient reserve to satisfy any such claims. You represent that there is a risk that liabilities will likely extend well beyond the termination of Trust. The transfer of the remaining assets of Trust to the Foundation is within the powers of Trustee 1 and Trustee 2. Foundation has requested that Trustee 1 and Trustee 2 accelerate distributions of the assets of the Trust to Foundation before Trustee 1 and Trustee 2 know the full extent of potential claims and liabilities. In order to induce Trustee 1 and Trustee 2 to make substantial distributions to Foundation sooner than they otherwise would make them, Foundation has proposed to execute and deliver to Trustee 1 and Trustee 2 the Agreement.
>
> Under the Agreement, Foundation acknowledges that Trustee 1 and Trustee 2 would normally defer a substantial portion of the distributions to Foundation until a final resolution of all liabilities and claims. Trustee 1 and Trustee 2 would only make a final distribution of the remaining assets of the Trust when they are satisfied that all liabilities of the Trust have been determined and discharged. Trustee 1 and Trustee 2 are willing to consider accelerating the distribution of assets to the Foundation, provided that the Foundation obligates itself to indemnify Trustee 1 and Trustee 2. Further, under the Agreement, Foundation agrees to return any distribution required to

See part III.B.2.j Tax Allocations upon Change of Interest in a Business, especially parts III.B.2.j.ii.(d) Death of a Shareholder and III.B.2.j.iii.(c) Death of a Partner — Treated Like a Transfer of a Partner's Entire Interest. Consider planning opportunities for allocations in the year of death or when funding bequests, such as measuring pre- and post-mortem income based on an accounting cut-off or pro-rata, per-share, per-day.

Planning for partnership interests also includes:

- Obtaining an inside basis step-up on death. See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations. (Pre-mortem planning includes part II.H.2.i Avoiding a Basis Step-Down.) If the decedent owned all (perhaps most) of the stock of an S corporation than held only marketable securities or other nondepreciable property, consider whether liquidating the corporation (for example, converting it to an LLC taxed as a sole proprietorship or partnership) might facilitate an inside basis at little cost; see part II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation; Possible Way to Attain Basis Step-Up.

- Distributing a partnership interest when funding bequests provides an opportunity to obtain an inside basis step-up (especially if the partnership did not make the requisite election on or before the partnership's taxable year that included date of death) and make new partnership elections, but it also might cause depreciation periods to start again (which could significantly defer depreciation for real estate). See parts II.Q.8.e.i Distribution of Partnership Interests and II.Q.8.e.iv Interests Resulting in Deemed Termination: Effect on Partnership (repealed by 2017 tax reform).

See also part III.B.2.e.ii Tax ID Issues When the Deemed Owner of a Grantor Trust Dies; Related Effect on Quarterly Payments of Estimated Income Tax.

Also, Code § 451(b)(3)(A)(iii) accelerates certain income of an accrual taxpayer who has an applicable financial statement (AFS) - "a financial statement which is certified as being prepared in accordance with generally accepted accounting principles and which is … an audited financial statement of the taxpayer which is used for (I) credit purposes, (II) reporting to shareholders, partners, or other proprietors, or to beneficiaries, or (III) any other substantial nontax purpose." [6196] Reg § 1.451-3(c)(6)(i) provides:[6197]

---

be refunded under the Agreement to either Trustee 1 or Trustee 2 should claims and liabilities arise. Under the Agreement, the distribution of assets to the Foundation will include cash or in kind assets whether investment securities, real property or other assets. Pursuant to the Agreement, Trustee 1 and Trustee 2 can be assured that the Foundation will pay such amounts or return such portion of distributions that Trustee 1 and Trustee 2 determine in their sole and absolute discretion are needed or desirable to pay all such liabilities.
In addition, under the Agreement, Foundation agrees to indemnify and hold harmless Trustee 1 and Trustee 2 from any and all liabilities and expenses sustained in the administration of the Trust. Further, nothing in the Agreement requires Trustee 1 or Trustee 2 to make any distributions to Foundation at any particular time and Trustee 1 and Trustee 2 shall determine the amounts of and whether to make distributions in their sole and absolute discretion.

[6196] An excerpt from the preamble to the regulations is in fn 4430 in part II.Q.4.e.i Life Insurance Basis Adjustment on the Death of an Owner Who Is Not the Insured.

[6197] T.D. 9941 (1/6/2021) provides background for this inclusion:

However, the Treasury Department and the IRS agree with comments suggesting that taxpayers should be afforded the flexibility of applying an offset for costs incurred against AFS income inclusions from the future sale of inventory, the “AFS cost offset method.” Accordingly, a taxpayer that uses the AFS cost offset method determines the amount of gross income includible for a year prior to the year in which ownership of inventory transfers to the customer by reducing the amount of revenue it would otherwise be required to include under the AFS Income Inclusion Rule for the taxable year (AFS inventory inclusion amount) by the cost of goods related to the item of inventory for the taxable year, the “cost of goods in progress offset.” The net result is the amount that is required to be included in gross income for that year under the AFS Income Inclusion Rule. The deferred revenue, that is, the revenue that was reduced by the cost of goods in progress offset for a taxable year prior to the taxable year that ownership of the item of inventory is transferred to the customer, is generally taken into account in the taxable year in which ownership of the item of inventory is transferred to the customer.

The final regulations provide that the cost of goods in progress offset for each item of inventory for the taxable year is calculated as (1) the cost of goods incurred through the last day of the taxable year, (2) reduced by the cumulative cost of goods in progress offset amounts attributable to the items of inventory that were taken into account in prior taxable years, if any. However, the cost of goods in progress offset cannot reduce the AFS inventory inclusion amount for the item of inventory below zero. Further, the cost of goods in progress offset attributable to one item of inventory cannot reduce the AFS inventory inclusion amount attributable to a separate item of inventory. Any cost of goods that were not used to offset AFS inventory inclusion amounts because they were subject to limitation are considered when the taxpayer determines the cost of goods in progress offset for that item of inventory in a subsequent taxable year.

The cost of goods in progress offset is determined by reference to the costs and expenditures related to each item of inventory produced or acquired for resale, which costs have been incurred under section 461 and have been capitalized and included in inventory under sections 471 and 263A or any other applicable provision of the Code at the end of the year. However, the cost of goods in progress offset does not reduce the costs that are capitalized to the item of inventory produced or acquired for resale by the taxpayer under the contract. That is, while the cost of goods in progress offset reduces the AFS inventory inclusion amount, it does not affect how and when costs are capitalized to inventory under sections 471 and 263A or any other applicable provision of the Code or when those capitalized costs will be recovered. Instead, the cost of goods in progress offset serves only to reduce or “offset” any AFS income inclusion amounts for the item of inventory and defer such amounts to the taxable year in which ownership of the item of inventory is transferred to the customer.

The costs of goods comprising the cost of goods in progress offset must be determined by applying the inventory accounting methods used by the taxpayer for Federal income tax purposes. A taxpayer must calculate its cost of goods in progress offset by reference to all costs that the taxpayer has permissibly capitalized and allocated to items of inventory under its inventory method, but may not consider costs that are not properly capitalized under such method.

In the taxable year in which ownership of the item of inventory is transferred to the customer, any revenue deferred by way of a prior year cost offset is included in gross income in the year of the transfer along with any additional revenue that is otherwise required to be included in gross income under the AFS Income Inclusion Rule for such year. Although no cost offset is permitted in such year, the taxpayer would recover costs capitalized and allocated to the item of inventory transferred as cost of goods sold in such year in accordance with sections 471 and 263A or any other applicable provision of the Code. However, if in a taxable year prior to the taxable year in which ownership of the item of inventory is transferred to the customer, either (A) the taxpayer dies or ceases to exist in a transaction other than a transaction to which section 381(a) applies, or (B) the taxpayer’s obligation to the customer with respect to the item of inventory ends other than in a transaction to which 381(a) applies or certain section 351(a) transactions between members of the same consolidated group, then all payments received for the item of inventory that were not previously included in gross income as a result of the application of the cost offset rules are required to be included in gross income in such year.

> A taxpayer that uses the AFS cost offset method or the advance payment cost offset method must include in gross income for a taxable year prior to the taxable year in which an item of inventory is transferred to the customer, all payments received for the item of inventory that were not previously included in gross income … if, in that taxable year, the taxpayer … dies ….

III.B. Transfer Tax Issues

Transfer tax issues include transfers during life, estate tax issues, and special valuation issues.

III.B.1. Transfers During Life

Transfers during life include many ways of transferring equity to one's loved ones. The simplest way is shifting a business opportunity. Gifts without consideration can appear straightforward, but then valuation issues complicate matters, and designing trusts to hold stock in S corporations can be tricky. More advanced tactics include transfers to grantor retained annuity trusts and various sale techniques, including self-canceling installment notes and private annuities.

III.B.1.a. Business Opportunities

A business owner who plans to add new locations or new products or services may be able to use some basic techniques to let family members participate in the business' growth. These techniques involve shifting these business opportunities to the family members.

New businesses often have speculative value. Even a successful business may have difficulty expanding into new locations or adding products or services. When starting a new business, consider giving most of the ownership to family members through nonvoting ownership interests. For example, the client owns 1% of the company and all of the voting rights, and the client's children own 99% of the company without any voting rights. The 99% that the client gives his or her children has little value if the new business has an uncertain future. Because the client controls the business, the client can use the business techniques that the client has mastered to make sure it is managed correctly. However, the children own 99% of the profits that the client creates. Examples of this might include investing in the following that might be leased or otherwise profitably provided to the existing business:

- New location.
- New line of business.
- New customer target group.
- New equipment.
- New business method.
- New patent.

Examples are further described in part III.B.1.a.v Sending Business or Performing Services.

Whatever form the gift may take, as it stands, the Code does not mention the term "gift of opportunity." This, naturally, has not stopped the IRS from pursuing these "gifts" as taxable transfers. The gift tax was initially devised as a backstop to the federal estate tax; however, this purpose was seemingly broadened by the decision in *Dickman v. Commissioner*.[6198] In *Dickman*, the Supreme Court established that the gratuitous gift of the use of property constituted a taxable gift.[6199] In holding such, the court stated that, "Congress intended the gift tax statute to reach all gratuitous transfers of any valuable interest in property."[6200] The court goes further by adding, "the gift tax was designed to encompass all transfers of property and property rights having significant value."[6201] Several past cases highlight the extensive grasp of the gift tax provisions. "Gift," as Congress intended the word, means all of the "protean arrangements which the wit of man can devise that are not business transactions within the meaning of ordinary speech."[6202] The gift tax is "broad enough to include property, however conceptual or contingent,"[6203] and may "reach every kind and type of transfer by gift."[6204] Suffice it to say, the Supreme Court has supported a broad interpretation of what may fall under the purview of the gift tax statutes.

That being said, the IRS has encountered limited success in its efforts at reaching gifts of opportunity. The following discussion outlines some of these successes, and, likewise, some of its failures.

Be sure to properly document any legal rights that the prospective owners should have. The IRS may argue that certain opportunities later ripened into rights belonging to the person who provided the business opportunities.[6205]

Loaning money to a child or other family member, under the holding in *Crown v. Commissioner*[6206] did not produce gift tax liability should the lending parent fail to charge or collect interest on the loans. The court stated that interest-free demand loans were not transfers of property within the meaning of the gift tax statutes, as the borrowing child had no legally protected right against the lending parent.[6207] Furthermore, the child's use of the money was not an interest with an exchangeable value.[6208]

In certain respects, *Dickman* changed this. The Supreme Court, as previously mentioned, held that the right to use the loaned money represented a valuable, taxable gift because it represents a transfer of property by gift.[6209] The Court softened this blow by recapping the merits of the gift tax exclusions available to individuals and families, such as the annual exclusion, gift splitting, exemptions, and the unified credit.[6210] However, *Crown* might apply in particular circumstances. For instance, a parent who allows his or her adult child to use the family vacation home rent-free

[6210] *Id.* at 341-42.

might not make a gift tax liability if the child does not have a legally enforceable right, against the parent, to stay in the home.[6211] *Dickman* involved loans and other arrangement where the borrower had a legally protected interest to use loaned funds. It also reasoned:

> What was transferred here was the use of a substantial amount of cash for an indefinite period of time. An analogous interest in real property, the use under a tenancy at will, has long been recognized as a property right. E*. g., Restatement (Second) of Property* § 1.6 (1977); G. Thompson, *Commentaries on the Modern Law of Real Property* § 1020 (J. Grimes ed. 1980). For example, a parent who grants to a child the rent-free, indefinite use of commercial property having a reasonable rental value of $8000 a month has clearly transferred a valuable property right.

Making long-term loans to a client's children at low interest rates is an easy way to help them acquire investments, whether a privately-owned business, real estate, or marketable securities. See parts III.B.1.a.i Loans and III.B.1.a.ii Loan Guarantees.

Thus, although a short-term use of property might be free from gift tax, indefinite use of property is more problematic.[6212]

III.B.1.a.i. Loans

Interest-free or below-market loans are governed by Code § 7872, which generally requires imputation of interest of such loans.[6213] Each month, the IRS publishes a revenue ruling that prescribes interest rates to be used for federal tax purposes. These Applicable Federal Rates (AFRs) provide short-, mid-, and long-term government rates of interest.

Fundamental to using the AFR is that there is a reasonable expectation of repayment.[6214] See part III.B.1.a.i.(a) Loans Must be Bona Fide.

These loans break down into two categories: term loans and demand loans. A term loan, as the name implies, is a loan for a specific term, i.e. it has a defined start date and end date. A demand loan is a loan that is immediately callable at any time.

See also part II.G.4.a.i Loans to Businesses – Whether AFR Is Required, discussing whether Code § 7872 applies. If Code § 7872 does not apply, then one might consider whether to charge interest anyway to avoid a gift under common law principles;[6215] characterization of a transfer to a family controlled entity as a contribution to capital rather a loan can result in the IRS seeking to apply the draconian Code § 2701.[6216]

[6211] The *Dickman* Court expressly reserved for future cases adult children's use of cars or vacation cottages. *Id.* at 336.
[6212] See Letter Ruling 8104207.
[6213] *Dickman* has been superseded and codified as Code § 7872, which provides for short-term (under three years), mid-term (three to nine years), and long-term (over nine years) AFRs.
[6214] See part III.B.1.a.ii.(a) Gift Tax Issues. In the income tax arena, debt might be recharacterized as equity. See part II.G.20.b When Debt Is Recharacterized as Equity.
[6215] Gift tax applies to not only direct but also indirect gifts. Code § 2511(a); Reg. § 25.2511-1(h)(1), which governs indirect gifts through business entities and is reproduced in part III.B.1.h Transfers in the Ordinary Course of Business.
[6216] Code § 2701(e)(5). See III.B.7.b Code § 2701 Overview, and III.B.7.c Code § 2701 Interaction with Income Tax Planning.

Code § 7872 provides certain exceptions to the general rule of imputing interest. For instance, gift loans between individuals may qualify for a de minimis exception. If the outstanding aggregate amount of loans between individuals is less than $10,000, then the general rules of Code § 7872 will not apply.[6217] The same rule holds true for compensation-related and corporate shareholder loans.[6218] Also, Code § 7872 provides for an income tax (but not gift tax) exclusion of accrued interest where aggregate loans do not exceed $100,000.[6219]

For loans between spouses, see fns 7254-7260 and the accompanying text in part III.B.6.d Divorce as an Opportunity to Transfer.

For notes arising from a taxable sale, also see part II.G.15 Limitations on the Use of Installment Sales.

III.B.1.a.i.(a). Loans Must be Bona Fide

Dynamo Holdings Ltd. Partnership v. Commissioner, T.C. Memo. 2018-61, held that advances between family-owned entities were not gifts. The court summarized relevant principles:

> The question of whether a taxpayer has entered into a bona fide creditor-debtor relationship pervades Federal tax litigation.[6220] The parties must have actually intended to establish a debtor-creditor relationship for a transaction to be a bona fide loan.[6221] To find a bona fide creditor-debtor relationship, we must determine that at the time the advances were made there was "an unconditional obligation on the part of the transferee to repay the money, and an unconditional intention on the part of the transferor to secure repayment."[6222]
>
> We apply special scrutiny to intrafamily transfers and transactions between entities in the same corporate family or with shared ownership.[6223] Transfers between family members are presumed to be gifts.[6224] This presumption can be rebutted by "an affirmative showing that there existed a real expectation of repayment and intent to enforce the collection of the indebtedness."[6225] When analyzing transfers between related parties, it is useful to compare the transactions at issue to arm's-length transactions and normal

business practices.[6226] However, we must also be mindful of the business realities of related parties.[6227] For example, we have held that security and other creditor protections are less important in a related-party context.[6228]

Dynamo Holdings viewed debt-vs.-equity cases as helpful but not directly on point.[6229] Instead, the court to looked to a case that the Eleventh Circuit affirmed without a published opinion:

> In *Jones v. Commissioner*, we used a long-standing nine-factor facts and circumstances test to determine whether two parties entered into a valid debtor-creditor relationship.[6230] We evaluated all the pertinent facts and circumstances of the case, including whether:
>
>> (1) There was a promissory note or other evidence of indebtedness, (2) interest was charged, (3) there was security or collateral, (4) there was a fixed maturity date, (5) a demand for repayment was made, (6) any actual repayment was made, (7) the transferee had the ability to repay, (8) any records maintained by the transferor and/or the transferee reflected the transaction as a loan, and (9) the manner in which the transaction was reported for Federal tax is consistent with a loan.

Describing its approach that was different than what the parties urged,[6231] the court stated:[6232]

> We apply a special scrutiny to transactions between companies with shared ownership and intrafamily transfers, and we presume that transfers between family members are

NA Gen. P'ship & Subs. v. Commissioner, 103 T.C.M. (CCH) at 1920-1921.

[6229] The court noted that the case would be appealed to the Eleventh Circuit and listed that Circuit's "13-factor debt-versus-equity test," which "asks the Court to look to the totality of all the facts and circumstances and specifically directs the Court to consider" various factors, citing *Ellinger v. United States*, 470 F.3d 1325], 1333-1334 (11th Cir. 2006). The Tax Court then noted:

> But this is not a debt-versus-equity case. The Commissioner argues that the transfers were gifts, not equity. As a result, our inquiry is not focused on weighing debt versus equity, but rather on considering whether there is a bona fide debt. While the debt-versus-equity test adopted by the Court of Appeals offers some guidance, it is not directly on point.

[6230] Fn 29 of *Dynamo Holdings* cited here:
Jones v. Commissioner, T.C. Memo. 1997-400, 74 T.C.M. (CCH) 473, 482 (1997), *aff'd without published opinion*, 177 F.3d 983 (11th Cir. 1999).

[6231] The court noted:

> Petitioners allege that Dynamo and Beekman had the intent to repay and be repaid as demonstrated by their subjective declarations of their intent. Conversely, the Commissioner argues that we should draw an adverse inference from Mrs. Moog's failure to testify at trial and infer that Dynamo and Beekman did not intend to repay and be repaid. We disagree with both parties.

[6232] The court explained:

> Beekman and Dynamo had shared ownership and control. Both Dynamo and Beekman were owned in part by trusts for which Christine, Mr. Julien and their families were beneficiaries. Transfers between the two structures were transfers between companies with shared ownership.

gifts.[6233] Here, transfers between Beekman and Dynamo were transfers between companies with both shared ownership and intrafamily transfers.

Reviewing issues relating to formal indicia of debt, the court noted:

> Dynamo and Beekman satisfied some but not all of the formal indicia of debt. We agree with the Commissioner that at the time the advances were made there was no contemporaneous promissory note identifying all the terms of the agreement, there was no collateral set aside to ensure repayment, there was no invoice or demand made by Beekman, and there was no fixed maturity date or intent to force Dynamo into bankruptcy if required to ensure repayment. However, there are many meaningful indicia of debt. Dynamo and Beekman maintained records that reflected advances as debt in their general ledgers, and they executed promissory notes.

Regarding issues relating to formal indicia of debt, the court concluded:

> We are not troubled by any shortcomings in Dynamo's and Beekman's formal indicia of debt. They must be taken into account in the context of the business realities of the transaction. We would be surprised if Mr. Julien wrote himself an invoice, demanded repayment, or required a credit check or audited financial statements before making an advance. The management of these companies was the same, and they had full knowledge of and access to all financial information. Moreover, we have consistently held that these formal indicia of debt are little more than declarations of intent without accompanying objective economic indicia of debt.[6234]

Dynamo Holdings then reviewed the "economic indicia of debt":

> In ascertaining the economic realities of the transaction, it is helpful to measure the transfer against the economic realities of the marketplace to determine whether a third party lender would have extended the loan.[6235] Dynamo and Beekman satisfy all the objective economic indicia of debt. Beekman charged and Dynamo accrued interest on

---

Transfers between Beekman and Dynamo were ultimately intrafamily transfers. When Beekman made transfers to Dynamo, value was being transferred from one family of companies, the majority of which were held by trusts for which Delia Moog is a beneficiary, Delia Moog Family Trust and Delia Moog Family Trust #2, to another family of companies, the majority of which were held by trusts for which her daughter and nephew and their families were beneficiaries. While Christine and Mr. Julien were also beneficiaries of some of the trusts which owned Beekman, the transfers from Beekman to Dynamo reduced Delia Moog's beneficial interest in the underlying properties in favor of her daughter, her nephew, and their families.
Given the nature of these transfers, we treat them with special scrutiny and determine whether the advances are gifts or loans for Federal tax purposes on the basis of the totality of the circumstances.[33] On that basis we find that the advances were loans.

[6235] Fn 46 of *Dynamo Holdings* cited here:
Sensenig v. Commissioner, at *26-*27.

> the advances in 2006 and 2007. Beekman reported and paid tax on that interest income. Dynamo reported and deducted that interest expense. Dynamo repaid some of the advances before any examination began. At all times, Dynamo had the ability to repay the loans. Importantly, Dynamo could have received loans on substantially similar terms. And Dynamo did receive sizable loans from third parties.

Dynamo Holdings concluded on this issue:

> After analyzing the facts, we hold that Dynamo and Beekman entered into a bona fide creditor-debtor relationship. At the time the advances were made, Dynamo had an unconditional obligation to repay the loans, and Beekman had an unconditional intent to be repaid. A bona fide loan precludes a constructive distribution.[6236] Because we found that the advances were bona fide debt, the advances are not constructive distributions. Likewise, Dynamo is entitled to deduct the interest expenses.

Although the *Dynamo Holdings* taxpayers prevailed, they had to overcome their documentation weaknesses. One might consider documenting the expectation of repayment and the loan itself using the principles of Reg. § 1.385-2; I am not at all suggesting that such documentation is necessary but merely that a tax planner who is extraordinarily cautious might find some comfort there.[6237] This is part of part II.G.20 Debt vs. Equity; Potential Denial of Deduction for Business Interest Expense; see also parts II.G.4.a.ii Bad Debt Loss – Must be Bona Fide Debt, II.G.4.d.ii Using Debt to Deduct S Corporation Losses (discussing deducting S corporation losses against loans from shareholders to the corporation and the consequences of doing so), and II.Q.7 Exiting from or Dividing a Corporation, text accompanying fns 4799-4801 (payments to employee-shareholder characterized as distributions or compensation instead of loans). For a case describing a family's heroic efforts to shore up a family business, first investing money, then buying subordinated debt that faced foreclosure and later converting the debt into senior preferred equity, which were still not enough to save the company, generating a loss of the initial investment, see *MCM Investment Management, LLC v. Commissioner*, T.C. Memo. 2019-158, which is described in detail in part II.G.8 Code § 165(a) Loss for Worthlessness; Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A Limitation on that Strategy.[6238]

Estate of Moore v. Commissioner, T.C. Memo. 2020-40, discussed whether transfers were loans or gifts:

> "A purported loan between family members is always subject to close scrutiny…. The presumption, for tax purposes at least, is that a transfer between family members is a gift." *Perry v. Commissioner*, 92 T.C. 470, 481 (1989), *aff'd* without published opinion, 912 F.2d 1466 (5th Cir. 1990). The presumption may be rebutted upon a showing that the transferor had a real expectation of repayment and an intention to enforce the debt. *Estate of Van Anda v. Commissioner*, 12 T.C. 1158, 1162 (1949), *aff'd*, 192 F.2d 391 (2d Cir. 1951). A promise to pay money in the future coupled with an implied

---

[6236] Fn 58 of *Dynamo Holdings* cited here:

Schnallinger v. Commissioner, T.C. Memo. 1987-9 (1987).

[6237] As part II.G.20 Debt vs. Equity; Potential Denial of Deduction for Business Interest Expense discusses, generally Reg. § 1.385-2 targets C corporations engaged in international financial transactions and would not apply to intra-family loans for estate planning. However, if one can satisfy Reg. § 1.385-2, which was geared toward perceived abuses, presumably one would go a long way toward showing a loan's bona fides.

[6238] Text between that accompanying fns 1556-1561.

understanding that the promise will not be enforced does not create a true debtor-creditor relationship. As we held in *Estate of Maxwell v. Commissioner*, 98 T.C. 594, 605 (1992), *aff'd*, 3 F.3d 591 (2d Cir. 1993), "a stated obligation to pay a fixed sum of money may be disregarded as having no value where the facts show that the parties did not contemplate that the obligation would be met."

Whether there's a true loan is a question of fact, and we have several factors to help determine whether a transfer creates a bona fide debt:

- the name given to the instrument underlying the transfer of funds;
- the presence or absence of a fixed maturity date and a schedule of payments;
- the presence or absence of a fixed interest rate and actual interest payments;
- the source of repayment;
- the adequacy or inadequacy of capitalization;
- the identity of interest between creditors and equity holders;
- the security for repayments;
- the transferee's ability to obtain financing from outside lending institutions;
- the extent to which repayment was subordinated to the claims of outside creditors;
- the extent to which transferred funds were used to acquire capital assets; and
- the presence or absence of a sinking fund to provide repayment.

Estate of Rosen, 91 T.C.M. (CCH) at 1236; see also *Zimmerman v. United States*, 318 F.2d 611, 613 (9th Cir. 1963); *Hubert Enters., Inc. v. Commissioner*, 125 T.C. 72, 92 (2005), *aff'd in part, rev'd in part* on other grounds and remanded, 230 F.App'x 526 (6th Cir. 2007).

We do find it more likely than not that these were gifts:

- Each of Moore's children signed a note promising to pay back to the FLP $500,000 on or before February 2010. Interest on the purported loans was set at 3.56% per annum. This factor weighs in favor of a finding that the transfer of the FLP funds created a bona fide debt. But ...
- The promissory notes have no fixed payment schedule. This factor weighs against a finding of bona fide debt. See *Roth Steel Tube Co. v. Commissioner*, 800 F.2d 625, 631 (6th Cir. 1986), *aff'g* T.C. Memo. 1985-58; *Estate of Rosen v. Commissioner*, 91 T.C.M. (CCH) at 1237.
- Moore's children have never paid any interest on the loans despite the notes' requirement to do so. The estate asserts that Moore's children simply did not understand the terms of the loans, but during trial they testified that Hahn had

advised them that they did not need to make payments. The FLP has never demanded repayment. These facts persuade us that Moore's children did not intend to make interest payments and the facts weigh strongly against a finding of bona fide debt. See *Roth Steel Tube Co.*, 800 F.2d at 631; *Estate of Rosen*, 91 T.C.M. (CCH) at 1237.

- Lynda testified that she intended to pay back the loan to the FLP with FLP assets - assets currently unavailable as a result of the estate's litigation with the Commissioner. Repayment that depends solely on earnings does not support a finding of bona fide debt. *Roth Steel Tube Co.*, 800 F.2d at 632; *Estate of Rosen*, 91 T.C.M. (CCH) at 1237.

- The record does not provide any evidence that Moore's children had the resources to repay the loans. Thin or inadequate capitalization to fund a transferee's obligations weighs against a finding of bona fide debt. *Estate of Rosen*, 91 T.C.M. (CCH) at 1237-38.

- There is a disproportionate ratio between Moore's children's ownership interests in the FLP and the debt they owe to it - this tends to weigh in favor of a bona fide debt. See *id*. at 1238.

- The promissory notes signed by Moore's children were not secured - this weighs strongly against a finding of bona fide debt. See *Roth Steel Tube Co.*, 800 F.2d at 632; *Estate of Rosen*, 91 T.C.M. (CCH) at 1238.

- Given that Moore's children did not have any security for the purported loans, and the absence of any evidence that they had the resources to repay the loans, we do not believe that they would have been able to obtain comparable funding from another lender. This weighs against a finding of bona fide debt. See *Roth Steel Tube Co.*, 800 F.2d at 631; *Estate of Rosen*, 91 T.C.M. (CCH) at 1238.

- Because the funds from the FLP were unsecured, they would have been subordinate to other claims. But without any known creditors of Moore's children this factor is either inapplicable or weighs slightly against the finding of bona fide debt. See *Estate of Rosen*, 91 T.C.M. (CCH) at 1238.

- There is very little on the record regarding the children's use of the funds though the estate contends that the children made very poor investments. We will give this factor little weight.

- Nothing on the record suggests that Moore's children set aside funds - aside from their plan to use FLP assets to repay their debts to the FLP - to repay their notes. This weighs against a finding of bona fide debt. See *Roth Steel Tube Co.*, 800 F.2d at 632; *Estate of Rosen*, 91 T.C.M. (CCH) at 1238.

We pick a path through the prongs to what we think is the most important fact of all - Moore listed a desire for each of his children to receive $500,000 as one of his estate planning goals. Hahn even testified that the payments needed to be loans for tax purposes—that "having [them] as a gift wouldn't be the best use of the tax laws." We find Hahn credible on this point to the very limited extent that we agree that it would benefit the estate to make the transfers look like loans. But we also find that Moore's intent to make gifts and the children's course of conduct that treated the transfers as gifts mean that those transfers were not in fact loans.

Based on our review of the record, we find that the $500,000 transfers of FLP funds to Moore's children were not loans but gifts subject to section 2501 to the extent that they exceed the exclusion under section 2503(b). Additionally, because the gifts to his children were made within the three-year period preceding Moore's death, the gross estate is increased by the value of tax paid on these gifts.[21] See sec. 2035(b).

> [21] Section 2035(b) states that the "amount of the gross estate … shall be increased by the amount of any tax paid under chapter 12 by the decedent or his estate on any gift made by the decedent or his spouse during the 3-year period ending on the date of the decedent's death."

Regarding another loan, *Estate of Moore v. Commissioner*, T.C. Memo. 2020-40, held:

A taxpayer must prove that when the funds were disbursed there was an "unconditional obligation and intent on the part of the transferee to repay the money and an unconditional intent on the part of the transferor to secure repayment." *Estate of Rosen*, 91 T.C.M. (CCH) at 1236; see also *Busch v. Commissioner*, 728 F.2d 945, 948 (7th Cir. 1984), *aff'g* T.C. Memo. 1983-98; *Haag v. Commissioner*, 88 T.C. 604, 615-16 (1987), *aff'd*, 855 F.2d 855 (8th Cir. 1988).

There is very little on the record that indicates that the $2 million transfer from the FLP to the Living Trust was a loan: Lynda testified during trial that she "believed" the FLP had lent Moore money but was unaware of any details, even though the estate tax return reflects the payment as a loan. Other than that, there is nothing. There is no evidence in the record that there was ever a promissory note, that the FLP ever charged interest or the Living Trust ever paid it, or that there was any collateral for the loan. It also appears that there was no maturity date on the loan and that no payments were made. As of the date of trial there has never been a demand for repayment. The estate simply did not meet its burden. We, therefore, find that the estate is not entitled to deduct the $2 million payment as a loan. On the other hand, we do find that Moore spent this money before he died, mostly on income tax that he owed on the sale of the farm. It should not be included in his taxable estate under section 2033.[22]

> [22] As the Commissioner notes, the Moore children themselves kicked in $400 at the FLP's inception. See *supra* p. 14. The parties should make a small adjustment in their Rule 155 computations so this is not taxed.

Estate of Mary P. Bolles v. Commissioner, T.C. Memo. 2020-71, discussed whether advances were loans or gifts:

Both parties rely on the analysis of *Miller v. Commissioner*, T.C. Memo. 1996-3, *aff'd*, 113 F.3d 1241 (9th Cir. 1997), for the traditional factors used to decide whether an advance is a loan or a gift. Those factors are explained as follows: (1) there was a promissory note or other evidence of indebtedness, (2) interest was charged, (3) there was security or collateral, (4) there was a fixed maturity date, (5) a demand for repayment was made, (6) actual repayment was made, (7) the transferee had the ability to repay, (8) records maintained by the transferor and/or the transferee reflect the

> transaction as a loan, and (9) the manner in which the transaction was reported for Federal tax purposes is consistent with a loan.
>
> These factors are not exclusive. See, *e.g.*, *Estate of Maxwell v. Commissioner*, 98 T.C. 594 (1992), *aff'd*, 3 F.3d 591 (2d Cir. 1993). In the case of a family loan, it is a longstanding principle that an actual expectation of repayment and an intent to enforce the debt are critical to sustaining the tax characterization of the transaction as a loan. *Estate of Van Anda v. Commissioner*, 12 T.C. 1158, 1162 (1949), *aff'd per curiam*, 192 F.2d 391 (2d Cir. 1951).
>
> While Mary recorded the advances to Peter as loans and kept track of interest, there were no loan agreements or attempts to force repayment. Respondent focuses on the lack of security for the loans to Peter. We agree that the reasonable possibility of repayment is an objective measure of Mary's intent. The estate maintains that during her life Mary always considered these advances as loans. We cannot reconcile this argument with the deterioration of Peter's financial situation and the ultimate failure of his practice in San Francisco and later in Las Vegas.
>
> Peter's creativity as an architect and his ability to attract clients likely impressed Mary. We find she expected him to make a success of the practice as his father had, and she was slow to lose that expectation. However, it is clear she realized he was very unlikely to repay her loans by October 27, 1989, when her trust provided for a specific block of Peter's receipt of assets at the time of her death. Accordingly, in 1990 the "loans" lost that characterization for tax purposes and became advances on Peter's inheritance from Mary. In conclusion, we find the advances to Peter were loans through 1989 but after that were gifts. We have considered whether she forgave any of the prior loans in 1989, but we find that she did not forgive the loans but rather accepted they could not be repaid on the basis of Peter's financial distress.

For loans of shares, see part II.A.1.d Lending Securities.

III.B.1.a.i.(b). Term Loans

Term loans with an interest rate below the AFR immediately result in a completed gift of the difference between the amount of proceeds and the value of the repayments using the AFR. For instance, the July 2005 mid-term monthly AFR was 3.79%. On a five-year loan of $100,000, the monthly payment would be $1,832. An interest-free loan, however, would generate a monthly payment of only $1,667. The monthly difference between the two payments is $165. The present value of five years' worth of $165 monthly payments is $9,006 (at the AFR), a figure which also represents the completed gift.

If an interest-free or below-market term loan is made, the lender is treated as having transferred an amount equal to the money loaned, less the present value of all payments due under the loan.[6239] The present value is calculated using a discount rate equal to the AFR for the term of the loan.[6240] If principal payments are fixed in total amount but uncertain as to time, for the term use the latest possible date on which a principal payment can be made.[6241] Although some

[6239] Code §§ 7872(b)(1), 7872(d)(2).
[6240] Code § 7872(f)(1).
[6241] Reg. § 1.1274-4(c)(4), which also provides that, "in the case of an installment obligation, [refer] to the longest weighted average maturity under any possible payment schedule."

have suggested that, for sales, one could use the AFR for the month of the sale or for either of the two preceding months, in an intra-family transaction I would always use the AFR for the month of sale.[6242]

The loan will be considered to have original issue discount ("OID") in an amount equal to the excess of the money loaned over the present value of the payments due on the loan.[6243] The lender will accrue interest income in each year of the loan. The borrower's tax treatment on the loan depends on whether he or she can deduct the interest. If deductible, it must be deducted in each year of the loan.

III.B.1.a.i.(c). Demand Loans

Demand loans (those immediately callable at any time), are valued annually for gift tax purposes. The short-term AFR is used, assuming that on the last day of the year, the amount of interest was paid to the lender, who in turn made a gift back to the borrower.[6244]

A demand loan could call for annual interest payments.

Every July, the IRS releases a blended annual rate.[6245]

Suppose the client wants to extend a line of credit to a business or family member. Below are terms one might use:

> For value received, the undersigned, _________ ("Borrower"), acting by and through its fiduciaries in their fiduciary capacity only, promises to pay to the order of ____________ ("Lender"), the principal sum of ________ Dollars ($_______), increased by any additional amounts Lender disburses to Borrower, all as documented or may be documented from time to time on Schedule A, such amount (as may be increased) on demand (the "Maturity Date"), together with all accrued interest thereon, as provided in this Promissory Note (the "Note").
>
> This Note may be funded in multiple advances (each an "Advance" and collectively referred to herein as "Advances") upon the request of Borrower at any time after the date hereof until the Maturity Date.
>
> Borrower further promises to pay to the order of Lender interest from time to time on the outstanding principal balance of this Note from the date of this Note to the Maturity Date at the rate of _____ Percent (___%) per annum. Absent prior demand, all accrued and unpaid interest on this Note shall be due and payable annually on each December 31 during the term of this Note, commencing on December 31, ____, and on the Maturity Date. All payments received by Lender under this Note shall be allocated first to accrued and unpaid interest and then to principal. Lender shall adjust the interest rate

[6242] See Steve Leimberg's Estate Planning Email Newsletter - Archive Message #1447. I have additional commentary saved as document # 5278071, which even more strongly reinforces my view as applied to sales to irrevocable grantor trusts.
[6243] Code § 7872(b)(2)(A). Added to this OID amount is any OID that the loan would carry before considering the gift element. Code § 7872(b)(2)(B).
[6244] Code § 7872(a)(1); See generally Kathryn Henkel ¶ 28.02, Section 7872: Imputed Interest on Below-Market Loans, Estate Planning and Wealth Preservation (June 2005).
[6245] Prop. Reg. § 1.7872-13(a). For example, see Rev. Rul. 2019-16, Table 6, one in a series that began with Rev. Rul. 86-17.

hereof at the time of each Advance to the Applicable Federal Rate under Section 1274 of the Internal Revenue Code of 1986, as amended (the "AFR") if the AFR is higher than the then-current interest rate on this Note. Lender shall also adjust the interest rate hereof each January 1 if the rate for the year that contains that January 1 as determined under Revenue Ruling 86-17 (or any administrative or regulatory pronouncement that replaces it) (the "Blended Rate") is greater than the interest rate that would apply but for this sentence. If the AFR or Blended Rate, as the case may be, is higher than the then-current interest rate on this Note, then such higher rate shall apply to the entire outstanding principal balance of this Note, with the interest accruing at that higher rate as of the adjustment date. The amount of interest accruing under this Note shall be compounded on a daily basis.

Thus:

- Each time an advance is made, I look at the short-term rate and use the higher of the loan's current rate or the short-term rate at the time of the loan.

- Every summer, when the blended annual rate for demand loans is issued, I adjust the interest rate retroactively to January 1 if the blended rate exceeds the interest rate that otherwise applies that January 1.

- Each December I calculate the interest due and inform the client. At that time, and each time the client communicates any other advances and payments to me, I ask whether we should lock in the term and interest rate. I normally don't have more than one or two of the loans outstanding at any particular time, and nobody got caught by the 2022 surge in interest rates.

The software I use is TValue 6 - TimeValue Software, which makes these calculations very easy to do. It lets one input various loans and payments and change interest rates as often as one wants very quickly and easily.

In the interest of simplicity, my methodology concedes more than is necessary. If the interest rate decreases, my methodology does not give the taxpayer the benefit. Furthermore, theoretically, each advance is a separate loan, so the interest rate would start at the short-term AFR and then move to the blended annual rate and change every year, without regard to any higher interest rates that apply to subsequent loans. Furthermore, the order in which payments are to be applied to each loan is unclear in such a situation. Ultimately, the question is how material the difference in methods would be, in terms of the cost of the time to calculate vs. the tax saved.

III.B.1.a.i.(d). Refinancing or Cancelling Loans

Regulations provide some flexibility in loan work-outs[6246] or other loan modifications;[6247] for the latter, see part II.G.31.a Debt Modifications. For a general discussion of the relevant issues, see *Hunt v. Commissioner*, T.C. Memo. 1989-335. Where the surrounding circumstances indicate that a debt is worthless and uncollectible and that legal action to enforce payment

[6246] Prop. Reg. § 1.7872-11(a)(2), providing no income taxation in some situations when accrued interest is forgiven.
[6247] Reg. § 1.1001-3(c), discussing exceptions to the general rule that a significant modification of debt instrument is a taxable exchange.

would in all probability not result in the satisfaction of execution on a judgment, a showing of these facts will be sufficient evidence of the worthlessness of the debt for purposes of the Code § 166 bad debt deduction.[6248]

For income and transfer tax consequences of cancellation by reason of gift or bequest and issues raised by discounting the value of a note on death, see part III.B.5.b Promissory Notes.

See also part II.G.31.b Debt Forgiveness.

When refinancing, canceling or otherwise transferring notes arising from a taxable sale, also see part II.G.15 Limitations on the Use of Installment Sales.

III.B.1.a.i.(e). Payment in Kind

Plans to pay in kind concern me. Part II.A.1.d.i Code § 1058 Loan of Securities generally requires that a loan of securities must be repaid with an equity return. Of course, those are income tax rules, not estate tax rules, but without any estate tax rules addressing these issues a court might analogize.

Thus, if securities are sold to a trust for a note that is expected to be repaid with those securities and the IRS successfully asserts that the sale was essentially a loan of the securities, could the IRS assert that any payment less than an equity return constituted a gift? Consider whether to create cash flow projections showing realistically how the note will be repaid. I would keep those in a privileged file until IRS audits and then consider producing it. That's because, if one attached those projections to a gift tax return and payments vary from the schedule, the IRS might assert that the taxpayer is not following the plan and that the note should be disrespected.

III.B.1.a.ii. Loan Guarantees

Generally, a guarantee (guaranty) is a promise to pay another person's debt, and the borrower is required to repay the guarantor any funds the grantor pays on the borrower's behalf:[6249]

[6248] Reg. § 1.166-2(b).

[6249] *Standard Oil Company of New Jersey v. Commissioner*, 7 T.C. 1310, 1321 (1946) (a reviewed decision supplemented 11 T.C. 843 (1948), *acq.* 1949-2 C.B. 3), held:

> Guaranty is defined in 38 C.J.S. 1129 as follows:
>
> > A guaranty or guarantee may be generally defined as a collateral promise or undertaking by one person to answer for the payment of some debt or the performance of some contract or duty in case of the default of another person, who in the first instance is liable for such payment or performance; a collateral promise or undertaking to pay a debt owing by a third person in case the latter does not pay.
>
> A guaranty may be one of various kinds, such as an absolute or conditional guaranty, a guaranty of payment or of collection, a general, special, continuing, or unlimited guaranty, or a letter of credit. 38 C.J.S. 1139. In the instant proceeding, as noted above, the agreement of November 6, 1929 states that the guaranty thereby given shall be deemed a continuing guaranty. In 38 C.J.S. 1142 A continuing guaranty is one which is not limited to a single transaction, but which contemplates a future course of dealing, covering a series of transactions, generally for an indefinite time or until revoked.
>
> In 38 C.J. S. 1130, it is stated:

- The lender loans to the borrower.

- The guarantor promises that the loan will be repaid. The guarantee may be for part or all of the loan.

- At some point, the lender may collect from the guarantor.

- The guarantor steps into the lender's shoes with respect to the amount the lender collects (subrogation right). Using this subrogation right, the guarantor can attempt to collect from the borrower.

- The guarantor is out-of-pocket only for amounts not collected from the borrower (including collection expenses, which loans usually impose on the borrower).

Generally, a lender enforces the guarantee when the borrower defaults. The guarantee agreement may require the lender to take various actions against the borrower before collecting from the guarantor. Or, it may allow the lender to collect from the guarantor once the event of default concerns, essentially placing the full burden of collection efforts on the guarantor. To make it even easier for the lender to collect from the guarantor, the lender may require that the loan documentation show the guarantor not as such but rather as a nominal co-borrower. The true borrower receives the loan proceeds and makes payments, and the guarantor/nominal co-borrower steps in only if the true borrower is unable to pay. If co-borrowers own the collateral securing the loan, one co-borrower might transfer the collateral to the other and the other assumes the loan, so that the transferee becomes the only true borrower and the transferor becomes a mere guarantor.[6250]

Case law and related authority look to whether, when the guarantee was made, the guarantor intended to enforce the guarantor's subrogation right. This intent must be proven objectively by analyzing whether one could reasonably expect the borrower to repay the loan. If so, making the guarantee does not constitute a gift (see part III.B.1.a.ii.(a) Gift Tax Issues Involving Loan Guarantees), and any payment under a loan guarantee (net of any collection form the borrower under the subrogation right) is deductible for estate tax purposes as a claim against the estate (see part III.B.1.a.ii.(b) Code § 2053 Estate Tax Deduction re Loan Guarantees). For income tax consequences of a guarantor's payments, see part III.B.1.a.ii.(d) Income Tax Consequences Involving Loan Guarantees.

> A guaranty in its technical and legal sense has relation to some other contract or obligation with reference to which it is a collateral undertaking; it is a secondary and not a primary obligation.

Numerous authorities are cited in the footnote for the above proposition, including *Howell v. Commissioner*, 69 Fed. (2d) 447. In that case the Circuit Court of Appeals, Eighth Circuit, among other things said:

> That in the case of suretyship or guaranty there is an implied agreement on the part of the principal debtor to reimburse his surety or guarantor is unquestioned. See *Melletee Farmers' Elevator Co. v. H. Poehler Co.* (D.C.) 18 Fed. (2d) 430; *In re Dailey et al.* (D.C.) 19 Fed. (2d) 95; *United States Fidelity & Guaranty Co. v. Centropolis Bank of Kansas City, Mo.* (C.C.A. 8) 17 Fed. (2d) 913, 917, 53 A.L.R. 295; *National Surety Co. v. Salt Lake County* (C.C.A. 8) 5 Fed. (2d) 34; (compare *Jenkins v. National Surety Co.*, 277 U.S. 258, 48 S.Ct. 445, 72 L.Ed. 874); 28 C.J. 1037.

[6250] An example of this is *Estate of Hendrickson v. Commissioner*, T.C. Memo. 1999-357, discussed in part III.B.1.a.ii.(b) Code § 2053 Estate Tax Deduction re Loan Guarantees.

Most of the cases described in parts III.B.1.a.ii.(a) and III.B.1.a.ii.(b) were decided before *Dickman v. Commissioner*, 465 U.S. 330 (1984),[6251] held that a loan may have gift tax consequences. This aspect of *Dickman* was codified by Code § 7872, which provides that lending money at no less than the applicable federal rate does not constitute a transfer.[6252] Let's unpack the implications of this codification:

- Code § 7872(e)(1) and (f)(2) refer to the applicable federal rate (AFR) under Code § 1274(d).

- Code § 1274(d)(1)(C) determines the AFR "based on the average market yield … on outstanding marketable obligations of the United States…."

- In the appraisal profession, such obligations are the benchmark for risk-free rates of return. Appraisers then add various risk factors to determine an appropriate discount rate or required rate of return.

- Therefore, under Code § 7872, loans are deemed to charge adequate interest if they charge interest based on a risk-free loan.

In other words, given that Code § 7872 applies to borrowers who are not the U.S. government and places no qualifications whatsoever on who may use it, Congress has decreed that credit risk is not taken into account in determining adequacy of interest! It's not quite that simple, however, in that Code §§ 1271-1275 are read together as one coherent set of rules. In determining whether to give effect to a schedule of stated payments, Reg. § 1.1273-1(c)(1)(ii) ignores "the possibility of nonpayment due to default, insolvency, or similar circumstances" unless "the lending transaction does not reflect arm's length dealing and the holder does not intend to enforce the remedies or other terms and conditions." Thus, if one structures a loan with terms (other than interest rate) that reflect arm's length dealing, the only remaining issue is whether the holder intends to enforce the remedies and other terms and conditions. Fortunately, we have a body of law that determines this intent – the pre- and post-*Dickman* authority described in parts III.B.1.a.ii.(a) and III.B.1.a.ii.(b) referred to above.

Compare a loan guarantee to a back-to-back loan. In the latter, instead of guaranteeing a loan, the person whose credit capacity (the "credit intermediary") is to be used borrows from a commercial lender, then loans the proceeds to the ultimate borrower. The borrower grants a security interest to the credit intermediary, which the credit intermediary then assigns (together with whatever collateral the credit intermediary provides) to the lender. This back-to-back mechanism is not just an estate planning tool – rather, it is required for a shareholder in an S corporation to obtain basis against which to deduct the corporation's debt-financed losses.[6253]

Consider the terms of the back-to-back loan. Nothing in Code § 7872 looks to the source of a lender's funds – how much interest the credit intermediary pays on the loan from the commercial lender that the credit facilitator uses to loan to the ultimate borrower. Thus, the credit intermediary can obtain a loan at market interest rates, which take into account the risk a commercial lender takes in lending to the credit intermediary, then turn around and loan that money to the ultimate borrower at the AFR – a risk-free interest rate. Code § 7872 prevents the arbitrage – the excess of interest paid to the commercial lender over the AFR – from constituting

[6251] Discussed further in text accompanying fns 6209-6210 in part III.B.1.a Business Opportunities.
[6252] See part III.B.1.a.i Loans.
[6253] See part II.G.4.d.ii Using Debt to Deduct S Corporation Losses.

a gift. Furthermore, the credit intermediary must pay the commercial lender whether or not the ultimate borrower is performing on the loan.

Because the interest arbitrage and financial risk the credit intermediary incurs exceed the cost and risk assumed by a guarantor and such an arrangement does not constitute a gift, I believe that Code § 7872 inherently means that a loan guarantee does not constitute a gift – but if and only if objectively there was a reasonable expectation that the borrower would pay the loan and the guarantee was merely to bridge the gap between a reduced-risk loan and the risks inherent in loaning to that particular borrower. If the client wants to reduce whatever tax risk a loan guarantee presents, the client can engage in a back-to-back loan, but consider that the client:

- Still needs to be able to prove a reasonable expectation that the borrower would pay the loan, and

- Must deal directly with the lender and borrower on a regular (sometimes monthly) basis, whereas with a loan guarantee the guarantor has no role regarding loan payment until the borrower defaults.

The latter bullet point is a key reason why a client may want to be a guarantor instead of the credit intermediary in a back-to-back loan. Enforcing loans to family members can disrupt family relationships. My personal view is that making the borrower deal with a bank injects formality into the process and increases the likelihood of payment. Whenever a client asks me about possibly loaning to a friend, I first ask whether not getting repaid would ruin the friendship (and the client's financial position) and also recommend offering to guarantee a bank loan to that friend instead; those questions usually put the kibosh on the friend's request. Considering these dynamics, relative to a back-to-back loan a loan guarantee seems to me to have a strong nontax business reason.

Tribune Media Company v. Commissioner, T.C. Memo. 2021-122, respected a guaranty that was unlikely ever to be called; for an excerpt from with a complete discussion, see part II.C.3.c.ii.(a) Permanent Rules Allocating Economic Risk of Loss to Recourse Liabilities.

One CPA expressed concern to me that an S corporation guaranteeing a loan made to a shareholder might generate a second class of stock if "a principal purpose of the agreement is to circumvent" the single class of stock requirement.[6254] To address such a concern, consider providing that:

- Any payment on the guaranteed loan must be accompanied by a similar proportionate loan to each other shareholder, with the payment on the guaranteed loan and the similar proportionate loan payable with interest at a rate no less than the AFR.

- If there is no reasonable expectation of repayment at the time that the payment on the guaranteed loan is made, the payment on the guaranteed loan is instead a distribution and the other shareholders will receive similar distributions.

[6254] See Reg. § 1.1361-1(*l*)(2)(i), reproduced in part II.A.2.i.ii Temporary Timing Differences; Other Varying Differences, especially fn 1211 (lender was related party)

- If the borrower transfers the stock while the guaranteed loan continues in effect, any payments on behalf of the borrower will be treated as payments to the transferee, with the transferee's sole recourse being against the borrower.

This part III.B.1.a.ii includes:

III.B.1.a.ii.(a). Gift Tax Issues Involving Loan Guarantees

Ultimately, if objectively there is a reasonable expectation that the loan will be repaid, I believe that a guarantee does not constitute a gift. The overall logic is in part III.B.1.a.ii Loan Guarantees; supporting detail is below in this part III.B.1.a.ii.(a).

Shiman v. Commissioner, 60 F.2d 65 (2nd Cir. 1932), held that, although a payment under a guarantee may occur when the borrower is insolvent and appear to be a gift, the test for a gift is the borrower's apparent ability to repay the loan when the guarantee is made:

> …. Indeed, if the putative lender knows that the borrower is without resources and likely never to have any, it may be reasonable with nothing further, to assume that he merely means to give the money. The conduct of neither party would in that case have its usual implication, and no contract would result. In the case at bar there was no reason to suppose, when Shiman guaranteed the accounts that Oppenheim would be unable to make him whole. Oppenheim was then solvent, and his promise, implied from the facts, was as authentic as any other. Nobody disputes that this is the common understanding, or that a contract results from it. Oppenheim's obligation was indeed conditional upon Shiman's to the brokers. Only in case Shiman was called upon to perform, was Oppenheim to repay him; no debt arose between the two till Shiman paid, though as soon as he did, Oppenheim owed him the amount at once. But it made no difference that when Shiman did in fact pay, the situation had become such that, had he then voluntarily done so, the advance would have been a gift. He was forced to pay by his earlier undertaking, which from 1920 forward bound his freedom of choice. It has indeed been at times debated whether a conditional obligation is an obligation at all until the condition is fulfilled, but the dispute is scholastic. Except so far as the doctrine of anticipatory breach may require, a promise to perform in the future, whether absolute or conditional, does not circumscribe the conduct of the promisor meanwhile; it limits his freedom only when the time arrives, or if the event occurs. Nevertheless, that limitation has all along been fixed by the promise, and requires no further consent by the promisor to hold him. He has subjected himself to events beyond his control. So it is absurd to treat the performance as it would have been had it been freely made at the time. That cannot be a gift which the putative giver was powerless to withhold.
>
> Next the Commissioner says that in any event there can be no deduction because Shiman suffered no loss; the debt was worthless at the moment it arose, for Oppenheim was then insolvent and known to be. If the deduction had been for the loss of purchased

> property, this would be clearly untrue. The statute, section 204 (a) and (b) of the Act of 1924, 26 USCA § 935 (a, b) and note, fixes the "cost" of property acquired after March 1, 1913, as the basis for losses which may be deducted under section 214 (a) (4, 5), 26 USCA § 955 (a) (4, 5). A man who buys property at more than its value, does not forfeit his deduction by his bad judgment. It is immaterial to prove that he could have got it for less; he is taxed upon his actual net income, not on what another, more sagacious, might have secured. But this was not a deduction for a loss under section 214 (a) (4) or (5), to be calculated under section 204 (a) and (b); it was for a debt "ascertained to be worthless and charged off within the taxable year." Section 214 (a) (7), 26 USCA § 955(a)(7). Though there was no debt until Shiman paid the brokers, it then became such at once and was known to be worthless as soon as it arose; verbally at any rate there is no difficulty. Nor is there any reason to impute a purpose to except such cases; the loss is as real and unavoidable as though the debt had had some value for a season….

Estate of Davidson v. Commissioner, 26 BTA 754 (1932), was not really a guarantee case but rather was whether a securities loan was really a gift. The court held that the transfer was a gift, because the taxpayer did not prove that the borrower would be indebted to the taxpayer if the taxpayer was unable return the securities:

> Whether the transaction detailed in the findings of fact created an indebtedness to the taxpayer on the part of his son depends upon the intention of the taxpayer in the transfer of the securities. *Jacob Grossman*, 9 B.T.A. 643. If taxpayer's intention was that his son be permitted to use the securities as a pledge and return them when no longer needed and also to pay him their value in case of sale by the pledgee, the transaction would leave the son indebted as claimed by petitioners. However, if the intent was that the son return the securities when no longer needed by him, but that in the case of their sale by the pledgee, his son would not be indebted to him for their value, no indebtedness would arise. *Hattie Wolff*, 26 B.T.A. 622.
>
> The evidence from which we must draw our conclusion is meager. It is well settled that a transfer of money or other property by a father to a son is presumed to be a gift or advance rather than a loan. *Storey v. Storey*, 214 Fed. 973. However, such presumption is not conclusive, but may be rebutted by a sufficient showing of intent to the contrary. *William M. Fleitmann, Jr., et al., Executors*, 22 B.T.A. 1291; *Redfield v. Eaton*, 53 Fed. (2d) 693; *Elizabeth N. C. Hetherington*, 20 B. T. A. 806.
>
> The record shows that the transfer of these securities was made by the taxpayer upon a request by his son to establish a credit upon which he might draw to protect his equity in a stock-trading account. We think the evidence of his discussion of the matter with another son before making the transfer and his final agreement thereto after that son expressed the belief that the need for the securities was only temporary, is sufficient to show that it was the taxpayer's intention that these securities be returned to him if not sold to satisfy the indebtedness of the pool account. However, in the face of the contrary presumption and without additional evidence, may we conclude that it was the taxpayer's intention that his son pay him or remain indebted to him for the value of these securities in case they were sold by the broker? There was no specific agreement between petitioner and his son and we have no evidence indicating that after the securities were sold by the brokers petitioner considered an indebtedness as existing. The taxpayer died in 1930 and it does not appear that the son and daughter, who are the executors of his estate and who, it is assumed, realize what his intention was in respect

> to this matter, have listed any indebtedness of R. J. Davidson, Jr., as an asset of the estate or charged against him in the settlement of the estate any indebtedness owing to the decedent.
>
> We do not think that the transfer of property by a father to a son with the understanding that it be returned if not lost by him is sufficient basis for a presumption of intention that the value of the property be paid by the son in case of its loss. It appears that such is the situation here. However, even in the event that petitioners' contention with respect to the intent of the taxpayer in the transfer of these securities could be sustained and an indebtedness held to have been created on the part of the son, such indebtedness would not be subject to a charge-off by the taxpayer as a worthless debt. It is shown that the transfer of these securities by the taxpayer was with the knowledge that the use to which they were to be put was a most hazardous one and that their sale by the pledgee would only be under conditions leaving his son utterly unable to pay an indebtedness of this amount. It appears, further, that the securities were in no sense sold by the taxpayer to his son, but that he permitted their use merely as security. It is clear that they remained the property of the taxpayer, subject to the right of the pledge to sell them if necessary. Any increase in their value while held by the pledgee was to the benefit of the taxpayer, and if the transaction did give rise to an indebtedness on the part of the son, such indebtedness arose only upon the contingency of the sale of the securities by the pledgee. *Osterloh v. Lucas*, 37 Fed. (2d) 277. The happening of such contingency would necessarily leave the son bankrupt, the debt would be wholly worthless and uncollectible when it came into existence, and there would consequently be no value represented by it to be charged off by the taxpayer. *Eckert v. Burnet*, 283 U. S. 140.
>
> We have noted carefully the recent opinion of the Circuit Court of Appeals for the Second Circuit in *Shiman v. Commissioner*, 60 Fed. (2d) 65, reversing a decision of the Board which denied a bad debt deduction growing out of a guarantee by the taxpayer of certain brokerage accounts of his brother-in-law. In that case a substantially different situation was presented. Here, we have a case of a transfer by a father to his son with knowledge of the critical condition of the latter's affairs, in which the father had no interest other than that arising from his paternal interest in his son's welfare. In the Shiman case there was a guarantee of brokerage accounts of a brother-in-law at a time when the latter was known to be solvent and in certain of these accounts the taxpayer himself owned a part interest.
>
> Our conclusion is that as a result of the transaction in question the taxpayer had no indebtedness due him, on account of these securities transferred to his son, for which he was entitled to take credit as a debt ascertained to be worthless and charged off in the taxable year.

In *Pierce v. Commissioner*, 41 B.T.A. 1261 (1940), the taxpayer guaranteed loans made to his son's corporation. When the lender called the loan, some was paid, but the taxpayer had to pay part. The court framed the issues:

> We are called on to decide here whether the petitioner's payment of $24,506.46 on his guarantee of the indebtedness of his son is (1) a contribution to the capital cost of stock held by the petitioner which he sought to protect by his guarantee, (2) a gift to his son made when the business affairs of the son did not warrant a prudent loan, or (3) a loan made to his son, ascertained by the petitioner to be worthless in 1933 and charged off at that time.

After dismissing the capital contribution theory, because the taxpayer paid the bank and did not receive any equity in the corporation for his payment, turned to the remaining issues:

> The respondent must fail also in his alternative contention, that the funds paid out by the petitioner may not be regarded as loans, but were gifts made to his son. Respondent's argument is based on his allegation that the financial position of the petitioner's son during the period of the first guarantee and the subsequent increases was so insecure as to render any advances imprudent from a business standpoint and more in the nature of gifts. He assigns the close relation between the petitioner and his son as the reason for the advances and a further basis for branding the outlays as gifts. The evidence, however, is clear that the petitioner's son was solvent by a safe margin at the time of the original guarantee and the increase on September 29, and that petitioner felt assured during the entire period from September 4, 1930, through December 28, 1931, that the position of his son if protected at those times by petitioner's guarantees would ultimately be saved by the later increased value of the collateral. The petitioner, as an officer of the corporations the stock of which was held as collateral, was in a favorable position to pass judgment as to the fair value of the stock so held and its future prospects, and he has stated his opinion that it was worth at least double its market value in September 1930. While we do not accept this testimony as conclusive of the value of the stock, we think it sheds light on the petitioner's intentions and objects in making the guarantees. See *Daniel Gimbel*, 36 B. T. A. 539. The petitioner regarded these dealings as sound from a business standpoint and this regardless of the personal relationship which obtained between him and the debtor, his son. The guarantee which petitioner made in October 1930 of the indebtedness of one J. C. Howard, a legal stranger, we think strengthens this impression.
>
> The petitioner was prompted to make the guarantees for an additional reason which we think furnishes valid basis for holding that these advances were not gifts. The primary objective, as we have noted, of the guarantees was to protect the market value of securities held by the petitioner. Advances made for such purposes are closely related to business expenses and when intended to be in the form of a loan are clearly deductible when the resultant debt becomes worthless.
>
> Here, the evidence points conclusively to the fact that the petitioner intended to hold his son as a debtor in whatever amount he was required to pay on the guarantees. This intent is made plainer by the execution of the note in the amount of $20,000. We do not take this latter fact, however, as an indication that the additional $4,506.46 was meant as a gift. The entire amount must be reckoned as a single transaction. It seems clear, further, that D. W. Pierce, Jr., was hopelessly insolvent at the time the petitioner made his payments and that the debt became worthless as soon as it came into being. Whether the $4,506.46 difference between the debt and the note is properly explained, as the petitioner alleges, by the fact that when the note was signed the exact amount of the guarantee payment had not been ascertained or by some other fact, the entire debt was ascertained to be worthless immediately after the payments in June 1933, and it is thus a proper deduction in that year. *Shiman v. Commissioner*, 60 Fed. (2d) 65; *H. Rodney Sharp*, 38 B.T.A. 166; *Daniel Gimbel*, *supra*.

In *Ortiz v. Commissioner*, 42 B.T.A. 173 (1940), the Official Tax Court Syllabus summarized the guarantee issue at hand:

> Petitioner guaranteed certain brokerage accounts of her husband, who was trading in securities. During 1934 she was forced to respond under her guaranty and make good a deficit in his accounts. The husband had no earning capacity and such property as he had was taken by the wife in reduction of the amount paid under her contract of guaranty. *Held*, under the facts petitioner is entitled to deduct the difference between the amount paid under the guaranty and the value of the property taken from her husband, as a debt ascertained to be worthless and charged off.

Ortiz refuted the IRS' argument that, because the taxpayer's guarantee was in the nature of a gift, no deduction was allowed:

> We understand respondent's argument to be that the satisfaction of the deficit in Julien Ortiz's accounts under the contract of guaranty did not create a debt. He denies the existence of a debt because, he says, under the evidence a gift was intended. On the contrary, we think the evidence establishes the lack of any donative intent. Prior to the market crash Julien Ortiz's stock market transactions had been profitable, and his wife believed that profitable operations in his accounts would be resumed. Before executing the contract of guaranty she consulted with her financial adviser and her husband, who assured her that she would suffer no loss under the guaranty. Each of them believed that the market would go up and there would be no occasion to respond under the contract of guaranty. If the wife had been motivated by a donative intent, there would have been no hesitancy. She would have been ready and willing to give her husband any necessary funds. That no such donative intent existed is demonstrated by her act in taking over the security remaining in his accounts and requiring him to convey to her the real property in his name. These acts are inconsistent with donative intent. *Cf. Elizabeth N. C. Hetherington*, 20 B. T. A. 806; *Edward H. Moore*, 22 B. T. A. 366; appeal dismissed, 59 Fed. (2d) 1069; *William M. Fleitmann, Jr., et al., Executors*, 22 B.T.A. 1291; *Roy Nichols*, 17 B. T. A. 580.
>
> Furthermore, respondent's argument ignores the legal consequences that flow from the contract of guaranty. Where a guarantor is forced to answer for the debt or default of another the law implies a promise on the part of the principal debtor to reimburse his guarantor. *Howell v. Commissioner*, 69 Fed. (2d) 447, and cases cited; *certiorari denied*, 292 U. S. 654. When Alice duPont Ortiz was forced to respond under her guaranty, the law implied a promise by Julien Ortiz to reimburse her. The guarantor's payment did not extinguish the debt; it merely substituted the guarantor for the creditor, and thereafter she was entitled to assert any rights that the creditor may have had against the principal debtor or against any security held for the debt, 24 American Jurisprudence 955; 60 Corpus Juris 740, and the facts show that she exercised the rights so acquired against the principal debtor and against the security held for the debt. As a matter of law, therefore, a debtor-creditor relationship existed between husband and wife immediately upon her payment of the deficit in his accounts pursuant to her contract of guaranty.
>
> The facts and circumstances under which this debt was created are so similar to the facts and circumstances existing in *Shiman v. Commissioner*, 60 Fed. (2d) 65, and the arguments advanced in the two cases are so alike, that a detailed analysis of the Circuit Court's decision will be helpful in disposing of the present issue. In July 1920 Shiman guaranteed a brokerage account of his brother-in-law, Oppenheim, who was speculating in stocks. At the time Shiman guaranteed the account Oppenheim was solvent, but thereafter he fell into financial straits and became insolvent. In October 1924 the brokers forced Shiman to pay $10,000 into the account under his guaranty in order to keep the

account open for the balance of the year. In 1925 the account was closed out and Shiman had to pay an additional sum of more than $26,000 under his guaranty. In his 1924 return Shiman claimed the $10,000 payment as a loss, or a worthless debt, but the Commissioner and this Board denied the deduction. The Circuit Court, however, reversed. The Commissioner's argument, that the payment created no debt because it was a gift, was rejected, as was the argument that in any event Shiman was entitled to no deduction because the debt was worthless the moment it arose, as Oppenheim was then insolvent and known to be. The court likewise rejected the argument that until the account was closed out the debt was not ascertained to be worthless, and the argument that the charge-off was insufficient.

However, guaranteeing a loan that had no reasonable expectation of repayment constituted a gift and therefore did not support a bad debt deduction in *Ellisberg v. Commissioner*, 9 T.C. 463 (1947), which reasoned:

> In the instant case the principal obligor was the endorser's son. He wished to go into a business requiring credit and capital, neither of which he had. The father loaned or gave to the son both capital and credit. The new business did not prosper. Because the father desired to see the son continue in business, he endorsed the son's notes executed for the purposes of obtaining additional capital. At that time the father made no investigation into the son's business or financial prospects. All he knew was that the business was not prospering and that the son always needed more money. After the father paid the notes thus endorsed, he made no effort to collect against his son the amount of his payment and he filed no claim on account thereof in the bankruptcy proceedings in which his son was later involved, nor did the son ever list such a debt as one of his liabilities or take any step indicating that he acknowledged the existence of this indebtedness.
>
> Under the circumstances disclosed by the record in this case, we are of the opinion that the transaction in question is equivalent to one in which a father borrowed money from a bank and, in effect, made a gift of the proceeds to his son. It will not, in our opinion, justify a bad debt deduction, since, on the facts shown, it is impossible for us to conclude that the petitioner and his son intended a debt to arise from petitioner's payments of his son's notes. See *Charles J. Matthews*, 8 T. C. 1313.
>
> In *D. W. Pierce*, 41 B.T.A. 1261, we permitted the deduction as a bad debt of amounts paid by a father on account of a guarantee of a son's obligation. In that case, however, we pointed out (p. 1265) "that the petitioner's son was solvent by a safe margin at the time of the … guarantee," that the petitioner regarded the transaction "as sound from a business standpoint, and this regardless of the personal relationship" between him and his son, and that the evidence in that case pointed "conclusively to the fact that the petitioner intended to hold his son as a debtor in whatever amount he was required to pay on the guarantees." In the instant case the record before us requires a holding on all these points contrary to that reached in the *Pierce* case.

Fox v. Commissioner, 14 T.C. 1160 (1950), held that a securities loan and a loan guaranty did not constitute gifts and that losses under those arrangements constituted deductible nonbusiness bad debts:[6255]

[6255] The Second Circuit, 192 F.2d 101 (1951), held that the loss was a business loss, because settling the guaranty with the lender was necessary to allow the taxpayer to free her account to invest for profit.

> Any claim that the securities were furnished by petitioner to her husband without intent that he should return them to her is, we think, without merit. Neither do we think that she intended that any amounts she might have to pay under the guaranty should be regarded as gifts. Petitioner was not making a gift to her husband, but rather was making him a loan of some of her securities and through the guaranty of his account a loan of her credit. There was a definite agreement for the return of the securities and, whether expressed in words or not, there was a legally implied obligation to reimburse her for any sums she might be required to pay under her guaranty. That the law implies a promise on the part of a principal debtor to reimburse his guarantor where the guarantor is forced to pay his debt or make good his default does not in our opinion require elaboration. For a full discussion of that legal principle see *Howell v. Commissioner*, 69 Fed. (2d) 447. See also *Thomas Watson*, 8 T.C. 569; *Alice du Pont Ortiz*, 42 B.T.A. 173; *D. W. Pierce*, 41 B.T.A. 1261; and *Daniel Gimbel*, 36 B.T.A. 539.

The Tax Court found no taxable gift when the taxpayer helped refinance her husband's note (at a time before the unlimited marital deduction). For legitimate business reasons, the husband (J.C.) asked the taxpayer to become the primary named borrower, although the taxpayer clearly was not, in substance, the borrower. *Bradford v. Commissioner*, 34 T.C. 1059, 1064-65 (1960), *acq.* 1961-2 C.B. 4., held:

> The facts and circumstances surrounding the transaction here involved do not convince us that petitioner intended to divest herself of any property or interest therein owned by her in 1938, or that any of the parties involved anticipated that any of her property would ever be used to satisfy the obligation to the bank. In the first place she did not own property in 1938 that would have come anywhere near satisfying the obligation to the bank, and she had no prospects of acquiring any except through her husband. Secondly, the entire transaction was arranged by J.C., his collateral was retained as security for petitioner's note, and he testified that it was understood that the bank would look first to his collateral for liquidation of the obligation, and he hoped and expected that the collateral would increase sufficiently in value to cover the entire obligation. J.C. paid the interest on the loan and it is reasonable to assume that all parties involved looked to J.C.'s assets and his earning power to liquidate the loan.
>
> This does not mean that petitioner was not obligated on the indebtedness evidenced by her note. We assume the bank could have taken judgment against her on the note had it not been paid, and levied on her property to help satisfy the judgment, and that it probably would have done so had that course of action become necessary. But unless and until such action was taken we do not believe petitioner parted with, or intended to part with, dominion and control of any property owned by her which would give rise to a gift tax.
>
> Granted that section 501 is comprehensive enough to "include property, however conceptual or contingent," *Smith v. Shaughnessy*, 318 U.S. 176, and to reach any passage of control over the economic benefits of property, *Estate of Sanford v. Commissioner*, 308 U.S. 39; nevertheless, no matter how intangible, the donor must own a property right or interest which is capable of being, and is, transferred. *Commissioner v. Mills*.[6256] Petitioner transferred no property or interest in property in 1938 but only made a promise to pay in the future if called upon to do so. *John D. Archbold*,

[6256] 183 F.2d 32 (C.A. 9, 1950), affirming 12 T.C. 468.

> 42 B.T.A. 453. The fact that J.C. may have derived some economic benefit in 1938 as a result of this promise is not controlling. Regs. 79, art. 1.

In *Cogan v. Commissioner*, T.C. Memo. 1971-251, advances the taxpayer made to her son did not constitute bona fide debt and therefore could not support a bad debt deduction:

> Petitioner did not require her son to execute a note for these amounts; there was no agreement to pay interest; and, no time was fixed for repayment. The alleged debt was not scheduled in the bankruptcy proceedings; nor was it claimed as a bad debt deduction in petitioner's tax return. We are not convinced by petitioner's explanation of the reason the deduction was not claimed on her tax return for the taxable year 1967. We cannot believe that, considering the surrounding facts and circumstances in which the payments and advances were made, petitioner intended to enforce collection of them against her son who was the sole support of his wife and three young children. Lacking this intent there is no clear showing that a debtor-creditor status was created; the advances and payments are presumed to be gifts. *William Francis Mercil*, 24 T.C. 1150 (1955); *Estate of Carr V. Van Anda*, 12 T.C. 1158 (1949) *aff'd. per curiam* 192 F.2d 391; *C. B. Hayes*, 17 B.T.A. 86 (1929). See *Evans Clark*, 18 T.C. 780 (1952).

However, payments on a loan guarantee did support a bad debt deduction. *Cogan* held:

> We think payment to the United California Bank stands on a different footing. For many years prior to the taxable year, petitioner had guaranteed loans by the bank to her son. While her concealment from him of the fact of her guaranty raises some question as to whether her ultimate payments under the guaranty represents gifts, we are satisfied that, more probably, she was motivated by a desire to instill confidence in her son in the ultimate success of his business enterprise. We think that, at the time of the transaction, there existed a real expectation of repayment and an intent to enforce collection. *Giffen Andrew*, 54 T.C. 239 (1970). Accordingly, we have found that petitioner did not intend to make a gift to her son at the time she made the guaranties in question*. Cf. Kate Baker Sherman*, 18 T.C. 746 (1952).

Letter Ruling 9113009 held that loan guarantees conferred "valuable economic benefits" to the grantee that constituted a gift. If the grantee, without the guarantees, would pay a higher interest rate on the loan, or otherwise be unable to obtain the loan altogether, then the grantee has received a valuable property interest. The grantor had assumed a legally enforceable obligation for less than full consideration. Thus, when a loan guarantee became binding, the grantor had made a completed gift.

At least one commentator, at the time, noted the "foolishness" with which loan guarantees were taxed.[6257] The folly came by way of comparison of the effects of a parent loaning a child funds (possibly using a "back-to-back" loan) versus a parent guaranteeing a child's loan. Code § 7872, which superseded *Dickman*, controls below-market demand loans. Thus, at the October 2010 short-term AFR,[6258] a parent could lend his or her child funds at 1.73% for almost nine years without incurring gift tax liability. If the parent has wonderful credit, he or she may be able to borrow funds for himself or herself at the prime lending rate, which, as of October 1, 2010, was 3.25%. Thus, using a back-to-back loan, a parent who could borrow at the prime lending rate can essentially gift 1.52% per year tax-free. However, if the parent

[6257] See Randall J. Gingiss, The Gift of Opportunity, 41 *DePaul L. Rev.* 395, 409 (1991-1992).
[6258] Rev. Rul. 2010-24.

simply chose to guarantee the child's loan, under Letter Ruling 9113009, this would incur gift tax liability.

Letter Ruling 9409018 withdrew Letter Ruling 9113009 as to that issue. Letter Ruling 9409018 reasoned:

> Under section 2056(b)(4), if property passing to the surviving spouse is encumbered in any manner, the encumbrance is taken into account in the same manner as if the amount of a gift to the spouse were being determined. Under the terms of the taxpayer's will, assets will pass to the Estate Trust for the benefit of the surviving spouse only if there are any loan guarantees outstanding at the taxpayer's death. The marital deduction for the bequest of such assets would not be reduced by the entire unpaid balance of the guaranteed loans unless at the time of the taxpayer's death it appears that a default after the Estate Trust is funded is likely, that assets of the Estate Trust will be used to pay the entire unpaid balance of such loans, and that the subrogation rights appear to be worthless.
>
> It is well settled that, notwithstanding the restrictions of section 2056(b), an asset in the form of a promissory note that passes from a decedent to or for the benefit of the surviving spouse is ordinarily eligible for the marital deduction, whether the note passes outright to the spouse or to an estate trust described in section 20.2056(e)-2(b) or to a marital trust described in section 2056(b)(5) or (b)(7). After a decedent's death, the spouse (or the trustee of the trust for the benefit of the spouse) holds the note as a creditor of the borrower and is subject to a risk of loss if the borrower were to default and be incapable of repaying the note. It follows that the mere presence of a promissory note among assets passing to a trust for the benefit of the surviving spouse would not ordinarily cause the disallowance of the marital deduction.
>
> If one or more assets (not necessarily promissory notes) pass from a decedent to or for the benefit of the spouse subject to a loan guarantee encumbrance, the spouse (or the trustee of the trust for the benefit of the spouse) is subject to a risk of loss if the borrower were to default and be incapable of repaying the guaranteed loan. In the event of default, the spouse (or the trustee) would pay the lender pursuant to the guarantee, as a result of which the spouse (or the trustee) would be immediately subrogated to the lender and would consequently become a creditor of the borrower for the amount paid pursuant to the guarantee.
>
> Thus, for purposes of section 2056(b), the position of a spouse (or trustee) as a note holder is indistinguishable from the position of a spouse (or trustee) as holder of assets subject to a loan guarantee. In the case of the note asset and in the case of the guarantee-encumbered asset, the risk of the borrower's default presents the same issue for purposes of determining whether a surviving spouse's interest in the asset is considered a nondeductible terminable interest. In either case, neither the borrower nor the lender possesses an "interest in" or a "power to appoint" property, as those terms are used in section 2056(b).
>
> Accordingly, in the present case, the mere presence of a loan guarantee as an encumbrance on assets passing from the taxpayer at death would not ordinarily cause the complete disallowance of the marital deduction that would otherwise be allowable for the bequest to the Estate Trust or the Marital Trust. This would be so whether the

guaranteed loan had been made to an entity owned by the taxpayer or had been made to some other borrower.

Letter Ruling 9409018's theory of loan guarantees is enshrined in regulations in a different context.[6259]

Thus, a parent should be able to make his or her credit standing available to his or her children without creating an income or gift tax event.[6260] What is essentially a loan of creditworthiness, though it may enable a child to obtain a loan at a more favorable interest rate or a loan that would have otherwise been unavailable to him or her, should not factor into gift of opportunity analysis. Thus, one of the more troublesome aspects of *Carriage Square* has been superseded. Furthermore, in Letter Ruling 200534014,[6261] the IRS did not appear to be troubled by a parent providing his creditworthiness to his child, pointing to some cases that seem to have been decided under state law where parents loaned collateral to their children. The Tax Court has referred to loan guarantees as "unmatured, potential claims."[6262]

One can glean from all of the above that, if the intent to repay is not genuine, then the arrangement is vulnerable to IRS attack;[6263] however, an adequately secured legal obligation to repay may be respected, even if the lender intends to forgive.[6264] The converse is that, if the

---

[6259] Part II.G.4.d.ii.(a) Limitations on Using Debt to Deduct S Corporation Losses, explains that a shareholder gets no basis for guarantees but does get basis for loans made from the shareholder to the corporation, then in fn 1214 cites Reg. § 1.1366-2(a)(2)(iii), Example (4), "Guarantee," which provides:

> A is a shareholder of S, an S corporation. In 2014, S received a loan from Bank. Bank required A's guarantee as a condition of making the loan to S. Beginning in 2015, S could no longer make payments on the loan and A made payments directly to Bank from A's personal funds until the loan obligation was satisfied. For each payment A made on the note, A obtains basis of indebtedness under paragraph (a)(2)(ii) of this section. Thus, A's basis of indebtedness is increased during 2015 under paragraph (a)(2)(ii) of this section to the extent of A's payments to Bank pursuant to the guarantee agreement.

[6260] Streng, *Estate Planning*, 800-2d T.M. VII.D.2. See also Hatcher and Manigault, Using Beneficiary Guarantees in Defective Grantor Trusts, *Journal of Taxation* (March 2000) (beneficiary guarantees of loans to trusts). Some have suggested that the Tax Court's position is that a beneficiary does not make a gift by guaranteeing a loan to a trust from which (s)he benefits. Blattmachr and Zaritsky, "Is the BDIT Ready for Primetime?" *Probate Practice Reporter* (University of South Carolina School of Law, ISBN 1044-7423), Sept. 2012.

[6261] In addition to the fact that letter rulings are not precedent, this particular ruling dealt with the effect of a child conveying to the parent stock in the company that borrowed the money. Thus, the loan of credit-worthiness was not the true issue; rather, the parent was deemed to have held the stock in trust for the child. The author does not recommend intentionally creating the facts present in that ruling.

[6262] *Estate of Theis v. Commissioner*, 81 T.C. 741, 748 (reviewed decision 1983) (rejecting estate tax deduction for claim due to guarantees that were legally valid, but the underlying loan was not in default), *aff'd* 770 F.2d 981 (11th Cir. 1985); followed *Estate Of Charles P. Cafaro v. Commissioner*, T.C. Memo. 1989-348.

[6263] Rev. Rul. 77-299 (IRS did not respect notes intended to be forgiven in the amount of the annual exclusion each year). If one wants to transfer property over time and use the annual exclusion, then, the IRS argues, one should simply give a small portion of the property each year. Rev. Rul. 83-180. The latter strategy would take longer if the property appreciates, but that might be the cost of obtaining the annual exclusion. In the income tax arena, debt might be recharacterized as equity. See part II.G.20 Debt vs. Equity; Potential Denial of Deduction for Business Interest Expense.

[6264] *Haygood v. Commissioner*, 42 T.C. 936 (1964), *acq. in result*, 1965-1 C.B. 4, *nonacq.*, 1977-2 C.B. 2, held:

intent to repay is genuine, then no transfer occurs until the person who bears the credit risk not only makes a payment but also, on a gratuitous basis, forgoes commercially reasonable remedies against the debtor to recover the right to be reimbursed for that payment.[6265] If a later forgiveness is gratuitous, then the forgiveness of principal should be treated as a gift rather than cancellation of indebtedness income.[6266] The forgiveness of interest will not constitute a deemed receipt of interest by the lender and a deemed payment by the borrower if the forgiveness includes in substantial part the loan principal.[6267]

> In the instant case if donative intent were the criterion our question would be easily solved for the record is amply clear that petitioner intended to donate only $3,000 per year of the property here involved to each of her sons until such time as the full value had been given to them. However, since this not the criterion, it is necessary to look to the property that passed to petitioner in return for the real property transferred to see if the amount of petitioner's gifts to her sons in 1961 of the city property exceeded the $6,000 she reported. See *Estate of Sarah A. Bergan*, 1 T.C. 543 (1943). In *Estate of Koert Bartman*, 10 T.C. 1073 (1948), we recognized that the consideration for the transfer of property by a taxpayer to each of his three children was less than the value of the property transferred. In that case we held that the transfers were for inadequate consideration, and therefore to the extent the value of the property transferred exceeded the value of the consideration given by the children, the taxpayer had made a gift within the meaning of the statute. We did, however, recognize that the agreements to pay annuities and notes were given by the children to the parent in consideration for the property. In the *Bartman* case the taxpayer had contended that none of the gifts was sufficiently complete to occasion the incidence of gift tax because by means of the annuity obligations, the taxpayer retained a right of invasion of the gift. We did not sustain that contention. Likewise, in the instant case we agree with respondent that the gift of the land, insofar as its value exceeded the consideration received by petitioner therefor, was completed in the year 1961. The existence of the vendor's lien notes and deeds of trust would not cause the transfer to be so incomplete as not to be a consummated gift at the time of the transfer to the extent the value of the property exceeded the value of the consideration received therefor. *Cf. Mable G. Adams*, 44 B.T.A. 1091, 1093 (1940), and cases there cited.
>
> We hold that the value of the property transferred by petitioner did not exceed the value of the vendor's lien notes and deeds of trust received in return therefor by more than the $3,000 in the case of each son, which amounts petitioner has reported as gifts in the year 1961.

[6265] An income tax analogy is Prop. Reg. § 1.465-6(d), providing that, in applying the at-risk rules:

> If a taxpayer guarantees repayment of an amount borrowed by another person (primary obligor) for use in an activity, the guarantee shall not increase the taxpayer's amount at risk. If the taxpayer repays to the creditor the amount borrowed by the primary obligor, the taxpayer's amount at risk shall be increased at such time as the taxpayer has no remaining legal rights against the primary obligor.

[6266] If the parent's will cancels the loan, the loan is included in the parent's gross estate, but the Code § 102 exclusion of bequests from income trumps Code § 61(a)(12). Letter Ruling 9240003. Although it addressed a different situation, in analyzing the consequences of an employee's loan modification, Rev. Rul. 2004-37 stated:

> Not every indebtedness that is cancelled results in the debtor realizing gross income by reason of discharge of indebtedness within the meaning of §§ 61(a)(12) and 108(a). Debt discharge that is only a medium for some other form of payment, such as a gift or salary, is treated as that form of payment, rather than under the debt discharge rules. S. Rep. No. 1035, 96th Cong., 2d Sess. 8 n.6 (1980), 1980-2 C.B. 620, 624 n.6.

Code § 108(e)(6) confirms no cancellation of indebtedness income when a shareholder cancels a debt owed by the corporation to the shareholder.

[6267] Prop. Reg. § 1.7872-11(a)(2).

If one is concerned that a loan guarantee is a gift, one should structure the loan as a back-to-back loan, meaning the parent borrows from the proposed lender and loans money to the child.[6268] If that is impractical, consider paying the parent a reasonable guarantee fee.

Notwithstanding the lack of gift tax consequences, consider additional documentation when a trust guarantees the obligations of another trust. The IRS might argue that, by entering into a transaction for the benefit of someone other than the beneficiaries, the fruits of that transaction belong to the guarantor trust.[6269] Steps to try to avoid such an argument might include:

- a provision in the trust agreement allowing extending credit to other trusts for the benefit of the trust's beneficiaries,
- charging a fair market value guarantee fee would give a guarantee a business purpose, or
- obtaining the beneficiaries' consent.

On the other hand, suppose the beneficial interests in the trusts are substantially the same. Although trusts are often treated as entities outside of trust law, under trust law a trust is not an entity at all. Under trust law, a trust is the relationship between the trustee(s) (the holder(s) of legal title) and the beneficiaries (those who receive distributions for their own use) pursuant to the wishes of whoever gave property to the trust (the settlor(s)). Trustees have a duty to promote the beneficiaries' interests pursuant to this relationship. Whether the trustees further this relationship by holding property in separate accounts or pursuant to different trust instruments with substantially the same terms is of no consequence – in either case, all of the funds are to be used to promote this relationship. All trust experts with whom I have spoken agree that a trustee of identical trusts has a fiduciary duty to use one trust to promote the activities of the other trust. Thus, one trust guaranteeing a loan to a substantially identical trust would have a solid business purpose.

III.B.1.a.ii.(b). Code § 2053 Estate Tax Deduction re Loan Guarantees

Ultimately, if objectively there is a reasonable expectation that the loan will be repaid, I believe that any payment on a loan guarantee imposed on assets included in a decedent's gross estate would constitute a claim deductible for estate tax purposes. The overall logic behind considering such a loan guarantee as having adequate and full consideration in money or

---

[6268] Back-to-back loans are not unusual in the S corporation area, to give the shareholder basis against which to deduct losses. See part II.G.4.d.ii.(a) Limitations on Using Debt to Deduct S Corporation Losses, especially fn 1211 (lender was related party).

[6269] *Harris Trust and Sav. Bank v. Salomon Smith Barney, Inc.*, 530 U.S. 238, 250 (2000), an ERISA case that looked to general trust law principles, noted:

> As petitioners and amicus curiae the United States observe, it has long been settled that when a trustee in breach of his fiduciary duty to the beneficiaries transfers trust property to a third person, the third person takes the property subject to the trust, unless he has purchased the property for value and without notice of the fiduciary's breach of duty. The trustee or beneficiaries may then maintain an action for restitution of the property (if not already disposed of) or disgorgement of proceeds (if already disposed of), and disgorgement of the third person's profits derived therefrom. *See, e.g., Restatement (Second) of Trusts* §§ 284, 291, 294, 295, 297 (1957); 4 A. Scott & W. Fratcher, *Law of Trusts* § 284, § 291.1, pp. 77–78, § 294.2, p. 101, § 297 (4th ed. 1989) (hereinafter *Law of Trusts*); 5 *id.*, § 470, at 363; 1 D. Dobbs, Law of Remedies § 4.7(1), pp. 660–661 (2d ed. 1993); G. Bogert, *Law of Trusts and Trustees* § 866, pp. 95–96 (rev. 2d ed. 1995).

money's worth is in part III.B.1.a.ii Loan Guarantees; supporting detail is below in this part III.B.1.a.ii.(b), but please note that Prop. Reg. § 20.2053-4 may change this analysis.

When a guarantor dies and the guarantee has not been collected upon, the guarantee is merely a contingent claim. Only if the lender collects from the guarantor's gross estate and the guarantor's gross estate is not restored (see last bullet point above) will the guarantor's gross estate actually be out-of-pocket. Thus, in analyzing Code § 2053, consider:

- Rules for deducting contingent claims
- How much the guarantor's gross estate actually pays (or has paid) the lender
- How much the guarantor's gross estate actually has collected or is expected to collect from the borrower

Let's review some cases.

Carney v. Benz, 90 F.2d 747 (1st Cir. 1937) is short, so here is the full opinion:

> This case involves the same statutory provisions which we lately had occasion to consider in *Commissioner v. Lyne Administrator*, 90 F.(2d) 745.*
>
> > * Revenue Act of 1926, chap. 27, 44 Stat. 9.
> >
> > Sec. 303. "For the purpose of the tax the value of the net estate shall be determined -
> >
> > ("(a)) In the case of a resident, by deducting from the value of the gross estate -
> >
> > "(1) Such amounts for … claims against the estate, …to the extent that such claims… were incurred or contracted bona fide and for an adequate and full consideration in money or money's worth." U.S.C. title 26, § 412, 26 U.S.C.A. § 412 note.
> >
> > Revenue Act of 1932, c. 209, § 805, 47 Stat. 169, 280. Section 303 (a) (1) of the Revenue Act of 1926, as amended, is amended to read as follows:
> >
> > ("(b)) Such amounts - …
> >
> > "(3) for claims against the estate … as are allowed by the laws of the jurisdiction, … under which the estate is being administered….
> >
> > The deduction herein allowed in the case of claims against the estate, … or any indebtedness shall, when founded upon a promise or agreement, be limited to the extent that they were contracted bona fide and for an adequate and full consideration in money or money's worth." U.S.C. title 26. § 412, 26 U.S.C.A. § 412.
>
> The present question is whether the claim sought to be deducted from the gross estate was founded upon sufficient consideration. The Commissioner denied the deduction and imposed an additional tax. The executors paid under protest and, claim for refund having been denied, brought suit to recover in the District Court, where they obtained a judgment in their favor. The Collector has appealed.

There is no dispute about the facts. Jacob C. Benz, a citizen and resident of Massachusetts, died in November, 1932, leaving a substantial estate. Paine Webber & Co., stockbrokers, presented a claim against his estate in the amount of $52,811, which was duly paid by the executors and was claimed by them as a deduction in computing the net value of the estate for the federal estate tax. It is the item here in controversy. The claim arose on a written guaranty to Paine Webber & Co. which Benz had made, guaranteeing the account of the Doris Realty & Investment Company. No question is made but what the amount claimed by Paine Webber & Co. was due under guaranty.

The guaranty was given under the following circumstances: The Doris Realty & Investment Company was a Massachusetts corporation organized in 1926. It was owned and operated by the decedent's wife and daughter. In 1929 the company desired to open a stock-trading account with Paine Webber & Co. The brokers required that the account should be guaranteed by Benz, and he gave the guaranty in question. At the end of 1929 the account showed a substantial profit, but in May, 1933, when it was closed out, there was a deficiency amounting to the sum claimed.

The Commissioner disallowed the deduction on the ground that Benz did not receive for the contract of guaranty adequate and full consideration in money or money's worth, as required by the statute. He insists that claims are not deductible unless the consideration for the contract on which they are founded was received by the decedent. There is a dictum to this effect in *Latty v. Commissioner*, 62 F.(2d) 952, 954 (C.C.A.6), but the facts in that case were fundamentally different from those here, and the contract on which the claimed deduction rested was uncommercial in character. In Glaser v. Commissioner, 69 F.(2d) 254, 257 (C.C.A.8), which is also relied on by the Commissioner, it was said that a contract on which a deduction could be based must be "a business transaction on the part of the decedent or a contract intended to augment his estate," etc. In *Porter v. Commissioner*, 60 F.(2d) 673, 675 (C.C.A.2), it was said that the section was not limited "to cases where the consideration passes to the testator; for example, a promise to pay for goods delivered to another might fall within it, if the testator has recourse over." In *United States v. Mitchell* (C.C.A.) 74 F.(2d) 571, in which the facts were very similar to those in the present case it was held that the claim was deductible; and in the very recent case *Commissioner v. Bryn Mawr Trust Co.* (C.C.A.) 87 F.(2d) 607, it was held that the statute did not require that the consideration for the contract on which the claim was based should be received by the decedent, disapproving the Commissioner's regulation that it must be so in order to make the claim deductible.

The statute is to be construed according to the natural and reasonable meaning of the words used, having in mind the purpose which it was designed to accomplish. The purpose of this section in the light of its legislative history [see *United States v. Mitchell* (C.C.A.) 74 F.(2d) 571] was to prevent deductions, under the guise of claims, of what were in reality gifts or testamentary distributions. There was no intention so far as appears of discriminating between bona fide claims against an estate, making some of them deductible and others not. We think the statute means that bona fide business contracts entered into upon adequate legal consideration give rise, if resulting in loss, to allowable deductions. The things which the statute was intended to disallow were colorable family contracts and similar undertakings made as a cloak to cover gifts. There are many kinds of business agreements in which the consideration does not move to the promissor, *e. g.*, contracts of guaranty and of surety, endorsements of commercial paper, etc. There is no reason why claims of this character should be discriminated against, and nothing in the statute which requires that the consideration on which the

> claim rests should have been received by the decedent. As suggested in *United States v. Mitchell*, *supra*, if Congress had intended so to restrict the statute, there is every reason to believe it would have said so.
>
> In the present case the guaranty which the decedent gave to Paine Webber & Co. was a purely commercial undertaking. The District Judge in effect so found. He also found: "The instant case presents no suggestion of an attempted testamentary disposition of property." It does not appear that Benz expected to lose by giving the guaranty; as has been said, the Doris Company was at first successful. Benz had a right of recourse against the corporation but it is not suggested that there were assets of the corporation available in reduction of the amount paid under the guaranty. It is argued for the Commissioner that the decedent's wife and daughter who received his estate were owners of the Doris Company, and that therefore his guaranty amounted to a gift to them. But the Doris Company was an independent entity. It does not appear that the beneficiaries under the decedent's will were obligated on its contracts, still less that in making the guaranty Benz intended to make or in fact made any gift to them.
>
> The judgment of the District Court is affirmed, with costs.

Commissioner v. Porter, 92 F.2d 426 (2nd Cir. 1937) explained "full consideration in money or money's worth":

> The purpose of the phrase under discussion was, in our opinion, to prevent a man from diminishing his taxable estate by creating obligations not meant correspondingly to increase it but intended as gifts or a means of distributing it after his death. See *Latty v. Commissioner*, 62 F.(2d) 952 (C.C.A.6). Thus, if a guarantor reserve no recourse over against the principal in the transaction, the guaranty would be in substance a gift; as we pointed out in the *Porter* Case, *supra*. But the present record does not disclose a transaction of that character. There is no evidence that the decedent surrendered his right of subrogation to the pledged collateral or his right to seek reimbursement from other property of his son-in-law should the guaranty be called. It is true that in October, 1931, when the guaranty was increased by $30,000, the collateral was $50,000 short of the loans, and that, as stipulated, the right of subrogation at the guarantor's death and at all times since was valueless. But the stipulation does not say that, when the guaranty was given, the son-in-law was insolvent or that the guarantor had no reasonable expectation of reimbursement if he should be called upon to pay. So far as appears, it was an ordinary business transaction by which an accommodation guarantor, if required to pay, would acquire rights equal in value to the obligations he had assumed. The Board rightly held the claim deductible.

Mccoy v. Rasquin, 102 F.2d 434 (2nd Cir. 1939), allowed a deduction with respect to amounts paid with respect to a loan guarantee in which the debtor paid only part of the obligation, even though the guaranty benefitted a family member:

> It is argued that the case at bar differs from that of *Commissioner v. Porter*, *supra*, because the guaranty there was an accommodation to the decedent's son-in-law who was not a beneficiary of the decedent's estate, whereas in this case there was a provision in the decedent's will that any loss occasioned to her estate by meeting the guaranty was to be deducted from the share of her son William D. McCoy and should not come out of the portion bequeathed to her daughter Ann McCoy Winters. We cannot see that the provision in the will of Mrs. McCoy that the loss by reason of the guaranty

> should come out of the son's share matters at all. The primary debtor was not the son, but a corporation in which he and the decedent were both interested. While he was the president and the largest stockholder of the company, there is no reason to go behind the corporate entity or to find that the object of the compromise was tax evasion.

Dodge v. Gagne, 23 F.Supp. 729 (D. N.H. 1938), in allowing a deduction for payments of decedent's guarantee of his sister-in-law's notes, commented:

> It is contended by the defendant that the transactions constituted a gift, but the argument appears to be labored. I see nothing to indicate that the transaction was anything out of the ordinary. It is common for a person to sign notes for the purpose of helping another, having confidence that he will never be called upon to pay and it is human nature to postpone payment so long as there is any hope that the maker will discharge his obligation….
>
> It cannot be seriously questioned that Dodge's endorsement of his sister-in-law's note was a valid claim against his estate under the laws of the State of New Hampshire. That obligation had existed for some years. The fact that Dodge paid the interest on the notes subsequent to the date when his sister-in-law became unable to do so, indicates only that he was trying to postpone the day of payment. It may have been because he had other use for his money or that the same was tied upon in investments and unavailable. Payment was eventually made after his death from his estate.
>
> The statute was enacted to prevent deductions under the guise of claims which were in reality gifts or testamentary distributions. The transactions in the case at bar do not fall within either of the above provisions.

Commissioner v. Wragg, 141 F.2d 638 (1st Cir. 1944), held:

> Thus when it has appeared that the decedent's right over against the primary obligor was worth its face value, no deduction has been allowed for a secondary liability (*Estate of Lay*, 40 B.T.A. 522; *Hartford Nat. Bank & Trust Co. v. Smith*, D.C. Conn., 54 F.Supp. 579; see also *Parrott v. Commissioner*, 9 Cir., 30 F.2d 792, certiorari denied 279 U.S. 870, 49 S.Ct. 512, 73 L.Ed. 1007; *Buck v. Helvering*, 9 Cir., 73 F.2d 760); but when it has appeared that the right over was valueless a deduction for it has been allowed. *United States v. Mitchell*, 7 Cir., 74 F.2d 571; *Commissioner v. Porter*, 92 F.2d 426; *Carney v. Benz*, 1 Cir., 90 F.2d 747, 113 A.L.R. 365; *Dodge v. Gagne*, D.C., 23 F.Supp. 729. And, when it has appeared that the right was worth something but not its face value a deduction has been allowed to the extent of the amount which actually had to be paid and could not be recovered from the primary obligor by the estate. *McCoy v. Rasquin*, 2 Cir., 102 F.2d 434; *Eckhart v. Commissioner*, 33 B.T.A. 426, 440; *Estate of Borland*, 38 B.T.A. 598. In view of these cases, particularly the two last cited, it does not seem to us that the Tax Court in the case at bar would have allowed the deduction unless it had come to the conclusion that the right of the estate over against the primary obligor, the decedent's son, was valueless. To be sure it made no such finding categorically, but nevertheless we feel that such a finding is implicit in the factual background of the case and that it must have been assumed by the Tax Court that the estate would ultimately have to bear the loss or else it would not have reached the result which it did. The facts upon which we base our conclusion are that at various times the creditors had threatened to sell the collateral pledged to secure the notes; that upon some occasions actions were instituted by creditors against the

> decedent's estate on the notes, and that the execution on the judgment obtained by the conservator against the son was never levied upon or satisfied although the conservator as a fiduciary was under a legal duty to collect on his judgment, regardless of the family relationship involved, if he could. It seems to us that the creditors would not have taken the steps which they did if the son had been solvent, and that the conservator, if possible, would have collected on his judgment against the son. In the absence of evidence we cannot assume that he neglected to do so in breach of his fiduciary duties. Thus we think that the Tax Court must have concluded, but merely failed to state, that the right of the estate over against the son was valueless, and, this being so, we see no point in remanding the case for a definite finding to that effect.

Estate of Hofford v. Commissioner, 4 T.C. 542 (1945), allowed a deduction relating to a loan guarantee in this situation:[6270]

> In his deficiency notice the respondent disallowed the item, "in the absence of proof that it was contracted for adequate and full consideration in money or money's worth." It is not necessary that the consideration referred to in the statute be received by the decedent. *Porter v. Commissioner*, 60 Fed. (2d) 673; *Dodge v. Gagn*e, 23 Fed. Supp. 729; *Old Colony Trust Co., Executor*, 39 B. T. A. 871, 879. In the instant proceeding the decedent endorsed a note for the Lehighton Legion Home Association. The money received by the latter was used to buy uniforms for its members. The association was clearly debtor for borrowed money on the note which it executed. The testimony is that the association paid some interest on the note to the bank, but never paid anything on the principal. There is no evidence that the decedent intended any gift to the association by his accommodation endorsement and there is no reason to suppose that he intended any gift. After the decedent's executors paid the note, they made a demand on the association for repayment, but it was without funds and the note was then uncollectible.

In *Estate of Duval v. Commissioner*, 4 T.C. 722 (1945), the Official Tax Court Syllabus summarized:

> Where a bank, owner of a claim against decedent as guarantor of notes, consented to distribution of the estate without payment of its claim, reserving, however, a claim against a co-guarantor, and where the estate will never be required to pay the claim, *held*, such claim is not deductible from the gross estate of decedent, although formally allowed by a court having jurisdiction of the settlement of the estate.

In *Duval*, the decedent guaranteed a loan made to a corporation of which she was a shareholder. The court disallowed a deduction for the guarantee:

> In view of this peculiar and unusual liability, a liability that in the case of a solvent and going corporation is not at all likely ever to be enforced where in practical effect the stockholders' liability is rather that of surety than that of a primary debtor, although as a matter of law the liability of the stockholder is primary, we hold that the payment by the corporation of its indebtedness should be considered as satisfying the claim against the estate as of the date of the death of the deceased. If the debt of the corporation is paid by the corporation before it is paid by the stockholder, the liability of the stockholder is

[6270] The case was appealed on other issues, which a reviewed opinion of the Tax Court addressed without disturbing this holding.

> extinguished. For purposes of appraisement of the estate for the fixing of the Federal estate tax, the stockholders' liability should be considered as a potential claim rather than an actual claim, until it is paid by the estate or it is reasonably certain that it must be paid.
>
> In the present case the liability does not attain the dignity of a potential claim. In point of fact, there is no claim at all. The position of petitioners is much weaker than that present in *Charles H. Lay*, 40 B. T. A. 522, where we said:
>
>> Of course, if when decedent died, there had been indebtedness to [the creditor] for money borrowed by the decedent, the claim would have been deductible in full. Doubtless, the Commissioner would not contend otherwise, but where an estate is liable only as a surety or endorser, it cannot take any deduction because of such liability where the principal has ample assets to pay the indebtedness. *Cf. Buck v. Helvering*, *supra*; *Parrott v. Commissioner*, 30 Fed. (2d) 792.

In affirming this holding, the Ninth Circuit, 152 F.2d 103 (1945), elaborated that the subrogation right was key:

> … Whether the rights over be called a right of subrogation or a right to a right of subrogation or contribution, decedent at her death had property rights of value, and the right upon payment to acquire the right of subrogation is the property right which must be included in the gross estate.
>
> No difficulty is encountered in fixing the value of the rights over. It is conceded that the company and the co-guarantor were, at the time of decedent's death, solvent and able to pay the claims and so continued up to the time of the hearing in the tax court. The Tax Court so found and its finding is not challenged. In fact, it may be said the question admits of no dispute, the petitioners having so stipulated. At the hearing before the tax court the petitioners endeavored to show by expert testimony the value of the rights over at the time of decedent's death. This testimony was rejected by the tax court and we think correctly so. When, as here, the concession is made that the company was fully able to pay and discharge the debt, there is no reason to encumber the record by the introduction of opinion evidence as to the value. Such evidence would have been of no assistance to the tax court.

Rev. Rul. 60-247 provides:

> Advice has been requested concerning the deduction, for Federal estate tax purposes, of claims against the estate which have not been paid or which will not be paid because the creditor waives payment, fails to file his claim within the time limit and under the conditions prescribed by applicable local law, or otherwise fails to enforce payment.
>
> The question here arises from a United States District Court decision in the case of *Bertha Jacobi Winer v. United States*, 153 Fed. Supp. 941, which involved a suit by the executrix to recover estate tax paid by the estate of her deceased mother on the grounds that the Commissioner of Internal Revenue erred in disallowing a deduction for a claim of the daughter-executrix against the estate. The claim had become void and uncollectible by virtue of noncompliance with the applicable state statute. The daughter had loaned money to her mother and had received notes in exchange. The court found that there was no question of the legitimacy of the debt. Under the applicable state

statute, however, a claim not filed in the office of the proper authority within a stated period of time becomes void and can no longer be the basis of a cause of action. The court found further that noncompliance with the statute was inadvertent and that the daughter could not profit by the deduction as she was taking nothing under the mother's will.

The United States District Court for the Southern District of New York held for the plaintiff on the ground that the daughter had, on date of death, an "enforceable claim" and that no more is needed to warrant deduction. It attached no importance to the fact that the debt could not be collected….

Section 2053(a) of the Internal Revenue Code of 1954 provides, in part, that the value of the taxable estate shall be determined by deducting from the value of the gross estate such amounts for claims against the estate as are allowable by the laws of the jurisdiction under which the estate is being administered.

Section 20.2053-4 of the Estate Tax Regulations states, in part, that only claims enforceable against the decedent's estate may be deducted.

In *Jacob A. Jacobs, et al., Executors of the Last Will of Morris Eisenstadt, Deceased, v. Commissioner*, 34 Fed. (2d) 233, Ct. D. 128, C.B. VIII-2, 403 (1929), *certiorari denied*, 280 U.S. 603, the opinion of the court was that Congress intended to provide a deduction for those claims which were presented and allowed or otherwise determined as valid against the estate and actually paid or were to be paid. In that case a widow elected to accept the provision of the will of her deceased husband in her favor in lieu of the amount provided by an antenuptial contract. The antenuptial contract provided for payment of an amount to her upon his death out of his estate in lieu of dower and other marital rights. Under the state law such contract was valid and enforceable against the estate of the deceased husband at the time of his death. The court held, however, that the amount stipulated in the antenuptial contract was not deductible from the gross estate of the decedent for the reasons stated above.

The principles stated in the Jacobs case were cited with approval in *John Jacobs, et al., Executors of the Will of Carrie Jacobs Brown v. Commissioner*, 34 B.T.A. 594. There, personal property taxes were assessed by a county auditor upon property owned by the decedent. Subsequently, the state taxing authorities issued a certificate of immunity which, by state statute, constituted a defense in any action for recovery of the assessment. The taxes assessed had not been paid and no demand had been made by the taxing authorities. The court held that the assessment was not a claim against the estate and, therefore, the amount was not deductible for Federal Estate tax purposes.

Both the *Jacobs* and the *John Jacobs* cases were cited with approval in *Estate of William P. Metcalf, et al., v. Commissioner*, 7 T.C. 153. In that case, real estate taxes and penalties had accrued and constituted a lien on certain property of the decedent prior to his death. A suit to enforce the lien had been instituted, and the suit was compromised by the estate for a lesser amount than the amount of the taxes claimed. The court held that only the lesser amount was deductible from the gross estate of the decedent.

In *Estate of Ethel M. DuVal, et al., v. Commissioner*, 4 T.C. 722, *affirmed*, 152 Fed. (2d) 103, certiorari denied 328 U.S. 838, a bank, owner of a claim against decedent as guarantor of notes, consented to distribution of the estate without payment of its claim. It reserved, however, a claim against a co-guarantor. The estate would never be required to pay the claim. The court held that such claim was not deductible from the gross estate of the decedent. The opinion of the Tax Court of the United States stated, "A claim is an assertion of a right. If there be no assertion of a right or if the right to assert has been relinquished or abandoned, there is no claim."

Accordingly, it is the position of the Internal Revenue Service that no deduction will be allowed for claims against the estate which have not been paid or will not be paid because the creditor waives payment, fails to file his claim within the time limit and under the conditions prescribed by applicable local law, or otherwise fails to enforce payment.

Consistent with (but not citing) Rev. Rul. 60-247, *Estate of Conard v. Commissioner*, T.C. Memo. 1975-249, held:

The deduction for claims against the estate provided by section 2053(a)(3)[1] is limited to those claims which are allowable under the laws of the jurisdiction in which the estate is administered and which represent personal obligations of the decedent at the time of his death. Whether or not the claim has matured does not affect deductibility.[2]

[1] [footnote restated the statute]

[2] Estate Tax Regs. 20.2053-4.

It is settled, however, that Congress was concerned with actual claims, not theoretical ones that the estate will never be required to pay. *Jacobs v. Commissioner*, 34 F.2d 233, 235 (8th Cir. 1929), *cert. denied* 280 U.S. 603 (1929). Thus, although a valid, enforceable claim exists at the time of death, if subsequent events relieve the estate of liability for the claim, no deduction will be allowed.[3] *Estate of Quintard Peters Courtney*, 62 T.C. 317 (1974); *Estate of Frank G. Hagmann*, 60 T.C. 465 (1973), *affd. per curiam* 492 F.2d 796 (5th Cir. 1974); *Estate of Ethel M. DuVal*, 4 T.C. 722 (1945), *affd*. 152 F.2d 103 (9th Cir. 1945), *cert. denied* 328 U.S. 838 (1946); *John Jacobs, Executors*, 34 B.T.A. 594 (1936).[4]

[3] A claim against the decedent as a secondary obligor is deductible if rights against the primary obligor are worthless. *Commissioner v. Wragg*, 141 F.2d 638 (1st Cir. 1944). See also *John Parrott, Jr., Executors*, 7 B.T.A. 134 (1927), *affd*. 30 F.2d 792 (9th Cir. 1929), *cert. denied* 379 U.S. 870 (1929). Richard testified that the primary obligor (Salt City Business College, Inc.) was unable to pay the notes, was insolvent, and continued to lose money after his sister's death. Respondent did not challenge Richard's characterization on cross-examination, nor present any contradictory evidence. Additionally, the estate tax return valued the stock in the corporation at zero and respondent did not challenge this valuation. While by no means free from doubt, we believe the state of the record requires a conclusion that at the time of the decedent's death the primary obligor was unable to honor the notes in question or reimburse the guarantors. Thus, in denying relief to petitioner, we do not do so on the grounds that the primary obligor was able to pay or that the petitioner would be subrogated to rights against the primary obligor equal to the claim against the estate. See Du *Val's Estate v. Commissioner*, 152 F.2d 103 (9th Cir. 1945), *affg*. 4 T.C. 722 (1945), *cert. denied* 328 U.S. 838 (1946).

> [4] For a different view, see *Russell v. United States*, 260 F.Supp. 493 (N.D. Ill. 1966); *Winer v. United States*, 153 F.Supp. 941 (S.D. N.Y. 1957). See also Stephens, Maxfield, & Lind, Federal Estate and Gift Taxation, 5-17, 5-18 (3d Ed.).
>
> The conclusion we reach is dictated by our decision in *Estate of Frank G. Hagmann*, *supra*. There bona fide obligations on which the decedent was primarily liable were deducted from the gross estate. The relevant state statute provided that claims not properly filed would be void and unenforceable. No claims in respect of the debts were filed within the statutory period. We held that since the estate assets would not be used to pay the debts, the respondent's disallowance must be sustained.
>
> Similarly, the deduction must be denied in the instant case. Kansas law[5] requires that any demand against a decedent's estate, including those arising from liability as a surety, guarantor or indemnitor, be exhibited within 9 months of publication of the first notice to creditors. Moreover, Kansas law requires that liens upon the property of a decedent not existing at death must be exhibited in the same manner as other claims against the estate.[6] Failure to exhibit the claim precludes its later enforcement.
>
> [fn 5, 6 citations to Kansas law omitted]
>
> In this case, notice of the appointment of an executor and notice to the creditors to present their claims was first given on April 15, 1970. The bar date for filing claims was January 15, 1971, and the Bank failed to present any claim by this date. The petitioner was thus relieved of liability on the notes endorsed by the decedent as co-guarantor. The petitioner has not and will not be required to honor the notes as co-guarantor. Consequently, the deduction must be denied.

Estate of Scofield v. Commissioner, T.C. Memo. 1980-470, had the following Official Tax Court Syllabus:

> Decedent executed a will leaving substantially all his estate to his son and naming his son as executor. Subsequently, he guaranteed bank loans made to his son and pledged securities as collateral for the loans. The bank filed no claims against the estate during its probate, but the securities were distributed to the son subject to the security interest of the bank.
>
> Held: (1) Under California law, the bank's claim on the guaranty was not extinguished by failure to file a claim against the estate since the claim was secured; (2) under sec. 2053, I.R.C. 1954, the estate is entitled to a deduction for the bank's lien, but the amount of the deduction must be reduced by the value of the right of subrogation against the son; and (3) the value of such right determined.

Scofield introduced its analysis:

> We deal next with the Commissioner's contention that the decedent's guaranty and pledge were "in the nature of gifts or testamentary dispositions" to the extent they secured loans used by Mr. Scofield for personal living expenses. The argument derives from the cases construing section 2053(c), which provides in part:
>
> > The deduction allowed by this section in the case of claims against the estate, unpaid mortgages, or any indebtedness shall, when founded on a promise or

agreement, be limited to the extent that they were contracted bona fide and for an adequate and full consideration in money or money's worth …

In construing this provision,[4] this and other courts have consistently held that the consideration in money or money's worth need not pass to the decedent. *Commissioner v. Porter*, 92 F.2d 426 (2d Cir. 1937), *affg.* 34 B.T.A. 798 (1936); *Carney v. Benz*, 90 F.2d 747 (1st Cir. 1937); *Commissioner v. Bryn Mawr Trust Co.*, 87 F.2d 607 (3d Cir. 1936), *affg.* a Memorandum Opinion of this Court; *Commissioner v. Kelly's Estate*, 84 F.2d 958 (7th Cir. 1936), *affg.* 31 B.T.A. 941 (1934), *cert. denied* 299 U.S. 603 (1936); *Estate of Borland v. Commissioner*, 38 B.T.A. 598 (1938); *Estate of Wade v. Commissioner*, 21 B.T.A. 339 (1930). A guarantor's obligation has been held to have been contracted for adequate and full consideration in money or money's worth when there has been a loan of money to a third party as a result of the guaranty and the guaranty thereby became binding. *Estate of Hofford v. Commissioner*, 4 T.C. 542 (1945), *supp. opinion* 4 T.C. 790 (1945); *Commissioner v. Porter*, *supra*; *Carney v. Benz*, *supra*; *Estate of Borland v. Commissioner*, *supra*.[5]

[4] The requirement of an "adequate and full consideration in money or money's worth" came into law in 1926 as sec. 303(a)(1) of the Rev. Act of 1926, ch. 27, 44 Stat. 72.

[5] In *Latty v. Commissioner*, 62 F.2d 952, 954 (1933), dismissing petn. to rev. 23 B.T.A. 1250 (1931), the Sixth Circuit, in dicta, expressed some doubt about such holdings by saying: "we think that ordinarily these words [the consideration requirement of sec. 2053(c)] must be construed to evidence an intent upon the part of Congress to permit the deduction of claims only to the extent that such claims were contracted for a consideration which at the time either augmented the estate of the decedent, granted him some right or privilege he did not possess before, or operated to discharge a then existing claim, as for breach of contract or personal injury." However, our research has revealed no recent decisions on the issue, and the Commissioner has not asked us to reconsider such holdings. Under the circumstances, we decline to do so on our own initiative.

In view of such decisions, it is clear that the estate is not to be denied the deduction merely because the decedent received no consideration in money or money's worth for the guaranty. However, the Commissioner relies on dicta in some of such cases and argues that, in part, the deduction should be disallowed because the guaranty arrangement was used by the decedent as a means of making testamentary gifts to Mr. Scofield. The petitioner responds that by this argument, the Commissioner is seeking, indirectly, to challenge the holding that the deduction is not to be disallowed merely because the decedent received no consideration in money or money's worth for the guaranty.

The *Scofield* standards regarding loan guarantees appear more favorable to estates than other claims against an estate. For example, before the unlimited marital deduction for qualified terminable interest property, any payments to a spouse upon death pursuant to a prenuptial agreement had to be supported by the decedent having received some property. In *Sutton v. Commissioner*, T.C. Memo 1973-211:

The requirement that an allowable claim against the estate must be contracted "for an adequate and full consideration in money or money's worth" dates back in its present form to the Revenue Act of 1926. It was carried over without change in section 2053 of

> the Revenue Act of 1954.[3] The courts have long held that it is not sufficient that the claim be enforceable as a matter of state law. In order to meet the test prescribed in the statute, there must be a commensurate benefit flowing from the claimant to the decedent. See *Latty v. Commissioner*, 62 F.2d 952 (C.A. 6, 1933). Furthermore, the consideration flowing to the decedent and the claim against the decedent must be of comparable value in terms of dollars and cents. *Estate of Herbert C. Tiffany*, 47 T.C. 491 (1967); *Estate of Ella J. Davis*, 57 T.C. 833 (1972). The consideration for Helen's life annuity of $400 per month predicated on the prenuptial agreement fails to meet that test. Decedent received nothing of comparable value. See *Estate of Frances R. Pollard*, 52 T.C. 741 (1969).
>
> [3] H. Rept. No. 1337, 83d Cong., 2d Sess. (1954), p. A317.

However, that strictness might be explained by Code § 2053(b), which has always viewed marital rights as insufficient consideration – except in the context of divorce, etc.

Scofield reasoned and held regarding the guaranty being a bona fide claim:

> In support of his position, the Commissioner relies on the facts that the decedent made a gift to Mr. Scofield in 1968, that in that year, the decedent also executed his will in which he bequeathed substantially all of his estate to Mr. Scofield, that Mr. Scofield admitted that his income was negligible in the years 1968 through 1973, that Mr. Scofield used some of the funds borrowed from the bank to cover his personal expenses, and that Mr. Scofield sustained substantial losses in his stock transactions during those years. In addition, the Commissioner asserts that the decedent knew that Mr. Scofield needed some of the borrowed funds for his personal expenses and that the decedent reasonably knew that he would be called upon to pay off the loans to Mr. Scofield. However, the record contains not one iota of evidence indicating that the decedent was aware of the facts that Mr. Scofield needed to use some of the borrowed funds for his personal expenses and that Mr. Scofield was sustaining losses on his stock transactions. Although Mr. Scofield testified in this case, he was never asked any questions concerning whether he revealed his need for funds and his financial condition to the decedent.
>
> In this case, as in the *Hofford*, *Carney*, and *Porter* cases, the arrangements between the decedent and the lender took the form of a commercial transaction. In *Hofford*, *Carney*, and *Porter*, the courts recognized that they were dealing with what appeared to be a business transaction, and in their dicta, they made clear that they would look behind the form of the transaction only when there was evidence indicating that the arrangement was being used for the purpose of making gifts. Since the Commissioner has the burden of proof on this issue in this case, he has the burden of proving that in entering into the guaranty arrangement, the decedent intended to make gifts to Mr. Scofield, and the evidence is clearly insufficient to carry that burden. For all that we know, the decedent may have been wholly unaware of the fact that Mr. Scofield was using some of the borrowed funds for personal expenses or that Mr. Scofield was sustaining substantial losses; Mr. Scofield may have, deliberately or otherwise, withheld such information from the decedent. Moreover, even if the decedent was aware of such circumstances, both he and Mr. Scofield may have been eternally optimistic, hoping that Mr. Scofield's investments would, in time, prove far more successful. Without evidence showing that the decedent was aware of Mr. Scofield's need for money, we cannot infer that the decedent intended to make gifts by his continuing to guarantee the loans to Mr. Scofield.

> Inasmuch as the Commissioner has failed to prove that gifts were intended, he has failed to bring his case within the dicta of *Hofford*, *Carney*, and *Porter*.[6] Consequently, we need not, and do not, decide whether to adopt such dicta in this case.
>
> > [6] It should be recognized that in the *Jermyn* case, the petitioner had the burden of proving that the decedent did not intend to make gifts. Whether we would reach the same result on the record in this case if the burden was on the petitioner is a matter not to be considered.

Scofield analyzed subrogation:

> In *Eckhart v. Commissioner*, 33 B.T.A. 426 (1935), the decedent had endorsed two promissory notes which were payable on demand. At the date of his death, a balance of approximately $148,000 was due on the notes, and they were secured by collateral of the maker having a value of $65,000. After the decedent's death, the holder of the notes made an unsuccessful demand on the maker for payment, filed a claim against the decedent's estate which was allowed, and sold the collateral for approximately $19,000. The proceeds of the collateral were applied to the notes, and the estate paid the difference and claimed a deduction therefor. This Court rejected the Commissioner's position that the deduction should be limited to the difference between the debt and the value of the collateral at the date of death and allowed the entire deduction. 33 B.T.A. at 440-441. We recognized the general rule for valuing the estate, but we pointed out that the amount of certain claims and losses depends upon events occurring subsequent to the valuation date. The estate was actually required to pay the entire difference between the amount of the debt and the proceeds from the sale of the collateral, and the Court held that such amount should be deductible.
>
> The right of subrogation in this case is like the collateral in *Eckhart*: such right is not an asset of the estate which should be valued on the valuation date; rather, it represents an amount to be applied in reduction of the bank's lien in determining the amount of the allowable deduction. As in *Eckhart*, we believe that the amount of the deduction to be allowed in this case should not be based simply on the circumstances existing at the valuation date but should take into consideration all the events occurring during the administration of the estate. The Commissioner recognized that the amount of the lien is to be reduced by the payments made during the administration of the estate. Similarly, the reduction resulting from the existence of the right of subrogation should not be computed until the administration of the estate was completed and the collateral was distributed to Mr. Scofield, subject to the lien. Accordingly, we hold that the value of the right of subrogation should be determined as of the date of the distribution of the assets of the estate. For such purpose, the net value of Mr. Scofield's distribution is determined as of that date, and his net worth is determined as of that date.

Propstra v. U.S., 680 F.2d 1248 (9th Cir. 1982), did not allow consideration of post-mortem events in determining the deductibility of "claims that are certain and enforceable at the time of death":

> As a preliminary matter we must determine the nature of the lien claims against the estate. The law is clear that post-death events are relevant when computing the deduction to be taken for disputed or contingent claims. See Treas. Reg. §20.2053-

1(b)(3)("No deduction may be taken on the basis of a vague or uncertain estimate."). See also *Estate of DuVal v. Commissioner*, 4 T.C. 722 (1945), *aff'd*, 152 F.2d 103 (9th Cir.), *cert. denied*, 328 U.S. 838, 66 S.Ct. 1013, 90 L.Ed. 1613 (1946). Less certain is the relevance of post-death events with regard to claims that are certain and enforceable at the time of death.

We first must determine whether the claim was disputed or contested. The Government argues that the estate contested the lien claims, citing the notation "contested in part" on the estate tax return in support of its argument. The estate contends that the notation was irrelevant; because the Association lacked the power to compromise its lien claim against decedent's estate at the time of his death, the claims were certain (that is for a liquidated sum), enforceable, and owing.

The executrix for the estate had hoped to find a defense against the Association's lien claims against the estate. This hope was reflected in the notation "contested in part" written next to the deductions taken for these claims on the estate tax form that she filed. The executrix' hopes, however, have no bearing on whether the Association's claims were certain or enforceable. The Government concedes that at the time of decedent's death the Association lacked the authority to settle its claims for less than their full amount. Moreover, the executrix had no legal or factual arguments that would support a challenge to the claims. The estate lacked even a colorable defense against the Association's claims. Consequently, the Association's lien claims were certain and enforceable.

This conclusion necessitates an examination of whether post-death events are relevant when computing the permissible deduction for certain and enforceable claims.[9] We rule that, as a matter of law, when claims are for sums certain and are legally enforceable as of the date of death, post-death events are not relevant in computing the permissible deduction.

[9] The commentators have differing opinions regarding this issue. See, e.g., Palmquist, The Estate Tax Deductibility of Unenforced Claims Against a Decedent's Estate, 11 Gonzaga L.Rev. 707 (1976) (post-death events irrelevant); Comment, Estate and Income Tax: Claims Against the Estate and Events Subsequent to Date of Death, 22 UCLA L.Rev. 654 (1975) (post-death events irrelevant); Comment, Effect of Events Subsequent to the Decedent's Death on the Valuation of Claims Against His Estate Under Section 2053 of the Federal Estate Tax, 1972 Ill.L. Forum 770 (post-death events relevant).

Neither section 2053(a) nor the tax regulations state on their face whether post-death events are relevant when computing the permissible deduction for certain and enforceable claims against the estate. Nevertheless, we think that various indicia show that Congress intended that post-death events be disregarded when valuing the claims against an estate.[10]

[10] In examining cases that have previously considered this issue, we have found an irreconcilable split in authority. Compare *Commissioner v. Strauss*, 77 F.2d 401, 405 (7th Cir. 1935); *Russell v. United States*, 260 F.Supp. 493, 499 (N.D. Ill. 1966); *Winer v. United States*, 153 F.Supp. 941 (S.D.N.Y. 1957); *Estate of Lester v. Commissioner*, 57 T.C. 503 (1972) with *Gowetz v. Commissioner*, 320 F.2d 874 (1st Cir. 1963); *Commissioner v. Estate of Shively*, 276 F.2d 372, 374 (2nd Cir. 1960); *Estate of*

Courtney, 62 T.C. 317 (1974); *Estate of Hagmann v. Commissioner*, 60 T.C. 465 (1973), *aff'd*, 492 F.2d 796 (5th Cir. 1974). Faced with these conflicting views, we have examined the arguments underlying each and conclude that *Strauss*, *Winer* and their progeny are more persuasive.

First, we find significance in a change in wording made by Congress when it enacted the Internal Revenue Code of 1954. Predecessors to section 2053 had authorized deductions of the value of only such claims "as are allowed by the laws of the jurisdiction ... under which the estate is being administered." See, e.g., Int. Rev. Code of 1939, ch. 3, §812(b)(3), 53 Stat. 123 (emphasis added). Some courts interpreted this language as meaning that the deduction was only for such claims as were actually paid. See *Commissioner v. Estate of Shively*, 276 F.2d 372, 374 (2nd Cir. 1960); *Estate of Metcalf v. Commissioner*, 7 T.C. 153, 160 (1946), *aff'd in unpublished opinion*, 47-2 U.S. Tax Cas. (CCH) ¶10,556 (6th Cir. 1947). Consequently, they concluded that post-death events were relevant to the valuation of claims against the estate and that the compromised portion of the claim against the estate "no longer represented an enforceable claim." *Estate of Metcalf*, 7 T.C. at 160. Other courts, however, noted that deductibility was conditioned on a claim's enforceability under local law, and that enforceability was to be determined as of the time of death. See *Smyth v. Erikson*, 221 F.2d 1, 3 (9th Cir. 1955); *Winer v. United States*, 153 F.Supp. 941, 943 (S.D.N.Y. 1957). They reasoned that the use of the term "allowed" "[was] not to be construed as meaning that unless a claim against the estate has been allowed by the state court no deduction therefor will be permitted." *Smyth*, 221 F.2d at 3. These courts reasoned that Congress intended that the phrase be used as a substantive guide delineating those claims (and other estate disbursements) that would be deductible. Specifically, Congress intended the phrase to mean that only claims based on legally recognized and enforceable rights were deductible; claims that were unenforceable because they lacked legal foundation were not deductible, even if actually paid. See *Wolfsen v. Smyth*, 223 F.2d 111 (9th Cir. 1955); *Jones v. United States*, 424 F.Supp. 236 (E.D. Ill. 1974). Congress lent support to this latter construction when, in enacting the Internal Revenue Code of 1954, it replaced "allowed" with "allowable." Accord, *Russell v. United States*, 260 F.Supp. 493, 499 (N.D. Ill. 1966); Comment, supra, 22 UCLA L.Rev. at 670.

Treasury Regulation 20.2053-4 also supports the construction that certain and enforceable claims against the estate should be valued without regard to post-death events. In pertinent part, it provides:

"The amounts that may be deducted as claims against a decedent's estate are such only as represent personal obligations of the decedent *existing at the time of his death*, whether or not then matured, and interest thereon which had accrued at the time of death .... Only claims *enforceable* against the decedent's estate may be deducted."

(emphasis added). Significantly, the regulation designates "the time of death" as the critical reference point. In addition, it speaks of "enforceable" rather than "enforced" claims. These factors further suggest that post-death events are irrelevant to the computation of certain and enforceable claims against the estate. Accord, *Winer*, 153 F.Supp. at 943. See *also Jacobs v. Commissioner*, 34 F.2d 233, 236-37 (8th Cir.) (McDermott, J., dissenting), *cert. denied*, 280 U.S. 603, 50 S.Ct 85, 74 L.Ed. 647 (1929).

Finally, our construction is consistent with the teaching of *Ithaca Trust Co. v. United States*, 279 U.S. 151 49 S.Ct 291, 73 L.Ed. 647 (1929). In *Ithaca Trust* the Supreme

Court considered whether post-death facts should be considered in measuring the value of a charitable gift for the purpose of deducting that value from the gross estate when computing the taxable estate. In holding that post-death events should be ignored, the Court reasoned:

> The first impression is that it is absurd to resort to statistical probabilities when you know the fact. But this is due to inaccurate thinking. The estate so far as may be is settled as of the date of the testator's death. The tax is on the act of the testator not on the receipt of property by the legatees. Therefore the value of the thing to be taxed must be estimated as of the time when the act is done .... Tempting as it is to correct uncertain probabilities by the now certain fact, we are of [the] opinion that it cannot be done ....

279 U.S. at 155, 49 S.Ct. at 291 (citations omitted).[11] In Ithaca Trust, the bequest was not for a liquidated sum; its value depended on the valuation of the use of property for the life of the testator's widow. The fact that she died within six months of the date of the testator's death was held not to be a proper consideration, and her life estate was determined according to mortality tables as of the date of the testator's death. In contrast, in the present case the amount of the assessment was fixed as of the date of death. Therefore there is even less reason to look to post-death events.

[11] *Ithaca Trust* is arguably distinguishable from the instant case on the grounds that it dealt with charitable bequests, which are deductible from the gross estate pursuant to a statutory section different from that authorizing deductions for claims against the estate. See *Jacobs v. Commissioner*, 34 F.2d 233 (8th Cir.), *cert. denied*, 280 U.S. 603, 50 S.Ct. 85, 74 L.Ed. 647 (1929). This technical distinction, although accurate, fails to explain why deductions for claims against the estate should be computed differently from charitable bequests. The Eighth Circuit, relying on this distinction in Jacobs, provided no indication of why Congress would have intended such an anomolous result.

The Government denies the force of these arguments, and cites to *Jacobs v. Commissioner*, in which the Eighth Circuit construed a predecessor to section 2053(a) as requiring the consideration of post-death events when computing the value of claims against the estate.[12] *Jacobs*, however, is without persuasive force for several reasons. First, *Jacobs* is distinguishable from the instant case. In Jacobs, the decedent's will gave his widow a power to elect between two alternatives. Her claim, therefore, was not certain and enforceable; it was contingent. Second, we find the *Jacobs* court's analysis of Congressional intent unconvincing. The Eighth Circuit placed heavy reliance on the fact that "claims against the estate" appeared in the same paragraph as funeral and estate administration expenses.[13] The court reasoned that, because funeral and administration expenses necessarily require consideration of post-death events, Congress must also have intended that post-death events be considered when computing claims against the estate. 34 F.2d at 236. We do not find this convincing evidence of Congressional intent. The same statutory section provides for the deduction of unpaid mortgages (or other indebtedness) on property when the value of the decedent's interest in that property has been included in the value of the gross estate. See note 8 supra. This amount can be ascertained as of the date of death. See *Commissioner v. Kelly's Estate*, 84 F.2d 958, 963-64 (7th Cir.), cert. denied, 299 U.S. 603, 57 S.Ct. 230, 81 L.Ed. 445 (1936). Thus, the contents of section 2053 do not give rise to any inference regarding whether post-death events should be considered when valuing claims against an estate. Moreover, except with regard to matters like funeral and administrative expenses, which by their very nature require valuation after a decedent's death, Congress has been explicit in providing for consideration of post-death events. See I.R.C. §§2013, 2032, and 2054. Third, Jacobs was decided before the change in the Code discussed above, which indicates Congress' most recently expressed intent. Finally, we find the Jacobs court's distinction of Ithaca Trust, which was decided approximately six months before Jacobs, inadequate for reasons already stated. See note 11 supra. For these reasons, Jacobs is of dubious precedential value to our determination of whether post-death events are relevant when computing the value of certain and enforceable claims against the estate.

[12] *Jacobs* has spawned a line of authority supporting the proposition that post-death events must be taken into account when computing the value of certain and enforceable claims against the estate. See, *e.g.*, *Gowetz v. Commissioner*, 320 F.2d at 876; *Estate of Shively*, 276 F.2d at 375; *Estate of Hagmann*, 60 T.C. at 467-69; *Estate of Metcalf*, 7 T.C. at 161; *John Jacobs v. Commissioner*, 34 B.T.A. 594, 596-97 (1936), remanded on stipulation, 95 F.2d 1006 (6th Cir. 1938).

[13] The statute involved in Jacobs, section 403(a)(1) of the Revenue Act of 1921, 42 Stat. 279, c. 136, closely resembled the one now before us, I.R.C. §2053.

The Government also relies on Revenue Ruling 60-247.[14] Although revenue rulings are occasionally entitled to weight in the interpretive process, they are not conclusive statements of the law. See *McMartin Industries, Inc. v. Vinal*, 441 F.2d 1274 (8th Cir. 1971); *Macey's Jewelry Corp. v. United States*, 387 F.2d 70, 72 (5th Cir. 1967). A revenue ruling that conflicts with the revenue statutes must be ignored. *Idaho Power Co. v. Commissioner*, 477 F.2d 688, 696 n.10 (9th Cir. 1973), rev'd on other grounds, 418 U.S. 1, 94 S.Ct. 2757, 41 L.Ed.2d 535 (1974); *United States v. Eddy Brothers, Inc.*, 291 F.2d 529, 531 (8th Cir. 1961). In issuing Revenue Ruling 60-247, the Commissioner relied extensively on *Jacobs*, *John Jacobs*, and *Estate of Metcalf*, all of which are unconvincing in their assessment of Congressional intent regarding the relevance of post-death events when computing the value of certain and enforceable claims against an estate. We are not persuaded by a revenue ruling that relies on cases that we find unpersuasive. Moreover, we note that Revenue Ruling 60-247 was disregarded in *Russell v. United States*, 260 F.Supp. 493, 499-500 (N.D.Ill.1966).

[14] A deduction, for Federal estate tax purposes, will not be allowed for claims against the estate which have not been paid or will not be paid because the creditor waives payment, fails to file his claim within the time limit and under the conditions prescribed by applicable local law, or otherwise fails to enforce payment. An exception is made in cases where the claim may be deemed to have been paid through the payment of a legacy in an amount at least equal to that of the claim. Rev. Rul. 60-247, 1960-2 C.B. 272.

Having concluded that section 2053 precludes the consideration of post-death events in computing the value of certain and enforceable claims against an estate, we reverse the summary judgment granted in the Government's favor and remand for further proceedings consistent with this holding.

Estate of Theis v. Commissioner, 81 T.C. 741 (1983), a reviewed case with a well-reasoned dissent, the Official Tax Court Syllabus summarized:

Decedents gave one separate tract of land to each of their two children, but retained life estates in both parcels. Both children mortgaged the properties. Decedents joined in executing the mortgages. Decedent-husband also signed the note on one of the properties as an accommodation party, making him secondarily liable for its payment. Both properties were included at their date-of-death fair market value in the decedents' gross estates under sec. 2036(a), I.R.C. 1954. Decedents deducted the principal balances due on the mortgages from their gross estates. No claims had been made against the estates for payment. The children, who were primarily liable on the mortgages, appear solvent and have continued to make payments thereon. *Held*:

1. Neither estate is entitled to a deduction for a claim against the estate under sec. 2053(a)(3). *Estate of Courtney v. Commissioner*, 62 T.C. 317 (1974), followed.

2. Under the described circumstances of this case, no deduction is allowed for a mortgage debt under sec. 2053(a)(4).

3. The deduction or exclusion provided by sec. 20.2053-7, Estate Tax Regs., is not applicable.

The majority concluded that no deduction or exclusion was allowed, because that would have generated an end-run around Code § 2036:

A literal reading of section 20.2053-7, Estate Tax Regs., would require us to agree with petitioners. But we do not find that regulation applicable here. Section 20.2053-7, Estate Tax Regs., like section 2053(a)(4), was intended to cover situations involving the liability for mortgages on a decedent's own property. *Estate of Johnstone v. Commissioner*, 19 T.C. 44 (1952).[12] In the instant cases, the property was mortgaged after the decedents transferred remainder interests. To adopt a literal reading of section 20.2053-7, Estate Tax Regs., would be to go against the purpose and intent of section 2036(a) and section 2053(a)(4). For example, suppose an individual gifts a remainder interest in property to his children and retains a life estate, the children could then mortgage the property (without having their father cosign the mortgage) or could sell the property to a third party who mortgages it. If we agreed with petitioners' contention, the father would have to include only the net equity of redemption value (i.e., subtract the mortgages) in his gross estate. This is wholly contradictory to the express language of section 2036(a). We cannot agree with petitioners because we do not think that Congress intended to allow deductions to estates for debts that the decedents would not be required to pay.[13]

[12] We note that the ultimate conclusion in Johnstone was contrary to this result because the decedent retained an interest in the property, as a tenant in common, at death. However, despite its contrary conclusion, this Court's reasoning in Johnstone supports our result in this case.

[13] Petitioners' reliance on our opinion in Estate of Scofield v. Commissioner, T.C. Memo. 1980-470, for the proposition that the bank's liens were not extinguishable and therefore and deductible under section 2053 is misplaced.

Petitioners misstate the result of that case. In *Scofield*, a father executed a will in which he bequeathed stock to his son. The son borrowed money from a bank with the father acting as guarantor and pledging his stock as security. When the father died, the estate attempted to deduct the principal amount of the lien from the value of the gross estate.

The lien was not deductible in full, as petitioners in the present cases assert, but rather was offset by the value of the estate's right of subrogation against the son. Also, the case is distinguishable in that the Commissioner, unlike the present cases, conceded that the liens were deductible under sec. 20.2053-7, Estate Tax Regs., and the taxpayer conceded that the amount of the deduction was to be offset by the value of the estate's right of subrogation against the son. Indeed, when viewed in light of its differing facts and concessions, we read Scofield as supportive of our conclusions herein. See note 14 *infra*.

The record here does not indicate that the decedents have made, or will have to make, payments on the mortgage notes. The decedents' children appear to be solvent. In addition, no claims have ever been presented against the estates for payment. As noted previously, there are no claims against the decedents' estates for payment and no deductions are allowed under section 2053(a)(3). *Estate of Courtney v. Commissioner*, 62 T.C. 317 (1974).

We think the same result should follow in the instant cases where the decedents were not primarily liable on the mortgages and will not have to bear the burden of repayment. Section 20.2053-7, Estate Tax Regs., is not applicable to reduce petitioners' inclusion in their gross estates. Hence, we hold that the proper amount to be included in each decedent's estate is $45,000, which represents his or her share of the entire value of the properties (which has been stipulated to be $90,000.[14]

[14] Moreover, even if sec. 20.2053-7, Estate Tax Regs., were applicable here, it would not aid petitioners. We have held that the decedents were not primarily liable on the mortgages. Accordingly, if we applied the regulation to the instant cases, it would require that the only value that need be returned in the decedents' gross estates is the equity of redemption value. However, this amount would then be offset by the decedents' right of contribution against their children. In other words, the decedents' recovery from their children would reduce the estates' exclusions. *Estate of Shedd v. Commissioner*, 37 T.C. 394 (1961), *affd*. 320 F.2d 638 (9th Cir. 1963); *Du Val's Estate v. Commissioner*, 152 F.2d 103 (9th Cir. 1945), *affg*. 4 T.C. 722 (1945). See also R. Stephens, G. Maxfield & S. Lind, Federal Estate and Gift Taxation, 5.03 [6.] (1978). Here, the decedents as accommodation parties on the mortgages would have a right of recourse against their children for primary payment of the indebtedness. See Fla. Stat. Ann. sec. 673.3-415(5) (1966); *Beardmore v. Abbott*, 218 So. 2d 807 (Fla. Dist. Ct. App. 1969); *Central Trust Co. v. Manly*, 100 F.2d 992 (5th Cir. 1939). Accordingly, as in Estate of Shedd, and Du Val's Estate, the decedents' right of contribution would be used to offset any deduction (or exclusion) that the decedents would be entitled to. In the present cases the value of the property greatly exceeds the principal value of the mortgages. Also, the children appear solvent. Hence, applying sec. 20.2053-7, Estate Tax Regs., would require us to hold that the fair market value of the offset (or right of contribution) is equal to the value of the mortgages. Since the exclusion would be offset by this right of contribution, the value of the property includable in the decedents' gross estates would be each decedent's share of the entire value of the property, or $45,000 (per agreement by the parties).

Rev. Rul. 84-42 involved the following facts:

> In 1976, *D*, a resident of State X, gratuitously conveyed a remainder interest in real estate to *A*, retaining a life estate.
>
> In 1976, a bank in State X loaned *A* 100x dollars and as security received a mortgage on the property signed by both *A* and *D*. Under the law of State X, *D*, was a guarantor and, as such, had a right of reimbursement against *A*, the primary obligor, in the event *D* was required to pay the loan directly or if *D*'s life estate was sold in foreclosure. *A* was solvent at the time of the loan transaction, and *D* had a reasonable expectation of reimbursement from *A* in the event *D* was required to pay the loan for *A*. At and after *D*'s death, *A* remained solvent and was expected to continue paying the loan.
>
> *D* died in 1981. Because *D* retained a life estate in the transferred property, the value of property was subject to inclusion in *D*'s gross estate under section 2036 of the Code. The executor of *D*'s estate sought to deduct the mortgage balance alternatively under section 2053(a)(3) or (a)(4) of the Code.

Rev. Rul. 84-42 reasoned and held:

> In Rev. Rul. 76-235, 1976-1 C.B. 277, the decedent gratuitously transferred property in contemplation of death. Subsequent to the transfer and one month prior to the decedent's death, the transferee obtained a loan mortgaging the property to secure the loan. The decedent received no proceeds from the loan, and neither the decedent nor the decedent's estate was liable for the loan.
>
> The ruling holds that the full value of the transferred property is includible in the decedent's gross estate under section 2035 of the Code as in effect prior to amendment by the Tax Reform Act of 1976, and the amount of the mortgage is not deductible from the decedent's gross estate under section 2053 of the Code.
>
> In the present case, the decedent made a transfer described in section 2036 of the full value of the unencumbered remainder interest. The property was encumbered after the transfer, and D received no proceeds from the loan. Furthermore, the encumbrance of the property had no immediate effect on D's continued retention of the lifetime enjoyment of the property. Other than as a guarantor, neither D nor his estate was liable for the loan. Therefore, in accordance with Rev. Rul. 76-235, the entire value of the property is includible in D's gross estate under section 2036 of the Code, and no deduction is allowed for the mortgage under section 2053(a)(4).
>
> Unlike the situation in Rev. Rul. 76-235, in the present case D participated in the loan transaction as guarantor. However, where the decedent is a guarantor, and there is a right of reimbursement, the amount deductible under section 2053(a)(3) cannot exceed the amount the estate actually pays on the debt and is further limited by any expectation of reimbursement. See *Commissioner v. Wragg*, 141 F.2d 638, 640 (1st Cir. 1944); and *Estate of Duval v. Commissioner*, 4 T.C. 722, 726 (1945), aff'd, 152 F.2d 103 (9th Cir. 1945), *cert. denied* 328 U.S. 838 (1945).
>
> If the executor of D's estate is not called upon to pay the indebtedness, the amount of the indebtedness is not deductible as a claim against the estate for purposes of section 2053(a)(3) of the Code. See Rev. Rul. 60-247, 1960-2 C.B. 272. If the executor

is called upon and pays the indebtedness, the amount of the indebtedness is not deductible for purposes of section 2053 because A was solvent at that time and D’s estate has a right of reimbursement. If, in the situation described above, A became insolvent subsequent to the loan transaction and was delinquent in making the loan payments, D’s estate could deduct, under section 2053, the amount paid on the indebtedness reduced by the reasonable value of the right of reimbursement. See Rev. Rul. 60-247 and *Commissioner v. Wragg*, cited above, at page 640.

HOLDING

If D is guarantor of a loan to A, with a right of reimbursement, and the loan is secured by a mortgage on property D had previously transferred to A subject to a retained life estate, the entire value of the property, unreduced by the mortgage, is includible in D’s gross estate under section 2036 of the Code. If D’s estate is not called upon to pay the indebtedness, no amount of the indebtedness is deductible under section 2053.

First Interstate Bk. of Ariz., N.A. v. U.S., 57 AFTR 2d 86-1561 (D. AZ 1986), addressed first a guarantee that the debtor paid in part after the guarantor’s death:

At the time of death, decedent was guarantor, with his wife, of the $400,000 United Bank loan to the primary obligor T.G.K. Construction Company. Approximately four months after decedent’s death, the primary obligor-T.G.K. paid off $50,000 of the principal on the United Bank loan, leaving $350,000 on the loan.

Plaintiff argues that T.G.K.’s subsequent payment of the $50,000 is irrelevant to the amount of deduction arising from the United Bank loan. Plaintiff argues that the estate is entitled to a deduction equal to the decedent’s one-half community share of the liability represented by the United Bank’s claim, or $200,000. Defendant argues that the deduction should only be in the amount of $175,000 based upon the contingent liability of the decedent-guarantor after payment of the $25,000 of the primary obligor-T.M.C. Determination of the correct amount of deduction allowable to plaintiff turns on whether the post-death event of the payment by the primary obligor is to be taken into account.

“[A]s a matter of law, when claims are for sums certain, and are legally enforceable as of the date of death, post-death events are not relevant in computing the permissible deduction.” *Propstra v. United States*, 680 F.2d 1248, 1254 (9th Cir. 1982). Post-death events are relevant when the claims are disputed or contingent. *Propstra*, 680 F.2d at 1253. The real issue is whether, at the time of decedent’s death, the claim by United Bank against the decedent as guarantor was for a sum certain and legally enforceable or contingent and uncertain.

The ultimate liability of the decedent-guarantor was wholly contingent upon the ability of the primary obligor-T.G.K. to pay the amount due on the note. While in serious financial difficulty at the time of decedent’s death, Stipulation of Facts at 3, T.G.K. was not in default. The ultimate liability, therefore, was uncertain. Post-death events, such as T.G.K.’s payment of $50,000 on the outstanding principal, should be taken into account in determining the deduction.

Consequently, the correct amount of deduction that the estate may claim is $175,000, and the taxable estate was properly calculated by the Internal Revenue Service using the lesser amount.

First Interstate Bk. then considered the deductibility of a claim that, if unsecured, would have been invalid because the lender failed to make a claim against the estate. However, the guarantee was secured by the estate's property, so the estate paid is (using other assets). The court upheld the deduction for the claim, reasoning:

> … Decedent's ultimate liability was contingent upon the ability of T.G.K. to continue construction without needing the construction bonds insured by Fireman's Fund. While T.G.K. was in serious financial shape at the time of decedent's death, Stipulated Facts at 3, it was still operating and continued to operate for almost six months after the decedent's death. Since the claim was uncertain and contingent, post-death events should be considered and failure to comply with Ariz. Rev. Stat. Ann. § 14-3801 would appear to bar the deduction under 26 U.S.C. §2053.
>
> However, Ariz. Rev. Stat. Ann. § 14-3814 provides, in pertinent part:
>
>> If any assets of the estate are encumbered by mortgage, pledge, lien or other security interest, the personal representative may pay the encumbrance or any part thereof ... whether or not the holder of the encumbrance has presented a claim, if it appears to be for the best interest of the estate.
>
> In the instant case, Fireman's Fund had a security interest in all of T.G.K. and the Knochenhauers rights under contracts, subcontracts, machinery and equipment and contract payments. See Plaintiff's Response to Motion for Summary Judgment and Motion for Summary Judgment at 7. Defendant argues that Fireman's Fund did not have a secured obligation. Defendant's Reply Memorandum at 10. A "security interest" is no more than the right of a creditor to attach and perfect an interest in the property superior to the interest of any other creditor. *First Nat'l Bank of Arizona v. Carbajal*, 132 Ariz. 263, 645 P.2d 778, 783 (1982) (in banc). Fireman's Fund had that right under the security-indemnity agreement. As such, the payment of the encumbrance was allowable under Ariz. Rev. Stat. Ann. § 14-3814 as being in the best interest of the estate.

Estate of Cafaro v. Commissioner, T.C. Memo. 1989-348, allowed a deduction for a claim in part to the extent the estate actually paid. Next, the court determined that the decedent was only a guarantor and not a borrower under certain loans:

> When the claims against the estate are based on the fact that the decedent acted as a guarantor or an accommodation party for the debts of another who has not defaulted, such claims are considered unmatured, potential claims, a secondary rather than a primary liability. *Estate of Theis v. Commissioner*, *supra*, 81 TC at 747-748. Thus, when the decedent is a guarantor for the debts of another, events that occurred after the decedent's death and that affected that secondary liability are considered by the courts. *Estate of Hagmann v. Commissioner*, *supra*, 60 TC at 468; *Estate of DuVal v. Commissioner*, *supra*, 4 TC at 726; *Schiffman v. United States*, 51 F. Supp. 728, 732 (Ct. Cl. 1943). In Illinois, a guaranty contract is extinguished when the primary obligor is released from the liability, since there is no longer any obligation to guarantee. *Rock Island Bank & Trust Co. v. Stauduhar*, 59 Ill. App. 3d 892, 375 N.E.2d 1383, 1389-1390 (1978). Events after the death of the decedent may be considered to determine whether an obligation exists and how much of it can be deducted from the guarantor's estate. *Estate of Du Val v. Commissioner*, *supra*, 4 TC at 726. The reasoning behind this is that if two guarantors to the same note died at the same time and outside events were not considered to determine whether the estate was actually required to pay the claim, both

> guarantors would be able to deduct this same debt from their taxable estates, neither of whom might actually ever pay the claim. *Estate of Du Val v. Commissioner*, *supra*.
>
> With regard to the loans as to which the decedent signed his name along with either Associates Partnership, Ltd. or Executive Centers of America, Inc., petitioner claims that the decedent was the co-maker on the loans rather than the guarantor and so the estate may deduct the full amount of the claim. A guarantor or an accommodation maker is a party who signs an instrument in any capacity for the purpose of lending his name to it. Ill. Rev. Stat. ch. 26, par. 3-415(1) (1965); *Marcus v. Wilson*, 16 Ill. App. 3d 724, 306 N.E.2d 554, 559 (1973). The intent of the parties is the significant factor in determining whether the party is an accommodation party, and if no intent is expressed, the purpose or use of the instrument is a significant element. *Aurora Firefighter's Credit Union v. Harvey*, 163 Ill. App. 3d 915, 516 N.E.2d 1028, 1032 (1987); *Holcomb State Bank v. Adamson*, 107 Ill. App. 3d 908, 438 N.E.2d 635, 638 (1982). When a party receives no direct benefit from the execution of a note, including the fact that the party is not the one to whom the proceeds are given, that party will likely be considered an accommodation party. *Aurora Firefighter's Credit Union v. Harvey*, *supra*; *Godfrey State Bank v. Mundy*, 90 Ill. App. 3d 142, 412 N.E.2d 1131, 1136 (1980). The fact that the party may sign the note where makers normally sign does not mean that the party is not an accommodation party. *Holcomb State Bank v. Adamson*, *supra*.

Then, the court denied a deduction with respect to all loan guarantees that had not been called:

> Since the decedent acted as a guarantor with regard to the three bank loans with respect to which the parties primarily liable had not defaulted, these claims are unmatured, potential claims. We conclude that events after the decedent's death may be considered to determine the validity and enforceability of the claims and how much, if any, may be deducted as a claim against the estate. Although the claims on the above three notes were timely filed in the Probate Court, there is no evidence that any of the primary obligors ever defaulted on the debts and all three notes were paid by someone other than petitioner….

Letter Ruling 9321004 involved the following facts:

> The decedent was the founder, sole shareholder, and president of an incorporated architectural firm specializing in interior design. The decedent's 100 percent stock ownership interest was included in his gross estate for federal estate tax purposes at its date of death value.
>
> On December 31, 1988, the decedent executed a written guaranty, personally guaranteeing payment by the corporation of its obligations under an office lease. The obligations included payments for monthly rent as well as specified taxes and expenses. The landlord was not related to the decedent or his corporation. The guaranty covered four calendar years beginning with 1989. The decedent's liability was not to exceed $150,000 for each of the first two years and $75,000 for each of the second two years. Under the guaranty, the landlord could enforce against the decedent any claim it could enforce against the corporation without first enforcing the claim against the corporation.
>
> On October 1, 1990, the decedent died. At his death, the corporation was solvent and not in default on the lease. However, after the decedent's death, the corporation's

business contracted, and the corporation ceased operations about one year after his death.

Approximately five months after the decedent's death, based on the guaranty, the landlord timely filed a contingent creditor's claim in the local probate court against the decedent's estate. The claim was approved by the estate and allowed by the court. In September 1991, about 11 months after the date of death, the corporation defaulted on the lease. On October 15, 1991, soon after the corporation ceased doing business, the landlord terminated the lease, and subsequently demanded $75,000 from the estate under the guaranty. In December 1991, approximately 14 months after the decedent's death, the estate paid the $75,000.

Letter Ruling 9321004 reasoned and ruled:

> Although there is some divergence among the courts concerning the relevance of post-death events in determining the deductibility of claims against an estate under section 2053(a)(3) of the Code,[1] there seems to be general agreement that post-death events would be taken into account if the claim is "contingent" as of the date of death. *Propstra v. United States*, 680 F.2d 1248 (9th Cir. 1982); *Estate of Cafaro v. Commissioner*, T.C. Memo 1989-348. In *Estate of Cafaro v. Commissioner*, the Tax Court considered the deductibility of claims for debts guaranteed by the decedent for primary obligors who had not defaulted as of the decedent's death. The Tax Court enunciated the following rules concerning decedent-guarantors:
>
>> When the claims against the estate are based on the fact that the decedent acted as a guarantor or as an accommodation party for the debts of another who has not defaulted, such claims are considered unmatured, potential claims, a secondary rather than a primary liability. *Estate of Theis v. Commissioner*, 81 T.C. at 747-748. Thus, when the decedent is a guarantor for the debts of another, events that occurred after the decedent's death and that affected that secondary liability are considered by the courts. *Estate of Hagmann v. Commissioner*, 60 T.C. at 468; *Estate of Du Val v. Commissioner*, 4 T.C. at 726; *Schiffman v. United States*, 51 F.Supp. 728, 732 (Ct. Cl. 1943).
>
> [1] See, generally, *Estate of Van Horne v. Commissioner*, 78 T.C. 728, 736-737 (1982), *aff'd*., 720 F.2d 1114 (9th Cir. 1983), and the cases discussed therein. *Van Horne* held that post-death events are generally not considered in determining the deductibility of an annuity. The Eighth Circuit has found section 2053(a)(3) to require the consideration of post-death events in determining the deductibility of claims against an estate. In *Estate of Sachs v. Commissioner*, 856 F.2d 1158 (8th Cir. 1988), the estate claimed a deduction under section 2053(a)(3) of the Code for an income tax liability owed by the decedent at death which subsequently ceased to exist due to the post-death enactment of retroactive statutory relief. The court held that "an estate loses its [section] 2053(a)(3) deduction for any claim against the estate which ceases to exist legally, regardless of whether the nullification of the claim could have been foreseen." *Id*. at 1161.
>
> The court stated that "the date-of-death principle of valuation does not apply to claims against the estate deducted under [section] 2053(a)(3)." Borrowing from its opinion in *Jacobs v. Commissioner*, 34 F.2d 233 (8th Cir. 1929), *cert. denied*, 280 U.S. 603, the court found that Congress intended the deduction of "actual claims, not theoretical

> ones." Stated the court, "It was, in our opinion, claims presented and allowed or otherwise determined as valid against the estate and actually paid or to be paid that Congress had in mind." *Id*. at 1160.

The court found that because post-death events are to be taken into account and because the estate never paid any amounts pursuant to the guarantee, the estate could not deduct any of the claims based on the guarantee.

In the present case, the decedent died during the second year of the lease, at a time when the corporation was solvent. At his death, under the guaranty, the decedent had a potential liability of $150,000 for calendar year 1990, $75,000 for calendar year 1991, and $75,000 for calendar year 1992. At the time of death, the decedent's estate was subject to a contingent obligation incurred pursuant to a bona fide arm's length contractual arrangement entered into by the decedent prior to his death. Under the guaranty, the decedent's liability was enforceable directly against him if the corporation failed to meet its obligations under the lease. Thus, the estate's post-death payment of its liability under the guaranty was made pursuant to a personal obligation of the decedent existing at the time of his death. As the court explained in *Estate of Cafaro*, post- death events (*i.e.* the default by the primary obligor and payment by the estate) would be taken into account under these circumstances for purposes of section 2053(a)(3) of the Code.

Accordingly, in the present case, the estate may deduct, under section 2053(a)(3) of the Code, the $75,000 it paid as guarantor of the corporation's obligations under the lease reduced by the reasonable value of any right of reimbursement. See Rev. Rul. 84-42, 1984-1 C.B. 194, holding that, if the primary obligor is insolvent and in default when the guarantor's estate pays a claim, the estate can deduct the amount paid reduced by the reasonable value of the right of reimbursement.

Conclusion

The decedent's estate may claim a deduction under section 2053(a)(3) of the Code for the post-death payment of the obligation under the guarantee agreement, even though at the time of the decedent's death the primary obligor had not yet defaulted.

In *Estate of Hendrickson v. Commissioner*, T.C. Memo. 1999-357, the lender never called the guarantee (arising from a loan that morphed from actual to nominal co-borrower), so no deduction was allowed:

As a result of these assumptions by the children (and their spouses), decedent effectively became a guarantor, rather than a co-obligor, with respect to most of the Land Bank loan. Because a guarantor's rights to contribution (or subrogation) are greater than a co-obligor's, it would be inappropriate to determine the value of decedent's contribution rights by reference to the number of obligors on the Land Bank loan. See Estate of *Theis v. Commissioner*, 770 F.2d 981 (11th Cir. 1985) (section 2053 deduction denied in its entirety where decedent was only secondarily liable, because decedent had 100-percent right of contribution from primary debtor), *affg*. 81 T.C. 741 (1983) ….

In *Estate of Theis v. Commissioner*, *supra*, we were required to consider the availability of a deduction for joint and several debt, where the security for the loan was included in

> the decedent's estate. We held that no unpaid mortgage deduction was allowable, because the decedent was in fact a guarantor or accommodation party, rather than a true co-obligor. See *id*. at 748-751.
>
> As noted above, in this case: (1) The children and their spouses expressly assumed most of decedent's share of the Land Bank loan; (2) decedent had rights of contribution (or subrogation) against her co-obligors on the Land Bank loan, but we are unable to determine the value of those rights; (3) petitioner admits that most of the proceeds of the Land Bank loan did not benefit decedent, and there is little evidence that more than a de minimis portion of the proceeds benefited decedent; (4) payments have continued to be made on the Land Bank loan since decedent's death; (5) neither Garry's estate nor decedent deducted the interest on the Land Bank loan; (6) no claims were filed against decedent's estate with respect to the Land Bank loan; and (7) only a small portion of the security for the Land Bank loan was included in decedent's estate.
>
> On the basis of all these facts and circumstances, we hold that petitioner is not entitled to any deduction for the Land Bank loan under section 2053(a)(4), even though a small portion of the security for the loan was included in decedent's estate. See *Estate of Theis v. Commissioner*, supra; *Estate of Courtney v. Commissioner*, *supra*; *cf. Estate of Fawcett v. Commissioner*, 64 T.C. 889 (1975) (Commissioner's determination that one-half of joint and several debt was deductible as an unpaid mortgage was not disturbed); *Estate of Scofield v. Commissioner*, T.C. Memo. 1980-470 (estate's unpaid mortgage deduction, reduced by value of decedent's right of subrogation, held proper where decedent guaranteed secured debt; property securing debt was distributed to decedent's son (the primary debtor) by the estate, subject to the mortgage; and the giving of the guaranty was not a gift).

III.B.1.a.ii.(c). Loan Guarantees Forbidden for IRAs

"Prohibited transaction" includes any direct or indirect "lending of money or other extension of credit" between a plan and a disqualified person.[6271]

If, during any taxable year of an IRA owner, that individual or his beneficiary engages in any prohibited transaction with respect to such account, such account ceases to be an IRA as of the first day of such taxable year.[6272]

III.B.1.a.ii.(d). Income Tax Consequences Involving Loan Guarantees

Generally, a guarantee is not considered to be a payment for income tax purposes. Instead, when the lender forces the guarantor to make a payment, the actual payment is a loan from the guarantor to the borrower.

Guarantees can play a role in certain C corporation debt-equity disputes: C corporation shareholders often prefer to treat advances to the corporation as debt, so that they can extract the money without the extraction constituting a dividend.[6273] This has prompted disputes over whether advances are debt or equity.[6274] Along these lines, a shareholder's guarantee of a corporation's loans may be characterized as a loan to the shareholder followed by the

[6271] Code § 4975(c)(1)(B).
[6272] Code § 408(e)(2)(A). See part II.G.22 IRA as Business Owner, especially fn. 1872.
[6273] See part II.Q.7.h.ii Taxation of Shareholders When Corporation Distributes Cash or Other Property.
[6274] See part II.G.20 Debt vs. Equity; Potential Denial of Deduction for Business Interest Expense.

shareholder's contribution to capital if the corporation is thinly capitalized and the lender looks to the guarantor as the primary source for payment, in which case the corporation's repayment constitutes a distribution to the shareholder that might be taxable as a dividend.[6275] If a corporation is thinly capitalized, the shareholder's payment of the corporation's bank loan pursuant to a guarantee is not deductible as a debt when the loan (really the shareholder's subrogation rights against an insolvent corporation) is more properly characterized as a contribution to capital.[6276]

[6275] *Plantation Patterns, Inc. v. Commissioner*, 462 F.2d 712 (5th Cir. 1972) (*cert. den.* 409 U.S. 1076 (1972)), *aff'g* T.C. Memo. 1970-182. See Bittker & Eustice, *Federal Income Taxation of Corporations & Shareholders* (WG&L), ¶ 4.03[3][f][iii] Borrower identity: guarantees and back-to-back loans, stating in a footnote:

> The leading case on this issue is *Plantation Patterns, Inc. v. Comm'r*, 462 F2d 712 (5th Cir.), *cert. denied*, 409 US 1076 (1972); see also *Casco Bank & Trust Co. v. United States*, 544 F2d 528 (1st Cir. 1976), *cert. denied*, 430 US 907 (1977), and cases cited therein; *In re Lane*, 742 F2d 1311, 1320 (11th Cir. 1984) (guaranties used as substitutes for infusion of more capital). But, for cases treating the corporation as the true debtor, see *J. Paul Smyers*, 57 TC 189 (1971) (fact that bank loan would not have been made without guarantee of shareholder does not, per se, make bank loan equity when corporation is not otherwise thin); *Murphy Logging Co. v. United States*, 378 F2d 222 (9th Cir. 1967) (corporation was not thin in either case); *Falkoff v. Comm'r*, 604 F2d 1045 (7th Cir. 1979) (corporation held to be true borrower); *Intergraph Corp.*, 106 TC 312 (1996), *aff'd*, *121 F3d 723* (11th Cir. 1997) (form of loan was to subsidiary; substance followed form; not a guarantor parent). Compare *Joseph Creel*, 72 TC 1173 (1979), aff'd sub nom. *Martin v. Comm'r*, 649 F2d 1133 (5th Cir. 1981) (on facts at issue, where corporation borrowed funds and loaned proceeds to guarantor shareholders, transactions recast as loan by third party to shareholders). The same issue arises in connection with S corporations, as discussed at ¶ 6.06[4][b]; see, *e.g.*, *Bergman v. United States*, 174 F3d 928 (8th Cir. 1999) .

[6276] *Titmas v. Commissioner*, T.C. Memo. 1995-267; *Peterson v. Commissioner*, T.C. Memo. 1997-377. Bittker & Eustice, ¶ 4.03[3][f][iii] Borrower identity: guarantees and back-to-back loans, Federal Income Taxation of Corporations & Shareholders, explains (footnotes omitted, except for one):

> Use of shareholder-guaranteed corporate loans is sometimes suggested as a method of avoiding the thin capitalization problem. The theory is that if the corporation is organized with a minimum of equity capital and then borrows whatever funds it may need from a bank or other outside lender on notes endorsed by its shareholders, the interest paid by the debtor corporation to the lender should be deductible under § 163 and the repayment of the borrowed funds at maturity should not constitute a dividend to its shareholders. This recommendation of guaranteed loans as a solution to the problems of the thin corporation, however, underestimates the perspicacity of the courts. Just as a bond may not necessarily be a bond, a guarantor may not necessarily be a guarantor, and, for that matter, a lender may not necessarily be a lender. In form, the bank may have lent money to the corporation upon the shareholders' guarantee, but the substance of the transaction may be that the bank made the loan to the shareholders, who in turn passed the funds on to the corporation as—perish the thought—a capital contribution.[172]
>
> If a transaction is recast in this fashion, any payments by the corporation to the bank (whether labeled interest or repayment of loan) serve to discharge obligations of the shareholders to the bank and thus are disguised dividends. If the corporation becomes insolvent, however, the shareholders would suffer capital losses (long-term or short-term, as the case may be) under § 165(g), rather than short-term capital losses under § 166(d) as interpreted by the *Putnam* case. Similarly, where a loan is made by one party to an intermediary party who relends to a borrower that is related to the first lender (a so-called back-to-back loan), regulations may recast such transactions, under appropriate circumstances, in accordance with their true substance, namely, as a direct loan from the first lender to the related borrower.

Footnote 172:

However, that loan treatment does not extend to the S corporation arena for the purpose of creating basis to absorb loss; for that specific purpose, an actual loan and not a mere guarantee is required.[6277] Only when the guarantor pays on the loan is the guarantor considered to have made a loan.[6278]

In the partnership arena, a guarantee does not constitute a liability,[6279] but it can affect how debt is allocated among the partners, because generally debt is allocated according to who bears the economic risk of loss.[6280] For more information, see part II.C.3 Allocating Liabilities (Including Debt), including when a guarantee may be disregarded in allocating liabilities; *Tribune Media Company v. Commissioner*, T.C. Memo. 2021-122, respected a guaranty, concluding:[6281]

> We will not invalidate a collection guaranty simply because the lenders must seek payment from other potential sources before turning to the guarantor. Similarly, we will not invalidate a guaranty because the borrowing entity structured its debt to mitigate the risk of default. An entity may (and is perhaps encouraged to) create a debt structure that maximizes its ability to satisfy the terms of its debt agreements.

When a taxpayer makes a payment to discharge part or all the taxpayer's agreement to act as a guarantor where the agreement provides for a right of subrogation or other similar right against the issuer, treatment as a worthless debt is not allowed until the taxable year in which the right of subrogation or other similar right becomes totally worthless (or partially worthless in the case of an agreement which arose in the course of the taxpayer's trade or business).[6282] Normally, a

The leading case on this issue is *Plantation Patterns, Inc. v. Comm'r*, 462 F2d 712 (5th Cir.), *cert. denied*, 409 US 1076 (1972); see also *Casco Bank & Trust Co. v. United States*, 544 F2d 528 (1st Cir. 1976), *cert. denied*, 430 US 907 (1977), and cases cited therein; *In re Lane*, 742 F2d 1311, 1320 (11th Cir. 1984) (guaranties used as substitutes for infusion of more capital). But, for cases treating the corporation as the true debtor, see *J. Paul Smyers*, 57 TC 189 (1971) (fact that bank loan would not have been made without guarantee of shareholder does not, per se, make bank loan equity when corporation is not otherwise thin); *Murphy Logging Co. v. United States*, 378 F2d 222 (9th Cir. 1967) (corporation was not thin in either case); *Falkoff v. Comm'r*, 604 F2d 1045 (7th Cir. 1979) (corporation held to be true borrower); *Intergraph Corp.*, 106 TC 312 (1996), *aff'd*, 121 F3d 723 (11th Cir. 1997) (form of loan was to subsidiary; substance followed form; not a guarantor parent). Compare *Joseph Creel*, 72 TC 1173 (1979), *aff'd sub nom. Martin v. Comm'r*, 649 F2d 1133 (5th Cir. 1981) (on facts at issue, where corporation borrowed funds and loaned proceeds to guarantor shareholders, transactions recast as loan by third party to shareholders). The same issue arises in connection with S corporations, as discussed at ¶ 6.06[4][b]; see, *e.g.*, *Bergman v. United States*, 174 F3d 928 (8th Cir. 1999).

[6277] See part II.G.4.d.ii.(a) Limitations on Using Debt to Deduct S Corporation Losses, fns. 1203-1204.

[6278] Reg. § 1.1366-2(a)(2)(ii), reproduced in fn. 1203. Reg. § 1.1366-2(a)(2)(iii), Example (4) provides: *Guarantee*. A is a shareholder of S, an S corporation. In 2014, S received a loan from Bank. Bank required A's guarantee as a condition of making the loan to S. Beginning in 2015, S could no longer make payments on the loan and A made payments directly to Bank from A's personal funds until the loan obligation was satisfied. For each payment A made on the note, A obtains basis of indebtedness under paragraph (a)(2)(ii) of this section. Thus, A's basis of indebtedness is increased during 2015 under paragraph (a)(2)(ii) of this section to the extent of A's payments to Bank pursuant to the guarantee agreement.

[6279] Reg. § 1.752-1(a)(4)(i), quoted in part II.C.3.b What Is a "Liability" in fn 396.

[6280] See also Reg. § 1.175-4(b)(2)(iv)(A).

[6281] For an excerpt from the case with a complete discussion, see part II.C.3.c.ii.(a) Permanent Rules Allocating Economic Risk of Loss to Recourse Liabilities.

[6282] Reg. § 1.166-9(e)(2). *Intergraph Corp. v. Commissioner*, 106 T.C. 312, 324 (1996), held:

guarantor's payment on a debt will be deductible,[6283] either as a business bad debt[6284] or non-business bad debt. Bad debt deductions apply only where the taxpayer received reasonable consideration for making the guarantee and provides that consideration received from a spouse or other defined family member must be direct consideration in the form of cash or property.[6285]

When a guarantor becomes primarily liable on a debt and that debt is later forgiven, the forgiveness does not constitute cancellation of indebtedness income.[6286] That's because merely providing the guarantee does not increase the guarantor's assets.[6287] If a taxpayer who

---

> Section 1.166-9(a), (d), and (e)(2), Income Tax Regs., properly read, stands for the proposition that where a guarantor does have rights of subrogation and reimbursement from the original debtor (regardless of whether or not these rights are expressly stated in the guaranty agreement), the provisions of section 1.166-9(e)(2), Income Tax Regs., apply, and the guarantor is not entitled to a bad debt deduction until the rights of subrogation and reimbursement are shown to be worthless. See *Howell v. Commissioner*, 69 F.2d 447, 451 (8th Cir. 1934), *affg.* 22 B.T.A. 140 (1931); *Martin v. Commissioner*, 52 T.C. 140, 143 (1969); *Rietzke v. Commissioner*, 40 T.C. 443, 451 (1963), *affd.* 424 F.2d 1368 (9th Cir. 1970); *Bradford v. Commissioner*, 22 T.C. 1057, 1069 (1954), *revd.* on other issues 233 F.2d 935 (6th Cir. 1956); *Standard Oil Co. v. Commissioner*, 7 T.C. 1310, 1323 (1946), *supplemented by* 11 T.C. 843 (1948).

[6283] See Blattmachr and Zaritsky, Is the BDIT Ready for Primetime? *Probate Practice Reporter* (University of South Carolina School of Law, ISBN 1044-7423), Sept. 2012.

[6284] For a debt to be a business bad debt, it needs to be incurred in connection with the taxpayer's trade or business; furthermore, to be engaged in a trade or business, an individual must be involved in an activity with continuity and regularity, and the primary purpose for engaging in the activity must be for income or profit. *Alpert v. Commissioner*, T.C. Memo. 2014-70 (sustaining accuracy-related penalties when taxpayer could not produce credible evidence of the above).

[6285] Reg. § 1.166-9(e); *Lair v. Commissioner*, 95 T.C. 35 (1990) (imposing penalties for deducting loss on guarantee of family member's obligation in light of that regulation).

[6286] *Mylander v. Commissioner*, T.C. Memo. 2014-191, reasoning:

> Under the guaranty petitioners were secondary obligors as to the Murray debt because they were obligated to pay the debt only if the Ledbetters—the primary obligors—defaulted. See *Restatement 3d*, Suretyship & Guaranty, sec. 1 (1996). When the Ledbetters defaulted, a cause of action against petitioners accrued to Mr. Murray which led to the State court judgment against petitioners and the subsequent covenant not to execute. Under the State court judgment, as well as the covenant not to execute, petitioners' secondary obligation became a primary obligation. See *Chevron Chem. Co. v. Mecham*, 536 F.Supp. 1036, 1043 (D. Utah 1982) (Default on the primary contract by the debtor ripens an unconditional guaranty into an actionable liability of the guarantor separate and apart from that of the principal debtor. The guarantor's obligation becomes absolute and is no longer secondary[.]).
>
> Petitioners argue that even if they had become primary obligors on the Murray debt, they did not realize any COD income when the remaining debt was forgiven because they did not receive the benefit of the non-taxable proceeds from the loan obligation. We agree with petitioners.

[6287] *Mylander v. Commissioner*, T.C. Memo. 2014-191, reasoning:

> Even though petitioners had become primary obligors under the guaranty, their situation remained similar to those of the taxpayers in *Hunt* and *Landreth*. We observed in *Landreth v. Commissioner*, 50 T.C. at 813, that where the guarantor is relieved of his contingent liability *** because of a release given him by the creditor, no previously untaxed accretion in assets thereby results in an increase in net worth. See also *Hunt v. Commissioner*, T.C. Memo. 1990-248, 59 T.C.M. (CCH) at 649-650 (quoting *Landreth v. Commissioner*, 50 T.C. at 813).
>
> We do not see any material difference between the situation in *Landreth* and one in which a guarantor's contingent liability has ripened into a primary liability. Unlike a debtor who borrows funds, a guarantor who assumes a contingent liability does not receive an untaxed accretion of assets which is accompanied by an offsetting obligation to pay. This remains the case even after the guarantor becomes a primary obligor because of the debtor's default. Regardless of whether

intended to be a guarantor mistakenly signs loan documentation as the primary obligor and the taxpayer never received the loan proceeds, never made payments, and never was looked to for payments, the taxpayer is recognized as a mere guarantor and does not realize income when the loan is forgiven.[6288] A cash basis guarantor who issues a note to the lender does not thereby make a deductible payment.[6289]

> the guarantor is a secondary obligor or has become a primary obligor, when the debt is discharged the guarantor's net worth is not increased over what it would have been if the original transaction had never occurred. *Landreth v. Commissioner*, 50 T.C. at 813.
>
> Petitioners did not receive any untaxed accretion of assets when they gave the guaranty. Nor did they receive any untaxed accretion of assets with respect to the guaranty when they later became primarily liable on the Murray debt as a result of the State court judgment. Therefore, when the remaining debt was forgiven petitioners did not realize an untaxed increase in wealth any more than had they remained secondary obligors.[14]
>
> [14] Respondent argues that, pursuant to our decision in *Hahn v. Commissioner*, T.C. Memo. 2007-75, petitioners received an accession to wealth upon the discharge of the remaining debt. We find that *Hahn* is distinguishable because in that case the taxpayer was a debtor, not a guarantor, and received untaxed loan proceeds. *Id.*, slip op. at 2.

The court concluded:

> Petitioners were initially secondary obligors on the Murray debt, under the terms of the guaranty. They did not receive any valuable consideration in exchange for the guaranty. Upon the Ledbetters' default, and the subsequent State court judgment and covenant not to execute, petitioners became primarily liable on the Murray debt. However, at no point did they receive an untaxed accretion of assets with respect to the guaranty. Accordingly, we find that, when the remaining debt was forgiven by Mr. Murray in 2010, petitioners did not have an accession to wealth and did not realize any COD income.

[6288] *Bullock v. Commissioner*, T.C. Memo. 2017-219, relying on the testimony of the taxpayer of her daughter-in-law (one of the intended borrowers), reasoned:

> When petitioner went to the car dealership, she did not intend to be the primary obligor on the loan. In fact, she did not realize until trial that she had signed paperwork stating otherwise. She did not intend to personally repay the loan, and she made no payments on the loan. See *Monon R.R. v. Commissioner*, 55 T.C. 345, 357 (1970) ("The intent of the parties, in turn, may be reflected by their subsequent acts[.]"). The credit union also understood that petitioner intended only to be a cosigner; it was aware that petitioner's son and daughter-in-law were responsible for the loan payments, and it never looked to petitioner for repayment. See *id* . Without an intention for petitioner to repay the debt, there was no bona fide primary obligation between petitioner and the credit union. See *PepsiCo P.R., Inc. v. Commissioner*, T.C. Memo. 2012-269, at *55, *88-*91 (emphasizing the lack of intent to create a repayable obligation as a factor in holding that no debt existed).
>
> Instead, petitioner, with the knowledge of the credit union, essentially operated as a guarantor for her son and daughter-in-law. Petitioner was merely promising to be responsible for her son and daughter-in-law in the event they failed to make the loan payments; she made no payments on the loan, and she never used the truck.
>
> Because petitioner was merely the secondary obligor, her net worth was not "increased over what it would have been if the original transaction had never occurred." See *Mylander v. Commissioner*, at *18, *22 (holding that the taxpayers did not receive COD income for a debt that they had become primary obligors on via a guaranty (citing *Landreth v. Commissioner*, 50 T.C. at 813)). When the truck loan was forgiven, petitioner did not realize an untaxed increase in wealth. See *id*. at *23. Therefore, petitioner did not receive $8,164 in cancellation of debt income...

PepsiCo P.R., Inc. v. Commissioner is quoted extensively in the text accompanying fn. 1839 in part II.G.20 Debt vs. Equity; Potential Denial of Deduction for Business Interest Expense.

[6289] *Helvering v. Price*, 309 U.S. 409 (1940), following *Eckert v. Burnet*, 283 U.S. 140 (1931), which held:

Factors determining whether a corporation may deduct guarantee fees paid to shareholders include: the fees must be reasonable,[6290] businesses of the same type and size as the payor corporation must customarily pay guarantor fees to their shareholders, shareholders must demand compensation in exchange for signing on as guarantors, the payment of guarantor fees suggests a constructive dividend if the corporation's profitability enabled it to pay a dividend and yet no dividends were paid out during the relevant tax year, and the courts give consideration to the proportional relationship between the amount of the payments and the shareholders' stock ownership.[6291] In deciding the deductibility of guaranty fees paid to a shareholder employee, courts consider:[6292]

> The facts of the transaction concerned were that the petitioner and his partner were joint endorsers of notes issued by a corporation that they had formed. There remained due upon these notes $44800, that the corporation was unable to pay. In 1925 the petitioner and his partner in settlement of their liability made a joint note for that sum to the bank that held the corporation's paper, received the old notes, marked paid, and destroyed them. The petitioner claims the right to deduct half that sum as a debt "ascertained to be worthless and charged off within the taxable year" under the Revenue Act of 1926, c. 27, § 214(a)(7), 44 Stat. 9, 27 (26 USCA § 955(a)(7).
>
> It seems to us that the Circuit Court of Appeals sufficiently answered this contention by remarking that the debt was worthless when acquired. There was nothing to charge off. The petitioner treats the case as one of an investment that later turns out to be bad. But in fact it was the satisfaction of an existing obligation of the petitioners, having, it may be, the consequence of a momentary transfer of the old notes to the petitioner in order that they might be destroyed. It is very plain we think that the words of the statute cannot be taken to include a case of that kind. We do not perceive that the case is bettered by the fact that some of the original notes years before were given for property turned over to the corporation by the partnership that formed it. For the purpose of a return upon a cash basis there was no loss in 1925 . As happily stated by the Board of Tax Appeals the petitioner "merely exchanged his note under which he was primarily liable for the corporation's notes under which he was secondarily liable, without any outlay of cash or property having a cash value." A deduction may be permissible in the taxable year in which the petitioner pays cash. The petitioners says that it was definitely ascertained in 1925 that the petitioner would sustain the losses in question . So it was, if the petitioner ultimately pays his note. So was the tax considered in *United States v. Mitchell*, 271 U.S. 9, 12, 46 S.Ct. 418, 70 L.Ed. 799, but it could not be deducted until it was paid.

[6290] Bittker & Lokken, ¶ 79.4. Loans or Advances, *Federal Taxation of Income, Estates, and Gifts* (WG&L), when discussing Code § 482 implications of interest paid between related companies,

> A related issue, which has not been directly litigated in the United States, is arm's length pricing of fees for guaranteeing a related person's debt. See *General Elec. Capital Canada Inc. v. Queen*, 2009 TCC 563 (Tax Court of Canada 2009); Breen, Evaluating the Arm's-Length Price of Financial Guarantees; A Review of the OECD Framework, 59 Tax Notes Int'l 869 (Sept. 13, 2010); Hales, Robinson, Axelsen & Ielceanu, Determining Arm's-Length Guarantee Fees, 39 Tax Mgmt. Int'l J. 445 (2010); Stewart, Officials Engage Practitioners on Pricing of Guarantee Fees, 127 Tax Notes 770 (May 17, 2010). See also Horst, How to Determine Tax-Deductible, Debt-Related Costs For a Subsidiary, 62 Tax Notes Int'l 589 (May 16, 2011); Miller, Federal Income Tax Consequences of Guarantees: A Comprehensive Framework for Analysis, 48 Tax Law. 103 (1994).

[6291] *Seminole Thriftway, Inc. v. U.S.*, 42 Fed. Cl. 584 (1999), after discussing *Tulia Feedlot, Inc. v. U.S.*, 513 F.2d 800, 804 (5th Cir. 1975); *Olton Feed Yard, Inc. v. U.S.*, 592 F.2d 272 (5th Cir. 1979); *Tulia Feedlot, Inc. v. U.S.*, 3 Cl. Ct. 364 (1983); and *Fong v. Commissioner*, T.C. Memo. 1984-402. *A.A. and E.B. Jones Co. v. Commissioner*, T.C. Memo. 1960-284, approved fees for guaranteeing surety bonds that were required to do business when the taxpayers proved that the payments were usual and were comparable to others in somewhat similar circumstances.

[6292] *E.J. Harrison and Sons, Inc. v. Commissioner*, T.C. Memo. 2003-239, citing:

(1) Whether, given the financial risks, the fees are reasonable in amount;

(2) whether businesses of the same type and size as the payor must customarily pay guarantor fees to shareholders;

(3) whether the shareholder demanded compensation for the guaranty;

(4) whether the payor had sufficient profits to pay a dividend, but failed to do so; and

(5) whether the purported guaranty fees were proportional to stock ownership.

Clary Hood, Inc. v. Commissioner, T.C. Memo. 2022-15, reasoned and held:

> Petitioner's justification for Mr. Hood's higher compensation for the years at issue includes Mr. Hood's debt guaranties and surety bond guaranties during the review period. Guaranty fees may qualify as a deductible business expense under section 162(a). See *R.J. Nicoll Co. v. Commissioner*, 59 T.C. at 51-52; *A.A. & E.B. Jones Co. v. Commissioner*, T.C. Memo. 1960-284. This Court has taken into account some of the following considerations when deciding the deductibility of such fees paid to a shareholder-employee: (1) whether the fees were reasonable in amount given the financial risks; (2) whether businesses of the same type and size as the payor customarily pay such fees to shareholders; (3) whether the shareholder-employee demanded compensation for the guaranty; (4) whether the payor had sufficient profits to pay a dividend but failed to do so; and (5) whether the purported guaranty fees were proportional to stock ownership. *E.J. Harrison & Sons, Inc. v. Commissioner*, 2003 WL 21921049, at *14; *Fong v. Commissioner*, T.C. Memo. 1984-402, *aff'd without published opinion*, 816 F.2d 684 (9th Cir. 1987).
>
> The record shows that it is customary for the owners of construction companies to guarantee debts and bonds, and that compensation for these guaranties is appropriate.

See *Olton Feed Yard, Inc. v. United States*, 592 F.2d 272, 275-276 (5th Cir. 1979); *Tulia Feedlot, Inc. v. United States*, 513 F.2d 800, 803-806 (5th Cir. 1975); *Fong v. Commissioner*, T.C. Memo. 1984-402, *affd*. without published opinion 816 F.2d 684 (9th Cir. 1987); *Seminole Thriftway, Inc. v. United States*, 42 Fed. Cl. 584, 589-590 (1998) (the guaranty fee cases).

The court held:

> Mrs. Harrison's loan guaranties represented one of her principal contributions to petitioner. They did not, as in the no-fee cases, merely supplement her performance of substantial managerial activities on petitioner's behalf. Therefore, we find those cases to be inapposite. Rather, we find that the factors utilized in the guaranty fee cases are properly suited to the task of determining what amount, if any, may be considered reasonable compensation for Mrs. Harrison's personal guaranties. Because (1) Mrs. Harrison was willing to issue the guaranties without compensation, (2) there is no evidence that businesses of the same type and size as petitioner customarily paid guarantor fees to shareholders, (3) petitioner had sufficient profits to pay dividends, but failed to do so, and (4) the evidence does not establish what amount, if any, would constitute reasonable compensation for her guaranties, we find that Mrs. Harrison's guaranties do not support the characterization of any amount she received from petitioner as reasonable compensation. Instead, we view the shareholder guaranties in this case as a means of protecting the shareholders' ownership interests in petitioner, not as a function of their employment by petitioner. See *Olton Feed Yard, Inc. v. United States*, 592 F.2d at 275-276 (stating that employee-shareholders' willingness to guaranty, without charge, the corporate employer's debt is evidence that such individuals "signed the guaranties in order to protect and enhance their investment in the corporation").

> Further, respondent's expert witness, Mr. Fuller, found that the compensation petitioner paid to Mr. Hood in the years at issue for his surety bond guaranties was reasonable.[28] We recognize that Mr. Hood historically did not seek compensation for the guaranties and petitioner had sufficient profits to pay a dividend during the years at issue; however, we place more weight on the customary nature and reasonableness of the fees.
>
> > [28] Mr. Fuller distinguishes the surety bond guaranties from the debt guaranties. He concluded that no compensation should have been issued with respect to the debt guaranties because petitioner also lent money and extended credit to Mr. Hood and his other businesses during the years at issue.

(Above we are focusing on compensating a shareholder for financial risk. For compensating a shareholder for services performed, see part II.A.1.b C Corporation Tactic of Using Shareholder Compensation to Avoid Dividend Treatment.)

When a savings and loan association engaged in the financing of residential mortgages, established a "pool" of mortgages, all of which are insured by the Federal Housing Administration, the Farmers Home Administration, or are insured or guaranteed by the Veterans Administration, those who bought an interest in the mortgages[6293] may deduct the servicing, custodian, and guarantee fees under Code § 162 or 212.[6294]

Code § 102 (no income on a gift) trumps Code § 61(a)(2) (discharge of indebtedness is income income).[6295]

III.B.1.a.iii. Gift of Services

The gift tax applies to gifts of property, not services. Before *Dickman*, the courts generally concluded that the gift tax only applied to transfers of title or interest in property. This is clearly no longer true, considering how the court chose to define "property": "[It] is more than just the physical thing – the land, the bricks, the mortar – it is also the sum of all the rights and powers incident to ownership of the physical thing. Property is composed of constituent elements and of these elements the right to *use* the physical thing to the exclusion of others is the most essential and beneficial."[6296]

[6293] Rev. Rul. 84-10 treated the pools as multiple owner grantor trusts, presumably having in mind the rules discussed in part II.D.4.a Investment Trusts, which is part of part II.D.4 Disregarding Multiple Owner Trust for Income Tax Purposes. Rev. Rul. 84-10 noted:

> The Service has discussed the federal income tax consequences of similar pooling arrangements in Rev. Rul. 71-399, 1971-2 C.B. 433, amplified by Rev. Rul. 81-203, 1981-2 C.B. 137, Rev. Rul. 80-96, 1980-1 C.B. 317, Rev. Rul. 74-300, 1974-1 C.B. 169, Rev. Rul. 74-221, 1974-1 C.B. 365, and Rev. Rul. 72-376, 1972-2 C.B. 647 (concerning mortgage pools established by the Federal Home Loan Mortgage Corporation); Rev. Rul. 70-544, 1970-2 C.B. 6, and Rev. Rul. 70-545, 1970-2 C.B. 7, both modified by Rev. Rul. 74-169, 1974-1 C.B. 147 (concerning mortgage pools guaranteed by the Government National Mortgage Association); and Rev. Rul. 77-349, 1977-2 C.B. 20 (concerning a mortgage pool created by a commercial bank).

[6294] Rev. Rul. 70-544.

[6295] *Helvering v. American Dental*, 318 U.S. 322 (1943) (interpreting predecessors to these statutes); *Bosse v. Commissioner*, T.C. Memo. 1970-355 (not citing *Helvering v. American Dental* but rather determining the gratuitous nature of the forgiveness).

[6296] *Dickman*, 465 U.S. at 336, quoting *Passailaigue v. U.S.*, 224 F.Supp 682, 686 (M.D. Ga. 1963).

A pre-*Dickman* case held that donating one's own services does not create gift tax liability relating to the value or profits derived from those services.[6297] "The taxpayer is not under any duty to cultivate the fruits of his capital (or labor) and will not be taxed as if he had when he hasn't."[6298] Also, *Dickman* states that the gift tax is an excise tax on transfers of property.[6299] *Dickman* did not address gifts of services.

The IRS ruled that a timely waiver of fees for serving as executor was neither income to, nor a gift by, the executor, reasoning:[6300]

> The crucial test of whether the executor of an estate or any other fiduciary in a similar situation may waive his right to receive statutory commissions without thereby incurring any income or gift tax liability is whether the waiver involved will at least primarily constitute evidence of an intent to render a gratuitous service. If the timing, purpose, and effect of the waiver make it serve any other important objective, it may then be proper to conclude that the fiduciary has thereby enjoyed a realization of income by means of controlling the disposition thereof, and at the same time, has also effected a taxable gift by means of any resulting transfer to a third party of his contingent beneficial interest in a part of the assets under his fiduciary control. See [Revenue Rulings 56-472 and 225] and the authorities therein cited, as well as section 25.2511-1(c) of the Gift Tax Regulations.
>
> The requisite intention to serve on a gratuitous basis will ordinarily be deemed to have been adequately manifested if the executor or administrator of an estate supplies one or more of the decedent's principal legatees or devisees, or of those principally entitled to distribution of decedent's intestate estate, within six months after his initial appointment as such fiduciary, with a formal waiver of any right to compensation for his services. Such an intention to serve on a gratuitous basis may also be adequately manifested through an implied waiver, if the fiduciary fails to claim fees or commissions at the time of filing the usual accountings and if all the other attendant facts and circumstances are consistent with a fixed and continuing intention to serve gratuitously. If the executor or administrator of an estate claims his statutory fees or commissions as a deduction on one or more of the estate, inheritance, or income tax returns which are filed on behalf of the estate, such action will ordinarily be considered inconsistent with any fixed or definite intention to serve on a gratuitous basis. No such claim was made in the instant case.

Commentators generally agree that, if the service provider clearly establishes intent not to charge for services before the service provider earned compensation income, then gratuitously rendering services will not constitute a gift, because no property has been transferred.

For services generating property interests benefitting donees, see part III.B.1.a.v Sending Business or Performing Services.

[6300] Rev. Rul. 66-167, followed *Breidert v. Commissioner*, 50 T.C. 844 (1968) (executor's commission was claimed on estate tax return but was still deemed not income when executor refused to pay himself), Rev. Rul. 70-237, and Letter Ruling 7846049. *Breidert v. Commissioner* was distinguished in *O'Connell v. Commissioner*, T.C. Memo. 1980-432.

III.B.1.a.iv. Family Partnerships

III.B.1.a.iv.(a). Gift/Estate Tax Uses and Issues Regarding Family Partnerships

Generally, my materials do not cover valuation disputes, annual exclusion issues, or Code § 2036 cases. Code § 2036 causes estate inclusion when a decedent retained the right to income from or certain other rights to property that the decedent transferred except in a bona fide sale for adequate and full consideration in money or money's worth.[6301] The Tax Court seems to employ a smell test when evaluating partnerships or other arrangements that generate significant discounts from the net asset (fair market) value of the entity's underlying assets.[6302]

[6301] For a very brief summary of this issue and how using an S corporation instead of a partnership can avoid the issue, see fns. 91-92 in part II.A.2.d.i Benefits of Estate Planning Strategies Available Only for S Corporation Shareholders.
[6302] For example, see *Cahill* and related cases regarding intergenerational split dollar arrangements, described in part II.Q.4.f.v Estate Tax Consequences of Split-Dollar Agreements.

However, a decedent's rights over distributions from a Massachusetts business trust[6303] did not implicate Code § 2036(a)(2)[6304] or 2038.[6305]

[6303] The official Tax Court syllabus of *Estate of Cohen v. Commissioner*, 79 T.C. 1015 (1982), described:

Over a period of about 28 months ending some 4 years prior to his death, the decedent transferred all of his common shares and 7,350 of his 7,500 preferred shares in a Massachusetts real estate trust to his children, grandchildren, and great-grandchildren. The primary function of the trust was to lease a store facility to the corporate retail business operated by the decedent and his three sons. The decedent and his sons were the trustees of the trust when the transfers were made and at all times thereafter until the death of the decedent. *Held*: The discretion accorded the trustees in the trust agreement in respect of the declaration and payment of annual dividends on the common and preferred shares was not unlimited under State law; it was conditioned at least upon a good-faith exercise of bona fide business judgment. Accordingly, in view of the substantial similarity between this real estate trust and a corporation, the trustees' dividend power did not constitute a "right" to designate possession or enjoyment of the income of the shares. *United States v. Byrum*, 408 U.S. 125 (1972), followed.

[6304] The court held:

In view of the perceived limitations on the dividend power in the trust agreement in question, and the apparent willingness of the Massachusetts courts to hold business trustees to a fair standard of conduct,[3] we conclude that the decedent and his sons did not have the power to withhold dividends arbitrarily. Thus, they did not have an "ascertainable and legally enforceable" right to shift income between the classes of shareholders, and the dividend power does not require inclusion of either the common or preferred shares in the decedent's estate under section 2036(a)(2). We think *Byrum* is controlling.[4]

[3] Moreover, we think that the Massachusetts courts would be even more alert to look into the existence of business judgment of the trustees where the exercise of the trustees' discretion might operate to the disadvantage of one group of beneficiaries in favor of another group.

[4] The facts in this case make it a much weaker one for the Government than *Estate of Gilman v. Commissioner*, 65 T.C. 296 (1975), *affd*. 547 F.2d 32 (2d Cir. 1976). By reason of the unusual facts there presented, a sharp division arose within this Court. The dissenters were of the view that the decedent had retained the actual enjoyment of the transferred shares which made section 2036(a)(1) applicable. However, there was no disagreement between the majority and the dissenters as to the applicability of *Byrum* under sec. 2036(a)(2), and in view of the reliance by the majority upon *Byrum* in respect of both subsections (a)(1) and (a)(2), the controlling effect of *Byrum* in the present case follows *a fortiori* from *Gilman*. Here, there is no contention whatever that the decedent retained actual enjoyment of the transferred shares. Indeed, the record shows that he had long ceased to exercise any meaningful control over the enterprise, and that it had, in fact, reached the point where it had largely surpassed his comprehension. His role was primarily of a ceremonial nature without any real exercise of business control or even any significant participation in the business, which was, in fact, being run by his three sons.

The Government also contends that the power of the trustees to redeem the preferred shares at par value is a right to designate enjoyment under section 2036(a)(2). It is stipulated, however, that fair market value of these shares was equal to their par value at the decedent's death, and we fail to see how enjoyment of the shares would be diminished by the payment of fair market value in exchange therefor. This would simply give the beneficiary more freedom of action in respect of the transferred property, while section 2036 is designed to draw into the estate property of which the decedent has in some way kept control. The Government's contention must be rejected.

[6305] The court held:

The 1970 amendment which created the two classes of shares in no way purported to change the alteration provision or the termination provision, and in the absence of any persuasive indications to the contrary, we think that the amendment must be construed to leave intact such critical rights. A fair construction of the amended agreement is that the absence of a vote for the

In *Estate of Clyde W. Turner, Sr. v. Commissioner*, 151 T.C. No. 10 (2018), the Code § 2207B right of recovery regarding estate tax on Code § 2036 assets prevented that estate tax from reducing the marital deduction.[6306]

preferred shareholders is meant to exclude them from participation in the regular business affairs of the trust, but that their consent must nevertheless be obtained in respect of such fundamental matters as alteration of the agreement and termination of the trust. And this construction is consistent with the language of the amendment, which states that "The beneficial interests of the cestuis que trustent shall be represented by transferable shares which shall consist of two classes." Thus, the two classes of shares *together* represent the "cestuis que trustent," and these are the same "cestuis que trustent" whose consent is required. Therefore, even after 1790, the agreement could be altered or the trust terminated only with the consent of "all parties having an interest." Because these provisions appear to add nothing to the rights of the parties under Massachusetts law (see *Ryan v. McManus*, 323 Mass. 221, 80 N.E.2d 737, 742 (1948); *Commissioner of Corporations, Etc. v. Second Nat. Bank*, 308 Mass. 1, 30 N.E.2d 889, 895 (1941)),[5] section 2038 is rendered inapplicable here by section 20.2038-1(a)(2), Estate Tax Regs., quoted supra.[6]

[5] These Massachusetts decisions were concerned with regular trusts rather than realty trusts. Nevertheless, they seem particularly relevant here, because the Mezuries shares were transferable and in each of these cases the Supreme Judicial Court stressed the connection between the assignability of beneficial interests and the power of the beneficiaries to alter or terminate the trust. For example, in *Commissioner of Corporations, Etc. v. Second Nat. Bank*, the court stated (30 N.E.2d at 895):

> "The power conferred by law upon the beneficiaries acting together to terminate or modify the trust is closely analogous with respect to each beneficiary, to the power of such beneficiary to assign his interest in the trust estate."
>
> See also *Ryan v. McManus*, 80 N.E.2d at 742.

[6] Even if the Government were correct in its interpretation of the amended trust agreement, so that the consent of only the holders of the common shares was required in order to alter the agreement or terminate the trust, the common shares transferred by the decedent in 1970 would in any event be excluded from his gross estate by reason of sec. 20.2038-1(a)(2), Estate Tax Regs.

[6306] The court held:

Under section 2036 the gross estate includes the values of the section 2036 assets that Clyde Sr. transferred during his lifetime. The fact that property that might otherwise go to the surviving spouse would be used to pay the estate tax liabilities attributable to the section 2036 assets does not compel a conclusion that the marital deduction must be reduced. The estate is entitled to recover from the recipients of section 2036 assets during Clyde Sr.'s lifetime an amount equal to the liability attributable to the section 2036 inclusion that the estate pays. That recovery will enable the estate to distribute to the surviving spouse property value undiminished by the tax payments. Section 20.2056(b)-4(c), Estate Tax Regs., does not require a different result when the Federal estate and State death taxes have no effect upon the net value distributable to the surviving spouse. See, *e.g.*, *Estate of Gill v. Commissioner*, T.C. Memo. 2012-7 (marital deduction not reduced where marital deduction property does not bear the economic burden of the tax). Accordingly, we hold that the estate need not reduce the marital deduction by the amount of Federal estate and State death taxes it must pay because the tax liabilities are attributable to the section 2036 assets, the estate has the right to recover the amount paid under section 2207B, and the estate must exercise that right to recover to give effect to Clyde Sr.'s intention that Jewell receive her share of the estate undiminished by the estate's tax obligations. Respondent makes an additional argument that focuses on the interest owed on the Federal estate tax liability. Respondent contends that under section 20.2056(b)-4, Estate Tax Regs., the estate tax interest expense is a transmission expense,[11] and therefore it reduces the residue and correspondingly reduces the marital deduction. However, under section 2207B(c), "[i]n the case

When a partner receives a capital account (or increases an existing capital account) by the fair market value of contributed assets (as is required by the regulations under Code § 704(b)),[6307] the contribution to the partnership is not a gift.[6308] However, if the partnership's income and loss are not proportionate to capital accounts, see parts III.B.7.b Code § 2701 Overview and III.B.7.c Code § 2701 Interaction with Income Tax Planning.

Any part of the discussion below that relates to preferred partnership is subject to part III.B.7.b Code § 2701 Overview when considering how to structure a preferred return so that the preferred return is given effect for gift tax purposes (including whether a sale is for adequate and full consideration). Note, however, that using a preferred partnership may help avoid Code § 2036.[6309]

One problem with sales to irrevocable grantor trusts[6310] is that neither the growth nor the value of the asset at the time of the sale receives a basis step-up at death; the same issue applies to gifts. Considerable growth is required for the estate tax savings to make up for the income tax benefits lost due to the lack of a basis step up.[6311] See part II.H Income Tax vs. Estate and Gift Tax (Particularly for Depreciable Property). One way to obtain a basis step-up on the value of the gift or sold asset at the time of the transfer is to retain a preferred partnership interest and transfer the common interest.[6312]

III.B.1.a.iv.(b). Income Tax Aspects of Family Partnerships

Numerous provisions in part II Income Tax Flexibility discuss partnership income taxation generally. For an operating business, a robust structure is described in part II.E Recommended Structure for Entities. See also part II.Q.8.a Partnership as a Master Entity.

---

of penalties and interest attributable to the additional taxes described in subsection (a), rules similar to the rules of subsections (a) and (b) [of section 2207B] shall apply." Accordingly, the amount that the estate is entitled to recover from the section 2036 asset recipients includes applicable interest.

[11] Sec. 20.2056(b)-4(d)(1)(ii), Estate Tax Regs., defines estate transmission expenses as "expenses that would not have been incurred but for the decedent's death and the consequent necessity of collecting the decedent's assets, paying the decedent's debts and death taxes, and distributing the decedent's property to those who are entitled to receive it."

[6307] See part II.C.7 Maintaining Capital Accounts, especially fn. 500.

[6308] *Estate of Jones v. Commissioner*, 116 T.C. 121, 128 (2001), holding:

> The contributions of property in the case at hand are similar to the contributions in *Estate of Strangi* and are distinguishable from the gifts in *Shepherd*. Decedent contributed property to the partnerships and received continuing limited partnership interests in return. All of the contributions of property were properly reflected in the capital accounts of decedent, and the value of the other partners' interests was not enhanced by the contributions of decedent. Therefore, the contributions do not reflect taxable gifts.

[6309] For the scope of this possible protection, see fns 2209-2211 in part II.H.11.a Basics of Preferred Partnerships.

[6310] See part III.B.2.a Tax Basis Issues within part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.

[6311] See Stacy Eastland's materials at the 2015 Heckerling Institute on Estate Planning.

[6312] See part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.

Code § 704(e) was amended in 2015;[6313] now:

- If a partnership interest is created by gift, the donee's distributive share is includible in the donee's gross income, except to the extent that the share is determined without allowance of reasonable compensation for services that the donor rendered to the partnership, and except to the extent that the portion of that share attributable to donated capital is proportionately greater than the donor's share attributable to the donor's capital.[6314] In applying this rule, "an interest purchased by one member of a family from another shall be considered to be created by gift from the seller, and the fair market value of the purchased interest shall be considered to be donated capital."[6315]

- Regarding a capital interest in a partnership in which capital is a material income-producing factor, whether a person is a partner with respect to that interest is determined without regard to whether such interest was derived by gift from any other person.[6316]

Before these amendments, the following analysis applied:

Suppose a parent real estate entrepreneur makes a capital contribution to become the general and managing partner of a family partnership. The children all make capital contributions, as limited partners, in amounts greater than or equal to the parent's. The lion's share of the capital necessary to finance the project is borrowed from banks, presumably on the basis of the parent's good credit and standing in the financial community. If the transaction succeeds, the banks are paid back and the children are rewarded in proportion to their capital contributions. If the transaction fails, however, the banks and the parent, as general partner, are left holding the bag. This scenario is similar in some respects to *Carriage Square, Inc. v. Commissioner*.[6317]

In *Carriage Square*, the father, through his corporation, Carriage Square, Inc., contributed funds to a partnership (10% of total funds), while five trusts, for the benefit of his wife and children, each contributed the remainder (90%). The father became the general partner, while the trusts became limited partners. The father would then purchase land with borrowed money and sell the land to the partnership, with the partnership borrowing the necessary capital from the same bank on a guarantee by the father. The partnership would also take out a construction loan,

---

[6313] RIA's history provides [some punctuation added]:

> In 2015, P.L. 114-74, Sec. 1102(b)(1), deleted para. (e)(1), and redes. paras. (e)(2) and (e)(3) as paras. (e)(1) and (e)(2), respectively. P.L. 114-74, Sec. 1102(b)(2), substituted this subsection for this section in para. (e)(2) (as redes. by Sec. 1102(b)(1)). P.L. 114-74, Sec. 1102(b)(3), substituted Partnership Interests Created by Gift for Family Partnerships the heading of subsec. (e), effective for partnership tax. yrs. begin. after 12/31/2015.
>
> Prior to deletion, para. (e)(1) read as follows:
>
> (1) *Recognition of interest created by purchase or gift*. A person shall be recognized as a partner for purposes of this subtitle if he owns a capital interest in a partnership in which capital is a material income-producing factor, whether or not such interest was derived by purchase or gift from any other person.

[6314] Code § 704(e)(1), which further provides, The distributive share of a partner in the earnings of the partnership shall not be diminished because of absence due to military service.

[6315] Code § 704(e)(2), which further provides:

> The family of any individual shall include only his spouse, ancestors, and lineal descendants, and any trusts for the primary benefit of such persons.

[6316] Code § 761(b).

[6317] 69 T.C. 119 (1977).

again guaranteed by the father. Once the real estate development became successful, the five trusts received 90% of the profits.

The *Carriage Square* majority held that the borrowed capital was not a material income-producing factor.[6318] Code § 704(e)(1), a non-exclusive safe harbor, stated that a person shall be recognized as a partner for income tax purposes if he or she owns a capital interest in a partnership in which capital is a material income-producing factor, whether or not such interest was derived by purchase or gift from any other person. However, whether capital is a material income-producing factor in a partnership is for the fact finder to determine on a case-by-case basis. Essentially, the court believed the bank would not have loaned the money to capitalize the venture without the secured guarantees by the father.

The court held that the partnership was a sham designed to transfer tax-free income streams to the children. Because capital was not a material income producing factor, Code § 704(e)(1) did not apply. Also, the court held, the partners did not have a valid business purpose for forming the partnership, considering the 90% share of profits the trusts earned in light of their limited capital contributions and consequential limited risk (since they did not guarantee the loans). Because the partnership could borrow whatever amounts it needed based on the guarantees by the father, their capital contributions were not material. Further, because the father, through the general partner corporation, performed all the services necessary to operate the business, assumed all the risk of business failure, and used his contacts and community goodwill to secure the loans, the court held that the trusts were not partners.[6319] Judge Tannenwald, in his dissent, instead of discounting the partnership interests of the trusts, raised the specter of the trusts' partnership interests having been acquired by gift under Code § 704(e)(2).[6320]

A family partnership in which capital is not a material income-producing factor may still be recognized as a valid entity and the persons within it as valid partners under the *Culbertson* standard.[6321] Partners must show they had a good faith business motive for entering into the partnership. However, for income tax purposes, failure to satisfy Code § 704(e)(1) would preclude the partnership from passing the *Culbertson* hurdle.[6322]

Commentators have long questioned the *Carriage Square* holding.[6323] The case, as the Tax Court admitted, was an egregious example of tax avoidance.[6324]

For income tax purposes, Reg. § 1.704-1(e)(3)(i)(a) appears to respect allocating a preferred return to the donor but not allocating a preferred return to a donee:

[6318] The court believed that Reg. § 1.704-1(e)(1)(i) prohibited the borrowed capital from being considered as an income producing factor because it was not contributed by a partner. *Id*. at 127. The production of income by a partnership is attributable to the capital or services, or both, contributed by the partners. Reg. § 1.704-1(e)(1). Here, the capital was guaranteed by a non-partner, the father.

[6320] *Carriage Square, Inc. v. Commissioner*, 69 T.C. 119, 140-41.
[6321] *Commissioner v. Culbertson*, 337 U.S. 733 (1949).
[6322] Howard Zaritsky, ¶ 10.09 The Family Partnership Rules, *Tax Planning for Family Wealth Transfers: Analysis With Forms*.
[6323] W. McKee, W. Nelson, R. Whitmire*, Federal Taxation of Partnerships and Partners*, ¶ 14.02 (3rd ed. 1997) (stating that establishing a recognizable capital interest is less onerous under Code § 704(e)(1) and Reg. § 1.704-1(e)(1)(iv) than *Carriage Square* believes).
[6324] *Carriage Square, Inc. v. Commissioner*, 69 T.C. 119, 131.

> Where a capital interest in a partnership in which capital is a material income-producing factor is created by gift, the donee's distributive share shall be includible in his gross income, except to the extent that such share is determined without allowance of reasonable compensation for services rendered to the partnership by the donor, and except to the extent that the portion of such distributive share attributable to donated capital is proportionately greater than the distributive share attributable to the donor's capital. For the purpose of section 704, a capital interest in a partnership purchased by one member of a family from another shall be considered to be created by gift from the seller, and the fair market value of the purchased interest shall be considered to be donated capital. The "family" of any individual, for the purpose of the preceding sentence, shall include only his spouse, ancestors, and lineal descendants, and any trust for the primary benefit of such persons.

Letter Ruling 9808010 included (highlighting added):

> We conclude that the family limited partnership's allocations will satisfy the requirements of section 704(e)(2) if the donors' distributive shares of partnership income represent an equal or greater proportion of the total partnership income (computed without reduction for guaranteed payments) than the donors' capital represents of the total partnership capital. For this purpose, the donors' distributive shares of partnership income include guaranteed payments (as defined in section 707(c) and section 1.707-1(c)) that the donors are required to include in income for the taxable year and the donors' allocable shares (under section 704(b), but not section 704(c)) of the partnership's net income for the taxable year.

III.B.1.a.v. Sending Business or Performing Services

Code § 2501 taxes "the transfer of property by gift." Reg. § 25.2501-1(a)(1) also taxes only "transfers by gift of property." When a donor provides services – whether working full-time or merely sharing business connections – does that work constitute earning income and transferring the property earned from those services or is merely allowing the donee the opportunity to earn income herself/himself from her/his own exploitation of the opportunity or wise investment of her/his own assets? Merely rendering services is discussed in part III.B.1.a.iii Gift of Services. Part of the discussion below views certain employment benefits as merely incidental to working, along the lines of part III.B.1.i Transfers with Contingencies Based on Acts of Independent Significance; you will find below that this area involves a continuum, and where a situation falls sometimes is a judgment call on which experts may differ reasonably.

The first two subparts below describe cases in chronological order, and the final subpart evaluates the principles:

- III.B.1.a.v.(a) Purely Shifting Business Opportunities
- III.B.1.a.v.(b) Property Transfer Clearly Tied to Services
- III.B.1.a.v.(c) Evaluating the Continuum

III.B.1.a.v.(a). Purely Shifting Business Opportunities

In *Crowley v. Commissioner*, 34 T.C. 333, 345-47, *acq.* 1961-2 C.B. 4, a father owned a savings and loan. In addition to the traditional sources of income, the business generated income by means of appraisal fees, insurance fees, and title commissions. He created a partnership for his four children to handle these ancillary income streams for the S&L. One son was trained as an appraiser and insurance agent, handling the S&L's appraisal and insurance needs. The profits from this work were shared between the S&L and the partnership. The Tax Court held that the income was all taxable to the partnership and not to the father. Having determined that no income was attributable to the father, the court held that there were no gift tax issues.

The son could not have obtained the amount of appraisal work he did without the aid of his father. This was a business opportunity that the son (and his siblings) had not earned on the basis of individual ability. One author suggested that such nepotism would be extraordinarily difficult to tax and the IRS does not regularly pursue it.[6325]

With a slight nod to *Crowley*, the income tax case *Alabama-Georgia Syrup Co. v. Commissioner*, 36 T.C. 747, 767 (1961), *acq.* 1962-2 C.B. 3 held:

> It is a fair inference that Louis directed business to suppliers for whom Katherine was broker, but this fact does not require a conclusion that the income from the brokerage commissions was in substance that of [Louis' corporation].

Bross Trucking, Inc. v. Commissioner, T.C. Memo. 2014-107, held that:

- Lack of non-compete precluded corporate goodwill regarding owner-officer's relationships.
- Owner's sons developed relationships with owner's customers when owner shut down owner's business due to regulatory hassles and sons started new corporation.
- Workforce intangible not deemed transferred when only 50% of the employees of the old corporation worked for the new corporation.

For a detailed analysis of *Bross Trucking*, see part II.Q.7.h.v Taxpayer Win in *Bross Trucking* When IRS Asserted Corporation Distribution of Goodwill to Shareholder Followed by Gift to Shareholder of New Corporation (2014).

Also see *Estate of Adell v. Commissioner*, T.C. Memo. 2014-155 (lack of non-compete precluded corporate goodwill regarding owner-officer's relationships; customers did business with owner's son because they trusted the son personally; son was qualified to run the business), part of a line of cases discussed in part II.Q.1.c.iii Does Goodwill Belong to the Business or to Its Owners or Employees?

However, paying a commission for doing nothing is a gift. Rev. Rul. 81-54 analyzed the gift implications of a DISC, which is a sham corporation expressly authorized for income tax purposes to reduce the tax rate on exports. Rev. Rul. 81-54 involved the following facts:

[6325] Gingiss, The Gift of Opportunity, 41 *DePaul L. Rev* 395, 410 (1991-1992).

> Corporation M, a domestic manufacturing business, was organized in 1972. All of M's stock has been continuously owned in equal shares by individuals A, B, and C. M sells one-half of its products outside the United States.
>
> In January 1978, the three shareholders of M formed a DISC in order to maximize the profitability of export sales transactions by M. A, B, and C each transferred $1,000 in cash to the DISC in exchange for equal shares of the stock of the DISC. Immediately thereafter, A, B, and C made gifts of all of their DISC stock to three irrevocable trusts created for the benefit of their respective minor children. Each of the spouses of A, B, and C was designated as sole trustee of the trust for their respective children. The trustees of the three trusts were given full power to deal with the trust assets as if they owned those assets outright.
>
> After the DISC stock was transferred to the trust, M and the DISC agreed in writing that the DISC would be the exclusive agent of M with respect to all export sales of M products. Under the terms of the agreement, the DISC is to be paid a commission for each export sales transaction. The amount of the commission on each sale is stated in the agreement to be the "maximum amount permitted under the intercompany pricing rules of section 994 of the Internal Revenue Code."
>
> The agreement requires that all commissions on sales of M products during a taxable year of the DISC be paid to the DISC within 30 days after the end of that taxable year. The agreement provides that it shall terminate immediately at the will of either party. Upon termination, a final payment of all outstanding obligations between M and the DISC is to be made.
>
> The taxable year of the DISC ends on December 31. The DISC performed no significant services.

Rev. Rul. 81-54 reasoned:

> In the present case, the three shareholders of M made gifts of the shares of the DISC stock when they transferred the shares to the trusts for their respective children. The value of the transferred DISC stock was equal to the value of the underlying assets of the DISC on the date of the stock transfers.
>
> Transactions completed pursuant to the written agreement resulted in a continuing transfer of a portion of M's income to the trust beneficiaries via the DISC commission arrangement. This transfer of income is not in the ordinary course of business under section 25.2512-8 of the regulations. The creation of the DISC by A, B, and C was founded on a valid business purpose in view of the income tax advantages generally associated with the formation of DISCs. However, under these facts, the transfer of M's income to the DISC, and thus, indirectly to the trust beneficiaries, as a result of the trust's ownership of the DISC stock, was not required in the course of M's business and had no valid business purpose in regard to M.
>
> M's retained right to unilaterally terminate the agreement with the DISC makes any transfer of commission that the DISC may receive from future transactions incomplete until the transactions take place. Upon completion of each transaction, the owners of M no longer retain any dominion and control over the payment of commissions to the DISC, because under the agreement, the DISC is entitled to a commission on each sale.

> Therefore, under section 25.2511-2 of the regulations, discussed above, the donor's gifts occur as each transaction through the DISC is completed. The measure of the gift is the amount transferred to the DISC on each sale.

Rev. Rul. 81-54 held:

> (1) A, B, and C each made taxable gifts of shares in the DISC to the trusts created for their children upon the transfer of those shares. The value of each donor's gift is the aliquot portion of the DISC's asset value at the date of transfer.
>
> (2) A, B, and C have made and will continue to make gifts of profits that would otherwise flow to M in the absence of the agreement with the DISC. These gifts occur each time M sells its products by way of the DISC. See section 25.2511-1(h)(1) of the Gift Tax Regulations. The gifts continue as long as the agreement is in effect. The total value of the gifts by each donor is one-third of the amount transferred to the DISC on each sale.
>
> Holdings (1) and (2) above would be the same if the contract between the DISC and M had been entered into prior to the transfer of the DISC stock to the trust.

To avoid gift tax consequences, a DISC should have the same owners as the exporter. Also, a DISC should not be owned by an IRA.[6326]

Although a DISC is a statutory sham, generally income tax principles require one who earns profits to pay the tax on those profits.[6327] Is presenting a person with an opportunity to earn money the same thing as assigning those earnings? *Hospital Corp. of America*, 81 T.C. 520, 588-590 (1983) (Code § 367 income tax case):

> Respondent's argument is that since petitioner could have executed the contract itself or designated any of its domestic subsidiaries to execute the contract, its choice of having LTD negotiate, execute, and perform the contract is in substance the transfer of property by petitioner to LTD which required an advance ruling. Respondent specifically argues that HSP, Inc., a domestic subsidiary that performed other management contracts, could have been selected by petitioner to perform this contract.
>
> Respondent then asserts that petitioner's "indisputable control" over the execution of the contract requires the conclusion that execution of the contract in the name of LTD was the transfer of the contract to LTD. We have answered respondent's argument in *Crowley v. Commissioner*, 34 T.C. 333, 345 (1960), where we stated: "There is a difference between being in a position to control who shall perform the activities which produce the income and being in a position to control … who shall receive income after it is produced, and we think that distinction is basic in this case." Petitioner's control in organizing and designating LTD to negotiate, execute, and perform the KFSH management contract is not the same as control over who shall receive the income after it is earned.

[6326] See text accompanying fns 1874-1882 in part II.G.22 IRA as Business Owner.
[6327] See generally part II.Q.6.e Assignment of Income on Property Being Sold.

> We are satisfied that LTD negotiated and executed the contract and later performed the contract, but with substantial assistance from petitioner….
>
> Petitioner, in presenting LTD with an opportunity to enter into a contract, did not transfer any legally enforceable contractual or other right to LTD. Instead, in discovering this business opportunity and making it available to LTD, petitioner simply performed a service for which it is entitled to reasonable compensation. [footnote omitted] We therefore hold that petitioner did not transfer any property to LTD…

III.B.1.a.v.(b). Property Transfer Clearly Tied to Services

Rev. Rul. 68-334 addressed "whether the value of the amount received under a group term life insurance policy is includible in an employee's gross estate for Federal estate tax purposes under each of the situations discussed herein." It reasoned and held:

> In determining whether the decedent possessed an incident of ownership in the policy, consideration must be given to the effect of State or other applicable law. See section 20.2042-1(c)(5) of the regulations. The decedent's rights in the policy are generally determined by local insurance or property laws.
>
> The insurance laws of most States require that an employee have the right to convert his group insurance into individual insurance within a specified time after termination of his employment. The conversion privilege is a safeguard for the insured and cannot be deleted from the policy. Moreover, as a provision required by statute it cannot be waived by mutual consent of the parties to the contract, unsupported by consideration. See *Thomas Satery v. Great American Reserve Insurance Co.*, 278 S.W. 2d 377 (1955).
>
> The application of section 2042 of the Code to amounts received under group term life insurance policies is illustrated by three factual situations, as follows:
>
> *Situation 1*. The decedent at the time of his death was insured for 50x dollars under a group term life insurance policy wholly paid for by his employer. Neither the group term policy nor State law gives the employee the right to convert his group insurance into individual insurance upon termination of his employment. The policy provides that each employee's coverage ceases upon termination of his employment. The employee makes an irrevocable assignment of his insurance under the group policy.
>
> The value of the proceeds of the policy is includible in the gross estate of the insured employee since he had the power to cancel the insurance by terminating his employment, and any power to effect such a cancellation is an incident of ownership with respect to the policy. See section 20.2042-1(c)(2) of the regulations. It is also evident that the assignee of the policy had no means of preventing a termination of the decedent's employment from causing a loss of such assignee's interest in the policy and thus effectively controlling its ultimate disposition.
>
> *Situation 2*. The decedent at the time of his death was insured for 50x dollars under a group term life insurance policy wholly paid for by his employer. As required by State law, the employee is granted under the terms of the policy the right to convert his group insurance into individual insurance upon termination of his employment. Both the policy and State law permit absolute assignment of the group insurance including the conversion privilege. The policy provides that coverage under the group policy shall

cease upon termination of employment. The employee makes an irrevocable assignment of his insurance under the group policy, but retains the conversion privilege.

The value of the proceeds of the group term life insurance is includible in the gross estate of the insured. The decedent has effectively retained the power to control the disposition of the insurance through an exercise of the conversion privilege upon any termination of his employment and has thus retained an incident of ownership with respect to the policy. If either the group policy or local law prohibits an assignment of the conversion privilege, the same result follows notwithstanding any purported assignment of the conversion privilege.

Situation 3. The facts are similar to those in *Situation 2*, in that both the group policy and the State law permit the employee to make an absolute assignment of all of his incidents of ownership in the policy. The policy provides that coverage thereunder shall cease upon termination of employment. Upon such termination of the insured's employment, the assignee acting alone could convert to a 50x dollar individual policy. The employee made an irrevocable assignment of all of his incidents of ownership in the policy, including the conversion privilege. The insured could not have effected cancellation of the insurance coverage by terminating his employment. Consequently, the insured decedent did not die possessed of any incidents of ownership in the policy.

No part of the value of the proceeds of the group insurance is includible in the insured's gross estate under section 2042 of the Code. Under the circumstances, the assignee's right to the amount of the group term coverage could not have been defeated by any action within the control of the assignor.

Rev. Rul. 72-307 held:

Revenue Ruling 69-54 holds that the decedent's power to cancel the insurance coverage solely by terminating his employment is an incident of ownership in the policy that requires inclusion of the value of the proceeds in his gross estate under section 2042 of the Code.

An insured's power to cancel his insurance coverage by terminating his employment is a collateral consequence of the power that every employee has to terminate his employment. The examples in section 20.2042-1(c) of the regulations, on the other hand, concern powers that directly affect the insurance policy or the payment of its proceeds without potentially costly related consequences. Where the power to cancel an insurance policy is exercisable only by terminating employment, it is not deemed to be an incident of ownership in the policy.

Accordingly, it is held that under the circumstances of Situation 1 of Revenue Ruling 69-54, the value of the proceeds of the group insurance is not includible in the insured's gross estate under section 2042 of the Code.

Revenue Ruling 69-54 is hereby modified.

Estate of Smead v. Commissioner, 78 T.C. 43 (1982), reasoned and held:

In determining whether the decedent possessed incidents of ownership with respect to the policy, the relevant question is whether decedent had the capacity to do something to affect the disposition of the proceeds if he had so wanted. *United States v. Rhode Island Hospital Trust Co.*, 355 F.2d 7, 11 (1st Cir. 1966). As that case points out, however, we must look primarily to the “policy facts” (the rights given in the insurance contract) rather than the “intent facts” (the insured’s subjective intentions) in making that determination.[8] And we must also keep in mind that “The very phrase ‘incidents of ownership’ connotes something partial, minor, or even fractional in its scope. It speaks more of possibility than of probability.” 355 F.2d at 10. It is the existence of even a “fractional” power, not the probability of its exercise, that controls. *Schwager v. Commissioner*, 64 T.C. 781, 791 (1975). Some of the “fractional” powers not listed in the pertinent estate tax regulations that have been held to constitute an “incident of ownership” include the power to prevent a change of beneficiary by withholding his written consent (*Schwager v. Commissioner*, *supra*) and the power to select an optional mode of settlement and thereby vary the time and manner in which the insurance proceeds will be paid (*Estate of Lumpkin v. Commissioner*, 474 F.2d 1092 (5th Cir. 1973), *revg.* 56 T.C. 815 (1971); *but compare Estate of Connelly v. United States*, 551 F.2d 545 (3d Cir. 1977)).

[8] Of course, a strict application of the so-called policy facts doctrine may be inappropriate in a case where the terms of the insurance policy have been impacted by the terms of a property settlement agreement and a State court order in such a fashion that the policy rights are effectively removed from the insured. See *Estate of Beauregard v. Commissioner*, 74 T.C. 603 (1980).

However, if the “fractional” power possessed by the insured is contingent upon an event over which the insured has no control, it does not constitute an incident of ownership in the policy. *Estate of Smith v. Commissioner*, 73 T.C. 307 (1979). In Smith, the insured was given the right, in the event the employer stopped paying the premiums, to prevent cancellation of a policy on his life by purchasing the policy from his employer for the policy’s cash surrender value. We held that decedent did not possess any incidents of ownership with respect to the insurance policy, because any rights he may have had were contingent upon an event over which he had no control. Similarly, in Estate of *Beauregard v. Commissioner*, 74 T.C. 603 (1980), any power the insured might have possessed under the terms of the policy to change beneficiaries had been effectively removed under local law by the property settlement agreement and local court order directing the insured to name his minor children as his beneficiaries. We held that the insured possessed no incident of ownership in the policy at the time of his death. We so held even though there was a possibility, once the children reached their majority or upon the occurrence of other specified events, that the insured might regain the right to name beneficiaries under the policy. That contingency of course had not occurred at the time of the insured’s death. In both Smith and Beauregard, the insured’s purported rights in the policy were entirely too contingent or remote to constitute incidents of ownership possessed by the decedent at the time of his death. It is in this context that we must consider the right of decedent here to convert his group policy into an individual policy upon termination of his employment.

We start from the premise that there is no incident of ownership where the insured has only the right to be covered by insurance, with the proceeds payable to a beneficiary selected by the employer. *Estate of Beauregard v. Commissioner*, 74 T.C. at 608. The only right decedent had was the right, given by the policy and by local State law, to convert his group policy to an individual insurance policy.[9] That right was thus contingent upon the termination of his employment. Termination could occur either at the complete discretion of his employer or by decedent's voluntary action. Decedent had no control over the former, but he did control the voluntary termination of his employment. Petitioner argues, however, that decedent did not possess at his death any incident of ownership because he did not possess an immediately exercisable right to convert and that all decedent possessed at death was a "contingent option to purchase insurance." Petitioner further argues that the contingency decedent did control, voluntary termination of his employment, is an act so detrimental to the insured because of the potential adverse economic consequences that it is not the type of right that warrants inclusion of insurance proceeds in decedent's gross estate. We agree.

[9] Although the group policy was silent as to decedent's right to assign any rights under the group policy, including the conversion privilege, the Michigan State law gave him the right to assign:

Mich. Comp. Laws sec. 500.4439 (Mich. Stat. Ann. 24.14439 (Callaghan 1972)). [Group Life Policy; assignment of rights; validity; effect; intent of section.] SEC. 4439. A person whose life is insured under a group insurance policy may, subject and pursuant to the terms of the policy, or pursuant to an arrangement between the insured, the employer and the company, assign (other than to the employer) all or any part of his incidents of ownership, rights, title and interests, both present and future, under such policy including specifically, but not by way of limitation, the right to designate and redesignate a beneficiary or beneficiaries thereunder, the right to make any requisite contributions to maintain the insurance in force, and the right to have an individual policy issued to him in case of termination of employment. Such an assignment by the insured, made either before or after the effective date hereof, is valid for the purpose of vesting in the assignee, in accordance with any provisions included therein as to the time at which it is to be effective, all of such incidents of ownership, rights, title and interests so assigned, but without prejudice to the company on account of any payment it may make or individual policy it may issue prior to receipt of notice of the assignment. This section is not intended to alter the law of this state but is intended only to confirm in express statutory form the law as it exists presently.

Respondent no doubt agrees that decedent had the right to assign, and would agree that if decedent had made an irrevocable assignment of all his incidents of ownership in the group policy, including the conversion privilege, the insurance proceeds would not be includable in his gross estate. See situation 2 of Rev. Rul. 69-54, 1969-1 C.B. 221. Decedent did not make any assignment in this case.

While the right to assign is an incident of ownership (sec. 20.2042-1(c)(2), Estate Tax Regs.), that feature alone is not sufficient for inclusion in decedent's gross estate in this case. The right to assign rights under a policy constitutes a substantive incident of ownership only if one or more of the rights which may be assigned constitute incidents of ownership. Thus, if the conversion privilege was not an incident of ownership, the right to assign it would not be an incident of ownership either. See *Estate of Lumpkin v. Commissioner*, 56 T.C. 815, 828 (1971), *revd. on other grounds*, 474 F.2d 1092 (5th Cir. 1973).

This same argument has been made before in a similar context involving the right to surrender or cancel an insurance policy. The right to surrender or cancel an insurance policy is, in both the legislative history of the predecessor of section 2042(2) and in the pertinent estate tax regulations, plainly stated to be an incident of ownership. However, where the only way the insured can surrender or cancel a policy is by quitting his job, that is not considered to be an incident of ownership. While respondent at one time argued that the right to quit one's job and thereby effect cancellation of a group life insurance policy was an incident of ownership possessed by the insured,[10] the courts did not agree and respondent has since changed his position in that regard. *Estate of Beauregard v. Commissioner*, *supra* at 608; *Estate of Lumpkin v. Commissioner*, *supra* at 825, *revd. on other grounds* 474 F.2d 1092 (5th Cir. 1973); *Landorf v. United States*, 187 Ct. Cl 99, 408 F.2d 461 (1969); Rev. Rul. 72-307, 1972-1 C.B. 307, modifying situation 1 in Rev. Rul. 69-54, 1969-1 C.B. 222.

[10] See *Commissioner v. Treganowan*, 183 F.2d 288, 293 (2d Cir. 1950), *revg.* 13 T.C. 159 (1949), and situation 1 in Rev. Rul. 69-54, 1969-1 C.B. 221.

In *Landorf v. United States*, *supra*, the Court of Claims held that a decedent's right to cancel an insurance policy by terminating his employment was not an incident of ownership within the meaning of section 2042(2). The court stated "we do not believe that Congress intended to include the power to terminate employment, a right which everyone can exercise at any time, to be an 'incident of ownership' in property simply because the property involved is somehow related to the employment." 187 Ct. Cl. At 112, 408 F.2d at 469.

Respondent has also recognized that an insured's "power to cancel his insurance coverage by terminating his employment is a collateral consequence of the power that every employee has to terminate his employment" and has ruled that possession of that power does not require inclusion of life insurance proceeds in the insured's gross estate. Rev. Rul. 72-307, 1972-1 C.B. 307, 308. The ruling contrasts termination of employment with the examples of incidents of ownership in section 20.2042-1(c)(2) of the Estate Tax Regulations that concern powers that "directly affect the insurance policy or the payment of its proceeds *without potentially costly related consequences*." (Emphasis added.) Termination of employment carries with it potentially adverse economic consequences. Respondent now agrees that where the power to cancel an insurance policy is exercisable only by terminating employment, it is not deemed to be an incident of ownership in the policy. Yet respondent argues here that the power to exercise a conversion privilege, which is exercisable only by terminating employment, should be treated as an incident of ownership in the policy. We disagree.

Respondent would have us distinguish Rev. Rul. 72-307, because it deals strictly with the power to cancel insurance by terminating employment. We are not willing to draw that distinction. With respect to cancellation of insurance, respondent has conceded that a power that would otherwise unquestionably be considered a taxable incident of ownership (the power to cancel insurance) does not so qualify where the power can only be exercised by quitting one's job. If quitting one's job is too high a price to pay for the right to cancel an insurance policy, it is likewise too high a price to pay for the right to convert to another policy.

Assuming that the conversion privilege can ever be a power that directly affects the group insurance policy or the payment of its proceeds, i.e., the type of power that respondent considers to be an incident of ownership in the group policy, the conversion privilege can only be exercised by termination of one's employment. We think that such voluntary termination of employment, the only power within the control of the decedent in this case, cannot be said to be "without potentially costly related consequences." We

> conclude that the conversion privilege that decedent could exercise or control only by quitting his job was entirely too contingent and too remote to be considered an incident of ownership possessed by the decedent at the time of his death. *Estate of Smith v. Commissioner*, *supra*; *Estate of Beauregard v. Commissioner*, *supra*. Therefore, the proceeds of the group life insurance policy are not properly includable in decedent's gross estate under section 2042(2).

Rev. Rul. 84-130 modified Situation 2 of Rev. Rul. 69-54, addressing, "If a decedent transferred all the incidents of ownership in a noncontributory group-term life insurance policy on decedent's life, but retained the right to convert the policy to an individual policy should the decedent cease employment, are the proceeds includible in the decedent's gross estate under section 2042(2) of the Internal Revenue Code?" based on the following facts:

> D died in March 1982. At the time of death, D was employed by Y Corporation which made all the payments on a group term life insurance policy on D's life. Under the terms of the policy, D owned all the incidents of ownership. In 1977, D transferred all the ownership rights to A. However, D retained the right to convert the policy to an individual policy in the event D's employment with Y was terminated.

Rev. Rul. 84-130 reasoned and held:

> Section 2042(2) of the Code provides that the value of the gross estate includes the value of proceeds from insurance policies on the life of the decedent receivable by beneficiaries other than the executor where the decedent possessed incidents of ownership in the policy exercisable either alone or in conjunction with any other person.
>
> Section 20.2042-1(c)(2) of the Estate Tax Regulations provides that the term "incidents of ownership," in general, means the right of the insured or the insured's estate to the economic benefits of the policy. Examples of incidents of ownership include the power to change the beneficiary, to surrender or cancel the policy, to assign the policy, to revoke an assignment, to pledge the policy for a loan, and to obtain from the insurer a loan against the surrender value of the policy.
>
> These examples contained in section 20.2042-1(c)(2) of the regulations concern powers that directly affect the insurance policy rather than powers that are collateral consequences of potentially costly related actions of the decedent. An example of a power exercisable only as a result of potentially costly related action, and thus not an incident of ownership for purposes of section 2042(2) of the Code, is the power to cancel a group-term policy by termination of employment. That power of cancellation is considered a collateral consequence of the power that every employee has to terminate employment. See, Rev. Rul. 72-307, 1972-1 C.B. 307; see also, Rev. Rul. 82-5, 1982-1 C.B. 131. Similarly, a power to convert a group-term policy that is exercisable only by the voluntary termination of employment is a collateral consequence of a potentially costly action. That is, as is the case in Rev. Rul. 72-307, the power to convert is a collateral consequence of the power that every employee has to terminate employment.
>
> Although termination of employment may occur either at the complete discretion of the employer or by the decedent's voluntary action, for purposes of section 2042(2) of the Code, the Service will not distinguish between conversion rights exercisable upon voluntary termination of employment and such rights exercisable upon involuntary termination.

Accordingly, the insurance proceeds payable to A under the group insurance policy are not includible in D's gross estate because D's retained conversion privilege is not an incident of ownership for purposes of section 2042(2) of the Code. The Service acquiesces in the result in the decision in *Estate of Smead v. Commissioner*, 78 T.C. 43 (1982), which held that a retained conversion privilege exercisable only on termination of employment was not an incident of ownership. See page 2, this Bulletin.

HOLDING

If a decedent transferred all the incidents of ownership in a noncontributary group-term life insurance policy on the decedent's life, but retained the right to convert the policy to an individual policy should the decedent's employment be terminated, the proceeds are not includible in the decedent's gross estate under section 2042(2) of the Code.

EFFECT ON OTHER REVENUE RULINGS

The holding of Situation 2 of Rev. Rul. 69-54, 1969-1 C.B. 221, is modified to hold that a conversion privilege exercisable only in the event of the termination of employment is not an incident of ownership for purposes of section 2042(2) of the Code.

Agreeing to perform services in exchange for the recipient transferring property to the service provider's child constituted a gift from the service provider to the child. *Dodge v. United States*, 443 F.Supp. 535 (D. Or. 1977). Similarly, Reg. § 1.61-22(c)(2)(ii) provides that split-dollar life insurance[6328] benefits received by an irrevocable trust created by an employee constitute compensation to the employee and a gift from the employee to the trust.

DiMarco v. Commissioner, 87 T.C. 653, 656-663 (1986), explained:

The only issue for decision in this case is whether the present value of the survivors income benefit that is payable by IBM to Joan M. DiMarco is an adjusted taxable gift within the meaning of section 2001... Thus, the survivors income benefit that is payable by IBM to Joan M. DiMarco is an adjusted taxable gift within the meaning of section 2001 only if it is also a taxable gift within the meaning of section 2503 that was made by decedent after December 31, 1976.

We begin our analysis by noting that it is unclear precisely what respondent argues in this case. On brief, he proposes that we adopt as an ultimate finding of fact that "Decedent made a completed gift of the Survivor's Benefit to unnamed beneficiaries upon the commencement of his employment on January 9, 1950." Two pages later in the same brief he argues that "the transfer should be treated as a completed gift in 1979." In the statutory notice of deficiency and the stipulation of facts, respondent appears to take the position that decedent actually made a completed gift of the survivors income benefit at the time of his death in 1979. Respondent finally attempts to clarify his position by stating in his reply brief that it is his "position that the gift of the Survivor's Benefit occurred in 1950 and the inability to value said gift requires … [respondent] to treat the gift as complete on the date of death when the gift finally became subject to valuation."

After reviewing carefully respondent's briefs, the statutory notice of deficiency, and the stipulation of facts, it appears to us that respondent is making two arguments in this

[6328] Part II.Q.4.f Split-Dollar Arrangements.

case. First, it appears that respondent argues that decedent made a completed transfer of a property interest in the survivors income benefit for gift tax purposes on January 9, 1950, but that because the interest could not be valued at that time, it was necessary to treat the transfer as an open transaction and to value the transferred property and impose the gift tax on the date of decedent's death, when the property interest finally became subject to valuation. In the alternative, respondent appears to argue that decedent made an incomplete transfer of a property interest in the survivors income benefit for gift tax purposes on January 9, 1950, because the property interest could not be valued at that time, but that the transfer became complete on November 16, 1979, when decedent died, because the transferred property could then and for the first time be valued.

Petitioner argues, for a variety of reasons, that decedent never made a taxable gift of the survivors income benefit. Petitioner argues that decedent never owned a property interest in the survivors income benefit that he was capable of transferring. Petitioner further contends that, even if decedent owned such an interest, he never transferred it, and if he did transfer it, he never did so voluntarily. Petitioner also asserts that transfers of property cannot become complete for gift tax purposes upon the death of the donor, and that decedent never made a completed transfer of any property interest he may have owned in the survivors income benefit before his death because he always had the power to revoke the transfer, if any was made, simply by resigning his employment with IBM. Petitioner finally argues that, if the decedent made a taxable gift of the survivors income benefit, he did so before December 31, 1976, and that such a gift does not qualify as an adjusted taxable gift within the meaning of section 2001. For the reasons set forth below, we find for petitioner.

Section 2501(a)(1) imposes a tax on the "transfer of property by gift." Section 2511(a) provides that the tax "shall apply whether the transfer is in trust or otherwise, whether the gift is direct or indirect, and whether the property is real or personal, tangible or intangible." However, a transfer of property qualifies as a taxable gift only if the transfer is complete, and a transfer is complete for gift tax purposes only when the transferor relinquishes dominion and control over the transferred property. Sec. 25.2511-2(b), Gift Tax Regs.; *Estate of Sanford v. Commissioner*, 308 U.S. 39, 42-43 (1939). At the time the transfer is complete, the transferred property must be valued. Sec. 2512(a). This value is then used in determining the gift tax that is due. Sec. 2502.

Respondent argues that decedent transferred a property interest in the survivors income benefit for gift tax purposes on January 9, 1950. This transfer was either complete or incomplete for gift tax purposes. If the transfer was complete, we have little difficulty in disposing of this case because a completed transfer would have been a taxable gift that was made by decedent before December 31, 1976, and section 2001 expressly defines an adjusted taxable gift as a taxable gift that was made after December 31, 1976. On the other hand, if the transfer was incomplete for gift tax purposes, we do not believe that it became complete or that we can deem that it became complete at the time of decedent's death.[7]

[7] Respondent does not assert that the transfer became complete for gift tax purposes at any time other than Jan. 9, 1950, or Nov. 16, 1979.

Section 25.2511-2(f), Gift Tax Regs., provides that -

> The relinquishment or termination of a power to change the beneficiaries of transferred property, *occurring otherwise than by the death of the donor (the statute being confined to transfers by living donors)*, is regarded as the event that completes the gift and causes the tax to apply…. [Emphasis added.]

We believe that this regulation precludes our finding in this case that the alleged transfer of property by decedent on January 9, 1950, became complete for gift tax purposes by reason of decedent's death.

We recognize, of course, that respondent does not assert in this case that the alleged transfer on January 9, 1950, became complete and subject to the gift tax because decedent's death terminated a power to change the beneficiaries of the transferred property. Even so, in view of the fact that a transfer of property that becomes complete because the donor's death terminates a power to change the beneficiaries of the transferred property is not subject to the gift tax, we decline to hold that a transfer of property that becomes complete because the donor's death makes it possible for the first time to value the transferred property is subject to the gift tax. We perceive nothing in the gift tax statute or the regulations that would justify such a result.

In addition, we believe that respondent has confused the issues of completion and valuation in this case. Respondent appears to argue that, because the value of the survivors income benefit could not be determined on January 9, 1950, when the alleged transfer occurred, the transfer should be treated as incomplete for gift tax purposes until the survivors income benefit became susceptible of valuation, when decedent died, at which time the transfer became complete and subject to the gift tax. For the reasons stated above, we have already held that transfers of property do not become complete for gift tax purposes by reason of the death of the donor. We also question, however, whether the fact that the value of transferred property cannot be readily determined at the time of transfer is relevant in determining whether the transfer is complete for gift tax purposes. We have noted above that transfers of property are complete and subject to the gift tax at the time the donor relinquishes dominion and control over the transferred property. Nothing in the statute or the regulations suggests that, even if a donor relinquishes dominion and control over transferred property, the transfer is or can be considered to be incomplete for gift tax purposes if the value of the property is uncertain. To the contrary, in *Smith v. Shaughnessy*, 318 U.S. 176, 180 (1943), the Supreme Court appears to have considered and expressly rejected this argument in the following language:

> The government argues that for gift tax purposes the taxpayer has abandoned control of the remainder and that it is therefore taxable, while the taxpayer contends that no realistic value can be placed on the contingent remainder and that it therefore should not be classed as a gift.
>
> We cannot accept any suggestion that the complexity of a property interest … can serve to defeat a tax…. Even though these concepts of property and value may be slippery and elusive they can not escape taxation so long as they are used in the world of business. The language of the gift tax statute, "property … real or personal, tangible or intangible," is broad enough to include property, however conceptual or contingent….

Accordingly, we reject any suggestion by respondent either that transfers of property are incomplete for gift tax purposes simply because "no realistic value can be placed" on the property at the time the transfer occurs, or that transfers of property become complete for gift tax purposes only when the value of the transferred property can be easily ascertained.

Respondent also argues that completed transfers of property for gift tax purposes can and should be treated as open transactions in those cases where the transferred property is difficult to value, and that valuation of the transferred property and the imposition of the gift tax should be postponed until the value of the property can be readily determined. We reject this contention. The clear language of the statute and the regulations requires that transferred property be valued for gift tax purposes at the time the transfer becomes complete. Section 2512(a) provides that, in the case of a gift, "the value thereof at the *date of the gift* shall be considered the amount of the gift." (Emphasis added.) In addition, section 25.2511-2(a), Gift Tax Regs., states as follows:

> The gift tax is not imposed upon the receipt of the property by the donee, nor is it necessarily determined by the measure of enrichment resulting to the donee from the transfer…. On the contrary, the tax is a primary and personal liability of the donor, is an excise upon his *act of making the transfer*, [and] *is measured by the value of the property passing from the donor*…. [Emphasis added.]

As a result, property must be valued and the gift tax imposed at the time a completed transfer of the property occurs.[8]

> [8] Respondent relies heavily on Rev. Rul. 81-31, 1981-1 C.B. 475, and argues here that we should adopt its reasoning and holding. To the extent that this ruling can be read as holding either that a transfer of property can become complete for gift tax purposes by reason of the death of the donor, or that it is permissible to treat a completed transfer of property as an open transaction and to value the transferred property and impose the gift tax at some time other than when the completed transfer occurs, we regard the ruling as being inconsistent with the gift tax statute and the regulations.[6329]

We also agree with petitioner that decedent never made a taxable gift of any property interest in the survivors income benefit because we find no act by decedent that qualifies as an act of "transfer" of an interest in property. His participation in the plan was involuntary, he had no power to select or change the beneficiaries of the survivors income benefit, no power to alter the amount or timing of the payment of the benefit, and no power to substitute other benefits for those prescribed by the plan. These facts are substantially similar to the facts of *Estate of Miller v. Commissioner*, 14 T.C. 657 (1950), an estate tax case wherein we also concluded that the decedent had performed no qualifying act of transfer. In *Estate of Miller*, respondent argued, relying on cases where the decedent had purchased for a lump sum joint and survivor annuity contracts and at the time of purchase irrevocably designated the surviving annuitants, that the decedent had, for purposes of section 811(c) of the 1939 Code, transferred property during his life that was intended to take effect at his death. We rejected this contention and concluded that the decedent could not have transferred any property interest for any purpose

[6329] [my footnote:] Rev. Rul. 98-21 reasserts the IRS' argument that the Tax Court rejected here, but Rev. Rul. 98-21 conveniently omitted this rejection.

because he had not performed any act that possibly could be construed as an act of transfer. We stated as follows:

> we find no act on the part of the decedent which we think can properly be characterized as a “transfer” of an interest in property. Unlike the purchase of the annuity contracts in the *Wilder*, *Clise*, and *Mearkle* cases, the decedent’s participation in the pension plan inaugurated by his employer was not voluntary. The plan itself nominated the surviving beneficiaries, limiting them to the wife or the minor children of the officer or employee. Decedent, other than by continuing in his employment at the bank, which incidentally he had enjoyed for 13 years prior to the establishment of the plan, had no part in the selection of his wife as a surviving pensioner. Nor did he personally possess any means of defeating her pension rights other than by resigning his position at the bank… [14 T.C. at 664-665.]

While we recognize that in *Estate of Miller* respondent argued that there had been a transfer of property that was subject to the estate tax, and in this case respondent argues that there has been a transfer of property that is subject to the gift tax, we do not believe that this difference is significant. To the contrary, this Court and others have long held that the estate and gift taxes are to be read in pari materia and construed together. *Merrill v. Fahs*, 324 U.S. 308, 311-313 (1945); *Estate of Sanford v. Commissioner*, 308 U.S. 39, 42, 44 (1939); *Carson v. Commissioner*, 71 T.C. 252, 260 (1978), *affd.* 641 F.2d 864 (10th Cir. 1981).

Respondent argues, however, that decedent’s simple act of going to work for IBM on January 9, 1950, constituted an act of transfer by decedent for gift tax purposes. We disagree. None of the cases cited by respondent hold that, without more, the simple act of going to work for an employer that has an automatic, nonelective, company-wide survivors income benefit plan similar to the one at issue in this case constitutes a transfer of an interest in the benefit for either estate or gift tax purposes. Moreover, we doubt that it can be maintained seriously that decedent began his employment with IBM on January 9, 1950 (when he was 24, unmarried, and without dependents), for the purpose or with any intention of transferring property rights in the survivors income benefit. While we agree with respondent that a taxable event may occur without a volitional act by the donor, as in a case where an incomplete transfer of property becomes complete because of the occurrence of an event outside the donor’s control, we do not believe that a taxable event can occur for gift tax purposes unless there is first and in fact an act of transfer by the donor; and there can be no act of transfer unless the act is voluntary and the transferor has some awareness that he is in fact making a transfer of property, that is, he must intend to do so. See *Harris v. Commissioner*, 340 U.S. 106, 109 (1950); *Welch v. Henry*, 305 U.S. 134, 147 (1938); *Estate of Hite v. Commissioner*, 49 T.C. 580, 594 (1968); *Seligmann v. Commissioner*, 9 T.C. 191, 195 (1947).[9] It is apparent to us that decedent never intended and never voluntarily acted to transfer any interest that he may have owned in the survivors income benefit. There being no act of transfer by decedent, there can be no transfer of property by gift.

[9] The fact that there can be no taxable gift unless there is a voluntary act of transfer does not mean that the donor also must have donative intent when he makes the transfer. Sec. 25.2511-1(g)(1), Gift Tax Regs.; *Commissioner v. Wemyss*, 324 U.S. 303, 306 (1945). Any completed transfer of a beneficial interest in property for less than an adequate and full consideration in money or money’s worth, unless

made in the ordinary course of business, will be subject to the gift tax. Sec. 25.2512-8, Gift Tax Regs.

Moreover, we question whether decedent ever owned a property interest in the survivors income benefit that he was capable of transferring during his lifetime.[10]

[10] The parties stipulated that "Petitioner does not dispute Respondent's contention that Decedent's eligible survivors had a right to receive payment under the plan as long as the conditions set forth in the plan were satisfied." While we are uncertain what the parties intended by this stipulation, we note that to the extent it may be read as a stipulation of law, we are not bound by it. *Rollert Residuary Trust v. Commissioner*, 80 T.C. 619, 630 (1983), *affd.* 752 F.2d 1128 (6th Cir. 1985).

He had no voice in selecting the beneficiaries of the survivors income benefit and no ability to affect or determine the benefits payable to them. The categories of beneficiaries, the determination whether a claimant is an eligible beneficiary, and the amounts payable to the beneficiaries all were controlled directly by the provisions of the plan and indirectly by IBM, and payments were made directly to the beneficiaries by IBM. Furthermore, the benefits were payable out of the general assets of IBM, not out of any fund in which decedent had a vested interest, and the benefits did not accrue until decedent's death. Most importantly, IBM had the power and the right to modify the plan and the survivors income benefit at any time and in its sole discretion. Under these circumstances, we have little difficulty in concluding that decedent never acquired fixed and enforceable property rights in the survivors income benefit that he was capable of transferring during his lifetime. In *Estate of Miller v. Commissioner*, *supra*, we reached the same conclusion, on similar facts, in the following language:

> The trustees were empowered at any time to change the rules and regulations or to substitute entirely new rule... The pension trust could be terminated at any time by the bank and, although rule 29 provided that upon termination provision should be made for the continuance of all pensions then being paid to pensioners, there was no assurance that decedent's pension rights could have been enforced to their fullest extent against the pension trust unless there existed sufficient funds in the trust upon its cessation to discharge all of its obligations.
>
> Nor did the pension rights granted the wife … stand in any stronger position than those of her husband, for it is clear that whatever rights she possessed were subject to the same contingencies as those of the decedent…. Any pension granted to the wife would cease upon remarriage…. it is our considered opinion that decedent's pension rights and those of his wife under the pension trust never acquired the character of fixed and enforceable property rights which were susceptible to transfer by him….
>
> [14 T.C. at 664.]

Respondent argues, however, that in *Estate of Wolf v. Commissioner*, 29 T.C. 441 (1957), *revd. on other grounds* 264 F.2d 82 (3d Cir. 1959), we held in circumstances similar to those in this case, that decedent owned enforceable property rights in three trusts. The facts of *Estate of Wolf* are easily distinguishable from the facts of this case, however, for the same reason that in *Estate of Wolf* we distinguished *Estate of Miller v. Commissioner*, *supra*: in *Estate of Wolf* the employer had no unfettered right to modify or

> terminate the trusts, whereas here, as in *Estate of Miller*, the employer had the right to modify the plan at any time and in its sole discretion. *Estate of Wolf v. Commissioner*, 29 T.C. at 447.
>
> Respondent also attempts to distinguish *Estate of Miller* from this case by arguing that payment of the survivors income benefit in this case was much more likely to occur than was payment of the pension benefit in *Estate of Miller*, because IBM's financial resources were much greater than the resources of the employer in *Estate of Miller*. In addition, respondent argues that the employer in *Estate of Miller* had the unfettered right to change the rules and regulations of the pension plan and even to terminate it, while in this case, IBM only had the right, in its discretion, to modify the plan. In our view, neither of these differences are significant.[11]
>
> > [11] Respondent also argues, citing *Estate of Schelberg v. Commissioner*, 612 F.2d 25 (2d Cir. 1979), *revg.* 70 T.C. 690 (1978), that the survivors income benefit must be a taxable gift within the meaning of sec. 2503 because it is not taxable under sec. 2039. We of course express no view in this case as to whether the survivors income benefit is taxable under sec. 2039. However, even if the survivors income benefit is not taxable under sec. 2039, we fail to see how that could justify our reaching an improper result in this case.
>
> In our opinion, decedent never made a taxable gift of any interest in the survivors income benefit to his wife. It follows that the present value of the survivors income benefit is not an adjusted taxable gift within the meaning of section 2001.

Rev. Rul. 92-68 held:

> The Internal Revenue Service has reconsidered Rev. Rul. 81-31, 1991-1 C.B. 475, in view of the Tax Court's opinion in *Estate of DiMarco v. Commissioner*, 87 T.C. 653 (1986), *acq. in result*, 1990-2 C.B. 1. Rev. Rul. 81-31 held that a decedent made a gift of the value of a death benefit passing to the decedent's surviving spouse and that the gift became complete in the calendar quarter in which the decedent died, at which time the amount of the gift first became susceptible of valuation. The ruling is inconsistent with the result in *DiMarco*. Rev. Rul. 81-31 is hereby revoked.

The final taxable year involved in *Estate of DiMarco* was 1979. After that case and before Rev. Rul. 92-68 was enacted, in 1984 Code § 61(a) was amended to include fringe benefits in income (emphasis added):[6330]

> *General Definition*. Except as otherwise provided in this subtitle, gross income means all income from whatever source derived, including (but not limited to) the following items:
>
> (1) Compensation for services, including fees, commissions, *fringe benefits*, and similar items…

[6330] For a discussion of "fringe benefits" under Code § 1372, applying partnership rules to those owning at least 2% of an S corporation, see text accompanying fn 4472 in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit **Arrangement under Reg. § 1.61-22**, describing a unanimous Tax Court reviewed opinion.

Reg. § 1.61-2(a) summarizes the general rules:

(1) Wages, salaries, commissions paid salesmen, compensation for services on the basis of a percentage of profits, commissions on insurance premiums, tips, bonuses (including Christmas bonuses), termination or severance pay, rewards, jury fees, marriage fees and other contributions received by a clergyman for services, pay of persons in the military or naval forces of the United States, retired pay of employees, pensions, and retirement allowances are income to the recipients unless excluded by law. Several special rules apply to members of the Armed Forces, National Oceanic and Atmospheric Administration, and Public Health Service of the United States; see paragraph (b) of this section.

(2) The Code provides special rules including the following items in gross income:

(i) Distributions from employees' trusts, see sections 72, 402, and 403, and the regulations thereunder;

(ii) Compensation for child's services (in child's gross income), see section 73 and the regulations thereunder;

(iii) Prizes and awards, see section 74 and the regulations thereunder.

(3) Similarly, the Code provides special rules excluding the following items from gross income in whole or in part:

(i) Gifts, see section 102 and the regulations thereunder;

(ii) Compensation for injuries or sickness, see section 104 and the regulations thereunder;

(iii) Amounts received under accident and health plans, see section 105 and the regulations thereunder;

(iv) Scholarship and fellowship grants, see section 117 and the regulations thereunder;

(v) Miscellaneous items, see section 122.

These items do not necessarily coordinate with the transfer of property to the service provider's donees. For example, gifts to employees are not necessarily compensation income; see part II.M.4.c Gifts to Employees. On the other hand, Reg. § 1.61-2(d), "Compensation paid other than in cash," seems to classify certain noncash compensation as constituting or being equivalent to a transfer of property:

(1) *In general*. Except as otherwise provided in paragraph (d)(6)(i) of this section (relating to certain property transferred after June 30, 1969), if services are paid for in property, the fair market value of the property taken in payment must be included in income as compensation. If services are paid for in exchange for other services, the fair market value of such other services taken in payment must be included in income as compensation. If the services are rendered at a stipulated price, such price will be presumed to be the fair market value of the compensation received in

the absence of evidence to the contrary. For special rules relating to certain options received as compensation, see §§ 1.61-15, 1.83-7, and section 421 and the regulations thereunder. For special rules relating to premiums paid by an employer for an annuity contract which is not subject to section 403(a), see section 403(c) and the regulations thereunder and § 1.83-8(a). For special rules relating to contributions made to an employees' trust which is not exempt under section 501, see section 402(b) and the regulations thereunder and § 1.83-8(a).

(2) *Property transferred to employee or independent contractor*.

(i) Except as otherwise provided in section 421 and the regulations thereunder and § 1.61-15 (relating to stock options), and paragraph (d)(6)(i) of this section, if property is transferred by an employer to an employee or if property is transferred to an independent contractor, as compensation for services, for an amount less than its fair market value, then regardless of whether the transfer is in the form of a sale or exchange, the difference between the amount paid for the property and the amount of its fair market value at the time of the transfer is compensation and shall be included in the gross income of the employee or independent contractor. In computing the gain or loss from the subsequent sale of such property, its basis shall be the amount paid for the property increased by the amount of such difference included in gross income.

(ii)

(A) *Cost of life insurance on the life of the employee*. Generally, life insurance premiums paid by an employer on the life of his employee where the proceeds of such insurance are payable to the beneficiary of such employee are part of the gross income of the employee. For example, if an employee or independent contractor is the owner (as defined in § 1.61-22(c)(1)) of a life insurance contract and the payments with regard to such contract are not split-dollar loans under § 1.7872-15(b)(1), the employee or independent contractor must include in income the amount of any such payments by the employer or service recipient with respect to such contract during any year to the extent that the employee's or independent contractor's rights to the life insurance contract are substantially vested (within the meaning of § 1.83-3(b)). This result is the same regardless of whether the employee or independent contractor has at all times been the owner of the life insurance contract or the contract previously has been owned by the employer or service recipient as part of a split-dollar life insurance arrangement (as defined in § 1.61-22(b)(1) or (2)) and was transferred by the employer or service recipient to the employee or independent contractor under § 1.61-22(g). However, the amount includible in the employee's gross income is determined with regard to the provisions of section 403 and the regulations thereunder in the case of an individual contract issued after December 31, 1962, or a group contract, which provides incidental life insurance protection and which satisfies the requirements of section 401(g) and § 1.401-9, relating to the nontransferability of annuity contracts. For the special rules relating to the includibility in an employee's gross income of an amount equal to the cost of certain group-term life insurance on the employee's life which is carried directly or indirectly by his employer, see section 79 and the regulations thereunder. For special rules relating to the exclusion of contributions by an employer to accident and health plans for the employee, see section 106 and the regulations thereunder.

(B) *Cost of group-term life insurance on the life of an individual other than an employee*. The cost (determined under paragraph (d)(2) of § 1.79-3) of group-term life insurance on the life of an individual other than an employee (such as the spouse or dependent of the employee) provided in connection with the performance of services by the employee is includible in the gross income of the employee.

(3) *Meals and living quarters*. The value of living quarters or meals which an employee receives in addition to his salary constitutes gross income unless they are furnished for the convenience of the employer and meet the conditions specified in section 119 and the regulations thereunder. For the treatment of rental value of parsonages or rental allowance paid to ministers, see section 107 and the regulations thereunder; for the treatment of statutory subsistence allowances received by police, see section 120 and the regulations thereunder.

(4) *Stock and notes transferred to employee or independent contractor*. Except as otherwise provided by section 421 and the regulations thereunder and § 1.61-15 (relating to stock options), and paragraph (d)(6)(i) of this section, if a corporation transfers its own stock to an employee or independent contractor as compensation for services, the fair market value of the stock at the time of transfer shall be included in the gross income of the employee or independent contractor. Notes or other evidences of indebtedness received in payment for services constitute income in the amount of their fair market value at the time of the transfer. A taxpayer receiving as compensation a note regarded as good for its face value at maturity, but not bearing interest, shall treat as income as of the time of receipt its fair discounted value computed at the prevailing rate. As payments are received on such a note, there shall be included in income that portion of each payment which represents the proportionate part of the discount originally taken on the entire note.

(5) *Property transferred on or before June 30, 1969, subject to restrictions*. Notwithstanding paragraph (d) (1), (2), or (4) of this section, if any property is transferred after September 24, 1959, by an employer to an employee or independent contractor as compensation for services, and such property is subject to a restriction which has a significant effect on its value at the time of transfer, the rules of § 1.421-6(d)(2) shall apply in determining the time and the amount of compensation to be included in the gross income of the employee or independent contractor. This (5) is also applicable to transfers subject to a restriction which has a significant effect on its value at the time of transfer and to which § 1.83-8(b) (relating to transitional rules with respect to transfers of restricted property) applies. For special rules relating to options to purchase stock or other property which are issued as compensation for services, see § 1.61-15 and section 421 and the regulations thereunder.

(6) *Certain property transferred, premiums paid, and contributions made in connection with the performance of services after June 30, 1969*.

(i) *Exception*. Paragraph (d)(1), (2), (4), and (5) of this section and § 1.61-15 do not apply to the transfer of property (as defined in § 1.83-3(e)) after June 30, 1969, unless § 1.83-8 (relating to the applicability of section 83 and transitional rules) applies. If section 83 applies to a transfer of property, and the property is not subject to a restriction that has a significant effect on the fair market value of such property, then the rules contained in paragraph (d)(1), (2), and (4) of this section and § 1.61-15 shall also apply to such transfer to the extent such rules are not inconsistent with section 83.

(ii) *Cross references*. For rules relating to premiums paid by an employer for an annuity contract which is not subject to section 403(a), see section 403(c) and the regulations thereunder. For rules relating to contributions made to an employees' trust which is not exempt under section 501(a), see section 402(b) and the regulations thereunder.

Generally, Code § 83 provides income tax consequences compensatory transfers of property. For that provision and related issues, see part II.M.4 Providing Equity to Key Employees and an Introduction to Code § 409A Nonqualified Deferred Compensation Rules.

Rev. Rul. 98-21 asked, "When is the transfer of a nonstatutory stock option (*i.e.*, a compensatory stock option that is not subject to the provisions of section 421 of the Internal Revenue Code) by the optionee to a family member, for no consideration, a completed gift under section 2511?" and provided the following facts:

> A is employed by Company. Company has one class of stock. Company has a stock option plan under which employees can be awarded nonstatutory stock options to purchase shares of Company's stock. These stock options are not traded on an established market. The shares acquired on the exercise of an option are freely transferable, subject only to generally applicable securities laws, and subject to no other restrictions or limitations. Company grants to A, in consideration for services to be performed by A, a nonstatutory stock option to purchase shares of Company common stock. Company's stock option plan provides that the stock option is exercisable by A only after A performs additional services.
>
> All options granted under Company's stock option plan expire 10 years from the grant date. The exercise price per share of A's option is the fair market value of one share of Company's common stock on the grant date. Company's stock option plan permits the transfer of nonstatutory stock options to a member of an optionee's immediate family or to a trust for the benefit of those individuals. The effect of such a transfer is that the transferee (after the required service is completed and before the option's expiration date) will determine whether and when to exercise the stock option and will also be obligated to pay the exercise price.
>
> Before A performs the additional services necessary to allow A's option to be exercised, A transfers A's option to B, one of A's children, for no consideration.

Rev. Rul. 98-21 reasoned and held:

> Section 2501 imposes a tax on the transfer of property by gift by any individual. The gift tax is not imposed upon the receipt of the property by the donee, is not necessarily determined by the measure of enrichment resulting to the donee from the transfer, and is not conditioned upon the ability to identify the donee at the time of the transfer. The tax is a primary and personal liability of the donor, is an excise upon the donor's act of

making the transfer, is measured by the value of the property passing from the donor, and attaches regardless of the fact that the identity of the donee may not then be known or ascertainable. Section 25.2511-2(a) of the Gift Tax Regulations.

The gift tax applies to a transfer of property by way of gift, whether the transfer is in trust or otherwise, whether the gift is direct or indirect, and whether the property is real or personal, tangible or intangible. Section 25.2511-1(a). For this purpose, the term property is used in its broadest and most comprehensive sense and reaches "every species of right or interest protected by law and having an exchangeable value." H.R. Rep. No. 708, 72d Cong., 1st Sess. 27 (1932); S. Rep. No. 665, 72d Cong., 1st Sess. 39, (1932); both reprinted in 1939-1 (Part 2) C.B. 476, 524. Some rights, however, are not property. See *e.g.*, *Estate of Howell v. Commissioner*, 15 T.C. 224 (1950) (nonvested pension rights were not property rights includible in gross estate under section 811(c) of the 1939 Code); *Estate of Barr v. Commissioner*, 40 T.C. 227 (1963) *acq.*, 1964-1 C.B. 4 (death benefits payable at discretion of board of directors who usually but not always, agreed to payment, were in the nature of hope or expectancy and not property rights includible in gross estate for estate tax purposes).

Generally, a gift is complete when the donor has so parted with dominion and control over the property as to leave the donor no power to change its disposition, whether for the donor's own benefit or for the benefit of another. Section 25.2511-2(b).

In *Estate of Copley v. Commissioner*, 15 T.C. 17 (1950), *aff'd*, 194 F.2d 364 (7th Cir. 1952), *acq.*, 1965-2 C.B. 4, the petitioner entered into an antenuptial agreement in which the petitioner promised to give the future spouse a sum of money in consideration of the marriage and in lieu of all the spouse's marital rights in the petitioner's property. The agreement became legally enforceable under state law on the date of the marriage in 1931. The petitioner transferred part of the sum of money in 1936 and the rest in 1944. The court concluded that a gift tax would have been due in 1931 if there had been a gift tax law in effect at that time.

In Rev. Rul. 79-384, 1979-2 C.B. 344, a parent promised to pay a child $10,000 if the child graduated from college. Rev. Rul. 79-384 holds that the parent made a gift on the day the child graduated from college, the date when the parent's promise became enforceable and determinable in value.

In Rev. Rul. 80-186, 1980-2 C.B. 280, a parent transferred to a child, for nominal consideration, an option to purchase real property for a specified period of time at a price below fair value. Rev. Rul. 80-186 holds that the transfer is a completed gift at the time the option is transferred provided the option is binding and enforceable under state law on the date of the transfer.

In the present case, Company grants to A nonstatutory stock option conditioned on the performance of additional services by A. If A fails to perform the services, the option cannot be exercised. Therefore, before A performs the services, the rights that A possesses in the stock option have not acquired the character of enforceable property rights susceptible of transfer for federal gift tax purposes. A can make a gift of the stock option to B for federal gift tax purposes only after A has completed the additional required services because only upon completion of the services does the right to exercise the option become binding and enforceable. In the event the option were to become exercisable in stages, each portion of the option that becomes exercisable at a different time is treated as a separate option for the purpose of applying this analysis. In the event that B is a skip person (within the meaning of section 2613(a)), the generation-skipping transfer tax would apply at the same time as the gift tax. See Rev. Proc. 98-34, 1998-18, which sets forth a methodology to value certain compensatory stock options for gift, estate, and generation-skipping transfer tax purposes.

Holding

On the facts stated above, the transfer to a family member, for no consideration, of a nonstatutory stock option, is a completed gift under section 2511 on the later of (i) the transfer or (ii) the time when the donee's right to exercise the option is no longer conditioned on the performance of services by the transferor.

In Letter Ruling 199952012, the taxpayer sought a ruling only regarding options that were vested and exercisable, in light of the position of Rev. Rul. 98-21.

Rev. Rul. 98-21 is wrong. The stock options were transferred in an a legally enforceable transaction in which the donor totally relinquished control. Rev. Ruls. 79-384 and 80-186 held that gifts were complete when the donor's relinquishment of rights became enforceable, and in Rev. Rul. 98-21 the donor relinquished his rights when he transferred the option, not when he performed the services. The IRS' concern that the option may have had no value when it was transferred because it was not exercisable at the time of the transfer is an argument that footnote 8 of *Di Marco* rejected.[6331]

How does Rev. Rul. 98-21 compare with the split-dollar regulations issued in 2003? In Reg. § 1.61-22(c)(2)(ii), the employee's rights in the insurance policy belong to an irrevocable life insurance trust, so the employee has no control over the benefits the employer is providing. However, each year the employer is making a new transfer by paying the premiums, and that transfer is in the nature of compensation for services rendered; thus, the employer's annual transfer is compensation to the employee and a gift by the employee to the trust. In Rev. Rul. 98-21, the employer is not making any further transfers of property after issuing the stock option.

III.B.1.a.v.(c). Evaluating the Continuum

Congress and the IRS have attacked certain compensatory awards – generally in the partnership area:

- Profits interests generally receive capital gain treatment on sale; see part II.M.4.f Issuing a Profits Interest to a Service Provider. However, some profits interests require a 3-year holding period to receive long-term capital gain rates; see part II.M.4.f.ii.(b) Code § 1061 - Certain Sales of Compensatory Partnership Interests Recharacterized from Long-Term to Short-Term Gains. Although profits interests can carry through capital gain, distributions of profits can be recharacterized as compensation income (and the payment may or may not be deductible) if the payment stream is not sufficiently subject to entrepreneurial risk; see part II.C.8.a Code § 707 - Compensating a Partner for Services Performed. Also, distributions to partners who contribute property to a partnership may be disguised sales if

[6331] See text accompanying and preceding fn 6329.

they are not sufficiently subject to entrepreneurial risk; see part II.M.3.e Exception: Disguised Sale Rules.[6332]

- Code § 2701 can artificially inflate gift tax values when using a profits interest; see part III.B.7.c Code § 2701 Interaction with Income Tax Planning, especially parts III.B.7.c.i Profits Interest in a Partnership that Was a Straight-Up Partnership before the Transfer, III.B.7.c.ii Profits Interest in a Partnership in Which Transferor and Applicable Family Members Initially Hold Only a Profits Interest, III.B.7.c.iii Same Class Exception - Possible Application to Profits Interests and Other Situations and III.B.7.c.iv Transfers When Owner Holds Profits Interest/Carried Interest and Other Interests.

The more complex the structure, the more difficulty one may have separating potential gifts. Code § 2501 does not subject to gift tax services one family member performs for another, but it does tax transfers of property that third parties make to one family member in exchange for services provided by another family member.

Here are some example of strategies that I think work:

- If the business gives the children a long-term lease that secures 100% bank financing, and the business and lease are so solid that, using rental payments to pay down the mortgage, the children are pretty much guaranteed to get a fully paid-for building. The children did nothing (triple net lease) and got a building. Yes, it took decades to grow that equity instead of a year or two, but it was the parents' efforts at making the business solid that got that equity to the children. And the business could have bought the real estate itself with a mortgage but chose to instead finance it with a lease, but really the lease obligations were as real a business obligation as the mortgage would have been.

- Another example – client developed an equipment leasing business – multi-million dollar pieces of equipment. He knew businesses that would rent the equipment on a long-term lease, he knew bankers that will loan to finance the equipment, and he set up the financing deals and leases. It's all through his personal efforts. He had an S corporation (100% owned by him) that he used for deals, but he had no contractual obligation to the corporation to do deals for it. He set up deals for his children, too. 100% of the deal value was generated through his upfront efforts – it's all triple net leases.

- See also part III.B.1.a.vii Business Expansion into New Location.

What if client decides to work on a deal with unrelated parties; and the client, irrevocable trusts for the client's family, or some combination of the above could invest and participate in a new undertaking? The investment is necessary to start the business but is relatively small compared to the business' value if the client and his/her cohorts put together profitable deals for the business. All investors lose if the deals are not put together, but those putting together the deals have a great track record of success. Is granting the opportunity to invest a gift? Not according to *Crowley* and *Alabama-Georgia Syrup Co*. How about when third party investors pour in funds, increasing the value of all of the original investors' investments?

[6332] Conversely, if a partnership has a capital call (requires the partners to contribute funds) and distributes property to the partners too closely together, the partnership might have inadvertently sold the distributed assets. See part II.Q.8.b.i.(c) Disguised Sale from Partnership to Partner.

- The relative ownership of the client and the trusts does not change due to the third party investors, so this is all growth in business value. Rev. Rul. 98-21 may take issue with this, in that the client's ongoing services are part of what caused this value increase, but failure to perform those services would not have caused any business interest to be forfeited, so even Rev. Rul. 98-21's attack on lack of vesting would not apply.

- On the other hand, *Dodge* and the split dollar regulations involve transfers by third parties that constitute compensation to the service provider and gifts from the service provider to the person(s) benefitting from the transfer, and we have a third party influx of cash here. Some estate planners are uncomfortable with this rapid influx of value into the trusts, believing that the nature of the deal is different than the real estate and equipment deals described above. I do not share their discomfort but pass it along to you so that you can find your own comfort zone.

III.B.1.a.vi. Asset Transfers to Children or Their Businesses

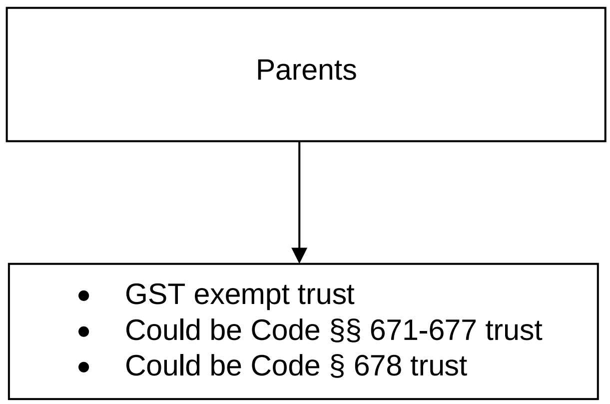
When transferring an asset with low current value from which the children could reap significant profits, be extra careful to make sure that the transfers are properly documented to ensure locking in the current value. Otherwise, the IRS might argue that the transferor still owns the asset or transferred it at a later time.[6333]

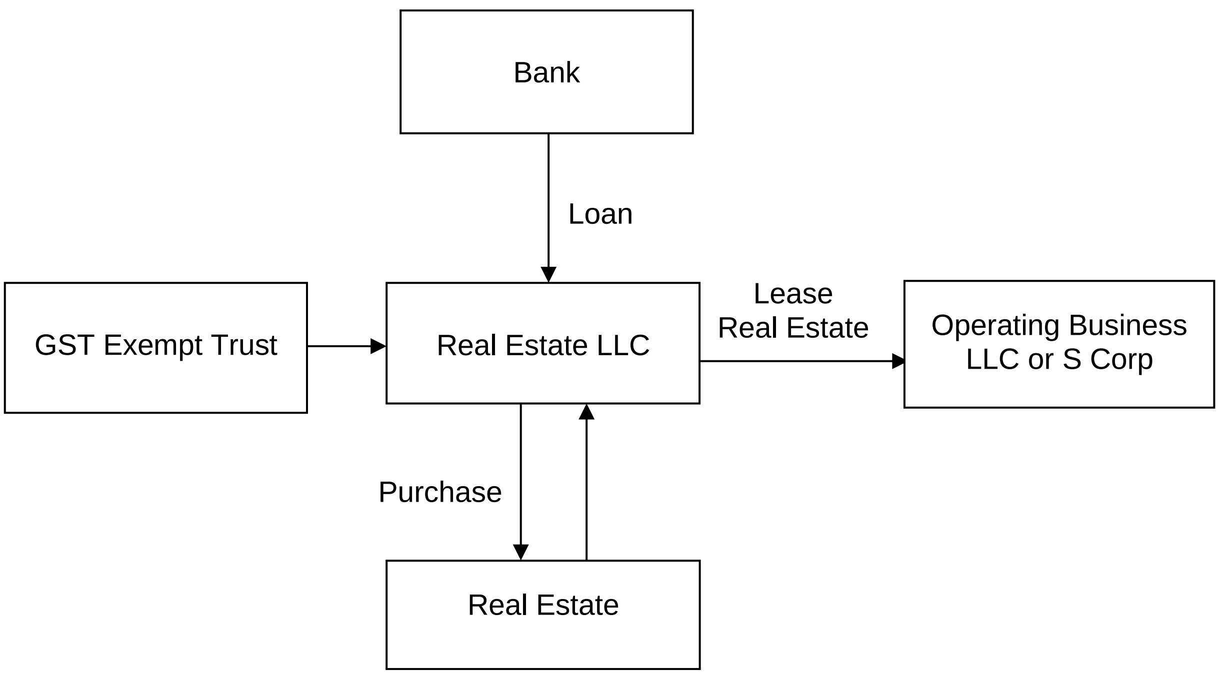
Be careful to document values and the business purpose. See parts II.Q.7.h.iv Taxpayer Win in *Cox Enterprises* When IRS Asserted That Contributing Property to Partnership Constituted Distribution to Shareholders (2009); *Dynamo Holdings'* Limitation on Using *Cox Enterprises* (2018), II.Q.7.h.v Taxpayer Win in *Bross Trucking* When IRS Asserted Corporation Distribution of Goodwill to Shareholder Followed by Gift to Shareholder of New Corporation (2014) and II.Q.7.h.vi IRS' Conservative Roadmap: Letter Ruling 200934013.

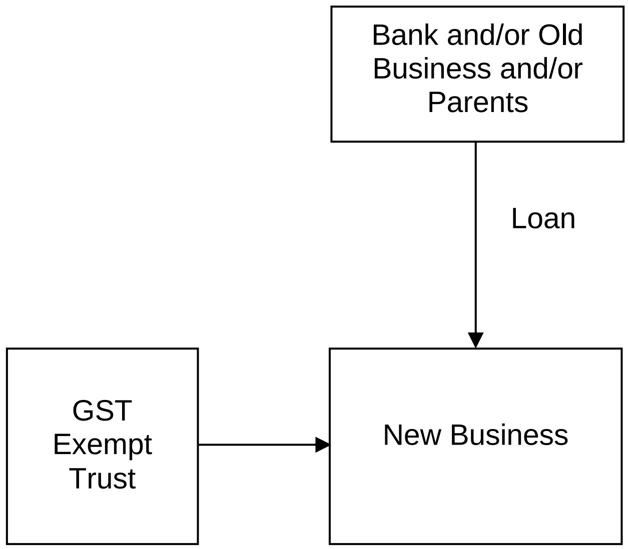
[6333] *Cavallaro v. Commissioner*, T.C. Memo. 2014-189 (supposed transfer was documented many years later; gift occurred at time of proper documentation), *rev'd* on other grounds 118 A.F.T.R.2d ¶2016-5517 (1st Cir. 11/18/2016).

III.B.1.a.vii. Business Expansion into New Location

Consider the following:







III.B.1.a.vii.(a). Estate Planning

A new business or real estate venture often has either minimal value or net asset value. This structure moves future growth outside of the estate tax system.

However, one might consider some mechanism to get the property back into the estate tax system, to get a basis step-up when a beneficiary dies; this concern applies particularly when a beneficiary's gross estate is below the beneficiary's available estate tax exemption, but planning strategies can provide a basis step-up with minimal estate tax even if the beneficiary has a taxable estate.[6334]

When used for real estate, growth in value, although desirable, is not necessary for this to be beneficial for estate tax planning. The property will gain equity simply by the real estate LLC using the rent to pay down the mortgage.

When used for real estate, this can facilitate equalizing bequests to family members not involved in the business. The outsiders get real estate rental income, and the insiders get business income.

When used for an operating business, this also facilitates siblings pursuing different lines of business or different locations so that they are not entangled with each other as long.

To explore any gift tax issues relating to the ideas above, see part III.B.1.a.v Sending Business or Performing Services.

III.B.1.a.vii.(b). FICA Planning

Partnership income from a trade or business is generally subject to self-employment tax, unless the partner is a limited partner.

[6334] See part II.H Income Tax vs. Estate and Gift Tax (Particularly for Depreciable Property).

In recent income tax cases, the Service has tried to characterize a member of a limited liability company as a limited partner to disallow losses for income tax purposes under the Code § 469 passive loss rules. Courts have rejected this attempt.

Real estate rental income is not subject to self-employment tax. Holding the real estate in a separate LLC would allow the business LLC to deduct rent payments for income and self-employment tax purposes and the real estate LLC owners to be subject to income but not self-employment tax. This self-employment tax savings is often small in initial years, because if the property were held in the business LLC then the business would deduct interest, depreciation, etc. However, as the mortgage gets paid down (thereby decreasing interest deductions) and rent increases, this savings can be significant.

See II.L.3 Self-Employment Tax: General Partner or Sole Proprietor, for a detailed discussion.

III.B.1.b. Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts

Interpreting the Revenue Act of 1932, *Smith v. Shaughnessy*, 318 U.S. 176 (1943), held:

> The government argues that for gift tax purposes the taxpayer has abandoned control of the remainder and that it is therefore taxable, while the taxpayer contends that no realistic value can be placed on the contingent remainder and that it therefore should not be classed as a gift.
>
> We cannot accept any suggestion that the complexity of a property interest created by a trust can serve to defeat a tax. For many years Congress has sought vigorously to close tax loopholes against ingenious trust instruments.[3] Even though these concepts of property and value may be slippery and elusive they can not escape taxation so long as they are used in the world of business. The language of the gift tax statute, "property … real or personal, tangible or intangible", is broad enough to include property, however conceptual or contingent. And lest there be any doubt as to the amplitude of their purpose, the Senate and House Committees, reporting the bill, spelled out their meaning as follows:
>
>> "The terms 'property,' 'transfer,' 'gift', and 'indirectly' [in § 501] are used in the broadest sense; the term 'property' reaching every species of right or interest protected by the laws and having an exchangeable value."[4]
>

>
> [4] Senate Report No. 665, 72d Cong., 1st Sess., p. 39; House Report No. 708, supra, p. 29.
>
> The Treasury regulations, which we think carry out the Act's purpose, made specific provisions for application of the tax to, and determination of the value of, "a remainder… subject to an outstanding life estate."[5]

[5] Treas. Regulations 79 (1936 Ed.) Arts. 2, 3, 17, 19. Cf. *Commissioner of Internal Revenue v. Marshall*, 2 Cir., 125 F.2d 943, 945, 141 A.L.R. 445.

> The essence of a gift by trust is the abandonment of control over the property put in trust. The separable interests transferred are no gifts to the extent that power remains to revoke the trust or recapture the property represented by any of them, Burnet v. Guggenheim, supra, or to modify the terms of the arrangement so as to make other disposition of the property, Sanford v. Commissioner, supra. In the Sanford case the grantor could, by modification of the trust, extinguish the donee's interest at any instant he chose. In cases such as this, where the grantor has neither the form nor substance of control and never will have unless he outlives his wife, we must conclude that he has lost all "economic control" and that the gift is complete except for the value of his reversionary interest.[6]

[6] The conclusion reached here is in accord with that of the several Circuit Courts of Appeal which have considered the problem: *Commissioner v. Marshall*, 2 Cir., 125 F.2d 943, 141 A.L.R. 445; *Commissioner v. Beck's Estate*, 2 Cir., 129 F.2d 243; *Commissioner v. McLean*, 5 Cir., 127 F.2d 942; *Helvering v. Robinette*, 3 Cir., 129 F.2d 832, affirmed by this Court today; *Hughes v. Commissioner*, 9 Cir., 104 F.2d 144; and see the cases cited in Note (2), supra.

On the same day, *Robinette v. Helvering*, 318 U.S. 184 (1943), held:

> The instruments created by these grantors purported on their face wholly to divest the grantors of all dominion over the property; it could not be returned to them except because of contingencies beyond their control. Gifts of future interests are taxable under the Act, § 504 (b), 26 U.S.C.A. Int.Rev.Acts, page 586, and they do not lose this quality merely because of the indefiniteness of the eventual recipient. The petitioners purported to give the property to someone whose identity could be later ascertained and this was enough.

Reg. § 25.2511-2(a) provides:

> The gift tax is not imposed upon the receipt of the property by the donee, nor is it necessarily determined by the measure of enrichment resulting to the donee from the transfer, nor is it conditioned upon ability to identify the donee at the time of the transfer. On the contrary, the tax is a primary and personal liability of the donor, is an excise upon his act of making the transfer, is measured by the value of the property passing from the donor, and attaches regardless of the fact that the identity of the donee may not then be known or ascertainable. For gift tax rules related to an ABLE account established under section 529A, see § 1.529A-4 of this chapter.

DiMarco v. Commissioner, 87 T.C. 653, 656-663 (1986), discussed in part III.B.1.a.v.(b) Property Transfer Clearly Tied to Services, held that a property transfer that the purported donor did not instigate did not constitute a gift. Therefore, it was not an "act of making [a] transfer."

Reg. § 25.2512-8, "Transfers for insufficient consideration," provides:[6335]

> Transfers reached by the gift tax are not confined to those only which, being without a valuable consideration, accord with the common law concept of gifts, but embrace as well sales, exchanges, and other dispositions of property for a consideration to the extent that the value of the property transferred by the donor exceeds the value in money or money's worth of the consideration given therefor. However, a sale, exchange, or other transfer of property made in the ordinary course of business (a transaction which is bona fide, at arm's length, and free from any donative intent), will be considered as made for an adequate and full consideration in money or money's worth. A consideration not reducible to a value in money or money's worth, as love and affection, promise of marriage, etc., is to be wholly disregarded, and the entire value of the property transferred constitutes the amount of the gift. Similarly, a relinquishment or promised relinquishment of dower or curtesy, or of a statutory estate created in lieu of dower or curtesy, or of other marital rights in the spouse's property or estate, shall not be considered to any extent a consideration "in money or money's worth." See, however, section 2516 and the regulations thereunder with respect to certain transfers incident to a divorce. See also sections 2701, 2702, 2703 and 2704 and the regulations at § 25.2701-0 through 25.2704-3 for special rules for valuing transfers of business interests, transfers in trust, and transfers pursuant to options and purchase agreements.

See part II.D.2 Business Entity as Grantor of Trust or Donor to Charity or Other Donee, which focuses on gifts made by the business entity that are attributed to owners, whereas this part III.B.1.b focuses on transfers of business interests by the owners.

See part III.B.1.e.ii Valuing a Beneficial Interest in a Trust, which essentially caps the value of any gift a beneficiary makes in this part III.B.1.b.

Zeydel, "Developing Law On Changing Irrevocable Trusts: Staying Out Of The Danger Zone," 47 *Real Property, Trust and Estate Law Journal* 1, 54-61 (Spring 2012), suggests that the safe harbors under Reg. § 26.2601-1(b)(4)(i), which are described in part III.B.1.d.i Effect of "Additions" on Grandfathering from GST Rules, provide clues as to transactions that the IRS does not view as gifts.

Rev. Rul. 75-71 involved the following facts:

> In 1968 three of X's sisters, the only then surviving of the original six brothers and sisters, entered into an agreement whereby each contracted, in the event she survived X, to transfer to the children of any contracting party who failed to survive X, that portion of X's estate to which the deceased contracting party would have been entitled if all three contracting parties had survived X. X died in 1973, leaving the taxpayer as the sole surviving beneficiary. Thereafter, upon receipt of her inheritance, the taxpayer made distributions to her nieces and nephews pursuant to the terms of the agreement with their parents.
>
> Under the applicable local law, the agreement between the expectant legatees for the benefit of the third party beneficiaries created a mutually binding contractual obligation at the time of its execution. However, because of the aleatory nature of the contract, it did not become enforceable until X died. That is, performance under the contract was

[6335] As to the second sentence, see part III.B.1.h Transfers in the Ordinary Course of Business.

> dependent upon the uncertainty that any party would actually receive an inheritance under X's will since she could have revoked or amended the will or disposed of all her property before she died. Such uncertainty was removed only by her death.

Rev. Rul. 75-71 held:

> Although the local law treats the transfers in this case as performance of contractual obligations based on mutual promises of the contracting parties, the transfers are not deprived of their essential characteristics as gifts if the donor does not receive "adequate and full consideration in money or money's worth" in return for the transferred property. In this case the taxpayer received nothing more than the assurance that, if she should die before X and one or both of the other two expectant legatees should survive X, her children would receive one-third of the total inheritance from X. Such an assurance is not "adequate and full consideration in money or money's worth" since it does not offset the decrease in the value of the taxpayer's estate that was caused by the transfer of two-thirds of her inheritance. *Commissioner v. Wemyss*, 324 U.S. 303 (1945); *Estate of John M. Goetchuis*, 17 T.C. 495 (1951); *Commissioner v. Bristol*, 121 F. 2d 129 (1st Cir. 1941).
>
> At the date of death of X the uncertainty that there would ever be a transfer of property pursuant to the contract between the prospective legatees was removed. It was at this time that the rights of the third party beneficiaries (the nieces and nephews) became enforceable against the taxpayer, thus allowing the value of the gift to be determined.
>
> Accordingly, the payments that the taxpayer became obligated to make pursuant to the terms of the contract with the other prospective legatees were taxable as gifts at the date of X's death.

Much of this part III.B.1.b deals with the consequences of trust modification. For trust modification generally, see part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting. If and to the extent a beneficiary's consent is not required for an action to take place, such as in part II.J.18.c Decanting, the beneficiary has a better case for the modification not constituting a gift. If and to the extent that the person(s) modifying the trust has discretion to do so and a beneficiary has no rights to stop the modification, such as described in part II.J.18.f Commutation vs Mere Division, that beneficiary has a better case for the modification not constituting a gift. These arguments are important, because the consequences of a beneficiary making a gift in trust are disproportionately big; see part III.B.7.d Code § 2702 Overview.[6336]

For smaller companies, consider gifts either outright or in trust. Gifts provide more favorable valuation rules than transfers by bequest. Suppose, for example, that a decedent bequeathed 100% of the stock of her business to her children. The bequest is of a single 100% block of stock, so valuation adjustments for lack of control would not apply. However, if while alive she gave a 20% block of stock to each of five children, so that she gave away 100% of all of stock all at once. Each 20% block is valued separately, with valuation adjustments for lack of control.[6337] Similarly, when a taxpayer owning 100% of real property gave a 48% interest each

[6336] Especially text accompanying fns 7381-7390.
[6337] Rev. Rul. 93-12.

son and retained a 4% interest for himself, each son's interest was properly valued as a stand-alone 48% interest.[6338]

When a donor delivers a properly indorsed stock certificate, when the gift is complete depends on to whom the donor delivers the certificate:[6339]

- If delivered to the donee or the donee's agent, the gift is complete for gift tax purposes on the date of delivery.

- If delivered to the donor's bank or broker as the donor's agent, or to the issuing corporation or its transfer agent, for transfer into the name of the donee, the gift is complete on the date the stock is transferred on the corporation's books.

A gift to a minor should probably be done using the Uniform Transfers to Minors Law unless the gift is in trust. Gifts to minors of partnership interests that are not done in that manner can be problematic, and a conservatorship would be advisable.[6340]

For corporations, the author frequently recommends that clients create nonvoting stock, doing a 19-for-1 nonvoting-for-voting stock dividend.[6341] The parent keeps the voting stock, which represents all of the voting rights, but only 5% of the distribution rights, the parent then transfers part or all of the nonvoting stock.[6342] This restructuring may also be a prelude to the more advanced techniques.

For an S corporation, a simple way to protect the principal from the donee's creditors (including the IRS through estate taxes) would be to use a qualified subchapter S trust (QSST).[6343] A QSST has only one beneficiary, and all of its income must be distributed to that individual. A QSST's income is taxed to its beneficiary,[6344] which means that the trust's fiduciary income tax returns simply report the trust's income on a statement, which the beneficiary then uses to prepare his or her own individual income tax returns. For the merits of QSSTs compared to

[6339] Reg. § 25.2511-2(h). When in doubt as to whether the gift was complete, look at the parties' conduct and local law. *Estate of Davenport*, T.C. Memo. 1997-390, *aff'd* 184 F.3d 1176 (10th Cir. 1999) (completed gift when donor signed stock power).

[6340] Reg. § 1.704-1(e)(2)(viii) provides that, except where a minor child is shown to be competent to manage his own property and participate in the partnership activities in accordance with his or her interest in the property, a minor child generally will not be recognized as a member of a partnership unless control of the property is exercised by another person as fiduciary for the sole benefit of the child, and unless there is such judicial supervision of the conduct of the fiduciary as is required by law. Of course, that is an income tax regulation and does not on its face apply for gift/estate/GST tax purposes. An income tax regulation cannot override the state law property rights that apply for gift/estate/GST tax purposes, and the *Pierre* case certainly drove home that point when it held that the check-the-box regulations did not apply to determine the gift tax effect of the transfer of an interest in a single-member LLC; *Pierre* is described in part III.B.1.e Valuation Issues. On the other hand, gift/estate/GST tax rules governing partnerships are not well-defined, and courts and the IRS often look to income tax rules when figuring out matters involving partnerships, so a conservatorship would be recommended to avoid an argument, as well as to prove acceptance of the gift.

[6341] See fn 234 for reporting requirements relating to this stock dividend.

[6342] A transfer of nonvoting stock poses much less estate tax risk than a transfer of minority voting stock. See fns 230-232.

[6343] Code § 1361(d)(3).

[6344] Code § 1361(d)(1)(B).

other alternatives, see part III.A.3 Trusts Holding Stock in S Corporations, especially part III.A.3.e.iii Comparing QSSTs to ESBTs.

Whether a transfer qualifies for the gift tax annual exclusion depends on whether the property is transferable or income-producing and whether it is outright or in trust.[6345] If the interest transferred is not income-producing, consider giving the donee the right to sell it to the donor for its fair market value within 30 days after the transfer. If, however, the donor received the funds from an unauthorized distribution from a trust, the gift may be undone.[6346]

For the first year a gift is made to a trust that has generation-skipping transfer (GST) potential, I strongly recommend filing timely (including extensions) a gift tax return stating whether the donor elects to automatically allocate[6347] or not allocate[6348] GST exemption to the donor's current and future gifts to the trust, which election may be revoked or otherwise modified on future timely-filed gift tax returns. "Vested" trusts for grandchildren (or other skip persons) may qualify for the GST annual exclusion, but trusts that do not so qualify are much more common. A trust whose beneficiaries are only skip persons is itself considered a skip person, and gifts to such a trust automatically are allocated GST exemption. Also, a trust that reserves enough benefits for skip persons is a "GST trust" (unless opted out under the first sentence of this paragraph),[6349] gifts to which are "indirect skips" that automatically attract GST exemption.

[6345] For qualification of withdrawal rights for the annual exclusion, see *Crummey v. Commissioner*, 397 F.2d 82 (9th Cir. 1968), and its progeny. For whether an interest in a business entity qualifies for the annual exclusion, see part III.B.1.h Transfers in the Ordinary Course of Business. For the amount of the annual exclusion, see Code § 2503(b).

[6346] The official Tax Court syllabus to *Estate of Lillian L. Halpern v. Commissioner*, T.C. Memo. 1995-352:

> A trust established for D's benefit under the will of her husband, H, provided for payment to her of income for life (and principal according to an ascertained standard) and gave her a testamentary general power of appointment. Distributions of trust principal were made to members of D's family, both before and after D, having suffered a stroke, was adjudged incompetent. Those distributions were not authorized by H's will or by court order. All living members of the family, including D, agreed, either personally or through custodians, to the distributions before D's incompetency; D did not agree, even through her guardians, to the distributions after her incompetency, but all the other members of the family did agree.
>
> *Held*, sec. 2038, I.R.C., does not apply to include any of the distributions in D's gross estate. *United States v.* Field, 255 U.S. 257 (1921), followed.
>
> Held further, a Pennsylvania court would not have returned to the marital trust the assets *distributed* to family members prior to D's incompetency, and those assets are therefore not included in D's gross estate under sec. 2041, I.R.C. *Estate of Council v. Commissioner*, 65 T.C. 594 (1975), followed.
>
> *Held* further, a Pennsylvania court would have returned to the marital trust the assets distributed following D's incompetency, and they therefore are included in D's gross estate under sec. 2041, I.R.C.
>
> *Held* further, assets transferred through the 1986 distributions, which occurred within 3 years of D's death, are not included in her gross estate under sec. 2035, 2038, or 2041, I.R.C., by virtue of that timing.

[6347] Code § 2632(b)(5)(A)(ii).

[6348] Code § 2632(b)(5)(A)(i).

[6349] Code § 2632(c)(3)(B) describes what a "GST trust" is. Letter Ruling 200243026 involved a GST trust. Letter Ruling 201714008 seems to indicate that one ignores unexercised powers of appointment when determining whether a trust is a "GST trust." Letter Ruling 201714008 involved the following facts:

> On Date, a date occurring after 2001, Donor created Trust for the benefit of Brother, Brother's spouse, and Brother's descendants. On the same date, Donor transferred $a to Trust.

Restructuring trusts might or might not have tax consequences. The discussion in the rest of this part III.B.1.b is subject to the idea that any person, who is a remainderman in default of the exercise of a power of appointment and is not a current permissible distributee, appears not to have an interest in any modification that affects only current trust administration and therefore would not make a gift upon any such modification.[6350] However, CCA 202118008 argued that the interests of remaindermen in default of a testamentary power of appointment, who were children when the class of potential appointees was descendants, were readily valued.[6351]

Suppose a trust includes a power that would cause estate inclusion and a court modifies the trust (not a retroactive clarification, but rather a prospective modification). Letter Ruling 201652002 approved reforming a GRAT to include required language.[6352] Florida Trust

---

> Under the trust instrument, Brother has a lifetime and testamentary limited power to appoint trust assets to Brother's spouse or lineal descendants, subject to an ascertainable standard, and the power to appoint trust assets to any charitable organization, but has no power to appoint assets in favor of himself, his estate, his creditors, the creditors of his estate, or to discharge any of his legal obligations.
>
> Under the trust instrument, Brother has a withdrawal power in an amount equal to any contribution to Trust and upon his death, the withdrawal power passes to Brother's spouse. The withdrawal power may not exceed the least of (i) the total amount of contributions to Trust during that year, (ii) the amount allowable at the time of the first contribution as an exclusion from gift tax under § 2503(b)(3) (or twice this amount if the donor is married on the date of the last of all contributions made during that year), and (iii) the greater of $5,000 or 5 percent of the value of Trust. Trust provides that any unexercised right of withdrawal shall lapse at the end of each year or, if earlier, thirty days after the contribution to which it relates.

Counsel advised the donor that the trust was a "GST trust." Later, counsel was not quite sure. Thus, rather than formally electing to treat the trust as a "GST trust" on a gift tax return reporting the first gift to the trust, a pretty painless procedure, the donor instead needed to get an expensive letter ruling. Fortunately, Letter Ruling 201714008 held:

> In this case, Trust is a trust that could have a GST with respect to the transferor. Under the terms of Trust, no provision is made for mandatory distributions to beneficiaries who are non-skip persons. Although Brother is granted a power of appointment over Trust corpus, the power is limited to a certain class of beneficiaries and Brother has no power to appoint assets in favor of himself, his estate, his creditors, the creditors of his estate, or to discharge any of his legal obligations. Although Trust provides withdrawal powers to beneficiaries who are non-skip persons, since the amount of the annual withdrawal rights in Trust do not exceed the amount referred to in § 2503(b), the amount subject to the withdrawal right shall not be considered to be includible in the gross estate of a non-skip person or subject to a right of withdrawal pursuant to § 2632(c)(3)(B). Furthermore, the withdrawal rights lapse each year in their entirety. Accordingly, based on the facts submitted and the representations made, we conclude that none of the exceptions to the definition of a "GST trust" in § 2632(c)(3)(B) apply. Therefore, on the date of Donor's Transfer to Trust, Trust was considered a "GST trust" under § 2632(c)(3)(B) and, accordingly, we conclude that Donor's available GST exemption was automatically allocated to the transfer to Trust on Date pursuant to § 2632(c)(1).

[6350] See fn 2136 in part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap.

[6351] CCA 202118008 is described in detail in the text preceding the text accompanying fn 2996 in part II.J.18.d Trust Commutations.

[6352] For comments from the ACTEC Fellow who obtained the ruling, see Thompson Coburn LLP document number 6488460. Letter Ruling 201941023 gave retroactive effect (and therefore no tax consequences) to a reformation:

> In this case, an examination of the relevant trust instruments, affidavits, and representations of the parties indicate that the original terms of Paragraph 7.02, resulting from a scrivener's error, were contrary to the intent of Settlor. The purpose of the reformation is to correct the scrivener's error, not to alter or modify the trust instrument.

Code § 736.0416, which corresponds to Uniform Trust Code § 416, authorized the action. The GRAT's savings clause probably helped a lot in terms of making the court action a retroactive reformation clarify the original intent rather than a prospective modification:

> In this case, each trust instrument provides that Grantor's retained interest is intended to constitute a qualified interest within the meaning of § 2702(b)(1). However, the attorney retained to draft each trust instrument failed to include in each instrument the prohibition required by § 25.2702-3(d)(6) thus causing the interest Grantor retained in each Trust to fail to constitute a qualified interest within the meaning of § 2702(b)(1). The trust instruments and State Statute permit the amendment of each Trust.
>
> Accordingly, based on the facts submitted and the representations made, we conclude that as a result of the judicial reformation of Trusts to correct scrivener's error, Grantor's interest in each Trust is a qualified interest under §§ 25.2702-2 and 25.2702-3, effective as of the date each Trust was created.

Although the modification itself might have transfer tax consequences, if the modification is legally binding then the IRS will respect its subsequent effect – even if inconsistent with what the highest court in the state would have done. Rev. Rul. 73-142 held:

> In this case the lower court had jurisdiction over the parties and over the subject matter of the proceeding. Thus, the time for appeal having elapsed, its judgment is final and conclusive as to those parties, regardless of how erroneous the court's application of the state law may have been. Consequently, after the time for appeal had expired, the grantor-decedent did not have the power to appoint himself as successor trustee. The aforesaid rights and powers which would otherwise have brought the value of the trust corpus within the provisions of sections 2036 and 2038 of the Code were thus effectively cut off before his death.
>
> Unlike the situation in *Bosch*, the decree in this case was handed down before the time of the event giving rise to the tax (that is, the date of the grantor's death). Thus, while the decree would not be binding on the Government as to questions relating to the grantor's power to appoint himself as trustee prior to the date of the decree, it is controlling after such date since the decree, in and of itself, effectively extinguished the power. In other words, while there may have been a question whether the grantor had such power prior to the decree, there is no question that he did not have the power thereafter.
>
> Accordingly, it is held that the value of the property transferred to the inter vivos trust is not includible in the grantor-decedent's gross estate under section 2036 or section 2038 of the Code.

However, the IRS sometimes conflates the two concepts, as it did in CCA 201747005.[6353]

Failing to enforce one's legal rights might constitute a gift. Rev. Rul. 84-105 held that the surviving spouse made a gift by failing to object to underfunding of a general power of

---

[6353] See part II.J.4.c.i Estate or Nongrantor Trust Contribution Deduction Requirements, looking at the requirement that the governing instrument must authorize a distribution to charity for the trust to take the Code § 642(c) charitable deduction.

appointment marital deduction trust for her benefit over which she appeared to have an unlimited withdrawal right:

> In the present case, S could have recovered the [shortfall] by routinely asserting in the local probate court the right as beneficiary under D's will to have the bequest adequately satisfied. The fact that some of the land would have had to be either sold or severed to satisfy fully the bequest to S would not have impaired S's claim for full satisfaction. The failure of S to raise an objection to the underfunding of the testamentary trust at some time before the expiration of S's right to appeal the final order of the local probate court in effect constituted an irrevocable transfer to C by S of the 40x dollar amount.
>
> S's acquiescence in the underfunding of the trust is not an assignment or surrender of a property interest in settlement of a controversy described in section 20.2056(e)-2(d)(1) of the regulations. Further, S's acquiescence is not a qualified disclaimer because S made no disclaimer of the 40x dollar amount within 9 months of D's death.
>
> For purposes of the estate and gift tax provisions of the Code, the amount of property that passed from D to S under D's will was [the full amount of the bequest shown on the estate tax return], notwithstanding the underfunding of S's trust. The [shortfall] that was diverted by D's executor from S to C is a gift by S to C on [the expiration date of S's right to appeal the probate court's approval of the estate settlement].

Rev. Rul. 81-264 held that D made a gift to A by failing to enforce A's note payable to D:

> Here, as in all such familial transactions, there is a presumption that the transfer of wealth from D to A without consideration is not entirely free of donative intent. *Estate of Lang v. Commissioner*, 64 T.C. 404 (1975), *aff'd*, 613 F.2d 770 (9th Cir. 1980). A had the resources to pay the debt, and, as D's child, was the natural object of D's bounty. On these facts, D's failing to enforce the debt obligation and permitting it to be barred by the statute has not been shown to be free of donative intent, and thus is not a transaction in the ordinary course of business within the meaning of section 25.2512-8 of the regulations.
>
> It does not matter that the running of the statute of limitations does not extinguish the debt but merely creates an affirmative defense in a collection suit. Control of the debt passes to the debtor when the statute of limitations runs. Thereafter, it is the debtor rather than the creditor who decides whether and under what terms loaned funds will be repaid. The essence of a gift is such relinquishment of control by the donor over the property. *Estate of Lang v. Commissioner*.

Providing background to Rev. Rul. 81-264, GCM 38584 reasoned:

> We generally agree with the conclusion of the proposed revenue ruling that D makes a gift to A upon the expiration of the statute of limitations. *Estate of Lang v. Commissioner*, 64 T.C. 404 (1975), *aff'd*, 613 F.2d 770 (9th Cir. 1980). In *Lang*, the Service asserted a gift tax deficiency based upon the lapse of the statute of limitations on the collection of certain loans made by Mrs. Lang to her son. The Tax Court, finding that the petitioner had not overcome the presumption of correctness of the respondent's determination that taxable gifts were made upon the expiration of the statute, sustained the Commissioner. The court noted that donative intent on the part of Mrs. Lang was irrelevant to the

determination that a gift had been made[1] and that Mrs. Lang was presumed to know that the statute had run.

[1] *See Commissioner v. Wemyss*, 324 U.S. 303, 306 (1945), Treas. Reg. § 25.2511-1(g)(1).

The Ninth Circuit, in affirming the Tax Court decision, analyzed the transfer of property necessary to an imposition of a gift tax in the following manner.

> The running of the statute of limitations, however, accomplishes much more than the taxpayer suggests. It serves to transfer control of a debt to the debtor at the end of the statutory period. Thereafter, it is the debtor rather than the creditor who decides whether and under what terms loaned funds will be repaid. *Cf. Smith v. Shaughnessy*, 318 U.S. 176, 181 (1943) ("The essence of a [taxable] gift by trust is the abandonment of control over the property put in trust ") That control is transferred by a statutory mechanism rather than an overt donative gesture is not significant. "Indirect" gifts are as subject to the gift tax as are "direct" gifts. I.R.C. § 2511(a); Treas. Reg. § 25.2511-1(c) (1958). *Estate of Lang*, 613 F.2d at 773.

The Ninth Circuit also noted several factors that supported the presumption of a gift. Mrs. Lang's son had borrowed money from Mrs. Lang on five separate occasions, never repaying any portion of it. Further, Mrs. Lang had expressly forgiven portions of two of the loans, and in her will she forgave the remaining debts of her son, including the loans at issue. Finally, the court noted that the loans were not typical business loans since they bore no interest. Based upon these facts, the court held that the Tax Court did not err in finding that Mrs. Lang had allowed the statute of limitations to run and had thereby implicitly forgiven the debts. Moreover, the court noted that this finding of donative intent was not essential to a finding that a taxable gift had occurred.

Therefore, we generally agree that under the facts in the proposed revenue ruling D will make a gift to A upon the expiration of the statute of limitations on the collection of the loan. We wish to point out, however, that there may be occasions where a taxpayer can successfully argue that the transfer occasioned by the lapse of the statute of limitations was made "in the ordinary course of business' within the meaning of Treas. Reg. § 25.2512-8 so as to prevent such transfer from being classified a gift. Treas. Reg. § 25.2512-8 provides in relevant part as follows:

> § 25.2512-8 *Transfers for insufficient consideration*. Transfers reached by the gift tax are not confined to those only which, being without a valuable consideration, accord with the common law concept of gifts, but embrace as well sales, exchanges, and other dispositions of property for a consideration to the extent that the value of the property transferred by the donor exceeds the value in money or money's worth of the consideration given therefor. However, a sale, exchange, or other transfer of property made in the ordinary course of business (a transaction which is bona fide, at arm's length, and free from any donative intent), will be considered as made for an adequate and full consideration in money or money's worth….

Although not articulated with any precision by either the Tax Court or the Ninth Circuit, this concern that certain transfers occasioned by the lapse of the statute of limitations might not be gifts is evident in both opinions. The Tax Court flatly stated:

> We do not thereby imply that in all circumstances the mere running of the statute of limitations on a loan constitutes a gift for gift tax purposes. We merely hold that under the circumstances of this case, we cannot rule that petitioner has carried its burden of proof to the contrary. *Estate of Lang*, 64 T.C. at 413.

The Ninth Circuit specifically noted that the loans by Mrs. Lang to her son "were not typical business loans, for they bore no interest," 613 F.2d at 773. Interestingly, in answering the petitioner's assertion that, because Mrs. Lang had died, it had no way of proving she did not intend to allow the statute to run, the Ninth Circuit stated in a footnote that petitioner might have had other parties testify whether Mrs. Lang ever made informal attempts to collect the debts. Since the court, as discussed above, also noted that donative intent was irrelevant, its discussion of methods for proving intent in the footnote can be construed as relating to the limited exception for transfers made "in the ordinary course of business."

Intrafamily transactions are of course subject to great scrutiny and will create the presumption of a gift. *Heringer v. Commissioner*, 235 F.2d 149, 151 (9th Cir. 1956). Both the courts and the Service have recognized, however, that bona fide, arm's length transfers between family members or related persons may be for an adequate consideration in money or money's worth in certain circumstances and therefore not be taxable gifts. *See, e.g.*, *Beveridge v. Commissioner*, 10 T.C. 915 (1948), *acq.*, 1949-1 C.B. 1; *Estate of Friedman v. Commissioner*, 40 T.C. 714 (1963), *acq.*, 1964-1 (Part 1) C.B. 4; *Estate of Messing v. Commissioner*, 48 T.C. 502 (1967), *acq.*, 1968-1 C.B. 2; G.C.M. 33351, … I-2255 (Oct. 13, 1966). O.M. 19249, … I-95-80 (May 9, 1980).

Under the facts in the proposed revenue ruling, D's loan to A , unlike the situation in Lang, was evidenced by a legally enforceable promissory note with interest payable at the market rate. Although D and A initially intended the note to be enforceable, A failed to repay it upon maturity even though A had "some financial resources" Based upon these facts, the ruling concludes that D made a gift to A upon the expiration of the statute of limitations. We believe that D might under certain circumstances be able to convince a court that the transfer occasioned by the lapse of the statute of limitations was made "in the ordinary course of business." For example, suppose that the loan to A had been for use in A's sole proprietorship. Although A had some business and personal assets, D's collection of the loan would have bankrupted the business, leaving D with a net recovery after court costs of far less than the money loaned. D decided not to sue for collection because he believed that the prospects of eventual full recovery on the note were good. D fully intended to eventually recover all the money loaned. Under such circumstances, D may be able to convince a court that the transfer occasioned by the lapse of the statute was made "in the ordinary course of business."

We emphasize that we are not suggesting the Service should necessarily accept a taxpayer's contentions in this regard, for the evidence produced may well be self-serving. As discussed above, intrafamily transactions create the presumption of a gift. We only wish to note that where a transferor like D is able to show that the statute of limitations lapsed under circumstances similar to those outlined above, we believe a court might find that no taxable gift has occurred.[2]

[2] We express no opinion on whether D would be allowed a bad debt deduction if the debt became worthless under such circumstances. Courts have often treated advances by parents to their children as gifts rather than true debts for income tax

purposes. *See*, *e.g.*, *Grossman v. Commissioner*, 9 B.T.A. 643 (1927); *Davidson v. Commissioner*, 37 T.C.M. 725 (1978). When courts have found a true indebtedness to exist, however, they have sometimes allowed bad debt deductions. See, *e.g.*, *Estate of Ames v. Commissioner*, 5 T.C.M. 73 (1946); *Walsh v. Commissioner*, 313 F.2d 389 (4th Cir. 1963). Of course, the debt must generally be worthless for a deduction to be allowed, and courts have sometimes found taxpayer's proof of worthlessness insufficient when no efforts to collect on loans to family members have been made. *See*, *e.g.*, *Griffiths v. Commissioner*, 70 F.2d 946 (7th Cir. 1934); *Acheson v. Commissioner*, 155 F.2d 369 (5th Cir. 1946). We likewise express no opinion on whether a deduction for non-business bad debts would be allowed in view of the limitations on deductibility under section 267 of the Code.

We recognize that the proposed revenue ruling should not be a roadmap for taxpayer avoidance. We therefore feel that it is unnecessary to highlight the "ordinary course of business' exception through an extended discussion of its potential application to the facts in the proposed ruling. We believe that the reference to Treas. Reg. § 25.2512-8 in the analysis section of the proposed ruling is sufficient to acknowledge the existence of an exception to the general rule.[3]

[3] Our concern that certain transfers occasioned by the lapse of the statute of limitations might be "in the ordinary course of business' in no way affects the rationale or conclusion in Rev. Rul. 77-299, 1977-2 C.B. 343, considered by this office in G.C.M. 36356 …, I-216-75 (Aug. 4, 1975). As the proposed revenue ruling notes, Rev. Rul. 77-299 held that the intent to forgive promissory notes at the inception of a "loan" rendered such notes illusory consideration; hence, the transfer was not made for an adequate consideration in money or money's worth, and a gift was made of the loan proceeds. Under the proposed revenue ruling, the note given by A to D was intended to be enforceable. Consequently, there was consideration at the loan's inception.

Finally, we have revised the facts of the proposed revenue ruling to indicate that the statute of limitations on the collection of the interest expired at the same time as the statute of limitations on the collection of the principal. While the general rule with respect to installment payments of interest due before the maturity of the principal debt is that the statute of limitations does not begin to run until the principal debt is due and payable,[4] in certain jurisdictions the statute begins to run against each installment when it becomes payable.[5] To avoid unnecessary confusion and to provide simplicity of result, we have therefore made the above-mentioned factual revision. Consequently, the amount of the gift will equal the unpaid balance of the principal plus accrued interest.

[4] See Annot., 36 A.L.R. 1085 (1925).

[5] Annot., 36 A.L.R. 1085 (1925), *supra* n.4; *See*, *e.g.*, *Fuller v. White*, 33 Cal.2d 236, 201 P.2d 16 (1949) (interpreting Cal. Code Civ. Proc. § 337).

A revised proposed ruling incorporating this suggested change is attached for your consideration.

Thus, the trustee might want to consider providing accountings or other notices to the beneficiaries that would start running the statute of limitations for making a claim against the trustee so that the beneficiaries could not add up all of their alleged grievances and then pile them together, which procedure might help minimize any gift tax consequences to failing to make a claim.[6354]

If a beneficiary exercises his inter vivos limited power of appointment in a manner that moves all of the trust's assets elsewhere, the beneficiary has made a gift of the beneficiary's interest in the trust, even though Code § 2514 itself does not capture the exercise as a gift. Reg. § 25.2514-1(b)(2) provides:

> The power of the owner of a property interest already possessed by him to dispose of his interest, and nothing more, is not a power of appointment, and the interest is includible in the amount of his gifts to the extent it would be includible under section 2511 or other provisions of the Internal Revenue Code. For example, if a trust created by S provides for payment of the income to A for life with power in A to appoint the entire trust property by deed during her lifetime to a class consisting of her children, and a further power to dispose of the entire corpus by will to anyone, including her estate, and A exercises the inter vivos power in favor of her children, she has necessarily made a transfer of her income interest which constitutes a taxable gift under section 2511(a), without regard to section 2514.

Letter Ruling 9451049 held that the exercise of an inter vivos limited power of appointment constituted a gift:

> The inter vivos powers held by A and B to direct distributions to the descendants of the decedent cannot be exercised to benefit the possessor of the power, her estate or the creditors of either. Consequently, these powers are not general powers of appointment as described under section 2514. Further, the exercise of these powers will not result in the release of any general power possessed by either A or B over trust corpus, as described in section 25.2514-1(b)(2)….
>
> However, A and B have, during their respective lives, the right to periodic distributions of income and principal to provide for health, support and maintenance in the standard of living to which each is accustomed. The proposed exercise by A and B of their respective special powers would constitute a transfer of their interests under section 25.2514-1(b)(2) and section 2511(a). The value of their interests is readily ascertainable. See Rev. Rul. 75-550, 1975-2 C.B. 357. Consequently, A and B's exercise of their respective powers to appoint their respective trust estates to each other constitutes a transfer of their respective beneficial interests in each trust. See section 25.2514-1(b)(2). Each transfer would constitute a taxable gift under section 2511(a).

Rev. Ruls. 70-292 and 75-550 are not directly on point but do explain how to value a beneficial interest for purposes of the Code § 2013 credit for tax on prior transfers. They are reproduced in part III.B.1.e.ii Valuing a Beneficial Interest in a Trust.

Reg. § 25.2514-3(e), Example (1), provides:

> The income is payable to L for life. L has the power to cause the income to be paid to R. The exercise of the right constitutes the making of a transfer of property under

[6354] See part II.J.4.j Helping the Trustee Provide Annual Notices to Beneficiaries to Reduce Exposure.

> section 2511. L's power does not constitute a power of appointment since it is only a power to dispose of his income interest, a right otherwise possessed by him.

Reg. § 25.2514-3(e), Example (2), provides:

> The income is to be accumulated during L's life. L has the power to have the income distributed to himself. If L's power is limited by an ascertainable standard (relating to health etc.) as defined in paragraph (c)(2) of § 25.2514-1, the lapse of such power will not constitute a transfer of property for gift tax purposes. If L's power is not so limited, its lapse or release during L's lifetime may constitute a transfer of property for gift tax purposes. See especially paragraph (c)(4) of § 25.2514-3.

Reg. § 25.2514-3(e), Example (3), provides:

> The income is to be paid to L for life. L has a power, exercisable at any time, to cause the corpus to be distributed to himself. L has a general power of appointment over the remainder interest, the release of which constitutes a transfer for gift tax purposes of the remainder interest. If in this example L had a power to cause the corpus to be distributed only to X, L would have a power of appointment which is not a general power of appointment, the exercise or release of which would not constitute a transfer of property for purposes of the gift tax. Although the exercise or release of the nongeneral power is not taxable under this section, see § 25.2514-1(b)(2) for the gift tax consequences of the transfer of the life income interest.

Rev. Rul. 79-327 reasons:[6355]

> An income interest and a special power to appoint the underlying property to other persons are separate rights that may be possessed by an individual. If the individual possesses both the special power and the income interest, the exercise of the special power during life results in a gift, for purposes of section 2511, since the individual, by exercising the power, also relinquishes the income interest. See section 25.2514-1(b)(2) of the regulations. But see *Self v. United States*, 142 F.Supp. 939 (Ct. Cl. 1956), where the court reached a contrary conclusion. The Service will not follow *Self* to the extent that it is contrary to the regulations.
>
> Example 3 of section 25.2514-3(e), discussed above, considers only the gift tax consequences of the exercise or release of a special power of appointment and is limited to the application of section 2514 with respect to a transfer of corpus subject to the power. Therefore, Example 3 does not address the section 2511 gift tax consequences of the relinquishment of an income interest. Thus, a release of the special power, permitting the remainder to pass in default of appointment, results in no gift. However, the exercise of the special power terminates the life interest resulting in a gift of that interest under section 2511. See E.T. 23, 1950-1 C.B. 133, declared obsolete in Rev. Rul. 67-97, 1967-1 C.B. 380, setting forth the same position with regard to statutory provisions and regulations under the 1939 Internal Revenue Code substantially similar to those in issue in this case.

[6355] In Reg. § 26.2601-1(b)(4)(i)(E), Example (7), two siblings relinquished their income interests in favor of another sibling beneficiary. The Example concludes that the relinquishment constituted a taxable gift but did not change the trust's GST-grandfathered status.

Letter Ruling 200243026 asserted that this rule applies even though any distributions to the beneficiary were in the "sole discretion" of a disinterested trustee. Letter Ruling 200243026 reasoned:

> Pursuant to Trust, Spouse also has interests in the income and principal of Trust. Trust provides that the Disinterested Trustee, in his sole discretion, may distribute to Spouse income and/or principal as the Disinterested Trustee deems necessary or appropriate for the care, support, maintenance, education, advancement of life and comfortable living of Spouse. As a result of Spouse's exercise of his inter vivos special power appointing the Trust corpus to the Child 3 Trust, Grandchild 1 Trust, and Grandchild 2 Trust, Spouse will relinquish his income and corpus interests in Trust. Although Spouse's rights to receive income and principal distributions from Trust are subject to the sole discretion of the Disinterested Trustee, the relinquishment of these interests will be a taxable gift under § 2511(a). See *Estate of Regester*, *supra* and Rev. Rul. 79-327, *supra*. The value of the gift is a question of fact and the Service does not rule on such factual determinations. See Rev. Proc. 2002-1, 2002-1 I.R.B. 1, 20, and Rev. Rul. 75-550, 1975-2 C.B. 357 (illustrating the correct method of computing the value of a decedent's interest in a residuary trust subject to the discretionary power of the trustee to invade corpus for the benefit of others).

Further above, the ruling had mentioned:

> *Estate of Regester v. Commissioner*, 83 T.C. 1 (1984) (holding that a decedent made a taxable gift of her life interest in the income of a trust when she transferred the corpus of the trust through the exercise of a special power of appointment).

TAM 9419007 asserted that an inter vivos limited power was tantamount to a general power because the taxpayer had the current right to income and the right to receive all of the principal at age 30. The facts were:

> THE CREATION OF THE TRUSTS:
>
> Under the facts as presented, in 1959, the Grantor purportedly created eleven separate trusts for the benefit of the members of the family of M. Each trust had an initial term of 20 years. During the first 15 years of the trust term, income was accumulated. During the next 5 years of the trust term, income was paid for the support of a designated older generation family member.
>
> At the end of the 20-year term, each trust was to be held for the benefit of a designated grandchild of N. The principal and accumulated income of each separate trust was distributable to a designated grandchild when he or she reached age 30. If a grandchild died before reaching age 30, the trust property otherwise distributable to him or her was to be distributed instead to his or her issue, or if none, to (or for the benefit of) the other younger generation family members. Between the end of the 20-year trust term and the date that a respective grandchild reached age 30, the income of the separate trust held for that grandchild was payable to him or her. The provision creating this interest states:
>
>> As to any persons designated to receive distributions . . . who shall be under 30 years of age at the end of the 60 month period, instead of making distribution to such person, TRUSTEE SHALL DISTRIBUTE TO SUCH PERSON THE NET INCOME FROM HIS TRUST UNTIL HE ATTAINS THE AGE OF 30, at which time

> Trustee shall distribute to him all the accumulated income fund, current income and any principal then remaining in his trust. [Emphasis added.]

> Under the provisions of each separate trust, each grandchild had a power of appointment, labeled a "Limited Power of Appointment." The power was exercisable at any time during the grandchild's lifetime by written instrument or at death by testamentary instrument. Under the "Limited Power of Appointment," each grandchild could appoint "his interest in the trust estate" to, or in trust for, certain family members. The trust instrument states:

>> No power of appointment . . . shall be exercised to any extent in favor of the Donee of such power, his estate or for the benefit of his creditor or the creditors of his estate....

> THE DONOR'S EXERCISE OF THE POWER OF APPOINTMENT BEFORE REACHING AGE 30:

> The Donor is a grandchild of N and was the designated beneficiary of one of the trusts. Her siblings and cousins were the designated beneficiaries of the other trusts.

> The initial 20-year trust term ended in 1979 at which time the grandchildren, including the Donor, became the prime beneficiaries of the trusts. In early 1980, before any of the grandchildren had reached age 30, but after they had all attained their majority, the Donor and the other grandchildren each exercised his or her power to appoint his or her trust interests. Pursuant to a document captioned "Exercise of Limited Power of Appointment" dated February 1980, the Donor directed that her trust interests be distributed to newly created trusts (herein referred to as the Family Trusts) for the benefit of certain other family members. The other grandchildren made similar dispositions.

> At the time that the powers of appointment were exercised, the Donor (and each grandchild) possessed: 1) a contingent remainder interest in a trust (which would ripen into absolute ownership of the property upon that grandchild's reaching age 30); and 2) the right to receive current trust income until reaching age 30. The issue presented is whether the Donor made a taxable gift when she exercised the "Limited Power of Appointment," thus relinquishing these interests in favor of the other family members.

If and to the extent that the transfer is a gift, person exercising the power of appointment becomes the transferor with respect to the gifted portion and may allocate GST exemption to that portion.[6356] Letter Ruling 200243026 reasoned:

> Further, because Spouse will have made a taxable gift of his income and principal interests to the three trusts, Spouse will be considered the transferor of the value of the taxable gift for purposes of chapter 13. The beneficiaries of the Grandchild 1 Trust and Grandchild 2 Trust include Spouse's grandchildren, descendants of the grandchildren or charitable organizations. Therefore, the trust is a skip person. Accordingly, the transfer is a direct skip for purposes of chapter 13. Spouse's GST exemption will be deemed allocated to the property transferred by him to the two trusts, unless Spouse elects not to have § 2632(b) apply. The beneficiaries of the Child 3 Trust include Spouse's child, Child 3, Child 3's spouse, Child 3's issue, spouses of Child 3's issue, and descendants

[6356] See part III.B.1.d.iii Who Is the Transferor.

> of Child 3. The trust could have a generation-skipping transfer with respect to the transferor, Spouse, and the trust does not come within any exceptions contained in § 2632(c)(3)(B)(i). Therefore, the Child 3 Trust is a GST trust. Accordingly, the transfer is an indirect skip for purposes of chapter 13. Spouse's GST exemption is deemed allocated to the property transferred by Spouse to the Child 3 Trust, unless Spouse elects not to have § 2632(c) apply. Each portion of the three trusts of which Spouse is the transferor will comprise the chapter 13 portion of each trust. The non-chapter 13 portions and the chapter 13 portions of each trust are treated as separate trusts for purposes of chapter 13. Section 26.2654-1(a)(2)(i).
>
> Accordingly, based upon the facts submitted and representations made, we rule as follows: The proposed exercise of the power of appointment by Spouse and the resulting transfer of the appointed assets of Trust to the two GSETs and the Child 3 Trust will not constitute constructive additions to the Trust under § 26.2601-1(b)(1)(v). The proposed exercise of the power of appointment by Spouse will result in a taxable gift of Spouse's income and principal interests under § 2511. For purposes of chapter 13, Spouse will be the transferor of the gifted property transferred by Spouse to the Child 3 Trust and the two GSETs. The gifted property in each trust will comprise the chapter 13 portion of the trusts. The balance of the corpus of each trust will constitute the non-chapter 13 portion of each trust. Spouse's GST exemption will be deemed allocated to the chapter 13 portions of each trust, unless Spouse elects not to have § 2632(b) and (c) apply. The chapter 13 portion of each trust will have an inclusion ratio determined under § 2642. The non-chapter 13 portions of each trust will be exempt from GST tax under § 26.2601-1(b)(i).

For more about when gifts change the transferor, see part III.B.1.d.iii Who Is the Transferor. Reg. § 26.2654-1(a)(2), "Multiple transferors with respect to single trust," is reproduced in part III.B.1.d.iii Who Is the Transferor.

Of course, a nonqualified disclaimer of a life estate constitutes a gift of the value of the life estate.[6357]

Another gift might be early termination of a trust. When a beneficiary may receive distributions under an ascertainable standard and has an annual right to withdraw from the trust, the beneficiary made a gift by renouncing distributions to her while living,[6358] caused her to become

---

[6357] Letter Ruling 201928003, which the taxpayer requested under Reg. § 25.2512-5(d)(4), held:

> In the present case, Taxpayer disclaimed her life estate interests in three trusts on Date 2. The disclaimer constituted completed gifts to the owners of the remainder interests in the trusts. At the time the gifts were made, Taxpayer had been diagnosed as being terminally ill with at least a fifty percent probability that she would die within one year of Date 2. Taxpayer died on Date 3. Because Taxpayer was terminally ill within the meaning of § 25.7520-3(b)(3) at the time of the Date 2 gifts, the mortality component prescribed under § 7520 for ordinary life estate interests may not be used to determine the present value of the life estate interests disclaimed by Taxpayer on Date 2. Thus, an actuarial factor of .00043 must be used in valuing the gifts.

[6358] Letter Ruling 200745015, reasoning:

> The value of the gift is a question of fact and the Service does not rule on such factual determinations. See Rev. Proc. 2007-1, 2007-1 I.R.B. 1, 14. However, since the gift is not an absolute right to distributions of income or principal, it cannot be valued by use of the tables contained in § 2512. See *Deal v. Commissioner*, 29 T.C. 730 (1958). Rather, the value of the gift should be determined in accordance with the general valuation principles contained in § 25.2512-

the transferor for GST purposes to the extent of the property she renounced,[6359] but did not blow GST grandfathering for the remaining property.[6360] Renouncing a testamentary nongeneral power of appointment did not have gift tax consequences or blow GST grandfathering.[6361]

On the other hand, if Mom creates a trust for the benefit of Daughter and Daughter's children, but Daughter doesn't need all of that money and would like her children to benefit currently and cooperates in the trustee's obtaining a court order directing early partial termination of the trust. That action:[6362]

- Is not subject to income tax,[6363]

---

1. Further, such an interest has more than a nominal value. See Rev. Rul. 67-370, 1967-1 C.B. 324.

[6359] Letter Ruling 200745015, further explaining (with "exemption" referring to grandfathering from GST tax):

> As stated above, under § 2652, for purposes of chapter 13, Daughter is the transferor of X shares that will be transferred to the three subtrusts. Accordingly, the three subtrusts are not exempt from chapter 13 by virtue of Trust's exemption. Daughter may allocate her GST exemption to the three subtrusts at the time of the transfer or GST exemption may be automatically allocated under § 2632(c)(1) depending on whether the subtrusts are GST Trusts as defined in that Code section. Based upon the facts provided and the representations made, we conclude that Daughter is the transferor of the X shares that will be transferred to the three subtrusts for purposes of chapter 13 and, accordingly, distributions and terminating distributions from the subtrusts to skip persons are subject to GST tax.

[6360] Letter Ruling 200745015, reasoning:

> Trust was executed prior to September 25, 1985, and it is represented that there have been no additions (actual or constructive) to Trust since that date. Accordingly, Trust is not subject to chapter 13. Daughter's renunciation of her entire beneficial interest in X shares is a taxable transfer for gift tax purposes. X shares will be transferred into three subtrusts in which Daughter will have no interest. The property remaining in Trust continues to be subject to the original Trust provisions, with no modifications to those provisions. Based upon the facts provided and the representations made, we conclude that Daughter's renunciation of her entire beneficial interest in X shares will not cause Trust to become subject to chapter 13.

[6361] Letter Ruling 200745015, reasoning:

> As discussed above, Daughter holds a testamentary nongeneral power of appointment over Trust. Daughter will release this power over X shares that are transferred to the three subtrusts. The power of appointment was created in Trust, an irrevocable Trust, that is not subject to chapter 13. Therefore, the release of the power of appointment over X shares will not be treated as a constructive addition to Trust. Accordingly, based upon the facts provided and the representations made, we conclude that the release of Daughter's testamentary nongeneral power of appointment over X shares will not cause Trust to become subject to chapter 13.

[6362] Per Letter Ruling 201122007, parts of which are quoted in the footnotes below.

[6363] Letter Ruling 201122007, which did not appear to involve any debt, concluded Ruling 1 by reasoning:

> In general, a gift or other transfer without reciprocal consideration is not treated as a sale or exchange or as a distribution of property that results in a realization of income by the donor. *See, e.g.*, § 1.1001-1(e) (illustrating that the gift portion of a transfer is not treated as gain realized). The same would be true of a transfer from a trust as provided in the terms of the trust agreement or by court order modifying the trust agreement. Such a transaction is not a realization event in which property differing in kind or extent is being exchanged. In addition, gross income does not include the value of property acquired by gift, bequest, devise or inheritance. See § 102.
>
> Based on the information submitted, Taxpayer, the remainder beneficiaries, and Trust will not recognize gain as a result of the early distribution of a portion of the trust principal to the remainder beneficiaries because the distribution will not constitute a sale, exchange, or other

- Will not blow the trust's grandfathering from generation-skipping transfer tax,[6364] and
- Will constitute a gift by Daughter, albeit perhaps a nominal gift.[6365]

Rev. Rul. 67-370 is somewhat disturbing, in that one needs to impose survivorship as a condition precedent to prevent inclusion in an outright remainderman's gross estate.[6366] It starts:

> Advice has been requested whether a certain remainder interest in trust which may be terminated at the will of another is an interest in property within the meaning of section 2033 of the Internal Revenue Code of 1954.
>
> Under the terms of an inter vivos trust, controlled by New York law, the decedent or his estate was to receive the principal upon the death of the settlor. The settlor had reserved the right to modify, alter, or revoke the trust during her lifetime. Subsequent to the

---

realization event. Also, there is no accession of wealth to Taxpayer or Trust. In addition, to the extent that any portion of the early distribution of the trust principal and accumulated income (previously taxed to the trust) constitutes a gift, bequest, devise or inheritance to the remainder beneficiaries, it will not constitute includable income to the remainder beneficiaries for federal income tax purposes because of the exclusion provided under § 102.

[6364] Letter Ruling 201122007 concluded Ruling 2 by reasoning:

> State Statue provides that a noncharitable irrevocable trust may be modified on consent of all the beneficiaries if the court concludes that modification is not inconsistent with a material purpose of the trust.
>
> Based on the facts presented and representations made, we conclude that if State court issues an order approving the early distribution of a portion of the trust principal to the remainder beneficiaries, as discussed above, this distribution will not shift any beneficial interest in Trust to a beneficiary who occupies a lower generation (as defined in § 2651) than the person or persons who held the beneficial interest prior to the modification. In addition, the early distribution of a portion of the trust principal to the remainder beneficiaries will not extend the time for vesting of any beneficial interest in Trust beyond the period provided for in the original trust. Accordingly, based on the facts submitted and the representations made, we conclude that if, under a State court order, the trustees of Trust make an early distribution of the trust principal to the remainder beneficiaries, such a distribution will not cause Trust to be subject to the generation-skipping transfer tax imposed by chapter 13.

[6365] Letter Ruling 201122007 concluded Ruling 3 by reasoning:

> Taxpayer attests that Taxpayer has never received a distribution from Trust and that her income and resources are sufficient to maintain her current standard of living for the remainder of her lifetime. However, that does not negate the fact that under Section 6(a) of Trust, Taxpayer has an income interest entitling her to distributions of income in the case of emergency and at the discretion of the trustee. The interest may be nominal, however, the value of the gifted interest is a factual determination, not a determination of whether or not Taxpayer has made a gift of the interest.
>
> Based upon the facts submitted and representations made, we conclude that Taxpayer will make a gift of her interest in the portion of the early distribution of the trust principal to the remainder beneficiaries. The value of this gift is a question of fact and the Service does not rule on such factual determinations. See Rev. Proc. 2011-1, 2011-1 I.R.B. 1, 13.

Note that the IRS might argue that the value of Taxpayer's gift in Letter Ruling 201122007 is the value of Taxpayer's entire interest in the trust. See part Code § 2702 Overview, especially the text accompanying fns. 7381-7388.

[6366] Rev. Rul. 67-370 is cited by the text accompanying fn 2062 in part II.H.2.c QTIP Trusts - Code § 2519 Trap.

> decedent's death, the settlor modified the trust and extinguished the estate's defeasible remainder interest.

After reciting Code § 2033 and Reg. § 20.2033-1(a), the IRS reasoned:

> Where a decedent's right to receive benefits under a trust is so conditioned as to terminate at his death, such interest does not constitute an includible interest in property for the purpose of section 2033 of the Code. Revenue Ruling 55-438, C.B. 1955-2, 601. A contrary result will naturally obtain, however, in case the decedent owns any beneficial interest in a trust which survives his death, whether or not such interest is subject to being lawfully curtailed or cut off at any time thereafter. The decedent's interest in the trust involved in the subject case is thus an includible interest. It was clearly "descendible, devisable, and alienable" as a matter of New York law, for example, and would undoubtedly have resulted in the receipt of substantial assets by decedent's estate if the settlor had not proceeded to revoke the same. *In re: Horn-blower's Estate*, 180 N.Y. Misc. 517, 40 N.Y.S.2d 712 (1943).
>
> In providing that the value of the gross estate shall include the value of "all" property to the extent of the interest therein of the decedent at the time of his death, section 2033 is not affected by formal legal distinctions of nomenclature under state law. Therefore, it is not relevant to the application of section 2033 that a particular interest in property which survives the decedent's death may be either defeasible or indefeasible.
>
> Any determination of what would be the fair market value of a particular remainder interest like that under consideration herein would be affected by its possible curtailment or complete divestment at some point after decedent's death, in accordance with the general rules for the valuation of property which are set forth in section 20.2031-1(b) of the Estate Tax Regulations. See *Estate of Waldo G. Bryant v. Commissioner*, 36 B.T.A. 669 (1937), *affirmed* 104 F.2d 1011 (1939), *affirmed sub nom. Helvering v. Hallock*, 309 U.S. 106 (1940), Ct. D. 1440, C.B. 1940-1, 223. See also *Smith v. Shaughnessy*, 318 U.S. 176, 180 (1943), Ct. D. 1575, C.B. 1943, 1144. The mere presence of these possibilities does not warrant the assignment of a merely nominal value to such a defeasible interest in any case where there is still a reasonable probability that the estate will actually acquire possession of at least some substantial portion of the property in question. See *In re: Hornblower's Estate*, above.
>
> It is accordingly held that if a defeasible interest in property survives the decedent's death, its fair market value is includible in the decedent's gross estate.

To avoid this result, consider always requiring survivorship as a condition preceding to the remainderman taking outright. Leaving the remainder in trust may also help. We tend to suggest that a remainderman's interest being subject to the primary beneficiary's power of appointment may make any diminishment of the remainderman's interest not constitute more than a nominal gift, but the precautions stated above in this paragraph may be important to implement to support that suggestion. CCA 202118008 asserted that children, who were outright remaindermen of property that the current beneficiary could have been appointed to children or their descendants, made a gift of the entire remainder when they consented to distributing the entire trust to the current beneficiary.[6367]

[6367] See text preceding fn 2995 in part II.J.18.d Trust Commutations.

Other authority related to valuing a gift diminishing a discretionary interest includes:[6368]

> Rev. Rul. 67-370. *Cf. Snyder v. Comm'r*, T.C. Memo. 1989-529. (holding that the value of a gift of common stock prior to the enactment of chapter 14 of the Code could be discounted in order to reflect the rights of preferred shareholders' put rights). *See* Rev. Rul. 75-550 (valuing an income interest at a discount to reflect all possible invasions of principal). *See*, *e.g.*, PLR 8535020 (May 30, 1985) ("The fact that the trustee has discretion regarding distributions of income and principal to you is a factor that must be taken into account in determining the fair market value of your beneficial interest"). *See also* PLR 8824025 (June 17, 1988) (the value of discretionary interest in principal appears "negligible" where no distributions had been made); PLR 8905035 (Nov. 4, 1988) (the value of a discretionary interest is to be valued under general valuation principles); PLR 9451049 (Sept. 22, 1994) (the value of the right to distributions for support "is readily ascertainable"); PLR 9714030 (Jan. 7, 1997) (the value of discretionary interest is to be valued under general valuation principles); PLR 9802031 (Oct. 14, 1997) (the value of discretionary support interest "is determined based on all relevant factors, such as the projected needs of [the beneficiary] for health, education, support, and maintenance for the remainder of his life"); PLR 9811044 (Dec. 11, 1997) (the value of discretionary interest is to be valued under general valuation principles); PLR 199908060 (Dec. 2, 1998) (discretionary interests "have some value, however minimal"); PLR 200243026 (July 24, 2002) (the value of interest subject to discretion of trustee is a question of fact); PLR 200339021 (June 19, 2003) (the value of a contingent support interest is a question of fact); PLR 200745015 (June 6, 2007) (a discretionary interest has "more than a nominal value"); PLR 200745016 (June 8, 2007) (a discretionary interest has "more than a nominal value"); PLR 201122007 (Feb. 24, 2011) (a discretionary interest where no distributions received may be "merely nominal"); PLR 201342001 (July 22, 2013) (expressing no opinion on the value of discretionary interests).

Generally, a conversion to a unitrust has not gift tax or GST consequences.[6369]

In Letter Ruling 201920001:

> Several years after Grantor's death, the trustees became aware that Article III(b)(2) lacked the language necessary to prevent an appointment of trust property to non-family members and that the broad language could be construed as granting a general power of appointment to the Beneficiaries. This would result in inclusion of trust property in each Beneficiary's gross estate. It is represented that such a result was contrary to Grantor's intent. On Date 3, Son 1, in his capacity as the trustee of Trust A and Trust C, and as representative by joinder of Trust B, petitioned Court to reform Trusts A, B, and C to include the necessary limiting language to qualify each Beneficiary's power of appointment as a limited power of appointment, expressly prohibiting the appointment of trust assets to a Beneficiary, such Beneficiary's estate, the creditors of such Beneficiary, and the creditors of such Beneficiary's estate.

[6368] Bramwell & Weissbart, "The Dueling Transferors Problem in Generation-Skipping Transfer Taxation," ACTEC Law Journal, Vol. 1, No. 1 (Spring 2015), 95, 109 (fns 37-39), saved as Thompson Coburn LLP doc. no. 7289312.

[6369] This result is strongly supported by Reg. § 26.2601-1(b)(4)(i)(E), Example (11). See text accompanying fn 6395 in part III.B.1.d.i Effect of "Additions" on .

> The petition was supported by three affidavits, one each from Grantor's Accountant, Law Firm, and Son 1, in his capacity as the trustee of Trusts A and C and as representative by joinder of Trust B. Accountant swore that Grantor intended the trusts to be GST exempt. Law Firm swore that Grantor did not recognize that including the power of appointment language would result in including the trust assets in each Beneficiary's gross estate.
>
> On Date 4, Court issued an order, effective Date 1, that limited the power of appointment language in Article III(b)(2) to exclude the Beneficiary, the Beneficiary's estate, the creditors of the Beneficiary, and the creditors of the Beneficiary estate. On Date 5, Court issued an amended order clarifying that the trusts terminate at the death of the named grandchild and that per stirpes distributions are to be outright and in fee. The amended order clarifies that each separate trust held for a Beneficiary shall terminate upon the death of such Beneficiary. This is consistent with the provisions of each trust, as originally executed. Further, the amended order clarifies that each trust shall provide that upon such termination, the remaining principal and any undistributed income of such separate trust shall be distributed as such deceased Beneficiary may appoint to or for the benefit of one or more of the lineal descendants of the child of the Grantor (Son 1, Son 2, or Daughter, depending upon the trust) who is a lineal ascendant of such beneficiary, but excluding such Beneficiary, such Beneficiary's estate, the creditors of such Beneficiary, and the creditors of such Beneficiary's estate. The default provisions of each trust remain unchanged. Both orders were issued contingent upon a ruling from the Internal Revenue Service.
>
> On Date 7, Court issued a second amended order that reforms Article III(c) to limit the Beneficiary's withdrawal right to the lesser of (1) that amount equal to the greater of that amount which under § 2514(e) will not be considered a release of a power of appointment as the result of a lapse of the power (currently the greater of $5,000 or five percent of the aggregate value of the assets out of which, or the proceeds of which, the exercise of the lapsed power could be satisfied), or that amount that, under § 2503(b) may be excluded in computing the total amount of gifts made during such calendar year, or (2) the fair market value of any property, determined as of the date of the gift, added to this trust by gift during such calendar year. This order is also contingent upon a ruling from the Internal Revenue Service.

Regarding possible estate inclusion under Code § 2036(a) or 2038(a)(1), Letter Ruling 201920001 reasoned and ruled:

> In the present case, Trusts A, B, and C are irrevocable trusts. During Year 1 through Year 7 and Year 9 through Year 11, Spouse and Grantor consented to treat their gifts as having been made one-half by each donor. Accordingly, Spouse and Grantor are each treated as the transferor of one-half of the total transfers to the trusts during those years. During Years 12 through 19, Spouse made gifts to each trust. Accordingly, Spouse is the transferor of those gifts to the trusts during those years. However, Spouse did not retain any right or interest in the trusts. Spouse did not retain a beneficial interest in the trusts and did not retain the right to alter, amend, revoke, or terminate any of the trusts. Further, Spouse did not retain the right to designate who would possess or enjoy the property or income derived from the trusts. The reformation and modification of Trusts A, B, and C were made pursuant to Court orders and not as a result of rights retained by Spouse. Accordingly, based upon the facts submitted and representations made, we conclude that the judicial reformation and modification of Trusts A, B, and C will not

> cause the corpus of Trust A, B, and C to be included in the gross estate of Spouse for federal estate tax purposes.

As to gift tax issues and whether a beneficiary had a general power of appointment, Letter Ruling 201920001 reasoned and ruled:

> State Statute provides that upon application of a settlor or any interested person, the court may reform the terms of a trust, even if unambiguous, to conform the terms to the settlor's intent if it is proved by clear and convincing evidence that both the accomplishment of the settlor's intent and the terms of the trust were affected by a mistake of fact or law, whether in expression or inducement. In determining the settlor's original intent, the court may consider evidence relevant to the settlor's intent even though the evidence contradicts an apparent plain meaning of the trust instrument.
>
> In *Commissioner v. Estate of Bosch*, 387 U.S. 456 (1967), the Court considered whether a state trial court's characterization of property rights conclusively binds a federal court or agency in a federal estate tax controversy. The Court concluded that the decision of a state trial court as to an underlying issue of state law should not be controlling when applied to a federal statute. Rather, the highest court of the state is the best authority on the underlying substantive rule of state law to be applied in the federal matter. If there is no decision by that court, then the federal authority must apply what it finds to be state law after giving "proper regard" to the state trial court's determination and to relevant rulings of other courts of the state. In this respect, the federal agency may be said, in effect, to be sitting as a state court.
>
> In the present case, an examination of the relevant trust instruments, affidavits, and representations of the parties strongly indicates that Grantor and Spouse did not intend for the Beneficiaries of Trusts A, B, and C to have inter vivos or testamentary general powers of appointment. In reforming the trusts, Court found that there was clear and convincing evidence that the language in Article III(b)(2) and Article III(c) were scrivener's errors and that the reformation and modification of the trusts was necessary and appropriate to achieve Grantor's and Spouse's objectives, and that the reformation was not contrary to Grantor's and Spouse's intentions.
>
> Consequently, based on the facts submitted and representations made, we conclude that the Court's Orders of Date 4, Date 5, and Date 7, reforming and modifying the trust instruments based on scrivener's errors, are consistent with applicable State law that would be applied by the highest court of that state. Trusts A, B, and C, as reformed and modified pursuant to the Court's Orders, do not provide the Beneficiaries with either inter vivos or testamentary general powers of appointment over the assets of each respective Beneficiary's trust under §§ 2041(b) and 2514(c). Accordingly, based on the facts submitted and the representations made, we conclude that the judicial reformation and modification of Trusts A, B, and C do not constitute the exercise or release of a general power of appointment by a Beneficiary resulting in a gift under § 2514 and that the assets of the deceased Beneficiary's trust will not be includible in such Beneficiary's gross estate under § 2041.

As to GST issues, Letter Ruling 201920001 reasoned and ruled:

> In the present case, Grantor and Spouse made gifts to Trusts A, B, and C. The primary beneficiaries of Trusts A, B, and C are the grandchildren of Grantor and Spouse.

> Pursuant to the reformation of Trusts A, B, and C, the Beneficiaries possess testamentary limited powers of appointment to appoint to one or more of the lineal descendants of Son 1, Son 2, or Daughter, depending upon which trust. In default of the exercise, the trust property passes to lineal descendants of that Grandchild, or if there are none, to the living descendants of Son 1, Son 2, or Daughter, depending upon which trust. The Beneficiaries, lineal descendants of the Beneficiaries of Son 1, Son 2, and Daughter are persons assigned to a generation which is two or more generations below the generation assignment of the Grantor and, accordingly, the Beneficiaries are skip persons as defined under § 2613(a)(1). Accordingly, we conclude Trust A, B, and C are "skip persons" as defined under § 2613(a)(2) and the gifts to Trusts A, B, and C are direct skips as defined in § 2612(c)(1).
>
> Because Grantor and Spouse consented to split gifts under § 2513 for Year 1 through Year 7 and Year 9 through Year 11, Grantor and Spouse are treated as the transferor of one-half of the Year 1 through 7 and Year 9 through Year 11 gifts to the trusts under § 2652(a)(2). Therefore, based on the facts submitted and representations made, we conclude that, the deemed allocation rules under § 2632(b) apply to allocate Grantor's and Spouse's unused GST exemption to one-half each of the Year 1 through Year 7 and Year 9 through Year 11 gifts to the trusts and to allocate Grantor's unused GST exemption to the bequests to the trusts in Year 11, and to allocate Spouse's unused GST exemption to the Year 12 through Year 19 gifts to Trusts A, B, and C.

Letter Ruling 202206008 tacitly approved the idea that a trustee who can distribute for a beneficiary's welfare may use that authority to grant the beneficiary a general power of appointment.[6370]

Letter Ruling 201647001 held that the children did not make a gift when a trust was modified to add a clause authorizing an independent trustee to reimburse the grantor's income tax, because the reimbursement clause was "administrative in nature" and did not "result in a change in beneficial interests" in the trust. Neither that change nor any other change done at the same time had any income, gift, estate, or GST tax consequences. However, Letter Ruling 201647001 was disavowed by CCA 202352018, which concluded that authorizing reimbursement of the income tax owed by A, the grantor, was a taxable gift:[6371]

> Under the governing instrument of Trust, Child and Child's issue each have an interest in the trust property. As a result of the Year 2 modification of Trust, A acquires a beneficial interest in the trust property in that A becomes entitled to discretionary distributions of income or principal from Trust in an amount sufficient to reimburse A for any taxes A pays as a result of inclusion of Trust's income in A's gross taxable income. In substance, the modification constitutes a transfer by Child and Child's issue for the benefit of A. This is distinguishable from the situations in Rev. Rul. 2004-64 where the original governing instrument provided for a mandatory or discretionary right to reimbursement for the

---

[6370] Letter Ruling 202206008 is discussed in more detail in the text accompanying and preceding fn 2129 in part II.H.2.k Taxable Termination vs. General Power of Appointment vs. Delaware Tax Trap.

[6371] For a complete excerpt, see text accompanying fn 6978 in part III.B.2.j.iv.(a) Grantor Trust Reimbursing for Tax Paid by the Deemed Owner. Note that a gratuitous payment of another person's obligation constitutes a (possibly excludible) gift by the payor, followed by a (possibly deductible) payment by the obligor. *Lang v. Commissioner*, T.C. Memo. 2010-286 (donor's gifts were not taxable; obligor could deduct medical and tax payments).

grantor's payment of the income tax. Thus, as a result of the Year 2 modification, Child and Child's issue each have made a gift of a portion of their respective interest in income and/or principal.[1] *See* § 25.2511-1(e) and § 25.2511-2(b). *See also Robinette v. Helvering*, 318 U.S. 184 (1943). The result would be the same if the modification was pursuant to a state statute that provides beneficiaries with a right to notice and a right to object to the modification and a beneficiary fails to exercise their right to object.

As alluded to above, many of the gifts raised in this part III.B.1.b involve complex gift tax issues, which may spill over into the GST arena. See part III.B.1.d Generation-Skipping Transfer (GST) Issues.

In the employment arena, some employee benefits to family members may not be considered gifts,[6372] whereas others may be.[6373]

III.B.1.c. When a Gift Triggers Income Tax

A gift can trigger gift tax when it is a part sale. See part III.B.1.c.i Gifts with Consideration – Bargain Sales.

So might a gift of an item that includes or is deemed to include deferred income. See part III.B.1.c.ii Gift of Deferred Income Item May Trigger Income Tax.

Turning off grantor trust status may trigger a deemed gift for income tax purposes that may trigger the consequences described above. For grantor trust status, see part III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment.

III.B.1.c.i. Gifts with Consideration – Bargain Sales

III.B.1.c.i.(a). Bargain Sales to Individuals, Including Net Gifts

Where a transfer of property is in part a sale and in part a gift (a "bargain sale"), the donor has gain to the extent that the amount realized by the donor exceeds the donor's adjusted basis in the property.[6374] However, a donor may not deduct a loss in a bargain sale.[6375]

A bargain sale includes transferring property subject to a debt.[6376] For treatment of interest expense when a partnership interest that carries with it an allocation of partnership debt, see part II.C.3.d Deducting Interest Expense.[6377]

Examples of computing gain or gift when property is transferred in bargain sale:[6378]

> *Example (1)*. A transfers property to his son for $60,000. Such property in the hands of A has an adjusted basis of $30,000 (and a fair market value of $90,000). A's gain is $30,000, the excess of $*60*,000, the amount realized, over the adjusted

[6373] See part II.Q.4.f Split-Dollar Arrangements.
[6374] Reg. § 1.1001-1(e)(1).
[6375] Reg. § 1.1001-1(e)(1).
[6376] See fn. 6591, found in part III.B.2.g Income Tax Concerns When Removing Property from the Estate Tax System.
[6377] Especially the text accompanying fns 457-459.
[6378] Reg. § 1.1001-1(e)(2).

basis, $30,000. He has made a gift of $30,000, the excess of $90,000, the fair market value, over the amount realized, $60,000.

Example (2). A transfers property to his son for $30,000. Such property in the hands of A has an adjusted basis of $60,000 (and a fair market value of $90,000). A has no gain or loss, and has made a gift of $60,000, the excess of $90,000, the fair market value, over the amount realized, $30,000.

Example (3). A transfers property to his son for $30,000. Such property in A's hands has an adjusted basis of $30,000 (and a fair market value of $60,000). A has no gain and has made a gift of $30,000, the excess of $60,000, the fair market value, over the amount realized, $30,000.

Example (4). A transfers property to his son for $30,000. Such property in A's hands has an adjusted basis of $90,000 (and a fair market value of $60,000). A has sustained no loss, and has made a gift of $30,000, the excess of $60,000, the fair market value, over the amount realized, $30,000.

Examples of computing basis in property transferred in bargain sale include:[6379]

Example (1). If A transfers property to his son for $30,000, and such property at the time of the transfer has an adjusted basis of $30,000 in A's hands (and a fair market value of $60,000), the unadjusted basis of the property in the hands of the son is $30,000.

Example (2). If A transfers property to his son for $60,000, and such property at the time of transfer has an adjusted basis of $30,000 in A's hands (and a fair market value of $90,000), the unadjusted basis of such property in the hands of the son is $60,000.

Example (3). If A transfers property to his son for $30,000, and such property at the time of transfer has an adjusted basis in A's hands of $60,000 (and a fair market value of $90,000), the unadjusted basis of such property in the hands of the son is $60,000.

Example (4). If A transfers property to his son for $30,000 and such property at the time of transfer has an adjusted basis of $90,000 in A's hands (and a fair market value of $60,000), the unadjusted basis of the property in the hands of the son is $90,000. However, since the adjusted basis of the property in A's hands at the time of the transfer was greater than the fair market value at that time, for the purpose of determining any loss on a later sale or other disposition of the property by the son its unadjusted basis in his hands is $60,000.

Letter Ruling 7752001 involved a net gift:

The taxpayer, a trust, received x shares of common stock on December 17, 1973, and received y shares of common stock on February 14, 1974. All the shares of common stock were transferred to the taxpayer subject to the condition that the taxpayer pay all gift taxes arising as a result of the transfers. In satisfaction of this condition, the taxpayer paid all gift taxes imposed as a result of this transaction.

[6379] Reg. § 1.1015-4(b).

> On April 17, 1974, the taxpayer sold all the shares of common stock received from the transferor-donor. The net proceeds from the sale was z. For purposes of determining gain {or loss} on the sale, the taxpayer computed its basis in the shares of common stock by assuming the donor's basis in the common stock as provided in section 1.1015-1 of the regulations increased by the amount of Federal gift tax paid with respect to the gift of the common stock as provided in section 1.1015-15 of the regulations. Under this basis computation method, the taxpayer's basis in the common stock was determined in whole or in part by reference to the donor's basis. For the purpose of determining its holding period in the common stock as provided in section 1223 of the Code, the method of calculating basis employed by the taxpayer would permit the taxpayer to tack on to the period it held the common shares, the period the common shares were held by the donor. Since the combined period that the stock was held by the taxpayer and the donor was greater than six months at the time of the sale, the taxpayer reported the gain from the sale as long-term capital gain.
>
> Alternatively, had the taxpayer calculated its basis in the stock pursuant to section 1.1015-4 of the regulations, as a transfer in part a gift and in part a sale, the resulting basis under this calculation method would have been determined without reference to the donor's adjusted basis in the stock. Since, under this basis computation method, the taxpayer would not have held the property for longer than six months at the time of the sale, the gain from the sale would not qualify for long-term capital gain treatment.
>
> In brief, the basis computation method employed by the taxpayer resulted in the taxpayer acquiring a basis in the stock that was less than the basis that would have resulted had the basis computation method provided in section 1.1015-4 of the regulations been followed. However, contrary to the result produced by the method provided in section 1.1015-4 of the regulations, the basis computation method employed by the taxpayer permitted the taxpayer's sale of the stock to qualify for long-term capital gain treatment.

Letter Ruling 7752001 involved a net gift:

> The question that arises is whether the taxpayer's method of computing its basis in the shares of common stock is in accordance with section 1015 of the Code and the regulations promulgated thereunder.
>
> To prevent possible confusion, a distinction between the term "net gift" and the term "part sale and part gift" will be made at the outset. For gift tax purposes, a gift conditioned on the payment by the donee of the gift tax is termed a "net gift." The net gift is determined by reducing the gross value of the gift by the amount of the gift, and the gift tax is computed on that amount. The net gift theory is premised on the theory that the property transferred is encumbered with the gift tax, a burden assumed by the donee for the benefit of the donor. The Service does not challenge the net gift concept for gift tax purposes. See Rev. Rul. 71-232, 1971-1 C.B. 275, as superseded by Rev. Rul. 75-72, 1975-1 C.B. 310, see also Rev. Rul. 76-57, 1976-1 C.B. 297 and Rev. Rul. 76-104, 1976-1 C.B. 301. The net gift concept is applied only for gift tax purposes and has no application for income tax purposes.
>
> The term "part sale and part gift" has no inherent genetic meaning except to illustrate situations in which the transferor has transferred property for consideration below the

property's fair market value, with the intent to make a gift to the transferee of the value of the property exceeding the consideration. The donor in a part sale and part gift situation has a dual intention to confer a gift on the donee and also to receive some benefit, for example, the payment of the donor's gift tax liability. The term "part sale and part gift" is generally used to describe the income tax consequences of a taxpayer's transaction.

The part sale and part gift concept originated in the context of encumbered gift. *MAGNOLIA DEVELOPMENT CORPORATION V. COMMISSIONER*, T.C. Memo. 1960-177, is a case in point. In MAGNOLIA, the court held that a corporate taxpayer realized gain when the taxpayer encumbered its stock with a fair market value of $42,500 for a loan in the amount of $42,000 on the eve and in anticipation of the transfer of the encumbered securities to a university. Immediately thereafter, the university sold the stock to a waiting buyer, repaid the loan, and retained the remaining $500. The court viewed the transaction as a sham and held the transaction to be in substance "a sale of the stock for a price $500 less than its fair market value of $42,500, which made the selling price $42,000, with a gift of the balance ….."

In *TURNER V. COMMISSIONER*, 47 T.C. 356 (1968), *AFF'D PER CURIAM*, 410 F.2d 752 (6th Cir. 1969), *NONACQ*., 1971-2 C.B. 4, a taxpayer made gifts of highly appreciated stock to several donees subject the donees' agreement to pay the resulting gift taxes. The Service asserted that since the donor in this transaction received a taxable benefit in the amount of the payment of his gift tax liability, the transaction was a partial sale in which the donor realize a taxable gain. The court, however, was not persuaded by the Service's position, and held the donor "intended" to make net gifts, a transaction that resulted in no taxable gain to the donor.

In 1973, the Tax Court decided *JOHNSON V. COMMISSIONER*, 59 T.C. 791 (1973), *AFF'D*, 495 F.2d 1079 (6th Cir. 1974), *CERT. DENIED*, 419 U.S. 1040 (1974). In *JOHNSON*, the taxpayer owned stock having a basis of $10,000 but with a fair market value of over $500,000. Using the stock as collateral, he borrowed $200,000 from a bank on a nonrecourse note. The taxpayer then transferred the pledged stock to an irrevocable trust for the benefit of his children. Shortly thereafter the trustees canceled the taxpayer's note and replaced it with their own note, secured by the same stock. The taxpayer subsequently used $150,000 of his loan proceeds to pay the gift taxes. The Service, alleging the transaction was in substance a part sale and part gift, determined the taxpayer realized long-term capital gain on the excess loan proceeds over the adjusted basis of the transferred stock. The Tax Court, relying primarily on *CRANE V. COMMISSIONER*, 331 U.S. 1 (1947), in which the Supreme Court held that the amount realized on the sale of property included the amount of a nonrecourse mortgage, agreed with the Service and held when property is given to another subject to a loan in excess of the donor's adjusted basis in the property, and the transferee pays or assumes payment of the loan, the transaction is in part a sale and in part a gift. The court further stated that unlike *TURNER*, the transfers in *JOHNSON* were not conditioned on the payment of the gift tax liability by the recipients, and the loans at issue were not to be equated with the gift tax liabilities in *TURNER*.

On appeal, the taxpayer conceded that the *CRANE* doctrine applied to the extent of the $50,000 he received in excess of the gift tax liability, but he argued the result of the transaction was identical to *TURNER* as far as the gift tax liability of $150,000 was concerned. In a decision that may be interpreted as having effectively overruled *TURNER*, the Sixth Circuit Court of Appeals affirmed the Tax Court and held the taxpayer realized income to the extent the loan proceeds exceeded the basis of the transferred stock. The court further concluded that the donee's payment of the donor's gift tax liability was income to the donor, but whether the transaction were described as a "part sale and part gift" or a "net gift" was not important. That the taxpayer received something of value upon transferring his encumbered stock into a trust was the significant factor. 495 F.2d at 1083. The court also stated that the transaction at issue fell within the parameters of *CRANE*, and that the same result would be reached if the court described the $150,000 used to pay the gift taxes as equivalent to what happened in *TURNER*. In addition, the court reasoned that in substance the donor was obtaining cash necessary to pay his gift taxes. If the donor acquired cash upon transfer of the donated property, then he realized income under Code section 1001(b) to the extent the amount received exceeded his property basis. This was true, the court added, whether the event triggering the realization of income was a sale, or discharge of indebtedness, or something else. 495 F.2d at 1084. Finally, the court did not expressly overrule the Tax Court's decision in *TURNER*, but did limit the precedential value of *TURNER* to its peculiar fact situation, namely, transfers to individual donees.

Despite the holding of *JOHNSON*, judicial acceptance of the part sale and part gift concept in the area of transfers to individual donees is unsettled. In *HIRST V. COMMISSIONER*, 63 T.C. 307 (1974), *APPEAL DOCKETED*, Docket No. 75-1543, (4th Cir., filed June 3, 1975), the Tax Court followed the precedent of TURNER and held that a donor's conveyance of several parcels of land to her son and grandchildren conditioned on the son's payment of the resulting gift taxes was not a partial sale. Although the Tax Court acknowledged that the Sixth Circuit's decision in *JOHNSON* was critical of *TURNER* and admitted the persuasiveness of the Service's more "realistic" approach, the court noted, at page 314, that the Sixth Circuit had affirmed *TURNER* and had failed to expressly overrule it in *JOHNSON*.

Despite the Tax Court's opinion in *HIRST*, it is the Service's position that donors who transfer appreciated property to trusts or to individuals conditioned upon the transferees' payment of resulting gift taxes realize taxable income to the extent the benefits received exceed the donors' adjusted bases in the transferred property. The transferees receive the transferred property in a single transaction that is in part a sale and in part a gift.

In the instant case, it is the taxpayer's position that it received the stock from the donor in a net gift transaction governed by the *TURNER* case. Since, if there is no sale element in the transfer of stock to the taxpayer, the taxpayer's basis is the same as the donor's basis in the stock, it follows that section 1223(2) of the Code entitles the taxpayer in computing its holding period to include the period during which the donor held the stock. It is the position of the Service that TURNER was incorrectly decided and that the tax consequences of the transaction in the instant case is governed by the part sale and part gift concept employed in the JOHNSON case and that the taxpayer's basis in the transferred stock must be computed in accordance with the provisions of section 1.1015-4 of the regulations.

Although the taxpayer contends that it received the stock in a net gift transaction, it asserts, in the alternative, that even if the transaction is viewed as a partial sale, and even if section 1.1015-4 of the regulations applies to the transaction, nevertheless, the provisions of section 1.1015-4 cannot be construed to deny the taxpayer from tacking on to its holding period, the period in which the stock was held by the donor.

The taxpayer cites in support of this alternative assertion the decision in *CITIZEN'S NATIONAL BANK OF WACO V. UNITED STATES*, 417 F.2d 675 (5th Cir. 1969). In *WACO*, the settlors of several trusts transferred stock to the trusts in a part sale and part gift transaction whereby the trusts assumed an indebtedness of the settlors. The amount of the indebtedness assumed by the trusts was $500,000 and the settlors' basis in the stock was $498,468. Thus the trusts' cost basis in the stock exceeded the basis in the hands of the settlors. Within six months after the transfer, the company that issued the transferred stock was liquidated, and its assets were distributed to the trusts. On its tax return, each trust reported its share of the fair market of the assets received in exchange for the stock, deducted its basis, and reported the gain as long-term capital gain.

The issue presented in *WACO* was whether, for the purpose of determining the trusts' holding period for the stock, the trusts were entitled to tack the settlors' holding period to their own holding period under section 1223(2) of the Code.

Section 1223(2) of the Code provides that a taxpayer may include, for purposes of determining the taxpayer's holding period, the period for which the property was held by another person, if the property has the same basis in whole or in part in hands of the taxpayer as it would have in the hands of such other person.

Section 1015(a) of the Code provides, in part, that a transferee's basis for property acquired by gift shall be the same as it would be in the hands of the transferor. Section 1015(b) provides that the basis of property acquired by a transfer in trust (other than by a transfer in trust by a gift, bequest or devise) shall be the same as it would be in the hands of the grantor, increased by the amount of gain or decreased by the amount of loss recognized to the grantor on the transfer.

Section 1.1015-4(a)(1) of the regulations provides that where a transfer of property is in part a sale and in part a gift, the unadjusted basis of the property in the hands of the transferee is the greater of the amount paid by the transferee for the property, or the transferor's adjusted basis for the property at the time of the transfer. Section 1.1015-4(a)(2) of the regulations allows an increase of the transferee's basis in donated property, as determined by the provisions of section 1.1015-4(a)(1) by the amount of Federal gift taxes paid.

In *WACO*, the amount paid by the trusts was greater than the transferors' adjusted basis for the property at the time of the transfers. Since the amount paid by the trusts had no reference to the transferors' basis as required under section 1223 of the Code for tacking, the Service contended that the trusts were not allowed to tack the transferors' holding period to their own.

The court in *WACO* agreed that the Service's application of section 1.1015-4 of the regulations would be correct if this regulation were a valid interpretation of the provisions of section 1015 of the Code. The court noted that section 1015(a) provides that the transferee's basis "shall be the same as it would be in the hands of the donor." Also, section 1015(b) dealing with sales to trusts provides that the transferee's basis "shall be the same as it would be in the hands of the grantor increased in the amount of gain or decreased in the amount of loss recognized to the grantor on such transfer." The court concluded at page 680 that:

> Since both the gift and the sale subsections of section 1015 employ words which would permit tacking, and since neither subsection makes any distinction in this regard between a transferee who pays more than his grantor's basis and one who does not, we think that such a distinction in the regulation pertaining to a part gift part sale transaction is unreasonable and inconsistent with the statute. We therefore hold that the trustee in the instant case is entitled to tack the settlors' holding periods to the trusts and to the extent Treas. Reg. section 1.1015-4 would prevent such it is invalid.

It is the Service's position that the court in WACO erred in its decision and that section 1.1015-4 of the regulations is a valid interpretation of the provisions of section 1015. There are several reasons for the Service's continued acceptance of the validity of the basis determination method prescribed by section 1.1015-4.

Fundamental to the court's decision in WACO, is the court's assumption that both the gift and sale subsection of section 1015 of the Code permit tacking where the transferees are trusts. This assumption rests upon the court's determination that section 1015(b) a provision that relates to sales to trusts, permits tacking since it defines the trusts' basis by reference to the basis of the grantor increased in the amount of gain or decreased in the amount of loss recognized to the grantor. As the court itself noted on page 679, "the two concepts, price paid and grantor's basis increased or decreased by the amount of gain or loss recognized to the grantor, produce identical results as far as the actual amount of the transferee's basis is concerned." Despite this implicit recognition by the court that the transferee under section 1015(b) acquired a cost basis, the court, nevertheless, permitted the trusts to tack on the settlors' holding period since it viewed the trusts as acquiring, under the wording of section 1015(b) the same basis in whole or in part as the basis would have been in the hands of the transferors.

In effect, the court in WACO recognizes that where property is received in a sale, the purchaser's basis in the purchased property is the amount of consideration furnished the seller whether the purchaser be an individual or a trust. However, if the purchaser were an individual, the individual's holding period in the property would not include the seller's holding period, whereas if the purchaser were a trust, the trust's holding period would include the seller's holding period. This curious result is contrary to logic and contrary to Congressional intent.

Although Congress phrased section 1015(b) of the Code in terms of the transferor's basis plus gain or loss recognized by the transferor on the sale, the conceptual and the practical effect would be the same if the trust's basis were determined under section 1012 that defines basis as the transferee's cost. Congress in enacting the tacking provisions of section 1223(3) intended tacking to apply under circumstances where a transferee steps into the shoes of the transferor through a transaction that conceptually does not carry with it any substantive tax consequences flowing from the change in ownership, such as a tax-free exchange of stock pursuant to a reorganization. See H. REP. NO. 1, 69th Cong., 1st Sess., p. 6 (1939-1 C.B. (Part 2) 315, 319); S. REP. NO. 52, 69th Cong., 1st Sess., p. 18 (1939-1 C.B. (Part 2) 332, 346). Congress noted that the question frequently arises in a reorganization situation whether the period the taxpayer held the stock that he exchanged for new stock should be added to the period for which he held his new stock." The same question arises in the case of property received by gift after December 31, 1920." There is no reference to the concept of tacking applying to transfers to trust after December 31, 1920.

Unlike the situation where property is exchanged in a reorganization or where property is gratuitously conveyed to a donee, there are substantive tax consequences flowing from a sale of property to a trust. A sale gives rise to realization and recognition of gain and results in the transferee acquiring a basis in the purchased property that is not the same as the seller's basis in the property. As the Tax Court in *MCCAUSLEN V. COMMISSIONER*, 45 T.C. 588, 592 (1966) stated in an issue involving an analogous problem:

The provision for taking on the partnership's holding period is entirely consistent with the general statutory scheme of postponing recognition of gain or loss … . But where … a partner acquires another partner's share by purchase and, as a consequence of the termination of the partnership resulting from such purchase, acquires the partnership assets relating to such purchased interest, the statute has no application. *THE STATUTE CANNOT BE CONSTRUED AS PERMITTING THE PURCHASER TO TACK ON THE PARTNERSHIP'S HOLDING PERIOD OF SUCH ASSETS*. (Emphasis added.)

Although the court in *WACO* limited the applicability of section 1.1015-4 of the regulations so that a trust transferee will always be permitted to tack on the transferor's holding period, there is nothing in the judicial and administrative history of this regulation to lead to a conclusion that the regulation applies differently to a situation where the transferee is a trust from a situation where the transferee is a taxpayer other than a trust.

During the period from 1933 to 1939, the Service in its litigation posture asserted a "split transaction principle" in part sale and part gift transactions. See I.T. 2681, XII-1 C.B. 93 (1933). Under the split transaction principle, the transferor's basis would be allocated into a sale element and a gift element. The sale element of the transferor's basis was determined in accordance with a ratio in which the numerator was the purchase price and the denominator was the property's fair market value. For example, a father has stock which he purchased for $6 and with a fair market value of $15. The father transfers the stock to his son for $10. Under the split transaction principle, to determine the gain to the father on the transaction, the father's sale element basis would be $4 (10/15 x $6). The son's basis would consist of the cost of the purchased element, $10, plus the father's gift element basis, $2, namely $12.

However, in 1939 the Board of Tax Appeals in *FINCKE V. COMMISSIONER*, 39 B.T.A. 510 (1939), held that splitting was erroneous as a matter of law and that such a transaction could not be fragmented. In 1939, the Service acquiesced in *FINCKE*, revoked I.T. 2681, and stated with respect to such transaction that (a) the transferor's gain would be equal to the amount paid by the transferee less the transferor's basis for all of the property and (b) the transferee's basis would be equal to the amount so paid. I.T. 3335, 1939-2 C.B. 193. That position has been followed since 1939 and is reiterated in the regulations promulgated under the 1954 Code. (See regulations section 1.1015-4(a) and (b) (Example (2)) (transferee's basis): section 1.1001-1(e)(1) and (2) (Example (1)) (transferor's gain).

Thus, section 1.1015-4 of the regulations is a response to the *FINCKE* case. It is significant to note that the part sale and part gift transactions in *FINCKE* arose from both transfers to individuals and transfers in trust.

Administratively, although section 1.1015-4 of the regulations was first promulgated in 1957 (T.D. 6265, 1957 C.B. 463, filed November 6, 1957, the position set forth in the regulation has been followed by the Service and publicly known since 1939 (I.T. 3335). In addition, Congress amended section 1015 in 1958 by the addition of subsection (d) to provide that the basis of property in the hands of a transferee should be increased by the gift tax paid with respect to the transfer (Technical Amendments Act of 1958, Pub. L. No. 85-866, section 43(a) 72 Stat. 1606), without questioning the method of computing basis that is prescribed by the regulation. S. REP. NO. 1983, 85th Cong., 2d Sess., pp. 70, 198 (1958-3 C.B. 922, 991, 1119). Under such circumstances, the principle set forth in *HELVERING V. WINMILL*, 305 U.S. 79, 83, would be particularly applicable here:

> Treasury regulations and interpretations long continued without substantial change, applying to unamended or substantially re-enacted statutes, are deemed to have received Congressional approval and have the effect of law.

In summary, despite the *WACO* decision, it is the Service's position that the provisions of section 1.1015-4 of the regulations apply with equal validity to both individual transferees and trust transferees.

In the instant case, the taxpayer asserts as a final argument the provisions of section 1.1015-4 of the regulations should only apply to those number of shares of common stock the aggregate fair market value of which total the taxes paid by the taxpayer on the gifts (the "sale element"). The taxpayer further asserts that its basis in the remaining shares (the "gift element") should be determined by sections 1.1015-1 and 1.1015-5 of the regulations, so that the taxpayer's basis in the gift element shares would be the donor's basis increased by the amount of gift tax paid.

The fallacy with this assertion is twofold. Section 1.1015-4 does not apply to sales, but rather to transactions that are in part sales and in part gifts. Secondly, the taxpayer's assertion is analogous to the split transaction principle argued unsuccessfully by the Service in FINCKE in 1939. As has been noted, since 1939 it has been the position of the Service that a part sale and part gift transaction is a single transaction, the tax consequences of which may not be determined as if the transaction were a pure sale to extent of the consideration furnished and to the amount in excess of the consideration, a pure gift.

Conclusion

Based upon the information submitted and the applicable law discussed herein, it is determined that:

1) Section 1.1015-4 of the regulations provides the proper method for determining the taxpayer's basis in the transferred shares of common stock.

2) The taxpayer may not in determining its holding period in the transferred stock tack on the period in which the donor held the stock.

3) The taxpayer has not purchased some shares at full fair market value and received the remainder by gift, but rather has paid an amount, namely, the gift tax, for all the transferred stock in a part sale and part gift transaction.

For gift tax purposes, Code § 7872 applies when valuing notes the buyer issues in a bargain sale.[6380]

When an irrevocable grantor trust holds an interest in an entity taxed as a partnership is allocated liabilities in excess of basis, turning off grantor trust status is a deemed bargain sale.[6381]

III.B.1.c.i.(b). Bargain Sales to Charities

Code § 1011(b), “Bargain Sale to a Charitable Organization,” provides:

> If a deduction is allowable under section 170 (relating to charitable contributions) by reason of a sale, then the adjusted basis for determining the gain from such sale shall be that portion of the adjusted basis which bears the same ratio to the adjusted basis as the amount realized bears to the fair market value of the property.

Reg. § 1.1011-2(a), “In general,” provides

> (1) If for the taxable year a charitable contributions deduction is allowable under section 170 by reason of a sale or exchange of property, the taxpayer’s adjusted basis of such property for purposes of determining gain from such sale or exchange must be computed as provided in section 1011(b) and paragraph (b) of this section. If after applying the provisions of section 170 for the taxable year, including the percentage limitations of section 170(b), no deduction is allowable under that section by reason of the sale or exchange of the property, section 1011(b) does not apply and the adjusted basis of the property is not required to be apportioned pursuant to paragraph (b) of this section. In such case the entire adjusted basis of the property is to be taken into account in determining gain from the sale or exchange, as provided in § 1.1011-1(e). In ascertaining whether or not a charitable contributions deduction is allowable under section 170 for the taxable year for such purposes, that section is to be applied without regard to this section and the amount by which the contributed portion of the property must be reduced under section 170(e)(1) is the amount determined by taking into account the amount of gain which would have been ordinary income or long-term capital gain if the contributed portion of the property had been sold by the donor at its fair market value at the time of the sale or exchange.
>
> (2) If in the taxable year there is a sale or exchange of property which gives rise to a charitable contribution which is carried over under section 170(b)(1)(D)(ii) or section 170(d) to a subsequent taxable year or is postponed under section 170(a)(3) to a subsequent taxable year, section 1011(b) and paragraph (b) of this section must be applied for purposes of apportioning the adjusted basis of the property for the year of the sale or exchange, whether or not such contribution is allowable as a deduction under section 170 in such subsequent year.

[6380] See fn. 7067 in part III.B.5.b Promissory Notes.

[6381] See text accompanying fn 6554 in part III.B.2.d.i.(b) Portions of Irrevocable Grantor Trust Deemed Owned for Federal Income Taxation. Much debate has occurred over whether a bargain sale would occur on the grantor’s death; see fn. 6591 in part III.B.2.g Income Tax Concerns When Removing Property from the Estate Tax System.

(3) If property is transferred subject to an indebtedness, the amount of the indebtedness must be treated as an amount realized for purposes of determining whether there is a sale or exchange to which section 1011(b) and this section apply, even though the transferee does not agree to assume or pay the indebtedness.

(4)

(i) Section 1011(b) and this section apply where property is sold or exchanged in return for an obligation to pay an annuity and a charitable contributions deduction is allowable under section 170 by reason of such sale or exchange.

(ii) If in such case the annuity received in exchange for the property is nonassignable, or is assignable but only to the charitable organization to which the property is sold or exchanged, and if the transferor is the only annuitant or the transferor and a designated survivor annuitant or annuitants are the only annuitants, any gain on such exchange is to be reported as provided in example (8) in paragraph (c) of this section. In determining the period over which gain may be reported as provided in such example, the life expectancy of the survivor annuitant may not be taken into account. The fact that the transferor may retain the right to revoke the survivor's annuity or relinquish his own right to the annuity will not be considered, for purposes of this subdivision, to make the annuity assignable to someone other than the charitable organization. Gain on an exchange of the type described in this subdivision pursuant to an agreement which is entered into after December 19, 1969, and before May 3, 1971, may be reported as provided in example (8) in paragraph (c) of this section, even though the annuity is assignable.

(iii) In the case of an annuity to which subdivision (ii) of this subparagraph applies, the gain unreported by the transferor with respect to annuity payments not yet due when the following events occur is not required to be included in gross income of any person where -

(a) The transferor dies before the entire amount of gain has been reported and there is no surviving annuitant, or

(b) The transferor relinquishes the annuity to the charitable organization. If the transferor dies before the entire amount of gain on a two-life annuity has been reported, the unreported gain is required to be reported by the surviving annuitant or annuitants with respect to the annuity payments received by them.

Reg. § 1.1011-2(b), "Apportionment of adjusted basis," provides

For purposes of determining gain on a sale or exchange to which this paragraph applies, the adjusted basis of the property which is sold or exchanged shall be that portion of the adjusted basis of the entire property which bears the same ratio to the adjusted basis as the amount realized bears to the fair market value of the entire property. The amount of such gain which shall be treated as ordinary income (or long-term capital gain) shall be that amount which bears the same ratio to the ordinary income (or long-term capital gain) which would have been recognized if the entire property had been sold by the donor at its fair market value at the time of the sale or exchange as the amount realized

> on the sale or exchange bears to the fair market value of the entire property at such time. The terms "ordinary income" and "long-term capital gain", as used in this section, have the same meaning as they have in paragraph (a) of § 1.170A-4. For determining the portion of the adjusted basis, ordinary income, and long-term capital gain allocated to the contributed portion of the property for purposes of applying section 170(e)(1) and paragraph (a) of § 1.170A-4 to the contributed portion of the property, and for determining the donee's basis in such contributed portion, see paragraph (c)(2) and (4) of § 1.170A-4. For determining the holding period of such contributed portion, see section 1223(2) and the regulations thereunder.

Reg. § 1.1011-2(c) provides examples and cross-references examples in Reg. § 1.170A-4(d).

Also see part II.Q.6.b Possible Deemed Sale or Reduced Deduction When Contributing Partnership Interest to Charity.

III.B.1.c.ii. Gift of Deferred Income Item May Trigger Income Tax

Deferred income is triggered by a gift of an note used to defer tax on an installment sale. See part II.G.15 Limitations on the Use of Installment Sales.

Other than a gift to an irrevocable grantor trust, the following may trigger income tax:

- A gift of an interest in an opportunity zone (such as a qualified opportunity fund) accelerates the donor's deferred income.[6382]

- A direct or indirect gift of a carried interest. A carried interest may exist in a partnership interest where distributions are not proportionate to capital accounts. Proposed regulations attribute through tiers of entities the indirect holding of a carried interest.[6383]

Be sure to do due diligence on whether either condition exists before facilitating a gift other than to a grantor trust and before turning off grantor trust powers.

III.B.1.c.iii. Incomplete Gift

Reg. § 25.2511-2, "Cessation of donor's dominion and control," governs when a gift is complete. Subsection (b):

> As to any property, or part thereof or interest therein, of which the donor has so parted with dominion and control as to leave in him no power to change its disposition, whether for his own benefit or for the benefit of another, the gift is complete. But if upon a transfer of property (whether in trust or otherwise) the donor reserves any power over its disposition, the gift may be wholly incomplete, or may be partially complete and partially incomplete, depending upon all the facts in the particular case. Accordingly, in every case of a transfer of property subject to a reserved power, the terms of the power must be examined and its scope determined. For example, if a donor transfers property to another in trust to pay the income to the donor or accumulate it in the discretion of the

[6382] See part II.G.7.b Transfers of a Qualified Opportunity Fund (QOF).
[6383] See Code § 1061(d), reproduced in fn 3754 and the related discussion in part II.M.4.f.ii.(b) Code § 1061 - Certain Sales of Compensatory Partnership Interests Recharacterized from Long-Term to Short-Term Gains, including that proposed regulations assert that "transfer" includes gifts.

> trustee, and the donor retains a testamentary power to appoint the remainder among his descendants, no portion of the transfer is a completed gift. On the other hand, if the donor had not retained the testamentary power of appointment, but instead provided that the remainder should go to X or his heirs, the entire transfer would be a completed gift. However, if the exercise of the trustee's power in favor of the grantor is limited by a fixed or ascertainable standard (see paragraph (g)(2) of §25.2511-1), enforceable by or on behalf of the grantor, then the gift is incomplete to the extent of the ascertainable value of any rights thus retained by the grantor.

Reg. § 25.2511-2(c) discusses the donor reserving other powers:

> A gift is incomplete in every instance in which a donor reserves the power to revest the beneficial title to the property in himself. A gift is also incomplete if and to the extent that a reserved power gives the donor the power to name new beneficiaries or to change the interests of the beneficiaries as between themselves unless the power is a fiduciary power limited by a fixed or ascertainable standard. Thus, if an estate for life is transferred but, by an exercise of a power, the estate may be terminated or cut down by the donor to one of less value, and without restriction upon the extent to which the estate may be so cut down, the transfer constitutes an incomplete gift. If in this example the power was confined to the right to cut down the estate for life to one for a term of five years, the certainty of an estate for not less than that term results in a gift to that extent complete.

Estate of Demuth, Jr. v. Commissioner, 132 A.F.T.R.2d 2023-5122 (3rd Cir. 7/12/2023), reasoned and held:

> A gift is "incomplete in every instance in which a donor reserves the power to revest the beneficial title to the property in himself." 26 C.F.R. § 25.2511-2 (c). We apply state law to determine when a gift in the form of a check is completed. See, *e.g.*, *Burnet v. Harmel*, 287 U.S. 103, 110 (1932) ("[S]tate law creates legal interests but the federal statute determines when and how they shall be taxed."); *Metzger v. Comm'r*, 38 F.3d 118, 121 (4th Cir. 1994) ("We refer to state law to determine whether a donor has relinquished dominion and control over a gift in the form of a check[.]" (citing *Estate of Dillingham v. Comm'r*, 903 F.2d 760, 763 (10th Cir. 1990))); Rev. Rul. 96-56, 1996-2 C.B. 161 (noting local law applies to determine whether a check from a donor is a complete gift).
>
> Under Pennsylvania law,[5] an inter vivos gift is a gift given with the intention of being completed when the donor is living. *Titusville Tr. Co. v. Johnson*, 100 A.2d 93, 96 (Pa. 1953). To find an inter vivos gift has been completed, there must be (1) an intention to make the gift and (2) an "actual or constructive delivery at the same time, of a nature sufficient to divest the giver of all dominion." *Id*. at 96-97. In the case of a check, delivery of the check alone does not complete the gift because the donor may revoke the gift up until the time it is deposited or cashed.[6] *In re Eshenbaugh's Estate*, 174 A. 809, 811 (Pa. Super. Ct. 1934) (citations omitted); see also In re Kern's Estate, 33 A. 129, 129 (Pa. 1895) ("[T]he delivery of a...check is not an executed gift of the money, but remains revocable, and will be revoked by the death of the promisor before actual payment."). This is consistent with Pennsylvania's Commercial Code, which allows for a drawer of a check to stop payment on the check until the earliest of the drawer's bank accepting, certifying, or making final payment of the check. See 13 Pa. Cons. Stat. §§ 3409, 4403(a), 4303(a).

[5] The parties agree that because the Decedent was domiciled in Pennsylvania at the time of his death, Pennsylvania state law controls.

[6] If, however, "the check is drawn for the whole and exact amount in the bank," it is deemed "an equitable assignment of the fund," and thus it is viewed as a completed gift. *In re Eshenbaugh's Estate*, 174 A. 809, 811 (Pa. Super. Ct. 1934) (citations omitted).

Here, the seven checks at issue were all deposited and paid after the death of the Decedent. Because there had not been "actual or constructive delivery...of a nature sufficient to divest the giver of all dominion," *Titusville*, 100 A.2d at 96-97, the checks were still revocable at the time the Decedent died. The Decedent therefore still "reserve[d] the power to revest the beneficial title to the property in himself," 26 C.F.R. § 25.2511-2 (c), and thus the inter vivos gifts here were not completed and remained part of the Estate. See *Estate of Gagliardi v. Comm'r*, 89 T.C. 1207, 1213 (1987) (applying Pennsylvania law and holding that checks delivered to the payees before, but paid after, the decedent's death are part of the gross estate for federal estate tax purposes).[7]

[7] Courts of Appeals interpreting similar laws in other states have also held that checks delivered before a decedent's death but paid after were revocable at the time of his death and therefore are incomplete gifts that must be included in the estate. See, *e.g.*, *Metzger v. Comm'r*, 38 F.3d 118, 121 (4th Cir. 1994) (observing that under Maryland law, a gift in the form of a check is an incomplete gift and includible in the gross estate because "the delivery of a personal check is only conditional payment, and the gift remains incomplete until the donee presents the check for payment and the check is accepted by the drawee bank" (quoting *Malloy v. Smith*, 290 A.2d 486, 487-88 (Md. 1972))); *Estate of Dillingham v. Comm'r*, 903 F.2d 760, 763 (10th Cir. 1990) (same, where Oklahoma law allows a decedent to "retain[] the power to stop payment and thereby defeat the claims of the donees from the time the checks were delivered...until they were cashed"); *Rosano v. United States*, 245 F.3d 212, 213 (2d Cir. 2001) (same, applying New York law which gives the decedent "the ability, at any time until the checks [are] paid, to order that payment on the checks be stopped").

The Estate argues that the seven checks at issue were properly excluded because they were given in contemplation of Decedent's death, and therefore were completed gifts in causa mortis. Under Pennsylvania law, gifts "causa mortis" are gifts "prompted by the [donor's] belief...that his death is impending, and [are] made as a provision for the donee if death ensues." *Titusville*, 100 A.2d at 96. Pennsylvania courts have found that where the circumstances support a finding of a gift causa mortis, checks delivered before, but paid after, the decedent's death are completed gifts. See, *e.g.*, *In re Estate of Smith*, 694 A.2d 1099, 1102 (Pa. Super. Ct. 1997); *In re Fleigle Estate*, 13 Fiduc. 2d 141, 145-47 (Pa. C.C.P. 1993), *aff'd on other grounds*, *In re Estate of Fleigle*, 664 A.2d 612 (Pa. Super. Ct. 1995).

A gift causa mortis differs from an inter vivos gift in that "it is made when the donor believes he is about to die, and is revocable should he survive." *Estate of Smith*, 694 A.2d at 1102 n.2. To determine whether a gift was given in causa mortis, one must show that "at the time of the alleged gift, the decedent intended to make a gift, the decedent apprehended death, the res of the intended gift was either actually or constructively delivered, and death actually occurred." *Id*. at 1101. Whether a gift was given in causa mortis thus "depends primarily upon the state of the donor's mind." *Titusville*, 100 A.2d at 97. To determine this, "the attendant circumstances should be considered, including the nature and extent of his sickness, illness or injuries, his physical condition, his conduct, and anything that was said to and by him." *Id*.

The Estate has not shown that the Decedent wrote the checks as gifts in causa mortis. The only evidence arguably supporting this point is that the Decedent was diagnosed with an end-stage medical condition in early September 2015, and that the yearly gifts given to family members were generally given in December rather than September. There is no evidence, however, that indicates the Decedent directed Donald to distribute the September 2015 checks in contemplation of his death.[8] In fact, the record reflects that the only directions the Decedent gave to Donald as his agent was that Donald was authorized to "give gifts to Decedent's issue in an amount not to exceed the annual exclusion from the federal gift tax," and to "give gifts to any permitted donee for tuition." App. 18-19. As such, the Estate's argument that the checks were properly completed gifts causa mortis fails because there is nothing to show that the Decedent contemplated death when the checks were written on his behalf. Thus, the value of the seven remaining checks was improperly excluded from the gross estate.

[8] The Estate seems to make an argument that Donald expressed sufficient donative intent to support a gift given in causa mortis because "he knew of his father's end-stage medical condition." Appellant Br. at 6. The only relevant state of mind, however, was the Decedent's, see, *e.g.*, *Titusville*, 100 A.2d at 96 (noting that a gift causa mortis is made "when the donor believes he is about to die"), and so Donald's state of mind is irrelevant to the question of whether the gifts were given in causa mortis.

Please read the rest of Reg. § 25.2511-2.

III.B.1.d. Generation-Skipping Transfer (GST) Issues

These materials do not attempt to cover GST issues generally but rather cover selected matters that I feel like documenting.

For allocations of GST exemption on a gift tax return filed after the original due date and before the extended due date, see part II.G.19.e Superseding Returns.

III.B.1.d.i. Effect of "Additions" on Grandfathering from GST Rules

An addition to a grandfathered trust causes the trust to lose its exclusion from the GST system to the extent of the addition; if an individual other than the transferor made the addition, the addition is treated as a separate trust for GST purposes.[6384] A probate court modification that

[6384] Reg. § 26.2601-1(b)(1)(iv) provides:

In general. If an addition is made after September 25, 1985, to an irrevocable trust which is excluded from chapter 13 by reason of paragraph (b)(1) of this section, a pro rata portion of subsequent distributions from (and terminations of interests in property held in) the trust is subject to the provisions of chapter 13. If an addition is made, the trust is thereafter deemed to consist of two portions, a portion not subject to chapter 13 (the non-chapter 13 portion) and a portion subject to chapter 13 (the chapter 13 portion), each with a separate inclusion ratio (as defined in section 2642(a)). The non-chapter 13 portion represents the value of the assets of the trust as it existed on September 25, 1985. The applicable fraction (as defined in section 2642(a)(2)) for the increases distributions to skip persons beyond what was originally intended caused the entire trust to lose its grandfathering, with the original transferor remaining the transferor.[6385]

Important scholarship on who is the transferor, particularly when one beneficiary is deemed to have made a gift to other beneficiaries of all or part of the deemed donor-beneficiary's interest in a trust, is cited in fn 6368 in part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts. Part III.B.1.b includes some rulings relating to GST issues.

A constructive addition is treated as an addition to a grandfathered trust.[6386] Constructive additions include certain powers of appointment[6387] (if and to the extent the regulation is valid) to

---

> non-chapter 13 portion is deemed to be 1 and the inclusion ratio for such portion is 0. The chapter 13 portion of the trust represents the value of all additions made to the trust after September 25, 1985. The inclusion ratio for the chapter 13 portion is determined under section 2642. This paragraph (b)(1)(iv)(A) requires separate portions of one trust only for purposes of determining inclusion ratios. For purposes of chapter 13, a constructive addition under paragraph (b)(1)(v) of this section is treated as an addition. See paragraph (b)(4) of this section for exceptions to the additions rule of this paragraph (b)(1)(iv). See § 26.2654-1(a)(2) for rules treating additions to a trust by an individual other than the initial transferor as a separate trust for purposes of chapter 13.

Reg. § 26.2654-1(a)(2), "Multiple transferors with respect to single trust," is reproduced in part III.B.1.d.iii Who Is the Transferor.

[6385] Letter Ruling 9448024, as modified by Letter Ruling 9522032.

[6386] See the highlighted portion of Reg. § 26.2601-1(b)(1)(iv) in fn. 6384.

[6387] Reg. § 26.2601-1(b)(1)(v)(A) provides:

> *Powers of appointment*. Except as provided in paragraph (b)(1)(v)(B) of this section, where any portion of a trust remains in the trust after the post-September 25, 1985, release, exercise, or lapse of a power of appointment over that portion of the trust, and the release, exercise, or lapse is treated to any extent as a taxable transfer under chapter 11 or chapter 12, the value of the entire portion of the trust subject to the power that was released, exercised, or lapsed is treated as if that portion had been withdrawn and immediately retransferred to the trust at the time of the release, exercise, or lapse. The creator of the power will be considered the transferor of the addition except to the extent that the release, exercise, or lapse of the power is treated as a taxable transfer under chapter 11 or chapter 12. See section 26.2652-1 for rules for determining the identity of the transferor of property for purposes of chapter 13.

the extent not excluded[6388] and the relief of certain liabilities.[6389] Except to the extent that the above rules allocate subsequent appreciation and accumulated income between the original trust and additions, appreciation in the trust's value and accumulated income are not considered an addition to the principal of a trust.[6390] Reg. § 26.2601-1(b)(1)(iv)(C)(1) provides:

> *In general*. The allocation fraction allocates appreciation and accumulated income between the chapter 13 and non-chapter 13 portions of a trust. The numerator of the allocation fraction is the amount of the addition (valued as of the date the addition is made), determined without regard to whether any part of the transfer is subject to tax under chapter 11 or chapter 12, but reduced by the amount of any Federal or state estate or gift tax imposed and subsequently paid by the recipient trust with respect to the addition. The denominator of the allocation fraction is the total value of the entire trust immediately after the addition. For purposes of this paragraph (b)(1)(iv)(C), the total value of the entire trust is the fair market value of the property held in trust (determined under the rules of section 2031), reduced by any amount attributable to or paid by the trust and attributable to the transfer to the trust that is similar to an amount that would be allowable as a deduction under section 2053 if the addition had occurred at the death of the transferor, and further reduced by the same amount that the numerator was reduced to reflect Federal or state estate or gift tax incurred by and subsequently paid by the recipient trust with respect to the addition.

The regulation continues by describing the consequences of multiple additions, then Reg. § 26.2601-1(b)(1)(iv)(C)(2) provides examples. I am unclear how one can value an addition, when its amount is "determined without regard to whether any part of the transfer is subject to tax under chapter 11 or chapter 12…." How does one measure the amount of the

---

[6388] Reg. § 26.2601-1(b)(1)(v)(B) provides:

> *Special rule for certain powers of appointment*. The release, exercise, or lapse of a power of appointment (other than a general power of appointment as defined in section 2041(b)) is not treated as an addition to a trust if -
>
> (1) Such power of appointment was created in an irrevocable trust that is not subject to chapter 13 under paragraph (b)(1) of this section; and
>
> (2) In the case of an exercise, the power of appointment is not exercised in a manner that may postpone or suspend the vesting, absolute ownership or power of alienation of an interest in property for a period, measured from the date of creation of the trust, extending beyond any life in being at the date of creation of the trust plus a period of 21 years plus, if necessary, a reasonable period of gestation (the perpetuities period). For purposes of this paragraph (b)(1)(v)(B)(2), the exercise of a power of appointment that validly postpones or suspends the vesting, absolute ownership or power of alienation of an interest in property for a term of years that will not exceed 90 years (measured from the date of creation of the trust) will not be considered an exercise that postpones or suspends vesting, absolute ownership or the power of alienation beyond the perpetuities period. If a power is exercised by creating another power, it is deemed to be exercised to whatever extent the second power may be exercised.

[6389] Reg. § 26.2601-1(b)(1)(v)(C) provides:

> *Constructive addition if liability is not paid out of trust principal*. Where a trust described in paragraph (b)(1) of this section is relieved of any liability properly payable out of the assets of such trust, the person or entity who actually satisfies the liability is considered to have made a constructive addition to the trust in an amount equal to the liability. The constructive addition occurs when the trust is relieved of liability (*e.g.*, when the right of recovery is no longer enforceable). But see section 26.2652-1(a)(3) for rules involving the application of section 2207A in the case of an election under section 2652(a)(3).

[6390] Reg. § 26.2601-1(b)(1)(vi).

transfer that is a "constructive addition"? Reg. § 26.2601-1(b)(1)(v)(D), Example (3), "Entire portion of trust subject to lapsed power is treated as an addition," provides:

> On September 25, 1985, B possessed a general power of appointment over the assets of an irrevocable trust that had been created by T in 1980. Under the terms of the trust, B's power lapsed on July 20, 1987. For Federal gift tax purposes, B is treated as making a gift of ninety-five percent (100% − 5%) of the value of the principal (see section 2514). However, because the entire trust was subject to the power of appointment, 100 percent (that portion of the trust subject to the power) of the assets of the trust are treated as a constructive addition. Thus, the entire amount of all generation-skipping transfers occurring pursuant to the trust instrument after July 20, 1987, are subject to chapter 13.

Reg. § 26.2601-1(b)(4) sets forth safe harbors for when a modification, judicial construction, settlement agreement, or trustee action with respect to a trust will not cause the trust to lose its grandfathered status. These safe harbors apply to certain discretionary powers,[6391]

[6391] Reg. § 26.2601-1(b)(4)(i)(A) provides:

> The distribution of trust principal from an exempt trust to a new trust or retention of trust principal in a continuing trust will not cause the new or continuing trust to be subject to the provisions of chapter 13, if -
>
> (1) Either -
>
> (i) The terms of the governing instrument of the exempt trust authorize distributions to the new trust or the retention of trust principal in a continuing trust, without the consent or approval of any beneficiary or court; or
>
> (ii) at the time the exempt trust became irrevocable, state law authorized distributions to the new trust or retention of principal in the continuing trust, without the consent or approval of any beneficiary or court; and
>
> (2) The terms of the governing instrument of the new or continuing trust do not extend the time for vesting of any beneficial interest in the trust in a manner that may postpone or suspend the vesting, absolute ownership, or power of alienation of an interest in property for a period, measured from the date the original trust became irrevocable, extending beyond any life in being at the date the original trust became irrevocable plus a period of 21 years, plus if necessary, a reasonable period of gestation. For purposes of this paragraph (b)(4)(i)(A), the exercise of a trustee's distributive power that validly postpones or suspends the vesting, absolute ownership, or power of alienation of an interest in property for a term of years that will not exceed 90 years (measured from the date the original trust became irrevocable) will not be considered an exercise that postpones or suspends vesting, absolute ownership, or the power of alienation beyond the perpetuities period. If a distributive power is exercised by creating another power, it is deemed to be exercised to whatever extent the second power may be exercised.

settlements,[6392] judicial constructions,[6393] or certain modifications.[6394] Reg. § 26.2601-1(b)(4)(i)(E) provides examples of these safe harbors.

[6392] Reg. § 26.2601-1(b)(4)(i)(B) provides:

> A court-approved settlement of a bona fide issue regarding the administration of the trust or the construction of terms of the governing instrument will not cause the new or continuing trust to be subject to the provisions of chapter 13, if -
>
> (1) The settlement is the product of arm's length negotiations; and
>
> (2) The settlement is within the range of reasonable outcomes under the governing instrument and applicable state law addressing the issues resolved by the settlement. A settlement that results in a compromise between the positions of the litigating parties and reflects the parties' assessments of the relative strengths of their positions is a settlement that is within the range of reasonable outcomes.

[6393] Reg. § 26.2601-1(b)(4)(i)(C) provides:

> judicial construction of a governing instrument to resolve an ambiguity in the terms of the instrument or to correct a scrivener's error will not cause the new or continuing trust to be subject to the provisions of chapter 13, if -
>
> (1) The judicial action involves a bona fide issue; and
>
> (2) The construction is consistent with applicable state law that would be applied by the highest court of the state.

[6394] Reg. § 26.2601-1(b)(4)(i)(D) provides:

> (1) A modification of the governing instrument of an exempt trust (including a trustee distribution, settlement, or construction that does not satisfy paragraph (b)(4)(i)(A), (B), or (C) of this section) by judicial reformation, or nonjudicial reformation that is valid under applicable state law, will not cause an exempt trust to be subject to the provisions of chapter 13, if the modification does not shift a beneficial interest in the trust to any beneficiary who occupies a lower generation (as defined in section 2651) than the person or persons who held the beneficial interest prior to the modification, and the modification does not extend the time for vesting of any beneficial interest in the trust beyond the period provided for in the original trust.
>
> (2) For purposes of this section, a modification of an exempt trust will result in a shift in beneficial interest to a lower generation beneficiary if the modification can result in either an increase in the amount of a GST transfer or the creation of a new GST transfer. To determine whether a modification of an irrevocable trust will shift a beneficial interest in a trust to a beneficiary who occupies a lower generation, the effect of the instrument on the date of the modification is measured against the effect of the instrument in existence immediately before the modification. If the effect of the modification cannot be immediately determined, it is deemed to shift a beneficial interest in the trust to a beneficiary who occupies a lower generation (as defined in section 2651) than the person or persons who held the beneficial interest prior to the modification. A modification that is administrative in nature that only indirectly increases the amount transferred (for example, by lowering administrative costs or income taxes) will not be considered to shift a beneficial interest in the trust. In addition, administration of a trust in conformance with applicable local law that defines the term income as a unitrust amount (or permits a right to income to be satisfied by such an amount) or that permits the trustee to adjust between principal and income to fulfill the trustee's duty of impartiality between income and principal beneficiaries will not be considered to shift a beneficial interest in the trust, if applicable local law provides for a reasonable apportionment between the income and remainder beneficiaries of the total return of the trust and meets the requirements of § 1.643(b)-1 of this chapter.

Among the safe harbors is Reg. § 26.2601-1(b)(4)(i)(E), Example (11), "Conversion of income interest to unitrust interest under state statute":[6395]

> In 1980, Grantor, a resident of State X, established an irrevocable trust for the benefit of Grantor's child, A, and A's issue. The trust provides that trust income is payable to A for life and upon A's death the remainder is to pass to A's issue, per stirpes. In 2002, State X amends its income and principal statute to define income as a unitrust amount of 4% of the fair market value of the trust assets valued annually. For a trust established prior to 2002, the statute provides that the new definition of income will apply only if all the beneficiaries who have an interest in the trust consent to the change within two years after the effective date of the statute. The statute provides specific procedures to establish the consent of the beneficiaries. A and A's issue consent to the change in the definition of income within the time period, and in accordance with the procedures, prescribed by the state statute. The administration of the trust, in accordance with the state statute defining income to be a 4% unitrust amount, will not be considered to shift any beneficial interest in the trust. Therefore, the trust will not be subject to the provisions of chapter 13 of the Internal Revenue Code. Further, under these facts, no trust beneficiary will be treated as having made a gift for federal gift tax purposes, and neither the trust nor any trust beneficiary will be treated as having made a taxable exchange for federal income tax purposes. Similarly, the conclusions in this example would be the same if the beneficiaries' consent was not required, or, if the change in administration of the trust occurred because the situs of the trust was changed to State X from a state whose statute does not define income as a unitrust amount or if the situs was changed to such a state from State X.

The Reg. § 26.2601-1(b)(4)(i)(D)(1) safe harbor for a modification that does not shift a beneficial interest in the trust to any beneficiary who occupies a lower generation is satisfied when an outright distribution to a lower generation is deferred but the trust is subject to a testamentary general power of appoint. Letter Ruling 202011001 held:[6396]

> In this case, Trust A was irrevocable prior to September 25, 1985. The amended trust agreement provides for outright distribution to the beneficiaries upon the termination of Trust A and the Trust A Successor Trusts, 21 years after the death of Son. Under the proposed modification of the trust agreement, any share upon the termination of Trust A and the Trust A Successor Trusts distributable to a beneficiary who is under the age of b, will be held in a continuing trust for that continuing beneficiary. Each continuing beneficiary will have a testamentary general power of appointment with respect to the property. Under § 2041(a)(2), the continuing beneficiary's trust property will be includible in his or her estate at his or her death. Further, each continuing beneficiary will be treated as the transferor of the trust corpus for GST tax purposes under § 2652(a)(1). The proposed modification will not result in a shift of any beneficial interest in any beneficiary who occupies a generation lower than the persons holding the beneficial interests. Further, the proposed modification in further trust will not extend the

[6395] Letter Ruling 200810019 applied this Example. See text accompanying fn 3014 in part II.J.18.f Commutation vs Mere Division. Query the result when converting an income interest subject to a floor and a ceiling, which was found an income taxable event in Letter Ruling 200231011, described in fn 2989 and the accompanying text in part II.J.18.d Trust Commutations.

[6396] I have not reviewed Letter Rulings 202011002, 202011003, 202011004, and 202011005, which are said to be companion rulings. Letter Ruling 202013001 had the same reasoning with substantially the same facts; I have not reviewed Letter Rulings 202013002, 202013003, 202013004, and 202013005, which are said to be companion rulings.

> time for vesting of any beneficial interest in any trust. Accordingly, based on the facts presented and the representations made, we rule that the proposed modification will not cause Trust A or the Trust A Successor Trusts to lose their exemption from the GST tax of chapter 13.

Similarly, Letter Ruling 201947001 held that converting a trust to age 21 to a lifetime trust with a testamentary general power of appointment would not blow the trust's grandfathered GST status:[6397]

> Under the proposed modification of Article II, § 2.2(e) of Trust, the Trust property is divided upon Son's death into the same trust shares as under the original governing instrument of Trust. Each share will be held in a separate trust for the lifetime benefit of the beneficiary for whom it is created and any remaining trust property including undistributed income will be subject to that beneficiary's general power of appointment at his or her death. Therefore, the value of such property will be included in the beneficiary's gross estate under § 2041(a)(2) and the beneficiary will be treated as the transferor of such property for GST tax purposes under § 2652(a)(1). Under these circumstances, we conclude that the modification of Article II of § 2.2(e) of Trust will not shift a beneficial interest in Trust to any beneficiary occupying a lower generation (as defined in § 2651) than the person or persons who held the beneficial interest prior to the modification, and the modification will not extend the time for vesting of any beneficial interest in Trust beyond the period provided for in the original governing instrument of Trust.

In Letter Ruling 201938004, in the initial trust modification, the parties seemed to forget to grant the necessary testamentary general power of appointment when extending the term and then later remembered to do it:[6398]

> Decedent died testate on Date 1, a date prior to September 25, 1985. Under the terms of Decedent's last will and testament, a trust (Trust) was created for the primary benefit of Decedent's grandson, Beneficiary. Under the terms of Trust, all the trust income was to be distributed to Beneficiary for life, and upon Beneficiary's death to Beneficiary's living issue, per stirpes. Distributions of principal were not permitted. Trust terminates upon the earlier of two dates: (1) the date that is 21 years after Beneficiary's death, or (2) the date that the youngest of Beneficiary's issue reach the age of 21. Upon Trust's termination, the trustee is to distribute the trust corpus to Beneficiary's then-living issue, *per stirpes*.
>
> In Year 1, Beneficiary and the trustee of Trust petitioned Court to modify Trust. At that time, Beneficiary had one son (Son) and two grandchildren (Grandson and Granddaughter), all of whom were over the age of 21. Accordingly, under the terms of Trust as of Year 1, Trust was to terminate upon Beneficiary's death and the assets of Trust were to be distributed outright to Son if living.
>
> Pursuant to a Court order dated Date 2, Trust was modified and any outright distribution to Son upon termination was instead to be held in further trust for Son's lifetime benefit.

[6397] I am told that Letter Rulings 201947002, 201947003, 201947004, 201947005, 201947006, 201947007, 201947008, and 201947009 are companion rulings.
[6398] Letter Rulings 201938005 and 201938006 appear to be companion rulings.

Under the new terms of Trust, the trustee had absolute discretion to pay income or corpus to or for the benefit of Son, and at the death of Son, distribute one half of the trust to Grandson, if living, in a separate trust, otherwise to his estate; and one half to Granddaughter, if living, in a separate trust, otherwise to her estate. Trust as modified also directed the trustee to consider, before making a distribution, whether a beneficiary was a substance abuser and if the trustee so suspects, to request that the beneficiary submit to testing and treatment. Any treatment costs are to be charged first against income and then principal.

Beneficiary died on Date 3, survived by Son. Son died on Date 4, survived by Grandson and Granddaughter.

In Year 2, the trustee petitioned Court to further construe Trust to clarify that Son has a general power of appointment over the assets in Trust. Such clarification ensures that the assets of Trust will be taxed as part of Son's gross estate and that there will be no extension of the time for vesting under the original terms of Trust. Pursuant to a Court order dated Date 5, Trust was clarified to state that Son has a general power of appointment over the assets of Trust. The order further provides that Trust is not required to file annual accounts or final accounts with the Court insofar as such accountings are no longer necessary.

Letter Ruling 201938004 held:

In *Commissioner v. Estate of Bosch*, 387 U.S. 456 (1967), the Court considered whether a state trial court's characterization of property rights conclusively binds a federal court or agency in a federal estate tax controversy. The Court concluded that the decision of a state trial court as to an underlying issue of state law should not be controlling when applied to a federal statute. Rather, the highest court of the state is the best authority on the underlying substantive rule of state law to be applied in the federal matter. If there is no decision by that court, then the federal authority must apply what it finds to be state law after giving "proper regard" to the state trial court's determination and to relevant rulings of other courts of the state. In this respect, the federal agency may be said, in effect, to be sitting as a state court.

In this case, an examination of the documents together with state law confirms that Decedent intended to give Son a power of appointment and the Date 5 order clarified such right. Further, the court order providing that no annual accounts or final accounts were required is administrative in nature under § 26.2601-1(b)(4)(i)(D)(2), and will not be considered to shift a beneficial interest to a lower generation in the trust. *See* § 26.2601-1(b)(4)(i)(E), *Example 10*. Because the assets are to be included in Son's gross estate, Son is now treated as the owner for GST purposes. Accordingly, after the judicial construction and modifications to the administrative and dispositive provisions of Trust, Trust remains exempt from the application of the GST tax and no distributions during the term of Trust or upon final termination will be subject to GST tax.

Letter Ruling 202217005 repeated the above *Bosch* analysis and held:

The terms of New Trust provide that Granddaughter has a testamentary power to appoint the principal of New Trust for any one or more persons out of a class composed of (i) the descendants of Granddaughter and (ii) the descendants of Settlor (other than (A) a child of Settlor and (B) a grandchild of Settlor if such grandchild does not have at

> least one then living descendant). The references to the "descendants of Settlor" and a "grandchild of Settlor" are properly viewed as not including Granddaughter's estate or the creditors of Granddaughter's estate. Consistent with this analysis, the Date 5 Order construed the terms of New Trust to provide that Son granted Granddaughter a power to appoint the remainder of New Trust on her death only to Settlor's then-living descendants, or trusts for their benefit, other than to a child of Settlor and a grandchild of Settlor if such grandchild does not have at least one then living descendant.
>
> Granddaughter's power to appoint is not exercisable in favor of Granddaughter, Granddaughter's creditors, Granddaughter's estate, or the creditors of Granddaughter's estate, and accordingly, is not a general power of appointment. Based on an analysis of facts submitted and the representations made, we conclude that the Date 5 State Court Order is consistent with applicable State law as it would be applied by the highest court of State.
>
> Accordingly, based on the facts submitted and the representations made, we conclude that: (1) Granddaughter does not possess a general power of appointment under § 2041 over New Trust, which therefore remains GST tax exempt pursuant to its grandfathered status; (2) no part of New Trust will be included in Granddaughter's gross estate for federal estate tax purposes under § 2041; and (3) Granddaughter does not have a general power of appointment over New Trust, and therefore Granddaughter has neither released a general power of appointment over New Trust for federal gift tax purposes under § 2514, nor made a constructive addition to New Trust under § 26.2601-1(b)(1)(v)(A).

Letter Ruling 202239003[6399] involved a GST-grandfathered trust that modified a trust for a disabled grandchild:

> Article 3.B.1. provides, in relevant part, that with respect to each share, until termination of the trust, the trustees may from time to time or at any time pay to the grandchild such amounts, if any, from the net income and/or principal of said share as they may determine, adding to principal from time to time any income not so expended. In addition, if and when the grandchild has attained the age of 25, the trustees are to distribute to him or her such amount of the principal of said share as he or she may from time to time or at any time demand in writing, provided that the total subject to withdrawal does not exceed one-half of the value of said share when the grandchild attains the age of 25.
>
> Article 3.B.2. provides, in relevant part, that the trust of said share is to terminate when the grandchild attains the age of 35 or sooner dies. Upon such termination, the trust property of said share, if any remains, is to be paid over to the grandchild, if then living. If the grandchild is not living, the trust property of said share is to be paid over according to the grandchild's power to appoint by will executed after he or she attained the age of 18, to one or more of the grandchild's spouse, Grandmother's issue other than the grandchild, or spouses of such issue. In default of appointment, the remaining property of said share is to be paid to the issue of grandchild, per stirpes; or, if grandchild has no issue then living, to the then living issue of grandchild's parent, who is Grandmother's child, per stirpes; or, if there is no such issue then living, to said parent; otherwise per

[6399] Letter Ruling 202239004 has pretty much the same facts and ruling.

stirpes to Grandmother's then living issue; or, if there is no issue of Grandmother then living, to Charity.

Beneficiary is a grandchild of Grandmother. Beneficiary was born with cognitive deficits and other disabilities. On Date 2, Beneficiary's parents were appointed as her permanent conservators.

State Statute provides that the court may modify the administrative or dispositive terms of a trust or terminate the trust if, because of circumstances not anticipated by the settlor, modification or termination will further the purposes of the trust. To the extent practicable, the modification shall be made in accordance with the settlor's probable intent. The court may modify the administrative terms of a trust if continuation of the trust on its existing terms would be impracticable or wasteful or impair the trust's administration.

On Date 3, the trustees of Trust petitioned Trial Court to modify the terms of Trust as they apply to the shares created for the benefit of Beneficiary. As modified, Article 3.B.1. of Trust will provide that with respect to each share, until termination of the trust, the trustees may from time to time or at any time pay to Beneficiary such amounts, if any, from the net income and/or principal of said share as they may determine, adding to principal from time to time any income not so expended. Further, as modified, Article 3.B.2. of Trust will provide that the trust of said share is to terminate upon the death of Beneficiary. If Beneficiary is less than 25 years of age at the time of her death, the remaining trust property of said share is to be paid over to her issue, per stirpes; or, if she has no issue then living, to the then living issue of her parent, who is Grandmother's child, per stirpes; or, if there is no such issue then living, to said parent; otherwise per stirpes to Grandmother's then living issue; or, if there is no issue of Grandmother then living, to Charity. If Beneficiary is at least 25 years of age but less than 35 years of age at the time of her death, one-half of the remaining property of said share is to be paid over to the personal representatives of her estate to be disposed of as part of her estate. The balance of the property is to be paid over to her issue, per stirpes; or, if she has no issue then living, to the then living issue of her parent, who is Grandmother's child, per stirpes; or, if there is no such issue then living, to said parent; otherwise per stirpes to Grandmother's then living issue; or, if there is no issue of Grandmother then living, to Charity. If Beneficiary is at least 35 years of age at the time of her death, the remaining property of said share is to be paid over to the personal representatives of her estate to be disposed of as part of her estate.

It is represented that Beneficiary's legal incompetency is a circumstance that was not anticipated by Grandmother and that the modification to keep Beneficiary's inheritance in trust for her lifetime furthers the essential purpose of Trust to provide financially for Grandmother's grandchildren. On Date 4, Trial Court ordered that Trust be modified, contingent upon a favorable ruling from the Internal Revenue Service.

Letter Ruling 202239003 cited Reg. § 26.2601-1(b)(4)(i)(D)(1) and reasoned and held:

In the present case, the proposed modification of Trust, under State Statute, provides that Beneficiary's interest in Trust will continue to be held in trust for the exclusive benefit of Beneficiary during her lifetime. If Beneficiary dies before the age of 25, the property in Trust will pass under the terms of the modified trust in the same manner as it would have passed in default of the power of appointment under the terms of the original trust. If

> Beneficiary dies after the age of 25 and before the age of 35, one-half of the then remaining property of Trust is includible in Beneficiary's gross estate for federal estate tax purposes and the other one-half portion will pass as it would have passed under the terms of the original trust. If Beneficiary dies after the age of 35, upon Beneficiary's death, Trust will terminate and all of the trust property will be includible in Beneficiary's gross estate for federal estate tax purposes.
>
> Furthermore, the proposed modification of Trust will not result in a shift of any beneficial interest in the trust to any beneficiary who occupies a generation lower than the persons holding the beneficial interests. In addition, the proposed modification of Trust will not extend the time for vesting of any beneficial interest in the modified trust beyond the period provided for in the original trust. Accordingly, based on the facts presented and the representations made, we find that after the proposed modification of Trust, Trust will remain exempt from the application of the GST tax and that no distribution from or termination of any interest in Trust will be subject to the GST tax.

Consistent with other rulings,[6400] the IRS viewed including assets in the beneficiary's estate (in this case the estate actually receiving the assets) as an acceptable substitute for the eliminated inter vivos general power of appointment (right to withdraw assets). Along that line, after discussing decanting Letter Ruling ruled:

> In the instant case, Trust A does not expressly authorize the trustee to distribute principal from Trust A to Trust B. While State 2 Statute authorizes the trustee to make such a distribution, to satisfy the requirement in § 26.2601-1(b)(4)(i)(A), the state law must be in effect at the time the exempt trust became irrevocable. In this case, State 2 Statute was enacted and become applicable to Trust A subsequent to the execution of Trust A. Accordingly, the effect of the proposed distribution of Trust A principal to Trust B on the exempt status of the trusts will be evaluated under the rules in § 26.2601-1(b)(4)(i)(D).
>
> Article 3.1 of Trust B sets forth income and principal distribution terms and conditions identical to those in Section 2 of Trust A. Article 3.4 of Trust B provides for termination of Trust B at the same time Trust A would have terminated under Section 3, taking into account that Grantor and Grantor's Spouse are now deceased and the youngest issue of Grantor living on Date 1 has already attained the age of x. Article 3.5 of Trust B identifies the same class of remainder beneficiaries as in Section 3 of Trust A. Trust B differs from Trust A, however, by providing in Article 4 for the creation of separate trusts for each Article 3.5 beneficiary after the termination of Trust B.
>
> Under Article 4.1 and 4.2 of Trust B, the beneficiary of each Article 4 Trust is the sole lifetime beneficiary of the trust and is granted a testamentary general power of appointment over the principal of such trust. The grant of a testamentary general power of appointment to the sole lifetime beneficiary of a trust is viewed as functionally equivalent to granting outright ownership. *See* Restatement (Second) of Property § 19.4 (1986). For transfer tax purposes, the grant of the power will cause the value of each beneficiary's Article 4 Trust to be includible in the gross estate of the beneficiary at his or her death under § 2041(a)(2) and the beneficiary to be treated as the transferor of the Article 4 Trust for GST tax purposes under § 2652(a)(1). Therefore, with respect to these provisions of Trust B, the distribution of principal from Trust A to Trust B will not cause a

[6400] See Letter Rulings 202011001, 201947001, and 201938004.

shift of a beneficial interest to a lower generation beneficiary nor extend the time for vesting of any beneficial interest beyond the period provided for in the original trust.

Not satisfying the safe harbors means only that one must test for actual or constructive additions. When a court or trustee takes action (or a trustee fails to act), that action might affect beneficial interests. One may be concerned that failure to act vigorously in court or to make a claim against the trustee may constitute an actual or constructive addition. The beneficiaries who failed to act may need to allocate GST exemption to provide a zero inclusion ratio to the extent that they are transferors. These issues become much more complex when a beneficiary has a retained interest in the trust, because the ETIP rule may prevent allocating GST exemption in a manner that sets the inclusion ratio until the beneficiary's interest terminates. Thus, satisfying the safe harbors avoids addressing these issues to the extent that one is concerned about GST issues; however, the safe harbors do not address gift or estate tax issues that might apply to such a failure to act. Regarding the latter, see part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts.

What about changes to trusts that are not grandfathered and have a zero inclusion ratio? Absent a transfer subject to gift tax or estate tax, distributions or other actions would not trigger a change in the inclusion ratio. But what if distributions or other actions constitute a gift? Examples of such gifts are in part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts. Generally, anything that would not cause a trust to lose grandfathering also would not change the trust's inclusion ratio. A typical statement to that effect is in Letter Ruling 201134017:[6401]

> No guidance has been issued concerning changes that may affect the status of trusts that are exempt from GST tax because sufficient GST exemption was allocated to the trust to result in an inclusion ratio of zero. At a minimum, a change that would not affect the GST status of a grandfathered trust should similarly not affect the exempt status of such a trust.

III.B.1.d.ii. Estate Tax Inclusion Period (ETIP)

Code § 2642(f), "Special rules for certain inter vivos transfers," provides that, except as provided in regulations:

> (1) *In general*. For purposes of determining the inclusion ratio, if -
>
> (A) an individual makes an inter vivos transfer of property, and
>
> (B) the value of such property would be includible in the gross estate of such individual under chapter 11 if such individual died immediately after making such transfer (other than by reason of section 2035),
>
> any allocation of GST exemption to such property shall not be made before the close of the estate tax inclusion period (and the value of such property shall be determined under paragraph (2)). If such transfer is a direct skip, such skip shall be treated as occurring as of the close of the estate tax inclusion period.

[6401] Letter Ruling 200839025 had a similar statement.

(2) *Valuation*. In the case of any property to which paragraph (1) applies, the value of such property shall be -

(A) if such property is includible in the gross estate of the transferor (other than by reason of section 2035), its value for purposes of chapter 11, or

(B) if subparagraph (A) does not apply, its value as of the close of the estate tax inclusion period (or, if any allocation of GST exemption to such property is not made on a timely filed gift tax return for the calendar year in which such period ends, its value as of the time such allocation is filed with the Secretary).

(3) *Estate tax inclusion period*. For purposes of this subsection, the term "estate tax inclusion period" means any period after the transfer described in paragraph (1) during which the value of the property involved in such transfer would be includible in the gross estate of the transferor under chapter 11 if he died. Such period shall in no event extend beyond the earlier of -

(A) the date on which there is a generation-skipping transfer with respect to such property, or

(B) the date of the death of the transferor.

(4) *Treatment of spouse*. Except as provided in regulations, any reference in this subsection to an individual or transferor shall be treated as including a reference to the spouse of such individual or transferor.

(5) *Coordination with subsection (d)*. Under regulations, appropriate adjustments shall be made in the application of subsection (d) to take into account the provisions of this subsection.

When Code § 2642(f)(1) says, "any allocation of GST exemption to such property shall not be made before the close of the estate tax inclusion period," it seems to void any attempted allocation. However, regulations do not prevent an allocation but rather postpone computation of the inclusion ratio, as demonstrated by Reg. § 26.2632-1(c)(1)(ii), "Other allocations":

> An affirmative allocation of GST exemption cannot be revoked, but becomes effective as of (and no earlier than) the date of the close of the ETIP with respect to the trust. If an allocation has not been made prior to the close of the ETIP, an allocation of exemption is effective as of the close of the ETIP during the transferor's lifetime if made by the due date for filing the Form 709 for the calendar year in which the close of the ETIP occurs (timely ETIP return). An allocation of exemption is effective in the case of the close of the ETIP by reason of the death of the transferor as provided in paragraph (d) of this section.

The first two examples in Reg. § 26.2632-1(c)(5) confirm this concept of immediate allocation, followed by later determination of inclusion ratio:

> The following examples illustrate the rules of this section as they apply to the termination of an ETIP during the lifetime of the transferor. In each example assume that T transfers $100,000 to an irrevocable trust:

Example (1). *Allocation of GST exemption during ETIP*. The trust instrument provides that trust income is to be paid to T for 9 years or until T's prior death. The trust principal is to be paid to T's grandchild on the termination of T's income interest. If T dies within the 9-year period, the value of the trust principal is includible in T's gross estate under section 2036(a). Thus, the trust is subject to an ETIP. T files a timely Form 709 reporting the transfer and allocating $100,000 of GST exemption to the trust. The allocation of GST exemption to the trust is not effective until the termination of the ETIP.

Example (2). *Effect of prior allocation on termination of ETIP*. The facts are the same as in Example 1, except the trustee has the power to invade trust principal on behalf of T's grandchild, GC, during the term of T's income interest. In year 4, when the value of the trust is $200,000, the trustee distributes $15,000 to GC. The distribution is a taxable distribution. The ETIP with respect to the property distributed to GC terminates at the time of the taxable distribution. See paragraph (c)(3)(iii) of this section. Solely for purposes of determining the trust's inclusion ratio with respect to the taxable distribution, the prior $100,000 allocation of GST exemption (as well as any additional allocation made on a timely ETIP return) is effective immediately prior to the taxable distribution. See § 26.2642-1(b)(2). The trust's inclusion ratio with respect to the taxable distribution is therefore .50 (1−(100,000/200,000)).

Generally, I would recommend waiting until the ETIP terminates, but if GST exemption is going to decrease and would otherwise be wasted then consider allocating it to the ETIP trust.

A GRAT's Code § 2036 exposure may closes when the final annuity payment is payable, rather when it is actually paid. That is because an overdue annuity payment is includible under Code § 2033 (an asset actually owned by an estate) rather than Code § 2036 (a retained right to income or another stream of payments). In support of the former, Reg. § 20.2036-1(c)(1)(i) provides:

> Payments that become payable to the decedent prior to the decedent's date of death, but are not paid until after the decedent's date of death, are includible in the decedent's gross estate under section 2033.

In support of the latter, Reg. § 20.2036-1(c)(2)(i) contains (emphasis added):

> If a decedent transferred property into such a trust and retained or reserved the right to use such property, or the right to an annuity, unitrust, or other interest in such trust with respect to the property decedent so transferred for decedent's life, any period not ascertainable without reference to the decedent's death, or **for a period that does not in fact end before the decedent's death**, then the decedent's right to use the property or the retained annuity, unitrust, or other interest (whether payable from income and/or principal) constitutes the retention of the possession or enjoyment of, or the right to the income from, the property for purposes of section 2036.

The idea is that amounts payable during life are generated by the trust's property and constitute an interest in the trust, but an overdue payment is not so much a reflection of the trust's property's earning capacity. The preamble to T.D. 9555 (11/8/2011) says the following about a grantor retained trust ("GRT"):

One commentator requested that the regulations clarify the interaction of sections 2033 and 2036 in a situation where the decedent establishes a GRT under the terms of which the retained interest is paid to the decedent for a specified term of years and, if the decedent dies prior to the expiration of that term, the retained annuity or other payment is to be paid to the decedent's estate for the balance of the term. See for example § 25.2702-3(e), Example 5.

The commentator noted that, because all or a portion of the trust corpus is includible in the decedent's gross estate under section 2036, the annuity or other payments that become payable after the decedent's death and are required to be paid to the estate for the remainder of the trust term are reflected in the amount includible under section 2036, and therefore should not also be includible under section 2033.

The IRS and the Treasury Department agree. To the extent that all or a portion of the trust corpus is includible in the gross estate under section 2036 as a result of the decedent's retained annuity or other interest, double inclusion of the same asset would result if any payment that becomes payable after the decedent's date of death to the estate also is included in the decedent's gross estate under section 2033 as a separate item. Accordingly, § 20.2036-1(c)(1)(i) of the regulations has been revised to provide specifically that payments that become payable to the decedent's estate after the decedent's death (as opposed to payments that are payable to the decedent prior to the decedent's death but are not paid until after the decedent's death) are not subject to inclusion under section 2033, if section 2036 is applied to include all or a portion of the trust corpus in the gross estate. This rule is also reflected in § 20.2036-1(c)(2)(iv), Example 2 paragraph (ii) and Example 7.

The payments described in the preceding paragraph are to be distinguished, however, from annuity or other payments payable to the decedent prior to the decedent's date of death, but that are not paid until after death. Such payments are includible in the decedent's gross estate under section 2033 as a separate receivable. Thus, such an amount payable by the trust reduces the fair market value of the trust as of the date of death, but is included in the decedent's gross estate under section 2033 as a receivable amount.

Reg. § 26.2632-1(c)(3), "Termination of an ETIP," provides:

An ETIP terminates on the first to occur of -

(i) The death of the transferor;

(ii) The time at which no portion of the property is includible in the transferor's gross estate (other than by reason of section 2035) or, in the case of an individual who is a transferor solely by reason of an election under section 2513, the time at which no portion would be includible in the gross estate of the individual's spouse (other than by reason of section 2035);

(iii) The time of a GST, but only with respect to the property involved in the GST; or

(iv) In the case of an ETIP arising by reason of an interest or power held by the transferor's spouse under subsection (c)(2)(i)(B) of this section, at the first to occur of -

(A) The death of the spouse; or

(B) The time at which no portion of the property would be includible in the spouse's gross estate (other than by reason of section 2035).

When Code § 2036 inclusion ends when the annuity was payable, the unpaid annuity becomes a Code § 2033 asset, so under Reg. §§ 26.2632-1(c)(3)(ii) and 26.2632-1(c)(1)(iii) the ETIP does not close until the annuity is actually paid.

Whenever the ETIP closes, a potential indirect skip occurs. Reg. § 26.2632-1(c)(5), Example (5) provides (emphasis added):

> Election out of automatic allocation of GST exemption for trust subject to an ETIP. On December 1, 2003, T transfers $100,000 to Trust A, an irrevocable GST trust described in section 2632(c)(3) that is subject to an estate tax inclusion period (ETIP). T made no other gifts in 2003. The ETIP terminates on December 31, 2008. T timely files a gift tax return (Form 709) reporting the gift on April 15, 2004. On May 15, 2006, T files a Form 709 on which T properly elects out of the automatic allocation rules contained in section 2632(c)(1) with respect to the December 1, 2003, transfer to Trust A in accordance with paragraph (b)(2)(iii) of this section. Because the indirect skip is not deemed to occur until December 31, 2008, T's election out of automatic GST allocation filed on May 15, 2006, is timely, and will be effective as of December 31, 2008 (unless revoked on a Form 709 filed on or before the due date of a Form 709 for calendar year 2008).

This seems to indicate that the indirect skip occurs the moment the ETIP closes and that, absent an election not to allocate GST exemption, GST exemption would be allocated.

One might considering delaying termination of a trust subject to an ETIP so that it may divide in a manner consistent with Reg. § 26.2642-6(j), Example (8), which is reproduced in the text accompanying fn 6406 in part III.B.1.d.iv Qualified Severances. A practical use is described in the text accompanying fn 6518 in part III.B.2.c.v GRIT's Estate Tax Consequences.

III.B.1.d.iii. Who Is the Transferor

Reg. § 26.2654-1(a)(2), "Multiple transferors with respect to single trust," provides:

> (i) *In general*. If there is more than one transferor with respect to a trust, the portions of the trust attributable to the different transferors are treated as separate trusts for purposes of chapter 13. Treatment of a single trust as separate trusts under this paragraph (a)(2) does not permit treatment of those portions as separate trusts for purposes of filing returns and payment of tax or for purposes of computing any other tax imposed under the Internal Revenue Code. Also, additions to, and distributions from, such trusts are allocated pro rata among the separate trusts unless otherwise expressly provided in the governing instrument.
>
> (ii) *Addition by a transferor*. If an individual makes an addition to a trust of which the individual is not the sole transferor, the portion of the single trust attributable to each separate trust is determined by multiplying the fair market value of the single trust immediately after the contribution by a fraction. The numerator of the fraction is the value of the separate trust immediately after the contribution. The denominator of the fraction is the fair market value of all the property in the single trust immediately after the transfer.

Although referring to "transferor" before defining that term may seem premature, I want you to realize that what for a variety of purposes may constitute one trust may be treated for GST purposes as multiple trusts. When one determines "transferor" below, one may be determining who is the transferor for only a portion of what you might otherwise view as a single trust.

Before defining "transferor," consider that who is a skip person depends on who is the transferor. Also, each transferor may have different capacity to allocate GST exemption. Controlling which distributions are allocated to coming from a transferor's separate trust tends to be better than the pro rata rule described above.[6402] Consider dividing a trust into one or more separate trusts for each transferor. Reg. § 26.2654-1(a)(3) authorizes such a division "at any time."[6403]

Reg. § 26.2652-1(a), "Transferor defined," provides:

> (1) *In general*. Except as otherwise provided in paragraph (a)(3) of this section, the individual with respect to whom property was most recently subject to Federal estate or gift tax is the transferor of that property for purposes of chapter 13. An individual is treated as transferring any property with respect to which the individual is the transferor. Thus, an individual may be a transferor even though there is no transfer of property under local law at the time the Federal estate or gift tax applies. For purposes of this paragraph, a surviving spouse is the transferor of a qualified domestic trust created by the deceased spouse that is included in the surviving spouse's gross estate, provided the trust is not subject to the election described in § 26.2652-2 (reverse QTIP election). A surviving spouse is also the transferor of a qualified domestic trust created by the surviving spouse pursuant to section 2056(d)(2)(B). For generation-skipping transfer tax rules related to an ABLE account established under section 529A, see § 1.529A-4.
>
> (2) *Transfers subject to federal estate or gift tax*. For purposes of this chapter, a transfer is subject to Federal gift tax if a gift tax is imposed under section 2501(a) (without regard to exemptions, exclusions, deductions, and credits). A transfer is subject to Federal estate tax if the value of the property is includible in the decedent's gross estate as determined under section 2031 or section 2103.

Reg. § 26.2652-1(a)(5) illustrates the above principles:

> *Example (1)*. *Identity of transferor*. T transfers $100,000 to a trust for the sole benefit of T's grandchild. The transfer is subject to Federal gift tax because a gift tax is imposed under section 2501(a) (without regard to exemptions, exclusions, deductions, and credits). Thus, for purposes of chapter 13, T is the transferor of the $100,000. It is immaterial that a portion of the transfer is excluded from the total amount of T's taxable gift by reason of section 2503(b).
>
> *Example (2)*. *Gift splitting and identity of transferor*. The facts are the same as in Example 1, except T's spouse, S, consents under section 2513 to split the gift with T.

[6402] Because the trusts have different grantors (see part III.B.2.h.i Who Is the Grantor), such a division would not be subject to part II.J.9.c.i Multiple Trusts Created for Tax Avoidance.
[6403] Reg. § 26.2654-1(a)(3) is reproduced in fn 705 in part II.D.5 Severing Trusts with Multiple Grantors.

For purposes of chapter 13, S and T are each treated as a transferor of $50,000 to the trust.

Example (3). *Change of transferor on subsequent transfer tax event*. T transfers $100,000 to a trust providing that all the net trust income is to be paid to T's spouse, S, for S's lifetime. T elects under section 2523(f) to treat the transfer as a transfer of qualified terminable interest property, and T does not make the reverse QTIP election under section 2652(a)(3). On S's death, the trust property is included in S's gross estate under section 2044. Thus, S becomes the transferor at the time of S's death.

Example (4). *Effect of transfer of an interest in trust on identity of the transferor*. T transfers $100,000 to a trust providing that all of the net income is to be paid to T's child, C, for C's lifetime. At C's death, the trust property is to be paid to T's grandchild. C transfers the income interest to X, an unrelated party, in a transfer that is a completed transfer for Federal gift tax purposes. Because C's transfer is a transfer of a term interest in the trust that does not affect the rights of other parties with respect to the trust property, T remains the transferor with respect to the trust.

Example (5). *Effect of lapse of withdrawal right on identity of transferor*. T transfers $10,000 to a new trust providing that the trust income is to be paid to T's child, C, for C's life and, on the death of C, the trust principal is to be paid to T's grandchild, GC. The trustee has discretion to distribute principal for GC's benefit during C's lifetime. C has a right to withdraw $10,000 from the trust for a 60-day period following the transfer. Thereafter, the power lapses. C does not exercise the withdrawal right. The transfer by T is subject to Federal gift tax because a gift tax is imposed under section 2501(a) (without regard to exemptions, exclusions, deductions, and credits) and, thus, T is treated as having transferred the entire $10,000 to the trust. On the lapse of the withdrawal right, C becomes a transferor to the extent C is treated as having made a completed transfer for purposes of chapter 12. Therefore, except to the extent that the amount with respect to which the power of withdrawal lapses exceeds the greater of $5,000 or 5% of the value of the trust property, T remains the transferor of the trust property for purposes of chapter 13.

Note in Example (4) that C made a taxable gift, but T remained the transferor because the relationship of the beneficial interests to each other did not change.

Note in Example (5) that a lapse of a general power of appointment changes the transferor to the extent that the lapse constitutes a taxable transfer.

If and to the extent that the transfer is a gift, person exercising the power of appointment becomes the transferor with respect to the gifted portion and may allocate GST exemption to that portion.[6404]

[6404] Letter Ruling 200243026, described in the text accompanying fn 6356 in part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts. The follow Letter Rulings are said to support the idea that, when a beneficiary who makes a taxable release of his/her interest in a trust, the beneficiary should be treated as withdrawing the actuarial value of his/her interest (whatever it may be) and recontributing that amount to the trust, thereby creating two transferors of the trust for GST tax purposes, namely, the original transferor and the beneficiary: 9707026, 9714030, 200001012, 200210018, 200745015, 200901013, 201342001, 9811044, 200745015, and 9811044.

Reg. § 26.2652-1(a)(3), "Special rule for certain QTIP trusts," provides:[6405]

> Solely for purposes of chapter 13, if a transferor of qualified terminable interest property (QTIP) elects under §26.2652-2(a) to treat the property as if the QTIP election had not been made (reverse QTIP election), the identity of the transferor of the property is determined without regard to the application of sections 2044, 2207A, and 2519.

Reg. § 26.2652-1(a)(5) illustrates the above principles:

> *Example (6)*. *Effect of reverse QTIP election on identity of the transferor*. T establishes a testamentary trust having a principal of $500,000. Under the terms of the trust, all trust income is payable to T's surviving spouse, S, during S's lifetime. T's executor makes an election to treat the trust property as qualified terminable interest property and also makes the reverse QTIP election. For purposes of chapter 13, T is the transferor with respect to the trust. On S's death, the then full fair market value of the trust is includible in S's gross estate under section 2044. However, because of the reverse QTIP election, S does not become the transferor with respect to the trust; T continues to be the transferor.
>
> *Example (7)*. *Effect of reverse QTIP election on constructive additions*. The facts are the same as in Example 6, except the inclusion of the QTIP trust in S's gross estate increased the Federal estate tax liability of S's estate by $200,000. The estate does not exercise the right of recovery from the trust granted under section 2207A. Under local law, the beneficiaries of S's residuary estate (which bears all estate taxes under the will) could compel the executor to exercise the right of recovery but do not do so. Solely for purposes of chapter 13, the beneficiaries of the residuary estate are not treated as having made an addition to the trust by reason of their failure to exercise their right of recovery. Because of the reverse QTIP election, for GST purposes, the trust property is not treated as includible in S's gross estate and, under those circumstances, no right of recovery exists.
>
> *Example (8)*. *Effect of reverse QTIP election on constructive additions*. S, the surviving spouse of T, dies testate. At the time of S's death, S was the beneficiary of a trust with respect to which T's executor made a QTIP election under section 2056(b)(7). Thus, the trust is includible in S's gross estate under section 2044. T's executor also made the reverse QTIP election with respect to the trust. S's will provides that all death taxes payable with respect to the trust are payable from S's residuary estate. Since the transferor of the property is determined without regard to section 2044 and section 2207A, S is not treated as making a constructive addition to the trust by reason of the tax apportionment clause in S's will.

Reg. § 26.2652-1(a)(4), "Split-gift transfers," provides:

> In the case of a transfer with respect to which the donor's spouse makes an election under section 2513 to treat the gift as made one-half by the spouse, the electing spouse is treated as the transferor of one-half of the entire value of the property transferred by

[6405] For Code § 2519, see part II.H.2.c QTIP Trusts - Code § 2519 Trap. Reg. § 26.2652-1(a)(1) includes, "For purposes of this paragraph, a surviving spouse is the transferor of a qualified domestic trust created by the deceased spouse that is included in the surviving spouse's gross estate, provided the trust is not subject to the election described in § 26.2652-2 (reverse QTIP election)."

> the donor, regardless of the interest the electing spouse is actually deemed to have transferred under section 2513. The donor is treated as the transferor of one-half of the value of the entire property. See § 26.2632-1(c)(5) Example 3, regarding allocation of GST exemption with respect to split-gift transfers subject to an ETIP.

As to the latter, see part III.B.1.d.ii Estate Tax Inclusion Period (ETIP).

Reg. § 26.2652-1(a)(5), Example (9), "Split-gift transfers," explains:

> T transfers $100,000 to an inter vivos trust that provides T with an annuity payable for ten years or until T's prior death. The annuity satisfies the definition of a qualified interest under section 2702(b). When the trust terminates, the corpus is to be paid to T's grandchild, GC. T's spouse, S, consents under section 2513 to have the gift treated as made one-half by S. Under section 2513, only the actuarial value of the gift to GC is eligible to be treated as made one-half by S. However, because S is treated as the donor of one-half of the gift to GC, S becomes the transferor of one-half of the entire trust ($50,000) for purposes of Chapter 13.

III.B.1.d.iv. Qualified Severances

Code § 2642(a)(3), "Severing of trusts," provides:

(A) *In general*. If a trust is severed in a qualified severance, the trusts resulting from such severance shall be treated as separate trusts thereafter for purposes of this chapter.

(B) *Qualified severance*. For purposes of subparagraph (A) -

(i) *In general*. The term "qualified severance" means the division of a single trust and the creation (by any means available under the governing instrument or under local law) of two or more trusts if -

(I) the single trust was divided on a fractional basis, and

(II) the terms of the new trusts, in the aggregate, provide for the same succession of interests of beneficiaries as are provided in the original trust.

(ii) *Trusts with inclusion ratio greater than zero*. If a trust has an inclusion ratio of greater than zero and less than 1, a severance is a qualified severance only if the single trust is divided into two trusts, one of which receives a fractional share of the total value of all trust assets equal to the applicable fraction of the single trust immediately before the severance. In such case, the trust receiving such fractional share shall have an inclusion ratio of zero and the other trust shall have an inclusion ratio of 1.

(iii) *Regulations*. The term "qualified severance" includes any other severance permitted under regulations prescribed by the Secretary.

(C) *Timing and manner of severances*. A severance pursuant to this paragraph may be made at any time. The Secretary shall prescribe by forms or regulations the manner in which the qualified severance shall be reported to the Secretary.

Reg. § 26.2642-6, "Qualified severance," begins with subsection (a), "In general":

> If a trust is divided in a qualified severance into two or more trusts, the separate trusts resulting from the severance will be treated as separate trusts for generation-skipping transfer (GST) tax purposes and the inclusion ratio of each new resulting trust may differ from the inclusion ratio of the original trust. Because the post-severance resulting trusts are treated as separate trusts for GST tax purposes, certain actions with respect to one resulting trust will generally have no GST tax impact with respect to the other resulting trust(s). For example, GST exemption allocated to one resulting trust will not impact on the inclusion ratio of the other resulting trust(s); a GST tax election made with respect to one resulting trust will not apply to the other resulting trust(s); the occurrence of a taxable distribution or termination with regard to a particular resulting trust will not have any GST tax impact on any other trust resulting from that severance. In general, the rules in this section are applicable only for purposes of the GST tax and are not applicable in determining, for example, whether the resulting trusts may file separate income tax returns or whether the severance may result in a gift subject to gift tax, may cause any trust to be included in the gross estate of a beneficiary, or may result in a realization of gain for purposes of section 1001. See § 1.1001-1(h) of this chapter for rules relating to whether a qualified severance will constitute an exchange of property for other property differing materially either in kind or in extent.

As to Reg. § 1.1001-1(h), see part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting.

Reg. § 26.2642-6(b), "Qualified severance defined," provides:

> A qualified severance is a division of a trust (other than a division described in § 26.2654-1(b)) into two or more separate trusts that meets each of the requirements in paragraph (d) of this section.

Reg. § 26.2642-6(c), "Effective date of qualified severance," provides:

> A qualified severance is applicable as of the date of the severance, as defined in § 26.2642-6(d)(3), and the resulting trusts are treated as separate trusts for GST tax purposes as of that date.

Reg. § 26.2642-6(d), "Requirements for a qualified severance," provides, "For purposes of this section, a qualified severance must satisfy each of the following requirements:"

> (1) The single trust is severed pursuant to the terms of the governing instrument, or pursuant to applicable local law.
>
> (2) The severance is effective under local law.
>
> (3) The date of severance is either the date selected by the trustee as of which the trust assets are to be valued in order to determine the funding of the resulting trusts, or the court-imposed date of funding in the case of an order of the local court with jurisdiction over the trust ordering the trustee to fund the resulting trusts on or as of a specific date. For a date to satisfy the definition in the preceding sentence, however, the funding must be commenced immediately upon, and funding must occur within a

reasonable time (but in no event more than 90 days) after, the selected valuation date.

(4) The single trust (original trust) is severed on a fractional basis, such that each new trust (resulting trust) is funded with a fraction or percentage of the original trust, and the sum of those fractions or percentages is one or one hundred percent, respectively. For this purpose, the fraction or percentage may be determined by means of a formula (for example, that fraction of the trust the numerator of which is equal to the transferor's unused GST tax exemption, and the denominator of which is the fair market value of the original trust's assets on the date of severance). The severance of a trust based on a pecuniary amount does not satisfy this requirement. For example, the severance of a trust is not a qualified severance if the trust is divided into two trusts, with one trust to be funded with $1,500,000 and the other trust to be funded with the balance of the original trust's assets. With respect to the particular assets to be distributed to each separate trust resulting from the severance, each such trust may be funded with the appropriate fraction or percentage (pro rata portion) of each asset held by the original trust. Alternatively, the assets may be divided among the resulting trusts on a non-pro rata basis, based on the fair market value of the assets on the date of severance. However, if a resulting trust is funded on a non-pro rata basis, each asset received by a resulting trust must be valued, solely for funding purposes, by multiplying the fair market value of the asset held in the original trust as of the date of severance by the fraction or percentage of that asset received by that resulting trust. Thus, the assets must be valued without taking into account any discount or premium arising from the severance, for example, any valuation discounts that might arise because the resulting trust receives less than the entire interest held by the original trust. See paragraph (j), Example 6 of this section.

(5) The terms of the resulting trusts must provide, in the aggregate, for the same succession of interests of beneficiaries as are provided in the original trust. This requirement is satisfied if the beneficiaries of the separate resulting trusts and the interests of the beneficiaries with respect to the separate trusts, when the separate trusts are viewed collectively, are the same as the beneficiaries and their respective beneficial interests with respect to the original trust before severance. With respect to trusts from which discretionary distributions may be made to any one or more beneficiaries on a non-pro rata basis, this requirement is satisfied if -

(i) The terms of each of the resulting trusts are the same as the terms of the original trust (even though each permissible distributee of the original trust is not a beneficiary of all of the resulting trusts);

(ii) Each beneficiary's interest in the resulting trusts (collectively) equals the beneficiary's interest in the original trust, determined by the terms of the trust instrument or, if none, on a per-capita basis. For example, in the case of the severance of a discretionary trust established for the benefit of A, B, and C and their descendants with the remainder to be divided equally among those three families, this requirement is satisfied if the trust is divided into three separate trusts of equal value with one trust established for the benefit of A and A's descendants, one trust for the benefit of B and B's descendants, and one trust for the benefit of C and C's descendants;

(iii) The severance does not shift a beneficial interest in the trust to any beneficiary in a lower generation (as determined under section 2651) than the person or persons who held the beneficial interest in the original trust; and

(iv) The severance does not extend the time for the vesting of any beneficial interest in the trust beyond the period provided for in (or applicable to) the original trust.

(6) In the case of a qualified severance of a trust with an inclusion ratio as defined in § 26.2642-1 of either one or zero, each trust resulting from the severance will have an inclusion ratio equal to the inclusion ratio of the original trust.

(7)

(i) In the case of a qualified severance occurring after GST tax exemption has been allocated to the trust (whether by an affirmative allocation, a deemed allocation, or an automatic allocation pursuant to the rules contained in section 2632), if the trust has an inclusion ratio as defined in § 26.2642-1 that is greater than zero and less than one, then either paragraph (d)(7)(ii) or (iii) of this section must be satisfied.

(ii) The trust is severed initially into only two resulting trusts. One resulting trust must receive that fractional share of the total value of the original trust as of the date of severance that is equal to the applicable fraction, as defined in § 26.2642-1(b) and (c), used to determine the inclusion ratio of the original trust immediately before the severance. The other resulting trust must receive that fractional share of the total value of the original trust as of the date of severance that is equal to the excess of one over the fractional share described in the preceding sentence. The trust receiving the fractional share equal to the applicable fraction shall have an inclusion ratio of zero, and the other trust shall have an inclusion ratio of one. If the applicable fraction with respect to the original trust is .50, then, with respect to the two equal trusts resulting from the severance, the trustee may designate which of the resulting trusts will have an inclusion ratio of zero and which will have an inclusion ratio of one. Each separate trust resulting from the severance then may be further divided in accordance with the rules of this section. See paragraph (j), Example 7, of this section.

(iii) The trust is severed initially into more than two resulting trusts. One or more of the resulting trusts in the aggregate must receive that fractional share of the total value of the original trust as of the date of severance that is equal to the applicable fraction used to determine the inclusion ratio of the original trust immediately before the severance. The trust or trusts receiving such fractional share shall have an inclusion ratio of zero, and each of the other resulting trust or trusts shall have an inclusion ratio of one. (If, however, two or more of the resulting trusts each receives the fractional share of the total value of the original trust equal to the applicable fraction, the trustee may designate which of those resulting trusts will have an inclusion ratio of zero and which will have an inclusion ratio of one.) The resulting trust or trusts with an inclusion ratio of one must receive in the aggregate that fractional share of the total value of the original trust as of the date of severance that is equal to the excess of one over the fractional share described in the second sentence of this paragraph. See paragraph (j), Example 9, of this section.

Reg. § 26.2642-6(e), “Reporting a qualified severance,” provides:

(1) *In general*. A qualified severance is reported by filing Form 706-GS(T), ‘‘Generation-Skipping Transfer Tax Return for Terminations,’’ (or such other form as may be provided from time to time by the Internal Revenue Service (IRS) for the purpose of reporting a qualified severance). Unless otherwise provided in the applicable form or instructions, the IRS requests that the filer write ‘‘Qualified Severance’’ at the top of the form and attach a Notice of Qualified Severance (Notice). The return and attached Notice should be filed by April 15th of the year immediately following the year during which the severance occurred or by the last day of the period covered by an extension of time, if an extension of time is granted, to file such form.

(2) *Information concerning the original trust*. The Notice should provide, with respect to the original trust that was severed -

(i) The name of the transferor;

(ii) The name and date of creation of the original trust;

(iii) The tax identification number of the original trust; and

(iv) The inclusion ratio before the severance.

(3) *Information concerning each new trust*. The Notice should provide, with respect to each of the resulting trusts created by the severance -

(i) The name and tax identification number of the trust;

(ii) The date of severance (within the meaning of paragraph (c) of this section);

(iii) The fraction of the total assets of the original trust received by the resulting trust;

(iv) Other details explaining the basis for the funding of the resulting trust (a fraction of the total fair market value of the assets on the date of severance, or a fraction of each asset); and

(v) The inclusion ratio.

Reg. § 26.2642-6(f), “Time for making a qualified severance,” provides:

(1) A qualified severance of a trust may occur at any time prior to the termination of the trust. Thus, provided that the separate resulting trusts continue in existence after the severance, a qualified severance may occur either before or after -

(i) GST tax exemption has been allocated to the trust;

(ii) A taxable event has occurred with respect to the trust; or

(iii) An addition has been made to the trust.

(2) Because a qualified severance is effective as of the date of severance, a qualified severance has no effect on a taxable termination as defined in section 2612(a) or a

taxable distribution as defined in section 2612(b) that occurred prior to the date of severance. A qualified severance shall be deemed to occur before a taxable termination or a taxable distribution that occurs by reason of the qualified severance. See paragraph (j) Example 8 of this section.

Reg. § 26.2642-6(g), “Trusts that were irrevocable on September 25, 1985,” provides:

(1) *In general*. See § 26.2601-1(b)(4) for rules regarding severances and other actions with respect to trusts that were irrevocable on September 25, 1985.

(2) *Trusts in receipt of a post-September 25, 1985, addition*. A trust described in § 26.2601-1(b)(1)(iv)(A) that is deemed for GST tax purposes to consist of one separate share not subject to GST tax (the non-chapter 13 portion) with an inclusion ratio of zero, and one separate share subject to GST tax (the chapter 13 portion) with an inclusion ratio determined under section 2642, may be severed into two trusts in accordance with § 26.2654-1(a)(3). One resulting trust will hold the non-chapter 13 portion of the original trust (the non-chapter 13 trust) and will not be subject to GST tax, and the other resulting trust will hold the chapter 13 portion of the original trust (the chapter 13 trust) and will have the same inclusion ratio as the chapter 13 portion immediately prior to the severance. The chapter 13 trust may be further divided in a qualified severance in accordance with the rules of this section. The non-chapter 13 trust may be further divided in accordance with the rules of § 26.2601-1(b)(4).

Reg. § 26.2642-6(h), “Treatment of trusts resulting from a severance that is not a qualified severance,” provides:

Trusts resulting from a severance (other than a severance recognized for GST tax purposes under § 26.2654-1) that does not meet the requirements of a qualified severance under paragraph (b) of this section will be treated, after the date of severance, as separate trusts for purposes of the GST tax, provided that the trusts resulting from such severance are recognized as separate trusts under applicable state law. The post-severance treatment of the resulting trusts as separate trusts for GST tax purposes generally permits the allocation of GST tax exemption, the making of various elections permitted for GST tax purposes, and the occurrence of a taxable distribution or termination with regard to a particular resulting trust, with no GST tax impact on any other trust resulting from that severance. Each trust resulting from a severance described in this paragraph (h), however, will have the same inclusion ratio immediately after the severance as that of the original trust immediately before the severance. (See § 26.2654-1 for the inclusion ratio of each trust resulting from a severance described in that section.) Further, any trust resulting from a nonqualified severance may be severed subsequently, pursuant to a qualified severance described in this § 26.2642-6.

Reg. § 26.2642-6(j), “Examples,” provides, “The rules of this section are illustrated by the following examples:”

Example (1). *Succession of interests*. T dies in 2006. T’s will establishes a testamentary trust (Trust) providing that income is to be paid to T’s sister, S, for her life. On S’s death, one-half of the corpus is to be paid to T’s child, C (or to C’s estate if C fails to survive S), and one-half of the corpus is to be paid to T’s grandchild, GC (or to GC’s estate if GC fails to survive S). On the Form 706, ‘‘United States Estate (and Generation-Skipping Transfer) Tax Return,’’ filed for T’s estate, T’s executor allocates all of T’s available GST tax exemption to other transfers and trusts, such that Trust’s inclusion ratio is 1. Subsequent to filing the Form 706 in 2007 and in accordance with applicable state law, the trustee divides Trust into two separate trusts, Trust 1 and Trust 2, with each trust receiving 50 percent of the value of the assets of the original trust as of the date of severance. Trust 1 provides that trust income is to be paid to S for life with remainder to C or C’s estate, and Trust 2 provides that trust income is to be paid to S for life with remainder to GC or GC’s estate. Because Trust 1 and Trust 2 provide for the same succession of interests in the aggregate as provided in the original trust, the severance constitutes a qualified severance, provided that all other requirements of section 2642(a)(3) and this section are satisfied.

Example (2). *Succession of interests in discretionary trust*. In 2006, T establishes Trust, an irrevocable trust providing that income may be paid from time to time in such amounts as the trustee deems advisable to any one or more members of the group consisting of T’s children (A and B) and their respective descendants. In addition, the trustee may distribute corpus to any trust beneficiary in such amounts as the trustee deems advisable. On the death of the last to die of A and B, the trust is to terminate and the corpus is to be distributed in two equal shares, one share to the then-living descendants of each child, per stirpes. T elects, under section 2632(c)(5), to not have the automatic allocation rules contained in section 2632(c) apply with respect to T’s transfers to Trust, and T does not otherwise allocate GST tax exemption with respect to Trust. As a result, Trust has an inclusion ratio of one. In 2008, the trustee of Trust, pursuant to applicable state law, divides Trust into two equal but separate trusts, Trust 1 and Trust 2, each of which has terms identical to the terms of Trust except for the identity of the beneficiaries. Trust 1 and Trust 2 each has an inclusion ratio of one. Trust 1 provides that income is to be paid in such amounts as the trustee deems advisable to A and A’s descendants. In addition, the trustee may distribute corpus to any trust beneficiary in such amounts as the trustee deems advisable. On the death of A, Trust 1 is to terminate and the corpus is to be distributed to the then-living descendants of A, per stirpes, but, if A dies with no living descendants, the principal will be added to Trust 2. Trust 2 contains identical provisions, except that B and B’s descendants are the trust beneficiaries and, if B dies with no living descendants, the principal will be added to Trust 1. Trust 1 and Trust 2 in the aggregate provide for the same beneficiaries and the same succession of interests as provided in Trust, and the severance does not shift any beneficial interest to a beneficiary who occupies a lower generation than the person or persons who held the beneficial interest in Trust. Accordingly, the severance constitutes a qualified severance, provided that all other requirements of section 2642(a)(3) and this section are satisfied.

Example (3). *Severance based on actuarial value of beneficial interests*. In 2004, T establishes Trust, an irrevocable trust providing that income is to be paid to T’s child C during C’s lifetime. Upon C’s death, Trust is to terminate and the assets of Trust are to be paid to GC, C’s child, if living, or, if GC is not then living, to GC’s estate. T properly elects, under section 2632(c)(5), not to have the automatic allocation rules contained in section 2632(c) apply with respect to T’s transfers to Trust, and T does not otherwise allocate GST tax exemption with respect to Trust. Thus, Trust has an inclusion ratio of one. In 2009, the trustee of Trust, pursuant to applicable state law, divides Trust into two separate trusts, Trust 1 for the benefit of C (and on C’s death to C’s estate), and Trust 2 for the benefit of GC (and on GC’s death to GC’s estate).

The document severing Trust directs that Trust 1 is to be funded with an amount equal to the actuarial value of C's interest in Trust prior to the severance, determined under section 7520 of the Internal Revenue Code. Similarly, Trust 2 is to be funded with an amount equal to the actuarial value of GC's interest in Trust prior to the severance, determined under section 7520. Trust 1 and Trust 2 do not provide for the same succession of interests as provided under the terms of the original trust. Therefore, the severance is not a qualified severance. Furthermore, because the severance results in no non-skip person having an interest in Trust 2, Trust 2 constitutes a skip person under section 2613 and, therefore, the severance results in a taxable termination subject to GST tax.

Example (4). *Severance of a trust with a 50% inclusion ratio*. On September 1, 2006, T transfers $100,000 to a trust for the benefit of T's grandchild, GC. On a timely filed Form 709, ''United States Gift (and Generation-Skipping Transfer) Tax Return,'' reporting the transfer, T allocates all of T's remaining GST tax exemption ($50,000) to the trust. As a result of the allocation, the applicable fraction with respect to the trust is .50 [$50,000 (the amount of GST tax exemption allocated to the trust) divided by $100,000 (the value of the property transferred to the trust)]. The inclusion ratio with respect to the trust is .50 [1-.50]. In 2007, pursuant to authority granted under applicable state law, the trustee severs the trust into two trusts, Trust 1 and Trust 2, each of which is identical to the original trust and each of which receives a 50 percent fractional share of the total value of the original trust, valued as of the date of severance. Because the applicable fraction with respect to the original trust is .50 and the trust is severed into two equal trusts, the trustee may designate which resulting trust has an inclusion ratio of one, and which resulting trust has an inclusion ratio of zero. Accordingly, in the Notice of Qualified Severance reporting the severance, the trustee designates Trust 1 as having an inclusion ratio of zero, and Trust 2 as having an inclusion ratio of one. The severance constitutes a qualified severance, provided that all other requirements of section 2642(a)(3) and this section are satisfied.

Example (5). *Funding of severed trusts on a non-pro rata basis*. T's will establishes a testamentary trust (Trust) for the benefit of T's descendants, to be funded with T's stock in Corporation A and Corporation B, both publicly traded stocks. T dies on May 1, 2004, at which time the Corporation A stock included in T's gross estate has a fair market value of $100,000 and the stock of Corporation B included in T's gross estate has a fair market value of $200,000. On a timely filed Form 706, T's executor allocates all of T's remaining GST tax exemption ($270,000) to Trust. As a result of the allocation, the applicable fraction with respect to Trust is .90 [$270,000 (the amount of GST tax exemption allocated to the trust) divided by $300,000 (the value of the property transferred to the trust)]. The inclusion ratio with respect to Trust is .10 [1-.90]. On August 1, 2008, in accordance with applicable local law, the trustee executes a document severing Trust into two trusts, Trust 1 and Trust 2, each of which is identical to Trust. The instrument designates August 3, 2008, as the date of severance (within the meaning of paragraph (d)(3) of this section). The terms of the instrument severing Trust provide that Trust 1 is to be funded on a non-pro rata basis with assets having a fair market value on the date of severance equal to 90% of the value of Trust's assets on that date, and Trust 2 is to be funded with assets having a fair market value on the date of severance equal to 10% of the value of Trust's assets on that date. On August 3, 2008, the value of the Trust assets totals $500,000, consisting of Corporation A stock worth $450,000 and Corporation B stock worth $50,000. On August 4, 2008, the trustee takes all action necessary to transfer all of the Corporation A stock to Trust 1 and to transfer all of the Corporation B stock to Trust 2. On August 6, 2008, the stock transfers are completed and the stock is received by the appropriate resulting trust. Accordingly, Trust 1 is funded with assets having a value equal to 90% of the value of Trust as of the date of severance, August 3, 2008, and Trust 2 is funded with assets having a value equal to 10% of the value of Trust as of the date of severance. Therefore, the severance constitutes a qualified severance, provided that all other requirements of section 2642(a)(3) and this section are satisfied. Trust 1 will have an inclusion ratio of zero and Trust 2 will have an inclusion ratio of one.

Example (6). *Funding of severed trusts on a non-pro rata basis*.

(i) T's will establishes an irrevocable trust (Trust) for the benefit of T's descendants. As a result of the allocation of GST tax exemption, the applicable fraction with respect to Trust is .60 and Trust's inclusion ratio is .40 [1-.60]. Pursuant to authority granted under applicable state law, on August 1, 2008, the trustee executes a document severing Trust into two trusts, Trust 1 and Trust 2, each of which is identical to Trust. The instrument of severance provides that the severance is intended to qualify as a qualified severance within the meaning of section 2642(a)(3) and designates August 3, 2008, as the date of severance (within the meaning of paragraph (d)(3) of this section). The instrument further provides that Trust 1 and Trust 2 are to be funded on a non-pro rata basis with Trust 1 funded with assets having a fair market value on the date of severance equal to 40% of the value of Trust's assets on that date and Trust 2 funded with assets having a fair market value equal to 60% of the value of Trust's assets on that date. The fair market value of the assets used to fund each trust is to be determined in compliance with the requirements of paragraph (d)(4) of this section.

(ii) On August 3, 2008, the fair market value of the Trust assets totals $4,000,000, consisting of 52% of the outstanding common stock in Company, a closely-held corporation, valued at $3,000,000 and $1,000,000 in cash and marketable securities. Trustee proposes to divide the Company stock equally between Trust 1 and Trust 2, and thus transfer 26% of the Company stock to Trust 1 and 26% of the stock to Trust 2. In addition, the appropriate amount of cash and marketable securities will be distributed to each trust. In accordance with paragraph (d)(4) of this section, for funding purposes, the interest in the Company stock distributed to each trust is valued as a pro rata portion of the value of the 52% interest in Company held by Trust before severance, without taking into account, for example, any valuation discount that might otherwise apply in valuing the noncontrolling interest distributed to each resulting trust.

(iii) Accordingly, for funding purposes, each 26% interest in Company stock distributed to Trust 1 and Trust 2 is valued at $1,500,000 (.5 x $3,000,000). Therefore, Trust 1, which is to be funded with $1,600,000 (.40 x $4,000,000), receives $100,000 in cash and marketable securities valued as of August 3, 2008, in addition to the Company stock, and Trust 2, which is to be funded with $2,400,000 (.60 x $4,000,000), receives $900,000 in cash and marketable securities in addition to the Company stock. Therefore, the severance is a qualified severance, provided that all other requirements of section 2642(a)(3) and this section are satisfied.

Example (7). *Statutory qualified severance*. T dies on October 1, 2004. T's will establishes a testamentary trust (Trust) to be funded with $1,000,000. Trust income is to be paid to T's child, S, for S's life. The trustee may also distribute trust corpus from time to time, in equal or unequal shares, for the benefit of any one or more members of the group consisting of S and T's three grandchildren (GC1, GC2, and GC3). On S's death, Trust is to terminate and the assets are to be divided equally among GC1, GC2, and GC3 (or their respective then-living descendants, per stirpes). On a timely filed Form 706, T's executor allocates all of T's remaining GST tax exemption ($300,000) to Trust. As a result of the allocation, the applicable fraction with respect to the trust is .30 [$300,000 (the amount of GST tax exemption allocated to the trust) divided by $1,000,000 (the value of the property transferred to the trust)]. The inclusion ratio with respect to the trust is .70 [1-.30]. On June 1, 2007, the trustee determines that it is in the best interest of the beneficiaries to sever Trust to provide a separate trust for each of T's three grandchildren and their respective families. The trustee severs Trust into two trusts, Trust 1 and Trust 2, each with terms and beneficiaries identical to Trust and thus each providing that trust income is to be paid to S for life, trust principal may be distributed for the benefit of any or all members of the group consisting of S and T's grandchildren, and, on S's death, the trust is to terminate and the assets are to be divided equally among GC1, GC2, and GC3 (or their respective then-living descendants, per stirpes). The instrument severing Trust provides that Trust 1 is to receive 30% of Trust's assets and Trust 2 is to receive 70% of Trust's assets. Further, each such trust is to be funded with a pro rata portion of each asset held in Trust. The trustee then severs Trust 1 into three equal trusts, Trust GC1, Trust GC2, and Trust GC3. Each trust is named for a grandchild of T and provides that trust income is to be paid to S for life, trust principal may be distributed for the benefit of S and T's grandchild for whom the trust is named, and, on S's death, the trust is to terminate and the trust proceeds distributed to the respective grandchild for whom the trust is named. If that grandchild has predeceased the termination date, the trust proceeds are to be distributed to that grandchild's then-living descendants, per stirpes, or, if none, then equally to the other two trusts resulting from the severance of Trust 1. Each such resulting trust is to be funded with a pro rata portion of each Trust 1 asset. The trustee also severs Trust 2 in a similar manner, into Trust GC1(2), Trust GC2(2), and Trust GC3(2). The severance of Trust into Trust 1 and Trust 2, the severance of Trust 1 into Trust GC1, Trust GC2, Trust GC3, and the severance of Trust 2 into Trust GC1(2), Trust GC2(2) and Trust GC3(2), constitute qualified severances, provided that all other requirements of section 2642(a)(3) and this section are satisfied with respect to each severance. Trust GC1, Trust GC2, Trust GC3 will each have an inclusion ratio of zero and Trust GC1(2), Trust GC2(2), and Trust GC3(2) will each have an inclusion ratio of one.

Example (8). *Qualified severance deemed to precede a taxable termination*.[6406] In 2004, T establishes an inter vivos irrevocable trust (Trust) for a term of 10 years providing that Trust income is to be paid annually in equal shares to T's child C and T's

[6406] [my footnote:] One might considering delaying termination of a trust subject to part III.B.1.d.ii Estate Tax Inclusion Period (ETIP) so that it may divide in a manner consistent with this Example. A practical use is described in the text accompanying fn 6518 in part III.B.2.c.v GRIT's Estate Tax Consequences.

grandchild GC (the child of another then-living child of T). If either C or GC dies prior to the expiration of the 10-year term, the deceased beneficiary's share of Trust's income is to be paid to that beneficiary's then-living descendants, per stirpes, for the balance of the trust term. At the expiration of the 10-year trust term, the corpus is to be distributed equally to C and GC; if either C or GC is not then living, then such decedent's share is to be distributed instead to such decedent's then-living descendants, per stirpes. T allocates T's GST tax exemption to Trust such that Trust's applicable fraction is .50 and Trust's inclusion ratio is .50 [1-.50]. In 2006, pursuant to applicable state law, the trustee severs the trust into two equal trusts, Trust 1 and Trust 2. The instrument severing Trust provides that Trust 1 is to receive 50% of the Trust assets, and Trust 2 is to receive 50% of Trust's assets. Both resulting trusts are identical to Trust, except that each has different beneficiaries: C and C's descendants are designated as the beneficiaries of Trust 1, and GC and GC's descendants are designated as the beneficiaries of Trust 2. The severance constitutes a qualified severance, provided all other requirements of section 2642(a)(3) and this section are satisfied. Because the applicable fraction with respect to Trust is .50 and Trust was severed into two equal trusts, the trustee may designate which resulting trust has an inclusion ratio of one, and which has an inclusion ratio of zero. Accordingly, in the Notice of Qualified Severance reporting the severance, the trustee designates Trust 1 as having an inclusion ratio of one, and Trust 2 as having an inclusion ratio of zero. Because Trust 2 is a skip person under section 2613, the severance of Trust resulting in the distribution of 50% of Trust's corpus to Trust 2 would constitute a taxable termination or distribution (as described in section 2612(a)) of that 50% of Trust for GST tax purposes, but for the rule that a qualified severance is deemed to precede a taxable termination that is caused by the qualified severance. Thus, no GST tax will be due with regard to the creation and funding of Trust 2 because the inclusion ratio of Trust 2 is zero.

Example (9). *Regulatory qualified severance*.

(i) In 2004, T establishes an inter vivos irrevocable trust (Trust) providing that trust income is to be paid annually in equal shares to T's children, A and B, for 10 years. Trust provides that the trustee has discretion to make additional distributions of principal to A and B during the 10-year term without adjustments to their shares of income or the trust remainder. If either (or both) dies prior to the expiration of the 10-year term, the deceased child's share of trust income is to be paid to the child's then living descendants, per stirpes, for the balance of the trust term. At the expiration of the 10-year term, the corpus is to be distributed equally to A and B; if A and B (or either of them) is not then living, then such decedent's share is to be distributed instead to such decedent's then living descendants, per stirpes. T allocates GST tax exemption to Trust such that Trust's applicable fraction is .25 and its inclusion ratio is .75.

(ii) In 2006, pursuant to applicable state law, the trustee severs the trust into three trusts: Trust 1, Trust 2, and Trust 3. The instrument severing Trust provides that Trust 1 is to receive 50% of Trust's assets, Trust 2 is to receive 25% of Trust's assets, and Trust 3 is to receive 25% of Trust's assets. All three resulting trusts are identical to Trust, except that each has different beneficiaries: A and A's issue are designated as the beneficiaries of Trust 1, and B and B's issue are designated as the beneficiaries of Trust 2 and Trust 3. The severance constitutes a qualified severance, provided that all other requirements of section 2642(a)(3) and this section are satisfied. Trust 1 will have an inclusion ratio of 1. Because both Trust 2 and Trust 3 have each received the fractional share of Trust's assets equal to Trust's applicable fraction of .25, trustee designates that Trust 2 will have an inclusion ratio of one and that Trust 3 will have an inclusion ratio of zero.

Example (10). *Beneficiary's interest dependent on inclusion ratio*. On August 8, 2006, T transfers $1,000,000 to Trust and timely allocates $400,000 of T's remaining GST tax exemption to Trust. As a result of the allocation, the applicable fraction with respect to Trust is .40 [$400,000 divided by $1,000,000] and Trust's inclusion ratio is .60 [1-.40]. Trust provides that all income of Trust will be paid annually to C, T's child, for life. On C's death, the corpus is to pass in accordance with C's exercise of a testamentary limited power to appoint the corpus of Trust to C's lineal descendants. However, Trust provides that if, at the time of C's death, Trust's inclusion ratio is greater than zero, then C may also appoint that fraction of the trust corpus equal to the inclusion ratio to the creditors of C's estate. On May 3, 2008, pursuant to authority granted under applicable state law, the trustee severs Trust into two trusts. Trust 1 is funded with 40% of Trust's assets, and Trust 2 is funded with 60% of Trust's assets in accordance with the requirements of this section. Both Trust 1 and Trust 2 provide that all income of Trust will be paid annually to C during C's life. On C's death, Trust 1 corpus is to pass in accordance with C's exercise of a testamentary limited power to appoint the corpus to C's lineal descendants. Trust 2 is to pass in accordance with C's exercise of a testamentary power to appoint the corpus of Trust to C's lineal descendants and to the creditors of C's estate. The severance constitutes a qualified severance, provided that all other requirements of section 2642(a)(3) and this section are satisfied. No additional contribution or allocation of GST tax exemption is made to either Trust 1 or Trust 2 prior to C's death. Accordingly, the inclusion ratio with respect to Trust 1 is zero. The inclusion ratio with respect to Trust 2 is one until C's death, at which time C will become the transferor of Trust 2 for GST tax purposes. (Some or all of C's GST tax exemption may be allocated to Trust 2 upon C's death.)

Example (11). *Date of severance*. Trust is an irrevocable trust that has both skip person and non-skip person beneficiaries. Trust holds two parcels of real estate, Property A and Property B, stock in Company X, a publicly traded company, and cash. On June 16, 2008, the local court with jurisdiction over Trust issues an order, pursuant to the trustee's petition authorized under state law, severing Trust into two resulting trusts of equal value, Trust 1 and Trust 2. The court order directs that Property A will be distributed to Trust 1 and Property B will be distributed to Trust 2, and that an appropriate amount of stock and cash will be distributed to each trust such that the total value of property distributed to each trust as of the date of severance will be equal. The court order does not mandate a particular date of funding. Trustee receives notice of the court order on June 24, and selects July 16, 2008, as the date of severance. On June 26, 2008, Trustee commences the process of transferring title to Property A and Property B to the appropriate resulting trust(s), which process is completed on July 8, 2008. Also on June 26, the Trustee hires a professional appraiser to value Property A and Property B as of the date of severance and receives the appraisal report on Friday, October 3, 2008. On Monday, October 6, 2008, Trustee commences the process of transferring to Trust 1 and Trust 2 the appropriate amount of Company X stock valued as of July 16, 2008, and that transfer (as well as the transfer of Trust's cash) is completed by October 9, 2008. Under the facts presented, the funding of Trust 1 and Trust 2 occurred within 90 days of the date of severance selected by the trustee, and within a reasonable time after the date of severance taking into account the nature of the assets involved and the need to obtain an appraisal. Accordingly, the date of severance for purposes of this section is July 16, 2008, the resulting trusts are to be funded based on the value of the original trust assets as of that date, and the severance is a qualified severance assuming that all other requirements of section 2642(a)(3) and this section are met. (However, if Trust had contained only marketable securities and cash, then in order to satisfy the reasonable time requirement, the stock transfer would have to have been commenced, and generally completed, immediately after the date of severance, and the cash distribution would have to have been made at the same time.)

Example (12). *Other severance that does not meet the requirements of a qualified severance*.

(i) In 2004, T establishes an irrevocable inter vivos trust (Trust) providing that Trust income is to be paid to T's children, A and B, in equal shares for their joint lives. Upon the death of the first to die of A and B, all Trust income will be paid to the survivor of A and B. At the death of the survivor, the corpus is to be distributed in equal shares to T's grandchildren, W and X (with any then-deceased grandchild's share being paid in accordance with that grandchild's testamentary general power of appointment). W is A's child and X is B's child. T elects under section 2632(c)(5) not to have the automatic allocation rules contained in section 2632(c) apply with respect to T's transfers to Trust, but T allocates GST tax exemption to Trust resulting in Trust having an inclusion ratio of .30.

(ii) In 2009, the trustee of Trust, as permitted by applicable state law, divides Trust into two separate trusts, Trust 1 and Trust 2. Trust 1 provides that trust income is to be paid to A for life and, on A's death, the remainder is to be distributed to W (or pursuant to W's testamentary general power of appointment). Trust 2 provides that trust income is to be paid to B for life and, on B's death, the remainder is to be distributed to X (or pursuant to X's testamentary general power of appointment). Because Trust 1 and Trust 2 do not provide A and B with the contingent survivor income interests that were provided to A and B under the terms of Trust, Trust 1 and Trust 2 do not provide for the same succession of interests in the aggregate as provided by Trust. Therefore, the severance does not satisfy the requirements of this section and is not a qualified severance. Provided that Trust 1 and Trust 2 are recognized as separate trusts under applicable state law, Trust 1 and Trust 2 will be recognized as separate trusts for GST tax purposes pursuant to paragraph (h) of this section, prospectively from the date of the severance. However, Trust 1 and Trust 2 each have an inclusion ratio of .30 immediately after the severance, the same as the inclusion ratio of Trust prior to severance.

Example (13). *Qualified severance following a non-qualified severance*. Assume the same facts as in Example 12, except that, as of November 4, 2010, the trustee of Trust 1 severs Trust 1 into two trusts, Trust 3 and Trust 4, in accordance with applicable local law. The instrument severing Trust 1 provides that both resulting trusts have provisions identical to Trust 1. The terms of the instrument severing Trust 1 further provide that Trust 3 is to be funded on a pro rata basis with assets having a fair market value as of the date of severance equal to 70% of the value of Trust 1's

> assets on that date, and Trust 4 is to be funded with assets having a fair market value as of the date of severance equal to 30% of the value of Trust 1's assets on that date. The severance constitutes a qualified severance, provided that all other requirements of section 2642(a)(3) and this section are satisfied. Trust 3 will have an inclusion ratio of zero and Trust 4 will have an inclusion ratio of one.

If the trust instrument requires automatic severance of a trust into separate trusts with zero and one inclusion ratios, then no special severance procedure is needed. T.D. 9421 (7/31/2008) explains:

> The commentators noted that the proposed regulations under § 26.2654-1(a)(1)(iii) address the treatment of severances resulting in separate trusts that are required under the terms of a trust instrument (mandatory severances) but that are neither severances otherwise recognized under section 2654 nor qualified severances under section 2642. The proposed regulations conclude that the separate shares or trusts resulting from such a severance, if recognized as separate trusts under state law, will be recognized as separate for GST tax purposes. The commentators questioned why the proposed changes to the regulations under section 2654 must address those severances that result in separate trusts when this issue is already addressed in § 26.2642-6(h) of the proposed regulations dealing with nonqualified severances. Section 26.2654-1(a)(1)(iii) was intended to address only mandatory severances that, as with the other types of severances covered by § 26.2654-1(a), are dictated by the terms of the trust. On the other hand, § 26.2642-6(h) addresses discretionary severances, that is, severances that are elective and within the discretion of the trustee. The severances described in § 26.2654-1 are governed by that section. Therefore, the proposed addition to this section has not been removed.
>
> The proposed regulations under section 2654 state a general rule that separate shares or trusts resulting from a mandatory severance, that are recognized as separate trusts for GST tax purposes, will not be treated as separate trusts for purposes of filing income tax returns or calculating any other taxes. The comments noted that this statement should not apply to shares or trusts that are recognized as separate trusts under local law. Rather, this statement should apply only to separate shares created within a single trust that are not recognized under local law as separate trusts. The final regulations reflect this change.

Commenting on the above, Harrington, Plaine & Zaritsky, *Generation-Skipping Transfer Tax*, ¶ 9.03. Segregating Exempt and Nonexempt Assets, explains:

> The regulations also state that trusts resulting from a non-qualified severance will still be treated prospectively as separate trusts for GST tax purposes if the resulting trusts are recognized as separate trusts under applicable state law. After the severance, in general, GST exemption may be allocated, elections may be made, and a taxable distribution or termination may occur with respect to one resulting trust without a GST tax impact on the other trust or share resulting from the severance. Unless the governing instrument provides otherwise, additions to, and distributions from, such trusts are allocated pro rata among the separate trusts. Moreover, the inclusion ratios of the resulting trusts are the same as the original trust immediately before the severance.

A footnote to this paragraph elaborates:

> Treas. Regs. §§ 26.2642-6(h), 26.2654-1(a)(1)(i), 26.2654-1(a)(1)(iii), 26.2654-1(a)(5), Ex. 8. In response to these regulations as proposed, commentators questioned why the proposed changes to the regulations under Section 2654 must address those severances that result in separate trusts when this issue is already addressed in Treasury Regulations Section 26.2642-6(h) of the proposed regulations dealing with nonqualified severances. Treasury Regulations Section 26.2654-1(a)(1)(iii) was intended to address only mandatory severances that, as with the other types of severances covered by Treasury Regulations Section 26.2654-1(a), are dictated by the terms of the trust. On the other hand, Treasury Regulations Section 26.2642-6(h) addresses discretionary severances, that is, severances that are elective and within the discretion of the trustee. The severances described in Treasury Regulations Section 26.2654-1 are governed by that section. Therefore, the proposed addition to this section was not removed in the final regulations. See 73 Fed. Reg. at 44,650 (July 31, 2008).

III.B.1.d.v. Automatic Allocation of GST Exemption

Letter Ruling 202210010 recited some of the basics of the GST system during life:

> Section 2601 imposes a tax on every GST. A GST is defined under § 2611(a) as: (1) a taxable distribution; (2) a taxable termination; and (3) a direct skip.
>
> Section 2602 provides that the amount of the tax is the taxable amount multiplied by the applicable rate. Section 2641(a) defines "applicable rate" as the product of the maximum federal estate tax rate and the inclusion ratio with respect to the transfer.
>
> Section 2642(a) provides the method for determining the inclusion ratio.
>
> Section 2631(a) provides that for purposes of determining the inclusion ratio, every individual shall be allowed a GST exemption amount which may be allocated by such individual (or his executor) to any property with respect to which such individual is the transferor. Section 2631(b) provides that any allocation under § 2631(a), once made, shall be irrevocable.
>
> Section 2632(a) provides that any allocation by an individual of his GST exemption under § 2631(a) may be made at any time on or before the date prescribed for filing the estate tax return for such individual's estate (determined with regard to extensions), regardless of whether such a return is required to be filed.
>
> Section 2632(c)(1) provides that if any individual makes an indirect skip during such individual's lifetime, any unused portion of such individual's GST exemption shall be allocated to the property transferred to the extent necessary to make the inclusion ratio for such property zero. If the amount of the indirect skip exceeds such unused portion, the entire unused portion shall be allocated to the property transferred.
>
> Section 2632(c)(3)(A) provides that the term "indirect skip" means any transfer of property (other than a direct skip) subject to the tax imposed by chapter 12 made to a GST trust. Section 2632(c)(3)(B) provides, in relevant part, that the term "GST trust" means a trust that could have a generation-skipping transfer with respect to the transferor unless the trust falls within any of six enumerated exceptions.

Section 2632(c)(3)(B)(ii) provides that a trust is not a GST trust if the trust instrument provides that more than 25 percent of the trust corpus must be distributed to or may be withdrawn by one or more individuals who are non-skip persons and who are living on the date of death of another person identified in the instrument (by name or by class) who is more than 10 years older than such individuals.

Section 2632(c)(3)(B)(iii) provides that a trust is not a GST trust if the trust instrument provides that, if one or more individuals who are non-skip persons die on or before a date or event described in clause (i) or (ii), more than 25 percent of the trust corpus either must be distributed to the estate or estates of one or more of such individuals or is subject to a general power of appointment exercisable by one or more of such individuals.

Section 26.2632-1(b)(2)(iii)(A) of the Generation-Skipping Transfer Tax Regulations provides that a transferor may prevent the automatic allocation of GST exemption (elect out) with respect to any transfer or transfers constituting an indirect skip made to a trust or to one or more separate shares that are treated as separate trusts under § 26.2654-1(a)(1).

Section 26.2632-1(b)(2)(iii)(B) provides that an election out of automatic allocation of GST exemption is made by attaching an election out statement to a timely filed Form 709.

Letter Ruling 202210010 involved the following situation:

On Date 1, in Year (a date after December 31, 2000), Donor established an irrevocable trust, Trust, for the benefit of her descendants. During Donor's lifetime, the trustee may distribute the income and principal of Trust to Donor's descendants in the trustee's sole discretion to provide for health, education, maintenance and support. Upon Donor's death, Trust divides into separate shares each benefitting one of Donor's children and his or her descendants. During each child's life, the trustee may distribute principal and income in his sole discretion to such child and his or her descendants to provide for health, education, maintenance and support.

Each child may at his or her death appoint the remainder of his or her separate trust to any person or entity other than the child's estate, the child's creditors or the creditors of the child's estate. Additionally, each child may also appoint to the creditors of his or her estate an amount of the trust having a value equal to the greatest dollar amount which produces the lowest sum of (i) wealth transfer taxes payable with respect to such child's estate, and (ii) generation-skipping transfer tax payable with respect to Trust. Any unappointed assets of a child's separate trust will continue in trust for the benefit of his or her descendants.

On Date 2, in Year, Donor transferred x non-voting partnership units in LP, a limited partnership, to Trust. Donor reported the Date 2 transfers to Trust on her Year Form 709, United States Gift (and Generation-Skipping Transfer) Tax Return. However, the Date 2 transfer to Trust was incorrectly reported on Form 709, Schedule A, Part 1-Gifts Subject Only to Gift Tax instead of on Schedule A, Part 3-Indirect Skips. Furthermore, the automatic allocation of the GST exemption was not reported on Schedule D, Computation of Generation-Skipping Transfer Tax.

Letter Ruling 202210010 reasoned and concluded:

> In this case, more than 25 percent of the principal of Trust would be subject to a general power of appointment held by the children and exercisable by them upon their deaths if GST exemption is not allocated to more than 25 percent of Trust. Nevertheless, the general power of appointment contingent upon the inclusion ratio of the trust does not in this case prevent the trust from being a GST trust under § 2632(c)(3)(B). Accordingly, the terms of Trust satisfy the definition of a GST trust under § 2632(c)(3)(B) at the time of the Date 2 transfer to Trust.
>
> Additionally, Donor’s failure to correctly report the Date 2 transfers on her Year Form 709 did not constitute an election out of the automatic allocation rules under § 26.2632-1(b)(2)(iii), because no election out statement was attached to Donor’s Year Form 709. Therefore, Donor’s Date 2 transfer to Trust satisfies the definition of an indirect skip under § 2632(c)(1). Accordingly, based upon the facts submitted and the representations made, we conclude that Donor’s available GST exemption was automatically allocated to the Date 2 transfer to Trust.

Letter Ruling 202244003 discussed some of the basics of the GST system upon death:

> On Date 4, Decedent’s executor timely filed Form 706, United States Estate (and Generation-Skipping Transfer) Tax Return for the estate. On Date 5, Decedent’s executor filed a supplemental Form 706. Schedule R was not included on either return, and thus none of Decedent’s generation-skipping transfer tax (GST) exemption was affirmatively allocated to Trust. You represent that prior to Decedent’s death, Decedent had not allocated any GST exemption during Decedent’s lifetime with respect to any transfer, and Decedent’s entire GST exemption was available for allocation at the time of her death.

Letter Ruling 202313008 discussed some of the basics of automatically allocating GST exemption during life:

> Section 2632(c)(5)(A)(ii) provides that any individual may elect to treat any trust as a GST trust for purposes of this subsection with respect to any or all transfers made by such individual to such trust.
>
> Section 2642(a)(1) provides that the inclusion ratio with respect to any property transferred in a generation-skipping transfer is the excess (if any) of one over the “applicable fraction.” Under 2642(a)(1), the applicable fraction is defined as a fraction the numerator of which is the amount of the GST exemption allocated to the trust (or to property transferred in a direct skip), and the denominator of which is the value of the property transferred to the trust (or involved in the direct skip), reduced by the sum of any federal estate tax or state death tax actually recovered from the trust attributable to such property and any charitable deduction allowed under § 2055 or 2522 with respect to such property.
>
> Section 2642(b)(2) provides that if property is transferred as a result of the death of the transferor, the value of such property shall be its value as finally determined for purposes of chapter 11. Any allocation to property transferred as a result of the death of the transferor shall be effective on and after the date of the death of the transferor.

Section 2642(g)(1)(A) provides that the Secretary shall by regulation prescribe such circumstances and procedures under which extensions of time will be granted to make an election to treat a trust as a GST trust under § 2632(c)(5)(A)(ii).

Section 2642(g)(1)(B) provides that in determining whether to grant relief under this paragraph, the Secretary shall take into account all relevant circumstances, including evidence of intent contained in the trust instrument or instrument of transfer and such other factors as the Secretary deems relevant. For purposes of determining whether to grant relief under this paragraph, the time for making the allocation (or election) shall be treated as if not expressly prescribed by statute.

Notice 2001-50, 2001-2 C.B. 189, provides, in part, that, under § 2642(g)(1)(B), the time for allocating the GST exemption to lifetime transfers is to be treated as if not expressly prescribed by statute and taxpayers may seek an extension of time to make an allocation described in § 2642(b)(1) or (b)(2) under the provisions of § 301.9100-3.

Section 301.9100-1(c) provides that the Commissioner has discretion to grant a reasonable extension of time under the rules set forth in §§ 301.9100-2 and 301.9100-3 to make a regulatory election, or a statutory election (but no more than six months except in the case of a taxpayer who is abroad), under all subtitles of the Code except subtitles E, G, H, and I.

Section 301.9100-3(a) provides that, in general, requests for extensions of time for regulatory elections that do not meet the requirements of § 301.9100-2 must be made under the rules of § 301.9100-3.

Section 301.9100-3 provides the standards used to determine whether to grant an extension of time to make an election whose due date is prescribed by a regulation (and not expressly provided by statute). In accordance with § 2642(g)(1)(B) and Notice 2001-50, taxpayers may seek an extension of time to make an allocation described in § 2642(b)(2) under the provisions of § 301.9100-3.

Requests for relief under § 301.9100-3 will be granted when the taxpayer provides the evidence to establish to the satisfaction of the Commissioner that the taxpayer acted reasonably and in good faith, and that granting relief will not prejudice the interests of the government.

Section 301.9100-3(b)(1)(v) provides that a taxpayer is deemed to have acted reasonably and in good faith if the taxpayer reasonably relied on a qualified tax professional, including a tax professional employed by the taxpayer, and the tax professional failed to make, or advise the taxpayer to make, the election.

Based on the facts submitted and representations made, we conclude that the requirements of § 301.9100-3 have been satisfied. Accordingly, Donor is granted an extension of time of 120 days from the date of this letter to make an election under § 2632(c)(5)(A)(ii) to treat Trust as a GST trust with respect to all transfers made by Donor to Trust.

The election should be made on an amended Form 709 and filed with the Kentucky Service Center at the following address: Department of the Treasury, Internal Revenue

Service, Stop 824G, 7940 Kentucky Drive, Florence, KY 41042-2915. A copy of this letter should be attached to the Form 709.

That conclusion was based on the following facts:

On Date 1 in Year 1, a date after December 31, 2000, Donor established Trust for the benefit of his descendants. On Dates 2, 3, and 4, all in Year 1, Donor transferred cash and securities to Trust. On Dates 5, 6, and 7, all in Year 2, Donor transferred additional cash and securities to Trust.

Donor relied on Attorney to prepare Form 709, United States Gift (and Generation-Skipping Transfer) Tax Return reporting Donor's Year 1 transfers to Trust. Donor instructed Attorney to make an election under § 2632(c)(5)(A)(ii) to treat Trust as a GST trust. Although Attorney intended to make such election, Attorney inadvertently failed to properly make the election on the Year 1 Form 709.

Letter Ruling 202244003 explained:

Section 2612(a) provides that the term taxable termination means a termination (by death, lapse of time, release of a power, or otherwise) of an interest in property held in trust where the property passes to a skip person with respect to the transferor of the property. Section 2612(b) provides that the term taxable distribution means any distribution from a trust to a skip person other than a taxable termination or a direct skip. Under §2612(c)(1), a direct skip is a transfer subject to federal estate or gift tax made by a transferor to a skip person. A skip person is defined in § 2613(a) as (1) a natural person assigned to a generation which is two or more generations below the generation assignment of the transferor, or (2) a trust if either all the interests in such trust are held by skip persons, or there is no person holding an interest in the trust, and at no time after such transfer may a distribution (including distributions on termination) be made from such trust to a non-skip person.

Section 2631(a), as in effect on Date 2, provided that for purposes of determining the inclusion ratio, every individual shall be allowed a GST exemption of $1,000,000 which may be allocated by such individual (or his executor) to any property with respect to which such individual is the transferor. Section 2631(b) provides that any allocation under § 2631(a), once made, shall be irrevocable.

Section 2632(a) provides that any allocation by an individual of his GST exemption under § 2631(a) may be made at any time on or before the date prescribed for filing the estate tax return for such individual's estate (determined with regard to extensions), regardless of whether such a return is required to be filed.

Section 2632(b)(1) provides that if any individual makes a direct skip during his lifetime, any unused portion of such individual's GST exemption shall be allocated to the property transferred to the extent necessary to make the inclusion ratio for such property zero. Section 2632(b)(2) provides that the unused portion of an individual's GST exemption is that portion of such exemption that had not previously been allocated or treated as allocated by the individual.

Section 2632(c)(1), as in effect on Date 2, provided that any portion of an individual's GST exemption which has not been allocated within the time prescribed by § 2632(a) shall be deemed to be allocated as follows: (A) first, to property which is the subject of a direct skip occurring at such individual's death; and (B) second, to trusts with respect to which such individual is the transferor and from which a taxable distribution or a taxable termination might occur at or after such individual's death.

Section 26.2632-1(d)(1) of the Generation-Skipping Transfer Tax Regulations provides that an allocation of a decedent's unused GST exemption by the executor of the decedent's estate is made on the appropriate United States Estate (and Generation-Skipping Transfer) Tax Return (Form 706 or Form 706NA) filed on or before the date prescribed for filing the return by § 6075(a) (including any extensions actually granted (the due date)). An allocation of GST exemption to a trust is void if the allocation is made with respect to a trust that has no GST potential with respect to the transferor for whom the allocation is being made, as of the date of the transferor's death. For this purpose, a trust has GST potential even if the possibility of a GST is so remote to be negligible.

Section 26.2632-1(d)(2) provides that a decedent's unused GST exemption is automatically allocated on the due date for filing Form 706 to the extent not otherwise allocated by the decedent's executor on or before that date. The automatic allocation occurs whether or not a return is actually required to be filed. Unused GST exemption is allocated pro rata (subject to the rules of § 26.2642-2(b)), on the basis of the value of the property as finally determined for purposes of chapter 11 (chapter 11 value), first to direct skips treated as occurring at the transferor's death. The balance, if any, of unused GST exemption is allocated pro rata (subject to the rules of § 26.2642-2(b)) on the basis of the chapter 11 value of the nonexempt portion of the trust property (or in the case of trusts that are not included in the gross estate, on the basis of the date of death value of the trust) to trusts with respect to which a taxable termination may occur or from which a taxable distribution may be made. The automatic allocation of GST exemption is irrevocable, and an allocation made by the executor after the automatic allocation is made is ineffective. No automatic allocation of GST exemption is made to a trust that will have a new transferor with respect to the entire trust prior to the occurrence of any GST with respect to the trust.

As discussed above, it is represented that prior to her death, Decedent did not allocate any GST exemption to any inter vivos transfers and that, at the time of Decedent's death, her entire GST exemption of $1,000,000 was available. Pursuant to the automatic allocation rules contained in § 2632(c)(1), as in effect on Date 2, GST exemption was automatically allocated first to the direct skip transfers occurring at death, which were the two $a transfers to Decedent's granddaughters and the interest in stocks and securities that you represent had a value of $b that Daughter 1 disclaimed in a qualified disclaimer. The remaining GST exemption, if any, would be deemed to be allocated to Trust. Accordingly, based upon the facts submitted and the representations made, we conclude that the automatic allocation rules of § 2632(c), as in effect on Date 2, operated to cause the unused portion of Decedent's available GST exemption to be automatically allocated to Trust.

Letter Ruling 202326012 involved the following facts:

On Date 1 of Year 1, a date after December 31, 2000, Taxpayer established and funded Trust 1, an irrevocable grantor retained annuity trust (GRAT). Taxpayer's retained interest in Trust 1 terminated on Date 1 of Year 3. The remaining principal of Trust 1 passed in equal shares to Children's Trusts, each a separate trust for the primary benefit of each of Taxpayer's children. Children's Trusts have GST potential. For GST tax purposes, the estate tax inclusion period (ETIP) with respect to Taxpayer's transfer to Trust 1 closed on Date 1 of Year 3.

On Date 2 of Year 2, Taxpayer established and funded Trust 2, another GRAT. Taxpayer's retained interest in Trust 2 terminated on Date 2 of Year 4. The remaining principal in Trust 2 passed in equal shares to Children's Trusts. For GST tax purposes, the ETIP with respect to Taxpayer's transfer to Trust 2 closed on Date 2 of Year 4.

On Date 3 of Year 4, Taxpayer established and funded Trust 3, another GRAT. Taxpayer's retained interest in Trust 3 terminated on Date 3 of Year 6. The remaining principal in Trust 3 passed in equal shares to Children's Trusts. For GST tax purposes, the ETIP with respect to Taxpayer's transfer to Trust 3 closed on Date 3 of Year 6.

Also in Year 4, Taxpayer made an additional direct transfer of $x to each of the Children's Trusts.

On Date 4 of Year 5, Taxpayer established and funded Trust 4, another GRAT. Taxpayer's retained interest in Trust 4 terminated on Date 4 of Year 7. The remaining principal in Trust 4 passed in equal shares to Children's Trusts. For GST tax purposes, the ETIP with respect to Taxpayer's transfer to Trust 4 closed on Date 4 of Year 7.

On Date 5 of Year 6, Taxpayer established and funded Trust 5, another GRAT. Taxpayer's retained interest in Trust 5 terminated on Date 5 of Year 8. The remaining principal in Trust 5 passed in equal shares to Children's Trusts. For GST tax purposes, the ETIP with respect to Taxpayer's transfer to Trust 5 closed on Date 5 of Year 8.

Taxpayer retained Firm to prepare Taxpayer's Form 709, United States Gift (and Generation-Skipping Transfer) Tax Return for Years 1 through 8. Taxpayer did not intend for any portion of her GST exemption to be applied to the transfers she made to Trusts 1 through 5 (as described above) or to the direct transfer she made to each of Children's Trusts in Year 4. Firm, however, did not advise Taxpayer that under the rules of § 2632(c), a portion of Taxpayer's GST exemption would be automatically allocated to these transfers. In addition, Firm did not advise Taxpayer of the ability to elect out of the automatic allocation of GST exemption by making an election under § 2632(c)(5) on Form 709. As a result, Taxpayer failed to make an election on Taxpayer's Forms 709 for Years 3, 4, 6, 7, and 8 to opt out of the automatic allocation of GST exemption to the transfers Taxpayer made to Trusts 1 through 5. In addition, Taxpayer failed to make an election on Taxpayer's Form 709 for Year 4 to opt out of the automatic allocation of GST exemption for any and all transfers made to Children's Trusts. In Year 9, Attorney discovered the failure to opt out.

It has been represented that, to date, no taxable distributions, taxable terminations, or any other events have occurred with respect to Trusts 1 through 5 or Children's Trusts that would give rise to a GST tax liability. In addition, no other transfers other than those described above have been made to Children's Trusts.

Letter Ruling 202326012 reasoned and ruled:

Section 26.2632-1(b)(2)(iii)(A) provides, in relevant part, that a transferor may prevent the automatic allocation of GST exemption (elect out) with respect to any transfer or transfers constituting an indirect skip made to a trust or to one or more separate shares that are treated as separate trusts under § 26.2654-1(a)(1). A transferor may elect out with respect to - (1) one or more prior-year transfers subject to § 2642(f) (regarding ETIPs) made by the transferor to a specified trust or trusts; (2) one or more (or all) current year transfers made by the transferor to a specified trust or trusts; (3) one or more (or all future transfers made by the transferor to a specified trust or trusts; (4) all future transfers made by the transferor to all trusts (whether or not in existence at the time of the election out); or (5) any combination of (1) through (4).

Section 26.2632-1(b)(2)(iii)(B) provides that to elect out, the transferor must attach an election out statement to a Form 709 filed within the time period provided in § 26.2632-1(b)(2)(iii)(C). In general, the election out statement must identify the trust, and specifically must provide that the transferor is electing out of the automatic allocation of GST exemption with respect to the described transfer or transfers. Under § 26.2632-1(b)(2)(iii)(C), to elect out, the Form 709 with the attached election out statement must be filed on or before the due date for timely filing the Form 709 for the calendar year in which the ETIP closes.

Section 26.2632-1(c)(1)(i) provides that a direct skip or an indirect skip that is subject to an ETIP is deemed to have been made only at the close of the ETIP. The transferor may prevent the automatic allocation of GST exemption to a direct skip or an indirect skip by electing out of the automatic allocation rules at any time prior to the due date of the Form 709 for the calendar year in which the close of the ETIP occurs (whether or not any transfer was made in the calendar year for which the Form 709 was filed, and whether or not a Form 709 otherwise would be required to be filed for that year).

Section 2642(b)(1)(A) provides that, except as provided in § 2642(f), if the allocation of the GST exemption to any transfers of property is made on a gift tax return filed on or before the date prescribed by § 6075(b) for such transfer or is deemed to be made under § 2632(b)(1) or (c)(1), the value of such property for purposes of § 2642(a) shall be its value as finally determined for purposes of chapter 12 (within the meaning of § 2001(f)(2)), or, in the case of an allocation deemed to have been made at the close of an ETIP, its value at the time of the close of the ETIP.

Section 2642(f)(1) provides that for purposes of determining the inclusion ratio, if an individual makes an inter vivos transfer of property, and the value of such property would be includible in the gross estate of such individual under chapter 11 if such individual died immediately after making such transfer (other than by reason of § 2035), any allocation of GST exemption to such property shall not be made before the close of the ETIP (and the value of such property shall be determined under § 2642(f)(2)).

Section 2642(f)(3) provides that for purposes of § 2642(f), the term “estate tax inclusion period” means any period after the transfer described in paragraph (1) during which the value of the property involved in such transfer would be includible in the gross estate of the transferor under chapter 11 if the transferor died.

Section 2642(g)(1)(A) provides, generally, that the Secretary shall by regulation prescribe such circumstances and procedures under which extensions of time will be granted to make an election under § 2632(c)(5).

> Section 2642(g)(1)(B) provides that in determining whether to grant relief under § 2642(g)(1), the Secretary shall take into account all relevant circumstances, including evidence of intent contained in the trust instrument or instrument of transfer and such other factors as the Secretary deems relevant. For purposes of determining whether to grant relief, the time for making the allocation (or election) shall be treated as if not expressly prescribed by statute.
>
> Notice 2001-50, 2001-2 C.B. 189, provides that, under § 2642(g)(1)(B), the time for allocating the GST exemption to lifetime transfers and transfers at death, the time for electing out of the automatic allocation rules, and the time for electing to treat any trust as a GST trust are to be treated as if not expressly prescribed by statute. The Notice further provides that taxpayers may seek an extension of time to make an allocation described in § 2642(b)(1) or (2) or an election described in § 2632(b)(3) or (c)(5) under the provisions of § 301.9100-3.
>
> Sections 301.9100-1 through 301.9100-3 provide the standards the Commissioner will use to determine whether to grant an extension of time to make an election. Section 301.9100-2 provides an automatic extension of time for making certain elections. Section 301.9100-3 provides the standards used to determine whether to grant an extension of time to make an election whose date is prescribed by a regulation (and not expressly provided by statute). In accordance with § 2642(g)(1)(B) and Notice 2001-50, a taxpayer may seek an extension of time to make an allocation described in § 2642(b)(1) or (b)(2) or an election described in § 2632(b)(3) or (c)(5) under the provisions of § 301.9100-3.
>
> Section 301.9100-3(a) provides, in part, that requests for relief subject to § 301.9100-3 will be granted when the taxpayer provides the evidence to establish to the satisfaction of the Commissioner that the taxpayer acted reasonably and in good faith, and the grant of relief will not prejudice the interests of the Government.
>
> Under § 301.9100-3(b)(1)(v), a taxpayer is deemed to have acted reasonably and in good faith if the taxpayer reasonably relied on a qualified tax professional, including a tax professional employed by the taxpayer, and the tax professional failed to make, or advise the taxpayer to make, the election.
>
> Based on the facts submitted and representations made, we conclude that the requirements of § 301.9100-3 have been satisfied. Accordingly, Taxpayer is granted an extension of time of 120 days from the date of this letter to make an election under § 2632(c)(5)(A)(i)(I) that the automatic allocation rules not apply to the transfers Taxpayer made in Year 1 to Trust 1, in Year 2 to Trust 2, in Year 4 to Trust 3, in Year 5, to Trust 4, and in Year 6 to Trust 5. In addition, Taxpayer is granted an extension of time of 120 days from the date of this letter to make an election under § 2632(c)(5)(A)(i)(II) to have automatic allocation of GST exemption not apply to any and all transfers to Children's Trusts. The election for each of Trust 1 through 5 should be made on an amended Form 709 for the year in which the ETIP closed for that trust. The election for the Children's Trusts should be made on an amended Form 709 for Year 4….

Letter Ruling 202337006 involved the following facts and ruling:

> Donors relied on Accounting Firm for tax advice. Donors failed to inform Accounting Firm of the gifts made to Trust in 2010. As a result, Accounting Firm failed to prepare a 2010

> Form 709, United States Gift (and Generation-Skipping Transfer) Tax Return for either of the Donors in 2010 to opt out of the automatic allocation of GST exemption to the transfers to Trust. Accordingly, Donors failed to elect out of automatic allocation for their 2010 transfers to Trust, and GST exemption was automatically allocated to these transfers….
>
> Based on the facts submitted and representations made, we conclude that Donors acted reasonably and in good faith under § 301.9100-3(b). In addition, we conclude that granting relief will not prejudice the interests of the government. Accordingly, Donors are granted an extension of time of 120 days from the date of this letter to make an election under § 2632(b)(3) that the automatic allocation rules not apply to Donors' 2010 transfers to Trust.

III.B.1.e. Valuation Issues

III.B.1.e.i. Valuing Business Interests

Business that are not publicly traded are inherently difficult to value.

Corporations that engage in a Code § 162 trade or business are likely to be valued based on their projected net cash flow, with earlier years' results being used to determine whether projected earnings are reasonable.

Pierre v. Commissioner, 133 T.C. 24 (2009), a reviewed decision (12-6 majority), held that state law property rights and not the check-the-box regulations determine gift tax valuation:

> We begin with a brief summary of the longstanding statutes, regulations, and caselaw that constitute the Federal gift tax valuation regime. Section 2501(a) imposes a tax on the transfer of property by gift. The amount of a gift of property is the value of the property at the date of the gift. Sec. 2512(a). It is the value of the property passing from the donor that determines the amount of the gift. Sec. 25.2511-2(a), Gift Tax Regs. "The value of the property is the price at which such property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or to sell, and both having reasonable knowledge of the relevant facts." Sec. 25.2512-1, Gift Tax Regs. Where property is transferred for less than adequate and full consideration in money or money's worth, the amount of the gift is the amount by which the value of the property transferred exceeds the value of the consideration received. Sec. 2512(b).
>
> In addition to the statutes and regulations, there is significant Supreme Court precedent interpreting them and guiding the implementation of the Federal gift and estate tax.[9] The Supreme Court, in *Bromley v. McCaughn*, 280 U.S. 124 (1929), held that the imposition of a gift tax is within the constitutional authority of Congress. The holding in *Bromley* turned on a finding that the gift tax is an excise tax rather than a direct tax. As the Supreme Court stated in *Bromley v. McCaughn*, *supra* at 135-136:
>
>> The general power to "lay and collect taxes, duties, imposts, and excises" conferred by Article I, § 8 of the Constitution, and required by that section to be uniform throughout the United States, is limited by § 2 of the same article, which requires "direct" taxes to be apportioned, and section 9, which provides that "no capitation or other direct tax shall be laid unless in proportion to the census" directed by the Constitution to be taken…

> … a tax imposed upon a particular use of property or the exercise of a single power over property incidental to ownership, is an excise which need not be apportioned…
>
> … [The gift tax] is a tax laid only upon the exercise of a single one of those powers incident to ownership, the power to give the property owned to another….

[9] The Federal estate tax is interpreted in pari materia with the Federal gift tax. See *Estate of Sanford v. Commissioner*, 308 U.S. 39, 44 (1939) (citing *Burnet v. Guggenheim*, 288 U.S. 280, 286 (1933)).

The Supreme Court has also provided guidance as to the appropriate roles of Federal and State law in the valuation of transfers. A fundamental premise of transfer taxation is that State law creates property rights and interests, and Federal tax law then defines the tax treatment of those property rights. See *Morgan v. Commissioner*, 309 U.S. 78 (1940). It is well established that the Internal Revenue Code creates “no property rights but merely attaches consequences, federally defined, to rights created under state law.” *United States v. Nat. Bank of Commerce*, 472 U.S. 713, 722 (1985) (quoting *United States v. Bess*, 357 U.S. 51, 55 (1958)). In *Morgan v. Commissioner*, *supra* at 80-81, the Supreme Court stated:

> State law creates legal interests and rights. The federal revenue acts designate what interests or rights, so created, shall be taxed. Our duty is to ascertain the meaning of the words used to specify the thing taxed. If it is found in a given case that an interest or right created by local law was the object intended to be taxed, the federal law must prevail no matter what name is given to the interest or right by state law.

In *Morgan*, the Court disregarded the State law classification of a power of appointment as “special” where the rights associated with that power of appointment under State law (*i.e.*, the power to appoint to anyone, including the holder’s estate and creditors) were properly classified under Federal law as a general power of appointment. As is standard in Federal estate and gift tax cases, the interest was created by State law, respected by the Court, and taxed pursuant to the Federal estate and gift tax provisions. In short, the Court ignored the label, not the interest created, and determined whether the interest fell within the Federal statute. This Court, in *Knight v. Commissioner*, 115 T.C. 506 (2000), followed the Supreme Court precedent discussed above. As we said in *Knight v. Commissioner*, *supra* at 513 (citing *United States v. Nat. Bank of Commerce*, *supra* at 722, *United States v. Rodgers*, 461 U.S. 677, 683 (1983), and *Aquilino v. United States*, 363 U.S. 509, 513 (1960)): “State law determines the nature of property rights, and Federal law determines the appropriate tax treatment of those rights.”

Pursuant to New York law petitioner did not have a property interest in the underlying assets of Pierre LLC, which is recognized under New York law as an entity separate and apart from its members. N.Y. Ltd. Liab. Co. Law sec. 601. Accordingly, there was no State law “legal interest or right” in those assets for Federal law to designate as taxable, and Federal law could not create a property right in those assets. Consequently, pursuant to the historical Federal gift tax valuation regime, petitioner’s gift tax liability is determined by the value of the transferred interests in Pierre LLC, not by a hypothetical transfer of the underlying assets of Pierre LLC.

The court then applied this background to its view of the check-the-box regulations:

> While we accept that the check-the-box regulations govern how a single-member LLC will be taxed for Federal tax purposes, i.e., as an association taxed as a corporation or as a disregarded entity, we do not agree that the check-the-box regulations apply to disregard the LLC in determining how a donor must be taxed under the Federal gift tax provisions on a transfer of an ownership interest in the LLC. If the check-the-box regulations are interpreted and applied as respondent contends, they go far beyond classifying the LLC for tax purposes. The regulations would require that Federal law, not State law, apply to define the property rights and interests transferred by a donor for valuation purposes under the Federal gift tax regime. We do not accept that the check-the-box regulations apply to define the property interest that is transferred for such purposes. The question before us (*i.e.*, how a transfer of an ownership interest in a validly formed LLC should be valued under the Federal gift tax provisions) is not the question addressed by the check-the-box regulations (i.e., whether an LLC should be taxed as a separate entity or disregarded so that the tax on its operations is borne by its owner). To conclude that because an entity elected the classification rules set forth in the check-the-box regulations, the long-established Federal gift tax valuation regime is overturned as to single-member LLCs would be "manifestly incompatible" with the Federal estate and gift tax statutes as interpreted by the Supreme Court. See sec. 7701.
>
> We note that Congress has enacted provisions of the Internal Revenue Code, see secs. 2701, 2703, that disregard valid State law restrictions in valuing transfers. Where Congress has determined that the "willing buyer, willing seller" and other valuation rules are inadequate, it expressly has provided exceptions to address valuation abuses. See chapter 14 of the Internal Revenue Code, sections 2701 through 2704, which specifically are designed to override the standard "willing buyer, willing seller" assumptions in certain transactions involving family members.
>
> By contrast, Congress has not acted to eliminate entity-related discounts in the case of LLCs or other entities generally or in the case of a single-member LLC specifically. In the absence of such explicit congressional action and in the light of the prohibition in section 7701, the Commissioner cannot by regulation overrule the historical Federal gift tax valuation regime contained in the Internal Revenue Code and substantial and well-established precedent in the Supreme Court, the Courts of Appeals, and this Court, and we reject respondent's position in the instant case advocating an interpretation that would do so. Accordingly, we hold that petitioner's transfers to the trusts should be valued for Federal gift tax purposes as transfers of interests in Pierre LLC and not as transfers of a proportionate share of the underlying assets of Pierre LLC.

See part III.E Fairness Within Families; Valuation, for a further discussion of valuation.

Among IRS resources is http://www.irs.gov/Businesses/Valuation-of-Assets, which includes separate papers on discounts for lack of marketability and S corporations.

III.B.1.e.ii. Valuing a Beneficial Interest in a Trust

Rev. Rul. 61-88 ruled:

> Under the terms of an irrevocable trust, the decedent or his estate was entitled to receive certain property on the death of the life tenant G, provided G died without issue.

The decedent was survived by G, a married woman aged 44 living with her husband H. At the time of decedent's death, G had never borne a child, but G and H were believed to be still capable of having issue.

Section 2031 of the Internal Revenue Code of 1954 provides that the gross estate of a decedent shall be determined by including to the extent provided by law the value at the time of his death of all property, real or personal, tangible or intangible, wherever situated, except real property situated outside of the United States. General rules for the valuation of property for purposes of section 2031 are set forth in section 20.2031-1 of the Estate Tax Regulations.

In the absence of facts tending to show that birth of issue to G is impossible, valuation of the remainder interest of the present decedent's estate by the mere mechanical application of actuarial formulas is not supportable. See *Estate of Louis Sternberger, et al. v. United States*, 348 U.S. 187, Ct.D. 1777, C.B. 1955-1, 450. However, merely because an interest in property cannot be evaluated with sufficient accuracy to support a deduction, it does not necessarily follow that the interest is without value. Section 20.2037-1(c)(3) of the Estate Tax Regulations, dealing with the valuation of a decedent's reversionary interest for the purposes of section 2037 of the Code (transfers taking effect at death) makes this clear in the following excerpt:

> The value is ascertained in accordance with recognized valuation principles for determining the value for estate tax purposes of future or conditional interests in property. (See sections 20.2031-1, 20.2031-7, and 20.2031-9.) For example, if the decedent's reversionary interest was subject to an outstanding life estate in his wife, his interest is valued according to the actuarial rules set forth in section 20.2031-7. On the other hand, if the decedent's reversionary interest was contingent on the death of his wife without issue surviving and if it cannot be shown that his wife is incapable of having issue (so that his interest is not subject to valuation according to the actuarial rules in section 20.2031-7), his interest is valued according to the general rules set forth in section 20.2031-1.

In general, a remainder interest which becomes operative upon the death without issue of a woman aged 44 may be of considerable value. In making the valuation, however, consideration should be given to all known circumstances relative to the particular life tenant, rather than to women aged 44 in general.

Accordingly, it is held that, in the instant case, the remainder interest, since it is not susceptible of valuation under actuarial rules, should be evaluated in accordance with the general rules for the valuation of property set forth in section 20.2031-1 of the regulations.

Rev. Rul. 67-53 involved the following facts:

A grantor created a trust during his lifetime under the terms of which he reserved the right to net income for his life. The trust instrument provided that at his death net income was payable to the grantor's wife for life, subject to the power of the trustee, in his absolute and uncontrolled discretion, to withhold any or all of such income and to add all or any part of it to the principal of the trust. The instrument also provided that at the grantor's death or at the death of his wife, whichever occurred last, the principal and any accumulated income of the trust were to be paid to the grantor's then living children. At

> the grantor's death the principal of the trust was includible in his gross estate for Federal estate tax purposes. Thereafter, the trustee annually paid out the entire amount of net income of the trust to the wife of the grantor until her death.

Rev. Rul. 67-53 cited rules valuing the credit for tax on prior transfers, Code § 2013(a)[6407] and Reg. § 20.2013-4(a):

> Where a trustee possesses the power, in his absolute and uncontrolled discretion, to pay out net income to the income beneficiary of a trust or to accumulate such income, the beneficiary's interest cannot be valued according to recognized valuation principles as of the date of the transferor's death. Therefore, notwithstanding the fact that such income was actually paid to the decedent-transferee, the credit for tax on prior transfers under section 2013 of the Code is not allowable with respect to such an interest.

[6407] In describing Code § 2013(a), Rev. Rul. 67-53 referred to Rev. Rul. 59-9, which is reproduced here:

> Advice has been requested whether the estate of a decedent who had been the beneficiary of a life estate in a testamentary trust may be credited with all or any part of the amount of the Federal estate tax paid with respect to the transfer of such property in the estate of a prior decedent.
>
> In the instant case the decedent and her sister were the lifetime income beneficiaries of a residual trust created under the will of their father. Under the terms of the will the decedent and her sister were to receive the income from the trust in equal shares during their lifetimes and, at the death of either, the income was to be paid to the survivor. At the death of the last to survive, the income was to be paid to their children. The decedent died in the year 1955 which was within ten years after the death of her father. The value of the property included in the residual trust was included in the father's gross estate and a Federal estate tax was paid thereon. Since the interest which the decedent possessed in the residual trust terminated at her death, the life estate which she had in the trust was not included in her gross estate for Federal estate tax purposes. The specific question presented is whether the life estate qualifies for the credit for tax on prior transfers authorized by section 2013 of the Internal Revenue Code of 1954 even though it is not included in the gross estate of the transferee decedent.
>
> Section 2013 of the Code provides that the estate of a deceased who had received property from another decedent shall be credited with all or a part of the amount of the Federal estate tax paid with respect to such property in the transferor decedent's estate, provided that the decedents died within the statutory period.
>
> In determining whether the credit authorized by section 2013 of the Code is allowable, it is not necessary that the property transferred be identified in or traced through the transferee's estate. If the property was included in the gross estate of the transferor and a Federal estate tax paid thereon, the credit for tax on prior transfers may be applied to the interest received by the transferee, notwithstanding the fact that such interest is not included in the transferee decedent's estate for Federal estate tax purposes. Furthermore, the right of survivorship which the decedent possessed in the life tenancy also constitutes an interest in property which passed to her from her father and, as such, qualifies for the credit authorized by section 2013 of the Code.
>
> The amount to be used in computing the amount of credit which may be allowed is the value of the life estate plus the value of the secondary life estate determined as of the date of the transferor-decedent's death on the basis of recognized actuarial principles and without regard to the amount of income actually received by the life tenant.
>
> In view of the foregoing, it is held that the value of a life estate, without more, qualifies for the credit for tax on prior transfers authorized by section 2013 of the Code, notwithstanding the fact that it is not included in the gross estate of the transferee decedent.

Rev. Rul. 66-271 applied Rev. Rul. 59-9 to a Louisiana usufruct, which Rev. Rul. 66-271 described as:

> Generally, a usufruct is the right of enjoying a thing, the property of which is vested in another, and to draw from the same all the profit, utility, and advantages which it may produce. (Article 533 of the Civil Code of Louisiana.) A usufruct may be established in many ways; by a deed of sale, by a marriage contract, by donation, compromise, exchange, last will, and even by operation of law. (Article 540 of the Civil Code of Louisiana.)

Rev. Rul. 70-292 allowed such a credit:

> An ascertainable standard has been inferred where the language of the instrument relates to the beneficiary's accustomed manner of living. *Ithaca Trust Company v. United States*, 279 U.S. 151 (1929), Ct. D. 61, C.B. VIII-1, 313 (1929). If the instrument does not specifically limit the power of invasion to the accustomed standard of living of the beneficiary, such a restriction will be implied where the power is limited by such words as "comfort and support" or "hospital or medical expenses." Such an interpretation will be made if it is consistent with applicable local law and other language of the instrument does not require a different construction. Rev. Rul. 54-285, C.B. 1954-2, 302.
>
> In this case, the trustee's discretionary power to divert income of the residuary trust for the benefit of the surviving spouse can occur only if such diversion is necessary for her comfort, support, hospital or medical expenses. Thus, the power of diversion is impliedly limited by a definite standard. In addition (under the circumstances of this case), as of the date of the transferor's death, the likelihood of any diversion is so remote as to be negligible.
>
> In view of the foregoing, it is concluded that the transferee's income interest in the trust property is capable of valuation. Therefore, it is held that the credit for tax on prior transfers authorized by section 2013 of the Code is allowable with respect to such interest. For the situation where the bequest is not susceptible of valuation, see Rev. Rul. 67-53, C.B. 1967-1, 265.

Rev. Rul. 75-550 provides:

> Under the terms of the residuary trust, the trustee was granted the discretionary power to invade the trust corpus in such amount as the trustee deemed necessary "for the comfort, support, hospital or medical expenses" of either *B* or the children, or any or all of them. The trustee was empowered to invade the corpus without taking into account the independent sources of income to *B* or the children. However, no withdrawals for the benefit of *B* could be made until and unless the corpus of the marital deduction trust was exhausted….
>
> In this case, the trustee's discretionary power to invade corpus of the residuary trust for the benefit of *B* and the children can occur only if such diversion is necessary for their "comfort, support, hospital or medical expenses." Thus, the power of invasion is impliedly limited by a definite standard. Rev. Rul. 70-292, cited above. In addition, as of the date of transferor A's death, the likelihood of any invasion of the trust corpus on behalf of the children was not so remote as to be negligible.
>
> Accordingly, *B's* life estate in the residuary trust ($1,344,127) was capable of valuation at *A's* death by taking into account the estimated amount of all possible invasions from the corpus on a year-to-year basis….

Rev. Rul. 76-472 involved the following facts:

> Advice has been requested as to the proper method of valuing a decedent's remainder interest in property that is subject to diminution due to the possibility of a future increase in the prescribed remainder class.

> The decedent's grandparent, G a resident of State Y, died in 1960. G bequeathed a life estate in real property to daughter M, with the remainder to the issue of M. At the time of G's death, M had three children, A (the decedent), B and C. A died in 1974 survived by B, C and M. M was aged 53 years at the date of decedent's death.
>
> Under the laws of State Y, the word "issue" as used in G's will includes all the lawful lineal descendants of M, both adopted and natural. Also under the laws of State Y, A at the date of death had a vested right to a share of the remainder interest in G's real property upon the death of M. However, if M should have an additional child or children through birth or adoption, such child or children would also share in the remainder interest at M's death, along with A's estate and B and C. The value of the individual shares of the existing remaindermen would decrease accordingly.

Rev. Rul. 76-472 reasoned and held:

> Section 2031 of the Internal Revenue Code of 1954 provides that the value of the gross estate of the decedent shall be determined by including, to the extent provided by law, the value at the time of death of all property, real or personal, tangible or intangible, wherever situated.
>
> Section 20.2031-1(b) of the Estate Tax Regulations provides in part:
>
>> (b) *Valuation of property in general*. The value of every item of property includible in a decedent's gross estate under sections 2031 through 2044 is its fair market value …. All relevant facts and elements of value as of the applicable valuation date shall be considered in every case….
>
> Section 20.2031-10(d) of the regulations provides in part:
>
>> (d) *Remainders or reversionary interests*. If a decedent had, at the time of his death, a remainder or a reversionary interest in property to take effect after an estate for the life of another, the present value of his interest is obtained by multiplying the value of the property by the [appropriate factor from the actuarial tables in section 20.2031-10(f)]….
>
> In general, future interests in property that a decedent owns at death are taxed just as possessory interests. Thus, the value of a vested remainder interest is includible in the value of a remainderman's gross estate under section 2033 of the Code even though the remainderman dies before obtaining possession of the property. See *John G. Frazer*, 6 T.C. 1255 (1946), *aff'd*, 162 F. 2d 167 (3d Cir. 1947); *Utley v. United States*, 290 F.2d 188 (9th Cir. 1961). If the decedent's vested remainder interest is to take effect upon the termination of the life estate of another, the present value of the decedent's interest is ordinarily ascertainable by use of the actuarial formula set forth in section 20.2031-10(d) of the regulations. However, if the amount of decedent's interest is subject to possible future diminution by reason of the occurrence or nonoccurrence of a contingency, the valuation of such interest does not always lend itself to mere mechanical application of actuarial formulas. See Rev. Rul. 61-88, 1961-1 C.B. 417.
>
> In the instant case, the decedent's remainder interest is subject to being diminished by either the birth or adoption of children by M. To properly reflect either one of these possible contingencies, the remainder interest should be valued in accordance with the

> general rules for the valuation of property set forth in section 20.2031-1(b) of the regulations. See Rev. Rul. 67-370, 1967-2 C.B. 324; Rev. Rul. 61-88, 1961-1 C.B. 417.
>
> In making the valuation, the actuarial value of the decedent's remainder interest, ascertained by the formula set forth in section 20.2031-10(d) of the regulations, should be the starting point. Consideration should then be given to all known facts and circumstances that might tend to decrease such value, with due regard for (1) the certainty that a woman who has reached the age of 53 years will not bear children is far greater than that which attends most other human affairs and (2) the unlikelihood that a woman of that age will adopt a child.

Estate of Lloyd v. United States, 650 F.2d 1196, (Ct.Cl. 1981) involved these facts:

> It is the Family Trust with which we are directly concerned. The income from that trust which was initially valued at over $440,000 was to be paid, with minor exceptions, to Mrs. Lloyd during her lifetime. After her death, the income was to be paid to the Lloyds' two daughters and, upon the death of each daughter, one-half of the principal was to pass to the issue of that daughter. The will gave the corporate trustee the authority to pay sums from the principal of the Family Trust to Mrs. Lloyd or any of Mr. Lloyd's issue whenever the trustee, in "its sole and uncontrolled discretion may deem necessary or advisable …." The same paragraph went on to list a number of illustrative purposes for which invasion would be appropriate. It also declared that the principal of the Family Trust was not to be invaded on Mrs. Lloyd's behalf until the Marital Trust principal was exhausted. The will allowed the trustee, when exercising its discretionary power to invade, to consider other resources of the persons for whom the trust principal could be invaded, to the extent it deemed it "wise and proper" to do so.
>
> In addition to her interest in the Family Trust, Mrs. Lloyd was also the beneficiary of the Marital Trust. Under the terms of that trust, which was initially valued at over $600,000, she was to receive all of the trust income for life, and was also granted a general testamentary power of appointment over the trust corpus. The corporate trustee was given the authority, "for any reason, [to] pay to [Mrs. Lloyd], out of the principal of the trust estate of the Marital Trust, such sum or sums as the corporate trustee, in its uncontrolled discretion, may deem necessary or advisable."
>
> At the time of Mr. Lloyd's death, he left his wife, two daughters, and seven grand children. It is undisputed on these motions that his wife was, at that time and until her death five years later in 1975, a person of substantial means. She owned her own home, and in addition to the income she received under the Family and Marital Trusts, she also became the settlor of a revocable trust with a value at her death of over $570,000. Both of the Lloyd's daughters also had substantial family incomes from other trusts and from their spouses' incomes.

Estate of Lloyd v. United States, 650 F.2d 1196, (Ct.Cl. 1981) reasoned and held:

> Defendant takes the position that this statutory and regulatory scheme requires section 2013 valuation to be based solely on the facts and circumstances known or reasonably predictable at the time of the transferor's death. Plaintiff would have us rather adopt a "hindsight" or "wait-and-see" approach, incorporating reliance on certain factors which became known only after Mr. Lloyd's (the section 2013 transferor) death, such as whether the corpus of the Family Trust was actually invaded during Mrs. Lloyd's lifetime.

We agree that the Government's "look forward" method is the only acceptable one. The value of property for section 2013 is to be the value used in determining the federal estate tax liability of the transferor (as reduced by certain other factors not relevant here). 26 U.S.C. §2013(d). See also, 26 C.F.R. §20.2013-4(a). That value is determined at the time of that decedent's death. 26 U.S.C. §2031(a). Treasury Regulation 20.2013-4(a) provides that the value of life estates and other limited interests are to be determined "*as of the date of the transferor's death* …." (emphasis added). The legislative history of section 2013 is in harmony with this time of valuation, see S. Rep. No. 1622, 83d Cong. 2d Sess. 463 reprinted in [1954] U.S. Code Cong. & Ad. News 4621, 4755-56, which has consistently been followed by the IRS. See, Rev. Rul. 70-292, 1970-1 C.B. 187, 188; Rev.Rul. 67-53, 1967-1 C.B. 265, 266. This has been the way life estates have been valued for over fifty years for federal estate tax purposes, at least whenever Congress has indicated, as here, that their value is to be set as of the decedent's death. *Ithaca Trust Co. v. United States*, 279 U.S. 151, 154-55 (1929).

In the face of this strong support for "looking forward," plaintiff relies on *Estate of Chesterton v. United States*, 213 Ct.Cl. 345, 551 F.2d 278 *cert.* denied, 434 U.S. 835 (1977), for a "wait-and-see" approach. That case, which allowed a deduction from the estate tax of only those post-death support payments actually made under what is now section 2053 of the Code, is quite different. Section 2053 includes no requirement for a date-of-death valuation while section 2013 and its regulations clearly do impose such a mandate. Moreover, the Chesterton court pointed out that Congress probably treated post-death support payments as in the same category as funeral and administrative expenses which normally arise after death. That of course is not true of section 2013 which looks squarely to valuation at the time of the transferor's death. Also, we cannot avoid a comment on plaintiff's inconsistency. The Estate would have us look at some facts as of the time of Mrs. Lloyd's death (e.g. that the principal was not in fact invaded), but to ignore other circumstances then known (e.g., that she lived only 5 years after Mr. Lloyd rather than her 17 year estimated life expectancy under 26 C.F.R. §20.2031-7). If the "wait-and-see" method were to be fully followed, we very much doubt that plaintiff would indorse it.

III Regulation 20.2013-4 requires that value be determined "on the basis of recognized valuation principles," but it does not define those principles, other than to refer to regulations containing actuarial tables for determining life estate values. Section 2013 itself is no more specific. It is implicit, however, in the statute and the regulations that a life estate or other property for which credit is sought under section 2013 must be rationally capable of valuation at the transferor's death. This is a principle of valuation long followed in comparable estate tax situations, *Humes v. United States*, 276 U.S. 487 (1928); *Ithaca Trust Co.*, *supra*, 279 U.S. at 154; *Merchants Bank v. Commissioner*, 320 U.S. 256, 261 (1943), and we think that it clearly applies to section 2013 as well. See *Holbrook v. United States*, 575 F.2d 1288, 1292 (9th Cir. 1978); *American Nat'l Bank and Trust Co. of Chattanooga v. United States*, 31 A.F.T.R. 2d 1363 (E.D. Tenn. 1972); Rev. Rul 67-53 1967-1 C.B. 265, 266.

The next step for this case is to refine that standard for life estates as to which the corpus can be invaded. On that problem, defendant urges that we refer to the decisions under a former version of 26 U.S.C. §2055 (estate tax deductions for a charitable remainder after a life estate).[3] Before its amendment in 1969 (which obviated the need for these rules), section 2055 (and its regulation) authorized an estate tax deduction for the value of a charitable remainder, but the deduction was limited by interpretation to the extent the remainder's value was "presently ascertainable." In a leading case in this area, the Supreme Court described the standard under section 2055 for the allowance of a deduction of the value of a charitable remainder:

[3] This mode has been followed by the Ninth Circuit and by IRS in revenue rulings. Holbrook, supra, 575 F.2d at 1291, Rev.Rul. 70-292, 1970-1 C.B. 187, 188.

> Only where the conditions on which the extent of invasion of the corpus depends are fixed by reference to some *readily ascertainable and reliably predictable facts* do the amount which will be diverted from the charity and the present value of the bequest become adequately measurable. And, in these cases, the taxpayer has the burden of establishing that the amounts will either be spent by the private beneficiary or reach the charity are thus *accurately calculable*. [*Merchants Bank*, *supra*, 320 U.S. at 261. (emphasis added).]

The Court went on (as it had earlier) to require that the invasion of the corpus for the life beneficiary be circumscribed so that the value of the life estate, and reciprocally that of the charitable remainder, could be properly calculated under the "ascertainable" standard. *See also Ithaca Trust Co.*, *supra*, 279 U.S. at 154 (extent of invasion of corpus for life beneficiary held to be "fixed in fact and capable of being stated in definite terms of money"); *Henslee v. Union Planters Bank*, 335 U.S. 595, 598-600 (1949) (extent of possible invasion of corpus not ascertainable and therefore charitable deduction not allowable).[4]

[4] Under this controlling criterion, the extrinsic facts at the testator's death which would show the likelihood or remoteness of corpus invasion were irrelevant to whether the charitable interest was "presently ascertainable." *Salisbury v. United States*, 377 F.2d 700, 703 n.5 (2d Cir. 1967). That was simply decided from the terms and intent of the will. See note 12, infra.

The Supreme Court's lead under the then section 2055 was followed by a large number of lower court decisions (for a general survey, see *Salisbury v. United States*, 377 F.2d 700, 703-06 (2d Cir. 1967)) which made very fine distinctions depending on the particular phrasing of the purposes for which the will allowed invasion of the corpus for the life beneficiary's purposes. Some judges and commentators decried these subtle distinctions as hair-splitting and unrealistic, see *Blodget v. Delaney*, 201 F.2d 589, 594-95 (1st Cir. 1953) (Magruder, C. J., concurring); *Seubert v. Shaughnessy*, 233 F.2d 134, 138 (2d Cir. 1956) (Clark, C. J.); see also, *Salisbury*, supra, 377 F.2d at 706 n.10, and as we have said the 1969 Congress ended the need for this process under section 2055 by changing the provisions for charitable deductions.

A good deal could be said for wholly abandoning with respect to section 2013 the "presently ascertainable" formula previously used under section 2055, and for relying instead solely on the realistic probabilities of actual invasion of the corpus at the time of the testator's death. See, e.g., *Blodget*, supra, 201 F.2d at 595 (Magruder, C. J., concurring); *Seubert*, supra, 233 F.2d at 138. But we are reluctant to do so in this case because the IRS and a Court of Appeals have decided to follow the decisions under section 2055 (see note 3, supra)[5] and because we think that, assuming that the tests are basically equivalent for the two sections, the terms of Mr. Lloyd's will, as interpreted in the light of Rhode Island law (the domiciliary state), combine to create a standard under which Mrs. Lloyd's life interest was both susceptible of determination "on the basis of recognized valuation principles" under section 2013 and its regulations, and sufficiently ascertainable and calculable to meet, at the minimum, the requirements applicable to the old section 2055 cases. See Part IV, infra.

[5] When section 2013 was first adopted in 1954, the "ascertainable" rule under section 2055 was in full force.

Nevertheless, in applying the former 2055 decision to section 2013 it is to be remembered that for the present class of case there is a difference. Under section 2055, in order to value the charitable remainder, the court looked to see whether a trustee could invade the corpus for a previous life beneficiary without an ascertainable standard limiting that invasion. What had to be found before a charitable deduction was allowed was a ceiling beyond which the corpus could not be invaded for the benefit of the life beneficiary - i.e., the maximum amount of invasion for the life interest. In section 2013, on the other hand, the interest to be valued is the life estate itself, and to show measurability the "ascertainable standard" need necessarily go no further than to establish the minimum amount of trust principal which is safe from invasion for others (and the concommitant life income created by that amount of principal). In this case, for instance, we need consider at this point only whether Mr. Lloyd intended that the trust principal not be invaded for others beyond a certain point, so that there would always be money available for his wife's benefit from the Family Trust, and her life interest would indisputably have some value.[6]

[6] See note 12, infra.

IV. Under section 2055, a tax benefit was generally allowed where "the trustee's powers are so circumscribed either by the trust instrument or state law that the value of the interest in question is 'accurately calculable.' " *Holbrook*, supra, 575 F.2d at 1291. (emphasis added.) State law is highly persuasive in will construction because of the state's power over the trustee's invasion of corpus. *Salisbury*, supra, 377 F.2d at 707.

Rhode Island law governs the interpretation of Mr. Lloyd's will since it was his domicile. The settled law of that state is that

> the intent of the testator must be ascertained if possible from the language of the will … as a whole. In discovering that intent, the words used are to be given their primary, ordinary and common meaning, unless it plainly appears that they are used in another sense….
>
> That intent, when ascertained, is to be given effect unless contrary to law. [*Lees v. Howarth*, 131 A.2d 229, 230-31 (R.I. 1957).]

Accord, *Industrial Nat'l Bank of R.I. v. Rhode Island Hospital*, 207 A.2d 286, 291 (R.I. 1965).

Under that standard, the dispositive provisions of Mr. Lloyd's will clearly evidence to us that his primary concern was for the welfare of his surviving widow. He provided that, in addition to receiving all of his tangible personal property, Will, ¶4, she would receive the entire net income of both the Family and Marital Trusts during her lifetime. Since these two trusts comprised almost the whole of his estate, the fact that she was the sole beneficiary of their income is proof of his great desire to see to her well-being. Moreover, principal of the Marital Trust could be paid to Mrs. Lloyd "for any reason," and in "such sum or sums as the corporate trustee, in its uncontrolled discretion, may deem necessary or advisable." Will, ¶10(a). Over and above these sources of funds, Mr. Lloyd provided that, if the principal of the Marital Trust were ever exhausted, his wife could receive payments out of Family Trust principal.

We infer from the combination of these provisions that Mr. Lloyd's foremost concern in his will was insuring that after his death his wife would be able to maintain a standard of living appropriate to her station in life.[7] We are convinced that this purpose was implicit in his estate plan as a whole, and served as a curb on the Trustee's power to invade the corpus of the Family Trust, set forth in paragraph 10(b) of the will.

> [7] That standard encompasses more than simply the provision of money sufficient to maintain Mrs. Lloyd in her prior mode of life. Rather, it includes such sums of money as would be necessary to allow her to live as others in the same financial bracket as she and her husband would normally live. Thus even though Mrs. Lloyd may have lived very modestly, and below the standard accepted as average for her "class", before Mr. Lloyd's death, there is no indication in the terms of his will that he expected or desired that her lifestyle would be so restricted when he was no longer alive. For instance, if Mrs. Lloyd had not travelled in the past (although travel was common among her financial equals) and she decided she would like to do so after her husband's death, such expenses would appropriately comprise part of those to be considered in maintaining her in a way appropriate to her station in life.

Paragraph 10(b) provided that

> (b) The Trustees may at any time and from time to time pay to my said wife and my issue, or any one or more of them exclusive of the other or others, *out of the principal of the Family Trust, such sum or sums as the corporate Trustee in its sole and uncontrolled discretion may deem necessary or advisable*.... Without restricting the discretion of the corporate trustee as to paying principal of the trust estate of the Family Trust, and only by way of illustration, principal may be paid for the care, maintenance, support, education or advancement, or to meet any emergency in the health of or the expense of the last illness and funeral, or otherwise for the benefit, comfort, convenience or welfare, of any person then or prospectively entitled to receive income from said trust, or any of the issue of, or any member of the immediate family of any such person or issue, or to make up any deficiency in income or in purchasing power caused by currency or credit inflation or by changes in the cost of living. [(emphasis added).]

The Government contends that this creates a power of invasion, especially for others, so broad and all-inclusive that it renders the life interest in the Family Trust incapable of valuation and not calculable under the "ascertainable" standard. We must disagree.

Although a literal reading of parts of paragraph 10(b), taken out of context and without consideration of the limitations placed on the trustee's discretionary powers by Rhode Island law and by the will as a whole, might support the defendant's position, we cannot look at the Trustee's invasion authority in that isolated way. Instead, the testator's intent as to the extent of the invasion power must be determined by looking at the will as a whole, *Metcalf v. Gladding*, 87 A. 195, 197 (R.I. 1913), and "the key words of an instrument must be interpreted in light of their context." *Salisbury*, supra, 377 F.2d at 706.

The invasion power is limited in the will to situations where it is deemed by the trustee to be "necessary or advisable." By way of example, the will lists a number of situations which the testator believed might warrant exercise of this power. Defendant would focus on the power's potential breadth and literal all-inclusiveness, as well as on the will's directive that it is exercisable by the corporate Trustee whenever it, "*in its sole and uncontrolled discretion* may deem necessary or advisable." (emphasis added). But, as we have emphasized, to look at this language alone would be to ignore the testator's basic intent shown by other aspects of the will and the entirety of the instrument. To interpret the words absolutely, and thus find the power limitless "would destroy the purpose of the trust and frustrate the settlor's plan of disposition…. [I]n such circumstances [courts] have confined [the power's] exercise by fixed standards." *Industrial Bank*, supra, 207 A.2d at 290. In other words, a major purpose of the trust would be destroyed, and Mr. Lloyd's estate plan frustrated, if the corpus of the Family Trust were invaded for others to such an extent that it - taken together with other sources of income (see Will, ¶10(c)) - was not sufficient to support Mrs. Lloyd appropriately to her life station.

Even where a power is termed "uncontrolled" or "absolute," these words are not necessarily interpreted literally by the Rhode Island courts. Rather,

> "[i]n such a case the mere fact that the trustee has acted beyond the bounds of a reasonable judgment is not a sufficient ground for interposition by the court, so long as the trustee acts in a state of mind in which it was contemplated by the settlor that he would act. But *the court will interfere if the trustee acts in a state of mind not contemplated by the settlor. Thus the trustee will not be permitted to act dishonestly, or from some motive other than the accomplishment of the purposes of the trust, or ordinarily to act arbitrarily without an exercise of his judgment.*" [*Industrial Bank, supra*, 207 A.2d at 290, (citing from Restatement (Second) Of Trusts §187, subsec. 13j (1959)) (emphasis added).]

See also, *Viall v. Rhode Island Hospital Trust Co.*, 123 A. 570, 572 (R.I. 1924); *Angell v. Angell*, 68 A. 583, 586 (R.I. 1908). That principle of Rhode Island law would govern here to compel the Trustee to preserve at least so much of the trust corpus as was necessary to provide fully for Mrs. Lloyd during her life - that being Mr. Lloyd's primary intent.

The same is true as to the will's declaration that the Trustee could invade corpus in such measure as it considered "necessary or advisable." Those words, as we have suggested, take on meaning from the testator's dominant purpose[8] and indicate that there should be no invasion which would so deplete the corpus that the income would be insufficient for proper maintenance of Mrs. Lloyd.

[8] In *Industrial Bank, supra*, the Rhode Island Supreme Court found that where exercise of the trustees' power was limited to what was "right and proper," it was "clear that the decedent did not intend that in all events their discretion should be unlimited." 207 A.2d at 291.

Similarly for the will's prescription that the

> corporate trustee may take into consideration all other available resources of any of [those for whom the trust corpus could be invaded] to such extent, and only to such extent, as it may deem wise and proper. [Will, ¶10(c).]

This language is phrased in precatory fashion and relies on the Trustee's view of "wise and proper" action, but the Trustee's discretion must always be exercised in accord with Rhode Island fiduciary law and with the will's overriding purpose. In this instance, the beneficiaries apparently all had substantial income from other sources, and the Trustee's power to invade the Family Trust would have to take into account those outside founts of income. Cf., *Peckham v. Newton*, 4 A. 758, 760 (R.I. 1886).[9]

[9] With respect to invasions of the Family Trust for the benefit of the wife, it is clearly "wise and proper" that the trustee would consider whether, if the principal were invaded currently, there would remain sufficient principal to produce income necessary to provide for Mrs. Lloyd's needs in the future (considering her other sources of income).

Defendant would discard the Rhode Island decisions because they did not involve a power to invade corpus, but we think the general principles they announce were meant to control trustees generally, not merely in the direct circumstances of that specific case. In particular, *Industrial Bank, supra*, is very close. Those parties asked the court to determine whether, under Rhode Island law, a trustee's power to allocate receipts and disbursements, expenses, and loss to either income or principal, made the value of the charitable remainder nonascertainable under section 2055. The decision how to allocate was left to the trustees "according to their judgment of what is right and proper under the circumstances, (without being bound by any court decision as to any other trust instrument) …." 207 A.2d at 289. While this power does not go to the invasion of principal, its effect is quite analogous since it allows the trustees to control, under very broad discretion, the flow of money in and out of principal and income. The state court looked at the overall testamentary scheme to discern the testator's intent, and found, as we do here, that the language if literally interpreted woul4d frustrate the testator's intent, and that therefore the trustees' powers should be limited by fixed standards. 207 A.2d at 290. Although the standards applied in Industrial Bank are, of course, not fully applicable to this case (different powers being involved), that case is important in that it gives guidance as to how the Rhode Island courts will view the grants of very broad powers in this general area.[10]

[10] A section 2055 problem was directly involved in *Industrial Bank*, and the state court found an ascertainable standard. Defendant urges that the 2055 standards should be used for section 2013 and on that view *Industrial Bank* is obviously significant for the present case.

Defendant also contends that Rhode Island law will uphold the grant of an absolute power. See *Lees, supra*, 131 A.2d at 231; *Metcalf, supra*, 87 A. at 197. In both of those cases, however, the court said that absolute or arbitrary powers were not favored, and only where it was clear from the will that the testator really intended to confer such a power, would it be recognized as such.[11] That, as we have stressed, is not true here.

[11] In *Metcalf*, the court found that, looking at the will as a whole, the testator had clearly intended to give his wife an absolute power to make advancements to their children. 87 A. at 198. In Lees, the parties agreed that an absolute power to invade the corpus had been granted, and the court found that that was in fact the testator's intent, subject to the requirement that the trustees act in good faith. 131 A.2d at 230-231.

The only relevant court decision under section 2013 is *Holbrook v. United States*, 575 F.2d 1288 (9th Cir. 1978). That case concerned the valuation for section 2013 of a life income interest created by a trust which authorized the trustees to invest in unproductive assets, to retain investments for speculative appreciation purposes, and to convert the estate to cash or securities producing little or no income, for as long as they deemed advisable. *Id*. at 1289-90. The Government contended, and the Ninth Circuit agreed, that such powers rendered the decedent's life income interest under the trust incapable of valuation as of the transferor's death, and hence ineligible for a tax credit under section 2013. *Id*. at 1290. Those plaintiffs conceded that the trust instrument did not provide a standard for valuation, and instead relied on Arizona law to place limits on the trustees' powers. *Id*. at 1291. The Holbrook court, applying the testator's intent as called for by Arizona law, held:

> To imply from this provision [making the decedent a life beneficiary of the trust income] that the trustees were under an absolute duty to produce income for the life income beneficiaries is to ignore the general plan of the instrument, which … [was] intended to vest the trustees with broad discretion so that they could flexibly manage the trust fund in order to produce a great deal of, or very little, income. … [I]t cannot be said that a decision by the trustees to invest in assets producing little or no income would constitute a remediable abuse of discretion under Arizona law. [*Id*. at 1291-91.]

Holbrook is plainly very different from this case. That instrument expressly contemplated that the trustees could act so as to obtain and pay no income at all for the life estate, and the court found that this was the testator's intent. To the same general effect, see Rev. Rul. 67-53, 1967-1 C.B. 265, 266.

V The end-result for this case is that Mrs. Lloyd's life interest in the Family Trust was sufficiently ascertainable at the time of Mr. Lloyd's death to avoid being held not to be calculable under section 2013. The Trial Division will have to determine the value of her interest (taking the standard we have prescribed as the minimum available to her) and also the amount of tax credit allowable to the estate.[12]

[12] In the section 2055 cases, once an ascertainable standard was found the courts looked to "the remoteness of invasion, or the extent of possible invasion, in terms of the standard, to determine the likelihood that the charity will take and the value of [its interest]." See *Newton Trust Co. v. Comm'r*, 160 F.2d 175, 178-79 (1st Cir. 1947); *Salisbury, supra*, 377 F.2d at 708. It was also held that the extrinsic facts (e.g. financial circumstances) at the testator's death are relevant to the remoteness of invasion (though irrelevant to the existence of an "ascertainable standard"). *Salisbury, supra*, 377 F.2d at 703 n.5 (see note 4, supra). See also Rev. Rul. 70-292, 1970-1 C.B. 187, 188 (similar position for section 2013).

Letter Ruling 8608002 included the following facts:

> Under the will of decedent's predeceased spouse, the residue of the estate passed to an INTER VIVOS trust created by the spouse. Upon the death of decedent's spouse, the corpus of the trust was divided between a "Marital Trust" and "Family Trust" created thereunder.
>
> The Marital Trust provided the decedent with a life estate coupled with a testamentary general power of appointment. In addition, the trustee of the Marital Trust was authorized to invade the trust corpus for the benefit of decedent if the income therefrom was insufficient for decedent's support, maintenance and comfort, or if such payments were otherwise necessary to maintain for decedent the standard of living to which she had become accustomed during married life.
>
> Article Third of the trust instrument contains the provisions specifically pertaining to the Family Trust. Paragraph (b) thereof provides, as follows:
>
>> (b) The net income from the Family Trust shall be paid to or used or expended for the Settlor's wife, ... {decedent named} ..., the Settlor's daughter, ... {daughter named} ..., and any grandchildren of the Settlor living at the time of any such payment, in such shares and amounts (if any such payment shall be made to more than one of the foregoing persons) as the Trustee in its absolute and sole discretion shall determine. In Paragraph (c) of Article Third, decedent's spouse expressed his intention with respect to the payment of income from the Family Trust, as follows:
>>
>> (c) It is the Settlor's intention that the income from the Family Trust shall be expended primarily for the benefit of the Settlor's wife, ... {wife named} ..., unless in the sole judgment and opinion of the Trustee, the Settlor's said daughter, ... {daughter named} ..., or Settlor's grandchildren have real need for any portion of said income. Paragraph (d) of Article Third of the trust instrument provides for the invasion of trust corpus, as follows:
>>
>> (d) If, in the opinion of the Trustee, the income herein provided, together with receipts from other sources, shall not be sufficient to generously support and maintain the Settlor's said wife and suitably to provide for the Settlor's said daughter, or the Settlor's grandchildren, then the Trustee is authorized to use and expend such part of the principal of the Family Trust as it may deem necessary for such purposes.

Letter Ruling 8608002 cited Code § 2013, Reg. §§ 20.2013-1(a), 20.2013-4(a), and 20.2013-5(a) and Rev. Ruls. 67-53, 70-292, and 75-550, then continued:

> In *Estate of Pollock v. Comm.*, 77 T.C. 1296 (1981), the Tax Court held that the discretionary life interest of a transferor's wife in a trust was not susceptible of valuation so as to qualify for the credit under section 2013 of the Code. The transferor's wife was one of three potential income distributees. The other distributees were the transferor's two children. In *Pollock*, a controlling fact was that the discretionary life interest was subject to the trustee's broad power to invade trust principal to enable the transferor's children to engage in a business venture. In addition, the court in Pollock found nothing in the governing instrument which pointed to any intention on the part of the transferor to favor his wife over his children with respect to the payment of trust income. Based primarily upon this finding and upon the trustee's broad power to invade trust principal

for the children, the court concluded that the transferor's wife did not have a fixed right to a determinable portion of the trust income for life and that, therefore, the wife's interest did not qualify for the credit under section 2013 of the Code.

In the instant case, unlike that in *Pollock*, the dispositive provisions of the trust instrument clearly evidence an intention on the part of the transferor to favor his wife over his daughter and grandchildren with respect to the payment of trust income. For example, paragraph (c) of Article Third of the trust instrument specifically provides that the income from the Family Trust be expended primarily for the benefit of the present decedent. The instant case is also wholly unlike *Pollock*, as well as Rev. Rul. 67-53, in that the trustee here has only a limited power to invade trust principal for others. By looking at paragraph (d) of Article Third of the trust instrument in conjunction with paragraph (c) thereof, it is sufficiently clear that the transferor intended to limit the trustee's power to invade trust principal for others to amounts necessary to "suitably provide" for the "real need" of these beneficiaries. Under applicable local law, the trustee was bound by this limitation imposed by the transferor. *In Re Estate of Mendelson*, 391 Mich. 706, 220 N.W. 2d 33 (1974). Further, this limitation constitutes an ascertainable standard which renders the present decedent's life interest susceptible of valuation. *Estate of McCoy v. U.S.*, 511 F. 2d 1090 (6th Cir. 1975).

Estate of Weinstein v. U.S., 820 F.2d 201 (6^{th} Cir. 1987), involved the following facts:

The decedent's husband, Mr. Simon Weinstein, set up an inter vivos trust in May of 1976, twelve days before he died of a heart attack. Under the trust's terms a portion of the trust property equal in value to 50% of Mr. Weinstein's adjusted gross estate was to go into a marital deduction trust on Mr. Weinstein's death. (The value of the trust property ultimately assigned to the marital deduction trust proved to be approximately $194,000.) The widow, who was given a testamentary power of appointment over the principal, was to receive the entire income of the marital deduction trust during her lifetime, and the trustee was authorized to invade the principal, if necessary, in order to maintain her in the standard of living to which she was accustomed. The balance of the assets in the inter vivos trust - a balance that proved to be worth approximately $155,000 - was to be held during the widow's life in a non-marital deduction trust for the benefit of the widow and the couple's two children. After the widow's death the assets in the non-marital deduction trust would go ultimately to the couple's issue. What we are concerned with here is the valuation, at the time of the husband's death, of the widow's interest in the non-marital deduction trust.

The trust instrument declared that it was the settlor's intent that his widow "be adequately provided for," to which end it was provided that the trustee's powers "shall be liberally construed insofar as allowing the said Trustee to distribute any and all amounts of the income or principal of [the non-marital deduction trust] for [the widow's] benefit so as to allow Settlor's said spouse to continue to maintain herself in the manner to which she has been accustomed throughout their married life ...."

The instrument further declared that:

"It is the Settlor's express stated intent that the Settlor is creating [the non-marital deduction trust] primarily for the benefit of the Settlor's spouse, and the needs and wishes of the Settlor's children ... shall be deemed secondary to the needs and wishes of the Settlor's spouse. In determining whether or not to make distributions

> and the amount to be distributed, the Trustee shall consider only the net income payable hereunder with such other income as the spouse may have from all other sources ... but it shall not take into consideration any property owned by the spouse except to the extent of the spouse's need of income or principal to maintain the same. It is the further general intent of Settlor that the principal of the [non-marital deduction trust] herein created not be depleted in favor of Settlor's spouse until the principal from the marital trust is exhausted. Furthermore, the Trustee does have the power to accumulate the income hereunder, but it is the general intent but not absolute direction of Settlor that in the event the spouse of Settlor does not reasonably need the income so produced, then the income shall be distributed to Settlor's named issue ... so as to avoid an accumulation of income in said [non-marital deduction trust]."

The Trustee was given broad powers to invest, reinvest, manage and administer the assets of the trust, all of which powers, according to the terms of the trust instrument, "shall be exercised in a fiduciary capacity." The trustee was also empowered to make such distributions of income and principal from the non-marital deduction trust to the beneficiaries thereof (the widow and children) "as the Trustee, in the exercise of the Trustee's sole and uncontrolled discretion, may determine." This language is followed immediately by that first quoted above, to the effect that "[i]t is the intent of the Settlor that Settlor's spouse be adequately provided for ...."

The record indicates that at the time of the settlor's death his wife, who was not employed outside the home, had no sources of income other than social security, the marital deduction trust, and the non-marital deduction trust.

The government took the position that the value of the widow's interest in the non-marital deduction trust could not be determined because the trustee had the power to invest the assets of that trust in non-productive assets, to invade principal for the benefit of the children, to accumulate any income that might be realized, and to distribute any such income to the children rather than to the widow.

The widow's estate took the position that the husband's intent had been to enable his wife to enjoy her customary standard of living during the remainder of her life. The estate retained Mr. Thomas Custis, a Fellow of the Society of Actuaries, to "make a definitive determination" of the fair market value of the widow's interest in the non-marital deduction trust, assuming that the husband's intent had been as described. A copy of the actuary's report was attached to the complaint with which the widow's estate commenced this lawsuit; on the basis of the valuation set forth in the report, the estate is seeking an estate tax refund of slightly over $16,000.

The actuary - presumably after making inquiry into the widow's customary standard of living - concluded that "it is highly unlikely that [the widow's] income from the Marital Trust and Social Security would be adequate to meet her needs." He further concluded that "it is appropriate to assume a 90% probability that the income from the Non-marital Trust would be paid to Mrs. Beatrice Weinstein during her lifetime." The actuary thought it unlikely that the principal of the non-marital deduction trust would be invaded, given the provision prohibiting depletion of the principal of that trust before exhaustion of the principal of the marital deduction trust, and he assumed that the non-marital deduction trust (and, presumably, the other trust as well) would earn a return of six percent per annum. Using these and other assumptions that he considered reasonable in light of all

> the facts available at the time of the husband's death, and taking into account the age of the widow at that time, the actuary stated that in his professional opinion Mrs. Weinstein's interest in the non-marital deduction trust had a fair value, as of the date of the husband's death, of $81,906.33. The government does not deny that the estate would be entitled to a $16,000 refund if the actuary is correct.

Estate of Weinstein v. U.S., 820 F.2d 201 (6th Cir. 1987), reasoned and held that the Code § 2013 credit was allowable because "it was not impossible to arrive at a rational valuation of the widow's interest":

> The government conceded that the regulations adopted under §2013 of the Internal Revenue Code provide, under certain circumstances, for the granting of an estate tax credit in respect of "the prior ... transfer of a life estate to the decedent, even though such a life interest is not included in the present decedent's estate and ... therefore, is not subject to federal estate taxes." As the government pointed out, however, the regulations governing the value of such a life interest provide that "the value of the interest is determined as of the date of the transferor's death *on the basis of recognized valuation principles* ...." 26 C.F.R. § 20.2013-4(a). (Emphasis supplied). If the interest is subject to contingencies that make it incapable of valuation in accordance with "recognized valuation principles," the government argued, it is well established that there can be no credit; see, among other authorities, Rev. Rul. 67-53, 1967-1 C.B. 265. Citing *Detroit Bank & Trust Co. v. United States*, 338 F.Supp. 971 (E.D. Mich. 1971), *affd.*, 72-2 U.S.T.C. ¶12,886 (6th Cir. 1972), the government noted that "the courts have examined both the trust instrument and applicable state law to determine whether or not there existed a standard which so controls the trustee's discretion that the value of the interest in question is susceptible of valuation as of the transferor's death."
>
> The government's analytical approach is, we believe, correct. If, under the terms of the trust instrument and applicable state law, there is an ascertainable standard by which the trustee's discretion is controlled, and if it is possible, in the light of that standard, to make a reasonable estimate of the value of the transferee-decedent's interest as of the time of the transferor's death, the decedent's estate is entitled to the benefit of the §2013 credit. If the trustee's discretion is so unrestrained that there is no reasonable way of placing a value on the decedent's interest, the §2013 credit is not available. Accordingly, we must determine what the trust instrument actually says and what discretion the trustee actually has under the governing state law. The trust instrument was executed in Michigan, and it says that its provisions are to be construed in accordance with the laws of that state, so it is to the law of Michigan that we must turn.
>
> In Michigan, as elsewhere, "the court's sole objective is to ascertain and give effect to the intent of the testator or settlor." *In re Nowels Estate*, 339 N.W.2d 861, 863 (Mich.App. 1983). In determining that intent, the court must look to the trust document and "construe the instrument so that each word contained therein has meaning, if it is possible to do so." *Detroit Bank & Trust Co. v. Grout*, 289 N.W.2d 898, 905 (Mich. App. 1980).
>
> These principles are clearly dispositive of the government's argument that the breadth of the trustee's investment powers makes it impossible to determine the value of the widow's interest because of the possibility that the trust assets might be invested in non-income-producing property. The powers vested in the trustee are no broader than those customarily granted in trusts of this kind, and the trust instrument expressly provides that

all of the trustee's powers "shall be exercised in a fiduciary capacity." In executing the trust, Mr. Weinstein said in so many words that he intended that his wife "be adequately provided for," and he said in so many words that he was creating the non-marital deduction trust "primarily for the benefit of [his] spouse" and only "secondarily" for the benefit of his children and their issue. We must accept as true, at this juncture, the representations that the widow had no extra-trust income other than social security, and that social security alone would not meet her needs. For the trustee to leave the widow in want and to try to further the interests of the children at her expense by investing the trust estate in non-productive assets would be a clear breach of the trustee's fiduciary duty. See *Matter of Estate of Butterfield*, 341 N.W.2d 453, 459 (Mich. 1983).

The government makes a somewhat more plausible argument that the widow's interest in the non-marital deduction trust cannot be valued rationally because the trustee is authorized to pay over to "any" beneficiary of that trust, including the children, "such amount of the income and/or principal ... as the Trustee, in the exercise of the Trustee's sole and uncontrolled discretion, may determine." The Michigan Supreme Court has held, however, that notwithstanding an express grant of "uncontrolled discretion" to the trustee in determining how much of the income of a trust shall be paid out, the trustee must still exercise his discretion in accordance with any standards set forth in the trust instrument or reasonably inferable from its terms. *In re Estate of Mendelson*, 220 N.W.2d 33 (Mich. 1974). The Michigan Supreme Court squarely held in that case that a provision for the "proper maintenance [of a beneficiary], according to her standard of living" established such a standard. *Id.* at 35.

So it is in the case at bar. The trust instrument that is before us may not be a model to be emulated as far as its draftsmanship is concerned, but taken as a whole it clearly manifests an intent to provide, first and foremost, for the maintenance of the settlor's widow in the manner to which she had been accustomed throughout her married life. Using that standard, it ought to be possible to arrive at a reasonable estimate of the widow's needs. We know that if all of the trust assets were invested at six percent, and if the widow received 100% of the income from the marital deduction trust and 90% of the income from the non-marital deduction trust, her total income from both trusts would be approximately $20,000 per year. The record does not disclose how much additional income she received from social security, and all of these matters can be explored more fully by the trial court on remand, but it is probably unlikely that a closer examination of the facts will disclose any great disproportion between the widow's total income and her actual needs as measured by the standard set forth in the trust.

The situation presented in the case at bar is strikingly similar to that in *Estate of Lloyd v. United States*, 650 F.2d 1196 (Ct.Cl. 1981). There, as here, the decedent's estate claimed a § 2013 tax credit in respect of trust property in which the decedent had been given an equitable life interest by her late husband. There, as here, the government contended that the widow's interest could not be valued because the trustee was empowered to pay out of the principal of the trust, to any member of a class that included the widow but was not limited to her, such sums as the trustee "in its sole and uncontrolled discretion" might deem necessary or advisable. 650 F.2d at 1201. There, as here, the dispositive provisions of the instrument creating the trust showed that the husband's "primary concern was for the welfare of his surviving widow," for whom the husband wished to insure "a standard of living appropriate to her station in life." Id. The Court of Claims recognized, as we do, that "[i]t is implicit ... in the statute and the regulations that a life estate or other property for which credit is sought under section

> 2013 must be rationally capable of valuation at the transferor's death," id. at 1199, but the court rejected the government's contention that the power to invade trust principal for the benefit of persons other than the widow rendered her interest in the trust incapable of valuation under the "ascertainable" standard. Id. at 1202. We reach the same conclusion here, and we see nothing to the contrary in *Holbrook v. United States*, 575 F.2d 1288 (9th Cir. 1978), *Estate of Pollock v. Commissioner*, 77 T.C. 1296 (1981), or the other cases on which the government relies. Because the power to accumulate income and the other powers cited by the government must also be exercised in the light of the primary intent of the settlor to provide for the maintenance of his widow in accordance with her past style of living, the existence of those powers does not alter our conclusion.
>
> The conclusion that the widow's interest in the non-marital deduction trust can be valued "on the basis of recognized valuation principles" finds confirmation, we believe, in Rev. Rul. 70-292, 1970-1 C.B. 187. There it was held that a §2013 credit was allowable notwithstanding that the trustee was empowered to divert to a third party such trust income as the trustee "deems necessary" for "comfort, support, hospital or medical expenses." The ruling states that the "accustomed manner of living" of the third party, although not expressly referred to in the trust instrument, provided an "ascertainable standard" that would govern the exercise of the trustee's discretion. Accord, Rev.Rul. 75-550, 1975-2 C.B. 357.

Letter Ruling 9644053 included the following facts:

> 2. THE ANNUITY AGREEMENT. The agreement provides that, upon the effective date of the agreement, B will make an initial payment to an irrevocable trust, described below, created for the benefit of A. Also, B will make annual payments to the same trust during A's life. The amount of the annual payments will vary depending on a formula that will take into account the value of certain of A's assets held by, on behalf of, or in trust for A at a specified time prior to each payment date. The agreement also provides for additional payments upon the happening of certain contingencies and provides for penalties and remedies upon default. The annuity agreement is secured by the guarantee of payment described below, which, in turn, is secured by the Deed of Trust, also described below. The payments will terminate at A's death. If B predeceases A, the agreement provides that B's estate will be liable for all future payments.

Letter Ruling 9644053 addressed whether, if B predeceases A, the total of the outstanding payments that B's estate is obligated to pay to A under the Annuity Agreement constitutes a claim against B's estate that will qualify for a deduction under section 2053:

> Section 20.2053-1(b)(3) of the Estate Tax Regulations provides that an item may be entered on a return for deduction though its exact amount is not then known, provided it is ascertainable with reasonable certainty, and will be paid. No deduction may be taken upon the basis of a vague or uncertain estimate. If the amount of the liability was not ascertainable at the time of final audit of the return by the district director and, as a consequence, it was not allowed as a deduction in the audit, and subsequently the amount of the liability is ascertained, relief may be sought by a petition to the Tax Court or a claim for refund as provided by sections 6213(a) and 6511, respectively.
>
> Section 20.2053-4 provides that the amounts that may be deducted as claims against the decedent's estate are such only as represent personal obligations of the decedent

existing at the time of death, whether or not matured, and interest thereon which had accrued at the time of death.

If B predeceases A, under the terms of the Annuity Agreement, A will have a claim against B's estate for the annual payments to A for the remainder of A's life. B's obligation to pay the annual amount is a full recourse obligation that will not terminate until A's death and, thus, a personal obligation of B. The claim will be an integral part of the Marital Settlement Agreement that will be filed in and approved by the appropriate local court having jurisdiction over administration of the estate. Thus, the obligation will be an enforceable obligation under the law of the appropriate jurisdiction.

In addition, in order to be deductible under section 2053, the claim must have been founded upon a bona fide agreement entered into for adequate and full consideration. Under section 2043(b)(2), property transferred in settlement of marital rights will be deemed to have been transferred for adequate and full consideration for purposes of section 2053 if the provisions of section 2516 are satisfied. In Issue #2, above, we concluded that the transfer, pursuant to the Marital Settlement Agreement, from B to A of the right to payments under the Annuity Agreement will not constitute a transfer subject to the gift tax under section 2516 if the divorce occurs within the applicable 3-year period. Thus, since the payments under the Annuity Agreement are deemed to be made for adequate and full consideration, a claim for those payments will qualify as a deductible claim under section 2053 provided the divorce occurs within the applicable time period and provided the amount of the claim is ascertainable.

In this case, a specified amount will be paid upon the effective date of the Annuity Agreement followed by annual payments during B's life. The actual amount of the successive annuity payments under the agreement are determined under a formula that bases the amount to be paid each year on the excess of a specified amount, which changes periodically, over A's "excess ready reserves," as determined at the time for payment. The term "excess ready reserves" generally means the excess of A's liquid assets (less the amount attributable to the sale of any residence of A) over a specified amount. Additional payments may be made if certain contingencies are satisfied.

The value of the decedent's estate is generally determined as of the decedent's date of death. *Ithaca Trust Co. v. United States*, 279 U.S. 151 [(1929). If the decedent, as of the date of death, had a right to receive payments for a term of years or for the life of another person, the present value of that stream of payments would be determined under sections 2031 and 7520 and would be includible in the decedent's gross estate. Conversely, if the decedent was legally obligated to pay a sum certain for a term certain or the life of another individual, the present value of the stream of payments, determined under sections 2031 and 7520 as of the date of the decedent's death, would generally qualify as a deductible claim against the decedent's estate under section 2053, assuming the other requirements of section 2053 are satisfied.

Under section 2053, a claim may be deducted on the return even if the exact amount of the claim is not then known if the amount is ascertainable with reasonable certainty and will be paid. No deduction may be taken upon a vague or uncertain estimate. Where the value of a claim can be determined and the claim is legally enforceable at the time of death, a deduction is allowable for the present value of that claim at the date of death. In *Propstra v. United States*, 680 F.2d 1248, 1254-1257 (9th Cir. 1982), the court applied the date-of-death valuation principle enunciated in *Ithaca Trust Co. v. United States*, *supra*, to lien claims that were for a sum certain and legally enforceable at the date of death. Even though the claims were later settled for less than the amount deducted, the court allowed the estate to deduct the full amount of the subsequently compromised lien claims. However, the court stated at page 1253 that “post-death events are relevant when computing the deduction to be taken for disputed or contingent claims.” In *Estate of Van Horne v. Commissioner*, 720 F.2d 1114 (9th Cir. 1983), the court held that where the claims are legally enforceable, the actuarial value at the date of death is deductible even though subsequent events establish that a lesser amount was actually paid.

In situations where claims against an estate are only potential, unmatured, contingent, or contested at the date of death, courts have concluded that post-death events can be the best evidence of the date-of-death value of the claim. See *Estate of Van Horne*, *supra*, at 734-739; *Estate of Kyle v. Commissioner*, 94 T.C. 829, 849 (1990); and *Estate of Cafaro v. Commissioner*, T.C. Memo. 1989-348.

Post-death events are also taken into account when a claim becomes unenforceable after the date of death. In *Estate of Sachs v. Commissioner*, 856 F.2d 1158 (8th Cir. 1988), the court held that no deduction was allowed for a claim that, after the decedent’s death, ceased to exist legally because Congress amended the law even though the change in the law was not foreseeable at the time of the decedent’s death. See also *Jacobs v. Commissioner*, 34 F.2d 233 (8th Cir. 1929). The Tax Court has also adopted this line of reasoning. See *Estate of Theis v. Commissioner*, 81 T.C. 741 (1983), *aff’d*, 770 F.2d 981 (11th Cir. 1985); *Estate of Hagmann v. Commissioner*, 60 T.C. 465, *aff’d*, 492 F.2d 796 (5th Cir. 1974); and *Estate of Cafaro*, *supra*. In *Estate of Chesterton v. United States*, 551 F.2d 278 (Ct. Cl. 1977), the Court of Claims used the post-death approach in determining the value of alimony payments payable until remarriage because the spouse remarried after receiving only 9 payments.

Consequently, where a claim is uncontested and legally enforceable, but the amount that will finally be paid under the claim may vary depending on factors that cannot be foreseen, for purposes of section 2053, the claim will be valued based on its actuarially determined present value at the date of death, which will include consideration of post-death events as evidence of that present value.

Even though an interest may include a contingency that precludes the determination of its present value by the mere application of actuarial formulas, that interest may still be valued under general valuation rules. In determining the value in such a case, consideration must be given to all known circumstances relative to the particular interest being valued. See Rev. Rul. 61-88, 1961-1 C.B. 417. In Rev. Rul. 75-550, 1975-2 C.B. 357, for purposes of section 2013, an income interest for the life of the beneficiary was valued by taking into account all possible invasions from corpus on a year-to-year basis. In that case, the history of financial need and current expenditures of the beneficiary were taken into consideration in determining whether and to what extent the corpus may be invaded to meet the future needs of the beneficiary. Thus, the present value of the beneficiary’s life estate at its creation was determined by consideration of past needs and spending habits.

In the instant case, determination of the present value of the annuity payments is particularly difficult due to the formula that bases the annual amount on the excess of a specified amount over A’s “ready reserves.” As described above, the amount of A’s “ready reserves” will vary each year based on A’s expenditures during the preceding year. If B predeceases A, at the time of B's death, A will have a history of expenditures and payments computed under the Annuity Agreement. At that time, this history of payments will be relevant in computing A's future needs and, consequently, payments under the agreement. Thus, because the claim will be uncontested and legally enforceable with the amount of the annual payments subject to speculation, the present value of those payments may be determined at B's death.

In addition, the value of the annuity payments that will qualify as a deductible claim may also be influenced by post-death events, such as the number and amount of payments actually made. After considering post-death events, if the amount of the payments actually made is less than the date-of-death value described above, the claim will be allowed to the extent of the payments actually made.

Accordingly, a claim for the present value of the payments determined at B's death will qualify as a claim against B's estate for which a deduction under section 2053 will be allowable, assuming the other requirements of section 2053 are satisfied, not to exceed the payments actually made under the Annuity Agreement.

Conclusion:

If B predeceases A, a deduction under section 2053(a)(3) will be allowable as a claim against B's estate for the present value, as of the date of B's death, of the future payments to A by B's estate under the Annuity Agreement. However, any allowable deduction will be limited to the amount of the payments actually paid, not to exceed the present value of the payments computed as of B's date of death.

III.B.1.f. Self-Canceling Installment Notes

A self-canceling installment note (SCIN) involves a sale of property to a buyer in exchange for an installment note that expires upon a certain cancellation event.[6408] Typically, an older family member sells to a younger family member and the cancellation event is the seller's death.[6409] When the obligation to make payments on the SCIN ceases upon the seller's death, nothing of value exists to be included in the seller's gross estate. Thus, the unpaid purchase price and future appreciation in the property are excluded from the gross estate.[6410]

Other advantages of a properly structured SCIN include: the avoidance of gift tax, possible increased liquidity for the seller, the ability to completely secure the property, the ability to use capital losses and possibly give the buyers an increased basis in the transferred property (compared with a gift), and the seller's ability to spread income out over time.

[6408] For a comprehensive discussion, see Akers, SCINs and Private Annuities: Disappearing Value or Disappearing Strategies? *Heckerling Institute on Estate Planning* 2015. That would be a more helpful starting point than my materials.
[6409] The cancellation event could also be the buyer's death, the first to die of the buyer and seller, or the death of a third party.
[6410] However, any delinquent payments will be included in the gross estate.

Disadvantages of using a SCIN include: questions regarding stepped-up basis at death, a finite term of payments, restrictions on alienability of the sold property for two years,[6411] and potential income from discharge of indebtedness.

For the arrangement to be characterized as a SCIN, buyers and sellers have to maintain the form and substance of a SCIN. Since SCINs are transactions between family members, strict scrutiny applies and the transactions are presumed to be gifts. To rebut this presumption, taxpayers must show a genuine intent and expectation that payment be made.[6412] To avoid inclusion of the value of the property in the gross estate under Code § 2036, the seller cannot retain an interest in the property.[6413] Also, the loan's terms must cancel the note at death; a bequest of a note is not a SCIN.[6414] Although the SCIN term need not be the seller's life, the chosen term cannot exceed the seller's life expectancy; if it does, the SCIN might be re-characterized as a private annuity.[6415]

Most importantly, the buyer has to pay a premium to the seller as compensation for the chance that the seller may die before full payment is received.[6416] If this risk premium is too low, the IRS might re-characterize the transaction as a bargain sale or part gift.[6417] Traditionally, estate planners use Code § 7520 interest and mortality rates to set this premium; however, CCA 201330033 asserted:[6418]

> We do not believe that the § 7520 tables apply to value the notes in this situation. By its terms, § 7520 applies only to value an annuity, any interest for life or term of years, or any remainder. In the case at hand, the items that must be valued are the notes that decedent received in exchange for the stock that he sold to the grantor trusts. These notes should be valued based on a method that takes into account the willing-buyer willing-seller standard in § 25.2512-8. In this regard, the decedent's life expectancy,

[6411] Code §453(e) (accelerates income if the buyer sells the property within two years after an installment sale).

[6412] *Estate of Costanza v. Commissioner*, 320 F.3d 595, 597 (6th Cir. 2003).

[6413] See *Cain v. Commissioner*, 37 T.C. 185, 187-188 (1961) (stock not included in gross estate where the seller divested herself of all title to and control over the stock), *acq*. 1962-2 C.B. 4.

[6414] *Estate of Buckwalter v. Commissioner*, 46 T.C. 805, 816-817 (1966).

[6415] GCM 39503 (1986).

[6416] See *Estate of Moss v. Commissioner*, 74 T.C. 1239, 1246-47 (1980) (full consideration for SCIN includes consideration for the cancellation provision; court held no inclusion in estate but did not discuss how to value the cancellation provision), *acq. in result*, 1981-2 C.B. 2 (acquiesce that notes were excluded from gross estate without necessarily agreeing with the court's reasoning). Although the IRS has not provided guidance on how to calculate this premium, it is usually calculated using the actuarial likelihood that the seller will die during the term of the trust using IRS life expectancy tables as indicated in Reg. § 20.2031-7.

[6417] See *Estate of Berkman v. Commissioner*, 38 T.C. Memo 1979-46 ([T]he difference between the amount of each transfer and the fair market value of each promissory note given in exchange constitutes a taxable gift.).

[6418] CCA 201330033 involved Brad Poston, indicating that the IRS had its top people involved in this ruling. My understanding is that this case involved a $2.6 billion deficiency and was docketed in the Tax Court: *Estate of William M. Davidson v. Commissioner*, Docket No. 013748-13, https://www.ustaxcourt.gov/UstcDockInq/DocketDisplay.aspx?DocketNo=13013748, that each of the taxpayer and IRS retained two medical experts, and that all four experts concluded that, at the time of the transactions, the transferor had a greater than 50% chance of living for more than 12 months. On July 6, 2015, the court entered a stipulated judgment, increasing the transfer tax assessed from the $168.5 million shown on the return to $320.5 million – a substantial increase but the $152 million stipulated deficiency was only a small fraction of the asserted deficiency.

> taking into consideration decedent's medical history on the date of the gift, should be taken into account. I.R.S. Gen. Couns. Mem. 39503 (May 7, 1986).

GCM 39503 had commented on SCINs:

> …unlike the private annuity, there is no requirement that the actuarial tables are to be used in determining the gift taxation of installment sale. Thus, the taxpayer's particular health status may be considered, and there is more room to establish that the terms of the sale are reasonable. See S. Banoff and M. Hartz, "Sales of Property: Will Self-Cancelling Installment Notes Make Private Annuities Obsolete?," 59 *Taxes* 499 (1981); E. Schnee, "Cancelling a Debt Correctly Can Give Rise to Estate and Gift Tax Advantages," 8 *Est. Plan.* 276 (1981).

At least one noted commentator has vigorously asserted that the CCA is wrong. He points out that it is inconsistent with the position that the IRS has taken in valuing lottery winnings. Note that Code § 7520 was enacted after GCM 39503 was issued, so the GCM and its related Revenue Ruling did not address Code § 7520. Nevertheless, if one is concerned about the CCA's and GCM's position, one might consider using a private annuity, which is discussed in part III.B.1.g Private Annuities.

A properly structured SCIN will pre-empt inclusion of the property in the seller's gross estate. Gift tax will also be averted if the SCIN's value - including the premium for self-cancellation - equals the value of the property transferred.[6419] Also, Chapter 14 should not apply to a properly structured SCIN.[6420]

For the buyer's income tax purposes, since a SCIN is an installment sale, the buyer should be able to deduct whatever part of each payment represents deductible interest, if the property purchased is an investment or a trade or business. The buyer's basis should be the property's full stated price.[6421] A more complicated issue is whether buyers recognize gain based on cancellation of indebtedness[6422] when the seller dies. Although it seems unfair to tax both the buyer and seller (as discussed below) on this gain, to date there has been no decision on this issue; however, the better view is that the buyer does not recognize income. In addressing the issue of the buyer's basis, courts and the IRS assumed that the buyer's basis would increase without a corresponding income recognition unless the seller or seller's estate recognizes income.

[6419] See *Wilson v. Commissioner*, T.C. Memo. 1992-480 (1992). The premium for the cancellation feature is based on § 7520 rules and IRS actuarial tables if the seller is not terminally ill. See note 6438.

[6420] See Letter Ruling 9436006 (1994) (neither §2701 nor § 2702 applied to a note because debt is not a retained interest in a trust).

[6421] GCM 39503 (1986). See *Frane v. Commissioner*, cited at fn. 6424, at 570-71. It has been suggested that regulations on contingent payments indicate that basis in a SCIN builds as payments come due because one cannot rely on the scheduled payments (Regs. §§ 1.483-4(b), 1.1275-4(c)(5)(iii)). However, under Reg. § 1.1272-1(c)(2), an alternative payment schedule applies only if, based on all the facts and circumstances as of the issue date the alternative payment schedule is significantly more likely than not to occur. Because a properly structured SCIN has a term that is less than life expectancy, it would be practically impossible for an alternate payment schedule to be significantly more likely than not to occur.

[6422] Code § 61(a)(12).

The seller of property for a SCIN pays income tax on the receipt of payments according to the installment method (unless the seller opts out of it).[6423] In *Estate of Frane v. Commissioner:*[6424]

- The Tax Court in a reviewed case held that cancellation upon death caused the decedent's final return to report income with respect to the installment obligation that was cancelled, and the Eighth Circuit affirmed regarding recognition but reversed in that the Eighth Circuit held that the estate reported the income rather than being reported on the decedent's final return.[6425] The dissent in the Tax Court claimed that income should not be realized because no payments are due after death that can be cancelled.[6426] The dissent further suggested a way around the holding by phrasing the exchange as a contingent sale,[6427] but that technique has not been tested in court.[6428]

- When a note is cancelled in a manner that triggers gain, that confirms that the note is not a contingent payment obligation. Because the note is not a contingent payment obligation, the basis of the purchased asset is not affected by cancellation.[6429]

[6423] Code § 453. Interest on deferred tax may apply to transactions aggregating over $5 million. Code § 453A(c). The seller's gain is accelerated if the buyer is a related party and re-sells the property within two years. Code § 453(e). For more special rules, see part II.G.15 Limitations on the Use of Installment Sales.

[6424] 998 F.2d 567 (8th Cir. 1993).

[6425] The Eighth Circuit cited Code § §691(a)(2) and Rev. Rul. 86-72. See part II.G.15 Limitations on the Use of Installment Sales, especially the legislative history cited in fn 1603.

[6426] *Estate of Frane v. Commissioner*, 98 T.C. 341 (1992) (reviewed decision), *aff'd* in part and *rev'd* in part, 998 F.2d 567 (8th Cir. 1993).

[6427] THE PARTIES INTEND THIS TO BE A CONTINGENT PAYMENT SALE. The purchase price of the stock is variable, and will be somewhere between $0 and $141,050, depending upon how long seller lives. A condition precedent to each contingent payment is that seller be alive on the scheduled potential payment date. Consequently, if seller dies before any scheduled potential payment, the obligation to such payment does not come into existence.

[6428] Another possible route to avoid *Frane* is to use an irrevocable grantor trust as the transferee and argue that death cannot be a cancellation event since no realization event occurs during life. See fn 6591 in part III.B.2.g Income Tax Concerns When Removing Property from the Estate Tax System.

[6429] In *Frane*, the Eighth Circuit noted:

> In addressing "Death Terminating Installment Sales," the IRS General Counsel[5] acknowledges that generally a taxpayer may not increase its basis in property "to reflect obligations it assumed in acquiring the property which are contingent or indefinite." Gen. Couns. Mem. 39,503 (May 7, 1986). This reasoning would lead to the conclusion that the Frane children's' basis in the property is the principal they actually paid. However, the memorandum concludes that the obligor of a self-cancelling installment note has a basis in property purchased with the note equal to the note's face value. Interestingly, the General Counsel's reasoning is that since section 453B will tax the obligee on the amount of appreciation, the obligor should get the benefit of an increased basis. This argument is, of course, circular in our case, for the Franes have tried to establish that section 453B cannot tax the obligee because the obligor will not receive the benefit of an increased basis. The General Counsel's reasoning is nevertheless instructive, because the injustice the Franes complain of only occurs if the treatments accorded the obligor and obligee are inconsistent. The General Counsel's memorandum shows that the plain language of sections 453B and 691(a)(5) can be applied to make the obligee recognize gain, a consistent treatment can be afforded the obligor, and no injustice results.
>
> [5] Although the Internal Revenue Service has yet to issue regulations on determining an obligor's basis in property purchased with a death-terminating installment note, most commentators agree that the obligor's basis is the face amount of the note, whether the note is self-cancelling or is

Because increasing the principal adds to the potential income tax issues at death described above, charging a higher interest rate seems preferable. Although intra-family loans tend to pay interest annually, note that, in a SCIN, the seller might die before receiving an interest payment. Consider making the interest payments monthly, as was done in *Costanza*, so that the seller actually receives the benefit of the interest payment.[6430]

A SCIN is a good planning technique when the seller wants security, the buyer has means to make payments, the buyer wants an interest deduction, the buyer plans to hold the property for at least two years, the seller's income tax bracket is relatively low, and estate tax bracket is relatively high. Although having the means to repay a promissory note is always important, consider that the mortality premium increases the cash flow paid to seller and that the IRS would argue for testing the cash flow assuming that the seller lived to the life expectancy used in determining the mortality premium;[6431] therefore, consider making sure that the buyer has outside funds to be able to pay the mortality premium.

III.B.1.g. Private Annuities

III.B.1.g.i. Private Annuities: Estate Planning Implications

Generally, a private annuity is a transfer of property for the transferee's unsecured promise to make specific, periodic payments to the transferor for the rest of the transferor's life.[6432] In distinguishing private annuities from installment sales (and therefore also SCINs), IRS has stated:[6433]

---

canceled gratuitously by the obligee. See 2 New York University Institute on Federal Taxation section 48.03[5] (1985); John A. Warnick & Brian C. Ellis, Private Annuities, 195-3rd Tax Management 23 (1984); Roszak, *supra* note 1, at 24; Banoff & Hartz, *supra* note 1, at 506; Pinzur & Beskin, *supra* note 1, at 408; Sheldon I. Banoff & Michael O. Hartz, Self-Cancelling Installment Notes: New IRS Rulings Expand Opportunities, 65 J.Tax'n 146, 151 (1986). But see Oetgen, *supra* note 2, at 605 (arguing that tax policies would be better served by giving obligor "basis only for his out-of-pocket costs," at least up to the time when the note is canceled); Robert J. Onda, Self-Cancelling Installment Sales: An Income Tax and Estate Planning Evaluation, 36 U. Fla. L. Rev. 1021, 1044 (1984) (upon cancellation, obligor's basis should be adjusted downward).

[6430] CCA 201330033.

[6431] CCA 201330033.

[6432] For a comprehensive discussion, see Akers, SCINs and Private Annuities: Disappearing Value or Disappearing Strategies? *Heckerling Institute on Estate Planning* 2015. That would be a more helpful starting point than my materials.

[6433] GCM 39503 (1986), the basis for Rev. Rul. 86-72. Additional language from the GCM follows:

ISSUES

(1) Where property is conveyed in return for a contractual obligation to make payments until a specified principal sum has been paid, or until the conveyor's death, whichever occurs first, is the obligation to make the payments treated as an annuity under section 72 of the Code, or as an installment obligation under section 453?

…..

CONCLUSION

(1) (A) We believe that when property is transferred in exchange for a transferee's promise to make periodic payments to the transferor until his death, the transaction should be considered a private annuity.

(B) When property is transferred in exchange for a transferee's promise to make periodic payments until a stated monetary amount is reached, or until the transferor's death, whichever occurs first, the transaction should be considered a private annuity, except as stated below.

….
ANALYSIS
….
ISSUE (1) Clearly, a private annuity can fit literally within this definition of an installment sale. The Committee Reports, however, state that the Act 'does not deal directly' with private annuities. S. Rep. No. 96-1000, 1980-2 CB at 500, n. 12; H.R. Rep. No. 96-1042, 96th Cong., 2d Sess. 10, n. 12 (1980). In our view, this language does not mean that private annuities are not installment sales; rather, it was meant to leave room for the Service to determine what constitutes an installment sale and what constitutes a private annuity. In other words, the Committee meant that the Act does not deal with private annuities as such, but does effectively deal with them to the extent that they are determined to be installment sales.

This brings us to the question of whether the installment sales rules of section 453 of the Code or the annuity rules of section 72 govern the treatment of periodic payments received by a taxpayer who has conveyed property in return for a contractual right to receive payments for a period not longer than the remainder of his life. We start with the premise that the substance of the transaction rather than the parties' characterization of it should control the question. We believe that where the conveyor of property receives a right to periodic payments for the remainder of his life, with no monetary limit provided, as in situation 1, the payments represent an annuity and should be governed by section 72. A stream of payments for life is squarely within the accepted concept of an annuity in our opinion, so the annuity rules in the Code, at section 72, are logically applicable. The Service already appears to have so recognized in Rev. Rul. 69-74, 1969-1 CB 43, which applies section 72 where appreciated property is exchanged for a right to periodic payments for life.

We do not think the 1980 amendment to the installment sales rules requires a different conclusion. While the amendment makes installment sale reporting available where a sale price is contingent, we infer that at least the primary intent of the legislation was to cover cases where the contingency relates to the profitability of the property to the purchaser. [fn: Neither the legislative history nor Temp. Treas. Reg. section 15A.453-1(c) provide specific guidance as to the type of contingencies that are contemplated.] As we have already explained, we believe the statement in the committee reports referring specifically to private annuities confirms our belief that the legislation was not intended to subject private annuity transactions to the installment reporting rules.

Where the stream of payments to which a conveyor of property is entitled will cease upon reaching a monetary limit, or upon his earlier death, as in situations 2 and 3, the question of whether the transaction is an annuity or an installment sale is somewhat closer in our view. While the life-limiting feature of the contractual right to receive payments still militates for annuity treatment, the monetary limit tends to dilute the annuity nature of the transaction and to make it more like the typical installment sale for a fixed consideration. Further, if we treat as annuities all situations in which the payments terminate at the death of the recipient, we would be transforming what are in substance installment sales into annuities in some instances.

Suppose for example that property is transferred in return for the transferee's promise to pay the transferor $1,000x annually, until $10,000x has been paid or until the transferor's death, whichever occurs first. Assume further that the transferor's life expectancy at the time of the sales agreement, determined by reference to Table I.-Ordinary Life Annuities-One Life Expected Return Multiples, Treas. Reg. section 1.72-9, is 30.4 years. Under these facts it is relatively unlikely that an amount less than the agreed maximum price will be paid. Therefore, if we treated this as an annuity, we would be allowing taxpayers to determine the characterization of their transaction by a provision that may have been added only to produce annuity treatment, with small chance of the provision ever coming into play.

In order to avert this problem, we believe that the following approach should be used in determining whether annuity treatment or installment sale treatment is appropriate where there is a monetary limit upon the total amount that will be paid. When the terms of a property transaction are structured so that there is a stated maximum payout that will be achieved in a period less than the life expectancy of the transferor (as determined at the time of the transaction in

> A private annuity is generally an arrangement whereby an individual transfers property, usually real estate, to a transferee who promises to make periodic payments to the transferor for the remaining life of the transferor. A private annuity may also include a transaction whereby the transferee agrees to make periodic payments until a specific monetary amount is reached or until the transferor's death, whichever occurs first. Private annuity arrangements are often used for intra-family transfers whereby an older family member transfers appreciated property to a younger family member in order to gain tax advantages, e.g., removal of the property from the transferor's gross estate….
>
> When the terms of a property transaction are structured so that there is a stated maximum payout that will be achieved in a period less than the life expectancy of the transferor (as determined at the time of the transaction in accordance with Table I, Treas. Reg. section 1.72-9), then the transaction will be characterized as an installment sale with a contingent sales price, and will be treated in accordance with the installment sale rules.

Private annuities offer many of the same advantages as SCINs. The property and its future appreciation are excluded from the gross estate,[6434] probate is avoided, gift tax is avoided, the transferor acquires increased liquidity, wealth is kept in the family, and capital losses can be utilized. Unlike SCINs, the transferor is paid for life, though the payments will be lower since no risk premium is included.

Private annuities also have disadvantages. Private annuities do not allow a step-up in basis at death. Unlike SCINs, the transferee cannot deduct interest payments, and private annuities also have a default risk since they are unsecured. Moreover, private annuities bear the risk that the transferor could outlive actuarial life expectancy, though it may be drafted to cap payments so that they do not extend for more than a short time after life expectancy. Regulations provide:[6435]

> In the case of an annuity payable from a trust or other limited fund, the annuity is not considered payable for the entire defined period if, considering the applicable section 7520 interest rate at the valuation date of the transfer, the annuity is expected to exhaust the fund before the last possible annuity payment is made in full. For this purpose, it must be assumed that it is possible for each measuring life to survive until age 110.

If a trust is the obligor, consider structuring the payment stream so that it is for the lesser of the annuitant's life or a term of years (to avoid using age 110 for the exhaustion test), with the term of years being at least the annuitant's life expectancy, with the life expectancy measure using the longer of the Code § 72 tables and the Code § 7520 tables (to qualify the payment stream as an annuity rather than a SCIN).

> accordance with Table I, Treas. Reg. section 1.72-9), then the transaction will be characterized as an installment sale with a contingent sales price, and will be treated in accordance with the installment sale rules. Hence, in situation 3, supra at page 2, where the seller's life expectancy at the time of the sales agreement is 11 years, and the maximum stated sales price will be reached in 10 years, the transaction will be termed an installment sale rather than an annuity.

[6434] *Hirsh v. United States*, 35 F.2d 982 (Ct. Cl. 1929), excluded from the decedent's estate private annuities payable by his children to him as part of a bargain sale, where the sold property did not secure the annuity.

[6435] Reg. §§ 25.7520-3(b)(2)(i), 1.7520-3(b)(2)(i) and 20.7520-3(b)(2)(i).

Like a SCIN, certain rules have to be followed to have an exchange properly characterized as a private annuity. Because the exchange is between family members, strict scrutiny applies. In order to have the transfer characterized as a private annuity and not as a gift or part gift, the annuity's actuarial value should equal the fair market value of the property.[6436] The annuity's actuarial value is based on the Code § 7520 rate of interest and the transferor's life expectancy.[6437] To determine life expectancy, the actuarial tables should be used unless the transferor is terminally ill. An individual known to have an incurable illness or other deteriorating physical condition is considered terminally ill if there is at least a 50% probability that the individual will die within 1 year; however, if the individual survives for 18 months or longer after the date of the decedent's death, that individual shall be presumed to have not been terminally ill at the date of death unless the contrary is established by clear and convincing evidence.[6438]

To avoid re-characterization of the private annuity as a transfer with a retained life interest, which would be included in the transferor's gross estate under Code § 2036(a), the transferor cannot retain an interest in the property.[6439] When a trust buys from its grantor in an exchange for a private annuity, the Tax Court held that it will look at several factors to determinate whether the transaction might be characterized for income tax purposes as a gift to a trust instead of a sale, including: (1) the relationship between the creation of the trust and the transfer of property to the trust; (2) the relationship between the income generated by the transferred property and the amount of the annuity payments; (3) the degree of control over the transferred properties exercisable by the transferor; (4) the nature and extent of the transferor's continuing interest in the transferred properties; (5) the source of the annuity payment; and (6) the arm's-length nature of the annuity/sale arrangement.[6440] A treatise suggested the following have caused Code § 2036 inclusion:[6441] the transferor retained an interest in the transferred property, the

[6437] *Cullison*, fn. 6436 (holding that the transitional rules of Reg. § 25.7520-4 required the use of §7520 actuarial rules). Section 7520 regulations require the use of Code § 72 tables for annuities.

[6438] Regs. §§1.7520-3(b)(3), 20.7520-3(b)(3), 25.7520-3(b)(3).

[6439] See *Greene v. U.S.*, 237 F.2d 848, 852-853 (7th Cir. 1956) (transferred securities included in gross estate where transferor retained the right to all income generated by the securities); *Estate of Holland v. Commissioner*, 47 B.T.A. 807 (1942) (transferred stock included in life estate where transferors retained voting rights, transferees could not divest the stock, and the annuity payments were tied to stock value), *acq*. 1942-2 C.B. 9. Rev. Rul. 68-183 (an income tax ruling regarding Code § 677) held that, when annuity payments equaled the current income yield of the entire property held in trust, in substance the sale constituted a contribution of the sold property to the trust with a reservation by the grantor of annual payments of a fixed amount for life. Rev. Rul. 79-94 applied Code § 2036 to a more complicated set of facts with a similar theme.

[6440] *Weigl v. Commissioner*, 84 T.C. 1192, 1225-26 (1985) (reviewed decision) (income tax case holding that a transfer to trust does not create an annuity where the transferor effectively controls the trust). An attempt to dispose of a family limited partnership interest using a private annuity was ignored when the children who promised to pay the annuity were not expected to use their own funds to make the payments. *Estate of Hurford v. Commissioner*, T.C. Memo. 2008-278; the resulting estate tax inclusion provided a basis step to the partnership that held the partnership at death (without using a Code § 754 election – see part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000) – as described in fn. 1574, found in part II.G.8 Code § 165(a) Loss for Worthlessness; Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A Limitation on that Strategy. Sloppy documentation using foreign trusts lost the day for the taxpayer in *Melnik v. Commissioner*, T.C. Memo. 2006-25, responding to a taxpayer's attempt to rely on *Fabric* and *Stern*, cited in fn. 6442.

[6441] 805 *T.M.* V.A.3.c.

transferee is not personally liable for the annuity payments, the annuity payments have been secured, the transferee has no independent financial means from which to make annuity payments, the transferee's annuity payments are identical or substantially similar to the income generated from the transferred assets, and the possibility that the transferee would ever be called upon to make annuity payments from the transferee's own funds is remote. The 2008 regulation change determining estate inclusion for GRATs, T.D. 9414, included the following explanation in the preamble:

> With regard to the position of certain taxpayers that the full and adequate consideration exception under section 2036 is satisfied when the present value of the remainder interest is zero, the IRS and Treasury Department believe that this exception to section 2036 does not apply. There is a significant difference between the bona fide sale of property to a third party in exchange for an annuity, and the retention of an annuity interest in property transferred to a third party. In the bona fide sale, there is a negotiation and agreement between two parties, each of whom is the owner of a property interest before the sale; each uses his or her own property to provide consideration to the other in exchange for the property interest to be received from the other in the sale. When the transferor retains an annuity or similar interest in the transferred property (as in the case of a GRAT or GRUT), the transferor is not selling the transferred property to a third party in exchange for an annuity because there is no other owner of property negotiating or engaging in a sale transaction with the transferor. The transferor, instead, is transferring the property subject to a retained possession and enjoyment of, or right to, the income from the property. If the grantor retains the interest for life, for any period not ascertainable without reference to the grantor's death, or for a period that does not in fact end before the grantor's death, the property is subject to inclusion in the grantor's gross estate under section 2036.

Courts (primarily the Ninth Circuit and cases appealable to it, as well as the Seventh Circuit) have upheld properly structured annuity sales to trusts.[6442] A trust should have significant seed money before buying from its grantor in exchange for a private annuity.[6443] The IRS has

[6442] *Estate of Fabric v. Commissioner*, 83 T.C. 932 (1984); *Stern v. Commissioner*, 747 F.2d 555 (9th Cir. 1984), *rev'g* 77 T.C. 614 (1981). In *Fabric*, the corporate trustee personally guaranteed payment of the annuity, worth $1,215,000, by a trust with $750 of initial funding; because the case was appealable to the Ninth Circuit, which had reversed the Tax Court in *Stern* and *LaFargue* (income tax case in fn. 6729), the Tax Court held that the guarantee and other issues sufficed to require it to respect the annuity agreement, despite sloppiness in execution of the plan. In an income tax case (also appealable to the Ninth Circuit) that had followed *LaFargue*, *Benson v. Commissioner*, 80 T.C. 789 (1983) respected an annuity with a present value of over $177,500 when the trust was funded with only $5. Careful documentation can convince the court that the obligors had the ability to pay and that the seller wanted to receive the payments. *Kite v. Commissioner*, T.C. Memo. 2013-43.

[6443] Gans and Blattmachr, Private Annuities and Installment Sales: *Trombetta* and Section 2036, 120 *Journal of Taxation* 227 (May 2014), focusing on *Fidelity-Philadelphia Trust Co. v. Smith*, 356 U.S. 274 (1958), and trying to distinguish *Trombetta* (fn. 6446) from *Ray v. U.S.*, 762 F.2d 1361 (9th Cir. 1985).

Fidelity-Philadelphia is often cited for the proposition that providing another source for paying an annuity, such as a personal guarantee, causes the annuity to be respected as not constituting a retained interest in the trust. Here are the facts (footnotes omitted):

> The question before the Court is whether the proceeds of certain insurance policies on the life of the decedent, payable to named beneficiaries and irrevocably assigned by the insured, should be included in the estate of the decedent for the purposes of the federal estate tax. The facts are not in dispute. In 1934 decedent, then aged 76, purchased a series of annuity-life insurance policy

combinations. Three single-premium life insurance policies, at face value of $200,000, $100,000, and $50,000, respectively, were obtained without the requirement of a medical examination. As a condition to selling decedent each life insurance policy, the companies involved required decedent also to purchase a separate, single-premium, nonrefundable life annuity policy. The premiums for each life insurance policy and for each annuity policy were fixed at regular rates. The size of each annuity, however, was calculated so that in the event the annuitant-insured died prematurely the annuity premium, less the amount allocated to annuity payments already made, would combine with the companion life insurance premium, plus interest, to equal the amount of insurance proceeds to be paid. Each annuity policy could have been purchased without the insurance policy for the same premium charged for it under the annuity-life insurance combination.

> The decedent's children were primary beneficiaries of the insurance policies; the Fidelity-Philadelphia Trust Company, as trustee of a trust established by decedent, was named beneficiary of the interests of any of decedent's children who predeceased her. In the year of purchase, decedent assigned all rights and benefits under two of the life insurance policies to her children and under the other to the Fidelity-Philadelphia Trust Company as trustee. These rights and benefits included the rights to receive dividends, to change the beneficiaries, to surrender the policies, and to assign them. Dividends were received, but, as far as the record discloses, none of the other rights was exercised. A gift tax on these transfers was paid by the decedent in 1935.
>
> In 1938 decedent amended the above-mentioned trust so that it became irrevocable. As the Government concedes, the decedent retained no beneficial or reversionary interest in the trust.
>
> The insured died in 1946. The proceeds of the three insurance policies were not included in her estate in the estate tax return.

Here's the Court's analysis; evaluate for yourself what the case stands for (footnotes and citations omitted, except for one pivotal footnote):

> Prior to death, the decedent had divested herself of all interests in the insurance policies, including the possibility that the funds would return to her or her estate if the beneficiaries predeceased her. The assignees became the owners of the policies before her death; they had received the right to the immediate and unlimited use of the policies to the full extent of their worth. The immediate value of the policies was always substantial. In the year of assignment their total cash surrender value was over $289,000; in the year of death it was over $326,000. Under the assignment, the decedent had not become a life tenant who postpones the possession and enjoyment of the property by the remaindermen until her death…. On the contrary, the assignees held the bundle of rights, the incidents of ownership, over property from which the decedent had totally divorced herself….
>
> …. Instead of the provision taxing transfers intending to take effect in possession or enjoyment at or after the transferor's death, the provision… the Government relies on the provision taxing transfers in which the transferor has retained until death the right to income from the transferred property. However, the Government's position that the annuities were income from property which the insured transferred to her children under the life insurance policies is not well taken. To establish its contention, the Government must aggregate the premiums of the annuity policies with those of the life insurance policies and establish that the annuity payments were derived as income from the entire investment. This proposition cannot be established. Admittedly, when the policies were purchased, each life insurance-annuity combination was the product of a single, integrated transaction. However, the parties neither intended that, nor acted as if, any of the transactions would have a quality of indivisibility. Regardless of the considerations prompting the insurance companies to hedge their life insurance contracts with annuities, each time an annuity-life insurance combination was written, two items of property, an annuity policy and an insurance policy, were transferred to the purchaser. The annuity policy could have been acquired separately, and the life insurance policy could have been, and was, conveyed separately. The annuities arose from personal obligations of the insurance companies which were in no way conditioned on the continued existence of the life insurance contracts. These periodic payments would have continued unimpaired and without diminution in size throughout the life of the insured even if the life insurance policies had been extinguished.[8] Quite clearly the annuity payments

attacked a sale where all of the trust's income was required to pay interest on promissory notes issued to the decedent.[6444]

> arose solely from the annuity policies. The use and enjoyment of the annuity policies were entirely independent of the life insurance policies. Because of this independence, the Commissioner may not, by aggregating the two types of policies into one investment, conclude that by receiving the annuities, the decedent had retained income from the life insurance contracts.
>
> [8] Where a decedent, not in contemplation of death, has transferred property to another in return for a promise to make periodic payments to the transferor for his lifetime, it has been held that these payments are not income from the transferred property so as to include the property in the estate of the decedent. *E.g.*, *Estate of Sarah A. Bergan*, 1 T.C. 543, *acq.*, 1943 Cum Bull. 2; *Security Trust & Savings Bank, Trustee*, 11 B.T.A. 833; *Seymour Johnson*, 10 B.T.A. 411; *Hirsh v. United States*, 35 F.2d 982 (Ct. Cl. 1929); *cf*. *Welch v. Hall*, 134 F.2d 366. In these cases the promise is a personal obligation of the transferee, the obligation is usually not chargeable to the transferred property, and the size of the payments is not determined by the size of the actual income from the transferred property at the time the payments are made.

In *Bergan*, a 1943 case, one sister transferred assets to another in exchange for the latter's promise to support the former for the rest of her life; the Tax Court held that the sister who transferred made a gift to the extent that the value of the transferred assets exceeded the value of the support obligation, and none of the transferred assets were included in the transferor's estate.

Footnote 8 was pivotal when the Seventh Circuit reversed the Tax Court in *Estate of Becklenberg v. Commissioner*, 273 F2d 297 (7th Cir. 1959).

> We agree that decedent (under the interpretation made by the Superior Court of Cook County) retained a right to receive $10,000 annually, by way of annuity or by distribution from the Trust. Although this sum was, in fact, paid to decedent out of the income of the Trust for most years, it does not appear that the payments were restricted to income. In 1942, in settling decedent's claim for deficiencies in payments previously made to her, a portion of the corpus was distributed to decedent with approval of the Superior Court. Under the 1938 Trust, payments might be made from principal. Under the construction of the Superior Court, decedent would have had to be paid $10,000 annually, even though the Trust produced an income of less than $10,000, and it had been necessary to invade corpus. Unlike the Tax Court, we believe that the Trust had an obligation to pay decedent $10,000 annually, and that her right to receive it was not limited to the property transferred by her or the income therefrom.
>
> The Tax Court has computed the amount of the Trust assets to be includible in decedent's gross estate as though the Trust here required decedent to be paid $10,000 out of taxable income, whereas decedent could have been paid out of principal. She retained the right to receive $10,000 annually for life; she did receive $10,000 annually for life. Thus at her death, there was nothing left to be included in her gross estate.

The court then said that the case was more like *Fidelity-Philadelphia* than any case in which the decedent had retained income, citing footnote 8 from that case, concluding:

> Because of the basis on which this case has been determined, we do not reach various other questions respecting such matters as, for example, valuation of assets which decedent transferred to the Trust, or computation of the amount of corpus which would have been needed to produce an income of $10,000 annually, had decedent retained the right to receive payments of $10,000 annually, limited to income of the Trust.

[6444] TAM 9251004 involved the following facts:

> In 1980, the Donor became the income beneficiary (with general power of appointment) of a marital trust created by her spouse (the marital trust).
>
> On December 29, 1989, the Donor directed the trustee of the marital trust to distribute 480,000 shares of closely-held stock to a new trust for the benefit of her grandchildren (the trust) in exchange for 15-year interest-only notes having a face value of approximately $1.5 million. The notes were to pay 11 percent interest per year with principal payable on December 15, 2004.

Furthermore, the seller should not retain too much control over the trust. In *Bixby v. Commissioner*, 58 T.C. 757 (1972), the named settlor gave $1,000 to each trust, and the parent of the named beneficiaries sold $129,000 of closely-held stock to the trust in exchange for a private annuity with a present value equal to the value of the sold stock. The court held that

---

> Based on a returned value of $12 per share, the entire block of stock represented a transfer of $5,760,000. The value of the stock was based on the assumption that the stock would yield approximately 6.25 percent, the current dividend being paid at the time of the gift. Donor's representative characterized the Donor's action as a direction to make a sale/gift.
>
> Pursuant to the terms of the trust and the Donor's instructions, the trustee immediately allocated the stock and assigned the debt to separate trust shares for each of the Donor's 12 grandchildren as follows:
>
> (1) Approximately 23 percent of the stock (and approximately 32 percent of the debt) equally to two shares for the benefit of the two children of the Donor's Child A;
>
> (2) approximately 33 percent of the stock (and approximately 33 percent of the debt) equally to four shares for the benefit of the four children of the Donor's Child B; and
>
> (3) approximately 44 percent of the stock (and approximately 35 percent of the debt) equally to six shares for the benefit of the six children of Donor's Child C.
>
> Prior to the sale/gift, if the corporation were to continue paying a dividend of $0.75 per share with respect to the 480,000 shares of stock, the Donor would receive $360,000 in dividend income. Immediately after the sale/gift, the Donor, by reason of her income interest, became entitled to receive annual payments of $165,000.
>
> ….
>
> The entire trust corpus consists of shares of stock of Corporation. Immediately after the gift/sale, Child A held (individually or as a trustee of this and other trusts) 63.3 percent of the voting power of Corporation. Thus, Child A not only has the ability to control the dividend stream flowing to the various trust shares but is also directed to vote the stock, enter into agreements, etc., in a manner that is consistent with his own best interests (as an individual family owner) and with the best interest of the beneficiaries of the other trusts (representing family ownership of Corporation).
>
> On January 4, 1990, six days after the stock transfer, the notes were transferred to the Donor's three children in the same proportion that the debt was allocated among their children; *i.e.*, 32 percent of the notes were transferred to Child A, 33 percent of the notes were transferred to Child B, and 35 percent of the notes were transferred to Child C. Thus, each child became entitled to receive approximately one-third of the $165,000 previously payable to the surviving spouse (by way of the marital trust).

Donor died in 1992, less than three years after the notes were transferred to Donor's children. The IRS invoked Code § 2035 inclusion, claiming that the decedent transferred her alleged Code § 2036 retained interest within 3 years of death, conveniently omitting any reference to the *Becklenberg* case and other authority cited in fn. 6443:

> For purposes of section 2036 it is immaterial that a retained right is stated in terms of a contractual right or limited to a specific dollar amount so long as the retained right is a preferential right to a significant portion of the income. *Estate of C. B. Swartz*, 9 T.C. 229 (1947); *Estate of Fry*, 9 T.C. 503 (1947).
>
> As noted above, under the circumstances of this case the Donor's transfer of the closely-held stock into the trust with a retention of a priority right to a major share (if not all) of the trust income in the form of note interest payments must be considered a retention of the right to receive trust income. Because section 2036 of the Code includes the value of all property to the extent the Donor has retained an income interest therein, and because the Donor retained, at the time of the sale/gift, the right to receive the first $165,000 of trust income the value of the transferred stock would have been includible in the Donor's gross estate under section 2036 of the Code.

each seller retained so much control that they really just made a transfer in trust, with annuity payments recast as trust distributions, and was taxed under Code § 677 as the grantor:[6445]

[6445] The court relied heavily on *Samuel v. Commissioner*, 306 F.2d 682, 687 (1st Cir. 1962) (a grantor trust income tax case). Before reciting the control in the text quoted above, *Bixby* reasoned:

> The test of control that can be drawn from *Samuel* is an eminently practical one. Did the purported annuitant transfer so many incidents of ownership that it can be said that he or she no longer has effective control over the property? We believe that this test should be applied in a strict fashion in order to curb abuses in the area of private annuities. The outcome in each case will depend upon the attendant facts as viewed, we hope, in the light of reality. The fact that annuity agreements were executed is, of course, not controlling. *Harold W. Smith*, 56 T.C. 263 (1971); *Estate of Cornelia B. Schwartz*, 9 T.C. 229 (1947). Also, it should be noted that the *Samuel* test need not coincide with similar-sounding tests in other areas of the tax law where other considerations may be at work, for example, the test carefully constructed by Congress in sections 671 through 678, the test appearing under the family partnership provisions (see *Adolph K. Krause*, 57 T.C. 890 (1972), and the legislative history, regulations, and cases cited therein), and the specific tests of section 2036 (see *United States v. Byrum*, 408 U.S. 125 (1972), petition for rehearing pending; *Estate of Pamelia D. Holland*, 47 B.T.A. 807 (1942), and Supplemental Opinion, 1 T.C. 564 (1943); *Estate of William F. Hofford*, 4 T.C. 542 (1945), and Supplemental Opinion, 4 T.C. 790 (1945)).

After the text quoted in the main body of this paper, the court concluded:

> Some analogous cases in the section 2036 area are instructive. In *Estate of Pamelia D. Holland*, *supra*, the decedent and her husband sold to their children all the stock of a corporation for a nominal amount of money. At the same time it was agreed that the father was to be paid a salary of $25,000 per year for as long as he lived and if he predeceased his wife, she was to be paid the same salary for as long as she lived. The father did predecease the mother, and upon her death the Commissioner determined that the value of the stock should be included in her estate. We agreed with the Commissioner's determination. Although the payments were labeled as salary payments, were not specified as company profits or dividends on stock, and were paid pursuant to a valid contract, in essence they represented a retained income interest. In the recent case of *United States v. Byrum*, *supra*, the Supreme Court discussed *Holland* and concluded that The settlor in Holland retained a considerably greater interest than Byrum retained, including an income interest. *Holland* was also discussed, at length, in *Estate of William F. Hofford*, *supra* , a case involving very similar facts. In *Hofford* we found that the salary payments were in fact just that—salary payments. We noted, among other things, that when the recipient of the payments attempted to exercise control over the transferred property by attempting to oust his cotrustees, he failed. Suffice it to say that if the present case were a section 2036 case, we would treat it as having more in common with *Holland* than with *Byrum* or *Hofford*. Not only have petitioners retained a greater interest than did the petitioner in *Byrum*, but in contrast to the petitioner in *Hofford*, the petitioners in this case have succeeded on at least one occasion in directing the trusts.
>
> In view of our conclusion that the annual payments were not annuity payments, we find that the individual petitioners were the settlors of the Bermuda trusts. They furnished the consideration for the creation of the trusts. The named settlor was settlor in form only. *Cf. Harold W. Smith*, *supra*; *Estate of Cornelia B. Schwartz*, *supra*; *George H. Whiteley, Jr.*, 42 B.T.A. 402, *affd.* 120 F.2d 782 (C.A. 3, 1941), certiorari denied 314 U.S. 657 (1941); *Buhl v. Kavanagh*, 118 F.2d 315 (C.A. 6, 1941). Furthermore, we hold that the annual payments represent amounts distributable without the consent or approval of an adverse party under section 677(a)(1).[36] The purported annuity agreements amounted to little more than prearranged distributions. The petitioners are therefore taxable on the income of the trusts during 1961 as owners of those trusts under section 671.
>
> [36] the rule is well established that a deficiency may be approved on the basis of reasons other than those relied upon by the Commissioner or even where his reason may be incorrect. [citations omitted]

> In this case it is plain that the petitioner-"annuitants" deliberately avoided relinquishing control over the stock and its proceeds. Through the advisory committees they could continue to deal with the property as before—with a free hand. They could direct its investment; they could borrow it without payment of interest or providing security; they could use it to purchase life insurance; they could have themselves appointed as "Voting Trustees" and vote stock. It cannot be said that the advisory committees were not susceptible to the petitioners' directions because we find that they were, based on the closeness of family relations, the tendency of the trusts to act in tandem, and the solidarity of the trusts as demonstrated during the Tyer purchase transaction. Nor can petitioners rely on the fact that title to the property was technically in the name of the trustee. *Corliss v. Bowers*, 281 U.S. 376 (1930). And any suggestion that the committees and the Bermuda trustee must act perforce to benefit the named beneficiaries is undercut by the fact that the trustee is absolved of any liability and the trust income, while subject in some instances to a limited right of withdrawal, is not distributable until after the death of the petitioner for whom the trust was named. *Cf. Estate of Willard V. King*, 37 T.C. 973 (1962), an estate tax case.

A properly structured private annuity should not implicate chapter 14, with the exception of annuities paid by a trust, which may involve Code § 2702 issues.[6446] Code § 2702 applies to gifts in trust where the transferor or an applicable family member retains a qualified interest.[6447] Thus, Code § 2702 can be avoided where no gift exists (the fair market value of the property equals the actuarial value of the annuity)[6448] or where neither the transferor retains an interest in the trust after the transfer nor the transferee had an interest before the transfer.[6449]

III.B.1.g.ii. Private Annuities: Income Tax Implications

For income tax purposes, ***on or before October 18, 2006***, if the annuity is unsecured,[6450] then the transferor is treated as though the property were sold in a deferred recognition event for a term equal to the transferor's life expectancy.[6451] Each annuity payment consists of a capital component (including return of basis and capital gain) and an annuity component. An exclusion ratio determines how much of each payment is excluded from income as recovery of capital. The exclusion ratio is the transferor's investment in the contract (adjusted basis in the property) divided by the expected return from the annuity (life expectancy multiplied by annuity payments).[6452] The capital gain portion is the difference between the seller's basis in the property and the seller's expected return. The remaining amount is the annuity portion, which is

[6447] Code § 2702(a), (b).
[6448] For a sale to work as a practical matter, the trust needs to have significant other assets. Otherwise, the sale might be subject to Code § 2036 attack, because of failing the exhaustion test (fn. 6435 and accompanying text) or using all of the trust's income to pay the annuity (fn. 6439 and accompanying text).
[6449] See Letter Ruling 9253031 (1992) (Code § 2702 applied to an annuity where the taxpayer sold marketable securities to a preexisting trust in exchange for an unsecured private annuity).
[6450] If the annuity is fully secured, gain is recognized immediately (although the interest portion is deferred). GCM 39503 (1986); *Bell v. Commissioner*, 60 T.C. 472 (1973) (reviewed decision, *aff'd* per curiam 668 F.2d 448 (8th Cir. 1982)), followed by *212 Corp. v. Commissioner*, 70 T.C. 788, 802 (1978) (reviewed decision).
[6451] An installment sale has limitations on deferral, which limitations do not apply to annuities. See fn. 6423 and part III.B.1.g.ii Private Annuities: Income Tax Implications for how that appears to be changing.
[6452] Code § 72(b); Rev. Rul. 69-74.

taxed as ordinary income.[6453] Regulations govern how an annuity contract can avoid the original issue discount rules that impute interest on uneven payments; careful attention must be paid if the annuity is not a flat payment for life.[6454]

The transferee in a private annuity transaction is treated like the purchaser of an annuity, with the distinction that amounts paid in excess of the purchase price are non-deductible annuity payments, not deductible interest.[6455] The transferee's basis varies for different circumstances.[6456] For depreciation purposes during the transferor's life, the unadjusted basis is the present value of the annuity promise on the date of the agreement. For calculating tax on a disposition of the annuity property for a gain during the transferor's life, the transferee's unadjusted basis is the sum of annuity payments made plus the prospective payments owed at the date of disposition. If the sale is for a loss during the transferor's life, the transferee's unadjusted basis is the sum of the annuity payments made to the date of disposition. If the transferor outlives life expectancy—causing the transferee to pay more than the original present value of the annuity—the transferee's unadjusted basis increases accordingly. Upon the transferor's death, the transferee's unadjusted basis – for future disposition and depreciation purposes – becomes the sum of annuity payments made.

For income tax purposes, ***<u>after October 18, 2006</u>***, proposed regulations[6457] provide that the gain from the sale of property in exchange for a private annuity cannot be deferred, except as described below. First, the effective date is delayed six months if all three of the following conditions are satisfied:

(i) the issuer of the annuity contract is an individual;

(ii) the obligations under the annuity contract are not secured, either directly or indirectly; and

(iii) the property transferred in the exchange is not subsequently sold or otherwise disposed of by the transferee during the two-year period beginning on the date of the exchange.

Second, the IRS has requested suggestions on the following topics:

(i) the clarity of the proposed regulations and how they can be made easier to understand;

(ii) what guidance, if any, is needed in addition to Rev. Rul. 55–119, 1955–1 CB 352, see § 601.601(d)(2), on the treatment of the issuer of an annuity contract that is not taxed under the provisions of subchapter L of the Code;

[6453] Rev. Rul. 69-74.
[6454] Reg. § 1.1275-1(j). Reg. § 1.1275-1(j)(2) generally excludes an annuity from OID treatment if the contract provides for periodic distributions made not less frequently than annually for the life (or joint lives) of an individual (or a reasonable number of individuals) and does not contain any terms or provisions that can significantly reduce the probability that total distributions under the contract will increase commensurately with the longevity of the annuitant (or annuitants).
[6455] Rev. Rul. 55-119.
[6456] Rev. Rul. 55-119.
[6457] REG-141901-05, Exchanges of Property for an Annuity, Fed. Reg. Vol. 71, No. 201, p. 61441, proposing changes to Reg. §§ 1.72-6(e), 1.1001-1(j).

(iii) whether any changes to § 1.1011-2 (concerning a bargain sale to a charitable organization in exchange for an annuity contract), conforming those regulations to the proposed regulations, would be appropriate;

(iv) circumstances (and corresponding changes to the regulations under section 453, if any) in which it might be appropriate to treat an exchange of property for an annuity contract as an installment sale;

(v) circumstances, if any, in which the fair market value of an annuity contract for purposes of § 1.1001-1(j) should be determined other than by tables promulgated under the authority of section 7520; and

(vi) additional transactions, if any, for which the six month delayed effective date would be appropriate.

Note that the IRS still has not finalized the proposed regulations. Arguably, a taxpayer can rely on Rev. Rul. 69-74, which has not been revoked, for tax deferral. However, doing so risks retroactive application of the proposed regulations if they are ever finalized.

In a pre-2006 transaction, one taxpayer made a private annuity sale to a nongrantor trust to trigger gain, then later made the trust a grantor trust to try to avoid gain on the remaining annuity payments; the IRS said this transaction was abusive but rejected certain attacks its examiner made and asked the examiner to try to find other attacks.[6458]

III.B.1.g.iii. Private Annuities: Planning Observations

A private annuity is a good planning technique when the transferor has a shorter actual than actuarial life expectancy (yet will live beyond 18 months), the borrower has means to make payments, and the lender wants a source of retirement income. If one is concerned that the lender will live too long, the lender might contribute the SCIN to a GRAT, so that excess value goes to the lender's beneficiaries. One might consider waiting for a while before gift the SCIN to a GRAT, because such a gift might undermine the argument that the SCIN was done for investment purposes.

The trade-off is that the basis of the purchased property will be relatively small. If one is using high basis property and would like to avoid a basis step–down, then one might consider placing the asset in an entity so that the asset's basis is preserved and only the basis in the entity itself is decreased.

See parts III.B.1.g Private Annuities and III.B.1.f Self-Canceling Installment Notes.

III.B.1.h. Transfers in the Ordinary Course of Business or to Business Entities

Weller v. Commissioner, 38 T.C. 790, 805-807 (1962), held:

> Section 2512(b) of the Code provides that where property is transferred for less than an adequate and full consideration in money or money's worth, then the amount by which the value of the property transferred exceeds the consideration shall be deemed a gift. Respondent's regulations have long modified this rather ironclad approach of the Code.

[6458] CCA 200923024. An excerpt from CCA 200923024 is in fn. 6533 in part III.B.2.d.i.(a) General Concepts of the Effect of Irrevocable Grantor Trust Treatment on Federal Income Taxation.

While providing in section 25.2512-8 of the regulations that sales of property may constitute gifts for gift tax purposes to the extent the value of the property exceeds the consideration received, it is stated immediately thereafter: “However, a sale, exchange, or other transfer of property made in the ordinary course of business (a transaction which is bona fide, at arm’s length, and free from any donative intent), will be considered as made for an adequate and full consideration in money or money’s worth.” The courts have given approval to respondent’s regulations. See *Commissioner v. Wemyss*, 324 U.S. 303 (1945); *Estate of Monroe D. Anderson*, 8 T.C. 706 (1947). The parties are in accord that the question is whether this sale was a bona fide, arm’s-length sale, at a freely negotiated price, without donative intent, in the ordinary course of business.

Very briefly, the evidence indicates that after Miller sold his interest in the partnership for approximately 1½ times book value, Carl made an effort to dispose of a 25-percent interest on about the same basis for the purpose of diversifying his investments and to obtain cash for personal use. He was unsuccessful in this effort. One of the persons he offered to sell to or through was Beyer. Beyer was not in a position to buy that large an interest but did evidence an interest in acquiring a much smaller interest. Beyer offered to pay book value for the 2-percent interest and, while Carl was not happy with this price, he did agree to sell Beyer a 2-percent interest in all the Weller companies for book value in order to get cash he wanted for personal use. There is no evidence, except the discrepancy between price and stipulated value, that either party felt he was giving or receiving any more than was necessary to consummate the transaction. Both Carl and Beyer testified it was an arm’s-length transaction. Nor is there any evidence of any reason Carl would have for making a gift to Beyer. Beyer was not a natural object of Carl’s bounty. While donative intent is not a requisite for a gift for tax purposes, *Commissioner v. Wemyss*, *supra*, the absence of donative intent is specifically made relevant under the regulations to the question whether the transfer was made in the ordinary course of business, and donative intent may be considered in determining generally whether a taxable gift has been made. *Eleanor A. Bradford*, 34 T.C. 1059 (1960).

Respondent contends that Carl’s motive in selling the partnership interest to Beyer at less than its actual value was to establish a value for his and Emily’s gifts of a 34-percent interest in the partnership transferred to the trusts on the same day; and that the price was therefore not fixed in an arm’s-length business transaction. While it would appear somewhat anomalous that two knowledgeable and experienced businessmen, dealing at arm’s length, would reach a price far below fair market value for the 2-percent interest, it must be remembered that the $22,000-fair-market-value figure was stipulated long after the transaction took place, it is higher than the relative price for which Miller had recently sold his interest in the partnership, Carl had been unable to sell any part of his interest for even the Miller price in previous efforts, and the price was actually the book value of a 2-percent interest. It would also be somewhat unrealistic to believe that Carl would deliberately sell a 2-percent interest in his business to an outsider at half price in the hopes that it would fix the value of the much larger interest he was transferring to the trusts for gift tax purposes, particularly when the Miller sale of a more comparable interest had recently been consummated at a higher price and the sale price to Beyer was not specifically broken down between the various interests sold. We will not indulge in such speculation to override the affirmative evidence presented.

There is no evidence that Beyer or anyone else would have given Carl more at that time for the 2-percent interest sold. Perhaps Carl was too anxious to sell, or simply made a

> bad bargain, but if he did, such a result - if it proceeds from a genuine business transaction - does not lead to a taxable gift. See *William H. Gross*, 7 T.C. 837 (1946). More likely we merely see demonstrated herein how hypothetical may be the figure for, and how theoretical may be the concept of, "fair market value," in particular circumstances.
>
> Petitioners have demonstrated error in respondent's determination that Carl made a taxable gift to Beyer, and we hold for petitioners on this issue.

In *Estate of Edward S. Redstone v. Commissioner*, 145 T.C. 259 (2015), in which the IRS claimed that a son's transfer of stock to his children to settle a dispute with his father, the court explained:

> A transfer of property will be regarded as occurring "in the ordinary course of business" and thus will be considered to have been made "for an adequate and full consideration in money or money's worth" only if it satisfies the three elements specified in section 25.2512-8, Gift Tax Regs. To meet this standard, the transfer must have been bona fide, transacted at arm's length, and free of donative intent. In applying this regulation to settlements of family disputes, we have identified certain subsidiary factors that may also be relevant. We have considered, for example: whether a genuine controversy existed between the parties; whether the parties were represented by and acted upon the advice of counsel; whether the parties engaged in adversarial negotiations; whether the value of the property involved was substantial; whether the settlement was motivated by the parties' desire to avoid the uncertainty and expense of litigation; and whether the settlement was finalized under judicial supervision and incorporated in a judicial decree. See, *e.g.*, *Estate of Natkanski*, 64 T.C.M. (CCH) at 59; *Estate of Noland*, 47 T.C.M. (CCH) at 1644-1645.

Reg. § 25.2512-8 is reproduced in the text accompany fn 6335 in part III.B.1.b Transfers for Insufficient Consideration, Including Restructuring Businesses or Trusts.

In determining whether a dispute is bona fide, the court said:

> The requirement that the transfer be "bona fide" considers whether the parties were settling a genuine dispute as opposed to engaging in a collusive attempt to make the transaction appear to be something it was not. See *Black's Law Dictionary* 199 (9th ed. 2009) (defining "bona fide" as "made in good faith; without fraud or deceit").

For the next prong, the court held:

> The requirement that the transfer be "arm's length" is satisfied so long as the taxpayer acts "as one would act in the settlement of differences with a stranger."

Regarding being free from donative intent, the court said:

> The evidence clearly established that Edward transferred stock to his children, not because he wished to do it, but because Mickey demanded that he do it…. The transfer of stock in trust for Michael and Ruth Ann was prompted by Mickey's twin desires to ensure his grandchildren's financial security and to keep the Redstone family business within the Redstone family. At the time of the settlement, Edward had no desire to transfer stock to his children. He was forced to accept this transfer in order to placate

> Mickey, settle the family dispute, and obtain a $5 million payment for the remaining 66 2/3 shares ….
>
> We find that Edward acquiesced in the notion of an “oral trust” because he had no other alternative; this was a “deal breaker” for Mickey. There is no evidence that Edward, in making this transfer, was motivated by love and affection or other feelings that normally prompt the making of a gift.

The IRS argued that the fact that neither the donee trust nor the beneficiaries provided any consideration for the transfer meant that a gift was made to them. The court rejected that argument:

> Respondent’s argument derives no support from the text of the governing regulations. Section 25.2511-1(g)(1), Gift Tax Regs., provides unequivocally that “[t]he gift tax is not applicable to a transfer for a full and adequate consideration in money or money’s worth.” section 25.2512-8, Gift Tax Regs., provides that a “transfer of property made in the ordinary course of business *** will be considered as made for an adequate and full consideration in money or money’s worth.” section 25.2512-8, Gift Tax Regs., specifies three elements that an ordinary business transaction must meet, and we have found that Edward’s transfer met all three elements. The consequence of that determination is that “[t]he gift tax is not applicable to *** [the] transfer.” Sec. 25.2511-1(g)(1), Gift Tax Regs.

That taxpayer’s brother established similar trusts pursuant to the same general goal, only he established these trusts voluntarily, rather than being compelled to do so by litigation. In finding for the IRS, *Sumner Redstone v. Commissioner*, T.C. Memo. 2015-237 held:

> Petitioner’s transfer of stock to his children was undoubtedly prompted by the Settlement Agreement, both as to its timing and its terms, and this transfer surely pleased Mickey [the taxpayer’s father] by ensuring the financial security of his four grandchildren on equal terms. But this is not enough to make it a transaction “in the ordinary course of business.” Pleasing parents, like pleasing children, is presumptively a family motivation, and we discern no evidence tending to rebut that presumption here. There was no claim against Sumner; there were no arm’s-length negotiations; and he received no consideration from anyone in exchange for his transfer.
>
> In transferring stock to the Brent and Shari Trusts, Sumner was essentially motivated by the kinship that he had with his father and his children. Sumner was the sole trustee of both his children’s Trusts; there is no evidence that he was reluctant to effect this transfer or that it disadvantaged him from a business perspective.[6] The transfer thus bears all the indicia of donative intent toward the natural objects of his affection.
>
> [6] By contrast, Edward was clearly reluctant to transfer stock to his own children’s Trusts; for one thing, Sumner, rather than he, was the sole trustee of those Trusts. Both economic and family reasons motivated Edward to insist on securing outright ownership of (or payment for) all 100 shares that were originally registered in his name. See *Estate of Redstone*, 145 T.C. at __ (slip op. at 25 & n.5).

Intra-family sales are scrutinized, and the IRS argues that the ordinary course of business exception does not apply. This can include indirect transfers involving entities, in that an entity’s owners are considered the transferors or transferees, as the case may be. Reg § 25.2511-1(h)(1) provides:

> A transfer of property by a corporation to B is a gift to B from the stockholders of the corporation. If B himself is a stockholder, the transfer is a gift to him from the other stockholders but only to the extent it exceeds B's own interest in such amount as a shareholder. A transfer of property by B to a corporation generally represents gifts by B to the other individual shareholders of the corporation to the extent of their proportionate interests in the corporation. However, there may be an exception to this rule, such as a transfer made by an individual to a charitable, public, political or similar organization which may constitute a gift to the organization as a single entity, depending upon the facts and circumstances in the particular case.

As applied to partnerships, *see*, *e.g.*, *Shepherd v. Commissioner*, 115 T.C. 376 (reviewed decision 2000), *aff'd* 283 F.3d 1258 (11th Cir. 2002); *Senda v. Commissioner*, T.C. Memo 2004-160, *aff'd* 433 F.3d 1044 (8th Cir. 2006). *Estate of Maggos v. Commissioner*, T.C. Memo. 2000-129, held that a corporate redemption in excess of the fair market value (including valuation adjustments relating to control and marketability) was a gift. *Estate of Trenchard v. Commissioner*, T.C. Memo. 1995-121, involved corporate formation, and a merger was at issue in *Cavallaro v. Commissioner*, T.C Memo. 2019-144, on remand from 842 F.3d 16 (1st Cir. 2016), *aff'g in part and rev'g in part* T.C. Memo. 2014-189. *Tilton v. Commissioner*, 88 T.C. 590 (1987), held that a gift to a corporation was a gift to its shareholders but that, as ***indirect*** donees, the shareholders had no transferee liability under Code § 6324(b) under those particular facts; as to the latter, the Tax Court reasoned:

> We have been unable to locate, and respondent has not cited, any case in which a shareholder of a corporation was charged with donee-transferee liability for gift taxes payable on a nonshareholder's transfer to the corporation.[7] Even assuming, without deciding, that an indirect donee-shareholder under section 2511(a) may be charged with transferee liability as a result of a gratuitous transfer to a corporation by a nonshareholder, however, we hold for petitioners on this issue.
>
> [7] In the trust area, the courts have addressed the transferee liability of trust beneficiaries as indirect donees where gratuitous transfers were made to the trusts by nonbeneficiaries. Transferee gift tax liability has been upheld in one case where the trust estate was found to be the transferee, as such, even though the beneficiaries were indirect donees under the predecessor of sec. 2511(a). *Fidelity Trust Co. v. Commissioner*, 141 F.2d 54, 57 (3d Cir. 1944), *affg*. an order of this Court. In another case, the beneficiary was found to be the transferee but the beneficiary's obligation was found to have been assumed by the trustee under the predecessor of sec. 6903. *Fletcher Trust Co. v. Commissioner*, 141 F.2d 36, 40-41 (7th Cir. 1944), *affg*. 1 T.C. 798 (1943). See also *Want v. Commissioner*, 280 F.2d 777, 782 (2d Cir. 1960), *revg. on other grounds* 29 T.C. 1223 (1958). A gift to a trust differs from a nonshareholder's gift to a corporation in that the trustee, not the beneficiary, controls the trust estate whereas the donee-shareholders may (and in this case did) control the corporation, and no statute comparable to sec. 6903 applies with respect to corporations.
>
> Where transferee liability is determined against an indirect donee, the second sentence of section 6324(b) must be applied with caution. That sentence does not flatly make the donee-transferee liable for the tax. Rather, it carefully limits such liability to the extent of the value of the gift, and this means "the liability is limited to the value of the gift to the particular donee sought to be charged." *Want v. Commissioner*, 280 F.2d 777, 781 (2d Cir. 1960), *revg. on other grounds* 29 T.C. 1223 (1957); *La Fortune v.*

Commissioner, 263 F.2d 186, 194 (10th Cir. 1958), *affg*. 29 T.C. 479 (1958); Baur v. Commissioner, 145 F.2d 338, 339 (3d Cir. 1944), *affg*. 2 T.C. 1016 (1943).[8] In the case of a gift to a small solvent family corporation, as in the *Kincaid* and *Heringer* cases, the increased value of the corporation's assets attributable to the transfer would usually cause a proportionate increase in the value of the corporation's stock. That may not be true, however, in the case of an insolvent or nearly insolvent corporation.

[8] This limitation under sec. 6324(b) is consistent with the general rule limiting transferee liability to the value of the property received by the transferee. *Phillips v. Commissioner*, 283 U.S. 589 (1931); *United States v. Fernon*, 640 F.2d 609, 611 (5th Cir. 1981); *Nader v. Commissioner*, 323 F.2d 139, 140 (7th Cir. 1963), *affg*. a Memorandum Opinion of this Court.

The burden of proving transferee liability, including the value of the gift to the donee-transferee, rests with respondent. Sec. 6902(a); see also, *e.g.*, *Ashton v. Commissioner*, 28 B.T.A. 582, 584-585 (1933); *Vogelstein v. Commissioner*, 16 B.T.A. 947, 949 (1929). Because section 6324(b) limits donee-transferee liability to the value of the gift to the particular donee, respondent has the burden of proving the amount of the increase, if any, in the value of the Circle Bar stock owned by Daniel and David attributable to the transfer and he has not carried that burden.

The trial record before us contains no complete or precise information on the assets or liabilities of Circle Bar or opinion evidence on the valuation of the stock before or after the April 4, 1978, transfer. If Circle Bar's stock had a zero value both before and after the transfer, there was no enhancement in the value of the stock in the hands of Daniel and David that would support the imposition of donee-transferee liability for the gift tax on them under section 6324(b). The evidence bearing on the subject indicates that Circle Bar was on the edge of bankruptcy before the transfer and that it probably remained insolvent after the transfer.

Rev. Rul. 71-443 reasoned and held:

Although a gift to a corporation is a gift to the stockholders, the corporation acquires title to the transferred property. Shareholders of the corporation do not have any present or immediate right to use, possess, or enjoy the donated property or the income from the property. This they can do only upon liquidation of the corporation or declaration of dividends the first of which usually requires approval by the owners of a majority of the stock and both of which usually require approval by a majority of the corporation's directors. *Ballantine on Corporations* (Rev. 1946), sec. 239, at 562; secs. 301-302, at 709-711.

Accordingly, since in this case each stockholder-donee's use, possession, or enjoyment of the gift property or its proceeds are dependent upon contingencies beyond his individual control, the gifts are gifts of future interests. See *Irwin S. Chanin v. United States*, 393 F.2d 972, at 976 (1968). Therefore, it is held that the gifts do not qualify for the $3,000 per-donee annual exclusion provided by section 2503(b) of the Code.

With respect to the question involving the marital deduction, the transfer of property to the corporation represents a gift to the donor's wife to the extent of her proportionate interest in the corporation, or 46 percent. See section 25.2511-1(h)(1) of the regulations. Since no part of the share of the property transferred to her would pass to any other person for less than full and adequate consideration in money or money's worth, it would not be a terminable interest as defined in section 25.2523(b)-1 of the regulations.

Accordingly, it is held that the portion of the transfer to the corporation that is equal to the wife's proportionate interest in the corporation represents a gift to the wife that qualifies for the marital deduction under section 2523(a) of the Code.

For whether an interest in any other business entity qualifies for the annual exclusion, see *Hackl v. Commissioner*, 118 T.C. 279 (2002), *aff'd* 335 F.3d 664 (7th Cir. 2003), and its progeny, including *Price v. Commissioner*, T.C. Memo. 2010-2; *Fisher v. U.S.*, 105 A.F.T.R.2d 2010-1347 (D. Ind 2010); *Estate of Wimmer v. Commissioner*, T.C. Memo. 2012-157; *Estate of Purdue v. Commissioner*, T.C. Memo. 2015-249 (annual exclusion upheld because LLC's assets produced income).

III.B.1.i. Transfers with Contingencies Based on Acts of Independent Significance

Sometimes an action has important nontax consequences that are considered to dwarf their tax consequences to such an extent that the action's effect on property rights do not have transfer tax consequences. This may help avoid inclusion described in part III.D Code § 2038.

Such an act of independent significance includes:

- Adoption. A trust provision automatically including the settlor's after-born and after-adopted children as beneficiaries is not equivalent to the settlor's retention of a power to designate or change beneficial interests within the meaning of Code § § 2036(a) and 2038.[6459]

- Divorce. "The act of divorcing one's spouse is an act of independent significance, the incidental and collateral consequences of which is to terminate the spouse's interest in the trust. Thus, we do not believe the decedent possessed an "incident of ownership" in the insurance policy as a result of the trust provision which would terminate the interest of the decedent's spouse in the event of a divorce."[6460] If B has a power to terminate a trust and receive all of the trust assets if A and B divorce or are legally separated and they never do, B's termination power will not constitute a general power of appointment in the existence of decedent's death that would cause the value of the Spousal Trust to be included in B's gross estate.[6461]

- Termination of Employment. "An insured's power to cancel his insurance coverage by terminating his employment is a collateral consequence of the power that every employee has to terminate his employment" that does not constitute an incident of ownership under Code § 2042.[6462] "If a decedent transferred all the incidents of ownership in a noncontributory group-term life insurance policy on the decedent's life, but retained the right to convert the policy to an individual policy should the decedent's employment be terminated, the proceeds are not includible in the decedent's gross estate" under

---

[6459] Rev. Rul. 80-255.
[6460] Letter Ruling 8819001.
[6461] Letter Ruling 9141027, viewing the contingency of divorce or separation as an act of independent significance and citing *Estate of Tully v. United States*, 528 F.2d 1401 (Ct. Cl. 1976) (see fn. 4310 in part II.Q.4.a Funding the Buy-Sell), and Rev. Rul. 80-255, the latter cited in fn. 6459.
[6462] Rev. Rul. 72-307.

Code § 2042(2).[6463] See part III.B.1.a.v Sending Business or Performing Services. Various buy-sell provisions may also constitute acts of independent significance.[6464]

- Death Benefits Decedent Did Not Control. Survivors' loss benefits, payable under a no-fault automobile insurance policy, are not includible in the decedent's gross estate.[6465]

- Terminate Enrollment in College. The contingency that a person terminate enrollment in college is an act of independent significance for certain gift tax purposes.[6466]

[6463] Rev. Rul. 84-130, stating:

> The Service acquiesces in the result in the decision in *Estate of Smead v. Commissioner*, 78 T.C. 43 (1982), which held that a retained conversion privilege exercisable only on termination of employment was not an incident of ownership. See page 2, this Bulletin.

TAM 9349002 purported to limit the scope of Rev. Rul. 84-130; see part II.Q.4.i.ii Summary of Estate Tax Rules Governing Life Insurance Payable to a Business Entity.

[6464] See fn. 4310 in part II.Q.4.a Funding the Buy-Sell.

[6465] Rev. Rul. 82-5, reasoning:

> The decedent was required to obtain the coverage by the state's no-fault automobile insurance statute and had no choice as to the persons entitled to receive survivors' loss benefits or the amount of the benefits. The right to survivors' loss benefits was created by statute for the benefit of a decedent's dependents and is designed to compensate for amounts that they would have received from the decedent had the decedent lived. Since the loss for which the benefits are designed to compensate for did not accrue until after the decedent died, the right of the decedent's spouse to the benefits also did not arise until after the decedent died. Thus, the decedent had no interest in the survivors' loss benefits at the date of death and the benefits are not includible under section 2033 of the Code. See Rev. Rul. 56-637, 1956-2 C.B. 600, which holds that workmen's compensation benefits payable to the dependents of a deceased employee are not includible in the deceased's gross estate for federal estate tax purposes; Rev. Rul. 67-277, 1967-2 C.B. 322, which holds that the lump sum payable under section 402(i) of title 42 of the United States Code (the Social Security Act) to the widow or widower of the deceased is not includible in the decedent's gross estate for federal estate tax purposes; and Rev. Rul. 54-19, 1954-1 C.B. 179, which holds that amounts receivable in settlement of claims under the New Jersey "Death of Wrongful Act" statute are not includible in the decedent's gross estate. Furthermore, the Service does not consider the survivor's loss benefits to be includible in the decedent's gross estate under section 2042 of the Code. While the Service takes no position on whether the survivor's loss benefits are classifiable as life insurance proceeds, nonetheless, the proceeds would not be includible in the decedent's gross estate because the decedent did not possess any incidents of ownership. Neither the power to cancel the policy and relinquish the motor vehicle registration nor the power to substitute a policy with identical survivor's benefits constitutes an incident of ownership within the meaning of section 2042. See Rev. Rul. 72-307, 1972-1 C.B. 307; *Jordahl v. Commissioner*, 65 T.C. 92 (1975), *acq.* 1977-1 C.B. 1.

[6466] Rev. Rul. 75-415 reasoned:

> The only way C can immediately obtain the use, possession, or enjoyment of a proportionate share of the income interest is to terminate enrollment as a full-time student in an institution of higher learning. Although C's action will result in the enjoyment of the income interest, such action is merely a collateral consequence of a power that every student has to drop out of school. C's termination of enrollment does not directly affect the trust and, therefore, is a barrier to the present enjoyment of the income interest.
>
> Accordingly, the gift tax exclusion authorized by section 2503(b) of the Code for gifts of present interests is not allowable with respect to a donee's right to receive one-third of the income from property for a term of years if enjoyment is to commence at the earlier of the expiration of three years from the date of gift or termination of enrollment as a full-time student in an institution of higher learning.

The “event or contingency must not be illusory and must have some significant non-tax consequence independent of the decedent’s ability to exercise the power.”[6467]

[6467] Holding that the ministerial requirement that one actually withdrawal right in a particular sequence was not enough to prevent it from constituting a general power of appointment under Code § 2041, *Kurz v. Commissioner*, 101 T.C. 44, 59-61 (1993), *aff’d* 68 F3d 1027 (7th Cir. 1995), made the statement quoted in the text above and further reasoned:

> The legislative history, however, clearly indicates that all property of which the decedent on the date of his death had practical, if not technical, ownership is to be included in his estate. We think any illusory or sham restriction placed on a power of appointment should be ignored. An event or condition that has no significant non-tax consequence independent of a decedent’s power to appoint the property for his own benefit is illusory. For example, for purposes of section 2038, a power is disregarded if it becomes operational as a mere by-product of an event, the non-tax consequences of which greatly overshadow its significance for tax purposes. See Bittker & Lokken, *Federal Taxation of Income, Estates and Gifts*, par. 126.5.4, at 126-64 (2d ed. 1984). If the power involves acts of “independent significance”, whose effect on the trust is “incidental and collateral”, such acts are also deemed to be beyond the decedent’s control. See Rev. Rul. 80-255, 1980-2 C.B. 272 (power to bear or adopt children involves act of “independent significance”, whose effect on a trust that included after-born and after-adopted children was “incidental and collateral”); see also *Estate of Tully v. United States*, 208 Ct. Cl. 596, 528 F.2d 1401, 1406 (1976) (“In reality, a man might divorce his wife, but to assume that he would fight through an entire divorce process merely to alter employee death benefits approaches the absurd.”). Thus, if a power is contingent upon an event of substantial independent consequence that the decedent could, but did not, bring about, the event is deemed to be beyond the decedent’s control for purposes of section 2038.
>
> We do not think that, where the general power of appointment is the right to withdraw principal from a trust, Congress intended that application of section 2041(a)(2) could be avoided by stacking or ordering the withdrawal powers; *i.e.*, exercising the power to withdraw a certain number of dollars before the power to withdraw the next portion comes into operation. A condition that has no significant non-tax consequence independent of a decedent’s power to appoint the property for her own benefit does not prevent practical ownership; it is illusory and should be ignored. We conclude that for purposes of section 2041, although the condition does not have to be beyond the decedent’s control, it must have some significant non-tax consequence independent of the decedent’s power to appoint the property. Petitioner has not demonstrated that withdrawing principal from the Marital Trust Fund has any significant non-tax consequence independent of decedent’s power to withdraw principal from the Family Trust Fund. Such condition is illusory and, thus, is not an event or a contingency contemplated by the section 20.2041-3(b), Estate Tax Regs.
>
> We hold that, if by its terms a general power of appointment is exercisable only upon the occurrence during the decedent’s lifetime of an event or contingency that has no significant non-tax consequence independent of the decedent’s ability to exercise the power, the power exists on the date of decedent’s death, regardless of whether the event or contingency did in fact occur during such time. Because petitioner has failed to demonstrate any significant non-tax consequence independent of decedent’s right to withdraw principal from the Family Trust Fund, we hold that, on the date of her death, decedent had a general power of appointment over 5 percent of the Family Trust Fund that causes that portion to be includable in her estate under section 2041.
>
> Decedent’s power of appointment over 5 percent of the Family Trust Fund was in existence on the date of her death regardless of the fact that the principal of the Marital Trust Fund had not been completely exhausted by that date. Hence, 5 percent of the Family Trust Fund was includable in her gross estate.

III.B.1.j. Transfer of Stock

Reg. § 25.2511-2(h) provides:

> If a donor delivers a properly indorsed stock certificate to the donee or the donee's agent, the gift is completed for gift tax purposes on the date of delivery. If the donor delivers the certificate to his bank or broker as his agent, or to the issuing corporation or its transfer agent, for transfer into the name of the donee, the gift is completed on the date the stock is transferred on the books of the corporation.

III.B.2. Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust

The grantor establishes an irrevocable trust that is excluded from the grantor's estate for estate tax purposes but treated as owned by the grantor for income tax purposes. See part III.B.2.h How to Make a Trust a Grantor Trust Taxed to a U.S. Citizen or Resident, especially part III.B.2.h.iii Swap Power.

Being treated as the owner means that (among other things):

- The grantor reports all of the trust's taxable items on the grantor's income tax return. In other words, the trust grows free from income (including capital gain) tax, and the grantor's taxable estate decreases because the grantor is paying taxes on the trust's income.

- The grantor may enter into transactions with the trust that are ignored for income tax purposes. When the grantor sells an interest in an entity taxed as a partnership or as an S corporation in exchange for a note:

  - The entity makes distributions to its owners to pay their income tax on their distributive share of the entity's income ("tax distributions");

  - Because the trust does not pay income tax, it uses its tax distributions to repay the note; and

  - The grantor uses the note payments to pay income taxes; thus, rather than restoring the grantor's estate for the value of the sold business interest, the note payments go straight to the taxing authorities, making the note essentially be a disappearing asset.

To drill deeper into this sale idea, see part III.B.2.b General Description of GRAT vs. Sale to Irrevocable Grantor Trust.

For more details on the effect of grantor trust treatment, see part III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment.

III.B.2.a. Tax Basis Issues When Using Irrevocable Grantor Trusts

Whenever using irrevocable grantor trusts, consider that, as discussed below, the assets the trust holds will not get a basis step-up at death. Consider recommending that clients or their income tax preparers monitor the relationship between value and basis. If value becomes significantly larger than basis for one or more assets, consider having the trust sell those to the grantor in exchange for cash or another high basis asset.

See part II.H Income Tax vs. Estate and Gift Tax (Particularly for Depreciable Property), especially part II.H.5 Irrevocable Trust Planning and Basis Issues. These issues are especially pronounced for buildings, which, in addition to any increase in value, experiencing an ongoing loss of basis through annual depreciation deductions; any basis step-up can generate future depreciation deductions as well, making part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion be particularly attractive.

If grantor trust status terminates, generally the grantor is deemed to have sold to the trust the assets the grantor had been deemed to own immediately before the sale in exchange for whatever the principal balance is of any notes payable to the grantor and any liabilities of which the grantor has been deemed relieved.[6468]

The trust's basis in the assets is the sum of:[6469]

(1) Whichever of the following is the greater:

(i) The amount paid by the transferee for the property, or

(ii) The transferor's adjusted basis for the property at the time of the transfer, and

(2) The amount of increase, if any, in basis authorized by section 1015(d) for gift tax paid (see § 1.1015-5).

Rev. Rul. 2023-2 posits the issue, "Is there a basis adjustment under § 1014 of the Internal Revenue Code (Code) to the assets of a trust on the death of the individual who is the owner of the trust under chapter 1 of the Code (chapter 1) if the trust assets are not includible in the owner's gross estate pursuant to chapter 11 of the Code (chapter 11)?" Rev. Rul. 2023-2 analyzed and concluded:

> **Analysis**
>
> For property to receive a basis adjustment under § 1014(a), the property must be acquired or passed from a decedent. For property to be acquired or passed from a decedent for purposes of § 1014(a), it must fall within one of the seven types of property listed in § 1014(b). Asset does not fall within any of the seven types of property listed in § 1014(b).
>
> First, upon A's death, Asset was not "bequeathed," "devised," or "inherited" within the meaning of § 1014(b)(1). A "bequest" is the act of giving property (usually personal property or money) by will. Black's Law Dictionary (11th ed. 2019). The Supreme Court defined "bequest" as a "gift of personal property by will" for purposes of the predecessor provision of § 102 that, as today, excluded gifts, bequests, devises, or inheritance from gross income for income tax purposes. *United States v. Merriam*, 263 U.S. 179, 184 (1923).
>
> A "devise" is the act of giving property, especially real property, by will. Black's Law Dictionary (11th ed. 2019). Volume 97 of the Corpus Juris Secundum notes that although "bequest" and "bequeath" strictly refer to a gift by will of personal property, the

[6468] See fn. 6591.

[6469] Reg. § 1.1015-4(a), which applies to noncharitable bargain sales.

words may be given a broader meaning to include real property which, under the narrower definition, would be a devise. See 97 C.J.S. Wills § 1861 (2022).

An “inheritance” is property received from an ancestor under the laws of intestacy or property that a person receives by bequest or devise. Black’s Law Dictionary (11th ed. 2019).

In *Bacciocco v. United States*, 286 F.2d 551, 554-55 (6th Cir. 1961), the court found that property transferred in trust prior to the decedent’s death is not bequeathed or inherited because it did not pass either by will or intestacy. The court stated, “[w]e construe those terms [bequest and inheritance] according to their usual and normal meaning” and noted that the decedent’s death did not transfer the assets to the trust. Id. at 554-56. This does not imply that property in a trust could never fall within the meaning of § 1014 (such as property included in the decedent’s gross estate or property specifically described by §§ 1014(b)(2), (3), or (4)); however, in the facts outlined above, the trust property does not fall within the meaning of those terms.

The Congressional committee report explaining the basis of property acquired from a decedent for purposes of § 1014(b) (then designated § 113(a)(5) of the 1939 Code) stated that the provision “applies basically to property in the decedent’s probate estate and includible in his gross estate under § 811(a) [the predecessor provision of § 2031(a)]. In addition, it applies to property acquired by certain specifically described methods of disposition which are treated as though the acquisition was by bequest, devise, or inheritance.” H.R. Rep. No 83-1337 at 4407-08 (March 9, 1954). Citing that report, the court in *Collins v. United States*, 318 F. Supp. 382, 386 (C.D. Cal. 1970) stated, “[i]t seems clear that property cannot be said to come from a decedent by ‘bequest, devise, or inheritance’ unless it is part of the decedent’s probate estate under the laws of the state of his domicile.” The court determined that payments made to a widow by her deceased husband’s employers, under contracts negotiated by her husband, did not pass from the decedent under § 1014 and so would not acquire a basis determined by the contract’s FMV at the decedent’s death but instead were income with respect to a decedent that would not receive a basis adjusted to date of death value.

Second, Asset does not fall within any of the remaining types of property listed in § 1014(b). Asset is not described in § § 1014(b)(2), (3), or (4) because A did not retain a power to revoke or amend T or hold a power to appoint Asset. Asset also is not described by § 1014(b)(6) because it is not community property. Finally, Asset is not described by § § 1014(b)(9) or (10) because it is not included in A’s gross estate under the provisions of chapter 11. Because at A’s death Asset does not fall within any of the seven types of property listed in § 1014(b), Asset does not receive a basis adjustment under § 1014(a) at A’s death.

Holding

A creates T, an irrevocable trust, retaining a power which causes A to be the owner of the entire trust for income tax purposes under chapter 1 but does not cause the trust assets to be included in A’s gross estate for purposes of chapter 11. If A funds T with Asset in a transaction that is a completed gift for gift tax purposes, the basis of Asset is not adjusted to its fair market value on the date of A’s death under § 1014 because Asset was not acquired or passed from a decedent as defined in § 1014(b). Accordingly, under this revenue ruling's facts, the basis of Asset immediately after A's death is the same as the basis of Asset immediately prior to A's death.

III.B.2.b. General Description of GRAT vs. Sale to Irrevocable Grantor Trust

For a company whose value is so high that its stock cannot be transferred merely by annual exclusion gifting, we often transfer S stock to irrevocable grantor trusts – trusts whose assets are, or will be later, excluded from the grantor's estate, but whose income is currently taxable to the grantor. Two types of transfers most commonly used are:

- Gift to Grantor Retained Annuity Trust (GRAT).[6470] The grantor gives property (nonvoting stock)[6471] to the trust and receives an annuity for a fixed term of years in exchange for the transfer of property. Usually, the annuity is expressed as a specific percentage of the initial value of the trust's assets.[6472] This initial value is the value determined for federal tax purposes,[6473] and adjustments to payments are required if the initial value is incorrectly determined.[6474] The amount of the gift is the excess of the gifted property's value over the present value of the retained annuity, determined using Code § 7520 interest rates.[6475] If the IRS increases the initial value, the annuity also increases, allowing the grantor to report a gift that is either zero or close to zero. GRATs have become more popular since a 2000 court decision on valuing retained annuities.[6476]

- Sale to Irrevocable Grantor Trust. The grantor makes a gift[6477] to an irrevocable grantor trust equal to at least one-ninth of the value of the property the grantor is going to sell.[6478] The grantor sells property (nonvoting stock) to the trust and receives a promissory note.[6479] While the trust is a grantor trust, income tax does not apply to the sale.[6480]

[6470] 9This is just a summary of certain features of a GRAT that help determine its financial success. The technical requirements are beyond this article's scope. If a GRAT fails to meet the terms required by the statute or regulations, consider a reformation, as occurred in fn. 6352.
[6471] See part II.A.2.i.i.(b) Why Nonvoting Shares Are Needed for Estate Planning.
[6472] Code § 2702(b)(2).
[6473] Reg. § 25.2702-3(b)(1)(ii)(B).
[6474] Reg. § 25.2702-3(b)(2).
[6475] Code § 2702(a)(2)(B).
[6476] Reg. § 25.2702-2(a)(5), giving credit for an annuity payable to an estate, amended in response to *Walton v. Commissioner*, 115 T.C. 589 (2000), *acq*. IRS Notice 2003-72.
[6477] Arguably the trust should not grant withdrawal rights (*Crummey* rights) to the beneficiaries. The argument is that Code § 678(b) provides that a grantor's rights to income supersede a beneficiary's right to income for grantor trust purposes, but do a grantor's rights to income supersede a beneficiary's right to principal for grantor trust purposes? Letter Rulings 200603040 and 200606006 and numerous rulings before and after those rulings have read Code § 678(b) in the context of taxable income, rather than fiduciary accounting income, so including *Crummey* rights should be OK.
[6478] *Estate of Petter v. Commissioner*, T.C. Memo. 2009-280, approved a gift of LLC interests followed by a sale for promissory notes three days later using this structure.
[6479]If somehow the IRS successfully recharacterizes the note described below as equity, then the Code § 2701 rules come into play. Code § 2701 assigns at least a 10% minimum value to the junior equity, which would be represented by the initial gift to the trust. For example, if the property to be sold is worth $9M, then the gift would be $1M, so that the junior equity would be worth 10% ($1M divided by the $10M total in the trust). This 1/9 funding also provides more substance to the trust. Finally, the trust should make all interest payments on time, and the 1/9 funding provides funding in case corporate cash flow to the shareholders is insufficient (due to a temporary downturn in business, for example).
[6480] Rev. Rul. 85-13.

The gift to a GRAT is safer than a sale to an irrevocable grantor trust, in that the grantor can ensure that the gift is close to zero, even if the IRS tries to adjust the property's value; I often use formula sales to mitigate the risk of a sale to an irrevocable grantor trust, but formula sales remain a point of contention.[6481] A sale to an irrevocable grantor trust triggers income tax if the grantor trust powers are turned off;[6482] to the extent that the note's principal exceeds the basis of the trust's assets, a bargain sale is likely to have occurred.[6483] It also does not require an up-front gift, which can cause complexity when the grantor tries to sell stock to an irrevocable grantor trust and does not have enough gift tax exemption available to provide sufficient funding.[6484] Finally, GRATs have a 105-day grace period in the event of a late payment.[6485]

As to deviations from the payment schedule, Reg. § 25.2702-3(d)(5), "Commutation," provides:

> The governing instrument must prohibit commutation (prepayment) of the interest of the holder.

The preamble in T.D. 8395 (2/4/1992) explains:

> Commentators suggested that commutation of qualified interests be permitted. This change is not made. Commutation (*i.e.*, the prepayment of the term holder's interest) shifts the risk of a decline in interest rates from the remainder beneficiaries to the term holder. Therefore, a commuted term interest may not ultimately yield the same value to the term holder as the annuity or unitrust interest originally retained by the transferor. Congress intended in enacting section 2702, that a term interest would be valued at an amount greater than zero, only if the form of the term interest insures that the holder actually receives the value attributed to the interest. Allowing commutation would be inconsistent with this intent.

A word about zero gifts: don't do them. To avoid income tax on the annuity payment (GRAT) or on the sale and note payments (sale to irrevocable trust), the taxpayer needs to establish that the trust is a grantor trust. See part III.B.2.h.i Who Is the Grantor. Having even a small gift should satisfy that requirement. In the grand scheme of things, having a $100 or $1,000 taxable gift isn't going to make a material difference in the taxpayer's estate/gift tax exclusion amount.

[6481] Formula sales are described in part III.B.3 Defined Value Clauses in Sale or Gift Agreements or in Disclaimers.

[6482] The sale might qualify for installment sale treatment; see Code §§ 453, 453A. Note that the transfer of an installment obligation upon termination of a trust accelerates remaining gain. See part II.G.15 Limitations on the Use of Installment Sales.
Letter Ruling 200722027 asserted that:

- A partnership interest does not qualify for installment sale treatment to the extent that it represents income attributable to Code § 751(c)(2) unrealized receivables for payment for services rendered.
- The seller may report the balance of the income realized from the sale of the partnership interest using the installment method of reporting.

[6483] See fn. 6591, found in part III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment.

[6484] Loan guarantees are commonly used to shore up trusts that are thinly funded; see fn. 6489 regarding thinly funded trusts. For tax consequences of loan guarantees, see part III.B.1.a.ii Loan Guarantees. Although I believe that paying a reasonable guarantee fee is not required to avoid a gift (with which not everyone agrees), it may be helpful to provide a nontax reason why the guarantor provided the guarantee. See part III.B.2.i.vi Funding the Trust with Small Gifts. The guarantee fee would be income to the guarantor but not deductible, the latter result because the sale does not exist for income tax purposes. As a practical matter, the appraiser valuing the business should also be able to recommend a guarantee fee.

[6485] Reg. § 25.2702-3(b)(4).

For a sale to an irrevocable grantor trust, if the taxpayer has not opened a bank account before the sale, see whether the trust might have provided for nominal consideration and whether the trustee might have that cash in hand without having opened a bank account. I prefer, however, that, for a sale to an irrevocable grantor trust, the funding be more substantial than that, if possible, as mentioned above. However, if no initial gift actually occurred, the desired income tax effect is still attainable: Part III.B.2.h.i Who Is the Grantor explains that, absent a an actual gratuitous transfer, the nominal settlor is treated as the grantor under the grantor trust rules.

CCA 202152018 took a hard line against a taxpayer who obtained an appraisal that intentionally omitted material facts:

> …. Under the fair market value standard as articulated in § 25.2512-1, the hypothetical willing buyer and willing seller, as of Date 2, would be reasonably informed during the course of negotiations over the purchase and sale of the shares and would have knowledge of all relevant facts, including the pending merger. Indeed, to ignore the facts and circumstances of the pending merger undermines the basic tenets of fair market value and yields a baseless valuation, and thereby casts more than just doubt upon the bona fides of the transfer to the GRAT.
>
> In addition, although the governing instrument of Trust appears to meet the requirements in § 2702 and the corresponding regulations, intentionally basing the fixed amount required by § 2702(b)(1) and § 25.2702-3(b)(1)(i) on an undervalued appraisal causes the retained interest to fail to function exclusively as a qualified interest from the creation of the trust. The trustee's failure to satisfy the "fixed amount" requirement under § 2702 and § 25.2702-3(b)(1)(ii)(B) is an operational failure because the trustee paid an amount that had no relation to the initial fair market value of the property transferred to the trust; instead, the amount was based on an outdated and misleading appraisal of Company, at a time when Company had received offers in the multi-billion dollar range. When asked about the use of the outdated appraisal, the company that conducted the appraisal stated only that business operations had not materially changed during the 6-month period. In contrast, in valuing the transfer to the charitable trust, the company that conducted the appraisal focused only on the tender offer, and accordingly gave little weight to the business operations for valuation purposes.
>
> The operational effect of deliberately using an undervalued appraisal is to artificially depress the required annual annuity. Thus, in the present case, the artificial annuity to be paid was less than 34 cents on the dollar instead of the required amount, allowing the trustee to hold back tens of millions of dollars. The cascading effect produced a windfall to the remaindermen. Accordingly, because of this operational failure, Donor did not retain a qualified annuity interest under § 2702. See *Atkinson*.

The CCA reinforces the strategy I have always used: When a client faces an impending sale to a strategic buyer, the client can still engage in estate planning transactions before the sale, so long as the client informs the appraiser of the impending sale. Modern letters of intent routinely provide that the expected sale is not legally binding until the sale documents are actually signed.[6486] After a letter of intent has been signed, the risk of not closing remains substantial, and an informed appraiser will tend to provide only perhaps a 50% chance of not closing as due diligence proceeds, and even on the eve of the sale often a 20% chance of not closing. The

[6486] See fn 4632 in part II.Q.6 Contributing a Business Interest to Charity.

taxpayer gambles that the sale does not close and the sale price is too high, but the strategies described in this part III.B.2.b[6487] may allow the taxpayer to recover from such a failed gamble.

CCA 201939002 characterized its facts:

> Donor is a co-founder and Chairman of the Board of Corporation A, a publicly-traded corporation. On Date 1, Donor transferred Shares to Trust, a newly-formed grantor retained annuity trust with a [Redacted Text] term, with a remainder to his children. [Redacted Text] later on Date 2, after the market closed, Corporation A announced a merger with Corporation B. The merger was the culmination of [Redacted Text] negotiations with multiple parties, and then, [Redacted Text] before the Date 1 transfer, exclusive negotiations with Corporation B.
>
> On the [Redacted Text] day of trading after the merger was announced, the value of the Corporation A stock increased substantially, though less than the agreed merger price. The merger was consummated more than [Redacted Text] after Date 1.
>
> The Internal Revenue Service has reviewed the underlying transaction documents from the year preceding the merger. Such documents include the Corporation A and Corporation B exclusivity agreement, correspondence between Corporation A and Corporation B, and Board meeting minutes. The record as compiled to date supports the position that, as of Date 1, the hypothetical willing buyer of the stock could have reasonably foreseen the merger and anticipated that the price of Corporation A stock would trade at a premium.

CCA 201939002 asserted:

> The value of property for Federal transfer tax purposes is a factual inquiry wherein the trier of fact must weigh all relevant evidence and draw appropriate inferences to arrive at the property's fair market value. *Bank One Corp. v. Commissioner*, 120 T.C. 174 (2003), *rev'd on other grounds*, 458 F3d 564 (7th Cir. 2006) (citing *Commissioner v. Scottish Am. Inv. Co.*, 323 U.S. 119 (1944)). For this purpose, fair market value is the price that a hypothetical willing buyer would pay a hypothetical willing seller, neither being under any compulsion to buy or to sell, and both having reasonable knowledge of relevant facts. Treas. Reg. § 25.2512-1; Rev. Rul. 59-60, 1959-1 C.B. 237. The valuation of property is a question of fact. See *Redstone v. Commissioner*, T.C. Memo. 2015-237.
>
> The willing buyer and willing seller are hypothetical persons, rather than specific individuals or entities, and their characteristics are not necessarily the same as those of the donor and the donee. See *Estate of McCord v. Commissioner*, 120 T.C. 358 (2003), *rev'd on other grounds*, 461 F3d 614 (5th Cir. 2006); *Estate of Newhouse v. Commissioner*, 94 T.C. 193 (1990). The hypothetical willing buyer and willing seller are presumed to be dedicated to achieving the maximum economic advantage. *Newhouse*, 94 T.C. at 218.
>
> The principle that the hypothetical willing buyer and seller are presumed to have "reasonable knowledge of relevant facts" affecting the value of property at issue applies even if the relevant facts at issue were unknown to the actual owner of the property.

[6487] If one uses a sale to an irrevocable grantor trust instead of a GRAT, consider the strategies described in part III.B.3 Defined Value Clauses in Sale or Gift Agreements or in Disclaimers.

Estate of Kollsman v. Commissioner, T.C. Memo. 2017-40, appeal docketed, No. 18-70565 (9th Cir. Feb. 27, 2018). Moreover, both parties are presumed to have made a reasonable investigation of the relevant facts. *Id*. Thus, in addition to facts that are publicly available, reasonable knowledge includes those facts that a reasonable buyer or seller would uncover during the course of negotiations over the purchase price of the property. *Id*. Moreover, a hypothetical willing buyer is presumed to be "reasonably informed" and "prudent" and to have asked the hypothetical willing seller for information that is not publicly available. *Estate of Kollsman*, *supra*.

Generally, a valuation of property for Federal transfer tax purposes is made as of the valuation date without regard to events happening after that date. *Ithaca Trust Co. v. United States*, 279 U.S. 151 (1929). Subsequent events may be considered, however, if they are relevant to the question of value. *Estate of Noble v. Commissioner*, T.C. Memo. 2005-2, n.3. Federal law favors the admission of probative evidence, and the test of relevancy under the Federal Rules of Evidence is designed to achieve that end. Id. Thus, a post-valuation date event may be considered if the event was reasonably foreseeable as of the valuation date. *Trust Services of America, Inc. v. U.S.*, 885 F.2d 561, 569 (9th Cir. 1989); *Bank One Corp.*, 120 T.C. 174, 306. Furthermore, a post-valuation date event, even if unforeseeable as of the valuation date, also may be probative of the earlier valuation to the extent that it is relevant to establishing the amount that a hypothetical willing buyer would have paid a hypothetical willing seller for the subject property as of the valuation date. *See Estate of Gilford v. Commissioner*, 88 T.C. 38, 52-55 (1987).

In *Silverman v. Commissioner*, T.C. Memo. 1974-285, *aff'd*, 538 F.2d 927 (2d Cir. 1976), *cert. denied*, 431 U.S. 938 (1977), the petitioners gifted shares of preferred stock while in the process of reorganizing with the intent to go public. The Tax Court rejected the expert testimony presented by the petitioners because the expert failed to take into account the circumstances of the future public sale.

In *Ferguson v. Commissioner*, 174 F.3d 997 (9th Cir. 1999), *aff'g* 108 T.C. 244 (1997), the appellate court considered the issue of whether the Tax Court correctly held that taxpayers were liable for gain in appreciated stock under the anticipatory assignment of income doctrine. In Ferguson, taxpayers owned 18 percent of AHC and served as officers and on the board of directors. In late 1987 and early 1988, the AHC board of directors contacted and eventually authorized Goldman, Sachs & Co. to find a purchaser of AHC and to assist in the negotiations. By July 1988, Goldman, Sachs had found four prospective purchasers. Shortly thereafter, AHC entered into a merger agreement with DCI Holdings, Inc. With the taxpayers abstaining from the vote, the AHC board unanimously approved the merger agreement. On August 3, 1988, the tender offer was started. On August 15, taxpayers with the help of their broker executed a donation-in-kind record with respect to their intention to donate stock to a charity and two foundations. On September 9, 1988, the charity and the foundations tendered their stock. On September 12, 1988, the final shares were tendered and on October 14, 1988, the merger was completed. The court concluded that the transfers to charity and the foundations occurred after the shares in AHC had ripened from an interest in a viable corporation into a fixed right to receive cash and the merger was "practically certain" to go through. In particular, the court noted that "[t]he Tax Court really only needed to ascertain that as of [the valuation] date, the surrounding circumstances were sufficient to indicate that the tender offer and the merger were practically certain to proceed by the time of their actual deadlines - several days in the future." *Ferguson*, 174 F.3d at 1004.

> Consequently, the assignment of income doctrine applied and the taxpayers realized gain when the shares were disposed of by charity and the foundations.
>
> The current case shares many factual similarities with Ferguson, including the targeted search by the Board of Directors of Corporation A to find merger candidates, the exclusive negotiations with Corporation B immediately before the final agreement, the generous terms of the merger, and an agreement that was "practically certain" to go through. While the *Ferguson* opinion deals exclusively with the assignment of income doctrine, it also relies upon the proposition that the facts and circumstances surrounding a transaction are relevant to the determination that a merger is likely to go through. *See Bank One* and *Kollsman*, *supra*. The current case presents an analogous issue, that is, whether the fair market value of the stock should take into consideration the likelihood of the merger as of the Date 1 transfer of Shares to Trust. The *Ferguson* and *Silverman* opinions, as considered by the Tax Court and the Second and Ninth Circuit Courts of Appeal, support the conclusion that the value of stock in Corporation A must take into consideration the pending merger. Accordingly, a value determined on the basis of the selling price as provided under § 25.2512-2(b) does not represent the fair market value of Shares as of the valuation date; pursuant to § 25.2512-2(e), other relevant facts and elements of value must be considered in determining fair market value. Under the fair market value standard as articulated in § 25.2512-1, the hypothetical willing buyer and willing seller, as of Date 1, would be reasonably informed during the course of negotiations over the purchase and sale of Shares and would have knowledge of all relevant facts, including the pending merger. Indeed, to ignore the facts and circumstances of the pending merger would undermine the basic tenets of fair market value and yield a baseless valuation.

"Estate Planning Current Developments and Hot Topics," by Steve R. Akers, Ronald D. Aucutt, and Kerri G. Nipp of Bessemer Trust, Dallas, Texas, for ALI's Estate Planning for the Family Business Owner 2023 (10/6/2023), included item 18.b, which described the disposition of the CCA:

> The IRS eventually conceded. *Baty v. Commissioner*, Tax Court Docket No. 12216-21 (Petition filed June 23, 2021, Stipulated Decision Entered June 17, 2022).

A sale to an irrevocable grantor trust has several advantages over GRATs, if one is willing to take gift tax audit risks:

- Payments back to the grantor are lower and more flexible than in a GRAT.[6488]

[6488] A sale uses the applicable federal rate (§ 1274), and a GRAT uses the § 7520 rate, which is 120% of the annual mid-term rate (rounded to the nearest 0.2%). A sale can have interest-only payments with a balloon payment upon maturity, with optional principal prepayments. A GRAT must have relatively even payments, with any year's payment no greater than 120% of the prior year's payment. Reg. § 25.2702-3(b)(1)(ii). Thus, a GRAT requires higher payments up-front, which leaves less in the trust to grow.

- If the grantor dies during the term, the assets in the trust should not be brought back into the grantor's estate[6489] (unlike a GRAT).[6490] On the other hand, if one is using low basis assets and the grantor dies before significant estate tax savings are realized, the tax benefit of the basis step-up from the GRAT's includability might very well exceed the tax detriment of estate tax on the growth.

- Having a business interest included in one's estate (the result of dying during the GRAT's annuity term) may generate estate tax deferral under Code § 6166, whereas a promissory note is not eligible for that deferral.[6491] If losing Code § 6166 deferral is a concern, consider having the trust buy insurance in the grantor's life:

  - If the grantor dies while the note is outstanding, the trust can use the death benefit to pay down the note, providing liquidity for the grantor's estate. Also, if the trust may have relied on tax distributions from the purchased business interest to make note payments, the trust will need those tax distributions to pay its own tax after the grantor's death, so the trust may need the death benefit to replace the trust's inability to use tax distributions to pay the note. Term life insurance, with a death benefit that decreases over time, may be an appropriate tool.

[6489] If the promissory note is considered an interest in the trust and is worth less than the stock sold, the IRS might argue that the sale was not for adequate and full consideration and attempt to include the trust in the grantor's estate under Code § 2036(a)(1). The IRS' argument would be that the only source of payment was the transferred property and that the grantor retained an interest in the trust. This has been a point of contention in sales for private annuities, as described in fn. 6443, found in part III.B.1.g.i Private Annuities: Estate Planning Implications. This issue generally does not arise when selling to an individual, as shown by Rev. Rul. 77-193 (but in a more complex set of facts):

> In addition, since B's promise to pay for the timber rights is a personal obligation of B as transferee, the obligation is not chargeable to the transferred property, and the payments are wholly independent of whether or not the transferred property produces income for the transferee. Thus, no part of the transferred property is includible in the transferor's gross estate under section 2036(a)(1) of the Code. See the following footnote in *Fidelity-Philadelphia Trust Co. v. Smith*, 356 U. S. 274, 280 (1958), 1958-1 C.B. 557, 559:
>
> > Where a decedent, not in contemplation of death, has transferred property to another in return for a promise to make periodic payments to the transferor for his life-time, it has been held that these payments are not income from the transferred property so as to include the property in the estate of the decedent. *E.g.*, *Estate of Sarah A. Bergan*, 1 T.C. 543, *Acq.*, 1943 Cum. Bull. 2; *Security Trust & Savings Bank, Trustee*, 11 B.T.A. 833; *Seymour Johnson*, 10 B.T.A. 411; *Hirsh v. United States*, 1929, 35 F.2d 982, 68 Ct. Cl. 508; *cf. Welch v. Hall*, 1 Cir. 134 F.2d 366. In these cases the promise is a personal obligation of the transferee, the obligation is usually not chargeable to the transferred property, and the size of the payments is not determined by the size of the actual income from the transferred property at the time the payments are made.
>
> Accordingly, it is held that section 2036 of the Code does not apply to the transaction under which A conveyed timber rights to B for a term of years in exchange for a cash payment and promissory notes, not all of which had reached maturity at the time of A's death, and A subsequently conveyed all of his interest and estate in the land to C.

[6490] If the grantor dies while receiving payments from a GRAT, then all or part of the GRAT will be included in the grantor's estate under Code 2036(a)(1). In FSA 200036012, the IRS took the position that all of a GRAT is included under Code § 2039, but the better view is that Code § 2039 should not apply, the latter which is now confirmed by Regs. §§ 20.2036-1(c)(2), 20.2039-1(e). *Badgley v. U.S.*, 125 A.F.T.R.2d 2020-685 (9th Cir. 2020), upheld estate inclusion of a GRAT while declining to address the validity of Reg. § 20.2036-1(c)(2).

[6491] See part III.B.5.e.ii Code § 6166 Deferral.

- The grantor cannot turn off grantor trust status to the extent of the amount used to pay these premiums. See part III.B.2.h.v Life Insurance.

- The grantor can apply GST exemption up front on a highly leveraged basis (in other words, using a small amount of GST exemption relative to the property transferred to the trust); whereas, to make a GRAT exempt the grantor would apply GST exemption at the end of its term, based on the trust's asset's values at that time:[6492] But then we have uncertainty as to how much the assets were worth when GST exemption is allocated, and the GST statute of limitations runs at a much later date.[6493] And evaluating how to run the gift tax statute of limitations (if even possible) on a sale from a GST-nonexempt trust to a GST-exempt trust can be dicey.[6494]

    - If the grantor and spouse split gifts, then each may allocate GST exemption at the back end.[6495] Generally, gifts that may be included in the donor's estate should not be split, because the consenting spouse's gift tax exemption is not restored if the asset is included in the donor's estate. However, splitting GRATs that are nearly zeroed out would make any loss of gift tax exemption be nominal.

    - One might consider the remaindermen selling their interest in the GRAT to a GST-exempt trust when the GRAT is created, so that the GRAT remainder becomes GST-exempt, an approach implicitly rejected by Letter Ruling 200107015 (charitable lead annuity trust, not a GRAT). Commentators have questioned Letter Ruling 200107015,

---

[6492] Code § 2642(f); see part III.B.1.d.ii Estate Tax Inclusion Period. One should opt out of automatic allocation of GST exemption to a GRAT upon inception. Although Reg. § 26.2632-1(c)(1)(i) provides, A direct skip or an indirect skip that is subject to an estate tax inclusion period (ETIP) is deemed to have been made only at the close of the ETIP, Reg. § 26.2632-1(c)(2)(ii)(A) provides that the value of transferred property is not considered as being subject to inclusion in the gross estate of the transferor or the spouse of the transferor if the possibility that the property will be included is so remote as to be negligible. A possibility is so remote as to be negligible if it can be ascertained by actuarial standards that there is less than a 5 percent probability that the property will be included in the gross estate. A counter-argument to this is that the proceeds from annuity payments will be part of the grantor's gross estate no matter when the grantor dies; given that Reg. § 26.2632-1(c)(1)(iii) provides that an ETIP applies to the entire trust if any part of it is subject to an ETIP suggests that the less than 5% so remote as to be negligible exception will not apply to a GRAT until all of the annuity payments have been paid. Rather than choosing which argument is right, I take the easy route and opt out. Letter Ruling 201705002 allowed a donor to opt out late when she instructed the gift tax return preparer to opt out and the preparer inadvertently failed to elect out of the automatic allocation of GST exemption.

[6493] See text accompanying fn 7005 in part 0 See Sheppard, "No Notice, No Examination, No Problem: IRS Further Deprives Appraisers of Procedural Protections," *Taxation of Exempts* (WG&L) (1/2022).
Sale from One Trust to Another.

[6494] See part 0 See Sheppard, "No Notice, No Examination, No Problem: IRS Further Deprives Appraisers of Procedural Protections," *Taxation of Exempts* (WG&L) (1/2022).
Sale from One Trust to Another.

[6495] Code § 2652(a)(2); Reg. § 26.2652-1(a)(4), the latter which provides:

> *Split-gift transfers*. In the case of a transfer with respect to which the donor's spouse makes an election under section 2513 to treat the gift as made one-half by the spouse, the electing spouse is treated as the transferor of one-half of the entire value of the property transferred by the donor, regardless of the interest the electing spouse is actually deemed to have transferred under section 2513. The donor is treated as the transferor of one-half of the value of the entire property. See § 26.2632-1(c)(5) Example 3, regarding allocation of GST exemption with respect to split-gift transfers subject to an ETIP.

See also Reg. § 26.2632-1(c)(2), applying ETIP regarding the life of a spouse even if no gift splitting occurred.

some rejecting and some accepting its result as applied to GRATs;[6496] note that the trustee can make a distribution to a skip person, file the appropriate forms to run the statute of limitations (SOL) on the inclusion ratio, and resolve the issue of inclusion ratio when the SOL runs.[6497] However, also consider whether such a sale might result in the IRS arguing that the purchaser trust is included in the seller's estate if the seller is a beneficiary.[6498]

- To avoid these dicey back-end issues, some advocating terminating the GRAT outright to those children who survive and provide make-up lifetime transfers or bequests to the children of any child who predeceases the GRAT's termination. Then each generation is blessed with going through this ordeal until the wealth gets sufficiently diluted. Contrast that to perpetual GST-exempt trusts, where the children get full benefit from the wealth without having to part with any during their lives.

S corporation stock can work very well for a GRAT or sale to an irrevocable grantor trust over a 5-10 year period. Frequently, S corporation stock is valued at 4-5 times earnings, so it is easy to pay for the sale. For example, suppose an S corporation generates $200,000 of net cash flow per-year and distributes $90,000 each year to the shareholders so that they can pay their taxes. The corporation is worth $1 million (5 times earnings). In the first year, the promissory note payments from the trust to the grantor are $90,000, which the grantor uses to pay taxes as usual. The $90,000 payments are $60,000 interest (using a 6% AFR) and $30,000 principal. If the corporation distributes all of its earnings to get estate tax matters taken care of, then it distributes $200,000 in the first year, which the trust could use to pay $60,000 interest and

6496 See Harrington, Plaine & Zaritsky, ¶ 9.12[5] Assignments of Remainder Interests—Uncharted Waters (found within ¶9.12. Examples of Deferring or Minimizing the Application of the Generation-Skipping Transfer Tax), *Generation-Skipping Transfer Tax* (WG&L). But see Bramwell and Weissbart, The Dueling Transferors Problem in Generation-Skipping Transfer Taxation, *ACTEC Law Journal*, Vol. 41, No. 1 (Spring 2015) (concluding that the sale strategy does not work because the sale does not change the transferor).

6497 See part 0 See Sheppard, "No Notice, No Examination, No Problem: IRS Further Deprives Appraisers of Procedural Protections," *Taxation of Exempts* (WG&L) (1/2022).
Sale from One Trust to Another, especially the text accompanying fn. 7005.

6498 See *Estate of Magnin v. Commissioner*, 184 F.3d 1074 (9th Cir. 1999) (not included in seller's estate), *rev'g* T.C. Memo. 1996-25; *Wheeler v. United States*, 116 F.3d 749 (5th Cir. 1997) (not included in seller's estate), *rev'g* 77 A.F.T.R.2d 96-1411 (W.D. Tex. 1996); *Estate of D'Ambrosio v. Commissioner*, 101 F.3d 309 (3rd Cir. 1996) (not included in seller's estate), *rev'g* 105 TC 252 (1995), *cert. denied* 1997 WL 134397 (5/19/1997). *D'Ambrosio* distinguished *Gradow v. United States*, 11 Cl. Ct. 808 (1987), *aff'd* 897 F.2d 516 (Fed. Cir. 1990), and *Pittman v. United States*, 878 F.Supp. 833 (E.D. N.C. 1994), with the Fifth Circuit stating:

> In support of its equilibrium rule, the *Gradow* court cited precedent in the adequate and full consideration area, most notably *United States v. Allen*, 293 F.2d 916 (10th Cir.), *cert. denied*, 82 S.Ct. 378 (1961).
>
> ….
>
> The problem with the *Gradow* dicta is that, in its effort to escape the hypothetical posed by the taxpayer, it lost sight of the very principle the court was trying to apply; namely, the notion that adequate and full consideration under the exception to section 2036(a) requires only that the sale not deplete the gross estate. *Gradow* was correct in observing that it is not unreasonable to require that, at a minimum, the sale accomplish an equilibrium for estate tax purposes. *Gradow*, 11 Cl. Ct. at 813-14. Indeed, *United States v. Allen*, 293 F.2d 916, when properly construed, stands simply for that proposition.

CCM 201745012 listed other reasons why it believes that that a deathbed purchase by the grantor of a GRAT of the remainder interest for its actuarial value did not work.

$140,000 principal. In the second year, the trust could use the $200,000 distribution to pay $51,600 interest and $148,400 principal. The note could easily be paid off in 5-10 years, even if the corporation's earnings do not increase.

Thus, a sale of an interest in an entity taxed as a partnership or S corporation to an irrevocable grantor trust works especially well because the entity makes distributions to its owners to pay taxes and the trust itself does not pay taxes and can use that distribution to pay the note. Contrast that to a C corporation, where the corporation pays its own taxes and avoids paying dividends to avoid double taxation on earnings.[6499]

For hard-to-value assets, a GRAT that does not have a lot of cash flow might require payments be made in kind. The IRS might argue that the payments back to the grantor were overvalued, so that the grantor really did not receive a large enough annuity payment. To reduce this possibility, consider using do an increasing annuity with enough liquid assets to be sure to pay the first three years of payments, the GRAT borrowing from a bank to make the distributions, or using a formula distribution equal to the annuity payment.

For a sale to an irrevocable grantor trust involving an asset that does not generate much cash flow, consider how the note will be repaid; if one cannot develop a solid plan for repaying the note consider alternative strategies. Consider instead using a GRAT or sale to an irrevocable grantor trust to generate cash flow, which then might be used to buy that non-cash-flowing asset. GRATs and sales to irrevocable grantor trusts can also be used to roll out of a split-dollar arrangement, which generally require an exit strategy.[6500]

For marketable securities, consider using a rolling, asset-splitting GRAT strategy, which is as follows:[6501] The grantor divides the grantor's marketable securities portfolio into baskets that move in different directions. For the sake of developing an example, consider using four different baskets and starting with four separate two-year GRATs.[6502] Each GRAT distributes roughly half of the initial value of its assets on its first anniversary and a slightly larger one on the second anniversary on its second anniversary. If anything is left at the GRAT's termination, it might continue in an irrevocable grantor trust for the grantor's children or might be distributed to them.[6503] If a GRAT does well, the children get the excess growth; if it does not do well, the grantor absorbs the loss. If an asset hits a peak during the GRAT's term, the grantor might swap it out for a stable asset to lock in the gain. Each year, when the grantor receives roughly one-half of the initial value of the assets, the grantor places them in another GRAT. Thus, the grantor starts with four GRATs, but after the first year creates another set of four two-year GRATs. Thus, generally the grantor would have eight GRATs. Because each GRAT's funding should occur on a single day, consider using an LLC to hold a basket, so that asset transfers can be done using assignments of LLC interests instead of moving assets. Each LLC will be disregarded for income tax purposes so long as all of the owners are GRATs or other revocable or irrevocable grantor trusts owned by the same person.[6504]

[6499] For other issues comparing C corporations to pass-through entities, see part II.E.2.a Transferring the Business.
[6500] See part II.Q.4.f Split-Dollar Arrangements.
[6501] I first heard of this strategy listening to Carlyn McCaffrey lecture at Heckerling in 2001.
[6502] Ideally, one would have separate GRAT for each asset. However, the strategy needs to be practical to work. Whether one should have more or fewer baskets depends on the client's situation.
[6503] Generally my preference would be an irrevocable grantor trust, but consider GST complexity in doing this. Many permutations of back-end strategies might constitute reasonable approaches.
[6504] See fn. 330.

With either technique, if the grantor's spouse is also the parent of the grantor's descendants who are beneficiaries of the trust, the grantor might consider including the spouse as a beneficiary (sometimes known as a SLAT – spousal limited access trust). A disadvantage of this approach would be the inability to turn off the grantor trust status, in whole or in part; authorizing an independent trustee to make distributions for the spouse's welfare might ease the pain of unrelenting grantor trust status.

Finally, if the asset being transferred is an interest in a closely-held business, consider liquidity to pay estate tax. If the grantor dies during the initial GRAT term, any business interest that is included in the grantor's estate is potentially eligible for long-term estate tax deferral.[6505] If the grantor dies holding a note from a sale to an irrevocable grantor trust, the note is a passive asset for which estate tax deferral is not available. The grantor might consider term life insurance to fund any estate tax incurred on the note. The parties might also prepare in advance documents to effectuate a sale of the business asset from the irrevocable grantor trust back to the grantor in exchange for the remaining balance on the note, so that the sale back to the grantor could be effectuated on short notice if the grantor is about to die.[6506] The sale back to the grantor might not only provide a chance of estate tax deferral but also might generate a basis step-up in the reacquired assets.[6507]

III.B.2.c. Grantor Retained Income Trust (GRIT)

In a grantor retained income trust (GRIT), the grantor retains the right to income for a period of time or for life.

For income tax purposes, the grantor is the deemed owner of the trust's income. See parts III.B.2.h.viii Code § 677(a) and GRATs and III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment.
