> (ii) *Non-calendar year RPE*. For purposes of determining QBI, W-2 wages, and UBIA of qualified property, if an individual receives any of these items from an RPE with a taxable year that begins before January 1, 2018 and ends after December 31, 2017, such items are treated as having been incurred by the individual during the individual's taxable year in which or with which such RPE taxable year ends.

As to the final regulations, Reg § 1.199A-2(d), "Effective/applicability date," provides:

> (1) *General rule*. Except as provided in paragraph (d)(2) of this section, the provisions of this section apply to taxable years ending after February 8, 2019.
>
> (2) *Exceptions*.
>
> (i) *Anti-abuse rules*. The provisions of paragraph (c)(1)(iv) of this section apply to taxable years ending after December 22, 2017.
>
> (ii) *Non-calendar year RPE*. For purposes of determining QBI, W-2 wages, UBIA of qualified property, and the aggregate amount of qualified REIT dividends and

[880] Within that part, fn 834 cross-references fn 881 of this part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.
[881] Code § 199A(b)(2)(B). Reg. § 1.199A-1(d)(2)(iv) is reproduced in part II.E.1.c.v.(c) Calculation When Taxable Income Exceeds the Threshold Amount.

qualified PTP income if an individual receives any of these items from an RPE with a taxable year that begins before January 1, 2018, and ends after December 31, 2017, such items are treated as having been incurred by the individual during the individual's taxable year in which or with which such RPE taxable year ends.

The wage limitation is relaxed or does not apply if taxable income is below certain thresholds.[882] See part II.E.1.c.v.(a) Taxable Income "Threshold.

II.E.1.c.vi.(a). W-2 wages under Code § 199A

The preamble to Prop. Reg. § 1.199A-2, REG-107892-18 (8/16/2018), explains:

> **II. Proposed § 1.199A-2: Determination of W-2 wages and the UBIA of Qualified Property**
>
> As described in part I.C. of this Explanation of Provisions, if an individual's taxable income exceeds the threshold amount, Section 199A(b)(2)(B) imposes a limit on the Section 199A deduction based on the greater of either (i) the W-2 wages paid, or (ii) the W-2 wages paid and UBIA of qualified property attributable to a trade or business. This part of this Explanation of Provisions describes the rules in proposed § 1.199A-2 regarding the determination of W-2 wages and UBIA of qualified property.
>
> **A. W-2 wages attributable to a trade or business**
>
> The W-2 wage rules of proposed § 1.199A-2 generally follow the rules under former section 199. Section 199, which was repealed by the TCJA, provided for a deduction with respect to certain domestic production activities and contained a W-2 wage limitation similar to the one in Section 199A. The legislative text of the W-2 wage limitation in Section 199A is modeled on the text of former section 199, and both taxpayers and the IRS have developed experience in applying those W-2 wage rules for over a decade. The regulations under former section 199 provided rules to determine W-2 wages, which provide a useful starting point in developing the W-2 wage rules under Section 199A, including rules on the definition of W-2 wages, wages paid by persons other than the common-law employer, and methods for calculating W-2 wages.
>
> The Treasury Department and the IRS have received comments concerning whether amounts paid to workers who receive Forms W-2 from third party payors (such as professional employer organizations, certified professional employer organizations, or agents under section 3504) that pay these wages to workers on behalf of their clients and report wages on Forms W-2, with the third party payor as the employer listed in Box c of the Forms W-2, may be included in the W-2 wages of the clients of third party payors. In order for wages reported on a Form W-2 to be included in the determination of W-2 wages of a taxpayer, the Form W-2 must be for employment by the taxpayer. The regulations under former section 199, specifically § 1.199-2(a)(2), addressed this issue, providing that, since employees of the taxpayer are defined in the regulations as including only common law employees of the taxpayer and officers of a corporate taxpayer, taxpayers may take into account wages reported on Forms W-2 issued by

[882] Code § 199A(b)(3).

other parties provided that the wages reported on the Forms W-2 were paid to employees of the taxpayer for employment by the taxpayer.

Proposed § 1.199A-2(b)(2)(ii) provides a rule for wages paid by a person other than the common law employer that is substantially similar to the rule in § 1.199-2(a)(2). Specifically, the proposed regulations provide that, in determining W-2 wages, a person may take into account any W-2 wages paid by another person and reported by the other person on Forms W-2 with the other person as the employer listed in Box c of the Forms W-2, provided that the W-2 wages were paid to common law employees or officers of the person for employment by the person. In such cases, the person paying the W-2 wages and reporting the W-2 wages on Forms W-2 is precluded from taking into account such wages for purposes of determining W-2 wages with respect to that person. Persons that pay and report W-2 wages on behalf of or with respect to others can include certified professional employer organizations under section 7705, statutory employers under section 3401(d)(1), and agents under section 3504. Under this rule, persons who otherwise qualify for the deduction under Section 199A are not limited in applying the deduction merely because they use a third party payor to pay and report wages to their employees. However, with respect to individuals who taxpayers assert are their common law employees for purposes of Section 199A, taxpayers are reminded of their duty to file returns and apply the tax law on a consistent basis.

Unlike former section 199, the W-2 wage limitation in Section 199A applies separately for each trade or business. Accordingly, proposed § 1.199A-2 provides that, in the case of W-2 wages that are allocable to more than one trade or business, the portion of the W-2 wages allocable to each trade or business is determined to be in the same proportion to total W-2 wages as the deductions associated with those wages are allocated among the particular trades or businesses. Section 199A(b)(4) also requires that to be taken into account, W-2 wages must be properly allocable to QBI. W-2 wages are properly allocable to QBI if the associated wage expense is taken into account in computing QBI.

Additionally, proposed § 1.199A-2(b)(4) restates the rule of Section 199A(f)(1)(A)(iii), which provides that, in the case of a trade or business conducted by an RPE, a partner's or shareholder's allocable share of wages must be determined in the same manner as the partner's allocable share or a shareholder's pro rata share of wage expenses.

Consistent with Section 199A(b)(5) and the legislative history of the TCJA, which direct the Secretary to provide rules for applying the W-2 wage limitation in cases in which the taxpayer acquires, or disposes of, a trade or business, the major portion of a trade or business, or the major portion of a separate unit of a trade or business during the year, proposed § 1.199A-2 (b)(2)(iv)(B) provides rules that apply in the case of an acquisition or disposition of a trade or business. See Joint Explanatory Statement of the Committee of Conference, 38. Specifically, proposed § 1.199A-2(b)(2)(iv)(B)(1) provides that, in the case of an acquisition or disposition of a trade or business, the major portion of a trade or business, or the major portion of a separate unit of a trade or business that causes more than one individual or entity to be an employer of the employees of the acquired or disposed of trade or business during the calendar year, the W-2 wages of the individual or entity for the calendar year of the acquisition or disposition are allocated between each individual or entity based on the period during which the employees of the acquired or disposed of trade or business were employed by the individual or entity, regardless of which permissible method is used for reporting predecessor and successor wages on

> Form W-2. For this purpose, the period of employment is determined consistently with the principles for determining whether an individual is an employee described in proposed § 1.199A-2(b).
>
> A notice of proposed revenue procedure, Notice 2018-64, 2018-35 IRB ____, which provides three methods for calculating W-2 wages is being issued concurrently with this notice of proposed rulemaking. The three methods in the notice are substantially similar to the methods provided in Rev. Proc. 2006-47, 2006-2 C.B. 869, for purposes of calculating "paragraph (e)(1) wages" (that is, wages described in § 1.199-2(e)(1) issued under former section 199). The first method (the unmodified Box method) allows for a simplified calculation while the second and third methods (the modified Box 1 method and the tracking wages method) provide for greater accuracy.

Notice 2018-64, referred to in the last paragraph above, resulted in Rev. Proc. 2019-11, section 2 of which explains:

> W-2 wages calculated under this revenue procedure are not necessarily the W-2 wages that are properly allocable to QBI and eligible for use in computing the Section 199A limitations. As mentioned above, only W-2 wages that are properly allocable to QBI may be taken into account in computing the Section 199A(b)(2) W-2 wage limitations. Thus, after computing W-2 wages under this revenue procedure, under § 1.199A-2(b)(3), the taxpayer must determine the extent to which the W-2 wages are properly allocable to QBI. Then, the properly allocable W-2 wages amount is used in determining the W-2 wage limitation under Section 199A(b)(2) for that trade or business as well as any reduction for income received from cooperatives under Section 199A(b)(7).

For a taxpayer using W-2 wages in calculating the QBI deduction, see Reg. § 1.199A-2(a)(2), reproduced in the text accompanying fn 758 in part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.

Reg. § 1.199A-2(b)(1) provides an overview of the rules for W-2 wages:

> *In general*. Section 199A(b)(2)(B) provides limitations on the Section 199A deduction based on the W-2 wages paid with respect to each trade or business (or aggregated trade or business). Section 199A(b)(4)(B) provides that W-2 wages do not include any amount which is not properly allocable to QBI for purposes of Section 199A(c)(1). This section provides a three step process for determining the W-2 wages paid with respect to a trade or business that are properly allocable to QBI. First, each individual or RPE must determine its total W-2 wages paid for the taxable year under the rules in paragraph (b)(2) of this section. Second, each individual or RPE must allocate its W-2 wages between or among one or more trades or businesses under the rules in paragraph (b)(3) of this section. Third, each individual or RPE must determine the amount of such wages with respect to each trade or business, which are allocable to the QBI of the trade or business (or aggregated trade or business) under the rules in paragraph (b)(4) of this section.

"W-2 wages" means, with respect to any person for any taxable year of such person, the W-2 wages paid by such person with respect to employment of employees by such person during the calendar year ending during such taxable year:[883]

- In the case of a partnership or S corporation, each partner or shareholder is treated "as having W-2 wages and unadjusted basis immediately after acquisition of qualified property for the taxable year in an amount equal to such person's allocable share of the W-2 wages and the unadjusted basis immediately after acquisition of qualified property of the partnership or S corporation for the taxable year (as determined under regulations prescribed by the Secretary)."[884] A partner's or shareholder's allocable share of W-2 wages is determined in the same manner as the partner's or shareholder's allocable share of wage expenses.[885] A partner's or shareholder's allocable share of the unadjusted basis immediately after acquisition of qualified property is determined in the same manner as the partner's or shareholder's allocable share of depreciation.[886] In the case of an S corporation, an allocable share is the shareholder's pro rata share of an item.[887]

- For trusts and estates, rules similar to those that applied to the former Code § 199 deduction for domestic production activities apply.[888] See part II.E.1.f Trusts/Estates and the Code § 199A Deduction.

For a clue how statutory employees are treated, Rev. Proc. 2019-11, § 3.01 provides:

> Section 1.199A-2(b)(2)(i) also provides that, for purposes of § 1.199A-2, employees of the person are limited to employees of the person as defined in section 3121(d)(1) and (2) (that is, officers of a corporation and employees of the person under the common law rules). Therefore, Forms W-2 provided to statutory employees described in section 3121(d)(3) (that is, Forms W-2 in which the "Statutory Employee" box in Box 13 is checked) should not be included in calculating W-2 wages under any of the methods described in this revenue procedure.

Code § 3121(d)(3) excludes from "employee" any person, other than "any officer of a corporation" or a common law employee, "who performs services for remuneration for any person":

> (A) as an agent-driver or commission-driver engaged in distributing meat products, vegetable products, fruit products, bakery products, beverages (other than milk), or laundry or dry-cleaning services, for his principal;
>
> (B) as a full-time life insurance salesman;

---

[883] Code § 199A(b)(4)(A).
[884] Code § 199A(f)(1)(A)(iii).
[885] Code § 199A(f)(1)(A) (flush language).
[886] Code § 199A(f)(1)(A) (flush language).
[887] Code § 199A(f)(1)(A) (flush language).
[888] Code § 199A(f)(1)(B) provides:

> *Application to Trusts and Estates*. Rules similar to the rules under section 199(d)(1)(B)(i) (as in effect on December 1, 2017) for the apportionment of W-2 wages shall apply to the apportionment of W-2 wages and the apportionment of unadjusted basis immediately after acquisition of qualified property under this section.

(C) as a home worker performing work, according to specifications furnished by the person for whom the services are performed, on materials or goods furnished by such person which are required to be returned to such person or a person designated by him; or

(D) as a traveling or city salesman, other than as an agent-driver or commission-driver, engaged upon a full-time basis in the solicitation on behalf of, and the transmission to, his principal (except for side-line sales activities on behalf of some other person) of orders from wholesalers, retailers, contractors, or operators of hotels, restaurants, or other similar establishments for merchandise for resale or supplies for use in their business operations;

if the contract of service contemplates that substantially all of such services are to be performed personally by such individual; except that an individual shall not be included in the term "employee" under the provisions of this paragraph if such individual has a substantial investment in facilities used in connection with the performance of such services (other than in facilities for transportation), or if the services are in the nature of a single transaction not part of a continuing relationship with the person for whom the services are performed….

If employers cannot treat payments to these statutory employees as wages under part II.E.1.c.vi.(a) W-2 wages under Code § 199A, then these payments should not be treated as wages excluded from QBI. Indeed, the closing parenthetical to Reg. § 1.199A-5(d) confirms this result.[889]

W-2 wages generally are wages subject to withholding and include elective deferral, such as Code § 401(k) and similar plans.[890] The wages must be "properly allocable to" QBI.[891] The wages must be "properly included in a return filed with the Social Security Administration on or before the 60th day after the due date (including extensions) for such return."[892]

Reg. § 1.199A-2(b)(2), "Definition of W-2 wages," elaborates on the above, starting with:

(i) *In general*. Section 199A(b)(4)(A) provides that the term W-2 wages means with respect to any person for any taxable year of such person, the amounts described in section 6051(a)(3) and (8) paid by such person with respect to employment of employees by such person during the calendar year ending during such taxable year. Thus, the term W-2 wages includes the total amount of wages as defined in

---

889 See Reg. § 1.199A-5(d)(1), reproduced in part II.E.1.c.ii.(b) Trade or Business of Being an Employee (Excluded from QBI).

890 Code § 199A(b)(4)(A) provides:

> *In General*. The term "W-2 wages" means, with respect to any person for any taxable year of such person, the amounts described in paragraphs (3) and (8) of section 6051(a) paid by such person with respect to employment of employees by such person during the calendar year ending during such taxable year.

If a taxpayer has qualified business income from sources within the commonwealth of Puerto Rico and all that income is taxable under Code § 1 for the taxable year, then Code § 199A(f)(1)(C)(ii) provides that:

> the determination of W-2 wages of such taxpayer with respect to any qualified trade or business conducted in Puerto Rico shall be made without regard to any exclusion under section 3401(a)(8) for remuneration paid for services in Puerto Rico.

891 Code § 199A(b)(4)(B).

892 Code § 199A(b)(4)(C).

section 3401(a) plus the total amount of elective deferrals (within the meaning of section 402(g)(3)), the compensation deferred under section 457, and the amount of designated Roth contributions (as defined in section 402A). For this purpose, except as provided in paragraphs (b)(2)(iv)(C)(2) and (b)(2)(iv)(D) of this section, the Forms W-2, "Wage and Tax Statement," or any subsequent form or document used in determining the amount of W-2 wages, are those issued for the calendar year ending during the individual's or RPE's taxable year for wages paid to employees (or former employees) of the individual or RPE for employment by the individual or RPE. For purposes of this section, employees of the individual or RPE are limited to employees of the individual or RPE as defined in section 3121(d)(1) and (2). (For purposes of Section 199A, this includes officers of an S corporation and employees of an individual or RPE under common law.)

(ii) *Wages paid by a person other than a common law employer*. In determining W-2 wages, an individual or RPE may take into account any W-2 wages paid by another person and reported by the other person on Forms W-2 with the other person as the employer listed in Box c of the Forms W-2, provided that the W-2 wages were paid to common law employees or officers of the individual or RPE for employment by the individual or RPE. In such cases, the person paying the W-2 wages and reporting the W-2 wages on Forms W-2 is precluded from taking into account such wages for purposes of determining W-2 wages with respect to that person. For purposes of this paragraph (b)(2)(ii), persons that pay and report W-2 wages on behalf of or with respect to others can include, but are not limited to, certified professional employer organizations under section 7705, statutory employers under section 3401(d)(1), and agents under section 3504.

(iii) *Requirement that wages must be reported on return filed with the Social Security Administration (SSA)*.

(A) *In general*. Pursuant to Section 199A(b)(4)(C), the term W-2 wages does not include any amount that is not properly included in a return filed with SSA on or before the 60th day after the due date (including extensions) for such return. Under § 31.6051-2 of this chapter, each Form W-2 and the transmittal Form W-3, "Transmittal of Wage and Tax Statements," together constitute an information return to be filed with SSA. Similarly, each Form W-2c, "Corrected Wage and Tax Statement," and the transmittal Form W-3 or W-3c, "Transmittal of Corrected Wage and Tax Statements," together constitute an information return to be filed with SSA. In determining whether any amount has been properly included in a return filed with SSA on or before the 60th day after the due date (including extensions) for such return, each Form W-2 together with its accompanying Form W-3 will be considered a separate information return and each Form W-2c together with its accompanying Form W-3 or Form W-3c will be considered a separate information return. Section 6071(c) provides that Forms W-2 and W-3 must be filed on or before January 31 of the year following the calendar year to which such returns relate (but see the special rule in § 31.6071(a)-1T(a)(3)(1) of this chapter for monthly returns filed under § 31.6011(a)-5(a) of this chapter). Corrected Forms W-2 are required to be filed with SSA on or before January 31 of the year following the year in which the correction is made.

(B) *Corrected return filed to correct a return that was filed within 60 days of the due date*. If a corrected information return (Return B) is filed with SSA on or before the

60th day after the due date (including extensions) of Return B to correct an information return (Return A) that was filed with SSA on or before the 60th day after the due date (including extensions) of the information return (Return A) and paragraph (b)(2)(iii)(C) of this section does not apply, then the wage information on Return B must be included in determining W-2 wages. If a corrected information return (Return D) is filed with SSA later than the 60th day after the due date (including extensions) of Return D to correct an information return (Return C) that was filed with SSA on or before the 60th day after the due date (including extensions) of the information return (Return C), and if Return D reports an increase (or increases) in wages included in determining W-2 wages from the wage amounts reported on Return C, then such increase (or increases) on Return D will be disregarded in determining W- 2 wages (and only the wage amounts on Return C may be included in determining W-2 wages). If Return D reports a decrease (or decreases) in wages included in determining W-2 wages from the amounts reported on Return C, then, in determining W-2 wages, the wages reported on Return C must be reduced by the decrease (or decreases) reflected on Return D.

(C) *Corrected return filed to correct a return that was filed later than 60 days after the due date*. If an information return (Return F) is filed to correct an information return (Return E) that was not filed with SSA on or before the 60th day after the due date (including extensions) of Return E, then Return F (and any subsequent information returns filed with respect to Return E) will not be considered filed on or before the 60th day after the due date (including extensions) of Return F (or the subsequent corrected information return). Thus, if a Form W-2c is filed to correct a Form W-2 that was not filed with SSA on or before the 60th day after the due date (including extensions) of the Form W-2 (or to correct a Form W-2c relating to Form W-2 that had not been filed with SSA on or before the 60th day after the due date (including extensions) of the Form W-2), then this Form W-2c will not be considered to have been filed with SSA on or before the 60th day after the due date (including extensions) for this Form W-2c (or corrected Form W-2), regardless of when the Form W-2c is filed.

The IRS must explain how the QBI rules apply "in cases of a short taxable year or where the taxpayer acquires, or disposes of, the major portion of a trade or business or the major portion of a separate unit of a trade or business during the taxable year."[893]

Reg. § 1.199A-2(b)(2), "Methods for calculating W-2 wages," implements the above:

(A) *In general*. The Secretary may provide for methods to be used in calculating W-2 wages, including W-2 wages for short taxable years by publication in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter).

(B) *Acquisition or disposition of a trade or business*.

(1) *In general*. In the case of an acquisition or disposition of a trade or business, the major portion of a trade or business, or the major portion of a separate unit of a trade or business that causes more than one individual or entity to be an employer of the employees of the acquired or disposed of trade or business during the calendar year, the W-2 wages of the individual or entity for the

[893] Code § 199A(b)(5).

calendar year of the acquisition or disposition are allocated between each individual or entity based on the period during which the employees of the acquired or disposed of trade or business were employed by the individual or entity, regardless of which permissible method is used for reporting predecessor and successor wages on Form W-2, "Wage and Tax Statement." For this purpose, the period of employment is determined consistently with the principles for determining whether an individual is an employee described in paragraph (b) of this section.

(2) *Acquisition or disposition*. For purposes of this paragraph (b)(2)(iv)(B), the term acquisition or disposition includes an incorporation, a formation, a liquidation, a reorganization, or a purchase or sale of assets.

(C) *Application in the case of a person with a short taxable year*.

(1) *In general*. In the case of an individual or RPE with a short taxable year, subject to the rules of paragraph (b)(2) of this section, the W-2 wages of the individual or RPE for the short taxable year include only those wages paid during the short taxable year to employees of the individuals or RPE, only those elective deferrals (within the meaning of section 402(g)(3)) made during the short taxable year by employees of the individual or RPE and only compensation actually deferred under section 457 during the short taxable year with respect to employees of the individual or RPE.

(2) *Short taxable year that does not include December 31*. If an individual or RPE has a short taxable year that does not contain a calendar year ending during such short taxable year, wages paid to employees for employment by such individual or RPE during the short taxable year are treated as W-2 wages for such short taxable year for purposes of paragraph (b) of this section (if the wages would otherwise meet the requirements to be W-2 wages under this section but for the requirement that a calendar year must end during the short taxable year).

(D) *Remuneration paid for services performed in the Commonwealth of Puerto Rico*. In the case of an individual or RPE that conducts a trade or business in the Commonwealth of Puerto Rico, the determination of W-2 wages of such individual or RPE will be made without regard to any exclusion under section 3401(a)(8) for remuneration paid for services performed in the Commonwealth of Puerto Rico. The individual or RPE must maintain sufficient documentation (for example, Forms 499R-2/W-2PR) to substantiate the amount of remuneration paid for services performed in the Commonwealth of Puerto Rico that is used in determining the W-2 wages of such individual or RPE with respect to any trade or business conducted in the Commonwealth of Puerto Rico.

Reg. § 1.199A-2(b)(3), "Allocation of wages to trades or businesses," provides:

After calculating total W-2 wages for a taxable year, each individual or RPE that directly conducts more than one trade or business must allocate those wages among its various trades or businesses. W-2 wages must be allocated to the trade or business that generated those wages. In the case of W-2 wages that are allocable to more than one trade or business, the portion of the W-2 wages allocable to each trade or business is determined in the same manner as the expenses associated with those wages are allocated among the trades or businesses under § 1.199A- 3(b)(5).

Reg. § 1.199A-2(b)(4), "Allocation of wages to QBI," completes the allocation process:

> Once W-2 wages for each trade or business have been determined, each individual or RPE must identify the amount of W-2 wages properly allocable to QBI for each trade or business (or aggregated trade or business). W-2 wages are properly allocable to QBI if the associated wage expense is taken into account in computing QBI under § 1.199A-3. In the case of an RPE, the wage expense must be allocated and reported to the partners or shareholders of the RPE as required by the Code, including subchapters K and S of chapter 1 of subtitle A of the Code. The RPE must also identify and report the associated W-2 wages to its partners or shareholders.

Reg. § 1.199A-2(b)(5), "Non-duplication rule," provides:

> Amounts that are treated as W-2 wages for a taxable year under any method cannot be treated as W-2 wages of any other taxable year. Also, an amount cannot be treated as W-2 wages by more than one trade or business (or aggregated trade or business).

II.E.1.c.vi.(b). Unadjusted Basis Immediately after Acquisition (UBIA) of Qualified Property under Code § 199A

As discussed above, part of the wage limitation test is an alternative calculation relating to qualified property.[894] For a taxpayer using Unadjusted Basis Immediately after Acquisition (UBIA) of qualified property in calculating the QBI deduction, see Reg. § 1.199A-2(a)(3), reproduced in the text accompanying fn 758 in part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.

The preamble to Prop. Reg. § 1.199A-2, REG-107892-18 (8/16/2018), explains:

> **B. The UBIA of qualified property**
>
> Section 199A(b)(2)(B)(ii) provides an alternative deduction limitation based on 25 percent of W-2 wages with respect to the qualified trade or business and 2.5 percent of the UBIA of qualified property. Proposed § 1.199A-2 restates the statutory definitions under the qualified property rules, and provides additional guidance.
>
> **1. General definition of UBIA of qualified property**
>
> Proposed § 1.199A-2(c)(1) restates the definition of qualified property in Section 199A(b)(6)(A), which provides that "qualified property" means tangible property of a character subject to depreciation that is held by, and available for use in, a trade or business at the close of the taxable year, and which is used in the production of QBI, and for which the depreciable period has not ended before the close of the taxable year. Proposed § 1.199A-2(c)(2) also restates the definition of depreciable period in Section 199A(b)(6)(B), which provides that "depreciable" period means the period beginning on the date the property is first placed in service by the taxpayer and ending on the later of (a) the date 10 years after that date, or (b) the last day of the last full year

[894] Code § 199A(b)(2)(B)(ii).

in the applicable recovery period that would apply to the property under section 168(c), regardless of the application of section 168(g).

Because the applicable recovery period under section 168(c) of the property is not changed by any additional first-year depreciation deduction allowable under section 168, proposed § 1.199A-2(c)(2)(ii) also clarifies that the additional first-year depreciation deduction allowable under section 168 (for example, under section 168(k) or section 168(m)) does not affect the applicable recovery period under section 168(c).

Proposed § 1.199A-2(c)(3) provides a definition of UBIA. The Treasury Department and the IRS believe that existing general principles used to define "unadjusted basis" in § 1.263(a)-3(h)(5) provide a reasonable basis for an administrable rule that is appropriate for the purposes of Section 199A and that their use will reduce compliance costs, burden, and administrative complexity because taxpayers have experience applying them. In addition, the Treasury Department and the IRS believe that "immediately after acquisition" means as of the date the property is placed in service because Section 199A provides that "qualified property" must be used in the production of QBI. In order to be used in the production of QBI, the qualified property necessarily must be placed in service. Determining UBIA as of the date the property is placed in service ensures consistency between purchased and produced qualified property, and reduces compliance costs, burden, and administrative complexity because taxpayers are already required to determine that amount. Accordingly, proposed § 1.199A-2 provides that the term "UBIA" means the basis as determined under section 1012 or other applicable sections of chapter 1, including subchapter O (relating to gain or loss on dispositions of property), subchapter C (relating to corporate distributions and adjustments), subchapter K (relating to partners and partnerships), and subchapter P (relating to capital gains and losses). UBIA is determined without regard to any adjustments described in section 1016(a)(2) or (3), any adjustments for tax credits claimed by the taxpayer (for example, under section 50(c)), or any adjustments for any portion of the basis for which the taxpayer has elected to treat as an expense (for example, under sections 179, 179B, or 179C). Therefore, for purchased or produced qualified property, UBIA generally will be its cost under section 1012 as of the date the property is placed in service. For qualified property contributed to a partnership in a section 721 transaction and immediately placed in service, UBIA generally will be its basis under section 723. For qualified property contributed to an S corporation in a section 351 transaction and immediately placed in service, UBIA generally will be its basis under section 362. Further, for property inherited from a decedent and immediately placed in service by the heir, the UBIA generally will be its fair market value at the time of the decedent's death under section 1014. However, proposed § 1.199A-2(c)(3) provides that UBIA does reflect the reduction in basis for the percentage of the taxpayer's use of property for the taxable year other than in the taxpayer's trade or business.

2. Partnership special basis adjustments

After the enactment of the TCJA, the Treasury Department and the IRS received comments requesting guidance as to whether partnership special basis adjustments under sections 734(b) or 743(b) constitute qualified property for purposes of Section 199A. Treating partnership special basis adjustments as qualified property could result in inappropriate duplication of UBIA of qualified property (if, for example, the fair market value of the property has not increased and its depreciable period has not ended).

Accordingly, proposed § 1.199A-2(c)(1)(iii) provides that partnership special basis adjustments are not treated as separate qualified property.

3. Property transferred with a principal purpose of increasing Section 199A deduction

Qualified property includes depreciable property used during the taxable year in the production of QBI and held by, and available for use in, the trade or business at the close of the taxable year. However, it would be inconsistent with the purposes of Section 199A to permit trades or businesses to transfer or acquire property at the end of the year merely to manipulate the UBIA of qualified property attributable to the trade or business. Therefore, pursuant to the authority granted to the Secretary under Section 199A(f)(4), proposed § 1.199A-2(c)(1)(iv) provides that property is not qualified property if the property is acquired within 60 days of the end of the taxable year and disposed of within 120 days without having been used in a trade or business for at least 45 days prior to disposition, unless the taxpayer demonstrates that the principal purpose of the acquisition and disposition was a purpose other than increasing the Section 199A deduction.

4. Like-kind exchanges and involuntary conversions

Section 199A does not provide rules to determine UBIA for qualified property in the case of an exchange of property under section 1031 (like-kind exchange) or involuntary conversion under section 1033. However, Section 199A(h)(2) specifically instructs the Secretary to do so. The Treasury Department and the IRS believe that existing general principles used for like-kind exchanges and involuntary conversions under § 1.168(i)-(6) provide a useful analogy for administrable rules that are appropriate for the purposes of Section 199A and that their use will reduce compliance costs, burden, and administrative complexity because taxpayers have experience applying them. Accordingly, proposed § 1.199A-2(c)(2)(iii) generally follows the rules of § 1.168(i)-6 to provide that qualified property that is acquired in a like-kind exchange, as defined in § 1.168(i)-6(b)(11), or in an involuntary conversion, as defined in § 1.168(i)-6(b)(12), is treated as replacement Modified Accelerated Cost Recovery System (MACRS) property as defined in § 1.168(i)-6(b)(1) whose depreciable period generally is determined as of the date the relinquished property was first placed in service. Accordingly, subject to one exception, proposed § 1.199A-2(c)(2)(iii) provides that, for purposes of determining the depreciable period, the date the exchanged basis in the replacement qualified property is first placed in service by the trade or business is the date on which the relinquished property was first placed in service by the individual or RPE and the date the excess basis in the replacement qualified property is first placed in service by the individual or RPE is the date on which the replacement qualified property was first placed in service by the individual or RPE. As a result, the depreciable period under Section 199A for the exchanged basis of the replacement qualified property will end before the depreciable period for the excess basis of the replacement qualified property ends.

The exception is that proposed § 1.199A-2(c)(2)(iii)(C) provides that, for purposes of determining the depreciable period, if the individual or RPE makes an election under § 1.168(i)-6(i)(1) (the election not to apply § 1.168(i)-6)), the date the exchanged basis and excess basis in the replacement qualified property are first placed in service by the trade or business is the date on which the replacement qualified property is first placed in service by the individual or RPE, with UBIA determined as of that date. In this case, the depreciable periods under Section 199A for the exchanged basis and the excess basis of the replacement qualified property will end on the same date.

Thus, unless the exception applies, qualified property acquired in a like-kind exchange or involuntary conversion will have two separate placed in service dates under the proposed regulations: for purposes of determining the UBIA of the property, the relevant placed in service date will be the date the acquired property is actually placed in service; for purposes of determining the depreciable period of the property, the relevant placed in service date generally will be the date the relinquished property was first placed in service. The proposed regulations contain an example illustrating these rules.

5. Other nonrecognition transactions

The Treasury Department and the IRS have received comments requesting guidance on the application of the qualified property rules to nonrecognition transfers involving transferred basis property within the meaning of section 7701(a)(43) (transferred basis transactions). For example, taxpayers and practitioners requested guidance on how to determine the depreciable period of the property if a partnership conducts a trade or business and qualified property is contributed to that trade or business in a nonrecognition transfer under section 721(a). Also of relevance in the context of non-recognition transfers, Section 199A(h)(1) grants the Secretary anti-abuse authority to apply rules similar to the rules under section 179(d)(2) (which can restrict the expensing of certain assets in transferred basis transactions) to prevent the manipulation of the depreciable period of qualified property using transactions between related parties.

The Treasury Department and the IRS believe that existing general principles used for transferred basis transactions under § 168(i)(7) provide a useful analogy for administrable rules that are appropriate for the purposes of Section 199A and that their use will reduce compliance costs, burden, and administrative complexity because taxpayers have experience applying them. Accordingly, proposed § 1.199A-2(c)(2)(iv) provides that, for purposes of determining the depreciable period, if an individual or RPE (the transferee) acquires qualified property in a transaction described in section 168(i)(7)(B), the transferee determines the date on which the qualified property was first placed in service using a two-step approach. First, for the portion of the transferee's UBIA of the qualified property that does not exceed the transferor's UBIA of such property, the date such portion was first placed in service by the transferee is the date on which the transferor first placed the qualified property in service. Second, for the portion of the transferee's UBIA of the qualified property that exceeds the transferor's UBIA of such property, if any, such portion is treated as separate qualified property that the transferee first placed in service on the date of the transfer. Thus, qualified property acquired in these non-recognition transactions will have two separate placed in service dates under the proposed regulations: for purposes of determining the UBIA of the property, the relevant placed in service date will be the date the acquired property is placed in service by the transferee (for instance, the date the partnership places in service property received in a section 721 transaction); for purposes of determining the depreciable period of the property, the relevant placed in service date generally will be the date the transferor first placed the property in service (for instance, the date the partner placed the property in service in his or her sole proprietorship). The proposed regulations contain an example illustrating these rules.

The Treasury Department and the IRS request comments concerning appropriate methods for accounting for non-recognition transactions, including rules to prevent the manipulation of the depreciable period of qualified property using transactions between related parties.

6. Redetermination of UBIA and subsequent improvements to qualified property

The Treasury Department and the IRS have received comments requesting guidance on the treatment of subsequent improvements to qualified property. Subsequent improvements to qualified property are generally treated as a separate item of property under section 168(i)(6). The Treasury Department and the IRS do not believe a different approach is necessary for purposes of Section 199A. Accordingly, proposed § 1.199A-2(c)(1)(ii) provides that, in the case of any addition to, or improvement of, qualified property that is already placed in service by the taxpayer, such addition or improvement is treated as separate qualified property that the taxpayer first placed in service on the date such addition or improvement is placed in service by the taxpayer for purposes of determining the depreciable period of the qualified property. For example, if a taxpayer acquired and placed in service a machine on March 26, 2018, and then incurs additional capital expenditures to improve the machine in May 2020, and places such improvements in service on May 27, 2020, the taxpayer has two qualified properties: the machine acquired and placed in service on March 26, 2018, and the improvements to the machine incurred in May 2020 and placed in service on May 27, 2020.

7. Allocation of UBIA of qualified property by RPEs

In the case of a trade or business conducted by an RPE, Section 199A(f) provides that a partner's or shareholder's allocable share of the UBIA of qualified property is determined in the same manner as the partner's allocable share or shareholder's pro rata share of depreciation. Proposed § 1.199A-2(a)(3) provides that, in the case of qualified property held by an RPE, each partner's or shareholder's share of the UBIA of qualified property is an amount that bears the same proportion to the total UBIA of qualified property as the partner's or shareholder's share of tax depreciation bears to the entity's total tax depreciation attributable to the property for the year. In the case of qualified property of a partnership that does not produce tax depreciation during the year (for example, property that has been held for less than 10 years but whose recovery period has ended), each partner's share of the UBIA of qualified property is based on how gain would be allocated to the partners pursuant to sections 704(b) and 704(c) if the qualified property were sold in a hypothetical transaction for cash equal to the fair market value of the qualified property. In the case of qualified property of an S corporation that does not produce tax depreciation during the year, each shareholder's share of the UBIA of the qualified property is a share of the UBIA proportionate to the ratio of shares in the S corporation held by the shareholder over the total shares of the S corporation.

However, the final regulations change several aspects, as the preamble summarizes in the section explaining economic impact:[895]

> Relative to the proposed 199A regulations, the final regulations make several changes in the determination of UBIA of qualified property. In particular, proposed § 1.199A-2 adjusted UBIA for (i) qualified property contributed to a partnership or S corporation in a nonrecognition transaction, (ii) like-kind exchanges, or (iii) involuntary conversions. Upon review of comments received addressing these rules, the Treasury Department and the IRS have amended these rules in the final regulations such that UBIA of qualified property generally remains unadjusted as a result of these three types of transactions. As several commenters pointed out, the proposed regulations would have introduced distortions into the economic incentives for businesses to invest or earn income. In cases where UBIA would have been reduced following a nonrecognition transfer under the proposed regulations, the treatment under the proposed regulations would have discouraged such transactions by introducing a financial cost (in the form of a reduced 199A deduction) where no resource cost exists. An analogous distortion exists for the other two types of transactions. Such distortions are economically inefficient.
>
> To avoid such distortion, the final regulations establish that qualified property contributed to a partnership or S corporation in a nonrecognition transaction generally retains its UBIA on the date it was first placed in service by the contributing partner or shareholder. Similar rules are adopted for the other two transaction forms mentioned above. In particular, the final regulations provide that the UBIA of qualified property received in a section 1031 like-kind exchange is generally the UBIA of the relinquished property. The rule is the same for qualified property acquired pursuant to an involuntary conversion under section 1033.

The preamble to the final regulations explains:[896]

> **1. Qualified Property Held by an RPE**
>
> The proposed regulations provide that in the case of qualified property held by an RPE, each partner's or shareholder's share of the UBIA of qualified property is an amount that bears the same proportion to the total UBIA of qualified property as the partner's or shareholder's share of tax depreciation bears to the RPE's total tax depreciation with respect to the property for the year. In the case of a partnership with qualified property that does not produce tax depreciation during the year, each partner's share of the UBIA of qualified property would be based on how gain would be allocated to the partners pursuant to sections 704(b) and 704(c) if the qualified property were sold in a hypothetical transaction for cash equal to the fair market value of the qualified property. Several commenters suggested that only section 704(b) should be used for this purpose, arguing that the use of section 704(c) allocation methods would be unduly burdensome and could lead to unintended results. One commenter recommended that partners should share UBIA of qualified property in the same manner that they share the economic depreciation of the property. Another commenter suggested allocating UBIA based on a ratio of each partner's allocation of depreciation and the partnership's total

---

[895] T.D. 9847 (2/8/2019), Special Analyses, part I, "Regulatory Planning and Review – Economic Analysis," subpart C, "Economic Analysis of Changes in Final Regulations," paragraph 1, "UBIA."
[896] T.D. 9847 (2/8/2019), part III.B, "UBIA."

depreciation of qualified property for the year. One commenter requested clarification regarding how UBIA is allocated when a partner or shareholder has depreciation expense as an ordinary deduction and as a rental real estate deduction and they are allocated differently.

The Treasury Department and the IRS agree with the commenters that relying on section 704(c) to allocate UBIA could lead to unintended shifts in the allocation of UBIA. Therefore, the final regulations provide that each partner's share of the UBIA of qualified property is determined in accordance with how depreciation would be allocated for section 704(b) book purposes under § 1.704-1(b)(2)(iv)(g) on the last day of the taxable year. To the extent a partner has depreciation expense as an ordinary deduction and as a rental real estate deduction, the allocation of the UBIA should match the allocation of the expenses. The Treasury Department and the IRS request comments on whether a new regime is necessary in the case of a partnership with qualified property that does not produce tax depreciation during the taxable year. In the case of qualified property held by an S corporation, each shareholder's share of UBIA of qualified property is a share of the unadjusted basis proportionate to the ratio of shares in the S corporation held by the shareholder on the last day of the taxable year over the total issued and outstanding shares of the S corporation.

2. Property Contributed to a Partnership or S Corporation in a Nonrecognition Transfer

The proposed regulations provide that the UBIA of qualified property means the basis on the placed in service date of the property. Therefore, the UBIA of qualified property contributed to a partnership in a section 721 transaction generally equals the partnership's tax basis under section 723 rather than the contributing partner's original UBIA of the property. Similarly, the UBIA of qualified property contributed to an S corporation in a section 351 transaction is determined by reference to section 362. Multiple commenters expressed concern that this treatment could result in a step-down in the UBIA of qualified property used in a trade or business at the time of the contribution due only to the change in entity structure. These commenters suggested that the UBIA of qualified property contributed to a partnership under section 721 or to an S corporation under section 351 should be determined as of the date it was first placed in service by the contributing partner or shareholder. Another commenter suggested that final regulations should generally provide for carryover of UBIA of qualified property in non-recognition transactions, but provide an anti-abuse rule for cases in which a transaction was engaged in with a principal purpose of increasing the Section 199A deduction.

The Treasury Department and the IRS agree that qualified property contributed to a partnership or S corporation in a nonrecognition transaction should generally retain its UBIA on the date it was first placed in service by the contributing partner or shareholder. Accordingly, § 1.199A-2(c)(3)(iv) provides that, solely for the purposes of Section 199A, if qualified property is acquired in a transaction described in section 168(i)(7)(B), the transferee's UBIA in the qualified property is the same as the transferor's UBIA in the property, decreased by the amount of money received by the transferor in the transaction or increased by the amount of money paid by the transferee to acquire the property in the transaction.

The rules set forth in these regulations are limited solely to the determination of UBIA of qualified property for purposes of Section 199A and are not applicable to the determination of gain, loss, basis, or depreciation with respect to transactions described in section 168(i)(7).

3. Property Received in a Section 1031 Like-Kind Exchange or Section 1033 Involuntary Conversion

Section 1.199A-2(c)(3) of the proposed regulations explains that UBIA of qualified property means the basis of qualified property on the placed in service date of the property as determined under applicable sections of chapter 1 of subtitle A of the Code, which includes sections 1012 (Basis of property-cost), 1031 (Exchange of real property held for productive use or investment), and 1033 (Involuntary conversions).
Section 1.199A-2(c)(3) of the proposed regulations also explains that UBIA of qualified property is determined without regard to any adjustments for depreciation described in section 1016(a)(2) or (3). Example 2 to proposed § 1.199A-2(c)(4) illustrates that the UBIA of qualified property received in a section 1031 like-kind exchange is the adjusted basis of the relinquished property transferred in the exchange as determined under section 1031(d), which reflects the adjustment in basis for depreciation deductions previously taken under section 168.

Several commenters argued that the proposed regulations discourage like-kind exchanges by providing an incentive to retain property in order to maintain greater UBIA of qualified property. These commenters argue that the UBIA of replacement qualified property should be the taxpayer’s UBIA of the relinquished property on the placed in service date by the taxpayer, increased by any additional capital invested by the taxpayer to acquire the replacement property, rather than the adjusted basis of the replacement property at the time of the exchange as determined under section 1031(d). This would be consistent with the step-in-the-shoes rule for determining the depreciable period. Another commenter suggested that if the rule is retained, the provision should be revised to treat the placed in service date as the date of the exchange.

Section 1.1002-1(c) of the Income Tax Regulations generally describes nonrecognition sections, including section 1031, as “exchanges of property in which at the time of the exchange particular differences exist between the property parted with and the property acquired, but such differences are more formal that substantial,” so that recognition and income inclusion at that time of the exchange are not appropriate. The underlying assumption of these exceptions to the recognition requirement is that the new property is substantially a continuation of the old investment still unliquidated; and in the case of reorganization, that the new enterprise, the new corporate structure, and the new property are substantially a continuation of the old still unliquidated investment. *Id.*

Application of section 1031(d) in determining UBIA for the replacement property would require, among other possible adjustments, a downward adjustment for depreciation deductions. This approach is contrary to the rule in § 1.199A-2(c)(3) of the proposed regulations that UBIA of qualified property is determined without regard to any adjustments for depreciation described in section 1016(a)(2) or (3).

Accordingly, the final regulations provide that the UBIA of qualified like-kind property that a taxpayer receives in a section 1031 like-kind exchange is the UBIA of the relinquished property. However, if a taxpayer either receives money or property not of a like kind to the relinquished property (other property) or provides money or other property as part of the exchange, the taxpayer's UBIA in the replacement property is adjusted. The taxpayer's UBIA in the replacement property is adjusted downward by the excess of any money or the fair market value of other property received by the taxpayer in the exchange over the taxpayer's appreciation in the relinquished property (excess boot). Appreciation for this purpose is the excess of the relinquished property's fair market value on the date of the exchange over the fair market value of the relinquished property on the date of acquisition by the taxpayer. This reduction for excess boot in the taxpayer's UBIA in the replacement property reflects a partial liquidation of the taxpayer's investment in qualified property.

If the taxpayer adds money or other property to acquire replacement property, the taxpayer's UBIA in the replacement property is adjusted upward by the amount of money paid or the fair market value of the other property transferred to reflect additional taxpayer investment.

If the taxpayer receives other property in the exchange that is qualified property, the taxpayer's UBIA in the qualified other property will equal the fair market value of the other property. Consequently, a taxpayer who receives qualified other property in the exchange is treated, for UBIA purposes, as if the taxpayer receives cash in the exchange and uses that cash to purchase the qualified property.

The rules are similar for qualified property acquired pursuant to an involuntary conversion under section 1033, except that appreciation for this purpose is the difference between the fair market value of the converted property on the date of the conversion over the fair market value of the converted property on the date of acquisition by the taxpayer. In addition, other property is property not similar or related in service or use to the converted property.

The rules set forth in these final regulations are limited solely to the determination of UBIA of qualified property for purposes of Section 199A and are not applicable to the determination of gain, loss, basis, or depreciation with respect to transactions governed by sections 1031 or 1033.

In determining the depreciable period of replacement property acquired in a like-kind exchange or in an involuntary conversion, the proposed regulations apply § 1.168(i)-6 which, in turn, follows the rules in section 1031(d) or 1033(b), as applicable. Because the final regulations do not determine the UBIA of replacement property under section 1031(d) or 1033(b), the final regulations correspondingly remove the indirect references to those rules for determining the depreciable period of replacement property. To be consistent with the rules regarding the UBIA of replacement property that is of like kind to the relinquished property or that is similar or related in service or use to the involuntarily converted property, the final regulations provide that (i) for the portion of the individual's or RPE's UBIA in the replacement property that does not exceed the individual's or RPE's UBIA in the relinquished property or involuntarily converted property, the date such portion in the replacement property was first placed in service by the individual or RPE is the date on which the relinquished property or involuntarily converted property was first placed in service by the individual or RPE, and (ii) for the portion of the individual's or RPE's UBIA in the replacement property that exceeds the individual's or RPE's UBIA in the relinquished property or involuntarily converted property, such portion in the replacement property is treated as separate qualified property that the individual or RPE first placed in service on the date on which the replacement property was first placed in service by the individual or RPE. This rule is not a change from the proposed regulations, but is consistent with the step-in-the-shoes rationale for determining the depreciable period for certain non-recognition transactions described in section 168(i)(7)(B).

In addition, the final regulations provide that when qualified property that is not of like kind to the relinquished property or qualified property that is not similar or related in service or use to involuntarily converted property is received in a section 1031 or 1033 transaction, such qualified property is treated as separate qualified property that the individual or RPE first placed in service on the date on which such qualified property was first placed in service by the individual or RPE. This rule is consistent with the rules regarding the UBIA of such qualified property.

The rules set forth in these final regulations are limited solely to the determination of the depreciable period for purposes of Section 199A and are not applicable to the determination of the placed in service date for depreciation or tax credit purposes.

4. Sections 734(b) and 743(b) Special Basis Adjustments

The proposed regulations provide that basis adjustments under sections 734(b) and 743(b) are not treated as qualified property. The preamble to the proposed regulations describes concerns about inappropriate duplication of the UBIA of qualified property in circumstances such as when the fair market value of property has not increased and its depreciable period has not ended. Several commenters agreed that special basis adjustments could result in the duplication of UBIA of qualified property to the extent that the fair market value of the qualified property does not exceed UBIA. However, many of these commenters suggested that basis adjustments under section 734(b) and 743(b) should be treated as qualified property to the extent that the fair market value of the qualified property to which the adjustments relate exceeds the UBIA of such property immediately before the special basis adjustment. Other commenters recommended that both section 734(b) and section 743(b) adjustments should generate new UBIA. Commenters suggested a variety of methods for adjusting UBIA to account for the special basis adjustments. These included incorporating existing principles of sections 734(b), 743(b), 754, and 755 by determining the UBIA of separate qualified property by reference to the difference between the transferee partner's outside basis and its share of UBIA; treating the entire amount of the section 743(b) adjustment as separate qualified property with a new depreciation period, with adjustments to the partner's share of the partnership's UBIA to avoid duplicating UBIA; and creating an entirely new regime mirroring the principles of sections 734(b), 743(b), 754, and 755.

The Treasury Department and the IRS agree that section 743(b) basis adjustments should be treated as qualified property to extent the section 743(b) basis adjustment reflects an increase in the fair market value of the underlying qualified property. Accordingly, the final regulations define an "excess section 743(b) basis adjustment" as an amount that is determined with respect to each item of qualified property and is equal to an amount that would represent the partner's section 743(b) basis adjustment with respect to the property, as determined under § 1.743-1(b) and § 1.755-1, but calculated as if the adjusted basis of all of the partnership's property was equal to the UBIA of such property. The absolute value of the excess section 743(b) basis adjustment cannot exceed the absolute value of the total section 743(b) basis adjustment with respect to qualified property. The excess section 743(b) basis adjustment is treated as a separate item of qualified property placed in service when the transfer of the partnership interest occurs. This rule is limited solely to the determination of the depreciable period for purposes of Section 199A and is not applicable to the determination of the placed in service date for depreciation or tax credit purposes. The recovery period for such property is determined under § 1.743-1(j)(4)(i)(B) with respect to positive basis adjustments and § 1.743-1(j)(4)(ii)(B) with respect to negative basis adjustments.

The Treasury Department and the IRS do not believe that a section 734(b) adjustment is an acquisition of qualified property for purposes of determining UBIA. Section 734(b)(1) provides that, in the case of a distribution of property to a partner with respect to which a section 754 election is in effect (or when there is a substantial basis reduction under section 734(d)), the partnership will increase the adjusted basis of partnership property by the sum of (A) the amount of any gain recognized to the distributee partner under section 731(a)(1), and (B) in the case of distributed property to which section 732(a)(2) or (b) applies, the excess of the adjusted basis of the distributed property to the partnership immediately before the distribution (as adjusted by section 732(d)) over the basis of the distributed property to the distributee, as determined under section 732. The Treasury Department and the IRS do not believe that the adjustment to basis is an acquisition for purposes of Section 199A.

Commenters also noted that the failure to adjust UBIA for reduction of basis under section 734 could result in a duplication of UBIA if property is distributed in liquidation of a partner's interest in a partnership and the partner takes that property with the partner's outside basis under section 732(b) without the partnership adjusting the UBIA in the partnership's remaining assets. The Treasury Department and the IRS agree that such a duplication is inappropriate, but do not agree with commenters that such a distribution results in an increase in UBIA. These regulations provide that the partnership's UBIA in the qualified property carries over to a partner that receives a distribution of the qualified property.

The Treasury Department and the IRS continue to study this issue and request additional comments on the interaction of the special basis adjustments under sections 734(b) and 743(b) with Section 199A and whether a new regime for calculating adjustments with respect to UBIA is necessary.

5. Qualified Property Held by a Trade or Business at the Close of the Taxable Year

Section 199A(b)(6)(A)(i) and proposed § 1.199A-2(c) provide that qualified property must be held by, and available for use in, the qualified trade or business at the close of the taxable year. One commenter suggested the final regulations contain a rule for determining the UBIA of qualified property in a short year on acquisition or disposition of a trade or business, similar to the guidance provided in § 1.199A-2(b)(2)(v) for purposes of calculating W-2 wages. The commenter suggested that one approach for UBIA could be a pro rata calculation based on the number of days the qualified property is held during the year. The Treasury Department and the IRS decline to adopt this suggestion because the statute looks to qualified property held at the close of the taxable year.

Another commenter asked for additional guidance on this rule with respect to qualified property held by an RPE. The commenter questioned whether the applicable taxable year is that of the taxpayer or the RPE. The commenter also asked how the rule would be applied if a taxpayer transferred his or her interest in an RPE. The Treasury Department and the IRS believe that the UBIA of qualified property is measured at the trade or business level. Accordingly, in the case of qualified property held by an RPE, the applicable taxable year is that of the RPE. A taxpayer who transfers an interest in an RPE prior to the close of the RPE's taxable year is not entitled to a share of UBIA from the RPE.

In the context of S corporations, one commenter noted that section 1377(a) provides that income for the taxable year is allocated among shareholders on a pro rata basis by assigning a pro rata share of each corporate item to each day of the taxable year. The commenter suggested that all shareholders who were owners during the taxable year should be given access to the UBIA of qualified property held by an S corporation at the close of the S corporation's taxable year. The Treasury Department and the IRS decline to adopt this comment because Section 199A does not have a rule comparable to the rule in section 1377(a).

The proposed regulations provide that property is not qualified property if the property is acquired within 60 days of the end of the taxable year and disposed of within 120 days without having been used in a trade or business for at least 45 days prior to disposition, unless the taxpayer demonstrates that the principal purpose of the acquisition and disposition was a purpose other than increasing the Section 199A deduction. The Treasury Department and the IRS received no comments with respect to this rule. The final regulations retain the rule but clarify that the 120 day period begins with the acquisition of the property.

6. Qualified Property Acquired from a Decedent

The preamble to the proposed regulations provides that for property acquired from a decedent and immediately placed in service, the UBIA generally will be its fair market value at the time of the decedent's death under section 1014. One commenter recommended that the regulations should clearly state this rule in the regulatory text. The commenter recommended that the regulations should further clarify that the date of the decedent's death should commence a new depreciable period for the property. The Treasury Department and the IRS adopt these comments. The final regulations provide that for qualified property acquired from a decedent and immediately placed in service, the UBIA of the property will generally be the fair market value at the date of the decedent's death under section 1014. Further, the regulations provide that a new depreciable period for the property commences as of the date of the decedent's death.

Getting into the Code and Regulations themselves:

"Qualified property" means, with respect to any QBI for a taxable year, tangible property of a character subject to the allowance for depreciation under Code § 167:[897]

[897] Code § 199A(b)(6)(A).

(i) which is held by, and available for use in, the qualified trade or business at the close of the taxable year,

(ii) which is used at any point during the taxable year in the production of qualified business income, and

(iii) the depreciable period for which has not ended before the close of the taxable year.

Reg. § 1.199A-2(c)(1), "Qualified property," provides:

(ii) *In general*. The term qualified property means, with respect to any trade or business (or aggregated trade or business) of an individual or RPE for a taxable year, tangible property of a character subject to the allowance for depreciation under section 167(a) -

(A) Which is held by, and available for use in, the trade or business (or aggregated trade or business) at the close of the taxable year,

(B) Which is used at any point during the taxable year in the trade or business's (or aggregated trade or business's) production of QBI, and

(C) The depreciable period for which has not ended before the close of the individual's or RPE's taxable year.

(ii) *Improvements to qualified property*. In the case of any addition to, or improvement of, qualified property that has already been placed in service by the individual or RPE, such addition or improvement is treated as separate qualified property first placed in service on the date such addition or improvement is placed in service for purposes of paragraph (c)(2) of this section.

(iii) *Adjustments under sections 734(b) and 743(b)*. Excess section 743(b) basis adjustments as defined in paragraph (a)(3)(iv)(B) of this section are treated as qualified property. Otherwise, basis adjustments under sections 734(b) and 743(b) are not treated as qualified property.

(iv) *Property acquired at end of year*. Property is not qualified property if the property is acquired within 60 days of the end of the taxable year and disposed of within 120 days of acquisition without having been used in a trade or business for at least 45 days prior to disposition, unless the taxpayer demonstrates that the principal purpose of the acquisition and disposition was a purpose other than increasing the Section 199A deduction.

A unique aspect of partnerships is the opportunity to change the basis of the partnership's assets ("inside basis") to reflect the basis of one's partnership interest ("outside basis"). See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations. A partner's death and the sale of a partnership interest are among the events that trigger this opportunity. The proposed regulations would not have applied an inside basis adjustment to UBIA, but the final regulations do. However, as the preamble mentions above, this applies only to a transfer of a partnership interest that triggers a Code § 743(b) basis adjustment and not to a distribution of property that triggers a Code § 743(b) basis adjustment.

The proposed regulations expressed concern about UBIA. My example is a property with an original purchase price and current value of $100,000, accumulated depreciation of $40,000, and therefore an adjusted basis of $60,000 ($100,000 minus $40,000). Under the rules of part II.Q.8.e.iii, if all of the partnership interests were transferred for $100,000 in a taxable exchange then a $40,000 basis adjustment would be needed to match the inside basis ($60,000) to the outside basis ($100,000). However, the property's $100,000 UBIA already matches outside basis. Adjusting UBIA by the $40,000 basis adjustment would generate total UBIA of $140,000, which would be too much.

Suppose the above example were modified to have a $125,000 value at the time of the transfer. The property's basis adjustment would be $65,000 – the excess of $125,000 value over the $65,000 inside basis. The UBIA adjustment would be $25,000 – the excess of $125,000 value over $100,000 UBIA.

With these ideas in mind, let's read Reg. § 1.199A-2(a)(3)(iv), "UBIA and section 743(b) basis adjustments," which provides:

(A) *In general*. A partner will be allowed to take into account UBIA with respect to an item of qualified property in addition to the amount of UBIA with respect to such qualified property determined under paragraphs (a)(3)(i) and (c) of this section and allocated to such partner under paragraph (a)(3)(ii) of this section to the extent of the partner's excess section 743(b) basis adjustment with respect to such item of qualified property.

(B) *Excess section 743(b) basis adjustments*. A partner's *excess section 743(b) basis adjustment* is an amount that is determined with respect to each item of qualified property and is equal to an amount that would represent the partner's section 743(b) basis adjustment with respect to the same item of qualified property, as determined under §§ 1.743-1(b) and 1.755-1, but calculated as if the adjusted basis of all of the partnership's property was equal to the UBIA of such property. The absolute value of the excess section 743(b) basis adjustment cannot exceed the absolute value of the total section 743(b) basis adjustment with respect to qualified property.

(C) *Computation of partner's share of UBIA with excess section 743(b) basis adjustments*. The partnership first computes its UBIA with respect to qualified property under paragraphs (a)(3)(i) and (c) of this section and allocates such UBIA under paragraph (a)(3)(ii) of this section. If the sum of the excess section 743(b) basis adjustment for all of the items of qualified property is a negative number, that amount will be subtracted from the partner's UBIA of qualified property determined under paragraphs (a)(3)(i) and (c) of this section and allocated under paragraph (a)(3)(ii) of this section. A partner's UBIA of qualified property may not be below $0. Excess section 743(b) basis adjustments are computed with respect to all section 743(b) adjustments, including adjustments made as a result of a substantial built-in loss under section 743(d).

(D) *Examples*. The provisions of this paragraph (a)(3)(iv) are illustrated by the following examples:

(1) *Example 1*.

(i) *Facts*. A, B, and C are equal partners in partnership, PRS. PRS has a single trade or business that generates QBI. PRS has no liabilities and only one asset, a single item of qualified property with a UBIA equal to $900,000. Each partner's share of the UBIA is $300,000.

(ii)[898] A sells its one-third interest in PRS to T for $350,000 when a section 754 election is in effect. At the time of the sale, the tax basis of the qualified property held by PRS is $750,000. The amount of gain that would be allocated to T from a hypothetical transaction under § 1.743-1(d)(2) is $100,000. Thus, T's interest in PRS's previously taxed capital is equal to $250,000 ($350,000, the amount of cash T would receive if PRS liquidated immediately after the hypothetical transaction, decreased by $100,000, T's share of gain from the hypothetical transaction). The amount of T's section 743(b) basis adjustment to PRS's qualified property is $100,000 (the excess of $350,000, T's cost basis for its interest, over $250,000, T's share of the adjusted basis to PRS of the partnership's property).

(iii) *Analysis*. In order for T to determine its UBIA, T must calculate its excess section 743(b) basis adjustment. T's excess section 743(b) basis adjustment is equal to an amount that would represent T's section 743(b) basis adjustment with respect to the same item of qualified property, as determined under §§ 1.743-1(b) and 1.755-1, but calculated as if the adjusted basis of all of PRS's property was equal to the UBIA of such property. T's section 743(b) basis adjustment calculated as if adjusted basis of the qualified property were equal to its UBIA is $50,000 (the excess of $350,000, T's cost basis for its interest, over $300,000, T's share of the adjusted basis to PRS of the partnership's property). Thus, T's excess section 743(b) basis adjustment is equal to $50,000. For purposes of applying the UBIA limitation to T's share of QBI from PRS's trade or business, T's UBIA is equal to $350,000 ($300,000, T's one-third share of the qualified property's UBIA, plus $50,000, T's excess section 743(b) basis adjustment).

(2) *Example 2*.

(i) *Facts*. Assume the same facts as in *Example 1* of paragraph (a)(3)(iv)(D)(1) of this section, except that A sells its one-third interest in PRS to T for $200,000 when a section 754 election is in effect. At the time of the sale, the tax basis of the qualified property held by PRS is $750,000, and the amount of loss that would be allocated to T from a hypothetical transaction under § 1.743-1(d)(2) is $50,000. Thus, T's interest in PRS's previously taxed capital is equal to $250,000 ($200,000, the amount of cash T would receive if PRS liquidated immediately after the hypothetical transaction, increased by $50,000, T's share of loss from the hypothetical transaction). The amount of T's section 743(b) basis adjustment to PRS's qualified property is negative

[898] The "(ii)" prefix here was included in the regulations the IRS submitted but not included in the Federal Register. Everything following that prefix was in both versions. I retained this prefix given that the "(iii)" prefix was retained.

$50,000 (the excess of $250,000, T's share of the adjusted basis to PRS of the partnership's property, over $200,000, T's cost basis for its interest).

(ii) *Analysis*. In order for T to determine its UBIA, T must calculate its excess section 743(b) basis adjustment. T's excess section 743(b) basis adjustment is equal to an amount that would represent T's section 743(b) basis adjustment with respect to the same item of qualified property, as determined under §§ 1.743-1(b) and 1.755-1, but calculated as if the adjusted basis of all of PRS's property was equal to the UBIA of such property. T's section 743(b) basis adjustment calculated as if adjusted basis of the qualified property were equal to its UBIA is negative $100,000 (the excess of $300,000, T's share of the adjusted basis to PRS of the partnership's property, over $200,000, T's cost basis for its interest). T's excess section 743(b) basis adjustment to the qualified property is limited to the amount of T's section 743(b) basis adjustment of negative $50,000. Thus, T's excess section 743(b) basis adjustment is equal to negative $50,000. For purposes of applying the UBIA limitation to T's share of QBI from PRS's trade or business, T's UBIA is equal to $250,000 ($300,000, T's one-third share of the qualified property's UBIA, reduced by T's negative $50,000 excess section 743(b) basis adjustment).

Note that the test for qualified property refers to "unadjusted basis," so it does not take into account depreciation deductions or any other basis reductions, such as bonus depreciation deductions.[899] Also note that land is not "qualified property" except to the extent of depreciable land improvements.

Reg. § 1.199A-2(c)(3), "Unadjusted basis immediately after acquisition," provides:

(i) *In general*. Except as provided in paragraphs (c)(3)(ii) through (v) of this section, the term *unadjusted basis immediately after acquisition* (UBIA) means the basis on the placed in service date of the property as determined under section 1012 or other applicable sections of chapter 1 of the Code, including the provisions of subchapters O (relating to gain or loss on dispositions of property), C (relating to corporate distributions and adjustments), K (relating to partners and partnerships), and P (relating to capital gains and losses). UBIA is determined without regard to any adjustments described in section 1016(a)(2) or (3), to any adjustments for tax credits claimed by the individual or RPE (for example, under section 50(c)), or to any adjustments for any portion of the basis which the individual or RPE has elected to treat as an expense (for example, under sections 179, 179B, or 179C). However, UBIA does reflect the reduction in basis for the percentage of the individual's or RPE's use of property for the taxable year other than in the trade or business.

(ii) *Qualified property acquired in a like-kind exchange* –

(A) *In general*. Solely for purposes of this section, if property that is qualified property (replacement property) is acquired in a like-kind exchange that qualifies for deferral of gain or loss under section 1031, then the UBIA of such property is the same as the UBIA of the qualified property exchanged (relinquished property), decreased by excess boot or increased by the amount of money paid

[899] See part II.G.5 Code § 179 Expensing Substitute for Depreciation; Bonus Depreciation. Code § 179 expense is not available to nongrantor trusts.

or the fair market value of property not of a like kind to the relinquished property (other property) transferred by the taxpayer to acquire the replacement property. If the taxpayer acquires more than one piece of qualified property as replacement property that is of a like kind to the relinquished property in an exchange described in section 1031, UBIA is apportioned between or among the qualified replacement properties in proportion to their relative fair market values. Other property received by the taxpayer in a section 1031 transaction that is qualified property has a UBIA equal to the fair market value of such other property.

(B) *Excess boot*. For purposes of paragraph (c)(3)(ii)(A) of this section, excess boot is the amount of any money or the fair market value of other property received by the taxpayer in the exchange over the amount of appreciation in the relinquished property. Appreciation for this purpose is the excess of the fair market value of the relinquished property on the date of the exchange over the fair market value of the relinquished property on the date of the acquisition by the taxpayer.

(iii) *Qualified property acquired pursuant to an involuntary conversion* –

(A) *In general*. Solely for purposes of this section, if qualified property is compulsorily or involuntarily converted (converted property) within the meaning of section 1033 and qualified replacement property is acquired in a transaction that qualifies for deferral of gain under section 1033, then the UBIA of the replacement property is the same as the UBIA of the converted property, decreased by excess boot or increased by the amount of money paid or the fair market value of property not similar or related in service or use to the converted property (other property) transferred by the taxpayer to acquire the replacement property. If the taxpayer acquires more than one piece of qualified replacement property that meets the similar or related in service or use requirements in section 1033, UBIA is apportioned between the qualified replacement properties in proportion to their relative fair market values. Other property acquired by the taxpayer with the proceeds of an involuntary conversion that is qualified property has a UBIA equal to the fair market value of such other property.

(B) *Excess boot*. For purposes of paragraph (c)(3)(iii)(A) of this section, *excess boot* is the amount of any money or the fair market value of other property received by the taxpayer in the conversion over the amount of appreciation in the converted property. Appreciation for this purpose is the excess of the fair market value of the converted property on the date of the conversion over the fair market value of the converted property on the date of the acquisition by the taxpayer.

(iv) *Qualified property acquired in transactions described in section 168(i)(7)(B)*. Solely for purposes of this section, if qualified property is acquired in a transaction described in section 168(i)(7)(B) (pertaining to treatment of transferees in certain nonrecognition transactions), the transferee's UBIA in the qualified property shall be the same as the transferor's UBIA in the property, decreased by the amount of money received by the transferor in the transaction or increased by the amount of money paid by the transferee to acquire the property in the transaction.

(v) *Qualified property acquired from a decedent*. In the case of qualified property acquired from a decedent and immediately placed in service, the UBIA of the property will generally be the fair market value at the date of the decedent's death under section 1014. See section 1014 and the regulations thereunder. Solely for purposes of paragraph (c)(2)(i) of this section, a new depreciable period for the property commences as of the date of the decedent's death.

(vi) *Property acquired in a nonrecognition transaction with principal purpose of increasing UBIA*. If qualified property is acquired in a transaction described in section 1031, 1033, or 168(i)(7) with the principal purpose of increasing the UBIA of the qualified property, the UBIA of the acquired qualified property is its basis as determined under relevant Code sections and not under the rules described in paragraphs (c)(3)(i) through (iv) of this section. For example, in a section 1031 transaction undertaken with the principal purpose of increasing the UBIA of the replacement property, the UBIA of the replacement property is its basis as determined under section 1031(d).

Code § 1016(a)(2), (3) is the basis adjustment for accumulated depreciation.

Code § 168(i)(7)(B) refers to Code §§ 332 (parent corporation not recognizing gain on liquidation of a subsidiary), 351 (no gain or loss on contribution of property to a controlled corporation in exchange for stock in that corporation),[900] 721 (no gain or loss on contribution of property to a partnership in exchange for a partnership interest),[901] and 731 (no gain or loss on distribution of property from a partnership).[902]

The "depreciable period" means the period beginning on the date the taxpayer first placed the property in service and ending on the later of the tenth anniversary of being placed in service or the last day of the last full year in the applicable recovery period under Code § 168 (the current depreciation rules).[903] The IRS must:[904]

(1) apply rules similar to the rules under section 179(d)(2) in order to prevent the manipulation of the depreciable period of qualified property using transactions between related parties, and

(2) prescribe rules for determining the unadjusted basis immediately after acquisition of qualified property acquired in like-kind exchanges or involuntary conversions.

Reg. § 1.199A-2(c)(2), "Depreciable period," provides:

(i) *In general*. The term *depreciable period* means, with respect to qualified property of a trade or business, the period beginning on the date the property was first placed in service by the individual or RPE and ending on the later of -

(A) The date that is 10 years after such date, or

---

[900] See part § II.M.2 Buying into or Forming a Corporation.
[901] See part II.M.3 Buying into or Forming a Partnership.
[902] See part II.Q.8.b.i Distribution of Property by a Partnership.
[903] Code § 199A(b)(6)(B), which also provides that Code § 168(g), under which an extended depreciable life is required or permitted to be elected, does not apply in determining the property's depreciable life.
[904] Code § 199A(h).

(B) The last day of the last full year in the applicable recovery period that would apply to the property under section 168(c), regardless of any application of section 168(g).

(ii) *Additional first-year depreciation under section 168*. The additional first-year depreciation deduction allowable under section 168 (for example, under section 168(k) or (m)) does not affect the applicable recovery period under this paragraph for the qualified property.

(iii) *Qualified property acquired in transactions subject to section 1031 or section 1033*. Solely for purposes of paragraph (c)(2)(i) of this section, the following rules apply to qualified property acquired in a like-kind exchange or in an involuntary conversion (replacement property).

(A) *Replacement property received in a section 1031 or 1033 transaction*. The date on which replacement property that is of like-kind to relinquished property or is similar or related in service or use to involuntarily converted property was first placed in service by the individual or RPE is determined as follows -

(1) For the portion of the individual's or RPE's UBIA, as defined in paragraph (c)(3) of this section, in such replacement property that does not exceed the individual's or RPE's UBIA in the relinquished property or involuntarily converted property, the date such portion in the replacement property was first placed in service by the individual or RPE is the date on which the relinquished property or involuntarily converted property was first placed in service by the individual or RPE; and

(2) For the portion of the individual's or RPE's UBIA, as defined in paragraph (c)(3) of this section, in such replacement property that exceeds the individual's or RPE's UBIA in the relinquished property or involuntarily converted property, such portion in the replacement property is treated as separate qualified property that the individual or RPE first placed in service on the date on which the replacement property was first placed in service by the individual or RPE.

(B) *Other property received in a section 1031 or 1033 transaction*. Other property, as defined in paragraph (c)(3)(ii) or (iii) of this section, that is qualified property is treated as separate qualified property that the individual or RPE first placed in service on the date on which such other property was first placed in service by the individual or RPE.

(iv) *Qualified property acquired in transactions subject to section 168(i)(7)*. If an individual or RPE acquires qualified property in a transaction described in section 168(i)(7)(B) (pertaining to treatment of transferees in certain nonrecognition transactions), the individual or RPE must determine the date on which the qualified property was first placed in service solely for purposes of paragraph (c)(2)(i) of this section as follows -

(A) For the portion of the transferee's UBIA in the qualified property that does not exceed the transferor's UBIA in such property, the date such portion was first placed in service by the transferee is the date on which the transferor first placed the qualified property in service; and

(B) For the portion of the transferee's UBIA in the qualified property that exceeds the transferor's UBIA in such property, such portion is treated as separate qualified property that the transferee first placed in service on the date of the transfer.

(iv) *Excess section 743(b) basis adjustment*. Solely for purposes of paragraph (c)(2)(i) of this section, an excess section 743(b) basis adjustment with respect to an item of partnership property that is qualified property is treated as being placed in service when the transfer of the partnership interest occurs, and the recovery period for such property is determined under § 1.743-1(j)(4)(i)(B) with respect to positive basis adjustments and § 1.743-1(j)(4)(ii)(B) with respect to negative basis adjustments.

Reg. § 1.199A-2(c)(4) provides examples illustrating Reg. § 1.199A-2(c).

Reg. § 1.199A-2(c)(4)(i), Example (1), provides:

(A) On January 5, 2012, A purchases Real Property X for $1 million and places it in service in A's trade or business. A's trade or business is not an SSTB. A's basis in Real Property X under section 1012 is $1 million. Real Property X is qualified property within the meaning of Section 199A(b)(6). As of December 31, 2018, A's basis in Real Property X, as adjusted under section 1016(a)(2) for depreciation deductions under section 168(a), is $821,550.

(B) For purposes of Section 199A(b)(2)(B)(ii) and this section, A's UBIA of Real Property X is its $1 million cost basis under section 1012, regardless of any later depreciation deductions under section 168(a) and resulting basis adjustments under section 1016(a)(2).

Reg. § 1.199A-2(c)(4)(ii), Example (2), provides:

(A) The facts are the same as in *Example1* of paragraph (c)(4)(i) of this section, except that on January 15, 2019, A enters into a like-kind exchange under section 1031 in which A exchanges Real Property X for Real Property Y. Real Property Y has a value of $1 million. No cash or other property is involved in the exchange. As of January 15, 2019, A's basis in Real Property X, as adjusted under section 1016(a)(2) for depreciation deductions under section 168(a), is $820,482.

(B) A's UBIA in Real Property Y is $1 million as determined under paragraph (c)(3)(ii) of this section. Pursuant to paragraph (c)(2)(iii)(A) of this section, Real Property Y is first placed in service by A on January 5, 2012, which is the date on which Real Property X was first placed in service by A.

Reg. § 1.199A-2(c)(4)(iii), Example (3), provides:

(A) The facts are the same as in *Example 1* of paragraph (c)(4)(i) of this section, except that on January 15, 2019, A enters into a like-kind exchange under section 1031, in which A exchanges Real Property X for Real Property Y. Real Property X has appreciated in value to $1.3 million, and Real Property Y also has a value of $1.3 million. No cash or other property is involved in the exchange. As of

January 15, 2019, A's basis in Real Property X, as adjusted under section 1016(a)(2), is $820,482.

(B) A's UBIA in Real Property Y is $1 million as determined under paragraph (c)(3)(ii) of this section. Pursuant to paragraph (c)(2)(iii)(A) of this section, Real Property Y is first placed in service by A on January 5, 2012, which is the date on which Real Property X was first placed in service by A.

Reg. § 1.199A-2(c)(4)(iv), Example (4), provides:

(A) The facts are the same as in *Example 1* of paragraph (c)(4)(i) of this section, except that on January 15, 2019, A enters into a like-kind exchange under section 1031, in which A exchanges Real Property X for Real Property Y. Real Property X has appreciated in value to $1.3 million, but Real Property Y has a value of $1.5 million. A therefore adds $200,000 in cash to the exchange of Real Property X for Real Property Y. On January 15, 2019, A places Real Property Y in service. As of January 15, 2019, A's basis in Real Property X, as adjusted under section 1016(a)(2), is $820,482.

(B) A's UBIA in Real Property Y is $1.2 million as determined under paragraph (c)(3)(ii) of this section ($1 million in UBIA from Real Property X plus $200,000 cash paid by A to acquire Real Property Y). Because the UBIA of Real Property Y exceeds the UBIA of Real Property X, Real Property Y is treated as being two separate qualified properties for purposes of applying paragraph (c)(2)(iii)(A) of this section. One property has a UBIA of $1 million (the portion of A's UBIA of $1.2 million in Real Property Y that does not exceed A's UBIA of $1 million in Real Property X) and it is first placed in service by A on January 5, 2012, which is the date on which Real Property X was first placed in service by A. The other property has a UBIA of $200,000 (the portion of A's UBIA of $1.2 million in Real Property Y that exceeds A's UBIA of $1 million in Real Property X) and it is first placed in service by A on January 15, 2019, which is the date on which Real Property Y was first placed in service by A.

Reg. § 1.199A-2(c)(4)(v), Example (5), provides:

(A) The facts are the same as in *Example 1* of paragraph (c)(4)(i) of this section, except that on January 15, 2019, A enters into a like-kind exchange under section 1031, in which A exchanges Real Property X for Real Property Y. Real Property X has appreciated in value to $1.3 million. Real Property Y has a fair market value of $1 million. As of January 15, 2019, A's basis in Real Property X, as adjusted under section 1016(a)(2), is $820,482. Pursuant to the exchange, A receives Real Property Y and $300,000 in cash.

(B) A's UBIA in Real Property Y is $1 million as determined under paragraph (c)(3)(ii) of this section ($1 million in UBIA from Real Property X, less $0 excess boot ($300,000 cash received in the exchange over $300,000 in appreciation in Property X, which is equal to the excess of the $1.3 million fair market value of Property X on the date of the exchange over $1 million fair market value of Property X on the date of acquisition by the taxpayer)). Pursuant to paragraph (c)(2)(iii)(A) of this section, Real Property Y is first placed in service by A on January 5, 2012, which is the date on which Real Property X was first placed in service by A.

Reg. § 1.199A-2(c)(4)(vi), Example (6), provides:

(A) The facts are the same as in *Example 1* of paragraph (c)(4)(i) of this section, except that on January 15, 2019, A enters into a like-kind exchange under section 1031, in which A exchanges Real Property X for Real Property Y. Real Property X has appreciated in value to $1.3 million. Real Property Y has a fair market value of $900,000. Pursuant to the exchange, A receives Real Property Y and $400,000 in cash. As of January 15, 2019, A’s basis in Real Property X, as adjusted under section 1016(a)(2), is $820,482.

(B) A’s UBIA in Real Property Y is $900,000 as determined under paragraph (c)(3)(ii) of this section ($1 million in UBIA from Real Property X less $100,000 excess boot ($400,000 in cash received in the exchange over $300,000 in appreciation in Property X, which is equal to the excess of the $1.3 million fair market value of Property X on the date of the exchange over the $1 million fair market value of Property X on the date of acquisition by the taxpayer)). Pursuant to paragraph (c)(2)(iii)(A) of this section, Real Property Y is first placed in service by A on January 5, 2012, which is the date on which Real Property X was first placed in service by A.

Reg. § 1.199A-2(c)(4)(vii), Example (7), provides:

(A) The facts are the same as in *Example 1* of paragraph (c)(4)(i) of this section, except that on January 15, 2019, A enters into a like-kind exchange under section 1031, in which A exchanges Real Property X for Real Property Y. Real Property X has declined in value to $900,000, and Real Property Y also has a value of $900,000. No cash or other property is involved in the exchange. As of January 15, 2019, A’s basis in Real Property X, as adjusted under section 1016(a)(2), is $820,482.

(B) Even though Real Property Y is worth only $900,000, A’s UBIA in Real Property Y is $1 million as determined under paragraph (c)(3)(ii) of this section because no cash or other property was involved in the exchange. Pursuant to paragraph (c)(2)(iii)(A) of this section, Real Property Y is first placed in service by A on January 5, 2012, which is the date on which Real Property X was first placed in service by A.

Reg. § 1.199A-2(c)(4)(viii), Example (8), provides:

(A) C operates a trade or business that is not an SSTB as a sole proprietorship. On January 5, 2011, C purchases Machinery Y for $10,000 and places it in service in C’s trade or business. C’s basis in Machinery Y under section 1012 is $10,000. Machinery Y is qualified property within the meaning of Section 199A(b)(6). Assume that Machinery Y’s recovery period under section 168(c) is 10 years, and C depreciates Machinery Y under the general depreciation system by using the straight-line depreciation method, a 10-year recovery period, and the half-year convention. As of December 31, 2018, C’s basis in Machinery Y, as adjusted under section 1016(a)(2) for depreciation deductions under section 168(a), is $2,500. On January 1, 2019, C incorporates the sole proprietorship and elects to treat the newly formed entity as an S corporation for Federal income tax purposes. C contributes

Machinery Y and all other assets of the trade or business to the S corporation in a non-recognition transaction under section 351. The S corporation immediately places all the assets in service.

(B) For purposes of Section 199A(b)(2)(B)(ii) and this section, C's UBIA of Machinery Y from 2011 through 2018 is its $10,000 cost basis under section 1012, regardless of any later depreciation deductions under section 168(a) and resulting basis adjustments under section 1016(a)(2). The S corporation's basis of Machinery Y is $2,500, the basis of the property under section 362 at the time the S corporation places the property in service. Pursuant to paragraph (c)(3)(iv) of this section, S corporation's UBIA of Machinery Y is $10,000, which is C's UBIA of Machinery Y. Pursuant to paragraph (c)(2)(iv)(A) of this section, for purposes of determining the depreciable period of Machinery Y, the S corporation's placed in service date of Machinery Y will be January 5, 2011, which is the date C originally placed the property in service in 2011. Therefore, Machinery Y may be qualified property of the S corporation (assuming it continues to be used in the business) for 2019 and 2020 and will not be qualified property of the S corporation after 2020, because its depreciable period will have expired.

Reg. § 1.199A-2(c)(4)(ix), Example (9), provides:

(A) LLC, a partnership, operates a trade or business that is not an SSTB. On January 5, 2011, LLC purchases Machinery Z for $30,000 and places it in service in LLC's trade or business. LLC's basis in Machinery Z under section 1012 is $30,000. Machinery Z is qualified property within the meaning of Section 199A(b)(6). Assume that Machinery Z's recovery period under section 168(c) is 10 years, and LLC depreciates Machinery Z under the general depreciation system by using the straight-line depreciation method, a 10-year recovery period, and the half-year convention. As of December 31, 2018, LLC's basis in Machinery Z, as adjusted under section 1016(a)(2) for depreciation deductions under section 168(a), is $7,500. On January 1, 2019, LLC distributes Machinery Z to Partner A in full liquidation of Partner A's interest in LLC. Partner A's outside basis in LLC is $35,000.

(B) For purposes of Section 199A(b)(2)(B)(ii) and this section, LLC's UBIA of Machinery Z from 2011 through 2018 is its $30,000 cost basis under section 1012, regardless of any later depreciation deductions under section 168(a) and resulting basis adjustments under section 1016(a)(2). Prior to the distribution to Partner A, LLC's basis of Machinery Z is $7,500. Under section 732(b), Partner A's basis in Machinery Z is $35,000. Pursuant to paragraph (c)(3)(iv) of this section, upon distribution of Machinery Z, Partner A's UBIA of Machinery Z is $30,000, which was LLC's UBIA of Machinery Z.

II.E.1.c.vii. Effect of Losses from Qualified Trades or Businesses on the Code § 199A Deduction

For some practical examples of the ideas this part discusses, see Masciantonio, "Limiting the impact of negative QBI," *Journal of Accountancy* pp. 46-52 (11/2020).

If the net amount of qualified income, gain, deduction, and loss with respect to qualified trades or businesses of the taxpayer for any taxable year is less than zero, that amount is treated as a loss from a qualified trade or business in the succeeding taxable year.[905] The Senate's report states (note that the Conference Committee reduced the deduction from 23% to 20%):

> If the net amount of qualified business income from all qualified trades or businesses during the taxable year is a loss, it is carried forward as a loss from a qualified trade or business in the next taxable year. Similar to a qualified trade or business that has a qualified business loss for the current taxable year, any deduction allowed in a subsequent year is reduced (but not below zero) by 23 percent of any carryover qualified business loss. For example, Taxpayer has qualified business income of $20,000 from qualified business A and a qualified business loss of $50,000 from qualified business B in Year 1. Taxpayer is not permitted a deduction for Year 1 and has a carryover qualified business loss of $30,000 to Year 2. In Year 2, Taxpayer has qualified business income of $20,000 from qualified business A and qualified business income of $50,000 from qualified business B. To determine the deduction for Year 2, Taxpayer reduces the 23 percent deductible amount determined for the qualified business income of $70,000 from qualified businesses A and B by 23 percent of the $30,000 carryover qualified business loss.

For individuals with taxable income for the taxable year that does not exceed the threshold amount, Reg. § 1.199A-1(c)(2), "Carryover rules," provides:

> (i) *Negative total QBI amount*. If the total QBI amount is less than zero, the portion of the individual's Section 199A deduction related to QBI is zero for the taxable year. The negative total QBI amount is treated as negative QBI from a separate trade or business in the succeeding taxable years of the individual for purposes of Section 199A and this section. This carryover rule does not affect the deductibility of the loss for purposes of other provisions of the Code.
>
> (ii) *Negative combined qualified REIT dividends/qualified PTP income*. If the combined amount of REIT dividends and qualified PTP income is less than zero, the portion of the individual's Section 199A deduction related to qualified REIT dividends and qualified PTP income is zero for the taxable year. The negative combined amount must be carried forward and used to offset the combined amount of REIT dividends and qualified PTP income in the succeeding taxable years of the individual for purposes of Section 199A and this section. This carryover rule does not affect the deductibility of the loss for purposes of other provisions of the Code.

Reg. § 1.199A-1(d)(3)(iii), "Negative combined qualified REIT dividends/qualified PTP income," provides:

> If the combined amount of REIT dividends and qualified PTP income is less than zero, the portion of the individual's Section 199A deduction related to qualified REIT dividends and qualified PTP income is zero for the taxable year. The negative combined amount must be carried forward and used to offset the combined amount of REIT dividends and qualified PTP income in the succeeding taxable years of the individual for purposes of Section 199A and this section. This carryover rule does not affect the deductibility of the loss for purposes of other provisions of the Code.

[905] Code § 199A(c)(2).

Thus, losses from QBI are computed completely separately from losses from qualified PTP income that exceed qualified REIT dividends.

For individuals with taxable income for the taxable year that exceeds the threshold amount, Reg. § 1.199A-1(d)(2)(iii), "Netting and Carryover," provides:

> (A) *Netting*. If an individual's QBI from at least one trade or business (including an aggregated trade or business) is less than zero, the individual must offset the QBI attributable to each trade or business (or aggregated trade or business) that produced net positive QBI with the QBI from each trade or business (or aggregated trade or business) that produced net negative QBI in proportion to the relative amounts of net QBI in the trades or businesses (or aggregated trades or businesses) with positive QBI. The adjusted QBI is then used in paragraph (d)(2)(iv) of this section. The W-2 wages and UBIA of qualified property from the trades or businesses (including aggregated trades or businesses) that produced net negative QBI are not taken into account for purposes of this paragraph (d) and are not carried over to the subsequent year.
>
> (B) *Carryover of negative total QBI amount*. If an individual's QBI from all trades or businesses (including aggregated trades or businesses) combined is less than zero, the QBI component is zero for the taxable year. This negative amount is treated as negative QBI from a separate trade or business in the succeeding taxable years of the individual for purposes of Section 199A and this section. This carryover rule does not affect the deductibility of the loss for purposes of other provisions of the Code. The W-2 wages and UBIA of qualified property from the trades or businesses (including aggregated trades or businesses) that produced net negative QBI are not taken into account for purposes of this paragraph (d) and are not carried over to the subsequent year.

Let's see how some examples apply these rules. Reg. § 1.199A-1(d)(4)(vii), Example (7), part (A) provides the facts on which the examples below are based:

> F, an unmarried individual, owns as a sole proprietor 100 percent of three trades or businesses, Business X, Business Y, and Business Z. None of the businesses hold qualified property. F does not aggregate the trades or businesses under § 1.199A-4. For taxable year 2018, Business X generates $1 million of QBI and pays $500,000 of W-2 wages with respect to the business. Business Y also generates $1 million of QBI but pays no wages. Business Z generates $2,000 of QBI and pays $500,000 of W-2 wages with respect to the business. F also has $750,000 of wage income from employment with an unrelated company. After allowable deductions unrelated to the businesses, F's taxable income is $2,722,000.

Reg. § 1.199A-1(d)(4)(ix) provides Example (9):

> (A) Assume the same facts as in *Example 7* of paragraph (d)(4)(vii) of this section, except that for taxable year 2018, Business Z generates a loss that results in ($600,000) of negative QBI and pays $500,000 of W-2 wages. After allowable deductions unrelated to the businesses, F's taxable income is $2,120,000. Because Business Z had negative QBI, F must offset the positive QBI from Business X and Business Y with the negative QBI from Business Z in proportion to the relative amounts of positive QBI from Business X and Business Y. Because Business X and

Business Y produced the same amount of positive QBI, the negative QBI from Business Z is apportioned equally among Business X and Business Y. Therefore, the adjusted QBI for each of Business X and Business Y is $700,000 ($1 million plus 50% of the negative QBI of $600,000). The adjusted QBI in Business Z is $0, because its negative QBI has been fully apportioned to Business X and Business Y.

(B) Because F's taxable income is above the threshold amount, the QBI component of F's Section 199A deduction is subject to the W-2 wage and UBIA of qualified property limitations. These limitations must be applied on a business-by-business basis. None of the businesses hold qualified property, therefore only the 50% of W-2 wage limitation must be calculated. For Business X, the lesser of 20% of QBI ($700,000*20% = $140,000) and 50% of W-2 wages ($500,000*50% = $250,000) is $140,000. Business Y pays no W-2 wages. The lesser of 20% of Business Y's QBI ($700,000*20% = $140,000) and 50% of its W-2 wages (zero) is zero.

(C) F must combine the amounts determined in paragraph (d)(4)(ix)(B) of this section and compare the sum to 20% of taxable income. F's Section 199A deduction equals the lesser of these two amounts. The combined amount from paragraph (d)(4)(ix)(B) of this section is $140,000 ($140,000 + zero) and 20% of F's taxable income is $424,000 ($2,120,000*20%). Thus, F's Section 199A deduction for 2018 is $140,000. There is no carryover of any loss into the following taxable year for purposes of Section 199A.

Business Z's wages are totally wasted from a Code § 199A view, because it has a loss and the wages cannot support a deduction. That's not much of a different result that Example (7), where Business Z has nominal income. Note also the way that the losses were apportioned from Business Z to Businesses X and Y according to their respective shares of QBI.

Reg. § 1.199A-1(d)(4)(x) provides Example (10):

(A) Assume the same facts as in *Example 9* of paragraph (d)(4)(ix) of this section, except that F aggregates Business X, Business Y, and Business Z under the rules of § 1.199A-4.

(B) Because F's taxable income is above the threshold amount, the QBI component of F's Section 199A deduction is subject to the W-2 wage and UBIA of qualified property limitations. Because the businesses are aggregated, these limitations are applied on an aggregated basis. None of the businesses holds qualified property, therefore only the W-2 wage limitation must be calculated. F applies the limitation by determining the lesser of 20% of the QBI from the aggregated businesses ($1,400,000*20% = $280,000) and 50% of W-2 wages from the aggregated businesses ($1,000,000*50% = $500,000), or $280,000. F's Section 199A deduction is equal to the lesser of $280,000 and 20% of F's taxable income ($2,120,000*20% = $424,000). Thus, F's Section 199A deduction for 2018 is $280,000. There is no carryover of any loss into the following taxable year for purposes of Section 199A.

Example (10) shows the benefit of irrevocably electing to aggregate, as described in part II.E.1.c.iii.(d) Aggregating Activities for Code § 199A. Although Example (10) has more wages than necessary to support the $280,000 deduction, aggregation enabled F to use most of wages that were wasted in Example (9).

Reg. § 1.199A-1(d)(4)(xi) provides Example (11):

(A) Assume the same facts as in *Example 7* of paragraph (d)(4)(vii) of this section, except that Business Z generates a loss that results in ($2,150,000) of negative QBI and pays $500,000 of W-2 wages with respect to the business in 2018. Thus, F has a negative combined QBI of ($150,000) when the QBI from all of the businesses are added together ($1 million plus $1 million minus the loss of ($2,150,000)). Because F has a negative combined QBI for 2018, F has no Section 199A deduction with respect to any trade or business for 2018. Instead, the negative combined QBI of ($150,000) carries forward and will be treated as negative QBI from a separate trade or business for purposes of computing the Section 199A deduction in the next taxable year. None of the W-2 wages carry forward. However, for income tax purposes, the $150,000 loss may offset F's $750,000 of wage income (assuming the loss is otherwise allowable under the Code).

(B) In taxable year 2019, Business X generates $200,000 of net QBI and pays $100,000 of W-2 wages with respect to the business. Business Y generates $150,000 of net QBI but pays no wages. Business Z generates a loss that results in ($120,000) of negative QBI and pays $500 of W-2 wages with respect to the business. F also has $750,000 of wage income from employment with an unrelated company. After allowable deductions unrelated to the businesses, F's taxable income is $960,000. Pursuant to paragraph (d)(2)(iii)(B) of this section, the ($150,000) of negative QBI from 2018 is treated as arising in 2019 from a separate trade or business. Thus, F has overall net QBI of $80,000 when all trades or businesses are taken together ($200,000) plus $150,000 minus $120,000 minus the carryover loss of $150,000). Because Business Z had negative QBI and F also has a negative QBI carryover amount, F must offset the positive QBI from Business X and Business Y with the negative QBI from Business Z and the carryover amount in proportion to the relative amounts of positive QBI from Business X and Business Y. Because Business X produced 57.14% of the total QBI from Business X and Business Y, 57.14% of the negative QBI from Business Z and the negative QBI carryforward must be apportioned to Business X, and the remaining 42.86% allocated to Business Y. Therefore, the adjusted QBI in Business X is $45,722 ($200,000 minus 57.14% of the loss from Business Z ($68,568), minus 57.14% of the carryover loss ($85,710). The adjusted QBI in Business Y is $34,278 ($150,000, minus 42.86% of the loss from Business Z ($51,432) minus 42.86% of the carryover loss ($64,290)). The adjusted QBI in Business Z is $0, because its negative QBI has been apportioned to Business X and Business Y.

(C) Because F's taxable income is above the threshold amount, the QBI component of F's Section 199A deduction is subject to the W-2 wage and UBIA of qualified property limitations. These limitations must be applied on a business-by-business basis. None of the businesses hold qualified property, therefore only the 50% of W-2 wage limitation must be calculated. For Business X, 20% of QBI is $9,144 ($45,722*20%) and 50% of W-2 wages is $50,000 ($100,000*50%), so the lesser amount is $9,144. Business Y pays no W-2 wages. Twenty percent of Business Y's QBI is $6,856 ($34,278*20%) and 50% of its W-2 wages (zero) is zero, so the lesser amount is zero.

(D) F must then compare the combined amounts determined in paragraph (d)(4)(xi)(C) of this section to 20% of F's taxable income. The Section 199A deduction equals the lesser of these amounts. F's combined amount from paragraph (d)(4)(xi)(C) of this section is $9,144 ($9,144 plus zero) and 20% of F's taxable income is $192,000 ($960,000 x 20%).[906] Thus, F's Section 199A deduction for 2019 is $9,144. There is no carryover of any negative QBI into the following taxable year for purposes of Section 199A.

Note again how losses were apportioned from Business Z to Businesses X and Y according to their respective shares of QBI – this time not only for the current loss but also the carryover loss. Also note that some wages from Business X and all wages from Business Z were wasted, with Business Y not receiving any benefit from them. However, at least Business Y was able to absorb some of the losses from Business Z and the carryover losses, so the Business X was not hit with all of them and was therefore able to use its wages.

Reg. § 1.199A-1(d)(4)(xii) provides Example (12):

(A) Assume the same facts as in Example 11 of paragraph (d)(4)(xi) of this section, except that F aggregates Business X, Business Y, and Business Z under the rules of § 1.199A-4. For 2018, F's QBI from the aggregated trade or business is ($150,000). Because F has a combined negative QBI for 2018, F has no Section 199A deduction with respect to any trade or business for 2018. Instead, the negative combined QBI of ($150,000) carries forward and will be treated as negative QBI from a separate trade or business for purposes of computing the Section 199A deduction in the next taxable year. However, for income tax purposes, the $150,000 loss may offset taxpayer's $750,000 of wage income (assuming the loss is otherwise allowable under the Code).

(B) In taxable year 2019, F will have QBI of $230,000 and W-2 wages of $100,500 from the aggregated trade or business. F also has $750,000 of wage income from employment with an unrelated company. After allowable deductions unrelated to the businesses, F's taxable income is $960,000. F must treat the negative QBI carryover loss ($150,000) from 2018 as a loss from a separate trade or business for purposes of Section 199A. This loss will offset the positive QBI from the aggregated trade or business, resulting in an adjusted QBI of $80,000 ($230,000-$150,000).

(C) Because F's taxable income is above the threshold amount, the QBI component of F's Section 199A deduction is subject to the W-2 wage and UBIA of qualified property limitations. These limitations must be applied on a business-by-business basis. None of the businesses hold qualified property, therefore only the 50% of W-2 wage limitation must be calculated. For the aggregated trade or business, the lesser of 20% of QBI ($80,000*20% = $16,000) and 50% of W-2 wages ($100,500*50% = $50,250) is $16,000. F's Section 199A deduction equals the lesser of that amount ($16,000) and 20% of F's taxable income ($960,000*20% = $192,000). Thus, F's Section 199A deduction for 2019 is $16,000. There is no carryover of any negative QBI into the following taxable year for purposes of Section 199A.

Once again, aggregation has increased the deduction by allowing the wages of all of the qualified businesses to be counted.

[906] I added the period at the end of the sentence, because it was in the originally released regulations.

A business that is projected to lose money might consider deferring wages to the next year if the wage limitation is a significant limitation in determining its owners' Code § 199A deduction. Of course, deferring that deduction also increases the owners' current taxable income, so any such planning should consider its context in the owners' overall tax planning.

As the preamble to the final regulations summarizes in the section explaining economic impact:[907]

> As an example, § 1.199A-1 prescribes the steps taxpayers must take to calculate the QBI deduction in a manner that avoids perverse incentives for shifting wages and capital assets across businesses. The statute does not address the ordering for how the W-2 wages and UBIA of qualified property limitations should be applied when taxpayers have both positive and negative QBI from different businesses. The final regulations clarify that in such cases the negative QBI should offset positive QBI prior to applying the wage and capital limitations. For taxpayers who would have assumed in the alternate that negative QBI offsets positive QBI after applying the wage and capital limitations, the regulations weaken the incentive to shift W-2 wage labor or capital (in the form of qualified property) from one business to another to maximize the Section 199A deduction.
>
> To illustrate this, consider a taxpayer who is above the statutory threshold and owns two non-service sector businesses, A and B. A has net qualified income of $10,000, while B has net qualified income of -$5,000. Suppose that A paid $3,000 in W-2 wages, B paid $1,000 in W-2 wages, and neither business has tangible capital. If negative QBI offsets positive QBI after applying the wage and capital limitations, then A generates a tentative deduction of $1,500, while B generates a tentative deduction of -$1,000, for a total deduction of $500. After moving B's W-2 wages to A, A's tentative deduction rises to $2,000, while B's remains -$1,000, increasing the total deduction to $1,000. If, on the other hand, negative QBI offsets positive QBI prior to applying the wage and capital limitations (as in the final regulations), then A and B have combined income of $5,000, and the total deduction is $1,000 because the wage and capital limitations are non-binding. After moving B's wages to A, the total deduction remains $1,000. Thus, an incentive to shift wages arises if negative QBI offsets positive QBI after applying the wage and capital limitations. By taking the opposite approach, § 1.199A-1 reduces incentives for such tax-motivated, economically inefficient reallocations of labor (or capital) relative to a scenario in which offsets were taken after wage and capital limitations were applied.

In the preamble to the final regulations, T.D. 9847 (2/8/2019), parts IV.A.2 and 3 provide:

> **2. Previously Disallowed Losses**
>
> The proposed regulations provide that previously disallowed losses or deductions (including under sections 465, 469, 704(d), and 1366(d)) allowed in the taxable year are taken into account for purposes of computing QBI so long as the losses were incurred in a taxable year beginning after January 1, 2018. Because previously disallowed losses incurred for taxable years beginning before January 1, 2018, cannot be taken into

[907] T.D. 9847 (2/8/2019), Special Analyses, part I, "Regulatory Planning and Review – Economic Analysis," subpart C [D?], "Economic Analysis of § 1.199A-1," paragraph 2, "Anticipated benefits of § 1.199A-1."

account for purposes of computing QBI, several commenters recommended that final regulations provide an ordering rule for the use of such losses. Commenters recommended both “last-in, first-out” (LIFO) and “first-in, first-out” (FIFO) approaches, with a slight preference for the FIFO approach as consistent with former section 199. The Treasury Department and the IRS agree that taxpayers with previously disallowed losses for taxable years beginning both before and after January 1, 2018, require an ordering rule to determine which portion of a previously disallowed loss can be taken into account for purposes of Section 199A. Consistent with regulations under former section 199, these regulations provide that any losses disallowed, suspended, or limited under the provisions of sections 465, 469, 704(d), and 1366(d), or any other similar provisions, shall be used, for purposes of Section 199A and these regulations, in order from the oldest to the most recent on a FIFO basis.

One commenter suggested that a special rule should be provided to identify the section 469 trade or business losses that are used to offset income if the taxpayer’s section 469 groupings differ from the taxpayer’s Section 199A aggregations. The commenter recommended that any section 469 loss carryforward that is later used should be allocated across the taxpayer’s Section 199A aggregations based on income with respect to such aggregations in the year the loss was generated. The Treasury Department and the IRS decline to adopt this comment. Concurrently with the publication of these proposed regulations, the Treasury Department and the IRS are publishing proposed regulations under Section 199A (REG-134652-18) that treat previously suspended losses as losses from a separate trade or business for purposes of Section 199A.

3. Net Operating Losses and the Interaction of Section 199A with Section 461(l)

The preamble to the proposed regulations requested comments on the interaction of sections 199A and 461(l). Commenters requested guidance in many areas including: Ordering rules for the use of suspended active business losses; methods for tracing losses to a taxpayer’s various trades or businesses; whether a loss retains its character; whether a deduction under Section 199A is a loss for calculating the loss limitation; and how the Section 199A loss carryover rules interact with a loss limited under section 461(l). The Treasury Department and the IRS understand that taxpayers will need guidance as to the interaction of Section 199A and section 461(l). However, these issues are beyond the scope of these regulations and will be considered in future guidance under section 461(l). Section 1.199A-3(b)(1)(v) retains and clarifies the rule that while a deduction under section 172 for a net operating loss is generally not considered to be with respect to a trade or business (and thus not taken into account in determining QBI), an excess business loss under section 461(l) is treated as a net operating loss carryover to the following taxable year and is taken into account for purposes of computing QBI in the subsequent taxable year in which it is deducted.

The preamble to the proposed regulations [REG-134652-18] referred to in the final regulations (the “2019 Proposed Regs”) explain (with the “August Proposed Regulations” referring to REG-107892-18 (8/16/2018)):

These proposed regulations propose rules addressing issues not addressed in the August Proposed Regulations that are necessary to provide taxpayers with computational, definitional, and anti-avoidance guidance regarding the application of Section 199A. Specifically, these proposed regulations contain amendments to two substantive sections of the August Proposed Regulations, §§ 1.199A-3 and 1.199A-6, each of which provides rules relevant to the calculation of the Section 199A deduction. These additional proposed rules respond to comments received on the August Proposed Regulations as well as address certain issues identified after additional study. This Explanation of Provisions describes each of the proposed rules contained in this document in turn. The Treasury Department and the IRS request comments on all aspects of these proposed regulations.

I. Treatment of Previously Suspended Losses That Constitute QBI.

Section 1.199A-3(b)(1)(iv) of the final regulations provides that previously disallowed losses or deductions (including under sections 465, 469, 704(d), and 1366(d)) allowed in the taxable year are generally taken into account for purposes of computing QBI except to the extent the losses or deductions were disallowed, suspended, limited, or carried over from taxable years ending before January 1, 2018. The final regulations also provide a first-in-first-out ordering rule. One commenter on the August Proposed Regulations suggested that a special rule should be provided to identify the section 469 trade or business losses that are used to offset income if the taxpayer’s section 469 groupings differ from the taxpayer’s Section 199A aggregations. The commenter recommended that any section 469 loss carryforward that is later used should be allocated across the taxpayer’s Section 199A aggregations based on income with respect to such aggregations in the year the loss was generated.

The Treasury Department and the IRS believe that that previously disallowed losses should be treated as losses from a separate trade or business for both the reasons stated by the commenter and because the losses may relate to a trade or business that is no longer in existence. Accordingly, these proposed regulations amend § 1.199A-3(b)(1)(iv) to provide that such losses are treated as loss from a separate trade or business. To the extent that losses relate to a PTP, they must be treated as losses from a separate PTP. Section 1.199A-3(b)(1)(iv)(B) provides that attributes of the disallowed loss are determined in the year the loss is incurred.

In the preamble to the 2020 final regulations, T.D. 9899 (6/25/2020), “SUPPLEMENTARY INFORMATION” provides:

Background

This document contains amendments to the Income Tax Regulations (26 CFR part 1) under Section 199A of the Code.

Section 199A was enacted on December 22, 2017, by section 11011 of Public Law 115-97, 131 Stat. 2054, commonly referred to as the Tax Cuts and Jobs Act (TCJA), and was amended on March 23, 2018, retroactively to January 1, 2018, by section 101 of Division T of the Consolidated Appropriations Act, 2018, Pub. L. 115-141, 132 Stat. 348 (2018 Act). Section 199A applies to taxable years beginning after 2017 and before 2026.

Section 199A provides a deduction of up to 20 percent of QBI from a U.S. trade or business operated as a sole proprietorship or through a partnership, S corporation, trust, or estate (Section 199A deduction). The Section 199A deduction may be taken by individuals and by some trusts and estates. A Section 199A deduction is not available for wage income or for income earned by a C corporation (as defined in section 1361(a)(2)).

If the taxpayer's taxable income exceeds the statutorily defined amount in Section 199A(e)(2) (threshold amount), the taxpayer's Section 199A deduction may be limited based on (i) the type of trade or business conducted, (ii) the amount of W-2 wages paid with respect to the trade or business (W-2 wages), and/or (iii) the unadjusted basis immediately after acquisition (UBIA) of qualified property held for use in the trade or business (UBIA of qualified property). These statutory limitations are subject to phase-in rules in Section 199A(b)(3)(B) based upon taxable income above the threshold amount (phase-in rules).

Section 199A also provides individuals and some trusts and estates, but not corporations, a deduction of up to 20 percent of their combined qualified real estate investment trust (REIT) dividends and qualified publicly traded partnership (PTP) income, including qualified REIT dividends and qualified PTP income earned through passthrough entities. This component of the Section 199A deduction is not limited by W-2 wages or UBIA of qualified property.

Overall, the Section 199A deduction is the lesser of (1) the sum of the combined QBI and qualified REIT and PTP components described in the prior two paragraphs or (2) an amount equal to 20 percent of the excess (if any) of the taxpayer's taxable income for the taxable year over the taxpayer's net capital gain for the taxable year.

Additionally, Section 199A(g) provides that specified agricultural or horticultural cooperatives may claim a special entity-level deduction that is substantially similar to the domestic production activities deduction under former section 199.

The statute expressly grants the Secretary of the Treasury or his delegate (Secretary) authority to prescribe such regulations as are necessary to carry out the purposes of Section 199A (Section 199A(f)(4)), and provides specific grants of authority with respect to certain issues including: the treatment of acquisitions, dispositions, and short taxable years (Section 199A(b)(5)); certain payments to partners for services rendered in a non-partner capacity (Section 199A(c)(4)(C)); the allocation of W-2 wages and UBIA of qualified property (Section 199A(f)(1)(A)(iii)); restricting the allocation of items and wages under Section 199A and such reporting requirements as the Secretary determines appropriate (Section 199A(f)(4)(A)); the application of Section 199A in the case of tiered entities (Section 199A(f)(4)(B)); preventing the manipulation of the depreciable period of qualified property using transactions between related parties (Section 199A(h)(1)); and determining the UBIA of qualified property acquired in like-kind exchanges or involuntary conversions (Section 199A(h)(2)).

The Department of the Treasury (Treasury Department) and the IRS published final regulations () interpreting Section 199A on February 8, 2019 (February 2019 Final Regulations) in the Federal Register (84 FR 2952). Along with the publication of the February 2019 Final Regulations, the Treasury Department and the IRS published a notice of proposed rulemaking (REG 134652-18) in the Federal Register (84 FR 3015) providing additional guidance under Section 199A relating to the treatment of previously suspended losses included in qualified business income and determining the Section 199A deduction for taxpayers that hold interests in regulated investment companies, split-interest trusts, and charitable remainder trusts (February 2019 Proposed Regulations). No public hearing on the February 2019 Proposed Regulations was requested or held. After full consideration of the comments received on the February 2019 Proposed Regulations, this Treasury decision adopts the proposed regulations with clarifying changes and additional modifications in response to comments as described in the Summary of Comments and Explanation of Revisions.

Comments on issues related to the February 2019 Proposed Regulations that are beyond the scope of these final regulations are not discussed in this preamble, but may be addressed in future guidance.

The Treasury Department and the IRS also received comments on the February 2019 Final Regulations. The Treasury Department and the IRS continue to study the issues raised in those comments and may address them in future guidance.

Summary of Comments and Explanation of Revisions

These final regulations contain amendments to two substantive sections of the February 2019 Final Regulations, §§ 1.199A-3 and 1.199A-6, each of which provides rules relevant to the calculation of the Section 199A deduction. The amendments to § 1.199A-3(b)(1)(iv) provide additional rules and clarification on the treatment of suspended losses. Section 1.199A-3(d) provides guidance that allows a shareholder in a regulated investment company (RIC) within the meaning of section 851(a) to take a Section 199A deduction with respect to certain income of, or distributions from, the RIC. The amendments to § 1.199A-6(d) include additional rules related to trusts and estates under section 663 of the Code. This Summary of Comments and Explanation of Revisions describes each of the final rules contained in this document in turn.

I. Treatment of Previously Suspended Losses Included in QBI

Section 1.199A-3(b)(1)(iv) of the February 2019 Final Regulations provides that previously disallowed losses or deductions (including under sections 465, 469, 704(d), and 1366(d)) allowed in the taxable year are generally taken into account for purposes of computing QBI, except to the extent the losses or deductions were disallowed, suspended, limited, or carried over from taxable years ending before January 1, 2018. These losses are used, for purposes of Section 199A, in order from the oldest to the most recent on a first-in, first-out (FIFO) basis. The February 2019 Proposed Regulations expanded this rule to provide that previously disallowed losses or deductions are treated as losses from a separate trade or business in the year they are taken into account in determining taxable income. Further, the attributes of the previously disallowed losses or deductions, including whether they are attributable to a trade or business and whether they would otherwise be included in QBI, are determined in the year the loss or deduction is incurred.

The Treasury Department and the IRS are aware that taxpayers and practitioners have questioned whether the exclusion of section 461(l) from the list of loss disallowance and suspension provisions in § 1.199A-3(b)(1)(iv) means that losses disallowed under section 461(l) are not considered QBI in the year the losses are taken into account in determining taxable income. Generally, for taxable years beginning after December 31, 2020, and before January 1, 2026, section 461(l) disallows an excess business loss for taxpayers other than C corporations. See section 2304(a) of the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), Pub. L. 116-136, 134 Stat. 281 (2020). Any disallowed excess business loss is treated as a net operating loss carryover for the taxable year for purposes of determining any net operating loss carryover under section

172(b) in subsequent taxable years. See section 172(b) as amended by section 2304(b) of the CARES Act.

The list of loss disallowance and suspension provisions in § 1.199A-3(b)(1)(iv) is not exhaustive. If a loss or deduction that would otherwise be included in QBI under the rules of § 1.199A-3 is disallowed or suspended under any provision of the Code, such loss or deduction is generally taken into account for purposes of computing QBI in the year it is taken into account in determining taxable income. These final regulations clarify this point by amending § 1.199A-3(b)(1)(iv)(A) to specifically reference excess business losses disallowed by section 461(l) and treated as a net operating loss carryover for the taxable year for purposes of determining any net operating loss carryover under section 172(b) in subsequent taxable years.

The Treasury Department and the IRS are also aware that taxpayers and practitioners have questioned how the phase-in rules apply when a taxpayer has a suspended or disallowed loss or deduction from a Specified Service Trade or Business (SSTB). Whether an individual has taxable income at or below the threshold amount, within the phase-in range, or in excess of the phase-in range, the determination of whether a suspended or disallowed loss or deduction attributable to an SSTB is from a qualified trade or business is made in the year the loss or deduction is incurred. If the individual's taxable income is at or below the threshold amount in the year the loss or deduction is incurred, and such loss would otherwise be QBI, the entire disallowed loss or deduction is treated as QBI from a separate trade or business in the subsequent taxable year in which the loss is allowed. If the individual's taxable income is within the phase-in range, then only the applicable percentage of the disallowed loss or deduction is taken into account in the subsequent taxable year. If the individual's taxable income exceeds the phase-in range, none of the disallowed loss or deduction will be taken into account in the subsequent taxable year. These final regulations clarify this treatment and provide an example of a taxpayer with taxable income in the phase-in range and a suspended loss from an SSTB.

The Treasury Department and the IRS received one comment requesting further clarification of the FIFO ordering rule. The commenter questioned whether the FIFO ordering rule should continue to apply for losses incurred in taxable years beginning on or after January 1, 2018. The commenter also asked for clarification regarding whether the rule applied on an annual basis such that each year is tracked separately and FIFO is applied for losses that are incurred each year or whether FIFO applies such that there is a single bucket of losses no matter the year incurred. The commenter recommended additional supporting worksheets or other forms to assist in the calculation, particularly if every year must be tracked individually.

The Treasury Department and the IRS have determined that in order to properly calculate the deduction, it is necessary for the FIFO rule to apply for losses incurred in taxable years beginning on or after January 1, 2018, and that the rule must be applied on an annual basis by category (i.e., sections 465, 469, etc.). Accordingly, these final regulations retain the FIFO rule as proposed. The Treasury Department and the IRS continue to consider whether new worksheets or forms are necessary to assist in the calculation.

The February 2019 Proposed Regulations also provide that if a loss or deduction is partially disallowed, QBI in the year of disallowance must be reduced proportionately.

> These final regulations retain this rule, but with slight modifications, and provide examples.

From the 2018 proposed regulations, Prop. Reg. § 1.199A-3(b)(1)(iv), "Previously disallowed losses," provided:

> Generally, previously disallowed losses or deductions (including under sections 465, 469, 704(d), and 1366(d)) allowed in the taxable year are taken into account for purposes of computing QBI. However, losses or deductions that were disallowed, suspended, limited, or carried over from taxable years ending before January 1, 2018 (including under sections 465, 469, 704(d), and 1366(d)), are not taken into account in a later taxable year for purposes of computing QBI.

From the 2019 proposed regulations, Prop. Reg. § 1.199A-3(b)(1)(iv), "Previously disallowed losses," provided:

> (A) *In general*. Previously disallowed losses or deductions (including losses disallowed under sections 465, 469, 704(d), and 1366(d)) allowed in the taxable year generally are taken into account for purposes of computing QBI to the extent the disallowed loss or deduction is otherwise allowed by Section 199A and this section. These losses shall be used, for purposes of Section 199A and these regulations, in order from the oldest to the most recent on a first-in, first-out (FIFO) basis and shall be treated as losses from a separate trade or business. To the extent such losses relate to a PTP, they must be treated as a loss from a separate PTP in the taxable year the losses are taken into account. However, losses or deductions that were disallowed, suspended, limited, or carried over from taxable years ending before January 1, 2018 (including under sections 465, 469, 704(d), and 1366(d)), are not taken into account in a later taxable year for purposes of computing QBI.
>
> (B) *Attributes of disallowed loss determined in year loss is incurred*. Whether a disallowed loss or deduction is attributable to a trade or business, and otherwise meets the requirements of this section is determined in the year the loss is incurred. Whether a disallowed loss or deduction is attributable to a specified service trade or business (including whether an individual has taxable income under the threshold amount, within the phase-in range, or in excess of the phase-in range) also is determined in the year the loss is incurred. To the extent a loss is partially disallowed, QBI in the year of disallowance must be reduced proportionately.

Effective for taxable years beginning after August 24, 2020,[908] Reg. § 1.199A-3(b)(1)(iv), "Previously disallowed losses," now provides:

> (A) *In general*. Previously disallowed losses or deductions allowed in the taxable year generally are taken into account for purposes of computing QBI to the extent the disallowed loss or deduction is otherwise allowed by Section 199A. These previously disallowed losses include, but are not limited to losses disallowed under sections 461(l), 465, 469, 704(d), and 1366(d). These losses are used for purposes

[908] Reg. § 1.199A-3(e)(2)(iii), "Previously disallowed losses," provides:

> The provisions of paragraph (b)(1)(iv) of this section apply to taxable years beginning after August 24, 2020. Taxpayers may choose to apply the rules in paragraph (b)(1)(iv) of this section for taxable years beginning on or before August 24, 2020, so long as the taxpayers consistently apply the rules in paragraph (b)(1)(iv) of this section for each such year.

of Section 199A and this section in order from the oldest to the most recent on a first-in, first-out (FIFO) basis and are treated as losses from a separate trade or business. To the extent such losses relate to a PTP, they must be treated as a loss from a separate PTP in the taxable year the losses are taken into account. However, losses or deductions that were disallowed, suspended, limited, or carried over from taxable years ending before January 1, 2018 (including under sections 465, 469, 704(d), and 1366(d)), are not taken into account in a subsequent taxable year for purposes of computing QBI.

(B) *Partial allowance*. If a loss or deduction attributable to a trade or business is only partially allowed during the taxable year in which incurred, only the portion of the allowed loss or deduction that is attributable to QBI will be considered in determining QBI from the trade or business in the year the loss or deduction is incurred. The portion of the allowed loss or deduction attributable to QBI is determined by multiplying the total amount of the allowed loss by a fraction, the numerator of which is the portion of the total loss incurred during the taxable year that is attributable to QBI and the denominator of which is the amount of the total loss incurred during the taxable year.

(C) *Attributes of disallowed loss determined in year loss is incurred*.

(1) *In general*. Whether a disallowed loss or deduction is attributable to a trade or business, and otherwise meets the requirements of this section, is determined in the year the loss is incurred.

(2) Specified service trades or businesses. If a disallowed loss or deduction is attributable to a specified service trade or business (SSTB), whether an individual has taxable income at or below the threshold amount as defined in § 1.199A-1(b)(12), within the phase-in range as defined in § 1.199A-1(b)(4), or in excess of the phase-in range is determined in the year the loss or deduction is incurred. If the individual's taxable income is at or below the threshold amount in the year the loss or deduction is incurred, the entire disallowed loss or deduction must be taken into account when applying paragraph (b)(1)(iv)(A) of this section. If the individual's taxable income is within the phase-in range, then only the applicable percentage, as defined in § 1.199A-1(b)(2), of the disallowed loss or deduction is taken into account when applying paragraph (b)(1)(iv)(A) of this section. If the individual's taxable income exceeds the phase-in range, none of the disallowed loss or deduction will be taken into account in applying paragraph (b)(1)(iv)(A) of this section.

(D) *Examples*. The following examples illustrate the provisions of this paragraph (b)(1)(iv).

(1) *Example 1*. A is an unmarried individual and a 50% owner of LLC, an entity classified as a partnership for Federal income tax purposes. In 2018, A's allocable share of loss from LLC is $100,000 of which $80,000 is negative QBI. Under section 465, $60,000 of the allocable loss is allowed in determining A's taxable income. A has no other previously disallowed losses under section 465 or any other provision of the Code for 2018 or prior years. Because 80% of A's allocable loss is attributable to QBI ($80,000/$100,000), A will reduce the amount A takes into account in determining QBI proportionately. Thus, A will include $48,000 of the

allowed loss in negative QBI (80% of $60,000) in determining A's Section 199A deduction in 2018. The remaining $32,000 of negative QBI is treated as negative QBI from a separate trade or business for purposes of computing the Section 199A deduction in the year the loss is taken into account in determining taxable income as described in § 1.199A-1(d)(2)(iii).

(2) *Example 2*. B is an unmarried individual and a 50% owner of LLC, an entity classified as a partnership for Federal income tax purposes. After allowable deductions other than the Section 199A deduction, B's taxable income for 2018 is $177,500. In 2018, LLC has a single trade or business that is an SSTB. B's allocable share of loss is $100,000, all of which is suspended under section 465. B's allocable share of negative QBI is also $100,000. B has no other previously disallowed losses under section 465 or any other provision of the Code for 2018 or prior years. Because the entire loss is suspended, none of the negative QBI is taken into account in determining B's Section 199A deduction for 2018. Further, because the negative QBI is from an SSTB and B's taxable income before the section 199A deduction is within the phase-in range, B must determine the applicable percentage of the negative QBI that must be taken into account in the year that the loss is taken into account in determining taxable income. B's applicable percentage is 100% reduced by 40% (the percentage equal to the amount that B's taxable income for the taxable year exceeds B's threshold amount ($20,000=$177,500-$157,500) over $50,000). Thus, B's applicable percentage is 60%. Therefore, B will have $60,000 (60% of $100,000) of negative QBI from a separate trade or business to be applied proportionately to QBI in the year(s) the loss is taken into account in determining taxable income, regardless of the amount of taxable income and how rules under § 1.199A-5 apply in the year the loss is taken into account in determining taxable income.

This does not authorize the wage and UBIA attributes to be carried over as well. However, for other reasons, being passive may be beneficial; see part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good. On the other hand, being passive is unfavorable if it generates the 3.8% tax on net investment income; see part II.I.8.a General Application of 3.8% Tax to Business Income.

Odom, "QBI deduction: Interaction with various Code provisions," *The Tax Advise*r (12/1/2020), comments:

QBI and loss disallowance provisions

Since the inclusion of losses in QBI reduces the deduction, it is extremely important to understand these provisions so that QBI is not reduced before the losses are allowed in calculating taxable income. Disallowed losses are carried forward and reduce Sec. 199A QBI when allowed in computing taxable income in a subsequent year. These provisions are determined before making the QBI calculation, so these carryforwards should not be confused with the overall net QBI amount of a taxpayer that is less than zero, which is treated as a loss from a qualified trade or business in the succeeding tax year (Sec. 199A(c)(2)).

When a taxpayer incurs a net business loss, the Code provisions that determine if that loss is allowable in the current year must be applied in a certain order. If the income and losses that result in this net loss come from multiple entities and have multiple activities, then the allowable losses and carryforward amounts must be allocated.

The first loss limitation that must be considered is that of basis. For a taxpayer to claim a deduction for a loss from a relevant passthrough entity, the taxpayer must have basis in the entity. Losses in excess of basis are not allowed in the current year for regular tax purposes (Secs. 1366(d)(1) and 704(d)(1)). Likewise, they are not allowed for QBI. These losses will be allowed for regular tax and QBI purposes in subsequent years when basis is restored (Secs. 1366(d)(2) and 704(d)(2)). Since the basis rule applies to each entity separately and the losses are suspended, no allocations of these loss limitations with other entities are required. If the entity has multiple activities and only part of the losses is allowed, the losses will need to be allocated between the entity's different activities.

Once it is determined the losses are allowed because the taxpayer has basis, the second loss limitation rule must be applied, which is to determine whether the taxpayer is at risk for those losses. With a few exceptions noted in Prop. Regs. Secs. 1.465-42 and -44 and Temp. Regs. Sec. 1.465-1T, as with the basis rules, the at-risk rules of Sec. 465 apply to each entity and activity of the entity separately, so allocations of limited losses with other entities are not required. If the taxpayer is not at risk for the losses, then the losses will not be included in either taxable income or QBI.

The third set of loss limitation rules that must be applied are the passive loss rules of Sec. 469. Complications come into play when a taxpayer has multiple activities requiring separate tracking. In addition, special rules apply for PTPs.

Losses from a PTP business activity cannot be used to offset gains from other activities or portfolio income from its own activities (Sec. 469(k)). If the PTP reports only business losses, those losses will not be allowed for regular tax purposes and will not be allowed as qualified PTP income (Regs. Sec. 1.199A-3(c)(3)(ii)). If the PTP reports Sec. 1231 gain, then the other business losses will be allowed if they are less than or equal to the Sec. 1231 gain, and they will likewise be included in qualified PTP income. If a taxpayer disposes of a PTP, a portion of the gain is taxed as ordinary income (Sec. 751(a)). This ordinary income will be included as part of qualified PTP income, which is a separate component of QBI (Sec. 199A(e)(4)(B)).

For non-PTP activities, passive losses can offset passive gains regardless of the activity generating the gains or losses. When the losses exceed the gains, pro rata allocations must be made between the losses to determine how much of the loss from each entity and activity is allowed (Sec. 469(j)(4)). If qualified business activities mirror passive activities, these same allocations apply for QBI. If qualified business activities are different from passive activities, then additional computations and allocations will be required to make sure only the losses allowed for regular taxable income are allowed for QBI. The disallowed amounts must be carried forward and tracked by year and will be allowed in subsequent years when passive income exceeds passive losses or when there is a complete disposition of the passive activity.

Tracking suspended losses

The tracking of suspended passive losses is straightforward: They are to be tracked by entity, by activity, and by nature of income. A taxpayer must track allocated losses within activities if the type of income would result in an income tax liability that would be different if the items were not separately stated. The types of income that must be accounted for separately are active participation rental real estate activities, non—active participation rental real estate activities, capital losses limited under Sec. 1211, and Sec. 1231 losses related to property used in a trade or business and involuntary conversions (Temp. Regs. Sec. 1.469-1T(f)(2)(iii)). These items must be tracked for both regular and alternative minimum tax (AMT) purposes. Fortunately, for AMT purposes, the Sec. 199A deduction is the same as for regular tax purposes, so no adjustments are required (Regs. Sec. 1.199A-1(e)(5)).

Noticeably absent is a requirement to track these losses by year. For regular tax purposes, there really is not a need for this, as the passive losses may be carried over indefinitely since they do not expire. In addition, the carryover losses are treated as deductions from the activity for the succeeding tax year (Regs. Sec. 1.469-1(f)(4)). At some point, these suspended losses will be included in taxable income, either because the taxpayer has passive income in excess of total passive losses or when there is a complete disposition of the activity. Herein lies the issue: The QBI deduction is allowed only for items arising in tax years beginning after Dec. 22, 2017, and before Dec. 31, 2025. Since losses carried over from years prior to 2018 never reduce QBI (Regs. Sec. 1.199A-3(b)(1)(iv)(A)), it is important to properly trace loss carryforwards by year. So, the separately tracked items must now be tracked by year so that deduction and loss items prior to 2018 do not reduce QBI when they are allowed for regular taxable income purposes.

The IRS in June issued amendments to Regs. Secs. 1.199A-3 and 1.199A-6, which apply to tax years beginning after Aug. 24, 2020. Taxpayers may choose to apply these amendments to tax years beginning on or before Aug. 24, 2020 (T.D. 9899). Regs. Sec. 1.199A-3(b)(1)(iv) was amended and deals specifically with previously disallowed losses, whether from pre-2018 tax years or post-2017 tax years. This discussion incorporates this amended subparagraph. While these rules are discussed in the context of Sec. 469’s passive loss rules, the same concepts apply to disallowed, suspended, and limited losses under Secs. 461(l) (excess business loss rules), 465 (at-risk rules), and 704(d) and 1366(d) (basis rules). These provisions add another level of complexity since the allocations for QBI will now be different than for regular tax, requiring another set of carryforwards to be tracked.

So how do you handle these pre-2018 passive loss carryforwards when they can be claimed in the current year? For QBI, the carryforward losses are applied using FIFO — the oldest losses are utilized first (Regs. Sec. 1.199A-3(b)(1)(iv)(A)). Also, the amended regulations state they are treated as losses from a separate trade or business. If the losses relate to a PTP, they must be treated as a loss from a separate PTP (id.). Thus, if there are pre-2018 losses, they are taken into regular taxable income first but do not reduce QBI. Only when pre-2018 losses have been fully utilized do 2018 and subsequent-year losses reduce QBI.

Other guidance

The amended regulations also provide guidance regarding the partial allowance of a current-year loss or deduction. Only the portion allowed that is attributable to QBI will be used in determining QBI in the year the loss or deduction is incurred. The allocation is pro rata based on the portion of the loss that is attributable to QBI incurred in the year divided by the total loss incurred in the year (Regs. Sec. 1.199A-3(b)(1)(iv)(B)).

Attributes of the disallowed loss or deduction are determined in the year the loss is incurred, not the year the loss is allowed (Regs. Sec. 1.199A-3(b)(1)(iv)(C)). So, when preparing the current-year return, one must make these determinations as they relate to the carryover amount to subsequent years because, in the subsequent year, this carryover will be treated as arising from a separate trade or business. The first step is to determine if the disallowed amount is attributable to a trade or business and otherwise meets the requirements of Sec. 199A (Regs. Sec. 1.199A-3(b)(1)(iv)(C)(1)).

The second step is to determine whether the activity is from a specified service trade or business (SSTB) (Regs. Sec. 1.199A-3(b)(1)(iv)(C)(2)). If the activity is an SSTB, then all the SSTB calculations must be made in the current year on the disallowed amounts to determine how much of the disallowed amounts may be carried forward to the subsequent year and treated as a separate trade or business. In the subsequent year(s), these separate trades or businesses will not be subjected to the SSTB rules for the subsequent year(s); rather, the negative QBI from each separate trade or business will be applied proportionately to QBI in the subsequent year(s) when the loss is taken into account in calculating taxable income, regardless of the taxable income amount and application of the SSTB rules in the year the loss is allowed for calculating regular taxable income (Regs. Sec. 1.199A-3(b)(1)(iv)(D), Example (2)).

The SSTB rules provide limitations on the allowable amount for QBI based on threshold amounts. If taxable income is at or below the threshold amount in the year the loss or deduction is incurred (not the year allowed), the entire disallowed amount is carried over. If taxable income is within the phase-in range, then the applicable percentage of the allowed amount is carried over. Finally, if the taxable income exceeds the phase-in range, then none of the disallowed amounts will be carried over.

Once a determination is made that passive losses are allowed, a fourth provision comes into play that may further limit the ability to deduct losses. Sec. 461(l) limits excess business losses for noncorporate taxpayers to the excess of the taxpayer's aggregate trade or business deductions for the tax year over the sum of the taxpayer's aggregate trade or business income or gain plus $250,000. If the loss is limited for regular tax purposes, then the loss is limited for QBI. The Coronavirus Aid, Relief, and Economic Security (CARES) Act, P.L. 116-136, made several modifications to Sec. 461(l) including modifying the dates to which the provision applies: The provision no longer applies for losses arising in 2018, 2019, and 2020 but continues to apply for tax years beginning after Dec. 31, 2020, and before Jan. 1, 2026.

Any disallowed excess business loss is treated as a net operating loss (NOL) for the tax year for purposes of determining any NOL carryover under Sec. 172(b) for subsequent tax years (Sec. 461(l)(2)). Generally, an NOL deduction is not considered with respect to a trade or business and therefore is not considered in computing QBI. However, the excess business loss is included for purposes of computing QBI in the subsequent tax year in which it is deducted (Regs. Sec. 1.199A-3(b)(1)(v)).

When an entire interest in a passive activity is disposed of under the installment sale method of Sec. 453, special rules apply related to passive losses that are freed up as the result of a complete disposition. Sec. 469(g)(3) states that suspended losses that exceed the gain on the disposition are recognized over the term of the installment obligation using the same gross profit percentage that is used to recognize the gain on the installment sale. If there is a loss on the disposition, all suspended losses are recognized in the year of disposition, as installment sale reporting only applies to gains, not losses. Any freed-up suspended losses incurred after Dec. 31, 2017, will be included in QBI in the same year they are recognized for regular tax purposes. The election out of the installment sale method would accelerate the recognition of suspended losses, which can be beneficial for reducing regular taxable income. However, it is also detrimental, as it reduces QBI, so an analysis of the overall impact on taxable income over the life of the obligation may be needed to determine if the election out is truly beneficial for a taxpayer.

Also, if a taxpayer disposes of a partnership, a portion of the gain may be taxed as ordinary income (Sec. 751(a)). This ordinary income is attributable to the trades or businesses conducted by the partnership and therefore is part of the QBI computation for that activity (Regs. Sec. 1.199A-3(b)(1)(i)). Ordinary income under Sec. 751 is recapture income if received under the installment method and must be recognized in the year of disposition as if all payments to be received were received in the tax year of disposition (Sec. 453(i)(2)); accordingly, the ordinary income would also be included in QBI in the year of disposition.

II.E.1.c.viii. Income or Gain from or Sale of Property Used in the Business or Business Interest Itself

This part II.E.1.c.viii discusses specific applications:

- Part II.E.1.c.viii.(a) Passthrough Sale of Equipment It Is Using

- Part II.E.1.c.viii.(b) Passthrough Sale of a Building It Is Using.

- Part II.E.1.c.viii.(c) Sale of an Interest in a Partnership Conducting a Trade or Business.

- Part II.E.1.c.viii.(d) Sale of a Stock in an S Corporation Conducting a Trade or Business.

II.E.1.c.viii.(a). Passthrough Sale of Equipment It Is Using

Qualified business income ("QBI") means "the net amount of qualified items of income, gain, deduction, and loss with respect to any qualified trade or business of the taxpayer."[909] Thus, gain from the sale of equipment can be QBI only if it is with respect to a qualified trade or business.

Long-term capital gain is not QBI; see Reg. § 1.199A-3(b)(2)(ii)(A), reproduced in part II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A. However, Part II.E.1.c.ii.(c) includes an excerpt from the preamble (Treatment of section 1231 gains and losses) that gain taxed as ordinary income is QBI.

[909] Code § 199A(c)(1), first cited in fn 779 in part II.E.1.c.ii Types of Income and Activities Eligible or Ineligible for Deduction.

II.E.1.c.viii.(b). Passthrough Sale of a Building It Is Using

Qualified business income ("QBI") means "the net amount of qualified items of income, gain, deduction, and loss with respect to any qualified trade or business of the taxpayer."[910] Thus, gain from the sale of a building can be QBI only if it is with respect to a qualified trade or business.

Strangely enough, property used in a business is not a capital asset. When real estate that is depreciated using straight-line depreciation (which generally applies to real estate acquired after 1986 and some acquired before 1986), Code § 1231 taxes gain of real estate held more than one year as long-term capital gain and losses as ordinary losses. Capital gain that recaptures straight-line depreciation is subject to capital gain tax higher that regular capital gain tax rates. However, if and to the extent that the taxpayer previously deducted ordinary losses under Code § 1231, the gain is taxed as ordinary income. See part II.G.6.a Code § 1231 Property, which also covers the sale of goodwill.

If and to the extent that a cost segregation study causes components to be subject to accelerated depreciation or if accelerated depreciation was used for the building, see the analysis in part II.E.1.c.viii.(a) Passthrough Sale of Equipment It Is Using.

Also, if a passthrough sells depreciable property to a related party, generally any gain is taxed as ordinary income. See parts II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill) and II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships. That, too would use the analysis in part II.E.1.c.viii.(a) Passthrough Sale of Equipment It Is Using.

To the extent that the sale of a building is taxed as long-term capital gain, it is not QBI. See Reg. § 1.199A-3(b)(2)(ii)(A), reproduced in part II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A. However, Part II.E.1.c.ii.(c) includes an excerpt from the preamble (Treatment of section 1231 gains and losses) that gain taxed as ordinary income is QBI.

II.E.1.c.viii.(c). Sale of an Interest in a Partnership Conducting a Trade or Business

Qualified business income ("QBI") means "the net amount of qualified items of income, gain, deduction, and loss with respect to any qualified trade or business of the taxpayer."[911] Thus, gain from the sale of a partnership interest can be QBI only if it is with respect to a qualified trade or business.

The sale of a partnership interest may be taxed as capital gain, as provided in part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest, or as gain from the sale of an asset that is not a capital asset (ordinary income), under part II.Q.8.b.i.(g) Code § 751 – Hot Assets. Capital gain from the sale of a partnership interest is not QBI. See Reg. § 1.199A-3(b)(2)(ii)(A), reproduced in part II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A.

---

[910] Code § 199A(c)(1), first cited in fn 779 in part II.E.1.c.ii Types of Income and Activities Eligible or Ineligible for Deduction.

[911] Code § 199A(c)(1), first cited in fn 779 in part II.E.1.c.ii Types of Income and Activities Eligible or Ineligible for Deduction.

However, Code § 751 ordinary income qualifies. See Reg. § 1.199A-3(b)(1)(i), reproduced in part II.E.1.c.ii.(a) Generally; List of Items Included in QBI.

II.E.1.c.viii.(d). Sale of a Stock in an S Corporation Conducting a Trade or Business

Because the sale of S corporation stock is taxed as capital gain, it is not QBI. See Reg. § 1.199A-3(b)(2)(ii)(A), reproduced in part II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A.

However, the sale of S corporation stock is often treated as a sale of the underlying assets, with the gain increasing the stock's basis, followed by a deemed liquidation of the corporation, shifting the gain on sale of stock to a gain on sale of assets. See part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold. Such a sale tends to trigger ordinary income on the deemed sale of the assets, to the extent of depreciation recapture on personal property and any other property not depreciable as real estate. For additional ordinary income concerns if the buyer is a related party, see part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property. Part II.E.1.c.ii.(c) includes an excerpt from the preamble (Treatment of section 1231 gains and losses) that gain taxed as ordinary income is QBI. Thus, the Code § 199A deduction would ameliorate tax on actual or deemed asset sales.

II.E.1.c.ix. QBI and Effectively Connected Income

Items of QBI are "of income, gain, deduction, and loss" included or allowed in determining taxable income for the taxable year to the extent such items are:[912]

> effectively connected with the conduct of a trade or business within the United States (within the meaning of section 864(c), determined by substituting "qualified trade or business (within the meaning of Section 199A)" for "nonresident alien individual or a foreign corporation" or for "a foreign corporation" each place it appears)….

The preamble to the 2018 proposed regulations, REG-107892-18 (8/16/2018), provides:

> **vi. Requirement that an item be effectively connected with a U.S. trade or business**
>
> Section 199A applies to all noncorporate taxpayers, whether such taxpayers are domestic or foreign. Accordingly, Section 199A applies to both U.S. citizens and resident aliens as well as nonresident aliens that have QBI. As noted previously in this Explanation of Provisions, QBI includes items of income, gain, deduction, and loss to the extent such items are (i) included or allowed in determining taxable income for the taxable year and (ii) effectively connected with the conduct of a trade or business within the United States (within the meaning of section 864(c), determined by substituting

[912] Code § 199A(c)(3)(A)(i), cited in fn 784 in part II.E.1.c.ii Types of Income and Activities Eligible or Ineligible for Deduction. Literally plugging Code § 199A(c)(3)(A)(i) into Code § 864(c) would make Code § 864(c)(1) read as follows:

> In the case of a qualified trade or business (within the meaning of section 199A) engaged in trade or business within the United States during the taxable year, the rules set forth in paragraphs (2), (3), (4), (6), (7), and (8) shall apply in determining the income, gain, or loss which shall be treated as effectively connected with the conduct of a trade or business within the United States.

“qualified trade or business (within the meaning of Section 199A)” for “nonresident alien individual or a foreign corporation” or for “a foreign corporation” each place it appears).

a. Summary of rules for generally determining whether income is effectively connected with a United States trade or business

Section 864(c) provides rules that nonresident alien individuals and foreign corporations use to determine which items of income, gain, or loss are effectively connected with a United States trade or business. Section 873(a) permits nonresident aliens to deduct expenses only if and to the extent that they are connected with, or properly allocable and apportioned to, income effectively connected with a United States trade or business.

Thus, for example, a U.S. partner of a partnership that operates a trade or business in both the United States and in a foreign country would only include the items of income, gain, deductions, and loss that would be effectively connected with a United States trade or business. Similarly, a shareholder of an S corporation that is engaged in a trade or business in both the United States and in a foreign country would only take into account the items of income, gain, deduction, and loss that would be effectively connected to the portion of the business conducted by the S corporation in the United States, determined by applying the principles of section 864(c).

In general, whether a nonresident alien is engaged in a trade or business within the United States, as opposed to a trade or business conducted solely outside the United States, is based upon the all the facts and circumstances, as developed through case law and other published guidance. Pursuant to section 875(1), a nonresident alien is considered engaged in a trade or business within the United States if the partnership of which such individual is a member is so engaged.

Section 864(b) provides that the term “trade or business within the United States” includes (but is not limited to) the performance of personal services within the United States at any time during the taxable year, but excludes the performance of services described in section 864(b)(1) and (2). Section 864(b)(1) covers a limited set of nonresident aliens who perform services in the United States on behalf of foreign persons not otherwise engaged in a U.S. trade or business, or on behalf of U.S. persons through a foreign office, if the nonresident aliens are present in the United States less than 90 days during the taxable year and their compensation does not exceed $3,000. Section 864(b)(2) generally treats foreign persons, including partnerships, who are trading in stocks, securities, and in commodities for their own account or through a broker or other independent agent as not engaged in a United States trade or business.

b. Application to Section 199A

Although the cross reference in Section 199A(c)(3)(A)(i) to section 864 is limited to paragraph (c) of that section, no income derived from excluded services under section 864(b)(1) or (2) could ever be effectively connected income in the hands of a nonresident alien. Accordingly, Section 199A incorporates the specific rules regarding the scope of the term “trade or business in the United States” in determining QBI. As such, if a trade or business is not engaged in a U.S. trade or business by reason of section 864(b), items of income, gain, deduction, or loss from that trade or business will not be included in QBI because such items would not be effectively connected with the conduct of a U.S. trade or business.

> If a trade or business is determined to be conducted in the United States, section 864(c)(3) generally treats all income of a nonresident alien from sources within the United States as effectively connected with the conduct of a U.S. trade or business. However, any income from sources within the United States described in section 871(a)(1) or (h) and any gain or loss from the sale of capital assets are only effectively connected if the income meets requirements of section 864(c)(2) and the regulations thereunder. Under section 864(c)(4), income from sources without the United States is generally not treated as effectively connected with the conduct of a U.S. trade or business unless an exception under section 864(c)(4)(B) applies. Thus, a trade or business's foreign source income, gain, or loss, (and any deductions effectively connected with such foreign source income, gain, or loss) would generally not be included in QBI, unless the income meets an exception in section 864(c)(4)(B). Whether income is U.S. or foreign sourced is determined under sections 861, 862, 863, and 865, and the regulations thereunder.
>
> This rule does not mean that any item that is effectively connected with the conduct of a trade or business with the United States is therefore QBI. As discussed previously, the item must also be "with respect to" a trade or business. Certain provisions of the Code allow items to be treated as effectively connected, even though they are not with respect to a trade or business. For example, section 871(d) allows a nonresident alien individual to elect to treat income from real property in the United States that would not otherwise be treated as effectively connected with the conduct of a trade or business within the United Sates as effectively connected. However, for purposes of Section 199A, if items are not attributable to a trade or business under 162, such items do not constitute QBI.
>
> Similarly, the fact that a deduction is allowed for purposes of computing effectively connected taxable income does not necessarily mean that it is taken into account for purposes of Section 199A. For example, for purposes of computing effectively connected taxable income, section 873(b) allows certain deductions, including for theft losses of property located within the United States and charitable contributions allowed under section 170, to be taken into account regardless of whether they are connected with income that is effectively connected with the conduct of a trade or business within the United States. However, for purposes of Section 199A, these items would not be taken into account because Section 199A only permits a deduction for income that is both attributable to a trade or business and that is also effectively connected income.

In the preamble to the final regulations, T.D. 9847 (2/8/2019), part IV.A.4, "Recapture of Overall Foreign Losses," provides:

> One commentator requested that Treasury and the IRS provide that U.S.-source taxable income arising upon recapture of an overall foreign loss described in section 904(f) be treated as QBI in the recapture year to the extent the overall foreign loss limited the Section 199A deduction in a prior tax year. This comment was not adopted. Section 199A(c)(3)(A)(i) limits QBI to items that are effectively connected to a U.S. trade or business in the tax year concerned and the recapture rules in section 904(f) apply only for purposes of subchapter N, Part III, Subpart A of the Code. In addition, it would not be appropriate to expand the scope of QBI for recaptured foreign losses when no similar relief is available if non-qualifying domestic losses are subsequently offset by non-qualifying domestic income.

In the preamble to the final regulations, T.D. 9847 (2/8/2019), part IV.A.8, "Interaction of Sections 875(l) and 199A," provides:

> Section 199A(c)(3)(A)(i) provides that for purposes of determining QBI, the term qualified items of income, gain, deduction, and loss means items of income, gain, deduction and loss to the extent such items are effectively connected with the conduct of a trade or business within the United States (within the meaning of section 864(c), determined by substituting "qualified trade or business (within the meaning of Section 199A" for "nonresident alien individual or a foreign corporation" or for "a foreign corporation" each place it appears). The preamble to the proposed regulations provides that certain items of income, gain, deduction, and loss are treated as effectively connected income but are not with respect to a domestic trade or business (such as items attributable to the election to treat certain U.S. real property sales as effectively connected pursuant to section 871(d)), and are thus not QBI because they are not items attributable to a qualified trade or business for purposes of Section 199A. One commenter agreed with this interpretation but requested additional guidance on the interaction between sections 875(l) and 199A, specifically whether the determination of whether an activity is a trade or business is made at the entity level for purposes of Section 199A. The commenter also recommended that regulations distinguish between (1) items of income, gain, loss, or deduction that are incurred in a trade or business applying the principles of section 162 and (2) items of income, gain, deduction, or loss that are not incurred in such a trade or business.
>
> For purposes of Section 199A, the determination of whether an activity is a trade or business is made at the entity level. If an RPE is engaged in a trade or business, items of income, gain, loss, or deduction from such trade or business retain their character as they pass from the entity to the taxpayer—even if the taxpayer is not personally engaged in the trade or business of the entity. Conversely, if an RPE is not engaged in a trade or business, income, gain, loss, or deduction allocated to a taxpayer from such entity will not qualify for the Section 199A deduction even if the taxpayer or an intervening entity is otherwise engaged in a trade or business. As described in part II.A.3 of this Summary of Comments and Explanation of Revisions, a trade or business for purposes of Section 199A is generally defined by reference to the standards for a section 162 trade or business. A rental real estate enterprise that meets the safe harbor described in Notice 2017-07, released concurrently with these final regulations, may also treated as trades or businesses for purposes of Section 199A. Additionally, the rental or licensing of property if the property is rented or licensed to a trade or business conducted by the individual or an RPE which is commonly controlled under § 1.199A-4(b)(1)(i) is also treated as a trade or business for purposes of Section 199A. In addition to these requirements, the items must be effectively connected to a trade or business within the United States as described in section 864(c).
>
> One commenter requested guidance coordinating Section 199A with section 751(a) and the rules for dispositions of certain interests by foreign persons in section 864(c)(8). The proposed regulations provide that, with respect to a partnership, if section 751(a) or (b) applies, then gain or loss attributable to assets of the partnership giving rise to ordinary income under section 751(a) or (b) is considered attributable to the trades or businesses conducted by the partnership, and is taken into account for purposes of computing QBI. The commenter questioned whether income treated as ordinary income under section 751 for purposes of section 864(c)(8) should be QBI. The treatment of ordinary income under section 751 under subchapter N of chapter 1 of subtitle A of the Code is generally

> a function of section 864(c)(8). On December 27, 2018, the Federal Register published a notice of proposed rulemaking (REG-113604-18) at 83 FR 66647 under section 864(c)(8) (proposed section 864(c)(8) regulations). The proposed section 864(c)(8) regulations provide rules for determining the amount of gain or loss treated as effectively connected with the conduct of a trade or business within the United States ("effectively connected gain" or "effectively connected loss") described in section 864(c)(8), including rules coordinating section 864(c)(8) with sections 741 and 751 (relating to the character of gain or loss realized in connection with the sale or exchange of an interest in a partnership). Because the proposed section 864(c)(8) regulations apply the deemed sale construct of section 751(a) to determine whether gain or loss on the sale of a partnership interest is subject to tax under section 864(c)(8), the issue raised in this comment does not arise, and thus this comment is not adopted. The Treasury Department and the IRS request further comments on the interaction of Section 199A and the proposed regulations under section 864(c)(8) after the publication of those proposed regulations.

Reg. § 1.199A-3(b)(2)(i) provides:

> *In general*. The term qualified items of income, gain, deduction, and loss means items of gross income, gain, deduction, and loss to the extent such items are -
>
> (A) Effectively connected with the conduct of a trade or business within the United States (within the meaning of section 864(c), determined by substituting "trade or business (within the meaning of Section 199A)" for "nonresident alien individual or a foreign corporation" or for "a foreign corporation" each place it appears); and
>
> (B) Included or allowed in determining taxable income for the taxable year.

Code § 864(c) taxes nonresident alien individuals on income and sets forth rules that "apply in determining the income, gain, or loss which shall be treated as effectively connected with the conduct of a trade or business within the United States."[913] See Appel & Karlin, "Gain or Loss of Foreign Persons from Sale or Exchange of Partnership Interests," *Journal of International Taxation* (5/2021).

Note re: various citations below to regulations under Code § 864(c): various tax research services warn that the Treasury has not yet amended them to reflect changes made by laws since 1984, and they include this warning even for regulations promulgated many years after 1984. I have not taken the time to look how accurate these warnings are; however, it has been suggested to me that the regulations are good law. Furthermore, ruling or determination letters will not ordinarily be issued:[914]

> Section 864. - Definitions and Special Rules. - Whether a taxpayer is engaged in a trade or business within the United States, and whether income is effectively connected with the conduct of a trade or business within the United States; whether an instrument is a security as defined in § 1.864-2(c)(2); whether a taxpayer effects transactions in the United States in stocks or securities under § 1.864-2(c)(2); whether an instrument or item is a commodity as defined in § 1.864-2(d)(3); and for purposes of § 1.864-2(d)(1) and (2), whether a commodity is of a kind customarily dealt in on an organized

[913] Code § 864(c)(1)(A).
[914] Rev. Proc. 2018-7, Section 4.01(4).

commodity exchange, and whether a transaction is of a kind customarily consummated at such place.

Code § 864(c)(2) provides that, in determining whether certain "fixed or determinable income" -or:[915]

> whether gain or loss from sources within the United States from the sale or exchange of capital assets, is effectively connected with the conduct of a trade or business within the United States, the factors taken into account shall include whether-
>
> (A) the income, gain, or loss is derived from assets used in or held for use in the conduct of such trade or business, or
>
> (B) the activities of such trade or business were a material factor in the realization of the income, gain, or loss.
>
> In determining whether an asset is used in or held for use in the conduct of such trade or business or whether the activities of such trade or business were a material factor in realizing an item of income, gain, or loss, due regard shall be given to whether or not such asset or such income, gain, or loss was accounted for through such trade or business.

The fixed or determinable income to which Code § 864(c)(2) refers is "income from sources within the United States of the types described in section 871(a)(1), section 871(h), section 881(a), or section 881(c)." Code § 871(a)(1), "Income other than capital gains," provides that, except as provided in Code § 871(h) (relating to "portfolio interest"), a 30% tax is imposed on

> the amount received from sources within the United States by a nonresident alien individual as—
>
> (A) interest (other than original issue discount as defined in section 1273), dividends, rents, salaries, wages, premiums, annuities, compensations, remunerations, emoluments, and other fixed or determinable annual or periodical gains, profits, and income,
>
> (B) gains described in subsection (b) or (c) of section 631,

---

[915] Reg. § 1.864-4(a), "In general," provides:

> This section applies only to a nonresident alien individual or a foreign corporation that is engaged in a trade or business in the United States at some time during a taxable year beginning after December 31, 1966, and to the income, gain, or loss of such person form sources within the United States. If the income, gain, or loss of such person for the taxable year from sources within the United States consists of (1) gain or loss from the sale or exchange of capital assets or (2) fixed or determinable annual or periodical gains, profits, and income or certain other gains described in section 871(a)(1) or 881(a), certain factors must be taken into account, as prescribed by section 864(c)(2) and paragraph (c) of this section, in order to determine whether the income, gain, or loss is effectively connected for the taxable year with the conduct of a trade or business in the United States by that person. All other income, gain, or loss of such person for the taxable year from sources within the United States shall be treated as effectively connected for the taxable year with conduct of a trade or business in the United States by that person, as prescribed by section 864(c)(3) and paragraph (b) of this section.

(C) in the case of—

(i) a sale or exchange of an original issue discount obligation, the amount of the original issue discount accruing while such obligation was held by the nonresident alien individual (to the extent such discount was not theretofore taken into account under clause (ii)), and

(ii) a payment on an original issue discount obligation, an amount equal to the original issue discount accruing while such obligation was held by the nonresident alien individual (except that such original issue discount shall be taken into account under this clause only to the extent such discount was not theretofore taken into account under this clause and only to the extent that the tax thereon does not exceed the payment less the tax imposed by subparagraph (A) thereon), and

(D) gains from the sale or exchange after October 4, 1966, of patents, copyrights, secret processes and formulas, good will, trademarks, trade brands, franchises, and other like property, or of any interest in any such property, to the extent such gains are from payments which are contingent on the productivity, use, or disposition of the property or interest sold or exchanged,

but only to the extent the amount so received is not effectively connected with the conduct of a trade or business within the United States.

Code § 881, which applies to foreign corporations, is similar to Code § 871, which applies to nonresident aliens, regarding the above items.

Code § 871(a)(1)(A) is further described in part II.E.1.e.ii Real Estate As a Trade or Business under the Effectively Connected Income (ECI) Rules.[916]

In determining whether fixed or determinable income and capital gains for the taxable year from sources within the United States is effectively connected for the taxable year with the conduct of a trade or business in the United States:[917]

> the principal tests to be applied are (a) the asset-use test, that is, whether the income, gain, or loss is derived from assets used in, or held for use in, the conduct of the trade or business in the United States, and (b) the business-activities test, that is, whether the

[916] Absent any guidance under the ECI rules, see part II.E.1.e.i General Rules Regarding U.S. Real Estate .

[917] Reg. § 1.864-4(c)(1)(i). Reg. § 1.864-4(c)(1)(ii) provides:

> *Special rule relating to interest on certain deposits*. For purposes of determining under section 861(a)(1)(A) (relating to interest on deposits with banks, savings and loan associations, and insurance companies paid or credited before Jan. 1, 1976) whether the interest described therein is effectively connected for the taxable year with the conduct of a trade or business in the United States, such interest shall be treated as income from sources within the United States for purposes of applying this paragraph and § 1.864-5. If by reason of the application of this paragraph such interest is determined to be income which is not effectively connected for the taxable year with the conduct of a trade or business in the United States, it shall then be treated as interest from sources without the United States which is not subject to the application of § 1.864-5.

activities of the trade or business conducted in the United States were a material factor in the realization of the income, gain, or loss.

The asset-use test ordinarily applies in:[918]

> making a determination with respect to income, gain, or loss of a passive type where the trade or business activities as such do not give rise directly to the realization of the income, gain, or loss. However, even in the case of such income, gain, or loss, any activities of the trade or business which materially contribute to the realization of such income, gain, or loss shall also be taken into account as a factor in determining whether the income, gain, or loss is effectively connected with the conduct of a trade or business in the United States. The asset-use test is of primary significance where, for example, interest income is derived from sources within the United States by a nonresident alien individual or foreign corporation that is engaged in the business of manufacturing or selling goods in the United States.

Ordinarily, an asset is treated as used in, or held for use in, the conduct of a trade or business in the United States if the asset is:[919]

(a) Held for the principal purpose of promoting the present conduct of the trade or business in the United States; or

(b) Acquired and held in the ordinary course of the trade or business conducted in the United States, as, for example, in the case of an account or note receivable arising from that trade or business; or

(c) Otherwise held in a direct relationship to the trade or business conducted in the United States, as determined under paragraph (c)(2)(iv) of this section.

Generally, "stock of a corporation (whether domestic or foreign) shall not be treated as an asset used in, or held for use in, the conduct of a trade or business in the United States."[920] However, the preceding sentence "shall not apply to stock of a corporation (whether domestic or foreign) held by a foreign insurance company unless the foreign insurance company owns 10 percent or more of the total voting power or value of all classes of stock of such corporation."[921]

Reg. § 1.864-4(c)(2)(iv), "Direct relationship between holding of asset and trade or business," provides:

(a) *In general*. In determining whether an asset is held in a direct relationship to the trade or business conducted in the United States, principal consideration shall be given to whether the asset is needed in that trade or business. An asset shall be

---

[918] Reg. § 1.864-4(c)(2)(i), which concludes:

> See also subparagraph (5) of this paragraph for rules applicable to taxpayers conducting a banking, financing, or similar business in the United States.

[919] Reg. § 1.864-4(c)(2)(ii).

[920] Reg. § 1.864-4(c)(2)(iii)(a).

[921] Reg. § 1.864-4(c)(2)(iii)(b), which further provides:

> For purposes of this section, section 318(a) shall be applied in determining ownership, except that in applying section 318(a)(2)(C), the phrase "10 percent" is used instead of the phrase "50 percent."

For Code § 318(a), see part II.Q.7.a.viii Code § 318 Family Attribution under Subchapter C.

considered needed in a trade or business, for this purpose, only if the asset is held to meet the present needs of that trade or business and not its anticipated future needs. An asset shall be considered as needed in the trade or business conducted in the United States if, for example, the asset is held to meet the operating expenses of that trade or business. Conversely, an asset shall be considered as not needed in the trade or business conducted in the United States if, for example, the asset is held for the purpose of providing for (1) future diversification into a new trade or business, (2) expansion of trade or business activities conducted outside of the United States, (3) future plant replacement, or (4) future business contingencies.

(b) *Presumption of direct relationship*. Generally, an asset will be treated as held in a direct relationship to the trade or business if (1) the asset was acquired with funds generated by that trade or business, (2) the income from the asset is retained or reinvested in that trade or business, and (3) personnel who are present in the United States and actively involved in the conduct of that trade or business exercise significant management and control over the investment of such asset.

The following examples illustrate Reg. § 1.864-4(c)(2)(iv):[922]

Example (1). M, a foreign corporation which uses the calendar year as the taxable year, is engaged in industrial manufacturing in a foreign country. M maintains a branch in the United States which acts as importer and distributor of the merchandise it manufactures abroad; by reason of these branch activities, M is engaged in business in the United States during 1968. The branch in the United States is required to hold a large current cash balance for business purposes, but the amount of the cash balance so required varies because of the fluctuating seasonal nature of the branch's business. During 1968 at a time when large cash balances are not required the branch invests the surplus amount in U.S. Treasury bills. Since these Treasury bills are held to meet the present needs of the business conducted in the United States they are held in a direct relationship to that business, and the interest for 1968 on these bills is effectively connected for that year with the conduct of the business in the United States by M.

Example (2). Foreign corporation M, which uses the calendar year as the taxable year, has a branch office in the United States where it sells to customers located in the United States various products which are manufactured by that corporation in a foreign country. By reason of this activity M is engaged in business in the United States during 1997. The U.S. branch establishes in 1997 a fund to which are periodically credited various amounts which are derived from the business carried on at such branch. The amounts in this fund are invested in various securities issued by domestic corporations by the managing officers of the U.S. branch, who have the responsibility for maintaining proper investment diversification and investment of the fund. During 1997, the branch office derives from sources within the United States interest on these securities, and gains and losses resulting from the sale or exchange of such securities. Since the securities were acquired with amounts generated by the business conducted in the United States, the interest is retained in that business, and the portfolio is managed by personnel actively involved in the conduct of that business, the securities are presumed under paragraph (c)(2)(iv)(b) of this section to be held in a direct relationship to that business. However, M is able to rebut this presumption by demonstrating that the fund was established to carry out a program of future expansion and not to meet the present

[922] Reg. § 1.864-4(c)(2)(v).

needs of the business conducted in the United States. Consequently, the income, gains, and losses from the securities for 1997 are not effectively connected for that year with the conduct of a trade or business in the United States by M.

The business-activities test ordinarily applies:[923]

> in making a determination with respect to income, gain, or loss which, even though generally of the passive type, arises directly from the active conduct of the taxpayer's trade or business in the United States. The business-activities test is of primary significance, for example, where (a) dividends or interest are derived by a dealer in stocks or securities, (b) gain or loss is derived from the sale or exchange of capital assets in the active conduct of a trade or business by an investment company, (c) royalties are derived in the active conduct of a business consisting of the licensing of patents or similar intangible property, or (d) service fees are derived in the active conduct of a servicing business. In applying the business-activities test, activities relating to the management of investment portfolios shall not be treated as activities of the trade or business conducted in the United States unless the maintenance of the investments constitutes the principal activity of that trade or business.

The following examples illustrate the business-activities test:[924]

> *Example (1)*. Foreign corporation S is a foreign investment company organized for the purpose of investing in stocks and securities. S is not a personal holding company or a corporation which would be a personal holding company but for section 542(c)(7) or 543(b)(1)(C). Its investment portfolios consist of common stocks issued by both foreign and domestic corporations and a substantial amount of high grade bonds. The business activity of S consists of the management of its portfolios for the purpose of investing, reinvesting, or trading in stocks and securities. During the taxable year 1968, S has its principal office in the United States within the meaning of paragraph (c)(2)(iii) of § 1.864-2, and, by reason of its trading in the United States in stocks and securities, is engaged in business in the United States. The dividends and interest derived by S during 1968 from sources within the United States, and the gains and losses from sources within the United States for such year from the sale of stocks and securities from its investment portfolios, are effectively connected for 1968 with the conduct of the business in the United States by that corporation, since its activities in connection with the management of its investment portfolios are activities of that business and such activities are a material factor in the realization of such income, gains, or losses.

> *Example (2)*. N, a foreign corporation which uses the calendar year as the taxable year, has a branch in the United States which acts as an importer and distributor of merchandise; by reason of the activities of that branch, N is engaged in business in the United States during 1968. N also carries on a business in which it licenses patents to unrelated persons in the United States for use in the United States. The businesses of the licensees in which these patents are used have no direct relationship to the business carried on in N's branch in the United States, although the merchandise marketed by the branch is similar in type to that manufactured under the patents. The negotiations and

---

[923] Reg. § 1.864-4(c)(3)(i), which concludes:

> See also subparagraph (5) of this paragraph for rules applicable to taxpayers conducting a banking, financing, or similar business in the United States.

[924] Reg. § 1.864-4(c)(3)(ii).

> other activities leading up to the consummation of these licenses are conducted by employees of N who are not connected with the U.S. branch of that corporation, and the U.S. branch does not otherwise participate in arranging for the licenses. Royalties received by N during 1968 from these licenses are not effectively connected for that year with the conduct of its business in the United States because the activities of that business are not a material factor in the realization of such income.

In applying the asset-use test or the business-activities test described above:[925]

> due regard shall be given to whether or not the asset, or the income, gain, or loss is accounted for through the trade or business conducted in the United States, that is, whether or not the asset, or the income, gain or loss, is carried on books of account separately kept for that trade or business, but this accounting test shall not by itself be controlling. In applying this subparagraph, consideration shall be given to whether the accounting treatment of an item reflects the consistent application of generally accepted accounting principles in a particular trade or business in accordance with accepted condition or practices in that trade or business and whether there is a consistent accounting treatment of that item from year to year by the taxpayer.

Regarding income related to an individual's personal services:[926]

> (i) *Income, gain, or loss from assets*. Income or gains from sources within the United States described in section 871(a)(1) and derived from an asset, and gain or loss from sources within the United States from the sale of exchange of capital assets, realized by a nonresident alien individual engaged in a trade or business in the United States during the taxable year solely by reason of his performing personal services in the United States shall not be treated as income, gain, or loss which is effectively connected for the taxable year with the conduct of a trade or business in the United States, unless there is a direct economic relationship between his holding of the asset from which the income, gain, or loss results and his trade or business or performing the personal services.
>
> (ii) *Wages, salaries, and pensions*. Wages, salaries, fees, compensations, emoluments, or other remunerations, including bonuses, received by a nonresident alien individual for performing personal services in the United States which, under paragraph (a) of § 1.864-2, constitute engaging in a trade or business in the United States, and pensions and retirement pay attributable to such personal services, constitute income which is effectively connected for the taxable year with the conduct of a trade or business in the United States by that individual if he is engaged in a trade or business in the United States at some time during the taxable year in which such income is received.

[925] Reg. § 1.864-4(c)(4).
[926] Reg. § 1.864-4(c)(6).

Other than fixed or determinable income and capital gains, all income, gain, or loss "from sources within the United States" is "treated as effectively connected with the conduct of a trade or business within the United States."[927] For example:[928]

> *Example (1)*. M, a foreign corporation which uses the calendar year as the taxable year, is engaged in the business of manufacturing machine tools in a foreign country. It establishes a branch office in the United States during 1968 which solicits orders from customers in the United States for the machine tools manufactured by that corporation. All negotiations with respect to such sales are carried on in the United States. By reason of its activity in the United States M is engaged in business in the United States during 1968. The income or loss from sources within the United States from such sales during 1968 is treated as effectively connected for that year with the conduct of a business in the United States by M. Occasionally, during 1968 the customers in the United States write directly to the home office of M, and the home office makes sales directly to such customers without routing the transactions through it branch office in the United States. The income or loss from sources within the United States for 1968 from these occasional direct sales by the home office is also treated as effectively connected for that year with the conduct of a business in the United States by M.
>
> *Example (2)*. The facts are the same as in example (1) except that during 1967 M was also engaged in the business of purchasing and selling office machines and that it used the installment method of accounting for the sales made in this separate business. During 1967 M was engaged in business in the United States by reason of the sales activities it carried on in the United States for the purpose of selling therein a number of the office machines which it had purchased. Although M discontinued this business activity in the United States in December of 1967, it received in 1968 some installment payments on the sales which it had made in the United States during 1967. The income of M for 1968 from sources within the United States which is attributable to such installment payments is effectively connected for 1968 with the conduct of a business in the United States, even though such income is not connected with the business carried on in the United States during 1968 through its sales office located in the United States for the solicitation of orders for the machine tools it manufacturers.
>
> *Example (3)*. Foreign corporation S, which uses the calendar year as the taxable year, is engaged in the business of purchasing and selling electronic equipment. The home office of such corporation is also engaged in the business of purchasing and selling vintage wines. During 1968, S establishes a branch office in the United States to sell electronic equipment to customers, some of whom are located in the United States and the balance, in foreign countries. This branch office is not equipped to sell, and does not

---

[927] Code § 864(c)(3). Reg. § 1.864-4(b), "Income other than fixed or determinable income and capital gains," provides:

> All income, gain, or loss for the taxable year derived by a nonresident alien individual or foreign corporation engaged in a trade or business in the United States from sources within the United States which does not consist of income, gain, or loss described in section 871(a)(1) or 881(a), or of gain or loss from the sale or exchange of capital assets, shall, for purposes of paragraph (a) of this section, be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States. This income, gain, or loss shall be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States, whether or not the income, gain, or loss is derived from the trade or business being carried on in the United States during the taxable year.

[928] Reg. § 1.864-4(b).

participate in sales of, wine purchased by the home office. Negotiations for the sales of the electronic equipment take place in the United States. By reason of the activity of its branch office in the United States, S is engaged in business in the United States during 1968. As a result of advertisements which the home office of S places in periodicals sold in the United States, customers in the United States frequently place orders for the purchase of wines with the home office in the foreign country, and the home office makes sales of wine in 1968 directly to such customers without routing the transactions through its branch office in the United States. The income or loss from sources within the United States for 1968 from sales of electronic equipment by the branch office, together with the income or loss from sources within the United States for that year from sales of wine by the home office, is treated as effectively connected for that year with the conduct of a business in the United States by S.

Special rules apply to whether income, gain or loss from sources without the United States shall be treated as effectively connected with the conduct of a trade or business within the United States by a nonresident alien individual. Code § 864(c)(4), "Income from sources without United States," provides:

(A) Except as provided in subparagraphs (B) and (C), no income, gain, or loss from sources without the United States shall be treated as effectively connected with the conduct of a trade or business within the United States.

(B) Income, gain, or loss from sources without the United States shall be treated as effectively connected with the conduct of a trade or business within the United States by a nonresident alien individual or a foreign corporation if such person has an office or other fixed place of business within the United States to which such income, gain, or loss is attributable and such income, gain, or loss-[929]

---

[929] [my footnote – not in statute]: Code § 864(c)(5), which is discussed in case at fns 933 (together with Code § 864(c)(4)(B)) and 935 of this part II.E.1.c.ix QBI and Effectively Connected Income, provides the following rules in applying Code § 864(c)(4)(B):

(A) in determining whether a nonresident alien individual or a foreign corporation has an office or other fixed place of business, an office or other fixed place of business of an agent shall be disregarded unless such agent (i) has the authority to negotiate and conclude contracts in the name of the nonresident alien individual or foreign corporation and regularly exercises that authority or has a stock of merchandise from which he regularly fills orders on behalf of such individual or foreign corporation, and (ii) is not a general commission agent, broker, or other agent of independent status acting in the ordinary course of his business,

(B) income, gain, or loss shall not be considered as attributable to an office or other fixed place of business within the United States unless such office or fixed place of business is a material factor in the production of such income, gain, or loss and such office or fixed place of business regularly carries on activities of the type from which such income, gain, or loss is derived, and

(C) the income, gain, or loss which shall be attributable to an office or other fixed place of business within the United States shall be the income, gain, or loss property allocable thereto, but, in the case of a sale or exchange described in clause (iii) of such subparagraph , the income which shall be treated as attributable to an office or other fixed place of business within the United States shall not exceed the income which would be derived from sources within the United States if the sale or exchange were made in the United States.

(i) consists of rents or royalties for the use of or for the privilege of using intangible property described in section 862(a)(4) derived in the active conduct of such trade or business;

(ii) consists of dividends, interest, or amounts received for the provision of guarantees of indebtedness, and either is derived in the active conduct of a banking, financing, or similar business within the United States or is received by a corporation the principal business of which is trading in stocks or securities for its own account; or

(iii) is derived from the sale or exchange (outside the United States) through such office or other fixed place of business of personal property described in section 1221(a)(1), except that this clause shall not apply if the property is sold or exchanged for use, consumption, or disposition outside the United States and an office or other fixed place of business of the taxpayer in a foreign country participated materially in such sale.

Any income or gain which is equivalent to any item of income or gain described in clause (i), (ii), or (iii) shall be treated in the same manner as such item for purposes of this subparagraph.

(C) In the case of a foreign corporation taxable under part I or part II of subchapter L, any income from sources without the United States which is attributable to its United States business shall be treated as effectively connected with the conduct of a trade or business within the United States.

(D) No income from sources without the United States shall be treated as effectively connected with the conduct of a trade or business within the United States if it either -

(i) consists of dividends, interest, or royalties paid by a foreign corporation in which the taxpayer owns (within the meaning of section 958(a)), or is considered as owning (by applying the ownership rules of section 958(b)), more than 50 percent of the total combined voting power of all classes of stock entitled to vote, or

(ii) is subpart F income within the meaning of section 952(a).

Reg. § 1.864-5(a), "In general," provides:

This section applies only to a nonresident alien individual or a foreign corporation that is engaged in a trade or business in the United States at some time during a taxable year beginning after December 31, 1966, and to the income, gain, or loss of such person from sources without the United States. The income, gain, or loss of such person for the taxable year from sources without the United States which is specified in paragraph (b) of this section shall be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States, only if he also has in the United States at some time during the taxable year, but not necessarily at the time the income, gain, or loss is realized, an office or other fixed place of business, as defined in § 1.864-7, to which such income, gain, or loss is attributable in accordance with § 1.864-6. The income of such person for the taxable year from sources without the United States which is specified in paragraph (c) of this section shall be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States when derived by a foreign corporation carrying on a life insurance business in the United States. Except as provided in paragraphs (b) and (c) of this section, no income, gain, or loss of a nonresident alien individual or a foreign corporation for the taxable year from sources without the United States shall be treated as effectively connected for the taxable year with the conduct of a trade or business in the United States by that person. Any income, gain, or loss described in paragraph (b) or (c) of this section which, if it were derived by the taxpayer from sources within the United States for the taxable year, would not be treated under § 1.864-4 as effectively connected for the taxable year with the conduct of a trade or business in the United States shall not be treated under this section as effectively connected for the taxable year with the conduct of a trade or business in the United States.

Reg. § 1.864-5(b)(1) provides that rents, royalties, or gains on sales of intangible property related to the use of the intangible property outside the United States are taken into account under Reg. § 1.864-5(a) only if "derived in the active conduct of the trade or business in the United States."

Reg. § 1.864-5(b)(2) provides that dividends or interest, or gains or loss from sales of stocks or securities are taken into account under Reg. § 1.864-5(a) if "realized by (a) a nonresident alien individual or a foreign corporation in the active conduct of a banking, financing, or similar business in the United States or (b) a foreign corporation engaged in business in the United States whose principal business is trading in stocks or securities for its own account," with "engaged in the active conduct of a banking, financing, or similar business in the United States" being determined under Reg. § 1.864-4(c)(5)(i).

Reg. § 1.864-5(b)(3)(i) provides that, to the extent not covered above:

> Income, gain, or loss from the sale of inventory items or of property held primarily for sale to customers in the ordinary course of business, as described in section 1221(1), where the sale is outside the United States but through the office or other fixed place of business which the nonresident alien or foreign corporation has in the United States, irrespective of the destination to which such property is sent for use, consumption, or disposition.

However, Reg. § 1.864-6(a) provides that Reg. § 1.864-5(b) does not make income effectively connected for the taxable year with the conduct of a trade or business in the United States unless:

> the income, gain, or loss is attributable under paragraphs (b) and (c) of this section to an office or other fixed place of business, as defined in § 1.864-7, which the taxpayer has in the United States at some time during the taxable year.

However, Reg. § 1.864-6(b)(1) provides:[930]

> For purposes of paragraph (a) of this section, income, gain, or loss is attributable to an office or other fixed place of business which a nonresident alien individual or a foreign corporation has in the United States only if such office or other fixed place of business is

[930] A case discusses Reg. § 1.864-6(b)(1) at fns 933, 934 and 936 in this part II.E.1.c.ix QBI and Effectively Connected Income.

a material factor in the realization of the income, gain, or loss, and if the income, gain, or loss is realized in the ordinary course of the trade or business carried on through that office or other fixed place of business. For this purpose, the activities of the office or other fixed place of business shall not be considered to be a material factor in the realization of the income, gain, or loss unless they provide a significant contribution to, by being an essential economic element in, the realization of the income, gain, or loss. Thus, for example, meetings in the United States of the board of directors of a foreign corporation do not of themselves constitute a material factor in the realization of income, gain, or loss. It is not necessary that the activities of the office or other fixed place of business in the United States be a major factor in the realization of income, gain, or loss. An office or other fixed place of business located in the United States at some time during a taxable year may be a material factor in the realization of an item of income, gain, or loss for that year even though the office or other fixed place of business is not present in the United States when the income, gain, or loss is realized.

Reg. § 1.864-6(b)(2) provides special rules for rents, royalties, or gains or losses, from intangible personal property, and dividends or interest from any transaction, or gains or losses on the sale or exchange of stocks or securities:[931]

(i) *Rents, royalties, or gains on sales of intangible property*. Rents, royalties, or gains or losses, from intangible personal property specified in paragraph (b)(1) of § 1.864-5, if the office or other fixed place of business either actively participates in soliciting, negotiating, or performing other activities required to arrange, the lease, license, sale, or exchange from which such income, gain, or loss is derived or performs significant services incident to such lease, license, sale, or exchange. An office or other fixed place of business in the United States shall not be considered to be a material factor in the realization of income, gain, or loss for purposes of this subdivision merely because the office or other fixed place of business conducts one or more of the following activities: (a) develops, creates, produces, or acquires and adds substantial value to, the property which is leased, licensed, or sold, or exchanged, (b) collects or accounts for the rents, royalties, gains, or losses, (c) exercises general supervision over the activities of the persons directly responsible for carrying on the activities or services described in the immediately preceding sentence, (d) performs merely clerical functions incident to the lease, license, sale, or exchange or (e) exercises final approval over the execution of the lease, license, sale, or exchange. The application of this subdivision may be illustrated by the following examples:

Example (1). F, a foreign corporation, is engaged in the active conduct of the business of licensing patents which it has either purchased or developed in the United States. F has a business office in the United States. Licenses for the use of such patents outside the United States are negotiated by offices of F located outside the United States, subject to approval by an officer of such corporation located in the U.S. office. All services which are rendered to F's foreign licenses are performed by employees of F's offices located outside the United States. None of the income, gain, or loss resulting from the foreign licenses so negotiated by F is attributable to its business office in the United States.

[931] A case discusses Reg. § 1.864-6(b)(2)(i) at fn 935 in this part II.E.1.c.ix QBI and Effectively Connected Income.

Example (2). N, a foreign corporation, is engaged in the active conduct of the business of distributing motion picture films and television programs. N does not distribute such films or programs in the United States. The foreign distribution rights to these films and programs are acquired by N's U.S. business office from the U.S. owners of these films and programs. Employees of N's offices located in various foreign countries carry on in such countries all the solicitations and negotiations for the licensing of these films and programs to licensees located in such countries and provide the necessary incidental services to the licensees. N's U.S. office collects the rentals from the foreign licensees and maintains the necessary records of income and expense. Officers of N located in the United States also maintain general supervision over the employees of the foreign offices, but the foreign employees conduct the day to day business of N outside the United States of soliciting, negotiating, or performing other activities required to arrange the foreign licenses. None of the income, gain, or loss resulting from the foreign licenses so negotiated by N is attributable to N's U.S. office.

(ii) *Dividends or interest, or gains or losses from sales of stock or securities*.

(a) *In general*. Dividends, or interest from any transaction, or gains or losses on the sale or exchange of stocks or securities, specified in paragraph (b)(2) of § 1.864-5, if the office or other fixed place of business either activity participates in soliciting, negotiating, or performing other activities required to arrange, the issue, acquisition, sale, or exchange, of the asset from which such income, gain, or loss is derived or performs significant services incident to such issue, acquisition, sale or exchange. An office or other fixed place of business in the United States shall not be considered to be a material factor in the realization of income, gain, or loss for purposes of this subdivision merely because the office or other fixed place of business conducts one or more of the following activities: (1) collects or accounts for the dividends, interest, gains, or losses, (2) exercises general supervision over the activities of the persons directly responsible for carrying on the activities or services described in the immediately preceding sentence, (3) performs merely clerical functions incident to the issue, acquisition, sale, or exchange, or (4) exercises final approval over the execution of the issue, acquisition, sale, or exchange.

(b) *Effective connection of income from stocks or securities with active conduct of a banking, financing, or similar business*. Notwithstanding (a) of this subdivision (ii), the determination as to whether any dividends or interest from stocks or securities, or gain or loss from the sale or exchange of stocks or securities which are capital assets, which is from sources without the United States and derived by a nonresident alien individual or a foreign corporation in the active conduct during the taxable year of a banking, financing, or similar business in the United States, shall be treated as effectively connected for such year with the active conduct of that business shall be made by applying the principles of paragraph (c)(5)(ii) of § 1.864-4 for determining whether income, gain, or loss of such type from sources within the United States is effectively connected for such year with the active conduct of that business.

(c) *Security defined*. For purposes of this subdivision (ii), a security is any bill, note, bond, debenture, or other evidence of indebtedness, or any evidence of an interest in, or right to subscribe to or purchase, any of the foregoing items.

(d) *Limitations on application of rules on banking, financing, or similar business*.

(1) *Trading for taxpayer's own account*. The provisions of (b) of this subdivision (ii) apply for purposes of determining when certain income, gain, or loss from stocks or securities is effectively connected with the active conduct of a banking, financing, or similar business in the United States. Any dividends, interest, gain, or loss from sources without the United States which by reason of the application of (b) of this subdivision (ii) is not effectively connected with the active conduct by a foreign corporation of a banking, financing, or similar business in the United States may be effectively connected for the taxable year, under (a) of this subdivision (ii), with the conduct by such taxpayer of a trade or business in the United States which consists of trading in stocks or securities for the taxpayer's own account.

(2) *Other income*. For rules relating to dividends or interest from sources without the United States (other than dividends or interest from, or gain or loss from the sale or exchange of, stocks or securities referred to in (b) of this subdivision (ii)) derived in the active conduct of a banking, financing, or similar business in the United States, see (a) of this subdivision (ii).

(iii) *Sale of goods or merchandise through U.S. office*. Income, gain, or loss from sales of goods or merchandise specified in paragraph (b)(3) of § 1.864-5, if the office or other fixed place of business actively participates in soliciting the order, negotiating the contract of sale, or performing other significant services necessary for the consummation of the sale which are not the subject of a separate agreement between the seller and the buyer. The office or other fixed place of business in the United States shall be considered a material factor in the realization of income, gain, or loss from a sale made as a result of a sales order received in such office or other fixed place of business except where the sales order is received unsolicited and that office or other fixed place of business is not held out of potential customers as the place to which such sales should be sent. The income, gain, or loss must be realized in the ordinary course of the trade or business carried on through the office or other fixed place of business in the United States. Thus, if a foreign corporation is engaged solely in a manufacturing business in the United States, the income derived by its office in the United States as a result of an occasional sale outside the United States is not attributable to the U.S. office if the sales office of the manufacturing business is located outside the United States. On the other hand, if a foreign corporation establishes a sales office in the United States to sell for consumption in the Western Hemisphere merchandise which the corporation produces in Africa, the income derived by the sales office in the United States as a result of an occasional sale made by it in Europe shall be attributable to the U.S. sales office. An office or other fixed place of business in the United States shall not be considered to be a material factor in the realization of income, gain, or loss for purposes of this subdivision merely because of one or more of the following activities: (a) the sale is made subject to the final approval of such office or other fixed place of business, (b) the property sold is held in, and distributed from, such office or other fixed place of business, (c) samples of the property sold are displayed (but not otherwise promoted or sold) in such office or other fixed place of business, or (d) such office or other fixed place of business performs merely clerical functions incident to the sale. Activities carried on by employees of an office or other fixed place of business constitute activities of that office or other fixed place of business.

For purposes of that provision, Reg. § 1.864-6(c) defines a security as "any bill, note, bond, debenture, or other evidence of indebtedness, or any evidence of an interest in, or right to subscribe to or purchase, any of the foregoing items."

Reg. § 1.864-7 defines "an office or other fixed place of business in the United States."

Reg. § 1.864-5(c) relates to income attributable to certain foreign corporations' U.S. life insurance business.

The above analysis is informed by *Grecian Magnesite Mining v. Commissioner*, 149 T.C. 63 (2017),[932] which is described in in part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest, especially fn. 5651. That case dealt with the sale of a partnership interest by a nonresident alien that was a passive investor in a U.S. business. The IRS argued that one must look through the partnership to determine whether gain on sale was ECI, and the taxpayer argued that the taxpayer did not participate in the business and that a partnership interest should be treated as ownership of an entity – not of the underlying assets. As described further below, 2017 tax reform added the rules relating to the sale of a partnership interest, but it did not overturn any other aspect of that ruling.

The court provided an overview of whether the redemption of the taxpayer's partnership interest was ECI:[933]

> Section 865(e)(3) provides that, in order to determine whether income from a sale is attributable to a U.S. office or fixed place of business, we must look to "[t]he principles of section 864(c)(5)", which provides rules for applying section 864(c)(4)(B) to determine what tax items are "attributable to" a U.S. office.[20] Under section 864(c)(5)(B), income, gain, or loss is attributable to a U.S. office only if: (a) the U.S. office is "a *material factor* in the production of such income", and (b) the U.S. office "*regularly carries* on activities of the type from which such income, gain, or loss is derived."[21] (Emphasis added.) 26 C.F.R. section 1.864-6, Income Tax Regs., refers to these two elements together as the "material factor" test, explaining "regularly carries on activities of the type", see sec. 864(c)(5)(B), as "realized in the ordinary course". Because the regulation employs the phrase "in the ordinary course" in its application of the statute, we also use "ordinary course" here as a synonym for "regularly carries on activities of the type".
>
> [20] By its terms, section 864(c)(4)(B) and (c)(5) does not apply to gains from dispositions of partnership interests, because such gains are not one of the three types of income denoted in section 864(c)(4)(B)(i)-(iii). Thus, section 865(e)(3) does not incorporate section 864(c)(5) per se but rather invokes only "*[t]he principles* of section 864(c)(5)". (Emphasis added.)
>
> [21] The parties have not directed us to any caselaw applying these "material factor" and "ordinary course" standards, and we find none.

---

[932] Aff'd 926 F3d 819 (D.C. Cir. 2019).

[933] Reg. § 1.864-6(b)(1) is quoted at fn 930 in this part II.E.1.c.ix QBI and Effectively Connected Income. Code § 864(c)(5) is quoted at fn 929 in this part II.E.1.c.ix QBI and Effectively Connected Income. After 2017 tax reform, these provisions no longer apply to partnership interests, but they would apply to stock.

The court discussed Reg. § 1.864-6(b)(1):[934]

> … the Commissioner argues in the alternative that because Premier increased the value of its underlying assets and increased its overall value as a going concern during the period that GMM was a partner, thereby increasing the value of GMM's interest, Premier's U.S. offices were an essential economic element in GMM's realization of gain in the redemption. In so arguing, the Commissioner conflates the ongoing value of a business operation with gain from the sale of an interest in that business. As we have explained previously, GMM's gain in the redemption was not realized from Premier's trade or business of mining magnesite, that is, from activities at the partnership level; rather, GMM realized gain at the partner level from the distinct sale of its partnership interest.

The court discussed Reg. § 1.864-6(b)(2)(i), to which the taxpayer pointed as requiring a higher level of activity than the taxpayer's:[935]

> The Commissioner dismisses this argument with the observation, correct as far as it goes, that the regulation concerns "[r]ents, royalties, or gains on sales of intangible property", whereas here the income at issue is different - *i.e.*, proceeds from the redemption of a partnership interest. The Commissioner is correct in the sense that this regulation is not directly on point; however, in determining whether a sale is attributable to an office, we are directed by section 865(e)(3) to consult not "section 864(c)(5)" (which by its terms does not apply here, see supra note 19) but rather "*the principles of* section 864(c)(5)". (Emphasis added.) It therefore seems we must take guidance as appropriate from section 864(c)(5) and the regulations promulgated thereunder *without* dismissing, as the Commissioner would, provisions that are not directly on point, since the set of provisions that are directly on point is an empty set. We acknowledge it is fair to observe that a provision applicable to one kind of income might not be suited to a "material factor" analysis for another kind of income. But we see no reason to disregard this "[r]ents, royalties", etc., provision insofar as it provides an instance in which a U.S. office that "[d]evelops" and "adds substantial value to" an income-generating asset is nonetheless not a "material factor" in the realization of income from that asset. GMM reasonably derives from this regulation the principle that the creation of underlying value is simply a distinct function from being a material factor in the realization of income in a specific transaction.
>
> The material factor test is not satisfied here because Premier's actions to increase its overall value were not "an essential economic element in the realization of the income", 26 C.F.R. sec. 1.864-6(b)(1), that GMM received upon the sale of its interest. Increasing the value of Premier's business as a going concern, without a subsequent sale, would not have resulted in the realization of gain by GMM.
>
> To be sure, GMM's investment in Premier increased in value, presumably from Premier's business activities; but GMM did not realize gain from holding its interest in Premier until that amount became liquid, that is, until its partnership interest was redeemed. The regulations call for this focus in two ways—by providing that adding value alone is not a material factor, see *id.* subpara. (2)(i)(a), and by providing that performing merely clerical functions incident

---

[934] Reg. § 1.864-6(b)(1) is quoted at fn 930 in this part II.E.1.c.ix QBI and Effectively Connected Income. Code § 864(c)(5) is quoted at fn 929 in this part II.E.1.c.ix QBI and Effectively Connected Income. After 2017 tax reform, these provisions no longer apply to partnership interests, but they would apply to stock.
[935] Reg. § 1.864-6(b)(2)(i) is quoted at fn 931 in this part II.E.1.c.ix QBI and Effectively Connected Income. After 2017 tax reform, these provisions no longer apply to partnership interests, but they would apply to stock.

> to the sale or exchange (*i.e.*, a reasonable description of Premier's role in effecting the liquidation)[23] is not a material factor, see *id.* subdiv. (i)(d). Thus, Premier's efforts to develop, create, or add substantial value to the property sold are not considered to be a material factor in the realization of the disputed gain pursuant to 26 C.F.R. section 1.864-6(b)(1), and the Commissioner therefore fails to show that the first test for attributing the disputed gain to a U.S. office - "material factor" - is met.
>
> [23] The Commissioner would dispute the reasonableness of that description, but in part IV.B.3.b below we discuss the nature and modest quantum of Premier's activity in the redemption

Finally, the court concluded that the taxpayer's gain on redemption of its partnership interest was not in the ordinary course of the partnership's business:[936]

> The second part of the U.S.-source attribution inquiry—"ordinary course"— is found in 26 C.F.R. section 1.864-6(b)(1), which provides:
>
>> [I]ncome, gain, or loss is attributable to an office or other fixed place of business which *** a foreign corporation has in the United States only *** *if the income, gain, or loss is realized in the ordinary course of the trade or business carried on through that office or other fixed place of business.* *** [Emphasis added.]
>
> Even if we were to decide that Premier's office was a "material factor" in the production of the disputed gain (which we do not), we would also need to find that the disputed gain was realized in the ordinary course of Premier's business conducted through its U.S. office in order for the gain to be attributable to that office, and thereby to be U.S.-source income.[24]
>
> As required by its bylaws, Premier extended to GMM an offer to redeem its interest according to the terms of Premier's prior transaction with IMin. GMM accepted Premier's offer without any negotiation of the terms of the deal.
>
> According to GMM, the redemption of its interest in Premier was a one-time, extraordinary event and therefore was not undertaken in the ordinary course of Premier's business. GMM argues that Premier's U.S. office is in the business of selling and producing magnesite, not buying and selling partnership interests. Because the disputed gain was realized in the redemption of GMM's partnership interest in Premier, not from Premier's ordinary business - magnesite production and sale - it does not satisfy the ordinary course requirement and is not U.S. source.
>
> The Commissioner disagrees with GMM's characterization of Premier, and points to Premier's other actions - admitting a new partner and redeeming IMin's interest - to show that Premier's redemption of GMM's interest was not an isolated event. The Commissioner takes the position that the wording of section 865(e)(2)(A) ("any sale of personal property") is broad enough to cover all sales of personal property, including occasional sales. The Commissioner explains:

---

[936] Reg. § 1.864-6(b)(1) is quoted at fn 930 in this part II.E.1.c.ix QBI and Effectively Connected Income. After 2017 tax reform, this provision no longer apply to partnership interests, but they would apply to stock.

> The language of section 864(c)(5)(B) does not require that the sale of personal property occur regularly; it requires that the type of activities giving rise to the income occur regularly. In this regard, the language is amply broad to support attribution to an office of income from an occasional sale of personal property, *if the gain on the sale is derived from the business activities regularly conducted* through the office or other fixed place of business. [Emphasis added.]

The Commissioner again conflates the ongoing income-producing activities of Premier (magnesite production and sale), which certainly occurred in the ordinary course, and the redemption of GMM's partnership interest in Premier, which was an extraordinary event; and he thereby would effectively eliminate the "ordinary course" test and would allow the "material factor" test to stand for both tests. Premier's business did regularly produce income (and GMM paid tax on its distributive share of that income each year). However, contrary to the Commissioner's assertion, Premier was not engaged in the business of buying or selling interests in itself and did not do so in the ordinary course of its business. Premier engaged in only two such transactions (other than the redemption of GMM's interest) over the course of seven years, and this quantum of activity is not sufficient to show that Premier was in the business of redeeming and selling partnership interests. Rather, Premier is of course in the business of producing and selling magnesite products, and therefore GMM's gain realized on the redemption of its partnership interest in Premier was not realized in the ordinary course of the trade or business carried on through Premier's U.S. offices.

Since we have held that GMM's disputed gain on its redemption was not attributable to a U.S. office or other fixed place of business, it is therefore not U.S.-source income under section 865(e)(2)(A). As noted above, the Commissioner concedes that the disputed gain is not one of the types of foreign-source income treated as effectively connected by section 864(c)(4)(B). Consequently, the disputed gain is not effectively connected income.

[24] Rev. Rul. 91-32 *supra*, makes no mention of the "ordinary course" prong of the "attributable to" analysis, and this detracts from the persuasiveness of its conclusion that gain such as the disputed gain is attributable to U.S. offices.

Also, certain dividends, interest, or royalties paid by a related foreign corporation and certain Subpart F income from a controlled foreign corporation, which are from sources without the United States, are excluded from treatment as effectively connected for any taxable year with the conduct of a trade or business in the United States by a nonresident alien individual or a foreign corporation.[937]

---

[937] Reg. § 1.864-5(d). Reg. § 1.864-5(d)(3) also coordinates with Reg. § 1.864-4:

> Interest which, by reason of section 861(a)(1)(A) (relating to interest on deposits with banks, savings and loan associations, and insurance companies paid or credited before January 1, 1976) and paragraph (c) of § 1.864-4, is determined to be income from sources without the United States because it is not effectively connected for the taxable year with the conduct of a trade or business in the United States by the nonresident alien individual or foreign corporation.

Additional rules apply to deferred payment[938] and to property disposed of within 10 years after it to be used or held for use in connection with the conduct of a trade or business within the United States.[939]

In response to *Grecian Magnesite*,[940] 2017 tax reform added Code § 864(c)(8), which provides:[941]

> *Gain or loss of foreign persons from sale or exchange of certain partnership interests*.
>
> (A) *In general*. Notwithstanding any other provision of this subtitle, if a nonresident alien individual or foreign corporation owns, directly or indirectly, an interest in a partnership which is engaged in any trade or business within the United States, gain or loss on the sale or exchange of all (or any portion of) such interest shall be treated as effectively connected with the conduct of such trade or business to the extent such gain or loss does not exceed the amount determined under subparagraph (b).
>
> (B) *Amount treated as effectively connected*. The amount determined under this subparagraph with respect to any partnership interest sold or exchanged-
>
> (i) in the case of any gain on the sale or exchange of the partnership interest, is-
>
> (I) the portion of the partner's distributive share of the amount of gain which would have been effectively connected with the conduct of a trade or business within the United States if the partnership had sold all of its assets at their fair market value as of the date of the sale or exchange of such interest, or
>
> (II) zero if no gain on such deemed sale would have been so effectively connected, and
>
> (ii) in the case of any loss on the sale or exchange of the partnership interest, is-

---

938 Code § 864(c)(6).
939 Code § 864(c)(7).
940 *Grecian Magnesite Mining v. Commissioner*, which is described above and further described in part II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest, especially fn. 5651. The Conference report provided:

> Under a 1991 revenue ruling, in determining the source of gain or loss from the sale or exchange of an interest in a foreign partnership, the IRS applied the asset-use test and business activities test at the partnership level to determine the extent to which income derived from the sale or exchange is effectively connected with that U.S. business.[1107] Under the ruling, if there is unrealized gain or loss in partnership assets that would be treated as effectively connected with the conduct of a U.S. trade or business if those assets were sold by the partnership, some or all of the foreign person's gain or loss from the sale or exchange of a partnership interest may be treated as effectively connected with the conduct of a U.S. trade or business. However, a 2017 Tax Court case rejects the logic of the ruling and instead holds that, generally, gain or loss on sale or exchange by a foreign person of an interest in a partnership that is engaged in a U.S. trade or business is foreign-source.[1108]
> 1107 Rev. Rul. 91-32, 1991-1 C.B. 107.
> 1108 *See Grecian Magnesite Mining v. Commissioner*, 149 T.C. No. 3 (July 13, 2017).

941 For further discussion, see part II.E.1.c.viii.(c) Sale of an Interest in a Partnership Conducting a Trade or Business.

(I) the portion of the partner's distributive share of the amount of loss on the deemed sale described in clause (i)(I) which would have been so effectively connected, or

(II) zero if no loss on such deemed sale would be have been so effectively connected.

For purposes of this subparagraph, a partner's distributive share of gain or loss on the deemed sale shall be determined in the same manner as such partner's distributive share of the non-separately stated taxable income or loss of such partnership.

(C) *Coordination with United States real property interests*. If a partnership described in subparagraph (A) holds any United States real property interest (as defined in section 897(c)) at the time of the sale or exchange of the partnership interest, then the gain or loss treated as effectively connected income under subparagraph (A) shall be reduced by the amount so treated with respect to such United States real property interest under section 897.

(D) *Sale or exchange*. For purposes of this paragraph, the term "sale or exchange" means any sale, exchange, or other disposition.

(E) *Secretarial authority*. The Secretary shall prescribe such regulations or other guidance as the Secretary determines appropriate for the application of this paragraph, including with respect to exchanges described in section 332, 351, 354, 355 , 356, or 361.

Code § 897(a)(1) provides:

Treatment as effectively connected with United States trade or business. For purposes of this title, gain or loss of a nonresident alien individual or a foreign corporation from the disposition of a United States real property interest shall be taken into account-

(A) in the case of a nonresident alien individual, under section 871(b)(1), or

(B) in the case of a foreign corporation, under section 882(a)(1),

as if the taxpayer were engaged in a trade or business within the United States during the taxable year and as if such gain or loss were effectively connected with such trade or business.

Code § 897(c), "United States Real Property Interest," provides:

For purposes of this section-

(1) *United States real property interest*.

(A) *In general*. Except as provided in subparagraph (b) or subsection(k), the term "United States real property interest" means-

(i) an interest in real property (including an interest in a mine, well, or other natural deposit) located in the United States or the Virgin Islands, and

(ii) any interest (other than an interest solely as a creditor) in any domestic corporation unless the taxpayer establishes (at such time and in such manner as the Secretary by regulations prescribes) that such corporation was at no time a United States real property holding corporation during the shorter of-

(I) the period after June 18, 1980, during which the taxpayer held such interest, or

(II) the 5-year period ending on the date of the disposition of such interest.

(B) *Exclusion for interest in certain corporations*. The term “United States real property interest” does not include any interest in a corporation if-

(i) as of the date of the disposition of such interest, such corporation did not hold any United States real property interests,

(ii) all of the United States real property interests held by such corporation at any time during the shorter of the periods described in subparagraph (A)(ii)-

(I) were disposed of in transactions in which the full amount of the gain (if any) was recognized, or

(II) ceased to be United States real property interests by reason of the application of this subparagraph to 1 or more other corporations, and

(iii) such corporation nor any predecessor of such corporation was a regulated investment company or a real estate investment trust at any time during the shorter of the periods described in subparagraph (A)(ii).

(2) *United States real property holding corporation*. The term “United States real property holding corporation” means any corporation if-

(A) the fair market value of its United States real property interests equals or exceeds 50 percent of

(B) the fair market value of-

(i) its United States real property interests,

(ii) its interests in real property located outside the United States, plus

(iii) any other of its assets which are used or held for use in a trade or business.

(3) *Exception for stock regularly traded on established securities markets*. If any class of stock of a corporation is regularly traded on an established securities market, stock of such class shall be treated as a United States real property interest only in the case of a person who, at some time during the shorter of the periods described in paragraph (1)(A)(ii), held more than 5 percent of such class of stock.

(4) *Interests held by foreign corporations and by partnerships, trusts, and estates*. For purpose of determining whether any corporation is a United States real property holding corporation-

(A) *Foreign corporations*. Paragraph (1)(A)(ii) shall be applied by substituting "any corporation (whether foreign or domestic)" for "any domestic corporation".

(B) *Assets held by partnerships, etc.* Under regulations prescribed by the Secretary, assets held by a partnership, trust, or estate shall be treated as held proportionately by its partners or beneficiaries. Any asset treated as held by a partner or beneficiary by reason of this subparagraph which is used or held for use by the partnership, trust, or estate in a trade or business shall be treated as so used or held by the partner or beneficiary Any asset treated as held by a partner or beneficiary by reason of this subparagraph shall be so treated for purposes of applying this subparagraph successively to partnerships, trusts, or estates which are above the first partnership, trust, or estate in a chain thereof.

(5) *Treatment of controlling interests*.

(A) *In general*. Under regulations, for purposes of determining whether any corporation is a United States real property holding corporation, if any corporation (hereinafter in this paragraph referred to as the "first corporation") holds a controlling interest in a second corporation-

(i) the stock which the first corporation holds in the second corporation shall not be taken into account,

(ii) the first corporation shall be treated as holding a portion of each asset of the second corporation equal to the percentage of the fair market value of the stock of the second corporation represented by the stock held by the first corporation, and

(iii) any asset treated as held by the first corporation by reason of clause (ii) which is used or held for use by the second corporation in a trade or business shall be treated as so used or held by the first corporation.

Any asset treated as held by the first corporation by reason of the preceding sentence shall be so treated for purposes of applying the preceding sentence successively to corporations which are above the first corporation in a chain of corporations.

(B) *Controlling interest*. For purposes of subparagraph (A), the term "controlling interest" means 50 percent or more of the fair market value of all classes of stock of a corporation.

(6) *Other special rules*.

(A) *Interest in real property*. The term "interest in real property" includes fee ownership and co-ownership of land or improvements thereon, leaseholds of land or improvements thereon, options to acquire land or improvements thereon, and options to acquire leaseholds of land or improvements thereon.

(B) *Real property includes associated personal property*. The term “real property” includes movable walls, furnishings, and other personal property associated with the use of the real property.

(C) *Constructive ownership rules*. For purposes of determining under paragraph (3) whether any person holds more than 5 percent of any class of stock and of determining under paragraph (5) whether a person holds a controlling interest in any corporation, section 318(a) shall apply (except that paragraphs (2)(C) and (3)(C) of section 318(a) shall be applied by substituting “5 percent” for “50 percent”).

For Code § 318(a), see part II.Q.7.a.viii Code § 318 Family Attribution under Subchapter C.

II.E.1.c.x. Bonus Depreciation and the Code § 199A Deduction

By reducing qualified business income, bonus depreciation reduces the 20% deduction.

The 20% deduction will eventually go away, whereas the lack of future depreciation deductions will come back to haunt taxpayers when rates increase and the 20% deduction is not available.

In 2018, taking bonus depreciation is an easy decision for most property, in that most property eligible for bonus depreciation has a depreciable life of 7 years or less, and the 20% deduction lasts for 7 years.

If the law does not change, then taking bonus depreciation in 2025 may be inadvisable, because it reduces the 20% deduction and eliminates depreciation deductions in more highly taxed future years.

Between 2018 and 2025 (or any change in the tax law affecting these issues), the trade-off between bonus depreciation and the 20% deduction moves over time from being not worthy of consideration to being very worthy of consideration.

See part II.G.5.b Bonus Depreciation.

II.E.1.c.xi. Transition Rules Relating to Proposed and Final Regulations under Code § 199A

The preamble to the final regulations, T.D. 9847 (2/8/2019), “Effective/Applicability Date,” explains:

> Section 7805(b)(1)(A) and (B) of the Code generally provide that no temporary, proposed, or final regulation relating to the internal revenue laws may apply to any taxable period ending before the earliest of (A) the date on which such regulation is filed with the Federal Register, or (B) in the case of a final regulation, the date on which a proposed or temporary regulation to which the final regulation relates was filed with the Federal Register.
>
> Consistent with authority provided by Section 7805(b)(1)(A), §§ 1.199A-1 through 1.199A-6 generally apply to taxable years ending after February 8, 2019. However, taxpayers may rely on the rules set forth in §§ 1.199A-1 through 1.199A-6, in their entirety, or on the proposed regulations under §§ 1.199A-1 through 1.199A-6

issued on August 16, 2018, in their entirety, for taxable years ending in calendar year 2018. In addition, to prevent abuse of Section 199A and the regulations thereunder, the anti-abuse rules in §§ 1.199A-2(c)(1)(iv), 1.199A-3(c)(2)(ii), 1.199A-5(c)(2), 1.199A-5(d)(3), and 1.199A-6(d)(3)(vii) apply to taxable years ending after December 22, 2017, the date of enactment of the TCJA. Finally, the provisions of § 1.643-1, which prevent abuse of the Code generally through the use of trusts, apply to taxable years ending after August 16, 2018.

Section 199A(f)(1) provides that Section 199A applies at the partner or S corporation shareholder level, and that each partner or shareholder takes into account such person's allocable share of each qualified item. Section 199A(c)(3) provides that the term "qualified item" means items that are effectively connected with a U.S. trade or business, and "included or allowed in determining taxable income from the taxable year." Section 199A applies to taxable years beginning after December 31, 2017. However, there is no statutory requirement under Section 199A that a qualified item arise after December 31, 2017.

Section 1366(a) generally provides that, in determining the income tax of a shareholder for the shareholder's taxable year in which the taxable year of the S corporation ends, the shareholder's pro rata share of the corporation's items is taken into account. Similarly, section 706(a) generally provides that, in computing the taxable income of a partner for a taxable year, the partner includes items of the partnership for any taxable year of the partnership ending within or with the partner's taxable year. Therefore, income flowing to an individual from a partnership or S corporation is subject to the tax rates and rules in effect in the year of the individual in which the entity's year closes, not the year in which the item actually arose.

Accordingly, for purposes of determining QBI, W-2 wages, UBIA of qualified property, and the aggregate amount of qualified REIT dividends and qualified PTP income, the effective date provisions provide that if an individual receives QBI, W-2 wages, UBIA of qualified property, and the aggregate amount of qualified REIT dividends and qualified PTP income from an RPE with a taxable year that begins before January 1, 2018, and ends after December 31, 2017, such items are treated as having been incurred by the individual during the individual's tax year during which such RPE taxable year ends.

II.E.1.d. Partnerships Compared to S Corporations for Code § 199A

The preamble to the final regulations explains wages paid to shareholders:[942]

> A few commenters asked for confirmation that W-2 wages include S corporation owner/employee W-2 wages for purposes of the W-2 wage limitation (assuming the wages are included on the Form W-2 filed within 60 days of the due date). The definition of W-2 wages includes amounts paid to officers of an S corporation and common-law employees of an individual or RPE. Amounts paid as W- 2 wages to an S corporation shareholder cannot be included in the recipient's QBI. However, these amounts are included as W-2 wages for purposes of the W-2 wage limitation to the extent that the requirements of § 1.199A-2 are otherwise satisfied.

[942] T.D. 9847 (2/8/2019), part III.A, "W-2 Wages." See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part IV.A.9, “Reasonable Compensation,” declined to provide additional regulatory guidance regarding S corporation shareholder-employees’ compensation and Code § 199A:

> Several commenters were concerned that an overlap of the QBI, W-2 wage limitation, and reasonable compensation rules for S corporations would cause disparities between taxpayers operating businesses in different entity structures. These commenters stated that the rules might have the unintended consequence of encouraging taxpayers to select or avoid certain business entities. For example, one commenter noted that the reasonable compensation requirement for S corporations favors S corporations for purposes of the W-2 wage limitation when calculating the Section 199A deduction, compared to sole proprietorships and partnerships which may not pay any wages. That commenter suggested the final regulations include an election for partners or sole proprietors to treat an amount of reasonable compensation paid as wages for purposes of the W-2 wage limitation. Other commenters similarly noted the entity choice issue, but from the perspective that S corporations can be less advantageous. The commenters argued that QBI is reduced for S corporation shareholders because reasonable compensation is not included in QBI and noted there could be further impacts depending on whether the taxpayer is above or below the income thresholds. These commenters suggested that the final regulations should strive for equity between taxpayers operating businesses in different entity structures. Finally, one commenter suggested the need for additional guidance regarding whether and how reasonable compensation paid to an S corporation shareholder is considered wages for purposes of the W-2 wage limitation.
>
> One commenter maintained that to avoid incentivizing minimization of compensation and Federal Insurance Contributions Act tax, the final regulations should provide that deductions with respect to reasonable compensation should not reduce QBI. The commenter stated that reasonable compensation must be added back in calculating QBI.
>
> The Treasury Department and the IRS decline to adopt these suggestions. Section 199A(c)(4) clearly excludes reasonable compensation paid to a taxpayer by any qualified trade or business of the taxpayer for services rendered with respect to the trade or business from QBI. These amounts are attributable to a trade or business and are thus qualified items of deduction as described in Section 199A(c)(3) to the extent they are effectively connected with the conduct of a trade or business within the United States and included or allowed in determining taxable income for the taxable year. In addition, reasonable compensation paid to a shareholder-employee is included as W-2 wages for purposes of the W-2 wage limitation to the extent that the requirements of § 1.199A-2 are otherwise satisfied. Further, guaranteed payments and payments to independent contractors are not W-2 wages and therefore, cannot be counted for purposes of the W-2 wage limitation.
>
> A few commenters were concerned about whether tax return preparers would have the responsibility to closely examine whether compensation paid to a shareholder of an S corporation is reasonable before calculating the Section 199A deduction, and whether tax return preparers could be subject to penalties. One commenter suggested a small business safe harbor approach where certain cash method S corporations that treat at least 70 percent of dividend distributions to shareholder-employees as wages are deemed to satisfy the reasonable compensation requirement of Rev. Rul. 74-44, 1974-1 C.B. 287. Providing additional guidance with respect to what constitutes reasonable

compensation for a shareholder-employee of an S corporation or the application or non-application of assessable penalties applicable to tax return preparers is beyond the scope of these final regulations.

Suppose, before considering the owner's compensation, a business has $300,000 of qualified business income ("QBI"), reasonable compensation would be $200,000, distributions to the owner are at least $200,000, and the owner's taxable income is below the $315,000 threshold for married filing jointly (all subject to future indexing).

The wage limitation would not apply. See part II.E.1.c.v.(a) Taxable Income "Threshold.

If the business is an S corporation, then the $200,000 wages the S corporation pays its owner will reduce the QBI from $300,000 down to $100,000. If the taxpayer argues that the payments to the owner-employee were distributions and not wages, the IRS will have the upper hand in the dispute, because in 2017 the IRS figured out (and instructed its examiners) how to effectively keep taxpayers out of Tax Court on this issue[943] – meaning that taxpayers would have to pay the tax and sue for a refund.

However, if the wage limitation reduces the QBI deduction,[944] the S corporation may wish to increase compensation payments to get a better deduction. Given that FICA is 15.3% combined employer and employee up to the taxable wage base, this strategy would tend to be beneficial only when compensation is above the taxable wage base ($160,200 in 2023 and $168,600 in 2024)[945] and is ultimately in a range that is neither too high not too low.

In addition to an S corporation tending to generate less QBI, the sale of a partnership interest may be easier to constitute QBI than the sale of stock in an S corporation. Compare part II.E.1.c.viii.(c) Sale of an Interest in a Partnership Conducting a Trade or Business with part II.E.1.c.viii.(d) Sale of a Stock in an S Corporation Conducting a Trade or Business.

II.E.1.e. Whether Real Estate Qualifies as a Trade or Business

Part II.E.1.e.i General Rules Regarding U.S. Real Estate describes the definitions of a trade or business generally applied to real estate.

For nonresident aliens, Part II.E.1.e.ii Real Estate As a Trade or Business under the Effectively Connected Income (ECI) Rules explains when real estate may be eligible for a Code § 199A deduction.

Before analyzing the rules for whether real estate qualifies as a business, consider whether one really wants to do so. Real estate tends to generate ordinary losses, which may reduce the Code § 199A deduction from other businesses.[946] Much of the profit tends to be capital gain on sale, which is not eligible for the deduction.[947] A partner in the national office of a Big Four CPA firm told me that the percentage of real estate investors who benefitted

---

[943] See part II.A.2.c Avoiding Double Taxation and Self-Employment Tax, especially fns 85-86.
[944] See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.
[945] See text accompanying fn 3393 in part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax.
[946] See part II.E.1.c.vii Effect of Losses from Qualified Trades or Businesses on the Code § 199A Deduction.
[947] See part II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A.

materially from Code § 199A with respect to their real estate was in the single digits, and the burdens of recordkeeping for UBIA[948] were often more costly than the benefits.

II.E.1.e.i. General Rules Regarding U.S. Real Estate under Code § 199A

To constitute qualified business income, the income must be from a trade or business.[949] However:

- Rental activity that is not a trade or business can qualify as if it were a trade or business if it is rented or licensed to a trade or business which is commonly controlled under Reg. § 1.199A-4(b)(1)(i), meaning that the same person or group of persons, directly or by attribution under Code §§ 267(b) or 707(b),[950] owns 50% percent or more of the renting trade or business, including 50% or more of the issued and outstanding shares of an S corporation or 50% or more of the capital or profits in a partnership.[951] This is described in part II.E.1.c.iii.(a) General Standards for "Trade or Business" for Code § 199A[952] and illustrated in part II.E.1.c.iii.(d) Aggregating Activities for Code § 199A,[953] but it applies whether or not the real estate is aggregated (see fn 952).

- On the other hand, if rental is tied too closely to a specified service trade or business (SSTB), part or all of the rental income could be disqualified, even the rental on its own qualifies as a trade or business. See part II.E.1.c.iv.(o) SSTB Very Broad Gross Receipts Test and Anti-Abuse Rules.

As to the first bullet point, the preamble to the final regulations, T.D. 9847 (2/8/2019), part II.A.3.c, "Special Rule for Renting Property to a Related Person Real Estate Activities as a Trade or Business," explains:

> In one instance, the proposed regulations and the final regulations extend the definition of trade or business for purposes of Section 199A beyond section 162. Solely for purposes of Section 199A, the rental or licensing of tangible or intangible property to a related trade or business is treated as a trade or business if the rental or licensing activity and the other trade or business are commonly controlled under proposed § 1.199A-4(b)(1)(i). This rule also allows taxpayers to aggregate their trades or businesses with the leasing or licensing of the associated rental or intangible property if all of the requirements of proposed § 1.199A-4 are met.

---

948 See part II.E.1.c.vi.(b) Unadjusted Basis Immediately after Acquisition (UBIA) of Qualified Property under Code § 199A, which is within part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.

949 See part II.E.1.c.ii Types of Income and Activities Eligible or Ineligible for Deduction.

950 For Code §§ 267(b), see part II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses. For Code § 707(b), see part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships

951 Reg. § 1.199A-4(b)(1)(i) is reproduced in full in part II.E.1.c.iii.(d) Aggregating Activities for Code § 199A and illustrated by various Examples accompanying fn 837, including those demonstrating that a pass-through entity that owns a business can be in a different type of pass-through entity (S corporation compared to partnership) than the type that owns the real estate.

952 See Reg. § 1.199A-1(b)(14), which is reproduced in full in fn 804 in that part.

953 Within that part, see text accompanying fn 841, analyzing Reg. § 1.199A-4(d)(8), Example (8) and Reg. § 1.199A-4(d)(9), Example (9).

> One commenter asked for clarification regarding whether this rule applies to situations in which the rental or licensing is to a commonly controlled C corporation. Another commenter suggested that the rule in the proposed regulations could allow passive leasing and licensing-type activities to benefit from Section 199A even if the counterparty is not an individual or an RPE. The commenter recommended that the exception be limited to scenarios in which the related party is an individual or an RPE and that the term related party be defined with reference to existing attribution rules under sections 267, 707, or 414. The final regulations clarify these rules by adopting these recommendations and limiting this special rule to situations in which the related party is an individual or an RPE. Further, as discussed in part V.B. of this Summary of Comments and Explanation of Revisions, the final regulations provide that the related party rules under sections 267(b) or 707(b) will be used to determine relatedness for purposes of § 1.199A-4 and this special rule.

The preamble to the final regulations also considers whether the taxpayer treats the activity as a trade or business for other tax purposes.[954]

Each RPE separately determines whether its real estate qualifies as a trade or business. Real estate owners might want to combine their RPEs into a master partnership in which each LLC is a disregarded entity. See the discussion at the end of the introductory portion of part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.[955]

The rest of the discussion in this part II.E.1.e.i discusses:

- Whether real estate activity constitutes a trade or business under Code § 162. See part II.E.1.e.i.(a) Whether Real Estate Activity Constitutes A Trade Or Business.

- Whether separate real estate businesses can combine their QBI, W-2 wages, and UBIA. See part II.E.1.e.i.(b) Aggregating Real Estate Businesses.

II.E.1.e.i.(a). Whether Real Estate Activity Constitutes A Trade Or Business

Whether real estate is a trade or business depends on the circumstances. The best discussion of the issue in this document is in part II.I.8.c.iii Rental as a Trade or Business, fns 2397-2407. Another discussion on what is a trade or business is in part II.G.4.l.i.(a) "Trade or Business" Under Code § 162. See also part II.G.26.b Real Estate as a Trade or Business.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part II.A.3.b, "Rental Real Estate Activities as a Trade or Business," explains:

> A majority of the comments received on the meaning of a trade or business focus on the treatment of rental real estate activities. Commenters noted inconsistency in the case law in determining whether a taxpayer renting real estate is engaged in a trade or business. Some commenters suggested including safe harbors, tests, or a variety of factors, which if satisfied, would qualify a rental real estate activity as a trade or business. A number of commenters suggested that all rental real estate activity should qualify as a trade or business. Further, one commenter suggested that rental income

---

[954] See text preceding fn 803 in part II.E.1.c.iii.(a) General Standards for "Trade or Business" for Code § 199A.
[955] See text accompanying fn 760.

from real property held for the production of rents within the meaning of section 62(a)(4) should be considered a trade or business for purposes of Section 199A. Another commenter suggested that final regulations provide that an individual whose taxable income does not exceed the threshold amount will be considered to be conducting a trade or business with respect to any real estate rental of which the individual owns at least ten percent and in which the individual actively participates within the meaning of section 469(i).

In determining whether a rental real estate activity is a section 162 trade or business, relevant factors might include, but are not limited to (i) the type of rented property (commercial real property versus residential property), (ii) the number of properties rented, (iii) the owner's or the owner's agents day-to-day involvement, (iv) the types and significance of any ancillary services provided under the lease, and (v) the terms of the lease (for example, a net lease versus a traditional lease and a short-term lease versus a long-term lease).

Providing bright line rules on whether a rental real estate activity is a section 162 trade or business for purposes of Section 199A is beyond the scope of these regulations. Additionally, the Treasury Department and the IRS decline to adopt a position deeming all rental real estate activity to be a trade or business for purposes of Section 199A. However, the Treasury Department and IRS recognize the difficulties taxpayers and practitioners may have in determining whether a taxpayer's rental real estate activity is sufficiently regular, continuous, and considerable for the activity to constitute a section 162 trade or business. Accordingly, Notice 2019- 07, 2019-9 IRB, released concurrently with these final regulations, provides notice of a proposed revenue procedure detailing a proposed safe harbor under which a rental real estate enterprise may be treated as a trade or business solely for purposes of Section 199A.

Under the proposed safe harbor, a rental real estate enterprise may be treated as a trade or business for purposes of Section 199A if at least 250 hours of services are performed each taxable year with respect to the enterprise. This includes services performed by owners, employees, and independent contractors and time spent on maintenance, repairs, collection of rent, payment of expenses, provision of services to tenants, and efforts to rent the property. Hours spent by any person with respect to the owner's capacity as an investor, such as arranging financing, procuring property, reviewing financial statements or reports on operations, planning, managing, or constructing long-term capital improvements, and traveling to and from the real estate are not considered to be hours of service with respect to the enterprise. The proposed safe harbor also would require that separate books and records and separate bank accounts be maintained for the rental real estate enterprise. Property leased under a triple net lease or used by the taxpayer (including an owner or beneficiary of an RPE) as a residence for any part of the year under section 280A would not be eligible under the proposed safe harbor. A rental real estate enterprise that satisfies the proposed safe harbor may be treated as a trade or business solely for purposes of Section 199A and such satisfaction does not necessarily determine whether the rental real estate activity is a section 162 trade or business. Likewise, failure to meet the proposed safe harbor would not necessarily preclude rental real estate activities from being a section 162 trade or business.

Examples 1 and 2 of proposed § 1.199A-1(d)(4) describe a taxpayer who owns several parcels of land that the taxpayer manages and leases to airports for parking lots. The

> Treasury Department and the IRS are aware that some practitioners and taxpayers questioned whether the use of the lease of unimproved land in these examples was intended to imply that the lease of unimproved land is a trade or business for purposes of Section 199A. Proposed § 1.199A-1(d)(4) provides that for purposes of the examples all businesses described in the examples are trades or business for purposes of Section 199A. Example 1 was intended to provide a simple illustration of how the calculation would work if a taxpayer lacked sufficient W-2 wages or UBIA of qualified property to claim the deduction. Example 2 built on the fact pattern by adding UBIA of qualified property to the facts. The examples in the proposed regulations were not intended to imply that the lease of the land is, or is not, a trade or business for purposes of Section 199A beyond the assumption in the examples. In order to avoid any confusion, the final regulations remove the references to land in both examples.

Rev. Proc. 2019-38 "provides a safe harbor under which a rental real estate enterprise will be treated as a trade or business" solely for purposes of Code § 199A and the regulations thereunder.[956] "If an enterprise fails to satisfy the requirements of this safe harbor, it may be treated as a trade or business for purposes of Section 199A if the enterprise otherwise meets the definition of trade or business in § 1.199A-1(b)(14)."[957]

Below we will describe the safe harbor and then discuss actions to take if not within the safe harbor.

Rev. Proc. 2019-38, § 3.01 describes who may use the safe harbor:[958]

> This safe harbor is available to taxpayers who seek to claim the deduction under Section 199A with respect to a rental real estate enterprise as defined in section 3.02. If the safe harbor requirements are met, the rental real estate enterprise will be treated as a single trade or business as defined in Section 199A(d) for purposes of applying the regulations under Section 199A, including the application of the aggregation rules in § 1.199A-4. RPEs, as defined in § 1.199A-1(b)(10),[959] may also use this safe harbor. In order to rely upon the safe harbor, taxpayers and RPEs must satisfy all of the requirements of this revenue procedure.

Rev Proc. 2019-38, § 3.02, "Rental real estate enterprise," provides:

> Solely for purposes of this safe harbor, a rental real estate enterprise is defined as an interest in real property held for the production of rents and may consist of an interest in a single property or interests in multiple properties. The taxpayer or RPE relying on this revenue procedure must hold each interest directly or through an entity disregarded as an entity separate from its owner under any provision of the Code.
>
> Except for those property interests described in paragraph .05 of this section, taxpayers and RPEs may either treat each interest in similar property held for the production of

---

[956] Rev. Proc. 2019-38, § 1.

[957] Rev. Proc. 2019-38, § 1. Rev. Proc. 2019-38, § 3.01 reiterates this:

> Failure to satisfy the requirements of this safe harbor does not preclude a taxpayer or the Service from otherwise establishing that an interest in rental real estate is a trade or business for purposes of section 199A.

[958] See part II.E.1.c.iii.(d) Aggregating Activities for Code § 199A, which references this issue in fn 836.

[959] [My footnote:] Reg. § 1.199A-1(b)(10) is reproduced in the text accompanying fn 755 in part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.

> rents as a separate rental real estate enterprise or treat interests in all similar properties held for the production of rents as a single rental real estate enterprise. For purposes of applying this revenue procedure, properties held for the production of rents are similar if they are part of the same rental real estate category. The two types of rental real estate categories for the purpose of combining properties into a single rental real estate enterprise are residential and commercial. Thus, commercial real estate held for the production of rents may only be part of the same enterprise with other commercial real estate, and residential properties may only be part of the same enterprise with other residential properties.
>
> Once a taxpayer or RPE treats interests in similar commercial properties or similar residential properties as a single rental real estate enterprise under the safe harbor, the taxpayer or RPE must continue to treat interests in all similar properties, including newly acquired properties, as a single rental real estate enterprise when the taxpayer or RPE continues to rely on the safe harbor. However, a taxpayer or RPE that chooses to treat its interest in each residential or commercial property as a separate rental real estate enterprise may choose to treat its interests in all similar commercial or all similar residential properties as a single rental real estate enterprise in a future year.
>
> An interest in mixed-use property may be treated as a single rental real estate enterprise or may be bifurcated into separate residential and commercial interests. For purposes of this revenue procedure, mixed-use property is defined as a single building that combines residential and commercial units. An interest in mixed-use property, if treated as a single rental real estate enterprise, may not be treated as part of the same enterprise as other residential, commercial, or mixed-use property.
>
> Each rental real estate enterprise that satisfies the requirements of this safe harbor is treated as a separate trade or business for purposes of applying Section 199A and the regulations thereunder.

The first two paragraphs of § 3.02 closely follow Notice 2019-7, and the rest is elaboration. The decision to treat interests in all similar properties held for the production of rents as a single rental real estate enterprise is the equivalent of a decision to aggregate.[960] Providing that commercial and residential real estate may not be part of the same enterprise is consistent with Reg. § 1.199A-4(d)(17), Example (17), which is reproduced in part II.E.1.e.i.(b) Aggregating Real Estate Businesses (the latter also including other commentary about delineating between separate real estate businesses).

Rev Proc. 2019-38, § 3.03, "Safe harbor," provides:

> The determination to use this safe harbor must be made annually. Solely for the purposes of Section 199A, each rental real estate enterprise will be treated as a single trade or business if the following requirements are satisfied during the taxable year with respect to the rental real estate enterprise:
>
> (A) Separate books and records are maintained to reflect income and expenses for each rental real estate enterprise. If a rental real estate enterprise contains more than one

[960] See Rev Proc. 2019-38, § 3.01, reproduced in the text accompanying fn 958.

property, this requirement may be satisfied if income and expense information statements for each property are maintained and then consolidated;

(B) For rental real estate enterprises that have been in existence less than four years, 250 or more hours of rental services are performed (as described in this revenue procedure) per year with respect to the rental real estate enterprise. For rental real estate enterprises that have been in existence for at least four years, in any three of the five consecutive taxable years that end with the taxable year, 250 or more hours of rental services are performed (as described in this revenue procedure) per year with respect to the rental real estate enterprise; and

(C) The taxpayer maintains contemporaneous records, including time reports, logs, or similar documents, regarding the following: (i) hours of all services performed; (ii) description of all services performed; (iii) dates on which such services were performed; and (iv) who performed the services. If services with respect to the rental real estate enterprise are performed by employees or independent contractors, the taxpayer may provide a description of the rental services performed by such employee or independent contractor, the amount of time such employee or independent contractor generally spends performing such services for the enterprise, and time, wage, or payment records for such employee or independent contractor. Such records are to be made available for inspection at the request of the IRS.

The second sentences of each of (A) and (C) above were not in Notice 2019-7.

Although the IRS steadfastly rejects using the passive loss rules for Code § 199A, cases under those rules may give a clue to how courts approach documenting work. See part II.K.1.a.vi Proving Participation. I view the regulations under the passive loss rules as a little less strict than the rules provided above, so please read part II.K.1.a.vi keeping that in mind.

Rev Proc. 2019-38, § 3.03(D) provides more details about what the taxpayer must attach:

> The taxpayer or RPE attaches a statement to a timely filed original return (or an amended return for the 2018 taxable year only) for each taxable year in which the taxpayer or RPE relies on the safe harbor. An individual or RPE with more than one rental real estate enterprise relying on this safe harbor may submit a single statement but the statement must list the required information separately for each rental real estate enterprise. The statement must include the following information:
>
> (1) A description (including the address and rental category) of all rental real estate properties that are included in each rental real estate enterprise;
>
> (2) A description (including the address and rental category) of rental real estate properties acquired and disposed of during the taxable year; and
>
> (3) A representation that the requirements of this revenue procedure have been satisfied.

That requirement lessens the burden of Notice 2019-7, which required a statement signed under penalties of perjury.

Rev Proc. 2019-38, § 3.04, “Rental services,” provides:

> Rental services for purpose of this revenue procedure include, but are not limited to: (i) advertising to rent or lease the real estate; (ii) negotiating and executing leases; (iii) verifying information contained in prospective tenant applications; (iv) collection of rent; (v) daily operation, maintenance, and repair of the property, including the purchase of materials and supplies; (vi) management of the real estate; and (vii) supervision of employees and independent contractors. Rental services may be performed by owners, including owners of an RPE, or by employees, agents, and/or independent contractors of the owners. The term rental services does not include financial or investment management activities, such as arranging financing; procuring property; studying and reviewing financial statements or reports on operations; improving property under § 1.263(a)-3(d); or hours spent traveling to and from the real estate.

The above is essentially the same as what was in Notice 2019-7.

Rev Proc. 2019-38, § 3.05, “Certain rental real estate arrangements excluded,” provides:

> The following types of property may not be included in a rental real estate enterprise and are therefore not eligible for the safe harbor:
>
> (A) Real estate used by the taxpayer (including an owner or beneficiary of an RPE) as a residence under section 280A(d).
>
> (B) Real estate rented or leased under a triple net lease. For purposes of this revenue procedure, a triple net lease includes a lease agreement that requires the tenant or lessee to pay taxes, fees, and insurance, and to pay for maintenance activities for a property in addition to rent and utilities.
>
> (C) Real estate rented to a trade or business conducted by a taxpayer or an RPE which is commonly controlled under § 1.199A-4(b)(1)(i).
>
> (D) The entire rental real estate interest if any portion of the interest is treated as an SSTB under § 1.199A-5(c)(2) (which provides special rules where property or services are provided to an SSTB).

Subparagraph (B) is narrower than Notice 2019-7, which provided:

> For purposes of this revenue procedure, a triple net lease includes a lease agreement that requires the tenant or lessee to pay taxes, fees, and insurance, and to be responsible for maintenance activities for a property in addition to rent and utilities. This includes a lease agreement that requires the tenant or lessee to pay a portion of the taxes, fees, and insurance, and to be responsible for maintenance activities allocable to the portion of the property rented by the tenant.

“To be responsible for maintenance activities” indicated to me that, for the lease to be a disfavored “triple net lease” under Notice 2019-7, the tenant had to not only pay for maintenance but also arrange the maintenance. Rev Proc. 2019-38 eliminates the responsibility requirement by providing that mere payment of maintenance is enough connection to maintenance activity that, when combined with other factors in both tests, would make the lease a triple net lease. My understanding is that this change will knock most large shopping centers and large office buildings out of the safe harbor; however, those activities do not appear to need a safe harbor anyway, given the level of service typically provided. I am more concerned about real estate with only one or a very few tenants, where the IRS seems to want the landlord to take more risk

Subparagraph (d) is new, greatly expanding the scope of the anti-abuse rules described in part II.E.1.c.iv.(o) SSTB Very Broad Gross Receipts Test and Anti-Abuse Rules. For example, suppose a real estate developer owned a building through an LLC and used separate S corporations to run its development business, its engineering affiliate, its architectural affiliate, and its furniture leasing affiliate. Because these are different types of businesses,[961] they would be segregated under the anti-abuse rules, and only real estate rental payments received from the furniture leasing affiliate would constitute income from an SSTB.[962]

In addition to making sure that one provides enough qualifying services, beware of the possible cost of providing services beyond what a landlord provides in a traditional long-term lease. Although traditional services should be exempt from self-employment (SE) tax, services beyond that may be subject to SE tax. See part II.L.2.a.ii Rental Exception to SE Tax, especially the text accompanying fns 3429-3432.

Rev Proc. 2019-38, § 4, "Effective Date," provides:

> This revenue procedure applies to taxable years ending after December 31, 2017. Alternatively, taxpayers and RPEs may rely on the safe harbor set forth in Notice 2019-07, 2019-09 IRB 740, for the 2018 taxable year. The contemporaneous records requirement will not apply to taxable years beginning prior to January 1, 2020. However, taxpayers are reminded that they bear the burden of showing the right to any claimed deductions in all taxable years. *INDOPCO, Inc. v. Comm'r*, 503 U.S. 79, 84; 112 S.Ct. 1039, 1043) (1992); *Interstate Transit Lines v. Comm'r*, 319 U.S. 590, 593, 63 S.Ct. 1279, 1281 (1943). See also I.R.C. § 6001; Treas. Reg. § 1.6001-1(a) and (e).

Prop. Rev Proc. § 3.05 provides that triple net leases do not qualify for the safe harbor. (It assumes that a tenant does all of the work in a triple net lease, but it is also common for a landlord to actively maintain the property on a substantial and continuous basis that would qualify as a business, while still requiring tenants to reimburse the landlord for all annual operating costs, which is also a triple net lease.) Instead of the tenant arranging for and paying for maintenance, have the landlord take care of that and obtain reimbursement from the tenant. Consider having the landlord hire the janitors and maintenance staff and the tenant reimburse the landlord for those expenses, which helps not only move the real estate toward being a trade or business but also may improve the landlord's Code § 199A deduction:

- The tenant may have plenty of wages for purposes of the wage limitation for the Code § 199A deduction, whereas paying those wages may provide the landlord with a higher Code § 199A deduction (because the wage limitation will not reduce the deduction as much).[963] However, if the real estate activity is aggregated with a business under common

[961] They would constitute separate businesses even if in the same RPE - see part II.E.1.c.iii.(b) Multiple Trades or Businesses Within an Entity – Identification of Businesses and Allocation of Items.
[962] Reg. § 1.199A-5(c)(iii)(B), Example (2) segregates SSTBs from non-SSTB's so that the former do not contaminate the latter even when the former is not de minimis. Furthermore, Reg. § 1.199A-5(c)(2) disqualifies self-rental to an SSTB only to the extent of payments the landlord receives from the SSTB.
[963] See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.

control,[964] that business' wages and property count toward the Code § 199A deduction relating to the real estate's income.

- If the landlord and tenant have similar ownership, then moving duties from one entity to another may be an easy decision. On the other hand, if they have different owners and the landlord does not want an increased role, these changes may be impractical.

- Consider asset protection issues. If the landlord hires janitors and maintenance staff, the landlord would be liable if they fail to remedy any hazardous conditions. Furthermore, if an owner of the landlord is personally involved in hiring decisions, that owner may be personally liable for negligent hiring. Liability insurance may ameliorate these concerns, and every landlord should have such insurance anyway to try to avoid corporate veil piercing. This is very much a judgment call. For more on asset protection, see part II.F Asset Protection Planning.

Even the long-term rental of one property to one tenant can constitute a trade or business.[965] For further thoughts on how to make real estate a trade or business, see my summary at the end of part II.I.8.c.iii Rental as a Trade or Business.

Note also what is required for real estate not to be passive income for purposes of restrictions on S corporations that used to be C corporations, described in part II.P.3.b.iii Excess Passive Investment Income. A triple net lease in which the landlord did nothing except collect rents would not work for that test, but incurring expenses and having them reimbursed by the tenant may work.[966] Following these rules for S corporations does not directly address the "trade or business" issue, but if the IRS views it as nonpassive for one purpose (the S corporation test) then an examiner might have a positive view for other purposes (trade or business qualification).

Ultimately, one needs to decide whether the effort of and exposure from rearranging lease arrangements are worth the potential tax benefits, and it is impossible to provide a one-size-fits-all solution.

II.E.1.e.i.(b). Aggregating Real Estate Businesses

This part II.E.1.e.i.(b) applies to real estate the rules of part II.E.1.c.iii.(d) Aggregating Activities for Code § 199A. For the assumptions to Example (16), Example (17), and Example (18), see the introduction to Reg. § 1.199A-4(d), reproduced in part II.E.1.c.iii.(d).[967]

Reg. § 1.199A-4(d)(16), Example (16) provides:

(i) *Facts*. PRS1, a partnership, owns 60% of a commercial rental office building in state A, and 80% of a commercial rental office building in state B. Both commercial rental office building operations share centralized accounting, legal, and human resource functions. PRS1 treats the two commercial rental office buildings as an aggregated trade or business under paragraph (b)(1) of this section.

[964] See fns 952-951.
[965] See part II.I.8.c.iii Rental as a Trade or Business, fn 2402.
[966] See fns 3948-3951.
[967] See text accompanying fn 840.

(ii) *Analysis*. PRS1 owns more than 50% of each trade or business thereby satisfying paragraph (b)(1)(i) of this section. Under paragraph (b)(1)(v) of this section, PRS1 may aggregate its commercial rental office buildings because the businesses provide the same type of property and share accounting, legal, and human resource functions.

Example (16) helpfully demonstrates that real estate activities in different states can be aggregated.

Reg. § 1.199A-4(d)(17), Example (17) provides:

(i) *Facts*. S, an S corporation owns 100% of the interests in a residential condominium building and 100% of the interests in a commercial rental office building. Both building operations share centralized accounting, legal, and human resource functions.

(ii) *Analysis*. S owns more than 50% of each trade or business thereby satisfying paragraph (b)(1)(i) of this section. Although both businesses share significant centralized business elements, S cannot show that another factor under paragraph (b)(1)(v) of this section is present because the two building operations are not of the same type of property. S must treat the residential condominium building and the commercial rental office building as separate trades or businesses for purposes of applying § 1.199A-1(d).

Example (17) demonstrates that the IRS views residential and commercial rental as separate businesses, even if operated and managed by the same owner. Reg. § 1.199A-4(b)(1)(v) provides that trades or businesses may be aggregated only if an individual or RPE can demonstrate that -

> The trades or businesses to be aggregated satisfy at least two of the following factors (based on all of the facts and circumstances):
>
> (A) The trades or businesses provide products, property, or services that are the same or customarily offered together.
>
> (B) The trades or businesses share facilities or share significant centralized business elements, such as personnel, accounting, legal, manufacturing, purchasing, human resources, or information technology resources.
>
> (C) The trades or businesses are operated in coordination with, or reliance upon, one or more of the businesses in the aggregated group (for example, supply chain interdependencies).

Thus, to aggregate, they need not only similar management (satisfying (B)) but also one other factor in (A) or (C). Reg. § 1.199A-4(d)(18), Example (18) includes another factor, providing:

(i) *Facts*. M owns 75% of a residential apartment building. M also owns 80% of PRS2. PRS2 owns 80% of the interests in a residential condominium building and 80% of the interests in a residential apartment building. PRS2's residential condominium building and residential apartment building operations share centralized back office functions and management. M's residential apartment building and PRS2's residential condominium and apartment building operate in coordination with each other in renting apartments to tenants.

(ii) *Analysis*. PRS2 may aggregate its residential condominium and residential apartment building operations. PRS2 owns more than 50% of each trade or business thereby satisfying paragraph (b)(1)(i) of this section. Paragraph (b)(1)(v) of this section is satisfied because the businesses are of the same type of property and share centralized back office functions and management. M may also add its residential apartment building operations to PRS2's aggregated residential condominium and apartment building operations. M owns more than 50% of each trade or business thereby satisfying paragraph (b)(1)(i) of this section. Paragraph (b)(1)(v) of this section is also satisfied because the businesses operate in coordination with each other.

Thus, renting similar real estate (residential) is a sufficient other factor, as is operating in coordination with each other.

See also part II.E.1.c.iii.(b) Multiple Trades or Businesses Within an Entity – Identification of Businesses and Allocation of Items. Applying 2017 tax reform to determine separate businesses is relevant not only for Code § 199A but also for Code § 512(a)(6) (preventing a tax-exempt entity from uses losses from one business against income from a separate business), which is discussed in part II.E.1.f.viii Tax-Exempt Trusts. Under that guidance, for now the IRS will consider the use of NAICS 6-digit codes to be a reasonable, good-faith interpretation under section 3.02 of this notice. The NAICS is an industry classification system for purposes of collecting, analyzing, and publishing statistical data related to the United States business economy. See Executive Office of the President, Office of Management and Budget, North American Industry Classification System (2017), available at https://www.census.gov/eos/www/naics/2017NAICS/2017_NAICS_Manual.pdf. Here are some codes for real estate:

- 531110 Lessors of Residential Buildings and Dwellings
- 531120 Lessors of Nonresidential Buildings (except Miniwarehouses)
- 531130 Lessors of Miniwarehouses and Self-Storage Units
- 531190 Lessors of Other Real Estate Property
- 531210 Offices of Real Estate Agents and Brokers
- 531311 Residential Property Managers
- 531312 Nonresidential Property Managers
- 531320 Offices of Real Estate Appraisers
- 531390 Other Activities Related to Real Estate

I am not suggesting any authority directly applying these codes for Code § 199A. However, given that guidance on how to delineate separate businesses leaves a lot of room for interpretation, using these codes may show a good-faith attempt to delineate between businesses. Furthermore, the regulations assume that residential and commercial real estate are separate businesses, and these codes tend to support that assumption.

II.E.1.e.ii. Real Estate As a Trade or Business under the Effectively Connected Income (ECI) Rules

A nonresident alien may be eligible for the Code § 199A deduction only for income qualifying under Part II.E.1.c.ix QBI and Effectively Connected Income. Within that part, the text accompanying and immediately preceding fn 916 cross-references Code § 871(a)(1)(A), which taxes rents (among other income) and therefore is the subject of this part II.E.1.e.ii. Below is guidance on when rent constitutes QBI.

Rev. Rul. 73-522 discussed the following situation involving triple net leases:

> The taxpayer owned rental property situated in the United States that was subject to long-term leases each providing for a minimum monthly rental and the payment by the lessee of real estate taxes, operating expenses, ground rent, repairs, interest and principal on existing mortgages, and insurance in connection with the property leased. The leases are referred to as "net leases" and were entered into by the taxpayer on December 1, 1971. The taxpayer visited the United States for approximately one week during November 1971 for the purpose of supervising new leasing negotiations, attending conferences, making phone calls, drafting documents, and making significant decisions with respect to the leases. This was his only visit to the United States in 1971. The leases were identical in form (net leases) to those applicable to the properties owned by the taxpayer prior to December 1, 1971, and were entered into with lessees unrelated to each other or to the taxpayer.

Rev. Rul. 73-522 held:

> Court decisions involving nonresident alien individual owners of real estate in the United States have developed a test for determining when such individuals are engaged in trade or business within the United States as a result of such ownership. These cases hold that activity of nonresident alien individuals (or their agents) in connection with domestic real estate that is beyond the mere receipt of income from rented property, and the payment of expenses incidental to the collection thereof, places the owner in a trade or business within the United States, provided that such activity is considerable, continuous, and regular. *Jan Casimir Lewenhaupt*, 20 T.C. 151 (1953), *aff'd per curiam*, 221 F.2d 227 (9th Cir. 1955); *Elizabeth Herbert*, 30 T.C. 26 (1958), *acq.* 1958-2 C.B. 6; *Inez De Amodio*, 34 T.C. 894 (1960), *aff'd* 229 F.2d 623 (3rd Cir. 1962).
>
> In the instant case the taxpayer's only activity in the United States during the taxable year ended December 31, 1971, was the supervision of the negotiation of leases covering rental property that he owned during that year. No other activity was necessary on the part of the lessor in connection with the properties because of the provisions of the net leases. The taxpayer's supervision of the negotiation of new leases is not considered to be beyond the scope of mere ownership of real property or the mere receipt of income from real property since such activity was sporadic rather than continuous (that is a day-to-day activity), irregular rather than regular, and minimal rather than considerable.

> Accordingly, the taxpayer in the instant case is not considered to be engaged in trade or business within the United States during the taxable year ended December 31, 1971, within the meaning of section 871 of the Code. See *Evelyn M. L. Neil*, 46 B.T.A. 197 (1942), wherein the operation of one parcel of real estate by the lessee did not result in the owner being considered to be engaged in trade or business.[968] Compare *Adolph Schwarcz*, 24 T.C. 733, *acq.* 1956-1, C.B. 5, wherein an owner operating one parcel of rental property in all its aspects was considered to be engaging in trade or business.
>
> With regard to the second question presented, section 1.871-7(b)(1) of the Income Tax Regulations provides that for purposes of section 871(a)(1) of the Code "amounts" received (including rents) means "gross income." Section 1.61-8(c), to the extent pertinent, provides that if a lessee pays any of the expenses of the lessor such payments are additional rental income of the lessor.
>
> Accordingly, "rents," as used in section 871 of the Code, includes considerations other than the payment of a stipulated rental, *i.e.*, amounts paid by the lessee for taxes, repairs, etc., in accordance with the terms of a net lease.

Note that the taxpayer held more than one property with triple-net-leases, and the taxpayer's triple-net-lease was not part of a trade or business notwithstanding the taxpayer owning multiple properties.

Also note that expense reimbursements constituted rent.

As to rental that is not a triple-net-lease, *Schwarcz v. Commissioner*, 24 T.C. 733 (1955), cited with approval in Rev. Rul. 73-522, stated, "We take it to be well settled that the operation of even a single parcel of rental realty may constitute the regular operation of a business."[969]

---

[968] [My footnote, not from the ruling:] *Neill v. Commissioner*, 46 B.T.A. 197 (1942), found that a net lease held by a NRA did not constitute carrying on a business. The facts were:

> … It is held under a long term lease by a tenant who, under the terms of that lease, erected a building thereon and is obligated under the lease to pay taxes and insurance and maintain the property.
>
> The property referred to is encumbered by a mortgage …, the ground lease on the property having been assigned at that time to the mortgagee as collateral security for the mortgage. For many years petitioner has employed a firm of attorneys with offices in Philadelphia, to whom the tenant pays the rentals due petitioner under her direction. These attorneys then pay for her the interest due upon the mortgage and such incidental expenses for which petitioner may be obligated.

The Board of Tax Appeals held:

> The ownership of this property by petitioner is no more a business activity carried on within the United States than her ownership of stocks or bonds of American companies held for her by an American agent. *Cf. Higgins v. Commissioner*, 312 U.S. 212. We think the rule is settled that the mere ownership of property from which income is drawn does not constitute the carrying on of business within the purview of the cited section. *McCoach v. Minehill & Schuylkill Haven Railroad Co.*, 228 U.S. 295; *Stafford Owners, Inc. v. United States*, 39 Fed.(2d) 743.

For a discussion of *Higgins*, see part II.G.4.l.i.(a) "Trade or Business" Under Code § 162, fn 1298.

[969] The court continued:

> In *Anders I. Lagreide*, 23 T.C. 508, 511 , we said:
>
> > The first issue to be considered is whether or not the renting out in 1949, by Alice Lagreide, of a single piece of residential real estate, amounted to the operation by her of a trade or business regularly carried on. She inherited the property from her mother in 1948 and never

Furthermore, the "fact that the taxpayer operates the rental property through an agent does not prevent him from being regularly engaged in the business,[970] and "the rule applies even though the property and the agent are in a foreign country (Austria)."[971] The court concluded:

> The record shows that petitioner actively managed the properties prior to his departure for the United States and that he was in frequent contact with his partner who managed the properties after petitioner left. We are of the opinion, accordingly, that petitioner was regularly engaged in the business of operating the … properties ….

The NRA handling repairs – even through an agent – seemed to be a tipping point in *Amodio v. Commissioner*, 34 T.C. 894 (1960) (trade or business found),[972] *Lewenhaupt v. Commissioner*, 20 T.C. 151 (1953), *aff'd*. 221 F.2d 227 (9th Cir. 1955) (trade or business found),[973] and *Herbert*

> occupied or maintained it as her own residence. Since the time of the mother's death, the property was either rented or available for renting, and was actually rented during part of 1948 and almost all of 1949.
>
> It is clear from the facts that the real estate was devoted to rental purposes, and we have repeatedly held that such use constitutes use of the property in trade or business, regardless of whether or not it is the only property so used. *Leland Hazard*, 7 T.C. 372 (1946). See also *Quincy A. Shaw McKean*, 6 T.C. 757 (1946); *N. Stuart Campbell*, 5 T.C. 272 (1945); *John D. Fackler*, 45 B.T.A. 708, 714 (1941), *affd.* (C.A. 6, 1943) 133 F.2d 509. We add that the use of the property in trade or business was, upon the facts, an operation of the trade or business in which it was so used (see *Industrial Commission v. Hammond*, 77 Colo. 414, 236 Pac. 1006, 1008). It is clear, also, that the business was "regularly" carried on, there having been no deviation, at any time, from the obviously planned use.

[970] Citing "*Gilford v. Commissioner*, 201 F.2d 735, affirming a Memorandum Opinion of this Court."

[971] Citing *Reiner v. United States*, 222 F.2d 770 (7th Cir. 1955).

[972] The court held:

> The properties were managed by local real estate agents who negotiated or renewed leases, arranged for repairs, collected rents, paid taxes and assessments, and remitted net proceeds to Fidelity after deducting commissions. From the proceeds Fidelity or the local agent paid principal and interest on the mortgages, insurance premiums, and taxes. Fidelity retained its commissions and amounts to be applied on Amodio's income taxes and the remainder was sent to him. The acts of the agents are attributable to Amodio. These activities were beyond the scope of mere ownership of property and the receipt of income. They were considerable, continuous, and regular, as in the *Lewenhaupt* case. Such activities of a nonresident alien through his agents in the United States constitute engaging in business in the United States. Amodio is taxable as a nonresident alien engaged in trade or business in the United States.

[973] The Tax Court described the agent's activities:

> LaMontagne's activities, during the taxable year, in the management and operation of petitioner's real properties included the following: executing leases and renting the properties, collecting the rents, keeping books of account, supervising any necessary repairs to the properties, paying taxes and mortgage interest, insuring the properties, executing an option to purchase the El Camino Real property, and executing the sale of the Modesto property. In addition, the agent conducted a regular correspondence with the petitioner's father in England who held a power of attorney from petitioner identical with that given to LaMontagne; he submitted monthly reports to the petitioner's father; and he advised him of prospective and advantageous sales or purchases of property.
>
> The aforementioned activities, carried on in the petitioner's behalf by his agent, are beyond the scope of mere ownership of real property, or the receipt of income from real property. The activities were considerable, continuous, and regular and, in our opinion, constituted engaging in a business within the meaning of section 211(b) of the Code. See *Pinchot v. Commissioner*, 113 F.2d 718.

v. Commissioner, 30 T.C. 26, 33 (1958) (isolated minor repairs not a trade or business).[974] Letter Ruling 7904019 asserted that paying mortgages and reimbursing tenant expenses was insufficient to move the taxpayer out of the holding of Rev. Rul. 73-522.[975] However, *Pinchot v. Commissioner*, 113 F.2d 718 (2nd Cir. 1940), held that maintaining a portfolio of 11 rental

---

[974] The Tax Court held:

> In the instant case the real property consisted of one building rented in its entirety to one tenant who has occupied it since 1940, has complete charge of its operation, and is responsible for all repairs except as to outer walls and foundation. This property (the only real property owned by petitioner in the United States) was acquired by petitioner 50 years ago, not as the result of a business transaction entered into for profit (*cf. Fackler v. Commissioner*, 133 F.2d 509) but by gift from petitioner's father when she was a very young girl (see *Grier v. United States*, 120 F.Supp. 395). During the taxable years her only activities, in addition to the receipt of rentals, were the payment of taxes, mortgage principal and interest, and insurance premiums. See *Evelyn M. L. Neill*, *supra*. The record also shows that petitioner executed a lease of the property in 1940 and a modified renewal thereof in 1946, and made minor repairs to the walls and roof in 1954 and 1955.
>
> We are of the opinion that petitioner's activities with regard to the real property here involved, which might be considered as "beyond the scope of mere ownership of real property, or the receipt of income from real property," were sporadic rather than "continuous," were irregular rather than "regular," and were minimal rather than "considerable." We therefore conclude that petitioner was "not engaged in trade or business in the United States" during the taxable years within the meaning of article IX (1) of the United States-United Kingdom tax convention.

[975] The IRS pointed out:

> The Lease between Corp M and Corp P, although not identical to the net leases described in Rev. Rul. 73-522, differs only in three respects. One, the lessor rather than the lessee pays real estate taxes imposed on the leased property; two, the lessor rather than the lessee pays installments on existing encumbrances; and three, the lessor, Corp M, pays a yearly fee to the lessee as reimbursement for grass, pest, and weed control and fertilization.

The IRS reasoned:

> With respect to the payment of a yearly fee by Corp M to Corp P as reimbursement for grass, pest, and weed control and fertilization, we note that Corp M does not supervise or participate in any way in the activities for which it pays the fee. Further, the fee is paid once each year and does not involve Corp M in the farming of the land. Consequently, the payment of the fee is sporadic, irregular, and minimal and does not, in and of itself, cause Corp M to be engaged in a trade or business within the United States.

properties, which probably were not triple-net leases, constituted a business;[976] *Lewenhaupt* cited *Pinchot* with approval.[977]

A small interest in oil & gas that did not influence annual operations did not contribute a trade or business.[978]

---

[976] The court summarized the facts and reasoned:

> The essential facts were stipulated and, so far as now important, are that the decedent, Antoinette Eno Johnstone, died July 1, 1934, a British subject and a non-resident. Much of her property in this country consisted of improved real estate in the City of New York owned in common by her and her two brothers of whom one is her executor and the petitioner herein. This real estate was made up of eleven parcels of which the decedent's share had a gross value of about one million dollars. The petitioner, Amos R.E. Pinchot, managed the properties for her and the third owner under broad powers of attorney which included also the management of certain personal property owned by the three. He bought and sold property for the co-owners in his discretion without consulting the decedent who did not personally take part in the transactions. This management "consisted of the leasing and renting of the properties when they became idle, collection of rents and payment of operating expenses, taxes, mortgage interest and other necessary obligations." Over a period of eighteen years five parcels of real estate had been sold and five had been purchased. There were no sales or purchases during the last three years before the decedent's death.
>
> Though the stipulation does not show the number or the amount of the transactions of the petitioner in managing these eleven buildings in New York, it is certain that they must have been considerable in both respects as well as continuous and regular. Their maintenance required the care and attention of the owners and the decedent supplied her part of that by means of her agent and attorney in fact. *Richards v. Commissioner*, 9 Cir., 81 F.2d 369, 106 A.L.R. 249. What was done was more than the investment and re-investment of funds in real estate. It was the management of the real estate itself for profit. Whether or not that was engaging in business within the meaning of federal tax statutes is a federal question which cannot be controlled by state decisions. *Lyeth v. Hoey*, 305 U.S. 188, 59 S.Ct. 155, 83 L.Ed. 119, 119 A.L.R. 410. It necessarily involved alterations and repairs commensurate with the value and number of buildings cared for and such transactions as were necessary constitute a recognized form of business. The management of real estate on such a scale for income producing purposes required regular and continuous activity of the kind which is commonly concerned with the employment of labor; the purchase of materials; the making of contracts; and many other things which come within the definition of business in *Flint v. Stone Tracy Co.*, 220 U.S. 107, 31 S.Ct. 342, 55 L.Ed. 389, Ann.Cas.1912B, 1312, and within the commonly accepted meaning of that word. We think the Board was right in deciding that this decedent was engaged in business in this country at the time of her death. The bank deposits in the United States were, therefore, properly treated as property in this country. Our decision in *Higgins v. Commissioner*, 2 Cir., 111 F.2d 795, did not touch the question of real estate management as a business.

[977] See text at end of fn 973.

[978] After citing *Pinchot*, which was discussed in fn 976, *Di Portanova v. U.S.*, 690 F.2d 169 (Ct. Cl. 1982), held:

> In this respect, an oil lease is similar to real estate. "Whether coownership in a mineral lease constitutes the carrying on of a 'trade or business' is dependent upon all the facts and circumstances in the particular case." Rev. Rul. 58-166, 1958-1 C.B. 324, 325.
>
> The oil and gas business is complex. "The proper development of an oil and gas lease requires a high degree of skill and discretion." Rev. Rul. 58-166, 1958-1 C.B. at 326. To be engaged in the oil business requires active involvement, personally or through an agent, in the operation of that business. *Cataphote Corp. v. United States*, 210 Ct.Cl. 125, 143-46, 535 F.2d 1225, 1235-37 (1976); *Wier v. Enochs*, 64-1 U.S.T.C. ¶ 9387 at 92,009, 92,011 (S.D. Miss. 1963); *aff'd* per curiam, 353 F.2d 211 (5th Cir. 1965); *Nemours Corp. v. Commissioner*, 38 T.C. 585, 601 & n.3

II.E.1.f. Trusts/Estates and the Code § 199A Deduction

Estates and nongrantor trusts may present special opportunities in working with the taxable income thresholds described in part II.E.1.c.v.(a) Taxable Income "Threshold Amount".

Estates and nongrantor trusts would have the same taxable income threshold as a single individual.

Beware that part II.J.9.c.i Multiple Trusts Created for Tax Avoidance would undermine the use of multiple trusts.

Grantor trusts are disregarded, and their items attributed to their deemed owners. See part II.E.1.f.iii Grantor Trusts (Including QSSTs).

The trust and beneficiaries are allocated the various items in proportion to their respective portions of distributable net income ("DNI"), determined after applying the separate share rules, if relevant.[979]

The preamble to Prop. Reg. § 1.199A-6(d), REG-107892-18 (8/16/2018), explains:

> **B. Application to Trusts, Estates, and Beneficiaries**
>
> Proposed § 1.199A-6(d) contains special rules for applying Section 199A to trusts and decedents' estates. To the extent that a grantor or another person is treated as owning all or part of a trust under sections 671 through 679 (grantor trust), including qualified subchapter S trusts (QSSTs) with respect to which the beneficiary has made an election under section 1361(d), the owner will compute its QBI with respect to the owned portion of the trust as if that QBI had been received directly by the owner.
>
> In the case of a Section 199A deduction claimed by a non-grantor trust or estate, Section 199A(f)(1)(B) applies rules similar to the rules under former section 199(d)(1)(B)(i) for the apportionment of W-2 wages and the apportionment of UBIA of qualified property. In the case of a non-grantor trust or estate, the QBI and expenses properly allocable to the business, including the W-2 wages relevant to the

---

(1962) *aff'd* per curiam, 325 F.2d 559 (3d Cir. 1963); *John Provence #1 Well v. Commissioner*, 37 T.C. 376 (1961), *aff'd*, 321 F.2d 840 (3d Cir. 1963).

(3.) The government properly has conceded that the activities of the trusts regarding the properties subject to the 1953 and 1965 agreements do not constitute a trade or business and we so hold. The activities are functionally indistinguishable from the mere receipt of income from investments and the payment of expenses incidental to that receipt. The trusts do not manage or control the field operations or participate actively in them. Indeed, the agreements give Quintana exclusive control over "all operations of every kind." The trusts have little power under the agreements. Moreover, in view of their meager percentage of the total interest and the plaintiff's estrangement from the Cullen family, they also have virtually no informal influence over the operations.

Although the trusts have the right to receive their actual share of the oil and gas produced and Quintana negotiates the sale of the minerals as an agent of the trusts, the Service by its concession recognizes that this is not enough to constitute a trade or business. Considering all the circumstances, we hold that the trusts' activities under the 1953 operating agreement and its amendments did not constitute trade or business.

[979] See parts II.E.1.f.i.(d) Separate Shares, II.J.8.f.i.(a) Allocating Deductions to Various Income Items, II.J.8.f.i.(b) Allocating Income Items Among Those Receiving It, and II.J.9.a.ii Separate Share Rule.

> computation of the wage limitation, and relevant UBIA of depreciable property must be allocated among the trust or estate and its various beneficiaries. Specifically, proposed § 1.199A-6(d)(3)(ii) provides that each beneficiary's share of the trust's or estate's W-2 wages is determined based on the proportion of the trust's or estate's DNI that is deemed to be distributed to that beneficiary for that taxable year. Similarly, the proportion of the entity's DNI that is not deemed distributed by the trust or estate will determine the entity's share of the QBI and W-2 wages. In addition, if the trust or estate has no DNI in a particular taxable year, any QBI and W-2 wages are allocated to the trust or estate, and not to any beneficiary.
>
> In addition, proposed § 1.199A-6(d)(3)(ii) provides that, to the extent the trust's or estate's UBIA of qualified property is relevant to a trust or estate and any beneficiary, the trust's or estate's UBIA of qualified property will be allocated among the trust or estate and its beneficiaries in the same proportion as DNI of the trust or estate is allocated. This is the case regardless of how any depreciation or depletion deductions resulting from the same property may be allocated under section 643(c) among the trust or estate and its beneficiaries for purposes other than Section 199A.
>
> Under Section 199A, the threshold amount is determined at the trust level without taking into account any distribution deductions. Commenters have noted that taxpayers could circumvent the threshold amount by dividing assets among multiple trusts, each of which would claim its own threshold amount. This result is inappropriate and inconsistent with the purpose of Section 199A. Therefore, proposed § 1.199A-6(d)(3)(v) provides that trusts formed or funded with a significant purpose of receiving a deduction under Section 199A will not be respected for purposes of Section 199A.
>
> The Treasury Department and the IRS request comments with respect to whether taxable recipients of annuity and unitrust interests in charitable remainder trusts and taxable beneficiaries of other split-interest trusts may be eligible for the Section 199A deduction to the extent that the amounts received by such recipients include amounts that may give rise to the deduction. Such comments should include explanations of how amounts that may give rise to the Section 199A deduction would be identified and reported in the various classes of income of the trusts received by such recipients and how the excise tax rules in section 664(c) would apply to such amounts.

The preamble to the 2019 proposed regulations [REG-134652-18] (the "2019 Proposed Regs") explains (with the "August Proposed Regulations" referring to REG-107892-18 (8/16/2018)), part III, "Special Rules for Trusts and Estates," explains:

> Section 1.199A-6 provides guidance that certain specified entities (for example, trusts and estates) may need to follow to enable the computation of the Section 199A deduction of the entity and each of its owners. Section 1.199A-6(d) contains special rules for applying Section 199A to trusts and decedents' estates. The August Proposed Regulations expressly requested comments, and comments were submitted, on whether and how certain trusts and other entities would be able to take a deduction under Section 199A. These proposed regulations take those suggestions into consideration in proposing rules applicable to those particular situations identified by commenters.
>
> In the case of a Section 199A deduction claimed by a non-grantor trust or estate, Section 199A(f)(1)(B) applies rules similar to the rules under former section 199(d)(1)(B)(i) for the apportionment of W-2 wages and the apportionment of

UBIA of qualified property. In the case of a non-grantor trust or estate, the QBI and expenses properly allocable to the business, including the W-2 wages relevant to the computation of the wage limitation, and relevant UBIA of depreciable property must be allocated among the trust or estate and its various beneficiaries. Specifically, § 1.199A-6(d)(3)(ii) provides that each beneficiary's share of the trust's or estate's QBI and W-2 wages is determined based on the proportion of the trust's or estate's DNI that is deemed to be distributed to that beneficiary for that taxable year. Similarly, the proportion of the entity's DNI that is not deemed distributed by the trust or estate will determine the entity's share of the QBI and W-2 wages. In addition, if the trust or estate has no DNI in a particular taxable year, any QBI and W-2 wages are allocated to the trust or estate, and not to any beneficiary.

> In addition, § 1.199A-6(d)(3)(ii) provides that, to the extent the trust's or estate's UBIA of qualified property is relevant to a trust or estate and any beneficiary, the trust's or estate's UBIA of qualified property will be allocated among the trust or estate and its beneficiaries in the same proportions as is the DNI of the trust or estate. This is the case regardless of how any depreciation or depletion deductions resulting from the same property may be allocated under section 643(c) among the trust or estate and its beneficiaries for purposes other than Section 199A.

> Under § 1.199A-6(d)(3)(iv), the threshold amount is determined at the trust level after taking into account any distribution deductions. Commenters have noted that taxpayers could circumvent the threshold amount by dividing assets among multiple trusts, each of which would claim its own threshold amount. This result is inappropriate and inconsistent with the purpose of Section 199A. Therefore, § 1.199A-6(d)(3)(vii) provides that a trust formed or funded with a principal purpose of receiving a deduction under Section 199A will not be respected for purposes of determining the threshold amount under Section 199A.

For nongrantor trusts or estates, Reg. § 1.199A-6(d)(1) provides:

> *In general*. A trust or estate computes its Section 199A deduction based on the QBI, W-2 wages, UBIA of qualified property, qualified REIT dividends, and qualified PTP income that are allocated to the trust or estate. An individual beneficiary of a trust or estate takes into account any QBI, W-2 wages, UBIA of qualified property, qualified REIT dividends, and qualified PTP income allocated from a trust or estate in calculating the beneficiary's Section 199A deduction, in the same manner as though the items had been allocated from an RPE. For purposes of this section and §§ 1.199A- 1 through 1.199A-5, a trust or estate is treated as an RPE to the extent it allocates QBI and other items to its beneficiaries, and is treated as an individual to the extent it retains the QBI and other items.

This last sentence is important not just as a matter of calculation but also because it allows estates with fiscal years straddling 2017-2018 to pass to their beneficiaries 2017 business income that gets treated as QBI.[980]

---

[980] See part II.E.1.c.i What Kind of Deduction; Maximum Impact of Deduction, especially the paragraph accompanying fn 749.

Consistent with the Code § 199 rules regarding grantor trusts, Reg. § 1.199A-6(d)(2) provides:

> *Grantor trusts*. To the extent that the grantor or another person is treated as owning all or part of a trust under sections 671 through 679, such person computes its Section 199A deduction as if that person directly conducted the activities of the trust with respect to the portion of the trust treated as owned by the grantor or other person.

Reg. § 1.199A-6(d)(3)(i), "Calculation at entity level," provides:

> A trust or estate must calculate its QBI, W-2 wages, UBIA of qualified property, qualified REIT dividends, and qualified PTP income. The QBI of a trust or estate must be computed by allocating qualified items of deduction described in Section 199A(c)(3) in accordance with the classification of those deductions under § 1.652(b)-3(a), and deductions not directly attributable within the meaning of § 1.652(b)-3(b) (other deductions) are allocated in a manner consistent with the rules in § 1.652(b)-3(b). Any depletion and depreciation deductions described in section 642(e) and any amortization deductions described in section 642(f) that otherwise are properly included in the computation of QBI are included in the computation of QBI of the trust or estate, regardless of how those deductions may otherwise be allocated between the trust or estate and its beneficiaries for other purposes of the Code.

See parts II.J.8.f.i.(a) Allocating Deductions to Various Income Items and II.J.8.f.i.(a) Allocating Deductions to Various Income Items. See also part II.J.11.a Depreciation Advantages and Disadvantages.

Reg. § 1.199A-6(d)(3)(ii), "Allocation among trust or estate and beneficiaries," provides:

> The QBI (including any amounts that may be less than zero as calculated at the trust or estate level), W-2 wages, UBIA of qualified property, qualified REIT dividends, and qualified PTP income of a trust or estate are allocated to each beneficiary and to the trust or estate based on the relative proportion of the trust's or estate's distributable net income (DNI), as defined by section 643(a), for the taxable year that is distributed or required to be distributed to the beneficiary or is retained by the trust or estate. For this purpose, the trust's or estate's DNI is determined with regard to the separate share rule of section 663(c), but without regard to Section 199A. If the trust or estate has no DNI for the taxable year, any QBI, W-2 wages, UBIA of qualified property, qualified REIT dividends, and qualified PTP income are allocated entirely to the trust or estate.

In determining how much income to report on a K-1 to a beneficiary, an estate or nongrantor trust first nets expenses against that income. See part II.J.8.f.i.(a) Allocating Deductions to Various Income Items. Although this process determines how much business income appears as an income item on a beneficiary's K-1, it does not apply to expenses that are not from the qualified trade or business. Instead, QBI is allocated according to DNI without regard to the amount of QBI the trust reports as income to the beneficiary after allocating expenses that are unrelated to QBI. For example, Reg. § 1.199A-6(d)(3)(ii) above provides that negative QBI can be reported on a K-1, as does the Example in Reg. § 1.199A-6(d)(3)(viii) below. However, losses cannot be carried out to beneficiaries except on the estate or trust's final return. See part II.J.3.i Planning for Excess Losses. Thus, the regulations view QBI as a mere informational item to be allocated, rather than bearing any particular relationship to amount of business income or loss actually passing through to any beneficiary on a K-1.

Thus, a trust/estate with small DNI can allocate significantly larger amounts of QBI to a beneficiary, and distributions that are relatively small compared to QBI but are a high percentage of DNI can cause what may seem to be a disproportionately large amount of QBI to the beneficiary. Although this may seem to be a great income tax planning opportunity, note that it works only if and to the extent that the beneficiary has taxable income taxed as ordinary income rates.[981]

Reg. § 1.199A-6(d)(3)(iii) is reserved. Prop. Reg. § 1.199A-6(d)(3)(iii) is quoted and discussed in part II.E.1.f.i.(d) Separate Shares.

Reg. § 1.199A-6(d)(3)(iv), "Threshold amount," provides:

> The threshold amount applicable to a trust or estate is $157,500 for any taxable year beginning before 2019. For taxable years beginning after 2018, the threshold amount shall be $157,500 increased by the cost-of-living adjustment as outlined in § 1.199A-1(b)(12). For purposes of determining whether a trust or estate has taxable income in excess of the threshold amount, the taxable income of the trust or estate is determined after taking into account any distribution deduction under sections 651 or 661.

Reg. § 1.199A-6(d)(3)(v) is reserved. Prop. Reg. § 1.199A-6(d)(3)(v) is quoted and discussed in part II.E.1.f.vii Charitable Remainder Trusts and Other Split-Interest Trusts.

Reg. § 1.199A-6(d)(3)(vi), "Electing small business trusts," is quoted and discussed in part II.E.1.f.ii Electing Small Business Trusts (ESBTs).

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VII.B.6, "Section 199A Anti-Abuse Rule," changed the proposed regulations to the final regulation reproduced below:

> One commenter requested clarification on whether a trust with a reasonable estate or business planning purpose would be respected. Another commenter argued that the rule is overbroad and lacks clarity as to what would be abusive and what the consequences would be of not respecting the trust for Section 199A purposes. The commenter also stated that the rule is not needed because of § 1.643-1 and if both rules are retained, they should use the same test (principal versus significant purpose). Finally, the commenter asked for clarification on whether the rule applies to a single trust and suggested it should apply on an annual basis. This last suggestion has not been adopted because the test goes to the creation of the trust, factors which would not change in later years. The final regulations clarify that the anti-abuse rule is designed to thwart the creation of even one single trust with a principal purpose of avoiding, or using more than one, threshold amount. If such trust creation violates the rule, the trust will be aggregated with the grantor or other trusts from which it was funded for purposes of determining the threshold amount for calculating the deduction under Section 199A.

Reg. § 1.199A-6(d)(3)(vii), "Anti-abuse rule for creation of a trust to avoid exceeding the threshold amount," provides:

> A trust formed or funded with a principal purpose of avoiding, or of using more than one, threshold amount for purposes of calculating the deduction under Section 199A will not

[981] See fn 771 in part II.E.1.c.i.(a) Summary of Federal Impact of Deduction, which is among factors that make the Code § 199A deduction less beneficial than a casual observer might realize.

be respected as a separate trust entity for purposes of determining the threshold amount for purposes of Section 199A. *See also* § 1.643(f)-1 of the regulations.

Because Reg. § 1.199A-6(d)(3)(vii), is contained within the paragraph covering nongrantor trusts, Reg. § 1.199A-6(d)(3), rather than the paragraph covering grantor trusts, Reg. § 1.199A-6(d)(2), I believe that the anti-abuse rule applies only to nongrantor trusts and not to grantor trusts.

Although the literal language of the regs does not expressly address your question, I think its placement is prima facie evidence of the intent to apply the anti-abuse rules only to nongrantor trusts.

Reg. § 1.643(f)-1 is discussed in part II.J.9.c.i Multiple Trusts Created for Tax Avoidance.

Reg. § 1.199A-6(d)(3)(viii), Example (1)(A) (the only example), begins with (1), "Computation of DNI and inclusion and deduction amounts":

(i) *Trust's distributive share of partnership items*. Trust, an irrevocable testamentary complex trust, is a 25% partner in PRS, a family partnership that operates a restaurant that generates QBI and W-2 wages. A and B, Trust's beneficiaries, own the remaining 75% of PRS directly. In 2018, PRS properly allocates gross income from the restaurant of $55,000, and expenses directly allocable to the restaurant of $45,000 (including W-2 wages of $25,000, and miscellaneous expenses of $20,000) to Trust. These items are properly included in Trust's DNI. PRS distributes $10,000 of cash to Trust in 2018.

(ii) *Trust's activities*. In addition to its interest in PRS, Trust also operates a family bakery conducted through an LLC wholly-owned by the Trust that is treated as a disregarded entity. In 2018, the bakery produces $100,000 of gross income and $155,000 of expenses directly allocable to operation of the bakery (including W-2 wages of $50,000, rental expense of $75,000, miscellaneous expenses of $25,000, and depreciation deductions of $5,000). (The net loss from the bakery operations is not subject to any loss disallowance provisions outside of Section 199A.) Trust maintains a reserve of $5,000 for depreciation. Trust also has $125,000 of UBIA of qualified property in the bakery. For purposes of computing its Section 199A deduction, Trust and its beneficiaries have properly chosen to aggregate the family restaurant conducted through PRS with the bakery conducted directly by Trust under § 1.199A-4. Trust also owns various investment assets that produce portfolio-type income consisting of dividends ($25,000), interest ($15,000), and tax-exempt interest ($15,000). Accordingly, Trust has the following items which are properly included in Trust's DNI:

Interest Income	15,000
Dividends	25,000
Tax-exempt interest	15,000
Net business loss from PRS and bakery	(45,000)
Trustee commissions	3,000
State and local taxes	5,000

(iii) *Allocation of deductions under § 1.652(b)-3* (*Directly attributable expenses)*.

In computing Trust's DNI for the taxable year, the distributive share of expenses of PRS are directly attributable under § 1.652(b)-3(a) to the distributive share of income of PRS. Accordingly, Trust has gross business income of $155,000 ($55,000 from PRS and $100,000 from the bakery) and direct business expenses of $200,000 ($45,000 from PRS and $155,000 from the bakery) . In addition, $1,000 of the trustee commissions and $1,000 of state and local taxes are directly attributable under § 1.652(b)-3(a) to Trust's business income. Accordingly, Trust has excess business deductions of $47,000. Pursuant to its authority recognized under § 1.652(b)-3(d), Trust allocates the $47,000 excess business deductions as follows: $15,000 to the interest income, resulting in $0 interest income, $25,000 to the dividends, resulting in $0 dividend income, and $7,000 to the tax exempt interest.

(iv) *Allocation of deductions under § 1.652(b)-3* (*Non-directly attributable expenses)*.

The trustee must allocate the sum of the balance of the trustee commissions ($2,000) and state and local taxes ($4,000) to Trust's remaining tax-exempt interest income, resulting in $2,000 of tax exempt interest.

(v) *Amounts included in taxable income*. For 2018, Trust has DNI of $2,000. Pursuant to Trust's governing instrument, Trustee distributes 50%, or $1,000, of that DNI to A, an individual who is a discretionary beneficiary of Trust. In addition, Trustee is required to distribute 25%, or $500, of that DNI to B, a current income beneficiary of Trust. Trust retains the remaining 25% of DNI. Consequently, with respect to the $1,000 distribution A receives from Trust, A properly excludes $1,000 of tax-exempt interest income under section 662(b). With respect to the $500 distribution B receives from Trust, B properly excludes $500 of tax exempt interest income under section 662(b). Because the DNI consists entirely of tax-exempt income, Trust deducts $0 under section 661 with respect to the distributions to A and B.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VII.B.5, "Allocation between Trust or Estate and Beneficiaries," corrected a mistake in the proposed regulations relating to depreciation:

> One commenter argued that proposed § 1.199A-6(d)(3)(v)(C) and (D) and the accompanying example are wrong in allocating the whole depreciation deduction to the trust. Instead, the commenter said that the depreciation should be allocated based on fiduciary accounting income. Another commenter stated that the QBI net loss should be allocated entirely to the trust or estate and not passed through to the beneficiaries. Another commenter stated that the example in proposed § 1.199A-6(d)(3)(vi) overlooks section 167(d) and that final regulations should clarify whether reporting of depreciation is being changed. An additional commenter stated that a charitable lead trust's threshold amount should be the same as other trusts after the charitable deduction. Based on comments received, the final regulations provide that the treatment of depreciation applies solely for purposes of Section 199A, and the example has been revised to clarify the allocation of QBI and depreciation to the trust and the beneficiaries. As an RPE, the final regulations continue to require that a trust or estate allocates QBI (which may be a negative amount) to its beneficiaries based on the relative portions of DNI distributed to its beneficiaries or retained by the trust or estate.

Reg. § 1.199A-6(d)(3)(viii)(A), Example (1) (the only example), ends with (2), “Section 199A deduction”:

(i) *Trust’s W-2 wages and QBI*. For the 2018 taxable year, prior to allocating the beneficiaries’ shares of the Section 199A items, Trust has $75,000 ($25,000 from PRS + $50,000 of Trust) of W-2 wages. Trust also has $125,000 of UBIA of qualified property. Trust has negative QBI of ($47,000) ($155,000 gross income from aggregated businesses less the sum of $200,000 direct expenses from aggregated businesses and $2,000 directly attributable business expenses from Trust under the rules of § 1.652(b)-3(a)).

(ii) *A’s Section 199A deduction computation*.

Because the $1,000 Trust distribution to A equals one-half of Trust’s DNI, A has W-2 wages from Trust of $37,500. A also has W-2 wages of $2,500 from a trade or business outside of Trust (computed without regard to A’s interest in Trust), which A has properly aggregated under § 1.199A-4 with the Trust’s trade or businesses (the family’s restaurant and bakery), for a total of $40,000 of W-2 wages from the aggregate trade or businesses. A also has $62,500 of UBIA from Trust and $25,000 of UBIA of qualified property from the trade or business outside of Trust for $87,500 of total UBIA of qualified property. A has $100,000 of QBI from the non-Trust trade or businesses in which A owns an interest.

Because the $1,000 Trust distribution to A equals one-half of Trust’s DNI, A has (negative) QBI from Trust of ($23,500). A’s total QBI is determined by combining the $100,000 QBI from non-Trust sources with the ($23,500) QBI from Trust for a total of $76,500 of QBI. Assume that A’s taxable income is $357,500, which exceeds A’s applicable threshold amount for 2018 by $200,000. A’s tentative deductible amount is $15,300 (20% * $76,500 of QBI), limited to the greater of (i) $20,000 (50% * $40,000 of W-2 wages), or (ii) $12,187.50 ($10,000, 25% * $40,000 of W-2 wages, plus $2,187.50, 2.5% * $87,500 of UBIA of qualified property). A’s Section 199A deduction is equal to the lesser of $15,300, or $71,500 (20% ´ $357,500 of taxable income). Accordingly, A’s Section 199A deduction for 2018 is $15,300.

(iii) *B’s Section 199A deduction computation*.

For 2018, B’s taxable income is below the threshold amount so B is not subject to the W-2 wage limitation. Because the $500 Trust distribution to B equals one-quarter of Trust’s DNI, B has a total of ($11,750) of QBI. B also has no QBI from non-Trust trades or businesses, so B has a total of ($11,750) of QBI. Accordingly, B’s Section 199A deduction for 2018 is zero. The ($11,750) of QBI is carried over to 2019 as a loss from a qualified business in the hands of B pursuant to Section 199A(c)(2).

(iii) *Trust’s Section 199A deduction computation*.

For 2018, Trust’s taxable income is below the threshold amount so it is not subject to the W-2 wage limitation. Because Trust retained 25% of Trust’s DNI, Trust is allocated 25% of its QBI, which is ($11,750). Trust’s Section 199A deduction for 2018 is zero. The ($11,750) of QBI is carried over to 2019 as a loss from a qualified business in the hands of Trust pursuant to Section 199A(c)(2).

(B) is reserved.

Prop. Reg. § 1.199A-6(e), "Effective/applicability date," provides:

(1) *General rule*. Except as provided in paragraph (e)(2) of this section, the provisions of this section apply to taxable years ending after the date the Treasury decision adopting these regulations as final regulations is published in the Federal Register. However, taxpayers may rely on the rules of this section until the date the Treasury decision adopting these regulations as final regulations is published in the Federal Register.

(2) *Exceptions*.

(i) *Anti-abuse rules*. The provisions of paragraph (d)(3)(v) of this section apply to taxable years ending after December 22, 2017.

(ii) *Non-calendar year RPE*. For purposes of determining QBI, W-2 wages, and UBIA of qualified property, if an individual receives any of these items from an RPE with a taxable year that begins before January 1, 2018 and ends after December 31, 2017, such items are treated as having been incurred by the individual during the individual's taxable year in which or with which such RPE taxable year ends.

II.E.1.f.i. Nongrantor Trusts Other Than ESBTs

II.E.1.f.i.(a). How Qualified Business Income Flows to Beneficiaries

By managing their taxable income through the income distribution deduction, trusts may be able to get below the desired threshold to qualify for a better deduction. Planning for estates and nongrantor trusts generally is discussed in part II.J Fiduciary Income Taxation.

Suppose a partnership distributes its entire $1 million K-1 income (all "QBI" - qualified business income) to a trust. Suppose the partnership then distributes enough income so that its taxable income, before the Code § 199A deduction, is $157,500. The trust's allocable portion of QBI receives the 20% deduction, without regard to the wage limitation[982] and without regard to whether the partnership conducts otherwise disqualified professional services.[983] The beneficiary's K-1 income from the trust pushes the beneficiary's taxable income way above the taxable income threshold. The beneficiary might very well have been above the taxable income threshold anyway.

Thus, we might have two taxpayers that might have been above the taxable income threshold, yet one of them gets the full benefit of being below the threshold.

Suppose each of the trust and beneficiary has zero taxable income but for a $315,000 K-1 that the trust receives. If the trust distributes to the beneficiary $157,500 plus all of its other income, each of the trust and the beneficiary may have $157,500 of taxable income. Thus, each one should be able to qualify fully for all of the benefits that taxable income below the thresholds

---

[982] See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.
[983] See part II.E.1.f Trusts/Estates and the Code § 199A Deduction.

provides,[984] even though if the trust had retained all of the K-1 income it would have not received any of those benefits (with $315,000 taxable income, which is above $207,500).

II.E.1.f.i.(b). When to Shift Qualified Business Income (QBI) to Beneficiaries

Before focusing on QBI, consider planning for the trust and beneficiaries generally. See part II.J Fiduciary Income Taxation, especially part II.J.3 Strategic Fiduciary Income Tax Planning.

Generally, distributions effectively shift the trust's income to its beneficiaries.[985]

After allocating deductions to the trust's income,[986] the trustee usually needs to allocate all items of distributable net income to beneficiaries in proportion to the distributions they receive,[987] subject to the separate share rule.[988] As the latter, see part II.E.1.f.i.(d) Separate Shares.

Be sure to consider planning opportunities described in part II.J.11.a Depreciation Advantages and Disadvantages.

A beneficiary may have business losses, deductions against gross income, or the itemized or standard deduction against which to offset income, so that shifting income to the beneficiary may provide more.

Also, if a beneficiary is a married person filing jointly, then the beneficiary's taxable income threshold is double that of a trust's, so shifting QBI to the beneficiary may allow a more favorable threshold, even if the beneficiary's losses and deductions don't make much of a difference.

---

[984] The preamble to the final regulations, T.D. 9847 (2/8/2019), part VII.B.4, "Inclusion of Trust Distributions in Taxable Income," reversed a rule in the proposed regulations that would have disallowed the distribution deduction in computing the trust's taxable income threshold:

> Multiple commenters suggested that distributions should not be counted twice in determining whether the threshold amount is met or exceeded, saying this is counter to the statute and beyond the regulatory authority of the Treasury Department and the IRS. Further, sections 651 and 661 are fundamental principles of fiduciary income taxation and the possible duplication of the threshold is better addressed in anti-abuse provisions. Another commenter suggested that double counted income should be ignored, arguing that double counting is punitive because it fails to take into account the economic consequences of distributions and is inconsistent with the longstanding fundamental principles of subchapter J. Another commenter recommended that the distribution deduction should be given effect in computing thresholds, consistent with section 1411 and fiduciary obligations. The Treasury Department and IRS agree with the commenters that distributions should reduce taxable income because the trust is not taxed on that income. The final regulations remove the provision that would exclude distributions from taxable income for purposes of determining whether taxable income for a trust or estate exceeds the threshold amount. The final regulations specifically provide that for purposes of determining whether a trust or estate has taxable income that exceeds the threshold amount, the taxable income of the trust or estate is determined after taking into account any distribution deduction under sections 651 or 661.

[985] See part II.J.1 Trust's Income Less Deductions and Exemptions Is Split Between Trust and Beneficiaries.

[986] See part II.J.8.f.i.(a) Allocating Deductions to Various Income Items.

[987] See part II.J.8.f.i.(b) Allocating Income Items Among Those Receiving It.

[988] See part II.J.9.a.ii Separate Share Rule.

II.E.1.f.i.(c). Shifting or Trapping Income Other Than by Making Distributions; Collateral Advantages and Disadvantages of ESBTs and QSSTs

Suppose a trust holds a partnership but would like to take advantage of the benefits provided for S corporation shareholders by part II.E.1.f.ii Electing Small Business Trusts (ESBTs) or II.E.1.f.iii Grantor Trusts. It could contribute its partnership interest to an S corporation and then take advantage of those benefits. See parts II.J.4.g Making the Trust a Complete Grantor Trust as to the Beneficiary and II.J.4.h.i Trapping Income in Trust Notwithstanding Distributions – ESBT. This possibility is discussed in part II.E.1.f.ii Electing Small Business Trusts (ESBTs).

Such a strategy would also have the benefit of qualifying the partnership from electing out of the Bipartisan Budget Act partnership audit rules that became effective for years beginning after December 31, 2017. See part II.G.19.c Audits of Partnership Returns. I don't view being able to elect out of those rules to be a substantial benefit, if beneficial at all.

However, given that an S corporation that does not itself conduct a business cannot be divided tax-free, consider creating the same number of S corporations as there are remaindermen. That way, each remainderman will have his or her own S corporation and independently determine distributions from the S corporation or whether the S corporation should sell the partnership interest. For more thoughts on this, see part III.A.3.e.vi.(b), the title of which focuses on QSSTs, but which also applies to ESBTs.

II.E.1.f.i.(d). Separate Shares

For context, see part II.J.9.a.ii Separate Share Rule.

The preamble to the 2019 proposed regulations [REG-134652-18] (the "2019 Proposed Regs") explains (with the "August Proposed Regulations" referring to REG-107892-18 (8/16/2018)), part III.C, "Separate shares," explains:

> Although no comments were received with respect the application of the threshold amount to separate shares, the Treasury Department and the IRS believe that clarification with respect to this issue may be necessary. These proposed regulations provide that, in the case of a trust described in section 663(c) with substantially separate and independent shares for multiple beneficiaries, such separate shares will not be treated as separate trusts for purposes of applying the threshold amount. Instead, the trust will be treated as a single trust for purposes of determining whether the taxable income of the trust exceeds the threshold amount. The purpose of the separate share rule in section 663(c) is to treat distributions of trust DNI to trust beneficiaries as independent taxable events solely for purposes of applying sections 661 and 662 with respect to each beneficiary's separate share. The rule determines each beneficiary's share of DNI based on the amount of DNI from that beneficiary's separate share, rather than as a percentage of the trust's DNI.
>
> Nevertheless, under the separate share rule, if a trust retains any portion of DNI, the trust will be subject to tax as a single trust with respect to the retained DNI. Only trusts with retained DNI will be eligible for the Section 199A deduction, because a trust will be allocated QBI, qualified REIT dividends, and qualified PTP income only in proportion to the amount of DNI retained by the trust for the taxable year. For this reason, a trust, regardless of the number of separate shares it has for its beneficiaries under the separate share rule of section 663(c), will be treated as a single trust for purposes of

> applying the threshold amount under Section 199A. To the extent that a taxable beneficiary of a trust receives a distribution of DNI from the beneficiary's separate share of the trust which includes Section 199A items, the beneficiary would apply its own threshold amount to those Section 199A items in computing its Section 199A deduction in accordance with the rules of § 1.199A-6(d).

The preamble to the 2020 final regulations, T.D. 9899 (6/24/2020)), part III, "Special Rules for Trusts and Estates," explains:

> Section 1.199A-6 provides guidance that certain specified entities (including trusts and estates) might need to compute the Section 199A deduction of the entity and/or passthrough information to each of its owners or beneficiaries, so they may compute their Section 199A deduction. Section 1.199A-6(d) contains special rules for applying Section 199A to trusts and decedents' estates.
>
> Under § 1.199A-6(d)(3)(ii), the QBI, W-2 wages, UBIA of qualified property, qualified REIT dividends, and qualified PTP income of a trust or estate are allocated to each beneficiary and to the trust or estate based on the relative proportion of the trust's or estate's distributable net income (DNI) for the taxable year that is distributed or required to be distributed to the beneficiary or is retained by the trust or estate.
>
> Proposed § 1.199A-6(d)(3)(iii) further provides that a trust described in section 663(c) with substantially separate and independent shares for multiple beneficiaries will be treated as a single trust for purposes of determining whether the taxable income of the trust exceeds the threshold amount.
>
> The Treasury Department and the IRS received comments requesting guidance on the interaction between Section 199A and the separate share rule in section 663(c). In particular, the commenters requested guidance on the allocation of QBI, W-2 wages, UBIA of qualified property, qualified REIT dividends, and qualified PTP income of a trust or estate to beneficiaries and the trust or estate based on DNI. The commenters noted differences in the allocation of overall DNI to beneficiaries of a trust or estate under sections 643(a) and 663(c) and asked about the allocation of these items in circumstances involving tax-exempt income and charitable deductions, as well as situations in which no DNI is allocated to a beneficiary. The commenters asserted that under § 1.663(c)-2(b)(5), deductions, including the Section 199A deduction, attributable solely to one share are not available to any other separate share of the trust or estate.
>
> The commenters recommended that the allocation of QBI, W-2 wages, UBIA of qualified property, qualified REIT dividends, and qualified PTP income of a trust or estate should be based on the portion of such items that are attributable to the income of each separate share. In addition, the commenters recommended that § 1.663(c)-2(b) be amended to clarify how gross income not included in accounting income is allocated among separate shares.
>
> After considering the comments and studying the separate share rule in more depth, the Treasury Department and the IRS have clarified the separate share rule in these final regulations to provide that, in the case of a trust or estate described in section 663(c) with substantially separate and independent shares for multiple beneficiaries, the trust or estate will be treated as a single trust or estate not only for purposes of determining whether the taxable income of the trust or estate exceeds the threshold amount but also

in determining taxable income, net capital gain, net QBI, W-2 wages, UBIA of qualified property, qualified REIT dividends, and qualified PTP income for each trade or business of the trust or estate, and computing the W-2 wage and UBIA of qualified property limitations. Further clarification of the separate share rule under section 663 is beyond the scope of these final regulations, but the Treasury Department and the IRS intend to continue to study the issues raised by the commenters.

> Accordingly, these final regulations provide that the allocation of these items to the separate shares of a trust or estate described in section 663(c) will be governed by the rules under section 663(e) and such guidance as may be published in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b)).

Accordingly, Reg. § 1.199A-6(d)(3)(iii), "Separate shares," provides:[989]

> In the case of a trust or estate described in section 663(c) with substantially separate and independent shares for multiple beneficiaries, such trust or estate will be treated as a single trust or estate for purposes of determining whether the taxable income of the trust or estate exceeds the threshold amount; determining taxable income, net capital gain, net QBI, W-2 wages, UBIA of qualified property, qualified REIT dividends, and qualified PTP income for each trade or business of the trust and estate; and computing the W-2 wage and UBIA of qualified property limitations. The allocation of these items to the separate shares of a trust or estate will be governed by the rules under §§ 1.663(c)-1 through 1.663(c)-5, as they may be adjusted or clarified by publication in the Internal Revenue Bulletin (see § 601.601(d)(2)(ii)(b) of this chapter).

II.E.1.f.ii. Electing Small Business Trusts (ESBTs)

As described in part III.A.3.e.ii.(b) ESBT Income Taxation - Overview,[990] ESBT income taxation is complicated. An ESBT is treated as two separate trusts for purposes of chapter 1 of Subtitle A of the Code. The portion that consists of stock in one or more S corporations is treated as one trust, and the portion that consists of all the other assets in the trust is treated as a separate trust. The grantor trust rules trump this treatment. However, the ESBT is treated as a single trust for administrative purposes, such as having one taxpayer identification number and filing one tax return. (A side benefit is that the $10,000 limit on state income tax deductions would apply separately to the S portion and the non-S portion, allowing the trust to deduct up to $20,000 in state income tax.)[991]

Code § 641(c)(2) limits the deductions that an ESBT can take. However, Code § 641(c)(2)(C)[992] and Reg. § 1.641(c)-1(d)(2)(i)[993] provide that one takes into items reported on Schedule K-1 that

---

[989] Reg. § 1.199A-6(e)(2)(iii), "Separate shares," provides:
> The provisions of paragraph (d)(3)(iii) of this section apply to taxable years beginning after August 24, 2020. Taxpayers may choose to apply the rules in paragraph (d)(3)(iii) of this section for taxable years beginning on or before August 24, 2020, so long as the taxpayers consistently apply the rules in paragraph (d)(3)(iii) of this section for each such year.

[990] This is part of part III.A.3.e.ii Electing Small Business Trusts (ESBTs.

[991] See text accompanying fns 6050-6053 in part III.A.3.e.ii.(b) ESBT Income Taxation - Overview.

[992] Code § 641(c)(2)(C) provides:
> The only items of income, loss, deduction, or credit to be taken into account are the following:
> (i) The items required to be taken into account under section 1366….

[993] Reg. § 1.641(c)-1(d)(2)(i) provides:

the S corporation issues to the trust.[994] Code § 199A(f)(1)(B) refers back to Code § 199 for the apportionment of W-2 wages and the apportionment of unadjusted basis.[995] Code § 199 items were separately stated on Schedules K-1.[996] Consistent with this framework, Reg. § 1.199A-6(d)(3)(vi), "Electing small business trusts," provides:

> An electing small business trust (ESBT) is entitled to the deduction under Section 199A. Any Section 199A deduction attributable to the assets in the S portion of the ESBT is to be taken into account by the S portion. The S portion of the ESBT must take into account the QBI and other items from any S corporation owned by the ESBT, the grantor portion of the ESBT must take into account the QBI and other items from any assets treated as owned by a grantor or another person (owned portion) of a trust under sections 671 through 679, and the non-S portion of the ESBT must take into account any QBI and other items from any other entities or assets owned by the ESBT. For purposes of determining whether the taxable income of an ESBT exceeds the threshold amount, the S portion and the non-S portion of an ESBT are treated as a single trust. *See* § 1.641(c)-1.

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VII.B.3, "ESBTs," explains:

> One commenter supported the proposed regulation's position on ESBT's eligibility for the deduction. Another commenter stated that based on § 1.641(c)-1(a) and its reference to an ESBT being two separate trusts for purposes of chapter 1 of subtitle A of the Code (except regarding administrative purposes), the S portion and non-S portion should each have its own threshold. The Treasury Department and the IRS disagree with this comment. Although an ESBT has separate portions, it is one trust. Therefore, in order to provide clarity, the final regulations state that the S and non-S portions of an ESBT are treated as a single trust for purposes of determining the threshold amount.

> *In general*. The S portion takes into account the items of income, loss, deduction, or credit that are taken into account by an S corporation shareholder pursuant to section 1366 and the regulations thereunder. Rules otherwise applicable to trusts apply in determining the extent to which any loss, deduction, or credit may be taken into account in determining the taxable income of the S portion. See § 1.1361-1(m)(3)(iv) for allocation of those items in the taxable year of the S corporation in which the trust is an ESBT for part of the year and an eligible shareholder under section 1361(a)(2)(A)(i) through (iv) for the rest of the year.

[994] Reg. § 1.1366-1(a)(2) provides:

> Each shareholder must take into account separately the shareholder's pro rata share of any item of income (including tax-exempt income), loss, deduction, or credit of the S corporation that if separately taken into account by any shareholder could affect the shareholder's tax liability for that taxable year differently than if the shareholder did not take the item into account separately.

[995] Code § 199A(f)(1)(B) is reproduced in fn 888 in part II.E.1.c.vi.(a) W-2 wages under Code § 199A.

[996] Reg. § 1.1366-1(a)(2)(x) provides that among the items a shareholder takes into account is:

> Any item identified in guidance (including forms and instructions) issued by the Commissioner as an item required to be separately stated under this paragraph (a)(2).

2017 Instructions for Form 1120S, Schedule K-1, Box 12, page 15, includes:

> **Code P. Domestic production activities information.** The corporation will provide you with a statement with information that you must use to figure the domestic production activities deduction. Use Form 8903, Domestic Production Activities Deduction, to figure this deduction. For details, see the Instructions for Form 8903.

2017s Instructions for Form 1120S, Schedule K-1, Box 17, Codes V through Z, provide details on those codes on pages 19-20.

It's ironic that the regulation implementing this explanation is followed by a cross-reference to Reg. § 1.641(c)-1, which contradicts that regulation by providing that the S portion and non-S portion are treated as separate trusts for all income tax purposes (other than using one Form 1041).[997]

Any planning regarding ESBTs should be in conjunction with part II.E.1.f.i.(c) Shifting or Trapping Income Other Than by Making Distributions; Collateral Advantages and Disadvantages of ESBTs and QSSTs.

II.E.1.f.iii. Grantor Trusts (Including QSSTs)

"Grantor trust" means that one or more person is treated for income tax purposes as owning the trust's assets. Often this person is the grantor, but it can also be a beneficiary. See part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust, especially parts III.B.2.h How to Make a Trust a Grantor Trust and III.B.2.i Code § 678 Beneficiary Deemed-Owned Trusts.

The most common grantor trust is the revocable trust, but that's just a probate avoidance tool that doesn't inform planning. During the settlor's life, we often look to whether the settlor of an irrevocable trust may be the deemed owner, although significant tools allow us to plan to have the primary beneficiary be the deemed owner. After the settlor's death, making the beneficiary the deemed owner is the only grantor trust planning option.

Given that all Code § 199A items are attributable to the relevant grantor(s), a grantor trust is helpful when the beneficiary has low income.

Suppose a trust has huge taxable income, as well as having a partnership K-1 with no more than $157,500 of taxable income (before applying Code § 199A). As discussed in part II.E.1.f.ii Electing Small Business Trusts (ESBTs)II.E.1.f.ii, the trust could form an S corporation, contribute the partnership interest to the S corporation, and make an ESBT election, thereby qualifying for the full Code § 199A deduction – but at the highest taxable income rates. Another alternative is to do the same, only the beneficiary elects QSST taxation.[998] All of the partnership's K-1 items are reported directly on the beneficiary's return, using the beneficiary's taxable income threshold and being taxed at the beneficiary's income tax rates. Before considering this, carefully read part II.E.1.f.i.(c) Shifting or Trapping Income Other Than by Making Distributions; Collateral Advantages and Disadvantages of ESBTs and QSSTs.

II.E.1.f.iv. Interaction with Net Investment Income Tax

The 3.8% tax on net investment income (NII) applies not only to investments but also to passive business income. See part II.I.8 Application of 3.8% Tax to Business Income.

To avoid the tax on passive business income, the trustee of a nongrantor trust or the deemed owner of a grantor trust must sufficiently participate in the business. See part II.K.2 Passive Loss Rules Applied to Trusts or Estates Owning Trade or Business.

If the trust is a QSST, then consider also having the trustee sufficiently participate, to avoid NII tax in case the business is sold. See parts II.J.15.a QSST Treatment of Sale of S Stock or Sale

[997] See fn 6042 in part III.A.3.e.ii.(b) ESBT Income Taxation - Overview
[998] See part III.A.3.e.i.(a) QSSTs Generally.

of Corporation's Business Assets (Including Preamble to Proposed Regulations on NII Tax) and II.I.8.g Structuring Businesses in Response to 3.8% Tax.

II.E.1.f.v. Example Using Trusts to Split Income

Suppose Marla Alexander, a widow, owns an S corporation, which annually generates $1.5 million of taxable income each year.

Being in a state with a 5% income tax rate, Marla pays $75,000 of state income tax each year. Unfortunately, for any taxable year beginning after December 31, 2017 and before January 1, 2026, Code § 164(b)(6) limits her deductions for state taxes to $10,000.[999] Given that Marla pays some real estate tax on her residence, more than $65,000 of her state income tax deduction is disallowed.

Marla has two children, Sam and Dolly. Marla needs only 60% of her stock to live quite comfortably. After converting the stock in 5 shares of voting and 95 shares of nonvoting stock,[1000] Marla gifts 40 shares of nonvoting stock, 10 into each of four trusts: a discretionary trust for Sam, a QSST for Sam, a discretionary trust for Dolly, and a QSST for Dolly. See part III.A.3.e QSSTs and ESBTs.

Each ESBT will deduct its $7,500 share of state income tax. Because QSSTs are taxable as grantor trusts, each of Sam and Dolly will deduct up to $7,500 of state income tax if he or she itemizes deductions ("up to" because they may have real estate tax or other state tax deductions). Although part II.J.9.c.i Multiple Trusts Created for Tax Avoidance is concerning, Marla's desire to distribute some income and accumulate the rest of the income, combined with the fact that a QSST must distribute all of its income, may suffice. More conservative from an income tax viewpoint would be to make gifts outright instead of using QSSTs, but that might not meet Marla's estate planning objectives.

Also consider that each trust's distributive share of income is $150,000 (10% of $1.5 million). This means that each ESBT's taxable income will be less than $157,500; thus, in computing their Code § 199A deduction, any disallowance of specific service business income[1001] and any limitations placed on insufficient wages[1002] would not apply. See part II.E.1.f.ii Electing Small Business Trusts (ESBTs). Whether Sam and Dolly will benefit from eliminating these potential disallowances regarding the QSST's distributive shares that are taxed to them depends on their other income and deductions; see part II.E.1.f.iii Grantor Trusts (Including QSSTs).

Also consider part II.I 3.8% Tax on Excess Net Investment Income (NII), especially part II.I.8 Application of 3.8% Tax to Business Income:

- If Sam or Dolly's adjusted gross income exceeds $200,000 so that the 3.8% NII tax may apply to them, does Sam or Dolly work enough in the business to prevent the NII tax from applying to his or her distributive share of business income through his or her QSST? Working more than 100 hours per year – a mere 2 hours per week – may suffice; see

[999] It does not apply this limit to property taxes attributable to Code § 212 trade or business (which generally would be rental real estate, if it is a trade or business). See part II.G.4.l.i Trade or Business; Limitations on Deductions Attributable to Activities Not Engaged in for Profit.
[1000] See part II.A.2.i.i Voting and Nonvoting Stock.
[1001] See part II.E.1.c.iv Specified Service Trade or Business.
[1002] See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.

part II.K.1.i Recharacterization of Passive Income Generators (PIGs) as Nonpassive Income.

- Because an ESBT's threshold for the NII tax is so low, we also need to consider whether the trustee of each ESBT works enough in the business on behalf of the relevant trust to avoid NII tax. See part II.J.14 Application of 3.8% NII Tax to ESBTs. If the trustee works in the business as an individual, on audit the IRS is likely to assert that work as an individual does not count – it needs to be work expressly as a trustee. However, one can plan to avoid that argument. For all of these issues, see part II.K.2.b Participation by an Estate or Nongrantor Trust.

- The trustee of the QSSTs should also consider the planning mentioned for the ESBT. That's because the gain on sale of S corporation stock is taxed to the trust itself, rather than to the beneficiary; see parts II.J.15 QSST Issues That Affect the Trust's Treatment Beyond Ordinary K-1 Items and II.J.16 Fiduciary Income Taxation When Selling Interest in a Pass-Through Entity or When the Entity Sells Its Assets.

Suppose, instead of Marla's business being in an S corporation, it were held in an LLC taxed as a partnership. Let's first consider the state income tax issue, then consider the QBI issue.

Because there is no partnership income tax equivalent of a QSST, the mandatory income trust would apply the state income deduction at the trust level rather than at the beneficiary level. That may be more favorable, given that Sam's and Dolly's other state tax issues would not impinge on the benefits of the deduction for state income tax on the pass-through income. On the other hand, it may be more difficult to justify two separate trusts, given that a trust holding a partnership interest does not have the same type of drafting considerations that a QSST would have; therefore, one may be more wary of possible application of part II.J.9.c.i Multiple Trusts Created for Tax Avoidance. In response to this concern, one may consider the mandatory income trust placing the partnership in an S corporation, with the trust's beneficiary electing QSST treatment; query, however, whether such a strategy is more trouble than it's worth, as pointed out in part II.E.1.f.i.(c) Shifting or Trapping Income Other Than by Making Distributions; Collateral Advantages and Disadvantages of ESBTs and QSSTs.

Moving to the QBI issues, issues with the specific service business income[1003] and any limitations placed on insufficient wages[1004] would be divided between the trust and beneficiaries who receive distributions, as described in part II.E.1.f.i Nongrantor Trusts Other Than ESBTs. However, if the LLC does not distribute much more than enough to pay taxes, then the beneficiaries might not receive much of a distribution, because the trust would use all or most of the distribution to pay the trust's own taxes; see parts III.A.4 Trust Accounting Income Regarding Business Interests and III.F.2 Trust Accounting and Taxation. To shift half of the gifted distributive shares of income to Sam or Dolly, one may need to consider having a separate mandatory income trust that places its LLC interest in an S corporation, with the trust's beneficiary electing QSST treatment; again, consider whether such a strategy is more trouble than it's worth, as pointed out in part II.E.1.f.i.(c) Shifting or Trapping Income Other Than by Making Distributions; Collateral Advantages and Disadvantages of ESBTs and QSSTs.

Also consider the same NII tax issues we did for the ESBTs.

[1003] See part II.E.1.c.iv Specified Service Trade or Business.

[1004] See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.

II.E.1.f.vi. Ownership Restrictions

If an ownership interest cannot be transferred to a trust because it is a professional firm, consider which services can be split off into an entity that does not require professional ownership.

For example, CPA firms could split off their tax return and personal financial planning services.

However, if the business is inside a corporation, consider whether goodwill is personal or corporate,[1005] the latter causing taxation when moving the line of business unless one can do a tax-free split-up.[1006]

II.E.1.f.vii. Charitable Remainder Trusts and Other Split-Interest Trusts

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VII.B.1, "Charitable Remainder Trust Beneficiary's Eligibility for the Deduction," explains:

> The preamble to the proposed regulations requested comments with respect to whether taxable recipients of annuity and unitrust interests in charitable remainder trusts and taxable beneficiaries of other split-interest trusts may be eligible for the Section 199A deduction to the extent that the amounts received by such recipients include amounts that may give rise to the deduction. Concurrently with the publication of these proposed regulations, the Treasury Department and the IRS are publishing proposed regulations under Section 199A (REG-134652-18) that address the eligibility of taxable recipients of annuity and unitrust interests in charitable remainder trusts and taxable beneficiaries of other split-interests trusts to receive the Section 199A deduction.

The preamble to the 2019 proposed regulations [REG-134652-18] (the "2019 Proposed Regs") explains (with the "August Proposed Regulations" referring to REG-107892-18 (8/16/2018)), part III, "Special Rules for Trusts and Estates," explains:

> In the August Proposed Regulations, the Treasury Department and the IRS requested comments with respect to whether taxable recipients of annuity and unitrust interests in charitable remainder trusts and taxable beneficiaries of other split-interest trusts may be eligible for the Section 199A deduction to the extent that the amounts received by such recipients include amounts that may give rise to the deduction. The request for such comments indicated that such comments should include explanations of how amounts that may give rise to the Section 199A deduction would be identified and reported in the various classes of income of the trusts received by such recipients and how the excise tax rules in section 664(c) would apply to such amounts.
>
> **A. CHARITABLE REMAINDER TRUST BENEFICIARY'S ELIGIBILITY FOR THE DEDUCTION**
>
> A few commenters suggested that a charitable remainder trust under section 664 should be allowed to calculate the deduction at the trust level and that the charitable remainder

[1005] See part II.Q.1.c.iii Does Goodwill Belong to the Business or to Its Owners or Employees?
[1006] See part II.Q.7.f Corporate Division into More Than One Corporation.

trust should be treated as a single taxpayer for purposes of the thresholds for taxable income, W-2 wages, and UBIA of qualified property.

Several commenters recommended that, if unrelated business taxable income (UBTI) is qualified business income, the Section 199A deduction should be allowed before the UBTI excise tax is imposed. However, other commenters disagreed. Another commenter stated that the Section 199A deduction should not be allowed when calculating UBTI because it is not a deduction directly connected with carrying on the trade or business and is allowable only for purposes of chapter 1, while the excise tax on UBTI is imposed under chapter 42 (that is, it is not an income tax). Another commenter said the UBTI excise tax under section 664(c) should not affect QBI because that tax is charged to principal.

One commenter recommended that QBI should be allocated to the ordinary income tier. Another recommended that QBI should be the bottom of the first tier (last to be distributed) and Section 199A items should be reported on the Schedule K-1 when QBI is deemed distributed. Another commenter stated that a charitable remainder trust has no taxable income and no DNI, so the allocation of QBI, W-2 wages, and UBIA of qualified property should be allocated to beneficiaries based on the percentage of distributions from the ordinary income tier, with QBI allocated to the charitable remainder trust remaining a tier one item. Another commenter stated that QBI cannot be a separate tier because it is a deduction, rather than a rate difference.

The Treasury Department and the IRS believe that, because a charitable remainder trust described in section 664 is not subject to income tax, and because the excise tax imposed by section 664(c) is treated as imposed under chapter 42, the trust does not either have or calculate a Section 199A deduction and the threshold amount described in Section 199A(e)(2) does not apply to the trust. Furthermore, application of Section 199A to effectively reduce the 100 percent rate of tax imposed by section 664(c) on any UBTI would be inconsistent with the intent of section 664(c) to deter trusts from making investments that generate significant UBTI. However, any taxable recipient of a unitrust or annuity amount from the trust must determine and apply the recipient’s own threshold amount for purposes of Section 199A, taking into account any annuity or unitrust amounts received from the trust. Therefore, a taxable recipient of a unitrust or annuity amount from a charitable remainder trust may take into account QBI, qualified REIT dividends, and qualified PTP income for purposes of determining the recipient’s Section 199A deduction for the taxable year to the extent that the unitrust or annuity amount distributed to such recipient consists of such Section 199A items under § 1.664-1(d).

In order to determine the order of distribution of the various classes of income of the trust for purposes of applying § 1.664-1(d), QBI, qualified REIT dividends, and qualified PTP income of a charitable remainder trust will be allocated to the classes of income within the category of income described in § 1.664-1(d)(1)(i)(a)(1) based on the rate of tax that normally would apply to that type of income, not taking into account the characterization of that income as QBI, qualified REIT dividends, or qualified PTP income for purposes of Section 199A. Accordingly, any QBI, qualified REIT dividends, and qualified PTP income will be treated as distributed from the trust to a unitrust or annuity recipient only when all other classes of income within the ordinary income category subject to a higher rate of tax (not taking into account Section 199A) have been exhausted. The unitrust or annuity recipient will be treated as receiving a proportionate

> amount of any QBI, qualified REIT dividends, and qualified PTP income that is distributed along with other income in the same class within the ordinary income category. To the extent that a trust is treated as distributing QBI, qualified REIT dividends, or qualified PTP income to more than one unitrust or annuity recipient in the taxable year, the distribution of such income will be treated as made to the recipients proportionately, based on their respective shares of the total of QBI, qualified REIT dividends, and qualified PTP income distributed for that year. The amount of any W-2 wages or UBIA of qualified property of the charitable remainder trust in a taxable year will be allocable to unitrust or annuity recipients based on each recipient's share of the trust's total QBI (whether or not distributed) for that taxable year.
>
> Any QBI, qualified REIT dividends, or qualified PTP income of the trust that is unrelated business taxable income is subject to excise tax and § 1.664-1(c) requires that tax to be allocated to the corpus of the trust. Certain other rules relating to charitable remainder trusts are provided.
>
> **B. SPLIT-INTEREST TRUSTS**
>
> The August Proposed Regulations requested comments on whether any special rules were necessary with respect to split-interest trusts. One commenter suggested that additional rules may be necessary for split-interest trusts other than charitable reminder trusts. After considering the comment and studying other split-interest trusts in more depth after the publication of the August Proposed Regulations, the Treasury Department and the IRS have determined that special rules for other split-interest trusts, such as non-grantor charitable lead trusts or pooled income funds, are not necessary because such trusts are taxable under part I, subchapter J, chapter 1 of the Code, except subpart E. Such split-interest trusts would apply the rules for non-grantor trusts and estates set forth in § 1.199A-6(d)(3) to determine any applicable Section 199A deduction for the trust or its taxable beneficiaries.

The preamble to the 2020 final regulations, T.D. 9899 (6/24/2020)), part III, "Special Rules for Trusts and Estates," explains:

> Section 1.199A-6(d)(3)(v) of the February 2019 Proposed Regulations provides rules under which the taxable recipient of a unitrust or annuity amount from a charitable remainder trust described in section 664 can take into account QBI, qualified REIT dividends, or qualified PTP income for purpose of determining the recipient's Section 199A deduction . The Treasury Department and the IRS received no comments on these rules and these final regulations adopt these rules as proposed.

Accordingly, Reg. § 1.199A-6(d)(3)(v), "Charitable remainder trusts," provides:[1007]

> A charitable remainder trust described in section 664 is not entitled to and does not calculate a Section 199A deduction, and the threshold amount described in Section 199A(e)(2) does not apply to the trust. However, any taxable recipient of a unitrust or annuity amount from the trust must determine and apply the recipient's own

[1007] Reg. § 1.199A-6(e)(2)(iv), "Charitable remainder trusts," provides:

> The provisions of paragraph (d)(3)(v) of this section apply to taxable years beginning after August 24, 2020. Taxpayers may choose to apply the rules in paragraph (d) of this section for taxable years beginning on or before August 24, 2020, so long as the taxpayers consistently apply the rules in paragraph (d)(3)(v) of this section for each such year.

threshold amount for purposes of Section 199A taking into account any annuity or unitrust amounts received from the trust. A recipient of a unitrust or annuity amount from a trust may take into account QBI, qualified REIT dividends, or qualified PTP income for purposes of determining the recipient's Section 199A deduction for the taxable year to the extent that the unitrust or annuity amount distributed to such recipient consists of such Section 199A items under § 1.664-1(d). For example, if a charitable remainder trust has investment income of $500, qualified dividend income of $200, and qualified REIT dividends of $1,000, and distributes $1,000 to the recipient, the trust would be treated as having income in two classes within the category of income, described in § 1.664-1(d)(1)(i)(a)(1), for purposes of § 1.664-1(d)(1)(ii)(b). Because the annuity amount first carries out income in the class subject to the highest income tax rate, the entire annuity payment comes from the class with the investment income and qualified REIT dividends. Thus, the charitable remainder trust would be treated as distributing a proportionate amount of the investment income ($500/(1,000+500)*1,000 = $333) and qualified REIT dividends ($1000/(1,000+500)*1000 = $667) because the investment income and qualified REIT dividends are taxed at the same rate and within the same class, which is higher than the rate of tax for the qualified dividend income in a separate class. The charitable remainder trust in this example would not be treated as distributing any of the qualified dividend income until it distributed all the investment income and qualified REIT dividends (more than $1,500 in total) to the recipient. To the extent that a trust is treated as distributing QBI, qualified REIT dividends, or qualified PTP income to more than one unitrust or annuity recipient in the taxable year, the distribution of such income will be treated as made to the recipients proportionately, based on their respective shares of total QBI, qualified REIT dividends, or qualified PTP income distributed for that year. The trust allocates and reports any W-2 wages or UBIA of qualified property to the taxable recipient of the annuity or unitrust interest based on each recipient's share of the trust's total QBI (whether or not distributed) for that taxable year. Accordingly, if 10 percent of the QBI of a charitable remainder trust is distributed to the recipient and 90 percent of the QBI is retained by the trust, 10 percent of the W-2 wages and UBIA of qualified property is allocated and reported to the recipient and 90 percent of the W-2 wages and UBIA of qualified property is treated as retained by the trust. However, any W-2 wages retained by the trust cannot be used to compute W-2 wages in a subsequent taxable year for Section 199A purposes. Any QBI, qualified REIT dividends, or qualified PTP income of the trust that is unrelated business taxable income is subject to excise tax and that tax must be allocated to the corpus of the trust under § 1.664-1(c).

II.E.1.f.viii. Tax-Exempt Trusts

The preamble to the final regulations, T.D. 9847 (2/8/2019), part VII.B.2, "Tax Exempt Trusts," explains:

> One commenter requested guidance on whether "exempt trust organizations" (that is, trusts that are exempt from income tax under section 501(a) or "tax exempt trusts") are entitled to a Section 199A deduction in computing their unrelated business taxable income. The commenter also requested confirmation regarding whether the method of determining or separating trades of businesses is the same for sections 199A and 512(a)(6). The Treasury Department and the IRS decline to adopt these comments here because they are beyond the scope of these final regulations. The Treasury Department and the IRS continue to study this issue and request comments on the interaction of sections 199A and 512. We will consider all comments and decide whether

> further guidance on these issues, including as part of a forthcoming notice of a proposed rulemaking under section 512(a)(6), is warranted.

Notice 2018-67 provides guidance in separating businesses, setting forth "interim guidance and transition rules relating to" Code § 512(a)(6), and Section 3 of the Notice "outlines general concepts for identifying separate trades or businesses for purposes of § 512(a)(6) and provides interim reliance on a reasonable, good-faith standard for making such a determination."[1008] Section 3.03 includes:

> To provide additional guidance in proposed regulations for determining whether an exempt organization has more than one unrelated trade or business for purposes of § 512(a)(6) and how to identify separate trades or businesses for purposes of calculating UBTI under § 512(a)(6)(A), the Treasury Department and the IRS are considering the use of North American Industry Classification System (NAICS) codes. Prior to proposed regulations, the Treasury Department and the IRS will consider the use of NAICS 6-digit codes to be a reasonable, good-faith interpretation under section 3.02 of this notice.
>
> The NAICS is an industry classification system for purposes of collecting, analyzing, and publishing statistical data related to the United States business economy. See Executive Office of the President, Office of Management and Budget, North American Industry Classification System (2017), available at https://www.census.gov/eos/www/naics/2017NAICS/2017_NAICS_Manual.pdf. For example, under a NAICS 6-digit code, all of an exempt organization's advertising activities and related services (NAICS code 541800) might be considered one unrelated trade or business activity, regardless of the source of the advertising income. Use of all 6 digits of the NAICS codes would result in more specific categories of trades or businesses whereas use of fewer than 6 digits of the NAICS codes would result in broader categories of trades or businesses. Exempt organizations filing Form 990-T, "Exempt Organization Business Income Tax Return," already are required to use the 6-digit NAICS codes when describing the organization's unrelated trades or businesses in Block E. The Treasury Department and the IRS request comments regarding whether using less than 6 digits of the NAICS codes, or combining NAICS codes with other criteria, would appropriately identify separate trades or businesses for purposes of achieving the objective of § 512(a)(6). The Treasury Department and the IRS also request comments on the utility of this method, other methods, or a combination of methods that could be used for making this determination.

The preamble to proposed regulations under Code § 512(a)(6), [REG-106864-18] (4/24/2020) which will supersede Notice 2018-67, describes why the proposed regulations would allow taxpayers to use the 2-digit NAICS codes instead of the 6-digit NAICS codes. Prop. Reg. § 1.512(a)-6(b), "North American Industry Classification System," provides:

> (1) *In general*. Except as provided in paragraphs (c) through (e) of this section, an organization will identify each of its separate unrelated trades or businesses using the first two digits of the North American Industry Classification System code (NAICS 2-digit code) that most accurately describes the trade or business. The NAICS 2-digit code chosen must identify the unrelated trade or business in which the organization engages (directly or indirectly) and not the activities the conduct of which are substantially related to the exercise or performance by such organization

[1008] Notice 2018-67, § 1.

of its charitable, educational, or other purpose or function constituting the basis for its exemption under section 501 (or, in the case of an organization described in section 511(a)(2)(B), to the exercise or performance of any purpose or function described in section 501(c)(3)). For example, a college or university described in section 501(c)(3) cannot use the NAICS 2-digit code for educational services to identify all its separate unrelated trades or businesses, and a qualified retirement plan described in section 401(a) cannot use the NAICS 2-digit code for finance and insurance to identify all of its unrelated trades or businesses.

(2) *Codes only reported once*. An organization will report each NAICS 2-digit code only once. For example, a hospital organization that operates several hospital facilities in a geographic area (or multiple geographic areas), all of which include pharmacies that sell goods to the general public, would include all the pharmacies under the NAICS 2-digit code for retail trade, regardless of whether the hospital organization keeps separate books and records for each pharmacy.

(3) *Erroneous codes*. Once an organization has identified a separate unrelated trade or business using a particular NAICS 2-digit code, the organization may not change the NAICS 2-digit code describing that unrelated trade or business unless the organization can show that the NAICS 2-digit code chosen was due to an unintentional error and that another NAICS 2-digit code more accurately describes the trade or business.

II.E.1.g. Whether a High-Bracket Taxpayer Should Hold Long-Term Investments in a C Corporation

As mentioned earlier:

- Dividends a C corporation receives from another domestic C corporation are subjected to federal income tax of no more than 10.5%.[1009]

- Taxable interest and capital gains are subjected to 21% federal income tax.[1010]

Contrast this to a taxpayer in the highest tax bracket, who is subjected to federal income tax of:

[1009] See part II.E.1.a Taxes Imposed on C Corporations, especially the text accompanying fn 723, referring to fns. 9-13 in part II.A.1.a C Corporations Generally.

[1010] Code § 11(a), (b). Code § 11(c) provides that corporate income tax does not apply to a corporation subject to a tax imposed by:

(1) section 594 (relating to mutual savings banks conducting life insurance business),
(2) subchapter L (sec. 801 and following, relating to insurance companies), or
(3) subchapter M (sec. 851 and following, relating to regulated investment companies and real estate investment trusts).

Code § 11(d), "Foreign corporations," provides:

> In the case of a foreign corporation, the tax imposed by subsection (a) shall apply only as provided by section 882.

- 23.8% on qualified dividends[1011] and net long-term capital gains, considering the 20% top capital gain rate[1012] and 3.8% net investment income tax.[1013]

- 40.8% on taxable interest income, nonqualified dividends, and net short-term capital gains, considering the 37% top ordinary income tax rate[1014] and 3.8% net investment income tax.[1015]

- For any taxable year beginning after December 31, 2017 and before January 1, 2026, individuals cannot deduct investment management fees relating to managing their own marketable securities.[1016] This disallowance does not apply to C corporations, because C corporation deductions are not itemized deductions.

However, the chart in part II.E.1 Comparing Taxes on Annual Operations of C Corporations and Pass-Through Entities, which also considers moderate state income tax, illustrates that the C corporation advantage quickly dissipates if the corporation makes distributions.

The personal holding company tax or accumulated earnings tax may essentially force a corporation to declare dividends – especially if the corporation accumulates more than $125,000 in earnings.[1017]

Eventually, however, income will need to be distributed so that the owner actually benefits from the investment return, imposing dividend tax at that time and undermining – to some extent (small or large) the advantage of C corporation income tax savings. Another option, which can make this strategy much more tenable, is: the investor grows the assets at smaller income tax rates, increasing future annual income, then converts to an S corporation and distributes current income while leaving prior years' income in the corporation to grow; see part II.E.2.c Converting a C Corporation to an S Corporation, which also includes warnings regarding investment mix after making the S election.

Harvesting the accumulated income by simply selling the C corporation does not produce good results. See part II.E.2 Comparing Exit Strategies from C Corporations and Pass-Through Entities.

Finally, if one decides to use a corporation to hold investments, consider what happens when one passes them to one's children or other various beneficiaries. A similar but perhaps more predictable termination concern applies to trusts. A corporation that invests in portfolio assets cannot divide without triggering income tax. One might consider creating a few corporations (in the case of a trust, one for each remainderman). These corporations then invest in a partnership, which can divide without triggering income tax. That way, each corporation can receive a mix of assets more along the lines of the beneficiary's preferences. For more details, see part III.A.3.e.vi.(b) Disadvantages of QSSTs Relative to Other Beneficiary Deemed-Owned

---

1012 Code § 1(h)(1), with exceptions under Code § 1(h)(3)-(8) for depreciation recapture, collectibles and Code § 1202 gain taxed as a capital gain at 28%
1013 See part II.I 3.8% Tax on Excess Net Investment Income (NII).
1014 Code § 1(j), for any taxable year beginning after December 31, 2017, and before January 1, 2026.
1015 See part II.I 3.8% Tax on Excess Net Investment Income (NII).
1016 Code § 67(g).
1017 See text accompanying and preceding fn 731 in part II.E.1.a Taxes Imposed on C Corporations.

Trusts (Whether or Not a Sale Is Made), which describes the corporate division issue and a solution.

I cannot emphasize enough the need to consider an exit strategy. Political winds change over time, and it is very likely that at some point Congress will increase corporate taxes to bring them closer to individual rates. Beware getting into a structure that has costly exit steps and then being stuck there because of that high exit tax. Consider that the Tax Reform Act of 1986 taxed all income, including long-term capital gains, at a top rate of 28%, and the paradigm before 2017 tax reform was very different. The paradigm from 2017 tax reform will change, whether by creeping as the 1986 one did or by dramatic changes needed to reduce the exploding national debt or pay for Medicare or Social Security.

II.E.1.h. Effect of 2017 Tax Reform on Debt-Equity Structure

See part II.G.20.a Code § 163(j) Limitation on Deducting Business Interest Expense.

Business interest deduction limitations vary by industry.

Businesses with average annual gross receipts of no more than $ 25 million are exempt from this limitation.[1018]

II.E.1.i. Conducting Businesses in Different Entities to Facilitate Using the Code § 199A Deduction

Each separate trade or business applies the Code § 199A separately,[1019] which may at first glance seem to make shifting operations around meaningless. However, each business activity may have, within the same entity, one or more sets of functions that support that activity, which functions might themselves be viewed as a separate business if conducted in that manner.

A prime example is real estate used in a business. Suppose a law partnership owned its own real estate. If a partner's income is too high, her partnership income would not generate a Code § 199A deduction, because the income is derived from a specific service business.[1020] The benefit of owning the real estate is subsumed in the disqualified income. However, if instead the real estate were owned by a separate LLC that was the landlord, the real estate could generate qualified business income (QBI) if the landlord undertook sufficient activity to qualify it as a trade or business; see part II.E.1.e Whether Real Estate Qualifies as a Trade or Business.

Unlike real estate, equipment leasing almost automatically qualifies as a trade or business, according to cases and rulings in the self-employment tax and unrelated business income tax areas.[1021] So consider forming a separate equipment leasing venture that services the equipment, with the services perhaps not needed to qualify as a business but helpful to prevent the wage limitation from reducing the Code § 199A deduction.[1022] To avoid self-employment tax, be sure to make the venture be a limited partnership with an S corporation general partner or an S corporation; see parts II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons, II.E.6 Recommended Partnership Structure – Flowchart

---

[1019] See part II.E.1.c.ii Types of Income and Activities Eligible or Ineligible for Deduction.
[1020] See part II.E.1.c.ii Types of Income and Activities Eligible or Ineligible for Deduction, fn 844.
[1021] See part II.L.2.a.ii Rental Exception to SE Tax, fns 3433-3437.
[1022] See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.

and II.E.7 Migrating into Partnership Structure (with the latter not as important because a new leasing venture could be started for new equipment). Also, as the Code § 199A deduction approaches its termination, consider part II.E.1.c.ix QBI and Effectively Connected Income.

If a professional service firm also sells goods, consider separating the sale of goods from the provision of services. Depending on how the government approaches classifying trades or business as separate,[1023] a separate entity may not be needed.

II.E.2. Comparing Exit Strategies from C Corporations and Pass-Through Entities

II.E.2.a. Transferring the Business

Part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis shows that, when doing a seller-financed sale of a business, such as to key employees, other owners, or family members, the value of a business attributable to goodwill can be transferred much more tax-efficiently when using a partnership compared to a C corporation or an S corporation. Part or all of these dynamics can be replicated in other transactions.

A shareholder's stock's basis does not increase as a result of a C corporation's reinvested income. However, part or all of the gain on the sale of original issue stock in a qualified corporation that runs a qualified business is excluded from income. See part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation, explaining Code § 1202.

However, to the extent that an owner's distributive share of a partnership's or S corporation's income is reinvested, the owner's basis in the partnership interest[1024] or stock[1025] increases. Thus, the gain on sale usually is much lower when selling a partnership interest or S corporation stock than when selling C corporation stock.

S corporations and partnerships are ideal candidates for estate planning transfers using irrevocable grantor trusts. See part III.B.2.b General Description of GRAT vs. Sale to Irrevocable Grantor Trust, especially the text preceding fn 6499. When the pass-through entity makes distributions to pay its owners' taxes, the irrevocable grantor trust that bought the stock or partnership interest uses those distributions to pay down the note owed to seller, and the seller uses this to pay taxes. Thus, tax distributions are used to build equity in the purchasing irrevocable grantor trust. Contrast this with C corporations, where the corporation pays taxes directly to the government, and any distributions are subject to double taxation. See part II.E.1 Comparing Taxes on Annual Operations of C Corporations and Pass-Through Entities, using the scenario of a C corporation distributing all of its earnings to its shareholders.

Also, gain on the sale of C corporation stock is subject to the 3.8% tax on net investment income.[1026] Gain on the sale of an S corporation or partnership that conducts a trade or business may be largely excluded from that tax when the owner sufficiently participates.[1027]

Furthermore, when an owner dies, the assets of a sole proprietorship (including an LLC owned by an individual that has not elected corporate taxation) or a partnership (including an LLC

[1023] See part II.E.1.c.ii Types of Income and Activities Eligible or Ineligible for Deduction.
[1024] Code § 705.
[1025] Code § 1367, which is reproduced in part II.G.4.d.i Basis Limitation Generally.
[1026] See part II.I 3.8% Tax on Excess Net Investment Income (NII).
[1027] See part II.I.8 Application of 3.8% Tax to Business Income.

owned by more than one person that has not elected corporate taxation) can obtain a basis step-up (or down) when an owner dies, whereas the assets of a C corporation or an S corporation do not receive a new basis.[1028]

Part II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons describes more reasons why I tend to prefer partnerships over S corporations and S corporations over C corporations.

II.E.2.b. Converting from S Corporation to C Corporation

See parts II.A.2.k Terminating an S Election and II.P.3.d Conversion from S Corporation to C Corporation for short-term planning. Ideas include:

- A conversion may be taxable, with the main issue being that an S corporation that was on the cash method that may be required to convert to the accrual method.

- Additional steps may be needed to preserve or distribute the S corporation's accumulated adjustment account (which generally lets S corporations distribute its reinvested taxable earnings later without taxing it shareholders – see part II.Q.7.b Redemptions or Distributions Involving S Corporations). Note that, if the corporation distributes a note before converting, interest income on the note will be taxable at its shareholders' full ordinary income rates and subject to net investment income tax, which together combine to impose a 40.8% federal tax rate, whereas the corporation may receive (see part II.G.20.a Code § 163(j) Limitation on Deducting Business Interest Expense) a deduction at a 21% federal rate.

However, one always needs to consider what if that decision needs to be reversed when a new Congress changes the income tax paradigm. See parts II.P.3.b Conversion from C Corporation to S Corporation and II.P.3.b.v Conversion from S Corporation to C Corporation then Back to S Corporation.

Generally, I recommend forming an S corporation parent and then converting the original corporation to a C corporation, for the reasons and using the method described in fns 3977-3985 in part II.P.3.b.v Conversion from S Corporation to C Corporation then Back to S Corporation and at the end of part II.P.3.b.v, which in a nutshell include (see part II.P.3.b.v for details):

- Preserving the corporation's AAA in case it converts back to being an S corporation.

- Avoiding (so it appears) having to wait 5 years before converting back to being an S corporation.[1029]

- Potentially qualifying for the benefits described in part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation, which does not apply to former S corporations but does apply to C corporation subsidiaries of S corporations.

[1028] See part II.H.2 Basis Step-Up Issues.

[1029] See fns 197-199 in part II.A.2.g Qualified Subchapter S Subsidiary (QSub).

- Avoiding double tax on assets with value in excess of basis when sold within the C corporation (to the extent later distributed) or after being sold within 5 years after converting from c corporation back to S corporation again.

However, the strategy of distributing a note before converting might trigger tax; see fns 3983-3984 in part II.P.3.b.v Conversion from S Corporation to C Corporation then Back to S Corporation.

II.E.2.c. Converting a C Corporation to an S Corporation

A C corporation that revoked its S election must wait 5 years to convert back to an S corporation. See part II.A.2.k Terminating an S Election.

See part II.P.3.b Conversion from C Corporation to S Corporation, including II.P.3.b.v Conversion from S Corporation to C Corporation then Back to S Corporation. Issues discussed there include the following:

- Generally, an asset sold within 5 years after converting from a C corporation to an S corporation will be taxed at the entity level and again to the shareholders. See part II.P.3.b.ii Built-in Gain Tax on Former C Corporations under Code § 1374. Therefore, before converting, one might sell assets that are likely to sold within 5 years. If the taxpayer uses the cash receipts and disbursements method of accounting, consider switching to accrual before converting, so that accounts receivable do not get hit with this tax.

- Although an S corporation that has accumulated earnings and profits from when it was a C corporation cannot have excess passive investment income, that issue is easily managed through the corporation's investment mix – if one considers the issue and plans for it; investment mix may not need to be managed if the corporation is a partner in an active business that has substantial gross receipts (which is tested rather than the partnership's profits). See part II.P.3.b.iii Excess Passive Investment Income, especially fns 3952-3955.

- Also, an S corporation that has accumulated earnings and profits from when it was a C corporation should not invest in tax-exempt investments, the income from which does not generate AAA and therefore may trigger a taxable dividend when distributed. See part II.P.3.b.iv Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds.

- If the corporation maintains an inventory, converting from a C corporation to an S corporation may incur tax. See part II.P.3.b.i LIFO Recapture.

II.E.3. Recommended Structure for Start-Ups

The structure should start as a simple one and then, when the entity is making a lot money, would be transitioned to a more complex structure. For long-term reasons why an entity taxed as a sole proprietorship or partnership makes sense, see part II.E.5.a Strategic Income Tax Benefits of Recommended Structure.

Consider starting with an LLC. Start-up businesses often lose money initially, and an LLC taxed as a sole proprietorship or partnership facilitate loss deductions better than other entities[1030]

[1030] See part II.G.4 Limitations on Losses.

(although deducting start-up losses might not always generate the best result).[1031] Also, often owners of closely-held businesses operate with a high degree of informality, and owners of corporations can get into trouble by taking money out without documenting compensation or documenting loans;[1032] contrast that to an LLC that for income tax purposes is either disregarded entity or a partnership,[1033] in which case distributions are either disregarded or generally nontaxable.[1034]

A business with owners that work more than 100 but not more than 500 hours per year might want to move its real estate into the desired structure to avoid the 3.8% net investment income tax on the rental income (because the rental income and expense are disregarded for income tax purposes, being in the same umbrella as the operating business) or on the sale of the rental property. For example, a parent LLC might own an operating LLC and a real estate LLC. See parts II.I.8.c.i If Not Self-Rental, Most Rental Income Is *Per Se* Passive Income, II.I.8.a.iii Qualifying Self-Charged Interest or Rent Is Not NII, II.I.8.f Summary of Business Activity Not Subject to 3.8% Tax, and II.E.9 Real Estate Drop Down into Preferred Limited Partnership.

However, deducting start-up losses may not be desirable, because the owner is in a lower tax bracket now and expects not to be in a low tax bracket in the future. See part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good. In that case, consider using an entity taxed as an S corporation, with the owners guaranteeing loans by third parties but not investing or lending a lot of money themselves. If that, too, generates more losses than desirable, then try a C corporation, which will just roll forward the losses. When using a C corporation or an S corporation, consider planning to qualify for the requirements of part II.Q.7.l Special Provisions for Loss on the Sale of Stock in a Corporation under Code § 1244 (which is not available to trusts).[1035] Beware, however, that using either kind of corporation can make getting into an ideal long-term structure more difficult, because one needs to avoid triggering taxation on a deemed distribution of assets. See part II.E.7.c Flowcharts: Migrating Existing Corporation into Preferred Structure. Often a trigger for moving a corporation into the structure is the desire to avoid capital gain tax on the seller-financed sale of the business, which often

---

[1031] If the owner is in a lower bracket in start-up years than in later years, losses might best be deferred, if possible. A variation of this idea is in part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good. If deferring losses is expected to be particularly beneficial, consider:

- If loans are bank-financed, an S corporation can easily ensure that its owners' distributive share of losses be suspended due to basis limitations until the S corporation becomes profitable. See part II.G.4.d.ii.(a) Limitations on Using Debt to Deduct S Corporation Losses.
- A start-up C corporation's losses are simply carried forward and deducted against its later income. See part II.G.4.l.ii Net Operating Loss Deduction. In case the C corporation doesn't succeed, certain start-up documentation can generate ordinary loss (instead of capital loss) treatment when the stock becomes worthless. See part II.Q.7.l Special Provisions for Loss on the Sale of Stock in a Corporation under Code § 1244, subject to part II.J.11.b Code § 1244 Treatment Not Available for Trusts. The timing and documentation (including initial documentation in the case of a loan) of a worthless stock or bad debt deduction can be tricky. See part II.G.4.b C Corporations: Losses Incurred by Business, Owner, or Employee, especially fns. 1182-1183 (stock) and 1185-1187 (loans).

[1032] Such payments are potentially taxable distributions to shareholders; see the text accompanying fns. 4799-4800 in part II.Q.7 Exiting from or Dividing a Corporation. The IRS attacks distributions from S corporations, asserting (often successfully) that they are disguised compensation (and perhaps assessing penalties as well); see part II.A.2.c Avoiding Double Taxation and Self-Employment Tax, especially fns. 79-80.

[1033] See part II.B Limited Liability Company (LLC).

[1034] See part II.Q.8.b.i Distribution of Property by a Partnership.

[1035] See part II.J.11.b Code § 1244 Treatment Not Available for Trusts.

makes the costs of transition worthwhile if the business has significant goodwill. See part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis.

When the business starts making money but only enough to pay owner compensation and equipment that is expensed immediately, no additional self-employment tax is due relative to if the entity were a corporation paying compensation to its owners. Furthermore, if the business is investing profits in equipment, etc., generous write-offs are available.[1036] However, note that wages paid by an S corporation may provide a higher Code § 199A deduction relative to compensation paid to a partner, so consider this corporate advantage.[1037]

Then, when the client is ready for the ideal entity (for example, when self-employment tax on reinvested earnings becomes a significant number), the client can simply assign the LLC to the limited partnership described in parts II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and II.E.6 Recommended Partnership Structure – Flowchart; see part II.E.7.b Flowcharts: Migrating LLC into Preferred Structure. However, the client might express a preference in the long-run to use part II.E.8 Alternative Partnership Structure – LLLP Alone or LP with LLC Subsidiary. If so, the client might want to start with that structure instead of starting with an LLC. If one starts with an entity taxed as an S or C corporation instead of an LLC, then the presence of non-compete agreements would make migration to a partnership structure less effective, because the value of the goodwill at the time of the migration would remain inside the corporation.

Suppose that one concludes that a C corporation would be ideal. Starting with an LLC taxed as a partnership and then converting to a C corporation the earlier of five years before a sale is anticipated or shortly before its gross assets reach $50 million might be the most tax-efficient approach.[1038]

Whether or not one likes the above recommendations, consider asset protection with a business' net profits. An entity's creditors' claims take priority over distributions to owners. If an entity distributes to its owners any profits not needed to keep the entity fiscally responsible, generally those assets will not be subjected to the claims of the entity's future creditors. For tax purposes, investments are best kept outside the entity, particularly for a C or an S corporation,[1039] but also, to a certain but more limited extent, for a partnership.[1040] The owners might consider loaning the distributions back to the entity, becoming creditors, rather

---

[1036] See part II.G.4.n Itemized Deductions; Deductions Disallowed for Purposes of the Alternative Minimum Tax.

[1037] See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.

[1038] See part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation, especially parts II.Q.7.k.ii Limitation on Assets a Qualified Small Business May Hold and II.Q.7.k.iii Does the Exclusion for Sale of Certain Stock Make Being a C Corporation More Attractive Than an S corporation or a Partnership? (particularly the text accompanying fns. 5309-5317).

[1039] Any distributions of appreciated assets trigger corporate-level income tax, whether paid by the corporation (C corporation) or shareholders (S corporation). See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders. Note also that S corporations that have accumulated earnings and profits from prior periods as an S corporation might want to avoid investments that generate tax-free income; see part II.P.3.b.iv Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds.

[1040] See part II.Q.8.b.i.(b) Code § 731(c): Distributions of Marketable Securities (Or Partnerships Holding Them). Such distributions have more potential to trigger tax than do distributions of other assets, but tax can be avoided with careful planning.

than owners, to that extent. The owners might also consider forming an LLC taxed as a partnership to hold any distributions that they neither loan to the company nor keep for personal purposes, viewing the LLC as a source for funding future capital projects or exit strategies or perhaps for providing or securing a line of credit for the business;[1041] however, S corporations might want to avoid any formal requirement in their governing documents that distributions be made to such an LLC.[1042]

II.E.4. Reaping C Corporation Annual Taxation Benefits Using Hybrid Structure

In part II.E.1 Comparing Taxes on Annual Operations of C Corporations and Pass-Through Entities, we learned that:

- To the extent that a C corporation reinvests profits, it is more tax-efficient from the perspective of annual income from operations.

- To the extent that it distributes profits, it is not more tax-efficient.

Given that pass-through entities tend to have superior exit strategies,[1043] the portion of the business that distributes profits should be in a pass-through entity.

One might also consider holding any new equipment in an LLC and leasing it to the C corporation. Bonus depreciation would provide an immediate benefit,[1044] and any inside basis step-up that occurs on the death of, or other transfer by,[1045] an owner may reduce or eliminate depreciation recapture. Then, when a sale of the business is contemplated, the LLC might be contributed to the C corporation so that a later asset sale would be taxed at lower corporate

[1041] If there is a risk that the corporation will have losses but the shareholders' basis will be insufficient to deduct those losses, then the LLC should loan the funds to its members who should then lend them to the corporation. See part II.G.4.d.ii Using Debt to Deduct S Corporation Losses, which is part of part II.G.4.d Basis Limitation for Shareholders in an S Corporation. Presumably, if the loan from the LLC to the corporation is already in place, the LLC could simply distribute the loan to its members. See fn. 1212 in part II.G.4.d.ii Using Debt to Deduct S Corporation Losses.

[1042] A partnership is not an eligible shareholder of an S corporation; see part II.A.2.f Shareholders Eligible to Hold S Corporation Stock. Therefore, one might consider avoiding any distribution arrangements that might make a partnership appear to be a shareholder. However, distribution arrangements that are not baked into the governing documents do not count for determining whether a second class of stock exists (see part II.A.2.i.iii Disproportionate Distributions, and within that see fn. 255 for what constitutes governing documents and the effect, if any, given to certain arrangements), so presumably they would not count as creating a shareholder relationship. Although I have not seen anything directly on point, presumably an S corporation can contribute to a partnership in exchange for a partnership interest and then distribute that partnership interest to its shareholders; the parties would have substantial authority for not applying undesirable valuation discounts to that distribution – see part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders for general rules, fn. 5104 for authority for no valuation discounts, and part II.Q.7.h.iii.(b) Nondeductible Loss to Corporation When It Distributes Property to Shareholders for why valuation discounts are undesirable.

[1043] See part II.E.2.a Transferring the Business.

[1044] See part II.G.4.n

[1045] See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.

rates, which contribution may work out with little problem or may raise too many issues to be practical.[1046]

Consider forming a limited partnership owned by a C corporation and a pass-through entity, with ownership based on the desired long-term goal for distributions:

- This might be worked in with the general ideas of parts II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and II.E.6 Recommended Partnership Structure – Flowchart.

- If the entity is already a C corporation or an S corporation, see part II.E.7 Migrating into Partnership Structure.

The C corporation would annually receive any earnings that are to be reinvested, whereas the balance would be owned by limited partners receiving distributions. The C corporation would loan back to the partnership the earnings to be reinvested:

- The corporation's interest income would be taxed at a federal rate of 21%, whereas the interest would be deducted at the higher individual rate, causing a taxpayer-favorable tax arbitrage. However, the Code § 199A deduction of up to 20% of qualified business income[1047] may reduce this benefit, and the interest might not be fully deductible.[1048]

- If the interest income becomes too significant, consider whether the personal holding company tax[1049] or accumulated earnings tax[1050] may be triggered. If these possible taxes eventually become a factor, consider part II.E.2.c Converting a C Corporation to an S Corporation. Also consider possible deferral of the interest deduction under part II.G.20.a Code § 163(j) Limitation on Deducting Business Interest Expense.

Before doing any of this, consider that investing in a partnership might make a C corporation ineligible for part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation. However, as described in part II.Q.7.k, not all businesses are eligible for the exclusion, and the exclusion applies only to stock originally issued to the owner (or to the person who gifted or bequeathed the stock to the current owner).

An S corporation with separate business lines could also reorganize into an S corporation parent with various subsidiaries, some of which might be disregarded entity LLCs and others of which might be C corporations that reinvest their profits and may qualify for part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation. See part II.E.2.b Converting from S Corporation to C Corporation.

[1046] See part II.M.2 Buying into or Forming a Corporation, especially part II.M.2.c Contribution of Partnership Interest to Corporation

[1047] See part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.

[1048] See part II.G.20.a Code § 163(j) Limitation on Deducting Business Interest Expense.

[1049] See part II.A.1.e Personal Holding Company Tax. I am not too concerned about this tax, because the corporation's distributive share of the partnership's gross income – not net income – would be compared against the interest income. In part II.A.1.e, see fn 65.

[1050] See part II.Q.7.a.vi Redemptions and Accumulated Earnings Tax,

II.E.5. Recommended Long-Term Structure for Pass-Throughs – Description and Reasons

II.E.5.a. Strategic Income Tax Benefits of Recommended Structure

To maximize basis step-up of assets used in a business[1051] and promote tax-efficient exit strategies,[1052] the main entity should be a partnership. A partnership often is a better exit vehicle than a C corporation, notwithstanding part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation;[1053] if the exclusion of gain on sale of a C corporation is particularly compelling, consider instead starting as an LLC taxable as a partnership then later converting to a corporation.[1054] However, corporate structure has some advantages:

- The partnership audit rules are becoming onerous and may artificially increase tax.[1055] Even though S corporations generally are pass-throughs, Congress has not targeted them, and the IRS needs to consider the burdens of making adjustments at both the entity and shareholder level.[1056]

- If the owners find a corporate buyer and can, on a tax-free basis, merge the business into the buyer and receive the buyer's stock, and they don't mind having low basis publicly-traded stock, then note that a tax-free merger or similar reorganization under Code § 368 is available only to corporations. Forming a corporation immediately before the sale might not work;[1057] I am unsure whether checking-the-box to elect corporate treatment helps any.

[1051] See parts II.H.2 Basis Step-Up Issues, II.H.8 Lack of Basis Step-Up for Depreciable or Ordinary Income Property in S Corporation, and II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations.

[1052] See part II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis, for how to save capital gain tax on the seller-financed sale of an interest in a business. Also compare part II.Q.7.f Corporate Division into More Than One Corporation (including the cumbersome requirements of Code § 355 mentioned in parts II.Q.7.f.ii Code § 355 Requirements and II.Q.7.f.iii Active Business Requirement for Code § 355), with part II.Q.8 Exiting From or Dividing a Partnership (partnership divisions are generally tax-free, subject to certain rules about shifting unrealized gain in property whose value had been used to determine partnership percentage interests). Also, corporate redemptions might be recharacterized as distributions (see part II.Q.7.a.iii Redemption Taxed Either as Sale of Stock or Distribution; Which Is Better When) and lose installment sale treatment, whereas partnership redemptions are nontaxable until basis is fully recovered (see part II.Q.7.b.ii Redemptions or Distributions Involving S Corporations Compared with Partnerships).

[1053] See parts II.Q.1.a.i.(g) Partnership Use of Same Earnings as C Corporation (Either Redemption or No Tax to Seller per Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation) in Sale of Goodwill and II.Q.1.a.ii.(h) Partnership Use of Same Earnings as C Corporation – No Federal Tax to Seller per Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation in Sale of Goodwill (California)Partnership Use of Same Earnings as C Corporation – No Federal Tax to Seller per Part II.Q.7.k Code § 1202 Exclusion or Deferral of Gain on the Sale of Certain Stock in a C Corporation in Sale of Goodwill (California).

[1054] See part II.Q.7.k.iii Does the Exclusion for Sale of Certain Stock Make Being a C Corporation More Attractive Than an S corporation or a Partnership? (especially the text accompanying fns. 5309-5317).

[1055] See part II.G.19.c Audits of Partnership Returns.

[1056] See part II.G.19.b Audits of S Corporation Returns.

[1057] See part and II.P.3.c Conversions from Partnerships and Sole Proprietorships to C Corporations or S Corporations, especially fn. 3541.

- If the owners would like for a qualified retirement plan to own the business, then an S corporation owned by an ESOP would be the ideal structure;[1058] on the other hand, an entity can start in the structure set forth below and then easily assign the interests in the operating LLCs to the S corporation general partner, in what generally would be a tax-free transaction.[1059]

Also, incentive pay and deferred compensation can be more difficult in a corporate setting than in a partnership setting.[1060]

Furthermore, a partnership often is a better vehicle for deducting start-up losses.[1061] However, using a partnership may knock one out of the small business exception to the Code § 163(j) limitations on deducting business interest.[1062] On the other hand, Code § 163(j) provides relief for self-charged interest for partnerships but not for S corporations.[1063]

II.E.5.b. Self-Employment Tax and State Income Tax Implications of Recommended Structure

To avoid self-employment tax, the entity should be a limited partnership, since an interest as a limited partner is not subject to self-employment (SE) tax.[1064] One should involve a local tax expert regarding any state or local taxes on pass-through entities in the states in which the entity does business.[1065]

II.E.5.c. Operating the Recommended Structure

II.E.5.c.i. General Considerations

This paradigm might not work well if owner compensation is needed to get the full Code § 199A deduction. See part II.E.5.c.ii Code § 199A Deduction under Recommended Structure. This concern applies only if the ultimate taxpayer computing the deduction has taxable income in excess of certain thresholds. See part II.E.1.c.vi Wage Limitation If Taxable Income Is Above Certain Thresholds.

To protect any real estate from business losses, maximize protection from creditors, and facilitate future restructuring of the business:

- Operations should be conducted in one or more LLCs, wholly owned by the limited partnership.

[1058] See part II.G.21 Employee Stock Ownership Plans (ESOPs, which also explains that a partnership interest does not qualify as employer stock.
[1059] See parts II.M.2.c Contribution of Partnership Interest to Corporation and II.P.3.c Conversions from Partnerships and Sole Proprietorships to C Corporations or S Corporations.
[1060] See parts II.M.4.d Introduction to Code § 409A Nonqualified Deferred Compensation Rules and II.M.4.f.i Overview of Profits Interest; Contrast with Code § 409A.
[1061] See part II.G.4 Limitations on Losses and Deductions; Loans Made or Guaranteed by an Owner.
[1062] See fn 1812 in part II.G.20.a Code § 163(j) Limitation on Deducting Business Interest Expense.
[1063] See text preceding fn 1831 in part II.G.20.a Code § 163(j) Limitation on Deducting Business Interest Expense, subpart II.G.20.a.i Generally.
[1064] See part II.L.4 Self-Employment Tax Exclusion for Limited Partner.
[1065] See part II.G.3 State Income Taxation.

- Real estate should be held in one or more LLCs, wholly owned by the limited partnership. However, it would also be fine for the real estate to be held in a separate LLC outside of the limited partnership structure,[1066] if the owner materially participates in the business.[1067] Note that keeping the real estate inside the master LP umbrella would take the place of or facilitate grouping under the passive loss rules,[1068] which might be more important in the case of a real estate professional, because grouping does not help with the real estate professional test under part II.K.1.e.iii Real Estate Professional Converts Rental to Nonpassive Activity, although those rules do provide a separate aggregation election.[1069]

- The real estate LLC(s) should lease the property to the operating LLC(s) for fair rental, which will be ignored for tax purposes but should allow the LLCs' respective assets to be segregated for purposes of protection from creditors.

The individuals involved in the business would own:

- An S corporation[1070] that is a 1% general partnership, and

- In the aggregate, the remaining 99% interest as limited partners.

To respect the S corporation's role as a general partner and to prevent the 3.8% tax from applying to their distributive shares of the S corporation's 1% interest as a general partner, the individuals would be employees of the S corporation and receive reasonable compensation for the services they perform. The employment arrangement also keeps the individual owners from tainting their limited partnership interests. The individuals' participation would be attributed to both the corporation (if applicable) and themselves.[1071]

[1066] The 2012 proposed regulations on the 3.8% tax on net investment income called into question the treatment of real estate rented to one's business. However, under the final regulations, any rental income considered nonpassive income under the self-charged rental rules would not be subject to the 3.8% tax. However, self-rental might not fully work, in that ownership of the real estate and the operating business might change over time. See parts II.I.8.c Application of 3.8% Tax to Rental Income. These issues can be addressed through special allocations and preferred returns inside the partnership structure.
[1067] The self-charged rental rules require that the landlord materially participate in the tenant's business (which the landlord must also own at least in part). See part II.I.8.c Application of 3.8% Tax to Rental Income and II.K.1.e.ii Self-Rental Converts Rental to Nonpassive Activity. If a business owner wants to rely on the more-than-100-hour significant participation rules rather than the material participation rules (which generally require more than 500 hours of work), then the business owner will not be able to rely on the self-rental exception and needs to keep the real estate inside the limited partnership umbrella so that the rent is disregarded for income tax purposes.
[1068] See part II.K.1.b.ii Grouping Activities – General Rules, particularly fn. 3146.
[1069] See fns. 3203-3204.
[1070] The entity being an LLC taxed as an S corporation would facilitate material participation of any trust that is or might eventually become an owner of the general partner. See part II.K.2.b Participation by an Estate or Nongrantor Trust. (Material participation is important to avoid the 3.8% tax on net investment income that might otherwise apply. See part II.I.8 Application of 3.8% Tax to Business Income.) If one is concerned that an LLC taxed as an S corporation might be subjected to self-employment tax because of some regulations that appear to be obsolete (see part II.L.5.b Self-Employment Tax Caution Regarding Unincorporated Business That Makes S Election), using a statutory close corporation might be a safer approach. See text accompanying fn. 3328 within part II.K.2.b.ii Participation by a Nongrantor Trust: Planning Issues.
[1071] See part II.K.1.c Limited Partnership with Corporate General Partner, particularly fn. 3179.

On a daily basis, the operation is simple:

- The S corporation, as general partner of the limited partnership, controls each LLC subsidiary, because the limited partnership is the LLC's sole member.

- In this capacity, the S corporation appoints its owners as the LLC's managers (and can give them more traditional titles, such as president, chief financial officer, etc.) who sign documents on behalf of the LLC showing their capacity as the LLC's managers or other officers.

- Each LLC subsidiary pays the S corporation a management fee to the S corporation to pay for the cost of the services provided by the owners and any other employees leased to the LLC. To protect each LLC's separateness from the other LLCs (if the partnership has more than one LLC subsidiary), it would be best for each LLC to have its own employees and not simply use the S corporation as a central payroll master; however, this might not be practical, depending on how the business is run. An entity that is disregarded for income tax purposes is also disregarded for self-employment tax purposes, notwithstanding that it is treated as a separate entity for payroll tax purposes.[1072] ***Caution***: See part II.E.5.c.ii Code § 199A Deduction under Recommended Structure. Also note that the reasonableness of the management fee (in terms of deducting the fee) depends on the reasonableness of the compensation of those whose services generated the management fee.[1073] Carefully document each employee-owner's employment agreement with the corporation.[1074]

- Only the S corporation and limited partnership file federal income tax returns. No matter how many LLC subsidiaries the partnership owns, the partnership files one federal income return to report all of their activity. (These materials do not attempt to cover state income or other tax issues in any systematic way that would help with state issues here.)

The tiered structure comes into play more when quarterly distributions are made to pay taxes or otherwise provide investment return to the owners. The LLCs would distribute part or all of their profits to the limited partnership, which then makes appropriate distributions to the limited partners and the S corporation general partner.

II.E.5.c.ii. Code § 199A Deduction under Recommended Structure

The S corporation general partner ("GP") of the limited partnership ("LP") receives a K-1 with QBI, wages, and UBIA. However, because the GP is a separate RPE from the LP, any activity on the K-1 the GP receives is siloed from the GP's own activities.[1075] In other words, K-1 income is QBI of the RPE that issues the K-1, not QBI of a business carried on by the K-1 recipient.

[1072] See part II.B Limited Liability Company (LLC), fns. 337-338.
[1073] See fn 42 and the accompanying text in part II.A.1.b.i Compensating Individuals.
[1074] See fn 1895 in part II.G.24 Taxing Entity or Individual Performing Services.
[1075] See Reg. § 1.199A-6(b), reproduced shortly before fn 759 in part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.

Thus, the GP needs to conduct its own trade or business for any wages it pays to count as being related to QBI.[1076] Guaranteed payments for services (which is how any payment for services to a partner for its work as a partner must be characterized)[1077] are not QBI.[1078]

When the GP receives a management fee and pays compensation to those working for the LP, those wages can be attributed back to the LP, but only if the W 2 wages were paid to the LP's common law employees or officers of the individual or RPE for employment by the LP – in other words, the GP leased the employees to the LP.[1079] Thus, compensation for services rendered by the limited partners themselves would not qualify, because they cannot be common law employees of the LP.

II.E.5.d. Net Investment Income Tax and Passive Loss Rules Under Recommended Structure

If any individual participates no more than 500 hours per year, that person might be subjected to the 3.8% tax more readily as a limited partner than as the owner of an S corporation, because limited partners have fewer ways to satisfy the material participation test than do other owners of pass-through entities.[1080] On the other hand, if one is concerned only about avoiding the 3.8% tax on net investment income and not about disallowing passive losses or credits,[1081] then a limited partner who works for more than 100 hours generally would avoid the 3.8% tax.[1082]

However, in light of the Tax Court's interpretation of the definition of limited partner for purposes of (and as described in) part II.L.4 Self-Employment Tax Exclusion for Limited Partners' Distributive Shares, consider whether the participation of a limited partner attributed to that person through his or her ownership of the S corporation general partner and work in the business in that capacity may make that person treated as participating for all interests that person owns in the underlying partnership. See part II.K.1.a.i Taxpayer Must Own an Interest in the Business to Count Work in the Business,[1083] which to benefit the taxpayer may require a grouping election as described in part II.K.1.b Grouping Activities (passive loss rules)[1084] or II.I.8.a.ii Passive Activity Grouping Rules (3.8% net investment income tax).

II.E.5.e. Estate Planning Aspects of Recommended Structure

II.E.5.e.i. Family Conflicts

When some family members are in the business and others outside the business, conflicts can develop. The insiders want to reinvest earnings to grow the business and would like compensation commensurate with the value they view they bring to the business, including

[1076] See Reg. § 1.199A-2(b)(1), reproduced in part II.E.1.c.vi.(a) W-2 wages under Code § 199A.
[1077] See part II.C.8.a Code § 707 - Compensating a Partner for Services Performed.
[1078] Reg. § 1.199A-3(b)(2)(ii)(I), (J), reproduced in part II.E.1.c.ii.(c) Items Excluded from Treatment as Qualified Business Income Under Code § 199A.
[1079] See Reg. § 1.199A-2(b)(2)(ii), reproduced in part II.E.1.c.vi.(a) W-2 wages under Code § 199A.
[1080] See part II.K.1.a.ii Material Participation.
[1081] See part II.K.1.i.i.(b) Tax Trap from Recharacterizing PIGs as Nonpassive Income.
[1082] For more details, see part II.I.8.f Summary of Business Activity Not Subject to 3.8% Tax.
[1083] Especially fn 3055.
[1084] The recommended structure seems to qualify as a vertically integrated structure under Reg. § 1.469-4T(f)(4)(iii), which is reproduced in part II.K.1.b.i What Constitutes an Activity as part of a discussion in the text accompanying fns 3105-3109 in that part, and Reg. § 1.469-4T(f)(5), Example (4) (not directly on point, but it is a tiered structure), which is also reproduced in that part.

incentive equity compensation. The outsiders want to distribute earnings for their own use and believe that they should share in the business' growth because that is part of the ownership legacy their parents left to them.

The first generation might want to put a long-term lease on real estate used in the business and bequeath the real estate to the outsiders. That allows the outsiders to have significant cash flow locked in for a while and allows more (or all) of the business to be bequeathed to the insiders.

The cleanest break would be for any LLCs holding real estate to be distributed from the limited partnership and then bequeathed. Generally, such a distribution would not generate any income tax.[1085] To maximize income tax planning opportunities, all of the real estate LLCs might stay under one partnership umbrella.[1086]

If insiders are pitted against insiders, generally a partnership structure is easier to divide than a corporate structure.[1087]

II.E.5.e.ii. Estate Tax Deferral Using Recommended Structure

If long-term estate tax deferral is required,[1088] deferring estate on a partnership interest involves more uncertainty than deferring estate on stock.[1089]

II.E.5.e.iii. Grantor Trust Planning

When a business is sold, clients may wish to turn off grantor trust status[1090] so that the income tax burden does not deplete their assets more than they are comfortable with.

For a grantor trust owning an S corporation, generally grantor trust status should be turned off before January 1 of the year of the sale if the grantor wishes to avoid all tax on the gain on sale. This concern is diminished or may not even exist for a partnership. See part III.B.2.j.i Changing Grantor Trust Status, especially the text accompanying fns. 6839-6841.

II.E.5.e.iv. Code § 2036

See part III.C Code § 2036.

However, retaining voting stock and transferring nonvoting stock does not cause Code § 2036 inclusion.[1091] Using an S corporation general partner may help address this issue.

1085 See part II.Q.8 Exiting From or Dividing a Partnership.
1086 See part II.Q.8.a Partnership as a Master Entity.
1087 See parts II.Q.7 Exiting from or Dividing a Corporation (especially part II.Q.7.f Corporate Division into More Than One Corporation) and II.Q.8 Exiting From or Dividing a Partnership.
1088 See part III.B.5.e.ii Code § 6166 Deferral.
1089 See part III.B.5.e.ii.(b) Tiered Structures.
1090 See part III.B.2.d Income Tax Effect of Irrevocable Grantor Trust Treatment.
1091 See fn 232 in part II.A.2.i.i.(b). Why Nonvoting Shares Are Needed for Estate Planning.

II.E.5.f. Recommended Structure with C Corporation

Because 2017 tax reform caused C corporation annual income taxation to be quite attractive, one might change the S corporation shown in the structure to instead be a C corporation, and give the corporation more than 1%.

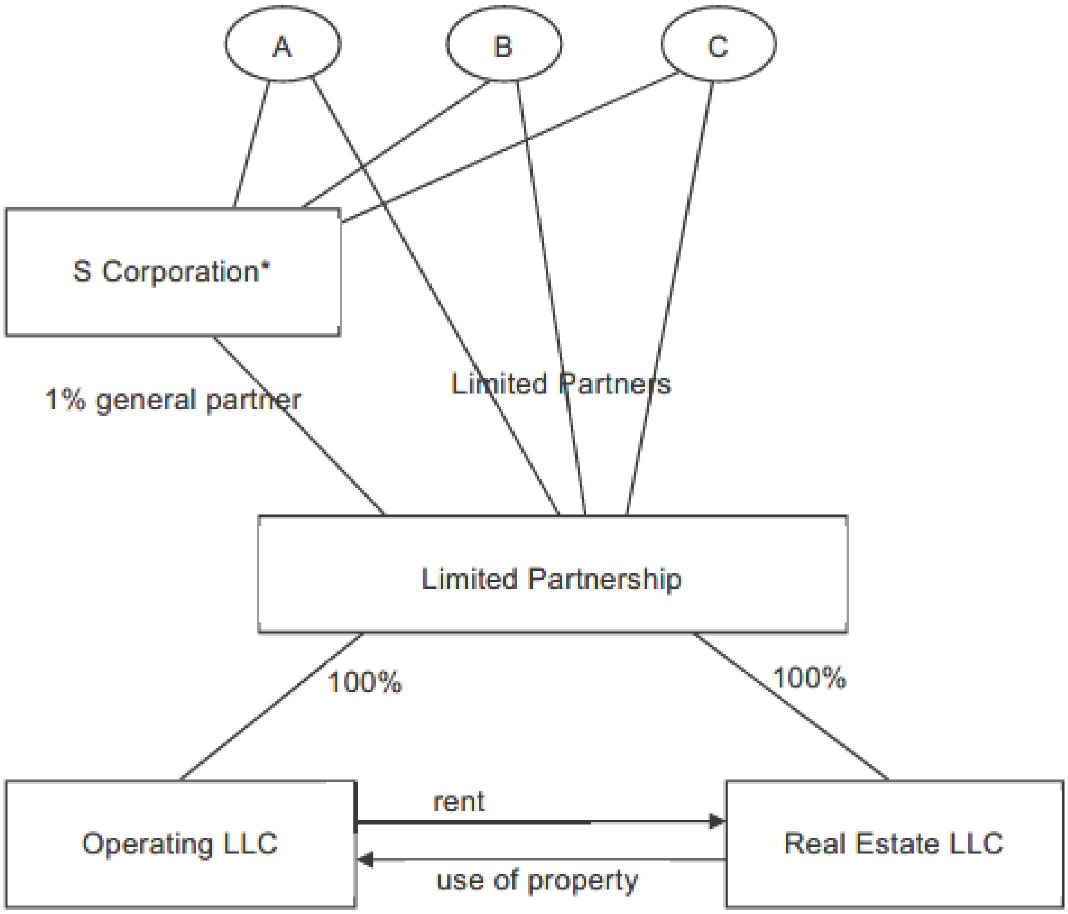
See part II.E.4 Reaping C Corporation Annual Taxation Benefits Using Hybrid Structure.

II.E.5.g. Other Aspects of Recommended Structure

Parts II.E.7 Migrating into Partnership Structure discusses moving to the recommended structure. Consider not only it but also part II.E.9 Real Estate Drop Down into Preferred Limited Partnership for real estate, long-lived tangible personal property, or intangible assets. The latter might generate royalty income subject to the 3.8% tax on net investment income, but in the recommended structure royalties would be disregarded the same way rent would be.

If the client would prefer not to have an S corporation general partner, see part II.E.8 Alternative Partnership Structure – LLLP Alone or LP with LLC Subsidiary. Note, however, that a corporation transitioning into that structure (instead of retaining a preferred partnership interest) would pay tax; see parts II.P.3.a From Corporations to Partnerships and Sole Proprietorships and II.Q.7.h Distributing Assets; Drop-Down into Partnership, especially parts II.Q.7.h.ii Taxation of Shareholders When Corporation Distributes Cash or Other Property and II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

II.E.6. Recommended Partnership Structure – Flowchart



* See part II.E.5.f. Recommended Structure with C Corporation.

If no real estate is ever held and the client balks at creating what the client perceives as too many entities, this structure could simply be a limited partnership without the LLCs. However, it would be much easier to start the operating business in its own LLC and later simply add other LLCs than it would be for the limited partnership to later transfer all of its business operations into a new LLC when real estate or a separate location or line of business is acquired.

II.E.7. Migrating into Partnership Structure

Compelling reasons to migrate from S corporation taxation to partnership include parts II.Q.8.e.iii.(a) Illustration of Inside Basis Issue and II.Q.1.a.i.(f) Partnership Use of Same Earnings as S Corporation in Sale of Goodwill, the latter illustrating substantial savings using a partnership when engaging in a seller-financed sale.

II.E.7.a. Overview of How to Migrate into Desired Structure

Moving an existing LLC, that is taxed as a partnership or as a disregarded entity, into this structure is relatively straightforward. The member or members form an S corporation. The S corporation contributes to a new limited partnership cash equal to 1/99 of the appraised value of the LLC's business, in exchange for a 1% interest as a general partner. The member or members contribute their interests in the LLC to the partnership in exchange.

Forming the S corporation and the limited partnership are not taxable events,[1092] so long as the liabilities are not shifted (or reallocated) too much from the members of the LLC to the corporate general partner.[1093] Any gain inherent in the contributed assets will be taxed to the original owners when those assets are sold.[1094] The work-in-process, appreciated inventory, and accounts receivable would tend to be the assets to watch, and accounts receivable would not be a concern if the LLC's income was reported using the accrual method. Given that the S corporation would probably have been formed with a modest cash contribution and therefore would have not contributed such assets, the only gain likely to receive a special allocation would be those inherent in the LLC. If reallocation of liability becomes an issue, the original members can guarantee the debts to get the debts allocated to them.

These two transactions are illustrated in part II.E.7.b Flowcharts: Migrating LLC into Preferred Structure, including parts II.E.7.b.i Using Cash Contribution to Fund New S Corporation and II.E.7.b.ii Using LLC to Fund New S Corporation.

This migration would be much more involved if the business is operated inside a corporation. Converting a corporation into a partnership would trigger gain.[1095] Instead, generally the corporation would move its assets into an LLC and then contribute that LLC to the limited partnership.[1096] The corporate partner would receive a preferred return on this invested capital (for which it receives a capital account),[1097] with at least 10% of the value of its equity being an interest in the residual profits (the "common interest"), and the individuals would receive the rest of the common interest as limited partners; although receiving only a pure preferred partnership interest would not violate the disguised sale rules,[1098] providing a significant interest in common helps support the corporate partner's role as a true partner, especially if the preferred payments are, for all practical purposes, extremely likely to occur. The considerations about debt reallocation described above would also apply. In some cases, a C corporation might retain certain assets, collect them in due course, and then make an S election. For more information

---

[1092] See part II.M.1. Taxation on Formation of Entity: Comparison between Partnership and Corporation.
[1093] If formed as described above, the concern would be that the reallocation of liabilities from a partner would be a deemed cash distribution that would generate gain if and to the extent that it exceeds the basis of that partner's partnership interest; see part II.Q.8.b.i.(a) Code § 731: General Rule for Distributions. If formed as described below, where the partners contribute to the S corporation their interests as general partner, then, in addition to the issue described above, a shareholder would have gain to the extent that the debt the corporation assumed exceeds the basis of the partnership interest the shareholder contributes to the corporation; see part II.M.2.b Initial Incorporation: Effect of Assumption of Liabilities.
[1094] See part II.P.1.a.i Allocations of Income in Partnerships.
[1095] See part II.P.3.a From Corporations to Partnerships and Sole Proprietorships.
[1096] The corporation would do this either gradually or in one fell swoop, as described in part II.E.7.c.i Corporation Forms New LLC, including parts II.E.7.c.i.(a) Direct Formation of LLC and II.E.7.c.i.(b) Use F Reorganization to Form LLC.
[1097] The exchange for a capital account (not intended to be redeemed in any manner in the first several years) and preferred payments (made from operating cash flow) can easily be done in a nontaxable manner that prevents the disguised sale rules from applying. See part II.M.3 Buying into or Forming a Partnership, particularly part II.M.3.e Exception: Disguised Sale. If any owners are members of the same family or if any owner might split up his ownership in the corporate general partner from his interest as a limited partner when making transfers to family members, see parts III.B.7.b Code § 2701 Overview and III.B.7.c Code § 2701 Interaction with Income Tax Planning.
[1098] As illustrated in part II.E.7.c.ii Moving New LLC into Preferred Structure.

on this conversion, see part II.Q.7.h.viii Value Freeze as Conservative Alternative, especially fn 5141 (explaining why we recommend a common interest equal to at least 10% of the contributed equity). However, this 10% recommendation does not apply where other factors prevail, such as a marketplace business model or where the preferred partner has significant economic risk of loss from operations.

Note that starting as an LLC and migrating into the structure permits giving the corporate partner only a small common interest, whereas starting as a corporation and migrating requires giving the corporate partner both preferred and substantial common interests.

Finally, if a business entity lacks a noncompete binding those with the key client/customer contacts:

- They can also migrate over time by letting the old entity wind down and doing business in a new entity taxed as a partnership, with the new entity leasing equipment from the old entity until the new entity is ready to buy new equipment to replace the old equipment as the latter becomes obsolete. Practical issues in collecting receivables in the old entity vs. doing business in the new entity require close consultation with the corporate/partnership's income tax preparer.

- The corporation's business might be worth very little if those with those contacts left and took those contacts with them. Consider obtaining an appraisal of the corporation's assets on that basis, which would minimize its capital account in the new entity. Those with the contacts sign a non-compete agreement with the new partnership, thereby establishing that they are providing that value to the partnership and deserve an interest in the partnership.

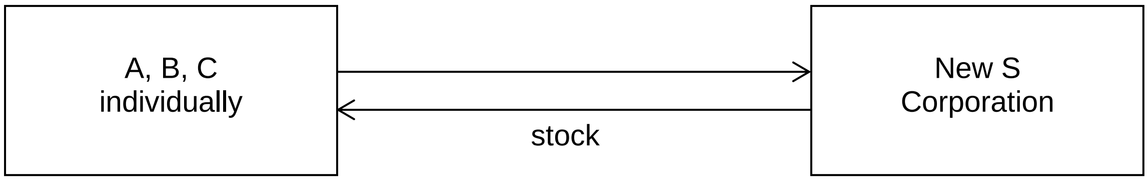
The strategy I propose envisions a limited partnership, so that the individual owners can avoid part II.L Self-Employment Tax (FICA) as limited partners; see part II.L.4 Self-Employment Tax Exclusion for Limited Partners' Distributive Shares. If that exclusion is repealed or avoiding self-employment tax is no longer an objective,[1099] the individuals might simply become members of the new LLC.

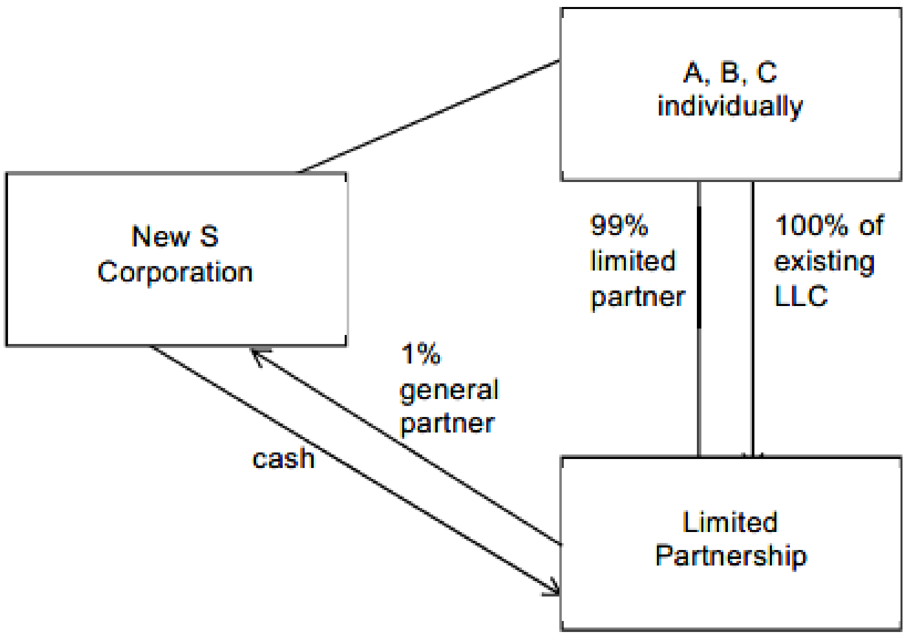
Also, any migration directly or indirectly involving real estate may require consideration of real estate transfer tax or fees or property tax reassessment.

[1099] If the part II.I.8 Application of 3.8% Tax to Business Income exclusion from II.I 3.8% Tax on Excess Net Investment Income (NII) is repealed and the individual owners already receive compensation over the taxable wage based described in part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax, then self-employment (SE) tax may be more attractive than net investment income tax, because the employer portion of SE tax is deductible for income tax purposes, making it a lower rate in many cases.

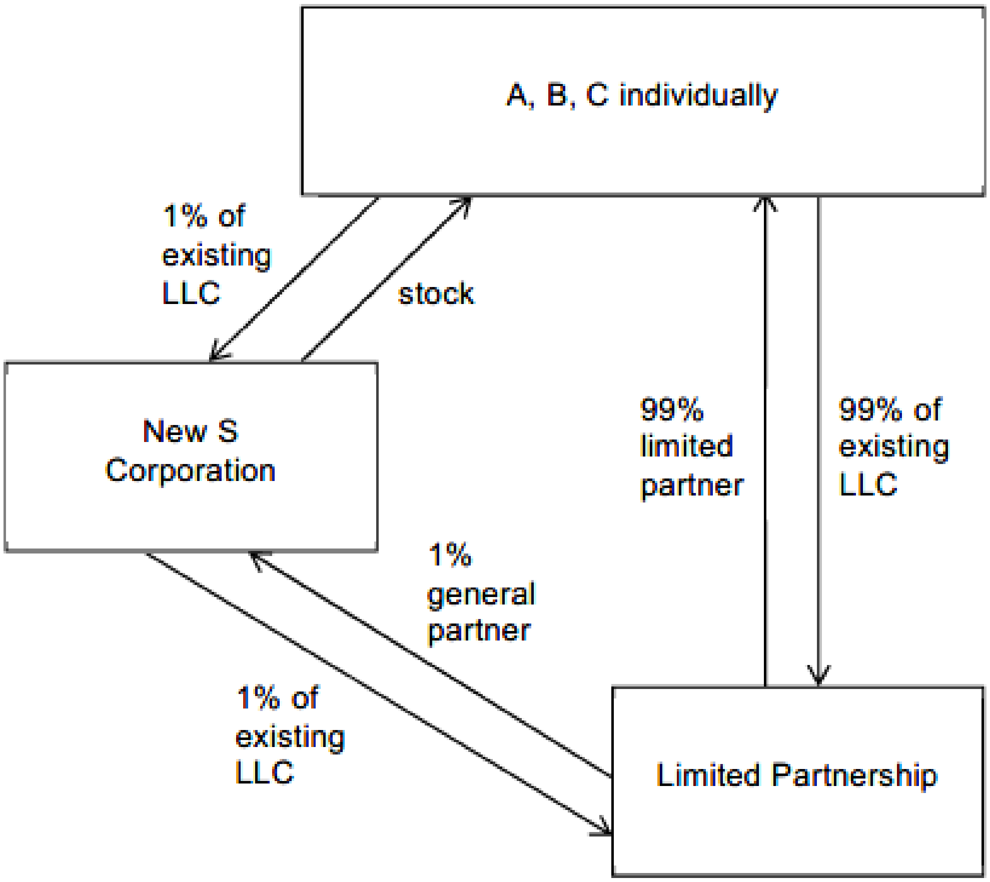
II.E.7.b. Flowcharts: Migrating LLC into Preferred Structure

II.E.7.b.i. Using Cash Contribution to Fund New S Corporation





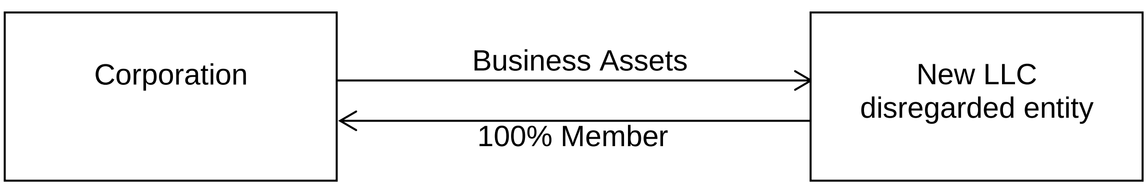
II.E.7.b.ii. Using LLC to Fund New S Corporation



II.E.7.c. Flowcharts: Migrating Existing Corporation into Preferred Structure

II.E.7.c.i. Corporation Forms New LLC

II.E.7.c.i.(a). Direct Formation of LLC



<u>Advantages</u>

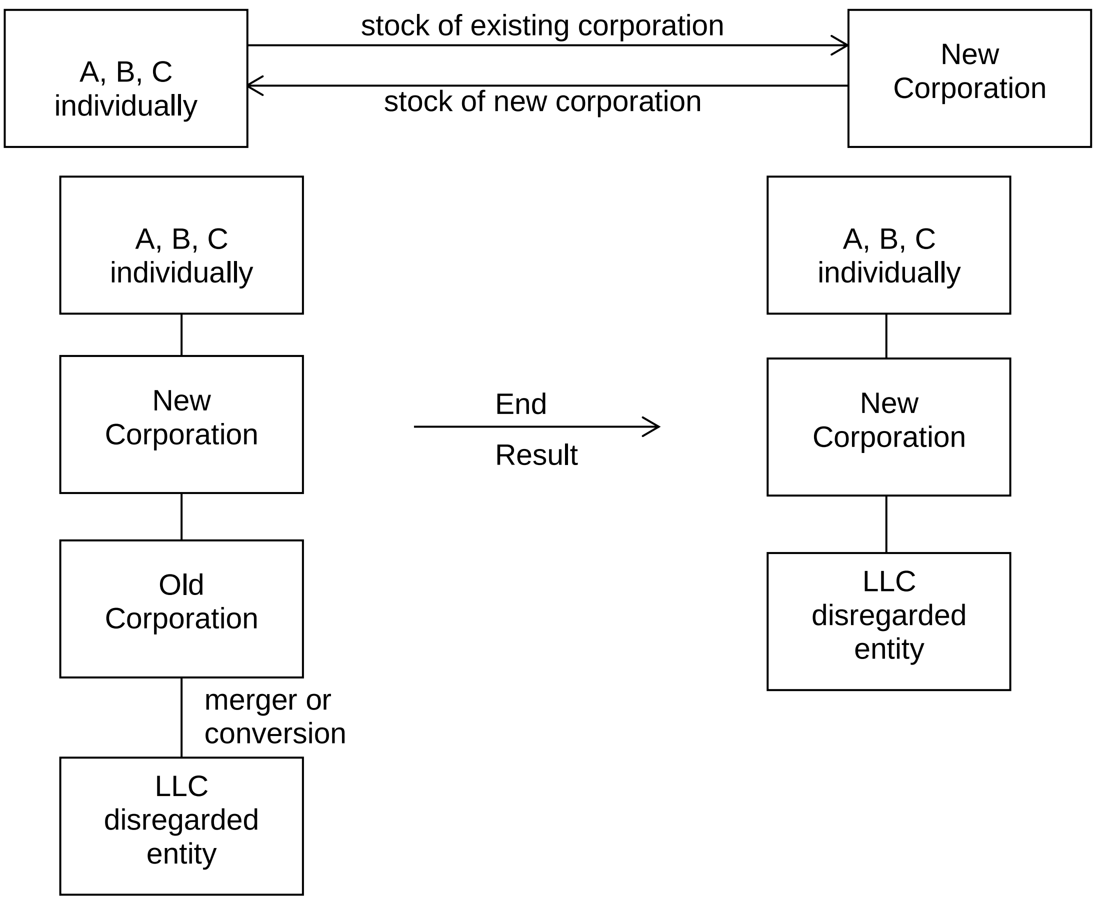
- Corporation can keep nonbusiness assets
- Corporation can keep business assets that would generate complications if transferred to the limited partnership structure and then had income recognition event
- New LLC can stay as a disregarded entity for a while as transition to new structure and get everyone used to working in LLC structure

Disadvantages

- Piecemeal transfer of assets

- Some assets not readily transferable

II.E.7.c.i.(b). Use F Reorganization to Form LLC



Advantage

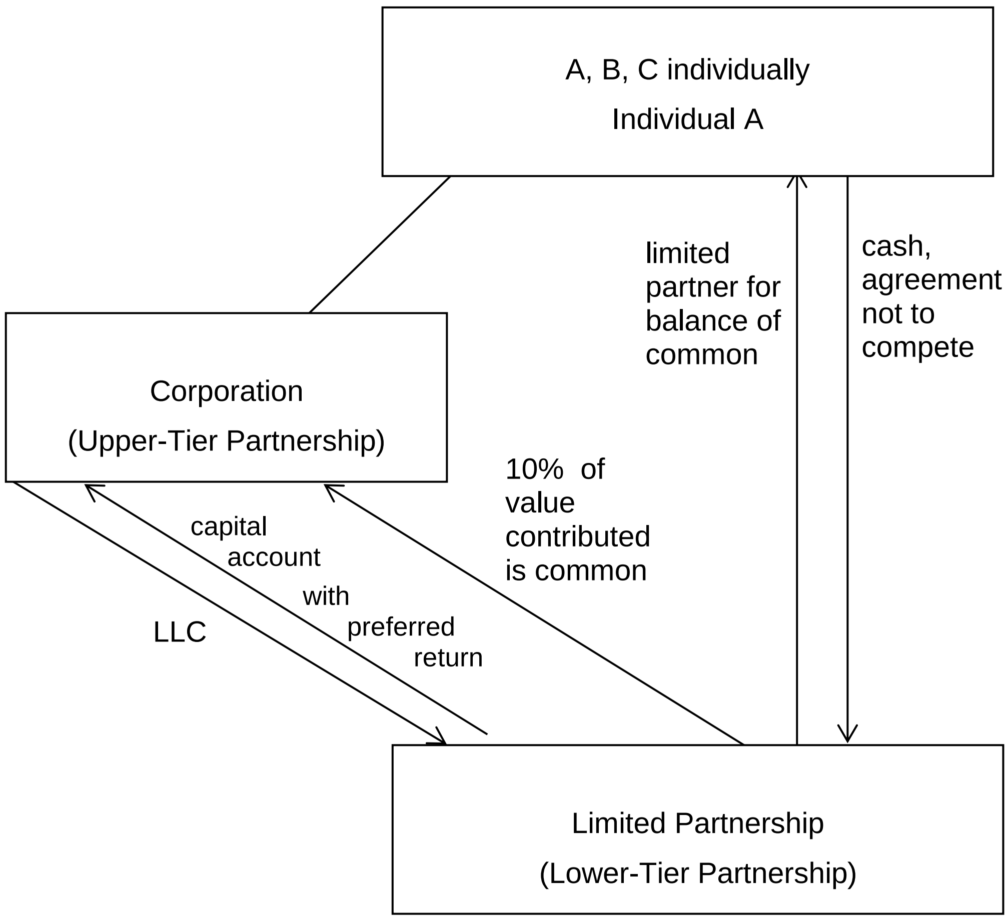
- Moves all assets in one fell swoop

Disadvantages

- No selectivity of retained assets
- Contribution of stock of old corporation to new corporation and merger or conversion of old corporation into new corporation need to be done at the same time
- If S corporation involved, new corporation does new S election and old corporation does qualified subchapter S subsidiary election.

See part II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization. For an S corporation, see also part II.A.2.g Qualified Subchapter S Subsidiary (QSub), especially fn. 193.

II.E.7.c.ii. Moving New LLC into Preferred Structure



II.E.7.c.iii. Migrating Gradually Over Time

A company might have its employees and intellectual property locked down so tightly that the migrations described in the preceding provisions of this part II.E.7 Migrating into Partnership Structure result in a large value and large preferred return that might be so large that they cause very significant estate tax issues that seem impossible to overcome. Consider:

- A corporation that needs to migrate to these structures to obtain income tax efficiencies.

- Any type of company that is subject to estate tax and difficult to move into a structure outside the estate tax system. For example, it might have too low a cash flow to make a GRAT or a sale to an irrevocable grantor trust be efficient.

In those cases, consider that, in today's economy and global environment, businesses need to reinvent themselves – sometime gradually, sometimes quickly – to keep up with or try to out-perform their competitors.

The company might reinvent itself over time through a sister company that is held in the business structure recommended in this part II.E Recommended Structure for Entities. For example, the senior generation makes gifts or loans to new trusts that establish this structure.

The new trusts own the S corporation and limited partnership (or LLC, in the case of a state such as Tennessee).

For examples of new activities, see part III.B.1.a Business Opportunities.

Certain IRS responses to such movement and generally successful taxpayer responses are described in parts III.B.1.a.v Sending Business and III.B.1.a.vi Asset Transfers to Children or Their Businesses.

If the business being transitioned is a corporation, see part II.Q.7.h Distributing Assets; Drop-Down into Partnership.

II.E.8. Alternative Partnership Structure – LLLP Alone or LP with LLC Subsidiary

II.E.8.a. Description of Structure; Nontax Issues

The structure would be one of the following:

- <u>Limited Liability Limited Partnership (LLLP)</u>. An LLLP is a limited partnership (LP) (a partnership consisting of one or more general partners (GPs) and one or more limited partners) that registers for limited liability protection for its GPs.

- <u>LP with LLC Subsidiary</u>. The LP parents functions as a holding company and does business through one or more LLC subsidiaries, the latter which are disregarded entities for most tax purposes.[1100]

See parts II.C.12 Limited Partnership and II.C.13 Limited Liability Partnership Registration for General Partners in General or Limited Partnerships, the latter covering LLLPs as variations of LPs.

If one were to choose between the two structure, I would tend to favor the LP with LLC Subsidiary structure, because it facilitates opening separate branches or lines of businesses as separate LLCs without the initial business being comingled with the ownership of these new branches or lines of business. I also tend to favor it in Missouri, because in Missouri the lapse of an LLLP's registration cannot be cured, leaving the GPs exposed, whereas a Missouri LLC does not require annual registration and cannot have any lapse in liability protection. A disadvantage of the LP with LLC Subsidiary structure is that two registrations might be required in each state in which the company does business, contrasted with one registration per state for a LLLP. However, the latter might not be a disadvantage relative to the LP with LLC Subsidiary structure when separate branches or lines of businesses operate as separate LLCs.

The LP with LLC Subsidiary structure also permits the general partner's name to be kept confidential in most business dealings if the general partner is not active in the business, in that each LLC can be run by a manager who is not an owner.

II.E.8.b. Tax Issues

Let's discuss FICA/ self-employment (SE) tax issues and passive loss issues.

[1100] See part II.B Limited Liability Company (LLC).

According to the legislative history of the SE tax, a person who is not only a GP but also a limited partner is subjected to SE tax only with respect to the GP interest.[1101] However, this is based on legislative history, and I am unaware of any cases or rulings applying this principle. Any compensation paid to a partner for services is subject to SE tax to the extent that the services are rendered in carrying out a trade or business,[1102] whether or not the partner is a GP.[1103] Presumably the IRS would seek to reclassify distributions to a limited partner as compensation for services rendered, in a manner similar to what it does in the S corporation arena.[1104]

Although originally a limited partner lost liability protection by participating in the partnership's activities, that has not been the case for quite some time.[1105] In the passive loss area, being a general partner has a different effect – it converts an interest as a limited partner into an interest as a general partner when determining material participation.[1106]

The idea that an interest as a limited partner has passive loss characteristics that differ from its SE tax characteristics might cause confusion in reporting and auditing. A Tax Court case includes language about the self-employment exclusion as applied to active limited partners that concerns a tax expert I highly respect,[1107] and I would rather not tempt fate. Thus, I would

---

1101 See part II.L.4 Self-Employment Tax Exclusion for Limited Partner, especially fn. 3462 and accompanying text.

1102 See part II.L.3 Self-Employment Tax: General Partner or Sole Proprietor, especially the text accompanying fns. 3453-3455.

1103 See part II.L.4 Self-Employment Tax Exclusion for Limited Partner, especially fn. 3456 and accompanying text.

1104 See part II.L.1 FICA: Corporation, especially fn. 3380, and part II.L.5.a S Corporation Blocker Generally, especially fn. 3500.

1105 A prior version of Willis & Postlewaite, *Partnership Taxation*, ¶2.02. Requirements of Section 704(e), stated:

> As originally written, the Uniform Limited Partnership Act provided that "[a] limited partner shall not become liable as a general partner unless…he takes part in the control of the business." ULPA, § 7 (1916). The versions of the Revised Uniform Limited Partnership Act approved in 1976 and 1985 relaxed the control requirement by providing a safe harbor in the form of a lengthy list of activities deemed not to constitute participation in the control of the partnership and a limitation on a limited partner's liability for participation in activities not within the safe harbor to only those persons who transacted business with the limited partnership "reasonably believing, based upon the limited partner's conduct, that the limited partner is a general partner." RULPA, § 303 (1985). Section 303 of the Uniform Limited Partnership Act approved in 2001 has eliminated the control requirement and provides that:
>
> > A limited partner is not personally liable, directly or indirectly, by way of contribution or otherwise, for an obligation of the limited partnership solely by reason of being a limited partner, even if the limited partner participates in the management and control of the limited partnership.
>
> RULPA, § 303 (2001). According to the commentary accompanying the act, this provision is intended to provide "a full, status-based liability shield for each limited partner" even when the limited partner participates in the management and control of the limited partnership. The purpose is to bring limited partners into parity with the members of a limited liability company, partners in a limited liability partnership, and corporate shareholders. It is unclear how this change in state partnership law might affect the application of federal tax law in the context of family partnerships. Nevertheless, if the limited partners are to have no role in the management of the partnership, the partnership agreement should expressly provide that the limited partners have no management power.

1106 See part II.K.1.a.ii Material Participation, especially fn. 3071.

1107 See fn. 3493, found in part II.L.4 Self-Employment Tax Exclusion for Limited Partner.

generally prefer to place a client in the recommended structure with an S corporation general partner described in part II.E.5 Recommended Long-Term Structure for Pass-Throughs – Description and Reasons and illustrated in part II.E.6 Recommended Partnership Structure – Flowchart. However, if the client resists that structure, the LLLP Alone and LP with LLC Subsidiary structures are alternatives to consider, after warning the client appropriately.

Also, if the business engages in domestic manufacturing, note that wages paid by a corporation would provide a small tax benefit relative to compensation paid to a partner.[1108]

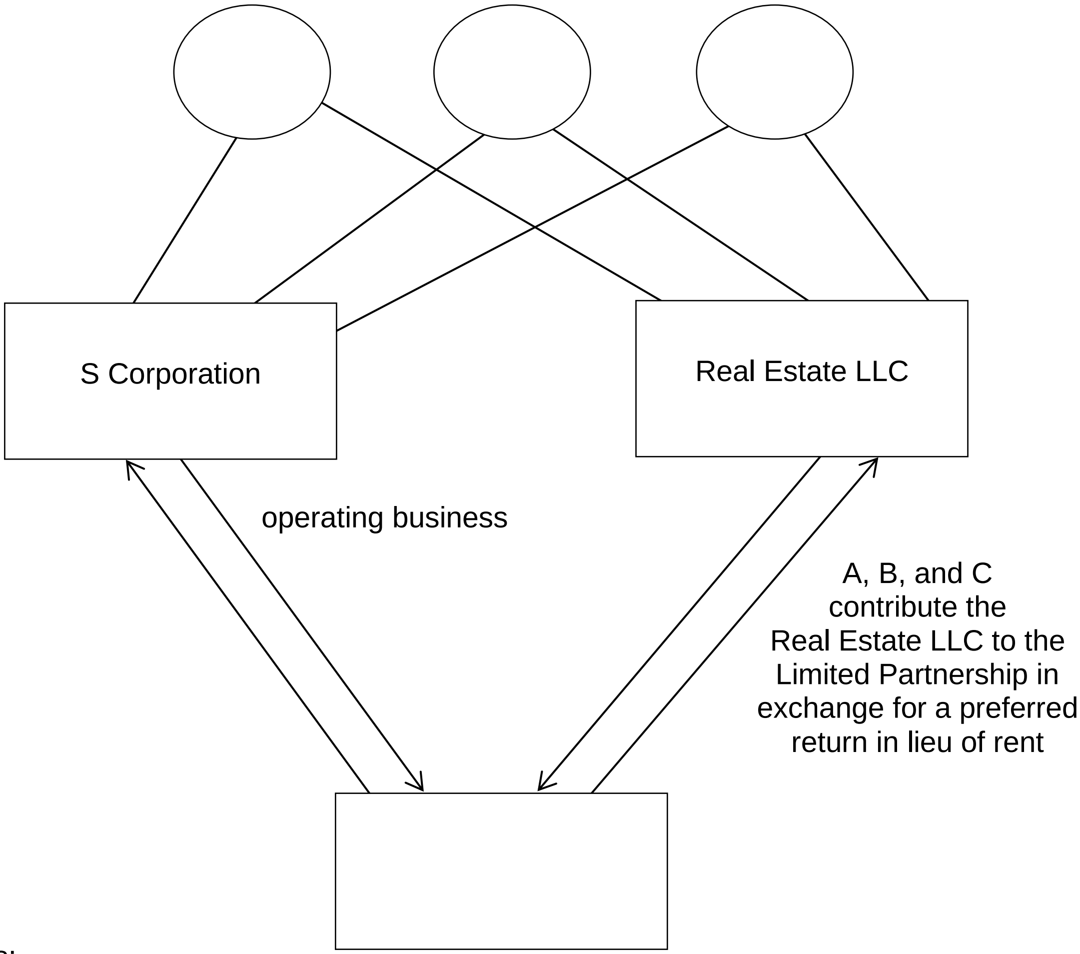
II.E.8.c. Migrating to LP with LLC Subsidiary Structure

Migrating from an LLC to an LP with LLC Subsidiary structure is much easier than migrating to my preferred recommended structure.[1109]

The members of the LLC simply form the LP and then contribute their LLC interests to it. That transaction has no income tax consequences.[1110] Both the LP and the LLC will continue to use LLC's tax ID – the LP because it has assumed the LLC's prior tax existence[1111] and the LLC because it is a disregarded entity.[1112] Presumably the LLC would need to obtain a new tax ID for payroll tax purposes, if it has its own payroll,[1113] as well as for purposes of excise and certain other taxes.[1114]

[1108] Note the W-2 limitation mentioned in part II.G.25 Code § 199 Deduction for Domestic Production Activities especially fn. 1898.
[1109] For the latter, see part II.E.7.b Flowcharts: Migrating LLC into Preferred Structure.
[1110] See part II.C.5 Converting from One Entity Taxed as a Partnership to Another.
[1111] See part II.C.5 Converting from One Entity Taxed as a Partnership to Another, especially fn. 479.
[1112] See part II.B Limited Liability Company (LLC), especially fn. 331.
[1113] See part II.B Limited Liability Company (LLC), especially fn. 337.
[1114] See part II.B Limited Liability Company (LLC), especially fn. 340-341.

II.E.9. Real Estate Drop Down into Preferred Limited Partnership



Notes:

- Assume A, B, and C are active in business (more than 500 hours) and receive reasonable compensation from the general partner for services rendered to the corporation, which is the general partner of the limited partnership.

- A, B, and C assign their interests in the LLC to the limited partnership, converting the LLC into a disregarded entity and making A, B, and C directly hold interests as a limited partner.

- Similarly, the S corporation might contribute its assets to a single member operating LLC that the limited partnership then owns, which would then rent the property from the Real Estate LLC. The rental payments would be disregarded for income tax purposes, and the properties would be separate for asset protection purposes.

- Even better would be for the S corporation also to hold a preferred interest preferred based on the value of its assets (and a small common interest) and for A, B and C to hold some or most of the common interests, maximizing the partnership component to obtain a basis step-up at death and minimize tax on a seller-financed sale of the business.

- This would not avoid self-employment tax on the limited partners if the long-ago proposed regulations defining limited partner for purposes of the self-employment tax were finalized.

For more details on this drop-down structure, see part II.Q.7.h Distributing Assets; Drop-Down into Partnership, especially part II.Q.7.h.viii Value Freeze as Conservative Alternative.

II.E.10. What if Self-Employment Tax Rules Change Unfavorably?

If self-employment tax would apply to the limited partners and the parties would prefer to have the operating business inside an S corporation structure, then the limited partnership dissolves.

The limited partners take all of the real estate LLC(s) and an appropriate portion of the operating LLC(s), with the S corporation taking its fair share of the operating LLC(s).[1115]

Next, the limited partners contribute all of their interest in the operating LLC(s) to the S corporation.[1116]

The final structure is the S corporation holding one or more LLCs that are disregarded for tax purposes and the individuals owning a real estate LLC taxed as a partnership. As a matter of state law, all of the transactions listed above are done by assigning LLC interests rather than more burdensome transfers of operating assets.

II.F. Asset Protection Planning

II.F.1. Business Entities and Creditors Generally

This part II.F.1 discusses not only how entities can protect their owners from liability but also how the state law entity can affect the ability of an owner's creditors to disrupt business operations. State law defaults typically give a transferee of stock full voting and information rights, whereas state law defaults (as modified by certain federal laws) give a transferee of an interest in a partnership or LLC little or no voting rights and limited information rights. For the reasons described below, one might consider doing a tax-free conversion of a corporation to an LLC or a limited partnership taxed as a corporation.

Piercing the corporate veil – when a creditor of an entity can go after the entity's owner(s) - is a doctrine that can apply to any type of limited liability entity.[1117]

[1115] If the business was started from scratch with only cash and labor, then generally this transaction will not be taxable. If a partner contributed any particular property within seven years of this dissolution, then it might be necessary for that partner to receive the LLC holding that property. For a general discussion of all of these ideas, see part II.Q.8 Exiting From or Dividing a Partnership.

[1116] Code 351 precludes income taxation of this transaction.

[1117] For a general discussion of such issues and doctrines that go beyond equitable veil-piercing, see Donn, "Is the Liability of Limited Liability Entities Really Limited?" *ALI-ABA seminar on Choice of Business Entity* 2/13/2008. Elizabeth S. Miller, Professor of Law, Baylor University School of Law, summarizes recent developments in limited liability partnerships and LLCs at http://www.baylor.edu/law/faculty/index.php?id=75536. A trade creditor needs to prove not only that the entity was not run in a financially responsible way but also that the creditor made a reasonable inquiry into the debtor's financial position, by obtaining a credit report and perhaps a balance sheet. *On Command Video Corporation v. Roti*, 705 F.3d 267 (7th Cir. 2013). In selecting the law to apply, that court held that, under Illinois law, "veil-piercing claims are governed by the law of the state of the corporation whose veil is sought to be pierced." The court also accepted the parties' acceptance of applying corporate veil-piercing standards to an LLC.

"Reverse piercing" is the common name for when a creditor of an owner obtains an interest in a business entity and then tries to get to the entity's assets. Courts tend to be reluctant to disrupt business operations, when doing so would be unfair to the other owners of the business.

A "charging order" is an order for an entity to turn over to the creditors of a partner (or owner of an LLC or other unincorporated entity) that debtor's share of distributions. This remedy for a creditor of an owner of a partnership interest or interest in an LLC[1118] might be more unattractive than a creditor's remedies of taking possession of stock (particularly voting stock) of a corporation:[1119] if a creditor is able to foreclose on stock, the creditor obtains voting rights and other shareholder rights, whereas a creditor foreclosing on an interest in a partnership or LLC generally obtains only an assignee interest (the right to receive a pro rata share of any distributions but not to vote or in any other way obtain information about the entity's operations).[1120] If the creditor forecloses, then the creditor becomes the owner and is taxed as such;[1121] however, if the creditor does not foreclose, generally the debtor will continue to be taxed as the owner,[1122] and any cash the creditor receives from the charging order will constitute a payment by the debtor.[1123]

Regarding interests in LLCs and partnerships, states vary on whether they make a charging order the exclusive remedy or allow creditors to foreclose on the LLC or partnership interest and possibly pursue aggressive reverse piercing strategies. Most states authorize charging orders

---

1118 See Bishop, "LLC Charging Orders: A Jurisdictional and Governing Law Quagmire," *Business Entities* (May/June 2010), discussing reverse piercing and whether an LLC is a necessary party to a charging order action brought by a judgment creditor against a member (but not the LLC itself) and, if the LLC was formed in another state, which state law controls the limits of the charging order remedy. *New Times Media LLC v. Bay Guardian Co., Inc.* (U.S. District Court for Delaware Case No. 10-CV-72), rebuffed an attempt to have a California case be moved to Delaware to have a court sympathetic to Delaware's anti-reverse-piercing rules.

1119 See Forsberg, Spratt and Stein, "Conversion of Business Entities Into Limited Liability Companies: Asset Protection Issues Surrounding LLC Interests," American Bar Association Section of Real Property, Trust & Estate Law, 2009 Spring Symposia.

1120 See fn. 3777 for an assignee being admitted as a member.

1121 Rev. Rul. 77-137, the facts of which are brief enough to recite here:

> A, a limited partner in a limited partnership formed under the Uniform Limited Partnership Act of a state, assigned the limited partnership interest to B. The agreement of the partnership provides, in part, that assignees of limited partners may not become substituted limited partners in the partnership without the written consent of the general partners. However, it also provides that a limited partner may, without the consent of the general partners, assign irrevocably to another the right to share in the profits and losses of the partnership and to receive all distributions, including liquidating distributions, to which the limited partner would have been entitled had the assignment not been made. Under the terms of the assignment A, who was the nominal limited partner under local law, agreed to exercise any residual powers remaining in A solely in favor of and in the interest of B.
>
> *Held*, even though the general partners did not give their consent to the assignment, since B, the assignee, acquired substantially all of the dominion and control over the limited partnership interest, for Federal income tax purposes B is treated as a substituted limited partner. Therefore, B must report the distributive share of partnership items of income, gain, loss, deduction, and credit attributable to the assigned interest on B's Federal income tax return in the same manner and in the same amounts that would be required if B was a substituted limited partner.

1122 See GCM 36960, which provided the basis for and explains the context of Rev. Rul. 77-137.

1123 Adkisson, Bishop, and Rutledge, "Recent Developments in Charging Orders," *Business Law Today* (Feb. 2013).

but do not address whether charging orders are the exclusive remedy.[1124] If the charging order is not enough to pay the creditor, a judge might then order the sale of the interest in the entity. Since third parties are unlikely to buy at the sale, the creditor would acquire the interest in the entity as an assignee. Rather than foreclosing and having the interest in the entity convert to that of an assignee, a judge might order a receiver to take control of the interest in the entity so that the receiver attempts to exercise the debtor's rights. In a nonbankruptcy case, the debtor objected to a charging order against his interests in two LLCs, the court issued a sweeping charging order against the LLCs that the court acknowledged were not parties to the case;[1125] presumably the LLCs would need to fight the lack of jurisdiction.

Disalvo Properties, LLC v. Bluff View Commercial, LLC, 464 S.W.3d 243 (E.D. Mo. 2015), help that RSMo § 347.119 "authorizes a charging order to be entered against an individual debtor-

---

[1124] Professor Carter G. Bishop has written extensively in the area, including "Fifty State Series: LLC Charging Order Statutes" (Suffolk University Law School Research Paper No. 10-03, written January 25, 2010 and updated March 1, 2016 (or later) http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1542244), "Fifty State Series: LLC Charging Order Case Table" (Suffolk University Law School Research Paper No. 10-15, written 3/19/2010 and updated at http://papers.ssrn.com/abstract=1565595), and "Fifty State Series: LLC & Partnership Transfer Statutes" (Suffolk University Law School Research Paper No. 10-25, written 6/7/2010 and updated at http://papers.ssrn.com/abstract=1621694). For a complete set of his articles, see http://ssrn.com/author=55232. Another helpful resource is at http://www.internationalcounselor.com/chargingorder.htm. However, it has been suggested that choice of law for governing documents is overrated, because the law of the jurisdiction in which a foreclosure is attempted controls, rather than law of the state of formation. Adkisson, Bishop, and Rutledge, "Recent Developments in Charging Orders," *Business Law Today* (Feb. 2013).

[1125] *Rockstone Capital, LLC v. Marketing Horizons*, LTD, 2013 WL 4046597 (Conn. Super., 7/17/2013) (unpublished), ordering:

1. The interests of the Defendant/Judgment Debtor, Ashton Edwards (the "Defendant"), in the Companies (as defined in the Motion for Charging Order) are charged with payment of the unsatisfied amount of the judgment debt herein and also with costs, attorneys fees and interest. Within 10 days of the entry of this Order, the Defendant is ordered to provide the complete name and current mailing address of the managing member of each of the Companies, Marketing Ventures Worldwide, LLC & Nonprofit Solutions, LLC.
2. The Companies are each directed to pay the Plaintiff present and future shares of any and all distributions, credits, drawings, or payments due to the Defendant until the judgment is satisfied in full, including attorney's fees, interest and costs.
3. Until said judgment is satisfied in full, including attorney's fees, interest and costs, the Companies shall make no loans, directly or indirectly, to or for the benefit of the Defendant or other partners or anyone else for the benefit of the Defendant without further Order of this Court.
4. Within twenty days of service of a copy of this Order upon any members of the Companies, the Companies shall supply the Plaintiff full, complete and accurate copies of the Companies' Operating Agreements including any and all amendments or modifications thereto; true, complete and accurate copies of any and all Federal and State income tax or informational income tax returns filed within the past two years; balance sheets and profit and loss statements for the past two years; and balance sheet and profit and loss statements for the past two years; and balance sheet and profit and loss statements for the most recent present period for which same have been computed. Further, upon twenty-day notice from the Plaintiff to the Companies, all books and records shall be produced for inspection, copying and examination in the Plaintiff's counsel's office.
5. Until said judgment is satisfied in full, including all costs and interest thereon, the Companies shall supply the Plaintiff, within thirty days of the close of the respective accounting period for which said data is or may be generated, all future statements reflecting cash position, balance sheet position, and profit and loss.

member's interest in an LLC" but that a "foreclosure or court-ordered sale of charged membership interests in an LLC is not expressly contemplated by section 347.119 or any other section of the Missouri LLC Act."[1126]

In a bankruptcy case, courts vary on whether an LLC operating agreement is considered an "executory contract."[1127]

Although for purposes of estate tax generally an intangible asset is considered located where the decedent was domiciled, for purposes of bankruptcy venue might lie there or might lie in another venue that facilitates the bankruptcy trustee's collection of the estate.[1128] The bankruptcy trustee might take the bankruptcy debtors' interest as a member, as bankruptcy law supersedes the state's LLC statutory conversion of the debtors' interest into an assignee's interest.[1129] Notably, the court did not follow prior cases that said that an LLC was not protected from its sole owner's bankruptcy simply because there was no third party member to protect. Rather, it held that the event of bankruptcy itself cannot strip the original owner of his or her pre-petition rights. Thus, a debtor needs to divest himself or herself of rights in an LLC (or a partnership) if and to the extent it is legitimate to do so before the filing the petition.

[1126] In its reasoning, the court noted at 247-248 that:

> … section 358.280.2 of the Uniform Partnership Law, unlike the provisions of the Missouri LLC Act and the Uniform Limited Partnership Law, expressly contemplates and authorizes a foreclosure and court-ordered sale of charged partnership interests in a partnership. *See Wills v. Wills*, 750 S.W.2d 567, 574 (Mo.App.E.D.1988) (holding foreclosure of charged partnership interests is an available remedy under section 358.280).

[1127] *In re Denman*, 513 B.R. 720 (W.D. Tenn. 2014) (holding that an operating agreement was not in that case - and generally would not be - an executory contract, recognizing that several other courts disagree but suggesting that those other courts are wrong). The court also threw out an "ipso facto" clause that provided a bargain sale from a bankruptcy estate.

[1128] *In re Blixseth*, 484 B.R. 360 (9th Cir. BAP Nev. 2012), holding that Nevada was an appropriate venue since its statutes governing the subject entities required any charging order or dissolution proceeding to be brought in a Nevada court. See "Jay Adkisson on Blixseth: Rags-to-Riches to," *Steve Leimberg's Asset Protection Planning Email Newsletter* - Archive Message #220. See also G. Rothschild, "Recent Developments in Asset Protection," *TM Memorandum* (BNA) (6/17/2013), summarizing *Weddell v. H2O, Inc.*, 128 Nev. Adv. Op. No. 9 (3/1/2012), as follows:

> The Supreme Court of Nevada reversed the district court's judgment relating to the scope of the charging order against Weddell's membership interests. The Supreme Court ruled that the charging order only divested Weddell of his economic opportunity to obtain profits and distributions from Granite, not his managerial rights.
>
> …
>
> This decision is in line with decisions in other charging order cases. It is noteworthy that this case was decided under the Nevada charging order laws prior to the revisions that were modified in the 2003 legislative session and did not include the substantial enhancements made in the 2011 legislative session. The 2011 legislative changes to Nevada's charging order laws specifically disallow the issuance of any equitable remedies. However, there were no provisions prohibiting the judge from issuing an equitable remedy to find a way around the exclusive remedy language. Therefore, in future litigation, members of Nevada LLCs will be even more protected than the degree of protection provided by pre-2011 laws.

[1129] *In re First Protection, Inc.*, 2010 WL 5059589 (9th Cir. BAP Ariz. 11/22/2010) (allowing the bankruptcy trustee to step into the debtor's shoes). See also *In re Blixseth*, 484 B.R. 360, (9th Cir. BAP Nev. 2012), which noted that, although a charging is the only remedy of a creditor to satisfy a judgment, the bankruptcy trustee steps into the debtor's shoes and may exercise all rights that the debtor had immediately before bankruptcy.

Generally, single member LLCs are not protected from foreclosure and reverse piercing, because no co-owner needs to be protected from the member's debts[1130] (but be sure to have records sufficient to prove not owned solely by the person whose actions led to the reverse-piercing claim).[1131] Otherwise, one can create something better than a self-settled spendthrift trust. However, Wyoming[1132] and Nevada[1133] provide such protection (which protection might be limited to cases outside a bankruptcy setting).[1134] Another practitioner suggests having the managing member be an irrevocable grantor trust the client sets up for his children, with the client being the trustee and with the passive member being the client's revocable trust. Although this other strategy might help for asset protection, consider whether the client wants to be accountable to his children for how he manages the LLC on behalf of the trust. Sometimes lenders insist on placing collateral in a bankruptcy-remote LLC - an LLC that is treated as a

[1130] See, e.g., *Olmstead vs. The Federal Trade Commission*, Supreme Court of Florida, 2010 WL 2158106 (June 24, 2010) (www.floridasupremecourt.org/decisions/2010/sc08-1009.pdf), followed by the 11th Cir. even though the FTC argued that the Supreme Court of Florida was wrong; *In re Modanlo*, 412 B.R. 715, 727 (Bankr. D. Md. 2006); *In re Albright*, 291 B.R. 538, 540 (D. Colo. 2003). In an unpublished opinion, the Montana Supreme Court upheld a trial court's imposition of a charging order, appointment of a receiver, and dissolution of an LLC that appeared to have been owned solely by the judgment debtor. *Jonas v. Jonas*, 2010 MT 240N, Supreme Court case number DA 10-0137 (11/9/2010). The IRS can presumptively obtain a lien on the assets of a single member LLC (disregarded for tax purposes) when the member owes taxes. *Little Italy Oceanside Investments, LLC v. U.S.*, Case No. 14-cv-10217 (E.D. Mich. 8/14/2015). The case did not seem to turn on the LLC having only one member; rather, the LLC failed to contest the lien on its property before the property was sold, and the LLC did not have any remedies against the IRS after the property was sold when the IRS provided evidence that it timely mailed a notice of lien to the taxpayer. See also *Politte v. U.S.*, 104 A.F.T.R.2d 2009-6229 (S.D. Cal. 2009) (collecting from shareholders money the company loaned to them when the company owed the IRS), upheld through various procedural moves, ultimately by an unpublished opinion, 115 A.F.T.R.2d 2015-874 (9th Cir. 2015).
Furthermore, when a married couple, in the aggregate, owned all of an LLC and the couple filed for bankruptcy in a single consolidated case, the court allowed the bankruptcy trustee to take over the LLC. *In re First Protection, Inc.*, 2010 WL 5059589 (9th Cir. BAP Ariz. 11/22/2010).

[1131] See *Sky Cable, LLC v. Coley*, Civ. Action No. 5:11cv00048, 2016 WL 3926492 (W.D. Va. 7/18/2016), applying Delaware law, all according to a summary prepared by Prof. Elizabeth S. Miller for an 4/7/2017 ABA Business Law Section meeting.

[1132] Wyo. Stat. § 17-29-503(g), provides:

> This section provides the exclusive remedy by which a person seeking to enforce a judgment against a judgment debtor, including any judgment debtor who may be the sole member, dissociated member or transferee, may, in the capacity of the judgment creditor, satisfy the judgment from the judgment debtor's transferable interest or from the assets of the limited liability company. Other remedies, including foreclosure on the judgment debtor's limited liability interest and a court order for directions, accounts and inquiries that the judgment debtor might have made are not available to the judgment creditor attempting to satisfy a judgment out of the judgment debtor's interest in the limited liability company and may not be ordered by the court.

[1133] NRS § 86.401.2(a) states that a charging order:

> Provides the exclusive remedy by which a judgment creditor of a member or an assignee of a member may satisfy a judgment out of the member's interest of the judgment debtor, whether the limited-liability company has one member or more than one member. No other remedy, including, without limitation, foreclosure on the member's interest or a court order for directions, accounts and inquiries that the debtor or member might have made, is available to the judgment creditor attempting to satisfy the judgment out of the judgment debtor's interest in the limited-liability company, and no other remedy may be ordered by a court.

[1134] See fn. 1129.

disregarded entity but in which the lender has certain protections through an entity that is a member without an economic interest.[1135]

Even if a creditor can foreclose on a single member LLC, the creditor might prefer to impose a charging order, so that the debtor can run its business and continue to generate cash flow to repay the creditor, without the creditor expending any effort. If the LLC's only income is from the debtor's services and the LLC distributes all of its net income, one court held that the charging order of the creditor (the U.S. government) was limited to the 25% statutory maximum for garnishing earnings under applicable state law.[1136]

To maximize asset protection planning, when drafting LLC operating agreements consider limiting any fiduciary duties a manager of an insolvent LLC might owe a lender.[1137]

1135 See fn. 369 and the accompanying text.

1136 *U.S. v. Alexander*, 2016 WL 2893406 (D. Ariz. 5/18/2016), holding:

> The United States is entitled to a charging order against Defendant's member interest in E-Logic. "The United States may enforce a judgment imposing a fine in accordance with the practices and procedures for the enforcement of a civil judgment under Federal law or State law." 18 U.S.C. § 3613(a); see also *United States v. Berger*, 574 F.3d 1202, 1204 (9th Cir. 2009). Under Arizona law, a court of competent jurisdiction "may charge the member's interest in the limited liability company with payment of the unsatisfied amount of the judgment plus interest." A.R.S. § 29-655(A). In such a case, "the judgment creditor has only the rights of an assignee of the member's interest." *Id.* An assignee of a member's interest is not entitled to participate in the LLC's management. A.R.S. § 29-732(A). Instead, an assignee "is only entitled to receive, to the extent assigned, the share of distributions, including distributions representing the return of contributions, and the allocation of profits and losses, to which the assignor would otherwise be entitled with respect to the assigned interest." *Id.* A charging order is the exclusive remedy by which a judgment creditor may satisfy a judgment out of a member's interest in a limited liability company. A.R.S. § 29-655(C). Here, Defendant is the sole member of E-Logic, LLC. The United States may charge Defendant's interest in E-Logic for Defendant's unpaid restitution plus interest. The United States, however, is not entitled to participate in E-Logic's management. Instead, the United States is only entitled to Defendant's share of ELogic's distributions.
>
> But the charging order is limited to the garnishment permitted by Arizona law. The fact that a charging order is entered, however, "does not deprive any member of the benefit of any exemption laws applicable to his interest in the limited liability company." A.R.S. § 29-655(B). Arizona law limits garnishment to 25 percent of a garnishee's disposable earnings. A.R.S. § 33-1131(B). "Earnings" are defined broadly to include "compensation paid or payable for personal services, whether these payments are called wages, salary, commission, bonus or otherwise." A.R.S. § 12-1598(4). "Disposable earnings" is defined as the "amount remaining from the gross earnings for a pay period after the deductions required by state and federal law." A.R.S. § 12-1598(3). As the sole member of E-Logic, Defendant receives distributions equivalent to the LLC's annual income. These are provided as compensation for his personal services to E-Logic. These distributions qualify as earnings and are protected by the personal property exemption. The charging order therefore cannot deprive Defendant of more than 25 percent of his disposable earnings. [footnote omitted]

1137 Maloney and Carter, "Asserting Breach-of-fiduciary-duty Claims In the Context of Delaware LLCs," p. 36 of *ABI Journal* (September 2009). *CML V, LLC v. Bax*, C.A. No. 5373-VCL (Del. Ch. 11/3/2010) held that, absent a contractual agreement with the creditor or in the LLC's operating agreement, the members and managers of a Delaware LLC owed no fiduciary duties to creditors. Generally, managers of financially troubled Missouri limited liability companies do not owe a fiduciary duty to creditors of their troubled enterprises. See http://www.thompsoncoburn.com/insights/blogs/credit-report/post/2016-12-07/managers-of-insolvent-missouri-llcs-have-no-fiduciary-duty-to-creditors, discussing *Imperial Zinc Corp. v. Engineered Products Industries, L.L.C.*, No. 4:14-CV-1015-AGF, 2016 WL 812695 (E.D. Mo.

If the entity is already a corporation, consider an F reorganization to convert the corporation into a partnership or LLC taxed as a corporation; see part II.P.3.h. Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization. If any such conversion causes transitory ownership, see part II.A.2.j.ii Disregarding Transitory Owners.

Note that some corporate statutes provide some protection against transfers to creditors, such as close corporation statutes, that allow a corporation to be managed largely like a partnership or LLC.[1138] It might be possible to convert a regular corporation into a close corporation without creating a new entity. That can help an ongoing business but does not provide the protection of the dissolution without a merger following the sale of the business assets.

II.F.2. Asset Protection Benefits of Dissolving the Business Entity After Asset Sale

Subject to tax issues triggered on dissolution of an entity, consider the following approach when the corporation has sold all of its business assets:

Form a single member LLC owned by the corporation, transfer all of corporation's assets into the LLC, dissolve and liquidate the corporation (distributing the LLC to the shareholders), and have the LLC elect (as of the date of liquidation) the same corporate status the corporation had. The corporation's dissolution will start the statute of limitations for making claims relating to the corporation's business (or other) operations; thus, the sale proceeds will be subjected to claims for only a limited time period.

Even if the buyer assumes the business' liabilities and agrees to indemnify the corporation, the corporation is relying on the buyer to always be able to satisfy its indemnification obligation; the suggested dissolution approach removes that risk once the dissolution statute of limitations has passed. Contrast that to a merger, in which the claims are never cut off, because the old entity is deemed for state law purposes merely to continue in a new form.

II.F.3. Limited Partnerships and LLCs as Control Vehicles

In a limited partnership, the general partner runs the entity, and the limited partners have no rights to vote, except perhaps on major structural decisions such as liquidation. Giving an interest as a limited partner is a way of transferring property without transferring control of that property.

Similarly, LLC operating agreements can provide for members with or without voting rights.

These can provide the asset protection benefits mentioned above, as well as preventing the limited partner or nonvoting member from having undesirable control. When a trust distributes outright to a beneficiary who the trustee deems not ready to receive large liquid sums, the

---

Mar. 2, 2016); *Imperial Zinc Corp. v. Engineered Products Industries, L.L.C.*, No. 4:16-CV-551-RWS, 2016 WL 6611129 (E.D. Mo. Nov. 9, 2016).

[1138] See fn. 3328 for a discussion of changing the normal rules for corporate governance that might also help with control issues, including links to a survey of all states. My understanding is that Nevada has enacted some sort of charging order protection for corporations with up to 75 shareholders. See, *e.g.*, Missouri's close corporation statutes, at RSMo § 351.750 et seq. Chapter 351 is at www.moga.mo.gov/STATUTES/C351.HTM. RSMo § 351.770.2(1) (www.moga.mo.gov/statutes/C300-399/3510000770.HTM) might block a creditor that is not an eligible shareholder of an S corporation from acquiring shares in an S corporation, although perhaps the creditor could assign its claim to an eligible shareholder.

trustee might consider forming a limited partnership or LLC and distributing limited partner or nonvoting member interests to the beneficiary. Before doing that, however, the trustee should consider that the beneficiaries might very well contest that action.[1139]

II.F.4. Taxing Authorities Piercing Corporate Veil

A partner who has control over payroll tax withholdings generally is personally liable for paying those to the taxing authority. New York makes any member or partner responsible for unpaid sales tax, even if the partner does not have any control over the collection and remittance of that tax;[1140] the statute providing that result does not impose liability on a shareholder who has no control over business.[1141]

U.S. v. Lothringer, 128 A.F.T.R.2d 2021-6305 (5th Cir. 10/08/2021), affirmed a District Court's piercing the corporate veil:

> The district court applied Texas law and concluded there was no genuine issue of material fact and that the totality of the circumstances established "such unity between [Pick-Ups] and [Lothringer] that the separateness of the corporation...ceased and holding only the corporation liable would result in injustice." *Castleberry*, 721 S.W.2d at 272. The court relied on a slew of undisputed facts, including that Lothringer was the sole shareholder, officer, director and owner of Pick-Ups; exercised complete dominion and control over Pick-Ups; failed to observe certain corporate formalities; loaned substantial money to Pick-Ups; and made payments from the corporate bank account to service personal loans.

II.F.5. Tax Liens

See part III.B.5.e.iv Federal Estate Tax Liens, including reference to an article about the effect of a beneficiary's tax liens on a trust,[1142] as well as rules piercing tenancy by the entirety and community property.[1143]

[1139] *Schumacher v. Schumacher*, 303 S.W.3d 170 (Mo. App. W.D. 2010), holding that the forming the entity was not a per se violation of fiduciary duties and the trustees could present defenses. Based on my search done 1/1/2011, it appears that the trustees lost on remand and are appealing again, which is docketed as WD73012.

[1140] Banoff and Lipton, "Personal Liability of LLC Members and Limited Partners for New York Sales/Use Tax," in their "Shop Talk" column, *Journal of Taxation* (WG&L) (Feb. 2015). The case they described was affirmed; see *In the Matter of the Petitions of Eugene Boissiere and Jason Krystal*, 2015 WL 4713238 (N.Y. Tax. App. Trib.). Thank you to Allan G. Donn of Willcox & Savage, P.C. for bringing this to my attention.

[1141] The *Boissiere/Krystal* case cited in fn. 1140 quoted the relevant statute:

> "also include[s] any officer, director or employee of a corporation ..., any employee of a partnership, any employee or manager of a limited liability company ... who as such officer, director, employee or manager is under a duty to act for such corporation, partnership, limited liability company ... in complying with any requirement of this article; *and any member of a partnership or limited liability company*" (emphasis added).

[1142] See fn. 7207.

[1143] See part II.F.7 Tenancy by the Entirety.

II.F.6. Asset Protection for IRAs

Although IRAs enjoy certain protection from creditors (particularly in the bankruptcy arena), note that they can lose that protection by directly or indirectly engaging in transactions that cause them to lose their status as IRAs.[1144]

II.F.7. Tenancy by the Entirety

"Tenancy by the Entirety" is ownership by both spouses in which neither spouse can convey an interest in the property alone. Whether that type of ownership can exist and what property is eligible for that type of ownership vary from state to state.

Generally, federal tax refunds are owned as tenants in common. *In re: Somerset Regional Water Resources, LLC*, 949 F.3d 837 (3rd Cir. 2020), held:[1145]

> **A. Federal tax refunds are separately owned if the income is separately owned**
>
> As we shall explain, a mixture of federal and state law governs ownership of federal tax refunds. We discuss each in turn.
>
> 1. *Federal tax law*. The Internal Revenue Code does not automatically treat refunds from joint marital returns as jointly owned. Rather, each spouse owns a portion of the refund separately, according to his or her share of the tax overpayment. See 26 U.S.C. § 6402(a) (2012) (authorizing the IRS to "credit the amount of [any] overpayment ... against any [tax] liability ... *on the part of the person who made the overpayment* and ... [to] refund any balance to such person" (emphasis added)). So the ownership of the spouses' income determines how they own a tax refund on that income. If the income is separate going in, then the refund is separate coming out. Merely filing a joint tax return does not change that.
>
> Our sister circuits concur. The Fifth Circuit, for instance, has held that if the income leading to a tax overpayment belongs to one spouse, then, even if the two file a joint tax return, the refund does not belong jointly to both spouses. *Ragan v. Comm'r*, 135 F.3d 329, 333 (5th Cir. 1998). As Judge Higginbotham explained for the court, "[a] joint income tax return does not create new property interests for the husband or wife in each other's income tax overpayment." *Id.* Because the income was the husband's alone under Texas law, the wife had no interest in the resulting refund. *Id.*
>
> Nor is the Fifth Circuit alone. In the words of the Ninth Circuit: "A joint return does not itself create equal property interests for each party in a refund. Spouses who file a joint return have separate interests in any overpayment, the interest of each depending upon his or her relative contribution to the overpaid tax." *United States v. Elam*, 112 F.3d 1036, 1038 (9th Cir. 1997). Thus, "fil[ing] a joint tax return ... does not change the underlying property interests at stake." *Id.*; see also *Callaway v. Comm'r*, 231 F.3d 106, 117 (2d Cir. 2000) ("[T]he filing of a joint return does not have the effect of converting the income of one spouse into the income of another." (citing *McClelland v. Massinga*, 786 F.2d 1205, 1210 (4th Cir. 1986)); *Gordon v. United States*,

---

[1144] See part II.G.22 IRA as Business Owner, especially fn. 1888.

[1145] This case involved tax refunds result from net operating loss carrybacks. See part II.G.4.l.ii Net Operating Loss Deduction, with this case cited in fns 1407-1408.

757 F.2d 1157, 1160 (11th Cir. 1985) ("Where spouses claim a refund under a joint return, the refund is divided between the spouses, with each receiving a percentage of the refund equivalent to his or her proportion of the withheld tax payments."); *cf.* Rev. Rul. 74-611, 1974-2 C.B. 399, 399 ("Court decisions have consistently held that a husband and wife who file a joint return do not have a joint interest in an overpayment; each has a separate interest.").

We now join our sister circuits in adopting this rule. Thus, when the Mostollers got their refund check, each spouse acquired a separate interest in it proportional to his or her contribution to the overpayments. If the income was jointly owned, then the Mostollers had a common interest in the refund. But if it was separately owned by Mr. Mostoller, then his wife had no interest in the refund when it arrived.

To figure out who owned what (and how), we turn to Pennsylvania law. See *United States v. Nat'l Bank of Commerce*, 472 U.S. 713, 722 (1985) ("[S]tate law controls in determining the nature of the legal interest which the taxpayer had in the property.... [F]ederal statute[s] create[] no property rights but merely attach[] consequences, federally defined, to rights created under state law." (internal quotation marks omitted)).

2. *State property law*. Under Pennsylvania law, Mr. Mostoller owned most of the spouses' income in 2013, 2014, and 2015, because he separately owned the main producer of that income: the Debtor. So he also owned most of the refund when it arrived.

In Pennsylvania, spouses ordinarily own property in one of three ways: separately, as tenants in common, or as tenants by the entirety. In the first, only one spouse owns the property; the other does not. The second means that each spouse possesses the property but has "separate and distinct" legal title to it. *In re Estate of Quick*, 905 A.2d 471, 474 (Pa. 2006). And the third gives each spouse a joint, singular interest in "'the whole or the entirety,' and not a 'share, moiety or divisible part' " of the property. *Clientron Corp.*, 894 F.3d at 579 (quoting *In re Brannon*, 476 F.3d 170, 173 (3d Cir. 2007)). Creditors of one spouse can attach separate or common interests of that spouse, but they cannot attach jointly held entirety interests without the other spouse's consent. See *id.* At 575. To win, the Mostollers must show that they owned their income as tenants by the entirety.

For a tenancy by the entirety, Pennsylvania requires the traditional common-law elements: a marriage, plus the "four unities" of time, title, possession, and interest. *In re Estate of Quick*, 905 A.2d at 474. To satisfy those unities, the spouses must (1) have their interests "vest at the same time," (2) "obtain[] their title by the same instrument," (3) have "an undivided interest in the whole," and (4) own interests "of the same type, duration and amount." *In re Estate of Rivera*, 194 A.3d 579, 586-87 (Pa. Super. Ct. 2018) (quoting *Fenderson v. Fenderson*, 685 A.2d 600, 607 (Pa. Super. Ct. 1996)).

Here, none of the unities was present. Because Mr. Mostoller was the Debtor's sole owner, he alone had legal title to, possession of, and an interest in its income when it accrued. Thus, he owned that income as separate property. As the Mostollers had no other significant source of income, the Debtor accounted for the lion's share of their taxable income from 2013 to 2015. So under federal tax law, Mr. Mostoller owned most of the refund separately.

B. The Mostollers never merged their separate interests into entireties interests

After spouses get a refund, they can change their ownership of that money under state property law. For instance, spouses can merge their separate interests into entireties interests over time, as long as they satisfy the four unities needed for a tenancy by the entirety. *Cf. In re Estate of Brose*, 206 A.2d 301, 304 (Pa. 1965). But when the IRS issued the Mostollers' refund check, Mr. Mostoller owned almost all of it separately through his sole ownership of the Debtor's income, even though the check was made out to both spouses. While the unities of time and title were satisfied by then, the unities of possession and interest were still missing. See *In re Estate of Rivera*, 194 A.3d at 586. And the Mostollers could not have merged their interests: their accountant immediately deposited the refund check with the bankruptcy court before they could commingle the proceeds.

Because their interests both started and remained separate, Mr. Mostoller validly pledged his share on his own.

II.G. Income Tax Operating Issues

The IRS portal, "Tax Information For Businesses," was found at https://www.irs.gov/Businesses on April 6, 2016.

Part II.Q.1 General Principles of Exiting from or Dividing a Business illustrates that selling the goodwill component of a business is much more tax efficient by a partnership than by a corporation and that an S corporation is more efficient that a C corporation. Estate planning considerations tend to generate a similar conclusion. However, current taxation of undistributed income from business operations tends to work in the reverse. A high income, passive investor in a partnership or S corporation might be subject to a higher short-term tax rate than a shareholder in a C corporation; see part II.I 3.8% Tax on Excess Net Investment Income. Also, a general partner (or LLC equivalent) faces additional FICA tax on undistributed business income, an issue that does not apply to a shareholder of an S or C corporation; see part II.L Self-Employment Tax (FICA) for a discussion of this issue and how to plan around it.

II.G.1. How and When to Obtain or Change an Employer Identification Number (EIN)

IRS EIN resources include:

- https://www.irs.gov/businesses/small-businesses-self-employed/employer-id-numbers-eins (general EIN webpage)
- https://www.irs.gov/businesses/small-businesses-self-employed/do-you-need-a-new-ein (whether to get a new tax ID)
- https://www.irs.gov/pub/irs-pdf/p1635.pdf (summary of whether to get a new tax ID and an explanation of various terms used and requirements for completing Form SS-4).

Generally, go to Code § 6109 and start with Reg. § 301.6109-1. See also parts:

- II.A.2.g Qualified Subchapter S Subsidiary (QSub), especially text accompanying fns. 180-191

- II.P.3 Conversions, the introduction to which reproduces Reg. § 301.6109-1(h), “Special rules for certain entities under § 301.7701-3.”

- II.P.3.h Change of State Law Entity without Changing Corporate Tax Attributes – Code § 368(a)(1)(F) Reorganization, especially fns 4078-4080.

- III.B.2.e.i Grantor Trust Treatment During the Grantor’s Life

- III.B.2.e.ii Tax ID Issues When the Deemed Owner of a Grantor Trust Dies

I am uncertain about the effect of decanting[1146] on a tax ID.[1147]

II.G.2. IRS Resources

II.G.2.a. Applicable Federal Rate (AFR)

See http://apps.irs.gov/app/picklist/list/federalRates.html for the current month’s rates and a complete history from January 2000.

II.G.2.b. Internal Revenue Manual

See http://www.irs.gov/irm/index.html.

II.G.2.c. IRS Audit Techniques Guides (ATGs)

See https://www.irs.gov/businesses/small-businesses-self-employed/audit-techniques-guides-atgs, explaining industry-specific examination techniques and common and unique industry issues, business practices and terminology, as well as providing guidance on the examination of income, interview techniques and evaluation of evidence.

II.G.2.d. IRS Valuation Resources; Tax Affecting Pass-Through Entities

See http://www.irs.gov/Businesses/Valuation-of-Assets.[1148]

Estate of Jones v. Commissioner, T.C. Memo. 2019-101, is the first case to accept tax-affecting, which in that case consisted of the following, with respect to a partnership:

> In his DCF method Mr. Reilly[1149] “tax-affected” SJTC’s earnings. To do this he used 38% as a proxy for the combined Federal and State tax burdens that owners of SJTC would bear (treating SJTC in effect as a taxable C corporation, albeit at an individual, not corporate, tax rate), and adjusted both the earnings he used to calculate SJTC’s net cashflow and the cost of debt capital he used to determine the appropriate

---

1146 See part II.J.4.i Modifying Trust to Make More Income Tax Efficient.
1147 See also part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting.
1148 Critiques include Grossman, “Dissecting the IRS Job Aid On S corporation Tax-Affecting,” *Valuation Strategies* (WG&L) (Sept./Oct. 2015).
1149 [My footnote:] the court referred to Richard Reilly, but the appraiser was Robert Reilly of Willamette Management Associates (“WMA”). In the Leimberg Webinar Services program, “Understanding “Tax-Affecting” and Other Critical Valuation Issues Impacting Pass-Through Entities after Estate of Aaron Jones v Commissioner” (9/26/2019), I discuss the case with WMA representatives; to access this webinar (for a fee) before or after that date, go to https://leimbergservices.com/wdev/register.cfm?id=332.

> discount rate. He then computed the benefit of the dividend tax avoided by estimating the implied benefit for SJTC's partners in prior years and considering an empirical study analyzing S corporation acquisitions cited in his report. In his guideline publicly traded companies valuation, he used the tax-affected earnings as well, although the metrics he used to compare the companies to SJTC were pretax. Finally, he applied a 22% premium to SJTC's weighted business enterprise value (that is, his weighted DCF method and guideline publicly traded companies method valuations) to reflect that benefit.

The court reasoned:

> In effect, both parties argue that a hypothetical buyer and seller would take into account SJTC's business form when determining the fair market value of a limited partner interest; they just disagree about how to do this. As we did in *Gross v. Commissioner*, T.C. Memo. 1999-254, 1999 WL 549463, *aff'd*, 272 F.3d 333 (6th Cir. 2001), and subsequent cases, we decide this question of fact on the basis of the record before us.
>
> While respondent objects vociferously in his brief to petitioner's tax-affecting, his experts are notably silent. The only mention comes in Mr. Schwab's rebuttal report, in which he argues that Mr. Reilly's tax-affecting was improper, not because SJTC pays no entity level tax, but because SJTC is a natural resources holding company and therefore its "rate of return is closer to the property rates of return". They do not offer any defense of respondent's proposed zero tax rate. Thus, we do not have a fight between valuation experts but a fight between lawyers. We do not find respondent's arguments against Mr. Reilly's methodology convincing. While respondent correctly points out that we rejected the proffered tax-affecting in *Gross* and later cases, he misconstrues our rationale. In *Gross v. Commissioner*, 1999 WL 549463, at *10, we concluded that "the principal benefit that shareholders expect from an S corporation election is a reduction in the total tax burden imposed on the enterprise. The owners expect to save money, and we see no reason why that savings ought to be ignored as a matter of course in valuing the S corporation." We then concluded that, on the record in that case, a zero-percent corporate tax rate properly reflected those tax savings, rejecting the expert's offered justifications.[5] More recently, in *Estate of Gallagher v. Commissioner*, T.C. Memo. 2011-148, 2011 WL 2559847, at *12, supplemented by T.C. Memo. 2011-244, we again rejected tax-affecting because the taxpayer's expert did not justify it but again acknowledged that the benefit of a reduction in the total tax burden borne by S corporation owners should be considered when valuing an S corporation. And in *Estate of Giustina v. Commissioner*, 2011 WL 2516168, at *6, we rejected tax-affecting in the valuation of a partnership because we found the taxpayer's expert's method to be faulty: He used a pretax discount rate to present value post tax cashflow. The question in those cases, as here, was not whether to take into account the tax benefits inuring to a flowthrough entity but how.
>
> [5] Indeed in discussing the analysis by the Commissioner's expert in *Gross* we noted the importance of treating both cashflows and the discount rate consistently, as Mr. Reilly did here. *Gross v. Commissioner*, T.C. Memo. 1999- 254, 1999 WL 549463, at *10-*11, *aff'd*, 272 F.3d 333 (6th Cir. 2001). In *Gross* the expert applied a hypothetical 40% corporate tax rate to earnings but did not apply any premium to reflect the benefit of avoided dividend tax. Thus the Court was presented with a choice between a 40% or a 0% corporate tax rate. *Id.* That is not the choice before us here.

> We find on the record before us that Mr. Reilly has more accurately taken into account the tax consequences of SJTC's flowthrough status for purposes of estimating what a willing buyer and willing seller might conclude regarding its value. His adjustments include a reduction in the total tax burden by imputing the burden of the current tax that an owner might owe on the entity's earnings and the benefit of a future dividend tax avoided that an owner might enjoy. We are mindful that the science of valuing closely held companies usually results in a "gross terminal logical inexactitude" in the words of Winston Churchill. *E.g.*, *Maris v. Commissioner*, T.C. Memo. 1980-444. And as we admonished in *Buffalo Tool & Die Mfg. Co. v. Commissioner*, 74 T.C. at 452, "in the final analysis, the Court may find the evidence of valuation by one of the parties sufficiently more convincing than that of the other party, so that the final result will produce a significant financial defeat for one or the other, rather than a middle-of-the-road compromise which we suspect each of the parties expects the Court to reach." Mr. Reilly's tax-affecting may not be exact, but it is more complete and more convincing than respondent's zero tax rate.

II.G.2.e. IRS Practice Units

https://www.irs.gov/businesses/corporations/practice-units explains:

> As part of LB&I's knowledge management efforts, Practice Units are developed through internal collaboration and serve as both job aids and training materials on tax issues. For example, Practice Units provide IRS staff with explanations of general tax concepts as well as information about a specific type of transaction. Practice Units will continue to evolve as the compliance environment changes and new insights and experiences are contributed. Please visit this site periodically for new and updated Practice Units which are shared below….
>
> NOTE: Practice Units are not official pronouncements of law or directives and cannot be used, cited or relied upon as such. Practice Units provide a general discussion of a concept, process or transaction and are a means for collaborating and sharing knowledge among IRS employees. Practice Units may not contain a comprehensive discussion of all pertinent issues, law or the IRS's interpretation of current law. Practice Units do not limit an IRS examiner's ability to use other approaches when examining issues. Practice Units and any non-precedential material (e.g., a private letter ruling, determination letter, or Chief Counsel advice) that may be referenced in a Practice Unit may not be used or cited as precedent. References to third party service providers and documents, like news or journal articles, are for informational purposes only and do not constitute an endorsement of any vendor, document, or the services or views offered by such third party.

On 5/22/2022, I noted some Practice Units available in links at that web page:

• 12-14-2021	Interest on Deferred Tax Liability
• 06-10-2021	Partner's Outside Basis

• 04-02-2021	Liquidating Distributions of a Partner's Interest in a Partnership
• 04-02-2021	Reasonable Cause and Good Faith
• 03-12-2021	Sale of a Partnership Interest
• 12-18-2020	Determining Liability Allocations
• 12-18-2020	Recourse vs. Nonrecourse Liabilities

You might review those practice units in light of parts II.Q.8 Exiting From or Dividing a Partnership (and you will especially want to review the subparts in the FULL TABLE OF CONTENTS for what maps to which Practice Unit) and II.C.3 Allocating Liabilities (Including Debt).

In 2020 the IRS issued a few Practice Units on S corps that used to be C corporations, which Practice Units are already in part II.Q.7.b.i Redemptions or Distributions Involving S corporations - Generally.

IRS also has dedicated pages, which are helpful for all levels of experience, under Business Structures - https://www.irs.gov/businesses/small-businesses-self-employed/business-structures, which includes links to:

- Tax Information For Partnerships - https://www.irs.gov/businesses/partnerships
- S Corporations - https://www.irs.gov/businesses/small-businesses-self-employed/s-corporations
- The links to corporations and LLCs don't say much.

II.G.3. State Income Taxation

Generally, an owner of an interest in a pass-through entity such as an S corporation or partnership (including an LLC) will report income taxable to the states in which the entity does business, or the entity will pay tax on the income taxable to one or more of its owners instead of its owners reporting that income. Of course, if the entity is a C corporation, it pays tax on its own income, and only the gain on sale of the S corporation stock may be taxable to the owner, but only in the jurisdiction in which the owner is a resident. In any event, states that tax income have various methods to apportion a business' income, which tend to consider one or more of sales, property, or wages within the taxing state. Because states may use different methods to apportion income, these different methods may lead to double (or worse) taxation. To avoid unfair duplication, consider how the Multistate Tax Commission can help.[1150] Also note that each owner needs to file state income tax returns (or the pass-through entity needs to pay tax on that owner's behalf, generally at the highest marginal state income tax rate that would apply to that income); whereas, with a C corporation, only the corporation needs to file.

For various permutations of income taxation when businesses are sold, see parts II.Q.1.a Contrasting Ordinary Income and Capital Gain Scenarios on Value in Excess of Basis, II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold, and II.Q.9 Trust Selling a Business. Also consider part II.H.8.a.ii State Income Tax Disconnect, found within part II.H.8.a Depreciable Real Estate in an S Corporation – Possible Way to Replicate Effect of Basis Step-Up If the Stars Align Correctly.

An additional consideration is that the Code § 199A deduction[1151] is available in only a few states. See part II.E.1.c.i.(c) Effect (if any) of Code § 199A on State Income Taxation.

Illinois imposes an income tax, called the "replacement tax," on partnerships, S corporations and C corporations.[1152] LLCs that are treated as disregarded entities do not appear to be subject to this tax.[1153]

For the leading U.S. Supreme Court case and other issues relating to state fiduciary income taxation, see part II.J.3.e.ii When a State Can or Does Tax a Trust's Income. State income law that is broader than fiduciary income tax principles in in part II.J.3.e.ii.(f) Business Income; *Fielding* (MN 2018); *Metropoulos* (CA 2022).

States impose franchise tax and other taxes, some of which vary according to the type of entity. This includes differences between general partnerships, limited partnerships, and LLCs.[1154]

[1150] From http://www.mtc.gov/The-Commission:

> The Multistate Tax Commission is an intergovernmental state tax agency working on behalf of states and taxpayers to facilitate the equitable and efficient administration of state tax laws that apply to multistate and multinational enterprises. Created by the Multistate Tax Compact, the Commission is charged by this law with:
>
> - Facilitating the proper determination of State and local tax liability of multistate taxpayers, including the equitable apportionment of tax bases and settlement of apportionment disputes;
> - Promoting uniformity or compatibility in significant components of tax systems;
> - Facilitating taxpayer convenience and compliance in the filing of tax returns and in other phases of tax administration;
> - Avoiding duplicative taxation.

[1151] See generally part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income.

[1152] 35 ILCS 5/201(c).

[1153] Illinois taxes LLCs as corporations or partnerships if they are classified as such for federal income tax purposes. 35 ILCS 5/1501(a)(4), (16); IL Admin. Code § 100.9750(b), (d)(1). IL Admin. Code § 100.9750(b)(1)(A) provides that a corporation and its federally disregarded subsidiary are taxed as a single corporation.

[1154] See, *e.g.*, Ely, Thistle, and Rhyne, "State Tax Treatment of LLCs and LLPs: Update for 2014," *Journal of Multistate Taxation and Incentives* (5/2014). Other resources include not only various state tax treatises, such as Hellerstein & Hellerstein, *State Taxation*, and Fenwick, McLoughlin, Salmon, Smith, Tilley, Wood, *State Taxation of Pass-Through Entities and Their Owners*, but also magazines, such the *Journal of Business Entities*. Before starting new operations, one might explore state and local tax incentives.

Also, *South Dakota v. Wayfair, Inc.*, 585 U.S. ___ (2018), was a key decision regarding taxing nexus in the context of state sales tax. The Council on State Taxation, https://cost.org, tracks not only the implications of that case but also which elements of federal law are integrated into state income taxation of C corporations and pass-through entities.

II.G.4. Limitations on Losses and Deductions; Loans Made or Guaranteed by an Owner

As described further below in this part II.G.4 Limitations on Losses and Deductions; Loans Made or Guaranteed by an Owner, a loan to an S corporation or a partnership or a guarantee of a third party loan to a partnership can generate current deductions of losses that the loan finances, whereas a loan to a C corporation or a loan guarantee to an S or C corporation does not. Losses financed by even third-party loans remain subject to parts II.G.4.c Basis Limitations for Deducting Partnership and S Corporation Losses (including parts II.G.4.d Basis Limitation for Shareholders in an S Corporation and II.G.4.e Basis Limitations for Partners in a Partnership, the latter being complicated by part II.C.3 Allocating Liabilities (Including Debt)), II.G.4.j At Risk Rules (Including Some Related Discussion of Code § 752 Allocation of Liabilities), and II.G.4.l.ii Net Operating Loss Deduction.

Furthermore, a worthless loan to a C corporation is difficult to deduct and might or might not qualify for ordinary loss treatment, and such a deduction might be subject to a 7-year statute of limitations rather than a 3-year statute of limitations (as would a deduction for worthless stock).

II.G.4.a. Loans to Businesses or Business Associates

Loans are important in business planning and estate planning, and these topics overlap.

In estate planning, they can fund the sale of a business to a family trust (part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust) or otherwise help family members pursue business opportunities (part III.B.1.a Business Opportunities).

The grantor may lend the money directly (part III.B.1.a.i Loans) or extend credit by guaranteeing a loan made by a third party (part III.B.1.a.ii Loan Guarantees).

This part II.G.4.a includes parts:

- II.G.4.a.i Loans to Businesses – Whether AFR Is Required
- II.G.4.a.ii Bad Debt Loss – Must be Bona Fide Debt
- II.G.4.a.iii Character of Bad Debt
- II.G.4.a.iv Extension of Statute of Limitations for Deduction for Bad Debt or Worthless Securities
- II.G.4.a.v Tax Effect of Loan to S Corporation or Partnership

A business' capital structure often includes components of debt and equity. Protection from creditors may play a role, in that an entity must pay its debts before providing an equity return to its owners, and a debt owed a shareholder may compete with the claims of unsecured creditors (for example, those suing the business for torts), whereas any equity return is clearly subordinate to paying unsecured creditors. A parent may want to help an entrepreneurial child and get repaid with interest but want that child to benefit from equity returns. An equity investor may get benefits such as tax credits and depreciation deductions, as well as receive capital gain treatment on the investor's return, whereas a commercial lender wants to lock down cash returns. Given possibly high tax benefits, Congress has limited interest deductions and the IRS has challenged taxpayers' characterization; see part II.G.20 Debt vs. Equity; Potential Denial of Deduction for Business Interest Expense, including parts:

- II.G.20.a Code § 163(j) Limitation on Deducting Business Interest Expense
- II.G.20.b When Debt Is Recharacterized as Equity
- II.G.20.c Changing from LIBOR or Other Interbank Offered Rates

II.G.4.a.i. Loans to Businesses – Whether AFR Is Required

Generally, loans between corporations and shareholders are subject to the Code § 7872 rules governing below-market loans.[1155]

However, loans between partners and partnerships are subject to those rules only if one of the principal purposes of the interest arrangements of which is the avoidance of any Federal tax.[1156]

II.G.4.a.ii. Bad Debt Loss – Must be Bona Fide Debt

Only a bona fide debt qualifies for purposes of Code § 166.[1157] The debt must arise from "a debtor-creditor relationship based upon a valid and enforceable obligation to pay a fixed or determinable sum of money."[1158] *Rutter v. Commissioner*, T.C. Memo. 2017-174, elaborated:

> A bona fide debt is a debt that arises from "a debtor-creditor relationship based upon a valid and enforceable obligation to pay a fixed or determinable sum of money." *Kean v. Commissioner*, 91 T.C. 575, 594 (1988); sec. 1.166-1(c), Income Tax Regs. A gift or contribution to capital is not considered a "debt" for purposes of section 166. *Kean*, 91 T.C. at 594. Whether a purported loan is a bona fide debt for tax purposes is determined from the facts and circumstances of each case. See *A.R. Lantz Co. v. United States*, 424 F.2d 1330, 1333 (9th Cir. 1970); *Gross v. Commissioner*, 401 F.2d 600, 603 (9th Cir. 1968), *aff'g* T.C. Memo. 1967-31; *Dixie Dairies Corp. v. Commissioner*, 74 T.C. 476, 493 (1980).

1155 Code § 7872(c)(1)(C).

1156 Whitmire, Nelson, McKee, et al, "¶3.08. Partner and Member Loans," *Structuring & Drafting Partnership Agreements: Including LLC Agreements*, conclude:

> If no interest is charged on partner-to-partnership loans, or if interest is charged at less than the applicable "federal rate," interest may be imputed under § 7872 if (1) the loan is determined to be a "tax avoidance loan" under § 7872(c)(1)(D) or (2) the loan is an "other below-market loan" described in regulations promulgated under § 7872(c)(1)(E). At present, no regulations have been proposed that would generally treat garden-variety partner-to-partnership loans as below-market loans or tax-avoidance loans.

Code § 2701 provides a backstop in a family partnership. See part III.B.7.c.i.(b) CCA 201442053 Discusses Profits Interest in a Partnership That Was a Straight-Up Partnership before the Transfer.

1157 Reg. § 1.166-1(c).

1158 Reg. § 1.166-1(c).

Rutter held that advances not documented with promissory notes were equity, not debt. See fn. 1839 in part II.G.20 Debt vs. Equity; Potential Denial of Deduction for Business Interest Expense. *Povolny Group, Inc. v. Commissioner*, T.C. Memo. 2018-37, elaborated:

> We note first that the purported loans had none of the standard indicia of debt: no formal loan documentation, no set maturity date, and no interest payments. See, *e.g.*, *Hardman v. United States*, 827 F.2d 1409, 1412 (9th Cir. 1987) (formal loan documentation tends to show bona fide debt); *Estate of Mixon v. United States*, 464 F.2d 394, 404 (5th Cir. 1972) (fixed maturity date is characteristic of debt); *Am. Offshore, Inc.*, 97 T.C. at 605 (lack of interest payments suggests equity). We recognize that "transactions between closely held corporations and their shareholders are often conducted in an informal manner." *Epps v. Commissioner*, T.C. Memo. 1995-297, 1995 WL 389638, at *4. But because of the amount of the purported loans at issue here - over $300,000 - the lack of any loan documentation whatsoever weighs against a finding of debt. See i*d*. (lack of formality weighs against debt finding where payment was $112,000). The only documents Povolny produced about the purported loans were printouts of QuickBooks entries. At trial Povolny discussed a two-page printout from Archetone Limited's QuickBooks labeled "A/R Archetone International" that lists the $241,000 in payments that Archetone Limited deducted as "bad debt." The $74,000 that PG paid and that Archetone Limited deducted that same year as "Loss on Archetone International Expenses Paid" appears in two separate entries from PG's QuickBooks: one entitled "Quarterly Distributions" and another called "Due from Related Parties Write off - Archetone." 9 But we don't just look at the label a corporation sticks on a transaction; we look for proof of its substance. See, *e.g.*, *Shedd*, 2000 WL 1337177, at *4. And there's none of that here - Povolny apparently didn't even give his CPA anything beyond such QuickBooks printouts. This strongly suggests that Povolny was simply trying to recast some of the investment in the failed Algerian hospital project as loans to recoup some of the loss. In other words, it wasn't bona fide debt.
>
> [9] This fact is also relevant to the PG-wage issue that we'll discuss in the next section- *i.e.*, whether PG's $74,000 in payments to Archetone International's and Archetone Limited's creditors were "loans" to those entities or compensation to Povolny. But there was another adjustment for those payments: Archetone Limited's $74,000 deduction - which flowed through to the Povolnys—was also disallowed by the Commissioner. There was some confusion at trial and in the briefs about this deduction. The Povolnys argued on brief that the $74,000 deduction was part of Archetone Limited's bad-debt deduction for 2011. So we've focused on that argument here. But even if it wasn't part of Archetone Limited's bad-debt deduction for 2011 - for example, if it was a current claimed business expense by Archetone Limited—the Commissioner says that that adjustment was still appropriate because Povolny "failed to provide documentation or explanation for Archetone Limited having a business purpose for paying Archetone International's expenses." Povolny didn't have anything to say about that at trial or on brief, so we deem that issue conceded. See Rule 34(b)(4); *McNeil v. Commissioner*, T.C. Memo. 2011-150, 2011 WL 2559802, at *1 n.3, *aff'd* 451 F.App'x 622 (8th Cir. 2012).
>
> Archetone International's lack of capital also suggests that what the Povolnys deducted weren't bona fide debts. A transferee's undercapitalization is strong evidence that the transfer is a capital contribution. *Am. Offshore, Inc.*, 97 T.C. at 604. Here, Archetone International had no capital at all - Povolny testified that it "had no funds or wasn't capitalized, so it basically was capitalized through the assets that Archetone, Limited

had." This complete lack of capitalization weighs heavily in favor of finding that the payments at issue were capital contributions and not bona fide debt.

Along the same lines, repayment dependent on earnings suggests that an advance is more likely to be equity. *Estate of Mixon*, 464 F.2d at 405; *Am. Offshore, Inc.*, 97 T.C. at 602; *Calumet Indus., Inc.*, 95 T.C. at 287-88; *Provost v. Commissioner*, T.C. Memo. 2000-177, 2000 WL 687889, at *5. And because Archetone International had no capital at the time of the purported loans, the only potential source of repayment was earnings on its single contract - the Algerian hospital. This, too, weighs against finding that a bona fide debt existed. The evidence we have, then, shows no formal signs that a debt existed, and the underlying economics of the situation strongly suggests that Povolny was once again just using one of his companies' funds to pay another of the companies' debts. We therefore find that Archetone Limited's advances to Archetone International did not create bona fide debt.

For this purpose, an accrual method taxpayer's account receivable is deemed to be an enforceable obligation to the extent that the income such debt represents has been included in the return of income for the year for which the deduction as a bad debt is claimed or for a prior taxable year.[1159] Conversely, worthless debts arising from unpaid wages, salaries, fees, rents, and similar items of taxable income are not deductible under Code § 166 unless the income such items represent has been included in the return of income for the year for which the deduction as a bad debt is claimed or for a prior taxable year.[1160]

A gift or contribution to capital is not a debt for purposes of Code § 166.[1161] See part II.G.20 Debt vs. Equity; Potential Denial of Deduction for Business Interest Expense. For example, in a Code § 166 case, *2590 Associates, LLC v. Commissioner*, T.C. Memo. 2019-3, cited 13 factors from *Estate of Mixon v. United States*, 464 F.2d 394, 402 (5th Cir. 1972),[1162] because the case was appealable to the Fifth Circuit, then commented:

[1159] Reg. § 1.166-1(c), which continues:

For example, a debt arising out of gambling receivables that are unenforceable under state or local law, which an accrual method taxpayer includes in income under section 61, is an enforceable obligation for purposes of this paragraph.

[1160] Reg. § 1.166-1(e).

[1161] Reg. § 1.166-1(c). *Rutter v. Commissioner*, T.C. Memo. 2017-174, elaborated:

Advances made by an investor to a closely held or controlled corporation may properly be characterized, not as a bona fide loan, but as a capital contribution. See *Fin Hay Realty Co. v. United States*, 398 F.2d 694, 697 (3d Cir. 1968); *Shaw v. Commissioner*, T.C. Memo. 2013-170, 106 T.C.M. (CCH) 54, 56, *aff'd*, 623 F. App'x 467 (9th Cir. 2015). In general, advances made to an insolvent debtor are not debts for tax purposes but are characterized as capital contributions or gifts. See *Dixie Dairies Corp.*, 74 T.C. at 497; *Davis v. Commissioner*, 69 T.C. 814, 835-836 (1978). For an advance to constitute a bona fide loan, the purported creditor must expect that the amount will be repaid. See *CMA Consol., Inc. v. Commissioner*, T.C. Memo. 2005-16, 89 T.C.M. (CCH) 701, 724.

Povolny Group, Inc. v. Commissioner, T.C. Memo. 2018-37, had a similar result, only the lender was a related corporation, so the payment to the related corporation was a dividend from the payor to the shareholder, followed by a contribution to capital from the shareholder to the recipient. (The case is also mentioned in fn. 1839 in part II.G.20.b When Debt Is Recharacterized as Equity.) For dividend treatment, see part II.Q.7.a.iv Dividends; Avoiding Dividend Treatment Using Redemptions under Code §§ 302 and 303.

[1162] *Mixon* is described in the text accompanying fn 1840 in part II.G.20.b When Debt Is Recharacterized as Equity.

> The factors are not of equal importance, and no single factor is determinative. See *Dillin v. United States*, 433 F.2d 1097, 1100 (5th Cir. 1970); *Segel v. Commissioner*, 89 T.C. 816, 827 (1987). Some factors may not be relevant in a given situation. *Estate of Mixon*, 464 F.2d at 402.
>
> The object of the inquiry is not to count the factors but to evaluate them. *Tyler v. Tomlinson*, 414 F.2d 844, 848 (5th Cir. 1969). The factors aid in our determination of whether the parties intended to create indebtedness with a reasonable expectation of repayment and whether that expectation comported with economic reality. See *Estate of Mixon*, 464 F.2d at 407. The Court of Appeals for the Fifth Circuit recognizes that the "real issue for tax purposes has long been held to be the extent to which the transaction complies with arm's length standards and normal business practice." *Id.* at 402-403. We apply special scrutiny to transactions between entities in the same corporate family or with shared ownership. See *Kean v. Commissioner*, 91 T.C. at 594; *Malone & Hyde, Inc. v. Commissioner*, 49 T.C. 575, 578 (1968); *Vinikoor v. Commissioner*, T.C. Memo. 1998-152.

2590 Associates criticized the IRS for not addressing the 13 factors from *Mixon* and found a bona fide debt when the loan was made and when the lender contributed it to a business in exchange for equity.[1163]

[1163] After reviewing the overall situation, the court held:

> Under the 13 factors considered by the Court of Appeals for the Fifth Circuit, we find that a bona fide debt existed between Perkins Rowe and 2590 Associates. Respondent did not address the 13 factors used by the Court of Appeals. 2590 Associates held a promissory note with a fixed maturity date and accrued interest at an above-market rate. The interest rate increased upon default, and the note provided for an award of attorney's fees for any collection actions. We find that at the time of the 2008 note's transfer, 2590 Associates intended to collect the debt from Perkins Rowe. Mr. Spinosa believed that Perkins Rowe would succeed and would repay the debt. 2590 Associates had the right to enforce payment. However, as the note was unsecured, collection attempts would have been futile. Mr. Spinosa credibly testified that he believed the Perkins Rowe development could be successful at the time Mr. Saban contributed the note to 2590 Associates and even after the foreclosure case's filing. Mr. Spinosa had extensive experience in real estate investments, and he was optimistic that Perkins Rowe would be successful despite the difficulties it encountered. The source of repayment was not limited to Perkins Rowe's income. There is no evidence of a thin capitalization. In fact, the 2008 appraisal performed for KeyBank indicated that there was substantial equity in Perkins Rowe. The 2008 note was not given to acquire capital assets. Each of these factors weighs in favor of the existence of a bona fide debt.
>
> Two factors weigh against a bona fide debt, the note's subordination to secured creditors and Perkins Rowe's failure to repay the debt and accrued interest. Finally, two remaining factors for us to address are Perkins Rowe's ability to obtain outside loans and the nature of the relationship between 2590 Associates and Perkins Rowe. We find both factors to be neutral in the light of the other factors supporting the existence of a bona fide debt. By the time of the 2008 note's execution, Perkins Rowe had been attempting to refinance the construction loan for nearly one year. Ultimately, the loan was not refinanced, and the property was foreclosed on. However, at the time of the 2008 note and even after the foreclosure case began, Mr. Spinosa believed he could work out a refinancing and continued to negotiate with lenders and potential investors. Mr. Spinosa was able to amend the terms of the construction loan agreement in 2008, and all but one lender agreed to a refinancing deal after the foreclosure began. Nor do we find the relationship between Perkins Rowe and 2590 Associates, discussed *infra*, to negate the other factors supporting a bona fide debt. On the basis of the Court of Appeals for the Fifth Circuit's 13 factors, we find that the debt between Perkins Rowe and 2590 Associates was bona fide.

Allen v. Commissioner, T.C. Memo. 2023-86 described its "Tests for Evaluating Debt Versus Equity":

> "We determine whether a purported debt is in substance and fact a debt for tax purposes from the facts and circumstances of each case, with the taxpayer bearing the burden of proof." *VHC, Inc.*, T.C. Memo. 2017-220, at *52 (first citing *Arlington Park Jockey Club, Inc. v. Sauber*, 262 F.2d 902, 905 (7th Cir. 1959); and then citing *Dixie Dairies Corp. v. Commissioner*, 74 T.C. 476, 493 (1980)). For a bona fide debt to exist, the parties to a transaction must have had an actual, good-faith intent to establish a debtor-creditor relationship at the time the funds were advanced. *Beaver v. Commissioner*, 55 T.C. 85, 91 (1970).
>
> An intent to establish a debtor-creditor relationship exists if the debtor intends to repay the loan and the creditor intends to enforce repayment. *Fisher v. Commissioner*, 54 T.C. 905, 909–10 (1970). The expectation of repayment must not "depend solely on the success of the borrower's venture." *Am. Processing & Sales Co. v. United States*, 371 F.2d 842, 856 (Ct. Cl. 1967). For that matter "[a]dvances made by an investor to a closely held or controlled corporation may properly be characterized, not as a bona fide loan, but as a capit al contribution." See *Shaw*, T.C. Memo. 2013-170, at *9 (citing *Fin Hay Realty Co. v. United States*, 398 F.2d 694, 697 (3d Cir. 1968)).
>
> Absent stipulation to the contrary, we follow the relevant precedent of the court of appeals to which an appeal would generally lie. See *Golsen v. Commissioner*, 54 T.C. 742, 757 (1970), *aff'd*, 445 F.2d 985 (10th Cir. 1971). In these cases the appeal would lie in the U.S. Court of Appeals for the Fourth and the Eleventh Circuits, which use slightly different methods to determine the parties' intent. See *Fairchild Dornier GMBH v. Off. Comm. of Unsecured Creditors (In re Dornier Aviation (N. Am.), Inc.)*, 453 F.3d 225, 233-34 (4th Cir. 2006); *Lane v. United States (In re Lane)*, 742 F.2d 1311, 1314-15 (11th Cir. 1984).
>
> The Eleventh Circuit has approved use of certain guidelines to facilitate a determination of whether advances constitute debt or equity. There are at least 13 factors which merit consideration in determining this issue: (1) names given to the certificates evidencing the indebtedness; (2) presence or absence of a fixed maturity date; (3) source of payments; (4) right to enforce payment of principal and interest; (5) participation in management flowing as a result; (6) status of the contribution in relation to regular corporate creditors; (7) intent of the parties; (8) "thin" or adequate capitalization; (9) identity of interest between creditor and stockholder; (10) source of interest payments; (11) ability of the corporation to obtain loans from outside lending institutions; (12) extent to which the advance was used to acquire capital assets; and (13) failure of the debtor to repay on the due date or seek a postponement. *Lane*, 742 F.2d at 1314-15 (citing *Estate of Mixon v. United States*, 464 F.2d 394, 402 (5th Cir. 1972)). The Eleventh Circuit has stressed that "these guidelines are not rigid rules mandating a particular conclusion when the court finds certain facts." *Id*. at 1315; see also *Tyler v. Tomlinson*, 414 F.2d 844, 848 (5th Cir. 1969) ("[T]ests are, at most, helpful factors to be considered and not fiats to be bound by." (quoting *Ga. S. & Fla. Ry. Co. v. Alt. Coast Line R.R. Co.*, 373 F.2d 493, 498 (5th Cir. 1967))).
>
> While the Fourth Circuit has not adopted the Mixon factors, it has used a similar test for determining whether a claim should be recharacterized from debt to equity under the Bankruptcy Code. See *Fairchild Dornier GMBH*, 453 F.3d at 233-34 (citing *Bayer Corp.*

> *v. MascoTech, Inc. (In re AutoStyle Plastics, Inc.)*, 269 F.3d 726, 749-50 (6th Cir. 2001)); see also *Bd. of Trs., Sheet Metal Workers' Nat'l Pension Fund v. Lane & Roderick, Inc.*, 736 F. App'x 400 (4th Cir. 2018). There are 11 nonexclusive factors: (1) the names given to the instruments, if any, evidencing the indebtedness; (2) the presence or absence of a fixed maturity date and schedule of payments; (3) the presence or absence of a fixed rate of interest and interest payments; (4) the source of repayments; (5) the adequacy or inadequacy of capitalization; (6) the identity of interest between the creditor and the stockholder; (7) the security, if any, for the advances; (8) the corporation's ability to obtain financing from outside lending institutions; (9) the extent to which the advances were subordinated to the claims of outside creditors; (10) the extent to which the advances were used to acquire capital assets; and (11) the presence or absence of a sinking fund to provide repayments. See *Fairchild Dornier GMBH*, 453 F.3d at 233.
>
> Regardless of the factors employed, both the Fourth and the Eleventh Circuits recognize that "[t]he substance of all of these multi-factor tests is identical," and application of the factors is helpful but what is necessary is evaluating the factors selected by the court to determine the taxpayer's intent concerning a transaction. *Id*. at 234 n.6; see also *Lane*, 742 F.2d at 1315 (citing *Tyler*, 414 F.2d at 848). Because the *Mixon* factors used in the Eleventh Circuit are more expansive, we will use them for the analysis.

The court thoroughly address the various factors and concluded:

> Of the 13 factors listed in *Estate of Mixon*, 7 favor equity, 3 favor debt, and 3 are neutral. After weighing them in the context of these cases, we conclude that the advances do not constitute debt and were therefore not deductible under section 166. That finding precludes the need for any analysis on whether the amounts were wholly or partially worthless.

Not being due yet does not prevent a Code § 166 deduction.[1164]

Rather, the debt must become worthless during the tax year.[1165]

[1164] Reg. § 1.166-1(c).

[1165] *2590 Associates, LLC v. Commissioner*, T.C. Memo. 2019-3, explained:

> For a section 166 deduction, the debt must become worthless during the tax year, *i.e.*, it must have had value at the beginning of the year and become worthless during that year. *Milenbach v. Commissioner*, 106 T.C. 184, 204 (1996), *aff'd in part, rev'd in part on other grounds*, 318 F.3d 924 (9th Cir. 2003). A debt's worthlessness is determined by identifiable events that occurred to render the debt worthless during the year. *Am. Offshore, Inc. v. Commissioner*, 97 T.C. 579, 594 (1991). A debt becomes worthless when the taxpayer has no reasonable expectation of repayment. *Crown v. Commissioner*, 77 T.C. 582, 598 (1981). Some objective factors considered by the Court in determining worthlessness include the value of property securing the debt, the debtor's earning capacity, events of default, the debtor's refusal to pay, actions to collect the debt, any subsequent dealings between the parties, and the debtor's lack of assets. *Am. Offshore, Inc. v. Commissioner*, 97 T.C. at 594-595. No single factor is conclusive. *Id.* at 595. The determination of when a debt becomes worthless depends upon the particular facts and circumstances of each case. *Riss v. Commissioner*, 56 T.C. 388, 407 (1971), *aff'd*, 478 F.2d 1160 (8th Cir. 1973). At trial we held that respondent has the burden of proof with respect to the issue of worthlessness in 2011. We find that respondent has failed to satisfy his burden of proof and that the debt became worthless in 2011.

II.G.4.a.iii. Character of Bad Debt

Where any nonbusiness debt held by a noncorporate taxpayer becomes worthless within the taxable year, the resulting loss is a short-term capital loss;[1166] note that reporting a large short-term capital loss might stand out, given that the IRS now matches proceeds and basis on sale and the basis would not match any report to the IRS by a broker. Code § 166(d)(2) provides that "nonbusiness debt" means a debt other than:[1167]

(A) a debt created or acquired (as the case may be) in connection with a trade or business of the taxpayer; or

(B) a debt the loss from the worthlessness of which is incurred in the taxpayer's trade or business.

After reciting the above, Reg. § 1.166-5(b) provides:

> The question whether a debt is a nonbusiness debt is a question of fact in each particular case. The determination of whether the loss on a debt's becoming worthless has been incurred in a trade or business of the taxpayer shall, for this purpose, be made in substantially the same manner for determining whether a loss has been incurred in a trade or business for purposes of section 165(c)(1). For purposes of subparagraph (2) of this paragraph, the character of the debt is to be determined by the relation which the loss resulting from the debt's becoming worthless bears to the trade or business of the taxpayer. If that relation is a proximate one in the conduct of the trade or business in which the taxpayer is engaged at the time the debt becomes worthless, the debt comes within the exception provided by that subparagraph. The use to which the borrowed funds are put by the debtor is of no consequence in making a determination under this paragraph. For purposes of section 166 and this section, a nonbusiness debt does not include a debt described in section 165(g)(2)(C). See § 1.165-5, relating to losses on worthless securities.

When part or all of a debt, which is not a security[1168] and is not a nonbusiness debt, becomes worthless, the taxpayer holding the debt can deduct the worthless portion,[1169] if the taxpayer

---

[1166] Code § 166(d)(1). Capital losses are deductible only against the sum of capital gains plus $3,000. Short-term capital gains are taxed using ordinary income tax rates, so short-term capital losses from bad debts have the most benefit for taxpayers with short-term capital gains.
[1167] Code § 166(d)(1).
[1168] Code § 166(e) provides, "This section shall not apply to a debt which is evidenced by a security as defined in section 165(g)(2)(C)."
[1169] Code § 166(a), which allows a taxpayer to deduct a debt that is worthless in whole or in part, with Reg. § 1.166-3(a)(2)(iii) providing:

> Before a taxpayer may deduct a debt in part, he must be able to demonstrate to the satisfaction of the district director the amount thereof which is worthless and the part thereof which has been charged off.

Rutter v. Commissioner, T.C. Memo. 2017-174, elaborated:

> The Commissioner's disallowance of a deduction under section 166(a)(2) will be sustained so long as he exercises his discretion reasonably. *Brimberry v. Commissioner*, 588 F.2d 975, 977 (5th Cir. 1979), *aff'g* T.C. Memo. 1976-209; *Portland Mfg. Co. v. Commissioner*, 56 T.C. 58, 72 (1971), *aff'd* on other grounds, 35 A.F.T.R.2d (RIA) 75-1439, 75-1 U.S. Tax Cas. (CCH) para. 9449 (9th Cir. 1975). His exercise of discretion will not be set aside unless it is arbitrary and

charges off the loan.[1170] Nonbusiness bad debts must be wholly worthless to be deductible;[1171] the debtor's filing of bankruptcy does not show that the debt is wholly worthless if the creditor files a claim.[1172] In contrast, a business bad debt is deductible when partially or wholly worthless, as *Bercy v. Commissioner*, T.C. Memo. 2019-118, described:

unreasonable. *Ark. Best Corp. & Subs. v. Commissioner*, 800 F.2d 215, 221 (8th Cir. 1986), *aff'g* in part, *rev'g* in part 83 T.C. 640 (1984), *aff'd* on other grounds, 485 U.S. 212 (1988).

> Petitioner has not made the showing that the statute and the regulations require. First, he has not established to the Commissioner's satisfaction, or ours, the amount of the debt that was worthless at year-end 2009. Sec. 1.166-3(a)(2)(iii), Income Tax Regs. The $8.55 million number he chose for the writedown (reduced from the $10 million "placeholder" figure Mr. Bardoff had used initially) appears to have been selected because it approximated the income petitioner realized earlier in 2009 from another of his startup companies. He made no effort to tie this writedown to IM's actual financial condition or ability to repay.
>
> Second, petitioner did not show that any portion of his advances became worthless during 2009. He appears to have had a reasonable hope of recovering on his investments; that is presumably why he continued to advance another $37.75 million to IM during 2010-2013. See *Crown*, 77 T.C. 582, 598 (1981); *Flood v. Commissioner*, T.C. Memo. 2001-39, 81 T.C.M. (CCH) 1175, 1180 ("A debt becomes worthless in the tax year in which a creditor, using sound business judgment, abandons all reasonable hope of recovery[.]"); sec. 1.166-2(a), Income Tax Regs. Conversely, if any portion of the debt was worthless, petitioner did not show that it became worthless in 2009 rather than in some earlier year. See *Hirsch v. Commissioner*, 124 F.2d 24, 31 (9th Cir. 1941) ("A taxpayer should not be permitted to close his eyes to the obvious, and to carry accounts on his books as good when in fact they are worthless, and then deduct them in a year subsequent to the one in which he must be presumed to have ascertained their worthlessness." (citing *Avery v. Commissioner*, 22 F.2d 6, 7-8 (5th Cir. 1927))), *aff'g* 42 B.T.A. 566 (1940).

After reviewing the parties' contentions and testimony, the court concluded:

> In sum, the IRS did not abuse its discretion in determining that petitioner was not entitled to a deduction of $8.55 million for a partially worthless debt for 2009. Even if petitioner established that his advances were debt and that this debt was a business debt, he did not meet the requirements for deducting a partially worthless debt under section 166(a)(2) and section 1.166-3(a)(2)(iii), Income Tax Regs.[7]
>
> [7] Given our disposition, we need not address respondent's contention that petitioner's deduction should be disallowed because the documents implementing the writedown were executed in February or March 2010 and backdated to 2009.

[1170] LAFA 20153501F argued that the taxpayer created a reserve rather than charging off the debt:

> The purpose of the charge-off requirement is to perpetuate evidence of a taxpayer's election to abandon part of the debt as an asset. *Findley v. Commissioner*, 25 T.C. 311, 319 (1955), *aff'd per curium*, 236 F.2d 959 (3d Cir. 1956) (emphasis added). An increase in a general reserve account does not constitute the required charge off. *International Proprietaries. Inc. v. Commissioner*, 18 T.C. 133 (1952). The taxpayer's intent to abandon the charged-off portion of the debt must be reflected in its books and records. *Id.*

[1171] Reg. § 1.166-5(a)(2). *Rutter v. Commissioner*, T.C. Memo. 2017-174, elaborated:

> To give rise to a deduction under section 166(a)(1), a debt must have become wholly worthless during the tax year. Sec. 1.166-3(b), Income Tax Regs.; see *Bodzy v. Commissioner*, 321 F.2d 331, 335 (5th Cir. 1963), *aff'g* in part, *rev'g* in part T.C. Memo. 1962-40. In the case of a partially worthless debt, section 166(a)(2) provides that, "[w]hen satisfied that a debt is recoverable only in part, the Secretary may allow such debt, in an amount not in excess of the part charged off within the taxable year, as a deduction." "Before a taxpayer may deduct a debt in part, he must be able to demonstrate to the satisfaction of the district director the amount thereof which is worthless and the part thereof which has been charged off." Sec. 1.166-3(a)(2)(iii), Income Tax Regs.

[1172] *Bunch v. Commissioner*, TC Memo. 2014-177, held:

> Section 166(a) allows a deduction for the taxable year in which a business debt becomes wholly or partially worthless. The year in which a debt becomes worthless is fixed by identifiable events that make it reasonable for the lender to abandon any hope of recovery. *Crown v. Commissioner*, 77 T.C. 582, 598 (1981). "When a debt becomes worthless is to be decided by the trier of fact." *Am. Off-shore, Inc. v. Commissioner*, 97 T.C. 579, 594 (1991) (citing *Cole v. Commissioner*, 871 F.2d 64, 66 (7th Cir. 1989), *aff'g* T.C. Memo. 1987-228).
>
> Ascertaining when a debt becomes worthless requires "examination of all the circumstances." *Dallmeyer v. Commissioner*, 14 T.C. 1282, 1291 (1950). There is no standard test or formula for determining worthlessness, but relevant factors include the debtor's solvency, the lender's collection efforts, and subsequent dealings between the parties. See *Lucas v. Am. Code Co.*, 280 U.S. 445, 449 (1930); *Aston v. Commissioner*, 109 T.C. 400, 415 (1997); *Am. Offshore, Inc.*, 97 T.C. at 594; sec. 1.166-2(a), Income Tax Regs. The taxpayer must establish objective facts from which worthlessness can be determined; mere belief that a debt has gone bad is insufficient. *Fox v. Commissioner*, 50 T.C. 813, 822-823 (1968), *aff'd per curiam*, 70-1 U.S. Tax Cas. (CCH) para. 9373 (9th Cir. 1970). A taxpayer is not required to take legal action to enforce payment where it "would in all probability not result in the satisfaction of execution on a judgment." Sec. 1.166-2(b), Income Tax Regs.
>
> In evaluating a taxpayer's contention that a debt has become wholly or partially worthless, we give weight to the creditor's "soundly exercised business judgment." *Portland Mfg. Co. v. Commissioner*, 56 T.C. 58, 73 (1971). We do not require a creditor to pursue "theoretical possibilities" of recovery that ignore the "realities of the business environment." *ABC Beverage Corp. v. Commissioner*, T.C. Memo. 2006-195, 92 T.C.M. (CCH) 268, 272. "Whether a bad debt deduction is proper must be analyzed according to 'reasonableness, commonsense and economic reality." *Id.* At 271 (quoting *Scoville Mfg. Co. v. Fitzpatrick*, 215 F.2d 567, 570 (2d Cir. 1954)).

A loss may be a business bad debt only if the taxpayer was engaged in a trade or business and the debt was proximately related to that trade or business;[1173] and whether the debt has a proximate relationship to the taxpayer's trade or business turns on the taxpayer's dominant motivation in making the loan.[1174] *Bercy v. Commissioner*, T.C. Memo. 2019-118, described one taxpayer's lending business, viewing the business' scope broadly:

> We find that Mr. Bercy was engaged in a distinct trade or business of lending money. Aside from his activities on behalf of Argus and Astin-Carr,[3] Mr. Bercy personally made loans to a variety of borrowers, solely for his own account, on a regular basis. His personal lending activity was substantial, comprising numerous loans totaling an estimated $25 million. And he engaged in this activity with the intent of making a profit.

Even if we were to accept that the proof of claim established the amount of petitioners' loss, the document does not establish that petitioners had no hope of recovery in 2006. On the contrary, it tends to establish the reverse: By filing a proof of claim in Mortgage Co.'s bankruptcy, petitioners took the requisite step to secure a place in the order of distribution from the bankruptcy estate and thereby increased their odds of recovering at least some of the loaned funds.

[1173] *Bercy v. Commissioner*, T.C. Memo. 2019-118, citing *Putoma Corp. v. Commissioner*, 66 T.C. 652, 673 (1976), *aff'd*, 601 F.2d 734 (5th Cir. 1979).

[1174] *Bercy v. Commissioner*, T.C. Memo. 2019-118, citing *Putoma Corp.*, 66 T.C. at 673.

[3] Argus was engaged in the business of making real estate loans, and Mr. Bercy supplied capital to Argus directly (as a shareholder of that S corporation) and through Astin-Carr (an entity he wholly owned). Petitioners do not contend that Mr. Bercy should be deemed to be in the lending business solely by virtue of the activities conducted by his S corporation. *Cf. Dagres v. Commissioner*, 136 T.C. 263, 289 (2011) (holding that managing member of an LLC was deemed to carry on the lending business of his LLC).

Mr. Aken credibly testified that he approached Mr. Bercy because he knew that Mr. Bercy was in the lending business. The fact that the two men were unrelated negated any familial motivation for the loan. Mr. Bercy agreed to lend only after investigating Girari's business and finances, performing due diligence as he did for his other loans. To hedge his bet he secured as a co-lender Mr. Levitt, with whom he had previously joined in making a personal property loan. His behavior in connection with the Girari loan was consistent with his general business practices, and that loan was proximately related to his trade or business of lending money. See *Ruppel v. Commissioner*, T.C. Memo. 1987-248, 53 T.C.M. (CCH) 829, 834 ("Since we have held that petitioner was in the trade or business of lending money, it follows that the most significant loans created with respect to that business were proximately related to it unless the facts show some other reason for the loan.").

Respondent concedes that "Mr. Bercy was admittedly engaged in the business of real estate lending." But respondent contends that making personal property loans was outside the scope of that business. And in respondent's view, the scale of Mr. Bercy's non-real-estate lending activity was insufficiently robust to constitute a "trade or business" distinct from his business of real estate lending.

We are not persuaded to construe the term "trade or business" so narrowly in this context. When previously considering the status of loans as "business debts" under section 166, we have not segmented the taxpayer's lending business according to the nature of the loan or type of customer. Rather, we have simply asked whether the taxpayer was in the business of lending money, separate and distinct from any other gainful employment he or she may have had. See, *e.g.*, *Yaryan v. Commissioner*, T.C. Memo. 2018-129, at *26 ("The parties agree that petitioners were not in a trade or business of lending funds."); *Owens v. Commissioner*, T.C. Memo. 2017-157, 114 T.C.M. (CCH) 188, 194 (inquiring whether the taxpayer's "personal lending was a trade or business"); *Hatcher v. Commissioner*, T.C. Memo. 2016-188, 112 T.C.M. (CCH) 415, 418 (finding that the taxpayer "was not engaged in the trade or business of lending money"), *aff'd*, 726 F. App'x 207 (5th Cir. 2018); *Ruppel*, 53 T.C.M. (CCH) at 832 (requiring the taxpayer to show "that he was in the trade or business of lending money"); *Jessup v. Commissioner*, T.C. Memo. 1977-289, 36 T.C.M. (CCH) 1145, 1150 (finding that the taxpayer was "in the business of making loans").

When a manager of venture capital funds loaned money to a business associate who provided leads on companies in which the venture capital funds might invest, with the expectation that the lender would receive carried interests in the venture capital fund, the loan was made in the trade or business of managing venture capital funds.[1175] Key is whether the lender merely expects a normal investor's return (not a trade or business)[1176] or is "flipping" businesses.[1177]

[1175] *Dagres v. Commissioner*, 136 T.C. 263 (2003). This case involved a number of factors when taking a bad debt deduction, such that it is worth reproducing the heart of the court's analysis:

> …We have held that the General Partner L.L.C.s' activity was not mere investment but was the trade or business of managing venture capital funds. Consequently, it follows that Mr. Dagres was in that trade or business.
>
> However, as we have noted, Mr. Dagres was also an investor (i.e., of his portion of 1 percent of the Venture Fund L.P.'s capital), and if his loan to Mr. Schrader was proximately related to his investment interest, then the resulting bad debt was not a business bad debt. Moreover, Mr. Dagres was also a salaried employee of BMC and was therefore in the trade or business of being an employee. If his loan to Mr. Schrader was proximately related to his employment, rather than to the venture capital business, then the deduction of the resulting bad debt loss is severely limited. See *supra* part II.A. We must therefore determine to which of these activities--his investment, his employment, or his venture capital management--the loan was proximately related.
>
> In *United States v. Generes*, 405 U.S. at 103, the Supreme Court indicated that when determining whether a bad debt has a proximate relation to a taxpayer's trade or business and therefore qualifies as a business bad debt, the question to ask is whether the "dominant motivation" for the loan was business; a merely "significant motivation" is insufficient to show a proximate relation. In *Generes*, the Supreme Court held that the dominant motivation for the taxpayer's lending money to his company was not the business motive of protecting his modest salary; rather, in addition to protecting his son-in-law's livelihood, he was motivated to protect his sizable investment in the company. *Id.* at 106. Accordingly, non-business motives prompted the loan, and therefore the loss was not a business bad debt.
>
> In this case, however, Mr. Dagres's compensation for his work as a manager of the Venture Fund L.P.s--*i.e.*, his share of the 20-percent profits interest and the 2-percent management fee--exceeded by twenty-fold his share of the return on the 1-percent investment. Moreover, although his salary from BMC (i.e., his share of the management fees) was significant in absolute terms (nearly $11 million in five years, of which he received almost $2.6 million in the year of the loan), his carry was clearly dominant ($43 million of capital gains in those same five years, of which $40 million was carry received in the year of the loan). He lent $5 million to Mr. Schrader to protect and enhance what he considered a valuable source of leads on promising companies in which, as Member Manager of General Partner L.L.C.s, he could invest the money of the Venture Fund L.P.s, help manage those companies, and earn substantial income in the form of carry. Mr. Dagres's carry significantly exceeded both his salary and his return on his own investment. We are satisfied that venture capital motives and not employment or investment motives were the primary motivation for his loan. It is that venture capital business motive that characterizes the subsequent bad debt loss.

[1176] *Rutter v. Commissioner*, T.C. Memo. 2017-174, elaborated:

> … we have held that a taxpayer is not in the business of being a "promoter" where he is entitled to no compensation other than a normal investor's return. See, *e.g.*, *Dagres*, 136 T.C. at 281-282 (noting that a promoter "receives not just a return on his own investment but compensation attributable to his services"); *Deely v. Commissioner*, 73 T.C. 1081, 1095-1096 (1980) (stating that, "in order for a promoter to be engaged in a trade or business for tax purposes he must do so for `compensation other than the normal investor's return'" (quoting *Millsap v. Commissioner*, 46 T.C. 751, 756 (1966), *aff'd*, 387 F.2d 420 (8th Cir. 1968))); *Ackerman v. Commissioner*, T.C. Memo. 2009-80, 97 T.C.M. (CCH) 1392, 1414 (finding no trade or business as "promoter" where taxpayer did not receive fees or commissions for providing advisory services). Here, petitioner received no fees, commissions, or other compensation for his services. He expected to receive the return that equity investors normally hope for, namely, long-term gain upon appreciation or sale of IM's assets.

If a loss is not connected with a trade or business, generally it must be incurred in any transaction entered into for profit.[1178] That standard requires that the taxpayer's "primary reason for investing … was to make an economic profit, or in other words, a profit without consideration to any tax benefit flowing from the [investment]."[1179]

See also part II.G.4.l.i Trade or Business; Limitations on Deductions Attributable to Activities Not Engaged in for Profit.

For deducting loans to corporations, see part II.G.4.b C Corporations, particularly fns. 1185-1187.

II.G.4.a.iv. Extension of Statute of Limitations for Deduction for Bad Debt or Worthless Securities

Code § 6511(d) provides a 7-year statute of limitations of certain deductions for bad debt or worthless securities rather than the normal 3-year statute of limitations.

II.G.4.a.v. Tax Effect of Loan to S Corporation or Partnership

Loans to S corporations or partnerships can allow the owner who is a lender to deduct losses against the owner's basis in the loan; this generally generates ordinary losses and, to the extent of those losses, that one does not need to worry about whether writing off that part of the loan would be a business bad debt or a nonbusiness bad debt. See part II.G.4.c Basis Limitations for Deducting Partnership and S Corporation Losses.

However, a loan to a partnership can backfire if the loan is not repaid until the partnership is rescued by an angel investor's infusing capital. In that case, the lending partner would contribute the loan to the partnership in exchange for a partnership interest. Unfortunately, often the founder will receive only pennies on the dollar for the founder's original investment (capital and debt):

- To the extent that the amount of debt contributed to the partnership exceeds the value of the partnership interest that the lending partner received in exchange for that debt, the

---

[1177] *Rutter v. Commissioner*, T.C. Memo. 2017-174, suggested:

> A taxpayer may be able to show that he is engaged in business as a "promoter" or "trader" if he establishes that his goal is to earn profits by "flipping" assets, *i.e.*, making quick and profitable sales of real estate, securities, or other property. See, *e.g.*, *Assaderaghi v. Commissioner*, T.C. Memo. 2014-33. Central to these holdings is that the taxpayer aimed for profit from frequent short-term sales, not from patient long-term investment. "It is the early resale which makes the profits income received directly for services, for the longer an interest is held, the more profit becomes attributable to the successful operation of the corporate business." *Deely*, 73 T.C. at 1093-1094; see *Millsap*, 46 T.C. at 756-757.

[1178] Code § 165(c)(2). Code § 165(c)(3) also allows a taxpayer to deduct nonbusiness losses that "arise from fire, storm, shipwreck, or other casualty, or from theft."

[1179] *McElroy v. Commissioner*, T.C. Memo. 2014-163, citing:

> *See Fox v. Commissioner*, 82 T.C. 1001, 1018-1027 (1984); *see also Friedman v. Commissioner*, 869 F.2d 785, 789-790 (4th Cir. 1989), *aff'g Glass v. Commissioner*, 87 T.C. 1087 (1986); *cf. Surloff v. Commissioner*, 81 T.C. 210, 233 (1983) (noting that an intent to make a profit for purposes of section 162 requires an intent to make an economic profit, independent of tax savings).

See also part II.G.17 Economic Substance for the possibility of penalties for tax-motivated transactions not entered into for either profit or a Congressionally approved tax benefit (such as a tax credit).

partnership will have cancellation of indebtedness (COD) income.[1180] Generally, partnership agreements require income to be allocated to a partner to the extent that the partner deducted losses against the debt. Therefore, the lending partner would be allocated all of this COD income; this allocation essentially is a recapture of the lending partner's prior losses and gives the lending partner basis in the partnership interest.

- If, instead of lending money to the partnership, the partner had contributed the money, the partner would have avoided this COD income. Providing a priority return of capital might be adequate to let that partner be repaid. If enough money is at stake to justify the complexity, consider providing a preferred partnership interest instead of a loan.[1181] Realistically, the only way the loan would be repaid would be if the partnership makes money. Furthermore, a preferred return could be high enough to provide reward commensurate with risk. If the preferred return needs to be eliminated in an angel investor rescue, the restructuring would generate any adverse consequences.

See part II.C.3.d Deducting Interest Expense on Debt Incurred by a Partnership, which applies to S corporations to a large degree.

II.G.4.b. C Corporations: Losses Incurred by Business, Owner, or Employee

C corporations are taxed on their own operations. C corporations that have losses carry them back or forward to other years; C shareholders generally may not take current deductions for a decrease in the value of their stock unless the stock becomes worthless.[1182] A taxpayer who

[1180] Code § 108(e)(8); Reg. § 1.108-8 (subsection (c) has a specific example, but the example involved a creditor who was not also a partner). If and to the extent that the value of the partnership interest issued in exchange for the debt is attributable to accrued interest, the lender partner is taxed on that interest. Reg. § 1.721-1(d)(2).

[1181] The preferred partnership interest must not be a substitute for debt. The fact that the partner already has a regular partnership interest should help significantly; *see, e.g.*, parts II.G.20 Debt vs. Equity; Potential Denial of Deduction for Business Interest Expense and III.B.7.c.viii Creative Bonus Arrangements (discussing when a financial interest might rise to the level of being a partner). The interest component should not be based on fixed or variable interest rates, because then it looks like a loan under Code § 707(a). Instead, it would be a preference on cash flow and structured so as not to be a guaranteed payment; *see* Reg. § 1.707-1(c).

[1182] *Bilthouse v. U.S.*, 553 F.3d 513 (7th Cir. 2009), held:

> The worthlessness of a stock as of a particular year is a factual inquiry, varying according to the circumstances of each case. *Boehm v. Comm'r*, 326 U.S. 287, 293 (1945); see *United States v. Davenport*, 412 F. Supp. 2d 1201, 1207 (W.D. Okla. 2005). Although section 165(g) does not define "worthless," most courts consider both the liquidating value and the potential value of the company to determine the year of worthlessness. See *Morton v. Comm'r*, 38 B.T.A. 1270, 1278 (B.T.A. 1938), aff'd 112 F.2d 320 (7th Cir. 1940) (worthlessness of stock depends on current liquidating value and potential value); see also *Delk v. Comm'r*, 113 F.3d 984, 986 (9th Cir. 1997); *Figgie Int'l, Inc. v. Comm'r*., 807 F.2d 59, 62 (6th Cir. 1986).

Continuing to earn substantial revenue suggests that the corporation might not be worthless. *In Re: Carpenter*, 118 A.F.T.R.2d 2016-XXXX (Bankruptcy. Ct. MT 9/15/2016) held that stock became worthless when the corporation ceased operations and its creditor seized its assets. The court applied the following:

> The tax court set forth a test for determining whether stock is worthless:
>
> > The ultimate value of stock, and conversely its worthlessness, will depend not only on its current liquidating value, but also on what value it may acquire in the future through foreseeable operations of the corporation. Both factors of value must be wiped out before we can definitely fix the loss. If the assets of the corporation exceed its liabilities, the stock has

tried to deduct his C corporation's losses, claiming that the he incurred the losses and the C corporation was merely his agent, was penalized for taking that position.[1183]

A founding shareholder might be able to take an ordinary loss of up to $50,000 ($100,000 for joint returns) on the sale of stock under Code § 1244.[1184]

A shareholder who loans money to a C corporation that cannot repay the loan might be stuck deducting the loan as a nonbusiness bad debt, which is deducted as a short term capital loss (deductible each year against only capital gains plus up to $3,000 of other income) rather than an ordinary loss;[1185] alternatively, if the primary purpose of the debt is to preserve the

---

> > liquidating value. If its assets are less than its liabilities but there is a reasonable hope and expectation that the assets will exceed the liabilities of the corporation in the future, its stock, while having no liquidating value, has potential value and can not be said to be worthless. The loss of potential value, if that exists, can be established ordinarily with satisfaction only by some "identifiable event" in the corporation's life which puts an end to such hope and expectation.
>
> *Morton v. Comm'r*, 38 B.T.A. 1270, 1278–1279 (1938), *aff'd* 112 F.2d 320 (7th Cir. 1940). The Ninth Circuit more recently echoed this test:
>
> > Securities may not be considered worthless, even when they have no liquidating value, if there is a reasonable hope and expectation that they will become valuable in the future. *Lawson v. Commissioner*, 42 B.T.A. 1103, 1108, 1940 WL 144 (1940). But, "such hope and expectation may be foreclosed by the happening of certain events such as the bankruptcy, cessation from doing business, or liquidation of the corporation, or the appointment of a receiver...." *Morton v. Commissioner*, 38 B.T.A. 1270, 1278, 1938 WL 165 (1938), *aff'd*, 112 F.2d 320 (7th Cir. 1940). To establish worthlessness, the taxpayer "must show a relevant identifiable event ... which clearly evidences destruction of both the potential and liquidating values of the stock." *Austin Co. v. Commissioner*, 71 T.C. 955, 970, 1979 WL 3593 (1979). The burden of establishing worthlessness is on the taxpayer. *Figgie Int'l Inc. v. Commissioner*, 807 F.2d 59, 62 (6th Cir. 1986).
>
> *Delk v. C.I.R.*, 113 F.3d 984, 986 (9th Cir. 1997). *See also Textron, Inc . v. U.S.*, 418 F.Supp. 39, 44-47 (D. RI 1976) (requiring that the stock be wholly worthless and that the "deduction for a worthless security be claimed for the year in which said security becomes worthless without the benefit of hindsight").

[1183] *Barnhart Ranch, Co. v. Commissioner*, T.C. Memo. 2016-170.

[1184] See part II.Q.7.l Special Provisions for Loss on the Sale of Stock in a Corporation. A trust or estate is not eligible for this treatment. Part II.J.11.b Code § 1244 Treatment Not Available for Trusts.

[1185] *Haury v. Commissioner*, T.C. Memo 2012-215. Advances that were not documented as loans were treated as equity in *Ramig v. Commissioner*, 110 A.F.T.R.2d 2012-6450 (9th Cir. 2012), an "unpublished" opinion affirming an unpublished Tax Court opinion. Same result in *Herrera v. Commissioner*, T.C. Memo. 2012-308 (imposing accuracy-related penalty), which focused on lack of consistent documentation, the lack of interest payments, and the lack of a Form 1099 reporting cancellation of indebtedness income, and which cited 13 factors from the Fifth Circuit, the weight to each of which varies by case:

> (1) the names given to the certificates evidencing the indebtedness; (2) the presence or absence of a fixed maturity date; (3) the source of payments; (4) the right to enforce payment of principal and interest; (5) participation in management flowing as a result; (6) the status of the contribution in relation to regular corporate creditors; (7) the intent of the parties; (8) "thin" or adequate capitalization; (9) identity of interest between creditor and stockholder; (10) source of interest payments; (11) the ability of the corporation to obtain loans from outside lending institutions; (12) the extent to which the advance was used to acquire capital assets; and (13) the failure of the debtor to repay on the due date or to seek a postponement."

The Fifth Circuit affirmed, at 112 A.F.T.R.2d 2013-6858 (11/11/2013), commenting:

shareholder's job and therefore would be bad debt, presumably the deduction would be an employee business expense, deductible as a miscellaneous itemized deduction; miscellaneous itemized deductions are allowable for regular income tax purposes only to the extent that they exceed 2% of the taxpayer's adjusted gross income and are not deductible at all for alternative minimum tax purposes.[1186] The shareholder must prove that the debt was bona fide and then became worthless and uncollectible and that legal action to enforce payment would in all probability not result in the satisfaction of execution on a judgment.[1187]

For a very brief overview of the principles of this part II.G.4.b, see *Aleamoni v. Commissioner*, T.C. Summ. Op. 2016-21.

… the Treasury Regulations provide that a guaranty payment only qualifies for a bad debt deduction if "[t]here was an enforceable legal duty upon the taxpayer to make the payment." Treas. Reg. § 1.166–9(d)(2). Voluntary payments do not qualify. See id. § 1.166–1(c) ("A gift ... shall not be considered a debt for purposes of section 166."); *see also Piggy Bank Stations, Inc. v. Comm'r*, 755 F.2d 450, 452–53 (5th Cir. 1985).

[1187] *Shaw v. Commissioner*, T.C. Memo 2013-170 (taxpayer failed to prove that the advance was a bona fide loan and not a capital contribution and also failed to prove worthless; 20% accuracy-related penalty imposed), *aff'd* 116 A.F.T.R.2d ¶ 2015-5471 (9th Cir. 2015); *Alpert v. Commissioner*, TC. Memo. 2014-70 (similar result outside a corporate setting).

II.G.4.c. Basis Limitations for Deducting Partnership and S Corporation Losses

II.G.4.c.i. Overview of Pass-Through Basis Limitations

Owners generally may deduct losses to the extent of the owners' basis in their S stock[1188] or partnership interest;[1189] this basis includes certain debt basis, as described below.

Page E-10 of the 2019 Instructions to Schedule E explains what happens when losses have been limited by basis and no longer are:

> **Losses Not Allowed in Prior Years Due to the Basis or At-Risk Rules**
>
> - Enter your total prior year unallowed losses that are now deductible on a separate line in column (i) of line 28. Do not combine these losses with, or net them against, any current year amounts from the partnership or S corporation.
>
> - Enter "PYA" in column (a) of the same line.

[1188] See Code § 1366(d) and Rev. Rul. 2008-16, discussing losses generally and specifically how charitable contributions interact with these limitations. If the shareholder later transfers stock without having been able to use the losses, the losses are permanently disallowed. Reg. § 1.1366-2(a)(5). T.D. 9682 (2014), finalizing regulations using debt to deduct losses as described in part II.G.4.d.ii.(a) Limitations on Using Debt to Deduct S Corporation Losses, commented on stock basis:

> The preamble to the proposed regulations requested comments regarding the basis treatment when an S corporation shareholder or a partner contributes the shareholder's or partner's own note to an S corporation or a partnership. An S corporation shareholder does not increase his basis in the stock of his S corporation under section 1366(d)(1)(A) from a contribution of his own note. See Rev. Rul. 81-187 (1981-2 CB 167) (holding that a shareholder who (i) merely executed and transferred the shareholder's demand note to the shareholder's wholly owned S corporation, and (ii) made no payment on the note until the following year had a zero basis in the note until the following year when the shareholder made a payment on the note). The preamble to the proposed regulations described as one potential model § 1.704-1(b)(2)(iv)(d)(2), which provides that a partner's capital account is increased with respect to non-readily tradable partner notes only (i) when there is a taxable disposition of such note by the partnership, or (ii) when the partner makes principal payments on such note. One commentator recommended consideration of, and consistency with, § 1.166-9(c) (regarding contributions of debt to capital). Another commentator noted that courts have applied the "actual economic outlay" standard to determine when shareholders increase their bases in their S corporation stock. See, for example, *Maguire v. Commissioner*, T.C. Memo. 2012-160. This commentator requested that the final regulations provide that actual economic outlay does not apply to determinations of a shareholder's stock basis under section 1366(d)(1)(A). To expedite finalization of the proposed regulations, the scope of these final regulations is limited to basis of indebtedness. The Treasury Department and the IRS continue to study issues relating to stock basis and may address these issues in future guidance.

[1189] See Code § 704(d). See also Collins, "Charitable Gifts of Partnership Interests and Partnership Property," ACTEC Business Planning Committee (Summer 2008). A partner must prove basis; *Nwabasili v. Commissioner*, T.C. Memo. 2016-220, held:

> The record does not reveal the contributions that Nwabasili made to the partnership or the distributions that the partnership made to him. Without this information, we cannot calculate his adjusted basis in his partnership interest. Because Nwabasili has the burden of proof, we hold that section 704(d) precludes him from deducting any part of the partnership loss.[9]
>
> [9] A similar approach was taken in *Mladinich v. Commissioner*, T.C. Memo. 1969-185, and *Lemons v. Commissioner*, T.C. Memo. 1997-404.

For basis limitations, see parts II.G.4.d Basis Limitation for Shareholders in an S Corporation, II.G.4.e Basis Limitations for Partners in a Partnership, and II.G.4.g Limitations on Deducting Charitable Contributions. These basis limitations provide more optionality for S corporations than for partnerships:

- When an S corporation borrows from a third party, its owners do not get basis for the borrowing, even if they provide very strong guarantees to the lenders. An owner gets basis from a loan only if the owner is the lender. However, if an owner borrows from a lender and loans that money to the S corporation, the owner gets basis. In such a back-to-back loan, the owner may take a security interest in the company's assets and then assign that security interest to the lender, so that the lender has a security interest in the company's assets. By choosing between a back-to-back loan and a direct loan from a lender to the company, the owner can determine how much basis is available to absorb losses.

- When a partnership borrows from a third party, its owners are allocated the liabilities and get basis for the borrowing. Guarantees may change how the liabilities are allocated among the owners, but they do not change whether the liabilities are allocated to the owners as a whole.

The at-risk rules are in part II.G.4.j At Risk Rules (Including Some Related Discussion of Code § 752 Allocation of Liabilities). An example of their application is a partner who is allocated a liability but has not guaranteed or otherwise become subjected to paying that liability out-of-pocket; the at-risk rules may prevent that partner from deducting losses against the basis created by that liability. Sometimes partners guarantee liabilities to support losses (which guarantees the IRS will respect only if real), but the most common guarantees are required by lenders.

Suppose a nongrantor trust owns an interest in an S corporation[1190] or a partnership that incurs losses suspended by the basis limitation. When the trust terminates, the suspended losses are lost forever, with no tax benefit.[1191] This reinforces my inclination to draft trusts that last the beneficiary's lifetime, with the beneficiary becoming trustee when appropriate, rather than terminating and artificially forcing the issue of suspended losses going away.

Compare this part II.G.4.c to parts II.K.2.d Effect of Death of an Individual or Termination of Trust on Suspended Passive Losses and II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good. The idea is that suspending a loss and using it against income in a high-earning year may be better than using the loss right away against modest income or income that the standard deduction or itemized deductions already protect from tax.

[1190] Beware of the limitations described in part III.A.3 Trusts Holding Stock in S Corporations.
[1191] In the case of an S corporation, see Reg. § 1.1366-2(a)(6), reproduced in part II.G.4.d.i Basis Limitation Generally. In the case of a partnership, see the fn 1233 and accompanying text in part II.G.4.e Basis Limitations for Partners in a Partnership.

II.G.4.c.ii. Effect of Nontaxable Items on Basis in Pass-Through Entities

The basis of a partnership interest is increased by nontaxable income[1192] and decreased by nondeductible expenses.[1193] Similarly, the basis of S corporation stock is increased by nontaxable income[1194] and decreased by nondeductible expenses.[1195]

Despite this basis increase, nontaxable income does not increase AAA – the amount an S corporation that had been a C corporation can distribute before dipping into its earnings and profits that make part or all of a distribution be a taxable dividend. See part II.P.3.b.iv Problem When S Corporation with Earnings & Profits Invests in Municipal Bonds, which is fleshed out in part II.Q.7.b.iv.(a) S corporation Distributions of Life Insurance Proceeds - Warning for Former C Corporations. If the S corporation has no C corporation earnings and profits or never was a C corporation, this paragraph is a nonissue.

May nontaxable income that generate basis that supports losses? Theoretically, yes. However, consider Code § 265(a)(1), which provides:

> *Expenses*. Any amount otherwise allowable as a deduction which is allocable to one or more classes of income other than interest (whether or not any amount of income of that class or classes is received or accrued) wholly exempt from the taxes imposed by this subtitle, or any amount otherwise allowable under section 212 (relating to expenses for production of income) which is allocable to interest (whether or not any amount of such interest is received or accrued) wholly exempt from the taxes imposed by this subtitle.

Manocchio v. Commissioner, 78 T.C. 989 (1982), was a unanimous reviewed decision, with the following Official Tax Court Syllabus at 989-990:[1196]

[1192] Code § 705(a)(1)(B), referring to "income of the partnership exempt from tax under this title."

[1193] Code § 705(a)(2)(B), referring to "expenditures of the partnership not deductible in computing its taxable income and not properly chargeable to capital account."

[1194] Code § 1367(a)(1)(B), referring to "any nonseparately computed income determined under subparagraph (B) of section 1366(a)(1)." Code § 1367 is reproduced in part II.G.4.d.i Basis Limitation Generally. Code § 1366(a), "Determination of shareholder's tax liability," provides:

> (1) *In general*. In determining the tax under this chapter of a shareholder for the shareholder's taxable year in which the taxable year of the S corporation ends (or for the final taxable year of a shareholder who dies, or of a trust or estate which terminates, before the end of the corporation's taxable year), there shall be taken into account the shareholder's pro rata share of the corporation's
>
> (A) items of income (including tax-exempt income), loss, deduction, or credit the separate treatment of which could affect the liability for tax of any shareholder, and
>
> (B) nonseparately computed income or loss.
>
> For purposes of the preceding sentence, the items referred to in subparagraph (A) shall include amounts described in paragraph (4) or (6) of section 702(a).
>
> (2) *Nonseparately computed income or loss defined*. For purposes of this subchapter, the term "nonseparately computed income or loss" means gross income minus the deductions allowed to the corporation under this chapter, determined by excluding all items described in paragraph (1)(A).

[1195] Code § 1367(a)(1)(B), referring to "any nonseparately computed income determined under subparagraph (B) of section 1366(a)(1)." Code § 1367 is reproduced in part II.G.4.d.i Basis Limitation Generally. Code § 1366(a)(1) is reproduced in fn 1194.

[1196] At 997, the court pointed out:

> During 1977, petitioner, an airline pilot and an Air Force veteran, attended a flight-training course which maintained and improved skills required in his trade or business. Pursuant to 38 U.S.C. sec. 1677 (1976), he received checks from the Veterans' Administration (VA) totaling 90 percent of the cost of the classes and endorsed them over to the flight-training school. Because the payments received were exempt from taxation under 38 U.S.C. sec. 3101(a) (1976), petitioner did not report them on his 1977 Federal income tax return. He did, however, deduct the entire cost of the flight-training course, including the portion which had been reimbursed by the VA. *Held*, the reimbursed flight-training expenses are allocable to a class of tax-exempt income - the reimbursement - and, therefore, are nondeductible under sect. 265(1), I.R.C. 1954. *Held*, further, respondent is not estopped from disallowing a deduction for such amounts.

Although a couple of cases had held reimbursed expenses were not deductible, a large majority of the court viewed Code § 265 as the strongest ground for disallowance. The Ninth Circuit affirmed, 710 F.2d 1400 (1983), but on the grounds that reimbursed expenses are not deductible; it declined to pass on the merits of Code § 265. *Benningfield v. Commissioner*, 81 T.C. 408 (1983), which did not involve tax-exempt income, cited with approval the Ninth Circuit's opinion that reimbursed expenses are not deductible.

Relying on the Tax Court in *Manocchio*, Rev. Rul. 83-3 disallows deductions attributable to tax-exempt income when a veteran incurs educational expenses allocable to veterans benefits that are exempt from taxation or a student incurs educational expenses if allocable to a scholarship that is excluded from gross income under Code § 117.[1197] Rev. Rul. 83-3 describes how to allocate expenses in those cases. Bittker & Lokken, *Federal Taxation of Income, Estates, and Gifts* (WG&L), ¶ 22.7. Expenses Related to Tax-Exempt Income, recites a litany of cases generally consistent with this disallowance.

> Moreover, we do not view our decision in this case as having any effect on the exemption provided by 38 U.S.C. sec. 3101(a) with respect to flight-training benefits. Although it is true that petitioner is left in the identical situation, from the standpoint of tax consequences, as if he had received a taxable reimbursement, in which case section 265 would not bar his deduction, there will obviously be instances where the veteran's flight-training expenses will be nondeductible irrespective of section 265. For example, the expenses might not satisfy the conditions for deductibility imposed by section 1.162-5, Income Tax Regs., or, assuming they do, the veteran might not have sufficient itemized deductions to take advantage of the deduction. In either of these situations, he would realize additional taxable income in the absence of the exemption provision.
>
> In short, there is nothing in the legislative history of the relevant veterans' provisions to suggest that Congress intended for a veteran to have both an exemption and a tax deduction where his reimbursed flight-training expenses otherwise qualify as deductible business-related education. On the other hand, the legislative purpose behind section 265 is abundantly clear: Congress sought to prevent taxpayers from reaping a double tax benefit by using expenses attributable to tax-exempt income to offset other sources of taxable income. This is precisely what petitioner is attempting to do here, and in our judgment, the application of section 265(1) to disallow the reimbursed portion of the flight-training expense deduction is both reasonable and equitable.

[1197] It also disallowed deductions when a minister incurs interest and taxes paid on a personal residence to the extent that the amounts expended are allocable to a rental allowance excluded from gross income under Code § 107. Rev. Rul. 85-96 modifies the formula for a minister, but Rev. Rul. 87-32 changes how that rule is applied, obsoleting Rev. Rul. 85-96 and also recognizing that then-new Code § 265(a)(6) prevents Code § 265 from denying a deduction for "interest on a mortgage on, or real property taxes on, the home of the taxpayer by reason of the receipt of an amount as (A) a military housing allowance, or (B) a parsonage allowance excludable from gross income under section 107."

If income is exempt from tax because the recipient is a tax-exempt organization, related expenditures are similarly nondeductible.[1198]

A corollary to the idea that reimbursed expenses are not deductible is the tax benefit rule, which states that reimbursements of previously deducted expenses are income. Some tax preparers take the position that one may deduct the expenses in one year and then not recapture the income in a later year if an exception to the tax benefit rule provides relief. For further discussion of tax issues, see part II.G.4.m.iii Tax Benefit Rule.

When a loan is forgiven under the rules of the SBA Paycheck Protection Program (PPP), the debt cancellation is not taxable. However, the debt is forgiven only if certain expenses are incurred, so Notice 2020-32 confirms that those expenses are not deductible in the amount of the loan forgiveness and Rev. Rul. 2020-27 provides procedures. However, Rev. Rul. 2021-2 revoked Notice 2020-32 and Rev. Rul. 2020-27 due to section 278(a) of the Consolidated Appropriations Act, 2021, the latter which provides:

> UNITED STATES TREASURY PROGRAM MANAGEMENT AUTHORITY. For purposes of the Internal Revenue Code of 1986 -
>
> (1) no amount shall be included in the gross income of a borrower by reason of forgiveness of indebtedness described in section 1109(d)(2)(D) of the CARES Act,
>
> (2) no deduction shall be denied, no tax attribute shall be reduced, and no basis increase shall be denied, by reason of the exclusion from gross income provided by paragraph (1), and

---

[1198] *Anclote Psychiatric Center Inc. v. Commissioner*, T.C. Memo. 1998-273:

> We are satisfied that the FPCF liabilities are allocable to petitioner's hospital income in the periods prior to the sale of the hospital and that section 265(1) applies. That being the case, the fact that those payments might have been deductible under section 162(a) had petitioner's hospital business produced taxable income becomes irrelevant since section 265(1) prevails over section 162(a) by disallowing deductions falling within its ambit which are "otherwise allowable". See *supra* note 12 [citing Code § 265]; see also *Stroud v. United States*, 906 F.Supp. 990, 996 (D.S.C. 1995), *affd. in part and vacated in part* without published opinion 94 F.3d 642 (4th Cir. 1996); *Rickard v. Commissioner*, 88 T.C. 188, 193-194 (1987). The fact that the nontaxability of the hospital income derived from petitioner's status rather than from the character of the income as such does not prevent the application of section 265(1). As we stated in *Rickard v. Commissioner*, *supra* at 193-194, where the tax exemption attaching to the taxpayer's farm income derived from his status as an Indian and the location of the farm on Indian land:
>
> > The legislative purpose behind section 265 is abundantly clear: Congress sought to prevent taxpayers from reaping a double tax benefit by using expenses attributable to tax-exempt income to offset other sources of taxable income. *Manocchio v. Commissioner*, 78 T.C. 989, 997 (1982), *affd*. 710 F.2d 1400 (9th Cir. 1983). More importantly, the Supreme Court has concluded that Congress intended to limit deductions to those expenses related to taxed income. *Rockford Life Insurance Co. v. Commissioner*, 292 U.S. 382 (1934). *** [Fn. refs. omitted.)
>
> Nor is it relevant that the tax-exempt income to which FPCF relates was earned by petitioner in an earlier year. In *Stroud v. United States*, *supra*, the taxpayer was denied a deduction for amounts paid in the taxable year because of a breach of contract to provide medical service in return for a tax-exempt scholarship received in an earlier year.
>
> We hold that the FPCF payments in question are not deductible.

(3) in the case of a borrower that is a partnership or S corporation -

(A) any amount excluded from income by reason of paragraph (1) shall be treated as tax exempt income for purposes of sections 705 and 1366 of the Internal Revenue Code of 1986, and

(B) except as provided by the Secretary of the Treasury (or the Secretary's delegate), any increase in the adjusted basis of a partner's interest in a partnership under section 705 of the Internal Revenue Code of 1986 with respect to any amount described in subparagraph (A) shall equal the partner's distributive share of deductions resulting from costs giving rise to forgiveness described in section 1109(d)(2)(D) of the CARES Act.

As tax-exempt income, PPP forgiveness does not increase an S corporation's accumulated adjustments account (AAA). Instead, it increases the other adjustments account (OAA). For the importance of these ideas, see part II.Q.7.b.i Redemptions or Distributions Involving S corporations - Generally. However, that is not the whole story. The IRS takes the position that deductible expenses relating to PPP, which one might assume would reduce AAA because they are deductible, are reclassified from AAA to OAA. By reducing expenses allocated to AAA, PPP forgiveness indirectly increases AAA! The IRS' position is reflected not in any formal pronouncements but rather the following from the Instructions to 2022 Form 1120-S:

Column (d). Other Adjustments Account

The other adjustments account is adjusted for tax-exempt income (and related expenses) and federal taxes attributable to a C corporation tax year. After these adjustments are made, the account is reduced for any distributions made during the year. See Distributions, later.

An S corporation should include tax-exempt income from the forgiveness of PPP loans in column (d) on line 3 of the Schedule M-2.

An S corporation should report expenses paid this year with proceeds from PPP loans that were forgiven this year in column (d) on line 5 of the Schedule M-2.

If column (a) on line 2 or line 4 of the Schedule M-2 includes expenses paid with proceeds from forgiven PPP loans, an S corporation should report that amount in column (a) on line 3 and in column (d) on line 5 of the Schedule M-2.

If column (a) on line 1 of the Schedule M-2 includes expenses that were paid in a prior year with proceeds from PPP loans that were forgiven this year, an S corporation should report that amount in column (a) on line 3 and in column (d) on line 5 of the Schedule M-2.

Rev. Proc. 2021-48, § 3. "Timing Of Tax-Exempt Income," provides:

.01. *Overview*. Subject to section 3.03 of this revenue procedure, a taxpayer that received a PPP Loan may treat tax-exempt income resulting from the partial or complete forgiveness of such PPP Loan as received or accrued:

(1) As, and to the extent that, the taxpayer pays or incurs eligible expenses as described in section 2.01(2). Under this section 3.01(1), a taxpayer that has elected to use the safe harbor provided under Revenue Procedure 2021-20 will be treated as paying or incurring the eligible expenses during the taxpayer's immediately subsequent taxable year following the taxpayer's 2020 taxable year in which the expenses were actually paid or incurred, as described in Revenue Procedure 2021-20;

(2) When the taxpayer files an application for forgiveness of the PPP Loan; or

(3) When the PPP Loan forgiveness is granted.

.02. *Amended returns*. Taxpayers may report tax-exempt income pursuant to section 3.01 on a timely filed original or amended Federal income tax return, information return or administrative adjustment request (AAR) under § 6227 of the Code. *See also* Revenue Procedure 2021-50, 2021-49 I.R.B. ___, released November 18, 2021, allowing an eligible partnership to file an amended Form 1065, *U.S. Return of Partnership Income, as an alternative to filing an AAR, and furnish a corresponding amended Schedule K-1 (Form 1065), Partner's Share of Income, Deductions, Credits, etc.*, to each of its partners. Partners and shareholders that receive amended Forms K-1 as provided in this section 3.02 must file amended Federal income tax returns, information returns or AARs, as applicable, consistent with the Forms K-1 received.

.03. *When PPP Loan is not fully forgiven*. Unless otherwise provided in the 2021 filing year form instructions, if the taxpayer receives forgiveness for an amount of the PPP Loan that is less than the amount that the taxpayer previously treated as tax-exempt income, the taxpayer must make appropriate adjustments on an amended Federal income tax return, information return or AAR, as applicable, for the taxable year(s) in which the taxpayer treated tax-exempt income from the forgiveness of such PPP Loan as received or accrued. Partners and shareholders that receive amended Forms K-1 as provided in this section 3.03 must file amended Federal income tax returns, information returns or AARs, as applicable, consistent with the Forms K-1 received.

.04. *Reporting consistent with this revenue procedure*. The IRS will publish form instructions for the 2021 filing season that will detail how taxpayers can report consistently with sections 3.01 through 3.03 of this revenue procedure. However, taxpayers do not need to wait until the instructions are published to apply this revenue procedure.

.05. *Gross receipts application*. To the extent tax-exempt income resulting from the partial or complete forgiveness of a PPP Loan is treated as gross receipts under a particular Federal tax provision, including but not limited to § § 448(c) and 6033 of the Code, section 3 of this revenue procedure applies for purposes of determining the timing and, to the extent relevant, reporting of such gross receipts.

Rev. Proc. 2021-49 provides additional guidance. Rather than reciting details, here is an excerpt, § 1, "Purpose":

.01. This revenue procedure provides guidance for partnerships and consolidated groups regarding amounts excluded from gross income (tax exempt income) and deductions relating to the Paycheck Protection Program (PPP) and certain other COVID-19 relief programs. More specifically:

(1) This revenue procedure provides guidance for partners and their partnerships regarding:

(a) allocations under § 704(b) of the Internal Revenue Code (Code) of tax exempt income arising from the forgiveness of PPP Loans, the receipt of certain grant proceeds, or the subsidized payment of certain principal, interest and fees;

(b) allocations under § 704(b) of the Code of deductions resulting from expenditures attributable to the use of forgiven PPP Loans or certain grant proceeds, or subsidized payments of certain interest and fees; and

(c) the corresponding adjustments to be made with respect to the partners' bases in their partnership interests under § 705 of the Code.

(2) This revenue procedure also provides guidance under § 1502 of the Code and § 1.1502-32 of the Income Tax Regulations regarding the corresponding basis adjustments for stock of subsidiary members of consolidated groups as a result of tax exempt income arising from certain forgiven PPP Loans, grant proceeds, or subsidized payment of certain principal, interest and fees.

.02. For guidance on the timing of tax exempt income arising from forgiven PPP Loans, see Rev. Proc. 2021-48, 2021-49 I.R.B. ___, released on November 18, 2021.

Similarly, Rev. Proc. 2021-50, § 1, "Purpose," provides:

> This revenue procedure allows eligible partnerships to file amended partnership returns for taxable years ending after March 27, 2020 using a Form 1065, U.S. Return of Partnership Income (Form 1065), with the "Amended Return" box checked, and issue an amended Schedule K-1, Partner's Share of Income, Deductions, Credits, etc. (Schedule K-1), to each of its partners. An eligible partnership may file an amended return under Rev. Proc. 2021-48, 2021-49 I.R.B.___, or Rev. Proc. 2021-49, 2021-49 I.R.B. ___, if the requirements of section 3 of this revenue procedure are met. In order to take advantage of the option to amend provided in this revenue procedure, amended partnership returns must be filed, and corresponding Schedules K-1 must be furnished, on or before December 31, 2021.

The *Journal of Accountancy* (11/1/2020) summarizes accounting issues relating to PPP loan forgiveness.[1199]

[1199] https://www.journalofaccountancy.com/issues/2020/nov/coronavirus-pandemic-accounting-judgments.html.

II.G.4.d. Basis Limitation for Shareholders in an S Corporation

II.G.4.d.i. Basis Limitation Generally

As to S corporations, Code § 1366(d)(1), "Cannot exceed shareholder's basis in stock and debt," provides:

> The aggregate amount of losses and deductions taken into account by a shareholder under subsection (a) for any taxable year shall not exceed the sum of
>
> (A) the adjusted basis of the shareholder's stock in the S corporation (determined with regard to paragraphs (1) and (2)(A) of section 1367(a) for the taxable year), and
>
> (B) the shareholder's adjusted basis of any indebtedness of the S corporation to the shareholder (determined without regard to any adjustment under paragraph (2) of section 1367(b) for the taxable year).

The extent to which they may use debt in addition to this is described in part II.G.4.d.ii Using Debt to Deduct S Corporation Losses.

Code § 1367(a) provides the general rules for calculating basis in S corporation stock (Code § 1366 being items in the K-1 the corporation issues the shareholder):

> (1) *Increases in basis*. The basis of each shareholder's stock in an S corporation shall be increased for any period by the sum of the following items determined with respect to that shareholder for such period:
>
> (A) the items of income described in subparagraph (A) of section 1366(a)(1),
>
> (B) any nonseparately computed income determined under subparagraph (b) of section 1366(a)(1), and
>
> (C) the excess of the deductions for depletion over the basis of the property subject to depletion.
>
> (2) *Decreases in basis*. The basis of each shareholder's stock in an S corporation shall be decreased for any period (but not below zero) by the sum of the following items determined with respect to the shareholder for such period:
>
> (A) distributions by the corporation which were not includible in the income of the shareholder by reason of section 1368,
>
> (B) the items of loss and deduction described in subparagraph (A) of section 1366(a)(1),
>
> (C) any nonseparately computed loss determined under subparagraph (b) of section 1366(a)(1),

(D) any expense of the corporation not deductible in computing its taxable income and not properly chargeable to capital account,[1200] and

(E) the amount of the shareholder's deduction for depletion for any oil and gas property held by the S corporation to the extent such deduction does not exceed the proportionate share of the adjusted basis of such property allocated to such shareholder under section 613A(c)(11)(B) .

The decrease under subparagraph (b) by reason of a charitable contribution (as defined in section 170(c)) of property shall be the amount equal to the shareholder's pro rata share of the adjusted basis of such property.

"The shareholder bears the burden of establishing his basis in an S corporation."[1201] IRS provides a guide to determining that basis – see https://www.irs.gov/businesses/small-businesses-self-employed/s-corporation-stock-and-debt-basis – and provides a form – see About Form 7203, S Corporation Shareholder Stock and Debt Basis Limitations.

Code § 1366(d)(2), "Indefinite carryover of disallowed losses and deductions," provides:

(A) *In general*. Except as provided in subparagraph (B), any loss or deduction which is disallowed for any taxable year by reason of paragraph (1) shall be treated as incurred by the corporation in the succeeding taxable year with respect to that shareholder.

[1200] Reg. § 1.1367-1(c)(2) provides:

Noncapital, nondeductible expenses. For purposes of section 1367(a)(2)(D), expenses of the corporation not deductible in computing its taxable income and not properly chargeable to a capital account (noncapital, nondeductible expenses) are only those items for which no loss or deduction is allowable and do not include items the deduction for which is deferred to a later taxable year. Examples of noncapital, nondeductible expenses include (but are not limited to) the following: illegal bribes, kickbacks, and other payments not deductible under section 162(c); fines and penalties not deductible under section 162(f); expenses and interest relating to tax-exempt income under section 265; losses for which the deduction is disallowed under section 267(a)(1); the portion of meals and entertainment expenses disallowed under section 274; and the two-thirds portion of treble damages paid for violating antitrust laws not deductible under section 162. For basis adjustments necessary to coordinate sections 1367 and 362(e)(2), see § 1.362-4(f)(ii).

Among loss disallowances that lose basis under Code § 267 is part II.Q.7.h.iii.(b) Nondeductible Loss to Corporation When It Distributes Property to Shareholders.

[1201] *Hall v. Commissioner*, T.C. Memo. 2014-171, citing *Broz v. Commissioner*, 137 T.C. 46, 60 (2011), *aff'd* 727 F.3d 621 (6th Cir. 2013). The taxpayers asked for trouble and got it:

[The CPA firm] did not prepare a basis schedule for Mr. Hall's basis in Ophthalmic Associates. Instead, [the CPA firm's forensic accountant] testified that he analyzed gross receipts to estimate Mr. Hall's basis. Mr. Hall and Mrs. Hall did not offer into evidence the purported analysis used by [the CPA] to estimate Mr. Hall's basis. Instead, Mr. Hall and Mrs. Hall offered into evidence monthly bank statements for Ophthalmic Associates for January 2005 and December 2006. We note that Mr. Hall and Mrs. Hall did not share these bank statements with respondent before trial pursuant to the Court's pretrial order. Mrs. Hall testified that during the weekend before trial she realized that two of the deposits were actually loans made to Ophthalmic Associates. Mr. Hall and Mrs. Hall did not provide sufficient evidence for us to find that these amounts were loans. We are not required to accept Mr. Hall and Mrs. Hall's self-serving testimony. See *Tokarski v. Commissioner*, 87 T.C. 74, 77 (1986). We find that petitioners have failed to prove that Mr. Hall and Mrs. Hall had a basis in Ophthalmic Associates in an amount greater than respondent determined.

(B) *Transfers of stock between spouses or incident to divorce*. In the case of any transfer described in section 1041(a) of stock of an S corporation, any loss or deduction described in subparagraph (A) with respect such stock shall be treated as incurred by the corporation in the succeeding taxable year with respect to the transferee.

Implementing Code § 1366(d)(2), Reg. § 1.1366-2(a)(6), "Nontransferability of losses and deductions," provides:

(i) *In general*. Except as provided in paragraph (a)(6)(ii) of this section, any loss or deduction disallowed under paragraph (a)(1) of this section is personal to the shareholder and cannot in any manner be transferred to another person. If a shareholder transfers some but not all of the shareholder's stock in the corporation, the amount of any disallowed loss or deduction under this section is not reduced and the transferee does not acquire any portion of the disallowed loss or deduction. If a shareholder transfers all of the shareholder's stock in the corporation, any disallowed loss or deduction is permanently disallowed.

(ii) *Exceptions for transfers of stock under section 1041(a)*. If a shareholder transfers stock of an S corporation after December 31, 2004, in a transfer described in section 1041(a), any loss or deduction with respect to the transferred stock that is disallowed to the transferring shareholder under paragraph (a)(1) of this section shall be treated as incurred by the corporation in the following taxable year with respect to the transferee spouse or former spouse. The amount of any loss or deduction with respect to the stock transferred shall be determined by prorating any losses or deductions disallowed under paragraph (a)(1) of this section for the year of the transfer between the transferor and the spouse or former spouse based on the stock ownership at the beginning of the following taxable year. If a transferor claims a deduction for losses in the taxable year of transfer, then under paragraph (a)(5) of this section, if the transferor's pro rata share of the losses and deductions in the year of transfer exceeds the transferor's basis in stock and the indebtedness of the corporation to the transferor, then the limitation must be allocated among the transferor spouse's pro rata share of each loss or deduction, including disallowed losses and deductions carried over from the prior year.

(iii) *Examples*. The following examples illustrates the provisions of paragraph (a)(6)(ii) of this section:

Example (1). A owns all 100 shares in X, a calendar year S corporation. For X's taxable year ending December 31, 2006, A has zero basis in the shares and X does not have any indebtedness to A. For the 2006 taxable year, X had $100 in losses that A cannot use because of the basis limitation in section 1366(d)(1) and that are treated as incurred by the corporation with respect to A in the following taxable year. Halfway through the 2007 taxable year, A transfers 50 shares to B, A's former spouse in a transfer to which section 1041(a) applies. In the 2007 taxable year, X has $80 in losses. On A's 2007 individual income tax return, A may use the entire $100 carryover loss from 2006, as well as A's share of the $80 2007 loss determined under section 1377(a) ($60), assuming A acquires sufficient basis in the X stock. On B's 2007 individual income tax return, B may use B's share of the $80 2007 loss determined under section 1377(a) ($20), assuming B has sufficient basis in the X stock. If any disallowed 2006 loss is disallowed to A under section 1366(d)(1) in 2007, that loss is prorated between A and B based on their stock ownership at the beginning of 2008. On B's 2008 individual income tax return, B may use that loss, assuming B acquires sufficient basis in the X stock. If neither A nor B acquires any basis during the 2007 taxable year, then as of the beginning of 2008, the corporation will be treated as incurring $50 of loss with respect to A and $50 of loss with respect to B for the $100 of disallowed 2006 loss, and the corporation will be treated as incurring $60 of loss with respect to A and $20 with respect to B for the $80 of disallowed 2007 loss.

Example (2). Assume the same facts as Example 1, except that during the 2007 taxable year, A acquires $10 of basis in A's shares in X. For the 2007 taxable year, A may claim a $10 loss deduction, which represents $6.25 of the disallowed 2006 loss of $100 and $3.75 of A's 2007 loss of $60. The disallowed 2006 loss is reduced to $93.75. As of the beginning of 2008, the corporation will be treated as incurring half of the remaining $93.75 of loss with respect to A and half of that loss with respect to B for the remaining $93.75 of disallowed 2006 loss, and if B does not acquire any basis during 2007, the corporation will be treated as incurring $56.25 of loss with respect to A and $20 with respect to B for the remaining disallowed 2007 loss.

II.G.4.d.ii. Using Debt to Deduct S Corporation Losses

II.G.4.d.ii.(a). Limitations on Using Debt to Deduct S Corporation Losses

Owners of S corporations generally may not deduct losses financed by the corporation's debt except to the extent that the shareholders are the lenders;[1202] instead of guaranteeing a

---

[1202] Code § 1366(d)(1)(B) allows deductions against:

> the shareholder's adjusted basis of any indebtedness of the S corporation to the shareholder (determined without regard to any adjustment under paragraph (2) of section 1367(b) for the taxable year).

Code § 1367 is reproduced in part II.G.4.d.i Basis Limitation Generally. Code § 1367(c)(2) provides:

> (A) *Reduction of basis*. If for any taxable year the amounts specified in subparagraphs (B), (C), (D), and (E) of subsection (a)(2) exceed the amount which reduces the shareholder's basis to zero, such excess shall be applied to reduce (but not below zero) the shareholder's basis in any indebtedness of the S corporation to the shareholder.
>
> (B) *Restoration of basis*. If for any taxable year beginning after December 31, 1982, there is a reduction under subparagraph (A) in the shareholder's basis in the indebtedness of an S corporation to a shareholder, any net increase (after the application of paragraphs (1) and (2) of subsection (a)) for any subsequent taxable year shall be applied to restore such reduction in basis before any of it may be used to increase the shareholder's basis in the stock of the S corporation.

Reg. § 1.1366-2(a)(2)(i) provides:

> *In general*. The term basis of any indebtedness of the S corporation to the shareholder means the shareholder's adjusted basis (as defined in § 1.1011-1 and as specifically provided in section 1367(b)(2)) in any bona fide indebtedness of the S corporation that runs directly to the shareholder. Whether indebtedness is bona fide indebtedness to a shareholder is determined under general Federal tax principles and depends upon all of the facts and circumstances.

corporation's bank loan,[1203] S corporation shareholders should borrow and then loan the proceeds to the corporation to deduct the loss.[1204]

[1203] Reg. § 1.1366-2(a)(2)(ii) provides:

> *Special rule for guarantees*. A shareholder does not obtain basis of indebtedness in the S corporation merely by guaranteeing a loan or acting as a surety, accommodation party, or in any similar capacity relating to a loan. When a shareholder makes a payment on bona fide indebtedness of the S corporation for which the shareholder has acted as guarantor or in a similar capacity, then the shareholder may increase the shareholder's basis of indebtedness to the extent of that payment.

[1204] Reg. § 1.1366-2(a)(2)(iii), Examples (2) (shareholder borrowed from another S corporation she owned and loaned the proceeds to the loss corporation) and (4) (no basis in loan for guarantee, but guarantor received basis in indebtedness when she made payments to the bank because the corporation no longer could).

To cut down on controversy in this area,[1205] regulations focus on whether the corporation's debt to the shareholder is bona fide[1206] and intend to override the "actual economic outlay" doctrine that had been developed.[1207] The preamble to the Proposed Regulations explained:[1208]

[1205] Starr, "How to Obtain Debt Basis in an S Corporation? Use Bona Fide Indebtedness, Say Proposed Rules, Journal of Taxation," *Journal of Taxation* (obtained from the *Journal*'s preview service; probably published November 2012). The author of this article suggests that the Proposed Regulations adopted the recommendations of the American Bar Association's Section of Taxation (the "Tax Section"), http://www.americanbar.org/content/dam/aba/migrated/tax/pubpolicy/2010/072610comments.authcheckdam.pdf, in which the author participated. The Tax Section's comments on the Proposed Regulations are at
http://www.americanbar.org/content/dam/aba/administrative/taxation/091712comments2.authcheckdam.pdf (9/17/2012). T.D. 9682 (7/23/2014) adopted the proposed regulations with very few changes. Reg. § 1.1366-5(b) allows taxpayers to rely on Reg. § 1.1366-2(a)(2) with respect to indebtedness between an S corporation and its shareholder that resulted from any transaction that occurred in a year for which the period of limitations on the assessment of tax has not expired before July 23, 2014. Reg. § 1.1366-2(a)(2) preempts case law, which provided unpredictable results. See *Russell v. Commissioner*, T.C. Memo. 2008-246 (shareholders co-signing loans made by others did not provides basis; also, adjusting journal entries regarding loans were not respected because timing was suspicious), *aff'd per curiam United Energy Corporation v. Commissioner*, 106 AFTR.2d 2010-6056 (8th Cir. 2010). On the other hand, the fact that a loan made directly to the shareholder was repaid by the corporation did not mean that the corporation was deemed to have borrowed the money. *Gleason v. Commissioner*, T.C. Memo. 2006-191. If a creditor obtains a judgment against a shareholder who guaranteed a loan to the corporation, the shareholder is not deemed to have made a loan to the corporation until the shareholder actually makes a payment to the creditor. *Montgomery v. Commissioner*, T.C. Memo. 2013-151.

[1206] See part II.G.20.b When Debt Is Recharacterized as Equity for various cases determining whether debt was bona fide.

[1207] The preamble to the proposed regulations, REG-1342042-07, explained:

> The frequency of disputes between S corporation shareholders and the government regarding whether certain loan transactions involving multiple parties, including back-to-back loan transactions, create shareholder basis of indebtedness demonstrates the complexity of and uncertainty about this issue for both shareholders and the government. The Treasury Department and the IRS propose these regulations to clarify the requirements for increasing basis of indebtedness and to assist S corporation shareholders in determining with greater certainty whether their particular arrangement creates basis of indebtedness. These proposed regulations require that loan transactions represent bona fide indebtedness of the S corporation to the shareholder in order to increase basis of indebtedness; therefore, an S corporation shareholder need not otherwise satisfy the "actual economic outlay" doctrine for purposes of section 1366(d)(1)(B).

The IRS had attacked loans that seem too circular. See, e.g. TAM 200619021, which was upheld in *Kerzner v. Commissioner*, T.C. Memo. 2009-76 (S corp. paid rent to partnership owned by its shareholders, partnership then loaned rent to its partners, who then loaned the same money to the S corp.). The preamble to the Proposed Regulations summarized these cases, some of which are cited in the *Kerzner* case as well. See Example 4 of the regulations, discussed in fn. 1212, for comments on the circular flow of funds and the *Kerzner* case.

[1208] The preamble cites the following cases as examples:

> *Knetsch v. U.S.*, 364 U.S. 361 (1960) (disallowing interest deductions for lack of actual indebtedness); *Geftman v. Comm'r*, 154 F.3d 61, 68-75 (3d Cir. 1998) (based on the objective attributes and the economic realities of the transaction, holding that the transaction at issue was not a bona fide debt); *Estate of Mixon v. U.S.*, 464 F.2d 394, 402 (5th Cir. 1972) (discussion of factors indicative that debt is bona fide); *Litton Business Systems, Inc. v. Comm'r*, 61 T.C. 367, 376-77 (1973).

The article at footnote 1205 discusses the approaches recommended by the AICPA and the Section of Taxation of the American Bar Association took regarding what is bona fide debt.

> The key requirement of these proposed regulations is that purported indebtedness of the S corporation to a shareholder must be bona fide indebtedness to the shareholder. These proposed regulations do not attempt to provide a different standard for purposes of section 1366 as to what constitutes bona fide indebtedness. Rather, general Federal tax principles — many of which have developed outside of section 1366 — determine whether indebtedness is bona fide.

Final Regulations retained this rule, without any changes.[1209]

The Regulations provide some helpful examples:

- A shareholder who lends money to an S corporation has basis of indebtedness, even if the shareholder's wholly-owned disregarded (for income tax purposes) LLC makes the loan.[1210] Query whether the at-risk rules might limit the loss.

- If a shareholder borrows money from one S corporation he wholly owns and lends it to another S corporation, the loan to the S corporation gives the shareholder basis of indebtedness.[1211]

- If one S corporation borrows from another S corporation and the lending corporation distributes the loan to the person who is the sole shareholder of both corporations, the distribution of the loan gives the shareholder basis of indebtedness.[1212] Until the loan is

---

[1209] T.D. 9682 (2014) included commented on the actual economic outlay test:

> Courts developed the actual economic outlay standard, which requires that shareholders be made "poorer in a material sense" to increase their bases of indebtedness. Some courts concluded that an S corporation shareholder was not poorer in a material sense if the shareholder borrowed funds from a related entity and then lent those funds to his S corporation. See, for example, *Oren v. Commissioner*, 357 F.3d 854 (8th Cir. 2004), *aff'g*, T.C. Memo. 2002-172. Instead of applying the actual economic outlay standard, the proposed regulations provided that shareholders receive basis of indebtedness if it is bona fide indebtedness of the S corporation to the shareholder.
>
> One commentator suggested that language be added to the regulations providing that actual economic outlay is no longer the standard used to determine whether a shareholder obtains basis of indebtedness. After considering this comment, the Treasury Department and the IRS believe that the proposed regulations clearly articulate the standard for determining basis of indebtedness of an S corporation to its shareholder, and further discussion of the actual economic outlay test in the regulations is unnecessary. Accordingly, the final regulations adopt the rule in the proposed regulations without change.
>
> With respect to guarantees, however, the final regulations retain the economic outlay standard by adopting the rule in the proposed regulations that S corporation shareholders may increase their basis of indebtedness only to the extent they actually perform under a guarantee. The final regulations make some minor changes to clarify the treatment of guarantees, including changing the heading to reiterate that the rule for guarantees is distinguished from the general rule adopting a bona fide indebtedness standard and moving the guarantee example after the examples illustrating the general rule consistent with the order of the regulations.

[1210] Reg. § 1.1366-2(a)(2)(iii), Example 1.

[1211] Reg. § 1.1366-2(a)(2)(iii), Example 2.

[1212] Reg. § 1.1366-2(a)(2)(iii), Example 3. Make sure that the distribution of the loans is well documented contemporaneously, as did <u>not</u> happen in *Broz v. Commissioner*, 137 T.C. 46 (2011), *aff'd* 727 F.3d 621 (6th Cir. 2013). T.D. 9682, adopting final regulations, commented on Example 4:

> The Treasury Department and the IRS recognize that there are numerous ways, including certain circular cash flows, in which an S corporation can become indebted to its shareholder. The

distributed, however, the owner of the lending S corporation cannot receive basis for the loan, according to cases that applied to a taxable year before the Regulations applied.[1213]

> proposed regulations included Example 4 as an example of a loan originating between two related entities that is restructured to be from the S corporation to the shareholder to show that the debt need not originate between the S corporation and its shareholder, provided that the resulting debt running between the S corporation and the shareholder is bona fide. The Treasury Department and the IRS are aware, however, of cases involving circular flow of funds that do not result in bona fide indebtedness. See, for example, *Oren v. Commissioner*, 357 F.3d at 859 (purported loans, although meeting all the proper formalities, lacked substance); *Kerzner v. Commissioner*, T.C. Memo. 2009-76, at 5 (transaction lacked substance because money wound up right where it started and shareholder was merely a conduit through which the money flowed). Whether a restructuring results in bona fide indebtedness depends on the facts and circumstances. Because the Treasury Department and the IRS believe that the examples in the proposed regulations adequately illustrate that a restructuring of a debt that did not originate between the shareholder and the S corporation may result in basis of indebtedness as long as the resulting debt is bona fide, these final regulations do not contain additional examples.

[1213] *Messina v. Commissioner*, T.C. Memo. 2017-213, *aff'd* 124 A.F.T.R.2d 2019-7144 (9th Cir. 12/27/2019), rejecting taxpayers' arguments that the lending S corporation be treated as a mere agent for its owners rather than being respected as an entity. The court rejected the taxpayers' assertion that *Commissioner v. Bollinger*, 485 U.S. 340 (1988), or *Lee v. Commissioner*, T.C. Memo. 1976-265, allowed taxpayers to disregard the form of the transaction they chose. *Meruelo v. Commissioner*, T.C. Memo. 2018-16, had a similar result, reasoning:

> Finally, in *Yates* and *Culnen* the transactions alleged to create basis were actually booked as loans. The corporations contemporaneously recorded shareholder loans on their ledgers, and payments of principal and interest were made on the loans. *Yates*, 82 T.C.M. (CCH) at 806-807; *Culnen*, 79 T.C.M. (CCH) at 1934-1935. Here, by contrast, the transactions were contemporaneously booked as capital contributions, payroll expenses, or inter-company accounts payable and receivable. Merco's net accounts payable to affiliates were recharacterized as "shareholder loans" only after the close of each year, when Mr. Carerras prepared the tax returns and adjusted Merco's book entries to match. No payments of principal or interest were ever made on these supposed "shareholder loans." See *Broz*, 137 T.C. at 52-53 (rejecting incorporated pocketbook theory where corporation made year-end adjustments reclassifying advances as shareholder loans); *Wilson v. Commissioner*, T.C. Memo. 1991-544 (rejecting reclassification of transactions on the basis of year-end journal entries).
>
> For these reasons, we find that petitioner has not carried his burden of proving that he used the 11 Merco affiliates as an "incorporated pocketbook" to pay Merco's expenses. Under this theory, as under his back-to-back loan theory, petitioner seeks to disavow the form of inter-company extensions of credit in an effort to generate basis for himself.[7] Because petitioner has not established the existence of bona fide indebtedness running from Merco directly to him, he is not entitled to the increased basis he claims. *Hitchins*, 103 T.C. at 715; sec. 1.1366-2(a)(2)(i), Income Tax Regs. [The 2014 regulations did not apply, but the court said that they would not have helped the taxpayer even if they had applied.]
>
> [7] Petitioner errs in seeking to accomplish the same result by invoking the doctrine of "constructive receipt." See sec. 1.451-2(a), Income Tax Regs. This doctrine addresses a timing issue, *viz.*, whether an item of income is includible in a taxpayer's gross income regardless of actual receipt. It has no conceivable relevance in determining whether a taxpayer has made an actual economic outlay sufficient to create increased basis in the stock or indebtedness of an S corporation.

Reg. § 1.451-2(a), the constructive receipt doctrine, is reproduced in the text accompanying fns 4205-4206 in part II.Q.1.e Trying to Avoid Possible Ordinary Income on the Sale of a Partnership or S Corporation.

In *Meruelo v. Commissioner*, 923 F.3d 938 (2019) affirmed the *Meruelo* Tax Court. Among its holdings, the Eleventh Circuit rejected the taxpayer's attempt to recharacterize intercompany loans:

- If a shareholder makes payment with respect to a loan guarantee, the payment gives the shareholder basis of indebtedness.[1214]

> Meruelo also argues that his accountant's end-of-year reclassification of the intercompany transfers, as reflected on his tax returns and on the annual adjustments to the line-of-credit from the 2004 Note, were sufficient to establish that the transactions amounted to shareholder, but we disagree. "After-the-fact reclassification cannot satisfy the requirement that the debt run directly from the S corporation to the taxpayer/shareholder, and courts have previously rejected efforts by taxpayers to establish debt basis in an S corporation using this method." *Broz v. Comm'r*, 727 F.3d 621, 627 (6th Cir. 2013); *Ruckriegel v. Comm'r*, 91 T.C.M. (CCH) 1035 (2006) (ruling that yearend reclassification of intercorporate loans as back-to-back loans through the taxpayer was insufficient to provide debt basis); *Burnstein v. Comm'r*, 47 T.C.M. (CCH) 1100 (1984) (same). Because the transactions were contemporaneously classified as transactions between the affiliates and Merco, the designation Meruelo's accountant gave them at the end of the year does not govern. And we agree with the Tax Court that the accountant's adjustments to "a notional line of credit, uniformly made after the close of each relevant tax year, do not suffice to create indebtedness to [Meruelo] where none in fact existed."

The Eleventh Circuit agreed with the Tax Court in rejecting the taxpayer's incorporated pocketbook theory, concluding:

> As the Tax Court explained, no court has ever ruled that a group of non-wholly owned entities that both receive and disburse funds in this fashion can constitute an incorporated pocketbook. And Meruelo failed to establish that he habitually paid third parties on his behalf through the putative incorporated-pocketbook companies. Meruelo's evidence established only that the Merco affiliates regularly paid the expenses of other companies within the affiliate group - not his personal expenses. See *Broz*, 727 F.3d at 628 (affirming Tax Court's rejection of taxpayers' "incorporated pocketbook" argument where the taxpayers failed to establish that they habitually paid third parties through the entities); *Messina v. Comm'r*, 114 T.C. Memo. 2017-213, at *32–33 (2017) (rejecting theory on the same ground); *Ruckriegel*, 91 T.C.M. (CCH) 1035 (same).

[1214] Reg. § 1.1366-2(a)(2)(iii), Example (4), "Guarantee," which is reproduced in fn 6259 in part III.B.1.a.ii.(a) Gift Tax Issues Involving Loan Guarantees. For a taxable year before the regulation was effective, see *Franklin v. Commissioner*, T.C. Memo. 2016-207, describing when an S corporation's creditor, ARCO, seized property of the taxpayer who owned the S corporation:

> On the basis of his testimony, applying a preponderance-of-the-evidence standard, we find that, in 2007, ACRO seized and sold petitioner's property and applied the proceeds, $496,000, to FDI's indebtedness to it pursuant to petitioner's obligation as a guarantor. That gave rise to an indebtedness from FDI to petitioner in an equal amount. See *Putnam v. Commissioner*, 352 U.S. 82, 85 (1946) ("The familiar rule is that, instanter upon the payment by the guarantor of the debt, the debtor's obligation to the creditor becomes an obligation to the guarantor[.]"); *Perry v. Commissioner*, 47 T.C. 159, 164 (1966), *aff'd*, 392 F.2d 458 (8th Cir. 1968). Petitioner's basis in that indebtedness increased the limitation on the amount of FDI's losses and deductions that he could take into account. See sec. 1366(d)(1)(B); see also Rev. Rul. 70-50, 1970-1 C.B. 178 (1970) ("Payment by a shareholder-guarantor of a loan made by a bank to an electing small business corporation is treated as an indebtedness of the corporation to the shareholder for purposes of computing his portion of a net operating loss.").[7] That is not so with respect to the remaining $500,000 that petitioner claims he guaranteed. As we said in *Raynor v. Commissioner*, 50 T.C. 762, 770-771 (1968): "No form of indirect borrowing, be it guaranty, surety, accommodation, comaking or otherwise, gives rise to indebtedness from the corporation to the shareholders until and unless the shareholders pay part or all of the obligation." See also *Borg v. Commissioner*, 50 T.C. 257 (1968). Petitioner may, therefore, deduct the $343,939 passthrough loss from FDI that he reported on his 2007 Form 1040.
>
> [7] Although entitled to consideration, revenue rulings do not have the force of law. *Dixon v. United States*, 381 U.S. 68, 73 (1965); see, *e.g.*, *Murray v. Commissioner*, T.C. Memo. 2012-213, 2012 WL 3030366, at *2 n.3.

When the shareholder is named as a co-borrower but really is just a guarantor, the shareholder is not deemed to have borrowed the money and loaned it to the corporation.[1215]

II.G.4.d.ii.(b). Consequences of Using Shareholder Debt to Deduct S Corporation Losses

When losses are deducted against the basis in a loan, the shareholder's basis in the loan is less than the principal, generally causing income recognition when principal payments are made.[1216]

For a taxable year before the regulation was effective, *Phillips v. Commissioner*, TC Memo 2017-61, held that judgments against a shareholder did not constitute an "economic outlay" (fn. 1207) until the shareholder paid on a guarantee.

For a taxable year before the regulation was effective, the sole owner of an S corporation that liquidated failed to prove that he had assumed the debt when the loan continued to show the corporation as the borrower. *Tinsley v. Commissioner*, T.C. Summary Opinion 2017-9. Although common sense suggests that the sole owner had assumed the debt because presumably the business was operated as a sole proprietorship, the taxpayer did not prove the form of business post-liquidation and bizarrely kept the loan in the liquidated corporation's name when it was renewed after liquidation; presumably the lender did not care about that detail because he personally guaranteed the loan, and payments were made (with the owner not proving who was making post-liquidation payments on the loan).

[1215] *Hargis v. Commissioner*, T.C. Memo. 2016-232, *aff'd Hargis v. Koskinen*, 121 A.F.T.R.2d 2018-2206 (8th Cir. 6/22/2018), applied the old economic outlay test (fn. 1207), but the analysis seems consistent with the bona fide loan requirement under Reg. § 1.1366-2 (fn. 1208). The Tax Court stated:

> …. Petitioners ask us to view petitioner's comaking and guaranty arrangements constructively as back-to-back loans from the lenders to petitioner and from petitioner to the operating companies. The "substance over form" argument advanced by petitioners here has been mostly rejected by this Court in past cases…..
>
> In the case at hand none of the proceeds of the loan agreements entered into by petitioner and his operating companies were ever advanced to petitioner individually….
>
> None of the notes petitioner signed as coborrower or guarantor were collateralized by petitioner's own property….
>
> Lastly, petitioners provided no convincing evidence that any of the lenders looked to petitioner as the primary obligor on the loans received by the operating companies….
>
> Because the form of the transactions shows the indebtedness existed directly between the operating companies and the lenders, and because petitioners have not shown that the substance of those transactions should be viewed differently from their form, we conclude that petitioner's role as comaker or guarantor of the operating companies' notes did not entitle him to claim basis in the indebtedness of the operating companies under section 1366(d)(1).

[1216] When losses are deducted against the loan's basis, with under Code § 1367(b)(2)(A) making the loan's basis less than the principal that is owed, refinancing by repaying the loan from the shareholders to the corporation might cause a creditor-shareholder to recognize income. Any net increase (the amount by which the shareholder's pro rata share of the items described in Code § 1367(a)(1), relating to income items and excess deduction for depletion, exceed the items described in Code § 1367(a)(2), relating to losses, deductions, noncapital, nondeductible expenses, certain oil and gas depletion deductions, and certain distributions) in any subsequent taxable year of the corporation is applied to restore that reduction. Reg. § 1.1367-2(c)(1), interpreting Code § 1367(b)(2)(B). Some taxpayers argued that Code § 118(a) excludes contributions to capital from income, and therefore such contributions constituted tax-exempt income that increased basis in the loan; the Tax Court and Second Circuit held that such contributions are not tax-exempt income because they are not income at all. *Nathel v. Commissioner*, 131 T.C. 262 (2008), *aff'd* 615 F.3d 83 (2nd Cir. 2010).

Special rules apply to "open account" debt - shareholder advances not evidenced by separate written instruments and repayments on the advances, the aggregate outstanding principal of which does not exceed $25,000 of indebtedness of the S corporation to the shareholder at the close of the

When the corporation's later income gives the shareholder basis, the loan's basis is restored before the stock's basis increases.[1217]

When the debt to the shareholder is evidenced by a note or other written instrument held at least one year, the debt is a capital asset and repayment will result in long-term capital gain.[1218] However, if the debt is not evidenced by a written instrument (*e.g.*, open account debt), the income upon repayment will be ordinary income;[1219] open account debt also risks being recharacterized as a contribution to capital, the repayment of which might be recharacterized as a distribution that might then be recharacterized as disguised compensation.[1220] Unless a

[1219] Rev. Rul. 68-537.

[1220] *Glass Blocks Unlimited v. Commissioner*, T.C. Memo. 2013-180, upheld the IRS determination of wages, resulting in payroll taxes and penalties on what the taxpayer claimed to be repayment of open account debt. In testing for contribution to capital vs. loan treatment, the court held that:

> factors include: (1) the names given to the documents that would be evidence of the purported loans; (2) the presence or absence of a fixed maturity date; (3) the likely source of repayment; (4) the right to enforce payments; (5) participation in management as a result of the advances; (6) subordination of the purported loans to the loans of the corporation's creditors; (7) the intent of the parties; (8) the capitalization of the corporation; (9) the ability of the corporation to obtain financing from outside sources; (10) thinness of capital structure in relation to debt; (11) use to which the funds were put; (12) the failure of the corporation to repay; and (13) the risk involved in making the transfers. *Calumet Indus., Inc. v. Commissioner*, 95 T.C. 257, 285 (1990).

But for the court's view that the taxpayer was lying (testified in court that he worked 20 hours per week when he told the IRS examiner that he worked full time and all evidence supported his statements to the IRS), the situation appeared sympathetic. The company barely broke even, and the relatively modest payments to the shareholder-employee that were recharacterized as wages were much larger than his K-1 income. The taxpayer would have paid lower employment taxes if the entity had been taxed as sole proprietorship.

On the other hand, after citing the same 13 factors, *Scott Singer Installations, Inc. v. Commissioner*, TC Memo 2016-161, *acq.* 2017-15 I.R.B. 1072 (see fn. 1221 for the limited scope of acquiescence and hostility toward the court's decision), held:

> No single factor is controlling. *Dixie Dairies Corp. v. Commissioner*, 74 T.C. at 493. However, the ultimate question is whether there was a genuine intention to create a debt, with a reasonable expectation of repayment, and whether that intention comported with the economic reality of creating a debtor-creditor relationship. *Litton Bus. Sys., Inc. v. Commissioner*, 61 T.C. 367, 377 (1973).
>
> Transfers to closely held corporations by controlling shareholders are subject to heightened scrutiny, however, and the labels attached to such transfers by the controlling shareholder through bookkeeping entries or testimony have limited significance unless these labels are supported by other objective evidence. *E.g.*, *Boatner v. Commissioner*, T.C. Memo. 1997-379, 1997 WL 473162, at *3, *aff'd without published opinion*, 164 F.3d 629 (9th Cir. 1998).
>
> Rather than analyze every factor on the debt-equity checklists, we confine our discussion to those points we find most pertinent. In our analysis we look at the relative financial status of petitioner at the time the advances were made; the financial status of petitioner at the time the advances were repaid; the relationship between Mr. Singer and petitioner; the method by which the advances were repaid; the consistency with which the advances were repaid; and the way the advances were accounted for on petitioner's financial statements and tax returns. After looking at all these criteria in the light of the other factors traditionally distinguishing debt from equity, particularly the intent factor, we believe Mr. Singer intended his advances to be loans and we find

taxpayer objectively substantiates both the existence of a loan and that payments made were in repayment of that loan, the IRS will assert that the payment of personal expenses by an S corporation on behalf of its corporate officer/employee constitute wages subject to Federal employment taxes.[1221]

> that his intention was reasonable for a substantial portion of the advances. Consequently, we also find that petitioner's repayments of those loans are valid as such and should not be characterized as wages subject to employment taxes.

With the same result – no wage income - *Goldsmith v. Commissioner*, T.C. Memo. 2017-020, followed *Scott Singer*, pointing out (emphasis in original):

> There's no rule that an S corporation *has* to pay its sole shareholder a wage, especially when it's bleeding money the way G&A did. The real question is one of fact—were the payments a return of capital, repayments of loans, or wages? See *Scott Singer Installations, Inc., v. Commissioner*, T.C. Memo. 2016-161.

[1221] A.O.D. 2017-04 (4/17/2017), taking the position in the text above and strongly criticizing *Scott Singer Installations, Inc. v. Commissioner*, TC Memo 2016-161, *acq.* 2017-15 I.R.B. 1072 (see fn. 1220):

> The critical factor in determining the appropriate tax treatment is whether the payments are remuneration (i.e., compensation) for services provided to the employer. The Service disagrees with the Court's reasoning, which failed to properly address the critical issue of whether the payments made by Taxpayer to creditors on behalf of Mr. Singer were compensation for his services and thus wages under the applicable statutory and regulatory provisions. The Service's position is that the Court incorrectly decided that no portion of the payment of personal expenses by Taxpayer on behalf of Mr. Singer should be characterized as wages subject to Federal employment taxes. Whether advances made to a corporation by a shareholder-officer are characterized as loans rather than capital contributions does not control whether a payment made by the corporation to the shareholder-officer is compensation for services and therefore properly characterized as wages. The Court failed to acknowledge that, similar to debt repayments, wages are also paid in a recurring nature and may be paid even if a business is operating at a loss.
>
> In focusing on the intention to create a debtor-creditor relationship and whether Mr. Singer had a reasonable expectation of repayment of the advances, the Court failed to analyze or even cite the relevant statutory or regulatory provisions governing the definition of wages for Federal employment tax purposes. Nor did the Court review its own substantial body of case law that repeatedly rejects taxpayers' attempted characterizations of payments to officers who perform substantial services as something other than compensation for services. The Court failed to analyze why precedents concerning officer compensation were not applicable. See *Veterinary Surgical Consultants PC v. Commissioner*, 117 T.C. 141 (2001) (stating that "the characterization of the payment to [president] as a distribution of net income is but a subterfuge for reality;" and holding the payments constituted remuneration for services performed by the [president] and were subject to employment taxes). See *also Glass Blocks Unlimited v. Commissioner*, T.C. Memo 2013-180 (holding that "[a]n employer cannot avoid Federal employment taxes by characterizing payments to its employee, sole officer and shareholder as something other than wages where such payments represent remuneration for services rendered"). See *Smith v. Commissioner*, T.C. Memo. 1995-410 (finding that payments of personal living expenses made by a wholly owned corporation on behalf of its president/employee and sole shareholder, who received no salary in the year at issue, are properly characterized as wages when they represent remuneration for employment).
>
> Several circuit courts have also rejected arguments that officers who perform substantial services received something other than compensation for those services. See *Joseph M. Grey Accountant, P.C. v. Commissioner*, 119 T.C. 121 (2002), *aff'd* 93 Fed. Appx. 473 (3rd Cir. 2004) (holding that money taken from corporate account by the sole shareholder and president of the corporation to pay for his needs as they arose was wages subject to employment taxes); *Joly v. Commissioner*, 211 F.3d 1269 (6th Cir. 2000) (holding that distributions to controlling shareholders

When a loan has basis less than principal, basis is prorated, meaning that part of each payment is recovery of basis and part is income.[1222] To avoid this, a shareholder may contribute the loan to the capital of the corporation, getting increased stock basis to the extent of the loan's basis (without the corporation reporting cancellation of indebtedness income),[1223] against which distributions may be taken, fully tax-free (assuming AAA is sufficient or no prior C corporation earnings and profits).[1224] If a shareholder makes a non-pro rata contribution to capital of loans owed to that shareholder, consider the nontax issue: the shareholder will not receive a non-pro rata distribution on liquidation of the corporation;[1225] note that, in a partnership, non-pro rata distributions would be permitted, so a non-pro rata contribution could be repaid through a non-pro rata distribution.

> were wages despite an express written agreement that any excess distributions would be treated as loans); *Joseph Radtke S.C. v. United States*, 895 F.2d 1196, 1197 (7th Cir. 1990) (holding that dividends paid by the corporation to the only significant employee, who otherwise received no salary for his substantial services, were in fact wages subject to employment taxes because the payments "were clearly remuneration for services performed"); *David E. Watson, P.C. v United States*, 668 F.3d 1008 (8th Cir. 2012) (holding that the proper legal analysis was whether the payments at issue were made as remuneration for services performed; rejecting the argument that taxpayer intent controls when characterizing payments and finding dividend distributions should properly be characterized as wages, despite repeated assertions by the taxpayer that there is no statute, regulation, or rule requiring an employer to pay minimum compensation); *Spicer Accounting, Inc. v. U.S.*, 918 F.2d 90, 93 (9th Cir. 1990) (holding that the only stockholder of an S corporation, who "donated" his services and withdrew earnings in the form of dividends, actually received wages; stating that regardless of how an employer chooses to characterize payments made to employees, "the true analysis is whether the payments are for remuneration for services rendered").
>
> While none of the courts in the cases cited above found the existence of a debtor-creditor relationship, the applicable employment tax regulations defining the scope of wages as all remuneration for employment does not cease to apply even if such debtor-creditor relationship is present. As previously noted, the regulations expressly provide that an employer's characterization of the payment is irrelevant. Accordingly, when a corporation makes any payment of personal expenses to or on behalf of a shareholder-officer, the question must be asked - is the payment being made as remuneration for services? If so, then the payment is wages. While the Service may recognize a payment from a corporation to its shareholder-officer who is also an employee as a loan repayment, the taxpayer must provide objective evidence that both substantiates that a bona fide loan exists between the parties and substantiates that the payment from the taxpayer to the employee was specifically in repayment of that loan and is separate from compensation paid to the employee for the performance of services for the taxpayer.

[1222] Rev. Rul. 64-162.

[1223] See part II.M.2.a Initial Incorporation – Generally. Code § 108(e)(6) provides, "Indebtedness contributed to capital," provides:

> Except as provided in regulations, for purposes of determining income of the debtor from discharge of indebtedness, if a debtor corporation acquires its indebtedness from a shareholder as a contribution to capital -
>
> (A) section 118 shall not apply, but
>
> (B) such corporation shall be treated as having satisfied the indebtedness with an amount of money equal to the shareholder's adjusted basis in the indebtedness.

[1224] See part II.Q.7.b.i Redemptions or Distributions Involving S corporations - Generally.

[1225] Rights to distributions must be proportionate to stock ownership, as described in part II.A.2.i Single Class of Stock Rule.

I have seen tax preparers report fictitious loans on S corporation tax returns, taking the position that a distribution was made and loaned back to the corporation. They do this because a shareholder's position as an unsecured creditor may be better than as an owner if the corporation gets sued or goes into bankruptcy. It is not unusual for the tax preparer to forget to impute interest as well. This fictitious loan is a bad idea, not only because of the issues described in the preceding paragraph but also because a smart litigator for the creditor will argue that this constitutes cooking the books, and what else about the books may be cooked? Instead of risking this vulnerability, the corporation should document a formal line of credit with the shareholder, not only accruing but also paying annual interest.[1226] Any distributions that generate such a loan from the shareholder should either be documented through corporate action or should actually be made, with the latter being the stronger case and preferably merely be the shareholder loaning part (whether a small part or a large part) of distributions that are made to pay taxes or once the earnings have been determined.

This line of credit concept may also be useful when selling to an irrevocable grantor trust.[1227] I prefer to get the debt that the trust owes the seller paid as soon as possible. If distributions to make those payments strain the corporation's cash flow, the seller could loan the sales proceeds to the corporation, using whatever terms seem appropriate.

II.G.4.e. Basis Limitations for Partners in a Partnership

II.G.4.e.i. Gorin Analysis

Generally, partners may deduct losses only to the extent of basis.[1228] Not all deductions are subject to these rules,[1229] but the those deductions would reduce basis[1230] and therefore can

---

[1226] This might be a demand note with interest at the blended rate that applies to such notes. See part III.B.1.a.i.(c) Demand Loans.

[1227] See generally part III.B.2.b General Description of GRAT vs. Sale to Irrevocable Grantor Trust

[1228] Reg. § 1.704-1(d)(2) provides:

> In computing the adjusted basis of a partner's interest for the purpose of ascertaining the extent to which a partner's distributive share of partnership loss shall be allowed as a deduction for the taxable year, the basis shall first be increased under section 705(a)(1) and decreased under section 705(a)(2), except for losses of the taxable year and losses previously disallowed. If the partner's distributive share of the aggregate of items of loss specified in section 702(a)(1), (2), (3), (8), and (9) exceeds the basis of the partner's interest computed under the preceding sentence, the limitation on losses under section 704(d) must be allocated to his distributive share of each such loss. This allocation shall be determined by taking the proportion that each loss bears to the total of all such losses. For purposes of the preceding sentence, the total losses for the taxable year shall be the sum of his distributive share of losses for the current year and his losses disallowed and carried forward from prior years.

[1229] Reg. § 1.704-1(d)(2), reproduced in fn. 1228, implicitly does not suspend the following deductions under Code § 702(a):

> (4) charitable contributions (as defined in section 170(c)),
> (5) dividends with respect to which section 1(h)(11) or part VIII of subchapter B applies,
> (6) taxes, described in section 901, paid or accrued to foreign countries and to possessions of the United States,
> (7) other items of income, gain, loss, deduction, or credit, to the extent provided by regulations prescribed by the Secretary…

Confirming this interpretation, see fn. 1262 in part II.G.4.g.ii Basis Limitations on Deducting Charitable Contributions Made by an S corporation or a Partnership.

[1230] Code § 705(a)(2)(B). See also fn. 1263 in part II.G.4.g.ii Basis Limitations on Deducting Charitable Contributions Made by an S corporation or a Partnership.

cause their deductions to be suspended.[1231] The basis limitation limits the loss not only for regular income tax purposes but also for purposes of part II.L.2.a Types of Income Subject to Self-Employment Tax.[1232]

Code § 704(d) provides:

(1) *In general*. A partner's distributive share of partnership loss (including capital loss) shall be allowed only to the extent of the adjusted basis of such partner's interest in the partnership at the end of the partnership year in which such loss occurred.

(2) *Carryover*. Any excess of such loss over such basis shall be allowed as a deduction at the end of the partnership year in which such excess is repaid to the partnership.

(3) *Special rules*.

(A) *In general*. In determining the amount of any loss under paragraph (1), there shall be taken into account the partner's distributive share of amounts described in paragraphs (4) and (6) of section 702(a).

(B) *Exception*. In the case of a charitable contribution of property whose fair market value exceeds its adjusted basis, subparagraph (A) shall not apply to the extent of the partner's distributive share of such excess.

Implementing Code § 704(d), Reg. § 1.704-1(d), "Limitation on allowance of losses," provides:

(1) A partner's distributive share of partnership loss will be allowed only to the extent of the adjusted basis (before reduction by current year's losses) of such partner's interest in the partnership at the end of the partnership taxable year in which such loss occurred. A partner's share of loss in excess of his adjusted basis at the end of the partnership taxable year will not be allowed for that year. However, any loss so disallowed shall be allowed as a deduction at the end of the first succeeding partnership taxable year, and subsequent partnership taxable years, to the extent that the partner's adjusted basis for his partnership interest at the end of any such year exceeds zero (before reduction by such loss for such year).

(2) In computing the adjusted basis of a partner's interest for the purpose of ascertaining the extent to which a partner's distributive share of partnership loss shall be allowed as a deduction for the taxable year, the basis shall first be increased under section 705(a)(1) and decreased under section 705(a)(2), except for losses of the taxable year and losses previously disallowed. If the partner's distributive share of the aggregate of items of loss specified in section 702(a)(1), (2), (3), (8), and (9) exceeds the basis of the partner's interest computed under the preceding sentence, the limitation on losses under section 704(d) must be allocated to his distributive share of each such loss. This allocation shall be determined by taking the proportion that each loss bears to the total of all such losses. For purposes of the preceding sentence, the total losses for the taxable year shall be the sum of his distributive

[1231] The first sentence of Reg. § 1.704-1(d)(2), reproduced in fn. 1228, provides that "In computing the adjusted basis of a partner's interest for the purpose of ascertaining the extent to which a partner's distributive share of partnership loss shall be allowed as a deduction for the taxable year, the basis shall first be … decreased under section 705(a)(2)…."
[1232] CCA 202009024, which applied this principle to a partnership, but a similar analysis would apply to a.

share of losses for the current year and his losses disallowed and carried forward from prior years.

(3) For the treatment of certain liabilities of the partner or partnership, see section 752 and § 1.752-1.

(4) The provisions of this paragraph may be illustrated by the following examples:

Example (1). At the end of the partnership taxable year 1955, partnership AB has a loss of $20,000. Partner A's distributive share of this loss is $10,000. At the end of such year, A's adjusted basis for his interest in the partnership (not taking into account his distributive share of the loss) is $6,000. Under section 704(d), A's distributive share of partnership loss is allowed to him (in his taxable year within or with which the partnership taxable year ends) only to the extent of his adjusted basis of $6,000. The $6,000 loss allowed for 1955 decreases the adjusted basis of A's interest to zero. Assume that, at the end of partnership taxable year 1956, A's share of partnership income has increased the adjusted basis of A's interest in the partnership to $3,000 (not taking into account the $4,000 loss disallowed in 1955). Of the $4,000 loss disallowed for the partnership taxable year 1955, $3,000 is allowed A for the partnership taxable year 1956, thus again decreasing the adjusted basis of his interest to zero. If, at the end of partnership taxable year 1957, A has an adjusted basis of his interest of at least $1,000 (not taking into account the disallowed loss of $1,000), he will be allowed the $1,000 loss previously disallowed.

Example (2). At the end of partnership taxable year 1955, partnership CD has a loss of $20,000. Partner C's distributive share of this loss is $10,000. The adjusted basis of his interest in the partnership (not taking into account his distributive share of such loss) is $6,000. Therefore, $4,000 of the loss is disallowed. At the end of partnership taxable year 1956, the partnership has no taxable income or loss, but owes $8,000 to a bank for money borrowed. Since C's share of this liability is $4,000, the basis of his partnership interest is increased from zero to $4,000. (See sections 752 and 722, and §§ 1.752-1 and 1.722-1.) C is allowed the $4,000 loss, disallowed for the preceding year under section 704(d), for his taxable year within or with which partnership taxable year 1956 ends.

Example (3). At the end of partnership taxable year 1955, partner C has the following distributive share of partnership items described in section 702(a): long-term capital loss, $4,000; short-term capital loss, $2,000; income as described in section 702(a)(9), $4,000. Partner C's adjusted basis for his partnership interest at the end of 1955, before adjustment for any of the above items, is $1,000. As adjusted under section 705(a)(1)(A), C's basis is increased from $1,000 to $5,000 at the end of the year. C's total distributive share of partnership loss is $6,000. Since without regard to losses, C has a basis of only $5,000, C is allowed only $5,000/$6,000 of each loss, that is, $3,333 of his long-term capital loss, and $1,667 of his short-term capital loss. C must carry forward to succeeding taxable years $667 as a long-term capital loss and $333 as a short-term capital loss.

If a partner who is selling her partnership interest plans to contribute assets to the partnership and wants to use that contribution to provide basis to deduct losses suspended under

Code § 704(d), the contribution must be made on or before the sale.[1233] Thus, as is the case with S corporations, the taxpayer can deduct such losses only while the taxpayer still owns the partnership interest.

Partners generally may deduct losses financed by certain obligations (including bank loans to the partnership) to the extent permitted by the Code § 465 at-risk rules. Although loan guaranties can cause debt to be allocated to the guarantor instead of to other partners, contributing the partner's own promissory note to a partnership does not constitute such a guarantee.[1234] For a discussion of the Code § 465 at-risk rules, as well as the Code § 752 treatment of certain nonrecourse or other liabilities, see part II.G.4.j At Risk Rules (Including Some Related Discussion of Code § 752 Allocation of Liabilities).

Among liabilities that create basis are "debt obligations, environmental obligations, tort obligations, contract obligations, pension obligations, obligations under a short sale, and

---

[1233] *Sennett v. Commissioner*, 80 T.C. 825, 831 (1983), *aff'd* 752 F2d 428 (9th Cir. 1985), holding (emphasis in original):

> Applying section 706(c)(2)(A)(i) to the facts in the instant case, the taxable year of PPP with respect to petitioner closed in December 1968, when he sold his entire interest in PPP. That being the case, petitioner paid 80 percent of his share of PPP's losses for 1967 and 1968 to PPP after the close of his last partnership year with PPP which fails to come within the provisions of section 704(d) which allows the deduction "at the end of the partnership year in which such excess is repaid to the partnership." Such a construction of section 704(d) is not only supported by section 706(c)(2)(A)(i) but is confirmed by the language of the report of the Senate Finance Committee, quoted above (S. Rept. 1622, *supra*) wherein it explains that the loss is deductible *only at the end of the partnership year in which the loss is repaid, either directly, or out of future profits*. The payment from the partner to the partnership could not be paid out of future profits if the partner had previously sold his partnership interest because he would have no right to share in the future profits.

Although Code § 706(c)(2)(A) has since been changed, as of 5/18/2019 it still directly supports *Sennett*.

[1234] *VisionMonitor Software, LLC v. Commissioner*, T.C. Memo. 2014-182. The court's analysis of not obtaining basis for contributing the notes is described in fn. 3566. In discussing the loan issue, the court reasoned:

> VisionMonitor argues that the notes in this case, like the assumption of debt in *Gefen*, were necessary to persuade a third party to kick in more funding to a cash-strapped partnership. But unlike the partner in Gefen, neither Mantor nor Smith were guaranteeing a preexisting partnership debt to a third party. And they did not directly assume any of VisionMonitor's outside liabilities—these notes are their liability to VisionMonitor, not an assumption or guaranty of VisionMonitor's debt to a third party. Mantor did sign a resolution in 2007 that included a promise "to provide *** personal credit to the company vendors *** to ensure continued uninterrupted operations"—but there's no evidence that either he or Smith ever actually provided that credit. And there's also no evidence that Mantor or Smith were personally obliged under the VisionMonitor partnership agreement to contribute a fixed amount for a specific, preexisting partnership liability.

obligations under derivative financial instruments such as options, forward contracts, futures contracts, and swaps."[1235] However, an obligation counts: [1236]

> only if, when, and to the extent that incurring the obligation-
>
> (A) Creates or increases the basis of any of the obligor's assets (including cash);
>
> (B) Gives rise to an immediate deduction to the obligor; or
>
> (C) Gives rise to an expense that is not deductible in computing the obligor's taxable income and is not properly chargeable to capital.

For more information, see part II.C.3 Allocating Liabilities (Including Debt).

[1235] Reg. § 1.752-1(a)(4)(ii). Letter Ruling 201608005 gave the owners of partnership P basis for certain obligations owed to O under construction contract guarantees:

> Before P is entitled to receive payments under the contracts and, explicitly, to receive the Notice to Proceed payments, P is required to provide certain guarantees and also to deliver to O irrevocable standby letters of credit. The letters of credit secure P's obligations to perform under the contracts and cover O's damages in the event of non-performance or default by P. The amount of the letters of credit securing P's obligations roughly corresponds to the amount of the Notice to Proceed payments.
>
> The contracts provide that if P fails to prosecute the work in a diligent and efficient manner, or if P abandons the project or repudiates any of its obligations, a default occurs. In that event, O is entitled to several remedies, including seeking specific performance (that is, obtaining judicial enforcement requiring to make good on its obligation to perform the work) and recovery from P of costs, damages, losses, and expenses (that is, requiring P to make good on its obligation to cover O's damages in the event of nonperformance). Specifically, the contracts allow O to draw-down directly against the letters of credit in the event of a default by P.

The Letter Ruling discussed certain authority:

> Revenue Ruling 95-26, 1995-1 C.B. 131, concludes that a partnership's obligation to deliver securities in a short sale transaction constitutes a section 752 liability under a definition of partnership liability similar to the definition quoted above. The Revenue Ruling reasons that a short sale creates such a liability inasmuch as: (1) a short sale creates an obligation to return the borrowed securities, citing *Deputy v. Du Pont*, 308 U.S. 488, 497-98 (1940), 1940-1 C.B. 118; and (2) the partnership's basis in its assets is increased by the amount of cash received on the sale of the borrowed securities. Therefore, the Revenue Ruling concludes that the partners' bases in their partnership interests are increased under section 722 to reflect their shares of the partnership's liability under section 752. In *Salina Partnership LP v. Commissioner*, T.C. Memo 2000-352, the Tax Court examined the policy underlying section 752 and the analysis of Revenue Ruling 95-26 and held that a partnership's obligation to close its short sale by replacing borrowed securities represented a partnership liability within the meaning of section 752.

The Letter Ruling held:

> Based solely on the facts submitted and the representations made, we conclude that P's obligations under the contracts to proceed with performing work and to incur costs in performing the work, and the corresponding obligations to satisfy O's remedies in the event P were to default or suspend work, constitute liabilities under section 752 upon and to the extent P receives the Notice to Proceed payments but has not yet reported the related income.

[1236] Reg. § 1.752-1(a)(4)(i).

In a partnership setting, generally no income is recognized on the repayment of a debt until distributions (including deemed distributions when the partner's share of partnership debt is reduced) exceed basis.[1237]

If a partner loans money to the partnership that is a start-up venture and it is possible that the partnership might need a capital infusion by another party in which the debt is converted to equity, the later capital infusion might trigger ordinary income taxation.[1238] One might consider using preferred equity instead of loaning the money to the partnership.

II.G.4.e.ii. IRS Description of Basis

LB&I Process Unit, "Partner's Outside Basis," Document Control Number (DCN) PAR-P-002 (last updated 5/19/2021) (the "Process Unit") discusses calculating a partner's basis in that person's partnership interest. The Process Unit's "Background" explains:

> A partnership is a relationship between two or more persons who join together to carry on a trade, business, or investment activity. Each partner has a basis in his partnership interest. The partner's basis in his partnership interest is separate from the partnership's basis in its assets. Partnership tax law often refers to "outside" and "inside" basis. Outside basis refers to a partner's interest in a partnership. Inside basis refers to a partnership's basis in its assets. Publication 541 contains information on outside basis. This Practice Unit focuses on key concepts you must understand in order to properly calculate outside basis.
>
> The rules regarding the computation of outside basis apply to all types of partners including general partners, limited partners, and limited liability company (LLC) members. The rules apply to entities which are treated as partnerships for federal income tax purposes including general partnerships, limited partnerships, publicly traded partnerships, limited liability partnerships and limited liability companies (which have at least two owners and which do not elect to be treated as a corporation).
>
> A partner may hold both a general and a limited partnership interest in the same partnership. In this case, the partner is considered to have only one unitary basis equal to the combined interests. Rev. Rul. 84-52. Note that the owner of a disregarded entity has no outside basis in the entity for federal income tax purposes.
>
> Computing a partner's outside basis is necessary when determining:
>
> - The maximum amount of any deduction or loss that passes through to the partner,
> - The gain or loss from the disposition of a partnership interest,
> - The tax consequences of cash distributions, and

[1237] Code §§ 752(a), (b) and 731(a)(1). For a scathing critique of proposed regulations under Code § 752, see Lipton, "Proposed Regulations on Debt Allocations: Controversial, and Deservedly So," *Journal of Taxation* (WG&L), Vol. 120, No. 4 (April 2014); Schneider and O'Connor, "The IRS Did What to the Partnership Debt Allocation and Disguised Sale Rules?!?" *TM Real Estate Journal* (BNA), Vol. 30 No. 8 (8/6/2014).
[1238] See part II.G.4.a.v Tax Effect of Loan to S Corporation or Partnership, especially the text accompanying fns. 1180-1181.

- The tax consequences of property distributions.

In "Nature of Partnerships," the Process Unit explains:

> Subchapter K of the Internal Revenue Code addresses rules regarding the taxation of partnerships and partners. Certain aspects of Subchapter K are governed by the "aggregate theory" which views the partnership as a collection of its partners. Other aspects are governed by the "entity theory" which treats the partnership as a "taxpayer," even though it pays no tax. For example, partnerships function as entities when a tax year and a method of accounting are chosen. It is the partnership that selects the tax year and method of accounting, not each partner. Most elections are made by the partnership. The concept that each partner must track a basis in his partnership interest reflects the entity view of partnerships.
>
> A partnership is called a "flow-through entity" or a "pass-through entity." Partnerships pay no tax. Rather, each partner includes his share of the partnership's income, gain, loss, deduction, or credits on his personal tax return. Therefore, for purposes of reporting tax items and calculating tax liabilities, the partnership is treated as an aggregate of its partners.
>
> As previously stated, outside basis is a partner's basis in his partnership interest. Inside basis is the partnership's basis in its assets. Typically, at the start of the partnership, the sum of each partner's outside basis equals the partnership's inside adjusted tax basis in its assets. The reason for this equality is the accounting equation Assets equal Liabilities plus Owners' Equity. In the partnership context, this is phrased as Assets equal Liabilities plus Partners' Capital Accounts. The partnership's assets were either contributed by the partners, purchased with contributed cash or earned income, or purchased with money the partnership borrowed.
>
> There are three common reasons why the equality between inside and outside basis may change:
>
> 1. Acquisition of a partnership interest other than by contribution.
>
> 2. Gain or loss recognized by a partner on a distribution.
>
> 3. Decrease in the basis of an asset of the partnership on a current distribution or an increase in the basis of a partnership asset on a liquidating distribution (excluding 732(d) application).
>
> If a partnership made a section 754 election, a partner's outside basis can be estimated by added his tax basis capital account, his share of liabilities, and his section 743(b) basis adjustments which can be found on the Schedule K-1 (Form 1065).

The Process Unit explains "Outside Basis and Inside Basis":

> A partner's outside basis in his partnership interest can be estimated by adding his tax basis capital account, his share of liabilities, and his section 743(b) basis adjustments (if the partnership made a section 754 election). An increase in a partner's share of partnership liabilities is treated as a contribution of money by the partner to the partnership and thus increases his outside basis. A decrease in a partner's share of

partnership liabilities is treated as a distribution of money to the partner and thus decreases his outside basis. IRC 752(a) and (b). Each partnership liability is part of at least one partner's outside basis. Rules concerning the definition of partnership liabilities are covered in the Determining Liability Allocations Concept Unit. Rules for allocating partnership liabilities among the partners are covered in the Determining Liability Allocations Concept Unit.

While a partner's capital account may be negative (due to allocated losses and distributions), a partner's outside basis may never be a negative number. A partner whose capital account is negative may still have a positive basis in his partnership interest because his share of partnership liabilities is greater than his negative capital account.

The Process Unit provides a "Capital Account Overview":

Capital accounts increase or decrease every year. If the partnership is profitable, the partner's distributive share of profits increases his capital account. If the partnership generates a loss, then the partner's distributive share of the loss decreases his capital account.

Additionally, a partner's contributions of cash or property increase his capital account. Conversely, a partnership's distribution of cash or property to the partner decreases his capital account.

A partner may have a negative capital account. However, a partner may never have a negative outside basis. A partner whose capital account is negative may still have a positive basis if his share of partnership liabilities exceeds his negative capital account. The four types of capital accounts are:

1. Section 704(b) Book.

2. Generally Accepted Accounting Principles (GAAP).

3. Tax Basis.

4. Other.

See Slides 10-12 for an explanation of the four types of capital accounts.

CAUTION: The capital account reporting requirements on Schedule K-1 changed beginning in 2020. Beginning in 2020, taxpayers are required, with few exceptions, to report capital accounts on the tax basis. Please see the instructions to the Form 1065 for 2020 and later years for further guidance.

The Process Unit explains the "Impact of Partnership Operations on Partnership Outside Basis":

A partner's basis in his partnership interest increases or decreases each year depending on a variety of factors. The following items increase outside basis:

- An increase in the partner's share of either recourse or nonrecourse liabilities. IRC 752(a).

- A partner's contributions of property or money including an increased share of, or assumption of, partnership liabilities. IRC 722.

- The partner's share of taxable partnership income, including capital gains. IRC 705(a)(1)(A).

- The partner's share of tax-exempt income. IRC 705(a)(1)(B).

- The partner's share of percentage depletion deductions exceeding the adjusted basis in depletable property. IRC 705(a)(1)(C).

The follow items decrease outside basis:

- A decrease in the partner's share of partnership liabilities. IRC 752(b).

- Distributions of money (including a decreased share of partnership liabilities or an assumption of the partner's individual liabilities by the partnership) and property distributed to the partner by the partnership. IRC 733 and IRC 732.

- The partner's share of partnership losses, including capital losses. IRC 705(a)(2)(A).

- The partner's share of expenses that are neither deductible nor capitalized for income tax purposes. IRC 705(a)(2)(B).

- The partner's share of depletion from oil and gas properties. IRC 705(a)(3).

The Process Unit explains a "Partner's Initial Outside Basis":

> A partner may acquire an interest in a partnership in a variety of ways. For example, the partner may purchase his interest from an existing partner. Like any other asset, a partnership interest may be acquired through a gift or an inheritance. Additionally, a partner may contribute property and/or cash in exchange for a partnership interest. Lastly, a partner may contribute services in exchange for a partnership interest. The partner's initial outside basis depends on how the interest was acquired.
>
> The basis of a partnership interest acquired by contribution is the amount of cash plus the adjusted basis of any contributed property. IRC 722. Generally, a partner does not recognize gain or loss upon contributions of property to a partnership in exchange for a partnership interest. IRC 721. Instead, the contributing partner's basis in the property becomes the partnership's basis. IRC 723.
>
> A partner's holding period in a partnership interest received for a property contribution depends on the type of property contributed. If the property contributed for the interest was a capital asset or an IRC 1231 asset, the holding period of the partnership interest will include the holding period of the contributed assets. If a partner contributes any other property or money, his holding period will begin on the day after the interest is acquired. If a combination of property is contributed, the holding period of the partnership interest will be split.
>
> When a partner buys a partnership interest from an existing partner, the purchasing partner's initial outside basis is the consideration paid to the seller (cash plus the value

of any property) plus his share of partnership liabilities assumed. IRC 742 and IRC 1012. When a partnership interest is acquired by gift, the partner's outside basis will generally be the outside basis of the donor. IRC 742 and IRC 1015. The basis of an inherited partnership interest equals the fair market value of the partnership interest at the decedent's date of death or the alternate valuation date, if applicable. IRC 1014.

As previously stated, a partner may acquire a partnership interest in exchange for contributing cash or property. Additionally, a partner may contribute services in exchange for a partnership interest. The impact on the partner's outside basis depends on whether the partner recognizes compensation income for the services performed. This, in turn, depends on the type of interest received (a capital interest or a profits interest). Under Treas. Reg. 1.721-1(b)(1), the receipt of a vested partnership capital interest in exchange for services is taxable as compensation. An interest is vested if it is either transferable or not subject to a substantial risk of forfeiture. The partner's outside basis is increased by the amount of the compensation income recognized.

Unless an exception is met, a partner who contributes services to a partnership in exchange for a profits interest does not recognize compensation income. Therefore, the transaction has no impact on the partner's outside basis. Revenue Procedure 93-27, 1993-2 C.B. 343 and Rev. Proc. 2001-43 address the receipt of a partnership profits interest when services are provided to or on behalf of the partnership.

Under Rev. Proc. 93-27, the grant of a profits interest to a service partner is generally not a taxable event. However, under the following three exceptions, a partner who contributes services in exchange for a profits interest must recognize income:

1. The partner disposes of the interest within two years of its receipt;

2. The partnership units are publicly traded; or

3. The profits interest relates to a "substantially certain and predictable stream of income from partnership assets."

The Process Unit explains "Capital Accounts":

A partner's equity equals the amount of money or property the partner would receive if the partnership liquidated. A partner's outside basis includes a partner's share of liabilities whereas a partner's capital account does not (Assets minus Liabilities equals Capital). When performing a risk analysis, adding the capital account as reported on the Schedule K-1, allocable share of liabilities, and any IRC 743(b) adjustments allows for an estimation of the partner's outside basis. As noted throughout this unit, the accuracy of this estimation depends on whether the capital accounts on the Schedule K-1 are reported on a tax basis.

Prior to 2020, a partnership could choose the method for reporting a partner's capital account. It could select (1) section 704(b) book; (2) GAAP; (3) tax basis; or (4) other.

Prior to 2020, the partnership had to check the appropriate box that described the method of accounting used to figure the partner's capital account for reporting purposes on each Schedule K-1 in Section L. If the method of accounting used to figure the partnership's capital account was based on the partnership's income and deductions for federal income tax purposes, the “Tax basis” box had to be checked. On the other hand, the “GAAP” box had to be checked if the figure was determined based on generally accepted accounting principles (GAAP). If the partnership arrived at the figure based on the capital accounting rules under Treas. Reg. 1.704-1(b)(2)(iv), the “Section 704(b) book” box had to be checked. If none of the three methods named above (tax basis, GAAP, or Section 704(b) book) were used, the “Other” box had to be checked, and the partnership had to attach a statement describing the method and showing how the partner’s capital account was determined.

CAUTION: The capital account reporting requirements on Schedule K-1 changed beginning in 2020. Beginning in 2020, taxpayers are required, with few exceptions, to report capital accounts on the Schedule K-1 on the tax basis for their ending capital account amounts and thereafter both beginning and ending balances must be reported on the tax basis. Please see the instructions to the Form 1065 for 2020 and later years for further guidance.

The Process Unit explains a “Tax Basis Capital Account”:

As its name implies, the tax basis capital account is based on tax accounting. The tax basis capital account is increased by the

adjusted tax basis of the contributed assets (net of liabilities) and decreased by the adjusted basis of assets distributed (net of liabilities). Second, the tax basis capital account is increased or decreased annually by increases and decreases as reflected on the partners’ Schedules K-1 Part III and attached statements. Tax gain or loss on the sale or other disposition of partnership property is computed using the asset’s tax basis. A partner’s tax basis capital account plus his share of partnership liabilities plus his section 743(b) adjustment (assuming that the partnership made a section 754 election) generally equals his outside basis in his partnership interest. Note: The accuracy of this computation may be materially reduced if the partnership did not make a section 754 election.

The Process Unit explains “IRC 704(b) Book Capital Accounts”:

The IRC 704(b) book capital accounting system is a creation of the partnership regulations. It is important to distinguish these “IRC 704(b) book capital accounts” from tax or GAAP capital accounts. The purpose of IRC 704(b) book capital is to reflect each partner’s economic share of the partnership’s assets equal to their equity in the partnership.

The rules for computing and maintaining book capital accounts are found in Treas. Reg. 1.704-1(b)(2)(iv)(b), a regulation section supporting IRC 704(b). For that reason, such capital accounts are known as “704(b) book” capital accounts. This term can be confusing because the accounting profession often equates the term “book” with financial accounting principles. Maintenance of IRC 704(b) book capital accounts are often included into partnership agreements to satisfy the safe harbor for economic effect as well as to assist in determining whether a partner’s allocation has economic effect. Treas. Reg. 1.704-1(b).

IRC 704(b) book capital accounts use fair market value for property contributions and property distributions. For example, if two individuals desire to form a 50/50 partnership, they agree as to the amount of money and the value of property each must contribute so their interests are equal. Professional appraisals may be obtained to value the property or services contributed.

A partner's book capital is increased/decreased by his allocable share of partnership book income/loss for the year, including taxexempt income. The tax character of the income or loss is not relevant, capital gain and ordinary income are treated the same. IRC 704(b) book income/loss is the same as taxable income/loss with three adjustments. First, depreciation deductions are computed by using tax depreciation concepts (that is, life method) applied to the book basis of assets. Second, gain/loss on an asset sale is computed by using the adjusted book basis of the disposed asset. Third, any inherent gain/loss in the distribution of property to a partner must be allocated to all partners in accordance with their allocation arrangement immediately prior to the distribution. A partnership agreement may, upon the occurrence of certain events, increase or decrease the book capital accounts of the partners to reflect a revaluation of partnership property (including intangible assets such as goodwill) on the partnership's books. Treas. Reg. 1.704-1(b)(2)(iv)(f).

The Process Unit's "Step 1: Pre-Audit Analysis/Estimate Outside Basis," instructs, "Inspect the return with a focus on the Schedules K-1 for potential issues. If outside basis is relevant to the issue, use tax return information to estimate the pertinent partner's outside basis." Citing Code § 731 as a resource, it lists the following "Considerations":

Generally, outside basis is not itself an issue. However, outside basis is inexorably intertwined with several issues which tend to be significant events. For example, if a partner sells or disposes of his partnership interest, he must know his outside basis in order to correctly determine the tax consequences. See Slide 15 [reproduced in the third paragraph below] for brief discussion on identifying transfers of partnership interests.

The partners' Schedules K-1 indicate whether the partners were allocated a loss and whether the partners received a distribution of cash or property. As noted previously, losses in excess of outside basis are suspended.

A partner may receive a distribution of cash or property in a liquidating or in a current distribution. A partner exits the partnership upon a liquidating distribution. On the other hand, a partner who receives a current distribution remains in the partnership. The type of distribution, the tax basis of the property, the amount of cash distributed, and the amount of the partner's outside basis determine the tax consequences.

Look for evidence of transfers of partnership interests. Some indicators are:

- Form 8308 is attached to the partnership return.
- A Schedule K-1 is marked "Final."
- A partner's Schedule K-1 reflects 0% at year end.
- A statement is attached to the partnership return indicating there was a sale, exchange, or liquidation of a partner's interest during the tax year.
- The partner does not receive a Schedule K-1 in the subsequent year.

A quick method for estimating a partner's outside basis from the Schedule K-1 (prior to consideration of current year activity) is to add the partner's beginning tax basis capital account, his share of liabilities (both recourse and nonrecourse), and any IRC 743(b) adjustments. The first two amounts are shown on each partner's Schedule K-1 as follows:

- Schedule K-1, Item L "Beginning capital account"
- Schedule K-1, Item K "Partner's share of liabilities"

Note: This estimation becomes much less accurate if the partnership did not use the tax basis method for reporting capital accounts and if the partnership did not make a Section 754 election.

Beginning in 2019, taxpayers are required to report on Schedule K-1, line 20, Code AH, the remaining Sec. 743(b) adjustments. Further, taxpayers are required to report on Schedule K-1, line 11, Code F, and line 13, Code V, any income, gain, loss, or deduction items related to an IRC 743(b) adjustment. Please see the instructions to the Form 1065 for years after 2019.

Note: This represents the partner's share of the partnership's inside tax basis of its assets less the partner's share of liabilities. It is not the partner's actual outside basis which must be computed by the partner; thus, it can only be used as an estimate.

As noted, for years prior to 2020, this estimate of a partner's outside basis will be more accurate if capital accounts are reported using the tax basis method, as opposed to the IRC 704(b) book or GAAP methods. The type of capital account reported is identified on Schedule K-1, Part I, Item L for years prior to 2019. The type of capital reflected on Schedule K-1 may be different from year-to-year. These factors should be considered when assessing the accuracy of an estimate of a partner's basis. Compare the prior year ending capital account on the Schedule K-1 to the beginning capital account balance. If there is a difference, request an explanation and documentation from the partnership.

For 2019 and later years, line 20, Code AH of the Schedule K-1 will have the IRC 743(b) adjustment (if the partnership made an IRC 754 election). This figure should be added to the tax basis capital account plus allocated liabilities calculation discussed earlier.

CAUTION: The capital account reporting requirements on Schedule K-1 have changed. Beginning In 2020, taxpayers are required, with few exceptions, to report capital accounts on the tax basis for their ending capital account amounts and thereafter both beginning and ending balances must be reported on the tax basis. Please see the instructions to the Form 1065 for 2020 and later years for further guidance.

The Process Unit's "Step 2: Verify or Reconstruct Outside Basis," instructs, "Use taxpayer records and internal sources to verify or reconstruct outside basis." It lists the following "Considerations":

Step One described how to estimate outside basis. Verify the estimate by obtaining additional information from both the partnership's representative and from internal sources.

> Often, basis is tracked at the partnership level. However, tracking outside basis is the responsibility of each partner. Treas. Reg. 1.705-1(a). The requirement to keep books and records is contained in Treas. Reg. 1.6001-1(a). A partner is required to maintain adequate books and records to substantiate basis. If a partner does not maintain adequate recordkeeping, then the burden of proof is on the partner to prove sufficient basis to deduct losses. See *Nwabasili v. CIR*, T.C. Memo. 2016-220.
>
> To verify or reconstruct a partner's outside basis, you must obtain the partner's Schedules K-1 starting with the year in which the partner was admitted to the partnership. The partnership's representative may be able to furnish the Schedules K-1. Additionally, use internal systems such as EUP, IDRS, LIN and yK-1.
>
> Once the Schedules K-1 are obtained, the partner's basis can be computed by using the Partner's Basis Computation Spreadsheet available in the Partnerships Knowledge Base within the IRS Virtual Library. When using the basis spreadsheet, it is important to include all partner contributions, distributions, liabilities and items of income/loss that impacts basis.
>
> You may obtain necessary information from years barred by the statute of limitations in order to correctly compute a partner's outside basis in your year under examination.

As to the last sentence above, if a prior return includes an improper deduction, the IRS would likely reduce basis for that incorrect item.

The Process Unit's "Step 3: Use Alternative Rule to Compute Outside Basis," instructs, "In certain circumstances, it is possible to calculate outside basis using an alternative rule under IRC 705(b)." It lists the following "Considerations" under "IRC 705(b) Alternative Basis Calculation Rule":

> IRC 705(b) provides an alternative rule for computing outside basis. This alternative rule can only be used in two circumstances:
>
> 1. The circumstances are such that the partner cannot practicably apply the general rules for the computation of outside basis.
>
> 2. In the Service's opinion, it is reasonable to conclude that the result produced will not vary substantially from the result produced under the general basis rules.
>
> A partner wishing to use the alternative rule must show that the circumstances are such that he is entitled to do so. See Treas. Reg. 1.705-1(b) and examples. When the alternative rule under IRC 705(b) is used to compute a partner's outside basis, adjustments to this calculation are necessary in certain situations. For example, contributions of property by a partner to a partnership, transfers of partnership interests, and distributions of property to partners are all situations that may require adjustments.

The Process Unit's "Examples of the Process" includes "Example 2 - Reconstructing a Partner's Outside Basis":

> You are assigned to examine XYZ Partnership's 2016 Form 1065. The Schedule K-1 of a partner named Joe Johnson shows he received a $465,000 cash distribution. You

> estimate that his outside basis is less than $465,000. His 2016 Form 1040 Schedule D reflects no capital gain from a cash distribution in excess of his basis in XYZ Partnership.
>
> You expand the audit to include Joe Johnson's 2016 Form 1040. An Information Document Request (IDR) is issued that requests a computation of his outside basis in XYZ Partnership as of December 31, 2016. Joe Johnson responds by providing his 2014 to 2016 Schedules K-1. He states that he has not tracked his outside basis in his partnership interest. You learn from reviewing the 2014 Schedule K-1 that Joe became a partner in XYZ Partnership on January 1, 2014. Joe Johnson's 2014 to 2016 Schedules K-1 show the following information:

The charts show that, in 2014, Joe contributed $150,000, was allocated $125,000 ordinary business income and $1,000 interest income, and received $20,000 cash distributions, leaving him with a capital account and basis of $256,000. In 2015, he was allocated a ($200,000) ordinary business loss, $30,0000 net real estate rental income, $1,000 interest income, and a ($5,000) net long-term capital loss, giving him a $82,000 capital account and, because of $100,000 recourse liabilities allocated to him, a $182,000 basis. In 2016, Joe was allocated $50,000 ordinary business income, $10,000 net rental real estate income, $1,000 interest income, and $2,000 net long-term capital gain, but his $465,000 in cash distributions left him with a ($320,000) negative capital account, the latter which was supported by only $100,000 in recourse liabilities at yearend. Therefore, he had a $220,000 capital gain from distributions in excess of basis. Moving from the charts to the narrative:

> You use the Basis Computation Spreadsheet in order to reconstruct Joe Johnson's basis which shows Joe Johnson's basis was $245,000 on line 11 before considering his $465,000 cash distribution. Therefore, his basis is $0 as of 12/31/2016, and he must report a $220,000 capital gain on his 2016 Form 1040 Schedule D.
>
> *CAUTION*: Line 19 of the Joe Johnson's Basis Spreadsheet shows a basis of ($220,000). As explained earlier in this Practice Unit, a partner's basis cannot fall below zero. Therefore, Joe Johnson is required to report a $220,000 capital gain for distributions in excess of basis.

The Process Unit's "Examples of the Process" includes "Example 3 - Alternative Rule for Reconstructing a Partner's Outside Basis":

> You are assigned the 2016 ABC Partnership return and one of its major partners, Mr. Apple, for examination. The exam plan includes Mr. Apple's distributive share of partnership loss and any potential basis limitation. An IDR was issued to Mr. Apple for documentation pertaining to his outside basis in his ABC Partnership interest. Mr. Apple is unable to provide any documentation because his records were destroyed in a house fire the previous year. He states that he and two other partners contributed cash and property in 2005 when the partnership was formed. Since 2005, no partners left, and no new partners were admitted.
>
> You determine the circumstances warrant the use of the alternative rule under IRC 705(b). You inspect the partnership's tax basis balance sheet which shows:

The chart shows $100,000 cash, $250,000 inventory, $475,000 PP&E, and $75,00 other assets, for $900,000 total assets; and $50,000 other liabilities and $250,000 mortgages, for $300,000 total liabilities. More narrative:

> Since the partnership has liabilities, Mr. Apple's share of the basis of partnership property is computed net of liabilities. Treas. Reg. 1.705-1(b) Example 3. Since Mr. Apple has a one-third ownership in the partnership, his basis in the partnership is $300,000. This is computed as follows:

The chart shows that the $900,00 total assets minus $300,000 total liabilities equals a $600,000 net value of the partnership, which was then multiplied by 1/3 to show that his share of net assets is $200,000. Adding his $100,000 share of liabilities to his $20,0000 share of net assets equals$300,000 basis under Reg. § 1.705-1(b). The example then comments:

> **CAUTION**: If the liabilities were not allocated in proportion to Mr. Apple's ownership in ABC Partnership, Mr. Apple's basis would have been different than shown in the example above.

The Process Unit's "Examples of the Process" includes "Example 4 - Basis Reduction for Donated Appreciated Property":

> In 1990, Partner X and Partner Y formed the XY Law Partnership and opened an office. To celebrate the office's opening, a friend gifted a painting to X and Y which they contributed to the partnership and hung in the office's lobby. The donor had a zero basis in the painting. The partnership's inside basis was also zero. In 2020, in anticipation of retiring, X and Y decide to donate the painting to a museum which is an IRC 501(c)(3) charity. An appraisal determine that its fair market value is $1M. No outside basis reduction is necessary for either X or Y as the painting has a zero tax basis. However, X and Y each may claim a charitable contribution deduction of $500,000 regardless of their amounts of outside basis in the XY Partnership. The property's appreciation is not subject to a basis limitation.

The Process Unit's "Examples of the Process" includes "Example - Basis Reduction for Donated Appreciated Property":

> The facts are the same as in Example 4, but the XY Partnership purchased the painting for its lobby in 1990 for $100,000. Additionally, X has an outside basis of $50,000 and Y has an outside basis of $30,000. In this fact pattern, the painting's built-in gain is $900,000 ($1M minus $100,000). X and Y must reduce their outside basis by their shares of the painting's tax basis ($50,000 each). While each partner's outside basis is reduced to zero, X's charitable donation amount is $500,000 ($50,000 basis plus $450,000 share of appreciation). However, Y's charitable donation amount is limited to $480,000 (his outside basis of $30,000 plus his share of appreciation of $450,000). Note that Y's $20,000 unused charitable donation amount would carry over to a year in which he has sufficient outside basis.
>
> Note that in both examples other limitations may apply at the level of the individuals.

II.G.4.e.iii. IRS Description of Loss Limitations

LB&I Process Unit, "Partner's Outside Basis," Document Control Number (DCN) PAR-P-002 (last updated 5/19/2021) (the "Process Unit") discusses calculating a partner's basis in that person's partnership interest. The Process Unit describes "Loss Limitations":

> In general, a partner's distributive share of partnership loss, including capital loss, is allowed only to the extent of the partner's outside basis. IRC 704(d). In determining the extent to which loss or deduction may be claimed, the partner's outside basis is first increased by his share of income, contributions, and liabilities, and decreased by both cash and property distributions and any decrease in his share of partnership liabilities. IRC 705. If the current year aggregate loss exceeds the adjusted outside basis, the loss limitation must be allocated to each type of loss or deduction, including any amounts carried over from prior years due to previous basis limitations. Treas. Reg. 1.704-1(d)(2).
>
> The Tax Cuts and Jobs Act (TCJA) amended IRC 704(d). IRC 704(d)(3)(A) provides that charitable contributions and foreign tax payments are taken into account under the basis limitation rules. Under prior law, a partner could take into account their entire distributive shares of charitable contributions or foreign tax payments even if they were in excess of outside basis.
>
> Under TCJA, for partnership tax years beginning after December 31, 2017, a partner may not take into account his distributive share of foreign tax payments if the amount of the payments exceed his outside basis. The new rule for charitable contributions is more complicated. New IRC 704(d)(3)(B) addresses situations in which a partnership donates built-in gain property, in other words, property whose fair market value exceeds its tax basis. Partners must reduce outside basis by their share of the appreciated property's tax basis. The donated property's built-in gain does not reduce outside basis and is not subject to IRC 704(d).
>
> See Examples 4 and 5 on Slide 29.

The Process Unit's "Examples of the Process" begins with "Example 1 - Determine if a Potential Basis Issue Exists":

> You are assigned to audit ABC Partnership's 2015 Form 1065 Tax Return. As part of your risk analysis, you review the tax return, which includes the partners' Schedule K-1s. A review of the Schedule K-1 shows the following relevant information for partner Sally Smith. Sally does not have an IRC 743(b) adjustment. Assume that the partnership uses the tax basis capital account method for purposes of the calculation:

It then includes a chart showing ($140,000) beginning capital account; ($120,000) ordinary business loss; $10,000 net rental real estate income; ($5,000) net long-term capital loss; ($115,000) current year decrease adding together the income and loss; ($255,000) ending capital account, combining the beginning capital account and current year activity; $75,000 nonrecourse liabilities; $100,000 recourse liabilities; and ($80,000) estimated loss in excess of basis, combining current loss with liabilities and beginning capital account. The analysis continues:

> An estimate of Sally Smith's outside basis (($140,000) plus $175,000 plus $10,000 equals $45,000) shows she may be able to deduct $45,000 of the $125,000 ($120,000 plus $5,000) in partnership losses. The remaining $80,000 loss must be suspended under IRC 704(d) until she has adequate outside basis. Remember to check the Schedule K-1, line 19 for distributions of cash and/or property. Sally's disallowed loss would have increased by the amount of the adjusted basis of any property distributed or any cash distributed.

Please note that this is an estimate of basis because the partnership is not required to track a partner's outside basis. The tax basis capital account reflects the partner's share of the partnership's inside tax basis of its assets less the partner's share of liabilities. For years prior to 2020, the accuracy of this computation was dependent upon the type of capital account that is reflected on Schedule K-1. If the capital account was an "IRC 704(b) book capital" or "GAAP capital," those amounts may have differed significantly from the tax allocations to the partner since the start of her investment. For example, the book income statement may have reflected book deductions that were not allowed for tax purposes (Schedule M-3) in prior years and the current year. In that case, the capital account for book purposes will be lower than that for tax, and thus the estimated basis computed above will be lower than the actual tax basis.

Beginning in 2020, partnerships are required to report capital accounts on a tax basis. In addition, for 2019 and later years, partnerships are required to report a partner's net remaining unrecovered IRC 743(b) adjustment to line 20, Code AH. Please see the instructions to the Form 1065 for later years.

CAUTION: You should not assume the partner deducted the losses in excess of basis. A review of the partner's tax return would need to be performed to determine if she deducted all of the losses. In this example, the ordinary business losses and net rental real estate income would be reported on Sally Smith's Form 1040, Schedule E. The net long-term capital loss would be reported on Form 1040, Schedule D. If Sally Smith correctly limited her 2015 deductible losses from ABC Partnership, then no audit adjustment to suspend the excess losses under IRC 704(d) would be necessary.

If you determine Sally Smith deducted all of the 2015 losses from ABC Partnership on her 2015 Form 1040 return, then you should verify her basis in ABC Partnership to determine whether she deducted losses in excess of basis.

II.G.4.f. Comparing C Corporation Loss Limitations to Those for Partnership and S Corporation Losses

Thus, partnership and S corporations are better for deducting losses against debt than C corporations, because they permit ordinary loss treatment for any portion of the debt not repaid. For partnerships and S corporations, the deduction comes not when the note is worthless but rather every year as the owner's distributive share of the entity's income or loss. Contrast this against needing to prove the C corporation's inability to pay the debt and the additional restrictions imposed on the nature of the loss – partnership and S corporation deducting in calculating adjusted gross income (the most valuable way to deduct anything) compared to a C corporation shareholder's short-term capital loss or miscellaneous itemized deduction.

Rutter v. Commissioner, T.C. Memo. 2017-174, is a good example of this. The taxpayer, a "world-renowned scientist in the field of biotechnology," struck it rich. Then he poured tens of millions of dollars into a new losing business, hoping to replicate his earlier success. First, he used documented loans, which he later converted to preferred stock. Eventually he made advances to the business that were not documented by loans and that never paid interest. The Tax Court held that the advances constituted equity, and even if it might be reversed on that issue the advances would have been nonbusiness bad debts, deductible as capital losses when wholly worthless. If the entity had been taxed as a partnership and his investment structured as a partnership interest, his advances could have generated annually deductible losses.

If one exits from a C corporation that has lost money, see part II.Q.7.l Special Provisions for Loss on the Sale of Stock in a Corporation under Code § 1244.

II.G.4.g. Limitations on Deducting Charitable Contributions

In addition to limitations described in this part II.G.4.g, also see part II.J.4.c.ii Individual Contribution Deduction Requirements, which is part of a contrast with fiduciary income tax in part II.J.4.c Charitable Distributions.

This part II.G.4.g includes parts:

- II.G.4.g.i Charitable Deduction vs. Business Expense
- II.G.4.g.ii Basis Limitations on Deducting Charitable Contributions Made by an S corporation or a Partnership
- II.G.4.g.iii Bargain Sale to Charity
- II.G.4.g.iv Value of Charitable Contribution

II.G.4.g.i. Charitable Deduction vs. Business Expense

Deductions for charitable contributions made by C corporations are limited to 10% of their taxable income,[1239] whereas such contributions made by S corporations and partnerships are deducted at the owner level, subject to limitations due to basis,[1240] percentage (20%-50%) of modified adjusted gross income if the taxpayer is an individual[1241] or if the taxpayer is a fiduciary with unrelated business taxable income,[1242] and certain reductions of itemized deductions (for individuals).[1243]

[1239] Code § 170(b)(2)(A). For a very helpful chart, see Wittenbach, Milani, and Riegel, "Charting The Interactions Of The Charitable Contribution Deduction For Corporations," *Taxation of Exempts* (WG&L) May/Jun 2017, which is saved as Thompson Coburn doc. no. 6568468 (chart in PDF embedded at bottom of first page). For how this rule interacts with the net operating loss (NOL) deduction, see fn 1414 in part II.G.4.l.ii Net Operating Loss Deduction.

[1240] See part II.G.4.g.ii Basis Limitations on Deducting Charitable Contributions Made by an S corporation or a Partnership.

[1241] Code § 170(b)(1).

[1242] See parts II.Q.6.d Unrelated Business Taxable Income and II.Q.7.c S Corporation Owned by a Trust Benefitting Charity, especially part II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction. As described in that part (including Code §§ 681 and 512(e)), the focus is on S corporations because all S corporation K-1 income received by a nongrantor trust deducting charitable contributions is per se unrelated business income, but partnerships can generate unrelated business income, too. Trusts without unrelated business income can deduct all of their charitable contributions, if and to the extent paid from gross income. Code § 642(c)(1). However, Code § 642(c) does not apply to an ESBT. See fn 6055 in part III.A.3.e.ii.(b) ESBT Income Taxation - Overview.

[1243] Code § 68.

IR News Release 2021-27 explains:

New law increases deduction limit for corporate cash contributions for disaster relief; IRS provides recordkeeping relief

The Internal Revenue Service today explained how corporations may qualify for the new 100% limit for disaster relief contributions and offered a temporary waiver of the recordkeeping requirement for corporations otherwise qualifying for the increased limit.

The Taxpayer Certainty and Disaster Tax Relief Act of 2020 (TCDTRA of 2020), enacted Dec. 27, temporarily increased the limit, to up to 100% of a corporation's taxable income, for contributions paid in cash for relief efforts in qualified disaster areas.

Under the new law, qualified disaster areas are those in which a major disaster has been declared under section 401 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act. This does not include any disaster declaration related to COVID-19. Otherwise, it includes any major disaster declaration made by the President during the period beginning on Jan. 1, 2020, and ending on Feb. 25, 2021, as long as it is for an occurrence specified by the Federal Emergency Management Agency as beginning after Dec. 27, 2019, and no later than Dec. 27, 2020. For a list of disaster declarations, visit FEMA.gov.

Qualified contributions must be paid by the corporation during the period beginning on Jan. 1, 2020, and ending on Feb. 25, 2021. Cash contributions to most charitable organizations qualify for this increased limit. Contributions made to a supporting organization or to establish or maintain a donor advised fund do not qualify.

A corporation elects the increased limit by computing its deductible amount of qualified contributions using the increased limit and by claiming the amount on its return for the tax year in which the contribution was made.

Corporations must meet the usual recordkeeping requirements that apply to charitable contributions, including obtaining a contemporaneous written acknowledgment (CWA) from the charity. The CWA must be obtained before the corporation files its return, but no later than the due date, including extensions, for filing that return.

The TCDTRA of 2020 added an additional substantiation requirement for qualified contributions. For corporations electing this increased limit, a corporation's CWA must include a disaster relief statement, stating that the contribution was used, or is to be used, by the eligible charity for relief efforts in one or more qualified disaster areas.

Because of the timing of the new law, the IRS recognizes that some corporations may have obtained a CWA that lacks the disaster relief statement. Accordingly, the agency will not challenge a corporation's deduction of any qualified contribution made before Feb. 1, 2021, solely on the grounds that the corporation's CWA does not include the disaster relief statement.

For additional details on the recordkeeping rules for substantiating gifts to charity, see Publication 526, Charitable Contributions, available on IRS.gov. More information about other coronavirus-related relief, can be found at IRS.gov.

The 50% limit in the preceding sentence is 60% for cash contributions made in any taxable year beginning after December 31, 2017, and before January 1, 2026[1244] and is increased to 100% in 2020 for certain cash contributions, as part of broader relief provided in the CARES Act, § 2205, "Modification of Limitations on Charitable Contributions during 2020"“

(a) TEMPORARY SUSPENSION OF LIMITATIONS ON CERTAIN CASH CONTRIBUTIONS.

(1) IN GENERAL. Except as otherwise provided in paragraph (2), qualified contributions shall be disregarded in applying subsections (b) and (d) of section 170 of the Internal Revenue Code of 1986.

(2) TREATMENT OF EXCESS CONTRIBUTIONS. For purposes of section 170 of the Internal Revenue Code of 1986-

(A) INDIVIDUALS. In the case of an individual-

(i) LIMITATION. Any qualified contribution shall be allowed as a deduction only to the extent that the aggregate of such contributions does not exceed the excess of the taxpayer's contribution base (as defined in subparagraph (H) of section 170(b)(1) of such Code) over the amount of all other charitable contributions allowed under section 170(b)(1) of such Code.

(ii) CARRYOVER. If the aggregate amount of qualified contributions made in the contribution year (within the meaning of section 170(d)(1) of such Code) exceeds the limitation of clause (i), such excess shall be added to the excess described in section 170(b)(1)(G)(ii).

(B) CORPORATIONS. In the case of a corporation-

(i) LIMITATION. Any qualified contribution shall be allowed as a deduction only to the extent that the aggregate of such contributions does not exceed the excess of 25 percent of the taxpayer's taxable income (as determined under paragraph (2) of section 170(b) of such Code) over the amount of all other charitable contributions allowed under such paragraph.

(ii) CARRYOVER. If the aggregate amount of qualified contributions made in the contribution year (within the meaning of section 170(d)(2) of such Code) exceeds the limitation of clause (i), such excess shall be appropriately taken into account under section 170(d)(2) subject to the limitations thereof.

[1244] Code § 170(b)(1)(G)(i).

(3) QUALIFIED CONTRIBUTIONS.

(A) IN GENERAL. For purposes of this subsection, the term “qualified contribution” means any charitable contribution (as defined in section 170(c) of the Internal Revenue Code of 1986) if -

(i) such contribution is paid in cash during calendar year 2020 to an organization described in section 170(b)(1)(A) of such Code, and

(ii) the taxpayer has elected the application of this section with respect to such contribution.

(B) EXCEPTION. Such term shall not include a contribution by a donor if the contribution is-

(i) to an organization described in section 509(a)(3) of the Internal Revenue Code of 1986, or

(ii) for the establishment of a new, or maintenance of an existing, donor advised fund (as defined in section 4966(d)(2) of such Code).

(C) APPLICATION OF ELECTION TO PARTNERSHIPS AND S CORPORATIONS. In the case of a partnership or S corporation, the election under subparagraph (A)(ii) shall be made separately by each partner or shareholder.

(b) INCREASE IN LIMITS ON CONTRIBUTIONS OF FOOD INVENTORY. In the case of any charitable contribution of food during 2020 to which section 170(e)(3)(C) of the Internal Revenue Code of 1986 applies, subclauses (I) and (II) of clause (ii) thereof shall each be applied by substituting “25 percent” for “15 percent.”

(c) EFFECTIVE DATE. This section shall apply to taxable years ending after December 31, 2019.

The Consolidated Appropriations Act, 2021, § 213, “Modification of Limitations on Charitable Contributions,” extended the 100% limited for individuals’ qualified cash contributions:

(a) IN GENERAL. Subsections (a)(3)(A)(i) and (b) of section 2205 of the CARES Act are each amended by inserting ‘‘or 2021’’ after ‘‘2020’’.

(b) CONFORMING AMENDMENT. The heading of section 2205 of the CARES Act is amended by striking ‘‘modification of limitations on charitable contributions during 2020’’ and inserting ‘‘temporary modification of limitations on charitable contributions’’.

(c) EFFECTIVE DATE. The amendments made by this section shall apply to contributions made after December 31, 2020.

The Consolidated Appropriations Act, 2021, § 304(a), “SPECIAL RULES FOR QUALIFIED DISASTER RELIEF CONTRIBUTIONS,” provides:

(1) IN GENERAL. In the case of a qualified disaster relief contribution made by a corporation-

(A) section 2205(a)(2)(B) of the CARES Act shall be applied first to qualified contributions without regard to any qualified disaster relief contributions and then separately to such qualified disaster relief contribution, and

(B) in applying such section to such qualified disaster relief contributions, clause (i) thereof shall be applied-

(i) by substituting ‘‘100 percent’’ for ‘‘25 percent’’, and

(ii) by treating qualified contributions other than qualified disaster relief contributions as contributions allowed under section 170(b)(2) of the Internal Revenue Code of 1986.

(2) QUALIFIED DISASTER RELIEF CONTRIBUTION. For purposes of this subsection, the term ‘‘qualified disaster relief contribution’’ means any qualified contribution (as defined in section 2205(a)(3) of the CARES Act) if -

(A) such contribution-

(i) is paid, during the period beginning on January 1, 2020, and ending on the date which is 60 days after the date of the enactment of this Act, and

(ii) is made for relief efforts in one or more qualified disaster areas,

(B) the taxpayer obtains from such organization contemporaneous written acknowledgment (within the meaning of section 170(f)(8) of such Code) that such contribution was used (or is to be used) for relief efforts described in subparagraph (A)(ii), and

(C) the taxpayer has elected the application of this subsection with respect to such contribution.

(3) CROSS-REFERENCE. For the suspension of the limitation on qualified disaster relief contributions made by an individual during 2020, see section 2205(a) of the CARES Act.

Additional limitations apply to contributions of ordinary income and capital gain property.[1245]

Transfers of property to a Code § 170(c) organization bearing a direct relationship to the taxpayer’s trade or business that are made with a reasonable expectation of financial return commensurate with the amount of the transfer may constitute allowable deductions as trade or

[1245] Code § 170(e).

business expenses[1246] rather than as charitable contributions.[1247] Note that some trade or business expenses, such as entertainment, are disallowed.[1248] As an aside, when an individual formed and funded a nonprofit corporation that never sought a tax exemption from the IRS, which corporation ran an event to benefit a charity, that individual was unable to treat the corporation as an S corporation and deduct the losses from the event, because the founder could not and did not own the nonprofit corporation.[1249]

A taxpayer that promises to donate a portion of its sales or profits to organizations that it specifies may deduct those donations as business expenses so long as the expenditure is not expressly precluded from being deducted (the latter including lobbying expenses).[1250]

[1246] Reg. § 1.162-15(a)(1) provides that any amounts characterized as Code § 170 charitable contributions are not deductible as Code § 162 business expenses. Rul. 84-110 amplifies Rev. Rul. 73-113 (fn. 1247) by providing that expenditures of serving as a public official are Code § 162 business expenses, even if not engaged in for profit (in the ruling, the expenses were much more than the annual income), because Code § 7701(a)(26) eliminates the profit motive as a requirement for being in the business of serving as a public official.

[1247] Reg. § 1.170A-1(c)(5); Rev. Rul. 73-113, which provides, "Whether a particular transfer was made with a reasonable expectation of a financial return, commensurate with the amount of the transfer, is a question of fact."

[1248] Code § 274(a), "Entertainment, amusement, recreation, or qualified transportation fringes," includes:

(1) *In general*. No deduction otherwise allowable under this chapter shall be allowed for any item—
   - (A) *Activity*. With respect to an activity which is of a type generally considered to constitute entertainment, amusement, or recreation, or
   - (B) *Facility*. With respect to a facility used in connection with an activity referred to in subparagraph (A).

(2) *Special rules*. For purposes of applying paragraph (1) —
   - (A) Dues or fees to any social, athletic, or sporting club or organization shall be treated as items with respect to facilities.
   - (B) An activity described in section 212 shall be treated as a trade or business.
   - (C) Repealed.

(3) *Denial of deduction for club dues*. Notwithstanding the preceding provisions of this subsection, no deduction shall be allowed under this chapter for amounts paid or incurred for membership in any club organized for business, pleasure, recreation, or other social purpose.

[1249] *Deckard v. Commissioner*, 155 T.C. No. 8 (2020). Given that the event seemed consistent with the charity's goals, the organizer should have asked the charity to form a single member LLC for the event, and then he could have taken a charitable contribution deduction for the event's losses that he funded.

[1250] CCA 201543013, which discussed the customers' charitable intent:

> Here, it does not appear that Taxpayer's customers have a right to a share of the amounts in Program X. The [promise to make certain donations] does not by itself appear to give the customers control over these funds such that Taxpayer is the agent of the customer or is acting as a mere conduit for the dispersal of these funds.
>
> You have indicated that factual development of this issue is ongoing. If you wish to pursue the agency theory, we suggest that you develop the facts consistent with the criteria set out in *National Carbide v. Commissioner*, 336 U.S. 422 (1949) and *Commissioner v. Bollinger*, 485 U.S. 340 (1988). If you wish to pursue a conduit theory, you may want to review *Seven-Up Co. v. Commissioner*, 14 T.C. 965 (1950) *acq. in result*, 1974-2 C.B. 1. It does not appear from the facts supplied so far that the funds in Program X belong to and are donated by Taxpayer's customers.

However, Rev. Proc. 2019-12 provides new rules for when a business entity makes a charitable contribution that qualifies for a state tax credit. Below are rules for C corporations, followed by rules for pass-through entities.

If a C corporation makes a payment to or for the use of a Code § 170(c) organization and receives or expects to receive a tax credit that reduces a state or local tax imposed on the C corporation in return for such payment, the C corporation may treat such payment as meeting the requirements of an ordinary and necessary business expense for purposes of Code § 162(a) to the extent of the credit received or expected to be received, without needing to prove the business purpose for that part.[1251] Thus, a C corporation that receives a 100% tax credit deducts the entire contribution as a business expense without needing to prove business purposes,[1252] and a C corporation that receives an 80% tax credit deducts 80% as a business expense without needing to prove business purposes and 20% if and to the extent that taxpayer proves a business purpose.[1253]

Under certain conditions, pass-through entities, such as partnerships and S corporations but not disregarded entities, may deduct contributions that provide credits against tax imposed at an entity level (a "specified pass-through entity").[1254] If a specified pass-through entity makes a qualified payment and receives or expects to receive a credit against a state or local tax other

[1251] Rev. Proc. 2019-12, § 3.02. Rev. Proc. 2019-12, § 2 reasons:

> To the extent a C corporation receives or expects to receive a state or local tax credit in return for a payment to an organization described in section 170(c), it is reasonable to conclude that there is a direct benefit to the C corporation's business in the form of a reduction in the state or local taxes the C corporation would otherwise have to pay and, therefore, to the extent of the amount of the credit received or expected to be received, there is a reasonable expectation of financial return to the C corporation commensurate with the amount of the transfer.

[1252] Rev. Proc. 2019-12, § 3.03(1) provides:

> *Example 1*. A, a C corporation engaged in a trade or business, makes a payment of $1,000 to an organization described in section 170(c). In return for the payment, A receives or expects to receive a dollar-for-dollar state tax credit to be applied to A's state corporate income tax liability. Under section 3 of this revenue procedure, A may treat the $1,000 payment as meeting the requirements of an ordinary and necessary business expense under section 162.

[1253] Rev. Proc. 2019-12, § 3.03(2) provides:

> *Example 2*. B, a C corporation engaged in a trade or business, makes a payment of $1,000 to an organization described in section 170(c). In return for the payment, B receives or expects to receive a tax credit equal to 80 percent of the amount of this payment ($800) to be applied to B's local real property tax liability. Under section 3 of this revenue procedure, B may treat $800 as meeting the requirements of an ordinary and necessary business expense under section 162. The treatment of the remaining $200 will depend upon the facts and circumstances and is not affected by this revenue procedure.

[1254] Rev. Proc. 2019-12, § 4.02 provides:

> *Specified pass-through entity*. An entity will be considered a specified pass-through entity described in this section 4.02 only if each of the requirements set forth in section 4.02(1) through (4) is satisfied.
>
> (1) The entity is a business entity other than a C corporation that is regarded for all federal income tax purposes as separate from its owners under section 301.7701-3;
> (2) The entity operates a trade or business within the meaning of section 162;
> (3) The entity is subject to a state or local tax incurred in carrying on its trade or business that is imposed directly on the entity; and
> (4) In return for a payment to an organization described in section 170(c), the entity receives or expects to receive a state or local tax credit that the entity applies or expects to apply to offset a state or local tax described in section 4.02(3) of this revenue procedure other than a state or local income tax.

than income tax, the specified pass-through entity may treat such payment as a Code § 162(a) expense to the extent of the credit received or expected to be received.[1255] "Good" taxes, credits against which count under this rule, include excise[1256] or real property tax[1257] that the entity pays.

Rev. Proc. 2019-12 follows up on questions raised about a business' charitable deductions in light of administrative action limiting charitable contributions that generate state tax credits and should be analyzed in the context of that action.[1258]

Regulations codify Rev. Proc. 2019-12, with some modifications. The preamble to the proposed regulations explained:[1259]

> In the interest of providing certainty for taxpayers, the Treasury Department and the IRS believe that it is appropriate to propose regulations to incorporate the safe harbors set out in Rev. Proc. 2019-12 and to request comments on these safe harbors. Thus, these proposed regulations propose amending § 1.162-15(a) to incorporate the Rev. Proc. 2019-12 safe harbors. These proposed regulations also propose amending § 1.170A-1(c)(5) and (h)(3)(viii) to provide cross references to § 1.162-15(a). The Treasury Department and the IRS specifically request comments on whether the safe harbors should be expanded to apply to an individual who is carrying on a trade or business or an activity described in section 212.
>
> The proposed regulations propose additional revisions to § 1.162-15(a) to more clearly reflect the current state of the law regarding a taxpayer's payment or transfer to an entity described in section 170(c). If the taxpayer's payment or transfer bears a direct relationship to its trade or business, and the payment is made with a reasonable expectation of commensurate financial return, the payment or transfer to the section 170(c) entity may constitute an allowable deduction as a trade or business expense under section 162, rather than a charitable contribution under section 170. See § 1.170A-1(c)(5); *Marquis v. Commissioner*, 49 T.C. 695 (1968). A proposed example illustrates that this rule applies regardless of whether the taxpayer expects to receive a state or local tax credit in return.
>
> The proposed revisions are also consistent with the decision in *American Bar Endowment*, which states that a payment to an entity described in section 170(c) may have a dual character—part charitable contribution and part business expense.

[1255] Rev. Proc. 2019-12, § 4.03 "safe harbor."
[1256] Rev. Proc. 2019-12, § 4.04(1), Example 1.
[1257] Rev. Proc. 2019-12, § 4.04(2), Example 2, which provides:

> S is an S corporation engaged in a trade or business and is owned by individuals C and D. S makes a payment of $1,000 to an organization described in section 170(c). In return for the payment, S receives or expects to receive a state tax credit equal to 80 percent of the amount of this payment ($800) to be applied to S's local real property tax liability incurred by S in carrying on its trade or business. Under applicable state and local law, the real property tax is imposed at the entity level (not the owner level). Under section 4 of this revenue procedure, S may treat $800 of the payment as meeting the requirements of an ordinary and necessary business expense under section 162. The treatment of the remaining $200 will depend upon the facts and circumstances and is not affected by this revenue procedure.

[1258] See text accompanying fn 1437 in part II.G.4.n Itemized Deductions; Deductions Disallowed for Purposes of the Alternative Minimum Tax.
[1259] [REG-107431-19], RIN 1545-BP40 (12/17/2019).

> 477 U.S. at 117. Under *American Bar Endowment* and § 1.170A-1(h), if a taxpayer makes a payment to an entity described under section 170(c) in an amount that exceeds the fair market value of the benefit that the taxpayer receives or expects to receive in return, and this excess amount is paid with charitable intent, the taxpayer is allowed a charitable contribution deduction under section 170 for this excess amount.
>
> In addition, the proposed regulations propose to add a cross-reference to § 1.170A-1(h) (payments to section 170(c) entities in exchange for consideration), which provides more detailed rules for determining whether a payment, or a portion of a payment, to an entity described in section 170(c) may be deducted under section 162(a) or section 170.

After discussing comments to Notice 2019-12, the preamble said:[1260]

> Under these proposed regulations, an individual who itemizes deductions and who makes a payment to a section 170(c) entity in exchange for a state or local tax credit may treat as a payment of state or local tax for purposes of section 164 the portion of such payment for which a charitable contribution deduction under section 170 is or will be disallowed under § 1.170A-1(h)(3). This treatment is allowed in the taxable year in which the payment is made, but only to the extent that the resulting credit is applied pursuant to applicable state or local law to offset the individual's state or local tax liability for such taxable year or the preceding taxable year. Any unused credit permitted to be carried forward may be treated as a payment of state or local tax under section 164 in the taxable year or years for which the carryover credit is applied in accordance with state or local law. The safe harbor for individuals applies only to payments of cash and cash equivalents.
>
> The proposed regulations are not intended to permit a taxpayer to avoid the limitations of section 164(b)(6). Therefore, the proposed regulations provide that any payment treated as a state or local tax under section 164, pursuant to the safe harbor provided in § 1.164-3(j) of the proposed regulations, is subject to the limitations on deductions in section 164(b)(6). Furthermore, the proposed regulations are not intended to permit deductions of the same payments under more than one provision. Thus, the proposed regulations provide that an individual who relies on the safe harbor in § 1.164-3(j) to deduct qualifying payments under section 164 may not also deduct the same payments under any other section of the Code.

After reviewing the history of quid pro quo cases, the preamble said:[1261]

> The quid pro quo principle is thus equally applicable regardless of whether the donor expects to receive the benefit from the donee or from a third party. In either case, the donor's payment is not a charitable contribution or gift to the extent that the donor expects a substantial benefit in return. Accordingly, the Treasury Department and the IRS propose amendments to § 1.170A-1(h) that address a donor's payments in exchange for consideration in order for the regulation to reflect existing law. Specifically, these proposed amendments revise paragraph (h)(4) to provide definitions of "in consideration for" and "goods and services" for purposes of applying the rules in § 1.170A-1(h). Under the proposed regulations, a taxpayer will be treated as receiving goods and services in consideration for a taxpayer's payment or transfer to an entity

[1260] [REG-107431-19], RIN 1545-BP40 (12/17/2019).
[1261] [REG-107431-19], RIN 1545-BP40 (12/17/2019).

> described in section 170(c) if, at the time the taxpayer makes the payment or transfer, the taxpayer receives or expects to receive goods or services in return.
>
> The proposed regulations do not amend the language of § 1.170A-13(f)(6) which discusses "in consideration for" for purposes of determining whether the taxpayer provides proper substantiation of its charitable contribution. Section 1.170A-13(f) details the requirements of a contemporaneous written acknowledgment, including a statement of whether the donee organization provides any goods or services in consideration for any cash or other property transferred to the donee organization and a description and a good faith estimate of the value of those goods or services. See § 1.170A-13(f)(2)(ii) and (iii). These substantiation provisions refer only to written acknowledgments from donee organizations and do not address the application of quid pro quo principles to benefits received from parties other than donees. The Treasury Department and the IRS request comments on whether guidance concerning substantiation and reporting of quid pro quo benefits provided or expected to be provided by third parties, including state governments, would be beneficial to taxpayers in demonstrating that they have given more than they received or expected to receive and to the IRS in administering the proposed regulation. In addition, the Treasury Department and the IRS request comments regarding the manner by which donors, donees, or third parties may report or provide substantiation for the value or type of consideration received or expected to be received from third parties.
>
> For additional clarity, the proposed regulation amends the language in § 1.170A-1(h)(2)(i)(B) to clarify that the fair market value of goods and services includes the value of goods and services provided by parties other than the donee. Also, the proposed regulation adds a definition of "goods and services" that is the same as the definition in § 1.170A-13(f)(5). Finally, the proposed regulation revises the cross-references defining "in consideration for" and "goods and services" in paragraphs (h)(1) and (h)(3)(iii) to be consistent with the proposed definitions provided in paragraph (h)(4).

The proposed regulations would be prospective, but taxpayers would be able to rely on them for any post-2017 payments and transfers.

The preamble to the final regulations, T.D. 9907 (8/7/2020), explains:

> The Treasury Department and the IRS adopt the proposed regulations with clarifications in response to the written comments received and testimony provided.
>
> First, the final regulations retain the proposed amendments to § 1.162-15(a). The final regulations continue to clarify that a taxpayer's payment or transfer to a section 170(c) entity may constitute an allowable deduction as a trade or business expense under section 162, rather than a charitable contribution under section 170. The final regulations also retain the examples demonstrating the application of this rule with minor clarifying changes.
>
> Second, the final regulations retain the safe harbors under section 162 to provide certainty with respect to the treatment of payments made by business entities to an entity described in section 170(c). The final regulations provide safe harbors under section 162 for payments made by a business entity that is a C corporation or specified passthrough entity to or for the use of an organization described in section 170(c) if the C corporation or specified passthrough entity receives or expects to receive State or

local tax credits in return. To the extent that a C corporation or specified passthrough entity receives or expects to receive a State or local tax credit in return for a payment to an organization described in section 170(c), it is reasonable to conclude that there is a direct benefit and a reasonable expectation of commensurate financial return to the C corporation's or specified passthrough entity's business in the form of a reduction in the State or local taxes that the entity would otherwise be required to pay. Thus, the final regulations provide safe harbors that allow a C corporation or specified passthrough entity engaged in a trade or business to treat the portion of the payment that is equal to the amount of the credit received or expected to be received as meeting the requirements of an ordinary and necessary business expense under section 162. The safe harbors for C corporations and specified passthrough entities apply only to payments of cash and cash equivalents. The safe harbor for specified passthrough entities does not apply if the credit received or expected to be received reduces a State or local income tax.

Reg. § 1.162-15, "Contributions, dues, etc.," restates subsection (a), "Payments and transfers to entities described in section 170(c)":

(1) *In general*. A payment or transfer to or for the use of an entity described in section 170(c) that bears a direct relationship to the taxpayer's trade or business and that is made with a reasonable expectation of financial return commensurate with the amount of the payment or transfer may constitute an allowable deduction as a trade or business expense rather than a charitable contribution deduction under section 170. For payments or transfers in excess of the amount deductible under section 162(a), see § 1.170A-1(h).

(2) *Examples*. The following examples illustrate the rules of paragraph (a)(1) of this section:

(i) *Example (1)*. A, an individual, is a sole proprietor who manufactures musical instruments and sells them through a website. A makes a $1,000 payment to a local church (which is a charitable organization described in section 170(c)) for a half-page advertisement in the church's program for a concert. In the program, the church thanks its concert supporters, including A. A's advertisement includes the URL for the website through which A sells its instruments. A reasonably expects that the advertisement will attract new customers to A's website and will help A to sell more musical instruments. A may treat the $1,000 payment as an expense of carrying on a trade or business under section 162.

(ii) *Example (2)*. P, a partnership, operates a chain of supermarkets, some of which are located in State N. P operates a promotional program in which it sets aside the proceeds from one percent of its sales each year, which it pays to one or more charities described in section 170(c). The funds are earmarked for use in projects that improve conditions in State N. P makes the final determination on which charities receive payments. P advertises the program. P reasonably believes the program will generate a significant degree of name recognition and goodwill in the communities where it operates and thereby increase its revenue. As part of the program, P makes a $1,000 payment to a charity described in section 170(c). P may treat the $1,000 payment as an expense of carrying on a trade or business under section 162. This result is unchanged if, under State N's tax credit program, P expects to receive a $1,000 income tax credit on account of

P’s payment, and under State N law, the credit can be passed through to P’s partners.

(3) *Safe harbors for C corporations and specified passthrough entities making payments in exchange for State or local tax credits*.

(i) *Safe harbor for C corporations*. If a C corporation makes a payment to or for the use of an entity described in section 170(c) and receives or expects to receive in return a State or local tax credit that reduces a State or local tax imposed on the C corporation, the C corporation may treat such payment as meeting the requirements of an ordinary and necessary business expense for purposes of section 162(a) to the extent of the amount of the credit received or expected to be received.

(ii) *Safe harbor for specified passthrough entities*.

(A) *Definition of specified passthrough entity*. For purposes of this paragraph (a)(3)(ii), an entity is a specified passthrough entity if each of the following requirements is satisfied -

(1) The entity is a business entity other than a C corporation and is regarded for all Federal income tax purposes as separate from its owners under § 301.7701-3 of this chapter;

(2) The entity operates a trade or business within the meaning of section 162;

(3) The entity is subject to a State or local tax incurred in carrying on its trade or business that is imposed directly on the entity; and

(4) In return for a payment to an entity described in section 170(c), the entity described in paragraph (a)(3)(ii)(A)(1) of this section receives or expects to receive a State or local tax credit that the entity applies or expects to apply to offset a State or local tax described in paragraph (a)(3)(ii)(A)(3) of this section.

(B) *Safe harbor*. Except as provided in paragraph (a)(3)(ii)(C) of this section, if a specified passthrough entity makes a payment to or for the use of an entity described in section 170(c), and receives or expects to receive in return a State or local tax credit that reduces a State or local tax described in paragraph (a)(3)(ii)(A)(3) of this section, the specified passthrough entity may treat such payment as an ordinary and necessary business expense for purposes of section 162(a) to the extent of the amount of credit received or expected to be received.

(C) *Exception*. The safe harbor described in this paragraph (a)(3)(ii) does not apply if the credit received or expected to be received reduces a State or local income tax.

(iii) *Definition of payment*. For purposes of this paragraph (a)(3), payment is defined as a payment of cash or cash equivalent.

(iv) *Examples*. The following examples illustrate the rules of paragraph (a)(3) of this section.

(A) *Example (1)*. *C corporation that receives or expects to receive dollar-for-dollar State or local tax credit*. A, a C corporation engaged in a trade or business, makes a payment of $1,000 to an entity described in section 170(c). In return for the payment, A expects to receive a dollar-for-dollar State tax credit to be applied to A's State corporate income tax liability. Under paragraph (a)(3)(i) of this section, A may treat the $1,000 payment as an expense of carrying on a trade or business under section 162.

(B) *Example (2)*. *C corporation that receives or expects to receive percentage-based State or local tax credit*. B, a C corporation engaged in a trade or business, makes a payment of $1,000 to an entity described in section 170(c). In return for the payment, B expects to receive a local tax credit equal to 80 percent of the amount of this payment ($800) to be applied to B's local real property tax liability. Under paragraph (a)(3)(i) of this section, B may treat $800 as an expense of carrying on a trade or business under section 162. The treatment of the remaining $200 will depend upon the facts and circumstances and is not affected by paragraph (a)(3)(i) of this section.

(C) *Example (3)*. *Partnership that receives or expects to receive dollar-for-dollar State or local tax credit*. P is a limited liability company classified as a partnership for Federal income tax purposes under § 301.7701-3 of this chapter. P is engaged in a trade or business and makes a payment of $1,000 to an entity described in section 170(c). In return for the payment, P expects to receive a dollar-for-dollar State tax credit to be applied to P's State excise tax liability incurred by P in carrying on its trade or business. Under applicable State law, the State's excise tax is imposed at the entity level (not the owner level). Under paragraph (a)(3)(ii) of this section, P may treat the $1,000 as an expense of carrying on a trade or business under section 162.

(D) *Example (4)*. *S corporation that receives or expects to receive percentage-based State or local tax credit*. S is an S corporation engaged in a trade or business and is owned by individuals C and D. S makes a payment of $1,000 to an entity described in section 170(c). In return for the payment, S expects to receive a local tax credit equal to 80 percent of the amount of this payment ($800) to be applied to S's local real property tax liability incurred by S in carrying on its trade or business. Under applicable local law, the real property tax is imposed at the entity level (not the owner level). Under paragraph (a)(3)(ii) of this section, S may treat $800 of the payment as an expense of carrying on a trade or business under section 162. The treatment of the remaining $200 will depend upon the facts and circumstances and is not affected by paragraph (a)(3)(ii) of this section.

(v) *Applicability of section 170 to payments in exchange for State or local tax benefits*. For rules regarding the availability of a charitable contribution deduction under section 170 where a taxpayer makes a payment or transfers property to or for the use of an entity described in section 170(c) and receives or expects to receive a State or local tax benefit in return for such payment, see § 1.170A-1(h)(3).

(4) *Applicability dates*. Paragraphs (a)(1) and (2) of this section, regarding the application of section 162 to taxpayers making payments or transfers to entities described in section 170(c), apply to payments or transfers made on or after December 17, 2019. Section 1.162-15(a), as it appeared in the April 1, 2020 edition of 26 CFR part 1, generally applies to payments or transfers made prior to December 17, 2019. However, taxpayers may choose to apply paragraphs (a)(1) and (2) of this section to payments and transfers made on or after January 1, 2018. Paragraph (a)(3) of this section, regarding the safe harbors for C corporations and specified passthrough entities making payments to section 170(c) entities in exchange for State or local tax credits, applies to payments made by these entities on or after December 17, 2019. However, taxpayers may choose to apply the safe harbors of paragraph (a)(3) to payments made on or after January 1, 2018.

New Reg. § 1.162-15(d), "Cross reference," provides:

For provisions dealing with expenditures for institutional or "good will" advertising, see § 1.162-20(a)(2).

For the flip side of the advertising deduction, see Advertising Unrelated Business Taxable Income and 3rd Party Contractor Issues | Internal Revenue Service (irs.gov).

Reg. § 1.164-3, "Definitions and special rules," adds subsection (j), "Safe harbor for payments by individuals in exchange for State or local tax credits":

(1) *In general*. An individual who itemizes deductions and who makes a payment to or for the use of an entity described in section 170(c) in consideration for a State or local tax credit may treat as a payment of State or local tax for purposes of section 164 the portion of such payment for which a charitable contribution deduction under section 170 is disallowed under § 1.170A-1(h)(3). This treatment as payment of a State or local tax is allowed in the taxable year in which the payment is made to the extent that the resulting credit is applied, consistent with applicable State or local law, to offset the individual's State or local tax liability for such taxable year or the preceding taxable year.

(2) *Credits carried forward*. To the extent that a State or local tax credit described in paragraph (j)(1) of this section is not applied to offset the individual's applicable State or local tax liability for the taxable year of the payment or the preceding taxable year, any excess State or local tax credit permitted to be carried forward may be treated as a payment of State or local tax under section 164(a) in the taxable year or years for which the carryover credit is applied in accordance with State or local law.

(3) *Limitation on individual deductions*. Nothing in this paragraph (j) may be construed as permitting a taxpayer who applies this safe harbor to avoid the limitation of section 164(b)(6) for any amount paid as a tax or treated under this paragraph (j) as a payment of tax.

(4) *No safe harbor for transfers of property*. The safe harbor provided in this paragraph (j) applies only to a payment of cash or cash equivalent.

(5) *Coordination with other deductions*. An individual who deducts a payment under section 164 may not also deduct the same payment under any other Code section.

(6) *Examples*. In the following examples, assume that the taxpayer is an individual who itemizes deductions for Federal income tax purposes.

(i) *Example (1)*. In year 1, Taxpayer A makes a payment of $500 to an entity described in section 170(c). In return for the payment, A receives a dollar-for-dollar State income tax credit. Prior to application of the credit, A's State income tax liability for year 1 was more than $500. A applies the $500 credit to A's year 1 State income tax liability. Under paragraph (j)(1) of this section, A treats the $500 payment as a payment of State income tax in year 1. To determine A's deduction amount, A must apply the provisions of section 164 applicable to payments of State and local taxes, including the limitation in section 164(b)(6). See paragraph (j)(3) of this section.

(ii) *Example (2)*. In year 1, Taxpayer B makes a payment of $7,000 to an entity described in section 170(c). In return for the payment, B receives a dollar-for-dollar State income tax credit, which under State law may be carried forward for three taxable years. Prior to application of the credit, B's State income tax liability for year 1 was $5,000; B applies $5,000 of the $7,000 credit to B's year 1 State income tax liability.

Under paragraph (j)(1) of this section, B treats $5,000 of the $7,000 payment as a payment of State income tax in year 1. Prior to application of the remaining credit, B's State income tax liability for year 2 exceeds $2,000. B applies the excess credit of $2,000 to B's year 2 State income tax liability. For year 2, under paragraph (j)(2) of this section, B treats the $2,000 as a payment of State income tax under section 164. To determine B's deduction amounts in years 1 and 2, B must apply the provisions of section 164 applicable to payments of State and local taxes, including the limitation under section 164(b)(6). See paragraph (j)(3) of this section.

(iii) *Example (3)*. In year 1, Taxpayer C makes a payment of $7,000 to an entity described in section 170(c). In return for the payment, C receives a local real property tax credit equal to 25 percent of the amount of this payment ($1,750). Prior to application of the credit, C's local real property tax liability in year 1 was more than $1,750. C applies the $1,750 credit to C's year 1 local real property tax liability. Under paragraph (j)(1) of this section, for year 1, C treats $1,750 of the $7,000 payment as a payment of local real property tax for purposes of section 164. To determine C's deduction amount, C must apply the provisions of section 164 applicable to payments of State and local taxes, including the limitation under section 164(b)(6). See paragraph (j)(3) of this section.

(7) *Applicability date*. This paragraph (j) applies to payments made to section 170(c) entities on or after June 11, 2019. However, a taxpayer may choose to apply this paragraph (j) to payments made to section 170(c) entities after August 27, 2018.

Reg. § 1.170A-1(h)(3), "Payment in exchange for consideration," complements Reg. § 1.164-3 regarding any related contributions and is reproduced with the rest of Reg. § 1.170A-1(h) in part II.G.4.g.iii Bargain Sale to Charity.

II.G.4.g.ii. Basis Limitations on Deducting Charitable Contributions Made by an S corporation or a Partnership

A partner may deduct charitable contributions without regard to the partner's basis.[1262] The basis of the partner's interest in the partnership is decreased (but not below zero) by the partner's share of the partnership's basis in the property contributed.[1263]

Until recently, the full fair market value of the contribution reduced basis, and triggering the regular basis limitations under part II.G.4.c Basis Limitations for Deducting Partnership and S Corporation Losses. However, for contributions made in tax years beginning after December 21, 2005,[1264] appreciation does not reduce basis and therefore is not subject to these basis limitations.[1265]

Trusts that are partners or S corporation shareholders may see their charitable contributions reduced due to certain rules relating to unrelated business income (which rules apply to all S corporation K-1 income even if the S corporation does not engage in a trade or business and does not have any debt-financed income). See part II.Q.7.c S Corporation Owned by a Trust Benefitting Charity (some of which applies to partnerships, even though the focus is S corporations). Although generally a trust cannot deduct contributions unless the trust agreement authorizes contributions to be made, trust deductions of partnership contributions are not so limited.[1266]

II.G.4.g.iii. Bargain Sale to Charity

Reg. § 1.170A-1(h), "Payment in exchange for consideration," provides:

(1) Burden on taxpayer to show that all or part of payment is a charitable contribution or gift. No part of a payment that a taxpayer makes to or for the use of an organization described in section 170(c) that is in consideration for (as defined in paragraph (h)(4)(i) of this section) goods or services (as defined in paragraph (h)(4)(ii) of this section) is a contribution or gift within the meaning of section 170(c) unless the taxpayer -

(i) Intends to make a payment in an amount that exceeds the fair market value of the goods or services; and

(ii) Makes a payment in an amount that exceeds the fair market value of the goods or services.

[1262] Letter Ruling 8405084; see fns. 1228-1229 in part II.G.4.e Basis Limitations for Partners in a Partnership. See discussion in McKee, Nelson & Whitmire, *Federal Taxation of Partnerships and Partners*, ¶ 11.05[1][b] "Exclusion of Charitable Contributions From the Limitation."
[1263] Rev. Rul. 96-11; see Code § 705(a)(2)(B).
[1264] P.L. 109-280, section 1203(a).
[1265] Code § 1366(d)(4), 1367(a)(2).
[1266] Rev. Rul. 2004-5, which is discussed in fn. 4914, which is found in part II.Q.7.c.i Income Tax Trap - Reduction in Trust's Charitable Deduction. Note that charitable contributions by trusts are more beneficial for net investment income tax purposes than charitable contributions by individuals. See fn. 2324.

(2) *Limitation on amount deductible*.

(i) *In general*. The charitable contribution deduction under section 170(a) for a payment a taxpayer makes partly in consideration for goods or services may not exceed the excess of -

(A) The amount of any cash paid and the fair market value of any property (other than cash) transferred by the taxpayer to an organization described in section 170(c); over

(B) The fair market value of the goods or services received or expected to be received in return.

(ii) *Special rules*. For special limits on the deduction for charitable contributions of ordinary income and capital gain property, see section 170(e) and §§ 1.170A-4 and 1.170A-4A.

(3) *Payments resulting in state or local tax benefits*.

(i) *State or local tax credits*. Except as provided in paragraph (h)(3)(vi) of this section, if a taxpayer makes a payment or transfers property to or for the use of an entity described in section 170(c), the amount of the taxpayer's charitable contribution deduction under section 170(a) is reduced by the amount of any state or local tax credit that the taxpayer receives or expects to receive in consideration for the taxpayer's payment or transfer.

(ii) *State or local tax deductions*.

(A) *In general*. If a taxpayer makes a payment or transfers property to or for the use of an entity described in section 170(c), and the taxpayer receives or expects to receive state or local tax deductions that do not exceed the amount of the taxpayer's payment or the fair market value of the property transferred by the taxpayer to the entity, the taxpayer is not required to reduce its charitable contribution deduction under section 170(a) on account of the state or local tax deductions.

(B) *Excess state or local tax deductions*. If the taxpayer receives or expects to receive a state or local tax deduction that exceeds the amount of the taxpayer's payment or the fair market value of the property transferred, the taxpayer's charitable contribution deduction under section 170(a) is reduced.

(iii) *In consideration for*. For purposes of paragraph (h) of this section, the term in consideration for has the meaning set forth in paragraph (h)(4)(i) of this section.

(iv) *Amount of reduction*. For purposes of paragraph (h)(3)(i) of this section, the amount of any state or local tax credit is the maximum credit allowable that corresponds to the amount of the taxpayer's payment or transfer to the entity described in section 170(c).

(v) *State or local tax*. For purposes of paragraph (h)(3) of this section, the term state or local tax means a tax imposed by a State, a possession of the United States, or by a political subdivision of any of the foregoing, or by the District of Columbia.

(vi) *Exception*. Paragraph (h)(3)(i) of this section shall not apply to any payment or transfer of property if the total amount of the state and local tax credits received or expected to be received by the taxpayer is 15 percent or less of the taxpayer's payment, or 15 percent or less of the fair market value of the property transferred by the taxpayer.

(vii) *Examples*. The following examples illustrate the provisions of this paragraph (h)(3). The examples in paragraph (h)(6) of this section are not illustrative for purposes of this paragraph (h)(3).

(A) *Example (1)*. A, an individual, makes a payment $1,000 to X, an entity described in section 170(c). In exchange for the payment, A receives or expects to receive a state tax credit of 70 percent of the amount of A's payment to X. Under paragraph (h)(3)(i) of this section, A's charitable contribution deduction is reduced by $700 (0.70 x $1,000). This reduction occurs regardless of whether A is able to claim the state tax credit in that year. Thus, A's charitable contribution deduction for the $1,000 payment to X may not exceed $300.

(B) *Example (2)*. B, an individual, transfers a painting to Y, an entity described in section 170(c). At the time of the transfer, the painting has a fair market value of $100,000. In exchange for the painting, B receives or expects to receive a state tax credit equal to 10 percent of the fair market value of the painting. Under paragraph (h)(3)(vi) of this section, B is not required to apply the general rule of paragraph (h)(3)(i) of this section because the amount of the tax credit received or expected to be received by B does not exceed 15 percent of the fair market value of the property transferred to Y. Accordingly, the amount of B's charitable contribution deduction for the transfer of the painting is not reduced under paragraph (h)(3)(i) of this section.

(C) *Example (3)*. C, an individual, makes a payment of $1,000 to Z, an entity described in section 170(c). In exchange for the payment, under state M law, C is entitled to receive a state tax deduction equal to the amount paid by C to Z. Under paragraph (h)(3)(ii)(A) of this section, C's charitable contribution deduction under section 170(a) is not required to be reduced on account of C's state tax deduction for C's payment to Z.

(viii) *Safe harbor for payments by C corporations and specified passthrough entities*. For payments by a C corporation or by a specified passthrough entity to an entity described in section 170(c), where the C corporation or specified passthrough entity receives or expects to receive a State or local tax credit that reduces the charitable contribution deduction for such payments under paragraph (h)(3) of this section, see § 1.162-15(a)(3) (providing safe harbors under section 162(a) to the extent of that reduction).

(ix) *Safe harbor for individuals*. Under certain circumstances, an individual who itemizes deductions and makes a payment to an entity described in section 170(c) in consideration for a State or local tax credit may treat the portion of such payment for which a charitable contribution deduction is disallowed under paragraph (h)(3) of this section as a payment of State or local taxes under section 164. See § 1.164-3(j), providing a safe harbor for certain payments by individuals in exchange for State or local tax credits.

(x) *Effective/applicability date*. This paragraph (h)(3) applies to amounts paid or property transferred by a taxpayer after August 27, 2018.

(4) *Definitions*. For purposes of this paragraph (h), the following definitions apply:

(i) *In consideration for*. A taxpayer receives goods or services in consideration for a taxpayer's payment or transfer to an entity described in section 170(c) if, at the time the taxpayer makes the payment to such entity, the taxpayer receives or expects to receive goods or services from that entity or any other party in return.

(ii) *Goods or services*. Goods or services means cash, property, services, benefits, and privileges.

(iii) *Applicability date*. The definitions provided in this paragraph (h)(4) are applicable to amounts paid or property transferred on or after December 17, 2019.

Braen v. Commissioner, T.C. Memo. 2023-85, reasoned and held:

1. Governing Standards

"Contributions of property `generally cannot constitute a charitable contribution if the contributor expects a substantial benefit in return.'" *Seventeen Seventy*, T.C. Memo. 2014-124, at *19 (quoting *United States v. Am. Bar Endowment*, 477 U.S. 105, 116 (1986)); see also *Emanouil v. Commissioner*, T.C. Memo. 2020-120, at *45. According to the Supreme Court, the "relevant inquiry" focuses on "whether the transaction...is structured as a quid pro quo exchange." *Hernandez v. Commissioner*, 490 U.S. 680, 701-02 (1989). We do not inquire into the taxpayer's subjective motives, instead giving weight to "the external features of the transaction." *Costello v. Commissioner*, T.C. Memo. 2015-87, at *26–27. "If it is understood that the property will not pass to the charitable recipient unless the taxpayer receives a specific benefit, and if the taxpayer cannot garner that benefit unless he makes the required `contribution,' the transfer does not qualify the taxpayer for a deduction under section 170." *Id*. at *27.

"The relevant question is whether the taxpayer expected a benefit in return for the payment; deductibility does not depend on what type of benefit the taxpayer received." *Triumph*, T.C. Memo. 2018-65, at *31 (quoting *Christiansen v. Commissioner*, 843 F.2d 418, 420 (10th Cir. 1988)); see also *Seventeen Seventy*, T.C. Memo. 2014-124, at *23-24 ("Medical, educational, scientific, religious, or other benefits can be consideration that vitiates charitable intent."). The benefit does not need to be financial, and we "have found that a transfer of real property in exchange for development approvals...is a benefit and precludes a finding of the requisite donative intent." *Triumph*, T.C. Memo. 2018-65, at *32; see also *Grinslade v. Commissioner*, 59 T.C. 566, 574-76 (1973); *Pollard v. Commissioner*, T.C. Memo. 2013-38; *Ackerman Buick, Inc. v. Commissioner*, T.C. Memo. 1973-224, 1973 Tax Ct. Memo LEXIS 64, at *9 ("Receipt of a desired zoning variance from a city which would or might not be available without making a dedication of land to the city has been held to be a direct economic benefit which would preclude a charitable deduction.").

"[A] taxpayer may still deduct a contribution of property if(1) the value of the property transferred...exceeds the fair market value of any goods or services received in exchange and (2) the excess payment is made `with the intention of making a gift.'" *Triumph*, T.C. Memo. 2018-65, at *29 (quoting *Am. Bar Endowment*, 477 U.S. at 117); *Seventeen Seventy*, T.C. Memo. 2014-124, at *19; Treas. Reg. § 1.170A-1(h)(1). In that instance, taxpayers may deduct the difference between the fair market value of the contributed property and that of the goods or services provided by the charitable organization. *Boone Operations Co. v. Commissioner*, T.C. Memo. 2013-101, at *15. Where a taxpayer, however, "fails to identify or value all of the consideration received in the transaction, the taxpayer is not entitled to any charitable contribution deduction." *Seventeen Seventy*, T.C. Memo. 2014-124, at *27; see also *Triumph*, T.C. Memo. 2018-65, at *35; *Boone*, T.C. Memo. 2013-101, at *48.

2. Value of Consideration Received

The Braens have not established the value of all consideration Holdings received as part of the purported bargain sale, and thus they are not entitled to the claimed charitable contribution deductions.

As an initial matter, the land purchase agreement and the settlement of the zoning litigation must be considered together as parts of an "inseparable package." See *Grinslade*, 59 T.C. at 574; see also *Boone*, T.C. Memo. 2013-101, at *23 ("When a taxpayer enters into a contractual arrangement with another party and claims that a bargain sale occurred, we consider the entire contractual arrangement in determining whether the taxpayer contributed money or property in excess of the value of the benefits received."). The land purchase agreement expressly notes that the zoning litigation "is being settled as part of the conveyance of the [p]roperty." It further specifies that the purchase was conditioned on "the entry by the Court of an Order which shall include the subdivision of the property in substantial conformity with the proposed order appended hereto." And the settlement agreement unambiguously references the land purchase agreement, which was included as an attachment.

We accordingly will examine both parts of the "integrated transaction." See *Derby v. Commissioner*, T.C. Memo. 2008-45, 2008 WL 540271, at *16. Holdings received two types of consideration: (1) $5,250,000 and (2) reversion of the zoning designation over the portion of the property Holdings retained "to its prior designation of [planned industrial]." See, e.g., *Grinslade*, 59 T.C. at 576 ("[T]he zoning variance was...an additional financial benefit anticipated by [the taxpayers] as a result of the conveyance...."); *Triumph*, T.C. Memo. 2018-65, at *35-40; *Seventeen Seventy*, T.C. Memo. 2014-124, at *31-33; *Ackerman*, 1973 Tax Ct. Memo LEXIS 64, at *17.

The Braens attempt to avoid this conclusion by arguing that Holdings was entitled to the zoning reversion as a matter of law and that the zoning litigation would have vindicated its entitlement. *Cf*. *Emanouil*, T.C. Memo. 2020-120, at *45 (explaining that "if the taxpayer cannot garner [a] benefit unless he makes the required `contribution', then the transfer does not qualify the taxpayer" for a section 170 deduction). The Braens rely on the opinion of Mr. Bazydlo, who represented Holdings during the zoning litigation, and their own analysis of New York law.

We decline to give weight to Mr. Bazydlo's opinions. Although we do not doubt his sincerity, Mr. Bazydlo is by-and-large offering legal opinions, which are the province of the Court. See In re Revel AC, Inc., 802 F.3d 558, 567 (3d Cir. 2015) ("[L]ikelihood of success...involves a purely legal determination."); *Cottillion v. United Refin. Co.*, 781 F.3d 47, 59 (3d Cir. 2015); *Alumax Inc. v. Commissioner*, 109 T.C. 133, 175 (1997), *aff'd*, 165 F.3d 822 (11th Cir. 1999). Further, Mr. Bazydlo represented Holdings in the zoning litigation (and in many other capacities in connection with the property), calling into question whether his opinion is that of an impartial expert or an advocate. See *Neonatology Assocs., P.A. v. Commissioner*, 115 T.C. 43, 86 (2000) ("An expert witness loses his or her impartiality when he or she is too closely connected with one of the parties."), *aff'd*, 299 F.3d 221 (3d Cir. 2002) ; *V.R. DeAngelis M.D.P.C. v. Commissioner*, T.C. Memo. 2007-360, 2007 WL 4257483, at *21–22, *aff'd*, 574 F.3d 789 (2d Cir. 2009).

In any event, the Braens' confidence in Holdings' ultimate success in the zoning litigation has no bearing on whether the rezoning achieved at settlement constituted a benefit. The record amply demonstrates that Holdings prized the planned industrial zoning designation for potential future development. After Ramapo's 2004 rezoning, Holdings was required to take action to secure its desired zoning. Holdings chose to obtain its end through the certain means of negotiated settlement rather than expend time and resources to continue along the unpredictable path of litigation. See *Perlmutter v. Commissioner*, 45 T.C. 311, 318 (1965) ("[Taxpayers] received a direct benefit because of the transfer. It appears from the evidence that even if the partnership might have ultimately prevailed in its efforts to get approval of its plans without making the transfers, it certainly avoided considerable and perhaps protracted difficulty in this regard by making the transfers in question.").

Although we are agnostic as to whether Holdings would have been able to prevail in litigation, we are certain that Holdings gained the significant benefit of a change to its then-governing zoning designation as part of the coordinated settlement and land purchase agreement. This benefit was required to be taken into account when analyzing any charitable contribution deduction.[9] Having failed to do so, the Braens are not entitled to the claimed charitable contribution deductions. See *Triumph*, T.C. Memo. 2018-65, at *35, *41–42; *Seventeen Seventy*, T.C. Memo. 2014-124, at *27–28; *Derby v. Commissioner*, 2008 WL 540271, at *19.

[9] The Braens argue that Ramapo's decision to settle the lawsuit indicates that it knew it would lose the zoning litigation. Any number of reasons might spur a party to settle a lawsuit, and we will not speculate as to motivations. See *Holmes v. Godinez*, 991 F.3d 775, 783 (7th Cir. 2021) ("Settlements are compromises in which the parties...sacrifice some goals to achieve others and to resolve a dispute without the expense of future litigation."); *RFF Fam. P'ship, LP v. Ross*, 814 F.3d 520, 530 (1st Cir. 2016) ("[A] settlement is born of compromise."); *Nault v. United States*, 517 F.3d 2, 6 (1st Cir. 2008) ("Parties to a settlement, almost by definition, eschew the possibility of obtaining some portion of what they would like in exchange for certain terms with which they can live.").

The court's holding that the deduction nonetheless would be barred because of a fatal defect in the contemporaneous written acknowledgment is reproduced in part II.J.4.c.ii.(a) Contemporaneous Written Acknowledgement (CWA).

II.G.4.g.iv. Value of Charitable Contribution

Reg. § 1.170A-1(c), "Value of a contribution in property," provides:

(1) If a charitable contribution is made in property other than money, the amount of the contribution is the fair market value of the property at the time of the contribution reduced as provided in section 170(e)(1) and paragraph (a) of § 1.170A-4, or section 170(e)(3) and paragraph (c) of § 1.170A-4A.

(2) The fair market value is the price at which the property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or sell and both having reasonable knowledge of relevant facts. If the contribution is made in property of a type which the taxpayer sells in the course of his business, the fair market value is the price which the taxpayer would have received if he had sold the contributed property in the usual market in which he customarily sells, at the time and place of the contribution and, in the case of a contribution of goods in quantity, in the quantity contributed. The usual market of a manufacturer or other producer consists of the wholesalers or other distributors to or through whom he customarily sells, but if he sells only at retail the usual market consists of his retail customers.

(3) If a donor makes a charitable contribution of property, such as stock in trade, at a time when he could not reasonably have been expected to realize its usual selling price, the value of the gift is not the usual selling price but is the amount for which the quantity of property contributed would have been sold by the donor at the time of the contribution.

(4) Any costs and expenses pertaining to the contributed property which were incurred in taxable years preceding the year of contribution and are properly reflected in the opening inventory for the year of contribution must be removed from inventory and are not a part of the cost of goods sold for purposes of determining gross income for the year of contribution. Any costs and expenses pertaining to the contributed property which are incurred in the year of contribution and would, under the method of accounting used, be properly reflected in the cost of goods sold for such year are to be treated as part of the cost of goods sold for such year. If costs and expenses incurred in producing or acquiring the contributed property are, under the method of accounting used, properly deducted under section 162 or other section of the Code, such costs and expenses will be allowed as deductions for the taxable year in which they are paid or incurred, whether or not such year is the year of the contribution. Any such costs and expenses which are treated as part of the cost of goods sold for the year of contribution, and any such costs and expenses which are properly deducted under section 162 or other section of the Code, are not to be treated under any section of the Code as resulting in any basis for the contributed property. Thus, for example, the contributed property has no basis for purposes of determining under section 170(e)(1)(A) and paragraph (a) of § 1.170A-4 the amount of gain which would have been recognized if such property had been sold by the donor at its fair market value at the time of its contribution. The amount of any charitable contribution for the taxable year is not to be reduced by the amount of any costs or expenses

pertaining to the contributed property which was properly deducted under section 162 or other section of the Code for any taxable year preceding the year of the contribution. This subparagraph applies only to property which was held by the taxpayer for sale in the course of a trade or business. The application of this subparagraph may be illustrated by the following examples:

Example (1). In 1970, A, an individual using the calendar year as the taxable year and the accrual method of accounting, contributed to a church property from inventory having a fair market value of $600. The closing inventory at the end of 1969 properly included $400 of costs attributable to the acquisition of such property, and in 1969 A properly deducted under section 162 $50 of administrative and other expenses attributable to such property. Under section 170(e)(1)(A) and paragraph (a) of § 1.170A-4, the amount of the charitable contribution allowed for 1970 is $400 ($600 − [$600 − $400]). Pursuant to this subparagraph, the cost of goods sold to be used in determining gross income for 1970 may not include the $400 which was included in opening inventory for that year.

Example (2). The facts are the same as in example (1) except that the contributed property was acquired in 1970 at a cost of $400. The $400 cost of the property is included in determining the cost of goods sold for 1970, and $50 is allowed as a deduction for that year under section 162. A is not allowed any deduction under section 170 for the contributed property, since under section 170(e)(1)(A) and paragraph (a) of § 1.170A-4 the amount of the charitable contribution is reduced to zero ($600 − [$600 − $0]).

Example (3). In 1970, B, an individual using the calendar year as the taxable year and the accrual method of accounting, contributed to a church property from inventory having a fair market value of $600. Under § 1.471-3(c), the closing inventory at the end of 1969 properly included $450 costs attributable to the production of such property, including $50 of administrative and other indirect expenses which, under his method of accounting, was properly added to inventory rather than deducted as a business expense. Under section 170(e)(1)(A) and paragraph (a) of § 1.170A-4, the amount of the charitable contribution allowed for 1970 is $450 ($600 − [$600 − $450]). Pursuant to this subparagraph, the cost of goods sold to be used in determining gross income for 1970 may not include the $450 which was included in opening inventory for that year.

Example (4). The facts are the same as in example (3) except that the contributed property was produced in 1970 at a cost of $450, including $50 of administrative and other indirect expenses. The $450 cost of the property is included in determining the cost of goods sold for 1970. B is not allowed any deduction under section 170 for the contributed property, since under section 170(e)(1)(A) and paragraph (a) of § 1.170A-4 the amount of the charitable contribution is reduced to zero ($600 − [$600 − $0]).

Example (5). In 1970, C, a farmer using the cash method of accounting and the calendar year as the taxable year, contributed to a church a quantity of grain which he had raised having a fair market value of $600. In 1969, C paid expenses of $450 in raising the property which he properly deducted for such year under section 162. Under section 170(e)(1)(A) and paragraph (a) of § 1.170A-4, the amount of the charitable contribution in 1970 is reduced to zero ($600 − [$600 − $0]). Accordingly, C is not allowed any deduction under section 170 for the contributed property.

Example (6). The facts are the same as in example (5) except that the $450 expenses incurred in raising the contributed property were paid in 1970. The result in the same as in example (5), except the amount of $450 is deductible under section 162 for 1970.

(5) For payments or transfers to an entity described in section 170(c) by a taxpayer carrying on a trade or business, see § 1.162-15(a).

As to Reg. § 1.162-15(a), see part II.G.4.g.i Charitable Deduction vs. Business Expense.

Braen v. Commissioner, T.C. Memo. 2023-85, discussed "Highest and Best Use":

> "A `critical aspect' in calculating fair market value is determining the `highest and best use' of the property" at issue. *PBBM-Rose Hill, Ltd. v. Commissioner*, 900 F.3d 193, 209 (5th Cir. 2018) (quoting *Whitehouse Hotel Ltd. P'ship v. Commissioner*, 615 F.3d 321, 335 (5th Cir. 2010), vacating 131 T.C. 112 (2008)). We look to "[t]he highest and most profitable use for which the property is adaptable and needed or likely to be needed in the reasonably near future." *Palmer Ranch Holdings Ltd. v. Commissioner*, 812 F.3d 982, 996 (11th Cir. 2016) (quoting *Symington v. Commissioner*, 87 T.C. 892, 897 (1986)), *aff'g in part*, *rev'g in part and remanding* T.C. Memo. 2014-79. We must consider "[a]ny realistically available special use of property due to its adaptability to a particular business," but the fair market value "is not affected by whether the owner actually has put the property to its highest and best use." *Stanley Works & Subs. v. Commissioner*, 87 T.C. 389, 400 (1986).
>
> "The highest and best use inquiry is one of objective probabilities," and the "`realistic, objective potential uses for property control' its valuation." *Esgar Corp. v. Commissioner*, 744 F.3d 648, 657 (10th Cir. 2014) (quoting *Symington*, 87 T.C. at 896), *aff'g* T.C. Memo. 2012-35, 2012 WL 371809, and *aff'g Temple v. Commissioner*, 136 T.C. 341 (2011). Importantly, "[a] suggested higher use other than current use `requires both "closeness in time" and "reasonable probability."'" *Id*. at 658 (quoting *Hilborn v. Commissioner*, 85 T.C. 677, 689 (1985)); see also *United States v. 269 Acres, More or Less, Located in Beaufort Cnty.*, 995 F.3d 152, 164 (4th Cir. 2021) ("[T]o base [value] on a use other than the current one, the landowner must produce evidence that the proffered use is "`reasonably probable" and that the probability has a real market value.'" (quoting *United States v. 69.1 Acres of Land, More or Less, Situated in Platt Springs Twp., Cnty. of Lexington*, 942 F.2d 290, 296 (4th Cir. 1991)).
>
> "Any proposed use[] that `depend[s] upon events or combinations of occurrences which, while within the realm of possibility, are not fairly shown to be reasonably probable,'" should not be considered a viable use. See *Esgar Corp. v. Commissioner*, 2012 WL 371809, at *7 (quoting *Olson v. United States*, 292 U.S. 246, 257 (1934)). Although the highest and best use can be a use prohibited by zoning laws as of the date of contribution, such a proposed use "cannot be remote, speculative, or conjectural." *Dynamo Holdings Ltd. P'ship v. Commissioner*, T.C. Memo. 2018-61, at *80.
>
> The parties' experts reach vastly different values based primarily on differing conclusions as to the highest and best use of the property sold to Ramapo. The Braens rely on two

experts: (1) Mr. Zdunczyk, who determined that the highest and best use of the sale parcel was a quarry and valued the mineral rights at $11,000,000, and (2) Mr. Fader, who provided four different potential valuations, including a value of $12,190,000 if quarrying were the highest and best use. The Commissioner relies on a report by Hilco Real Estate Appraisal (Hilco), which valued the sale parcel at $4,850,000 with a highest and best use of limited residential development.

As an initial matter, the record leaves us with the firm conviction that, as of September 29, 2010, no reasonable probability existed that Holdings would be able to procure within a reasonable time the approvals, zoning changes, and permits required for quarrying. Although we do not doubt Holdings' intentions when it purchased the property or the land's suitability for a quarry, the governmental obstacles proved too much. Any thought otherwise represents a mixture of hope and conjecture.

Specifically, Holdings failed to make significant progress with DEC in obtaining the required state mining permit. From the start, DEC identified significant environmental concerns that needed to be addressed before the issuance of a mining permit. Despite investing time, effort, and expense, Holdings did not obtain authorization of studies relating to two of the major issues, much less assuage DEC's underlying concerns. *Cf. Palmer Ranch Holdings Ltd. v. Commissioner*, 812 F.3d at 997 (finding reasonable probability that development would be approved where the decision-making agency issued an ordinance describing particular requirements for development applications).

Holdings was similarly unsuccessful with Ramapo, and there were no real prospects that the town would change its stance. Ramapo had a longstanding prohibition on quarrying when Holdings submitted its petition for a zoning amendment in 1997, which was consistent with the negative views of quarrying expressed during and after the 1998 scoping hearing. *Cf. Johnston v. Commissioner*, T.C. Memo. 1997-475, 1997 WL 643299, at *19.

Ramapo's views only hardened over time. Seven years after Holdings initially sought the zoning amendment that would remove quarrying from prohibited uses, Ramapo passed a comprehensive zoning law that changed the zoning of the Ramapo portion of the property to an "R-40" low-density rural residential district. In the Draft Comprehensive Plan, Ramapo stressed that "additional...industrial development...would have considerable potential to cause significant harm to these critical resources" and recommended the prohibition of "uses that have the greatest potential to cause environmental impact."

We have previously remarked that "we should not consider [a] potential use in valuing the property" "if a hypothetical buyer [at the time of the bargain sale] would not have reasonably considered a potential use of the property." *Boone*, T.C. Memo. 2013-101, at *27 (citing *Boltar, L.L.C. v. Commissioner*, 136 T.C. 326, 336 (2011)); *Glade Creek Partners, LLC v. Commissioner*, T.C. Memo. 2020-148, at *34, *aff'd in part, vacated in part and remanded*, No. 21-11251, 2022 WL 3582113 (11th Cir. Aug. 22, 2022). A hypothetical buyer here would be unlikely to view quarrying as possible in light of the inability of Holdings - an established mining company with a long history of success - to obtain the requisite government approvals despite a decade of effort.

The quarry here is exactly the sort of proposed use that, at best, depended "upon events or combinations of occurrences which, while within the realm of possibility, are not fairly shown to be reasonably probable." See *Esgar Corp. v. Commissioner*, 2012 WL 371809, at *7 (quoting Olson, 292 U.S. at 257). We see no reasonable probability that Holdings could obtain DEC's blessing of the mining permit or overcome Ramapo's entrenched opposition after eight years of stasis. Accordingly, quarrying was not the property's highest and best use.[14]

> [14] Given our conclusion that the highest and best use of the property was not quarrying, we will not further consider Mr. Zdunczyk's mineral appraisal. See *Glade Creek*, T.C. Memo. 2020-148, at *37 (noting that an expert's valuation "is of little relevance" where the expert adopted a different highest and best use from the Court's).

Excluding quarrying leaves residential development as the highest and best use of the property. Our conclusion on this point rests on the common opinion of the parties' experts, each of whom identified residential development as the property's highest and best use in the absence of quarrying.[15]

> [15] Although Mr. Fader's expert report also provides a valuation based on a highest and best use under the assumption that the Ramapo portion of the property would be zoned industrial, he affirmed both during cross and redirect examination that "it was [his] opinion that the highest and best use was as residential."

The court discussed using later sales as evidence:

> "[E]vidence of lot sales within a reasonable period after the date of valuation...tends to make a given estimate of the lot prices more or less likely...." *Trout Ranch, LLC v. Commissioner*, T.C. Memo. 2010-283, 2010 WL 5395108, at *12, *aff'd*, 493 F. App'x 944 (10th Cir. 2012). We wonder whether five years constitutes a reasonable period even granting the relatively stable market for vacant residential land described in Hilco's report, and we will accordingly give less weight to the 2016 sales.

II.G.4.h. Expenses Incurred by Owner-Officer

Under Code § 162(a), an S corporation shareholder could deduct losses arising from lawsuits against him personally relating to that person managing the business.[1267]

[1267] Letter Ruling 201548011, which discussed the origin of the claim doctrine and mentioned:

> Generally, amounts paid in settlement of lawsuits are currently deductible if the acts which gave rise to the litigation were performed in the ordinary conduct of the taxpayer's business. See, *e.g.*, *Federation Bank & Trust Co. v. Commissioner*, 27 T.C. 960, 973 (1957), *aff'd*, 256 F.2d 764 (2d Cir. 1958), *acq.*, 1969-2 C.B. xxiv (allowing petitioner to deduct amounts paid in settlement of legal proceedings charging petitioner with mismanagement in the liquidation of assets); *Butler v. Commissioner*, 17 T.C. 675, 679-81 (1951), *acq.*, 1952-1 C.B. 1 (settlement payment arising from shareholder suit for damages against principal officer for mismanagement of corporate affairs held deductible as an ordinary and necessary business expense directly connected to and proximately resulting from his business activity); Rev. Rul. 79-208, 1979-2 C.B. 79 (permitting taxpayer to deduct payments to settle lawsuit and obtain a release from breach of contract claims under a franchise agreement).
>
> Similarly, amounts paid for legal expenses in connection with litigation are allowed as business expenses where such litigation is directly connected to, or proximately results from, the conduct of a taxpayer's business. See, *e.g.*, *Howard v. Commissioner*, 22 B.T.A. 375, 378 (1931), *acq.*,

II.G.4.i. Passive Loss Limitations

See part II.K Passive Loss Rules for limitations on deductions and credits under the Code § 469 passive loss rules.

Although these limitations are significant, they are temporary, except when an individual dies or a trust terminates.[1268] More important than the timing of losses is the application of the passive loss rules in determining whether income is subject to the 3.8% tax on net investment income, which is why the detailed discussion is moved to the part describing that tax.[1269]

II.G.4.j. At Risk Rules (Including Some Related Discussion of Code § 752 Allocation of Liabilities)

Partners generally may deduct losses financed by bank loans to the partnership only to the extent permitted by the rules described in this part II.G.4.j.[1270]

An individual (as well as certain personal holding companies) may not deduct a loss to the extent not "at risk" with respect to the activity that generated the loss; any excess losses are suspended until they can be used.[1271]

When a taxpayer transfers all of a business interest in a substituted basis transaction, any associated at risk losses are added to the basis of the transferred property[1272] and part or all of

---

1945 C.B. 4 (holding that legal fees incurred by taxpayer to settle a shareholder's claim of misrepresentation in the conduct of business are deductible as business expenses); *D'Angelo v. Commissioner*, T.C. Memo. 2003-295 (petitioner entitled to a section 162 deduction for legal fees paid in defending suits alleging breach of fiduciary duty, mismanagement, and breach of contract in his capacity as an officer, partner, and shareholder of entities in which he had an ownership interest).

In Rev. Rul. 80-211, 1980-2 C.B. 57, the taxpayer was sued civilly for breach of contract and fraud relating to the ordinary conduct of its trade or business. A judgment was rendered that included punitive damages. The ruling allowed the taxpayer to deduct amounts paid as punitive damages under section 162(a) as an ordinary and necessary business expense because the acts that gave rise to the civil suit were performed in the ordinary course of the taxpayer's business.

Proceeds from a settlement or court award are taxed according to the nature of the relevant claims. *Blum v. Commissioner*, T.C. Memo. 2021-18; *Holliday v. Commissioner*, T.C. Memo. 2021-69 (taxpayer failed to prove settlement was for nontaxable claims); *Tressler v. Commissioner*, T.C. Summary Op. 2021-33 (nontaxable to the extent reimbursed for past expenses not deducted).

[1268] See part II.K.2.d Effect of Death of an Individual or Termination of Trust .

[1269] See part II.I.8 Application of 3.8% Tax to Business Income.

[1270] See Code § 465(b)(6), treating certain nonrecourse real estate loans as at-risk to partner. Also, compare Prop. Reg. § 1.465-24(a)(2) (which would treat partners as at-risk for loan guarantees) with Prop. Reg. § 1.465-24(a)(3) (contrary rule for S corporations). If a grantor trust borrows on a recourse basis but the lender's only recourse is against the trust's assets, its grantor is "at risk" for purposes of Code § 465(b) only to the extent of the trust's assets. Rev. Rul. 78-175.

[1271] Code § 465.

[1272] Prop. Reg. § 1.465-67, "Transfers and dispositions; pass through of losses suspended under section 465(a)," provides:

(a) *Applicability*. This section shall apply to any transfer or disposition in which -
   (1) The taxpayer transfers or disposes of such taxpayer's entire interest in the activity or the entity conducting the activity,
   (2) The basis of the transferee is determined in whole or in part by reference to the basis of the transferor; and

any at risk amount in excess of losses is added to the transferee's amount at risk.[1273] It has been suggested that, if less than the entire interest is transferred, it might be appropriate to allocate at risk amounts in proportion to what is transferred.[1274] For more discussion, see 550-4th T.M., At-Risk Rules, Detailed Analysis, VIII. Effect of Transfer/Disposition of Activity on Amount at Risk, C. Effect on Transferee with Carryover Basis. For the effect of a disposition on losses that were allowed under the at-risk rules but suspended under the Code § 469 passive loss rules, see part II.K.1.j Complete Disposition of Passive Activity.

AM 2014-003 addressed LLC Member guarantees of LLC debt and "qualified nonrecourse financing," taking the following positions:[1275]

- When a member of an LLC classified as a partnership or disregarded entity for federal tax purposes guarantees the LLC's debt, the member is at risk with respect to the amount of the guaranteed debt, without regard to whether such member waives any right to subrogation, reimbursement, or indemnification from the LLC, but only to the extent that the member has no right of contribution or reimbursement from persons other than the LLC, the member is not otherwise protected against loss within the meaning of

---

(3) The transferor has suspended losses under section 465(a) at the time of the transfer or disposition.

For the treatment of any gain recognized by the transferor, see § 1.465-66.

(b) *Pass through of suspended losses*. If at the close of the taxable year in which the transfer or disposition occurs, the amount of the transferor's section 465(d) loss from the activity is in excess of the transferor's amount at risk in the activity, such excess shall be added to the transferor's basis in the activity. The preceding sentence is to be applied after the determination of any gain to the transferor and is to be used solely for the purpose of determining the basis of the property in the hands of the transferee.

[1273] Prop. Reg. § 1.465-68.

[1274] Willis, *Postlewaite & Alexander: Partnership Taxation*, ¶ 7.07. At Risk Aspects of Transfer of Partnership Interest Where Basis Carries Over and at Death of Partner, suggests possibly looking to Rev. Rul. 84-53. See part II.Q.8.e.ii.(a) Unitary Basis, citing Rev. Rul. 84-53. Also relevant in that treatise is ¶ 7.06 Adjustment to Basis of Partnership Interest for Loss Disallowed by Section 465; Tax Consequences of a Sale of That Interest.

[1275] AM 2014-003, authored by Curt G. Wilson, Associate Chief Counsel (Passthroughs & Special Industries) and sent to Division Counsel (Large Business & International) to the attention of a Senior Level Counsel (Domestic). In addition to the comments made below, the memo commented:

> This memorandum does not address the effect of a member guarantee of qualified nonrecourse financing in the context of a single member LLC taxed as a disregarded entity for federal tax purposes, because the member's at-risk amount generally will not be affected by the guarantee. As the sole owner of an LLC with qualified nonrecourse financing, the single member is at risk prior to guaranteeing the debt because the debt is qualified nonrecourse financing. After guaranteeing the debt, the debt no longer meets the definition of qualified nonrecourse financing, but as the guarantor, the single member is still at risk to the extent of the amount guaranteed and to the extent the single member is not otherwise protected against loss.

In addition to being concerned about using a disregarded entity LLC to avoid the at-risk rules, the IRS is also leery of using a QSST to avoid the at-risk rules. A QSST is a trust owning stock in an S corporation, which trust is taxed as a grantor trust deemed owned by the beneficiary; see part III.A.3.e.i QSSTs. CCA 201327009 allows the beneficiary to deduct the interest when the QSST buys from a third party using a promissory note; see part III.A.3.e.vi QSST as a Grantor Trust; Sales to QSSTs. The IRS declined to rule on the loan's effect under the at-risk rules out of concern that taxpayers would set up a Code § 465(c)(4) device to limit liability. For how that interest is classified, see text accompanying fn 456 in part II.C.3.d Deducting Interest Expense on Debt Incurred by a Partnership.

Code § 465(b)(4), and the guarantee is bona fide and enforceable by creditors of the LLC under local law.[1276]

- When a member of an LLC classified as a partnership for federal tax purposes guarantees qualified nonrecourse financing of the LLC, the member's amount at risk is increased by the amount guaranteed, but only to the extent such debt was not previously taken into account by that member, the guaranteeing member has no right of contribution or reimbursement from persons other than the LLC, the guaranteeing member is not otherwise protected against loss within the meaning of Code § 465(b)(4), and the guarantee is bona fide and enforceable by creditors of the LLC under local law.

- When a member of an LLC guarantees qualified nonrecourse financing of the LLC, the amount of the guaranteed debt no longer meets the definition of "qualified nonrecourse financing" under Code § 465(b)(6)(B) if the guarantee is bona fide and enforceable by creditors of the LLC under local law, and the amount of the guaranteed debt will no

---

[1276] Reasoning:

> In the case of an LLC, all members have limited liability with respect to LLC debt. In the absence of any co-guarantors or other similar arrangement, an LLC member who guarantees LLC debt becomes personally liable for the guaranteed debt and is in a position akin to the general partners in the example in Prop. [Reg.] § 1.465-24(a)(2)(ii) who had personally assumed the partnership's debt and who had no right of reimbursement for their $12,500 share. If called upon to pay under the guarantee, the guaranteeing member may seek recourse only against the LLC's assets, if any. As in the case of a general partner, a right to subrogation, reimbursement, or indemnification from the LLC (and only the LLC) does not protect the guaranteeing LLC member against loss within the meaning of § 465(b)(4).

Moreno v. U.S., 113 A.F.T.R.2d 2014-2149 (D. La. 5/19/2014), agreed with this principle and rebuffed government arguments looking to the individual guarantor's net worth or the practical matter of how the guaranty would be satisfied, instead counting only a legal right to contribution as reducing the amount at risk. *Moreno* said:

> With respect to rights of contribution and reimbursement, where a member of a limited liability company guarantees a liability of the limited liability company, he or she is at risk, except to the extent he or she has a right of contribution or reimbursement from the other guarantors. See e.g. IRS Field Service Advisory 2000-25-018 (June 23, 2000), 2000 WL 33116072 (each member of a limited liability company "who has guaranteed a liability of the limited liability company is at-risk, except to the extent the member has a right of reimbursement against the remaining members"); IRS Chief Counsel Advisory 20130828 (February 22, 2013), 2013 WL 653295 ("an LLC member is at risk with respect to LLC debt guaranteed by the member (where the LLC is treated as either a partnership or a disregarded entity for federal tax purposes), but only to the extent that the member has no right of contribution or reimbursement from the other guarantors..."; taxpayer is not at risk "for those amounts" for which he has a right of contribution against co-sureties); Susan Kalinka, *Limited Liability Companies and Partnerships: A Guide to Business and Tax Planning*, 9A LACIVL § 6.7 (3d ed.) (2012) (a member of an LLC who guarantees an obligation of the LLC will assume personal liability for the LLC's obligation, and that member should be entitled to include in his or her at risk amount the portion of the guaranteed liability for which the member may not seek reimbursement); S. Rep. 94-938, 49, 1976 U.S.C.C.A.N. 3438, 3485 ("a taxpayer's capital is not "at risk" in the business ... to the extent he is protected against economic loss of all or part of such capital by reason of an ... arrangement for compensation or reimbursement to him of any loss which he may suffer"). Here, all parties acknowledge that if either Dynamic or Moreno were to pay Aerodynamic's obligation, the paying entity would have right of contribution against the other for half the amount it paid, pursuant to La. Civ. Code arts. 3055 and 3056. Under such circumstances, the IRS has determined a guarantor is at risk for fifty percent of the amount guaranteed.

> longer be includible in the at-risk amount of the other non-guarantor members of the LLC.[1277]

The IRS has addressed whether a guarantor of debt of an LLC treated as either a partnership or a disregarded entity for federal tax purposes be "at risk" with respect to the guaranteed debt if the guarantor does not completely waive his rights of subrogation and reimbursement from the

---

[1277] Reasoning:

> As a general rule, LLC members may not include liabilities of the LLC in their at-risk amounts unless the members are personally liable for the debt as provided by § 465(b)(2)(A). Further, under § 465(b)(4), taxpayers are not at risk with respect to amounts protected against loss through nonrecourse financing. Section 465(b)(6)(A) creates an exception to these rules when a nonrecourse liability meets the definition of qualified nonrecourse financing. Under § 465(b)(6)(B)(iii), a liability is qualified nonrecourse financing only if no person is personally liable for repayment. When a member of an LLC treated as a partnership for federal tax purposes guarantees LLC qualified nonrecourse financing, the member becomes personally liable for that debt because the lender may seek to recover that amount of the debt from the personal assets of the guarantor. Because the guarantor is personally liable for that debt, that debt is no longer qualified nonrecourse financing as defined in § 465(b)(6)(B) and § 1.465-27(b)(1). Further, because the creditor may proceed against the property of the LLC securing the debt, or against any other property of the guarantor member, that debt also fails to satisfy the requirement in § 1.465-27(b)(2)(i) that qualified nonrecourse financing must be secured only by real property used in the activity of holding real property.
>
> Because that debt is no longer qualified nonrecourse financing, the nonguaranteeing members of the LLC who previously included that portion of the qualified nonrecourse financing in their amount at risk and who have not guaranteed any portion of that debt may no longer include that amount of the debt in determining their amount at risk. Any reduction that causes an LLC member's at-risk amount to fall below zero will trigger recapture of losses under § 465(e). The at-risk amount of the LLC member that guarantees LLC debt is increased, but only to the extent such debt was not previously taken into account by that member, the guaranteeing member has no right of contribution or reimbursement from persons other than the LLC, the guaranteeing member is not otherwise protected against loss within the meaning of § 465(b)(4) with respect to the guaranteed amounts, and the guarantee is bona fide and enforceable by creditors of the LLC under local law.
>
> The Field Office noted that non-guaranteeing LLC members may assert that a guarantee of qualified nonrecourse financing by another LLC member does not increase the guarantor's amount at risk and, therefore, should not reduce the at-risk amount of the non-guaranteeing members with respect to that financing. As discussed above, we do not adopt that reading of Prop. [Reg.] § 1.465-6(d). Even if it did apply in this situation, it would not aid the non-guaranteeing members because the financing would still cease to be qualified nonrecourse financing under Section 465(b)(6)(B). Section 465(b)(6)(B)(iii) defines qualified nonrecourse financing as financing for which no person is personally liable. Because a guarantor becomes personally liable for the amount guaranteed, any liability previously treated as qualified nonrecourse financing no longer meets the definition of qualified nonrecourse financing once it is guaranteed (whether or not the guarantor is at risk). As a result, the non-guaranteeing members may no longer avail themselves of the exception in § 465(b)(6)(A) to include any portion of the guaranteed liability in their at-risk amounts regardless of the impact of the guarantee on the guarantor's amount at risk. Whether Prop. [Reg.] § 1.465-6(d) applies to a guarantor of LLC debt is an inquiry that does not affect the analysis of whether a guaranteed liability constitutes qualified nonrecourse financing.

LLC with respect to that guaranteed debt. The IRS applied the following requirements (assuming certain exceptions[1278] do not already apply):[1279]

- The taxpayer must be personally liable for the debt,[1280] and

- The taxpayer is not otherwise protected from loss through nonrecourse financing, guarantees, stop loss agreements, or other similar arrangements.[1281]

The IRS took the position that the mere fact that a taxpayer may be entitled to subrogation, reimbursement, or indemnification from an LLC (and only the LLC) under local law when payment is made on the guarantee does not mean that the taxpayer is "protected against loss." The IRS also stated that, to the extent that co-guarantors protect the taxpayer from loss under the economic realities existing at the end of a taxable year, to the taxpayer is not at risk for that year.

CCA 201606027[1282] addressed LLC Member guarantees of LLC debt and "qualified nonrecourse financing," taking the following positions regarding certain provisions that can trigger personal liability made the loans recourse (sometimes referred to as "bad boy guarantees"):

[1278] Code § 465(b)(2)(B).

[1279] CCA 201308028. The IRS noted:

> It should be noted that the conclusions contained within this advice may be viewed as contrary to Prop. Treas. Reg. § 1.465-6(d) (1979), which provides that if a taxpayer guarantees repayment of an amount borrowed by another person (primary obligor) for use in an activity, the guaranty shall not increase the taxpayer's amount at risk. Prop. Reg. § 1.465-6(d) further provides that if the taxpayer repays to the creditor the amount borrowed by the primary obligor, the taxpayer's amount at risk shall be increased at such time as the taxpayer has no remaining legal rights against the primary obligor. However, Prop. Reg. § 1.465-6(d) was promulgated before the development of LLCs under various state laws, and at a time when entities treated as partnerships for federal tax purposes were usually state law general partnerships and limited partnerships.
>
> ….[W]e conclude that an LLC member is at risk with respect to LLC debt guaranteed by the member (where the LLC is treated as either a partnership or a disregarded entity for federal tax purposes), but only to the extent that the member has no right of contribution or reimbursement from other guarantors and is not otherwise protected against loss within the meaning of § 465(b)(4) with respect to the guaranteed amounts. Therefore, we conclude that Prop. Reg. § 1.465-6(d) is generally not applicable to situations involving bona fide guarantees of LLC debt by one or more members of the LLC that is enforceable by creditors of the LLC under local law, where the LLC is treated as either a partnership or a disregarded entity for federal tax purposes.

[1280] Based on whether the taxpayer is ultimately liable for repayment as the payor of last resort in the worst case scenario.

[1281] The IRS said that the majority view bases its determination on the "economic realities" present at the end of the taxable year and that the minority viewed bases its determination on whether the taxpayer is payor of last resort in a worst case scenario. The IRS concluded that the majority view is correct. If a taxpayer is insulated from loss with respect to a borrowed amount, based upon the facts and circumstances existing at the end of the taxable year, then the taxpayer is not at risk. However, if at some future time the taxpayer demonstrates that the taxpayer cannot recover under the loss limitation arrangement, the taxpayer will become at risk at that time.

[1282] Authored by James A. Quinn, Senior Counsel, Branch 3, Office of Associate Chief Counsel, (Passthroughs & Special Industries), to William D. Richard, Attorney (Seattle, Group 1) (Small Business/Self-Employed), October 23, 2015.

1. If a partner guarantees an obligation of the partnership and the guarantee is sufficient to cause the guaranteeing partner to bear the economic risk of loss for that obligation within the meaning of § 1.752-2(b)(1) of the Income Tax Regulations, the guaranteed debt is properly treated as recourse financing for purposes of applying the basis allocation rules of § 752. For this purpose, certain contingencies such as the partnership admitting in writing that it is insolvent or unable to pay its debts when due, its voluntary bankruptcy, or its acquiescence in an involuntary bankruptcy, after taking into account all the facts and circumstances, are not so remote a possibility that it is unlikely the obligation will ever be discharged within the meaning § 1.752-2(b)(4) that would cause the obligation to be disregarded under § 1.752-2(b)(3).[1283]

2. Where the partnership's sole business activity includes acquiring existing hotels, renovating them, installing personal property appropriate to improve the properties' utility as hotels, and holding and maintaining the premises, but does not include the hotels' day-to-day operations, the partnership is engaged in an "activity of holding real property" within the meaning of § 465(b)(6)(A).

3. When an individual partner guarantees a partnership obligation, the amount of the guaranteed debt no longer meets the definition of "qualified nonrecourse financing" under § 465(b)(6)(B), and the amount of the guaranteed debt will no longer be includible in the at-risk amount of the other non-guaranteeing partners, if the

---

[1283] In support of this conclusion, the CCA reasoned:

> As a threshold matter, a bona fide guarantee that is enforceable by the lender under local law generally will be sufficient to cause the guaranteeing partner to be treated as bearing the economic risk of loss for the guaranteed partnership liability for purposes of § 1.752-2(a). For purposes of § 1.752-2, we believe it is reasonable to assume that a third-party lender will take all permissible affirmative steps to enforce its rights under a guarantee if the primary obligor defaults or threatens to default on its obligations. In this case, we view the "conditions" listed in section 1(b) of the First Guarantee as circumstances under which the lender may enforce the guarantee to collect the entire outstanding balance on the loan, beyond an actual default by X on its obligations. As such, we do not believe these "conditions" are properly viewed as conditions precedent that must occur before Y is entitled to seek repayment from C under the guarantee.[2] In addition, we believe it is reasonable to assume that one or more of these conditions, more likely than not, would be met upon a constructive liquidation of X under § 1.752-2(b)(1). Accordingly, we believe that these "conditions" do not fall within the definition of "contingencies" as intended by § 1.752-2(b)(4).
>
> > [2] According to the submission, it appears the taxpayer may assert that the various events listed in section 1(b) of the First Guarantee, upon the occurrence of which the First Guarantee will become immediately due and payable for the entire outstanding balance of the loan, are the only events under which the First Guarantee will become due and payable. It appears to us that a failure of X to repay the loan, by itself, likely would be sufficient to trigger the First Guarantee, as evidenced by the first sentence of section 1 of the First Guarantee. Assuming, arguendo, that the taxpayer's assertion is correct, we nevertheless believe that the likelihood that X or any other co-borrower will ever meet any one of these conditions, in the aggregate, is not so remote a possibility that would cause the obligation to be considered "likely to never be discharged" within the meaning of § 1.752-2(b)(4).
>
> For these reasons, we conclude that, for the purposes of §§ 704(d) and 752, and § 1.752-2(a), the promissory notes described above are recourse partnership liabilities allocable to the guaranteeing partner (C), and not to either A or B.

For regulations under Code § 752 that were changed in October 2016 and later, see part II.C.3 Allocating Liabilities (Including Debt).

guarantee is bona fide and enforceable by creditors of the partnership under local law.[1284]

[1284] After quoting from the statute and Reg. § 1.465-27(b), the CCA explained the at-risk rules as follows:

Generally, a limited partner, in a limited partnership organized under state law, who guarantees partnership debt is not at risk with respect to the guaranteed debt, because the limited partner has a right to seek reimbursement from the partnership and the general partner for any amounts that the limited partner is called upon to pay under the guarantee. The limited partner is "protected against loss" within the meaning of § 465(b)(4) unless or until the limited partner has no remaining rights against the partnership or general partner for reimbursement of any amounts paid by the limited partner. To the extent that a general partner does not have a right of contribution or reimbursement under local law against any other partner for the debts of the partnership, the general partner is at risk for such debts under § 465(b)(2). The general partner's right to subrogation, reimbursement, or indemnification from the partnership's assets (and only the partnership's assets) does not protect the general partner against loss within the meaning of § 465(b)(4).

In the case of an LLC, all members have limited liability with respect to LLC debt. In the absence of any co-guarantors or other similar arrangement, an LLC member who guarantees LLC debt becomes personally liable for the guaranteed debt and more closely resembles a general partner with respect to the guaranteed debt. If called upon to pay under the guarantee, the guaranteeing member may seek recourse only against the LLC's assets, if any. As in the case of a general partner, a right to subrogation, reimbursement, or indemnification from the LLC (and only the LLC) does not protect the guaranteeing LLC member against loss within the meaning of § 465(b)(4). Therefore, in the case of an LLC treated as a partnership or disregarded entity for federal tax purposes, we conclude that an LLC member is at risk with respect to LLC debt guaranteed by such member, but only to the extent that:

(1) the guaranteeing member has no right of contribution or reimbursement from other guarantors,
(2) the guaranteeing member is not otherwise protected against loss within the meaning of § 465(b)(4) with respect to the guaranteed amounts, and
(3) the guarantee is bona fide and enforceable by creditors of the LLC under local law.

As a general rule, LLC members may not include liabilities of the LLC in their at-risk amounts unless the members are personally liable for the debt as provided by § 465(b)(2)(A). Further, under § 465(b)(4), taxpayers are not at risk with respect to amounts protected against loss through nonrecourse financing. Section 465(b)(6)(A) creates an exception to these rules when a liability meets the definition of qualified nonrecourse financing. Under § 465(b)(6)(B)(iii), a liability is qualified nonrecourse financing only if no person is personally liable for repayment. When a member of an LLC treated as a partnership for federal tax purposes guarantees LLC qualified nonrecourse financing, the member becomes personally liable for that debt because the lender may seek to recover the amount of the debt from the personal assets of the guarantor. Because the guarantor is personally liable for the debt, the debt is no longer qualified nonrecourse financing as defined in § 465(b)(6)(B) and § 1.465-27(b)(1). Further, because the creditor may proceed against the property of the LLC securing the debt, or against any other property of the guarantor member, the debt also fails to satisfy the requirement in § 1.465-27(b)(2)(i) that qualified nonrecourse financing must be secured only by real property used in the activity of holding real property.

It should be noted that this conclusion generally will not be affected by a determination that the guarantee is a "contingent" liability within the meaning of § 1.752- 2(b)(4). Instead, the question is simply whether the guarantee is sufficient to cause the guarantor to be considered personally liable for repayment of the debt, based on all the facts and circumstances, within the meaning of § 465(b)(6)(B)(iii). In this case, we believe the First Guarantee is sufficient for this purpose.

When the debt is no longer qualified nonrecourse financing due to a guarantee of that debt, the non-guaranteeing members of the LLC who previously included a portion of the qualified

4. To the extent the guaranteeing partner has the right under the partnership operating agreement to call for the non-guaranteeing partners to make capital contributions and, if they fail to do so, treat ratable portions of the payment as loans to those partners, adjust their fractional interests in the partnership, or enter into a subsequent allocation agreement under which the risk of the guarantee would be shared among the partners, this right generally will not be sufficient to make the non-guaranteeing partners personally liable with respect to the guaranteed obligation for the purposes of §§ 752 and 465.[1285]

---

nonrecourse financing in their amount at risk and who have not guaranteed any portion of the debt may no longer include any amount of the debt in determining their amount at risk. Any reduction that causes an LLC member's at-risk amount to fall below zero will trigger recapture of losses under § 465(e). The at-risk amount of the LLC member that guarantees LLC debt is increased, but only to the extent such debt was not previously taken into account by that member, the guaranteeing member has no right of contribution or reimbursement from other guarantors, the guaranteeing member is not otherwise protected against loss within the meaning of § 465(b)(4) with respect to the guaranteed amounts, and the guarantee is bona fide and enforceable by creditors of the LLC under local law.

In this case, we conclude that, for the purposes of § 465(b)(6)(B)(iii) and § 1.465- 27(b)(1)(iii), the First Guarantee described above is sufficient to cause the guaranteeing partner, C, to be considered personally liable for the guaranteed debt obligations of X. Accordingly, the guaranteed debt obligations of X will no longer qualify as "Qualified Non-Recourse Financing" within the meaning of § 465(b)(6)(B) and § 1.465-27. A and B, as non-guaranteeing members of X, will not be considered at-risk with respect to any such amounts as a consequence of the First Guarantee.

[1285] The CCA first discussed some cases:

In *Pritchett v. Comm'r*, 85 T.C. 581 (1985), *rev'd and remanded*, 827 F.2d 644 (9th Cir. 1987), the taxpayers were limited partners in an oil and gas drilling operation, and they claimed deductions for losses in excess of their cash contributions to the partnership. The taxpayers argued that under the partnership agreement, they were "at risk" for partnership liabilities held by a drilling company that was responsible for developing the oil and gas fields. Under the contract the creditor would receive a portion of profits from the drilling operation. While general partners were the only parties personally liable, under the partnership agreement the general partners were given the right to call on the limited partners to make a capital contribution if the notes issued by the partnership remained unpaid upon their maturity date. The Service argued that the liability was contingent and that the taxpayers were only at risk once general partners called upon them to make a contribution. The Tax Court agreed with this analysis. Upon appeal, the Ninth Circuit held that the contractual obligations of the limited partners under the partnership agreement made them ultimately responsible for the debt. While the Commissioner argued that the liability was contingent simply because the general partners could elect to not make the cash calls, the Ninth Circuit did not agree. The Ninth Circuit determined that the cash calls were mandatory under the partnership agreements and that "economic reality" dictated that the general partners would make the calls.

In *Melvin v. Comm'r*, 88 T.C. 63 (1987), *aff'd*, 894 F.2d 1072 (9th Cir. 1990), the general partnership in which the taxpayer was a partner invested in a limited partnership. In payment for its limited partnership interest, the general partnership paid $35,000 cash and agreed to make additional capital contributions of $70,000. The obligation to make the additional capital contributions was evidenced by a $70,000 recourse promissory note. The taxpayer's share of the note was $50,000. The limited partnership obtained a $3,500,000 recourse loan from a bank and pledged partnership assets to the bank, including the $70,000 note along with other limited partner notes, as security. These notes were subsequently physically transferred to the bank. The court concluded that the taxpayer was at risk on the $3,500,000 loan to the extent of his pro rata share thereof. In reaching it conclusion the court reasoned that "a partner will be regarded as personally liable within the meaning of § 465(b)(2)(A) if he has the ultimate liability to repay the debt obligation of the partnership in the event funds from the partnership's assets are not available for that purpose. The relevant question is who, if anyone, will ultimately be obligated to pay the partnership's recourse obligations if the partnership is unable to do so. It is not relevant that the partnership MAY be able to do so. The scenario that controls is the worst-case scenario, not the best case." *Melvin*, 88 T.C. at 75 (citations omitted).

> We believe that *Pritchett* and *Melvin* stand for the proposition that the relevant inquiries when dealing with guarantees of partnership debt, for purposes of § 465, are whether the guarantee causes the guaranteeing partner to become the "payor of last resort in a worst case scenario" for the partnership debt, given the "economic realities" of the particular situation, and whether the guarantor possesses any "mandatory" rights to contribution, reimbursement, or subordination with respect to any other parties, as a result or consequence of paying on the guarantee, that would cause these other parties to be considered the "payors of last resort in a worst case scenario" with respect to that debt.

The CCA concluded:

> It appears that the taxpayer interprets X's Operating Agreement as giving an enforceable right to require A and B to make additional contributions to X, in addition to the specific remedies provided in paragraphs (i) and (ii) of section 7.5(e) of the Operating Agreement. As noted above, we do not agree with this interpretation of the Operating Agreement. Nevertheless, even if the taxpayer's interpretation of the Operating Agreement is ultimately determined to be correct, we still conclude that the taxpayer is not allocated basis under § 752 and is not at risk under § 465 with respect to the guaranteed debt.
>
> We reach this conclusion because we view the requirement for A and B to make additional capital contributions to X as a contingent liability within the meaning of § 1.752-2(b)(4). Because C may choose alternate remedies that would not cause A or B to be viewed as bearing the ultimate economic risk of loss for the guaranteed debt of X, we believe these alternate remedies are properly viewed as contingencies that make it unlikely that any payment obligations of A or B would ever be discharged. In addition, we believe these remedies may also be viewed as future events that cause the payment obligations of A and B to be "not determinable with reasonable certainty" and cause the obligations to be ignored until A and B are actually required to make payments to X, for purposes of § 1.752-2(b)(4).[3]
>
> > [3] We believe that one or more arguments may also be made under § 1.752-2(j) in this case, depending on further factual development.
>
> In addition, for purposes of § 465, even if we view C as having an enforceable right to require A and B to make additional contributions to X in addition to the other remedies available in section 7.5(e) of X's Operating Agreement, we believe that the facts of this case would continue to be distinguishable from those in *Pritchett*. In this case, C has been provided with alternate remedies under section 7.5(e) of X's Operating Agreement if A and B choose not to make additional contributions to X under this provision. As a result, it appears that the requirement for A and B to make additional contributions under this provision is not a "mandatory" requirement, since C may elect to use these alternate remedies rather than have X enforce the Operating Agreement under the default provision of section 7.7. Therefore, it does not appear that "economic reality" would dictate that X or C must enforce the Operating Agreement under section 7.7 in a court proceeding against A and B in such circumstances. Accordingly, we conclude that A and B are not "payors of last resort in a worst case scenario", as discussed in *Pritchett* and *Melvin*, and therefore A and B are not currently at risk with respect to the guaranteed debt of X for purposes of § 465.
>
> We would further note that, to the extent that C may elect to use the remedy described in section 7.5(e)(i) of X's Operating Agreement, in which C may treat the amount of a Guaranty Contribution that a defaulting member failed to contribute as a loan to the defaulting member, such "loan" would appear to be subject to the related-party rule of § 465(b)(3)(A). Under the remedy of section 7.5(e)(i), A and B would be viewed as borrowing money from C with respect to the activity of X, at a time when C also possesses an ownership interest in the activity.

The May 2016 meeting of the American Bar Association's Section on Taxation included the following unofficial comments by the IRS:[1286] The real estate tax community loudly protested CCA 201606027. The provisions that the CCA asserted turned the debt into recourse debt were typical provisions in nonrecourse arrangements. The CCA was mainly concerned with the seventh condition listed, triggered if the insolvency was admitted. Given that the lender required financial statements, the lender could force such an admission, making the loan essentially recourse. In fact, one state trial court had stated that the financial statements showing liabilities in excess of assets constituted such as admission. However, the appellate court pointed out that the lender's request for a formal admission of insolvency were repeatedly rejected, and the court reversed, saying that insolvency was never admitted and the financial statements did not constitute such an admission.[1287]

In light of that case, AM 2016-001[1288] addresses the treatment under Code §§ 752 (allocation of liabilities) and 465 (at-risk rules of guarantee) of a partnership nonrecourse liability when the guarantee is conditioned on certain "nonrecourse carve-out" events, backing away from CCA 201606027. It concluded:

1. If a partner's guarantee of a partnership's nonrecourse obligation is conditioned on the occurrence of certain "nonrecourse carve-out" events described below, the guarantee will not cause the obligation to fail to qualify as a nonrecourse liability of the partnership under section 752 and regulations promulgated thereunder until such time as one of those events actually occurs and causes the guarantor to become personally liable for the partnership debt under local law.[1289]

> Accordingly, A and B would not be considered at risk with respect to such amounts pursuant to § 465(b)(3)(A) under this scenario.
>
> Of course, if a payment obligation does arise in the future which requires A and B to make a payment to X, A and B would properly be viewed as making contributions to X at that time, for purposes of §§ 722, 704(d) and 465(b)(1)(A).
>
> In conclusion, because A and B do not have a mandatory obligation to make additional capital contributions to the [sic] X, regardless of which interpretation of X's Operating Agreement is ultimately determined to be correct, A and B do not bear the ultimate economic risk of loss for purposes of § 752, and A and B are not the payors of last resort in a worst case scenario for purposes of § 465.

For changes to regulations under Code § 752 in October 2016, see part II.C.3 Allocating Liabilities (Including Debt).

[1286] Recording ABATX1659.

[1287] *Zwirn*, fn. 1289.

[1288] From Curt G. Wilson, Associate Chief Counsel (Passthroughs and Special Industries) (written by William Kostak), to Division Counsel (Small Business/Self-Employed), attn: Samuel Berman, Special Counsel, March 31, 2016.

[1289] The memorandum reviewed Code § 752(a), Reg. §§ 1.752-1(a), 1.752-2(a), 1.752-2(b)(1), 1.752-2(b)(3) and 1.752-2(b)(4), and *D.B. Zwirn Special Opportunities Fund, L.P. v. SCC Acquisitions, Inc.*, 902 N.Y.S.2d 93, 95 (App. Div. 2010), the latter which it characterized as a lender unsuccessfully enforcing a guarantee to be triggered by a "nonrecourse carve-out" event. In October 2016 and later, the regulations under Code § 752 changed; see part II.C.3 Allocating Liabilities (Including Debt). In arriving at the conclusion to which this footnote is appended, the memorandum reasoned:

> We think that the approach to interpreting the "nonrecourse carve-out" event relating to written admissions of insolvency that the court followed in *D.B. Zwirn* is appropriate not just for that type of carve-out, but for other typical carve-outs as well. In the commercial real estate finance industry, "nonrecourse carve-out" provisions are not intended to allow the lender to require an

2. If a partner's guarantee of a partnership's nonrecourse obligation is conditioned on the occurrence of certain "nonrecourse carve-out" events described below, the guarantee will not cause the obligation to fail to qualify as qualified nonrecourse financing for purposes of section 465(b)(6) and the regulations promulgated thereunder until such time as one of those events actually occurs and causes the guarantor to become personally liable for the partnership debt under local law.[1290]

At the ABA meeting, practitioner pointed out that the conditions in the CCA were only 7 out of about 20-30 triggers commonly found in nonrecourse financing and asked for guidance. The government spokesman unofficially provided the following bottom line: If the contingency that triggers the personal liability is within the control of the borrower or person who would be liable, then the loan is nonrecourse. On the other hand, if the lender controlled the triggers, then the loan is recourse. Court cases imposing recourse liability where the lender could force a trigger's occurrence would affect the government's view of that trigger. He also mentioned that the IRS does not revoke CCAs, so the CCA stands for that taxpayer, but AM 2016-001 represents the government's current thoroughly vetted position on triggers and is unlikely to change absent such court cases.

CCA 201805013 applied Code § 465(c)(3)(B) regarding aggregation of business activities, asserting that aggregation did not apply.[1291]

> involuntary action by the borrower or guarantor, or to place borrowers or guarantors in circumstances that would require them to involuntarily commit a "bad act." Rather, the fundamental business purpose behind such carve-outs and the intent of the parties to such agreements is to prevent actions by the borrower or guarantor that could make recovery on the debt, or acquisition of the security underlying the debt upon default, more difficult. The "nonrecourse carve-out" provisions should be interpreted consistent with that purpose and intent in mind. Consequently, because it is not in the economic interest of the borrower or the guarantor to commit the bad acts described in the typical "nonrecourse carveout" provisions, it is unlikely that the contingency (the bad act) will occur and the contingent payment obligation should be disregarded under § 1.752-2(b)(4). Therefore, unless the facts and circumstances indicate otherwise, a typical "nonrecourse carve-out" provision that allows the borrower or the guarantor to avoid committing the enumerated bad act will not cause an otherwise nonrecourse liability to be treated as recourse for purposes of section 752 and § 1.752-2(a) until such time as the contingency actually occurs.

[1290] The memorandum reviewed Code §§ 465(c)(3), 465(b)(2)(A), 465(b)(4), and 465(b)(6) and Reg. §§ 1.465-27(b)(4), (5). In arriving at the conclusion to which this footnote is appended, the memorandum reasoned:

> Therefore, for the same reasons discussed above with respect to liability under section 752, we conclude that if a partner's guarantee of a partnership's nonrecourse obligation is conditioned on the "nonrecourse carve-out" events enumerated above, the guarantee does not cause the guarantor to be treated as personally liable for the repayment of the partnership's liability, because the likelihood of any of the "nonrecourse carve-out" events occurring is such that the guarantor is effectively protected against loss until such time as one or more of the events actually occurs. Accordingly, we conclude that such guarantee will not cause the nonrecourse financing to fail to qualify as qualified nonrecourse financing under section 465(b)(6) and the regulations thereunder if such financing otherwise meets those requirements.

[1291] RIA Checkpoint summary:

> Business activities conducted through partnership and 3 separate S corps. couldn't be aggregated and treated as single activity for purposes of Code Sec. 465's at-risk rules when considering that those entities operated independently from each other in that they lacked identical ownership; sold products from different manufacturers; maintained separate franchise

The Tax Court considers the "realistic possibility" that the guarantor would ultimately be subject to "economic loss" if the guaranty is called. *Bordelon v. Commissioner*, T.C. Memo. 2020-26 reasoned:[1292]

> Accordingly, when evaluating a guarantor's loss protections (including reimbursements from primary obligors), we look at the facts and circumstances to determine not only whether there is a right to the reimbursement but whether the substance of the right is meaningful. In other words, we must consider the "realistic possibility" that the guarantor would ultimately be subject to "economic loss" if called upon to make payments on account of the guarantee. See *Levien v. Commissioner*, 103 T.C. 120, 126 (1994), *aff'd without published opinion*, 77 F.3d. 497 (11th Cir. 1996); *Miller v. Commissioner*, T.C. Memo. 2006-125, 91 T.C.M. (CCH) 1267, 1276 (2006).
>
> We note that in these cases, the realistic-possibility analysis of protection against loss under section 465(b)(4) is not contrary to or divergent from the worst-case-scenario analysis we apply for purposes of determining personal liability under section 465(b)(2)(A).[10] Indeed, the tests may intuitively run together in a two-step at-risk analysis. For example, in facts involving an individual guaranteeing debts of his solely owned business, we would first apply the section 465(b)(2)(A) analysis presuming a worst-case scenario wherein the primary obligor defaults, becomes worthless, and is unable to make payments on the debt—thus triggering payments from the guarantor. See IRS Chief Counsel Advice 201308028 (Feb. 22, 2013).[11] Second, we would consider the realistic possibility of economic loss, in which case "it would be inappropriate … to then assume that the guaranteeing member will nevertheless be able to successfully seek subrogation, reimbursement, or indemnification from the primary obligor" who defaulted and became worthless in step 1. *Id.* Accordingly, we can apply both distinct analyses congruently in cases such as Mr. Bordelon's.
>
> > [10] Among the U.S. Courts of Appeals there has been a perceived split on the appropriate framework for analyzing section 465(b)(4) - *i.e.*, whether analyzing "realistic possibility", see, *e.g.*, *Waters v. Commissioner*, 978 F.2d 1310, 1316 (2d Cir. 1992), *aff'g* T.C. Memo. 1991-462; *Young v. Commissioner*, 926 F.2d 1083, 1089 (11th Cir. 1991), *aff'g* T.C. Memo. 1988-440 and T.C. Memo. 1988-525; *Moser v. Commissioner*, 914 F.2d 1040, 1048-1049 (8th Cir. 1990), *aff'g* T.C. Memo. 1989-142; *Am. Principals Leasing Corp. v. United States*, 904 F.2d 477, 483 (9th Cir. 1990), or else analyzing "obligor of last resort" under a "worst-case scenario", see, *e.g.*, *Emershaw v. Commissioner*, 949 F.2d 841, 845 (6th Cir. 1991), *aff'g* T.C. Memo. 1990-246. These cases would presumably be appealable to the Court of Appeals for the Fifth Circuit (absent a stipulation to the contrary, see sec. 7482(b)(1)(A), (2)), and we know of no opinion of that court addressing this issue. However, the split may not really be implicated in a situation like the one in these cases. Although we acknowledge that in factually complex cases, such as those involving multi-party sale-leaseback transactions or stop-loss agreements, choosing

---

agreements, financing arrangements, and books and records; operated in different regions; and shared employees only in limited circumstances. And, even if partnership could show that it actively participated in managing each S corp. for Code Sec. 465(c)(3)(B)(i) purposes, Code Sec. 465(c)(3)(B)(i) didn't allow for aggregation because partnership didn't conduct such activities directly, but rather through separate partnership or S corp.

[1292] *Bordelon* is further discussed in part II.C.3.c.ii.(a) Permanent Rules Allocating Economic Risk of Loss to Recourse Liabilities in the text accompanying fn 403.

between the tests might lead to different results, see, *e.g.*, *Thornock v. Commissioner*, 94 T.C. 439, 450 (1990), we found little distinction between the two frameworks in *Wag-A-Bag, Inc. v. Commissioner*, T.C. Memo. 1992-581, 64 T.C.M. (CCH) 948, 952 (1992), and held that either would lead to the same result in that case. In these cases we follow Wag-A-Bag and find that in the circumstances before us, both approaches would lead to the same result.

[11] A memorandum of "Chief Counsel advice" is not precedent, sec. 6110(b)(1)(A), (k)(3), and we do not cite it as such. We use it simply as an illustration of one means of applying these two tests in tandem. We do not consider the Commissioner bound by this analysis or this method.

We determined above in part I.B. that Mr. Bordelon was personally liable for purposes of section 465(b)(2)(A). In that analysis we presumed that the primary obligors (Many LLC and AHM) were worthless and unable to pay the amount owed under the Many Loan. If we maintain that presumption as to the primary obligors and turn to the question of whether there is a realistic possibility of reimbursement, it is clear that Mr. Bordelon would not be protected against loss for purposes of section 465(b)(4) because his right to reimbursement would be against the worthless entities with no means to repay him for any amounts contributed.[12]

[12] The Commissioner's position in this case suggests we ignore the presumption that AHM would be worthless and instead hold that Mr. Bordelon is not at risk because if he were required to make a payment as guarantor to the debt, then Louisiana law provided him with a right of reimbursement from AHM. However, ignoring the presumption that an obligor is worthless would be a divergence from our jurisprudence on the at-risk rules, and we are not persuaded that such divergence would be appropriate in these cases.

Mr. Bordelon executed a personal guarantee in 2008 for Many Loan. Under that guarantee, he became directly liable to Union Bank for the full amount of the debt if the obligors defaulted. There was no other guarantor on the debt, nor was there a definite or fixed right to any contribution from other members of Many LLC or from AHM on account of the debt. Indeed, Mr. Bordelon was the sole owner of these entities and the only person with unlimited liability for the Many Loan. Even if we disregard a worthlessness determination when considering Mr. Bordelon's realistic possibility of economic loss, we cannot disregard that in substance Mr. Bordelon was the only one involved with respect to the liability for the Many Loan, the corresponding promissory note, and the personal guarantee. Accordingly, we are persuaded that Mr. Bordelon was personally liable, not protected against loss, and ultimately at risk under the Many Loan during 2008 so as to be entitled to deduct the losses related to Many LLC that he claimed on the Bordelons' 2008 return.

As to the taxpayer's at risk amount in another LLC, *Bordelon v. Commissioner*, T.C. Memo. 2020-26 held:

As for Mr. Bordelon's amount at risk, the foregoing basis analysis enables us to reach easily the conclusion that his guarantee of the Kilgore Loan increased his amount at risk in Kilgore LLC for 2011. We assume that there might be a scenario in which a partner's basis could increase on account of a guarantee but in which the guarantee would not result in his being considered at risk under section 465, but this is not such a case.

> With respect to section 465(b)(2)(A), the personal guarantee in 2011 made Mr. Bordelon personally liable for the loan. He was directly liable to HFB for the underlying debt if a default occurred, and there was no right for a contribution or reimbursement from any other member of Kilgore LLC.
>
> With respect to section 465(b)(4), there was no loss protection for Mr. Bordelon on the amount guaranteed. There were no other guarantors, and no other member of Kilgore LLC was personally liable for any portion of the debt. Therefore, we find that Mr. Bordelon was at risk in 2011 for the Kilgore Loan.

II.G.4.k. Be Sure to Use Suspended Losses as Soon as They Become Available

Finally, if one's losses are suspended due to basis limitations, be sure to deduct them as soon as basis becomes sufficient. Failure to do so causes the losses to become unusable when the statute of limitations, for the year in which they should have been taken, has run.[1293]

However, that does not necessarily translate into a desire to accelerate losses. For more thoughts on this idea, see part II.K.3 NOL vs. Suspended Passive Loss - Being Passive Can Be Good.

II.G.4.l. Business Deductions and Losses

II.G.4.l.i. Trade or Business; Limitations on Deductions Attributable to Activities Not Engaged in for Profit

This part II.G.4.l.i discusses what is a "trade or business" under Code § 162, expenses from which generally would be deductible.[1294] Then it discusses what are activities for the production of income under Code § 212, expenses from which generally would be deductible.[1295] Because both provisions require a profit motive, it then discusses what Code § 183 says about profit motive.[1296]

II.G.4.l.i.(a). "Trade or Business" Under Code § 162

Subject to the various limitations provided in the preceding parts of part II.G.4 Limitations on Losses and Deductions; Loans Made or Guaranteed by an Owner and subject to other limitations on what can be deducted, Code § 162(a) allows a taxpayer to deduct "all the ordinary and necessary expenses paid or incurred during the taxable year in carrying on any trade or business," even if the business sustains a loss.[1297]

[1293] *Barnes v. Commissioner*, T.C. Memo 2012-80, *aff'd* 712 F.3d 581 (D.C. Cir. 2013) (imposing penalties on taxpayer for deducting 2003 S corporation losses against basis that had been used by previously suspended losses that taxpayer had failed to deduct in 1997).
[1294] See part II.G.4.l.i.(a) "Trade or Business" Under Code § 162.
[1295] See part II.G.4.l.i.(b) Requirements for Deduction Under Code § 212.
[1296] See part II.G.4.l.i.(c) Hobby Loss Benefits of Code § 183.
[1297] Reg. § 1.162-1(a) provides:

> Business expenses deductible from gross income include the ordinary and necessary expenditures directly connected with or pertaining to the taxpayer's trade or business, except items which are used as the basis for a deduction or a credit under provisions of law other than section 162.... The full amount of the allowable deduction for ordinary and necessary expenses

Higgins v. Commissioner, 312 U.S. 212 (1941), held:[1298]

> To determine whether the activities of a taxpayer are "carrying on a business" requires an examination of the facts in each case…. The petitioner merely kept records and collected interest and dividends from his securities, through managerial attention for his investments. No matter how large the estate or how continuous or extended the work required may be, such facts are not sufficient as a matter of law to permit the courts to reverse the decision of the Board.

Commissioner v. Groetzinger, 408 U.S. 23 (1987), discussed various cases (footnotes in the quote below are mine):

> From these observations and decisions, we conclude (1) that, to be sure, the statutory words are broad and comprehensive (*Flint*);[1299] (2) that, however, expenses incident to caring for one's own investments, even though that endeavor is full-time, are not deductible as paid or incurred in carrying on a trade or business (*Higgins*; *City Bank*; *Pyne*);[1300] (3) that the opposite conclusion may follow for an active trader (*Snyder*)[1301]….

> in carrying on a business is deductible, even though such expenses exceed the gross income derived during the taxable year from such business.

[1298] *Higgins* dealt with the predecessor to Code § 162. Rev. Rul. 75-525 views the case as controlling in interpreting Code § 162. See fn. 3416 in part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax. *Commissioner v. Groetzinger*, 408 U.S. 23 (1987), commented on *Higgins* [footnote omitted]:

> The opinion, therefore,—although devoid of analysis and not setting forth what elements, if any, in addition to profit motive and regularity, were required to render an activity a trade or business—must stand for the propositions that full-time market activity in managing and preserving one's own estate is not embraced within the phrase "carrying on a business," and that salaries and other expenses incident to the operation are not deductible as having been paid or incurred in a trade or business.

After additional commentary on the case, *Groetzinger* continued:

> Less than three months later, the Court considered the issue of the deductibility, as business expenses, of estate and trust fees. In unanimous opinions issued the same day and written by Justice Black, the Court ruled that the efforts of an estate or trust in asset conservation and maintenance did not constitute a trade or business. *City Bank Farmers Trust Co. v. Helvering*, 313 U.S. 121 (1941); *United States v. Pyne*, 313 U.S. 127 (1941). The *Higgins* case was deemed to be relevant and controlling.

[1299] *Groetzinger* referred to *Flint v. Stone Tracy Co.*, 220 U.S. 107 (1911), about which *Groetzinger* commented:

> It said: " 'Business' is a very comprehensive term and embraces everything about which a person can be employed." 220 U.S., at 171. It embraced the *Bouvier Dictionary* definition: "That which occupies the time, attention and labor of men for the purpose of a livelihood or profit." *Ibid*. See also *Helvering v. Horst*, 311 U.S. 112, 1181 (1940). And Justice Frankfurter has observed that "we assume that Congress uses common words in their popular meaning, as used in the common speech of men." Frankfurter, Some Reflections on the Reading of Statutes, 47 Colum. L. Rev. 527, 536 (1947).

[1300] See fn. 1298 for the Court's discussion of these cases.

[1301] *Groetzinger* commented:

> *Snyder v. Commissioner*, 295 U.S. 134 (1935), had to do with margin trading and capital gains, and held, in that context, that an investor, seeking merely to increase his holdings, was not engaged in a trade or business. Justice Brandeis, in his opinion for the Court, noted that the Board of Tax Appeals theretofore had ruled that a taxpayer who devoted the major portion of his time to transactions on the stock exchange for the purpose of making a livelihood could treat

> One also must acknowledge that *Higgins*, with its stress on examining the facts in each case, affords no readily helpful standard, in the usual sense, with which to decide the present case and others similar to it. The Court's cases, thus, give us results, but little general guidance.

Pointing out that the cases provide little guidance, *Groetzinger* said they provided "some helpful indicators" and reasoned:

> If a taxpayer, as Groetzinger is stipulated to have done in 1978, devotes his full-time activity to gambling, and it is his intended livelihood source, it would seem that basic concepts of fairness (if there be much of that in the income tax law) demand that his activity be regarded as a trade or business just as any other readily accepted activity, such as being a retail store proprietor or, to come closer categorically, as being a casino operator or as being an active trader on the exchanges.
>
> It is argued, however, that a full-time gambler is not offering goods or his services…. One might well feel that a full-time gambler ought to qualify as much as a full-time trader,[12] as Justice Brandeis in Snyder implied and as courts have held.[13] The Commissioner, indeed, accepts the trader result. Tr. Of Oral Arg. 17. In any event, while the offering of goods and services usually would qualify the activity as a trade or business, this factor, it seems to us, is not an absolute prerequisite.
>
> [12] "It takes a buyer to make a seller and it takes an opposing gambler to make a bet." Boyle, What is a Trade or Business?, 39 Tax Lawyer 737, 763 (1986).
>
> [13] *Levin v. United States*, 597 F.2d 760, 765 (Ct. Cl. 1979); *Commissioner v. Nubar*, 185 F.2d 584, 588 (CA4 1950), *cert. denied*, 341 U.S. 925 (1961); *Fuld v. Commissioner*, 139 F.2d 465, 468-469 (CA2 1943). See also *Moller v. United States*, 721 F.2d 810 (CA Fed. 1983), *cert. denied*, 467 U.S. 1251 (1984); *Purvis v. Commissioner*, 580 F.2d 1332, 1334 (CA9 1976).

After specifically rejecting the idea that offering goods or services is a prerequisite for engaging in a "trade or business," *Groetzinger* concluded (highlighting added):

> Of course, not every income-producing and profit-making endeavor constitutes a trade or business. The income tax law, almost from the beginning, has distinguished between a business or trade, on the one hand, and "transactions entered into for profit but not connected with ... business or trade," on the other. See Revenue Act of 1916, § 5(a) Fifth, 39 Stat. 759. Congress "distinguished the broad range of income or profit producing activities from those satisfying the narrow category of trade or business." *Whipple v. Commissioner*, 373 U.S. 193, 197 (1963). We accept the fact that to be engaged in a trade or business, the taxpayer must be involved in the activity with continuity and regularity and that the taxpayer's primary purpose for engaging in the activity must be for income or profit. A sporadic activity, a hobby, or an amusement diversion does not qualify.

---

losses incurred as having been sustained in the course of a trade or business. He went on to observe that no facts were adduced in Snyder to show that the taxpayer "might properly be characterized as a 'trader on an exchange who makes a living in buying and selling securities.' " *Id.*, at 139. These observations, thus, are dicta, but, by their use, the Court appears to have drawn a distinction between an active trader and an investor.

> It is suggested that we should defer to the position taken by the Commissioner and by the Solicitor General, but, in the absence of guidance, for over several decades now, through the medium of definitive statutes or regulations, we see little reason to do so. We would defer, instead, to the Code's normal focus on what we regard as a common-sense concept of what is a trade or business. Otherwise, as here, in the context of a minimum tax, it is not too extreme to say that the taxpayer is being taxed on his gambling losses,[15] a result distinctly out of line with the Code's focus on income.
>
> We do not overrule or cut back on the Court's holding in *Higgins* when we conclude that if one's gambling activity is pursued full time, in good faith, and with regularity, to the production of income for a livelihood, and is not a mere hobby, it is a trade or business within the meaning of the statutes with which we are here concerned. Respondent Groetzinger satisfied that test in 1978. Constant and large-scale effort on his part was made. Skill was required and was applied. He did what he did for a livelihood, though with a less than successful result. This was not a hobby or a passing fancy or an occasional bet for amusement.
>
> We therefore adhere to the general position of the *Higgins* Court, taken 45 years ago, that resolution of this issue "requires an examination of the facts in each case." 312 U.S., at 217. This may be thought by some to be a less-than-satisfactory solution, for facts vary. See Boyle, What is a Trade or Business?, 39 Tax Lawyer 737, 767 (1986); Note, The Business of Betting: Proposals for Reforming the Taxation of Business Gamblers, 38 Tax Lawyer 759 (1985); Lopez, Defining "Trade of Business" under the Internal Revenue Code: A Survey of Relevant Cases, 11 Fla. St. L. Rev. 949 (1984). *Cf.* Comment, Continuing Vitality of the "Goods or Services" Test, 15 U. Balt. L. Rev. 108 (1985). But the difficulty rests in the Code's wide utilization in various contexts of the term "trade or business," in the absence of an all-purpose definition by statute or regulation, and in our concern that an attempt judicially to formulate and impose a test for all situations would be counterproductive, unhelpful, and even somewhat precarious for the overall integrity of the Code. We leave repair or revision, if any be needed, which we doubt, to the Congress where we feel, at this late date, the ultimate responsibility rests. *Cf*. *Flood v. Kuhn*, 407 U.S. 258, 269-285 (1972).[16]
>
> [15] "The more he lost, the more minimum tax he has to pay." Boyle, 39 Tax Lawyer, at 754. The Commissioner concedes that application of the goods-or-services-test here "visits somewhat harsh consequences" on taxpayer Groetzinger, Brief for Petitioner 36, and "points to ... perhaps unfortunate draftsmanship." *Ibid*. See also Reply Brief for Petitioner 11.
>
> [16] It is possible, of course, that our conclusion here may subject the gambler to self-employment tax, see §§ 1401-1403 of the Code, and therefore may not be an unmixed blessing for him. Federal taxes, however, rest where Congress has placed them.

Let's look at the requirement that "the taxpayer must be involved in the activity with continuity and regularity and that the taxpayer's primary purpose for engaging in the activity must be for income or profit." *Brannen v. Commissioner*, 78 T.C. 471 (1982) (reviewed decision) (footnote reproducing Code § 162(a) omitted below), seems to impose a higher standard:

> It is well settled, that in order to constitute the carrying on of a trade or business under section 162(a), the activity must "be entered into, in good faith, with the dominant hope and intent of realizing a profit, i.e., taxable income, therefrom." *Hirsch v. Commissioner*,

315 F.2d 731, 736 (9th Cir. 1963), *affg*. a Memorandum Opinion of this Court. See also *Hager v. Commissioner*, 76 T.C. 759, 784 (1981); *Golanty v. Commissioner*, 72 T.C. 411, 425 (1979), *affd*. without published opinion 647 F.2d 170 (9th Cir. 1981).

However, *Brannen* was decided before *Groetzinger* and *Groetzinger* is a higher court), so *Groetzinger* would control.

"The expectation of profit need not be reasonable, but the taxpayer must conduct the activity with the actual and honest objective of making a profit."[1302]

Brannen suggests that the regulations reproduced in part II.G.4.l.i.(c) Hobby Loss Benefits of Code § 183 are a good summary of the cases on this issue; see fn. 1316 in that part. However, no inference is to be drawn from the provisions of Code § 183 and the regulations thereunder that any activity of a C corporation is or is not a business or engaged in for profit.[1303]

Losses for 12 years, when the taxpayer was 65 years of age when starting the activity, did not disqualify the activity, in which he engaged full time, from constituting a business.[1304]

[1302] *Robison v. Commissioner*, T.C. Memo. 2018-88, citing then reasoning further:

> *Hildebrand v. Commissioner*, 28 F.3d 1024, 1026-1027 (10th Cir. 1994), *aff'g Krause v. Commissioner*, 99 T.C. 132 (1992); *Keanini v. Commissioner*, 94 T.C. 41, 46 (1990). Because petitioners were the only partners in Robison Ranch, we need not separately determine the intent at the partnership level. Greater weight is given to objective facts than to a taxpayer's self-serving statement of intent. *King v. Commissioner*, 116 T.C. 198, 205 (2001); sec. 1.183-2(a) and (b), Income Tax Regs. Evidence from years subsequent to the years in issue is relevant to the extent it creates inferences regarding a taxpayer's requisite profit objective in earlier years. See *Hoyle v. Commissioner*, T.C. Memo. 1994-592; *Smith v. Commissioner*, T.C. Memo. 1993-140.

Barker v. Commissioner, T.C. Memo. 2018-67, stated:

> To be entitled to deductions under section 162, SoBe must have entered into the music business with the "actual and honest objective of making a profit." *Osteen v. Commissioner*, 62 F.3d 356, 358 (11th Cir. 1995), *aff'g* in part, *rev'g* in part T.C. Memo. 1993-519; *Dreicer v. Commissioner*, 78 T.C. at 645; see also sec. 183(c).

[1303] Reg. § 1.183-1(a).

[1304] *Ellsworth v. Commissioner*, T.C. Memo. 1962-32, allowed the taxpayer to deduct losses. The taxpayer's testimony and corroborating expert testimony held persuade the court:

> Petitioner testified that he would not have reentered the breeding of dairy cattle in 1948 unless he "felt sure" he could make a profit, although, based on his past experience in breeding livestock, he realized that initial losses were inevitable since it would require about 10 to 15 years to develop superior strains in his Sybil cattle so that they would have substantial commercial value. Petitioner also ascribed his continuous losses from his farm enterprise in part to various causes such as climatic conditions, adverse effects on breeding establishments of artificial insemination, and economic depressions in the milk industry. Notwithstanding these latter factors, which were beyond his control, petitioner had more than a vain hope that a profit would result from his venture in the near future which would justify his expenditures.
>
> The record shows that petitioner's operation was conducted on an efficient, economical and sound scientific basis when compared to other breeding establishments; that the blood lines of his herd have been constantly improving; and that the prospects of making a profit from the sale of his cattle are considerably improved. Petitioner's expectation of realizing a profit in the very near future was corroborated by three experts in the breeding of livestock who testified, in general, as to the potential profit represented by petitioner's foundation herd, particularly in the "bull stud" market for use in artificial insemination establishments. J.F. Cavanaugh testified that

An individual who earns a living working 40 hours per week may also have a trade or business working another 30 hours per week, even if the other activity has not yet produced a product.[1305]

> petitioner's cattle "have arrived at a point where we think they would sell to good advantage." Likewise, Parodneck, another expert, testified that an individual who had a breeding herd during the taxable years involved, had "a reasonable expectancy of making a profit." We found their testimony in this respect convincing.

Although he had independent sources of income, he worked hard to minimize losses and set himself up for potential future profits:

> Admittedly, petitioner possessed an independent income and was not dependent on the success of the farm for a livelihood. He also may well have had pleasure from residing in a country home, but these facts alone do not negate his intent to operate the farm for profit. *Wilson v. Eisner*, 282 Fed. 38 (C.A. 2, 1922); *DuPont v: United States*, 28 F.Supp. 122, 124 (D. Delaware, 1939) (C.A. 2). Nor is such intent vitiated by the fact that petitioner received an annual income from dividends sufficient to offset substantial losses from his farm enterprise. No evidence was adduced that petitioner was indifferent to whether there was a loss or gain, or that the farm was an incident to the social or domestic aspects of his life. A substantial income from sources other than farming, or substantial sources of capital, was necessary as a basis for embarking on the farming project because of anticipated losses in the earlier years.
>
> We have no doubt upon the record that petitioner devoted himself assiduously to the economical operation of the farm with the reasonable hope of substantial future profits from the breeding operation. We further note that petitioner took affirmative steps to minimize losses derived in1958 by reducing his herd, terminating his lease of a neighboring farm and reducing his working area further by renting some of his acreage. We are satisfied that all of his activities at the farm were influenced by the ambition to produce a valuable strain of dairy livestock which would be commercially acceptable.
>
> That petitioner was about 65 years of age in 1948 when he commenced his selective breeding enterprise and would be 75 or 80 before he could make a profit, in our opinion, is not determinative of the issue. More significant, we believe, is the fact that he gave such attention to the farm as is usually given to a business enterprise. Apart from his annual vacation, petitioner devoted virtually all of his personal attention to supervising the farm operations, including a staff of several full time employees who assisted him. Petitioner, whose average working day on the farm was in excess of eight hours, performed all of the functions of a farm manager. During the taxable years involved, detailed records were kept of daily milk production, of statistics relating to the breeding activities of his livestock, and of income and expenses attributable to the operation of the farm. The farm was a well-equipped establishment and was operated in a businesslike manner. We find, on the whole picture, that the farm operation was not carried on for the purpose of display, social diversion, or for the gratification of a personal whim. *Samuel Riker, Jr., Executor*, 6 B.T.A. 890, 893 (1927).

The court concluded:

> Considering all of the evidence we hold that petitioner carried on his farm activities, and particularly his breeding operations, on a commercial basis with the reasonable hope of making it profitable and not for his recreation, pleasure or other personal reason. Accordingly, the expenses in question are deductible under section 162(a), *supra*.

[1305] *Snyder v. U.S.*, 674 F.2d 1359 (10th Cir. 1982), stated that the taxpayer's profit motive is only significant under Code § 162 insofar as it affords a means of *distinguishing* between an enterprise carried on in good faith as a "trade or business" and an enterprise merely carried on as a hobby. It pointed out:

> A taxpayer is clearly not engaged in a trade or business if his predominant purpose is recreation or a hobby. See, *e.g.*, *Carkhuff v. Commissioner*, 425 F.2d 1400, 1404 (6th Cir. 1970); *Schley v. Commissioner*, 375 F.2d 747, 750 (2d Cir. 1967). On the other hand, an author may be in a trade or business within the meaning of section 162 if he "participated in that endeavor with a good faith expectation of making a profit." *Stern v. United States*, No. 70-782-HP (C.D. Cal. Mar. 26, 1971), 71-1 U.S. Tax. Cas. (CCH) ¶ 9375. The business need not yield an immediate profit. *Id*.

When a taxpayer invests in a partnership, the partnership's profit motive is determinative.[1306]

It also pointed out that it is more difficult to prove a business when activity is not the taxpayer's principal means of livelihood and is of a sporting or recreational nature, citing *Imbesi v. Commissioner*, 361 F.2d 640, 645 (3d Cir. 1966). It held:

> On remand, if the trial court finds taxpayer was primarily motivated by profit, the court must then determine whether taxpayer devoted sufficient time over a substantial enough period to be in a trade or business under section 162. If the trial court finds that taxpayer was not engaged in a trade or business in the relevant years, it must then determine whether the expenses were deductible under section 212 as ordinary and necessary expenses for the production of income.

[1306] *Brannen v. Commissioner*, 78 T.C. 471 (1982) (reviewed decision), stated:

> In order for a partnership to be entitled to a deduction for expenses attributable to a trade or business in computing its taxable income (or loss) under section 703(a), it must be established that the partnership engaged in the activity with the primary purpose and intent[14] of making a profit. *Hirsch v. Commissioner*, *supra* at 736; *Golanty v. Commissioner*, *supra* at 425; *Hager v. Commissioner*, *supra* at 784. Britton Properties need not have a reasonable expectation of profit, but the partnership must have the intent and objective of realizing a profit.[15] *Hirsch v. Commissioner*, *supra*; *Hager v. Commissioner*, *supra*; *Jasionowski v. Commissioner*, 66 T.C. 312, 321 (1976); *Bessenyey v. Commissioner*, 45 T.C. 261, 274 (1965), *affd*. 379 F.2d 252 (2d Cir. 1967).
>
> [14] While it may at first appear difficult to ascribe an "intent" to an entity such as the limited partnership herein, we have previously held that "It is the intent of the partnership and not that of any specific partner which is determinative in characterizing the income for purposes of taxation." *Podell v. Commissioner*, 55 T.C. 429, 433 (1970). See also *Miller v. Commissioner*, 70 T.C. 448, 456 (1978), where we looked to the "partnership's motives." In this same context, the taxpayer in *Estate of Freeland v. Commissioner*, 393 F.2d 573, 584 (9th Cir. 1968), *affg*. a Memorandum Opinion of this Court, argued that as a limited partner, the intent of the operating partners in the partnership should not be attributed to her. In rejecting this contention, the Second Circuit stated that while the limited partnership may have been an "investment" to her, the intent of the partnership controlled in determining whether the land owned by the partnership was property described in sec. 1221(1).
>
> [15] We recognize that the standard we have used was recently reviewed in *Dreicer v. Commissioner*, 665 F.2d 1292 (D.C. Cir. 1982), *revg. and remanding* a Memorandum Opinion of this Court. In *Dreicer*, the Circuit Court, after a review of the legislative history, concluded that the applicable standard is not whether the taxpayer had "a bona fide expectation" of profit but, rather, whether he engaged in the activity with the "objective" of making a profit. The Court correctly stated that sec. 1.183-2(a), Income Tax Regs., provides that the facts must indicate that the taxpayer entered into the activity with "the objective of making a profit." The difference in the standard of "objective of making a profit" and a "bona fide expectation" of making a profit might be merely one of semantics. In any event, the Circuit Court in the *Dreicer* case recognized, as this Court has in many cases, that an activity is not engaged in for profit if the taxpayer does not have the "objective" or "intent" of making a profit, and that the "objective" or "intent" of the taxpayer is a question of fact to be decided in each case from all the evidence of record.

Barker v. Commissioner, T.C. Memo. 2018-67, stated:

> We determine the existence of such an objective at the partnership level, *Brannen v. Commissioner*, 722 F.2d 695, 703-704 (11th Cir. 1984), *aff'g* 79 T.C. 471 (1992), and "we focus on the intent of the general partner … since it is [this] individual[] who actually controlled the partnership's activities", *Fuchs v. Commissioner*, 83 T.C. 79, 98 (1984).

However, if the taxpayers are the only partners, one can look directly to their situation. See fn 1302.

Although an individual holding property for the production of income must look to Code § 212 rather than Code § 162,[1307] a corporation appears able to use Code § 162 to deduct expenses related to the production of income, as illustrated by Rev. Rul. 78-195:

> A corporation that was formed for the express purpose of investing in real property purchased a tract of unimproved, non-income-producing real property, which it held for two years and sold without having made any substantial improvements. The corporation did not make any significant efforts to sell the property and did not engage in any other transactions in real or personal property or in other commercial activities. During the period that it held the property, the corporation incurred expenses for interest, real property taxes, accounting fees, and general office costs.
>
> *Held*, the accounting fees and general office costs are expenses related to investment property of the corporation and are deductible by the corporation under section 162 of the Internal Revenue Code of 1954 in the year in which paid or incurred. The interest and real property taxes are deductible by the corporation under sections 163 and 164 of the Code, respectively. See section 266 and the Income Tax Regulations thereunder regarding amounts which may be charged to capital account.

II.G.4.l.i.(b). Requirements for Deduction Under Code § 212

Subject to the various limitations provided in the preceding parts of part II.G.4 Limitations on Losses and Deductions; Loans Made or Guaranteed by an Owner and subject to other limitations on what can be deducted, Code § 212 allows an individual to deduct:

> all the ordinary and necessary expenses paid or incurred during the taxable year—
>
> (1) for the production or collection of income;
>
> (2) for the management, conservation, or maintenance of property held for the production of income; or
>
> (3) in connection with the determination, collection, or refund of any tax.

However, the activity need not produce a profit for the deductions to be allowable under Code § 212.[1308]

[1307] See part II.G.4.l.i.(d) Whether Managing Investments Constitutes a Trade or Business, especially fns 1342-1343.

[1308] Reg. § 1.212-1(b) provides:

> The term "income" for the purpose of section 212 includes not merely income of the taxable year but also income which the taxpayer has realized in a prior taxable year or may realize in subsequent taxable years; and is not confined to recurring income but applies as well to gains from the disposition of property. For example, if defaulted bonds, the interest from which if received would be includible in income, are purchased with the expectation of realizing capital gain on their resale, even though no current yield thereon is anticipated, ordinary and necessary expenses thereafter paid or incurred in connection with such bonds are deductible. Similarly, ordinary and necessary expenses paid or incurred in the management, conservation, or maintenance of a building devoted to rental purposes are deductible notwithstanding that there is actually no income therefrom in the taxable year, and regardless of the manner in which or the purpose for which the property in question was acquired. Expenses paid or incurred in

On the other hand, Reg. § 1.212-1(c) provides that:

> In the case of taxable years beginning before January 1, 1970, expenses of carrying on transactions which do not constitute a trade or business of the taxpayer and are not carried on for the production or collection of income or for the management, conservation, or maintenance of property held for the production of income, but which are carried on primarily as a sport, hobby, or recreation are not allowable as nontrade or nonbusiness expenses. The question whether or not a transaction is carried on primarily for the production of income or for the management, conservation, or maintenance of property held for the production or collection of income, rather than primarily as a sport, hobby, or recreation, is not to be determined solely from the intention of the taxpayer but rather from all the circumstances of the case. For example, consideration will be given to the record of prior gain or loss of the taxpayer in the activity, the relation between the type of activity and the principal occupation of the taxpayer, and the uses to which the property or what it produces is put by the taxpayer. For provisions relating to activities not engaged in for profit applicable to taxable years beginning after December 31, 1969, see section 183 and the regulations thereunder.

Another issue is whether fees are "ordinary and necessary" expenses for investment advice allowable under Code § 212 or are nondeductible capital expenses. In resolving this issue, *Honodel v. Commissioner*, 76 T.C. 351 (1981), held:[1309]

> … we "look to the nature of the services performed" by the investment adviser rather than "their designation or treatment" by the taxpayer.[5] *Cagle v. Commissioner*, 63 T.C. 86, 96 (1974), *affd*. 539 F.2d 409 (5th Cir. 1976), and the cases cited therein. Our inquiry focuses on whether the services were performed in the process of acquisition or for investment advice. See generally *Woodward v. Commissioner*, *supra* at 577.
>
> [5] Petitioners urge us to apply the origin-of-the-claim test first specifically propounded by the Supreme Court in *United States v. Gilmore*, *supra* at 49. See *Reed v. Commissioner*, 55 T.C. 32, 39-40 (1970), and the cases cited therein. The Supreme Court in *Woodward v. Commissioner*, 397 U.S. 572, 577-578, applied the "origin" test in holding that litigation expenses incurred in connection with appraisal proceedings had their origin in the "process of acquisition" and were therefore nondeductible capital expenditures. The Court stressed that the taxpayer's motive or purpose would not be considered. Therefore, in the case at issue herein, we follow the Supreme Court's guidance in ignoring each petitioner's "motive or purpose." We adopt an inquiry consistent with that of the Supreme Court by looking at the nature of the services performed (the origin of the fee) in determining whether such services are rendered in the process of acquisition.

---

managing, conserving, or maintaining property held for investment may be deductible under section 212 even though the property is not currently productive and there is no likelihood that the property will be sold at a profit or will otherwise be productive of income and even though the property is held merely to minimize a loss with respect thereto.

[1309] The quote below refers to *Woodward v. Commissioner*, 397 U.S. 572, 575 (1970), *affg*. 410 F.2d 313 (8th Cir. 1969), which *affd*. 49 T.C. 377 (1968).

The court summarized the facts and applied this rule:

> The “nature of the services performed” by FMS for its clientele, including petitioners, may be summarized quite simply. In periodic planning sessions, FMS evaluated and analyzed each petitioner’s personal, financial, and tax status, elicited objectives and proposed investment programs in light of those objectives. Further, FMS analyzed numerous investment opportunities presented to it by outside brokers in the process of selecting the projects under our consideration. In evaluating these investments, FMS utilized the services of outside counsel for legal and tax advice. FMS, through its agents and outside contractors, negotiated the purchase of these investments and prepared the legal documentation, including the limited partnership agreement, necessary to consummate the transaction. The potential investments that met with the approval of FMS were recommended to petitioners who had the option to invest if they so desired.
>
> The complexity, or should we say perplexity, resulting from this factual web arises because of the dual nature of FMS’s function: (1) An advisory function and (2) an acquisition function. Respondent contends that the acquisition function was all encompassing in arguing as follows:
>
> > the evidence shows that Clark [FMS] identifies suitable investment projects, forms limited partnerships which he then causes to purchase the projects, and finally sells the units of limited partnership to his clients at a fixed price per unit… Accordingly, viewed from the end result and the manner in which the fees are charged, it appears they represent nothing more than part of the cost of acquiring partnership interests, or represent commissions for Clark’s services in putting the project together….
>
> We disagree with respondent because he fails to focus on the “nature of the services performed” by FMS, as required in *Cagle v. Commissioner*, *supra*. Instead, respondent incorrectly points to the end result or consequence of such services.
>
> We find that those services provided by FMS relating to (1) periodic planning sessions and (2) the evaluation of potential investments to the extent needed to formulate an opinion regarding such investments were investment advice. In addition, those services performed by FMS in communicating its recommendations to petitioners were investment advice. Conversely, those services rendered in the “process of acquisition” including, but not limited to, negotiating the purchase and creating the investment vehicle were capital in nature. See *Kimmelman v. Commissioner*, 72 T.C. 294, 304-305 (1979); section 741.
>
> FMS adopted a two-tier fee schedule: (1) A monthly retainer fee and (2) an investment fee. We now must examine the nature of each of these fees to determine if they are allocable to currently deductible investment advice or to capitalizable acquisition costs. Generally, petitioners paid a monthly retainer fee whether or not they invested in a project recommended to them by FMS. Spence Clark testified that FMS “had doctor clients pay us for two or three years, without receiving an investment and they may have … paid $5,000.00, $10,000.00, $20,000.00, $30,000.00 in fees, and still not invested.” Only those clients who decided to invest in a recommended project an took advantage of FMS’s acquisition function paid the investment fees. Those clients who chose not to invest and hence were not required to pay the investment fee received the exact same investment services as those who chose to invest. Conversely, petitioners could only participate in an investment if they paid the investment fee. Each petitioner voluntarily

could choose to invest in the projects. Each was cognizant of the fact that a decision to invest resulted in the imposition of this investment fee. This investment fee was a cost of acquiring an interest in the limited partnership projects herein.

Based upon this reasoning, we hold that the monthly retainer fees paid by petitioners are allocable to investment advice and are therefore deductible under section 212(2). Further, we find that the investment fees paid by petitioners are nondeductible capital expenditures incurred in connection with the acquisition of partnership interests and are includable in their bases.[6] See sec. 742. Our holding is consistent with that of the Court of Claims in *Picker v. United States*, 178 Ct.Cl. 445, 371 F.2d 486, 499 (1967). In *Picker*, the Court of Claims found that fees were paid for a recommendation that was not utilized in the acquisition of a capital asset. The court held that such fees were paid for investment counsel and therefore were deductible under section 212(2).

[6] We are assuming that the cattle investment and the Glendale Shopping Center investment (see table at pp. 359-360) were in partnership form. The fees paid for these investments are therefore treated consistently with the fees paid for the apartment projects. In any case, the form of the investment will not affect our result.

II.G.4.l.i.(c). Hobby Loss Benefits of Code § 183

Code § 183(a) provides:

General rule. In the case of an activity engaged in by an individual or an S corporation, if such activity is not engaged in for profit, no deduction attributable to such activity shall be allowed under this chapter except as provided in this section.

Reg. § 1.183-2(a) includes:

The determination whether an activity is engaged in for profit is to be made by reference to objective standards, taking into account all of the facts and circumstances of each case. Although a reasonable expectation of profit is not required, the facts and circumstances must indicate that the taxpayer entered into the activity, or continued the activity, with the objective of making a profit. In determining whether such an objective exists, it may be sufficient that there is a small chance of making a large profit. Thus it may be found that an investor in a wildcat oil well who incurs very substantial expenditures is in the venture for profit even though the expectation of a profit might be considered unreasonable. In determining whether an activity is engaged in for profit, greater weight is given to objective facts than to the taxpayer's mere statement of his intent.

Code § 183 also applies to deductions passing through a partnership.[1310]

[1310] Rev. Rul. 77-320 concluded:

Held, section 183 of the Code applies to the activities of a partnership, and the provisions of section 183 are applied at the partnership level and reflected in the partners' distributive shares.

See *Brannen v. Commissioner*, 78 T.C. 471 (1982) (reviewed decision), quoted in fn. 1339. But the Fifth Circuit may have a different view, having stated in *Copeland v. Commissioner*, 290 F.3d 326 (2002) (but correctly pointing out how Code § 183 is sometimes incorrectly referred to as disallowing deductions):

For some clues into the IRS' views, see "Activities Not Engaged in for Profit, Audit Technique Guide," Publication 5558 (9-2021) (irs.gov).

Where the taxpayer is engaged in several undertakings, each of these may be a separate activity, or several undertakings may constitute one activity.[1311] Income and deductions would be allocated between activities.[1312] Reporting activities on separate schedules (for example, one on Schedule C and another on Schedule F) is an admission that the taxpayer views the activities as separate, requiring the taxpayer to overcome a high hurdle to establish that the undertakings were a single activity.[1313]

> The Tax Court's wording to the contrary notwithstanding, however, the deductions were not actually disallowed under I.R.C. § 183, but under I.R.C. §§ 162 and 174, neither of which are limited — as is § 183 — to activities engaged in by individuals and S corporations, to the exclusion of partnerships.[26] I.R.C. § 183 provided the *Krause* court with only the factors for analysis, not statutory authority to allow or disallow deductions themselves. To say that the deductions are disallowed "under section 183" impermissibly conflates the I.R.C. sections in question and thereby glosses over this crucial distinction.
>
> [26] Even the Commissioner recognizes this limitation in his appellate brief when he states (emphasis ours): "The regulations under § 183 list a number of factors relevant to the determination of profit motive, and those factors have frequently been applied by the courts in determining whether a profit motive exists for all sorts of entities, including partnerships and corporations, *to which the limitations on deductibility of § 183 do not apply*."

[1311] Reg. § 1.183-1(d)(1), which provides further:

> In ascertaining the activity or activities of the taxpayer, all the facts and circumstances of the case must be taken into account. Generally, the most significant facts and circumstances in making this determination are the degree of organizational and economic interrelationship of various undertakings, the business purpose which is (or might be) served by carrying on the various undertakings separately or together in a trade or business or in an investment setting, and the similarity of various undertakings. Generally, the Commissioner will accept the characterization by the taxpayer of several undertakings either as a single activity or as separate activities. The taxpayer's characterization will not be accepted, however, when it appears that his characterization is artificial and cannot be reasonably supported under the facts and circumstances of the case. If the taxpayer engages in two or more separate activities, deductions and income from each separate activity are not aggregated either in determining whether a particular activity is engaged in for profit or in applying section 183. Where land is purchased or held primarily with the intent to profit from increase in its value, and the taxpayer also engages in farming on such land, the farming and the holding of the land will ordinarily be considered a single activity only if the farming activity reduces the net cost of carrying the land for its appreciation in value. Thus, the farming and holding of the land will be considered a single activity only if the income derived from farming exceeds the deductions attributable to the farming activity which are not directly attributable to the holding of the land (that is, deductions other than those directly attributable to the holding of the land such as interest on a mortgage secured by the land, annual property taxes attributable to the land and improvements, and depreciation of improvements to the land).

[1312] Reg. § 1.183-1(d)(2) provides:

> *Rules for allocation of expenses*. If the taxpayer is engaged in more than one activity, an item of deduction or income may be allocated between two or more of these activities. Where property is used in several activities, and one or more of such activities is determined not to be engaged in for profit, deductions relating to such property must be allocated between the various activities on a reasonable and consistently applied basis.

[1313] *Den Besten v. Commissioner*, T.C. Memo. 2019-154, citing for the admission issue *Topping v. Commissioner*, T.C. Memo. 2007-92, 2007 WL 1135339, at *9 (citing *Mendes v. Commissioner*, 121 T.C. 308, 312 (2003), and *Estate of Hall v. Commissioner*, 92 T.C. 312, 337-338 (1989)).

Code § 183(c) provides:[1314]

> *Activity not engaged in for profit defined*. For purposes of this section, the term "activity not engaged in for profit" means any activity other than one with respect to which deductions are allowable for the taxable year under section 162 or under paragraph (1) or (2) of section 212.

Thus, Code § 183 "is not a disallowance provision, but rather an allowance provision which operates only when the taxpayer's expenses are not allowable as deductions under section 162(a) or 212(1) and (2)," and "the profit motive analysis must be resolved *before* turning to section 183."[1315] However, courts often conflate Code §§ 162 and 183 and jump directly to whether a profit motive exists under Code § 183, presumably because a finding of profit motive under Code § 183 means that one does not need to consider a profit motive under Code § 162.

Code § 183(d) presumes an activity is engaged in for profit if it is profitable for a particular number of years. If the presumption does not apply, then Reg. § 1.183-2(b) kicks in [footnotes in the long quote below are mine, elaborating on each factor]:[1316]

> *Relevant factors*. In determining whether an activity is engaged in for profit, all facts and circumstances with respect to the activity are to be taken into account.[1317] No one factor

---

[1314] Reg. § 1.183-1(a) reinforces this predicate by including:

> Whether an activity is engaged in for profit is determined under section 162 and section 212(1) and (2) except insofar as section 183(d) creates a presumption that the activity is engaged in for profit.

[1315] *Brannen v. Commissioner*, 78 T.C. 471 (1982) (reviewed decision) (emphasis in original), quoted in fn. 1339. However, courts often fail to consider Code § 162 before turning to a Code § 183 analysis; for example, *Boneparte v. Commissioner*, T.C. Memo. 2017-193, correctly contrasted the consequences of being a professional gambler with being a casual gambler and dove right into Code § 183 with even mentioning Code § 162 (but the taxpayer, who was a toll bridge operator, prepared his own returns and represented himself in Tax Court, so the lack of rigor is not surprising).

[1316] *Brannen v. Commissioner*, 78 T.C. 471 (1982) (reviewed decision), held that:

> since the regulation is not unreasonable and plainly inconsistent as it deals with a specific issue raised in section 183 which requires a determination before that section is applicable, it should be given full force and effect. See *Commissioner v. South Texas Lumber Co.*, 333 U.S. 496 (1948). In addition, since many of the statements in the regulation, including the relevant factors listed, were derived from case law decided prior to the enactment of section 183, it is clear that the standards used in determining whether a profit motive exists for purposes of section 162 or 212 have remained the same. See *Jasionowski v. Commissioner*, *supra* at 321-322; *Benz v. Commissioner*, 63 T.C. 375, 383 (1974).

[1317] *Robison v. Commissioner*, T.C. Memo. 2018-88, stated:

> All facts and circumstances are to be taken into account, and no single factor or mathematical preponderance of factors is determinative. *Westbrook v. Commissioner*, 68 F.3d at 876; *Hildebrand v. Commissioner*, 28 F.3d at 1027. We address the most relevant factors in determining petitioners' intent.

After considering the factors in fns 1318, 1319, 1320, 1323, 1326, and 1329, the court concluded:

> This is a very close case, and our determination for the years in issue is limited to the facts found for those years. After weighing all the facts and circumstances in the light of the relevant factors, we conclude that petitioners engaged in their ranching activity for the years in issue with the requisite profit objective. Petitioners' activities cannot be characterized as a "hobby" during those years. Petitioners' efforts to reduce Robison Ranch's expenses and the resulting decrease in petitioners' net losses during the years in issue are most persuasive. Accordingly, we reject

is determinative in making this determination. In addition, it is not intended that only the factors described in this paragraph are to be taken into account in making the determination, or that a determination is to be made on the basis that the number of factors (whether or not listed in this paragraph) indicating a lack of profit objective exceeds the number of factors indicating a profit objective, or vice versa. Among the factors which should normally be taken into account are the following:

(1) *Manner in which the taxpayer carries on the activity*. The fact that the taxpayer carries on the activity in a businesslike manner and maintains complete and accurate books and records may indicate that the activity is engaged in for profit.[1318] Similarly,

---

respondent's disallowance of the loss deductions relating to the ranching activity under section 183.

[1318] *Robison v. Commissioner*, T.C. Memo. 2018-88, included the following reasoning:

Carrying on an activity in a businesslike manner, such as by maintaining complete and accurate books and records, conducting the activity in a manner similar to other activities of the same nature that are profitable, and making changes in operations to adopt new techniques or abandon unprofitable methods, is a factor that may indicate a profit objective. Sec. 1.183-2(b)(1), Income Tax Regs. Businesslike conduct is characterized by careful and thorough investigation of the profitability of a proposed venture, monitoring of a venture in progress, and attention to problems that arise over time. See *Ronnen v. Commissioner*, 90 T.C. 74, 93 (1988); *Taube v. Commissioner*, 88 T.C. 464, 481-482 (1987).

While a taxpayer need not maintain a sophisticated cost accounting system, the taxpayer should keep records that enable the taxpayer to make informed business decisions. See *Burger v. Commissioner*, 809 F.2d 355, 359 (7th Cir. 1987), *aff'g* T.C. Memo. 1985-523. For a taxpayer's books and records to indicate a profit motive, the books and records should enable a taxpayer to cut expenses, increase profits, or evaluate the overall performance of the operation. See *Abbene v. Commissioner*, T.C. Memo. 1998-330. Petitioners kept many financial and administrative records, such as weekly meeting minutes, employment contracts, payroll tax returns, insurance policies and payments, and formal leases for employees who lived on Robison Ranch. Although petitioners' records were voluminous, respondent argues that petitioners' administrative and financial recordkeeping was more akin to a conscious attention to detail than to something used to analyze expenses or improve profitability. See *Golanty v. Commissioner*, 72 T.C. 411, 430 (1979), *aff'd*, 647 F.2d 170 (9th Cir. 1981). Petitioners contend that R. Robison used QuickBooks' profit and loss statements to monitor the ranch's finances and cut costs. We believe petitioners used them for the important purposes of cutting expenses, increasing profits, and evaluating the overall performance of the operation. See *id*. However, there is no evidence that they used them to create budgets or make income projections, which would have been advantageous and further indicative of operating in a businesslike manner. *See Keating v. Commissioner*, 544 F.3d 900, 904 (8th Cir. 2008), *aff'g* T.C. Memo. 2007-309; *Foster v. Commissioner*, T.C. Memo. 2012-207, slip op. at 14….

Respondent also argued that petitioners had no written business plan for Robison Ranch. Numerous court opinions mention that a businesslike operation often would involve a business plan. *See*, *e.g.*, *Wesinger v. Commissioner*, T.C. Memo. 1999-372. Petitioners retroactively created business plans for the years in issue, which were largely narratives of the actions petitioners took during those years. The fact that petitioners had no written business plan does not negate a profit motive, as a business plan can be evidenced by actions. *See Annuzzi v. Commissioner*, T.C. Memo. 2014-233, at *16; *Phillips v. Commissioner*, T.C. Memo. 1997-128 (stating that written financial plan not required for 32-horse farm where business plan was evidenced by action). Nevertheless, a business plan likely would have aided petitioners in creating analyses for the future financial management or planning of the activity. *See Foster v. Commissioner*, T.C. Memo. 2012-207, slip op. at 14.

Maintaining an additional bank account for the activity separate from a taxpayer's personal finances is indicative of an activity being carried on in a businesslike manner. *See Wayts v.*

> where an activity is carried on in a manner substantially similar to other activities of the same nature which are profitable, a profit motive may be indicated. A change of operating methods, adoption of new techniques or abandonment of unprofitable methods in a manner consistent with an intent to improve profitability may also indicate a profit motive.[1319]

> *Commissioner*, T.C. Memo. 1992-82 (finding horse racing and breeding activity was carried on in a businesslike manner because it had a separate bank account) (citing *Pryor v. Commissioner*, T.C. Memo. 1991-109). Petitioners' separate maintenance of their personal finances and Robison Ranch's are indicative of operating in a businesslike manner.
>
> Perhaps the most important indication of whether an activity is being performed in a businesslike manner is whether the taxpayer implements methods for controlling losses, including efforts to reduce expenses and generate income. *See Dodge v. Com missioner*, T.C. Memo. 1998-89, *aff'd* without published opinion, 188 F.3d 507 (6th Cir. 1999). Petitioners contend that they made changes to their operating methods, adopted new techniques, and abandoned unprofitable methods that contributed to their losses. The record supports this contention. Petitioners made changes in their ranching activity when they realized that certain operations would not be profitable, changing Robison Ranch's operation two times - from Paint Horses, to Quarter Horses, to a registered cattle herd. *Cf. Williams v. Commissioner*, T.C. Memo. 2018-48, at *24-*25 (finding cattle operation was not carried on in a businesslike manner because taxpayer did not make changes or transition his operation for 10 years despite continued losses).

Similarly, *Den Besten v. Commissioner*, T.C. Memo. 2019-154, held that the taxpayer had a qualified business plan:

> While petitioner's plan was not formally written, it can be inferred, from his deliberate actions to achieve a narrowly focused goal, that he did have a plan.

Den Besten also held that the taxpayer's failure to maintain formal accounting records was not fatal, when the taxpayer kept sufficient receipts to substantiate his income and deductions:

> The records petitioner maintained were consistent with his business profit objective and enabled him to make educated business decisions about his cutting horse activity.

The taxpayer's advertising efforts and results also impressed the *Den Besten* court:

> A taxpayer may further exhibit his profit objective by the manner in which he advertises his business. A single form of substantial advertisement itself may not establish that a taxpayer has carried on his activity in a businesslike manner. See *McKeever v. Commissioner*, T.C. Memo. 2000-288; *Cohn v. Commissioner*, T.C. Memo. 1983-301, 1983 Tax Ct. Memo LEXIS 486, *aff'd*, 742 F.2d 1432 (2d Cir. 1984). Different kinds of advertising media may allow the taxpayer "[t]o expand … [his] potential market and to attract new individuals". *Cohn v. Commissioner*, 1983 Tax Ct. Memo LEXIS 486, at *22. Horse shows may be an effective advertising method. See *Engdahl v. Commissioner*, 72 T.C. at 662-663; *Dodge v. Commissioner*, T.C. Memo. 1998-89.
>
> Petitioner displayed banners at competition events advertising both his seed business and his cutting horse activity, and he had advertisements in printed programs and sales catalogs. Petitioner sold advertisement items such as blankets and belt buckles marked with his brand name and talked with people across the nation regarding his horses, all of which resulted in sales, breeding, and training opportunities. Petitioner marked his operation with his own unique brand. He used his brand on advertisement items, in production sales catalogs, and even on some of the horses he bred.

[1319] *Robison v. Commissioner*, T.C. Memo. 2018-88, included the following reasoning:

> Petitioners hired professionals to manage Robison Ranch, employing a full-time ranch manager and a ranch hand during the years in issue, both of whom lived on site. Petitioners also conducted weekly meetings with Robison Ranch employees. While Dahl was not an expert in registered Angus cattle ranching, nor had he managed a ranch previously, he was experienced in cattle ranching, having been raised on an unregistered cattle ranch. Further, petitioners made

(2) *The expertise of the taxpayer or his advisors*. Preparation for the activity by extensive study of its accepted business, economic, and scientific practices, or consultation with those who are expert therein, may indicate that the taxpayer has a profit motive where the taxpayer carries on the activity in accordance with such practices.[1320] Where a taxpayer has such preparation or procures such expert

---

use of a local veterinarian who was an expert regarding brisket disease and the effects of high altitudes on cattle. This factor favors petitioners.

A footnote in Bittker & Lokken, ¶ 22.5. Activities Not Engaged in for Profit, *Federal Taxation of Income, Estates, and Gifts* (WG&L), provides:

See *Hendricks v. CIR*, 32 F3d 94, 98 (4th Cir. 1994) (physician's farm sustained losses in 20 of 21 years of operation; lack of profit motive evidenced by taxpayer's knowledge "of steps he might have taken, but failed to take, to improve the farm's profitability"); *Holmes v. CIR*, 74 TCM (CCH) 494 (1997) (farm found not to be carried on for profit because, among other things, taxpayers failed to keep records in businesslike way; negligence penalty sustained; extensive analysis); *Elliott v. CIR*, 90 TC 960, 973 (1988), *aff'd* without opinion, 899 F2d 18 (9th Cir. 1990) (Amway distributors not engaged in business for profit where they "made some small modifications in their routine social life [on entering the business], kept cursory notes about their activities, and claimed deductions for the cost of nearly everything they owned or did"; negligence penalty imposed); *Allen v. CIR*, 72 TC 28 (1979) (taxpayers operated ski lodge in businesslike manner, experimenting with different modes of operating it in hope of making profit); *Lyon v. CIR*, 36 TCM (CCH) 979 (1977) (failure to maintain records and unbusinesslike approach; activity not "engaged in for profit"); Lee, *supra* note 8, at 397–407. Compare *Rozzano v. CIR*, 94 TCM (CCH) 29 (2007) (holding horse farm was run for profit, notwithstanding large losses annually for eight years, largely because operation was carried on in business-like manner).

The citation to Lee is to Lee, A Blend of Old Wines in a New Wineskin: Section 183 and Beyond, 29 Tax L. Rev. 347 (1974).

Den Besten v. Commissioner, T.C. Memo. 2019-154, held that the taxpayer's change of operating methods indicated a profit objective:

After his championships in 1997 and 1998, petitioner acquired and remodeled the Yellow Rose, expanding his operation. This significant acquisition enabled him to expand into hosting cutting horse competitions and production sales. It also increased his boarding and training capacities. He sold his seed business in order to increase the effort and time he needed to coordinate these efforts and to train potential foals. The Court concludes these actions are strongly indicative of petitioner's having a profit motive during this timeframe preceding the years in issue. The actions are consistent with an intent to improve profitability through new operating methods.

Even though petitioner owned and operated the Yellow Rose outside the years in issue, he recognized he had to sell it to generate time and capital to save the seed business. Petitioner reduced his operation on the basis of economic realities and entered into a winding-down period with respect to the cutting horse activity. Petitioner's realization he needed to scale down his operation is also indicative of a profit motive.

[1320] *Robison v. Commissioner*, T.C. Memo. 2018-88, included the following reasoning:

S. Robison has a family background in ranching and farming although he had never previously operated a ranch. Petitioners consulted with persons who were knowledgeable about ranching, including a ranch attorney, other ranch owners, trainers and breeders, and their veterinarian. *See Givens v. Commissioner*, T.C. Memo. 1989-529 (a profit objective was indicated where the taxpayer sought and acquired advice in all aspects of Tennessee Walking Horse breeding from experienced owners, trainers, and a veterinarian). Petitioners also sought advice regarding the business elements of starting Robison Ranch from their accountant. In the face of mounting losses, it would have been prudent to seek further business advice; however, we believe this factor favors petitioners.

Den Besten v. Commissioner, T.C. Memo. 2019-154, recognized the taxpayer's demonstrated expertise:

Petitioner has a high level of expertise in the care, training, and competing of cutting horses, including their feeding, breeding, foaling, training, competing, and selling. His efforts resulted in advice, but does not carry on the activity in accordance with such practices, a lack of intent to derive profit may be indicated unless it appears that the taxpayer is attempting to develop new or superior techniques which may result in profits from the activity.[1321]

(3) *The time and effort expended by the taxpayer in carrying on the activity*. The fact that the taxpayer devotes much of his personal time and effort to carrying on an activity, particularly if the activity does not have substantial personal or recreational aspects, may indicate an intention to derive a profit. A taxpayer's withdrawal from another occupation to devote most of his energies to the activity may also be evidence that the activity is engaged in for profit. The fact that the taxpayer devotes a limited amount of time to an activity does not necessarily indicate a lack of profit motive where the taxpayer employs competent and qualified persons to carry on such activity.[1322]

> two champion cutting horses and at least eight futurity prospects. His production sales attracted national attention. He offered purchases by telephone, and consignors traveled to list their horses in his production sales. In addition, he had a network of trainers to assist him. Petitioner had been a respected businessman in a related business for years.

However, *Whatley v. Commissioner*, T.C. Memo. 2021-11 required expertise to be relevant and substantial: Whatley also has no experience operating a timber farm like the one at Sheepdog Farms. We do acknowledge his argument that his foray into the business at the age of 27 should weigh in his favor. But we don't think it should weigh very much—it was over 35 years ago, and his business was different. Sheepdog Farms is reportedly a timber farm. The business Whatley ran as a young man bought and logged timber that was ready to harvest. These businesses may be in the same general field, but timber harvesting and timber growing are not similar enough for us to find that Whatley had experience in the business.[13]

> [13] Whatley also argues that he has experience in the field because he lends money to timber farmers through his bank. We are unconvinced. People don't go to a mechanic's banker to fix their cars - they go to a mechanic.

[1321] A footnote in Bittker & Lokken, ¶ 22.5. Activities Not Engaged in for Profit, *Federal Taxation of Income, Estates, and Gifts* (WG&L), provides:

> See *DeMattia v. CIR*, 75 TCM (CCH) 1903, 1906 (1998) (retired dentist's sponsorship of son's professional golf career not conducted in businesslike manner; no "goals or financial conditions," no prior investigation of profit potential, and no separate records); *Taras v. CIR*, 74 TCM (CCH) 1388, 1395 (1997) ("Petitioners initiated their activity [horse racing] without developing a business plan commensurate with that which would be expected from someone who was motivated primarily by a profit objective"); *Lucid v. CIR*, 73 TCM (CCH) 2892 (1997) (no profit motive for business of selling yachts; no business plan or training or experience in business; negligence penalty sustained); *Benz v. CIR*, 63 TC 375 (1974) (taxpayer was "relative novice"; breeding activity was hobby); Lee, *supra* note 8, at 407–412. *Taras* has been affirmed by an unpublished opinion, 187 F3d 627 (3d Cir. 1999) .

The citation to Lee is to Lee, "A Blend of Old Wines in a New Wineskin: Section 183 and Beyond," 29 Tax L. Rev. 347 (1974). *Ford v. Commissioner*, T.C. Memo. 2018-18, found no profit motive, starting its criticism of the taxpayer:

> She had no expertise in club ownership, maintained inadequate records, disregarded expert business advice, nonchalantly accepted Bell Cove's perpetual losses, and made no attempt to reduce expenses, increase revenue, or improve Bell Cove's overall performance.

[1322] A footnote in Bittker & Lokken, ¶ 22.5. Activities Not Engaged in for Profit, *Federal Taxation of Income, Estates, and Gifts* (WG&L), provides:

> See *Hawkins v. CIR*, 38 TCM (CCH) 469 (1979) (publication of book of poetry not for profit; no evidence of continuous or repeated activity in literary field or intent to write with substantial

(4) *Expectation that assets used in activity may appreciate in value*. The term "profit" encompasses appreciation in the value of assets, such as land, used in the activity. Thus, the taxpayer may intend to derive a profit from the operation of the activity, and may also intend that, even if no profit from current operations is derived, an overall profit will result when appreciation in the value of land used in the activity is realized since income from the activity together with the appreciation of land will exceed

---

> regularity); Lee, *supra* note 8, at 412–416. But see *Cornfeld v. CIR*, 797 F2d 1049, 1052 (DC Cir. 1986) ("to have an honest profit objective a taxpayer need not run the business himself or have expertise in it; it suffices that he engage those who do"); *Nickerson v. CIR*, 700 F2d 402, 407 (7th Cir. 1983) (taxpayer engaged in farming for profit even though he had another full-time job and spent only spare time on farm; taxpayer's efforts were "prodigious" and farm did not provide recreation); *Perry v. CIR*, 74 TCM (CCH) 616 (1997) (taxpayers' horse breeding operation was for profit, even though taxpayers were both employed full-time in other jobs, because they had knowledge and experience needed for success).

The citation to Lee is to Lee, A Blend of Old Wines in a New Wineskin: Section 183 and Beyond, 29 Tax L. Rev. 347 (1974). *Ford v. Commissioner*, T.C. Memo. 2018-18, found no profit motive, concluding its criticism of the taxpayer:

> Owning Bell Cove elevated petitioner's status in the country music community, allowed her to further the careers of young performers, offered her weekly opportunities to interact with country music fans, and satiated her love promoting country music. Petitioner earnestly devoted time and energy to Bell Cove but was primarily motivated by personal pleasure, not profit, and simply used the club's losses to offset her trust and capital gain income. See *Bessenyey v. Commissioner*, 45 T.C. 261, 275 (1965), *aff'd*, 379 F.2d 252 (2d Cir. 1967); sec. 1.183-2(b)(3), (8), (9), Income Tax Regs.

Den Besten v. Commissioner, T.C. Memo. 2019-154, held that the taxpayer's efforts were ample:

> ... When evaluating the time and effort a taxpayer dedicated to horse activities, the relevant inquiry is the amount of time and effort contributed above and beyond the amount generally required to sustain a hobby. *Betts v. Commissioner*, T.C. Memo. 2010-164.
>
> During the years in issue petitioner spent a considerable amount of time breeding approximately 12 mares per season, delivering the foals, and performing veterinary work on his horses as needed. Petitioner had engaged in an extensive stallion service contracts for live cover breeding program, which required vigilance through the mares' breeding cycles and careful physical control of the stallions during mating. Petitioner's dedication to the oversight of the successful breeding program extend well beyond that of a mere hobbyist.
>
> While unforeseen events forced petitioner to scale back his activities, the Court cannot overlook the size and depth of his cutting horse activity leading up to the years in issue.

expenses of operation.[1323] See, however, paragraph (d) of § 1.183-1 for definition of an activity in this connection.[1324]

(5) *The success of the taxpayer in carrying on other similar or dissimilar activities*. The fact that the taxpayer has engaged in similar activities in the past and converted them from unprofitable to profitable enterprises may indicate that he is engaged in the present activity for profit, even though the activity is presently unprofitable.[1325]

[1323] *Robison v. Commissioner*, T.C. Memo. 2018-88, included the following reasoning:

> However, a profit objective may be inferred from such expected appreciation of the activity's assets only where the appreciation exceeds operating expenses and is sufficient to recoup the accumulated losses of prior years. *See Golanty v. Commissioner*, 72 T.C. at 427-428; *Hillman v. Commissioner*, T.C. Memo. 1999-255.
>
> Respondent argues that petitioners' objective must include recoupment of all of Robison Ranch's past losses. This expectation is too high. *See Welch v. Commissioner*, at *35. "An overall profit is present if net earnings and appreciation are sufficient to recoup the losses sustained in the "intervening years: between a given tax year and the time at which future profits were expected." *Helmick v. Commissioner*, T.C. Memo. 2009-220, slip op. at 27 (citing *Bessenyey v. Commissioner*, 45 T.C. 261, 274 (1965), *aff'd*, 379 F.2d 252 (2d Cir. 1967)). Therefore, the question is not whether petitioners would recoup all of Robison Ranch's losses but whether they would recoup the losses between the years in issue and the "hoped-for profitable future." *See id.* at 28.
>
> Petitioners did not provide a valuation of Robison Ranch. There is not enough evidence in the record to determine the current value of or petitioners' adjusted basis in the ranch property, and we are therefore unable to determine the amount of appreciation, if any. Accordingly, this factor is neutral.

[1324] A footnote in Bittker & Lokken, ¶ 22.5. Activities Not Engaged in for Profit, *Federal Taxation of Income, Estates, and Gifts* (WG&L), provides:

> See *Bolaris v. CIR*, 776 F2d 1428 (9th Cir. 1985) (depreciation and operating expense deductions allowed for former principal residence that was rented pending sale; profit motive can exist even if gain on sale qualifies for nonrecognition); *Thompson v. US*, 90-1 USTC ¶ 50,043 (D. Conn. 1989) (in determining whether horse breeding operation was carried on for profit, jury could consider possibility of appreciation in value of land used in operation); *Dickson v. CIR*, 47 TCM (CCH) 509 (1983) (expectation of profit from appreciation in value of sailboat was major factor in finding boat chartering activity was for profit); Lee, *supra* note 8, at 416–418. But see *Jasionowski v. CIR*, 66 TC 312 (1976) (taxpayer's expectation of capital gains upon eventual sale of property not sufficient to supply profit motive for current lease of the property).

The citation to Lee is to Lee, A Blend of Old Wines in a New Wineskin: Section 183 and Beyond, 29 Tax L. Rev. 347 (1974). Another footnote in Bittker & Lokken says:

> See *Landry v. CIR*, 86 TC 1284, 1306 (1986) (rejecting IRS's argument that § 183 applies where, notwithstanding conceded expectation of profit in the long run, intention to profit during the taxable year was lacking; § 183 inapplicable if taxpayer "intended to make a profit within a reasonable time"); *Lemmen v. CIR*, 77 TC 1326 (1981) (*acq*.) (expectation of profit from herd of breeding cattle over long range established).

Ford v. Commissioner, T.C. Memo. 2018-8, at fn 7 cited this regulation to add weight to its conclusion of no profit motive, pointing out:

> Further, Bell Cove's $420,253 of accumulated losses exceeded its $383,900 of appreciation.

[1325] A footnote in Bittker & Lokken, ¶ 22.5. Activities Not Engaged in for Profit, *Federal Taxation of Income, Estates, and Gifts* (WG&L), cites Lee, A Blend of Old Wines in a New Wineskin: Section 183 and Beyond, 29 Tax L. Rev. 347, 418-420 (1974).

After reciting the factors in Reg. § 1.183-2(b), *Barker v. Commissioner*, T.C. Memo. 2018-67, held:

> The totality of the facts and circumstances indicate that petitioner- SoBe's CEO and managing member—operated SoBe as a trade or business with the "actual and honest objective of making

(6) *The taxpayer's history of income or losses with respect to the activity*. A series of losses during the initial or start-up stage of an activity may not necessarily be an indication that the activity is not engaged in for profit. However, where losses continue to be sustained beyond the period which customarily is necessary to bring the operation to profitable status such continued losses, if not explainable, as due to customary business risks or reverses, may be indicative that the activity is not being engaged in for profit.[1326] If losses are sustained because of unforeseen or fortuitous

---

a profit." See *Osteen v. Commissioner*, 62 F.3d at 358. Petitioner had prior business successes in the music industry - he founded Peaches & Herb and co-produced a Grammy-winning song for Gladys Knight & the Pips - and he ran successful defense contracting businesses, having helped to turn one of them around after several years without a profit. Petitioner leveraged his prior experience and contacts in the music industry as he prepared for SoBe's formation and he ran SoBe in a businesslike manner, working there full time. He also devoted significant capital to make it a profitable business. While SoBe was not profitable from its founding in 2002 through 2011 - nor, indeed, through the time of trial - petitioner testified that SoBe positioned itself well to make a profit by amassing a catalog of songs that it has been able to monetize. Petitioner also convincingly testified about the turmoil in the music industry and the difficulties faced by artists and producers over the years in issue.

The fact that petitioner's son, Yannique, was one of SoBe's signed artists and that SoBe had advanced him the costs of recording, producing, and promoting his music does not mean that SoBe was merely a vehicle to fund Yannique's musical aspirations or that SoBe had no profit objective. SoBe had other artists; it did not devote most of its resources to Yannique. We also conclude that the other facts favoring characterization as a hobby, such as the fact that petitioner enjoyed the creative aspects of the music industry and had income from other sources and that SoBe had yet to make a profit as of trial, are outweighed by the facts indicating a profit motive. Thus, we conclude for years 2003 through 2011 that SoBe is a trade or business and is eligible to claim deductions under section 162.

Den Besten v. Commissioner, T.C. Memo. 2019-154, discussed how experience in one business informed his conduct of the activity in question:

A taxpayer's success in other business ventures may indicate that the taxpayer has the entrepreneurial skills and determination to succeed in subsequent endeavors. This in turn may help demonstrate that his present objective is profit. Sec. 1.183-2(b)(5), Income Tax Regs.; see also *Rabinowitz v. Commissioner*, T.C. Memo. 2005-188; *Daugherty v. Commissioner*, T.C. Memo. 1983-188. A court can infer that a taxpayer's diligence, initiative, foresight, and other qualities will generally lead to success in other business activities if he has demonstrated those qualities by starting his own business and turning that business into a relatively large and profitable enterprise. See *Daugherty v. Commissioner*, T.C. Memo. 1983-188.

Petitioner successfully operated his seed business. In 2002 he sold the business to his son for approximately $4.3 million. After his son encountered financial difficulties, petitioner returned to the seed business once again, turning it into a profitable business.

The cutting horse activity is altogether different from the seed business, but the potential consumer audience in the agricultural setting is substantially similar. Petitioner advertised both businesses to a joint audience at horse competitions. He was using the business acumen acquired from operating the seed business to grow his brand and cutting horse activity. Because petitioner was successful in the seed business, the Court finds this factor favors his having a profit objective.

[1326] *Robison v. Commissioner*, T.C. Memo. 2018-88, included the following reasoning:

Petitioners realized no profits whatsoever in 16 years of engaging in their ranching activity…. the years in issue are beyond the startup stage.

Further, despite reduced expenses and increased profits during the years in issue, petitioners produced no detailed or concrete plans as to how to further reduce their losses or as to when they expect to make a profit. The possibility of a speculative profit is insufficient to outweigh the absence of profits for a sustained period of years. *See Chandler v. Commissioner*, T.C.

circumstances which are beyond the control of the taxpayer, such as drought, disease, fire, theft, weather damages, other involuntary conversions, or depressed market conditions, such losses would not be an indication that the activity is not engaged in for profit. A series of years in which net income was realized would of course be strong evidence that the activity is engaged in for profit.[1327]

(7) *The amount of occasional profits, if any, which are earned*. The amount of profits in relation to the amount of losses incurred, and in relation to the amount of the taxpayer's investment and the value of the assets used in the activity, may provide useful criteria in determining the taxpayer's intent. An occasional small profit from an activity generating large losses, or from an activity in which the taxpayer has made a large investment, would not generally be determinative that the activity is engaged in for profit. However, substantial profit, though only occasional, would generally be indicative that an activity is engaged in for profit, where the investment or losses are comparatively small. Moreover an opportunity to earn a substantial ultimate profit in a highly speculative venture is ordinarily sufficient to indicate that the activity is engaged in for profit even though losses or only occasional small profits are actually generated.[1328]

(8) *The financial status of the taxpayer*. The fact that the taxpayer does not have substantial income or capital from sources other than the activity may indicate that an activity is engaged in for profit. Substantial income from sources other than the activity (particularly if the losses from the activity generate substantial tax benefits)

Memo. 2010-92 (the possibility of a speculative profit did not outweigh more than 20 years of losses reported for the taxpayer's horse activity). This factor strongly favors respondent.

[1327] A footnote in Bittker & Lokken, ¶ 22.5. Activities Not Engaged in for Profit, *Federal Taxation of Income, Estates, and Gifts* (WG&L), provides:

> See *Taras v. CIR*, 74 TCM (CCH) 1388, 1395 (1997) ("Throughout all the years of continuous losses, petitioners did not materially alter their mode of operation"); *Allen v. CIR*, 72 TC 28 (1979) (ski lodge's losses explained by market saturation, low snowfall, and gasoline shortages); Lee, *supra* note 8, at 420–428; infra ¶ 22.5.5 (presumption arising from two successful years). Taras has been affirmed by an unpublished opinion, 99-1 USTC ¶ 50,489 (3d Cir. 1999). But see *Rabinowitz v. CIR*, 90 TCM (CCH) 113, 121 (2005) (finding charter aircraft business was carried on for profit, notwithstanding 12 successive years of losses, because taxpayers "used their considerable business skills to attempt to make the business profitable" and losses for later periods resulted from unforeseen factors); *Burrus v. CIR*, 86 TCM (CCH) 429, 439 (2003) (finding "actual and honest intent to profit from" cattle raising, even though activity generated losses exceeding revenues for all of six years before court and four succeeding years; "such losses are consistent with a startup period inherent in herd building and therefore do not necessarily indicate a lack of profit motive").

The citation to Lee is to Lee, "A Blend of Old Wines in a New Wineskin: Section 183 and Beyond," 29 Tax L. Rev. 347 (1974).

[1328] A footnote in Bittker & Lokken, ¶ 22.5. Activities Not Engaged in for Profit, *Federal Taxation of Income, Estates, and Gifts* (WG&L), cites Lee, A Blend of Old Wines in a New Wineskin: Section 183 and Beyond, 29 Tax L. Rev. 347, 428-431 (1974).

may indicate that the activity is not engaged in for profit[1329] especially if there are personal or recreational elements involved.[1330]

(9) *Elements of personal pleasure or recreation*. The presence of personal motives in carrying on of an activity may indicate that the activity is not engaged in for profit, especially where there are recreational or personal elements involved. On the other hand, a profit motivation may be indicated where an activity lacks any appeal other than profit. It is not, however, necessary that an activity be engaged in with the exclusive intention of deriving a profit or with the intention of maximizing profits. For example, the availability of other investments which would yield a higher return, or which would be more likely to be profitable, is not evidence that an activity is not engaged in for profit. An activity will not be treated as not engaged in for profit merely because the taxpayer has purposes or motivations other than solely to make a profit. Also, the fact that the taxpayer derives personal pleasure from engaging in the activity is not sufficient to cause the activity to be classified as not engaged in for profit if the activity is in fact engaged in for profit as evidenced by other factors whether or not listed in this paragraph.[1331]

Reg. § 1.183-2(c) provides:

> *Example (1)*. The taxpayer inherited a farm from her husband in an area which was becoming largely residential, and is now nearly all so. The farm had never made a profit before the taxpayer inherited it, and the farm has since had substantial losses in each

---

[1329] *Robison v. Commissioner*, T.C. Memo. 2018-88, included the following reasoning:

> A taxpayer with substantial income unrelated to the activity can more readily afford a hobby . *See Wesley v. Commissioner*, T.C. Memo. 2007-78. Petitioners' substantial income from S. Robison's career has allowed them to continue their ranching activity in spite of 16 years of losses. Further, the activity has also generated tax savings in the form of net losses that offset that income, resulting in much smaller after-tax burden for the years in issue. This factor favors respondent.

[1330] A footnote in Bittker & Lokken, ¶ 22.5. Activities Not Engaged in for Profit, *Federal Taxation of Income, Estates, and Gifts* (WG&L), provides:

> See *Hendricks v. CIR*, 32 F3d 94 (4th Cir. 1994) (physician's substantial income from medical practice was evidence that farm, which consistently operated at loss, was not for profit); *Jasionowski v. CIR*, 66 TC 312 (1976) (taxpayer's substantial income from other sources and other rental experience indicated that lease under which substantial losses, as distinguished from usual start-up losses, would be incurred for several years was not for profit); *Hurd v. CIR*, 37 TCM (CCH) 499 (1978) (substantial outside income enabled taxpayers to absorb large losses from ranch; held, not for profit); Lee, *supra* note 8, at 431–436. Compare *Ranciato v. CIR*, 52 F3d 23, 26 (2d Cir. 1995) (Tax Court's finding of lack of profit motive reversed because court failed to consider all relevant factors, including that taxpayer was "a solid middle-class wage earner, not an individual of wealth whose unprofitable extracurricular activities would suggest an effort to shelter unrelated income through deliberate losses").

The citation to Lee is to Lee, A Blend of Old Wines in a New Wineskin: Section 183 and Beyond, 29 Tax L. Rev. 347 (1974). Being a trust fund baby is not helpful; see *Ford* in fn 1322.

[1331] A footnote in Bittker & Lokken, ¶ 22.5. Activities Not Engaged in for Profit, *Federal Taxation of Income, Estates, and Gifts* (WG&L), provides:

> See *Allen v. CIR*, 72 TC 28 (1979) (taxpayers never used ski lodge for personal recreation); Lee, *supra* note 8, at 436–444. See *McCarthy v. CIR*, 79 TCM (CCH) 1912, 1916 (2000) ("motorcross racing activity was inherently recreational and was conducted as an activity to be shared by father and son").

The citation to Lee is to Lee, A Blend of Old Wines in a New Wineskin: Section 183 and Beyond, 29 Tax L. Rev. 347 (1974). For an example of activity that elevated the taxpayer's social profile, see *Ford* in fn 1322.

year. The decedent from whom the taxpayer inherited the farm was a stockbroker, and he also left the taxpayer substantial stock holdings which yield large income from dividends. The taxpayer lives on an area of the farm which is set aside exclusively for living purposes. A farm manager is employed to operate the farm, but modern methods are not used in operating the farm. The taxpayer was born and raised on a farm, and expresses a strong preference for living on a farm. The taxpayer's activity of farming, based on all the facts and circumstances, could be found not to be engaged in for profit.

Example (2). The taxpayer is a wealthy individual who is greatly interested in philosophy. During the past 30 years he has written and published at his own expense several pamphlets, and he has engaged in extensive lecturing activity, advocating and disseminating his ideas. He has made a profit from these activities in only occasional years, and the profits in those years were small in relation to the amount of the losses in all other years. The taxpayer has very sizable income from securities (dividends and capital gains) which constitutes the principal source of his livelihood. The activity of lecturing, publishing pamphlets, and disseminating his ideas is not an activity engaged in by the taxpayer for profit.

Example (3). The taxpayer, very successful in the business of retailing soft drinks, raise dogs and horses. He began raising a particular breed of dog many years ago in the belief that the breed was in danger of declining, and he has raised and sold the dogs in each year since. The taxpayer recently began raising and racing thoroughbred horses. The losses from the taxpayer's dog and horse activities have increased in magnitude over the years, and he has not made a profit on these operations during any of the last 15 years. The taxpayer generally sells the dogs only to friends, does not advertise the dogs for sale, and shows the dogs only infrequently. The taxpayer races his horses only at the "prestige" tracks at which he combines his racing activities with social and recreational activities. The horse and dog operations are conducted at a large residential property on which the taxpayer also lives, which includes substantial living quarters and attractive recreational facilities for the taxpayer and his family. Since (i) the activity of raising dogs and horses and racing the horses is of a sporting and recreational nature, (ii) the taxpayer has substantial income from his business activities of retailing soft drinks, (iii) the horse and dog operations are not conducted in a businesslike manner, and (iv) such operations have a continuous record of losses, it could be determined that the horse and dog activities of the taxpayer are not engaged in for profit.

Example (4). The taxpayer inherited a farm of 65 acres from his parents when they died 6 years ago. The taxpayer moved to the farm from his house in a small nearby town, and he operates it in the same manner as his parents operated the farm before they died. The taxpayer is employed as a skilled machine operator in a nearby factory, for which he is paid approximately $8,500 per year. The farm has not been profitable for the past 15 years because of rising costs of operating farms in general, and because of the decline in the price of the produce of this farm in particular. The taxpayer consults the local agent of the State agricultural service from time-to-time, and the suggestions of the agent have generally been followed. The manner in which the farm is operated by the taxpayer is substantially similar to the manner in which farms of similar size, and which grow similar crops in the area are operated. Many of these other farms do not make profits. The taxpayer does much of the required labor around the farm himself, such as fixing fences, planting, crops, etc. The activity of farming could be found, based on all the facts and circumstances, to be engaged in by the taxpayer for profit.

> *Example (5)*. A, an independent oil and gas operator, frequently engages in the activity of searching for oil on undeveloped and unexplored land which is not near proven fields. He does so in a manner substantially similar to that of others who engage in the same activity. The changes, based on the experience of A and others who engaged in this activity, are strong that A will not find a commercially profitable oil deposit when he drills on land not established geologically to be proven oil bearing land. However, on the rare occasions that these activities do result in discovering a well, the operator generally realizes a very large return from such activity. Thus, there is a small chance that A will make a large profit from his oil exploration activity. Under these circumstances, A is engaged in the activity of oil drilling for profit.
>
> *Example (6)*. C, a chemist, is employed by a large chemical company and is engaged in a wide variety of basic research projects for his employer. Although he does no work for his employer with respect to the development of new plastics, he has always been interested in such development and has outfitted a workshop in his home at his own expense which he uses to experiment in the field. He has patented several developments at his own expense but as yet has realized no income from his inventions or from such patents. C conducts his research on a regular, systematic basis, incurs fees to secure consultation on his projects from time to time, and makes extensive efforts to "market" his developments. C has devoted substantial time and expense in an effort to develop a plastic sufficiently hard, durable, and malleable that it could be used in lieu of sheet steel in many major applications, such as automobile bodies. Although there may be only a small chance that C will invent new plastics, the return from any such development would be so large that it induces C to incur the costs of his experimental work. C is sufficiently qualified by his background that there is some reasonable basis for his experimental activities. C's experimental work does not involve substantial personal or recreational aspects and is conducted in an effort to find practical applications for his work. Under these circumstances, C may be found to be engaged in the experimental activities for profit.

Den Besten v. Commissioner, T.C. Memo. 2019-154, summarized the profit motive inquiry (citations moved to footnote):[1332]

> Breeding, raising, training, and showing horses may be an activity entered into for profit pursuant to section 162. Such a determination will depend upon whether the taxpayer engaged in the activity with the primary purpose of making a profit. A reasonable expectation of profit is not required, but the facts and circumstances must indicate that the taxpayer entered into the activity or continued the activity with the actual and honest objective of making a profit. Evidence from years outside the years in issue can be relevant if it provides context to evaluate the taxpayer's overall requisite profit motive.

If a taxpayer conducts business through many entities and also conducts related business outside of those entities, the Court of Claims has held that the taxpayer may establish a "unified business enterprise" that supports finding that the outside related business has the requisite

---

Commissioner*, 66 T.C. 312, 319 (1976); Reg. § 1.183-2(a); *Dreicer v. Commissioner*, 78 T.C. 642, 645 (1982), *aff'd* without published opinion, 702 F.2d 1205 (D.C. Cir. 1983); *Feldman v. Commissioner*, T.C. Memo. 1986-287, 1986 Tax Ct. Memo LEXIS 321, at *16; *Donoghue v. Commissioner*, T.C. Memo. 2019-71, at *23; and *Smith v. Commissioner*, T.C. Memo. 1993-140 (considering profits and losses in subsequent years to have probative, although not determinative, significance).

profit motive.[1333] CCA 201747006, by Brad Poston, asserts that the Court of Claims' decision undermines the separateness of S corporations from their owners and should not be followed.[1334] I do not view that to be the case; I view the "unified business enterprise" theory as merely helping establish motive. However, expect the IRS to strongly challenge the "unified business enterprise," as it did successfully in a taxpayer's very weak case decided in 2016.[1335]

Code § 183(b) allows:

> (1) the deductions which would be allowable under this chapter for the taxable year without regard to whether or not such activity is engaged in for profit, and
>
> (2) a deduction equal to the amount of the deductions which would be allowable under this chapter for the taxable year only if such activity were engaged in for profit, but only to the extent that the gross income derived from such activity for the taxable year exceeds the deductions allowable by reason of paragraph (1).

(References above and below to "this chapter" or "chapter 1" are to Code §§ 1-1400U-3.)

Reg. § 1.183-1(b)(1) elaborates on allowing deductions:

> *Manner and extent*. If an activity is not engaged in for profit, deductions are allowable under section 183(b) in the following order and only to the following extent:
>
> (i) Amounts allowable as deductions during the taxable year under chapter 1 of the Code without regard to whether the activity giving rise to such amounts was engaged in for profit are allowable to the full extent allowed by the relevant sections of the Code, determined after taking into account any limitations or exceptions with respect to the allowability of such amounts. For example, the allowability-of-interest expenses incurred with respect to activities not engaged in for profit is limited by the rules contained in section 163(d).
>
> (ii) Amounts otherwise allowable as deductions during the taxable year under chapter 1 of the Code, but only if such allowance does not result in an adjustment to the basis of property, determined as if the activity giving rise to such amounts was engaged in for profit, are allowed only to the extent the gross income attributable to such activity

---

[1333] *Morton v. United States*, 98 Fed. Cl. 596 (2011). The court did not seem aware that regulations addressed how to find a profit motive under Code § 183.

[1334] The CCA opens with:

> In conference calls on 7/20/17 and 8/28/17, we discussed with your office the holding of *Peter Morton v. U.S.*, 98 Fed. Cl. 596 (2011), and its effect of excluding wholly-owned or majority owned S corporations from precedent set by *Moline Properties v. Commissioner*, 63 S.Ct. 1132 (1943). Based upon the authorities and analysis below, we conclude the Service should reject the *Morton* holding and continue to assert that *Moline Properties* is applicable to S corporations, regardless of degree of ownership.

Of course, both *Moline* and another case the CCA cited, *Deputy v. DuPont*, 308 U.S. 488 (1940), long predate the idea of an S election. However, the CCA is quite correct that one cannot simply disregard an S corporation; for example, see parts II.G.24 Taxing Entity or Individual Performing Services and II.L.5 Self-Employment Tax: Partnership with S Corporation Blocker.

[1335] *Steinberger v. Commissioner*, T.C. Memo. 2016-104, rejecting a doctor's alleged business use of an airplane to travel in his business when his flying the airplane did not save the doctor any significant time over driving.

exceeds the deductions allowed or allowable under subdivision (i) of this subparagraph.

(iii) Amounts otherwise allowable as deductions for the taxable year under chapter 1 of the Code which result in (or if otherwise allowed would have resulted in) an adjustment to the basis of property, determined as if the activity giving rise to such deductions was engaged in for profit, are allowed only to the extent the gross income attributable to such activity exceeds the deductions allowed or allowable under subdivisions (i) and (ii) of this subparagraph. Deductions falling within this subdivision include such items as depreciation, partial losses with respect to property, partially worthless debts, amortization, and amortizable bond premium.

Special rules apply to basis adjustments for deductions allowed under Reg. § 1.183-1(b)(1)(iii).[1336]

Code § 183(b)(2) and Reg. § 1.183-1(b)(1)(ii) provide a benefit to individuals that is not available to C corporations – deducting expenses that would be business expenses if the activity had been engaged in for profit. On the other hand, all expenses under Code § 183(b)(1) and Reg. § 1.183-1(b)(1)(i) would have been allowable to a corporation anyway, and all expenses allowable to an individual under Code § 183(b) and Reg. § 1.183-1(b)(1) would be subject to the limitations described in part II.G.4.n Itemized Deductions, which might very well eliminate their benefit. Comparing the choice between C corporation and an individual (including through a partnership or S corporation):

- Both require the same profit motive to qualify under Code § 162 as a threshold inquiry.

- Code § 183 provides an additional chance for an individual to prove profit motive, which opportunity is not available to a C corporation. Whether this additional opportunity makes a difference depends on the facts and circumstances.

- Would being an entity make a difference? When testing business purpose, one would test the entity's intent[1337] rather than the individual's. When looking at an individual's business purpose, one would compare that activity to the individual's other activities. An individual

[1336] Reg. § 1.183-1(b)(2), "Rule for deductions involving basis adjustments," provides:
(i) *In general*. If deductions are allowed under subparagraph (1)(iii) of this paragraph, and such deductions are allowed with respect to more than one asset, the deduction allowed with respect to each asset shall be determined separately in accordance with the computation set forth in subdivision (ii) of this subparagraph.
(ii) *Basis adjustment fraction*. The deduction allowed under subparagraph (1)(iii) of this paragraph is computed by multiplying the amount which would have been allowed, had the activity been engaged in for profit, as a deduction with respect to each particular asset which involves a basis adjustment, by the basis adjustment fraction—
(a) The numerator of which is the total of deductions allowable under subparagraph (1)(iii) of this paragraph, and
(b) The denominator of which is the total of deductions which involve basis adjustments which would have been allowed with respect to the activity had the activity been engaged in for profit. The amount resulting from this computation is the deduction allowed under subparagraph (1)(iii) of this paragraph with respect to the particular asset. The basis of such asset is adjusted only to the extent of such deduction.

[1337] For testing a partnership's intent, see fn. 1306 in part II.G.4.l.i.(a) "Trade or Business" Under Code § 162; note that adding a service partner might complicate funding any losses. For testing an S corporation's intent, see fn. 1340; I have not looked to see the rule for Code § 162 absent Code § 183.

who is establishing a side business may consider interposing an entity that is not disregarded between the business and the individual, so that profit motive can be tested solely by reference to the entity's activities. My sense is that C corporations are tested for profit motive only when using a side deal to shelter income from their core activity and that they are not scrutinized for profit motive for their core activity; however, Code § 162 does not draw such a distinction, so one cannot rely on that distinction as a matter of law.

- If a profit motive cannot be established:
  - Code § 183(b)(1) and Reg. § 1.183-1(b)(1)(i) allows individuals to deduct whatever they could have deducted absent a profit motive, and C corporations have the same benefit. However, limitations on using itemized deductions may prevent these deduction from generating a tax benefit, whereas a C corporation does not have the same limits.
  - Code § 183(b)(2) and Reg. § 1.183-1(b)(1)(ii) provide a benefit to individuals that is not available to C corporations – deducting expenses that would be business expenses if the activity had been engaged in for profit. However, limitations on using itemized deductions may prevent these deduction from generating a tax benefit.

In applying Code § 183, gross income derived from an activity not engaged in for profit includes the total of all gains from the sale, exchange, or other disposition of property, and all other gross receipts derived from such activity.[1338]

[1338] Reg. § 1.183-1(e), which further provides:

> Such gross income shall include, for instance, capital gains, and rents received for the use of property which is held in connection with the activity. The taxpayer may determine gross income from any activity by subtracting the cost of goods sold from the gross receipts so long as he consistently does so and follows generally accepted methods of accounting in determining such gross income.

In the case of a partnership, Code § 183(b) is applied at the partnership level and can be a helpful relief valve.[1339] Also, Code § 183 is applied at the corporate level in determining the allowable deductions of an S corporation.[1340]

II.G.4.l.i.(d). Whether Managing Investments Constitutes a Trade or Business

This part II.G.4.l.i.(d) reviews whether managing one's own investments and whether managing others' investments constitutes a trade or business, expenses of which are deductible under Code § 162. However, C corporations do not appear to be subjected to these standards,[1341] so this discussion appears to apply only to other taxpayers.

"No matter how large the estate or how continuous or extended the work required may be," managing one's own portfolio of marketable securities does not constitute a trade or business. *Higgins v. Commissioner*, 312 U.S. 212 (1941).[1342]

Congress enacted Code § 212 to provide relief for taxpayers caught by *Higgins*.[1343] In denying the taxpayer a business bad debt for loans to corporations in which the taxpayer worked full-time, *Whipple v. Commissioner*, 373 U.S. 193 (1963), stated:

> Devoting one's time and energies to the affairs of a corporation is not of itself, and without more, a trade or business of the person so engaged. Though such activities may produce income, profit or gain in the form of dividends or enhancement in the value of an investment, this return is distinctive to the process of investing and is generated by the

---

[1339] *Brannen v. Commissioner*, 78 T.C. 471 (1982) (reviewed decision), held:

> Since the partnership is not entitled to any deductions under section 162, the activity of the partnership constitutes one "not engaged in for profit" as defined in section 183(c). We therefore turn to section 183 to determine the amount, if any, of deductions which are otherwise allowable under section 183(b). We are again faced with the question of whether the allowance provision, section 183(b), is to be applied at the partnership or partner level. For the many reasons stated above, we conclude that section 183(b) should be applied at the partnership level. See sec. 703(a); sec. 1.703-1(a), Income Tax Regs.; *Hager v. Commissioner*, *supra* at 788. Accordingly, as the partnership did not report any deductions in 1975 which are otherwise allowed without regard to whether the activity is engaged in for profit, the partnership is entitled to the deductions claimed, without inclusion in basis of the nonrecourse note in the amount of $1,400,000, but only to the extent of the gross income derived from the activity in 1975 in the amount of $679. Sec. 183(b)(2). The result of applying section 183(b)(2) is that the partnership in 1975 had income of zero; that is, it had no profit and it had no loss. Therefore, petitioner had no distributive share of income or loss from Britton Properties.[17]
>
> [17] Since petitioner's pro rata share of the partnership's income of $679 was included by respondent in his 1975 income, the result of our holding is that respondent erred in increasing petitioner's income, as reported, by $34 of partnership income but did not err in disallowing petitioner's claimed partnership loss of $15,751.

[1340] Reg. § 1.183-1(f).

[1341] See text accompanying fn 1307 in part II.G.4.l.i.(a) "Trade or Business" Under Code § 162.

[1342] See part II.G.4.l.i.(a) "Trade or Business" Under Code § 162, in which fn 1298 discusses the case's weight and continued validity.

[1343] *Whipple v. Commissioner*, 373 U.S. 193 (1963), stated:

> In response to the *Higgins* case and to give relief to *Higgins*-type taxpayers, see H.R. Rep. No. 2333, 77th Cong., 2d Sess. 46, § 23(a) was amended not by disturbing the Court's definition of "trade or business" but by following the pattern that had been established since 1916 of "[enlarging] the categories of incomes with reference to which expenses were deductible," *McDonald v. Commissioner*, 323 U.S. 57, 62; *United States v. Gilmore*, 372 U.S. 39, 45, to include expenses incurred in the production of income.

successful operation of the corporation's business as distinguished from the trade or business of the taxpayer himself. When the only return is that of an investor, the taxpayer has not satisfied his burden of demonstrating that he is engaged in a trade or business since investing is not a trade or business and the return to the taxpayer though substantially the product of his services, legally arises not from his own trade or business but from that of the corporation. Even if the taxpayer demonstrates an independent trade or business of his own, care must be taken to distinguish bad debts losses arising from his own business and those actually arising from activities peculiar to an investor concerned with, and participating in, the conduct of the corporate business.

Managing investments for one's self, wife, and three children without compensation did not constitute a trade or business in *Beals v. Commissioner*, T.C. Memo. 1987-171. Although *Beals* acknowledged that being a day-trader may be a trade or business,[1344] the taxpayer's full-time efforts towards managing investments did not constitute day trading and therefore did not constitute a trade or business.[1345]

Whether trading commodities was a trade or business has been the subject of attempts to tax nonresident aliens, who were taxed when the trading rose to the level of a trade or business[1346]

[1344] The court noted:

> On the other hand, the Court has recognized that a full-time trader of securities may be in a trade or business. *Snyder v. Commissioner*, 295 U.S. 134, 139 (1935).
>
> In *Liang v. Commissioner*, 23 T.C. 1040 (1955), we had to distinguish between an investor and a trader; we observed:
>
> > The distinction between an investment account and a trading account is that in the former, securities are purchased to be held for capital appreciation and income, usually without regard to short-term developments that would influence the price of the securities on the daily market. In a trading account, securities are bought and sold with reasonable frequency in an endeavor to catch the swings in the daily market movements and profit thereby on a short-term basis. [23 T.C. at 1043.]
>
> The taxpayer's agent "never acquired any hedges; never made short sales; and never purchased any 'puts' or 'calls'." 23 T.C. at 1044. We held that the primary objective of the activity in question "was that of an investment account established to provide a reliable source of income." 23 T.C. at 1045.
>
> More recently, in *Purvis v. Commissioner*, 530 F.2d 1332 (9th Cir. 1976), *affg.* a Memorandum Opinion of this Court, the Court of Appeals for the Ninth Circuit applied the test of *Liang v. Commissioner*, *supra*, and concluded that the taxpayer was investing, not trading. The court noted:
>
> > From 1963 to 1968 petitioner engaged in only 75 sales of securities and ten short-term commodities sales. Of these, 31 involved stock which had been held for more than six months. A substantial number involved shares which petitioner admits were held as investments, or which were held for periods exceeding three years, indicating that they were investments. [530 F.2d at 1334.]

[1345] The court held:

> In the case before us, the petitioner makes no claim that he was a trader, and the evidence does not reveal any pattern of trading: his investments changed very little from year to year, and he reported only small capital transactions each year. To support his position, he relies on his investment activities. It appears that the petitioner was not a mere passive investor; he actively investigated and followed the investments made by him and his family. Nevertheless, it is well settled that the management of investments, despite the extent and scope of such activities, is not a trade or business for tax purposes. *Whipple v. Commissioner*, *supra*; *Higgins v. Commissioner*, *supra*. Consequently, we hold that the petitioner was not engaged in a trade or business during the years at issue.

[1346] *Adda v. Commissioner*, 10 T.C. 273, 277 (1948), the Official Tax Court Syllabus to which said:

and were not taxed when it didn't. *Liang v. Commissioner*, 23 T.C. 1040 (1955), stated in its Official Tax Court Syllabus:

> Petitioner, a nonresident alien whose securities were managed primarily for investment purposes by a resident commission agent, held, on facts, not subject to tax on capital gains as not being engaged in a trade or business within the United States under section 211(b), Internal Revenue Code of 1939.

The court began its description of the case:

> Petitioner, a nonresident alien, was not present in this country in 1946 nor, apparently, at any other time after he entered into the agency agreement in 1932. He left the management of his considerable account entirely to the discretion of his agent. The latter invested petitioner's funds in stocks and securities. He never acquired any hedges; never made short sales; and never purchased "puts" or "calls." His commission in excess of a fixed salary was based on total earnings of the account, regardless of source.
>
> Purchase and sale activity in the account during 1946, the year in controversy, and during 1940, which far exceeded such activity in other years, is adequately explained by transitional changes in the industries represented by the securities immediately before and after American participation in World War II, when increased trading activity was not unusual in the routine conservation and management of investment portfolios. And, in spite of increased activity, even during the year in controversy the average holding period of the securities sold was 5.8 years. More than 90 per cent of the gross gain was derived from the sale of securities held for more than 2 years; and more than 40 per cent of the gross gain was realized from the sale of securities held for more than 5 years. The absence of frequent short-term turnover in petitioner's portfolio negatives the conclusion that these securities were sold as part of a trading operation rather than as investment activity.

In finding for the taxpayer that the taxpayer had not engaged in a trade or business, the court reasoned:

> Petitioner, a nonresident alien, empowered his brother, who resided in the United States, to deal in commodity futures at his own discretion through resident brokers in the United States for petitioner's account. Petitioner's brother exercised this authority in 1940 and 1941, trading in substantial amounts. *Held*, petitioner was engaged in trade or business in the United States and is taxable as a nonresident alien so engaged; *held*, further, that the petitioner is entitled to a net short term capital loss carry-over from 1940 to 1941.

The court reasoned:

> Trading in commodities for one's own account for profit may be a "trade or business" if sufficiently extensive. *Fuld v. Commissioner*, 139 Fed.(2d) 465; *Norbert H. Wiesler*, 6 T.C. 1148; *affirmed* without discussion of this point, 161 Fed.(2d) 997. The respondent determined that the petitioner was engaged in trade or business in the United States. While the number of transactions or the total amount of money involved in them has not been stated, it is apparent that many transactions were effected through different brokers, several accounts were maintained, and gains and losses in substantial amounts were realized. This evidence shows that the trading was extensive enough to amount to a trade or business, and the petitioner does not contend, nor has he shown, that the transactions were so infrequent or inconsequential as not to amount to a trade or business.

> Whether activities undertaken in connection with investments are sufficiently extensive to constitute a trade or business is a question to be decided on the particular facts. *Higgins v. Commissioner*, 312 U.S. 212. In *Fernand C. A. Adda*, 10 T.C. 273, *affirmed* per curiam (C.A. 4) 171 F.2d 457, certiorari denied 336 U.S. 952, extensive transactions in commodities which do not pay dividends and could have resulted in profit only by means of the gains on the purchases and sales were found to constitute a trade or business. For similar reasons *Commissioner v. Nubar*, (C.A. 4) 185 F.2d 584, reversing 13 T.C. 566, certiorari denied 341 U.S. 925, held that transactions in commodities and securities where the taxpayer was himself present in the United States throughout the period were sufficient to constitute the conduct of a trade or business.

The present situation is quite different. Petitioner never having been present in the United States, it is only through the activity of his agent that he could be held to have conducted a business. For the solution of this problem we look not solely to the year in controversy but to the entire agency and particularly to the 7 years shown by the record. These figures appearing in our findings satisfy us that the primary, if not the sole objective, was that of an investment account established to provide a reliable source of income. In fact in 4 of the 7 years the capital transactions resulted in losses rather than gains and only in the year for which respondent has determined the deficiency were the gains of any considerable consequence.

Day-trading on margin, with annual transaction volume of more than half of the taxpayer's net worth,[1347] was held to be a trade or business for purposes of the Code § 166 bad debt rules.[1348]

[1347] *Levin v. U.S.*, 597 F.2d 760 (Ct. Cl. 1979), found that the taxpayer:

> … devoted virtually all his working time to the purchase and sale of securities. His initial investments made during and immediately following World War II brought him substantial profits. Although he frequently purchased heavily in the stock of one company or another, he was generally active in purchases and sales of stocks of various corporations. For instance, in 1961, the year of the indebtedness note in question, he conducted 332 transactions which represented the transfer of 112,400 shares with a total value of $3,452,125.
>
> Routinely taxpayer visited the corporations in which he was interested and talked to company officers, traveling out of town for these visits when necessary. His days were frequently spent in the brokerage houses on Wall Street; he ate lunch with brokers at the Stock Exchange Club; and he attended lectures sponsored by securities analysts when the topics were of interest. He maintained ledger sheets of all his stock transactions, attended stockholders' meetings, and generally spent his time purchasing and selling securities on his own account.
>
> It was taxpayer's practice to purchase to the extent of allowable margin. He traded with four to six brokerage houses in order to disperse his large number of shares in any one corporation, as many brokers prohibited concentrated holdings in their margin accounts. In addition, this practice avoided pressure to liquidate his entire investment in a particular company to meet a single broker's margin call. Prior to the market decline in late 969 and early 1970, taxpayer was exceedingly successful in his stock transactions. In 1968, for instance, he held stock valued at nearly $8 million with a margin debt of approximately $3 million, leaving him a net worth of about $5 million. His only other source of income was $5,000 in salary for sitting on the board of directors of a small oil-producing company.

[1348] The court held:

> Although the Supreme Court has yet to find a taxpayer properly characterized as a securities "trader," it is clear such a section 166 "businessman" exists, given the proper facts. *Higgins v. Commissioner*, 312 U.S. 212 (1941); *Snyder v. Commissioner*, 295 U.S. 134 (1935); *Commissioner v. Nubar*, 185 F.2d 584 (4th Cir. 1950). By contrast the activity of a mere "invest[or] is not a trade or business." *Whipple v. Commissioner*, 373 U.S. 193, 202 (1963). Neither the code, the regulations, nor the courts have yet provided a precise definition as to when an individual taxpayer's behavior is that of a trader rather than an investor in corporate stocks.

Averaging 15 trades per year, of which a substantial portion were long-term investments, was not a trade or business.[1349] A "taxpayer may be a dealer as to some securities and at the same time hold other securities as a trader or investor on his own account and not for resale to customers."[1350]

Moller v. U.S., 721 F.2d 810 (Fed. Cir 1983), explained:[1351]

> According to *Higgins*, a factual analysis in each case is required to determine if a particular taxpayer's securities activities rise to the level of "carrying on a business." 312 U.S. at 217. It has been ruled, however, that:
>
> > … [A] taxpayer who, for the purpose of making a livelihood, devotes the major portion of his time to speculating on the stock exchange may treat losses thus incurred as having been sustained in the course of a trade or business.… [*Snyder*, 295 U.S. at 139.]
>
> Establishing continuity of investment activity is not enough. The taxpayer must do more than "merely [keep] records and [collect] interest and dividends from his securities, through managerial attention for his investments." *Higgins*, 312 U.S. at 218; *Wilson v. United States*, 179 Ct.Cl. 725, 746, 376 F.2d 280, 293 (1967). In effect, a "trader" is an active investor in that he does not passively accumulate earnings, nor merely oversee his accounts, but manipulates his holdings in an attempt to produce the best possible yield. That is, the trader's profits are derived through the very acts of trading—direct management of purchasing and selling. *Purvis v. Commissioner*, 530 F.2d 1332 (9th Cir. 1976); *Chiang Hsiao Liang*, 23 T.C. 1040 (1955).
>
> Even absent a clear judicial demarcation between trader and investor, it is apparent that plaintiff taxpayer's securities activities place him close to the trader end of the spectrum. Aside from a small annual salary for sitting on the board of an oil-producing company, his entire and substantial income was derived from his trading. He devoted virtually his whole working day to his stock transactions, unlike the taxpayers in *Snyder* and *Wilson*. In contrast to the distant management of a portfolio portrayed in Higgins, judgments regarding purchases and sales were made directly by taxpayer, based on his personal investigation of the assets, operation and management of various corporations. In addition, the sheer quantity of transactions he conducted also supports a reasonable conclusion that this taxpayer's business was trading on his own account.
>
> Defendant urges a narrowing of this issue to consideration of whether taxpayer's activities in regard to the particular stock he held in Central Railroad alone amounted to a "trade or business." While the courts do acknowledge that a trader (and even a "dealer") may hold simultaneously certain shares for investment purposes and others to trade, *e.g.*, *Bradford v. United States*, 195 Ct.Cl. 500, 444 F.2d 1133 (1971), the question here is whether taxpayer was generally "carrying on the business" of trading for his own account. It is concluded that he was.

[1349] *Purvis v. Commissioner*, 530 F.2d 1332 (9th Cir. 1976), noted:

> From 1963 to 1968 petitioner engaged in only 75 sales of securities and ten short-term commodities sales. Of these, 31 involved stock which had been held for more than six months. A substantial number involved shares which petitioner admits were held as investments, or which were held for periods exceeding three years, indicating that they were investments.

[1350] *Bradford v. U.S.*, 444 F.2d 1133 (Ct. Cl. 1971).

[1351] The court analyzed the taxpayers' activity:

> The Claims Court concluded that taxpayers were investors and not traders because they were primarily interested in the long-term growth potential of their stocks. We agree. Mr. Moller testified that he was looking for long-term growth and the payment of dividends. In addition, the taxpayers did not derive their income from the relatively short-term turnover of stocks, nor did they derive any significant profits through the act of trading. Interest and dividend income was over 98% of taxpayers' gross income for 1976 and 1977, and in 1976 their profit from the sale of securities was only $612, while in 1977 their sales resulted in a loss of $233.
>
> The number of sales transactions made by the taxpayers also leads to the conclusion that they were not traders in securities. In the cases in which taxpayers have been held to be in the

> … in order to be a trader, a taxpayer's activities must be directed to short-term trading, not the long-term holding of investments, and income must be principally derived from the sale of securities rather than from dividends and interest paid on those securities. In determining whether a taxpayer who manages his own investments is a trader, and thus engaged in a trade or business, relevant considerations are the taxpayer's investment intent, the nature of the income to be derived from the activity, and the frequency, extent, and regularity of the taxpayer's securities transactions. See *Purvis*, 530 F.2d at 1334.

King v. Commissioner, 89 T.C. 445, 458-459 (1987), explained the differences between traders, dealers, and investors:

> … a primary distinction for Federal tax purposes between a trader and a dealer in securities or commodities is that a dealer does not hold securities or commodities as capital assets if held in connection with his trade or business, where as a trader holds securities or commodities as capital assets whether or not such assets are held in connection with his trade or business.[5] A dealer falls within an exception to capital asset treatment because he deals in property held primarily for sale to customers in the ordinary course of his trade or business. A trader, on the other hand, does not have customers and is therefore not considered to fall within an exception to capital asset treatment.
>
> [5] The same capital treatment to which traders in securities are subject has also been held applicable to traders of commodity futures. *Commissioner v. Covington*, 120 F.2d 768 (5th Cir. 1941), *affg.* on this issue 42 B.T.A. 601 (1940); *Vickers v. Commissioner*, 80 T.C. 394, 405 (1983).
>
> The distinction between a "trader" and an "investor" also turns on the nature of the activity in which the taxpayer is involved. A trader seeks profit from short-term market swings and receives income principally from selling on an exchange rather than from dividends, interest, or long-term appreciation. *Groetzinger v. Commissioner*, 771 F.2d 269, 274-275 (7th Cir. 1985), *affd.* 480 U.S. __ (1987); *Moller v. United States*, 721 F.2d 810, 813 (Fed. Cir. 1983). Further, a trader will be deemed to be engaged in a trade or business if his trading is frequent and substantial. *Groetzinger v. Commissioner*, *supra* at 275; *Fuld v. Commissioner*, 139 F.2d 465 (2d Cir. 1943), *affg.* 44 B.T.A. 1268 (1941). An investor, on the other hand, makes purchases for capital appreciation and income, usually without regard to short-term developments that would influence prices on the daily market. *Groetzinger v. Commissioner*, 82 T.C. 793, 801 (1984), *affd.* 771 F.2d 269 (7th Cir. 1985), *affd.* 480 U.S. __ (1987); *Liang v. Commissioner*, 23 T.C. 1040, 1043 (1955). No matter how extensive his activities might be, an investor is never considered to be engaged in a trade or business with respect to his investment activities. *Higgins v. Commissioner*, 312 U.S. 212, 216, 218 (1941); *Groetzinger v. Commissioner*, 771 F.2d at 275.

> business of trading in securities for their own account, the number of their transactions indicated that they were engaged in market transactions on an almost daily basis. See *Levin*, 597 F.2d at 765; *Fuld v. Commissioner*, 139 F.2d 465 (2d Cir. 1943). At most, the Mollers engaged in 83 security purchase transactions and 41 sales transactions in 1976 and 76 purchase and 30 sales transactions in 1977. [footnote omitted]
>
> Moreover, taxpayers did not "endeavor to catch the swings in the daily market movements and profit thereby on a short term basis." *Purvis*, 530 F.2d at 1334. The stocks owned by taxpayers, which they sold during 1976 and 1977, had been held for an average of over 3-1/2 and 8 years, respectively.
>
> The Mollers were investors and not traders.

The issue in *King* was whether interest expense relating to the taxpayer's trading was subject to the investment interest limitations of Code § 163(d) or was business interest. The court reasoned (at 459-460) [footnotes referred to below are in fn [1352]]:

> Petitioner clearly was in the trade or business of trading commodity futures during the years in issue.[6] Petitioner's trading was frequent and substantial but he traded solely for his own account during the years in issue and neither had customers nor performed services analogous to those performed by a merchant.[7] The parties appear to agree that petitioner was in the trade or business of trading commodities futures.[8]
>
> Based on the foregoing, we determined in our earlier opinion that certain short-term capital losses claimed by petitioner were allowable. Such losses were incurred by a commodities dealer within the meaning of sec. 108(f) (see note 6 supra), in the trading of commodities and were therefore to be treated as incurred in a trade or business for purposes of sec. 108(a). The character of such losses as capital losses, however, is not affected by their treatment as losses incurred in a trade or business for purposes of sec. 108.

[1352] Here are the footnotes that accompanied the text above:

[6] We note that in our earlier opinion, relating to petitioner's motion for partial summary judgment, we stated that the parties were in agreement that "petitioner was a dealer in commodities within the meaning of Section 108(f)" of the Tax Reform Act of 1984 (Division A of the Deficit Reduction Act of 1984, Pub. L. 98-369, 98 Stat. 494, 630), as amended by sec. 1808(d) of the Tax Reform Act of 1986. Section 108(f), as amended, provides in relevant part "For purposes of this section, the term 'commodities dealer' means any taxpayer who - (1) at any time before January 1, 1982, was an individual described in section 1402(i)(2)(B)." Sec. 1402(i)(2)(B) defines, for purposes of sec. 1402(i) a commodities dealer as "a person who is actively engaged in trading section 1256 contracts and is registered with a domestic board of trade which is designated as a contract market by the Commodities Futures Trading Commission." A sec. 1256 contract is defined as including "any regulated futures contract." Sec. 1256(b)(1).

Petitioner was a registered member of the CME, a domestic board of trade designated as a contract market by the Commodity Futures Trading Commission, and was actively engaged in trading regulated futures contracts. Therefore, pursuant to sec. 108(f), petitioner was a commodities dealer for purposes of sec. 108 of the Tax Reform Act of 1984, as amended by sec. 1808(d) of the Tax Reform Act of 1986. This status as a commodities dealer, however, applies solely for purposes of section 108 and does not, for any other purpose, affect petitioner's status as a trader who is not a dealer. See H. Rept. 99-426, at 911 (1985).

[7] Until 1968, petitioner acted as a broker as well as trading for his own account. At that time, petitioner may have been a dealer with respect to futures contracts, but this is not relevant to the years in issue.

[8] We also note that sec. 108(a) and (b) of the Tax Reform Act of 1984, 98 Stat. 630, as amended by sec. 1808(d) of the Tax Reform Act of 1986, 100 Stat. 2817-2818, provides,

> SEC. 108(a). *General Rule*. For purposes of the Internal Revenue Code of 1954, in the case of any disposition of 1 or more positions—
>
> (1) which are entered into before 1982 and form part of a straddle, and
>
> (2) to which the amendments made by title V of such Act do not apply, any loss from such disposition shall be allowed for the taxable year of the disposition if such loss is incurred in a trade or business, or if such loss is incurred in a transaction entered into for profit though not connected with a trade or business.
>
> (b) *Loss Incurred in a Trade or Business*. For purposes of subsection (a), any loss incurred by a commodities dealer in the trading of commodities shall be treated as a loss incurred in a trade or business.

King also held that the purchase of gold was part of his trade or business of trading commodities futures, rejecting the IRS' contention that *Higgins* (fns 1342-1343) applied to segregate the purchase of gold from other activity.[1353]

After reviewing precedent,[1354] *Holsinger v. Commissioner*, T.C. Memo. 2008-191, reasoned and held:

> Petitioners argue that they were traders, trading as agents of Alpha. With the incorporation of Alpha, petitioners argue they became traders. In determining whether a taxpayer's trading activity constituted a trade or business, courts have distinguished between "traders" and "investors". *Moller v. United States*, 721 F.2d 810, 813 (Fed. Cir. 1983); see also *Levin v. United States*, 220 Ct. Cl. 197, 597 F.2d 760, 765 (1979).
>
> In determining whether a taxpayer is a trader, nonexclusive factors to consider are: (1) The taxpayer's intent, (2) the nature of the income to be derived from the activity, and (3) the frequency, extent, and regularity of the taxpayer's securities transactions. *Moller v. United States*, *supra* at 813. For a taxpayer to be a trader the trading activity must be substantial, which means "frequent, regular, and continuous enough to constitute a trade or business" as opposed to sporadic trading. *Ball v. Commissioner*, T.C. Memo. 2000-245 (quoting *Hart v. Commissioner*, T.C. Memo. 1997-11). A taxpayer's activities constitute a trade or business where both of the following requirements are met: (1) The taxpayer's trading is substantial, and (2) the taxpayer seeks to catch the swings in the

---

[1353] 89 T.C. at 464-465:

> As we have stated, petitioner herein was clearly in the trade or business of trading commodities futures. Petitioner acquired the gold in issue pursuant to delivery on long gold futures contracts which he acquired in the regular course of his business. Petitioner also disposed of the gold pursuant to short gold futures contracts. While petitioner had not regularly held physical commodities for extended periods of time, petitioner did periodically, in the course of his business, take delivery of physical commodities. Further, petitioner took no affirmative action to set apart or distinguish this transaction from other transactions which were entered into in the normal course of his business. These factors strongly suggest that petitioner's gold transaction was part of his trade or business of trading commodity futures.
>
> This case is not factually similar to *Higgins* in that the transaction here in issue was integrally related to transactions which were indisputably part of petitioner's trade or business, *i.e.*, the closing of the futures contracts by which the gold was acquired and disposed. In *Higgins*, the only relationship between the taxpayer's investment activities and real estate activities was that they were directed through the same office. *Higgins* does not lead us to the conclusion that the transaction here in issue should be separated out from petitioner's trade or business.
>
> We are not aware of any case which has held that a taxpayer may hold property both as a trader of commodity futures and as an investor in commodities. Past cases have held that a taxpayer may be both a trader and a dealer with respect to securities, but these cases have not dealt with the issue of whether the taxpayer therein was a trader or investor. *Kemon v. Commissioner*, *supra* at 1033; *Carl Marks & Co. v. Commissioner*, 12 T.C. 1196 (1949).

[1354] Before addressing that the taxpayers bore the burden of proof, the court stated:

> The Internal Revenue Code does not define the term "trade or business" for purposes of section 162. *Commissioner v. Groetzinger*, 480 U.S. 23, 27 (1987); *Estate of Yaeger v. Commissioner*, 889 F.2d 29, 33 (2d Cir. 1989), affg. T.C. Memo. 1988-264. Whether activities constitute a trade or business is a question of fact. See *Higgins v. Commissioner*, 312 U.S. 212, 217 (1941); *Estate of Yaeger v. Commissioner*, *supra* at 33; *Mayer v. Commissioner*, T.C. Memo. 1994-209; *Paoli v. Commissioner*, T.C. Memo. 1991-351.

daily market movements and to profit from these short-term changes rather than to profit from the long-term holding of investments. *Mayer v. Commissioner*, *supra*.

As to the first requirement, we find petitioners' trading was not substantial. Courts consider the number of executed trades in a year and the amount of money involved in those trades when evaluating whether a taxpayer's trading activities were substantial. See, *e.g.*, *Mayer v. Commissioner*, *supra*; *Paoli v. Commissioner*, *supra*. In Paoli, the Court held trading activities were substantial when the taxpayers traded stocks or options worth approximately $9 million. In *Mayer*, the Court considered over 1,100 executed sales and purchases in each of the years at issue therein to be substantial trading activity. Trading activity was found to be insubstantial when a taxpayer executed at most 83 purchases and 41 sales in one year and 76 purchases and 30 sales in the second year. *Moller v. United States*, *supra* at 813. In 2001 petitioners executed approximately 289 trades. An analysis of petitioners' trading activity reveals that in 2001 they traded on 63 days. This total represents less than 40 percent of the trading days from April 19, 2001, the day petitioners incorporated Alpha, until December 31, 2001. In 2002 petitioners traded on 110 days and executed approximately 372 trades. This total represents less than 45 percent of the trading days in 2002. We find it doubtful whether the trades were conducted with the frequency, continuity, and regularity indicative of a business.

As to the second requirement, petitioners have failed to prove that they sought to catch the swings in the daily market movements and to profit from these short-term changes rather than to profit from the long-term holding of investments. Petitioner testified that his goal in forming Alpha was to profit from short-term swings in the market. Additionally, petitioner testified that he usually closed his account at the end of the day and tried to avoid holding stocks and options overnight. The documentary evidence, however, paints a different picture. A list of petitioners' trades shows they rarely bought and sold on the same day. Furthermore, a significant amount of petitioners' holdings was held for more than 31 days. As a result, we find that petitioners have not demonstrated that they sought to capture the daily swings in the market. We find that they were not traders, but investors. Petitioners' trading pattern is consistent with that of an investor, not of a trader.

A bad debt case, *Dagres v. Commissioner*, 136 T.C. 263, 281 (2011),[1355] noted that:[1356]

Selling one's investment expertise to others is as much a business as selling one's legal expertise or medical expertise.

[1355] For more details about the case, see fn 1175 in part II.G.4.a.iii Character of Bad Debt.

[1356] This quote followed a discussion contrasting the case from *Whipple* (see fn 1343 and accompanying text):

However, an activity that would otherwise be a business does not necessarily lose that status because it includes an investment function. Rather, the activity of "promoting, organizing, financing, and/or dealing in corporations

… for a fee or commission or with the immediate purpose of selling the corporations at a profit in the ordinary course of that business" is a business, *Deely v. Commissioner*, 73 T.C. 1081, 1093 (1980) (citing *Whipple v. Commissioner*, 373 U.S. at 202-203), supplemented by T.C. Memo. 1981-229 [¶81,229 PH Memo TC], as is "developing …

> In cases where business promotion activities are found to rise to the level of a trade or business, a common factor for distinguishing mere investment from conduct of a trade or business has been compensation other than the normal investor's return: "income received directly for his own services rather than indirectly through the corporate enterprise". *Id.* That is, if the taxpayer receives not just a return on his own investment but compensation attributable to his services, then that fact tends to show that he is in a trade or business. Although fee, commission, or other non-investor compensation is a common element, it is not a necessary element, provided the facts support the conclusion that the taxpayer is more than a passive investor. *Farrar v. Commissioner*, T.C. Memo. 1988-385; see also *Deely v. Commissioner*, 73 T.C. at 1093. Notably, in such business promotion cases, the trade-or-business characterization applies even though the taxpayer invests his own funds in, lends funds to, or guarantees the debts of the businesses he promotes. See *Farrar v. Commissioner*, *supra*.

Lender Management, LLC v. Commissioner, T.C. Memo. 2017-246, held that Lender Management, LLC ("Lender Management") carried on a trade or business under Code § 162. Tax years 2010-2012 were at issue. Lender Management reported net losses of $462,505 and $307,760 for tax years 2010 and 2011 and net income of $376,238 and $808,302 for tax years 2012 and 2013, respectively.

The court described certain relationships:

> During the tax years in issue Lender Management provided direct management services to three limited liability companies: Murray & Marvin Lender Investments, LLC (M&M), Lenco Investments, LLC (Lenco), and Lotis Equity, LLC (Lotis) (collectively, investment LLCs). Each of the investment LLCs elected to be treated as a partnership for Federal income tax purposes. Lender Management directed the investment and management of assets held by the investment LLCs for the benefit of their owners. The end-level owners with respect to M&M, Lenco, and Lotis were, in each case, all children, grandchildren, or great-grandchildren of Harry.

The court described certain arrangements:

> 1. ***Structure and Purpose***
>
> The investment LLCs were created in 2005 as part of a reorganization of Lender Management. The goals of the 2005 reorganization were to accommodate greater diversification of the managed investments and more flexible asset allocation at the individual investor level. As part of the restructuring Lender Management shifted from a cost-based office model to a profit-based model.
>
> Lender Management engaged a hedge fund specialist to help it restructure its affairs and its managed portfolio using a hedge fund, or "fund of funds", manager model. Pursuant to the restructuring strategy, Lender Management divided its managed portfolio into the three investment LLCs, each formed for the purpose of holding investments in a different

corporations as going businesses for sale to customers", *Whipple v. Commissioner*, 373 U.S. at 203. Bankers, investment bankers, financial planners, and stockbrokers all earn fees and commissions for work that includes investing or facilitating the investing of their clients' funds.[22]

[22] *Cf. InverWorld, Inc. v. Commissioner*, T.C. Memo. 1996-301 (holding that the taxpayer was in a trade or business pursuant to section 864(b); distinguishing "cases [that] did not address taxpayers who managed the investments of others").

class of assets. M&M invested in private equities, Lenco in hedge funds, and Lotis in public equities.[4] From 2005 forward, over one-half of the assets under management were invested in private equity.

[4] Lotis merged into Lenco in 2010 because Lender Management determined that Lenco's hedge fund investments held enough public equities to meet the company's asset diversification goals.

2. ***Operating Agreements***

Lender Management's operating agreement permitted it, without limitation, to engage in the business of managing the "Lender Family Office" and to provide management services to Lender family members, related entities, and "other third-party nonfamily members." The operating agreements for the investment LLCs designated Lender Management as the sole manager for each entity. Lender Management held the exclusive rights to direct the business and affairs of the investment LLCs.

Lender Management also managed downstream entities in which M&M held a controlling interest. Investors in some of these downstream entities included persons who were not members of the Lender family. It received fees for managing these entities. For the tax years in issue between 12% and 15% of M&M's net investment portfolio consisted of these downstream entities.

Members understood that they could withdraw their investments in the investment LLCs at any time, subject to liquidity constraints, if they became dissatisfied with how the investments were being managed. The operating agreements for Lenco and Lotis provided that members could withdraw all or a portion of their capital accounts on specified dates of each year or on any other date approved by the manager. The operating agreement for M&M provided that members could withdraw all or a portion of their capital accounts with the consent of the manager in the exercise of the manager's discretion.

B. ***Compensation***

Lender Management received a profits interest in each of the investment LLCs in exchange for the services it provided to the investment LLCs and their members. These profits interests were designated "Class A" interests under the operating agreements for the investment LLCs. The class A interests were structured concurrent with Lender Management's reorganization and its shift to a profit-based office model.

Under the initial terms of the operating agreements, effective August 1, 2005, Lender Management was entitled to receive for its class A interests the following percentages: (1) from Lenco, 1% of net asset value annually, plus 5% of any increase in net asset value from the prior fiscal period; (2) from M&M, 5% of gross receipts annually, plus 2% of any increase in net asset value from the prior fiscal period; and (3) from Lotis, 2% of net asset value annually, plus 5% of net trading profits.[5] Lender Management received income from the class A interests only to the extent that the investment LLCs generated profits. Net asset value was defined as the amount by which the fair market value of the investment LLC's assets exceeded its liabilities.

[5] For Lotis, class A interests were entitled to a share of the adjusted profit as defined in the operating agreement.

As of December 31, 2010, the operating agreements for M&M and Lenco were amended to provide Lender Management with increased profits interests. The class A interests for M&M and Lenco were increased to equal the aggregate of 2.5% of net asset value, plus 25% of the increase in net asset value, annually. Similar to the initial terms of the operating agreements, Lender Management received payments for its class A interests only to the extent that M&M and Lenco generated net profits. The increased profits interests were intended to more closely align Lender Management's goal of maximizing profits with that of its clients and to create greater incentive for Lender Management and its employees to perform successfully as managers of the invested portfolios. During the tax years in issue any payments that Lender Management earned from its profits interests were to be paid separately from the payments that it would otherwise receive as a minority member of each of the investment LLCs.

C. ***Lender Management Services***

During the tax years in issue Lender Management made investment decisions and executed transactions on behalf of the investment LLCs. It operated for the purpose of earning a profit, and its main objective was to earn the highest possible return on assets under management. Lender Management provided individual investors in the investment LLCs with one-on-one investment advisory and financial planning services.

Lender Management employed five employees during each of the tax years in issue. It had a total payroll for its employees of $333,200, $311,233, and $390,554 during the tax years in issue, respectively. For tax year 2011 the payroll included a $123,249 guaranteed payment to Keith. For tax year 2012 the payroll included a $206,417 guaranteed payment to Keith.

Lender Management's chief investment officer worked about 50 hours a week. The court described his activities:

As CIO, Keith retained the ultimate authority to make all investment decisions on behalf of Lender Management and the investment LLCs. Most of his time was dedicated to researching and pursuing new investment opportunities and monitoring and managing existing positions. For example, he discovered a company in Israel, and Lender Management owned an interest in and participated in the management of this company.

He reviewed personally approximately 150 private equity and hedge fund proposals per year on behalf of the investment LLCs. He met with and attended presentations of hedge fund managers, private equity managers, and investment bankers. Lender Management is not an active trader, but in a typical year the firm would enter into multiple new private equity deals and make one or two hedge fund trades.

Lender Management arranged annual business meetings, which were for all clients in the investment LLCs. These group meetings were held so that Lender Management could review face-to-face with all of its clients the performance of their investments at least once per year. The location of the annual meeting changed each year so that no single investor was repeatedly inconvenienced by having to travel a long distance. Because of conflicts Keith had difficulty getting all of Lender Management's clients to attend these meetings. He would conduct additional face-to-face meetings with clients who were more interested in the status of their financial investments at times and locations that were convenient for them.

Keith interacted directly with Lender Management's clients. He collected information from and worked with these individuals to understand their cashflow needs and their risk tolerances for investment, and Lender Management engaged in asset allocation based on these and other factors. Lender Management devised and implemented special ventures known as eligible investment options (EIOs), which allowed clients to participate in investments more directly suited to their age and risk tolerance. Keith developed and maintained a number of computer models, including a model that projected the cash needs of individual investors and a model that tracked and forecasted the cashflows associated with M&M's private equity investments.

Lender Management had other employees and outsourced certain management services:

Lender Management interviewed accounting and investment firms to provide outsourced management services beginning in 2006. It hired Harris myCFO, a division of Harris Bank, which provided both accounting and investment advice. In 2010 two of the principals of Harris myCFO formed their own firm, Pathstone Family Office, LLC (Pathstone), and Lender Management engaged Pathstone on May 6, 2010.[7] During the tax years in issue Pathstone provided Lender Management with accounting and investment advisory services.

[7] Lender Management began the process of terminating its relationship with Harris myCFO in 2009 in anticipation of its move to Pathstone. When discussing outsourced management services received by Lender Management during the tax years in issue we refer hereinafter to Pathstone, although the record is unclear as to whether Lender Management still engaged Harris myCFO in the early months of 2010.

Pathstone's accounting professionals were based in Atlanta, Georgia. Ms. Flament spoke with the accounting professionals over the phone between three and five times per week, and they exchanged between 50 and 100 emails per week. During the tax years in issue Pathstone prepared Lender Management's partnership tax returns. Pathstone also prepared quarterly financial reports for the investment LLCs.

Keith worked at the same office buildings as Pathstone's investment professionals in Englewood Cliffs, and later Fort Lee, New Jersey. He collaborated with Pathstone's principal investment adviser in selecting new investments for the investment LLCs. He presented Pathstone's advisers with his own research on investment opportunities, and he often received their advice before acting on prospective deals. Pathstone's advisers also presented him with investment opportunities. Keith exercised ultimate authority over the investment LLCs' investments and did not always follow Pathstone's advice. Pathstone did not have the authority to move cash on behalf of Lender Management or the investment LLCs.

The court reviewed the cases discussed above:

Certain activities are not considered trades or businesses. An investor is not, by virtue of his activities undertaken to manage and monitor his own investments, engaged in a trade or business. *Whipple v. Commissioner*, 373 U.S. 193 (1963); *Higgins v.*

> *Commissioner*, 312 U.S. at 218. "No matter how large the estate or how continuous or extended the work required may be", overseeing the management of one's own investments is generally[9] regarded as the work of a mere investor. *Higgins v. Commissioner*, 312 U.S. at 218. Expenses incurred by the taxpayer in trading securities or performing other investment-related activities strictly for his own account generally may not be deducted under section 162 as expenses incurred in carrying on a trade or business. See *id.*; *Beals v. Commissioner*, T.C. Memo. 1987-171. The taxpayer's activities as an investor may produce income or profit, but profit from investment is not taken as evidence that the taxpayer is engaged in a trade or business. Any profit so derived arises from the successful conduct of the trade or business of the corporation or other venture in which the taxpayer has taken a stake, rather than from the taxpayer's own activities. *Whipple v. Commissioner*, 373 U.S. at 202.
>
> [9] An exception to the general rule applies when the taxpayer is also an active trader of securities. See *Moller v. United States*, 721 F.2d 810 (Fed. Cir. 1983); *Liang v. Commissioner*, 23 T.C. 1040 (1955). Petitioners do not contend that Lender Management operated as a trader during the tax years in issue.
>
> A common factor distinguishing the conduct of a trade or business from mere investment has been the receipt by the taxpayer of compensation other than the normal investor's return. *Whipple v. Commissioner*, 373 U.S. at 202-203. Compensation other than the normal investor's return is income received by the taxpayer directly for his or her services rather than indirectly through the corporate enterprise. *Id.* At 203. If the taxpayer receives not just a return on his or her own investment but compensation attributable to his or her services provided to others, then that fact tends to show that he or she is in a trade or business. *Dagres v. Commissioner*, 136 T.C. at 281-282. The trade-or-business designation may apply even though the taxpayer invests his or her own funds alongside those that are managed for others, provided the facts otherwise support the conclusion that the taxpayer is actively engaged in providing services to others and is not just a passive investor. *Id.* at 282, 285-286.
>
> An activity that would otherwise be a business does not necessarily lose that status because it includes an investment function. *Id.* at 281. Work that includes investing or facilitating the investing of others' funds may qualify as a trade or business. *Id.* In *Dagres* we held that "[s]elling one's investment expertise to others is as much a business as selling one's legal expertise or medical expertise." Id. Investment advisory, financial planning, and other asset management services provided to others may constitute a trade or business. See *id.*

The court discussed the heightened scrutiny of this being a family business:[1357]

> Generally transactions within a family group are subjected to heightened scrutiny. *Estate of Bongard v. Commissioner*, 124 T.C. 95, 119 (2005); *Cirelli v. Commissioner*, 82 T.C. 335, 343 (1984). Where a payment is made in the context of a family relationship, we carefully scrutinize the facts to determine whether there was a bona fide business relationship and whether the payment was not made because of the familial relationship. See *Commissioner v. Culbertson*, 337 U.S. 733, 746 (1949); *Martens v. Commissioner*, T.C Memo. 1990-42, *aff'd* without published opinion, 934 F.2d 319

[1357] For *Bongard* and related cases regarding scrutiny of a family business entity for estate tax purposes, see part III.C.1 Whether Code § 2036 Applies.

(4th Cir. 1991). In *DiDonato v. Commissioner*, T.C. Memo. 2013-11, we concluded that certain payments between cousin-owned businesses were not deductible. The payments were not deductible because the record did not establish that services were actually rendered.

We find that Lender Management satisfies a review under heightened scrutiny. The end-level investors in the investment LLCs during the tax years in issue were all members of the Lender family. Lender Management's CIO, Keith, is a member of the Lender family. His father Marvin was managing member and 99%-owner of Lender Management in 2010, and Keith occupied the same position in 2011 and 2012. At all relevant times only two members of the Lender family were owners of Lender Management.

Separate from Lender Management, Marvin owned 11.47% of Lenco and 5.84% of M&M in 2010. Keith owned indirectly less than 4% of Lenco and 10% of M&M during the years he served as managing member.

There was no requirement or understanding among members of the Lender family that Lender Management would remain manager of the assets held by the investment LLCs indefinitely. Lender Management's investment choices and related activities were driven by the needs of clients, and its clients were able to withdraw their investments if they became dissatisfied with its services. Investors in Lenco and Lotis were entitled to withdraw their capital interests for any reason at least annually. Although a complete withdrawal from M&M required the manager's approval, we are satisfied on the facts before us that there was a common understanding that Lender Management would grant such approval if any investor became unhappy with how his or her funds were being managed.

Apart from what they received as returns on their respective investments, Lender Management's clients generally earned employment income. For example, Carl worked in sales for a cable communications company. Keith, like Carl, would have benefited from his membership in the investment LLCs during the tax years in issue regardless of whether he chose to work for Lender Management. Keith's position compensated him for the services that he provided to Lender Management, and it was his only full-time job during the tax years in issue. As managing member he was highly motivated to excel and to see Lender Management receive the benefit of the class A interests.

Although each investor in the investment LLCs was in some way a member of the Lender family, Lender Management's clients did not act collectively or with a single mindset. Lender Management's clients were geographically dispersed, many did not know each other, and some were in such conflict with others that they refused to attend the same business meetings. Their needs as investors did not necessarily coincide. Lender Management did not simply make investments on behalf of the Lender family group. It provided investment advisory services and managed investments for each of its clients individually, regardless of the clients' relationship to each other or to the managing member of Lender Management.

Contrasting *Higgins*,[1358] the court said:

> Lender Management was not managing its own money. Most of the assets under management were owned by members of the Lender family that had no ownership interest in Lender Management. Lender Management managed investments and did substantially more than keeping records and collecting interest and dividends.

Contrasting *Beals*,[1359] in which the taxpayer managed investments for himself, his wife, and their children, the court noted:

> In that case there was no business relationship. By contrast Lender Management had an obligation to its clients, and it tailored its investment strategy, allocated assets, and performed other related financial services specifically to meet the needs of its clients.

The court concluded:

> There is no dispute that Lender Management provided services. The profits interests were provided in exchange for services and not because Marvin and Keith were part of the Lender family. The Lender family members that participated in the investment LLCs expected Lender Management to provide them with services similar to those of a hedge fund manager. The relationship between Lender Management and the investment LLCs was a business relationship.
>
> Respondent cites no applicable attribution rules that would require us to treat Lender Management or its managing member as owning all of the interests in the investment LLCs. Lender Management carried on its operations in a continuous and businesslike manner for the purpose of earning a profit, and it provided valuable services to clients for compensation. For the tax years in issue Lender Management was carrying on a trade or business for the purpose of section 162.

Swartz v. U.S., 128 A.F.T.R.2d 2021-5251 (E.D. NY 2021), rejected a taxpayer's argument that Swartz his investment loss was a business loss. For details, see part II.G.8 Code § 165(a) Loss for Worthlessness; Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A Limitation on that Strategy.

Code § 475, "Mark to market accounting method for dealers in securities," may accelerate recognition of gain or treat securities as inventory when held by a "dealer in securities," which Code § 475(c)(1) defines as a taxpayer who:

> (A) regularly purchases securities from or sells securities to customers in the ordinary course of a trade or business; or
>
> (B) regularly offers to enter into, assume, offset, assign or otherwise terminate positions in securities with customers in the ordinary course of a trade or business.

The Syllabus to *YA Global Investments v. Commissioner*, 161 T.C. No. 11 (2023), describes the case in which the partnership was required to report $13.8 million of mark-to-market gain

---

[1358] See fn 1298 in part II.G.4.l.i.(a) "Trade or Business" Under Code § 162 and text accompanying fn 1343.

[1359] See text accompanying fn 1344.

(increase in unrealized appreciation of investments and foreign currency contacts for the year) under Code § 475(a)(2) for 2008:

> PS, a partnership, provided funding to portfolio companies in exchange for stock, convertible debentures, promissory notes, and warrants. Because PS had no employees, it hired YA to manage its assets. PS could impose restrictions from time to time on the management of its assets with appropriate notice to YA. As part of the transactions in which PS acquired securities from portfolio companies, those companies paid fees to both PS and YA.
>
> For each of 2006, 2007, and 2008, PS filed Form 1065, U.S. Return of Partnership Income, but did not file Form 8804, Annual Return for Partnership Withholding Tax (Section 1446). PS was advised by the accounting firm that prepared its returns that it was not engaged in a U.S. trade or business. PS later filed suit against the accounting firm for professional malpractice and negligence.
>
> By execution of a series of Forms 872-P, Consent to Extend the Time to Assess Tax Attributable to Partnership Items, R and PS agreed to extend until March 31, 2015, for each of the years in issue, the period of limitation on the assessment of "any federal income tax attributable to the partnership items of the partnership...against any partner."
>
> On March 6, 2015, R issued notices of final partnership administrative adjustment (FPAAs) for taxable years that included 2006 through 2008. The FPAAs reflected R's determination that PS was engaged in the conduct of a trade or business in the United States during those years, that all of PS's taxable income was effectively connected with that trade or business, and that PS was liable for withholding tax under I.R.C. § 1446 on the portion of PS's effectively connected taxable income allocable to its foreign partners. R also determined that PS was a "dealer in securities" subject to the mark-to-market accounting rules provided in I.R.C. § 475.
>
> *Held*: Because Ps (PS's tax matters partners) accept that the activities of an agent can be attributed to the agent's principal for the purpose of determining whether the principal is engaged in the conduct of a U.S. trade or business, and because Ps have not established that the relationship between PS and YA was other than agency, YA's activities can be attributed to PS. PS's ability to give interim instructions to YA regarding the management of PS's account demonstrates a relationship of agent and principal rather than service provider and recipient.
>
> *Held, further*, Ps have not established that, during 2006, 2007, and 2008, PS was not engaged in a U.S. trade or business, as defined by I.R.C. § 864(b), *Commissioner v. Groetzinger*, 480 U.S. 23 (1987), and *Higgins v. Commissioner*, 312 U.S. 212 (1941). The activities that YA conducted on PS's behalf were continuous, regular, and engaged in for the primary purpose of income or profit. And Ps have not established that the fees paid by portfolio companies were additional payments for the use of capital. Therefore, they have not established that the activities that YA conducted on PS's behalf were limited to either the management of investments or trading in stocks or securities.
>
> *Held, further*, because PS "regularly [held] itself out as being willing and able to" purchase stock and debentures, the portfolio companies from which it made those purchases were its "customers," within the meaning of I.R.C. § 475(c)(1)(A). *Cf*. Treas. Reg. § 1.475(c)-1(a)(2).

Held, further, because PS "regularly purchase[d] securities from...customers in the ordinary course of a trade or business," it was a "dealer in securities," within the meaning of I.R.C. § 475(c)(1)(A), and thus subject to the mark-to-market rule provided in I.R.C. § 475(a)(2).

Held, further, to satisfy the identification requirement provided in I.R.C. § 475(b)(2), under which securities can be excepted from the mark-to-market rules of I.R.C. § 475(a), a dealer's records must explicitly state that the security in question is described in either I.R.C. § 475(b)(1)(A) or (B) or I.R.C. § 475(b)(1)(C); identification of a security in general terms as "held for investment" is insufficient to meet the requirement.

Held, further, Ps have not established that any portion of PS's taxable income was not effectively connected with its U.S. trade or business.

Held, further, a partnership's liability for withholding tax under I.R.C. § 1446 can be reduced by nonpartnership deductions of a foreign partner only if the foreign partner certifies those deductions under Treas. Reg. § 1.1446-6.

Held, further, a partnership's payment of withholding tax under I.R.C. § 1446 results in an overpayment for purposes of I.R.C. § 1464 only if the withholding tax paid exceeds the withholding tax properly due. *Jones v. Liberty Glass Co.*, 332 U.S. 524 (1947). An overpayment does not result merely because the withholding tax paid in respect of a foreign partner exceeds the foreign partner's income tax liability for the year under I.R.C. § 871(b) or 882.

Held, further, PS's filing of Form 1065 for each of 2006, 2007, and 2008 did not commence the period of limitation on the assessment of I.R.C. § 1446 withholding tax because the return did not advise R of PS's potential liability for that tax. *Commissioner v. Lane-Wells Co.*, 321 U.S. 219 (1944); *Springfield v. United States*, 88 F.3d 750 (9th Cir. 1996); *Paschall v. Commissioner*, 137 T.C. 8 (2011).

Held, further, because the tax imposed by I.R.C. § 1446 is an income tax, PS is a "partner" within the meaning of I.R.C. § 6231(a)(2). Consequently, even if the periods of limitation on the assessment of I.R.C. § 1446 withholding tax commenced with PS's filing of Forms 1065, the Forms 872-P executed for 2006 and 2007 extended the period of limitation for the assessment of that tax for each of those years so that it remained open when R issued the FPAAs.

Held, further, PS's filing of Forms 1065 did not shield it from additions to tax under I.R.C. § 6651(a)(1) for its failure to file Forms 8804. Even if a Form 1065 required to be filed by I.R.C. § 6031(a) can, in some circumstances, serve as a "return" whose filing can prevent the imposition of an addition to tax under I.R.C. § 6651(a)(1), PS's Forms 1065 cannot be accepted as defective Forms 8804 because they fail at least three of the four elements of the test prescribed in Beard v. Commissioner, 82 T.C. 766 (1984), aff'd, 793 F.2d 139 [58 AFTR 2d 86-5290] (6th Cir. 1986). Although R apparently accepts that the Forms 1065 that PS filed for 2006, 2007, and 2008 were signed under penalties of perjury, those returns did not disclose the facts relevant to the determination that PS was engaged in a U.S. trade or business, they did not purport to be Forms 8804, and they were not filed on the basis of an honest and reasonable belief that they would satisfy PS's obligations to file Forms 8804.

> *Held, further*, Ps have not met their burden of proving that PS's failure to file Forms 8804 and pay I.R.C. § 1446 withholding tax was due to reasonable cause and not willful neglect.

In providing background to its analysis concluding that the partnership was a dealer, the court explained:

> For the most part, courts have addressed on a case-by-case basis activities not within the per se rule for personal services and not covered by the trading safe harbors. Perhaps the closest any court has come to articulating a general definition of trade or business was when the Supreme Court stated, in *Commissioner v. Groetzinger*, 480 U.S. 23, 35 (1987): "[N]ot every income-producing and profit-making endeavor constitutes a trade or business....We accept the fact that to be engaged in a trade or business, the taxpayer must be involved in the activity with continuity and regularity and that the taxpayer's primary purpose for engaging in the activity must be for income or profit."
>
> But the courts have also recognized an exception to the general principle that continuous and regular activities directed at income or profit amount to a trade or business. A taxpayer whose activities are limited to investment - regardless of how continuous and regular those activities - is not engaged in a U.S. trade or business.
>
> Although the investment exception is widely recognized, its rationale is unclear. And the absence of a clear rationale for the investment exception makes it difficult to define its parameters.
>
> The investment exception traces its roots back to *Higgins v. Commissioner*, 312 U.S. 212 (1941). *Higgins* involved a Paris resident who maintained a New York office where employees managed his "extensive investments in real estate, bonds and stocks." *Id*. at 213. In computing his U.S. tax liability, he sought to deduct his investment management expenses as ordinary and necessary business expenses under the predecessor of section 162. The Commissioner accepted that the expenses were ordinary and necessary. He also accepted that the taxpayer's real estate activities constituted a trade or business. But he disallowed that portion of the expenses allocable to the taxpayer's dealings in securities. While the taxpayer conceded that small investors were not engaged in a trade or business, he argued that his activities were different. Because his activities were much more extensive than those typical of small investors, he argued, his activities amounted to a trade or business. The Commissioner countered that personal investment activities, however extensive, cannot be a trade or business. The Court wrote that the determination of "whether the activities of a taxpayer are `carrying on a business' requires an examination of the facts in each case." *Id*. at 217. It added:
>
> > The Bureau of Internal Revenue has this duty of determining what is carrying on a business, subject to reexamination of the facts by the Board of Tax Appeals and ultimately to review on the law by the courts on which jurisdiction is conferred. The Commissioner and the Board appraised the evidence here as insufficient to establish [the taxpayer's] activities as those of carrying on a business. The [taxpayer] merely kept records and collected interest and dividends from his securities, through managerial attention for his investment. No matter how large the estate or how

> continuous or extended the work required may be, such facts are not sufficient as a matter of law to permit the courts to reverse the decision of the Board.
>
> *Id.* at 217-18.[19]
>
> [19] Under the law in effect for the years at issue in *Higgins*, the taxpayer could have deducted the expenses in question only as trade or business expenses under the predecessor of section 162. Section 212 now allows a deduction for expenses incurred in income-producing activities that do not rise to the level of a trade or business, but Congress did not enact the predecessor of that section until 1942, in response to the Court's opinion in *Higgins*.
>
> The *Higgins* opinion, as the Court later described it in *Commissioner v. Groetzinger*, 480 U.S. at 29-30, was "bare and brief" and "devoid of analysis." With "its stress on the facts of each case," *Higgins* "affords no readily helpful standard" for determining when a taxpayer is or is not engaged in a trade or business. *Id*. at 32. The Court in *Groetzinger* accepted that Higgins "must stand for the proposition that full-time market activity in managing and preserving one's own estate is not embraced within the phrase `carrying on a business,' and that salaries and other expenses incident to the operation are not deductible as having been paid or incurred in a trade or business." *Id*. at 30. But *Higgins* offers little or no guidance on how far the investment exception extends and whether it encompasses a taxpayer whose activities include anything beyond earning returns on invested capital.

The court then explained how it applied the law to the case:

> The issue of whether YA Global engaged in a U.S. trade or business through Yorkville Advisors during the years in issue turns on three questions. First, were the activities Yorkville Advisors conducted on behalf of YA Global continuous, regular, and engaged in for the primary purpose of income or profit? Second, were those activities limited to the management of investments? And third, were they covered by the safe harbor provided in section 864(b)(2)(A) for trading in stocks or securities? If the activities that Yorkville Advisors conducted on behalf of YA Global were continuous, regular, and directed at income or profit, went beyond the management of investments, and were not within the statutory safe harbor for securities trading, then YA Global was engaged in a U.S. trade or business as defined by section 864(b), *Groetzinger*, and *Higgins*. The appropriate label for that business would be of no moment. Regular and continuous activities directed at income or profit are, by definition, activities of a trade or business. If those activities are conducted in the United States and are outside the judicially created exception for investment and the statutory safe harbor for trading, then the activities are those of a U.S. trade or business.

After concluding that "Petitioners make no argument that Yorkville Advisors' activities were not regular, continuous, and directed at profit," the court addressed arguments that YA Global's activity was limited to the management of investments:

> Petitioners' primary argument regarding the trade or business issue is that YA Global was simply an investor. That argument stands or falls on whether, as petitioners claim, the only returns YA Global and Yorkville Advisors earned from portfolio companies were returns on capital invested in those companies.

The record does not support petitioners' claim that the fees paid by the portfolio companies were simply additional payments for the use of capital. Petitioners assert that "YA Global/Yorkville never got any fees unless the Fund closed a deal and put its capital at risk." While it may be true that a portfolio company had no obligation to pay fees to either Yorkville Advisors or YA Global unless a transaction was consummated, the payment of fees did not depend on the partnership's putting its capital at risk. Some of the commitment fees required under the terms of a SEDA were payable upon execution of the relevant agreements, before the portfolio company sought any advances.

If the fees that portfolio companies paid were simply additional compensation for capital, those fees should have been paid entirely to YA Global. The funds provided to portfolio companies came from the partnership. The record discloses no instance in which Yorkville Advisors provided capital to a portfolio company. And yet, Yorkville Advisors received cash fees from portfolio companies. The form of the transactions thus indicates that the portfolio companies received something of value from Yorkville Advisors above and beyond the capital they received from YA Global.

In objecting to proposed findings by respondent about specific types of fees, petitioners claim repeatedly that "the fees associated with transactions varied, both in name and amount." Petitioners thereby suggest that the labels applied to different fees had no real consequence. They seem to want us to believe, for example, that describing as a "structuring fee" an amount paid to Yorkville Advisors does not indicate that the fee was compensation for Yorkville Advisors' efforts in structuring the transaction. As another example, petitioners suggest that "`monitoring' fees were paid in cases where it was clear there would be nothing to monitor." Petitioners' position seems to rest on the premise that the fees Yorkville Advisors charged portfolio companies were at least misleading, if not downright deceptive.

The testimony of Messrs. Kreisler and Wright suggests that portfolio companies were relatively indifferent to whether the payments they made went to Yorkville Advisors or YA Global or whether the costs of the transaction to the companies took the form of interest, discounts, or fees given one label or another. But the characterization of fees should not have been a matter of indifference to Yorkville Advisors and YA Global's limited partners. For them, the labels given to the various fees had real economic consequences: Those designations affected whether the fees would go directly to the partnership (and thus necessarily shared among its limited partners) or instead were paid, in the first instance, to Yorkville Advisors, leaving to the latter's discretion the extent to which it would remit to the partnership any fees beyond those necessary to cover expenses.

In addition to paying at least market rates for the capital provided by YA Global,[28] the portfolio companies paid fees intended to cover the costs of the activities that Yorkville Advisors conducted on the partnership's behalf - that is, identifying, sourcing and negotiating transactions, conducting due diligence, and structuring and managing the transactions.[29] As indicated by the testimony of Messrs. Kreisler and Wright, the portfolio companies would not have entered into a transaction whose overall economics were unattractive. If the portfolio companies were willing to cover both the cost of Yorkville Advisors' activities and the cost of the capital they received, it follows that Yorkville Advisors' activities had value to the portfolio companies. If, as petitioners argue, Yorkville Advisors' activities were limited to managing YA Global's investments, the portfolio companies should have been unwilling to cover any of the costs of those activities.[30]

[28] The record provides no grounds for concluding that the terms on which YA Global provided capital to portfolio companies failed to provide the partnership with at least market-based returns. Petitioners suggest, contrary to Mr. Brokaw's testimony, that the discounts at which YA Global could acquire portfolio company stock under a SEDA were "blockage" discounts, reflecting thin trading in the stock of the portfolio companies and compensating the partnership for the risk that it would be unable to sell its shares into the market without depressing the market price. We need not resolve the dispute about whether the SEDA discounts were blockage discounts. Even if the discounts precisely compensated YA Global for the risk of being unable to sell the shares acquired without depressing their market price, the partnership would still have been paying an arm's-length price for the stock. The absence of market benchmarks for evaluating the terms of the convertible debentures makes it difficult to assess the adequacy of the stated interest rates. Those rates were presumably lower than what would have been provided in the absence of the conversion feature. But the record provides no evidence that any discount in interest rates was more than what would have been necessary to cover the value of the conversion right.

[29] While the fees that Yorkville Advisors was entitled to receive were intended to cover its expenses - and did so for 2004, and apparently for 2005 and 2006 as well - they seem not to have covered all of Yorkville Advisors' expenses for 2007 or 2008. As shown in our findings of fact, Yorkville Advisors' expenses did not decline at the same rate as the fees it received, perhaps because some of its expenses, such as office rent and at least some salaries, did not vary directly with transaction volume. Even so, the fees that Yorkville Advisors received, or was entitled to receive, covered 76.7% of expenses (as reported on Yorkville Advisors' tax return) for 2007 and 33.9% for 2008.

[30] Comparing YA Global's situation to that of the taxpayer in the "seminal" but "devoid of analysis" case on which petitioners rely, we doubt that the portfolio companies in which Mr. Higgins invested would have been favorably disposed to a request that they pay him fees sufficient to cover the costs of his New York office.

Concluding that the fees paid by portfolio companies were for benefits other than their receipt of capital does not depend on identifying specific services that the relevant agreements required Yorkville Advisors to provide. There would have been no apparent need for an agreement to impose on Yorkville Advisors the obligation to negotiate, structure, and document the transaction to which the agreement related. By the time the parties executed the agreement, the negotiating and structuring of the transaction would have been complete.

Nor is it of any moment that the fees that portfolio companies paid to Yorkville Advisors were not measured by the hours that Yorkville Advisors' employees devoted to a particular transaction. While charging a set amount per hour spent may be a common way to bill for legal and other services, parties can also agree to the provision of services in exchange for fixed fees.

More generally, the fees charged to portfolio companies were intended to cover Yorkville Advisors' variable costs and overhead. Yorkville Advisors was allowed, at its discretion, to remit to YA Global only that portion of the fees that exceeded the expenses incurred.

> We can thus infer that the amounts of the fees were set with an eye to the transaction costs incurred even if the fees were not determined by a strict hourly rate.
>
> It makes sense that the portfolio companies saw value in Yorkville Advisors' activities. The transactions in which they received needed capital would not have occurred but for Yorkville Advisors' efforts. YA Global's mere showing up on a portfolio company's doorstep with capital in hand would not have allowed the company to use that capital in its business. More had to be done. And that something more - the source of its professed competitive "edge" - was done by Yorkville Advisors.[31]
>
> > [31] As noted above, petitioners acknowledge that "[t]he `fees' paid by portfolio companies were...part of the cost they paid to gain access to YA Global's capital." Precisely. Paying to gain access to capital is not the same as paying for capital.
>
> In that respect, the activities that Yorkville Advisors conducted on behalf of YA Global can be meaningfully distinguished from those of a typical investor. Investors who purchase securities on the open market do not deal directly with the companies in which they invest. Any benefit to the issuer from the investor's purchase is negligible. The issuer receives no additional capital at that time. A given investor's market purchase increases the demand for the issuer's security and, together with other purchases, may increase the security's market price - an eventuality presumably favored by the issuer's management. But the issuer itself realizes no immediate benefit from any increase in the price at which its securities trade in the market. Even an investor who buys securities upon initial issuance provides no benefit to the issuer other than the capital provided. By contrast, when the purchaser of a security goes beyond simply deciding whether to purchase a security on the terms offered and arranges and structures the transaction in which the security is issued, the issuer realizes a benefit beyond the receipt of capital. In that circumstance, the issuer would have reason to pay for that additional benefit, as YA Global's portfolio companies apparently did in paying fees intended to cover the costs of Yorkville Advisors' activities.[32]
>
> > [32] In *Commissioner v. Groetzinger*, 480 U.S. at 30, the Court interpreted *Higgins* as "stand[ing] for the propositions that full-time market activity in managing and preserving one's own estate is not embraced within the phrase `carrying on a business.'" (Emphasis added.)

The court disposed of the taxpayers' attempted reliance on Code § 1234 regarding the termination of options. Then, in a discussion called "Trading Safe Harbor," the court explained:

> Just as the activities that Yorkville Advisors conducted on behalf of YA Global were not limited to the management of the partnership's investments, those activities were not limited to trading in stocks or securities. The reason that YA Global was not an investor during the years in issue was not that its portfolio turned over too rapidly. Instead, YA Global fails to qualify for the investment safe harbor because the income the partnership earned from portfolio companies went beyond returns on invested capital. In that respect, YA Global can be distinguished from both investors and traders. Traders, like investors, simply earn returns on the capital they invest. Because the portfolio companies compensated Yorkville Advisors and the partnership for benefits that went beyond the use of invested capital, YA Global was neither an investor nor a trader.[33] The activities that Yorkville Advisors conducted on the partnership's behalf during the years in issue were not covered by either the judicially created safe harbor for the managing of

investments or the statutory safe harbor for trading in securities provided in section 864(b)(2)(A).

> [33] YA Global would not fall within the trading safe harbor even if we were to accept that, under Treasury Regulation § 1.864-2(c)(2)(i)(c), the safe harbor covers any buying and selling of stocks or securities. The activities that Yorkville Advisors conducted on behalf of YA Global went beyond buying and selling socks or securities. Petitioners make no argument that the activities that Yorkville Advisors conducted in identifying, sourcing, and negotiating transactions - activities for which Yorkville Advisors was compensated by portfolio companies - were "closely related" to buying, selling, or trading in stocks or securities. Yorkville Advisors' activities can be readily distinguished from obtaining credit to buy, sell, or trade in stocks or securities. Yorkville Advisors' work in arranging for the issuance of stock or convertible debentures by a portfolio company could be viewed as a precondition to its purchase of that stock or those debentures. In that limited sense, Yorkville Advisors' activities could be likened to a taxpayer's obtaining the credit necessary to purchase stock or securities. But the taxpayer's obtaining of credit would not provide a benefit to the issuer of the stock or securities for which the issuer could be expected to compensate the taxpayer. As respondent observes, "Taxpayers engaged merely in trading and investment simply do not earn income designated as fees."

The court concluded:

> To sum up, the record establishes that the activities that Yorkville Advisors conducted on behalf of YA Global were continuous, regular, and directed at income or profit, went beyond the management of investments, and were not within the statutory safe harbor for securities trading. It follows that petitioners have not met their burden of proving that YA Global was not engaged in a U.S. trade or business - as defined by section 864(b), *Groetzinger*, and *Higgins* - during the years in issue.

II.G.4.l.i.(e). Family Office as a Trade or Business

This part II.G.4.l.i.(e) discusses tax issues. Part II.G.4.l.i.(f) Family Office – Securities Law Issues discusses certain regulation of family offices.

Part II.G.4.l.i.(d) Whether Managing Investments Constitutes a Trade or Business teaches:

- Managing one's own investments[1360] (or the investments of one's spouse and children)[1361] does not constitute a trade or business, unless one is a day trader or something similar.[1362]
- Managing another person's investments may constitute a trade or business, whether one's compensation is expressed as a fixed payment or a profits interest.[1363]
- However, a C corporation may deduct expenses of managing investments.[1364]

[1360] See fns 1342-1345, as well as part II.G.4.l.i.(a) "Trade or Business" Under Code § 162, especially fn 1298.
[1361] See text accompanying fns 1344-1345.
[1362] See fns 1346-1356 and the accompanying text.
[1363] See fns 1355-1359 and the accompanying text.
[1364] See text accompanying fn 1307 in part II.G.4.l.i.(a) "Trade or Business" Under Code § 162.

- Giving a C corporation that incurs investment management expenses a profits interest in an investment partnership allows the investors to deflect profits to the C corporation instead of trying to deduct investment fees themselves. However, a conservative approach of complying with proposed regulations regarding service partners adds significant complexity, making this planning complex from a financial and tax viewpoint, as described in this part II.G.4.l.i.(e). Before including a QTIP trust in such a partnership, consider parts II.H.2.c QTIP Trusts - Code § 2519 Trap and II.O.2.c Effect of Buy-Sell Agreement on Marital Deduction.

Concerned with the unfairness of disallowing deductions for activities designed to generate profit that did not rise to the level of a trade or business,[1365] Congress enacted Code § 212 to provide individuals with an itemized deduction for investment expenses.[1366] Congress even relaxed the rules if the individual could prove that the activity generated a profit in enough years or had sufficient profit motive.[1367]

However, 2017 tax reform disallowed investment expenses through December 31, 2025.[1368] Even when deductible for regular tax, they would not be deductible for alternative minimum tax purposes.[1369] Running expenses through a partnership or S corporation does not change this treatment.[1370]

Taxpayers may try to avoid these limitations by giving the investment manager a profits interest in a partnership through which they invest their taxable assets instead of paying an advisory fee. (The emphasis is on taxable investments, because one cannot deduct expenses incurred in managing tax-exempt investments.)[1371] Favorable precedent includes *Dagres*[1372] and *Lender Management*,[1373] both of which are described (*Lender Management* extensively) in part II.G.4.l.i.(d) Whether Managing Investments Constitutes a Trade or Business.

Deflecting the income to the investment management firm solves the investment partnership's owners' problem, but then one needs to consider the consequences of the investment management firm's expenses. To prevent the investment management firm from having the same problem regarding miscellaneous itemized deductions, the investment management firm needs to be engaged in a trade or business. As described in part II.G.4.l.i.(a) "Trade or Business" Under Code § 162, this inquiry depends on a variety of circumstances, and whether the investment management firm will be able to deduct the expenses is unpredictable, unless it is owned by an unrelated third party that provides services to a variety of clients. Of course, if the investment management firm is owned by third parties and one errs on the side of a higher

profits interest (so that the firm can pay its expenses), then one risks overpaying for the services.

In *Hellman v. Commissioner*, a case that was later settled with substantial income tax payments,[1374] the Tax Court's October 1, 2018 order included the following:

> These cases involve expense deductions claimed by GF Family Management, LLC (GFM), an investment management firm owned and operated by petitioners. Petitioners are members of the same family, and GFM is a "family office" as defined by the Federal securities laws. See 17 C.F.R. 275.202(a)(11)(G)-1(b)(1) and (d)(4). Each petitioner held a 25% profits interest in GFM, and the assets managed by GFM were held by six investment partnerships. GFM held a 1% interest in each partnership, and trusts of which petitioners are the beneficiaries held (individually or collectively) the remaining 99% of each partnership….
>
> These cases appear to resemble *Lender Management* in some respects, but not in others. GFM is a family office that managed investment assets for four family members. All four family members resided in the Atlanta metropolitan area and appear to have been on good terms. GFM received performance-based compensation keyed to the success of the investments it made. One investor, Mark Graham, appears to have had authority over day-to-day investment decisions. But here, unlike in Lender Management, all of the other investors were also owners of the management company, with each investor holding a 25% profits interest in GFM.
>
> Each party contends that summary judgment may be granted in his favor on the basis of the Court's legal rulings and factual findings in *Lender Management*. From our review of the facts currently contained in the record, we do not think that opinion dictates a ruling in favor of either side as a matter of law. In *Lender Management* we relied on a variety of factors tending to prove (or disprove) the existence of a "trade or business." Besides the manner in which the family office was compensated for its services, relevant factors may include but are not necessarily limited to: (1) the nature and extent of the services provided by the family office employees; (2) the relative amounts of expertise possessed and time devoted by family office employees versus outside investment managers and consultants; (3) the individualization of investment strategies for different family members with differing investment preferences and needs; and (4) the proportionality (or lack thereof) between the share of profits inuring to each family member in his or her capacity as an owner of the family office and the share of profits inuring to that same individual in his or her capacity as an investor in the managed funds.
>
> In cases such as these, an important question is whether the owners of the family office are "actively engaged in providing services to others," *Lender Management*, at *26, or are simply providing services to themselves. *See Dagres*, 136 T.C. at 281 ("Selling one's investment expertise to others is as much a business as selling one's legal expertise."). Here, each family member had a 25% profits interest in GFM. If each family member (for example) also had an aggregate 25% interest in the assets under management, there would be perfect proportionality between the two streams of income. In that event, it would not matter how GFM was compensated, because that compensation, once

[1374] On November 9, 2018, Judge Lauber entered a decision in docket no. 8486-17, confirming agreed-upon "deficiencies in income tax due from petitioners for the taxable years 2012, 2013, and 2014 in the amounts of $98,074.00, $138,055.00, and $132,459.00, respectively."

distributed ratably to the four owners, would simply replace investment income that each person would otherwise have derived from the investment portfolios. That was not the case in *Lender Management*, where one family member had a 99% profits interest in the management company, but held only minority interests in the assets under management. The facts currently in the record do not enable the Court to assess the degree or proportionality (or lack thereof) here.

We conclude that further factual development is necessary to shed light on this and other questions. Relevant facts may include the following:

- The education and professional background of each investor-employee.

- The work schedules of each investor-employee, with descriptions of the general work performed. Ideally, this information would include approximate hours worked weekly or monthly.

- Any details pertaining to the decision process by which GFM was selected as the management company, the decision process by which Mark Graham was chosen as GFM's manager, and the identities of any other candidates considered for these two roles.

- The net asset value of each investment partnership, on a quarterly, semiannual, and/or annual basis, during the 2012-2014 tax years in question and also during 2011 and 2015.

- The aggregate percentage ownership interest that each of the four family members had in the total assets held by all the investment partnerships. Such percentage figures might be provided on a quarterly, semi-annual, and/or annual basis, for the 2012-2014 tax years in question and also for 2011 and 2015.

- Information concerning the major investments held by each investment partnership and the estimated dollar value of those investments.

- The similarities and distinctions between the investment strategies and objectives of each investment partnership. Relevant distinguishing factors might include average asset turnover, relative investment horizons, and the relative risk and nature of the investments made.

- How (if at all) the investment strategies and objectives of the partnerships were tailored to the individual needs and preferences of the four family members.

- Any additional facts the parties believe would be relevant to the "trade or business" analysis as undertaken in *Lender Management*.

The IRS attacks may seek to recharacterize the profits interest, which deflects income, as a nondeductible guaranteed payment; to defend against this attack, the investment management firm's profits interest should have real entrepreneurial risk.[1375] Here are some guidelines under the rules described in fn 1375:

- The budgeted annual profits interest should be reasonable. Consider weighing the possibility of making a gift in granting a vested interest that might exceed annual reasonable compensation[1376] against what might seem like a third party at-will relationship if the profits interest is terminable at will or is constantly being tinkered with. Ultimately, I favor allowing termination or periodic adjustments, so long as the partnership has a business reason for the investment management company's continued involvement, such as wanting a management company with a stable leadership team invested in the partnership's ongoing success, and the adjustments do not happen too frequently.

- Although a preferred profits interest is consistent with the partnership income tax rules generally, such an interest in a marketable securities partnership might be perceived to reduce entrepreneurial risk, and a cap on a profits interest might be perceived to resemble a fee. Therefore, a straight pro rata percentage of all partnership items seems safer.

- The government is concerned about a service partner being able to manipulate the annual profits to generate a steady fee. How this might play out in an investment partnership might be the service partner deciding how to time capital gains and losses. Accordingly, consider making distributions (other than tax distributions) be based on the lesser of cumulative realized net income or cumulative combined realized and unrealized net income. This introduces some complexity, in that distributions of income earned and taxed in one year might be suspended due to unrealized losses and need to be made up in a future year when any unrealized losses are reversed (through being recognized or through growth in value).

- Suppose the partnership starts off well and the investment management company receives significant distributions, then the partnership doesn't do so well but the management company keeps the money. The IRS suggested that such an arrangement would seem like a fee, rather than the management company facing an entrepreneurial risk of loss. Therefore, the preamble and proposed regulations introduced the idea of clawback – the investment management company must repay the distributions. This clawback idea does envision the investment management company keeping tax distributions, which would be only fair considering that it cannot get a refund by carrying back a net operating loss[1377] and generally a capital loss is not deducible in excess of capital gains.[1378] The preamble and proposed regulations do not specify when the repayment of distributions must occur; perhaps it could occur when the partnership terminates, but query whether it should occur much sooner to feel more "real."

Issuing a pure profits interest is a nontaxable event for income tax purposes,[1379] presumably because the holder will be earning income each year as profits are received. The structure

---

[1375] See fns 524-544 in part II.C.8.a Code § 707 - Compensating a Partner for Services Performed. The paragraphs preceding and encompassing the text accompanying fns 541-544 focus on entrepreneurial risk and make structuring the profits interest somewhat tricky.
[1376] See fn 1382 and the accompanying text.
[1377] See part II.G.4.l.ii Net Operating Loss Deduction.
[1378] The rule and exceptions are described in the text accompanying fns 1550-1552 in part II.G.8 Code § 165(a) Loss for Worthlessness; Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A Limitation on that Strategy and fn 1423 in part II.G.4.m.i Code § 1341 Claim of Right Deduction.
[1379] See part II.M.4.f Issuing a Profits Interest to a Service Provider.

described above distributes profits to all parties out of the same pool. However, it may be desirable to distribute profits in tiers, each of which has different allocations; this is called a preferred profits interest.[1380]

If there is risk that the investment management firm may not be able to deduct its expenses, consider using a C corporation for its choice of entity. A C corporation's federal tax rate is 21%, compared to 23.8% for qualified dividends and long-term capital gains and 40.8% for other ordinary income paid to an individual in the highest federal income tax bracket. Its deductions for state income tax are not limited. Furthermore, when a C corporation receives dividends from a domestic corporation, it can exclude at least 50% of them from income. For details, see part II.E.1.g Whether a High-Bracket Taxpayer Should Hold Long-Term Investments in a C Corporation. A C corporation is also more likely than an individual to be able to deduct investment expenses under Code § 162.[1381]

I'm not a fan of C corporations, because double tax generally will apply, when the earnings come out, sooner or later, making them more expensive in the long-run (depending on the time value of money) than pass-through entities. See part II.E.1 Comparing Taxes on Annual Operations of C Corporations and Pass-Through Entities. However, if the investment management firm is spending its income on providing investment management services, then it might not accumulate much income to distribute.

Thus, a C corporation offers reduced income tax rates on investment income and deduction of none, part, or all of the investment management expenses. A corporation that does not pay dividends may become subject to the 20% accumulated earnings tax or personal holding company income tax. See part 0 No distributions under Biden's plan:

Biden Plan	
Distributing 50% of Corporate Net Income After Income Tax	
Corporate Taxable Income	$100,000
Federal and State Income Tax	-36,800
Net Income after Income Tax	$63,200

So, effective tax rates under current law are 55.8% distributing all earnings, 42.8% distributing half of the earnings, and 29.8% distributing none of the earnings.

Effective tax rates under the Biden plan are 72.6% distributing all earnings, 54.7% distributing half of the earnings, and 36.8% distributing none of the earnings.

Incentives to Declare Dividends.

Now for some additional caveats:

[1380] See generally part II.H.11 Preferred Partnership to Obtain Basis Step-Up on Retained Portion.
[1381] See text accompanying fn 1307 in part II.G.4.l.i.(a) "Trade or Business" Under Code § 162.

If the investment management firm is owned by family members who also own the investment partnership but is not owned in the same proportion as the investment partnership, an unexpected gift may be deemed to have been made.[1382] I expect this gift to be minimal, because the profits interest is annually renewable, but calculations under the regulations under Code § 2701 may generate gifts beyond reasonable expectations.

If the corporation provides personal services that do not relate to managing investments, be sure to charge for them. Failure to charge can constitute a constructive dividend, cause the expenses to be disallowed at the corporate level and incur a taxable dividend to the shareholder.[1383]

Furthermore, accounting for investment partnerships can be complex. A partnership needs to account for built-in gain and loss not only with respect to assets contributed to the partnership but also for assets that the partnership owns when partners come and go. See part II.P.1.a.i.(b) Special Rules for Allocations of Income in Securities Partnerships. Also, contributions of cash within two years before or after a distribution of property raises issues described in part II.Q.8.b.i.(c) Disguised Sale from Partnership to Partner, and contributions of property within two years before or after a distributions of cash raises issues described in part II.M.3.e Exception: Disguised Sale Rules.

Given all of the issues described in this part II.G.4.l.i.(e), one might not even consider this structure unless annual investment management fees exceed $200,000.

II.G.4.l.i.(f). Family Office – Securities Law Issues

I am not a securities law expert. Below is a description of the "family office" exemption from registration under the Investment Advisers Act of 1940. The Securities & Exchange Commission (SEC) explained:[1384]

> The failure of a family office to be able to meet the conditions of the rule will not preclude the office from providing advisory services to family members either collectively or individually. Rather, the family office will need to register under the Advisers Act (unless another exemption is available) or seek an exemptive order from the Commission. A number of family offices currently are registered under the Advisers Act.

A "family office," as defined in 17 C.F.R. § 275.202(a)(11)(G)-1, is not considered an "investment adviser" for purpose of the Investment Advisers Act of 1940.[1385] Certain pre-2010 persons are automatically considered "family offices" under this rule.[1386] Being excluded from

[1382] See part III.B.7.c.ii Profits Interest in a Partnership in Which Transferor and Applicable Family Members Initially Hold Only a Profits Interest, which is part of part III.B.7.c Code § 2701 Interaction with Income Tax Planning and informed by part III.B.7.b Code § 2701 Overview.

[1383] See part II.Q.7.a.iv Dividends; Avoiding Dividend Treatment Using Redemptions under Code §§ 302 and 303.

[1384] Part II of RIN 3235-AK66, which is SEC Release No. IA-3220; File No. S7-25-10.

[1385] 17 C.F.R. § 275.202(a)(11)(G)-1(a).

[1386] 17 C.F.R. § 275.202(a)(11)(G)-1(c) provides:

> *Grandfathering*. A family office as defined in paragraph (a) of this section shall not exclude any person, who was not registered or required to be registered under the Act on January 1, 2010, solely because such person provides investment advice to, and was engaged before January 1, 2010 in providing investment advice to:

the definition of an "investment adviser" for purpose of the Investment Advisers Act of 1940 precludes state regulation.[1387]

Otherwise, for purposes of the family office exclusion:[1388]

> A family office is a company (including its directors, partners, members, managers, trustees, and employees acting within the scope of their position or employment) that:
>
> (1) Has no clients other than family clients;[1389] provided that if a person that is not a family client becomes a client of the family office as a result of the death of a family

---

(1) Natural persons who, at the time of their applicable investment, are officers, directors, or employees of the family office who have invested with the family office before January 1, 2010 and are accredited investors, as defined in Regulation D under the Securities Act of 1933;

(2) Any company owned exclusively and controlled by one or more family members; or

(3) Any investment adviser registered under the Act that provides investment advice to the family office and who identifies investment opportunities to the family office, and invests in such transactions on substantially the same terms as the family office invests, but does not invest in other funds advised by the family office, and whose assets as to which the family office directly or indirectly provides investment advice represents, in the aggregate, not more than 5 percent of the value of the total assets as to which the family office provides investment advice; provided that a family office that would not be a family office but for this paragraph (c) shall be deemed to be an investment adviser for purposes of paragraphs (1), (2) and (4) of section 206 of the Act.

[1387] 15 U.S.C. § 80b-3a(b) provides:

(1) *In general*. No law of any State or political subdivision thereof requiring the registration, licensing, or qualification as an investment adviser or supervised person of an investment adviser shall apply to any person--

 (A) that is registered under section 80b-3 of this title as an investment adviser, or that is a supervised person of such person, except that a State may license, register, or otherwise qualify any investment adviser representative who has a place of business located within that State;

 (B) that is not registered under section 80b-3 of this title because that person is excepted from the definition of an investment adviser under section 80b-2(a)(11) of this title; or

 (C) that is not registered under section 80b-3 of this title because that person is exempt from registration as provided in subsection (b)(7) of such section, or is a supervised person of such person.

(2) *Limitation*. Nothing in this subsection shall prohibit the securities commission (or any agency or office performing like functions) of any State from investigating and bringing enforcement actions with respect to fraud or deceit against an investment adviser or person associated with an investment adviser.

15 U.S.C. § 80b-2(a)(11) provides:

"Investment adviser" means any person who, for compensation, engages in the business of advising others, either directly or through publications or writings, as to the value of securities or as to the advisability of investing in, purchasing, or selling securities, or who, for compensation and as part of a regular business, issues or promulgates analyses or reports concerning securities; but does not include … (G) any family office, as defined by rule, regulation, or order of the Commission, in accordance with the purposes of this subchapter; or (H) such other persons not within the intent of this paragraph, as the Commission may designate by rules and regulations or order.

[1388] 17 C.F.R. § 275.202(a)(11)(G)-1(b).

[1389] [This footnote is not from the quoted material.] For the definition of a "family client," see text accompanying fn 1394.

member[1390] or key employee[1391] or other involuntary transfer from a family member or key employee, that person shall be deemed to be a family client for purposes of this section for one year following the completion of the transfer of legal title to the assets resulting from the involuntary event;

(2) Is wholly owned by family clients and is exclusively controlled[1392] (directly or indirectly) by one or more family members and/or family entities;[1393] and

(3) Does not hold itself out to the public as an investment adviser.

The rule does not explain what a "client" is, but it does define "family client" as:[1394]

(i) Any family member;[1395]

[1390] [This footnote is not from the quoted material.] 17 C.F.R. § 275.202(a)(11)(G)-1(d)(6) provides:

Family member means all lineal descendants (including by adoption, stepchildren, foster children, and individuals that were a minor when another family member became a legal guardian of that individual) of a common ancestor (who may be living or deceased), and such lineal descendants' spouses or spousal equivalents; provided that the common ancestor is no more than 10 generations removed from the youngest generation of family members.

[1391] [This footnote is not from the quoted material.] For the definition of a "key employee," see text accompanying fn 1399.

[1392] [This footnote is not from the quoted material.] 17 C.F.R. § 275.202(a)(11)(G)-1(d)(2) provides:

Control means the power to exercise a controlling influence over the management or policies of a company, unless such power is solely the result of being an officer of such company.

Part II of RIN 3235-AK66, which is SEC Release No. IA-3220; File No. S7-25-10.

Commenters persuaded us to expand who may own the family office from "family members" to "family clients." This change is consistent with the intent behind our proposed language (which contemplated that the family could own the family office indirectly) and more clearly allows family members to structure their ownership of the family office for tax or other reasons. We also agree with suggestions that the rule permit key employees to own a non-controlling stake in the family office to serve as part of an incentive compensation package for key employees. We remain convinced, however, that for our core policy rationale to be fulfilled - that a family office is essentially a family managing its own wealth - the family, directly or indirectly, should control the family office. Accordingly, the final rule provides that while family clients may own the family office, family members and family entities (*i.e.*, their wholly owned companies or family trusts) must control the family office.[109]

[109] We note that, as proposed, we are not limiting the exclusion to a family office that is not operated for the purpose of generating a profit. We also note that some family offices may be structured such that all or a portion of family client investment gains are distributed as dividends from the family office (when family clients own the family office) and that a not-for-profit requirement would preclude this family office structure. We were persuaded by several commenters who cautioned against limiting the exclusion for family offices to those that operate on a not-for-profit basis, arguing that it would be difficult to administer and is unnecessary given the limited clientele that a family office may advise and rely on the exclusion. *See, e.g.*, AICPA Letter; Davis Polk Letter; Kozusko Letter.

[1393] [This footnote is not from the quoted material.] 17 C.F.R. § 275.202(a)(11)(G)-1(d)(5) provides:

Family entity means any of the trusts, estates, companies or other entities set forth in paragraphs (d)(4)(v), (vi), (vii), (viii), (ix), or (xi) of this section, but excluding key employees and their trusts from the definition of family client solely for purposes of this definition.

[1394] 17 C.F.R. § 275.202(a)(11)(G)-1(d)(4).

[1395] [This footnote is not from the quoted material.] For the definition of a "family member," see text accompanying fn 1390.

(ii) Any former family member;[1396]

(iii) Any key employee;[1397]

(iv) Any former key employee, provided that upon the end of such individual's employment by the family office, the former key employee shall not receive investment advice from the family office (or invest additional assets with a family office-advised trust, foundation or entity) other than with respect to assets advised (directly or indirectly) by the family office immediately prior to the end of such individual's employment, except that a former key employee shall be permitted to receive investment advice from the family office with respect to additional investments that the former key employee was contractually obligated to make, and that relate to a family-office advised investment existing, in each case prior to the time the person became a former key employee.

(v) Any non-profit organization, charitable foundation, charitable trust (including charitable lead trusts and charitable remainder trusts whose only current beneficiaries[1398] are other family clients and charitable or non-profit organizations), or other charitable organization, in each case for which all the funding such foundation, trust or organization holds came exclusively from one or more other family clients;

(vi) Any estate of a family member, former family member, key employee, or, subject to the condition contained in paragraph (d)(4)(iv) of this section, former key employee;

(vii) Any irrevocable trust in which one or more other family clients are the only current beneficiaries;

(viii) Any irrevocable trust funded exclusively by one or more other family clients in which other family clients and non-profit organizations, charitable foundations, charitable trusts, or other charitable organizations are the only current beneficiaries;

(ix) Any revocable trust of which one or more other family clients are the sole grantor;

(x) Any trust of which: Each trustee or other person authorized to make decisions with respect to the trust is a key employee; and each settlor or other person who has contributed assets to the trust is a key employee or the key employee's current

---

1396 [This footnote is not from the quoted material.] 17 C.F.R. § 275.202(a)(11)(G)-1(d)(7) provides:

> Former family member means a spouse, spousal equivalent, or stepchild that was a family member but is no longer a family member due to a divorce or other similar event.

1397 [This footnote is not from the quoted material.] For the definition of a "key employee," see text accompanying fn 1399.

1398 [This footnote is not from the quoted material.] Part II.A.1.c of RIN 3235-AK66, which is SEC Release No. IA-3220; File No. S7-25-10, explains:

> As suggested by commenters, the final rule disregards contingent beneficiaries of trusts, which commenters explained are often named in the event that all family members are deceased to prevent the trust from distributing assets to distant relatives or escheating to the state.[51] If the contingent beneficiary later becomes an actual beneficiary and is not a permitted current beneficiary of a family trust under the exclusion (such as a family friend), the rule's provisions concerning involuntary transfers allow for an orderly transition of investment advice regarding those assets away from the family office.
>
> 51 *See, e.g.*, Comment Letter of Arnold & Porter LLP (Nov. 11, 2010); Bessemer Letter.

and/or former spouse or spousal equivalent who, at the time of contribution, holds a joint, community property, or other similar shared ownership interest with the key employee; or

(xi) Any company wholly owned (directly or indirectly) exclusively by, and operated for the sole benefit of, one or more other family clients; provided that if any such entity is a pooled investment vehicle, it is excepted from the definition of "investment company" under the Investment Company Act of 1940.

The definition of "key employee" has a few components:[1399]

- A "natural person," including "any key employee's spouse or spouse equivalent[1400] who holds a joint, community property, or other similar shared ownership interest with that key employee."
- Who either:[1401]
  - Is "an executive officer,[1402] director, trustee, general partner, or person serving in a similar capacity of the family office or its affiliated family office,"[1403] or

---

[1399] 17 C.F.R. § 275.202(a)(11)(G)-1(d)(8).

[1400] [This footnote was not in the quote.] 17 C.F.R. § 275.202(a)(11)(G)-1(d)(9) provides:

> Spousal equivalent means a cohabitant occupying a relationship generally equivalent to that of a spouse.

[1401] I wasn't quite sure of this breakdown the way that 17 C.F.R. § 275.202(a)(11)(G)-1(d)(8) reads. However, part II.A.1.f of RIN 3235-AK66, which is SEC Release No. IA-3220; File No. S7-25-10, provides:

> The final rule treats certain key employees of the family office, their estates, and certain entities through which key employees may invest as family clients so that they may receive investment advice from, and participate in investment opportunities provided by, the family office. More specifically, the final rule permits the family office to provide investment advice to any natural person (including any key employee's spouse or spousal equivalent who holds a joint, community property or other similar shared ownership interest with that key employee) who is (i) an executive officer, director, trustee, general partner, or person serving in a similar capacity at the family office or its affiliated family office or (ii) any other employee of the family office or its affiliated family office (other than an employee performing solely clerical, secretarial, or administrative functions) who, in connection with his or her regular functions or duties, participates in the investment activities of the family office or affiliated family office, provided that such employee has been performing such functions or duties for or on behalf of the family office or affiliated family office, or substantially similar functions or duties for or on behalf of another company, for at least twelve months.[79] The final rule also permits the family office to advise certain trusts of key employees, as further described below. Finally, in addition to receiving direct advice from the family office, key employees (because they are "family clients") may indirectly receive investment advice through the family office by their investment in family office-advised private funds, charitable organizations, and other family entities, as described in previous sections of this Release.
>
> [79] Rule 202(a)(11)(G)-1(d)(8).

[1402] [This footnote was not in the quote.] 17 C.F.R. § 275.202(a)(11)(G)-1(d)(3) provides:

> Executive officer means the president, any vice president in charge of a principal business unit, division or function (such as administration or finance), any other officer who performs a policy-making function, or any other person who performs similar policy-making functions, for the family office.

[1403] 17 C.F.R. § 275.202(a)(11)(G)-1(d)(1) provides:

- Is an "employee of the family office or its affiliated family office[1404] (other than an employee performing solely clerical, secretarial, or administrative functions with regard to the family office) who, in connection with his or her regular functions or duties, participates in the investment activities of the family office or affiliated family office, provided that such employee has been performing such functions and duties for or on behalf of the family office or affiliated family office, or substantially similar functions or duties for or on behalf of another company, for at least 12 months."

II.G.4.l.ii. Net Operating Loss Deduction (Code § 172)

If net losses from business activities cause a taxpayer to have a negative taxable income, Code § 172 may allow a taxpayer to deduct a net operating loss (NOL).[1405] Note that one does not generate an NOL until after applying limitations relating to debt-financed or other losses described in parts II.G.4.c Basis Limitations for Deducting Partnership and S Corporation Losses and II.G.4.j At Risk Rules (Including Some Related Discussion of Code § 752 Allocation of Liabilities).

This part II.G.4.l.ii is intended only to provide a broad overview of how NOLs fit into the overall scheme of loss deductions; it is not intended to teach one how to compute or efficiently use NOLs.

2017 tax reform eliminated the NOL carryback and now provides an unlimited NOL carryforward.[1406] However, the 2020 CARES Act temporarily reinstated the carryback. The Senate Finance Committee Report explained:

> Affiliated family office means a family office wholly owned by family clients of another family office and that is controlled (directly or indirectly) by one or more family members of such other family office and/or family entities affiliated with such other family office and has no clients other than family clients of such other family office.

For the definition of a "family entity," see fn 1393.

[1404] See fn 1403.

[1405] Code § 172(d)(4), "Nonbusiness deductions of taxpayers other than corporations," excludes the following from computing a net operating loss:

> In the case of a taxpayer other than a corporation, the deductions allowable by this chapter which are not attributable to a taxpayer's trade or business shall be allowed only to the extent of the amount of the gross income not derived from such trade or business. For purposes of the preceding sentence -
>
> (A) any gain or loss from the sale or other disposition of -
>
> (i) property, used in the trade or business, of a character which is subject to the allowance for depreciation provided in section 167, or
>
> (ii) real property used in the trade or business,
>
> shall be treated as attributable to the trade or business;
>
> (B) the modifications specified in paragraphs (1), (2)(B), and (3) shall be taken into account;
>
> (C) any deduction for casualty or theft losses allowable under paragraph (2) or (3) of section 165(c) shall be treated as attributable to the trade or business; and
>
> (D) any deduction allowed under section 404 to the extent attributable to contributions which are made on behalf of an individual who is an employee within the meaning of section 401(c)(1) shall not be treated as attributable to the trade or business of such individual.

See also parts II.G.26.b Real Estate as a Trade or Business and II.G.4.l.i Trade or Business; Limitations on Deductions Attributable to Activities Not Engaged in for Profit.

[1406] Code § 172(a), (b).

Section 2303. Modifications for net operating losses

The provision relaxes the limitations on a company's use of losses. Net operating losses (NOL) are currently subject to a taxable-income limitation, and they cannot be carried back to reduce income in a prior tax year. The provision provides that an NOL arising in a tax year beginning in 2018, 2019, or 2020 can be carried back five years. The provision also temporarily removes the taxable income limitation to allow an NOL to fully offset income. These changes will allow companies to utilize losses and amend prior year returns, which will provide critical cash flow and liquidity during the COVID-19 emergency.

Section 2304. Modification of limitation on losses for taxpayers other than corporations

The provision modifies the loss limitation applicable to pass-through businesses and sole proprietors, so they can utilize excess business losses and access critical cash flow to maintain operations and payroll for their employees.

Note that the 2020 CARES Act provision described above and effectuated below does not provide immediate relief for 2020 losses, because 2020 NOLs will not be determined until taxpayers file their 2020 returns in the spring of 2021. However, a taxpayer owing 2019 tax might be able to get an installment agreement with the IRS and then use the NOL towards payments deferred until 2021 and future years. If an owner of a pass-through entity pledges his anticipated NOL carryback refund (offsetting income from that entity reported on prior years' returns) to secure a loan to the entity while entity is in bankruptcy, the bankruptcy court may enforce that pledge;[1407] furthermore, a refund of taxes paid with respect to one spouse's income is not tenancy-by-the-entirety property.[1408] The IRS has posted unofficial guidance as Frequently Asked Questions: Temporary procedures to fax certain Forms 1139 and 1045 due to COVID-19; if that link does not work or to get information on this and other topics regarding the 2020 CARES Act, go to Coronavirus Tax Relief and Economic Impact Payments.

Accordingly, Code § 172(a) allows "a deduction for the taxable year an amount equal to"

(1) in the case of a taxable year beginning before January 1, 2021, the aggregate of the net operating loss carryovers to such year, plus the net operating loss carrybacks to such year, and

(2) in the case of a taxable year beginning after December 31, 2020, the sum of -

(A) the aggregate amount of net operating losses arising in taxable years beginning before January 1, 2018, carried to such taxable year, plus

(B) the lesser of -

(i) the aggregate amount of net operating losses arising in taxable years beginning after December 31, 2017, carried to such taxable year, or

[1407] *In re: Somerset Regional Water Resources, LLC*, 949 F.3d 837 (3rd Cir. 2020), interpreting an ambiguous pledge agreement in favor of providing the security the lender reasonably expected.
[1408] *In re: Somerset Regional Water Resources, LLC*, 949 F.3d 837 (3rd Cir. 2020), with an extensive quote on this subject in the text accompanying fn 1145 in part II.F.7 Tenancy by the Entirety.

(ii) 80 percent of the excess (if any) of –[1409]

(I) taxable income computed without regard to the deductions under this section and sections 199A and 250, over

(II) the amount determined under subparagraph (A).

Code § 172(b), "Net operating loss carrybacks and carryovers," includes:

- (1) "Years to which loss may be carried,"
- (2) "Amount of carrybacks and carryovers," and
- (3) "Election to waive carryback."

Code § 172(b)(1)(D), "Special Rule For Losses Arising in 2018, 2019, and 2020," provides:

(i) *In General.* In the case of any net operating loss arising in a taxable year beginning after December 31, 2017, and before January 1, 2021 -

(I) such loss shall be a net operating loss carryback to each of the 5 taxable years preceding the taxable year of such loss, and

(II) subparagraphs (B) and (C)(i) shall not apply.

P.L. 116-260, § 281(a), Div. N, added § 2303(e) to P.L. 116-136, retroactively, so that P.L. 116-136, § 2303(e), "Special rules with respect to farming losses," provides:

(1) *Election to disregard application of amendments made by subsections (a) and (b)*.

(A) *In general*. If a taxpayer who has a farming loss (within the meaning of section 172(b)(1)(B)(ii) of the Internal Revenue Code of 1986) for any taxable year beginning in 2018, 2019, or 2020 makes an election under this paragraph, then -

(i) the amendments made by subsection (a) shall not apply to any taxable year beginning in 2018, 2019, or 2020, and

(ii) the amendments made by subsection (b) shall not apply to any net operating loss arising in any taxable year beginning in 2018, 2019, or 2020.

(B) *Election*.

(i) *In general*. Except as provided in clause (ii)(II), an election under this paragraph shall be made in such manner as may be prescribed by the Secretary. Such election, once made, shall be irrevocable.

[1409] [My footnote:] The 2020 CARES Act also amended Code § 172(b)(2)(C) to provide that, "For purposes of the preceding sentence, the taxable income for any such prior taxable year shall" …

(C) for taxable years beginning after December 31, 2020, be reduced by 20 percent of the excess (if any) described in subsection (a)(2)(B)(ii) for such taxable year.

(ii) *Time for making election*.

(I) *In general*. An election under this paragraph shall be made by the due date (including extensions of time) for filing the taxpayer's return for the taxpayer's first taxable year ending after the date of the enactment of the COVID-related Tax Relief Act of 2020.

(II) *Previously filed returns*. In the case of any taxable year for which the taxpayer has filed a return of Federal income tax before the date of the enactment of the COVID-related Tax Relief Act of 2020 which disregards the amendments made by subsections (a) and (b), such taxpayer shall be treated as having made an election under this paragraph unless the taxpayer amends such return to reflect such amendments by the due date (including extensions of time) for filing the taxpayer's return for the first taxable year ending after the date of the enactment of the COVID-related Tax Relief Act of 2020.

(C) *Regulations*. The Secretary of the Treasury (or the Secretary's delegate) shall issue such regulations and other guidance as may be necessary to carry out the purposes of this paragraph, including regulations and guidance relating to the application of the rules of section 172(a) of the Internal Revenue Code of 1986 (as in effect before the date of the enactment of the CARES Act) to taxpayers making an election under this paragraph.

(2) *Revocation of election to waive carryback*. The last sentence of section 172(b)(3) of the Internal Revenue Code of 1986 and the last sentence of section 172(b)(1)(B) of such Code shall not apply to any election -

(A) which was made before the date of the enactment of the COVID-related Tax Relief Act of 2020, and

(B) which relates to the carryback period provided under section 172(b)(1)(B) of such Code with respect to any net operating loss arising in taxable years beginning in 2018 or 2019."

Rev. Proc. 2021-14, Section 1.02 provides:

> Specifically, this revenue procedure prescribes when and how to make an election with regard to all NOLs of the taxpayer, regardless of whether the NOL is a Farming Loss NOL. This revenue procedure also provides that a taxpayer is treated as having made a deemed election under § 2303(e)(1) of the CARES Act if the taxpayer, before December 27, 2020, filed one or more original or amended Federal income tax returns, or applications for tentative refund, that disregard the CARES Act Amendments with regard to a Farming Loss NOL. This revenue procedure further prescribes when and how to revoke an election made under § 172(b)(1)(B)(iv) or § 172(b)(3) of the Code to waive the two-year carryback period for the farming loss portion of a Farming Loss NOL incurred in a taxable year beginning in 2018 or 2019.

More about NOL carryback procedures under Code § 172 follows after discussing the limits Code § 461(*l*) places on individuals.

IRS training on 2017 changes, "Modification of Net Operating Loss Deduction," is at https://www.irs.gov/pub/newsroom/tcja-training-provision-13302-modified-nol.pdf. The Internal Revenue Manual procedural update, "Carryback CARES Act Guidance," amended IRM subsection 21.5.9, at https://www.irs.gov/pub/foia/ig/wi/wi-21-0520-0589_redacted.pdf.

Code § 461(*l*), "Limitation on Excess Business Losses of Noncorporate Taxpayers," provides:

(1) *Limitation*. In the case of taxable year of a taxpayer other than a corporation -

(A) for any taxable year beginning after December 31, 2017, and before January 1, 2026, subsection (j) (relating to limitation on excess farm losses of certain taxpayers) shall not apply, and

(B) for any taxable year beginning after December 31, 2020, and before January 1, 2026, any excess business loss of the taxpayer for the taxable year shall not be allowed.

(2) *Disallowed Loss Carryover*. Any loss which is disallowed under paragraph (1) shall be treated as net operating loss for the taxable year for purposes of determining any net operating loss carryover under section 172(b) for subsequent taxable years.

(3) *Excess Business Loss*. For purposes of this subsection -

(A) *In General*. The term "excess business loss" means the excess (if any) of –

(i) the aggregate deductions of the taxpayer for the taxable year which are attributable to trades or businesses of such taxpayer (determined without regard to whether or not such deductions are disallowed for such taxable year under paragraph (1) and without regard to any deduction allowable under section 172 or 199A),[1410] over

(ii) the sum of –

(I) the aggregate gross income or gain of such taxpayer for the taxable year which is attributable to such trades or businesses, plus

(II) $250,000 (200 percent of such amount in the case of a joint return).

Such excess shall be determined without regard to any deductions, gross income, or gains attributable to any trade or business of performing services as an employee.

(B) *Treatment Of Capital Gains And Losses*.

(i) *Losses*. Deductions for losses from sales or exchanges of capital assets shall not be taken into account under subparagraph (A)(i).

[1410] [My footnote:] See part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income, especially fn 773 in part II.E.1.c.i.(b) Other Federal Effects of Code § 199A Deduction.

(ii) *Gains*. The amount of gains from sales or exchanges of capital assets taken into account under subparagraph (A)(ii) shall not exceed the lesser of -

(I) the capital gain net income determined by taking into account only gains and losses attributable to a trade or business, or

(II) the capital gain net income.

(C) *Adjustment for Inflation*. In the case of any taxable year beginning after December 31, 2018, the $250,000 amount in subparagraph (A)(ii)(II) shall be increased by an amount equal to -

(i) such dollar amount, multiplied by

(ii) the cost-of-living adjustment determined under section 1(f)(3) for the calendar year in which the taxable year begins, determined by substituting "2017" for "2016" in subparagraph (A)(ii) thereof.

If any amount as increased under the preceding sentence is not a multiple of $1,000, such amount shall be rounded to the nearest multiple of $1,000.

(4) *Application of Subsection in Case of Partnerships and S Corporations*. In the case of a partnership or S corporation -

(A) this subsection shall be applied at the partner or shareholder level, and

(B) each partner's or shareholder's allocable share of the items of income, gain, deduction, or loss of the partnership or S corporation for any taxable year from trades or businesses attributable to the partnership or S corporation shall be taken into account by the partner or shareholder in applying this subsection to the taxable year of such partner or shareholder with or within which the taxable year of the partnership or S corporation ends.

For purposes of this paragraph, in the case of an S corporation, an allocable share shall be the shareholder's pro rata share of an item.

(5) *Additional Reporting*. The Secretary shall prescribe such additional reporting requirements as the Secretary determines necessary to carry out the purposes of this subsection.

(6) *Coordination with Section 469*. This subsection shall be applied after the application of section 469.[1411]

As to Code § 461(*l*), IRS training, "Limitation on Losses for Taxpayers other than Corporations," is at https://www.irs.gov/pub/newsroom/tcja-training-provision-11012-limits-on-losses.pdf.

I have heard uncertainty expressed regarding how alternative minimum tax (AMT) carrybacks work for C corporations, given that AMT income is no longer calculated because 2017 tax reform repealed AMT for 2018 and future years.

[1411] [My footnote:] For Code § 469, see part II.K Passive Loss Rules.

Guidance under the 2020 CARES Act helps taxpayers expedite their tentative NOL carryback refunds. Such a tentative refund generally pays the taxpayer the claimed refund (generally within 90 days of making the claim) and is subject to review, etc. after the refund. Notice 2020-26 "extends the deadline for filing an application for a tentative carryback adjustment … with respect to the carryback of an NOL that arose in any taxable year that began during calendar year 2018 and that ended on or before June 30, 2019."[1412] Rev. Proc. 2020-24 provides guidance regarding elections relating to NOL carrybacks from 2018, 2019, or 2020.[1413]

CCA 201928014 explained how its author believed a corporation computes its charitable deduction[1414] in conjunction with net operating losses:

> <u>ISSUES</u>
>
> (1) Taxpayer has both charitable contribution and net operating loss carryovers from multiple tax years available in the year at issue. Section 170(d)(2)(B) requires a reduction to a taxpayer's charitable contribution carryover to the extent an excess charitable contribution reduces modified taxable income (as computed under § 172(b)(2)) and increases an NOL carryover, so as to eliminate a double tax benefit. Is Taxpayer required to calculate the charitable contribution carryover adjustment using a year-by-year or an aggregate NOL computation under § 172(b)(2)?
>
> (2) Taxpayer has a charitable contribution carryover set to expire in the year at issue pursuant to the five-year carryover period provided in § 170(d)(2).

[1412] Notice 2020-26, Section 3, "Extension of Time to File," begins with:

> The Department of the Treasury and the IRS grant a six-month extension of time to file Form 1045 or Form 1139, as applicable, to taxpayers that have an NOL that arose in a taxable year that began during calendar year 2018 and that ended on or before June 30, 2019. This extension of time is limited to requesting a tentative refund to carry back an NOL and does not extend the time to carry back any other item.
>
> For example, in the case of an NOL that arose in a taxable year ending on December 31, 2018, a taxpayer normally would have until December 31, 2019, to file the Form 1045 or Form 1139, as applicable, but due to this relief, will now have until June 30, 2020, to file the Form 1045 or Form 1139, as applicable. For this same taxpayer, if the taxpayer is a corporation, the deadline to claim a minimum tax credit described in § 53(e)(5) is December 30, 2020, but in order to file one application for a tentative refund and claim both the NOL carryback and the minimum tax credit at the same time, the taxpayer must do so by the earlier of the two deadlines.

[1413] Rev. Proc. 2020-24, Section 1.02 provides:

> This revenue procedure prescribes when and how to file the following elections.
>
> (1) *Election to waive NOL carryback*. Section 4.01(1) of this revenue procedure provides guidance regarding an election under § 172(b)(3) to waive the carryback period for an NOL arising in a taxable year beginning after December 31, 2017, and before January 1, 2020.
>
> (2) *Election to exclude section 965 years*. Section 4.01(2) of this revenue procedure provides guidance regarding an election under § 172(b)(1)(D)(v)(I) to exclude from the carryback period for an NOL arising in a taxable year beginning after December 31, 2017, and before January 1, 2021, any taxable year in which the taxpayer has a section 965(a) inclusion, as defined in § 1.965-1(f)(37) (a section 965 year).
>
> (3) *Elections under the CARES Act special rule concerning taxable years beginning before January 1, 2018, and ending after December 31, 2017*. Section 4.04(1) of this revenue procedure provides guidance regarding elections under the special rule set forth in § 2303(d) of the CARES Act to waive any carryback period, to reduce any carryback period, or to revoke any election made under § 172(b) to waive any carryback period for a taxable year that began before January 1, 2018, and ended after December 31, 2017.

[1414] See part II.G.4.g Limitations on Deducting Charitable Contributions, especially fn 1239.

Section 170(d)(2)(B) requires a reduction to a taxpayer's charitable contribution carryover to the extent an excess charitable contribution reduces modified taxable income (as computed under § 172(b)(2)) and increases an NOL carryover. Is Taxpayer required to reduce its current year charitable contributions first or can it choose to reduce a prior year's charitable contribution carryover to prevent its expiration?

<u>CONCLUSIONS</u>

(1) Section 172(b)(2) requires Taxpayer to use a year-by-year NOL absorption computation to determine the charitable contribution carryover adjustment under § 170(d)(2)(B).

(2) Taxpayer must first reduce its current year charitable contributions by the adjustment under § 170(d)(2)(B) before reducing its earliest year's charitable contribution carryover.

CCA 201928014 provided an example:

X Corp had $1,000 of taxable income in 2017 before considering its NOL carryovers or charitable contribution deduction. X Corp had NOL carryovers of $5,000 available to use in 2017, which included $100 from 2012 and $1,500 from 2013. X Corp also had charitable carryovers available to use in 2017 of $300, which included $150 from 2012. In 2017, X Corp made charitable contributions of $120.

In this example, like in Taxpayer's case, X Corp cannot deduct any charitable contributions in 2017 because the NOL carryovers reduce taxable income for 2017 to $0. But, like Taxpayer, X Corp still must compute the 10% limit for purposes of determining modified taxable income and the amount of the NOL carryovers that are absorbed.

First, X Corp must subtract its 2012 NOL from its 2017 taxable income to determine the § 170 taxable income ($1,000-$100=$900). X Corp must then multiply its § 170 taxable income by the 10% limitation ($900x10=$90). The $90 represents the amount of the 2017 charitable contribution that is allowed for purposes of calculating modified taxable income under § 172(b)(2).

Second, because X Corp cannot deduct any charitable contributions in 2017 and it has NOL and charitable carryovers, it must determine how much of the 2017 charitable contributions it can carry over to 2018 after applying the § 170(d)(2)(B) adjustment. X Corp must reduce its 2017 charitable contributions by $90 because that amount was allowed in the modified taxable income calculation ($900-$90=$810), resulting in an increased NOL carryover to 2018 and the charitable contributions not actually being deducted. The result is that only $30 ($120-$90) of the 2017 charitable contributions is allowed to be carried over to 2018.

Lastly, X Corp must calculate the amount of the 2013 NOL carryover that is absorbed under § 172(b)(2) and the amount carried over to 2018. The 2013 NOL carryover is reduced by the amount absorbed, which is the 2017 modified taxable income, and the remainder is carried over to 2018 ($1,500-$810=$690).

II.G.4.l.iii. Code § 267 Disallowance of Related-Party Deductions or Losses

Code § 267(a) disallows certain related-party deductions or losses.[1415]

Code § 267(b) applies the following relationships for subsection (a):

(1) Members of a family, as defined in subsection (c)(4);

(2) An individual and a corporation more than 50 percent in value of the outstanding stock of which is owned, directly or indirectly, by or for such individual;

(3) Two corporations which are members of the same controlled group (as defined in subsection (f));

(4) A grantor and a fiduciary of any trust;

[1415] Code § 267(a) provides:

(1) *Deduction for losses disallowed*. No deduction shall be allowed in respect of any loss from the sale or exchange of property, directly or indirectly, between persons specified in any of the paragraphs of subsection (b). The preceding sentence shall not apply to any loss of the distributing corporation (or the distributee) in the case of a distribution in complete liquidation.

(2) *Matching of deduction and payee income item in the case of expenses and interest*. If—

(A) by reason of the method of accounting of the person to whom the payment is to be made, the amount thereof is not (unless paid) includible in the gross income of such person, and

(B) at the close of the taxable year of the taxpayer for which (but for this paragraph) the amount would be deductible under this chapter, both the taxpayer and the person to whom the payment is to be made are persons specified in any of the paragraphs of subsection (b),

then any deduction allowable under this chapter in respect of such amount shall be allowable as of the day as of which such amount is includible in the gross income of the person to whom the payment is made (or, if later, as of the day on which it would be so allowable but for this paragraph). For purposes of this paragraph, in the case of a personal service corporation (within the meaning of section 441(i)(2)), such corporation and any employee-owner (within the meaning of section 269A(b)(2), as modified by section 441(i)(2)) shall be treated as persons specified in subsection (b).

(3) *Payments to foreign persons*.

(A) *In general*. The Secretary shall by regulations apply the matching principle of paragraph (2) in cases in which the person to whom the payment is to be made is not a United States person.

(B) *Special rule for certain foreign entities*.

(i) *In general*. Notwithstanding subparagraph (A), in the case of any item payable to a controlled foreign corporation (as defined in section 957) or a passive foreign investment company (as defined in section 1297), a deduction shall be allowable to the payor with respect to such amount for any taxable year before the taxable year in which paid only to the extent that an amount attributable to such item is includible (determined without regard to properly allocable deductions and qualified deficits under section 952(c)(1)(B)) during such prior taxable year in the gross income of a United States person who owns (within the meaning of section 958(a)) stock in such corporation.

(ii) *Secretarial authority*. The Secretary may by regulation exempt transactions from the application of clause (i), including any transaction which is entered into by a payor in the ordinary course of a trade or business in which the payor is predominantly engaged and in which the payment of the accrued amounts occurs within 8½ months after accrual or within such other period as the Secretary may prescribe.

(5) A fiduciary of a trust and a fiduciary of another trust, if the same person is a grantor of both trusts;

(6) A fiduciary of a trust and a beneficiary of such trust;

(7) A fiduciary of a trust and a beneficiary of another trust, if the same person is a grantor of both trusts;

(8) A fiduciary of a trust and a corporation more than 50 percent in value of the outstanding stock of which is owned, directly or indirectly, by or for the trust or by or for a person who is a grantor of the trust;

(9) A person and an organization to which section 501 (relating to certain educational and charitable organizations which are exempt from tax) applies and which is controlled directly or indirectly by such person or (if such person is an individual) by members of the family of such individual;

(10) A corporation and a partnership if the same persons own -

(A) more than 50 percent in value of the outstanding stock of the corporation, and

(B) more than 50 percent of the capital interest, or the profits interest, in the partnership;

(11) An S corporation and another S corporation if the same persons own more than 50 percent in value of the outstanding stock of each corporation;

(12) An S corporation and a C corporation, if the same persons own more than 50 percent in value of the outstanding stock of each corporation; or

(13) Except in the case of a sale or exchange in satisfaction of a pecuniary bequest, an executor of an estate and a beneficiary of such estate.

Grantor trusts are disregarded from their deemed owners for this purpose. See CCA 201343021.[1416]

Before the 1997 enactment of Code § 267(b)(13), Rev. Rul. 77-439 involved the following facts and held:

> An estate sustained a loss from the sale of property (other than stock) to the estate's executor, who was a child of the decedent.
>
> *Held*, section 267 of the Internal Revenue Code of 1954 does not disallow a deduction for the loss sustained by the estate upon its sale of the property to the executor, because the sale was not between related parties described in section 267(b) but between an estate and an individual. See *Estate of Hanna v. Commissioner*, 319 F.2d 54 [sic, 320 F.2d 54] (6th Cir. 1963).

[1416] See fn 6523 in part III.B.2.d.i.(a) General Concepts of the Effect of Irrevocable Grantor Trust Treatment on Federal Income Taxation.

Rev. Rul. 77-439 remains important after that enactment, in case an estate sells to an executor who is not a beneficiary. Furthermore, it cited with approval *Estate of Hanna*, which reasoned and held:

> The disallowance of the loss by the Commissioner was under Section 267(b)(2) which disallows a loss resulting from a sale or exchange of property between an individual and a corporation more than 50 percent in value of the outstanding stock of which is owned, directly or indirectly, by or for such individual. Although the sale or exchange was between an estate and a corporation, instead of between an individual and a corporation as specified in the statute, the Commissioner contends that under Section 267(c)(1) the stock owned by the estate is considered as being owned by the beneficiaries of the estate, and under Section 267(c)(2) and (4) an individual is considered as owning the stock owned by or for his family, which includes sisters. The net result of this reasoning is that the stock was sold by a sister, who was an individual rather than an estate, and that such sister, being considered as owning the stock of the other sisters, owned more than 50 percent of the outstanding stock of the redeeming corporation. The Tax Court adopted this reasoning and interpretation of Section 267 in disallowing the deduction.
>
> We are of the opinion that this is not the correct construction of Section 267 and that the deduction should be allowed.
>
> Is it clear that under Section 267(a) and (b) losses resulting from sales or exchanges of property, otherwise deductible, are disallowed only if such sales or exchanges are between specified persons. Of the nine specified types of transactions in which losses are disallowed, no one of them by its terms covers the transactions in this case. The only one claimed by the Commissioner to be applicable is the one specified in Section 267(b)(2), namely a sale or exchange between an individual and a corporation. The sale or exchange in the present case was between an estate and a corporation. Clearly, an individual and an estate are not the same. *Estate of Charles C. Ingalls v. Commissioner*, 45 B.T.A. 787, 792; Section 7701(a)(1), Internal Revenue Code, 1954. The Commissioner does not so contend. Accordingly, unless there is some other applicable statutory provision, the deduction cannot be disallowed under Section 267(b)(2).
>
> The question is thus presented whether the provisions of Section 267(b)(2) are changed by the provisions of Section 267(c)(1), (2) and (4), as contended by the Commissioner.
>
> Section 267(c), by its title, deals with the "Constructive Ownership of Stock." It does not say that a sale by an estate is to be considered as a sale by an individual, thus enlarging the transactions barred by Section 267(b). It states the rules to be followed in determining the "ownership of stock" in applying Section 267(b)(2). Under Section 267(b)(2) the ownership of stock is a crucial item in that an individual selling to a corporation cannot take a loss as a deduction if "such individual" owns more than 50 per cent in value of the outstanding stock. In determining that question "such individual" is constructively charged with the ownership of stock by others under circumstances set out in Section 267(c). If Congress intended to disallow losses from sales by an estate in addition to losses from sales by an individual, which is the result sought by the Commissioner in this case, it could easily have done so in express language in Section 267(b)(2) where, in barring losses in sales between "An individual and a corporation" it could have simply said sales between "An individual or an estate and a corporation." Having failed to do so, we do not think we are justified in so enlarging

> Section 267(b)(2) by implications drawn from another section of the statute dealing with the constructive ownership of stock.
>
> The Commissioner and the Tax Court rely upon *Estate of Charles C. Ingalls v. Commissioner*, *supra*, 45 B.T.A. 787, affirmed by this Court, 132 F.(2) 862. The affirmance by this Court, however, is of no significance, in that the issue involved in the present case was only one of the two issues decided by the Board of Tax Appeals in that case. This issue was decided by the Board in favor of the taxpayer, of which ruling the Commissioner did not seek a review. The other issue, which is not involved in the present case, was decided adversely to the taxpayer, of which ruling the taxpayer sought a review. Our affirmance, in a very short Per Curiam, dealt with that issue only, not the issue in the present case which was not before the Court.
>
> We agree with the Tax Court, that although the ruling by the Board of Tax Appeals in the Ingalls case was in favor of the taxpayer, it was the result of a factual situation different from that in the present case, and that the rationale of the Ingalls case, if followed here, would result in an affirmance of the Tax Court. One member of the Tax Court, in a separate concurring opinion, disagreed with the rationale in the Ingalls opinion and expressed the view that we have expressed in this opinion, but felt constrained in view of the prior ruling to apply the rationale of the Ingalls opinion.
>
> We have been referred to no other case in which this question has been passed upon. We are not in accord with the rationale of the *Ingalls* case and are of the opinion that it should not be adopted in the present case.
>
> The decision of the Tax Court is reversed and the case remanded for further proceedings consistent with the views expressed herein.

Rev. Rul. 59-171 held:

> B and C are trustees of separate trusts created by the same grantor. Solely for his own account, B sold at a loss certain securities owned by him personally to C. C made the purchase for his own account, and not as a fiduciary….
>
> The legislative history of this section of the Code clearly shows that Congress intended to prevent the original grantor of certain funds from creating artificial deductions for tax avoidance purposes, choosing by artificial means the time for realizing tax losses, or otherwise exercising control over certain trust assets for such Federal tax purpose. To the same effect, Congress intended to prohibit transactions between fiduciaries acting in their capacity as fiduciaries. See House of Representatives Report No. 1546, C.B. 1939-1 (Part 2), 723. However, so long as the trustees of the common grantor are dealing with personal funds, or property not derived from the original grantor, deductions for any losses so sustained are not prohibited by section 267 of the Code.
>
> Accordingly, the deduction of the loss sustained by taxpayer B upon the sale of securities owned by him solely for his own account to the personal account of C is not prohibited by section 267 of the Code.

Rev. Rul. 56-222 held:

> Where certain stock owned by a decedent's estate is made the subject of a bona fide sale by the executor to an inter vivos trust which the decedent, as grantor, created for the benefit of his widow any loss sustained on such sale does not constitute the type of loss disallowed by section 267(a) of the Internal Revenue Code of 1954. Such loss constitutes a capital loss and is deductible from the gross income of the estate to the extent provided in section 1211(b) of the Code.

Reg. § 1.267(b)-1, "Relationships," provides:

(a) *In general*.

(1) The persons referred to in section 267(a) and § 1.267(a)-1 are specified in section 267(b).

(2) Under section 267(b)(3), it is not necessary that either of the two corporations be a personal holding company or a foreign personal holding company for the taxable year in which the sale or exchange occurs or in which the expenses or interest are properly accruable, but either one of them must be such a company for the taxable year next preceding the taxable year in which the sale or exchange occurs or in which the expenses or interest are accrued.

(3) Under section 267(b)(9), the control of certain educational and charitable organizations exempt from tax under section 501 includes any kind of control, direct or indirect, by means of which a person in fact controls such an organization, whether or not the control is legally enforceable and regardless of the method by which the control is exercised or exercisable. In the case of an individual, control possessed by the individual's family, as defined in section 267(c)(4) and paragraph (a)(4) of § 1.267(c)-1, shall be taken into account.

(b) *Partnerships*.

(1) Since section 267 does not include members of a partnership and the partnership as related persons, transactions between partners and partnerships do not come within the scope of section 267. Such transactions are governed by section 707 for the purposes of which the partnership is considered to be an entity separate from the partners. See section 707 and § 1.707-1. Any transaction described in section 267(a) between a partnership and a person other than a partner shall be considered as occurring between the other person and the members of the partnership separately. Therefore, if the other person and a partner are within any one of the relationships specified in section 267(b), no deductions with respect to such transactions between the other person and the partnership shall be allowed—

(i) To the related partner to the extent of his distributive share of partnership deductions for losses or unpaid expenses or interest resulting from such transactions, and

(ii) To the other person to the extent the related partner acquires an interest in any property sold to or exchanged with the partnership by such other person at a loss, or to the extent of the related partner's distributive share of the unpaid expenses or interest payable to the partnership by the other person as a result of such transaction.

(2) The provisions of this paragraph may be illustrated by the following examples:

Example (1). A, an equal partner in the ABC partnership, personally owns all the stock of M Corporation. B and C are not related to A. The partnership and all the partners use an accrual method of accounting, and are on a calendar year. M Corporation uses the cash receipts and disbursements method of accounting and is also on a calendar year. During 1956 the partnership borrowed money from M Corporation and also sold property to M Corporation, sustaining a loss on the sale. On December 31, 1956, the partnership accrued its interest liability to the M Corporation and on April 1, 1957 (more than 2½ months after the close of its taxable year), it paid the M Corporation the amount of such accrued interest. Applying the rules of this paragraph, the transactions are considered as occurring between M Corporation and the partners separately. The sale and interest transactions considered as occurring between A and the M Corporation fall within the scope of section 267(a) and (b), but the transactions considered as occurring between partners B and C and the M Corporation do not. The latter two partners may, therefore, deduct their distributive shares of partnership deductions for the loss and the accrued interest. However, no deduction shall be allowed to A for his distributive shares of these partnership deductions. Furthermore, A's adjusted basis for his partnership interest must be decreased by the amount of his distributive share of such deductions. See section 705(a)(2).

Example (2). Assume the same facts as in example (1) of this subparagraph except that the partnership and all the partners use the cash receipts and disbursements method of accounting, and that M Corporation uses an accrual method. Assume further, that during 1956 M Corporation borrowed money from the partnership and that on a sale of property to the partnership during that year M Corporation sustained a loss. On December 31, 1956, the M Corporation accrued its interest liability on the borrowed money and on April 1, 1957 (more than 2½ months after the close of its taxable year) it paid the accrued interest to the partnership. The corporation's deduction for the accrued interest it not allowed to the extent of A's distributive share (one-third) of such interest income. M Corporation's deduction for the loss on the sale of the property to the partnership is not allowed to the extent of A's one-third interest in the purchased property.

However, REG-131756-11 (11/27/2023) explains:

> As part of enacting the Internal Revenue Code of 1954, Public Law 83-591, ch. 736, 68A Stat. 1 (1954), Congress added section 707(b)(1) to the Code to address the sale or exchange of property between a partnership and a partner owning, directly or indirectly, more than 50 percent of the capital or profit interest in the partnership. 68A Stat. at 243. Given a lack of statutory and regulatory guidance addressing transactions between a partnership and a related person who was not a partner, the Treasury Department and the IRS issued § 1.267(b)-1(b) in 1958. See TD 6312, 23 FR 7035 (Sep. 11, 1958).

Section 1.267(b)-1(b) applies an aggregate theory of partnerships to provide that any transaction described in section 267(a) between a partnership and a person other than a partner is considered as occurring between the other person and the members of the partnership separately. Specifically, § 1.267(b)-1(b) provides that if the other person and a partner are within any of the relationships specified in section 267(b), no deductions with respect to the transaction between the other person and the partnership will be allowed: (i) to the related partner to the extent of the related partner's distributive share of partnership deductions for losses or unpaid expenses or interest resulting from the transactions, and (ii) to the other person to the extent the related partner acquires an interest in any property sold to or exchanged with the partnership by the other person at a loss, or to the extent of the related partner's distributive share of the unpaid expenses or interest payable to the partnership by the other person as a result of the transaction.

The U.S. Tax Court upheld the validity of § 1.267(b)-1(b) and its use of the aggregate theory in *Casel v. Commissioner*, 79 T.C. 424 (1982). However, subsequent statutory changes to sections 267 and 707(b) have made § 1.267(b)-1(b) inconsistent with the statute.

In 1982, Congress enacted section 3(h)(1) of the Subchapter S Revision Act of 1982, Public Law 97-354, 96 Stat. 1669, 1689 (1982) to add section 267(b)(10) to the Code to disallow a deduction resulting from a transaction between a commonly-controlled partnership and an S corporation. Specifically, section 267(b)(10) provides that an S corporation and a partnership were related persons if the same persons owned more than 50 percent of the outstanding stock of the S corporation and more than 50 percent of the capital interest or the profits interest in the partnership.

In 1984, Congress enacted section 174(b)(1) of the Tax Reform Act of 1984 (TRA 1984), Public Law 98-369, 98 Stat. 494, 705 (1984), to add section 267(e) to the Code generally to extend the matching rule of section 267(a)(2) to transactions between a partnership and a partner or a person related to a partner (within the meaning of sections 267(b) or 707(b)(1)). Congress also enacted section 174(b)(3) of the TRA 1984, 98 Stat. at 707, to amend section 267(b)(10) to include C corporations as well as S corporations.

In 1985, the Treasury Department and the IRS issued § 1.267(a)-2T(c) to provide guidance for transactions between related partnerships. Consistent with the legislative history of the TRA 1984, the regulations generally apply an aggregate theory of partnerships in deferring deductions according to the partners' aggregate interests in the payor partnership. See S. Rep. No. 98-169, 98th Cong., 2nd Sess., at 496 and n. 17 (1984); TD 7991, 49 FR 46992 (Nov. 30, 1984).

In the Tax Reform Act of 1986 (TRA 1986), Public Law 99-514, 100 Stat. 2085 (1986), Congress amended section 707(b) in two ways.[1417] First, Congress revised sections 707(b)(1)(A) and 707(b)(2)(A) to expand the application of those provisions to a person who is not a partner and modified section 707(b)(2) to reduce the thresholds described in that section from more than 80 percent of profits or capital to more than 50 percent of profits or capital for purposes of treating recognized gain between related persons as ordinary income. As amended by section 1812(c)(3) of the TRA 1986, 100

[1417] [my footnote:] Code § 707(b) is described in part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

Stat. at 2834, the loss disallowance rules of section 707(b)(1)(A) and the character of gain rules of section 707(b)(2)(A) apply to transactions between a partnership and any person (a partner or non-partner) who directly or indirectly owns more than 50 percent of the capital or profits interest in the partnership. See sections 707(b)(1)(A), (b)(2)(A), and (b)(3).

Second, in enacting section 642(a)(2) of the TRA 1986, 100 Stat. at 2284, Congress amended section 707(b)(1)(B) to provide that for purposes of the matching rule in section 267(a)(2), two partnerships in which the same persons own, directly or indirectly, more than 50 percent of the capital interests or profits interests are treated as related persons within the meaning of section 267(b). The related committee reports state that the modifications to section 707(b), and in particular to section 707(b)(1)(B), were intended to replace Questions and Answers 2 and 3 of § 1.267(a)-2T(c). See H. Rept. No. 99-426, 99th Cong., 1st Sess., at 940 and n. 7 (1986), 1986-3 C.B. Vol. 2, at 940 and n. 7; S. Rep. No. 99-313, 99th Cong., 2nd Sess., at 960 and n. 7, 1986-3 C.B. Vol. 3, 959, 960 and n. 7.

Explanation of Provisions

The statutory changes to sections 267 and 707(b) enacted since 1982 indicate that Congress intended for a partnership to be viewed as an entity, rather than as an aggregate of its partners, in applying the rules of sections 267 and 707(b). Therefore, the loss disallowance rules of sections 267(a)(1) and 707(b)(1), the gain recharacterization rules of section 707(b)(2), and the matching rule of section 267(a)(2) similarly should be applied at the partnership level and not the partner level. Accordingly, the rules relating to partnerships in § 1.267(b)-1(b) and § 1.267(a)-2T(c), Questions and Answers 2 and 3, do not conform to Congress's view of how section 267 should be applied to partnerships.

To conform the regulations under section 267 with the current statute, the proposed regulations propose: (1) to remove § 1.267(b)-1(b), (2) to amend § 1.267(a)-1 to reflect the rules in Questions and Answers 1 and 4 in § 1.267(a)-2T(c) as § 1.267(a)-1(d)(2) and (3); and (3) to amend § 1.267(a)-1 to terminate the application of Questions and Answers 2 and 3 in § 1.267(a)-2T(c). The regulations under § 1.267(a)-2T(b), which provide questions and answers applying section 267(a)(2) and (b) generally, would continue to apply. The Treasury Department and IRS are aware that some of the citations in the existing regulations under section 267 may be outdated due to subsequent legislative and regulatory changes. However, the rules in these questions and answers remain substantively accurate. For example, Question 1 under § 1.267(a)-2T(b) refers to the completed contract method under § 1.451-3(d). The substance of this answer remains correct; however, the correct citation to the completed contract method is now under § 1.460-4(d). Modifications to update incorrect citations in § 1.267(a)-2T(b) are outside the scope of these proposed regulations. Finally, these proposed regulations also revise § 1.707-1(b) to conform to the statutory changes made to sections 267 and 707(b).

Code § 267(c) applies the following rules in determining the ownership of stock subsection (b):[1418]

(1) Stock owned, directly or indirectly, by or for a corporation, partnership, estate, or trust shall be considered as being owned proportionately by or for its shareholders, partners, or beneficiaries;

(2) An individual shall be considered as owning the stock owned, directly or indirectly, by or for his family;

(3) An individual owning (otherwise than by the application of paragraph (2)) any stock in a corporation shall be considered as owning the stock owned, directly or indirectly, by or for his partner;

(4) The family of an individual shall include only his brothers and sisters (whether by the whole or half blood), spouse, ancestors, and lineal descendants; and

(5) Stock constructively owned by a person by reason of the application of paragraph (1) shall, for the purpose of applying paragraph (1), (2), or (3), be treated as actually owned by such person, but stock constructively owned by an individual by reason of the application of paragraph (2) or (3) shall not be treated as owned by him for the purpose of again applying either of such paragraphs in order to make another the constructive owner of such stock.

Liflans Corp. v. U.S., 390 F.2d 965 (Ct. Cl. 1968), applied Code § 267(c)(5):

> She owned no shares of plaintiff's stock; she may be considered to own constructively only the 28⅓ percent held by her husband through the application of Section 267(c)(2). She cannot be deemed to own the shares constructively owned by her husband through his partnership with Fried and Lifter, since Section 267(c)(5) provides that stock constructively owned by her husband through the application of Section 267(c)(3) "shall not be treated as owned by him for the purpose of again applying (paragraph 2) in order to make another the constructive owner of such stock".

Reg. § 1.267(c)-1, "Constructive ownership of stock," provides:

(a) *In general*.

(1) The determination of stock ownership for purposes of section 267(b) shall be in accordance with the rules in section 267(c).

(2) For an individual to be considered under section 267(c)(2) as constructively owning the stock of a corporation which is owned, directly or indirectly, by or for members of his family it is not necessary that he own stock in the corporation either directly or indirectly. On the other hand, for an individual to be considered under section 267(c)(3) as owning the stock of a corporation owned either actually, or constructively under section 267(c)(1), by or for his partner, such

[1418] Code § 267(c) also applies for attribution in certain partnership related-party transactions. See fn 5569 in part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

individual must himself actually own, or constructively own under section 267(c)(1), stock of such corporation.

(3) An individual's constructive ownership, under section 267(c)(2) or (3), of stock owned directly or indirectly by or for a member of his family, or by or for his partner, is not to be considered as actual ownership of such stock, and the individual's constructive ownership of the stock is not to be attributed to another member of his family or to another partner. However, an individual's constructive ownership, under section 267(c)(1), of stock owned directly or indirectly by or for a corporation, partnership, estate, or trust shall be considered as actual ownership of the stock, and the individual's ownership may be attributed to a member of his family or to his partner.

(4) The family of an individual shall include only his brothers and sisters, spouse, ancestors, and lineal descendants. In determining whether any of these relationships exist, full effect shall be given to a legal adoption. The term "ancestors" includes parents and grandparents, and the term "lineal descendants" includes children and grandchildren.

(b) *Examples*. The application of section 267(c) may be illustrated by the following examples:

Example (1). On July 1, 1957, A owned 75 percent, and AW, his wife, owned 25 percent, of the outstanding stock of the M Corporation. The M Corporation in turn owned 80 percent of the outstanding stock of the O Corporation. Under section 267(c)(1), A and AW are each considered as owning an amount of the O Corporation stock actually owned by M Corporation in proportion to their respective ownership of M Corporation stock. Therefore, A constructively owns 60 percent (75 percent of 80 percent) of the O Corporation stock and AW constructively owns 20 percent (25 percent of 80 percent) of such stock. Under the family ownership rule of section 267(c)(2), an individual is considered as constructively owning the stock actually owned by his spouse. A and AW, therefore, are each considered as constructively owning the M Corporation stock actually owned by the other. For the purpose of applying this family ownership rule, A's and AW's constructive ownership of O Corporation stock is considered as actual ownership under section 267(c)(5). Thus, A constructively owns the 20 percent of the O Corporation stock constructively owned by AW, and AW constructively owns the 60 percent of the O Corporation stock constructively owned by A. In addition, the family ownership rule may be applied to make AWF, AW's father, the constructive owner of the 25 percent of the M Corporation stock actually owned by AW. As noted above, AW's constructive ownership of 20 percent of the O Corporation stock is considered as actual ownership for purposes of applying the family ownership rule, and AWF is thereby considered the constructive owner of this stock also. However, AW's constructive ownership of the stock constructively and actually owned by A may not be considered as actual ownership for the purpose of again applying the family ownership rule to make AWF the constructive owner of these shares. The ownership of the stock in the M and O Corporations may be tabulated as follows:

[chart omitted because I'm too lazy]

Assuming that the M Corporation and the O Corporation make their income tax returns for calendar years, and that there was no distribution in liquidation of the M or O Corporation, and further assuming that either corporation was a personal holding company under section 542 for the calendar year 1956, no deduction is allowable with respect to losses from sales or exchanges of property made on July 1, 1957, between the two corporations. Moreover, whether or not either corporation was a personal holding company, no loss would be allowable on a sale or exchange between A or AW and either corporation. A deduction would be allowed, however, for a loss sustained in an arm's length sale or exchange between A and AWF, and between AWF and the M or O Corporation.

Example (2). On June 15, 1957, all of the stock of the N Corporation was owned in equal proportions by A and his partner, AP. Except in the case of distributions in liquidation by the N Corporation, no deduction is allowable with respect to losses from sales or exchanges of property made on June 15, 1957, between A and the N Corporation or AP and the N Corporation since each partner is considered as owning the stock owned by the other; therefore, each is considered as owning more than 50 percent in value of the outstanding stock of the N Corporation.

Example (3). On June 7, 1957, A owned no stock in X Corporation, but his wife, AW, owned 20 percent in value of the outstanding stock of X, and A's partner, AP, owned 60 percent in value of the outstanding stock of X. The partnership firm of A and AP owned no stock in X Corporation. The ownership of AW's stock is attributed to A, but not that of AP since A does not own any X Corporation stock either actually, or constructively under section 267(c)(1). A's constructive ownership of AW's stock is not the ownership required for the attribution of AP's stock. Therefore, deductions for losses from sales or exchanges of property made on June 7, 1957, between X Corporation and A or AW are allowable since neither person owned more than 50 percent in value of the outstanding stock of X, but deductions for losses from sales or exchanges between X Corporation and AP would not be allowable by section 267(a) (except for distributions in liquidation of X Corporation).

An irrevocable trust paying mandatory income to the grantor's surviving spouse, remainder to the grantor's children is not related under Code § 267(b) or 707(b)(1) with respect to grantor trusts deemed owned by the grantor's two siblings, respectively.[1419]

For how Code § 267 interacts with the Code § 351 nonrecognition rules,[1420] see Narotzki & McCoskey, "The Code Section 267 Related Party Rules: When Do They Apply to Section 351 Transactions?," *Journal of Taxation* (2/2022).

II.G.4.l.iv. Start-Up Expenditures

Code § 195(a) disallows a deduction shall be allowed for start-up expenditures, except to the extent that Code § 195(b) allows up to $5,000 to be deducted and the balance amortized over the 180-month period beginning with the month in which the active trade or business begins.

[1419] Letter Ruling 200920032.
[1420] Part II.M.2.a Initial Incorporation – Generally.

Code § 195(c)(1) provides that “start-up expenditure” means any amount, other than “any amount with respect to which a deduction is allowable under section 163(a), 164, or 174”:

(A) paid or incurred in connection with -

(i) investigating the creation or acquisition of an active trade or business, or

(ii) creating an active trade or business, or

(iii) any activity engaged in for profit and for the production of income before the day on which the active trade or business begins, in anticipation of such activity becoming an active trade or business, and

(B) which, if paid or incurred in connection with the operation of an existing active trade or business (in the same field as the trade or business referred to in subparagraph (A)), would be allowable as a deduction for the taxable year in which paid or incurred.

Code § 195(c)(2), “Beginning of trade or business,” provides:

(A) *In general*. Except as provided in subparagraph (B), the determination of when an active trade or business begins shall be made in accordance with such regulations as the Secretary may prescribe.

(B) *Acquired trade or business*. An acquired active trade or business shall be treated as beginning when the taxpayer acquires it.

Code § 709 provides a similar rule “for any amounts paid or incurred to organize a partnership or to promote the sale of (or to sell) an interest in such partnership.” Code § 709(b)(3) defines organizational expenses as expenditures which -

(A) are incident to the creation of the partnership;

(B) are chargeable to capital account; and

(C) are of a character which, if expended incident to the creation of a partnership having an ascertainable life, would be amortized over such life.

Reg. § 1.709-2(a), “Organizational expenses,” elaborates:

> To satisfy the statutory requirement described in paragraph (a)(1) of this section, the expense must be incurred during the period beginning at a point which is a reasonable time before the partnership begins business and ending with the date prescribed by law for filing the partnership return (determined without regard to any extensions of time) for the taxable year the partnership begins business. In addition, the expenses must be for creation of the partnership and not for operation or starting operation of the partnership trade or business. To satisfy the statutory requirement described in paragraph (a)(3) of this section, the expense must be for an item of a nature normally expected to benefit the partnership throughout the entire life of the partnership. The following are examples of organizational expenses within the meaning of section 709 and this section: Legal fees for services incident to the organization of the partnership, such as negotiation and

> preparation of a partnership agreement; accounting fees for services incident to the organization of the partnership; and filing fees. The following are examples of expenses that are not organizational expenses within the meaning of section 709 and this section (regardless of how the partnership characterizes them): Expenses connected with acquiring assets for the partnership or transferring assets to the partnership; expenses connected with the admission or removal of partners other than at the time the partnership is first organized; expenses connected with a contract relating to the operation of the partnership trade or business (even where the contract is between the partnership and one of its members); and syndication expenses.

Reg. § 1.709-2(c), "Beginning business," provides:

> The determination of the date a partnership begins business for purposes of section 709 presents a question of fact that must be determined in each case in light of all the circumstances of the particular case. Ordinarily, a partnership begins business when it starts the business operations for which it was organized. The mere signing of a partnership agreement is not alone sufficient to show the beginning of business. If the activities of the partnership have advanced to the extent necessary to establish the nature of its business operations, it will be deemed to have begun business. Accordingly, the acquisition of operating assets which are necessary to the type of business contemplated may constitute beginning business for these purposes. The term "operating assets", as used herein, means assets that are in a state of readiness to be placed in service within a reasonable period following their acquisition.

Kellett v. Commissioner, T.C. Memo. 2022-62, explains:

> Section 162(a) permits a deduction for ordinary and necessary expenses paid or incurred during the taxable year "in carrying on any trade or business." Section 195(a), on the other hand, generally denies a deduction for start-up expenditures, which section 195(c)(1)(A)(iii) defines in pertinent part to include any amount paid or incurred in connection with "any activity engaged in for profit and for the production of income before the day on which the active trade or business begins, in anticipation of such activity becoming an active trade or business." See *Hardy v. Commissioner*, 93 T.C. 684, 687 (1989) ("Start-up or pre-opening expenses are not currently deductible under section 162."). Without any regulations to tell us when an active trade or business begins,[6] we rely on a test developed by the U.S. Court of Appeals for the Fourth Circuit, the appellate venue for this case absent a stipulation by the parties. See § 7482(b); 28 U.S.C. § 41 (2018).[7] In the Fourth Circuit, a taxpayer does not begin carrying on a trade or business "until such time as the business has begun to function as a going concern and performed those activities for which it was organized." *Richmond Television Corp. v. United States*, 345 F.2d 901, 907 (4th Cir. 1965),[8] vacated and remanded per curiam on other grounds, 382 U.S. 68 (1965). The Tax Court determines when this happens on the basis of the facts and circumstances of a given case. *Madison Gas & Elec. Co. v. Commissioner*, 72 T.C. 521, 566 (1979), *aff'd*, 633 F.2d 512 (7th Cir. 1980).
>
> [6] Sections 195(c)(2)(A) and 7701(a)(11)(B) direct us to determine when an active trade or business begins on the basis of regulations prescribed by the Secretary of the Treasury or his delegate, although no regulations have been promulgated.

[7] The Tax Court will follow a Court of Appeals decision which is squarely on point where appeal from our decision lies to that Court of Appeals alone. *Golsen v. Commissioner*, 54 T.C. 742, 757 (1970), *aff'd*, 445 F.2d 985 (10th Cir. 1971).

[8] The same case points out that the Code prohibits a business expense deduction for capital expenditures. *Richmond Television*, 345 F.2d at 907-08; see also § 263 (denying a deduction for capital expenditures). Respondent does not argue that any portion of the claimed deduction is a section 263 capital expenditure and concedes that only section 195 is at issue as to the business-related expenditures petitioner reported on Schedule C.

The Fourth Circuit did not allow Richmond Television Corp. to deduct staff training costs incurred in 1953-55 for its new television station because the business did not begin until the station went on the air in 1956. *Richmond Television*, 345 F.2d at 903-07. A television station, like a business information website, exists to communicate information to the public, via television programming in the former case and data aggregation and analysis software in the latter. Just as a television station can have no viewers until it begins broadcasting, Vizala could have no users before the website opened. Petitioner's active trade or business could not begin until that happened.

Unlike the television station in Richmond Television, however, Vizala had no revenue until well after going live. See id. at 903–04, 909 (explaining that the station launched in 1956 and sought to carry forward its business expense deductions as net operating losses to 1956 and 1957, which indicates it had income in those years). Respondent argues that none of the expenditures petitioner reported on Schedule C, even amounts paid after the website opened, is a section 162 expense because Vizala had no revenue and no means of generating revenue in 2015. A taxpayer's effort to sell goods or services may qualify as an active trade or business even if the taxpayer makes no sales and therefore has zero gross receipts. See *Cabintaxi Corp. v. Commissioner*, 63 F.3d 614, 620 (7th Cir. 1995), *aff'g in part, rev'g in part* T.C. Memo. 1994-316. Vizala, on the other hand, made no attempt to sell anything - advertisements, access to website features, customized reports, or licensed data - until after 2015.[9]

[9] In announcing its going-concern test, the Fourth Circuit cites Justice Frankfurter's concurring opinion in *Deputy v. du Pont*, 308 U.S. 488, 499 (1940), which asserts that carrying on a trade or business "involves holding one's self out to others as engaged in the *selling* of goods or services." *Richmond Television*, 345 F.2d at 907 n.7 (emphasis added). The Supreme Court later formally rejected Justice Frankfurter's gloss on the trade or business inquiry. *Commissioner v. Groetzinger*, 480 U.S. 23, 34 (1987).

The typical case determining when an active trade or business begins contemplates a traditional business archetype: If initial operations succeed, the company should start earning revenue as soon as the active trade or business begins. For example, a grocery store will earn revenue by selling groceries as soon as it draws customers. See *Piggly Wiggly S., Inc. v. Commissioner*, 84 T.C. 739, 745-48 (1985) (allowing a store operator to deduct the cost of equipment placed in open stores, but denying the same deduction for stores not yet open), *aff'd*, 803 F.2d 1572 (11th Cir. 1986). By the same token, a company operating an apartment or office building should receive rent payments as soon as it admits tenants. See *Johnsen v. Commissioner*, 83 T.C. 103, 114-18 (1984) (denying deductions for pre-opening costs of rental property and discussing other cases reaching the same result), *rev'd on other grounds*, 794 F.2d 1157 (6th Cir. 1986).

Vizala does not fit this traditional archetype. Petitioner doubted that any of his revenue strategies could succeed until Vizala built rapport with users and advertisers. He therefore prioritized web traffic over revenue by charging no user fees and marketing the site to institutional customers. Even though petitioner made no attempt to earn revenue in 2015, his business began providing the services "for which it was organized," with an eye to long-term profit, once he opened the website. See *Richmond Television*, 345 F.2d at 907. Such activity, at least under these circumstances, constitutes an active trade or business.

The parties agree that Vizala opened to the public in or around September 2015. The burden of establishing the opening date does not shift to respondent under section 7491(a), see *supra* Part I, because petitioner has not proposed, let alone introduced credible evidence of, an opening date. We therefore err on the side of respondent by postulating. that petitioner opened the website at the end of the day on September 30, 2015.

Groetzinger, cited above, is discussed in part II.G.4.I.i.(a) "Trade or Business" Under Code § 162.

Kellett responded to the taxpayer's assertion that certain expenditures were Code § 174 research or experimental expenditures, or as costs of developing computer software under Rev. Proc. 2000-50:

A. Section 174

Section 195(c)(1) excludes from the definition of start-up expenditures any amount with respect to which a deduction is allowable under section 174. Section 174(a)(1), as in effect for 2015, allows a taxpayer to deduct "research or experimental expenditures which are paid or incurred by him during the taxable year in connection with his trade or business."[12] Treasury Regulation § 1.174-2(a)(1) defines research or experimental expenditures as "expenditures incurred in connection with the taxpayer's trade or business which represent research and development costs in the experimental or laboratory sense." This means the expenditures "are for activities intended to discover information that would eliminate uncertainty concerning the development or improvement of a product." *Id*. "Uncertainty exists," the regulation continues, "if the information available to the taxpayer does not establish the capability or method for developing or improving the product or the appropriate design of the product." Id. Petitioner may not deduct any of his expenditures under section 174 because he did not encounter this kind of uncertainty in creating Vizala.

[12] Congress withdrew the deduction for amounts paid or incurred in tax years beginning after December 31, 2021. See Tax Cuts and Jobs Act, Pub. L. No. 115-97, § 13206, 131 Stat. 2054, 2111 (2017).

A pair of cases involving the section 41 credit for increasing research activities, which requires the taxpayer to demonstrate that expenditures may be treated as section 174 expenditures, see § 41(d)(1)(A),[13] illustrates how to understand "uncertainty" in the context of software development. In the first case the court denied taxpayer Morris Davenport a section 41 credit for wages paid to develop software that would automate and integrate the manufacturing, design, sales, accounting, and shipping aspects of his business. *United States v. Davenport*, 897 F. Supp. 2d 496, 499-501, 518

(N.D. Tex. 2012). An outside contractor created the software using a commercially available software application suite. *Id*. at 500, 510–11. After conferring with Mr. Davenport's employees to understand their needs, the contractor developed a preliminary product by following a standardized process based on "industry best practices" and resolved problems and added functionalities according to the employees' feedback. See *id*. at 510–14. Although the project consumed lots of time and effort, the record reflected a straightforward application of the tried and true development process the contractor apparently followed in service of other clients. See *id*. at 515.

[13] Congress revised section 41(d)(1)(A) effective for tax years beginning after December 31, 2021, to conform to the revision of section 174 described in the preceding note. See Tax Cuts and Jobs Act § 13206(d)(1), 131 Stat. at 2112.

At the other end of the spectrum lies Eric Suder, whose company's costs of developing a series of phone systems passed the section 174 test. See *Suder v. Commissioner*, T.C. Memo. 2014-201, at *1–30, *42–44. Although the company followed a systematic development process, neither Mr. Suder nor his team knew exactly what steps to follow to create the products they conceived or how the products would be designed. *Id*. at *8, *42-43. Each project began at the drawing board: Senior management brainstormed an idea for a new product and drafted a rudimentary diagram and specifications which their engineers used to make the idea commercially viable. *Id*. at *8–9. The company's hardware was proprietary, so employees had to create what they needed out of whole cloth using their own expertise. Id. at *10-11. Software engineers tested and retested computer code to perfect the timing of the products' components within milliseconds. *Id*. at *12. In one case the company created a softphone that allowed the user to make calls from a personal computer while traveling, which presented the challenge of developing software capable of transferring calls through hotel routers and firewalls. *Id*. at *18. When the Internal Revenue Service (IRS) expert questioned the team's failure to develop the softphone using open-source software, an employee credibly testified that this would have required significant and time-consuming changes to the product. *Id*. at *41.

Vizala followed the Davenport paradigm: Petitioner and his engineers adapted widely used software to solve a complex but familiar problem. Petitioner's project did not start from the "drawing board" in the same sense as Mr. Suder's softphone. Petitioner aimed to create a data aggregation website, which companies such as Google Finance had done before, only his website would present demographic, social, and economic data instead of the financial information available on professional-quality platforms. Whereas the softphone required Mr. Suder's team to write code from a blank slate, Vizala permitted the use of open-source software customized for petitioner's needs. Like Mr. Davenport's employees, petitioner described to his engineers how the product should work, and, as an inherent part of designing complex software, collaborated with the engineers to troubleshoot problems before launch. *Cf. id.* at *39-40 (disagreeing with the IRS's position that Mr. Suder's team encountered only the kind of uncertainty inherent in every large development effort). As in Mr. Davenport's case, we conclude that petitioner may not deduct his expenses under section 174.

B. Rev. Proc. 2000-50

Petitioner argues that he may deduct the engineer expenses on the basis of Rev. Proc. 2000-50, §§ 4, 5.01, 2000-2 C.B. at 601, which announces that the IRS will not

> disturb a taxpayer's immediate deduction of certain costs of developing computer software that the taxpayer has not treated as section 174 research or experimental expenditures. We must reject this argument because, to the extent Rev. Proc. 2000-50 purports to establish a taxpayer's entitlement to a deduction, petitioner has not demonstrated that the Code authorizes any such deduction. Rev. Proc. 2000-50 mimics the section 174 exception to the capitalization rules of sections 195 and 263. As explained *supra* Part II.A, section 162(a) permits a deduction for ordinary and necessary expenses paid or incurred during a taxable year "in carrying on any trade or business," but section 195 generally denies an immediate deduction for start-up expenditures paid or incurred before the "active trade or business" begins. Moreover, section 263(a)(1) generally denies an immediate deduction for amounts paid for permanent improvements to property, which the title of section 263 calls "capital expenditures." See *Woodward v. Commissioner*, 397 U.S. 572, 575 (1970) (explaining that a taxpayer cannot deduct a capital expenditure under section 162). The taxpayer "capitalizes" section 195 and section 263 expenditures, see § 1016(a)(1) (providing a basis adjustment for expenditures "properly chargeable to capital account"), and in some cases can deduct them over subsequent years through depreciation or amortization, *see, e.g.*, §§ 167, 195(b).
>
> As in effect for 2015, see supra note 12, section 174(a)(1) overrides these capitalization rules for research or experimental expenditures paid or incurred by the taxpayer during the taxable year "in connection with his trade or business." The taxpayer need not actually be engaged in a trade or business to incur an expenditure "in connection with his trade or business," but there must be a realistic prospect at the time of the expenditure that the taxpayer will enter a trade or business involving the technology being developed. See *Lewin v. Commissioner*, 335 F.3d 345, 347-48 (4th Cir. 2003), *aff'g per curiam* T.C. Memo. 2001-10. Such expenditures are not start-up or capital expenditures. See §§ 195(c)(1) (flush text), 263(a)(1)(B); see also § 263A(c)(2) (exempting any amount allowable as a deduction under section 174 from section 263A(a)(1), which requires that certain costs be included in inventory costs or capitalized). The taxpayer may either deduct the expenditures in the taxable year they are paid or incurred, § 174(a), or capitalize and deduct them ratably over 60 months, § 174(b).
>
> On the theory that they "so closely resemble" section 174 expenditures "as to warrant similar accounting treatment," Rev. Proc. 2000-50, §§ 4 and 5.01, purports to allow the same timing election for certain costs of developing computer software that the taxpayer has not treated as section 174 expenditures. The revenue procedure announces in pertinent part that the IRS "will not disturb" a taxpayer's deduction of these costs "in accordance with rules similar to those applicable under § 174(a)," or capitalization and recovery of the costs through amortization deductions "in accordance with rules similar to those provided by § 174(b) and the regulations thereunder" or other rules described in the revenue procedure. *Id.*; see also T.D. 9107, 2004-1 C.B. 447, 452 (preamble to regulations under section 263 directing taxpayers to rely on Rev. Proc. 2000-50 to determine when to deduct computer software development costs).

"Tax Court considers when a business becomes active for purposes of Section 195," *Journal of Taxation* (Nov. 2022), commented:

> The taxpayer alternatively argued that, if the expenditures were not deductible under Section 162, they were deductible under Section 174 as R&E expenses or Rev.

Proc. 2000-50 as software development costs. The court concluded that the taxpayer could not deduct his expenditures under Section 174 because he and the engineers simply had adapted widely used software to solve a familiar problem and did not conduct research beginning at the "drawing board." Thus, they were not dealing with uncertainty in the development of a product. The court concluded that the taxpayer could not deduct software development costs under Rev. Proc. 2000-50 because Rev. Proc. 2000-50 addressed the treatment of otherwise deductible costs and did not provide an independent basis for deduction.

II.G.4.m. Fixing Unfair Income Tax Results

See Harrington, "Retroactive Revisions and Reversals: Risks and Rewards," Chapter 4, 55TH Annual Heckerling Institute on Estate Planning (2021), parts of which discuss the ideas in this part II.G.4.m and part of which is quoted extensively in part II.P.3.g Rescissions, Including Rescinding Conversion of Entity.

II.G.4.m.i. Code § 1341 Claim of Right Deduction

Our income tax system tends to accelerate income recognition and defer deductions, absent specific provisions to the contrary (of which there are very notable provisions). If a taxpayer recognizes income that ultimately not something the taxpayer can keep, writing off that income in a future year might not do justice to the taxpayer, depending on the taxpayer's future tax posture. Accordingly, Code § 1341(a), "General rule," provides:

> If -
>
> (1) an item was included in gross income for a prior taxable year (or years) because it appeared that the taxpayer had an unrestricted right to such item;
>
> (2) a deduction is allowable for the taxable year because it was established after the close of such prior taxable year (or years) that the taxpayer did not have an unrestricted right to such item or to a portion of such item; and
>
> (3) the amount of such deduction exceeds $3,000,
>
> then the tax imposed by this chapter for the taxable year shall be the lesser of the following:
>
> (4) the tax for the taxable year computed with such deduction; or
>
> (5) an amount equal to -
>
> > (A) the tax for the taxable year computed without such deduction, minus
> >
> > (B) the decrease in tax under this chapter (or the corresponding provisions of prior revenue laws) for the prior taxable year (or years) which would result solely from the exclusion of such item (or portion thereof) from gross income for such prior taxable year (or years).
>
> For purposes of paragraph (5)(B), the corresponding provisions of the Internal Revenue Code of 1939 shall be chapter 1 of such code (other than subchapter E, relating to self-employment income) and subchapter E of chapter 2 of such code.

As to the Code § 1341(a)(1) requirement that "an item was included in gross income for a prior taxable year (or years) because it appeared that the taxpayer had an unrestricted right to such item," *Mihelick v. U.S.*, 927 F.3d 1138 (11th Cir. 2019), described what "appeared" implies:

> What matters is whether Mihelick sincerely believed she had a right to Bluso's income, not the correctness of her belief. *McKinney v. United States*, 574 F.2d 1240, 1243 (5th Cir. 1978)[2] ("The language of [§] 1341(a)(1), *i.e.*[,] 'because it appeared that the taxpayer had an unrestricted right to such item,' must necessarily mean 'because it appeared (*to the taxpayer*) that (he) had an unrestricted right to such item.'" (emphasis added)). After all, if a taxpayer had to correctly believe that she had an unrestricted right to income to qualify for § 1341, then the taxpayer would have correctly paid her income taxes in the first place, and § 1341 would never come into play, since the second element of § 1341 requires a showing that the taxpayer did not, in fact, have an unrestricted right to the income. So Mihelick did not need to be right that she had an unrestricted right to Bluso's income; she just needed to sincerely believe it.[3]
>
> [2] Decisions handed down by the Fifth Circuit by the close of business on September 30, 1981, are binding on this Court.
>
> [3] The taxpayer need only subjectively believe that she was entitled to an item of income - even if some may consider her belief to be unreasonable. As stated, the object of § 1341 is "to put the taxpayer in the same position he would have been in had he not included the item as gross income in the first place." *Fla. Progress*, 348 F.3d at 957. The section does not discriminate between those who reasonably or unreasonably paid excess taxes - its aim is to return to the taxpayer excess taxes paid. And this makes good sense: no one would report and pay taxes on income to which she does not believe herself to be entitled, only to take the trouble of going through § 1341 to return herself to her starting position.

As to the Code § 1341(a)(2) requirement that "it was established after the close of such prior taxable year (or years) that the taxpayer did not have an unrestricted right to such item or to a portion of such item," *Mihelick v. U.S.*, 927 F.3d 1138 (11th Cir. 2019), described this element:

> To make this showing, the taxpayer must demonstrate that she involuntarily gave away the relevant income because of some obligation, and the obligation had a substantive nexus to the original receipt of the income. See *Batchelor-Robjohns v. United States*, 788 F.3d 1280, 1293-94 (11th Cir. 2015). Mihelick satisfies both requirements.
>
> Mihelick involuntarily gave away $300,000 of the relevant income to which she previously believed she had an unrestricted right. We have explained that "payments made to settle a lawsuit" may constitute an involuntary obligation for § 1341 purposes. *Batchelor-Robjohns*, 788 F.3d at 1293-94 (citing *Barrett v. Commissioner*, 96 T.C. 713 (1991)).[4] In *Barrett*, two groups of securities brokers sued Barrett and several other shareholders at his brokerage firm after the Securities and Exchange Commission instituted administrative proceedings against the brokers for suspected insider-trading violations. *Barrett*, 96 T.C. at 715. At a hearing, the magistrate judge advised Barrett and his co-defendants to settle the suits to "avoid the hazards of litigation," "substantial legal fees," and "adverse trial publicity," all of which would be harmful for Barrett and his brokerage business. *Id.* Barrett heeded the magistrate judge's advice and without admitting wrongdoing, settled the civil suits for $54,000. *Id.* He then sought a tax credit through § 1341. *Id.* At 716.

> [4] In *Batchelor-Robjohns*, we adopted *Barrett*'s reasoning as to what constitutes an involuntary obligation, but we did not adopt all aspects of *Barrett*. Part of *Barrett*'s reasoning rested on the distinction between taking a tax credit and a deduction under § 1341. See *Barrett*, 96 T.C. at 718. But in *Batchelor-Robjohns*, we ruled that the "deduction/credit distinction merely determines how to account for a § 1341 repayment on one's return, nothing more." *Batchelor-Robjohns*, 788 F.3d at 1297.

> The government fought Barrett's attempt to obtain the § 1341 credit. It argued that Barrett's payment was voluntary, so he failed to establish that he did not have an unrestricted right to the $54,000 he paid to settle the suits. *Id.* at 718. In particular, the government complained that Barrett "merely settled the lawsuits" while continuing to deny his liability and "was not compelled to pay out $54,000 by a judicial decree after a trial on the merits." *Id.*

> The *Barrett* Court was unmoved by the government's arguments. It would be "ludicrous," the *Barrett* Court explained, "[t]o conclude that [Barrett] restored the $54,000 voluntarily without regard to any legal obligation." *Id.* At 719. Pointing out the risks that Barrett faced – losing his license, facing up to $10 million in liability, not knowing the type of evidence the plaintiffs wielded - and the fact that "[t]he policy of the law is to foster the peaceful settlement of disputes without litigation," *Barrett* held that the settlement was "made in good faith and at arm's length." *Id.* at 719-20. That good-faith settlement, "whether or not embodied in a judgment, established the fact and the amount of [Barrett's] legal obligation" and showed that Barrett did not have an unrestricted right to the $54,000 for § 1341 purposes. *Id*.

> Mihelick's situation is materially indistinguishable. As with Barrett, Mihelick's obligation to pay arose not from a final judgment, but from an agreement she entered in good-faith to avoid litigation. And it would be equally as "ludicrous" - as it was in *Barrett* to say that Barrett voluntarily paid his $54,000 - to conclude that Mihelick voluntarily paid $300,000 of her income without regard to any legal obligation.

> Indeed, Mihelick initially opposed paying Bluso for any liability arising from the Barnes lawsuit. Only after Bluso threatened her with litigation did she agree to be bound to do so and enter into Article 5 of her separation agreement. And even that did not occur without a battle: the parties actually negotiated Article 5 of the separation agreement - Bluso asked Mihelick to simply give him $150,000, but Mihelick turned down that offer because she judged that Barnes's lawsuit would not produce that much liability. Then, even after Bluso settled the Barnes lawsuit for $600,000 and attempted to collect $300,000 from Mihelick, she resisted paying, prompting Bluso to withhold alimony for a month.

In *Mihelick v. U.S.*, 927 F.3d 1138 (11th Cir. 2019), the taxpayer and her husband divorced, and she was forced to repay him half of the income he had returned to settle a dispute over his prior compensation that was included in a joint return. The court explained:

> The government next suggests a new requirement that the taxpayer must meet. According to the government, a taxpayer lacks an unrestricted right to an item of income only if she returned the income to the "actual owner." Although the government cites no caselaw for support, its contention is not unprecedented. See *Alcoa, Inc. v. United States*, 509 F.3d 173, 180-82 (3d Cir. 2007). Nevertheless, we decline to adopt a new requirement for this Circuit that lacks a basis in the statutory text and is inconsistent with

§ 1341's purpose—namely, returning the taxpayer who unnecessarily pays taxes on income she did not have to "the same position [s]he would have been in had [s]he not included the item as gross income in the first place." *Fla. Progress*, 348 F.3d at 957. It is sufficient on this record that Barnes effectively and reasonably claimed to be the rightful owner of the $300,000, and Bluso and Mihelick - who otherwise had a claim to be the rightful owners of the $300,000 - agreed in a legally binding way not to challenge that.

On the other hand, if funds were acquired through fraud, the taxpayer does not have "an unrestricted right" to the funds, so Code § 1341(a)(1) does not apply. Furthermore, the taxpayer needs to plead the grounds for deduction under Code § 1341(a)(2). These failures justify dismissing the claim. *Steffen v. U.S.*, 995 F.3d 1377 (Fed. Cir. 2021) (split decision).

O'Neill Trust v. Commissioner, T.C. Memo. 2022-108, gave the taxpayer no relief because the taxpayer failed to preserve its rights and because the court strictly construed which taxpayer could assert a claim of right. The case involved a compromise of estate tax liability that might have resulted in favorable income tax consequences. Facts include:[1421]

> The trust was established April 18, 1968, as a revocable trust. It became an irrevocable trust upon the death of decedent, its creator, on April 4, 2009. Before his death, decedent transferred his assets to the trust. At the time of his death, the trust held an 86.12% ownership interest in RMV Total Diversification, LLC (RMV). RMV is a limited liability company and is a partnership pursuant to the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA).[3] RMV sold capital gain assets during 2009 and 2010, which resulted in flowthrough income to the trust. The trust reported this income on its Forms 1041, U.S. Income Tax Return for Estates and Trusts, for 2009 and 2010.
>
> > [3] Before its repeal, TEFRA, Pub. L. No. 97 -248, §§ 401-407, 96 Stat. 324, 648-71, governed the tax treatment and audit procedures for many partnerships. TEFRA was replaced by the Bipartisan Budget Act of 2015 (BBA), Pub. L. No. 114-74, § 1101(a), (c)(1), (g), 129 Stat. 584, 625, 638. For partnership returns filed for years beginning after November 2, 2015, and before January 1, 2018, partnerships were able to elect to apply the procedures of the BBA instead of those of TEFRA. See BBA § 1101(a), 129 Stat. at 638.
>
> Following decedent's death, his estate borrowed money from RMV in the form of a *Graegin* loan on which it was charged a 9% interest rate. See *Estate of Graegin v. Commissioner*, T.C. Memo. 1988-477. The interest paid to RMV by the estate resulted in flowthrough income for the trust, which the trust reported as income. The estate timely filed Form 706, United States Estate (and Generation-Skipping Transfer) Tax Return, on June 30, 2010. The Commissioner proposed adjustments to the estate's Form 706. The estate objected to the proposed adjustments and filed a Petition with this Court.
>
> The parties reached a settlement with the IRS Appeals Office, and on February 3, 2015, this Court entered a decision in *Estate of Richard J. O'Neill, Deceased, Anthony R. Moiso, Executor v. Commissioner*, Docket No. 19822-13 (related case).[4] This decision resulted in two adjustments relevant to this case: (1) the value of the estate's interest in RMV was adjusted from $30,725,000 to $40,614,822 under section 2036 and (2) the

[1421] Below the court discusses a *Graegin* loan, which is discussed in part III.B.5.e.iii.(a) *Graegin* Loans: Tax Issues.

estate was limited to a deduction of 6% on the note (instead of the 9% claimed). The note was subsequently rewritten, resulting in a $500,538 reduction of accrued interest to the trust for 2010.

[4] On July 1, 2019, the IRS Office of Appeals was renamed the IRS Independent Office of Appeals. See Taxpayer First Act, Pub. L. No. 116-25, § 1001, 133 Stat. 981, 983 (2019). We will use the name in effect at the times relevant to this case, *i.e.*, the Office of Appeals or Appeals.

In October 2015 the trust filed a timely tentative claim for refund on Form 1045 for the 2014 tax year under a claim of right theory. The tentative claim for refund was to recover an overpayment of income tax paid by the trust for the 2009 and 2010 tax years. RMV did not file an amended partnership income tax return for 2009, 2010, 2014, or 2015. The trust did not file Form 8082, Notice of Inconsistent Treatment or Administrative Adjustment Request (AAR), with respect to RMV for 2009, 2010, 2014, or 2015. Discussion Summary judgment may be granted where the pleadings and other materials show there is no genuine dispute as to any material fact and a decision may be rendered as a matter of law. Rule 121(b); *Sundstrand Corp. v. Commissioner*, 98 T.C. 518, 520 (1992), *aff'd*, 17 F.3d 965 (7th Cir. 1994). The burden is on the moving party to demonstrate that there is no genuine dispute as to any material fact and the party is entitled to judgment as a matter of law. *FPL Grp., Inc. & Subs. v. Commissioner*, 116 T.C. 73, 74-75 (2001). Both parties have moved for partial summary judgment, and they agree there exist no genuine disputes of material fact regarding the questions they have asked us to decide. After reviewing the pleadings and Motions with accompanying Exhibits, we conclude that a decision may be rendered as a matter of law.

The court rejected the trust's claim of right argument:

Claim of right under section 1341 does not apply in this case for several reasons, the first being that the trust was not the appropriate taxpayer to file a claim for refund. The trust filed a refund claim on the basis of flowthrough income it received as a partner of RMV.

Under TEFRA, treatment of partnership items must be decided at the partnership level. § 6221; Treas. Reg. § 301.6231(a)(3)-1. Partners must treat any income received from the partnership in a manner consistent with the treatment of that income at the partnership level. § 6222(a). In certain instances, a partner may seek to treat income received from a partnership in a manner inconsistent with the income item's treatment at the partnership level. § 6662(b); § 6227(a). To do so, a partner must file Form 8082. Form 8082 may also be filed by a partner as a protective claim for refund.

Both the capital gain and interest income (income items) the trust received as a partner of RMV are partnership items. See Treas. Reg. § 301.6231(a)(3)-1. RMV has not filed an amended return for 2009 or 2010. The trust did not file Form 8082 either in recognition of its inconsistent treatment of these income items or as a protective claim for refund with respect to the examination issues arising from the related case.

B. Substantive Issues

Even if there were no procedural issues with the trust's refund claim, the trust would still fail to satisfy the substantive requirements of section 1341.

In 2009 and 2010 RMV sold capital assets, resulting in capital gain allocable to the trust. The trust claims that RMV understated its basis in the sale of the capital assets, which effectively resulted in the trust's overstating its capital gain. The trust argues that this basis adjustment created a claim of right with respect to the overstated capital gain.

The parties do not dispute that RMV, and therefore the trust, had an unrestricted right in the capital assets sales proceeds. No portion of this item was repaid or otherwise restored as a result of legal or contractual disputes surrounding RMV's right to the item. RMV's unrestricted right to the sales proceeds never ceased to exist, meaning that the trust's right to the flowthrough income was also unrestricted. Because the trust's right to the income items was at all times unrestricted, section 1341 does not apply.

Additionally, section 1341 addresses issues relating to a taxpayer's right to an income item. An adjustment to basis relates to the value of an income item and is independent from a taxpayer's right to the income item. Because the trust's unrestricted right to the capital gain was unaffected by the adjustment to basis, section 1341 does not apply and the trust does not have a claim of right.

The trust's refund claim also contends that the decision in the related case created a claim of right under section 1341 with respect to the interest income paid to RMV by the estate. The decision in the related case limited the amount of interest deductible by the estate to 6%, rather than the entirety of the 9% agreed upon in the note. Following the decision in the related case, RMV and the estate voluntarily renegotiated the terms of the note, decreasing the interest paid by the estate to RMV from 9% to 6%. RMV's decision to voluntarily renegotiate the terms of the note to reflect the decision in the related case does not retroactively restrict its [*6] right to the interest income reported for the prior tax year. RMV at all relevant times had an unrestricted right to the interest income. The trust, therefore, does not have a claim of right upon which to base its claim for refund.

II. Mitigation Provisions

Sections 1311 through 1314 (mitigation provisions) allow for filing of a refund claim within one year from the date a proper determination becomes final. To claim the benefits of the mitigation provisions, a taxpayer must show that (1) there was a determination as defined by section 1313(a); (2) the determination falls within specified circumstances of adjustment set forth in section 1312; and (3) the party against whom the mitigation provisions are being invoked has maintained a position inconsistent with the challenged erroneous inclusion, exclusion, recognition , or nonrecognition of income as described by section 1311(b) . The Court of Appeals for the Ninth Circuit narrowly construes the requirements of the mitigation provisions. See *United States v. Rigdon*, 323 F.2d 446, 449 (9th Cir. 1963); *United States v. Rushlight*, 291 F.2d 508, 514 (9th Cir. 1961).

The trust's reliance on the mitigation provisions fails for procedural reasons. As with the claim of right, the mitigation provisions require that a refund claim be filed with respect to a specific year. See§ 1314(b). Because the trust is claiming it overpaid for the 2009 and 2010 tax years, it should have filed a refund claim for those years. Instead, its claim is for the 2014 tax year. As with the claim of right argument, this procedural defect is fatal to the trust's position.

Code §§ 1311-1314 are discussed in part II.G.4.m.iv Mitigation of Effect of Limitations and Other Provisions: Code §§ 1311-1314. The court also rejected the taxpayer's equitable recoupment argument.[1422]

Code § 1341(b), "Special rules," provides:

(1) If the decrease in tax ascertained under subsection (a)(5)(B) exceeds the tax imposed by this chapter for the taxable year (computed without the deduction) such excess shall be considered to be a payment of tax on the last day prescribed by law for the payment of tax for the taxable year, and shall be refunded or credited in the same manner as if it were an overpayment for such taxable year.

(2) Subsection (a) does not apply to any deduction allowable with respect to an item which was included in gross income by reason of the sale or other disposition of stock in trade of the taxpayer (or other property of a kind which would properly have been included in the inventory of the taxpayer if on hand at the close of the prior taxable year) or property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business. This paragraph shall not apply if the deduction arises out of refunds or repayments with respect to rates made by a regulated public utility (as defined in section 7701(a)(33) without regard to the limitation contained in the last two sentences thereof) if such refunds or repayments are required to be made by the Government, political subdivision, agency, or instrumentality referred to in such section, or by an order of a court, or are made in settlement of litigation or under threat or imminence of litigation.

(3) If the tax imposed by this chapter for the taxable year is the amount determined under subsection (a)(5), then the deduction referred to in subsection (a)(2)shall not be taken into account for any purpose of this subtitle other than this section.

(4) For purposes of determining whether paragraph (4) or paragraph (5) of subsection (a) applies -

(A) in any case where the deduction referred to in paragraph (4) of subsection (a) results in a net operating loss, such loss shall, for purposes of computing the tax for the taxable year under such paragraph (4), be carried back to the same extent and in the same manner as is provided under section 172; and

(B) in any case where the exclusion referred to in paragraph (5)(B) of subsection (a) results in a net operating loss or capital loss for the prior taxable year (or years), such loss shall, for purposes of computing the decrease in tax for the prior taxable year (or years) under such paragraph (5)(B), be carried back and carried over to the same extent and in the same manner as is provided under section 172 or section 1212, except that no carryover beyond the taxable year shall be taken into account.

(5) For purposes of this chapter, the net operating loss described in paragraph (4)(A) of this subsection, or the net operating loss or capital loss described in paragraph (4)(B) of this subsection, as the case may be, shall (after the application of paragraph (4) or (5)(B) of

[1422] See text accompanying fn 1426 in part II.G.4.m.ii Equitable Recoupment.

subsection (a) for the taxable year) be taken into account under section 172 or 1212 for taxable years after the taxable year to the same extent and in the same manner as -

(A) a net operating loss sustained for the taxable year, if paragraph (4) of subsection (a) applied, or

(B) a net operating loss or capital loss sustained for the prior taxable year (or years), if paragraph (5)(B) of subsection (a)applied.

In response to limitations in deducting capital losses,[1423] Reg. § 1.1341-1(c), "Application to deductions which are capital in nature," provides:

> Section 1341 and this section shall also apply to a deduction which is capital in nature otherwise allowable in the taxable year. If the deduction otherwise allowable is capital in nature, the determination of whether the taxpayer is entitled to the benefits of section 1341 and this section shall be made without regard to the net capital loss limitation imposed by section 1211. For example, if a taxpayer restores $4,000 in the taxable year and such amount is a long-term capital loss, the taxpayer will, nevertheless, be considered to have met the $3,000 deduction requirement for purposes of applying this section, although the full amount of the loss might not be allowable as a deduction for the taxable year. However, if the tax for the taxable year is computed with the deduction taken into account, the deduction allowable will be subject to the limitation on capital losses provided in section 1211, and the capital loss carryover provided in section 1212.

II.G.4.m.ii. Equitable Recoupment

Code § 6214(b), "Jurisdiction over other years and quarters," provides:[1424]

> The Tax Court in redetermining a deficiency of income tax for any taxable year or of gift tax for any calendar year or calendar quarter shall consider such facts with relation to the taxes for other years or calendar quarters as may be necessary correctly to redetermine the amount of such deficiency, but in so doing shall have no jurisdiction to determine whether or not the tax for any other year or calendar quarter has been overpaid or underpaid. Notwithstanding the preceding sentence, the Tax Court may apply the doctrine of equitable recoupment to the same extent that it is available in civil tax cases before the district courts of the United States and the United States Court of Federal Claims.

Estate of Jorgensen v. Commissioner, T.C. Memo. 2009-66, quoted *Menard, Inc. v. Commissioner*, 130 T.C. 54, 62-63 (2008):

[1423] See fns 1550-1552 and accompanying text in part II.G.8 Code § 165(a) Loss for Worthlessness; Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A Limitation on that Strategy.

[1424] In footnote 14, *Estate of Jorgensen v. Commissioner*, T.C. Memo. 2009-66, explained:

> Before the amendment to sec. 6214(b), the Courts of Appeals that considered whether we may entertain an equitable recoupment claim split on the question. Compare *Estate of Mueller v. Commissioner*, 153 F.3d 302 (6th Cir. 1998), *affg.* on other grounds 107 T.C. 189 (1996), with *Estate of Branson v. Commissioner*, 264 F.3d 904 (9th Cir. 2001), *affg.* 113 T.C. 6, 15 (1999).

Estate of Branson was a reviewed Tax Court decision, with a 12-3 vote.

> The doctrine of equitable recoupment is a judicially created doctrine that, under certain circumstances, allows a litigant to avoid the bar of an expired statutory limitation period. The doctrine prevents an inequitable windfall to a taxpayer or to the Government that would otherwise result from the inconsistent tax treatment of a single transaction, item, or event affecting the same taxpayer or a sufficiently related taxpayer. Equitable recoupment operates as a defense that may be asserted by a taxpayer to reduce the Commissioner's timely claim of a deficiency, or by the Commissioner to reduce the taxpayer's timely claim for a refund. When applied for the benefit of a taxpayer, the equitable recoupment doctrine allows a taxpayer to recoup the amount of a time-barred tax overpayment by allowing the overpayment to be applied as an offset against a deficiency if certain requirements are met.
>
> As a general rule, the party claiming the benefit of an equitable recoupment defense must establish that it applies. In order to establish that equitable recoupment applies, a party must prove the following elements: (1) The overpayment or deficiency for which recoupment is sought by way of offset is barred by an expired period of limitation; (2) the time-barred overpayment or deficiency arose out of the same transaction, item, or taxable event as the overpayment or deficiency before the Court; (3) the transaction, item, or taxable event has been inconsistently subjected to two taxes; and (4) if the transaction, item, or taxable event involves two or more taxpayers, there is sufficient identity of interest between the taxpayers subject to the two taxes that the taxpayers should be treated as one.

As to factor (2), *Estate of Jorgensen v. Commissioner*, T.C. Memo. 2009-66, explained:[1425]

> A claim of equitable recoupment will lie only where the Government has taxed a single transaction, item, or taxable event under two inconsistent theories. *Estate of Branson v. Commissioner*, 113 T.C. 6, 15 (1999), *affd.* 264 F.3d 904 (9th Cir. 2001). In *Estate of Branson*, the decedent's estate included stock in two closely held corporations. To pay applicable estate taxes, the estate sold a portion of the stock. The stock was sold for considerably more than its value reported on the estate. Under section 1014(a)(1),[16] the value of the stock tax return, as declared on the estate tax return was used as its basis for determining gain from the sale. The estate did not pay the tax on the sale but distributed the gain to the estate's residuary beneficiary, who paid the tax due. The Commissioner determined a deficiency in estate tax on the ground that the closely held corporation stock was worth substantially more than declared. In *Estate of Branson v. Commissioner*, T.C. Memo. 1999-231, we agreed with the Commissioner. Our revaluation of the stock resulted in an estate tax deficiency. Since pursuant to section 1014(a) the same valuation was used to determine the residuary beneficiary's gain on the sale of the stock, it followed that the residuary beneficiary had overpaid her income tax. *Estate of Branson v. Commissioner*, 264 F.3d at 907.
>
> > [16] Sec. 1014 generally provides a basis for property acquired from a decedent that is equal to the value placed upon the property for purposes of the Federal estate tax. See *Estate of Branson v. Commissioner*, 113 T.C. at 34-35; sec. 1.1014-1(a), Income Tax Regs.

[1425] For more on this case, see fns 5695-5696 and accompanying text in part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000.

O'Neill Trust v. Commissioner, T.C. Memo. 2022-108, described above,[1426] held:

> The trust argues that even if it is unable to claim a refund under claim of right or the mitigation provisions, the doctrine of equitable recoupment would still entitle it to seek a refund. Equitable recoupment is an equitable solution for situations "where the Government has taxed a single transaction, item, or taxable event under two inconsistent theories." *United States v. Dalm*, 494 U.S. 596, 605 n.5 (1990). It is not an "independent ground for reopening years now closed by the statute of limitations." *Evans Tr. v. United States*, 462 F.2d 521, 526 (Ct. Cl. 1972). A claim of equitable recoupment requires that (1) the refund for which recoupment is sought by way of offset be barred by time; (2) the time-barred offset arise out of the same transaction, item, or taxable event as the overpayment or deficiency before the Court; (3) the [*7] transaction, item, or taxable event have been inconsistently subject to two taxes; and (4) if the subject transaction, item, or taxable event involves two or more taxpayers, there be sufficiency of interest between the taxpayers so that the taxpayers should be treated as one. *Estate of Branson v. Commissioner*, 113 T.C. 6, 15 (1999), *aff'd*, 264 F.3d 904 (9th Cir. 2001).
>
> As with its claim of right and mitigation provision arguments, the trust's reliance on the doctrine of equitable recoupment fails in part because the trust is not the appropriate party to seek a refund in this case. The deficiency upon which the trust bases its claim for recoupment arises from deficiencies directly related to the estate's taxes, not the trust's.
>
> Furthermore, the requirements of equitable recoupment are not met. Respondent's determination is based on the disallowance of the trust's claimed reduction of tax liability pursuant to section 1341. This determination is not inconsistent with the trust's time-barred income tax liabilities for tax years 2009 and 2010. The liabilities for 2009 and 2010 have no transactional connection with respondent's denial under the claim of right.

When the same four individuals owned a law firm operated as a PC and another as an LLP and a payroll tax error caused the wrong entity to pay payroll taxes, a recovery of taxes against the correct entity generated equitable recoupment for taxes paid by the wrong entity. *Emery Celli Cuti Brinckerhoff & Abady v. Commissioner*, T.C. Memo. 2018-55.

II.G.4.m.iii. Tax Benefit Rule

Code § 111, "Recovery of tax benefit items," provides:

> (a) *Deductions*. Gross income does not include income attributable to the recovery during the taxable year of any amount deducted in any prior taxable year to the extent such amount did not reduce the amount of tax imposed by this chapter.
>
> (b) *Credits*.
>
> (1) *In general*. If-
>
> (A) a credit was allowable with respect to any amount for any prior taxable year, and

[1426] See text accompanying and following fn 1421 in part II.G.4.m.i Code § 1341 Claim of Right Deduction.

(B) during the taxable year there is a downward price adjustment or similar adjustment,

the tax imposed by this chapter for the taxable year shall be increased by the amount of the credit attributable to the adjustment.

(2) *Exception where credit did not reduce tax*. Paragraph (1) shall not apply to the extent that the credit allowable for the recovered amount did not reduce the amount of tax imposed by this chapter.

(3) *Exception for investment tax credit and foreign tax credit*. This subsection shall not apply with respect to the credit determined under section 46 and the foreign tax credit.

(c) *Treatment of carryovers*. For purposes of this section, an increase in a carryover which has not expired before the beginning of the taxable year in which the recovery or adjustment takes place shall be treated as reducing tax imposed by this chapter.

(d) *Special rules for accumulated earnings tax and for personal holding company tax*. In applying subsection (a) for the purpose of determining the accumulated earnings tax under section 531 or the tax under section 541 (relating to personal holding companies)-

(1) any excluded amount under subsection (a) allowed for the purposes of this subtitle (other than section 531 or section 541) shall be allowed whether or not such amount resulted in a reduction of the tax under section 531 or the tax under section 541 for the prior taxable year; and

(2) where any excluded amount under subsection (a) was not allowable as a deduction for the prior taxable year for purposes of this subtitle other than of section 531 or section 541 but was allowable for the same taxable year under section 531 or section 541, then such excluded amount shall be allowable if it did not result in a reduction of the tax under section 531 or the tax under section 541.

The companion cases of *Hillsboro Nat'l Bank v. Commissioner* and *Bliss Dairy, Inc. v. United States*, 460 U.S. 370 (1983), describe the tax benefit rule in part II of their opinion:

> The Government[7] in each case relies solely on the tax benefit rule - a judicially developed principle[8] that allays some of the inflexibilities of the annual accounting system. An annual accounting system is a practical necessity if the federal income tax is to produce revenue ascertainable and payable at regular intervals. *Burnet v. Sanford & Brooks Co.*, 282 U.S. 359, 365 (1931). Nevertheless, strict adherence to an annual accounting system would create transactional inequities. Often an apparently completed transaction will reopen unexpectedly in a subsequent tax year, rendering the initial reporting improper. For instance, if a taxpayer held a note that became apparently uncollectible early in the taxable year, but the debtor made an unexpected financial recovery before the close of the year and paid the debt, the transaction would have no tax consequences for the taxpayer, for the repayment of the principal would be recovery of capital. If, however, the debtor's financial recovery and the resulting repayment took place after the close of the taxable year, the taxpayer would have a deduction for the apparently bad debt in the first year under § 166(a) of the Code, 26 U.S.C. § 166(a).

Without the tax benefit rule, the repayment in the second year, representing a return of capital, would not be taxable. The second transaction, then, although economically identical to the first, could, because of the differences in accounting, yield drastically different tax consequences. The Government, by allowing a deduction that it could not have known to be improper at the time, would be foreclosed[9] from recouping any of the tax saved because of the improper deduction.[10] Recognizing and seeking to avoid the possible distortions of income,[11] the courts have long required the taxpayer to recognize the repayment in the second year as income. See, *e.g.*, *Estate of Block v. Commissioner*, 39 B.T.A. 338 (1939), *aff'd sub nom. Union Trust Co. v. Commissioner*, 111 F.2d 60 (CA7), *cert. denied*, 311 U.S. 658 (1940); *South Dakota Concrete Products Co. v. Commissioner*, 26 B.T.A. 1429 (1932); Plumb, *The Tax Benefit Rule Today*, 57 Harv. L. Rev., 129, 176, 178 and n. 172 (1943) (hereinafter Plumb).[12]

[7] In No. 81-485, the Solicitor General represents the Commissioner of Internal Revenue, while in No. 81-930, he represents the United States. We refer to the Commissioner and the United States collectively as "the Government."

[8] Although the rule originated in the courts, it has the implicit approval of Congress, which enacted § 111 as a limitation on the rule. See note 12, *infra*.

[9] A rule analogous to the tax benefit rule protects the taxpayer who is required to report income received in one year under claim of right that he later ends up repaying. Under that rule, he is allowed a deduction in the subsequent year. See generally § 1341, 26 U.S.C. § 1341; 1 B. Bittker Federal Taxation of Income, Estates and Gifts § 6.3 (1981).

[10] When the event proving the deduction improper occurs after the close of the taxable year, even if the statute of limitations has not run, the Commissioner's proper remedy is to invoke the tax benefit rule and require inclusion in the later year rather than to re-open the earlier year. See *Lexmont Corp. v. Commissioner*, 20 T.C. 185 (1953); *South Dakota Concrete Products Co. v. Commissioner*, 26 B.T.A. 1429, 1432 (1932); 1 J. Mertens, Law of Federal Income Taxation § 7.34 (J. Doheny rev. ed. 1981); Bittker & Kanner, *The Tax Benefit Rule*, 26 U.C.L.A. L. Rev. 265, 266 (1978).

Much of Justice Blackmun's dissent takes issue with this well-settled rule. The inclusion of the income in the year of the deductions by amending the returns for that year is not before us in these cases, for none of the parties has suggested such a result, no doubt because the rule is so settled. It is not at all clear what would happen on the remand that Justice Blackmun desires. Neither taxpayer has ever sought to file an amended return. The statute of limitations has now run on the years to which the dissent would attribute the income, § 6501(a), and we have no indication in the record that the Government has held those years open for any other reason.

Even if the question were before us, we could not accept the view of Justice Blackmun's dissent. It is, of course, true that the tax benefit rule is not a precise way of dealing with the transactional inequities that occur as a result of the annual accounting system, *post*, at 3, 5. See note 12, *infra*. Justice Blackmun's approach, however, does not eliminate the problem; it only multiplies the number of rules. If the statute of limitations has run on the earlier year, the dissent recognizes that the rule that we now apply must apply. *Post*, at 5. Thus, under the proposed scheme, the only difference is that, if the inconsistent event fortuitously occurs between the end of the year of the deduction and the running of the statute of limitations, the Commissioner must reopen the earlier year or permit an amended return even though it is settled that the acceptance of such a return after the date for filing a return is not covered by statute but within the discretion of the Commissioner. See, *e.g.*, *Koch v. Alexander*, 561 F.2d 1115 (CA4 1977) (*per curiam*); *Miskovsky v. United States*, 414 F.2d 954 (CA3 1969). In any other situation, the income must be recognized in the later year. Surely a single rule covering all situations would be preferable to several rules that do not alleviate any of the disadvantages of the single rule.

A second flaw in Justice Blackmun's approach lies in his assertion that the practice he proposes is like any correction made after audit. Changes on audit reflect the proper tax treatment of items under the facts as they were known at the end of the taxable year. The tax benefit rule is addressed to a different problem—that of events that occur after the close of the taxable year.

In any event, whatever the merits of amending the return of the year of the improper deduction might originally have been, we think it too late in the day to change the rule. Neither the judicial origins of the rule nor the subsequent codification permit the approach suggested by Justice Blackmun.

The dissent suggests that the reason that the early cases expounding the tax benefit rule required inclusion in the later year was that the statute of limitations barred adjustment in the earlier year. *Post*, at 3, n. *. That suggestion simply does not reflect the cases cited. In *Burnet v. Sanford & Brooks Co.*, 282 U.S. 359 (1931), the judgment of the Court of Appeals reflected Justice Blackmun's approach, holding that the amount *recovered* in the later year was not income in that year but that the taxpayer had to amend its returns for the years of the deductions. *Id*., at 362. This Court reversed, stating, "That the recovery made by respondent in 1920 was gross income *for that year* ... cannot, we think, be doubted." *Id*., at 363. (Emphasis added). Neither does *Healy v. Commissioner*, 345 U.S. 278 (1953), a case dealing with income received under claim of right, provide any support for this novel theory. On the contrary, the Court's discussion of the statute of limitations, cited by the dissent, in context, is as follows:

"A rule which required that the adjustment be made in the earlier year of receipt instead of the later year of repayment would generally be unfavorable to taxpayers, for the statute of limitations would frequently bar any adjustment of the tax liability for the earlier year. Congress has enacted an annual accounting system under which income is counted up at the end of each year. It would be disruptive of an orderly collection of the revenue to rule that the accounting must be done over again to reflect events occurring after the year for which the accounting is made, and would violate the spirit of the annual accounting system." *Id.*, at 284-285 (footnote omitted). Even the earliest cases, then, reflect the currently accepted view of the tax benefit rule.

Further, § 111, the partial codification of the tax benefit rule, see note 8, *supra*, contradicts Justice Blackmun's view. It provides that gross income for a year does not include a specified portion of a recovery of amounts earlier deducted, implying that the remainder of the recovery is to be included in gross income for that year. See, *e.g.*, S. Rep. No. 830, 88th Cong., 2d Sess. 100 (1964); S. Rep. 1631, 77th Cong., 2d Sess. 79 (1942). Even if the judicial origins of the rule supported Justice Blackmun, we would still be obliged to bow to the will of Congress.

[11] As the rule developed, a number of theories supported taxation in the later year. One explained that the taxpayer who had taken the deduction “consented” to “return” it if events proved him not entitled to it, *e.g.*, *Philadelphia National Bank v. Rothensies*, 43 F.Supp. 923, 925 (E. D. Pa. 1942), while another explained that the deduction offset income in the earlier year, which became “latent” income that might be recaptured, *e.g.*, *National Bank of Commerce v. Commissioner*, 115 F.2d 875, 876-877 (1940); Lassen, *The Tax Benefit Rule and Related Problems*, 20 Taxes 473, 476 (1942). Still a third view maintained that the later recognition of income was a balancing entry. *E.g.*, *South Dakota Concrete Products Co. v. Commissioner*, 26 B.T.A. 1429, 1431 (1932). All these views reflected that the initial accounting for the item must be corrected to present a true picture of income. While annual accounting precludes reopening the earlier year, it does not prevent a less precise correction - far superior to none - in the current year, analogous to the practice of financial accountants. See W. Meigs, A. Mosich, C. Johnson and T. Keller, *Intermediate Accounting* 109 (3d ed. 1974). This concern with more accurate measurement of income underlies the tax benefit rule and always has.

[12] Even this rule did not create complete transactional equivalence. In the second version of the transaction discussed in the text, the taxpayer might have realized no benefit from the deduction, if, for instance, he had no taxable income for that year. Application of the tax benefit rule as originally developed would require the taxpayer to recognize income on the repayment, so that the net result of the collection of the principal amount of the debt would be recognition of income. Similarly, the tax rates might change between the two years, so that a deduction and an inclusion, though equal in amount, would not produce exactly offsetting tax consequences. Congress enacted § 111 to deal with part of this problem. Although a change in the rates may still lead to differences in taxes due, see *Alice Phelan Sullivan Corp. v. United States*, 381 F.2d 399 (Ct.Cl. 1967), § 111 provides that the taxpayer can exclude from income the amount that did not give rise to some tax benefit. See *Dobson v. Commissioner*, 320 U.S. 489, 505-506 (1943). This exclusionary rule and the inclusionary rule described in the text are generally known together as the tax benefit rule. It is the inclusionary aspect of the rule with which we are currently concerned.

The taxpayers and the Government in these cases propose different formulations of the tax benefit rule. The taxpayers contend that the rule requires the inclusion of amounts recovered in later years, and they do not view the events in these cases as “recoveries.” The Government, on the other hand, urges that the tax benefit rule requires the inclusion of amounts previously deducted if later events are inconsistent with the deductions; it insists that no “recovery” is necessary to the application of the rule. Further, it asserts that the events in these cases are inconsistent with the deductions taken by the taxpayers. We are not in complete agreement with either view.

An examination of the purpose and accepted applications of the tax benefit rule reveals that a “recovery” will not always be necessary to invoke the tax benefit rule. The purpose of the rule is not simply to tax “recoveries.” On the contrary, it is to approximate the results produced by a tax system based on transactional rather than annual accounting. See generally Bittker and Kanner, *The Tax Benefit Rule*, 26 U.C.L.A. Rev. 265, 270 (1978); Byrne, *The Tax Benefit Rule as Applied to Corporate Liquidations and Contributions to Capital: Recent Developments*, 56 Notre Dame Law. 215, 221, 232, (1980); Tye, *The Tax Benefit Doctrine Reexamined*, 3 Tax. L. Rev. 329 (1948) (hereinafter Tye). It has long been accepted that a taxpayer using accrual accounting who accrues and deducts an expense in a tax year before it becomes payable and who for some reason eventually does not have to pay the liability must then take into income the amount of the expense earlier deducted. See, *e.g.*, *Mayfair Minerals, Inc. v. Commissioner*, 456 F.2d 622 (CA5 1972) (per curiam); *Bear Manufacturing Co. v. United States*, 430 F.2d 152 (CA7 1970), *cert. denied*, 400 U.S. 1021 (1971); *Haynsworth v. Commissioner*, 68 T.C. 703 (1977), *aff'd without op.*, 609 F.2d 1007 (CA5 1979); *G.M. Standifer Construction Corp. v. Commissioner*, 30 B.T.A. 184, 186-187 (1934), *petition for review dism'd*, 78 F.2d 285 (CA9 1935). The bookkeeping entry cancelling the liability, though it increases the balance sheet net worth of the taxpayer, does not fit within any ordinary definition of "recovery."[13] Thus, the taxpayers' formulation of the rule neither serves the purposes of the rule nor accurately reflects the cases that establish the rule. Further, the taxpayers' proposal would introduce an undesirable formalism into the application of the tax benefit rule. Lower courts have been able to stretch the definition of "recovery" to include a great variety of events. For instance, in cases of corporate liquidations, courts have viewed the corporation's receipt of its own stock as a "recovery," reasoning that, even though the instant that the corporation receives the stock it becomes worthless, the stock has value as it is turned over to the corporation, and that ephemeral value represents a recovery for the corporation. See, *e.g.*, *Tennessee-Carolina Transportation, Inc. v. Commissioner*, 582 F.2d 378, 382 (CA6 1978), *cert. denied*, 440 U.S. 909 (1979) (alternative holding). Or, payment to another party may be imputed to the taxpayer, giving rise to a recovery. See *First Trust and Savings Bank v. United States*, 614 F.2d 1142, 1146 (CA7 1980) (alternative holding). Imposition of a requirement that there be a recovery would, in many cases, simply require the Government to cast its argument in different and unnatural terminology, without adding anything to the analysis.[14]

[13] See, *e.g.*, Bittker and Kanner, *The Tax Benefit Rule*, 26 U.C.L.A. L.Rev. 265, 267 (1978); *cf.* Zysman, *Income Derived from Recovery of Deductions*, 19 Taxes 29, 30 (1941) (We are "not concerned with a theoretical or pure economic concept of income, but with gross income within the meaning of the statute.")

Although Justice Stevens insists that this situation falls within the standard meaning of "recovery," it does so only in the sense that an increase in balance sheet net worth is to be considered a recovery. *Post*, at 15, n. 26. But in Bliss, Justice Stevens asserts that there is no recovery. There, the corporation's balance sheet shows zero as the historic cost of the grain on hand, because the corporation expensed the asset upon acquisition. At the date of liquidation, the historic cost of the grain on hand was in fact greater than zero, and an accurate balance sheet would have reflected an asset account balance greater than zero. The necessary adjustment thus reflects an increase in balance sheet net worth.

[14] Despite Justice Stevens' assertion that *Tennessee-Carolina* was wrong, *post*, at 15, n. 26, the case fits what seems to be his definition of a recovery - an enhancement of the taxpayer's wealth - for the corporation in Tennessee-Carolina received stock worth more than the balance sheet book value of its assets. See note 13, supra. Thus we disagree with the assertion that the recovery rule is a bright-line rule easily applied.

The basic purpose of the tax benefit rule is to achieve rough transactional parity in tax, see note 12, supra, and to protect the Government and the taxpayer from the adverse effects of reporting a transaction on the basis of assumptions that an event in a subsequent year proves to have been erroneous. Such an event, unforeseen at the time of an earlier deduction, may in many cases require the application of the tax benefit rule. We do not, however, agree that this consequence invariably follows. Not every unforeseen event will require the taxpayer to report income in the amount of his earlier deduction. On the contrary, the tax benefit rule will "cancel out" an earlier deduction only when a careful examination shows that the later event is indeed fundamentally inconsistent with the premise on which the deduction was initially based.[15] That is, if that event had occurred within the same taxable year, it would have foreclosed the deduction.[16] In some cases, a subsequent recovery by the taxpayer will be the only event that would be fundamentally inconsistent with the provision granting the deduction. In such a case, only actual recovery by the taxpayer would justify application of the tax benefit rule. For example, if a calendar-year taxpayer made a rental payment on December 15 for a 30-day lease deductible in the current year under § 162(a)(3), see Treas. Reg. § 1.461-1(a)(1), 26 CFR § 1.461-1(a)(1)(1982); *e.g.*, *Zaninovich v. Commissioner*, 616 F.2d 429 (CA9 1980),[17] the tax benefit rule would not require the recognition of income if the leased premises were destroyed by fire on January 10. The resulting inability of the taxpayer to occupy the building would be an event not fundamentally inconsistent with his prior deduction as an ordinary and necessary business expense under § 162(a). The loss is attributable to the business[18] and therefore is consistent with the deduction of the rental payment as an ordinary and necessary business expense. On the other hand, had the premises not burned and, in January, the taxpayer decided to use them to house his family rather than to continue the operation of his business, he would have converted the leasehold to personal use. This would be an event fundamentally inconsistent with the business use on which the deduction was based.[19] In the case of the fire, only if the lessor—by virtue of some provision in the lease—had refunded the rental payment would the taxpayer be required under the tax benefit rule to recognize income on the subsequent destruction of the building. In other words, the subsequent recovery of the previously deducted rental payment would be the only event inconsistent with the provision allowing the deduction. It therefore is evident that the tax benefit rule must be applied on a case-by-case basis. A court must consider the facts and circumstances of each case in the light of the purpose and function of the provisions granting the deductions.

[15] Justice Stevens accuses us of creating confusion at this point in the analysis by requiring the courts to distinguish "inconsistent events" from "fundamentally inconsistent events." *Post*, at 16. That line is not the line we draw; rather, we draw the line between merely unexpected events and inconsistent events.

This approach differs from that proposed by the Government in that the Government has not attempted to explain why two events are inconsistent. Apparently, in the Government's view, any unexpected event is inconsistent with an earlier deduction. That view we cannot accept.

[16] Justice Stevens apparently disagrees with this rule, for, although he concurs in the result in *Hillsboro*, he asserts that the events there would have resulted in denial of the deduction had they all occurred in one year. *Post*, at 16. We find it difficult to believe that Congress placed such a premium on having a transaction straddle two tax years.

[17] Justice Stevens questions whether this amount was properly deductible under § 162(a)(3) and seems to suggest that if it was, Congress meant the deduction to be irrevocable. *Post*, at 13, n. 25. It is clear that § 162(a)(3) permits the deduction of prepaid expenses that will benefit the taxpayer for a short time into the next taxable

year, as in our example, rather than benefitting the taxpayer substantially beyond the taxable year. See generally 1 B. Bittker, *supra* n. 1, at ¶ 20.4.1.

The dissent's view that the preferable approach is to scrutinize the deduction more carefully in the year it is taken ignores two basic problems. First, reasons unrelated to the certainty that the taxpayer will eventually consume the asset as expected often enter into the decision when to allow the deduction. For instance, the desire to save taxpayers the burden of careful allocation of relatively small expenditures favors the allowance of the entire deduction in a single year of some business expenditures attributable to operations after the close of the taxable year. See generally *ibid*. Second, we simply cannot predict the future, no matter how carefully we scrutinize the deduction in the earlier year. For instance, in the case of the bad debt that is eventually repaid, we already require that the debt be apparently worthless in the year of deduction, see § 166(a)(1), but we often find that the future does not conform to earlier perceptions, and the taxpayer collects the debt. Then, "the deductions are practical necessities due to our inability to read the future, and the inclusion of the recovery in income is necessary to offset the deduction." *South Dakota Concrete Products Co. v. Commissioner*, 26 B.T.A. 1429, 1432 (1932).

[18] The loss is properly attributable to the business because the acceptance of the risk of loss is a reasonable business judgment that the courts ordinarily will not question. See *Welch v. Helvering*, 290 U.S. 111, 113 (1933); 1 B. Bittker, supra, n. 11, at ¶ 20.3.2.

[19] See 1 B. Bittker, supra, n. 11, ¶ 20.2.2 ("[F]ood and shelter are quintessential nondeductible personal expenses"). See also p. 25-26, *infra*.

When the later event takes place in the context of a nonrecognition provision of the Code, there will be an inherent tension between the tax benefit rule and the nonrecognition provision. See *Putoma Corp. v. Commissioner*, 601 F.2d 734, 742 (CA5 1979); *id.*, at 751 (Rubin, J., dissenting); *cf*. *Helvering v. American Dental Co.*, 318 U.S. 322 (1943) (tension between exclusion of gifts from income and treatment of cancellation of indebtedness as income). We cannot resolve that tension with a blanket rule that the tax benefit rule will always prevail. Instead, we must focus on the particular provisions of the Code at issue in any case.[20]

[20] An unreserved endorsement of the Government's formulation might dictate the results in a broad range of cases not before us. See, *e.g.*, Brief for the United States in No. 81-830 and the Commissioner in No. 81-485 at 20; Reply Brief for the Petitioner in No. 81-485 at 12; Tr. of Oral Arg. At 33. For instance, the Government's position implies that an individual proprietor who makes a gift of an expensed asset must recognize the amount of the expense as income, but *cf*. *Campbell v. Prothro*, 209 F.2d 331, 335 (CA5 1954). See generally 2A J. Rabkin & M. Johnson, Federal Income Gift and Estate Taxation § 6.01(3) (1982) (discussing Commissioner's treatment of gifts of expensed assets). Similarly, the Government's view suggests the conclusion that one who dies and leaves an expensed asset to his heirs would, in his last return, recognize income in the amount of the earlier deduction. Our decision in the cases before us now, however, will not determine the outcome in these other situations; it will only demonstrate the proper analysis. Those cases will require consideration of the treatment of gifts and legacies as well as §§ 1245(b)(1), (2), and 1250(d)(1), (2), which are a partial codification of the tax benefit rule, see O'Hare,

Statutory Nonrecognition of Income and the Overriding Principle of the Tax Benefit Rule in the Taxation of Corporations and Shareholders, 27 Tax L. Rev. 215, 216 (1972), and which exempt dispositions by gift and transfers at death from the operation of the general depreciation recapture rules. Although there may be an inconsistent event in the personal use of an expensed asset, that event occurs in the context of a nonrecognition rule, see, *e.g.*, *Campbell v. Prothro*, *supra*, at 336; 1 B. Bittker, Federal Taxation of Income, Estates, and Gifts ¶ 5.21 (1981), and resolution of these cases would require a determination whether the nonrecognition rule or the tax benefit rule prevails.

The formulation that we endorse today follows clearly from the long development of the tax benefit rule. JUSTICE STEVENS' assertion that there is no suggestion in the early cases or from the early commentators that the rule could ever be applied in any case that did not involve a physical recovery, *post*, at 5 is incorrect. The early cases frequently framed the rule in terms consistent with our view and irreconcilable with that of the dissent. See *Barnett v. Commissioner*, 39 B.T.A. 864, 867 (1939) ("Finally, the present case is analogous to a number of others, where ... [w]hen some event occurs which is *inconsistent* with a deduction taken in a prior year, adjustment may have to be made by reporting a balancing item in income for the year in which the change occurs.") (emphasis added); *Estate of Block v. Commissioner*, 39 B.T.A. 338 (1939) ("When recovery or *some other event which is inconsistent* with what has been done in the past occurs, adjustment must be made in reporting income for the year in which the change occurs.") (emphasis added); *South Dakota Concrete Products Co. v. Commissioner*, 26 B.T.A. 1429, 1432 (1932) ("[W]hen an *adjustment* occurs which is inconsistent with what has been done in the past in the determination of tax liability, the adjustment should be reflected in reporting income for the year in which it occurs.") (emphasis added).[21] The reliance of the dissent on the early commentators is equally misplaced, for the articles cited in the dissent, like the early cases, often stated the rule in terms of inconsistent events.[22]

[21] Justice Stevens' attempt to discount the explicit statement in *Estate of Block* that inconsistent events would trigger the recognition of income, *post*, at 6, n. 9, is singularly unpersuasive. The Board of Tax Appeals used the word "recovery" later in the opinion because it was faced with a recovery in that case, not because it meant to repudiate hastily its discussion in the same opinion of the general rule. Similarly, the mere assertion that the broad formulation in *Barnett* followed a discussion of a Treasury regulation, *post*, at 6, n. 10, does not support the view of the dissent that the concept of inconsistent events represents a break with the early cases.

[22] "The rule requiring taxation of income from the recovery or cancellation of items previously deducted is a remedial expedient, designed to prevent the unjust enrichment of a taxpayer and to offset the benefit derived from a deduction to which, *in the light of subsequent events*, the taxpayer was not entitled." Plumb 176 (1943) (emphasis added). See also id., at 131, 178.

"In a few words, the basic idea of the Tax Benefit Rule is this: If a taxpayer has derived a benefit from a deduction by reducing his taxable income in the year of deduction, he must declare as taxable income any recovery *or other change of his status* which - *ex nunc* - makes the original deduction seem unjustified." Lassen, The Tax Benefit Rule and Related Problems, 20 Taxes 473, 473 (1942) (emphasis added).

One author saw his subject - the recovery of deductions - as an example of the broader rule: "Sometimes a subsequent event reveals the income or deductions as reported by the taxpayer to be erroneous. Thus the unexpected recovery of a portion of an amount lost and already deducted reduces the loss as originally determined. There are even cases in which items apparently finally and accurately determined have to be adjusted *on account of a subsequent event*." Zysman, Income Derived from the Recovery of Deductions, 19 Taxes 29, 29 (1941) (emphasis added).

Finally, Justice Stevens' dissent relies heavily on the codification in § 111 of the exclusionary aspect of the tax benefit rule, which requires the taxpayer to include in income only the amount of the deduction that gave rise to a tax benefit, see note 12, *supra*. That provision does, as the dissent observes, speak of a "recovery." By its terms, it only applies to bad debts, taxes, and delinquency amounts. Yet this Court has held, *Dobson v. Commissioner*, 320 U.S. 489, 505-506 (1943), and it has always been accepted since,[23] that § 111 does not limit the application of the exclusionary aspect of the tax benefit rule. On the contrary, it lists a few applications and represents a general endorsement of the exclusionary aspect of the tax benefit rule to other situations within the inclusionary part of the rule. The failure to mention inconsistent events in § 111 no more suggests that they do not trigger the application of the tax benefit rule than the failure to mention the recovery of a capital loss suggests that it does not, see *Dobson*, *supra*.

[23] See, *e.g.*, Bittker and Kanner, The Tax Benefit Rule, 26 U.C.L.A. L. Rev. 265, 266 (1978); Tye 330; Plumb 144-145.

Justice Stevens also suggests that we err in recognizing transactional equity as the reason for the tax benefit rule. It is difficult to understand why even the clearest recovery should be taxed if not for the concern with transactional equity, see *supra*, at 6-7. Nor does the concern with transactional equity entail a change in our approach to the annual accounting system. Although the tax system relies basically on annual accounting, see *Burnet v. Sanford & Brooks Co.*, 282 U.S. 359, 365 (1931), the tax benefit rule eliminates some of the distortions that would otherwise arise from such a system. See, *e.g.*, Bittker and Kanner, The Tax Benefit Rule, 26 U.C.L.A.L. Rev. 265, 268-270 (1978); Tye 350; Plumb 178 and n. 172. The limited nature of the rule and its effect on the annual accounting principle bears repetition: only if the occurrence of the event in the earlier year would have resulted in the disallowance of the deduction can the Commissioner require a compensating recognition of income when the event occurs in the later year.[24]

[24] Justice Stevens seems to fear that our approach to the annual accounting system is inconsistent with Sanford & Brooks in a way that will vest new power in the tax collector to ignore the annual accounting system. The fear is unfounded. In *Sanford & Brooks*, a taxpayer who had incurred a net loss on a long-term contract managed to recoup the loss in a lawsuit in a later year. The earlier net losses on the contract contributed to net losses for the business in most of the tax years during the performance of the contract. The Court rejected the taxpayer's contention that it should be able to exclude the award on the theory that the award offset the earlier net losses. This adherence to the annual accounting system is perfectly consistent with the approach we follow in the cases now before us. In situations implicating the tax benefit rule or the analogous doctrine permitting the taxpayer to take a deduction when income recognized earlier under a claim of right must be repaid, see note 9, *supra*, the

problem is that the taxpayer has mischaracterized some event. Either he has recognized income that eventually turns out not to be income, or he has taken a deduction that eventually turns out not to be a deduction. Neither of these problems arose in *Sanford & Brooks*. Instead, the problem there was that the taxpayer had properly deducted expenditures and was properly recognizing income but thought that the two should have been matched in the same year. The tax benefit rule does not permit the Commissioner or the taxpayer to rematch properly recognized income with properly deducted expenses; it merely permits a balancing entry when an apparently proper expense turns out to be improper.

Our approach today is consistent with our decision in *Nash v. United States*, 398 U.S. 1 (1970). There, we rejected the Government's argument that the tax benefit rule required a taxpayer who incorporated a partnership under § 351 to include in income the amount of the bad debt reserve of the partnership. The Government's theory was that, although § 351 provides that there will be no gain or loss on the transfer of assets to a controlled corporation in such a situation, the partnership had taken bad debt deductions to create the reserve, see § 166(c), and when the partnership terminated, it no longer needed the bad debt reserve. We noted that the receivables were transferred to the corporation along with the bad debt reserve. *Id*., at 5 and n. 5. Not only was there no "recovery," *id.*, at 4, but there was no inconsistent event of any kind. That the fair market value of the receivables was equal to the face amount less the bad debt reserve, *id*., at 4, reflected that the reserve, and the deductions that constituted it, were still an accurate estimate of the debts that would ultimately prove uncollectible, and the deduction was therefore completely consistent with the later transfer of the receivables to the incorporated business. See *Citizens' Acceptance Corp v. United States*, 320 F. Supp. 798 (D. Del. 1971), *rev'd* on other grounds, 462 F.2d 751 (CA3 1972); Rev. Rul. 78-279, 1978-2 Cum. Bull. 135; Rev. Rul. 78-278, 1978-2 Cum. Bull. 134; see generally O'Hare, Statutory Nonrecognition of Income and the Overriding Principle of the Tax Benefit Rule in the Taxation of Corporations and Shareholders, 27 Tax L. Rev. 215, 219-221 (1972).[25]

[25] Justice Stevens attempts to read our prior cases as somehow inconsistent with our approach here. Nash is the only case in which we have dealt with the inclusionary aspect of the tax benefit rule, and, as we have established, there was neither a recovery nor an inconsistent event in that case. In *Dobson v. Commissioner*, 320 U.S. 489 (1943), we considered the exclusionary aspect of the rule. That case involved a recovery that was clearly inconsistent with the deduction, and the only question was whether the deduction had created a benefit. The references to "recovery" in the opinion describe the case before the Court. They do not in any way impose general requirements for inclusion, as the dissent seems to suggest.

In the cases currently before us, then, we must undertake an examination of the particular provisions of the Code that govern these transactions to determine whether the deductions taken by the taxpayers were actually inconsistent with later events and whether specific nonrecognition provisions prevail over the principle of the tax benefit rule.[26]

[26] It is worth noting that a holding requiring no recognition of income is not, as Justice BLACKMUN's dissent suggests, a conclusion that the tax benefit rule "has no application to the situation presented." *Post*, at 1. As a general principle of tax law, the rule of course applies; it simply does not require the recognition of income.

Part III of the Court's opinion discussed a provision granting a corporation a deduction for taxes imposed on its shareholders but paid by the corporation:

> In *Hillsboro*, the key provision is § 164(e).[27] That section grants the corporation a deduction for taxes imposed on its shareholders but paid by the corporation. It also denies the shareholders any deduction for the tax. In this case, the Commissioner has argued that the refund of the taxes by the state to the shareholders is the equivalent of the payment of a dividend from Hillsboro to its shareholders. If Hillsboro does not recognize income in the amount of the earlier deduction, it will have deducted a dividend. Since the general structure of the corporate tax provisions does not permit deduction of dividends, the Commissioner concludes that the payment to the shareholders must be inconsistent with the original deduction and therefore requires the inclusion of the amount of the taxes as income under the tax benefit rule.
>
> > [27] The Commissioner asserts also that Hillsboro deducted the taxes as a contested liability under § 461(f), and that the legislative history of § 461(f) shows that Congress intended that the tax benefit rule apply if a taxpayer successfully contested a liability deducted under § 461(f). We do not view this argument as in any way separate from the Commissioner's argument under § 164(e). Section 461(f) does not grant deductions of its own force; the expenditure must qualify as deductible in character under some other section. See Treas. Reg. § 1.461-2(a)(1)(iv), 26 CFR § 1.461-2(a)(1)(iv) (1982). If the expenditure does qualify independently as deductible, but, because it is contested, it lacks the certainty otherwise required for deduction, § 461(f) grants the deduction, on the condition that the tax benefit rule will apply. But for the tax benefit rule to apply, there must be some event that is inconsistent with the provision granting the deduction. The question here then remains whether the deduction is appropriate under § 164(e) or whether later events are inconsistent with that deduction.
>
> In evaluating this argument, it is instructive to consider what the tax consequences of the payment of a shareholder tax by the corporation would be without § 164(e) and compare them to the consequences under § 164(e). Without § 164(e), the corporation would not be entitled to a deduction, for the tax is not imposed on it. See Treas. Reg. § 1.164-1(a), 26 CFR § 1.164-1(a) (1982); *Wisconsin Gas & Electric v. United States*, 322 U.S. 526, 527-530 (1944). If the corporation has earnings and profits, the shareholder would have to recognize income in the amount of the taxes, because a payment by a corporation for the benefit of its shareholders is a constructive dividend. See §§ 301(c), 316(a); *e.g. Ireland v. United States*, 621 F.2d 731, 735 (CA5 1980); B. Bittker & J. Eustice, Federal Income Taxation of Corporations and Shareholders ¶ 7.05 (4th ed. 1979). The shareholder, however, would be entitled to a deduction since the constructive dividend is used to satisfy his tax liability. Section 164(a)(2). Thus, for the shareholder, the transaction would be a wash: he would recognize the amount of tax as income,[28] but he would have an offsetting deduction for the tax. For the corporation, there would be no tax consequences, for the payment of a dividend gives rise to neither income nor a deduction. Section 311(a).
>
> > [28] There would be an exception for a shareholder who had not yet earned $200 in interest and dividend income from his stock holdings in this and other corporations during the taxable year. He would be able to exclude up to $200 received in dividend and interest income for the year. See § 116(a)(1), (b), 26 U.S.C. § 116(a)(1), (b)

(Supp. 1980). At the time of the Hillsboro transaction, the exclusion was $100. See 26 U.S.C. § 116(a).

Under § 164(e), the economics of the transaction of course remain unchanged: the corporation is still satisfying a liability of the shareholder and therefore paying a constructive dividend. The tax consequences are, however, significantly different, at least for the corporation. The transaction is still a wash for the shareholder; although § 164(e) denies him the deduction to which he would otherwise be entitled, he need not recognize income on the constructive dividend, Treas. Reg. § 1.164-7, 26 CFR § 1.164-7 (1982). But the corporation is entitled to a deduction that would not otherwise be available. In other words, the only effect of § 164(e) is to permit the corporation to deduct a dividend. Thus, we cannot agree with the Commissioner that, simply because the events here give rise to a deductible dividend, they cannot be consistent with the deduction. In at least some circumstances, a deductible dividend is within the contemplation of the Code. The question we must answer is whether § 164(e) permits a deductible dividend in these circumstances - when, the money, though initially paid into the state treasury, ultimately reaches the shareholder - or whether the deductible dividend is available, as the Commissioner urges, only when the money remains in the state treasury, as properly assessed and collected tax revenue.

Rephrased, our question now is whether Congress, in granting this special favor to corporations that paid dividends by satisfying the liability of their shareholders, was concerned with the reason the money was paid out by the corporation or with the use to which it was ultimately put. Since § 164(e) represents a break with the usual rules governing corporate distributions, the structure of the Code does not provide any guidance on the reach of the provision. This Court has described the provisions as "prompted by the plight of various banking corporations which paid and voluntarily absorbed the burden of certain local taxes imposed upon their shareholders, but were not permitted to deduct those payments from gross income*." Wisconsin Gas & Electric Co. v. United States*, 322 U.S., at 531 (footnote omitted). The section, in substantially similar form, has been part of the Code since the Revenue Act of 1921, 42 Stat. 227. The provision was added by the Senate, but its Committee Report merely mentions the deduction without discussing it, see S. Rep. No. 275, 67th Cong., 1st Sess. 19 (1921). The only discussion of the provision appears to be that between Dr. T. S. Adams and Senator Smoot at the Senate Hearings. Dr. Adams's statement explains why the states imposed the property tax on the shareholders and collected it from the banks, but it does not cast much light on the reason for the deduction. Hearings on H. R. 8245 before the Comm. on Finance, 67th Cong., 1st Sess. 250-251 (1921) (statement of Dr. T. S. Adams, tax advisor, Treasury Department). Senator Smoot's response, however, is more revealing:

> I have been a director of a bank ... for over 20 years. They have paid that tax ever since I have owned a share of stock in the bank ... I know nothing about it. I do not take 1 cent of credit for deductions, and the banks are entitled to it. *They pay it out*. *Id*., at 251 (emphasis added).

The *payment* by the corporations of a liability that Congress knew was not a tax imposed on them[29] gave rise to the entitlement to a deduction; Congress was unconcerned that the corporations took a deduction for amounts that did not satisfy their tax liability. It apparently perceived the shareholders and the corporations as independent of one another, each "know [ing] nothing about" the payments by the other. In those circumstances, it is difficult to conclude that the Congress intended that the corporation have no deduction if the state turned the tax revenues over to these independent parties. We conclude that the purpose of § 164(e) was to provide relief for the corporations making these payments, and the focus of Congress was on the act of payment rather than on the ultimate use of the funds by the state. As long as the payment itself was not negated by a refund to the corporation, the change in character of the funds in the hands of the state does not require the corporation to recognize income, and we reverse the judgment below.[30]

[29] Dr. Adams testified repeatedly that the banks paid the tax "voluntarily." Hearings on H. R. 8245 before the Comm. on Finance, 67th Cong., 1st Sess. 250 (1921) (statement of Dr. T. S. Adams, tax advisor, Treasury Department).

[30] Our examination of the legislative history thus leads us to reject Justice Blackmun's unsupported suggestion that Congress focused on the payment of a tax. Post, at 2. The theory he suggests leads to the conclusion that, even if the state had not refunded the taxes, the bank would not have been entitled to the deduction, because it had not paid a "tax." It is difficult to believe that the Congress that acted to alleviate "the plight of various banking corporations which paid and voluntarily absorbed the burden," Wisconsin Gas & Electric Co. v. United States, 322 U.S. 526, 531 [32 AFTR 368] (1944), intended the result suggested by the dissent.

Part IV discussed how the tax benefit rule interacted with a statutory tax-free liquidation of a corporation:

The problem in *Bliss* is more complicated. *Bliss* took a deduction under § 162(a), so we must begin by examining that provision. Section 162(a) permits a deduction for the "ordinary and necessary expenses" of carrying on a trade or business. The deduction is predicated on the consumption of the asset in the trade or business. See Treas. Reg. § 1.162-3, 26 CFR § 1.162-3 (1982) ("Taxpayers ... should include in expenses the charges for materials and supplies only in the amount that they are actually consumed and used in operation in the taxable year ....") (emphasis added). If the taxpayer later sells the asset rather than consuming it in furtherance of his trade or business, it is quite clear that he would lose his deduction, for the basis of the asset would be zero, see, *e.g.*, *Spitalny v. United States*, 430 F.2d 195 (CA9 1970), so he would recognize the full amount of the proceeds on sale as gain. See § 1001(a), (c). In general, if the taxpayer converts the expensed asset to some other, non-business use, that action is inconsistent with his earlier deduction, and the tax benefit rule would require inclusion in income of the amount of the unwarranted deduction. That non-business use is inconsistent with a deduction for an ordinary and necessary business expense is clear from an examination of the Code. While § 162(a) permits a deduction for ordinary and necessary business expenses, § 262 explicitly denies a deduction for personal expenses. In the 1916 Act, the two provisions were a single section. See § 5(a)(1st), 39 Stat. 756. The provision has been uniformly interpreted as providing a deduction only for those expenses attributable to the business of the taxpayer. See, *e.g.*, *Kornhauser v. United States*, 267 [276] U.S. 145 (1928); H. Rep., 75th Cong., 3d Sess. 46 (January 14, 1938) ("a taxpayer should be granted a reasonable deduction for the direct expenses he has incurred in connection with his income") (emphasis added); see generally, 1 B. Bittker, Federal Taxation of Income, Estates and Gifts § 20.2 (1981). Thus, if a corporation turns expensed assets to the analog of personal consumption, as Bliss did here—distribution to shareholders[31] - it would seem that it should take into income the amount of the earlier deduction.[32]

[31] "Paying the dividend was the enjoyment of [the corporate] income. A body corporate can be said to enjoy its income in no other way." *Williamson v. United States*, 292 F.2d 524, 530 (Ct.Cl. 1961).

[32] Justice Stevens' dissent takes issue with this conclusion, characterizing the situation as identical to that in Nash, which he explains as a case in which we held that, although "a business asset matching a prior deduction ... would not be used up ... until it had passed to a different taxpayer," the transfer did not require the recognition of income. *Post*, at 13. What is misleading in this description is its failure to recognize that in Nash the prior deduction was reflected in the asset transferred because of the contra-asset account: uncollectible accounts. That contra-asset diminished the asset, see generally W. Meigs, A. Mosich, C. Johnson and T. Keller, Intermediate Accounting 140-141 (3d ed. 1974), and was inseparable from it. Therefore, the transfer of the notes did not establish that they were worth their face value, and there was no inconsistent event.

In *Bliss*, the taxpayers took a deduction for an expense and credited the asset account. Unlike the debit to the expense account in *Nash*, the debit to the expense account did not reflect any economic decrease in the value of the asset. When the taxpayers transferred the asset, it became clear that the economic decrease would not take place in the hands of Bliss - and possibly never would occur.

To see the difference more clearly, consider the views of a third party contemplating purchasing the asset on hand in *Nash* and one contemplating purchasing the asset on hand in *Bliss*. In *Nash*, the purchaser would be willing to pay only the face amount of the receivables less the amount in the contra-asset account—the amount earlier deducted by the taxpayer—because that is all the purchaser could expect to realize on them. In other words, the deduction reflected a real decrease in the value of the asset. In *Bliss*, on the other hand, the purchaser would be happy to pay the value of the grain, undiminished by the expense deducted by the taxpayer. The deduction and the asset remain separable, and the taxpayer can transfer one without netting out the other.

That conclusion, however, does not resolve this case, for the distribution by Bliss to its shareholders is governed by a provision of the Code that specifically shields the taxpayer from recognition of gain - § 336. We must therefore proceed to inquire whether this is the sort of gain that goes unrecognized under § 336. Our examination of the background of § 336 and its place within the framework of tax law convinces us that it does not prevent the application of the tax benefit rule.[33]

[33] We are aware that Congress considered but failed to enact a bill amending §§ 1245 and 1250 to cover any deduction of the purchase price of property. H. R. 10936, 94th Cong., 1st Sess. (1975). That bill would have settled the question here, since it is clear that § 1245 overrides § 336. Section 1245(a)(1); Treas. Reg. § 1.1245-6(b), 26 CFR § 1.1245-6(b) (1982). The failure to enact the bill does not suggest that Congress intended that deductions under § 162 not be subject to recapture. Both the House and Senate committees reported favorably on the bill, S. Rep. No. 94-1346, 94th Cong., 2d Sess. (1976); H. R. No. 94-1350, 94th Cong., 2d Sess. (1976), the

House passed it, and Congress adjourned without any action by the Senate. See Government Printing Office, Calendars of the United States House of Representatives and History of Legislation 174 (Final ed. 1977). The reports suggest that Congress focused on disposition by sale and thought the income subject to recapture in any event, but possibly at capital gains rather than ordinary income rates. S. Rep. No. 94-1346, *supra*, at 2; H. R. No. 94-1350, *supra*, at 2. Given this background, we cannot draw any inference from the failure to enact the amendment.

Section 336 was enacted as part of the 1954 Code. It codified the doctrine of *General Utilities Co. v. Helvering*, 296 U.S. 200, 206 (1935), that a corporation does not recognize gain on the distribution of appreciated property to its shareholders. Before the enactment of the statutory provision, the rule was expressed in the regulations, which provided that the corporation would not recognize gain or loss, "however [the assets] may have *appreciated or depreciated* in value since their acquisition." Income Tax Regulations 118, § 39.22(a)-20 (1953) (emphasis added). The Senate Report recognized this regulation as the source of the new § 336, S. Rep. No. 1622, 83d Cong., 2d Sess. 258 (1954). The House Report explained its version of the provision, "Thus, the fact that the property distributed has *appreciated or depreciated* in value over its adjusted basis to the distributing corporation will in no way alter the application of subsection (a) [providing nonrecognition]." H. R. No. 1337, 83d Cong., 2d Sess. at A90 (1954) (emphasis added). This background indicates that the real concern of the provision is to prevent recognition of market appreciation that has not been realized by an arm's-length transfer to an unrelated party rather than to shield all types of income that might arise from the disposition of an asset.

Despite the breadth of the nonrecognition language in § 336, the rule of nonrecognition clearly is not without exception. For instance, § 336 does not bar the recapture under §§ 1245 and 1250 of excessive depreciation taken on distributed assets. Sections 1245(a), 1250(a); Treas. Reg. §2.1245-6(b), 1.1250-1(c)(2), 26 CFR §§ 1.1245-6(b), 1.1250-1(c)(2) (1982). Even in the absence of countervailing statutory provisions, courts have never read the command of nonrecognition in § 336 as absolute. The "assignment of income" doctrine has always applied to distributions in liquidation. See, *e.g.*, *Siegel v. United States*, 464 F.2d 891 (CA9 1972), *cert. dism'd*, 410 U.S. 918 (1973); *Williamson v. United States*, 292 F.2d 524 (Ct.Cl. 1961); see also *Idaho First National Bank v. United States*, 265 F.2d 6 (CA9 1959) (decided before *General Utilities* codified in § 336). That judicial doctrine prevents taxpayers from avoiding taxation by shifting income from the person or entity that earns it to someone who pays taxes at a lower rate.[34] Since income recognized by the corporation is subject to the corporate tax and is again taxed at the individual level upon distribution to the shareholder, shifting of income from a corporation to a shareholder can be particularly attractive: it eliminates one level of taxation. Responding to that incentive, corporations have attempted to distribute to shareholders fully performed contracts or accounts receivable and then to invoke § 336 to avoid taxation on the income. In spite of the language of nonrecognition, the courts have applied the assignment of income doctrine and required the corporation to recognize the income.[35] Section 336, then clearly does not shield the taxpayer from recognition of all income on the distribution.

[34] For instance, a taxpayer cannot avoid recognizing the interest income on bonds that he owns by clipping the coupons and giving them to another party. See, *e.g.*, *Helvering v. Horst*, 311 U.S. 112 (1940); *Lucas v. Earl*, 281 U.S. 111 (1930).

[35] Indeed, the legislative history of § 336 compels such a result. Section 336 arose out of the same provision in the House bill as did § 311, which provides for nonrecognition of gain on nonliquidating distributions of appreciated property, and the Senate comment on § 311 explicitly provides for the application of the assignment of income doctrine. S. Rep. No. 1622, *supra*, at 247.

Next, we look to a companion provision - § 337, which governs sales of assets followed by distribution of the proceeds in liquidation.[36] It uses essentially the same broad language to shield the corporation from the recognition of gain on the sale of the assets. The similarity in language alone would make the construction of § 337 relevant in interpreting § 336. In addition, the function of the two provisions reveals that they should be construed in tandem. Section 337 was enacted in response to the distinction created by *United States v. Cumberland Public Service Co.*, 338 U.S. 451 (1950), and *Commissioner v. Court Holding*, 324 U.S. 331 (1945). Under those cases, a corporation that liquidated by distributing appreciated assets to its shareholders recognized no income, as now provided in § 336, even though its shareholders might sell the assets shortly after the distribution. See *Cumberland*. If the corporation sold the assets, though, it would recognize income on the sale, and a sale by the shareholders after distribution in kind might be attributed to the corporation. See *Court Holding*. To eliminate the necessarily formalistic distinctions and the uncertainties created by *Court Holding* and *Cumberland*, Congress enacted § 337, permitting the corporation to adopt a plan of liquidation, sell its assets without recognizing gain or loss at the corporate level, and distribute the proceeds to the shareholders. The very purpose of § 337 was to create the same consequences as § 336. See *Midland-Ross Corp. v. United States*, 485 F.2d 110 (CA6 1973); S. Rep. No. 1622, *supra*, at 258.

[36] In relevant part, § 337 provides:

> ("(a)) If within the 12-month period beginning on the date on which a corporation adopts a plan of complete liquidation, all of the assets of the corporation are distributed in complete liquidation, less assets retained to meet claims, then no gain or loss shall be recognized to such corporation from the sale or exchange by it of property within such 12-month period.
>
> ("(b)) (1) For purposes of subsection (a), the term "property" does not include-
>
> ("(A)) stock in trade of the corporation, or other property of a kind which would properly be included in the inventory of the corporation if on hand at the close of the taxable year, and property held by the corporation primarily for sale to customers in the ordinary course of its trade or business,
>
> ("(B)) installment obligations acquired in respect of the sale or exchange (without regard to whether such sale or exchange occurred before, on, or after the date of the adoption of the plan referred to in subsection (a)) of stock in trade or other property described in subparagraph (A) of this paragraph, and
>
> ("(C)) installment obligations acquired in respect of property (other than property described in subparagraph (A)) sold or exchanged before the date of the adoption of such plan of liquidation.

"(2) Notwithstanding paragraph (1) of this subsection, if substantially all of the property described in subparagraph (A) of such paragraph (1) which is attributable to a trade or business of the corporation is, in accordance with this section, sold or exchanged to one person in one transaction, then for purposes of subsection (a) the term "property" includes-

("(A)) such property so sold or exchanged, and

("(B)) installment obligations acquired in respect of such sale or exchange.

("(c)) (1) This section shall not apply to any sale or exchange -

("(A)) made by a collapsible corporation (as defined in section 341(b)), or

("(B)) following the adoption of a plan of complete liquidation, if section 333 applies with respect to such liquidation."

There are some specific differences between the two provisions, largely aimed at governing the period during which the liquidating corporation sells its assets, a problem that does not arise when the corporation distributes its assets to its shareholders. For instance, § 337 does not shield the income produced by the sale of inventory in the ordinary course of business; that income will be taxed at the corporate level before distribution of the proceeds to the shareholders. See § 337(b). These differences indicate that Congress did not intend to allow corporations to escape taxation on business income earned while carrying on business in the corporate form; what it did intend to shield was market appreciation.

The question whether § 337 protects the corporation from recognizing income because of unwarranted deductions has arisen frequently, and the rule is now well established that the tax benefit rule overrides the nonrecognition provision. *Connery v. United States*, 460 F.2d 1130 (CA3 1972); *Commissioner v. Anders*, 414 F.2d 1283 (CA10), *cert. denied*, 396 U.S. 958 (1969); *Krajeck v. United States*, 75-1 USTC ¶ 9492 (D. ND 1975); *S. E. Evans, Inc. v. United States*, 317 F.Supp. 423 (D. Ark. 1970), *Anders v. United States*, 462 F.2d 1147 (Ct.Cl.), *cert. denied*, 409 U.S. 1064 (1972); *Estate of Munter v. Commissioner*, 63 T.C. 663 (1975); Rev. Rul. 61-214, 1961-2 Cum. Bull. 60; Byrne, The Tax Benefit Rule as Applied to Corporate Liquidations: Recent Developments, 56 Notre Dame Law 215, 221 (1980); Note, Tax Treatment of Previously Expensed Assets in Corporate Liquidations, 80 Mich. L. Rev. 1636, 1638-39 (1982); *cf. Spitalny v. United States*, *supra*, 430 F.2d 195 (when deduction and liquidation occur within a single year, though tax benefit rule does not apply, principle does). Congress has recently undertaken major revisions of the Code, see Economic Tax Recovery Act of 1981, Pub. 97-34, 95 Stat. 172, and has made changes in the liquidation provisions, *e.g.*, Pub. 95-600, 92 Stat. 2904 (amending § 337); Pub. 95-628, 92 Stat. 3628 (same), but it did not act to change this long-standing, universally accepted rule. If the construction of the language in section 337 as permitting recognition in these circumstances has the acquiescence of Congress, *Lorillard v. Pons*, 434 U.S. 575, 580 (1978), we must conclude that Congress intended the same construction of the same language in the parallel provision in § 336.

Thus, the legislative history of § 336, the application of other general rules of tax law, and the construction of the identical language in § 337 all indicate that § 336 does not permit a liquidating corporation to avoid the tax benefit rule. Consequently, we reverse the judgment of the Court of Appeals and hold that, on liquidation, Bliss must include in income the amount of the unwarranted deduction.[37]

> [37] Some commentators have argued that the correct measure of the income that Bliss should include is the lesser of the amount it deducted or the basis that the shareholders will take in the asset. See Feld, The Tax Benefit of Bliss, 62 B. U. L. Rev. 443, 463-464 (1982); see also Rev. Rul. 74-396, 1974-2 Cum. Bull. 106. Since Bliss has not suggested that, if there is an amount taken into income, it should be less than the amount previously deducted, we need not address the point.
>
> As Justice Stevens observes, *post*, at 17 and n. 26, we do not resolve this question. His perception of ambiguities elsewhere in our discussion of the amount recognized as income is simply inaccurate. Our discussion of the tax consequences on the sale of an expensed asset, *supra*, at 25, does not suggest that the entire amount of proceeds on sale is attributable to the tax benefit rule. Instead, we illustrated that the basis rules automatically lead to inclusion of the amount attributable to the operation of the tax benefit rule. That is, the proceeds will equal the cost plus any appreciation (or less any decrease in value). The appreciation would be recognized as gain (or the decrease as loss) in the ordinary sale, regardless of whether the taxpayer had expensed the asset upon acquisition. The reduction of the basis to zero when the item is expensed ensures that if it is sold rather than consumed the unwarranted deduction will be included in income along with any appreciation, and it is this amount that the tax benefit rule requires to be recognized as income.

For the possibility of death purging post-mortem recovery of deductions taken during life, see the text accompanying fn 6593 in part III.B.2.g Income Tax Concerns When Removing Property from the Estate Tax System.

II.G.4.m.iv. Mitigation of Effect of Limitations and Other Provisions: Code §§ 1311-1314

Subchapter Q, "Readjustment of Tax Between Years and Special Limitations," which encompasses Code §§ 1301-1351, includes Part II, "Mitigation of Effect of Limitations and Other Provisions," consisting of Code §§ 1311-1314, in light of the repeal of Code §§ 1415-1337.

Code § 1312, "Circumstances of adjustment," explains that Code § 1311, "Correction of error," applies to the following circumstances:

(1) *Double inclusion of an item of gross income*. The determination requires the inclusion in gross income of an item which was erroneously included in the gross income of the taxpayer for another taxable year or in the gross income of a related taxpayer.

(2) *Double allowance of a deduction or credit*. The determination allows a deduction or credit which was erroneously allowed to the taxpayer for another taxable year or to a related taxpayer.

(3) *Double exclusion of an item of gross income*.

  (A) *Items included in income*. The determination requires the exclusion from gross income of an item included in a return filed by the taxpayer or with respect to which tax was paid and which was erroneously excluded or omitted from the gross income of the taxpayer for another taxable year, or from the gross income of a related taxpayer; or

(B) *Items not included in income*. The determination requires the exclusion from gross income of an item not included in a return filed by the taxpayer and with respect to which the tax was not paid but which is includible in the gross income of the taxpayer for another taxable year or in the gross income of a related taxpayer.

(4) *Double disallowance of a deduction or credit*. The determination disallows a deduction or credit which should have been allowed to, but was not allowed to, the taxpayer for another taxable year, or to a related taxpayer.

(5) *Correlative deductions and inclusions for trusts or estates and legatees, beneficiaries, or heirs*. The determination allows or disallows any of the additional deductions allowable in computing the taxable income of estates or trusts, or requires or denies any of the inclusions in the computation of taxable income of beneficiaries, heirs, or legatees, specified in subparts A to E, inclusive (secs. 641 and following, relating to estates, trusts, and beneficiaries) of part I of subchapter J of this chapter, or corresponding provisions of prior internal revenue laws, and the correlative inclusion or deduction, as the case may be, has been erroneously excluded, omitted, or included, or disallowed, omitted, or allowed, as the case may be, in respect of the related taxpayer.

(6) *Correlative deductions and credits for certain related corporations*. The determination allows or disallows a deduction (including a credit) in computing the taxable income (or, as the case may be, net income, normal tax net income, or surtax net income) of a corporation, and a correlative deduction or credit has been erroneously allowed, omitted, or disallowed, as the case may be, in respect of a related taxpayer described in section 1313(c)(7) .

(7) *Basis of property after erroneous treatment of a prior transaction*.

(A) *General rule*. The determination determines the basis of property, and in respect of any transaction on which such basis depends, or in respect of any transaction which was erroneously treated as affecting such basis, there occurred, with respect to a taxpayer described in subparagraph (B) of this paragraph , any of the errors described in subparagraph (C) of this paragraph.

(B) *Taxpayers with respect to whom the erroneous treatment occurred*. The taxpayer with respect to whom the erroneous treatment occurred must be -

(i) the taxpayer with respect to whom the determination is made,

(ii) a taxpayer who acquired title to the property in the transaction and from whom, mediately or immediately, the taxpayer with respect to whom the determination is made derived title, or

(iii) a taxpayer who had title to the property at the time of the transaction and from whom, mediately or immediately, the taxpayer with respect to whom the determination is made derived title, if the basis of the property in the hands of the taxpayer with respect to whom the determination is made is determined under section 1015(a) (relating to the basis of property acquired by gift).

(C) *Prior erroneous treatment*. With respect to a taxpayer described in subparagraph (B) of this paragraph -

(i) there was an erroneous inclusion in, or omission from, gross income,

(ii) there was an erroneous recognition, or nonrecognition, of gain or loss, or

(iii) there was an erroneous deduction of an item properly chargeable to capital account or an erroneous charge to capital account of an item properly deductible.

Urban and Bond, "Mitigation of excess gain on inherited property," *The Tax Adviser* (July 2023), explains:

> The mitigation provisions of Secs. 1311 through 1314 offer potential recourse in the above-described situations, provided the statutory requirements are met, by authorizing correction of errors that otherwise would be uncorrectable by operation of law. This item focuses on one specific context for using these rules to seek an adjustment: correcting excess gain on inherited property.
>
> First, however, a summary of the mitigation provisions' requirements may be useful. Sec. 1311 authorizes adjustments of the tax for a closed year if all the following conditions exist:
>
> - First, there must exist a "determination" as defined in Sec. 1313. This generally is a court decision (with respect to the taxpayer or a related taxpayer) that has become final, a closing agreement, or a final disposition on a claim for refund. Also, the taxpayer and the IRS can enter into an agreement on Form 2259, Agreement as Determination Pursuant to IRC 1313(a)(4), that constitutes a determination for purposes of the mitigation provisions.
> - Second, there must have been an error in the way an item was handled in a barred year that falls within one of the categories (referred to as "circumstances of adjustment") set forth in Sec. 1312.
> - Third, on the date of the determination, correction of the error is prevented by some rule of law (typically, the expiration of the period of limitation for assessment or refund under Sec. 6501 or Sec. 6511, respectively).
> - Finally, except in situations described in Sec. 1312(3)(B) and Sec. 1312(4), the position adopted by the successful party in the proceeding resulting in the determination must be inconsistent with that party's erroneous treatment in the barred year.
>
> Where mitigation applies, Sec. 1314(b) extends the applicable statute of limitation for one year from the date the determination is made, in order to allow the error to be corrected in the barred year.

After summarizing the broad categories with Code § 1312, the article continues:

> The first four circumstances of adjustment are relatively straightforward. The last three are more complicated, with Sec. 1312(7), which deals with problems involving basis, generally regarded as posing the most difficulty. This is the mitigation provision that potentially could correct excess gain on inherited property, as will be discussed. To invoke Sec. 1312(7), the asserting party must prove the existence of four additional conditions:
>
> - The relevant determination "determines the basis of property";
> - There exists a "transaction on which such basis depends" or a "transaction which was erroneously treated as affecting such basis";
> - "In respect of" the "transaction… there occurred" an error described in Sec. 1312(7)(C), which includes, for example, the erroneous recognition or nonrecognition of gain or loss or the erroneous inclusion or exclusion of gross income; and
> - The taxpayer with respect to whom the erroneous treatment occurred must fall into one of the categories listed in Sec. 1312(7)(B).

The article then reviews court cases:

> The Seventh and Fourth Circuits have disagreed as to how Sec. 1312(7) applies to the following common situation. A taxpayer receives property by bequest or inheritance and, on selling the property, determines gain or loss by using the value of the property reported on the estate tax return as basis. Later, after the year in which the sale occurred is closed for refund purposes, the IRS determines an estate tax deficiency based on a higher valuation of the property, and the taxpayer seeks to recompute the gain realized on the sale.
>
> In *O'Brien*, 766 F.2d 1038 (7th Cir. 1985), the Seventh Circuit held that no relief is available under Sec. 1312(7) in this situation. The transfer of the decedent's property at death is the transaction "on which basis depends" (i.e., the transaction that determined basis), but the miscomputation of gain on the sale of the property was not an error "in respect of " that transaction. In other words, while computing gain on the sale depends on the use of the correct basis, it is the transfer upon death that was the basis-determining transaction, and the error (i.e., the overstatement of gain on the sale) was not "in respect of " that transaction.
>
> However, three years earlier in *Chertkof*, 676 F.2d 984 (4th Cir. 1982), the Fourth Circuit described the same type of situation as "a classic example of the sort of nonculpable trap into which [a taxpayer] is all too likely to fall" and concluded that Sec. 1312(7) could provide relief. The court's opinion makes only a passing reference to the requirement that the error sought to be corrected must be in respect of a transaction on which basis depends, and its reasoning on that issue is unclear. The court possibly regarded the "error in respect of " requirement as being satisfied by its determination that the decedent's death and the related transfer of property was the transaction "on which basis depends." That is because the date-of-death valuation amount (later successfully challenged by the IRS) was "used both to calculate estate taxes, and to put the government and the taxpayer in a position to compute income taxes once a future gain

or loss is recognized," and, therefore, the error - using too low a basis when the property was sold -related back to (and was "in respect of ") the transfer-upon-death transaction.

The article didn't mention *O'Neill Trust v. Commissioner*, T.C. Memo. 2022-108, which gave the taxpayer no relief because the taxpayer failed to preserve its rights and because the court strictly construed which taxpayer could assert a claim of right. The case also discussed the Code §§ 1311-1314 mitigation provisions in denying relief. Relevant excerpts from the case are in part II.G.4.m.i Code § 1341 Claim of Right Deduction.

II.G.4.n. Itemized Deductions; Deductions Disallowed for Purposes of the Alternative Minimum Tax

II.G.4.n.i. Itemized Deductions generally

For "itemized deductions," various limitations apply for regular tax and for alternative minimum tax. "Itemized deductions" are those not allowed in determining an adjusted gross income.[1427]

Deductions allowed in determining adjusted gross income that might be business expenses or incurred for the production of income include the following:

- "Deductions … attributable to a trade or business carried on by the taxpayer, if such trade or business does not consist of the performance of services by the taxpayer as an employee."[1428]

- Certain deductions that are reimbursed by an employer or are incurred by certain performing artists, governmental officials, elementary and secondary school teachers, or military reservists.[1429]

- Losses from the sale or exchange of property under Code §§ 161-199.[1430]

- The deductions allowed by Code §§ 161-199, by Code § 212,[1431] and by Code § 611 (relating to depletion) which are attributable to property held for the production of rents or royalties.[1432]

- In the case of a life tenant of property, or an income beneficiary of property held in trust, or an heir, legatee, or devisee of an estate, the deduction for depreciation allowed by Code § 167 and the deduction allowed by Code § 611 (depletion).[1433]

[1427] Code § 63(b).
[1428] Code § 62(a)(1). This includes unreimbursed business expenses as a partner. *Cristo v. Commissioner*, T.C. Memo. 2017-239 (managing member who owned 95% of an LLC.) It also includes expenses incurred by an individual taxpayer in preparing that portion of the taxpayer's return that relates to the taxpayer's business as a sole proprietor (such as profit or loss from business (Schedule C), income or loss from rentals or royalties (Part I of Schedule E, Supplemental Income and Loss), or farm income and expenses (Schedule F)), and expenses incurred in resolving asserted tax deficiencies relating to the taxpayer's business as a sole proprietor. Rev. Rul. 92-29.
[1429] Code § 62(a)(2).
[1430] Code § 62(a)(3).
[1431] See part II.G.4.l.i.(b) Requirements for Deduction Under Code § 212.
[1432] Code § 62(a)(4).
[1433] Code § 62(a)(5).

- Certain contributions to qualified retirement plans[1434] or IRAs.[1435]

Code § 63(b), (e)(1) disallows an individual's itemized deductions if the individual takes the "standard deduction."

Code § 67(a) reduces an individual's "miscellaneous itemized deductions" by 2% of the adjusted gross income, but Code § 67(g) disallows these deductions entirely for an individual for any taxable year beginning after December 31, 2017 and before January 1, 2026. Code § 67(b) defines "miscellaneous itemized deductions" as itemized deductions other than:

(1) the deduction under section 163 (relating to interest),

(2) the deduction under section 164 (relating to taxes),

(3) the deduction under section 165(a) for casualty or theft losses described in paragraph (2) or (3) of section 165(c) or for losses described in section 165(d),

(4) the deductions under section 170 (relating to charitable, etc., contributions and gifts) and section 642(c) (relating to deduction for amounts paid or permanently set aside for a charitable purpose),

(5) the deduction under section 213 (relating to medical, dental, etc., expenses),

(6) any deduction allowable for impairment-related work expenses,

(7) the deduction under section 691(c) (relating to deduction for estate tax in case of income in respect of the decedent),

(8) any deduction allowable in connection with personal property used in a short sale,

(9) the deduction under section 1341 (relating to computation of tax where taxpayer restores substantial amount held under claim of right),

(10) the deduction under section 72(b)(3) (relating to deduction where annuity payments cease before investment recovered),[1436]

(11) the deduction under section 171 (relating to deduction for amortizable bond premium), and

(12) the deduction under section 216 (relating to deductions in connection with cooperative housing corporations).

Rev. Proc. 2019-46 discusses the interaction between this disallowance of miscellaneous itemized deductions and rules for using optional standard mileage rates in computing the deductible costs of operating an automobile for business, charitable, medical, or moving expense purposes.

[1434] Code § 62(a)(6), referring to the Code § 404 deduction allowed to self-employed individuals under Code § 401(c)(1).
[1435] Code § 62(a)(7), referring to Code § 219 IRA deductions.
[1436] [my footnote:] See text accompanying fn 3028 in part II.J.19.a.vii Loss on Sale of Annuity.

Regarding deductions of tax paid on real property, *Trans v. Commissioner*, T.C. Memo. 1999-233, held:

> Section 164 allows a deduction for certain taxes, including State and local real property taxes. In general, taxes are deductible only by the person upon whom they are imposed. See sec. 1.164-1(a), Income Tax Regs. However, the person owning the equitable or beneficial interest in real property and paying the taxes assessed against the property to protect that interest may deduct the taxes paid even though legal title is recorded in the name of another person. See *Estate of Movius v. Commissioner*, 22 T.C. 391 (1954); *Horsford v. Commissioner*, 2 T.C. 826 (1943); *Casey v. Commissioner*, T.C. Memo. 1965-282.
>
> We have concluded that petitioners were equitable owners of the Milpitas property during 1994; accordingly, we hold that they are entitled to deduct property taxes they paid on the property that year.

For any taxable year beginning after December 31, 2017 and before January 1, 2026, Code § 164(b)(6) limits an individual's deductions for state taxes to $10,000 ($5,000 for individuals who are married filing separately), but it does not apply this limit to property taxes attributable to Code § 212 trade or business (which generally would be rental real estate, if it is a trade or business).[1437] Revenue Ruling 2019-11 provides guidance to taxpayers regarding the inclusion in income of recovered state and local taxes in the current year when the taxpayer deducted state and local taxes paid in a prior year, subject to the Code § 164(b)(6) limitation.

Originally, charitable contributions that generate state tax credits were not reduced by the state tax credits that are awarded[1438] and were very helpful to those who are charitably inclined and receive a better deduction than the state income tax deduction. However, regulations may reduce the charitable deduction to account for state tax credits to be awarded; this reduction may generate a state income tax deduction relating to that credit. Reg. § 1.170A-1(h)(3), "Payments resulting in state or local tax benefits," provides:

> (i) *State or local tax credits*. Except as provided in paragraph (h)(3)(vi) of this section, if a taxpayer makes a payment or transfers property to or for the use of an entity described in section 170(c), the amount of the taxpayer's charitable contribution deduction under section 170(a) is reduced by the amount of any state or local tax credit that the taxpayer receives or expects to receive in consideration for the taxpayer's payment or transfer.
>
> (ii) *State or local tax deductions*.
>
> (A) *In general*. If a taxpayer makes a payment or transfers property to or for the use of an entity described in section 170(c), and the taxpayer receives or expects to receive state or local tax deductions that do not exceed the amount of the taxpayer's payment or the fair market value of the property transferred by the taxpayer to the entity, the taxpayer is not required to reduce its charitable

[1437] For more details about my comment on real estate as trade or business, see part II.E.1.e Whether Real Estate Qualifies as a Trade or Business.
[1438] CCA 201105010.

contribution deduction under section 170(a) on account of the state or local tax deductions.

(B) *Excess state or local tax deductions*. If the taxpayer receives or expects to receive a state or local tax deduction that exceeds the amount of the taxpayer's payment or the fair market value of the property transferred, the taxpayer's charitable contribution deduction under section 170(a) is reduced.

(iii) *In consideration for*. For purposes of paragraph (h)(3)(i) of this section, the term in consideration for shall have the meaning set forth in § 1.170A-13(f)(6), except that the state or local tax credit need not be provided by the donee organization.

(iv) *Amount of reduction*. For purposes of paragraph (h)(3)(i) of this section, the amount of any state or local tax credit is the maximum credit allowable that corresponds to the amount of the taxpayer's payment or transfer to the entity described in section 170(c).

(v) *State or local tax*. For purposes of paragraph (h)(3) of this section, the term state or local tax means a tax imposed by a State, a possession of the United States, or by a political subdivision of any of the foregoing, or by the District of Columbia.

(vi) *Exception*. Paragraph (h)(3)(i) of this section shall not apply to any payment or transfer of property if the total amount of the state and local tax credits received or expected to be received by the taxpayer is 15 percent or less of the taxpayer's payment, or 15 percent or less of the fair market value of the property transferred by the taxpayer.

(vii) *Examples*. The following examples illustrate the provisions of this paragraph (h)(3). The examples in paragraph (h)(6) of this section are not illustrative for purposes of this paragraph (h)(3).

(A) *Example 1*. A, an individual, makes a payment of $1,000 to X, an entity described in section 170(c). In exchange for the payment, A receives or expects to receive a state tax credit of 70 percent of the amount of A's payment to X. Under paragraph (h)(3)(i) of this section, A's charitable contribution deduction is reduced by $700 (0.70 x $1,000). This reduction occurs regardless of whether A is able to claim the state tax credit in that year. Thus, A's charitable contribution deduction for the $1,000 payment to X may not exceed $300.

(B) *Example 2*. B, an individual, transfers a painting to Y, an entity described in section 170(c). At the time of the transfer, the painting has a fair market value of $100,000. In exchange for the painting, B receives or expects to receive a state tax credit equal to 10 percent of the fair market value of the painting. Under paragraph (h)(3)(vi) of this section, B is not required to apply the general rule of paragraph (h)(3)(i) of this section because the amount of the tax credit received or expected to be received by B does not exceed 15 percent of the fair market value of the property transferred to Y. Accordingly, the amount of B's charitable contribution deduction for the transfer of the painting is not reduced under paragraph (h)(3)(i) of this section.

(C) *Example 3*. C, an individual, makes a payment of $1,000 to Z, an entity described in section 170(c). In exchange for the payment, under state M law, C is entitled to receive a state tax deduction equal to the amount paid by C to Z. Under paragraph (h)(3)(ii)(A) of this section, C's charitable contribution deduction under section 170(a) is not required to be reduced on account of C's state tax deduction for C's payment to Z.

(viii) *Effective/applicability date*. This paragraph (h)(3) applies to amounts paid or property transferred by a taxpayer after August 27, 2018.

Notice 2019-12, § 3, "Safe Harbor For Individuals," provides for post-August 27, 2018 contributions:

> The Treasury Department and the IRS take seriously the concern that the proposed regulations could create unfair consequences for individuals who (i) itemize deductions for federal income tax purposes, (ii) make a payment to a section 170(c) entity in return for a state or local tax credit, and (iii) would have been able to deduct a payment of tax to the state or local government in the amount of the credit. A safe harbor is appropriate to mitigate the consequences of the proposed regulations in the situation described above.
>
> Accordingly, the Treasury Department and the IRS intend to publish a proposed regulation amending Treasury Regulation § 1.164-3 to provide a safe harbor for certain individuals who make a payment to or for the use of an entity described in section 170(c) in return for a state or local tax credit. Under this safe harbor, an individual who itemizes deductions and who makes a payment to a section 170(c) entity in return for a state or local tax credit may treat as a payment of state or local tax for purposes of section 164 the portion of such payment for which a charitable contribution deduction under section 170 is or will be disallowed under final regulations. This treatment as a payment of state or local tax under section 164 is allowed in the taxable year in which the payment is made to the extent the resulting credit is applied, consistent with applicable state or local law, to offset the individual's state or local tax liability for such taxable year or the preceding taxable year.[1] To the extent the resulting credit is not applied to offset the individual's state or local tax liability for the taxable year of the payment or the preceding taxable year, any excess credit permitted to be carried forward may be treated as a payment of state or local tax under section 164 in the taxable year or years for which the carryover credit is applied, consistent with applicable state or local law, to offset the individual's state or local tax liability. This safe harbor shall not apply to a transfer of property.
>
> [1] Some state or local tax credit programs allow an individual to apply the state or local tax credit to offset a prior year's state or local tax liability.
>
> Nothing in this notice may be construed as permitting a taxpayer who applies this safe harbor to treat the amount of any payment as deductible under more than one provision of the Code or Treasury regulations.
>
> Nothing in this notice may be construed as permitting a taxpayer who applies this safe harbor to avoid the limitations of section 164(b)(6) for any amount paid as a tax or treated under this notice as a payment of tax.

Notice 2019-12, § 4, "Examples," provides:

> In the examples below, assume that the taxpayer's application of the state or local tax credit is consistent with applicable state or local law and that the taxpayer is an individual who itemizes deductions for federal income tax purposes.
>
> *Example 1*. In year 1, Taxpayer A makes a payment of $500 to an entity described in section 170(c). In return for the payment, A receives a dollar-for-dollar state income tax credit. Prior to application of the credit, A's state income tax liability for year 1 was $500 or more; A applies the $500 credit to A's year 1 state income tax liability. Under section 3 of this notice, A treats the $500 payment as a payment of state income tax in year 1 for purposes of section 164. To determine A's deduction amount, A must apply the provisions of section 164 applicable to payments of state and local taxes, including the limitation under section 164(b)(6).
>
> *Example 2*. In year 1, Taxpayer B makes a payment of $7,000 to an entity described in section 170(c). In return for the payment, B receives a dollar-for-dollar state income tax credit, which under state law may be carried forward for three taxable years. Prior to application of the credit, B's state income tax liability for year 1 was $5,000; B applies $5,000 of the $7,000 credit to B's year 1 state income tax liability. Under section 3 of this notice, B treats $5,000 of the $7,000 payment as a payment of state income tax in year 1 for purposes of section 164. Prior to application of the remaining credit, B's state income tax liability for year 2 exceeds $2,000; B applies the excess credit of $2,000 to B's year 2 state income tax liability. For year 2, B treats the $2,000 as a payment of state income tax for purposes of section 164. To determine B's deduction amounts in years 1 and 2, B must apply the provisions of section 164 applicable to payments of state and local taxes, including the limitation under section 164(b)(6).
>
> *Example 3*. In year 1, Taxpayer C makes a payment of $7,000 to an entity described in section 170(c). In return for the payment, C receives a local real property tax credit equal to 25 percent of the amount of this payment ($1,750). Prior to application of the credit, C's local real property tax liability in year 1 was $3,500; C applies the $1,750 credit to C's year 1 local real property tax liability. Under section 3 of this notice, for year 1, C treats $1,750 as a payment of local real property tax for purposes of section 164. To determine C's deduction amount, C must apply the provisions of section 164 applicable to payments of state and local taxes, including the limitation under section 164(b)(6).

This recharacterization of charitable contributions that generate tax credits as state tax payments extends to tax credit contributions that generate credit against business owners' individual income tax but does not disallow recharacterize contributions when the credits are against entity level taxation.[1439]

Certain trust administrative expenses are not itemized deductions and instead are deducted in arriving at adjusted gross income (often called "above the line"); therefore, they are fully

[1439] Reg. § 1.162-15(a)(3)(iv), Examples (3), which is reproduced in part II.G.4.g.i Charitable Deduction vs. Business Expense.

deductible for regular tax and alternative minimum tax.[1440] Thus, nongrantor trusts treat these items more favorably than individuals and grantor trusts.

Among the items the alternative minimum tax disallows for noncorporate taxpayers are deductions for the following under Code § 56(b)(1)(A):

(i) for any miscellaneous itemized deduction (as defined in section 67(b)), or

(ii) for any taxes described in paragraph (1), (2), or (3) of section 164(a) or clause (ii) of section 164(b)(5)(A).

To work around the Code § 67(g) suspension of the deduction for investment expenses characterized as miscellaneous itemized deductions and the unfavorable AMT treatment after the suspension ends, see part II.G.4.l.i.(e) Family Office as a Trade or Business.

II.G.4.n.ii. Pass-Through Entity Tax (PTET)

If a partnership pays an entity-level income tax, Rev. Rul. 58-25 allows the partnership to deduct the tax against its income instead of separately stating the tax on the partner's K-1s. Notice 2020-75, § 3.01, discusses how this applies in light of the Code § 164(b)(6) limitations:

> *Purpose and scope*. The Treasury Department and the IRS intend to issue proposed regulations to provide certainty to individual owners of partnerships and S corporations in calculating their SALT deduction limitations. Based on the statutory and administrative authorities described in section 2 of this notice, the forthcoming proposed regulations will clarify that Specified Income Tax Payments (as defined in section 3.02(1) of this notice) are deductible by partnerships and S corporations in computing their non-separately stated income or loss.

Note that the PTET regime applies to partnerships and S corporations and not to sole proprietorships. Consider giving a small interest to a spouse or other family member to enable the owner to be able to apply the PTET regime.

Notice 2020-75, § 3.02, "Forthcoming regulations," describes the proposed regulations' expected concepts:

> (1) *Definition of Specified Income Tax Payment*. For purposes of section 3.02 of this notice, the term "Specified Income Tax Payment" means any amount paid by a partnership or an S corporation to a State, a political subdivision of a State, or the District of Columbia (Domestic Jurisdiction) to satisfy its liability for income taxes imposed by the Domestic Jurisdiction on the partnership or the S corporation. This definition does not include income taxes imposed by U.S. territories or their political subdivisions. Thus, this definition solely includes income taxes described in section 164(b)(2) for which a deduction by a partnership is not disallowed under section 703(a)(2)(B), and such income taxes for which a deduction by an S corporation is not disallowed under section 1363(b)(2). For this purpose, a Specified Income Tax Payment includes any amount paid by a partnership or an S corporation to a Domestic Jurisdiction pursuant to a direct imposition of income tax by the Domestic Jurisdiction on the partnership or S corporation, without regard to whether

[1440] See fn 2507 and accompanying text in part II.J.3.d Who Benefits Most from Deductions.

the imposition of and liability for the income tax is the result of an election by the entity or whether the partners or shareholders receive a partial or full deduction, exclusion, credit, or other tax benefit that is based on their share of the amount paid by the partnership or S corporation to satisfy its income tax liability under the Domestic Jurisdiction's tax law and which reduces the partners' or shareholders' own individual income tax liabilities under the Domestic Jurisdiction's tax law.

(2) *Deductibility of Specified Income Tax Payments*. If a partnership or an S corporation makes a Specified Income Tax Payment during a taxable year, the partnership or S corporation is allowed a deduction for the Specified Income Tax Payment in computing its taxable income for the taxable year in which the payment is made.

(3) *Specified Income Tax Payments not separately taken into account*. Any Specified Income Tax Payment made by a partnership or an S corporation during a taxable year does not constitute an item of deduction that a partner or an S corporation shareholder takes into account separately under section 702 or section 1366 in determining the partner's or S corporation shareholder's own Federal income tax liability for the taxable year. Instead, Specified Income Tax Payments will be reflected in a partner's or an S corporation shareholder's distributive or pro-rata share of nonseparately stated income or loss reported on a Schedule K-1 (or similar form).

(4) *Specified Income Tax Payments not taken into account for SALT deduction limitation*. Any Specified Income Tax Payment made by a partnership or an S corporation is not taken into account in applying the SALT deduction limitation to any individual who is a partner in the partnership or a shareholder of the S corporation.

Notice 2020-75, § 4, "*Applicability Date*," provides:

> The proposed regulations described in this notice will apply to Specified Income Tax Payments made on or after November 9, 2020. The proposed regulations will also permit taxpayers described in section 3.02 of this notice to apply the rules described in this notice to Specified Income Tax Payments made in a taxable year of the partnership or S corporation ending after December 31, 2017, and made before November 9, 2020, provided that the Specified Income Tax Payment is made to satisfy the liability for income tax imposed on the partnership or S corporation pursuant to a law enacted prior to November 9, 2020. Prior to the issuance of the proposed regulations, taxpayers may rely on the provisions of this notice with respect to Specified Income Tax Payments as described in this section 4.

In response to owners of pass-through entities not being able to deduct state and local taxes imposed on their owners' distributive share of income, some states have imposed entity-level taxes, which tax is referred to as a pass-through entity tax (PTET) even though Notice 2020-75 refers to it as a "Specified Income Tax Payment"; the Multistate Tax Commission is looking into entity-level taxation to combat the complexity of tiered pass-through entities (especially partnerships).[1441] EY prepared a study on the different C corporation and S corporation

[1441] https://www.mtc.gov/Uniformity/Standing-Subcommittee. For more about the Multistate Tax Commission, see fn 1150 in part II.G.3 State Income Taxation.

effective tax rates.[1442] AICPA issued its own reports.[1443] Consider further the estate planning issues of this election when a material portion of the pass-through entity is owned by an irrevocable grantor trust:[1444]

- The entity paying the tax instead of the grantor paying the tax means that the trust is indirectly paying the state income tax instead of the grantor paying the state income tax. That tactic is contrary to the thought behind using such a trust. On the other hand, if the grantor plans to turn off grantor trust status once any note owed to the grantor is retired and this tactic regarding state income tax does not materially delay retiring the note, the family might prefer to save the state income tax. If the grantor reimburses the tax to the entity, then the entity has not incurred the tax and cannot deduct it, frustrating the purpose of the whole exercise. In addition to being ineffective to this extent, the reimbursement idea is problematic, given that legally the entity has no right to be reimbursed by the grantor.

- If the pass-through entity does not have a substantial non-transfer tax purpose that satisfies *Bongard*, concerns have been raised whether a trustee's authority (if any) to make this state income tax election might have transfer tax consequences.[1445] In that case, consider not authorizing the trustee of an irrevocable grantor trust to make such an election. If the entity is an S corporation, I typically advise the donor to transfer only nonvoting stock to the corporation, so the concern described above may not be an issue.[1446]

- If the trustee of an irrevocable grantor trust elects PTET, benefitting the grantor at the expense of the beneficiaries, consider that the grantor could always turn off federal grantor trust status, which would harm the beneficiaries even more. Given this dynamic, I don't view the trustee electing PTET as violating fiduciary duties; on the other hand, consider documenting that the trustee made that election to motivate the grantor not to turn of grantor trust status.

Generally, states allow pass-through entities to elect into the PTET regime and provide a credit to the owners for PTET paid. Questions to consider include:

- Is the PTET credit refundable?
    - If so, how does the tax benefit rule apply to refund of state credits by the owner?
    - If not, then an entity's payment of PTET at a higher rate may increase the owner's state income tax burden.

[1444] See part III.B.2 Irrevocable Grantor Trust Planning, Including GRAT vs. Sale to Irrevocable Grantor Trust.

[1445] See part III.C.4 Avoiding Possible Code § 2036(a)(2) Powers, especially fn 7479.

[1446] See part II.A.2.i.i.(b) Why Nonvoting Shares Are Needed for Estate Planning.

- If a pass-through entity does business in multiple states, one must analyze how PTET works in each state.

- PTET reduces an owner's federal income tax and presumably also the owner's self-employment tax[1447] and deduction for qualified business income.[1448]

Because PTET is relatively new, I suggest that a pass-through entity develop informal procedures to be fair in allocation of PTET expense and credits. If the entity is taxed as an S corporation, do not make any formal agreements that might constitute a governing document; see parts II.A.2.i.ii Temporary Timing Differences; Other Varying Differences and II.A.2.i.iii Disproportionate Distributions (Not Temporary).

Presumably the PTET credit would be allocated between the trust and beneficiaries in the same manner as the deduction that generated that credit. For an analogy, see part II.E.1.f Trusts/Estates and the Code § 199A Deduction, especially subpart II.E.1.f.i.(a) How Qualified Business Income Flows to Beneficiaries.

In a podcast for the AICPA, "When to call an audible on the passthrough entity tax," David Kirk, CPA, CFP, LLM, Private Tax Leader, National Tax - EY, discussed some PTET issues:

- Possible S corporation distortions

- Not all states give credit for tax paid to other states when that tax is PTET

- Some states (MA and CT) don't give credit for the entire PTET

- If and to the extent that the PTE does not engage in a trade or business or a rental activity or other Code § 62(a) above-the-line activity, the related PTET is an itemized deduction that may be disallowed for regular or alternative minimum tax

- PTET undermines irrevocable grantor trust strategy; see text following fn 1444

- Check whether the credit passes through from nongrantor trust to beneficiary allow with the PTE income

- No guidance yet on how tax benefit rule applies with refund arising from PTE credit (if refundable)

Dave used the following example to illustrate certain possible S corporation distortions from PTET:

- S corporation (S), which is located in State X, earns $1,000 taxable income, of which $100 is sourced to State X

- Dave owns 75%, and April owns 25%

- Thus, State X source income is allocated $75 to Dave and $25 to April

---

[1447] See part II.L.2.a.i General Rules for Income Subject to Self-Employment Tax.
[1448] See part II.E.1.c.ii.(a) Generally; List of Items Included in QBI.

- Dave resides in State X, and April resides in State Y

- State X will cause S to pay 10% tax on all of Dave's $750 of income, because Dave resides in State X. Thus, S will pay $75 State X tax on Dave's share of the income.

- Because April is not a State X resident, only her $25 State X share of income is subject to State X, so S pays only $2.50 State X tax on April's share of the income.

- Thus, S pays $75 + $2.50 = $77.50 State X tax. Of this, $58 (75%) reduces Dave's income, and $19.50 (25%) reduces April's income. However, the PTET is credited $75 to Dave and $2.50 to April.

- How would one account for the unfair $17 of expense that reduces April's share that benefits Dave?

- This is not a withholding item contemplated by the S corporation regulations.

- The concern arises only because Dave and April live in different states.

Sher, "Questions to consider before electing into a PTE tax," The Tax Adviser (9/2022), includes the following checklist:[1449]

Election issues

- Is the PTE tax statute elective or mandatory (only Connecticut's is mandatory so far)?

- What percentage of ownership is required to make the election and what is the voting procedure (remember, voting requirements/procedures may vary from state to state)?

- Is the PTE required to make estimated state tax payments?

- When are estimated payments due?

- When is the election due? Has the election or filing been extended, especially when enacted in the first year the election is available?

- What is the effective date of the election? Is the effective date retroactive?

- Is the election binding for just the current year or for multiple years?

- Is the election required to be made annually?

- When can the election be revoked?

[1449] This checklist appears to be substantially the same as *Taxpayer and Practitioner Considerations for Whether to Elect into a State Pass-Through Entity (PTE)* Tax*, AICPA, July 19, 2022.*

- What are the voting requirements/procedures and notification procedures for revocation?

- Is the PTE tax statute one that automatically sunsets if the SALT cap sunsets on Dec. 31, 2025, or does it expire on Dec. 31, 2025, regardless, or is it permanent?

- Which entities or types of owners are allowed to make the election?

- Can resident and nonresident owners make an election or consent to participate (if that is part of the state's PTE tax regime)?

- What forms need to be filed?

- What is the entity withholding tax rate?

- What is the PTE tax rate?

- What is the highest individual tax rate (relates to composite filers)?

- Is there an exclusion of income (*e.g.*, Wisconsin) or a flowthrough of income and credit for PTE tax paid (refundable or nonrefundable) (*e.g.*, the majority of the states)?

- What are the benefits to members/partners and what are potential detriments?

- How is the PTE tax credit used in sequence with other credits for owners?

- Is there any alternative minimum tax issue from using a PTE tax credit?

- Double-check the operating or partnership agreement and consider:

    - Does the agreement even permit the PTE to elect to pay a PTE tax?

    - Are the voting requirements consistent with the PTE tax statute?

    - Do the allocation provisions properly allocate any PTE tax to each partner in a way that reflects the partner's share of the economics?

    - Does the agreement allow cash distributions to nonelecting/nonconsenting/ineligible owners?

    - If there is a cash distribution provision, are distributable earnings reduced by the partner's share of any PTE tax expense?

    - Are guaranteed payments reduced by the partner's share of any PTE tax expense?

Federal issues

- How is excess PTE tax credit taxed?

- For federal income tax purposes, is the PTE tax deduction a Sec. 162 or a Sec. 212 deduction?

- Has Temp. Regs. Sec. 1.67-1T(c) been considered?

  - It provides for allocation of expenses related to both a trade or business activity and a production-of-income activity using a “reasonable basis.”

- Does the PTE tax reduce self-employment tax or net investment income tax?

- Will additional disclosures be necessary for all shareholders to properly treat the PTE tax deduction under the net investment income tax rules and passive activity rules?

- Can the entity apply a loss carry-forward from a prior year?

- Does the state election and payment sequencing create a “deposit” for federal tax purposes, such as where the payment was made in one year, but the entity cannot elect until the subsequent year when the election can be made?

- Will the IRS allow payment alone to be enough for a federal deduction (ignore deposit issues)?

- Does Notice 2020-75 allow a partnership to specially allocate the PTE tax to the consenting/eligible owners?

- How will the PTE tax deduction affect the Sec. 199A deduction? Is there a reduction in the Sec. 199A qualified business income deduction?

- What is the timing of payment when deducting for federal tax purposes (some partners will have tax effects depending on the year the distribution is made)?

- Which year does the entity take the federal deduction? The owners should consider the tax law on “deposits” and methods of accounting.

- How does the entity report any refund of the PTE tax?

- Must a refund be separately reported to the owners in order to determine the tax treatment?

- Are there any complications for S corporations related to:

  - Shareholder agreements?

  - Per share, per day allocation of income/expense?

  - Disproportionate distributions?

- One-class-of-stock issue?[1450]

State issues

- Does the PTE tax regime exclude the PTE's income from the owners' returns?
- What income and deductions will be included in the state taxable income base for the PTE tax?
  - For example, will charitable contributions reduce the base?
  - Will a sale of the entity structured for tax as an asset sale increase the base?
  - Will a sale of the entity structured for tax as a stock sale be includible in the base?
- Does the PTE tax include the distributive share of otherwise exempt owners?
- Is there nonbusiness income that will be sourced to a state if the election is made?
- Does the PTE tax payment deducted for federal tax purposes create a nondeductible item for state taxes that reduces the shareholder basis before losses and deductions?
- Does the PTE tax regime provide a full or partial credit to owners for taxes paid?
- Are there limits on the shareholders' ability to use the credit on their state returns?
- Will other states in which the PTE is doing business allow a credit for the PTE tax at the owner level?
- Is nonresident partner or shareholder withholding still required when the PTE election is made?
- Can the PTE election and payment of PTE tax at the entity level satisfy a nonresident member's state filing requirement (*i.e.*, such that a separate filing by the member is not required)?
- Can a passthrough entity still elect to file a composite return if a PTE election is made? If yes, how is the PTE credit applied/claimed?
- Can estimated composite, withholding, and/or individual estimated payments be transferred to the PTE's account to cover the PTE tax?

[1450] [my footnote:] If the governing documents do not permit disproportionate distributions, disproportionate distributions do not create a single class of stock issue. See parts II.A.2.i.ii Temporary Timing Differences; Other Varying Differences and II.A.2.i.iii Disproportionate Distributions (Not Temporary). However, the Dave Kirk S corporation example raises challenging administrative issues, and S corporations that make disproportionate distributions may be ineligible if other issues make them need relief under part II.A.2.i.xii Automatic Relief If Governing Provisions Violate Single Class of Stock Rule.

Taxpayer and tax practitioner issues

- What are the compliance costs (including CPA fees)?
- How much risk does the election create for the entity or owners, assuming that the IRS issues no more guidance?
- Does an operating agreement need to be reviewed by legal counsel and/or amended in order to optimize, or otherwise account for, an efficient election?
- Are the entity and owners “eligible” as defined under the state’s PTE tax statute?
- Who determines if qualified taxpayers (owners) consented?
- Who is charged with monitoring new state department of revenue guidance or changes in the laws of the states in which the PTE tax election has been made, or might be made, if the law or conditions changed?
- How will the election be made and documented, and what documentation is needed to prove an owner consented or not to the election?
- Is the election or vote made anonymously with respect to other partners or not? Note that the partnership and its managers (and advisers) ultimately need to know who elected.
- What are the mechanical issues involving the state PTE tax return preparation? For example, if the return must be filed through the state’s website, the tax practitioner may be required to obtain a power of attorney or a specific type of account authorization in order to be able to prepare and release returns for clients. Note that even if that is possible, the practitioner may not want to do that or may need contractual language. For example, if the practitioner’s firm is also the auditor for the taxpayer, perhaps the practitioner may need to be more careful about what information tax preparers would have if they entered into a client account.
- What is the likelihood of interest in the SALT cap workaround, assuming the entity and at least one owner are “qualified”?
- If the SALT cap is raised by Congress, does that change the willingness of qualified taxpayers (owners) to consent to (or continue) the election?
- Do owners have sufficient tax they individually owe on their share of PTE net income so that they are above the SALT cap?
- In which states should an entity with income taxed in multiple states pay the optional state PTE tax?
- How and when should amended returns and audits be handled? Like the comprehensive partnership audit rules, does the partnership/operating agreement specify who handles these?
- Does the partnership/operating agreement require a distribution to all partners?

- If the PTE tax deduction is reported on Schedule K-1 in "Other Deductions," rather than in nonseparately stated ordinary business income, will an additional disclosure be needed, since the return will not comply with the notice?

- What will the effect be on distributions to defective grantor trusts that were expected to fund installment sale payments?

- (For tax practitioners only) Conflict of interest and malpractice risks in advising owners and entities, such as:

  - How to explain unknowns to a client.

  - How to advise entities and owners who may have conflicting interests and when the law is not 100% clear.

  - How to handle a situation where not all owners consent or are eligible.

  - How to deal with issues when not all owners consent or are not all eligible to get a state tax credit, as this situation likely causes a violation of an S corporation's one-class-of-stock requirement[1451] and, for a partnership, it might violate the partnership agreement and cause other tax and legal issues for the entity and owners.

See also AICPA's "States with Enacted or Proposed Pass-Through Entity (PTE) Level Tax" (updated June 13, 2023 last time I checked).

II.G.5. Code § 179 Expensing Substitute for Depreciation; Bonus Depreciation

II.G.5.a. Code 179 Expense

A taxpayer may expense (instead of capitalizing)[1452] $1,000,000[1453] or so[1454] of qualifying property each year.

Generally, qualifying property includes certain tangible property[1455] or certain computer software,[1456] which is Code § 1245 property[1457] and is acquired by purchase for use in the active conduct of a trade or business.[1458]

[1451] [my footnote:] See my comments disputing this leap in fn 1450.
[1452] Code § 179(a).
[1453] Code § 179(b)(1).
[1454] Code § 179(b)(6) provides for post-2018 increases for inflation.
[1455] To which Code § 168 applies.
[1456] As defined in Code § 197(e)(3)(B) and which is described in Code § 197(e)(3)(A)(i) and to which Code § 167 applies.
[1457] As defined in Code § 1245(a)(3). See part II.G.6.b Code § 1245 Property.
[1458] Code § 179(d)(1), which also expressly excludes property described in Code § 50(b) (other than Code § 50(b)(2)). Generally, Code § 50(b) refers to property used (1) predominantly outside the United States, (2) predominantly to furnish lodging or in connection with the furnishing of lodging, (3) by certain tax-exempt organizations, or (4) by governmental units or foreign persons or entities.

Reg. § 1.179-1(b), "Cost subject to expense," provides:

> The expense deduction under section 179 is allowed for the entire cost or a portion of the cost of one or more items of section 179 property. This expense deduction is subject to the limitations of section 179(b) and § 1.179-2. The taxpayer may select the properties that are subject to the election as well as the portion of each property's cost to expense.

However, a nongrantor trust cannot take Code § 179 expense,[1459] which is a little awkward when it holds S corporation stock.[1460]

Code § 179(b)(3), "Limitation based on income from trade or business," provides:

> (A) *In general*. The amount allowed as a deduction under subsection (a) for any taxable year (determined after the application of paragraphs (1) and (2)) shall not exceed the aggregate amount of taxable income of the taxpayer for such taxable year which is derived from the active conduct by the taxpayer of any trade or business during such taxable year.
>
> (B) *Carryover of disallowed deduction*. The amount allowable as a deduction under subsection (a) for any taxable year shall be increased by the lesser of -
>
> > (i) the aggregate amount disallowed under subparagraph (A) for all prior taxable years (to the extent not previously allowed as a deduction by reason of this subparagraph), or
> >
> > (ii) the excess (if any) of -
> >
> > > (I) the limitation of paragraphs (1) and (2) (or if lesser, the aggregate amount of taxable income referred to in subparagraph (A)), over
> > >
> > > (II) the amount allowable as a deduction under subsection (a) for such taxable year without regard to this subparagraph.
>
> (C) *Computation of taxable income*. For purposes of this paragraph, taxable income derived from the conduct of a trade or business shall be computed without regard to the deduction allowable under this section.

Special rules apply to changes in interests in partnerships.[1461]

II.G.5.b. Bonus Depreciation

Code § 168(k) bonus depreciation had been a nice complement to Code § 179 depreciation, but 2017 tax reform has made it perhaps the first choice for many taxpayers.

[1459] See part II.J.11.a.i Code § 179 Disallowance for Estate or Nongrantor Trust.
[1460] See fn 3892 in part II.P.1.b Allocations of Income in S Corporations.
[1461] See part III.B.2.j.iii.(e) Allocation of Specific Items, especially fn. 6942.

Bonus depreciation is a component of depreciation that provides an up-front deduction of part of qualified property and applies regular depreciation for the remaining adjusted basis in the property.[1462]

First, we will look at how powerful it is, then we'll see what property qualifies.

Code § 168(k)(6) provides bonus depreciation for qualified property as follows:

(A) *In general*. Except as otherwise provided in this paragraph, the term "applicable percentage" means-

(i) in the case of property placed in service after September 27, 2017, and before January 1, 2023, 100 percent,

(ii) in the case of property placed in service after December 31, 2022, and before January 1, 2024, 80 percent,

(iii) in the case of property placed in service after December 31, 2023, and before January 1, 2025, 60 percent,

(iv) in the case of property placed in service after December 31, 2024, and before January 1, 2026, 40 percent, and

(v) in the case of property placed in service after December 31, 2025, and before January 1, 2027, 20 percent.

(B) *Rule for property with longer 20 production periods*. In the case of property described in subparagraph (b) or (C) of paragraph (2),[1463] the term "applicable percentage" means-

---

[1462] Code § 168(k)(1) provides:

Additional allowance. In the case of any qualified property—

(A) the depreciation deduction provided by section 167(a) for the taxable year in which such property is placed in service shall include an allowance equal to the applicable percentage of the adjusted basis of the qualified property, and

(B) the adjusted basis of the qualified property shall be reduced by the amount of such deduction before computing the amount otherwise allowable as a depreciation deduction under this chapter for such taxable year and any subsequent taxable year.

[1463] This is my footnote and not the statute's. Code § 168(k)(2)(B), (C) provide:

(B) Certain property having longer production periods treated as qualified property.

(i) *In general*. The term "qualified property" includes any property if such property-

(I) meets the requirements of clauses (i) and (ii) of subparagraph (A),

(II) is placed in service by the taxpayer before January 1, 2028,

(III) is acquired by the taxpayer (or acquired pursuant to a written contract entered into) before January 1, 2027,

(IV) has a recovery period of at least 10 years or is transportation property,

(V) is subject to section 263A, and

(VI) meets the requirements of clause (iii) of section 263A(f)(1)(B) (determined as if such clause also applies to property which has a long useful life (within the meaning of section 263A(f))).

(i) in the case of property placed in service after September 27, 2017, and before January 1, 2024, 100 percent,

(ii) in the case of property placed in service after December 31, 2023, and before January 1, 2025, 80 percent,

(iii) in the case of property placed in service after December 31, 2024, and before January 1, 2026, 60 percent,

(iv) in the case of property placed in service after December 31, 2025, and before January 1, 2027, 40 percent, and

(v) in the case of property placed in service after December 31, 2026, and before January 1, 2028, 20 percent.

(C) *Rule for plants bearing fruits and nuts*. In the case of a specified plant described in paragraph (5), the term ‘applicable percentage means-

(i) in the case of a plant which is planted or grafted after September 27, 2017, and before January 1, 2023, 100 percent,

(ii) in the case of a plant which is planted or grafted after December 31, 2022, and before January 1, 2024, 80 percent,

(iii) in the case of a plant which is planted or grafted after December 31, 2023, and before January 1, 2025, 60 percent,

(iv) in the case of a plant which is planted or grafted after December 31, 2024, and before January 1, 2026, 40 percent, and

---

(ii) *Only pre-January 1, 2027 basis eligible for additional allowance*. In the case of property which is qualified property solely by reason of clause (i) , paragraph (1) shall apply only to the extent of the adjusted basis thereof attributable to manufacture, construction, or production before January 1, 2027.
(iii) Transportation property. For purposes of this subparagraph, the term “transportation property” means tangible personal property used in the trade or business of transporting persons or property.
(iv) *Application of subparagraph*. This subparagraph shall not apply to any property which is described in subparagraph (C).
(C) *Certain aircraft*. The term “qualified property” includes property-
(i) which meets the requirements of subparagraph (A)(ii) and subclauses (II) and (III) of subparagraph (B)(i),
(ii) which is an aircraft which is not a transportation property (as defined in subparagraph (B)(iii)) other than for agricultural or firefighting purposes,
(iii) which is purchased and on which such purchaser, at the time of the contract for purchase, has made a nonrefundable deposit of the lesser of-
(I) 10 percent of the cost, or
(II) $100,000, and
(iv) which has-
(I) an estimated production period exceeding 4 months, and
(II) a cost exceeding $200,000.

(v) in the case of a plant which is planted or grafted after December 31, 2025, and before January 1, 2027, 20 percent.

Code § 168(k)(2)(A) defines "qualified property" to be property:

(i) [intentionally blank in statute]

(I) to which this section applies which has a recovery period of 20 years or less,

(II) which is computer software (as defined in section 167(f)(1)(B)) for which a deduction is allowable under section 167(a) without regard to this subsection,

(III) which is water utility property, or

(IV) which is a qualified film or television production (as defined in subsection (d) of section 181) for which a deduction would have been allowable under section 181 without regard to subsections (a)(2) and (g) of such section or this subsection, or

(V) which is a qualified live theatrical production (as defined in subsection (e) of section 181) for which a deduction would have been allowable under section 181 without regard to subsections (a)(2) and (g) of such section or this subsection,

(ii) the original use of which begins with the taxpayer or the acquisition of which by the taxpayer meets the requirements of clause (ii) of subparagraph (E),[1464] and

(iii) which is placed in service by the taxpayer before January 1, 2027.

If the taxpayer places property in service the first taxable year ending after September 27, 2017, the taxpayer may elect to use 50% as the applicable percentage.[1465]

"Qualified property" does not include[1466] certain property used in the energy industry[1467] or property that is financed by floor plan financing indebtedness that received a special business interest deduction.[1468]

Under Code § 168(k)(7), a taxpayer may elect out of Code § 168(k) bonus depreciation "with respect to any class of property for any taxable year." Generally, the classes are the same as

---

[1464] This footnote is not in the statute. Code § 168(k)(2)(E)(ii) provides:
Acquisition requirements. An acquisition of property meets the requirements of this clause if-
(I) such property was not used by the taxpayer at any time prior to such acquisition, and
(II) the acquisition of such property meets the requirements of paragraphs (2)(A), (2)(B), (2)(C), and (3) of section 179(d).

[1465] Code § 168(k)(10). Rev. Proc. 2019-33 provides procedures to make or revoke such an election.

[1466] Code § 168(k)(9).

[1467] Code § 168(k)(9)(A) refers to "any property which is primarily used in a trade or business described in clause (iv) of section 163(j)(7)(A)." See text accompanying fn 1813 in part II.G.20.a Code § 163(j) Limitation on Deducting Business Interest Expense.

[1468] Code § 168(k)(9)(B) refers to "any property used in a trade or business that has had floor plan financing indebtedness (as defined in paragraph (9) of section 163(j)), if the floor plan financing interest related to such indebtedness was taken into account under paragraph (1)(C) of such section." See text accompanying fns 1823-1825 in part II.G.20.aF Code § 163(j) Limitation on Deducting Business Interest Expense.

the classes for normal depreciation.[1469] Rev. Proc. 2019-33, § 5.01 uses the following a classes of property:

(1) Except for the property described in sections 4 and 5.01(2) of this revenue procedure, each class of property described in § 168(e) (for example, 5-year property);

(2) Water utility property as defined in § 168(e)(5) and depreciated under § 168;

(3) Computer software as defined in, and depreciated under, § 167(f)(1) and the regulations under § 167(f)(1);

(4) Qualified improvement property as defined in § 168(k)(3) as in effect on the day before amendment by § 13204(a)(4)(B) of the TCJA that: (i) is acquired by the taxpayer after September 27, 2017; (ii) is placed in service by the taxpayer after September 27, 2017, and before January 1, 2018; (iii) meets the requirements in § 168(k)(2)(A)(ii) as amended by § 13201(c)(1) of the TCJA; and (iv) is depreciated under § 168;

(5) Each separate production, as defined in § 1.181-3(b), of a qualified film or television production;

(6) Each separate production, as defined in § 181(e)(2), of a qualified live theatrical production; or

(7) A partner's basis adjustment in partnership assets under § 743(b) for each class of property described in section 4 of this revenue procedure and section 5.01(1) through (6) of this revenue procedure.

Rev. Proc. 2017-33 and Rev. Proc. 2019-33 provide procedures for making or revoking an election under Code § 168(k)(7).

Reg. § 1.168(k)-2 "provides rules for determining the additional first year depreciation deduction allowable under section 168(k) for qualified property acquired and placed in service after September 27, 2017."[1470] Reg. § 1.168(k)-2(b)(1), "In general," provides:

> Qualified property is depreciable property, as defined in § 1.168(b)-1(a)(1), that meets all the following requirements in the first taxable year in which the property is subject to depreciation by the taxpayer whether or not depreciation deductions for the property are allowable:

[1469] Reg. § 1.168(k)-1(e)(2), "Definition of class of property," defines "class of property" to mean:

(i) Except for the property described in paragraphs (e)(2)(ii) and (iv) of this section, each class of property described in section 168(e) (for example, 5-year property);
(ii) Water utility property as defined in section 168(e)(5) and depreciated under section 168;
(iii) Computer software as defined in, and depreciated under, section 167(f)(1) and the regulations thereunder; or
(iv) Qualified leasehold improvement property as defined in paragraph (c) of this section and depreciated under section 168.

[1470] Reg. § 1.168(k)-2(a)(1).

(i) The requirements in § 1.168(k)-2(b)(2) (description of qualified property);

(ii) The requirements in § 1.168(k)-2(b)(3) (original use or used property acquisition requirements);

(iii) The requirements in § 1.168(k)-2(b)(4) (placed-in-service date); and

(iv) The requirements in § 1.168(k)-2(b)(5) (acquisition of property).

Reg. § 1.168(k)-2(b)(3)(iv), "Application to partnerships," provides:

(A) *Section 704(c) remedial allocations*. Remedial allocations under section 704(c) do not satisfy the requirements of paragraph (b)(3) of this section. See § 1.704-3(d)(2).[1471]

(B) *Basis determined under section 732*. Any basis of distributed property determined under section 732 does not satisfy the requirements of paragraph (b)(3) of this section.[1472]

(C) *Section 734(b) adjustments*. Any increase in basis of depreciable property under section 734(b) does not satisfy the requirements of paragraph (b)(3) of this section.[1473]

(D) *Section 743(b) adjustments*.[1474]

(1) *In general*. For purposes of determining whether the transfer of a partnership interest meets the requirements of paragraph (b)(3)(iii)(A) of this section, each partner is treated as having a depreciable interest in the partner's proportionate share of partnership property. Any increase in basis of depreciable property under section 743(b) satisfies the requirements of paragraph (b)(3)(iii)(A) of this section if -

[1471] [my footnote:] See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations, especially parts II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000 and II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest (within the latter, see text preceding fn 4227 in the paragraph that includes fn 4227.

[1472] [my footnote:] See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations, especially part II.Q.8.e.iii.(e) Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election.

[1473] [my footnote:] See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations, especially parts II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000 and II.Q.8.e.iii.(e) Code § 734 Basis Adjustment Resulting from Distributions, Including Code § 732(d) Requiring an Adjustment Without Making Code § 754 Election.

[1474] [my footnote:] See part II.Q.8.e.iii Inside Basis Step-Up (or Step-Down) Applies to Partnerships and Generally Not C or S Corporations, especially parts II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000 and II.Q.8.e.iii.(d) Code § 743(b) Effectuating Code § 754 Basis Adjustment on Transfer of Partnership Interest.

(i) At any time prior to the transfer of the partnership interest that gave rise to such basis increase, neither the transferee partner nor a predecessor of the transferee partner had any depreciable interest in the portion of the property deemed acquired to which the section 743(b) adjustment is allocated under section 755 and § 1.755-1; and

(ii) The transfer of the partnership interest that gave rise to such basis increase satisfies the requirements of paragraphs (b)(3)(iii)(A)(2) and (3) of this section.

(2) *Relatedness tested at partner level*. Solely for purposes of paragraph (b)(3)(iv)(D)(1)(ii) of this section, whether the parties are related or unrelated is determined by comparing the transferor and the transferee of the transferred partnership interest.

Reg. § 1.168(k)-2(b)(3)(vii), "Examples," includes the following related to partnerships:

(M) *Example (13)*. O and P form an equal partnership, OP, in 2018. O contributes cash to OP, and P contributes equipment to OP. OP's basis in the equipment contributed by P is determined under section 723. Because OP's basis in such equipment is determined in whole or in part by reference to P's adjusted basis in such equipment, OP's acquisition of such equipment does not satisfy section 179(d)(2)(C) and § 1.179-4(c)(1)(iv) and, thus, does not satisfy the used property acquisition requirements of paragraph (b)(3)(iii) of this section. Accordingly, OP's acquisition of such equipment is not eligible for the additional first year depreciation deduction.[1475]

(N) *Example (14)*. Q, R, and S form an equal partnership, QRS, in 2019. Each partner contributes $100, which QRS uses to purchase a retail motor fuels outlet for $300. Assume this retail motor fuels outlet is QRS' only property and is qualified property under section 168(k)(2)(A)(i). QRS makes an election not to deduct the additional first year depreciation for all qualified property placed in service during 2019. QRS has a section 754 election in effect. QRS claimed depreciation of $15 for the retail motor fuels outlet for 2019. During 2020, when the retail motor fuels outlet's fair market value is $600, Q sells all of its partnership interest to T in a fully taxable transaction for $200. T never previously had a depreciable interest in the retail motor fuels outlet. T takes an outside basis of $200 in the partnership interest previously owned by Q. T's share of the partnership's previously taxed capital is $95. Accordingly, T's section 743(b) adjustment is $105 and is allocated entirely to the retail motor fuels outlet under section 755. Assuming all other requirements are met, T's section 743(b) adjustment qualifies for the additional first year depreciation deduction under this section.

(O) *Example (15)*. The facts are the same as in Example 14 of paragraph (b)(3)(vii)(N) of this section, except that Q sells his partnership interest to U, a related person within the meaning of section 179(d)(2)(A) or (B) and § 1.179-4(c). U's

[1475] [my footnote:] Because a transfer of property in exchange for a partnership interest generally is a nontaxable transaction, the transferred property has a carryover basis. See part II.M.3.a General Rule: No Gain Or Loss on Contribution to Partnership. Part II.M.3.a is found within part II.M.3 Buying into or Forming a Partnership, and various exceptions to part II.M.3.a follow part II.M.3.a.

section 743(b) adjustment does not qualify for the additional first year depreciation deduction.

(P) *Example (16)*. The facts are the same as in Example 14 of paragraph (b)(3)(vii)(N) of this section, except that Q dies and his partnership interest is transferred to V. V takes a basis in Q's partnership interest under section 1014. As a result, section 179(d)(2)(C)(ii) and § 1.179-4(c)(1)(iv) are not satisfied, and V's section 743(b) adjustment does not qualify for the additional first year depreciation deduction.

(Q) *Example (17)*. The facts are the same as in Example 14 of paragraph (b)(3)(vii)(N) of this section, except that QRS purchased the retail motor fuels outlet from T prior to T purchasing Q's partnership interest in QRS. T had a depreciable interest in such retail motor fuels outlet. Because T had a depreciable interest in the retail motor fuels outlet before T acquired its interest in QRS, T's section 743(b) adjustment does not qualify for the additional first year depreciation deduction.

II.G.5.c. Comparing Code § 179 to Bonus Depreciation

Let's compare part II.G.5.a Code 179 Expense to part II.G.5.b Bonus Depreciation.

Code § 179 has more limitations than bonus depreciation, in that Code § 179 does not apply to nongrantor trusts, cannot generate a loss, and is limited in availability (the latter which may or may not be relevant for any particular taxpayer).

However, bonus depreciation applies to one or more entire classes of property, whereas Code § 179 can be narrowly tailored to get the right result. After 2017, this tailoring may be more important, in that 2017 restrictions on using net operating losses make avoiding a net operating loss more important,[1476] and controlling qualified business income for the Code § 199A deduction may be important in that generating a loss means that a taxpayer's W-2 wages and UBIA for that year are wasted.[1477]

As to the net operating loss (NOL) issue, Code § 179 has its own rules regarding using any suspended Code § 179 deduction on a dollar-for-dollar basis, compared to the 80% limitation on using NOLs.

II.G.5.d. Cost Segregation Studies to Accelerate Depreciation

It is not uncommon for taxpayers to separate a building's cost into tangible property with a shorter useful life and the building with a longer life.

Note that doing so would shorten the period during which the property's unadjusted basis may be used to satisfy certain limits on the Code § 199A deduction for qualified business income.[1478]

[1476] See part II.G.4.l.ii Net Operating Loss Deduction.

[1477] See parts II.E.1.c.vii Effect of Losses from Qualified Trades or Businesses on the Code § 199A Deduction and II.E.1.c.v.(c) Calculation When Taxable Income Exceeds the Threshold Amount.

[1478] See part II.E.1.c Code § 199A Pass-Through Deduction for Qualified Business Income, especially part II.E.1.c.vi.(b) Unadjusted Basis Immediately after Acquisition (UBIA) of Qualified Property under Code § 199A.

Query whether that should even be a factor for a deduction that is scheduled to expire after December 31, 2025.[1479]

II.G.6. Gain or Loss on the Sale or Exchange of Property Used in a Trade or Business

II.G.6.a. Code § 1231 Property

The net gain for a year recognized on the sale or exchange of depreciable property used in the trade or business[1480] (referred to as section 1231 gain) constitutes long-term capital gain[1481] to the extent that the taxpayer has not previously deducted losses from the sale of that type of property (five-year lookback).[1482] This special treatment is needed because capital assets do not include "property, used in [the taxpayer's] trade or business, of a character which is subject to the allowance for depreciation provided in section 167, or real property used in [the taxpayer's] trade or business."[1483] However, when a taxpayer attempted to buy land to improve for use in a trade or business and the land purchase did not work out, but the taxpayer profited on the ensuing litigation, the profit was long-term capital gain according to the Eleventh Circuit,[1484] overturning the Tax Court's finding of ordinary income.[1485]

Generally, the property must be held for more than one year, be used in the trade or business, and be either real property or property depreciable under Code § 167;[1486] presumably it includes property receiving a new basis under Code § 1014[1487] without regard to how long the person receiving the property from the decedent actually holds the property.[1488] It also must be held for use in such a trade or business; if it is held primarily with an intent to sell, with rental only merely a way to make the best use before sale, then the property's sale generates ordinary income as property held for sale to customers and Code § 1231 does not apply.[1489] See also

[1488] Code § 1223(9).

[1489] *Fargo v. Commissioner*, T.C. Memo. 2015-96 held:

parts II.E.1.e.i.(a) Whether Real Estate Activity Constitutes A Trade Or Business and II.G.26.b Real Estate as a Trade or Business.

An "amortizable section 197 intangible," such as purchased goodwill, generally qualifies for Code § 1231 treatment if used in a trade or business and held for more than one year and not sold to a controlled entity.[1490]

However, Code § 1231 property does not include inventory and certain other assets,[1491] including certain intellectual property.[1492]

Also subject to this rule is any recognized gain from the compulsory or involuntary conversion (as a result of destruction in whole or in part, theft or seizure, or an exercise of the power of requisition or condemnation or the threat or imminence thereof) into other property or money of either property used in the trade or business, or any capital asset which is held not only for more than one year but also in connection with a trade or business or a transaction entered into for profit.[1493]

Note, however, that generally depreciation recapture on personal property is taxed as ordinary income,[1494] and depreciation recapture on most real estate is taxed at a higher capital gain rate.[1495]

> We recognize that the La Jolla property was used as a rental property and GDLP and all related entities maintained their offices on the property. However, using the La Jolla property as rental property was not GDLP's primary purpose of holding it. We held in *Cottle v. Commissioner*, 89 T.C. 467 (1987), that section 1231 capital gain treatment was applicable to a rental property subsequently sold to liquidate the investment. That is not the case here. GDLP was making its best use of the La Jolla property as office and rental space while never abandoning its primary intention, selling it.

[1490] Reg. § 1.197-2(g)(8), which also makes goodwill subject to the ordinary income treatment described in part II.Q.7.g Code § 1239: Distributions or Other Dispositions of Depreciable or Amortizable Property (Including Goodwill).

[1491] Code § 1231(c)(1) excludes:

> (A) property of a kind which would properly be includible in the inventory of the taxpayer if on hand at the close of the taxable year,
>
> (B) property held by the taxpayer primarily for sale to customers in the ordinary course of his trade or business,
>
> (C) a copyright, a literary, musical, or artistic composition, a letter or memorandum, or similar property, held by a taxpayer described in paragraph (3) of section 1221(a) , [and]
>
> (D) a publication of the United States Government (including the Congressional Record) which is received from the United States Government, or any agency thereof, other than by purchase at the price at which it is offered for sale to the public, and which is held by a taxpayer described in paragraph (5) of section 1221(a).

[1492] See fn 1681 in part II.G.18.b Sale or Exchange of Intellectual Property - Capital Gain vs. Ordinary Income.

[1493] Code § 1231(a)(3)(A)(ii).

[1494] Code § 1245(a)(1), recognizing such depreciation recapture as ordinary income; see part II.G.6.b Code § 1245 Property. The last sentence provides that this rule trumps Code § 1231:

> Such gain shall be recognized notwithstanding any other provision of this subtitle.

Reg. § 1.1245-1(e)(1) follows this rule.

[1495] Code §§ 1(h)(1)(E) (25% rate applied to unrecaptured section 1250 gain), 1(h)(6) (definition of "unrecaptured section 1250 gain"). Citing S. Rept. No. 105-174 (P.L. 105-206), p. 149, *Federal Tax Coordinator Analysis* (RIA) ¶ I-5110.8 summarized the portion subject to this tax:

Also, although generally Code § 1231 gain is taxed as capital gain, Code § 1231 losses are deducted as ordinary losses.[1496] To prevent taxpayers from playing games with the timing of sales of Code § 1231 property, net Code § 1231 gain is treated as ordinary income to the extent of prior Code § 1231 ordinary losses, with rules coordinating gain and loss on a cumulative basis.[1497]

II.G.6.b. Code § 1245 Property

Code § 1245(a) imposes ordinary income taxation on depreciation and amortization of personal or certain other property that is disposed of, overriding various nonrecognition provisions.[1498] Unless an exception or limitation under Code § 1245(b) applies (see fns. 1517-1522), gain under Code § 1245(a)(1) is recognized notwithstanding any contrary nonrecognition provision or income characterizing provision.[1499] Because Code § 1245 overrides Code § 1231 (relating to property used in the trade or business),[1500] the gain recognized under Code § 1245(a)(1) upon a disposition will be treated as ordinary income and only the remaining gain, if any, from the disposition may be considered as gain from the sale or exchange of a capital asset if Code § 1231 applies.[1501] The nonrecognition provisions of subtitle A of the Code that Code § 1245 overrides include without limitation Code §§ 267(d), 311(a), 336, 337, 501(a), 512(b)(5)[1502] and 1039,[1503] but the override is limited with respect to Code §§ 332, 351, 361, 371(a), 374(a), 721, 731, 1031, 1033, 1071, and 1081(b)(1) and (d)(1)(A).[1504] Although Reg. § 1.1245-6(d) appears to allow Code § 1245 property to be deferred under the installment method, it expressly subjects itself to Code § 453, and Code § 453(i) recaptures immediate recapture of Code § 1245(a) ordinary income before deferring the rest.[1505] Code § 1245 does

---

> …unrecaptured section 1250 gain means the amount of long-term capital gain (not otherwise treated as ordinary income) which would be treated as ordinary income if the Code Sec. 1250 real property deprecation recapture rules applied to all depreciation (rather than only to depreciation in excess of straight-line depreciation) from property held for the long-term holding period. The unrecaptured section 1250 depreciation is reduced (but not below zero) by the excess (if any) of the amount of losses taken into account in computing "28% rate gain" over the amount of gains taken into account in computing "28% rate gain".

However, part of real estate might be treated as personal property and therefore taxed at an even higher rate. Notice 2013-59.

[1496] Code § 1231(a)(2).

[1497] Code § 1231(c)(1).

[1498] Code § 1245(a)(1), (d) (the latter overriding "any other provision of this subtitle." Reg. § 1.1245-6(a) starts by saying, "The provisions of section 1245 apply notwithstanding any other provision of subtitle A of the Code."

[1499] Reg. § 1.1245-6(a).

[1500] See part II.G.6.a Code § 1231 Property.

[1501] Reg. § 1.1245-6(a), continuing, "See example (2) of paragraph (b)(2) of § 1.1245-1."

[1502] Code § 512(b)(5) is the exclusion of capital gain from taxation under part II.Q.6.d.i UBTI Related to a Partnership or Sole Proprietorship; see fns. 4685-4693 of that part.

[1503] Reg. § 1.1245-6(b).

[1504] Reg. § 1.1245-6(b), referring to Code § 1245(b); see fn. 1521.

[1505] Code § 453(i), "Recognition of recapture income in year of disposition," provides:

> (1) *In general*. In the case of any installment sale of property to which subsection (a) applies—
> > (A) notwithstanding subsection (a), any recapture income shall be recognized in the year of the disposition, and
> >
> > (B) any gain in excess of the recapture income shall be taken into account under the installment method.

not subject to tax "any income which is exempt under section 115 (relating to income of states, etc.), 892 (relating to income of foreign governments), or 894 (relating to income exempt under treaties)."[1506] Code § 1245 does not prevent gain recognition under other Code provisions.[1507]

Property to which Code § 1245 applies is "any property which is or has been property of a character subject to the allowance for depreciation provided in section 167"[1508] and is one of the following:[1509]

(A) personal property,[1510]

(B) other property (not including a building or its structural components) but only if such other property is tangible and has an adjusted basis in which there are reflected adjustments described in paragraph (2) for a period in which such property (or other property)—[1511]

---

(2) *Recapture income*. For purposes of paragraph (1), the term "recapture income" means, with respect to any installment sale, the aggregate amount which would be treated as ordinary income under section 1245 or 1250 (or so much of section 751 as relates to section 1245 or 1250) for the taxable year of the disposition if all payments to be received were received in the taxable year of disposition.

For Code § 751, see part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

[1506] Reg. § 1.1245-6(e).

[1507] Reg. § 1.1245-6(f) provides:

Treatment of gain not recognized under section 1245. Section 1245 does not prevent gain which is not recognized under section 1245 from being considered as gain under another provision of the Code, such as, for example, section 311(c) (relating to liability in excess of basis), section 341(f) (relating to collapsible corporations), section 357(c) (relating to liabilities in excess of basis), section 1238 (relating to amortization in excess of depreciation), or section 1239 (relating to gain from sale of depreciable property between certain related persons) . Thus, for example, if section 1245 property, which has an adjusted basis of $1,000 and a recomputed basis of $1,500, is sold for $1,750 in a transaction to which section 1239 applies, $500 of the gain would be recognized under section 1245(a)(1) and the remaining $250 of the gain would be treated as ordinary income under section 1239.

[1508] Code § 197(f)(7), treats all amortizable Code § 197 intangibles as subject to Code § 167 and is reproduced in fn 1704 in part II.G.18.d Amortization of Code § 197 Intangibles.

[1509] Code § 1245(a)(3).

[1510] Reg. § 1.1245-3(b) define "personal property" to mean:

(1) Tangible personal property (as defined in paragraph (c) of § 1.48-1, relating to the definition of "section 38 property" for purposes of the investment credit), and

(2) Intangible personal property.

[1511] [My footnote:] Reg. § 1.1245-3(c) elaborates:

(1) The term "property described in section 1245(a)(3)(B)" means tangible property of the requisite depreciable character other than personal property (and other than a building and its structural components), but only if there are adjustments reflected in the adjusted basis of the property (within the meaning of paragraph (a)(2) of § 1.1245-2) for a period during which such property (or other property)—

  (i) Was used as an integral part of manufacturing, production, or extraction, or as an integral part of furnishing transportation, communications, electrical energy, gas, water, or sewage disposal services by a person engaged in a trade or business of furnishing any such service, or

  (ii) Constituted a research or storage facility used in connection with any of the foregoing activities.

(i) was used as an integral part of manufacturing, production, or extraction or of furnishing transportation, communications, electrical energy, gas, water, or sewage disposal services,

(ii) constituted a research facility used in connection with any of the activities referred to in clause (i), or

(iii) constituted a facility used in connection with any of the activities referred to in clause (i) for the bulk storage of fungible commodities (including commodities in a liquid or gaseous state),

(C) so much of any real property (other than any property described in subparagraph (b)) which has an adjusted basis in which there are reflected adjustments for amortization under section 169, 179, 179B, 179C, 179D, 179E, 185, 188 (as in effect before its repeal by the Revenue Reconciliation Act of 1990), 190, 193, or 194,

(D) a single purpose agricultural or horticultural structure (as defined in section 168(i)(13)),

(E) a storage facility (not including a building or its structural components) used in connection with the distribution of petroleum or any primary product of petroleum, or

(F) any railroad grading or tunnel bore (as defined in section 168(e)(4)).

Code § 1245 property includes livestock[1512] and certain elevators and escalators.[1513] Code § 1245 property also includes leaseholds of various Code § 1245 property.[1514]

Thus, even though during the period immediately preceding its disposition the property is not used as an integral part of an activity specified in subdivision (i) of this subparagraph and does not constitute a facility specified in subdivision (ii) of this subparagraph, such property is nevertheless property described in section 1245(a)(3)(B) if, for example, there are adjustments reflected in the adjusted basis of the property for a period during which the property was used as an integral part of manufacturing by the taxpayer or another taxpayer, or for a period during which other property (which was involuntarily converted into, or exchanged in a like kind exchange for, the property) was so used by the taxpayer or another taxpayer. For rules applicable to involuntary conversions and like kind exchanges, see paragraph (d)(3) of § 1.1245-4.

(2) The language used in subparagraph (1)(i) and (ii) of this paragraph shall have the same meaning as when used in paragraph (a) of § 1.48-1, and the terms "building" and "structural components" shall have the meanings assigned to those terms in paragraph (e) of § 1.48-1.

[1512] Reg. § 1.1245-3(a)(4), which continues:

but only with respect to taxable years beginning after December 31, 1969. For purposes of section 1245, the term "livestock" includes horses, cattle, hogs, sheep, goats, and mink and other fur-bearing animals, irrespective of the use to which they are put or the purpose for which they are held.

[1513] Reg. § 1.1245-3(a)(1)(iii).

[1514] Reg. § 1.1245-3(a)(2), which provides:

If property is section 1245 property under a subdivision of subparagraph (1) of this paragraph, a leasehold of such property is also section 1245 property under such subdivision. Thus, for example, if A owns personal property which is section 1245 property under subparagraph (1)(i) of this paragraph, and if A leases the personal property to B, B's leasehold is also section 1245

The facts and circumstances of each disposition are considered in determining what is the appropriate item of Code § 1245 property.[1515] Special rules apply to multiple asset accounts.[1516]

However, Code § 1245(a) does not apply to:

- A "disposition by gift."[1517]
- A "transfer at death," except with respect to IRD assets.[1518]
- Certain substituted basis transfers involving business entities under Code § 332, 351,[1519] 361, 721,[1520] or 731.[1521]

> property under such provision. For a further example, if C owns and leases to D for a single lump-sum payment of $100,000 property consisting of land and a fully equipped factory building thereon, and if 40 per cent of the fair market value of such property is properly allocable to section 1245 property, then 40 percent of D's leasehold is also section 1245 property. A leasehold of land is not section 1245 property.

Reg. § 1.1245-3(a)(1)(i), cited in the second sentence above, cross-references Reg. § 1.1245-3(b), which is reproduced in fn. 1510.

[1515] Reg. § [1.1245-1(a)(4), which further provides:

> A taxpayer may treat any number of units of section 1245 property in any particular depreciation account (as defined in § 1.167(a)-7) as one item of section 1245 property as long as it is reasonably clear, from the best estimates obtainable on the basis of all the facts and circumstances, that the amount of gain to which section 1245(a)(1) applies is not less than the total of the gain under section 1245(a)(1) which would be computed separately for each unit. Thus, for example, if 50 units of section 1245 property X, 25 units of section 1245 property Y, and other property are accounted for in one depreciation account, and if each such unit is sold at a gain in one transaction in which the total gain realized on the sale exceeds the sum of the adjustments reflected in the adjusted basis (as defined in paragraph (a)(2) of § 1.1245-2) of each such unit on account of depreciation allowed or allowable for periods after December 31, 1961, all 75 units may be treated as one item of section 1245 property. If, however, 5 such units of section 1245 property Y were sold at a loss, then only 70 of such units (50 of X plus the 20 of Y sold at a gain) may be treated as one item of section 1245 property.

[1516] Reg. § 1.1245-6(c) provides:

> *Normal retirement of asset in multiple asset account*. Section 1245(a)(1) does not require recognition of gain upon normal retirements of section 1245 property in a multiple asset account as long as the taxpayer's method of accounting, as described in paragraph (e)(2) of § 1.167(a)-8 (relating to accounting treatment of asset retirements), does not require recognition of such gain.

[1517] Code § 1245(b)(1).

[1518] Code § 1245(b)(2). Code § 691 sets for the rules for IRD (income in respect of a decedent) assets, generally referring to property with income or gain realized and locked-in before death. See part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

[1519] See part II.M.2 Buying into or Forming a Corporation.

[1520] See part II.M.3 Buying into or Forming a Partnership.

[1521] Code § 1245(b)(3) provides:

> If the basis of property in the hands of a transferee is determined by reference to its basis in the hands of the transferor by reason of the application of section 332, 351, 361, 721, or 731, then the amount of gain taken into account by the transferor under subsection (a)(1) shall not exceed the amount of gain recognized to the transferor on the transfer of such property (determined without regard to this section). Except as provided in paragraph (6) , this paragraph shall not apply to a disposition to an organization (other than a cooperative described in section 521) which is exempt from the tax imposed by this chapter.

Regarding Code § 731, see part II.Q.8.b.i Distribution of Property by a Partnership.

- Like kind exchanges; involuntary conversions, etc., to the extent no gain is recognized and replacement property is qualified.[1522]

"Disposition" includes a sale in a sale-and-leaseback transaction and a transfer upon the foreclosure of a security interest but does not include a mere transfer of title to a creditor upon creation of a security interest or to a debtor upon termination of a security interest.[1523]

Code § 1245 property distributed from a partnership generally retains its Code § 1245 characteristics.[1524] Also, even though property may not be depreciable in the taxpayer's hands, such property may nevertheless be Code § 1245 property if the taxpayer's basis for the property is determined by reference to its basis in the hands of a prior owner of the property and such property was depreciable in the prior owner's hands, or if the taxpayer's basis for the property is determined by reference to the basis of other property that was depreciable in the taxpayer's hands, or if the taxpayer's basis for the property is determined under Code § 1022 and such property was depreciable in the decedent's hands.[1525]

All amortizable Code § 197 intangibles are treated as one Code § 1245 asset, except for loss assets.[1526]

[1522] Code § 1245(b)(4) provides:

> If property is disposed of and gain (determined without regard to this section) is not recognized in whole or in part under section 1031 or 1033 , then the amount of gain taken into account by the transferor under subsection (a)(1) shall not exceed the sum of-
>
> (A) the amount of gain recognized on such disposition (determined without regard to this section), plus
>
> (B) the fair market value of property acquired which is not section 1245 property and which is not taken into account under subparagraph (A).

[1523] Reg. § 1.1245-1(a)(3), which further provides:

> Thus, for example, a disposition occurs upon a sale of property pursuant to a conditional sales contract even though the seller retains legal title to the property for purposes of security but a disposition does not occur when the seller ultimately gives up his security interest following payment by the purchaser.

[1524] See part II.G.6.b Code § 1245 Property. Code § 1245(b)(5), "Property distributed by a partnership to a partner," provides:

> (A) *In general*. For purposes of this section, the basis of section 1245 property distributed by a partnership to a partner shall be deemed to be determined by reference to the adjusted basis of such property to the partnership.
>
> (B) *Adjustments added back*. In the case of any property described in subparagraph (A) , for purposes of computing the recomputed basis of such property the amount of the adjustments added back for periods before the distribution by the partnership shall be-
>
> (i) the amount of the gain to which subsection (a) would have applied if such property had been sold by the partnership immediately before the distribution at its fair market value at such time, reduced by
>
> (ii) the amount of such gain to which section 751(b) applied.

[1525] Reg. § 1.1245-3(3), which continues:

> Thus, for example, if a father uses an automobile in his trade or business during a period after December 31, 1961, and then gives the automobile to his son as a gift for the son's personal use, the automobile is section 1245 property in the hands of the son.

[1526] Code § 1245(b)(8), "Disposition of amortizable section 197 intangibles, provides:

> (A) *In general*. If a taxpayer disposes of more than 1 amortizable section 197 intangible (as defined in section 197(c)) in a transaction or a series of related transactions, all such

Special rules apply to transfers to tax-exempt organization where property will be used in unrelated business[1527] and to transfer of timber.[1528]

Regulations should and do provide for adjustments to the basis of property to reflect gain recognized under Code § 1245(a).[1529]

II.G.7. Deferral or Partial Exclusion of Capital Gains (Even from Investment Assets) Invested in Opportunity Zones

II.G.7.a. Overview of Qualified Opportunity Zones

Code § 1400Z-2(a)(1) provides with respect to any sale or exchange before January 1, 2027:[1530]

> *Treatment of gains*. In the case of gain from the sale to, or exchange with, an unrelated person of any property held by the taxpayer, at the election of the taxpayer -
>
> (A) gross income for the taxable year shall not include so much of such gain as does not exceed the aggregate amount invested by the taxpayer in a qualified opportunity fund during the 180-day period beginning on the date of such sale or exchange,
>
> (B) the amount of gain excluded by subparagraph (A) shall be included in gross income as provided by subsection (b), and

---

amortizable 197 intangibles shall be treated as 1 section 1245 property for purposes of this section.

(B) *Exception*. Subparagraph (A) shall not apply to any amortizable section 197 intangible (as so defined) with respect to which the adjusted basis exceeds the fair market value.

[1527] Code § 1245(b)(6) provides:

(A) *In general*. The second sentence of paragraph (3) shall not apply to a disposition of section 1245 property to an organization described in section 511(a)(2) or 511(b)(2) if, immediately after such disposition, such organization uses such property in an unrelated trade or business (as defined in section 513).

(B) *Later change in use*. If any property with respect to the disposition of which gain is not recognized by reason of subparagraph (A) ceases to be used in an unrelated trade or business of the organization acquiring such property, such organization shall be treated for purposes of this section as having disposed of such property on the date of such cessation.

Fn. 1521 reproduces Code § 1245(b)(3). The point of Code § 1245(b)(6) is to limit Code §1245(a) recapture when property is transferred to certain exempt organizations for use in their exempt functions. Reg. § 1.1245-6(b) provides:

> For limitation on amount of adjustments reflected in adjusted basis of property disposed of by an organization exempt from income taxes (within the meaning of section 501(a)), see paragraph (a)(8) of § 1.1245-2.

[1528] Code § 1245(b)(7) provides:

> In determining, under subsection (a)(2) , the recomputed basis of property with respect to which a deduction under section 194 was allowed for any taxable year, the taxpayer shall not take into account adjustments under section 194 to the extent such adjustments are attributable to the amortizable basis of the taxpayer acquired before the 10th taxable year preceding the taxable year in which gain with respect to the property is recognized.

[1529] Code § 1245(c). Reg. § 1.1245-6(a) cross-references Reg. § 1.1245-5 for the effect on basis.

[1530] Code § 1400Z-2(a)(2) provides that no Code § 1400Z-2(a)(1) election may be made:

(A) with respect to a sale or exchange if an election previously made with respect to such sale or exchange is in effect, or

(B) with respect to any sale or exchange after December 31, 2026.

(C) subsection (c) shall apply.

In other words, the exclusion is only a deferral to the extent that Code § 1400Z-2(b) taxes it. If the taxpayer dies, amounts recognized under Code § 1400Z-2 are includible in gross income as income in respect of a decedent (IRD) if not properly includible in the decedent's gross income.[1531]

Proposed regulations, [REG-115420-18], together with a link to comments, are at https://www.federalregister.gov/documents/2018/10/29/2018-23382/investing-in-qualified-opportunity-funds. ACTEC's comments are at https://www.actec.org/legislative-comments/actec-comments-on-proposed-regulations-on-qualified-opportunity-funds-under-code-section-1400z-2/. Final regulations are at https://www.federalregister.gov/documents/2020/01/13/2019-27846/investing-in-qualified-opportunity-funds.

IRS training, "Opportunity Zones and Qualified Opportunity Funds," is at https://www.irs.gov/pub/newsroom/tcja-training-opportunity-zones-qualfied-opportunity-funds.pdf.

Code § 1400Z-2(b), "Deferral of gain invested in opportunity zone property," provides:

(1) *Year of inclusion*. Gain to which subsection (a)(1)(B) applies shall be included in income in the taxable year which includes the earlier of -

(A) the date on which such investment is sold or exchanged, or

(B) December 31, 2026.

(2) *Amount includible*.

(A) *In general*. The amount of gain included in gross income under subsection (a)(1)(A) shall be the excess of-

(i) the lesser of the amount of gain excluded under paragraph (1) or the fair market value of the investment as determined as of the date described in paragraph (1), over

(ii) the taxpayer's basis in the investment.

(B) *Determination of basis*.

(i) *In general*. Except as otherwise provided in this clause or subsection (c), the taxpayer's basis in the investment shall be zero.

(ii) *Increase for gain recognized under subsection (a)(1)(B)*. The basis in the investment shall be increased by the amount of gain recognized by reason of subsection (a)(1)(B) with respect to such property.

(iii) *Investments held for 5 years*. In the case of any investment held for at least 5 years, the basis of such investment shall be increased by an amount equal

[1531] Code § 1400Z-2(e)(3). See part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.

to 10 percent of the amount of gain deferred by reason of subsection (a)(1)(A).

(iv) *Investments held for 7 years*. In the case of any investment held by the taxpayer for at least 7 years, in addition to any adjustment made under clause (iii), the basis of such property shall be increased by an amount equal to 5 percent of the amount of gain deferred by reason of subsection (a)(1)(A).

Although Code § 1400Z-2(b)(1)(A) refers to when an investment is "sold or exchanged," Reg. § 1.1400Z2(b)-1(c)(3) triggers inclusion of deferred gain when property is transferred by gift or incident to divorce. For more discussion of triggers, see part II.G.7.b Transfers of a Qualified Opportunity Fund (QOF).

Code § 1400Z-2(c), "Special rule for investments held for at least 10 years," provides:

> In the case of any investment held by the taxpayer for at least 10 years and with respect to which the taxpayer makes an election under this clause, the basis of such property shall be equal to the fair market value of such investment on the date that the investment is sold or exchanged.

How do we determine "aggregate amount invested by the taxpayer in a qualified opportunity fund"?

"Qualified opportunity fund" means any investment vehicle organized as a corporation or a partnership for the purpose of investing in qualified opportunity zone property (other than another qualified opportunity fund) that holds at least 90% of its assets in qualified opportunity zone property, determined by the average of the percentage of qualified opportunity zone property held in the fund.[1532] The 90% test is measured on the last day of the first 6-month period of the taxable year of the fund, and on the last day of the taxable year of the fund.[1533]

If a qualified opportunity fund fails to meet the 90% requirement, a penalty applies to the fund or its owners.[1534]

[1532] Code § 1400Z-2(d)(1),

[1533] Code § 1400Z-2(d)(1),

[1534] Code § 1400Z-2(f), "Failure of qualified opportunity fund to maintain investment standard," provides:

(1) *In general*. If a qualified opportunity fund fails to meet the 90-percent requirement of subsection (c)(1), the qualified opportunity fund shall pay a penalty for each month it fails to meet the requirement in an amount equal to the product of -
   (A) the excess of-
      (i) the amount equal to 90 percent of its aggregate assets, over
      (ii) the aggregate amount of qualified opportunity zone property held by the fund, multiplied by
   (B) the underpayment rate established under section 6621(a)(2) for such month.

(2) *Special rule for partnerships*. In the case that the qualified opportunity fund is a partnership, the penalty imposed by paragraph (1) shall be taken into account proportionately as part of the distributive share of each partner of the partnership.

(3) *Reasonable cause exception*. No penalty shall be imposed under this subsection with respect to any failure if it is shown that such failure is due to reasonable cause.

"Qualified opportunity zone property" means qualified opportunity zone stock, a qualified opportunity zone partnership interest, or qualified opportunity zone business property.[1535]

Generally,[1536] the term "qualified opportunity zone stock" means any stock in a domestic corporation if the stock is acquired by the qualified opportunity fund after December 31, 2017, at its original issue (directly or through an underwriter) from the corporation solely in exchange for cash, as of the time that stock was issued, that corporation was a qualified opportunity zone business (or, in the case of a new corporation, that corporation was being organized for purposes of being a qualified opportunity zone business), and during substantially all of the qualified opportunity fund's holding period for such stock, such corporation qualified as a qualified opportunity zone business.[1537]

A "qualified opportunity zone partnership interest" is any capital or profits interest in a domestic partnership if:[1538]

(i) such interest is acquired by the qualified opportunity fund after December 31, 2017, from the partnership solely in exchange for cash,

(ii) as of the time such interest was acquired, such partnership was a qualified opportunity zone business (or, in the case of a new partnership, such partnership was being organized for purposes of being a qualified opportunity zone business), and

(iii) during substantially all of the qualified opportunity fund's holding period for such interest, such partnership qualified as a qualified opportunity zone business.

"Qualified opportunity zone business property" means tangible property used in a trade or business of the qualified opportunity fund if:[1539]

(I) such property was acquired by the qualified opportunity fund by purchase (as defined in section 179(d)(2))[1540] after December 31, 2017,

(II) the original use of such property in the qualified opportunity zone commences with the qualified opportunity fund or the qualified opportunity fund substantially improves the property, and

(III) during substantially all of the qualified opportunity fund's holding period for such property, substantially all of the use of such property was in a qualified opportunity zone.

1535 Code § 1400Z-2(d)(2)(A).
1536 However, Code § 1400Z-2(d)(2)(B)(ii), "Redemptions," provides that a rule similar to the rule of Code § 1202(c)(3) shall apply for purposes of Code § 1400Z-2(d)(2)(B). Code § 1202(c)(3) is described in fns 5220-5232 of part II.Q.7.k.i Rules Governing Exclusion of Gain on the Sale of Certain Stock in a C Corporation.
1537 Code § 1400Z-2(d)(2)(B)(i).
1538 Code § 1400Z-2(d)(2)(C).
1539 Code § 1400Z-2(d)(2)(D)(i).
1540 [footnote not in statute] Code § 1400Z-2(d)(2)(D)(iii) provides that the related person rule of Code § 179(d)(2) is applied pursuant to Code § 1400Z-2(d)(8) of in lieu of the application of such rule in Code § 179(d)(2)(A).

Code § 1400Z-1 provides rules for designating a "qualified opportunity zone." Notices 2018-48 and 2019-42 (7/15/2019) list the population census tracts the Secretary of the Treasury designates as qualified opportunity zones (QOZs).[1541] The IRS' Opportunity Zones Resources are at https://www.cdfifund.gov/Pages/Opportunity-Zones.aspx, including a map of all QOZs.

Property is treated as "substantially improved" by the qualified opportunity fund only if, during any 30-month period beginning after the date of acquisition of that property, additions to basis with respect to the property in the hands of the qualified opportunity fund exceed an amount equal to the adjusted basis of the property at the beginning of that 30-month period in the hands of the qualified opportunity fund.[1542] When a qualified opportunity fund (QOF) invests in real estate in a qualified opportunity zone (QOZ), Rev. Rul. 2018-29 asserts:

(1) If a QOF purchases an existing building located on land that is wholly within a QOZ, the original use of the building in the QOZ is not considered to have commenced with the QOF for purposes of § 1400Z-2(d)(2)(D)(i), and the requirement under § 1400Z-2(d)(2)(D)(i) that the original use of tangible property in the QOZ commence with a QOF is not applicable to the land on which the building is located.

(2) If a QOF purchases a building wholly within a QOZ, under § 1400Z-2(d)(2)(D)(ii) a substantial improvement to the building is measured by the QOF's additions to the adjusted basis of the building.

(3) Under § 1400Z-2(d), measuring a substantial improvement to the building by additions to the QOF's adjusted basis of the building does not require the QOF to separately substantially improve the land upon which the building is located.

Letter Ruling 202324008 granted an extension of time "to file an amended return, or an Administrative Adjustment Request (whichever is appropriate) for Year 1, to make the election under section 1400Z-2 and section 1.1400Z2(d)-1(a)(2)(i)" on Form 8996 to self-certify as a QOF.

A "qualified opportunity zone business" [1543] is a trade or business in which substantially all of the tangible property owned or leased by the taxpayer is qualified opportunity zone business property,[1544] which satisfies certain definitional requirements of "qualified business entity" under the enterprise zone rules, and which is not a sinful business.[1545] In the prior sentence, tangible property that ceases to be a qualified opportunity zone business property continues to be treated as a qualified opportunity zone business property for the lesser of (i)5 years after the

---

[1541] IRS summary: "Notice 2019-42 amplifies Notice 2018-48, 2018-28 I.R.B. 9, which lists the population census tracts that the Secretary of the Treasury designated as qualified opportunity zones. Specifically, this notice adds two additional census tracts in Puerto Rico that have been designated as qualified opportunity zones under § 1400Z-1(b)(3) of the Internal Revenue Code."
[1542] Code § 1400Z-2(d)(2)(D)(ii).
[1543] Code § 1400Z-2(d)(3)(A).
[1544] Determined by substituting "qualified opportunity zone business" for "qualified opportunity fund" each place it appears in Code § 1400Z-2(d)(2)(D).
[1545] Code § 1400Z-2(d)(3)(A)(iii) refers to Code § 144(c)(6)(B), which requires that "no portion of the proceeds of such issue is to be used to provide (including the provision of land for) any private or commercial golf course, country club, massage parlor, hot tub facility, suntan facility, racetrack or other facility used for gambling, or any store the principal business of which is the sale of alcoholic beverages for consumption off premises."

date on which that tangible property ceases to be so qualified, or (ii) the date on which that tangible property is no longer held by the qualified opportunity zone business.[1546]

If only a portion of any investment in a qualified opportunity fund consists of investments of gain to which a Code § 1400Z-2(a) election is in effect, then that investment is treated as two separate investments, consisting of one investment that only includes amounts to which the Code § 1400Z-2(a) election applies (to which Code § 1400Z-2(a), (b) and (c) apply), and a separate investment consisting of other amounts to which Code § 1400Z-2 does not apply.[1547]

In applying Code § 1400Z-2, persons are related to each other if such persons are described in Code § 267(b)[1548] or 707(b)(1),[1549] determined by substituting 20% for 50% each place it occurs there.

Part C, "Economic Analysis," of T.D. 9889 (1/17/2020) explains:

> **4. Economic Effects of Provisions Substantially Revised From the Proposed Regulations**
>
> **a. Eligible Gains From Section 1231 Property**
>
> The final regulations provide that a gain is eligible for deferral under section 1400Z-2(a) if the gain is treated as a capital gain for Federal income tax purposes. There is uncertainty, however, regarding how to treat gains arising from selling section 1231 property. Section 1231 property is certain property used in a trade or business, such as depreciable property and land, and also includes capital assets subject to an involuntary conversion, such as arising from a natural disaster or theft. Under the Code, gains from the sale or exchange of section 1231 property are characterized as capital gains if the sum of all section 1231 transactions for the taxable year is positive. If the sum of all section 1231 transactions for the year is negative, then the losses are ordinary losses.[1]
>
> [1] One source of ambiguity is determining whether gain from selling an item of section 1231 property that is potentially eligible for deferral should be included in the summation of 1231 property in the year the deferral begins or the year the deferral ends.
>
> The Treasury Department and the IRS considered two main options for the treatment of gains from section 1231 property.[2] The primary issue is whether the amount of the gains eligible for deferral is based on the sum of all sales over the taxable year or on an item-by-item basis. These approaches are also referred to as the net approach and gross approach, respectively.
>
> [2] The Treasury Department and the IRS also considered the option of not issuing specific guidance on this topic but determined that this was clearly inferior to the two main options.

[1546] Code § 1400Z-2(d)(3)(B).
[1547] Code § 1400Z-2(e)(1).
[1548] Code § 267(b) is described in part II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses.
[1549] Code § 707(b) is described in part II.Q.8.c Related Party Sales of Non-Capital Assets by or to Partnerships.

The statute also sets a 180-day requirement for investment in a QOF beginning on the date of the sale or exchange generating the gain, to be eligible for deferral under section 1400Z-2(a). The two options for calculating eligible section 1231 gains further determine when the 180-day requirement begins. When gains are based on the sum of sales over the taxable year, the 180-day period starts at the end of the taxable year, after it is determined whether the sum is positive or negative, and how large the net positive gain is. When gains are counted item-by-item, it is possible, although not necessary, to start the 180-day period from the date of each sale.

The proposed regulations used the net approach. Under the proposed regulations, the only gain arising from section 1231 property eligible for deferral under section 1400Z-2(a) was the amount by which the gains arising from all of a taxpayer's section 1231 property exceeded all of the taxpayer's losses from section 1231 property for a taxable year. In addition, the proposed regulations provided that the 180-day period for investment with respect to capital gain net income from section 1231 property for a taxable year began on the last day of the taxable year without regard to the date of any particular disposition of section 1231 property.

The final regulations adopt the gross approach. Under the final regulations, eligible section 1231 gains are determined on an item-by-item basis and therefore positive gains are not reduced by section 1231 losses. Furthermore, the amount of the gain is known at the time of each sale so it is not necessary for the taxpayer to wait until the end of the taxable year to determine whether any positive section 1231 sales will be offset by losses. As a consequence, the final regulations further provide that the 180-day period for investing an amount with respect to an eligible section 1231 gain for which a deferral election has been made begins on the date of the sale or exchange that gives rise to the section 1231 gain. In addition, the final regulations do not determine the character of eligible section 1231 gains, other than as gains arising from the sale or exchange of section 1231 property, until the taxable year such gains are taken into account in computing gross income pursuant to section 1231(a)(4). The treatment of section 1231 property under the gross option is essentially the same treatment provided in the final regulations for gain arising from the sale of a capital asset as defined by section 1221.

To illustrate this discussion, suppose that Corporation A sells two pieces of section 1231 property during the taxable year, one for a $100 gain early in its taxable year and the other for a $30 loss later in its taxable year. Suppose that Corporation B also sells two pieces of section 1231 property during the taxable year, one for a $20 gain, the other for a $50 loss. Neither taxpayer realizes any other capital gain during the taxable year.

Under the net approach, Corporation A's net gain is $70, which is positive. Thus, it would be able to defer up to $70 in capital gain by investing in a QOF. Corporation B has a net loss from selling section 1231 property. This net loss would be treated as ordinary and no gains would be deferrable under section 1400Z-2(a). Furthermore, although Corporation A sells the first piece of property for a gain early in its taxable year, it would not be able to make a qualifying investment in a QOF until the last day of the taxable year, because it needs to wait until the end of the tax year to determine whether it is eligible to defer any of the gain.

Under the gross approach, only the gains need to be accounted for. Corporation A would be able to defer $100 in gain and Corporation B would be able to defer $20. In this case, the amount of gain eligible for deferral increases for both taxpayers. The total amount of gain eligible for deferral increases from $70 to $120 compared to the net approach.

Although not determinative, we note that the gross approach, as adopted under the final regulations, will generally expand the pool of gains eligible for deferral under section 1400Z-2(a) relative to the net approach specified under the proposed regulations.[3] Based on recent taxpayer records, the Treasury Department and the IRS estimate that the gross option may increase the amount of eligible gains by four to eight percent compared to the net option. The increase in potentially eligible gains overstates the likely increase in investment in QOFs resulting from using the gross approach (rather than the net approach) for two different reasons. First, for many taxpayers, the amount of section 1231 gains is not likely to be a binding constraint on the amount of investment made by the taxpayer into a QOF because of the ability of the taxpayer to defer other sources of capital gains. Second, taxpayers have considerable discretion over when to realize gains, and even under the net approach taxpayers could often plan on selling section 1231 property with sufficient net gain in a taxable year to cover the amount of desired QOF investment. The Treasury Department and the IRS have not attempted to estimate the overall effect of this provision of the final regulations (relative to the proposed regulations) on either QOZ or non-QOZ investment.

[3] For a given set of section 1231 sales, positive gains for each individual taxpayer will never be lower under the gross approach than the net approach; this result follows from mathematical principles and is not specific to this example. In practice, taxpayers might choose to recognize gains differently under the two approaches. This difference complicates any projection of actual gains that would be eligible for deferral.

An additional effect of the gross option would be to minimize the tax considerations of determining the best time to sell section 1231 property, leading to a more efficient use of resources. Under the gross option, taxpayers would be less likely to delay or rush selling section 1231 property in order to achieve the desired amount of net gain that would be eligible for deferral within a particular year. Also, under the gross option, taxpayers would have more flexibility in realizing gains eligible to be invested in a QOF in calendar year 2019.

The Treasury Department and the IRS considered several variations to these two primary options. For example, one intermediate option would have required taxpayers to wait to determine the capital gain character of section 1231 property sales until summing at the end of the taxable year, but then allow the gross amount of gains to be eligible for deferral if the net is positive. Under this intermediate option, Corporation A would be eligible to defer $100 in gain, while Corporation B would not be able to defer any amount. The pool of eligible gains would be greater than under the net option, but less than the gross option. This intermediate option would also have the costs similar to the net option regarding the need for taxpayers to wait to until the end of the taxable year before investing in a QOF.

The number of taxpayers expected to be affected by this aspect of the final regulations ranges between 36,000 and 80,000 investors in QOFs.

b. Sales or Exchanges of Property by QOF Partnerships and QOF S Corporations

The Treasury Department and the IRS considered three options for how owners of QOF partnerships and QOF S corporations may exclude gains from tax on qualifying investments in the QOF held longer than 10 years. First, the Treasury Department and the IRS considered not providing a specialized rule for QOF partnerships and QOF S corporations. Under this option, owners of a QOF would need to sell or exchange their QOF ownership interest to another party in order to receive the exemption from tax on the gain. For certain business structures, this would not be the most efficient way to dispose of the assets of the QOF. For example, suppose QOF A has 20 partners and QOF A owns two commercial buildings that are qualified opportunity zone business property. If another investor B would like to purchase one of the buildings, it would generally be easier for QOF A to sell the building to investor B directly, rather than investor B buying out the partnership interests of several or all of the partners of QOF A. Under this first option, the owners of QOF A would only receive tax free gain from their investment if they are able to find an investor willing to buy their partnership interests in QOF A. This option would likely lead to relatively high negotiating costs and may reduce the pool of potential buyers for QOF assets.

Second, the May 2019 proposed regulations proposed that investors in a QOF partnership or a QOF S corporation could elect to exclude capital gains arising from the QOF selling qualified opportunity zone property from gross income. This option would provide a simpler way for owners of pass-through QOFs to receive tax-free gain, but it would apply only in certain cases. It would apply only to capital gains and not ordinary gains, such as the recapture of depreciation deductions. Also, this option would apply only to QOFs selling qualified opportunity zone property, and would not apply to qualified opportunity zone business property sold by a qualified opportunity zone business that is a subsidiary of the QOF.

Third, the final regulations allow QOF owners to elect to exclude from gross income all gains and losses of a QOF partnership or QOF S corporation (except those deriving from sales of inventory in the ordinary course of business). This would allow the gains from the sale of qualified opportunity zone business property by a qualified opportunity zone business to flow through to the owners of the QOF as excluded from income. This election can be made on an annual basis, but it must apply to all gains and losses of the QOF partnership or QOF S corporation for that taxable year. In addition, when the proceeds from the asset sales are reinvested, rather than distributed as cash, then the QOF owner’s share of the qualifying investment is reduced as the reinvested amount is deemed to be a non-qualifying investment.

These rules generally match the tax treatment that would exist for an owner of a QOF partnership or QOF S corporation after selling a qualifying investment in the QOF after it has been held at least 10 years, but would avoid the extra costs associated with negotiating the selling price of the interest in the QOF, rather than the underlying assets owned by the QOF or qualified opportunity zone business. The Treasury Department and the IRS project that this approach will lead to a reduction in transactions costs for taxpayers relative to alternative approaches (the no-action baseline and the proposed regulations), and will continue to treat similar taxpayers similarly. The number of taxpayers expected to be affected by this rule ranges between 5,000 and 11,500 QOFs, and 50,000 to 115,000 investors in QOFs.

c. Substantial Improvement of Qualified Opportunity Zone Business Property

Section 1400Z-2(d)(2)(D) requires that if tangible property was already used in a QOZ (non-original use asset) when purchased by a QOF or qualified opportunity zone business, then it needs to be substantially improved by the QOF or qualified opportunity zone business before it can become qualified opportunity zone business property. Substantial improvement, as defined by section 1400Z-2(d)(2)(D)(ii), requires the QOF or qualified opportunity zone business to more than double the adjusted basis of the property within 30 months after acquiring the property. The Treasury Department and the IRS considered two options for how to measure substantial improvement.

First, the proposed regulations provided an asset-by-asset approach. This option would require each property to be substantially improved in order to become qualified opportunity zone business property. For example, if a QOF purchases an existing commercial building, a separate determination for each piece of tangible property associated with the building would be needed, such as the structure itself, and every item of furniture and equipment within the building that is not part of the building structure.

This approach would limit the ability of taxpayers to purchase property already used within a QOZ, place that property in service in the taxpayer's business with little improvement from the previous owner, and have the property be qualified opportunity zone business property. This option would also likely encourage the purchase and substantial improvement of existing property with low existing basis; that is, property where it is easier for improvement expenditures to double the existing basis. Such properties are more likely to be older and more in need of repair and upgrades.

Second, the final regulations allow taxpayers to use an asset-by-asset approach (as provided in the proposed regulations) or a more aggregative approach. The final regulations allow purchased original use property to count towards the determination of whether non-original use property has been substantially improved if such purchased original use property improves the functionality of the non-original use property along with other conditions. Also, certain betterment expenses, such as environmental remediation or utility upgrades, which are properly chargeable to the basis of the land, may be added to the basis of a building on the land that was non-original use property for the purpose of calculating substantial improvement of that building. These rules in effect expand the definition of what expenses could be considered improvements for a particular asset. In some cases, this option could reduce compliance costs for taxpayers, as it is not always clear under the Code and regulations when expenditures should be considered an improvement of an existing property, for example a building, or be considered separate depreciable property.

These rules will make it easier for purchased non-original use property to be substantially improved compared to the proposed regulations. This will help to smooth the cliff effect that occurs with the statutory requirement that improvements need to more than double the cost basis. For example, suppose a QOF purchases a non-original use building in a QOZ for $1 million, makes $950,000 in improvements to the building that bring that building into good condition for that local market, and purchases $50,001 of furniture or equipment for use within the building. This building would not meet the substantial improvement test under the proposed regulations but it would meet it under the final regulations.

In addition, the final regulations allow a QOF or qualified opportunity zone business to aggregate multiple buildings into a single property for purposes of the substantial improvement test. The buildings must either be entirely located within a parcel of land described in a single deed, or the buildings may be on contiguous parcels of land with separate deeds if certain conditions are met that indicate the buildings are related in management or use.

This rule would expand the number of existing buildings in a QOZ that could be purchased by a QOF or a qualified opportunity zone business and be deemed to have met the substantial improvement test relative to the first option. For example, one expensive renovation project would provide excess “improvement expenses” that could be applied to other buildings. This increases the likelihood that certain substantial renovation projects would be undertaken. However, the ability to aggregate improvement of non-original use property could effectively allow a QOF or qualified opportunity zone business to purchase property already fully in use in a QOZ and count it as qualified opportunity zone business property, though use by the new owner would be qualitatively similar to the previous owner.

In summary, the Treasury Department and the IRS considered two primary options for how much aggregation to allow when determining whether purchased non-original use property satisfied the substantial improvement test. The different options would likely have different effects on the amount and distribution of non-original use property purchased by QOFs and qualified opportunity zone businesses. The proposed regulations would not allow any aggregation, and instead require each of the assets purchased under this option to receive substantial improvement. This would focus improvement expenditures on properties most in need of considerable rehabilitation to remain productive.

The final regulations allow aggregation, and will likely encourage the purchase and improvement of more non-original use property compared to the proposed regulations. The final regulations will also likely lead to a broader mix of properties purchased and improved relative to the first option. However, the final regulations also increase the likelihood that some buildings will meet the substantial improvement test when the individual building receives little to moderate improvements. Overall, the rules provided in the final regulations make it easier for a non-original use property to be substantially improved relative to the proposed regulations, which will encourage more investment through QOFs.

The Treasury Department and the IRS project that the number of taxpayers expected to be affected by this rule ranges between 5,500 and 12,000 QOFs plus 6,000 to 15,000 qualified opportunity zone businesses.

d. Vacancy

Property that is eligible for opportunity zone treatment must be “original use” or substantially improved. This statutory language leaves open the question of the conditions under which vacant property that is developed and used by an opportunity zone business might count as original use.[4] The Treasury Department and the IRS considered options of one, three, or five years for how long existing property located in a QOZ must be vacant before the purchase of such property would allow it to be considered original use property. The May 2019 proposed regulations proposed that property would need to be vacant for at least five years prior to the purchase by a QOF or qualified opportunity zone business in order to satisfy the original use requirement under section 1400Z-2(d)(2)(D)(i)(II).

[4] The Treasury Department and the IRS also considered taking no action but determined that providing a definition of vacancy and setting a time period for when vacant property could be purchased and considered original use property would be beneficial relative to providing no specific guidance.

In selecting among these options, the Treasury Department and the IRS recognize that vacant property is an underused resource to the owner and potential users of the property, and can lower the value and use of neighboring property. The Treasury Department and the IRS further recognize that property could become vacant due to economic reasons unrelated to section 1400Z-2, but also because the owner strategically let the property become or stay vacant in expectation that the property would have a higher resale value if it were eligible to be original use property under section 1400Z-2(d)(2)(D)(i)(II).

A shorter period of required vacancy provides a greater incentive for owners of vacant property to keep it vacant for purposes of later selling it for use as original use property. This incentive may also result in owners vacating property that is currently occupied. On the other hand, a longer period of required vacancy means that on average properties would remain vacant for a longer period before being sold and put into productive use, which would increase the likelihood that such property (and possibly surrounding property) would be inefficiently used.

The final regulations provide that the required time of vacancy is three years except for property that was vacant as of the date of publication of the QOZ designation notice in which the designation of the QOZ is listed, in which case the vacancy period is one year. This one-year period for vacant property at the time of designation provides an incentive for property that was vacant for economic reasons at the time of publication of the QOZ designation notice to be quickly placed back into service through sale to a new owner, thus reducing the social costs that would occur if those properties remained unused, relative to the longer three-year period. The three-year period for property that was not initially vacant makes it costly for owners to strategically limit the use of the property in order to gain a more favorable condition for selling the property in the future, relative to a shorter period. The Treasury Department and the IRS recognize, however, that even under this three-year specification, there may be situations where a property becomes vacant for a period of time due to economic reasons and the owner of that property decides to let the property remain vacant in order to receive an expected higher price upon selling after the three-year vacancy period is met.

The number of taxpayers expected to be affected by this rule ranges between 5,500 and 12,000 QOFs plus 6,000 to 15,000 qualified opportunity zone businesses.

e. Subsidiary of a Consolidated Group

The statute is silent regarding the treatment of corporate taxpayers that file consolidated returns and seek to invest in a QOF. The Treasury Department and the IRS considered two options to address this issue. Under the proposed regulations a consolidated group could invest in a corporate QOF only if the QOF would not be treated as part of the consolidated group for tax filing purposes. That is, a QOF could not be a subsidiary of a consolidated group, because of concerns of potential conflicts between the section 1400Z-2 rules and the consolidated group rules in § 1.1502. Under this approach, the gains and losses of a corporate QOF would not be shared with the consolidated group owning the QOF when determining aggregate tax liability of the consolidated group, but rather the QOF would file its own tax return, leading to a small increase in compliance burden.

This treatment could affect the choice of QOF entity for a consolidated corporate group that wanted to own a QOF, making a partnership QOF a more likely choice as tax attributes of the partnership QOF (income, deductions, credits, etc.) would flow to the member of the consolidated corporate group that owns the QOF. Sharing those tax attributes of a partnership QOF with other members of the group is subject to certain limitations. However, if the QOF is a corporate subsidiary member of the consolidated group, there is more flexibility with how tax attributes of the QOF are shared with the rest of the consolidated group. In addition, some corporate consolidated groups are likely to favor a using a corporate form due to familiarity with the corporate rules that would lead to lower organizational costs. These additional organizational or tax compliance costs are not likely to be large, but nevertheless may discourage investment in QOFs for some consolidated groups.

Therefore, the final regulations permit corporate taxpayers filing consolidated returns to own a QOF that is a subsidiary member of the consolidated group; and, as provided in the proposed regulations, a corporate QOF may be the parent member of a consolidated group. This option will reduce the limitations on the organizational structure of QOF investments that would have occurred under the proposed regulations. The final regulations permit the consolidation of a subsidiary QOF corporation only if certain conditions are satisfied. Specifically, except in very limited circumstances, the group member making the qualifying investment in the QOF member (investor member) must maintain direct equity interest of the QOF member stock. More importantly, all investor members must be wholly owned, directly or indirectly, by the common parent of the group. The final regulations also provide special rules to govern the treatment of an investment of eligible gain in the subsidiary QOF in order not to conflict with the consolidated return rules found in § 1.1502. However, these rules are not expected to be overly burdensome, because the choice of establishing the QOF as a subsidiary member of the consolidate group are elective; taxpayers would not choose to consolidate a corporate QOF subsidiary unless the benefits to the taxpayer were greater than the costs.

One drawback to allowing QOFs to be part of subsidiary member of a consolidated group is that there would be less information available regarding taxable income and loss of the QOF and its subsidiary qualified opportunity zone businesses, as that information will be reported as part of the aggregated income and deductions of the parent on the consolidated tax return.

The number of taxpayers expected to be affected by these rules ranges between 25 and 500.

5. Economic Effects of Provisions Not Substantially Revised From the Proposed Regulations

a. Definition of Substantially All

There are five uses of the term “substantially all” in section 1400Z-2 but the statute is ambiguous regarding the precise meaning of this term. The final regulations establish thresholds for all five uses of this term. The final regulations provide that “substantially all” means at least 90 percent with regard to the three holding period requirements in section 1400Z-2(d)(2) and at least 70 percent with regard to section 1400Z-2(d)(3)(A)(i) and in the context of “use” in section 1400Z-2(d)(2)(D)(i)(III). The Treasury Department and the IRS have not attempted to assess how taxpayers would have interpreted these terms in the absence of specific guidance and therefore have not projected whether these regulations will increase or decrease investment in QOZs or non-QOZ’s relative to regulatory alternatives.

In choosing what values to assign to the substantially all terms, the Treasury Department and the IRS considered the economic consequences of setting the thresholds higher or lower. Setting the threshold higher would reduce investment in QOFs but would increase the percentage of that investment that would be located within a QOZ. One reason why a higher threshold would reduce overall investment in QOFs is that it will be more difficult for businesses with diverse operations and/or multiple locations to satisfy the threshold. Setting the threshold lower would increase investment in QOFs but reduce the percentage of that investment that is located within a QOZ.

A lower threshold would further increase the likelihood that a taxpayer may receive the benefit of the preferential treatment on capital gains without placing in service more tangible property within a QOZ than would have occurred in the absence of section 1400Z-2. This effect would be magnified by the way the different requirements in section 1400Z-2 interact. For example, these final regulations imply that, in certain limited fact patterns, a QOF could satisfy the substantially all standards with as little as 40 percent of the tangible property effectively owned by the fund being used within a QOZ. This could occur if 90 percent of QOF assets are invested in a qualified opportunity zone business, in which 70 percent of the tangible assets of that business are qualified opportunity zone business property; and if, in addition, the qualified opportunity zone business property is only 70 percent in use within a QOZ, and for 90 percent of the holding period for such property. Multiplying these shares together (0.9 x 0.7 x 0.7 x 0.9 = 0.4) generates the result that a QOF could satisfy the requirements of section 1400Z-2 under the final regulations with just 40 percent of its assets effectively in use within a QOZ.

The Treasury Department and the IRS have not undertaken quantitative estimates of the volume of investment that would be placed in QOZs under the different thresholds for “substantially all” because we do not have data or models that can predict spatial patterns of investment with reasonable precision. The Treasury Department and the IRS further recognize that the specified thresholds may indirectly affect investment outside of QOZs; we have likewise not undertaken quantitative estimates of this investment effect.

The Treasury Department and the IRS have determined that the substantially all thresholds provided in the final regulations represent an appropriate balance between the ability of investors in QOFs to receive preferential capital gains treatment only for placing a consequential amount of tangible property (used in the underlying business) within a QOZ, and the flexibility provided to business operations so as not to significantly distort the types of businesses that can qualify for opportunity zone funds.

b. Treatment of Leased Property

The Treasury Department and the IRS have determined that leased property that is located in a QOZ may be treated as qualified opportunity zone business property under certain conditions. This determination means, effectively, that the value of leased property should be included in both in the numerator and the denominator of the 90-percent investment standard and the substantially all tests.[5] We project that the inclusion of leased property will enhance the efficiency of business decisions compared to other available regulatory options because leasing is a common business practice and because business decisions would be distorted if otherwise similar property (owned versus leased) were treated differently.

[5] Under the statute, the value of leased property is included in the denominator of the substantially all test. The statute is ambiguous, however, as to whether leased property should be included in the numerator.

This treatment of leased property is efficiency-enhancing (compared to alternative treatments) because of other features of the statute. For example, a start-up business that leased office space within a QOZ and owned tangible property in the form of computers and other office equipment would likely fail the substantially all test (if the office space is sufficiently valuable relative to the other tangible property) because the leased property is included in the denominator of the substantially all test; this failure to satisfy the substantially all test would occur despite all of this business's operations being located within a QOZ. This possibility may lead the business to purchase rather than lease its office property, a decision that significantly changes the nature of the business's risk and expenses.

The Treasury Department and the IRS recognize that the treatment of leased property as qualified opportunity zone business property may weaken the incentive for taxpayers to construct new real property or renovate existing real property within a QOZ, as taxpayers would be able to lease existing real property in a zone without improving it and thereby become a qualified opportunity zone business (assuming the other conditions of the statute were met). However, allowing the leasing of existing real property within a zone may encourage fuller utilization and improvement of such property and limit the abandonment or destruction of existing productive property within a QOZ when new tax-favored real property becomes available.

In summary, the Treasury Department and the IRS project that the inclusion of leased property in both the numerator and the denominator of the 90-percent investment standard and the substantially all test will increase economic activity within QOZs relative to alternative decisions including the no-action baseline. This provision will reduce potential distortions between owned and leased property that may occur under other options.

c. Valuation of Property

The final regulations provide taxpayers with a choice between two methods for determining the asset values for purposes of the 90-percent investment standard in section 1400Z-2(d)(1) for QOFs or the value of tangible property for the substantially all test in section 1400Z-2(d)(3)(A)(i) for qualified opportunity zone businesses. Under the first method (applicable financial statement valuation method), the taxpayer values owned or leased property as reported on its applicable financial statement for the reporting period. Under the alternative valuation method, the taxpayer sets the value of owned property equal to the unadjusted cost basis of the property under section 1012. The final regulations specify that the value of leased property under the alternative method equals the present value of total lease payments at the beginning of the lease. The value of the property under the alternative method for the 90-percent investment standard and substantially all test does not change over time as long as the taxpayer continues to own or lease the property.

The Treasury Department and the IRS project that the two methods will, in the majority of cases, provide similar values for leased property at the time that the lease begins because, as beginning in 2019, generally accepted accounting principles (GAAP) require public companies to calculate the present value of lease payments in order to recognize the value of leased assets on the balance sheet. However, there are situations in which the two methods may differ in the value they assign to leased property. On financial statements, the value of the leased property declines over the term of the lease. Under the alternative method, the value of the leased asset is calculated once at the beginning of the lease term and remains constant while the term of the lease is still in effect. This difference in valuation of property over time between using financial statements and the alternative method also exists for owned property. In addition, the two approaches would generally apply different discount rates, thus leading to some difference in the calculated present value under the two methods.

The Treasury Department and the IRS provide the alternative method to allow for taxpayers that either do not have applicable financial statements or do not have them available in time for the asset tests. In addition, the alternative method is simpler, thus reducing compliance costs, and provides greater certainty in projecting future compliance with the 90-percent investment standard and the substantially all test. Thus, even some taxpayers with applicable financial statements may choose to use the alternative method. One drawback to the alternative method is that it is less likely to provide accurate asset valuation over time because it does not account for depreciation or other items that may affect the value of assets after the time of purchase, and, over time, the values used for the sake of the 90-percent investment standard and the substantially all test may diverge from the actual value of the property.

Because this provision provides an election to taxpayers, the Treasury Department and the IRS project that this provision will slightly increase investment in QOFs, relative to not providing an election. The Treasury Department and the IRS have not estimated the proportion of taxpayers likely to use the alternative method nor the volume of increased investment in QOFs relative to not providing an election.

d. Gross Income Requirement of Section 1397C(b)(2)

Section 1400Z-2(d)(3)(A)(ii) incorporates the requirement of section 1397C(b)(2) that a qualified business entity must derive at least 50 percent of its total gross income during a taxable year from the active conduct of a qualified business in a zone. The final regulations provide multiple safe harbors for determining whether this standard has been satisfied.

Two of these safe harbors provide that the 50 percent of gross income standard would be satisfied if the majority of the labor input of the trade or business is located within a QOZ and provide two different methods for measuring the labor input of the trade or business. The labor input can be measured in terms of hours (hours performed test) or compensation paid (amounts paid test) of employees, independent contractors, and employees of independent contractors for the trade or business. The final regulations clarify that guaranteed payments to partners in a partnership for services provided to the trade or business are also included in the amounts paid test. The final regulations provide that if at least 50 percent of the labor input of the trade or business is located within a QOZ (as measured by one of the two provided approaches), then the section 1397C(b)(2) requirement is satisfied.

In addition, a third safe harbor (business functions test) provides that the 50-percent gross income requirement is met if the tangible property of the trade or business located in a QOZ and the management or operational functions performed in the QOZ are each necessary for the generation of at least 50 percent of the gross income of the trade or business.

The determination of the location of income for businesses that operate in multiple jurisdictions can be complex, and the rules promulgated by taxing authorities to determine the location of income are often burdensome and may distort economic activity. The provision of alternative safe harbors in the final regulations should reduce the compliance and administrative burdens associated with determining whether this statutory requirement has been met. In the absence of such safe harbors, some taxpayers may interpret the 50 percent of gross income standard to require that a majority of the sales of the entity must be located within a zone. The Treasury Department and the IRS have determined that a standard based strictly on sales would discriminate against some types of businesses (for example, manufacturing) in which the location of sales is often different from the location of the production, and thus would preclude such businesses from benefitting from the incentives provided in section 1400Z-2. Furthermore, the potential distortions introduced by the provided safe harbors would increase incentives to locate labor inputs within a QOZ. To the extent that such distortions exist, they further the statutory goal of encouraging economic activity within QOZs. Given the flexibility provided to taxpayers in choosing a safe harbor, other distortions, such as to business organizational structuring, are likely to be minimal.

e. Working Capital Safe Harbor

Section 1400Z-2 contains several rules limiting taxpayers from benefitting from the deferral and exclusion of capital gains from income offered by that section without also locating investment within a QOZ. The final regulations clarify the rules related to nonqualified financial property and what amounts can be held in cash and cash equivalents as working capital. A qualified opportunity zone business is subject to the requirements of section 1397C(b)(8), that less than 5 percent of the aggregate adjusted basis of the entity is attributable to nonqualified financial property. The final regulations establish a working capital safe harbor consistent with section 1397C(e)(1), under which a qualified opportunity zone business may hold cash or cash equivalents for a period not longer than 31 months and not violate section 1397C(b)(8). The final regulations also provide that qualified opportunity zone businesses may utilize multiple working capital safe harbors, provided that each one satisfies all of the conditions of the safe harbor provided in the final regulations. In the case where multiple working capital safe harbors applies to the same unit of tangible property, then total length of time the working capital safe harbor may last is 62 months.

The Treasury Department and the IRS expect that the establishment of the working capital safe harbors under these parameters will provide net economic benefits. Without specification of the working capital safe harbor, some taxpayers would not invest in a QOF for fear that the QOF would not be able to deploy the funds soon enough to satisfy the 90-percent asset test. Thus, this rule would generally encourage investment in QOFs by providing greater specificity to how an entity may consistently satisfy the statutory requirements for maintaining a QOF without penalty.

A longer or a shorter period could have been chosen for the working capital safe harbor. A shorter time period would minimize the ability of taxpayers to use the investment in a QOF as a way to lower taxes without actually investing in tangible assets within a QOZ, but taxpayers may also forego legitimate investments within an opportunity zone out of concern of not being able to deploy the working capital fast enough to meet the requirements. A longer period would have the opposite effects. Taxpayers could potentially invest in a QOF and receive the benefits of the tax incentive for multiple years before the money is invested into a QOZ.

f. QOF Reinvestment Rule

The final regulations provide that a QOF has 12 months from the time of the sale or disposition of qualified opportunity zone property or the return of capital from investments in qualified opportunity zone stock or qualified opportunity zone partnership interests to reinvest the proceeds in other qualified opportunity zone property before the proceeds would not be considered qualified opportunity zone property with regards to the 90-percent investment standard. This rule provides clarity and gives substantial flexibility to taxpayers in satisfying the 90-percent investment standard. The Treasury Department and the IRS have not projected the effect of this rule on the volume of investment held by QOFs compared to a no action baseline.

g. Clarity Regarding Electing Post-10-Year Gain Exclusion if Zone Designation Expires

The final regulations specify in § 1.1400Z2(c)-1 that expiration of a zone designation would not impair the ability of a taxpayer to elect the exclusion from gains for investments held for at least 10 years, provided the disposition of the investment occurs prior to January 1, 2048. The Treasury Department and the IRS considered four alternatives regarding the interaction between the expiration of the designated zones and the election to exclude gain for investments held more than 10 years. A discussion of the economic effects of the four options follows.

(i) Remaining Silent on Electing Post-10-Year Gain Exclusion

The first alternative would be for the final regulations to remain silent on this issue. Section 1400Z-2(c) permits a taxpayer to increase the basis in the property held in a QOF longer than 10 years to be equal to the fair market value of that property on the date that the investment is sold or exchanged, thus excluding post-acquisition capital gain on the investment from tax. However, the statutory expiration of the designation of QOZs on December 31, 2028, makes it unclear to what extent investments in a QOF made after 2018 would qualify for this exclusion.

In absence of the guidance provided in the final regulations, some taxpayers may have believed that only investments in a QOF made prior to January 1, 2019, would be eligible for the exclusion from gain if held greater than 10 years. Such taxpayers may have rushed to complete transactions within 2018, while others may choose to hold off indefinitely from investing in a QOF until they received clarity on the availability of the 10-year exclusion from gain for investments made later than 2018. Other taxpayers may have planned to invest in a QOF after 2018 with the expectation that future regulations would be provided or the statute would be amended to make it clear that dispositions of assets within a QOF after 2028 would be eligible for exclusion if held longer than 10 years. The ambiguity of the statute would likely lead to uneven response by different taxpayers, dependent on the taxpayer's interpretation of the statute, which may lead to an inefficient allocation of investment across QOZs.

(ii) Providing a Clear Deadline for Electing Post-10-Year Gain Exclusion

The alternative adopted by the final regulations clarifies that as long as the investment in the QOF was made with funds subject to a proper deferral election under section 1400Z-2(a), then the 10-year gain exclusion election is allowed as long as the disposition of the investment occurs before January 1, 2048. This rule would provide certainty to taxpayers regarding the timing of investments eligible for the 10-year gain exclusion. Taxpayers would have a more uniform understanding of what transactions would be eligible for the favorable treatment on capital gains. This would help taxpayers determine which investments provide a sufficient return to compensate for the extra costs and risks of investing in a QOF. This rule would likely lead to an increase in investment within QOFs compared the final regulations remaining silent on this issue.

However, setting a fixed date for the disposition of eligible QOFs investments could introduce economic inefficiencies. Some taxpayers might dispose of their investment in a QOF by the deadline in the proposed regulation primarily in order to receive the benefit of the gain exclusion, even if that selling date is not optimal for the taxpayer in terms of the portfolio of assets that the taxpayer could have chosen to invest in were there no deadline. Setting a fixed deadline may also generate an overall decline in asset values in some QOZs if many investors in QOFs seek to sell their portion of the fund within the same time period. This decline in asset values may affect the broader level of economic activity within some QOZs or affect other investors in such zones that did not invest through a QOF. In anticipation of this fixed deadline, some taxpayers may choose to dispose of QOF assets earlier than the deadline to avoid an anticipated "rush to the exits," but this would seem to conflict with the purpose of the incentives in the statute to encourage "patient" capital investment within QOZs. While the final regulations may produce these inefficiencies, by providing a long time period for which taxpayers may dispose of their investment within a QOF and still qualify for the exclusion the final regulations will lead any such inefficiencies to be minor.

(iii) Providing No Deadline for Electing Gain Exclusion

As an alternative, the final regulations could have provided no deadline for electing the 10-year gain exclusion for investments in a QOF, while still stating that the ability to make the election is not impaired solely because the designation of one or more QOZs ceases to be in effect. While this alternative would eliminate the economic inefficiencies associated with a fixed deadline and would likely lead to greater investment in QOFs, it could introduce substantial additional administrative and compliance costs. Taxpayers would also need to maintain records and make efforts to maintain compliance with the rules of section 1400Z-2 on an indefinite basis.

(iv) Providing Fair Market Value Basis Without Disposition of Investment

Another alternative considered would allow taxpayers to elect to increase the basis in their investment in the QOF if held at least 10 years to the fair market value of the investment without disposing of the property, as long as the election was made prior to January 1, 2048. (Or, the final regulations could have provided that, at the close of business of the day on which a taxpayer first has the ability to make the 10-year gain exclusion election, the basis in the investment automatically sets to the greater of current basis or the fair market value of the investment.) This alternative would minimize the economic inefficiencies of the proposed regulations resulting from taxpayers needing to dispose of their investment in the opportunity zone at a fixed date not related to any factor other than the lapse of time. However, this approach would require a method of valuing unsold assets that could raise administrative and compliance costs. It may also require the maintenance of records and trained compliance personnel for over two decades.

(v) Summary

As discussed in section V.B of the Explanation of Provisions of the October 2018 proposed regulations, the Treasury Department and the IRS have determined the ability to exclude gains for investment held at least 10 years in a QOF is integral to the TCJA's purpose of creating QOZs. The final regulations provide a uniform signal to all taxpayers on the availability of this tax incentive, which should encourage greater investment, and a more efficient distribution of investment, in QOFs than in the absence of the final regulations. The relative costs and benefits of the various alternatives are difficult to measure and compare. The final regulations would likely produce the lowest compliance and administrative costs among the alternatives and any associated economic inefficiencies are likely to be small.

Notice 2021-10 further extends deadlines that Notice 2020-39 extended as a result of the COVID-19 pandemic.

Letter Ruling 202103013 granted "an extension of time under sections 301.9100-1 and 301.9100-3 of the Income Tax Regulations to (1) make a timely election under section 1.1400Z2(a)-1(a)(2)(i) to be certified as a qualified opportunity fund (QOF), as defined in section 1400Z-2(d) of the Internal Revenue Code (Code); and (2) for the taxpayer to be treated as a QOF, effective as of the month the taxpayer was formed in Year 2 as provided under section 1400Z-2(d) of the Code and section 1.1400Z2(d)-1(a) of the Income Tax Regulations. The extension was 45 days from the date of the letter ruling to file an amended return to make the election under section 1400Z-2 and section 1.1400Z2(d)-1(a)(2)(i) and was to be made on Form 8996.

Letter Ruling 202249005 held:

> The gross income derived by Taxpayer from its sale of Parcel B, which occurs during Taxpayer's start-up period, may be treated as gross income derived from the active conduct of a trade or business in a QOZ for purposes of satisfying § 1400Z-2(d)(3)(A)(ii) and § 1397C(b)(2) of the Code, provided that Taxpayer adopts a new or revised working capital plan within 120 days of the end of the qualified disaster incident period satisfying the requirements of § 1.1400Z2(d)-1(d)(3)(v)(A) through (E) of the Regulations and that such plan utilizes the proceeds from the sale of Parcel B (net of any tax distributions) in a manner such that the completion of spending takes into account the originally allowed up to 31-month period and up-to-24 additional month period, as provided by § 1.1400Z2(d)-1(d)(3)(v)(B) of the Regulations and § 1.1400Z2(d)-1(d)(3)(v)(D) of the Proposed Regulations.

II.G.7.b. Transfers of a Qualified Opportunity Fund (QOF)

To explain the rules below and their background, see Matz, "How the Final Regulations on Qualified Opportunity Funds Come Out on Trust and Estate Related Issues – A Review of the QOF Final Regulations' Disposition of ACTEC's Comments to the U.S. Department of Treasury and the IRS," *Estate Planning Journal* (7/2020).

Reg. § 1.1400Z2(b)-1, "Inclusion of gains that have been deferred under section 1400Z-2(a)," provides when the passage of time or a transfer may cause deferred gain to be taxed.

Reg. § 1.1400Z2(b)-1(a), "Scope," provides:

> This section provides rules under section 1400Z-2(b) of the Internal Revenue Code and the section 1400Z-2 regulations (as defined in § 1.1400Z2(a)-1(b)(41)) regarding the inclusion in income of gain deferred by a QOF owner under section 1400Z-2(a)(1)(A) and the section 1400Z-2 regulations. This section applies to a QOF owner only until all of such owner's gain deferred pursuant to a deferral election has been included in income, subject to the limitations described in paragraph (e)(5) of this section, and except as otherwise provided in paragraph (c) or (d) of this section. Paragraph (b) of this section provides general rules under section 1400Z-2(b)(1) regarding the timing of the inclusion in income of the deferred gain. Paragraph (c)(1) of this section provides the general rule regarding the determination of the extent to which an event triggers the inclusion in gross income of all, or a portion, of an eligible taxpayer's deferred gain, and paragraphs (c)(2) through (16) of this section provide specific rules for certain events that are or are not treated as inclusion events. Paragraph (d) of this section provides rules regarding holding periods for qualifying investments. Paragraph (e) of this section provides rules regarding the amount of deferred gain included in gross income under section 1400Z-2(a)(1)(B) and (b), including special rules for QOF partnerships and QOF S corporations. Paragraph (f) of this section provides examples illustrating the rules of paragraphs (c), (d), and (e) of this section. Paragraph (g) of this section provides rules regarding basis adjustments under section 1400Z-2(b)(2)(B). Paragraph (h) of this section provides special reporting rules applicable to partners, partnerships, and direct

or indirect owners of QOF partnerships. Paragraph (i) is reserved. Paragraph (j) of this section provides dates of applicability.

Reg. § 1.1400Z2(b)-1(b), “General inclusion rule,” provides:

The gain to which a deferral election applies is included in gross income, to the extent provided in paragraph (e) of this section and in accordance with the rules of § 1.1400Z2(a)-1(c)(1), in the taxable year that includes the earlier of:

(1) The date of an inclusion event; or

(2) December 31, 2026.

Reg. § 1.1400Z2(b)-1(c), “Inclusion events,” provides:

(1) *In general*. Except as otherwise provided in this paragraph (c), an event is an inclusion event, if, and to the extent that -

(i) The event reduces an eligible taxpayer’s direct equity interest for Federal income tax purposes in the qualifying investment;

(ii) An eligible taxpayer receives property in the event with respect to its qualifying investment and the event is treated as a distribution for Federal income tax purposes, whether or not the receipt reduces the eligible taxpayer’s ownership of the QOF;

(iii) An eligible taxpayer claims a loss for worthless stock under section 165(g) or otherwise claims a worthlessness deduction with respect to its qualifying investment; or

(iv) A QOF in which an eligible taxpayer holds a qualifying investment loses its status as a QOF.

(2) *Termination or liquidation of QOF or QOF owner*.

(i) *Termination or liquidation of QOF*. Except as otherwise provided in this paragraph (c), an eligible taxpayer has an inclusion event with respect to all of its qualifying investment if the QOF ceases to exist for Federal income tax purposes. For example, if a QOF partnership converts to a QOF C corporation, or if a QOF C corporation converts to a QOF partnership or to an entity disregarded as separate from its owner for Federal income tax purposes, all investors in the QOF have an inclusion event with respect to all of their qualifying investments in the QOF.

(ii) *Liquidation of QOF owner* -

(A) *Portion of distribution treated as sale*. A distribution of a qualifying investment in a complete liquidation of a QOF owner is an inclusion event to the extent that section 336(a) treats the distribution as if the qualifying investment were sold to the distributee at its fair market value, without regard to section 336(d).

(B) *Distribution to 80-percent distributee*. A distribution of a qualifying investment in a complete liquidation of a QOF owner is not an inclusion event to the extent section 337(a) applies to the distribution.

(3) *Transfer of an investment in a QOF by gift or incident to divorce*.

(i) *Transfer of an investment in a QOF by gift*. Except to the extent provided in paragraph (c)(5) of this section, a taxpayer's transfer of a qualifying investment by gift, as defined for purposes of chapter 12 of subtitle B of the Code, whether outright or in trust, is an inclusion event, regardless of whether that transfer is a completed gift for Federal gift tax purposes, and regardless of the taxable or tax-exempt status of the donee of the gift.

(ii) *Transfers between spouses incident to divorce*. A transfer between spouses or incident to divorce or otherwise as provided in section 1041 of the Code is an inclusion event.

(4) *Transfer of an investment in a QOF by reason of the taxpayer's death*.

(i) *In general*. Except as provided in paragraph (c)(4)(ii) of this section, a transfer of a qualifying investment by reason of the taxpayer's death is not an inclusion event. Transfers by reason of death include, for example:

(A) A transfer by reason of death to the deceased owner's estate;

(B) A distribution of a qualifying investment by the deceased owner's estate;

(C) A distribution of a qualifying investment by the deceased owner's trust that is made by reason of the deceased owner's death;

(D) The passing of a jointly owned qualifying investment to the surviving co-owner by operation of law; and

(E) Any other transfer of a qualifying investment at death by operation of law.

(ii) *Exceptions*. The following transfers are not included as a transfer by reason of the taxpayer's death, and thus are inclusion events:

(A) A sale, exchange, or other disposition by the deceased taxpayer's estate or trust, other than a distribution described in paragraph (c)(4)(i) of this section;

(B) Any disposition by the legatee, heir, or beneficiary who received the qualifying investment by reason of the taxpayer's death; and

(C) Any disposition by the surviving joint owner or other recipient who received the qualifying investment by operation of law on the taxpayer's death.

(iii) *Liability for deferred Federal income tax*. If the owner of a qualifying investment in a QOF dies before an inclusion event and the deferred gain is not includable in the decedent's gross income, the gain that the decedent elected to defer under section 1400Z-2(a) and the section 1400Z-2 regulations will be includable in the gross income, for the taxable year in which occurs an inclusion event, of the person described in section 691(a)(1).

(iv) *Qualifying investment in the hands of the person described in section 691(a)(1)*. A qualifying investment received in a transfer by reason of death listed in paragraph (c)(4)(i) of this section continues to be a qualifying investment under § 1.1400Z2(a)-1(b)(34).

(5) *Grantor trusts*.

(i) *Contributions to grantor trusts*. If the owner of a qualifying investment contributes it to a trust and, under subpart E of part I of subchapter J of chapter 1 of subtitle A of the Code (grantor trust rules), the contributing owner of the investment is the deemed owner of the trust (grantor trust), the contribution to the grantor trust is not an inclusion event. Similarly, a transfer of the investment by the grantor trust to the trust's deemed owner is not an inclusion event. For all purposes of the section 1400Z-2 regulations, references to the term grantor trust mean the portion of the trust that holds the qualifying investment in the QOF, and such a grantor trust, or portion of the trust, is a wholly grantor trust as to the deemed owner. Such contributions may include transfers by gift or any other type of transfer between the grantor and the grantor trust that is a nonrecognition event as a result of the application of the grantor trust rules (that is, subpart E of part I of subchapter J of chapter 1 of subtitle A of the Code).

(ii) *Changes in grantor trust status*. In general, a change in the income tax status of an existing trust owning a qualifying investment in a QOF, whether the termination of grantor trust status or the creation of grantor trust status, is an inclusion event. Notwithstanding the previous sentence, the termination of grantor trust status as the result of the death of the owner of a qualifying investment is not an inclusion event, but the provisions of paragraph (c)(4) of this section apply to distributions or dispositions by the trust. If a qualifying investment is held in the grantor portion of an electing small business trust (ESBT), as defined in section 1361(e)(1), and the ESBT converts into a qualified subchapter S trust (QSST), as defined in section 1361(d)(3), the beneficiary of which is the deemed owner of the grantor portion of the ESBT, there has been no change in the grantor trust status because the deemed owner continues to be taxable under subtitle A of the Code on the income and gain from the qualifying investment.

(iii) *Conversions of QSSTs and ESBTs*. With regard to conversions of QSSTs and ESBTs, see paragraphs (c)(7)(i)(B) and (C) of this section. For purposes of paragraph (c)(5)(ii) of this section, if a qualifying investment is held by a QSST that converts to an ESBT, the beneficiary of the QSST is the deemed owner of the grantor portion of the ESBT that then holds the qualifying investment, and the deemed owner is not a nonresident alien for purposes of this section (and thus notwithstanding § 1.1361-1(j)(8)), there has been no change in the grantor trust status because the deemed owner continues to be taxable under subtitle A of the Code on the income and gain from the qualifying investment.

Reg. § 1.1400Z2(b)-1(c)(6)-(16) describe a variety of other events that may or may not be inclusion events.

See also Sobochan, “Disguised sale of a QOZ partnership interest,” *The Tax Adviser* (8/2023).

II.G.8. Code § 165(a) Loss for Worthlessness; Abandoning an Asset to Obtain Ordinary Loss Instead of Capital Loss; Code § 1234A Limitation on that Strategy

Except for a small allowance for individuals[1550] and the exception provided in part II.G.4.m.i Code § 1341 Claim of Right Deduction,[1551] capital losses are deductible only against capital gain.[1552] In addition to limiting the amount of loss that any taxpayer can take, for individuals (including owners of S corporations and partnerships) this rule causes such losses to offset favorably taxed capital gain,[1553] which is not as beneficial as offsetting highly taxed ordinary income. This part II.G.8 explains that abandoning a capital asset generates an ordinary loss, which is more favorable than selling a capital asset for a capital loss, so much so that a taxpayer turned its back on $20 million cash to generate an ordinary loss deduction worth much more than that.[1554] Note that pass-through losses reduce the basis allowable as a loss on the abandonment,[1555] so the abandoning taxpayer needs to separately prove that any suspended losses are deductible; as the latter, see parts II.G.4.l Business Deductions and Losses and II.K.1.j Complete Disposition of Passive Activity.

Generally, a loss incurred in a business or in a transaction entered into for profit and arising from the sudden termination of the usefulness in such business or transaction of any nondepreciable property, in a case where such business or transaction is discontinued or where such property is permanently discarded from use therein, is a Code § 165(a) deduction for the taxable year in which the loss is actually sustained.[1556] *MCM Investment Management, LLC v. Commissioner*, T.C. Memo. 2019-158, explained:

> Section 165(a) allows a deduction for any loss sustained during the tax year and not compensated for by insurance or otherwise. To be allowable as a deduction under section 165(a), a loss must be evidenced by closed and completed transactions, fixed by identifiable events, and actually sustained during the tax year. Sec. 1.165-1(b), (d)(1), Income Tax Regs. Only a bona fide loss is deductible, and substance prevails over mere form in our analysis. *Id.* para. (b).
>
> “In most cases, a ‘closed and completed transaction’ will occur upon a sale or other disposition of the property, but this requirement also may be satisfied if the taxpayer abandons the asset or the asset becomes worthless.” *Tucker v. Commissioner*, 841 F.3d 1241, 1249 (11th Cir. 2016) (quoting *Proesel v. Commissioner*, 77 T.C. 992, 1005 (1981)), *aff’g* T.C. Memo. 2015-185. Thus, “worthlessness” is a stand-alone justification for a deduction under section 165(a), and a taxpayer may deduct a loss from an investment in a partnership if the partnership interest becomes worthless during the tax year. *Echols v. Commissioner* (*Echols I*), 935 F.2d 703, 706 (5th Cir. 1991), *rev’g* 93 T.C. 553 (1989), *rehearing denied*, *Echols v. Commissioner* (*Echols II*), 950 F.2d 209

> (5th Cir. 1991); see also *Forlizzo v. Commissioner*, T.C. Memo. 2018-137. The parties agree that MCMIM did not abandon its partnership interest in Companies.
>
> Therefore, we must determine whether the partnership interest became worthless in 2009, the sole remaining challenge to deductibility for that year.
>
> Whether a partnership interest is worthless is a question of fact. See *Boehm v. Commissioner*, 326 U.S. 287, 293 (1945); *Proesel v. Commissioner*, 77 T.C. at 1006. The statute's "general requirement that losses be deducted in the year in which they are sustained calls for a practical, not a legal, test." *Boehm v. Commissioner*, 326 U.S. at 292-293 (quoting *Lucas v. Am. Code Co.*, 280 U.S. 445, 449 (1930)).
>
> To prove entitlement to a section 165(a) loss deduction for worthless property, a taxpayer must demonstrate its "subjective determination of worthlessness in a given year, coupled with a showing that in such year the asset in question is in fact essentially valueless." *Echols I*, 935 F.2d at 708. The requirement that an asset be "essentially" valueless demonstrates "the de minimis rule that the taxpayer does not have to prove that a given asset is absolutely, positively without any value whatsoever." *Id.* n.2. But, "while a taxpayer need not be 'an incorrigible optimist in his determination of when property becomes worthless, a mere decline, diminution, or shrinkage in value is not sufficient to establish a loss." *Tucker v. Commissioner*, 841 F.3d at 1251 (quoting *Proesel v. Commissioner*, 77 T.C. at 1006). In sum, we must determine whether MCMIM subjectively determined that its partnership interest in Companies was worthless in 2009 and whether objective factors confirm that the interest became essentially valueless in that year. See *Echols II*, 950 F.2d at 213 ("Our opinion expressly holds that the test for worthlessness is a combination of subjective and objective indicia: a subjective determination by the taxpayer of the fact and the year of worthlessness to him, and the existence of objective factors reflecting completed transaction(s) and identifiable event(s) in the year in question[.]").

MCM Investment Management, LLC determined that MCM Investment Management, LLC (MCMIM), was entitled to a loss deduction claimed with respect to a partnership interest ("Companies")[1557] that MCMIM reported became worthless during 2009. The court held that the subjective part was satisfied, based on the taxpayer's business judgement:[1558]

[1557] "Companies" was an LLC with substantial business:

> During 2009, the year in issue, Companies was involved in three distinct lines of real estate development: single-family homebuilding, master-planned communities, and commercial development and management. Companies' business lines were operated through various wholly owned and multimember (joint venture) LLCs (project entities). Each project entity held real estate for land development and homebuilding. During 2009 Companies held investments in 73 project entities, 11 management services entities, and 3 investment-holding companies.

[1558] The court described the subjective test:

> We first consider whether MCMIM subjectively determined that its partnership interest in Companies was worthless in 2009. *Echols v. Commissioner*, 935 F.2d at 707 ("[T]he more important question of when a property is worthless for purposes of a loss deduction under … [section] 165(a) is, like beauty, largely in the eyes (more accurately, the mind) of the beholder (more accurately, the holder)."). The subjective determination of the taxpayer, while not conclusive, is entitled to great weight. *Id*. At 708; *A.J. Indus., Inc. v. United States*, 503 F.2d 660, 670 (9th Cir. 1974) ("The subjective judgment of the taxpayer (here the management) as to

> We conclude that MCMIM subjectively determined that its partnership interest in Companies was worthless by the end of 2009. First, MCMIM took the position on its tax return that the partnership interest was worthless in 2009. See *id.* at 707 (noting that taking loss deduction on tax return is manifestation of taxpayer's intent that partnership interest was worthless). Second, the owners and management of MCMIM and Companies testified credibly at trial that they believed MCMIM's interest became worthless in 2009. They based their belief, in part, on the dramatic and devastating impact of the financial crisis that began in 2007, Companies' consistent operating losses in the years leading up to and including 2009, the subordinate position of MCMIM's partnership interest to Holdings, and the overwhelming debt burden of Companies and its project entities. The owners and management took into account Companies' deteriorating cashflow projections during 2009. Those projections showed that Companies would be unable to satisfy financial obligations owed to the senior lender, the subordinate lender, or the project debt lenders. Ultimately, the McMillin family decided to wind down Companies in an orderly manner to maximize value for the creditors. These facts support our conclusion that MCMIM subjectively believed its partnership interest in Companies was worthless in 2009.

MCM Investment Management, LLC described the objective test:

> We now consider whether objective indicia confirm an absence of substantial value in 2009. See *id.* At 707 ("[P]roperty cannot be treated as worthless for tax loss purposes if at the time it, objectively, has substantial value."). Section 1.165-1(b), Income Tax Regs., requires that the reported loss be "evidenced by closed and completed transactions, fixed by identifiable events, and … actually sustained during the tax year." See also *Echols II*, 950 F.2d at 212-213 ("[I]n order to comply with … [section 1.165-1(d)(1), Income Tax Regs.,] the analysis should focus on objective events confirming the taxpayer's subjective determination that the asset was in fact worthless in the year in which the loss was claimed."); sec. 1.165-1(d)(1), Income Tax Regs.

---

whether the business assets will in the future have value is entitled to great weight and a court is not justified in substituting its business judgment for a reasonable, well-founded judgment of the taxpayer."); *Oak Harbor Freight Lines, Inc. v. Commissioner*, T.C. Memo. 1999-291, 1999 WL 680132, at *2-*3 (citing *Echols II*, 950 F.2d 209, and *A.J. Indus., Inc.*, 503 F.2d 660). In *Echols I*, 935 F.2d at 708, the court emphasized the discretion a taxpayer has in claiming a loss deduction under section 165(a) for a worthless partnership interest:

> The admittedly belabored point of this analysis is that the IRS cannot disallow …[a section] 165(a) deduction by a taxpayer who can demonstrate his subjective determination of worthlessness in a given year, coupled with a showing that in such year the asset in question is in fact essentially valueless. Proof by the IRS that the asset in question may have been of virtually no value in a prior year, or that, despite being of little or no value, the asset might have been deemed worthy of continued holding by some other taxpayer, even one similarly situated, would not defeat the bona fide determination of worthlessness by the taxpayer in the year he selects. Just as a taxpayer is entitled to exercise his own investment judgment and discretion in the timing of an overt act of abandonment, he is also entitled to the same exercise of judgment and discretion in determining when an asset is worthless to him, given a reasonable showing that the asset was in fact valueless at the time selected by the taxpayer—not that its fair market value necessarily fell to or below zero in that year. [Fn. ref. omitted.]

We laid out principles for determining worthlessness in the context of equity interests in *Morton v. Commissioner*, 38 B.T.A. 1270, 1278-1279 (1938), *aff'd*, 112 F.2d 320 (7th Cir. 1940):

> The ultimate value of stock, and conversely its worthlessness, will depend not only on its current liquidating value, but also on what value it may acquire in the future through the foreseeable operations of the corporation. Both factors of value must be wiped out before we can definitely fix the loss. If the assets of the corporation exceed its liabilities, the stock has a liquidating value. If its assets are less than its liabilities but there is a reasonable hope and expectation that the assets will exceed the liabilities of the corporation in the future, its stock, while having no liquidating value, has a potential value and can not be said to be worthless. The loss of potential value, if it exists, can be established ordinarily with satisfaction only by some "identifiable event" in the corporation's life which puts an end to such hope and expectation.
>
> There are, however, exceptional cases where the liabilities of a corporation are so greatly in excess of its assets and the nature of its assets and business is such that there is no reasonable hope and expectation that a continuation of the business will result in any profit to its stockholders. In such cases the stock, obviously, has no liquidating value, and since the limits of the corporation's future are fixed, the stock, likewise, can presently be said to have no potential value. Where both these factors are established, the occurrence in a later year of an "identifiable event" in the corporation's life, such as liquidation or receivership, will not, therefore, determine the worthlessness of the stock, for already "its value had become finally extinct."

Morton involved worthless corporate stock, and courts have applied these principles routinely in other cases involving securities. See, *e.g.*, *Nelson v. United States*, 131 F.2d 301 (8th Cir. 1942); *Austin Co. v. Commissioner*, 71 T.C. 955, 969-970 (1979); *Steadman v. Commissioner*, 50 T.C. 369, 376 (1968), *aff'd*, 424 F.2d 1 (6th Cir. 1970); *Flint Indus., Inc. v. Commissioner*, T.C. Memo. 2001-276, 2001 WL 1195725; *Corona v. Commissioner*, T.C. Memo. 1992-406, *aff'd*, 33 F.3d 1381 (11th Cir. 1994).

MCM Investment Management, LLC described "evidence indicating no liquidating value":

> Under *Morton v. Commissioner*, 38 B.T.A. at 1278-1279, a taxpayer claiming a worthlessness loss deduction must show that its equity interest ceased to have liquidating value during the year in issue. Generally this may be shown by an authoritative balance sheet showing liabilities in excess of assets, leaving no value for equity holders. *Steadman v. Commissioner*, 50 T.C. at 377; *Morton v. Commissioner*, 38 B.T.A. at 1282; *Flint Indus., Inc. v. Commissioner*, 2001 WL 1195725, at *17. Balance sheet insolvency at the entity level is not necessarily required when preferred equity interests are involved, however. A subordinate equity interest may become worthless if the company cannot satisfy a senior equity interest holder's preferential claim in liquidation. See *Mahler v. Commissioner*, 119 F.2d 869, 873 (2d Cir. 1941) (concluding that preferred stock and common stock of a corporation became worthless in different years); *H.K. Porter Co. v. Commissioner*, 87 T.C. 689, 694 (1986) (holding that the priority of indebtedness over preferred and common stock and of preferred stock over common stock must be respected); *Spaulding Bakeries, Inc. v. Commissioner*, 27 T.C. 684 (1957) (finding the taxpayer's common stock worthless because the corporation could not satisfy the claim of the taxpayer's preferred stock when the

corporation dissolved and nothing was distributed on account of the common stock), *aff'd*, 252 F.2d 693 (2d Cir. 1958).

In *Spaulding Bakeries, Inc. v. Commissioner*, 27 T.C. at 685-686, the taxpayer owned common stock and all the outstanding preferred stock of a corporation. The shares of preferred stock were entitled to quarterly dividends, and, on dissolution or liquidation of the corporation, the holders of preferred stock were entitled to receive the full par value of their preferred stock plus all accrued unpaid dividends before any payment whatsoever could be made upon the common stock of the corporation. *Id*. At 685. In 1950 the corporation dissolved, and all of its remaining assets were transferred to the taxpayer as holder of all of the outstanding preferred stock, but the amount transferred was less than the par value of the preferred stock. *Id*. At 686. Because the taxpayer did not receive full par value for the preferred stock and did not receive anything on account of its common stock, it claimed a worthless stock deduction for its common stock in 1950. *Id*. In recognizing the priority of preferred stock over common stock, we held that the common stock was worthless because the corporation could not satisfy the claim of the preferred stock and that the taxpayer was entitled to a loss deduction.[5] *Id*. At 688-689.

[5] The specific issue before the Court in *Spaulding Bakeries, Inc. v. Commissioner*, 27 T.C. 684 (1957), *aff'd*, 252 F.2d 693 (2d Cir. 1958), was whether the nonrecognition rule in sec. 112(b)(6) of the Internal Revenue Code of 1939, the predecessor to sec. 332, applied to bar the taxpayer, a corporation, from claiming the worthless stock deduction. That rule prevents a corporation from recognizing gain or loss upon receipt of property distributed in complete liquidation of another corporation, under certain circumstances. The Court had to decide whether the taxpayer received any property in liquidation of its common stock when the liquidating distribution the taxpayer received was insufficient to satisfy the claim of the preferred stock the taxpayer held. *Id*. at 687-688.

Thus:[1559]

In short, none of respondent's arguments can overcome the fact that MCMIM held an interest that was junior to both a $70 million senior debt obligation and a preferred

[1559] Earlier in the opinion, the court described the decision to wind down Companies:

Companies updated its cashflow forecast in December 2009. That forecast projected that Companies would have an ending cash balance of $12.3 million if it could wind down by the end of 2014 and pay off the senior debt. While Companies projected that it could achieve this positive cash balance by the end of the winddown, it also projected that it would have a cash shortfall during the winddown period in both 2012 and 2013.

Under the terms of the senior debt loan documents, Companies was required to make $32 million of principal payments in 2012 and approximately $30 million of principal payments in 2013, when the loan matured. But the December 2009 cashflow forecast showed that Companies would not have sufficient cash in 2012 and 2013 to make these required principal payments timely and cash shortfalls of approximately $14 million in 2012 and $7.4 million in 2013 would result.

Companies also prepared a liquidation analysis in 2009. The liquidation analysis showed that if Companies were to liquidate completely in 2009—as an alternative to a gradual winddown over five years—it would have only $51.6 million to pay approximately $70 million in outstanding senior debt.

> interest with an accrued preferred return that exceeded $71 million. And all of the economic data available to Companies, MCMIM, and other financial players indicated that under various scenarios MCMIM would recover nothing for its interest.

MCM Investment Management, LLC dismissed the IRS' arguments that a positive capital account indicated value:

> … In sum, even if a hypothetical liquidation in 2009 could have generated enough cash to pay off the senior debt, MCMIM would not have been entitled to liquidating distributions until after Holdings had received its preferred interest and accrued preferred return, which was highly unlikely.
>
> Respondent's argument fails in two other ways. First, the operating agreement provides for liquidating distributions in accordance with section 704(b) capital accounts. But the positive capital account balance reported on MCMIM's Schedule K-1 was its GAAP capital account, not its section 704(b) capital account. And the "0.39%" share of capital on item J of the Schedule K-1 was derived from the GAAP capital account. Because section 704(b) capital accounts can differ from GAAP capital accounts, the GAAP capital account reported on the Schedule K-1 does not necessarily reflect what liquidating distributions MCMIM would have been entitled to under section 7.3 of the operating agreement. See William S. McKee et al., *Federal Taxation of Partnerships and Partners*, para. 6.04, at 6-26 to 6-28 (4th ed. 2007).
>
> Second, since dissolution or liquidation did not occur in 2009, any capital account balances as of the end of 2009 do not reflect any adjustments that would be required

---

On the basis of these financial projections Companies concluded that it could not fully repay its senior debt and project debt under the terms of their respective loan documents. And after reviewing Companies' cashflow forecasts, Companies determined that Holdings would not recover the full amount of its preferred equity interest upon liquidation and MCMIM would not receive anything with respect to its interest. Holdings' preferred equity interest and accrued cumulative preferred return would have exceeded $111 million by the end of the winddown period in 2014. Toward the end of 2009 Ceci Doty—a senior vice president of Companies responsible for the finance group—informed Companies' executive committee and managing board of its inability to satisfy its debt obligations.

Companies' continued attempts to secure additional funding during 2009 failed. One potential investor insisted that any of its investments occur outside of Companies. To address this concern, in April 2009 the McMillin family formed a new entity—the Corky McMillin Real Estate Group (MREG).

Ultimately, by the end of 2009 Companies' owners decided to wind down the entity. On the basis of its December 2009 cashflow forecast Companies believed it could complete construction of, market, and sell all of its assets in an orderly manner by the end of 2014. Companies' owners believed that an orderly liquidation over five years would be more beneficial to its lenders than a complete selloff of its assets over a shorter timeframe. Companies' owners believed widespread knowledge of this decision would damage morale for existing employees working on building out existing projects and prejudice Companies and the project entities in future debt negotiations with lenders, so it was not memorialized.

On its 2009 audited consolidated statements of operations, Companies reported a net loss of $39,316,000 for the 2009 tax year. It reported assets of $331,461,000, liabilities of $268,650,000, and members' equity of $62,811,000 as of December 31, 2009. It reported operating revenue of $254,848,000 for 2009, down from approximately $824 million in 2005 before the financial crisis. And according to Companies' 2010 audited consolidated statements of operations, Companies' operating revenue in 2010 was $162,305,000, approximately 35% lower than in 2009.

> under section 704(b) had such a dissolution or liquidation occurred in 2009. Before Companies could make liquidating distributions (if any), it would be required to take into account all section 704(b) capital account adjustments for the tax year during which dissolution occurred. Petitioner argues that a dissolution and liquidation in 2009 would have required Companies to dispose of all of its assets and immediately recognize substantial losses, which would have been allocated to MCMIM, reducing its section 704(b) capital account to zero before any liquidating distributions could be made. We find this argument persuasive, particularly in the light of the poor business conditions discussed above and the allocation provisions in the operating agreement. Thus, the GAAP capital account balance on MCMIM's 2009 Schedule K-1 is not an indication that MCMIM would have been entitled to anything had it forced Companies to liquidate in 2009.

MCM Investment Management, LLC also looked at the partnership interest's "lack of potential future value," based on the following test:

> Having determined that MCMIM's partnership interest in Companies had no liquidating value by the end of 2009, we must consider whether it also lacked potential future value then. See *Morton v. Commissioner*, 38 B.T.A. at 1278 (holding that the worthlessness of an equity interest depends "not only on its current liquidating value, but also on what value it may acquire in the future through the foreseeable operations of the … [company]"). An equity interest has potential future value when, despite the lack of liquidating value, there is still a "reasonable hope and expectation that … [the interest] will become valuable at some future time". *Id*.
>
> The hope and expectation that an equity interest may become valuable in the future can be foreclosed when certain "identifiable events" occur in the company's life that effectively destroy the potential value. *Steadman v. Commissioner*, 50 T.C. at 376-377; *Morton v. Commissioner*, 38 B.T.A. at 1278. An "identifiable event" is "an incident or occurrence that points to or indicates a loss—an evidence of a loss." *Indus. Rayon Corp. v. Commissioner*, 94 F.2d 383, 383-384 (6th Cir. 1938); see *Webster v. Commissioner*, 6 T.C. 1183, 1187 (1946). Identifiable events include, *e.g.*, bankruptcy, the cessation of business, liquidation, or the appointment of a receiver. *Steadman v. Commissioner*, 50 T.C. at 376-377; *Morton v. Commissioner*, 38 B.T.A. at 1278. The evidence "may vary according to circumstances and conditions." *Indus. Rayon Corp. v. Commissioner*, 94 F.2d at 384. In some instances a taxpayer can demonstrate that its equity interest does not have potential future value, even in the absence of an identifiable event, if the company becomes hopelessly insolvent. *Steadman v. Commissioner*, 50 T.C. at 377; *Morton v. Commissioner*, 38 B.T.A. at 1279; *Flint Indus., Inc. v. Commissioner*, 2001 WL 1195725, at *19; *Tejon Ranch Co. v. Commissioner*, T.C. Memo. 1985-207, 49 T.C.M. (CCH) 1357, 1362 (holding that a partnership's hopeless insolvency justified a deduction for a worthless partnership investment under section 165).

The court accepted some of the "identifiable events" the taxpayer suggested then rejected the IRS' attempted rebuttal:

> Respondent argues that Companies' continued operations during 2009 and the winddown period indicate that MCMIM's partnership interest must have had some potential future value. We disagree. The continued operation of a company beyond the year of claimed worthlessness does not itself prove future value in its equity interests.

See *Steadman v. Commissioner*, 50 T.C. at 378; *Rand v. Commissioner*, 40 B.T.A. 233, 240 (1939), *aff'd*, 116 F.2d 929 (8th Cir. 1941); *Frazier v. Commissioner*, T.C. Memo. 1975-220, 34 T.C.M. (CCH) 951, 966 (1975). And taxpayers have shown that their interest in a partnership is worthless in a year where the partnership did not cease its operations. See *Echols I*, 935 F.2d 703; *Tejon Ranch Co. v. Commissioner*, 49 T.C.M. (CCH) at 1362. In *Frazier v. Commissioner*, 34 T.C.M. (CCH) at 962-963, we observed that in cases involving continued operation of a company beyond the year of claimed worthlessness,

> [o]ur examination centers around whether the activities pursued during and after … [the year of claimed worthlessness] were in the nature of an attempt to salvage something for creditors, … or whether such activities were so related to a continuation of general operations that they manifest reasonable expectations of future value in the … [equity]….

After discussing various cases cited in the opinion above, the court concluded:

> In sum, *Nelson* and *Tejon Ranch Co.* illustrate the fact-intensive nature of fixing the year of an equityholder's worthlessness loss when a company declines over several years. On the record before us, respondent could only criticize each identifiable event in isolation, arguing that each alone might not be sufficient; he could not and did not direct us to affirmative evidence showing how MCMIM's partnership interest in Companies continued to have potential future value. We find that the identifiable events together confirm that the likelihood of potential future value was minimal.

The court rejected the IRS' purported foreclosure requirement:

> Respondent asserts that MCMIM's partnership interest had potential future value until foreclosure occurred with respect to each real property interest encumbered by a recourse mortgage held by Companies' project entities, citing *Tucker v. Commissioner*, T.C. Memo. 2015-185. There, we held that real property held by a taxpayer's S corporation did not become worthless before a foreclosure sale occurred because the real property was encumbered by recourse debt….
>
> *Tucker* does not preclude a finding of worthlessness in this case. In *Tucker*, the Court considered the worthlessness of the underlying real property, not the taxpayer's equity interest in Paragon, the entity that held the real property. At issue here, by contrast, is the worthlessness of the partnership interest itself, not any particular asset the partnership held. See *Echols I*, 935 F.2d at 707 ("Emphasizing again that the asset being tested for worthlessness is not the Land but the Taxpayers' 75% interest in the Partnership which owned the Land, we must determine subjectively just when it was that the Taxpayers deemed their Partnership interest worthless, then determine objectively whether that interest was valueless at such time.").
>
> A taxpayer asserting that its equity interest in a company is worthless need not prove that every asset that the company holds is worthless. *Steadman v. Commissioner*, 50 T.C. at 378 (holding that corporate stock was worthless even though the corporation held valuable assets because the taxpayer proved that corporate stock had no liquidating or potential future value); *Tejon Ranch Co. v. Commissioner*, 49 T.C.M. (CCH) at 1362 (holding that a partnership interest became worthless when the partnership became insolvent beyond hope of rehabilitation). Therefore, a taxpayer

> holding a worthless partnership interest need not delay deducting a loss under section 165(a) merely because the partnership owns real estate interests encumbered by recourse debt.

While acknowledging that expert testimony can be helpful and sometimes important, the court rejected the IRS' argument that expert testimony was required:

> Respondent did not cite any authority holding that expert valuation is required to prove worthlessness under section 165…. To the contrary we have said that "the taxpayer need not be forced to hire valuation experts where, as here, his own testimony is credible and founded upon reasonable factual premises." *Holmes v. Commissioner*, 57 T.C. 430, 439 (1971). And even if there had been expert testimony in this case, the cases respondent cites make plain that we are "not bound by the formulas or opinions proffered by expert witnesses" and we "may reach a determination of value based upon … [our] own analysis of all the evidence in the record." *Thompson v. Commissioner*, 499 F.3d at 133 (quoting *Silverman v. Commissioner*, 538 F.2d at 933). As we have explained above, we determined that MCMIM's interest in Companies had no liquidating value or potential future value on the basis of our own analysis of all the evidence in the record.

The court rejected the IRS' argument that the loss was not bona fide. The family had formed another entity, "Holdings," to acquire subordinate debt from Companies' lenders that were threatening to call the debt. When Companies got into even more financial difficulty, the subordinate debt that Holdings had acquired was converted into senior equity. The IRS complained that these intra-family transactions – intended to keep the family business going - somehow tainted MCMIM's investment in Companies in a way that would prevent a loss deduction:

> Respondent also argues that MCMIM's loss was not bona fide within the meaning of the regulations. Citing *Scully v. United States*, 840 F.2d 478, 485 (7th Cir. 1988) (quoting 7 Jacob Mertens, *Law of Federal Taxation*, sec. 28.26 (1980)), for the general proposition that a taxpayer may not "transfer assets from one pocket to another and take a loss thereby where he remains at the conclusion of the transfer the real owner of the property", respondent argues that MCMIM should not be able to claim a loss deduction because the McMillin children remained beneficial owners of Companies both before and after MCMIM's partnership interest became worthless and therefore they "experienced no loss at all." Respondent also broadly urges us to scrutinize the transactions and dealings of the McMillin entities closely because they involve related parties.
>
> Respondent failed to demonstrate that the transactions between the McMillan entities should not be respected for tax purposes.[1560]

[1560] [I moved the analysis into this footnote.] See *Frank Lyon Co. v. United States*, 435 U.S. 561, 583-584 (1978) ("[W]here … there is a genuine multiple-party transaction with economic substance which is compelled or encouraged by business or regulatory realities, is imbued with tax-independent considerations, and is not shaped solely by tax-avoidance features that have meaningless labels attached, the Government should honor the allocation of rights and duties effectuated by the parties."); see also *Casebeer v. Commissioner*, 909 F.2d 1360, 1363 (9th Cir. 1990) (applying a two-part test that considers whether the taxpayer subjectively had a nontax business purpose and whether the transaction

> First, respondent objects that Companies did not itself acquire the subordinate debt at a discount. But that was beyond its control because the senior lender would not permit it. Instead the McMillin children formed Holdings to invest new capital in Companies by acquiring the subordinate debt from an unrelated lender. Moreover, Companies and its owners wanted an affiliate to purchase the debt because it ensured that a third-party owner of the debt—such as a distressed debt purchaser—would not push Companies into bankruptcy. Holdings later converted the subordinated debt to equity for a legitimate business reason: to revive Companies' balance sheet by reversing its negative net worth, thus enabling Companies to satisfy its minimum net-worth covenant and put it in a better position in restructuring negotiations with the senior lender. The debt-to-equity conversion had economic substance for the parties: Companies shed significant debt and the risk profile of Holdings' investment fundamentally changed when it traded various creditor's rights and priorities for higher upside.
>
> Second, respondent argues that MCMIM and Holdings were two pockets of the same pair of pants. We reject that analogy. The McMillin entities were separate legal entities. Respondent has not challenged their separate existence; indeed, he emphasized in his brief that "[w]hether the McMillin family entities are recognized as separate entities is not an issue in this case." The ownership of these entities was not identical because Vonnie's trust owned an interest in MCMIM but chose not to invest in M3 and Holdings.
>
> Respondent also failed to identify any actual "transfer" from MCMIM to Holdings, unlike *Scully*, where a set of family trusts sold some real estate at a loss to another set of family trusts that had the same beneficiaries. *Scully*, 840 F.2d at 486 ("[T]he purpose of the sale was to keep all the real estate in the family and to permit the trustees to operate the land in both sets of trusts as a single, integrated economic entity."). Among the transactions involving Holdings, the only "transfer" was Companies' contribution of approximately $3.9 million—which possibly, but not necessarily, came from MCMIM's capital contributions—towards the acquisition of the subordinate debt. Companies received a membership interest in M3 (which owned Holdings) in exchange, so Companies not only received value but also shared in the upside of the discounted purchase of the debt. That is, Companies invested $3.9 million for the possibility of receiving upwards of $15 million (possibly more if Companies were able to recover from the damaged state it was in at the end of 2008). Respondent asks us to engage in a hypothetical and assume away the reality that faced Companies here. And respondent identified no tax considerations that would swamp the economic reality here. The record amply illustrates that nontax considerations drove the decision to restructure the debt. And if the debt instead were held by an unrelated third party in 2009 or during the winddown period, there would be no dispute that MCMIM's interest was under water.

MCM Investment Management, LLC teaches us that a court will respect a family's attempts to keep its operating business going, including heroic efforts to prevent foreclosure by lenders, until the case becomes hopeless and any new investments are required to be held in a separate

objectively had economic substance (citing *Bail Bonds by Marvin Nelson, Inc. v. Commissioner*, 820 F.2d 1543, 1549 (9th Cir. 1987), *aff'g* T.C. Memo. 1986-23)), *aff'g* in part, *rev'g* in part *Larsen v. Commissioner*, 89 T.C. 1229 (1987), and *aff'g Casebeer v. Commissioner*, T.C. Memo. 1987-628, *Moore v. Commissioner*, T.C. Memo. 1987-627, and *Strum v. Commissioner*, T.C. Memo. 1987-625.

structure.[1561] For when intra-family loans are legitimate, see part III.B.1.a.i.(a) Loans Must be Bona Fide.[1562]

The IRS views abandonment for purposes of claiming an ordinary loss as requiring "(1) an intention to abandon the asset, and (2) an affirmative act of abandonment."[1563] If a partnership interest subject to liabilities is abandoned, the partnership interest is treated as having being sold for the liabilities rather than abandoned.[1564]

Swartz v. U.S., 128 A.F.T.R.2d 2021-5251 (E.D. NY 2021):

> This case arises from a failed investment in the film industry. Plaintiff Jerome Swartz, a retired engineer and wealthy investor, invested a total of $4.5 million in two LLCs that financed films.[1] He claims that his investment proved worthless and that he abandoned his interests in the LLCs. Swartz sought to carry back these losses and thereby claim a refund on his previously-filed tax returns. The IRS denied the deduction, and plaintiff filed suit seeking a refund. The United States moves for summary judgment.
>
> [1] Plaintiff Starnette Watkins was added as a necessary party because she and Swartz were married and filed taxes jointly during the 2008 tax year. See Order dated July 11,

---

[1561] See fn 1559, describing the decision to wind down and the formation of a new entity, MREG.

[1562] For a case holding that certain defects in documentation were not fatal because the parties' conduct showed the loans were legitimate, see *Dynamo Holdings Ltd. Partnership v. Commissioner*, T.C. Memo. 2018-61, described in the text accompanying fn 6220-6236 in part III.B.1.a.i.(a).

[1563] CCA 200637032, citing:

> A.*J. Industries, Inc. v. United States*, 503 F.2d 660, 670 (9th Cir. 1974); Rev. Rul. 93-80; Rev. Rul. 2004-58, 2004-1 C.B. 1043. *See also Echols v. Commissioner*, 935 F.2d 703, 706-08 (5th Cir. 1991) (finding both an intent to abandon and an affirmative act of abandonment when taxpayers called a partnership meeting at which they tendered their partnership interest to another partner, or anyone else, "gratis," and announced that they would contribute no further funds to the partnership), *reh'g denied*, 950 F.2d 209 (5th Cir. 1991).

Rev. Rul. 2004-58 explains what the IRS views as insufficient affirmative acts to constitute abandonment.

[1564] Rev. Rul. 93-80, Situation 1. *Watts v. Commissioner*, T.C. Memo. 2017-114, held:

> Subject to the prohibition on sales or exchanges giving rise to ordinary abandonment losses, partnership interests may be abandoned. *Echols v. Commissioner*, 935 F.2d 703 (5th Cir. 1991), *rev'g and remanding* 93 T.C. 553 (1989); *Citron v. Commissioner*, 97 T.C. at 213.
>
> When a partner is relieved of his or her share of partnership liabilities, the partner is deemed to receive a distribution of cash. Sec. 752(b). Section 731(a) requires distributions to partners to be treated as payments arising from the sale or exchange of a partnership interest. Secs. 752(b), 731(a); *Citron v. Commissioner*, 97 T.C. at 214-215 n.11. Thus, ordinary abandonment losses may arise only in a narrow circumstance where the partner: (1) was not personally liable for the partnership's recourse debts or (2) was limited in liability and otherwise not exposed to any economic risk of loss for the partnership's nonrecourse liabilities. See sec. 752(b), (d); sec. 1.752-3, Income Tax Regs.; see also *Commissioner v. Tufts*, 461 U.S. 300 (1983).
>
> Respondent determined petitioners' disposal of their Partnership interests did not fall within these narrow exceptions. Accordingly, respondent recharacterized petitioners' losses from ordinary abandonment losses to capital losses on the sale or exchange of the interests.
>
> In contesting this determination, petitioners were tasked with the burden of proving respondent's determination incorrect. Petitioners have not met this burden. Petitioners presented no documentary or testimonial evidence to establish their eligibility for an abandonment loss deduction. Petitioners failed to prove their individual shares of any Partnership liabilities, capital restoration obligations, or lack thereof, in the light of documentary evidence suggesting otherwise. Additionally, petitioners did not offer any evidence or analysis as to how their actions constituted an intentional and overt manifestation of abandoning their Partnership interests.

> 2019. Because Swartz performed all the actions relevant to this case, for simplicity's sake I refer only to him.

The court rejected Swartz's abandonment argument:

> Swartz claims that he abandoned his interests in both CT1 and Alliance Film through a call that King made to Bergstein in December 2010. ECF No. 54 ¶¶ 38-39. Swartz and King never conveyed that intent to abandon the investments to anyone else. *Id*. ¶ 39. Nor did they send written notice, even though the LLC agreements required that all communications be made in writing. *Id*. ¶¶ 9, 47. Swartz never personally communicated his intent to abandon the investments, but says that he stopped communicating with Bergstein around 2012 or 2013. ECF No. 51-6 at 3–4, 7, 11.
>
> Despite Swartz's claim that he abandoned his interests in the LLCs, he testified in 2013 that he did not file a claim in the bankruptcy proceeding because he remained "faithful to the relationship" with Bergstein and continued to believe "that [Bergstein] would work his way out of these things, and come through and take care of me, since it was a close, personal relationship." ECF No. 51-8 at 2. Swartz testified that he believed Bergstein would take care of him "even up to relatively recently, like a year or two ago" - *i.e.*, until 2011 or 2012. *Id.* That hope proved futile, and Swartz never recovered "a penny" of his $4.5 million investment. ECF No. 54 ¶ 6.

Swartz v. U.S., 128 A.F.T.R.2d 2021-5251 (E.D. NY 2021), held:

> I reject Swartz's argument that he should be considered a member of a partnership, which would in some circumstances allow him to treat his investment as a non-capital asset. See *Pilgrim's Pride Corp. v. Comm'r*, 779 F.3d 311, 314 (5th Cir. 2015); see also Rev. Rul. 93-80, 1993-2 C.B. 239. A court examining whether an entity is entitled to partnership tax status must examine "all the facts," including the entity's governing documents and the parties' conduct, statements, and relationships, as well as their "respective abilities and capital contributions," their "actual control of income and the purposes for which it is used," along with "any other facts throwing light on their true intent." *TIFD III-E, Inc. v. United States*, 459 F.3d 220, 231-32 (2d Cir. 2006). "This test turns on the fair, objective characterization of the interest in question upon consideration of all the circumstances." *Id*. at 232.
>
> The practicalities of Swartz's relationship with the LLCs belie his assertion that he was a member of a partnership. The Second Circuit has held that a passive investor with no meaningful control over the enterprise is not entitled to partnership tax status. *Estate of Kahn v. Comm'r*, 499 F.2d 1186, 1189–90 (2d Cir. 1974). In Kahn, the Court of Appeals explained that partnership status does not flow simply from the fact that the entity's documents describe it as a partnership or that the alleged partner was entitled to a share of the profits. *Id*. at 1189. Rather, it rejected the taxpayer's theory that the entity was a partnership, because one of the "partners" in that case had the sole discretion to control and dispose of the entity's assets. Id. In light of the taxpayer's "dominant position" in the company, along with the undisputed fact that he had "sufficient legal and practical control to misappropriate" some of the company's assets, the Court of Appeals held that the company was not a bona fide partnership even though the company's owners had a profit-sharing agreement. *Id*. at 1189–90.

> Similarly here, the undisputed evidence demonstrates that Swartz was a passive investor who lacked any control over the LLCs' assets or business. Swartz admitted in the purchase agreements that he was acquiring the membership interests for "speculative" "investment purposes," and did not indicate that he was joining a partnership. ECF No. 54 ¶¶ 11, 14; see ECF Nos. 51-2, 51-3, 51-5. He "was not the manager of either entity" and lacked "any control over how" CT1 or Alliance Film "spent the money that he had invested." ECF No. 54 ¶¶ 19, 23, 26; see also ECF No. 51-6 at 15. Indeed, Swartz testified that he never received any financial reports from the LLCs and was ignorant of their financial problems until a bankruptcy petition was filed against CT1 in March 2010. ECF No. 54 ¶¶ 29–30, 36; see also ECF No. 57 ¶ 11. Nor is there any evidence that the LLCs filed tax returns as partnerships or represented themselves as partnerships to anyone else. See *TIFD III-E, Inc.*, 459 F.3d at 232 (citing *Luna v. Comm'r*, 42 T.C. 1067, 1077–78 (1964) (explaining that one factor courts may consider is "whether the parties filed Federal partnership returns or otherwise represented" that they were partnerships)). In sum, the evidence amply demonstrates that Swartz played no role in managing the LLCs and had no control over their assets. He was instead a passive investor who relied on others to pursue profit but was not a partner of the LLCs. See *Kahn*, 499 F.2d at 1189.

For *Luna* and related cases, see part II.C.10 Whether Tenancy-in-Common or other Arrangement Constitutes a Partnership.

Swartz v. U.S., 128 A.F.T.R.2d 2021-5251 (E.D. NY 2021), rejected the argument that Swartz did not invest in a business:

> Even if Swartz were permitted to treat his failed investments as ordinary losses, they were not in his trade or business. "The distinction is important because in calculating a net operating loss to be carried back to previous years, a taxpayer may take in full all of the deduction attributable to trade or business loss, whereas deductions not attributable to trade or business losses are only allowable to the extent the gross income is not derived from a trade or business. See 26 U.S.C. and § 172(c) and (d)(4)." *Chernin v. United States*, 149 F.3d 805, 811 (8th Cir. 1998); see also *Lender Mgmt., LLC v. Comm'r*, 114 T.C.M. (CCH) 638, 2017 WL 6403890, at *8 (Dec. 13, 2017) ("net operating losses may carry over under section 172 from the year in which they were incurred to another year only if the losses were the result of operating a trade or business").
>
> An individual is engaged in a trade or business only if he is "involved in the activity with continuity and regularity." *Comm'r v. Groetzinger*, 480 U.S. 23, 35 (1987). The record is clear that Swartz was not in the trade or business of making or producing films. He spent his career as an engineer with a focus on designing aircraft and computer software. ECF No. 51-7. Nevertheless, Swartz claims that, after he retired, he entered into "the business of investing in entertainment properties." ECF No. 53 at 19. The Supreme Court has held, however, that being an investor to pursue personal profit is not a trade or business for tax purposes. *Whipple v. Comm'r*, 373 U.S. 193, 202 (1963); see also *Chamberlin v. Comm'r*, 14 F. App'x 69, 71-72 (2d Cir. 2001); *Burnet v. Clark*, 287 U.S. 410, 413-15 (1932).
>
> [my comment: see part II.G.4.l.i Trade or Business; Limitations on Deductions Attributable to Activities Not Engaged in for Profit, especially subparts II.G.4.l.i.(a) "Trade

or Business" Under Code § 162, II.G.4.l.i.(d) Whether Managing Investments Constitutes a Trade or Business, and II.G.4.l.i.(e) Family Office as a Trade or Business]

Swartz nonetheless claims that his consulting agreement with CT1, along with his agreement to serve as chair of its Board of Advisers, demonstrates that he was in the trade or business of producing films, particularly given the $60,000 salary he was to be paid for the approximately three to five hours per week that he worked. ECF No. 53 at 19-20. And yet the record reflects that Swartz's role as chairman was, as he testified, "nonmeaningful" and involved no work, and that he spent little time doing any work as a consultant. ECF No. 54 ¶ 21. Indeed, Swartz admits that on his tax returns he characterized a different loan he made to CT1 as "nonbusiness" debt, which is the antithesis of an investment made in a taxpayer's trade or business. ECF No. 54 ¶ 57; see *Generes*, 405 U.S. at 95–96 (contrasting nonbusiness debt with debt incurred in a trade or business).

In any event, Swartz's losses were not "the result of operating a trade or business" with CT1 or Alliance Film. *Lender Mgmt., LL*C, 2017 WL 6403890, at *8 (emphasis added). He made his initial $1.5 million investment in CT1 seven months before he had any consulting relationship with the company, and invested the additional $2 million in CT1 on the same day he entered into the consulting agreement and became the chair of the Board of Advisers (which apparently had no other members and held no meetings). See *Garner v. Comm'r*, 987 F.2d 267, 272-73 (5th Cir. 1993) (explaining that the taxpayer's motive must be assessed at the time of his investment). Even with respect to his consulting role, the Supreme Court has explained that "furnishing management and other services to corporations for a reward not different from that flowing to an investor in those corporations is not a trade or business." *Whipple*, 373 U.S. at 202. As the United States observes, there is no evidence that Swartz was ever actually paid (or sought to collect) the $60,000 he was owed under the consulting contract, and thus any returns that he hoped to receive from CT1 were no different "from that flowing to an investor[.]" *Id*.; see ECF No. 56 at 16-17. And Swartz never had any business or consulting relationship with Alliance Film other than his investment. The undisputed facts therefore make plain that Swartz was a mere investor for personal profit and was not investing pursuant to his trade or business.

The Supreme Court has explained, in a related context, why Swartz's claim fails. In *Generes* , the Court set forth the test for how to characterize a taxpayer's losses when he was both an employee and shareholder of the company to which he made loans. The key issue in that context was whether he made the loan to protect his ability to earn an income as an employee (in which case his loss would be an ordinary loss incurred in his trade or business) or if instead the loan was intended to support his equity interest (and thus should be treated as a capital loss). 405 U.S. at 95-96, 104. The Supreme Court observed that whether the debt was incurred for business or nonbusiness reasons was directly relevant to whether the loss could be carried back as a net operating loss under § 172. *Id*. at 96.

The Generes court held that, in order to claim that the loss was made in his trade or business, the taxpayer must show that his "dominant" motive for making the loan was to protect his salary rather than to protect his equity investment in the company. 405 U.S. at 103. The Court explained that the "dominant-motivation test strengthens and is consistent with" the tax code's distinction between personal and business losses. Id. at 104-05. It held that, when determining the taxpayer's motive, courts should compare the size of the taxpayer's salary with his equity investment and access to other funds. *Id*. at 106-07. The Supreme Court concluded that the taxpayer's investment in his own company was a nonbusiness loss because his after-tax annual salary was less than 20% of his total investment. *Id*. at 106-07. There was therefore no reason to believe his "self-serving" statement that his primary motive for making the investment was to "protect [his] job" rather than earn a profit. *Id*. at 106. Indeed, the Supreme Court granted judgment to the United States notwithstanding the jury's verdict for the taxpayer. *Id*. at 106-07.

Swartz's pre-tax consulting salary was less than 2% of his total $3.5 million investment in CT1, far below the 20% of post-tax salary that the Supreme Court found to be too low in *Generes*. 405 U.S. at 106. He also had, by his estimate, a net worth in excess of $70 million and an annual income of several million dollars. As in *Generes*, it would defy belief to conclude that Swartz invested any of this money to protect his $60,000 salary rather than to engage in speculative investing.

In sum, Swartz is not entitled to carry back his losses because his investments were capital assets. Even if the investments were non-capital assets, they were not incurred in his trade or business. Thus, even if Swartz suffered the $4.5 million loss in 2010, he is unable to carry back that loss and claim refunds for 2008 and 2009.

CCA 202302011 "responds to your request for non-taxpayer specific advice regarding the applicability of section 165 of the Internal Revenue Code ("Code") to cryptocurrency that has substantially declined in value" and includes the following:

Facts

Taxpayer A is an individual who purchased units of Cryptocurrency B in 2022 at $1.00 per unit for personal investment purposes on a cryptocurrency exchange. After Taxpayer A acquired Cryptocurrency B, the per unit value of Cryptocurrency B decreased significantly, such that each unit of Cryptocurrency B was valued at less than one cent at the end of 2022. On December 31, 2022, Cryptocurrency B continued to be traded on at least one cryptocurrency exchange, and Taxpayer A maintained dominion and control over the units of Cryptocurrency B as evidenced by Taxpayer A's ability to sell, exchange, or transfer the units. Taxpayer A claimed a deduction on Taxpayer A's 2022 tax return under section 165 and took the position that the units of Cryptocurrency B were either worthless or abandoned.

Discussion

Digital assets are defined under section 6045(g)(3)(D) as digital representations of value that are recorded on a cryptographically secured distributed ledger.[1] Digital assets do not exist in physical form and include, but are not limited to, property the Service has previously referred to as convertible virtual currency and cryptocurrency. See Notice 2014-21, 2014-16 I.R.B. 938; Rev. Rul. 2019-24, 2019-44 I.R.B. 1004. Notice 2014-21 provides that convertible virtual currency is treated as property and that general tax principles applicable to property transactions apply to convertible virtual currency.

[1] The Infrastructure Investment and Jobs Act ("the Act"), Pub. L. 117-58 , div. H, title VI, section 80603(b)(1)(B), added new section 6045(g)(3)(D), which uses this

definition of a digital asset for purposes of information reporting by brokers effective January 1, 2023. The Act provides the Secretary with the authority to further define the term “digital asset.”

Cryptocurrency is a type of virtual currency that utilizes cryptography to secure transactions that are digitally recorded on a distributed ledger, such as a blockchain. Units of cryptocurrency are generally referred to as coins or tokens. Distributed ledger technology uses independent digital systems to record, share, and synchronize transactions, the details of which are recorded in multiple places at the same time with no central data store or administration functionality. See Rev. Rul. 2019-24.

Sales, exchanges, and other dispositions of digital assets may result in recognition of gain or loss. The character of a gain or loss resulting from a disposition of a cryptocurrency generally depends on whether the property is a capital asset in the hands of the taxpayer. A taxpayer not in the trade or business of dealing in cryptocurrency will generally realize capital gain or loss on the sale or exchange of a cryptocurrency. A taxpayer realizes ordinary gain or loss on the sale or exchange of property that is not held as a capital asset.

Section 165(a) of the Code provides a deduction for losses sustained during the taxable year and not compensated for by insurance or otherwise. A loss is allowed as a deduction under section 165(a) only for the taxable year in which the loss is sustained. For this purpose, a loss is treated as sustained during the taxable year in which the loss occurs as evidenced by closed and completed transactions and as fixed by identifiable events occurring in such taxable year. Treas. Reg. section 1.165-1(d)(1).

Section 165(g) provides that if any security which is a capital asset becomes worthless during the taxable year, the loss shall be treated as a loss from the sale or exchange of a capital asset. Section 165(g)(2) defines a security as a share of stock in a corporation; a right to subscribe for, or to receive, a share of stock in a corporation; or a bond, debenture, note, or certificate, or other evidence of indebtedness, issued by a corporation or a government or political subdivision thereof, with interest coupons or in registered form. Cryptocurrency B is none of the items listed in section 165(g)(2), and therefore section 165(g) does not apply.

For individual taxpayers, section 67(b)(3) characterizes section 165(a) losses, other than those from casualty, theft, and wagering, as miscellaneous itemized deductions.[2] Under current law, section 67(g) disallows all miscellaneous itemized deductions for tax years beginning after December 31, 2017, and before January 1, 2026.

[2] Special rules apply to casualty, theft, and wagering losses. See sections 67(b)(3), 165(d) and (h), 1231, and Rev. Rul. 2009-9.

Worthless Cryptocurrency

Cryptocurrency B has substantially decreased in value; however, its value was greater than zero, it continued to be traded on at least one cryptocurrency exchange, and A did not sell, exchange, or otherwise dispose of the units of Cryptocurrency B. “The mere diminution in value of property does not create a deductible loss. An economic loss in value of property must be determined by the permanent closing of a transaction with respect to the property. A decrease in value must be accompanied by some affirmative step that fixes the amount of the loss, such as abandonment, sale, or exchange." *Lakewood Assocs. v. Commissioner*, 109 T.C. 450, 459 (1997); Treas. Reg. section 1.165-1; see also *Higgins v. Smith*, 308 U.S. 473, 475 (1940) ("[D]eductions are permitted for losses 'sustained during the taxable year.' The loss is sustained when realized by a completed transaction determining its amount."); *United States v. White Dental Mfg. Co.*, 274 U.S. 398, 401 (1927) ("The statute obviously does not contemplate and the regulations forbid the deduction of losses resulting from the mere fluctuation in value of property owned by the taxpayer.") (internal citation omitted).

A loss may be sustained, however, if a cryptocurrency becomes worthless, resulting in an identifiable event that occurs during the tax year for purposes of section 165(a). Whether an asset has become worthless is a question of fact. *Boehm v. Commissioner*, 326 U.S. 287, 293 (1945). In the case of a worthless asset, it is not necessary to relinquish title where there is a "subjective determination of worthlessness in a given year, coupled with a showing that in such year the asset in question is in fact essentially valueless." *Echols v. Commissioner*, 935 F.2d 703, 708 (5th Cir. 1991). In *Morton v. Commissioner*, the Board of Tax Appeals explained that "[t]he ultimate value of stock, and conversely its worthlessness, will depend not only on its current liquidating value, but also on what value it may acquire in the future through the foreseeable operations of the corporation. Both factors of value must be wiped out before we can definitively fix the loss." 38 B.T.A. 1270, 1278 (1945).

In *MCM Investment Management, LLC v. Commissioner*, the Tax Court applied the tests articulated in Echols and Morton to determine whether a partnership interest was worthless and allowed a claimed loss deduction under section 165. T.C. Memo. 2019-158 at *26-31, *62 (citing *Echols*, 935 F.2d at 708; *Morton*, 38 B.T.A. at 1278). The Tax Court found that the petitioner subjectively determined that its partnership interest was worthless and, to determine whether there were also objective indicia of worthlessness, examined whether the partnership interest had liquidating value or any potential future value. *Id.* at *28-29, *31-32. Because the petitioner could recover nothing for its partnership interest upon liquidation of the partnership and because there was no potential future value due to the third-party subordinated debt agreements at issue, the Tax Court determined that the partnership interest was worthless. *Id.* at *58, *62.

In this case, each unit of Cryptocurrency B had liquidating value, though it was valued at less than one cent at the end of 2022.[3] Cryptocurrency B continued to be traded on at least one cryptocurrency exchange, allowing for the possibility that it may increase in value in the future. Accordingly, Cryptocurrency B was not wholly worthless during 2022 as a result of its decline in value, and Taxpayer A did not sustain a bona fide loss under section 165(a) in 2022 due to worthlessness.

[3] As of January 1, 2023, fifteen cryptocurrencies valued at less than one cent per unit were actively traded with market caps ranging from approximately $77 million to over $4.4 billion along with 24 - hour trading volume ranging from $833, 000 to $92 million. See www.coinmarketcap.com for cryptocurrency market values.

Abandoned Cryptocurrency

Under Treas. Reg. section 1.165-2(a), a taxpayer sustains a loss under section 165(a) for the obsolescence or loss of usefulness of nondepreciable property if: "(1) the loss is incurred in a business or a transaction entered for profit; (2) the loss arises from the sudden termination of usefulness in the business or transaction; and (3) the property is permanently discarded from use, or the transaction is discontinued." Franklin v. Commissioner, T.C. Memo. 2020-127 at *18 (citing Treas. Reg. section 1.165-2(a)).

Taxpayer A did not take any action to abandon and permanently discard Taxpayer A's units of Cryptocurrency B during 2022. Abandonment is proven through an evaluation of the surrounding facts and circumstances, which must show: (1) an intention to abandon the property, coupled with (2) an affirmative act of abandonment. See *Massey-Ferguson, Inc. v. Commissioner*, 59 T.C. 220, 225 (1972) (citing *Boston Elevated Railway Co. v. Commissioner*, 16 T.C. 1084, 1108 (1951), *aff'd*, 196 F.2d 923 (1st Cir. 1952)). "The mere intention alone to abandon is not, nor is non-use alone, sufficient to accomplish abandonment." *Beus v. Commissioner*, 261 F.2d 176, 180 (9th Cir. 1958), *aff'g* 28 T.C. 1133 (1957). Some express manifestation of abandonment is required when the asset is an intangible property interest. *Citron v. Commissioner*, 97 T.C. 200, 209-10, 213 (1991) (finding that taxpayer abandoned a partnership interest when the limited partners voted to dissolve the partnership, directed that a final partnership return be filed, and treated partnership property as no longer belonging to the limited partners).

In this case, Taxpayer A maintained ownership of Cryptocurrency B through the end of 2022, even though the value of each unit of the cryptocurrency as of the end of the year was less than one cent. Taxpayer A retained the ability to sell, exchange, or otherwise dispose of Cryptocurrency B during 2022. Furthermore, Taxpayer A continued to exert dominion and control over Cryptocurrency B and, regardless of intent, did not take any affirmative steps to abandon the property during 2022. Therefore, Taxpayer A did not sustain a loss pursuant to section 165(a) in 2022 due to abandonment.[4]

[4] Because Taxpayer A did not take any action to abandon and permanently discard Cryptocurrency B, we need not discuss other requirements for a section 165 loss deduction, including the first two prongs set forth in Treas. Reg. section 1.165-2(a).

Zimmernan, "Chief Counsel Advice Creates Confusion over Ordinary Loss Deduction," *Journal of Taxation* (8/2023), criticizes that CCA in light of Code § 1234A (discussed below), Rev. Rul. 2004-58, Notice 2014-21, and Form 4797 instructions.

Code § 1234A was enacted to reduce opportunities to use abandonment to deduct what otherwise would have been a capital loss (although not necessarily in the example above),[1565]

[1565] The Senate Finance Committee Report on P.L. 97-34 (ERTA 1981) explained:

Treatment of Gain or Loss From Certain Terminations

Present Law.—The definition of capital gains and losses in section 1222 requires that there be a "sale or exchange" of a capital asset. Court decisions have interpreted this requirement to mean that when a disposition is not a sale or exchange of a capital asset, for example, a lapse, cancellation, or abandonment, the disposition produces ordinary income or loss.[1] This interpretation has been applied even to dispositions which are economically equivalent to a sale or exchange of a capital asset. If a taxpayer can choose the manner of disposing of a capital asset, he may sell or exchange it, if it has appreciated in value, to realize capital gains. However, a transaction in which a taxpayer has suffered an economic loss may be terminated in a manner which produces a fully deductible ordinary loss, even though the loss in substance is the equivalent of a loss from the disposition of a capital asset.

[1] See *Leh v. Comm'r*, 260 F2d 489 (9th Cir., 1952) and *Comm'r v. Pittston Co.*, 252 F2d 344 (2d Cir., 1958), *cert. denied*, 357 U.S. 919 (1958).

but the relevant committee report focused on futures contracts.[1566] Code § 1234A taxes as a capital gain or loss the "cancellation, lapse, expiration, or other termination" of (1) certain rights or obligations[1567] "with respect to property which is (or on acquisition would be) a capital asset in the hands of the taxpayer," or a qualified straddle[1568] "which is a capital asset in the hands of the taxpayer." The right to a Code § 1231 asset[1569] does not qualify for Code § 1234A treatment,

---

> *Reasons for Change*.—The committee believes that the change in the sale or exchange rule is necessary to prevent tax-avoidance transactions designed to create fully-deductible ordinary losses on certain dispositions of capital assets, which if sold at a gain, would produce capital gains. These transactions already cause significant losses to the Treasury.
>
> Some taxpayers and tax shelter promoters have attempted to exploit court decisions holding that ordinary income or loss results from certain dispositions of property whose sale or exchange would produce capital gain or loss. These decisions rely on the definition of capital gains and losses in section 1222 which requires that there be a sale or exchange of a capital asset.
>
> As a result of these interpretations, losses from the termination, cancellation, lapse, abandonment and other dispositions of property, which are not sales or exchanges of the property, are reported as fully deductible ordinary losses instead of as capital losses, whose deductibility is restricted. However, if such property increases in value, it is sold or exchanged so that capital gains, long-term when the holding period requirements are met, are reported.

[1566] The Senate Finance Committee Report on P.L. 97-34 (ERTA 1981) explained:

> Some of the more common of these tax-oriented ordinary loss and capital gain transactions involve cancellations of forward contracts for currency or securities.
>
> The committee considers this ordinary loss treatment inappropriate if the transaction, such as settlement of a contract to deliver a capital asset, is economically equivalent to a sale or exchange of the contract. For example, a taxpayer may simultaneously enter into a contract to buy German marks for future delivery and a contract to sell German marks for future delivery with very little risk. If the price of German marks thereafter declines, the taxpayer will assign his contract to sell marks to a bank or other institution for a gain equivalent to the excess of the contract price over the lower market price and cancel his obligation to buy marks by payment of an amount in settlement of his obligation to the other party to the contract. The taxpayer will treat the sale proceeds as capital gain and will treat the amount paid to terminate his obligation to buy as an ordinary loss.
>
> *Explanation of Provision*.—In order to insure that gains and losses from transactions economically equivalent to the sale or exchange of a capital asset obtain similar treatment, the bill adds a new section 1234A to the Code providing that gains or losses attributable to the cancellation, lapse, expiration, or other termination of a right or obligation with respect to personal property which is, or which would be if acquired, a capital asset in the hands of the taxpayer shall be treated as gains or losses from the sale of a capital asset. Property subject to this rule is any personal property (other than stock) of a type which is actively traded (sec. 1092(d)(1)).

[1567] Other than a "securities futures contract," as defined in Code § 1234B. Code § 1234B(c) provides the following definition (brackets quoted from RIA Checkpoint) and then authorizes certain regulations:

> For purposes of this section, the term "securities futures contract" means any security future (as defined in section 3(a)(55)(A) of the Securities Exchange Act of 1934, as in effect on the date of the enactment [12/21/2000] of this section).

[1568] A "section 1256 contract," which § 1256(b) provides includes any "regulated futures contract," "foreign currency contract," "nonequity option," " dealer equity option," or "dealer securities futures contract" but under Code § 1256(b)(2) does not include:

> (A) any securities futures contract or option on such a contract unless such contract or option is a dealer securities futures contract, or
>
> (B) any interest rate swap, currency swap, basis swap, interest rate cap, interest rate floor, commodity swap, equity swap, equity index swap, credit default swap, or similar agreement.

[1569] A Code § 1231 asset is not a capital asset. See part II.G.6.a Code § 1231 Property.

notwithstanding that the underlying asset's sale would have triggered long-term capital gain treatment.[1570]

When a taxpayer abandoned stock to obtain an ordinary loss rather than sell the stock for $20 million and have a capital loss, the Tax Court held that Code § 1234A applied to make the loss a capital loss,[1571] but the Fifth Circuit allowed an ordinary loss.[1572] The Tax Court's decision

---

[1570] *CRI-Leslie, LLC v. Commissioner*, 147 T.C. 217 (2016), *aff'd* 882 F.3d 1026 (11th Cir. 2018).

[1571] *Pilgrim's Pride Corp. v. Commissioner*, 141 T.C. 533 (2013). The official Tax Court Summary is:

> P is the successor in interest to G. G was contractually obligated to purchase, and in 1999 did purchase, securities from S and T for $98.6 million. The securities were capital assets of G.
> In 2004 S offered to redeem the securities for $20 million. G's board of directors decided to abandon the securities for no consideration because a $98.6 million ordinary loss would produce tax savings greater than the $20 million offered by S. On June 24, 2004, G voluntarily surrendered the securities to S and T for no consideration. On its Federal income tax return for the tax year ending June 30, 2004, G reported a $98.6 million ordinary abandonment loss deduction under I.R.C. sec. 165(a) pursuant to sec 1.165-2(a), Income Tax Regs.
> An abandonment loss cannot be claimed on a sale or exchange of property. Sec. 1.165-2(b), Income Tax Regs. Pursuant to I.R.C. sec. 165(f) losses from sales or exchanges of capital assets are subject to the limitations on capital losses under I.R.C. secs. 1211 and 1212. I.R.C. sec. 1234A requires gain or loss attributable to the cancellation, lapse, expiration, or other termination of a right with respect to property that is (or on acquisition would be) a capital asset in the hands of a taxpayer to be treated as gain or loss from the sale of a capital asset.
> *Held*: the securities are intangible property comprising rights that G had in the management, profits, and assets of S and T. Those rights were terminated when G surrendered the securities.
> *Held*, further, the $98.6 million loss on the surrender of the securities is attributable to the termination of G's rights with respect to the securities, which are capital assets, and pursuant to I.R.C. sec. 1234A the loss is treated as a loss from the sale or exchange of capital assets.
> *Held*, further, G is not entitled to an ordinary loss deduction for abandonment, because the loss is treated as a loss from the sale or exchange of capital assets pursuant to I.R.C. sec. 1234A. See sec. 1.165-2(b), Income Tax Regs.
> *Held*, further, pursuant to I.R.C. sec. 165(f), P's losses from the surrender of the securities, deemed to be a sale or exchange under I.R.C. sec. 1234A, are subject to the limitations on capital losses under I.R.C. secs. 1211 and 1212.

[1572] *Pilgrim's Pride Corp. v. Commissioner*, 779 F.3d 311 (5th Cir. 2015). The court held that Code § 1234A(1) did not apply:

> The primary question in this case is whether § 1234A(1) applies to a taxpayer's abandonment of a capital asset. The answer is no. By its plain terms, § 1234A(1) applies to the termination of rights or obligations with respect to capital assets (*e.g.* derivative or contractual rights to buy or sell capital assets). It does not apply to the termination of ownership of the capital asset itself. Applied to the facts of this case, Pilgrim's Pride abandoned the Securities, not a "right or obligation ... with respect to" the Securities. 26 U.S.C. § 1234A(1).
> [The court then explained why the IRS' position would have made Code § 1234A(2) meaningless.]
> For the foregoing reasons, we hold that 26 U.S.C. § 1234A(1) does not apply to Pilgrim's Pride's abandonment loss.[8]
> [8] Two administrative actions lend further support to Pilgrim's Pride's position. In Revenue Ruling 93-80, the IRS held that a taxpayer is allowed an ordinary loss on the abandonment of a partnership interest, even if the abandoned partnership interest is a capital asset. This Ruling directly contradicts the Commissioner's position in this case. Although the Commissioner asserts that Revenue Ruling 93-80 was superseded by a 1997 amendment to the statute at issue here, this begs the question presented in this case and is odd considering that the IRS never has formally revoked the Ruling and has relied on the Ruling since the statutory amendment.

seems consistent with the motivation for Code § 1234A, but the Fifth Circuit followed the statute's actual language.

When a contract right, commonly referred to as "phantom stock," passed to the employee's surviving spouse, who then contributed it to a partnership, the contribution to the partnership triggered taxation as income in respect of a decedent,[1573] converting the contract right to a capital asset in the partnership's hands; when the former employer paid on the contract, Code § 1234A applied to the proceeds.[1574] This case related to the surviving spouse's estate in *Estate of Hurford v. Commissioner*, T.C. Memo. 2008-278, which is cited in fn. 6440 in part III.B.1.g.i Private Annuities: Estate Planning Implications. The surviving spouse failed to report the contribution to the partnership on her income tax return, and it was too late to assess her return. T.C. Memo. 2008-278 held that the contract right was included in her estate directly, so the partnership received a basis step-up to its value on her estate tax return; but for Code § 2036 inclusion, the partnership would have needed to make a Code § 754 election, as described in part II.Q.8.e.iii.(c) When Code § 754 Elections Apply; Mandatory Basis Reductions When Partnership Holds or Distributes Assets with Built-In Losses Greater Than $250,000; the Code § 2036 exception is described in fn 5695.

The contract right was a capital asset because it was not excluded from the definition of capital asset. *Hurford Investments No 2, Ltd. v. Commissioner*, fn. 1574, held:

> *Section 1221*. Section 1221 defines the term "capital asset." It's a very broad section, and defines the term as all property that isn't specifically excluded by one of a list of exceptions. I.R.C. § 1221(a); 26 C.F.R. § 1.1221-1(a). Importantly, the character of property can change depending on who holds it. A car dealership's cars, for example, are inventory to the dealership, so the cars would fall into the category of non-capital assets in the hands of a car dealer. But a car becomes a capital asset in the hands of the usual car buyer because it no longer fits one of the non-capital asset definitions in section 1221. *See*, *e.g.*, *David Taylor Enters., Inc. v. Commissioner*, 89 T.C.M. (CCH) 1369 (2005). The same holds true in more complicated cases, such as inventory of a sole proprietorship which become capital assets in the hands of the business owner's estate. *Estate of Ferber v. Commissioner*, 22 T.C. 261 (1954); see also *Berry Petroleum Co. v. Commissioner*, 104 T.C. 584, 650 n. 48 (1995) (noting that the character of property for one company may be different for a successor company). HI-2's interest in the phantom stock doesn't fit into one of the exceptions listed in section 1221,[2] so it seems it's a capital asset.
>
> [2] The phantom stock is not (a) stock in trade (*i.e.*, dealer property), (b) depreciable property used in a trade or business, (c) a copyright or other similar item, (d) an account or note receivable acquired in the ordinary course of business, (e) a U.S. Government publication, (e) a commodities derivative financial instrument, (f) a hedging transaction, or (g) supplies used or consumed in the ordinary course of business. I.R.C. § 1221(a).

Furthermore, the substitute-for-ordinary-income doctrine did not apply. *Hurford Investments No 2, Ltd. v. Commissioner*, fn. 1574, held:

[1573] Code § 691(a)(2). See part II.H.2.e IRD Assets Not Eligible for a Basis Step-Up.
[1574] *Hurford Investments No 2, Ltd. v. Commissioner*, Docket No. 23017-11 (4/17/2017), https://dawson.ustaxcourt.gov/case-detail/23017-11.

> But caselaw throws another exception at us that we must consider – the substitute-for-ordinary-income doctrine. Sometimes something must be taxed as ordinary income even if it doesn't fit one of the exceptions specifically listed in section 1221. The classic example of this doctrine is the sale of a winning lottery ticket. Lump-sum payments or annuity payments for winning the lottery are taxed as ordinary income. But what if a taxpayer sells his right to future annuity payments? The IRS always argues that a sale of such property doesn't produce a capital gain. *See*, *e.g.*, *Davis v. Commissioner*, 119 T.C. 1, 5-6 (2002). The courts agree. We noted in *Davis* that the Supreme Court said "[w]hile a capital asset is defined . . . as 'property held by the taxpayer,' it is evident that not everything which can be called property in the ordinary sense and which is outside the statutory exclusions qualifies as a capital asset." *Id.* At 7 (quoting *Commissioner v. Gillette Motor Transp., Inc.*, 364 U.S. 130, 134 (1960)). Should the phantom stock receive similar treatment? If Gary had lived to see the liquidation of the phantom account it would've been deferred compensation, and taxed as ordinary income. Why should that change now?
>
> The reason is that HI-2 isn't Gary Hurford and the phantom stock isn't the same as a winning lottery ticket. We've already said the character of property can change when it's transferred to another party, so the character in the hands of Gary or Thelma shouldn't automatically be applied to HI-2. In *Davis* we said that "[i]t is well established that the purpose for capital-gains treatment is 'to afford capital gains treatment only in situations typically involving the realization of appreciation in value accrued over a substantial period of time, and thus to ameliorate the hardship of taxation of the entire gain in one year.'" 119 T.C. at 7 n. 9 (quoting *Gillette Motor Transp.*, 364 U.S. at 134). The winning lottery ticket doesn't fit this description because it represents the right to guaranteed future payments of a set amount. The phantom stock, on the other hand, could increase or decrease in value over time, similar to ordinary stock. Once HI-2 acquired it, its value was inextricably linked to the value of Hunt Oil, which was far from set in stone. Unlike Gary, HI-2 couldn't do anything to affect its value, but rather simply held it and hoped it would appreciate in value. This distinguishing characteristic is enough for us to conclude that it is a capital asset of HI-2's.

Finally, the employer's paying the contract was a qualifying ""cancellation, lapse, expiration, or other termination." *Hurford Investments No 2, Ltd. v. Commissioner*, fn. 1574, discussed the issue:

> Winning capital-asset status is only half the battle for HI-2. To receive capital-gains rates, the income must be from a "sale or exchange" of that capital asset. I.R.C. § 1222. "The touchstone for sale or exchange treatment is consideration. If in return for assets any consideration is received, even if nominal in amount, the transaction will be classified as a sale or exchange." *LaRue v. Commissioner*, 90 T.C. 465, 483 (1988). The Commissioner argues that even if we find the phantom stock is a capital asset, HI-2 never sold or exchanged it. Instead, Hunt Oil simply fulfilled a contractual obligation. The Commissioner points us to *Pounds v. United States*, 372 F.2d 342 (5th Cir. 1967).

After discussing *Pounds*, the court noted:

> HI-2 doesn't dispute that under *Pounds* it would have a big problem. HI-2 argues instead that Founds has been superseded by a new Code section – section 1234A. Section 1234A says that "[g]ain or loss attributable to the cancellation, lapse, expiration, or other termination of . . . a right or obligation . . . with respect to property which is . . . a

capital asset in the hands of the taxpayer . . . shall be treated as gain or loss from the sale of a capital asset." If a transaction meets the definition in section 1234A, it counts as capital gain or loss from a sale.

> HI-2 argues that when its right to participate in the phantom-stock plan ended in 2006 and Hunt Oil paid out the value of the phantom account, HI-2's interest in the phantom stock was cancelled, lapsed, expired, or was otherwise terminated. HI-2 thinks this means that there was a sale or exchange in 2006, so it should receive capital-gains treatment under section 1234A. This motion is thus affected by the Fifth Circuit's decision in *Pilgrim's Pride Corp. v. Commissioner*, 779 F.3d 311 (5th Cir. 2015), *rev'g* 141 T.C. 533 (2013).

The court then reviewed the Fifth Circuit's decision in *Pilgrim's Pride*:

> It held that section 1234A(1) applies only to the termination of rights or obligations to buy or sell capital assets, not the termination of their ownership. *Pilgrim 's Pride*, 779 F.3d at 315. So, a contractual right to buy or sell a capital asset would fall into section 1234A(1) under the Fifth Circuit's interpretation. The Fifth Circuit tells us that if there's no sale or exchange and there's no termination of a right or obligation to buy or sell, then there can't be capital-gains treatment. *Id.*

> So which category are we dealing with here--the termination of a right to buy or sell or the termination of ownership? Remember that both parties to the phantom-stock arrangement had the right to liquidate the account at any time. When Hunt Oil liquidated the phantom stock and distributed the proceeds, it ended HI-2's right to sell the phantom stock when it chose. We think that means there was a termination of a right to buy or sell a capital asset, and not an abandonment of property, under the Fifth Circuit's interpretation of 1234A(1). HI-2 still owned the rights to the phantom stock or, after the liquidation, to the cash proceeds. We therefore conclude that the transaction was a sale or exchange of a right to sell a capital asset under section 1234A(1) and HI-2 is entitled to capital-gains treatment.

TAM 200427025 asserted that Code § 1234A did not apply to the termination of a long-term power purchase agreement.

Code § 1234A, by its own terms, does not apply to "the retirement of any debt instrument (whether or not through a trust or other participation agreement)."

Code § 1234A has reportedly been used to obtain capital gain treatment on the surrender of a life insurance policy.[1575]

Code § 1234A has attracted attention in the merger and acquisition arena.[1576]

[1575] See fn. 4419, found in part II.Q.4.d Income Tax on Distributions or Loans from Contract (Including Surrender of Policy).

[1576] For more about Code § 1234A, see Schnee and Seago, "The Application of Section 1234A: Explanation, Revision or Expansion?" *Journal of Taxation* (4/2017), also citing *Alderson v. U.S.*, 686 F.3d 791 (9th Cir. 2012); *Patrick v. Commissioner*, 142 T.C. 124 (2014); Letter Rulings 200823012 and 201123044, FAA 20163701F; and ILM 201642035. The article concluded:

II.G.9. Tax Distributions from Partnerships and S Corporations

S corporations and partnerships generally do not pay income tax.[1577] Instead, their income is taxed to their owners, whether or not their owners receive distributions. Accordingly, it is not uncommon for their organizational documents to mandate distributions to pay income tax.[1578]

Sometimes entities pay their owners' taxes directly, as a matter of convenience, treating payments to taxing authorities as distributions to the owners followed by the owners making payments of those taxes. Requiring this payment to taxing authorities might help ensure that these payments continue if the entity later files for bankruptcy.[1579] The IRS must honor this designation of payments.[1580]

> Recently, IRS rulings and cases have considered the application of Section 1234A. They appear to have expanded its scope to include M&A transactions but limit the definition of capital assets to those that would be treated as capital based on the historic cases and rulings. This includes applying Section 1221 exactly as enacted to the extent it lists assets as non-capital assets except if the court-created narrow definitional approach applies. The application of Section 1234A to M&A transactions is very significant since corporations pay ordinary income tax on capital gains but have limited deductions for capital losses.

A panel (including governmental) at the American Bar Association Section of Taxation's January (Midyear) 2017 meeting discussed these issues, including the observation that CCA 201642035 included a footnote disagreeing with the conclusion of Letter Ruling 200823012 that a termination fee was ordinary income. Slides are saved as Thompson Coburn doc. 6555254. Panelists suggested that regulations under Code § 263(a) capitalized expenditures investigating a possible acquisition as a general intangible asset under *Indopco, Inc. v. Commissioner*, 503 U.S. 79 (1992), without identifying the intangible asset or dealing with its later being rolled into a stock purchase or being abandoned; they said that Treasury had intended to address those issues later but never got around to it.

[1577] However, S corporations that had been C corporations might pay a tax on any built-in gain (excess of value over tax basis) if property that survived the conversion is sold within 10 years after the conversion. See part II.P.3.b.ii Built-in Gain Tax.

[1578] For clients who want to spend time and money on a sophisticated tax distribution clause, consider some of the ideas in Schneider and O'Connor, "A Partnership Tax Distribution Menu: Just Say No to Phantom Income," *Business Entities*, Vol. 15, No. 1, at page 4 (January/February 2013).

[1579] *In re Kenrob Information Tech. Solutions, Inc.*, No. 09-19660-RGM (Bankr. E.D. Va. 7/10/12). However, *In re DBSI, Inc.*, 561 B.R. 97 (D. Idaho 2016) (https://goo.gl/eCva3u), distinguished the affirmative act of making an S election in *Kenrob* from the members' decision in *DBSI* not to elect taxation as a C corporation. The *DBSI* opinion did not mention whether the members affirmatively agreed not to be taxed as a C corporation in exchange for an agreement to make tax distributions; however, the operating agreement required tax distributions "if the cash position of the Company [was] sufficient to allow a distribution." The court also criticized the tax distributions being made to the IRS when they were required to made to the members; that view is nonsense, in that the members received credit from the IRS for payments made on their behalf.

[1580] *Dixon v. Commissioner*, 141 T.C. 173 (2013) (a reviewed opinion, holding that the individual taxpayers received credit as of the date of payment and not as withholding). Action on Decision 2014-001 recommended nonacquiescence, reasoning:

> The Service disagrees with the Tax Court that employment tax payments that were not withheld at the source may be designated by an employer to a specific employee's income tax liability. Pursuant to sections 3402 and 31(a), an employee may only get a credit for income taxes withheld at the source. If the income tax is not withheld at the source, a later payment by the employer of its liability for the tax it should have withheld will not result in a credit to the employee. In the absence of a statutory credit, the Dixons cannot rely on the rule allowing designation of partial voluntary payments. *See* Rev. Proc. 2002-26. Such rule only permits a taxpayer to designate a payment toward its own tax liabilities, such as where an employer

II.G.10. Distributing Profits in Excess of Tax Distributions

Generally, a business owner should withdraw as much as possible from the business so long as the business is funded in a responsible way. The idea is to expose enough to those with claims against the entity to avoid "piercing the corporate veil" (which applies to LLCs and other unincorporated limited liability entities), while not exposing any more than necessary.[1581]

Generally, any equity in an entity is exposed to the entity's creditors. If an owner loans money to an entity, that loan would compete with all other claims against the entity. Although a creditor might ask a court to use "piercing the corporate veil" theories to provide less protection to the owner who is a creditor than the protection granted other creditors, presumably an owner who withdraws money and then loans it to the company would be in a better position than an owner who simply leaves his money in the company.

S corporation owners also have tax motivations to withdraw funds and reinvest them separately. If an S corporation buys long-term investments and later decides to distribute them, the distribution would be a deemed sale[1582] – unlike a partnership, which generally can distribute assets that the partnership bought without triggering a taxable event.[1583] The owners of an S corporation might consider taking their distributions and forming an LLC taxed as a partnership, which would then be available to guarantee the S corporation's loans, own property leased to the S corporation, fund cross-purchases, start new businesses, etc. Although the LLC's operating agreement might require them to make contributions of such distributions from the S corporation, they should avoid any agreement that the IRS might argue would constitute part of the S corporation's governing documents; this is necessary to avoid an IRS argument that the LLC is essentially an owner of some S corporation stock, because a partnership is not an eligible shareholder.

If a shareholder or the LLC described above loans money to the S corporation, what would be an appropriate interest rate? My gut reaction would be the prime rate or whatever the company pays on its line of credit. Consider, however, that any interest income generated would be subject to the net investment income (NII) tax,[1584] whereas any interest deductions generated will not reduce NII if the shareholders sufficiently participate in the business and therefore business operations do not generate NII.[1585] Therefore, to minimize taxes, one might consider charging only the applicable federal rate (AFR), which might very well be short-term, which

---

> designates a payment of employment taxes toward the trust fund portion of its employment tax liability. *See Wood v. United States*, 808 F.2d 411, 416 (5th Cir. 1987). Here, Tryco could not designate that its employment tax payments be applied to the income taxes of the Dixons because such income taxes were owed by the Dixons, and not Tryco.
>
> Accordingly, the Service will not follow the holding in *Dixon* that an employer can designate payments of its employment taxes to income taxes of specific employees, and effectively override the statutory limitations in the availability of a credit under section 31(a). We have, however, declined to pursue appeal of this case because due to its unique facts, Dixon has limited precedential effect.

If the taxpayer does not instruct the bank that accepts direct deposits but does not instruct the IRS, the taxpayer has not designated the payment. *Valteau, Harris, Koenig and Mayer v. Commissioner*, T.C. Memo. 2014-144.

[1581] See part II.F Asset Protection Planning.

[1582] See part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders.

[1583] See part II.Q.8.b.i Distribution of Property by a Partnership.

[1584] See part II.I.5 What is Net Investment Income Generally.

[1585] See part II.I.8 Application of 3.8% Tax to Business Income, especially parts II.I.8.f Summary of Business Activity Not Subject to 3.8% Tax and II.I.8.g Structuring Businesses in Response to 3.8% Tax.

generally is the lowest AFR. Be sure to fully document the loan, not only to prove it bona fide but also because that can have the best tax results when an S corporation is involved.[1586]

II.G.11. Personal Service Corporations

A C corporation that is a "qualified personal service corporation" is taxed at the highest marginal corporate income tax rate.[1587] A "qualified personal service corporation" is any corporation that satisfies both of these tests:[1588]

- substantially all of the activities of which involve the performance of services in the fields of health, law, engineering, architecture, accounting, actuarial science, performing arts, or consulting, and

- substantially all of the stock of which (by value) is held directly or indirectly by employees performing services for such corporation in connection with the activities involving a field described above, retired employees who had performed such services for such corporation, the estate of any individual described above, or any other person who acquired such stock by reason of the death of an individual described above within two years after that individual's death.

Commissioned salesmen frequently describe themselves as consultants, but they are treated as salesmen and not consultants for purposes of this rule.[1589]

These types of entities are one of the few types of C corporations with more than $25 million of annual gross receipts that can use the cash receipts and disbursements method of accounting.[1590]

Generally, they also are required to file income tax returns using a calendar year.[1591]

II.G.12. Planning for C Corporation Using the Lowest Corporate Brackets and Is Owned by Taxpayer with Modest Wealth

Taxpayers in the lowest tax bracket do not pay federal income tax on qualified dividends.

Consider paying dividends when the shareholders are in the lowest tax bracket to reduce earnings and profits without incurring federal income tax.

If the corporation is not a personal service corporation[1592] for tax years beginning before January 1, 2018 or is any C corporation for tax years after that, reconsider a strategy of paying as much reasonable compensation as necessary to zero out the corporation's taxable income. Instead, consider having the corporation pay tax to the extent it is in a low bracket and pay

[1586] See part II.G.4.d.ii.(b) Consequences of Using Shareholder Debt to Deduct S Corporation Losses, especially the text accompanying fns. 1218-1220.
[1587] Code § 11(b)(2).
[1588] Code § 448(d)(2).
[1589] Reg. § 1.448-1T(e)(4)(iv), particularly clause (A) and Example (1) of clause (B).
[1590] Code § 448(b)(2). See part II.P.3.d Conversion from S Corporation to C Corporation, fns 4023-4026.
[1591] Code § 444(i)(1). Note, however, that "personal service corporation" is defined differently for these purposes. Code § 444(i)(2).
[1592] See part II.G.11 Personal Service Corporations.

nontaxable dividends to the shareholder.[1593] Make sure, however, that the employee-shareholder's compensation is not unreasonably low.[1594]

Note, however, that the corporation and shareholder may be subject to state or local income tax, which may reduce the efficacy of this idea.

When taxpayers pay tax on qualified dividends, see part II.E.1 Comparing Taxes on Annual Operations of C Corporations and Pass-Through Entities, especially part II.E.1.a Taxes Imposed on C Corporations.

II.G.13. Loans from Entity to Employee

The IRS has attempted to recast a forgivable loan to an employee as a payment of compensation for future services, with the portion not forgiven deemed to be a liquidated damages clause for failure to complete the term of service.[1595]

II.G.14. Planning for Upcoming Sale That Is Not Imminent – Using an Installment Sale Now to Defer Tax on Upcoming Sale

If the sale is more than two years down the road, an installment sale might help fix the basis. See part II.Q.3 Installment Sales - Deferring Tax on Lump Sum Payout Expected More than Two Years in the Future, which deals with selling an interest in a business but also applies to other transactions.

Also consider using a partnership to shift basis to the property to be sold. See part II.Q.8.b.i.(e) Basis in Property Distributed from a Partnership; Possible Opportunity to Shift Basis or Possible Loss in Basis When a Partnership Distributes Property.

Consider contributing the property to a charitable remainder trust, if the property would not generate unrelated business taxable income on the sale. See part II.Q.7.c.iv Using a Charitable Remainder Trust to Avoid Built-in Gain Tax, analysis from which has uses beyond just the built-in gain tax setting.

[1593] For how to try to get cash out of C corporations annually, see Zupanc, "Getting Cash out of a Closely Held Corporation," 92 *Practical Tax Strategies* 65 (Feb. 2014), which concluded:

> The exact amount of net tax savings or costs depends on the amount of the shareholder's (and spouse's if married filing jointly) earnings, AGI, modified AGI, taxable income, net investment income, the phase-out effect on exemptions and itemized deductions, and AMT, as well as the marginal rate of the C corporation. One general rule is that rental income from a C corporation with a corresponding deduction is usually the most advantageous choice as compared to salaries and qualified dividends for all (Alice, Basu, Claudia, and Dafir) but the highest marginal rate shareholders or when the C corporation has a 15% marginal rate. A second general rule is that the highest marginal rate shareholders (Eugenie) who are subject to the 3.8% net investment surtax will find salaries the most advantageous means to shift income, except when that C corporation is in the 15% bracket. A third general rule is that salaries are the second choice for tax-advantaged transfers to shareholders unless the C corporation is in the 15% marginal rate or the shareholder is in the 0% marginal rate for qualified dividends, which makes qualified dividends the best second choice.

I have not carefully read the article, and one should certainly use healthy skepticism, given that at the beginning of the Overview the author incorrectly referred to Code § 1411 as a Medicare contribution tax.

[1594] See part II.A.2.c Avoiding Double Taxation and Self-Employment Tax, especially fn. 79.

[1595] TAM 200040004.

II.G.15. Limitations on the Use of Installment Sales

Any depreciation recapture taxable as ordinary income under Code § 1245 or 1250 is not eligible for installment deferral, although that disallowance does not taint the rest of the gain; this includes such ordinary income taxed under Code § 751; see part II.Q.8.e.ii.(c) Availability of Installment Sale Deferral for Sales of Partnership Interests.[1596]

Generally, deferral does not apply to any installment obligation arising out of a sale of stock or securities traded on an established securities market or, to the extent provided in regulations, property (other than stock or securities) of a kind regularly traded on an established market (although there might be a way around that rule).[1597]

Generally, if an installment obligation is satisfied at other than its face value or distributed, transmitted, sold, or otherwise disposed of, the deferred gain is accelerated.[1598] Installment notes transferred outright (not in trust) to a spouse or pursuant to a divorce are not accelerated.[1599] Various business formations and liquidations might escape gain recognition.[1600] Reg. § 1.453-9(c), "Disposition from which no gain or loss is recognized," provides:

(1)

(i) Under section 453(d)(4)(A), no gain or loss shall be recognized to a distributing corporation with respect to the distribution made after November 13, 1966, of installment obligations if (a) the distribution is made pursuant to a plan for the complete liquidation of a subsidiary under section 332, and (b) the basis of such obligations in the hands of the distributee is determined under section 334(b)(1).

(ii) Under section 453(d)(4)(B), no gain or loss shall be recognized to a distributing corporation with respect to the distribution of installment obligations if the distribution is made, pursuant to a plan for the complete liquidation of a corporation which meets the requirements of section 337, under conditions whereby no gain or loss would have been recognized to the corporation had such installment obligations been sold or exchanged on the day of the distribution. The

---

[1596] Code § 453(i) provides that any recapture income shall be recognized in the year of the disposition and that any gain in excess of the recapture income shall be taken into account under the installment method. as used here, "recapture income" means the amount that would be treated as ordinary income under Code §§ 1245 or 1250 (including indirectly through Code § 751) for the taxable year of the disposition and as if all payments to be received were received in the taxable year of disposition. See part II.G.6.b Code § 1245 Property.

[1597] Code § 453(k)(2), which further provides, "The Secretary may provide for the application of this subsection in whole or in part for transactions in which the rules of this subsection otherwise would be avoided through the use of related parties, pass-thru entities, or intermediaries." For opportunities that remain in light of no regulations having been promulgated, see part II.Q.8.e.ii.(c) Availability of Installment Sale Deferral for Sales of Partnership Interests, especially fn. 5659.

[1598] Code § 453B.

[1599] Code § 453B(g), referring to Code § 1041(a).

[1600] Cross-references include Code §§ 332, 337, 351, 361, 721, and 731, with exceptions for hot assets, depreciation recapture, etc. I have not researched the effect of any apparent conflict with Code § 453B. In a Code § 351 transaction, the contributing shareholder recognizes gain based on the value of stock received in exchange for the obligation, but any excess amount on the installment note is deferred. Rev. Rul. 73-423, which would be integrated into regulations under Prop. Reg. § 1.453B-1(c). Also see part II.P.3.a From Corporations to Partnerships and Sole Proprietorships (no acceleration when corporation converts to partnership).

preceding sentence shall not apply to the extent that under section 453(d)(1) gain to the distributing corporation would be considered as gain to which section 341(f)(2), 617(d)(1), 1245(a)(1), 1250(a)(1), 1251(c)(1), 1252(a)(1), or 1254(a)(1) applies, computed under the principles of the regulations under such provisions. See paragraph (d) of § 1.1245-6, paragraph (c)(6) of § 1.1250-1, paragraph (e)(6) of § 1.1251-1, paragraph (d)(3) of § 1.1252-1, and paragraph (d) of § 1.1254-1.

(2) Where the Code provides for exceptions to the recognition of gain or loss in the case of certain dispositions, no gain or loss shall result under section 453(d) in the case of a disposition of an installment obligation. Such exceptions include: Certain transfers to corporations under sections 351 and 361; contributions of property to a partnership by a partner under section 721; and distributions by a partnership to a partner under section 731 (except as provided by section 736 and section 751).

(3) Any amount received by a person in payment or settlement of an installment obligation acquired in a transaction described in subparagraphs (1) or (2) of this paragraph (other than an amount received by a stockholder with respect to an installment obligation distributed to him pursuant to section 337) shall be considered to have the character it would have had in the hands of the person from whom such installment obligation was acquired.

Special considerations apply when installment notes are among assets of a corporation being deemed sold in a deemed asset sale when sufficiently controlling stock is being sold.[1601]

Note the exceptions for Code § 721 (subpart II.M.3.a General Rule: No Gain Or Loss on Contribution to Partnership, which is in part II.M.3 Buying into or Forming a Partnership) and Code § 731 (part II.Q.8.b.i.(a) Code § 731: General Rule for Distributions, which is in part II.Q.8.b.i Distribution of Property by a Partnership), the latter subject to Code § 751 (part II.Q.8.b.i.(g) Code § 751 – Hot Assets), among other exceptions. Under these provisions, if one is concerned about accelerating an installment note when distributing to various beneficiaries after one's death (see below), one might contribute the note to a partnership, and after death the partnership interest can be distributed to beneficiaries. The built-in gain would be specially allocated to the person contributing the note and that person's successors in interest.[1602]

[1601] See fn 5777 in part II.Q.8.e.iii.(f) Code §§ 338(g), 338(h)(10), and 336(e) Exceptions to Lack of Inside Basis Step-Up for Corporations: Election for Deemed Sale of Assets When All Stock Is Sold.

[1602] See part II.Q.8.b.i.(f) Code §§ 704(c)(1)(B) and 737 – Distributions of Property When a Partner Had Contributed Property with Basis Not Equal to Fair Market Value or When a Partner Had Been Admitted When the Partnership Had Property with Basis Not Equal to Fair Market Value. Reg. § 1.704-3(a)(8)(ii), "Disposition in an installment sale," provides:

> If a partnership disposes of section 704(c) property in an installment sale as defined in section 453(b), the installment obligation received by the partnership is treated as the section 704(c) property with the same amount of built-in gain as the section 704(c) property disposed of by the partnership (with appropriate adjustments for any gain recognized on the installment sale). The allocation method for the installment obligation must be consistent with the allocation method chosen for the original property.

Special rules apply to installment notes includible in the holder's gross estate.[1603] As income in respect of a decedent, an installment note does not receive a basis step-up.[1604] Specifically bequeathing an installment note to the obligor accelerates income to the estate, and the bequest is not a distribution triggering the income distribution deduction[1605] (although other distributions might); however, such a bequest does not necessarily constitute a step transaction indicating an intention to forgive the note.[1606]

Transfers to[1607] or from[1608] nongrantor trusts trigger acceleration.

Also, if any person disposes of property to a related person[1609] (the "first disposition"), and the person making the first disposition receives all payments with respect to such disposition, the related person disposes of the property (the "second disposition"), then the amount realized with respect to such second disposition shall be treated as received at the time of the second disposition by the person making the first disposition.[1610] However, for property ither than

---

1603 Code § 691(a)(4), (5). A transfer at death does not accelerate gain until the note is cancelled or distributed. ¶ 108.13.3 Obligations Held at Death, Bittker & Lokken, *Federal Taxation of Income, Estates, and Gifts* (WG&L), citing S. Rep. No. 1000, 96th Cong., 2d Sess., reprinted in 1980-2 C.B. 494, 508, which provides as follows:

> The bill provides that any previously unreported gain from an installment sale will be recognized by a deceased seller's estate if the obligation is transferred or transmitted by bequest, devise, or inheritance to the obligor or is cancelled by the executor. In the absence of some act of cancelling the obligation by distribution or notation which results in cancellation under the Uniform Commercial Code or other local law, the disposition will be considered to occur no later than the time the period of administration of the estate is concluded.
>
> If the cancellation occurs at the death of the holder of the obligation, the cancellation is to be treated as a transfer by the estate of the decedent. However, if the obligation were held by a person other than the decedent, such as a trust, the cancellation will be treated as a transfer immediately after the decedent's death by that person.
>
> If the decedent and the obligor were related persons (within the meaning of new Code section 453(f)(1)), the fair market value of the obligation for disposition purposes is not to be treated as less than its face amount.

For purposes of this provision, if an installment obligation becomes unenforceable, it will be treated as if it were cancelled.

See also the text accompanying fn 6425 in part III.B.1.f Self-Canceling Installment Notes.

1604 Code § 1014(c).

1605 Letter Ruling 9108027.

1606 In the *Estate of Morrissette v. Commissioner*, the Tax Court brushed aside the IRS' step transaction argument when the temporary conservator for a 94-year-old entered into a generational split-dollar agreement and amended her estate plan to bequeath the interest in the split-dollar arrangement to the other party to the agreement. This was an economic benefit transaction and not a loan transaction, so it is not directly on point to my comment about bequeathing the note. The case is discussed in fns. 4538-4540 in part II.Q.4.f.ii.(b) Split-Dollar Economic Benefit Arrangement under Reg. § 1.61-22.

1607 Rev. Rul. 67-167.

1608 Rev. Rul. 55-159.

1609 Code § 453(f)(1), "Related person," provides:

> Except for purposes of subsections (g) and (h), the term "related person" means -
>
> (A) a person whose stock would be attributed under section 318(a) (other than paragraph (4) thereof) to the person first disposing of the property, or
>
> (B) a person who bears a relationship described in section 267(b) to the person first disposing of the property.

See parts II.G.4.l.iii Code § 267 Disallowance of Related-Party Deductions or Losses and II.Q.7.a.viii Code § 318 Family Attribution under Subchapter C.

1610 Code 453(e)(1).

marketable securities, that rule applies only if the second disposition is within 2 years of the first disposition.[1611]

To avoid accelerating upon a second disposition, a taxpayer might sell to an unrelated party for a note. A deferred sale trust is a trust involving unrelated third parties who invest the sale proceeds and pay the installment note to the seller. The seller takes tremendous risk, in that the seller has no control over how the proceeds are invested and receives only a fixed interest return. The trustee and beneficiaries of the deferred sale trust are not personally liable to the seller, so they are incentivized to take risk to get return in excess of the note payments; and I have been informed of some cases where the risks resulted in the trust defaulting on the note. Quite frankly, I believe that forfeiting equity returns and taking extra risk are too great a cost; therefore, I am very skeptical when approached about deferred sale trusts. Some deferred sales promoters are sensitive to these risks and try to make arrangements that reduce this risk. CCA 202118016 argues against various less risky approaches:

> This is in response to your request for our analysis regarding "Monetized Installment Sale" transactions. Note that because there are multiple promoters/sub-promoters, there could be variations in the way transactions are structured. Some of the points below might not apply to every transaction. However, there do seem to be common features that make the transactions problematic. And we generally agree that the theory on which promoters base the arrangements is flawed. The general structure raises a number of issues including, but not limited to, the following:
>
> 1. *No genuine indebtedness*. At least one promoter contends that the seller receives the proceeds of an unsecured nonrecourse loan from a lender, but a genuine nonrecourse loan must be secured by collateral. A "borrower" who is not personally liable and has not pledged collateral would have no reason to repay a purported "loan." See *Estate of Franklin v. CIR*, 544 F.2d 1045 (9th Cir. 1976). Therefore, the loan proceeds would be income.
>
> 2. *Debt secured by escrow*. In one arrangement, the promoter states that the lender can look only to the cash escrow for payment. It appears that, in effect, the cash escrow is security for the loan to taxpayer. If so, taxpayer economically benefits from the cash escrow and should be treated as receiving payment under the "economic benefit" doctrine for purposes of section 453. *Compare Reed v. CIR*, 723 F.2d 138 (1st Cir. 1983).
>
> 3. *Debt secured by dealer note*. Alternatively, the Monetization Loan to taxpayer is secured by the right to payment from the escrow under the installment note from the dealer. This would result in deemed payment under the pledging rule, under which loan proceeds are treated as payment of the dealer note. Section 453A(d).
>
> 4. *Section 453(f)*. The intermediary does not appear to be the true buyer of the asset sold by taxpayer. Under section 453(f), only debt instruments from an "acquirer" can be excluded from the definition of payment and thus not constitute payment for purposes of section 453. Debt instruments issued by a party that is not the "acquirer" would be considered payment, requiring recognition of gain. See Rev. Rul. 77-414,

[1611] Code 453(e)(2).

1977-2 C.B. 299; Rev. Rul. 73-157, 1973-1 C.B. 213; and *Wrenn v. CIR*, 67 T.C. 576 (1976) (intermediaries ignored in a back-to-back sale situation).

5. *Cash Security*. To the extent the installment note from the intermediary to the seller is secured by a cash escrow, taxpayer is treated as receiving payment irrespective of the pledging rule. Treas. Reg. section 15a.453-1(b)(3) ("Receipt of an evidence of indebtedness which is secured directly or indirectly by cash or a cash equivalent ... will be treated as the receipt of payment.")

6. *NSAR 20123401F is distinguishable*. The case addressed in the memorandum did not involve an intermediary. Further, loans to a disregarded entity wholly owned by seller were secured by the buyer's installment notes, but the pledging rule of section 453A(d) was not applicable. There is an exception to the pledging rule for sales of farm property, which applied in the case.

The preamble to the proposed regulations, "Identification of Monetized Installment Sale Transactions as Listed Transactions," Agency/Docket Number REG-109348-22 (8/4/2023), RIN 1545-BQ69 (the "NPRM"), explains in part IV, "Tax Avoidance Using Monetized Installment Sales":

> The Treasury Department and the IRS are aware that promoters are marketing transactions that purport to convert a cash sale of appreciated property by a taxpayer (seller) to an identified buyer (buyer) into an installment sale to an intermediary (who may be the promoter) followed by a sale from the intermediary to the buyer. In a typical transaction, the intermediary issues a note or other evidence of indebtedness to the seller requiring annual interest payments and a balloon payment of principal at the maturity of the note, and then immediately or shortly thereafter, the intermediary transfers the seller's property to the buyer in a purported sale of the property for cash, completing the prearranged sale of the property by seller to buyer. In connection with the transaction, the promoter refers the seller to a third party that enters into a purported loan agreement with the seller. The intermediary generally transfers the amount it has received from the buyer, less certain fees, to an account held by or for the benefit of this third party (the account). The third party provides a purported non-recourse loan to the seller in an amount equal to the amount the seller would have received from the buyer for the sale of the property, less certain fees. The "loan" is either funded or collateralized by the amount deposited into the account. The seller's obligation to make payments on the purported loan is typically limited to the amount to be received by the seller from the intermediary pursuant to the purported installment obligation. Upon maturity of the purported installment obligation, the purported loan, and the funding note, the offsetting instruments each terminate, giving rise to a deemed payment on the purported installment obligation and triggering taxable gain to the seller purportedly deferred until that time.
>
> The promotional materials for these transactions assert that engaging in the transaction will allow the seller to defer the gain on the sale of the property under section 453 until the taxpayer receives the balloon principal payment in the year the note matures, even though the seller receives cash from the purported lender in an amount that approximates the amount paid by the buyer to the intermediary. The IRS intends to use multiple arguments to challenge the reported treatment of these transactions as installment sales to which section 453 purportedly applies, including the arguments described below.

First, the intermediary is not a bona fide purchaser of the gain property that is the subject of the purported installment sale. In these transactions, the intermediary is interposed between the seller and the buyer for no purpose other than Federal income tax avoidance, and the intermediary neither enjoys the benefits nor bears the burdens of ownership of the gain property. The interposition of the intermediary typically takes place after the seller has decided to sell the gain property to a specific buyer at a specific negotiated purchase price, and the purported resale by the intermediary to such buyer generally takes place almost simultaneously with the purported sale to the intermediary for approximately the same negotiated purchase price, less certain fees. The seller's only purpose for entering into an agreement with the intermediary is to defer recognition of the gain on the sale of the gain property to the buyer. Other than the Federal income tax deferral benefits provided by the installment method provisions of section 453, the sole economic effect of entering the monetized installment sale transaction from the perspective of the seller is to pay direct and indirect fees to the intermediary and the purported lender in an amount that is substantially less than the Federal tax savings purportedly achieved from using section 453 to defer the realized gain on the sale.

When an intermediate transaction with a third party is interposed and lacks independent substantive (non-tax) purpose, such transaction is not respected for Federal income tax purposes and the transaction is appropriately treated as a sale of the property by the seller directly to the buyer in the taxable year in which the gain property is transferred by the seller. *See Commissioner v. Court Holding Co.*, 324 U.S. 331, 334 (1945) ("A sale by one person cannot be transformed for tax purposes into a sale by another by using the latter as a conduit through which to pass title. To permit the true nature of a transaction to be disguised by mere formalisms, which exist solely to alter tax liabilities, would seriously impair the effective administration of the tax policies of Congress" (footnote omitted)); *Wrenn v. Commissioner*, 67 T.C. 576 (1976), (holding that a taxpayer did not engage in a bona fide installment sale when the taxpayer transferred stock to his spouse under a purported installment sale contract, followed by the spouse immediately selling the stock to a third party for a negligible gain); *Blueberry Land Co. v. Commissioner*, 361 F.2d 93, 100 (5th Cir. 1966), (holding that a corporation's transaction with an unrelated intermediary entered into solely to avoid Federal income taxes on the sale should be disregarded for Federal income tax purposes and the corporation should be taxed as if it sold the property directly to the ultimate buyer); *Enbridge Energy Co. Inc. v. United States*, 354 F. App'x 15 (5th Cir. 2009) (holding that an intermediate sale was a sham, the intermediary lacked a "bona fide role in the transaction," as its only purpose for being a party in the transaction, and indeed for existing, was to mitigate the Federal tax bill arising from the transaction, and that the transaction should be treated, for Federal tax purposes, as a sale directly from the seller to the taxpayer).

In addition, it is inappropriate to treat the intermediary in the monetized installment sale transaction described in this NPRM as the acquirer of the gain property that is the subject of the purported installment sale because the intermediary neither enjoys the benefits nor bears the burdens of ownership of the gain property that a person must possess to be considered the owner of property for Federal income tax purposes. *See Grodt & McKay Realty Inc. v. Commissioner*, 77 T.C. 1221 (1981). *See also Derr v. Commissioner*, 77 T.C. 708 (1981) and *Baird v. Commissioner*, 68 T.C. 115 (1977).

Second, in these transactions the seller is appropriately treated as having already received the full payment at the time of the sale to the buyer because (1) the purported installment obligation received by the seller is treated as the receipt of a payment by the seller under § 15a.453–1(b)(3) since it is indirectly secured by the sales proceeds, or (2) the proceeds of the purported loan are appropriately treated as a payment to the seller because the purported loan is not a bona fide loan for Federal income tax purposes, or (3) the pledging rule of section 453A(d) deems the seller to receive full payment on the purported installment obligation in the year the seller receives the loan proceeds.

Third, the transaction may be disregarded or recharacterized under the economic substance rules codified under section 7701(o) or the substance over form doctrine. The step transaction doctrine and conduit theory may also apply to recharacterize monetized installment sale transactions described in this NPRM.

The “Explanation of Provisions” part of the NPRM describes in “I. Definition of Monetized Installment Sale Transaction” the scope of transactions required to be reported:

Proposed § 1.6011–13(a) would provide that a transaction that is the same as, or substantially similar to, a monetized installment sale transaction described in proposed § 1.6011–13(b) is a listed transaction for purposes of § 1.6011–4(b)(2) and sections 6111 and 6112. “Substantially similar” is defined in § 1.6011–4(c)(4) to include any transaction that is expected to obtain the same or similar types of tax consequences and that is either factually similar or based on the same or a similar tax strategy.

The transaction described in proposed § 1.6011–13(b) includes the following elements:

(1) A taxpayer (seller), or a person acting on the seller’s behalf, identifies a potential buyer for appreciated property (gain property), who is willing to purchase the gain property for cash or other property (buyer cash).

(2) The seller enters into an agreement to sell the gain property to a person other than the buyer (intermediary) in exchange for an installment obligation.

(3) The seller purportedly transfers the gain property to the intermediary, although the intermediary either never takes title to the gain property or takes title only briefly before transferring it to the buyer.

(4) The intermediary purportedly transfers the gain property to the buyer in a sale of the gain property in exchange for the buyer cash.

(5) The seller obtains a loan, the terms of which are such that the amount of the intermediary’s purported interest payments on the installment obligation correspond to the amount of the seller’s purported interest payments on the loan during the period. On each of the installment obligation and loan, only interest is due over identical periods, with balloon payments of all or a substantial portion of principal due at or near the end of the instruments’ terms.

(6) The sales proceeds from the buyer received by the intermediary, reduced by certain fees (including an amount set aside to fund purported interest payments on the purported installment obligation), are provided to the purported lender to fund the purported loan to the seller or transferred to an escrow or investment account of which the purported lender is a beneficiary. The lender agrees to repay these amounts to the intermediary over the course of the term of the installment obligation.

(7) On the seller's Federal income tax return for the taxable year of the purported installment sale, the seller treats the purported installment sale as an installment sale under section 453.

> A transaction may be "substantially similar" to the transaction described above even if such transaction does not include all of the elements described above. For example, a transaction would be substantially similar to a monetized installment sale if a seller transfers property to an intermediary for an installment obligation, the intermediary simultaneously or after a brief period transfers the property to a previously identified buyer for cash or other property, and in connection with the transaction, the seller receives a loan for which the cash or property from the buyer serves indirectly as collateral.

Given the many uncertainties of what might happen to trigger acceleration, consider transferring property to a partnership before selling it. The first two years of payments after forming the partnership might be interest-only, to avoid triggering the disguised sale rules.[1612] See also part II.Q.3 Installment Sales - Deferring Tax on Lump Sum Payout Expected More than Two Years in the Future. However, if the partnership later distributes the note to the obligor who is a partner, that distribution will constitute a payment of the note.[1613]

Large installment sales are subject to a charge for tax deferral.[1614]

Whereas this discussion suggests a partnership itself making an installment sale, part II.Q.8.e.ii.(c) discusses the Availability of Installment Sale Deferral for Sales of Partnership Interests.

For distributions from an estate or a nongrantor trust, see part II.J.8.d.iii Distributing a Note to the Obligor.

II.G.16. Like-Kind Exchanges

As described below, Code § 1031 disallows gain or loss on the exchange of certain property. Confirm with the client that the property has a gain; generally one does not want to defer a loss.

II.G.16.a. Post-2017 Code § 1031

Code § 1031(a)(1) provides:

> No gain or loss shall be recognized on the exchange of real property held for productive use in a trade or business or for investment if such real property is exchanged solely for real property of like kind which is to be held either for productive use in a trade or business or for investment.

Thus, personal property is no longer eligible for Code § 1031 treatment. For real estate, see part II.G.16.b Pre-2018 Code § 1031.

[1612] See part II.M.3.e Exception: Disguised Sale.
[1613] Reg. § 1.731-1(c)(2).
[1614] Code § 453A. Those owning an interest in a partnership or S corporation that holds an installment note should see Notice 88-81, "Application of Proportionate Disallowance Rule to Passthrough Entities."

Code § 1031(a)(2) disallows nonrecognition of “any exchange of real property held primarily for sale.”

Reg. § 1.1031(a)-3, “Definition of real property,” provides details on the distinction between real and personal property. It was adopted by T.D. 9935 (12/2/2020), which explains in its “Background,” part II, “Section 1031 After the TCJA”:

> As amended by the TCJA, section 1031(a) provides that no gain or loss is recognized on the exchange of real property held for productive use in a trade or business or for investment (relinquished real property) if the relinquished real property is exchanged solely for real property of a like kind that is to be held either for productive use in a trade or business or for investment (replacement real property). The legislative history to the TCJA amendments to section 1031 provides that Congress ‘‘intended that real property eligible for like-kind exchange treatment under present law will continue to be eligible for like-kind exchange treatment under the [amended] provision.’’ H.R. Conf. Rept. 115-466, at 396, fn. 726 (2017) (Conference Report). However, left unchanged by the TCJA, section 1031(b) provides that a taxpayer must recognize gain to the extent of money and nonlike-kind property the taxpayer receives in an exchange.

T.D. 9935 (12/2/2020) explains in its “Summary of Comments and Explanation of Revisions,” part II, “Definition of Real Property,” subheading “A. State or Local Law Definitions of Real Property”:

> 1. Approach of the Proposed Regulations
>
> Section 1031 does not provide a definition for the term ‘‘real property.’’ As noted in part II of the Background section, the Conference Report provides that Congress intended real property that was eligible for like-kind exchange treatment prior to the enactment of the TCJA to continue to be eligible for likekind exchange treatment after its enactment. See Conference Report, at 396, fn. 726. Specifically, with regard to the applicability of State law for real property determinations, the Conference Report sets forth the following example: ‘‘a like-kind exchange of real property includes an exchange of shares in a mutual ditch, reservoir, or irrigation company described in section 501(c)(12)(A) [of the Code] if at the time of the exchange such shares have been recognized by the highest court or statute of the State in which the company is organized as constituting or representing real property or an interest in real property’’ (Conference Report Example). Id. Accordingly, due to the absence of a statutory definition for the term ‘‘real property’’ in section 1031, the Treasury Department and the IRS based the proposed definition of real property upon the Conference Report Example.
>
> Under proposed § 1.1031(a)–3(a)(1), State law controls whether shares in a mutual ditch, reservoir, or irrigation company are real property for purposes of section 1031. Aside from those enumerated asset types, the proposed regulations provide that State or local law definitions were not controlling for purposes of determining whether property is real property for section 1031 purposes. See proposed § 1.1031(a)–3(a)(1). The intent of the Treasury Department and the IRS in proposing a rule that expressly applied State or local law in this manner was to provide a definition of real property for purposes of section 1031 ‘‘in a manner consistent with the scope described by Congress in the Conference Report.’’ See the preamble to the proposed regulations at 85 FR 35836.

2. Consideration of Comments and Revision of ‘‘Real Property’’ Definition

Commenters generally critiqued the apparent scope of the application of State and local law in the proposed regulations for purposes of defining real property. These commenters contended that, prior to enactment of the TCJA, State and local law classification of a property often was the determining factor in characterizing property as real or personal under section 1031. With regard to the Conference Report Example, the commenters asserted that the reference to ‘‘shares in a mutual ditch, reservoir, or irrigation company’’ merely constituted a set of examples that Congress provided to broadly indicate that real property eligible for like-kind treatment under law prior to enactment of the TCJA will continue to be eligible following the TCJA’s amendment to section 1031. Consequently, the commenters recommended that the final regulations conform to that intent by expanding the rules to rely significantly, or wholly, on State-law classifications for all assets, rather than limiting such reliance to shares in a mutual ditch, reservoir, or irrigation company. Additionally, commenters suggested that the final regulations should include multiple examples of instances in which taxpayers may rely on State or local law for purposes of classifying property as real or personal.

In light of these comments, the Treasury Department and the IRS have reconsidered the degree to which State or local law determinations of real property should be controlling for defining real property for section 1031 purposes. As a result of that reconsideration, the final regulations provide generally that property is real property for purposes of section 1031 if, on the date it is transferred in an exchange, that property is classified as real property under the law of the State or local jurisdiction in which that property is located (State and local law test). The State and local law test applies to both tangible and intangible property classifications.

However, consistent with Congressional intent that ‘‘real property eligible for like-kind exchange treatment’’ under the law in effect prior to enactment of the TCJA will continue to be eligible for like-kind exchange treatment after enactment of the TCJA, property ineligible for like-kind exchange treatment prior to enactment of the TCJA remains ineligible, including real property that was excluded from the application of section 1031. See Conference Report at 396, fn. 726. Prior to amendment by the TCJA, former section 1031(a)(2) explicitly excluded certain assets from the application of section 1031. Accordingly, the final regulations exclude from the definition of real property the intangible assets listed in section 1031(a)(2) prior to its amendment by the TCJA, regardless of the classification of the property under State or local law, because such property never was ‘‘real property *eligible* for like-kind exchange treatment’’ prior to enactment of the TCJA. Conference Report at 396, fn. 726 (emphasis added).

In summary, under the final regulations, property is classified as real property for purposes of section 1031 if the property is (i) so classified under the State and local law test, subject to certain exceptions, (ii) specifically listed as real property in the final regulations, or (iii) considered real property based on all the facts and circumstances under the various factors provided in the final regulations. A determination that property is personal property under State or local law does not preclude the conclusion that property is real property as specifically listed in § 1.1031(a)-3(a)(2)(ii) or (a)(2)(iii)(B) or under the factors listed in § 1.1031(a)-3(a)(2)(ii)(C) or (a)(2)(iii)(B).

3. Chief Counsel Advice (CCA) 201238027

Multiple commenters who objected to the scope of State and local law determinations under the proposed regulations also asserted that the approach in the proposed regulations replicated the analysis in CCA 201238027 (April 17, 2012), particularly with regard to one of the fact patterns addressed therein regarding a steam turbine (Case 3). In Case 3, the Chief Counsel Advice disregarded State law that characterized the steam turbine as real property and held that the steam turbine was not of like kind to land because it did not have the same nature or character as land. Commenters objected to this conclusion, contending that the State law classification of the steam turbine as real property should be respected and, based on that classification, the steam turbine and the undeveloped land should be considered like-kind property.

These final regulations do not address whether exchanged properties are of like kind to one another. As a consequence of expressly including the State and local law test in the final regulations, the final regulations do not adopt the reasoning of CCA 201238027 to the extent it suggests that State or local law is disregarded in determining whether property is real property under section 1031.

4. Additional Comments Regarding the Application of State and Local Law

In connection with the State and local law test under the final regulations, the Treasury Department and the IRS have considered numerous additional comments. For instance, one commenter recommended that any asset determined to be essentially the same as an asset classified as a real property for purposes of section 1031 also should automatically be treated as real property for purposes of section 1031. For example, if one asset (Property A) is classified as real property under the State or local law of State X, an asset located in a different jurisdiction (Property B) that is essentially the same as Property A also should be classified as real property for section 1031 purposes, irrespective of whether Property B is classified as real property under (i) the law of the State or local jurisdiction in which Property B is located or (ii) the real property definition and factors under the proposed regulations.

The final regulations do not adopt this suggestion. First, the Treasury Department and the IRS have determined that the ''essentially the same'' standard recommended by the commenter would be difficult for taxpayers to apply and the IRS to administer with certainty. In addition, the analysis advocated by the commenter is conceptually similar to the analysis applied by CCA 201238027, which, based on several other comments, the Treasury Department and the IRS have determined to be inconsistent with the State and local law test provided in the final regulations.

A commenter also requested that the final regulations classify as real property all property that was treated as real property for section 1031 purposes at any time between May 22, 2008, and the effective date of the TCJA. May 22, 2008, is the effective date of former section 1031(i), which treats shares in certain mutual ditch companies as real property for section 1031 purposes. The commenter reasoned that, because the treatment of mutual ditch company shares has been preserved by the proposed regulations following the enactment of the TCJA, all property classified as real property as of May 22, 2008, also should be classified as real property under the final regulations.

> The final regulations do not adopt the commenter's suggestion. The Treasury Department and the IRS have determined that a rule that fixes property classifications under State or local laws as of a date certain would add complexity as the post-enactment period of the TCJA continues to lengthen. Given that the final regulations have broadened the applicability of State and local real property classification for purposes of section 1031 qualification, the Treasury Department and the IRS have determined that the perpetually increasing complexity of such a rule would significantly outweigh any potential benefits of the commenter's suggestion.

Personal property sometimes may tag along if merely incidental to the sale of real property. Reg. § 1.1031(k)-1(c)(5), "Incidental property disregarded," provides

> (i) Solely for purposes of applying this paragraph (c), property that is incidental to a larger item of property is not treated as property that is separate from the larger item of property. Property is incidental to a larger item of property if-
>
> (A) In standard commercial transactions, the property is typically transferred together with the larger item of property, and
>
> (B) The aggregate fair market value of all of the incidental property does not exceed 15 percent of the aggregate fair market value of the larger item of property.
>
> (ii) This paragraph (c)(5) may be illustrated by the following examples.
>
> *Example (1)*. For purposes of paragraph (c) of this section, a spare tire and tool kit will not be treated as separate property from a truck with a fair market value of $10,000, if the aggregate fair market value of the spare tire and tool kit does not exceed $1,500. For purposes of the 3-property rule, the truck, spare tire, and tool kit are treated as 1 property. Moreover, for purposes of paragraph (c)(3) of this section (relating to the description of replacement property), the truck, spare tire, and tool kit are all considered to be unambiguously described if the make, model, and year of the truck are specified, even if no reference is made to the spare tire and tool kit.
>
> *Example (2)*. For purposes of paragraph (c) of this section, furniture, laundry machines, and other miscellaneous items of personal property will not be treated as separate property from an apartment building with a fair market value of $1,000,000, if the aggregate fair market value of the furniture, laundry machines, and other personal property does not exceed $150,000. For purposes of the 3-property rule, the apartment building, furniture, laundry machines, and other personal property are treated as 1 property. Moreover, for purposes of paragraph (c)(3) of this section (relating to the description of replacement property), the apartment building, furniture, laundry machines, and other personal property are all considered to be unambiguously described if the legal description, street address, or distinguishable name of the apartment building is specified, even if no reference is made to the furniture, laundry machines, and other personal property.

For additional discussion, see Cunningham and Louis Weller, "Intangible Interests in Real Property Under IRC 1031: An Examination of the Like-Kind Standard Applied to Intangible Real Property After Issuance of Treas. Reg. 1.1031(a)-3," Journal of Taxation (Jan. 2023).

Letter Ruling 202335002 involved the following facts:

> Taxpayer is a State Z limited partnership. Taxpayer holds real property directly in its own name and through a series of single-member limited liability companies that are disregarded entities for federal income tax purposes. Taxpayer uses the accrual method of accounting and a calendar taxable year.
>
> Taxpayer owns Property 1 located in City A, State Z, through one of its disregarded entities, DE 1. Taxpayer is the sole member of DE 1. Property 1 has been held for productive use in a trade or business or for investment within the meaning of § 1031 of the Code. Taxpayer intends to sell Property 1 and acquire TDRs as part of a like-kind exchange structured as a reverse exchange. Taxpayer owns Property 2 located in City B, State Z, through one of its disregarded entities, DE 2. Taxpayer is the sole member of DE 2.
>
> As part of its intended reverse exchange, DE 2 loaned funds to an exchange accommodation titleholder (EAT) to purchase the TDRs. The initial closing for the TDR acquisition occurred on Date 1, with the EAT currently holding title to the purchased TDRs. To complete the reverse exchange, DE 1 will sell Property 1 through a qualified intermediary (QI), and the QI will transfer the sale proceeds to the EAT. The TDRs will be transferred directly from the EAT to DE 2. The EAT will use the proceeds it receives to pay back the loan from DE 2. Taxpayer plans to use the TDRs to enhance Taxpayer's development project at Property 2 by increasing the floor area to an amount greater than would otherwise be permitted by zoning regulations.
>
> The TDRs originate from an MOU between City B and District, dated Date 4. ("TDR MOU"). District recorded a Covenant Restricting Use of Land and Notice of Development Restrictions dated Date 2 with the County on Date 3. The TDR MOU establishes a mechanism to accommodate the District's acquisition of three properties located in City B for development of a facility, public park, and related uses. The District will fund the acquisition and development of the property in part by the sale of transferable unutilized development rights related to the property to third party purchasers ("TDR Participants"). The TDR Participants will seek approval from City B to apply such transferred development rights to designated receiving sites to allow for additional floor area than would otherwise be permitted by zoning regulations. TDRs become permanent in the hands of the TDR Participants when a Certificate of Transfer of Development Rights is recorded.
>
> Taxpayer's pre-application was approved by the City B Council on Date 5; the City B has approved the site of the Property 2 project as eligible for the use of TDRs. The Property 2 project consists of an office building, for which Taxpayer anticipates using X TDR units from District. The agreed upon purchase price for the X TDR units is $Y. The Property 2 project, once constructed, will be held for the production of rental income by Taxpayer or by a disregarded entity owned solely by Taxpayer.
>
> Taxpayer has represented that that transferable development rights are considered an interest in real property under State Z law and has cited statutes and case law supporting its representation.

Letter Ruling 202335002 reasoned and ruled:

> Section 1031(a)(1) provides that no gain or loss shall be recognized on the exchange of real property held for productive use in a trade or business or for investment if such real property is exchanged solely for real property of like kind which is to be held either for productive use in a trade or business or for investment.
>
> Treas. Reg. § 1.1031(a)-1(b) provides, in part, that the words "like kind" refer to the nature or character of the property and not to its grade or quality. One kind or class of property may not be exchanged for property of a different kind or class. The fact that any real estate involved is improved or unimproved is not material, for that fact relates only to the grade or quality of the property and not to its kind or class. Properties to be exchanged tax free under § 1031 must be of the same kind or class.
>
> Treas. Reg. § 1.1031(a)-1(c) sets forth examples of properties that will be considered like kind. The relevant examples pertain to real estate and provide that a taxpayer who is not a dealer in real estate may exchange city real estate for a ranch or farm, a leasehold of a fee with 30 years or more to run for real estate, or improved real estate for unimproved real estate.
>
> Treas. Reg. § 1.1031(a)-3 defines the term "real property" for purposes of § 1031 and the regulations under § 1031. Under § 1.1031(a)-3(a)(1), real property includes land and improvements to land and, under § 1.1031(a)-3(a)(5), an intangible interest in real property of a type described in § 1.1031(a)-3(a)(1) is real property for purposes of § 1031. Section 1.1031(a)-3(a)(5)(i) further provides that intangible assets that are real property for purposes of § 1031 include land development rights. Finally, § 1.1031(a)-3(a)(6) provides that, with certain exceptions not relevant to Taxpayer's facts, property that is real property under State or local law is real property for purposes of § 1031.
>
> In this case, Taxpayer proposes to acquire TDRs as its replacement property and to use such rights to enhance Property 2, which Taxpayer owned prior to its acquisition of the rights, a structure similar to the one addressed in Rev. Rul. 68-394, 1968-2 C.B. 338. In Rev. Rul. 68-394, land held by a taxpayer for investment was condemned for a state freeway. The taxpayer owned adjacent land that he had leased to a second party to use and develop as a mobile trailer park site. For purposes of replacing the condemned property, the taxpayer used part of the condemnation proceeds to purchase, in an arm's length transaction, the outstanding leasehold, with 45 years remaining, on the adjacent land. After acquisition of the leasehold, the taxpayer used the land as a mobile trailer park site.
>
> Although Rev. Rul. 68-394 dealt with deferring gain under § 1033, § 1033 may apply when a taxpayer replaces condemned property with property that is of like kind, within the meaning of § 1031, to the condemned property. See § 1033(g). Since, under the § 1031 regulations, the exchange of a fee interest in real property for a leasehold interest in real property with 30 years or more to run qualifies as a like kind exchange, the ruling holds that the acquisition of a 30 year or more leasehold interest following the condemnation of unimproved real estate would likewise qualify as replacement property of like kind, even though the leasehold interest was on property already owned by the taxpayer. Consequently, in the present case, the TDRs may qualify as of like kind to Property 1 for purposes of § 1031, notwithstanding that Taxpayer intends to use the TDRs on land owned by Taxpayer prior to Taxpayer's acquisition of the TDRs. Compare

> Rev. Rul. 67-255, 1967-2 C.B. 270, holding that a taxpayer's construction on land already owned by the taxpayer did not constitute a like-kind replacement.
>
> As discussed above, Treas. Reg. §§ 1.1031(a)-3(a)(5)(i) provides that land development rights are real property for purposes of § 1031. Moreover, Taxpayer represents that transferable development rights such as TDRs are real property under the laws of State Z and that the TDRs Taxpayer intends to acquire as replacement property become permanent in the hands of the purchaser when a Certificate of Transfer of Development Rights is recorded. Therefore, based on the above authorities and the facts and representations that were submitted, we rule that the TDRs are, within the meaning of § 1.1031(a)-1(b), of like kind to Property 1.

II.G.16.b. Pre-2018 Code § 1031

Code § 1031(a)(1) provides:

> No gain or loss shall be recognized on the exchange of property held for productive use in a trade or business or for investment if such property is exchanged solely for property of like kind which is to be held either for productive use in a trade or business or for investment.

Code § 1031(a)(2) excludes the following property from that favorable treatment:

> (A) stock in trade or other property held primarily for sale,
>
> (B) stocks, bonds, or notes,
>
> (C) other securities or evidences of indebtedness or interest,
>
> (D) interests in a partnership,
>
> (E) certificates of trust or beneficial interests, or
>
> (F) choses in action.

Personal property is "of like kind" as follows:

- Depreciable tangible personal property is exchanged for property of a like kind or like class.[1615] "Like class" means either[1616] within the same General Asset Class[1617] or within the same Product Class.[1618]

[1615] Reg. § 1.1031(a)-2(b)(1).
[1616] Reg. § 1.1031(a)-2(b)(1).
[1617] Reg. § 1.1031(a)-2(b)(2) describes when and how a general asset class consists of depreciable tangible personal property described in certain asset classes in Rev. Proc. 87-56.
[1618] Reg. § 1.1031(a)-2(b)(3) describes when and how a product class consists of depreciable tangible personal property that is described in the North American Industry Classification System (NAICS), set forth in Executive Office of the President, Office of Management and Budget, North American Industry Classification System, United States, 2002 (NAICS Manual), as periodically updated.

- Whether intangible personal property is of a like kind to other intangible personal property generally depends on:[1619]
    - the nature or character of the rights involved (for example, patent or a copyright), and
    - the nature or character of the underlying property to which the intangible personal property relates.

As to the latter:

- Goodwill or going concern value of a business is not of a like kind to the goodwill or going concern value of another business.[1620]
- A copyright on a novel is of like kind with a copyright on a different novel, but a copyright on a novel is not of like kind with a copyright on a song.[1621]
- Manufacturing and distribution are two distinct business activities and the rights to each would not, absent some close connection between these activities, be of a like kind; however, the close economic and unique historical connection between the manufacturing and the distribution of a particular product would make them of like kind as two aspects of a single business activity if the rights to manufacturing and distribution are contained within the same integrated agreement and any differences among the product that are relevant to manufacturing or distribution are differences in grade or quality, and not differences in nature or character.[1622] Similarly, distribution contracts were of like kind when distributed in a substantially similar manner to a largely common set of customers who resell them to end customers who, in turn, use each of the products for a substantially similar purpose, because any differences among the product relevant to distribution were differences in grade or quality, and not differences in nature or character, despite having different brand names, appearances, ingredients, packaging, manufacturing processes, and marketing strategies.[1623]

A fee title may be exchanged for a 30-year leasehold.[1624] The tenant's renewal options count toward the 30 years.[1625] Regarding a lease with less than 30 years remaining, the transfer of a

[1619] Reg. § 1.1031(a)-2(c)(1).
[1620] Reg. § 1.1031(a)-2(c)(2).
[1621] Reg. § 1.1031(a)-2(c)(3).
[1622] Letter Ruling 201531009.
[1623] Letter Ruling 201532021.
[1624] Reg. § 1.1031(a)-1(c), "Examples of exchanges of property of a 'like kind,'" provides {indenting added]:

> No gain or loss is recognized if
> (1) a taxpayer exchanges property held for productive use in his trade or business, together with cash, for other property of like kind for the same use, such as a truck for a new truck or a passenger automobile for a new passenger automobile to be used for a like purpose; or
> (2) a taxpayer who is not a dealer in real estate exchanges city real estate for a ranch or farm, or exchanges a leasehold of a fee with 30 years or more to run for real estate, or exchanges improved real estate for unimproved real estate; or
> (3) a taxpayer exchanges investment property and cash for investment property of a like kind.

Letter Ruling 8453034 is an example of a fee interest for leasehold interests involving motels.
[1625] Rev. Rul. 78-72, reasoning:

lease and leasehold improvements in a building in return for the leaseback of a portion of the building and money was a like-kind exchange.[1626] A leasehold interest in real property with 21 years remaining was not like-kind to fee interests in real property.[1627]

> In *Century Electric Co. v. Commissioner*, 15 T.C. 581, 591 (1950), *aff'd* 192 F.2d 155 (8th Cir. 1951), *cert. denied*, 342 U.S. 954 (1952), the Tax Court of the United States, indicated that, for like kind exchange purposes, optional renewal periods are included in determining the length of a lease.
>
> In *R & J Furniture Co. v. Commissioner*, 20 T.C. 857, 865 (1953), *acq.*, 1954-1 C.B. 6, which involved a lease with an initial term of 5 years and ten renewal options of 5 years each, the Tax Court of the United States stated that the lease was property of a like kind and the equivalent of a fee interest in real estate under the regulations since the taxpayers had the right to possess, occupy, and use the leased property for a total of 55 years.
>
> In the instant situation, A's lease runs for an initial period of 25 years plus three optional 10-year renewal periods under the same rental terms. Thus, A has the right to possess, occupy, and use the leased property for a total of 55 years.

[1626] Rev. Rul. 76-301 reasoned:

> An exchange is considered to occur for the purposes of section 1031 of the Code if the transfers of the like kind property are reciprocal. Rev. Rul. 61-119, 1961-1 C.B. 395. Moreover, the reciprocal transfer of interests in like kind property is an exchange for the purposes of section 1031 even though the interests are in the same property. See *Century Electric Co. v. Commissioner*, 192 F.2d 155 (8th Cir. 1951), *cert. denied*, 342 U.S. 954 (1952), where a loss sustained on the sale of business property by a taxpayer was disallowed where it immediately leased back the same property under a long-term lease

The ruling concluded:

> … the assignment of the leasehold interest in the building in the instant case in return for an identical leasehold interest in a portion of the building qualifies as an exchange of property for like kind property and money subject to section 1031(c) of the Code.
>
> The fact that the transaction results in the disposition of the portion of the property used in one of the taxpayer's two businesses is not significant for the purposes of section 1031 of the Code. Section 1.1031(a)-1(a) of the regulations. Rather, the significant factor for the purposes of section 1031 is that the taxpayer's investment is still tied up in the same kind of property. See H. R. Rep. No. 704, 73d Cong., 2d Sess. 13 (1934), 1939-1 (Part 2) C.B. 554, 564.
>
> Accordingly, the loss of 200x dollars realized by X in the exchange of X's leasehold interest and improvements in the building in return for an identical leasehold interest in a portion of the building and money may not be recognized under the provisions of section 1031(a) and (c) of the Code.

[1627] *VIP's Industries, Inc. v. Commissioner*, T.C. Memo. 2013-157, explained:

> Petitioner contends that its leasehold interest in the Eugene property was of like kind to the fee interests in the Bridgeport and Salem properties because (1) section 1.1031(a)-1(c), Income Tax Regs., does not exclude all exchanges of leasehold interests in real property with terms of less than 30 years for fee interests in real property from receiving like-kind exchange treatment but rather provides a safe harbor for exchanges of leaseholds with terms of 30 years or more for fee interests in real property; and (2) its leasehold interest in the Eugene property was of sufficient length to be considered of like kind to the fee interests in the Bridgeport and Salem properties.
>
> Petitioner exchanged its leasehold interest in the Eugene property with a remaining term of 21 years and 4 months for fee interests in the Bridgeport and Salem properties. We previously have held that leasehold interests with similar or even longer terms than the one at issue here are not equivalent to fee interests. In *May Dep't Stores Co. v. Commissioner*, 16 T.C. at 556, we held that a 20-year leasehold was not equivalent to a fee interest. In *Standard Envelope Mfg. Co. v. Commissioner*, 15 T.C. at 48, we held that a leasehold interest with a term of 1 year and an option to renew for a term of 24 years was not equivalent to a fee interest, and we have held that options to renew are included in determining whether a leasehold interest is

Code § 1031 includes timing requirements. Amazingly, the buyer may cause a qualified intermediary (QI) to buy the replacement property, lease it from the QI, customize it for one's

---

equivalent to a fee interest. See *Peabody Natural Res. Co. v. Commissioner*, 126 T.C. at 275; *Century Elec. Co. v. Commissioner*, 15 T.C. 581, 591-592 (1950), *aff'd*, 192 F.2d 155 (8th Cir. 1951).[5]

[5] Petitioner contends that *May Dep't Stores Co. v. Commissioner*, 16 T.C. 547 (1951), and *Standard Envelope Mfg. Co. v. Commissioner*, 15 T.C. 41 (1950), are distinguishable because they concern sale-leaseback transactions that may have been designed to achieve improper tax avoidance. However, these cases cannot be explained as targeting improper tax avoidance because they allowed, rather than disallowed, the respective taxpayers' claimed losses. Petitioner further contends that *May Dep't Stores* and *Standard Envelope* are distinguishable because the respective taxpayers intended for sec. 1031 not to apply and for their losses to be recognized. However, this contention also fails because the "[t]he rules of *** [sec.] 1031 apply automatically; they are not elective." *Koch v. Commissioner*, 71 T.C. 54, 64 (1978).

Petitioner's leasehold interest in the Eugene property with a term of 21 years and 4 months remaining is closer in nature to the leasehold interests that we characterized as not equivalent to a fee interest, see *May Dep't Stores Co. v. Commissioner*, 16 T.C. at 556; *Standard Envelope Mfg. Co. v. Commissioner*, 15 T.C. at 48, than to the 30-year leasehold interest that section 1.1031(a)-1(c), Income Tax Regs., recognizes as the equivalent of a fee interest. Applying our precedent, we therefore conclude that petitioner's leasehold interest was not of like kind to a fee interest under section 1031.[6]

[6] In reaching this conclusion we note that a short-term real property interest is not of like kind with a long-term real property interest irrespective of whether the short-term real property interest is a real property interest under State law. See *Peabody Natural Res. Co. v. Commissioner*, 126 T.C. 261, 275 n.11 (2006) (citing *Smalley v. Commissioner*, 116 T.C. 450, 464 n.11 (2001)).

Because we decide this case in accordance with our existing precedent, we need not decide whether section 1.1031(a)-1(c), Income Tax Regs., mechanically excludes all exchanges of leaseholds with terms of less than 30 years for fee interests from receiving like-kind exchange treatment. Compare *Peabody Natural Res. Co. v. Commissioner*, 126 T.C. at 276 (referring to "the 30-year safe harbor provisions of section 1.1031(a)-1(c), Income Tax Regs."), with *Capri, Inc. v. Commissioner*, 65 T.C. at 181 ("section 1.1031(a)-1(c), Income Tax Regs., requires a lease of real property to be 30 years in duration to constitute an interest in real property equivalent to a fee interest"), and *Standard Envelope Mfg. Co. v. Commissioner*, 15 T.C. at 48 ("The lease was for a term of less than 30 years, and, therefore, was not the equivalent of a fee under the terms of *** [the predecessor of section 1.1031(a)-1(c), Income Tax Regs.].").

own use, then sell one's existing property in a like-kind exchange for the replacement property,[1628] although the IRS does not agree.[1629]

[1628] *Bartell v. Commissioner*, 147 TC 140 (2016), the official syllabus of which stated:

In 1999, BD, a drugstore chain, entered into an agreement to purchase property L from a third party. In anticipation of structuring an exchange transaction under I.R.C. sec. 1031 to facilitate acquisition of L, BD later assigned its rights in the purchase agreement to third-party exchange facilitator EPC and entered a further agreement with EPC. That second agreement provided for EPC to purchase L and for BD to have a right to acquire L from EPC for a stated period and price. EPC so purchased L on August 1, 2000, with bank financing guaranteed by BD, acquiring title to L at that time. BD then managed the construction of a drugstore on L using proceeds from the aforementioned financing and, upon substantial completion of the construction in June 2001, leased the store from EPC from that time until title to L was transferred from EPC to BD on December 31, 2001.

In late 2001, BD contracted to sell its existing property E to a fourth party. BD next entered an exchange agreement with intermediary SS and assigned to SS its rights under the sale agreement and under the earlier agreement with EPC. SS sold E, applied the proceeds of that sale to the acquisition of L, and had the title to L transferred to BD on December 31, 2001.

Held: BD's disposition of E and acquisition of L in 2001 qualifies for nonrecognition treatment pursuant to I.R.C. sec. 1031 as a like-kind exchange, as EPC is treated as the owner of L during the period it held title to the property. *Alderson v. Commissioner*, 317 F.2d 790 (9th Cir. 1963), *rev'g* 38 T.C. 215 (1962), and *Biggs v. Commissioner*, 69 T.C. 905 (1978), *aff'd*, 632 F.2d 1171 (5th Cir. 1980), followed.

[1629] Action on Decision 2017-06 nonacquiesced to *Bartell*, fn 1628:

Taxpayer, intending to engage in a like-kind exchange, entered into an agreement with Exchange Facilitator (EF) to purchase Replacement Property (RP) from Seller. EF acquired title to RP on August 1, 2000, after which Taxpayer constructed a drug store on RP and, in June of 2001, began leasing RP from EF. In December of 2001, Qualified Intermediary (QI) acquired Taxpayer's business property (RQ), sold RQ to Buyer, and used the sale proceeds to acquire RP from EF and transfer it to Taxpayer. EF held title to RP for 17 months before transferring it to QI and then to Taxpayer.

The Service asserted that Taxpayer acquired RP in August of 2000, not December of 2001, arguing that Taxpayer, not EF, acquired the benefits and burdens of ownership of RP from Seller. See *Grodt & McKay Realty, Inc. v. Commissioner*, 77 T.C. 1221 (1981) (providing principles for a benefits and burdens analysis). Thus, the transaction was not a like-kind exchange; instead, Taxpayer sold RQ in a taxable sale in 2001.

The focus of the Tax Court's opinion was on case law decided before the issuance of Treas. Reg. § 1.1031(k)-1 (the deferred exchange regulations) and, in particular, on the cases that address a taxpayer's use of an accommodating party to facilitate an intended like-kind exchange. The court concluded that *Alderson v. Commissioner*, 317 F.2d 790 (9th Cir. 1963), and *Biggs v. Commissioner*, 69 T.C. 905 (1978), *aff'd* 632 F.2d 1171 (5th Cir.] 1980), establish the principle that a third-party exchange facilitator "need not assume the benefits and burdens of ownership of the replacement property in order to be treated as its owner for section 1031 purposes before the exchange." *Bartell*, 147 T.C. at 64. Consequently, the court held that the transaction was a like-kind exchange even though EF did not have the benefits and burdens of ownership of RP and held title to RP for 17 months while Taxpayer oversaw construction on RP.

Section 1031 provides that no gain or loss is recognized on an exchange of certain like-kind business or investment property. Section 1031(a)(3) allows deferred like-kind exchanges, which are exchanges in which replacement property is acquired after, but within 180 days of, the taxpayer's transfer of the relinquished property. Section 1.1031(k)-1 allows taxpayers to use qualified intermediaries and other arrangements to facilitate their deferred like-kind exchanges. Neither § 1031 nor the regulations address exchanges of the type engaged in by the taxpayers in

The "held for productive use in a trade or business or for investment" requirement is based on facts and circumstances and encourages taxpayers to hold property for long enough before and after the exchange to establish that purpose. If over 50% of the use of property is for personal purposes, the IRS asserts that the property was not held for productive use in a trade or business of for investment.[1630] Personal use of property can disqualify it as being held for

---

> Bartell, in which the replacement property is acquired and "parked" with an accommodating party before the taxpayer's transfer of the relinquished property (a reverse exchange).
>
> Rev. Proc. 2000-37, 2000-2 C.B. 308, modified by Rev. Proc. 2004-51, 2004-2 C.B. 294, provides a safe harbor for taxpayers seeking to park relinquished property or replacement property with an exchange accommodation titleholder (EAT) in anticipation of a like-kind exchange. If the safe harbor requirements are met, including that the EAT cannot hold the parked property for more than 180 days, the EAT (and not the exchanging taxpayer) is considered the owner of the property held by the EAT, regardless of who has the benefits and burdens of ownership under a *Grodt & McKay* analysis. Section 3.04 of Rev. Proc. \ 2000-37 provides that, in transactions in which the requirements of the revenue procedure are not satisfied, "the determination of whether the taxpayer or the exchange accommodation titleholder is the owner of the property...., and the proper treatment of any transactions entered into by or between the parties, will be made without regard to the provisions of this revenue procedure."
>
> A taxpayer meets the requirements of § 1031 only if the taxpayer engages in an exchange of property. Thus, unless the requirements of Rev. Proc. 2000-37 are met, a taxpayer who acquires the benefits and burdens of ownership of Property 1 on Date 1 and sells Property 2 on Date 2 has not engaged in an exchange as required by § 1031. See *DeCleene v. Commissioner*, 115 T.C. 457 (2000).
>
> The case law cited in *Bartell* involves transactions that were consummated prior to the issuance of the deferred exchange regulations and Rev. Proc. 2000-37. For transactions outside the scope of the deferred exchange regulations, the Service does not follow the court opinions that take the view that for § 1031 purposes an exchange facilitator may be treated as the owner of replacement property regardless of whether it has the benefits and burdens of ownership. Similarly, in determining whether a reverse exchange outside the scope of Rev. Proc. 2000-37 meets the requirements of § 1031, the Service will not follow the principle in the court opinions that an exchange facilitator may be treated as the owner of property regardless of whether it possesses the benefits and burdens of ownership. Under Rev. Proc. 2000-37, taxpayers are permitted to use an exchange facilitator (called an accommodating party) and meet the exchange requirements of § 1031 even though, using the principles set out in *Grodt & McKay Realty, Inc.*, the taxpayer acquires the benefits and burdens of ownership of the replacement property up to 180 days before the exchange intended to qualify as a tax-deferred like-kind exchange. Taxpayers that use accommodating parties outside the scope of Rev. Proc. 2000-37 have not engaged in an exchange if the taxpayer, rather than the accommodating party, acquires the benefits and burdens of ownership of the replacement property before the taxpayer transfers the relinquished property. The Service will not follow the Tax Court's opinion in *Bartell* to the extent the opinion provides otherwise.

[1630] CCA 201605017, further stating that its analysis:

> should not be read to imply that a taxpayer whose personal use of property is less than 50 percent has met the "held for" requirement in § 1031(a) for that property. Instead, close scrutiny should be used for any property the taxpayer uses for personal purposes.

For aircraft, the CCA said that the examiner should consider:

> (1) measurement of business/investment use versus personal use based on flight hours, not just flights; (2) percentages of business/investment use versus personal for flights and flight hours for the year before the year of the exchange; and (3) which flights and flight hours were determined to be repositioning flights and the nature of the flight following the repositioning flight.

investment.[1631] Rev. Proc. 2008-16 provides a safe harbor for limited personal use[1632] referring to the vacation home rules.[1633] The vacation home rules describe personal use of a dwelling

[1631] In denying Code § 1031 treatment, *Starker v. U.S.*, 602 F.2d 1341 held:

> It has long been the rule that use of property solely as a personal residence is antithetical to its being held for investment. Losses on the sale or exchange of such property cannot be deducted for this reason, despite the general rule that losses from transactions involving trade or investment properties are deductible. Treas. Regs. § 1.165.9(a); see *Shields v. Commissioner*, 1978-120 T.C.M. (CCH) Dec. 35,064(M). A similar rule must obtain in construing the term "held for investment" in section 1031. 3 J. Mertens, *Law of Federal Income Taxation* § 20.26 (1972); see *Boesel v. Commissioner*, 65 TC 378, 389 (1975); Rev. Rul. 59-229, 1959-2 Cum. Bull. 180.

Moore v. Commissioner, T.C. Memo. 2007-134, held:

> As a preliminary matter, we accept as a fact that petitioners hoped that both the Clark Hill and Lake Lanier properties would appreciate. However, the mere hope or expectation that property may be sold at a gain cannot establish an investment intent if the taxpayer uses the property as a residence. See *Jasionowski v. Commissioner*, 66 T.C. 312, 323 (1976) ("if the anticipation of eventually selling the house at a profit were in itself sufficient to establish that the property was held with a profit-making intent, rare indeed would be the homeowner who purchased a home several years ago who could not make the same claim"). Moreover, a taxpayer cannot escape the residential status of property merely by moving out.

[1632] Section 4.02(1) provides the following safe harbor for the property to be relinquished:

> (a) The dwelling unit is owned by the taxpayer for at least 24 months immediately before the exchange (the "qualifying use period"); and
>
> (b) Within the qualifying use period, in each of the two 12-month periods immediately preceding the exchange,
>
> (i) The taxpayer rents the dwelling unit to another person or persons at a fair rental for 14 days or more, and
>
> (ii) The period of the taxpayer's personal use of the dwelling unit does not exceed the greater of 14 days or 10 percent of the number of days during the 12-month period that the dwelling unit is rented at a fair rental.
>
> For this purpose, the first 12-month period immediately preceding the exchange ends on the day before the exchange takes place (and begins 12 months prior to that day) and the second 12-month period ends on the day before the first 12-month period begins (and begins 12 months prior to that day).

Section 4.04 provides:

> Fair rental. For purposes of this revenue procedure, whether a dwelling unit is rented at a fair rental is determined based on all of the facts and circumstances that exist when the rental agreement is entered into. All rights and obligations of the parties to the rental agreement are taken into account.

[1633] Section 4.03 provides:

> *Personal use*. For purposes of this revenue procedure, personal use of a dwelling unit occurs on any day on which a taxpayer is deemed to have used the dwelling unit for personal purposes under § 280A(d)(2) (taking into account § 280A(d)(3) but not § 280A(d)(4)).

unit,[1634] rental to a family member,[1635] and rental of a principal residence (the latter which does not apply for this safe harbor).[1636] The exception for rental to a family member requires that the

---

[1634] Code § 280A(d)(2) provides:

Personal use of unit. For purposes of this section, the taxpayer shall be deemed to have used a dwelling unit for personal purposes for a day if, for any part of such day, the unit is used—

(A) for personal purposes by the taxpayer or any other person who has an interest in such unit, or by any member of the family (as defined in section 267(c)(4)) of the taxpayer or such other person;

(B) by any individual who uses the unit under an arrangement which enables the taxpayer to use some other dwelling unit (whether or not a rental is charged for the use of such other unit); or

(C) by any individual (other than an employee with respect to whose use section 119 applies), unless for such day the dwelling unit is rented for a rental which, under the facts and circumstances, is fair rental.

The Secretary shall prescribe regulations with respect to the circumstances under which use of the unit for repairs and annual maintenance will not constitute personal use under this paragraph, except that if the taxpayer is engaged in repair and maintenance on a substantially full time basis for any day, such authority shall not allow the Secretary to treat a dwelling unit as being used for personal use by the taxpayer on such day merely because other individuals who are on the premises on such day are not so engaged.

Code § 267(c)(4) provides:

The family of an individual shall include only his brothers and sisters (whether by the whole or half blood), spouse, ancestors, and lineal descendants….

[1635] Code § 280A(d)(3) provides:

Rental to family member, etc., for use as *principal residence*.

(A) *In general*. A taxpayer shall not be treated as using a dwelling unit for personal purposes by reason of a rental arrangement for any period if for such period such dwelling unit is rented, at a fair rental, to any person for use as such person's principal residence.

(B) *Special rules for rental to person having interest in unit*.

(i) *Rental must be pursuant to shared equity financing agreement*. Subparagraph (A) shall apply to a rental to a person who has an interest in the dwelling unit only if such rental is pursuant to a shared equity financing agreement.

(ii) *Determination of fair rental*. In the case of a rental pursuant to a shared equity financing agreement, fair rental shall be determined as of the time the agreement is entered into and by taking into account the occupant's qualified ownership interest.

(C) *Shared equity financing agreement*. For purposes of this paragraph, the term "shared equity financing agreement" means an agreement under which—

(i) 2 or more persons acquire qualified ownership interests in a dwelling unit, and

(ii) the person (or persons) holding 1 or more of such interests—

(I) is entitled to occupy the dwelling unit for use as a principal residence, and

(II) is required to pay rent to 1 or more other persons holding qualified ownership interests in the dwelling unit.

(D) *Qualified ownership interest*. For purposes of this paragraph, the term "qualified ownership interest" means an undivided interest for more than 50 years in the entire dwelling unit and appurtenant land being acquired in the transaction to which the shared equity financing agreement relates.

[1636] Code § 280A(d)(4), titled, "Rental of principal residence," provides:

(A) For purposes of applying subsection (c)(5) to deductions allocable to a qualified rental period, a taxpayer shall not be considered to have used a dwelling unit for personal purposes for any day during the taxable year which occurs before or after a qualified rental period described in subparagraph (B)(i), or before a qualified rental period described in subparagraph (B)(ii), if with respect to such day such unit constitutes the principal residence (within the meaning of section 121) of the taxpayer.

family member use the dwelling unit as the tenant's "principal residence."[1637] Code § 1031 may also be paired with the exercise of an option to buy real estate.[1638]

If property is a tenancy-in-common, check whether it is taxed as a partnership. If property is in a partnership and partners have different objectives, consider unwinding it well in advance of a sale. See part II.C.10 Whether Tenancy-in-Common or other Arrangement Constitutes a Partnership, especially fn. 578.

> (B) Qualified rental period. For purposes of subparagraph (A), the term "qualified rental period" means a consecutive period of—
>
> (i) 12 or more months which begins or ends in such taxable year, or
>
> (ii) less than 12 months which begins in such taxable year and at the end of which such dwelling unit is sold or exchanged, and
>
> for which such unit is rented, or is held for rental, at a fair rental.

[1637] *Kotowicz v. Commissioner*, T.C. Memo. 1991-563, declining to vary from the literal language cited in fn. 1635, even though family member paid fair rental. If the family member uses it as his or her principal residence and the family member works on the residence, the work may count as rent. *Adams v. Commissioner*, T.C. Memo. 2013-7, describing the family member's work:

> Bill and his family began working on the Eureka house in July 2004. They worked an aggregate of 60 hours per week on the property during July, August, and September 2004. They repaired mold damage, replaced broken doors, fixed holes in walls, repaired rotten subflooring, prepared floors for new carpet installation, scrubbed and repaired surfaces for painting, painted the interior of the house, renovated the kitchen, replumbed the kitchen and laundry room for gas, replaced electrical fixtures and appliances, and performed landscaping. They exterminated rats and other pests and, on one occasion, even chased away a bear. Their efforts made the house livable. For July, August, and September 2004, Adams accepted the services performed by Bill and his family in lieu of monetary rent. (Adams did not reimburse them for the labor and out-of-pocket costs of the home improvements.) The three months of services were worth $3,600.

[1638] Rev. Rul. 84-121 involved the following situation:

> A, an individual, owned a parcel of unencumbered real property that is being used in A's trade or business and that had an adjusted basis of 50x dollars. For 5x dollars, A granted to B an option to purchase A's real property for a price of 100x dollars. The option allowed B to pay the option price in cash or to transfer real property equal in value to the option price. At the time the option was granted, A's real property had a fair market value of 100x dollars. B exercised the option before the expiration of the option period, but instead of paying A 100x dollars in cash, B purchased for 100x dollars another parcel of real property with a fair market value of 100x dollars and immediately transferred that property to A. At the time B exercised the option, A's real property had a fair market value of 150x dollars. A used the property acquired form B in A's trade or business. B is neither related to A nor employed by A.

It held:

> Pursuant to section 1031(b) of the Code, A does not recognize gain or loss on the transfer of A's real property in exchange for the real property received from B, except to the extent of the 5x dollars premium paid by B to A for the option. Under section 1031(d), the adjusted basis to A in the property acquired from B is 50x dollars, that is, the adjusted basis of A's old property of 50x dollars decreased by the 5x dollars received by A and increased by the 5x dollars of gain recognized by A on the exchange.
>
> When B transfers to A the property that B had acquired in order to exercise the option, B has disposed of B's property in a taxable transaction because B has not met the requirements of section 1031. On the present facts, B has no gain or loss because the amount considered realized by B (the option price of 100x dollars) equals B's basis in the property (100x dollars). The adjusted basis to B in the property acquired from A is 105x dollars, the option price for the property that B paid to A, plus the premium for the option paid by B to A.

See also part III.B.7.c.vii Stock Options, which also applies to real estate options (see fns. 7370-7372.

II.G.16.c. Held for Investment (before and after 2017 changes)

Letter Ruling 200521002 held that a trust did not lack an investment motive for the replacement property when it placed the replacement property in an LLC and then distributed the LLC to its beneficiaries when the trust terminated.[1639] Similarly, Letter Ruling 200521002 held that a trust's termination after it acquires replacement property might not disqualify the trust on the grounds of not holding the replacement property for investment.[1640] Letter Ruling 9829025 held

[1639] Letter Ruling 200521002 reasoned:

> Your submission expresses two concerns regarding the above exchange. Your first concern is that the proposed transfer of the replacement property to LLC would violate the holding requirement of § 1031(a) (i.e., that the replacement property must be held by the taxpayer for productive use in a trade or business or for investment) as applied in Rev. Rul. 75-292 and Rev. Rul. 77-337. Your second concern is that, as a result of the Trust's terminating distribution of membership interests in LLC to multiple beneficiaries, which will then result in a de facto partnership between the beneficiaries for federal income tax purposes, the holding requirement of § 1031(a) as applied in the revenue rulings would be violated with respect to the replacement property.
>
> With respect to your first concern, you represent that the replacement property will be held by the Trust (and LLC) for investment purposes throughout the Trust's existence. You also represent that LLC will not elect to be taxed as a corporation and will remain a single member LLC until at least Date A. Therefore, LLC will be disregarded as an entity separate from the Trust, its sole owner. Consequently, the transfer by the Trust of the replacement property to LLC will also be disregarded, and the Trust will be considered the direct owner of the replacement property for federal income tax purposes. Because the Trust represents that it intends to hold the replacement property for investment purposes, the transfer by the Trust of the replacement property to LLC will not violate the holding requirement of § 1031(a).[1]
>
> [1] No ruling is requested on the factual question of whether any specific replacement property is held for a particular purpose.
>
> With respect to your second concern, the Trust represents that it will hold the replacement property for investment purposes until the Trust terminates by its own terms on Date A. Because the Trust is a testamentary trust, the termination date was fixed by Decedent and cannot be modified or changed. As a result, the Trust is not acquiring the replacement property in order to dispose of the property pursuant to a prearranged plan. The Plan of Termination has been approved by the State A probate court and will take effect without regard to whether this exchange of properties is consummated. Consequently, the like-kind exchange in this case is wholly independent from the distribution of the properties under the Plan of Termination. Thus, the facts in this ruling request are distinguishable from those in Rev. Rul. 75-292 and Rev. Rul. 77- 337.
>
> Therefore, based on the facts and representations presented above, we rule that the Trust's termination and distribution of its assets to the beneficiaries will not preclude the replacement property received by the Trust in this exchange from being considered property held either for productive use in a trade or business or investment, within the meaning of § 1031, because this like-kind exchange is independent of the impending termination.

[1640] Letter Ruling 200521002, which reasoned:

> Your submission expresses two concerns regarding the above exchange. Your first concern is that the proposed transfer of the replacement property to LLC would violate the holding requirement of § 1031(a) (i.e., that the replacement property must be held by the taxpayer for productive use in a trade or business or for investment) as applied in Rev. Rul. 75-292 and Rev. Rul. 77-337. Your second concern is that, as a result of the Trust's terminating distribution of membership interests in LLC to multiple beneficiaries, which will then result in a de facto partnership between the beneficiaries for federal income tax purposes, the holding requirement of § 1031(a) as applied in the revenue rulings would be violated with respect to the replacement property.

that Code § 1031 exchange started before death with a sale can be completed after death with a purchase.[1641] Furthermore, a gift of replacement property might not disqualify the exchange, either.[1642] *Magneson v. Commissioner*, 81 T.C. 767 (1983 reviewed case), which involved a step-transaction contribution of replacement property into a partnership called U.S. Trust (not the famed trust company), set the stage for these rules, first reviewing prior cases:

> We have previously decided that if a taxpayer holds the property received in a "like-kind" exchange for sale, the taxpayer does not hold the property for investment and, therefore, is not entitled to the benefits of nonrecognition under section 1031(a). *Regals Realty Co. v. Commissioner*, 43 B.T.A. 194 (1940), *affd.* 127 F.2d 931 (2d Cir. 1942). We have also decided that if a taxpayer holds the property received in a like-kind exchange for the

---

> With respect to your first concern, you represent that the replacement property will be held by the Trust (and LLC) for investment purposes throughout the Trust's existence. You also represent that LLC will not elect to be taxed as a corporation and will remain a single member LLC until at least Date A. Therefore, LLC will be disregarded as an entity separate from the Trust, its sole owner. Consequently, the transfer by the Trust of the replacement property to LLC will also be disregarded, and the Trust will be considered the direct owner of the replacement property for federal income tax purposes. Because the Trust represents that it intends to hold the replacement property for investment purposes, the transfer by the Trust of the replacement property to LLC will not violate the holding requirement of § 1031(a).[1]
>
> [1] No ruling is requested on the factual question of whether any specific replacement property is held for a particular purpose.
>
> With respect to your second concern, the Trust represents that it will hold the replacement property for investment purposes until the Trust terminates by its own terms on Date A. Because the Trust is a testamentary trust, the termination date was fixed by Decedent and cannot be modified or changed. As a result, the Trust is not acquiring the replacement property in order to dispose of the property pursuant to a prearranged plan. The Plan of Termination has been approved by the State A probate court and will take effect without regard to whether this exchange of properties is consummated. Consequently, the like-kind exchange in this case is wholly independent from the distribution of the properties under the Plan of Termination. Thus, the facts in this ruling request are distinguishable from those in Rev. Rul. 75-292 and Rev. Rul. 77-337.
>
> Therefore, based on the facts and representations presented above, we rule that the Trust's termination and distribution of its assets to the beneficiaries will not preclude the replacement property received by the Trust in this exchange from being considered property held either for productive use in a trade or business or investment, within the meaning of § 1031, because this like-kind exchange is independent of the impending termination.

[1641]The letter ruling was extremely favorable, providing a community property basis step-up for both halves of the replacement property. The IRS takes the opposite approach with Code § 1033 condemnation cases, contrary to certain cases. Rev. Rul. 64-161; *Morris v. Commissioner*, 55 T.C. 636 (1971).

[1642] Letter Ruling 8126070, approving a like-kind exchange shortly before a trust terminated, reasoned:

> A recent tax court case, *Wagensen v. Commissioner*, 74 T.C. 653 (1980) pertains in part to an exchange of real property, a ranch, for like kind property subsequently followed by a gift of the newly acquired ranch property to taxpayer's children. The court found the exchange to be one which qualified under section 1031 of the Code. The ranch properties in question were held for use in trade or business or for investment by taxpayer both before and after the exchange.
>
> In the instant case it is represented that the trust will retain legal title to the acquired property, and continue to hold such property for use in trade or business or investment until the trust terminates as a matter of law on the date the youngest child reaches age 25.
>
> Accordingly, under the facts and circumstances as presented we conclude that the mere fact that the trust will terminate shortly after the exchange will not by itself preclude the property received by the Executor-Trustees in this exchange from being property held either for productive use in trade or business or for investment within the intendment of section 1031(a) of the Code.

> purpose of making gifts, the taxpayer is deemed not to hold it for investment and, thus, is not entitled to nonrecognition treatment under section 1031(a). *Click v. Commissioner*, 78 T.C. 225 (1982). On the other hand, we have decided that if a taxpayer holds the property for investment, even though he contemplates eventually passing it to his children, his holding under such circumstances is acceptable within the requirement of section 1031(a). *Wagensen v. Commissioner*, 74 T.C. 653 (1980).
>
> Petitioners did not hold Plaza Property for sale, personal use, or for transfer as a gift. Rather, petitioners held Plaza Property for making a nontaxable contribution of it to U.S. Trust; hence, we must decide whether such "holding" qualifies for holding as an investment.

After reviewing Reg. § 1.1002-1,[1643] the court reasoned:

> The principle embodied in the regulations, i.e., that to qualify for nonrecognition, the new property is substantially a continuation of the old investment still unliquidated, springs from the committee reports covering the predecessor of section 1031(a). H. Rept. 704, 73d Cong., 2d Sess. (1934), 1939-1 C.B. (Part 2) 554, 564. *Wagensen v. Commissioner*, *supra* at 658.
>
> In *Koch v. Commissioner*, 71 T.C. 54, 63-64 (1978), we explained:
>
>> The basic reason for allowing nonrecognition of gain or loss on the exchange of like-kind property is that the taxpayer's economic situation after the exchange is fundamentally the same as it was before the transaction occurred. "[I]f the taxpayer's money is still tied up in the same kind of property as that in which it was originally invested, he is not allowed to compute and deduct his theoretical loss on the exchange, nor is he charged with a tax upon his theoretical profit…." The rules of section 1031 apply automatically; they are not elective…. The underlying assumption of section 1031(a) is that the new property is substantially a continuation of the old investment still unliquidated. ***
>
> Section 1.1031(a)-1(a), Income Tax Regs., refers to section 1.1002, Income Tax Regs. Applying the rationale of the regulations, committee reports, and case law to the instant case, the "holding question" should be resolved by deciding whether the contribution of Plaza Property to U.S. Trust was a liquidation of petitioners' investment or a continuation of the old investment unliquidated in a modified form. We conclude that it is the latter.

[1643] For Reg. § 1.1002-1(b), "Strict construction of exceptions from general rule," see fn 3010 in part II.J.18.f Commutation vs Mere Division. Reg. § 1.1002-1(c), "Certain exceptions to general rule," provides (emphasis added by court):

> Exceptions to the general rule are made, for example, by sections 351(a), 354, 361(a), 371(a)(1), 371(b)(1), 721, 1031, 1035 and 1036. These sections describe certain specific exchanges of property in which at the time of the exchange particular *differences exist between the property parted with and the property acquired, but such differences are more formal than substantial*. As to these, the Code provides that such differences shall not be deemed controlling, and that gain or loss shall not be recognized at the time of the exchange. *The underlying assumption of these exceptions is that the new property is substantially a continuation of the old investment still unliquidated*; and, in the case of reorganizations, that the new enterprise, the new corporate structure, and the new property are substantially continuations of the old still unliquidated.

The contribution of Plaza Property to U.S. Trust admittedly is a nontaxable transaction under section 721 which, together with section 1031(a), is unequivocally described above in section 1.1002-1, Income Tax Regs., as representing a continuation of the old investment, not a liquidation….

As further support for the proposition that petitioners merely effected a change in the form of the ownership of their investment instead of liquidating their investment, it must be pointed out that U.S. Trust's basis in the Plaza Property for computing gain or loss is petitioners' basis, *i.e.*, their cost basis in Iowa Street.[4] U.S. Trust "tacks on" to petitioners' holding period for Plaza Property pursuant to section 1223(2), and the Commissioner has acknowledged that it is the partnership's holding period with respect to the property, rather than the partner's holding period for his partnership interest, which determines whether the gain or loss is long term or short term. Rev. Rul. 68-79, 1968-1 C.B. 310….

[4] This assumes that U.S. Trust has not availed itself of the elective provisions regarding basis.

Plaza Property was stipulated by the parties to be "commercial property." N.E.R. was organized to "acquire, own, maintain and operate" Plaza Property. If petitioners had not contributed Plaza Property to U.S. Trust, they might, nevertheless, be taxable as a partnership together with the other owners of undivided interests depending upon the level of their activity. Section 301.7701-3(a), Proced. & Admin. Regs., provides in part as follows:[1644]

> Mere co-ownership of property which is maintained, kept in repair, and rented or leased does not constitute a partnership. For example, if an individual owner, or tenants in common, of farm property lease it to a farmer for a cash rental or a share of the crops, they do not necessarily create a partnership thereby. Tenants in common, however, may be partners if they actively carry on a trade, business, financial operation, or venture and divide the profits thereof. For example, a partnership exists if co-owners of an apartment building lease space and in addition provide services to the occupants either directly or through an agent.

This demonstrates that, for tax purposes, joint ownership of the property and partnership ownership of the property are merely formal differences and not substantial differences as set forth in section 1.1002(c), Income Tax Regs., and petitioners did not liquidate their investment in Plaza Property when they contributed it to U.S. Trust.

Bolker v. Commissioner, 81 T.C. 782 (1983), reasoned:

We today ruled on a very similar issue in *Magneson v. Commissioner*, 81 T.C. 767 (1983) (Court reviewed). In *Magneson*, petitioners traded property A for property B, immediately contributing property B to a partnership for a 10-percent interest. Petitioners began with an interest in real property A, ending up with an interest in a partnership that had a fractional interest in real property B. Since section 721 admittedly

[1644] [My footnote:] the regulation cited above no longer exists. Instead, it is integrated into the last part of Reg. § 301.7701-1(a)(2), "Certain joint undertakings give rise to entities for federal tax purposes," which is reproduced in fn 587 in part II.C.10 Whether Tenancy-in-Common or other Arrangement Constitutes a Partnership.

applied when property B was transferred to the partnership, the only question we confronted was whether the exchange of property A for property B was nontaxable under section 1031.

We recognized that under section 1031, both properties A and B were required to be held for investment purposes. Since property A had clearly been held for investment purposes within the meaning of section 1031, we focused on property B, stating the issue as follows: "petitioners held [property B] for making a nontaxable contribution to [the partnership]; hence we must decide whether such 'holding' qualifies for holding as an investment." Noting that petitioners did not hold property B for sale, personal use, or for transfer as a gift (see *Click v. Commissioner*, 78 T.C. 225 (1982); *Wagensen v. Commissioner*, 74 T.C. 653 (1980); *Regals Realty Co. v. Commissioner*, 43 B.T.A. 194 (1940), *affd.* 127 F.2d 931 (2d Cir. 1942)), we concluded that the holding of property B for a nontaxable contribution to a partnership under section 721 qualified as a holding for investment purposes under section 1031.

We believe *Magneson* entitles petitioner to relief herein. In both *Magneson* and the instant case, property A was exchanged for property B in a like-kind exchange, both properties being held for business or investment as opposed to personal purposes. In *Magneson*, the exchange of A for B was immediately followed by a tax-free section 721 transfer; in the instant case, the exchange of A for B was immediately preceded by a tax-free acquisition under section 333. The tax-free transaction preceded rather than followed the exchange is insufficient to produce opposite results. For, as noted, section 1031's holding for business or investment requirement is reciprocal, equally applicable to properties at both ends of an exchange. Nothing in the policy underlying section 1031 suggests that this minor variation in sequence warrants treating taxpayers dramatically different.

Even aside from *Magneson*, we believe petitioner is correct. A trade of property A for property B, both of like kind, may be preceded by a tax-free acquisition of property A at the front end, or succeeded by a tax-free transfer of property B at the back end. Considering first the tax-free acquisition of property A through a section 333 liquidation at the front end, it is appropriate to ask why gain is deferred on a liquidation. In short, where a taxpayer surrenders stock in his corporation for real estate owned by the corporation, he continues to have an economic interest in essentially the same investment, although there has been a change in the form of ownership. His basis in the real estate acquired on liquidation is equal to his basis in the stock surrendered, and the gain realized is not recognized but deferred until gain on the continuing investment is realized through a liquidating distribution. At that point, proceeds of the sale are taxed to the extent of the gain.

Similarly, Letter Ruling 200131014 held that transferring replacement property to the taxpayer's wholly-owned, single-member LLC will be disregarded and therefore will not constitute a disqualifying transfer of the replacement property.

Ultimately, all of these authorities supported the more complex Letter Ruling 200651030, which had the following facts:

Trust was established by Decedent upon his death in Year A to administer his assets. Decedent's will provided for the establishment of the Trust in order to provide an ongoing source of safe and certain income from investment returns to its beneficiaries, which included Decedent's wife and daughters. Under the terms of Decedent's will, the Trust will terminate at midnight on Date A, which is twenty years after the death of Decedent's last surviving child. Because the Trust is due to terminate, the trustees of the Trust ("Trustees") formulated a detailed Plan of Termination, which outlines a plan and mechanism for the distribution of the Trust's assets to its numerous remainder beneficiaries upon its termination.

Originally, the assets of the Trust consisted mainly of real estate holdings in State A. The submission provides that, in order to diversify the Trust's real estate holdings, increase investment returns, and generate income, the Trustees received approval from the State A probate court many years ago to conduct exchanges of real estate. The Trustees have since engaged in many such exchanges, which have been structured to qualify for nonrecognition treatment under § 1031. As a result, the assets in the Trust now include real estate holdings in State A and diversified industrial, office, and retail properties located in other states. The submission states that all of the Trust's directly-owned properties are held for investment purposes. Recently, the value of the Trust's assets approximated $X.

Under the Plan of Termination, approximately X percent of the Trust will be distributed on termination in cash to certain remainder beneficiaries. Y percent of the Trust will be distributed on termination through an in-kind distribution of one or more Trust properties to one expected remainder beneficiary. The remaining corpus (approximately Z percent) of the Trust's net asset value will be contributed by the Trustees prior to termination to LLC, a State B limited liability company, with the Trust as the single member holding all of the shares in the LLC. Upon termination of the Trust, all of the shares in LLC will be distributed among certain (but not all) remainder beneficiaries (to the extent their remainder interest is not otherwise satisfied with cash or in-kind property). LLC intends to continue the Trust's real estate investment operations in a manner consistent with past practices. It is represented that much of the current managerial and operational structure will remain in place after the Trust terminates. The Trustees submitted the Plan of Termination to the State A probate court, which approved it on Date B.

The Trustees have determined that it would be in the best interests of the Trust to exchange a few of the Trust's real estate investment properties each year in order to exercise their fiduciary duty to increase rental income. The Trust has 180 days to complete an exchange of properties by acquiring the replacement property pursuant to § 1031(a)(3)(B). Trust anticipates that, following the Trust's termination, LLC will continue to periodically conduct § 1031 exchanges. Trust has two exchanges that it expects it will be unable to close prior to its termination and, accordingly, desires to transfer its interests in these transactions to LLC for continuation post-termination. These two exchanges are the subject of this ruling request.

<u>Exchange 1</u>: On Date C, the Trust received an offer to purchase Relinquished Property 1 from Buyer 1. The acquisition price offered is $Y but is subject to negotiation. A final sale contract between the parties will condition closing of the disposition of this property on the receipt of a favorable private letter ruling in response to this request and the receipt of final subdivision approval from the local authorities. Subdivision approval is expected by Date E, which is less than 180 days from the termination date of the Trust. Accordingly, the Trust will convey Relinquished Property 1 to the LLC pursuant to the Termination Plan and will also transfer its contractual rights to continue the disposition of

Relinquished Property 1 and to acquire qualified § 1031 replacement property to LLC, which would then transact the entire exchange after Trust's termination.

Exchange 2: On Date D, the Trust entered into a non-binding Letter of Intent with Buyer 2 for the disposition of Relinquished Property 2. The acquisition price agreed to by the parties is $Z. The Letter of Intent provides that the obligation of the Trust to complete the disposition of Relinquished Property 2 is contingent on the receipt of a favorable private letter ruling in response to this request and the receipt of final subdivision approval from the local authorities. Subdivision approval for Relinquished Property 2 is also expected by Date E, which is less than 180 days from the termination date of the Trust. Accordingly, the Trust will convey Relinquished Property 2 to the LLC pursuant to the Termination Plan and will also transfer its contractual rights to continue the disposition of Relinquished Property 2 and to acquire qualified § 1031 replacement property to LLC, which would then transact the entire exchange after Trust's termination.

Relinquished Property 1 and Relinquished Property 2 (collectively "Relinquished Properties") will be subject to separate exchange transactions. However, the submission represents that they can be treated identically for purposes of this ruling request. The submission represents that for purposes of § 1031, replacement properties will be acquired (collectively "Replacement Properties"); however, these properties have not yet been identified or located for either of the exchange transactions.

As stated above, the Trust (subject to receipt of this private letter ruling) will transfer its interest in the Relinquished Properties' sale contracts (the "Disposition Contracts") to LLC for closing shortly after LLC becomes a multi-member LLC on or about the termination date of the Trust (Date A). LLC would then have the full 180 days to complete the exchanges by acquiring Replacement Properties. Consequently, pursuant to the Termination Plan, the Trustees will convey the Relinquished Properties (subject to the contractual obligations for disposition and exchange) to LLC on or before the end of the year, and will distribute all of the Trust's interests in LLC to certain of its beneficiaries on the termination date (Date A), or as soon thereafter as practicable. Prior to the terminating distribution, the Trust will be the sole member of LLC. The contribution of the Relinquished Properties and assignment of the Disposition Contracts to LLC will have no federal income tax consequences. The LLC will be taxed like a partnership when the beneficiaries receive their interests.

The two subject exchanges will be structured to qualify as "deferred exchanges" under § 1.1031(k)-1 of the Income Tax Regulations and will comply with all of the requirements of those provisions. Prior to closing, the LLC will assign all of its rights in the Disposition Contracts with respect to the Relinquished Properties to an exchange intermediary. The LLC and the exchange intermediary will enter into an exchange agreement setting forth the terms and conditions under which the intermediary will dispose of each Relinquished Property and acquire each Replacement Property identified by the LLC.

As with the Relinquished Properties, the LLC will assign its rights to the Replacement Property acquisition contract(s) to the exchange intermediary and notify all parties to the contract(s) prior to closing. At closing, the intermediary will deposit the exchange funds with an escrow company and the seller(s) will deed the replacement property directly to the LLC.

In addition, the Trust makes the following representations:

(1) The Relinquished Properties now and at all times during the Trust's ownership thereof, have been held by the Trust for investment purposes;

(2) The disposition of the Relinquished Properties and the acquisition of the Replacement Properties will be accomplished in a manner that in all respects, aside from the issues raised in this ruling request, qualify the transactions as tax-free exchanges within the meaning of § 1031 and the regulations thereunder; and

(3) The Replacement Properties will be of "like kind" to the Relinquished Properties for purposes of § 1031 and will be held by the LLC for investment purposes.

Letter Ruling 200651030 reasoned:

> In Rev. Rul. 75-292,1975-2 C.B. 333, an individual taxpayer in a prearranged transaction transferred land and buildings used in the taxpayer's trade or business to an unrelated corporation in exchange for land and an office building owned by the corporation and used in its trade or business. Immediately thereafter, the individual taxpayer transferred the land and office building to the individual's newly created corporation in exchange for the stock of the same corporation. The revenue ruling concluded that the individual taxpayer did not exchange the real estate for other real estate to be held either for productive use in a trade or business or for investment by that taxpayer but that the taxpayer acquired the replacement property for the purpose of transferring it to the new corporation. As a result, the exchange did not qualify for nonrecognition under § 1031.
>
> In Rev. Rul. 77-337, 1977-2 C.B. 305, in a prearranged plan, an individual taxpayer liquidated all the stock of a corporation and transferred the corporation's sole asset, a shopping center, to a third party in exchange for like-kind property. Rev. Rul. 77-337 noted that under Rev. Rul. 75-292, a newly created corporation's eventual productive use of property in its trade or business is not attributable to its sole shareholder. Consequently, the individual taxpayer did not hold the shopping center for use in a trade or business or for investment because the corporation's previous trade or business use could not be attributed to its sole shareholder, and the exchange did not qualify for nonrecognition of gain or loss under § 1031.
>
> Section 1031 was designed, in part, to postpone the recognition of gain or loss when property used in a trade or business or held for investment is exchanged for other property in the course of the continuing operation of that trade or business, or in the course of investment. In those circumstances, the taxpayer has not received any gain or suffered any loss in a general and economic sense, nor has the exchange of property resulted in the termination of one venture and assumption of another. The business venture operated before the exchange continues after the exchange without any real economic change or alteration, and without realization of any cash or readily liquefiable asset. See *Carlton v. United States*, 385 F.2d 238 (5th Cir. 1967); *Jordan Marsh Co. v. Commissioner*, 269 F.2d 453 (2 Cir. 1959); *cf. Portland Oil Co. v. Commissioner*, 109 F.2d 479 (1 Cir.) *cert. den.*, 310 U.S. 650 (1940). See generally § 1.1002-1(c) ("[t]he underlying assumption of these exceptions [*e.g.*, § 1031] is that the new property is substantially a continuation of the old investment still unliquidated").
>
> In this case, after the Trust's terminating distribution of membership interests in LLC to multiple beneficiaries, the resulting entity will be functionally like the Trust and will be treated as a partnership between the beneficiaries merely for federal income tax

> purposes. However, the members of LLC will be substantially identical to the Trust beneficiaries. LLC intends to continue the Trust's real estate investment operations in a manner consistent with past practices. Primarily the same managerial and operational structure will remain in place after the Trust terminates. LLC will continue the current business practices of the Trust with respect to its real estate properties. These facts distinguish this case from Rev. Rul. 77-337.
>
> Additionally, in this case, the Trust is terminating involuntarily by its own terms after many years in existence. Because the Trust is a testamentary trust, the termination date was fixed by Decedent and cannot be modified or changed. The Plan of Termination has been approved by the State A probate court and will take effect without regard to whether these exchanges involving Trust properties are consummated. According to your submission, the Trust has engaged in numerous § 1031 exchanges throughout the years. Consequently, the like-kind exchanges in this case are wholly independent from termination of the Trust and its distribution of the Relinquished Properties to the LLC, as successor entity, under the Plan of Termination. Thus, the facts in this ruling request are distinguishable from those in Rev. Rul. 75-292 and Rev. Rul. 77-337, which involve voluntary transfers of properties pursuant to prearranged plans.
>
> Accordingly, because the LLC will continue with the real estate business previously conducted by the Trust and is functionally a continuation of the Trust, and because the like-kind exchanges here are independent of the impending termination of the Trust, we rule that under the specific facts and representations presented above, the transfer of the Relinquished Properties to LLC subject to the contracts for their disposition will not violate the holding requirement of § 1031(a) with respect to the subject exchanges.

Similarly, Letter Ruling 200812012 held that the termination of an LLC resulting from the distribution of trust assets will not preclude the replacement property from being held for investment or for the productive use in a trade or business under Code § 1031(a). The facts were:

> Trust was established as a private testamentary trust by Decedent's will upon his death in Year 1 to administer his assets and to provide income to its beneficiaries. At the present time, Trust has real property assets located in numerous states. All of the Trust's directly-owned properties are held for investment purposes. Trustees of Trust created an operational structure though which Trust engaged in various real estate investment activities. This operational structure included LLC, which is owned by percent by Trust, with the remaining percentage owned by Corporation, which is itself wholly owned by Trust. The real estate investment activities carried out by LLC include like-kind exchanges of real estate investment properties.
>
> Under the terms of Decedent's will, Trust terminated at midnight on Date A. Prior to Date A, Trustees formulated a Termination Plan, which outlined a plan and mechanism for distributing Trust's assets to its remainder beneficiaries upon termination. State A Probate Court approved Termination Plan on Date B. Under Termination Plan, Trust assets equal to w percent of the remainder beneficiaries' stirpital interests were distributed in cash and through in-kind distribution to certain remainder beneficiaries. The remaining Trust assets equal to x percent of the remainder beneficiaries' stirpital interests was contributed by Trustees prior to termination to Successor Entity. The assets contributed to Successor Entity included Trust's y percent membership interest in LLC and its 100 percent stock interest in Corporation. Upon termination of Trust, all

shares of Successor Entity were distributed among certain (but not all) remainder beneficiaries. Successor Entity is intended to continue Trust's real estate investment operations on a going forward basis consistent with past practice, with much of the same managerial and operational structure remaining intact.

Trustees have determined that it is prudent for LLC to dispose of Relinquished Property in an exchange that will meet the requirements for like-kind exchange treatment under § 1031. As replacement property, it was determined that LLC should acquire a z percent interest in Replacement Property. The acquisition of Replacement Property and the disposition of the Relinquished Property were structured as a reverse like-kind exchange pursuant to Rev. Proc. 2000-37, 2 C.B. 308. On Date C, Trust entered into a contract for the purchase of Replacement Property from Seller. On Date D, Trust assigned a z percent interest in the purchase contract to LLC; LLC immediately assigned the entire z percent interest to DE, a disregarded entity whose sole member was EAT. On the same date, LLC entered into a Qualified Exchange Accommodation Agreement with EAT, pursuant to which EAT agreed to act as exchange accommodation titleholder within the meaning of Rev. Proc. 2000-37 with respect to Replacement Property. Seller transferred title to a z percent interest in Replacement Property to DE on Date D.

On Date E, LLC entered into a contract for the sale of Relinquished Property to Buyer. On Date F, LLC and EAT entered into an Exchange Agreement pursuant to which EAT agreed to act as qualified intermediary with respect to Relinquished Property. On Date G, LLC assigned its rights under the contract for sale of Relinquished Property to EAT. On Date H, LLC directly deeded Relinquished Property to Buyer. EAT then assigned the membership units in DE to LLC to complete the exchange.

The submission states that LLC has at all times intended to hold the Replacement Property solely to generate additional rental income and has no plans whatsoever to develop or construct any improvements on such property or to sell Replacement Property or any portion thereof at any time. It has continued to own this property for investment purposes and has continued to manage it in precisely the same way. There has been no change in the beneficial ownership of LLC.

On Date 1, pursuant to the Termination Plan, the Trust distributed all of its shares in Successor Entity, which then held almost all of the Trust's real estate and other investment operation assets, including its interests in LLC, to its remainder beneficiaries. Under Rev. Rul. 99-5, 1999-1 C.B. 434, the distribution of the shares to the remainder beneficiaries is treated as a distribution of Trust's assets followed by a recontribution of those assets by the remainder beneficiaries to Successor Entity. Because assets held by Successor Entity include a greater than 50 percent interest in LLC, this distribution and deemed recontribution of the shares resulted in a § 708(b)(1)(B) termination of LLC. In a § 708(b)(1)(B) termination, LLC is deemed to have contributed its assets to a new partnership in exchange for an interest in the new partnership, and then to have made a liquidating distribution of that new partnership interest to its members. Treas. Reg. § 1.708-1(b)(4).

The Trust makes the following representations:

(1) The Relinquished Property was held by LLC for investment purposes at all times during its ownership thereof;

(2) The disposition of the Relinquished Property and the acquisition of the Replacement Property was accomplished in a manner that in all respects, aside from the issues raised in this ruling request, qualify the transaction as tax-free exchange within the meaning of § 1031 and the regulations thereunder; and

(3) The Replacement Property was "like kind" to the Relinquished Property for purposes of § 1031 and was held by the LLC for investment purposes, aside from the issues raised in this ruling request. In addition, Trust represents that there was a valid "exchange" of property under the reverse exchange safe harbors of Rev. Proc. 2000-37.

After repeating various law, including the first three paragraphs quoted above from the reasoning of Letter Ruling 200651030, Letter Ruling 200812012 reasoned and held:

> In this case, Trust terminated involuntarily by its own terms after many years in existence. Because Trust was a testamentary trust, the termination date was fixed by Decedent and could not be modified or changed. The Plan of Termination was approved by the State A Probate Court and would have occurred without regard to whether this exchange of properties had been consummated. Consequently, the like-kind exchange in this case was wholly independent from termination of Trust, and thus LLC's acquisition of the Replacement Property in a reverse like-kind exchange was wholly independent of its § 708(b)(1)(B) termination. Moreover, there has been no change either in the beneficial ownership of LLC, or in the way it holds or manages the Replacement Property. It has continued to own this property for investment purposes. Thus, the facts in this ruling request are distinguishable from those in Rev. Rul. 75-292 and Rev. Rul. 77-337, which involve voluntary transfers of properties pursuant to prearranged plans.
>
> We therefore conclude that the termination of LLC under § 708(b)(1)(B) resulting from the distribution of Trust assets pursuant to the Termination Plan will not preclude the Replacement Property from being held for investment or for the productive use in a trade or business within the meaning of § 1031(a).

In light of all of the authority above, it appears that a nontaxable trust termination can occur before, during, or after a like-kind exchange, without ruining the expected Code § 1031 tax deferral, so long as the taxpayer's old and new property were/are held for investment under Code § 1031. For whether a trust termination is nontaxable, see part II.J.18 Trust Divisions, Mergers, and Commutations; Decanting.

Although partnership interests are not eligible for Code § 1031 treatment, buying all of the partnership interests at once (and holding them in a disregarded single member LLC) might constitute buying the partnership's underlying property.[1645]

[1645] Letter Ruling 200807005 analyzed Issue 1 as follows:

> Taxpayer will acquire 100 percent of the partners' interests in Partnership. Pursuant to Rev. Rul. 99-6, Partnership is considered to have terminated under § 708(b)(1)(A) and made a liquidating distribution of its real property assets to its partners, and Taxpayer is treated as having acquired such real property assets from the partners for federal tax purposes. Since Taxpayer will acquire 100 percent of the partners' interests in Partnership, Taxpayer is treated as having acquired the real property assets of Partnership rather than as having acquired partnership

Related party involvement in the exchange might trigger gain recognition.[1646]

On the other hand, related party use before the exchange might not necessarily cause problems. In light of nontax considerations involving aircraft, the IRS ruled that a partnership held relinquished aircraft and replacement aircraft "for productive use in a trade or business" under Code § 1031 even though the aircraft, which are leased to a related entity that that is owned by the same individuals who own the partnership, are the partnership's only operating assets and do not generate an economic profit for the partnership.[1647] Also, a vacation home

---

> interests from the partners. Further, this transaction does not constitute an abuse of the type that Congress sought to remedy in the Deficit Reduction Act of 1984, which appears to be aimed at abuses by sellers of partnership interests. We view this transaction as a like-kind exchange under § 1031(a)(1), rather than as an exchange of partnership interests in violation of § 1031(a)(2)(D). Accordingly, Taxpayer may defer the gain on the sale of Relinquished Property under § 1031 if Taxpayer, through QI, acquires 100 percent of the interests of the partners in Partnership, which owns the Replacement Property.

The ruling then approved acquiring the partnership interests and therefore the replacement property through its wholly owned disregarded LLC.

[1646] Code § 1031(f), which Lipton explains in "Eighth Circuit Sheds Light on Like-Kind Exchanges," *Journal of Taxation* (6/2015). Letter Ruling 200920032 held that, for purposes of this rule, an irrevocable trust paying mandatary income to the grantor's surviving spouse, remainder to the grantor's children was not related under Code § 267(b) or 707(b)(1) with respect to grantor trusts deemed owned by the grantor's two siblings, respectively.

[1647] CCA 201601011, analyzing the situation as follows:

> The facts indicate that the rent P charges O for use of the relinquished property and the replacement property is insufficient for P to make an economic profit on the aircraft rental to O. However, many businesses hold and use properties in a way that, if the use of the property were viewed as an activity, do not and could not generate profit. Nevertheless, the property itself is held for productive use in that business. Thus, P's lack of intent to make an economic profit on the aircraft rental does not establish that the aircraft fails the productive use in a trade or business standard of § 1031. In addition, we agree with the field that A's and B's use of the property for personal purposes is not relevant in determining whether P holds the aircraft for productive use in a trade or business [because O included any personal use in the income of A and B].
>
> Moreover, it is important to point out that businesses, for any number of reasons, opt to hold property, especially aircraft, in a separate entity. In the present case, O, which operates a legitimate business enterprise, requires private aircraft to be available to its senior executives, both for business travel and as an employment perk. However, for business and legal reasons, the aircraft are owned not by O but by P, a related entity. If O owned the aircraft, or was the 100 percent owner of P, we doubt that the field would have raised the issue of whether the aircraft were held for productive use in a trade or business. Were we to disallow § 1031 treatment based on the entity structure presented here, businesses would be forced to structure their transactions in inefficient and potentially risky ways to achieve § 1031 treatment. Thus the entity structure in the present case should not be used as grounds that the aircraft fails to qualify as property held for productive use in a trade or business.
>
> In sum, O operates a legitimate business enterprise and requires private aircraft to be available to its senior executives. For business and legal reasons, O has structured its affairs so that the aircraft are owned through P and leased to O for an amount not intended to generate a profit for P. On these facts, the aircraft are held for productive use in a trade or business.
>
> We are sensitive to two facts raised by the field: P charges below-market rent for the replacement aircraft and A and B, rather than O, own P. While these facts do not disqualify the property from being held for productive use in a trade or business for purposes of § 1031, it may be that other tax provisions such as § 280F or 482 may apply to disallow tax benefits or impose a tax treatment different from the treatment claimed by P, O or A and B.

that is rented more than it is used for personal purposes may qualify as "property held for productive use in a trade or business or for investment."[1648]

II.G.17. Economic Substance Penalty and Doctrines

II.G.17.a. What Is the Codified Economic Substance Doctrine

Code § 7701(o) provides that income tax benefits with respect to a transaction (including a series of transactions),[1649] entered into in connection with a trade or business or an activity engaged in for the production of income,[1650] are not allowable if the transaction does not have economic substance or lacks a business purpose.[1651] The discussion below focuses on Code § 7701(o), but common law rules continue to apply as well.[1652]

Amplifying Notice 2010-62, Notice 2014-58[1653] guides us on what a "transaction" is:

> For purposes of determining whether the codified economic substance doctrine applies, " transaction" generally includes all the factual elements relevant to the expected tax treatment of any investment, entity, plan, or arrangement; and any or all of the steps that are carried out as part of a plan. Facts and circumstances determine whether a plan's steps are aggregated or disaggregated when defining a transaction.
>
> Generally, when a plan that generated a tax benefit involves a series of interconnected steps with a common objective, the " transaction" includes all of the steps taken together

---

> Finally, our analysis extends only to whether the relinquished and replacement aircraft meet the held for productive use in a trade or business requirement in § 1031(a). We do not express or imply an opinion on whether the exchange met the other requirements under § 1031 to qualify as a like-kind exchange. Nor do we express or imply an opinion regarding other tax aspects of the transaction.

[1648] Rev. Proc. 2008-16 provides details for a safe harbor.

[1649] Code § 7701(o)(5)(D).

[1650] Code § 7701(o)(5)(B).

[1651] Code § 7701(o)(5)(A). The legislative history cites *ACM Partnership v. Commissioner*, 157 F.3d 231 (3d Cir. 1998), *aff'g* 73 T.C.M. (CCH) 2189 (1997), *cert. denied* 526 U.S. 1017 (1999); *Klamath Strategic Investment Fund, LLC v. United States*, 472 F.Supp.2d 885 (E.D. Texas 2007), *aff'd* 568 F.3d 537 (5th Cir. 2009); *Coltec Industries, Inc. v. United States*, 454 F.3d 1340 (Fed. Cir. 2006), vacating and remanding 62 Fed. Cl. 716 (2004) (slip opinion at 123-124, 128); *cert. denied*, 127 S.Ct. 1261 (Mem.) (2007). *Klamath* was followed by *Robert E. Smith, III v. Commissioner*, T.C. Memo. 2017-218, which is described in fn. 5104 in part II.Q.7.h.iii Taxation of Corporation When It Distributes Property to Shareholders. An extensive relevant quote from *Coltec* is in part II.M.3.a General Rule: No Gain Or Loss on Contribution to Partnership, where it was relied upon to disqualify a transaction from Code § 721. See also Lipton, "*Flextronics*, *Sundrup*, and the Application of the Economic Substance Doctrine," *Journal of Taxation* (Mar. 2011), and "In Southgate, Economic Substance, Substance Over Form, and Penalties Are a Dangerous Mix," *Journal of Taxation* (Feb. 2012) (discussing case in which penalties were not applied). For the general rule disallowing losses where economic substance is lacking, see fn. 1179. For a ruling that a partnership lacked economic substance that did not mention this penalty, see fn. 5141.

[1652] The Joint Committee on Taxation Report on P.L. 111-152 (3/30/2010) said:

> No inference is intended as to the proper application of the economic substance doctrine under present law. The provision is not intended to alter or supplant any other rule of law, including any common-law doctrine or provision of the Code or regulations or other guidance thereunder; and it is intended the provision be construed as being additive to any such other rule of law.

[1653] For analysis of Notice 2014-58, see Lipton, "New Guidance Sheds Light on Economic Substance Doctrine and Related Penalties," *Journal of Taxation* (Dec. 2014).

> – an aggregation approach. This means that every step in the series will be considered when analyzing whether the “ transaction” as a whole lacks economic substance. However, when a series of steps includes a tax-motivated step that is not necessary to achieve a non-tax objective, an aggregation approach may not be appropriate. In that case, the “ transaction” may include only the tax-motivated steps that are not necessary to accomplish the non-tax goals – a disaggregation approach.
>
> Whether the economic substance doctrine is relevant and whether a transaction should be disaggregated will be considered on a case-by-case basis, depending on the facts and circumstances of each individual case. For example, if transfers of multiple assets and liabilities occur and the transfer of a specific asset or assumption of a specific liability was tax-motivated and unnecessary to accomplish a non-tax objective, then the economic substance doctrine may be applied solely to the transfer or assumption of that specific asset or liability. Separable activities may take many forms including, for example, the use of an intermediary employed for tax benefits and whose actions or involvement was unnecessary to accomplish an overarching non-tax objective. These situations are merely examples intended to illustrate the potential application of the disaggregation approach and are not exhaustive or comprehensive.

If this doctrine is relevant, a transaction shall be treated as having economic substance only if the transaction changes in a meaningful way (apart from income tax effects) the taxpayer’s economic position, and the taxpayer has a substantial purpose (apart from income tax effects) for entering into such transaction.[1654] Income tax effects include not only federal but also state and local income effects.[1655] The Treasury Department and the IRS intend to issue regulations pursuant to Code § 7701(o)(2)(B), which directs the issuance of regulations requiring foreign taxes to be treated as expenses in determining pre-tax profit in appropriate cases. In the interim, the enactment of the provision does not restrict the ability of the courts to consider the appropriate treatment of foreign taxes in economic substance cases.[1656]

Achieving a financial accounting benefit is not taken into account as a purpose for entering into a transaction if the origin of such financial accounting benefit is a reduction of Federal income tax.[1657]

If the taxpayer argues that the transaction has profit potential, the potential profit shall be taken into account only if the present value of the reasonably expected pre-tax profit from the transaction is substantial in relation to the present value of the expected net tax benefits that would be allowed if the transaction were respected.[1658] If the expected capital loss is virtually certain and the chance of economic benefits is very small, the transaction will not be respected. *Reddam v. Commissioner*, 113 AFTR.2d 2014-2549 (9th Cir. 6/13/2014). In evaluating the taxpayer’s alleged subjective motive, the court noted that the tax shelter promoter, KPMG, recommended obtaining independent counsel to review the very complex transactions, which the taxpayer failed to do, thereby undercutting the taxpayer’s alleged profit motive. Objectively evaluating the taxpayer’s motive, footnote 10 of the opinion noted an expert report:

[1654] Code § 7701(o)(1).
[1655] Code § 7701(o)(3).
[1656] Notice 2010-62.
[1657] Code § 7701(o)(4).
[1658] Code § 7701(o)(2)(A).

Dr. Miller's report states that only in highly uncommon circumstances would the OPIS transaction make any kind of profit, but that five percent of the time it could make between $3,450,000 and $6,300,000. It defies belief that an objective investor would risk $6,000,000 on a transaction that was designed to lose money at least seventy-five percent of the time, could make a nominal profit twenty percent of the time, but might, only five percent of the time, have generated profits in that range for any reason other than to garner the eight-figure tax loss the transaction was designed to generate.

The legislative history carves out some exceptions:[1659]

If the realization of the tax benefits of a transaction is consistent with the Congressional purpose or plan that the tax benefits were designed by Congress to effectuate, it is not intended that such tax benefits be disallowed. See, e.g., Treas. Reg. sec. 1.269-2, stating that characteristic of circumstances in which an amount otherwise constituting a

> deduction, credit, or other allowance is not available are those in which the effect of the deduction, credit, or other allowance would be to distort the liability of the particular taxpayer when the essential nature of the transaction or situation is examined in the light of the basic purpose or plan which the deduction, credit, or other allowance was designed by the Congress to effectuate. Thus, for example, it is not intended that a tax credit (e.g., section 42 (low-income housing credit), section 45 (production tax credit), section 45D (new markets tax credit), section 47 (rehabilitation credit), section 48 (energy credit), etc.) be disallowed in a transaction pursuant to which, in form and substance, a taxpayer makes the type of investment or undertakes the type of activity that the credit was intended to encourage.[1660]
>
> The provision is not intended to alter the tax treatment of certain basic business transactions that, under longstanding judicial and administrative practice are respected, merely because the choice between meaningful economic alternatives is largely or entirely based on comparative tax advantages. Among[345] these basic transactions are (1) the choice between capitalizing a business enterprise with debt or equity;[346] (2) a U.S. person's choice between utilizing a foreign corporation or a domestic corporation to make a foreign investment;[347] (3) the choice to enter a transaction or series of transactions that constitute a corporate organization or reorganization under subchapter C;[348] and (4) the choice to utilize a related-party entity in a transaction, provided that the arm's length standard of section 482 and other applicable concepts are satisfied.[349] Leasing transactions, like all other types of transactions, will continue to be analyzed in light of all the facts and circumstances.[350] As under present law, whether a particular transaction meets the requirements for specific treatment under any of these provisions is a question of facts and circumstances. Also, the fact that a transaction meets the requirements for specific treatment under any provision of the Code is not determinative of whether a transaction or series of transactions of which it is a part has economic substance.[351]

The Treasury Department and the IRS do not intend to issue general administrative guidance regarding the types of transactions to which the economic substance doctrine either applies or does not apply.[1661] The IRS will not issue a letter ruling regarding whether the economic substance doctrine is relevant to any transaction or whether any transaction complies with the requirements of Code § 7701(o).[1662] However, the IRS has issued guidance to examiners, including:[1663]

> The following facts and circumstances tend to show that application of the economic substance doctrine to a transaction is likely not appropriate.…
>
> - Transaction is not promoted/developed/administered by tax department or outside advisors

[1660] [my footnote:] A 2022 case, *Cross Refined Coal, LLC v. Commissioner*, rebuked the IRS for having sought to disallow partnership income taxation for a transaction structured consistently with the tax credit paradigm Congress encouraged. See generally text discussion accompanying fn 575 in part II.C.9 When Is a Partner in Form Not a Partner in Substance?
[1661] Notice 2010-62.
[1662] Notice 2010-62.
[1663] "Guidance for Examiners and Managers on the Codified Economic Substance Doctrine and Related Penalties," LB&I Control No. LB&I-4-0711-015 (7/15/2011, identifying as impacted IRM 20.1.1, 20.1.5). The Guidance was applied in CCA 201515020.

- Transaction is not highly structured
- Transaction contains no unnecessary steps
- Transaction that generates targeted tax incentives is, in form and substance, consistent with Congressional intent in providing the incentives
- Transaction is at arm's length with unrelated third parties
- Transaction creates a meaningful economic change on a present value basis (pretax)
- Taxpayer's potential for gain or loss is not artificially limited
- Transaction does not accelerate a loss or duplicate a deduction
- Transaction does not generate a deduction that is not matched by an equivalent economic loss or expense (including artificial creation or increase in basis of an asset)
- Taxpayer does not hold offsetting positions that largely reduce or eliminate the economic risk of the transaction
- Transaction does not involve a tax-indifferent counterparty that recognizes substantial income
- Transaction does not result in the separation of income recognition from a related deduction either between different taxpayers or between the same taxpayer in different tax years
- Transaction has credible business purpose apart from federal tax benefits
- Transaction has meaningful potential for profit apart from tax benefits
- Transaction has significant risk of loss
- Tax benefit is not artificially generated by the transaction
- Transaction is not pre-packaged
- Transaction is not outside the taxpayer's ordinary business operations.

In addition, it is likely not appropriate to raise the economic substance doctrine if the transaction being considered is related to the following circumstances.

- The choice between capitalizing a business enterprise with debt or equity
- A U.S. person's choice between utilizing a foreign corporation or a domestic corporation to make a foreign investment
- The choice to enter into a transaction or series of transactions that constitute a corporate organization or reorganization under subchapter C

- The choice to utilize a related-party entity in a transaction, provided that the arm's length standard of section 482 and other applicable concepts are satisfied….

The following facts and circumstances tend to show that application of the economic substance doctrine may be appropriate.

- Transaction is promoted/developed/administered by tax department or outside advisors
- Transaction is highly structured
- Transaction includes unnecessary steps
- Transaction is not at arm's length with unrelated third parties
- Transaction creates no meaningful economic change on a present value basis (pretax)
- Taxpayer's potential for gain or loss is artificially limited
- Transaction accelerates a loss or duplicates a deduction
- Transaction generates a deduction that is not matched by an equivalent economic loss or expense (including artificial creation or increase in basis of an asset)
- Taxpayer holds offsetting positions that largely reduce or eliminate the economic risk of the transaction
- Transaction involves a tax-indifferent counterparty that recognizes substantial income
- Transaction results in separation of income recognition from a related deduction either between different taxpayers or between the same taxpayer in different tax years
- Transaction has no credible business purpose apart from federal tax benefits
- Transaction has no meaningful potential for profit apart from tax benefits
- Transaction has no significant risk of loss
- Tax benefit is artificially generated by the transaction
- Transaction is pre-packaged
- Transaction is outside the taxpayer's ordinary business operations.

If, after considering all of the above, the examiner wishes to pursue the case, the examiner needs to consider:

1. Is the transaction a statutory or regulatory election? If so, then the application of the doctrine should not be pursued without specific approval of the examiner's manager in consultation with local counsel.

2. Is the transaction subject to a detailed statutory or regulatory scheme? If so, and the transaction complies with this scheme, then the application of the doctrine should not be pursued without specific approval of the examiner's manager in consultation with local counsel.

3. Does precedent exist (judicial or administrative) that either rejects the application of the economic substance doctrine to the type of transaction or a substantially similar transaction or upholds the transaction and makes no reference to the doctrine when considering the transaction? If so, then the application of the doctrine should not be pursued without specific approval of the examiner's manager in consultation with local counsel.

4. Does the transaction involve tax credits (e.g., low income housing credit, alternative energy credits) that are designed by Congress to encourage certain transactions that would not be undertaken but for the credits? If so, then the application of the doctrine should not be pursued without specific approval of the examiner's manager in consultation with local counsel.

5. Does another judicial doctrine (e.g., substance over form or step transaction) more appropriately address the noncompliance that is being examined? If so, those doctrines should be applied and not the economic substance doctrine. To determine whether another judicial doctrine is more appropriate to challenge a transaction, an examiner should seek the advice of the examiner's manager in consultation with local counsel.

6. Does recharacterizing a transaction (e.g., recharacterizing debt as equity, recharacterizing someone as an agent of another, recharacterizing a partnership interest as another kind of interest, or recharacterizing a collection of financial products as another kind of interest) more appropriately address the noncompliance that is being examined? If so, recharacterization should be applied and not the economic substance doctrine. To determine whether recharacterization is more appropriate to challenge a transaction, an examiner should seek the advice of the examiner's manager in consultation with local counsel.

7. In considering all the arguments available to challenge a claimed tax result, is the application of the doctrine among the strongest arguments available? If not, then the application of the doctrine should not be pursued without specific approval of the examiner's manager in consultation with local counsel..

This LB&I Directive is not an official pronouncement of law, and cannot be used, cited, or relied upon as such.

Although we cannot rely on this guidance to examiners, many tax advisors have difficulty providing assurances to clients on this issue, so having some insight into the IRS' views, even if nonbinding views, can help tax advisors evaluate a situation.[1664]

The examiner is also directed to coordinate with Counsel.[1665] Finally, any proposal to impose a penalty regarding this doctrine at the examination level must be reviewed and approved by the appropriate Director of Field Operations before the penalty is proposed.[1666]

Notice 2014-58 discusses whether the doctrine will apply when:

> a rule or doctrine … disallows the tax benefits under subtitle A of the Code related to a transaction because:
>
> (1) the transaction does not change a taxpayer's economic position in a meaningful way (apart from Federal income tax effects); or
>
> (2) the taxpayer did not have a substantial purpose (apart from Federal income tax effects) for entering into the transaction.

Notice 2014-58 views such a transaction as a "similar rule of law." It concludes:

> The IRS will not apply a penalty under section 6662(b)(6) (or otherwise argue that a transaction is described in section 6662(b)(6)) unless it also raises section 7701(o) to support the underlying adjustments. If the IRS does not raise section 7701(o) to disallow the claimed tax benefits and instead relies upon other judicial doctrines (e.g., the substance over form or step transaction doctrines) to support the underlying adjustments, the IRS will not apply a section 6662(b)(6) penalty (or otherwise argue that a transaction is described in section 6662(b)(6)) because the IRS will not treat the transaction as failing to meet the requirements of a similar rule of law. Code sections and Treasury regulations, other than section 7701(o) and the regulations under that section, that disallow tax benefits are not similar rules of law for purposes of section 6662(b)(6).

CCA 202240019 explained:

> There is no case law on section 7701(o) relating to when a transaction was "entered into" for purposes of applying the codified doctrine. The Service did, however, issue guidance in analyzing "transaction" for the purposes of section 7701(o).
>
> Whether the codified economic substance doctrine applies to the transaction (because it was entered into after the March 30, 2010 effective date) is a factual inquiry. The codified doctrine, however, defines "transaction" to include a "series of transactions."

[1664] I am not suggesting considering audit risk in determining what the law is. We need to advise our clients on what the law is without considering risk of detection, and audit risk is a separate business issue about which clients ask so that they can weigh the economic advantages or disadvantages of taking various positions. If a client refuses to take a position consistent with the law, one should consult applicable professional and regulatory ethics requirements, particularly if the item is material.
[1665] CC-2012-008 (4/3/2012). This directive also provides that the common law economic substance doctrine and codified economic substance doctrine and related penalties require National Office review before briefs or motions are filed with the Tax Court and defense or suit letters are sent to the Department of Justice.
[1666] IDD 20140203 (2/3/2014), affecting IRM §§ 20.1.1 and 20.1.5.

I.R.C. § 7701(o)(5)(D). The facts below seem to indicate that this may be a "series of transactions" depending on how factually similar the pre-codified steps are to the steps taken in 2015.

The Service can use an aggregation or disaggregation approach to determine whether a transaction lacks economic substance under section 7701(o). See I.R.S. Notice 14-58, 2014-44 I.R.B. 746. The aggregation approach interprets "transaction" to include all of the steps taken together when a plan that generates a tax benefit involves a series of interconnected steps. *Id*. From the facts described below, it appears that the creation of the NewCap, merging OldCap into NewCap, and the issuance of new policies would be a series of interconnected steps to generate a tax benefit. Under the aggregation approach, therefore, it appears "the transaction" was entered into before the effective date of section 7701(o), as the steps are included together.

The disaggregated approach applies when a series of steps includes a tax motivated step that is not necessary to achieve a non-tax objective, the "transaction" may include only the tax-motivated steps that are not necessary to accomplish the non-tax goals. See I.R.S. Notice 14-58. The disaggregated approach may apply here. If the tax-motivated step is entering into new policies, there may be an argument that those steps can be viewed in isolation, notwithstanding what took place with OldCap and NewCap. The facts here would need to show that what occurred after 2010 is not part of a "series of transactions" and that the tax-motivated step is not necessary to obtain a non-tax goal.

It should be noted, however, that the codification of the economic substance doctrine did not supplant the common law doctrine. The common law doctrine can be applied to transactions entered into before and after March 30, 2010.

II.G.17.b. Penalty For Violating Statutory Economic Substance Doctrine

For transactions entered into after March 30, 2010:[1667] Any disallowance of claimed tax benefits by reason of a transaction lacking economic substance or failing to meet the requirements of any similar rule of law is subject to a 20% penalty.[1668] If the relevant facts affecting the tax treatment are not adequately disclosed[1669] in the return or in a statement attached to the return,

[1667] P.L. 111-152 at §1409(e).
[1668] Code § 6662(b)(6).
[1669] The IRS annually updates what constitutes adequate disclosures for each year's tax returns. See Rev. Proc. 2016-13.

then the penalty doubles to 40%.[1670] Although reasonable cause generally is a defense to negligence and other penalties, it is not a defense to this 20% or 40% penalty.[1671]

II.G.17.c. Economic Substance, Sham Transaction, Business Purpose, and Substance Over Form Doctrines

In explaining how *Gregory v. Helvering*[1672] "spawned the economic substance, sham transaction, business purpose, and substance over form doctrines," the Tax Court reasoned:[1673]

> *Gregory*, like much of the caselaw using the economic substance, sham transaction, and other judicial doctrines in interpreting and applying tax statutes, represents an effort to reconcile two competing policy goals. On one hand, having clear, concrete rules embodied in a written Code and regulations that exclusively define a taxpayer's obligations (1) facilitates smooth operation of our voluntary compliance system, (2) helps to render that system transparent and administrable, and (3) furthers the free market economy by permitting taxpayers to know in advance the tax consequences of their transactions. On the other side of the scales, the Code's and the regulations' fiendish complexity necessarily creates space for attempts to achieve tax results that Congress and the Treasury plainly never contemplated, while nevertheless complying strictly with the letter of the rules, at the expense of the fisc (and other taxpayers).
>
> In *Gregory*, the Court confronted such an extreme result and, on the basis of equitable principles, interpreted and applied the relevant statute so as to subject Mrs. Gregory's transaction to tax. Likewise, the various other judicial doctrines applied in tax cases all represent efforts to rein in activity that, while within the technical letter of the rules,

---

[1670] Code § 6662(i). Notice 2010-62 provides:

> Unless the transaction is a reportable transaction, as defined in Treas. Reg. § 1.6011-4(b), the adequate disclosure requirements of section 6662(i) will be satisfied if a taxpayer adequately discloses on a timely filed original return (determined with regard to extensions) or a qualified amended return (as defined under Treas. Reg. § 1.6664-2(c)(3)) the relevant facts affecting the tax treatment of the transaction. If a disclosure would be considered adequate for purposes of section 6662(d)(2)(B) (without regard to section 6662(d)(2)(C)) prior to the enactment of section 1409 of the Act, then it will be deemed to be adequate for purposes of section 6662(i). The disclosure will be considered adequate only if it is made on a Form 8275 or 8275-R, or as otherwise prescribed in forms, publications, or other guidance subsequently published by the IRS consistent with the instructions and other guidance associated with those subsequent forms, publications, or other guidance. Disclosures made consistent with the terms of Rev. Proc. 94-69 also will be taken into account for purposes of section 6662(i). If a transaction lacking economic substance is a reportable transaction, as defined in Treas. Reg. § 1.6011-4(b), the adequate disclosure requirement under section 6662(i)(2) will be satisfied only if the taxpayer meets the disclosure requirements described earlier in this paragraph and the disclosure requirements under the section 6011 regulations. Similarly, a taxpayer will not meet the disclosure requirements for a reportable transaction under the section 6011 regulations by only attaching Form 8275 or 8275-R to an original or qualified amended return.

[1671] Code § 6664(c)(2). The reasonable cause exception also does not apply to reportable transaction understatements that are subject to this doctrine. Code § 6664(d)(2).

[1672] 293 U.S. 465 (1935).

[1673] *CNT Investors, LLC v. Commissioner*, 144 T.C. No. 11 (2015). The case acknowledged codification of the economic substance doctrine as being a positive step in the development of the doctrines. The transaction at hand preceded the codification. However, the codification would have applied only to penalty issues, as the Tax Court viewed the economic substance doctrine as a mere subset of the larger equitable principles it applied to this case.

> deeply offends their spirit.[40] Attempts to parse and define the doctrines merely intellectualize what is, ultimately, an equitable exercise. Those who favor transparency might prefer a strictly circumscribed taxonomy of judicial doctrines, to include exclusive definitions of the circumstances in which they should be applied. Those who favor administrability, protection of the fisc, and respect for congressional purpose might prefer that courts exercise carte blanche in disallowing results of transactions perceived as abusive. *Gregory* and its progeny represent an ongoing effort to reconcile these opposing principles and methodologies. Litigants and courts employ specialized terminology to make this effort appear more rigorous, but candidly, underneath, we are simply engaged in the difficult, commonsense task of judging.
>
> [40] Such efforts lie squarely within the courts' role in interpreting the law in ways consistent with congressional intent. "[C]ourts in the interpretation of a statute have some scope for adopting a restricted rather than a literal or usual meaning of its words where acceptance of that meaning would lead to absurd results, *** or would thwart the obvious purpose of the statute[.]" *Helvering v. Hammel*, 311 U.S. 504, 510-511 (1941).

If one engages in a series of transactions designed to offset the tax consequences of the last transaction, the Tax Court held that the invalidity of the initial transactions does not give rise to an argument that the last transaction should be overlooked for tax purposes:[1674]

> Neither the sham transaction doctrine nor the step transaction doctrine nor the two combined requires us to disregard the income-producing event along with the shelter transaction designed to offset it. Such an interpretation would render the doctrines toothless and yield absurd results…..
>
> Here, the gain-producing transaction and the shelter transaction occurred pursuant to a plan, and the shelter transaction arguably preceded realization of the gains it was designed to shield. But if we were to disregard the gain-producing transaction along with the shelter transaction, we would encourage taxpayers to hedge against the audit lottery by structuring their tax shelter transactions to precede and intertwine with their income-producing activities. We will not do so. "[W]hile a taxpayer is free to organize his affairs as he chooses, nevertheless, once having done so, he must accept the tax consequences of his choice, whether contemplated or not". *Commissioner v. Nat'l Alfalfa Dehydrating & Milling Co.*, 417 U.S. 134, 149 (1974).

If a loan has economic substance and is properly characterized as a loan, an IRS challenge that the interest "lacked economic substance because it was overpriced" would not succeed even if the loan's motive was to avoid taxes.[1675]

In *Mazzei v. Commissioner*, 150 T.C. 138 (2018), a reviewed opinion that is summarized and explained in the text accompanying and preceding fns 1883-1884 in part II.G.22 IRA as Business Owner, the taxpayers' Roth IRAs contributed $1 each to a foreign sales corporation (FSC), a type of entity designed to achieve the goals of a specialized income tax provision that authorized shifting income from the taxpayers' corporation to the FSC. The Tax Court majority

[1674] *CNT Investors, LLC v. Commissioner*, 144 T.C. No. 11 (2015).

[1675] *The Bank of New York Mellon Corporation v. Commissioner*, 801 F.3d 104 (2nd Cir. 2015); the IRS unsuccessfully attacked an interest deduction in another tax shelter case it otherwise won - *Ad Investment 2000 Fund LLC v. Commissioner*, T.C. Memo. 2015-223, which the Tax Court reconsidered and reaffirmed in T.C. Memo. 2016-226.

agreed with the IRS that this income shifting constituted a distribution from the corporation to its owners, followed by an excess contribution to their Roth IRAs that owned the FSC. The facts were sympathetic to the government, in that the Roth IRAs contributed $1 to the FSC and received dividends from the FSC totaling $533,057 over four years. To me, the biggest problem is that the corporation that paid the FSCs had too much discretion in the contractual arrangements – so much that the court viewed the payments as voluntary. However, the majority used some disturbing language that went further than just saying that:

> Considering all the facts in the record, however, it is evident that the Roth IRAs' formal purchase of the FSC stock for $1 did not reflect the underlying reality; *i.e.*, petitioners' capacity (through Injector Co.)[39] and clear intention to direct Injector Co. to make large commission payments to the FSC. The form of the transactions the Roth IRAs entered into does not reflect the underlying related-party expectations and intentions. Petitioners' transactions attempt to utilize this mismatch between substance and form to defeat the contribution limits. We have not found any textual support in the Code or the regulations that would allow such a mismatch between the form and substance of a purchase by these Roth IRAs. We therefore disregard the purchase.
>
> [39] Petitioners' export receipts had fluctuated to some degree over the years, but they had reliable and established export receipts when they entered these transactions.
>
> Furthermore, because petitioners (through various passthrough entities) controlled every aspect of the transactions in question, we conclude that they, and not their Roth IRAs, were the owners of the FSC stock for Federal tax purposes at all relevant times.[40] The dividends from the FSC are therefore properly recharacterized as dividends from the FSC to petitioners, followed by petitioners' contributions of these amounts to their respective Roth IRAs …
>
> [40] We note that, because no income tax issues are presented in these cases, we need not and do not consider whether the FSC was owned by and through one of petitioners' passthrough entities rather than directly by petitioners.

The dissent criticized this approach:

> The majority then asks another question: Did what the Roth IRAs paid for the FSC have any relation to its future value? The majority says it didn't, which it finds is another sign that the Roth IRAs didn't own the FSC. See op. Ct. p. 45. But the Code doesn't require a founding shareholder to take as his basis what he hopes the earnings on his investment will be—it requires him to take as his basis only the cost or amount of whatever he contributed. Secs. 351, 358(a); see also sec. 1012 (basis is cost). And the Code certainly doesn't treat his corporation as a sole proprietorship if it turns out to be profitable. What the Mazzeis' Roth IRAs paid for the FSC stock is meaningless - which might be why the Commissioner didn't challenge it.
>
> Still trying to shoehorn these cases into a sale-leaseback framework, the majority then says that because Injector Co. controlled how much cash went into the FSC, an unrelated Roth IRA couldn't have expected any upside benefits from its small investment. See op. Ct. pp. 47-49. That's true, but proves too much - any commonly controlled corporations between which the owners could readjust contractual rights at any time would be in the same situation.

The majority's application of sale-leaseback analysis also misses a larger point. The Supreme Court tells us to respect a corporation for tax purposes as long as it's a real business or its purpose is the "equivalent of business activity." *Moline Props., Inc. v. Commissioner*, 319 U.S. 436, 439 (1943). And the regulations say that an FSC - a corporation - receive commissions based not on the normal transfer-pricing rules but on a statutory formula unrelated to economic reality. See, *e.g.*, sec. 925(a); sec. 1.925(a)-1T(a)(1), Temporary Income Tax Regs., 52 Fed. Reg. 6443-44 (Mar. 3, 1987). So as long as an FSC complies with the statute, we respect it as if it had a real business purpose - it doesn't do anything, but the Code and regulations give it the "equivalent of business activity." The same is essentially true for Roth IRAs - they have no nontax purpose, but the Code grants them tax benefits if they comply with certain formalities. Sec. 408A; see *Summa II*, 848 F.3d at 789 (point of Roth IRA is tax avoidance). And here the Commissioner concedes that the Mazzeis observed those formalities.

Moline Properties was about income tax, see 319 U.S. at 438, not the excise taxes at issue here, but that doesn't change anything. In *Hellweg* we held that we have to treat transactions the same way for excise tax as we do for income tax. 2011 WL 821090, at *9. There we refused to recharacterize distributions from a DISC to a Roth IRA for excise-tax purposes because the Commissioner didn't also make income-tax adjustments.[12] *Id*. So if we would respect FSCs and Roth IRAs for income-tax purposes, we also would have to respect them for excise-tax purposes.

[12] The Commissioner here also doesn't seek to redetermine income tax, but only because the statute of limitations has run - he says if it hadn't, he'd redetermine the income tax too. We previously decided this was enough of a distinction from *Hellweg* to let these cases go forward on the excise-tax issue alone. *Mazzei v. Commissioner*, T.C. Memo. 2014-55, at *12-*13.

The majority's dominion-and-control test would wreak havoc on many - perhaps hundreds of thousands - of small individually- or family-owned corporations were we ever to apply it for anything other than disposing of these cases. By the majority's reasoning, someone who created a business, incorporated it, issued himself 100% of the stock in exchange for a small capital investment, and continued to run the day-to-day operations wouldn't really own his corporation - especially if it was a success. We'd have to disregard the corporation because the initial investment was too small and didn't accurately predict the business's future earnings.

The majority replied to the last paragraph above:

This is nonsense. The dissent's hypothetical scenario would not involve a mismatch between substance and form. At the initial point of capitalization, the fair market value and the substantive economic value would be identical and equal to the capital investment. As the day-to-day operations commenced, that initial value would begin to change in concert with changing expectations regarding future cashflows. The fair market value and the substantive economic value of the stock would remain identical, whether the business was a success or not. Petitioners' situation is different because at the moment of purchase petitioners' formal characterization of the purchase did not match the underlying substantive and related-party economics.[47]

[47] The dissent, see dissenting op. pp. 100-104, attempts to contrast our approach with that of *Cottage Sav. Assoc. v. Commissioner*, 499 U.S. 554 (1991), *Gitlitz v.*

> *Commissioner*, 531 U.S. 206 (2001), *Austin v. Commissioner*, T.C. Memo. 2017-69, and *Caterpillar Tractor Co. v. United States*, 218 Ct. Cl. 517 (1978). None of these cases addresses the substance of ownership arising from a purchase in a related-party context. For example, the Commissioner did not challenge the purchase transaction in *Austin*; as the Court found, "the company funded the ESOP with a $500,000 loan … [and t]hese funds were used to purchase (on the basis of an outside appraisal) 5,000 shares of the company's common stock." *Austin v. Commissioner*, at *8. There was no dispute as to whether the ESOP owned the shares in substance. See also *Cottage Sav. Assoc. v. Commissioner*, 499 U.S. at 568 ("[T]here is no contention that the transactions in this case were not conducted at arm's length, or that Cottage Savings retained de facto ownership of the participation interests[.]").

To me, the majority is contradicting itself. On one hand, it says that the FSC was worth a lot more than the original capital contribution, because it was in line to make lots of profits from dealing with the taxpayers' corporation. On the other hand, it said that the taxpayers' corporation controlled the contracts with the FSC such that the FSC really couldn't count on anything, so the payments to the FSC were really dividends followed by Roth IRA contributions. I think this is just the Tax Court applying a smell test yet again.

The Ninth Circuit agreed with my last sentence above, reversing the Tax Court, 998 F.3d 1041 (2021):

> We join our sister circuits in concluding that, when Congress expressly departs from substance-over-form principles, the Commissioner may not invoke those principles in a way that would directly reverse that congressional judgment…
>
> As the First Circuit noted in the Benenson case, some might think that what the Mazzeis did here was too "clever," if not "unseemly." 887 F.3d at 523. But as that court noted, the substance-over-form doctrine "is not a smell test," it is "a tool of statutory interpretation." *Id*. It may have been unwise for Congress to allow taxpayers to pay reduced taxes, and pay out dividends, "through a structure that might otherwise run afoul of the Code." *Id*. at 518. But it is not our role to save the Commissioner from the inescapable logical consequence of what Congress has plainly authorized. Accordingly, to the extent that it was adverse to the Mazzeis, the judgment of the Tax Court is reversed.

II.G.18. Intellectual Property and Other Intangible Assets

II.G.18.a. Taxation of Intellectual Property Generally

One might consult a good primer on income tax planning for intellectual property generally[1676] or for universities.[1677]

[1676] See Postlewaite, Cameron & Kittle-Kamp: *Federal Income Taxation of Intellectual Properties & Intangible Assets* (WG&L). Postlewaite authors a treatise on partnership income taxation. See also Hodges & Fowler, "Tax Considerations of Acquiring Intellectual Property," *Journal of Taxation* (Oct. 2014); the authors summarized key points of that article in "Tax Considerations of Acquiring Intellectual Property," *Federal Taxes Weekly Alert Newsletter* (1/22/2015 – Vol. 61, No. 4)

[1677] Mancino and Lion, "Monetizing Colleges' And Universities' Intellectual Property," *Taxation of Exempts* (WG&L) (May/June 2015).

Whether the costs of acquiring computer software are deductible currently or capitalized depends on whether they are self-created or purchased.[1678]

II.G.18.b. Sale or Exchange of Intellectual Property - Capital Gain vs. Ordinary Income

Generally, one needs to transfer all of one's rights to an intangible asset to obtain capital gain treatment. A transfer of only some rights tends to be treated as a license, somewhat akin to renting rather than selling property.

All of the discussion in part II.G.18 Intellectual Property and Other Intangible Assets needs to consider that, for purposes of Code §§ 1-1563, "capital asset" does not include:[1679]

> a patent, invention, model or design (whether or not patented), a secret formula or process, a copyright, a literary, musical, or artistic composition, a letter or memorandum, or similar property, held by -
>
> (A) a taxpayer whose personal efforts created such property,
>
> (B) in the case of a letter, memorandum, or similar property, a taxpayer for whom such property was prepared or produced, or
>
> (C) a taxpayer in whose hands the basis of such property is determined, for purposes of determining gain from a sale or exchange, in whole or part by reference to the basis of such property in the hands of a taxpayer described in subparagraph (A) or (B)

Similarly, after 2017 tax reform, Code § 1231 capital gain treatment[1680] does not apply to "a patent, invention, model or design (whether or not patented), a secret formula or process, a copyright, a literary, musical, or artistic composition, a letter or memorandum, or similar property, held by a taxpayer" described in the above quote.[1681]

On the other hand, the sale of an interest in a partnership that holds the above-mentioned property may receive capital gain treatment with respect to the value attributable to that property if the property is not being amortized or if the sale is a Code § 736 redemption (or perhaps those qualifications are unnecessary).[1682] See parts II.Q.8.e.ii.(b) Character of Gain on Sale of Partnership Interest (capital gain treatment), II.Q.8.b.i.(g) Code § 751 – Hot Assets (exception for items ineligible for capital gain treatment, with a shorter list of ineligible items when a Code § 736 redemption is involved), and II.Q.8.b.ii Partnership Redemption – Complete Withdrawal Using Code § 736.

[1678] Rev. Proc. 2000–50, modified by Rev. Proc. 2004-11.
[1679] Code § 1221(a)(3).
[1680] See part II.G.6.a Code § 1231 Property.
[1681] Code § 1231(b)(1)(C). From RIA Checkpoint History:
In 2017, P.L. 115-97, Sec. 13314(b), added "a patent, invention, model or design (whether or not patented), a secret formula or process," before "a copyright" in subpara. (b)(1)(C), effective for dispositions after 12/31/2017.
[1682] I am unsure whether amortizable intangibles are hot assets that trigger ordinary income tax in certain situations or whether they are never hot assets. See fn 5470 in part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

In an informal internal memo, the IRS advised that the transfer of certain fishing rights did not a sale or exchange of a capital asset but rather constituted ordinary income.[1683]

The IRS reasoned that the transfer merely provided the use of an asset for a limited time, with limited rights. The IRS stated:

> As discussed above, Taxpayer only transferred the right to fish in the Area on a yearly basis. What was transferred was a time-limited interest carved out from Taxpayer's allocation rights, the remainder of which it retained. Over time, appreciation in the value of the allocation rights, including the catch history, accrued to Taxpayer, not Transferee or other temporary users. As stated in *Gillette*, the term capital asset should be construed narrowly. What Taxpayer transferred was less than the whole directed allocation right stemming from the Act, Vessel's catch history, and the cooperative agreements. "[T]he right to use is not a capital asset, but simply an incident of the underlying... property, the recompense for which is commonly regarded as rent."[1684]

However, depending on its terms, the terms of related agreements, and other factors, a license or sublicense agreement might constitute a transfer of substantially all rights in the subject property that might make the transaction eligible for capital gain treatment.[1685]

II.G.18.c. Patents

As with other intangible assets described above, whether the disposition of a patent is taxed as ordinary income or capital gain can be a challenging issue.

[1683] CCA 2011440230.

[1684] Citing *Commissioner v. Gillette Motor Transport Co.*, 364 U.S. 130, 135 (1960) (compensation for temporary seizure of business facilities is ordinary income).

[1685] *Mylan, Inc. v. Commissioner*, T.C. Memo. 2016-45, reconciling *Commissioner v. Danielson*, 378 F.2d 771, 775 (3d Cir. 1967), *vacating and remanding* 44 T.C. 549 (1965), with *Merck & Co. v. Smith*, 261 F.2d 162 (3d Cir. 1958), and *E.I. du Pont de Nemours & Co. v. United States*, 432 F.2d 1052 (3d Cir. 1970). The Tax Court described these cases:

> … the Court of Appeals held that the transfer of all substantial rights in a patent can result in a disposition for tax purposes qualifying the transferor for capital gains tax treatment while a transfer of anything less is called a license, with proceeds taxed at ordinary income tax rates. In both cases the Court of Appeals examined not only the terms of the contracts but also the intent of the parties and found that all substantial rights were transferred.…
>
> In *Danielson*, a taxpayer sought to change the tax consequences of a transaction by challenging the validity of the underlying contract's terms, specifically, allocation of consideration between the sale of stock and the covenant not to compete, because the taxpayer believed these terms did not reflect the agreement of the parties. In *Merck* and *E.I. du Pont de Nemours* the taxpayers did not seek to alter or challenge the agreements in question. Instead, the taxpayers disagreed with the Commissioner's interpretation of those contracts and characterization of the related payments for tax purposes…. The question presented here is a question of proper tax characterization of the proceeds of valid and enforceable contracts, and we are mindful that the Commissioner and taxpayers often disagree on this issue.[4]
>
> [4] To draw a parallel to taxation of real property transactions, we are dealing with the issue similar to whether the agreements as drafted represent a sublease or a lease assignment. See, *e.g.*, *Rochester Dev. Corp. v. Commissioner*, T.C. Memo. 1977-307 (holding that a lease in form was actually a sale for income tax purposes).

See also part II.G.33 Taxpayer Disavowing Form.

Statutory capital gain treatment applies if the seller is either (1) any individual whose efforts created such property, or (2) another individual who has acquired his or her interest in such property in exchange for consideration in money or money's worth paid to such creator before actual reduction to practice of the invention covered by the patent.[1686] However, the latter cannot be the employer of such creator or related[1687] to such creator. Thus, this treatment is best suited for someone who creates an invention on his or her own and then transfers it to an entity that then reduces the invention to practice.

For the holder to obtain capital treatment under Code § 1235, the holder must transfer "all substantial rights" to the patent.[1688] "The circumstances of the whole transaction, rather than the particular terminology used in the instrument of transfer, shall be considered in determining whether or not all substantial rights to a patent are transferred in a transaction."[1689] Retaining "a right to terminate the transfer at will" means that the transferor has not transferred "all substantial rights."[1690] The courts extend this rule to prevent the transferor from retaining control over the transferee, even if that control is not based on legal rights and does not fall within the level of control prohibited by Code § 1235(d).[1691] Code § 1235 capital gain treatment applied to

---

[1686] Code § 1235(b).
[1687] As defined in Code § 1235(d).
[1688] Code § 1235(a).
[1689] Reg. § 1.1235-2(b)(1).
[1690] Reg. § 1.1235-2(b)(4).
[1691] *Cooper v. Commissioner*, 143 T.C. No. 10 (2014), finding that, although the taxpayer held a minority position in the transferee's stock and the other shareholders were not statutorily related parties to him, he controlled the transferee. The taxpayers cited *Lee v. United States*, 302 F.Supp. 945 (E.D. Wis. 1969), and *Charlson v. United States*, 525 F.2d 1046, 1053 (Ct. Cl. 1975). Although the latter held for the taxpayer, *Cooper* followed its standards and held for the IRS:

> By contrast, TLC did not exercise its rights in the subject patents according to its own discretion. Both *Lee* and *Charlson* are distinguishable because the taxpayers in those cases did not control the transferee corporations. Here, Mr. Cooper—troubled by his deteriorated business relationship with Mr. Leckrone—formed TLC with individuals he could trust and ultimately control. Ms. Coulter and Ms. Walters—the shareholders and directors of TLC (along with Ms. Cooper)—did not have the patent, engineering, or other such skills to make them particularly valuable to a small patent licensing company. Instead, they were individuals whom Mr. Cooper could trust to follow his direction on patent licensing issues. Indeed, Ms. Coulter testified that the technical negotiations regarding licensing and patent infringement were over her head and she deferred to Mr. Cooper on such issues. She further testified that she signed licensing and infringement agreements when directed to do so by TLC's attorneys and signed checks and transferred funds when directed to do so by TLC's accountants.
>
> As officers and directors of TLC, Ms. Coulter and Ms. Walters took numerous actions that are inconsistent with acting independently and in the best interest of the corporation. Among other things, Ms. Coulter and Ms. Walters approved TLC's transfer of potentially valuable patents to Mr. Cooper for no consideration. At least in one instance, Mr. Cooper almost immediately licensed one of these patents to another related corporation for which that corporation received a royalty of $120,000 in 2007. As shareholders Ms. Coulter and Ms. Walters signed a stock restriction agreement placing restrictions on their ability to transfer shares of stock in TLC to anyone other than petitioners, without receiving any consideration in exchange. The stock restriction agreement did not place similar restrictions on petitioners.
>
> Indeed, it is unclear what material decisions, if any, the officers and directors of TLC made independent of Mr. Cooper. [footnote omitted] Mr. Cooper—and not the officers or directors of TLC—provided technical assistance to the Niro firm in interpreting the subject patents and relevant technology and in formulating patent enforcement strategies. Mr. Cooper conducted all technical matters for TLC—which in substance was all or a large part of TLC's activities.

termination payments under which the seller sold all substantial rights to a patent and the buyer agreed to pay the seller based on the sales of a product; when the buyer was acquired by another party, the buyer paid the seller the termination payment in question.[1692]

Although a partnership cannot qualify for this treatment, each member of a partnership who is an individual may qualify as to his or her share of a patent owned by the partnership.[1693] If a qualified individual contributes the patent to a partnership after actual reduction to practice of the invention, the individual retains his or her eligibility for capital gain treatment under this provision as to the individual's share of gain on the partnership's disposition of the patent.[1694]

Be careful to coordinate all of the rules described in this part II.G.18.c with the denial of capital gain treatment for certain assets under 2017 tax reform described in the text accompanying fn 1679 in part II.G.18.b Sale or Exchange of Intellectual Property - Capital Gain vs. Ordinary Income.

II.G.18.d. Amortization of Code § 197 Intangibles

Code § 197, "Amortization of goodwill and certain other intangibles," allows "any amortizable section 197 intangible" to be amortized over 180 months (15 years) in lieu of any other depreciation or amortization deduction.[1695]

Generally, Code § 197(c)(1) provides that an "amortizable section 197 intangible" is any "section 197 intangible":

(A) which is acquired by the taxpayer after the date of the enactment of this section, and

(B) which is held in connection with the conduct of a trade or business or an activity described in section 212.

Code § 197 was enacted August 10, 1993.[1696] For the conduct of a trade or business or an activity described in section 212, see part II.G.4.l.i Trade or Business; Limitations on Deductions Attributable to Activities Not Engaged in for Profit, especially parts II.G.4.l.i.(a) "Trade or Business" Under Code § 162 and II.G.4.l.i.(b) Requirements for Deduction Under Code § 212.

Code § 197(d), "Section 197 intangible," provides that, for purposes of Code § 197:

(1) *In general*. Except as otherwise provided in this section, the term "section 197 intangible" means—

Furthermore, in his role as general manager of TLC and under the terms of the letter agreement, Mr. Cooper made all material decisions for TLC with respect to the IP Innovation assignment agreement and the New Medium and AV Technologies agreements.

We do not find credible any testimony by petitioners that TLC was an independent corporation that Mr. Cooper did not control. We conclude that petitioners have failed to meet their burden of establishing that they transferred all substantial rights in the subject patents to TLC pursuant to section 1235(a).

[1692] Letter Ruling 201701009.

[1693] Reg. § 1.1235-2(d)(2).

[1694] Letter Ruling 200135015.

[1695] Code § 197(a), (b).

[1696] P.L. 103-66, Sec. 13261(a).

(A) goodwill,

(B) going concern value,

(C) any of the following intangible items:

(i) workforce in place including its composition and terms and conditions (contractual or otherwise) of its employment,

(ii) business books and records, operating systems, or any other information base (including lists or other information with respect to current or prospective customers),

(iii) any patent, copyright, formula, process, design, pattern, knowhow, format, or other similar item,

(iv) any customer-based intangible,

(v) any supplier-based intangible, and

(vi) any other similar item,

(D) any license, permit, or other right granted by a governmental unit or an agency or instrumentality thereof,

(E) any covenant not to compete (or other arrangement to the extent such arrangement has substantially the same effect as a covenant not to compete) entered into in connection with an acquisition (directly or indirectly) of an interest in a trade or business or substantial portion thereof,[1697] and

(F) any franchise, trademark, or trade name.

(2) *Customer-based intangible*.

(A) *In general*. The term "customer-based intangible" means—

(i) composition of market,

(ii) market share, and

(iii) any other value resulting from future provision of goods or services pursuant to relationships (contractual or otherwise) in the ordinary course of business with customers.

(B) *Special rule for financial institutions*. In the case of a financial institution, the term "customer-based intangible" includes deposit base and similar items.

[1697] [My footnote:] Code § 197(f)(3), "Treatment of amounts paid pursuant to covenants not to compete, etc.," provides, "Any amount paid or incurred pursuant to a covenant or arrangement referred to in subsection (d)(1)(E) shall be treated as an amount chargeable to capital account."

(3) *Supplier-based intangible*. The term "supplier-based intangible" means any value resulting from future acquisitions of goods or services pursuant to relationships (contractual or otherwise) in the ordinary course of business with suppliers of goods or services to be used or sold by the taxpayer.

However, Code § 197(e), "Exceptions," provides that "section 197 intangible" does not include any of the following:

(1) *Financial interests*. Any interest—

(A) in a corporation, partnership, trust, or estate, or

(B) under an existing futures contract, foreign currency contract, notional principal contract, or other similar financial contract.

(2) *Land*. Any interest in land.

(3) *Computer software*.

(A) *In general*. Any—

(i) computer software which is readily available for purchase by the general public, is subject to a nonexclusive license, and has not been substantially modified, and

(ii) other computer software which is not acquired in a transaction (or series of related transactions) involving the acquisition of assets constituting a trade or business or substantial portion thereof.

(B) *Computer software defined*. For purposes of subparagraph (A) , the term "computer software" means any program designed to cause a computer to perform a desired function. Such term shall not include any data base or similar item unless the data base or item is in the public domain and is incidental to the operation of otherwise qualifying computer software.

(4) *Certain interests or rights acquired separately*. Any of the following not acquired in a transaction (or series of related transactions) involving the acquisition of assets constituting a trade business or substantial portion thereof:

(A) Any interest in a film, sound recording, video tape, book, or similar property.

(B) Any right to receive tangible property or services under a contract or granted by a governmental unit or agency or instrumentality thereof.

(C) Any interest in a patent or copyright.

(D) To the extent provided in regulations, any right under a contract (or granted by a governmental unit or an agency or instrumentality thereof) if such right—

(i) has a fixed duration of less than 15 years, or

(ii) is fixed as to amount and, without regard to this section , would be recoverable under a method similar to the unit-of-production method.

(5) *Interests under leases and debt instruments*. Any interest under—

(A) an existing lease of tangible property, or

(B) except as provided in subsection (d)(2)(B), any existing indebtedness.

(6) *Mortgage servicing*. Any right to service indebtedness which is secured by residential real property unless such right is acquired in a transaction (or series of related transactions) involving the acquisition of assets (other than rights described in this paragraph) constituting a trade or business or substantial portion thereof.

(7) *Certain transaction costs*. Any fees for professional services, and any transaction costs, incurred by parties to a transaction with respect to which any portion of the gain or loss is not recognized under part III of subchapter C.

Also, Code § 197(c)(2), "Exclusion of self-created intangibles, etc.," provides that a "section 197 intangible" is not an "***amortizable*** section 197 intangible" (emphasis added) if it is not described in Code § 197(d)(1)(D), (E), or (F) and is created by the taxpayer, unless "the intangible is created in connection with a transaction (or series of related transactions) involving the acquisition of assets constituting a trade or business or substantial portion thereof." When an intangible is contributed by a partner to a partnership, Reg. § 1.197-2(g)(4), "Section 704(c) allocations," provides:

(i) Allocations where the intangible is amortizable by the contributor. To the extent that the intangible was an amortizable section 197 intangible in the hands of the contributing partner, a partnership may make allocations of amortization deductions with respect to the intangible to all of its partners under any of the permissible methods described in the regulations under section 704(c). See § 1.704-3.

(ii) To the extent that the intangible was not an amortizable section 197 intangible in the hands of the contributing partner, the intangible is not amortizable under section 197 by the partnership. However, if a partner contributes a section 197 intangible to a partnership and the partnership adopts the remedial allocation method for making section 704(c) allocations of amortization deductions, the partnership generally may make remedial allocations of amortization deductions with respect to the contributed section 197 intangible in accordance with § 1.704-3(d). See paragraph (h)(12) of this section to determine the application of the anti-churning rules in the context of remedial allocations.

Remedial allocations are when a partner who contributes cash or other high-basis assets takes depreciation or amortization deductions with respect to assets contributed by another partner that otherwise would not be allowable because of insufficient basis; the partner who contributed low basis assets recognizes ordinary income to create basis to absorb the deductions as the deductions arise.[1698]

[1698] Information about remedial allocations is in fn 3825 in part II.P.1.a.i.(a) General Rules for Allocations of Income in Partnerships.

Furthermore, Code § 197(c)(3) is described in part II.Q.1.c.iv Goodwill (and other intangible) Anti-Churning Rules.

Code § 197(f)(1), "Treatment of certain dispositions, etc.," provides:[1699]

(A) *In general*. If there is a disposition of any amortizable section 197 intangible acquired in a transaction or series of related transactions (or any such intangible becomes worthless) and one or more other amortizable section 197 intangibles acquired in such transaction or series of related transactions are retained—

(i) no loss shall be recognized by reason of such disposition (or such worthlessness), and

(ii) appropriate adjustments to the adjusted bases of such retained intangibles shall be made for any loss not recognized under clause (i).

(B) *Special rule for covenants not to compete*. In the case of any section 197 intangible which is a covenant not to compete (or other arrangement) described in subsection (d)(1)(E), in no event shall such covenant or other arrangement be treated as disposed of (or becoming worthless) before the disposition of the entire interest described in such subsection in connection with which such covenant (or other arrangement) was entered into.

(C) *Special rule*. All persons treated as a single taxpayer under section 41(f)(1) shall be so treated for purposes of this paragraph .

Code § 197(f)(2), "Treatment of certain transfers," provides:

(A) *In general*. In the case of any section 197 intangible transferred in a transaction described in subparagraph (B), the transferee shall be treated as the transferor for purposes of applying this section with respect to so much of the adjusted basis in the hands of the transferee as does not exceed the adjusted basis in the hands of the transferor.

(B) *Transactions covered*. The transactions described in this subparagraph are—

(i) any transaction described in section 332, 351,[1700] 361, 721,[1701] 731,[1702] 1031,[1703] or 1033, and

(ii) any transaction between members of the same affiliated group during any taxable year for which a consolidated return is made by such group.

Code § 197(f)(7), "Treatment as depreciable," provides, "For purposes of this chapter, any amortizable section 197 intangible shall be treated as property which is of a character subject to

---

the allowance for depreciation provided in section 167." This is critically important because it confirms the treatment of an amortizable section 197 intangible as subject to ordinary income recapture under Code § 1245(a)(3)[1704] and therefore as a "hot asset" that may make part of the gain on the sale of a partnership interest lose its capital gain treatment.

II.G.19. IRS Audits/Procedures

Generally, the tax return of the taxpayer from whom the IRS tries to collect tax is the one upon which running the statute of limitations is based.[1705]

The Taxpayer Advocate Service can be accessed locally at https://www.irs.gov/advocate/local-taxpayer-advocate.

See Willms & Davis, "Knowing the Ropes and Binding the IRS: Income & Transfer Tax Issues of Settlements and Modifications that Every Fiduciary Should Know," Texas Tech Estate Planning & Community Property Law Journal Cle & Expo (3/2/2018).

II.G.19.a. Audits of Large C Corporation Returns

Business entities that have formal financial statements are required to account for uncertain tax positions that might materially affect their financial position.

[1704] See fns 1508 in part II.G.6.b Code § 1245 Property and 5470 in part II.Q.8.b.i.(g) Code § 751 – Hot Assets.

[1705] *Lardas v. Commissioner*, 99 T.C. 490 (1992) (reviewed decision, with only one judge dissenting), holding:

> We have held that the relevant return for determining whether, at the time a deficiency notice was issued, the period for assessment had expired under section 6501(a) "is that of petitioner against whom respondent has determined a deficiency". *Fehlhaber v. Commissioner*, 94 T.C. 863, 868 (1990) (Court reviewed), *affd.* 954 F.2d 653 (11th Cir. 1992). We have maintained that position consistently, without regard to the nature of the source entity involved. See *id.*, *Bufferd v. Commissioner*, T.C. Memo. 1991-170, *affd.* 952 F.2d 675 (2d Cir. 1992), *cert. granted* 505 U.S. __, 112 S.Ct. 2990 (1992), and *Kelley v. Commissioner*, T.C. Memo. 1986-405, *revd. and remanded* 877 F.2d 756 (9th Cir. 1989) (subchapter S corporations); *Siben v. Commissioner*, T.C. Memo. 1990-435, *affd.* 930 F.2d 1034 (2d Cir. 1991) (partnerships); *Stahl v. Commissioner*, T.C. Memo. 1990-320 and 96 T.C. 798 (1991), and *Fendell v. Commissioner*, 92 T.C. 708 (1989), *revd.* 906 F.2d 362 (8th Cir. 1990) (complex trust); *Bartol v. Commissioner*, T.C. Memo. 1992-141 (grantor trust).
>
> Recently, we reaffirmed our view that " 'the relevant return for purposes of determining the statute of limitations is the return of the taxpayer against whom the tax is sought.'" *Bartol v. Commissioner*, *supra* (quoting *Bufferd v. Commissioner*, 952 F.2d 675, 678 (2d Cir. 1992), *affg.* T.C. Memo. 1991-170, *cert. granted* 505 U.S. __, 112 S.Ct. 2990 (1992)). After consideration, we continue to hold that view.[5]
>
> [5] We have set forth our reasoning on more than one occasion, see, *e.g.*, *Fehlhaber v. Commissioner*, 94 T.C. 863 (1990) (Court reviewed), *affd.* 954 F.2d 653 (11th Cir. 1992), and we need not repeat it here.

The Supreme Court unanimously affirmed *Bufferd*. See fn. 1708.

See also part III.B.2.f Triggering the Statute of Limitations for Grantor Trusts, which includes a reference to nongrantor trusts.

The IRS will require certain corporations[1706] with both uncertain tax positions and assets equal to or exceeding $10 million to file with their tax returns Schedule UTP, reporting uncertain tax positions, if they or a related party issued audited financial statements on their tax returns.[1707]

II.G.19.b. Audits of S Corporation Returns

The statute of limitations for auditing an S corporation's items runs when the statute of limitations runs for each affected shareholder.[1708] However, this coordination does not apply in determining the due date for filing the S corporation's returns – it must file its own extension and cannot rely on its shareholders filing extensions for their returns.[1709]

[1706] This would apply to corporations filing the following returns to file Schedule UTP: Form 1120, U.S. Corporation Income Tax Return; Form 1120L, U.S. Life Insurance Company Income Tax Return; Form 1120 PC, U.S. Property and Casualty Insurance Company Income Tax Return; and Form 1120F, U.S. Income Tax Return of a Foreign Corporation. Schedule UTP would not be required from any other Form 1120 series filers, pass-through entities, or tax-exempt organizations in 2010 tax years. Thus, S corporations and partnerships would be exempt.

[1707] REG-119046-10, issued 9/7/2010, proposing to add paragraphs (4) and (5) to Reg. § 1.6012-2(a).

[1708] *Bufferd v. Commissioner*, 506 U.S. 523, 71 A.F.T.R.2d 93-573 (1993) (unanimous decision). *Whitesell v. Commissioner*, T.C. Memo. 2017-84, reiterated that position, holding:

> After *Bufferd* was released, Congress enacted the Taxpayer Relief Act of 1997, Pub. L. 105-34, sec. 1284, 111 Stat. at 1038, which in part amended section 6501(a). One of its specifically intended purposes was to clarify this issue with respect to S corporations. See *Robinson v. Commissioner*, 117 T.C. at 317 (and legislative history cited thereat). The legislative history explains that the new provision is intended to clarify that the return that starts the running of the period of limitations on assessment for a taxpayer is the return of the taxpayer and not the return of another "person"[8] from whom the taxpayer has received an item of income, gain, loss, deduction, or credit. See H.R. Rept. No. 105-148, at 609-610 (1997), 1997-4 C.B. (Vol. 1) 323, 931-932; S. Rept. No. 105-33, at 277-278 (1997), 1997-4 C.B. (Vol. 2) 1067, 1357-1358; H.R. Conf. Rept. No. 105-220, at 702-703 (1997), 1997-4 C.B. (Vol. 2) 1457, 2172-2173; see also *Robinson v. Commissioner*, 117 T.C. at 317. Therefore, the controlling return for each period of limitation for assessment in this case is petitioners' respective Form 1040 — not the corresponding Forms 1120S of the related S corporations.
>
> [8] Sec. 7701(a)(1) defines "person" to mean and include "an individual, a trust, estate, partnership, association, company or corporation."

[1709] *ATL & Sons Holdings, Inc. v. Commissioner*, 152 T.C. No. 8 (2019), dismissing the corporation's plea for leniency because the S corporation had losses:

> As we have noted, the section 6699 penalty is imposed on a failure to file an S corporation return "unless it is shown that such failure is due to reasonable cause". Sec. 6699(a) (emphasis added). No regulations have been issued to elaborate on this provision; but regulations under the analogous provision of section 6651(a)(1) (imposing an addition to tax for failure to file a return) provide that a taxpayer can show reasonable cause for the failure to timely file a return if "the taxpayer exercised ordinary business care and prudence and was nevertheless unable to file the return within the prescribed time". 26 C.F.R. sec. 301.6651-1(c)(1), Proced. & Admin. Regs. ATL did not present any argument or other evidence showing that it exercised such care and prudence or that it was unable to timely file the Form 1120S.
>
> Instead, ATL argues that the reasonable cause exception should apply because ATL's two shareholders were aware of the business loss for taxable year 2012 and "no one else has been harmed" - *i.e.*, no harm, no penalty. ATL evidently conceives that the sole purpose of the Form 1120S is to give a shareholder the information that he or she needs in order to file a Form 1040 tax return; and since Mr. and Mrs. Allen knew the affairs of ATL, did eventually file their Form 1040 timely (under an extension), and did not fail to report any income, the intended purpose of the S corporation's filing requirement was accomplished and the penalty was moot.

An S corporation shareholder's return must treat a subchapter S item[1710] in a manner which is consistent with the treatment of such item on the corporate return,[1711] unless the shareholder appropriately notifies the IRS of the inconsistent treatment.[1712] Failure to follow this rule is treated a mathematical or clerical errors assessed under Code § 6213(b)(1)[1713] and may subject the taxpayer to penalties.[1714]

Because adjustments made on the S corporation's return generally[1715] have an impact only on its shareholders, when making adjustments examiners need to consider materiality when adjusting each shareholder's return.[1716]

II.G.19.c. Audits of Partnership Returns

If one holds an interest in a publicly traded partnership with nominal income and K-1s that are always issued way too late, consider reporting a good-faith estimate of income and filing Form 8082.[1717]

Part II.G.19.c.i Overview of Rules Before and After TEFRA Repeal introduces the partnership audit rules, and the rest of this part II.G.19.c discusses the rules effective for returns filed for partnership taxable years beginning after December 31, 2017.

IRS' webpage, "BBA Centralized Partnership Audit Regime," as of 3/8/2022 is at https://www.irs.gov/businesses/partnerships/bba-centralized-partnership-audit-regime. IRS Publication 5388, https://www.irs.gov/pub/irs-pdf/p5388.pdf, is a flowchart illustrating the process. Treasury Inspector General for Tax Administration Report No. 2022-30-020 (3/17/2022), "Centralized Partnership Audit Regime Rules Have Been Implemented; However, Initial No-Change Rates Are High and Measurable Goals Have Not Been Established," opened with:

> ATL cites no authority in support of its claim that the penalty should be waived on the grounds that its two shareholders were aware of the information to be shown on the return. Section 6699 does not include a condition of harm before the penalty is imposed; it simply imposes a penalty when the filing is late (without reasonable cause). A taxpayer may not disregard a filing deadline and be excused from this penalty simply because it reckons that no harm was done.

[1710] "Subchapter S item" means any item of an S corporation to the extent that regulations provide that the item is more appropriately determined at the corporation level than at the shareholder level. Code § 6037(c)(4).

[1711] Code § 6037(c)(1).

[1712] Code § 6037(c)(2). *Rubin v. U.S.*, 118 A.F.T.R.2d 2016-6235 (C.D. CA 10/14/2016), noted, "The IRS created Form 8082 to be used to notify the IRS of inconsistencies under this section. IRM 20.1.5.2.5 (Jan. 24, 2012)." The court did not address whether Form 8082 is the exclusive way to notify the IRS, although it did note other areas in which courts addressed whether Form 8082 is required. See https://www.irs.gov/uac/form-8082-notice-of-inconsistent-treatment-or-administrative-adjustment-request-aar. The Ninth Circuit reversed the decision, 904 F.3d 1081 (2018), holding that the taxpayer's amended return sufficiently identified the relevant inconsistencies. However, one should consider using the appropriate form rather than guess whether a court would accept a substitute.

[1713] Code § 6037(c)(3).

[1714] Code § 6037(c)(5).

[1715] Exception generally are in part II.P.3.b Conversion from C Corporation to S Corporation.

[1716] Internal Revenue Manual paragraph 4.22.7.2.2.

[1717] See https://www.irs.gov/uac/form-8082-notice-of-inconsistent-treatment-or-administrative-adjustment-request-aar.

What TIGTA Found

TIGTA's review of the initial examination efforts under the centralized partnership audit regime rules found that as of the end of Fiscal Year 2021, the IRS has completed a total of 480 examinations. These examinations include returns filed for Tax Years 2016 through 2019. The IRS closed 376 (approximately 78 percent) of these partnership returns as a no-change. This rate is high in comparison to the average no-change rate of 50 percent for all partnership returns for the same tax years, closed as of September 30, 2020. IRS management agreed that the no-change rate is high and believes that it is too early in the process to analyze and form conclusions about the no-change rate. However, they also confirmed that they have not determined acceptable rates or ranges they would use to measure closure types for examinations.

The IRS does not establish goals based on audit procedures such as the centralized partnership audit regime. However, the centralized partnership audit regime provides a centralized method of examining items of a partnership that should limit the burden on the IRS in both the examination and judiciary process. Therefore, the IRS should measure whether partnership examinations performed after the centralized partnership audit regime was in place are taking less overall resources to complete and administer in comparison to pre-centralized partnership audit regime results. By not having these targets, the IRS cannot measure the effectiveness of the new audit rules on taxpayer compliance.

The IRS has developed a manual compliance monitoring process to confirm adjustments to partners' returns when a partnership makes a push-out election. However, the process is not fully systemic. Without a proper systemic monitoring process, the underreporting or nonreporting of adjustments may only be detected through a cumbersome time intensive manual process.

What TIGTA Recommended

TIGTA recommended that the IRS address the centralized partnership audit regime examination no-change rates, establish goals and measures that address the expected outcomes from the implementation of the centralized partnership audit regime, and implement a fully systemic method to monitor and verify push-outs are properly reported on partners' returns.

The IRS agreed with one recommendation and plans to request the development of a systemic method to verify pushouts. The IRS disagreed with two recommendations. TIGTA believes these recommendations will help the IRS address factors contributing to high no-change rates and establish goals and measurements based on the expected outcomes from the implementation of the centralized partnership audit regime.

The partnership audit rules apply to any entity taxed as a partnership or income purposes, which includes state law partnerships and LLCs. To elect out with respect to a taxable year, among other requirements the partnership must do so on its return for that year, must issue no more than 100 K-1s, and must have only eligible partners.

Eligible partners include an individual, a C corporation, any foreign entity that would be treated as a C corporation were it domestic, an S corporation, or an estate of a deceased partner. A trust is ineligible – even if a grantor trust (revocable or irrevocable) deemed owned solely by a person who is an eligible partner. A disregarded entity, such as a single member LLC, is also ineligible – even if treated as owned solely by a person who is an eligible partner. A partnership is not an eligible partner of another partnership.

Further details about the above – including a discussion of how ridiculous the treatment of grantor trusts and disregarded entities – are in part II.G.19.c.v.(a) Who Can Elect Out of Post-TEFRA Rules on Partnership Return; What Is the Effect of Electing Out.

However, even if a partnership is eligible to elect out, I am not a fan of electing out. The centralized partnership audit regime gives audited partnerships several choices how to handle audit adjustments:

- If the tax impact is relatively small, just pay the tax at the top rate and don't burden the partners with the effects. See part II.G.19.c.ii Partnership's Liability for Underpayment under Code § 6225.

- If and to the extent that the partners amend their prior year returns to report adjusted items, they remove those items from the partnership-level adjustments. This allows the partners to use their tax attributes - such as excess deductions, losses, or credits or simply their lower tax brackets – to blunt the severity of the audit's effects. See part II.G.19.c.iii Amended Partner Returns for Reviewed Year in Lieu of Partnership Paying Tax.

- The partnership can push the adjustments out to those who were partners in the audited year to include on their current year returns. See part II.G.19.c.iv Pushing Out Adjustments in Year of Audit in Lieu of Partnership Paying Tax.

A disadvantage to the centralized partnership audit regime is that amended returns must go through the process of an administrative adjustment request and is accountable for making sure that the partners amend their returns. However, if the partnership return is not yet due, the changed return is instead a "superseding return" and is not subject to this rule; therefore, partnerships might consider extending their returns in case they notice any mistakes before the return's due date. See Rev. Proc. 2019-32, which is discussed in part II.G.19.c.i Overview of Rules Before and After TEFRA Repeal.

The "partnership representative" has absolute authority to deal with the IRS, with partners' only recourse being against the partnership representative. I prefer for the partnership to be the partnership representative, so that the partnership agreement can control decisions. The partnership then names a "designated individual," who has absolute authority to deal with the IRS but must ministerially follow the partnership's decisions. For drafting partnership agreements and a sample LLC operating agreement clause, see part II.G.19.c.vi Drafting Partnership Agreements to Take Into Account Post-TEFRA Rules.

II.G.19.c.i. Overview of Rules Before and After TEFRA Repeal

The statute of limitations for auditing a partnership's items runs when the statute of limitations runs for the partnership's return.[1718] P.L. 114-74, § 1101, deleted this rule, effective for returns

---

[1718] Code § 6229; *Summit Vineyard Holdings v. Commissioner*, T.C. Memo. 2015-140.
Under the TEFRA rules that were repealed, an entity that is disregarded for federal tax purposes, but under state law is a general partner of a partnership subject to the TEFRA partnership provisions, may be designated the tax matters partner of the partnership. Rev. Rul. 2004-88, which was cited as recently as

filed for partnership taxable years beginning after December 31, 2017; in that case, subject to certain circumstances extending the statute of limitations,[1719] the statute of limitations runs three years after the latest of:[1720]

(A) the date on which the partnership return for such taxable year was filed,

(B) the return due date for the taxable year, or

(C) the date on which the partnership filed an administrative adjustment request with respect to such year under section 6227.

Of course, the statute of limitations never runs for "a false or fraudulent partnership return with intent to evade tax"[1721] (or if a return is never filed)[1722] and is extended from three to six years for a substantial omission of income.[1723]

For later returns (or earlier if the partnership elects into the regime),[1724] Code § 6221 makes audit adjustments at the partnership level, subject to rules allowing certain partnerships with 100 or fewer partners to opt out.[1725] The rule making audit adjustments at the partnership level has the following effects:

---

footnote 21 of *436, LTD v Commissioner*, T.C. Memo. 2015-28, and expressly upheld by *Seaview Trading, LLC v. Commissioner*, 119 A.F.T.R.2d 2017-2097 (9th Cir. 6/7/2017).

[1719] Code § 6235(a)(2) and (3) provide:

(2) in the case of any modification of an imputed underpayment under section 6225(c), the date that is 270 days (plus the number of days of any extension consented to by the Secretary under paragraph (7) thereof) after the date on which everything required to be submitted to the Secretary pursuant to such section is so submitted, or

(3) in the case of any notice of a proposed partnership adjustment under section 6231(a)(2), the date that is 330 days (plus the number of days of any extension consented to by the Secretary under section 6225(c)(7) after the date of such notice.

[1720] Code § 6235(a)(1). Code § 6235(b) authorizes the IRS and partnership to agree to extend the statute of limitations.

[1721] Code § 6235(c)(1).

[1722] Code § 6235(c)(3).

[1723] Code § 6235(c)(2), referring to Code § 6501(e)(1)(A).

[1724] P.L. 114-74, § 1101(g)(4) provides:

> A partnership may elect (at such time and in such form and manner as the Secretary of the Treasury may prescribe) for the amendments made by this section (other than the election under section 6221(b) of such Code (as added by this Act)) to apply to any return of the partnership filed for partnership taxable years beginning after the date of the enactment of this Act and before January 1, 2018.

Reg. § 301.9100-22 is titled "Time, form, and manner of making the election under section 1101(g)(4) of the Bipartisan Budget Act of 2015 for returns filed for partnership taxable years beginning after November 2, 2015 and before January 1, 2018" and is based on Reg. § 301.9100-22T. For an explanation of the final regulation, see T.D. 9839 (8/9/2018); for an explanation of Reg. § 301.9100-22T, see T.D. 9780 (8/4/2016).

[1725] Partnerships with partners that are partnerships or nongrantor trusts cannot opt out, unless regulations under Code § §6221(b)(2)(C) allow them to be eligible partners (and the "blue book" contemplates some leniency here). Code § 6221(b)(1) allows opting out if:

(A) the partnership elects the application of this subsection for such taxable year,

(B) for such taxable year the partnership is required to furnish 100 or fewer statements under section 6031(b) with respect to its partners,

- Partner-level defenses would not apply. However, adjustments related to partners' tax attributes may apply.

- The partnership itself would pay tax on the adjustment, and the highest rate in effect under Code § 1 or 11 would apply.[1726] See part II.G.19.c.ii Partnership's Liability for Underpayment under Code § 6225. A partnership may request modification of certain adjustments that do not result in an imputed underpayment.[1727]

- The persons who were partners in the year under audit may amend their returns for the year to move the adjustment from being taxed at the partnership level to being implemented on the partners' returns. The Consolidated Appropriations Act, 2018 amended this process to allow an equivalent method to substitute for amended partner returns. See part II.G.19.c.iii Amended Partner Returns for Reviewed Year in Lieu of Partnership Paying Tax.

- If any portion of income would be taxed at a lower rate because the taxpayer is a C corporation[1728] or because the income is a capital gain or qualified dividend allocable to an individual (directly or through an S corporation),[1729] under IRS procedures that rate would apply. See part II.G.19.c.ii Partnership's Liability for Underpayment under Code § 6225, especially fns 1748-1759.

- If the partnership is not satisfied that the above modifications to the partnership's tax liability, the partnership may require the persons who were partners in the year under audit to report those items on their current year returns, with a higher rate of interest applying to the tax that is deemed to have been deferred. See part II.G.19.c.iv Pushing Out Adjustments in Year of Audit in Lieu of Partnership Paying Tax.

If the partnership elects to pay the tax:

- The current partners essentially bear the burden of changes to tax items reported by whoever were the partners during the year being audited. Considering drafting into partnership agreements provisions allocating the burden of any tax imposed on the partnership.

- A partnership may need to include as a balance sheet liability any taxes relating to adjustments for prior years. Lenders might require partnerships to elect out of these rules to avoid having tax liabilities competing with obligations to them. On the other hand, a lender might require a partnership to adopt the push-out election for any items remaining after

---

(C) each of the partners of such partnership is an individual, a C corporation, any foreign entity that would be treated as a C corporation were it domestic, an S corporation, or an estate of a deceased partner,
(D) the election -
   (i) is made with a timely filed return for such taxable year, and
   (ii) includes (in the manner prescribed by the Secretary) a disclosure of the name and taxpayer identification number of each partner of such partnership, and
(E) the partnership notifies each such partner of such election in the manner prescribed by the Secretary.

[1726] Code § 6225(b)(1)(A).
[1727] Reg. § 301.6225-2(e).
[1728] Code § 6225(c)(4)(A)(i).
[1729] Code § 6225(c)(4)(A)(ii).

going through all of the procedures described above, so the partnership would not need be subject to a liability. Query whether any of this makes a difference, in that partnership agreements often require distributions to pay their partners' taxes, which would be the case before and after considering the new rules.

- States need to update their partnership income tax laws to adopt procedures to take into account federal audits.[1730]

Under Code § 6227 and the regulations thereunder, a partnership may not simply amend its return and instead must file an administrative adjustment request (AAR), following procedures for implementing the adjustment similar in some ways to the procedure for implementing audit objectives. However, a partnership that corrects its return before the due date (including extensions) may treat that correction as a "superseding return" instead of amended return and therefore is not required to follow those procedures.[1731] Also, a partnership may amend its return to obtain the benefits of the Coronavirus Aid, Relief, and Economic Security Act (CARES Act), P.L. 116-136, 134 Stat. 281 (March 27, 2020), which provides retroactive tax relief that affects partnerships, including relief for the taxable years ending in 2018, 2019, and, in some cases, 2020.[1732]

[1730] The Multistate Tax Commission ("MTC") is drafting state tax provisions in response to the new federal partnership audit rules. See http://www.mtc.gov/Uniformity/Project-Teams/Partnership-Informational-Project. For more about the MTC, see fn 1150 in part II.G.3 State Income Taxation.

[1731] Rev. Proc. 2019-32, § 2 explains:

> For calendar-year partnerships that timely request a six-month extension, the extended deadline is September 15. A partnership that files its Form 1065 and furnishes Schedules K-1 to its partners prior to the deadline for filing the Form 1065 (including extensions) may file a superseding Form 1065 and furnish corresponding Schedules K-1 to its partners prior to the deadline, including extensions. Joint Committee on Taxation, General Explanation of Tax Legislation Enacted in 2015 (March 2016) (JCT Bluebook), JCS-1-16, at 82 ("Schedules K-1 . . . may not be amended after the due date of the partnership return . . . [but] [t]he due date takes into account the permitted extension period."). A timely filed superseding Form 1065 is considered the original return of the partnership. See, *e.g.*, *Haggar Co. v. Helvering*, 308 U.S. 389, 395-96 (1940); Rev. Rul. 78-256, 1978-1 C.B. 438 (amended corporate return filed before due date including extensions is the corporation's return for that taxable year for purposes of estimated tax penalties).

In certain circumstances, Rev. Proc. 2019-32 provides an automatic extension to those who filed timely (and without applying for an extension) tax returns and K-1s and would like to file a superseding return instead of an AAR.

[1732] Rev. Proc. 2020-23, Section 3 allows partnerships to amend 2018 and 2019 returns, providing in part:

> .02 *Option to file amended return*. BBA partnerships that filed a Form 1065 and furnished all required Schedules K-1 for the taxable years beginning in 2018 or 2019 prior to the issuance of this revenue procedure may file amended partnership returns and furnish corresponding Schedules K-1 before September 30, 2020. The amended returns may take into account tax changes brought about by the CARES Act as well as any other tax attributes to which the partnership is entitled by law.
>
> .03 *Eligible BBA partnerships*. The filing and furnishing option provided in section 3.02 of this revenue procedure is available only to BBA partnerships that filed Forms 1065 and furnished Schedules K-1 for the partnership taxable years beginning in 2018 or 2019 prior to the issuance of this revenue procedure. For purposes of section 6222, the amended return replaces any prior return (including any AAR filed by the partnership) for the taxable year for purposes of determining the partnership's treatment of partnership-related items. See section 4.03 of this revenue procedure for a special rule regarding partnerships who have previously filed AARs for an affected taxable year.

Each partnership must designate a person (not necessarily a partner, which is a change from TEFRA) as the partnership representative who shall have the sole authority to act on behalf of the partnership under these rules.[1733] The person must have a substantial presence in the United States[1734] and may be an entity,[1735] but an individual must be appointed to represent that entity.[1736] The partnership must designate a partnership representative separately for each taxable year, which designation is effective only for the taxable year for which it is made.[1737] A partnership representative or designated individual may resign as partnership representative or designated individual, as applicable, for a partnership taxable year for any reason by notifying the IRS in writing of the resignation in accordance with forms, instructions, and other guidance prescribed by the IRS.[1738] A partnership may revoke a designation of a partnership representative or appointment of a designated individual for a partnership taxable year for any reason by notifying the IRS in writing of the revocation in accordance with forms, instructions, and other guidance prescribed by the IRS.[1739] If the IRS determines that a designation of a partnership representative is not in effect for a partnership taxable year, the IRS will notify the partnership, and the partnership will have 30 days to designate one, or the IRS will do so.[1740] For an explanation of the final regulation regarding the partnership representative, see T.D. 9839 (8/9/2018).

Reg. § 301.6223-2(a), "Binding nature of actions by partnership and final decision in a partnership proceeding," provides:

[1733] Code § 6223(a).

[1734] Reg. § 301.6223-1(b)(2) provides:

Substantial presence in the United States. A person must have substantial presence in the United States to be the partnership representative. A person has substantial presence in the United States for the purposes of this section if--

(i) The person makes themselves available to meet in person with the IRS in the United States at a reasonable time and place as determined by the IRS in accordance with Sec. 301.7605-1; and

(ii) The person has a United States taxpayer identification number, a street address that is in the United States and a telephone number with a United States area code.

[1735] Reg. § 301.6223-1(b)(1) provides:

In general. Any person (as defined in section 7701(a)(1)) that meets the requirements of paragraphs (b)(2) and (3) of this section, as applicable, is eligible to serve as a partnership representative, including a wholly owned entity disregarded as separate from its owner for federal tax purposes. A person designated under this section as partnership representative is deemed to be eligible to serve as the partnership representative unless and until the IRS determines that the person is ineligible. A partnership can designate itself as its own partnership representative provided it meets the requirements of paragraphs (b)(2) and (3) of this section.

[1736] Reg. § 301.6223-1(b)(3)(i) provides:

In general. A person who is not an individual may be a partnership representative only if an individual who meets the requirements of paragraph (b)(2) of this section is appointed by the partnership as the sole individual through whom the partnership representative will act for all purposes under subchapter C of chapter 63. A partnership representative meeting the requirements of this paragraph (b)(3) is an entity partnership representative, and the individual through whom such entity partnership representative acts is the designated individual. Designated individual status automatically terminates on the date that the designation of the entity partnership representative for which the designated individual was appointed is no longer in effect in accordance with paragraph (d), (e), or (f) of this section.

[1737] Reg. § 301.6223-1(c)(1).

[1738] Reg. § 301.6223-1(d)(1).

[1739] Reg. § 301.6223-1(e)(1).

[1740] Reg. § 301.6223-1(f)(1).

> The actions of the partnership and the partnership representative taken under subchapter C of chapter 63 of the Internal Revenue Code (subchapter C of chapter 63) and any final decision in a proceeding brought under subchapter C of chapter 63 with respect to the partnership bind the partnership, all partners of the partnership (including partnership-partners as defined in Sec. 301.6241-1(a)(7) that have a valid election under section 6221(b) in effect for any taxable year that ends with or within the taxable year of the partnership), and any other person whose tax liability is determined in whole or in part by taking into account directly or indirectly adjustments determined under subchapter C of chapter 63 (for example, indirect partners as defined in Sec. 301.6241-1(a)(4)). For instance, a settlement agreement entered into by the partnership representative on behalf of the partnership, a notice of final partnership adjustment (FPA) with respect to the partnership that is not contested by the partnership, or the final decision of a court with respect to the partnership if the FPA is contested, binds all persons described in the preceding sentence.

A termination of the designation of a partnership representative does not affect the validity of any action taken by that partnership representative before the termination.[1741]

Reg. § 301.6223-2(d)(1) provides:

> The partnership representative has the sole authority to act on behalf of the partnership for all purposes under subchapter C of chapter 63. In the case of an entity partnership representative, the designated individual has the sole authority to act on behalf of the partnership representative and the partnership. Except for a partner that is the partnership representative or the designated individual, no partner, or any other person, may participate in an administrative proceeding without the permission of the IRS. The failure of the partnership representative to follow any state law, partnership agreement, or other document or agreement has no effect on the authority of the partnership representative or the designated individual as described in section 6223, Sec. 301.6223-1, and this section. Nothing in this section affects, or otherwise restricts, the ability of a partnership representative to authorize a person to represent the partnership representative, in the partnership representative's capacity as the partnership representative, before the IRS under a valid power of attorney in a proceeding involving the partnership under subchapter C of chapter 63.

The AICPA has a "Partnership Audit and Adjustment Rules" resource center at http://www.aicpa.org/INTERESTAREAS/TAX/RESOURCES/REPRESENTATION/Pages/Partnership-Audit-and-Adjustment-Rules.aspx.

In IRM 1.2.2.5.40 (01-21-2021), Delegation Order 4-52, "Partnership Matters Under the Centralized Partnership Audit Regime" provides rules for the IRS to administer this regime.[1742]

II.G.19.c.ii. Partnership's Liability for Underpayment under Code § 6225

This part II.G.19.c.ii is subject to parts II.G.19.c.iii Amended Partner Returns for Reviewed Year in Lieu of Partnership Paying Tax, II.G.19.c.iv Pushing Out Adjustments and II.G.19.c.v Electing

[1741] Reg. § 301.6223-2(b). Furthermore, If the IRS issues a notice of administrative proceeding (NAP) and later withdraws the NAP, any actions taken by a partnership representative (or successor partnership representative) are binding, even though the NAP has been withdrawn and has no effect. Reg. § 301.6223-2(c).

[1742] https://www.irs.gov/irm/part1/irm_01-002-002#idm140219910256912.

Out of Post-TEFRA Rules on Partnership Return and concludes with part II.G.19.c.vi Drafting Partnership Agreements to Take Into Account Post-TEFRA Rules. Some terminology used throughout:

- "Reviewed year" is the year being audited.[1743]

- "Adjustment year" is the year in which the audit results or other changes are implemented.[1744]

Code § 6225(a)(1) provides that, if the IRS adjusts the amount of any partnership-related items with respect to any reviewed year of a partnership, generally the partnership must (1) pay any imputed underpayment with respect to such adjustment in the adjustment year and (2) if an adjustment does not result in an imputed underpayment, take into account the adjustment in the adjustment year.

Also, if an adjustment does not result in an imputed underpayment, the partnership takes into account the adjustment in the adjustment year as a reduction in non-separately stated income or an increase in non-separately stated loss (whichever is appropriate) under Code § 702(a)(8), or in the case of an item of credit, as a separately stated item.[1745]

Except as provided below, for purposes of the audit rules any imputed underpayment with respect to any partnership adjustment for any reviewed year is determined by netting all partnership adjustments and applying the highest rate of tax in effect for the reviewed year under Code § 1 or 11.[1746] If any adjustment reallocates the distributive share of any item from one partner to another, the adjustment is taken into account in the paragraph by disregarding so

---

[1743] Code § 6225(d)(1) provides that, "for purposes of this subchapter" (the partnership audit rules):

> The term "reviewed year" means the partnership taxable year to which the item being adjusted relates.

[1744] Code § 6225(d)(2) provides that, "for purposes of this subchapter" (the partnership audit rules):

> The term "adjustment year" means the partnership taxable year in which -
> (A in the case of an adjustment pursuant to the decision of a court in a proceeding brought under section 6234, such decision becomes final,
> (B) in the case of an administrative adjustment request under section 6227, such administrative adjustment request is made, or
> (C) in any other case, notice of the final partnership adjustment is mailed under section 6231.

[1745] Code § 6225(a)(2).

[1746] Code § 6225(b)(1), reflecting the Consolidated Appropriations Act, 2018. Code § 6225(b)(3) provides:

> *Adjustments Separately Netted By Category*. For purposes of paragraph (1)(A), partnership adjustments for any reviewed year shall first be separately determined (and netted as appropriate) within each category of items that are required to be taken into account separately under section 702(a) or other provision of this title.

Code § 6225(b)(4) provides:

> *Limitation On Adjustments That May Be Taken Into Account*. If any adjustment would (but for this paragraph) -
> (A) result in a decrease in the amount of the imputed underpayment, and
> (B) could be subject to any additional limitation under the provisions of this title (or not allowed, in whole or in part, against ordinary income) if such adjustment were taken into account by any person,
>
> such adjustment shall not be taken into account under paragraph (1)(A) except to the extent otherwise provided by the Secretary.

much of such adjustment as results in a decrease in the amount of the imputed underpayment.[1747]

However, the IRS is required to establish procedures under which the imputed underpayment amount may be modified consistent with the requirements described in Code § 6225(c):[1748]

- The partnership must submit to the IRS any items to be considered in modifying the amount no later than the close of the 270-day period beginning on the date on which the notice of a proposed partnership adjustment is mailed under Code § 6231 unless such period is extended with the IRS' consent.[1749] Any modification resulting from any submission is made only with the IRS' approval.[1750]

- The IRS must also establish procedures under which the adjustments described in Code § 6225(a)(2) may be modified in such manner as the IRS determines appropriate.[1751]

- Those procedures must provide that, if one or more partners file returns (notwithstanding the statute of limitations for the partners' returns) for the taxable year of the partners that includes the end of the reviewed year, these returns take into account all adjustments under Code § 6225(a) properly allocable to such partners (and for any other taxable year with respect to which any tax attribute is affected by reason of such adjustments), and payment of any tax due is included with such return, then the imputed underpayment amount shall be determined without regard to the portion of the adjustments so taken into account. If an adjustment reallocates the distributive share of any item from one partner to another, the preceding sentence applies only if all partners affected by the adjustment file returns. See part II.G.19.c.iii Amended Partner Returns for Reviewed Year in Lieu of Partnership Paying Tax.

- The Consolidated Appropriations Act, 2018 amended Code § 6225(c)(2) to allow partners to use processes similar to amended returns instead of actually filing returns and also to provide rules for partners that we pass-through entities. This is referred to as a "pull-in procedure."

- These procedures must provide for determining the imputed underpayment without regard to the portion pf the adjustment that the partnership demonstrates is allocable to a partner that would not owe tax by reason of its status as a tax-exempt entity (as defined in Code § 168(h)(2)).[1752]

- These procedures must provide for taking into account a rate of tax lower than the highest rate of tax with respect to any portion of the imputed underpayment that the partnership demonstrates is allocable to a partner which (i) is a C corporation, or (ii) in the case of a capital gain or qualified dividend, is an individual:[1753]

[1747] Code § 6225(b)(2).
[1748] Code § 6225(c)(1).
[1749] Code § 6225(c)(7).
[1750] Code § 6225(c)(8).
[1751] Code § 6225(c)(9).
[1752] Code § 6225(c)(3).
[1753] Code § 6225(c)(4)(A).

- The lower rate determined under the preceding sentence cannot be less than the highest rate in effect with respect to the income and taxpayer (C corporation or individual), as the case may be, treating an S corporation as an individual.[1754]

- Generally, the portion of the adjustment to which the lower rate applies with respect to a partner is determined by reference to the partners' distributive share of items to which the adjustment relates.[1755] However, if the imputed underpayment is attributable to the adjustment of more than one item, and any partner's distributive share of those items is not the same with respect to all of those items, then the portion of the imputed underpayment to which the lower rate applies with respect to a partner is determined referring to the amount that would have been the partner's distributive share of net gain or loss if the partnership had sold all of its assets at their fair market value as of the close of the reviewed year of the partnership.[1756]

- Reg. § 301.6225-2(d)(4) addresses these rules.[1757]

- See Form 8980, Partnership Request for Modification of Imputed Underpayments Under IRC Section 6225(c), Form 8983, Certification of Partner Tax-Exempt Status for Modification under IRC § 6225(c)(3), and Form 15028, Certification of Publicly Traded Partnership to Notify Specified Partners and Qualified Relevant Partners for Approved Modifications Under IRC § 6225(c)(5).

• Special rules apply to the Code § 469 passive losses of publicly traded partnerships.[1758]

• The government may by regulations or guidance provide for additional procedures to modify imputed underpayment amounts on the basis of such other factors as the government determines are necessary or appropriate to carry out the purposes of the modification rules.[1759]

Furthermore, no later than 45 days after the above procedures are followed and the proposed modifications result in a of final partnership adjustment, the partnership may require the reviewed year partners to pick up the adjusted items in the adjustment year rather than the partnership paying the tax. See part II.G.19.c.iv Pushing Out Adjustments in Year of Audit in Lieu of Partnership Paying Tax.

1754 Code § 6225(c)(4)(A) (flush language).
1755 Code § 6225(c)(4)(B)(i).
1756 Code § 6225(c)(4)(B)(ii).
1757 Reg. § 301.6225-2(d)(4) provides:

> *Modification based on a rate of tax lower than the highest applicable tax rate*. A partnership may request modification based on a lower rate of tax for the reviewed year with respect to adjustments that are attributable to a relevant partner that is a C corporation and adjustments with respect to capital gains or qualified dividends that are attributable to a relevant partner who is an individual. In no event may the lower rate determined under the preceding sentence be less than the highest rate in effect for the reviewed year with respect to the type of income and taxpayer. For instance, with respect to adjustments that are attributable to a C corporation, the highest rate in effect for the reviewed year with respect to all C corporations would apply to that adjustment, regardless of the rate that would apply to the C corporation based on the amount of that C corporation's taxable income. For purposes of this paragraph (d)(4), an S corporation is treated as an individual.

1758 Code § 6225(c)(5). See further below in this part II.G.19.c.ii.
1759 Code § 6225(c)(6). See further below in this part II.G.19.c.ii.

The Preamble to final regulations T.D. 9844 (2/27/2019), includes:

SUPPLEMENTARY INFORMATION:

Background

This document contains final regulations under sections 6221 through 6241 of the Internal Revenue Code (Code) to amend the Procedure and Administration Regulations (26 CFR part 301) to implement the centralized partnership audit regime enacted by section 1101 of the Bipartisan Budget Act of 2015, Public Law 114-74 (BBA), as amended by the Protecting Americans from Tax Hikes Act of 2015, Public Law 114-113, div Q (PATH Act), and sections 201 through 207 of the Tax Technical Corrections Act of 2018, contained in Title II of Division U of the Consolidated Appropriations Act of 2018, Public Law 115-141 (TTCA).

Section 1101(a) of the BBA removed former subchapter C of chapter 63 of the Code effective for partnership taxable years beginning after December 31, 2017. Former subchapter C of chapter 63 of the Code contained the unified partnership audit and litigation rules enacted by the Tax Equity and Fiscal Responsibility Act of 1982, Public Law 97-248 (TEFRA) that were commonly referred to as the TEFRA partnership procedures or simply TEFRA. Section 1101(b) of the BBA also removed subchapter D of chapter 63 of the Code and part IV of subchapter K of chapter 1 of the Code, rules applicable to electing large partnerships, effective for partnership taxable years beginning after December 31, 2017. Section 1101(c) of the BBA replaced the TEFRA partnership procedures and the rules applicable to electing large partnerships with a centralized partnership audit regime that determines adjustments and, in general, determines, assesses, and collects tax at the partnership level. Section 1101(g) of the BBA set forth the effective dates for these statutory amendments, which are effective generally for returns filed for partnership taxable years beginning after December 31, 2017.

On December 18, 2015, section 1101 of the BBA was amended by the PATH Act. The amendments under the PATH Act are effective as if included in section 1101 of the BBA, and therefore, subject to the effective dates in section 1101(g) of the BBA.

On June 14, 2017, the Department of the Treasury (Treasury Department) and the IRS published in the Federal Register (82 FR 27334) a notice of proposed rulemaking (REG-136118-15) (June 2017 NPRM) proposing rules under section 6221 regarding the scope and election out of the centralized partnership audit regime, section 6222 regarding consistent treatment by partners, section 6223 regarding the partnership representative, section 6225 regarding partnership adjustments made by the IRS and determination of the amount of the partnership’s liability (referred to as the imputed underpayment), section 6226 regarding the alternative to payment of the imputed underpayment by the partnership, section 6227 regarding administrative adjustment requests (AARs), and section 6241 regarding definitions and special rules. The Treasury Department and the IRS received written public comments in response to the regulations proposed in the June 2017 NPRM, and a public hearing regarding the proposed regulations was held on September 18, 2017.

On November 30, 2017, the Treasury Department and the IRS published in the Federal Register (82 FR 56765) a notice of proposed rulemaking (REG-119337-17) (November

2017 NPRM) proposing rules regarding international provisions under the centralized partnership audit regime, including rules relating to the withholding of tax on foreign persons, the withholding of tax to enforce reporting on certain foreign accounts, and the treatment of creditable foreign tax expenditures of a partnership. No written comments were submitted in response to this NPRM, and no hearing was requested or held.

On December 19, 2017, the Treasury Department and the IRS published in the Federal Register (82 FR 60144) a notice of proposed rulemaking (REG-120232-17 and REG-120233-17) (December 2017 NPRM) proposing administrative and procedural rules under the centralized partnership audit regime, including rules addressing assessment and collection, penalties and interest, periods of limitations on making partnership adjustments, and judicial review of partnership adjustments. The regulations proposed in the December 2017 NPRM also provided rules addressing how pass-through partners take into account adjustments under the alternative to payment of the imputed underpayment described in section 6226 and under rules similar to section 6226 when a partnership files an AAR under section 6227. Written comments were received in response to the December 2017 NPRM. However, no hearing was requested or held.

On January 2, 2018, the Treasury Department and the IRS published in the Federal Register (82 FR 28398) final regulations under section 6221(b) providing rules for electing out of the centralized partnership audit regime.

On February 2, 2018, the Treasury Department and the IRS published in the Federal Register (83 FR 4868) a notice of proposed rulemaking (REG-118067-17) (February 2018 NPRM) proposing rules for adjusting tax attributes under the centralized partnership audit regime. Written comments were received in response to the February 2018 NPRM. However, no hearing was requested or held.

On March 23, 2018, Congress enacted the TTCA, which made a number of technical corrections to the rules under the centralized partnership audit regime. The amendments under the TTCA are effective as if included in section 1101 of the BBA, and therefore, subject to the effective dates in section 1101(g) of the BBA.

On August 9, 2018, the Treasury Department and the IRS published in the Federal Register (83 FR 39331) final regulations under section 6223 providing rules relating to partnership representatives and final regulations under § 301.9100-22 providing rules for electing into the centralized partnership audit regime for taxable years beginning on or after November 2, 2015, and before January 1, 2018. Corresponding temporary regulations under § 301.9100-22T were also withdrawn.

On August 17, 2018, the Treasury Department and the IRS published in the Federal Register (83 FR 41954) a notice of proposed rulemaking, notice of public hearing, and withdrawal and partial withdrawal of notices of proposed rulemaking (REG-136118-15) (August 2018 NPRM) that withdrew the regulations proposed in the June 2017 NPRM, the November 2017 NPRM, the December 2017 NPRM, and the February 2018 NPRM, and proposed regulations reflecting the technical corrections enacted in the TTCA as well as other changes as discussed in the preamble to the August 2018 NPRM. Written public comments were received in response to the August 2018 NPRM, and a public hearing regarding the proposed regulations was held on October 9, 2018.

In the preambles to the June 2017 NPRM and November 2017 NPRM, comments were requested regarding certain international and tax-exempt aspects of the centralized partnership audit regime. No comments were received in response to these requests, other than a comment regarding fiduciary issues under title I of the Employee Retirement Income Security Act of 1974 (ERISA), which is discussed later in section 3.B.i of the Summary of Comments and Explanation of Revisions. The Treasury Department and IRS will still consider comments on whether any issues related to international rules and tax-exempt partners warrant guidance either under the centralized partnership audit regime provisions or under the relevant provisions of the Code directly related to those areas.

After careful consideration of all written public comments received in response to the June 2017 NPRM, the December 2017 NPRM, and the August 2018 NPRM, as well as statements made during the public hearings for the June 2017 NPRM and the August 2018 NPRM, the portions of the August 2018 NPRM described in this preamble are adopted as amended by this Treasury Decision. Comments received in response to the February 2018 NPRM or that otherwise concern basis and tax attribute rules under § 301.6225-4 or § 301.6226-4 will be addressed in future guidance. For purposes of this preamble, the regulations proposed in the June 2017 NPRM, the November 2017 NPRM, and the December 2017 NPRM are collectively referred to as the "former proposed regulations." The regulations proposed in the August 2018 NPRM are referred to as the "proposed regulations."

Under "Summary of Comments and Explanation of Revisions," after describing the number of comments the preamble continued:

1. Scope of the Centralized Partnership Audit Regime

Three comments were received regarding the scope of the centralized partnership audit regime. All of the comments concerned former proposed § 301.6221(a)-1, which was issued before the TTCA was enacted. No comments were received on proposed § 301.6221(a)-1 as revised subsequent to the TTCA in the August 2018 NPRM.

Prior to amendment by the TTCA, section 6221(a) provided that any adjustment to items of income, gain, loss, deduction, or credit of a partnership shall be determined at the partnership level. Former proposed § 301.6221(a)-1(b)(1)(i) had defined the phrase "items of income, gain, loss, deduction, or credit" to mean all items and information required to be shown, or reflected, on a return of the partnership and any information contained in the partnership's books and records for the taxable year. One comment stated the definition under former proposed § 301.6221(a)-1(b)(1)(i) included items on the partnership return or in the partnership's books and records regardless of whether (i) such items or information would affect the income that the partnership reports or (ii) the particular tax characteristics of the separate partners would affect the ultimate tax liability. The comment expressed concern that, by broadly defining the scope of the centralized partnership audit regime, the proposed regulations would expand the number of partnerships and partners that encounter differences between the correct tax they would have paid if they had properly reported, and the amount of the imputed underpayment. No changes to the regulations were made in response to this comment.

The TTCA amended section 6221(a) by replacing the phrase "items of income, gain, deduction, loss or credit of a partnership for a partnership taxable year (and any partner’s distributive share thereof)” with the term “partnership-related item.” The TTCA added a definition of “partnership-related item” to section 6241(2). The August 2018 NPRM adopted the TTCA amendments to section 6221(a) and 6241 by moving the majority of the regulation text under former proposed § 301.6221(a)-1 to the definition of “partnership-related item” under proposed § 301.6241-6. Because of these changes, the comment is generally no longer applicable to this section of the regulations.

In addition, the TTCA amendments address the comment’s first concern that the scope of former proposed § 301.6221(a)-1(b)(1)(i) was overly broad in that it was delineated without regard to whether items or information adjusted at the partnership level affect the income of the partnership. Section 6241(2)(B) broadly defines a partnership-related item as any item or amount with respect to the partnership which is relevant in determining the tax liability of any person under chapter 1 of the Code and any partner’s distributive share thereof. Section 6241(2)(B). Nothing within that definition limits the term partnership-related item to income reported by the partnership. To the contrary, partnership-related items are any items with respect to the partnership that are relevant to determining any person’s chapter 1 tax, which could include partnership expenses, credits generated by partnership activity, assets and liabilities of the partnership, and any other items concerning the partnership that are relevant to someone’s chapter 1 tax, irrespective of the impact such items have on the partnership’s income.

Furthermore, the core feature of the centralized partnership audit regime is to provide a centralized method of examining items of a partnership. Adjusting items on a partnership’s return or in the partnership’s books and records, regardless of their effect on partnership income, in a centralized partnership proceeding at the partnership level is not only consistent with this centralized approach, but it also results in efficiencies because one proceeding can be conducted that will bind all partners and the partnership. See section 6223(b). Nothing in the statute requires only items that affect the partnership’s income, as reported on the partnership’s return, to be adjusted at the partnership level.

Regarding the comment’s second concern that an imputed underpayment is determined without regard to partners’ tax characteristics and that the imputed underpayment amount differs from the amount of tax the partners would have paid had the items been reported correctly, those concerns are addressed in section 3.A. of this Summary of Comments and Explanation of Revisions.

Former proposed § 301.6221(a)-1(b)(1)(i) provided as an example of an “item of income, gain, loss, deduction, or credit” any items related to transactions between a partnership and any person including disguised sales, guaranteed payments, section 704(c) allocations, and transactions to which section 707 applies. Former proposed § 301.6221(a)-1(b)(1)(i)(H). One comment suggested that this provision inappropriately included partner items such as a disguised fee under section 707(a)(2)(A) and the gain or loss a partner may realize from a disguised sale under section 707(a)(2)(B). The comment recommended revising the regulations to refer to “items of a partnership related to . . . transactions to which section 707 applies.” Similarly, another comment expressed concern about situations where a partner was not acting in the partner’s capacity as a partner, but rather as a counterparty to a transaction with the partnership. The comment suggested that the regulations clarify that a final determination of a transaction between a partnership and a partner following an examination of the partnership is not binding on any third person, including a partner not acting in its capacity as a partner and who was not a party to the examination.

These comments are addressed by the final regulations under § 301.6241-1(a)(6) regarding the definition of partnership-related item. Proposed § 301.6241-6(b)(4) and (5) defined the phrase “item or amount with respect to the partnership” to include an item or amount that relates to a transaction with the partnership by a partner acting in its capacity as a partner or by an indirect partner acting in its capacity as an indirect partner as well as an item or amount relating to a transaction that is described in section 707(a)(2), 707(b), or 707(c). Accordingly, under the proposed regulations if an item or amount related to a transaction that is described in section 707(a)(2), 707(b), or 707(c) and was relevant in determining chapter 1 tax, that item was a partnership-related item and must be determined at the partnership level.

As described more fully in section 1.B., the final regulations clarify that items or amounts relating to transactions of the partnership are items or amounts with respect to the partnership only if those items or amounts are shown, or required to be shown, on the partnership return or are required to be maintained in the partnership’s books and records. The final regulations further clarify that items or amounts shown, or required to be shown, on a return of a person other than the partnership (or in that person’s books and records) that result after application of the Code to a partnership-related item and that take into account the facts and circumstances specific to that person are not partnership-related items and, therefore, are not determined at the partnership level under the centralized partnership audit regime.

The changes in the final regulations to the definition of partnership-related item address the concerns raised by the comment. First, § 301.6241-1(a)(6) provides that only items or amounts reflected, or required to be reflected on the partnership’s return or in its books and records are with respect to the partnership. If such items are relevant to determining chapter 1 tax such items are partnership-related items. This rule applies equally to items or amounts relating to any transaction with, liability of, or basis in the partnership. Second, § 301.6241-1(a)(6) further provides that items reflected, or required to be reflected on the return of a person other than the partnership or in that person’s books and records that result after application of the Code to a partnership-related item are not with respect to a partnership and, thus, not partnership-related items. Accordingly, only items of the partnership, as suggested by the comment, are partnership-related items under § 301.6241-1(a)(6).

Proposed § 301.6221(a)-1(a) provided that any consideration necessary to make a determination at the partnership level under the centralized partnership audit regime, including the period of limitations on making partnership adjustments under section 6235 or facts necessary to calculate an imputed underpayment under section 6225 were determined at the partnership level. The final regulations under § 301.6221(a)-1(b) retain this concept, but with revised language. The final regulations provide that any legal or factual determinations underlying any adjustment or determination made under the centralized partnership audit regime are also determined at the partnership level under the centralized partnership audit regime. For instance, such determinations include the period of limitations on making adjustments under the centralized partnership audit regime and any determinations necessary to calculate the imputed underpayment or any modification of the imputed underpayment under section 6225.

After consideration, the Treasury Department and the IRS have concluded that the phrase “legal and factual determinations underlying an adjustment or determination” instead of the phrase “any consideration necessary to make a determination at the partnership level” more clearly and accurately reflects the rule that facts and legal conclusions that underlie adjustments to partnership-related items, tax, and penalties made at the partnership level are also determined at the partnership level. The revised language more clearly describes the rule and provides taxpayers with more definitive guidance regarding the items determined at the partnership level. Additionally, this language is consistent with language used in proposed § 301.6241-6(b)(8), which was removed as described in section 2 of this Summary of Comments and Explanation of Revisions.

Lastly, the final regulations remove the list of cross-references from the end of proposed § 301.6221(a)-1(a). The TTCA amended section 6221(a) to provide that adjustments to partnership-related items are determined at the partnership level “except to the extent otherwise provided in” subchapter C of chapter 63. Because the statutory language is clear that there are exceptions within subchapter C of chapter 63 to the general rule under section 6221(a) and § 301.6221(a)-1, the list of cross-references from proposed § 301.6221(a)-1(a) was no longer necessary.

A. PENALTY DEFENSES

Five comments were received with respect to former proposed § 301.6221(a)-1(c), which provided that any defense to any penalty, addition to tax, or additional amount must be raised by the partnership in a partnership-level proceeding under the centralized partnership audit regime, regardless of whether the defense relates to facts and circumstances relating to a person other than the partnership. Once the adjustments determined in the partnership-level proceeding became final, no defense to any penalty determined could be raised or taken into account. Former proposed § 301.6221(a)-1(c).

Several comments stated that the rule under former proposed § 301.6221(a)-1(c) was inequitable to partners because, among other reasons, partners had no control over whether the partnership representative would raise a partner-specific defense, especially in the case of indirect partners who are less directly connected to the partnership representative. Some comments recommended the regulations clarify how partner-level defenses would be raised in the partnership-level proceeding and how decisions regarding those penalty defenses would be communicated to partners. Other comments suggested that partners should be able to raise their own partner-level defenses. In response to these comments, former proposed § 301.6221(a)-1(c) was removed from the proposed regulations in the December 2017 NPRM. See section 3 of the preamble to the December 2017 NPRM. The December 2017 NRPM also proposed regulations under sections 6225 and 6226 (former proposed §§ 301.6225-2(d)(2)(viii) and 301.6226-3(i)) which allowed partners to raise their own partner-level defenses at the time partners took into account the partnership adjustments determined at the partnership level (either through the modification process or as part of the election under section 6226). For further discussion of the rules regarding partner-level defenses under sections 6225 and 6226, see sections 3.D. and 4.C.ii.I. of this preamble. See also section 8.A. of this preamble regarding section 6233(a).

B. PARTNERSHIP-RELATED ITEM

Proposed § 301.6241-6(a) defined the term “partnership-related item” as any item or amount with respect to the partnership which is relevant to determining the tax liability of any person under chapter 1 and any partner’s distributive share of any such item or amount. Proposed § 301.6241-6(b) provided that an item or amount is with respect to the partnership without regard to whether the item or amount appeared on the partnership return if the item or amount was described in one of eight categories. Two categories described items or amounts that are shown or reflected, or required to be shown or reflected, on a return of the partnership under section 6031 or are in the partnership’s books and records. The other categories described items or amounts relating to certain transactions with the partnership, items or amounts relating to liabilities of the partnership provided the item or amount was reported by a partner, and items or amounts relating to basis in the partnership. Imputed underpayments and any legal or factual determinations necessary to make an adjustment to items or amounts described in the other categories were also defined as items or amounts with respect to the partnership. Proposed § 301.6241-6(b)(1) through (8).

After careful consideration, the Treasury Department and the IRS have revised the definition of “item or amount with respect to the partnership.” First, the final regulations remove the language “without regard to whether or not such item or amount appears on the partnership’s return” from proposed § 301.6241-6(b). That phrase derived from the parenthetical in section 6241(2)(B)(i) that follows “item or amount with respect to the partnership.” The Treasury Department and the IRS have determined that the parenthetical language describes items or amounts that appear on the partnership return, items or amounts that were required to appear on the return but actually did not, and items or amounts that factor into the determination of items or amounts that do appear on the partnership return. The Treasury Department and the IRS have concluded that this parenthetical does not extend the concept of “with respect to the partnership” to items or amounts that are reported by third parties and that are otherwise not defined as partnership-related items in these final regulations. See § 301.6241-1(a)(6)(vi)(A) and (B).

Second, the final regulations replace the list of eight categories of items or amounts that were with respect to the partnership with a single, streamlined paragraph, § 301.6241-1(a)(6)(iii) that includes all the items and amounts from the prior list, except as described in this section of this preamble. Third, the definition of partnership-related item was moved from proposed § 301.6241-6 and placed under the definition of “partnership adjustment” in § 301.6241-1(a)(6) to more closely track the statutory structure of section 6241(2).

The final regulations under § 301.6241-1(a)(6)(iii) maintain the rule from the proposed regulations that items or amounts shown or reflected, or required to be shown or reflected, on the return of the partnership are items or amounts with respect to the partnership. The final regulations also clarify that items or amounts in the partnership’s book or records are items or amounts with respect to the partnership if those items or amounts are “required to be maintained” in the partnership’s books and records. The phrase “required to be maintained” is added to account for items that may be maintained in the partnership’s books and records on a voluntary basis. For example, a partnership may choose to maintain the outside basis of each of its partners in its books and records, even though the Code does not require this information be maintained by the partnership. The rule make clears that the voluntary recording of an item in the partnership's books is not determinative of the meaning of the phrase "item or amount with respect to the partnership." A partnership cannot convert an item or amount that is not with respect to the partnership into an item or amount that is with respect to the partnership merely by including that item or amount in the partnership's books and records. This rule provides consistency among partnerships and more certainty regarding what items in the books and records of a partnership constitute items or amounts with respect to the partnership.

The final regulations do not retain the separate categories of items relating to transactions with, liabilities of, and basis in the partnership. Instead, the final regulations adopt a streamlined approach and provide that those items are only with respect to the partnership if those items are reflected, or required to be reflected, on the partnership's return or required to be maintained in its books and records. The separate treatment under the proposed regulations for these types of items and amounts was duplicative. Items or amounts relating to transactions with, liabilities of, and basis in the partnership are items or amounts shown or reflected, or would be required to be shown or reflected, on the partnership return or required to be maintained in the partnership's books and records. Accordingly, describing separate categories for such items was unnecessary and potentially confusing.

Under § 301.6241-1(a)(6)(iii), an item or amount is with respect to the partnership only if the item or amount is shown or reflected, or required to be shown or reflected, on the partnership return or required to be maintained in the partnership's books and records. Consistent with that interpretation, the final regulations provide an item or amount relating to transactions with, liabilities of, and basis in the partnership is with respect to the partnership only if the item or amount is reported, or required to be reported, on the partnership return or is required to be maintained in the partnership's books and records.

The term partnership-related item includes a partner's distributive share of items or amounts that are with respect to the partnership which are relevant in determining the chapter 1 tax of any person. Section 6241(2)(B)(ii). In taking into account the partner's distributive share of partnership-related items, a partner must apply the provisions of the Code to each partnership-related item to compute the partner's ultimate tax liability. The application of the Code to the partner's share of partnership-related items requires taking into account facts and circumstances that are unique to a particular partner. Generally speaking, those facts and circumstances are known only by the partner, are not known by the partnership, and are based on information only within the partner's control and outside of the partnership's control.

In an examination of items on a partner's return, the IRS generally needs information pertaining to the partner's specific facts and circumstances to determine the correctness of the items. The partner whose items are at issue is normally the best source for that type of information. While a partnership may possess some information about a particular partner's facts and circumstances, obtaining information from the partnership is generally not as efficient as obtaining information from the partner. Obtaining such information from the partner also preserves the privacy interests of the partner. Therefore, from both a taxpayer and tax administration standpoint, an examination of items for which application of the Code depends on a partner's particular facts and circumstances is, in general, best performed at the partner level, rather than the partnership level.

Under the TEFRA procedures, these types of items were considered affected items and adjustments to those items were computational adjustments. The centralized partnership audit regime is intended to have a scope sufficient to address those items that would have been considered partnership items, affected items, and computational adjustments under TEFRA, including the regulations. Joint Comm. on Taxation, JCX-6-18, Technical Explanation of the Revenue Provisions of the House Amendment to the Senate Amendment to H.R. 1625 (Rules Committee Print 115-66), 37 (2018) (JCX-6-18). One way to achieve a sufficiently broad scope is to attempt to define the term "partnership-related item" to include those items that would have been partnership items, affected items, and computational adjustments under TEFRA. For the following reasons, however, this approach was not adopted.

The centralized partnership audit regime is a fundamentally distinct system from TEFRA. While under both sets of rules adjustments are made at the partnership level and those adjustments are binding on partners, the framework for assessing and collecting tax resulting from those adjustments is significantly different. Under TEFRA, tax attributable to partnership items determined at the partnership level and tax attributable to affected items was assessed against the partners of the partnership through computational adjustments made by the IRS with respect to the partner. Computational adjustments were made either by mailing a notice of deficiency to the partner if factual determinations were necessary at the partner level or by directly assessing tax against the partner. The tax was assessed with respect to the year that was audited by the IRS, and assessments were required to be made within one year of the completion of the partnership-level proceeding.

Under the centralized partnership audit regime, adjustments to partnership-related items are similarly determined at the partnership level. In stark contrast to the TEFRA procedures, however, the tax attributable to those adjustments is also assessed and collected at the partnership level in the form of an imputed underpayment determined pursuant to section 6225. An imputed underpayment is assessed as if it were a tax imposed for the adjustment year, generally the year in which the adjustments are finally determined, instead of the year that was subject to examination. Section 6225(d). The partnership, not the partners, is liable for the imputed underpayment. A partnership may elect the alternative to payment of the imputed underpayment under section 6226 and "push out" the adjustments determined at the partnership level, in which case the tax attributable to the adjustments is assessed and collected from the partnership's partners. Unlike the TEFRA procedures, however, under the push out process, assessment and collection is initiated by the partner, rather than by the IRS, by the partner taking into account the partnership adjustments and self-reporting any tax due on the partner's next filed return, alleviating both the administrative and timing issues that arose in TEFRA. See section 2.A of the preamble to the June 2017 NPRM.

When calculating an imputed underpayment based on adjustments determined at the partnership level, taxpayer favorable adjustments are generally disregarded and the highest rate of tax is applied. This formula may produce an amount that is larger than the cumulative amount of tax the partners would have paid had the partners taken the adjustments into account separately, but it also relieves the IRS of the obligation to account for specific partner facts and circumstances when initially determining the imputed underpayment amount. During the modification phase, a partnership may, at its option, request that the imputed underpayment be modified to take into account partner tax attributes and facts and circumstances. See section 3.B. for further discussion.

When taking into account adjustments under section 6226, a partner determines the increase or decrease in tax that would have occurred if the adjustments were taken into account for the partner's tax year correlating to the year that was audited. For intervening years, any year between the audited year and the current year, the partner must determine the effect on tax attributes of the adjustments and the resulting increase or decrease that would have occurred for those years as well. The partner then adjusts her tax for the current year by the aggregate tax that would have resulted had the adjustments been properly taken into account. Under TEFRA, it was the IRS's burden to determine tax at the partner level. The centralized partnership audit regime, under section 6226, shifts that burden from the IRS to the partner. As a result, it is neither necessary nor efficient for the IRS to determine at the partnership level the facts and circumstances specific to a partner in order for that partner to determine the proper amount of tax in the case of a push out.

The rules for calculating an imputed underpayment under section 6225 and the computation rules under section 6226 are sufficiently broad to ensure that the tax attributable to items that would have been partnership items, affected items, and computational adjustments under the TEFRA is collected under the centralized partnership audit regime. When the partnership pays an imputed underpayment, the application of limitations and restrictions is assumed and favorable adjustments are disregarded unless a partnership demonstrates that partner tax attributes should override those assumptions. In this way, the imputed underpayment determination, including any modifications, sufficiently accounts for those types of items that would have been affected items or computational adjustments under TEFRA. Similarly, in the case of an election under section 6226, the re-computation process necessarily involves the application of items that would have been affected items or computational adjustments.

Because both the imputed underpayment rules and the section 6226 rules sufficiently address items that would have been partnership items, affected items, and computational adjustments, it is both unnecessary and over-inclusive to define partnership-related item to encompass all of those items. Accordingly, the final regulations clarify that the term partnership-related item does not include items or amounts that would have been TEFRA affected items or computational adjustments. The final regulations do this by defining "with respect to the partnership" to exclude items or amounts shown, or required to be shown, on a return of a person other than the partnership (or in that person's books and records) that result after application of the Code to a partnership-related item and that take into account the facts and circumstances specific to that person. Because these items and amounts are not with respect to the partnership, they are not partnership-related items the IRS must adjust at the partnership level. Two examples were added to the final regulations under § 301.6241-1(a)(6)(vi) to illustrate this rule.

The definition of "with respect to the partnership," and by extension partnership-related item, under the final regulations preserves the centralized nature of the proceeding with respect to the partnership. During the partnership level proceeding under the centralized partnership audit regime, the IRS adjusts items that are germane to the partnership as an entity—that is, items reported by the partnership on its return or items in its books and records generally used for purposes of completing the return. The partnership has access to this information, and it is therefore, in general, most efficient to obtain this information from the partnership in the partnership level proceeding.

This rule also protects the tax and privacy interest of partners. Under section 6223, partners are bound by actions taken by the partnership in the partnership proceeding and by any final decision in the partnership proceeding. Unlike under TEFRA, individual partners do not have a right to participate in the partnership level administrative or judicial proceeding. If items based on the application of the Code to a particular partner based on that partner's facts and circumstances were items required to be determined at the partnership level, the partner may be unable to dispute adjustments to those items. And even if the partner were able to dispute adjustments to those items, the partner would need to divulge private information in a proceeding in which the partnership was the party, not the partner itself.

In addition, a rule that would require that such items and amounts be determined at the partnership level raises significant administrative concerns for the IRS. In general, the partnership would in most cases lack the facts necessary to determine items or amounts that depend on the facts and circumstances of the partners. By necessity, the IRS would be required to involve the partners in the examination to the extent the partner's items and amounts were at issue. Requiring the IRS to involve potentially the many partners in the entity level examination of the partnership would undermine the efficiencies of the centralized partnership audit regime's concept of the partnership representative and the binding nature of the partnership representative on the outcome of the entity level examination. Further, if the IRS did not examine all of the various items or amounts on the partners' returns during the partnership level proceeding, the IRS would, for each of the partners' items and amount that were also partnership-related items, be precluded from adjusting those items at the partner level outside of the centralized partnership audit regime. This would lead to an unnecessary expansion of partnership-level proceedings to encompass what could more simply and efficiently be resolved at the partner level for one or a small group of partners.

2. Partner's Return Must Be Consistent with Partnership Return

After describing the number of comments the preamble continued:

A. INCONSISTENT TREATMENT ON AN AMENDED RETURN AND DEFINITION OF PARTNER'S RETURN FOR PURPOSES OF § 301.6222-1

One comment recommended that the regulations clarify that a partner may file an amended return in order to take a position inconsistent with the filed partnership return as long as such amended return includes a statement identifying the inconsistent treatment. Under section 6222(a), a partner shall, on the partner's return, treat each partnership-related item in a manner that is consistent with the treatment of such item on the partnership return. Proposed § 301.6222-1(a) provided that the treatment of partnership-related items on a partner's return must be consistent with the treatment of such items on the partnership return in all respects, including the amount, timing, and characterization of such items. The term "partner's return" is not defined in either section 6222(a) or proposed § 301.6222-1(a).

Section 6222(a) and § 301.6222-1(a) are designed to ensure consistent treatment of partnership-related items on partners' returns and the partnership return filed with the IRS, except for cases where the partner notifies the IRS of the inconsistency. The requirement to be consistent with the partnership return extends to each return filed by the partner that reflects, or is required to reflect, partnership-related items. This includes both original and amended returns. Any other application of this requirement would render the requirement of consistency meaningless. For example, a partner could file a return on April 15 taking a consistent position, only to turn around on April 16 and file an amended return taking an inconsistent position.

To clarify that the consistency requirement under section 6222(a) and proposed § 301.6222-1(a) applies to each return of the partner, the final regulations provide that the term “partner’s return” for purposes of § 301.6222-1 includes any return, statement, schedule, or list, and any amendment or supplement thereto, filed by the partner with respect to any tax imposed by the Internal Revenue Code. Accordingly, pursuant to § 301.6222-1(a), a partner on either an original or an amended return must treat partnership-related items consistently with how those items were treated on the partnership return filed with the IRS.

The clarification of the term “partner’s return” also addresses the comment’s suggestion that the regulations permit inconsistent treatment on an amended return provided the IRS is notified of that inconsistent treatment. Under § 301.6222-1(c)(1), the requirement that a partner treat a partnership-related item consistently with the partnership’s treatment of that item, and the effect of inconsistent treatment, do not apply to partnership-related items identified as inconsistent (or that may be inconsistent) in a statement attached to the partner’s return on which the partnership-related item is treated inconsistently. As clarified in these final regulations, the term partner’s return for purposes of § 301.6222-1 includes any amendment to the partner’s original return. Accordingly, so long as a partner notifies the IRS of an inconsistent treatment, in the form and manner prescribed by the IRS, by attaching a statement to the partner’s return—including an amended return—on which the partnership-related item is treated inconsistently, the consistency requirement under § 301.6222-1(a), and the effect of inconsistent treatment under § 301.6222-1(b), do not apply to that partnership-related item.

I. LIMITATIONS ON FILING AMENDED RETURNS REPORTING INCONSISTENT POSITIONS

When a partner on an amended return treats a partnership-related item inconsistently with how the item was treated on the partnership return, the partner is making a request for an administrative adjustment of that partnership-related item. Accordingly, the rule under proposed § 301.6227-1(a) that provided a partner may not request an administrative adjustment of a partnership-related item was revised to account for situations in which on an amended return a partner treats a partnership-related item inconsistently with the partnership return pursuant to § 301.6222-1(c)(1).

Section 6227(c) provides that in no event may a partnership file an AAR after a notice of an administrative proceeding with respect to the taxable year is mailed under section 6231. Consistent with section 6227(c), proposed § 301.6227-1(b) provided that no AAR may be filed after a NAP has been mailed by the IRS, except as provided in § 301.6231-1(f) (regarding withdrawal of a NAP). To give effect to this rule in the context of inconsistent treatment, the final regulations under § 301.6222-1(c)(5) provide that a partner may not notify the IRS that the partner is treating an item inconsistently with the partnership return for a taxable year after a NAP with respect to such partnership taxable year has been mailed by the IRS under section 6231. This rule clarifies that once the IRS initiates an administrative proceeding with respect to a partnership taxable year, any adjustment to a partnership-related item for that year must be determined exclusively within that partnership-level proceeding in accordance with section 6221(a). Neither the partnership, through filing an AAR, nor a partner, by taking an inconsistent position, may adjust a partnership-related item outside of that proceeding. Any actions taken by the partnership and any final decision in the proceeding are binding on the partnership and all its partners. Section 6223(b).

B. INCONSISTENT TREATMENT IN THE CASE OF AN ADMINISTRATIVE ADJUSTMENT REQUEST

Proposed § 301.6222-1(c)(2) provided that the notification procedures under § 301.6222-1(c) do not apply to a partnership-related item the treatment of which is binding on the partner because of actions taken by the partnership, or because of any final decision in a proceeding with respect to the partnership, under the centralized partnership audit regime. Accordingly, under proposed § 301.6222-1(c)(2), the provisions of § 301.6222-1(c) did not apply with respect to the partner's treatment of a partnership-related item reflected on an AAR. This meant that a partner could not treat an item inconsistently with how such item was treated on an AAR. One comment recommended that the regulations under § 301.6222-1(c)(2) be revised to permit a partner to notify the IRS of an inconsistent position taken with respect to an item reported on an AAR. This comment was adopted.

Under section 6223(b), all partners are bound by actions taken by the partnership and by any final decision with respect to the partnership under the centralized partnership audit regime. In the case of an AAR, section 6223(b) binds each partner to the partnership's making of the request itself and the mechanism by which the adjustments requested are taken into account, including any election by the partnership to have the partners take into account the adjustments. Accordingly, if the partnership takes into account the adjustments by paying an imputed underpayment, the partners must follow the rules under section 6225. If there is no imputed underpayment or if the partnership elects to have the partners take into account the adjustments, the partners must follow the procedures under § 301.6227-3.

When taking into account AAR adjustments under § 301.6227-3, partners must adhere to the consistency requirements under section 6222(a). See § 301.6222-1(a)(4) (providing consistency requirement applies to the treatment of a partnership-related item on an AAR). Nothing in sections 6222, 6223(b), or 6227, however, precludes a partner from notifying the IRS the partner is taking an adjustment into account inconsistently with how the adjusted item was treated in an AAR. While section 6227 imposes certain requirements with respect to AARs, none of those requirements contradict section 6222(c)'s exception to the consistency requirement. Accordingly, the final regulations under § 301.6222-1(c)(2) remove the language stating that the provisions of § 301.6222-1(c)(1) do not apply with respect to a partner's treatment of a partnership-related item reflected on an AAR. In addition, the final regulations under § 301.6227-1 remove the rule under proposed § 301.6227-1(f) regarding the binding nature of an AAR. As a result of these changes, a partner may notify the IRS it is treating an AAR-adjusted item inconsistently in accordance with the provisions of § 301.6222-1(c).

The final regulations under § 301.6222-1(c)(2) maintain the language stating that the provisions of § 301.6222-1(c)(1) do not apply to a partner's treatment of an item reflected on a statement under section 6226 filed by the partnership with the IRS. A cross-reference to § 301.6226-1(e) was also added. In addition, the final regulations clarify that the provisions of § 301.6222-1(c)(1) do not apply to any item the treatment of which is binding on the partner because of an action taken by the partnership or because of a final decision in a proceeding under the centralized partnership audit regime with respect to the partnership. Section 6223(b). Items reflected on a statement under section 6226 filed with the IRS are an example of such items.

C. INCONSISTENT TREATMENT WHEN NO PARTNERSHIP RETURN IS FILED

Proposed § 301.6222-1(a)(3) provided that a partner's treatment of a partnership-related item attributable to a partnership that does not file a return is per se inconsistent, unless the partner files a notice of inconsistent treatment in accordance with proposed § 301.6222-1(c). One comment recommended that the regulations include an example to illustrate the outcome of the application of the rule under proposed § 301.6222-1(a)(3). The comment observed that without a return filed by the partnership, there would not be a return with which to make the partner's return consistent. To illustrate the application of § 301.6222-1(a)(3), Example 7 was added under § 301.6222-1(a)(5).

In light of the comment, the final regulations under § 301.6222-1(b)(1) include the clarification that where a partnership has failed to file a return, any treatment of a partnership-related item on a partner's return may be removed, and the IRS may determine any underpayment of tax resulting from such adjustment.

Lastly, the final regulations eliminate the phrase "unless the partner files a notice of inconsistent treatment in accordance with proposed § 301.6222-1(c)" from proposed § 301.6222-1(a)(3). This change clarifies that a partner's treatment of an item attributable to a partnership that has not filed a return is per se inconsistent, even if the partner notifies the IRS of the inconsistent treatment. The notification under § 301.6222-1(c) turns off the consistency requirement, but it does not change, as a factual matter, that the partner reported inconsistently.

D. FORM AND METHOD FOR IDENTIFYING INCONSISTENT TREATMENT OF A PARTNERSHIP-RELATED ITEM

Under proposed § 301.6222-1(c)(1), in addition to the requirement that a statement identifying an inconsistent treatment must be attached to the partner's return on which the item is treated inconsistently, the statement must be provided to the IRS according to the forms, instructions, and other guidance prescribed by the IRS. One comment asked about the form and method for providing the IRS with the statement described in proposed § 301.6222-1(c)(1) and suggested specific format guidance in the regulations would assist the public in reporting an inconsistent treatment. This comment was not adopted.

The final regulations maintain the rule that a partner must provide the statement described in § 301.6222-1(c)(1) in accordance with forms, instructions, and other guidance prescribed by the IRS. Prescribing the form and method for notifying the IRS of inconsistent treatment through forms, instructions, and other sub-regulatory guidance allows the IRS the flexibility to update its procedures for identifying an inconsistency as appropriate and necessary without the IRS having to amend the regulations. This flexibility preserves government resources and also expedites the guidance process for taxpayers to be aware of changes in IRS procedures. Accordingly, the final regulations do not provide a specific form or method for identifying inconsistent treatment.

The same comment asked whether a statement identifying inconsistent treatment can only be filed contemporaneously with the partner's tax return. Proposed § 301.6222-1(c) provided that a statement does not identify an inconsistency unless it is attached to the partner's return on which the partnership-related item is treated inconsistently. Because the plain language of proposed § 301.6222-1(c) made clear that the statement identifying inconsistent treatment must be attached to a return, no change was made in response to this comment.

E. PROCEEDING TO ADJUST AN IDENTIFIED, INCONSISTENTLY REPORTED ITEM

If a partner fails to satisfy the requirements of § 301.6222-1(a), the IRS may adjust the inconsistently reported partnership-related item on the partner's return to make it consistent with the treatment of such item on the partnership return, unless the partner provides notice of the inconsistent treatment in accordance with § 301.6222-1(c). See § 301.6222-1(b). Under proposed § 301.6222-1(c)(4)(i), if a partner notifies the IRS of an inconsistent treatment of a partnership-related item in accordance with proposed § 301.6222-1(c)(1) and the IRS disagrees with that inconsistent treatment, the IRS may adjust the identified, inconsistently reported item in a proceeding with respect to the partner. Nothing in proposed § 301.6222-1(c)(4)(i) precluded the IRS, however, from also conducting a proceeding with respect to the partnership.

One comment recommended that § 301.6222-1(c)(4)(i) provide that if the IRS does conduct a proceeding with respect to the partnership to adjust an identified, inconsistently reported item, the IRS may include within that proceeding the partner who provided notice of inconsistent treatment. The comment was concerned that the regulations provided partners who identified inconsistent treatment an automatic right to contest the IRS's adjustment through deficiency proceedings, which would result in more partner-level proceedings and which would be contrary to the intent of the centralized system. According to the comment, the recommended rule would allow the IRS to avoid conducting separate partnership and partner proceedings by allowing the IRS to include notifying partners in the partnership-level proceeding, rather than engaging such partners through deficiency procedures.

Proposed § 301.6222-1(c)(4)(i) provided that the IRS may adjust an identified, inconsistently reported item in a proceeding with respect to the partner. The IRS is not required to make that adjustment. The IRS may instead choose to make the adjustment in a proceeding with respect to the partnership. To the extent the comment was suggesting the IRS must adjust an identified, inconsistently reported item in a proceeding with respect to the partner, the comment was not correct.

If the IRS conducts a proceeding with respect to the partnership, that proceeding will include only the IRS, the partnership, and the partnership representative who is acting on behalf of the partnership. No partner, except a partner that is the partnership representative, or any other person may participate in the partnership proceeding without permission of the IRS. See § 301.6223-2(d)(1). Accordingly, while a partner is not generally included in a proceeding with respect to the partnership under the centralized partnership audit regime, the IRS has the authority under § 301.6223-2(d)(1) to allow any other person, including a partner who notified the IRS of inconsistent treatment, to participate in a partnership-level proceeding. Because that authority exists under § 301.6223-2, a separate rule within § 301.6222-1 to allow notifying partners to be included in a partnership-level proceeding is unnecessary. Therefore, the revision to proposed § 301.6222-1(c)(4) as recommended by the comment was not adopted.

All partners, including partners that have filed a notice of inconsistent treatment, are bound by the actions of the partnership and any final decision in a proceeding with respect to the partnership under the centralized partnership audit regime. See section 6223(b). To clarify the application of this rule in the case of a partnership-level proceeding to adjust an identified, inconsistently reported item, proposed § 301.6222-1(c)(4) was revised to provide that where the IRS conducts a proceeding with respect to the partnership, and there is no proceeding with respect to the partner regarding an identified, inconsistently reported partnership-related item, the partner is bound to actions by the partnership and any final decision in the partnership proceeding.

Another comment suggested that the regulations clarify what happens when the IRS conducts a proceeding with respect to the partnership under § 301.6222-1(c)(4)(i) and at the conclusion of that proceeding, the IRS accepts the partnership return as filed. The comment suggested the regulations address what procedures apply for collection of an imputed underpayment in that scenario or for collection of tax from the partner that filed inconsistently. This comment was not adopted.

First, because there is no partnership adjustment in the scenario described, there is also no imputed underpayment to collect from the partnership. Additionally, because there is no imputed underpayment, the partnership cannot make a push out election. See section 4.A.iii of this preamble. With respect to collection of tax from the partner, nothing in the regulations prevents the IRS, when it conducts a proceeding with respect to the partnership under § 301.6222-1(c)(4)(i), from also conducting a proceeding with respect to the partner to adjust an identified, inconsistently reported item. Accordingly, no changes were made in response to this comment.

F. CONSISTENT TREATMENT WITH SCHEDULE FURNISHED TO THE PARTNER BY THE PARTNERSHIP

Under proposed § 301.6222-1(d)(1), a partner is treated as having notified the IRS of treating a partnership-related item inconsistently if the partner demonstrates that the treatment of such item on the partner’s return is consistent with the treatment of that item on the statement, schedule, or other form prescribed by the IRS and furnished to the partner by the partnership, and the partner makes a valid election under proposed § 301.6222-1(d)(2). This election must be filed no later than 60 days after the date of such notice. Proposed § 301.6222-1(d)(2). One comment recommended that the regulations provide that this 60-day period may be extended with approval by the IRS. This comment was not adopted.

The IRS may assess and collect any underpayment of tax resulting from an adjustment to conform an inconsistent position in the same manner as if the underpayment were on account of a mathematical or clerical error appearing on the partner’s return, except that the procedures under section 6213(b)(2) for requesting abatement of an assessment do not apply. The 60-day period under § 301.6222-1(d)(2) is designed to allow a partner to demonstrate consistency with the information furnished to the partner by the partnership and corresponds to the 60-day period the partner would have had to request abatement if section 6213(b)(2) were applicable. Notably, section 6213(b)(2) does not provide for any extensions of time. Accordingly, the 60-day period under § 301.6222-1(d)(2) affords the partner an opportunity to contest the IRS's conforming adjustment the partner would not have otherwise had.

Additionally, the 60-day period is a reasonable amount of time for the partner to demonstrate consistency with the information it has received from the partnership. At the time the partner is notified by the IRS of the inconsistent treatment, the partner should be in possession of any statements, schedules, or forms furnished to the partner by the partnership. If the partner were permitted to request abatement, the partner would likewise only have 60 days. Furthermore, if the partnership is made aware by the partner that an item was treated incorrectly on the partnership return or the schedules furnished by the partnership, the partnership has the ability to file an AAR with respect to the partnership-related item.

Another comment suggested guidance is needed as to how the election under proposed § 301.6222-1(d)(2) is made. Proposed § 301.6222-1(d)(2)(i) provided that the election must be filed in writing with the IRS office set forth in the notice that notified the partner of the inconsistency. Proposed § 301.6222-1(d)(2)(ii) provided the election must be clearly identified as an election under section 6222(c)(2)(B); signed by the partner making the election; accompanied by a copy of the incorrect statement and IRS notice that notified the partner of the inconsistency; and include any other information required in forms, instructions, or other guidance prescribed by the IRS.

The comment did not suggest what further guidance should be provided in the regulations. Deferring further guidance to forms, instructions, and other sub-regulatory guidance allows the IRS the flexibility to update its procedures as appropriate and necessary without the IRS having to amend the regulations. As discussed earlier in this section of this preamble, this flexibility preserves government resources and also expedites the guidance process for taxpayers to be aware of changes in IRS procedures. Accordingly, proposed § 301.6222-1(d)(2) was not revised in response to this comment.

G. EFFECT OF INCONSISTENT TREATMENT WHEN PARTNER IS A PARTNERSHIP

Proposed § 301.6222-1(a)(2) provided that the rules of § 301.6222-1 apply to a partnership-partner regardless of whether the partnership-partner has made an election under section 6221(b) to elect out of the provisions of the centralized partnership audit regime. The final regulations clarify that the rules of § 301.6222-1 apply to all partners including partnership-partners that have elected out of the centralized partnership audit regime and revise the language referring to such partners to better conform to similar references in other regulation sections.

Proposed § 301.6222-1(b)(3) provided a rule regarding the effect of inconsistent treatment where the partner is itself a partnership and also provided a cross-reference to the rules under section 6232(d)(1)(B) and § 301.6232-1(d). To better conform the two sets of rules and to reduce any potential confusion between the provisions, the final regulations eliminate the rule under § 301.6222-1(b)(3) in favor of providing only a cross-reference to the rules under section 6232(d)(1)(B) and § 301.6232-1(d).

Reg. § 301.6225-2(d), “Types of modification,” includes:

(3) *Tax-exempt partners*.

(i) *In general*. A partnership may request modification of an imputed underpayment with respect to partnership adjustments that the partnership demonstrates to the satisfaction of the IRS are allocable to a relevant partner that would not owe tax by reason of its status as a tax-exempt entity (as defined in paragraph (d)(3)(ii) of this section) in the reviewed year (tax-exempt partner).

(ii) *Definition of tax-exempt entity*. For purposes of paragraph (d)(3) of this section, the term tax-exempt entity means a person or entity defined in section 168(h)(2)(A), (C), or (D).

(iii) *Modification limited to portion of partnership adjustments for which tax-exempt partner not subject to tax*. Only the portion of the partnership adjustments properly allocated to a tax-exempt partner with respect to which the partner would not be subject to tax for the reviewed year (tax-exempt portion) may form the basis of a modification of the imputed underpayment under paragraph (d)(3) of this section. A modification under paragraph (d)(3) of this section will not be approved by the IRS unless the partnership provides documentation in accordance with paragraph (c)(2) of this section to support the tax-exempt partner’s status and the tax-exempt portion of the partnership adjustment allocable to the tax-exempt partner.

(4) *Modification based on a rate of tax lower than the highest applicable tax rate*. A partnership may request modification based on a lower rate of tax for the reviewed year with respect to adjustments that are attributable to a relevant partner that is a C corporation and adjustments with respect to capital gains or qualified dividends that are attributable to a relevant partner who is an individual. In no event may the lower rate determined under the preceding sentence be less than the highest rate in effect for the reviewed year with respect to the type of income and taxpayer. For instance, with respect to adjustments that are attributable to a C corporation, the highest rate in effect for the reviewed year with respect to all C corporations would apply to that adjustment, regardless of the rate that would apply to the C corporation based on the amount of that C corporation’s taxable income. For purposes of this paragraph (d)(4), an S corporation is treated as an individual.

(5) *Certain passive losses of publicly traded partnerships*.

(i) *In general*. In the case of a publicly traded partnership (as defined in section 469(k)(2)) requesting modification under this section, an imputed underpayment is determined without regard to any adjustment that the partnership demonstrates would be reduced by a specified passive activity loss (as defined in paragraph (d)(5)(ii) of this section) which is allocable to a specified partner (as defined in paragraph (d)(5)(iii) of this section) or qualified relevant partner (as defined in paragraph (d)(5)(iv) of this section).

(ii) *Specified passive activity loss*. A specified passive activity loss carryover amount for any specified partner or qualified relevant partner of a publicly traded partnership is the lesser of the section 469(k) passive activity loss of that partner which is separately determined with respect to such partnership -

(A) At the end of the first affected year (affected year loss); or

(B) At the end of -

(1) The specified partner's taxable year in which or with which the adjustment year (as defined in §301.6241-1(a)(1)) of the partnership ends, reduced to the extent any such partner has utilized any portion of its affected year loss to offset income or gain relating to the ownership or disposition of its interest in such publicly traded partnership during either the adjustment year or any other year; or

(2) If the adjustment year has not yet been determined, the most recent year for which the publicly traded partnership has filed a return under section 6031, reduced to the extent any such partner has utilized any portion of its affected year loss to offset income or gain relating to the ownership or disposition of its interest in such publicly traded partnership during any year.

(iii) *Specified partner*. A specified partner is a person that for each taxable year beginning with the first affected year through the person's taxable year in which or with which the partnership adjustment year ends satisfies the following three requirements-

(A) The person is a partner of the publicly traded partnership requesting modification under this section;

(B) The person is an individual, estate, trust, closely held C corporation, or personal service corporation; and

(C) The person has a specified passive activity loss with respect to the publicly traded partnership.

(iv) *Qualified relevant partner*. A qualified relevant partner is a relevant partner that meets the three requirements to be a specified partner (as described in paragraphs (d)(5)(iii)(A), (B), and (C) of this section) for each year beginning with the first affected year through the year described in paragraph (d)(5)(ii)(B)(2) of this section. Notwithstanding the preceding sentence, an indirect partner of the publicly traded partnership requesting modification under this section may also be a qualified relevant partner under this paragraph (d)(5)(iv) if that indirect partner meets the requirements of paragraph (d)(5)(iii)(B) and (C) of this section for each year beginning with the first affected year through the year described in paragraph (d)(5)(ii)(B)(2) of this section.

(v) *Partner notification requirement to reduce passive losses*. If the IRS approves a modification request under paragraph (d)(5) of this section, the partnership must report, in accordance with forms, instructions, or other guidance prescribed by the IRS, to each specified partner the amount of that specified partner's reduction of its suspended passive activity loss carryovers at the end of the adjustment year to take into account the amount of any passive activity losses applied in connection with such modification request. In the case of a qualified relevant partner, the partnership must report, in accordance with forms, instructions, or other guidance prescribed by the IRS, to each qualified relevant partner the amount of that qualified relevant partner's reduction of its suspended passive activity loss carryovers at the end of the taxable year for which the partnership's next return is due to be filed under section 6031 to be taken into account by the qualified relevant partner on the partner's return for the year that includes the end of the partnership's taxable year for which the partnership's next return is due to be filed under section 6031. In the case of an indirect partner that is a qualified relevant partner, the IRS may prescribe additional guidance through forms, instructions, or other guidance to require reporting under this paragraph (d)(5)(v). The reduction in suspended passive activity loss carryovers as reported to a specified partner or qualified relevant partner under this paragraph (d)(5)(v) is a determination of the partnership under subchapter C of chapter 63 and is binding on the specified partners and qualified relevant partners under section 6223.

(6) *Modification of the number and composition of imputed underpayments*.

(i) *In general*. A partnership may request modification of the number or composition of any imputed underpayment included in the NOPPA by requesting that the IRS include one or more partnership adjustments in a particular grouping or subgrouping (as described in §301.6225-1(c) and (d)) or specific imputed underpayments (as described in §301.6225-1(g)) different from the grouping, subgrouping, or imputed underpayment set forth in the NOPPA. For example, a partnership may request under paragraph (d)(6) of this section that one or more partnership adjustments taken into account to determine a general imputed underpayment set forth in the NOPPA be taken into account to determine a specific imputed underpayment.

(ii) *Request for particular treatment regarding limitations or restrictions*. A modification request under paragraph (d)(6) of this section includes a request that one or more partnership adjustments be treated as if no limitations or restrictions under §301.6225-1(d) apply and as a result such adjustments may be subgrouped with other adjustments.

(7) *Partnerships with partners that are "qualified investment entities" described in section 860*.

(i) *In general*. A partnership may request a modification of an imputed underpayment based on the partnership adjustments allocated to a relevant partner where the modification is based on deficiency dividends distributed as described in section 860(f) by a relevant partner that is a qualified investment entity (QIE) under section 860(b) (which includes both a regulated investment company (RIC) and a real estate investment trust (REIT)). Modification under paragraph (d)(7) of this section is available only to the extent that the deficiency dividends take into account adjustments described in § 301.6225-1 that are also adjustments within the meaning of section 860(d)(1) or (d)(2) (whichever applies).

(ii) *Documentation of deficiency dividend*. The partnership must provide documentation in accordance with paragraph (c) of this section of the ‘‘determination’’ described in section 860(e). Under section 860(e)(2), § 1.860-2(b)(1)(i) of this chapter, and paragraph (d)(8) of this section, a closing agreement entered into by the QIE partner pursuant to section 7121 and paragraph (d)(8) of this section is a determination described in section 860(e), and the date of the determination is the date in which the closing agreement is approved by the IRS. In addition, under section 860(e)(4), a determination also includes a Form 8927, Determination Under Section 860(e)(4) by a Qualified Investment Entity, properly completed and filed by the RIC or REIT pursuant to section 860(e)(4). To establish the date of the determination under section 860(e)(4) and the amount of deficiency dividends actually paid, the partnership must provide a copy of Form 976, Claim for Deficiency Dividends Deductions by a Personal Holding Company, Regulated Investment Company, or Real Estate Investment Trust, properly completed by or on behalf of the QIE pursuant to section 860(g), together with a copy of each of the required attachments for Form 976.

(8) *Closing agreements*. A partnership may request modification based on a closing agreement entered into by the IRS and the partnership or any relevant partner, or both if appropriate, pursuant to section 7121. If modification under this paragraph (d)(8) is approved by the IRS, any partnership adjustment that is taken into account under such closing agreement and for which any required payment under the closing agreement is made will not be taken into account in determining the imputed underpayment under § 301.6225-1. Any required payment under the closing agreement may include amounts of tax, including tax under chapters other than chapter 1, interest, penalties, additions to tax and additional amounts. Generally, the IRS will not approve any additional modification under this section with respect to a relevant partner to which a modification under this paragraph (d)(8) has been approved.

(9) *Tax treaty modifications*. A partnership may request a modification under this paragraph (d)(9) with respect to a relevant partner’s distributive share of an adjustment to a partnership-related item if, in the reviewed year, the relevant partner was a foreign person who qualified under an income tax treaty with the United States for a reduction or exemption from tax with respect to such partnership-related item. A partnership requesting modification under this section may also request a treaty modification under this paragraph (d)(9) regardless of the treaty status of its partners if, in the reviewed year, the partnership itself was an entity eligible for such treaty benefits.

(10) *Other modifications*. A partnership may request a modification not otherwise described in paragraph (d) of this section, and the IRS will determine whether such modification is accurate and appropriate in accordance with paragraph (c)(4) of this section. Additional types of modifications and the documentation necessary to substantiate such modifications may be set forth in forms, instructions, or other guidance prescribed by the IRS.

II.G.19.c.iii. Amended Partner Returns for Reviewed Year in Lieu of Partnership Paying Tax

Code § 6225(c)(2)(A) provides that Treasury or the IRS are required to provide procedures determining the partnership's imputed underpayment amount without regard to the portion of the adjustments taken into account in a manner satisfying all of the following:

(i) one or more partners file returns (notwithstanding section 6511) [statute of limitations for claims for credit or refund of an overpayment of any tax under the Code] for the taxable year of the partners which includes the end of the reviewed year of the partnership,

(ii) such returns take into account all adjustments under subsection (a) properly allocable to such partners (and for any other taxable year with respect to which any tax attribute is affected by reason of such adjustments), and

(iii) payment of any tax due is included with such return.

Code § 6225(c)(2)(B) provides that Treasury or the IRS are required to provide pull-in procedures that are deemed to satisfy subparagraph (A) with respect to a partner if, in lieu of filing the returns described in subparagraph (A):

(i) the amounts described in subparagraph (A)(iii) are paid by the partner,

(ii) the partner agrees to take into account, in the form and manner prescribed by the Secretary, the adjustments to the tax attributes of such partner referred to in subparagraph (A)(ii), and

(iii) such partner provides, in the form and manner specified by the Secretary (including, if the Secretary so specifies, in the same form as on an amended return), such information as the Secretary may require to carry out this subparagraph.

If any adjustment by an amended return or through the pull-in procedure reallocates the distributive share of any item from one partner to another, this rule applies only if returns are filed by all partners affected by that adjustment.[1760]

The Preamble to final regulations T.D. 9844 (2/27/2019), includes:

> **III. AMENDED RETURNS**
>
> Proposed § 301.6225-2(d)(2) provided rules regarding modification with respect to amended returns filed by partners. Proposed § 301.6225-2(d)(2)(i) provided that a partnership may request modification of an imputed underpayment based on an amended return filed by a relevant partner provided all of the partnership adjustments properly allocable to such relevant partner are taken into account. One comment recommended that the regulations clarify whether modification will be allowed if a partner files an amended return taking into account adjustments that make up one imputed underpayment, while not taking into account adjustments that make up a

[1760] Code § 6225(c)(2)(C).

separate imputed underpayment which also affects that partner. This comment was not adopted because its recommendation contradicts the statute.

The requirement in proposed § 301.6225-2(d)(2)(i) that partners take into account all partnership adjustments derives from section 6225(c)(2)(A)(ii). Section 6225(c)(2)(A)(ii) states that when partners file amended returns in modification, that return must "take into account all adjustments" under section 6225(a) that are "properly allocable to such partners (and the effect of such adjustments on any tax attributes)." Section 6225(a) refers to "any adjustment by the Secretary to any partnership-related items with respect to any reviewed year of a partnership . . ." Section 6225(c)(2)(A)(ii)'s reference to "all adjustments" under section 6225(a) does not distinguish between partnership adjustments that result in an imputed underpayment and partnership adjustments that do not result in an imputed underpayment. By not distinguishing between the types of partnership adjustments, the language of section 6225(c)(2)(A)(ii) indicates that all partnership adjustments must be taken into account by partners filing modification amended returns, as opposed to only those adjustments that are associated with the imputed underpayment for which modification is requested. Consistent with section 6225(c)(2)(A)(ii), the final regulations under § 301.6225-2(d)(2)(i) require that even in the case of multiple imputed underpayments, partners filing modification amended returns must take into account all partnership adjustments, not just the adjustments associated the imputed underpayment for which modification is requested.

The comment also asked whether there are any specific requirements or limitations that apply in the case of an amended return modification request made with respect to one imputed underpayment, but not with respect to a separate imputed underpayment. Nothing in the regulations imposes specific requirements or limitations on the partnership or its partners when utilizing amended return modification with respect to only one imputed underpayment. The partnership and its partners must comply with all the requirements under § 301.6225-2(d)(2) with respect to any request for amended return modification, including a request made for only one imputed underpayment in the case of multiple imputed underpayments.

Proposed § 301.6225-2(d)(2)(ii)(A) provided that an amended return modification request will not be approved unless the partner filing the amended return has paid all tax, penalties, additions to tax, additional amounts, and interest due as a result of taking into account the adjustments at the time such return is filed with the IRS. One comment suggested that the full payment requirement under § 301.6225-2(d)(2)(ii)(A) should be satisfied if the partner is in compliance with available IRS administrative processes to make full payment, for example, an installment payment agreement. Another comment recommended that the regulations permit partners to submit requests for installment agreements or offers in compromise within the 270-day modification period. These comments were not adopted.

Section 6225(c)(2)(A)(iii) provides that if one or more partners file amended returns during modification, such returns take into account the adjustments properly allocable to such partners, and "payment of any tax due is included with such returns," the imputed underpayment is determined without regard to the adjustments so taken into account. Payment of any tax due is a statutory requirement under section 6225(c)(2)(A)(iii). Consistent with section 6225(c)(2)(A)(iii), proposed § 301.6225-2(d)(2)(ii)(A) required full payment of any tax, penalties, and interest due at the time the amended return is filed with the IRS. If payment is not included with the amended return, the IRS will not approve modification with respect to the amended return.

This rule is necessary to ensure that the IRS collects the entire amount of tax that results from the partner's share of partnership adjustments before approving the partnership's request that the imputed underpayment be calculated without regard to those adjustments. Allowing a partner to enter into an installment agreement undermines the ability of the IRS to collect tax on those adjustments both from the partnership, because the adjustments would no longer be reflected in the imputed underpayment, and from the partner that may ultimately default on the installment agreement. If a partner ultimately does not pay, the IRS may not be able to collect against that partner and likely would be outside the time period within which it must make partnership adjustments, preventing the IRS from collecting any additional imputed underpayment from the partnership. Similar concerns are presented by allowing a partner to enter into an offer in compromise. Moreover, a rule permitting partners to request installment agreements and offers in compromise as alternatives to full payment would increase the administrative burden on the IRS by requiring the IRS to evaluate whether such requests were appropriate, slowing down the modification process in general, and complicating the amended return process specifically. Accordingly, the final regulations retain the rule that full payment of any tax, penalties, and interest due as a result of taking into account the partner's allocable share of adjustments is required in order for modification to be approved with respect to a partner's amended return. In addition, the final regulations under § 301.6225-2(c)(2)(i) clarify that a failure by any person to make any payments required with respect to a modification request within the time restrictions described in § 301.6225-2(c) will result in a denial of a modification request.

Proposed § 301.6225-2(c)(3) provided that all information required under § 301.6225-2 with respect to a request for modification must be submitted on or before 270 days after the date the NOPPA is mailed, unless that period is extended with the permission of the IRS. Several comments recommended partners only be required to file amended returns or make payments on those returns after the issuance of the FPA to allow the court to review the partnership adjustments before modification is requested. One comment recommended that, to provide an adequate amount of time, partners should be allowed at least 270 days from the time of the receipt of an FPA to file amended returns. The comment further recommended that the 270-day period be tolled at any time during which a court proceeding pursuant to section 6234 is ongoing. Another comment recommended that the final regulations commit the IRS to freely grant extensions of the 270-day period and other relevant periods and allow taxpayers to seek modification of the underpayment by filing an amended return, or use the alternative procedure to filing amended returns, within 60 days after there has been a final determination in the partnership case. These comments were not adopted.

First, allowing modification requests, including amended returns, after the FPA is mailed or after there is a court decision with respect to the partnership adjustments is contrary to the statutory scheme under section 6225(c). The statutory scheme under section 6225, section 6231, and section 6235 envision a process where the IRS first mails a NOPPA to the partnership that includes the proposed partnership adjustments and proposed imputed underpayment, followed by a modification period, which is followed by the FPA. The mailing of the NOPPA starts the 270 day period within which anything required to be filed or submitted in the modification process must be filed or submitted to the IRS. After the close of this 270-day period, which may be extended with the consent of the IRS, if modification is requested, the IRS has an additional 270 days to modify the imputed underpayment as necessary to reflect approved modifications and mail the FPA, which will describe the final partnership adjustments and imputed underpayment. After the FPA is issued, there is no basis for the IRS to consider further modifications. The examination is complete and the partnership may then pay the imputed underpayment or elect the push out. The partnership may also challenge the partnership adjustments in court.

Section 6225(c)(2), which provides the procedures for filing amended returns and the alternative procedure to filing amended returns was enacted at the same time as section 6225(c)(7). The amended return modification and the alternative procedure to filing amended returns are just two of many statutory modifications. Had Congress intended for there to be an exception to the 270-day period under section 6225(c)(7) for amended return modification, as suggested by the comments, Congress could have included such an exception when enacting both statutory provisions.

Second, extending the 270-day period beyond the date of the issuance of the FPA could result in several tax administration issues for the IRS. Section 6225(c)(8) provides that any modification of the imputed underpayment amount "shall be made only upon approval of such modification by the Secretary." A request for amended return modification must therefore be approved by the IRS. If the partnership fails to comply with the requirements under the rules under § 301.6225-2, the IRS may decline to approve the request for modification. In order to adopt the comment's suggestion that amended returns and associated payments not be provided until after the FPA is issued, the IRS would need to wait to approve the modification request with respect to that amended return until after the partnership and its partners submitted what was required to be provided under the modification rules. This would prevent the IRS from including its approval or disapproval of the modification request in the FPA, delaying a determination with respect to the modification until some later date. The FPA—the notice of final partnership adjustment—is designed to be the final notice to the partnership from IRS, not an interim notice subject to further modifications or changes.

A partnership adjustment is defined under section 6241(2) as an adjustment to a partnership-related item, and a partnership-related item is defined as including an imputed underpayment. An adjustment to an imputed underpayment is, therefore, a partnership adjustment as defined in section 6241(2). The approval of a modification affects the amount of an adjustment that is taken into account in the imputed underpayment under the rules described in § 301.6225-2(b). Therefore, the IRS must approve or disapprove of a modification before the expiration of the time period for making adjustments under section 6235 or the IRS will have lost its opportunity to do so. Relatedly, and in addition to the concern about the statute of limitations, if the IRS waits until after the issuance of the FPA to make further adjustments to the imputed underpayment, modification could extend for an indefinite period of time, which would lead to uncertainty and administrative challenges for the partnership, the partners, and the IRS. This is particularly true with respect any adjustments after the mailing of the FPA because the mailing of the FPA imbues the partnership with certain rights, such as the right to petition a court for a readjustment of the partnership adjustments in the FPA and to elect the push out under section 6226 with respect to the imputed underpayment. The comment does not explain how a rule that would allow the IRS to further alter the imputed underpayment after the partnership has elected push out or petitioned a court for a readjustment would work. Such a rule would raise numerous tax administration concerns and potentially cause confusion for the partnership and its partners as to what the IRS finally determined and when.

In addition, the IRS is limited as to when it may make a partnership adjustment. According to section 6235(a)(2), “no adjustment under this subchapter for any partnership taxable year may be made after . . . in the case of any modification of an imputed underpayment under section 6225(c), the date that is 270 days [including extensions] . . . after the date on which everything required to be submitted to the Secretary pursuant to such section is so submitted.” In order to adopt the comment allowing an extension of the 270-day modification submission period beyond the issuance of the FPA, the IRS would be required to issue two FPAs. The first FPA would address the partnership adjustments and the imputed underpayment prior to consideration of modifications. The second FPA would be issued at some later date before the expiration of the period for making adjustments under section 6235. Nothing in section 6235(a)(2) prevents the IRS from mailing a second FPA; however, under section 6231(c), if the partnership petitions the original FPA under section 6234, the Secretary may not mail another notice with respect to the same taxable year in the absence of fraud, malfeasance, or misrepresentation of a material fact. In other words, in the situation contemplated by the comment, in which a partnership petitioned the FPA, in general, the IRS could not issue a second FPA to approve or deny modification issues because the IRS would be prevented from doing so under section 6231(c).

Adopting the comment’s suggestion would prevent the IRS from exercising the discretion to approve modification for which Congress provided it authority in section 6225(c)(8). The IRS needs this discretion to ensure that requests for modification are appropriate for the partnership and that the administrative proceeding process is uniform between partnerships. Partners also have other options, such as subsequent amended returns, to address some concerns regarding making payments during the modification process. Accordingly, the regulations have not adopted this comments suggestion.

Proposed § 301.6225-2(d)(2)(vii)(B) provided that if a relevant partner files an amended return for purposes of modification, such partner may not file a subsequent amended return without the permission of the IRS. One comment recommended that the regulations clarify that the restriction in proposed § 301.6225-2(d)(2)(vii)(B) relates to only those items related to a partnership adjustment. Similarly, another comment recommended that the IRS ease the restriction on the ability of a taxpayer using the amended return modification procedure to file subsequent amended returns when the subsequent amended return does not affect the items included in the partnership’s audit adjustments. The comment stated that requiring a taxpayer to request permission from the IRS before filing an amended return is an administrative burden in terms of time and resources for both the taxpayer and the IRS.

Another comment recommended that the regulations not prohibit a partner who has amended her return as part of the modification process from amending her return again without the permission of the Service. This comment suggested revising the forms for filing amended returns to (1) include a check-box asking whether the taxpayer filed a prior amended return for that same tax year that was the basis for a modification under section 6225(c) and (2) require any taxpayer who answers in the affirmative to attach to the subsequent amended return an explanatory statement and certain related documents, such as the prior amended return. Another comment recommended the regulations clarify that if a partner filed an amended return and paid tax on its share of adjustments, and modification was approved with respect to the amended return, the partner may later claim a refund of the tax paid if the partnership successfully appeals or contests the adjustment.

The final regulations clarify that the restriction under § 301.6225-2(d)(2)(vii)(B) only applies to subsequent amended returns that change the treatment of partnership adjustments previously taken into account on a prior amended return that was filed during modification or are filed with respect to an imputed underpayment that was taken into account on a prior modification amended return. The final regulations also removed the requirement that limited further amended returns filed with respect to an imputed underpayment. The final regulations provide exceptions to this rule if the modification amended return or all modifications become inapplicable to the reviewed year. For instance, a court could determine after the issuance of the FPA that the IRS's determination was erroneous in whole or in part, and there was no longer an imputed underpayment or the imputed underpayment should be reduced. In that case, the amended returns submitted during modification would have been with respect to an imputed underpayment that either no longer existed or was altered. The modifications in that case would either be wholly or partially inapplicable. Alternatively, during the modification process, after a partner files an amended return for purposes of modification, the IRS could deny modification under § 301.6225-2(c)(2)(i). In those cases, the partner may file a subsequent amended return to reverse the treatment of partnership adjustments taken into account as part of the request for modification that is no longer applicable, subject to the period of limitations under section 6511. In response to the comment, the final regulations also remove the requirement that the partners request permission before filing subsequent amended returns. The final regulations also clarify that the restrictions on amended returns also apply to other claims for refund.

One comment recommended clarification about whether and how the partner can file a request for refund if the IRS denies a modification based on a partner's filing of an amended return and payment of tax (or the use of the alternative procedure to filing amended returns) or if the partnership files a petition in court of the FPA which results in an adjustment in the partnership's favor. The same comment requested clarification on how a taxpayer who has filed an amended return or executed a closing agreement under section 6225 would receive the benefit of the reduced tax liability of the revised adjustment amount. Pursuant to section 7121, a closing agreement approved by the IRS is final and conclusive. Accordingly, as a general rule, a partner may not request a refund of amounts agreed to in, and paid with, a closing agreement, though the determination of whether a partner could file further amended returns or claims for refund with respect to a year in which a closing agreement was executed would depend on the facts and circumstances and the agreed upon terms of the closing agreement. As discussed earlier in this Summary of Comments and Explanation of Revisions, the final regulations under § 301.6225-2(d)(2)(vii) now clarify that partners may file additional amended returns with respect to partnership adjustments or imputed underpayments, including in the case of denied modification or court readjustment. To file a subsequent amended return, the partners must do so in accordance with forms, instructions, and other guidance prescribed by the IRS. A partner that modifies using the alternative procedure to filing amended returns as described in section 6225(c)(2)(B) that seeks a refund for an amount paid as part of those procedures must follow the rules of § 301.6225-2(d)(2)(vii)(B) and (C). There is no separate process for partners that modify using the alternative procedure to amended returns.

Former proposed § 301.6225-2(d)(2)(vii) provided that a pass-through partner may elect, solely for the purposes of modification, to take into account its share of the partnership adjustments and make a payment on behalf of its partners. If modification was approved with respect to the pass-through partner, the partnership was not permitted to request modification based on amended returns filed by upper-tier direct and indirect partners of the pass-through partner. Former proposed § 301.6225-2(d)(2)(vii). One comment suggested that the regulations should permit a modification of a pass-through partner's payment amount based on amended returns filed by its upper-tier owners.

This suggestion was adopted in the August 2018 NPRM revisions to § 301.6225-2(d)(2). Proposed § 301.6225-2(d)(2)(vi)(B), as revised in the August 2018 NPRM, provided that in accordance with forms, instructions, and other guidance, a pass-through partner making a payment under § 301.6225-2(d)(2)(vi)(A) may take into account modifications with respect to its direct and indirect partners to the extent that such modifications are requested by the partnership and approved by the IRS. Therefore, to the extent an upper-tier partner of the pass-through partner has filed an amended return, the partnership has requested modification with respect to that amended return, and the modification is provided, the pass-through partner may take into account that amended return in accordance with forms, instructions, or other guidance when making a payment in modification. The final regulations under § 301.6225-2(d)(2)(vi)(B) retain this rule.

Another comment recommended that the regulations provide more guidance regarding the form required for an amended return filed by a pass-through partner and the information that form will need to contain. This comment was not adopted. The form required for any amended return, including an amended return filed by a pass-through partner, and the information required on that form will be set forth in forms, instructions, and other guidance prescribed by the IRS. Setting forth this information in forms, instructions, and other guidance gives the IRS the flexibility to adapt the form and its contents without having to amend the regulations. This flexibility preserves government resources and expedites the time in which taxpayers will know of changes to the statement requirements. At the same time, the IRS recognizes the need of taxpayers to know of the information required in order to comply with the regulations. The IRS plans to develop and release drafts of forms and instructions for public inspection as they are completed.

Another comment recommended that the regulations address the situation in which a partner files an amended return but incorrectly calculates the interest amount due and subsequently receives an additional assessment from the IRS. The comment expressed concern that the incorrect calculation of interest and resulting shortfall in payment may result in an inadvertent denial of the modification request. Another comment recommended a rule that a de minimis shortfall of interest or penalties resulting from a good faith effort by a taxpayer to calculate the correct amount shall not result in a denial of a modification request.

The comment recommending a good faith de minimis rule to address situations in which a partner has a shortfall of interest or penalties was not adopted. First, allowing a good faith de minimis rule for interest or penalties is inconsistent with the centralized partnership audit regime's approach of allowing modification of the imputed underpayment if partners fully account for adjustments by taking them into account, paying any resulting amounts due as if the partnership and partners had reported correctly the first time. Because amended return modification is occurring years after any tax would have been due as a result of the partnership adjustment, partners with an underpayment must pay interest to compensate the government for the time value of money on the underpayments. Similarly, partners that owe a penalty must pay that penalty to fully take into account the adjustments and allow the partnership the benefit of modification for those adjustments. A de minimis rule that affirmatively blessed some dollar amount or percentage shortfall for either interest or penalties would encourage taxpayers to calculate their interest and penalties to fall within the allowed de minimis range to avoid disallowance but pay less than is required. It is inconsistent with the collection of amounts determined due on examination to systematically allow a collection of less than all that is due.

Second, administering a rule that allowed partners to underpay what is owed under § 301.6225-2(d)(2)(ii)(A) as long as they made a good faith effort and had only a de minimis short fall would result in untenable administrative complexities for the IRS. The IRS must review all modification requests within 270 days after the modification request has been submitted. The IRS will need to quickly ensure that all relevant partners have provided all information and payments necessary to approve modification. A rule that includes a good faith element would require the IRS to engage in a partner-specific inquiry with respect to any shortfall that might be within the de minimis range to determine whether partner made a good faith effort to comply. A rule that looks to the intent of the partner in determining the amount of interest and penalties is factually intense and would require an inquiry into the state of mind of the partner or that partner's tax advisor. In a fraction of the time it would take to make such an inquiry, the IRS could instead request and receive full payment from the partner. Therefore, it is not administrable to inject this additional, burdensome good faith de minimis shortfall rule in the final regulations, when the current requirement of full pay is both more administrable and less burdensome on the IRS and partners.

If the partnership representative becomes aware of the shortfall before expiration of the 270-day period, the partnership representative may request an extension of the 270-day period in order to allow for full payment to be made before the modification period ends. In this way, the partnership representative can take steps to ensure that all requirements under § 301.6225-2(d)(2) were satisfied.

Proposed § 301.6225-2(d)(2)(ii)(C) provided that in the case of a reallocation adjustment, all partners affected by such adjustment must file amended returns in order for the IRS to approve modification with respect to those amended returns. One comment suggested that the partners affected by the reallocation adjustment should be required to file amended returns only if there is evidence of a net underpayment of tax by the partners as a whole. The comment suggested as an alternative that the partners be allowed to attach an explanation or information statement to their adjustment year return rather than filing an amended return for the reviewed year. These suggestions were not adopted.

Section 6225(c)(2)(C) provides that in the case of a reallocation adjustment, amended return modification applies only if all the requirements of either amended return modification or the alternative procedure to filing amended returns "are satisfied with respect to all partners affected by such adjustment." The statute does not provide any exception to this rule, including an exception for situations in which there is evidence of a net underpayment of tax. Accordingly, the final regulations retain the rule that all partners affected by a reallocation adjustment must file amended returns or utilize the alternative to filing amended returns in order for modification to be approved. This rule ensures that all relevant partners affected by the reallocation adjustment take into account their appropriate shares of that adjustment and thereby ensures such partners receive the appropriate tax benefits for the taxable year subject to the adjustment.

Furthermore, payment and collection of an underpayment is not the only issue required to be resolved by the filing of modification amended returns. In some cases, the purpose of the amended returns is to take into account the tax attributes that may have effects on other modification years. Certainly, in some cases, the tax effect of adjustments taken into account in one year may be offset by tax effect of adjustments in another year or by another partner, but as described in section 3.A. of this preamble, the unmodified imputed underpayment is designed by statute to take into account only the reviewed year and it does not take into account the specific tax attributes of any partner or the effects of the partnership adjustments in modification years or intervening years. An unmodified imputed underpayment will often result in an amount that is higher than what the partners collectively would have paid had they taken the adjustments into account properly in the reviewed year. The unmodified imputed underpayment protects the IRS's interests in collecting at least the amount of tax that should have been paid by the partners without having to separately examine and track all the partners. In other words, the unmodified imputed underpayment represents a simple way to allow the partnership to pay, and the IRS to collect, as amount related to the partnership adjustments without having to delve into the specific tax attributes of each partner.

Modification, however, provides an opportunity for the partners and the partnership to demonstrate that specific tax attributes of partners should have an effect on the imputed underpayment. With respect to reallocation adjustments, if partners seek to receive the benefit of modification, each partners subject to a reallocation adjustment must follow the statutory requirement to file amended returns for all adjustments in a reallocation adjustment. It may be the case that one partner pays on modification and another partner is entitled to a refund. However, such a result is unknown until the partners demonstrate that fact through modification. More importantly, section 6225(c)(2)(C) expressly requires that all partners have taken into account all partnership adjustments and related tax attributes for the modification years and future years. This statutory mandate makes clear that the purpose of this modification is not to ensure that there is a net tax payment with respect to the partnership adjustments, but instead to ensure that the proper partners have taken the adjustments into account correctly, including in all modification years. The requirement that all partners affected by a reallocation file amended returns is a necessary condition for modification to be approved.

Similarly, the comment's suggestion that partners attach a statement to their adjustment year returns attesting to the fact that they had a net underpayment as a result of the adjustments is not workable. In an administrative proceeding, the adjustment year is the year in which the FPA is mailed under section 6231 or, if the partnership challenges the adjustments in court, the year such decision becomes final. Section 6225(d)(2). If a partner was one of the partners subject to a reallocation adjustment and failed to file an amended return, none of the other amended returns from other partners subject to the reallocation adjustments could be approved as a modification. As a result, the imputed underpayment would be determined in the FPA without reduction with respect to those adjustments. Attaching a statement on the next filed return of the partner that failed to file an amended return would have no effect on the imputed underpayment already finally determined.

Recognizing the costs and burdens this rule may create for partnerships, partners, and the IRS in cases where it is clear one partner will not owe tax on its share of a reallocation adjustment, the Treasury Department and the IRS included a rule within proposed § 301.6225-2(d)(2)(ii)(C) to mitigate the potential impact of the requirement that all partners file amended returns. Proposed § 301.6225-2(d)(2)(ii)(C) provided that modification may be approved in the case of a reallocation adjustment even if a relevant partner affected by the adjustment does not file an amended return or utilize the alternative procedure provided the partner takes into account its share of the adjustment through other modifications approved by the IRS or if a pass-through partner takes into account the relevant adjustments. For instance, in the case of an adjustment that reallocates a loss from one partner to another, the IRS may determine that the requirements of § 301.6225-2(d)(2)(ii)(C) have been satisfied if one affected relevant partner files an amended return taking into account the adjustment and the other affected relevant partner signs a closing agreement with the IRS taking into account the adjustments. Proposed § 301.6225-2(d)(2)(ii)(C).

One comment recommended that the regulations clarify whether a tax-exempt partner eligible for tax-exempt modification under § 301.6225-2(d)(3) and allocated a share of a reallocation adjustment must file an amended return to satisfy the requirements under § 301.6225-2(d)(2) in order for the IRS to approve a modification request with respect to such partner. The comment recommended adding to the regulations either an explicit statement or an example indicating that such a filing is not necessary provided the IRS is satisfied that the relevant partner qualifies as a tax-exempt entity. This comment was partially adopted by adding a sentence to § 301.6225-2(d)(2)(ii)(C) indicating the IRS may determine the amended return requirement in the context of reallocation adjustment is satisfied to the extent an affected relevant partner meets the requirements of § 301.6225-2(d)(3) regarding tax-exempt partners. The satisfaction of the requirements of § 301.6225-2(d)(2) (amended return modification and the alternative procedure) is only satisfied to the extent of the tax-exempt portion as defined in § 301.6225-2(d)(3)(iii). Therefore, if certain partnership adjustments allocable to tax-exempt partners are subject to tax, and the partner wishes to take advantage of amended return modification, the tax-exempt partner may have to file an amended return to pay tax on the portion of adjustments allocable to that partner which are subject to tax. The final regulations do not add an example to this effect because the plain language of § 301.6225-2(d)(2)(ii)(C) addresses the point raised by the comment.

One comment recommended that the regulations provide an additional modification method in the case of reallocation adjustments that would allow a partner to whom a net negative adjustment is allocated to file an amended return (or use the alternative procedure to filing amended returns) to claim a refund of tax arising from such adjustment, on the condition that the partner to whom the net positive adjustment is allocated, or the partnership, has paid the tax attributable to the net positive adjustment. Similarly, another comment recommended that the regulations permit a modification of an imputed underpayment where only the partner experiencing additional income (or less deduction, loss, or credit) as a result of a reallocation adjustment files an amended return. These comments were not adopted.

As discussed earlier in this section of this preamble, section 6225(c)(2)(C) provides that in the case of a reallocation adjustment, amended return modification applies only if all the requirements of either amended return modification or the alternative procedure to filing amended returns "are satisfied with respect to all partners affected by such adjustment.” This rule demonstrates that reallocation adjustments made by the IRS under the centralized partnership audit regime are included in the calculation of the imputed underpayment unless all partners affected by such adjustments take them into account. Section 6225(c)(2)(C) does not contain an exception to the rule that all partners take the adjustments into account. Consistent with section 6225(c)(2)(C)’s requirement that all affected partners take the reallocation adjustments into account, the IRS has exercised its discretionary authority under section 6225(c)(6) to permit modification in the case of a reallocation adjustment where a relevant partner affected by such adjustment has met the requirements of another modification method and that modification has been approved by the IRS. This regulatory exception fits squarely within the statutory framework of ensuring that all partners affected by a partnership adjustment take into account their share of that adjustment and recognize the tax effects of such adjustments. Adopting the approach suggested by the comments, one where either only the loss partner or only the income partner take the adjustments into account, would undercut the statutory framework and directly contradict the plain language of the statute. A rule that does not account for all aspects of a reallocation adjustment would run contrary to the collection mechanism of the centralized partnership audit regime with respect to reallocation adjustments. The statutory framework requires either that the partnership pay an imputed underpayment representing the additional tax effects of the reallocation adjustment in the adjustment year and take the negative adjustment aspects into account in that same year or all affected partners from the reviewed year must fully account for their share of the reallocation adjustment.

One comment recommended that the regulations clarify whether a taxpayer filing an amended return or requesting a closing agreement under section 6225 for purposes of modification is required to take into account and pay any additional taxes due under chapters 2 and 2A of the Code. This comment was adopted. The final regulations clarify that a partner filing an amended return or using the alternative procedure to filing amended returns only is required to pay tax due under chapter 1 of the Code with respect to the amended return and the alternative procedure to filing amended returns. The exception to the limitation of tax to chapter 1 tax is for a pass-through partner filing an amended return under § 301.6225-2(d)(2)(vi) because the pass-through partner, but for § 301.6225-2(d)(2)(vi), might otherwise not owe tax under chapter 1. Nothing in the final regulations limits the IRS’s authority under section 6241(9). The type of tax paid in a closing agreement, however, will depend on the terms of the closing agreement. The final regulations clarify the type of tax paid in these situations in §§ 301.6225-2(d)(2)(ii)(A) and (d)(8).

Another comment asked about the effect on the IRS’s approval of modification in the case that a partnership or partner fails to pay taxes under chapters 2 and 2A in modification. Because the final regulations clarify that a partner is only required to pay chapter 1 tax in amended return modification or in the alternative procedure to filing amended returns, the failure to pay taxes under chapters 2 and 2A is irrelevant to the approval or denial of modification. The questions asked by the comment are therefore moot, and no changes were made in response to the comment.

Section 6225(c)(2)(D) provides that section 6501 and 6511 shall not apply with respect to returns filed in modification. A comment was concerned that amended returns filed after the expiration of the time period in section 6511 would be automatically rejected by IRS Service Centers, causing confusion and uncertainty about whether the amended return has, in fact been filed, and if so, whether it was timely. The comment recommended that the IRS develop a procedure for the filing of amended returns with the IRS personnel handling the partnership's examination so that this person can make sure that the return is filed and properly processed or alternatively that the regulations directed taxpayers to include a banner on the top of the amended return stating, in red ink, "Filed Pursuant to Section 6225(c)," to alert the Service Center that this amended return should not be automatically rejected if it is otherwise untimely under section 6511. Another comment recommended that the final regulations also require that the reviewed-year partner include in the affidavit filed with the amended return modification request the partner's TIN and contact information to enable the IRS to locate easily the amended return and payment in its databases. The IRS intends to develop a process through which the partners would file their amended returns, but the regulations do not specify the details of that process. The IRS will develop forms and instructions directing the partnership and the partners as to how and where to file their amended returns submitted in modification, and the IRS intends to request the relevant partner's TIN as part of that process.

Prior to the enactment of the TTCA, section 6225(c)(2) stated that section 6511 did not apply with respect to amended return modification, but it was silent on whether section 6501 limitations on assessment applied. If a partner's period under section 6501 was closed at the time of modification, the partner might not be able to participate in amended return modification. One comment recommended that the IRS resolve this issue by allowing partners to extend the relevant section 6501 periods. This comment was received in response to the June 2017 NPRM, prior to the enactment of the TTCA. The TTCA explicitly provided that section 6501 does not apply with respect to returns filed in modification, so the need for such extensions no longer exists.

Reg. § 301.6225-2(d)(2), "Amended returns by partners," provides:

(i) *In general*. A partnership may request a modification of an imputed underpayment based on an amended return filed by a relevant partner provided all of the partnership adjustments properly allocable to such relevant partner are taken into account and any amount due is paid in accordance with paragraph (d)(2) of this section. Only adjustments to partnership-related items or adjustments to a relevant partner's tax attributes affected by adjustments to partnership-related items may be taken into account on an amended return under paragraph (d)(2) of this section. A partnership may request a modification for purposes of paragraph (d)(2) of this section by submitting a modification request based on the alternative procedure to filing amended returns as described in paragraph (d)(2)(x) of this section. The partnership may not request an additional modification of any imputed underpayment for a partnership taxable year under this section with respect to any relevant partner that files an amended return (or utilizes the alternative procedure to filing amended returns) under paragraph (d)(2) of this section or with respect to any partnership adjustment allocated to such relevant partner.

(ii) *Requirements for approval of a modification request based on amended return*. Except as otherwise provided under the alternative procedure described in paragraph (d)(2)(x) of this section, an amended return modification request under paragraph (d)(2) of this section will not be approved unless the provisions of this paragraph (d)(2)(ii) are satisfied. The partnership may satisfy the requirements of paragraph (d)(2) of this section by demonstrating in accordance with forms, instructions, and other guidance provided by the IRS that a relevant partner has previously taken into account the partnership adjustments described in paragraph (d)(2)(i) of this section, made any required adjustments to tax attributes resulting from the partnership adjustments for the years described in paragraph (d)(2)(ii)(B) of this section, and made all required payments under paragraph (d)(2)(ii)(A) of this section.

(A) *Full payment required*. An amended return modification request under paragraph (d)(2) of this section will not be approved unless the relevant partner filing the amended return has paid all tax, penalties, additions to tax, additional amounts, and interest due as a result of taking into account all partnership adjustments in the first affected year (as defined in §301.6226-3(b)(2)) and all modification years (as described in paragraph (d)(2)(ii)(B) of this section) at the time such return is filed with the IRS. Except for a pass-through partner calculating its payment amount pursuant to paragraph (d)(2)(vi) of this section, for purposes of this paragraph (d)(2)(ii)(A), the term tax means tax imposed by chapter 1 of the Internal Revenue Code (chapter 1).

(B) *Amended returns for all relevant taxable years must be filed*. Modification under paragraph (d)(2) of this section will not be approved by the IRS unless a relevant partner files an amended return for the first affected year and any modification year. A modification year is any taxable year with respect to which any tax attribute (as defined in §301.6241-1(a)(10)) of the relevant partner is affected by reason of taking into account the relevant partner's distributive share of all partnership adjustments in the first affected year. A modification year may be a taxable year before or after the first affected year, depending on the effect on the relevant partner's tax attributes of taking into account the relevant partner's distributive share of the partnership adjustments in the first affected year.

(C) *Amended returns for partnership adjustments that reallocate distributive shares*. Except as described in this paragraph (d)(2)(ii)(C), in the case of partnership adjustments that reallocate the distributive shares of any partnership-related item from one partner to another, a modification under paragraph (d)(2) of this section will be approved only if all partners affected by such adjustments file amended returns in accordance with paragraph (d)(2) of this section. The IRS may determine that the requirements of this paragraph (d)(2)(ii)(C) are satisfied even if not all relevant partners affected by such adjustments file amended returns provided any relevant partners affected by the reallocation not filing amended returns take into account their distributive share of the adjustments through other modifications approved by the IRS (including the alternative procedure to filing amended returns under paragraph (d)(2)(x) of this section) or if a pass-through partner takes into account the relevant adjustments in accordance with paragraph (d)(2)(vi) of this section. For instance, in the case of adjustments that reallocate a loss from one partner to another, the IRS may determine that the requirements of this paragraph (d)(2)(ii)(C) have been satisfied if one affected relevant partner files an amended return taking into account the adjustments and the other affected relevant partner signs a closing agreement with the IRS taking into account the adjustments. Similarly, in the case of adjustment that reallocate income from one partner to another, the IRS may determine that the requirements of this paragraph (d)(2)(ii)(C) have been satisfied to the extent an affected relevant partner meets the requirements of paragraph (d)(3) of this section (regarding tax-exempt partners) and through such modification fully takes into account all adjustments reallocated to the affected relevant partner.

(iii) *Form and manner for filing amended returns*. A relevant partner must file all amended returns required for modification under paragraph (d)(2) of this section with the IRS in accordance with forms, instructions, and other guidance prescribed by the IRS. Except as otherwise provided under the alternative procedure described in paragraph (d)(2)(x) of this section, the IRS will not approve modification under paragraph (d)(2) of this section unless prior to the expiration of the 270-day period described in paragraph (c)(3) of this section, the partnership representative provides to the IRS, in the form and manner prescribed by the IRS, an affidavit from each relevant partner signed under penalties of perjury by such partner stating that all of the amended returns required to be filed under paragraph (d)(2) of this section has been filed (including the date on which such amended returns were filed) and that the full amount of tax, penalties, additions to tax, additional amounts, and interest was paid (including the date on which such amounts were paid).

(iv) *Period of limitations*. Generally, the period of limitations under sections 6501 and 6511 do not apply to an amended return filed under paragraph (d)(2) of this section provided the amended return otherwise meets the requirements of paragraph (d)(2) of this section.

(v) *Amended returns in the case of adjustments allocated through certain pass-through partners*. A request for modification related to an amended return of a relevant partner that is an indirect partner holding its interest in the partnership (directly or indirectly) through a pass-through partner that could be subject to tax imposed by chapter 1 (chapter 1 tax) on the partnership adjustments that are properly allocated to such pass-through partner will not be approved unless the partnership -

(A) Establishes that the pass-through partner is not subject to chapter 1 tax on the adjustments that are properly allocated to such pass-through partner; or

(B) Requests modification with respect to the adjustments resulting in chapter 1 tax for the pass-through partner, including full payment of such chapter 1 tax for the first affected year and all modification years under paragraph (d)(2) of this section or in accordance with forms, instructions, or other guidance prescribed by the IRS.

(vi) *Amended returns in the case of pass-through partners -*

(A) *Pass-through partners may file amended returns*. A relevant partner that is a pass-through partner, including a partnership-partner (as defined in §301.6241-1(a)(7)) that has a valid election under section 6221(b) in effect for a partnership taxable year, may, in accordance with forms, instructions, and other guidance provided by the IRS and solely for purposes of modification under paragraph (d)(2) of this section, take into account its share of the partnership adjustments and determine and pay an amount calculated in the same manner as the amount computed under §301.6226-3(e)(4)(iii) subject to paragraph (d)(2)(vi)(B) of this section.

(B) *Modifications with respect to upper-tier partners of the pass-through partner*. In accordance with forms, instructions, and other guidance provided by the IRS, for purposes of determining and calculating the amount a pass-through partner must pay under paragraph (d)(2)(vi)(A) of this section, the pass-through partner may take into account modifications with respect to its direct and indirect partners to the extent that such modifications are requested by the partnership requesting modification and approved by the IRS under this section.

(vii) *Limitations on amended returns* -

(A) *In general*. A relevant partner may not file an amended return or claim for refund that takes into account partnership adjustments except as described in paragraph (d)(2) of this section.

(B) *Further amended returns restricted*. Except as described in paragraph (d)(2)(vii)(C) of this section, if a relevant partner files an amended return under paragraph (d)(2) of this section, or satisfies paragraph (d)(2) of this section by following the alternative procedure under paragraph (d)(2)(x) of this section (the alternative procedure), such partner may not file a subsequent amended return or claim for refund to change the treatment of partnership adjustments taken into account through amended return or the alternative procedure.

(C) *Subsequent returns in the case of changes to partnership adjustments or denial of modification*. Notwithstanding paragraph (d)(2)(vii)(B) of this section, a relevant partner that has previously filed an amended return under paragraph (d)(2) of this section, or satisfied the requirements of paragraph (d)(2) of this section through the alternative procedure, to take partnership adjustments into account may, in accordance with forms, instructions, and other guidance prescribed by the IRS, file a subsequent return or claim for refund if a determination is made by a court or by the IRS that results in a change to the partnership adjustments taken into account in modification under paragraph (d)(2) of this section or a denial of modification by the IRS under paragraph (c)(2)(i) of this section with respect to a modification request under paragraph (d)(2) of this section. Such determinations include a court decision that changes the partnership adjustments for which modification was requested or a settlement between the IRS and the partnership pursuant to which the partnership is not liable for all or a portion of the imputed underpayment for which modification was requested. Any amended return or claim for refund filed under this paragraph (d)(2)(vii) is subject to the period of limitations under section 6511.

(viii) *Penalties*. The applicability of any penalties, additions to tax, or additional amounts that relate to an adjustment to a partnership-related item is determined at the partnership level in accordance with section 6221(a). However, the amount of penalties, additions to tax, and additional amounts a relevant partner must pay under paragraph (d)(2)(ii)(A) of this section for the first affected year and for any modification year is based on the underpayment or understatement of tax, if any, reflected on the amended return filed by the relevant partner under paragraph (d)(2) of this section. For instance, if after taking into account the adjustments, the return of the relevant partner for the first affected year or any modification year reflects an underpayment or an understatement that falls below the applicable threshold for the imposition of a penalty under section 6662(d), no penalty would be due from that relevant partner for such year. Unless forms, instructions or other guidance provided by the IRS allow for an alternative procedure for raising a partner-level defense (as described in § 301.6226-3(d)(3)), a relevant partner may raise a partner-level defense by first paying the penalty, addition to tax, or additional amount with the amended return filed under paragraph (d)(2) of this section and then filing a claim for refund in accordance with forms, instructions, and other guidance.

(ix) *Effect on tax attributes binding*. Any adjustments to the tax attributes of any relevant partner which are affected by modification under paragraph (d)(2) of this section are binding on the relevant partner with respect to the first affected year and all modification years (as defined in paragraph (d)(2)(ii)(B) of this section). A failure to adjust any tax attribute in accordance with this paragraph (d)(2)(ix) is a failure to treat a partnership-related item in a manner which is consistent with the treatment of such item on the partnership return within the meaning of section 6222. The provisions of section 6222(c) and §301.6222-1(c) (regarding notification of inconsistent treatment) do not apply with respect to tax attributes under this paragraph (d)(2)(ix).

(x) *Alternative procedure to filing amended returns* -

(A) *In general*. A partnership may satisfy the requirements of paragraph (d)(2) of this section by submitting on behalf of a relevant partner, in accordance with forms, instructions, and other guidance provided by the IRS, all information and payment of any tax, penalties, additions to tax, additional amounts, and interest that would be required to be provided if the relevant partner were filing an amended return under paragraph (d)(2) of this section, except as otherwise provided in relevant forms, instructions, and other guidance provided by the IRS. A relevant partner for which the partnership seeks modification under paragraph (d)(2)(x) of this section must agree to take into account, in accordance with forms, instructions, and other guidance provided by the IRS, adjustments to any tax attributes of such relevant partner. A modification request submitted in accordance with the alternative procedure under paragraph (d)(2)(x) of this section is not a claim for refund with respect to any person.

(B) *Modifications with respect to reallocation adjustments*. A submission made in accordance with paragraph (d)(2)(x) of this section with respect to any relevant partner is treated as if such relevant partner filed an amended return for purposes of paragraph (d)(2)(ii)(C) of this section (regarding the requirement that all relevant partners affected by a reallocation must file an amended return to be eligible to for the modification under paragraph (d)(2) of this section) provided the submission is with respect to the first affected year and all modification years of such relevant partner as required under paragraph (d)(2) of this section.

II.G.19.c.iv. Pushing Out Adjustments in Year of Audit in Lieu of Partnership Paying Tax

A partnership can shift the consequences of an audit adjustment to its partners if it so elects not later than 45 days after the date of the notice of final partnership adjustment and at such time and in such manner as the government may provide, furnishes to each partner of the partnership for the reviewed year and to the IRS a statement of the partner's share of any adjustment to income, gain, loss, deduction, or credit (as determined in the notice of final partnership adjustment).[1761] This is referred to as a "push-out election."

In that case, each affected partner shall take the adjustment into account as described below.[1762]

Each partner's income tax for the taxable year which includes the date the statement was furnished (the "adjustment year") is increased by the aggregate of the adjustment amounts described below for the taxable years referred to in the statement.[1763] Consolidated Appropriations Act, 2018 amended Code § 6226(a)(2) by striking ''any adjustment to income, gain, loss, deduction, or credit'' and inserting ''any adjustment to a partnership-related item," to reflect that changes in partnership items affect items beyond just income tax.

The adjustment amounts are the sum of the following:[1764]

(A) For the taxable year of the partner which includes the end of the reviewed year, the amount by which income tax would increase or decrease if the partner's share of the corrections were taken into account for such taxable year.

(B) For any taxable year after that taxable year and before the adjustment year, the amount by which income tax would increase or decrease by reason of the corrections described in the next sentence. Any tax attribute, which would have been affected if the corrections were taken into account for the taxable year described in (A), will be appropriately adjusted for any taxable year described in (B).[1765]

Furthermore, any tax attribute, which would have been affected if the adjustments were taken into account for the taxable year described in (A), will be appropriately adjusted for any taxable year after the taxable year described in (B).[1766]

The Consolidated Appropriations Act, 2018 added Code § 6226(b)(4), relating to the treatment of partnerships and S corporations in tiered structures.

Notwithstanding the push-out election, any penalties, additions to tax, or additional amount are determined as provided under Code § 6221, and the partners of the partnership for the reviewed year are liable for any such penalty, addition to tax, or additional amount.[1767]

In the case of an imputed underpayment resulting from the push-out election, interest is determined at the partner level, from the due date of the return for the taxable year to which the increase is attributable (determined by taking into account any increases attributable to a change in tax attributes for a taxable year under Code § 6226(b)(2)), and at the underpayment rate under Code § 6621(a)(2), determined by substituting "5 percentage points" for "3 percentage points" in Code § 6621(a)(2)(B).[1768]

[1761] Code § 6226(a).
[1762] Code § 6226(a).
[1763] Code § 6226(b)(1).
[1764] Code § 6226(b)(2).
[1765] Code § 6226(b)(3)(A).
[1766] Code § 6226(b)(3)(B).
[1767] Code § 6621(c)(1).
[1768] Code § 6621(c)(2).

REG-136118-15 (6/14/2017) explains the regulations it proposed regarding the push-out election:

6. Election for the Alternative to Payment of the Imputed Underpayment

Proposed § 301.6226-1(a) provides that a partnership may elect under section 6226 to “push out” adjustments to its reviewed year partners rather than paying the imputed underpayment determined under section 6225. If a partnership makes a valid election in accordance with proposed § 301.6226-1, the partnership is no longer liable for the imputed underpayment. A partnership may make an election under this section with respect to one or more imputed underpayments identified in an FPA. For example, where the FPA includes a general imputed underpayment and one or more specific imputed underpayments, the partnership may make an election under this section with respect to any or all of the imputed underpayments.

Proposed § 301.6226-1(b)(1) provides that if a partnership makes a valid election in accordance with proposed § 301.6226-1, the reviewed year partners of the partnership are liable for tax, penalties, additions to tax, and additional amounts, as well interest on such amounts, after taking into account their share of the partnership adjustments determined in the FPA. Any modifications approved by the IRS under proposed § 301.6225-2 are also reported to the reviewed year partners. In addition, under proposed § 301.6226-1(b)(2), adjustments that do not result in an imputed underpayment described in § 301.6225-1(c)(2)(i) and (ii) are not taken into account by the partnership in the adjustment year and instead are included in the reviewed year partners’ share of the partnership adjustments reported to the reviewed year partners of the partnership.

Under proposed § 301.6226-1(c), an election under section 6226 is not valid unless the partnership complies with all the provisions for making the election under proposed § 301.6226-1 and the provisions under proposed § 301.6226-2 requiring the partnership to furnish statements to the reviewed year partners and file those statements electronically with the IRS. An election under proposed § 301.6226-1 may only be revoked with the consent of the IRS.

Proposed § 301.6226-1(c)(2) provides that if the IRS determines that an election under section 6226 is invalid, the IRS will notify the partnership and the partnership representative (within 30 days of the determination) that the election is invalid and provide the reason why the election is invalid. Proposed § 301.6226-1(c)(2) provides that a final determination that the election is invalid means that the partnership is liable for any imputed underpayment to which the election related, as well as any penalties and interest with respect to the imputed underpayment determined under section 6233. An election under proposed § 301.6226-1 is valid until the IRS determines the election is invalid.

A. Making the Election Under Section 6226

Under proposed § 301.6226-1(c)(3), a partnership may only make an election under section 6226 within 45 days of the date the FPA was mailed by the IRS. The time for filing the election may not be extended. The election must be signed by the partnership representative and filed with the IRS in accordance with forms, instructions, and other guidance. Proposed § 301.6226-1(c)(4)(i). Proposed § 301.6226-1(c)(4)(ii) provides that the election must include the name, address, and correct taxpayer identification number (TIN) of the partnership, the taxable year to which the election relates, the imputed underpayment(s) to which the election applies (if there is more than one imputed underpayment in the FPA), each reviewed year partner's name, address, and correct TIN, and any other information required under forms, instructions, and other guidance. A copy of the FPA to which the election relates must also be attached to the election.

As stated in proposed § 301.6226-1(d), an election under section 6226, which includes filing and furnishing the statements described in proposed § 301.6226-2, is an action taken by the partnership under section 6223 and the regulations thereunder. Accordingly, all reviewed year partners are bound by the election and each reviewed year partner must take the adjustments on the statement into account in accordance with section 6226(b) and report and pay additional chapter 1 tax (if any) pursuant to proposed § 301.6226-3. Therefore, a reviewed year partner may not treat items reflected on a statement described in proposed § 301.6226-2 inconsistently with how those items are treated on the statement that the partnership files with the IRS. See proposed § 301.6222-1(c)(2) (regarding items the treatment of which a partner is bound to under section 6223).

The Treasury Department and the IRS request comments from the public on whether guidance is needed on how to address potential issues arising with respect to tax-exempt entities as a result of an election under section 6226 and, if so, on possible ways to resolve such issues. For instance, if a tax exempt entity's share of the amounts under section 6226 is investment income, issues may arise regarding how a section 6226 election might affect the entity's public support calculation (if the entity is a publicly-supported organization) or the applicable net investment income tax (if the entity is a private foundation).

B. Filing Statements With the IRS and Furnishing Statements to Reviewed Year Partners

Proposed § 301.6226-2(a) provides that a partnership making an election under section 6226 must furnish statements to the reviewed year partners with respect to the partner's share of the adjustments and file those statements with the IRS in the time, form, and manner prescribed by proposed § 301.6226-2(b) and (c). Proposed § 301.6226-2(a) further provides that the statements furnished to the reviewed year partners under section 6226 are in addition to, and must be filed and furnished separate from, any other statements required to be filed with the IRS and furnished to the partners for the taxable year, including any Schedules K-1, Partner's Share of Income, Deductions, Credits, etc. Therefore, the partnership may not include the partnership adjustments that are to be taken into account by the reviewed year partners under section 6226 in any Schedule K-1 required to be furnished to the partner under section 6031(b). Similarly, the partnership must furnish separate statements for each reviewed year at issue and cannot combine multiple reviewed years (if any) into a single statement.

Under proposed § 301.6226-2(b), the statements must be furnished to the reviewed year partners no later than 60 days after the date the partnership adjustments become finally determined. The partnership adjustments become finally determined upon the later of the expiration of the time to file a petition under section 6234 or, if a petition is filed under section 6234, the date when the court's decision becomes final. Accordingly, if an FPA is mailed on June 30, 2020, and no petition is filed by the partnership, the partnership adjustments reflected in the FPA become finally determined on September 28, 2020 (at the conclusion of the 90-day petition period under section 6234). An example under proposed § 301.6226-2(b)(3) illustrates these rules.

Under proposed § 301.6226-2(b)(2), a partnership must furnish the statement to each reviewed year partner in accordance with the forms, instructions, or other guidance prescribed by the IRS. If the statements are mailed, it must mail the statements to each reviewed year partner using the current or last address for that partner that is known to the partnership. If a statement is returned to the partnership as undeliverable, a partnership must exercise reasonable due diligence to identify a correct address for the reviewed year partner to which the statement relates. Examples under proposed § 301.6226-2(b)(3) illustrate this rule. Under proposed § 301.6226-2(c), the partnership must electronically file the statements with the IRS, along with a transmittal that includes a summary of the statements and any other information required in the forms and instructions, by the date the partnership is required to furnish the statements to the reviewed year partners.

Under proposed § 301.6226-2(d), if a partnership discovers an error on a statement filed with the IRS, the partnership must correct the error within 60 days of the due date for furnishing the statements to partners and filing the statements with the IRS, as described in proposed § 301.6226-2(b) and (c). Under proposed § 301.6226-2(d)(2)(ii), if a partnership discovers an error after this 60-day period, the partnership may only correct the statements with the permission of the IRS in accordance with the forms, instructions, or other guidance prescribed by the IRS. If the IRS discovers an error in the statements, the IRS may require the partnership to correct the errors. If a partnership fails to correct an error as required by the IRS, the IRS may treat this as a failure to properly furnish statements to partners and file the statements with the IRS, and thus, allow the IRS to determine that the election under proposed § 301.6226-1 is invalid with the result that the partnership is liable for the imputed underpayment to which the election related. A partnership corrects an error in a statement by electronically filing the corrected statement with the IRS and furnishing the corrected statement to the affected reviewed year partner in accordance with the forms, instructions, and other guidance prescribed by the IRS. The adjustments contained on a corrected statement are taken into account by the reviewed year partner in accordance with proposed § 301.6226-3 for the reporting year (as defined in proposed § 301.6226-3(a)). Proposed § 301.6226-2(d)(4). Because reviewed year partners cannot file inconsistently with any statements furnished by the partnership under proposed § 301.6226-2 (see proposed § 301.6226-1(d)), this provision provides a partner a period during which the partner may notify the partnership of any errors in a statement and have the partnership furnish a corrected statement to the partner and file the corrected statement with the IRS.

i. Contents of the Statements

The statements described in proposed § 301.6226-2 must include the name and correct TIN of the reviewed year partner; the current or last address of the reviewed year partner that is known to the partnership; the reviewed year partner's share of items originally reported to the partner (taking into account any adjustments made under section 6227); the reviewed year partner's share of the partnership adjustments and any penalties, additions to tax, or additional amounts; modifications attributable to the reviewed year partner; the reviewed year partner's share of any amounts attributable to adjustments to the partnership's tax attributes in any intervening year (as defined in proposed § 301.6226-3) resulting from the partnership adjustments allocable to the partner; the reviewed year partner's safe harbor amount and interest safe harbor amount (if applicable), as determined in accordance with proposed § 301.6226-2(g); the date the statement is furnished to the partner; the partnership taxable year to which the adjustments relate; and any other information required by the forms, instructions, or other guidance prescribed by the IRS. Proposed § 301.6226-2(e).

ii. Partner's Share of Adjustments and Other Amounts

Under proposed § 301.6226-2(f), a reviewed year partner's share of the adjustments that must be taken into account by the reviewed year partner must be reported to the reviewed year partner in the same manner as originally reported on the return filed by the partnership for the reviewed year. If the adjusted item was not reflected in the partnership's reviewed year return, the adjustment must be reported in accordance with the rules that apply with respect to partnership allocations, including under the partnership agreement. However, if the adjustments, as finally determined, are allocated to a specific partner or in a specific manner, the partner's share of the adjustment must follow how the adjustment is allocated in that final determination. Proposed § 301.6226-2(f)(1). In all cases, adjustments taken into account on any amended returns or closing agreements that are approved during the modification process under proposed § 301.6225-2(d)(2) and that are disregarded in determining the imputed underpayment are ignored for purposes of determining the reviewed year partners' share of the adjustments. However, these modifications are listed separately on the statements provided to the reviewed year partners. Although modifications are ignored for purposes of reporting the adjustments to the reviewed year partners, any reviewed year partner that took an adjustment into account and paid tax through an amended return or closing agreement as part of modification with respect to that adjustment will not be taxed a second time with respect to that adjustment. This is true for two reasons. First, the partnership will inform the partner of any such adjustment in the statement furnished to that partner, per proposed § 301.6226-2(e). Therefore, the partner will know upon receipt of a statement that certain adjustments were taken into account by the partner and that those adjustments were disregarded in determining the imputed underpayment. Second, when computing the partner's tax that stems from such an adjustment (as described in proposed § 301.6226-3), the partner will account for the adjustment as part of that process, and the computation of the tax will reflect that the partner had already paid tax with respect to that adjustment during the modification phase of the audit. An example in proposed § 301.6226-3(g) illustrates this concept.

Any penalties, additions to tax, or additional amounts are reported to the reviewed year partners in the same proportion as each partner's share of the adjustments to which the penalties relate, unless the penalty, addition to tax, or additional amount is specifically allocated to a specific partner(s) or in a specific manner by a final court decision or in the FPA, if no petition is filed. Proposed § 301.6226-2(f)(2). Accordingly, if a penalty is determined with respect to a specific item or items, that penalty is reported to the reviewed year partners in the same manner as the adjustments to that specific item or items, unless otherwise provided in the FPA or a final court decision, for instance in a situation where there are partner-specific defenses to a penalty determined at the partnership level. If a penalty, addition to tax, or additional amount does not relate to a specific adjustment, each reviewed year partner's share of the penalty, addition to tax, or additional amount is determined in accordance with how such items would have been allocated under rules that apply with respect to partnership allocations, including under the partnership agreement, unless it is allocated to a specific partner in a specific manner in a final determination of the adjustments, in which case it is allocated in accordance with the final determination.

C. Computation of the Tax Resulting From Taking Adjustments Into Account

Under proposed § 301.6226-3, a reviewed year partner that is furnished a statement under proposed § 301.6226-2 is required to pay any additional chapter 1 tax (additional reporting year tax) for the partner's taxable year which includes the date the statement was furnished to the partner in accordance with proposed § 301.6226-2 (the reporting year) that results from taking into account the adjustments reflected in the statement. The additional reporting year tax is either the aggregate of the adjustment amounts, as determined in proposed § 301.6226-3(b), or, if an election is made under proposed § 301.6226-3(c), a safe harbor amount.

In addition to being liable for the additional reporting year tax, the reviewed year partner of a partnership that makes an election under section 6226 must also pay, for the reporting year, the partner's share of any penalties, additions to tax, or additional amounts reflected in the statement, and any interest on such amounts. Interest is determined in accordance with proposed § 301.6226-3(d).

i. Calculating the Aggregate of the Adjustment Amounts

Under proposed § 301.6226-3(b), the aggregate of the adjustment amounts is the aggregate of the correction amounts determined under proposed § 301.6226-3(b). There are two correction amounts for these purposes - one for the partner's taxable year which includes the reviewed year of the partnership (first affected year) and a second correction amount for the partner's taxable years after the first affected year and before the reporting year (intervening years). These correction amounts cannot be less than zero, and any amount below zero after applying the rules in proposed § 301.6226-3(b) does not reduce any correction amount, any tax in the reporting year, or any other amount.

Under proposed § 301.6226-3(b)(2), the correction amount for the first affected year is the amount by which the reviewed year partner's chapter 1 tax would increase for the first affected year by taking into account the adjustments reflected in the statement provided to the reviewed year partner under proposed § 301.6226-2. The correction amount for the first affected year is calculated by first determining the amount of chapter 1 tax that would have been imposed for the first affected year if the items as adjusted in the statement had been correctly reported in the first affected year. From that amount is subtracted the sum of the amount of chapter 1 tax shown by the partner on the return for the first affected year (which includes amounts shown on an amended return for such year, including an amended return filed under section 6225(c)(2) by the reviewed year partner) plus any amounts not shown but previously assessed (or collected without assessment) less any rebates made (as defined in § 1.6664-2(e)). In other words, the correction amount is equal to A minus (B plus C minus D). A is the amount of chapter 1 tax that would have been imposed had the items as adjusted been properly reported on the return for the first affected year. B is the amount shown as chapter 1 tax on the return for the first affected year (including amended returns filed under section 6225(c)(2) by a reviewed year partner). C represents any amounts not so shown previously assessed (or collected without assessment). D is the amount of rebates made. For purposes of applying this definition, an amount previously assessed includes an amount that was previously assessed as a result of the partner taking into account adjustments under section 6226(b) pursuant to an election made by a partnership other than the partnership making the current election.

Under proposed § 301.6226-3(b)(3), the aggregate correction amount for all intervening years is the sum of the correction amounts for each intervening year. Determining the correction amount for each intervening year is a year-by-year determination. The correction amount for each intervening year is the amount by which the reviewed year partner's chapter 1 tax would increase by taking into account any adjustments to any tax attributes. The correction amount for each intervening year is calculated by determining the amount of chapter 1 tax that would have been imposed for the intervening year if any tax attribute for the intervening year had been adjusted after taking into account the partner's share of the adjustments for the first affected year (and if any tax attribute for the intervening year had been adjusted after taking into account any adjustments to tax attributes in any prior intervening year(s)). From that amount is subtracted the sum of the amount of chapter 1 tax shown by the partner on the return for the intervening year (which includes amounts shown on an amended return for such year, including an amended return filed under section 6225(c)(2) by the reviewed year partner) plus any amounts not shown but previously assessed (or collected without assessment) less any rebates made (as defined in § 1.6664-2(e)).

For instance, if a partner had a net operating loss on his original return for the first affected year that was carried forward into the intervening years, the net operating loss (a tax attribute as defined in proposed § 301.6241-1(a)(10)) in the first intervening year after the first affected year is reduced by any portion of the net operating loss utilized to offset the adjustments in the first affected year. This reduction may not only affect the first intervening year after the first affected year, but if not fully absorbed in that intervening year, it may have a cascading effect through the intervening years as the intervening years are adjusted to reflect the adjustment to the net operating loss carryforward.

A number of comments received in response to Notice 2016-23 suggested that the Treasury Department and the IRS should permit calculation of the additional reporting year tax to account for any decreases in chapter 1 tax that may have resulted in the first affected year or any intervening year after taking into account the partner's share of the partnership adjustments. However, section 6226(b) specifically describes the correction amounts as amounts by which a partner's chapter 1 tax would increase for each respective year. Section 6226(b)(2)(A) and (B). Accordingly, the proposed regulations reflect the statute and do not permit any decreases in chapter 1 tax that would result for the first affected year or for any intervening year to factor into the calculation of the additional reporting year tax.

ii. Election To Pay the Safe Harbor Amount

Under proposed § 301.6226-3(c), a partner that is furnished a statement described in proposed § 301.6226-2 may elect under this section to pay the safe harbor amount (or the interest safe harbor amount, in the case of certain individuals) shown on the statement in lieu of the additional reporting year tax. The election is made on the partner's return for the reporting year. If a partner is furnished multiple statements described in proposed § 301.6226-2, the partner may elect to pay the safe harbor amount from some or all of the statements. For instance, if the IRS examined two partnership taxable years in the same administrative proceeding, and an election under section 6226 was made with respect to all imputed underpayments for both years, the partnership would be required to furnish separate statements to its reviewed year partners and to calculate separate safe harbor amounts for each year. A reviewed year partner could elect to pay the safe harbor amount for one taxable year, but not the other taxable year. If a partner elects to pay the safe harbor amount, the partner must report the safe harbor amount on the partner's timely-filed return (excluding extensions) for the partner's reporting year. If the partner fails to do so, the partner may not utilize the safe harbor amount, but instead must compute the additional reporting year tax under proposed § 301.6226-3(b) as if no election under proposed § 301.6226-3(c) had been made.

Proposed § 301.6226-2(g) provides rules for the partnership to compute the safe harbor amount and the interest safe harbor amount, which cannot be less than zero, for inclusion in the section 6226 statement furnished to each reviewed year partner and filed with the IRS. For purposes of calculating the safe harbor amount, all of the allocation rules of proposed § 301.6226-2(f) apply. Under proposed § 301.6226-2(g), the safe harbor amount for each reviewed year is calculated in the same manner as the imputed underpayment under proposed § 301.6225-1 except that the adjustments allocated to the partner on the statement (including any amounts attributable to adjustments to partnership tax attributes) are used instead of the adjustments that are taken into account for purposes of determining the imputed underpayment under proposed § 301.6225-1. With one exception, any approved modifications of the imputed underpayment, including a rate modification under section 6225(c)(4), has no effect on the determination of the safe harbor amount for any partner.

The one exception is where a reviewed year partner filed an amended return, or entered into a closing agreement, during the modification phase under section 6225(c)(2), and as a result, the imputed underpayment, to which an election under this section relates, was determined without regard to the adjustments taken into account on the amended return or in the closing agreement. In that case, such adjustments are not taken into account in determining that partner's safe harbor amount.

In addition to the safe harbor amount, a partnership must calculate an interest safe harbor amount for partners who are individuals and who have a calendar year taxable year. The interest safe harbor amount is calculated at the rate set forth in proposed § 301.6226-3(d)(4) from the due date (without extension) of the individual reviewed year partner's return for the first affected year until the due date (without extension) of the individual reviewed year partner's return for the reporting year.

A separate safe harbor amount (and interest safe harbor amount, if applicable) is calculated for each separate statement furnished to the partner under proposed § 301.6226-2. For example, if there are multiple reviewed years, the partner would receive a separate statement for each reviewed year, and there would be a separate safe harbor calculation and amount for each statement.

The purpose of the safe harbor amount (and the interest safe harbor amount) is to provide a simplified method for the reviewed year partner to take into account the reviewed year partner's share of the adjustments with respect to the partnership's reviewed year. Determining what the reviewed year partner's increase in chapter 1 tax would be in the partner's first affected year if the adjustments were taken into account in that year, the increase in chapter 1 tax that would have occurred as a result of any adjustment to the tax attributes for each intervening year, and interest due for the first affected year and each intervening year could be very complex. In addition, because the statute only permits adjustments to increase, but not decrease, chapter 1 tax for any taxable year, adjustments taken into account under section 6226(b) do not fully reflect the tax consequences of treating the items correctly in the reviewed year. While the safe harbor amount also does not reflect the tax consequences of treating the items correctly in the reviewed year any better than the method prescribed by the statute, it is a reasonable alternative to approximate the tax that would have been due. In some cases, many years may have lapsed between the first affected year and the last intervening year, further complicating the calculation. Accordingly, while determination of the aggregate of the correction amounts provides a close but imperfect approximation of the partner's tax that would have been due if the partnership return was correct in the reviewed year, some partners may decide that the complexity and cost of doing the calculations necessary to determine the aggregate of the correction amounts is not worth the effort given that the aggregate of the correction amounts may not be exactly what the tax due would have been if the partnership return was correct in the reviewed year.

Under the proposed regulations, the safe harbor amount is computed so that partners filing amended returns under section 6225(c)(2) or entering into closing agreements are not paying tax twice on the same adjustment. In addition, the safe harbor amount is determined by multiplying the net adjustments against the highest tax rate under section 6225(b)(1)(A). Use of a fixed rate rather than requiring the reviewed year partner to determine the rate in the first affected year and the intervening years allows the partnership to compute the safe harbor amount for the reviewed year partner, further reducing burden on the reviewed year partner.

The election under section 6226 is a partnership election and the partners are bound by the election. See section 6223(b); proposed § 301.6226-1(d). Although reviewed year partners can avoid the computation under section 6226(b) by filing an amended return (or entering into a closing agreement) and paying the tax and interest due in accordance with section 6225(c)(2) during the modification phase of the audit, not all partners are willing or able to amend their returns for the relevant year. Therefore, the Treasury Department and the IRS believe that it is important to allow partners an option to pay a simplified safe harbor amount in lieu of computing the correction amounts described under proposed § 301.6226-3(b) and a simplified interest safe harbor amount for certain individuals in lieu of computing the interest on the safe harbor amount under proposed § 301.6226-3(d)(2).

Any reviewed year partner may elect to pay the safe harbor amount, including reviewed year partners that are partnership-partners or S corporation partners.

iii. Interest

Reviewed year partners are also liable for interest on any correction amount for the first affected year and any intervening years under proposed § 301.6226-3(d)(1). If the partner elects to pay the safe harbor amount, a reviewed year partner that is an individual may also elect to pay the interest safe harbor amount. For all other partners and individuals that do not elect the safe harbor amount, interest applies under proposed § 301.6226-3(d)(2). Interest on the correction amounts and the safe harbor amount is determined at the partner level. Under proposed § 301.6226-3(d)(4), the rate of interest is calculated using the underpayment rate under section 6621(a)(2), except that when determining that rate, five percentage points are used instead of three percentage points, with the result that the underpayment rate for purposes of section 6226 is the federal short-term rate plus five percentage points.

Under proposed § 301.6226-3(d)(1), a reviewed year partner is liable for interest on any correction amount from the first affected year and any intervening years from the due date of the return (without extension) for the applicable tax year (that is, the year to which the additional tax is attributable) until the correction amount is paid. For purposes of calculating interest, the safe harbor amount and any penalties, additions to tax, or additional amounts are attributable to adjustments taken into account for the first affected year. Therefore, proposed § 301.6226-3(d)(2) and (3) provide that the reviewed year partner is liable for interest on the safe harbor amount and any penalties, additions to tax, or additional amounts from the due date of the return for the corresponding first affected year (without extension) until the reviewed year partner pays such amounts.

The Preamble to proposed regulations [REG-118067-17] (2/2/2018), includes:

3. Provisions Relating to Section 6226

A. In General

Section 6226(b) describes how partnership adjustments are taken into account by the reviewed year partners if a partnership makes an election under section 6226(a). Under section 6226(b)(1), each partner's tax imposed by chapter 1 of subtitle A of the Code (chapter 1 tax) is increased by the aggregate of the adjustment amounts as determined under section 6226(b)(2). This increase in chapter 1 tax is reported on the return for the partner's taxable year that includes the date the statement described under section 6226(a) is furnished to the partner by the partnership (reporting year). The aggregate of the adjustment amounts is the aggregate of the correction amounts. See proposed § 301.6226-3(b).

The adjustment amounts determined under section 6226(b)(2) fall into two categories. Under section 6226(b)(2)(A), in the case of the taxable year of the partner that includes the end of the partnership's reviewed year (first affected year), the adjustment amount is the amount by which the partner's chapter 1 tax would increase for the partner's first affected year if the partner's share of the adjustments were taken into account in that year. Under section 6226(b)(2)(B), in the case of any taxable year after the first affected year, and before the reporting year (that is, the intervening years), the adjustment amount is the amount by which the partner's chapter 1 tax would increase by reason of the adjustment to tax attributes determined under section 6226(b)(3) in each of the intervening years. The adjustment amounts determined under section 6226(b)(2)(A) and (B) are added together to determine the aggregate of the adjustment amounts for purposes of determining additional reporting year tax, which is the increase to the partner's chapter 1 tax in accordance with section 6226(b)(1).

Section 6226(b)(3) provides two rules regarding adjustments to tax attributes that would have been affected if the partner's share of adjustments were taken into account in the first affected year. First, under section 6226(b)(3)(A), in the case of an intervening year, any tax attribute must be appropriately adjusted for purposes of determining the adjustment amount for that intervening year in accordance with section 6226(b)(2)(B). Second, under section 6226(b)(3)(B), in the case of any subsequent taxable year (that is, a year, including the reporting year, that is subsequent to the intervening years referenced in 6226(b)(3)(A)), any tax attribute must be appropriately adjusted.

Under the June 14 NPRM, a reviewed year partner's share of the adjustments that must be taken into account by the reviewed year partner must be reported to the reviewed year partner in the same manner as originally reported on the return filed by the partnership for the reviewed year. See proposed § 301.6226-2(f). If the adjusted item was not reflected in the partnership's reviewed year return, the adjustment must be reported in accordance with the rules that apply with respect to partnership allocations, including under the partnership agreement. However, under proposed § 301.6226-2(f)(1), if the adjustments, as finally determined, are allocated to a specific partner or in a specific manner, the partner's share of the adjustment must follow how the adjustment is allocated in that final determination.

Section 301.6226-4(b) of these proposed regulations provides that the reviewed year partners or affected partners (as described in § 301.6226-3(e)(3)(i)) must take into account items of income, gain, loss, deduction or credit with respect to their share of the partnership adjustments as contained on the statements described in proposed § 301.6226-2 (pushed-out items) in the reporting year (as defined in proposed § 301.6226-3(a)). Similarly, partnerships adjust tax attributes affected by reason of a pushed-out item in the reviewed year. In the case of a reviewed year partner that disposed of its partnership interest prior to the reporting year, that partner may take into account any outside basis adjustment under these rules in an amended return to the extent otherwise allowable under the Code.

Unlike the proposed rules under section 6225 and subchapter K described in section 2 of this preamble, under section 6226, all tax attributes (as defined in proposed § 301.6241-1(a)(10)) are adjusted for pushed out items of income, gain, deduction, loss or credit.

B. Section 704(b)

Section (2)(B)(iii) of this preamble discusses the general mechanics of section 704(b). In accordance with the principles set forth in section 704(b), an allocation of a pushed-out item does not have substantial economic effect within the meaning of section 704(b)(2). However, the allocation of such an item will be deemed to be in accordance with the partners' interests in the partnership if it is allocated in the adjustment year in the manner in which the item would have been allocated under the rules of section 704(b), including § 1.704-1(b)(1)(i) (or otherwise taken into account under subtitle A) in the reviewed year (as defined in proposed § 301.6241-1(a)(8)), followed by any subsequent taxable years, concluding with the adjustment year (as defined in proposed § 301.6241-1(a)(1)). See proposed § 1.704-1(b)(4)(xiv).

C. Timing

Under the June 14 NPRM, a reviewed year partner that is furnished a statement under proposed § 301.6226-2 is required to pay any additional chapter 1 tax (additional reporting year tax) for the partner's taxable year which includes the date the statement was furnished to the partner in accordance with proposed § 301.6226-2 (the reporting year) that results from taking into account the adjustments reflected in the statement. See proposed § 301.6226-3. The additional reporting year tax is the aggregate of the adjustment amounts, as determined in proposed § 301.6226-3(b) and described in (3)(A) of this preamble.

A commenter recommended that adjustments to capital accounts and basis should be made to the reviewed year partners in the reviewed year to prevent distortions. This comment is not adopted because, in this context, section 6226 clearly applies to the adjustment year. These proposed regulations provide that adjustments to partnership-level tax attributes are calculated with respect to each year beginning with the reviewed year, followed by subsequent taxable years, concluding with the adjustment year. See proposed § 301.6226-4(b).

D. Effect of a Payment by Pass-Through Partner

These proposed regulations provide that to the extent a pass-through partner (as defined in proposed § 301.6241-1(a)(5)) makes a payment in lieu of issuing statements to its owners described in proposed § 301.6226-3(e)(4), that payment will be treated similarly to the payment of an amount under subchapter C of chapter 63 for purposes of any adjustments to bases and capital accounts, and accordingly, the rules contained in proposed § 301.6225-4 will apply to determine any appropriate adjustments to bases and capital accounts. See proposed § 301.6226-3(e). To the extent that the pass-through partner continues to push out the partnership adjustments to its partners in accordance with proposed § 301.6226-3(e)(3), the partners receiving those adjustments will adjust their bases and capital accounts in accordance with the guidance provided in proposed § 301.6226-4.

Comments are requested as to how S corporations, trusts, and estates that are pass-through partners that pay an amount under proposed § 301.6226-3(e), and their shareholders and beneficiaries, respectively, should take these payments into account and adjust tax attributes.

The Preamble to proposed regulations [REG-136118-15] (8/17/2018), includes:

SUMMARY:

This document contains proposed regulations implementing the centralized partnership audit regime. This document withdraws and reproposes certain portions of proposed regulations implementing the centralized partnership audit regime that have not been finalized to reflect the changes made by the Technical Corrections Act of 2018, contained in Title II of the Consolidated Appropriations Act of 2018 (TTCA). The proposed regulations affect partnerships with respect to partnership taxable years beginning after December 31, 2017, as well as partnerships that make the election under the Bipartisan Budget Act of 2015 (BBA),to apply the centralized partnership audit regime to partnership taxable years beginning on or after November 2, 2015 and before January 1, 2018.

….

4. Election for the Alternative to Payment of the Imputed Underpayment

Section 6226 provides an alternative to the general rule under section 6225(a)(1) that the partnership must pay an imputed underpayment. Under section 6226, the partnership may elect to have its reviewed year partners take into account adjustments made by the IRS and pay any tax due as a result of those adjustments. If this election is made, the reviewed year partners must pay any chapter 1 tax resulting from taking into account the adjustments, and the partnership is not required to pay the imputed underpayment.

Section 206(d) of TTCA amended section 6226(a) to clarify that if a partnership makes a valid election under section 6226 with respect to an imputed underpayment, no assessment of such imputed underpayment, levy, or proceeding in any court for the collection of such imputed underpayment shall be made against such partnership.

Section 206(e) of the TTCA amended section 6226(b)(1) to provide that when a partner takes into account the adjustments, the partner's chapter 1 tax is adjusted by the aggregate of the "correction amounts" determined under section 6226(b)(2). After amendment by the TTCA, the correction amounts under section 6226(b)(2) are defined as the amounts by which the partner's chapter 1 tax would increase "or decrease" for the partner's first affected year if the partner's share of the adjustments were taken into account for that year. The correction amounts are also the amount by which the partner's chapter 1 tax would increase "or decrease" by reason of the adjustment to tax attributes for any intervening years. See section 6226(b)(2).

Section 204(a) of the TTCA added to the Code section 6226(b)(4), which provides that a partnership or S corporation that receives a statement under section 6226(a)(2) must file a partnership adjustment tracking report with the IRS and furnish statements under rules similar to the rules of section 6226(a)(2). If the partnership or S corporation fails to furnish such statements, the partnership or S corporation must compute and pay an imputed underpayment under rules similar to the rules of section 6225. A partnership that is a partner must file the partnership adjustment tracking report, and furnish statements or pay an imputed underpayment, notwithstanding any election out of the centralized partnership audit regime under section 6221(b) by the partnership for the tax year that includes the end of the reviewed year of the audited partnership. The term "audited partnership" means the partnership in the chain of ownership that originally made the election under section 6226. See section 6226(b)(4)(D).

A. Proposed §§ 301.6226-1, 301.6226-2, and 301.6226-3

Proposed rules under §§ 301.6226-1, 301.6226-2, and 301.6226-3 were previously published in the Federal Register in the June 2017 NPRM (82 FR 27391-97), the November 2017 NPRM (82 FR 56778-79), and the December 2017 NPRM (82 FR 60155-61) (collectively, former proposed §§ 301.6226-1, 301.6226-2, and 301.6226-3). For an explanation of the rules under former proposed §§ 301.6226-1, 301.6226-2, and 301.6226-3, see 82 FR 27358-66, 82 FR 56769-71, and 82 FR 60148-51.

Former proposed § 301.6226-1(b)(2) provided that if a partnership makes a valid election in accordance with proposed § 301.6226-1, the partnership is not liable for the imputed underpayment to which the election relates. To reflect the statutory change to section 6226(a), language has been added to proposed § 301.6226-1(b)(2) to clarify that if a partnership makes a valid election under section 6226 with respect to an imputed underpayment, the IRS may not assess such imputed underpayment, levy, or bring a proceeding in any court for the collection of that imputed underpayment against such partnership. A similar change has also been made to proposed § 301.6226-1(c)(2) (regarding invalid elections) to clarify that if a final determination is made that a purported election under section 6226 is invalid, the IRS may assess the imputed underpayment with respect to which the election was made against the partnership without regard to the limitations under section 6232(b).

Former proposed § 301.6226-3 provided that a reviewed year partner that is furnished a statement under section 6226(a)(2) is required to pay any additional chapter 1 tax (additional reporting year tax) that results from taking into account the partnership adjustments on that statement. As mentioned above in this section of the preamble, Section 206(e) of the TTCA amended section 6226(b) to provide that decreases, as well as increases, in chapter 1 tax that result from taking into account partnership adjustments are used in computing a partner's additional reporting year tax. Section 206(e) of the TTCA also replaced the term "adjustment amount" with "correction amount." Accordingly, proposed § 301.6226-3 now refers to "correction amount" instead of "adjustment amount," as appropriate, and now provides that a reviewed year partner's chapter 1 tax for the reporting year may be increased or decreased by the additional reporting year tax. The additional reporting year tax is the sum of the correction amounts for the first affected year and any correction amounts for the intervening years. Under proposed § 301.6226-3(b)(2) and (3), the correction amounts are the amounts by which the partner's chapter 1 tax for the taxable year would be increased or decreased if the partner's taxable income for that year were recomputed by taking into account, in the case of the first affected year, the partner's share of the partnership adjustments reflected on the statement furnished to the partner or, in the case of any intervening year, any change to tax attributes of the partner resulting from the changes in the first affected year. A correction amount for the first affected year or any intervening year may be less than zero and may be used to offset any correction amounts from any other year in computing the additional reporting year tax. The examples under proposed § 301.6226-3(h) illustrate situations in which a correction amount may be less than zero.

Furthermore, the additional reporting year tax may be less than zero and may offset other taxes owed by the partner on the partner's reporting year return. Accordingly, any references to the additional reporting year tax as a "liability" have been removed from former proposed § 301.6226-3 to account for situations in which the additional reporting year tax is less than zero.

Section 6226(c)(2) provides that interest in the case of a section 6226 election is determined at the partner level, from the due date of the return for the taxable year to which the increase in chapter 1 tax is attributable, and at the underpayment rate under section 6621(a)(2) (substituting 5 percent for 3 percent). As discussed above in this section of the preamble, the TTCA amended section 6226(b) to provide that both increases and decreases in chapter 1 tax are used in computing a partner's additional reporting year tax. However, the TTCA did not similarly amend the reference to "increases" in section 6226(c)(2) with the result that interest only applies to the increases in the chapter 1 tax that would have resulted from taking into account the partnership adjustments under section 6226. No provision under the centralized partnership audit regime provides for interest in the case of a decrease in chapter 1 tax that would have resulted in the first affected year or any intervening year if the adjustments were taken into account in those years. Accordingly, proposed § 301.6226- 3(c)(1) provides that interest on the correction amounts determined under proposed § 301.6226-3(b) is only calculated for taxable years for which there is a correction amount greater than zero, that is, taxable years for which there would have been an increase in chapter 1 tax if the adjustments were taken into account.

Proposed § 301.6226-3(c)(1) further provides that for purposes of calculating interest on the correction amounts, any correction amount that is less than zero does not offset any correction amount that is greater than zero. Although those amounts may offset when determining the additional reporting year tax (as described in proposed § 301.6226-3(b)), allowing the same offset for purposes of calculating interest is inconsistent with section 6226(c)(2), which provides that interest is determined with respect to any increase determined under section 6226(b)(2).

Proposed § 301.6226-3(d)(3) has also been clarified to provide that if a partner wants to raise a partner-level defense to any penalty, addition to tax, or additional amount, a partner must first pay the penalty, addition to tax, or additional amount and file a claim for refund for the reporting year in order to raise the defense.

As discussed above in this section of the preamble, section 204(a) of the TTCA amended section 6226(b) to provide that partnerships and S corporations that are direct or indirect partners in an audited partnership and that receive statements under 6226(a)(2) must file partnership adjustment tracking reports with the IRS and furnish statements to their owners under rules similar to section 6226. If no statements are furnished, the partnership or S corporation must compute and pay an imputed underpayment.

Former proposed § 301.6226-3(e)(1) provided that a pass-through partner (as defined in proposed § 301.6241-1(a)(5)) that was furnished a statement described in proposed § 301.6226-2 (including a statement as described in former proposed § 301.6226-3(e)(3)) must take into account the adjustments reflected on that statement by either furnishing statements to its partners or by paying an amount calculated like an imputed underpayment. Any statements furnished under those provisions were treated as statements described in proposed § 301.6226-2, and any pass-through partner receiving a statement under former proposed § 301.6226-3(e)(3) was required to also take the adjustments reflected on the statement into account by furnishing statements to its own partners or paying an amount calculated like an imputed underpayment. See former proposed § 301.6226-3(e) (3)(i) and (iv).
